INTEREST AND IDENTITY OF AMICI CURIAE	1
INTRODUCTION	1
ARGUMENT	5
I. PENNSYLVANIA AND NEW JERSEY HAVE STANDING BECAUSE MANY OF THEIR RESIDENTS, INCLUDING THOSE FACING MULTIPLE AND INTERSECTING FORMS OF DISCRIMINATION, ARE LIKELY TO LOSE COVERAGE UNDER THE RULES.....	5
II. THE RULES WILL HARM THOSE WHO LOSE COVERAGE BY REINSTATING PRE-ACA COST AND OTHER BARRIERS TO CONTRACEPTION.....	14
A. The Rules Will Make Contraception Cost-Prohibitive for Many People.	15
B. The Rules Will Create Logistical, Administrative, and Informational Barriers to Contraception.....	19
III. THE RULES WILL HARM THE HEALTH, AUTONOMY, AND ECONOMIC SECURITY OF THOSE WHO LOSE CONTRACEPTIVE COVERAGE.	21
A. The Rules Will Harm the Health of Individuals and Families.	21
1. The Rules Place More People at Risk for Unintended Pregnancy and Associated Health Risks.	21
2. The Rules Will Undermine Health Benefits from Contraception.....	24

B.	The Rules Will Undermine Individuals’ Autonomy and Control Over Their Reproductive and Personal Lives.	25
C.	The Rules Undermine Individuals’ Economic Security.	28
1.	Access to Contraception Provides Life-Long Economic Benefits to Women, Families, and Society.	28
2.	The Rules Will Exacerbate Economic and Social Disparities.	30
	CONCLUSION	31

INTEREST AND IDENTITY OF AMICI CURIAE

Amici the National Women’s Law Center, the National Latina Institute for Reproductive Health, SisterLove, Inc., the National Asian Pacific American Women’s Forum, and the 45 additional organizations listed in the Appendix, are national and regional organizations committed to obtaining racial justice, economic security, gender equity, civil rights, and reproductive justice for all, which includes ensuring that individuals who may become pregnant have access to full and equal health coverage, including contraceptive coverage without cost-sharing, as guaranteed by the Affordable Care Act (“ACA”). Amici submit this brief to demonstrate the irreparable harm that will result, particularly to those who face multiple and intersecting forms of discrimination, if the Administration’s final rules regarding the ACA’s contraceptive coverage requirement are permitted to take effect.¹

INTRODUCTION

At stake in this litigation are the health and livelihoods of people in Pennsylvania, New Jersey, and nationwide who will suffer irreparable harm under the Administration’s final rules regarding the ACA’s contraceptive coverage

¹ No counsel for a party authored this brief in whole or in part, and no person other than Amici Curiae and their counsel made a monetary contribution to fund the preparation or submission of this brief. All parties and signatories have consented to the filing of this brief.

requirement²—particularly Black, Latinx,³ Asian American and Pacific Islander (“AAPI”) women and other people of color, young people, people with limited resources, transgender men and gender non-conforming people, immigrants, people with limited English proficiency, survivors of sexual and interpersonal violence, and others who face multiple and intersecting forms of discrimination.

The ACA’s contraceptive coverage requirement obligates health plans to cover all FDA-approved methods of contraception for women, and related education, counseling, and services without cost-sharing.^{4,5} Congress intended the Women’s Health Amendment of the ACA to reduce gender discrimination in health insurance by ensuring that plans cover women’s major health needs and that

² Religious Exemptions and Accommodations for Coverage of Certain Preventative Services Under the Affordable Care Act, 83 Fed. Reg. 57,536 (Nov. 15, 2018) (hereinafter “Religious Exemptions”); Moral Exemptions and Accommodations for Coverage of Certain Preventative Services Under the Affordable Care Act, 83 Fed. Reg. 57,592 (Nov. 15, 2018) (hereinafter “Moral Exemptions”).

³ “Latinx” is a term that represents a gender-neutral alternative to Latino and Latina and encompasses the identities of transgender and gender non-conforming individuals of Latin American descent.

⁴ This brief uses the term “women” because the rules target women and the ACA was intended to end discrimination against women. As we discuss, the denial of reproductive health care and related insurance coverage also affects some gender non-conforming people and transgender men.

women no longer pay more for health care than men, including by decreasing the cost of contraception.⁶ The Departments of Health and Human Services, Treasury, and Labor (the “Departments”) have acknowledged this intent, explaining that Congress added the Women’s Health Amendment because “women have unique health care needs and burdens . . . includ[ing] contraceptive services,” and that the “Departments aim to reduce these disparities by providing women broad access to preventive services, including contraceptive services.”⁷

The ACA contraceptive coverage requirement furthers these aims by eliminating the out-of-pocket costs of contraception and ensuring coverage for the full range of FDA-approved contraceptives and related services for women. Today, an estimated 62.8 million women are eligible for coverage of the

(. . . continued)

⁵ 42 U.S.C. § 300gg-13(a)(4); Health Res. & Servs. Admin., *Women’s Preventive Services Guidelines*, <https://www.hrsa.gov/womens-guidelines-2016/index.html> (last visited Mar. 21, 2019).

⁶ 42 U.S.C. § 300gg-13(a)(4); *see also* 155 Cong. Rec. S12,021, S12,026 (daily ed. Dec. 1, 2009) (statement of Sen. Mikulski) (Women’s Health Amendment intended to alleviate “punitive practices of insurance companies that charge women more and give [them] less in a benefit”); 155 Cong. Rec. S12,033, S12,052 (daily ed. Dec. 1, 2009) (statement of Sen. Franken) (Women’s Health Amendment intended to incorporate “affordable family planning services” to “enable women and families to make informed decisions about when and how they become parents”).

⁷ Group Health Plans and Health Insurance Issuers Relating to Coverage of Preventive Services Under the Patient Protection and Affordable Care Act, 77 Fed. Reg. 8,727, 8,728 (Feb. 15, 2012) [hereinafter “ACA Coverage”].

contraceptive method that works best for them, irrespective of cost.⁸ As a result, use of contraception—especially highly-effective long-acting reversible contraceptives (“LARCs”) such as intrauterine devices (“IUDs”) and contraceptive implants—has increased.⁹ The final rules would reverse these gains by establishing a sweeping exemption permitted by neither the text nor the legislative history of the ACA allowing virtually any employer or university to deny insurance coverage for contraception and related services to employees, students, and their dependents. These expansive exemptions would undermine gender equality by reintroducing the very inequities that Congress meant to remedy.

This brief first establishes that Pennsylvania and New Jersey have standing to challenge the final rules because many individuals in these States are likely to lose contraceptive coverage, including many people already facing multiple and intersecting forms of discrimination. Second, the brief provides data showing that the rules will make contraception cost-prohibitive, and will create other non-financial barriers to contraception, for many who will lose coverage. Third, the

⁸ Nat’l Women’s Law Ctr., *New Data Estimates 62.8 Million Women Have Coverage of Birth Control Without Out-of-Pocket Costs* (2018), <https://nwlc-ciw49tixgw5lbab.stackpathdns.com/wp-content/uploads/2017/09/New-Preventive-Services-Estimates-4.pdf>.

⁹ See Ashley H. Snyder et al., *The Impact of the Affordable Care Act on Contraceptive Use and Costs among Privately Insured Women*, 28 *Women’s Health Issues* 219, 222 (2018).

brief discusses the multiple ways the rules will irreparably harm the health, autonomy, and economic security of those who lose contraceptive coverage, especially people of color and others who already face systemic discrimination in Plaintiff States and nationwide.

ARGUMENT

I. PENNSYLVANIA AND NEW JERSEY HAVE STANDING BECAUSE MANY OF THEIR RESIDENTS, INCLUDING THOSE FACING MULTIPLE AND INTERSECTING FORMS OF DISCRIMINATION, ARE LIKELY TO LOSE COVERAGE UNDER THE RULES.

Article III requires Pennsylvania and New Jersey to demonstrate an injury-in-fact that is “concrete and particularized” and “actual or imminent.” *Susan B. Anthony List v. Driehaus*, 134 S. Ct. 2334, 2341 (2014) (internal quotations omitted). “An allegation of future injury may suffice if . . . there is a substantial risk that the harm will occur.” *Id.*; see also *City of Los Angeles v. Lyons*, 461 U.S. 95, 105 (1983) (standing to seek injunction depends on whether plaintiff is “likely to suffer future injury” from defendant’s conduct). A state has standing when a quasi-sovereign interest is at stake, including “the health and well-being—both physical and economic—of its residents in general.” *Alfred L. Snapp & Son, Inc. v. Puerto Rico, ex rel., Barez*, 458 U.S. 592, 607 (1982).

Pennsylvania and New Jersey have standing. Nearly 2.7 million employees in Pennsylvania and over 1.6 million in New Jersey are enrolled in private

employer-sponsored plans and are at risk of losing coverage due to the rules, and this estimate does not include covered dependents.^{10,11} At least two employers in Pennsylvania with hundreds of employees (Hobby Lobby¹² and Conestoga Woods¹³) and at least one in New Jersey (Hobby Lobby¹⁴) will take advantage of the expanded exemptions, given that they vociferously litigated against the contraceptive coverage requirement. New Jersey law requiring coverage of contraception in state-regulated insurance plans does not apply to self-insured plans, which are governed solely by federal law.¹⁵ Over 945,500 private-sector

¹⁰ NWLC calculations from Agency for Healthcare Research and Quality, Medical Expenditure Panel Survey (MEPS), Pennsylvania Tables II.B.1, II.B.2, and II.B.2.b (2017), https://meps.ahrq.gov/data_stats/state_tables.jsp?regionid=31&year=2017 (last visited Mar. 21, 2019).

¹¹ *Id.* New Jersey Tables II.B.1, II.B.2, and II.B.2.b (2017), https://meps.ahrq.gov/data_stats/state_tables.jsp?regionid=24&year=2017 (last visited Mar. 21, 2019).

¹² Hobby Lobby has eight Pennsylvania locations. *See* Hobby Lobby Store Finder, <https://www.hobbylobby.com/store-finder> (last visited Mar. 21, 2019); *see also* Interim Religious Exemptions, 82 Fed. Reg. 47,817 n. 67 (citing 13,240 Hobby Lobby employees nationwide).

¹³ *Conestoga Wood Specialties Corp. v. Sec’y of U.S. Dep’t of Health & Human Servs.*, 724 F.3d 377, 381 (3d Cir. 2013), *rev’d and remanded sub nom. Burwell v. Hobby Lobby Stores, Inc.*, 134 S. Ct. 275 (2014) (“Conestoga is a Pennsylvania for-profit corporation that . . . has 950 employees.”).

¹⁴ *See* Hobby Lobby Store Finder, *supra* note 12.

¹⁵ *See, e.g.*, N.J. Stat. Ann. §§ 17B:26-2.1y, 17B:27-46.1ee, 17B:27A-19.15; *see also* Am. Compl. ¶¶ 141-42.

employees were enrolled in self-insured plans in New Jersey in 2017, not including covered dependents.¹⁶ Moreover, New Jersey law does not explicitly require fully-insured plans to cover contraception without cost-sharing.¹⁷ And Pennsylvania does not require any contraceptive coverage in fully insured plans.¹⁸ Thus, there is at least a “substantial risk” that Pennsylvania and New Jersey residents will lose contraceptive coverage due to the rules, rendering the injury sufficiently imminent for standing purposes. *Susan B. Anthony List*, 134 S. Ct. at 2341; *Lyons*, 461 U.S. at 105.

Given the broad reach of the rules, the Departments are wrong to assume that only those entities that filed litigation or requested an accommodation, and a trivial number of similar entities, will take advantage of the expanded

¹⁶ NWLC calculations from MEPS, New Jersey Tables II.B.1, II.B.2, II.B.2.b, and II.B.2.b(1) (2017), https://meps.ahrq.gov/data_stats/state_tables.jsp?regionid=24&year=2017 (Mar. 21, 2019).

¹⁷ *See, e.g.*, N.J. Stat. Ann. §§ 17B:26-2.1y, 17B:27-46.1ee, 17B:27A-19.15; *see also* Am. Compl. ¶¶ 141-42.

¹⁸ Federal anti-discrimination law does offer some protection to employees. Title VII of the Civil Rights Act of 1964, which prohibits sex discrimination in employment, requires employers to provide contraceptive coverage if they otherwise provide comprehensive preventive care and prescription drug coverage. U.S. Equal Employment Opportunity Commission on Coverage of Contraception (Dec. 14, 2000), <https://www.eeoc.gov/policy/docs/decision-contraception.html>.

exemptions.¹⁹ By extending the religious exemption to all non-governmental universities and employers, including publicly traded companies, the rules greatly expand the number of entities eligible for an exemption. Moreover, some of the original litigating entities represent multiple, unidentified employers: the Catholic Benefits Association *alone* represents over 1,000 employers.²⁰

The Departments also underestimate the likely impact of the “moral” exemption, as the rule does nothing to circumscribe what types of convictions may be invoked to claim the exemption, nor does it require objectors to file a statement of the basis for their objection that could permit oversight.²¹ As the district court correctly observed about the interim rules—identical to the final rules in this respect—“[w]ho determines whether the expressed moral reason is sincere or not or, for that matter, whether it falls within the bounds of morality or is merely a preference choice, is not found within the terms of the Moral Exemption Rule.” *Pennsylvania v. Trump*, 281 F. Supp. 3d 553, 577 (E.D. Pa. 2017).

The Departments are also wrong to assume that employees of objecting

²¹ *See* Moral Exemptions, 83 Fed. Reg. 57,625–28.

entities share their employers' moral or religious objections to contraception.²² Many women of faith and their dependents who rely on objecting entities for health insurance use contraception. More than 99% of sexually experienced women aged 15-44 have used at least one method of contraception, regardless of religious affiliation.²³ Among sexually experienced Catholic women, 98% have used contraception; that number is 95% for married Catholic Latinas.²⁴ Over 70% of Protestant women use a "highly effective contraceptive method" (including sterilization, IUDs, the pill, and other hormonal methods).²⁵ Of Latina and Latino voters, 86% consider contraception to be preventive health care and 82% do not view contraception through a religious lens.²⁶ Thus, contrary to the Departments'

assertions, many Pennsylvania and New Jersey residents are likely to lose a vital health benefit under the rules. *Lyons*, 461 U.S. at 105.

Additionally, a substantial number of individuals at risk of losing coverage are those who can least afford it. The Departments suggest that the rules will have little effect on women with low incomes and women of color because they are less likely to depend upon employer-sponsored health plans.²⁷ To the contrary, many low-wage workers—who are disproportionately women of color²⁸—and their dependents rely on employer-sponsored health insurance.²⁹ Among the nearly 159,000 private sector employers in Pennsylvania offering health benefits, 20%—nearly 32,000 employers—have a predominantly low-wage workforce, and 40%—over 64,000 employers—are in the retail and non-professional services

³⁴ *Id.*

taxes, and other necessities in Pennsylvania.³⁶ Faced with out-of-pocket expenses for contraception, many female retail workers, particularly women of color, will be forced to forgo contraception or other necessities due to cost.

The same holds true for young people, who often have limited resources, large educational debt, and little ability to absorb extra costs. Many young people rely on student health plans governed by the ACA. Other young people are dependents in employer-sponsored plans, either from their own employment or because the ACA allows young adults to remain on their parents' or guardians' health plan until age 26. From 2010-2013, 2.3 million dependent young adults—including 89,000 in Pennsylvania and 59,000 in New Jersey—gained or maintained coverage under this provision and stand to lose contraceptive coverage under the rules if their parents' employers object to it.³⁷

The Departments also incorrectly assume that many who lose contraceptive coverage can access contraception through existing government-sponsored

programs, such as Title X, Medicaid, and state-run programs.³⁸ While the rules will certainly force thousands more women to seek contraceptive care from these already-strained programs, causing Pennsylvania and New Jersey fiscal harm, many who lose ACA coverage will not be able to access such care due to eligibility restrictions and capacity constraints.³⁹ In addition, anti-immigrant provisions in Medicaid restrict eligibility for most lawful permanent residents—many of whom are Latinx and AAPI—for five years.⁴⁰ For eligible women, Medicaid and Title X do not have the capacity to meet current needs, much less the demand from thousands who lose coverage under the final rules.⁴¹ Moreover, there are regions in Pennsylvania and New Jersey without reasonable access (one clinic per 1,000

⁴¹ Jennifer J. Frost et al., Guttmacher Inst., *Contraceptive Needs and Services, 2014 Update* 12, 30 (2016), https://www.guttmacher.org/sites/default/files/report_pdf/contraceptive-needs-and-services-2014_1.pdf (publicly-funded providers met only 39% of need for publicly-supported contraceptive services in 2014).

women in need) to a publicly-funded clinic offering the full range of FDA-approved contraceptive methods.⁴² The Administration’s ongoing attempts to restructure Title X and Medicaid will further burden already-scarce resources.⁴³

II. THE RULES WILL HARM THOSE WHO LOSE COVERAGE BY REINSTATING PRE-ACA COST AND OTHER BARRIERS TO CONTRACEPTION.

The ACA dramatically reduced out-of-pocket expenditures on contraception, resulting in increased use.⁴⁴ Without coverage, women will again face financial, logistical, informational, and administrative barriers making it more difficult to access the contraceptive method of their choice. These changes will particularly affect women of color, young people, transgender and gender non-conforming people, and others facing stark health disparities due to systemic barriers to

⁴² Power to Decide, *Publicly Funded Sites Offering All Birth Control Methods By County*, <https://powertodecide.org/what-we-do/access/access-birth-control> (last visited Mar. 21, 2019).

⁴³ See, e.g., Nat’l Women’s Law Ctr., *The Stealth Attack on Women’s Health: Medicaid Work Requirements Would Reduce Access To Care For Women Without Increasing Employment* (2017), <https://nwlc.org/wp-content/uploads/2017/04/Medicaid-Work-Requirements-1.pdf>; see also Compliance with Statutory Program Integrity Requirements, 84 Fed. Reg. 7714 (Mar. 4, 2019) (codified at 42 C.F.R. Part 59) (revising Title X regulations). The Title X final rule would redefine “low-income family” for Title X eligibility to include women who lose contraceptive coverage because of an employer’s objection. This redefinition illegally defies the plain meaning and purpose of Title X, and in any event the final rule does nothing to ensure Title X providers actually have the capacity to meet the needs of these additional women.

⁴⁴ See Snyder, *supra* note 9, at 222.

contraceptive and other reproductive health care.

A. The Rules Will Make Contraception Cost-Prohibitive for Many People.

The Departments claim contraception is “relatively low cost,”⁴⁵ but in fact, without insurance coverage, contraception is expensive. Prior to the ACA, women spent between 30% and 44% of their total out-of-pocket health costs just on contraception.⁴⁶ A 2009 study found that oral contraception (the pill) costs \$2,630 over five years on average, and other very effective methods such as injectables, transdermal patches, and the vaginal ring, cost women between \$2,300 and \$2,800 over a five-year period.⁴⁷ Today, women without insurance can be expected to spend \$850 annually—or \$4,250 over five years assuming static costs—on oral contraception and attendant care.⁴⁸ LARCs—among the most effective contraceptives—carry the highest up-front costs: IUDs can cost up to \$1,300 up

front,⁴⁹ in addition to costs of ongoing care.⁵⁰

Cost is a major determinant of whether people obtain needed health care, particularly for low-income individuals.⁵¹ Studies confirm that “[e]ven small increments in cost sharing have been shown to reduce the use of preventive services.”⁵² When finances are strained, women cease using contraception, skip pills, delay filling prescriptions, or purchase fewer packs at once.⁵³ Before the ACA, 55% of young women reported experiencing a time when they could not

afford contraception consistently.⁵⁴ Higher out-of-pocket costs also result in women using methods that are medically inappropriate or less effective.⁵⁵

The ACA contraceptive coverage requirement has yielded enormous cost-savings.⁵⁶ The mean total out-of-pocket expenditures for FDA-approved contraceptives decreased approximately 70% following the ACA.⁵⁷ Women saved \$1.4 billion in 2013 on oral contraception alone,⁵⁸ and use has increased,⁵⁹

⁵⁷ A. Law et al., *Are Women Benefiting from the Affordable Care Act? A Real-World Evaluation of the Impact of the Affordable Care Act on Out-of-Pocket Costs for Contraceptives*, 93 *Contraception* 392, 397 (2016).

⁵⁸ Becker & Polsky, *supra* note 46, at 1208.

particularly of the most effective forms of contraception: one study found that “the removal of the cost barrier to IUDs and implants has increased their rate of adoption after the ACA.”⁶⁰ The rules will reverse these critical gains.

Notwithstanding these significant overall decreases in out-of-pocket costs under the ACA, racial and ethnic disparities in access to contraception persist. Black, Latina, and AAPI women are less likely to use prescription contraception than their white peers due to structural barriers such as geographically inaccessible providers and inflexible work schedules.⁶¹ In the past two years, four in ten Latina and Latino voters under age 45 have gone without the contraceptive method of

their choice because of access issues.⁶² Insurance coverage for contraception is an important factor in reducing these disparities.⁶³ The rules will exacerbate existing disparities by inhibiting access to such coverage.

B. The Rules Will Create Logistical, Administrative, and Informational Barriers to Contraception.

The rules will also impose other barriers to contraception, including logistical, informational, and administrative burdens resulting from having to navigate the health care system without employer- or university-sponsored contraceptive coverage.

Navigating the health care system is already complicated, requiring resources such as free time, regular and unlimited phone and internet access, privacy, transportation, language comprehension, and ability to read and respond to complex paperwork. It is, therefore, particularly difficult for individuals with limited English proficiency and for people in low-wage jobs—disproportionately women of color—who often work long, unpredictable hours with little or no

⁶² Nat'l Latina Inst. for Reproductive Health, *supra* note 26, at 2.

⁶³ McMorrow, *supra* note 61; Dehlendorf, *supra* note 61, at 216.

scheduling flexibility or reliable access to transportation.⁶⁴

Many who lose coverage will be forced by cost constraints to navigate switching away from providers they trust and who know their medical histories. This interruption in continuity of care poses particular challenges for people of color, people with limited English proficiency, and LGBTQ people, who already face multiple barriers to obtaining reproductive health services, including language barriers, providers' lack of cultural competency, providers' limited geographic availability, and implicit bias and discrimination.⁶⁵ Having to switch from a trusted provider is particularly consequential for transgender and gender non-conforming people, who report pervasive provider discrimination and refusals to provide care, cultural insensitivity, and ignorance of gender affirming care.⁶⁶

⁶⁶ James, *supra* note 65, at 96-99.

III. THE RULES WILL HARM THE HEALTH, AUTONOMY, AND ECONOMIC SECURITY OF THOSE WHO LOSE CONTRACEPTIVE COVERAGE.

A. The Rules Will Harm the Health of Individuals and Families.

Contraception is a vital component of preventive health care: it combats unintended pregnancy and its attendant health consequences, avoids exacerbating medical conditions for which pregnancy is contraindicated, and offers standalone health benefits unrelated to pregnancy. By reinstating cost and other barriers to contraception, the rules will harm the health of individuals and families, particularly those already suffering negative health outcomes for which access to contraception is critical.

1. The Rules Place More People at Risk for Unintended Pregnancy and Associated Health Risks.

By limiting access to contraception, the rules will increase the risk of unintended pregnancy, which, due to systemic barriers, is already higher for women of color and young people (including LGBTQ youth).⁶⁷ People with

⁶⁷ IOM Rep., *supra* note 52, at 103-04; Lawrence B. Finer & Mia R. Zolna, *Shifts in Intended and Unintended Pregnancies in the United States, 2001–2008*, 104 Am. J. Pub. Health S43, S47 (2014); Kashif Syed, Advocates for Youth, *Ensuring Young People’s Access to Preventive Services in the Affordable Care Act 2* (2014), <http://www.advocatesforyouth.org/storage/advfy/documents/Preventive%20Services%20in%20the%20ACA-11-24-14.pdf>; Lisa L. Lindley & Katrina M. Walsemann, *Sexual Orientation and Risk of Pregnancy Among New York City High-School Students*, 105 Am. J. Pub. Health 1379, 1383 (2015).

unplanned pregnancies are more likely to have delayed prenatal care, leaving potential health complications unaddressed and increasing risks of infant mortality, birth defects, low birth weight, and preterm birth.⁶⁸ Women with unintended pregnancies are also at higher risk for maternal morbidity and mortality, maternal depression, and physical violence during pregnancy.⁶⁹ The U.S. has a higher maternal mortality rate than any other high-income country, especially for Black women.⁷⁰ By creating additional barriers to contraception and preconception care, the rules threaten to increase rates of unintended pregnancy and related health

⁶⁸ IOM Rep., *supra* note 52, at 103; *see also* Cassandra Logan et al., Nat'l Campaign to Prevent Teen & Unplanned Pregnancy, Child Trends, Inc., *The Consequences of Unintended Childbearing: A White Paper* 3-5 (2007), <https://pdfs.semanticscholar.org/b353/b02ae6cad716a7f64ca48b3edae63544c03e.pdf>.

risks.

The Departments question whether availability of contraceptive coverage without cost-sharing decreases the incidence of unintended pregnancy.⁷¹ The post-ACA research corroborates that lowering the cost of contraception leads to increased use.⁷² And increased access to contraception without cost-sharing results in fewer unintended pregnancies.⁷³ Denying contraceptive coverage was found to have resulted in 33 more pregnancies per 1000 women.⁷⁴

The Departments also incorrectly assert that harm to women will be mitigated because some objecting entities may voluntarily choose to cover some methods.⁷⁵ But allowing employers or universities to pick and choose covered methods undermines people's ability to consistently use the contraceptive that is most appropriate for them, increasing the risk of unintended pregnancy.

⁷⁴ W. Canestaro et al., *Implications of Employer Coverage of Contraception: Cost-Effectiveness Analysis of Contraception Coverage Under an Employer Mandate*, 95 *Contraception* 77, 83, 85 (2017).

Inconsistent or incorrect contraceptive use accounts for 41% of unintended pregnancies in the U.S.; non-use accounts for 54%.⁷⁶ Women are more likely to use contraception consistently and correctly when they choose the method that suits their needs.⁷⁷

2. The Rules Will Undermine Health Benefits from Contraception.

Contraception allows women to delay pregnancy when contraindicated and offers several standalone benefits unrelated to pregnancy. Although most women aged 18-44 who use contraception do so to prevent pregnancy (59%), 13% use it solely to manage a medical condition, and 22% use it for both purposes.⁷⁸

Contraception is necessary to control medical conditions complicated by pregnancy, including diabetes, obesity, pulmonary hypertension, and cyanotic

heart disease.⁷⁹ Contraception also treats menstrual disorders, reduces menstrual pain, reduces the risk of certain cancers including endometrial and ovarian cancer, and helps protect against pelvic inflammatory disease.⁸⁰

By reinstating cost barriers, the rules will aggravate medical conditions and undermine essential health benefits.

B. The Rules Will Undermine Individuals' Autonomy and Control Over Their Reproductive and Personal Lives.

The Supreme Court has recognized that “[t]he ability of women to participate equally in the economic and social life of the Nation has been facilitated by their ability to control their reproductive lives.” *Planned Parenthood of Se. Pa. v. Casey*, 505 U.S. 833, 856 (1992); *see also Griswold v. Connecticut*, 381 U.S. 479, 485-86 (1965). Women report that the ability to plan their lives is a main reason they use contraception.⁸¹

Contraception and the freedom it affords are particularly important for communities with histories of subjection to the control of others in their sexual and reproductive lives. During slavery, Black women were legal chattel of their

masters, with no ability to resist unwanted sex or childbearing.⁸² Slavery gave way to twentieth century policies and practices that encouraged and coerced women of color, individuals with disabilities, and so-called “sexual deviants,” to refrain from reproduction, culminating in forced sterilizations without informed consent.⁸³ Affordable access to contraception empowers individuals to control their reproductive futures.

Contraception is also critical to the autonomy of transgender men and gender non-conforming individuals, permitting individuals to align their gender identity with their physiology by enabling them to prevent pregnancy and control menstruation.⁸⁴ Social exclusion and bias in health care already contribute to transgender men experiencing higher incidence of depression, anxiety, and

suicide.⁸⁵ For some, pregnancy and menstruation can cause gender dysphoria—the distress resulting from one’s physical body not aligning with one’s sense of self.⁸⁶

Finally, contraception is vital for survivors of rape and interpersonal violence.⁸⁷ Access to emergency contraception without cost-sharing empowers sexual assault survivors to prevent resulting pregnancy, and is critical for students given the high rate of sexual assault on college campuses.⁸⁸ The shot and LARCs enable women to prevent pregnancy with reduced risk of detection by or interference from partners.⁸⁹ Without these options, pregnancy can entrench a woman in an abusive relationship, endangering the woman, her pregnancy, and her

children. Abusive partners often engage in “reproductive coercion” to promote unwanted pregnancy, including interfering with contraception or abortion.⁹⁰ By impeding access to contraceptive methods less susceptible to interference, the rules harm women’s ability to resist such coercion.⁹¹

C. The Rules Undermine Individuals’ Economic Security.

The rules will thwart people’s ability to plan, delay, space, and limit pregnancies as is best for them, thereby undermining their financial stability, educational advancement, and career goals.

1. Access to Contraception Provides Life-Long Economic Benefits to Women, Families, and Society.

Access to contraception has life-long economic benefits: it enables women to complete high school and higher levels of education, improves their earnings and labor force participation, and secures their economic independence.⁹² The availability of the oral contraceptive pill alone is associated with roughly one-third

of the total wage gains for women born from the mid-1940s to early 1950s.⁹³ Access to oral contraceptives has improved women’s educational attainment,⁹⁴ which in turn has increased women’s participation in law, medicine, and other professions.⁹⁵ While wage disparities persist, contraception has helped advance gender equality by reducing the gap.⁹⁶

The Departments are well-aware of these significant benefits. In previously-issued rules, they explained that before the ACA disparities in health coverage “place[d] women in the workforce at a disadvantage compared to their male co-workers,” that “[r]esearchers have shown that access to contraception improves the social and economic status of women,” and that the contraceptive coverage requirement “furthers the goal of eliminating this disparity by allowing women to achieve equal status as healthy and productive members of the job force.”⁹⁷

By inhibiting access to contraception, the rules will threaten the economic

⁹⁷ ACA Coverage, 77 *Fed. Reg.* 8,725, 8,728.

security and advancement of women, families, and society.

2. The Rules Will Exacerbate Economic and Social Disparities.

The rules will most jeopardize the economic security of those facing systemic barriers to economic advancement. Women with limited means will have less ability to absorb the cost of an unintended pregnancy, but will be more at risk for it due to greater difficulty affording contraception.

Unplanned pregnancy can entrench economic hardship. Unplanned births reduce labor force participation by as much as 25%.⁹⁸ Avoiding unplanned pregnancy is especially important for women in low-wage jobs, who are less likely to have parental leave or predictable and flexible work schedules.⁹⁹ Many women in low-wage jobs who become pregnant are denied pregnancy accommodations and face workplace discrimination; some are forced to quit, fired, or pushed into

⁹⁸ Ana Nuevo Chiquero, *The Labor Force Effects of Unplanned Childbearing*, (Boston Univ., Job Market Paper Nov. 2010), http://www.unavarra.es/digitalAssets/141/141311_100000Paper_Ana_Nuevo_Chiquero.pdf

⁹⁹ Nat'l Women's Law Ctr., *supra* note 64, at 1, 4.

unpaid leave.¹⁰⁰ Nearly 70% of those making less than \$10 per hour are women, and a disproportionate number of women in low-wage jobs are women of color.¹⁰¹ Women of color also experience greater wage disparities than white women: among full-time workers, Latina women make only 54¢ for every dollar paid to white men; that number is 57¢ for Native American women, 63¢ for Black women, and as low as 51¢ and 56¢ for AAPI women in some ethnic subgroups.¹⁰²

CONCLUSION

The rules will cause substantial and irreparable harm to individuals in Pennsylvania, New Jersey, and nationwide, and particularly to those facing multiple and intersecting forms of discrimination. The Court should affirm the decision below.

CERTIFICATE OF SERVICE

I hereby certify that on March 25, 2019, I electronically filed the within Brief of Amici Curiae The National Women’s Law Center, The National Latina Institute For Reproductive Health, Sisterlove, Inc., The National Asian Pacific American Women’s Forum, and 45 other Amici In Support Of Plaintiff-Appellee and Affirmance with the Clerk of the Court for the United States Court of Appeals for the Third Circuit by using the appellate CM/ECF system.

I certify that all participants in the case who are registered CM/ECF users will be served by the appellate CM/ECF system.

Date: March 25, 2019

By: s/ Jeffrey Blumenfeld

APPENDIX A:

STATEMENTS OF INTEREST OF AMICI CURIAE

Advocates for Youth partners with youth leaders, adult allies, and youth-serving organizations to advocate for policies and champion programs that recognize young people's rights to honest sexual health services; and the resources and opportunities necessary to create sexual health equity for all youth. Young people have the right to lead healthy lives, which includes access to the resources and tools necessary to make healthy decisions about their lives. The Affordable Care Act increased access to contraception for young people and Advocates for Youth seeks to ensure that young people continue to have access to the wide range of reproductive and sexual health care services they need.

The Afiya Center is a non-profit organization dedicated to serving Black women of color. We believe that Black women should have access to everything they need to respond appropriately to their reproductive health choices. As a Reproductive Justice organization, we believe all women should have the right to have a child, not have a child, and raise the children they have in safe environments free from state sanctioned violence. The IFRs are state sanctioned violence that would force women to endure hardships that do not support the right to the families of their choice. We must say no to this kind of interference.

Since 1914 **American Sexual Health Association** has worked to prevent

the adverse outcomes of poor sexual health in the United States. We believe strongly that women should have access to health care coverage that includes contraceptive care. This guarantee, under the ACA is essential to ensure that people have control over their reproductive health. Sexual and reproductive health are part of overall health and well-being, and inextricably linked to a broad range of other economic and social factors. We seek to ensure that women have access to essential reproductive services.

Black Women Birthing Justice is a collective of African-American, African, Caribbean and multiracial women who are committed to transforming birthing experiences for Black women and transfolks. Our vision is that that every pregnant person should have an empowering birthing experience, free of unnecessary medical interventions. We aim to enhance Black women's faith in their strength and resilience, and empower them to make healthy choices and to stand up for the pregnancy and birth experience they envision. We believe that access to contraception is vital to reproductive justice. Part of our mission is to advocate for the right of low-income women and women on welfare to make healthy and non-coerced decisions about when and whether to get pregnant. We are signing on to this amicus brief because we believe that all women deserve accessible, no cost contraceptive coverage as outlined in the Affordable Care Act.

The Black Women's Health Imperative (BWHI) is a national

organization dedicated solely to improving the health and wellness of our nation's 21 million Black women and girls - physically, emotionally and financially. For 35 years, BWHI has advanced and promoted Black women's health through evidence-based programs and initiatives, policy and advocacy, and research translation. Our policy and advocacy team evaluates and develops national and state policies to address issues most critical to Black women's health, especially regarding breast and cervical cancers, diabetes, HIV/AIDS, intimate partner violence, sexual assault, maternal health and reproductive justice. BWHI works to ensure that Black women have access to quality, affordable health care, which includes access to all forms of contraceptives. Access to the full range of contraceptive methods, some of which alleviate gynecological conditions, is critical to the health and well-being of Black women, and BWHI participates as amicus in cases that may impact Black women's reproductive health.

The **Black Women's Roundtable (BWR)** is an intergenerational civic engagement network of the National Coalition on Black Civic Participation. BWR comprises a diverse group of Black women civic leaders of international, national, regional and state-based organizations and institutions. Together, BWR's members represent the issues and concerns of millions of Americans and families who live across the United States and around the world. At the forefront of championing just and equitable public policy on behalf of Black women, BWR promotes their health

and wellness, economic security, education and global empowerment as key elements for success. These issues are interconnected and BWR supports health policies that deliver quality health care for all, strengthen the safety net for our most vulnerable communities, and address disparities in access to care. Our HealthCARE is a Human Right #NotAPrivilege Campaign seeks to protect and expand Medicaid, Medicare and the Affordable Care Act (ACA) along with ensuring access to contraceptives as set forth in the ACA.

The **Center on Reproductive Rights and Justice at UC Berkeley** seeks to realize reproductive rights and advance reproductive justice by bolstering law and policy advocacy efforts, furthering scholarship, and influencing academic and public discourse. Our work is guided by the belief that all people deserve the social, economic, political, and legal conditions necessary to make genuine decisions about reproduction.

Latinas continue to face disparities in access to contraception and other critical reproductive healthcare. The **Colorado Organization for Latina Opportunity and Reproductive Rights (COLOR)** believes that we need to do more to close the gaps and ensure that people have the services they need to manage their health and plan their families.

The **Desiree Alliance** positions ourselves in the belief that reproductive access and care must be made available to all those who seek such services. Far too

long government has regulated reproductive rights/health/justice over those who seek preventative care of their bodies. Religious freedom under the guise of applicable law should never be deterrent in providing services that renders choice over legal regulation. Third party gateways should never interfere with healthcare options, and must not be allowed to withhold any healthcare choices decided by consenting and informed persons regardless of religious belief, gender, race, identity, and citizenship status.

Founded in 1974, **Equal Rights Advocates (ERA)** is a national non-profit legal advocacy organization dedicated to protecting and expanding economic and educational access and opportunities for women and girls. In concert with our commitment to securing gender equity in the workplace and in schools, ERA seeks to preserve women's right to reproductive choice and protect women's access to health care, including safe, legal contraception and abortion. In addition to litigating cases on behalf of workers and students and providing free legal advice and counseling to hundreds of women each year, ERA has participated in numerous amicus briefs in cases affecting the rights of women and girls, such as this right, and the long-term economic impacts of limited and inequitable access to opportunity and care for intersectional populations.

EverThrive Illinois (EverThrive IL) works to improve the health of women, children, and families over the lifespan by centering the values of health

equity, diverse voices, and strong partnerships. EverThrive IL focuses on health issues of key importance to women, children, and their families including child and adolescent health, immunizations, maternal and infant mortality, and health reform. Because access to safe and voluntary contraception is a human right as declared by the United Nations, can improve the quality of life for people and their families, and is central to alleviating gender-based violence, EverThrive IL is committed to upholding and advocating for the ACA contraceptive-coverage requirement.

Gender Justice is a nonprofit legal and policy advocacy organization based in the Midwest that is committed to the eradication of gender barriers through impact litigation, policy advocacy, and education. As part of its litigation program, Gender Justice represents individuals and provides legal advocacy as amicus curiae in cases involving issues of gender discrimination. Gender Justice has an interest in ensuring that all individuals capable of getting pregnant have access to birth control through their employers' insurance plans. This is central to eliminating gender discrimination and ensuring the full participation of all women in society.

Ibis Reproductive Health is a global research and advocacy organization driving change through bold, rigorous research and principled partnerships that advance sexual and reproductive autonomy, choices, and health worldwide. We believe that research can catalyze change when the entire research process is viewed as an opportunity to shift power, is undertaken in partnership with the

communities most affected, and includes a focus on how data can be most effectively used to make change. We focus on increasing access to quality abortion care, transforming access to abortion and contraception through technology and service innovations, and expanding comprehensive sexual and reproductive health information and services.

In Our Own Voice: National Black Women’s Reproductive Justice Agenda is a national-state partnership with eight Black women’s Reproductive Justice organizations: The Afiya Center, Black Women for Wellness, Black Women’s Health Imperative, New Voices for Reproductive Justice, SisterLove, Inc., SisterReach, SPARK Reproductive Justice NOW, and Women with a Vision. In Our Own Voice is a national Reproductive Justice organization focused on lifting up the voices of Black women leaders on national, regional, and state policies that impact the lives of Black women and girls. Access to contraception is critical to ensuring that all people have the human right to control our bodies, our sexuality, our gender, and our reproduction. In Our Own Voice is committed to engaging in advocacy that helps secure full access to contraceptive coverage as intended by the Affordable Care Act.

Lift Louisiana is a non-profit organization that works to improve the health and wellbeing of women, their families, and their communities. Through advocacy and direct representation of providers and women seeking access to healthcare,

including abortion care and care for incarcerated women, Lift Louisiana has first-hand experience with challenges women face when seeking such care. Lift Louisiana and its staff also have experience commenting on proposed regulations that target healthcare for women, and it has brought legal challenges to such regulations on grounds that the state agency failed to comply with administrative procedure act requirements. Because this litigation raises many of the same issues that are core to Lift Louisiana's mission and experience, Lift Louisiana has an interest in serving as an amicus in this case.

NARAL Pro-Choice America is a national advocacy organization, dedicated since 1969 to supporting and protecting, as a fundamental right and value, a woman's freedom to make personal decisions regarding the full range of reproductive choices through education, organizing, and influencing public policy. NARAL Pro-Choice America works to guarantee every woman the right to make personal decisions regarding the full range of reproductive choices. Ensuring that people can get affordable birth control and have the ability to decide whether, when, and with whom to start or expand their family is crucial to that mission.

NARAL Pro-Choice Oregon is the leading grassroots pro-choice advocacy organization in Oregon. NARAL Pro-Choice Oregon develops and sustains a constituency that uses the political process to guarantee every person who can become pregnant the right to make personal decisions regarding the full range of

reproductive choices, including preventing unintended pregnancy, bearing healthy children, and choosing legal abortion. Because access to contraception is integral to reproductive healthcare and the ability of individuals to decide whether and when to become a parent, NARAL Pro-Choice Oregon seeks to ensure that women receive full benefits of no-cost contraceptive coverage as intended by the Affordable Care Act.

The National Advocates for Pregnant Women (NAPW) is a non-profit organization working to defend and advance the human and civil rights, health and welfare of pregnant and parenting women and people with the capacity for pregnancy. NAPW defends women through legal representation and support in cases throughout the United States, and advocates for policies that protect the health and welfare of pregnant and parenting people and their families.

The National Black Justice Coalition (NBJC) is a civil rights organization dedicated to the empowerment of Black lesbian, gay, bisexual, transgender, queer and same gender loving people, including people living with HIV/AIDS. Because access to contraception is of tremendous significance to all women's health, equality, and economic security, NBJC seeks to ensure that women receive the full benefits of seamless access to no-cost contraceptive coverage as intended by the Affordable Care Act, and has participated as amicus in numerous cases that affect this right.

The **National Asian Pacific American Women’s Forum (NAPAWF)** is the only national, multi-issue Asian American and Pacific Islander (“AAPI”) women’s organization in the country. NAPAWF’s mission is to build a movement to advance social justice and human rights for AAPI women, girls, and transgender and gender non-conforming people. NAPAWF approaches all of its work through a reproductive justice framework that seeks for all members of the AAPI community to have the economic, social, and political power to make their own decisions regarding their bodies, families, and communities. Its work includes advocating for the reproductive health care needs of AAPI women and ensuring AAPI women’s access to reproductive health care services. Legal and institutional barriers to reproductive health care disproportionately impact women of color, low-income women, and other marginalized groups. Without legal protection to ensure meaningful, affordable access to basic reproductive health care, including contraception, many AAPI women are left without the crucial health and family planning services that they need to be able to make their own decisions regarding their bodies, families, and communities. Consequently, NAPAWF has a significant interest in ensuring that all people, regardless of their economic circumstances, immigration status, race, gender, sexual orientation, or other social factors, have affordable access to safe and effective contraception.

The National Center for Law and Economic Justice advances the cause of economic justice for low-income families, individuals, and communities. We have worked with low-income communities fighting the systemic causes of poverty for more than 50 years. In our work, we often combat injustice and fundamental unfairness in government programs, including those that provide access to health care.

The National Center for Transgender Equality is a national social justice organization working for life-saving change for the over 1.5 million transgender Americans and their families. NCTE has seen the harmful impact that discrimination in health care settings has on transgender people and their loved ones, including discrimination based on religious or moral disapproval of who transgender people are, how they live their lives, and their reproductive choices. Discrimination against transgender people in health care—whether it is being turned away from a doctor’s office, being denied access to or coverage of basic care, or being mistreated and degraded simply because of one’s transgender status—is widespread and creates significant barriers to care, including contraceptive care. NCTE works to ensure that transgender people and other vulnerable communities are protected from discrimination in health care and other settings and have autonomy over their bodies and health care needs.

Founded in 1899, the **National Consumers League (NCL)** is America’s

pioneering non-profit consumer advocacy organization. For nearly 120 years, NCL has worked to ensure consumers' access to quality, affordable healthcare. As part of our mission, NCL advocated for passage of the Women's Preventive Services provisions of the Affordable Care Act, including coverage of contraception with no cost-sharing. NCL is committed to ensuring that access to no-cost contraceptive coverage – a necessary component of basic health care for women – is protected.

The National Institute for Reproductive Health (NIRH) is a non-profit advocacy organization working to build a society in which everyone has the freedom and ability to control their reproductive and sexual lives. NIRH promotes its mission by galvanizing public support for access to reproductive health care, including abortion and contraception, and supporting public policy that ensures that women have timely, affordable access to the full range of reproductive health care in their communities.

The National Latina Institute for Reproductive Health (NLIRH) is the only national reproductive justice organization dedicated to advance health, dignity, and justice for 28 million Latinas, their families, and communities in the United States. Through leadership development, community mobilization, policy advocacy, and strategic communications, NLIRH works to ensure that all Latinas are informed about the full range of options for safe and effective forms of

contraception and family planning. NLIRH believes that affordable access to quality contraception and family planning is essential to ensuring that all people, regardless of age or gender identity, can shape their lives and futures.

Since 1973, the **National LGBTQ Task Force** has worked to build power, take action, and create change to achieve freedom and justice for lesbian, gay, bisexual, transgender, and queer ("LGBTQ") people and our families. As a progressive social justice organization, the Task Force works toward a society that values and respects the diversity of human expression and identity and achieves equity for all.

The **National Network to End Domestic Violence (NNEDV)** is a not-for-profit organization incorporated in the District of Columbia in 1994 (www.nnedv.org) to end domestic violence. As a network of the 56 state and territorial domestic violence and dual domestic violence sexual assault Coalitions and their over 2,000 member programs, NNEDV serves as the national voice of millions women, children and men victimized by domestic violence. NNEDV is committed to the wide availability of reproductive health care, including low-cost and confidential access to birth control. This is a critical need for survivors of domestic violence to protect their health and safety.

The **National Organization for Women (NOW) Foundation** is a 501 (c)(3) entity affiliated with the National Organization for Women, the largest

grassroots feminist activist organization in the United States with chapters in every state and the District of Columbia. Since its inception, NOW Foundation's goals have included advocating for improved access to the full range of reproductive health services for all women, no matter where they work or what their income level may be. NOW Foundation is opposed to any policy or regulatory provision that reduce women's access to reproductive health care services.

The National Partnership for Women & Families (National Partnership), formerly the Women's Legal Defense Fund, is a national advocacy organization that develops and promotes policies to help women achieve equal opportunity, quality health care, and economic security for themselves and their families. Since its founding in 1971, the National Partnership has worked to advance women's health, reproductive rights, and equal employment opportunities through several means, including by challenging discriminatory policies in the courts.

The National Women's Health Network ("NWHN") improves the health of all women by influencing public policy and providing health information to support decision-making by individual consumers. Founded in 1975 to give women a greater voice within the health care system, NWHN aspires to create systems guided by social justice that reflect the needs of women in all their diversities. NWHN is committed to ensuring that women have self-determination

in all aspects of their reproductive and sexual health and establishing universal access to health care. NWHN is a membership-based organization supported by thousands of individuals and organizations nationwide.

The **National Women’s Law Center (the Center)** is a non-profit legal advocacy organization dedicated to the advancement and protection of women’s legal rights and opportunities since its founding in 1972. The Center focuses on issues of key importance to women and their families, including economic security, employment, education, health, and reproductive rights, with special attention to the needs of low-income women and those who face multiple and intersecting forms of discrimination. Because access to contraception is of tremendous significance to women’s health, equality, and economic security, the Center seeks to ensure that women receive the full benefits of seamless access to contraceptive coverage without cost-sharing as intended by the Affordable Care Act and has participated as amicus in numerous cases that affect this right.

New Voices for Reproductive Justice is a Human Rights and Reproductive Justice advocacy organization with a mission to build a social change movement dedicated to the full health and well-being of Black women, femmes, and girls in Pennsylvania and Ohio. New Voices defines Reproductive Justice as the human right of all people to have full agency over their bodies, gender identity and expression, sexuality, work, reproduction and the ability to form families. Since

2004, the organization has served over 75,000 women of color and LGBTQIA+ people of color through community organizing, grassroots activism, civic engagement, youth mentorship, leadership development, culture change, public policy advocacy, and political education. In November of 2017, New Voices was instrumental in the passage of a Will of Council in the City of Pittsburgh calling on state and federal officials to ensure equitable access to a full range of reproductive health services, including contraception. This call to action exemplifies crucial recognition of the fact that unhindered access to comprehensive reproductive healthcare is fundamental to the health and well-being of our families and communities. New Voices stands in staunch opposition to discriminatory laws, policies, rules, and actions that deny people access to contraception. These barriers disproportionately harm women of color, gender nonconforming people and low-income women. All people should have access to a full range of reproductive health care, including contraceptive coverage through health insurance, free from outside interference.

Nurses for Sexual and Reproductive Health provides students, nurses and midwives with education and resources to become skilled care providers and social change agents in sexual and reproductive health and justice. As providers, we know healthcare coverage is essential to our patients' ability to access safe and compassionate care. We also know that contraception is a part of sexual and

reproductive care, which we assert is vital to the health and well-being of our patients.

The **Oklahoma Call for Reproductive Justice**, founded as a 501(c)4 in 2010, is a statewide grassroots coalition of organizations and individuals focusing on the advancement of reproductive health, rights and justice in Oklahoma. OCRJ peruses its mission through legislative advocacy, community outreach and education, and litigation. We believe that reproductive justice includes the right to have or not to have a child and respect for families in all their forms. It supports access to sexual education, contraception, abortion care and pregnancy care as well as to the resources needed to raise children in safe and healthy circumstances, with good schools and healthcare and other elements necessary for bright futures regardless of immigration status. It encompasses respect for all individuals, their partners and families, and for sexuality and for gender differences.

Population Connection is a grassroots non-profit organization committed to ensuring that every woman and family has access to the full range of contraceptive methods as a preventive service as intended by the Affordable Care Act.

Raising Women's Voices for the Health Care We Need ("RWV") is a national initiative working to ensure that the health care needs of women and families are addressed as the Affordable Care Act is implemented. It has a diverse network of thirty grassroots health advocacy organizations in twenty-nine states.

RWV has a special mission of engaging women who are not often invited into health policy discussions: women of color, low-income women, immigrant women, young women, and members of the lesbian, gay, bisexual, transgender, and queer community.

The **Reproductive Health Access Project** is a national nonprofit organization dedicated to training and supporting clinicians to make reproductive health care accessible to everyone, everywhere in the United States. We focus on three key areas: abortion, contraception, and management of early pregnancy loss. Our work focuses on integrating full-spectrum reproductive health care in primary care settings and we are guided by the belief that everyone should be able to access basic health care, including contraceptive care, from their primary care clinician.

The **Sexuality Information and Education Council of the United States (SIECUS)** has served as the national voice for sex education, sexual health, and sexual rights for over 50 years. SIECUS asserts that sexuality is a fundamental part of being human, one worthy of dignity and respect. We advocate for the rights of all people to accurate information, comprehensive sexuality education, and the full spectrum of sexual and reproductive health services. SIECUS works to create a world that ensures social justice inclusive of sexual and reproductive rights, and we view comprehensive sexuality education as a vehicle for social change. SIECUS envisions an equitable nation where all people receive comprehensive sexuality

education and quality sexual and reproductive health services affirming their identities, thereby ensuring their lifelong health and well-being. Specifically, access to contraceptive care is vital to SIECUS's mission, and SIECUS has participated in several amicus briefs impacting the right to contraceptive coverage.

The **Sargent Shriver National Center on Poverty Law** (Shriver Center) has a vision of a nation free from poverty with justice, equity and opportunity for all. The Shriver Center provides national leadership to promote justice and improve the lives and opportunities of people with low income, by advancing laws and policies, through litigation and policy advocacy, to achieve justice for our clients. The Shriver Center is committed to the health and economic security and advancement of women and recognizes the importance of access to contraception to achieve those ends. The Shriver Center seeks to ensure that women receive the full benefits of seamless access to no-cost contraceptive coverage as intended by the Affordable Care Act.

Founded in July 1989, **SisterLove, Inc.** is an HIV/AIDS and reproductive justice nonprofit service organization focusing on women, particularly women of African descent. SisterLove's mission is to eradicate the adverse impact of HIV/AIDS and other sexual and reproductive oppressions upon all women, their families, and their communities in the United States and worldwide through education, prevention, support, and human rights advocacy. To realize this

mission, SisterLove engages in advocacy, reproductive health education, and prevention. SisterLove seeks to educate and empower youth and women of color to influence the laws and policies that disparately impact them.

SisterReach, founded October 2011, is a non-profit reproductive justice organization that advocates for the human rights of women and teens of color, poor and rural women, LGBT+ people and their families in Tennessee. Reproductive Justice is a human rights framework coined by black women, centering the reproductive health and wellness of women, girls and individuals. Our mission is to empower our base to lead healthy lives, raise healthy families and live in healthy and sustainable communities. We do our work from a 3-pronged strategy of education, policy & advocacy, and culture change work.

Women of color do not need additional obstacles to obtaining the care we need to take care of ourselves and our families. We trust Black women to make our own decisions. **SisterSong: National Women of Color Reproductive Justice Collective** will speak out about any attempts to push important services out of reach.

SPARK Reproductive Justice Now! believes that access to birth control is essential to the economic security of all families and it is an important part of comprehensive reproductive healthcare.

URGE: Unite for Reproductive & Gender Equity (URGE) is a non-profit

grassroots advocacy organization that works to mobilize young people through a reproductive justice framework. URGE builds infrastructure through campus chapters and city activist networks, where we invite individuals to discover their own power and transform it into action. URGE members educate their communities and advocate for local, state, and national policies around issues of reproductive justice and sexual health.

Women With A Vision, Inc. (WWAV) is a community-based non-profit, founded in 1989 by a grassroots collective of African-American women in response to the spread of HIV/AIDS in communities of color. Created by and for women of color, WWAV is a social justice non-profit that addresses issues faced by women within our community and region. Major areas of focus include Sex Worker Rights, Drug Policy Reform, HIV Positive Women's Advocacy, and Reproductive Justice outreach. We envision an environment in which there is no war against women's bodies, in which women have spaces to come together and share their stories, in which women are empowered to make decisions concerning their own bodies and lives, and in which women have the necessary support to realize their hopes, dreams, and full potential. As such, we know that when women do not have bodily autonomy, including access to safe birth control methods, they face many barriers and obstacles to reaching their full potential. We believe that their bodies are their own and should be supported by policy, healthy communities,

and social services that support bettering their lived experiences.

The **Women's Institute for Freedom of the Press** is a non-profit media democracy organization dedicated to the advancement and protection of women's rights and voices since its founding in 1972. WIFP focuses on issues of importance to women and all those who do not have full rights. Without control over their health and well-being, women cannot fully participate in democracy. Women need access to no-cost contraceptive coverage as intended by the Affordable Care Act and therefore WIFP supports this amicus brief.

The **Women's Rights and Empowerment Network** (WREN) is a nonpartisan nonprofit organization whose mission is to build a movement to advance the health, economic well-being, and rights of South Carolina's women, girls and their families. WREN recognizes that the health and education of women and children is crucial in order to ensure statewide prosperity. We advocate for policies that address the barriers that families, predominantly women and mothers, face when accessing the rights and resources needed to make healthy and well informed decisions. Access to contraception is of tremendous significance to women's health, equality, and economic security. WREN seeks to ensure that women receive the full benefits of seamless access to no-cost contraceptive coverage as intended by the Affordable Care Act, and has advocated for this at the state and national level.

The **Women's Media Center** is an inclusive and feminist organization that works to make women and girls visible and powerful. To challenge sexism, shape public and government discourse and policies affecting women, and provide gender-specific analysis and solutions, women need to be involved in all sectors of society and have equal opportunities. We oppose policies that limit women's ability to participate equally in all sectors and that impose economic, racial, health, and civil rights costs on women that are on the basis of sex.

WV FREE is a non-profit health, rights, and justice organization dedicated to the elevation of all West Virginians through the promotion of dignity and autonomy of women and families since its founding in 1989. WV FREE focuses on issues of key importance to women and their families, including economic security, employment, education, health, and reproductive rights, with special attention to the needs of rural women, women of color, and low-income women. Because access to contraception is of tremendous significance to women's health, equality, and economic security, WV FREE seeks to ensure that women receive the full benefits of seamless access to no-cost contraceptive coverage as intended by the Affordable Care Act.
