Other Authorities

INTRODUCTION

Proposed Intervenor-Defendants, the City of Columbus, Ohio ("Columbus"), the City of Madison, Wisconsin ("Madison"), and Doctors for America ("DFA") (collectively, "Proposed Intervenors") move to intervene as of right as defendants under Rule 24(a) of the Federal Rules of Civil Procedure to protect their legal interests in upholding the two regulations at issue in this case. In the alternative, Proposed Intervenors seek permissive intervention under Rule 24(b).

Texas challenges two regulations promulgated by the Department of Health and Human Services (the "Department") under the Health Insurance Portability and Accountability Act ("HIPAA"), Appx. 0037 (Pub. L. 104-191, 110 Stat. 1936). Texas alleges they exceed the Department's statutory authority and are arbitrary and capricious, an abuse of discretion, and not in accordance with law, all in violation of the Administrative Procedure Act. Appx. 0162 (5 U.S.C. § 706(2)). Texas asks this Court to declare both violative of the APA and vacate and set them aside.

The first challenged rule, the *Standards for Privacy of Individually Identifiable Health Information*, is a 24-year-old regulation that serves as the foundation for medical privacy nationwide. Appx. 0164 (65 Fed. Reg. 82462-01 (Dec. 28, 2000) (codified at 45 C.F.R. pts. 160, 164)) (the "2000 Privacy Rule"). If it were vacated, it would drastically increase levels of medical mistrust, inhibit the ability of health care providers to protect the confidentiality of patient information, impair the ability of public health authorities to protect the public health, and throw the nation's health care system into chaos.

The Department promulgated the second challenged rule, the *HIPAA Privacy Rule to Support Reproductive Health Care Privacy*, to provide heightened protections for sensitive medical information sought to investigate the provision and reception of lawful reproductive health care. Appx. 0776–934 (89 Fed. Reg. 32976-01 (Apr. 26, 2024) (codified at 45 C.F.R. pts. 160,

164) (the "2024 Rule") (both rules together, the "Privacy Rules"). The 2024 Rule offers providers and their patients additional critical assurances and protections at a time when patients are increasingly concerned about the confidentiality of their discussions with and treatment by health care providers.

Proposed Intervenors are entitled to intervene as of right to defend both Privacy Rules. The Rules regulate health care providers such as the public health departments of the City of Columbus and the City of Madison and, in the case of DFA, its members. They are vital for protecting patient confidentiality and, in turn, ensuring that patients trust their clinicians and that their clinicians can provide them with needed medical care. And fostering trust and honesty between clinicians and their patients is essential to overall public health: accurate data allows providers and public health departments to identify and address troubling public health trends. Proposed Intervenors' motion is timely; absent successful intervention, Proposed Intervenors' interests will be impaired by the relief Texas seeks; and these unique interests cannot be adequately defended by the federal government, both because Proposed Intervenors and the government have divergent interests in this litigation and because the government is unlikely to defend the Privacy Rules after President-Elect Donald J. Trump takes office. In the alternative, Proposed Intervenors should be permitted to intervene.

"Federal courts should allow intervention where no one would be hurt and the greater justice could be attained." *Texas v. United States*, 805 F.3d 653, 657 (5th Cir. 2015) (quoting *Sierra Club v. Espy*, 18 F.3d 1202, 1205 (5th Cir. 1994)). These two principles dictate one result here: the Court should grant Proposed Intervenors' motion.

PROPOSED INTERVENORS

City of Columbus, Ohio. Proposed Intervenor City of Columbus is a municipal corporation organized under Ohio law. *See* Appx. 0936 (Ohio Const. art. XVIII § 1). Columbus has all the

powers of local self-government and home rule under the constitution and laws of the State of Ohio, which are exercised in the manner prescribed by the Charter of the City of Columbus. Columbus's public health department, Columbus Public Health, operates HIPAA-covered clinics, expends significant resources ensuring HIPAA compliance by its relevant staff, and provides a wide range of health care services on behalf of its residents, including sexual and reproductive health care. Because Columbus Public Health relies on HIPAA protections to preserve trust between its clinicians and patients as well as to protect the public health, the City of Columbus opposes Plaintiff's efforts to erode the privacy protections in the HIPAA Rules.

City of Madison, Wisconsin. Proposed Intervenor City of Madison is a municipal corporation organized under Wisconsin law. *See* Appx. 1023–29 (Wis. Stat. Ch. 66.0201–03). Madison has all the powers of local self-government and home rule under the constitution and laws of Wisconsin, which are exercised in the manner prescribed in the ordinances of the City of Madison. Madison's public health department, Public Health Madison and Dane County,[1] operates as a HIPAA-covered entity, expends significant resources ensuring HIPAA compliance by its relevant staff, and provides a wide variety of health care services to its residents, including sexual and reproductive health care. Because Public Health Madison and Dane County relies on HIPAA protections to preserve trust between its clinicians and patients as well as to protect the public health, the City of Madison also opposes Plaintiff's efforts to erode the privacy protections in the HIPAA Rules.

Doctors for America. Proposed Intervenor DFA is a nonpartisan, nonprofit organization comprised of more than 27,000 physicians, medical students, and other health professionals across the country, representing all medical specialties. DFA members are subject to HIPAA, and they

[1] The City of Madison jointly operates Public Health Madison and Dane County with Dane County.

rely on the law's protections to help preserve the physician-patient relationship and maintain trust with their patients. Because trust between providers and their patients is a critical component to delivering effective care, DFA vehemently opposes Plaintiff's efforts to erode the privacy protections in the Privacy Rules.

LEGAL STANDARD

Rule 24(a) of the Federal Rules of Civil Procedure governs intervention of right and requires intervention be granted where (1) the motion to intervene is timely; (2) the movant claims an interest relating to the property or transaction that is the subject of the action; (3) the disposition of the action may impair or impede the movant's ability to protect that interest; and (4) the movant's interest is inadequately represented by the existing parties to the suit. Fed. R. Civ. P. 24(a)(2); *La Union del Pueblo Entero v. Abbott*, 29 F.4th 299, 305 (5th Cir. 2022); *Edwards v. City of Houston*, 78 F.3d 983, 999 (5th Cir. 1996) (en banc). These factors are "measured by a practical rather than technical yardstick." *Edwards*, 78 F.3d at 999 (internal quotation marks and citation omitted); *see Brumfield v. Dodd*, 749 F.3d 339, 341 (5th Cir. 2014) ("Rule 24 is to be liberally construed."); *NBIS Constr. & Transp. Ins. Servs. v. Kirby Smith Mach., Inc.*, No. 5:20-CV-182-H, 2021 WL 4227787, at *1 (N.D. Tex. Apr. 8, 2021) (citation omitted) ("The inquiry is a flexible one, and a practical analysis of the facts and circumstances of each case is appropriate."). While would-be intervenors bear the burden of establishing all four elements, that burden is "minimal." *Texas*, 805 F.3d at 661.

Federal Rule of Civil Procedure 24(b) allows a court to permit intervention where the movant makes a timely motion and "has a claim or defense that shares with the main action a common question of law or fact," Fed. R. Civ. P. 24(b)(1)(B), taking into consideration "whether the intervention will unduly delay or prejudice the adjudication of the original parties' rights," Fed. R. Civ. P. 24(b)(3).

ARGUMENT

Proposed Intervenors satisfy all requirements for intervention as of right and, accordingly, are entitled to intervene. Alternatively, Proposed Intervenors should be permitted to intervene, as their motion is timely, their defense of the Privacy Rules shares common questions of law and fact with this case, and their intervention will not delay or prejudice the existing parties' rights.

I. Proposed Intervenors are entitled to intervention as of right.

a. Proposed Intervenors' motion is timely.

Whether a motion to intervene is timely is assessed on (1) the length of time the movant waited to file after knowing its interests were unlikely to be protected; (2) the prejudice to existing parties resulting from any delay in the movant's filing; (3) the prejudice to the movant that would result if intervention were denied; (4) and the existence of any other unusual circumstances weighing for or against timeliness. *Stallworth v. Monsanto Co.*, 558 F.2d 257, 263–66 (5th Cir. 1977). Courts do not assess these factors in a rote manner. They are "a framework and not a formula," and a motion may be timely even where all factors do not weigh in favor of timeliness. *John Doe No. 1 v. Glickman*, 256 F.3d 371, 376 (5th Cir. 2001).

On all counts relevant here, Proposed Intervenors' motion is timely.[2]

First, start with an easy metric: Motions, such as this one, made before a trial or final judgment are generally considered timely. *See John Doe No. 1 v. Glickman*, 256 F.3d 371, 378 (5th Cir. 2001); *Edwards v. City of Houston*, 78 F.3d 983, 1001 (5th Cir. 1996) ("[M]ost of our case law rejecting petitions for intervention as untimely concerns motions filed after judgment was entered in the litigation."); *Alliance for Hippocratic Med. v. U.S. Food & Drug Admin.*, No. 2:22-CV-223-Z, 2024 WL 1260639, at *2 (N.D. Tex. Jan. 12, 2024).

[2] No unusual factors militate against timeliness here. *Stallworth*, 558 F.2d at 266.

Proposed Intervenors seek to join this case in its still early stages, and before anything of substance has occurred, because the government—obligated to consider a diverse array of interests in defense of this rule—cannot adequately represent the more specific interests of Proposed Intervenors in this litigation. *See infra* Section I(d).

Proposed Intervenors have another reason to intervene at this time: The statements and actions of leaders in the incoming administration have made it apparent that, following the change in presidential administration on January 20, 2025, the federal government will likely cease defending the challenged regulations and will not adequately represent Proposed Intervenors' interests moving forward. *See infra* Section I(d). This anticipated change in defensive posture is something that Proposed Intervenors have been able to glean as the incoming administration has moved from election to office—announcing cabinet nominees and firming up its policy agenda. *See* Appx. 1415 (Texas's Memo. In Support of Mot. to Intervene at 4, *Commonwealth of Pennsylvania et al. v. Devos et al.*, 1:20-cv-01468 (D.D.C. Jan. 19, 2021), ECF No. 130-1) ("The motion is timely because it was filed close in time to the change in circumstances requiring intervention: President-elect Biden's inauguration on January 20."); *Cook County v. Mayorkas*, 340 F.R.D. 35, 45 (N.D. Ill. 2021), aff'd sub nom. *Cook County v. Texas*, 37 F.4th 1335 (7th Cir. 2022) (noting that until the end of the "administration that soon would leave office, Texas could count on [the federal agency] to defend the challenged regulation").

Second, intervention will not cause any prejudice to the existing parties as a result of "delay." *Edwards*, 78 F.3d at 1002. Proposed Intervenors move before any responsive pleading has been filed. The only activity in this litigation so far has been on a proposed schedule for the resolution of the case, with which Proposed Intervenors intend to comply. Proposed Intervenors concurrently file a proposed dispositive motion—on the date the Court had originally ordered the

existing parties to file theirs—to avoid disruption to the briefing schedule. *See* ECF No. 15, Order Granting Motion to Enter Briefing Schedule and Hold Defendants' Deadline to Respond to Complaint In Abeyance. If this motion is granted, no deadlines will need to be moved, no portions of the litigation that have already occurred will need to be rehashed or delayed, and no discovery will be disrupted. *See Wal-Mart Stores, Inc. v. Texas Alcoholic Beverage Comm'n*, 834 F.3d 562, 565–66 (5th Cir. 2016); *NBIS Constr. & Transp. Ins. Servs.*, 2021 WL 4227787, at *1 ("Here, the second factor weighs in favor of timeliness because no deadlines will need to be moved, no additional discovery will be necessary, and no delay will occur, and, therefore, the parties will not be prejudiced by [the applicant's] intervention."); *Alliance for Hippocratic Med.*, 2024 WL 1260639, at *3 ("Any delay in filing a motion to intervene 'cause[s] no prejudice whatsoever' where, during the period in question, 'the parties to [the] litigation did nothing except anticipate and prepare to address' arguments to be presented later on." (quoting *Edwards*, 78 F.3d at 1002)).

Third, by contrast, Proposed Intervenors' interests will be severely prejudiced if intervention is denied at this juncture. Without intervention, Proposed Intervenors will lose out on the "legal rights associated with formal intervention," such as the ability to brief the issues, appeal, and raise objections to a settlement (and appeal a decision granting a settlement agreement). *See Espy*, 18 F.3d at 1207. And without the participation of Proposed Intervenors actively defending the rules at stake, a decision in this case could result in significant harm to Columbus, Madison, and DFA and its members, parties with interests that are not adequately defended by the federal government. *See infra* Section I(d).

b. The Proposed Intervenors have a legally protectable interest in this matter.

To intervene under Rule 24(a)(2), an intervenor must have a "direct, substantial, legally protectable interest in the proceedings." *Edwards*, 78 F.3d at 1004 (internal quotation marks and citation omitted). This requirement is less stringent than that of Article III standing. *Texas*, 805

F.3d at 659; *see Alliance for Hippocratic Med.*, 2024 WL 1260639, at *3 (citation omitted). Instead, the inquiry "turns on whether the intervenor has a stake in the matter that goes beyond a generalized preference that the case come out a certain way." *Id.* at 657. And where, as here, the case involves a public interest question, "the interest requirement may be judged by a more lenient standard." *Brumfield*, 749 F.3d at 344 (citation omitted) (noting that the en banc Fifth Circuit has compared the interest requirement to the "zone of interest" test in public law cases); *Alliance for Hippocratic Med.*, 2024 WL 1260639, at *4 (quoting *id.*).

Organizational intervenors may seek to intervene to protect the interests of their organization, and they may also seek to intervene to assert the "interests of their individual members." *Franciscan Alliance, Inc. v. Azar*, 414 F. Supp. 3d 928, 937 (N.D. Tex. 2019). DFA seeks to do both.

i. The Cities of Columbus and Madison and DFA's members are regulated by the Privacy Rules.

Parties, like the Cities of Columbus and Madison and DFA's members, plainly have an interest in a suit "challenging the regulatory scheme that governs" them. *Wal-Mart*, 834 F.3d 562; *see Nat'l Horsemen's Benevolent & Protective Ass'n v. Black*, No. 5:21-CV-071-H, 2022 WL 974335, at *5 (N.D. Tex. Mar. 31, 2022); *accord Michigan State AFL-CIO v. Miller*, 103 F.3d 1240, 1244–48 (6th Cir. 1997).

DFA's members include providers who themselves are "covered entities" subject to the Privacy Rules. Appx. 1429–30 (45 C.F.R. § 160.103); Appx. 0008 (Petrin Decl. ¶ 10). DFA's members are subject to both civil and criminal liability for violating HIPAA. *See* Appx. 1438–43 (42 U.S.C. § 1320d-5); Appx. 1444–45 (42 U.S.C. § 1320d-6(b)). They may also be subject to professional discipline for violating the patient privacy rules of the hospitals and practices in which they work. *See* Appx. 0008 (Petrin Decl. ¶ 11). And they expend significant time and money on

HIPAA compliance and training. *See* Appx. 0009 (Petrin Decl. ¶ 14); Appx. 0015 (Oller Decl. ¶ 14); *Texas*, 805 F.3d at 658 (citation omitted); *Wal-Mart*, 834 F.3d at 567–68.

Similarly, Columbus and Madison operate public health departments that are "covered entities" subject to the HIPAA rules. Appx. 1429–30 (45 C.F.R. § 160.103); Appx. 0018 (Mitchell Decl. ¶ 5); Appx. 0025 (Johnson Decl. ¶ 15); Appx. 0032 (Heinrich Decl. ¶ 15). Columbus Public Health and Public Health Madison and Dane County operate a number of outpatient clinics and treat thousands of patients each year. Appx. 0024 (Johnson Decl. ¶ 10); Appx. 0032 (Heinrich Decl. ¶ 10). They too spend a significant amount of time and money on HIPAA compliance and training. *See* Appx. 0018 (Mitchell Decl. ¶ 6); Appx. 0025 (Johnson Decl. ¶ 16); *Nat'l Horsemen's Benevolent & Protective Ass'n v. Black*, 2022 WL 974335, at *5 (N.D. Tex. Mar. 31, 2022) (citing *Texas*, 805 F.3d at 658). Columbus Public Health has already devoted staff time toward implementing the 2024 Rule. Appx. 0020 (Mitchell Decl. ¶ 14). "If the [Rules are] overturned, their time and money will have been spent in vain." *City of Houston v. Am Traffic Sols., Inc.*, 668 F.3d 291, 294 (5th Cir. 2012) (finding that proposed intervenors were sufficiently interested to justify mandatory intervention where architects of a successful campaign to change a city's charter sought to intervene in litigation that threatened to overturn the change).

That the public health departments of Columbus and Madison and DFA's members are regulated by the Privacy Rules gives them "real, concrete stake[s] in the outcome of this litigation." *Texas*, 805 F.3d at 661. No further inquiry is needed.

ii. The Cities of Columbus and Madison and DFA's members have an interest in the provider-patient relationship.

Proposed Intervenors' interests go beyond their status as regulated parties. They also have an interest in the challenged Privacy Rules because of their interest in maintaining and strengthening the provider-patient relationship by promoting trust between patients and providers.

As the Fifth Circuit has recognized, "[t]he doctor-patient relationship requires trust and confidentiality to facilitate the candid disclosure of sensitive health information." *Huntington Ingalls, Inc. v. Director, Office of Workers' Compensation Programs, U.S. Dep't of Labor*, 70 F.4th 245, 251 (5th Cir. 2023) (citation omitted).[3]

DFA members know first-hand how difficult it can be to build a relationship with a patient and how quickly a relationship can be fractured. *See* Appx. 0009 (Petrin Decl. ¶ 13); Appx. 0014–15 (Oller Decl. ¶¶ 9–12, 15). Patients have a "reasonable expectation" that the medical information they share with their providers will be used only to treat them. Appx. 0789 (89 Fed. Reg. 32985 (Apr. 26, 2024)). If patients believe their sensitive health information will be used by law enforcement for non-health care purposes, it endangers the very relationships that DFA members and all health care providers work so hard to build. *See* Appx. 0010 (Petrin Decl. ¶ 16); Appx. 0014 (Oller Decl. ¶ 12); Appx. 0789 (89 Fed. Reg. 32984 (Apr. 26, 2024)). This risk has only increased since the Supreme Court's decision in *Dobbs v. Jackson Women's Health Organization*, 597 U.S. 215 (2022), as patients find some health care banned, and providers and patients may face investigations into the legal treatment they provide and receive. *See* Appx. 0010 (Petrin Decl. ¶ 16); Appx. 0014 (Oller Decl. ¶ 12); Appx. 0789 (89 Fed. Reg. 32984 (Apr. 26, 2024)).

Patient trust is especially vital to the Columbus and Madison public health departments which serve as providers of last resort in their communities. Appx. 0025 (Johnson Decl. ¶ 19); Appx. 0031 (Heinrich Decl. ¶ 12). Many of the patients that Columbus Public Health and Public Health Madison and Dane County treat come from historically marginalized populations. Appx.

[3] For centuries, the patient-clinician relationship has been at the heart of medical practice. This relationship has an ethical foundation and is built on confidentiality, trust, and honesty. *See* Appx. 1446–52 (Am. Med. Ass'n, *Opinion 1.1.1: Patient-Physician Relationships*, Code of Medical Ethics (Aug. 2022), https://code-medical-ethics.ama-assn.org/sites/default/files/2022-08/1.1.1%20Patient-physician%20relationships--background%20reports_0.pdf).

0025 (Johnson Decl. ¶ 19); Appx. 0033 (Heinrich Decl. ¶ 22). "[M]edical mistrust—especially in communities of color or other communities that have been marginalized or negatively affected by historical and current health care disparities—can create damaging and chilling effects on individuals' willingness to seek appropriate and lawful health care for medical conditions that can worsen without treatment." Appx. 0789–90 (89 Fed. Reg. 32985 (Apr. 26, 2024)). Patients seek out care from Columbus Public Health and Public Health Madison and Dane County instead of a family physician to preserve their anonymity and avoid stigma that can be associated with particular statuses (e.g., sex work) or health conditions (e.g., sexually transmitted infections). *See* Appx. 0026 (Johnson Decl. ¶ 20); Appx. 0033 (Heinrich Decl. ¶ 23). Trust that their personal health information will remain confidential is paramount.

Preserving this relationship of trust between providers and their patients is an aim of the Privacy Rules. *See, e.g.*, Appx. 0169 (65 Fed. Reg. 82463 (Dec. 28, 2000)) (noting that "improv[ing] the quality of health care in the U.S. by restoring trust in the health care system among consumers, health care professionals, and the multitude of organizations and individuals committed to the delivery of care" is a "major purpose[]" of the 2000 Privacy Rule); Appx. 0781 (89 Fed. Reg. 32978 (Apr. 26, 2024)) (specifying that the 2024 Rule was necessary to "continue to protect privacy in a manner that promotes trust between individuals and health care providers" in light of the "changing legal landscape").

Strong privacy protections on patient medical information and the trust they engender between patients and their providers, in turn, allow Columbus Public Health, Public Health Madison and Dane County, and DFA's members to provide competent care and comport with their ethical obligations to do so. *See* Appx. 0009 (Petrin Decl. ¶ 13); Appx. 0014–15 (Oller Decl. ¶¶ 9, 11–13); Appx. 0019 (Mitchell Decl. ¶ 8); Appx. 0032 (Heinrich Decl. ¶ 17); Appx. 1453 (Am.

Med. Ass'n, *Opinion 3.1.1: Privacy in Health Care, Code of Medical Ethics*, https://code-medical-ethics.ama-assn.org/sites/amacoedb/files/2024-12/3.1.1.pdf (last visited Jan.16, 2025)). The provision of effective care depends on the sharing of sensitive health information, which will only happen where patients trust that their information will be kept confidential. Appx. 0009 (Petrin Decl. ¶ 13); Appx. 0014–15 (Oller Decl. ¶¶ 9–13); Appx. 0025 (Johnson Decl. ¶ 18); Appx. 0032–33 (Heinrich Decl. ¶ 20); *see* Appx. 0019 (Mitchell Decl. ¶ 9); Appx. 0789 (89 Fed. Reg. 32985 (Apr. 26, 2024)). When patients fear sharing their medical history or other relevant sensitive information with their providers, it risks misdiagnosis or mistreatment and puts patients' lives at risk. Put simply, "high-quality health care cannot be attained without patient candor." Appx. 0789 (89 Fed. Reg. 32985 (Apr. 26, 2024)).

As discussed, the Privacy Rules protect against that. More fundamentally, the provision of competent care is only possible where patients actually seek such care. Without robust privacy protections, patients may be afraid to seek certain health care because they are concerned about how their sensitive medical information will be used or shared. Appx. 0010 (Petrin Decl. ¶ 17); Appx. 0014 (Oller Decl.¶ 11); Appx. 0027 (Johnson Decl. ¶ 25); Appx. 0035 (Heinrich Decl. ¶ 29).

iii. The Cities of Columbus and Madison have an interest in the promotion of public health.

Columbus and Madison additionally have an interest in promoting the public health of their communities. Courts have long recognized the interest of local governmental bodies to protect public health. *See, e.g.*, *Jacobson v. Commonwealth of Massachusetts*, 197 U.S. 11, 27 (1905)

("Upon the principle of self-defense, of paramount necessity, a community has the right to protect itself against an epidemic of disease which threatens the safety of its members.").

Protecting individual privacy while promoting public health is an express purpose of the Privacy Rules. Robust privacy protections engender accurate reporting and "[a]ccurate medical records assist communities in identifying troubling public health trends and in evaluating the effectiveness of various public health efforts." Appx. 0177 (65 Fed. Reg. 82467 (Dec. 28, 2000)). Put differently, "[b]arriers that undermine the willingness of individuals to seek health care in a timely manner or to provide complete and accurate health information to their health care providers undermine the overall objective of public health." Appx. 0789 (89 Fed. Reg. 32985 (Apr. 26, 2024)).

Columbus Public Health and Public Health Madison and Dane County are the public health authorities for their jurisdictions, responsible not just for treating individual patients but also for preventing disease and improving the overall health of their residents as a whole. *See* Appx. 0023 (Johnson Decl. ¶ 8); Appx. 0030 (Heinrich Decl. ¶ 7); Appx. 0789 (89 Fed. Reg. 32985 (Apr. 26, 2024)). The cities' ability to identify and address concerning health trends depends, in part, on the willingness of patients to seek care and be honest with public health department providers. Appx. 0026 (Johnson Decl. ¶ 22); Appx. 0034 (Heinrich Decl. ¶ 26). The cities' interest in vindicating

their public health mandates gives them sufficient interest in this litigation. *See Edwards*, 78 F.3d at 995.

iv. DFA will have to expend significant resources if either Privacy Rule is undone.

An organization satisfies Rule 24(a)(2)'s interest requirement where it "expend[s] significant resources" on efforts that may be impacted by the outcome of the proceedings. *La Union del Pueblo Entero*, 29 F.4th at 306. There is no question that DFA surpasses this threshold.

DFA spends significant resources advocating on behalf of providers for accessible, equitable health care at the local, state, and federal levels. It also works to increase the physician voice in health policy decisions. *See* Appx. 0007–08 (Petrin Decl. ¶¶ 7–8). In addition to advocating for legislative and regulatory change, DFA provides resources and trainings, including HIPAA-specific resources, for its members on legal and policy issues. *See* Appx. 0007–08 (Petrin Decl. ¶¶ 7–8). And in 2022, DFA co-founded the Reproductive Health Coalition—a group of more than a hundred health professional organizations—specifically focused on protecting access to reproductive care. Appx. 0009 (Petrin Decl. ¶ 9).

If either of the Privacy Rules were to fall, DFA would be required to expend significant resources advocating for increased privacy protections elsewhere (for example, at the state level) and educating and training its members on the reworked legal landscape. *See* Appx. 0010 (Petrin Decl. ¶ 17). "This interest goes beyond a purely 'ideological' reason for intervention and amounts to a 'direct' and 'substantial' interest in the proceedings." *La Union del Pueblo Entero*, 29 F.4th at 306.

c. Resolution of this action would practically impair and impede Proposed Intervenors' interests.

An intervenor must demonstrate that the disposition of the case "may, as a practical matter" impair or impede its ability to protect its interests. *Brumfield*, 749 F.3d. at 344. This threshold is low—a party "need only show that if [it] cannot intervene, there is *a possibility* that [its] interest could be impaired or impeded." *La Union del Pueblo Entero*, 29 F.4th at 307 (citing *Brumfield*, 749 F.3d at 344–45) (emphasis added).

It takes little imagination to see how a partial or complete resolution of the case in favor of Texas would impair Proposed Intervenors' interests. If either Privacy Rule is vacated, Proposed Intervenors will face severe costs, in both time and money, to understand and comply with the new legal landscape in which they operate. And patients' trust will be compromised, harming the provider-patient relationship, endangering Proposed Intervenors' ability to provide effective care to their patients, and undermining the public health missions of Columbus and Madison.

If Texas is afforded even part of its broad-sweeping requests for relief, Proposed Intervenors will be bound by the judgment. There will be no way to appeal or—depending on the grounds upon which this Court would hypothetically rule—advocate for the agency to revive the rules. *See Sierra Club v. Glickman*, 82 F.3d 106, 109 (5th Cir. 1196) ("[T]he *stare decisis* effect of an adverse judgment constitutes a sufficient impairment to compel intervention." (citing *Espy*, 18 F.3d at 1207)). And if the Proposed Intervenors are prevented from joining this litigation, they will have no other recourse—such as affirmative litigation—through which to vindicate their interests. *See Deus v. Allstate Ins. Co.*, 15 F.3d 506, 526 (5th Cir. 1994) ("Intervention generally is not appropriate where the applicant can protect its interests and/or recover on its claim through some other means." (citation omitted)). Precluding Proposed Intervenors from involvement in this

litigation would significantly impede and impair their abilities to protect the interests they have outlined.

d. The government's representation of Proposed Intervenors' interests is inadequate.

To make the "minimal" showing required for this factor, Proposed Intervenors need only demonstrate that the government's representation of their interests "*may* be inadequate," *Heaton v. Monogram Credit Card Bank of Georgia*, 297 F.3d 416, 425 (5th Cir. 2002) (emphasis added), which Proposed Intervenors can more than do here. Indeed, intervention has been permitted even in cases where the movant's interest "may diverge in the future, even though, at [the time of intervention] they appear to share common ground." *Id.*

Although adequacy of representation will be presumed (1) where the existing party is a government charged by law with representing a putative intervenor's interests; or (2) where the putative intervenor has the same "ultimate objective" as a party to the lawsuit, *Edwards*, 78 F.3d at 1005, the federal government is not entitled to either presumption of adequacy here. To begin, this case is not one in which the government defendants are "charged by law" with representing Proposed Intervenors' interests. *Id.* Although the Department has considered the interests of covered entities in crafting the Privacy Rules, *see, e.g.*, Appx. 0182 (65 Fed. Reg. 82471 (Dec. 28, 2000)), "there is no suggestion" that it is their "legal representative," *Brumfield*, 749 F.3d at 345*; see also Espy*, 18 F.3d at 1207–08. Moreover, if the government, as expected, imminently abandons its defense of either Privacy Rule, Proposed Intervenors and the existing defendants will not share the same ultimate goal of maintaining them.

If either presumption of adequacy did apply, Proposed Intervenors could easily rebut them. An intervenor overcomes the government-representative presumption by showing that the intervenors' interests are distinct from the existing governmental party and thus may not be

adequately represented by it. *La Union del Pueblo Entero*, 29 F.4th at 308 (citations and internal quotation marks omitted). An intervenor overcomes the same-objective presumption by showing "adversity of interest." *Id.* In this case, the same facts rebut both. *See Texas*, 805 F.3d at 662 (analyzing both under "adversity of interest").

Proposed Intervenors have outlined their specific interests in this case. *See* Section I(b) *supra*. The government's potential interests—in balancing patient privacy with the public interest in using health information and law enforcement needs, defending the integrity of its rulemaking process, managing its relationship with the states, and implementing the agenda of a new administration—are both broader and distinct. These competing interests are something the Department itself recognized in both Privacy Rules. *See, e.g.*, Appx. 0781 (89 Fed. Reg. 32978 (Apr. 26, 2024)) ("This final rule balances the interests of society in obtaining PHI for non-health care purposes with the interests of the individual, the Federal Government, and society . . . ."); Appx. 0527 (65 Fed. Reg. 82685 (Dec. 28, 2000)) ("The final rule seeks to strike a balance in protecting privacy and facilitating legitimate law enforcement inquiries."). These more extensive interests that the Department was obliged to consider at the rulemaking stage may lead to divergent legal strategies, such as a willingness to settle, agree to an injunction limited in scope, or not appeal relief ordered against it. *See Glickman*, 256 F.3d at 381 ("The USDA is a governmental agency that must represent the broad public interest, not just the [intervenors'] concerns.").

If that were not enough to overcome the presumption, the imminent change in administration "raises 'the possibility of divergence of interest' or a 'shift' during litigation." *W. Energy Alliance v. Zinke*, 877 F.3d 1157, 1169 (10th Cir. 2017) (citation omitted); *see Heaton*, 297 F.3d at 425 ("That the [intervenor's] interests and [existing party's] may diverge in the future, even though, at this moment, they appear to share common ground, is enough to meet the

[intervenor's] burden on this issue."). *Alliance for Hippocratic Med.*, 2024 WL 1260639, at *6 ("[I]n any event, 'it is enough' for the purposes of this factor that the Intervenors' broader interests 'may diverge' from Plaintiffs' interests 'in the future.'" (citing *Heaton* , 297 F.3d at 425)). This possibility alone satisfies the minimal requirement that the government's representation "may be" inadequate. *Espy*, 18 F.3d at 1207 (citing *Trbovich v. United Mine Workers*, 404 U.S. 528, 538 n.10 (1972)). Proposed Intervenors note abundant recent evidence that the incoming administration will abandon its defense of the challenged Privacy Rules. For example, the Nominee for Department Secretary, Robert F. Kennedy, Jr., has indicated his willingness to rescind Department regulations related to reproductive health care, including the 2024 Rule. *See* Appx. 1454–59 (Megan Messerly et al., *Anti-abortion groups have 2 asks. RFK Jr. is listening*, Politico (Nov. 20, 2024), https://www.politico.com/news/2024/11/20/anti-abortion-rfk-jr-00190552); Appx. 1460–64 (Tyler Arnold, *Trump's HHS nominee Robert F. Kennedy Jr. reassures pro-life senators with policy plans*, Catholic News Agency (Dec. 19, 2024), https://www.catholicnewsagency.com/news/261111/trump-hhs-nominee-robert-kennedy-jr-reassures-pro-life-senators) (noting that Kennedy has told Senators that he "will back certain pro-life policies if the Senate confirms him," and that abortion should go "back to the states").[4] Further,

[4] President-Elect Trump and his administration have demonstrated that they believe the federal government should not take any actions to protect access to abortion. *See* Appx. 1462 (Arnold, *supra*) (quoting Senator Tommy Tuberville as saying, "Basically, [Kennedy] and President Trump have sat down and talked about it and both of them came to an agreement," and "Roe v. Wade is gone, [abortion has] gone back to the states"). Within the past year, President-Elect Trump has indicated that he "would let red states monitor women's pregnancies," a sentiment completely diametric to the 2024 Rule's intent and Proposed Intervenors' interests. Appx. 1467 (Eric Cortellessa, *How Far Would Trump Go*, TIME (Apr. 30, 2024), https://time.com/magazine/us/6979410/may-27th-2024-vol-203-no-17-u-s/). Vice President-Elect Vance opposed the new rule from its inception, submitting a comment that makes many of the same arguments that Texas does here. *See* Appx. 1477–87 (Members of Congress, Comment on Proposed HIPAA Privacy Rule To Support Reproductive Health Care Privacy 9 (June 16, 2023), https://www.regulations.gov/comment/HHS-OCR-2023-0006-0171).

opposed similar HHS efforts to protect reproductive health information. Appx. 1490 (The Heritage Foundation, *Mandate for Leadership: The Conservative Promise* 497 (2023), https://tinyurl.com/55dbtvkx).[5]

Although the incoming administration has been less outspoken on the 2000 Privacy Rule, Texas's opposition to the 2000 Privacy Rule appears to be focused on provisions that it argues inhibit its ability to receive unlimited patient information pursuant to an administrative subpoena or investigative demands: requests that have increased following *Dobbs*. *See* Appx. 0792 (89 Fed. Reg. 32988 (Apr. 26, 2024)). Given the incoming administration's opposition to robust protections for reproductive care, its leaders may very well agree with Texas that the limits in the 2000 Privacy Rule overreach and also cease to defend that Rule.

Although Proposed Intervenors "cannot say for sure that the state's more extensive interests will *in fact* result in inadequate representation, . . . surely they might, which is all that the rule requires." *Brumfield*, 749 F.3d at 346 (emphasis in original).

II. Alternatively, this Court should permit Proposed Intervenors to intervene under Rule 24(b).

Federal Rule of Civil Procedure 24(b) provides that a court may permit intervention where an intervenor makes a timely motion and "has a claim or defense that shares with the main action a common question of law or fact," taking into consideration "whether the intervention will unduly delay or prejudice the adjudication of the original parties' rights." Fed. R. Civ. P. 24(b)(1), (3). "The 'claim or defense' portion of Rule 24(b) . . . [is to be] construed liberally.'" *U.S. ex rel Hernandez v. Team Finance, LLC*, 80 F.4th 571, 577 (5th Cir. 2023) (quoting *Newby v. Enron*

[5] Although President-Elect Trump has endeavored to distance himself from Project 2025, he has since picked "major architects" of the blueprint for key posts in his next administration. Appx. 1491 (Amanda Becker, *How Trump's nominees could make Project 2025 a reality*, News from the States (Jan. 2, 2025), https://www.newsfromthestates.com/article/how-trump-nominees-could-make-project-2025-reality).

Corp., 443 F.3d 416, 422 (5th Cir. 2023)). On all counts, Proposed Intervenors should be permitted to intervene permissively if they are not entitled to under Rule 24(a)(2).

First, as explained above, Proposed Intervenors motion is timely. *See* Section I(a) *supra*. Although timeliness is analyzed with more scrutiny in the context of permissive intervention, *Rotstain v. Mendez*, 986 F.3d 931, 942 (5th Cir. 2021), Proposed Intervenors move to intervene promptly, before the matter proceeds substantively, to protect their interests. Second, Proposed Intervenors seek to take up the position (defending the Privacy Rules) and arguments that they believe the federal government will shortly abandon; their claims and defenses do not just share a common question of law or fact with the main action, they are practically identical. If the incoming administration does not abandon its defense of the rules, Proposed Intervenors' specific interests still easily satisfy this requirement. *See* Section I(b) *supra*. Lastly, intervention here would not cause any delay or prejudice, as this litigation is in its nascent stages. *See* Section I(a) *supra*.

CONCLUSION

For the foregoing reasons, Proposed Intervenors respectfully request that this Court grants their motion for leave to intervene under Rule 24(a), or, in the alternative, Rule 24(b).

Date: January 17, 2025

Civil Action No. 5:24-cv-00204-H

DECLARATION OF DR. CHRISTINE PETRIN

I, Christine Petrin, hereby declare under penalty of perjury as prescribed in 28 U.S.C. § 1746 that the following is true and correct:

1. My name is Christine Petrin. I am over eighteen years old, of sound mind, and fully competent to make this declaration. I also have personal knowledge of the factual statements contained herein. I provide this declaration in support of the motion to intervene.

2. I am a primary care physician at Settlement Health and a Clinical Instructor of Internal Medicine & Pediatrics at Mount Sinai Hospital, both in New York, New York. My driving mission as a physician is to improve the lives of children, adults, and their communities.

3. I received my medical degree from Tulane University School of Medicine in New Orleans, Louisiana. I did a dual medical residency in internal medicine and pediatrics at MedStar Georgetown University Hospital in Washington, D.C., where I was the Chief Resident.

4. Since February 2024, I have served as the President and Chair of the Board of Doctors for America (DFA). I previously served as both Vice Chair and Secretary of the Board and have been a member of DFA since 2018.

DFA and its Members

5. DFA is a nonprofit organization organized under Section 501(c)(3) of the Internal Revenue Code. Founded in 2009, DFA works on behalf of its members to improve the health of patients, communities, and the nation. One of our guiding principles is that clinicians must take a leading role in improving health care and ending health disparities, and we provide our members with the tools to do so. We advocate on our members' behalf for policies that allow them to provide equitable and accessible care to patients.

6. DFA is comprised of more than 27,000 medical professionals, medical students, and health care advocates who live in all fifty states and the District of Columbia, work in various practice settings, including in hospitals, academia, and in private practice, and represent all areas of specialization.

7. DFA members have access to various DFA resources, including continuing medical education and other training, events, and advocacy tools. DFA also drafts resources to keep our members up to date on the latest developments in health policy.

8. DFA members, including myself, serve in various capacities in the organization, including on the Board of Directors, and drive our organizational focus areas: health justice and equity; access to affordable care; and community health and prevention. In each of these

buckets, DFA provides education and training to its members and engages in advocacy at the state and federal levels. Through these efforts, we work to improve outcomes for the patients we serve.

9. DFA's health justice and equity work involves efforts to reduce health disparities among marginalized communities and populations. As part of that work, DFA works to protect access to reproductive health care services for all patients. DFA is also one of two founding organizational members of the Reproductive Health Coalition, a group of 120 medical-professional associations and allied organizations that collectively represent over 150 million voices in medicine, health care, and other groups.

DFA Members and HIPAA

10. Many DFA members are "health care providers" and "covered entities" subject to the Health Insurance Portability and Accountability Act ("HIPAA") and its regulations, including the HIPAA 2000 Privacy Rule ("2000 Privacy Rule") and the 2024 HIPAA Reproductive Health Rule ("2024 Rule," and together, the "HIPAA Rules").

11. As professionals who are required to comply with HIPAA, these DFA members are impacted by any changes to the law and its regulations, which covered entities have relied on for decades. These DFA members are required to have in place and adhere to HIPAA policies and procedures (and are subject to the internal HIPAA policies of the entities they work for), receive at least annual training on what HIPAA requires, and offer patients information about their rights under HIPAA.

12. Day-to-day, our clinician members rely on HIPAA to guide when and how patient information may and may not be used or disclosed. The presence of national baseline requirements regarding the use and disclosure of patient information helps DFA members stay

confident that they are appropriately safeguarding patient information and adhering to their ethical obligations to do so. In response to administrative subpoenas and investigative demands, for example, medical practices can rely on the three preconditions under HIPAA that must be met prior to disclosing medical information in order to appropriately protect patient information.

13. DFA and its members believe that the privacy protections that HIPAA affords are integral to maintaining trust between clinicians and their patients—a key but fragile component of providing quality care. We believe that privacy is necessary for the efficient and effective delivery of health care because trust and confidentiality are at the very core of the provider-patient relationship, and those relationships and the health care system as a whole, are built upon the willingness of individuals to share the most intimate details of their lives with their health care providers. HIPAA is a key tool for assuring patients that their medical information will be protected, which increases patient trust, encourages patients to be open with their clinicians, and, in turn, allows us to give them the best possible care.

14. If the 2000 Privacy Rule was vacated, it would inject significant confusion into our jobs and impair the provider-patient relationship necessary to deliver adequate health care. Without a federal standard to govern the use and disclosure of medical information, I do not know how clinicians could reliably share information without becoming expert in numerous state laws. That would be time-consuming, costly, and unworkable, including because medical professionals would need to completely rebuild their privacy compliance programs, of which HIPAA has been the foundation for decades, thereby incurring unexpected and potentially significant compliance costs.

15. The 2024 Rule put in place important restrictions on using and sharing patient information about their reproductive health care, providing DFA's members with clarity on how

they can use and disclose this particularly sensitive patient information. Many DFA members provide reproductive health services on a regular basis, while others provide such care as necessary. Members who do not provide reproductive health care may obtain sensitive information about their patients' medical care in the course of providing treatment and record that information in the medical record.

16. DFA members have been increasingly concerned that patient medical information may be sought and used improperly for non-health care purposes following the *Dobbs* decision, including from investigations into doctors providing legal and necessary health care and patients obtaining it. The 2024 Rule has helped mitigate these risks to providers like many of DFA members and strengthened the doctor-patient relationship because it allows them to explain to patients how their reproductive health information is protected from misuse. If the 2024 Rule is vacated, it is likely that some patients seeking reproductive health care would forgo such care, and that patients will withhold critical reproductive health information relevant for proper medical treatment from their clinicians.

17. Without the protections of the 2000 and 2024 Rules, providers would have less ability to protect the sensitive medical information they receive from misuse, and our members would face increased challenges in their ethical and professional duties to provide effective care to their patients. Patients would not be willing to share relevant medical information with their providers for fear it may not be protected. Other patients may forgo care altogether. The provider-patient relationship, based on trust, would be fractured. And, fundamentally, that would negatively affect patient care. In turn, DFA would need to expend significant resources to account for this sea change in patient protection privacy—updating its materials and reorienting its advocacy work.

Executed on January 12, 2025

Dr. Christine Petrin

THE UNITED STATES DISTRICT COURT
FOR THE NORTHERN DISTRICT OF TEXAS
LUBBOCK DIVISION

State of Texas, *Plaintiff*, v. United States Department of Health and Human Services; Xavier Becerra, in his official capacity as Secretary of the United States Department of Health and Human Services; and Melanie Fontes Rainer, in her official capacity as Director of the Office for Civil Rights of the United States Department of Health and Human Services, *Defendants*.	Civil Action No. 5:24-cv-00204-H

DECLARATION OF DR. BETH OLLER

I, Beth Oller, hereby declare under penalty of perjury as prescribed in 28 U.S.C. § 1746 that the following is true and correct:

1. My name is Beth Oller. I am over eighteen years old, of sound mind, and fully competent to make this declaration. I also have personal knowledge of the factual statements contained herein. I submit this declaration in support of Doctors for America's ("DFA") motion to intervene.

2. I have a Bachelor of Science in Nursing from the University of Kansas and received my medical degree from the University of Kansas School of Medicine. I did my residency at the Wesley Family Medicine Residency Program in Wichita, Kansas. Since I

completed my residency more than fifteen years ago, I have practiced medicine in Rooks County, Kansas—a rural part of the state with approximately 5,000 residents.

3. I am currently a primary care provider at the Rooks County Health Center. I treat hundreds of patients. For more than a decade before that, I ran a small private practice in Rooks County.

4. I have been a member of DFA since 2022. I became a member of DFA when I became increasingly concerned that the Supreme Court would overturn the constitutional protections related to abortion.

5. Since then, I have relied on DFA's resources to educate myself and advocate for laws and policies that increase access to reproductive and other health care. For example, Kansas is one of only a few states that has not expanded Medicaid. I have used DFA's resources to understand how I can directly support efforts to change that. I have also attended several DFA webinars and use DFA's communications to stay up to date on the laws and policies relevant to my practice.

6. As a family medicine physician, I care for patients of all ages. My daily practice involves everything from conducting yearly check-ups to treating common illnesses such as colds and the flu and screening and treating for conditions such as high blood pressure or diabetes.

7. I also provide a range of reproductive healthcare. For example, I provide birth control and talk with my patients about family planning, refer pregnant patients to nearby obstetricians and may provide them with interim care, help my patients manage miscarriages, and treat moms (and their babies) post-birth. For more than a decade of my career, I also delivered babies. My patients often provide me with their medical histories, which can include

sensitive information that my patients intend to keep otherwise confidential, such as whether they have had an abortion.

8. As a physician, I am subject to and must comply with the Health Insurance Portability and Accountability Act ("HIPAA") and its privacy rules.

9. I use HIPAA and its privacy rules as tools to improve my work. My ethical and professional duties are to provide the care my patients need. An important part of satisfying those duties is making sure my patients know that they can trust me and that my clinic is safe for them.

10. HIPAA and its privacy rules provide a backstop when I need to explain to my patients how their information may or may not be shared, including with family members who—especially in the small community in which I practice—may ask for it. It's a foundational protection that my patients know and understand, and it's crucial to maintaining the confidentiality of my patients' records and, in turn, their trust.

11. This trust is essential to my practice. If patients don't believe that I'll keep their information private, they won't come to my office or they won't tell me everything I need to know to provide them with optimal care. For example, if a patient who has miscarried before doesn't feel safe sharing that fact with me, I can't give her correct advice on how much time she should wait before trying to get pregnant again.

12. In the context of providing reproductive health, this trust has been increasingly threatened since the *Dobbs* decision. The newest HIPAA privacy rule gives my patients an extra assurance that their particularly sensitive information will be kept private. Without it, I would be concerned that my patients considering abortion care, for example, would no longer come to me to learn about their options.

13. HIPAA and its privacy rules also help me work effectively with the other providers my patients see. To provide comprehensive, quality care to my patients—and for my patients' other providers to do the same—we must share patient information. Where I work in rural Kansas, that might even require me to share and receive patient information across state lines. HIPAA and its privacy rules allow all providers to operate under a common baseline of patient privacy protections.

14. If HIPAA and its privacy rules were struck down, it would sow chaos in the medical profession and negatively impact my patients. HIPAA and its privacy rules are the building blocks on which other patient privacy laws and policies are crafted. If they were thrown out, health care providers would need to update their policies based on the patchwork of state laws that would emerge (many of which had previously relied on HIPAA and its privacy rules) and their own assessments of the proper balance between patient privacy and other concerns. And different practices might reach different conclusions, making it hard to share information among providers. That would cause complications in my own practice when, for example, I had to send critical health information from a patient's neurologist in Nebraska or get information from a patient's OB-GYN three hours away in Wichita.

15. Undermining HIPAA and its privacy rules would be detrimental to patient health and public health generally. They are the foundation of patient privacy, and my patients understand that their information is protected by federal law. If HIPAA and its privacy rules were to be overturned, it would deeply harm the level of trust my patients have in me, threatening my relationships with them, and inhibiting my ability to provide care for them.

LUBBOCK DIVISION

State of Texas, *Plaintiff*, v. United States Department of Health and Human Services; Xavier Becerra, in his official capacity as Secretary of the United States Department of Health and Human Services; and Melanie Fontes Rainer, in her official capacity as Director of the Office for Civil Rights of the United States Department of Health and Human Services, *Defendants*.	Civil Action No. 5:24-cv-00204-H

DECLARATION OF SHELLY MITCHELL

I, Shelly Mitchell, hereby declare under penalty of perjury as prescribed in 28 U.S.C. § 1746 that the following is true and correct:

1. My name is Shelly Mitchell. I am over eighteen years old, of sound mind, and fully competent to make this declaration. I also have personal knowledge of the factual statements contained herein. I provide this declaration in support of the motion for intervention.

2. I am the Health Information Manager and HIPAA Privacy and Security Officer for the Columbus Department of Public Health ("Columbus Public Health"). Columbus Public Health is a city department charged with protecting the health and improving the lives of all the residents of Columbus, Ohio.

3. I have worked for Columbus Public Health for nearly 24 years. As Columbus Public Health's HIPAA Privacy and Security Officer, I have developed and keep up to date our HIPAA compliance program. This includes ensuring that our HIPAA policies are enforced and

that our patients' private health information remains secure. My responsibilities include providing HIPAA training to the roughly 600 employees of Columbus Public Health.

4. Columbus Public Health operates a number of outpatient clinics where medical providers treat thousands of patients each year. All clinics accept and bill both private and public insurers for patients who have health insurance.

5. Columbus Public Health's clinics and many of its employees are "health care providers," and the clinics are a "covered entity" subject to the Health Insurance Portability and Accountability Act ("HIPAA") and its regulations, including the HIPAA 2000 Privacy Rule ("2000 Privacy Rule") and the 2024 HIPAA Reproductive Health Rule ("2024 Rule," and together, the "HIPAA Rules"). As a covered entity, Columbus Public Health is impacted by any changes to HIPAA and its regulations, which it has relied upon for more than 20 years. Because it is a HIPAA covered entity, Columbus Public Health clinics are required to have in place and adhere to HIPAA policies and procedures, provide at least annual training on what HIPAA requires, and offer patients information about their rights under HIPAA.

6. I develop and update the annual HIPAA training materials and ensure that they reflect any changes to HIPAA rules and regulations. In addition to training, I provide updates on HIPAA compliance to all employees through a periodic department-wide newsletter.

7. Columbus Public Health and our clinic providers have an interest in protecting the HIPAA Rules. The HIPAA Rules are a critical tool to support patient trust in their medical providers and to protect the confidentiality of sensitive patient information. Columbus Public Health clinicians rely on HIPAA to guide when and how patient information can and cannot be used or disclosed.

8. The presence of national baseline requirements regarding the use and disclosure of patient information helps Columbus Public Health employees be confident that they are appropriately safeguarding patient information and adhering to their ethical obligations.

9. Patients are often worried about their medical information being improperly disclosed or used to harm them. The HIPAA Privacy Rules help strengthen the provider-patient relationship and assure patients that they can trust their providers to safeguard their medical information.

10. The 2000 Privacy Rule is foundational to our work at Columbus Public Health. The rule was promulgated shortly after I began my service at Columbus Public Health, and it serves as the basis for how patient information can be used and disclosed. Our providers have relied on it for more than 20 years. Columbus Public Health shaped its compliance programs around the 2000 Privacy Rule's requirements, and our employees have spent decades explaining to patients the rights and protections it affords them.

11. If the 2000 Privacy Rule is vacated, it would create significant confusion across Columbus Public Health and impair the provider-patient relationship necessary for our clinics to deliver adequate health care. The legal basis underpinning our privacy policies would be gone, and we would need to think through our privacy compliance program from scratch. It would be difficult to understand how patient information would be protected. I would need to re-develop our privacy policies and training and re-train 600 employees on the impact of the HIPAA rules being struck down.

12. This work would be time-consuming and costly. We would incur significant unexpected costs in both time and money to re-develop all of our patient privacy and compliance

systems and to analyze how we are able to use and share patient information in the absence of HIPAA.

13. The 2024 Rule is also important to our work at Columbus Public Health. Columbus Public Health clinics and providers offer reproductive health care. The 2024 Rule put in place important restrictions on using and sharing patient information about their reproductive health care, giving Columbus Public Health's providers clarity on how they can use and disclose this sensitive patient information.

14. Since the finalization of the 2024 Rule in April 2024, and in anticipation of the December 23, 2024 compliance deadline, I tracked developments regarding new requirements and spent numerous hours ensuring that our processes reflect the 2024 Rule's requirements. In preparation for the compliance deadline, I created our HIPAA attestation form and met with the managers affected by the 2024 Rule to discuss changes to our practices.

15. If the 2024 Rule is vacated, our providers would have less ability to protect the sensitive medical information they receive from misuse and would face increased challenges in their ethical and professional duties to provide effective care to our residents. Additionally, Columbus Public Health would need to re-educate leadership and once again revise our processes to reflect those changes.

DECLARATION OF EDWARD JOHNSON

I, Edward Johnson, hereby declare under penalty of perjury as prescribed in 28 U.S.C. § 1746 that the following is true and correct:

1. My name is Edward Johnson. I am over eighteen years old, of sound mind, and fully competent to make this declaration. I also have personal knowledge of the factual statements contained herein. I provide this declaration in support of the motion for intervention.

2. I am currently the Assistant Public Health Commissioner for External Affairs and Acting Chief Health Equity Officer for the Columbus Department of Public Health ("Columbus Public Health"). I have served as an Assistant Public Health Commissioner for close to three years.

3. Prior to my role as Assistant Public Health Commissioner, I served Columbus Public Health as the Director of Public Health Policy for over four years.

4. As Columbus Public Health's Assistant Public Health Commissioner for External Affairs and Acting Chief Health Equity Officer, I assist the Health Commissioner with representing the needs and concerns of Columbus' residents to protect their health and improve their lives.

Columbus Public Health

5. The City of Columbus, Ohio, is a municipal corporation organized under Ohio law. Columbus has all the powers of local self-government and home rule under the constitution and laws of the state of Ohio, which are exercised in the manner prescribed by the Charter of the City of Columbus.

6. Columbus, located in Franklin County, is the capital of Ohio. It is the largest city in the state and the fourteenth largest city in the United States, with a population of over 905,000, according to 2020 Census estimates.

7. Columbus provides a wide range of services on behalf of its residents, including health services for families and children, public health, public assistance, and emergency medical care.

8. Columbus's public health department, Columbus Public Health, is a city agency charged with protecting the health and improving the lives of all the residents of Columbus, Ohio. Columbus Public Health works to ensure that the Columbus community is protected from disease and other public health threats and that Columbus residents are empowered to live healthier lives.

9. Columbus Public Health employs close to 600 employees who operate more than 90 different public health programs and provide critical services to residents. These programs and services include testing and treatment for sexually transmitted infections, including human

immunodeficiency virus ("HIV"), women's health and wellness services, postpartum and newborn home visiting, immunizations, dental services, and medication assisted treatment for substance use, among others.

10. Columbus Public Health operates 9 outpatient clinics where doctors and nurse practitioners treat approximately 10,000 patients each year. Many of Columbus Public Health's employees work in these clinics, which include the Women's Health and Wellness Center and the Sexual Health and Wellness Center.

11. All Columbus Public Health clinics accept and bill both private and public insurers for patients who have health insurance. Clinic staff members assist uninsured patients with enrolling in Medicaid. Clinics also provide free services for uninsured and underinsured patients.

12. Columbus Public Health's Women's Health and Wellness Center provides confidential reproductive health care for women, their partners and teens; testing, treatment and prevention education for sexually transmitted infections; well woman annual exams and cancer screenings; contraceptive services, including long-acting methods (implant and IUD); reproductive life planning; pregnancy testing; and other medical services.

13. A critical part of the Women's Health and Wellness Center's work relates to the provision of reproductive health care services. These services enable every Columbus resident to make and carry out their own reproductive decisions, consistent with Article I, Section 22 of the Ohio Constitution.

14. Columbus's Sexual Health and Wellness Clinic offers testing and treatment for sexually transmitted infections, medication to prevent HIV infections, preconception health and

pregnancy testing, emergency contraception, and wellness services such as diabetes and cholesterol screenings, among others.

Columbus Public Health and HIPAA Privacy Protections

15. Columbus Public Health's clinics are subject to HIPAA. Columbus Public Health is impacted by any changes to HIPAA and its regulations, which it has relied upon for decades.

16. Columbus Public Health takes its HIPAA obligations seriously and employs a dedicated Health Information Manager and HIPAA Privacy and Security Officer.

17. HIPAA and its relevant regulations, including the 2000 Privacy Rule and the 2024 HIPAA Reproductive Health Rule ("2024 Rule"), support the work of Columbus Public Health. National baseline requirements regarding the use and disclosure of patient information allow Columbus Public Health clinicians to be confident that they are appropriately protecting their patients' medical information.

18. The privacy protections that HIPAA affords are critical to establishing and maintaining trust between our doctors and nurses and their patients. The delivery of quality health care depends on individuals being willing to share the most intimate details of their lives with their health care providers. HIPAA is a key tool providers can use to assure patients that their medical information will be kept safe. This increases patient trust, encourages patients to be open, and, in turn, allows clinicians to give them the best possible care.

19. This is especially so for health care services provided by Columbus Public Health. Our clinics are often providers of last resort, serving patients who have no other options to receive care. Many of the clinics' patients come from historically marginalized communities. Medical mistrust can be even more common in communities of color and other communities that have been negatively affected by historical and current health care disparities.

20. Many Columbus Public Health patients use our services because of the confidentiality they expect to receive from a community-based health center. Many of our patients seek treatment for sexually transmitted infections, substance abuse, and other forms of health care they fear may subject them to stigma. Even if they have family doctors, some patients—survivors of intimate partner violence, sex trafficking, and other vulnerable patients—seek our care because of the guarantee of confidentiality we can provide.

21. Without the protection of HIPAA rules, some of our patients would be less likely to seek care.

22. Fostering trust between clinicians and patients is also important to our public health mission. Accurate medical records assist Columbus Public Health in identifying problematic trends in public health and in evaluating the effectiveness of various public health programs. Policies that undermine the willingness of patients to share complete and accurate health information with providers undermine the overall objective of public health departments and can have negative impacts on a department's efforts to address community health concerns, like communicable diseases and vaccinations.

23. If the 2000 Privacy Rule is vacated, it would create significant confusion for Columbus Public Health and harm the relationship between our clinicians and their patients. A trusting patient-provider relationship is necessary to deliver quality health care and to adequately address public health concerns across the City of Columbus. Without a federal standard to govern the use and disclosure of medical information, it is not clear to me know how Columbus Public Health clinicians could reliably share information without acquiring expertise in numerous state laws.

24. The 2024 Rule placed important restrictions on using and disclosing information about a patient's reproductive health care. Columbus Public Health's Women's Health and Wellness Center and Sexual Health and Wellness Center provide reproductive health services on a regular basis. The 2024 Rule provided Columbus Public Health's clinics with clarity on how to manage this particularly sensitive patient information. If the 2024 Rule is vacated, it is likely that some patients seeking reproductive health care would forgo such care, and that other patients would withhold critical reproductive health information relevant for proper medical treatment from their clinicians.

25. Without the protections of the 2000 and 2024 Privacy Rules, it would be more difficult for Columbus Public Health providers to protect the sensitive medical information they receive from misuse. In turn, they may lose the trust of their patients, who would fear the release of their private information and be unwilling to be honest with providers or may choose not to seek treatment all together. Without the 2000 and 2024 Privacy Rules, Columbus Public Health will face increased challenges to providing effective care to patients and to identifying and addressing troubling health trends in the community. In addition, Columbus Public Health would need to expend significant resources to account for and address this development in patient privacy.

DECLARATION OF JANEL HEINRICH

I, JANEL HEINRICH, hereby declare under penalty of perjury as prescribed in 28 U.S.C. § 1746 that the following is true and correct:

1. My name is Janel Heinrich. I am over eighteen years old, of sound mind, and fully competent to make this declaration. I also have personal knowledge of the factual statements contained herein. I provide this declaration in support of the motion for intervention.

2. I am currently the Director of Public Health Madison and Dane County. I have held that position since I was appointed to it pursuant to Wis. Stat. § 62.51 and Wis. Stat. § 251.06(4)(a) by the Mayor of the City of Madison and the Dane County Executive and confirmed by a vote of the Common Council of Madison and County Board. I have served in this position for more than 14 years.

3. In my position as the Director of Public Health, I serve as the "local health officer" for the City of Madison and the County of Dane under Wis. Stat. § 251.06. This position

carries many responsibilities, including but not limited to administering the department, enforcing state public health statutes, and providing information to the public "as to the causes, nature and prevention of prevalent diseases, and the preservation and improvement of health."

Madison and Public Health Madison and Dane County

4. The City of Madison, Wisconsin, is a municipal corporation organized under Wisconsin law. Wis. Stat. Ch. 66. Madison has all the powers of local self-government and home rule under the constitution and laws of the state of Wisconsin.

5. Madison, located in Dane County, is the capital of Wisconsin. It is the second largest city in the state, with a population of over 269,000, according to 2020 Census estimates.

6. Madison provides a wide range of services on behalf of its residents, including health services for families and children, public health, and emergency medical care. It carries out these essential duties in part through Public Health Madison and Dane County.

7. Public Health Madison and Dane County is an agency with the mission of "working with the community to enhance, protect, and promote the health of the environment and the well-being of all people." We work to ensure that the Madison and Dane County community is protected from disease and other public health threats and that our residents are empowered to live healthier lives.

8. Public Health Madison and Dane County employs over 200 people operating several public health programs and providing critical services to residents. These programs and services include sexual and reproductive health testing, testing and treatment for tuberculosis, cancer screening, immunizations, treatment for sexually transmitted infections, Nurse Family Partnership providing home visits for maternal and infant health, communicable disease testing, among others.

9. Because our mission encompasses the health of the entire community, our programs not only provide treatment to our community, but also prevention and improvement of health outcomes.

10. Public Health Madison and Dane County operates a number of outpatient clinics where staff treat thousands of patients per year. At least 2000 patients sought sexual or reproductive health services in the past year.

11. Public Health Madison and Dane County clinics accept and bill public insurers for patients who have health insurance. Clinics provide services to both uninsured and underinsured patients.

12. Public Health Madison and Dane County serves the community regardless of ability to pay. Our clinics are often providers of last resort, serving the city's most vulnerable populations.

13. A critical part of our work relates to the provision of reproductive and sexual health care services. These services enable every Madison resident to make and carry out their own reproductive decisions consistent with Wisconsin law.

14. Public Health Madison and Dane County operates a sexual health clinic, where we provide reproductive health care; testing, treatment and prevention education for sexually transmitted infections; immunizations; contraceptive services; pregnancy testing; and other medical services.

Public Health and HIPAA Privacy Protections

15. Public Health Madison and Dane County is a covered entity under Health Insurance Portability and Accountability Act ("HIPAA") and its regulations. Public Health Madison and Dane County is impacted by any changes to HIPAA and its regulations, which it has relied upon for decades.

16. Patient privacy is foundational to Public Health Madison and Dane County's work. We regularly train all our employees on HIPAA compliance, regardless of whether they work in a clinical setting.

17. HIPAA and its regulations, including the 2000 Privacy Rule and the 2024 Rule, have made the work of Public Health Madison and Dane County stronger and better. The presence of national baseline requirements regarding the use and disclosure of patient information helps Public Health Madison and Dane County providers stay confident that they are appropriately safeguarding patient information and adhering to their ethical obligations to do so.

18. In the event of requests for information from third parties, for example, Public Health Madison and Dane County can rely on HIPAA to disclose medical information in a way that appropriately protects patient information.

19. Our patients expect confidentiality as part of our services, and we have a reputation of trust in our community. This reputation is built, in part, by the infrastructure created to comply with the 2000 Privacy Rule in our clinics. Our clinicians, patients and community have relied on the protections established by these practices for more than two decades.

20. HIPAA's privacy protections help us maintain trust between our clinicians and our patients. Privacy is necessary for the efficient and effective delivery of health care because trust and confidentiality are at the very core of the provider-patient relationship, and those relationships and the health care system as a whole, are built upon the willingness of individuals

to share the most intimate details of their lives with their health care providers. If patients are not confident in the privacy of their medical information, they will not disclose as much to their providers.

21. HIPAA is a key tool for assuring patients that their medical information will be protected, which increases patient trust, encourages patients to be open and honest with their clinicians, and, in turn, allows us to give them the best possible care.

22. This is especially so for health care services provided by Public Health Madison and Dane County. As providers of last resort, we serve patients who often have no other options to receive care. Many of the clinics' patients come from historically marginalized communities, including immigrant community members. Medical mistrust can be even more common in communities of color and other communities that have been negatively affected by historical and current health care disparities.

23. Public Health Madison and Dane County provides services to all, no matter what their background or circumstances. Many of our patients are only willing to seek care with us because of the confidentiality they expect to receive from a community-based health center, especially patients who seek treatment for sexually transmitted infections and other forms of health care they fear may subject them to stigma.

24. Even if they have family doctors, some patients – survivors of intimate partner violence, minors facing difficult or even dangerous circumstances, and other vulnerable patients, for example – seek our care because of the guarantee of confidentiality we can provide.

25. Public Health Madison and Dane County is trusted in our community and we have support for the work we do. The HIPAA privacy rules are part and parcel to this reputation. They help us maintain trusting relationships between patients from historically disadvantaged

communities and their clinical providers. The importance of this trust relationship is heightened for us as a governmental entity, where many may hold fears associated with seeking help from or sharing information with the government.

26. Fostering trust between clinicians and patients is important to Public Health Madison and Dane County both as a provider of direct services and as the public health authority for the City of Madison. Accurate medical records assist communities in identifying troubling public health trends and in evaluating the effectiveness of various public health efforts. Policies that undermine the willingness of individuals to provide complete and accurate health information to providers undermine the overall objective of public health departments and can have negative impacts on a department's efforts to address community health concerns, like communicable diseases and vaccinations.

27. If the 2000 Privacy Rule is vacated, it would create significant confusion for Public Health Madison and Dane County and impair the provider-patient relationship necessary to deliver adequate health care as well as to adequately address public health concerns in the City of Madison. Without a federal standard to govern the use and disclosure of medical information, I do not know how Public Health Madison and Dane County clinicians could reliably share information without becoming expert in numerous state laws. We would have to re-develop protocols and re-train all of our staff. That would be time-consuming, costly, and unworkable, including because Public Health Madison and Dane County may need to completely rebuild its privacy compliance programs, of which HIPAA has been the foundation for decades, thereby incurring unexpected and potentially significant compliance costs.

28. The 2024 Rule put in place important restrictions on sharing patient information about their reproductive health care, providing Public Health Madison and Dane County's clinics

with clarity on how they can use and disclose this particularly sensitive patient information. Public Health Madison and Dane County's Sexual Health Clinic provides reproductive health services on a regular basis. Clinics and clinicians may obtain sensitive information about their patients' medical care in the course of providing treatment wholly unrelated to reproductive or sexual health and record that information in the medical record. If the 2024 Rule is vacated, it is likely that some patients seeking reproductive health care would forgo such care, and that patients will withhold critical reproductive health information relevant for proper medical treatment from their clinicians.

29. Without the protections of the 2000 and 2024 Rules, Public Health Madison and Dane County providers would have less ability to protect sensitive medical information they receive from misuse. Public Health Madison and Dane County will face increased challenges to provide effective care to patients and to identify and address troubling health trends in the community. Patients would not be willing to share relevant medical information with their providers for fear it may not be protected. Other patients may forgo care altogether. Without these protections, health care professionals, such as those employed by Public Health Madison and Dane County, lose the trust of their patients and cannot deliver high-quality care. In turn, Public Health Madison and Dane County would need to expend significant resources to account for and address this development in patient privacy.

PL 104–191 (HR 3103)

August 21, 1996
HEALTH INSURANCE PORTABILITY AND ACCOUNTABILITY ACT

An Act to amend the Internal Revenue Code of 1986 to improve portability and continuity of health insurance coverage in the group and individual markets, to combat waste, fraud, and abuse in health insurance and health care delivery, to promote the use of medical savings accounts, to improve access to long-term care services and coverage, to simplify the administration of health insurance, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

<< 42 USCA § 210 NOTE >>

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Health Insurance Portability and Accountability Act of 1996".
(b) TABLE OF CONTENTS.—The table of contents of this Act is as follows:

TITLE II—PREVENTING HEALTH CARE FRAUD AND ABUSE;
ADMINISTRATIVE SIMPLIFICATION; MEDICAL LIABILITY REFORM

(a) IN GENERAL.—Subtitle B of title I of the Employee Retirement Income Security Act of 1974 is amended by adding at the end the following new part:

<< 29 USCA Ch. 18 >>

"PART 7—GROUP HEALTH PLAN PORTABILITY, ACCESS, AND RENEWABILITY REQUIREMENTS

<< 29 USCA § 1181 >>

"SEC. 701. INCREASED PORTABILITY THROUGH LIMITATION ON PREEXISTING CONDITION EXCLUSIONS.

"(a) LIMITATION ON PREEXISTING CONDITION EXCLUSION PERIOD; CREDITING FOR PERIODS OF PREVIOUS COVERAGE.—Subject to subsection (d), a group health plan, and a health insurance issuer offering group health insurance coverage, may, with respect to a participant or beneficiary, impose a preexisting condition exclusion only if—

"(1) such exclusion relates to a condition (whether physical or mental), regardless of the cause of the condition, for which medical advice, diagnosis, care, or treatment was recommended or received within the 6–month period ending on the enrollment date;

"(2) such exclusion extends for a period of not more than 12 months (or 18 months in the case of a late enrollee) after the enrollment date; and

"(3) the period of any such preexisting condition exclusion is reduced by the aggregate of the periods of creditable coverage (if any, as defined in subsection (c)(1)) applicable to the participant or beneficiary as of the enrollment date.

"(b) DEFINITIONS.—For purposes of this part—

"(1) PREEXISTING CONDITION EXCLUSION.—

"(A) IN GENERAL.—The term 'preexisting condition exclusion' means, with respect to coverage, a limitation or exclusion of benefits relating to a condition based on the fact that the condition was present before the date of enrollment for such coverage, whether or not any medical advice, diagnosis, care, or treatment was recommended or received before such date.

"(B) TREATMENT OF GENETIC INFORMATION.—Genetic information shall not be treated as a condition described in subsection (a)(1) in the absence of a diagnosis of the condition related to such information.

"(2) ENROLLMENT DATE.—The term 'enrollment date' means, with respect to an individual covered under a group health plan or health insurance coverage, the date of enrollment of the individual in the plan or coverage or, if earlier, the first day of the waiting period for such enrollment.

"(3) LATE ENROLLEE.—The term 'late enrollee' means, with respect to coverage under a group health plan, a participant or beneficiary who enrolls under the plan other than during—

"(A) the first period in which the individual is eligible to enroll under the plan, or

"(B) a special enrollment period under subsection (f).

"(4) WAITING PERIOD.—The term 'waiting period' means, with respect to a group health plan and an individual who is a potential participant or beneficiary in the plan, the period that must pass with respect to the individual before the individual is eligible to be covered for benefits under the terms of the plan.

"(c) RULES RELATING TO CREDITING PREVIOUS COVERAGE.—

"(1) CREDITABLE COVERAGE DEFINED.—For purposes of this part, the term 'creditable coverage' means, with respect to an individual, coverage of the individual under any of the following:

"(A) A group health plan.

"(B) Health insurance coverage.

"(C) Part A or part B of title XVIII of the Social Security Act.

"(D) Title XIX of the Social Security Act, other than coverage consisting solely of benefits under section 1928.

"(E) Chapter 55 of title 10, United States Code.

"(F) A medical care program of the Indian Health Service or of a tribal organization.

"(G) A State health benefits risk pool.

"(H) A health plan offered under chapter 89 of title 5, United States Code.

"(I) A public health plan (as defined in regulations).

"(J) A health benefit plan under section 5(e) of the Peace Corps Act (22 U.S.C. 2504(e)).

Such term does not include coverage consisting solely of coverage of excepted benefits (as defined in section 706(c)).

"(2) NOT COUNTING PERIODS BEFORE SIGNIFICANT BREAKS IN COVERAGE.—

"(A) IN GENERAL.—A period of creditable coverage shall not be counted, with respect to enrollment of an individual under a group health plan, if, after such period and before the enrollment date, there was a 63–day period during all of which the individual was not covered under any creditable coverage.

"(B) WAITING PERIOD NOT TREATED AS A BREAK IN COVERAGE.—For purposes of subparagraph (A) and subsection (d)(4), any period that an individual is in a waiting period for any coverage under a group health plan (or for group health insurance coverage) or is in an affiliation period (as defined in subsection (g)(2)) shall not be taken into account in determining the continuous period under subparagraph (A).

"(3) METHOD OF CREDITING COVERAGE.—

"(A) STANDARD METHOD.—Except as otherwise provided under subparagraph (B), for purposes of applying subsection (a)(3), a group health plan, and a health insurance issuer offering group health insurance coverage, shall count a period of creditable coverage without regard to the specific benefits covered during the period.

"(B) ELECTION OF ALTERNATIVE METHOD.—A group health plan, or a health insurance issuer offering group health insurance coverage, may elect to apply subsection (a)(3) based on coverage of benefits within each of several classes or categories of benefits specified in regulations rather than as provided under subparagraph (A). Such election shall be made on a uniform basis for all participants and beneficiaries. Under such election a group health plan or issuer shall count a period of creditable coverage with respect to any class or category of benefits if any level of benefits is covered within such class or category.

"(C) PLAN NOTICE.—In the case of an election with respect to a group health plan under subparagraph (B) (whether or not health insurance coverage is provided in connection with such plan), the plan shall—

"(i) prominently state in any disclosure statements concerning the plan, and state to each enrollee at the time of enrollment under the plan, that the plan has made such election, and

"(ii) include in such statements a description of the effect of this election.

"(4) ESTABLISHMENT OF PERIOD.—Periods of creditable coverage with respect to an individual shall be established through presentation of certifications described in subsection (e) or in such other manner as may be specified in regulations.

"(d) EXCEPTIONS.—

"(1) EXCLUSION NOT APPLICABLE TO CERTAIN NEWBORNS.—Subject to paragraph (4), a group health plan, and a health insurance issuer offering group health insurance coverage, may not impose any preexisting condition exclusion in the case of an individual who, as of the last day of the 30–day period beginning with the date of birth, is covered under creditable coverage.

"(2) EXCLUSION NOT APPLICABLE TO CERTAIN ADOPTED CHILDREN.—Subject to paragraph (4), a group health plan, and a health insurance issuer offering group health insurance coverage, may not impose any preexisting condition exclusion in the case of a child who is adopted or placed for adoption before attaining 18 years of age and who, as of the last day of the 30–day period beginning on the date of the adoption or placement for adoption, is covered under creditable coverage. The previous sentence shall not apply to coverage before the date of such adoption or placement for adoption.

"(3) EXCLUSION NOT APPLICABLE TO PREGNANCY.—A group health plan, and health insurance issuer offering group health insurance coverage, may not impose any preexisting condition exclusion relating to pregnancy as a preexisting condition.

"(4) LOSS IF BREAK IN COVERAGE.—Paragraphs (1) and (2) shall no longer apply to an individual after the end of the first 63–day period during all of which the individual was not covered under any creditable coverage.

"(e) CERTIFICATIONS AND DISCLOSURE OF COVERAGE.—

"(1) REQUIREMENT FOR CERTIFICATION OF PERIOD OF CREDITABLE COVERAGE.—

"(A) IN GENERAL.—A group health plan, and a health insurance issuer offering group health insurance coverage, shall provide the certification described in subparagraph (B)—

"(i) at the time an individual ceases to be covered under the plan or otherwise becomes covered under a COBRA continuation provision,

"(ii) in the case of an individual becoming covered under such a provision, at the time the individual ceases to be covered under such provision, and

"(iii) on the request on behalf of an individual made not later than 24 months after the date of cessation of the coverage described in clause (i) or (ii), whichever is later.

The certification under clause (i) may be provided, to the extent practicable, at a time consistent with notices required under any applicable COBRA continuation provision.

"(B) CERTIFICATION.—The certification described in this subparagraph is a written certification of—

"(i) the period of creditable coverage of the individual under such plan and the coverage (if any) under such COBRA continuation provision, and

"(ii) the waiting period (if any) (and affiliation period, if applicable) imposed with respect to the individual for any coverage under such plan.

"(C) ISSUER COMPLIANCE.—To the extent that medical care under a group health plan consists of group health insurance coverage, the plan is deemed to have satisfied the certification requirement under this paragraph if the health insurance issuer offering the coverage provides for such certification in accordance with this paragraph.

"(2) DISCLOSURE OF INFORMATION ON PREVIOUS BENEFITS.—In the case of an election described in subsection (c)(3)(B) by a group health plan or health insurance issuer, if the plan or issuer enrolls an individual for coverage under the plan and the individual provides a certification of coverage of the individual under paragraph (1)—

"(A) upon request of such plan or issuer, the entity which issued the certification provided by the individual shall promptly disclose to such requesting plan or issuer information on coverage of classes and categories of health benefits available under such entity's plan or coverage, and

"(B) such entity may charge the requesting plan or issuer for the reasonable cost of disclosing such information.

"(3) REGULATIONS.—The Secretary shall establish rules to prevent an entity's failure to provide information under paragraph (1) or (2) with respect to previous coverage of an individual from adversely affecting any subsequent coverage of the individual under another group health plan or health insurance coverage.

"(f) SPECIAL ENROLLMENT PERIODS.—

"(1) INDIVIDUALS LOSING OTHER COVERAGE.—A group health plan, and a health insurance issuer offering group health insurance coverage in connection with a group health plan, shall permit an employee who is eligible, but not enrolled, for coverage under the terms of the plan (or a dependent of such an employee if the dependent is eligible, but not enrolled, for coverage under such terms) to enroll for coverage under the terms of the plan if each of the following conditions is met:

"(A) The employee or dependent was covered under a group health plan or had health insurance coverage at the time coverage was previously offered to the employee or dependent.

"(B) The employee stated in writing at such time that coverage under a group health plan or health insurance coverage was the reason for declining enrollment, but only if the plan sponsor or issuer (if applicable) required such a statement at such time and provided the employee with notice of such requirement (and the consequences of such requirement) at such time.

"(C) The employee's or dependent's coverage described in subparagraph (A)—

"(i) was under a COBRA continuation provision and the coverage under such provision was exhausted; or

"(ii) was not under such a provision and either the coverage was terminated as a result of loss of eligibility for the coverage (including as a result of legal separation, divorce, death, termination of employment, or reduction in the number of hours of employment) or employer contributions toward such coverage were terminated.

"(D) Under the terms of the plan, the employee requests such enrollment not later than 30 days after the date of exhaustion of coverage described in subparagraph (C)(i) or termination of coverage or employer contribution described in subparagraph (C)(ii).

"(2) FOR DEPENDENT BENEFICIARIES.—

"(A) IN GENERAL.—If—

"(i) a group health plan makes coverage available with respect to a dependent of an individual,

"(ii) the individual is a participant under the plan (or has met any waiting period applicable to becoming a participant under the plan and is eligible to be enrolled under the plan but for a failure to enroll during a previous enrollment period), and

"(iii) a person becomes such a dependent of the individual through marriage, birth, or adoption or placement for adoption,

the group health plan shall provide for a dependent special enrollment period described in subparagraph (B) during which the person (or, if not otherwise enrolled, the individual) may be enrolled under the plan as a dependent of the individual, and in the case of the birth or adoption of a child, the spouse of the individual may be enrolled as a dependent of the individual if such spouse is otherwise eligible for coverage.

"(B) DEPENDENT SPECIAL ENROLLMENT PERIOD.—A dependent special enrollment period under this subparagraph shall be a period of not less than 30 days and shall begin on the later of—

"(i) the date dependent coverage is made available, or

"(ii) the date of the marriage, birth, or adoption or placement for adoption (as the case may be) described in subparagraph (A)(iii).

"(C) NO WAITING PERIOD.—If an individual seeks to enroll a dependent during the first 30 days of such a dependent special enrollment period, the coverage of the dependent shall become effective—

"(i) in the case of marriage, not later than the first day of the first month beginning after the date the completed request for enrollment is received;

"(ii) in the case of a dependent's birth, as of the date of such birth; or

"(iii) in the case of a dependent's adoption or placement for adoption, the date of such adoption or placement for adoption.

"(g) USE OF AFFILIATION PERIOD BY HMOS AS ALTERNATIVE TO PREEXISTING CONDITION EXCLUSION.—

"(1) IN GENERAL.—In the case of a group health plan that offers medical care through health insurance coverage offered by a health maintenance organization, the plan may provide for an affiliation period with respect to coverage through the organization only if—

"(A) no preexisting condition exclusion is imposed with respect to coverage through the organization,

"(B) the period is applied uniformly without regard to any health status-related factors, and

"(C) such period does not exceed 2 months (or 3 months in the case of a late enrollee).

"(2) AFFILIATION PERIOD.—

"(A) DEFINED.—For purposes of this part, the term 'affiliation period' means a period which, under the terms of the health insurance coverage offered by the health maintenance organization, must expire before the health insurance coverage becomes effective. The organization is not required to provide health care services or benefits during such period and no premium shall be charged to the participant or beneficiary for any coverage during the period.

"(B) BEGINNING.—Such period shall begin on the enrollment date.

"(C) RUNS CONCURRENTLY WITH WAITING PERIODS.—An affiliation period under a plan shall run concurrently with any waiting period under the plan.

"(3) ALTERNATIVE METHODS.—A health maintenance organization described in paragraph (1) may use alternative methods, from those described in such paragraph, to address adverse selection as approved by the State insurance commissioner or official or officials designated by the State to enforce the requirements of part A of title XXVII of the Public Health Service Act for the State involved with respect to such issuer.

<< 29 USCA § 1182 >>

"SEC. 702. PROHIBITING DISCRIMINATION AGAINST INDIVIDUAL PARTICIPANTS AND BENEFICIARIES BASED ON HEALTH STATUS.

"(a) IN ELIGIBILITY TO ENROLL.—

"(1) IN GENERAL.—Subject to paragraph (2), a group health plan, and a health insurance issuer offering group health insurance coverage in connection with a group health plan, may not establish rules for eligibility (including continued eligibility) of any individual to enroll under the terms of the plan based on any of the following health status-related factors in relation to the individual or a dependent of the individual:

"(A) Health status.

"(B) Medical condition (including both physical and mental illnesses).

"(C) Claims experience.

"(D) Receipt of health care.

"(E) Medical history.

"(F) Genetic information.

"(G) Evidence of insurability (including conditions arising out of acts of domestic violence).

"(H) Disability.

"(2) NO APPLICATION TO BENEFITS OR EXCLUSIONS.—To the extent consistent with section 701, paragraph (1) shall not be construed—

"(A) to require a group health plan, or group health insurance coverage, to provide particular benefits other than those provided under the terms of such plan or coverage, or

"(B) to prevent such a plan or coverage from establishing limitations or restrictions on the amount, level, extent, or nature of the benefits or coverage for similarly situated individuals enrolled in the plan or coverage.

"(3) CONSTRUCTION.—For purposes of paragraph (1), rules for eligibility to enroll under a plan include rules defining any applicable waiting periods for such enrollment.

"(b) IN PREMIUM CONTRIBUTIONS.—

"(1) IN GENERAL.—A group health plan, and a health insurance issuer offering health insurance coverage in connection with a group health plan, may not require any individual (as a condition of enrollment or continued enrollment under the plan) to pay a premium or contribution which is greater than such premium or contribution for a similarly situated individual enrolled in the plan on the basis of any health status-related factor in relation to the individual or to an individual enrolled under the plan as a dependent of the individual.

"(2) CONSTRUCTION.—Nothing in paragraph (1) shall be construed—

"(A) to restrict the amount that an employer may be charged for coverage under a group health plan; or

"(B) to prevent a group health plan, and a health insurance issuer offering group health insurance coverage, from establishing premium discounts or rebates or modifying otherwise applicable copayments or deductibles in return for adherence to programs of health promotion and disease prevention.

<< 29 USCA § 1183 >>

"SEC. 703. GUARANTEED RENEWABILITY IN MULTIEMPLOYER PLANS AND MULTIPLE EMPLOYER WELFARE ARRANGEMENTS.

"A group health plan which is a multiemployer plan or which is a multiple employer welfare arrangement may not deny an employer whose employees are covered under such a plan continued access to the same or different coverage under the terms of such a plan, other than—

"(1) for nonpayment of contributions;

"(2) for fraud or other intentional misrepresentation of material fact by the employer;

"(3) for noncompliance with material plan provisions;

"(4) because the plan is ceasing to offer any coverage in a geographic area;

"(5) in the case of a plan that offers benefits through a network plan, there is no longer any individual enrolled through the employer who lives, resides, or works in the service area of the network plan and the plan applies this paragraph uniformly without regard to the claims experience of employers or any health status-related factor in relation to such individuals or their dependents; and

"(6) for failure to meet the terms of an applicable collective bargaining agreement, to renew a collective bargaining or other agreement requiring or authorizing contributions to the plan, or to employ employees covered by such an agreement.

<< 29 USCA § 1184 >>

"SEC. 704. PREEMPTION; STATE FLEXIBILITY; CONSTRUCTION.

"(a) CONTINUED APPLICABILITY OF STATE LAW WITH RESPECT TO HEALTH INSURANCE ISSUERS.—

"(1) IN GENERAL.—Subject to paragraph (2) and except as provided in subsection (b), this part shall not be construed to supersede any provision of State law which establishes, implements, or continues in effect any standard or requirement solely relating to health insurance issuers in connection with group health insurance coverage except to the extent that such standard or requirement prevents the application of a requirement of this part.

"(2) CONTINUED PREEMPTION WITH RESPECT TO GROUP HEALTH PLANS.—Nothing in this part shall be construed to affect or modify the provisions of section 514 with respect to group health plans.

"(b) SPECIAL RULES IN CASE OF PORTABILITY REQUIREMENTS.—

"(1) IN GENERAL.—Subject to paragraph (2), the provisions of this part relating to health insurance coverage offered by a health insurance issuer supersede any provision of State law which establishes, implements, or continues in effect a standard or requirement applicable to imposition of a preexisting condition exclusion specifically governed by section 701 which differs from the standards or requirements specified in such section.

"(2) EXCEPTIONS.—Only in relation to health insurance coverage offered by a health insurance issuer, the provisions of this part do not supersede any provision of State law to the extent that such provision—

"(A) substitutes for the reference to '6–month period' in section 701(a)(1) a reference to any shorter period of time;

"(B) substitutes for the reference to '12 months' and '18 months' in section 701(a)(2) a reference to any shorter period of time;

"(C) substitutes for the references to '63 days' in sections 701(c)(2)(A) and (d)(4)(A) a reference to any greater number of days;

"(D) substitutes for the reference to '30–day period' in sections 701(b)(2) and (d)(1) a reference to any greater period;

"(E) prohibits the imposition of any preexisting condition exclusion in cases not described in section 701(d) or expands the exceptions described in such section;

"(F) requires special enrollment periods in addition to those required under section 701(f); or

"(G) reduces the maximum period permitted in an affiliation period under section 701(g)(1)(B).

"(c) RULES OF CONSTRUCTION.—Nothing in this part shall be construed as requiring a group health plan or health insurance coverage to provide specific benefits under the terms of such plan or coverage.

"(d) DEFINITIONS.—For purposes of this section—

"(1) STATE LAW.—The term 'State law' includes all laws, decisions, rules, regulations, or other State action having the effect of law, of any State. A law of the United States applicable only to the District of Columbia shall be treated as a State law rather than a law of the United States.

"(2) STATE.—The term 'State' includes a State, the Northern Mariana Islands, any political subdivisions of a State or such Islands, or any agency or instrumentality of either.

<< 29 USCA § 1185 >>

"SEC. 705. SPECIAL RULES RELATING TO GROUP HEALTH PLANS.

"(a) GENERAL EXCEPTION FOR CERTAIN SMALL GROUP HEALTH PLANS.—The requirements of this part shall not apply to any group health plan (and group health insurance coverage offered in connection with a group health plan) for any plan year if, on the first day of such plan year, such plan has less than 2 participants who are current employees.

"(b) EXCEPTION FOR CERTAIN BENEFITS.—The requirements of this part shall not apply to any group health plan (and group health insurance coverage) in relation to its provision of excepted benefits described in section 706(c)(1).

"(c) EXCEPTION FOR CERTAIN BENEFITS IF CERTAIN CONDITIONS MET.—

"(1) LIMITED, EXCEPTED BENEFITS.—The requirements of this part shall not apply to any group health plan (and group health insurance coverage offered in connection with a group health plan) in relation to its provision of excepted benefits described in section 706(c)(2) if the benefits—

"(A) are provided under a separate policy, certificate, or contract of insurance; or

"(B) are otherwise not an integral part of the plan.

"(2) NONCOORDINATED, EXCEPTED BENEFITS.—The requirements of this part shall not apply to any group health plan (and group health insurance coverage offered in connection with a group health plan) in relation to its provision of excepted benefits described in section 706(c)(3) if all of the following conditions are met:

"(A) The benefits are provided under a separate policy, certificate, or contract of insurance.

"(B) There is no coordination between the provision of such benefits and any exclusion of benefits under any group health plan maintained by the same plan sponsor.

"(C) Such benefits are paid with respect to an event without regard to whether benefits are provided with respect to such an event under any group health plan maintained by the same plan sponsor.

"(3) SUPPLEMENTAL EXCEPTED BENEFITS.—The requirements of this part shall not apply to any group health plan (and group health insurance coverage) in relation to its provision of excepted benefits described in section 706(c)(4) if the benefits are provided under a separate policy, certificate, or contract of insurance.

"(d) TREATMENT OF PARTNERSHIPS.—For purposes of this part—

"(1) TREATMENT AS A GROUP HEALTH PLAN.—Any plan, fund, or program which would not be (but for this subsection) an employee welfare benefit plan and which is established or maintained by a partnership, to the extent that such plan, fund, or program provides medical care (including items and services paid for as medical care) to present or former partners in the partnership or to their dependents (as defined under the terms of the plan, fund, or program), directly or through insurance, reimbursement, or otherwise, shall be treated (subject to paragraph (2)) as an employee welfare benefit plan which is a group health plan.

"(2) EMPLOYER.—In the case of a group health plan, the term 'employer' also includes the partnership in relation to any partner.

"(3) PARTICIPANTS OF GROUP HEALTH PLANS.—In the case of a group health plan, the term 'participant' also includes —

"(A) in connection with a group health plan maintained by a partnership, an individual who is a partner in relation to the partnership, or

"(B) in connection with a group health plan maintained by a self-employed individual (under which one or more employees are participants), the self-employed individual,

if such individual is, or may become, eligible to receive a benefit under the plan or such individual's beneficiaries may be eligible to receive any such benefit.

<< 29 USCA § 1186 >>

"SEC. 706. DEFINITIONS.

"(a) GROUP HEALTH PLAN.—For purposes of this part—

"(1) IN GENERAL.—The term 'group health plan' means an employee welfare benefit plan to the extent that the plan provides medical care (as defined in paragraph (2) and including items and services paid for as medical care) to employees or their dependents (as defined under the terms of the plan) directly or through insurance, reimbursement, or otherwise.

"(2) MEDICAL CARE.—The term 'medical care' means amounts paid for—

"(A) the diagnosis, cure, mitigation, treatment, or prevention of disease, or amounts paid for the purpose of affecting any structure or function of the body,

"(B) amounts paid for transportation primarily for and essential to medical care referred to in subparagraph (A), and

"(C) amounts paid for insurance covering medical care referred to in subparagraphs (A) and (B).

"(b) DEFINITIONS RELATING TO HEALTH INSURANCE.—For purposes of this part—

"(1) HEALTH INSURANCE COVERAGE.—The term 'health insurance coverage' means benefits consisting of medical care (provided directly, through insurance or reimbursement, or otherwise and including items and services paid for as medical care) under any hospital or medical service policy or certificate, hospital or medical service plan contract, or health maintenance organization contract offered by a health insurance issuer.

"(2) HEALTH INSURANCE ISSUER.—The term 'health insurance issuer' means an insurance company, insurance service, or insurance organization (including a health maintenance organization, as defined in paragraph (3)) which is licensed to engage in the business of insurance in a State and which is subject to State law which regulates insurance (within the meaning of section 514(b)(2)). Such term does not include a group health plan.

"(3) HEALTH MAINTENANCE ORGANIZATION.—The term 'health maintenance organization' means—

"(A) a federally qualified health maintenance organization (as defined in section 1301(a) of the Public Health Service Act (42 U.S.C. 300e(a))),

"(B) an organization recognized under State law as a health maintenance organization, or

"(C) a similar organization regulated under State law for solvency in the same manner and to the same extent as such a health maintenance organization.

"(4) GROUP HEALTH INSURANCE COVERAGE.—The term 'group health insurance coverage' means, in connection with a group health plan, health insurance coverage offered in connection with such plan.

"(c) EXCEPTED BENEFITS.—For purposes of this part, the term 'excepted benefits' means benefits under one or more (or any combination thereof) of the following:

"(1) BENEFITS NOT SUBJECT TO REQUIREMENTS.—

"(A) Coverage only for accident, or disability income insurance, or any combination thereof.

"(B) Coverage issued as a supplement to liability insurance.

"(C) Liability insurance, including general liability insurance and automobile liability insurance.

"(D) Workers' compensation or similar insurance.

"(E) Automobile medical payment insurance.

"(F) Credit-only insurance.

"(G) Coverage for on-site medical clinics.

"(H) Other similar insurance coverage, specified in regulations, under which benefits for medical care are secondary or incidental to other insurance benefits.

"(2) BENEFITS NOT SUBJECT TO REQUIREMENTS IF OFFERED SEPARATELY.—

"(A) Limited scope dental or vision benefits.

"(B) Benefits for long-term care, nursing home care, home health care, community-based care, or any combination thereof.

"(C) Such other similar, limited benefits as are specified in regulations.

"(3) BENEFITS NOT SUBJECT TO REQUIREMENTS IF OFFERED AS INDEPENDENT, NONCOORDINATED BENEFITS.—

"(A) Coverage only for a specified disease or illness.

"(B) Hospital indemnity or other fixed indemnity insurance.

"(4) BENEFITS NOT SUBJECT TO REQUIREMENTS IF OFFERED AS SEPARATE INSURANCE POLICY.—Medicare supplemental health insurance (as defined under section 1882(g)(1) of the Social Security Act), coverage supplemental to the coverage provided under chapter 55 of title 10, United States Code, and similar supplemental coverage provided to coverage under a group health plan.

"(d) OTHER DEFINITIONS.—For purposes of this part—

"(1) COBRA CONTINUATION PROVISION.—The term 'COBRA continuation provision' means any of the following:

"(A) Part 6 of this subtitle.

"(B) Section 4980B of the Internal Revenue Code of 1986, other than subsection (f)(1) of such section insofar as it relates to pediatric vaccines.

"(C) Title XXII of the Public Health Service Act.

"(2) HEALTH STATUS–RELATED FACTOR.—The term 'health status-related factor' means any of the factors described in section 702(a)(1).

"(3) NETWORK PLAN.—The term 'network plan' means health insurance coverage offered by a health insurance issuer under which the financing and delivery of medical care (including items and services paid for as medical care) are provided, in whole or in part, through a defined set of providers under contract with the issuer.

"(4) PLACED FOR ADOPTION.—The term 'placement', or being 'placed', for adoption, has the meaning given such term in section 609(c)(3)(B).

<< 29 USCA § 1187 >>

"SEC. 707. REGULATIONS.

"The Secretary, consistent with section 104 of the Health Care Portability and Accountability Act of 1996, may promulgate such regulations as may be necessary or appropriate to carry out the provisions of this part. The Secretary may promulgate any interim final rules as the Secretary determines are appropriate to carry out this part.".

<< 29 USCA § 1132 >>

(b) ENFORCEMENT WITH RESPECT TO HEALTH INSURANCE ISSUERS.—Section 502(b) of such Act (29 U.S.C. 1132(b)) is amended by adding at the end the following new paragraph:

"(3) The Secretary is not authorized to enforce under this part any requirement of part 7 against a health insurance issuer offering health insurance coverage in connection with a group health plan (as defined in section 706(a)(1)). Nothing in this paragraph shall affect the authority of the Secretary to issue regulations to carry out such part.".

(c) DISCLOSURE OF INFORMATION TO PARTICIPANTS AND BENEFICIARIES.—

<< 29 USCA § 1024 >>

(1) IN GENERAL.—Section 104(b)(1) of such Act (29 U.S.C. 1024(b)(1)) is amended in the matter following subparagraph (B)—

(A) by striking "102(a)(1)," and inserting "102(a)(1) (other than a material reduction in covered services or benefits provided in the case of a group health plan (as defined in section 706(a)(1))),"; and

(B) by adding at the end the following new sentences: "If there is a modification or change described in section 102(a)(1) that is a material reduction in covered services or benefits provided under a group health plan (as defined in section 706(a)(1)), a summary description of such modification or change shall be furnished to participants and beneficiaries not later than 60 days after the date of the adoption of the modification or change. In the alternative, the plan sponsors may provide such description at regular intervals of not more than 90 days. The Secretary shall issue regulations within 180 days after the date of enactment of the Health Insurance Portability and Accountability Act of 1996, providing alternative mechanisms to delivery by mail through which group health plans (as so defined) may notify participants and beneficiaries of material reductions in covered services or benefits.".

<< 29 USCA § 1022 >>

(2) PLAN DESCRIPTION AND SUMMARY.—Section 102(b) of such Act (29 U.S.C. 1022(b)) is amended—

(A) by inserting "in the case of a group health plan (as defined in section 706(a)(1)), whether a health insurance issuer (as defined in section 706(b)(2)) is responsible for the financing or administration (including payment of claims) of the plan and (if so) the name and address of such issuer;" after "type of administration of the plan;"; and

(B) by inserting "including the office at the Department of Labor through which participants and beneficiaries may seek assistance or information regarding their rights under this Act and the Health Insurance Portability and Accountability Act of 1996 with respect to health benefits that are offered through a group health plan (as defined in section 706(a)(1))" after "benefits under the plan".

<< 29 USCA § 1003 >>

(d) TREATMENT OF HEALTH INSURANCE ISSUERS OFFERING HEALTH INSURANCE COVERAGE TO NONCOVERED PLANS.—Section 4(b) of such Act (29 U.S.C. 1003(b)) is amended by adding at the end (after and below paragraph (5)) the following:

"The provisions of part 7 of subtitle B shall not apply to a health insurance issuer (as defined in section 706(b)(2)) solely by reason of health insurance coverage (as defined in section 706(b)(1)) provided by such issuer in connection with a group health plan (as defined in section 706(a)(1)) if the provisions of this title do not apply to such group health plan.".

(e) REPORTING AND ENFORCEMENT WITH RESPECT TO CERTAIN ARRANGEMENTS.—

<< 29 USCA § 1021 >>

(1) IN GENERAL.—Section 101 of such Act (29 U.S.C. 1021) is amended—

(A) by redesignating subsection (g) as subsection (h), and

(B) by inserting after subsection (f) the following new subsection:

"(g) REPORTING BY CERTAIN ARRANGEMENTS.—The Secretary may, by regulation, require multiple employer welfare arrangements providing benefits consisting of medical care (within the meaning of section 706(a)(2)) which are not group health plans to report, not more frequently than annually, in such form and such manner as the Secretary may require for the purpose of determining the extent to which the requirements of part 7 are being carried out in connection with such benefits.".

<< 29 USCA § 1132 >>

(2) ENFORCEMENT.—

(A) IN GENERAL.—Section 502 of such Act (29 U.S.C. 1132) is amended—

(i) in subsection (a)(6), by striking "under subsection (c)(2) or (i) or (l)" and inserting "under paragraph (2), (4), or (5) of subsection (c) or under subsection (i) or (l)"; and

(ii) in the last 2 sentences of subsection (c), by striking "For purposes of this paragraph" and all that follows through "The Secretary and" and inserting the following:

"(5) The Secretary may assess a civil penalty against any person of up to $1,000 a day from the date of the person's failure or refusal to file the information required to be filed by such person with the Secretary under regulations prescribed pursuant to section 101(g).

"(6) The Secretary and".

(B) TECHNICAL AND CONFORMING AMENDMENT.—Section 502(c)(1) of such Act (29 U.S.C. 1132(c)(1)) is amended by adding at the end the following sentence: "For purposes of this paragraph, each violation described in subparagraph (A) with respect to any single participant, and each violation described in subparagraph (B) with respect to any single participant or beneficiary, shall be treated as a separate violation.".

<< 29 USCA § 1136 >>

(3) COORDINATION.—Section 506 of such Act (29 U.S.C. 1136) is amended by adding at the end the following new subsection:

"(c) COORDINATION OF ENFORCEMENT WITH STATES WITH RESPECT TO CERTAIN ARRANGEMENTS.—A State may enter into an agreement with the Secretary for delegation to the State of some or all of the Secretary's authority under sections 502 and 504 to enforce the requirements under part 7 in connection with multiple employer welfare arrangements, providing medical care (within the meaning of section 706(a)(2)), which are not group health plans.".

(f) CONFORMING AMENDMENTS.—

<< 29 USCA § 1144 >>

(1) Section 514(b) of such Act (29 U.S.C. 1144(b)) is amended by adding at the end the following new paragraph:

"(9) For additional provisions relating to group health plans, see section 704.".

(2)(A) Part 6 of subtitle B of title I of such Act (29 U.S.C. 1161 et seq.) is amended by striking the heading and inserting the following:

<< 29 USCA Ch. 18 >>

"PART 6—CONTINUATION COVERAGE AND ADDITIONAL STANDARDS FOR GROUP HEALTH PLANS".

(B) The table of contents in section 1 of such Act is amended by striking the item relating to the heading for part 6 of subtitle B of title I and inserting the following:

"PART 6—CONTINUATION COVERAGE AND ADDITIONAL STANDARDS FOR GROUP HEALTH PLANS".

(3) The table of contents in section 1 of such Act (as amended by the preceding provisions of this section) is amended by inserting after the items relating to part 6 the following new items:

"PART 7—GROUP HEALTH PLAN PORTABILITY, ACCESS, AND RENEWABILITY REQUIREMENTS

"Sec. 701. Increased portability through limitation on preexisting condition exclusions.

"Sec. 702. Prohibiting discrimination against individual participants and beneficiaries based on health status.

"Sec. 703. Guaranteed renewability in multiemployer plans and multiple employer welfare arrangements.

"Sec. 704. Preemption; State flexibility; construction.

"Sec. 705. Special rules relating to group health plans.

"Sec. 706. Definitions.

"Sec. 707. Regulations.".

<< 29 USCA §§ 1003 nt, 1021 nt, 1022 nt, 1024 nt, 1132 nt, 1136 nt, 1144 nt >>

<< 29 USCA §§ 1181 NOTE, 1182 nt, 1183 nt, 1184 nt, 1185 nt, 1186 nt, 1187 nt >>

(g) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in this section, this section (and the amendments made by this section) shall apply with respect to group health plans for plan years beginning after June 30, 1997.

(2) DETERMINATION OF CREDITABLE COVERAGE.—

(A) PERIOD OF COVERAGE.—

(i) IN GENERAL.—Subject to clause (ii), no period before July 1, 1996, shall be taken into account under part 7 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 (as added by this section) in determining creditable coverage.

(ii) SPECIAL RULE FOR CERTAIN PERIODS.—The Secretary of Labor, consistent with section 104, shall provide for a process whereby individuals who need to establish creditable coverage for periods before July 1, 1996, and who would have such coverage credited but for clause (i) may be given credit for creditable coverage for such periods through the presentation of documents or other means.

(B) CERTIFICATIONS, ETC.—

(i) IN GENERAL.—Subject to clauses (ii) and (iii), subsection (e) of section 701 of the Employee Retirement Income Security Act of 1974 (as added by this section) shall apply to events occurring after June 30, 1996.

(ii) NO CERTIFICATION REQUIRED TO BE PROVIDED BEFORE JUNE 1, 1997.—In no case is a certification required to be provided under such subsection before June 1, 1997.

(iii) CERTIFICATION ONLY ON WRITTEN REQUEST FOR EVENTS OCCURRING BEFORE OCTOBER 1, 1996.—In the case of an event occurring after June 30, 1996, and before October 1, 1996, a certification is not required to be provided under such subsection unless an individual (with respect to whom the certification is otherwise required to be made) requests such certification in writing.

(C) TRANSITIONAL RULE.—In the case of an individual who seeks to establish creditable coverage for any period for which certification is not required because it relates to an event occurring before June 30, 1996—

(i) the individual may present other credible evidence of such coverage in order to establish the period of creditable coverage; and

(ii) a group health plan and a health insurance issuer shall not be subject to any penalty or enforcement action with respect to the plan's or issuer's crediting (or not crediting) such coverage if the plan or issuer has sought to comply in good faith with the applicable requirements under the amendments made by this section.

(3) SPECIAL RULE FOR COLLECTIVE BARGAINING AGREEMENTS.—Except as provided in paragraph (2), in the case of a group health plan maintained pursuant to one or more collective bargaining agreements between employee representatives and one or more employers ratified before the date of the enactment of this Act, part 7 of subtitle B of title I of Employee Retirement Income Security Act of 1974 (other than section 701(e) thereof) shall not apply to plan years beginning before the later of—

(A) the date on which the last of the collective bargaining agreements relating to the plan terminates (determined without regard to any extension thereof agreed to after the date of the enactment of this Act), or

(B) July 1, 1997.

For purposes of subparagraph (A), any plan amendment made pursuant to a collective bargaining agreement relating to the plan which amends the plan solely to conform to any requirement of such part shall not be treated as a termination of such collective bargaining agreement.

(4) TIMELY REGULATIONS.—The Secretary of Labor, consistent with section 104, shall first issue by not later than April 1, 1997, such regulations as may be necessary to carry out the amendments made by this section.

(5) LIMITATION ON ACTIONS.—No enforcement action shall be taken, pursuant to the amendments made by this section, against a group health plan or health insurance issuer with respect to a violation of a requirement imposed by such amendments before January 1, 1998, or, if later, the date of issuance of regulations referred to in paragraph (4), if the plan or issuer has sought to comply in good faith with such requirements.

SEC. 102. THROUGH THE PUBLIC HEALTH SERVICE ACT.

(a) IN GENERAL.—The Public Health Service Act is amended by adding at the end the following new title:

<< 42 USCA Ch. 6A >>

"TITLE XXVII—ASSURING PORTABILITY, AVAILABILITY, AND RENEWABILITY OF HEALTH INSURANCE COVERAGE

"PART A—GROUP MARKET REFORMS

"Subpart 1—Portability, Access, and Renewability Requirements

<< 42 USCA § 300gg >>

"SEC. 2701. INCREASED PORTABILITY THROUGH LIMITATION ON PREEXISTING CONDITION EXCLUSIONS.

"(a) LIMITATION ON PREEXISTING CONDITION EXCLUSION PERIOD; CREDITING FOR PERIODS OF PREVIOUS COVERAGE.—Subject to subsection (d), a group health plan, and a health insurance issuer offering group health insurance coverage, may, with respect to a participant or beneficiary, impose a preexisting condition exclusion only if—

"(1) such exclusion relates to a condition (whether physical or mental), regardless of the cause of the condition, for which medical advice, diagnosis, care, or treatment was recommended or received within the 6–month period ending on the enrollment date;

"(2) such exclusion extends for a period of not more than 12 months (or 18 months in the case of a late enrollee) after the enrollment date; and

"(3) the period of any such preexisting condition exclusion is reduced by the aggregate of the periods of creditable coverage (if any, as defined in subsection (c)(1)) applicable to the participant or beneficiary as of the enrollment date.

"(b) DEFINITIONS.—For purposes of this part—

"(1) PREEXISTING CONDITION EXCLUSION.—

"(A) IN GENERAL.—The term 'preexisting condition exclusion' means, with respect to coverage, a limitation or exclusion of benefits relating to a condition based on the fact that the condition was present before the date of enrollment for such coverage, whether or not any medical advice, diagnosis, care, or treatment was recommended or received before such date.

"(B) TREATMENT OF GENETIC INFORMATION.—Genetic information shall not be treated as a condition described in subsection (a)(1) in the absence of a diagnosis of the condition related to such information.

"(2) ENROLLMENT DATE.—The term 'enrollment date' means, with respect to an individual covered under a group health plan or health insurance coverage, the date of enrollment of the individual in the plan or coverage or, if earlier, the first day of the waiting period for such enrollment.

"(3) LATE ENROLLEE.—The term 'late enrollee' means, with respect to coverage under a group health plan, a participant or beneficiary who enrolls under the plan other than during—

"(A) the first period in which the individual is eligible to enroll under the plan, or

"(B) a special enrollment period under subsection (f).

"(4) WAITING PERIOD.—The term 'waiting period' means, with respect to a group health plan and an individual who is a potential participant or beneficiary in the plan, the period that must pass with respect to the individual before the individual is eligible to be covered for benefits under the terms of the plan.

"(c) RULES RELATING TO CREDITING PREVIOUS COVERAGE.—

"(1) CREDITABLE COVERAGE DEFINED.—For purposes of this title, the term 'creditable coverage' means, with respect to an individual, coverage of the individual under any of the following:

"(A) A group health plan.

"(B) Health insurance coverage.

"(C) Part A or part B of title XVIII of the Social Security Act.

"(D) Title XIX of the Social Security Act, other than coverage consisting solely of benefits under section 1928.

"(E) Chapter 55 of title 10, United States Code.

"(F) A medical care program of the Indian Health Service or of a tribal organization.

"(G) A State health benefits risk pool.

"(H) A health plan offered under chapter 89 of title 5, United States Code.

"(I) A public health plan (as defined in regulations).

"(J) A health benefit plan under section 5(e) of the Peace Corps Act (22 U.S.C. 2504(e)).

Such term does not include coverage consisting solely of coverage of excepted benefits (as defined in section 2791(c)).

"(2) NOT COUNTING PERIODS BEFORE SIGNIFICANT BREAKS IN COVERAGE.—

"(A) IN GENERAL.—A period of creditable coverage shall not be counted, with respect to enrollment of an individual under a group health plan, if, after such period and before the enrollment date, there was a 63–day period during all of which the individual was not covered under any creditable coverage.

"(B) WAITING PERIOD NOT TREATED AS A BREAK IN COVERAGE.—For purposes of subparagraph (A) and subsection (d)(4), any period that an individual is in a waiting period for any coverage under a group health plan (or for group health insurance coverage) or is in an affiliation period (as defined in subsection (g)(2)) shall not be taken into account in determining the continuous period under subparagraph (A).

"(3) METHOD OF CREDITING COVERAGE.—

"(A) STANDARD METHOD.—Except as otherwise provided under subparagraph (B), for purposes of applying subsection (a)(3), a group health plan, and a health insurance issuer offering group health insurance coverage, shall count a period of creditable coverage without regard to the specific benefits covered during the period.

"(B) ELECTION OF ALTERNATIVE METHOD.—A group health plan, or a health insurance issuer offering group health insurance, may elect to apply subsection (a)(3) based on coverage of benefits within each of several classes or categories of benefits specified in regulations rather than as provided under subparagraph (A). Such election shall be made on a uniform

basis for all participants and beneficiaries. Under such election a group health plan or issuer shall count a period of creditable coverage with respect to any class or category of benefits if any level of benefits is covered within such class or category.

"(C) PLAN NOTICE.—In the case of an election with respect to a group health plan under subparagraph (B) (whether or not health insurance coverage is provided in connection with such plan), the plan shall—

"(i) prominently state in any disclosure statements concerning the plan, and state to each enrollee at the time of enrollment under the plan, that the plan has made such election, and

"(ii) include in such statements a description of the effect of this election.

"(D) ISSUER NOTICE.—In the case of an election under subparagraph (B) with respect to health insurance coverage offered by an issuer in the small or large group market, the issuer—

"(i) shall prominently state in any disclosure statements concerning the coverage, and to each employer at the time of the offer or sale of the coverage, that the issuer has made such election, and

"(ii) shall include in such statements a description of the effect of such election.

"(4) ESTABLISHMENT OF PERIOD.—Periods of creditable coverage with respect to an individual shall be established through presentation of certifications described in subsection (e) or in such other manner as may be specified in regulations.

"(d) EXCEPTIONS.—

"(1) EXCLUSION NOT APPLICABLE TO CERTAIN NEWBORNS.—Subject to paragraph (4), a group health plan, and a health insurance issuer offering group health insurance coverage, may not impose any preexisting condition exclusion in the case of an individual who, as of the last day of the 30–day period beginning with the date of birth, is covered under creditable coverage.

"(2) EXCLUSION NOT APPLICABLE TO CERTAIN ADOPTED CHILDREN.—Subject to paragraph (4), a group health plan, and a health insurance issuer offering group health insurance coverage, may not impose any preexisting condition exclusion in the case of a child who is adopted or placed for adoption before attaining 18 years of age and who, as of the last day of the 30-day period beginning on the date of the adoption or placement for adoption, is covered under creditable coverage. The previous sentence shall not apply to coverage before the date of such adoption or placement for adoption.

"(3) EXCLUSION NOT APPLICABLE TO PREGNANCY.—A group health plan, and health insurance issuer offering group health insurance coverage, may not impose any preexisting condition exclusion relating to pregnancy as a preexisting condition.

"(4) LOSS IF BREAK IN COVERAGE.—Paragraphs (1) and (2) shall no longer apply to an individual after the end of the first 63–day period during all of which the individual was not covered under any creditable coverage.

"(e) CERTIFICATIONS AND DISCLOSURE OF COVERAGE.—

"(1) REQUIREMENT FOR CERTIFICATION OF PERIOD OF CREDITABLE COVERAGE.—

"(A) IN GENERAL.—A group health plan, and a health insurance issuer offering group health insurance coverage, shall provide the certification described in subparagraph (B)—

"(i) at the time an individual ceases to be covered under the plan or otherwise becomes covered under a COBRA continuation provision,

"(ii) in the case of an individual becoming covered under such a provision, at the time the individual ceases to be covered under such provision, and

"(iii) on the request on behalf of an individual made not later than 24 months after the date of cessation of the coverage described in clause (i) or (ii), whichever is later.

The certification under clause (i) may be provided, to the extent practicable, at a time consistent with notices required under any applicable COBRA continuation provision.

"(B) CERTIFICATION.—The certification described in this subparagraph is a written certification of—

"(i) the period of creditable coverage of the individual under such plan and the coverage (if any) under such COBRA continuation provision, and

"(ii) the waiting period (if any) (and affiliation period, if applicable) imposed with respect to the individual for any coverage under such plan.

"(C) ISSUER COMPLIANCE.—To the extent that medical care under a group health plan consists of group health insurance coverage, the plan is deemed to have satisfied the certification requirement under this paragraph if the health insurance issuer offering the coverage provides for such certification in accordance with this paragraph.

"(2) DISCLOSURE OF INFORMATION ON PREVIOUS BENEFITS.—In the case of an election described in subsection (c)(3)(B) by a group health plan or health insurance issuer, if the plan or issuer enrolls an individual for coverage under the plan and the individual provides a certification of coverage of the individual under paragraph (1)—

"(A) upon request of such plan or issuer, the entity which issued the certification provided by the individual shall promptly disclose to such requesting plan or issuer information on coverage of classes and categories of health benefits available under such entity's plan or coverage, and

"(B) such entity may charge the requesting plan or issuer for the reasonable cost of disclosing such information.

"(3) REGULATIONS.—The Secretary shall establish rules to prevent an entity's failure to provide information under paragraph (1) or (2) with respect to previous coverage of an individual from adversely affecting any subsequent coverage of the individual under another group health plan or health insurance coverage.

"(f) SPECIAL ENROLLMENT PERIODS.—

"(1) INDIVIDUALS LOSING OTHER COVERAGE.—A group health plan, and a health insurance issuer offering group health insurance coverage in connection with a group health plan, shall permit an employee who is eligible, but not enrolled, for coverage under the terms of the plan (or a dependent of such an employee if the dependent is eligible, but not enrolled, for coverage under such terms) to enroll for coverage under the terms of the plan if each of the following conditions is met:

"(A) The employee or dependent was covered under a group health plan or had health insurance coverage at the time coverage was previously offered to the employee or dependent.

"(B) The employee stated in writing at such time that coverage under a group health plan or health insurance coverage was the reason for declining enrollment, but only if the plan sponsor or issuer (if applicable) required such a statement at such time and provided the employee with notice of such requirement (and the consequences of such requirement) at such time.

"(C) The employee's or dependent's coverage described in subparagraph (A)—

"(i) was under a COBRA continuation provision and the coverage under such provision was exhausted; or

"(ii) was not under such a provision and either the coverage was terminated as a result of loss of eligibility for the coverage (including as a result of legal separation, divorce, death, termination of employment, or reduction in the number of hours of employment) or employer contributions toward such coverage were terminated.

"(D) Under the terms of the plan, the employee requests such enrollment not later than 30 days after the date of exhaustion of coverage described in subparagraph (C)(i) or termination of coverage or employer contribution described in subparagraph (C)(ii).

"(2) FOR DEPENDENT BENEFICIARIES.—

"(A) IN GENERAL.—If—

"(i) a group health plan makes coverage available with respect to a dependent of an individual,

"(ii) the individual is a participant under the plan (or has met any waiting period applicable to becoming a participant under the plan and is eligible to be enrolled under the plan but for a failure to enroll during a previous enrollment period), and

"(iii) a person becomes such a dependent of the individual through marriage, birth, or adoption or placement for adoption,

the group health plan shall provide for a dependent special enrollment period described in subparagraph (B) during which the person (or, if not otherwise enrolled, the individual) may be enrolled under the plan as a dependent of the individual, and in the case of the birth or adoption of a child, the spouse of the individual may be enrolled as a dependent of the individual if such spouse is otherwise eligible for coverage.

"(B) DEPENDENT SPECIAL ENROLLMENT PERIOD.—A dependent special enrollment period under this subparagraph shall be a period of not less than 30 days and shall begin on the later of—

"(i) the date dependent coverage is made available, or

"(ii) the date of the marriage, birth, or adoption or placement for adoption (as the case may be) described in subparagraph (A)(iii).

"(C) NO WAITING PERIOD.—If an individual seeks to enroll a dependent during the first 30 days of such a dependent special enrollment period, the coverage of the dependent shall become effective—

"(i) in the case of marriage, not later than the first day of the first month beginning after the date the completed request for enrollment is received;

"(ii) in the case of a dependent's birth, as of the date of such birth; or

"(iii) in the case of a dependent's adoption or placement for adoption, the date of such adoption or placement for adoption.

"(g) USE OF AFFILIATION PERIOD BY HMOS AS ALTERNATIVE TO PREEXISTING CONDITION EXCLUSION.—

"(1) IN GENERAL.—A health maintenance organization which offers health insurance coverage in connection with a group health plan and which does not impose any preexisting condition exclusion allowed under subsection (a) with respect to any particular coverage option may impose an affiliation period for such coverage option, but only if—

"(A) such period is applied uniformly without regard to any health status-related factors; and

"(B) such period does not exceed 2 months (or 3 months in the case of a late enrollee).

"(2) AFFILIATION PERIOD.—

"(A) DEFINED.—For purposes of this title, the term 'affiliation period' means a period which, under the terms of the health insurance coverage offered by the health maintenance organization, must expire before the health insurance coverage becomes effective. The organization is not required to provide health care services or benefits during such period and no premium shall be charged to the participant or beneficiary for any coverage during the period.

"(B) BEGINNING.—Such period shall begin on the enrollment date.

"(C) RUNS CONCURRENTLY WITH WAITING PERIODS.—An affiliation period under a plan shall run concurrently with any waiting period under the plan.

"(3) ALTERNATIVE METHODS.—A health maintenance organization described in paragraph (1) may use alternative methods, from those described in such paragraph, to address adverse selection as approved by the State insurance commissioner or official or officials designated by the State to enforce the requirements of this part for the State involved with respect to such issuer.

<< 42 USCA § 300gg–1 >>

"SEC. 2702. PROHIBITING DISCRIMINATION AGAINST INDIVIDUAL PARTICIPANTS AND BENEFICIARIES BASED ON HEALTH STATUS.

"(a) IN ELIGIBILITY TO ENROLL.—

"(1) IN GENERAL.—Subject to paragraph (2), a group health plan, and a health insurance issuer offering group health insurance coverage in connection with a group health plan, may not establish rules for eligibility (including continued eligibility) of any individual to enroll under the terms of the plan based on any of the following health status-related factors in relation to the individual or a dependent of the individual:

"(A) Health status.

"(B) Medical condition (including both physical and mental illnesses).

"(C) Claims experience.

"(D) Receipt of health care.

"(E) Medical history.

"(F) Genetic information.

"(G) Evidence of insurability (including conditions arising out of acts of domestic violence).

"(H) Disability.

"(2) NO APPLICATION TO BENEFITS OR EXCLUSIONS.—To the extent consistent with section 701, paragraph (1) shall not be construed—

"(A) to require a group health plan, or group health insurance coverage, to provide particular benefits other than those provided under the terms of such plan or coverage, or

"(B) to prevent such a plan or coverage from establishing limitations or restrictions on the amount, level, extent, or nature of the benefits or coverage for similarly situated individuals enrolled in the plan or coverage.

"(3) CONSTRUCTION.—For purposes of paragraph (1), rules for eligibility to enroll under a plan include rules defining any applicable waiting periods for such enrollment.

"(b) IN PREMIUM CONTRIBUTIONS.—

"(1) IN GENERAL.—A group health plan, and a health insurance issuer offering health insurance coverage in connection with a group health plan, may not require any individual (as a condition of enrollment or continued enrollment under the plan) to pay a premium or contribution which is greater than such premium or contribution for a similarly situated individual enrolled

in the plan on the basis of any health status-related factor in relation to the individual or to an individual enrolled under the plan as a dependent of the individual.

"(2) CONSTRUCTION.—Nothing in paragraph (1) shall be construed—

"(A) to restrict the amount that an employer may be charged for coverage under a group health plan; or

"(B) to prevent a group health plan, and a health insurance issuer offering group health insurance coverage, from establishing premium discounts or rebates or modifying otherwise applicable copayments or deductibles in return for adherence to programs of health promotion and disease prevention.

<< 42 USCA Ch. 6A >>

"Subpart 2—Provisions Applicable Only to Health Insurance Issuers

<< 42 USCA § 300gg–11 >>

"SEC. 2711. GUARANTEED AVAILABILITY OF COVERAGE FOR EMPLOYERS IN THE GROUP MARKET.

"(a) ISSUANCE OF COVERAGE IN THE SMALL GROUP MARKET.—

"(1) IN GENERAL.—Subject to subsections (c) through (f), each health insurance issuer that offers health insurance coverage in the small group market in a State—

"(A) must accept every small employer (as defined in section 2791(e)(4)) in the State that applies for such coverage; and

"(B) must accept for enrollment under such coverage every eligible individual (as defined in paragraph (2)) who applies for enrollment during the period in which the individual first becomes eligible to enroll under the terms of the group health plan and may not place any restriction which is inconsistent with section 2702 on an eligible individual being a participant or beneficiary.

"(2) ELIGIBLE INDIVIDUAL DEFINED.—For purposes of this section, the term 'eligible individual' means, with respect to a health insurance issuer that offers health insurance coverage to a small employer in connection with a group health plan in the small group market, such an individual in relation to the employer as shall be determined—

"(A) in accordance with the terms of such plan,

"(B) as provided by the issuer under rules of the issuer which are uniformly applicable in a State to small employers in the small group market, and

"(C) in accordance with all applicable State laws governing such issuer and such market.

"(b) ASSURING ACCESS IN THE LARGE GROUP MARKET.—

"(1) REPORTS TO HHS.—The Secretary shall request that the chief executive officer of each State submit to the Secretary, by not later December 31, 2000, and every 3 years thereafter a report on—

"(A) the access of large employers to health insurance coverage in the State, and

"(B) the circumstances for lack of access (if any) of large employers (or one or more classes of such employers) in the State to such coverage.

"(2) TRIENNIAL REPORTS TO CONGRESS.—The Secretary, based on the reports submitted under paragraph (1) and such other information as the Secretary may use, shall prepare and submit to Congress, every 3 years, a report describing the extent to which large employers (and classes of such employers) that seek health insurance coverage in the different States are able to obtain access to such coverage. Such report shall include such recommendations as the Secretary determines to be appropriate.

"(3) GAO REPORT ON LARGE EMPLOYER ACCESS TO HEALTH INSURANCE COVERAGE.—The Comptroller General shall provide for a study of the extent to which classes of large employers in the different States are able to obtain access to health insurance coverage and the circumstances for lack of access (if any) to such coverage. The Comptroller General shall submit to Congress a report on such study not later than 18 months after the date of the enactment of this title.

"(c) SPECIAL RULES FOR NETWORK PLANS.—

"(1) IN GENERAL.—In the case of a health insurance issuer that offers health insurance coverage in the small group market through a network plan, the issuer may—

"(A) limit the employers that may apply for such coverage to those with eligible individuals who live, work, or reside in the service area for such network plan; and

"(B) within the service area of such plan, deny such coverage to such employers if the issuer has demonstrated, if required, to the applicable State authority that—

"(i) it will not have the capacity to deliver services adequately to enrollees of any additional groups because of its obligations to existing group contract holders and enrollees, and

"(ii) it is applying this paragraph uniformly to all employers without regard to the claims experience of those employers and their employees (and their dependents) or any health status-related factor relating to such employees and dependents.

"(2) 180–DAY SUSPENSION UPON DENIAL OF COVERAGE.—An issuer, upon denying health insurance coverage in any service area in accordance with paragraph (1)(B), may not offer coverage in the small group market within such service area for a period of 180 days after the date such coverage is denied.

"(d) APPLICATION OF FINANCIAL CAPACITY LIMITS.—

"(1) IN GENERAL.—A health insurance issuer may deny health insurance coverage in the small group market if the issuer has demonstrated, if required, to the applicable State authority that—

"(A) it does not have the financial reserves necessary to underwrite additional coverage; and

"(B) it is applying this paragraph uniformly to all employers in the small group market in the State consistent with applicable State law and without regard to the claims experience of those employers and their employees (and their dependents) or any health status-related factor relating to such employees and dependents.

"(2) 180–DAY SUSPENSION UPON DENIAL OF COVERAGE.—A health insurance issuer upon denying health insurance coverage in connection with group health plans in accordance with paragraph (1) in a State may not offer coverage in connection with group health plans in the small group market in the State for a period of 180 days after the date such coverage is denied or until the issuer has demonstrated to the applicable State authority, if required under applicable State law, that the issuer has sufficient financial reserves to underwrite additional coverage, whichever is later. An applicable State authority may provide for the application of this subsection on a service-area-specific basis.

"(e) EXCEPTION TO REQUIREMENT FOR FAILURE TO MEET CERTAIN MINIMUM PARTICIPATION OR CONTRIBUTION RULES.—

"(1) IN GENERAL.—Subsection (a) shall not be construed to preclude a health insurance issuer from establishing employer contribution rules or group participation rules for the offering of health insurance coverage in connection with a group health plan in the small group market, as allowed under applicable State law.

"(2) RULES DEFINED.—For purposes of paragraph (1)—

"(A) the term 'employer contribution rule' means a requirement relating to the minimum level or amount of employer contribution toward the premium for enrollment of participants and beneficiaries; and

"(B) the term 'group participation rule' means a requirement relating to the minimum number of participants or beneficiaries that must be enrolled in relation to a specified percentage or number of eligible individuals or employees of an employer.

"(f) EXCEPTION FOR COVERAGE OFFERED ONLY TO BONA FIDE ASSOCIATION MEMBERS.—Subsection (a) shall not apply to health insurance coverage offered by a health insurance issuer if such coverage is made available in the small group market only through one or more bona fide associations (as defined in section 2791(d)(3)).

<< 42 USCA § 300gg–12 >>

"SEC. 2712. GUARANTEED RENEWABILITY OF COVERAGE FOR EMPLOYERS IN THE GROUP MARKET.

"(a) IN GENERAL.—Except as provided in this section, if a health insurance issuer offers health insurance coverage in the small or large group market in connection with a group health plan, the issuer must renew or continue in force such coverage at the option of the plan sponsor of the plan.

"(b) GENERAL EXCEPTIONS.—A health insurance issuer may nonrenew or discontinue health insurance coverage offered in connection with a group health plan in the small or large group market based only on one or more of the following:

"(1) NONPAYMENT OF PREMIUMS.—The plan sponsor has failed to pay premiums or contributions in accordance with the terms of the health insurance coverage or the issuer has not received timely premium payments.

"(2) FRAUD.—The plan sponsor has performed an act or practice that constitutes fraud or made an intentional misrepresentation of material fact under the terms of the coverage.

"(3) VIOLATION OF PARTICIPATION OR CONTRIBUTION RULES.—The plan sponsor has failed to comply with a material plan provision relating to employer contribution or group participation rules, as permitted under section 2711(e) in the case of the small group market or pursuant to applicable State law in the case of the large group market.

"(4) TERMINATION OF COVERAGE.—The issuer is ceasing to offer coverage in such market in accordance with subsection (c) and applicable State law.

"(5) MOVEMENT OUTSIDE SERVICE AREA.—In the case of a health insurance issuer that offers health insurance coverage in the market through a network plan, there is no longer any enrollee in connection with such plan who lives, resides, or works in the service area of the issuer (or in the area for which the issuer is authorized to do business) and, in the case of the small group market, the issuer would deny enrollment with respect to such plan under section 2711(c)(1)(A).

"(6) ASSOCIATION MEMBERSHIP CEASES.—In the case of health insurance coverage that is made available in the small or large group market (as the case may be) only through one or more bona fide associations, the membership of an employer in the association (on the basis of which the coverage is provided) ceases but only if such coverage is terminated under this paragraph uniformly without regard to any health status-related factor relating to any covered individual.

"(c) REQUIREMENTS FOR UNIFORM TERMINATION OF COVERAGE.—

"(1) PARTICULAR TYPE OF COVERAGE NOT OFFERED.—In any case in which an issuer decides to discontinue offering a particular type of group health insurance coverage offered in the small or large group market, coverage of such type may be discontinued by the issuer in accordance with applicable State law in such market only if—

"(A) the issuer provides notice to each plan sponsor provided coverage of this type in such market (and participants and beneficiaries covered under such coverage) of such discontinuation at least 90 days prior to the date of the discontinuation of such coverage;

"(B) the issuer offers to each plan sponsor provided coverage of this type in such market, the option to purchase all (or, in the case of the large group market, any) other health insurance coverage currently being offered by the issuer to a group health plan in such market; and

"(C) in exercising the option to discontinue coverage of this type and in offering the option of coverage under subparagraph (B), the issuer acts uniformly without regard to the claims experience of those sponsors or any health status-related factor relating to any participants or beneficiaries covered or new participants or beneficiaries who may become eligible for such coverage.

"(2) DISCONTINUANCE OF ALL COVERAGE.—

"(A) IN GENERAL.—In any case in which a health insurance issuer elects to discontinue offering all health insurance coverage in the small group market or the large group market, or both markets, in a State, health insurance coverage may be discontinued by the issuer only in accordance with applicable State law and if—

"(i) the issuer provides notice to the applicable State authority and to each plan sponsor (and participants and beneficiaries covered under such coverage) of such discontinuation at least 180 days prior to the date of the discontinuation of such coverage; and

"(ii) all health insurance issued or delivered for issuance in the State in such market (or markets) are discontinued and coverage under such health insurance coverage in such market (or markets) is not renewed.

"(B) PROHIBITION ON MARKET REENTRY.—In the case of a discontinuation under subparagraph (A) in a market, the issuer may not provide for the issuance of any health insurance coverage in the market and State involved during the 5–year period beginning on the date of the discontinuation of the last health insurance coverage not so renewed.

"(d) EXCEPTION FOR UNIFORM MODIFICATION OF COVERAGE.—At the time of coverage renewal, a health insurance issuer may modify the health insurance coverage for a product offered to a group health plan—

"(1) in the large group market; or

"(2) in the small group market if, for coverage that is available in such market other than only through one or more bona fide associations, such modification is consistent with State law and effective on a uniform basis among group health plans with that product.

"(e) APPLICATION TO COVERAGE OFFERED ONLY THROUGH ASSOCIATIONS.—In applying this section in the case of health insurance coverage that is made available by a health insurance issuer in the small or large group market to employers only through one or more associations, a reference to 'plan sponsor' is deemed, with respect to coverage provided to an employer member of the association, to include a reference to such employer.

<< 42 USCA § 300gg–13 >>

"SEC. 2713. DISCLOSURE OF INFORMATION.

"(a) DISCLOSURE OF INFORMATION BY HEALTH PLAN ISSUERS.—In connection with the offering of any health insurance coverage to a small employer, a health insurance issuer—

"(1) shall make a reasonable disclosure to such employer, as part of its solicitation and sales materials, of the availability of information described in subsection (b), and

"(2) upon request of such a small employer, provide such information.

"(b) INFORMATION DESCRIBED.—

"(1) IN GENERAL.—Subject to paragraph (3), with respect to a health insurance issuer offering health insurance coverage to a small employer, information described in this subsection is information concerning—

"(A) the provisions of such coverage concerning issuer's right to change premium rates and the factors that may affect changes in premium rates;

"(B) the provisions of such coverage relating to renewability of coverage;

"(C) the provisions of such coverage relating to any preexisting condition exclusion; and

"(D) the benefits and premiums available under all health insurance coverage for which the employer is qualified.

"(2) FORM OF INFORMATION.—Information under this subsection shall be provided to small employers in a manner determined to be understandable by the average small employer, and shall be sufficient to reasonably inform small employers of their rights and obligations under the health insurance coverage.

"(3) EXCEPTION.—An issuer is not required under this section to disclose any information that is proprietary and trade secret information under applicable law.

<< 42 USCA Ch. 6A >>

"Subpart 3—Exclusion of Plans; Enforcement; Preemption

<< 42 USCA § 300gg–21 >>

"SEC. 2721. EXCLUSION OF CERTAIN PLANS.

"(a) EXCEPTION FOR CERTAIN SMALL GROUP HEALTH PLANS.—The requirements of subparts 1 and 2 shall not apply to any group health plan (and health insurance coverage offered in connection with a group health plan) for any plan year if, on the first day of such plan year, such plan has less than 2 participants who are current employees.

"(b) LIMITATION ON APPLICATION OF PROVISIONS RELATING TO GROUP HEALTH PLANS.—

"(1) IN GENERAL.—The requirements of subparts 1 and 2 shall apply with respect to group health plans only—

"(A) subject to paragraph (2), in the case of a plan that is a nonfederal governmental plan, and

"(B) with respect to health insurance coverage offered in connection with a group health plan (including such a plan that is a church plan or a governmental plan).

"(2) TREATMENT OF NONFEDERAL GOVERNMENTAL PLANS.—

"(A) ELECTION TO BE EXCLUDED.—If the plan sponsor of a nonfederal governmental plan which is a group health plan to which the provisions of subparts 1 and 2 otherwise apply makes an election under this subparagraph (in such form and manner as the Secretary may by regulations prescribe), then the requirements of such subparts insofar as they apply directly to group health plans (and not merely to group health insurance coverage) shall not apply to such governmental plans for such period except as provided in this paragraph.

"(B) PERIOD OF ELECTION.—An election under subparagraph (A) shall apply—

"(i) for a single specified plan year, or

"(ii) in the case of a plan provided pursuant to a collective bargaining agreement, for the term of such agreement.

An election under clause (i) may be extended through subsequent elections under this paragraph.

"(C) NOTICE TO ENROLLEES.—Under such an election, the plan shall provide for—

"(i) notice to enrollees (on an annual basis and at the time of enrollment under the plan) of the fact and consequences of such election, and

"(ii) certification and disclosure of creditable coverage under the plan with respect to enrollees in accordance with section 2701(e).

"(c) EXCEPTION FOR CERTAIN BENEFITS.—The requirements of subparts 1 and 2 shall not apply to any group health plan (or group health insurance coverage) in relation to its provision of excepted benefits described in section 2791(c)(1).

"(d) EXCEPTION FOR CERTAIN BENEFITS IF CERTAIN CONDITIONS MET.—

"(1) LIMITED, EXCEPTED BENEFITS.—The requirements of subparts 1 and 2 shall not apply to any group health plan (and group health insurance coverage offered in connection with a group health plan) in relation to its provision of excepted benefits described in section 2791(c)(2) if the benefits—

"(A) are provided under a separate policy, certificate, or contract of insurance; or

"(B) are otherwise not an integral part of the plan.

"(2) NONCOORDINATED, EXCEPTED BENEFITS.—The requirements of subparts 1 and 2 shall not apply to any group health plan (and group health insurance coverage offered in connection with a group health plan) in relation to its provision of excepted benefits described in section 2791(c)(3) if all of the following conditions are met:

"(A) The benefits are provided under a separate policy, certificate, or contract of insurance.

"(B) There is no coordination between the provision of such benefits and any exclusion of benefits under any group health plan maintained by the same plan sponsor.

"(C) Such benefits are paid with respect to an event without regard to whether benefits are provided with respect to such an event under any group health plan maintained by the same plan sponsor.

"(3) SUPPLEMENTAL EXCEPTED BENEFITS.—The requirements of this part shall not apply to any group health plan (and group health insurance coverage) in relation to its provision of excepted benefits described in section 27971(c)(4) if the benefits are provided under a separate policy, certificate, or contract of insurance.

"(e) TREATMENT OF PARTNERSHIPS.—For purposes of this part—

"(1) TREATMENT AS A GROUP HEALTH PLAN.—Any plan, fund, or program which would not be (but for this subsection) an employee welfare benefit plan and which is established or maintained by a partnership, to the extent that such plan, fund, or program provides medical care (including items and services paid for as medical care) to present or former partners in the partnership or to their dependents (as defined under the terms of the plan, fund, or program), directly or through insurance, reimbursement, or otherwise, shall be treated (subject to paragraph (2)) as an employee welfare benefit plan which is a group health plan.

"(2) EMPLOYER.—In the case of a group health plan, the term 'employer' also includes the partnership in relation to any partner.

"(3) PARTICIPANTS OF GROUP HEALTH PLANS.—In the case of a group health plan, the term 'participant' also includes —

"(A) in connection with a group health plan maintained by a partnership, an individual who is a partner in relation to the partnership, or

"(B) in connection with a group health plan maintained by a self-employed individual (under which one or more employees are participants), the self-employed individual,

if such individual is, or may become, eligible to receive a benefit under the plan or such individual's beneficiaries may be eligible to receive any such benefit.

<< 42 USCA § 300gg–22 >>

"SEC. 2722. ENFORCEMENT.

"(a) STATE ENFORCEMENT.—

"(1) STATE AUTHORITY.—Subject to section 2723, each State may require that health insurance issuers that issue, sell, renew, or offer health insurance coverage in the State in the small or large group markets meet the requirements of this part with respect to such issuers.

"(2) FAILURE TO IMPLEMENT PROVISIONS.—In the case of a determination by the Secretary that a State has failed to substantially enforce a provision (or provisions) in this part with respect to health insurance issuers in the State, the Secretary shall enforce such provision (or provisions) under subsection (b) insofar as they relate to the issuance, sale, renewal, and offering of health insurance coverage in connection with group health plans in such State.

"(b) SECRETARIAL ENFORCEMENT AUTHORITY.—

"(1) LIMITATION.—The provisions of this subsection shall apply to enforcement of a provision (or provisions) of this part only—

"(A) as provided under subsection (a)(2); and

"(B) with respect to group health plans that are non-Federal governmental plans.

"(2) IMPOSITION OF PENALTIES.—In the cases described in paragraph (1)—

"(A) IN GENERAL.—Subject to the succeeding provisions of this subsection, any non-Federal governmental plan that is a group health plan and any health insurance issuer that fails to meet a provision of this part applicable to such plan or issuer is subject to a civil money penalty under this subsection.

"(B) LIABILITY FOR PENALTY.—In the case of a failure by—

"(i) a health insurance issuer, the issuer is liable for such penalty, or

"(ii) a group health plan that is a non-Federal governmental plan which is—

"(I) sponsored by 2 or more employers, the plan is liable for such penalty, or

"(II) not so sponsored, the employer is liable for such penalty.

"(C) AMOUNT OF PENALTY.—

"(i) IN GENERAL.—The maximum amount of penalty imposed under this paragraph is $100 for each day for each individual with respect to which such a failure occurs.

"(ii) CONSIDERATIONS IN IMPOSITION.—In determining the amount of any penalty to be assessed under this paragraph, the Secretary shall take into account the previous record of compliance of the entity being assessed with the applicable provisions of this part and the gravity of the violation.

"(iii) LIMITATIONS.—

"(I) PENALTY NOT TO APPLY WHERE FAILURE NOT DISCOVERED EXERCISING REASONABLE DILIGENCE.—No civil money penalty shall be imposed under this paragraph on any failure during any period for which it is established to the satisfaction of the Secretary that none of the entities against whom the penalty would be imposed knew, or exercising reasonable diligence would have known, that such failure existed.

"(II) PENALTY NOT TO APPLY TO FAILURES CORRECTED WITHIN 30 DAYS.—No civil money penalty shall be imposed under this paragraph on any failure if such failure was due to reasonable cause and not to willful neglect, and such failure is corrected during the 30–day period beginning on the first day any of the entities against whom the penalty would be imposed knew, or exercising reasonable diligence would have known, that such failure existed.

"(D) ADMINISTRATIVE REVIEW.—

"(i) OPPORTUNITY FOR HEARING.—The entity assessed shall be afforded an opportunity for hearing by the Secretary upon request made within 30 days after the date of the issuance of a notice of assessment. In such hearing the decision shall be made on the record pursuant to section 554 of title 5, United States Code. If no hearing is requested, the assessment shall constitute a final and unappealable order.

"(ii) HEARING PROCEDURE.—If a hearing is requested, the initial agency decision shall be made by an administrative law judge, and such decision shall become the final order unless the Secretary modifies or vacates the decision. Notice of intent to modify or vacate the decision of the administrative law judge shall be issued to the parties within 30 days after the date of the decision of the judge. A final order which takes effect under this paragraph shall be subject to review only as provided under subparagraph (E).

"(E) JUDICIAL REVIEW.—

"(i) FILING OF ACTION FOR REVIEW.—Any entity against whom an order imposing a civil money penalty has been entered after an agency hearing under this paragraph may obtain review by the United States district court for any district in which such entity is located or the United States District Court for the District of Columbia by filing a notice of appeal in such court within 30 days from the date of such order, and simultaneously sending a copy of such notice by registered mail to the Secretary.

"(ii) CERTIFICATION OF ADMINISTRATIVE RECORD.—The Secretary shall promptly certify and file in such court the record upon which the penalty was imposed.

"(iii) STANDARD FOR REVIEW.—The findings of the Secretary shall be set aside only if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(iv) APPEAL.—Any final decision, order, or judgment of the district court concerning such review shall be subject to appeal as provided in chapter 83 of title 28 of such Code.

"(F) FAILURE TO PAY ASSESSMENT; MAINTENANCE OF ACTION.—

"(i) FAILURE TO PAY ASSESSMENT.—If any entity fails to pay an assessment after it has become a final and unappealable order, or after the court has entered final judgment in favor of the Secretary, the Secretary shall refer the matter to the Attorney General who shall recover the amount assessed by action in the appropriate United States district court.

"(ii) NONREVIEWABILITY.—In such action the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(G) PAYMENT OF PENALTIES.—Except as otherwise provided, penalties collected under this paragraph shall be paid to the Secretary (or other officer) imposing the penalty and shall be available without appropriation and until expended for the purpose of enforcing the provisions with respect to which the penalty was imposed.

<< 42 USCA § 300gg–23 >>

"SEC. 2723. PREEMPTION; STATE FLEXIBILITY; CONSTRUCTION.

"(a) CONTINUED APPLICABILITY OF STATE LAW WITH RESPECT TO HEALTH INSURANCE ISSUERS.—

"(1) IN GENERAL.—Subject to paragraph (2) and except as provided in subsection (b), this part and part C insofar as it relates to this part shall not be construed to supersede any provision of State law which establishes, implements, or continues in effect any standard or requirement solely relating to health insurance issuers in connection with group health insurance coverage except to the extent that such standard or requirement prevents the application of a requirement of this part.

"(2) CONTINUED PREEMPTION WITH RESPECT TO GROUP HEALTH PLANS.—Nothing in this part shall be construed to affect or modify the provisions of section 514 of the Employee Retirement Income Security Act of 1974 with respect to group health plans.

"(b) SPECIAL RULES IN CASE OF PORTABILITY REQUIREMENTS.—

"(1) IN GENERAL.—Subject to paragraph (2), the provisions of this part relating to health insurance coverage offered by a health insurance issuer supersede any provision of State law which establishes, implements, or continues in effect a standard or requirement applicable to imposition of a preexisting condition exclusion specifically governed by section 701 which differs from the standards or requirements specified in such section.

"(2) EXCEPTIONS.—Only in relation to health insurance coverage offered by a health insurance issuer, the provisions of this part do not supersede any provision of State law to the extent that such provision—

"(i) substitutes for the reference to '6–month period' in section 2701(a)(1) a reference to any shorter period of time;

"(ii) substitutes for the reference to '12 months' and '18 months' in section 2701(a)(2) a reference to any shorter period of time;

"(iii) substitutes for the references to '63' days in sections 2701(c)(2)(A) and 2701(d)(4)(A) a reference to any greater number of days;

"(iv) substitutes for the reference to '30-day period' in sections 2701(b)(2) and 2701(d)(1) a reference to any greater period;

"(v) prohibits the imposition of any preexisting condition exclusion in cases not described in section 2701(d) or expands the exceptions described in such section;

"(vi) requires special enrollment periods in addition to those required under section 2701(f); or

"(vii) reduces the maximum period permitted in an affiliation period under section 2701(g)(1)(B).

"(c) RULES OF CONSTRUCTION.—Nothing in this part shall be construed as requiring a group health plan or health insurance coverage to provide specific benefits under the terms of such plan or coverage.

"(d) DEFINITIONS.—For purposes of this section—

"(1) STATE LAW.—The term 'State law' includes all laws, decisions, rules, regulations, or other State action having the effect of law, of any State. A law of the United States applicable only to the District of Columbia shall be treated as a State law rather than a law of the United States.

"(2) STATE.—The term 'State' includes a State (including the Northern Mariana Islands), any political subdivisions of a State or such Islands, or any agency or instrumentality of either.

<< 42 USCA Ch. 6A >>

"PART C—DEFINITIONS; MISCELLANEOUS PROVISIONS

<< 42 USCA § 300gg–91 >>

"SEC. 2791. DEFINITIONS.

"(a) GROUP HEALTH PLAN.—

"(1) DEFINITION.—The term 'group health plan' means an employee welfare benefit plan (as defined in section 3(1) of the Employee Retirement Income Security Act of 1974) to the extent that the plan provides medical care (as defined in paragraph (2)) and including items and services paid for as medical care) to employees or their dependents (as defined under the terms of the plan) directly or through insurance, reimbursement, or otherwise.

"(2) MEDICAL CARE.—The term 'medical care' means amounts paid for—

"(A) the diagnosis, cure, mitigation, treatment, or prevention of disease, or amounts paid for the purpose of affecting any structure or function of the body,

"(B) amounts paid for transportation primarily for and essential to medical care referred to in subparagraph (A), and

"(C) amounts paid for insurance covering medical care referred to in subparagraphs (A) and (B).

"(3) TREATMENT OF CERTAIN PLANS AS GROUP HEALTH PLAN FOR NOTICE PROVISION.—A program under which creditable coverage described in subparagraph (C), (D), (E), or (F) of section 2701(c)(1) is provided shall be treated as a group health plan for purposes of applying section 2701(e).

"(b) DEFINITIONS RELATING TO HEALTH INSURANCE.—

"(1) HEALTH INSURANCE COVERAGE.—The term 'health insurance coverage' means benefits consisting of medical care (provided directly, through insurance or reimbursement, or otherwise and including items and services paid for as medical care) under any hospital or medical service policy or certificate, hospital or medical service plan contract, or health maintenance organization contract offered by a health insurance issuer.

"(2) HEALTH INSURANCE ISSUER.—The term 'health insurance issuer' means an insurance company, insurance service, or insurance organization (including a health maintenance organization, as defined in paragraph (3)) which is licensed to engage in the business of insurance in a State and which is subject to State law which regulates insurance (within the meaning of section 514(b)(2) of the Employee Retirement Income Security Act of 1974). Such term does not include a group health plan.

"(3) HEALTH MAINTENANCE ORGANIZATION.—The term 'health maintenance organization' means—

"(A) a Federally qualified health maintenance organization (as defined in section 1301(a)),

"(B) an organization recognized under State law as a health maintenance organization, or

"(C) a similar organization regulated under State law for solvency in the same manner and to the same extent as such a health maintenance organization.

"(4) GROUP HEALTH INSURANCE COVERAGE.—The term 'group health insurance coverage' means, in connection with a group health plan, health insurance coverage offered in connection with such plan.

"(5) INDIVIDUAL HEALTH INSURANCE COVERAGE.—The term 'individual health insurance coverage' means health insurance coverage offered to individuals in the individual market, but does not include short-term limited duration insurance.

"(c) EXCEPTED BENEFITS.—For purposes of this title, the term 'excepted benefits' means benefits under one or more (or any combination thereof) of the following:

"(1) BENEFITS NOT SUBJECT TO REQUIREMENTS.—

"(A) Coverage only for accident, or disability income insurance, or any combination thereof.

"(B) Coverage issued as a supplement to liability insurance.

"(C) Liability insurance, including general liability insurance and automobile liability insurance.

"(D) Workers' compensation or similar insurance.

"(E) Automobile medical payment insurance.

"(F) Credit-only insurance.

"(G) Coverage for on-site medical clinics.

"(H) Other similar insurance coverage, specified in regulations, under which benefits for medical care are secondary or incidental to other insurance benefits.

"(2) BENEFITS NOT SUBJECT TO REQUIREMENTS IF OFFERED SEPARATELY.—

"(A) Limited scope dental or vision benefits.

"(B) Benefits for long-term care, nursing home care, home health care, community-based care, or any combination thereof.

"(C) Such other similar, limited benefits as are specified in regulations.

"(3) BENEFITS NOT SUBJECT TO REQUIREMENTS IF OFFERED AS INDEPENDENT, NONCOORDINATED BENEFITS.—

"(A) Coverage only for a specified disease or illness.

"(B) Hospital indemnity or other fixed indemnity insurance.

"(4) BENEFITS NOT SUBJECT TO REQUIREMENTS IF OFFERED AS SEPARATE INSURANCE POLICY.—Medicare supplemental health insurance (as defined under section 1882(g)(1) of the Social Security Act), coverage supplemental to the coverage provided under chapter 55 of title 10, United States Code, and similar supplemental coverage provided to coverage under a group health plan.

"(d) OTHER DEFINITIONS.—

"(1) APPLICABLE STATE AUTHORITY.—The term 'applicable State authority' means, with respect to a health insurance issuer in a State, the State insurance commissioner or official or officials designated by the State to enforce the requirements of this title for the State involved with respect to such issuer.

"(2) BENEFICIARY.—The term 'beneficiary' has the meaning given such term under section 3(8) of the Employee Retirement Income Security Act of 1974.

"(3) BONA FIDE ASSOCIATION.—The term 'bona fide association' means, with respect to health insurance coverage offered in a State, an association which—

"(A) has been actively in existence for at least 5 years;

"(B) has been formed and maintained in good faith for purposes other than obtaining insurance;

"(C) does not condition membership in the association on any health status-related factor relating to an individual (including an employee of an employer or a dependent of an employee);

"(D) makes health insurance coverage offered through the association available to all members regardless of any health status-related factor relating to such members (or individuals eligible for coverage through a member);

"(E) does not make health insurance coverage offered through the association available other than in connection with a member of the association; and

"(F) meets such additional requirements as may be imposed under State law.

"(4) COBRA CONTINUATION PROVISION.—The term 'COBRA continuation provision' means any of the following:

"(A) Section 4980B of the Internal Revenue Code of 1986, other than subsection (f)(1) of such section insofar as it relates to pediatric vaccines.

"(B) Part 6 of subtitle B of title I of the Employee Retirement Income Security Act of 1974, other than section 609 of such Act.

"(C) Title XXII of this Act.

"(5) EMPLOYEE.—The term 'employee' has the meaning given such term under section 3(6) of the Employee Retirement Income Security Act of 1974.

"(6) EMPLOYER.—The term 'employer' has the meaning given such term under section 3(5) of the Employee Retirement Income Security Act of 1974, except that such term shall include only employers of two or more employees.

"(7) CHURCH PLAN.—The term 'church plan' has the meaning given such term under section 3(33) of the Employee Retirement Income Security Act of 1974.

"(8) GOVERNMENTAL PLAN.—(A) The term 'governmental plan' has the meaning given such term under section 3(32) of the Employee Retirement Income Security Act of 1974 and any Federal governmental plan.

"(B) FEDERAL GOVERNMENTAL PLAN.—The term 'Federal governmental plan' means a governmental plan established or maintained for its employees by the Government of the United States or by any agency or instrumentality of such Government.

"(C) NON–FEDERAL GOVERNMENTAL PLAN.—The term 'non-Federal governmental plan' means a governmental plan that is not a Federal governmental plan.

"(9) HEALTH STATUS–RELATED FACTOR.—The term 'health status-related factor' means any of the factors described in section 2702(a)(1).

"(10) NETWORK PLAN.—The term 'network plan' means health insurance coverage of a health insurance issuer under which the financing and delivery of medical care (including items and services paid for as medical care) are provided, in whole or in part, through a defined set of providers under contract with the issuer.

"(11) PARTICIPANT.—The term 'participant' has the meaning given such term under section 3(7) of the Employee Retirement Income Security Act of 1974.

"(12) PLACED FOR ADOPTION DEFINED.—The term 'placement', or being 'placed', for adoption, in connection with any placement for adoption of a child with any person, means the assumption and retention by such person of a legal obligation for total or partial support of such child in anticipation of adoption of such child. The child's placement with such person terminates upon the termination of such legal obligation.

"(13) PLAN SPONSOR.—The term 'plan sponsor' has the meaning given such term under section 3(16)(B) of the Employee Retirement Income Security Act of 1974.

"(14) STATE.—The term 'State' means each of the several States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands.

"(e) DEFINITIONS RELATING TO MARKETS AND SMALL EMPLOYERS.—For purposes of this title:

"(1) INDIVIDUAL MARKET.—

"(A) IN GENERAL.—The term 'individual market' means the market for health insurance coverage offered to individuals other than in connection with a group health plan.

"(B) TREATMENT OF VERY SMALL GROUPS.—

"(i) IN GENERAL.—Subject to clause (ii), such terms includes coverage offered in connection with a group health plan that has fewer than two participants as current employees on the first day of the plan year.

"(ii) STATE EXCEPTION.—Clause (i) shall not apply in the case of a State that elects to regulate the coverage described in such clause as coverage in the small group market.

"(2) LARGE EMPLOYER.—The term 'large employer' means, in connection with a group health plan with respect to a calendar year and a plan year, an employer who employed an average of at least 51 employees on business days during the preceding calendar year and who employs at least 2 employees on the first day of the plan year.

"(3) LARGE GROUP MARKET.—The term 'large group market' means the health insurance market under which individuals obtain health insurance coverage (directly or through any arrangement) on behalf of themselves (and their dependents) through a group health plan maintained by a large employer.

"(4) SMALL EMPLOYER.—The term 'small employer' means, in connection with a group health plan with respect to a calendar year and a plan year, an employer who employed an average of at least 2 but not more than 50 employees on business days during the preceding calendar year and who employs at least 2 employees on the first day of the plan year.

"(5) SMALL GROUP MARKET.—The term 'small group market' means the health insurance market under which individuals obtain health insurance coverage (directly or through any arrangement) on behalf of themselves (and their dependents) through a group health plan maintained by a small employer.

"(6) APPLICATION OF CERTAIN RULES IN DETERMINATION OF EMPLOYER SIZE.—For purposes of this subsection—

"(A) APPLICATION OF AGGREGATION RULE FOR EMPLOYERS.—all persons treated as a single employer under subsection (b), (c), (m), or (o) of section 414 of the Internal Revenue Code of 1986 shall be treated as 1 employer.

"(B) EMPLOYERS NOT IN EXISTENCE IN PRECEDING YEAR.—In the case of an employer which was not in existence throughout the preceding calendar year, the determination of whether such employer is a small or large employer shall be based on the average number of employees that it is reasonably expected such employer will employ on business days in the current calendar year.

"(C) PREDECESSORS.—Any reference in this subsection to an employer shall include a reference to any predecessor of such employer.

<< 42 USCA § 300gg–92 >>

"SEC. 2792. REGULATIONS.

"The Secretary, consistent with section 104 of the Health Care Portability and Accountability Act of 1996, may promulgate such regulations as may be necessary or appropriate to carry out the provisions of this title. The Secretary may promulgate any interim final rules as the Secretary determines are appropriate to carry out this title.".

<< 42 USCA § 300e >>

(b) APPLICATION OF RULES BY CERTAIN HEALTH MAINTENANCE ORGANIZATIONS.—Section 1301 of such Act (42 U.S.C. 300e) is amended by adding at the end the following new subsection:

"(d) An organization that offers health benefits coverage shall not be considered as failing to meet the requirements of this section notwithstanding that it provides, with respect to coverage offered in connection with a group health plan in the small or large group market (as defined in section 2791(e)), an affiliation period consistent with the provisions of section 2701(g).".

<< 42 USCA §§ 300gg NOTE, 300gg–1 nt, 300gg–11 nt, 300gg–12 nt, 300gg–13 nt, 300gg–21 nt, 300gg–22 nt, 300gg–23 nt, 300gg–91 nt, 300gg–92 nt >>

(c) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as provided in this subsection, part A of title XXVII of the Public Health Service Act (as added by subsection (a)) shall apply with respect to group health plans, and health insurance coverage offered in connection with group health plans, for plan years beginning after June 30, 1997.

(2) DETERMINATION OF CREDITABLE COVERAGE.—

(A) PERIOD OF COVERAGE.—

(i) IN GENERAL.—Subject to clause (ii), no period before July 1, 1996, shall be taken into account under part A of title XXVII of the Public Health Service Act (as added by this section) in determining creditable coverage.

(ii) SPECIAL RULE FOR CERTAIN PERIODS.—The Secretary of Health and Human Services, consistent with section 104, shall provide for a process whereby individuals who need to establish creditable coverage for periods before July 1, 1996, and who would have such coverage credited but for clause (i) may be given credit for creditable coverage for such periods through the presentation of documents or other means.

(B) CERTIFICATIONS, ETC.—

(i) IN GENERAL.—Subject to clauses (ii) and (iii), subsection (e) of section 2701 of the Public Health Service Act (as added by this section) shall apply to events occurring after June 30, 1996.

(ii) NO CERTIFICATION REQUIRED TO BE PROVIDED BEFORE JUNE 1, 1997.—In no case is a certification required to be provided under such subsection before June 1, 1997.

(iii) CERTIFICATION ONLY ON WRITTEN REQUEST FOR EVENTS OCCURRING BEFORE OCTOBER 1, 1996.—In the case of an event occurring after June 30, 1996, and before October 1, 1996, a certification is not required to be provided under such subsection unless an individual (with respect to whom the certification is otherwise required to be made) requests such certification in writing.

(C) TRANSITIONAL RULE.—In the case of an individual who seeks to establish creditable coverage for any period for which certification is not required because it relates to an event occurring before June 30, 1996—

(i) the individual may present other credible evidence of such coverage in order to establish the period of creditable coverage; and

(ii) a group health plan and a health insurance issuer shall not be subject to any penalty or enforcement action with respect to the plan's or issuer's crediting (or not crediting) such coverage if the plan or issuer has sought to comply in good faith with the applicable requirements under the amendments made by this section.

(3) SPECIAL RULE FOR COLLECTIVE BARGAINING AGREEMENTS.—Except as provided in paragraph (2)(B), in the case of a group health plan maintained pursuant to 1 or more collective bargaining agreements between employee representatives and one or more employers ratified before the date of the enactment of this Act, part A of title XXVII of the Public Health Service Act (other than section 2701(e) thereof) shall not apply to plan years beginning before the later of—

(A) the date on which the last of the collective bargaining agreements relating to the plan terminates (determined without regard to any extension thereof agreed to after the date of the enactment of this Act), or

(B) July 1, 1997.

For purposes of subparagraph (A), any plan amendment made pursuant to a collective bargaining agreement relating to the plan which amends the plan solely to conform to any requirement of such part shall not be treated as a termination of such collective bargaining agreement.

(4) TIMELY REGULATIONS.—The Secretary of Health and Human Services, consistent with section 104, shall first issue by not later than April 1, 1997, such regulations as may be necessary to carry out the amendments made by this section and section 111.

(5) LIMITATION ON ACTIONS.—No enforcement action shall be taken, pursuant to the amendments made by this section, against a group health plan or health insurance issuer with respect to a violation of a requirement imposed by such amendments before January 1, 1998, or, if later, the date of issuance of regulations referred to in paragraph (4), if the plan or issuer has sought to comply in good faith with such requirements.

<< 42 USCA § 300bb–8 >>

(d) MISCELLANEOUS CORRECTION.—Section 2208(1) of the Public Health Service Act (42 U.S.C. 300bb–8(1)) is amended by striking "section 162(i)(2)" and inserting "5000(b)".

SEC. 103. REFERENCE TO IMPLEMENTATION THROUGH THE INTERNAL REVENUE CODE OF 1986.

For provisions amending the Internal Revenue Code of 1986 to provide for application and enforcement of rules for group health plans similar to those provided under the amendments made by section 101(a), see section 401.

<< 42 USCA § 300gg–92 NOTE >>

SEC. 104. ASSURING COORDINATION.

The Secretary of the Treasury, the Secretary of Health and Human Services, and the Secretary of Labor shall ensure, through the execution of an interagency memorandum of understanding among such Secretaries, that—

(1) regulations, rulings, and interpretations issued by such Secretaries relating to the same matter over which two or more such Secretaries have responsibility under this subtitle (and the amendments made by this subtitle and section 401) are administered so as to have the same effect at all times; and

(2) coordination of policies relating to enforcing the same requirements through such Secretaries in order to have a coordinated enforcement strategy that avoids duplication of enforcement efforts and assigns priorities in enforcement.

Subtitle B—Individual Market Rules

SEC. 111. AMENDMENT TO PUBLIC HEALTH SERVICE ACT.

(a) IN GENERAL.—Title XXVII of the Public Health Service Act, as added by section 102(a) of this Act, is amended by inserting after part A the following new part:

<< 42 USCA Ch. 6A >>

"PART B—INDIVIDUAL MARKET RULES

<< 42 USCA § 300gg–41 >>

"SEC. 2741. GUARANTEED AVAILABILITY OF INDIVIDUAL HEALTH INSURANCE COVERAGE TO CERTAIN INDIVIDUALS WITH PRIOR GROUP COVERAGE.

"(a) GUARANTEED AVAILABILITY.—

"(1) IN GENERAL.—Subject to the succeeding subsections of this section and section 2744, each health insurance issuer that offers health insurance coverage (as defined in section 2791(b)(1)) in the individual market in a State may not, with respect to an eligible individual (as defined in subsection (b)) desiring to enroll in individual health insurance coverage—

"(A) decline to offer such coverage to, or deny enrollment of, such individual; or

"(B) impose any preexisting condition exclusion (as defined in section 2701(b)(1)(A)) with respect to such coverage.

"(2) SUBSTITUTION BY STATE OF ACCEPTABLE ALTERNATIVE MECHANISM.—The requirement of paragraph (1) shall not apply to health insurance coverage offered in the individual market in a State in which the State is implementing an acceptable alternative mechanism under section 2744.

"(b) ELIGIBLE INDIVIDUAL DEFINED.—In this part, the term 'eligible individual' means an individual—

"(1)(A) for whom, as of the date on which the individual seeks coverage under this section, the aggregate of the periods of creditable coverage (as defined in section 2701(c)) is 18 or more months and (B) whose most recent prior creditable coverage was under a group health plan, governmental plan, or church plan (or health insurance coverage offered in connection with any such plan);

"(2) who is not eligible for coverage under (A) a group health plan, (B) part A or part B of title XVIII of the Social Security Act, or (C) a State plan under title XIX of such Act (or any successor program), and does not have other health insurance coverage;

"(3) with respect to whom the most recent coverage within the coverage period described in paragraph (1)(A) was not terminated based on a factor described in paragraph (1) or (2) of section 2712(b) (relating to nonpayment of premiums or fraud);

"(4) if the individual had been offered the option of continuation coverage under a COBRA continuation provision or under a similar State program, who elected such coverage; and

"(5) who, if the individual elected such continuation coverage, has exhausted such continuation coverage under such provision or program.

"(c) ALTERNATIVE COVERAGE PERMITTED WHERE NO STATE MECHANISM.—

"(1) IN GENERAL.—In the case of health insurance coverage offered in the individual market in a State in which the State is not implementing an acceptable alternative mechanism under section 2744, the health insurance issuer may elect to limit the coverage offered under subsection (a) so long as it offers at least two different policy forms of health insurance coverage both of which—

"(A) are designed for, made generally available to, and actively marketed to, and enroll both eligible and other individuals by the issuer; and

"(B) meet the requirement of paragraph (2) or (3), as elected by the issuer.

For purposes of this subsection, policy forms which have different cost-sharing arrangements or different riders shall be considered to be different policy forms.

"(2) CHOICE OF MOST POPULAR POLICY FORMS.—The requirement of this paragraph is met, for health insurance coverage policy forms offered by an issuer in the individual market, if the issuer offers the policy forms for individual health insurance coverage with the largest, and next to largest, premium volume of all such policy forms offered by the issuer in the State or applicable marketing or service area (as may be prescribed in regulation) by the issuer in the individual market in the period involved.

"(3) CHOICE OF 2 POLICY FORMS WITH REPRESENTATIVE COVERAGE.—

"(A) IN GENERAL.—The requirement of this paragraph is met, for health insurance coverage policy forms offered by an issuer in the individual market, if the issuer offers a lower-level coverage policy form (as defined in subparagraph (B)) and a higher-level coverage policy form (as defined in subparagraph (C)) each of which includes benefits substantially similar to other individual health insurance coverage offered by the issuer in that State and each of which is covered under a method described in section 2744(c)(3)(A) (relating to risk adjustment, risk spreading, or financial subsidization).

"(B) LOWER–LEVEL OF COVERAGE DESCRIBED.—A policy form is described in this subparagraph if the actuarial value of the benefits under the coverage is at least 85 percent but not greater than 100 percent of a weighted average (described in subparagraph (D)).

"(C) HIGHER–LEVEL OF COVERAGE DESCRIBED.—A policy form is described in this subparagraph if—

"(i) the actuarial value of the benefits under the coverage is at least 15 percent greater than the actuarial value of the coverage described in subparagraph (B) offered by the issuer in the area involved; and

"(ii) the actuarial value of the benefits under the coverage is at least 100 percent but not greater than 120 percent of a weighted average (described in subparagraph (D)).

"(D) WEIGHTED AVERAGE.—For purposes of this paragraph, the weighted average described in this subparagraph is the average actuarial value of the benefits provided by all the health insurance coverage issued (as elected by the issuer) either by that issuer or by all issuers in the State in the individual market during the previous year (not including coverage issued under this section), weighted by enrollment for the different coverage.

"(4) ELECTION.—The issuer elections under this subsection shall apply uniformly to all eligible individuals in the State for that issuer. Such an election shall be effective for policies offered during a period of not shorter than 2 years.

"(5) ASSUMPTIONS.—For purposes of paragraph (3), the actuarial value of benefits provided under individual health insurance coverage shall be calculated based on a standardized population and a set of standardized utilization and cost factors.

"(d) SPECIAL RULES FOR NETWORK PLANS.—

"(1) IN GENERAL.—In the case of a health insurance issuer that offers health insurance coverage in the individual market through a network plan, the issuer may—

"(A) limit the individuals who may be enrolled under such coverage to those who live, reside, or work within the service area for such network plan; and

"(B) within the service area of such plan, deny such coverage to such individuals if the issuer has demonstrated, if required, to the applicable State authority that—

"(i) it will not have the capacity to deliver services adequately to additional individual enrollees because of its obligations to existing group contract holders and enrollees and individual enrollees, and

"(ii) it is applying this paragraph uniformly to individuals without regard to any health status-related factor of such individuals and without regard to whether the individuals are eligible individuals.

"(2) 180–DAY SUSPENSION UPON DENIAL OF COVERAGE.—An issuer, upon denying health insurance coverage in any service area in accordance with paragraph (1)(B), may not offer coverage in the individual market within such service area for a period of 180 days after such coverage is denied.

"(e) APPLICATION OF FINANCIAL CAPACITY LIMITS.—

"(1) IN GENERAL.—A health insurance issuer may deny health insurance coverage in the individual market to an eligible individual if the issuer has demonstrated, if required, to the applicable State authority that—

"(A) it does not have the financial reserves necessary to underwrite additional coverage; and

"(B) it is applying this paragraph uniformly to all individuals in the individual market in the State consistent with applicable State law and without regard to any health status-related factor of such individuals and without regard to whether the individuals are eligible individuals.

"(2) 180–DAY SUSPENSION UPON DENIAL OF COVERAGE.—An issuer upon denying individual health insurance coverage in any service area in accordance with paragraph (1) may not offer such coverage in the individual market within such service area for a period of 180 days after the date such coverage is denied or until the issuer has demonstrated, if required under applicable State law, to the applicable State authority that the issuer has sufficient financial reserves to underwrite additional coverage, whichever is later. A State may provide for the application of this paragraph on a service-area-specific basis.

"(e) MARKET REQUIREMENTS.—

"(1) IN GENERAL.—The provisions of subsection (a) shall not be construed to require that a health insurance issuer offering health insurance coverage only in connection with group health plans or through one or more bona fide associations, or both, offer such health insurance coverage in the individual market.

"(2) CONVERSION POLICIES.—A health insurance issuer offering health insurance coverage in connection with group health plans under this title shall not be deemed to be a health insurance issuer offering individual health insurance coverage solely because such issuer offers a conversion policy.

"(f) CONSTRUCTION.—Nothing in this section shall be construed—

"(1) to restrict the amount of the premium rates that an issuer may charge an individual for health insurance coverage provided in the individual market under applicable State law; or

"(2) to prevent a health insurance issuer offering health insurance coverage in the individual market from establishing premium discounts or rebates or modifying otherwise applicable copayments or deductibles in return for adherence to programs of health promotion and disease prevention.

<< 42 USCA § 300gg–42 >>

"SEC. 2742. GUARANTEED RENEWABILITY OF INDIVIDUAL HEALTH INSURANCE COVERAGE.

"(a) IN GENERAL.—Except as provided in this section, a health insurance issuer that provides individual health insurance coverage to an individual shall renew or continue in force such coverage at the option of the individual.

"(b) GENERAL EXCEPTIONS.—A health insurance issuer may nonrenew or discontinue health insurance coverage of an individual in the individual market based only on one or more of the following:

"(1) NONPAYMENT OF PREMIUMS.—The individual has failed to pay premiums or contributions in accordance with the terms of the health insurance coverage or the issuer has not received timely premium payments.

"(2) FRAUD.—The individual has performed an act or practice that constitutes fraud or made an intentional misrepresentation of material fact under the terms of the coverage.

"(3) TERMINATION OF PLAN.—The issuer is ceasing to offer coverage in the individual market in accordance with subsection (c) and applicable State law.

"(4) MOVEMENT OUTSIDE SERVICE AREA.—In the case of a health insurance issuer that offers health insurance coverage in the market through a network plan, the individual no longer resides, lives, or works in the service area (or in an area for which the issuer is authorized to do business) but only if such coverage is terminated under this paragraph uniformly without regard to any health status-related factor of covered individuals.

"(5) ASSOCIATION MEMBERSHIP CEASES.—In the case of health insurance coverage that is made available in the individual market only through one or more bona fide associations, the membership of the individual in the association (on the basis of which the coverage is provided) ceases but only if such coverage is terminated under this paragraph uniformly without regard to any health status-related factor of covered individuals.

"(c) REQUIREMENTS FOR UNIFORM TERMINATION OF COVERAGE.—

"(1) PARTICULAR TYPE OF COVERAGE NOT OFFERED.—In any case in which an issuer decides to discontinue offering a particular type of health insurance coverage offered in the individual market, coverage of such type may be discontinued by the issuer only if—

"(A) the issuer provides notice to each covered individual provided coverage of this type in such market of such discontinuation at least 90 days prior to the date of the discontinuation of such coverage;

"(B) the issuer offers to each individual in the individual market provided coverage of this type, the option to purchase any other individual health insurance coverage currently being offered by the issuer for individuals in such market; and

"(C) in exercising the option to discontinue coverage of this type and in offering the option of coverage under subparagraph (B), the issuer acts uniformly without regard to any health status-related factor of enrolled individuals or individuals who may become eligible for such coverage.

"(2) DISCONTINUANCE OF ALL COVERAGE.—

"(A) IN GENERAL.—Subject to subparagraph (C), in any case in which a health insurance issuer elects to discontinue offering all health insurance coverage in the individual market in a State, health insurance coverage may be discontinued by the issuer only if—

"(i) the issuer provides notice to the applicable State authority and to each individual of such discontinuation at least 180 days prior to the date of the expiration of such coverage, and

"(ii) all health insurance issued or delivered for issuance in the State in such market are discontinued and coverage under such health insurance coverage in such market is not renewed.

"(B) PROHIBITION ON MARKET REENTRY.—In the case of a discontinuation under subparagraph (A) in the individual market, the issuer may not provide for the issuance of any health insurance coverage in the market and State involved during the 5–year period beginning on the date of the discontinuation of the last health insurance coverage not so renewed.

"(d) EXCEPTION FOR UNIFORM MODIFICATION OF COVERAGE.—At the time of coverage renewal, a health insurance issuer may modify the health insurance coverage for a policy form offered to individuals in the individual market so long as such modification is consistent with State law and effective on a uniform basis among all individuals with that policy form.

"(e) APPLICATION TO COVERAGE OFFERED ONLY THROUGH ASSOCIATIONS.—In applying this section in the case of health insurance coverage that is made available by a health insurance issuer in the individual market to individuals only through one or more associations, a reference to an 'individual' is deemed to include a reference to such an association (of which the individual is a member).

<< 42 USCA § 300gg–43 >>

"SEC. 2743. CERTIFICATION OF COVERAGE.

"The provisions of section 2701(e) shall apply to health insurance coverage offered by a health insurance issuer in the individual market in the same manner as it applies to health insurance coverage offered by a health insurance issuer in connection with a group health plan in the small or large group market.

<< 42 USCA § 300gg–44 >>

"SEC. 2744. STATE FLEXIBILITY IN INDIVIDUAL MARKET REFORMS.

"(a) WAIVER OF REQUIREMENTS WHERE IMPLEMENTATION OF ACCEPTABLE ALTERNATIVE MECHANISM.—

"(1) IN GENERAL.—The requirements of section 2741 shall not apply with respect to health insurance coverage offered in the individual market in the State so long as a State is found to be implementing, in accordance with this section and consistent with section 2746(b), an alternative mechanism (in this section referred to as an 'acceptable alternative mechanism')—

"(A) under which all eligible individuals are provided a choice of health insurance coverage;

"(B) under which such coverage does not impose any preexisting condition exclusion with respect to such coverage;

"(C) under which such choice of coverage includes at least one policy form of coverage that is comparable to comprehensive health insurance coverage offered in the individual market in such State or that is comparable to a standard option of coverage available under the group or individual health insurance laws of such State; and

"(D) in a State which is implementing—

"(i) a model act described in subsection (c)(1),

"(ii) a qualified high risk pool described in subsection (c)(2), or

"(iii) a mechanism described in subsection (c)(3).

"(2) PERMISSIBLE FORMS OF MECHANISMS.—A private or public individual health insurance mechanism (such as a health insurance coverage pool or programs, mandatory group conversion policies, guaranteed issue of one or more plans of individual health insurance coverage, or open enrollment by one or more health insurance issuers), or combination of such mechanisms, that is designed to provide access to health benefits for individuals in the individual market in the State in accordance with this section may constitute an acceptable alternative mechanism.

"(b) APPLICATION OF ACCEPTABLE ALTERNATIVE MECHANISMS.—

"(1) PRESUMPTION.—

"(A) IN GENERAL.—Subject to the succeeding provisions of this subsection, a State is presumed to be implementing an acceptable alternative mechanism in accordance with this section as of July 1, 1997, if, by not later than April 1, 1997, the chief executive officer of a State—

"(i) notifies the Secretary that the State has enacted or intends to enact (by not later than January 1, 1998, or July 1, 1998, in the case of a State described in subparagraph (B)(ii)) any necessary legislation to provide for the implementation of a mechanism reasonably designed to be an acceptable alternative mechanism as of January 1, 1998, (or, in the case of a State described in subparagraph (B)(ii), July 1, 1998); and

"(ii) provides the Secretary with such information as the Secretary may require to review the mechanism and its implementation (or proposed implementation) under this subsection.

"(B) DELAY PERMITTED FOR CERTAIN STATES.—

"(i) EFFECT OF DELAY.—In the case of a State described in clause (ii) that provides notice under subparagraph (A)(i), for the presumption to continue on and after July 1, 1998, the chief executive officer of the State by April 1, 1998—

"(I) must notify the Secretary that the State has enacted any necessary legislation to provide for the implementation of a mechanism reasonably designed to be an acceptable alternative mechanism as of July 1, 1998; and

"(II) must provide the Secretary with such information as the Secretary may require to review the mechanism and its implementation (or proposed implementation) under this subsection.

"(ii) STATES DESCRIBED.—A State described in this clause is a State that has a legislature that does not meet within the 12–month period beginning on the date of enactment of this Act.

"(C) CONTINUED APPLICATION.—In order for a mechanism to continue to be presumed to be an acceptable alternative mechanism, the State shall provide the Secretary every 3 years with information described in subparagraph (A)(ii) or (B)(i)(II) (as the case may be).

"(2) NOTICE.—If the Secretary finds, after review of information provided under paragraph (1) and in consultation with the chief executive officer of the State and the insurance commissioner or chief insurance regulatory official of the State, that such a mechanism is not an acceptable alternative mechanism or is not (or no longer) being implemented, the Secretary—

"(A) shall notify the State of—

"(i) such preliminary determination, and

"(ii) the consequences under paragraph (3) of a failure to implement such a mechanism; and

"(B) shall permit the State a reasonable opportunity in which to modify the mechanism (or to adopt another mechanism) in a manner so that may be an acceptable alternative mechanism or to provide for implementation of such a mechanism.

"(3) FINAL DETERMINATION.—If, after providing notice and opportunity under paragraph (2), the Secretary finds that the mechanism is not an acceptable alternative mechanism or the State is not implementing such a mechanism, the Secretary shall notify the State that the State is no longer considered to be implementing an acceptable alternative mechanism and that the requirements of section 2741 shall apply to health insurance coverage offered in the individual market in the State, effective as of a date specified in the notice.

"(4) LIMITATION ON SECRETARIAL AUTHORITY.—The Secretary shall not make a determination under paragraph (2) or (3) on any basis other than the basis that a mechanism is not an acceptable alternative mechanism or is not being implemented.

"(5) FUTURE ADOPTION OF MECHANISMS.—If a State, after January 1, 1997, submits the notice and information described in paragraph (1), unless the Secretary makes a finding described in paragraph (3) within the 90–day period beginning on the date of submission of the notice and information, the mechanism shall be considered to be an acceptable alternative mechanism for purposes of this section, effective 90 days after the end of such period, subject to the second sentence of paragraph (1).

"(c) PROVISION RELATED TO RISK.—

"(1) ADOPTION OF NAIC MODELS.—The model act referred to in subsection (a)(1)(D)(i) is the Small Employer and Individual Health Insurance Availability Model Act (adopted by the National Association of Insurance Commissioners on June 3, 1996) insofar as it applies to individual health insurance coverage or the Individual Health Insurance Portability Model Act (also adopted by such Association on such date).

"(2) QUALIFIED HIGH RISK POOL.—For purposes of subsection (a)(1)(D)(ii), a 'qualified high risk pool' described in this paragraph is a high risk pool that—

"(A) provides to all eligible individuals health insurance coverage (or comparable coverage) that does not impose any preexisting condition exclusion with respect to such coverage for all eligible individuals, and

"(B) provides for premium rates and covered benefits for such coverage consistent with standards included in the NAIC Model Health Plan for Uninsurable Individuals Act (as in effect as of the date of the enactment of this title).

"(3) OTHER MECHANISMS.—For purposes of subsection (a)(1)(D)(iii), a mechanism described in this paragraph—

"(A) provides for risk adjustment, risk spreading, or a risk spreading mechanism (among issuers or policies of an issuer) or otherwise provides for some financial subsidization for eligible individuals, including through assistance to participating issuers; or

"(B) is a mechanism under which each eligible individual is provided a choice of all individual health insurance coverage otherwise available.

<< 42 USCA § 300gg–45 >>

"SEC. 2745. ENFORCEMENT.

"(a) STATE ENFORCEMENT.—

"(1) STATE AUTHORITY.—Subject to section 2746, each State may require that health insurance issuers that issue, sell, renew, or offer health insurance coverage in the State in the individual market meet the requirements established under this part with respect to such issuers.

"(2) FAILURE TO IMPLEMENT REQUIREMENTS.—In the case of a State that fails to substantially enforce the requirements set forth in this part with respect to health insurance issuers in the State, the Secretary shall enforce the requirements of this part under subsection (b) insofar as they relate to the issuance, sale, renewal, and offering of health insurance coverage in the individual market in such State.

"(b) SECRETARIAL ENFORCEMENT AUTHORITY.—The Secretary shall have the same authority in relation to enforcement of the provisions of this part with respect to issuers of health insurance coverage in the individual market in a State as the Secretary has under section 2722(b)(2) in relation to the enforcement of the provisions of part A with respect to issuers of health insurance coverage in the small group market in the State.

<< 42 USCA § 300gg–46 >>

"SEC. 2746. PREEMPTION.

"(a) IN GENERAL.—Subject to subsection (b), nothing in this part (or part C insofar as it applies to this part) shall be construed to prevent a State from establishing, implementing, or continuing in effect standards and requirements unless such standards and requirements prevent the application of a requirement of this part.

"(b) RULES OF CONSTRUCTION.—Nothing in this part (or part C insofar as it applies to this part) shall be construed to affect or modify the provisions of section 514 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1144).

<< 42 USCA § 300gg–47 >>

"SEC. 2747. GENERAL EXCEPTIONS.

"(a) EXCEPTION FOR CERTAIN BENEFITS.—The requirements of this part shall not apply to any health insurance coverage in relation to its provision of excepted benefits described in section 2791(c)(1).

"(b) EXCEPTION FOR CERTAIN BENEFITS IF CERTAIN CONDITIONS MET.—The requirements of this part shall not apply to any health insurance coverage in relation to its provision of excepted benefits described in paragraph (2), (3), or (4) of section 2791(c) if the benefits are provided under a separate policy, certificate, or contract of insurance.".

<< 42 USCA §§ 300gg–41 NOTE, 300gg–42 nt, 300gg–43 nt, 300gg–44 nt, 300gg–45 nt, 300gg–46 nt, 300gg–47 nt >>

(b) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as provided in this subsection, part B of title XXVII of the Public Health Service Act (as inserted by subsection (a)) shall apply with respect to health insurance coverage offered, sold, issued, renewed, in effect, or operated in the individual market after June 30, 1997, regardless of when a period of creditable coverage occurs.

(2) APPLICATION OF CERTIFICATION RULES.—The provisions of section 102(d)(2) of this Act shall apply to section 2743 of the Public Health Service Act in the same manner as it applies to section 2701(e) of such Act.

Subtitle C—General and Miscellaneous Provisions

<< 42 USCA § 300gg NOTE >>

SEC. 191. HEALTH COVERAGE AVAILABILITY STUDIES.

(a) STUDIES.—

(1) STUDY ON EFFECTIVENESS OF REFORMS.—The Secretary of Health and Human Services shall provide for a study on the effectiveness of the provisions of this title and the various State laws, in ensuring the availability of reasonably priced health coverage to employers purchasing group coverage and individuals purchasing coverage on a non-group basis.

(2) STUDY ON ACCESS AND CHOICE.—The Secretary also shall provide for a study on—

(A) the extent to which patients have direct access to, and choice of, health care providers, including specialty providers, within a network plan, as well as the opportunity to utilize providers outside of the network plan, under the various types of coverage offered under the provisions of this title; and

(B) the cost and cost-effectiveness to health insurance issuers of providing access to out-of-network providers, and the potential impact of providing such access on the cost and quality of health insurance coverage offered under provisions of this title.

(3) CONSULTATION.—The studies under this subsection shall be conducted in consultation with the Secretary of Labor, representatives of State officials, consumers, and other representatives of individuals and entities that have expertise in health insurance and employee benefits.

(b) REPORTS.—Not later than January 1, 2000, the Secretary shall submit to the appropriate committees of Congress a report on each of the studies under subsection (a).

SEC. 192. REPORT ON MEDICARE REIMBURSEMENT OF TELEMEDICINE.

The Health Care Financing Administration shall complete its ongoing study of Medicare reimbursement of all telemedicine services and submit a report to Congress on Medicare reimbursement of telemedicine services by not later than March 1, 1997. The report shall—

(1) utilize data compiled from the current demonstration projects already under review and gather data from other ongoing telemedicine networks;

(2) include an analysis of the cost of services provided via telemedicine; and

(3) include a proposal for Medicare reimbursement of such services.

<< 42 USCA § 300e >>

SEC. 193. ALLOWING FEDERALLY–QUALIFIED HMOS TO OFFER HIGH DEDUCTIBLE PLANS.

Section 1301(b) of the Public Health Service Act (42 U.S.C. 300e(b)) is amended by adding at the end the following new paragraph:

"(6) A health maintenance organization that otherwise meets the requirements of this title may offer a high-deductible health plan (as defined in section 220(c)(2) of the Internal Revenue Code of 1986).".

<< 42 USCA § 233 >>

SEC. 194. VOLUNTEER SERVICES PROVIDED BY HEALTH PROFESSIONALS AT FREE CLINICS.

Section 224 of the Public Health Service Act (42 U.S.C. 233) is amended by adding at the end the following subsection:

"(o)(1) For purposes of this section, a free clinic health professional shall in providing a qualifying health service to an individual be deemed to be an employee of the Public Health Service for a calendar year that begins during a fiscal year for which a transfer was made under paragraph (6)(D). The preceding sentence is subject to the provisions of this subsection.

"(2) In providing a health service to an individual, a health care practitioner shall for purposes of this subsection be considered to be a free clinic health professional if the following conditions are met:

"(A) The service is provided to the individual at a free clinic, or through offsite programs or events carried out by the free clinic.

"(B) The free clinic is sponsoring the health care practitioner pursuant to paragraph (5)(C).

"(C) The service is a qualifying health service (as defined in paragraph (4)).

"(D) Neither the health care practitioner nor the free clinic receives any compensation for the service from the individual or from any third-party payor (including reimbursement under any insurance policy or health plan, or under any Federal or State health benefits program). With respect to compliance with such condition:

"(i) The health care practitioner may receive repayment from the free clinic for reasonable expenses incurred by the health care practitioner in the provision of the service to the individual.

"(ii) The free clinic may accept voluntary donations for the provision of the service by the health care practitioner to the individual.

"(E) Before the service is provided, the health care practitioner or the free clinic provides written notice to the individual of the extent to which the legal liability of the health care practitioner is limited pursuant to this subsection (or in the case of an emergency, the written notice is provided to the individual as soon after the emergency as is practicable). If the individual is a minor or is otherwise legally incompetent, the condition under this subparagraph is that the written notice be provided to a legal guardian or other person with legal responsibility for the care of the individual.

"(F) At the time the service is provided, the health care practitioner is licensed or certified in accordance with applicable law regarding the provision of the service.

"(3)(A) For purposes of this subsection, the term 'free clinic' means a health care facility operated by a nonprofit private entity meeting the following requirements:

"(i) The entity does not, in providing health services through the facility, accept reimbursement from any third-party payor (including reimbursement under any insurance policy or health plan, or under any Federal or State health benefits program).

"(ii) The entity, in providing health services through the facility, either does not impose charges on the individuals to whom the services are provided, or imposes a charge according to the ability of the individual involved to pay the charge.

"(iii) The entity is licensed or certified in accordance with applicable law regarding the provision of health services.

"(B) With respect to compliance with the conditions under subparagraph (A), the entity involved may accept voluntary donations for the provision of services.

"(4) For purposes of this subsection, the term 'qualifying health service' means any medical assistance required or authorized to be provided in the program under title XIX of the Social Security Act, without regard to whether the medical assistance is included in the plan submitted under such program by the State in which the health care practitioner involved provides the medical assistance. References in the preceding sentence to such program shall as applicable be considered to be references to any successor to such program.

"(5) Subsection (g) (other than paragraphs (3) through (5)) and subsections (h), (i), and (l) apply to a health care practitioner for purposes of this subsection to the same extent and in the same manner as such subsections apply to an officer, governing board member, employee, or contractor of an entity described in subsection (g)(4), subject to paragraph (6) and subject to the following:

"(A) The first sentence of paragraph (1) applies in lieu of the first sentence of subsection (g)(1)(A).

"(B) This subsection may not be construed as deeming any free clinic to be an employee of the Public Health Service for purposes of this section.

"(C) With respect to a free clinic, a health care practitioner is not a free clinic health professional unless the free clinic sponsors the health care practitioner. For purposes of this subsection, the free clinic shall be considered to be sponsoring the health care practitioner if—

"(i) with respect to the health care practitioner, the free clinic submits to the Secretary an application meeting the requirements of subsection (g)(1)(D); and

"(ii) the Secretary, pursuant to subsection (g)(1)(E), determines that the health care practitioner is deemed to be an employee of the Public Health Service.

"(D) In the case of a health care practitioner who is determined by the Secretary pursuant to subsection (g)(1)(E) to be a free clinic health professional, this subsection applies to the health care practitioner (with respect to the free clinic sponsoring the health care practitioner pursuant to subparagraph (C)) for any cause of action arising from an act or omission of the health care practitioner occurring on or after the date on which the Secretary makes such determination.

"(E) Subsection (g)(1)(F) applies to a health care practitioner for purposes of this subsection only to the extent that, in providing health services to an individual, each of the conditions specified in paragraph (2) is met.

"(6)(A) For purposes of making payments for judgments against the United States (together with related fees and expenses of witnesses) pursuant to this section arising from the acts or omissions of free clinic health professionals, there is authorized to be appropriated $10,000,000 for each fiscal year.

"(B) The Secretary shall establish a fund for purposes of this subsection. Each fiscal year amounts appropriated under subparagraph (A) shall be deposited in such fund.

"(C) Not later than May 1 of each fiscal year, the Attorney General, in consultation with the Secretary, shall submit to the Congress a report providing an estimate of the amount of claims (together with related fees and expenses of witnesses) that, by reason of the acts or omissions of free clinic health professionals, will be paid pursuant to this section during the calendar year that begins in the following fiscal year. Subsection (k)(1)(B) applies to the estimate under the preceding sentence regarding free clinic health professionals to the same extent and in the same manner as such subsection applies to the estimate under such subsection regarding officers, governing board members, employees, and contractors of entities described in subsection (g)(4).

"(D) Not later than December 31 of each fiscal year, the Secretary shall transfer from the fund under subparagraph (B) to the appropriate accounts in the Treasury an amount equal to the estimate made under subparagraph (C) for the calendar year beginning in such fiscal year, subject to the extent of amounts in the fund.

"(7)(A) This subsection takes effect on the date of the enactment of the first appropriations Act that makes an appropriation under paragraph (6)(A), except as provided in subparagraph (B)(i).

"(B)(i) Effective on the date of the enactment of the Health Insurance Portability and Accountability Act of 1996—

"(I) the Secretary may issue regulations for carrying out this subsection, and the Secretary may accept and consider applications submitted pursuant to paragraph (5)(C); and

"(II) reports under paragraph (6)(C) may be submitted to the Congress.

"(ii) For the first fiscal year for which an appropriation is made under subparagraph (A) of paragraph (6), if an estimate under subparagraph (C) of such paragraph has not been made for the calendar year beginning in such fiscal year, the transfer under subparagraph (D) of such paragraph shall be made notwithstanding the lack of the estimate, and the transfer shall be made in an amount equal to the amount of such appropriation.".

<< 42 USCA § 300gg NOTE >>

SEC. 195. FINDINGS; SEVERABILITY.

(a) FINDINGS RELATING TO EXERCISE OF COMMERCE CLAUSE AUTHORITY.—Congress finds the following in relation to the provisions of this title:

(1) Provisions in group health plans and health insurance coverage that impose certain preexisting condition exclusions impact the ability of employees to seek employment in interstate commerce, thereby impeding such commerce.

(2) Health insurance coverage is commercial in nature and is in and affects interstate commerce.

(3) It is a necessary and proper exercise of Congressional authority to impose requirements under this title on group health plans and health insurance coverage (including coverage offered to individuals previously covered under group health plans) in order to promote commerce among the States.

(4) Congress, however, intends to defer to States, to the maximum extent practicable, in carrying out such requirements with respect to insurers and health maintenance organizations that are subject to State regulation, consistent with the provisions of the Employee Retirement Income Security Act of 1974.

<< 29 USCA §§ 1003 nt, 1021 nt, 1022 nt, 1024 nt, 1132 nt, 1136 nt, 1144 nt, 1181 nt, 1182 nt, 1183 nt, 1184 nt, 1185 nt, 1186 nt, 1187 nt >>

<< 42 USCA §§ 233 nt, 300e nt, 300bb–8 nt, 300gg–1 nt, 300gg–11 nt, 300gg–12 nt, 300gg–13 nt, 300gg–21 nt, 300gg–22 nt, 300gg–23 nt, 300gg–41 nt, 300gg–42 nt, 300gg–43 nt, 300gg–44 nt, 300gg–45 nt, 300gg–46 nt, 300gg–47 nt, 300gg–91 nt, 300gg–92 nt >>

(b) SEVERABILITY.—If any provision of this title or the application of such provision to any person or circumstance is held to be unconstitutional, the remainder of this title and the application of the provisions of such to any person or circumstance shall not be affected thereby.

TITLE II—PREVENTING HEALTH CARE FRAUD AND ABUSE; ADMINISTRATIVE SIMPLIFICATION

SEC. 200. REFERENCES IN TITLE.

Except as otherwise specifically provided, whenever in this title an amendment is expressed in terms of an amendment to or repeal of a section or other provision, the reference shall be considered to be made to that section or other provision of the Social Security Act.

Subtitle A—Fraud and Abuse Control Program

SEC. 201. FRAUD AND ABUSE CONTROL PROGRAM.

<< 42 USCA § 1320a–7c >>

(a) ESTABLISHMENT OF PROGRAM.—Title XI (42 U.S.C. 1301 et seq.) is amended by inserting after section 1128B the following new section:

"FRAUD AND ABUSE CONTROL PROGRAM

"SEC. 1128C. (a) ESTABLISHMENT OF PROGRAM.—

"(1) IN GENERAL.—Not later than January 1, 1997, the Secretary, acting through the Office of the Inspector General of the Department of Health and Human Services, and the Attorney General shall establish a program—

"(A) to coordinate Federal, State, and local law enforcement programs to control fraud and abuse with respect to health plans,

"(B) to conduct investigations, audits, evaluations, and inspections relating to the delivery of and payment for health care in the United States,

"(C) to facilitate the enforcement of the provisions of sections 1128, 1128A, and 1128B and other statutes applicable to health care fraud and abuse,

"(D) to provide for the modification and establishment of safe harbors and to issue advisory opinions and special fraud alerts pursuant to section 1128D, and

"(E) to provide for the reporting and disclosure of certain final adverse actions against health care providers, suppliers, or practitioners pursuant to the data collection system established under section 1128E.

"(2) COORDINATION WITH HEALTH PLANS.—In carrying out the program established under paragraph (1), the Secretary and the Attorney General shall consult with, and arrange for the sharing of data with representatives of health plans.

"(3) GUIDELINES.—

"(A) IN GENERAL.—The Secretary and the Attorney General shall issue guidelines to carry out the program under paragraph (1). The provisions of sections 553, 556, and 557 of title 5, United States Code, shall not apply in the issuance of such guidelines.

"(B) INFORMATION GUIDELINES.—

"(i) IN GENERAL.—Such guidelines shall include guidelines relating to the furnishing of information by health plans, providers, and others to enable the Secretary and the Attorney General to carry out the program (including coordination with health plans under paragraph (2)).

"(ii) CONFIDENTIALITY.—Such guidelines shall include procedures to assure that such information is provided and utilized in a manner that appropriately protects the confidentiality of the information and the privacy of individuals receiving health care services and items.

"(iii) QUALIFIED IMMUNITY FOR PROVIDING INFORMATION.—The provisions of section 1157(a) (relating to limitation on liability) shall apply to a person providing information to the Secretary or the Attorney General in conjunction with their performance of duties under this section.

"(4) ENSURING ACCESS TO DOCUMENTATION.—The Inspector General of the Department of Health and Human Services is authorized to exercise such authority described in paragraphs (3) through (9) of section 6 of the Inspector General Act of 1978 (5 U.S.C.App.) as necessary with respect to the activities under the fraud and abuse control program established under this subsection.

"(5) AUTHORITY OF INSPECTOR GENERAL.—Nothing in this Act shall be construed to diminish the authority of any Inspector General, including such authority as provided in the Inspector General Act of 1978 (5 U.S.C.App.).

"(b) ADDITIONAL USE OF FUNDS BY INSPECTOR GENERAL.—

"(1) REIMBURSEMENTS FOR INVESTIGATIONS.—The Inspector General of the Department of Health and Human Services is authorized to receive and retain for current use reimbursement for the costs of conducting investigations and audits and for monitoring compliance plans when such costs are ordered by a court, voluntarily agreed to by the payor, or otherwise.

"(2) CREDITING.—Funds received by the Inspector General under paragraph (1) as reimbursement for costs of conducting investigations shall be deposited to the credit of the appropriation from which initially paid, or to appropriations for similar purposes currently available at the time of deposit, and shall remain available for obligation for 1 year from the date of the deposit of such funds.

"(c) HEALTH PLAN DEFINED.—For purposes of this section, the term 'health plan' means a plan or program that provides health benefits, whether directly, through insurance, or otherwise, and includes—

"(1) a policy of health insurance;

"(2) a contract of a service benefit organization; and

"(3) a membership agreement with a health maintenance organization or other prepaid health plan.".

<< 42 USCA § 1395i >>

(b) ESTABLISHMENT OF HEALTH CARE FRAUD AND ABUSE CONTROL ACCOUNT IN FEDERAL HOSPITAL INSURANCE TRUST FUND.—Section 1817 (42 U.S.C. 1395i) is amended by adding at the end the following new subsection:

"(k) HEALTH CARE FRAUD AND ABUSE CONTROL ACCOUNT.—

"(1) ESTABLISHMENT.—There is hereby established in the Trust Fund an expenditure account to be known as the 'Health Care Fraud and Abuse Control Account' (in this subsection referred to as the 'Account').

"(2) APPROPRIATED AMOUNTS TO TRUST FUND.—

"(A) IN GENERAL.—There are hereby appropriated to the Trust Fund—

"(i) such gifts and bequests as may be made as provided in subparagraph (B);

"(ii) such amounts as may be deposited in the Trust Fund as provided in sections 242(b) and 249(c) of the Health Insurance Portability and Accountability Act of 1996, and title XI; and

"(iii) such amounts as are transferred to the Trust Fund under subparagraph (C).

"(B) AUTHORIZATION TO ACCEPT GIFTS.—The Trust Fund is authorized to accept on behalf of the United States money gifts and bequests made unconditionally to the Trust Fund, for the benefit of the Account or any activity financed through the Account.

"(C) TRANSFER OF AMOUNTS.—The Managing Trustee shall transfer to the Trust Fund, under rules similar to the rules in section 9601 of the Internal Revenue Code of 1986, an amount equal to the sum of the following:

"(i) Criminal fines recovered in cases involving a Federal health care offense (as defined in section 982(a)(6)(B) of title 18, United States Code).

"(ii) Civil monetary penalties and assessments imposed in health care cases, including amounts recovered under titles XI, XVIII, and XIX, and chapter 38 of title 31, United States Code (except as otherwise provided by law).

"(iii) Amounts resulting from the forfeiture of property by reason of a Federal health care offense.

"(iv) Penalties and damages obtained and otherwise creditable to miscellaneous receipts of the general fund of the Treasury obtained under sections 3729 through 3733 of title 31, United States Code (known as the False Claims Act), in cases involving claims related to the provision of health care items and services (other than funds awarded to a relator, for restitution or otherwise authorized by law).

"(D) APPLICATION.—Nothing in subparagraph (C)(iii) shall be construed to limit the availability of recoveries and forfeitures obtained under title I of the Employee Retirement Income Security Act of 1974 for the purpose of providing equitable or remedial relief for employee welfare benefit plans, and for participants and beneficiaries under such plans, as authorized under such title.

"(3) APPROPRIATED AMOUNTS TO ACCOUNT FOR FRAUD AND ABUSE CONTROL PROGRAM, ETC.—

"(A) DEPARTMENTS OF HEALTH AND HUMAN SERVICES AND JUSTICE.—

"(i) IN GENERAL.—There are hereby appropriated to the Account from the Trust Fund such sums as the Secretary and the Attorney General certify are necessary to carry out the purposes described in subparagraph (C), to be available without further appropriation, in an amount not to exceed—

"(I) for fiscal year 1997, $104,000,000,

"(II) for each of the fiscal years 1998 through 2003, the limit for the preceding fiscal year, increased by 15 percent; and

"(III) for each fiscal year after fiscal year 2003, the limit for fiscal year 2003.

"(ii) MEDICARE AND MEDICAID ACTIVITIES.—For each fiscal year, of the amount appropriated in clause (i), the following amounts shall be available only for the purposes of the activities of the Office of the Inspector General of the Department of Health and Human Services with respect to the Medicare and medicaid programs—

"(I) for fiscal year 1997, not less than $60,000,000 and not more than $70,000,000;

"(II) for fiscal year 1998, not less than $80,000,000 and not more than $90,000,000;

"(III) for fiscal year 1999, not less than $90,000,000 and not more than $100,000,000;

"(IV) for fiscal year 2000, not less than $110,000,000 and not more than $120,000,000;

"(V) for fiscal year 2001, not less than $120,000,000 and not more than $130,000,000;

"(VI) for fiscal year 2002, not less than $140,000,000 and not more than $150,000,000; and

"(VII) for each fiscal year after fiscal year 2002, not less than $150,000,000 and not more than $160,000,000.

"(B) FEDERAL BUREAU OF INVESTIGATION.—There are hereby appropriated from the general fund of the United States Treasury and hereby appropriated to the Account for transfer to the Federal Bureau of Investigation to carry out the purposes described in subparagraph (C), to be available without further appropriation—

"(i) for fiscal year 1997, $47,000,000;

"(ii) for fiscal year 1998, $56,000,000;

"(iii) for fiscal year 1999, $66,000,000;

"(iv) for fiscal year 2000, $76,000,000;

"(v) for fiscal year 2001, $88,000,000;

"(vi) for fiscal year 2002, $101,000,000; and

"(vii) for each fiscal year after fiscal year 2002, $114,000,000.

"(C) USE OF FUNDS.—The purposes described in this subparagraph are to cover the costs (including equipment, salaries and benefits, and travel and training) of the administration and operation of the health care fraud and abuse control program established under section 1128C(a), including the costs of—

"(i) prosecuting health care matters (through criminal, civil, and administrative proceedings);

"(ii) investigations;

"(iii) financial and performance audits of health care programs and operations;

"(iv) inspections and other evaluations; and

"(v) provider and consumer education regarding compliance with the provisions of title XI.

"(4) APPROPRIATED AMOUNTS TO ACCOUNT FOR MEDICARE INTEGRITY PROGRAM.—

"(A) IN GENERAL.—There are hereby appropriated to the Account from the Trust Fund for each fiscal year such amounts as are necessary to carry out the Medicare Integrity Program under section 1893, subject to subparagraph (B) and to be available without further appropriation.

"(B) AMOUNTS SPECIFIED.—The amount appropriated under subparagraph (A) for a fiscal year is as follows:

"(i) For fiscal year 1997, such amount shall be not less than $430,000,000 and not more than $440,000,000.

"(ii) For fiscal year 1998, such amount shall be not less than $490,000,000 and not more than $500,000,000.

"(iii) For fiscal year 1999, such amount shall be not less than $550,000,000 and not more than $560,000,000.

"(iv) For fiscal year 2000, such amount shall be not less than $620,000,000 and not more than $630,000,000.

"(v) For fiscal year 2001, such amount shall be not less than $670,000,000 and not more than $680,000,000.

"(vi) For fiscal year 2002, such amount shall be not less than $690,000,000 and not more than $700,000,000.

"(vii) For each fiscal year after fiscal year 2002, such amount shall be not less than $710,000,000 and not more than $720,000,000.

"(5) ANNUAL REPORT.—Not later than January 1, the Secretary and the Attorney General shall submit jointly a report to Congress which identifies—

"(A) the amounts appropriated to the Trust Fund for the previous fiscal year under paragraph (2)(A) and the source of such amounts; and

"(B) the amounts appropriated from the Trust Fund for such year under paragraph (3) and the justification for the expenditure of such amounts.

"(6) GAO REPORT.—Not later than January 1 of 2000, 2002, and 2004, the Comptroller General of the United States shall submit a report to Congress which—

"(A) identifies—

"(i) the amounts appropriated to the Trust Fund for the previous two fiscal years under paragraph (2)(A) and the source of such amounts; and

"(ii) the amounts appropriated from the Trust Fund for such fiscal years under paragraph (3) and the justification for the expenditure of such amounts;

"(B) identifies any expenditures from the Trust Fund with respect to activities not involving the Medicare program under title XVIII;

"(C) identifies any savings to the Trust Fund, and any other savings, resulting from expenditures from the Trust Fund; and

"(D) analyzes such other aspects of the operation of the Trust Fund as the Comptroller General of the United States considers appropriate.".

SEC. 202. MEDICARE INTEGRITY PROGRAM.

(a) ESTABLISHMENT OF MEDICARE INTEGRITY PROGRAM.—Title XVIII is amended by adding at the end the following new section:

<< 42 USCA § 1395ddd >>

"MEDICARE INTEGRITY PROGRAM

"SEC. 1893. (a) ESTABLISHMENT OF PROGRAM.—There is hereby established the Medicare Integrity Program (in this section referred to as the 'Program') under which the Secretary shall promote the integrity of the Medicare program by entering into contracts in accordance with this section with eligible entities to carry out the activities described in subsection (b).

"(b) ACTIVITIES DESCRIBED.—The activities described in this subsection are as follows:

"(1) Review of activities of providers of services or other individuals and entities furnishing items and services for which payment may be made under this title (including skilled nursing facilities and home health agencies), including medical and utilization review and fraud review (employing similar standards, processes, and technologies used by private health plans, including equipment and software technologies which surpass the capability of the equipment and technologies used in the review of claims under this title as of the date of the enactment of this section).

"(2) Audit of cost reports.

"(3) Determinations as to whether payment should not be, or should not have been, made under this title by reason of section 1862(b), and recovery of payments that should not have been made.

"(4) Education of providers of services, beneficiaries, and other persons with respect to payment integrity and benefit quality assurance issues.

"(5) Developing (and periodically updating) a list of items of durable medical equipment in accordance with section 1834(a)(15) which are subject to prior authorization under such section.

"(c) ELIGIBILITY OF ENTITIES.—An entity is eligible to enter into a contract under the Program to carry out any of the activities described in subsection (b) if—

"(1) the entity has demonstrated capability to carry out such activities;

"(2) in carrying out such activities, the entity agrees to cooperate with the Inspector General of the Department of Health and Human Services, the Attorney General, and other law enforcement agencies, as appropriate, in the investigation and deterrence of fraud and abuse in relation to this title and in other cases arising out of such activities;

"(3) the entity complies with such conflict of interest standards as are generally applicable to Federal acquisition and procurement; and

"(4) the entity meets such other requirements as the Secretary may impose.

In the case of the activity described in subsection (b)(5), an entity shall be deemed to be eligible to enter into a contract under the Program to carry out the activity if the entity is a carrier with a contract in effect under section 1842.

"(d) PROCESS FOR ENTERING INTO CONTRACTS.—The Secretary shall enter into contracts under the Program in accordance with such procedures as the Secretary shall by regulation establish, except that such procedures shall include the following:

"(1) Procedures for identifying, evaluating, and resolving organizational conflicts of interest that are generally applicable to Federal acquisition and procurement.

"(2) Competitive procedures to be used—

"(A) when entering into new contracts under this section;

"(B) when entering into contracts that may result in the elimination of responsibilities of an individual fiscal intermediary or carrier under section 202(b) of the Health Insurance Portability and Accountability Act of 1996; and

"(C) at any other time considered appropriate by the Secretary,

except that the Secretary may continue to contract with entities that are carrying out the activities described in this section pursuant to agreements under section 1816 or contracts under section 1842 in effect on the date of the enactment of this section.

"(3) Procedures under which a contract under this section may be renewed without regard to any provision of law requiring competition if the contractor has met or exceeded the performance requirements established in the current contract.

The Secretary may enter into such contracts without regard to final rules having been promulgated.

"(e) LIMITATION ON CONTRACTOR LIABILITY.—The Secretary shall by regulation provide for the limitation of a contractor's liability for actions taken to carry out a contract under the Program, and such regulation shall, to the extent the Secretary finds appropriate, employ the same or comparable standards and other substantive and procedural provisions as are contained in section 1157.".

(b) ELIMINATION OF FI AND CARRIER RESPONSIBILITY FOR CARRYING OUT ACTIVITIES SUBJECT TO PROGRAM.—

<< 42 USCA § 1395h >>

(1) RESPONSIBILITIES OF FISCAL INTERMEDIARIES UNDER PART A.—Section 1816 (42 U.S.C. 1395h) is amended by adding at the end the following new subsection:

"(l) No agency or organization may carry out (or receive payment for carrying out) any activity pursuant to an agreement under this section to the extent that the activity is carried out pursuant to a contract under the Medicare Integrity Program under section 1893.".

<< 42 USCA § 1395u >>

(2) RESPONSIBILITIES OF CARRIERS UNDER PART B.—Section 1842(c) (42 U.S.C. 1395u(c)) is amended by adding at the end the following new paragraph:

"(6) No carrier may carry out (or receive payment for carrying out) any activity pursuant to a contract under this subsection to the extent that the activity is carried out pursuant to a contract under the Medicare Integrity Program under section 1893. The previous sentence shall not apply with respect to the activity described in section 1893(b)(5) (relating to prior authorization of certain items of durable medical equipment under section 1834(a)(15)).".

<< 42 USCA § 1395b–5 >>

SEC. 203. BENEFICIARY INCENTIVE PROGRAMS.

(a) CLARIFICATION OF REQUIREMENT TO PROVIDE EXPLANATION OF MEDICARE BENEFITS.—The Secretary of Health and Human Services (in this section referred to as the "Secretary") shall provide an explanation of benefits under the Medicare program under title XVIII of the Social Security Act with respect to each item or service for which payment may be

made under the program which is furnished to an individual, without regard to whether or not a deductible or coinsurance may be imposed against the individual with respect to the item or service.

(b) PROGRAM TO COLLECT INFORMATION ON FRAUD AND ABUSE.—

(1) ESTABLISHMENT OF PROGRAM.—Not later than 3 months after the date of the enactment of this Act, the Secretary shall establish a program under which the Secretary shall encourage individuals to report to the Secretary information on individuals and entities who are engaging in or who have engaged in acts or omissions which constitute grounds for the imposition of a sanction under section 1128, 1128A, or 1128B of the Social Security Act, or who have otherwise engaged in fraud and abuse against the Medicare program under title XVIII of such act for which there is a sanction provided under law. The program shall discourage provision of, and not consider, information which is frivolous or otherwise not relevant or material to the imposition of such a sanction.

(2) PAYMENT OF PORTION OF AMOUNTS COLLECTED.—If an individual reports information to the Secretary under the program established under paragraph (1) which serves as the basis for the collection by the Secretary or the Attorney General of any amount of at least $100 (other than any amount paid as a penalty under section 1128B of the Social Security Act), the Secretary may pay a portion of the amount collected to the individual (under procedures similar to those applicable under section 7623 of the Internal Revenue Code of 1986 to payments to individuals providing information on violations of such Code).

(c) PROGRAM TO COLLECT INFORMATION ON PROGRAM EFFICIENCY.—

(1) ESTABLISHMENT OF PROGRAM.—Not later than 3 months after the date of the enactment of this Act, the Secretary shall establish a program under which the Secretary shall encourage individuals to submit to the Secretary suggestions on methods to improve the efficiency of the Medicare program.

(2) PAYMENT OF PORTION OF PROGRAM SAVINGS.—If an individual submits a suggestion to the Secretary under the program established under paragraph (1) which is adopted by the Secretary and which results in savings to the program, the Secretary may make a payment to the individual of such amount as the Secretary considers appropriate.

SEC. 204. APPLICATION OF CERTAIN HEALTH ANTIFRAUD AND ABUSE SANCTIONS TO FRAUD AND ABUSE AGAINST FEDERAL HEALTH CARE PROGRAMS.

<< 42 USCA § 1320a–7b >>

(a) IN GENERAL.—Section 1128B (42 U.S.C. 1320a–7b) is amended as follows:

(1) In the heading, by striking "MEDICARE OR STATE HEALTH CARE PROGRAMS" and inserting "FEDERAL HEALTH CARE PROGRAMS".

(2) In subsection (a)(1), by striking "a program under title XVIII or a State health care program (as defined in section 1128(h))" and inserting "a Federal health care program (as defined in subsection (f))".

(3) In subsection (a)(5), by striking "a program under title XVIII or a State health care program" and inserting "a Federal health care program".

(4) In the second sentence of subsection (a)—

(A) by striking "a State plan approved under title XIX" and inserting "a Federal health care program", and

(B) by striking "the State may at its option (notwithstanding any other provision of that title or of such plan)" and inserting "the administrator of such program may at its option (notwithstanding any other provision of such program)".

(5) In subsection (b), by striking "title XVIII or a State health care program" each place it appears and inserting "a Federal health care program".

(6) In subsection (c), by inserting "(as defined in section 1128(h))" after "a State health care program".

(7) By adding at the end the following new subsection:

"(f) For purposes of this section, the term 'Federal health care program' means—

"(1) any plan or program that provides health benefits, whether directly, through insurance, or otherwise, which is funded directly, in whole or in part, by the United States Government (other than the health insurance program under chapter 89 of title 5, United States Code); or

"(2) any State health care program, as defined in section 1128(h).".

<< 42 USCA § 1320a–7b NOTE >>

(b) EFFECTIVE DATE.—The amendments made by this section shall take effect on January 1, 1997.

SEC. 205. GUIDANCE REGARDING APPLICATION OF HEALTH CARE FRAUD AND ABUSE SANCTIONS.

Title XI (42 U.S.C. 1301 et seq.), as amended by section 201, is amended by inserting after section 1128C the following new section:

<< 42 USCA § 1320a–7d >>

"GUIDANCE REGARDING APPLICATION OF HEALTH CARE FRAUD AND ABUSE SANCTIONS

"SEC. 1128d. (a) SOLICITATION AND PUBLICATION OF MODIFICATIONS TO EXISTING SAFE HARBORS AND NEW SAFE HARBORS.—

"(1) IN GENERAL.—

"(A) SOLICITATION OF PROPOSALS FOR SAFE HARBORS.—Not later than January 1, 1997, and not less than annually thereafter, the Secretary shall publish a notice in the Federal Register soliciting proposals, which will be accepted during a 60–day period, for—

"(i) modifications to existing safe harbors issued pursuant to section 14(a) of the Medicare and Medicaid Patient and Program Protection Act of 1987 (42 U.S.C. 1320a–7b note);

"(ii) additional safe harbors specifying payment practices that shall not be treated as a criminal offense under section 1128B(b) and shall not serve as the basis for an exclusion under section 1128(b)(7);

"(iii) advisory opinions to be issued pursuant to subsection (b); and

"(iv) special fraud alerts to be issued pursuant to subsection (c).

"(B) PUBLICATION OF PROPOSED MODIFICATIONS AND PROPOSED ADDITIONAL SAFE HARBORS.—After considering the proposals described in clauses (i) and (ii) of subparagraph (A), the Secretary, in consultation with the Attorney General, shall publish in the Federal Register proposed modifications to existing safe harbors and proposed additional safe harbors, if appropriate, with a 60–day comment period. After considering any public comments received during this period, the Secretary shall issue final rules modifying the existing safe harbors and establishing new safe harbors, as appropriate.

"(C) REPORT.—The Inspector General of the Department of Health and Human Services (in this section referred to as the 'Inspector General') shall, in an annual report to Congress or as part of the year-end semiannual report required by section 5 of the Inspector General Act of 1978 (5 U.S.C.App.), describe the proposals received under clauses (i) and (ii) of subparagraph (A) and explain which proposals were included in the publication described in subparagraph (B), which proposals were not included in that publication, and the reasons for the rejection of the proposals that were not included.

"(2) CRITERIA FOR MODIFYING AND ESTABLISHING SAFE HARBORS.—In modifying and establishing safe harbors under paragraph (1)(B), the Secretary may consider the extent to which providing a safe harbor for the specified payment practice may result in any of the following:

"(A) An increase or decrease in access to health care services.

"(B) An increase or decrease in the quality of health care services.

"(C) An increase or decrease in patient freedom of choice among health care providers.

"(D) An increase or decrease in competition among health care providers.

"(E) An increase or decrease in the ability of health care facilities to provide services in medically underserved areas or to medically underserved populations.

"(F) An increase or decrease in the cost to Federal health care programs (as defined in section 1128B(f)).

"(G) An increase or decrease in the potential overutilization of health care services.

"(H) The existence or nonexistence of any potential financial benefit to a health care professional or provider which may vary based on their decisions of—

"(i) whether to order a health care item or service; or

"(ii) whether to arrange for a referral of health care items or services to a particular practitioner or provider.

"(I) Any other factors the Secretary deems appropriate in the interest of preventing fraud and abuse in Federal health care programs (as so defined).

"(b) ADVISORY OPINIONS.—

"(1) ISSUANCE OF ADVISORY OPINIONS.—The Secretary, in consultation with the Attorney General, shall issue written advisory opinions as provided in this subsection.

"(2) MATTERS SUBJECT TO ADVISORY OPINIONS.—The Secretary shall issue advisory opinions as to the following matters:

"(A) What constitutes prohibited remuneration within the meaning of section 1128B(b).

"(B) Whether an arrangement or proposed arrangement satisfies the criteria set forth in section 1128B(b)(3) for activities which do not result in prohibited remuneration.

"(C) Whether an arrangement or proposed arrangement satisfies the criteria which the Secretary has established, or shall establish by regulation for activities which do not result in prohibited remuneration.

"(D) What constitutes an inducement to reduce or limit services to individuals entitled to benefits under title XVIII or title XIX within the meaning of section 1128B(b).

"(E) Whether any activity or proposed activity constitutes grounds for the imposition of a sanction under section 1128, 1128A, or 1128B.

"(3) MATTERS NOT SUBJECT TO ADVISORY OPINIONS.—Such advisory opinions shall not address the following matters:

"(A) Whether the fair market value shall be, or was paid or received for any goods, services or property.

"(B) Whether an individual is a bona fide employee within the requirements of section 3121(d)(2) of the Internal Revenue Code of 1986.

"(4) EFFECT OF ADVISORY OPINIONS.—

"(A) BINDING AS TO SECRETARY AND PARTIES INVOLVED.—Each advisory opinion issued by the Secretary shall be binding as to the Secretary and the party or parties requesting the opinion.

"(B) FAILURE TO SEEK OPINION.—The failure of a party to seek an advisory opinion may not be introduced into evidence to prove that the party intended to violate the provisions of sections 1128, 1128A, or 1128B.

"(5) REGULATIONS.—

"(A) IN GENERAL.—Not later than 180 days after the date of the enactment of this section, the Secretary shall issue regulations to carry out this section. Such regulations shall provide for—

"(i) the procedure to be followed by a party applying for an advisory opinion;

"(ii) the procedure to be followed by the Secretary in responding to a request for an advisory opinion;

"(iii) the interval in which the Secretary shall respond;

"(iv) the reasonable fee to be charged to the party requesting an advisory opinion; and

"(v) the manner in which advisory opinions will be made available to the public.

"(B) SPECIFIC CONTENTS.—Under the regulations promulgated pursuant to subparagraph (A)—

"(i) the Secretary shall be required to issue to a party requesting an advisory opinion by not later than 60 days after the request is received; and

"(ii) the fee charged to the party requesting an advisory opinion shall be equal to the costs incurred by the Secretary in responding to the request.

"(6) APPLICATION OF SUBSECTION.—This subsection shall apply to requests for advisory opinions made on or after the date which is 6 months after the date of enactment of this section and before the date which is 4 years after such date of enactment.

"(c) SPECIAL FRAUD ALERTS.—

"(1) IN GENERAL.—

"(A) REQUEST FOR SPECIAL FRAUD ALERTS.—Any person may present, at any time, a request to the Inspector General for a notice which informs the public of practices which the Inspector General considers to be suspect or of particular concern under the Medicare program under title XVIII or a State health care program, as defined in section 1128(h) (in this subsection referred to as a 'special fraud alert').

"(B) ISSUANCE AND PUBLICATION OF SPECIAL FRAUD ALERTS.—Upon receipt of a request described in subparagraph (A), the Inspector General shall investigate the subject matter of the request to determine whether a special fraud alert should be issued. If appropriate, the Inspector General shall issue a special fraud alert in response to the request. All special fraud alerts issued pursuant to this subparagraph shall be published in the Federal Register.

"(2) CRITERIA FOR SPECIAL FRAUD ALERTS.—In determining whether to issue a special fraud alert upon a request described in paragraph (1), the Inspector General may consider—

"(A) whether and to what extent the practices that would be identified in the special fraud alert may result in any of the consequences described in subsection (a)(2); and

"(B) the volume and frequency of the conduct that would be identified in the special fraud alert.".

Subtitle B—Revisions to Current Sanctions for Fraud and Abuse

<< 42 USCA § 1320a–7 >>

SEC. 211. MANDATORY EXCLUSION FROM PARTICIPATION IN MEDICARE AND STATE HEALTH CARE PROGRAMS.

(a) INDIVIDUAL CONVICTED OF FELONY RELATING TO HEALTH CARE FRAUD.—

(1) IN GENERAL.—Section 1128(a) (42 U.S.C. 1320a–7(a)) is amended by adding at the end the following new paragraph:

"(3) FELONY CONVICTION RELATING TO HEALTH CARE FRAUD.—Any individual or entity that has been convicted for an offense which occurred after the date of the enactment of the Health Insurance Portability and Accountability Act of 1996, under Federal or State law, in connection with the delivery of a health care item or service or with respect to any act or omission in a health care program (other than those specifically described in paragraph (1)) operated by or financed in whole or in part by any Federal, State, or local government agency, of a criminal offense consisting of a felony relating to fraud, theft, embezzlement, breach of fiduciary responsibility, or other financial misconduct.".

(2) CONFORMING AMENDMENT.—Paragraph (1) of section 1128(b) (42 U.S.C. 1320a–7(b)) is amended to read as follows:

"(1) CONVICTION RELATING TO FRAUD.—Any individual or entity that has been convicted for an offense which occurred after the date of the enactment of the Health Insurance Portability and Accountability Act of 1996, under Federal or State law—

"(A) of a criminal offense consisting of a misdemeanor relating to fraud, theft, embezzlement, breach of fiduciary responsibility, or other financial misconduct—

"(i) in connection with the delivery of a health care item or service, or

"(ii) with respect to any act or omission in a health care program (other than those specifically described in subsection (a)(1)) operated by or financed in whole or in part by any Federal, State, or local government agency; or

"(B) of a criminal offense relating to fraud, theft, embezzlement, breach of fiduciary responsibility, or other financial misconduct with respect to any act or omission in a program (other than a health care program) operated by or financed in whole or in part by any Federal, State, or local government agency.".

(b) INDIVIDUAL CONVICTED OF FELONY RELATING TO CONTROLLED SUBSTANCE.—

(1) IN GENERAL.—Section 1128(a) (42 U.S.C. 1320a–7(a)), as amended by subsection (a), is amended by adding at the end the following new paragraph:

"(4) FELONY CONVICTION RELATING TO CONTROLLED SUBSTANCE.—Any individual or entity that has been convicted for an offense which occurred after the date of the enactment of the Health Insurance Portability and Accountability Act of 1996, under Federal or State law, of a criminal offense consisting of a felony relating to the unlawful manufacture, distribution, prescription, or dispensing of a controlled substance.".

(2) CONFORMING AMENDMENT.—Section 1128(b)(3) (42 U.S.C. 1320a–7(b)(3)) is amended—

(A) in the heading, by striking "CONVICTION" and inserting "MISDEMEANOR CONVICTION"; and

(B) by striking "criminal offense" and inserting "criminal offense consisting of a misdemeanor".

<< 42 USCA § 1320a–7 >>

SEC. 212. ESTABLISHMENT OF MINIMUM PERIOD OF EXCLUSION FOR CERTAIN INDIVIDUALS AND ENTITIES SUBJECT TO PERMISSIVE EXCLUSION FROM MEDICARE AND STATE HEALTH CARE PROGRAMS.

Section 1128(c)(3) (42 U.S.C. 1320a–7(c)(3)) is amended by adding at the end the following new subparagraphs:

"(D) In the case of an exclusion of an individual or entity under paragraph (1), (2), or (3) of subsection (b), the period of the exclusion shall be 3 years, unless the Secretary determines in accordance with published regulations that a shorter period is appropriate because of mitigating circumstances or that a longer period is appropriate because of aggravating circumstances.

"(E) In the case of an exclusion of an individual or entity under subsection (b)(4) or (b)(5), the period of the exclusion shall not be less than the period during which the individual's or entity's license to provide health care is revoked, suspended, or surrendered, or the individual or the entity is excluded or suspended from a Federal or State health care program.

"(F) In the case of an exclusion of an individual or entity under subsection (b)(6)(B), the period of the exclusion shall be not less than 1 year.".

<< 42 USCA § 1320a–7 >>

SEC. 213. PERMISSIVE EXCLUSION OF INDIVIDUALS WITH OWNERSHIP OR CONTROL INTEREST IN SANCTIONED ENTITIES.

Section 1128(b) (42 U.S.C. 1320a–7(b)) is amended by adding at the end the following new paragraph:

"(15) INDIVIDUALS CONTROLLING A SANCTIONED ENTITY.—

(A) Any individual—

"(i) who has a direct or indirect ownership or control interest in a sanctioned entity and who knows or should know (as defined in section 1128A(i)(6)) of the action constituting the basis for the conviction or exclusion described in subparagraph (B); or

"(ii) who is an officer or managing employee (as defined in section 1126(b)) of such an entity.

"(B) For purposes of subparagraph (A), the term 'sanctioned entity' means an entity—

"(i) that has been convicted of any offense described in subsection (a) or in paragraph (1), (2), or (3) of this subsection; or

"(ii) that has been excluded from participation under a program under title XVIII or under a State health care program.".

<< 42 USCA § 1320c–5 >>

SEC. 214. SANCTIONS AGAINST PRACTITIONERS AND PERSONS FOR FAILURE TO COMPLY WITH STATUTORY OBLIGATIONS.

(a) MINIMUM PERIOD OF EXCLUSION FOR PRACTITIONERS AND PERSONS FAILING TO MEET STATUTORY OBLIGATIONS.—

(1) IN GENERAL.—The second sentence of section 1156(b)(1) (42 U.S.C. 1320c–5(b)(1)) is amended by striking "may prescribe)" and inserting "may prescribe, except that such period may not be less than 1 year)".

(2) CONFORMING AMENDMENT.—Section 1156(b)(2) (42 U.S.C. 1320c–5(b)(2)) is amended by striking "shall remain" and inserting "shall (subject to the minimum period specified in the second sentence of paragraph (1)) remain".

(b) REPEAL OF "UNWILLING OR UNABLE" CONDITION FOR IMPOSITION OF SANCTION.—Section 1156(b)(1) (42 U.S.C. 1320c–5(b)(1)) is amended—

(1) in the second sentence, by striking "and determines" and all that follows through "such obligations,"; and

(2) by striking the third sentence.

SEC. 215. INTERMEDIATE SANCTIONS FOR MEDICARE HEALTH MAINTENANCE ORGANIZATIONS.

<< 42 USCA § 1395mm >>

(a) APPLICATION OF INTERMEDIATE SANCTIONS FOR ANY PROGRAM VIOLATIONS.—

(1) IN GENERAL.—Section 1876(i)(1) (42 U.S.C. 1395mm(i)(1)) is amended by striking "the Secretary may terminate" and all that follows and inserting "in accordance with procedures established under paragraph (9), the Secretary may at any time

terminate any such contract or may impose the intermediate sanctions described in paragraph (6)(B) or (6)(C) (whichever is applicable) on the eligible organization if the Secretary determines that the organization—

"(A) has failed substantially to carry out the contract;

"(B) is carrying out the contract in a manner substantially inconsistent with the efficient and effective administration of this section; or

"(C) no longer substantially meets the applicable conditions of subsections (b), (c), (e), and (f).".

(2) OTHER INTERMEDIATE SANCTIONS FOR MISCELLANEOUS PROGRAM VIOLATIONS.—Section 1876(i)(6) (42 U.S.C. 1395mm(i)(6)) is amended by adding at the end the following new subparagraph:

"(C) In the case of an eligible organization for which the Secretary makes a determination under paragraph (1), the basis of which is not described in subparagraph (A), the Secretary may apply the following intermediate sanctions:

"(i) Civil money penalties of not more than $25,000 for each determination under paragraph (1) if the deficiency that is the basis of the determination has directly adversely affected (or has the substantial likelihood of adversely affecting) an individual covered under the organization's contract.

"(ii) Civil money penalties of not more than $10,000 for each week beginning after the initiation of procedures by the Secretary under paragraph (9) during which the deficiency that is the basis of a determination under paragraph (1) exists.

"(iii) Suspension of enrollment of individuals under this section after the date the Secretary notifies the organization of a determination under paragraph (1) and until the Secretary is satisfied that the deficiency that is the basis for the determination has been corrected and is not likely to recur.".

(3) PROCEDURES FOR IMPOSING SANCTIONS.—Section 1876(i) (42 U.S.C. 1395mm(i)) is amended by adding at the end the following new paragraph:

"(9) The Secretary may terminate a contract with an eligible organization under this section or may impose the intermediate sanctions described in paragraph (6) on the organization in accordance with formal investigation and compliance procedures established by the Secretary under which—

"(A) the Secretary first provides the organization with the reasonable opportunity to develop and implement a corrective action plan to correct the deficiencies that were the basis of the Secretary's determination under paragraph (1) and the organization fails to develop or implement such a plan;

"(B) in deciding whether to impose sanctions, the Secretary considers aggravating factors such as whether an organization has a history of deficiencies or has not taken action to correct deficiencies the Secretary has brought to the organization's attention;

"(C) there are no unreasonable or unnecessary delays between the finding of a deficiency and the imposition of sanctions; and

"(D) the Secretary provides the organization with reasonable notice and opportunity for hearing (including the right to appeal an initial decision) before imposing any sanction or terminating the contract.".

(4) CONFORMING AMENDMENTS.—Section 1876(i)(6)(B) (42 U.S.C. 1395mm(i)(6)(B)) is amended by striking the second sentence.

(b) AGREEMENTS WITH PEER REVIEW ORGANIZATIONS.—Section 1876(i)(7)(A) (42 U.S.C. 1395mm(i)(7)(A)) is amended by striking "an agreement" and inserting "a written agreement".

<< 42 USCA § 1395mm NOTE >>

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to contract years beginning on or after January 1, 1997.

SEC. 216. ADDITIONAL EXCEPTION TO ANTI–KICKBACK PENALTIES FOR RISK-SHARING ARRANGEMENTS.

<< 42 USCA § 1320a–7b >>

(a) IN GENERAL.—Section 1128B(b)(3) (42 U.S.C. 1320a–7b(b)(3)) is amended—

(1) by striking "and" at the end of subparagraph (D);

(2) by striking the period at the end of subparagraph (E) and inserting "; and"; and

(3) by adding at the end the following new subparagraph:

"(F) any remuneration between an organization and an individual or entity providing items or services, or a combination thereof, pursuant to a written agreement between the organization and the individual or entity if the organization is an eligible

organization under section 1876 or if the written agreement, through a risk-sharing arrangement, places the individual or entity at substantial financial risk for the cost or utilization of the items or services, or a combination thereof, which the individual or entity is obligated to provide.".

<< 42 USCA § 1320a–7b NOTE >>

(b) NEGOTIATED RULEMAKING FOR RISK–SHARING EXCEPTION.—

(1) ESTABLISHMENT.—

(A) IN GENERAL.—The Secretary of Health and Human Services (in this subsection referred to as the "Secretary") shall establish, on an expedited basis and using a negotiated rulemaking process under subchapter 3 of chapter 5 of title 5, United States Code, standards relating to the exception for risk-sharing arrangements to the antikickback penalties described in section 1128B(b)(3)(F) of the Social Security Act, as added by subsection (a).

(B) FACTORS TO CONSIDER.—In establishing standards relating to the exception for risk-sharing arrangements to the anti-kickback penalties under subparagraph (A), the Secretary—

(i) shall consult with the Attorney General and representatives of the hospital, physician, other health practitioner, and health plan communities, and other interested parties; and

(ii) shall take into account—

(I) the level of risk appropriate to the size and type of arrangement;

(II) the frequency of assessment and distribution of incentives;

(III) the level of capital contribution; and

(IV) the extent to which the risk-sharing arrangement provides incentives to control the cost and quality of health care services.

(2) PUBLICATION OF NOTICE.—In carrying out the rule-making process under this subsection, the Secretary shall publish the notice provided for under section 564(a) of title 5, United States Code, by not later than 45 days after the date of the enactment of this Act.

(3) TARGET DATE FOR PUBLICATION OF RULE.—As part of the notice under paragraph (2), and for purposes of this subsection, the "target date for publication" (referred to in section 564(a)(5) of such title) shall be January 1, 1997.

(4) ABBREVIATED PERIOD FOR SUBMISSION OF COMMENTS.—In applying section 564(c) of such title under this subsection, "15 days" shall be substituted for "30 days".

(5) APPOINTMENT OF NEGOTIATED RULEMAKING COMMITTEE AND FACILITATOR.—The Secretary shall provide for—

(A) the appointment of a negotiated rulemaking committee under section 565(a) of such title by not later than 30 days after the end of the comment period provided for under section 564(c) of such title (as shortened under paragraph (4)), and

(B) the nomination of a facilitator under section 566(c) of such title by not later than 10 days after the date of appointment of the committee.

(6) PRELIMINARY COMMITTEE REPORT.—The negotiated rule-making committee appointed under paragraph (5) shall report to the Secretary, by not later than October 1, 1996, regarding the committee's progress on achieving a consensus with regard to the rulemaking proceeding and whether such consensus is likely to occur before one month before the target date for publication of the rule. If the committee reports that the committee has failed to make significant progress toward such consensus or is unlikely to reach such consensus by the target date, the Secretary may terminate such process and provide for the publication of a rule under this subsection through such other methods as the Secretary may provide.

(7) FINAL COMMITTEE REPORT.—If the committee is not terminated under paragraph (6), the rulemaking committee shall submit a report containing a proposed rule by not later than one month before the target publication date.

(8) INTERIM, FINAL EFFECT.—The Secretary shall publish a rule under this subsection in the Federal Register by not later than the target publication date. Such rule shall be effective and final immediately on an interim basis, but is subject to change and revision after public notice and opportunity for a period (of not less than 60 days) for public comment. In connection with such rule, the Secretary shall specify the process for the timely review and approval of applications of entities to be certified as provider-sponsored organizations pursuant to such rules and consistent with this subsection.

(9) PUBLICATION OF RULE AFTER PUBLIC COMMENT.—The Secretary shall provide for consideration of such comments and republication of such rule by not later than 1 year after the target publication date.

<< 42 USCA § 1320a–7b NOTE >>

(c) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to written agreements entered into on or after January 1, 1997, without regard to whether regulations have been issued to implement such amendments.

<< 42 USCA § 1320a–7b >>

SEC. 217. CRIMINAL PENALTY FOR FRAUDULENT DISPOSITION OF ASSETS IN ORDER TO OBTAIN MEDICAID BENEFITS.

Section 1128B(a) (42 U.S.C. 1320a–7b(a)) is amended—

(1) by striking "or" at the end of paragraph (4);

(2) by adding "or" at the end of paragraph (5); and

(3) by inserting after paragraph (5) the following new paragraph:

"(6) knowingly and willfully disposes of assets (including by any transfer in trust) in order for an individual to become eligible for medical assistance under a State plan under title XIX, if disposing of the assets results in the imposition of a period of ineligibility for such assistance under section 1917(c),".

<< 42 USCA §§ 1320a–7 NOTE, 1320a–7b nt, 1320c–5 nt, 1395mm nt >>

SEC. 218. EFFECTIVE DATE.

Except as otherwise provided, the amendments made by this subtitle shall take effect January 1, 1997.

Subtitle C—Data Collection

SEC. 221. ESTABLISHMENT OF THE HEALTH CARE FRAUD AND ABUSE DATA COLLECTION PROGRAM.

(a) IN GENERAL.—Title XI (42 U.S.C. 1301 et seq.), as amended by sections 201 and 205, is amended by inserting after section 1128D the following new section:

<< 42 USCA § 1320a–7e >>

"HEALTH CARE FRAUD AND ABUSE DATA COLLECTION PROGRAM

"SEC. 1128E. (a) GENERAL PURPOSE.—Not later than January 1, 1997, the Secretary shall establish a national health care fraud and abuse data collection program for the reporting of final adverse actions (not including settlements in which no findings of liability have been made) against health care providers, suppliers, or practitioners as required by subsection (b), with access as set forth in subsection (c), and shall maintain a database of the information collected under this section.

"(b) REPORTING OF INFORMATION.—

"(1) IN GENERAL.—Each Government agency and health plan shall report any final adverse action (not including settlements in which no findings of liability have been made) taken against a health care provider, supplier, or practitioner.

"(2) INFORMATION TO BE REPORTED.—The information to be reported under paragraph (1) includes:

"(A) The name and TIN (as defined in section 7701(a)(41) of the Internal Revenue Code of 1986) of any health care provider, supplier, or practitioner who is the subject of a final adverse action.

"(B) The name (if known) of any health care entity with which a health care provider, supplier, or practitioner, who is the subject of a final adverse action, is affiliated or associated.

"(C) The nature of the final adverse action and whether such action is on appeal.

"(D) A description of the acts or omissions and injuries upon which the final adverse action was based, and such other information as the Secretary determines by regulation is required for appropriate interpretation of information reported under this section.

"(3) CONFIDENTIALITY.—In determining what information is required, the Secretary shall include procedures to assure that the privacy of individuals receiving health care services is appropriately protected.

"(4) TIMING AND FORM OF REPORTING.—The information required to be reported under this subsection shall be reported regularly (but not less often than monthly) and in such form and manner as the Secretary prescribes. Such information shall first be required to be reported on a date specified by the Secretary.

"(5) TO WHOM REPORTED.—The information required to be reported under this subsection shall be reported to the Secretary.

"(c) DISCLOSURE AND CORRECTION OF INFORMATION.—

"(1) DISCLOSURE.—With respect to the information about final adverse actions (not including settlements in which no findings of liability have been made) reported to the Secretary under this section with respect to a health care provider, supplier, or practitioner, the Secretary shall, by regulation, provide for—

"(A) disclosure of the information, upon request, to the health care provider, supplier, or licensed practitioner, and

"(B) procedures in the case of disputed accuracy of the information.

"(2) CORRECTIONS.—Each Government agency and health plan shall report corrections of information already reported about any final adverse action taken against a health care provider, supplier, or practitioner, in such form and manner that the Secretary prescribes by regulation.

"(d) ACCESS TO REPORTED INFORMATION.—

"(1) AVAILABILITY.—The information in the database maintained under this section shall be available to Federal and State government agencies and health plans pursuant to procedures that the Secretary shall provide by regulation.

"(2) FEES FOR DISCLOSURE.—The Secretary may establish or approve reasonable fees for the disclosure of information in such database (other than with respect to requests by Federal agencies). The amount of such a fee shall be sufficient to recover the full costs of operating the database. Such fees shall be available to the Secretary or, in the Secretary's discretion to the agency designated under this section to cover such costs.

"(e) PROTECTION FROM LIABILITY FOR REPORTING.—No person or entity, including the agency designated by the Secretary in subsection (b)(5) shall be held liable in any civil action with respect to any report made as required by this section, without knowledge of the falsity of the information contained in the report.

"(f) COORDINATION WITH NATIONAL PRACTITIONER DATA BANK.—The Secretary shall implement this section in such a manner as to avoid duplication with the reporting requirements established for the National Practitioner Data Bank under the Health Care Quality Improvement Act of 1986 (42 U.S.C. 11101 et seq.).

"(g) DEFINITIONS AND SPECIAL RULES.—For purposes of this section:

"(1) FINAL ADVERSE ACTION.—

"(A) IN GENERAL.—The term 'final adverse action' includes:

"(i) Civil judgments against a health care provider, supplier, or practitioner in Federal or State court related to the delivery of a health care item or service.

"(ii) Federal or State criminal convictions related to the delivery of a health care item or service.

"(iii) Actions by Federal or State agencies responsible for the licensing and certification of health care providers, suppliers, and licensed health care practitioners, including—

"(I) formal or official actions, such as revocation or suspension of a license (and the length of any such suspension), reprimand, censure or probation,

"(II) any other loss of license or the right to apply for, or renew, a license of the provider, supplier, or practitioner, whether by operation of law, voluntary surrender, non-renewability, or otherwise, or

"(III) any other negative action or finding by such Federal or State agency that is publicly available information.

"(iv) Exclusion from participation in Federal or State health care programs (as defined in sections 1128B(f) and 1128(h), respectively).

"(v) Any other adjudicated actions or decisions that the Secretary shall establish by regulation.

"(B) EXCEPTION.—The term does not include any action with respect to a malpractice claim.

"(2) PRACTITIONER.—The terms 'licensed health care practitioner', 'licensed practitioner', and 'practitioner' mean, with respect to a State, an individual who is licensed or otherwise authorized by the State to provide health care services (or any individual who, without authority holds himself or herself out to be so licensed or authorized).

"(3) GOVERNMENT AGENCY.—The term 'Government agency' shall include:

"(A) The Department of Justice.

"(B) The Department of Health and Human Services.

"(C) Any other Federal agency that either administers or provides payment for the delivery of health care services, including, but not limited to the Department of Defense and the Veterans' Administration.

"(D) State law enforcement agencies.

"(E) State medicaid fraud control units.

"(F) Federal or State agencies responsible for the licensing and certification of health care providers and licensed health care practitioners.

"(4) HEALTH PLAN.—The term 'health plan' has the meaning given such term by section 1128C(c).

"(5) DETERMINATION OF CONVICTION.—For purposes of paragraph (1), the existence of a conviction shall be determined under paragraph (4) of section 1128(i).".

<< 42 USCA § 1395u >>

(b) IMPROVED PREVENTION IN ISSUANCE OF MEDICARE PROVIDER NUMBERS.—Section 1842(r) (42 U.S.C. 1395u(r)) is amended by adding at the end the following new sentence: "Under such system, the Secretary may impose appropriate fees on such physicians to cover the costs of investigation and recertification activities with respect to the issuance of the identifiers.".

Subtitle D—Civil Monetary Penalties

SEC. 231. SOCIAL SECURITY ACT CIVIL MONETARY PENALTIES.

<< 42 USCA § 1320a–7a >>

(a) GENERAL CIVIL MONETARY PENALTIES.—Section 1128A (42 U.S.C. 1320a–7a) is amended as follows:

(1) In the third sentence of subsection (a), by striking "programs under title XVIII" and inserting "Federal health care programs (as defined in section 1128B(f)(1))".

(2) In subsection (f)—

(A) by redesignating paragraph (3) as paragraph (4); and

(B) by inserting after paragraph (2) the following new paragraph:

"(3) With respect to amounts recovered arising out of a claim under a Federal health care program (as defined in section 1128B(f)), the portion of such amounts as is determined to have been paid by the program shall be repaid to the program, and the portion of such amounts attributable to the amounts recovered under this section by reason of the amendments made by the Health Insurance Portability and Accountability Act of 1996 (as estimated by the Secretary) shall be deposited into the Federal Hospital Insurance Trust Fund pursuant to section 1817(k)(2)(C).".

(3) In subsection (i)—

(A) in paragraph (2), by striking "title V, XVIII, XIX, or XX of this Act" and inserting "a Federal health care program (as defined in section 1128B(f))",

(B) in paragraph (4), by striking "a health insurance or medical services program under title XVIII or XIX of this Act" and inserting "a Federal health care program (as so defined)", and

(C) in paragraph (5), by striking "title V, XVIII, XIX, or XX" and inserting "a Federal health care program (as so defined)".

(4) By adding at the end the following new subsection:

"(m)(1) For purposes of this section, with respect to a Federal health care program not contained in this Act, references to the Secretary in this section shall be deemed to be references to the Secretary or Administrator of the department or agency with jurisdiction over such program and references to the Inspector General of the Department of Health and Human Services in this section shall be deemed to be references to the Inspector General of the applicable department or agency.

"(2)(A) The Secretary and Administrator of the departments and agencies referred to in paragraph (1) may include in any action pursuant to this section, claims within the jurisdiction of other Federal departments or agencies as long as the following conditions are satisfied:

"(i) The case involves primarily claims submitted to the Federal health care programs of the department or agency initiating the action.

"(ii) The Secretary or Administrator of the department or agency initiating the action gives notice and an opportunity to participate in the investigation to the Inspector General of the department or agency with primary jurisdiction over the Federal health care programs to which the claims were submitted.

"(B) If the conditions specified in subparagraph (A) are fulfilled, the Inspector General of the department or agency initiating the action is authorized to exercise all powers granted under the Inspector General Act of 1978 (5 U.S.C.App.) with respect to the claims submitted to the other departments or agencies to the same manner and extent as provided in that Act with respect to claims submitted to such departments or agencies.".

(b) EXCLUDED INDIVIDUAL RETAINING OWNERSHIP OR CONTROL INTEREST IN PARTICIPATING ENTITY.—Section 1128A(a) (42 U.S.C. 1320a–7a(a)) is amended—

(1) by striking "or" at the end of paragraph (1)(D);

(2) by striking ", or" at the end of paragraph (2) and inserting a semicolon;

(3) by striking the semicolon at the end of paragraph (3) and inserting "; or"; and

(4) by inserting after paragraph (3) the following new paragraph:

"(4) in the case of a person who is not an organization, agency, or other entity, is excluded from participating in a program under title XVIII or a State health care program in accordance with this subsection or under section 1128 and who, at the time of a violation of this subsection—

"(A) retains a direct or indirect ownership or control interest in an entity that is participating in a program under title XVIII or a State health care program, and who knows or should know of the action constituting the basis for the exclusion; or

"(B) is an officer or managing employee (as defined in section 1126(b)) of such an entity;".

(c) MODIFICATIONS OF AMOUNTS OF PENALTIES AND ASSESSMENTS.—Section 1128A(a) (42 U.S.C. 1320a–7a(a)), as amended by subsection (b), is amended in the matter following paragraph (4)—

(1) by striking "$2,000" and inserting "$10,000";

(2) by inserting "; in cases under paragraph (4), $10,000 for each day the prohibited relationship occurs" after "false or misleading information was given"; and

(3) by striking "twice the amount" and inserting "3 times the amount".

(d) CLARIFICATION OF LEVEL OF KNOWLEDGE REQUIRED FOR IMPOSITION OF CIVIL MONETARY PENALTIES.—

(1) IN GENERAL.—Section 1128A(a) (42 U.S.C. 1320a–7a(a)) is amended—

(A) in paragraphs (1) and (2), by inserting "knowingly" before "presents" each place it appears; and

(B) in paragraph (3), by striking "gives" and inserting "knowingly gives or causes to be given".

(2) DEFINITION OF STANDARD.—Section 1128A(i) (42 U.S.C. 1320a–7a(i)), as amended by subsection (h)(2), is amended by adding at the end the following new paragraph:

"(7) The term 'should know' means that a person, with respect to information—

"(A) acts in deliberate ignorance of the truth or falsity of the information; or

"(B) acts in reckless disregard of the truth or falsity of the information,

and no proof of specific intent to defraud is required.".

(e) CLAIM FOR ITEM OR SERVICE BASED ON INCORRECT CODING OR MEDICALLY UNNECESSARY SERVICES.—Section 1128A(a)(1) (42 U.S.C. 1320a–7a(a)(1)), as amended by subsection (b), is amended—

(1) in subparagraph (A) by striking "claimed," and inserting "claimed, including any person who engages in a pattern or practice of presenting or causing to be presented a claim for an item or service that is based on a code that the person knows or should know will result in a greater payment to the person than the code the person knows or should know is applicable to the item or service actually provided,";

(2) in subparagraph (C), by striking "or" at the end;

(3) in subparagraph (D), by striking the semicolon and inserting ", or"; and

(4) by inserting after subparagraph (D) the following new subparagraph:

"(E) is for a pattern of medical or other items or services that a person knows or should know are not medically necessary;".

(f) SANCTIONS AGAINST PRACTITIONERS AND PERSONS FOR FAILURE TO COMPLY WITH STATUTORY OBLIGATIONS.—Section 1156(b)(3) (42 U.S.C. 1320c–5(b)(3)) is amended by striking "the actual or estimated cost" and inserting "up to $10,000 for each instance".

<< 42 USCA § 1395mm >>

(g) PROCEDURAL PROVISIONS.—Section 1876(i)(6) (42 U.S.C. 1395mm(i)(6)), as amended by section 215(a)(2), is amended by adding at the end the following new subparagraph:

"(D) The provisions of section 1128A (other than subsections (a) and (b)) shall apply to a civil money penalty under subparagraph (B)(i) or (C)(i) in the same manner as such provisions apply to a civil money penalty or proceeding under section 1128A(a).".

<< 42 USCA § 1320a–7a >>

(h) PROHIBITION AGAINST OFFERING INDUCEMENTS TO INDIVIDUALS ENROLLED UNDER PROGRAMS OR PLANS.—

(1) OFFER OF REMUNERATION.—Section 1128A(a) (42 U.S.C. 1320a–7a(a)), as amended by subsection (b), is amended —

(A) by striking "or" at the end of paragraph (3);

(B) by striking the semicolon at the end of paragraph (4) and inserting "; or"; and

(C) by inserting after paragraph (4) the following new paragraph:

"(5) offers to or transfers remuneration to any individual eligible for benefits under title XVIII of this Act, or under a State health care program (as defined in section 1128(h)) that such person knows or should know is likely to influence such individual to order or receive from a particular provider, practitioner, or supplier any item or service for which payment may be made, in whole or in part, under title XVIII, or a State health care program (as so defined);".

(2) REMUNERATION DEFINED.—Section 1128A(i) (42 U.S.C. 1320a–7a(i)) is amended by adding at the end the following new paragraph:

"(6) The term 'remuneration' includes the waiver of coinsurance and deductible amounts (or any part thereof), and transfers of items or services for free or for other than fair market value. The term 'remuneration' does not include—

"(A) the waiver of coinsurance and deductible amounts by a person, if—

"(i) the waiver is not offered as part of any advertisement or solicitation;

"(ii) the person does not routinely waive coinsurance or deductible amounts; and

"(iii) the person—

"(I) waives the coinsurance and deductible amounts after determining in good faith that the individual is in financial need;

"(II) fails to collect coinsurance or deductible amounts after making reasonable collection efforts; or

"(III) provides for any permissible waiver as specified in section 1128B(b)(3) or in regulations issued by the Secretary;

"(B) differentials in coinsurance and deductible amounts as part of a benefit plan design as long as the differentials have been disclosed in writing to all beneficiaries, third party payers, and providers, to whom claims are presented and as long as the differentials meet the standards as defined in regulations promulgated by the Secretary not later than 180 days after the date of the enactment of the Health Insurance Portability and Accountability Act of 1996; or

"(C) incentives given to individuals to promote the delivery of preventive care as determined by the Secretary in regulations so promulgated.".

<< 42 USCA §§ 1320a–7a NOTE, 1320c–5 nt, 1395mm nt >>

(i) EFFECTIVE DATE.—The amendments made by this section shall apply to acts or omissions occurring on or after January 1, 1997.

SEC. 232. PENALTY FOR FALSE CERTIFICATION FOR HOME HEALTH SERVICES.

<< 42 USCA § 1320a–7a >>

(a) IN GENERAL.—Section 1128A(b) (42 U.S.C. 1320a–7a(b)) is amended by adding at the end the following new paragraph:

"(3)(A) Any physician who executes a document described in subparagraph (B) with respect to an individual knowing that all of the requirements referred to in such subparagraph are not met with respect to the individual shall be subject to a civil monetary penalty of not more than the greater of—

"(i) $5,000, or

"(ii) three times the amount of the payments under title XVIII for home health services which are made pursuant to such certification.

"(B) A document described in this subparagraph is any document that certifies, for purposes of title XVIII, that an individual meets the requirements of section 1814(a)(2)(C) or 1835(a)(2)(A) in the case of home health services furnished to the individual.".

<< 42 USCA § 1320a–7a NOTE >>

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to certifications made on or after the date of the enactment of this Act.

Subtitle E—Revisions to Criminal Law

SEC. 241. DEFINITIONS RELATING TO FEDERAL HEALTH CARE OFFENSE.

<< 18 USCA § 24 >>

(a) IN GENERAL.—Chapter 1 of title 18, United States Code, is amended by adding at the end the following:

"§ 24. Definitions relating to Federal health care offense

"(a) As used in this title, the term 'Federal health care offense' means a violation of, or a criminal conspiracy to violate—

"(1) section 669, 1035, 1347, or 1518 of this title;

"(2) section 287, 371, 664, 666, 1001, 1027, 1341, 1343, or 1954 of this title, if the violation or conspiracy relates to a health care benefit program.

"(b) As used in this title, the term 'health care benefit program' means any public or private plan or contract, affecting commerce, under which any medical benefit, item, or service is provided to any individual, and includes any individual or entity who is providing a medical benefit, item, or service for which payment may be made under the plan or contract.".

<< 18 USCA Ch. 1 >>

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 2 of title 18, United States Code, is amended by inserting after the item relating to section 23 the following new item:

"24. Definitions relating to Federal health care offense.".

SEC. 242. HEALTH CARE FRAUD.

(a) OFFENSE.—

(1) IN GENERAL.—Chapter 63 of title 18, United States Code, is amended by adding at the end the following:

<< 18 USCA § 1347 >>

"§ 1347. Health care fraud

"Whoever knowingly and willfully executes, or attempts to execute, a scheme or artifice—

"(1) to defraud any health care benefit program; or

"(2) to obtain, by means of false or fraudulent pretenses, representations, or promises, any of the money or property owned by, or under the custody or control of, any health care benefit program,

in connection with the delivery of or payment for health care benefits, items, or services, shall be fined under this title or imprisoned not more than 10 years, or both. If the violation results in serious bodily injury (as defined in section 1365 of this title), such person shall be fined under this title or imprisoned not more than 20 years, or both; and if the violation results in death, such person shall be fined under this title, or imprisoned for any term of years or for life, or both.".

(2) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 63 of title 18, United States Code, is amended by adding at the end the following:

<< 18 USCA Ch. 63 >>

"1347. Health care fraud.".

<< 42 USCA § 1395i NOTE >>

(b) CRIMINAL FINES DEPOSITED IN FEDERAL HOSPITAL INSURANCE TRUST FUND.—The Secretary of the Treasury shall deposit into the Federal Hospital Insurance Trust Fund pursuant to section 1817(k)(2)(C) of the Social Security Act (42 U.S.C. 1395i) an amount equal to the criminal fines imposed under section 1347 of title 18, United States Code (relating to health care fraud).

SEC. 243. THEFT OR EMBEZZLEMENT.

<< 18 USCA § 669 >>

(a) IN GENERAL.—Chapter 31 of title 18, United States Code, is amended by adding at the end the following:

"§ 669. Theft or embezzlement in connection with health care

"(a) Whoever knowingly and willfully embezzles, steals, or otherwise without authority converts to the use of any person other than the rightful owner, or intentionally misapplies any of the moneys, funds, securities, premiums, credits, property, or other assets of a health care benefit program, shall be fined under this title or imprisoned not more than 10 years, or both; but if the value of such property does not exceed the sum of $100 the defendant shall be fined under this title or imprisoned not more than one year, or both.

"(b) As used in this section, the term 'health care benefit program' has the meaning given such term in section 24(b) of this title.".

<< 18 USCA Ch. 31 >>

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 31 of title 18, United States Code, is amended by adding at the end the following:

"669. Theft or embezzlement in connection with health care.".

SEC. 244. FALSE STATEMENTS.

<< 18 USCA § 1035 >>

(a) IN GENERAL.—Chapter 47 of title 18, United States Code, is amended by adding at the end the following:

"§ 1035. False statements relating to health care matters

"(a) Whoever, in any matter involving a health care benefit program, knowingly and willfully—

"(1) falsifies, conceals, or covers up by any trick, scheme, or device a material fact; or

"(2) makes any materially false, fictitious, or fraudulent statements or representations, or makes or uses any materially false writing or document knowing the same to contain any materially false, fictitious, or fraudulent statement or entry,

in connection with the delivery of or payment for health care benefits, items, or services, shall be fined under this title or imprisoned not more than 5 years, or both.

"(b) As used in this section, the term 'health care benefit program' has the meaning given such term in section 24(b) of this title.".

<< 18 USCA Ch. 47 >>

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 47 of title 18, United States Code, is amended by adding at the end the following new item:

"1035. False statements relating to health care matters.".

SEC. 245. OBSTRUCTION OF CRIMINAL INVESTIGATIONS OF HEALTH CARE OFFENSES.

<< 18 USCA § 1518 >>

(a) IN GENERAL.—Chapter 73 of title 18, United States Code, is amended by adding at the end the following:

"§ 1518. Obstruction of criminal investigations of health care offenses

"(a) Whoever willfully prevents, obstructs, misleads, delays or attempts to prevent, obstruct, mislead, or delay the communication of information or records relating to a violation of a Federal health care offense to a criminal investigator shall be fined under this title or imprisoned not more than 5 years, or both.

"(b) As used in this section the term 'criminal investigator' means any individual duly authorized by a department, agency, or armed force of the United States to conduct or engage in investigations for prosecutions for violations of health care offenses.".

<< 18 USCA Ch. 73 >>

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 73 of title 18, United States Code, is amended by adding at the end the following new item:

"1518. Obstruction of criminal investigations of health care offenses.".

<< 18 USCA § 1956 >>

SEC. 246. LAUNDERING OF MONETARY INSTRUMENTS.

Section 1956(c)(7) of title 18, United States Code, is amended by adding at the end the following:

"(F) Any act or activity constituting an offense involving a Federal health care offense.".

<< 18 USCA § 1345 >>

SEC. 247. INJUNCTIVE RELIEF RELATING TO HEALTH CARE OFFENSES.

(a) IN GENERAL.—Section 1345(a)(1) of title 18, United States Code, is amended—

(1) by striking "or" at the end of subparagraph (A);

(2) by inserting "or" at the end of subparagraph (B); and

(3) by adding at the end the following:

"(C) committing or about to commit a Federal health care offense.".

(b) FREEZING OF ASSETS.—Section 1345(a)(2) of title 18, United States Code, is amended by inserting "or a Federal health care offense" after "title)".

SEC. 248. AUTHORIZED INVESTIGATIVE DEMAND PROCEDURES.

<< 18 USCA § 3486 >>

(a) IN GENERAL.—Chapter 223 of title 18, United States Code, is amended by adding after section 3485 the following:

"§ 3486. Authorized investigative demand procedures

"(a) AUTHORIZATION.—(1) In any investigation relating to any act or activity involving a Federal health care offense, the Attorney General or the Attorney General's designee may issue in writing and cause to be served a subpoena—

"(A) requiring the production of any records (including any books, papers, documents, electronic media, or other objects or tangible things), which may be relevant to an authorized law enforcement inquiry, that a person or legal entity may possess or have care, custody, or control; or

"(B) requiring a custodian of records to give testimony concerning the production and authentication of such records.

"(2) A subpoena under this subsection shall describe the objects required to be produced and prescribe a return date within a reasonable period of time within which the objects can be assembled and made available.

"(3) The production of records shall not be required under this section at any place more than 500 miles distant from the place where the subpoena for the production of such records is served.

"(4) Witnesses summoned under this section shall be paid the same fees and mileage that are paid witnesses in the courts of the United States.

"(b) SERVICE.—A subpoena issued under this section may be served by any person who is at least 18 years of age and is designated in the subpoena to serve it. Service upon a natural person may be made by personal delivery of the subpoena to him. Service may be made upon a domestic or foreign corporation or upon a partnership or other unincorporated association which is subject to suit under a common name, by delivering the subpoena to an officer, to a managing or general agent, or to any other agent authorized by appointment or by law to receive service of process. The affidavit of the person serving the subpoena entered on a true copy thereof by the person serving it shall be proof of service.

"(c) ENFORCEMENT.—In the case of contumacy by or refusal to obey a subpoena issued to any person, the Attorney General may invoke the aid of any court of the United States within the jurisdiction of which the investigation is carried on or of which the subpoenaed person is an inhabitant, or in which he carries on business or may be found, to compel compliance with the subpoena. The court may issue an order requiring the subpoenaed person to appear before the Attorney General to produce records, if so ordered, or to give testimony concerning the production and authentication of such records. Any failure to obey the order of the court may be punished by the court as a contempt thereof. All process in any such case may be served in any judicial district in which such person may be found.

"(d) IMMUNITY FROM CIVIL LIABILITY.—Notwithstanding any Federal, State, or local law, any person, including officers, agents, and employees, receiving a summons under this section, who complies in good faith with the summons and thus produces the materials sought, shall not be liable in any court of any State or the United States to any customer or other person for such production or for nondisclosure of that production to the customer.

"(e) LIMITATION ON USE.—(1) Health information about an individual that is disclosed under this section may not be used in, or disclosed to any person for use in, any administrative, civil, or criminal action or investigation directed against the individual who is the subject of the information unless the action or investigation arises out of and is directly related to receipt of health care or payment for health care or action involving a fraudulent claim related to health; or if authorized by an appropriate order of a court of competent jurisdiction, granted after application showing good cause therefor.

"(2) In assessing good cause, the court shall weigh the public interest and the need for disclosure against the injury to the patient, to the physician-patient relationship, and to the treatment services.

"(3) Upon the granting of such order, the court, in determining the extent to which any disclosure of all or any part of any record is necessary, shall impose appropriate safeguards against unauthorized disclosure.".

<< 18 USCA Ch. 223 >>

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 223 of title 18, United States Code, is amended by inserting after the item relating to section 3485 the following new item:

"3486. Authorized investigative demand procedures.".

<< 18 USCA § 1510 >>

(c) CONFORMING AMENDMENT.—Section 1510(b)(3)(B) of title 18, United States Code, is amended by inserting "or a Department of Justice subpoena (issued under section 3486 of title 18)," after "subpoena".

SEC. 249. FORFEITURES FOR FEDERAL HEALTH CARE OFFENSES.

<< 18 USCA § 982 >>

(a) IN GENERAL.—Section 982(a) of title 18, United States Code, is amended by adding after paragraph (5) the following new paragraph:

"(6) The court, in imposing sentence on a person convicted of a Federal health care offense, shall order the person to forfeit property, real or personal, that constitutes or is derived, directly or indirectly, from gross proceeds traceable to the commission of the offense.".

(b) CONFORMING AMENDMENT.—Section 982(b)(1)(A) of title 18, United States Code, is amended by inserting "or (a)(6)" after "(a)(1)".

<< 42 USCA § 1395i NOTE >>

(c) PROPERTY FORFEITED DEPOSITED IN FEDERAL HOSPITAL INSURANCE TRUST FUND.—

(1) IN GENERAL.—After the payment of the costs of asset forfeiture has been made and after all restoration payments (if any) have been made, and notwithstanding any other provision of law, the Secretary of the Treasury shall deposit into the Federal Hospital Insurance Trust Fund pursuant to section 1817(k)(2)(C) of the Social Security Act, as added by section 301(b), an amount equal to the net amount realized from the forfeiture of property by reason of a Federal health care offense pursuant to section 982(a)(6) of title 18, United States Code.

(2) COSTS OF ASSET FORFEITURE.—For purposes of paragraph (1), the term "payment of the costs of asset forfeiture" means—

(A) the payment, at the discretion of the Attorney General, of any expenses necessary to seize, detain, inventory, safeguard, maintain, advertise, sell, or dispose of property under seizure, detention, or forfeited, or of any other necessary expenses incident to the seizure, detention, forfeiture, or disposal of such property, including payment for—

(i) contract services;

(ii) the employment of outside contractors to operate and manage properties or provide other specialized services necessary to dispose of such properties in an effort to maximize the return from such properties; and

(iii) reimbursement of any Federal, State, or local agency for any expenditures made to perform the functions described in this subparagraph;

(B) at the discretion of the Attorney General, the payment of awards for information or assistance leading to a civil or criminal forfeiture involving any Federal agency participating in the Health Care Fraud and Abuse Control Account;

(C) the compromise and payment of valid liens and mortgages against property that has been forfeited, subject to the discretion of the Attorney General to determine the validity of any such lien or mortgage and the amount of payment to be made, and the employment of attorneys and other personnel skilled in State real estate law as necessary;

(D) payment authorized in connection with remission or mitigation procedures relating to property forfeited; and

(E) the payment of State and local property taxes on forfeited real property that accrued between the date of the violation giving rise to the forfeiture and the date of the forfeiture order.

(3) RESTORATION PAYMENT.—Notwithstanding any other provision of law, if the Federal health care offense referred to in paragraph (1) resulted in a loss to an employee welfare benefit plan within the meaning of section 3(1) of the Employee Retirement Income Security Act of 1974, the Secretary of the Treasury shall transfer to such employee welfare benefit plan,

from the amount realized from the forfeiture of property referred to in paragraph (1), an amount equal to such loss. For purposes of paragraph (1), the term "restoration payment" means the amount transferred to an employee welfare benefit plan pursuant to this paragraph.

<< 29 USCA § 1136 NOTE >>

SEC. 250. RELATION TO ERISA AUTHORITY.

Nothing in this subtitle shall be construed as affecting the authority of the Secretary of Labor under section 506(b) of the Employee Retirement Income Security Act of 1974, including the Secretary's authority with respect to violations of title 18, United States Code (as amended by this subtitle).

Subtitle F—Administrative Simplification

<< 42 USCA § 1320d NOTE >>

SEC. 261. PURPOSE.

It is the purpose of this subtitle to improve the Medicare program under title XVIII of the Social Security Act, the medicaid program under title XIX of such Act, and the efficiency and effectiveness of the health care system, by encouraging the development of a health information system through the establishment of standards and requirements for the electronic transmission of certain health information.

SEC. 262. ADMINISTRATIVE SIMPLIFICATION.

(a) IN GENERAL.—Title XI (42 U.S.C. 1301 et seq.) is amended by adding at the end the following:

<< 42 USCA Ch. 7 >>

"PART C—ADMINISTRATIVE SIMPLIFICATION

<< 42 USCA § 1320d >>

"DEFINITIONS

"SEC. 1171. For purposes of this part:

"(1) CODE SET.—The term 'code set' means any set of codes used for encoding data elements, such as tables of terms, medical concepts, medical diagnostic codes, or medical procedure codes.

"(2) HEALTH CARE CLEARINGHOUSE.—The term 'health care clearinghouse' means a public or private entity that processes or facilitates the processing of nonstandard data elements of health information into standard data elements.

"(3) HEALTH CARE PROVIDER.—The term 'health care provider' includes a provider of services (as defined in section 1861(u)), a provider of medical or other health services (as defined in section 1861(s)), and any other person furnishing health care services or supplies.

"(4) HEALTH INFORMATION.—The term 'health information' means any information, whether oral or recorded in any form or medium, that—

"(A) is created or received by a health care provider, health plan, public health authority, employer, life insurer, school or university, or health care clearinghouse; and

"(B) relates to the past, present, or future physical or mental health or condition of an individual, the provision of health care to an individual, or the past, present, or future payment for the provision of health care to an individual.

"(5) HEALTH PLAN.—The term 'health plan' means an individual or group plan that provides, or pays the cost of, medical care (as such term is defined in section 2791 of the Public Health Service Act). Such term includes the following, and any combination thereof:

"(A) A group health plan (as defined in section 2791(a) of the Public Health Service Act), but only if the plan—

"(i) has 50 or more participants (as defined in section 3(7) of the Employee Retirement Income Security Act of 1974); or

"(ii) is administered by an entity other than the employer who established and maintains the plan.

"(B) A health insurance issuer (as defined in section 2791(b) of the Public Health Service Act).

"(C) A health maintenance organization (as defined in section 2791(b) of the Public Health Service Act).

"(D) Part A or part B of the Medicare program under title XVIII.

"(E) The medicaid program under title XIX.

"(F) A Medicare supplemental policy (as defined in section 1882(g)(1)).

"(G) A long-term care policy, including a nursing home fixed indemnity policy (unless the Secretary determines that such a policy does not provide sufficiently comprehensive coverage of a benefit so that the policy should be treated as a health plan).

"(H) An employee welfare benefit plan or any other arrangement which is established or maintained for the purpose of offering or providing health benefits to the employees of 2 or more employers.

"(I) The health care program for active military personnel under title 10, United States Code.

"(J) The veterans health care program under chapter 17 of title 38, United States Code.

"(K) The Civilian Health and Medical Program of the Uniformed Services (CHAMPUS), as defined in section 1072(4) of title 10, United States Code.

"(L) The Indian health service program under the Indian Health Care Improvement Act (25 U.S.C. 1601 et seq.).

"(M) The Federal Employees Health Benefit Plan under chapter 89 of title 5, United States Code.

"(6) INDIVIDUALLY IDENTIFIABLE HEALTH INFORMATION.—The term 'individually identifiable health information' means any information, including demographic information collected from an individual, that—

"(A) is created or received by a health care provider, health plan, employer, or health care clearinghouse; and

"(B) relates to the past, present, or future physical or mental health or condition of an individual, the provision of health care to an individual, or the past, present, or future payment for the provision of health care to an individual, and—

"(i) identifies the individual; or

"(ii) with respect to which there is a reasonable basis to believe that the information can be used to identify the individual.

"(7) STANDARD.—The term 'standard', when used with reference to a data element of health information or a transaction referred to in section 1173(a)(1), means any such data element or transaction that meets each of the standards and implementation specifications adopted or established by the Secretary with respect to the data element or transaction under sections 1172 through 1174.

"(8) STANDARD SETTING ORGANIZATION.—The term 'standard setting organization' means a standard setting organization accredited by the American National Standards Institute, including the National Council for Prescription Drug Programs, that develops standards for information transactions, data elements, or any other standard that is necessary to, or will facilitate, the implementation of this part.

<< 42 USCA § 1320d–1 >>

"GENERAL REQUIREMENTS FOR ADOPTION OF STANDARDS

"SEC. 1172. (a) APPLICABILITY.—Any standard adopted under this part shall apply, in whole or in part, to the following persons:

"(1) A health plan.

"(2) A health care clearinghouse.

"(3) A health care provider who transmits any health information in electronic form in connection with a transaction referred to in section 1173(a)(1).

"(b) REDUCTION OF COSTS.—Any standard adopted under this part shall be consistent with the objective of reducing the administrative costs of providing and paying for health care.

"(c) ROLE OF STANDARD SETTING ORGANIZATIONS.—

"(1) IN GENERAL.—Except as provided in paragraph (2), any standard adopted under this part shall be a standard that has been developed, adopted, or modified by a standard setting organization.

"(2) SPECIAL RULES.—

"(A) DIFFERENT STANDARDS.—The Secretary may adopt a standard that is different from any standard developed, adopted, or modified by a standard setting organization, if—

"(i) the different standard will substantially reduce administrative costs to health care providers and health plans compared to the alternatives; and

"(ii) the standard is promulgated in accordance with the rulemaking procedures of subchapter III of chapter 5 of title 5, United States Code.

"(B) NO STANDARD BY STANDARD SETTING ORGANIZATION.—If no standard setting organization has developed, adopted, or modified any standard relating to a standard that the Secretary is authorized or required to adopt under this part—

"(i) paragraph (1) shall not apply; and

"(ii) subsection (f) shall apply.

"(3) CONSULTATION REQUIREMENT.—

"(A) IN GENERAL.—A standard may not be adopted under this part unless—

"(i) in the case of a standard that has been developed, adopted, or modified by a standard setting organization, the organization consulted with each of the organizations described in subparagraph (B) in the course of such development, adoption, or modification; and

"(ii) in the case of any other standard, the Secretary, in complying with the requirements of subsection (f), consulted with each of the organizations described in subparagraph (B) before adopting the standard.

"(B) ORGANIZATIONS DESCRIBED.—The organizations referred to in subparagraph (A) are the following:

"(i) The National Uniform Billing Committee.

"(ii) The National Uniform Claim Committee.

"(iii) The Workgroup for Electronic Data Interchange.

"(iv) The American Dental Association.

"(d) IMPLEMENTATION SPECIFICATIONS.—The Secretary shall establish specifications for implementing each of the standards adopted under this part.

"(e) PROTECTION OF TRADE SECRETS.—Except as otherwise required by law, a standard adopted under this part shall not require disclosure of trade secrets or confidential commercial information by a person required to comply with this part.

"(f) ASSISTANCE TO THE SECRETARY.—In complying with the requirements of this part, the Secretary shall rely on the recommendations of the National Committee on Vital and Health Statistics established under section 306(k) of the Public Health Service Act (42 U.S.C. 242k(k)), and shall consult with appropriate Federal and State agencies and private organizations. The Secretary shall publish in the Federal Register any recommendation of the National Committee on Vital and Health Statistics regarding the adoption of a standard under this part.

"(g) APPLICATION TO MODIFICATIONS OF STANDARDS.—This section shall apply to a modification to a standard (including an addition to a standard) adopted under section 1174(b) in the same manner as it applies to an initial standard adopted under section 1174(a).

<< 42 USCA § 1320d–2 >>

"STANDARDS FOR INFORMATION TRANSACTIONS AND DATA ELEMENTS

"SEC. 1173. (a) STANDARDS TO ENABLE ELECTRONIC EXCHANGE.—

"(1) IN GENERAL.—The Secretary shall adopt standards for transactions, and data elements for such transactions, to enable health information to be exchanged electronically, that are appropriate for—

"(A) the financial and administrative transactions described in paragraph (2); and

"(B) other financial and administrative transactions determined appropriate by the Secretary, consistent with the goals of improving the operation of the health care system and reducing administrative costs.

"(2) TRANSACTIONS.—The transactions referred to in paragraph (1)(A) are transactions with respect to the following:

"(A) Health claims or equivalent encounter information.

"(B) Health claims attachments.

"(C) Enrollment and disenrollment in a health plan.

"(D) Eligibility for a health plan.

"(E) Health care payment and remittance advice.

"(F) Health plan premium payments.

"(G) First report of injury.

"(H) Health claim status.

"(I) Referral certification and authorization.

"(3) ACCOMMODATION OF SPECIFIC PROVIDERS.—The standards adopted by the Secretary under paragraph (1) shall accommodate the needs of different types of health care providers.

"(b) UNIQUE HEALTH IDENTIFIERS.—

"(1) IN GENERAL.—The Secretary shall adopt standards providing for a standard unique health identifier for each individual, employer, health plan, and health care provider for use in the health care system. In carrying out the preceding sentence for each health plan and health care provider, the Secretary shall take into account multiple uses for identifiers and multiple locations and specialty classifications for health care providers.

"(2) USE OF IDENTIFIERS.—The standards adopted under paragraph (1) shall specify the purposes for which a unique health identifier may be used.

"(c) CODE SETS.—

"(1) IN GENERAL.—The Secretary shall adopt standards that—

"(A) select code sets for appropriate data elements for the transactions referred to in subsection (a)(1) from among the code sets that have been developed by private and public entities; or

"(B) establish code sets for such data elements if no code sets for the data elements have been developed.

"(2) DISTRIBUTION.—The Secretary shall establish efficient and low-cost procedures for distribution (including electronic distribution) of code sets and modifications made to such code sets under section 1174(b).

"(d) SECURITY STANDARDS FOR HEALTH INFORMATION.—

"(1) SECURITY STANDARDS.—The Secretary shall adopt security standards that—

"(A) take into account—

"(i) the technical capabilities of record systems used to maintain health information;

"(ii) the costs of security measures;

"(iii) the need for training persons who have access to health information;

"(iv) the value of audit trails in computerized record systems; and

"(v) the needs and capabilities of small health care providers and rural health care providers (as such providers are defined by the Secretary); and

"(B) ensure that a health care clearinghouse, if it is part of a larger organization, has policies and security procedures which isolate the activities of the health care clearinghouse with respect to processing information in a manner that prevents unauthorized access to such information by such larger organization.

"(2) SAFEGUARDS.—Each person described in section 1172(a) who maintains or transmits health information shall maintain reasonable and appropriate administrative, technical, and physical safeguards—

"(A) to ensure the integrity and confidentiality of the information;

"(B) to protect against any reasonably anticipated—

"(i) threats or hazards to the security or integrity of the information; and

"(ii) unauthorized uses or disclosures of the information; and

"(C) otherwise to ensure compliance with this part by the officers and employees of such person.

"(e) ELECTRONIC SIGNATURE.—

"(1) STANDARDS.—The Secretary, in coordination with the Secretary of Commerce, shall adopt standards specifying procedures for the electronic transmission and authentication of signatures with respect to the transactions referred to in subsection (a)(1).

"(2) EFFECT OF COMPLIANCE.—Compliance with the standards adopted under paragraph (1) shall be deemed to satisfy Federal and State statutory requirements for written signatures with respect to the transactions referred to in subsection (a)(1).

"(f) TRANSFER OF INFORMATION AMONG HEALTH PLANS.—The Secretary shall adopt standards for transferring among health plans appropriate standard data elements needed for the coordination of benefits, the sequential processing of claims, and other data elements for individuals who have more than one health plan.

<< 42 USCA § 1320d–3 >>

"TIMETABLES FOR ADOPTION OF STANDARDS

"SEC. 1174. (a) INITIAL STANDARDS.—The Secretary shall carry out section 1173 not later than 18 months after the date of the enactment of the Health Insurance Portability and Accountability Act of 1996, except that standards relating to claims attachments shall be adopted not later than 30 months after such date.

"(b) ADDITIONS AND MODIFICATIONS TO STANDARDS.—

"(1) IN GENERAL.—Except as provided in paragraph (2), the Secretary shall review the standards adopted under section 1173, and shall adopt modifications to the standards (including additions to the standards), as determined appropriate, but not more frequently than once every 12 months. Any addition or modification to a standard shall be completed in a manner which minimizes the disruption and cost of compliance.

"(2) SPECIAL RULES.—

"(A) FIRST 12–MONTH PERIOD.—Except with respect to additions and modifications to code sets under subparagraph (B), the Secretary may not adopt any modification to a standard adopted under this part during the 12–month period beginning on the date the standard is initially adopted, unless the Secretary determines that the modification is necessary in order to permit compliance with the standard.

"(B) ADDITIONS AND MODIFICATIONS TO CODE SETS.—

"(i) IN GENERAL.—The Secretary shall ensure that procedures exist for the routine maintenance, testing, enhancement, and expansion of code sets.

"(ii) ADDITIONAL RULES.—If a code set is modified under this subsection, the modified code set shall include instructions on how data elements of health information that were encoded prior to the modification may be converted or translated so as to preserve the informational value of the data elements that existed before the modification. Any modification to a code set under this subsection shall be implemented in a manner that minimizes the disruption and cost of complying with such modification.

<< 42 USCA § 1320d–4 >>

"REQUIREMENTS

"SEC. 1175. (a) CONDUCT OF TRANSACTIONS BY PLANS.—

"(1) IN GENERAL.—If a person desires to conduct a transaction referred to in section 1173(a)(1) with a health plan as a standard transaction—

"(A) the health plan may not refuse to conduct such transaction as a standard transaction;

"(B) the insurance plan may not delay such transaction, or otherwise adversely affect, or attempt to adversely affect, the person or the transaction on the ground that the transaction is a standard transaction; and

"(C) the information transmitted and received in connection with the transaction shall be in the form of standard data elements of health information.

"(2) SATISFACTION OF REQUIREMENTS.—A health plan may satisfy the requirements under paragraph (1) by—

"(A) directly transmitting and receiving standard data elements of health information; or

"(B) submitting nonstandard data elements to a health care clearinghouse for processing into standard data elements and transmission by the health care clearinghouse, and receiving standard data elements through the health care clearinghouse.

"(3) TIMETABLE FOR COMPLIANCE.—Paragraph (1) shall not be construed to require a health plan to comply with any standard, implementation specification, or modification to a standard or specification adopted or established by the Secretary under sections 1172 through 1174 at any time prior to the date on which the plan is required to comply with the standard or specification under subsection (b).

"(b) COMPLIANCE WITH STANDARDS.—

"(1) INITIAL COMPLIANCE.—

"(A) IN GENERAL.—Not later than 24 months after the date on which an initial standard or implementation specification is adopted or established under sections 1172 and 1173, each person to whom the standard or implementation specification applies shall comply with the standard or specification.

"(B) SPECIAL RULE FOR SMALL HEALTH PLANS.—In the case of a small health plan, paragraph (1) shall be applied by substituting '36 months' for '24 months'. For purposes of this subsection, the Secretary shall determine the plans that qualify as small health plans.

"(2) COMPLIANCE WITH MODIFIED STANDARDS.—If the Secretary adopts a modification to a standard or implementation specification under this part, each person to whom the standard or implementation specification applies shall comply with the modified standard or implementation specification at such time as the Secretary determines appropriate, taking into account the time needed to comply due to the nature and extent of the modification. The time determined appropriate under the preceding sentence may not be earlier than the last day of the 180–day period beginning on the date such modification is adopted. The Secretary may extend the time for compliance for small health plans, if the Secretary determines that such extension is appropriate.

"(3) CONSTRUCTION.—Nothing in this subsection shall be construed to prohibit any person from complying with a standard or specification by—

"(A) submitting nonstandard data elements to a health care clearinghouse for processing into standard data elements and transmission by the health care clearinghouse; or

"(B) receiving standard data elements through a health care clearinghouse.

<< 42 USCA § 1320d–5 >>

"GENERAL PENALTY FOR FAILURE TO COMPLY WITH REQUIREMENTS AND STANDARDS

"SEC. 1176. (a) GENERAL PENALTY.—

"(1) IN GENERAL.—Except as provided in subsection (b), the Secretary shall impose on any person who violates a provision of this part a penalty of not more than $100 for each such violation, except that the total amount imposed on the person for all violations of an identical requirement or prohibition during a calendar year may not exceed $25,000.

"(2) PROCEDURES.—The provisions of section 1128A (other than subsections (a) and (b) and the second sentence of subsection (f)) shall apply to the imposition of a civil money penalty under this subsection in the same manner as such provisions apply to the imposition of a penalty under such section 1128A.

"(b) LIMITATIONS.—

"(1) OFFENSES OTHERWISE PUNISHABLE.—A penalty may not be imposed under subsection (a) with respect to an act if the act constitutes an offense punishable under section 1177.

"(2) NONCOMPLIANCE NOT DISCOVERED.—A penalty may not be imposed under subsection (a) with respect to a provision of this part if it is established to the satisfaction of the Secretary that the person liable for the penalty did not know, and by exercising reasonable diligence would not have known, that such person violated the provision.

"(3) FAILURES DUE TO REASONABLE CAUSE.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), a penalty may not be imposed under subsection (a) if—

"(i) the failure to comply was due to reasonable cause and not to willful neglect; and

"(ii) the failure to comply is corrected during the 30–day period beginning on the first date the person liable for the penalty knew, or by exercising reasonable diligence would have known, that the failure to comply occurred.

"(B) EXTENSION OF PERIOD.—

"(i) NO PENALTY.—The period referred to in subparagraph (A)(ii) may be extended as determined appropriate by the Secretary based on the nature and extent of the failure to comply.

"(ii) ASSISTANCE.—If the Secretary determines that a person failed to comply because the person was unable to comply, the Secretary may provide technical assistance to the person during the period described in subparagraph (A)(ii). Such assistance shall be provided in any manner determined appropriate by the Secretary.

"(4) REDUCTION.—In the case of a failure to comply which is due to reasonable cause and not to willful neglect, any penalty under subsection (a) that is not entirely waived under paragraph (3) may be waived to the extent that the payment of such penalty would be excessive relative to the compliance failure involved.

<< 42 USCA § 1320d–6 >>

"WRONGFUL DISCLOSURE OF INDIVIDUALLY IDENTIFIABLE HEALTH INFORMATION

"SEC. 1177. (a) OFFENSE.—A person who knowingly and in violation of this part—

"(1) uses or causes to be used a unique health identifier;

"(2) obtains individually identifiable health information relating to an individual; or

"(3) discloses individually identifiable health information to another person,

shall be punished as provided in subsection (b).

"(b) PENALTIES.—A person described in subsection (a) shall—

"(1) be fined not more than $50,000, imprisoned not more than 1 year, or both;

"(2) if the offense is committed under false pretenses, be fined not more than $100,000, imprisoned not more than 5 years, or both; and

"(3) if the offense is committed with intent to sell, transfer, or use individually identifiable health information for commercial advantage, personal gain, or malicious harm, be fined not more than $250,000, imprisoned not more than 10 years, or both.

<< 42 USCA § 1320d–7 >>

"EFFECT ON STATE LAW

"SEC. 1178. (a) GENERAL EFFECT.—

"(1) GENERAL RULE.—Except as provided in paragraph (2), a provision or requirement under this part, or a standard or implementation specification adopted or established under sections 1172 through 1174, shall supersede any contrary provision of State law, including a provision of State law that requires medical or health plan records (including billing information) to be maintained or transmitted in written rather than electronic form.

"(2) EXCEPTIONS.—A provision or requirement under this part, or a standard or implementation specification adopted or established under sections 1172 through 1174, shall not supersede a contrary provision of State law, if the provision of State law—

"(A) is a provision the Secretary determines—

"(i) is necessary—

"(I) to prevent fraud and abuse;

"(II) to ensure appropriate State regulation of insurance and health plans;

"(III) for State reporting on health care delivery or costs; or

"(IV) for other purposes; or

"(ii) addresses controlled substances; or

"(B) subject to section 264(c)(2) of the Health Insurance Portability and Accountability Act of 1996, relates to the privacy of individually identifiable health information.

"(b) PUBLIC HEALTH.—Nothing in this part shall be construed to invalidate or limit the authority, power, or procedures established under any law providing for the reporting of disease or injury, child abuse, birth, or death, public health surveillance, or public health investigation or intervention.

"(c) STATE REGULATORY REPORTING.—Nothing in this part shall limit the ability of a State to require a health plan to report, or to provide access to, information for management audits, financial audits, program monitoring and evaluation, facility licensure or certification, or individual licensure or certification.

<< 42 USCA § 1320d–8 >>

"PROCESSING PAYMENT TRANSACTIONS BY FINANCIAL INSTITUTIONS

"SEC. 1179. To the extent that an entity is engaged in activities of a financial institution (as defined in section 1101 of the Right to Financial Privacy Act of 1978), or is engaged in authorizing, processing, clearing, settling, billing, transferring, reconciling, or collecting payments, for a financial institution, this part, and any standard adopted under this part, shall not apply to the entity with respect to such activities, including the following:

"(1) The use or disclosure of information by the entity for authorizing, processing, clearing, settling, billing, transferring, reconciling or collecting, a payment for, or related to, health plan premiums or health care, where such payment is made by any means, including a credit, debit, or other payment card, an account, check, or electronic funds transfer.

"(2) The request for, or the use or disclosure of, information by the entity with respect to a payment described in paragraph (1)—

"(A) for transferring receivables;

"(B) for auditing;

"(C) in connection with—
"(i) a customer dispute; or
"(ii) an inquiry from, or to, a customer;
"(D) in a communication to a customer of the entity regarding the customer's transactions, payment card, account, check, or electronic funds transfer;
"(E) for reporting to consumer reporting agencies; or
"(F) for complying with—
"(i) a civil or criminal subpoena; or
"(ii) a Federal or State law regulating the entity.".

(b) CONFORMING AMENDMENTS.—

<< 42 USCA § 1395cc >>

(1) REQUIREMENT FOR MEDICARE PROVIDERS.—Section 1866(a)(1) (42 U.S.C. 1395cc(a)(1)) is amended—
(A) by striking "and" at the end of subparagraph (P);
(B) by striking the period at the end of subparagraph (Q) and inserting "; and"; and
(C) by inserting immediately after subparagraph (Q) the following new subparagraph:
"(R) to contract only with a health care clearinghouse (as defined in section 1171) that meets each standard and implementation specification adopted or established under part C of title XI on or after the date on which the health care clearinghouse is required to comply with the standard or specification.".

<< 42 USCA Ch. 7 >>

(2) TITLE HEADING.—Title XI (42 U.S.C. 1301 et seq.) is amended by striking the title heading and inserting the following:

"TITLE XI—GENERAL PROVISIONS, PEER REVIEW, AND ADMINISTRATIVE SIMPLIFICATION".

<< 42 USCA § 242k >>

SEC. 263. CHANGES IN MEMBERSHIP AND DUTIES OF NATIONAL COMMITTEE ON VITAL AND HEALTH STATISTICS.

Section 306(k) of the Public Health Service Act (42 U.S.C. 242k(k)) is amended—
(1) in paragraph (1), by striking "16" and inserting "18";
(2) by amending paragraph (2) to read as follows:
"(2) The members of the Committee shall be appointed from among persons who have distinguished themselves in the fields of health statistics, electronic interchange of health care information, privacy and security of electronic information, population-based public health, purchasing or financing health care services, integrated computerized health information systems, health services research, consumer interests in health information, health data standards, epidemiology, and the provision of health services. Members of the Committee shall be appointed for terms of 4 years.";
(3) by redesignating paragraphs (3) through (5) as paragraphs (4) through (6), respectively, and inserting after paragraph (2) the following:
"(3) Of the members of the Committee—
"(A) 1 shall be appointed, not later than 60 days after the date of the enactment of the Health Insurance Portability and Accountability Act of 1996, by the Speaker of the House of Representatives after consultation with the Minority Leader of the House of Representatives;
"(B) 1 shall be appointed, not later than 60 days after the date of the enactment of the Health Insurance Portability and Accountability Act of 1996, by the President pro tempore of the Senate after consultation with the Minority Leader of the Senate; and
"(C) 16 shall be appointed by the Secretary.";
(4) by amending paragraph (5) (as so redesignated) to read as follows:

"(5) The Committee—

"(A) shall assist and advise the Secretary—

"(i) to delineate statistical problems bearing on health and health services which are of national or international interest;

"(ii) to stimulate studies of such problems by other organizations and agencies whenever possible or to make investigations of such problems through subcommittees;

"(iii) to determine, approve, and revise the terms, definitions, classifications, and guidelines for assessing health status and health services, their distribution and costs, for use (I) within the Department of Health and Human Services, (II) by all programs administered or funded by the Secretary, including the Federal–State–local cooperative health statistics system referred to in subsection (e), and (III) to the extent possible as determined by the head of the agency involved, by the Department of Veterans Affairs, the Department of Defense, and other Federal agencies concerned with health and health services;

"(iv) with respect to the design of and approval of health statistical and health information systems concerned with the collection, processing, and tabulation of health statistics within the Department of Health and Human Services, with respect to the Cooperative Health Statistics System established under subsection (e), and with respect to the standardized means for the collection of health information and statistics to be established by the Secretary under subsection (j)(1);

"(v) to review and comment on findings and proposals developed by other organizations and agencies and to make recommendations for their adoption or implementation by local, State, national, or international agencies;

"(vi) to cooperate with national committees of other countries and with the World Health Organization and other national agencies in the studies of problems of mutual interest;

"(vii) to issue an annual report on the state of the Nation's health, its health services, their costs and distributions, and to make proposals for improvement of the Nation's health statistics and health information systems; and

"(viii) in complying with the requirements imposed on the Secretary under part C of title XI of the Social Security Act;

"(B) shall study the issues related to the adoption of uniform data standards for patient medical record information and the electronic exchange of such information;

"(C) shall report to the Secretary not later than 4 years after the date of the enactment of the Health Insurance Portability and Accountability Act of 1996 recommendations and legislative proposals for such standards and electronic exchange; and

"(D) shall be responsible generally for advising the Secretary and the Congress on the status of the implementation of part C of title XI of the Social Security Act."; and

(5) by adding at the end the following:

"(7) Not later than 1 year after the date of the enactment of the Health Insurance Portability and Accountability Act of 1996, and annually thereafter, the Committee shall submit to the Congress, and make public, a report regarding the implementation of part C of title XI of the Social Security Act. Such report shall address the following subjects, to the extent that the Committee determines appropriate:

"(A) The extent to which persons required to comply with part C of title XI of the Social Security Act are cooperating in implementing the standards adopted under such part.

"(B) The extent to which such entities are meeting the security standards adopted under such part and the types of penalties assessed for noncompliance with such standards.

"(C) Whether the Federal and State Governments are receiving information of sufficient quality to meet their responsibilities under such part.

"(D) Any problems that exist with respect to implementation of such part.

"(E) The extent to which timetables under such part are being met.".

<< 42 USCA § 1320d–2 >>

SEC. 264. RECOMMENDATIONS WITH RESPECT TO PRIVACY OF CERTAIN HEALTH INFORMATION.

(a) IN GENERAL.—Not later than the date that is 12 months after the date of the enactment of this Act, the Secretary of Health and Human Services shall submit to the Committee on Labor and Human Resources and the Committee on Finance of the Senate and the Committee on Commerce and the Committee on Ways and Means of the House of Representatives detailed recommendations on standards with respect to the privacy of individually identifiable health information.

(b) SUBJECTS FOR RECOMMENDATIONS.—The recommendations under subsection (a) shall address at least the following:

(1) The rights that an individual who is a subject of individually identifiable health information should have.

(2) The procedures that should be established for the exercise of such rights.

(3) The uses and disclosures of such information that should be authorized or required.

(c) REGULATIONS.—

(1) IN GENERAL.—If legislation governing standards with respect to the privacy of individually identifiable health information transmitted in connection with the transactions described in section 1173(a) of the Social Security Act (as added by section 262) is not enacted by the date that is 36 months after the date of the enactment of this Act, the Secretary of Health and Human Services shall promulgate final regulations containing such standards not later than the date that is 42 months after the date of the enactment of this Act. Such regulations shall address at least the subjects described in subsection (b).

(2) PREEMPTION.—A regulation promulgated under paragraph (1) shall not supercede a contrary provision of State law, if the provision of State law imposes requirements, standards, or implementation specifications that are more stringent than the requirements, standards, or implementation specifications imposed under the regulation.

(d) CONSULTATION.—In carrying out this section, the Secretary of Health and Human Services shall consult with—

(1) the National Committee on Vital and Health Statistics established under section 306(k) of the Public Health Service Act (42 U.S.C. 242k(k)); and

(2) the Attorney General.

Subtitle G—Duplication and Coordination of Medicare–Related Plans

SEC. 271. DUPLICATION AND COORDINATION OF MEDICARE–RELATED PLANS.

<< 42 USCA § 1395ss >>

(a) TREATMENT OF CERTAIN HEALTH INSURANCE POLICIES AS NONDUPLICATIVE.—Section 1882(d)(3)(A) (42 U.S.C. 1395ss(d)(3)(A)) is amended—

(1) in clause (iii), by striking "clause (i)" and inserting "clause (i)(II)"; and

(2) by adding at the end the following:

"(iv) For purposes of this subparagraph, a health insurance policy (other than a Medicare supplemental policy) providing for benefits which are payable to or on behalf of an individual without regard to other health benefit coverage of such individual is not considered to 'duplicate' any health benefits under this title, under title XIX, or under a health insurance policy, and subclauses (I) and (III) of clause (i) do not apply to such a policy.

"(v) For purposes of this subparagraph, a health insurance policy (or a rider to an insurance contract which is not a health insurance policy) is not considered to 'duplicate' health benefits under this title or under another health insurance policy if it—

"(I) provides health care benefits only for long-term care, nursing home care, home health care, or community-based care, or any combination thereof,

"(II) coordinates against or excludes items and services available or paid for under this title or under another health insurance policy, and

"(III) for policies sold or issued on or after the end of the 90–day period beginning on the date of enactment of the Health Insurance Portability and Accountability Act of 1996 discloses such coordination or exclusion in the policy's outline of coverage.

For purposes of this clause, the terms 'coordinates' and 'coordination' mean, with respect to a policy in relation to health benefits under this title or under another health insurance policy, that the policy under its terms is secondary to, or excludes from payment, items and services to the extent available or paid for under this title or under another health insurance policy.

"(vi)(I) An individual entitled to benefits under part A or enrolled under part B of this title who is applying for a health insurance policy (other than a policy described in subclause (III)) shall be furnished a disclosure statement described in clause (vii) for the type of policy being applied for. Such statement shall be furnished as a part of (or together with) the application for such policy.

"(II) Whoever issues or sells a health insurance policy (other than a policy described in subclause (III)) to an individual described in subclause (I) and fails to furnish the appropriate disclosure statement as required under such subclause shall be

fined under title 18, United States Code, or imprisoned not more than 5 years, or both, and, in addition to or in lieu of such a criminal penalty, is subject to a civil money penalty of not to exceed $25,000 (or $15,000 in the case of a person other than the issuer of the policy) for each such violation.

"(III) A policy described in this subclause (to which subclauses (I) and (II) do not apply) is a Medicare supplemental policy or a health insurance policy identified under 60 Federal Register 30880 (June 12, 1995) as a policy not required to have a disclosure statement.

"(IV) Any reference in this section to the revised NAIC model regulation (referred to in subsection (m)(1)(A)) is deemed a reference to such regulation as revised by section 171(m)(2) of the Social Security Act Amendments of 1994 (Public Law 103–432) and as modified by substituting, for the disclosure required under section 16D(2), disclosure under subclause (I) of an appropriate disclosure statement under clause (vii).

"(vii) The disclosure statement described in this clause for a type of policy is the statement specified under subparagraph (D) of this paragraph (as in effect before the date of the enactment of the Health Insurance Portability and Accountability Act of 1996) for that type of policy, as revised as follows:

"(I) In each statement, amend the second line to read as follows:

'THIS IS NOT MEDICARE SUPPLEMENT INSURANCE'.

"(II) In each statement, strike the third line and insert the following: 'Some health care services paid for by Medicare may also trigger the payment of benefits under this policy.'.

"(III) In each statement not described in subclause (V), strike the boldface matter that begins 'This insurance' and all that follows up to the next paragraph that begins 'Medicare'.

"(IV) In each statement not described in subclause (V), insert before the boxed matter (that states 'Before You Buy This Insurance') the following: 'This policy must pay benefits without regard to other health benefit coverage to which you may be entitled under Medicare or other insurance.'.

"(V) In a statement relating to policies providing both nursing home and non-institutional coverage, to policies providing nursing home benefits only, or policies providing home care benefits only, amend the sentence that begins 'Federal law' to read as follows: 'Federal law requires us to inform you that in certain situations this insurance may pay for some care also covered by Medicare.'.

"(viii)(I) Subject to subclause (II), nothing in this subparagraph shall restrict or preclude a State's ability to regulate health insurance policies, including any health insurance policy that is described in clause (iv), (v), or (vi)(III).

"(II) A State may not declare or specify, in statute, regulation, or otherwise, that a health insurance policy (other than a Medicare supplemental policy) or rider to an insurance contract which is not a health insurance policy, that is described in clause (iv), (v), or (vi)(III) and that is sold, issued, or renewed to an individual entitled to benefits under part A or enrolled under part B 'duplicates' health benefits under this title or under a Medicare supplemental policy.".

(b) CONFORMING AMENDMENTS.—Section 1882(d)(3) (42 U.S.C. 1395ss(d)(3)) is amended—

(1) in subparagraph (C)—

(A) by striking "with respect to (i)" and inserting "with respect to", and

(B) by striking ", (ii) the sale" and all that follows up to the period at the end; and

(2) by striking subparagraph (D).

<< 42 USCA § 1395ss NOTE >>

(c) TRANSITIONAL PROVISION.—

(1) NO PENALTIES.—Subject to paragraph (3), no criminal or civil money penalty may be imposed under section 1882(d)(3)(A) of the Social Security Act for any act or omission that occurred during the transition period (as defined in paragraph (4)) and that relates to any health insurance policy that is described in clause (iv) or (v) of such section (as amended by subsection (a)).

(2) LIMITATION ON LEGAL ACTION.—Subject to paragraph (3), no legal action shall be brought or continued in any Federal or State court insofar as such action—

(A) includes a cause of action which arose, or which is based on or evidenced by any act or omission which occurred, during the transition period; and

(B) relates to the application of section 1882(d)(3)(A) of the Social Security Act to any act or omission with respect to the sale, issuance, or renewal of any health insurance policy that is described in clause (iv) or (v) of such section (as amended by subsection (a)).

(3) DISCLOSURE CONDITION.—In the case of a policy described in clause (iv) of section 1882(d)(3)(A) of the Social Security Act that is sold or issued on or after the effective date of statements under section 171(d)(3)(C) of the Social Security Act Amendments of 1994 and before the end of the 30–day period beginning on the date of the enactment of this Act, paragraphs (1) and (2) shall only apply if disclosure was made in accordance with section 1882(d)(3)(C)(ii) of the Social Security Act (as in effect before the date of the enactment of this Act).

(4) TRANSITION PERIOD.—In this subsection, the term "transition period" means the period beginning on November 5, 1991, and ending on the date of the enactment of this Act.

<< 42 USCA § 1395ss NOTE >>

(d) EFFECTIVE DATE.—(1) Except as provided in this subsection, the amendment made by subsection (a) shall be effective as if included in the enactment of section 4354 of the Omnibus Budget Reconciliation Act of 1990.

(2)(A) Clause (vi) of section 1882(d)(3)(A) of the Social Security Act, as added by subsection (a), shall only apply to individuals applying for—

(i) a health insurance policy described in section 1882(d)(3)(A)(iv) of such Act (as added by subsection (a)), after the date of the enactment of this Act, or

(ii) another health insurance policy after the end of the 30–day period beginning on the date of the enactment of this Act.

(B) A seller or issuer of a health insurance policy may substitute, for the disclosure statement described in clause (vii) of such section, the statement specified under section 1882(d)(3)(D) of the Social Security Act (as in effect before the date of the enactment of this Act), without the revision specified in such clause.

TITLE III—TAX–RELATED HEALTH PROVISIONS

SEC. 300. AMENDMENT OF 1986 CODE.

Except as otherwise expressly provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1986.

Subtitle A—Medical Savings Accounts

SEC. 301. MEDICAL SAVINGS ACCOUNTS.

<< 26 USCA § 220 >>

<< 26 USCA § 221 >>

(a) IN GENERAL.—Part VII of subchapter B of chapter 1 (relating to additional itemized deductions for individuals) is amended by redesignating section 220 as section 221 and by inserting after section 219 the following new section:

<< 26 USCA § 220 >>

"SEC. 220. MEDICAL SAVINGS ACCOUNTS.

"(a) DEDUCTION ALLOWED.—In the case of an individual who is an eligible individual for any month during the taxable year, there shall be allowed as a deduction for the taxable year an amount equal to the aggregate amount paid in cash during such taxable year by such individual to a medical savings account of such individual.

"(b) LIMITATIONS.—

"(1) IN GENERAL.—The amount allowable as a deduction under subsection (a) to an individual for the taxable year shall not exceed the sum of the monthly limitations for months during such taxable year that the individual is an eligible individual.

"(2) MONTHLY LIMITATION.—The monthly limitation for any month is the amount equal to $^{1}/_{12}$ of—

"(A) in the case of an individual who has self-only coverage under thehigh deductible health plan as of the first day of such month, 65 percent of the annual deductible under such coverage, and

"(B) in the case of an individual who has family coverage under the high deductible health plan as of the first day of such month, 75 percent of the annual deductible under such coverage.

"(3) SPECIAL RULE FOR MARRIED INDIVIDUALS.—In the case of individuals who are married to each other, if either spouse has family coverage—

"(A) both spouses shall be treated as having only such family coverage (and if such spouses each have family coverage under different plans, as having the family coverage with the lowest annual deductible), and

"(B) the limitation under paragraph (1) (after the application of subparagraph (A) of this paragraph) shall be divided equally between them unless they agree on a different division.

"(4) DEDUCTION NOT TO EXCEED COMPENSATION.—

"(A) EMPLOYEES.—The deduction allowed under subsection (a) for contributions as an eligible individual described in subclause (I) of subsection (c)(1)(A)(iii) shall not exceed such individual's wages, salaries, tips, and other employee compensation which are attributable to such individual's employment by the employer referred to in such subclause.

"(B) SELF–EMPLOYED INDIVIDUALS.—The deduction allowed under subsection (a) for contributions as an eligible individual described in subclause (II) of subsection (c)(1)(A)(iii) shall not exceed such individual's earned income (as defined in section 401(c)(1)) derived by the taxpayer from the trade or business with respect to which the high deductible health plan is established.

"(C) COMMUNITY PROPERTY LAWS NOT TO APPLY.—The limitations under this paragraph shall be determined without regard to community property laws.

"(5) COORDINATION WITH EXCLUSION FOR EMPLOYER CONTRIBUTIONS.—No deduction shall be allowed under this section for any amount paid for any taxable year to a medical savings account of an individual if—

"(A) any amount is contributed to any medical savings account of such individual for such year which is excludable from gross income under section 106(b), or

"(B) if such individual's spouse is covered under the high deductible health plan covering such individual, any amount is contributed for such year to any medical savings account of such spouse which is so excludable.

"(6) DENIAL OF DEDUCTION TO DEPENDENTS.—No deduction shall be allowed under this section to any individual with respect to whom a deduction under section 151 is allowable to another taxpayer for a taxable year beginning in the calendar year in which such individual's taxable year begins.

"(c) DEFINITIONS.—For purposes of this section—

"(1) ELIGIBLE INDIVIDUAL.—

"(A) IN GENERAL.—The term 'eligible individual' means, with respect to any month, any individual if—

"(i) such individual is covered under a high deductible health plan as of the 1st day of such month,

"(ii) such individual is not, while covered under a high deductible health plan, covered under any health plan—

"(I) which is not a high deductible health plan, and

"(II) which provides coverage for any benefit which is covered under the high deductible health plan, and

"(iii)(I) the high deductible health plan covering such individual is established and maintained by the employer of such individual or of the spouse of such individual and such employer is a small employer, or

"(II) such individual is an employee (within the meaning of section 401(c)(1)) or the spouse of such an employee and the high deductible health plan covering such individual is not established or maintained by any employer of such individual or spouse.

"(B) CERTAIN COVERAGE DISREGARDED.—Subparagraph (A)(ii) shall be applied without regard to—

"(i) coverage for any benefit provided by permitted insurance, and

"(ii) coverage (whether through insurance or otherwise) for accidents, disability, dental care, vision care, or long-term care.

"(C) CONTINUED ELIGIBILITY OF EMPLOYEE AND SPOUSE ESTABLISHING MEDICAL SAVINGS ACCOUNTS.—If, while an employer is a small employer—

"(i) any amount is contributed to a medical savings account of an individual who is an employee of such employer or the spouse of such an employee, and

"(ii) such amount is excludable from gross income under section 106(b) or allowable as a deduction under this section,

such individual shall not cease to meet the requirement of subparagraph (A)(iii)(I) by reason of such employer ceasing to be a small employer so long as such employee continues to be an employee of such employer.

"(D) LIMITATIONS ON ELIGIBILITY.—

"For limitations on number of taxpayers who are eligible to have medical savings accounts, see subsection (i).

"(2) HIGH DEDUCTIBLE HEALTH PLAN.—

"(A) IN GENERAL.—The term 'high deductible health plan' means a health plan—

"(i) in the case of self-only coverage, which has an annual deductible which is not less than $1,500 and not more than $2,250,

"(ii) in the case of family coverage, which has an annual deductible which is not less than $3,000 and not more than $4,500, and

"(iii) the annual out-of-pocket expenses required to be paid under the plan (other than for premiums) for covered benefits does not exceed—

"(I) $3,000 for self-only coverage, and

"(II) $5,500 for family coverage.

"(B) SPECIAL RULES.—

"(i) EXCLUSION OF CERTAIN PLANS.—Such term does not include a health plan if substantially all of its coverage is coverage described in paragraph (1)(B).

"(ii) SAFE HARBOR FOR ABSENCE OF PREVENTIVE CARE DEDUCTIBLE.—A plan shall not fail to be treated as a high deductible health plan by reason of failing to have a deductible for preventive care if the absence of a deductible for such care is required by State law.

"(3) PERMITTED INSURANCE.—The term 'permitted insurance' means—

"(A) Medicare supplemental insurance,

"(B) insurance if substantially all of the coverage provided under such insurance relates to—

"(i) liabilities incurred under workers' compensation laws,

"(ii) tort liabilities,

"(iii) liabilities relating to ownership or use of property, or

"(iv) such other similar liabilities as the Secretary may specify by regulations,

"(C) insurance for a specified disease or illness, and

"(D) insurance paying a fixed amount per day (or other period) of hospitalization.

"(4) SMALL EMPLOYER.—

"(A) IN GENERAL.—The term 'small employer' means, with respect to any calendar year, any employer if such employer employed an average of 50 or fewer employees on business days during either of the 2 preceding calendar years. For purposes of the preceding sentence, a preceding calendar year may be taken into account only if the employer was in existence throughout such year.

"(B) EMPLOYERS NOT IN EXISTENCE IN PRECEDING YEAR.—In the case of an employer which was not in existence throughout the 1st preceding calendar year, the determination under subparagraph (A) shall be based on the average number of employees that it is reasonably expected such employer will employ on business days in the current calendar year.

"(C) CERTAIN GROWING EMPLOYERS RETAIN TREATMENT AS SMALL EMPLOYER.—The term 'small employer' includes, with respect to any calendar year, any employer if—

"(i) such employer met the requirement of subparagraph (A) (determined without regard to subparagraph (B)) for any preceding calendar year after 1996,

"(ii) any amount was contributed to the medical savings account of any employee of such employer with respect to coverage of such employee under a high deductible health plan of such employer during such preceding calendar year and such amount was excludable from gross income under section 106(b) or allowable as a deduction under this section, and

"(iii) such employer employed an average of 200 or fewer employees on business days during each preceding calendar year after 1996.

"(D) SPECIAL RULES.—

"(i) CONTROLLED GROUPS.—For purposes of this paragraph, all persons treated as a single employer under subsection (b), (c), (m), or (o) of section 414 shall be treated as 1 employer.

"(ii) PREDECESSORS.—Any reference in this paragraph to an employer shall include a reference to any predecessor of such employer.

"(5) FAMILY COVERAGE.—The term 'family coverage' means any coverage other than self-only coverage.

"(d) MEDICAL SAVINGS ACCOUNT.—For purposes of this section—

"(1) MEDICAL SAVINGS ACCOUNT.—The term 'medical savings account' means a trust created or organized in the United States exclusively for the purpose of paying the qualified medical expenses of the account holder, but only if the written governing instrument creating the trust meets the following requirements:

"(A) Except in the case of a rollover contribution described in subsection (f)(5), no contribution will be accepted—

"(i) unless it is in cash, or

"(ii) to the extent such contribution, when added to previous contributions to the trust for the calendar year, exceeds 75 percent of the highest annual limit deductible permitted under subsection (c)(2)(A)(ii) for such calendar year.

"(B) The trustee is a bank (as defined in section 408(n)), an insurance company (as defined in section 816), or another person who demonstrates to the satisfaction of the Secretary that the manner in which such person will administer the trust will be consistent with the requirements of this section.

"(C) No part of the trust assets will be invested in life insurance contracts.

"(D) The assets of the trust will not be commingled with other property except in a common trust fund or common investment fund.

"(E) The interest of an individual in the balance in his account is nonforfeitable.

"(2) QUALIFIED MEDICAL EXPENSES.—

"(A) IN GENERAL.—The term 'qualified medical expenses' means, with respect to an account holder, amounts paid by such holder for medical care (as defined in section 213(d)) for such individual, the spouse of such individual, and any dependent (as defined in section 152) of such individual, but only to the extent such amounts are not compensated for by insurance or otherwise.

"(B) HEALTH INSURANCE MAY NOT BE PURCHASED FROM ACCOUNT.—

"(i) IN GENERAL.—Subparagraph (A) shall not apply to any payment for insurance.

"(ii) EXCEPTIONS.—Clause (i) shall not apply to any expense for coverage under—

"(I) a health plan during any period of continuation coverage required under any Federal law,

"(II) a qualified long-term care insurance contract (as defined in section 7702B(b)), or

"(III) a health plan during a period in which the individual is receiving unemployment compensation under any Federal or State law.

"(C) MEDICAL EXPENSES OF INDIVIDUALS WHO ARE NOT ELIGIBLE INDIVIDUALS.—Subparagraph (A) shall apply to an amount paid by an account holder for medical care of an individual who is not an eligible individual for the month in which the expense for such care is incurred only if no amount is contributed (other than a rollover contribution) to any medical savings account of such account holder for the taxable year which includes such month. This subparagraph shall not apply to any expense for coverage described in subclause (I) or (III) of subparagraph (B)(ii).

"(3) ACCOUNT HOLDER.—The term 'account holder' means the individual on whose behalf the medical savings account was established.

"(4) CERTAIN RULES TO APPLY.—Rules similar to the following rules shall apply for purposes of this section:

"(A) Section 219(d)(2) (relating to no deduction for rollovers).

"(B) Section 219(f)(3) (relating to time when contributions deemed made).

"(C) Except as provided in section 106(b), section 219(f)(5) (relating to employer payments).

"(D) Section 408(g) (relating to community property laws).

"(E) Section 408(h) (relating to custodial accounts).

"(e) TAX TREATMENT OF ACCOUNTS.—

"(1) IN GENERAL.—A medical savings account is exempt from taxation under this subtitle unless such account has ceased to be a medical savings account. Notwithstanding the preceding sentence, any such account is subject to the taxes imposed by section 511 (relating to imposition of tax on unrelated business income of charitable, etc. organizations).

"(2) ACCOUNT TERMINATIONS.—Rules similar to the rules of paragraphs (2) and (4) of section 408(e) shall apply to medical savings accounts, and any amount treated as distributed under such rules shall be treated as not used to pay qualified medical expenses.

"(f) TAX TREATMENT OF DISTRIBUTIONS.—

"(1) AMOUNTS USED FOR QUALIFIED MEDICAL EXPENSES.—Any amount paid or distributed out of a medical savings account which is used exclusively to pay qualified medical expenses of any account holder shall not be includible in gross income.

"(2) INCLUSION OF AMOUNTS NOT USED FOR QUALIFIED MEDICAL EXPENSES.—Any amount paid or distributed out of a medical savings account which is not used exclusively to pay the qualified medical expenses of the account holder shall be included in the gross income of such holder.

"(3) EXCESS CONTRIBUTIONS RETURNED BEFORE DUE DATE OF RETURN.—

"(A) IN GENERAL.—If any excess contribution is contributed for a taxable year to any medical savings account of an individual, paragraph (2) shall not apply to distributions from the medical savings accounts of such individual (to the extent such distributions do not exceed the aggregate excess contributions to all such accounts of such individual for such year) if—

"(i) such distribution is received by the individual on or before the last day prescribed by law (including extensions of time) for filing such individual's return for such taxable year, and

"(ii) such distribution is accompanied by the amount of net income attributable to such excess contribution.

Any net income described in clause (ii) shall be included in the gross income of the individual for the taxable year in which it is received.

"(B) EXCESS CONTRIBUTION.—For purposes of subparagraph (A), the term 'excess contribution' means any contribution (other than a rollover contribution) which is neither excludable from gross income under section 106(b) nor deductible under this section.

"(4) ADDITIONAL TAX ON DISTRIBUTIONS NOT USED FOR QUALIFIED MEDICAL EXPENSES.—

"(A) IN GENERAL.—The tax imposed by this chapter on the account holder for any taxable year in which there is a payment or distribution from a medical savings account of such holder which is includible in gross income under paragraph (2) shall be increased by 15 percent of the amount which is so includible.

"(B) EXCEPTION FOR DISABILITY OR DEATH.—Subparagraph (A) shall not apply if the payment or distribution is made after the account holder becomes disabled within the meaning of section 72(m)(7) or dies.

"(C) EXCEPTION FOR DISTRIBUTIONS AFTER MEDICARE ELIGIBILITY.—Subparagraph (A) shall not apply to any payment or distribution after the date on which the account holder attains the age specified in section 1811 of the Social Security Act.

"(5) ROLLOVER CONTRIBUTION.—An amount is described in this paragraph as a rollover contribution if it meets the requirements of subparagraphs (A) and (B).

"(A) IN GENERAL.—Paragraph (2) shall not apply to any amount paid or distributed from a medical savings account to the account holder to the extent the amount received is paid into a medical savings account for the benefit of such holder not later than the 60th day after the day on which the holder receives the payment or distribution.

"(B) LIMITATION.—This paragraph shall not apply to any amount described in subparagraph (A) received by an individual from a medical savings account if, at any time during the 1–year period ending on the day of such receipt, such individual received any other amount described in subparagraph (A) from a medical savings account which was not includible in the individual's gross income because of the application of this paragraph.

"(6) COORDINATION WITH MEDICAL EXPENSE DEDUCTION.—For purposes of determining the amount of the deduction under section 213, any payment or distribution out of a medical savings account for qualified medical expenses shall not be treated as an expense paid for medical care.

"(7) TRANSFER OF ACCOUNT INCIDENT TO DIVORCE.—The transfer of an individual's interest in a medical savings account to an individual's spouse or former spouse under a divorce or separation instrument described in subparagraph (A) of section 71(b)(2) shall not be considered a taxable transfer made by such individual notwithstanding any other provision of this subtitle, and such interest shall, after such transfer, be treated as a medical savings account with respect to which such spouse is the account holder.

"(8) TREATMENT AFTER DEATH OF ACCOUNT HOLDER.—

"(A) TREATMENT IF DESIGNATED BENEFICIARY IS SPOUSE.—If the account holder's surviving spouse acquires such holder's interest in a medical savings account by reason of being the designated beneficiary of such account at the death of the account holder, such medical savings account shall be treated as if the spouse were the account holder.

"(B) OTHER CASES.—

"(i) IN GENERAL.—If, by reason of the death of the account holder, any person acquires the account holder's interest in a medical savings account in a case to which subparagraph (A) does not apply—

"(I) such account shall cease to be a medical savings account as of the date of death, and

"(II) an amount equal to the fair market value of the assets in such account on such date shall be includible if such person is not the estate of such holder, in such person's gross income for the taxable year which includes such date, or if such person is the estate of such holder, in such holder's gross income for the last taxable year of such holder.

"(ii) SPECIAL RULES.—

"(I) REDUCTION OF INCLUSION FOR PRE–DEATH EXPENSES.—The amount includible in gross income under clause (i) by any person (other than the estate) shall be reduced by the amount of qualified medical expenses which were incurred by the decedent before the date of the decedent's death and paid by such person within 1 year after such date.

"(II) DEDUCTION FOR ESTATE TAXES.—An appropriate deduction shall be allowed under section 691(c) to any person (other than the decedent or the decedent's spouse) with respect to amounts included in gross income under clause (i) by such person.

"(g) COST–OF–LIVING ADJUSTMENT.—In the case of any taxable year beginning in a calendar year after 1998, each dollar amount in subsection (c)(2) shall be increased by an amount equal to—

"(1) such dollar amount, multiplied by

"(2) the cost-of-living adjustment determined under section 1(f)(3) for the calendar year in which such taxable year begins by substituting 'calendar year 1997' for 'calendar year 1992' in subparagraph (B) thereof.

If any increase under the preceding sentence is not a multiple of $50, such increase shall be rounded to the nearest multiple of $50.

"(h) REPORTS.—The Secretary may require the trustee of a medical savings account to make such reports regarding such account to the Secretary and to the account holder with respect to contributions, distributions, and such other matters as the Secretary determines appropriate. The reports required by this subsection shall be filed at such time and in such manner and furnished to such individuals at such time and in such manner as may be required by the Secretary.

"(i) LIMITATION ON NUMBER OF TAXPAYERS HAVING MEDICAL SAVINGS ACCOUNTS.—

"(1) IN GENERAL.—Except as provided in paragraph (5), no individual shall be treated as an eligible individual for any taxable year beginning after the cut-off year unless—

"(A) such individual was an active MSA participant for any taxable year ending on or before the close of the cut-off year, or

"(B) such individual first became an active MSA participant for a taxable year ending after the cut-off year by reason of coverage under a high deductible health plan of an MSA-participating employer.

"(2) CUT–OFF YEAR.—For purposes of paragraph (1), the term 'cut-off year' means the earlier of—

"(A) calendar year 2000, or

"(B) the first calendar year before 2000 for which the Secretary determines under subsection (j) that the numerical limitation for such year has been exceeded.

"(3) ACTIVE MSA PARTICIPANT.—For purposes of this subsection—

"(A) IN GENERAL.—The term 'active MSA participant' means, with respect to any taxable year, any individual who is the account holder of any medical savings account into which any contribution was made which was excludable from gross income under section 106(b), or allowable as a deduction under this section, for such taxable year.

"(B) SPECIAL RULE FOR CUT–OFF YEARS BEFORE 2000.—In the case of a cut-off year before 2000—

"(i) an individual shall not be treated as an eligible individual for any month of such year or an active MSA participant under paragraph (1)(A) unless such individual is, on or before the cut-off date, covered under a high deductible health plan, and

"(ii) an employer shall not be treated as an MSA-participating employer unless the employer, on or before the cut-off date, offered coverage under a high deductible health plan to any employee.

"(C) CUT–OFF DATE.—For purposes of subparagraph (B)—

"(i) IN GENERAL.—Except as otherwise provided in this subparagraph, the cut-off date is October 1 of the cut-off year.

"(ii) EMPLOYEES WITH ENROLLMENT PERIODS AFTER OCTOBER 1.—In the case of an individual described in subclause (I) of subsection (c)(1)(A)(iii), if the regularly scheduled enrollment period for health plans of the individual's employer occurs during the last 3 months of the cut-off year, the cut-off date is December 31 of the cut-off year.

"(iii) SELF–EMPLOYED INDIVIDUALS.—In the case of an individual described in subclause (II) of subsection (c)(1)(A)(iii), the cut-off date is November 1 of the cut-off year.

"(iv) SPECIAL RULES FOR 1997.—If 1997 is a cut-off year by reason of subsection (j)(1)(A)—

"(I) each of the cut-off dates under clauses (i) and (iii) shall be 1 month earlier than the date determined without regard to this clause, and

"(II) clause (ii) shall be applied by substituting '4 months' for '3 months'.

"(4) MSA–PARTICIPATING EMPLOYER.—For purposes of this subsection, the term 'MSA-participating employer' means any small employer if—

"(A) such employer made any contribution to the medical savings account of any employee during the cut-off year or any preceding calendar year which was excludable from gross income under section 106(b), or

"(B) at least 20 percent of the employees of such employer who are eligible individuals for any month of the cut-off year by reason of coverage under a high deductible health plan of such employer each made a contribution of at least $100 to their medical savings accounts for any taxable year ending with or within the cut-off year which was allowable as a deduction under this section.

"(5) ADDITIONAL ELIGIBILITY AFTER CUT–OFF YEAR.—If the Secretary determines under subsection (j)(2)(A) that the numerical limit for the calendar year following a cut-off year described in paragraph (2)(B) has not been exceeded—

"(A) this subsection shall not apply to any otherwise eligible individual who is covered under a high deductible health plan during the first 6 months of the second calendar year following the cut-off year (and such individual shall be treated as an active MSA participant for purposes of this subsection if a contribution is made to any medical savings account with respect to such coverage), and

"(B) any employer who offers coverage under a high deductible health plan to any employee during such 6–month period shall be treated as an MSA-participating employer for purposes of this subsection if the requirements of paragraph (4) are met with respect to such coverage.

For purposes of this paragraph, subsection (j)(2)(A) shall be applied for 1998 by substituting '750,000' for '600,000'.

"(j) DETERMINATION OF WHETHER NUMERICAL LIMITS ARE EXCEEDED.—

"(1) DETERMINATION OF WHETHER LIMIT EXCEEDED FOR 1997.—The numerical limitation for 1997 is exceeded if, based on the reports required under paragraph (4), the number of medical savings accounts established as of—

"(A) April 30, 1997, exceeds 375,000, or

"(B) June 30, 1997, exceeds 525,000.

"(2) DETERMINATION OF WHETHER LIMIT EXCEEDED FOR 1998 OR 1999.—

"(A) IN GENERAL.—The numerical limitation for 1998 or 1999 is exceeded if the sum of—

"(i) the number of MSA returns filed on or before April 15 of such calendar year for taxable years ending with or within the preceding calendar year, plus

"(ii) the Secretary's estimate (determined on the basis of the returns described in clause (i)) of the number of MSA returns for such taxable years which will be filed after such date,

exceeds 600,000 (750,000 in the case of 1999). For purposes of the preceding sentence, the term 'MSA return' means any return on which any exclusion is claimed under section 106(b) or any deduction is claimed under this section.

"(B) ALTERNATIVE COMPUTATION OF LIMITATION.—The numerical limitation for 1998 or 1999 is also exceeded if the sum of—

"(i) 90 percent of the sum determined under subparagraph (A) for such calendar year, plus

"(ii) the product of 2.5 and the number of medical savings accounts established during the portion of such year preceding July 1 (based on the reports required under paragraph (4)) for taxable years beginning in such year,

exceeds 750,000.

"(3) PREVIOUSLY UNINSURED INDIVIDUALS NOT INCLUDED IN DETERMINATION.—

"(A) IN GENERAL.—The determination of whether any calendar year is a cut-off year shall be made by not counting the medical savings account of any previously uninsured individual.

"(B) PREVIOUSLY UNINSURED INDIVIDUAL.—For purposes of this subsection, the term 'previously uninsured individual' means, with respect to any medical savings account, any individual who had no health plan coverage (other than coverage referred to in subsection (c)(1)(B)) at any time during the 6–month period before the date such individual's coverage under the high deductible health plan commences.

"(4) REPORTING BY MSA TRUSTEES.—

"(A) IN GENERAL.—Not later than August 1 of 1997, 1998, and 1999, each person who is the trustee of a medical savings account established before July 1 of such calendar year shall make a report to the Secretary (in such form and manner as the Secretary shall specify) which specifies—

"(i) the number of medical savings accounts established before such July 1 (for taxable years beginning in such calendar year) of which such person is the trustee,

"(ii) the name and TIN of the account holder of each such account, and

"(iii) the number of such accounts which are accounts of previously uninsured individuals.

"(B) ADDITIONAL REPORT FOR 1997.—Not later than June 1, 1997, each person who is the trustee of a medical savings account established before May 1, 1997, shall make an additional report described in subparagraph (A) but only with respect to accounts established before May 1, 1997.

"(C) PENALTY FOR FAILURE TO FILE REPORT.—The penalty provided in section 6693(a) shall apply to any report required by this paragraph, except that—

"(i) such section shall be applied by substituting '$25' for '$50', and

"(ii) the maximum penalty imposed on any trustee shall not exceed $5,000.

"(D) AGGREGATION OF ACCOUNTS.—To the extent practicable, in determining the number of medical savings accounts on the basis of the reports under this paragraph, all medical savings accounts of an individual shall be treated as 1 account and all accounts of individuals who are married to each other shall be treated as 1 account.

"(5) DATE OF MAKING DETERMINATIONS.—Any determination under this subsection that a calendar year is a cut-off year shall be made by the Secretary and shall be published not later than October 1 of such year.".

<< 26 USCA § 62 >>

(b) DEDUCTION ALLOWED WHETHER OR NOT INDIVIDUAL ITEMIZES OTHER DEDUCTIONS.—Subsection (a) of section 62 is amended by inserting after paragraph (15) the following new paragraph:

"(16) MEDICAL SAVINGS ACCOUNTS.—The deduction allowed by section 220.".

(c) EXCLUSIONS FOR EMPLOYER CONTRIBUTIONS TO MEDICAL SAVINGS ACCOUNTS.—

<< 26 USCA § 106 >>

(1) EXCLUSION FROM INCOME TAX.—The text of section 106 (relating to contributions by employer to accident and health plans) is amended to read as follows:

"(a) GENERAL RULE.—Except as otherwise provided in this section, gross income of an employee does not include employer-provided coverage under an accident or health plan.

"(b) CONTRIBUTIONS TO MEDICAL SAVINGS ACCOUNTS.—

"(1) IN GENERAL.—In the case of an employee who is an eligible individual, amounts contributed by such employee's employer to any medical savings account of such employee shall be treated as employer-provided coverage for medical expenses under an accident or health plan to the extent such amounts do not exceed the limitation under section 220(b)(1) (determined without regard to this subsection) which is applicable to such employee for such taxable year.

"(2) NO CONSTRUCTIVE RECEIPT.—No amount shall be included in the gross income of any employee solely because the employee may choose between the contributions referred to in paragraph (1) and employer contributions to another health plan of the employer.

"(3) SPECIAL RULE FOR DEDUCTION OF EMPLOYER CONTRIBUTIONS.—Any employer contribution to a medical savings account, if otherwise allowable as a deduction under this chapter, shall be allowed only for the taxable year in which paid.

"(4) EMPLOYER MSA CONTRIBUTIONS REQUIRED TO BE SHOWN ON RETURN.—Every individual required to file a return under section 6012 for the taxable year shall include on such return the aggregate amount contributed by employers to the medical savings accounts of such individual or such individual's spouse for such taxable year.

"(5) MSA CONTRIBUTIONS NOT PART OF COBRA COVERAGE.—Paragraph (1) shall not apply for purposes of section 4980B.

"(6) DEFINITIONS.—For purposes of this subsection, the terms 'eligible individual' and 'medical savings account' have the respective meanings given to such terms by section 220.

"(7) CROSS REFERENCE.—

"For penalty on failure by employer to make comparable contributions to the medical savings accounts of comparable employees, see section 4980E.".

(2) EXCLUSION FROM EMPLOYMENT TAXES.—

<< 26 USCA § 3231 >>

(A) RAILROAD RETIREMENT TAX.—Subsection (e) of section 3231 is amended by adding at the end the following new paragraph:

"(10) MEDICAL SAVINGS ACCOUNT CONTRIBUTIONS.—The term 'compensation' shall not include any payment made to or for the benefit of an employee if at the time of such payment it is reasonable to believe that the employee will be able to exclude such payment from income under section 106(b).".

<< 26 USCA § 3306 >>

(B) UNEMPLOYMENT TAX.—Subsection (b) of section 3306 is amended by striking "or" at the end of paragraph (15), by striking the period at the end of paragraph (16) and inserting "; or", and by inserting after paragraph (16) the following new paragraph:

"(17) any payment made to or for the benefit of an employee if at the time of such payment it is reasonable to believe that the employee will be able to exclude such payment from income under section 106(b).".

<< 26 USCA § 3401 >>

(C) WITHHOLDING TAX.—Subsection (a) of section 3401 is amended by striking "or" at the end of paragraph (19), by striking the period at the end of paragraph (20) and inserting "; or", and by inserting after paragraph (20) the following new paragraph:

"(21) any payment made to or for the benefit of an employee if at the time of such payment it is reasonable to believe that the employee will be able to exclude such payment from income under section 106(b)."

<< 26 USCA § 6051 >>

(3) EMPLOYER CONTRIBUTIONS REQUIRED TO BE SHOWN ON W–2.—Subsection (a) of section 6051 is amended by striking "and" at the end of paragraph (9), by striking the period at the end of paragraph (10) and inserting ", and", and by inserting after paragraph (10) the following new paragraph:

"(11) the amount contributed to any medical savings account (as defined in section 220(d)) of such employee or such employee's spouse.".

(4) PENALTY FOR FAILURE OF EMPLOYER TO MAKE COMPARABLE MSA CONTRIBUTIONS.—

<< 26 USCA § 4980E >>

(A) IN GENERAL.—Chapter 43 is amended by adding after section 4980D the following new section:

"SEC. 4980E. FAILURE OF EMPLOYER TO MAKE COMPARABLE MEDICAL SAVINGS ACCOUNT CONTRIBUTIONS.

"(a) GENERAL RULE.—In the case of an employer who makes a contribution to the medical savings account of any employee with respect to coverage under a high deductible health plan of the employer during a calendar year, there is hereby imposed a tax on the failure of such employer to meet the requirements of subsection (d) for such calendar year.

"(b) AMOUNT OF TAX.—The amount of the tax imposed by subsection (a) on any failure for any calendar year is the amount equal to 35 percent of the aggregate amount contributed by the employer to medical savings accounts of employees for taxable years of such employees ending with or within such calendar year.

"(c) WAIVER BY SECRETARY.—In the case of a failure which is due to reasonable cause and not to willful neglect, the Secretary may waive part or all of the tax imposed by subsection (a) to the extent that the payment of such tax would be excessive relative to the failure involved.

"(d) EMPLOYER REQUIRED TO MAKE COMPARABLE MSA CONTRIBUTIONS FOR ALL PARTICIPATING EMPLOYEES.—

"(1) IN GENERAL.—An employer meets the requirements of this subsection for any calendar year if the employer makes available comparable contributions to the medical savings accounts of all comparable participating employees for each coverage period during such calendar year.

"(2) COMPARABLE CONTRIBUTIONS.—

"(A) IN GENERAL.—For purposes of paragraph (1), the term 'comparable contributions' means contributions—

"(i) which are the same amount, or

"(ii) which are the same percentage of the annual deductible limit under the high deductible health plan covering the employees.

"(B) PART–YEAR EMPLOYEES.—In the case of an employee who is employed by the employer for only a portion of the calendar year, a contribution to the medical savings account of such employee shall be treated as comparable if it is an amount which bears the same ratio to the comparable amount (determined without regard to this subparagraph) as such portion bears to the entire calendar year.

"(3) COMPARABLE PARTICIPATING EMPLOYEES.—For purposes of paragraph (1), the term 'comparable participating employees' means all employees—

"(A) who are eligible individuals covered under any high deductible health plan of the employer, and

"(B) who have the same category of coverage.

For purposes of subparagraph (B), the categories of coverage are self-only and family coverage.

"(4) PART–TIME EMPLOYEES.—

"(A) IN GENERAL.—Paragraph (3) shall be applied separately with respect to part-time employees and other employees.

"(B) PART–TIME EMPLOYEE.—For purposes of subparagraph (A), the term 'part-time employee' means any employee who is customarily employed for fewer than 30 hours per week.

"(e) CONTROLLED GROUPS.—For purposes of this section, all persons treated as a single employer under subsection (b), (c), (m), or (o) of section 414 shall be treated as 1 employer.

"(f) DEFINITIONS.—Terms used in this section which are also used in section 220 have the respective meanings given such terms in section 220.".

<< 26 USCA Ch. 43 >>

(B) CLERICAL AMENDMENT.—The table of sections for chapter 43 is amended by adding after the item relating to section 4980D the following new item:

"Sec. 4980E. Failure of employer to make comparable medical savings account contributions.".

<< 26 USCA § 125 >>

(d) MEDICAL SAVINGS ACCOUNT CONTRIBUTIONS NOT AVAILABLE UNDER CAFETERIA PLANS.—Subsection (f) of section 125 of such Code is amended by inserting "106(b)," before "117".

<< 26 USCA § 4973 >>

(e) TAX ON EXCESS CONTRIBUTIONS.—Section 4973 (relating to tax on excess contributions to individual retirement accounts, certain section 403(b) contracts, and certain individual retirement annuities) is amended—

(1) by inserting "MEDICAL SAVINGS ACCOUNTS," after "ACCOUNTS," in the heading of such section,

(2) by striking "or" at the end of paragraph (1) of subsection (a),

(3) by redesignating paragraph (2) of subsection (a) as paragraph (3) and by inserting after paragraph (1) the following:

"(2) a medical savings account (within the meaning of section 220(d)), or", and

(4) by adding at the end the following new subsection:

"(d) EXCESS CONTRIBUTIONS TO MEDICAL SAVINGS ACCOUNTS.—For purposes of this section, in the case of medical savings accounts (within the meaning of section 220(d)), the term 'excess contributions' means the sum of—

"(1) the aggregate amount contributed for the taxable year to the accounts (other than rollover contributions described in section 220(f)(5)) which is neither excludable from gross income under section 106(b) nor allowable as a deduction under section 220 for such year, and

"(2) the amount determined under this subsection for the preceding taxable year, reduced by the sum of—

"(A) the distributions out of the accounts which were included in gross income under section 220(f)(2), and

"(B) the excess (if any) of—

"(i) the maximum amount allowable as a deduction under section 220(b)(1) (determined without regard to section 106(b)) for the taxable year, over

"(ii) the amount contributed to the accounts for the taxable year.

For purposes of this subsection, any contribution which is distributed out of the medical savings account in a distribution to which section 220(f)(3) applies shall be treated as an amount not contributed.".

<< 26 USCA § 4975 >>

(f) TAX ON PROHIBITED TRANSACTIONS.—

(1) Section 4975 (relating to tax on prohibited transactions) is amended by adding at the end of subsection (c) the following new paragraph:

"(4) SPECIAL RULE FOR MEDICAL SAVINGS ACCOUNTS.—An individual for whose benefit a medical savings account (within the meaning of section 220(d)) is established shall be exempt from the tax imposed by this section with respect to any transaction concerning such account (which would otherwise be taxable under this section) if, with respect to such transaction, the account ceases to be a medical savings account by reason of the application of section 220(e)(2) to such account.".

(2) Paragraph (1) of section 4975(e) is amended to read as follows:

"(1) PLAN.—For purposes of this section, the term 'plan' means—

"(A) a trust described in section 401(a) which forms a part of a plan, or a plan described in section 403(a), which trust or plan is exempt from tax under section 501(a),

"(B) an individual retirement account described in section 408(a),

"(C) an individual retirement annuity described in section 408(b),

"(D) a medical savings account described in section 220(d), or

"(E) a trust, plan, account, or annuity which, at any time, has been determined by the Secretary to be described in any preceding subparagraph of this paragraph.".

<< 26 USCA § 6693 >>

(g) FAILURE TO PROVIDE REPORTS ON MEDICAL SAVINGS ACCOUNTS.—

(1) Subsection (a) of section 6693 (relating to failure to provide reports on individual retirement accounts or annuities) is amended to read as follows:

"(a) REPORTS.—

"(1) IN GENERAL.—If a person required to file a report under a provision referred to in paragraph (2) fails to file such report at the time and in the manner required by such provision, such person shall pay a penalty of $50 for each failure unless it is shown that such failure is due to reasonable cause.

"(2) PROVISIONS.—The provisions referred to in this paragraph are—

"(A) subsections (i) and (l) of section 408 (relating to individual retirement plans), and

"(B) section 220(h) (relating to medical savings accounts).".

<< 26 USCA § 848 >>

(h) EXCEPTION FROM CAPITALIZATION OF POLICY ACQUISITION EXPENSES.—Subparagraph (B) of section 848(e)(1) (defining specified insurance contract) is amended by striking "and" at the end of clause (ii), by striking the period at the end of clause (iii) and inserting ", and", and by adding at the end the following new clause:

"(iv) any contract which is a medical savings account (as defined in section 220(d)).".

<< 26 USCA Ch. 1 >>

(i) CLERICAL AMENDMENT.—The table of sections for part VII of subchapter B of chapter 1 is amended by striking the last item and inserting the following:

"Sec. 220. Medical savings accounts.

"Sec. 221. Cross reference.".

<< 26 USCA §§ 62 NOTE, 106 nt, 125 nt, 220 nt, 848 nt, 3231 nt, 3306 nt, 3401 nt, 4973 nt, 4975 nt, 6051 nt, 6693 nt >>

<< 26 USCA § 4980E nt >>

(j) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1996.

<< 26 USCA § 220 NOTE >>

(k) MONITORING OF PARTICIPATION IN MEDICAL SAVINGS ACCOUNTS.—The Secretary of the Treasury or his delegate shall—

(1) during 1997, 1998, 1999, and 2000, regularly evaluate the number of individuals who are maintaining medical savings accounts and the reduction in revenues to the United States by reason of such accounts, and

(2) provide such reports of such evaluations to Congress as such Secretary determines appropriate.

<< 26 USCA § 220 NOTE >>

(l) STUDY OF EFFECTS OF MEDICAL SAVINGS ACCOUNTS ON SMALL GROUP MARKET.—The Comptroller General of the United States shall enter into a contract with an organization with expertise in health economics, health insurance markets, and actuarial science to conduct a comprehensive study regarding the effects of medical savings accounts in the small group market on—

(1) selection, including adverse selection,

(2) health costs, including any impact on premiums of individuals with comprehensive coverage,

(3) use of preventive care,

(4) consumer choice,

(5) the scope of coverage of high deductible plans purchased in conjunction with such accounts, and

(6) other relevant items.

A report on the results of the study conducted under this subsection shall be submitted to the Congress no later than January 1, 1999.

Subtitle B—Increase in Deduction for Health Insurance Costs of Self–Employed Individuals

SEC. 311. INCREASE IN DEDUCTION FOR HEALTH INSURANCE COSTS OF SELF–EMPLOYED INDIVIDUALS.

<< 26 USCA § 162 >>

(a) IN GENERAL.—Paragraph (1) of section 162(l) is amended to read as follows:

"(1) ALLOWANCE OF DEDUCTION.—

"(A) IN GENERAL.—In the case of an individual who is an employee within the meaning of section 401(c)(1), there shall be allowed as a deduction under this section an amount equal to the applicable percentage of the amount paid during the taxable year for insurance which constitutes medical care for the taxpayer, his spouse, and dependents.

"(B) APPLICABLE PERCENTAGE.—For purposes of subparagraph (A), the applicable percentage shall be determined under the following table:

"For taxable years beginning in calendar year—	**The applicable percentage is—**
1997	40 percent
1998 through 2002	45 percent
2003	50 percent
2004	60 percent
2005	70 percent
2006 or thereafter	80 percent.".

<< 26 USCA § 104 >>

(b) EXCLUSION FOR AMOUNTS RECEIVED UNDER CERTAIN SELF–INSURED PLANS.—Paragraph (3) of section 104(a) is amended by inserting "(or through an arrangement having the effect of accident or health insurance)" after "health insurance".

<< 26 USCA §§ 104 NOTE, 162 nt >>

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1996.

Subtitle C—Long–Term Care Services and Contracts

PART I—GENERAL PROVISIONS

SEC. 321. TREATMENT OF LONG–TERM CARE INSURANCE.

<< 26 USCA § 7702B >>

(a) GENERAL RULE.—Chapter 79 (relating to definitions) is amended by inserting after section 7702A the following new section:

"SEC. 7702B. TREATMENT OF QUALIFIED LONG–TERM CARE INSURANCE.

"(a) IN GENERAL.—For purposes of this title—

"(1) a qualified long-term care insurance contract shall be treated as an accident and health insurance contract,

"(2) amounts (other than policyholder dividends, as defined in section 808, or premium refunds) received under a qualified long-term care insurance contract shall be treated as amounts received for personal injuries and sickness and shall be treated as reimbursement for expenses actually incurred for medical care (as defined in section 213(d)),

"(3) any plan of an employer providing coverage under a qualified long-term care insurance contract shall be treated as an accident and health plan with respect to such coverage,

"(4) except as provided in subsection (e)(3), amounts paid for a qualified long-term care insurance contract providing the benefits described in subsection (b)(2)(A) shall be treated as payments made for insurance for purposes of section 213(d)(1)(D), and

"(5) a qualified long-term care insurance contract shall be treated as a guaranteed renewable contract subject to the rules of section 816(e).

"(b) QUALIFIED LONG–TERM CARE INSURANCE CONTRACT.—For purposes of this title—

"(1) IN GENERAL.—The term 'qualified long-term care insurance contract' means any insurance contract if—

"(A) the only insurance protection provided under such contract is coverage of qualified long-term care services,

"(B) such contract does not pay or reimburse expenses incurred for services or items to the extent that such expenses are reimbursable under title XVIII of the Social Security Act or would be so reimbursable but for the application of a deductible or coinsurance amount,

"(C) such contract is guaranteed renewable,

"(D) such contract does not provide for a cash surrender value or other money that can be—

"(i) paid, assigned, or pledged as collateral for a loan, or

"(ii) borrowed,

other than as provided in subparagraph (E) or paragraph (2)(C),

"(E) all refunds of premiums, and all policyholder dividends or similar amounts, under such contract are to be applied as a reduction in future premiums or to increase future benefits, and

"(F) such contract meets the requirements of subsection (g).

"(2) SPECIAL RULES.—

"(A) PER DIEM, ETC. PAYMENTS PERMITTED.—A contract shall not fail to be described in subparagraph (A) or (B) of paragraph (1) by reason of payments being made on a per diem or other periodic basis without regard to the expenses incurred during the period to which the payments relate.

"(B) SPECIAL RULES RELATING TO MEDICARE.—

"(i) Paragraph (1)(B) shall not apply to expenses which are reimbursable under title XVIII of the Social Security Act only as a secondary payor.

"(ii) No provision of law shall be construed or applied so as to prohibit the offering of a qualified long-term care insurance contract on the basis that the contract coordinates its benefits with those provided under such title.

"(C) REFUNDS OF PREMIUMS.—Paragraph (1)(E) shall not apply to any refund on the death of the insured, or on a complete surrender or cancellation of the contract, which cannot exceed the aggregate premiums paid under the contract. Any refund on a complete surrender or cancellation of the contract shall be includible in gross income to the extent that any deduction or exclusion was allowable with respect to the premiums.

"(c) QUALIFIED LONG–TERM CARE SERVICES.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified long-term care services' means necessary diagnostic, preventive, therapeutic, curing, treating, mitigating, and rehabilitative services, and maintenance or personal care services, which—

"(A) are required by a chronically ill individual, and

"(B) are provided pursuant to a plan of care prescribed by a licensed health care practitioner.

"(2) CHRONICALLY ILL INDIVIDUAL.—

"(A) IN GENERAL.—The term 'chronically ill individual' means any individual who has been certified by a licensed health care practitioner as—

"(i) being unable to perform (without substantial assistance from another individual) at least 2 activities of daily living for a period of at least 90 days due to a loss of functional capacity,

"(ii) having a level of disability similar (as determined under regulations prescribed by the Secretary in consultation with the Secretary of Health and Human Services) to the level of disability described in clause (i), or

"(iii) requiring substantial supervision to protect such individual from threats to health and safety due to severe cognitive impairment.

Such term shall not include any individual otherwise meeting the requirements of the preceding sentence unless within the preceding 12–month period a licensed health care practitioner has certified that such individual meets such requirements.

"(B) ACTIVITIES OF DAILY LIVING.—For purposes of subparagraph (A), each of the following is an activity of daily living:

"(i) Eating.

"(ii) Toileting.

"(iii) Transferring.

"(iv) Bathing.

"(v) Dressing.

"(vi) Continence.

A contract shall not be treated as a qualified long-term care insurance contract unless the determination of whether an individual is a chronically ill individual takes into account at least 5 of such activities.

"(3) MAINTENANCE OR PERSONAL CARE SERVICES.—The term 'maintenance or personal care services' means any care the primary purpose of which is the provision of needed assistance with any of the disabilities as a result of which the individual is a chronically ill individual (including the protection from threats to health and safety due to severe cognitive impairment).

"(4) LICENSED HEALTH CARE PRACTITIONER.—The term 'licensed health care practitioner' means any physician (as defined in section 1861(r)(1) of the Social Security Act) and any registered professional nurse, licensed social worker, or other individual who meets such requirements as may be prescribed by the Secretary.

"(d) AGGREGATE PAYMENTS IN EXCESS OF LIMITS.—

"(1) IN GENERAL.—If the aggregate of—

"(A) the periodic payments received for any period under all qualified long-term care insurance contracts which are treated as made for qualified long-term care services for an insured, and

"(B) the periodic payments received for such period which are treated under section 101(g) as paid by reason of the death of such insured,

exceeds the per diem limitation for such period, such excess shall be includible in gross income without regard to section 72. A payment shall not be taken into account under subparagraph (B) if the insured is a terminally ill individual (as defined in section 101(g)) at the time the payment is received.

"(2) PER DIEM LIMITATION.—For purposes of paragraph (1), the per diem limitation for any period is an amount equal to the excess (if any) of—

"(A) the greater of—

"(i) the dollar amount in effect for such period under paragraph (4), or

"(ii) the costs incurred for qualified long-term care services provided for the insured for such period, over

"(B) the aggregate payments received as reimbursements (through insurance or otherwise) for qualified long-term care services provided for the insured during such period.

"(3) AGGREGATION RULES.—For purposes of this subsection—

"(A) all persons receiving periodic payments described in paragraph (1) with respect to the same insured shall be treated as 1 person, and

"(B) the per diem limitation determined under paragraph (2) shall be allocated first to the insured and any remaining limitation shall be allocated among the other such persons in such manner as the Secretary shall prescribe.

"(4) DOLLAR AMOUNT.—The dollar amount in effect under this subsection shall be $175 per day (or the equivalent amount in the case of payments on another periodic basis).

"(5) INFLATION ADJUSTMENT.—In the case of a calendar year after 1997, the dollar amount contained in paragraph (4) shall be increased at the same time and in the same manner as amounts are increased pursuant to section 213(d)(10).

"(6) PERIODIC PAYMENTS.—For purposes of this subsection, the term 'periodic payment' means any payment (whether on a periodic basis or otherwise) made without regard to the extent of the costs incurred by the payee for qualified long-term care services.

"(e) TREATMENT OF COVERAGE PROVIDED AS PART OF A LIFE INSURANCE CONTRACT.—Except as otherwise provided in regulations prescribed by the Secretary, in the case of any long-term care insurance coverage (whether or not qualified) provided by a rider on or as part of a life insurance contract—

"(1) IN GENERAL.—This section shall apply as if the portion of the contract providing such coverage is a separate contract.

"(2) APPLICATION OF 7702.—Section 7702(c)(2) (relating to the guideline premium limitation) shall be applied by increasing the guideline premium limitation with respect to a life insurance contract, as of any date—

"(A) by the sum of any charges (but not premium payments) against the life insurance contract's cash surrender value (within the meaning of section 7702(f)(2)(A)) for such coverage made to that date under the contract, less

"(B) any such charges the imposition of which reduces the premiums paid for the contract (within the meaning of section 7702(f)(1)).

"(3) APPLICATION OF SECTION 213.—No deduction shall be allowed under section 213(a) for charges against the life insurance contract's cash surrender value described in paragraph (2), unless such charges are includible in income as a result of the application of section 72(e)(10) and the rider is a qualified long-term care insurance contract under subsection (b).

"(4) PORTION DEFINED.—For purposes of this subsection, the term 'portion' means only the terms and benefits under a life insurance contract that are in addition to the terms and benefits under the contract without regard to long-term care insurance coverage.

"(f) TREATMENT OF CERTAIN STATE–MAINTAINED PLANS.—

"(1) IN GENERAL.—If—

"(A) an individual receives coverage for qualified long-term care services under a State long-term care plan, and

"(B) the terms of such plan would satisfy the requirements of subsection (b) were such plan an insurance contract,

such plan shall be treated as a qualified long-term care insurance contract for purposes of this title.

"(2) STATE LONG–TERM CARE PLAN.—For purposes of paragraph (1), the term 'State long-term care plan' means any plan—

"(A) which is established and maintained by a State or an instrumentality of a State,

"(B) which provides coverage only for qualified long-term care services, and

"(C) under which such coverage is provided only to—

"(i) employees and former employees of a State (or any political subdivision or instrumentality of a State),

"(ii) the spouses of such employees, and

"(iii) individuals bearing a relationship to such employees or spouses which is described in any of paragraphs (1) through (8) of section 152(a).".

<< 26 USCA § 807 >>

(b) RESERVE METHOD.—Clause (iii) of section 807(d)(3)(A) is amended by inserting "(other than a qualified long-term care insurance contract, as defined in section 7702B(b))" after "insurance contract".

(c) LONG–TERM CARE INSURANCE NOT PERMITTED UNDER CAFETERIA PLANS OR FLEXIBLE SPENDING ARRANGEMENTS.—

<< 26 USCA § 125 >>

(1) CAFETERIA PLANS.—Section 125(f) is amended by adding at the end the following new sentence: "Such term shall not include any product which is advertised, marketed, or offered as long-term care insurance.".

<< 26 USCA § 106 >>

(2) FLEXIBLE SPENDING ARRANGEMENTS.—Section 106 (relating to contributions by employer to accident and health plans), as amended by section 301(c), is amended by adding at the end the following new subsection:

"(c) INCLUSION OF LONG–TERM CARE BENEFITS PROVIDED THROUGH FLEXIBLE SPENDING ARRANGEMENTS.—

"(1) IN GENERAL.—Effective on and after January 1, 1997, gross income of an employee shall include employer-provided coverage for qualified long-term care services (as defined in section 7702B(c)) to the extent that such coverage is provided through a flexible spending or similar arrangement.

"(2) FLEXIBLE SPENDING ARRANGEMENT.—For purposes of this subsection, a flexible spending arrangement is a benefit program which provides employees with coverage under which—

"(A) specified incurred expenses may be reimbursed (subject to reimbursement maximums and other reasonable conditions), and

"(B) the maximum amount of reimbursement which is reasonably available to a participant for such coverage is less than 500 percent of the value of such coverage.

In the case of an insured plan, the maximum amount reasonably available shall be determined on the basis of the underlying coverage."

(d) CONTINUATION COVERAGE RULES NOT TO APPLY.—

<< 26 USCA § 4980B >>

(1) Paragraph (2) of section 4980B(g) is amended by adding at the end the following new sentence: "Such term shall not include any plan substantially all of the coverage under which is for qualified long-term care services (as defined in section 7702B(c))."

<< 29 USCA § 1167 >>

(2) Paragraph (1) of section 607 of the Employee Retirement Income Security Act of 1974 is amended by adding at the end the following new sentence: "Such term shall not include any plan substantially all of the coverage under which is for qualified long-term care services (as defined in section 7702B(c) of such Code)."

<< 42 USCA § 300bb–8 >>

(3) Paragraph (1) of section 2208 of the Public Health Service Act is amended by adding at the end the following new sentence: "Such term shall not include any plan substantially all of the coverage under which is for qualified long-term care services (as defined in section 7702B(c) of such Code)."

<< 26 USCA Ch. 79 >>

(e) CLERICAL AMENDMENT.—The table of sections for chapter 79 is amended by inserting after the item relating to section 7702A the following new item:

"Sec. 7702B. Treatment of qualified long-term care insurance.".

<< 26 USCA §§ 106 nt, 125 nt, 807 nt, 4980B nt >>

<< 26 USCA § 7702B NOTE >>

<< 29 USCA § 1167 nt >>

<< 42 USCA § 300bb–8 nt >>

(f) EFFECTIVE DATES.—

(1) GENERAL EFFECTIVE DATE.—

(A) IN GENERAL.—Except as provided in subparagraph (B), the amendments made by this section shall apply to contracts issued after December 31, 1996.

(B) RESERVE METHOD.—The amendment made by subsection (b) shall apply to contracts issued after December 31, 1997.

(2) CONTINUATION OF EXISTING POLICIES.—In the case of any contract issued before January 1, 1997, which met the long-term care insurance requirements of the State in which the contract was situsted at the time the contract was issued—

(A) such contract shall be treated for purposes of the Internal Revenue Code of 1986 as a qualified long-term care insurance contract (as defined in section 7702B(b) of such Code), and

(B) services provided under, or reimbursed by, such contract shall be treated for such purposes as qualified long-term care services (as defined in section 7702B(c) of such Code).

In the case of an individual who is covered on December 31, 1996, under a State long-term care plan (as defined in section 7702B(f)(2) of such Code), the terms of such plan on such date shall be treated for purposes of the preceding sentence as a contract issued on such date which met the long-term care insurance requirements of such State.

(3) EXCHANGES OF EXISTING POLICIES.—If, after the date of enactment of this Act and before January 1, 1998, a contract providing for long-term care insurance coverage is exchanged solely for a qualified long-term care insurance contract (as defined in section 7702B(b) of such Code), no gain or loss shall be recognized on the exchange. If, in addition to a qualified long-term care insurance contract, money or other property is received in the exchange, then any gain shall be recognized to the extent of the sum of the money and the fair market value of the other property received. For purposes of this paragraph, the cancellation of a contract providing for long-term care insurance coverage and reinvestment of the cancellation proceeds in a qualified long-term care insurance contract within 60 days thereafter shall be treated as an exchange.

(4) ISSUANCE OF CERTAIN RIDERS PERMITTED.—For purposes of applying sections 101(f), 7702, and 7702A of the Internal Revenue Code of 1986 to any contract—

(A) the issuance of a rider which is treated as a qualified long-term care insurance contract under section 7702B, and

(B) the addition of any provision required to conform any other long-term care rider to be so treated,

shall not be treated as a modification or material change of such contract.

(5) APPLICATION OF PER DIEM LIMITATION TO EXISTING CONTRACTS.—The amount of per diem payments made under a contract issued on or before July 31, 1996, with respect to an insured which are excludable from gross income by reason of section 7702B of the Internal Revenue Code of 1986 (as added by this section) shall not be reduced under subsection (d)(2)(B) thereof by reason of reimbursements received under a contract issued on or before such date. The preceding sentence shall cease to apply as of the date (after July 31, 1996) such contract is exchanged or there is any contract modification which results in an increase in the amount of such per diem payments or the amount of such reimbursements.

<< 26 USCA § 7702B NOTE >>

(g) LONG–TERM CARE STUDY REQUEST.—The Chairman of the Committee on Ways and Means of the House of Representatives and the Chairman of the Committee on Finance of the Senate shall jointly request the National Association of Insurance Commissioners, in consultation with representatives of the insurance industry and consumer organizations, to formulate, develop, and conduct a study to determine the marketing and other effects of per diem limits on certain types of long-term care policies. If the National Association of Insurance Commissioners agrees to the study request, the National Association of Insurance Commissioners shall report the results of its study to such committees not later than 2 years after accepting the request.

SEC. 322. QUALIFIED LONG–TERM CARE SERVICES TREATED AS MEDICAL CARE.

<< 26 USCA § 213 >>

(a) GENERAL RULE.—Paragraph (1) of section 213(d) (defining medical care) is amended by striking "or" at the end of subparagraph (B), by redesignating subparagraph (C) as subparagraph (D), and by inserting after subparagraph (B) the following new subparagraph:

"(C) for qualified long-term care services (as defined in section 7702B(c)), or".

(b) TECHNICAL AMENDMENTS.—

(1) Subparagraph (D) of section 213(d)(1) (as redesignated by subsection (a)) is amended by inserting before the period "or for any qualified long-term care insurance contract (as defined in section 7702B(b))".

(2)(A) Paragraph (1) of section 213(d) is amended by adding at the end the following new flush sentence:

"In the case of a qualified long-term care insurance contract (as defined in section 7702B(b)), only eligible long-term care premiums (as defined in paragraph (10)) shall be taken into account under subparagraph (D)."

<< 26 USCA § 162 >>

(B) Paragraph (2) of section 162(l) is amended by adding at the end the following new subparagraph:

"(C) LONG–TERM CARE PREMIUMS.—In the case of a qualified long-term care insurance contract (as defined in section 7702B(b)), only eligible long-term care premiums (as defined in section 213(d)(10)) shall be taken into account under paragraph (1)."

<< 26 USCA § 213 >>

(C) Subsection (d) of section 213 is amended by adding at the end the following new paragraphs:

"(10) ELIGIBLE LONG–TERM CARE PREMIUMS.—

"(A) IN GENERAL.—For purposes of this section, the term 'eligible long-term care premiums' means the amount paid during a taxable year for any qualified long-term care insurance contract (as defined in section 7702B(b)) covering an individual, to the extent such amount does not exceed the limitation determined under the following table:

"In the case of an individual with an attained age before the close of the taxable year of:	**The limitation is:**
40 or less	$ 200
More than 40 but not more than 50	375
More than 50 but not more than 60	750
More than 60 but not more than 70	2,000
More than 70	2,500.

"(B) INDEXING.—

"(i) IN GENERAL.—In the case of any taxable year beginning in a calendar year after 1997, each dollar amount contained in subparagraph (A) shall be increased by the medical care cost adjustment of such amount for such calendar year. If any increase determined under the preceding sentence is not a multiple of $10, such increase shall be rounded to the nearest multiple of $10.

"(ii) MEDICAL CARE COST ADJUSTMENT.—For purposes of clause (i), the medical care cost adjustment for any calendar year is the percentage (if any) by which—

"(I) the medical care component of the Consumer Price Index (as defined in section 1(f)(5)) for August of the preceding calendar year, exceeds

"(II) such component for August of 1996.

The Secretary shall, in consultation with the Secretary of Health and Human Services, prescribe an adjustment which the Secretary determines is more appropriate for purposes of this paragraph than the adjustment described in the preceding sentence, and the adjustment so prescribed shall apply in lieu of the adjustment described in the preceding sentence.

"(11) CERTAIN PAYMENTS TO RELATIVES TREATED AS NOT PAID FOR MEDICAL CARE.—An amount paid for a qualified long-term care service (as defined in section 7702B(c)) provided to an individual shall be treated as not paid for medical care if such service is provided—

"(A) by the spouse of the individual or by a relative (directly or through a partnership, corporation, or other entity) unless the service is provided by a licensed professional with respect to such service, or

"(B) by a corporation or partnership which is related (within the meaning of section 267(b) or 707(b)) to the individual.

For purposes of this paragraph, the term 'relative' means an individual bearing a relationship to the individual which is described in any of paragraphs (1) through (8) of section 152(a). This paragraph shall not apply for purposes of section 105(b) with respect to reimbursements through insurance.".

(3) Paragraph (6) of section 213(d) is amended—

(A) by striking "subparagraphs (A) and (B)" and inserting "subparagraphs (A), (B), and (C)", and

(B) by striking "paragraph (1)(C)" in subparagraph (A) and inserting "paragraph (1)(D)".

(4) Paragraph (7) of section 213(d) is amended by striking "subparagraphs (A) and (B)" and inserting "subparagraphs (A), (B), and (C)".

<< 26 USCA §§ 162 NOTE, 213 nt >>

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1996.

SEC. 323. REPORTING REQUIREMENTS.

<< 26 USCA § 6050Q >>

(a) IN GENERAL.—Subpart B of part III of subchapter A of chapter 61 is amended by adding at the end the following new section:

"SEC. 6050Q. CERTAIN LONG–TERM CARE BENEFITS.

"(a) REQUIREMENT OF REPORTING.—Any person who pays long-term care benefits shall make a return, according to the forms or regulations prescribed by the Secretary, setting forth—

"(1) the aggregate amount of such benefits paid by such person to any individual during any calendar year,

"(2) whether or not such benefits are paid in whole or in part on a per diem or other periodic basis without regard to the expenses incurred during the period to which the payments relate,

"(3) the name, address, and TIN of such individual, and

"(4) the name, address, and TIN of the chronically ill or terminally ill individual on account of whose condition such benefits are paid.

"(b) STATEMENTS TO BE FURNISHED TO PERSONS WITH RESPECT TO WHOM INFORMATION IS REQUIRED.—Every person required to make a return under subsection (a) shall furnish to each individual whose name is required to be set forth in such return a written statement showing—

"(1) the name of the person making the payments, and

"(2) the aggregate amount of long-term care benefits paid to the individual which are required to be shown on such return.

The written statement required under the preceding sentence shall be furnished to the individual on or before January 31 of the year following the calendar year for which the return under subsection (a) was required to be made.

"(c) LONG–TERM CARE BENEFITS.—For purposes of this section, the term 'long-term care benefit' means—

"(1) any payment under a product which is advertised, marketed, or offered as long-term care insurance, and

"(2) any payment which is excludable from gross income by reason of section 101(g).".

<< 26 USCA § 6724 >>

(b) PENALTIES.—

(1) Subparagraph (B) of section 6724(d)(1) is amended by redesignating clauses (ix) through (xiv) as clauses (x) through (xv), respectively, and by inserting after clause (viii) the following new clause:

"(ix) section 6050Q (relating to certain long-term care benefits),".

(2) Paragraph (2) of section 6724(d) is amended by redesignating subparagraphs (Q) through (T) as subparagraphs (R) through (U), respectively, and by inserting after subparagraph (P) the following new subparagraph:

"(Q) section 6050Q(b) (relating to certain long-term care benefits),".

<< 26 USCA Ch. 61 >>

(c) CLERICAL AMENDMENT.—The table of sections for subpart B of part III of subchapter A of chapter 61 is amended by adding at the end the following new item:

"Sec. 6050Q. Certain long-term care benefits.".

<< 26 USCA § 6050Q NOTE >>

<< 26 USCA § 6724 nt >>

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to benefits paid after December 31, 1996.

PART II—CONSUMER PROTECTION PROVISIONS

<< 26 USCA § 7702B >>

SEC. 325. POLICY REQUIREMENTS.

Section 7702B (as added by section 321) is amended by adding at the end the following new subsection:

"(g) CONSUMER PROTECTION PROVISIONS.—

"(1) IN GENERAL.—The requirements of this subsection are met with respect to any contract if the contract meets—

"(A) the requirements of the model regulation and model Act described in paragraph (2),

"(B) the disclosure requirement of paragraph (3), and

"(C) the requirements relating to nonforfeitability under paragraph (4).

"(2) REQUIREMENTS OF MODEL REGULATION AND ACT.—

"(A) IN GENERAL.—The requirements of this paragraph are met with respect to any contract if such contract meets—

"(i) MODEL REGULATION.—The following requirements of the model regulation:

"(I) Section 7A (relating to guaranteed renewal or noncancellability), and the requirements of section 6B of the model Act relating to such section 7A.

"(II) Section 7B (relating to prohibitions on limitations and exclusions).

"(III) Section 7C (relating to extension of benefits).

"(IV) Section 7D (relating to continuation or conversion of coverage).

"(V) Section 7E (relating to discontinuance and replacement of policies).

"(VI) Section 8 (relating to unintentional lapse).

"(VII) Section 9 (relating to disclosure), other than section 9F thereof.

"(VIII) Section 10 (relating to prohibitions against post-claims underwriting).

"(IX) Section 11 (relating to minimum standards).

"(X) Section 12 (relating to requirement to offer inflation protection), except that any requirement for a signature on a rejection of inflation protection shall permit the signature to be on an application or on a separate form.

"(XI) Section 23 (relating to prohibition against preexisting conditions and probationary periods in replacement policies or certificates).

"(ii) MODEL ACT.—The following requirements of the model Act:

"(I) Section 6C (relating to preexisting conditions).

"(II) Section 6D (relating to prior hospitalization).

"(B) DEFINITIONS.—For purposes of this paragraph—

"(i) MODEL PROVISIONS.—The terms 'model regulation' and 'model Act' mean the long-term care insurance model regulation, and the long-term care insurance model Act, respectively, promulgated by the National Association of Insurance Commissioners (as adopted as of January 1993).

"(ii) COORDINATION.—Any provision of the model regulation or model Act listed under clause (i) or (ii) of subparagraph (A) shall be treated as including any other provision of such regulation or Act necessary to implement the provision.

"(iii) DETERMINATION.—For purposes of this section and section 4980C, the determination of whether any requirement of a model regulation or the model Act has been met shall be made by the Secretary.

"(3) DISCLOSURE REQUIREMENT.—The requirement of this paragraph is met with respect to any contract if such contract meets the requirements of section 4980C(d).

"(4) NONFORFEITURE REQUIREMENTS.—

"(A) IN GENERAL.—The requirements of this paragraph are met with respect to any level premium contract, if the issuer of such contract offers to the policyholder, including any group policyholder, a nonforfeiture provision meeting the requirements of subparagraph (B).

"(B) REQUIREMENTS OF PROVISION.—The nonforfeiture provision required under subparagraph (A) shall meet the following requirements:

"(i) The nonforfeiture provision shall be appropriately captioned.

"(ii) The nonforfeiture provision shall provide for a benefit available in the event of a default in the payment of any premiums and the amount of the benefit may be adjusted subsequent to being initially granted only as necessary to reflect changes in claims, persistency, and interest as reflected in changes in rates for premium paying contracts approved by the Secretary for the same contract form.

"(iii) The nonforfeiture provision shall provide at least one of the following:

"(I) Reduced paid-up insurance.

"(II) Extended term insurance.

"(III) Shortened benefit period.

"(IV) Other similar offerings approved by the Secretary.

"(5) CROSS REFERENCE.—

"For coordination of the requirements of this subsection with State requirements, see section 4980C(f).".

SEC. 326. REQUIREMENTS FOR ISSUERS OF QUALIFIED LONG–TERM CARE INSURANCE CONTRACTS.

<< 26 USCA § 4980C >>

(a) IN GENERAL.—Chapter 43 is amended by adding at the end the following new section:

"SEC. 4980C. REQUIREMENTS FOR ISSUERS OF QUALIFIED LONG–TERM CARE INSURANCE CONTRACTS.

"(a) GENERAL RULE.—There is hereby imposed on any person failing to meet the requirements of subsection (c) or (d) a tax in the amount determined under subsection (b).

"(b) AMOUNT.—

"(1) IN GENERAL.—The amount of the tax imposed by subsection (a) shall be $100 per insured for each day any requirement of subsection (c) or (d) is not met with respect to each qualified long-term care insurance contract.

"(2) WAIVER.—In the case of a failure which is due to reasonable cause and not to willful neglect, the Secretary may waive part or all of the tax imposed by subsection (a) to the extent that payment of the tax would be excessive relative to the failure involved.

"(c) RESPONSIBILITIES.—The requirements of this subsection are as follows:

"(1) REQUIREMENTS OF MODEL PROVISIONS.—

"(A) MODEL REGULATION.—The following requirements of the model regulation must be met:

"(i) Section 13 (relating to application forms and replacement coverage).

"(ii) Section 14 (relating to reporting requirements), except that the issuer shall also report at least annually the number of claims denied during the reporting period for each class of business (expressed as a percentage of claims denied), other than claims denied for failure to meet the waiting period or because of any applicable preexisting condition.

"(iii) Section 20 (relating to filing requirements for marketing).

"(iv) Section 21 (relating to standards for marketing), including inaccurate completion of medical histories, other than sections 21C(1) and 21C(6) thereof, except that—

"(I) in addition to such requirements, no person shall, in selling or offering to sell a qualified long-term care insurance contract, misrepresent a material fact; and

"(II) no such requirements shall include a requirement to inquire or identify whether a prospective applicant or enrollee for long-term care insurance has accident and sickness insurance.

"(v) Section 22 (relating to appropriateness of recommended purchase).

"(vi) Section 24 (relating to standard format outline of coverage).

"(vii) Section 25 (relating to requirement to deliver shopper's guide).

"(B) MODEL ACT.—The following requirements of the model Act must be met:

"(i) Section 6F (relating to right to return), except that such section shall also apply to denials of applications and any refund shall be made within 30 days of the return or denial.

"(ii) Section 6G (relating to outline of coverage).

"(iii) Section 6H (relating to requirements for certificates under group plans).

"(iv) Section 6I (relating to policy summary).

"(v) Section 6J (relating to monthly reports on accelerated death benefits).

"(vi) Section 7 (relating to incontestability period).

"(C) DEFINITIONS.—For purposes of this paragraph, the terms 'model regulation' and 'model Act' have the meanings given such terms by section 7702B(g)(2)(B).

"(2) DELIVERY OF POLICY.—If an application for a qualified long-term care insurance contract (or for a certificate under such a contract for a group) is approved, the issuer shall deliver to the applicant (or policyholder or certificateholder) the contract (or certificate) of insurance not later than 30 days after the date of the approval.

"(3) INFORMATION ON DENIALS OF CLAIMS.—If a claim under a qualified, long-term care insurance contract is denied, the issuer shall, within 60 days of the date of a written request by the policyholder or certificateholder (or representative)—

"(A) provide a written explanation of the reasons for the denial, and

"(B) make available all information directly relating to such denial.

"(d) DISCLOSURE.—The requirements of this subsection are met if the issuer of a long-term care insurance policy discloses in such policy and in the outline of coverage required under subsection (c)(1)(B)(ii) that the policy is intended to be a qualified long-term care insurance contract under section 7702B(b).

"(e) QUALIFIED LONG–TERM CARE INSURANCE CONTRACT DEFINED.—For purposes of this section, the term 'qualified long-term care insurance contract' has the meaning given such term by section 7702B.

"(f) COORDINATION WITH STATE REQUIREMENTS.—If a State imposes any requirement which is more stringent than the analogous requirement imposed by this section or section 7702B(g), the requirement imposed by this section or section 7702B(g) shall be treated as met if the more stringent State requirement is met.".

<< 26 USCA Ch. 43 >>

(b) CONFORMING AMENDMENT.—The table of sections for chapter 43 is amended by adding at the end the following new item:

"Sec. 4980C. Requirements for issuers of qualified long-term care insurance contracts.".

<< 26 USCA § 4980C NOTE >>

SEC. 327. EFFECTIVE DATES.

(a) IN GENERAL.—The provisions of, and amendments made by, this part shall apply to contracts issued after December 31, 1996. The provisions of section 321(f) (relating to transition rule) shall apply to such contracts.

(b) ISSUERS.—The amendments made by section 326 shall apply to actions taken after December 31, 1996.

Subtitle D—Treatment of Accelerated Death Benefits

SEC. 331. TREATMENT OF ACCELERATED DEATH BENEFITS BY RECIPIENT.

<< 26 USCA § 101 >>

(a) IN GENERAL.—Section 101 (relating to certain death benefits) is amended by adding at the end the following new subsection:

"(g) TREATMENT OF CERTAIN ACCELERATED DEATH BENEFITS.—

"(1) IN GENERAL.—For purposes of this section, the following amounts shall be treated as an amount paid by reason of the death of an insured:

"(A) Any amount received under a life insurance contract on the life of an insured who is a terminally ill individual.

"(B) Any amount received under a life insurance contract on the life of an insured who is a chronically ill individual.

"(2) TREATMENT OF VIATICAL SETTLEMENTS.—

"(A) IN GENERAL.—If any portion of the death benefit under a life insurance contract on the life of an insured described in paragraph (1) is sold or assigned to a viatical settlement provider, the amount paid for the sale or assignment of such portion shall be treated as an amount paid under the life insurance contract by reason of the death of such insured.

"(B) VIATICAL SETTLEMENT PROVIDER.—

"(i) IN GENERAL.—The term 'viatical settlement provider' means any person regularly engaged in the trade or business of purchasing, or taking assignments of, life insurance contracts on the lives of insureds described in paragraph (1) if—

"(I) such person is licensed for such purposes (with respect to insureds described in the same subparagraph of paragraph (1) as the insured) in the State in which the insured resides, or

"(II) in the case of an insured who resides in a State not requiring the licensing of such persons for such purposes with respect to such insured, such person meets the requirements of clause (ii) or (iii), whichever applies to such insured.

"(ii) TERMINALLY ILL INSUREDS.—A person meets the requirements of this clause with respect to an insured who is a terminally ill individual if such person—

"(I) meets the requirements of sections 8 and 9 of the Viatical Settlements Model Act of the National Association of Insurance Commissioners, and

"(II) meets the requirements of the Model Regulations of the National Association of Insurance Commissioners (relating to standards for evaluation of reasonable payments) in determining amounts paid by such person in connection with such purchases or assignments.

"(iii) CHRONICALLY ILL INSUREDS.—A person meets the requirements of this clause with respect to an insured who is a chronically ill individual if such person—

"(I) meets requirements similar to the requirements referred to in clause (ii)(I), and

"(II) meets the standards (if any) of the National Association of Insurance Commissioners for evaluating the reasonableness of amounts paid by such person in connection with such purchases or assignments with respect to chronically ill individuals.

"(3) SPECIAL RULES FOR CHRONICALLY ILL INSUREDS.—In the case of an insured who is a chronically ill individual —

"(A) IN GENERAL.—Paragraphs (1) and (2) shall not apply to any payment received for any period unless—

"(i) such payment is for costs incurred by the payee (not compensated for by insurance or otherwise) for qualified long-term care services provided for the insured for such period, and

"(ii) the terms of the contract giving rise to such payment satisfy—

"(I) the requirements of section 7702B(b)(1)(B), and

"(II) the requirements (if any) applicable under subparagraph (B).

For purposes of the preceding sentence, the rule of section 7702B(b)(2)(B) shall apply.

"(B) OTHER REQUIREMENTS.—The requirements applicable under this subparagraph are—

"(i) those requirements of section 7702B(g) and section 4980C which the Secretary specifies as applying to such a purchase, assignment, or other arrangement,

"(ii) standards adopted by the National Association of Insurance Commissioners which specifically apply to chronically ill individuals (and, if such standards are adopted, the analogous requirements specified under clause (i) shall cease to apply), and

"(iii) standards adopted by the State in which the policyholder resides (and if such standards are adopted, the analogous requirements specified under clause (i) and (subject to section 4980C(f)) standards under clause (ii), shall cease to apply).

"(C) PER DIEM PAYMENTS.—A payment shall not fail to be described in subparagraph (A) by reason of being made on a per diem or other periodic basis without regard to the expenses incurred during the period to which the payment relates.

"(D) LIMITATION ON EXCLUSION FOR PERIODIC PAYMENTS.—

"For limitation on amount of periodic payments which are treated as described in paragraph (1), see section 7702B(d).".

"(4) DEFINITIONS.—For purposes of this subsection—

"(A) TERMINALLY ILL INDIVIDUAL.—The term 'terminally ill individual' means an individual who has been certified by a physician as having an illness or physical condition which can reasonably be expected to result in death in 24 months or less after the date of the certification.

"(B) CHRONICALLY ILL INDIVIDUAL.—The term 'chronically ill individual' has the meaning given such term by section 7702B(c)(2); except that such term shall not include a terminally ill individual.

"(C) QUALIFIED LONG–TERM CARE SERVICES.—The term 'qualified long-term care services' has the meaning given such term by section 7702B(c).

"(D) PHYSICIAN.—The term 'physician' has the meaning given to such term by section 1861(r)(1) of the Social Security Act (42 U.S.C. 1395x(r)(1)).

"(5) EXCEPTION FOR BUSINESS–RELATED POLICIES.—This subsection shall not apply in the case of any amount paid to any taxpayer other than the insured if such taxpayer has an insurable interest with respect to the life of the insured by reason of the insured being a director, officer, or employee of the taxpayer or by reason of the insured being financially interested in any trade or business carried on by the taxpayer.".

<< 26 USCA § 101 NOTE >>

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to amounts received after December 31, 1996.

SEC. 332. TAX TREATMENT OF COMPANIES ISSUING QUALIFIED ACCELERATED DEATH BENEFIT RIDERS.

<< 26 USCA § 818 >>

(a) QUALIFIED ACCELERATED DEATH BENEFIT RIDERS TREATED AS LIFE INSURANCE.—Section 818 (relating to other definitions and special rules) is amended by adding at the end the following new subsection:

"(g) QUALIFIED ACCELERATED DEATH BENEFIT RIDERS TREATED AS LIFE INSURANCE.—For purposes of this part—

"(1) IN GENERAL.—Any reference to a life insurance contract shall be treated as including a reference to a qualified accelerated death benefit rider on such contract.

"(2) QUALIFIED ACCELERATED DEATH BENEFIT RIDERS.—For purposes of this subsection, the term 'qualified accelerated death benefit rider' means any rider on a life insurance contract if the only payments under the rider are payments meeting the requirements of section 101(g).

"(3) EXCEPTION FOR LONG–TERM CARE RIDERS.—Paragraph (1) shall not apply to any rider which is treated as a long-term care insurance contract under section 7702B.".

(b) EFFECTIVE DATE.—

<< 26 USCA § 818 NOTE >>

(1) IN GENERAL.—The amendment made by this section shall take effect on January 1, 1997.

(2) ISSUANCE OF RIDER NOT TREATED AS MATERIAL CHANGE.—For purposes of applying sections 101(f), 7702, and 7702A of the Internal Revenue Code of 1986 to any contract—

(A) the issuance of a qualified accelerated death benefit rider (as defined in section 818(g) of such Code (as added by this Act)), and

(B) the addition of any provision required to conform an accelerated death benefit rider to the requirements of such section 818(g),

shall not be treated as a modification or material change of such contract.

Subtitle E—State Insurance Pools

SEC. 341. EXEMPTION FROM INCOME TAX FOR STATE–SPONSORED ORGANIZATIONS PROVIDING HEALTH COVERAGE FOR HIGH–RISK INDIVIDUALS.

<< 26 USCA § 501 >>

(a) IN GENERAL.—Subsection (c) of section 501 (relating to list of exempt organizations) is amended by adding at the end the following new paragraph:

"(26) Any membership organization if—

"(A) such organization is established by a State exclusively to provide coverage for medical care (as defined in section 213(d)) on a not-for-profit basis to individuals described in subparagraph (B) through—

"(i) insurance issued by the organization, or

"(ii) a health maintenance organization under an arrangement with the organization,

"(B) the only individuals receiving such coverage through the organization are individuals—

"(i) who are residents of such State, and

"(ii) who, by reason of the existence or history of a medical condition—

"(I) are unable to acquire medical care coverage for such condition through insurance or from a health maintenance organization, or

"(II) are able to acquire such coverage only at a rate which is substantially in excess of the rate for such coverage through the membership organization,

"(C) the composition of the membership in such organization is specified by such State, and

"(D) no part of the net earnings of the organization inures to the benefit of any private shareholder or individual.".

<< 26 USCA § 501 NOTE >>

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years beginning after December 31, 1996.

SEC. 342. EXEMPTION FROM INCOME TAX FOR STATE–SPONSORED WORKMEN'S COMPENSATION REINSURANCE ORGANIZATIONS.

<< 26 USCA § 501 >>

(a) IN GENERAL.—Subsection (c) of section 501 (relating to list of exempt organizations), as amended by section 341, is amended by adding at the end the following new paragraph:

"(27) Any membership organization if—

"(A) such organization is established before June 1, 1996, by a State exclusively to reimburse its members for losses arising under workmen's compensation acts,

"(B) such State requires that the membership of such organization consist of—

"(i) all persons who issue insurance covering workmen's compensation losses in such State, and

"(ii) all persons and governmental entities who self-insure against such losses, and

"(C) such organization operates as a non-profit organization by—

"(i) returning surplus income to its members or workmen's compensation policyholders on a periodic basis, and

"(ii) reducing initial premiums in anticipation of investment income.".

<< 26 USCA § 501 NOTE >>

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years ending after the date of the enactment of this Act.

Subtitle F—Organizations Subject to Section 833

SEC. 351. ORGANIZATIONS SUBJECT TO SECTION 833.

<< 26 USCA § 833 >>

(a) IN GENERAL.—Section 833(c) (relating to organization to which section applies) is amended by adding at the end the following new paragraph:

"(4) TREATMENT AS EXISTING BLUE CROSS OR BLUE SHIELD ORGANIZATION.—

"(A) IN GENERAL.—Paragraph (2) shall be applied to an organization described in subparagraph (B) as if it were a Blue Cross or Blue Shield organization.

"(B) APPLICABLE ORGANIZATION.—An organization is described in this subparagraph if it—

"(i) is organized under, and governed by, State laws which are specifically and exclusively applicable to not-for-profit health insurance or health service type organizations, and

"(ii) is not a Blue Cross or Blue Shield organization or health maintenance organization.".

<< 26 USCA § 833 NOTE >>

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years ending after December 31, 1996.

Subtitle G—IRA Distributions to the Unemployed

SEC. 361. DISTRIBUTIONS FROM CERTAIN PLANS MAY BE USED WITHOUT ADDITIONAL TAX TO PAY FINANCIALLY DEVASTATING MEDICAL EXPENSES.

<< 26 USCA § 72 >>

(a) IN GENERAL.—Section 72(t)(3)(A) is amended by striking "(B),".

(b) DISTRIBUTIONS FOR PAYMENT OF HEALTH INSURANCE PREMIUMS OF CERTAIN UNEMPLOYED INDIVIDUALS.—Paragraph (2) of section 72(t) is amended by adding at the end the following new subparagraph:

"(D) DISTRIBUTIONS TO UNEMPLOYED INDIVIDUALS FOR HEALTH INSURANCE PREMIUMS.—

"(i) IN GENERAL.—Distributions from an individual retirement plan to an individual after separation from employment—

"(I) if such individual has received unemployment compensation for 12 consecutive weeks under any Federal or State unemployment compensation law by reason of such separation,

"(II) if such distributions are made during any taxable year during which such unemployment compensation is paid or the succeeding taxable year, and

"(III) to the extent such distributions do not exceed the amount paid during the taxable year for insurance described in section 213(d)(1)(D) with respect to the individual and the individual's spouse and dependents (as defined in section 152).

"(ii) DISTRIBUTIONS AFTER REEMPLOYMENT.—Clause (i) shall not apply to any distribution made after the individual has been employed for at least 60 days after the separation from employment to which clause (i) applies.

"(iii) SELF–EMPLOYED INDIVIDUALS.—To the extent provided in regulations, a self-employed individual shall be treated as meeting the requirements of clause (i)(I) if, under Federal or State law, the individual would have received unemployment compensation but for the fact the individual was self-employed.".

(c) CONFORMING AMENDMENT.—Subparagraph (B) of section 72(t)(2) is amended by striking "or (C)" and inserting ", (C), or (D)".

<< 26 USCA § 72 NOTE >>

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to distributions after December 31, 1996.

Subtitle H—Organ and Tissue Donation Information Included With Income Tax Refund Payments

<< 26 USCA § 6402 NOTE >>

SEC. 371. ORGAN AND TISSUE DONATION INFORMATION INCLUDED WITH INCOME TAX REFUND PAYMENTS.

(a) IN GENERAL.—The Secretary of the Treasury shall, to the extent practicable, include with the mailing of any payment of a refund of individual income tax made during the period beginning on February 1, 1997, and ending on June 30, 1997, a copy of the document described in subsection (b).

(b) TEXT OF DOCUMENT.—The Secretary of the Treasury shall, after consultation with the Secretary of Health and Human Services and organizations promoting organ and tissue (including eye) donation, prepare a document suitable for inclusion with individual income tax refund payments which—

(1) encourages organ and tissue donation;

(2) includes a detachable organ and tissue donor card; and

(3) urges recipients to—

(A) sign the organ and tissue donor card;

(B) discuss organ and tissue donation with family members and tell family members about the recipient's desire to be an organ and tissue donor if the occasion arises; and

(C) encourage family members to request or authorize organ and tissue donation if the occasion arises.

TITLE IV—APPLICATION AND ENFORCEMENT OF GROUP HEALTH PLAN REQUIREMENTS

Subtitle A—Application and Enforcement of Group Health Plan Requirements

SEC. 401. GROUP HEALTH PLAN PORTABILITY, ACCESS, AND RENEWABILITY REQUIREMENTS.

(a) IN GENERAL.—The Internal Revenue Code of 1986 is amended by adding at the end the following new subtitle:

<< 26 USCA Ch. 100 >>

"Subtitle K—Group Health Plan Portability, Access, and Renewability Requirements

"Chapter 100. Group health plan portability, access, and renewability requirements.

"CHAPTER 100—GROUP HEALTH PLAN PORTABILITY, ACCESS, AND RENEWABILITY REQUIREMENTS

"Sec. 9801. Increased portability through limitation on preexisting condition exclusions.

"Sec. 9802. Prohibiting discrimination against individual participants and beneficiaries based on health status.

"Sec. 9803. Guaranteed renewability in multiemployer plans and certain multiple employer welfare arrangements.

<< 26 USCA § 9801 >>

“SEC. 9801. INCREASED PORTABILITY THROUGH LIMITATION ON PREEXISTING CONDITION EXCLUSIONS.

“(a) LIMITATION ON PREEXISTING CONDITION EXCLUSION PERIOD; CREDITING FOR PERIODS OF PREVIOUS COVERAGE.—Subject to subsection (d), a group health plan may, with respect to a participant or beneficiary, impose a preexisting condition exclusion only if—

“(1) such exclusion relates to a condition (whether physical or mental), regardless of the cause of the condition, for which medical advice, diagnosis, care, or treatment was recommended or received within the 6–month period ending on the enrollment date;

“(2) such exclusion extends for a period of not more than 12 months (or 18 months in the case of a late enrollee) after the enrollment date; and

“(3) the period of any such preexisting condition exclusion is reduced by the length of the aggregate of the periods of creditable coverage (if any) applicable to the participant or beneficiary as of the enrollment date.

“(b) DEFINITIONS.—For purposes of this section—

“(1) PREEXISTING CONDITION EXCLUSION.—

“(A) IN GENERAL.—The term ‘preexisting condition exclusion’ means, with respect to coverage, a limitation or exclusion of benefits relating to a condition based on the fact that the condition was present before the date of enrollment for such coverage, whether or not any medical advice, diagnosis, care, or treatment was recommended or received before such date.

“(B) TREATMENT OF GENETIC INFORMATION.—For purposes of this section, genetic information shall not be treated as a condition described in subsection (a)(1) in the absence of a diagnosis of the condition related to such information.

“(2) ENROLLMENT DATE.—The term ‘enrollment date’ means, with respect to an individual covered under a group health plan, the date of enrollment of the individual in the plan or, if earlier, the first day of the waiting period for such enrollment.

“(3) LATE ENROLLEE.—The term ‘late enrollee’ means, with respect to coverage under a group health plan, a participant or beneficiary who enrolls under the plan other than during—

“(A) the first period in which the individual is eligible to enroll under the plan, or

“(B) a special enrollment period under subsection (f).

“(4) WAITING PERIOD.—The term ‘waiting period’ means, with respect to a group health plan and an individual who is a potential participant or beneficiary in the plan, the period that must pass with respect to the individual before the individual is eligible to be covered for benefits under the terms of the plan.

“(c) RULES RELATING TO CREDITING PREVIOUS COVERAGE.—

“(1) CREDITABLE COVERAGE DEFINED.—For purposes of this part, the term ‘creditable coverage’ means, with respect to an individual, coverage of the individual under any of the following:

“(A) A group health plan.

“(B) Health insurance coverage.

“(C) Part A or part B of title XVIII of the Social Security Act.

“(D) Title XIX of the Social Security Act, other than coverage consisting solely of benefits under section 1928.

“(E) Chapter 55 of title 10, United States Code.

“(F) A medical care program of the Indian Health Service or of a tribal organization.

“(G) A State health benefits risk pool.

“(H) A health plan offered under chapter 89 of title 5, United States Code.

“(I) A public health plan (as defined in regulations).

“(J) A health benefit plan under section 5(e) of the Peace Corps Act (22 U.S.C. 2504(e)).

Such term does not include coverage consisting solely of coverage of excepted benefits (as defined in section 9805(c)).

"(2) NOT COUNTING PERIODS BEFORE SIGNIFICANT BREAKS IN COVERAGE.—

"(A) IN GENERAL.—A period of creditable coverage shall not be counted, with respect to enrollment of an individual under a group health plan, if, after such period and before the enrollment date, there was a 63–day period during all of which the individual was not covered under any creditable coverage.

"(B) WAITING PERIOD NOT TREATED AS A BREAK IN COVERAGE.—For purposes of subparagraph (A) and subsection (d)(4), any period that an individual is in a waiting period for any coverage under a group health plan or is in an affiliation period shall not be taken into account in determining the continuous period under subparagraph (A).

"(C) AFFILIATION PERIOD.—

"(i) IN GENERAL.—For purposes of this section, the term 'affiliation period' means a period which, under the terms of the health insurance coverage offered by the health maintenance organization, must expire before the health insurance coverage becomes effective. During such an affiliation period, the organization is not required to provide health care services or benefits and no premium shall be charged to the participant or beneficiary.

"(ii) BEGINNING.—Such period shall begin on the enrollment date.

"(iii) RUNS CONCURRENTLY WITH WAITING PERIODS.—Any such affiliation period shall run concurrently with any waiting period under the plan.

"(3) METHOD OF CREDITING COVERAGE.—

"(A) STANDARD METHOD.—Except as otherwise provided under subparagraph (B), for purposes of applying subsection (a)(3), a group health plan shall count a period of creditable coverage without regard to the specific benefits for which coverage is offered during the period.

"(B) ELECTION OF ALTERNATIVE METHOD.—A group health plan may elect to apply subsection (a)(3) based on coverage of any benefits within each of several classes or categories of benefits specified in regulations rather than as provided under subparagraph (A). Such election shall be made on a uniform basis for all participants and beneficiaries. Under such election a group health plan shall count a period of creditable coverage with respect to any class or category of benefits if any level of benefits is covered within such class or category.

"(C) PLAN NOTICE.—In the case of an election with respect to a group health plan under subparagraph (B), the plan shall—

"(i) prominently state in any disclosure statements concerning the plan, and state to each enrollee at the time of enrollment under the plan, that the plan has made such election, and

"(ii) include in such statements a description of the effect of this election.

"(4) ESTABLISHMENT OF PERIOD.—Periods of creditable coverage with respect to an individual shall be established through presentation of certifications described in subsection (e) or in such other manner as may be specified in regulations.

"(d) EXCEPTIONS.—

"(1) EXCLUSION NOT APPLICABLE TO CERTAIN NEWBORNS.—Subject to paragraph (4), a group health plan may not impose any preexisting condition exclusion in the case of an individual who, as of the last day of the 30–day period beginning with the date of birth, is covered under creditable coverage.

"(2) EXCLUSION NOT APPLICABLE TO CERTAIN ADOPTED CHILDREN.—Subject to paragraph (4), a group health plan may not impose any preexisting condition exclusion in the case of a child who is adopted or placed for adoption before attaining 18 years of age and who, as of the last day of the 30–day period beginning on the date of the adoption or placement for adoption, is covered under creditable coverage. The previous sentence shall not apply to coverage before the date of such adoption or placement for adoption.

"(3) EXCLUSION NOT APPLICABLE TO PREGNANCY.—For purposes of this section, a group health plan may not impose any preexisting condition exclusion relating to pregnancy as a preexisting condition.

"(4) LOSS IF BREAK IN COVERAGE.—Paragraphs (1) and (2) shall no longer apply to an individual after the end of the first 63–day period during all of which the individual was not covered under any creditable coverage.

"(e) CERTIFICATIONS AND DISCLOSURE OF COVERAGE.—

"(1) REQUIREMENT FOR CERTIFICATION OF PERIOD OF CREDITABLE COVERAGE.—

"(A) IN GENERAL.—A group health plan shall provide the certification described in subparagraph (B)—

"(i) at the time an individual ceases to be covered under the plan or otherwise becomes covered under a COBRA continuation provision,

"(ii) in the case of an individual becoming covered under such a provision, at the time the individual ceases to be covered under such provision, and

"(iii) on the request on behalf of an individual made not later than 24 months after the date of cessation of the coverage described in clause (i) or (ii), whichever is later.

The certification under clause (i) may be provided, to the extent practicable, at a time consistent with notices required under any applicable COBRA continuation provision.

"(B) CERTIFICATION.—The certification described in this subparagraph is a written certification of—

"(i) the period of creditable coverage of the individual under such plan and the coverage under such COBRA continuation provision, and

"(ii) the waiting period (if any) (and affiliation period, if applicable) imposed with respect to the individual for any coverage under such plan.

"(C) ISSUER COMPLIANCE.—To the extent that medical care under a group health plan consists of health insurance coverage offered in connection with the plan, the plan is deemed to have satisfied the certification requirement under this paragraph if the issuer provides for such certification in accordance with this paragraph.

"(2) DISCLOSURE OF INFORMATION ON PREVIOUS BENEFITS.—

"(A) IN GENERAL.—In the case of an election described in subsection (c)(3)(B) by a group health plan, if the plan enrolls an individual for coverage under the plan and the individual provides a certification of coverage of the individual under paragraph (1)—

"(i) upon request of such plan, the entity which issued the certification provided by the individual shall promptly disclose to such requesting plan information on coverage of classes and categories of health benefits available under such entity's plan, and

"(ii) such entity may charge the requesting plan or issuer for the reasonable cost of disclosing such information.

"(3) REGULATIONS.—The Secretary shall establish rules to prevent an entity's failure to provide information under paragraph (1) or (2) with respect to previous coverage of an individual from adversely affecting any subsequent coverage of the individual under another group health plan or health insurance coverage.

"(f) SPECIAL ENROLLMENT PERIODS.—

"(1) INDIVIDUALS LOSING OTHER COVERAGE.—A group health plan shall permit an employee who is eligible, but not enrolled, for coverage under the terms of the plan (or a dependent of such an employee if the dependent is eligible, but not enrolled, for coverage under such terms) to enroll for coverage under the terms of the plan if each of the following conditions is met:

"(A) The employee or dependent was covered under a group health plan or had health insurance coverage at the time coverage was previously offered to the employee or individual.

"(B) The employee stated in writing at such time that coverage under a group health plan or health insurance coverage was the reason for declining enrollment, but only if the plan sponsor (or the health insurance issuer offering health insurance coverage in connection with the plan) required such a statement at such time and provided the employee with notice of such requirement (and the consequences of such requirement) at such time.

"(C) The employee's or dependent's coverage described in subparagraph (A)—

"(i) was under a COBRA continuation provision and the coverage under such provision was exhausted; or

"(ii) was not under such a provision and either the coverage was terminated as a result of loss of eligibility for the coverage (including as a result of legal separation, divorce, death, termination of employment, or reduction in the number of hours of employment) or employer contributions toward such coverage were terminated.

"(D) Under the terms of the plan, the employee requests such enrollment not later than 30 days after the date of exhaustion of coverage described in subparagraph (C)(i) or termination of coverage or employer contribution described in subparagraph (C)(ii).

"(2) FOR DEPENDENT BENEFICIARIES.—

"(A) IN GENERAL.—If—

"(i) a group health plan makes coverage available with respect to a dependent of an individual,

"(ii) the individual is a participant under the plan (or has met any waiting period applicable to becoming a participant under the plan and is eligible to be enrolled under the plan but for a failure to enroll during a previous enrollment period), and

"(iii) a person becomes such a dependent of the individual through marriage, birth, or adoption or placement for adoption,

the group health plan shall provide for a dependent special enrollment period described in subparagraph (B) during which the person (or, if not otherwise enrolled, the individual) may be enrolled under the plan as a dependent of the individual, and in the case of the birth or adoption of a child, the spouse of the individual may be enrolled as a dependent of the individual if such spouse is otherwise eligible for coverage.

"(B) DEPENDENT SPECIAL ENROLLMENT PERIOD.—The dependent special enrollment period under this subparagraph shall be a period of not less than 30 days and shall begin on the later of—

"(i) the date dependent coverage is made available, or

"(ii) the date of the marriage, birth, or adoption or placement for adoption (as the case may be) described in subparagraph (A)(iii).

"(C) NO WAITING PERIOD.—If an individual seeks coverage of a dependent during the first 30 days of such a dependent special enrollment period, the coverage of the dependent shall become effective—

"(i) in the case of marriage, not later than the first day of the first month beginning after the date the completed request for enrollment is received;

"(ii) in the case of a dependent's birth, as of the date of such birth; or

"(iii) in the case of a dependent's adoption or placement for adoption, the date of such adoption or placement for adoption.

<< 26 USCA § 9802 >>

"SEC. 9802. PROHIBITING DISCRIMINATION AGAINST INDIVIDUAL PARTICIPANTS AND BENEFICIARIES BASED ON HEALTH STATUS.

"(a) IN ELIGIBILITY TO ENROLL.—

"(1) IN GENERAL.—Subject to paragraph (2), a group health plan may not establish rules for eligibility (including continued eligibility) of any individual to enroll under the terms of the plan based on any of the following factors in relation to the individual or a dependent of the individual:

"(A) Health status.

"(B) Medical condition (including both physical and mental illnesses).

"(C) Claims experience.

"(D) Receipt of health care.

"(E) Medical history.

"(F) Genetic information.

"(G) Evidence of insurability (including conditions arising out of acts of domestic violence).

"(H) Disability.

"(2) NO APPLICATION TO BENEFITS OR EXCLUSIONS.—To the extent consistent with section 9801, paragraph (1) shall not be construed—

"(A) to require a group health plan to provide particular benefits (or benefits with respect to a specific procedure, treatment, or service) other than those provided under the terms of such plan; or

"(B) to prevent such a plan from establishing limitations or restrictions on the amount, level, extent, or nature of the benefits or coverage for similarly situated individuals enrolled in the plan or coverage.

"(3) CONSTRUCTION.—For purposes of paragraph (1), rules for eligibility to enroll under a plan include rules defining any applicable waiting periods for such enrollment.

"(b) IN PREMIUM CONTRIBUTIONS.—

"(1) IN GENERAL.—A group health plan may not require any individual (as a condition of enrollment or continued enrollment under the plan) to pay a premium or contribution which is greater than such premium or contribution for a similarly situated individual enrolled in the plan on the basis of any factor described in subsection (a)(1) in relation to the individual or to an individual enrolled under the plan as a dependent of the individual.

"(2) CONSTRUCTION.—Nothing in paragraph (1) shall be construed—

"(A) to restrict the amount that an employer may be charged for coverage under a group health plan; or

"(B) to prevent a group health plan from establishing premium discounts or rebates or modifying otherwise applicable copayments or deductibles in return for adherence to programs of health promotion and disease prevention.

<< 26 USCA § 9803 >>

"SEC. 9803. GUARANTEED RENEWABILITY IN MULTIEMPLOYER PLANS AND CERTAIN MULTIPLE EMPLOYER WELFARE ARRANGEMENTS.

"(a) IN GENERAL.—A group health plan which is a multiemployer plan (as defined in section 414(f)) or which is a multiple employer welfare arrangement may not deny an employer continued access to the same or different coverage under such plan, other than—

"(1) for nonpayment of contributions;

"(2) for fraud or other intentional misrepresentation of material fact by the employer;

"(3) for noncompliance with material plan provisions;

"(4) because the plan is ceasing to offer any coverage in a geographic area;

"(5) in the case of a plan that offers benefits through a network plan, because there is no longer any individual enrolled through the employer who lives, resides, or works in the service area of the network plan and the plan applies this paragraph uniformly without regard to the claims experience of employers or a factor described in section 9802(a)(1) in relation to such individuals or their dependents; or

"(6) for failure to meet the terms of an applicable collective bargaining agreement, to renew a collective bargaining or other agreement requiring or authorizing contributions to the plan, or to employ employees covered by such an agreement.

"(b) MULTIPLE EMPLOYER WELFARE ARRANGEMENT.—For purposes of subsection (a), the term 'multiple employer welfare arrangement' has the meaning given such term by section 3(40) of the Employee Retirement Income Security Act of 1974, as in effect on the date of the enactment of this section.

<< 26 USCA § 9804 >>

"SEC. 9804. GENERAL EXCEPTIONS.

"(a) EXCEPTION FOR CERTAIN PLANS.—The requirements of this chapter shall not apply to—

"(1) any governmental plan, and

"(2) any group health plan for any plan year if, on the first day of such plan year, such plan has less than 2 participants who are current employees.

"(b) EXCEPTION FOR CERTAIN BENEFITS.—The requirements of this chapter shall not apply to any group health plan in relation to its provision of excepted benefits described in section 9805(c)(1).

"(c) EXCEPTION FOR CERTAIN BENEFITS IF CERTAIN CONDITIONS MET.—

"(1) LIMITED, EXCEPTED BENEFITS.—The requirements of this chapter shall not apply to any group health plan in relation to its provision of excepted benefits described in section 9805(c)(2) if the benefits—

"(A) are provided under a separate policy, certificate, or contract of insurance; or

"(B) are otherwise not an integral part of the plan.

"(2) NONCOORDINATED, EXCEPTED BENEFITS.—The requirements of this chapter shall not apply to any group health plan in relation to its provision of excepted benefits described in section 9805(c)(3) if all of the following conditions are met:

"(A) The benefits are provided under a separate policy, certificate, or contract of insurance.

"(B) There is no coordination between the provision of such benefits and any exclusion of benefits under any group health plan maintained by the same plan sponsor.

"(C) Such benefits are paid with respect to an event without regard to whether benefits are provided with respect to such an event under any group health plan maintained by the same plan sponsor.

"(3) SUPPLEMENTAL EXCEPTED BENEFITS.—The requirements of this chapter shall not apply to any group health plan in relation to its provision of excepted benefits described in section 9805(c)(4) if the benefits are provided under a separate policy, certificate, or contract of insurance.

<< 26 USCA § 9805 >>

“SEC. 9805. DEFINITIONS.

“(a) GROUP HEALTH PLAN.—For purposes of this chapter, the term ‘group health plan’ has the meaning given to such term by section 5000(b)(1).

“(b) DEFINITIONS RELATING TO HEALTH INSURANCE.—For purposes of this chapter—

“(1) HEALTH INSURANCE COVERAGE.—

“(A) IN GENERAL.—Except as provided in subparagraph (B), the term ‘health insurance coverage’ means benefits consisting of medical care (provided directly, through insurance or reimbursement, or otherwise) under any hospital or medical service policy or certificate, hospital or medical service plan contract, or health maintenance organization contract offered by a health insurance issuer.

“(B) NO APPLICATION TO CERTAIN EXCEPTED BENEFITS.—In applying subparagraph (A), excepted benefits described in subsection (c)(1) shall not be treated as benefits consisting of medical care.

“(2) HEALTH INSURANCE ISSUER.—The term ‘health insurance issuer’ means an insurance company, insurance service, or insurance organization (including a health maintenance organization, as defined in paragraph (3)) which is licensed to engage in the business of insurance in a State and which is subject to State law which regulates insurance (within the meaning of section 514(b)(2) of the Employee Retirement Income Security Act of 1974, as in effect on the date of the enactment of this section). Such term does not include a group health plan.

“(3) HEALTH MAINTENANCE ORGANIZATION.—The term ‘health maintenance organization’ means—

“(A) a federally qualified health maintenance organization (as defined in section 1301(a) of the Public Health Service Act (42 U.S.C. 300e(a))),

“(B) an organization recognized under State law as a health maintenance organization, or

“(C) a similar organization regulated under State law for solvency in the same manner and to the same extent as such a health maintenance organization.

“(c) EXCEPTED BENEFITS.—For purposes of this chapter, the term ‘excepted benefits' means benefits under one or more (or any combination thereof) of the following:

“(1) BENEFITS NOT SUBJECT TO REQUIREMENTS.—

“(A) Coverage only for accident, or disability income insurance, or any combination thereof.

“(B) Coverage issued as a supplement to liability insurance.

“(C) Liability insurance, including general liability insurance and automobile liability insurance.

“(D) Workers' compensation or similar insurance.

“(E) Automobile medical payment insurance.

“(F) Credit-only insurance.

“(G) Coverage for on-site medical clinics.

“(H) Other similar insurance coverage, specified in regulations, under which benefits for medical care are secondary or incidental to other insurance benefits.

“(2) BENEFITS NOT SUBJECT TO REQUIREMENTS IF OFFERED SEPARATELY.—

“(A) Limited scope dental or vision benefits.

“(B) Benefits for long-term care, nursing home care, home health care, community-based care, or any combination thereof.

“(C) Such other similar, limited benefits as are specified in regulations.

“(3) BENEFITS NOT SUBJECT TO REQUIREMENTS IF OFFERED AS INDEPENDENT, NONCOORDINATED BENEFITS.—

“(A) Coverage only for a specified disease or illness.

“(B) Hospital indemnity or other fixed indemnity insurance.

“(4) BENEFITS NOT SUBJECT TO REQUIREMENTS IF OFFERED AS SEPARATE INSURANCE POLICY.—Medicare supplemental health insurance (as defined under section 1882(g)(1) of the Social Security Act), coverage supplemental to the coverage provided under chapter 55 of title 10, United States Code, and similar supplemental coverage provided to coverage under a group health plan.

"(d) OTHER DEFINITIONS.—For purposes of this chapter—

"(1) COBRA CONTINUATION PROVISION.—The term 'COBRA continuation provision' means any of the following:

"(A) Section 4980B, other than subsection (f)(1) thereof insofar as it relates to pediatric vaccines.

"(B) Part 6 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1161 et seq.), other than section 609 of such Act.

"(C) Title XXII of the Public Health Service Act.

"(2) GOVERNMENTAL PLAN.—The term 'governmental plan' has the meaning given such term by section 414(d).

"(3) MEDICAL CARE.—The term 'medical care' has the meaning given such term by section 213(d) determined without regard to—

"(A) paragraph (1)(C) thereof, and

"(B) so much of paragraph (1)(D) thereof as relates to qualified long-term care insurance.

"(4) NETWORK PLAN.—The term 'network plan' means health insurance coverage of a health insurance issuer under which the financing and delivery of medical care are provided, in whole or in part, through a defined set of providers under contract with the issuer.

"(5) PLACED FOR ADOPTION DEFINED.—The term 'placement', or being 'placed', for adoption, in connection with any placement for adoption of a child with any person, means the assumption and retention by such person of a legal obligation for total or partial support of such child in anticipation of adoption of such child. The child's placement with such person terminates upon the termination of such legal obligation.

<< 26 USCA § 9806 >>

"SEC. 9806. REGULATIONS.

"The Secretary, consistent with section 104 of the Health Care Portability and Accountability Act of 1996, may promulgate such regulations as may be necessary or appropriate to carry out the provisions of this chapter. The Secretary may promulgate any interim final rules as the Secretary determines are appropriate to carry out this chapter.".

<< 26 USCA Ch. 1 >>

(b) CLERICAL AMENDMENT.—The table of subtitles of such Code is amended by adding at the end the following new item:

"Subtitle K. Group health plan portability, access, and renewability requirements.".

<< 26 USCA §§ 9801 NOTE, 9802 nt, 9803 nt, 9804 nt, 9805 nt, 9806 nt >>

(c) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendments made by this section shall apply to plan years beginning after June 30, 1997.

(2) DETERMINATION OF CREDITABLE COVERAGE.—

(A) PERIOD OF COVERAGE.—

(i) IN GENERAL.—Subject to clause (ii), no period before July 1, 1996, shall be taken into account under chapter 100 of the Internal Revenue Code of 1986 (as added by this section) in determining creditable coverage.

(ii) SPECIAL RULE FOR CERTAIN PERIODS.—The Secretary of the Treasury, consistent with section 104, shall provide for a process whereby individuals who need to establish creditable coverage for periods before July 1, 1996, and who would have such coverage credited but for clause (i) may be given credit for creditable coverage for such periods through the presentation of documents or other means.

(B) CERTIFICATIONS, ETC.—

(i) IN GENERAL.—Subject to clauses (ii) and (iii), subsection (e) of section 9801 of the Internal Revenue Code of 1986 (as added by this section) shall apply to events occurring after June 30, 1996.

(ii) NO CERTIFICATION REQUIRED TO BE PROVIDED BEFORE JUNE 1, 1997.—In no case is a certification required to be provided under such subsection before June 1, 1997.

(iii) CERTIFICATION ONLY ON WRITTEN REQUEST FOR EVENTS OCCURRING BEFORE OCTOBER 1, 1996.—In the case of an event occurring after June 30, 1996, and before October 1, 1996, a certification is not required to be provided under such subsection unless an individual (with respect to whom the certification is otherwise required to be made) requests such certification in writing.

(C) TRANSITIONAL RULE.—In the case of an individual who seeks to establish creditable coverage for any period for which certification is not required because it relates to an event occurring before June 30, 1996—

(i) the individual may present other credible evidence of such coverage in order to establish the period of creditable coverage; and

(ii) a group health plan and a health insurance issuer shall not be subject to any penalty or enforcement action with respect to the plan's or issuer's crediting (or not crediting) such coverage if the plan or issuer has sought to comply in good faith with the applicable requirements under the amendments made by this section.

(3) SPECIAL RULE FOR COLLECTIVE BARGAINING AGREEMENTS.—Except as provided in paragraph (2), in the case of a group health plan maintained pursuant to 1 or more collective bargaining agreements between employee representatives and one or more employers ratified before the date of the enactment of this Act, the amendments made by this section shall not apply to plan years beginning before the later of—

(A) the date on which the last of the collective bargaining agreements relating to the plan terminates (determined without regard to any extension thereof agreed to after the date of the enactment of this Act), or

(B) July 1, 1997.

For purposes of subparagraph (A), any plan amendment made pursuant to a collective bargaining agreement relating to the plan which amends the plan solely to conform to any requirement added by this section shall not be treated as a termination of such collective bargaining agreement.

(4) TIMELY REGULATIONS.—The Secretary of the Treasury, consistent with section 104, shall first issue by not later than April 1, 1997, such regulations as may be necessary to carry out the amendments made by this section.

(5) LIMITATION ON ACTIONS.—No enforcement action shall be taken, pursuant to the amendments made by this section, against a group health plan or health insurance issuer with respect to a violation of a requirement imposed by such amendments before January 1, 1998, or, if later, the date of issuance of regulations referred to in paragraph (4), if the plan or issuer has sought to comply in good faith with such requirements.

SEC. 402. PENALTY ON FAILURE TO MEET CERTAIN GROUP HEALTH PLAN REQUIREMENTS.

<< 26 USCA § 4980D >>

(a) IN GENERAL.—Chapter 43 of the Internal Revenue Code of 1986 (relating to qualified pension, etc., plans) is amended by adding after section 4980C the following new section:

"SEC. 4980D. FAILURE TO MEET CERTAIN GROUP HEALTH PLAN REQUIREMENTS.

"(a) GENERAL RULE.—There is hereby imposed a tax on any failure of a group health plan to meet the requirements of chapter 100 (relating to group health plan portability, access, and renewability requirements).

"(b) AMOUNT OF TAX.—

"(1) IN GENERAL.—The amount of the tax imposed by subsection (a) on any failure shall be $100 for each day in the noncompliance period with respect to each individual to whom such failure relates.

"(2) NONCOMPLIANCE PERIOD.—For purposes of this section, the term 'noncompliance period' means, with respect to any failure, the period—

"(A) beginning on the date such failure first occurs, and

"(B) ending on the date such failure is corrected.

"(3) MINIMUM TAX FOR NONCOMPLIANCE PERIOD WHERE FAILURE DISCOVERED AFTER NOTICE OF EXAMINATION.—Notwithstanding paragraphs (1) and (2) of subsection (c)—

"(A) IN GENERAL.—In the case of 1 or more failures with respect to an individual—

"(i) which are not corrected before the date a notice of examination of income tax liability is sent to the employer, and

"(ii) which occurred or continued during the period under examination,

the amount of tax imposed by subsection (a) by reason of such failures with respect to such individual shall not be less than the lesser of $2,500 or the amount of tax which would be imposed by subsection (a) without regard to such paragraphs.

"(B) HIGHER MINIMUM TAX WHERE VIOLATIONS ARE MORE THAN DE MINIMIS.—To the extent violations for which any person is liable under subsection (e) for any year are more than de minimis, subparagraph (A) shall be applied by substituting '$15,000' for '$2,500' with respect to such person.

"(C) EXCEPTION FOR CHURCH PLANS.—This paragraph shall not apply to any failure under a church plan (as defined in section 414(e)).

"(c) LIMITATIONS ON AMOUNT OF TAX.—

"(1) TAX NOT TO APPLY WHERE FAILURE NOT DISCOVERED EXERCISING REASONABLE DILIGENCE.—No tax shall be imposed by subsection (a) on any failure during any period for which it is established to the satisfaction of the Secretary that the person otherwise liable for such tax did not know, and exercising reasonable diligence would not have known, that such failure existed.

"(2) TAX NOT TO APPLY TO FAILURES CORRECTED WITHIN CERTAIN PERIODS.—No tax shall be imposed by subsection (a) on any failure if—

"(A) such failure was due to reasonable cause and not to willful neglect, and

"(B)(i) in the case of a plan other than a church plan (as defined in section 414(e)), such failure is corrected during the 30–day period beginning on the first date the person otherwise liable for such tax knew, or exercising reasonable diligence would have known, that such failure existed, and

"(ii) in the case of a church plan (as so defined), such failure is corrected before the close of the correction period (determined under the rules of section 414(e)(4)(C)).

"(3) OVERALL LIMITATION FOR UNINTENTIONAL FAILURES.—In the case of failures which are due to reasonable cause and not to willful neglect—

"(A) SINGLE EMPLOYER PLANS.—

"(i) IN GENERAL.—In the case of failures with respect to plans other than specified multiple employer health plans, the tax imposed by subsection (a) for failures during the taxable year of the employer shall not exceed the amount equal to the lesser of—

"(I) 10 percent of the aggregate amount paid or incurred by the employer (or predecessor employer) during the preceding taxable year for group health plans, or

"(II) $500,000.

"(ii) TAXABLE YEARS IN THE CASE OF CERTAIN CONTROLLED GROUPS.—For purposes of this subparagraph, if not all persons who are treated as a single employer for purposes of this section have the same taxable year, the taxable years taken into account shall be determined under principles similar to the principles of section 1561.

"(B) SPECIFIED MULTIPLE EMPLOYER HEALTH PLANS.—

"(i) IN GENERAL.—In the case of failures with respect to a specified multiple employer health plan, the tax imposed by subsection (a) for failures during the taxable year of the trust forming part of such plan shall not exceed the amount equal to the lesser of—

"(I) 10 percent of the amount paid or incurred by such trust during such taxable year to provide medical care (as defined in section 9805(d)(3)) directly or through insurance, reimbursement, or otherwise, or

"(II) $500,000.

For purposes of the preceding sentence, all plans of which the same trust forms a part shall be treated as one plan.

"(ii) SPECIAL RULE FOR EMPLOYERS REQUIRED TO PAY TAX.—If an employer is assessed a tax imposed by subsection (a) by reason of a failure with respect to a specified multiple employer health plan, the limit shall be determined under subparagraph (A) (and not under this subparagraph) and as if such plan were not a specified multiple employer health plan.

"(4) WAIVER BY SECRETARY.—In the case of a failure which is due to reasonable cause and not to willful neglect, the Secretary may waive part or all of the tax imposed by subsection (a) to the extent that the payment of such tax would be excessive relative to the failure involved.

"(d) TAX NOT TO APPLY TO CERTAIN INSURED SMALL EMPLOYER PLANS.—

"(1) IN GENERAL.—In the case of a group health plan of a small employer which provides health insurance coverage solely through a contract with a health insurance issuer, no tax shall be imposed by this section on the employer on any failure which is solely because of the health insurance coverage offered by such issuer.

"(2) SMALL EMPLOYER.—

"(A) IN GENERAL.—For purposes of paragraph (1), the term 'small employer' means, with respect to a calendar year and a plan year, an employer who employed an average of at least 2 but not more than 50 employees on business days during the preceding calendar year and who employs at least 2 employees on the first day of the plan year. For purposes of the preceding sentence, all persons treated as a single employer under subsection (b), (c), (m), or (o) of section 414 shall be treated as one employer.

"(B) EMPLOYERS NOT IN EXISTENCE IN PRECEDING YEAR.—In the case of an employer which was not in existence throughout the preceding calendar year, the determination of whether such employer is a small employer shall be based on the average number of employees that it is reasonably expected such employer will employ on business days in the current calendar year.

"(C) PREDECESSORS.—Any reference in this paragraph to an employer shall include a reference to any predecessor of such employer.

"(3) HEALTH INSURANCE COVERAGE; HEALTH INSURANCE ISSUER.—For purposes of paragraph (1), the terms 'health insurance coverage' and 'health insurance issuer' have the respective meanings given such terms by section 9805.

"(e) LIABILITY FOR TAX.—The following shall be liable for the tax imposed by subsection (a) on a failure:

"(1) Except as otherwise provided in this subsection, the employer.

"(2) In the case of a multiemployer plan, the plan.

"(3) In the case of a failure under section 9803 (relating to guaranteed renewability) with respect to a plan described in subsection (f)(2)(B), the plan.

"(f) DEFINITIONS.—For purposes of this section—

"(1) GROUP HEALTH PLAN.—The term 'group health plan' has the meaning given such term by section 9805(a).

"(2) SPECIFIED MULTIPLE EMPLOYER HEALTH PLAN.—The term 'specified multiple employer health plan' means a group health plan which is—

"(A) any multiemployer plan, or

"(B) any multiple employer welfare arrangement (as defined in section 3(40) of the Employee Retirement Income Security Act of 1974, as in effect on the date of the enactment of this section).

"(3) CORRECTION.—A failure of a group health plan shall be treated as corrected if—

"(A) such failure is retroactively undone to the extent possible, and

"(B) the person to whom the failure relates is placed in a financial position which is as good as such person would have been in had such failure not occurred.".

<< 26 USCA Ch. 43 >>

(b) CLERICAL AMENDMENT.—The table of sections for chapter 43 of such Code is amended by adding after the item relating to section 4980C the following new item:

"Sec. 4980D. Failure to meet certain group health plan requirements.".

<< 26 USCA § 4980D NOTE >>

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to failures under chapter 100 of the Internal Revenue Code of 1986 (as added by section 401 of this Act).

Subtitle B—Clarification of Certain Continuation Coverage Requirements

SEC. 421. COBRA CLARIFICATIONS.

(a) PUBLIC HEALTH SERVICE ACT.—

<< 42 USCA § 300bb–2 >>

(1) PERIOD OF COVERAGE.—Section 2202(2) of the Public Health Service Act (42 U.S.C. 300bb–2(2)) is amended—

(A) in subparagraph (A)—

(i) by transferring the sentence immediately preceding clause (iv) so as to appear immediately following such clause (iv); and

(ii) in the last sentence (as so transferred)—

(I) by striking "an individual" and inserting "a qualified beneficiary";

(II) by striking "at the time of a qualifying event described in section 2203(2)" and inserting "at any time during the first 60 days of continuation coverage under this title";

(III) by striking "with respect to such event,"; and

(IV) by inserting "(with respect to all qualified beneficiaries)" after "29 months";

(B) in subparagraph (D)(i), by inserting before ", or" the following: "(other than such an exclusion or limitation which does not apply to (or is satisfied by) such beneficiary by reason of chapter 100 of the Internal Revenue Code of 1986, part 7 of subtitle B of title I of the Employee Retirement Income Security Act of 1974, or title XXVII of this Act)"; and

(C) in subparagraph (E), by striking "at the time of a qualifying event described in section 2203(2)" and inserting "at any time during the first 60 days of continuation coverage under this title".

<< 42 USCA § 300bb–6 >>

(2) NOTICES.—Section 2206(3) of the Public Health Service Act (42 U.S.C. 300bb–6(3)) is amended by striking "at the time of a qualifying event described in section 2203(2)" and inserting "at any time during the first 60 days of continuation coverage under this title".

<< 42 USCA § 300bb–8 >>

(3) BIRTH OR ADOPTION OF A CHILD.—Section 2208(3)(A) of the Public Health Service Act (42 U.S.C. 300bb–8(3)(A)) is amended by adding at the end thereof the following new flush sentence:

"Such term shall also include a child who is born to or placed for adoption with the covered employee during the period of continuation coverage under this title.".

(b) EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974.—

<< 29 USCA § 1162 >>

(1) PERIOD OF COVERAGE.—Section 602(2) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1162(2)) is amended—

(A) in the last sentence of subparagraph (A)—

(i) by striking "an individual" and inserting "a qualified beneficiary";

(ii) by striking "at the time of a qualifying event described in section 603(2)" and inserting "at any time during the first 60 days of continuation coverage under this part";

(iii) by striking "with respect to such event"; and

(iv) by inserting "(with respect to all qualified beneficiaries)" after "29 months";

(B) in subparagraph (D)(i), by inserting before ", or" the following: "(other than such an exclusion or limitation which does not apply to (or is satisfied by) such beneficiary by reason of chapter 100 of the Internal Revenue Code of 1986, part 7 of this subtitle, or title XXVII of the Public Health Service Act)"; and

(C) in subparagraph (E), by striking "at the time of a qualifying event described in section 603(2)" and inserting "at any time during the first 60 days of continuation coverage under this part".

<< 29 USCA § 1166 >>

(2) NOTICES.—Section 606(a)(3) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1166(a)(3)) is amended by striking "at the time of a qualifying event described in section 603(2)" and inserting "at any time during the first 60 days of continuation coverage under this part".

<< 29 USCA § 1167 >>

(3) BIRTH OR ADOPTION OF A CHILD.—Section 607(3)(A) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1167(3)) is amended by adding at the end thereof the following new flush sentence:

"Such term shall also include a child who is born to or placed for adoption with the covered employee during the period of continuation coverage under this part.".

<< 26 USCA § 4980B >>

(c) INTERNAL REVENUE CODE OF 1986.—

(1) PERIOD OF COVERAGE.—Section 4980B(f)(2)(B) of the Internal Revenue Code of 1986 is amended—

(A) in the last sentence of clause (i)—

(i) by striking "at the time of a qualifying event described in paragraph (3)(B)" and inserting "at any time during the first 60 days of continuation coverage under this section";

(ii) by striking "with respect to such event"; and

(iii) by inserting "(with respect to all qualified beneficiaries)" after "29 months";

(B) in clause (iv)(I), by inserting before ", or" the following: "(other than such an exclusion or limitation which does not apply to (or is satisfied by) such beneficiary by reason of chapter 100 of this title, part 7 of subtitle B of title I of the Employee Retirement Income Security Act of 1974, or title XXVII of the Public Health Service Act)"; and

(C) in clause (v), by striking "at the time of a qualifying event described in paragraph (3)(B)" and inserting "at any time during the first 60 days of continuation coverage under this section".

(2) NOTICES.—Section 4980B(f)(6)(C) of the Internal Revenue Code of 1986 is amended by striking "at the time of a qualifying event described in paragraph (3)(B)" and inserting "at any time during the first 60 days of continuation coverage under this section".

(3) BIRTH OR ADOPTION OF A CHILD.—Section 4980B(g)(1)(A) of the Internal Revenue Code of 1986 is amended by adding at the end thereof the following new flush sentence:

"Such term shall also include a child who is born to or placed for adoption with the covered employee during the period of continuation coverage under this section.".

<< 26 USCA § 4980B NOTE >>

<< 29 USCA §§ 1162 nt, 1166 nt, 1167 nt >>

<< 42 USCA §§ 300bb–2 nt, 300bb–6 nt, 300bb–8 nt >>

(d) EFFECTIVE DATE.—The amendments made by this section shall become effective on January 1, 1997, regardless of whether the qualifying event occurred before, on, or after such date.

<< 26 USCA § 4980B NOTE >>

(e) NOTIFICATION OF CHANGES.—Not later than November 1, 1996, each group health plan (covered under title XXII of the Public Health Service Act, part 6 of subtitle B of title I of the Employee Retirement Income Security Act of 1974, and section 4980B(f) of the Internal Revenue Code of 1986) shall notify each qualified beneficiary who has elected continuation coverage under such title, part or section of the amendments made by this section.

TITLE V—REVENUE OFFSETS

SEC. 500. AMENDMENT OF 1986 CODE.

Except as otherwise expressly provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1986.

Subtitle A—Company–Owned Life Insurance

SEC. 501. DENIAL OF DEDUCTION FOR INTEREST ON LOANS WITH RESPECT TO COMPANY–OWNED LIFE INSURANCE.

<< 26 USCA § 264 >>

(a) IN GENERAL.—Paragraph (4) of section 264(a) is amended—

(1) by inserting ", or any endowment or annuity contracts owned by the taxpayer covering any individual," after "the life of any individual", and

(2) by striking all that follows "carried on by the taxpayer" and inserting a period.

(b) EXCEPTION FOR CONTRACTS RELATING TO KEY PERSONS; PERMISSIBLE INTEREST RATES.—Section 264 is amended—

(1) by striking "Any" in subsection (a)(4) and inserting "Except as provided in subsection (d), any", and

(2) by adding at the end the following new subsection:

"(d) SPECIAL RULES FOR APPLICATION OF SUBSECTION (a)(4).—

"(1) EXCEPTION FOR KEY PERSONS.—Subsection (a)(4) shall not apply to any interest paid or accrued on any indebtedness with respect to policies or contracts covering an individual who is a key person to the extent that the aggregate amount of such indebtedness with respect to policies and contracts covering such individual does not exceed $50,000.

"(2) INTEREST RATE CAP ON KEY PERSONS AND PRE–1986 CONTRACTS.—

"(A) IN GENERAL.—No deduction shall be allowed by reason of paragraph (1) or the last sentence of subsection (a) with respect to interest paid or accrued for any month beginning after December 31, 1995, to the extent the amount of such interest exceeds the amount which would have been determined if the applicable rate of interest were used for such month.

"(B) APPLICABLE RATE OF INTEREST.—For purposes of subparagraph (A)—

"(i) IN GENERAL.—The applicable rate of interest for any month is the rate of interest described as Moody's Corporate Bond Yield Average–Monthly Average Corporates as published by Moody's Investors Service, Inc., or any successor thereto, for such month.

"(ii) PRE–1986 CONTRACTS.—In the case of indebtedness on a contract purchased on or before June 20, 1986—

"(I) which is a contract providing a fixed rate of interest, the applicable rate of interest for any month shall be the Moody's rate described in clause (i) for the month in which the contract was purchased, or

"(II) which is a contract providing a variable rate of interest, the applicable rate of interest for any month in an applicable period shall be such Moody's rate for the third month preceding the first month in such period.

For purposes of subclause (II), the taxpayer shall elect an applicable period for such contract on its return of tax imposed by this chapter for its first taxable year ending on or after October 13, 1995. Such applicable period shall be for any number of months (not greater than 12) specified in the election and may not be changed by the taxpayer without the consent of the Secretary.

"(3) KEY PERSON.—For purposes of paragraph (1), the term 'key person' means an officer or 20–percent owner, except that the number of individuals who may be treated as key persons with respect to any taxpayer shall not exceed the greater of—

"(A) 5 individuals, or

"(B) the lesser of 5 percent of the total officers and employees of the taxpayer or 20 individuals.

"(4) 20–PERCENT OWNER.—For purposes of this subsection, the term '20–percent owner' means—

"(A) if the taxpayer is a corporation, any person who owns directly 20 percent or more of the outstanding stock of the corporation or stock possessing 20 percent or more of the total combined voting power of all stock of the corporation, or

"(B) if the taxpayer is not a corporation, any person who owns 20 percent or more of the capital or profits interest in the employer.

"(5) AGGREGATION RULES.—

"(A) IN GENERAL.—For purposes of paragraph (4)(A) and applying the $50,000 limitation in paragraph (1)—

"(i) all members of a controlled group shall be treated as one taxpayer, and

"(ii) such limitation shall be allocated among the members of such group in such manner as the Secretary may prescribe.

"(B) CONTROLLED GROUP.—For purposes of this paragraph, all persons treated as a single employer under subsection (a) or (b) of section 52 or subsection (m) or (o) of section 414 shall be treated as members of a controlled group.".

<< 26 USCA § 264 NOTE >>

(c) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by this section shall apply to interest paid or accrued after October 13, 1995.

(2) TRANSITION RULE FOR EXISTING INDEBTEDNESS.—

(A) IN GENERAL.—In the case of—

(i) indebtedness incurred before January 1, 1996, or

(ii) indebtedness incurred before January 1, 1997 with respect to any contract or policy entered into in 1994 or 1995,

the amendments made by this section shall not apply to qualified interest paid or accrued on such indebtedness after October 13, 1995, and before January 1, 1999.

(B) QUALIFIED INTEREST.—For purposes of subparagraph (A), the qualified interest with respect to any indebtedness for any month is the amount of interest (otherwise deductible) which would be paid or accrued for such month on such indebtedness if—

(i) in the case of any interest paid or accrued after December 31, 1995, indebtedness with respect to no more than 20,000 insured individuals were taken into account, and

(ii) the lesser of the following rates of interest were used for such month:

(I) The rate of interest specified under the terms of the indebtedness as in effect on October 13, 1995 (and without regard to modification of such terms after such date).

(II) The applicable percentage of the rate of interest described as Moody's Corporate Bond Yield Average–Monthly Average Corporates as published by Moody's Investors Service, Inc., or any successor thereto, for such month.

For purposes of clause (i), all persons treated as a single employer under subsection (a) or (b) of section 52 of the Internal Revenue Code of 1986 or subsection (m) or (o) of section 414 of such Code shall be treated as 1 person. Subclause (II) of clause (ii) shall not apply to any month before January 1, 1996.

(C) APPLICABLE PERCENTAGE.—For purposes of subparagraph (B), the applicable percentage is as follows:

For calendar year:	**The percentage is:**
1996	100 percent
1997	90 percent
1998	80 percent.

(3) SPECIAL RULE FOR GRANDFATHERED CONTRACTS.—This section shall not apply to any contract purchased on or before June 20, 1986, except that section 264(d)(2) of the Internal Revenue Code of 1986 shall apply to interest paid or accrued after October 13, 1995.

<< 26 USCA § 264 NOTE >>

(d) SPREAD OF INCOME INCLUSION ON SURRENDER, ETC. OF CONTRACTS.—

(1) IN GENERAL.—If any amount is received under any life insurance policy or endowment or annuity contract described in paragraph (4) of section 264(a) of the Internal Revenue Code of 1986—

(A) on the complete surrender, redemption, or maturity of such policy or contract during calendar year 1996, 1997, or 1998, or

(B) in full discharge during any such calendar year of the obligation under the policy or contract which is in the nature of a refund of the consideration paid for the policy or contract,

then (in lieu of any other inclusion in gross income) such amount shall be includible in gross income ratably over the 4–taxable year period beginning with the taxable year such amount would (but for this paragraph) be includible. The preceding sentence shall only apply to the extent the amount is includible in gross income for the taxable year in which the event described in subparagraph (A) or (B) occurs.

(2) SPECIAL RULES FOR APPLYING SECTION 264.—A contract shall not be treated as—

(A) failing to meet the requirement of section 264(c)(1) of the Internal Revenue Code of 1986, or

(B) a single premium contract under section 264(b)(1) of such Code,

solely by reason of an occurrence described in subparagraph (A) or (B) of paragraph (1) of this subsection or solely by reason of no additional premiums being received under the contract by reason of a lapse occurring after October 13, 1995.

(3) SPECIAL RULE FOR DEFERRED ACQUISITION COSTS.—In the case of the occurrence of any event described in subparagraph (A) or (B) of paragraph (1) of this subsection with respect to any policy or contract—

(A) section 848 of the Internal Revenue Code of 1986 shall not apply to the unamortized balance (if any) of the specified policy acquisition expenses attributable to such policy or contract immediately before the insurance company's taxable year in which such event occurs, and

(B) there shall be allowed as a deduction to such company for such taxable year under chapter 1 of such Code an amount equal to such unamortized balance.

Subtitle B—Treatment of Individuals Who Lose United States Citizenship

SEC. 511. REVISION OF INCOME, ESTATE, AND GIFT TAXES ON INDIVIDUALS WHO LOSE UNITED STATES CITIZENSHIP.

<< 26 USCA § 877 >>

(a) IN GENERAL.—Subsection (a) of section 877 is amended to read as follows:

"(a) TREATMENT OF EXPATRIATES.—

"(1) IN GENERAL.—Every nonresident alien individual who, within the 10–year period immediately preceding the close of the taxable year, lost United States citizenship, unless such loss did not have for one of its principal purposes the avoidance of taxes under this subtitle or subtitle B, shall be taxable for such taxable year in the manner provided in subsection (b) if the tax imposed pursuant to such subsection exceeds the tax which, without regard to this section, is imposed pursuant to section 871.

"(2) CERTAIN INDIVIDUALS TREATED AS HAVING TAX AVOIDANCE PURPOSE.—For purposes of paragraph (1), an individual shall be treated as having a principal purpose to avoid such taxes if—

"(A) the average annual net income tax (as defined in section 38(c)(1)) of such individual for the period of 5 taxable years ending before the date of the loss of United States citizenship is greater than $100,000, or

"(B) the net worth of the individual as of such date is $500,000 or more.

In the case of the loss of United States citizenship in any calendar year after 1996, such $100,000 and $500,000 amounts shall be increased by an amount equal to such dollar amount multiplied by the cost-of-living adjustment determined under section 1(f)(3) for such calendar year by substituting '1994' for '1992' in subparagraph (B) thereof. Any increase under the preceding sentence shall be rounded to the nearest multiple of $1,000.".

(b) EXCEPTIONS.—

(1) IN GENERAL.—Section 877 is amended by striking subsection (d), by redesignating subsection (c) as subsection (d), and by inserting after subsection (b) the following new subsection:

"(c) TAX AVOIDANCE NOT PRESUMED IN CERTAIN CASES.—

"(1) IN GENERAL.—Subsection (a)(2) shall not apply to an individual if—

"(A) such individual is described in a subparagraph of paragraph (2) of this subsection, and

"(B) within the 1–year period beginning on the date of the loss of United States citizenship, such individual submits a ruling request for the Secretary's determination as to whether such loss has for one of its principal purposes the avoidance of taxes under this subtitle or subtitle B.

"(2) INDIVIDUALS DESCRIBED.—

"(A) DUAL CITIZENSHIP, ETC.—An individual is described in this subparagraph if—

"(i) the individual became at birth a citizen of the United States and a citizen of another country and continues to be a citizen of such other country, or

"(ii) the individual becomes (not later than the close of a reasonable period after loss of United States citizenship) a citizen of the country in which—

"(I) such individual was born,

"(II) if such individual is married, such individual's spouse was born, or

"(III) either of such individual's parents were born.

"(B) LONG–TERM FOREIGN RESIDENTS.—An individual is described in this subparagraph if, for each year in the 10–year period ending on the date of loss of United States citizenship, the individual was present in the United States for 30 days or less. The rule of section 7701(b)(3)(D)(ii) shall apply for purposes of this subparagraph.

"(C) RENUNCIATION UPON REACHING AGE OF MAJORITY.—An individual is described in this subparagraph if the individual's loss of United States citizenship occurs before such individual attains age 18½.

"(D) INDIVIDUALS SPECIFIED IN REGULATIONS.—An individual is described in this subparagraph if the individual is described in a category of individuals prescribed by regulation by the Secretary.".

(2) TECHNICAL AMENDMENT.—Paragraph (1) of section 877(b) of such Code is amended by striking "subsection (c)" and inserting "subsection (d)".

(c) TREATMENT OF PROPERTY DISPOSED OF IN NONRECOGNITION TRANSACTIONS; TREATMENT OF DISTRIBUTIONS FROM CERTAIN CONTROLLED FOREIGN CORPORATIONS.—Subsection (d) of section 877, as redesignated by subsection (b), is amended to read as follows:

"(d) SPECIAL RULES FOR SOURCE, ETC.—For purposes of subsection (b)—

"(1) SOURCE RULES.—The following items of gross income shall be treated as income from sources within the United States:

"(A) SALE OF PROPERTY.—Gains on the sale or exchange of property (other than stock or debt obligations) located in the United States.

"(B) STOCK OR DEBT OBLIGATIONS.—Gains on the sale or exchange of stock issued by a domestic corporation or debt obligations of United States persons or of the United States, a State or political subdivision thereof, or the District of Columbia.

"(C) INCOME OR GAIN DERIVED FROM CONTROLLED FOREIGN CORPORATION.—Any income or gain derived from stock in a foreign corporation but only—

"(i) if the individual losing United States citizenship owned (within the meaning of section 958(a)), or is considered as owning (by applying the ownership rules of section 958(b)), at any time during the 2–year period ending on the date of the loss of United States citizenship, more than 50 percent of—

"(I) the total combined voting power of all classes of stock entitled to vote of such corporation, or

"(II) the total value of the stock of such corporation, and

"(ii) to the extent such income or gain does not exceed the earnings and profits attributable to such stock which were earned or accumulated before the loss of citizenship and during periods that the ownership requirements of clause (i) are met.

"(2) GAIN RECOGNITION ON CERTAIN EXCHANGES.—

"(A) IN GENERAL.—In the case of any exchange of property to which this paragraph applies, notwithstanding any other provision of this title, such property shall be treated as sold for its fair market value on the date of such exchange, and any gain shall be recognized for the taxable year which includes such date.

"(B) EXCHANGES TO WHICH PARAGRAPH APPLIES.—This paragraph shall apply to any exchange during the 10–year period described in subsection (a) if—

"(i) gain would not (but for this paragraph) be recognized on such exchange in whole or in part for purposes of this subtitle,

"(ii) income derived from such property was from sources within the United States (or, if no income was so derived, would have been from such sources), and

"(iii) income derived from the property acquired in the exchange would be from sources outside the United States.

"(C) EXCEPTION.—Subparagraph (A) shall not apply if the individual enters into an agreement with the Secretary which specifies that any income or gain derived from the property acquired in the exchange (or any other property which has a basis determined in whole or part by reference to such property) during such 10–year period shall be treated as from sources within the United States. If the property transferred in the exchange is disposed of by the person acquiring such property, such agreement shall terminate and any gain which was not recognized by reason of such agreement shall be recognized as of the date of such disposition.

"(D) SECRETARY MAY EXTEND PERIOD.—To the extent provided in regulations prescribed by the Secretary, subparagraph (B) shall be applied by substituting the 15–year period beginning 5 years before the loss of United States citizenship for the 10–year period referred to therein.

"(E) SECRETARY MAY REQUIRE RECOGNITION OF GAIN IN CERTAIN CASES.—To the extent provided in regulations prescribed by the Secretary—

"(i) the removal of appreciated tangible personal property from the United States, and

"(ii) any other occurrence which (without recognition of gain) results in a change in the source of the income or gain from property from sources within the United States to sources outside the United States,

shall be treated as an exchange to which this paragraph applies.

"(3) SUBSTANTIAL DIMINISHING OF RISKS OF OWNERSHIP.—For purposes of determining whether this section applies to any gain on the sale or exchange of any property, the running of the 10–year period described in subsection (a) shall be suspended for any period during which the individual's risk of loss with respect to the property is substantially diminished by—

"(A) the holding of a put with respect to such property (or similar property),

"(B) the holding by another person of a right to acquire the property, or

"(C) a short sale or any other transaction.

"(4) TREATMENT OF PROPERTY CONTRIBUTED TO CONTROLLED FOREIGN CORPORATIONS.—

"(A) IN GENERAL.—If—

"(i) an individual losing United States citizenship contributes property to any corporation which, at the time of the contribution, is described in subparagraph (B), and

"(ii) income derived from such property was from sources within the United States (or, if no income was so derived, would have been from such sources),

during the 10–year period referred to in subsection (a), any income or gain on such property (or any other property which has a basis determined in whole or part by reference to such property) received or accrued by the corporation shall be treated as received or accrued directly by such individual and not by such corporation. The preceding sentence shall not apply to the extent the property has been treated under subparagraph (C) as having been sold by such corporation.

"(B) CORPORATION DESCRIBED.—A corporation is described in this subparagraph with respect to an individual if, were such individual a United States citizen—

"(i) such corporation would be a controlled foreign corporation (as defined in 957), and

"(ii) such individual would be a United States shareholder (as defined in section 951(b)) with respect to such corporation.

"(C) DISPOSITION OF STOCK IN CORPORATION.—If stock in the corporation referred to in subparagraph (A) (or any other stock which has a basis determined in whole or part by reference to such stock) is disposed of during the 10–year period referred to in subsection (a) and while the property referred to in subparagraph (A) is held by such corporation, a pro rata share of such property (determined on the basis of the value of such stock) shall be treated as sold by the corporation immediately before such disposition.

"(D) ANTI–ABUSE RULES.—The Secretary shall prescribe such regulations as may be necessary to prevent the avoidance of the purposes of this paragraph, including where—

"(i) the property is sold to the corporation, and

"(ii) the property taken into account under subparagraph (A) is sold by the corporation.

"(E) INFORMATION REPORTING.—The Secretary shall require such information reporting as is necessary to carry out the purposes of this paragraph.".

(d) CREDIT FOR FOREIGN TAXES IMPOSED ON UNITED STATES SOURCE INCOME.—

(1) Subsection (b) of section 877 is amended by adding at the end the following new sentence: "The tax imposed solely by reason of this section shall be reduced (but not below zero) by the amount of any income, war profits, and excess profits taxes (within the meaning of section 903) paid to any foreign country or possession of the United States on any income of the taxpayer on which tax is imposed solely by reason of this section."

(2) Subsection (a) of section 877, as amended by subsection (a), is amended by inserting "(after any reduction in such tax under the last sentence of such subsection)" after "such subsection".

(e) COMPARABLE ESTATE AND GIFT TAX TREATMENT.—

(1) ESTATE TAX.—

<< 26 USCA § 2107 >>

(A) IN GENERAL.—Subsection (a) of section 2107 is amended to read as follows:

"(a) TREATMENT OF EXPATRIATES.—

"(1) RATE OF TAX.—A tax computed in accordance with the table contained in section 2001 is hereby imposed on the transfer of the taxable estate, determined as provided in section 2106, of every decedent nonresident not a citizen of the United States if, within the 10–year period ending with the date of death, such decedent lost United States citizenship, unless such loss did not have for one of its principal purposes the avoidance of taxes under this subtitle or subtitle A.

"(2) CERTAIN INDIVIDUALS TREATED AS HAVING TAX AVOIDANCE PURPOSE.—

"(A) IN GENERAL.—For purposes of paragraph (1), an individual shall be treated as having a principal purpose to avoid such taxes if such individual is so treated under section 877(a)(2).

"(B) EXCEPTION.—Subparagraph (A) shall not apply to a decedent meeting the requirements of section 877(c)(1).".

(B) CREDIT FOR FOREIGN DEATH TAXES.—Subsection (c) of section 2107 is amended by redesignating paragraph (2) as paragraph (3) and by inserting after paragraph (1) the following new paragraph:

"(2) CREDIT FOR FOREIGN DEATH TAXES.—

"(A) IN GENERAL.—The tax imposed by subsection (a) shall be credited with the amount of any estate, inheritance, legacy, or succession taxes actually paid to any foreign country in respect of any property which is included in the gross estate solely by reason of subsection (b).

"(B) LIMITATION ON CREDIT.—The credit allowed by subparagraph (A) for such taxes paid to a foreign country shall not exceed the lesser of—

"(i) the amount which bears the same ratio to the amount of such taxes actually paid to such foreign country in respect of property included in the gross estate as the value of the property included in the gross estate solely by reason of subsection (b) bears to the value of all property subjected to such taxes by such foreign country, or

"(ii) such property's proportionate share of the excess of—

"(I) the tax imposed by subsection (a), over

"(II) the tax which would be imposed by section 2101 but for this section.

"(C) PROPORTIONATE SHARE.—For purposes of subparagraph (B), a property's proportionate share is the percentage of the value of the property which is included in the gross estate solely by reason of subsection (b) bears to the total value of the gross estate.".

(C) EXPANSION OF INCLUSION IN GROSS ESTATE OF STOCK OF FOREIGN CORPORATIONS.—Paragraph (2) of section 2107(b) is amended by striking "more than 50 percent of" and all that follows and inserting "more than 50 percent of—

"(A) the total combined voting power of all classes of stock entitled to vote of such corporation, or

"(B) the total value of the stock of such corporation,".

<< 26 USCA § 2501 >>

(2) GIFT TAX.—

(A) IN GENERAL.—Paragraph (3) of section 2501(a) is amended to read as follows:

"(3) EXCEPTION.—

"(A) CERTAIN INDIVIDUALS.—Paragraph (2) shall not apply in the case of a donor who, within the 10–year period ending with the date of transfer, lost United States citizenship, unless such loss did not have for one of its principal purposes the avoidance of taxes under this subtitle or subtitle A.

"(B) CERTAIN INDIVIDUALS TREATED AS HAVING TAX AVOIDANCE PURPOSE.—For purposes of subparagraph (A), an individual shall be treated as having a principal purpose to avoid such taxes if such individual is so treated under section 877(a)(2).

"(C) EXCEPTION FOR CERTAIN INDIVIDUALS.—Subparagraph (B) shall not apply to a decedent meeting the requirements of section 877(c)(1).

"(D) CREDIT FOR FOREIGN GIFT TAXES.—The tax imposed by this section solely by reason of this paragraph shall be credited with the amount of any gift tax actually paid to any foreign country in respect of any gift which is taxable under this section solely by reason of this paragraph.".

(f) COMPARABLE TREATMENT OF LAWFUL PERMANENT RESIDENTS WHO CEASE TO BE TAXED AS RESIDENTS.—

<< 26 USCA § 877 >>

(1) IN GENERAL.—Section 877 is amended by redesignating subsection (e) as subsection (f) and by inserting after subsection (d) the following new subsection:

"(e) COMPARABLE TREATMENT OF LAWFUL PERMANENT RESIDENTS WHO CEASE TO BE TAXED AS RESIDENTS.—

"(1) IN GENERAL.—Any long-term resident of the United States who—

"(A) ceases to be a lawful permanent resident of the United States (within the meaning of section 7701(b)(6)), or

"(B) commences to be treated as a resident of a foreign country under the provisions of a tax treaty between the United States and the foreign country and who does not waive the benefits of such treaty applicable to residents of the foreign country,

shall be treated for purposes of this section and sections 2107, 2501, and 6039F in the same manner as if such resident were a citizen of the United States who lost United States citizenship on the date of such cessation or commencement.

"(2) LONG–TERM RESIDENT.—For purposes of this subsection, the term 'long-term resident' means any individual (other than a citizen of the United States) who is a lawful permanent resident of the United States in at least 8 taxable years during the period of 15 taxable years ending with the taxable year during which the event described in subparagraph (A) or (B) of paragraph (1) occurs. For purposes of the preceding sentence, an individual shall not be treated as a lawful permanent resident for any taxable year if such individual is treated as a resident of a foreign country for the taxable year under the provisions of a tax treaty between the United States and the foreign country and does not waive the benefits of such treaty applicable to residents of the foreign country.

"(3) SPECIAL RULES.—

"(A) EXCEPTIONS NOT TO APPLY.—Subsection (c) shall not apply to an individual who is treated as provided in paragraph (1).

"(B) STEP–UP IN BASIS.—Solely for purposes of determining any tax imposed by reason of this subsection, property which was held by the long-term resident on the date the individual first became a resident of the United States shall be treated as having a basis on such date of not less than the fair market value of such property on such date. The preceding sentence shall not apply if the individual elects not to have such sentence apply. Such an election, once made, shall be irrevocable.

"(4) AUTHORITY TO EXEMPT INDIVIDUALS.—This subsection shall not apply to an individual who is described in a category of individuals prescribed by regulation by the Secretary.

"(5) REGULATIONS.—The Secretary shall prescribe such regulations as may be appropriate to carry out this subsection, including regulations providing for the application of this subsection in cases where an alien individual becomes a resident of the United States during the 10–year period after being treated as provided in paragraph (1).".

(2) CONFORMING AMENDMENTS.—

<< 26 USCA § 2107 >>

(A) Section 2107 is amended by striking subsection (d), by redesignating subsection (e) as subsection (d), and by inserting after subsection (d) (as so redesignated) the following new subsection:

"(e) CROSS REFERENCE.—

"For comparable treatment of long-term lawful permanent residents who ceased to be taxed as residents, see section 877(e).".

<< 26 USCA § 2501 >>

(B) Paragraph (3) of section 2501(a) (as amended by subsection (e)) is amended by adding at the end the following new subparagraph:

"(E) CROSS REFERENCE.—

"For comparable treatment of long-term lawful permanent residents who ceased to be taxed as residents, see section 877(e).".

<< 26 USCA §§ 877 NOTE, 2107 nt, 2501 nt >>

(g) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendments made by this section shall apply to—

(A) individuals losing United States citizenship (within the meaning of section 877 of the Internal Revenue Code of 1986) on or after February 6, 1995, and

(B) long-term residents of the United States with respect to whom an event described in subparagraph (A) or (B) of section 877(e)(1) of such Code occurs on or after February 6, 1995.

(2) RULING REQUESTS.—In no event shall the 1–year period referred to in section 877(c)(1)(B) of such Code, as amended by this section, expire before the date which is 90 days after the date of the enactment of this Act.

(3) SPECIAL RULE.—

(A) IN GENERAL.—In the case of an individual who performed an act of expatriation specified in paragraph (1), (2), (3), or (4) of section 349(a) of the Immigration and Nationality Act (8 U.S.C. 1481(a)(1)–(4)) before February 6, 1995, but who did not, on or before such date, furnish to the United States Department of State a signed statement of voluntary relinquishment of United States nationality confirming the performance of such act, the amendments made by this section and section 512 shall apply to such individual except that the 10–year period described in section 877(a) of such Code shall not expire before the end of the 10–year period beginning on the date such statement is so furnished.

(B) EXCEPTION.—Subparagraph (A) shall not apply if the individual establishes to the satisfaction of the Secretary of the Treasury that such loss of United States citizenship occurred before February 6, 1994.

SEC. 512. INFORMATION ON INDIVIDUALS LOSING UNITED STATES CITIZENSHIP.

<< 26 USCA § 6039F >>

(a) IN GENERAL.—Subpart A of part III of subchapter A of chapter 61 is amended by inserting after section 6039E the following new section:

"SEC. 6039F. INFORMATION ON INDIVIDUALS LOSING UNITED STATES CITIZENSHIP.

"(a) IN GENERAL.—Notwithstanding any other provision of law, any individual who loses United States citizenship (within the meaning of section 877(a)) shall provide a statement which includes the information described in subsection (b). Such statement shall be—

"(1) provided not later than the earliest date of any act referred to in subsection (c), and

"(2) provided to the person or court referred to in subsection (c) with respect to such act.

"(b) INFORMATION TO BE PROVIDED.—Information required under subsection (a) shall include—

"(1) the taxpayer's TIN,

"(2) the mailing address of such individual's principal foreign residence,

"(3) the foreign country in which such individual is residing,

"(4) the foreign country of which such individual is a citizen,

"(5) in the case of an individual having a net worth of at least the dollar amount applicable under section 877(a)(2)(B), information detailing the assets and liabilities of such individual, and

"(6) such other information as the Secretary may prescribe.

"(c) ACTS DESCRIBED.—For purposes of this section, the acts referred to in this subsection are—

"(1) the individual's renunciation of his United States nationality before a diplomatic or consular officer of the United States pursuant to paragraph (5) of section 349(a) of the Immigration and Nationality Act (8 U.S.C. 1481(a)(5)),

"(2) the individual's furnishing to the United States Department of State a signed statement of voluntary relinquishment of United States nationality confirming the performance of an act of expatriation specified in paragraph (1), (2), (3), or (4) of section 349(a) of the Immigration and Nationality Act (8 U.S.C. 1481(a)(1)–(4)),

"(3) the issuance by the United States Department of State of a certificate of loss of nationality to the individual, or

"(4) the cancellation by a court of the United States of a naturalized citizen's certificate of naturalization.

"(d) PENALTY.—Any individual failing to provide a statement required under subsection (a) shall be subject to a penalty for each year (of the 10–year period beginning on the date of loss of United States citizenship) during any portion of which such failure continues in an amount equal to the greater of—

"(1) 5 percent of the tax required to be paid under section 877 for the taxable year ending during such year, or

"(2) $1,000,

unless it is shown that such failure is due to reasonable cause and not to willful neglect.

"(e) INFORMATION TO BE PROVIDED TO SECRETARY.—Notwithstanding any other provision of law—

"(1) any Federal agency or court which collects (or is required to collect) the statement under subsection (a) shall provide to the Secretary—

"(A) a copy of any such statement, and

"(B) the name (and any other identifying information) of any individual refusing to comply with the provisions of subsection (a),

"(2) the Secretary of State shall provide to the Secretary a copy of each certificate as to the loss of American nationality under section 358 of the Immigration and Nationality Act which is approved by the Secretary of State, and

"(3) the Federal agency primarily responsible for administering the immigration laws shall provide to the Secretary the name of each lawful permanent resident of the United States (within the meaning of section 7701(b)(6)) whose status as such has been revoked or has been administratively or judicially determined to have been abandoned.

Notwithstanding any other provision of law, not later than 30 days after the close of each calendar quarter, the Secretary shall publish in the Federal Register the name of each individual losing United States citizenship (within the meaning of section 877(a)) with respect to whom the Secretary receives information under the preceding sentence during such quarter.

"(f) REPORTING BY LONG–TERM LAWFUL PERMANENT RESIDENTS WHO CEASE TO BE TAXED AS RESIDENTS.—In lieu of applying the last sentence of subsection (a), any individual who is required to provide a statement under this section by reason of section 877(e)(1) shall provide such statement with the return of tax imposed by chapter 1 for the taxable year during which the event described in such section occurs.

"(g) EXEMPTION.—The Secretary may by regulations exempt any class of individuals from the requirements of this section if he determines that applying this section to such individuals is not necessary to carry out the purposes of this section.".

<< 26 USCA Ch. 61 >>

(b) CLERICAL AMENDMENT.—The table of sections for such subpart A is amended by inserting after the item relating to section 6039E the following new item:

"Sec. 6039F. Information on individuals losing United States citizenship.".

<< 26 USCA § 6039F NOTE >>

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to—

(1) individuals losing United States citizenship (within the meaning of section 877 of the Internal Revenue Code of 1986) on or after February 6, 1995, and

(2) long-term residents of the United States with respect to whom an event described in subparagraph (A) or (B) of section 877(e)(1) of such Code occurs on or after such date.

In no event shall any statement required by such amendments be due before the 90th day after the date of the enactment of this Act.

SEC. 513. REPORT ON TAX COMPLIANCE BY UNITED STATES CITIZENS AND RESIDENTS LIVING ABROAD.

Not later than 90 days after the date of the enactment of this Act, the Secretary of the Treasury shall prepare and submit to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate a report—

(1) describing the compliance with subtitle A of the Internal Revenue Code of 1986 by citizens and lawful permanent residents of the United States (within the meaning of section 7701(b)(6) of such Code) residing outside the United States, and

(2) recommending measures to improve such compliance (including improved coordination between executive branch agencies).

Subtitle C—Repeal of Financial Institution Transition Rule to Interest Allocation Rules

<< 26 USCA § 864 NOTE >>

SEC. 521. REPEAL OF FINANCIAL INSTITUTION TRANSITION RULE TO INTEREST ALLOCATION RULES.

(a) IN GENERAL.—Paragraph (5) of section 1215(c) of the Tax Reform Act of 1986 (Public Law 99–514, 100 Stat. 2548) is hereby repealed.

(b) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendment made by this section shall apply to taxable years beginning after December 31, 1995.

(2) SPECIAL RULE.—In the case of the first taxable year beginning after December 31, 1995, the pre-effective date portion of the interest expense of the corporation referred to in such paragraph (5) of such section 1215(c) for such taxable year shall be allocated and apportioned without regard to such amendment. For purposes of the preceding sentence, the pre-effective date portion is the amount which bears the same ratio to the interest expense for such taxable year as the number of days during such taxable year before the date of the enactment of this Act bears to 366.

Approved August 21, 1996.

5 U.S.C.A. § 706

§ 706. Scope of review

Currentness

To the extent necessary to decision and when presented, the reviewing court shall decide all relevant questions of law, interpret constitutional and statutory provisions, and determine the meaning or applicability of the terms of an agency action. The reviewing court shall--

(1) compel agency action unlawfully withheld or unreasonably delayed; and

(2) hold unlawful and set aside agency action, findings, and conclusions found to be--

(A) arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law;

(B) contrary to constitutional right, power, privilege, or immunity;

(C) in excess of statutory jurisdiction, authority, or limitations, or short of statutory right;

(D) without observance of procedure required by law;

(E) unsupported by substantial evidence in a case subject to sections 556 and 557 of this title or otherwise reviewed on the record of an agency hearing provided by statute; or

(F) unwarranted by the facts to the extent that the facts are subject to trial de novo by the reviewing court.

In making the foregoing determinations, the court shall review the whole record or those parts of it cited by a party, and due account shall be taken of the rule of prejudicial error.

Standards for Privacy of Individually Identiifiable Health Information

Thursday, December 28, 2000

***82462** AGENCY: Office of the Assistant Secretary for Planning and Evaluation, DHHS.

ACTION: Final rule.

SUMMARY: This rule includes standards to protect the privacy of individually identifiable health information. The rules below, which apply to health plans, health care clearinghouses, and certain health care providers, present standards with respect to the rights of individuals who are the subjects of this information, procedures for the exercise of those rights, and the authorized and required uses and disclosures of this information.

The use of these standards will improve the efficiency and effectiveness of public and private health programs and health care services by providing enhanced protections for individually identifiable health information. These protections will begin to address growing public concerns that advances in electronic technology and evolution in the health care industry are resulting, or may result, in a substantial erosion of the privacy surrounding individually identifiable health information maintained by health care providers, health plans and their administrative contractors. This rule implements the privacy requirements of the Administrative Simplification subtitle of the Health Insurance Portability and Accountability Act of 1996.

DATES: The final rule is effective on February 26, 2001.

FOR FURTHER INFORMATION CONTACT: Kimberly Coleman, 1-866-OCR-PRIV (1-866-627-7748) or TTY 1-866-788-4989.

SUPPLEMENTARY INFORMATION: Availability of copies, and electronic access.
Copies: To order copies of the Federal Register containing this document, send your request to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954. Specify the date of the issue requested and enclose a check or money order payable to the Superintendent of Documents, or enclose your Visa or Master Card number and expiration date. Credit card orders can also be placed by calling the order desk at (202) 512-1800 or by fax to (202) 512-2250. The cost for each copy is $8.00. As an alternative, you can view and photocopy the Federal Register document at most libraries designated as Federal Depository Libraries and at many other public and academic libraries throughout the country that receive the Federal Register.

Electronic Access: This document is available electronically at http:// aspe.hhs.gov/admnsimp/ as well as at the web site of the Government Printing Office at http://www.access.gpo.gov/su_docs/aces/aces140.html.

I. Background

Table of Contents

Sec.

164.106 Relationship to other parts.

164.500 Applicability.

164.501 Definitions.

164.502 Uses and disclosures of protected health information: general rules.

(a) Standard.

(b) Standard: minimum necessary.

(c) Standard: uses and disclosures of protected health information subject to an agreed upon restriction.

(d) Standard: uses and disclosures of de-identified protected health information.

(e) Standard: disclosures to business associates.

(f) Standard: deceased individuals.

(g) Standard: personal representatives.

(h) Standard: confidential communications.

(i) Standard: uses and disclosures consistent with notice.

(j) Standard: disclosures by whistleblowers and workforce member crime victims.

164.504 Uses and disclosures: organizational requirements.

(a) Definitions.

(b) Standard: health care component.

(c) Implementation specification: application of other provisions.

(d) Standard: affiliated covered entities.

(e) Standard: business associate contracts.

(f) Standard: requirements for group health plans.

(g) Standard: requirements for a covered entity with multiple covered functions.

164.506 Consent for uses or disclosures to carry out treatment, payment, or health care operations.

(a) Standard: consent requirement.

(b) Implementation specifications: general requirements.

(c) Implementation specifications: content requirements.

(d) Implementation specifications: defective consents.

(e) Standard: resolving conflicting consents and authorizations.

(f) Standard: joint consents.

164.508 Uses and disclosures for which an authorization is required.

(a) Standard: authorizations for uses and disclosures.

(b) Implementation specifications: general requirements.

(c) Implementation specifications: core elements and requirements.

(d) Implementation specifications: authorizations requested by a covered entity for its own uses and disclosures.

(e) Implementation specifications: authorizations requested by a covered entity for disclosures by others.

(f) Implementation specifications: authorizations for uses and disclosures of protected health information created for research that includes treatment of the individual.

164.510 Uses and disclosures requiring an opportunity for the individual to agree or to object.

(a) Standard: use and disclosure for facility directories.

(b) Standard: uses and disclosures for involvement in the individual's care and notification purposes.

164.512 Uses and disclosures for which consent, an authorization, or opportunity to agree or object is not required.

(a) Standard: uses and disclosures required by law.

(b) Standard: uses and disclosures for public health activities.

(c) Standard: disclosures about victims of abuse, neglect or domestic violence.

(d) Standard: uses and disclosures for health oversight activities.

(e) Standard: disclosures for judicial and administrative proceedings.

(f) Standard: disclosures for law enforcement purposes.

(g) Standard: uses and disclosures about decedents.

(h) Standard: uses and disclosures for cadaveric organ, eye or tissue donation purposes. ***82463**

(i) Standard: uses and disclosures for research purposes.

(j) Standard: uses and disclosures to avert a serious threat to health or safety.

(k) Standard: uses and disclosures for specialized government functions.

(l) Standard: disclosures for workers' compensation.

164.514 Other requirements relating to uses and disclosures of protected health information.

(a) Standard: de-identification of protected health information.

(b) Implementation specifications: requirements for de-identification of protected health information.

(c) Implementation specifications: re-identification.

(d) Standard: minimum necessary requirements.

(e) Standard: uses and disclosures of protected health information for marketing.

(f) Standard: uses and disclosures for fundraising.

(g) Standard: uses and disclosures for underwriting and related purposes.

(h) Standard: verification requirements

164.520 Notice of privacy practices for protected health information.

(a) Standard: notice of privacy practices.

(b) Implementation specifications: content of notice.

(c) Implementation specifications: provision of notice.

(d) Implementation specifications: joint notice by separate covered entities.

(e) Implementation specifications: documentation.

164.522 Rights to request privacy protection for protected health information.

(a) Standard: right of an individual to request restriction of uses and disclosures.

(b) Standard: confidential communications requirements.

164.524 Access of individuals to protected health information.

(a) Standard: access to protected health information.

(b) Implementation specifications: requests for access and timely action.

(c) Implementation specifications: provision of access.

(d) Implementation specifications: denial of access.

(e) Implementation specification: documentation.

164.526 Amendment of protected health information.

(a) Standard: right to amend.

(b) Implementation specifications: requests for amendment and timely action.

(c) Implementation specifications: accepting the amendment.

(d) Implementation specifications: denying the amendment.

(e) Implementation specification: actions on notices of amendment.

(f) Implementation specification: documentation.

164.528 Accounting of disclosures of protected health information.

(a) Standard: right to an accounting of disclosures of protected health information.

(b) Implementation specifications: content of the accounting.

(c) Implementation specifications: provision of the accounting.

(d) Implementation specification: documentation.

164.530 Administrative requirements.

(a) Standard: personnel designations.

(b) Standard: training.

(c) Standard: safeguards.

(d) Standard: complaints to the covered entity.

(e) Standard: sanctions

(f) Standard: mitigation.

(g) Standard: refraining from intimidating or retaliatory acts.

(h) Standard: waiver of rights.

(i) Standard: policies and procedures.

(j) Standard: documentation.

(k) Standard: group health plans.

164.532 Transition provisions.

(a) Standard: effect of prior consents and authorizations.

(b) Implementation specification: requirements for retaining effectiveness of prior consents and authorizations.

164.534 Compliance dates for initial implementation of the privacy standards.

(a) Health care providers.

(b) Health plans.

(c) Health care clearinghouses.

Purpose of the Administrative Simplification Regulations

This regulation has three major purposes: (1) To protect and enhance the rights of consumers by providing them access to their health information and controlling the inappropriate use of that information; (2) to improve the quality of health care in the U.S. by restoring trust in the health care system among consumers, health care professionals, and the multitude of organizations and individuals committed to the delivery of care; and (3) to improve the efficiency and effectiveness of health care delivery by creating a national framework for health privacy protection that builds on efforts by states, health systems, and individual organizations and individuals.

This regulation is the second final regulation to be issued in the package of rules mandated under title II subtitle F section 261-264 of the Health Insurance Portability and Accountability Act of 1996 (HIPAA), Public Law 104-191, titled "Administrative Simplification." Congress called for steps to improve "the efficiency and effectiveness of the health care system by encouraging the development of a health information system through the establishment of standards and requirements for the electronic transmission of certain health information." To achieve that end, Congress required the Department to promulgate a set of interlocking regulations establishing standards and protections for health information systems. The first regulation in this set, Standards for Electronic Transactions 65 FR 50312, was published on August 17, 2000 (the "Transactions Rule"). This regulation establishing Standards for Privacy of Individually Identifiable Health Information is the second final rule in the package. A rule establishing a unique identifier for employers to use in electronic health care transactions, a rule establishing a unique identifier for providers for such transactions, and a rule establishing standards for the security of electronic information systems have been proposed. See 63 FR 25272 and 25320 (May 7, 1998); 63 FR 32784 (June 16, 1998); 63 FR 43242 (August 12, 1998). Still to be proposed are rules establishing a unique identifier for health plans for electronic transactions, standards for claims attachments, and standards for transferring among health plans appropriate standard data elements needed for coordination of benefits. (See section C, below, for a more detailed explanation of the statutory mandate for these regulations.)

In enacting HIPAA, Congress recognized the fact that administrative simplification cannot succeed if we do not also protect the privacy and confidentiality of personal health information. The provision of high-quality health care requires the exchange of personal, often-sensitive information between an individual and a skilled practitioner. Vital to that interaction is the patient's ability to trust that the information shared will be protected and kept confidential. Yet many patients are concerned that their information is not protected. Among the factors adding to this concern are the growth of the number of organizations involved in the provision of care and the processing of claims, the growing use of electronic information technology, increased efforts to market health care and other products to consumers, and the increasing ability to collect highly sensitive information about a person's current and future health status as a result of advances in scientific research.

Rules requiring the protection of health privacy in the United States have been enacted primarily by the states. While virtually every state has enacted one or more laws to safeguard privacy, these laws vary significantly from state to state and typically apply to only part of the health care system. Many states have adopted laws that protect the health information relating to certain health conditions such as mental illness, communicable diseases, cancer, HIV/AIDS, and other stigmatized conditions. An examination of state health privacy laws and regulations, ***82464** however, found that "state laws, with a few notable exceptions, do not extend comprehensive protections to people's medical records." Many state rules fail to provide such basic protections as ensuring a patient's legal right to see a copy of his or her medical record. See Health Privacy Project, "The State of Health Privacy: An Uneven Terrain," Institute for Health Care Research and Policy, Georgetown University (July 1999) (http://www.healthprivacy.org) (the "Georgetown Study").

Until now, virtually no federal rules existed to protect the privacy of health information and guarantee patient access to such information. This final rule establishes, for the first time, a set of basic national privacy standards and fair information practices that provides all Americans with a basic level of protection and peace of mind that is essential to their full participation in their care. The rule sets a floor of ground rules for health care providers, health plans, and health care clearinghouses to follow, in order to protect patients and encourage them to seek needed care. The rule seeks to balance the needs of the individual with the needs of the society. It creates a framework of protection that can be strengthened by both the federal government and by states as health information systems continue to evolve.

Need for a National Health Privacy Framework

The Importance of Privacy

Privacy is a fundamental right. As such, it must be viewed differently than any ordinary economic good. The costs and benefits of a regulation must, of course, be considered as a means of identifying and weighing options. At the same time, it is important not to lose sight of the inherent meaning of privacy: it speaks to our individual and collective freedom.

A right to privacy in personal information has historically found expression in American law. All fifty states today recognize in tort law a common law or statutory right to privacy. Many states specifically provide a remedy for public revelation of private facts. Some states, such as California and Tennessee, have a right to privacy as a matter of state constitutional law. The multiple historical sources for legal rights to privacy are traced in many places, including Chapter 13 of Alan Westin's Privacy and Freedom and in Ellen Alderman & Caroline Kennedy, The Right to Privacy (1995).

Throughout our nation's history, we have placed the rights of the individual at the forefront of our democracy. In the Declaration of Independence, we asserted the “unalienable right” to “life, liberty and the pursuit of happiness.” Many of the most basic protections in the Constitution of the United States are imbued with an attempt to protect individual privacy while balancing it against the larger social purposes of the nation.

To take but one example, the Fourth Amendment to the United States Constitution guarantees that “the right of the people to be secure in their persons, houses, papers and effects, against unreasonable searches and seizures, shall not be violated.” By referring to the need for security of “persons” as well as “papers and effects” the Fourth Amendment suggests enduring values in American law that relate to privacy. The need for security of “persons” is consistent with obtaining patient consent before performing invasive medical procedures. The need for security in “papers and effects” underscores the importance of protecting information about the person, contained in sources such as personal diaries, medical records, or elsewhere. As is generally true for the right of privacy in information, the right is not absolute. The test instead is what constitutes an “unreasonable” search of the papers and effects.

The United States Supreme Court has upheld the constitutional protection of personal health information. In Whalen v. Roe, 429 U.S. 589 (1977), the Court analyzed a New York statute that created a database of persons who obtained drugs for which there was both a lawful and unlawful market. The Court, in upholding the statute, recognized at least two different kinds of interests within the constitutionally protected “zone of privacy.” “One is the individual interest in avoiding disclosure of personal matters,” such as this regulation principally addresses. This interest in avoiding disclosure, discussed in Whalen in the context of medical information, was found to be distinct from a different line of cases concerning “the interest in independence in making certain kinds of important decisions.”

Individuals' right to privacy in information about themselves is not absolute. It does not, for instance, prevent reporting of public health information on communicable diseases or stop law enforcement from getting information when due process has been observed. But many people believe that individuals should have some right to control personal and sensitive information about themselves. Among different sorts of personal information, health information is among the most sensitive. Many people believe that details about their physical self should not generally be put on display for neighbors, employers, and government officials to see. Informed consent laws place limits on the ability of other persons to intrude physically on a person's body. Similar concerns apply to intrusions on information about the person.

Moving beyond these facts of physical treatment, there is also significant intrusion when records reveal details about a person's mental state, such as during treatment for mental health. If, in Justice Brandeis' words, the “right to be let alone” means anything, then it likely applies to having outsiders have access to one's intimate thoughts, words, and emotions. In the recent case of Jaffee v. Redmond, 116 S.Ct. 1923 (1996), the Supreme Court held that statements made to a therapist during a counseling session were protected against civil discovery under the Federal Rules of Evidence. The Court noted that all fifty states have adopted some form of the psychotherapist-patient privilege. In upholding the federal privilege, the Supreme Court stated that it “serves the public interest by facilitating the appropriate treatment for individuals suffering the effects of a mental or emotional problem. The mental health of our citizenry, no less than its physical health, is a public good of transcendent importance.”

Many writers have urged a philosophical or common-sense right to privacy in one's personal information. Examples include Alan Westin, Privacy and Freedom (1967) and Janna Malamud Smith, Private Matters: In Defense of the Personal Life (1997). These writings emphasize the link between privacy and freedom and privacy and the “personal life,” or the ability to develop one's own personality and self-expression. Smith, for instance, states:

The bottom line is clear. If we continually, gratuitously, reveal other people's privacies, we harm them and ourselves, we undermine the richness of the personal life, and we fuel a social atmosphere of mutual exploitation. Let me put it another way: Little in life is as precious as the freedom to say and do things with people you love that you would not say or do if someone else were present. And few experiences are as fundamental to liberty and autonomy as maintaining control over when, how, to whom, and where you disclose personal material. Id. at 240-241.

In 1890, Louis D. Brandeis and Samuel D. Warren defined the right to privacy as "the right to be let alone." See L. Brandeis, S. Warren, "The Right ***82465** To Privacy," 4 Harv.L.Rev. 193. More than a century later, privacy continues to play an important role in Americans' lives. In their book, The Right to Privacy, (Alfred A. Knopf, New York, 1995) Ellen Alderman and Caroline Kennedy describe the importance of privacy in this way:

Privacy covers many things. It protects the solitude necessary for creative thought. It allows us the independence that is part of raising a family. It protects our right to be secure in our own homes and possessions, assured that the government cannot come barging in. Privacy also encompasses our right to self-determination and to define who we are. Although we live in a world of noisy self-confession, privacy allows us to keep certain facts to ourselves if we so choose. The right to privacy, it seems, is what makes us civilized.

Or, as Cavoukian and Tapscott observed the right of privacy is: "the claim of individuals, groups, or institutions to determine for themselves when, how, and to what extent information about them is communicated." See A. Cavoukian, D. Tapscott, "Who Knows: Safeguarding Your Privacy in a Networked World," Random House (1995).

Increasing Public Concern About Loss of Privacy

Today, it is virtually impossible for any person to be truly "let alone." The average American is inundated with requests for information from potential employers, retail shops, telephone marketing firms, electronic marketers, banks, insurance companies, hospitals, physicians, health plans, and others. In a 1998 national survey, 88 percent of consumers said they were "concerned" by the amount of information being requested, including 55 percent who said they were "very concerned." See Privacy and American Business, 1998 Privacy Concerns & Consumer Choice Survey (http://www.pandab.org). These worries are not just theoretical. Consumers who use the Internet to make purchases or request "free" information often are asked for personal and financial information. Companies making such requests routinely promise to protect the confidentiality of that information. Yet several firms have tried to sell this information to other companies even after promising not to do so.

Americans' concern about the privacy of their health information is part of a broader anxiety about their lack of privacy in an array of areas. A series of national public opinion polls conducted by Louis Harris & Associates documents a rising level of public concern about privacy, growing from 64 percent in 1978 to 82 percent in 1995. Over 80 percent of persons surveyed in 1999 agreed with the statement that they had "lost all control over their personal information." See Harris Equifax, Health Information Privacy Study (1993) (http:// www.epic.org/privacy/medical/polls.html). A Wall Street Journal/ABC poll on September 16, 1999 asked Americans what concerned them most in the coming century. "Loss of personal privacy" was the first or second concern of 29 percent of respondents. All other issues, such a terrorism, world war, and global warming had scores of 23 percent or less.

This growing concern stems from several trends, including the growing use of interconnected electronic media for business and personal activities, our increasing ability to know an individual's genetic make-up, and, in health care, the increasing complexity of the system. Each of these trends brings the potential for tremendous benefits to individuals and society generally. At the same time, each also brings new potential for invasions of our privacy.

Increasing Use of Interconnected Electronic Information Systems

Until recently, health information was recorded and maintained on paper and stored in the offices of community-based physicians, nurses, hospitals, and other health care professionals and institutions. In some ways, this imperfect system of record

keeping created a false sense of privacy among patients, providers, and others. Patients' health information has never remained completely confidential. Until recently, however, a breach of confidentiality involved a physical exchange of paper records or a verbal exchange of information. Today, however, more and more health care providers, plans, and others are utilizing electronic means of storing and transmitting health information. In 1996, the health care industry invested an estimated $10 billion to $15 billion on information technology. See National Research Council, Computer Science and Telecommunications Board, “For the Record: Protecting Electronic Health Information,” (1997). The electronic information revolution is transforming the recording of health information so that the disclosure of information may require only a push of a button. In a matter of seconds, a person's most profoundly private information can be shared with hundreds, thousands, even millions of individuals and organizations at a time. While the majority of medical records still are in paper form, information from those records is often copied and transmitted through electronic means.

This ease of information collection, organization, retention, and exchange made possible by the advances in computer and other electronic technology affords many benefits to individuals and to the health care industry. Use of electronic information has helped to speed the delivery of effective care and the processing of billions of dollars worth of health care claims. Greater use of electronic data has also increased our ability to identify and treat those who are at risk for disease, conduct vital research, detect fraud and abuse, and measure and improve the quality of care delivered in the U.S. The National Research Council recently reported that “the Internet has great potential to improve Americans” health by enhancing communications and improving access to information for care providers, patients, health plan administrators, public health officials, biomedical researchers, and other health professionals.” See “Networking Health: Prescriptions for the Internet,” National Academy of Sciences (2000).

At the same time, these advances have reduced or eliminated many of the financial and logistical obstacles that previously served to protect the confidentiality of health information and the privacy interests of individuals. And they have made our information available to many more people. The shift from paper to electronic records, with the accompanying greater flows of sensitive health information, thus strengthens the arguments for giving legal protection to the right to privacy in health information. In an earlier period where it was far more expensive to access and use medical records, the risk of harm to individuals was relatively low. In the potential near future, when technology makes it almost free to send lifetime medical records over the Internet, the risks may grow rapidly. It may become cost-effective, for instance, for companies to offer services that allow purchasers to obtain details of a person's physical and mental treatments. In addition to legitimate possible uses for such services, malicious or inquisitive persons may download medical records for purposes ranging from identity theft to embarrassment to prurient interest in the life of a celebrity or neighbor. The comments to the proposed privacy rule indicate that many persons believe that they have a right to live in society without having these details of their lives laid open to unknown and possibly hostile eyes. These technological changes, in short, may provide a reason for institutionalizing ***82466** privacy protections in situations where the risk of harm did not previously justify writing such protections into law.

The growing level of trepidation about privacy in general, noted above, has tracked the rise in electronic information technology. Americans have embraced the use of the Internet and other forms of electronic information as a way to provide greater access to information, save time, and save money. For example, 60 percent of Americans surveyed in 1999 reported that they have a computer in their home; 82 percent reported that they have used a computer; 64 percent say they have used the Internet; and 58 percent have sent an e-mail. Among those who are under the age of 60, these percentages are even higher. See “National Survey of Adults on Technology,” Henry J. Kaiser Family Foundation (February, 2000). But 59 percent of Americans reported that they worry that an unauthorized person will gain access to their information. A recent survey suggests that 75 percent of consumers seeking health information on the Internet are concerned or very concerned about the health sites they visit sharing their personal health information with a third party without their permission. Ethics Survey of Consumer Attitudes about Health Web Sites, California Health Care Foundation, at 3 (January, 2000).

Unless public fears are allayed, we will be unable to obtain the full benefits of electronic technologies. The absence of national standards for the confidentiality of health information has made the health care industry and the population in general uncomfortable about this primarily financially-driven expansion in the use of electronic data. Many plans, providers, and clearinghouses have taken steps to safeguard the privacy of individually identifiable health information. Yet they must currently

rely on a patchwork of State laws and regulations that are incomplete and, at times, inconsistent. States have, to varying degrees, attempted to enhance confidentiality by establishing laws governing at least some aspects of medical record privacy. This approach, though a step in the right direction, is inadequate. These laws fail to provide a consistent or comprehensive legal foundation of health information privacy. For example, there is considerable variation among the states in the type of information protected and the scope of the protections provided. See Georgetown Study, at Executive Summary; Lawrence O. Gostin, Zita Lazzarrini, Kathleen M. Flaherty, Legislative Survey of State Confidentiality Laws, with Specific Emphasis on HIV and Immunization, Report to Centers for Disease Control, Council of State and Territorial Epidemiologists, and Task Force for Child Survival and Development, Carter Presidential Center (1996) (Gostin Study).

Moreover, electronic health data is becoming increasingly "national"; as more information becomes available in electronic form, it can have value far beyond the immediate community where the patient resides. Neither private action nor state laws provide a sufficiently comprehensive and rigorous legal structure to allay public concerns, protect the right to privacy, and correct the market failures caused by the absence of privacy protections (see discussion below of market failure under section V.C). Hence, a national policy with consistent rules is necessary to encourage the increased and proper use of electronic information while also protecting the very real needs of patients to safeguard their privacy.

Advances in Genetic Sciences

Recently, scientists completed nearly a decade of work unlocking the mysteries of the human genome, creating tremendous new opportunities to identify and prevent many of the leading causes of death and disability in this country and around the world. Yet the absence of privacy protections for health information endanger these efforts by creating a barrier of distrust and suspicion among consumers. A 1995 national poll found that more than 85 percent of those surveyed were either "very concerned" or "somewhat concerned" that insurers and employers might gain access to and use genetic information. See Harris Poll, 1995 #34. Sixty-three percent of the 1,000 participants in a 1997 national survey said they would not take genetic tests if insurers and employers could gain access to the results. See "Genetic Information and the Workplace," Department of Labor, Department of Health and Human Services, Equal Employment Opportunity Commission, January 20, 1998. "In genetic testing studies at the National Institutes of Health, thirty-two percent of eligible people who were offered a test for breast cancer risk declined to take it, citing concerns about loss of privacy and the potential for discrimination in health insurance." Sen. Leahy's comments for March 10, 1999 Introduction of the Medical Information Privacy and Security Act.

The Changing Health Care System

The number of entities who are maintaining and transmitting individually identifiable health information has increased significantly over the last 10 years. In addition, the rapid growth of integrated health care delivery systems requires greater use of integrated health information systems. The health care industry has been transformed from one that relied primarily on one-on-one interactions between patients and clinicians to a system of integrated health care delivery networks and managed care providers. Such a system requires the processing and collection of information about patients and plan enrollees (for example, in claims files or enrollment records), resulting in the creation of databases that can be easily transmitted. This dramatic change in the practice of medicine brings with it important prospects for the improvement of the quality of care and reducing the cost of that care. It also, however, means that increasing numbers of people have access to health information. And, as health plan functions are increasingly outsourced, a growing number of organizations not affiliated with our physicians or health plans also have access to health information.

According to the American Health Information Management Association (AHIMA), an average of 150 people "from nursing staff to x-ray technicians, to billing clerks" have access to a patient's medical records during the course of a typical hospitalization. While many of these individuals have a legitimate need to see all or part of a patient's records, no laws govern who those people are, what information they are able to see, and what they are and are not allowed to do with that information once they have access to it. According to the National Research Council, individually identifiable health information frequently is shared with:

- Consulting physicians;

- Managed care organizations;

- Health insurance companies

- Life insurance companies;

- Self-insured employers;

- Pharmacies;

- Pharmacy benefit managers;

- Clinical laboratories;

- Accrediting organizations;

- State and Federal statistical agencies; and

- Medical information bureaus.

Much of this sharing of information is done without the knowledge of the patient involved. While many of these functions are important for smooth functioning of the health care system, there are no rules governing how that ***82467** information is used by secondary and tertiary users. For example, a pharmacy benefit manager could receive information to determine whether an insurance plan or HMO should cover a prescription, but then use the information to market other products to the same patient. Similarly, many of us obtain health insurance coverage though our employer and, in some instances, the employer itself acts as the insurer. In these cases, the employer will obtain identifiable health information about its employees as part of the legitimate health insurance functions such as claims processing, quality improvement, and fraud detection activities. At the same time, there is no comprehensive protection prohibiting the employer from using that information to make decisions about promotions or job retention.
Public concerns reflect these developments. A 1993 Lou Harris poll found that 75 percent of those surveyed worry that medical information from a computerized national health information system will be used for many non-health reasons, and 38 percent are very concerned. This poll, taken during the health reform efforts of 1993, showed that 85 percent of respondents believed that protecting the confidentiality of medical records is “absolutely essential” or “very essential” in health care reform. An ACLU Poll in 1994 also found that 75 percent of those surveyed are concerned a “great deal” or a “fair amount’" about insurance companies putting medical information about them into a computer information bank to which others have access. Harris Equifax, Health Information Privacy Study 2,33 (1993) http:// www.epic.org/privacy/medical/poll.html. Another survey found that 35 percent of Fortune 500 companies look at people's medical records before making hiring and promotion decisions. Starr, Paul. “Health and the Right to Privacy,” American Journal of Law and Medicine, 1999. Vol 25, pp. 193-201.

Concerns about the lack of attention to information privacy in the health care industry are not merely theoretical. In the absence of a national legal framework of health privacy protections, consumers are increasingly vulnerable to the exposure of their personal health information. Disclosure of individually identifiable information can occur deliberately or accidentally and can occur within an organization or be the result of an external breach of security. Examples of recent privacy breaches include:

- A Michigan-based health system accidentally posted the medical records of thousands of patients on the Internet (The Ann Arbor News, February 10, 1999).

- A Utah-based pharmaceutical benefits management firm used patient data to solicit business for its owner, a drug store (Kiplingers, February 2000).

- An employee of the Tampa, Florida, health department took a computer disk containing the names of 4,000 people who had tested positive for HIV, the virus that causes AIDS (USA Today, October 10, 1996).

- The health insurance claims forms of thousands of patients blew out of a truck on its way to a recycling center in East Hartford, Connecticut (The Hartford Courant, May 14, 1999).

- A patient in a Boston-area hospital discovered that her medical record had been read by more than 200 of the hospital's employees (The Boston Globe, August 1, 2000).

- A Nevada woman who purchased a used computer discovered that the computer still contained the prescription records of the customers of the pharmacy that had previously owned the computer. The pharmacy data base included names, addresses, social security numbers, and a list of all the medicines the customers had purchased. (The New York Times, April 4, 1997 and April 12, 1997).

- A speculator bid $4000 for the patient records of a family practice in South Carolina. Among the businessman's uses of the purchased records was selling them back to the former patients. (New York Times, August 14, 1991).

- In 1993, the Boston Globe reported that Johnson and Johnson marketed a list of 5 million names and addresses of elderly incontinent women. (ACLU Legislative Update, April 1998).

- A few weeks after an Orlando woman had her doctor perform some routine tests, she received a letter from a drug company promoting a treatment for her high cholesterol. (Orlando Sentinel, November 30, 1997).

No matter how or why a disclosure of personal information is made, the harm to the individual is the same. In the face of industry evolution, the potential benefits of our changing health care system, and the real risks and occurrences of harm, protection of privacy must be built into the routine operations of our health care system.

Privacy Is Necessary To Secure Effective, High Quality Health Care

While privacy is one of the key values on which our society is built, it is more than an end in itself. It is also necessary for the effective delivery of health care, both to individuals and to populations. The market failures caused by the lack of effective privacy protections for health information are discussed below (see section V.C below). Here, we discuss how privacy is a necessary foundation for delivery of high quality health care. In short, the entire health care system is built upon the willingness of individuals to share the most intimate details of their lives with their health care providers.

The need for privacy of health information, in particular, has long been recognized as critical to the delivery of needed medical care. More than anything else, the relationship between a patient and a clinician is based on trust. The clinician must trust the patient to give full and truthful information about their health, symptoms, and medical history. The patient must trust the clinician to use that information to improve his or her health and to respect the need to keep such information private. In order to receive accurate and reliable diagnosis and treatment, patients must provide health care professionals with accurate, detailed information about their personal health, behavior, and other aspects of their lives. The provision of health information assists in the diagnosis of an illness or condition, in the development of a treatment plan, and in the evaluation of the effectiveness of that treatment. In the absence of full and accurate information, there is a serious risk that the treatment plan will be inappropriate to the patient's situation.

Patients also benefit from the disclosure of such information to the health plans that pay for and can help them gain access to needed care. Health plans and health care clearinghouses rely on the provision of such information to accurately and promptly

process claims for payment and for other administrative functions that directly affect a patient's ability to receive needed care, the quality of that care, and the efficiency with which it is delivered.

Accurate medical records assist communities in identifying troubling public health trends and in evaluating the effectiveness of various public health efforts. Accurate information helps public and private payers make correct payments for care received and lower costs by identifying fraud. Accurate information provides scientists with data they need to conduct research. We cannot improve the quality of health care without information about which treatments work, and which do not.

Individuals cannot be expected to share the most intimate details of their lives unless they have confidence that such information will not be used or ***82468** shared inappropriately. Privacy violations reduce consumers' trust in the health care system and institutions that serve them. Such a loss of faith can impede the quality of the health care they receive, and can harm the financial health of health care institutions.

Patients who are worried about the possible misuse of their information often take steps to protect their privacy. Recent studies show that a person who does not believe his privacy will be protected is much less likely to participate fully in the diagnosis and treatment of his medical condition. A national survey conducted in January 1999 found that one in five Americans believe their health information is being used inappropriately. See California HealthCare Foundation, “National Survey: Confidentiality of Medical Records” (January, 1999) (http://www.chcf.org). More troubling is the fact that one in six Americans reported that they have taken some sort of evasive action to avoid the inappropriate use of their information by providing inaccurate information to a health care provider, changing physicians, or avoiding care altogether. Similarly, in its comments on our proposed rule, the Association of American Physicians and Surgeons reported 78 percent of its members reported withholding information from a patient's record due to privacy concerns and another 87 percent reported having had a patient request to withhold information from their records. For an example of this phenomenon in a particular demographic group, see Drs. Bearman, Ford, and Moody, “Foregone Health Care among Adolescents,” JAMA, vol. 282, no. 23 (999); Cheng, T.L., et al., “Confidentiality in Health Care: A Survey of Knowledge, Perceptions, and Attitudes among High School Students,” JAMA, vol. 269, no. 11 (1993), at 1404-1407.

The absence of strong national standards for medical privacy has widespread consequences. Health care professionals who lose the trust of their patients cannot deliver high-quality care. In 1999, a coalition of organizations representing various stakeholders including health plans, physicians, nurses, employers, disability and mental health advocates, accreditation organizations as well as experts in public health, medical ethics, information systems, and health policy adopted a set of “best principles” for health care privacy that are consistent with the standards we lay out here. (See the Health Privacy Working Group, “Best Principles for Health Privacy” (July, 1999) (Best Principles Study). The Best Principles Study states that—

To protect their privacy and avoid embarrassment, stigma, and discrimination, some people withhold information from their health care providers, provide inaccurate information, doctor-hop to avoid a consolidated medical record, pay out-of-pocket for care that is covered by insurance, and—in some cases—avoid care altogether.

Best Principles Study, at 9. In their comments on our proposed rule, numerous organizations representing health plans, health providers, employers, and others acknowledged the value of a set of national privacy standards to the efficient operation of their practices and businesses.

Breaches of Health Privacy Harm More Than Our Health Status

A breach of a person's health privacy can have significant implications well beyond the physical health of that person, including the loss of a job, alienation of family and friends, the loss of health insurance, and public humiliation. For example:

- A banker who also sat on a county health board gained access to patients' records and identified several people with cancer and called in their mortgages. See the National Law Journal, May 30, 1994.

- A physician was diagnosed with AIDS at the hospital in which he practiced medicine. His surgical privileges were suspended. See Estate of Behringer v. Medical Center at Princeton, 249 N.J. Super. 597.

- A candidate for Congress nearly saw her campaign derailed when newspapers published the fact that she had sought psychiatric treatment after a suicide attempt. See New York Times, October 10, 1992, Section 1, page 25.

- A 30-year FBI veteran was put on administrative leave when, without his permission, his pharmacy released information about his treatment for depression. (Los Angeles Times, September 1, 1998) Consumer Reports found that 40 percent of insurers disclose personal health information to lenders, employers, or marketers without customer permission. "Who's reading your Medical Records," Consumer Reports, October 1994, at 628, paraphrasing Sweeny, Latanya, "Weaving Technology and Policy Together to Maintain Confidentiality," The Journal Of Law Medicine and Ethics (Summer & Fall 1997) Vol. 25, Numbers 2,3.

The answer to these concerns is not for consumers to withdraw from society and the health care system, but for society to establish a clear national legal framework for privacy. By spelling out what is and what is not an allowable use of a person's identifiable health information, such standards can help to restore and preserve trust in the health care system and the individuals and institutions that comprise that system. As medical historian Paul Starr wrote: "Patients have a strong interest in preserving the privacy of their personal health information but they also have an interest in medical research and other efforts by health care organizations to improve the medical care they receive. As members of the wider community, they have an interest in public health measures that require the collection of personal data." (P. Starr, "Health and the Right to Privacy," American Journal of Law & Medicine, 25, nos. 2&3 (1999) 193-201). The task of society and its government is to create a balance in which the individual's needs and rights are balanced against the needs and rights of society as a whole.

National standards for medical privacy must recognize the sometimes competing goals of improving individual and public health, advancing scientific knowledge, enforcing the laws of the land, and processing and paying claims for health care services. This need for balance has been recognized by many of the experts in this field. Cavoukian and Tapscott described it this way: "An individual's right to privacy may conflict with the collective rights of the public * * *. We do not suggest that privacy is an absolute right that reigns supreme over all other rights. It does not. However, the case for privacy will depend on a number of factors that can influence the balance—the level of harm to the individual involved versus the needs of the public."

The Federal Response

There have been numerous federal initiatives aimed at protecting the privacy of especially sensitive personal information over the past several years—and several decades. While the rules below are likely the largest single federal initiative to protect privacy, they are by no means alone in the field. Rather, the rules arrive in the context of recent legislative activity to grapple with advances in technology, in addition to an already established body of law granting federal protections for personal privacy.

In 1965, the House of Representatives created a Special Subcommittee on Invasion of Privacy. In 1973, this Department's predecessor agency, the Department of Health, Education and Welfare issued The Code of Fair Information Practice Principles establishing an important baseline for ***82469** information privacy in the U.S. These principles formed the basis for the federal Privacy Act of 1974, which regulates the government's use of personal information by limiting the disclosure of personally-identifiable information, allows consumers access to information about them, requires federal agencies to specify the purposes for collecting personal information, and provides civil and criminal penalties for misuse of information.

In the last several years, with the rapid expansion in electronic technology—and accompanying concerns about individual privacy—laws, regulations, and legislative proposals have been developed in areas ranging from financial privacy to genetic privacy to the safeguarding of children on-line. For example, the Children's Online Privacy Protection Act was enacted in 1998, providing protection for children when interacting at web-sites. In February, 2000, President Clinton signed Executive Order 13145, banning the use of genetic information in federal hiring and promotion decisions. The landmark financial modernization bill, signed by the President in November, 1999, likewise contained financial privacy protections for consumers. There also

has been recent legislative activity on establishing legal safeguards for the privacy of individuals' Social Security numbers, and calls for regulation of on-line privacy in general.

These most recent laws, regulations, and legislative proposals come against the backdrop of decades of privacy-enhancing statutes passed at the federal level to enact safeguards in fields ranging from government data files to video rental records. In the 1970s, individual privacy was paramount in the passage of the Fair Credit Reporting Act (1970), the Privacy Act (1974), the Family Educational Rights and Privacy Act (1974), and the Right to Financial Privacy Act (1978). These key laws were followed in the next decade by another series of statutes, including the Privacy Protection Act (1980), the Electronic Communications Privacy Act (1986), the Video Privacy Protection Act (1988), and the Employee Polygraph Protection Act (1988). In the last ten years, Congress and the President have passed additional legal privacy protection through, among others, the Telephone Consumer Protection Act (1991), the Driver's Privacy Protection Act (1994), the Telecommunications Act (1996), the Children's Online Privacy Protection Act (1998), the Identity Theft and Assumption Deterrence Act (1998), and Title V of the Gramm-Leach-Bliley Act (1999) governing financial privacy.

In 1997, a Presidential advisory commission, the Advisory Commission on Consumer Protection and Quality in the Health Care Industry, recognized the need for patient privacy protection in its recommendations for a Consumer Bill of Rights and Responsibilities (November 1997). In 1997, Congress enacted the Balanced Budget Act (Public Law 105-34), which added language to the Social Security Act (18 U.S.C. 1852) to require Medicare+Choice organizations to establish safeguards for the privacy of individually identifiable patient information. Similarly, the Veterans Benefits section of the U.S. Code provides for confidentiality of medical records in cases involving drug abuse, alcoholism or alcohol abuse, HIV infection, or sickle cell anemia (38 U.S.C. 7332).

As described in more detail in the next section, Congress recognized the importance of protecting the privacy of health information by enacting the Health Insurance Portability and Accountability Act of 1996. The Act called on Congress to enact a medical privacy statute and asked the Secretary of Health and Human Services to provide Congress with recommendations for protecting the confidentiality of health care information. The Congress further recognized the importance of such standards by providing the Secretary with authority to promulgate regulations on health care privacy in the event that lawmakers were unable to act within the allotted three years.

Finally, it also is important for the U.S. to join the rest of the developed world in establishing basic medical privacy protections. In 1995, the European Union (EU) adopted a Data Privacy Directive requiring its 15 member states to adopt consistent privacy laws by October 1998. The EU urged all other nations to do the same or face the potential loss of access to information from EU countries.

Statutory Background

History of the Privacy Component of the Administrative Simplification Provisions

The Congress addressed the opportunities and challenges presented by the rapid evolution of health information systems in the Health Insurance Portability and Accountability Act of 1996 (HIPAA), Public Law 104-191, which was enacted on August 21, 1996. Sections 261 through 264 of HIPAA are known as the Administrative Simplification provisions. The major part of these Administrative Simplification provisions are found at section 262 of HIPAA, which enacted a new part C of title XI of the Social Security Act (hereinafter we refer to the Social Security Act as the “Act” and we refer to all other laws cited in this document by their names).

In section 262, Congress primarily sought to facilitate the efficiencies and cost savings for the health care industry that the increasing use of electronic technology affords. Thus, section 262 directs HHS to issue standards to facilitate the electronic exchange of information with respect to financial and administrative transactions carried out by health plans, health care clearinghouses, and health care providers who transmit information electronically in connection with such transactions.

At the same time, Congress recognized the challenges to the confidentiality of health information presented by the increasing complexity of the health care industry, and by advances in health information systems technology and communications. Section 262 thus also directs HHS to develop standards to protect the security, including the confidentiality and integrity, of health information.

Congress has long recognized the need for protection of health information privacy generally, as well as the privacy implications of electronic data interchange and the increased ease of transmitting and sharing individually identifiable health information. Congress has been working on broad health privacy legislation for many years and, as evidenced by the self-imposed three year deadline included in the HIPAA, discussed below, believes it can and should enact such legislation. A significant portion of the first Administrative Simplification section debated on the floor of the Senate in 1994 (as part of the Health Security Act) consisted of privacy provisions. In the version of the HIPAA passed by the House of Representatives in 1996, the requirement for the issuance of privacy standards was located in the same section of the bill (section 1173) as the requirements for issuance of the other HIPAA Administrative Simplification standards. In conference, the requirement for privacy standards was moved to a separate section in the same part of HIPAA, section 264, so that Congress could link the Privacy standards to Congressional action.

Section 264(b) requires the Secretary of HHS to develop and submit to the Congress recommendations for:

- The rights that an individual who is a subject of individually identifiable health information should have. ***82470**

- The procedures that should be established for the exercise of such rights.

- The uses and disclosures of such information that should be authorized or required.

The Secretary's Recommendations were submitted to the Congress on September 11, 1997. Section 264(c)(1) provides that:
If legislation governing standards with respect to the privacy of individually identifiable health information transmitted in connection with the transactions described in section 1173(a) of the Social Security Act (as added by section 262) is not enacted by [August 21, 1999], the Secretary of Health and Human Services shall promulgate final regulations containing such standards not later than [February 21, 2000]. Such regulations shall address at least the subjects described in subsection (b).

As the Congress did not enact legislation regarding the privacy of individually identifiable health information prior to August 21, 1999, HHS published proposed rules setting forth such standards on November 3, 1999, 64 FR 59918, and is now publishing the mandated final regulation.
These privacy standards have been, and continue to be, an integral part of the suite of Administrative Simplification standards intended to simplify and improve the efficiency of the administration of our health care system.

The Administrative Simplification Provisions, and Regulatory Actions to Date
Part C of title XI consists of sections 1171 through 1179 of the Act. These sections define various terms and impose several requirements on HHS, health plans, health care clearinghouses, and health care providers who conduct the identified transactions electronically.

The first section, section 1171 of the Act, establishes definitions for purposes of part C of title XI for the following terms: code set, health care clearinghouse, health care provider, health information, health plan, individually identifiable health information, standard, and standard setting organization.

Section 1172 of the Act makes the standard adopted under part C applicable to: (1) Health plans, (2) health care clearinghouses, and (3) health care providers who transmit health information in electronic form in connection with transactions referred

to in section 1173(a)(1) of the Act (hereinafter referred to as the "covered entities"). Section 1172 also contains procedural requirements concerning the adoption of standards, including the role of standard setting organizations and required consultations, summarized in subsection F and section VI, below.

Section 1173 of the Act requires the Secretary to adopt standards for transactions, and data elements for such transactions, to enable health information to be exchanged electronically. Section 1173(a)(1) describes the transactions to be promulgated, which include the nine transactions listed in section 1173(a)(2) and other transactions determined appropriate by the Secretary. The remainder of section 1173 sets out requirements for the specific standards the Secretary is to adopt: Unique health identifiers, code sets, security standards, electronic signatures, and transfer of information among health plans. Of particular relevance to this proposed rule is section 1173(d), the security standard provision. The security standard authority applies to both the transmission and the maintenance of health information, and requires the entities described in section 1172(a) to maintain reasonable and appropriate safeguards to ensure the integrity and confidentiality of the information, protect against reasonably anticipated threats or hazards to the security or integrity of the information or unauthorized uses or disclosures of the information, and to ensure compliance with part C by the entity's officers and employees.

In section 1174 of the Act, the Secretary is required to establish standards for all of the above transactions, except claims attachments, by February 21, 1998. The statutory deadline for the claims attachment standard is February 21, 1999.

As noted above, a proposed rule for most of the transactions was published on May 7, 1998, and the final Transactions Rule was promulgated on August 17, 2000. The delay was caused by the deliberate consensus building process, working with industry, and the large number of comments received (about 17,000). In addition, in a series of Notices of Proposed Rulemakings, HHS published other proposed standards, as described above. Each of these steps was taken in concert with the affected professions and industries, to ensure rapid adoption and compliance.

Generally, after a standard is established, it may not be changed during the first year after adoption except for changes that are necessary to permit compliance with the standard. Modifications to any of these standards may be made after the first year, but not more frequently than once every 12 months. The Secretary also must ensure that procedures exist for the routine maintenance, testing, enhancement, and expansion of code sets and that there are crosswalks from prior versions.

Section 1175 of the Act prohibits health plans from refusing to process, or from delaying processing of, a transaction that is presented in standard format. It also establishes a timetable for compliance: each person to whom a standard or implementation specification applies is required to comply with the standard within 24 months (or 36 months for small health plans) of its adoption. A health plan or other entity may, of course, comply voluntarily before the effective date. The section also provides that compliance with modifications to standards or implementation specifications must be accomplished by a date designated by the Secretary, which date may not be earlier than 180 days from the notice of change.

Section 1176 of the Act establishes civil monetary penalties for violation of the provisions in part C of title XI of the Act, subject to several limitations. Penalties may not be more than $100 per person per violation and not more than $25,000 per person for violations of a single standard for a calendar year. The procedural provisions of section 1128A of the Act apply to actions taken to obtain civil monetary penalties under this section.

Section 1177 establishes penalties for any person that knowingly uses a unique health identifier, or obtains or discloses individually identifiable health information in violation of the part. The penalties include: (1) A fine of not more than $50,000 and/or imprisonment of not more than 1 year; (2) if the offense is "under false pretenses," a fine of not more than $100,000 and/or imprisonment of not more than 5 years; and (3) if the offense is with intent to sell, transfer, or use individually identifiable health information for commercial advantage, personal gain, or malicious harm, a fine of not more than $250,000 and/or imprisonment of not more than 10 years.

Under section 1178 of the Act, the requirements of part C, as well as any standards or implementation specifications adopted thereunder, preempt contrary state law. There are three exceptions to this general rule of preemption: State laws that the Secretary determines are necessary for certain purposes set forth in the statute; state laws that the Secretary determines address controlled substances; and state laws relating to the privacy of ***82471** individually identifiable health information that are contrary to and more stringent than the federal requirements. There also are certain areas of state law (generally relating to public health and oversight of health plans) that are explicitly carved out of the general rule of preemption and addressed separately.

Section 1179 of the Act makes the above provisions inapplicable to financial institutions (as defined by section 1101 of the Right to Financial Privacy Act of 1978) or anyone acting on behalf of a financial institution when "authorizing, processing, clearing, settling, billing, transferring, reconciling, or collecting payments for a financial institution."

Finally, as explained above, section 264 requires the Secretary to issue standards with respect to the privacy of individually identifiable health information. Section 264 also contains a preemption provision that provides that contrary provisions of state laws that are more stringent than the federal standards, requirements, or implementation specifications will not be preempted.

Our Approach to This Regulation

Balance

A number of facts informed our approach to this regulation. Determining the best approach to protecting privacy depends on where we start, both with respect to existing legal expectations and also with respect to the expectations of individuals, health care providers, payers and other stakeholders. From the comments we received on the proposed rule, and from the extensive fact finding in which we engaged, a confused picture developed. We learned that stakeholders in the system have very different ideas about the extent and nature of the privacy protections that exist today, and very different ideas about appropriate uses of health information. This leads us to seek to balance the views of the different stakeholders, weighing the varying interests on each particular issue with a view to creating balance in the regulation as a whole.

For example, we received hundreds of comments explaining the legitimacy of various uses and disclosure of health information. We agree that many uses and disclosures of health information are "legitimate," but that is not the end of the inquiry. Neither privacy, nor the important social goals described by the commenters, are absolutes. In this regulation, we are asking health providers and institutions to add privacy into the balance, and we are asking individuals to add social goals into the balance.

The vast difference among regulated entities also informed our approach in significant ways. This regulation applies to solo practitioners, and multi-national health plans. It applies to pharmacies and information clearinghouses. These entities differ not only in the nature and scope of their businesses, but also in the degree of sophistication of their information systems and information needs. We therefore designed the core requirements of this regulation to be flexible and "scalable." This is reflected throughout the rule, particularly in the implementation specifications for making the minimum necessary uses and disclosures, and in the administrative policies and procedures requirements.

We also are informed by the rapid evolution in industry organization and practice. Our goal is to enhance privacy protections in ways that do not impede this evolution. For example, we received many comments asking us to assign a status under this regulation based on a label or title. For example, many commenters asked whether "disease management" is a "health care operation," or whether a "pharmacy benefits manager" is a covered entity. From the comments and our fact-finding, however, we learned that these terms do not have consistent meanings today; rather, they encompass diverse activities and information practices. Further, the statutory definitions of key terms such as health care provider and health care clearinghouse describe functions, not specific types of persons or entities. To respect both the Congressional approach and industry evolution, we design the rule to follow activities and functions, not titles and labels.

Similarly, many comments asked whether a particular person would be a "business associate" under the rule, based on the nature of the person's business. Whether a business associate arrangement must exist under the rule, however, depends on the relationship between the entities and the services being performed, not on the type of persons or companies involved.

Our approach is also significantly informed by the limited jurisdiction conferred by HIPAA. In large part, we have the authority to regulate those who create and disclose health information, but not many key stakeholders who receive that health information from a covered entity. Again, this led us to look to the balance between the burden on covered entities and need to protect privacy in determining our approach to such disclosures. In some instances, we approach this dilemma by requiring covered entities to obtain a representation or documentation of purpose from the person requesting information. While there would be advantages to legislation regulating such third persons directly, we cannot justify abandoning any effort to enhance privacy.

It also became clear from the comments and our fact-finding that we have expectations as a society that conflict with individuals' views about the privacy of health information. We expect the health care industry to develop treatment protocols for the delivery of high quality health care. We expect insurers and the government to reduce fraud in the health care system. We expect to be protected from epidemics, and we expect medical research to produce miracles. We expect the police to apprehend suspects, and we expect to pay for our care by credit card. All of these activities involve disclosure of health information to someone other than our physician.

While most commenters support the concept of health privacy in general, many go on to describe activities that depend on the disclosure of health information and urge us to protect those information flows. Section III, in which we respond to the comments, describes our approach to balancing these conflicting expectations.

Finally, we note that many commenters were concerned that this regulation would lessen current privacy protections. It is important to understand this regulation as a new federal floor of privacy protections that does not disturb more protective rules or practices. Nor do we intend this regulation to describe a set of a "best practices." Rather, this regulation describes a set of basic consumer protections and a series of regulatory permissions for use and disclosure of health information. The protections are a mandatory floor, which other governments and any covered entity may exceed. The permissions are just that, permissive —the only disclosures of health information required under this rule are to the individual who is the subject of the information or to the Secretary for enforcement of this rule. We expect covered entities to rely on their professional ethics and use their own best judgements in deciding which of these permissions they will use.

Combining Workability With New Protections

This rule establishes national minimum standards to protect the privacy of individually identifiable health information in prescribed ***82472** settings. The standards address the many varied uses and disclosures of individually identifiable health information by health plans, certain health care providers and health care clearinghouses. The complexity of the standards reflects the complexity of the health care marketplace to which they apply and the variety of subjects that must be addressed. The rule applies not only to the core health care functions relating to treating patients and reimbursing health care providers, but also to activities that range from when individually identifiable health information should be available for research without authorization to whether a health care provider may release protected health information about a patient for law enforcement purposes. The number of discrete provisions, and the number of commenters requesting that the rule recognize particular activities, is evidence of the significant role that individually identifiable health information plays in many vital public and private concerns.

At the same time, the large number of comments from individuals and groups representing individuals demonstrate the deep public concern about the need to protect the privacy of individually identifiable health information. The discussion above is rich with evidence about the importance of protecting privacy and the potential adverse consequences to individuals and their health if such protections are not extended.

The need to balance these competing interests—the necessity of protecting privacy and the public interest in using identifiable health information for vital public and private purposes—in a way that is also workable for the varied stakeholders causes much of the complexity in the rule. Achieving workability without sacrificing protection means some level of complexity, because the rule must track current practices and current practices are complex. We believe that the complexity entailed in reflecting those practices is better public policy than a perhaps simpler rule that disturbed important information flows.

Although the rule taken as a whole is complicated, we believe that the standards are much less complex as they apply to particular actors. What a health plan or covered health care provider must do to comply with the rule is clear, and the two-year delayed implementation provides a substantial period for trade and professional associations, working with their members, to assess the effects of the standards and develop policies and procedures to come into compliance with them. For individuals, the system may look substantially more complicated because, for the first time, we are ensuring that individuals will receive detailed information about how their individually identifiable health information may be used and disclosed. We also provide individuals with additional tools to exercise some control over those uses and disclosures. The additional complexity for individuals is the price of expanding their understanding and their rights.

The Department will work actively with members of the health care industry, representatives of individuals and others during the implementation of this rule. As stated elsewhere, our focus is to develop broader understanding of how the standards work and to facilitate compliance. We intend to provide guidance and check lists as appropriate, particularly to small businesses affected by the rule. We also will work with trade and professional associations to develop guidance and provide technical assistance so that they can help their members understand and comply with these new standards. If this effort is to succeed, the various public and private participants inside and outside of the health care system will need to work together to assure that the competing interests described above remain in balance and that an ethic that recognizes their importance is established.

Enforcement

The Secretary has decided to delegate her responsibility under this regulation to the Department's Office for Civil Rights (OCR). OCR will be responsible for enforcement of this regulation. Enforcement activities will include working with covered entities to secure voluntary compliance through the provision of technical assistance and other means; responding to questions regarding the regulation and providing interpretations and guidance; responding to state requests for exception determinations; investigating complaints and conducting compliance reviews; and, where voluntary compliance cannot be achieved, seeking civil monetary penalties and making referrals for criminal prosecution.

Consent

Current Law and Practice

The issue that drew the most comments overall is the question of when individuals' permission should be obtained prior to use or disclosure of their health information. We learned that individuals' views and the legal view of “consent” for use and disclosure of health information are different and in many ways incompatible. Comments from individuals revealed a common belief that, today, people must be asked permission for each and every release of their health information. Many believe that they “own” the health records about them. However, current law and practice do not support this view.

Current privacy protection practices are determined in part by the standards and practices that the professional associations have adopted for their members. Professional codes of conduct for ethical behavior generally can be found as opinions and guidelines developed by organizations such as the American Medical Association, American Nurses' Association, the American Hospital Association, the American Psychiatric Association, and the American Dental Association. These are generally issued though an organization's governing body. The codes do not have the force of law, but providers often recognize them as binding rules.

Our review of professional codes of ethics revealed partial, but loose, support for individuals' expectations of privacy. For example, the American Medical Association's Code of Ethics recognizes both the right to privacy and the need to balance it

against societal needs. It reads in part: "conflicts between a patient's right to privacy and a third party's need to know should be resolved in favor of the patient, except where that would result in serious health hazard or harm to the patient or others." AMA Policy No 140.989. See also, Mass. Med. Society, Patient Privacy and Confidentiality (1996), at 14:

Patients enter treatment with the expectation that the information they share will be used exclusively for their clinical care. Protection of our patients' confidences is an integral part of our ethical training.

These codes, however, do not apply to many who obtain information from providers. For example, the National Association of Insurance Commissioners model code, "Health Information Privacy Model Act" (1998), applies to insurers but has not been widely adopted. Codes of ethics are also often written in general terms that do not provide guidance to providers and plans confronted with specific questions about protecting health information.

State laws are a crucial means of protecting health information, and today state laws vary dramatically. Some states defer to the professional codes of conduct, others provide general guidelines for privacy protection, and ***82473** others provide detailed requirements relating to the protection of information relating to specific diseases or to entire classes of information. Cf., D.C. Code Ann. § 2-3305.14(16) and Haw. Rev. Stat. 323C, et seq. In general, state statutes and case law addressing consent to use of health information do not support the public's strong expectations regarding consent for use and disclosure of health information. Only about half of the states have a general law that prohibits disclosure of health information without patient authorization and some of these are limited to hospital medical records.

Even when a state has a law limiting disclosure of health information, the law typically exempts many types of disclosure from the authorization requirement. Georgetown Study, Key Findings; Lisa Dahm, "50-State Survey on Patient Health Care Record Confidentiality," American Health Lawyers Association (1999). One of the most common exemptions from a consent requirement is disclosure of health information for treatment and related purposes. See, e.g., Wis.Stat. § 164.82; Cal. Civ. Code 56:10; National Conference of Commissioners on Uniform State Laws, Uniform Health-Care Information Act, Minneapolis, MN, August 9, 1985. Some states include utilization review and similar activities in the exemption. See, e.g., Ariz. Rev. Stat. § 12-2294. Another common exemption from consent is disclosure of health information for purposes of obtaining payment. See, e.g., Fla. Stat. Ann. § 455.667; Tex. Rev. Civ. Stat. Art. 4495, § 5.08(h); 410 Ill. Comp. Stat. 50/3(d). Other common exemptions include disclosures for emergency care, and for disclosures to government authorities (such as a department of public health). See Gostin Study, at 1-2; 48-51. Some states also exempt disclosure to law enforcement officials (e.g., Massachusetts, Ch. 254 of the Acts of 2000), coroners (Wis. Stat. § 146.82), and for such purposes as business operations, oversight, research, and for directory information. Under these exceptions, providers can disclose health information without any consent or authorization from the patient. When states require specific, written authorization for disclosure of health information, the authorizations are usually only required for certain types of disclosures or certain types of information, and one authorization can suffice for multiple disclosures over time.

The states that do not have laws prohibiting disclosure of health information impose no specific requirements for consent or authorization prior to release of health information. There may, however, be other controls on release of health information. For instance, most health care professional licensure laws include general prohibitions against "breaches of confidentiality." In some states, patients can hold providers accountable for some unauthorized disclosures of health information about them under various tort theories, such as invasion of privacy and breach of a confidential relationship. While these controls may affect certain disclosure practices, they do not amount to a requirement that a provider obtain authorization for each and every disclosure of health information.

Further, patients are typically not given a choice; they must sign the "consent" in order to receive care. As the Georgetown Study points out, "In effect, the authorization may function more as a waiver of consent—the patient may not have an opportunity to object to any disclosures." Georgetown Study, Key Findings.

In the many cases where neither state law nor professional ethical standards exist, the only privacy protection individuals have is limited to the policies and procedures that the health care entity adopts. Corporate privacy policies are often proprietary. While several professional associations attached their privacy principles to their comments, health care entities did not. One study we found indicates that these policies are not adequate to provide appropriate privacy protections and alleviate public concern. The Committee on Maintaining Privacy and Security in Health Care Applications of the National Information Infrastructure made multiple findings highlighting the need for heightened privacy and security, including:

Finding 5: The greatest concerns regarding the privacy of health information derives from widespread sharing of patient information throughout the health care industry and the inadequate federal and state regulatory framework for systematic protection of health information.

For the Record: Protecting Electronic Health Information, National Academy Press, Washington DC, 1997.

Consent Under This Rule

In the NPRM, we expressed concern about the coercive nature of consents currently obtained by providers and plans relating to the use and disclosure of health information. We also expressed concern about the lack of information available to the patient during the process, and the fact that patients often were not even presented with a copy of the consent that they have signed. These and other concerns led us to propose that covered entities be permitted to use and disclose protected health information for treatment, payment and health care operations without the express consent of the subject individual.

In the final rule, we alter our proposed approach and require, in most instances, that health care providers who have a direct treatment relationship with their patients obtain the consent of their patients to use and disclose protected health information for treatment, payment and health care operations. While our concern about the coerced nature of these consents remains, many comments that we received from individuals, health care professionals, and organizations that represent them indicated that both patients and practitioners believe that patient consent is an important part of the current health care system and should be retained.

Providing and obtaining consent clearly has meaning for patients and practitioners. Patient advocates argued that the act of signing focuses the patient's attention on the substance of the transaction and provides an opportunity for the patient to ask questions about or seek modifications in the provider's practices. Many health care practitioners and their representatives argued that seeking a patient's consent to disclose confidential information is an ethical requirement that strengthens the physician-patient relationship. Both practitioners and patients argued that the approach proposed in the NPRM actually reduced patient protections by eliminating the opportunity for patients to agree to how their confidential information would be used and disclosed.

While we believe that the provisions in the NPRM that provided for detailed notice to the patient and the right to request restrictions would have provided an opportunity for patients and providers to discuss and negotiate over information practices, it is clear from the comments that many practitioners and patients believe the approach proposed in the NPRM is not an acceptable replacement for the patient providing consent.

To encourage a more informed interaction between the patient and the provider during the consent process, the final rule requires that the consent form that is presented to the patient be accompanied by a notice that contains a detailed discussion of the provider's health information practices. The consent form must reference the notice and also must inform the patient that he ***82474** or she has the right to ask the health care provider to request certain restrictions as to how the information of the patient will be used or disclosed. Our goal is to provide an opportunity for and to encourage more informed discussions between patients and providers about how protected health information will be used and disclosed within the health care system.

We considered and rejected other approaches to consent, including those that involved individuals providing a global consent to uses and disclosures when they sign up for insurance. While such approaches do require the patient to provide consent,

it is not really an informed one or a voluntary one. It is also unclear how a consent obtained at the enrollment stage would be meaningfully communicated to the many providers who create the health information in the first instance. The ability to negotiate restrictions or otherwise have a meaningful discussion with the front-line provider would be independent of, and potentially in conflict with, the consent obtained at the enrollment stage. In addition, employers today are moving toward simplified enrollment forms, using check-off boxes and similar devices. The opportunity for any meaningful consideration or interaction at that point is slight. For these and other reasons, we decided that, to the extent a consent can accomplish the goal sought by individuals and providers, it must be focused on the direct interaction between an individual and provider.

The comments and fact-finding indicate that our approach will not significantly change the administrative aspect of consent as it exists today. Most direct treatment providers today obtain some type of consent for some uses and disclosures of health information. Our regulation will ensure that those consents cover the routine uses and disclosures of health information, and provide an opportunity for individuals to obtain further information and have further discussion, should they so desire.

Administrative Costs

Section 1172(b) of the Act provides that "[a]ny standard adopted under this part [part C of title XI of the Act] shall be consistent with the objective of reducing the administrative costs of providing and paying for health care." The privacy and security standards are the platform on which the remaining standards rest; indeed, the design of part C of title XI makes clear that the various standards are intended to function together. Thus, the costs of privacy and security are properly attributable to the suite of administrative simplification regulations as a whole, and the cost savings realized should likewise be calculated on an aggregated basis, as is done below. Because the privacy standards are an integral and necessary part of the suite of Administrative Simplification standards, and because that suite of standards will result in substantial administrative cost savings, the privacy standards are "consistent with the objective of reducing the administrative costs of providing and paying for health care."

As more fully discussed in the Regulatory Impact and Regulatory Flexibility analyses below, we recognize that these privacy standards will entail substantial initial and ongoing administrative costs for entities subject to the rules. It is also the case that the privacy standards, like the security standards authorized by section 1173(d) of the Act, are necessitated by the technological advances in information exchange that the remaining Administrative Simplification standards facilitate for the health care industry. The same technological advances that make possible enormous administrative cost savings for the industry as a whole have also made it possible to breach the security and privacy of health information on a scale that was previously inconceivable. The Congress recognized that adequate protection of the security and privacy of health information is a sine qua non of the increased efficiency of information exchange brought about by the electronic revolution, by enacting the security and privacy provisions of the law. Thus, as a matter of policy as well as law, the administrative standards should be viewed as a whole in determining whether they are "consistent with" the objective of reducing administrative costs.

Consultations

The Congress required the Secretary to consult with specified groups in developing the standards under sections 262 and 264. Section 264(d) of HIPAA specifically requires the Secretary to consult with the National Committee on Vital and Health Statistics (NCVHS) and the Attorney General in carrying out her responsibilities under the section. Section 1172(b)(3) of the Act, which was enacted by section 262, requires that, in developing a standard under section 1172 for which no standard setting organization has already developed a standard, the Secretary must, before adopting the standard, consult with the National Uniform Billing Committee (NUBC), the National Uniform Claim Committee (NUCC), the Workgroup for Electronic Data Interchange (WEDI), and the American Dental Association (ADA). Section 1172(f) also requires the Secretary to rely on the recommendations of the NCVHS and consult with other appropriate federal and state agencies and private organizations.

We engaged in the required consultations including the Attorney General, NUBC, NUCC, WEDI and the ADA. We consulted with the NCVHS in developing the Recommendations, upon which this proposed rule is based. We continued to consult with this committee by requesting the committee to review the proposed rule and provide comments prior to its publication, and by reviewing transcripts of its public meeting on privacy and related topics. We consulted with representatives of the

National Congress of American Indians, the National Indian Health Board, and the self governance tribes. We also met with representatives of the National Governors' Association, the National Conference of State Legislatures, the National Association of Public Health Statistics and Information Systems, and a number of other state organizations to discuss the framework for the proposed rule, issues of special interests to the states, and the process for providing comments on the proposed rule.

Many of these groups submitted comments to the proposed rule, and those were taken into account in developing the final regulation.

In addition to the required consultations, we met with numerous individuals, entities, and agencies regarding the regulation, with the goal of making these standards as compatible as possible with current business practices, while still enhancing privacy protection. During the open comment period, we met with dozens of groups.

Relevant federal agencies participated in the interagency working groups that developed the NPRM and the final regulation, with additional representatives from all operating divisions and many staff offices of HHS. The following federal agencies and offices were represented on the interagency working groups: the Department of Justice, the Department of Commerce, the Social Security Administration, the Department of Defense, the Department of Veterans Affairs, the Department of Labor, the Office of Personnel Management, and the Office of Management and Budget. ***82475**

II. Section-by-Section Description of Rule Provisions

Part 160—Subpart A—General Provisions

Part 160 applies to all the administrative simplification regulations. We include the entire regulation text in this rule, not just those provisions relevant to this Privacy regulation. For example, the term "trading partner" is defined here, for use in the Health Insurance Reform: Standards for Electronic Transactions regulation, published at 65 FR 50312, August 17, 2000 (the "Transactions Rule"). It does not appear in the remainder of this Privacy rule.

Sections 160.101 and 160.104 of Subpart A of part 160 were promulgated in the Transactions Rule, and we do not change them here. We do, however, make changes and additions to § 160.103, the definitions section of Subpart A. The definitions that were promulgated in the Transactions Rule and that remain unchanged here are: Act, ANSI, covered entity, compliance date, group health plan, HCFA, HHS, health care provider, health information, health insurance issuer, health maintenance organization, modify or modification, Secretary, small health plan, standard setting organization, and trading partner agreement. Of these terms, we discuss further in this preamble only covered entity and health care provider.

Section 160.102—Applicability

The proposed rule stated that the subchapter (Parts 160, 162, and 164) applies to the entities set out at section 1172(a) of the Act: Health plans, health care clearinghouses, and health care providers who transmit any health information in electronic form in connection with a transaction covered by the subchapter. The final rule adds a provision (§ 160.102(b)) clarifying that to the extent required under section 201(a)(5) of HIPAA, nothing in the subchapter is to be construed to diminish the authority of any Inspector General. This was done in response to comment, to clarify that the administrative simplification rules, including the rules below, do not conflict with the cited provision of HIPAA.

Section 160.103—Definitions

Business Associate

We proposed to define the term "business partner" to mean, with respect to a covered entity, a person to whom the covered entity discloses protected health information so that the person can carry out, assist with the performance of, or perform on behalf of, a function or activity for the covered entity. "Business partner" would have included contractors or other persons who receive protected health information from the covered entity (or from another business partner of the covered entity) for

the purposes described in the previous sentence, including lawyers, auditors, consultants, third-party administrators, health care clearinghouses, data processing firms, billing firms, and other covered entities. “Business partner” would have excluded persons who are within the covered entity's workforce, as defined in this section.

This rule reflects the change in the name from “business partner” to “business associate,” included in the Transactions Rule.

In the final rule, we change the definition of “business associate” to clarify the circumstances in which a person is acting as a business associate of a covered entity. The changes clarify that the business association occurs when the right to use or disclose the protected health information belongs to the covered entity, and another person is using or disclosing the protected health information (or creating, obtaining and using the protected health information) to perform a function or activity on behalf of the covered entity. We also clarify that providing specified services to a covered entity creates a business associate relationship if the provision of the service involves the disclosure of protected health information to the service provider. In the proposed rule, we had included a list of persons that were considered to be business partners of the covered entity. However, it is not always clear whether the provision of certain services to a covered entity is “for” the covered entity or whether the service provider is acting “on behalf of” the covered entity. For example, a person providing management consulting services may need protected health information to perform those services, but may not be acting “on behalf of” the covered entity. This we believe led to some general confusion among the commenters as to whether certain arrangements fell within the definition of a business partner under the proposed rule. The construction of the final rule clarifies that the provision of the specified services gives rise to a business associate relationship if the performance of the service involves disclosure of protected health information by the covered entity to the business associate. The specified services are legal, actuarial, accounting, consulting, management, administrative accreditation, data aggregation, and financial services. The list is intended to include the types of services commonly provided to covered entities where the disclosure of protected health information is routine to the performance of the service, but when the person providing the service may not always be acting “on behalf of” the covered entity.

In the final rule, we reorganize the list of examples of the functions or activities that may be conducted by business associates. We place a part of the proposed list in the portion of the definition that addresses when a person is providing functions or activities for or on behalf of a covered entity. We place other parts of the list in the portion of the definition that specifies the services that give rise to a business associate relationship, as discussed above. We also have expanded the examples to provide additional guidance and in response to questions from commenters.

We have added data aggregation to the list of services that give rise to a business associate relationship. Data aggregation, as discussed below, is where a business associate in its capacity as the business associate of one covered entity combines the protected health information of such covered entity with protected health information received by the business associate in its capacity as a business associate of another covered entity in order to permit the creation of data for analyses that relate to the health care operations of the respective covered entities. Adding this service to the business associate definition clarifies the ability of covered entities to contract with business associates to undertake quality assurance and comparative analyses that involve the protected health information of more than one contracting covered entity. For example, a state hospital association could act as a business associate of its member hospitals and could combine data provided to it to assist the hospitals in evaluating their relative performance in areas such as quality, efficiency and other patient care issues. As discussed below, however, the business associate contracts of each of the hospitals would have to permit the activity, and the protected health information of one hospital could not be disclosed to another hospital unless the disclosure is otherwise permitted by the rule.

The definition also states that a business associate may be a covered entity, and that business associate excludes a person who is part of the covered entity's workforce.

We also clarify in the final rule that a business association arises with ***82476** respect to a covered entity when a person performs functions or activities on behalf of, or provides the specified services to or for, an organized health care health care arrangement in which the covered entity participates. This change recognizes that where covered entities participate in certain joint arrangements for the financing or delivery of health care, they often contract with persons to perform functions or to provide

services for the joint arrangement. This change is consistent with changes made in the final rule to the definition of health care operations, which permits covered entities to use or disclose protected health information not only for their own health care operations, but also for the operations of an organized health care arrangement in which the covered entity participates. By making these changes, we avoid the confusion that could arise in trying to determine whether a function or activity is being provided on behalf of (or if a specified service is being provided to or for) a covered entity or on behalf of or for a joint enterprise involving the covered entity. The change clarifies that in either instance the person performing the function or activity (or providing the specified service) is a business associate.

We also add language to the final rule that clarifies that the mere fact that two covered entities participate in an organized health care arrangement does not make either of the covered entities a business associate of the other covered entity. The fact that the entities participate in joint health care operations or other joint activities, or pursue common goals through a joint activity, does not mean that one party is performing a function or activity on behalf of the other party (or is providing a specified services to or for the other party).

In general under this provision, actions relating to the protected health information of an individual undertaken by a business associate are considered, for the purposes of this rule, to be actions of the covered entity, although the covered entity is subject to sanctions under this rule only if it has knowledge of the wrongful activity and fails to take the required actions to address the wrongdoing. For example, if a business associate maintains the medical records or manages the claims system of a covered entity, the covered entity is considered to have protected health information and the covered entity must ensure that individuals who are the subject of the information can have access to it pursuant to § 164.524.

The business associate relationship does not describe all relationships between covered entities and other persons or organizations. While we permit uses or disclosures of protected health information for a variety of purposes, business associate contracts or other arrangements are only required for those cases in which the covered entity is disclosing information to someone or some organization that will use the information on behalf of the covered entity, when the other person will be creating or obtaining protected health information on behalf of the covered entity, or when the business associate is providing the specified services to the covered entity and the provision of those services involves the disclosure of protected health information by the covered entity to the business associate. For example, when a health care provider discloses protected health information to health plans for payment purposes, no business associate relationship is established. While the covered provider may have an agreement to accept discounted fees as reimbursement for services provided to health plan members, neither entity is acting on behalf of or providing a service to the other.

Similarly, where a physician or other provider has staff privileges at an institution, neither party to the relationship is a business associate based solely on the staff privileges because neither party is providing functions or activities on behalf of the other. However, if a party provides services to or for the other, such as where a hospital provides billing services for physicians with staff privileges, a business associate relationship may arise with respect to those services. Likewise, where a group health plan purchases insurance or coverage from a health insurance issuer or HMO, the provision of insurance by the health insurance issuer or HMO to the group health plan does not make the issuer a business associate. In such case, the activities of the health insurance issuer or HMO are on their own behalf and not on the behalf of the group health plan. We note that where a group health plan contracts with a health insurance issuer or HMO to perform functions or activities or to provide services that are in addition to or not directly related to the provision of insurance, the health insurance issuer or HMO may be a business associate with respect to those additional functions, activities or services. We also note that covered entities are permitted to disclose protected health information to oversight agencies that act to provide oversight of federal programs and the health care system. These oversight agencies are not performing services for or on behalf of the covered entities and so are not business associates of the covered entities. Therefore HCFA, the federal agency that administers Medicare, is not required to enter into a business associate contract in order to disclose protected health information to the Department's Office of Inspector General.

We do not require a covered entity to enter into a business associate contract with a person or organization that acts merely as a conduit for protected health information (e.g., the US Postal Service, certain private couriers and their electronic equivalents).

A conduit transports information but does not access it other than on a random or infrequent basis as may be necessary for the performance of the transportation service, or as required by law. Since no disclosure is intended by the covered entity and the probability of exposure of any particular protected health information to a conduit is very small, we do not consider a conduit to be a business associate of the covered entity.

We do not consider a financial institution to be acting on behalf of a covered entity, and therefore no business associate contract is required, when it processes consumer-conducted financial transactions by debit, credit or other payment card, clears checks, initiates or processes electronic funds transfers, or conducts any other activity that directly facilitates or effects the transfer of funds for compensation for health care. A typical consumer-conducted payment transaction is when a consumer pays for health care or health insurance premiums using a check or credit card. In these cases the identity of the consumer is always included and some health information (e.g., diagnosis or procedure) may be implied through the name of the health care provider or health plan being paid. Covered entities that initiate such payment activities must meet the minimum necessary disclosure requirements described in the preamble to § 164.514.

Covered Entity

We provided this definition in the NPRM for convenience of reference and proposed it to mean the entities to which part C of title XI of the Act applies. These are the entities described in section 1172(a)(1): Health plans, health care clearinghouses, and health care providers who transmit any health information in electronic form in connection with a transaction referred ***82477** to in section 1173(a)(1) of the Act (a "standard transaction").

We note that health care providers who do not submit HIPAA transactions in standard form become covered by this rule when other entities, such as a billing service or a hospital, transmit standard electronic transactions on their behalf. A provider could not circumvent these requirements by assigning the task to its business associate since the business associate would be considered to be acting on behalf of the provider. See the definition of "business associate."

Where a public agency is required or authorized by law to administer a health plan jointly with another entity, we consider each agency to be a covered entity with respect to the health plan functions it performs. Unlike private sector health plans, public plans are often required by or expressly authorized by law to jointly administer health programs that meet the definition of "health plan" under this regulation. In some instances the public entity is required or authorized to administer the program with another public agency. In other instances, the public entity is required or authorized to administer the program with a private entity. In either circumstance, we note that joint administration does not meet the definition of "business associate" in § 164.501. Examples of joint administration include state and federal administration of the Medicaid and SCHIP program, or joint administration of a Medicare+Choice plan by the Health Care Financing Administration and the issuer offering the plan.

Health Care

We proposed to define "health care" to mean the provision of care, services, or supplies to a patient and to include any: (1) Preventive, diagnostic, therapeutic, rehabilitative, maintenance, or palliative care, counseling, service, or procedure with respect to the physical or mental condition, or functional status, of a patient or affecting the structure or function of the body; (2) sale or dispensing of a drug, device, equipment, or other item pursuant to a prescription; or (3) procurement or banking of blood, sperm, organs, or any other tissue for administration to patients.

The final rule revises both the NPRM definition and the definition as provided in the Transactions Rule, to now mean "care, services, or supplies related to the health of an individual. Health care includes the following:

(1) Preventive, diagnostic, therapeutic, rehabilitative, maintenance, or palliative care, and counseling, service, assessment, or procedure with respect to the physical or mental condition, or functional status, of an individual or that affects the structure or function of the body; and

(2) Sale or dispensing of a drug, device, equipment, or other item in accordance with a prescription.

We delete the term "providing" from the definition to delineate more clearly the relationship between "treatment," as the term is defined in § 164.501, and "health care." Other key revisions include adding the term "assessment" in subparagraph (1) and deleting proposed subparagraph (3) from the rule. Therefore the procurement or banking of organs, blood (including autologous blood), sperm, eyes or any other tissue or human product is not considered to be health care under this rule and the organizations that perform such activities would not be considered health care providers when conducting these functions. As described in § 164.512(h), covered entities are permitted to disclose protected health information without individual authorization, consent, or agreement (see below for explanation of authorizations, consents, and agreements) as necessary to facilitate cadaveric donation.

Health Care Clearinghouse

In the NPRM, we defined "health care clearinghouse" as a public or private entity that processes or facilitates the processing of nonstandard data elements of health information into standard data elements. The entity receives health care transactions from health care providers or other entities, translates the data from a given format into one acceptable to the intended payor or payors, and forwards the processed transaction to appropriate payors and clearinghouses. Billing services, repricing companies, community health management information systems, community health information systems, and "value-added" networks and switches would have been considered to be health care clearinghouses for purposes of this part, if they perform the functions of health care clearinghouses as described in the preceding sentences.

In the final regulation, we modify the definition of health care clearinghouse to reflect changes in the definition published in the Transactions Rule. The definition in the final rule is:

Health care clearinghouse means a public or private entity, including billing services, repricing companies, community health management information systems or community health information systems, and "value-added" networks and switches, that does either of the following functions:

(1) Processes or facilitates the processing of health information received from another entity in a nonstandard format or containing nonstandard data content into standard data elements or a standard transaction.

(2) Receives a standard transaction from another entity and processes or facilitates the processing of health information into nonstandard format or nonstandard data content for the receiving entity.

We note here that the term health care clearinghouse may have other meanings and connotations in other contexts, but the regulation defines it specifically, and an entity is considered a health care clearinghouse only to the extent that it meets the criteria in this definition. Telecommunications entities that provide connectivity or mechanisms to convey information, such as telephone companies and Internet Service Providers, are not health care clearinghouses as defined in the rule unless they actually carry out the functions outlined in our definition. Value added networks and switches are not health care clearinghouses unless they carry out the functions outlined in the definition. The examples of entities in our proposed definition we continue to consider to be health care clearinghouses, as well as any other entities that meet that definition, to the extent that they perform the functions in the definition.

In order to fall within this definition of clearinghouse, the covered entity must perform the clearinghouse function on health information received from some other entity. A department or component of a health plan or health care provider that transforms nonstandard information into standard data elements or standard transactions (or vice versa) is not a clearinghouse for purposes of this rule, unless it also performs these functions for another entity. As described in more detail in § 164.504(d), we allow affiliates to perform clearinghouse functions for each other without triggering the definition of "clearinghouse" if the conditions in § 164.504(d) are met.

Health Care Provider

We proposed to define health care provider to mean a provider of services as defined in section 1861(u) of the Act, a provider of medical or health services as defined in section 1861(s) of the Act, and any other person or organization who furnishes, bills, or is paid for health care services or supplies in the normal course of business. ***82478**

In the final rule, we delete the term "services and supplies," in order to eliminate redundancy within the definition. The definition also reflects the addition of the applicable U.S.C. citations (42 U.S.C. 1395x(u) and 42 U.S.C. 1395x(s), respectively) for the referenced provisions of the Act that were promulgated in the Transactions Rule.

To assist the reader, we also provide here excerpts from the relevant sections of the Act. (Refer to the U.S.C. sections cited above for complete definitions in sections 1861(u) and 1861(s).) Section 1861(u) of the Act defines a "provider of services," to include, for example,

a hospital, critical access hospital, skilled nursing facility, comprehensive outpatient rehabilitation facility, home health agency, hospice program, or, for purposes of section 1814(g) (42 U.S.C. 1395f(g)) and section 1835(e) (42 U.S.C. 1395n(e)), a fund." Section 1861(s) of the Act defines the term, "medical and other health services," and includes a list of covered items or services, as illustrated by the following excerpt:

(s) Medical and other health services. The term "medical and other health services" means any of the following items or services:

(1) Physicians' services;

(2) (A) services and supplies * * * furnished as an incident to a physician's professional service, or kinds which are commonly furnished in physicians' offices and are commonly either rendered without charge or included in the physicians' bills;

(B) hospital services * * * incident to physicians' services rendered to outpatients and partial hospitalization services incident to such services;

(C) diagnostic services which are—

(i) furnished to an individual as an outpatient by a hospital or by others under arrangements with them made by a hospital, and

(ii) ordinarily furnished by such hospital (or by others under such arrangements) to its outpatients for the purpose of diagnostic study;

(D) outpatient physical therapy services and outpatient occupational therapy services;

(E) rural health clinic services and federally qualified health center services;

(F) home dialysis supplies and equipment, self-care home dialysis support services, and institutional dialysis services and supplies;

(G) antigens * * * prepared by a physician * * * for a particular patient, including antigens so prepared which are forwarded to another qualified person * * * for administration to such patient, * * * by or under the supervision of another such physician;

(H)(i) services furnished pursuant to a contract under section 1876 (42 U.S.C. 1395mm) to a member of an eligible organization by a physician assistant or by a nurse practitioner * * * and such services and supplies furnished as an incident to his service to such a member * * * and

(ii) services furnished pursuant to a risk-sharing contract under section 1876(g) (42 U.S.C. 1395mm(g)) to a member of an eligible organization by a clinical psychologist * * * or by a clinical social worker * * * (and) furnished as an incident to such clinical psychologist's services or clinical social worker's services * * *;

(I) blood clotting factors, for hemophilia patients * * *;

(J) prescription drugs used in immunosuppressive therapy furnished, to an individual who receives an organ transplant for which payment is made under this title (42 U.S.C. 1395 et seq.), but only in the case of (certain) drugs furnished * * *

(K)(i) services which would be physicians' services if furnished by a physician * * * and which are performed by a physician assistant * * *; and

(ii) services which would be physicians' services if furnished by a physician * * * and which are performed by a nurse * * *;

(L) certified nurse-midwife services;

(M) qualified psychologist services;

(N) clinical social worker services * * *;

(O) erythropoietin for dialysis patients * * *;

(P) prostate cancer screening tests * * *;

(Q) an oral drug (which is approved by the Federal Food and Drug Administration) prescribed for use as an anti-cancer chemotherapeutic agent for a given indication, and containing an active ingredient (or ingredients) * * *;

(R) colorectal cancer screening tests * * *;

(S) diabetes outpatient self-management training services * * *; and

(T) an oral drug (which is approved by the federal Food and Drug Administration) prescribed for use as an acute anti-emetic used as part of an anti-cancer chemotherapeutic regimen * * *

(3) diagnostic X-ray tests * * * furnished in a place of residence used as the patient's home * * * ;

(4) X-ray, radium, and radioactive isotope therapy, including materials and services of technicians;

(5) surgical dressings, and splints, casts, and other devices used for reduction of fractures and dislocations;

(6) durable medical equipment;

(7) ambulance service where the use of other methods of transportation is contraindicated by the individual's condition * * * ;

(8) prosthetic devices (other than dental) which replace all or part of an internal body organ (including colostomy bags and supplies directly related to colostomy care), * * * and including one pair of conventional eyeglasses or contact lenses furnished subsequent to each cataract surgery * * * [;]

(9) leg, arm, back, and neck braces, and artificial legs, arms, and eyes, including replacements if required * * * ;

(10) (A) pneumococcal vaccine and its administration * * *; and

(B) hepatitis B vaccine and its administration * * *, and

(11) services of a certified registered nurse anesthetist * * *;

(12) * * * extra-depth shoes with inserts or custom molded shoes with inserts for an individual with diabetes, if * * *;

(13) screening mammography * * *;

(14) screening pap smear and screening pelvic exam; and

(15) bone mass measurement * * *. (etc.)

Health Plan

We proposed to define "health plan" essentially as section 1171(5) of the Act defines it. Section 1171 of the Act refers to several definitions in section 2791 of the Public Health Service Act, 42 U.S.C. 300gg-91, as added by Public Law 104-191.

As defined in section 1171(5), a "health plan" is an individual plan or group health plan that provides, or pays the cost of, medical care. We proposed that this definition include, but not be limited to the 15 types of plans (e.g., group health plan, health insurance issuer, health maintenance organization) listed in the statute, as well as any combination of them. Such term would have included, when applied to public benefit programs, the component of the government agency that administers the program. Church plans and government plans would have been included to the extent that they fall into one or more of the listed categories.

In the proposed rule, "health plan" included the following, singly or in combination:

(1) A group health plan, defined as an employee welfare benefit plan (as currently defined in section 3(1) of the Employee Retirement Income and Security Act of 1974, 29 U.S.C. 1002(1)), including insured and self-insured plans, to the extent that the plan provides medical care (as defined in section 2791(a)(2) of the Public Health Service Act, 42 U.S.C. 300gg-91(a)(2)), including items and services paid for as medical care, to employees or their dependents directly or through insurance or otherwise, that:

(i) Has 50 or more participants; or

(ii) Is administered by an entity other than the employer that established and maintains the plan.

(2) A health insurance issuer, defined as an insurance company, insurance service, or insurance organization that is licensed to engage in the business of insurance in a state and is subject to state or other law that regulates insurance.

(3) A health maintenance organization, defined as a federally qualified health maintenance organization, an organization recognized as a health maintenance organization under state law, or a similar organization regulated for solvency under state law in the same manner and to the same extent as such a health maintenance organization.

(4) Part A or Part B of the Medicare program under title XVIII of the Act.

(5) The Medicaid program under title XIX of the Act. ***82479**

(6) A Medicare supplemental policy (as defined in section 1882(g)(1) of the Act, 42 U.S.C. 1395ss).

(7) A long-term care policy, including a nursing home fixed-indemnity policy.

(8) An employee welfare benefit plan or any other arrangement that is established or maintained for the purpose of offering or providing health benefits to the employees of two or more employers.

(9) The health care program for active military personnel under title 10 of the United States Code.

(10) The veterans health care program under 38 U.S.C. chapter 17.

(11) The Civilian Health and Medical Program of the Uniformed Services (CHAMPUS), as defined in 10 U.S.C. 1072(4).

(12) The Indian Health Service program under the Indian Health Care Improvement Act (25 U.S.C. 1601, et seq.).

(13) The Federal Employees Health Benefits Program under 5 U.S.C. chapter 89.

(14) An approved state child health plan for child health assistance that meets the requirements of section 2103 of the Act.

(15) A Medicare Plus Choice organization as defined in 42 CFR 422.2, with a contract under 42 CFR part 422, subpart K.

In addition to the 15 specific categories, we proposed that the list include any other individual plan or group health plan, or combination thereof, that provides or pays for the cost of medical care. The Secretary would determine which plans that meet these criteria would to be considered health plans for the purposes of this rule.

Consistent with the other titles of HIPAA, our proposed definition did not include certain types of insurance entities, such as workers' compensation and automobile insurance carriers, other property and casualty insurers, and certain forms of limited benefits coverage, even when such arrangements provide coverage for health care services.

In the final rule, we add two provisions to clarify the types of policies or programs that we do not consider to be a health plan. First, the rule excepts any policy, plan or program to the extent that it provides, or pays for the cost of, excepted benefits, as defined in section 2791(c)(1) of the PHS Act, 42 U.S.C. 300gg-91(c)(1). We note that, while coverage for on-site medical clinics is excluded from definition of “health plans,” such clinics may meet the definition of “health care provider” and persons who work in the clinic may also meet the definition of health care provider.” Second, many commenters were confused by the statutory inclusion as a health plan of any “other individual or group plan that provides or pays the cost of medical care;” they questioned how the provision applied to many government programs. We therefore clarify that while many government programs (other than the programs specified in the statute) provide or pay the cost of medical care, we do not consider them to be individual or group plans and therefore, do not consider them to be health plans. Government funded programs that do not have as their principal purpose the provision of, or payment for, the cost of health care but which do incidentally provide such services are not health plans (for example, programs such as the Special Supplemental Nutrition Program for Women, Infants and Children (WIC) and the Food Stamp Program, which provide or pay for nutritional services, are not considered to be health plans). Government funded programs that have as their principal purpose the provision of health care, either directly or by grant, are also not considered to be health plans. Examples include the Ryan White Comprehensive AIDS Resources Emergency Act, government funded health centers and immunization programs. We note that some of these may meet the rule's definition of health care provider.

We note that in certain instances eligibility for or enrollment in a health plan that is a government program providing public benefits, such as Medicaid or SCHIP, is determined by an agency other than the agency that administers the program, or individually identifiable health information used to determine enrollment or eligibility in such a health plan is collected by an agency other than the agency that administers the health plan. In these cases, we do not consider an agency that is not otherwise

a covered entity, such as a local welfare agency, to be a covered entity because it determines eligibility or enrollment or collects enrollment information as authorized by law. We also do not consider the agency to be a business associate when conducting these functions, as we describe further in the business associate discussion above.

The definition in the final rule also reflects the following changes promulgated in the Transactions Rule:

(1) Exclusion of nursing home fixed-indemnity policies;

(2) Addition of the word "issuer" to Medicare supplemental policy, and long-term care policy;

(3) Addition or revision of the relevant statutory cites where appropriate;

(4) Deletion of the term "or assisted" when referring to government programs;

(5) Replacement of the word "organization" with "program" when referring to Medicare + Choice;

(6) Deletion of the term "health" when referring to a group plan in subparagraph (xvi);

(7) Extraction of the definitions of "group health plan," "health insurance issuer," and "health maintenance organization" into Part 160 as distinct definitions;

(8) In the definition of "group health plan," deletion of the term "currently" from the reference to the statutory cite of ERISA, addition of the relevant statutory cite for the term "participant," and addition of the term "reimbursement;"

(9) In the definition of "health insurance issuer," addition of the relevant statutory cite, deletion of the term "or other law" after "state law," addition of health maintenance organizations for consistency with the statute, and clarification that the term does not include a group health plan; and

(10) In the definition of "health maintenance organization," addition of the relevant statutory cite.

Finally, we add to this definition a high risk pool that is a mechanism established under state law to provide health insurance coverage or comparable coverage to eligible individuals. High risk pools are designed mainly to provide health insurance coverage for individuals who, due to health status or pre-existing conditions, cannot obtain insurance through the individual market or who can do so only at very high premiums. Some states use their high risk pool as an alternative mechanism under section 2744 of HIPAA. We do not reference the definition of "qualified high risk pool" in HIPAA because that definition includes the requirements for a state to use its risk pool as its alternative mechanism under HIPAA. Some states may have high risk pools, but do not use them as their alternative mechanism and therefore may not meet the definition in HIPAA. We want to make clear that state high risk pools are covered entities under this rule whether or not they meet the definition of a qualified high risk pool under section 2744. High risk pools, as described in this rule, do not include any program established under state law solely to provide excepted benefits. For example, a state program established to provide workers' compensation coverage is not ***82480** considered to be a high risk pool under the rule.

Implementation Specification

This definition was adopted in the Transactions Rule and is minimally revised here. We add the words "requirements or" before the word "instructions." The word "instructions" is appropriate in the context of the implementation specifications adopted in the Transactions Rule, which are generally a series of instructions as to how to use particular electronic forms. However, that word is not apropos in the context of the rules below. In the rules below, the implementation specifications are specific requirements for how to comply with a given standard. The change to this definition thus ties in to this regulatory framework.

Standard

This definition was adopted in the Transactions Rule and we have modified it to make it clearer. We also add language reflecting section 264 of the statute, to clarify that the standards adopted by this rule meet this definition.

State

We modify the definition of state as adopted in the Transactions Rule to clarify that this term refers to any of the several states.

Transaction

We change the term "exchange" to the term "transmission" in the definition of Transaction to clarify that these transactions may be one-way communications.

Workforce

We proposed in the NPRM to define workforce to mean employees, volunteers, trainees, and other persons under the direct control of a covered entity, including persons providing labor on an unpaid basis.

The definition in the final rule reflects one revision established in the Transactions Rule, which replaces the term "including persons providing labor on an unpaid basis" with the term "whether or not they are paid by the covered entity." In addition, we clarify that if the assigned work station of persons under contract is on the covered entity's premises and such persons perform a substantial proportion of their activities at that location, the covered entity may choose to treat them either as business associates or as part of the workforce, as explained in the discussion of the definition of business associate. If there is no business associate contract, we assume the person is a member of the covered entity's workforce. We note that independent contractors may or may not be workforce members. However, for compliance purposes we will assume that such personnel are members of the workforce if no business associate contract exists.

Part 160—Subpart B—Preemption of State Laws

Statutory Background

Section 1178 of the Act establishes a "general rule" that state law provisions that are contrary to the provisions or requirements of part C of title XI or the standards or implementation specifications adopted or established thereunder are preempted by the federal requirements. The statute provides three exceptions to this general rule: (1) In section 1178(a)(2)(A)(i), for state laws that the Secretary determines are necessary to prevent fraud and abuse, ensure appropriate state regulation of insurance and health plans, for state reporting on health care delivery, and other purposes; (2) in section 1178(a)(2)(A)(ii), for state laws that address controlled substances; and (3) in section 1178(a)(2)(B), for state laws relating to the privacy of individually identifiable health information that as provided for by the related provision of section 264(c)(2) of HIPAA, are contrary to and more stringent than the federal requirements. Section 1178 also carves out, in sections 1178(b) and 1178(c), certain areas of state authority that are not limited or invalidated by the provisions of part C of title XI: these areas relate to public health and state regulation of health plans.

The NPRM proposed a new Subpart B of the proposed part 160. The new Subpart B, which would apply to all standards, implementation specifications, and requirements adopted under HIPAA, would consist of four sections. Proposed § 160.201 provided that the provisions of Subpart B applied to exception determinations and advisory opinions issued by the Secretary under section 1178. Proposed § 160.202 set out proposed definitions for four terms: (1) "Contrary," (2) "more stringent," (3) "relates to the privacy of individually identifiable health information," and (4) "state law." The definition of "contrary" was drawn from case law concerning preemption. A seven-part set of specific criteria, drawn from fair information principles, was proposed for the definition of "more stringent." The definition of "relates to the privacy of individually identifiable health information" was also based on case law. The definition of "state law" was drawn from the statutory definition of this term

elsewhere in HIPAA. We note that state action having the force and effect of law may include common law. We eliminate the term "decision" from the proposed rule because it is redundant.

Proposed § 160.203 proposed a general rule reflecting the statutory general rule and exceptions that generally mirrored the statutory language of the exceptions. The one substantive addition to the statutory exception language was with respect to the statutory exception, "for other purposes." The following language was added: "for other purposes related to improving the Medicare program, the Medicaid program, or the efficiency and effectiveness of the health care system."

Proposed § 160.204 proposed two processes, one for the making of exception determinations, relating to determinations under section 1178(a)(2)(A) of the Act, the other for the rendering of advisory opinions, with respect to section 1178(a)(2)(B) of the Act. The processes proposed were similar in the following respects: (1) Only the state could request an exception determination or advisory opinion, as applicable; (2) both required the request to contain the same information, except that a request for an exception determination also had to set out the length of time the requested exception would be in effect, if less than three years; (3) both sets of requirements provided that requests had to be submitted to the Secretary as required by the Secretary, and until the Secretary's determination was made, the federal standard, requirement or implementation specification remained in effect; (4) both sets of requirements provided that the Secretary's decision would be effective intrastate only; (5) both sets of requirements provided that any change to either the federal or state basis for the Secretary's decision would require a new request, and the federal standard, implementation specification, or requirement would remain in effect until the Secretary acted favorably on the new request; (6) both sets of requirements provided that the Secretary could seek changes to the federal rules or urge states or other organizations to seek changes; and (7) both sets of requirements provided for annual publication of Secretarial decisions. In addition, the process for exception determinations provided for a maximum effective period of three years for such determinations.

The following changes have been made to subpart B in the final rules. First, § 160.201 now expressly ***82481** implements section 1178. Second, the definition of "more stringent" has been changed by eliminating the criterion relating to penalties and by framing the criterion under paragraph (1) more generally. Also, we have clarified that the term "individual" means the person who is the subject of the individually identifiable health information, since the term "individual" is defined this way only in subpart E of part 164, not in part 160. Third, the definition of "state law" has been changed by substituting the words "statute, constitutional provision" for the word "law," the words "common law" for the word "decision," and adding the words "force and" before the word "effect" in the proposed definition. Fourth, in § 160.203, several criteria relating to the statutory grounds for exception determinations have been further spelled out: (1) The words " related to the provision of or payment for health care" have been added to the exception for fraud and abuse; (2) the words "to the extent expressly authorized by statute or regulation" have been added to the exception for state regulation of health plans; (3) the words "of serving a compelling need related to public health, safety, or welfare, and, where a standard, requirement, or implementation specification under part 164 of this subchapter is at issue, where the Secretary determines that the intrusion into privacy is warranted when balanced against the need to be served" have been added to the general exception "for other purposes"; and (4) the statutory provision regarding controlled substances has been elaborated on as follows: "Has as its principal purpose the regulation of the manufacture, registration, distribution, dispensing, or other control of any controlled substance, as defined at 21 U.S.C. 802, or which is deemed a controlled substance by state law."

The most extensive changes have been made to proposed § 160.204. The provision for advisory opinions has been eliminated. Section 160.204 now sets out only a process for requesting exception determinations. In most respects, this process is the same as proposed. However, the proposed restriction of the effect of exception determinations to wholly intrastate transactions has been eliminated. Section 160.204(a) has been modified to allow any person, not just a state, to submit a request for an exception determination, and clarifies that requests from states may be made by the state's chief elected official or his or her designee. Proposed § 160.204(a)(3) stated that if it is determined that the federal standard, requirement, or implementation specification in question meets the exception criteria as well as or better than the state law for which the exception is requested, the request will be denied; this language has been deleted. Thus, the criterion for granting or denying an exception request is whether the applicable exception criterion or criteria are met.

A new § 160.205 is also adopted, replacing part of what was proposed at proposed § 160.204. The new § 160.205 sets out the rules relating to the effectiveness of exception determinations. Exception determinations are effective until either the underlying federal or state laws change or the exception is revoked, by the Secretary, based on a determination that the grounds supporting the exception no longer exist. The proposed maximum of three years has been eliminated.

Relationship to Other Federal Laws

Covered entities subject to these rules are also subject to other federal statutes and regulations. For example, federal programs must comply with the statutes and regulations that govern them. Pursuant to their contracts, Medicare providers must comply with the requirements of the Privacy Act of 1974. Substance abuse treatment facilities are subject to the Substance Abuse Confidentiality provisions of the Public Health Service Act, section 543 and its regulations. And, health care providers in schools, colleges, and universities may come within the purview of the Family Educational Rights and Privacy Act. Thus, covered entities will need to determine how the privacy regulation will affect their ability to comply with these other federal laws.

Many commenters raised questions about how different federal statutes and regulations intersect with the privacy regulation. While we address specific concerns in the response to comments later in the preamble, in this section, we explore some of the general interaction issues. These summaries do not identify all possible conflicts or overlaps of the privacy regulation and other federal laws, but should provide general guidance for complying with both the privacy regulation and other federal laws. The summaries also provide examples of how covered entities can analyze other federal laws when specific questions arise. HHS may consult with other agencies concerning the interpretation of other federal laws as necessary.

Implied Repeal Analysis

When faced with the need to determine how different federal laws interact with one another, we turn to the judiciary's approach. Courts apply the implied repeal analysis to resolve tensions that appear to exist between two or more statutes. While the implication of a regulation-on-regulation conflict is unclear, courts agree that administrative rules and regulations that do not conflict with express statutory provisions have the force and effect of law. Thus, we believe courts would apply the standard rules of interpretation that apply to statutes to address questions of interpretation with regard to regulatory conflicts.

When faced with two potentially conflicting statutes, courts attempt to construe them so that both are given effect. If this construction is not possible, courts will look for express language in the later statute, or an intent in its legislative history, indicating that Congress intended the later statute to repeal the earlier one. If there is no expressed intent to repeal the earlier statute, courts will characterize the statutes as either general or specific. Ordinarily, later, general statutes will not repeal the special provisions of an earlier, specific statute. In some cases, when a later, general statute creates an irreconcilable conflict or is manifestly inconsistent with the earlier, specific statute in a manner that indicates a clear and manifest Congressional intent to repeal the earlier statute, courts will find that the later statute repeals the earlier statute by implication. In these cases, the latest legislative action may prevail and repeal the prior law, but only to the extent of the conflict.

There should be few instances in which conflicts exist between a statute or regulation and the rules below. For example, if a statute permits a covered entity to disclose protected health information and the rules below permit such a disclosure, no conflict arises; the covered entity could comply with both and choose whether or not to disclose the information. In instances in which a potential conflict appears, we would attempt to resolve it so that both laws applied. For example, if a statute or regulation permits dissemination of protected health information, but the rules below prohibit the use or disclosure without an authorization, we believe a covered entity would be able to comply with both because it could obtain an authorization under § 164.508 before disseminating the information under the other law.

Many apparent conflicts will not be true conflicts. For example, if a conflict ***82482** appears to exist because a previous statute or regulation requires a specific use or disclosure of protected health information that the rules below appear to prohibit, the

use or disclosure pursuant to that statute or regulation would not be a violation of the privacy regulation because § 164.512(a) permits covered entities to use or disclose protected health information as required by law.

If a statute or regulation prohibits dissemination of protected health information, but the privacy regulation requires that an individual have access to that information, the earlier, more specific statute would apply. The interaction between the Clinical Laboratory Improvement Amendments regulation is an example of this type of conflict. From our review of several federal laws, it appears that Congress did not intend for the privacy regulation to overrule existing statutory requirements in these instances.

Examples of Interaction

We have summarized how certain federal laws interact with the privacy regulation to provide specific guidance in areas deserving special attention and to serve as examples of the analysis involved. In the Response to Comment section, we have provided our responses to specific questions raised during the comment period.

The Privacy Act

The Privacy Act of 1974, 5 U.S.C. 552a, prohibits disclosures of records contained in a system of records maintained by a federal agency (or its contractors) without the written request or consent of the individual to whom the record pertains. This general rule is subject to various statutory exceptions. In addition to the disclosures explicitly permitted in the statute, the Privacy Act permits agencies to disclose information for other purposes compatible with the purpose for which the information was collected by identifying the disclosure as a "routine use" and publishing notice of it in the Federal Register. The Act applies to all federal agencies and certain federal contractors who operate Privacy Act systems of records on behalf of federal agencies.

Some federal agencies and contractors of federal agencies that are covered entities under the privacy rules are subject to the Privacy Act. These entities must comply with all applicable federal statutes and regulations. For example, if the privacy regulation permits a disclosure, but the disclosure is not permitted under the Privacy Act, the federal agency may not make the disclosure. If, however, the Privacy Act allows a federal agency the discretion to make a routine use disclosure, but the privacy regulation prohibits the disclosure, the federal agency will have to apply its discretion in a way that complies with the regulation. This means not making the particular disclosure.

The Freedom of Information Act

FOIA, 5 U.S.C. 552, provides for public disclosure, upon the request of any person, of many types of information in the possession of the federal government, subject to nine exemptions and three exclusions. For example, Exemption 6 permits federal agencies to withhold "personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." 5 U.S.C. 552(b)(6).

Uses and disclosures required by FOIA come within § 164.512(a) of the privacy regulation that permits uses or disclosures required by law if the uses or disclosures meet the relevant requirements of the law. Thus, a federal agency must determine whether it may apply an exemption or exclusion to redact the protected health information when responding to a FOIA request. When a FOIA request asks for documents that include protected health information, we believe the agency, when appropriate, must apply Exemption 6 to preclude the release of medical files or otherwise redact identifying details before disclosing the remaining information.

We offer the following analysis for federal agencies and federal contractors who operate Privacy Act systems of records on behalf of federal agencies and must comply with FOIA and the privacy regulation. If presented with a FOIA request that would result in the disclosure of protected health information, a federal agency must first determine if FOIA requires the disclosure or if an exemption or exclusion would be appropriate. We believe that generally a disclosure of protected health information, when requested under FOIA, would come within FOIA Exemption 6. We recognize, however, that the application of this exemption to information about deceased individuals requires a different analysis than that applicable to living individuals because, as a

general rule, under the Privacy Act, privacy rights are extinguished at death. However, under FOIA, it is entirely appropriate to consider the privacy interests of a decedent's survivors under Exemption 6. See Department of Justice FOIA Guide 2000, Exemption 6: Privacy Considerations. Covered entities subject to FOIA must evaluate each disclosure on a case-by-case basis, as they do now under current FOIA procedures.

Federal Substance Abuse Confidentiality Requirements

The federal confidentiality of substance abuse patient records statute, section 543 of the Public Health Service Act, 42 U.S.C. 290dd-2, and its implementing regulation, 42 CFR part 2, establish confidentiality requirements for patient records that are maintained in connection with the performance of any federally-assisted specialized alcohol or drug abuse program. Substance abuse programs are generally programs or personnel that provide alcohol or drug abuse treatment, diagnosis, or referral for treatment. The term "federally-assisted" is broadly defined and includes federally conducted or funded programs, federally licensed or certified programs, and programs that are tax exempt. Certain exceptions apply to information held by the Veterans Administration and the Armed Forces.

There are a number of health care providers that are subject to both these rules and the substance abuse statute and regulations. In most cases, a conflict will not exist between these rules. These privacy rules permit a health care provider to disclose information in a number of situations that are not permitted under the substance abuse regulation. For example, disclosures allowed, without patient authorization, under the privacy rule for law enforcement, judicial and administrative proceedings, public health, health oversight, directory assistance, and as required by other laws would generally be prohibited under the substance abuse statute and regulation. However, because these disclosures are permissive and not mandatory, there is no conflict. An entity would not be in violation of the privacy rules for failing to make these disclosures.

Similarly, provisions in the substance abuse regulation provide for permissive disclosures in case of medical emergencies, to the FDA, for research activities, for audit and evaluation activities, and in response to certain court orders. Because these are permissive disclosures, programs subject to both the privacy rules and the substance abuse rule are able to comply with both rules even if the privacy rules restrict these types of disclosures. In addition, the privacy rules generally require that an individual be given access to his or her own health information. Under the substance abuse ***82483** regulation, programs may provide such access, so there is no conflict.

The substance abuse regulation requires notice to patients of the substance abuse confidentiality requirements and provides for written consent for disclosure. While the privacy rules have requirements that are somewhat different, the program may use notice and authorization forms that include all the elements required by both regulations. The substance abuse rule provides a sample notice and a sample authorization form and states that the use of these forms would be sufficient. While these forms do not satisfy all of the requirements of the privacy regulation, there is no conflict because the substance abuse regulation does not mandate the use of these forms.

Employee Retirement Income Security Act of 1974

ERISA was enacted in 1974 to regulate pension and welfare employee benefit plans established by private sector employers, unions, or both, to provide benefits to their workers and dependents. Under ERISA, plans that provide "through the purchase of insurance or otherwise * * * medical, surgical, or hospital care or benefits, or benefits in the event of sickness, accident, disability, [or] death" are defined as employee welfare benefit plans. 29 U.S.C. 1002(1). In 1996, HIPAA amended ERISA to require portability, nondiscrimination, and renewability of health benefits provided by group health plans and group health insurance issuers. Numerous, although not all, ERISA plans are covered under the rules proposed below as "health plans."

Section 514(a) of ERISA, 29 U.S.C. 1144(a), preempts all state laws that "relate to" any employee benefit plan. However, section 514(b) of ERISA, 29 U.S.C. 1144(b)(2)(A), expressly saves from preemption state laws that regulate insurance. Section 514(b)(2)(B) of ERISA, 29 U.S.C. 1144(b)(2)(B), provides that an ERISA plan is deemed not to be an insurer for the purpose of regulating the plan under the state insurance laws. Thus, under the deemer clause, states may not treat ERISA plans as insurers

subject to direct regulation by state law. Finally, section 514(d) of ERISA, 29 U.S.C. 1144(d), provides that ERISA does not "alter, amend, modify, invalidate, impair, or supersede any law of the United States."

We considered whether the preemption provision of section 264(c)(2) of HIPAA would give effect to state laws that would otherwise be preempted by section 514(a) of ERISA. As discussed above, our reading of the statutes together is that the effect of section 264(c)(2) is only to leave in place state privacy protections that would otherwise apply and that are more stringent than the federal privacy protections.

Many health plans covered by the privacy regulation are also subject to ERISA requirements. Our discussions and consultations have not uncovered any particular ERISA requirements that would conflict with the rules.

The Family Educational Rights and Privacy Act

FERPA, as amended, 20 U.S.C. 1232g, provides parents of students and eligible students (students who are 18 or older) with privacy protections and rights for the records of students maintained by federally funded educational agencies or institutions or persons acting for these agencies or institutions. We have excluded education records covered by FERPA, including those education records designated as education records under Parts B, C, and D of the Individuals with Disabilities Education Act Amendments of 1997, from the definition of protected health information. For example, individually identifiable health information of students under the age of 18 created by a nurse in a primary or secondary school that receives federal funds and that is subject to FERPA is an education record, but not protected health information. Therefore, the privacy regulation does not apply. We followed this course because Congress specifically addressed how information in education records should be protected in FERPA.

We have also excluded certain records, those described at 20 U.S.C. 1232g(a)(4)(B)(iv), from the definition of protected health information because FERPA also provided a specific structure for the maintenance of these records. These are records (1) of students who are 18 years or older or are attending post-secondary educational institutions, (2) maintained by a physician, psychiatrist, psychologist, or recognized professional or paraprofessional acting or assisting in that capacity, (3) that are made, maintained, or used only in connection with the provision of treatment to the student, and (4) that are not available to anyone, except a physician or appropriate professional reviewing the record as designated by the student. Because FERPA excludes these records from its protections only to the extent they are not available to anyone other than persons providing treatment to students, any use or disclosure of the record for other purposes, including providing access to the individual student who is the subject of the information, would turn the record into an education record. As education records, they would be subject to the protections of FERPA.

These exclusions are not applicable to all schools, however. If a school does not receive federal funds, it is not an educational agency or institution as defined by FERPA. Therefore, its records that contain individually identifiable health information are not education records. These records may be protected health information. The educational institution or agency that employs a school nurse is subject to our regulation as a health care provider if the school nurse or the school engages in a HIPAA transaction.

While we strongly believe every individual should have the same level of privacy protection for his/her individually identifiable health information, Congress did not provide us with authority to disturb the scheme it had devised for records maintained by educational institutions and agencies under FERPA. We do not believe Congress intended to amend or preempt FERPA when it enacted HIPAA.

With regard to the records described at 20 U.S.C. 1232g(a)(4)(b)(iv), we considered requiring health care providers engaged in HIPAA transactions to comply with the privacy regulation up to the point these records were used or disclosed for purposes other than treatment. At that point, the records would be converted from protected health information into education records. This conversion would occur any time a student sought to exercise his/her access rights. The provider, then, would need to treat the record in accordance with FERPA's requirements and be relieved from its obligations under the privacy regulation. We chose not to adopt this approach because it would be unduly burdensome to require providers to comply with two different,

yet similar, sets of regulations and inconsistent with the policy in FERPA that these records be exempt from regulation to the extent the records were used only to treat the student.

Gramm-Leach-Bliley

In 1999, Congress passed Gramm-Leach-Bliley (GLB), Pub. L. 106-102, which included provisions, section 501 et seq., that limit the ability of financial institutions to disclose "nonpublic personal information" about consumers to non-affiliated third parties and require financial institutions to provide customers with their privacy policies and practices with respect to nonpublic ***82484** personal information. In addition, Congress required seven agencies with jurisdiction over financial institutions to promulgate regulations as necessary to implement these provisions. GLB and its accompanying regulations define "financial institutions" as including institutions engaged in the financial activities of bank holding companies, which may include the business of insuring. See 15 U.S.C. 6809(3); 12 U.S.C. 1843(k). However, Congress did not provide the designated federal agencies with the authority to regulate health insurers. Instead, it provided states with an incentive to adopt and have their state insurance authorities enforce these rules. See 15 U.S.C. 6805. If a state were to adopt laws consistent with GLB, health insurers would have to determine how to comply with both sets of rules.

Thus, GLB has caused concern and confusion among health plans that are subject to our privacy regulation. Although Congress remained silent as to its understanding of the interaction of GLB and HIPAA's privacy provisions, the Federal Trade Commission and other agencies implementing the GLB privacy provisions noted in the preamble to their GLB regulations that they "would consult with HHS to avoid the imposition of duplicative or inconsistent requirements." 65 Fed. Reg. 33646, 33648 (2000). Additionally, the FTC also noted that "persons engaged in providing insurance" would be within the enforcement jurisdiction of state insurance authorities and not within the jurisdiction of the FTC. Id.

Because the FTC has clearly stated that it will not enforce the GLB privacy provisions against persons engaged in providing insurance, health plans will not be subject to dual federal agency jurisdiction for information that is both nonpublic personal information and protected health information. If states choose to adopt GLB-like laws or regulations, which may or may not track the federal rules completely, health plans would need to evaluate these laws under the preemption analysis described in subpart B of Part 160.

Federally Funded Health Programs

These rules will affect various federal programs, some of which may have requirements that are, or appear to be, inconsistent with the requirements of these regulations. These programs include those operated directly by the federal government (such as health programs for military personnel and veterans) as well as programs in which health services or benefits are provided by the private sector or by state or local governments, but which are governed by various federal laws (such as Medicare, Medicaid, and ERISA).

Congress explicitly included some of these programs in HIPAA, subjecting them directly to the privacy regulation. Section 1171 of the Act defines the term "health plan" to include the following federally conducted, regulated, or funded programs: Group plans under ERISA that either have 50 or more participants or are administered by an entity other than the employer who established and maintains the plan; federally qualified health maintenance organizations; Medicare; Medicaid; Medicare supplemental policies; the health care program for active military personnel; the health care program for veterans; the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); the Indian health service program under the Indian Health Care Improvement Act, 25 U.S.C. 1601, et seq.; and the Federal Employees Health Benefits Program. There also are many other federally conducted, regulated, or funded programs in which individually identifiable health information is created or maintained, but which do not come within the statutory definition of "health plan." While these latter types of federally conducted, regulated, or assisted programs are not explicitly covered by part C of title XI in the same way that the programs listed in the statutory definition of "health plan" are covered, the statute may nonetheless apply to transactions and other activities conducted under such programs. This is likely to be the case when the federal entity or federally regulated or funded entity

provides health services; the requirements of part C may apply to such an entity as a "health care provider." Thus, the issue of how different federal requirements apply is likely to arise in numerous contexts.

There are a number of authorities under the Public Health Service Act and other legislation that contain explicit confidentiality requirements, either in the enabling legislation or in the implementing regulations. Many of these are so general that there would appear to be no problem of inconsistency, in that nothing in those laws or regulations would appear to restrict the provider's ability to comply with the privacy regulation's requirements.

There may, however, be authorities under which either the requirements of the enabling legislation or of the program regulations would impose requirements that differ from these rules.

For example, regulations applicable to the substance abuse block grant program funded under section 1943(b) of the Public Health Service Act require compliance with 42 CFR part 2, and, thus, raise the issues identified above in the substance abuse confidentiality regulations discussion. There are a number of federal programs which, either by statute or by regulation, restrict the disclosure of patient information to, with minor exceptions, disclosures "required by law." See, for example, the program of projects for prevention and control of sexually transmitted diseases funded under section 318(e)(5) of the Public Health Service Act (42 CFR 51b.404); the regulations implementing the community health center program funded under section 330 of the Public Health Service Act (42 CFR 51c.110); the regulations implementing the program of grants for family planning services under title X of the Public Health Service Act (42 CFR 59.15); the regulations implementing the program of grants for black lung clinics funded under 30 U.S.C. 437(a) (42 CFR 55a.104); the regulations implementing the program of maternal and child health projects funded under section 501 of the Act (42 CFR 51a.6); the regulations implementing the program of medical examinations of coal miners (42 CFR 37.80(a)). These legal requirements would restrict the grantees or other entities providing services under the programs involved from making many of the disclosures that §§ 164.510 or 164.512 would permit. In some cases, permissive disclosures for treatment, payment, or health care operations would also be limited. Because §§ 164.510 and 164.512 are merely permissive, there would not be a conflict between the program requirements, because it would be possible to comply with both. However, entities subject to both sets of requirements would not have the total range of discretion that they would have if they were subject only to this regulation.

Food, Drug, and Cosmetic Act

The Food, Drug, and Cosmetic Act, 21 U.S.C. 301, et seq., and its accompanying regulations outline the responsibilities of the Food and Drug Administration with regard to monitoring the safety and effectiveness of drugs and devices. Part of the agency's responsibility is to obtain reports about adverse events, track medical devices, and engage in other types of post marketing surveillance. Because many of these reports contain protected health information, the information within them may come within the purview of the privacy rules. ***82485** Although some of these reports are required by the Food, Drug, and Cosmetic Act or its accompanying regulations, other types of reporting are voluntary. We believe that these reports, while not mandated, play a critical role in ensuring that individuals receive safe and effective drugs and devices. Therefore, in § 164.512(b)(1)(iii), we have provided that covered entities may disclose protected health information to a person subject to the jurisdiction of the Food and Drug Administration for specified purposes, such as reporting adverse events, tracking medical devices, or engaging in other post marketing surveillance. We describe the scope and conditions of such disclosures in more detail in § 164.512(b).

Clinical Laboratory Improvement Amendments

CLIA, 42 U.S.C. 263a, and the accompanying regulations, 42 CFR part 493, require clinical laboratories to comply with standards regarding the testing of human specimens. This law requires clinical laboratories to disclose test results or reports only to authorized persons, as defined by state law. If a state does not define the term, the federal law defines it as the person who orders the test.

We realize that the person ordering the test is most likely a health care provider and not the individual who is the subject of the protected health information included within the result or report. Under this requirement, therefore, a clinical laboratory may be prohibited by law from providing the individual who is the subject of the test result or report with access to this information.

Although we believe individuals should be able to have access to their individually identifiable health information, we recognize that in the specific area of clinical laboratory testing and reporting, the Health Care Financing Administration, through regulation, has provided that access may be more limited. To accommodate this requirement, we have provided at § 164.524(1)(iii) that covered entities maintaining protected health information that is subject to the CLIA requirements do not have to provide individuals with a right of access to or a right to inspect and obtain a copy of this information if the disclosure of the information to the individual would be prohibited by CLIA.

Not all clinical laboratories, however, will be exempted from providing individuals with these rights. If a clinical laboratory operates in a state in which the term "authorized person" is defined to include the individual, the clinical laboratory would have to provide the individual with these rights. Similarly, if the individual was the person who ordered the test and an authorized person included such a person, the laboratory would be required to provide the individual with these rights.

Additionally, CLIA regulations exempt the components or functions of "research laboratories that test human specimens but do not report patient specific results for the diagnosis, prevention or treatment of any disease or impairment of, or the assessment of the health of individual patients" from the CLIA regulatory scheme. 42 CFR 493.3(a)(2). If subject to the access requirements of this regulation, such entities would be forced to meet the requirements of CLIA from which they are currently exempt. To eliminate this additional regulatory burden, we have also excluded covered entities that are exempt from CLIA under that rule from the access requirement of this regulation.

Although we are concerned about the lack of immediate access by the individual, we believe that, in most cases, individuals who receive clinical tests will be able to receive their test results or reports through the health care provider who ordered the test for them. The provider will receive the information from the clinical laboratory. Assuming that the provider is a covered entity, the individual will have the right of access and right to inspect and copy this protected health information through his or her provider.

Other Mandatory Federal or State Laws

Many federal laws require covered entities to provide specific information to specific entities in specific circumstances. If a federal law requires a covered entity to disclose a specific type of information, the covered entity would not need an authorization under § 164.508 to make the disclosure because the final rule permits covered entities to make disclosures that are required by law under § 164.512(a). Other laws, such as the Social Security Act (including its Medicare and Medicaid provisions), the Family and Medical Leave Act, the Public Health Service Act, Department of Transportation regulations, the Environmental Protection Act and its accompanying regulations, the National Labor Relations Act, the Federal Aviation Administration, and the Federal Highway Administration rules, may also contain provisions that require covered entities or others to use or disclose protected health information for specific purposes.

When a covered entity is faced with a question as to whether the privacy regulation would prohibit the disclosure of protected health information that it seeks to disclose pursuant to a federal law, the covered entity should determine if the disclosure is required by that law. In other words, it must determine if the disclosure is mandatory rather than merely permissible. If it is mandatory, a covered entity may disclose the protected health information pursuant to § 164.512(a), which permits covered entities to disclose protected health information without an authorization when the disclosure is required by law. If the disclosure is not required (but only permitted) by the federal law, the covered entity must determine if the disclosure comes within one of the other permissible disclosures. If the disclosure does not come within one of the provisions for permissible disclosures, the covered entity must obtain an authorization from the individual who is the subject of the information or de-identify the information before disclosing it.

If another federal law prohibits a covered entity from using or disclosing information that is also protected health information, but the privacy regulation permits the use or disclosure, a covered entity will need to comply with the other federal law and not use or disclose the information.

Federal Disability Nondiscrimination Laws

The federal laws barring discrimination on the basis of disability protect the confidentiality of certain medical information. The information protected by these laws falls within the larger definition of "health information" under this privacy regulation. The two primary disability nondiscrimination laws are the Americans with Disabilities Act (ADA), 42 U.S.C. 12101 et seq., and the Rehabilitation Act of 1973, as amended, 29 U.S.C. 701 et seq., although other laws barring discrimination on the basis of disability (such as the nondiscrimination provisions of the Workforce Investment Act of 1988, 29 U.S.C. 2938) may also apply. Federal disability nondiscrimination laws cover two general categories of entities relevant to this discussion: employers and entities that receive federal financial assistance.

Employers are not covered entities under the privacy regulation. Many employers, however, are subject to the federal disability nondiscrimination laws and, therefore, must protect the ***82486** confidentiality of all medical information concerning their applicants and employees.

The employment provisions of the ADA, 42 U.S.C. 12111 et seq., expressly cover employers of 15 or more employees, employment agencies, labor organizations, and joint labor-management committees. Since 1992, employment discrimination complaints arising under sections 501, 503, and 504 of the Rehabilitation Act also have been subject to the ADA's employment nondiscrimination standards. See "Rehabilitation Act Amendments," Pub. L. No. 102-569, 106 Stat. 4344. Employers subject to ADA nondiscrimination standards have confidentiality obligations regarding applicant and employee medical information. Employers must treat such medical information, including medical information from voluntary health or wellness programs and any medical information that is voluntarily disclosed as a confidential medical record, subject to limited exceptions.

Transmission of health information by an employer to a covered entity, such as a group health plan, is governed by the ADA confidentiality restrictions. The ADA, however, has been interpreted to permit an employer to use medical information for insurance purposes. See 29 CFR part 1630 App. at § 1630.14(b) (describing such use with reference to 29 CFR 1630.16(f), which in turn explains that the ADA regulation "is not intended to disrupt the current regulatory structure for self-insured employers * * * or current industry practices in sales, underwriting, pricing, administrative and other services, claims and similar insurance related activities based on classification of risks as regulated by the states"). See also, "Enforcement Guidance on Disability-Related Inquiries and Medical Examinations of Employees under the Americans with Disabilities Act," 4, n.10 (July 26, 2000), __ FEP Manual (BNA) __ ("Enforcement Guidance on Employees"). See generally, "ADA Enforcement Guidance on Preemployment Disability-Related Questions and Medical Examinations" (October 10, 1995), 8 FEP Manual (BNA) 405:7191 (1995) (also available at http://www.eeoc.gov). Thus, use of medical information for insurance purposes may include transmission of health information to a covered entity.

If an employer-sponsored group health plan is closely linked to an employer, the group health plan may be subject to ADA confidentiality restrictions, as well as this privacy regulation. See Carparts Distribution Center, Inc. v. Automotive Wholesaler's Association of New England, Inc., 37 F.3d 12 (1st Cir. 1994)(setting forth three bases for ADA Title I jurisdiction over an employer-provided medical reimbursement plan, in a discrimination challenge to the plan's HIV/AIDS cap). Transmission of applicant or employee health information by the employer's management to the group health plan may be permitted under the ADA standards as the use of medical information for insurance purposes. Similarly, disclosure of such medical information by the group health plan, under the limited circumstances permitted by this privacy regulation, may involve use of the information for insurance purposes as broadly described in the ADA discussion above.

Entities that receive federal financial assistance, which may also be covered entities under the privacy regulation, are subject to section 504 of the Rehabilitation Act (29 U.S.C. 794) and its implementing regulations. Each federal agency has promulgated such regulations that apply to entities that receive financial assistance from that agency ("recipients"). These regulations may

limit the disclosure of medical information about persons who apply to or participate in a federal financially assisted program or activity. For example, the Department of Labor's section 504 regulation (found at 29 CFR part 32), consistent with the ADA standards, requires recipients that conduct employment-related programs, including employment training programs, to maintain confidentiality regarding any information about the medical condition or history of applicants to or participants in the program or activity. Such information must be kept separate from other information about the applicant or participant and may be provided to certain specified individuals and entities, but only under certain limited circumstances described in the regulation. See 29 CFR 32.15(d). Apart from those circumstances, the information must be afforded the same confidential treatment as medical records, id. Also, recipients of federal financial assistance from the Department of Health and Human Services, such as hospitals, are subject to the ADA's employment nondiscrimination standards. They must, accordingly, maintain confidentiality regarding the medical condition or history of applicants for employment and employees.

The statutes and implementing regulations under which the federal financial assistance is provided may contain additional provisions regulating collection and disclosure of medical, health, and disability-related information. See, e.g., section 188 of the Workforce Investment Act of 1988 (29 U.S.C. 2938) and 29 CFR 37.3(b). Thus, covered entities that are subject to this privacy regulation, may also be subject to the restrictions in these laws as well.

U.S. Safe Harbor Privacy Principles (European Union Directive on Data Protection)

The E.U. Directive became effective in October 1998 and prohibits European Union Countries from permitting the transfer of personal data to another country without ensuring that an "adequate level of protection," as determined by the European Commission, exists in the other country or pursuant to one of the Directive's derogations of this rule, such as pursuant to unambiguous consent or to fulfill a contract with the individual. In July 2000, the European Commission concluded that the U.S. Safe Harbor Privacy Principles[FN1] constituted "adequate protection." Adherence to the Principles is voluntary. Organizations wishing to engage in the exchange of personal data with E.U. countries may assert compliance with the Principles as one means of obtaining data from E.U. countries.

The Department of Commerce, which negotiated these Principles with the European Commission, has provided guidance for U.S. organizations seeking to adhere to the guidelines and comply with U.S. law. We believe this guidance addresses the concerns covered entities seeking to transfer personal data from E.U. countries may have. When "U.S. law imposes a conflicting obligation, U.S. organizations whether in the safe harbor or not must comply with the law." An organization does not need to comply with the Principles if a conflicting U.S. law "explicitly authorizes" the particular conduct. The organization's non-compliance is "limited to the extent necessary to meet the overriding legitimate interests further[ed] by such authorization." However, if only a difference exists such that an "option is allowable under the Principles and/or U.S. law, organizations are expected to opt for the higher protection where possible." Questions regarding compliance and interpretation will be decided based on U.S. law. See Department of Commerce, Memorandum on Damages for Breaches ***82487** of Privacy, Legal Authorizations and Mergers and Takeovers in U.S. Law 5 (July 17, 2000); Department of Commerce, Safe Harbor Privacy Principles Issued by the U.S. Department of Commerce on July 21, 2000, 65 FR 45666 (2000). The Principles and our privacy regulation are based on common principles of fair information practices. We believe they are essentially consistent and that an organization complying with our privacy regulation can fairly and correctly self-certify that it complies with the Principles. If a true conflict arises between the privacy regulation and the Principles, the Department of Commerce's guidance provides that an entity must comply with the U.S. law.

Part 160—Subpart C—Compliance and Enforcement

Proposed § 164.522 included five paragraphs addressing activities related to the Secretary's enforcement of the rule. These provisions were based on procedures and requirements in various civil rights regulations. Proposed § 164.522(a) provided that the Secretary would, to the extent practicable, seek the cooperation of covered entities in obtaining compliance, and could provide technical assistance to covered entities to help them comply voluntarily. Proposed § 164.522(b) provided that individuals could file complaints with the Secretary. However, where the complaint related to the alleged failure of a covered entity to amend or correct protected health information as proposed in the rule, the Secretary would not make certain determinations such as

whether protected health information was accurate or complete. This paragraph also listed the requirements for filing complaints and indicated that the Secretary may investigate such complaints and what might be reviewed as part of such investigation.

Under proposed § 164.522(c), the Secretary would be able to conduct compliance reviews. Proposed § 164.522(d) described the responsibilities that covered entities keep records and reports as prescribed by the Secretary, cooperate with compliance reviews, permit the Secretary to have access to their facilities, books, records, and other sources of information during normal business hours, and seek records held by other persons. This paragraph also stated that the Secretary would maintain the confidentiality of protected health information she collected and prohibit covered entities from taking retaliatory action against individuals for filing complaints or for other activities. Proposed § 164.522(e) provided that the Secretary would inform the covered entity and the individual complainant if an investigation or review indicated a failure to comply and would seek to resolve the matter informally if possible. If the matter could not be resolved informally, the Secretary would be able to issue written findings, be required to inform the covered entity and the complainant, and be able to pursue civil enforcement action or make a criminal referral. The Secretary would also be required to inform the covered entity and the individual complainant if no violation was found.

We make the following changes and additions to proposed § 164.522 in the final rule. First, we have moved this section to part 160, as a new subpart C, “Compliance and Enforcement.” Second, we add new sections that explain the applicability of these provisions and incorporate certain definitions. Accordingly, we change the proposed references to violations to “this subpart” to violations of “the applicable requirements of part 160 and the applicable standards, requirements, and implementation specifications of subpart E of part 164 of this subchapter.” Third, the final rule at § 160.306(a) provides that any person, not just an “individual” (the person who is the subject of the individually identifiable health information) may file a complaint with the Secretary. Other references in this subpart to an individual have been changed accordingly. Fourth, we delete the proposed § 164.522(a) language that indicated that the Secretary would not determine whether information was accurate or complete, or whether errors or omissions might have an adverse effect on the individual. While the policy is not changed in that the Secretary will not make such determinations, we believe the language is unnecessary and may suggest that we would make all other types of determinations, such as all determinations in which the regulation defers to the professional judgment of the covered entity. Fifth, § 160.306(b)(3) requires that complaints be filed within 180 days of when the complainant knew or should have known that the act or omission complained of occurred, unless this time limit is waived by the Secretary for good cause shown. Sixth, § 160.310(b) requires cooperation with investigations as well as compliance reviews. Seventh, § 160.310 (c)(1) provides that the Secretary must be provided access to a covered entity's facilities, books, records, accounts, and other sources of information, including protected health information, at any time and without notice where exigent circumstances exist, such as where documents might be hidden or destroyed. Eighth, the provision proposed at § 164.522(d) that would prohibit covered entities from taking retaliatory action against individuals for filing a complaint with the Secretary or for certain other actions has been changed and moved to § 164.530. Ninth, § 160. 312(a)(2) deletes the reference in the proposed rule to using violation findings as a basis for initiating action to secure penalties. This deletion is not a substantive change. This language was removed because penalties will be addressed in the enforcement regulation. As in the NPRM, the Secretary may promulgate alternative procedures for complaints relating to national security. For example, to protect classified information, we may promulgate rules that would allow an intelligence community agency to create a separate body within that agency to receive complaints.

The Department plans to issue an Enforcement Rule that applies to all of the regulations that the Department issues under the Administrative Simplification provisions of HIPAA. This regulation will address the imposition of civil monetary penalties and the referral of criminal cases where there has been a violation of this rule. Penalties are provided for under section 262 of HIPAA. The Enforcement Rule would also address the topics covered by Subpart C below. It is expected that this Enforcement Rule would replace Subpart C.

Part 164—Subpart A—General Provisions

Section 164.102—Statutory Basis

In the NPRM, we provided that the provisions of this part are adopted pursuant to the Secretary's authority to prescribe standards, requirements, and implementation standards under part C of title XI of the Act and section 264 of Public Law 104-191. The final rule adopts this language.

Section 164.104—Applicability

In the NPRM, we provided that except as otherwise provided, the provisions of this part apply to covered entities: health plans, health care clearinghouses, and health care providers who transmit health information in electronic form in connection with any transaction referred to in section 1173(a)(1) of the Act. The final rule adopts this language. ***82488**

Section 164.106—Relationship to Other Parts

The final rule adds a new provision stating that in complying with the requirements of this part, covered entities are required to comply with the applicable provisions of parts 160 and 162 of this subchapter. This language references Subchapter C in this regulation, Administrative Data Standards and Related Requirements; Part 160, General Administrative Requirements; and Part 162, Administrative Requirements. Part 160 includes requirements such as keeping records and submitting compliance reports to the Secretary and cooperating with the Secretary's complaint investigations and compliance reviews. Part 162 includes requirements such as requiring a covered entity that conducts an electronic transaction, adopted under this part, with another covered entity to conduct the transaction as a standard transaction as adopted by the Secretary.

Part 164—Subpart B-D—Reserved

Part 164—Subpart E—Privacy

Section 164.500—Applicability

The discussion below describes the entities and the information that are subject to the final regulation.

Many of the provisions of the regulation are presented as “standards.” Generally, the standards indicate what must be accomplished under the regulation and implementation specifications describe how the standards must be achieved.

Covered Entities

We proposed in the NPRM to apply the standards in the regulation to health plans, health care clearinghouses, and to any health care provider who transmits health information in electronic form in connection with transactions referred to in section 1173(a)(1) of the Act. The proposal referred to these entities as “covered entities.”

We have revised § 164.500 to clarify the applicability of the rule to health care clearinghouses. As we stated in the preamble to the NPRM, we believe that in most instances health care clearinghouses will receive protected health information as a business associate to another covered entity. This understanding was confirmed by the comments and by our fact finding. Clearinghouses rarely have direct contact with individuals, and usually will not be in a position to create protected health information or to receive it directly from them. Unlike health plans and providers, clearinghouses usually convey and repackage information and do not add materially to the substance of protected health information of an individual.

The revised language provides that clearinghouses are not subject to certain requirements in the rule when acting as business associates of other covered entities. As revised, a clearinghouse acting as a business associate is subject only to the provisions of this section, to the definitions, to the general rules for uses and disclosures of protected health information (subject to limitations), to the provision relating to health care components, to the provisions relating to uses and disclosures for which consent, individual authorization or an opportunity to agree or object is not required (subject to limitations), to the transition requirements and to the compliance date. With respect to the uses and disclosures authorized under § 164.502 or § 164.512, a clearinghouse acting as a business associate is not authorized by the rule to make any use or disclosure not permitted by its

business associate contract. Clearinghouses acting as business associates are not subject to the other requirements of this rule, which include the provisions relating to procedural requirements, requirements for obtaining consent, individual authorization or agreement, provision of a notice, individual rights to request privacy protection, access and amend information and receive an accounting of disclosures and the administrative requirements.

We note that, even as business associates, clearinghouses remain covered entities. Clearinghouses, like other covered entities, are responsible under this regulation for abiding by the terms of business associate contracts. For example, while the provisions regarding individuals' access to and right to request corrections to protected health information about them apply only to health plans and covered health care providers, clearinghouses may have some responsibility for providing such access under their business associate contracts. A clearinghouse (or any other covered entity) that violates the terms of a business associate contract also is in direct violation of this rule and, as a covered entity, is subject to compliance and enforcement action.

We clarify that a covered entity is only subject to these rules to the extent that they possess protected health information. Moreover, these rules only apply with regard to protected health information. For example, if a covered entity does not disclose or receive from its business associate any protected health information and no protected health information is created or received by its business associate on behalf of the covered entity, then the business associate requirements of this rule do not apply.

We clarify that the Department of Defense or any other federal agency and any non-governmental organization acting on its behalf, is not subject to this rule when it provides health care in another country to foreign national beneficiaries. The Secretary believes that this exemption is warranted because application of the rule could have the unintended effect of impeding or frustrating the conduct of such activities, such as interfering with the ability of military command authorities to obtain protected health information on prisoners of war, refugees, or detainees for whom they are responsible under international law. See the preamble to the definition of “individual” for further discussion.

Covered Information

We proposed in the NPRM to apply the requirements of the rule to individually identifiable health information that is or has been electronically transmitted or maintained by a covered entity. The provisions would have applied to the information itself, referred to as protected health information in the rule, and not to the particular records in which the information is contained. We proposed that once information was maintained or transmitted electronically by a covered entity, the protections would follow the information in whatever form, including paper records, in which it exists while held by a covered entity. The proposal would not have applied to information that was never electronically maintained or transmitted by a covered entity.

In the final rule, we extend the scope of protections to all individually identifiable health information in any form, electronic or non-electronic, that is held or transmitted by a covered entity. This includes individually identifiable health information in paper records that never has been electronically stored or transmitted. (See § 164.501, definition of “protected health information,” for further discussion.)

Section 164.501—Definitions

Correctional Institution

The proposed rule did not define the term correctional institution. The final rule defines correctional institution as any penal or correctional facility, jail, reformatory, detention center, work farm, halfway house, or residential community program center operated by, or under contract to, the United States, ***82489** a state, a territory, a political subdivision of a state or territory, or an Indian tribe, for the confinement or rehabilitation of persons charged with or convicted of a criminal offense or other persons held in lawful custody. Other persons held in lawful custody includes juvenile offenders adjudicated delinquent, aliens detained awaiting deportation, persons committed to mental institutions through the criminal justice system, witnesses, or others awaiting charges or trial. This language was necessary to explain the privacy rights and protections of inmates in this regulation.

Covered Functions

We add a new term, "covered functions," as a shorthand way of expressing and referring to the functions that the entities covered by section 1172(a) of the Act perform. Section 1171 defines the terms "health plan", "health care provider", and "health care clearinghouse" in functional terms. Thus, a "health plan" is an individual or group plan "that provides, or pays the cost of, medical care * * *", a "health care provider" "furnish[es] health care services or supplies," and a "health care clearinghouse" is an entity "that processes or facilitates the processing of * * * data elements of health information * * *". Covered functions, therefore, are the activities that any such entity engages in that are directly related to operating as a health plan, health care provider, or health care clearinghouse; that is, they are the functions that make it a health plan, health care provider, or health care clearinghouse.

The term "covered functions" is not intended to include various support functions, such as computer support, payroll and other office support, and similar support functions, although we recognize that these support functions must occur in order for the entity to carry out its health care functions. Because such support functions are often also performed for parts of an organization that are not doing functions directly related to the health care functions and may involve access to and/or use of protected health information, the rules below describe requirements for ensuring that workforce members who perform these support functions do not impermissibly use or disclose protected health information. See § 164.504.

Data Aggregation

The NPRM did not include a definition of data aggregation. In the final rule, data aggregation is defined, with respect to protected health information received by a business associate in its capacity as the business associate of a covered entity, as the combining of such protected health information by the business associate with protected health information received by the business associate in its capacity as a business associate of another covered entity, to permit the creation of data for analyses that relate to the health care operations of the respective covered entities. The definition is included in the final rule to help describe how business associates can assist covered entities to perform health care operations that involve comparative analysis of protected health information from otherwise unaffiliated covered entities. Data aggregation is a service that gives rise to a business associate relationship if the performance of the service involves disclosure of protected health information by the covered entity to the business associate.

Designated Record Set

In the proposed rule, we defined designated record set as "a group of records under the control of a covered entity from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual and which is used by the covered entity to make decisions about the individual." We defined a "record" as "any item, collection, or grouping of protected health information maintained, collected, used, or disseminated by a covered entity."

In the final rule, we modify the definition of designated record set to specify certain records maintained by or for a covered entity that are always part of a covered entity's designated record sets and to include other records that are used to make decisions about individuals. We do not use the means of retrieval of a record as a defining criteria.

For health plans, designated record sets include, at a minimum, the enrollment, payment, claims adjudication, and case or medical management record systems of the plan. For covered health care providers, designated record sets include, at a minimum, the medical record and billing record about individuals maintained by or for the provider. In addition to these records, designated record sets include any other group of records that are used, in whole or in part, by or for a covered entity to make decisions about individuals. We note that records that otherwise meet the definition of designated record set and which are held by a business associate of the covered entity are part of the covered entity's designated record sets. Although we do not specify particular types of records that are always included in the designated record sets of clearinghouses when they are not acting

as business associates, this definition includes a group of records that such a clearinghouse uses, in whole or in part, to make decisions about individuals.

For the most part we retain, with slight modifications, the definition of "record," defining it as any item, collection, or grouping of information that includes protected health information and is maintained, collected, used, or disseminated.

Direct Treatment Relationship

This term was not included in the proposed rule. Direct treatment relationship means a relationship between a health care provider and an individual that is not an indirect treatment relationship (see definition of indirect treatment relationship, below). For example, outpatient pharmacists and Web-based providers generally have direct treatment relationships with patients. Outpatient pharmacists fill prescriptions written by other providers, but they furnish the prescription and advice about the prescription directly to the patient, not through another treating provider. Web-based providers generally deliver health care independently, without the orders of another provider.

A provider may have direct treatment relationships with some patients and indirect treatment relationships with others. In some provisions of the final rule, providers with indirect treatment relationships are excepted from requirements that apply to other providers. See § 164.506 regarding consent for uses and disclosures of protected health information for treatment, payment, and health care operations, and § 164.520 regarding notice of information practices. These exceptions apply only with respect to the individuals with whom the provider has an indirect treatment relationship.

Disclosure

We proposed to define "disclosure" to mean the release, transfer, provision of access to, or divulging in any other manner of information outside the entity holding the information. The final rule is unchanged. We note that the transfer of protected health information from a covered entity to a business associate is a disclosure for purposes of this regulation.

Health Care Operations

The preamble to the proposed rule explained that in order for treatment and payment to occur, protected health ***82490** information must be used within entities and shared with business partners. In the proposed rule we provided a definition for "health care operations" to clarify the activities we considered to be "compatible with and directly related to" treatment and payment and for which protected health information could be used or disclosed without individual authorization. These activities included conducting quality assessment and improvement activities, reviewing the competence or qualifications and accrediting/licensing of health care professionals and plans, evaluating health care professional and health plan performance, training future health care professionals, insurance activities relating to the renewal of a contract for insurance, conducting or arranging for medical review and auditing services, and compiling and analyzing information in anticipation of or for use in a civil or criminal legal proceeding. Recognizing the dynamic nature of the health care industry, we acknowledged that the specified categories may need to be modified as the industry evolves.

The preamble discussion of the proposed general rules listed certain activities that would not be considered health care operations because they were sufficiently unrelated to treatment and payment to warrant requiring an individual to authorize such use or disclosure. Those activities included: marketing of health and non-health items and services; disclosure of protected health information for sale, rent or barter; use of protected health information by a non-health related division of an entity; disclosure of protected health information for eligibility, enrollment, underwriting, or risk rating determinations prior to an individuals' enrollment in a health plan; disclosure to an employer for employment determinations; and fundraising.

In the final rule, we do not change the general approach of defining health care operations: health care operations are the listed activities undertaken by the covered entity that maintains the protected health information (i.e., one covered entity may not disclose protected health information for the operations of a second covered entity); a covered entity may use any protected

health information it maintains for its operations (e.g., a plan may use protected health information about former enrollees as well as current enrollees); we expand the proposed list to reflect many changes requested by commenters.

We modify the proposal that health care operations represent activities "in support of" treatment and payment functions. Instead, in the final rule, health care operations are the enumerated activities to the extent that the activities are related to the covered entity's functions as a health care provider, health plan or health care clearinghouse, i.e., the entity's "covered functions." We make this change to clarify that health care operations includes general administrative and business functions necessary for the covered entity to remain a viable business. While it is possible to draw a connection between all the enumerated activities and "treatment and payment," for some general business activities (e.g., audits for financial disclosure statements) that connection may be tenuous. The proposed concept also did not include the operations of those health care clearinghouses that may be covered by this rule outside their status as business associate to a covered entity. We expand the definition to include disclosures for the enumerated activities of organized health care arrangements in which the covered entity participates. See also the definition of organized health care arrangements, below.

In addition, we make the following changes and additions to the enumerated subparagraphs:

(1) We add language to clarify that the primary purpose of the studies encompassed by "quality assessment and improvement activities" must not be to obtain generalizable knowledge. A study with such a purpose would meet the rule's definition of research, and use or disclosure of protected health information would have to meet the requirements of §§ 164.508 or 164.512(i). Thus, studies may be conducted as a health care operation if development of generalizable knowledge is not the primary goal. However, if the study changes and the covered entity intends the results to be generalizable, the change should be documented by the covered entity as proof that, when initiated, the primary purpose was health care operations.

We add population-based activities related to improving health or reducing health care costs, protocol development, case management and care coordination, contacting of health care providers and patients with information about treatment alternatives, and related functions that do not entail direct patient care. Many commenters recommended adding the term "disease management" to health care operations. We were unable, however, to find a generally accepted definition of the term. Rather than rely on this label, we include many of the functions often included in discussions of disease management in this definition or in the definition of treatment. This topic is discussed further in the comment responses below.

(2) We have deleted "undergraduate and graduate" as a qualifier for "students," to make the term more general and inclusive. We add the term "practitioners." We expand the purposes encompassed to include situations in which health care providers are working to improve their skills. The rule also adds the training of non-health care professionals.

(3) The rule expands the range of insurance related activities to include those related to the creation, renewal or replacement of a contract for health insurance or health benefits, as well as ceding, securing, or placing a contract for reinsurance of risk relating to claims for health care (including stop-loss and excess of loss insurance). For these activities, we also eliminate the proposed requirement that these uses and disclosures apply only to protected health information about individuals already enrolled in a health plan. Under this provision, a group health plan that wants to replace its insurance carrier may disclose certain protected health information to insurance issuers in order to obtain bids on new coverage, and an insurance carrier interested in bidding on new business may use protected health information obtained from the potential new client to develop the product and pricing it will offer. For circumstances in which no new contract is issued, we add a provision in § 164.514(g) restricting the recipient health plan from using or disclosing protected health information obtained for this purpose, other than as required by law. Uses and disclosures in these cases come within the definition of "health care operations," provided that the requirements of § 164.514(g) are met, if applicable. See § 164.504(f) for requirements for such disclosures by group health plans, as well as specific restrictions on the information that may be disclosed to plan sponsors for such purposes. We note that a covered health care provider must obtain an authorization under § 164.508 in order to disclose protected health information about an individual for purposes of pre-enrollment underwriting; the underwriting is not an "operation" of the provider and that disclosure is not otherwise permitted by a provision of this rule.

(4) We delete reference to the "compiling and analyzing information in anticipation of or for use in a civil or criminal legal proceeding" and replace it with a broader reference to ***82491** conducting or arranging for "legal services."

We add two new categories of activities:

(5) Business planning and development, such as conducting cost-management and planning-related analyses related to managing and operating the entity, including formulary development and administration, development or improvement of methods of payment or coverage policies.

(6) Business management activities and general administrative functions, such as management activities relating to implementation of and compliance with the requirements of this subchapter, fundraising for the benefit of the covered entity to the extent permitted without authorization under § 164.514(f), and marketing of certain services to individuals served by the covered entity, to the extent permitted without authorization under § 164.514(e) (see discussion in the preamble to that section, below). For example, under this category we permit uses or disclosures of protected health information to determine from whom an authorization should be obtained, for example to generate a mailing list of individuals who would receive an authorization request.

We add to the definition of health care operations disclosure of protected health information for due diligence to a covered entity that is a potential successor in interest. This provision includes disclosures pursuant to the sale of a covered entity's business as a going concern, mergers, acquisitions, consolidations, and other similar types of corporate restructuring between covered entities, including a division of a covered entity, and to an entity that is not a covered entity but will become a covered entity if the transfer or sale is completed. Other types of sales of assets, or disclosures to organizations that are not and would not become covered entities, are not included in the definition of health care operations and could only occur if the covered entity obtained valid authorization for such disclosure in accordance with § 164.508, or if the disclosure is otherwise permitted under this rule.

We also add to health care operations disclosure of protected health information for resolution of internal grievances. These uses and disclosures include disclosure to an employee and/or employee representative, for example when the employee needs protected health information to demonstrate that the employer's allegations of improper conduct are untrue. We note that such employees and employee representatives are not providing services to or for the covered entity, and, therefore, no business associate contract is required. Also included are resolution of disputes from patients or enrollees regarding the quality of care and similar matters.

We also add use for customer service, including the provision of data and statistical analyses for policyholders, plan sponsors, or other customers, as long as the protected health information is not disclosed to such persons. We recognize that part of the general management of a covered entity is customer service. We clarify that customer service may include the use of protected health information to provide data and statistical analyses. For example, a plan sponsor may want to understand why its costs are rising faster than average, or why utilization in one plant location is different than in another location. An association that sponsors an insurance plan for its members may want information on the relative costs of its plan in different areas. Some plan sponsors may want more detailed analyses that attempt to identify health problems in a work site. We note that when a plan sponsor has several different group health plans, or when such plans provide insurance or coverage through more than one health insurance issuer or HMO, the covered entities may jointly engage in this type of analysis as a health care operation of the organized health care arrangement.

This activity qualifies as a health care operation only if it does not result in the disclosure of protected health information to the customer. The results of the analyses must be presented in a way that does not disclose protected health information. A disclosure of protected health information to the customer as a health care operation under this provision violates this rule. This provision is not intended to permit covered entities to circumvent other provisions in this rule, including requirements relating to disclosures of protected health information to plan sponsors or the requirements relating to research. See § 164.504(f) and § 164.512(i).

We use the term customer to provide flexibility to covered entities. We do not intend the term to apply to persons with whom the covered entity has no other business; this provision is intended to permit covered entities to provide service to their existing customer base.

We note that this definition, either alone or in conjunction with the definition of "organized health care arrangement," allows an entity such as an integrated staff model HMO, whether legally integrated or whether a group of associated entities, that hold themselves out as an organized arrangement to share protected health information under § 164.506. In these cases, the sharing of protected health information will be either for the operations of the disclosing entity or for the organized health care arrangement in which the entity is participating.

Whether a disclosure is allowable for health care operations under this provision is determined separately from whether a business associate contract is required. These provisions of the rule operate independently. Disclosures for health care operations may be made to an entity that is neither a covered entity nor a business associate of the covered entity. For example, a covered academic medical center may disclose certain protected health information to community health care providers who participate in one of its continuing medical education programs, whether or not such providers are covered health care providers under this rule. A provider attending a continuing education program is not thereby performing services for the covered entity sponsoring the program and, thus, is not a business associate for that purpose. Similarly, health plans may disclose for due diligence purposes to another entity that may or may not be a covered entity or a business associate.

Health Oversight Agency

The proposed rule would have defined "health oversight agency" as "an agency, person, or entity, including the employees or agents thereof, (1) That is: (i) A public agency; or (ii) A person or entity acting under grant of authority from or contract with a public agency; and (2) Which performs or oversees the performance of any audit; investigation; inspection; licensure or discipline; civil, criminal, or administrative proceeding or action; or other activity necessary for appropriate oversight of the health care system, of government benefit programs for which health information is relevant to beneficiary eligibility, or of government regulatory programs for which health information is necessary for determining compliance with program standards." The proposed rule also described the functions of health oversight agencies in the proposed health oversight section (§ 164.510(c)) by repeating much of this definition.

In the final rule, we modify the definition of health oversight agency by eliminating from the definition the language in proposed § 164.510(c) (now § 164.512(d)). In addition, the final rule clarifies this definition by specifying that a "health oversight agency" is an agency or authority of the United States, ***82492** a state, a territory, a political subdivision of a state or territory, or an Indian tribe, or a person or entity acting under a grant of authority from or contract with such public agency, including the employees or agents of such public agency or its contractors or grantees, that is authorized by law to oversee the health care system or government programs in which health information is necessary to determine eligibility or compliance, or to enforce civil rights laws for which health information is relevant.

The preamble to the proposed rule listed the following as examples of health oversight agencies that conduct oversight activities relating to the health care system: state insurance commissions, state health professional licensure agencies, Offices of Inspectors General of federal agencies, the Department of Justice, state Medicaid fraud control units, Defense Criminal Investigative Services, the Pension and Welfare Benefit Administration, the HHS Office for Civil Rights, and the FDA. The proposed rule listed the Social Security Administration and the Department of Education as examples of health oversight agencies that conduct oversight of government benefit programs for which health information is relevant to beneficiary eligibility. The proposed rule listed the Occupational Health and Safety Administration and the Environmental Protection Agency as examples of oversight agencies that conduct oversight of government regulatory programs for which health information is necessary for determining compliance with program standards.

In the final rule, we include the following as additional examples of health oversight activities: (1) The U.S. Department of Justice's civil rights enforcement activities, and in particular, enforcement of the Civil Rights of Institutionalized Persons Act (42 U.S.C. 1997-1997j) and the Americans with Disabilities Act (42 U.S.C. 12101 et seq.), as well as the EEOC's civil rights enforcement activities under titles I and V of the ADA; (2) the FDA's oversight of food, drugs, biologics, devices, and other products pursuant to the Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.) and the Public Health Service Act (42 U.S.C. 201 et seq.); and (3) data analysis — performed by a public agency or by a person or entity acting under grant of authority from or under contract with a public agency —to detect health care fraud.

"Overseeing the health care system," which is included in the definition of health oversight, encompasses activities such as: oversight of health care plans; oversight of health benefit plans; oversight of health care providers; oversight of health care and health care delivery; oversight activities that involve resolution of consumer complaints; oversight of pharmaceuticals, medical products and devices, and dietary supplements; and a health oversight agency's analysis of trends in health care costs, quality, health care delivery, access to care, and health insurance coverage for health oversight purposes.

We recognize that health oversight agencies, such as the U.S. Department of Labor's Pension and Welfare Benefits Administration, may perform more than one type of health oversight. For example, agencies may sometimes perform audits and investigations and at other times conduct general oversight of health benefit plans. Such entities are considered health oversight agencies under the rule for any and all of the health oversight functions that they perform.

The definition of health oversight agency does not include private organizations, such as private-sector accrediting groups. Accreditation organizations are performing health care operations functions on behalf of health plans and covered health care providers. Accordingly, in order to obtain protected health information without individuals' authorizations, accrediting groups must enter into business associate agreements with health plans and covered health care providers for these purposes. Similarly, private entities, such as coding committees, that help government agencies that are health plans make coding and payment decisions are performing health care payment functions on behalf the government agencies and, therefore, must enter into business associate agreements in order to receive protected health information from the covered entity (absent individuals' authorization for such disclosure).

Indirect Treatment Relationship

This term was not included in the proposed rule. An "indirect treatment relationship" is a relationship between a health care provider and an individual in which the provider delivers health care to the individual based on the orders of another health care provider and the health care services, products, diagnoses, or results are typically furnished to the patient through another provider, rather than directly. For example, radiologists and pathologists generally have indirect treatment relationships with patients because they deliver diagnostic services based on the orders of other providers and the results of those services are furnished to the patient through the direct treating provider. This definition is necessary to clarify the relationships between providers and individuals in the regulation. For example, see the consent discussion at § 164.506.

Individual

We proposed to define "individual" to mean the person who is the subject of the protected health information. We proposed that the term include, with respect to the signing of authorizations and other rights (such as access, copying, and correction), the following types of legal representatives:

(1) With respect to adults and emancipated minors, legal representatives (such as court-appointed guardians or persons with a power of attorney), to the extent to which applicable law permits such legal representatives to exercise the person's rights in such contexts.

(2) With respect to unemancipated minors, a parent, guardian, or person acting in loco parentis, provided that when a minor lawfully obtains a health care service without the consent of or notification to a parent, guardian, or other person acting in loco

parentis, the minor shall have the exclusive right to exercise the rights of an individual with respect to the protected health information relating to such care.

(3) With respect to deceased persons, an executor, administrator, or other person authorized under applicable law to act on behalf of the decedent's estate.

In addition, we proposed to exclude from the definition:

(1) Foreign military and diplomatic personnel and their dependents who receive health care provided by or paid for by the Department of Defense or other federal agency or by an entity acting on its behalf, pursuant to a country-to-country agreement or federal statute.

(2) Overseas foreign national beneficiaries of health care provided by the Department of Defense or other federal agency or by a non-governmental organization acting on its behalf.

In the final rule, we eliminate from the definition of "individual" the provisions designating a legal representative as the "individual" for purposes of exercising certain rights with regard to protected health information. Instead, we include in the final rule a separate standard for "personal representatives." A covered entity must treat a personal representative of an individual as the individual except under specified circumstances. See discussion in ***82493** § 164.502(g) regarding personal representatives.

In addition, we eliminate from the definition of "individual" the above exclusions for foreign military and diplomatic personnel and overseas foreign national beneficiaries. We address the special circumstances for use and disclosure of protected health information about individuals who are foreign military personnel in § 164.512(k). We address overseas foreign national beneficiaries in § 164.500, "Applicability." The protected health information of individuals who are foreign diplomatic personnel and their dependents are not subject to special treatment under the final rule.

Individually identifiable health information about one individual may exist in the health records of another individual; health information about one individual may include health information about a second person. For example, a patient's medical record may contain information about the medical conditions of the patient's parents, children, and spouse, as well as their names and contact information. For the purpose of this rule, if information about a second person is included within the protected health information of an individual, the second person is not the person who is the subject of the protected health information. The second person is not the "individual" with regard to that protected health information, and under this rule thus does not have the individual's rights (e.g., access and amendment) with regard to that information.

Individually Identifiable Health Information

We proposed to define "individually identifiable health information" to mean information that is a subset of health information, including demographic information collected from an individual, and that:

(1) Is created by or received from a health care provider, health plan, employer, or health care clearinghouse; and

(2) Relates to the past, present, or future physical or mental health or condition of an individual, the provision of health care to an individual, or the past, present, or future payment for the provision of health care to an individual, and

(i) Which identifies the individual, or

(ii) With respect to which there is a reasonable basis to believe that the information can be used to identify the individual.

In the final rule, we change "created by or received from a health care provider * * *" to "created or received by a health care provider * * * "in order to conform to the statute. We otherwise retain the definition of "individually identifiable health information" without change in the final rule.

Inmate

The proposed rule did not define the term inmate. In the final rule, it is defined as a person incarcerated in or otherwise confined to a correctional institution. The addition of this definition is necessary to explain the privacy rights and protections of inmates in this regulation.

Law Enforcement Official

The proposed rule would have defined a "law enforcement official" as "an official of an agency or authority of the United States, a state, a territory, a political subdivision of a state or territory, or an Indian tribe, who is empowered by law to conduct: (1) An investigation or official proceeding inquiring into a violation of, or failure to comply with, any law; or (2) a criminal, civil, or administrative proceeding arising from a violation of, or failure to comply with, any law."

The final rule modifies this definition slightly. The definition in the final rule recognizes that law enforcement officials are empowered to prosecute cases as well as to conduct investigations and civil, criminal, or administrative proceedings. In addition, the definition in the final rule reflects the fact that when investigations begin, often it is not clear that law has been violated. Thus, the final rule describes law enforcement investigations and official proceedings as inquiring into a potential violation of law. In addition, it describes law enforcement-related civil, criminal, or administrative proceedings as arising from alleged violation of law.

Marketing

The proposed rule did not include a definition of "marketing." The proposed rule generally required that a covered entity would need an authorization from an individual to use or disclose protected health information for marketing.

In the final rule we define marketing as a communication about a product or service a purpose of which is to encourage recipients of the communication to purchase or use the product or service. The definition does not limit the type or means of communication that are considered marketing.

The definition of marketing contains three exceptions. If a covered entity receives direct or indirect remuneration from a third party for making a written communication otherwise described in an exception, then the communication is not excluded from the definition of marketing. The activities we except from the definition of marketing are encompassed by the definitions of treatment, payment, and health care operations. Covered entities may therefore use and disclose protected health information for these excepted activities without authorization under § 164.508 and pursuant to any applicable consent obtained under § 164.506.

The first exception applies to communications made by a covered entity for the purpose of describing the entities participating in a provider network or health plan network. It also applies to communications made by a covered entity for the purpose of describing if and the extent to which a product or service, or payment for a product or service, is provided by the covered entity or included in a benefit plan. This exception permits covered entities to use or disclose protected health information when discussing topics such as the benefits and services available under a health plan, the payment that may be made for a product or service, which providers offer a particular product or service, and whether a provider is part of a network or whether (and what amount of) payment will be provided with respect to the services of particular providers. This exception expresses our intent not to interfere with communications made to individuals about their health benefits.

The second exception applies to communications tailored to the circumstances of a particular individual, made by a health care provider to an individual as part of the treatment of the individual, and for the purpose of furthering the treatment of that individual. This exception leaves health care providers free to use or disclose protected health information as part of a discussion of its products and services, or the products and services of others, and to prescribe, recommend, or sell such products or services, as part of the treatment of an individual. This exception includes activities such as referrals, prescriptions, recommendations, and other communications that address how a product or service may relate to the individual's health. This exception expresses our intent not to interfere with communications made to individuals about their treatment.

The third exception applies to communications tailored to the ***82494** circumstances of a particular individual and made by a health care provider or health plan to an individual in the course of managing the treatment of that individual or for the purpose of directing or recommending to that individual alternative treatments, therapies, providers, or settings of care. As with the previous exception, this exception permits covered entities to discuss freely their products and services and the products and services of third parties, in the course of managing an individual's care or providing or discussing treatment alternatives with an individual, even when such activities involve the use or disclose protected health information.

Section 164.514 contains provisions governing use or disclosure of protected health information in marketing communications, including a description of certain marketing communications that may use or include protected health information but that may be made by a covered entity without individual authorization. The definition of health care operations includes those marketing communications that may be made without an authorization pursuant to § 164.514. Covered entities may therefore use and disclose protected health information for these activities pursuant to any applicable consent obtained under § 164.506, or, if they are not required to obtain a consent under § 164.506, without one.

Organized Health Care Arrangement

This term was not used in the proposed rule. We define the term in order to describe certain arrangements in which participants need to share protected health information about their patients to manage and benefit the common enterprise. To allow uses and disclosures of protected health information for these arrangements, we also add language to the definition of "health care operations." See discussion of that term above.

We include five arrangements within the definition of organized health care arrangement. The arrangements involve clinical or operational integration among legally separate covered entities in which it is often necessary to share protected health information for the joint management and operations of the arrangement. They may range in legal structure, but a key component of these arrangements is that individuals who obtain services from them have an expectation that these arrangements are integrated and that they jointly manage their operations. We include within the definition a clinically integrated care setting in which individuals typically receive health care from more than one health care provider. Perhaps the most common example of this type of organized health care arrangement is the hospital setting, where a hospital and a physician with staff privileges at the hospital together provide treatment to the individual. Participants in such clinically integrated settings need to be able to share health information freely not only for treatment purposes, but also to improve their joint operations. For example, any physician with staff privileges at a hospital must be able to participate in the hospital's morbidity and mortality reviews, even when the particular physician's patients are not being discussed. Nurses and other hospital personnel must also be able to participate. These activities benefit the common enterprise, even when the benefits to a particular participant are not evident. While protected health information may be freely shared among providers for treatment purposes under other provisions of this rule, some of these joint activities also support the health care operations of one or more participants in the joint arrangement. Thus, special rules are needed to ensure that this rule does not interfere with legitimate information sharing among the participants in these arrangements.

We also include within the definition an organized system of health care in which more than one covered entity participates, and in which the participating covered entities hold themselves out to the public as participating in a joint arrangement, and in which the joint activities of the participating covered entities include at least one of the following: utilization review, in which health care decisions by participating covered entities are reviewed by other participating covered entities or by a third party

on their behalf; quality assessment and improvement activities, in which treatment provided by participating covered entities is assessed by other participating covered entities or by a third party on their behalf; or payment activities, if the financial risk for delivering health care is shared in whole or in part by participating covered entities through the joint arrangement and if protected health information created or received by a covered entity is reviewed by other participating covered entities or by a third party on their behalf for the purpose of administering the sharing of financial risk. A common example of this type of organized health care arrangement is an independent practice association formed by a large number of physicians. They may advertise themselves as a common enterprise (e.g., Acme IPA), whether or not they are under common ownership or control, whether or not they practice together in an integrated clinical setting, and whether or not they share financial risk.

If such a group engages jointly in one or more of the listed activities, the participating covered entities will need to share protected health information to undertake such activities and to improve their joint operations. In this example, the physician participants in the IPA may share financial risk through common withhold pools with health plans or similar arrangements. The IPA participants who manage the financial arrangements need protected health information about all the participants' patients in order to manage the arrangement. (The participants may also hire a third party to manage their financial arrangements.) If the participants in the IPA engage in joint quality assurance or utilization review activities, they will need to share protected health information about their patients much as participants in an integrated clinical setting would. Many joint activities that require the sharing of protected health information benefit the common enterprise, even when the benefits to a particular participant are not evident.

We include three relationships related to group health plans as organized health care arrangements. First, we include a group health plan and an issuer or HMO with respect to the group health plan within the definition, but only with respect to the protected health information of the issuer or HMO that relates to individuals who are or have been participants or beneficiaries in the group health plan. We recognize that many group health plans are funded partially or fully through insurance, and that in some cases the group health plan and issuer or HMO need to coordinate operations to properly serve the enrollees. Second, we include a group health plan and one or more other group health plans each of which are maintained by the same plan sponsor. We recognize that in some instances plan sponsors provide health benefits through a combination of group health plans, and that they may need to coordinate the operations of such plans to better serve the participants and beneficiaries of the plans. Third, we include a combination of group health plans maintained by the same plan sponsor and the health insurance issuers and HMOs with respect to such plans, but again only with respect to the protected health information of such issuers and HMOs that relates to ***82495** individuals who are or have been enrolled in such group health plans. We recognize that is some instances a plan sponsor may provide benefits through more than one group health plan, and that such plans may fund the benefits through one or more issuers or HMOs. Again, coordinating health care operations among these entities may be necessary to serve the participants and beneficiaries in the group health plans. We note that the necessary coordination may necessarily involve the business associates of the covered entities and may involve the participation of the plan sponsor to the extent that it is providing plan administration functions and subject to the limits in § 164.504.

Payment

We proposed the term payment to mean:

(1) The activities undertaken by or on behalf of a covered entity that is:

(i) A health plan, or by a business partner on behalf of a health plan, to obtain premiums or to determine or fulfill its responsibility for coverage under the health plan and for provision of benefits under the health plan; or

(ii) A health care provider or health plan, or a business partner on behalf of such provider or plan, to obtain reimbursement for the provision of health care.

(2) Activities that constitute payment include:

(i) Determinations of coverage, adjudication or subrogation of health benefit claims;

(ii) Risk adjusting amounts due based on enrollee health status and demographic characteristics;

(iii) Billing, claims management, and medical data processing;

(iv) Review of health care services with respect to medical necessity, coverage under a health plan, appropriateness of care, or justification of charges; and

(v) Utilization review activities, including precertification and preauthorization of services.

In the final rule, we maintain the general approach of defining of payment: payment activities are described generally in the first clause of the definition, and specific examples are given in the second clause. Payment activities relate to the covered entity that maintains the protected health information (i.e., one covered entity may not disclose protected health information for the payment activities of a second covered entity). A covered entity may use or disclose only the protected health information about the individual to whom care was rendered, for its payment activities (e.g., a provider may disclose protected health information only about the patient to whom care was rendered in order to obtain payment for that care, or only the protected health information about persons enrolled in the particular health plan that seeks to audit the provider's records). We expand the proposed list to reflect many changes requested by commenters.

We add eligibility determinations as an activity included in the definition of payment. We expand coverage determinations to include the coordination of benefits and the determination of a specific individual's cost sharing amounts. The rule deletes activities related to the improvement of methods of paying or coverage policies from this definition and instead includes them in the definition of health care operations. We add to the definition “collection activities.” We replace “medical data processing” activities with health care data processing related to billing, claims management, and collection activities. We add activities for the purpose of obtaining payment under a contract for reinsurance (including stop-loss and excess of loss insurance). Utilization review activities now include concurrent and retrospective review of services.

In addition, we modify this definition to clarify that the activities described in section 1179 of the Act are included in the definition of “payment.” We add new subclause (vi) allowing covered entities to disclose to consumer reporting agencies an individual's name, address, date of birth, social security number and payment history, account number, as well as the name and address of the individual's health care provider and/or health plan, as appropriate. Covered entities may make disclosure of this protected health information to consumer reporting agencies for purposes related to collection of premiums or reimbursement. This allows reporting not just of missed payments and overdue debt but also of subsequent positive payment experience (e.g., to expunge the debt). We consider such positive payment experience to be “related to” collection of premiums or reimbursement.

The remaining activities described in section 1179 are included in other language in this definition. For example, “authorizing, processing, clearing, settling, billing, transferring, reconciling or collecting, a payment for, or related to, health plan premiums or health care” are covered by paragraph (2)(iii) of the definition, which allows use and disclosure of protected health information for “billing, claims management, collection activities and related health care data processing.” “Claims management” also includes auditing payments, investigating and resolving payment disputes and responding to customer inquiries regarding payments. Disclosure of protected health information for compliance with civil or criminal subpoenas, or with other applicable laws, are covered under § 164.512 of this regulation. (See discussion above regarding the interaction between 1179 and this regulation.)

We modify the proposed regulation text to clarify that payment includes activities undertaken to reimburse health care providers for treatment provided to individuals.

Covered entities may disclose protected health information for payment purposes to any other entity, regardless of whether it is a covered entity. For example, a health care provider may disclose protected health information to a financial institution in order to cash a check or to a health care clearinghouse to initiate electronic transactions. However, if a covered entity engages another entity, such as a billing service or a financial institution, to conduct payment activities on its behalf, the other entity may meet the definition of "business associate" under this rule. For example, an entity is acting as a business associate when it is operating the accounts receivable system on behalf of a health care provider.

Similarly, payment includes disclosure of protected health information by a health care provider to an insurer that is not a "health plan" as defined in this rule, to obtain payment. For example, protected health information may be disclosed to obtain reimbursement from a disability insurance carrier. We do not interpret the definition of "payment" to include activities that involve the disclosure of protected health information by a covered entity, including a covered health care provider, to a plan sponsor for the purpose of obtaining payment under a group health plan maintained by such plan sponsor, or for the purpose of obtaining payment from a health insurance issuer or HMO with respect to a group health plan maintained by such plan sponsor, unless the plan sponsor is performing plan administration pursuant to § 164.504(f).

The Transactions Rule adopts standards for electronic health care transactions, including two for processing payments. We adopted the ASC X12N 835 transaction standard for "Health Care Payment and Remittance ***82496** Advice" transactions between health plans and health care providers, and the ASC X12N 820 standard for "Health Plan Premium Payments" transactions between entities that arrange for the provision of health care or provide health care coverage payments and health plans. Under these two transactions, information to effect funds transfer is transmitted in a part of the transaction separable from the part containing any individually identifiable health information.

We note that a covered entity may conduct the electronic funds transfer portion of the two payment standard transactions with a financial institution without restriction, because it contains no protected health information. The protected health information contained in the electronic remittance advice or the premium payment enrollee data portions of the transactions is not necessary either to conduct the funds transfer or to forward the transactions. Therefore, a covered entity may not disclose the protected health information to a financial institution for these purposes. A covered entity may transmit the portions of the transactions containing protected health information through a financial institution if the protected health information is encrypted so it can be read only by the intended recipient. In such cases no protected health information is disclosed and the financial institution is acting solely as a conduit for the individually identifiable data.

Plan Sponsor

In the final rule we add a definition of "plan sponsor." We define plan sponsor by referencing the definition of the term provided in (3)(16)(B) of the Employee Retirement Income Security Act (ERISA). The plan sponsor is the employer or employee organization, or both, that establishes and maintains an employee benefit plan. In the case of a plan established by two or more employers, it is the association, committee, joint board of trustees, or other similar group or representative of the parties that establish and maintain the employee benefit plan. This term includes church health plans and government health plans. Group health plans may disclose protected health information to plan sponsors who conduct payment and health care operations activities on behalf of the group health plan if the requirements for group health plans in § 164.504 are met.

The preamble to the Transactions Rule noted that plan sponsors of group health plans are not covered entities and, therefore, are not required to use the standards established in that regulation to perform electronic transactions, including enrollment and disenrollment transactions. We do not change that policy through this rule. Plan sponsors that perform enrollment functions are doing so on behalf of the participants and beneficiaries of the group health plan and not on behalf of the group health plan itself. For purposes of this rule, plan sponsors are not subject to the requirements of § 164.504 regarding group health plans when conducting enrollment activities.

Protected Health Information

We proposed to define "protected health information" to mean individually identifiable health information that is or has been electronically maintained or electronically transmitted by a covered entity, as well as such information when it takes any other form. For purposes of this definition, we proposed to define "electronically transmitted" as including information exchanged with a computer using electronic media, such as the movement of information from one location to another by magnetic or optical media, transmissions over the Internet, Extranet, leased lines, dial-up lines, private networks, telephone voice response, and "faxback" systems. We proposed that this definition not include "paper-to-paper" faxes, or person-to-person telephone calls, video teleconferencing, or messages left on voice-mail.

Further, "electronically maintained" was proposed to mean information stored by a computer or on any electronic medium from which the information may be retrieved by a computer, such as electronic memory chips, magnetic tape, magnetic disk, or compact disc optical media.

The proposal's definition explicitly excluded:

(1) Individually identifiable health information that is part of an "education record" governed by the Family Educational Rights and Privacy Act (FERPA), 20 U.S.C. 1232g.

(2) Individually identifiable health information of inmates of correctional facilities and detainees in detention facilities.

In this final rule we expand the definition of protected health information to encompass all individually identifiable health information transmitted or maintained by a covered entity, regardless of form. Specifically, we delete the conditions for individually identifiable health information to be "electronically maintained" or "electronically transmitted" and the corresponding definitions of those terms. Instead, the final rule defines protected health information to be individually identifiable health information that is:

(1) Transmitted by electronic media;

(2) Maintained in any medium described in the definition of electronic media at § 162.103 of this subchapter; or

(3) Transmitted or maintained in any other form or medium.

We refer to electronic media, as defined in § 162.103, which means the mode of electronic transmission. It includes the Internet (wide-open), Extranet (using Internet technology to link a business with information only accessible to collaborating parties), leased lines, dial-up lines, private networks, and those transmissions that are physically moved from one location to another using magnetic tape, disk, or compact disk media.

The definition of protected health information is set out in this form to emphasize the severability of this provision. As discussed below, we believe we have ample legal authority to cover all individually identifiable health information transmitted or maintained by covered entities. We have structured the definition this way so that, if a court were to disagree with our view of our authority in this area, the rule would still be operational, albeit with respect to a more limited universe of information.

Other provisions of the rules below may also be severable, depending on their scope and operation. For example, if the rule itself provides a fallback, as it does with respect to the various discretionary uses and disclosures permitted under § 164.512, the provisions would be severable under case law.

The definition in the final rule retains the exception relating to individually identifiable health information in "education records" governed by FERPA. We also exclude the records described in 20 U.S.C. 1232g(a)(4)(B)(iv). These are records of students held by post-secondary educational institutions or of students 18 years of age or older, used exclusively for health care treatment and

which have not been disclosed to anyone other than a health care provider at the student's request. (See discussion of FERPA above.)

We have removed the exception for individually identifiable health information of inmates of correctional facilities and detainees in detention facilities. Individually identifiable health information about inmates is protected health information under the final rule, and special rules for use and disclosure of the protected health ***82497** information about inmates and their ability to exercise the rights granted in this rule are described below.

Psychotherapy Notes

Section 164.508(a)(3)(iv)(A) of the proposed rule defined psychotherapy notes as notes recorded (in any medium) by a health care provider who is a mental health professional documenting or analyzing the contents of conversation during a private counseling session or a group, joint, or family counseling session. The proposed definition excluded medication prescription and monitoring, counseling session start and stop times, the modalities and frequencies of treatment furnished, results of clinical tests, and any summary of the following items: Diagnosis, functional status, the treatment plan, symptoms, prognosis and progress. Furthermore, we stated in the preamble of the proposed rule that psychotherapy notes would have to be maintained separately from the medical record.

In this final rule, we retain the definition of psychotherapy notes that we had proposed, but add to the regulation text the requirement that, to meet the definition of psychotherapy notes, the information must be separated from the rest of the individual's medical record.

Public Health Authority

The proposed rule would have defined "public health authority" as "an agency or authority of the United States, a state, a territory, or an Indian tribe that is responsible for public health matters as part of its official mandate."

The final rule changes this definition slightly to clarify that a "public health authority" also includes a person or entity acting under a grant of authority from or contract with a public health agency. Therefore, the final rule defines this term as an agency or authority of the United States, a state, a territory, a political subdivision of a state or territory, or an Indian tribe, or a person or entity acting under a grant of authority from or contract with such public agency, including the employees or agents of such public agency or its contractors or persons or entities to whom it has granted authority, that is responsible for public health matters as part of its official mandate.

Required By Law

In the preamble to the NPRM, we did not include a definition of "required by law." We discussed what it meant for an action to be considered to be "required" or "mandated" by law and included several examples of activities that would be considered as required by law for the purposes of the proposed rule, including a valid Inspector General subpoena, grand jury subpoena, civil investigative demand, or a statute or regulation requiring production of information justifying a claim would constitute a disclosure required by law.

In the final rule we include a new definition, move the preamble clarifications to the regulatory text and add several items to the illustrative list. For purposes of this regulation, "required by law" means a mandate contained in law that compels a covered entity to make a use or disclosure of protected health information and that is enforceable in a court of law. Among the examples listed in definition are Medicare conditions of participation with respect to health care providers participating in that program, court-ordered warrants, and subpoenas issued by a court. We note that disclosures "required by law" include disclosures of protected health information required by this regulation in § 164.502(a)(2). It does not include contracts between private parties or similar voluntary arrangements. This list is illustrative only and is not intended in any way to limit the scope of this paragraph or other paragraphs in § 164.512 that permit uses or disclosures to the extent required by other laws. We note that nothing in this

rule compels a covered entity to make a use or disclosure required by the legal demands or prescriptions listed in this clarification or by any other law or legal process, and a covered entity remains free to challenge the validity of such laws and processes.

Research

We proposed to define "research" as it is defined in the Federal Policy for the Protection of Human Subjects, at 45 CFR part 46, subpart A (referred to elsewhere in this rule as "Common Rule"), and in addition, elaborated on the meaning of the term "generalizable knowledge." In § 164.504 of the proposed rule we defined research as "* * * a systematic investigation, including research development, testing and evaluation, designed to develop or contribute to generalizable knowledge. 'Generalizable knowledge' is knowledge related to health that can be applied to populations outside of the population served by the covered entity."

The final rule eliminates the further elaboration of "generalizable knowledge." Therefore, the rule defines "research" as the term is defined in the Common Rule: a systematic investigation, including research development, testing and evaluation, designed to develop or contribute to generalizable knowledge.

Research Information Unrelated to Treatment

We delete this definition and the associated requirements from the final rule. Refer to § 164.508(f) for new requirements regarding authorizations for research that includes treatment of the individual.

Treatment

The proposed rule defined "treatment" as the provision of health care by, or the coordination of health care (including health care management of the individual through risk assessment, case management, and disease management) among, health care providers; the referral of a patient from one provider to another; or the coordination of health care or other services among health care providers and third parties authorized by the health plan or the individual. The preamble noted that the definition was intended to relate only to services provided to an individual and not to an entire enrolled population.

In the final rule, we do not change the general approach to defining treatment: treatment means the listed activities undertaken by any health care provider, not just a covered health care provider. A plan can disclose protected health information to any health care provider to assist the provider's treatment activities; and a health care provider may use protected health information about an individual to treat another individual. A health care provider may use any protected health information it maintains for treatment purposes (e.g., a provider may use protected health information about former patients as well as current patients). We modify the proposed list of treatment activities to reflect changes requested by commenters.

Specifically, we modify the proposed definition of "treatment" to include the management of health care and related services. Under the definition, the provision, coordination, or management of health care or related services may be undertaken by one or more health care providers. "Treatment" includes coordination or management by a health care provider with a third party and consultation between health care providers. The term also includes referral by a health care provider of a patient to another health care provider.

Treatment refers to activities undertaken on behalf of a single patient, not a population. Activities are considered treatment only if delivered ***82498** by a health care provider or a health care provider working with another party. Activities of health plans are not considered to be treatment. Many services, such as a refill reminder communication or nursing assistance provided through a telephone service, are considered treatment activities if performed by or on behalf of a health care provider, such as a pharmacist, but are regarded as health care operations if done on behalf of a different type of entity, such as a health plan.

We delete specific reference to risk assessment, case management, and disease management. Activities often referred to as risk assessment, disease and case management are treatment activities only to the extent that they are services provided to a

particular patient by a health care provider; population based analyses or records review for the purposes of treatment protocol development or modification are health care operations, not treatment activities. If a covered entity is licensed as both a health plan and a health care provider, a single activity could be considered to be both treatment and health care operations; for compliance purposes we would consider the purpose of the activity. Given the integration of the health care system we believe that further classification of activities into either treatment or health care operations would not be helpful. See the definition of health care operations for additional discussion.

Use

We proposed to define "use" to mean the employment, application, utilization, examination, or analysis of information within an entity that holds the information. In the final rule, we clarify that use refers to the use of individually identifiable health information. We replace the term "holds" with the term "maintains." These changes are for clarity only, and are not intended to effect any substantive change.

Section 164.502—General Rules for Uses and Disclosures of Protected Health Information

Section 164.502(a)—Use and Disclosure for Treatment, Payment and Health Care Operations

As a general rule, we proposed in the NPRM to prohibit covered entities from using or disclosing protected health information except as authorized by the individual who is the subject of such information or as explicitly permitted by the rule. The proposed rule explicitly would have permitted covered entities to use or disclose an individual's protected health information without authorization for treatment, payment, and health care operations. The proposal would not have restricted to whom disclosures could be made for the purposes of treatment, payment, or operations. The proposal would have allowed disclosure of the protected health information of one individual for the treatment or payment of another, as appropriate. We also proposed to prohibit covered entities from seeking individual authorization for uses and disclosures for treatment, payment, and health care operations unless required by state or other applicable law.

We proposed two exceptions to this general rule which prohibited covered entities from using or disclosing research information unrelated to treatment or psychotherapy notes for treatment, payment, or health care operations purposes unless a specific authorization was obtained from the subject of the information. In addition, we proposed that a covered entity be prohibited from conditioning treatment, enrollment in a health plan or payment decisions on a requirement that the individual provide a specific authorization for the disclosure of these two types of information (see proposed § 164.508(a)(3)(iii)).

We also proposed to permit covered entities to use or disclose an individual's protected health information for specified public and public policy-related purposes, including public health, research, health oversight, law enforcement, and use by coroners. In addition, the proposal would have permitted covered entities to use and disclose protected health information when required to do so by other law or pursuant to an authorization from the individual allowing them to use or disclose the information for purposes other than treatment, payment or health care operations.

We proposed to require covered entities to disclose protected health information for only two purposes: to permit individuals to inspect and copy protected health information about themselves and for enforcement of the rule.

We proposed not to require covered entities to vary the level of protection accorded to protected health information based on the sensitivity of such information. In addition, we proposed to require that each affected entity assess its own needs and devise, implement, and maintain appropriate privacy policies, procedures, and documentation to address its business requirements.

In the final rule, the general standard remains that covered entities may use or disclose protected health information only as permitted or required by this rule. However, we make significant changes to the conditions under which uses and disclosures are permitted.

We revise the application of the general standard to require covered health care providers who have a direct treatment relationship with an individual to obtain a general "consent" from the individual in order to use or disclose protected health information about the individual for treatment, payment and health care operations (for details on who must obtain such consents and the requirements they must meet, see § 164.506). These consents are intended to accommodate both the covered provider's need to use or disclose protected health information for treatment, payment, and health care operations, and also the individual's interest in understanding and acquiescing to such uses and disclosures. In general, other covered entities are permitted to use and disclose protected health information to carry out treatment, payment, or health care operations (as defined in this rule) without obtaining such consent, as in the proposed rule. Covered entities must, as under the proposed rule, obtain the individual's "authorization" in order to use or disclose psychotherapy notes for most purposes: see § 164.508(a)(2) for exceptions to this rule. We delete the proposed special treatment of "research information unrelated to treatment."

We revise the application of the general standard to require all covered entities to obtain the individual's verbal "agreement" before using or disclosing protected health information for facility directories, to persons assisting in the individual's care, and for other purposes described in § 164.510. Unlike "consent" and "authorization," verbal agreement may be informal and implied from the circumstances (for details on who must obtain such agreements and the requirements they must meet, see § 164.510). Verbal agreements are intended to accommodate situations where it is neither appropriate to remove from the individual the ability to control the protected health information nor appropriate to require formal, written permission to share such information. For the most part, these provisions reflect current practices.

As under the proposed rule, we permit covered entities to use or disclose protected health information without the individual's consent, authorization or agreement for specified ***82499** public policy purposes, in compliance with the requirements in § 164.512.

We permit covered entities to disclose protected health information to the individual who is the subject of that information without any condition. We note that this may include disclosures to "personal representatives" of individuals as provided by § 164.502(g).

We permit a covered entity to use or disclose protected health information for other lawful purposes if the entity obtains a written "authorization" from the individual, consistent with the provisions of § 164.508. Unlike "consents," these "authorizations" are specific and detailed. (For details on who must obtain such authorizations and the requirements they must meet, see § 164.508.) They are intended to provide the individuals with concrete information about, and control over, the uses and disclosures of protected health information about themselves.

The final rule retains the provision that requires a covered entity to disclose protected health information only in two instances: When individuals request access to information about themselves, and when disclosures are compelled by the Secretary for compliance and enforcement purposes.

Finally, § 164.502(a)(1) also requires covered entities to use or disclose protected health information in compliance with the other provisions of § 164.502, for example, consistent with the minimum necessary standard, to create de-identified information, or to a personal representative of an individual. These provisions are described below.

We note that a covered entity may use or disclose protected health information as permitted by and in accordance with a provision of this rule, regardless of whether that use or disclosure fails to meet the requirements for use or disclosure under another provision of this rule.

Section 164.502(b)—Minimum Necessary Uses and Disclosures

The proposed rule required a covered entity to make all reasonable efforts not to use or disclose more than the minimum amount of protected health information necessary to accomplish the intended purpose of the use or disclosure (proposed § 164.506(b)). This final rule significantly modifies the proposed requirements for implementing the minimum necessary standard. In the

final rule, § 164.502(b) contains the basic standard and § 164.514 describes the requirements for implementing the standard. Therefore we discuss all aspects of the minimum necessary standard and specific requirements below in the discussion of § 164.514(d).

Section 164.502(c)—Uses and Disclosures Under a Restriction Agreement

The proposed rule would have required that covered health care providers permit individuals to request restrictions of uses and disclosures of protected health information and would have prohibited covered providers from using or disclosing protected health information in violation of any agreed-to restriction.

The final rule retains an individual's right to request restrictions on uses or disclosures for treatment, payment or health care operations and prohibits a covered entity from using or disclosing protected health information in a way that is inconsistent with an agreed upon restriction between the covered entity and the individual, but makes some changes to this right. Most significantly, under the final rule individuals have the right to request restrictions of all covered entities. This standard is set forth in § 164.522. Details about the changes to the standard are explained in the preamble discussion to § 164.522.

Section 164.502(d)—Creation of De-identified Information

In proposed § 164.506(d) of the NPRM, we proposed to permit use of protected health information for the purpose of creating de-identified information and we provided detailed mechanisms for doing so.

In § 164.502(d) of the final rule, we permit a covered entity to use protected health information to create de-identified information, whether or not the de-identified information is to be used by the covered entity. We clarify that de-identified information created in accordance with our procedures (which have been moved to § 164.514(a)) is not subject to the requirements of these privacy rules unless it is re-identified. Disclosure of a key or mechanism that could be used to re-identify such information is also defined to be disclosure of protected health information. See the preamble to § 164.514(a) for further discussion.

Section 164.502(e)—Business Associates

In the proposed rule, other than for purposes of consultation or referral for treatment, we would have allowed a covered entity to disclose protected health information to a business partner only pursuant to a written contract that would, among other specified provisions, limit the business partner's uses and disclosures of protected health information to those permitted by the contract, and would impose certain security, inspection and reporting requirements on the business partner. We proposed to define the term “business partner” to mean, with respect to a covered entity, a person to whom the covered entity discloses protected health information so that the person can carry out, assist with the performance of, or perform on behalf of, a function or activity for the covered entity.

In the final rule, we change the term “business partner” to “business associate” and in the definition clarify the full range of circumstances in which a person is acting as a business associate of a covered entity. (See definition of “business associate” in § 160.103.) These changes mean that § 164.502(e) requires a business associate contract (or other arrangement, as applicable) not only when the covered entity discloses protected health information to a business associate, but also when the business associate creates or receives protected health information on behalf of the covered entity.

In the final rule, we modify the proposed standard and implementation specifications for business associates in a number of significant ways. These modifications are explained in the preamble discussion of § 164.504(e).

Section 164.502(f)—Deceased Individuals

We proposed to extend privacy protections to the protected health information of a deceased individual for two years following the date of death. During the two-year time frame, we proposed in the definition of "individual" that the right to control the deceased individual's protected health information would be held by an executor or administrator, or other person (e.g., next of kin) authorized under applicable law to act on behalf of the decedent's estate. The only proposed exception to this standard allowed for uses and disclosures of a decedent's protected health information for research purposes without the authorization of a legal representative and without the Institutional Review Board (IRB) or privacy board approval required (in proposed § 164.510(j)) for most other uses and disclosures for research.

In the final rule (§ 164.502(f)), we modify the standard to extend protection of protected health information about deceased individuals for as long as the covered entity maintains the information. We retain the exception for uses and disclosures for research purposes, now part of § 164.512(i), but also require that the ***82500** covered entity take certain verification measures prior to release of the decedent's protected health information for such purposes (see §§ 164.514(h) and 164.512(i)(1)(iii)).

We remove from the definition of "individual" the provision related to deceased persons. Instead, we create a standard for "personal representatives" (§ 164.502(g), see discussion below) that requires a covered entity to treat a personal representative of an individual as the individual in certain circumstances, i.e., allows the representative to exercise the rights of the individual. With respect to deceased individuals, the final rule describes when a covered entity must allow a person who otherwise is permitted under applicable law to act with respect to the interest of the decedent or on behalf of the decedent's estate, to make decisions regarding the decedent's protected health information.

The final rule also adds a provision to § 164.512(g), that permits covered entities to disclose protected health information to a funeral director, consistent with applicable law, as necessary to carry out their duties with respect to the decedent. Such disclosures are permitted both after death and in reasonable anticipation of death.

Section 164.502(g)—Personal Representatives

In the proposed rule we defined "individual" to include certain persons who were authorized to act on behalf of the person who is the subject of the protected health information. For adults and emancipated minors, the NPRM provided that "individual" includes a legal representative to the extent to which applicable law permits such legal representative to exercise the individual's rights in such contexts. With respect to unemancipated minors, we proposed that the definition of "individual" include a parent, guardian, or person acting in loco parentis, (hereinafter referred to as "parent") except when an unemancipated minor obtained health care services without the consent of, or notification to, a parent. Under the proposed rule, if a minor obtained health care services under these conditions, the minor would have had the exclusive rights of an individual with respect to the protected health information related to such health care services.

In the final rule, the definition of "individual" is limited to the subject of the protected health information, which includes unemancipated minors and other individuals who may lack capacity to act on their own behalf. We remove from the definition of "individual" the provisions regarding legal representatives. The circumstances in which a representative must be treated as an individual for purposes of this rule are addressed in a separate standard titled "personal representatives." (§ 164.502(g)). The standard regarding personal representatives incorporates some changes to the proposed provisions regarding legal representatives. In general, under the final regulation, the "personal representatives" provisions are directed at the more formal representatives, while § 164.510(b) addresses situations in which persons are informally acting on behalf of an individual.

With respect to adults or emancipated minors, we clarify that a covered entity must treat a person as a personal representative of an individual if such person is, under applicable law, authorized to act on behalf of the individual in making decisions related to health care. This includes a court-appointed guardian and a person with a power of attorney, as set forth in the NPRM, but may also include other persons. The authority of a personal representative under this rule is limited: the representative must be treated as the individual only to the extent that protected health information is relevant to the matters on which the personal representative is authorized to represent the individual. For example, if a person's authority to make health care decisions for an individual is limited to decisions regarding treatment for cancer, such person is a personal representative and must be treated as

the individual with respect to protected health information related to the cancer treatment of the individual. Such a person is not the personal representative of the individual with respect to all protected health information about the individual, and therefore, a covered entity may not disclose protected health information that is not relevant to the cancer treatment to the person, unless otherwise permitted under the rule. We intend this provision to apply to persons empowered under state or other law to make health related decisions for an individual, whether or not the instrument or law granting such authority specifically addresses health information.

In addition, we clarify that with respect to an unemancipated minor, if under applicable law a parent may act on behalf of an unemancipated minor in making decisions related to health care, a covered entity must treat such person as a personal representative under this rule with respect to protected health information relevant to such personal representation, with three exceptions. Under the general rule, in most circumstances the minor would not have the capacity to act as the individual, and the parent would be able to exercise rights and authorities on behalf of the minor. Under the exceptions to the rule on personal representatives of unemancipated minors, the minor, and not the parent, would be treated as the individual and able to exercise the rights and authorities of an individual under the rule. These exceptions occur if: (1) The minor consents to a health care service; no other consent to such health care service is required by law, regardless of whether the consent of another person has also been obtained; and the minor has not requested that such person be treated as the personal representative; (2) the minor may lawfully obtain such health care service without the consent of a parent, and the minor, a court, or another person authorized by law consents to such health care service; or (3) a parent assents to an agreement of confidentiality between a covered health care provider and the minor with respect to such health care service. We note that the definition of health care includes services, but we use “health care service” in this provision to clarify that the scope of the rights of minors under this rule is limited to the protected health information related to a particular service.

Under this provision, we do not provide a minor with the authority to act under the rule unless the state has given them the ability to obtain health care without consent of a parent, or the parent has assented. In addition, we defer to state law where the state authorizes or prohibits disclosure of protected health information to a parent. See part 160, subpart B, Preemption of State Law. This rule does not affect parental notification laws that permit or require disclosure of protected health information to a parent. However, the rights of a minor under this rule are not otherwise affected by such notification.

In the final rule, the provision regarding personal representatives of deceased individuals has been changed to clarify the provision. The policy has not changed substantively from the NPRM.

Finally, we added a provision in the final rule to permit covered entities to elect not to treat a person as a personal representative in abusive situations. Under this provision, a covered entity need not treat a person as a personal representative of an individual if the covered entity, in the exercise of professional judgment, decides that it is ***82501** not in the best interest of the individual to treat the person as the individual's personal representative and the covered entity has a reasonable belief that the individual has been or may be subjected to domestic violence, abuse, or neglect by such person, or that treating such person as the personal representative could endanger the individual.

Section 164.502(g) requires a covered entity to treat a person that meets the requirements of a personal representative as the individual (with the exceptions described above). We note that disclosure of protected health information to a personal representative is mandatory under this rule only if disclosure to the individual is mandatory. Disclosure to the individual is mandatory only under §§ 164.524 and 164.528. Further, as noted above, the personal representative's rights are limited by the scope of its authority under other law. Thus, this provision does not constitute a general grant of authority to personal representatives.

We make disclosure to personal representatives mandatory to ensure that an individual's rights under §§ 164.524 and 164.528 are preserved even when individuals are incapacitated or otherwise unable to act for themselves to the same degree as other individuals. If the covered entity were to have the discretion to recognize a personal representative as the individual, there could be situations in which no one could invoke an individual's rights under these sections.

We continue to allow covered entities to use their discretion to disclose certain protected health information to family members, relatives, close friends, and other persons assisting in the care of an individual, in accordance with § 164.510(b). We recognize that many health care decisions take place on an informal basis, and we permit disclosures in certain circumstance to permit this practice to continue. Health care providers may continue to use their discretion to address these informal situations.

Section 164.502(h)—Confidential Communications

In the NPRM, we did not directly address the issue of whether an individual could request that a covered entity restrict the manner in which it communicated with the individual. The NPRM did provide individuals with the right to request that health care providers restrict uses and disclosures of protected health information for treatment, payment and health operations, but providers were not required to agree to such a restriction.

In the final rule, we require covered providers to accommodate reasonable requests by patients about how the covered provider communicates with the individual. For example, an individual who does not want his or her family members to know about a certain treatment may request that the provider communicate with the individual at his or her place of employment, or to send communications to a designated address. Covered providers must accommodate the request unless it is unreasonable. Similarly, the final rule permits individuals to request that health plans communicate with them by alternative means, and the health plan must accommodate such a request if it is reasonable and the individual states that disclosure of the information could endanger the individual. The specific provisions relating to confidential communications are in § 164.522.

Section 164.502(i)—Uses and Disclosures Consistent with Notice

We proposed to prohibit covered entities from using or disclosing protected health information in a manner inconsistent with their notice of information practices. We retain this provision in the final rule. See § 164.520 regarding notice content and distribution requirements.

Section 164.502(j)—Disclosures by Whistleblowers and Workforce Member Crime Victims

Disclosures by Whistleblowers

In § 164.518(c)(4) of the NPRM we addressed the issue of whistleblowers by proposing that a covered entity not be held in violation of this rule because a member of its workforce or a person associated with a business associate of the covered entity used or disclosed protected health information that such person believed was evidence of a civil or criminal violation, and any disclosure was: (1) Made to relevant oversight agencies or law enforcement or (2) made to an attorney to allow the attorney to determine whether a violation of criminal or civil law had occurred or to assess the remedies or actions at law that may be available to the person disclosing the information.

We included an extensive discussion on how whistleblower actions can further the public interest, including reference to the need in some circumstances to utilize protected health information for this purpose as well as reference to the qui tam provisions of the Federal False Claims Act.

In the final rule we retitle the provision and include it in § 164.502 to reflect the fact that these disclosures are not made by the covered entity and therefore this material does not belong in the section on safeguarding information against disclosure.

We retain the basic concept in the NPRM of providing protection to a covered entity for the good faith whistleblower action of a member of its workforce or a business associate. We clarify that a whistleblower disclosure by an employee, subcontractor, or other person associated with a business associate is considered a whistleblower disclosure of the business associate under this provision. However, in the final rule, we modify the scope of circumstances under which a covered entity is protected in whistleblower situations. A covered entity is not in violation of the requirements of this rule when a member of its workforce

or a business associate of the covered entity discloses protected health information to: (i) A health oversight agency or public health authority authorized by law to investigate or otherwise oversee the relevant conduct or conditions of the covered entity; (ii) an appropriate health care accreditation organization; or (iii) an attorney, for the purpose of determining his or her legal options with respect to whistleblowing. We delete disclosures to a law enforcement official.

We expand the scope of this section to cover disclosures of protected health information to an oversight or accreditation organization for the purpose of reporting breaches of professional standards or problems with quality of care. The covered entity will not be in violation of this rule, provided that the disclosing individual believes in good faith that the covered entity has engaged in conduct which is unlawful or otherwise violates professional or clinical standards, or that the care, services or conditions provided by the covered entity potentially endanger one or more patients, workers or the public. Since these provisions only relate to whistleblower actions in relation to the covered entity, disclosure of protected health information to expose malfeasant conduct by another person, such as knowledge gained during the course of treatment about an individual's illicit drug use, would not be protected activity.

We clarify that this section only applies to protection of a covered entity, based on the whistleblower action of a member of its workforce or business associates. Since the HIPAA legislation only applies to covered entities, not their workforces, it is beyond the scope of this rule to directly regulate the ***82502** whistleblower actions of members of a covered entity's workforce.

In the NPRM, we had proposed to require covered entities to apply sanctions to members of its workforce who improperly disclose protected health information. In this final rule, we retain this requirement in § 164.530(e)(1) but modify the proposed provision on sanctions to clarify that the sanctions required under this rule do not apply to workforce members of a covered entity for whistleblower disclosures.

Disclosures by Workforce Members Who Are Crime Victims

The proposed rule did not address disclosures by workforce members who are victims of a crime. In the final rule, we clarify that a covered entity is not in violation of the rule when a workforce member of a covered entity who is the victim of a crime discloses protected health information to law enforcement officials about the suspected perpetrator of the crime. We limit the amount of protected health information that may be disclosed to the limited information for identification and location described in § 164.512(f)(2).

We note that this provision is similar to the provision in § 164.512(f)(5), which permits a covered entity to disclose protected health information to law enforcement that the covered entity believes in good faith constitutes evidence of criminal conduct that occurred on the premises of the covered entity. This provision differs in that it permits the disclosure even if the crime occurred somewhere other than on the premises of the covered entity. For example, if a hospital employee is the victim of an attack outside of the hospital, but spots the perpetrator sometime later when the perpetrator seeks medical care at the hospital, the workforce member who was attacked may notify law enforcement of the perpetrator's location and other identifying information. We do not permit, however, the disclosure of protected health information other than that described in § 164.512(f)(2).

Section 164.504—Uses and Disclosures—Organizational Requirements—Component Entities, Affiliated Entities, Business Associates and Group Health Plans

Section 164.504(a)-(c)—Health Care Component (Component Entities)

In the preamble to the proposed rule we introduced the concept of a "component entity" to differentiate the health care unit of a larger organization from the larger organization. In the proposal we noted that some organizations that are primarily involved in non-health care activities do provide health care services or operate health plans or health care clearinghouses. Examples included a school with an on-site health clinic and an employer that self administers a sponsored health plan. In such cases, the proposal said that the health care component of the entity would be considered the covered entity, and any release of information from that component to another office or person in the organization would be a regulated disclosure. We would have required

such entities to create barriers to prevent protected health information from being used or disclosed for activities not authorized or permitted under the proposal.

We discuss group health plans and their relationships with plan sponsors below under "Requirements for Group Health Plans."

In the final rule we address the issue of differentiating health plan, covered health care provider and health care clearinghouse activities from other functions carried out by a single legal entity in paragraphs (a)-(c) of § 164.504. We have created a new term, "hybrid entity", to describe the situation where a health plan, health care provider, or health care clearinghouse is part of a larger legal entity; under the definition, a "hybrid entity" is "a single legal entity that is a covered entity and whose covered functions are not its primary functions." The term "covered functions" is discussed above under § 164.501. By "single legal entity" we mean a legal entity, such as a corporation or partnership, that cannot be further differentiated into units with their own legal identities. For example, for purposes of this rule a multinational corporation composed of multiple subsidiary companies would not be a single legal entity, but a small manufacturing firm and its health clinic, if not separately incorporated, could be a single legal entity.

The health care component rules are designed for the situation in which the health care functions of the legal entity are not its dominant mission. Because some part of the legal entity meets the definition of a health plan or other covered entity, the legal entity as a whole could be required to comply with the rules below. However, in such a situation, it makes sense not to require the entire entity to comply with the requirements of the rules below, when most of its activities may have little or nothing to do with the provision of health care; rather, as a practical matter, it makes sense for such an entity to focus its compliance efforts on the component that is actually performing the health care functions. On the other hand, where most of what the covered entity does consist of covered functions, it makes sense to require the entity as a whole to comply with the rules. The provisions at §§ 164.504(a)-(c) provide that for a hybrid entity, the rules apply only to the part of the entity that is the health care component. At the same time, the lack of corporate boundaries increases the risk that protected health information will be used in a manner that would not otherwise be permitted by these rules. Thus, we require that the covered entity erect firewalls to protect against the improper use or disclosure within or by the organization. See § 164.504(c)(2).

The term "primary functions" in the definition of "hybrid entity" is not meant to operate with mathematical precision. Rather, we intend that a more common sense evaluation take place: Is most of what the covered entity does related to its health care functions? If so, then the whole entity should be covered. Entities with different insurance lines, if not separately incorporated, present a particular issue with respect to this analysis. Because the definition of "health plan" excludes many types of insurance products (in the exclusion under paragraph (2)(i) of the definition), we would consider an entity that has one or more of these lines of insurance in addition to its health insurance lines to come within the definition of "hybrid entity," because the other lines of business constitute substantial parts of the total business operation and are required to be separate from the health plan(s) part of the business.

An issue that arises in the hybrid entity situation is what records are covered in the case of an office of the hybrid entity that performs support functions for both the health care component of the entity and for the rest of the entity. For example, this situation could arise in the context of a company with an onsite clinic (which we will assume is a covered health care provider), where the company's business office maintains both clinic records and the company's personnel records. Under the definition of the term "health care component," the business office is part of the health care component (in this hypothetical, the clinic) "to the extent that" it is performing covered functions on behalf of the clinic involving the use or disclosure of protected health information that it receives from, creates or maintains for the clinic. Part of the business office, therefore, is part of the ***82503** health care component, and part of the business office is outside the health care component. This means that the non-health care component part of the business office is not covered by the rules below. Under our hypothetical, then, the business office would not be required to handle its personnel records in accordance with the rules below. The hybrid entity would be required to establish firewalls with respect to these record systems, to ensure that the clinic records were handled in accordance with the rules.

With respect to excepted benefits, the rules below operate as follows. (Excepted benefits include accident, disability income, liability, workers' compensation and automobile medical payment insurance.) Excepted benefit programs are excluded from the health care component (or components) through the definition of "health plan." If a particular organizational unit performs both excepted benefits functions and covered functions, the activities associated with the excepted benefits program may not be part of the health care component. For example, an accountant who works for a covered entity with both a health plan and a life insurer would have his or her accounting functions performed for the health plan as part of the component, but not the life insurance accounting function. See § 164.504(c)(2)(iii). We require this segregation of excepted benefits because HIPAA does not cover such programs, policies and plans, and we do not permit any use or disclosure of protected health information for the purposes of operating or performing the functions of the excepted benefits without authorization from the individual, except as otherwise permitted in this rule.

In § 164.504(c)(2) we require covered entities with a health care component to establish safeguard policies and procedures to prevent any access to protected health information by its other organizational units that would not be otherwise permitted by this rule. We note that section 1173(d)(1)(B) of HIPAA requires policies and procedures to isolate the activities of a health care clearinghouse from a "larger organization" to prevent unauthorized access by the larger organization. This safeguard provision is consistent with the statutory requirement and extends to any covered entity that performs "non-covered entity functions" or operates or conducts functions of more than one type of covered entity.

Because, as noted, the covered entity in the hybrid entity situation is the legal entity itself, we state explicitly what is implicitly the case, that the covered entity (legal entity) remains responsible for compliance vis-a-vis subpart C of part 160. See § 164.504(c)(3)(i). We do this simply to make these responsibilities clear and to avoid confusion on this point. Also, in the hybrid entity situation the covered entity/legal entity has control over the entire workforce, not just the workforce of the health care component. Thus, the covered entity is in a position to implement policies and procedures to ensure that the part of its workforce that is doing mixed or non-covered functions does not impermissibly use or disclose protected health information. Its responsibility to do so is clarified in § 164.504(c)(3)(ii).

Section 164.504(d)—Affiliated Entities

Some legally distinct covered entities may share common administration of organizationally differentiated but similar activities (for example, a hospital chain). In § 164.504(d) we permit legally distinct covered entities that share common ownership or control to designate themselves, or their health care components, together to be a single covered entity. Common control exists if an entity has the power, directly or indirectly, significantly to influence or direct the actions or policies of another entity. Common ownership exists if an entity or entities possess an ownership or equity interest of 5 percent or more in another entity.

Such organizations may promulgate a single shared notice of information practices and a consent form. For example, a corporation with hospitals in twenty states may designate itself as a covered entity and, therefore, able to merge information for joint marketplace analyses. The requirements that apply to a covered entity also apply to an affiliated covered entity. For example, under the minimum necessary provisions, a hospital in one state could not share protected health information about a particular patient with another hospital if such a use is not necessary for treatment, payment or health care operations. The covered entities that together make up the affiliated covered entity are separately subject to liability under this rule. The safeguarding requirements for affiliated covered entities track the requirements that apply to health care components.

Section 164.504(e)—Business Associates

In the NPRM, we proposed to require a contract between a covered entity and a business associate, except for disclosures of protected health information by a covered entity that is a health care provider to another health care provider for the purposes of consultation or referral. A covered entity would have been in violation of this rule if the covered entity knew or reasonably should have known of a material breach of the contract by a business associate and it failed to take reasonable steps to cure the breach or terminate the contract. We proposed in the preamble that when a covered entity acted as a business associate

to another covered entity, the covered entity that was acting as business associate also would have been responsible for any violations of the regulation.

We also proposed that covered health care providers receiving protected health information for consultation or referral purposes would still have been subject to this rule, and could not have used or disclosed such protected health information for a purpose other than the purpose for which it was received (i.e., the consultation or referral). Further, we noted that providers making disclosures for consultations or referrals should be careful to inform the receiving provider of any special limitations or conditions to which the disclosing provider had agreed to impose (e.g., the disclosing provider had provided notice to its patients that it would not make disclosures for research).

We proposed that business associates would not have been permitted to use or disclose protected health information in ways that would not have been permitted of the covered entity itself under these rules, and covered entities would have been required to take reasonable steps to ensure that protected health information disclosed to a business associate remained protected.

In the NPRM (proposed § 164.506(e)(2)) we would have required that the contractual agreement between a covered entity and a business associate be in writing and contain provisions that would:

- Prohibit the business associate from further using or disclosing the protected health information for any purpose other than the purpose stated in the contract.

- Prohibit the business associate from further using or disclosing the protected health information in a manner that would violate the requirements of this proposed rule if it were done by the covered entity.

- Require the business associate to maintain safeguards as necessary to ensure that the protected health information is not used or disclosed except as provided by the contract.

- Require the business associate to report to the covered entity any use or disclosure of the protected health information of which the business ***82504** associate becomes aware that is not provided for in the contract.

- Require the business associate to ensure that any subcontractors or agents to whom it provides protected health information received from the covered entity will agree to the same restrictions and conditions that apply to the business associate with respect to such information.

- Require the business associate to provide access to non-duplicative protected health information to the subject of that information, in accordance with proposed § 164.514(a).

- Require the business associate to make available its internal practices, books and records relating to the use and disclosure of protected health information received from the covered entity to the Secretary for the purposes of enforcing the provisions of this rule.

- Require the business associate, at termination of the contract, to return or destroy all protected health information received from the covered entity that the business associate still maintains in any form to the covered entity and prohibit the business associate from retaining such protected health information in any form.

- Require the business associate to incorporate any amendments or corrections to protected health information when notified by the covered entity that the information is inaccurate or incomplete.

- State that individuals who are the subject of the protected health information disclosed are intended to be third party beneficiaries of the contract.

- Authorize the covered entity to terminate the contract, if the covered entity determines that the business associate has violated a material term of the contract.

We also stated in the preamble to the NPRM that the contract could have included any additional arrangements that did not violate the provisions of this regulation.

We explained in the preamble to the NPRM that a business associate (including business associates that are covered entities) that had contracts with more than one covered entity would have had no authority to combine, aggregate or otherwise use for a single purpose protected health information obtained from more than one covered entity unless doing so would have been a lawful use or disclosure for each of the covered entities that supplied the protected health information that is being combined, aggregated or used. In addition, the business associate would have had to have been authorized through the contract or arrangement with each covered entity that supplied the protected health information to combine or aggregate the information. A covered entity would not have been permitted to obtain protected health information through a business associate that it could not otherwise obtain itself.

In the final rule we retain the overall approach proposed: covered entities may disclose protected health information to persons that meet the rule's definition of business associate, or hire such persons to obtain or create protected health information for them, only if covered entities obtain specified satisfactory assurances from the business associate that it will appropriately handle the information; the regulation specifies the elements of such satisfactory assurances; covered entities have responsibilities when such specified satisfactory assurances are violated by the business associate. We retain the requirement that specified satisfactory assurances must be obtained if a covered entity's business associate is also a covered entity. We note that a master business associate contract or MOU that otherwise meets the requirements regarding specified satisfactory assurances meets the requirements with respect to all the signatories.

A covered entity may disclose protected health information to a business associate, consistent with the other requirements of the final rule, as necessary to permit the business associate to perform functions and activities for or on behalf of the covered entity, or to provide the services specified in the business associate definition to or for the covered entity. As discussed below, a business associate may only use the protected health information it receives in its capacity as a business associate to a covered entity as permitted by its contract or agreement with the covered entity.

We do not attempt to directly regulate business associates, but pursuant to our authority to regulate covered entities we place restrictions on the flow of information from covered entities to non-covered entities. We add a provision to clarify that a violation of a business associate agreement by a covered entity that is a business associate of another covered entity constitutes a violation of this rule.

In the final rule, we make significant changes to the requirements regarding business associates. As explained below in more detail: we make significant changes to the content of the required contractual satisfactory assurances; we include exceptions for arrangements that would otherwise meet the definition of business associate; we make special provisions for government agencies that by law cannot enter into contracts with one another or that operate under other legal requirements incompatible with some aspects of the required contractual satisfactory assurances; we provide a new mechanism for covered entities to hire a third party to aggregate data.

The final rule provides several exception to the business associate requirements, where a business associate relationship would otherwise exist. We substantially expand the exception for disclosure of protected health information for treatment. Rather than allowing disclosures without business associate assurances only for the purpose of consultation or referral, in the final rule we allow covered entities to make any disclosure of protected health information for treatment purposes to a health care provider without a business associate arrangement. This provision includes all activities that fall under the definition of treatment.

We do not require a business associate contract for a group health plan to make disclosures to the plan sponsor, to the extent that the health plan meets the applicable requirements of § 164.504(f).

We also include an exception for certain jointly administered government programs providing public benefits. Where a health plan that is a government program provides public benefits, such as SCHIP and Medicaid, and where eligibility for, or enrollment in, the health plan is determined by an agency other than the agency administering the health plan, or where the protected health information used to determine enrollment or eligibility in the health plan is collected by an agency other than the agency administering the health plan, and the joint activities are authorized by law, no business associate contract is required with respect to the collection and sharing of individually identifiable health information for the performance of the authorized functions by the health plan and the agency other than the agency administering the health plan. We note that the phrase "government programs providing public benefits" refers to programs offering benefits to specified members of the public and not to programs that offer benefits only to employees or retirees of government agencies.

We note that we do not consider a financial institution to be acting on behalf of a covered entity, and therefore no business associate contract is required, when it processes consumer-conducted financial transactions by debit, credit or other payment card, ***82505** clears checks, initiates or processes electronic funds transfers, or conducts any other activity that directly facilitates or effects the transfer of funds for compensation for health care. A typical consumer-conducted payment transaction is when a consumer pays for health care or health insurance premiums using a check or credit card. In these cases, the identity of the consumer is always included and some health information (e.g., diagnosis or procedure) may be implied through the name of the health care provider or health plan being paid. Covered entities that initiate such payment activities must meet the minimum necessary disclosure requirements described in the preamble to § 164.514.

In the final rule, we reduce the extent to which a covered entity must monitor the actions of its business associate and we make it easier for covered entities to identify the circumstances that will require them to take actions to correct a business associate's material violation of the contract, in the following ways. We delete the proposed language requiring covered entities to "take reasonable steps to ensure" that each business associate complies with the rule's requirements. Additionally, we now require covered entities to take reasonable steps to cure a breach or terminate the contract for business associate behaviors only if they know of a material violation by a business associate. In implementing this standard, we will view a covered entity that has substantial and credible evidence of a violation as knowing of such violation. While this standard relieves the covered entity of the need to actively monitor its business associates, a covered entity nonetheless is expected to investigate when they receive complaints or other information that contain substantial and credible evidence of violations by a business associate, and it must act upon any knowledge of such violation that it possesses. We note that a whistleblowing disclosure by a business associate of a covered entity that meets the requirements of § 164.502(j)(1) does not put the covered entity in violation of this rule, and the covered entity has no duty to correct or cure, or to terminate the relationship.

We also qualify the requirement for terminating contracts with non-compliant business associates. The final rule still requires that the business associate contract authorize the covered entity to terminate the contract, if the covered entity determines that the business associate has violated a material term of the contract, and it requires the covered entity to terminate the contract if steps to cure such a material breach fail. The rule now stipulates, however, that if the covered entity is unable to cure a material breach of the business associate's obligation under the contract, it is expected to terminate the contract, when feasible. This qualification has been added to accommodate circumstances where terminating the contract would be unreasonably burdensome on the covered entity, such as when there are no viable alternatives to continuing a contract with that particular business associate. It does not mean, for instance, that the covered entity can choose to continue the contract with a non-compliant business associate merely because it is more convenient or less costly than contracts with other potential business associates. We also require that if a covered entity determines that it is not feasible to terminate a non-compliant business associate, the covered entity must notify the Secretary.

We retain all of the requirements for a business associate contract that were listed in proposed § 164.506(e)(2), with some modifications. See § 164.504(e)(2).

We retain the requirement that the business associate contract must provide that the business associate will not use or further disclose the information other than as permitted or required by the contract or as required by law. We do not mean by this requirement that the business associate contract must specify each and every use and disclosure of protected health information permitted to the business associate. Rather, the contract must state the purposes for which the business associate may use and disclose protected health information, and must indicate generally the reasons and types of persons to whom the business associate may make further disclosures. For example, attorneys often need to provide information to potential witnesses, opposing counsel, and others in the course of their representation of a client. The business associate contract pursuant to which protected health information is provided to its attorney may include a general statement permitting the attorney to disclose protected health information to these types of people, within the scope of its representation of the covered entity.

We retain the requirement that a business associate contract may not authorize a business associate to use or further disclose protected health information in a manner that would violate the requirements of this subpart if done by the covered entity, but we add two exceptions. First, we permit a covered entity to authorize a business associate to use and disclose protected health information it receives in its capacity as a business associate for its proper management and administration and to carry out its legal responsibilities. The contract must limit further disclosures of the protected health information for these purposes to those that are required by law and to those for which the business associate obtains reasonable assurances that the protected health information will be held confidentially and that it will be notified by the person to whom it discloses the protected health information of any breaches of confidentiality.

Second, we permit a covered entity to authorize the business associate to provide data aggregation services to the covered entity. As discussed above in § 164.501, data aggregation, with respect to protected health information received by a business associate in its capacity as the business associate of a covered entity, is the combining of such protected health information by the business associate with protected health information received by the business associate in its capacity as a business associate of another covered entity, to permit the creation of data for analyses that relate to the health care operations of the respective covered entities. We added this service to the business associate definition to clarify the ability of covered entities to contract with business associates to undertake quality assurance and comparative analyses that involve the protected health information of more than one contracting covered entity. We except data aggregation from the general requirement that a business associate contract may not authorize a business associate to use or further disclose protected health information in a manner that would violate the requirements of this subpart if done by the covered entity in order to permit the combining or aggregation of protected health information received in its capacity as a business associate of different covered entities when it is performing this service. In many cases, the combining of this information for the respective health care operations of the covered entities is not something that the covered entities could do—a covered entity cannot generally disclose protected health information to another covered entity for the disclosing covered entity's health care operations. However, we permit covered entities that enter into business associate contracts with a business associate for data aggregation to permit the business associate to combine or aggregate the protected health information they ***82506** disclose to the business associate for their respective health care operations.

We note that there may be other instances in which a business associate may combine or aggregate protected health information received in its capacity as a business associate of different covered entities, such as when it is performing health care operations on behalf of covered entities that participate in an organized health care arrangement. A business associate that is performing payment functions on behalf of different covered entities also may combine protected health information when it is necessary, such as when the covered entities share financial risk or otherwise jointly bill for services.

In the final rule we clarify that the business associate contract must require the business associate to make available protected health information for amendment and to incorporate such amendments. The business associate contract must also require the business associate to make available the information required to provide an accounting of disclosures. We provide more flexibility to the requirement that all protected health information be returned by the business associate upon termination of the contract. The rule now stipulates that if feasible, the protected health information should be destroyed or returned at the end of a contract. Accordingly, a contract with a business associate must state that if there are reasons that the return or destruction of the

information is not feasible and the information must be retained for specific reasons and uses, such as for future audits, privacy protections must continue after the contract ends, for as long as the business associate retains the information. The contract also must state that the uses of information after termination of the contract must be limited to the specific set of uses or disclosures that make it necessary for the business associate to retain the information.

We also remove the requirement that business associate contracts contain a provision stating that individuals whose protected health information is disclosed under the contract are intended third-party beneficiaries of the contract. Third party beneficiary or similar responsibilities may arise under these business associate arrangements by operation of state law; we do not intend in this rule to affect the operation of such state laws.

We modify the requirement that a business associate contract require the business associate to ensure that agents abide by the provisions of the business associate contract. We clarify that agents includes subcontractors, and we note that a business associate contract must make the business associate responsible for ensuring that any person to whom it delegates a function, activity or service which is within its business associate contract with the covered entity agrees to abide by the restrictions and conditions that apply to the business associate under the contract. We note that a business associate will need to consider the purpose for which protected health information is being disclosed in determining whether the recipient must be bound to the restrictions and conditions of the business associate contract. When the disclosure is a delegation of a function, activity or service that the business associate has agreed to perform for a covered entity, the recipient who undertakes such a function steps into the shoes of the business associate and must be bound to the restrictions and conditions. When the disclosure is to a third party who is not performing business associate functions, activities or services for on behalf of the covered entity, but is the type of disclosure that the covered entity itself could make without giving rise to a business associate relationship, the business associate is not required to ensure that the restrictions or conditions of the business associate contract are maintained.

For example, if a business associate acts as the billing agent of a health care provider, and discloses protected health information on behalf of the hospital to health plans, the business associate has no responsibility with respect to further uses or disclosures by the health plan. In the example above, where a covered entity has a business associate contract with a lawyer, and the lawyer discloses protected health information to an expert witness in preparation for litigation, the lawyer again would have no responsibility under this subpart with respect to uses or disclosures by the expert witness, because such witness is not undertaking the functions, activities or services that the business associate lawyer has agreed to perform. However, if a covered entity contracts with a third party administrator to provide claims management, and the administrator delegates management of the pharmacy benefits to a third party, the business associate third party administrator must ensure that the pharmacy manager abides by the restrictions and conditions in the business associate contract between the covered entity and the third party administrator.

We provide in § 164.504(c)(3) several methods other than a business associate contract that will satisfy the requirement for satisfactory assurances under this section. First, when a government agency is a business associate of another government agency that is a covered entity, we permit memorandum of understanding between the agencies to constitute satisfactory assurance for the purposes of this rule, if the memorandum accomplishes each of the objectives of the business associate contract. We recognize that the relationships of government agencies are often organized as a matter of law, and that it is not always feasible for one agency to contract with another for all of the purposes provided for in this section. We also recognize that it may be incorrect to view one government agency as “acting on behalf of” the other government agency; under law, each agency may be acting to fulfill a statutory mission. We note that in some instances, it may not be possible for the agencies to include the right to terminate the arrangement because the relationship may be established under law. In such instances, the covered entity government agency would need to fulfill the requirement to report known violations of the memorandum to the Secretary.

Where the covered entity is a government agency, we consider the satisfactory assurances requirement to be satisfied if other law contains requirements applicable to the business associate that accomplish each of the objectives of the business associate contract. We recognize that in some cases, covered entities that are government agencies may be able to impose the requirements of this section directly on the persons acting as their business associates. We also recognize that often one government agency is acting as a business associate of another government agency, and either party may have the legal authority to establish

the requirements of this section by regulation. We believe that imposing these requirements directly on business associates provides greater protection than we can otherwise provide under this section, and so we recognize such other laws as sufficient to substitute for a business associate contract.

We also recognize that there may be some circumstances where the relationship between covered entities and business associates is otherwise mandated by law. In the final rule, we provide that where a business associate is required by law to act as a business associate to a covered entity, the covered entity may disclose protected health information to the business associate to the extent necessary to comply with the legal mandate without ***82507** meeting the requirement to have a business associate contract (or, in the case of government agencies, a memorandum of understanding or law pertaining to the business associate) if it makes a good faith attempt the obtain satisfactory assurances required by this section and, if unable to do so, documents the attempt and the reasons that such assurances cannot be obtained. This provision addresses situations where law requires one party to act as the business associate of another party. The fact that the parties have contractual obligations that may be enforceable is not sufficient to meet the required by law test in this provision.

This provision recognizes that in some instances the law requires that a government agency act as a business associate of a covered entity. For example, the United States Department of Justice is required by law to defend tort suits brought against certain covered entities; in such circumstances, however, the United States, and not the individual covered entity, is the client and is potentially liable. In such situations, covered entities must be able to disclose protected health information needed to carry out the representation, but the particular requirements that would otherwise apply to a business associate relationship may not be possible to obtain. Subsection (iii) makes clear that, where the relationship is required by law, the covered entity complies with the rule if it attempts, in good faith, to obtain satisfactory assurances as are required by this paragraph and, if such attempt fails, documents the attempts and the reasons that such assurances cannot be obtained.

The operation of the final rule maintains the construction discussed in the preamble to the NPRM that a business associate (including a business associate that is a covered entity) that has business associate contracts with more than one covered entity generally may not use or disclose the protected health information that it creates or receives in its capacity as a business associate of one covered entity for the purposes of carrying out its responsibilities as a business associate of another covered entity, unless doing so would be a lawful use or disclosure for each of the covered entities and the business associate's contract with each of the covered entities permits the business associate to undertake the activity. For example, a business associate performing a function under health care operations on behalf of an organized health care arrangement would be permitted to combine or aggregate the protected health information obtained from covered entities participating in the arrangement to the extent necessary to carry out the authorized activity and in conformance with its business associate contracts. As described above, a business associate providing data aggregation services to different covered entities also could combine and use the protected health information of the covered entities to assist with their respective health care operations. A covered entity that is undertaking payment activities on behalf of different covered entities also may use or disclose protected health information obtained as a business associate of one covered entity when undertaking such activities as a business associate of another covered entity where the covered entities have authorized the activities and where they are necessary to secure payment for the entities. For example, when a group of providers share financial risk and contract with a business associate to conduct payment activities on their behalf, the business associate may use the protected health information received from the covered entities to assist them in managing their shared risk arrangement.

Finally, we note that the requirements imposed by this provision are intended to extend privacy protection to situations in which a covered entity discloses substantial amounts of protected health information to other persons so that those persons can perform functions or activities on its behalf or deliver specified services to it. A business associate contract basically requires the business associate to maintain the confidentiality of the protected health information that it receives and generally to use and disclose such information for the purposes for which it was provided. This requirement does not interfere with the relationship between a covered entity and business associate, or require the business associate to subordinate its professional judgment to that of a covered entity. Covered entities may rely on the professional judgment of their business associates as to the type and amount of protected health information that is necessary to carry out a permitted activity. The requirements of this provision

are aimed at securing the continued confidentiality of protected health information disclosed to third parties that are serving the covered entity's interests.

Section 164.504(f)—Group Health Plans

Covered entities under HIPAA include health care clearinghouses, health care providers and health plans. Specifically included in the definition of "health plan" are group health plans (as defined in section 2791(a) of the Public Health Service Act) with 50 or more participants or those of any size that are administered by an entity other than the employer who established and maintains the plan. These group health plans may be fully insured or self-insured. Neither employers nor other group health plan sponsors are defined as covered entities. However, employers and other plan sponsors—particularly those sponsors with self-insured group health plans—may perform certain functions that are integrally related to or similar to the functions of group health plans and, in carrying out these functions, often require access to individual health information held by the group health plan.

Most group health plans are also regulated under the Employee Retirement Income Security Act of 1974 (ERISA). Under ERISA, a group health plan must be a separate legal entity from its plan sponsor. ERISA-covered group health plans usually do not have a corporate presence, in other words, they may not have their own employees and sometimes do not have their own assets (i.e., they may be fully insured or the benefits may be funded through the general assets of the plan sponsor, rather than through a trust). Often, the only tangible evidence of the existence of a group health plan is the contractual agreement that describes the rights and responsibilities of covered participants, including the benefits that are offered and the eligible recipients.

ERISA requires the group health plan to identify a "named fiduciary," a person responsible for ensuring that the plan is operated and administered properly and with ultimate legal responsibility for the plan. If the plan documents under which the group health plan was established and is maintained permit, the named fiduciary may delegate certain responsibilities to trustees and may hire advisors to assist it in carrying out its functions. While generally the named fiduciary is an individual, it may be another entity. The plan sponsor or employees of the plan sponsor are often the named fiduciaries. These structural and operational relationships present a problem in our ability to protect health information from being used inappropriately in employment-related decisions. On the one hand, the group health plan, and any health insurance issuer or HMO providing health insurance or health coverage to the group health plan, are covered entities under the regulation and may only disclose protected health information as authorized under the ***82508** regulation or with individual consent. On the other hand, plan sponsors may need access to protected health information to carry out administration functions on behalf of the plan, but under circumstances in which securing individual consent is impractical. We note that we sometimes refer in the rule and preamble to health insurance issuers and HMOs that provide health insurance or health coverage to a group health plan as health insurance issuers or HMOs with respect to a group health plan.

The proposed rule used the health care component approach for employers and other plan sponsors. Under this approach, only the component of an employer or other plan sponsor would be treated as a covered entity. The component of the plan sponsor would have been able to use protected health information for treatment, payment, and health care operations, but not for other purposes, such as discipline, hiring and firing, placement and promotions. We have modified the final rule in a number of ways.

In the final rule, we recognize plan sponsors' legitimate need for health information in certain situations while, at the same time, protecting health information from being used for employment-related functions or for other functions related to other employee benefit plans or other benefits provided by the plan sponsor. We do not attempt to directly regulate employers or other plan sponsors, but pursuant to our authority to regulate health plans, we place restrictions on the flow of information from covered entities to non-covered entities.

The final rule permits group health plans, and allows them to authorize health insurance issuers or HMOs with respect to the group health plan, to disclose protected health information to plan sponsors if the plan sponsors voluntarily agree to use and disclose the information only as permitted or required by the regulation. The information may be used only for plan administration functions performed on behalf of the group health plan which are specified in plan documents. The group health

plan is not required to have a business associate contract with the plan sponsor to disclose the protected health information or allow the plan sponsor to create protected health information on its behalf, if the conditions of § 164.504(e) are met.

In order for the group health plan to disclose protected health information to a plan sponsor, the plan documents under which the plan was established and is maintained must be amended to: (1) Describe the permitted uses and disclosures of protected health information; (2) specify that disclosure is permitted only upon receipt of a certification from the plan sponsor that the plan documents have been amended and the plan sponsor has agreed to certain conditions regarding the use and disclosure of protected health information; and (3) provide adequate firewalls to: identify the employees or classes of employees who will have access to protected health information; restrict access solely to the employees identified and only for the functions performed on behalf of the group health plan; and provide a mechanism for resolving issues of noncompliance.

Any employee of the plan sponsor who receives protected health information for payment, health care operations or other matters related to the group health plan must be identified in the plan documents either by name or function. We assume that since individuals employed by the plan sponsor may change frequently, the group health plan would likely describe such individuals in a general manner. Any disclosure to employees or classes of employees not identified in the plan documents is not a permissible disclosure. To the extent a group health plan does have its own employees separate from the plan sponsor's employees, as the workforce of a covered entity (i.e. the group health plan), they also are bound by the permitted uses and disclosures of this rule.

The certification that must be given to the group health plan must state that the plan sponsor agrees to: (1) Not use or further disclose protected health information other than as permitted or required by the plan documents or as required by law; (2) ensure that any subcontractors or agents to whom the plan sponsor provides protected health information agree to the same restrictions; (3) not use or disclose the protected health information for employment-related actions; (4) report to the group health plan any use or disclosure that is inconsistent with the plan documents or this regulation; (5) make the protected health information accessible to individuals; (6) allow individuals to amend their information; (7) provide an accounting of its disclosures; (8) make its practices available to the Secretary for determining compliance; (9) return and destroy all protected health information when no longer needed, if feasible; and (10) ensure that the firewalls have been established.

We have included this certification requirement in part, as a way to reduce the burden on health insurance issuers and HMOs. Without a certification, health insurance issuers and HMOs would need to review the plan documents in order to ensure that the amendments have been made before they could disclose protected health information to plan sponsors. The certification, however, is a simple statement that the amendments have been made and that the plan sponsor has agreed to certain restrictions on the use and disclosure of protected health information. The receipt of the certification therefore, is sufficient basis for the health insurance issuer or HMO to disclose protected health information to the plan sponsor.

Many activities included in the definitions of health care operations and payment are commonly referred to as plan administration functions in the ERISA group health plan context. For purposes of this rule, plan administration activities are limited to activities that would meet the definition of payment or health care operations, but do not include functions to modify, amend, or terminate the plan or solicit bids from prospective issuers. Plan administration functions include quality assurance, claims processing, auditing, monitoring, and management of carve-out plans—such as vision and dental. Under the final rule, “plan administration” does not include any employment-related functions or functions in connection with any other benefits or benefit plans, and group health plans may not disclose information for such purposes absent an authorization from the individual. For purposes of this rule, enrollment functions performed by the plan sponsor on behalf of its employees are not considered plan administration functions.

Plan sponsors have access to protected health information only to the extent group health plans have access to protected health information and plan sponsors are permitted to use or disclose protected health information only as would be permitted by group health plans. That is, a group health plan may permit a plan sponsor to have access to or to use protected health information only for purposes allowed by the regulation.

As explained above, where a group health plan purchases insurance or coverage from a health insurance issuer or HMO, the provision of insurance or coverage by the health insurance issuer or HMO to the group health plan does not make the health insurance issuer or HMO a business associate. In such case, the activities of the health insurance issuer or HMO are on their own behalf and not on the behalf of the group ***82509** health plan. We note that where a group health plan contracts with a health insurance issuer or HMO to perform functions or activities or to provide services that are in addition to or not directly related to the provision of insurance, the health insurance issuer or HMO may be a business associate with respect to those additional functions, activities, or services. In addition, group health plans that provide health benefits only through an insurance contract and do not create, maintain, or receive protected health information (except for summary information described below or information that merely states whether an individual is enrolled in or has been disenrolled from the plan) do not have to meet the notice requirements of § 164.520 or the administrative requirements of § 164.530, except for the documentation requirement in § 164.530(j), because these requirements are satisfied by the issuer or HMO that is providing benefits under the group health plan. A group health plan, however, may not permit a health insurance issuer or HMO to disclose protected health information to a plan sponsor unless the notice required in 164.520 indicate such disclosure may occur.

The final rule also permits a health plan that is providing insurance to a group health plan to provide summary information to the plan sponsor to permit the plan sponsor to solicit premium bids from other health plans or for the purpose of modifying, amending, or terminating the plan. The rule provides that summary information is information that summarizes claims history, claims expenses, or types of claims experienced by individuals for whom the plan sponsor has provided health benefits under a group health plan, provided that specified identifiers are not included. Summary information may be disclosed under this provision even if it does not meet the definition of de-identified information. As part of the notice requirements in § 164.520, health plans must inform individuals that they may disclose protected health information to plan sponsors. The provision to allow summaries of claims experience to be disclosed to plan sponsors that purchase insurance will allow them to shop for replacement coverage, and get meaningful bids from prospective issuers. It also permits a plan sponsor to get summary information as part of its consideration of whether or not to change the benefits that are offered or employees or whether or not to terminate a group health plan.

We note that a plan sponsor may perform enrollment functions on behalf of its employees without meeting the conditions above and without using the standard transactions described in the Transactions Rule.

Section 164.504(g)—Multiple Covered Function Entities

Although not addressed in the proposed rule, this final rule also recognizes that a covered entity may as a single legal entity, affiliated entity, or other arrangement combine the functions or operations of health care providers, health plans and health care clearinghouses (for example, integrated health plans and health care delivery systems may function as both health plans and health care providers). The rule permits such covered entities to use or disclose the protected health information of its patients or members for all covered entity functions, consistent with the other requirements of this rule. The health care component must meet the requirements of this rule that apply to a particular type of covered entity when it is functioning as that entity; e.g., when a health care component is operating as a health care provider it must meet the requirements of this rule applicable to a health care provider. However, such covered entities may not use or disclose the protected health information of an individual who is not involved in a particular covered entity function for that function, and such information must be segregated from any joint information systems. For example, an HMO may integrate data about health plan members and clinic services to members, but a health care system may not share information about a patient in its hospital with its health plan if the patient is not a member of the health plan.

Section 164.506—Uses and Disclosures for Treatment, Payment, and Health Care Operations

Introduction: "Consent" versus "Authorization"

In the proposed rule, we used the term "authorization" to describe the individual's written permission for a covered entity to use and disclose protected health information, regardless of the purpose of the use or disclosure. Authorization would have been required for all uses and disclosures that were not otherwise permitted or required under the NPRM.

We proposed to permit covered entities, subject to limited exceptions for psychotherapy notes and research information unrelated to treatment, to use and disclose protected health information to carry out treatment, payment, and health care operations without authorization. See proposed § 164.506(a)(1).

We also proposed to prohibit covered entities from requiring individuals to sign authorizations for uses and disclosures of protected health information for treatment, payment, and health care operations, unless required by other applicable law. See proposed § 164.508(a)(iv). We instead proposed requiring covered entities to produce a notice describing their information practices, including practices with respect to uses and disclosures to carry out treatment, payment, and health care operations.

In the final rule, we retain the requirement for covered entities to obtain the individual's written permission (an "authorization") for uses and disclosures of protected health information that are not otherwise permitted or required under the rule. However, under the final rule, we add a second type of written permission for use or disclosure of protected health information: a "consent" for uses and disclosures to carry out treatment, payment, and health care operations. In the final rule, we permit, and in some cases require, covered entities to obtain the individual's written permission for the covered entity to use or disclose protected health information other than psychotherapy notes to carry out treatment, payment, and health care operations. We refer to this written permission as a "consent."

The "consent" and the "authorization" do not overlap. The requirement to obtain a "consent" applies in different circumstances than the requirement to obtain an authorization. In content, a consent and an authorization differ substantially from one another.

As described in detail below, a "consent" allows use and disclosure of protected health information only for treatment, payment, and health care operations. It is written in general terms and refers the individual to the covered entity's notice for further information about the covered entity's privacy practices. It allows use and disclosure of protected health information by the covered entity seeking the consent, not by other persons. Most persons who obtain a consent will be health care providers; health plans and health care clearinghouses may also seek a consent. The consent requirements appear in § 164.506 and are described in this section of the preamble.

With a few exceptions, an "authorization" allows use and disclosure of protected health information for purposes other than treatment, payment, and health care ***82510** operations. In order to make uses and disclosures that are not covered by the consent requirements and not otherwise permitted or required under the final rule, covered entities must obtain the individual's "authorization." An "authorization" must be written in specific terms. It may allow use and disclosure of protected health information by the covered entity seeking the authorization, or by a third party. In some instances, a covered entity may not refuse to treat or cover individuals based on the fact that they refuse to sign an authorization. See § 164.508 and the corresponding preamble discussion regarding authorization requirements.

Section 164.506(a)—Consent Requirements

We make significant changes in the final rule with respect to uses and disclosures of protected health information to carry out treatment, payment, and health care operations. We do not prohibit covered entities from seeking an individual's written permission for use or disclosure of protected health information to carry out treatment, payment, or health care operations.

Except as described below, we instead require covered health care providers to obtain the individual's consent prior to using or disclosing protected health information to carry out treatment, payment, or health care operations. If the covered provider does not obtain the individual's consent, the provider is prohibited from using or disclosing protected health information about the individual for purposes of treating the individual, obtaining payment for health care delivered to the individual, or for the provider's health care operations. See § 164.506(a)(1).

We except two types of health care providers from this consent requirement. First, covered health care providers that have an indirect treatment relationship with an individual are not required to obtain the individual's consent prior to using or disclosing protected health information about the individual to carry out treatment, payment, and health care operations. An "indirect treatment relationship" is defined in § 164.501 and described in the corresponding preamble. These providers may use and disclose protected health information as otherwise permitted under the rule and consistent with their notice of privacy practices (see § 164.520 regarding notice requirements and § 164.502(i) regarding requirements to adhere to the notice). For example, a covered provider that provides consultation services to another provider without seeing the patient would have an indirect treatment relationship with that patient and would not be required to obtain the patient's consent to use protected health information about the patient for the consultation. These covered providers are, however, permitted to obtain consent, as described below.

Second, covered health care providers that create or receive protected health information in the course of providing health care to inmates of a correctional institution are not required to obtain the inmate's consent prior to using or disclosing protected health information about the inmate to carry out treatment, payment, and health care operations. See § 164.501 and the corresponding preamble discussion regarding the definitions of "correctional institution" and "inmate." These providers may use and disclose protected health information as otherwise permitted under the rule. These providers are permitted, however, to obtain consent, as described below.

In addition, we permit covered health care providers to use and disclose protected health information, without consent, to carry out treatment, payment, and health care operations, if the protected health information was created or received in certain treatment situations. In the treatment situations described in § 164.506(a)(3) and immediately below, the covered health care provider must attempt to obtain the individual's consent. If the covered provider is unable to obtain consent, but documents the attempt and the reason consent was not obtained, the covered provider may, without consent, use and disclose the protected health information resulting from the treatment as otherwise permitted under the rule. All other protected health information about that individual that the covered health care provider creates or receives, however, is subject to the consent requirements.

This exception to the consent requirement applies to protected health information created or received in any of three treatment situations. First, the exception applies to protected health information created or received in emergency treatment situations. In these situations, covered providers must attempt to obtain the consent as soon as reasonably practicable after the delivery of the emergency treatment. Second, the exception applies to protected health information created or received in situations where the covered health care provider is required by law to treat the individual (for example, certain publicly funded providers) and the covered health care provider attempts to obtain such consent. Third, the exception applies to protected health information created or received in treatment situations where there are substantial barriers to communicating with the individual and, in the exercise of professional judgment, the covered provider clearly infers from the circumstances the individual's consent to receive treatment. For example, there may be situations in which a mentally incapacitated individual seeks treatment from a health care provider but is unable to provide informed consent to undergo such treatment and does not have a personal representative available to provide such consent on the individual's behalf. If the covered provider, in her professional judgment, believes she can legally provide treatment to that individual, we also permit the provider to use and disclose protected health information resulting from the treatment without the individual's consent. We intend covered health care providers that legally provide treatment without the individual's consent to that treatment to be able to use and disclose protected health information resulting from that treatment to carry out treatment, payment, or health care operations without obtaining the individual's consent for such use or disclosure. We do not intend to impose unreasonable barriers to individuals' ability to receive, and health care providers' ability to provide, health care.

Under § 164.506(a)(4), covered health care providers that have an indirect treatment relationship with an individual, as well as health plans and health care clearinghouses, may elect to seek consent for their own uses and disclosures to carry out treatment, payment, and health care operations. If such a covered entity seeks consent for these purposes, the consent must meet the minimum requirements described below.

If a covered health care provider with an indirect treatment relationship, a health plan, or a health care clearinghouse does not seek consent, the covered entity may use or disclose protected health information to carry out treatment, payment, and health care operations as otherwise permitted under the rule and consistent with its notice of privacy practices (see § 164.520 regarding notice requirements and § 164.502(i) regarding requirements to adhere to the notice).

If a covered health care provider with an indirect treatment relationship, a health plan, or a health care clearinghouse does ask an individual to sign a consent, and the individual does not do so, the covered entity is ***82511** prohibited under § 164.502(a)(1) from using or disclosing protected health information for the purpose(s) included in the consent. A covered entity that seeks a consent must adhere to the individual's decision.

In § 164.506(a)(5), we specify that a consent obtained by one covered entity is not effective to permit another covered entity to use or disclose protected health information, unless the consent is a joint consent. See § 164.506(f) and the corresponding preamble discussion below regarding joint consents. A consent provides the individual's permission only for the covered entity that obtains the consent to use or disclose protected health information for treatment, payment, and health care operations. A consent under this section does not operate to authorize another covered entity to use or disclose protected health information, except where the other covered entity is operating as a business associate. We note that, where a covered entity is acting as a business associate of another covered entity, the business associate covered entity is acting for or on behalf of the principal covered entity, and its actions for or on behalf of the principal covered entity are authorized by the consent obtained by the principal covered entity. Thus, under this section, a health plan can obtain a consent that permits the health plan and its business associates to use and disclose protected health information that the health plan and its business associates create or receive. That consent cannot, however, permit another covered entity (that is not a business associate) to disclose protected health information to the health plan or to any other person.

If a covered entity wants to obtain the individual's permission for another covered entity to disclose protected health information to it for treatment, payment, or health care operations purposes, it must seek an authorization in accordance with § 164.508(e). For example, when a covered provider asks the individual for written permission to obtain the individual's medical record from another provider for treatment purposes, it must do so with an authorization, not a consent. Since the permission is for disclosure of protected health information by another person, a consent may not be used.

Section 164.506(b)—Consent General Requirements

In the final rule, we permit a covered health care provider to condition the provision of treatment on the receipt of the individual's consent for the covered provider to use and disclose protected health information to carry out treatment, payment, and health care operations. Covered providers may refuse to treat individuals who do not consent to uses and disclosures for these purposes. See § 164.506(b)(1). We note that there are exceptions to the consent requirements for covered health care providers that are required by law to treat individuals. See § 164.506(a)(3), described above.

Similarly, in the final rule, we permit health plans to condition an individual's enrollment in the health plan on the receipt of the individual's consent for the health plan to use and disclose protected health information to carry out treatment, payment, and health care operations, if the consent is sought in conjunction with the enrollment process. If the health plan seeks the individual's consent outside of the enrollment process, the health plan may not condition any services on obtaining such consent.

Under § 164.520, covered entities must produce a notice of privacy practices. A consent may not be combined in a single document with the notice of privacy practices. See § 164.506(b)(3).

Under § 164.506(b)(4), consents for uses and disclosures of protected health information to carry out treatment, payment, and health care operations may be combined in a single document covering all three types of activities and may be combined with other types of legal permission from the individual. For example, a consent to use or disclose protected health information under this rule may be combined with an informed consent to receive treatment, a consent to assign payment of benefits to a provider,

or narrowly tailored consents required under state law for the use or disclosure of specific types of protected health information (e.g., state laws requiring specific consent for any sharing of information related to HIV/AIDS).

Within a single consent document, the consent for use and disclosure of protected health information required or permitted under this rule must be visually and organizationally separate from the other consents or authorizations and must be separately signed by the individual and dated.

Where research includes treatment of the individual, a consent under this rule may be combined with the authorization for the use or disclosure of protected health information created for the research, in accordance with § 164.508(f). (This is the only case in which an authorization under § 164.508 of this rule may be combined with a consent under § 164.506 of this rule. See § 164.508(b)(3).) The covered entity that is creating protected health information for the research may elect to combine the consent required under this section with the research-related authorization required under § 164.508(f). For example, a covered health care provider that provides health care to an individual for research purposes and for non-research purposes must obtain a consent under this section for all of the protected health information it maintains. In addition, it must obtain an authorization in accordance with § 164.508(f) which describes how it will use and disclose the protected health information it creates for the research for purposes of treatment, payment, and health care operations. Section 164.506(b)(4) permits the covered entity to satisfy these two requirements with a single document. See § 164.508(f) and the corresponding preamble discussion for a more detailed description of research authorization requirements.

Under § 164.506(b)(5), individuals may revoke a consent in writing at any time, except to the extent that the covered entity has taken action in reliance on the consent. Upon receipt of the written revocation, the covered entity must stop processing the information for use or disclosure, except to the extent that it has taken action in reliance on the consent. A covered health care provider may refuse, under this rule, to continue to treat an individual that revokes his or her consent. A health plan may disenroll an individual that revokes a consent that was sought in conjunction with the individual's enrollment in the health plan.

Covered entities must document and retain any signed consent as required by § 164.530(j).

Section 164.506(c)—Consent Content Requirements

Under § 164.506(c), the consent must be written in plain language. See the preamble discussion regarding notice of privacy practices for a description of plain language requirements. We do not provide a model consent in this rule. We will provide further guidance on drafting consent documents prior to the compliance date.

Under § 164.506(c)(1), the consent must inform the individual that protected health information may be used and disclosed by the covered entity to carry out treatment, payment, or health care operations. The covered entity must determine which of these elements (use and/or disclosure; treatment, payment, and/or health care operations) to include in the consent ***82512** document, as appropriate for the covered entity's practices.

For covered health care providers that are required to obtain consent, the requirement applies only to the extent the covered provider uses or discloses protected health information. For example, if all of a covered provider's health care operations are conducted by members of the covered provider's own workforce, the covered provider may choose to obtain consent only for uses, not disclosures, of protected health information to carry out health care operations. If an individual pays out of pocket for all services received from the covered provider and the provider will not disclose any information about the patient to a third party payor, the provider may choose not to obtain the individual's consent to disclose information for payment purposes. In order for a covered provider to be able to use and disclose information for all three purposes, however, all three purposes must be included in the consent.

Under §§ 164.506(c)(2) and (3), the consent must refer the individual to the covered entity's notice for additional information about the uses and disclosures of information described in the consent. The consent must also indicate that the individual has the right to review the notice prior to signing the consent. If the covered entity has reserved the right to change its privacy

practices in accordance with § 164.520(b)(1)(v)(C), the consent must indicate that the terms of the notice may change and must describe how the individual may obtain a revised notice. See § 164.520 and the corresponding preamble discussion regarding notice requirements.

Under § 164.506(c)(4), the consent must inform individuals that they have the right to request restrictions on uses and disclosures of protected health information for treatment, payment, and health care operations purposes. It must also state that the covered entity is not required to agree to an individual's request, but that if the covered entity does agree to the request, the restriction is binding on the covered entity. See § 164.522(a) regarding the right to request restrictions.

Under § 164.506(c)(5), the consent must indicate that the individual has the right to revoke the consent in writing, except to the extent that the covered entity has taken action in reliance on the consent.

Under § 164.506(c)(6), the consent must include the individual's signature and the date of signature. Once we adopt the standards for electronic signature, another of the required administrative simplification standards we are required to adopt under HIPAA, an electronic signature that meets those standards will be sufficient under this rule. We do not require any verification of the individual's identity or authentication of the individual's signature. We expect covered health care providers that are required to obtain consent to employ the same level of scrutiny to these signatures as they do to the signature obtained on a document regarding the individual's consent to undergo treatment by the provider.

Section 164.506(d)—Defective Consents

Under § 164.506(d), there is no "consent" within the meaning of the rule if the completed document lacks a required element or if the individual has revoked the consent in accordance with § 164.506(b)(5).

Section 164.506(e)—Resolving Conflicting Consents and Authorizations

Situations may arise where a covered entity that has obtained the individual's consent for the covered entity to use or disclose protected health information to carry out treatment, payment, or health care operations is asked to disclose protected health information pursuant to another written legal permission from the individual, such as an authorization, that was obtained by another person. Under § 164.506(e), when the terms of a covered entity's consent conflict with the terms of another written legal permission from the individual to use or disclose protected health information (such as a consent obtained under state law by another covered entity or an authorization), the covered entity must adhere to the more restrictive document. By conflict, we mean that the consent and authorization contain inconsistencies. In implementing this section, we note that the consent under this section references the notice provided to the individual and the individual's right to request restrictions. In determining whether the covered entity's consent conflicts with another written legal permission provided by the individual, the covered entity must consider any limitations on its uses or disclosures resulting from the notice provided to the individual or from restrictions to which it has agreed. For example, a covered nursing home may elect to ask the patient to sign an authorization for the patient's covered primary care physician to forward the patient's medical records to the nursing home. The physician may have previously obtained the individual's consent for disclosure for treatment purposes. If the authorization obtained by the nursing home grants permission for the physician to disclose particular types of information, such as genetic information, but the consent obtained by the physician excludes such information or the physician has agreed to a restriction on that type of information, the physician may not disclose that information. The physician must adhere to the more restrictive written legal permission from the individual.

When a conflict between a consent and another written legal permission from the individual exists, as described above, the covered entity may attempt to resolve the conflict with the individual by either obtaining a new consent from the individual or by having a discussion or otherwise communicating with the individual to determine the individual's preference regarding the use or disclosure. If the individual's preference is communicated orally, the covered entity must document the individual's preference and act in accordance with that preference. In the example described above, the primary care physician could ask the patient to sign a new consent that would permit the disclosure of the genetic information. Alternatively, the physician could ask

the patient whether the patient intended for the genetic information to be disclosed to the nursing home. If the patient confirms that he or she intended for the genetic information to be shared, the physician can document that fact (e.g., by making a notation in the medical record) and disclose the information to the nursing home.

We believe covered entities will rarely be faced with conflicts between consents and other written legal permission from the individual for uses and disclosures to carry out treatment, payment, and health care operations. Under § 164.506(a)(5), we specify that a consent only permits the covered entity that obtains the consent to use or disclose protected health information. A consent obtained by one covered entity is not effective to permit another different covered entity to use or disclose protected health information. Conflicting consents obtained by covered entities, therefore, are not possible. We expect authorizations that permit another covered entity to use and disclose protected health information for treatment, payment, and health care operations purposes will rarely be necessary, because we expect covered entities that maintain protected health information to obtain consents that permit them to make anticipated uses and disclosures for these purposes. Nevertheless, covered entities are permitted under § 164.508(e) to obtain ***82513** authorization for another covered entity to use or disclose protected health information to carry out treatment, payment, and health care operations. We recognize these authorizations may be useful to demonstrate an individual's intent and relationship to the intended recipient of the information. For example, these authorizations may be useful in situations where a health plan wants to obtain information from one provider in order to determine payment of a claim for services provided by a different provider (e.g., information from a primary care physician that is necessary to determine payment of services provided by a specialist) or where an individual's new physician wants to obtain the individual's medical records from prior physicians. Other persons not covered by this rule may also seek authorizations and state law may require written permission for specific types of information, such as information related to HIV/AIDS or to mental health. Because an individual may sign conflicting documents over time, we clarify that the covered entity maintaining the protected health information to be used or disclosed must adhere to the more restrictive permission the individual has granted, unless the covered entity resolves the conflict with the individual.

Section 164.506(f)—Joint Consents

Covered entities that participate in an organized health care arrangement and that develop a joint notice under § 164.520(d) may develop a joint consent in which the individual consents to the uses and disclosures of protected health information by each of the covered entities in the arrangement to carry out treatment, payment, and/or health care operations. The joint consent must identify with reasonable specificity the covered entities, or class of covered entities, to which the joint consent applies and must otherwise meet the consent requirements. If an individual revokes a joint consent, the covered entity that receives the revocation must inform the other entities covered by the joint consent of the revocation as soon as practicable.

If any one of the covered entities included in the joint consent obtains the individual's consent, as required above, the consent requirement is met for all of the other covered entities to which the consent applies. For example, a covered hospital and the clinical laboratory and emergency departments with which it participates in an organized health care arrangement may produce a joint notice and obtain a joint consent. If the covered hospital obtains the individual's joint consent upon admission, and some time later the individual is readmitted through the associated emergency department, the emergency department's consent requirement will already have been met. These joint consents are the only type of consent by which one covered entity can obtain the individual's permission for another covered entity to use or disclose protected health information to carry out treatment, payment, or health care operations.

Effect of Consent

These consents, as well as the authorizations described in § 164.508, should not be construed to waive, directly or indirectly, any privilege granted under federal, state, or local law or procedure. Consents obtained under this regulation are not appropriate for the disposition of more technical and legal proceedings and may not comport with procedures and standards of federal, state, or local judicial practice. For example, state courts and other decision-making bodies may choose to examine more closely the circumstances and propriety of such consent and may adopt more protective standards for application in their proceedings. In the judicial setting, as in the legislative and executive settings, states may provide for greater protection of privacy. Additionally,

both the Congress and the Secretary have established a general approach to protecting from explicit preemption state laws that are more protective of privacy than the protections set forth in this regulation.

Section 164.508—Uses and Disclosures for Which an Authorization Is Required

Section 164.508(a)—Standard

We proposed to require covered entities to obtain the individual's authorization for all uses and disclosures of protected health information not otherwise permitted or required under the proposed rule. Uses and disclosures that would have been permitted without individual authorization included uses and disclosures for national priority purposes such as public health, law enforcement, and research (see proposed § 164.510) and uses and disclosures of protected health information, other than psychotherapy notes and research information unrelated to treatment, for purposes of treatment, payment, and health care operations (see proposed § 164.506). We also proposed to require covered entities to disclose protected health information to the individual for inspection and copying (see proposed § 164.514) and to the Secretary as required for enforcement of the rule (see proposed § 164.522). Individual authorization would not have been required for these uses and disclosures.

We proposed to require covered entities to obtain the individual's authorization for all other uses and disclosures of protected health information. Under proposed § 164.508(a), uses and disclosures that would have required individual authorization included, but were not limited to, the following:

- Use for marketing of health and non-health items and services by the covered entity;

- Disclosure by sale, rental, or barter;

- Use and disclosure to non-health related divisions of the covered entity, e.g., for use in marketing life or casualty insurance or banking services;

- Disclosure, prior to an individual's enrollment in a health plan, to the health plan or health care provider for making eligibility or enrollment determinations relating to the individual or for underwriting or risk rating determinations;

- Disclosure to an employer for use in employment determinations; and

- Use or disclosure for fundraising.

In the preamble to the proposed rule, we stated that covered entities would be bound by the terms of authorizations. Uses or disclosures by the covered entity for purposes inconsistent with the statements made in the authorization would have constituted a violation of the rule.

In the final rule, under § 164.508(a), as in the proposed rule, covered entities must have authorization from individuals before using or disclosing protected health information for any purpose not otherwise permitted or required by this rule. Specifically, except for psychotherapy notes (see below), covered entities are not required to obtain the individual's authorization to use or disclose protected health information to carry out treatment, payment, and health care operations. (Covered entities may, however, be required to obtain the individual's consent for these uses and disclosures. See the preamble regarding § 164.506 for a discussion of "consent" versus "authorization".) We also do not require covered entities to obtain the individual's authorization for uses and disclosures of protected health information permitted under §§ 164.510 or 164.512, for disclosures to the individual, or for required disclosures to the Secretary under subpart C of part 160 of this subchapter for enforcement of this rule.

In the final rule, we clarify that covered entities are bound by the ***82514** statements provided on the authorization; use or disclosure by the covered entity for purposes inconsistent with the statements made in the authorization constitutes a violation of this rule.

Unlike the proposed rule, we do not include in the regulation examples of the types of uses and disclosures that require individual authorization. We eliminated two examples from the proposed list due to potential confusion as to our intent: disclosure by sale, rental, or barter and use and disclosure to non-health related divisions of the covered entity. We recognize that covered entities sometimes make these types of uses and disclosures for purposes that are permitted under the rule without authorization. For example, a covered health care provider may sell its accounts receivable to a collection agency for payment purposes and a health plan may disclose protected health information to its life insurance component for payment purposes. We do not intend to require authorization for uses and disclosures made by sale, rental, or barter or for disclosures made to non-health related divisions of the covered entity, if those uses or disclosures could otherwise be made without authorization under this rule. As with any other use or disclosure, however, uses and disclosures of protected health information for these purposes do require authorization if they are not otherwise permitted under the rule.

We also eliminated the remaining proposed examples from the final rule due to concern that these examples might be misinterpreted as an exhaustive list of all of the uses and disclosures that require individual authorization. We discuss the examples here, however, to clarify the interaction of the authorization requirements and the provisions of the rule that permit uses and disclosures without authorization and/or with consent. Uses and disclosures for which covered entities must have the individual's authorization include, but are not limited to, the following activities.

Marketing

As in the proposed rule, covered entities must obtain the individual's authorization before using or disclosing protected health information for marketing purposes. In the final rule, we add a new definition of marketing (see § 164.501). For more detail on what activities constitute marketing, see § 164.501, definition of "marketing," and § 164.514(e).

Pre-Enrollment Underwriting

As in the proposed rule, covered entities must obtain the individual's authorization to use or disclose protected health information for the purpose of making eligibility or enrollment determinations relating to an individual or for underwriting or risk rating determinations, prior to the individual's enrollment in a health plan (that is, for purposes of pre-enrollment underwriting). For example, if an individual applies for new coverage with a health plan in the non-group market and the health plan wants to review protected health information from the individual's covered health care providers before extending an offer of coverage, the individual first must authorize the covered providers to share the information with the health plan. If the individual applies for renewal of existing coverage, however, the health plan would not need to obtain an authorization to review its existing claims records about that individual, because this activity would come within the definition of health care operations and be permissible. We also note that under § 164.504(f), a group health plan and a health insurance issuer that provides benefits with respect to a group health plan are permitted in certain circumstances to disclose summary health information to the plan sponsor for the purpose of obtaining premium bids. Because these disclosures fall within the definition of health care operations, they do not require authorization.

Employment Determinations

As in the proposed rule, covered entities must obtain the individual's authorization to use or disclose protected health information for employment determinations. For example, a covered health care provider must obtain the individual's authorization to disclose the results of a pre-employment physical to the individual's employer. The final rule provides that a covered entity may condition the provision of health care that is solely for the purpose of creating protected health information for disclosure to a third party on the provision of authorization for the disclosure of the information to the third party.

Fundraising

Under the proposed regulation, we would have required authorization before a covered entity could have used or disclosed protected health information for fundraising. In the final rule, we narrow the circumstances under which covered entities must obtain the individual's authorization to use or disclose protected health information for fundraising purposes. As provided in § 164.514(f) and described in detail in the corresponding preamble, authorization is not required when a covered entity uses or discloses demographic information and information about the dates of health care provided to an individual for the purpose of raising funds for its own benefit, nor when it discloses such information to an institutionally related foundation to raise funds for the covered entity.

Any use or disclosure for fundraising purposes that does not meet the requirements of § 164.514(f) and does not fall within the definition of health care operations (see § 164.501), requires authorization. Specifically, covered entities must obtain the individual's authorization to use or disclose protected health information to raise funds for any entity other than the covered entity. For example, a covered entity must have the individual's authorization to use protected health information about the individual to solicit funds for a non-profit organization that engages in research, education, and awareness efforts about a particular disease.

Psychotherapy Notes

In the NPRM, we proposed different rules with respect to psychotherapy notes than we proposed with respect to all other protected health information. The proposed rule would have required covered entities to obtain an authorization for any use or disclosure of psychotherapy notes to carry out treatment, payment, or health care operations, unless the use was by the person who created the psychotherapy notes. With respect to all other protected health information, we proposed to prohibit covered entities from requiring authorization for uses and disclosures for these purposes.

We significantly revise our approach to psychotherapy notes in the final rule. With a few exceptions, covered entities must obtain the individual's authorization to use or disclose psychotherapy notes to carry out treatment, payment, or health care operations. A covered entity must obtain the individual's consent, but not an authorization, for the person who created the psychotherapy notes to use the notes to carry out treatment and for the covered entity to use or disclose psychotherapy notes for conducting training programs in which students, trainees, or practitioners in mental health learn under supervision to ***82515** practice or improve their skills in group, joint, family, or individual counseling. A covered entity may also use psychotherapy notes to defend a legal action or other proceeding brought by the individual pursuant to a consent, without a specific authorization. We note that, while this provision allows disclosure of these records to the covered entity's attorney to defend against the action or proceeding, disclosure to others in the course of a judicial or administrative proceeding is governed by § 164.512(e). This special provision is necessary because disclosure of protected health information for purposes of legal representatives may be made under the general consent as part of "health care operations." Because we require an authorization for disclosure of psychotherapy notes for "health care operations," an exception is needed to allow covered entities to use protected health information about an individual to defend themselves against an action threatened or brought by that individual without asking that individual for authorization to do so. Otherwise, a consent under § 164.506 is not sufficient for the use or disclosure of psychotherapy notes to carry out treatment, payment, or health care operations. Authorization is required. We anticipate these authorizations will rarely be necessary, since psychotherapy notes do not include information that covered entities typically need for treatment, payment, or other types of health care operations.

In the NPRM, we proposed to permit covered entities to use and disclose psychotherapy notes for all other purposes permitted or required under the rule without authorization. In the final rule, we specify a more limited set of uses and disclosures of psychotherapy notes that covered entities are permitted to make without authorization. An authorization is not required for use or disclosure of psychotherapy notes when required for enforcement purposes, in accordance with subpart C of part 160 of this subchapter; when mandated by law, in accordance with § 164.512(a); when needed for oversight of the health care provider who created the psychotherapy notes, in accordance with § 164.512(d); when needed by a coroner or medical examiner, in accordance with § 164.512(g)(1); or when needed to avert a serious and imminent threat to health or safety, in accordance with § 164.512(j)(1)(i). We also provide transition provisions in § 164.532 regarding the effect of express legal permission obtained from an individual prior to the compliance date of this rule.

Section 164.508(b)—Implementation Specifications for Authorizations

Valid and Defective Authorizations

We proposed to require a minimum set of elements for authorizations requested by the individual and an additional set of elements for authorizations requested by a covered entity. We would have permitted covered entities to use and disclose protected health information pursuant to authorizations containing the applicable required elements. We would have prohibited covered entities from acting on an authorization if the submitted document had any of the following defects:

- The expiration date had passed;

- The form had not been filled out completely;

- The covered entity knew the authorization had been revoked;

- The completed form lacked a required element; or

- The covered entity knew the information on the form was false.

In § 164.508(b)(1) of the final rule, we specify that an authorization containing the applicable required elements (as described below) is a valid authorization. We clarify that a valid authorization may contain additional, non-required elements, provided that these elements are not inconsistent with the required elements. Covered entities are not required to use or disclose protected health information pursuant to a valid authorization. Our intent is to clarify that a covered entity that uses or discloses protected health information pursuant to an authorization meeting the applicable requirements will be in compliance with this rule.

We retain the provision prohibiting covered entities from acting on an authorization if the submitted document had any of the listed defects, with a few changes. First, in § 164.508(c)(1)(iv) we specify that an authorization may expire upon a certain event or on a specific date. For example, a valid authorization may state that it expires upon acceptance or rejection of an application for insurance or upon the termination of employment (for example, in an authorization for disclosure of protected health information for fitness-for-duty purposes) or similar event. The expiration event must, however, be related to the individual or the purpose of the use or disclosure. An authorization that purported to expire on the date when the stock market reached a specified level would not be valid. Under § 164.508(b)(2)(i), if the expiration event is known by the covered entity to have occurred, the authorization is defective. Second, we clarify that certain compound authorizations, as described below, are defective. We also clarify that authorizations that are not completely filled out with respect to the required elements are defective. Finally, we clarify that an authorization with information that the covered entity knows to be false is defective only if the information is material.

As under the proposed regulation, an authorization that the covered entity knows has been revoked is not a valid authorization. We note that, although an authorization must be revoked in writing, the covered entity may not always "know" that an authorization has been revoked. The writing required for an individual to revoke an authorization may not always trigger the "knowledge" required for a covered entity to consider an authorization defective. Conversely, a copy of the written revocation is not required before a provider "knows" that an authorization has been revoked.

Many authorizations will be obtained by persons other than the covered entity. If the individual revokes an authorization by writing to that other person, and neither the individual nor the other person informs the covered entity of the revocation, the covered entity will not "know" that the authorization has been revoked. For example, a government agency may obtain an individual's authorization for "all providers who have seen the individual in the past year" to disclose protected health information to the agency for purposes of determining eligibility for benefits. The individual may revoke the authorization by writing to the government agency requesting such revocation. We cannot require the agency to inform all covered entities to whom it has presented the authorization that the authorization has been revoked. If a covered entity does not know of the

revocation, the covered entity will not violate this rule by acting pursuant to the authorization. At the same time, if the individual does inform the covered entity of the revocation, even orally, the covered entity "knows" that the authorization has been revoked and can no longer treat the authorization as valid under this rule. Thus, in this example, if the individual tells a covered entity that the individual has revoked the authorization, the covered entity "knows" of the revocation and must consider the authorization defective under § 164.508(b)(2). ***82516**

Compound Authorizations

Except for authorizations requested in connection with a clinical trial, we proposed to prohibit covered entities from combining an authorization for use or disclosure of protected health information for purposes other than treatment, payment, or health care operations with an authorization or consent for treatment (e.g., an informed consent to receive care) or payment (e.g., an assignment of benefits).

We clarify the prohibition on compound authorizations in the final rule. Other than as described below, § 164.508(b)(3) prohibits a covered entity from acting on an authorization required under this rule that is combined with any other document, including any other written legal permission from the individual. For example, an authorization under this rule may not be combined with a consent for use or disclosure of protected health information under § 164.506, with the notice of privacy practices under § 164.520, with any other form of written legal permission for the use or disclosure of protected health information, with an informed consent to participate in research, or with any other form of consent or authorization for treatment or payment.

There are three exceptions to this prohibition. First, under § 164.508(f) (described in more detail, below), an authorization for the use or disclosure of protected health information created for research that includes treatment of the individual may be combined with a consent for the use or disclosure of that protected health information to carry out treatment, payment, or health care operations under § 164.506 and with other documents as provided in § 164.508(f). Second, authorizations for the use or disclosure of psychotherapy notes for multiple purposes may be combined in a single document, but may not be combined with authorizations for the use or disclosure of other protected health information. Third, authorizations for the use or disclosure of protected health information other than psychotherapy notes may be combined, provided that the covered entity has not conditioned the provision of treatment, payment, enrollment, or eligibility on obtaining the authorization. If a covered entity conditions any of these services on obtaining an authorization from the individual, as permitted in § 164.508(b)(4) and described below, the covered entity must not combine the authorization with any other document.

The following are examples of valid compound authorizations: an authorization for the disclosure of information created for clinical research combined with a consent for the use or disclosure of other protected health information to carry out treatment, payment, and health care operations, and the informed consent to participate in the clinical research; an authorization for disclosure of psychotherapy notes for both treatment and research purposes; and an authorization for the disclosure of the individual's demographic information for both marketing and fundraising purposes. Examples of invalid compound authorizations include: an authorization for the disclosure of protected health information for treatment, for research, and for determining payment of a claim for benefits, when the covered entity will refuse to pay the claim if the individual does not sign the authorization; or an authorization for the disclosure of psychotherapy notes combined with an authorization to disclose any other protected health information.

Prohibition on Conditioning Treatment, Payment, Eligibility, or Enrollment

We proposed to prohibit covered entities from conditioning treatment or payment on the provision by the individual of an authorization, except when the authorization was requested in connection with a clinical trial. In the case of authorization for use or disclosure of psychotherapy notes or research information unrelated to treatment, we proposed to prohibit covered entities from conditioning treatment, payment, or enrollment in a health plan on obtaining such an authorization.

We retain this basic approach but refine its application in the final rule. In addition to the general prohibition on conditioning treatment and payment, covered entities are also prohibited (with certain exceptions described below) from conditioning

eligibility for benefits or enrollment in a health plan on obtaining an authorization. This prohibition extends to all authorizations, not just authorizations for use or disclosure of psychotherapy notes. This prohibition is intended to prevent covered entities from coercing individuals into signing an authorization for a use or disclosure that is not necessary to carry out the primary services that the covered entity provides to the individual. For example, a health care provider could not refuse to treat an individual because the individual refused to authorize a disclosure to a pharmaceutical manufacturer for the purpose of marketing a new product.

We clarify the proposed research exception to this prohibition. Covered entities seeking authorization in accordance with § 164.508(f) to use or disclose protected health information created for the purpose of research that includes treatment of the individual, including clinical trials, may condition the research-related treatment on the individual's authorization. Permitting use of protected health information is part of the decision to receive care through a clinical trial, and health care providers conducting such trials should be able to condition research-related treatment on the individual's willingness to authorize the use or disclosure of his or her protected health information for research associated with the trial.

In addition, we permit health plans to condition eligibility for benefits and enrollment in the health plan on the individual's authorization for the use or disclosure of protected health information for purposes of eligibility or enrollment determinations relating to the individual or for its underwriting or risk-rating determinations. We also permit health plans to condition payment of a claim for specified benefits on the individual's authorization for the disclosure of information maintained by another covered entity to the health plan, if the disclosure is necessary to determine payment of the claim. These exceptions do not apply, however, to authorization for the use or disclosure of psychotherapy notes. Health plans may not condition payment, eligibility, or enrollment on the receipt of an authorization for the use or disclosure of psychotherapy notes, even if the health plan intends to use the information for underwriting or payment purposes.

Finally, when a covered entity provides treatment for the sole purpose of providing information to a third party, the covered entity may condition the treatment on the receipt of an authorization to use or disclose protected health information related to that treatment. For example, a covered health care provider may have a contract with an employer to provide fitness-for-duty exams to the employer's employees. The provider may refuse to conduct the exam if an individual refuses to authorize the provider to disclose the results of the exam to the employer. Similarly, a covered health care provider may have a contract with a life insurer to provide pre-enrollment physicals to applicants for life insurance coverage. The provider may refuse to conduct the physical if an individual refuses to authorize the provider to disclose the results of the physical to the life insurer. ***82517**

Revocation of Authorizations

We proposed to allow individuals to revoke an authorization at any time, except to the extent that the covered entity had taken action in reliance on the authorization.

We retain this provision, but specify that the individual must revoke the authorization in writing. When an individual revokes an authorization, a covered entity that knows of such revocation must stop making uses and disclosures pursuant to the authorization to the greatest extent practical. A covered entity may continue to use and disclose protected health information in accordance with the authorization only to the extent the covered entity has taken action in reliance on the authorization. For example, a covered entity is not required to retrieve information that it has already disclosed in accordance with the authorization. (See above for discussion of how written revocation of an authorization and knowledge of that revocation may differ.)

We also include an additional exception. Under § 164.508(b)(5), individuals do not have the right to revoke an authorization if the authorization was obtained as a condition of obtaining insurance coverage and other applicable law provides the insurer that obtained the authorization with the right to contest a claim under the policy. We intend this exception to permit insurers to obtain necessary protected health information during contestability periods under state law. For example, an individual may not revoke an authorization for the disclosure of protected health information to a life insurer for the purpose of investigating material misrepresentation if the individual's policy is still subject to the contestability period.

Documentation

In the final rule, we clarify that a covered entity must document and retain any signed authorization as required by § 164.530(j) (see below).

Section 164.508(c)—Core Elements and Requirements

We proposed to require authorizations requested by individuals to contain a minimum set of elements: a description of the information to be used or disclosed; the name of the covered entity, or class of entities or persons, authorized to make the use or disclosure; the name or types of recipient(s) of the information; an expiration date; the individual's signature and date of signature; if signed by a representative, a description of the representative's authority or relationship to the individual; a statement regarding the individual's right to revoke the authorization; and a statement that the information may no longer be protected by the federal privacy law. We proposed a model authorization form that entities could have used to satisfy the authorization requirements. If the model form was not used, we proposed to require covered entities to use authorization forms written in plain language.

We modify the proposed approach, by eliminating the distinction between authorizations requested by the individuals and authorizations requested by others. Instead, we prescribe a minimum set of elements for authorizations and certain additional elements when the authorization is requested by a covered entity for its own use or disclosure of protected health information it maintains or for receipt of protected health information from another covered entity to carry out treatment, payment, or health care operations.

The core elements are required for all authorizations, not just authorizations requested by individuals. Individuals seek disclosure of protected health information about them to others in many circumstances, such as when applying for life or disability insurance, when government agencies conduct suitability investigations, and in seeking certain job assignments when health status is relevant. Another common instance is tort litigation, when an individual's attorney needs individually identifiable health information to evaluate an injury claim and asks the individual to authorize disclosure of records relating to the injury to the attorney. In each of these situations, the individual may go directly to the covered entity and ask it to send the relevant information to the intended recipient. Alternatively, the intended recipient may ask the individual to complete a form, which the recipient will submit to the covered entity on the individual's behalf, that authorizes the covered entity to disclose the information. Whether the authorization is submitted to the covered entity by the individual or by another person on the individual's behalf, the covered entity maintaining protected health information may not use or disclose it pursuant to an authorization unless the authorization meets the following requirements.

First, the authorization must include a description of the information to be used or disclosed, with sufficient specificity to allow the covered entity to know which information the authorization references. For example, the authorization may include a description of “laboratory results from July 1998” or “all laboratory results” or “results of MRI performed in July 1998.” The covered entity can then use or disclose that information and only that information. If the covered entity does not understand what information is covered by the authorization, the use or disclosure is not permitted unless the covered entity clarifies the request.

There are no limitations on the information that can be authorized for disclosure. If an individual wishes to authorize a covered entity to disclose his or her entire medical record, the authorization can so specify. In order for the covered entity to disclose the entire medical record, the authorization must be specific enough to ensure that the individual has a clear understanding that the entire record will be disclosed. For example, if the Social Security Administration seeks authorization for release of all health information to facilitate the processing of benefit applications, then the description on the authorization form must specify “all health information” or the equivalent.

In some instances, a covered entity may be reluctant to undertake the effort to review the record and select portions relevant to the request (or redact portions not relevant). In such circumstances, covered entities may provide the entire record to the

individual, who may then redact and release the more limited information to the requestor. This rule does not require a covered entity to disclose information pursuant to an individual's authorization.

Second, the authorization must include the name or other specific identification of the person(s) or class of persons that are authorized to use or disclose the protected health information. If an authorization permits a class of covered entities to disclose information to an authorized person, the class must be stated with sufficient specificity so that a covered entity presented with the authorization will know with reasonable certainty that the individual intended the covered entity to release protected health information. For example, a covered licensed nurse practitioner presented with an authorization for “all physicians” to disclose protected health information could not know with reasonable certainty that the individual intended for the practitioner to be included in the authorization.

Third, the authorization must include the name or other specific identification of the person(s) or class of persons to ***82518** whom the covered entity is authorized to make the use or disclosure. The authorization must identify these persons with sufficient specificity to reasonably permit a covered entity responding to the authorization to identify the authorized user or recipient of the protected health information. Often, individuals provide authorizations to third parties, who present them to one or more covered entities. For example, an authorization could be completed by an individual and given to a government agency, authorizing the agency to receive medical information from any health care provider that has treated the individual within a defined period of time. Such an authorization is permissible (subject to the other requirements of this part) if it sufficiently identifies the government entity that is authorized to receive the disclosed protected health information.

Fourth, the authorization must state an expiration date or event. This expiration date or event must either be a specific date (e.g., January 1, 2001), a specific time period (e.g., one year from the date of signature), or an event directly relevant to the individual or the purpose of the use or disclosure (e.g., for the duration of the individual's enrollment with the health plan that is authorized to make the use or disclosure). We note that the expiration date or event is subject to otherwise applicable and more stringent law. For example, the National Association of Insurance Commissioners' Insurance Information and Privacy Protection Model Act, adopted in at least fifteen states, specifies that authorizations signed for the purpose of collecting information in connection with an application for a life, health, or disability insurance policy are permitted to remain valid for no longer than thirty months. In those states, the longest such an authorization may remain in effect is therefore thirty months, regardless of the expiration date or event indicated on the form.

Fifth, the authorization must state that the individual has the right to revoke an authorization in writing, except to the extent that action has been taken in reliance on the authorization or, if applicable, during a contestability period. The authorization must include instructions on how the individual may revoke the authorization. For example, the person obtaining the authorization from the individual can include an address where the individual can send a written request for revocation.

Sixth, the authorization must inform the individual that, when the information is used or disclosed pursuant to the authorization, it may be subject to re-disclosure by the recipient and may no longer be protected by this rule.

Seventh, the authorization must include the individual's signature and the date of the signature. Once we adopt the standards for electronic signature, another of the required administrative simplification standards we are required to adopt under HIPAA, an electronic signature that meets those standards will be sufficient under this rule. We do not require verification of the individual's identity or authentication of the individual's signature.

Finally, if the authorization is signed by a personal representative of the individual, the representative must indicate his or her authority to act for the individual.

As in the proposed rule, the authorization must be written in plain language. See the preamble discussion regarding notice of privacy practices (§ 164.520) for a discussion of the plain language requirement. We do not provide a model authorization in this rule. We will provide further guidance on this issue prior to the compliance date.

Section 164.508(d)—Authorizations Requested by a Covered Entity for Its Own Uses and Disclosures

We proposed to require covered entities to include additional elements in authorizations initiated by the covered entity. Before a covered entity could use or disclose protected health information of an individual pursuant to a request the covered entity made, we proposed to require the entity to obtain an authorization containing the minimum elements described above and the following additional elements: except for authorizations requested for clinical trials, a statement that the entity will not condition treatment or payment on the individual's authorization; a description of the purpose of the requested use or disclosure; a statement that the individual may inspect or copy the information to be used or disclosed and may refuse to sign the authorization; and, if the use or disclosure of the requested information will result in financial gain to the entity, a statement that such gain will result.

We additionally proposed to require covered entities, when requesting an individual's authorization, to request only the minimum amount of information necessary to accomplish the purpose for which the request was made. We also proposed to require covered entities to provide the individual with a copy of the executed authorization.

We retain the proposed approach, but apply these additional requirements when the covered entity requests the individual's authorization for the entity's own use or disclosure of protected health information maintained by the covered entity itself. For example, a health plan may ask individuals to authorize the plan to disclose protected health information to a subsidiary to market life insurance to the individual. A pharmaceutical company may also ask a covered provider to recruit patients for drug research; if the covered provider asks patients to sign an authorization for the provider to disclose protected health information to the pharmaceutical company for this research, this is also an authorization requested by a covered entity for disclosure of protected health information maintained by the covered entity. When covered entities initiate the authorization by asking individuals to authorize the entity to use or disclose protected health information that the entity maintains, the authorization must include all of the elements required above as well as several additional elements.

Authorizations requested by covered entities for the covered entity's own use or disclosure of protected health information must state, as applicable under § 164.508(b)(4), that the covered entity will not condition treatment, payment, enrollment, or eligibility on the individual's authorization for the use or disclosure. For example, if a health plan asks an individual to sign an authorization for the health plan to disclose protected health information to a non-profit advocacy group for the advocacy group's fundraising purposes, the authorization must contain a statement that the health plan will not condition treatment, payment, enrollment in the health plan, or eligibility for benefits on the individual providing the authorization.

Authorizations requested by covered entities for their own uses and disclosures of protected health information must also identify each purpose for which the information is to be used or disclosed. The required statement of purpose(s) must provide individuals with the facts they need to make an informed decision whether to allow release of the information. We prohibit the use of broad or blanket authorizations requesting the use or disclosure of protected health information for a wide range of unspecified purposes. Both the information that is to be used or disclosed and the specific purpose(s) for such uses or disclosures must be stated in the authorization. ***82519**

Authorizations requested by covered entities for their own uses and disclosures must also advise individuals of certain rights available to them under this rule. The authorization must state that the individual may inspect or copy the information to be used or disclosed as provided in § 164.524 regarding access for inspection and copying and that the individual may refuse to sign the authorization.

We alter the proposed requirements with respect to authorizations for which the covered entity will receive financial gain. When the covered entity initiates the authorization and the covered entity will receive direct or indirect remuneration from a third party (rather than financial gain, as proposed) in exchange for using or disclosing the protected health information, the authorization must include a statement that such remuneration will result. For example, a health plan may wish to sell or rent its enrollee mailing list or a pharmaceutical company may offer a covered provider a discount on its products if the provider obtains authorization to disclose the demographic information of patients with certain diagnoses so that the company can market new

drugs to them directly. In each case, the covered entity must obtain the individual's authorization, and the authorization must include a statement that the covered entity will receive remuneration.

In § 164.508(d)(2), we continue to require a covered entity that requests an authorization for its own use or disclosure of protected health information to provide the individual with a copy of the signed authorization. While we eliminate from this section the provision requiring covered entities to obtain authorization for use or disclosure of the minimum necessary protected health information, § 164.514(d)(4) requires covered entities to request only the minimum necessary protected health information to accomplish the purpose for which the request is made. This requirement applies to these authorizations, as well as other requests.

Section 164.508(e)—Authorizations Requested by a Covered Entity for Disclosures by Others

In the proposed rule, we would have prohibited all covered entities from requiring the individual's written legal permission (as proposed, an "authorization") for the use or disclosure of protected health information to carry out treatment, payment, or health care operations. We generally eliminate this prohibition in the final rule, except to specify that a consent obtained by one covered entity is not effective to permit another covered entity to use or disclose protected health information. See § 164.506(a)(5) and the corresponding preamble discussion.

In the final rule, if a covered entity seeks the individual's written legal permission to obtain protected health information about the individual from another covered entity for any purpose, it must obtain the individual's authorization for the covered entity that maintains the protected health information to make the disclosure. If the authorization is for the purpose of obtaining protected health information for purposes other than treatment, payment, or health care operations, the authorization need only contain the core elements required by § 164.508(c) and described above.

If the authorization, however, is for the purpose of obtaining protected health information to carry out treatment, payment, or health care operations, the authorization must meet the requirements of § 164.508(e). We expect such authorizations will rarely be necessary, because we expect covered entities that maintain protected health information to obtain consents that permit them to make anticipated uses and disclosures for these purposes. An authorization obtained by another covered entity that authorizes the covered entity maintaining the protected health information to make a disclosure for the same purpose, therefore, would be unnecessary.

We recognize, however, that these authorizations may be useful to demonstrate an individual's intent and relationship to the intended recipient of the information when the intent or relationship is not already clear. For example, a long term care insurer may need information from an individual's health care providers about the individual's ability to perform activities of daily living in order to determine payment of a long term care claim. The providers that hold the information may not be providing the long term care and may not, therefore, be aware of the individual's coverage under the policy or that the individual is receiving long term care services. An authorization obtained by the long term care insurer will help to demonstrate these facts to the providers holding the information, which will make them more confident that the individual intends for the information to be shared. Similarly, an insurer with subrogation obligations may need health information from the enrollee's providers to assess or prosecute the claim. A patient's new physician may also need medical records from the patient's prior providers in order to treat the patient. Without an authorization that demonstrates the patient's intent for the information to be shared, the covered entity that maintains the protected health information may be reluctant to provide the information, even if that covered entity's consent permits such disclosure to occur.

These authorizations may also be useful to accomplish clinical coordination and integration among covered entities that do not meet the definitions of affiliated covered entities or organized health care arrangements. For example, safety-net providers that participate in the Community Access Program (CAP) may not qualify as organized health care arrangements but may want to share protected health information with each other in order to develop and expand integrated systems of care for uninsured people. An authorization under this section would permit such providers to receive protected health information from other CAP participants to engage in such activities.

Because of such concerns, we permit a covered entity to request the individual's authorization to obtain protected health information from another covered entity to carry out treatment, payment, and health care operations. In these situations, the authorization must contain the core elements described above and must also describe each purpose of the requested disclosure.

With one exception, the authorization must also indicate that the authorization is voluntary. It must state that the individual may refuse to sign the authorization and that the covered entity requesting the authorization will not condition the provision of treatment, payment, enrollment in the health plan, or eligibility for benefits on obtaining the individual's authorization. If the authorization is for a disclosure of information that is necessary to determine payment of a claim for specified benefits, however, the health plan requesting the authorization may condition the payment of the claim on obtaining the authorization from the individual. See § 164.508(b)(4)(iii). In this case, the authorization does not have to state that the health plan will not condition payment on obtaining the authorization.

The covered entity requesting the authorization must provide the individual with a copy of the signed authorization. We note that the covered entity requesting the authorization is also subject to the requirements in ***82520** § 164.514 to request only the minimum necessary information needed for the purpose of the authorization.

We additionally note that, when the covered entity that maintains the protected health information has already obtained a consent for disclosure of protected health information to carry out treatment, payment, and/or health care operations under § 164.506, and that consent conflicts with an authorization obtained by another covered entity under § 164.508(e), the covered entity maintaining the protected health information is bound by the more restrictive document. See § 164.506(e) and the corresponding preamble discussion for further explanation.

Section 164.508(f)—Authorizations for Uses and Disclosures of Protected Health Information Created for Research that Includes Treatment of Individuals

In the proposed rule, we would have required individual authorization for any use or disclosure of research information unrelated to treatment. In the final rule, we eliminate the special rules for this category of information and, instead, require covered entities to obtain an authorization for the use or disclosure of protected health information the covered entity creates for the purpose of research that includes treatment of individuals, except as otherwise permitted by § 164.512(i).

The intent of this provision is to permit covered entities that conduct research involving treatment to bind themselves to a more limited scope of uses and disclosures of research information than they would otherwise be permitted to make with non-research information. Rather than creating a single definition of "research information," we allow covered entities the flexibility to define that subset of protected health information they create during clinical research that is not necessary for treatment, payment, or health care operations and that the covered entity will use or disclose under more limited circumstances than it uses or discloses other protected health information. In designing their authorizations, we expect covered entities to be mindful of the often highly sensitive nature of research information and the impact of individuals' privacy concerns on their willingness to participate in research.

Covered entities seeking authorization to use or disclose protected health information they create for the purpose of research that includes treatment of individuals, including clinical trials, must include in the authorization (in addition to the applicable elements required above) a description of the extent to which some or all of the protected health information created for the research will also be used or disclosed for purposes of treatment, payment, and health care operations. For example, if the covered entity intends to seek reimbursement from the individual's health plan for the routine costs of care associated with the research protocol, it must explain in the authorization the types of information that it will provide to the health plan for this purpose. This information, and the circumstances under which disclosures will be made for treatment, payment, and health care operations, may be more limited than the information and circumstances described in the covered entity's general consent and notice of privacy practices. To the extent the covered entity limits itself to a subset of uses or disclosures that are otherwise permissible under the rule and the covered entity's consent and notice, the covered entity is bound by the statements made in

the research-related authorization. In these circumstances, the authorization must indicate that the authorization, not the general consent and notice, controls.

If the covered entity's primary interaction with the individual is through the research, the covered entity may combine the general consent for treatment, payment, and health care operations required under § 164.506 with this research authorization and need not obtain an additional consent under § 164.506. If the entity has already obtained, or intends to obtain, a separate consent as required under § 164.506, the research authorization must refer to that consent and state that the practices described in the research-related authorization are binding on the covered entity as to the information covered by the research-related authorization. The research-related authorization may also be combined in the same document as the informed consent for participation in the research. This is an exception to the general rule in § 164.508(b)(3) that an authorization under this section may not be combined with any other document (see above).

The covered entity must also include in the authorization a description of the extent to which it will not use or disclose the protected health information it obtains in connection with the research protocol for purposes that are permitted without individual authorization under this rule (under §§ 164.510 and 164.512). To the extent that the entity limits itself to a subset of uses or disclosures that are otherwise permissible under the rule and the entity's notice, the entity is bound by the statements made in the research authorization. In these circumstances, the authorization must indicate that the authorization, not the notice, controls. The covered entity may not, however, purport to preclude itself from making uses or disclosures that are required by law or that are necessary to avert a serious and imminent threat to health or safety.

In some instances, the covered entity may wish to make a use or disclosure of the research information that it did not include in its general consent or notice or for which authorization is required under this rule. To the extent the entity includes uses or disclosures in the research authorization that are otherwise not permissible under the rule and the entity's consent and notice of information practices, the entity must include all of the elements required by §§ 164.508(c) and (d) in the research-related authorization. The covered entity is bound by these statements.

Research that involves the delivery of treatment to participants sometimes relies on existing health information, such as to determine eligibility for the trial. We note that under § 164.508(b)(3)(iii), the covered entity may combine the research-related authorization required under § 164.508(f) with any other authorization for the use or disclosure of protected health information (other than psychotherapy notes), provided that the covered entity does not condition the provision of treatment on the individual signing the authorization. For example, a covered health care provider that had a treatment relationship with an individual prior to the individual's enrollment in a clinical trial, but that is now providing research-related treatment to the individual, may elect to request a compound authorization from the individual: an authorization under § 164.508(d) for the provider to use the protected health information it created prior to the initiation of the research that involves treatment, combined with an authorization under § 164.508(f) regarding use and disclosure of protected health information the covered provider will create for the purpose of the clinical trial. This compound authorization would be valid, provided the covered provider did not condition the research-related treatment on obtaining the authorization required under § 164.508(f), as permitted in § 164.508(b)(4)(i).

However, we anticipate that covered entities will almost always, if not always, condition the provision of research-related treatment on the individual signing the authorization under § 164.508(f) for the covered ***82521** entity's use or disclosure of protected health information created for the research. Therefore, we expect that the vast majority of covered providers who wish to use or disclose protected health information about an individual that will be created for research that includes treatment and wish to use existing protected health information about that individual for the research that includes treatment, will be required to obtain two authorizations from the individual: (1) an authorization for the use and disclosure of protected health information to be created for the research that involves treatment of the individual (as required under § 164.508(f)), and (2) an authorization for the use of existing protected health information for the research that includes treatment of the individual (as required under § 164.508(d)).

Effect of Authorization

As noted in the discussion about consents in the preamble to § 164.506, authorizations under this rule should not be construed to waive, directly or indirectly, any privilege granted under federal, state, or local laws or procedures.

Section 164.510—Uses and Disclosures Requiring an Opportunity for the Individual To Agree or To Object

Introduction

Section 164.510 of the NPRM proposed the uses and disclosures of protected health information that covered entities could make for purposes other than treatment, payment, or health care operations and for which an individual authorization would not have been required. These allowable uses and disclosures were designed to permit and promote key national health care priorities, and to promote the smooth operation of the health care system. In each of these areas, the proposal permitted, but would not have required, covered entities to use or disclose protected health information.

We proposed to require covered entities to obtain the individual's oral agreement before making a disclosure to a health care facility's directory or to the individual's next-of-kin or to another person involved in the individual's health care. Because there is an expectation in these two areas that individuals will have some input into a covered entity's decision to use or disclose protected health information, we decided to place disclosures to health facility directories and to persons involved in an individual's care in a separate section. In the final rule, requirements regarding disclosure of protected health information for facility directories and to others involved in an individual's care are included in § 164.510(a) and § 164.510(b), respectively. In the final rule, we include in § 164.510(b) provisions to address a type of disclosure not addressed in the NPRM: disclosures to entities providing relief and assistance in disasters such as floods, fires, and terrorist attacks. Requirements for most of the remaining categories of disclosures addressed in proposed § 164.510 of the NPRM are included in a new § 164.512 of the final rule, as discussed below.

Section 164.510 of the final rule addresses situations in which the interaction between the covered entity and the individual is relatively informal and agreements are made orally, without written authorizations for use or disclosure. In general, under the final rule, to disclose or use protected health information for these purposes, covered entities must inform individuals in advance and must provide a meaningful opportunity for the individual to prevent or restrict the disclosure. In exceptional circumstances, where even this informal discussion cannot practicably take place, covered entities are permitted to make decisions regarding disclosure or use based on the exercise of professional judgment of what is in the individual's best interest.

Section 164.510(a)—Use and Disclosure for Facility Directories

The NPRM proposed to allow covered health care providers to disclose through an inpatient facility's directory a patient's name, location in the facility, and general health condition, provided that the individual had agreed to the disclosure. The NPRM would have allowed this agreement to be oral. Pursuant to the NPRM, when making decisions about incapacitated individuals, a covered health care provider could have disclosed such information at the entity's discretion and consistent with good medical practice and any prior expressions of patient preference of which the covered entity was aware.

The preamble to the NPRM listed several factors that we encouraged covered entities to take into account when making decisions about whether to include an incapacitated patient's information in the directory. These factors included: (1) Whether disclosing that an individual is in the facility could reasonably cause harm or danger to the individual (e.g., if it appeared that an unconscious patient had been abused and disclosing the information could give the attacker sufficient information to seek out the person and repeat the abuse); (2) whether disclosing a patient's location within a facility implicitly would give information about the patient's condition (e.g., whether a patient's room number revealed that he or she was in a psychiatric ward); (3) whether it was necessary or appropriate to give information about patient status to family or friends (e.g., if giving information to a family member about an unconscious patient could help a physician administer appropriate medications); and (4) whether an individual had, prior to becoming incapacitated, expressed a preference not to be included in the directory. The preamble stated that if a covered entity learned of such a preference, it would be required to act in accordance with the preference.

The preamble to the NPRM said that when individuals entered a facility in an incapacitated state and subsequently gained the ability to make their own decisions, health facilities should ask them within a reasonable time period for permission to include their information in the facility's directory.

In the final rule, we change the NPRM's opt-in authorization requirement to an opt-out approach for inclusion of patient information in a health care facility's directory. The final rule allows covered health care providers—which in this case are health care facilities—to include patient information in their directory only if: (1) They inform incoming patients of their policies regarding the directory; (2) they give patients a meaningful opportunity to opt out of the directory listing or to restrict some or all of the uses and disclosures that can be included in the directory; and (3) the patient does not object to being included in the directory. A patient must be allowed, for example, to have his or her name and condition included in the directory while not having his or her religious affiliation included. The facility's notice and the individual's opt-out or restriction may be oral.

Under the final rule, subject to the individual's right to object, or known prior expressed preferences, a covered health care provider may disclose the following information to persons who inquire about the individual by name: (1) The individual's general condition in terms that do not communicate specific medical information about the individual (e.g., fair, critical, stable, etc.); and (2) location in the facility. This approach represents a slight change to the NPRM, which did not require members of the general public to ask for a patient by name in order to obtain directory information and which, ***82522** in fact, would have allowed covered entities to disclose the individual's name as part of directory information.

Under the final rule, we also establish provisions for disclosure of directory information to clergy that are slightly different from those which apply for disclosure to the general public. Subject to the individual's right to object or restrict the disclosure, the final rule permits a covered entity to disclose to a member of the clergy: (1) The individual's name; (2) the individual's general condition in terms that do not communicate specific medical information about the individual; (3) the individual's location in the facility; and (4) the individual's religious affiliation. A disclosure of directory information may be made to members of the clergy even if they do not inquire about an individual by name. We note that the rule in no way requires a covered health care provider to inquire about the religious affiliation of an individual, nor must individuals supply that information to the facility. Individuals are free to determine whether they want their religious affiliation disclosed to clergy through facility directories.

We believe that allowing clergy to access patient information pursuant to this section does not violate the Establishment Clause of the First Amendment, which prohibits laws “respecting an establishment of religion.” Courts traditionally turn to the Lemon test when evaluating laws that might raise Establishment Clause concerns. A law does not violate the Clause if it has a secular purpose, is not primarily to advance religion, and does not cause excessive government entanglement with religion. The privacy regulation passes this test because its purpose is to protect the privacy of individuals—regardless of their religious affiliation—and it does not cause excessive government entanglement.

More specifically, although this section provides a special rule for members of the clergy, it does so as an accommodation to patients who seek to engage in religious conduct. For example, restricting the disclosure of an individual's religious affiliation, room number, and health status to a priest could cause significant delay that would inhibit the ability of a Catholic patient to obtain sacraments provided during the last rites. We believe this accommodation does not violate the Establishment Clause, because it avoids a government-imposed restriction on the disclosure of information that could disproportionately affect the practice of religion. In that way, it is no different from accommodations upheld by the U.S. Supreme Court, such as exceptions to laws banning the use of alcohol in religious ceremonies.

The final rule expands the circumstances under which health care facilities can disclose specified health information to the patient directory without the patient's agreement. Besides allowing such disclosures when patients are incapacitated, as the NPRM would have allowed, the final rule allows such disclosures in emergency treatment circumstances. For example, when a patient is conscious and capable of making a decision, but is so seriously injured that asking permission to include his or her information in the directory would delay treatment such that the patient's health would be jeopardized, health facilities can make decisions about including the patient's information in the directory according to the same rules that apply when the

patient is incapacitated. The final rule modifies the NPRM requirements for cases in which an incapacitated patient is admitted to a health care facility. Whereas the NPRM would have allowed health care providers to disclose an incapacitated patient's information to the facility's directory "at its discretion and consistent with good medical practice and any prior expressions of preference of which the covered entity [was] aware," the final rule states that in these situations (and in other emergency treatment circumstances), covered health care providers must make the decision on whether to include the patient's information in the facility's directory in accordance with professional judgment as to the patient's best interest. In addition, when making decisions involving incapacitated patients and patients in emergency situations, covered health care providers may decide to include some portions of the patient's information (such as name) but not other information (such as location in the facility) in order to protect patient interests.

As in the preamble to the NPRM, we encourage covered health care providers to take into account the four factors listed above when making decisions about whether to include patient information in a health care facility's directory when patients are incapacitated or are in an emergency treatment circumstance. In addition, we retain the requirement stated in the preamble of the NPRM that if a covered health care provider learns of an incapacitated patient's prior expression of preference not to be included in a facility's directory, the facility must not include the patient's information in the directory. For cases involving patients admitted to a health care facility in an incapacitated or emergency treatment circumstance who during the course of their stay become capable of decisionmaking, the final rule takes an approach similar to that described in the NPRM. The final rule states that when an individual who was incapacitated or in an emergency treatment circumstance upon admission to an inpatient facility and whose condition stabilizes such that he or she is capable of decisionmaking, a covered health care provider must, when it becomes practicable, inform the individual about its policies regarding the facility's directory and provide the opportunity to object to the use or disclosure of protected health information about themselves for the directory.

Section 164.510(b)—Uses and Disclosures for Involvement in the Individual's Care and Notification Purposes

In cases involving an individual with the capacity to make health care decisions, the NPRM would have allowed covered entities to disclose protected health information about the individual to a next-of-kin, to other family members, or to close personal friends of the individual if the individual had agreed orally to such disclosure. If such agreement could not practicably or reasonably be obtained (e.g., when the individual was incapacitated), the NPRM would have allowed disclosure of protected health information that was directly relevant to the person's involvement in the individual's health care, consistent with good health professional practices and ethics. The NPRM defined next-of-kin as defined under state law.

Under the final rule, we specify that covered entities may disclose to a person involved in the current health care of the individual (such as a family member, other relative, close personal friend, or any other person identified by the individual) protected health information directly related to the person's involvement in the current health care of an individual or payment related to the individual's health care. Such persons involved in care and other contact persons might include, for example: blood relatives; spouses; roommates; boyfriends and girlfriends; domestic partners; neighbors; and colleagues. Inclusion of this list is intended to be illustrative only, and it is not intended to change current practices with respect to: (1) Involvement of other persons in individuals' treatment decisions; (2) informal information-sharing among individuals involved in a person's care; or (3) sharing of protected health ***82523** information to contact persons during a disaster. The final rule also includes new language stating that covered entities may use or disclose protected health information to notify or assist in notification of family members, personal representatives, or other persons responsible for an individual's care with respect to an individual's location, condition, or death. These provisions allow, for example, covered entities to notify a patient's adult child that his father has suffered a stroke and to tell the person that the father is in the hospital's intensive care unit.

The final rule includes separate provisions for situations in which the individual is present and for when the individual is not present at the time of disclosure. When the individual is present and has the capacity to make his or her own decisions, a covered entity may disclose protected health information only if the covered entity: (1) Obtains the individual's agreement to disclose to the third parties involved in their care; (2) provides the individual with an opportunity to object to such disclosure and the individual does not express an objection; or (3) reasonably infers from the circumstances, based on the exercise of professional judgment, that the individual does not object to the disclosure. Situations in which covered providers may infer an individual's

agreement to disclose protected health information pursuant to option (3) include, for example, when a patient brings a spouse into the doctor's office when treatment is being discussed, and when a colleague or friend has brought the individual to the emergency room for treatment.

We proposed that when a covered entity could not practicably obtain oral agreement to disclose protected health information to next-of-kin, relatives, or those with a close personal relationship to the individual, the covered entity could make such disclosures consistent with good health professional practice and ethics. In such instances, we proposed that covered entities could disclose only the minimum information necessary for the friend or relative to provide the assistance he or she was providing. For example, health care providers could not disclose to a friend or relative simply driving a patient home from the hospital extensive information about the patient's surgery or past medical history when the friend or relative had no need for this information.

The final rule takes a similar approach. Under the final rule, when an individual is not present (for example, when a friend of a patient seeks to pick up the patient's prescription at a pharmacy) or when the opportunity to agree or object to the use or disclosure cannot practicably be provided due to the individual's incapacity or an emergency circumstance, covered entities may, in the exercise of professional judgment, determine whether the disclosure is in the individual's best interests and if so, disclose only the protected health information that is directly relevant to the person's involvement with the individual's health care. For example, this provision allows covered entities to inform relatives or others involved in a patient's care, such as the person who accompanied the individual to the emergency room, that a patient has suffered a heart attack and to provide updates on the patient's progress and prognosis when the patient is incapacitated and unable to make decisions about such disclosures. In addition, this section allows covered entities to disclose functional information to individuals assisting in a patient's care; for example, it allows hospital staff to give information about a person's mobility limitations to a friend driving the patient home from the hospital. It also allows covered entities to use professional judgment and experience with common practice to make reasonable inferences of the individual's best interest in allowing a person to act on an individual's behalf to pick up filled prescriptions, medical supplies, X-rays, or other similar forms of protected health information. Thus, under this provision, pharmacists may release a prescription to a patient's friend who is picking up the prescription for him or her. Section 164.510(b) is not intended to disrupt most covered entities' current practices or state law with respect to these types of disclosures.

This provision is intended to allow disclosures directly related to a patient's current condition and should not be construed to allow, for example, disclosure of extensive information about the patient's medical history that is not relevant to the patient's current condition and that could prove embarrassing to the patient. In addition, if a covered entity suspects that an incapacitated patient is a victim of domestic violence and that a person seeking information about the patient may have abused the patient, covered entities should not disclose information to the suspected abuser if there is reason to believe that such a disclosure could cause the patient serious harm. In all of these situations regarding possible disclosures of protected health information about an patient who is not present or is unable to agree to such disclosures due to incapacity or other emergency circumstance, disclosures should be in accordance with the exercise of professional judgment as to the patient's best interest.

This section is not intended to provide a loophole for avoiding the rule's other requirements, and it is not intended to allow disclosures to a broad range of individuals, such as journalists who may be curious about a celebrity's health status. Rather, it should be construed narrowly, to allow disclosures to those with the closest relationships with the patient, such as family members, in circumstances when a patient is unable to agree to disclosure of his or her protected health information. Furthermore, when a covered entity cannot practicably obtain an individual's agreement before disclosing protected health information to a relative or to a person involved in the individual's care and is making decisions about such disclosures consistent with the exercise of professional judgment regarding the individual's best interest, covered entities must take into account whether such a disclosure is likely to put the individual at risk of serious harm.

Like the NPRM, the final rule does not require covered entities to verify the identity of relatives or other individuals involved in the individual's care. Rather, the individual's act of involving the other persons in his or her care suffices as verification of their identity. For example, the fact that a person brings a family member into the doctor's office when treatment information will be discussed constitutes verification of the involved person's identity for purposes of this rule. Likewise, the fact that a friend

arrives at a pharmacy and asks to pick up a specific prescription for an individual effectively verifies that the friend is involved in the individual's care, and the rule allows the pharmacist to give the filled prescription to the friend.

We also clarify that the final rule does not allow covered entities to assume that an individual's agreement at one point in time to disclose protected health information to a relative or to another person assisting in the individual's care implies agreement to disclose protected health information indefinitely in the future. We encourage the exercise of professional judgment in determining the scope of the person's involvement in the individual's care and the time period for which the individual is agreeing to the other person's involvement. For example, if a friend simply picks up a patient from the hospital but has played no other role ***82524** in the individual's care, hospital staff should not call the friend to disclose lab test results a month after the initial encounter with the friend. However, if a patient routinely brings a spouse into the doctor's office when treatment is discussed, a physician can infer that the spouse is playing a long-term role in the patient's care, and the rule allows disclosure of protected health information to the spouse consistent with his or her role in the patient's care, for example, discussion of treatment options.

The NPRM did not specifically address situations in which disaster relief organizations may seek to obtain protected health information from covered entities to help coordinate the individual's care, or to notify family or friends of an individual's location or general condition in a disaster situation. In the final rule, we account for disaster situations in this paragraph. Specifically, we allow covered entities to use or disclose protected health information without individual agreement to federal, state, or local government agencies engaged in disaster relief activities, as well as to private disaster relief or disaster assistance organizations (such as the Red Cross) authorized by law or by their charters to assist in disaster relief efforts, to allow these organizations to carry out their responsibilities in a specific disaster situation. Covered entities may make these disclosures to disaster relief organizations, for example, so that these organizations can help family members, friends, or others involved in the individual's care to locate individuals affected by a disaster and to inform them of the individual's general health condition. This provision also allows disclosure of information to disaster relief or disaster assistance organizations so that these organizations can help individuals obtain needed medical care for injuries or other health conditions caused by a disaster.

We encourage disaster relief organizations to protect the privacy of individual health information to the extent practicable in a disaster situation. However, we recognize that the nature of disaster situations often makes it impossible or impracticable for disaster relief organizations and covered entities to seek individual agreement or authorization before disclosing protected health information necessary for providing disaster relief. Thus, we note that we do not intend to impede disaster relief organizations in their critical mission to save lives and reunite loved ones and friends in disaster situations.

Section 164.512—Uses and Disclosures for Which Consent, an Authorization, or Opportunity To Agree or Object Is Not Required

Introduction

The final rule's requirements regarding disclosures for directory information and to family members or others involved in an individual's care are in a section separate from that covering disclosures allowed for other national priority purposes. In the final rule, we place most of the other disclosures for national priority purposes in a new § 164.512.

As in the NPRM, in § 164.512 of the final rule, we allow covered entities to make these national priority uses and disclosures without individual authorization. As in the NPRM, these uses and disclosures are discretionary. Covered entities are free to decide whether or not to use or disclose protected health information for any or all of the permitted categories. However, as in the NPRM, nothing in the final rule provides authority for a covered entity to restrict or refuse to make a use or disclosure mandated by other law.

The new § 164.512 includes paragraphs on: Uses and disclosures required by law; uses and disclosures for public health activities; disclosures about victims of abuse, neglect, or domestic violence; uses and disclosures for health oversight activities; disclosures for judicial and administrative proceedings; disclosures for law enforcement purposes; uses and disclosures about decedents; uses and disclosures for cadaveric donation of organs, eyes, or tissues; uses and disclosures for research purposes;

uses and disclosures to avert a serious threat to health or safety (which we had called "emergency circumstances" in the NPRM); uses and disclosures for specialized government functions (referred to as "specialized classes" in the NPRM); and disclosures to comply with workers' compensation laws.

Section 164.512(c) in the final rule, which addresses uses and disclosures regarding adult victims of abuse, neglect and domestic violence, is new, although it incorporates some provisions from proposed § 164.510 of the NPRM. In the final rule we also eliminate proposed § 164.510(g) on government health data systems and proposed § 164.510(i) on banking and payment processes. These changes are discussed below.

Approach to Use of Protected Health Information

Proposed § 164.510 of the NPRM included specific subparagraphs addressing uses of protected health information by covered entities that were also public health agencies, health oversight agencies, government entities conducting judicial or administrative proceedings, or government heath data systems. Such covered entities could use protected health information in all instances for which they could disclose the information for these purposes. In the final rule, as discussed below, we retain this language in the paragraphs on public health activities and health oversight. However, we eliminate this clause with respect to uses of protected health information for judicial and administrative proceedings, because we no longer believe that there would be any situations in which a covered entity would also be a judicial or administrative tribunal. Proposed § 164.510(e) of the NPRM, regarding disclosure of protected health information to coroners, did not include such a provision. In the final rule we have added it because we believe there are situations in which a covered entity, for example, a public hospital conducting post-mortem investigations, may need to use protected health information for the same purposes for which it would have disclosed the information to a coroner.

While the right to request restrictions under § 164.522 and the consents required under § 164.506 do not apply to the use and disclosure of protected health information under § 164.512, we do not intend to preempt any state or other restrictions, or any right to enforce such agreements or consents under other law.

We note that a covered entity may use or disclose protected health information as permitted by and in accordance with one of the paragraphs of § 164.512, regardless of whether that use or disclosure fails to meet the requirements for use or disclosure under a different paragraph in § 164.512 or elsewhere in the rule.

Verification for Disclosures Under § 164.512

In § 164.510(a) of the NPRM, we proposed that covered entities verify the identity and authority of persons to whom they made disclosure under the section. In the final rule, we generally have retained the proposed requirements. Verification requirements are discussed in § 164.514 of the final rule.

Section 164.512(a)—Uses and Disclosures Required by Law

In the NPRM we would have allowed covered entities to use or disclose protected health information without individual authorization where such use ***82525** or disclosure was required by other law, as long as the use or disclosure met all relevant requirements of such law. However, a legally mandated use or disclosure which fell into one or more of the national priority purposes expressly identified in proposed § 164.510 of the NPRM would have been subject to the terms and conditions specified by the applicable paragraph of proposed § 164.510. Thus, a disclosure required by law would have been allowed only to the extent it was not otherwise prohibited or restricted by another provision in proposed § 164.510. For example, mandatory reporting to law enforcement officials would not have been allowed unless such disclosures conformed to the requirements of proposed § 164.510(f) of the NPRM, on uses and disclosures for law enforcement purposes. As explained in the NPRM, this provision was not intended to obstruct access to information deemed important enough by federal, state or other government authorities to require it by law.

In § 164.512(a) of the final rule, we retain the proposed approach, and we permit covered entities to comply with laws requiring the use or disclosure of protected health information, provided the use or disclosure meets and is limited to the relevant requirements of such other laws. To more clearly address where the substantive and procedural requirements of other provisions in this section apply, we have deleted the general sentence from the NPRM which stated that the provision "does not apply to uses or disclosures that are covered by paragraphs (b) through (m)" of proposed § 164.510. Instead, in § 164.512 (a)(2) we list the specific paragraphs that have additional requirements with which covered entities must comply. They are disclosures about victims of abuse, neglect or domestic violence (§ 164.512(c)), for judicial and administrative proceedings (§ 164.512(e)), and for law enforcement purposes (§ 164.512(f)). We include a new definition of "required by law." See § 164.501. We clarify that the requirements provided for in § 164.514(h) relating to verification apply to disclosures under this paragraph. Those provisions require covered entities to verify the identity and authority of persons to whom they make disclosures. We note that the minimum necessary requirements of § 164.514(d) do not apply to disclosures made under this paragraph.

We note that this rule does not affect what is required by other law, nor does it compel a covered entity to make a use or disclosure of protected health information required by the legal demands or reporting requirements listed in the definition of "required by law." Covered entities will not be sanctioned under this rule for responding in good faith to such legal process and reporting requirements. However, nothing in this rule affects, either by expanding or contracting, a covered entity's right to challenge such process or reporting requirements under other laws. The only disclosures of protected health information compelled by this rule are disclosures to an individual (or the personal representative of an individual) or to the Secretary for the purposes of enforcing this rule.

Uses and disclosures permitted under this paragraph must be limited to the protected health information necessary to meet the requirements of the law that compels the use or disclosure. For example, disclosures pursuant to an administrative subpoena are limited to the protected health information authorized to be disclosed on the face of the subpoena.

Section 164.512(b)—Uses and Disclosures for Public Health Activities

The NPRM would have allowed covered entities to disclose protected health information without individual authorization to: (1) A public health authority authorized by law to collect or receive such information for the purpose of preventing or controlling disease, injury, or disability, including, but not limited to, the reporting of disease, injury, vital events such as birth or death, and the conduct of public health surveillance, public health investigations, and public health interventions; (2) a public health authority or other appropriate authority authorized by law to receive reports of child abuse or neglect; (3) a person or entity other than a governmental authority that could demonstrate or demonstrated that it was acting to comply with requirements or direction of a public health authority; or (4) a person who may have been exposed to a communicable disease or may otherwise be at risk of contracting or spreading a disease or condition and was authorized by law to be notified as necessary in the conduct of a public health intervention or investigation.

In the final rule, we broaden the scope of permissible disclosures pursuant to item (1) listed above. We narrow the scope of disclosures permissible under item (3) of this list, and we add language to clarify the scope of permissible disclosures with respect to item (4) on the list. We broaden the scope of allowable disclosures regarding item (1) by allowing covered entities to disclose protected health information not only to U.S. public health authorities but also, at the direction of a public health authority, to an official of a foreign government agency that is acting in collaboration with a public health authority. For example, we allow covered entities to disclose protected health information to a foreign government agency that is collaborating with the Centers for Disease Control and Prevention to limit the spread of infectious disease.

We narrow the conditions under which covered entities may disclose protected health information to non-government entities. We allow covered entities to disclose protected health information to a person subject to the FDA's jurisdiction, for the following activities: to report adverse events (or similar reports with respect to food or dietary supplements), product defects or problems, or biological product deviations, if the disclosure is made to the person required or directed to report such information to the FDA; to track products if the disclosure is made to a person required or directed by the FDA to track the product; to enable product recalls, repairs, or replacement, including locating and notifying individuals who have received products regarding

product recalls, withdrawals, or other problems; or to conduct post-marketing surveillance to comply with requirements or at the direction of the FDA.

The terms included in § 164.512(b)(iii) are intended to have both their commonly understood meanings, as well as any specialized meanings, pursuant to the Food, Drug, and Cosmetic Act (21 U.S.C. 321 et seq.) or the Public Health Service Act (42 U.S.C. 201 et seq.). For example, "post-marketing surveillance" is intended to mean activities related to determining the safety or effectiveness of a product after it has been approved and is in commercial distribution, as well as certain Phase IV (post-approval) commitments by pharmaceutical companies. With respect to devices, "post-marketing surveillance" can be construed to refer to requirements of section 522 of the Food, Drug, and Cosmetic Act regarding certain implanted, life-sustaining, or life-supporting devices. The term "track" includes, for example, tracking devices under section 519(e) of the Food, Drug, and Cosmetic Act, units of blood or other blood products, as well as trace-backs of contaminated food.

In § 164.512(b)(iii), the term "required" refers to requirements in statute, regulation, order, or other ***82526** legally binding authority exercised by the FDA. The term "directed," as used in this section, includes other official agency communications such as guidance documents.

We note that under this provision, a covered entity may disclose protected health information to a non-governmental organization without individual authorization for inclusion in a private data base or registry only if the disclosure is otherwise for one of the purposes described in this provision (e.g., for tracking products pursuant to FDA direction or requirements, for post-marketing surveillance to comply with FDA requirements or direction.)

To make a disclosure that is not for one of these activities, covered entities must obtain individual authorization or must meet the requirements of another provision of this rule. For example, covered entities may disclose protected health information to employers for inclusion in a workplace surveillance database only: with individual authorization; if the disclosure is required by law; if the disclosure meets the requirements of § 164.512(b)(v); or if the disclosure meets the conditions of another provision of this regulation, such as § 154.512(i) relating to research. Similarly, if a pharmaceutical company seeks to create a registry containing protected health information about individuals who had taken a drug that the pharmaceutical company had developed, covered entities may disclose protected health information without authorization to the pharmaceutical company pursuant to FDA requirements or direction. If the pharmaceutical company's registry is not for any of these purposes, covered entities may disclose protected health information to it only with patient authorization, if required by law, or if disclosure meets the conditions of another provision of this rule.

The final rule continues to permit covered entities to disclose protected health information without individual authorization directly to public health authorities, such as the Food and Drug Administration, the Occupational Safety and Health Administration, the Centers for Disease Control and Prevention, as well as state and local public health departments, for public health purposes as specified in the NPRM.

The final rule retains the NPRM provision allowing covered entities to disclose protected health information to public health authorities or other appropriate government authorities authorized by law to receive reports of child abuse or neglect. In addition, we clarify the NPRM's provision regarding disclosure of protected health information to persons who may have been exposed to a communicable disease or who may otherwise be at risk of contracting or spreading a disease or condition. Under the final rule, covered entities may disclose protected health information to such individuals when the covered entity or public health authority is authorized by law to notify these individuals as necessary in the conduct of a public health intervention or investigation.

In addition, as in the NPRM, under the final rule, a covered entity that is acting as a public health authority—for example, a public hospital conducting infectious disease surveillance in its role as an arm of the public health department—may use protected health information in all cases for which it is allowed to disclose such information for public health activities as described above.

The proposed rule did not contain a specific provision relating to disclosures by covered health care providers to employers concerning work-related injuries or illnesses or workplace medical surveillance. Under the proposed rule, a covered entity would have been permitted to disclose protected health information without individual authorization for public health purposes to private person if the person could demonstrate that it was acting to comply with requirements or at the direction of a public health authority.

As discussed above, in the final rule we narrow the scope of this paragraph as it applies to disclosures to persons other than public health authorities. To ensure that covered health care providers may make disclosures of protected health information without individual authorization to employers when appropriate under federal and state laws addressing work-related injuries and illnesses or workplace medical surveillance, we include a new provision in the final rule. The provision permits covered health care providers who provide health care as a workforce member of or at the request of an employer to disclose to that employer protected health information concerning work-related injuries or illnesses or workplace medical surveillance in situations where the employer has a duty under the Occupational Safety and Health Act, the Federal Mine Safety and Health Act, or under a similar state law, to keep records on or act on such information. For example, OSHA regulations in 29 CFR part 1904 require employers to record work-related injuries and illnesses if medical treatment is necessary; MSHA regulations at 30 CFR part 50 require mine operators to report injuries and illnesses experienced by miners. Similarly, OSHA rules require employers to monitor employees' exposure to certain substances and to remove employees from exposure when toxic thresholds have been met. To obtain the relevant health information necessary to determine whether an injury or illness should be recorded, or whether an employee must be medically removed from exposure at work, employers must refer employees to health care providers for examination and testing.

OSHA and MSHA rules do not impose duties directly upon health care providers to disclose health information pertaining to recordkeeping and medical monitoring requirements to employers. Rather, these rules operate on the presumption that health care providers who provide services at the request of an employer will be able to disclose to the employer work-related health information necessary for the employer to fulfill its compliance obligations. This new provision permits covered entities to make disclosures necessary for the effective functioning of OSHA and MSHA requirements, or those of similar state laws, by permitting a health care provider to make disclosures without the authorization of the individual concerning work-related injuries or illnesses or workplace medical surveillance in situations where the employer has a duty under OSHA and MSHA requirements, or under a similar state laws, to keep records on or act on such information.

We require health care providers who make disclosures to employers under this provision to provide notice to individuals that it discloses protected health information to employers relating to the medical surveillance of the workplace and work-related illnesses and injuries. The notice required under this provision is separate from the notice required under § 164.520. The notice required under this provision may be met giving a copy of the notice to the individual at the time it provides the health care services, or, if the health care services are provided on the work site of the employer, by posting the notice in a prominent place at the location where the health care services are provided.

This provision applies only when a covered health care provider provides health care services as a workforce member of or at the request of an employer and for the purposes discussed above. The provision does not affect the application of this rule to other health care provided to ***82527** individuals or to their relationship with health care providers that they select.

Section 164.512(c)—Disclosures About Victims of Abuse, Neglect or Domestic Violence

The NPRM included two provisions related to disclosures about persons who are victims of abuse. In the NPRM, we would have allowed covered entities to report child abuse to a public health authority or other appropriate authority authorized by law to receive reports of child abuse or neglect. In addition, under proposed § 164.510(f)(3) of the NPRM, we would have allowed covered entities to disclose protected health information about a victim of a crime, abuse or other harm to a law enforcement official under certain circumstances. The NPRM recognized that most, if not all, states had laws that mandated reporting of child abuse or neglect to the appropriate authorities. Moreover, HIPAA expressly carved out state laws on child abuse and neglect from preemption or any other interference. The NPRM further acknowledged that most, but not all, states had laws mandating

the reporting of abuse, neglect or exploitation of the elderly or other vulnerable adults. We did not intend to impede reporting in compliance with these laws.

The final rule includes a new paragraph, § 164.512(c), which allows covered entities to report protected health information to specified authorities in abuse situations other than those involving child abuse and neglect. In the final rule, disclosures of protected health information related to child abuse continues to be addressed in the paragraph allowing disclosure for public health activities (§ 164.512(b)), as described above. Because HIPAA addresses child abuse specifically in connection with a state's public health activities, we believe it would not be appropriate to include child abuse-related disclosures in this separate paragraph on abuse. State laws continue to apply with respect to child abuse, and the final rule does not in any way interfere with a covered entity's ability to comply with these laws.

In the final rule, we address disclosures about other victims of abuse, neglect and domestic violence in § 164.512(c) rather than in the law enforcement paragraph. Section 164.512(c) establishes conditions for disclosure of protected health information in cases involving domestic violence other than child abuse (e.g., spousal abuse), as well as those involving abuse or neglect (e.g., abuse of nursing home residents or residents of facilities for the mentally retarded). This paragraph addresses reports to law enforcement as well as to other authorized public officials. The provisions of this paragraph supersede the provisions of § 164.512(a) and § 164.512(f)(1)(i) to the extent that those provisions address the subject matter of this paragraph.

Under the circumstances described below, the final rule allows covered entities to disclose protected health information about an individual whom the covered entity reasonably believes to be a victim of abuse, neglect, or domestic violence. In this paragraph, references to “individual” should be construed to mean the individual believed to be the victim. The rule allows such disclosure to any governmental authority authorized by law to receive reports of such abuse, neglect, or domestic violence. These entities may include, for example, adult protective or social services agencies, state survey and certification agencies, ombudsmen for the aging or those in long-term care facilities, and law enforcement or oversight.

The final rule specifies three circumstances in which disclosures of protected health information is allowed in order to report abuse, neglect or domestic violence. First, this paragraph allows disclosure of protected health information related to abuse if required by law and the disclosure complies with and is limited to the relevant requirements of such law. As discussed below, the final rule requires covered entities that make such disclosures pursuant to a state's mandatory reporting law to inform the individual of the report.

Second, this paragraph allows covered entities to disclose protected health information related to abuse if the individual has agrees to such disclosure. When considering the possibility of disclosing protected health information in an abuse situation pursuant to this section, we encourage covered entities to seek the individual's agreement whenever possible.

Third, this paragraph allows covered entities to disclose protected health information about an individual without the individual's agreement if the disclosure is expressly authorized by statute or regulation and either: (1) The covered entity, in the exercise of its professional judgment, believes that the disclosure is necessary to prevent serious harm to the individual or to other potential victims; or (2) if the individual is unable to agree due to incapacity, a law enforcement or other public official authorized to received the report represents that the protected health information for which disclosure is sought is not intended to be used against the individual, and that an immediate enforcement activity that depends on the disclosure would be materially and adversely affected by waiting until the individual is able to agree to the disclosure.

We emphasize that disclosure under this third part of the paragraph also may be made only if it is expressly authorized by statute or regulation. We use this formulation, rather than the broader “required by law,” because of the heightened privacy and safety concerns in these situations. We believe it appropriate to defer to other public determinations regarding reporting of this information only where a legislative or executive body has determined the reporting to be of sufficient importance to warrant enactment of a law or promulgation of a regulation. Law and regulations reflect a clear decision to authorize the particular

disclosure of protected health information, and reflect greater public accountability (e.g., through the required public comment process or because enacted by elected representatives).

For example, a Wisconsin law (Wis. Stat § 46.90(4)) states that any person may report to a county agency or state official that he or she believes that abuse or neglect has occurred. Pursuant to § 164.512(c)(1)(iii), a covered entity may make a report only if the specific type or subject matter of the report (e.g., abuse or neglect of the elderly) is included in the law authorizing the report, and such a disclosure may only be made to a public authority specifically identified in the law authorizing the report. Furthermore, we note that disclosures under this part of the paragraph are further limited to two circumstances. In the first case, a covered entity, in the exercise of professional judgment, must believe that the disclosure is necessary to prevent serious harm to the individual or to other potential victims. The second case addresses situations in which an individual who is a victim of abuse, neglect or domestic violence is unable to agree due to incapacity and a law enforcement or other public official authorized to receive the report represents that the protected health information for which disclosure is sought is not intended to be used against the individual and that an immediate law enforcement activity that depends on the disclosure would be materially and adversely affected by waiting until the individual if able to agree to the disclosure. We note that, in this second case, a covered entity may exercise discretion, consistent with professional judgment as to the patient's ***82528** best interest, in deciding whether to make the requested disclosure.

The rules governing disclosure in this third set of circumstances are different from those governing disclosures pursuant to § 164.512(f)(3) regarding disclosure to law enforcement about victims of crime and other harm. We believe that in abuse situations —to a greater extent than in situations involving crime victims in general—there is clear potential for abusers to cause further serious harm to the victim or to others, such as other family members in a household or other residents of a nursing home. The provisions allowing reporting of abuse when authorized by state law, as described above, are consistent with principles articulated by the AMA's Council on Ethical and Judicial Affairs, which state that when reporting abuse is voluntary under state law, it is justified when necessary to prevent serious harm to a patient. Through the provisions of § 164.512(c), we recognize the unique circumstances surrounding abuse and domestic violence, and we seek to provide an appropriate balance between individual privacy interests and important societal interests such as preventing serious harm to other individuals. We note that here we are relying on covered entities, in the exercise of professional judgment, to determine what is in the best interests of the patient.

Finally, we require covered entities to inform the individual in all of the situations described above that the covered entity has disclosed protected health information to report abuse, neglect, or domestic violence. We allow covered entities to provide this information orally. We do not require written notification, nor do we encourage it, due to the sensitivity of abuse situations and the potential for the abuser to cause further harm to the individual if, for example, a covered entity sends written notification to the home of the individual and the abuser. Whenever possible, covered entities should inform the individual at the same time that they determine abuse has occurred and decide that the abuse should be reported. In cases involving patient incapacity, we encourage covered entities to inform the individual of such disclosures as soon as it is practicable to do so.

The rule provides two exceptions to the requirement to inform the victim about a report to a government authority, one based on concern for future harm and one based on past harm. First, a covered entity need not inform the victim if the covered entity, in the exercise of professional judgment, believes that informing the individual would place the individual at risk of serious harm. We believe that this exception is necessary to address the potential for future harm, either physical or emotional, that the individual may face from knowing that the report has been made. Second, a covered entity may choose not to meet the requirement for informing the victim, if the covered entity actually would be informing a personal representative (such as a parent of a minor) and the covered entity reasonably believes that such person is responsible for the abuse, neglect, or other injury that has already occurred and that informing that person would not be in the individual's best interests.

Section 164.512(d)—Uses and Disclosures for Health Oversight Activities

Under § 164.510(c) of the NPRM, we proposed to permit covered entities to disclose protected health information to health oversight agencies for oversight activities authorized by law, including audit, investigation, inspection, civil, criminal, or

administrative proceeding or action, or other activity necessary for appropriate oversight of: (i) the health care system; (ii) government benefit programs for which health information is relevant to beneficiary eligibility; or (iii) government regulatory programs for which health information is necessary for determining compliance with program standards.

In § 164.512(d) of the final rule, we modify the proposed language to include civil and criminal investigations. In describing "other activities necessary for oversight" of particular entities, we add the phrase "entities subject to civil rights laws for which health information is necessary for determining compliance." In addition, in the final rule, we add "licensure or disciplinary actions" to the list of oversight activities authorized by law for which covered entities may disclose protected health information to health oversight agencies. The NPRM's definition of "health oversight agency" (in proposed § 164.504) included this phrase, but it was inadvertently excluded from the regulation text at proposed § 164.510(c). We make this change in the regulation text of the final rule to conform to the NPRM's definition of health oversight agency and to reflect the full range of activities for which we intend to allow covered entities to disclose protected health information to health oversight agencies.

The NPRM would have allowed, but would not have required, covered entities to disclose protected health information to public oversight agencies and to private entities acting under grant of authority from or under contract with oversight agencies for oversight purposes without individual authorization for health oversight activities authorized by law. When a covered entity was also an oversight agency, it also would have been permitted to use protected health information in all cases in which it would have been allowed to disclose such information for health oversight purposes. The NPRM would not have established any new administrative or judicial process prior to disclosure for health oversight, nor would it have permitted disclosures forbidden by other law. The proposed rule also would not have created any new right of access to health records by oversight agencies, and it could not have been used as authority to obtain records not otherwise legally available to the oversight agency.

The final rule retains this approach to health oversight. As in the NPRM, the final rule provides that when a covered entity is also an oversight agency, it is allowed to use protected health information in all cases in which it is allowed to disclose such information for health oversight purposes. For example, if a state insurance department is acting as a health plan in operating the state's Medicaid managed care program, the final rule allows the insurance department to use protected health information in all cases for which the plan can disclose the protected health information for health oversight purposes. For example, the state insurance department in its capacity as the state Medicaid managed care plan can use protected health information in the process of investigating and disciplining a state Medicaid provider for attempting to defraud the Medicaid system. As in the NPRM, the final rule does not establish any new administrative or judicial process prior to disclosure for health oversight, nor does it prohibit covered entities from making any disclosures for health oversight that are otherwise required by law. Like the NPRM, it does not create any new right of access to health records by oversight agencies and it cannot be used as authority to obtain records not otherwise legally available to the oversight agency.

Overlap Between Law Enforcement and Oversight

Under the NPRM, the proposed definitions of law enforcement and oversight, and the rules governing disclosures for these purposes ***82529** overlapped. Specifically, this overlap occurred because: (1) The NPRM preamble, but not the NPRM regulation text, indicated that agencies conducting both oversight and law enforcement activities would be subject to the oversight requirements when conducting oversight activities; and (2) the NPRM addressed some disclosures for investigations of health care fraud in the law enforcement paragraph (proposed § 164.510(f)(5)(i)), while health care fraud investigations are central to the purpose of health care oversight agencies (covered under proposed § 164.510(c)). In the final rule, we make substantial changes to these provisions, in an attempt to prevent confusion.

In § 164.512(d)(2), we include explicit decision rules indicating when an investigation is considered law enforcement and when an investigation is considered oversight under this regulation. An investigation or activity is not considered health oversight for purposes of this rule if: (1) The individual is the subject of the investigation or activity; and (2) The investigation or activity does not arise out of and is not directly related to: (a) The receipt of health care; (b) a claim for public benefits related to health; or (c) qualification for, or receipt of public benefits or services where a patient's health is integral to the claim for benefits or services. In such cases, where the individual is the subject of the investigation and the investigation does not relate to issues (a)

through (c), the rules regarding disclosure for law enforcement purposes (see § 164.512(f)) apply. For the purposes of this rule, we intend for investigations regarding issues (a) through (c) above to mean investigations of health care fraud.

Where the individual is not the subject of the activity or investigation, or where the investigation or activity relates to the subject matter in (a) through (c) of the preceding sentence, a covered entity may make a disclosure pursuant to § 164.512(d)(1). For example, when the U.S. Department of Labor's Pension and Welfare Benefits Administration (PWBA) needs to analyze protected health information about health plan enrollees in order to conduct an audit or investigation of the health plan (i.e., the enrollees are not subjects of the investigation) to investigate potential fraud by the plan, the health plan may disclose protected health information to the PWBA under the health oversight rules. These rules and distinctions are discussed in greater detail in our responses to comments.

To clarify further that health oversight disclosure rules apply generally in health care fraud investigations (subject to the exception described above), in the final rule, we eliminate proposed § 164.510(f)(5)(i), which would have established requirements for disclosure related to health care fraud for law enforcement purposes. All disclosures of protected health information that would have been permitted under proposed § 164.510(f)(5)(i) are permitted under § 164.512(d).

In the final rule, we add new language (§ 164.512(d)(3)) to address situations in which health oversight activities are conducted in conjunction with an investigation regarding a claim for public benefits not related to health (e.g., claims for Food Stamps). In such situations, for example, when a state Medicaid agency is working with the Food Stamps program to investigate suspected fraud involving Medicaid and Food Stamps, covered entities may disclose protected health information to the entities conducting the joint investigation under the health oversight provisions of the rule.

In the proposed rule, the definitions of “law enforcement proceeding” and “oversight activity” both included the phrase “criminal, civil, or administrative proceeding.” For reasons explained below, the final rule retains this phrase in both definitions. The final rule does not attempt to distinguish between these activities based on the agency undertaking them or the applicable enforcement procedures. Rather, as described above, the final rule carves out certain activities which must always be considered law enforcement for purposes of disclosure of protected health information under this rule.

Additional Considerations

We note that covered entities are permitted to initiate disclosures that are permitted under this paragraph. For example, a covered entity could disclose protected health information in the course of reporting suspected health care fraud to a health oversight agency.

We delete language in the NPRM that would have allowed disclosure under this section only to law enforcement officials conducting or supervising an investigation, official inquiry, or a criminal, civil or administrative proceeding authorized by law. In some instances, a disclosure by a covered entity under this section will initiate such an investigation or proceeding, but it will not already be ongoing at the time the disclosure is made.

Section 164.512(e)—Disclosures and Uses for Judicial and Administrative Proceedings

Section 164.512(e) addresses when a covered entity is permitted to disclose protected health information in response to requests for protected health information that are made in the course of judicial and administrative proceedings—for example, when a non-party health care provider receives a subpoena (under Federal Rule of Civil Procedure Rule 45 or similar provision) for medical records from a party to a law suit. In the NPRM we would have allowed covered entities to disclose protected health information in the course of any judicial or administrative proceeding: (1) In response to an order of a court or administrative tribunal; or (2) where an individual was a party to the proceeding and his or her medical condition or history was at issue and the disclosure was pursuant to lawful process or otherwise authorized by law. Under the NPRM, if the request for disclosure of protected health information was accompanied by a court order, a covered entity could have disclosed that protected health information which the court order authorized to be disclosed. If the request for disclosure of protected health information were

not accompanied by a court order, covered entities could not have disclosed the information requested unless a request authorized by law had been made by the agency requesting the information or by legal counsel representing a party to litigation, with a written statement certifying that the protected health information requested concerned a litigant to the proceeding and that the health condition of the litigant was at issue at the proceeding.

In § 164.512(e) of the final rule, we permit covered entities to disclose protected health information in a judicial or administrative proceeding if the request for such protected health information is made through or pursuant to an order from a court or administrative tribunal or in response to a subpoena or discovery request from, or other lawful process by a party to the proceeding. When a request is made pursuant to an order from a court or administrative tribunal, a covered entity may disclose the information requested without additional process. For example, a subpoena issued by a court constitutes a disclosure which is required by law as defined in this rule, and nothing in this rule is intended to interfere with the ability of the covered entity to comply with such subpoena. ***82530**

However, absent an order of, or a subpoena issued by, a court or administrative tribunal, a covered entity may respond to a subpoena or discovery request from, or other lawful process by, a party to the proceeding only if the covered entity obtains either: (1) Satisfactory assurances that reasonable efforts have been made to give the individual whose information has been requested notice of the request; or (2) satisfactory assurances that the party seeking such information has made reasonable efforts to secure a protective order that will guard the confidentiality of the information. In meeting the first test, a covered entity is considered to have received satisfactory assurances from the party seeking the information if that party demonstrates that it has made a good faith effort (such as by sending a notice to the individual's last known address) to provide written notice to the individual whose information is the subject of the request, that the written notice included sufficient information about the proceeding to permit the individual to raise an objection, and that the time for the individual to raise objections to the court or administrative tribunal has elapsed and no objections were filed or any objections filed by the individual have been resolved.

Unless required to do so by other law, the covered entity is not required to explain the procedures (if any) available for the individual to object to the disclosure. Under the rule, the individual exercises the right to object before the court or other body having jurisdiction over the proceeding, and not to the covered entity. The provisions in this paragraph are not intended to disrupt current practice whereby an individual who is a party to a proceeding and has put his or her medical condition at issue will not prevail without consenting to the production of his or her protected health information. In such cases, we presume that parties will have ample notice and an opportunity to object in the context of the proceeding in which the individual is a party.

As described above, in this paragraph we also permit a covered entity to disclose protected health information in response to a subpoena, discovery request, or other lawful process if the covered entity receives satisfactory assurances that the party seeking the information has made reasonable efforts to seek a qualified protective order that would protect the privacy of the information. A “qualified protective order” means an order of a court or of an administrative tribunal or a stipulation that: (1) Prohibits the parties from using or disclosing the protected health information for any purpose other than the litigation or proceeding for which the records are requested; and (2) requires the return to the covered entity or destruction of the protected health information (including all copies made) at the end of the litigation or proceeding. Satisfactory assurances of reasonable efforts to secure a qualified protective order are a statement and documentation that the parties to the dispute have agreed to a protective order and that it has been submitted to the court or administrative tribunal with jurisdiction, or that the party seeking the protected health information has requested a qualified protective order from such court or tribunal. We encourage the development of “model” protective orders that will facilitate adherence with this subpart.

In the final rule we also permit the covered entity itself to satisfy the requirement to make reasonable efforts to notify the individual whose information has been requested or to seek a qualified protective order. We intend this to be a permissible activity for covered entities: we do not require covered entities to undertake these efforts in response to a subpoena, discovery request, or similar process (other than an order from a court or administrative tribunal). If a covered entity receives such a request without receiving the satisfactory assurances described above from the party requesting the information, the covered entity is free to object to the disclosure and is not required to undertake the reasonable efforts itself.

We clarify that the provisions of this paragraph do not supersede or otherwise invalidate other provisions of this rule that permit uses and disclosures of protected health information. For example, the fact that protected health information is the subject of a matter before a court or tribunal does not prevent its disclosure under another provision of the rule, such as §§ 164.512(b), 164.512(d), or 164.512(f), even if a public agency's method of requesting the information is pursuant to an administrative proceeding. For example, where a public agency commences a disciplinary action against a health professional, and requests protected health information as part of its investigation, the disclosure made be made to the agency under paragraph (d) of this section (relating to health oversight) even if the method of making the request is through the proceeding. As with any request for disclosure under this section, the covered entity will need to verify the authority under which the request is being made, and we expect that public agencies will identify their authority when making such requests. We note that covered entities may reasonably rely on assertions of authority made by government agencies.

Additional Considerations

Where a disclosure made pursuant to this paragraph is required by law, such as in the case of an order from a court or administrative tribunal, the minimum necessary requirements in § 164.514(d) do not apply to disclosures made under this paragraph. A covered entity making a disclosure under this paragraph, however, may of course disclose only that protected health information that is within the scope of the permitted disclosure. For instance, in response to an order of a court or administrative tribunal, the covered entity may disclose only the protected health information that is expressly authorized by such an order. Where a disclosure is not considered under this rule to be required by law, the minimum necessary requirements apply, and the covered entity must make reasonable efforts to limit the information disclosed to that which is reasonably necessary to fulfill the request. A covered entity is not required to second guess the scope or purpose of the request, or take action to resist the request because they believe that it is over broad. In complying with the request, however, the covered entity must make reasonable efforts not to disclose more information than is requested. For example, a covered entity may not provide a party free access to its medical records under the theory that the party can identify the information necessary for the request. In some instances, it may be appropriate for a covered entity, presented with a relatively broad discovery request, to permit access to a relatively large amount of information in order for a party to identify the relevant information. This is permissible as long as the covered entity makes reasonable efforts to circumscribe the access as appropriate.

The NPRM indicated that when a covered entity was itself a government agency, the covered entity could use protected health information in all cases in which it would have been allowed to disclose such information in the course of any judicial or administrative proceeding. As explained above, the final rule does not include this provision. ***82531**

Section 164.512(f)—Disclosure for Law Enforcement Purposes

Disclosures Pursuant to Process and as Otherwise Required by Law

In the NPRM we would have allowed covered entities to disclose protected health information without individual authorization as required by other law. However, as explained above, if a legally mandated use or disclosure fell into one or more of the national priority purposes expressly identified in other paragraphs of proposed § 164.510, the disclosure would have been subject to the terms and conditions specified by the applicable paragraph of proposed § 164.510. For example, mandatory reporting to law enforcement officials would not have been allowed unless such disclosures conformed to the requirements of proposed § 164.510(f) of the NPRM. Proposed § 164.510(f) did not explicitly recognize disclosures required by other laws, and it would not have permitted covered entities to comply with some state and other mandatory reporting laws that require covered entities to disclose protected health information to law enforcement officials, such as the reporting of gun shot wounds, stab wounds, and/or burn injuries.

We did not intend to preempt generally state and other mandatory reporting laws, and in § 164.512(f)(1)(i) of the final rule, we explicitly permit covered entities to disclose protected health information for law enforcement purposes as required by other law. This provision permits covered entities to comply with these state and other laws. Under this provision, to the extent that

a mandatory reporting law falls under the provisions of § 164.512(c)(1)(i) regarding reporting of abuse, neglect, or domestic violence, the requirements of those provisions supersede.

In the final rule, we specify that covered entities may disclose protected health information pursuant to this provision in compliance with and as limited by the relevant requirements of legal process or other law. In the NPRM, for the purposes of this portion of the law enforcement paragraph, we proposed to define "law enforcement inquiry or proceeding" as an investigation or official proceeding inquiring into a violation of or failure to comply with law; or a criminal, civil or administrative proceeding arising from a violation of or failure to comply with law. In the final rule, we do not include this definition in § 164.512(f), because it is redundant with the definition of "law enforcement official" in § 164.501.

Proposed § 164.510(f)(1) of the NPRM would have authorized disclosure of protected health information to a law enforcement official conducting or supervising a law enforcement inquiry or proceeding authorized by law pursuant to process, under three circumstances.

First, we proposed to permit such disclosures pursuant to a warrant, subpoena, or other order issued by a judicial officer that documented a finding by the officer. The NPRM did not specify requirements for the nature of the finding. In the final rule, we eliminate the requirement for a "finding," and we make changes to the list of orders in response to which covered entities may disclose under this provision. Under the final rule, covered entities may disclose protected health information in compliance with and as limited by relevant requirements of: a court order or court-ordered warrant, or a subpoena or summons issued by a judicial officer. We made this change to the list to conform to the definition of "required by law" in § 164.501.

Second, we proposed to permit such disclosures pursuant to a state or federal grand jury subpoena. In the final rule, we leave this provision of the NPRM unchanged.

Third, we proposed to permit such disclosures pursuant to an administrative request, including an administrative subpoena or summons, a civil investigative demand, or similar process, under somewhat stricter standards than exist today for such disclosures. We proposed to permit a covered entity to disclose protected health information pursuant to an administrative request only if the request met three conditions, as follows: (i) The information sought was relevant and material to a legitimate law enforcement inquiry; (ii) the request was as specific and narrowly drawn as reasonably practicable; and (iii) de-identified information could not reasonably have been used to meet the purpose of the request.

The final rules generally adopts this provision of the NPRM. In the final rule, we modify the list of orders in response to which covered entities may disclose protected health information, to include administrative subpoenas or summons, civil or authorized investigative demands, or similar process authorized by law. We made this change to the list to conform with the definition of "required by law" in § 164.501. In addition, we slightly modify the second of the three conditions under which covered entities may respond to such requests, to allow disclosure if the request is specific and is limited in scope to the extent reasonably practicable in light of the purpose for which the information is sought.

Limited Information for Identification and Location Purposes

The NPRM would have allowed covered entities to disclose "limited identifying information" for purposes of identifying a suspect, fugitive, material witness, or missing person, in response to a law enforcement request. We proposed to define "limited identifying information" as (i) name; (ii) address; (iii) Social Security number; (iv) date of birth; (v) place of birth; (vi) type of injury or other distinguishing characteristic; and (vii) date and time of treatment.

The final rules generally adopts this provision of the NPRM with a few modifications. In the final rule, we expand the circumstances under which limited information about suspects, fugitives, material witnesses, and missing persons may be disclosed, to include not only cases in which law enforcement officials are seeking to identify such individuals, but also cases in which law enforcement officials are seeking to locate such individuals. In addition, the final rule modifies the list of data elements that may be disclosed under this provision, in several ways. We expand the list of elements that may be disclosed under

these circumstances, to include ABO blood type and Rh factor, as well as date and time of death, if applicable. We remove "other distinguishing characteristic" from the list of items that may be disclosed for the location and identification purposes described in this paragraph, and instead allow covered entities to disclose only a description of distinguishing physical characteristics, such as scars and tattoos, height, weight, gender, race, hair and eye color, and the presence or absence of facial hair such as a beard or moustache. In addition, in the final rule, protected health information associated with the following cannot be disclosed pursuant to § 164.512(f)(2): DNA data and analyses; dental records; or typing, samples or analyses of tissues or bodily fluids other than blood (e.g., saliva). If a covered entity discloses additional information under this provision, the covered entity will be out of compliance and subject to sanction.

We clarify our intent not to allow covered entities to initiate disclosures of limited identifying information to law enforcement in the absence of a law enforcement request; a covered entity may disclose protected health information under this provision only in response to a request from law enforcement. We allow a "law enforcement official's request" to be ***82532** made orally or in writing, and we intend for it to include requests by a person acting on behalf of law enforcement, for example, requests by a media organization making a television or radio announcement seeking the public's assistance in identifying a suspect. Such a request also may include a "Wanted" poster and similar postings.

Disclosure About a Victim of Crime

The NPRM would have allowed covered entities to disclose protected health information about a victim of a crime, abuse or other harm to a law enforcement official, if the law enforcement official represented that: (i) The information was needed to determine whether a violation of law by a person other than the victim had occurred; and (ii) immediate law enforcement activity that depended on obtaining the information may have been necessary.

The final rule modifies the conditions under which covered entities can disclose protected health information about victims. In addition, as discussed above, the final rule includes a new § 164.512(c), which establishes conditions for disclosure of protected health information about victims of abuse, neglect or domestic violence. In addition, as discussed above, we have added § 164.512(f)(1)(i) to this paragraph to explicitly recognize that in some cases, covered entities' disclosure of protected health information is mandated by state or other law. The rule's requirements for disclosure in situations not covered under mandatory reporting laws are different from the rule's provisions regarding disclosure pursuant to a mandatory reporting law.

The final rule requires covered entities to obtain individual agreement as a condition of disclosing the protected health information about victims to law enforcement, unless the disclosure is permitted under § 164.512(b) or (c) or § 164.512(f)(1) above. The required agreement may be obtained orally, and does not need to meet the requirements of § 164.508 of this rule (regarding authorizations). The rule waives the requirement for individual agreement if the victim is unable to agree due to incapacity or other emergency circumstance and: (1) The law enforcement official represents that the protected health information is needed to determine whether a violation of law by a person other than the victim has occurred and the information is not intended to be used against the victim; (2) the law enforcement official represents that immediate law enforcement activity that depends on such disclosure would be materially and adversely affected by waiting until the individual is able to agree to the disclosure; and (3) the covered entity, in the exercise of professional judgment, determines that the disclosure is in the individual's best interests. We intend that assessing the individual's best interests includes taking into account any further risk of harm to the individual. This provision does not allow covered entities to initiate disclosures of protected health information to law enforcement; the disclosure must be in response to a request from law enforcement.

We do not intend to create a new legal duty on the part of covered entities with respect to the safety of their patients. Rather, we intend to ensure that covered entities can continue to exercise their professional judgment in these circumstances, on a case-by-case basis, as they do today.

In some cases, a victim may also be a fugitive or suspect. For example, an individual may receive a gunshot wound during a robbery and seek treatment in a hospital emergency room. In such cases, when law enforcement officials are requesting protected health information because the individual is a suspect (and thus the information may be used against the individual), covered

entities may disclose the protected health information pursuant to § 164.512(f)(2) regarding suspects and not pursuant to § 164.512(f)(3) regarding victims. Thus, in these situations, covered entities may disclose only the limited identifying information listed in § 164.512(f)(2)—not all of the protected health information that may be disclosed under § 164.512(f)(3).

The proposed rule did not address whether a covered entity could disclose protected health information to a law enforcement official to alert the official of the individual's death.

Disclosures About Decedents

In the final rule, we add a new provision § 164.512(f)(4) in which we permit covered entities to disclose protected health information about an individual who has died to a law enforcement official for the purpose of alerting law enforcement of the death if the covered entity has a suspicion that such death may have resulted from criminal conduct. In such circumstances consent of the individual is not available and it may be difficult to determine the identity of a personal representative and gain consent for disclosure of protected health information. Permitting disclosures in this circumstance will permit law enforcement officials to begin their investigation into the death more rapidly, increasingly the likelihood of success.

Intelligence and National Security Activities

Section 164.510(f)(4) of the NPRM would have allowed covered entities to disclose protected health information to a law enforcement official without individual authorization for the conduct of lawful intelligence activities conducted pursuant to the National Security Act of 1947 (50 U.S.C. 401 et seq.) or in connection with providing protective services to the President or other individuals pursuant to section 3056 of title 18, United States Code. In the final rule, we move provisions regarding disclosures of protected health information for intelligence and protective services activities to § 164.512(k) regarding uses and disclosures for specialized government functions.

Criminal Conduct on the Premises of a Covered Entity

The NPRM would have allowed covered entities on their own initiative to disclose to law enforcement officials protected health information that the covered entity believed in good faith constituted evidence of criminal conduct that arose out of and was directly related to: (A) The receipt of health care or payment for health care, including a fraudulent claim for health care; (B) qualification for or receipt of benefits, payments, or services based on a fraudulent statement or material misrepresentation of the health of the individual; that occurred on the covered entity's premises or was witnessed by a member of the covered entity's workforce.

In the final rule, we modify this provision substantially, by eliminating language allowing disclosures already permitted in other sections of the regulation. The proposed provision overlapped with other sections of the NPRM, in particular proposed § 164.510(c) regarding disclosure for health oversight activities. In the final regulation, we clarify that this provision applies only to disclosures to law enforcement officials of protected health information that the covered entity believes in good faith constitutes evidence of a crime committed on the premises. We eliminate proposed § 164.510(f)(5)(i) regarding health care fraud from the law enforcement section, because all disclosures that would have been allowed under that provision are allowed under § 164.512(d) of the final rule (health oversight). Similarly, in the final rule, we eliminate proposed ***82533** § 164.510(f)(5)(iii) on disclosure of protected health information to law enforcement officials regarding criminal activity witnessed by a member of a health plan workforce. All disclosures that would have been permitted by that provision are included in § 164.512(f)(5), which allows disclosure of information to report a crime committed on the covered entity's premises, and by § 164.502, which provides that a covered entity is not in violation of the rule when a member of its workforce or person working for a business associate uses or discloses protected health information while acting as a “whistle blower.” Thus, § 164.512(f)(5) allows covered entities to disclose health information only on the good faith belief that it constitutes evidence of a crime on their premises. The preamble to the NPRM said that if the covered entity disclosed protected health information in good faith but was wrong in its belief that the information was evidence of a violation of law, the covered entity would not be subject to sanction under this regulation. The final rule retains this approach.

Reporting Crime in Emergencies

The proposed rule did not address disclosures by emergency medical personnel to a law enforcement official intended to alert law enforcement about the commission of a crime. Because the provisions of proposed rule were limited to individually identifiable health information that was reduced to electronic form, many communications that occur between emergency medical personnel and law enforcement officials at the scene of a crime would not have been covered by the proposed provisions.

In the final rule we include a new provision § 164.512(f)(6) that addresses "911" calls for emergency medical technicians as well as other emergency health care in response to a medical emergency. The final rule permits a covered health care provider providing emergency health care in response to a medical emergency, other than such emergency on the premises of the covered health care provider, to disclose protected health information to a law enforcement official if such disclosure appears necessary to alert law enforcement to (1) the commission and nature of a crime, (2) the location of such crime or of the victim(s) of such crime, and (3) the identity, description, and location of the perpetrator of such crime. A disclosure is not permitted under this section if health care provider believes that the medical emergency is the result of abuse, neglect, or domestic violence of the individual in need of emergency health care. In such cases, disclosures to law enforcement would be governed by paragraph (c) of this section.

This added provision recognizes the special role of emergency medical technicians and other providers who respond to medical emergencies. In emergencies, emergency medical personnel often arrive on the scene before or at the same time as police officers, firefighters, and other emergency response personnel. In these cases, providers may be in the best position, and sometimes be the only ones in the position, to alert law enforcement about criminal activity. For instance, providers may be the first persons aware that an individual has been the victim of a battery or an attempted murder. They may also be in the position to report in real time, through use of radio or other mechanism, information that may immediately contribute to the apprehension of a perpetrator of a crime.

We note that disclosure under this provision is at the discretion of the health care provider. Disclosures in some instances may be governed more strictly, such as by applicable ethical standards and state and local laws.

Finally, the NPRM also included a proposed § 164.510(f)(5), which duplicated proposed § 164.510(f)(3). The final rule does not include this duplicate provision.

Additional Considerations

As stated in the NPRM, this paragraph is not intended to limit or preclude a covered entity from asserting any lawful defense or otherwise contesting the nature or scope of the process when the procedural rules governing the proceeding so allow. At the same time, it is not intended to create a basis for appealing to federal court concerning a request by state law enforcement officials. Each covered entity will continue to have available legal procedures applicable in the appropriate jurisdiction to contest such requests where warranted.

As was the case with the NPRM, this rule does not create any new affirmative requirement for disclosure of protected health information. Similarly, this section is not intended to limit a covered entity from disclosing protected health information to law enforcement officials where other sections of the rule permit such disclosure, e.g., as permitted by § 164.512(j) to avert an imminent threat to health or safety, for health oversight activities, to coroners or medical examiners, and in other circumstances permitted by the rule. For additional provisions permitting covered entities to disclose protected health information to law enforcement officials, see § 164.512(j)(1)(i) and (ii).

Under the NPRM and under the final rule, to obtain protected health information, law enforcement officials must comply with whatever other law is applicable. In certain circumstances, while this provision could authorize a covered entity to disclose protected health information to law enforcement officials, there could be additional applicable statutes or rules that further

govern the specific disclosure. If the preemption provisions of this regulation do not apply, the covered entity must comply with the requirements or limitations established by such other law, regulation or judicial precedent. See §§ 160.201 through 160.205. For example, if state law permits disclosure only after compulsory process with court review, a provider or payor is not allowed to disclose information to state law enforcement officials unless the officials have complied with that requirement. Similarly, disclosure of substance abuse patient records subject to, 42 U.S.C. 290dd-2, and the implementing regulations, 42 CFR part 2, continue to be governed by those provisions.

In some instances, disclosure of protected health information to law enforcement officials will be compelled by other law, for example, by compulsory judicial process or compulsory reporting laws (such as laws requiring reporting of wounds from violent crimes, suspected child abuse, or suspected theft of controlled substances). As discussed above, disclosure of protected health information under such other mandatory law is permitted under § 164.512(a).

In the responses to comments we clarify that items such as cells and tissues are not protected health information, but that analyses of them is. The same treatment would be given other physical items, such as clothing, weapons, or a bloody knife. We note, however, that while these items are not protected health information and may be disclosed, some communications that could accompany the disclosure will be protected health information under the rule. For example, if a person provides cells to a researcher, and tells the researcher that these are an identified individual's cancer cells, that accompanying statement is protected health information about that individual. Similarly, if a person provides a bullet to law enforcement, and tells law enforcement that the bullet was extracted from an identified ***82534** individual, the person has disclosed the fact that the individual was treated for a wound, and the additional statement is a disclosure of protected health information.

To be able to make the additional statement accompanying the provision of the bullet, a covered entity must look to the rule to find a provision under which a disclosure may be made to law enforcement. Section 164.512(f) of the rule addresses disclosures for law enforcement purposes. Under § 164.512(f)(1), the additional statement may be disclosed to a law enforcement official if required by law or with appropriate process. Under § 164.512(f)(2), we permit covered entities to disclose limited identifying information without legal process in response to a request from a law enforcement official for the purpose of identifying or locating a suspect, fugitive, material witness, or missing person. Thus, in the case of bullet described above, the covered entity may, in response to a law enforcement request, provide the extracted bullet and such additional limited identifying information as is permitted under § 164.512(f)(2).

Section 164.512(g)—Uses and Disclosures About Decedents

In the NPRM we proposed to allow covered entities to disclose protected health information without individual authorization to coroners and medical examiners, consistent with applicable law, for identification of a deceased person or to determine cause of death.

In § 164.512(g) of the final rule, we permit covered entities to disclose protected health information to coroners, medical examiners, and funeral directors as part of a new paragraph on disclosures related to death. The final rule retains the NPRM approach regarding disclosure of protected health information to coroners and medical examiners, and it allows the information disclosed to coroners and medical examiners to include identifying information about other persons that may be included in the individual's medical record. Redaction of such names is not required prior to disclosing the individual's record to coroners or medical examiners. Since covered entities may also perform duties of a coroner or medical examiner, where a covered entity is itself a coroner or medical examiner, the final rule permits the covered entity to use protected health information in all cases in which it is permitted to disclose such information for its duties as a coroner or medical examiner.

Section 164.512(g) allows covered entities to disclose protected health information to funeral directors, consistent with applicable law, as necessary to carry out their duties with respect to a decedent. For example, the rule allows hospitals to disclose to funeral directors the fact that an individual has donated an organ or tissue, because this information has implications for funeral home staff duties associated with embalming. When necessary for funeral directors to carry out their duties, covered entities may disclose protected health information prior to and in reasonable anticipation of the individual's death.

Whereas the NPRM did not address the issue of disclosure of psychotherapy notes without individual authorization to coroners and medical examiners, the final rule allows such disclosures.

The NPRM did not include in proposed § 164.510(e) language stating that where a covered entity was itself a coroner or medical examiner, it could use protected health information for the purposes of engaging in a coroner's or a medical examiner's activities. The final rule includes such language to address situations such as where a public hospital performs medical examiner functions. In such cases, the hospital's on-staff coroners can use protected health information while conducting post-mortem investigations, and other hospital staff can analyze any information associated with these investigations, for example, as part of the process of determining the cause of the individual's death.

Section 164.512(h)—Uses and Disclosures for Cadaveric Donation of Organs, Eyes, or Tissues

In the NPRM we proposed to include the procurement or banking of blood, sperm, organs, or any other tissue for administration to patients in the definition of "health care" (described in proposed § 160.103). The NPRM's proposed approach did not differentiate between situations in which the donor was competent to consent to the donation—for example, when an individual is donating blood, sperm, a kidney, or a liver or lung lobe—and situations in which the donor was deceased, for example, when cadaveric organs and tissues were being donated. We also proposed to allow use and disclosure of protected health information for treatment without consent.

In the final rule, we take a different approach. In § 164.512(h), we permit covered entities to disclose protected health information without individual authorization to organ procurement organizations or other entities engaged in the procurement, banking, or transplantation of cadaveric organs, eyes, or tissue for donation and transplantation. This provision is intended to address situations in which an individual has not previously indicated whether he or she seeks to donate organs, eyes, or tissues (and therefore authorized release of protected health information for this purpose). In such situations, this provision is intended to allow covered entities to initiate contact with organ and tissue donation and transplantation organizations to facilitate transplantation of cadaveric organs, eyes, and tissues.

Disclosures and Uses for Government Health Data Systems

In the NPRM we proposed to permit covered entities to disclose protected health information to a government agency, or to a private entity acting on behalf of a government agency, for inclusion in a government health data system collecting health data for analysis in support of policy, planning, regulatory, or management functions authorized by law. The NPRM stated that when a covered entity was itself a government agency collecting health data for these functions, it could use protected health information in all cases for which it was permitted to disclose such information to government health data systems.

In the final rule, we eliminate the provision that would have allowed covered entities to disclose protected health information to government health data systems without authorization. Thus, under the final rule, covered entities cannot disclose protected health information without authorization to government health data systems—or to private health data systems—unless the disclosure is permissible under another provision of the rule.

Disclosures for Payment Processes

In the NPRM we proposed to permit covered entities to disclose, in connection with routine banking activities or payment by debit, credit, or other payment card, or other payment means, the minimum amount of protected health information necessary to complete a banking or payment activity to financial institutions or to entities acting on behalf of financial institutions to authorize, process, clear, settle, bill, transfer, reconcile, or collect payments for financial institutions.

The preamble to the NPRM clarified the proposed rule's intent regarding disclosure of diagnostic and treatment information along with payment ***82535** information to financial institutions. The preamble to the proposed rule said that diagnostic and

treatment information never was necessary to process a payment transaction. The preamble said we believed that in most cases, the permitted disclosure would include only: (1) The name and address of the account holder; (2) the name and address of the payor or provider; (3) the amount of the charge for health services; (4) the date on which health services were rendered; (5) the expiration date for the payment mechanism, if applicable; and (6) the individual's signature. The preamble noted that the proposed regulation text did not include an exclusive list of information that could lawfully be disclosed to process payments, and it solicited comments on whether more elements would be needed for banking and payment transactions and on whether including a specific list of protected health information that could be disclosed was an appropriate approach.

The preamble also noted that under section 1179 of HIPAA, certain activities of financial institutions were exempt from this rule, to the extent that these activities constituted authorizing, processing, clearing, settling, billing, transferring, reconciling, or collecting payments for health care or health plan premiums.

In the final rule, we eliminate the NPRM's provision on “banking and payment processes.” All disclosures that would have been allowed pursuant to proposed § 164.510(i) are allowed under § 164.502(a) of the final rule, regarding disclosure for payment purposes.

Section 164.512(i)—Uses and Disclosures for Research Purposes

The NPRM would have permitted covered entities to use and disclose protected health information for research—regardless of funding source—without individual authorization, provided that the covered entity obtained documentation of the following:

(1) A waiver, in whole or in part, of authorization for the use or disclosure of protected health information was approved by an Institutional Review Board (IRB) or a privacy board that was composed as stipulated in the proposed rule;

(2) The date of approval of the waiver, in whole or in part, of authorization by an IRB or privacy board;

(3) The IRB or privacy board had determined that the waiver, in whole or in part satisfied the following criteria:

(i) The use or disclosure of protected health information involves no more than minimal risk to the subjects;

(ii) The waiver will not adversely affect the rights and welfare of the subjects;

(iii) The research could not practicably be conducted without the waiver;

(iv) Whenever appropriate, the subjects will be provided with additional pertinent information after participation;

(v) The research could not practicably be conducted without access to and use of the protected health information;

(vi) The research is of sufficient importance so as to outweigh the intrusion of the privacy of the individual whose information is subject to the disclosure;

(vii) There is an adequate plan to protect the identifiers from improper use and disclosure; and

(viii) There is an adequate plan to destroy the identifiers at the earliest opportunity consistent with the conduct of the research, unless there is a health or research justification for retaining the identifiers; and

(4) The written documentation was signed by the chair of, as applicable, the IRB or the privacy board.

The NPRM also proposed that IRBs and privacy boards be permitted to adopt procedures for "expedited review" similar to those provided in the Common Rule (Common Rule §__.110) for records research that involved no more than minimal risk. However, this provision for expedited review was not included in the proposed regulation text.

The board that would determine whether the research protocol met the eight specified criteria for waiving the patient authorization requirements (described above), could have been an IRB constituted as required by the Common Rule, or a privacy board, whose proposed composition is described below. The NPRM proposed no requirements for the location or sponsorship of the IRB or privacy board. Under the NPRM, the covered entity could have created such a board and could have relied on it to review research proposals for uses and disclosures of protected health information for research. A covered entity also could have relied on the necessary documentation from an outside researcher's own university IRB or privacy board. In addition, a covered entity could have engaged the services of an outside IRB or privacy board to obtain the necessary documentation.

Absent documentation that the requirements described above had been met, the NPRM would have required individuals' authorization for the use or disclosure of protected health information for research, pursuant to the authorization requirements in proposed § 164.508. For research conducted with patient authorization, documentation of IRB or privacy board approval would not have been required.

The final rule retains the NPRM's proposed framework for permitting uses and disclosures of protected health information for research purposes, although we are making several important changes for the final rule. These changes are discussed below:

Documentation Requirements of IRB or Privacy Board Approval of Waiver

The final rule retains these documentation requirements, but modifies some of them and includes two additional documentation requirements. The final rule's modifications to the NPRM's proposed documentation requirements are described first, followed by a description of the three documentation requirements added in the final rule.

The final rule makes the following modifications to the NPRM's proposed documentation requirements for the waiver of individual authorization:

1. IRB and privacy board membership. The NPRM stipulated that to meet the requirements of proposed § 164.510(j), the documentation would need to indicate that the IRB had been composed as required by the Common Rule (§__. 107), and the privacy board had been composed as follows: "(A) Has members with varying backgrounds and appropriate professional competency as necessary to review the research protocol; (B) Includes at least one member who is not affiliated with the entity conducting the research, or related to a person who is affiliated with such entity; and (C) Does not have any member participating in a review of any project in which the member has a conflict of interest" (§ 164.510(j)(1)(ii)).

The final rule modifies the first of the requirements for the composition of a privacy board to focus on the effect of the research protocol on the individual's privacy rights and related interests. Therefore, under the final rule, the required documentation must indicate that the privacy board has members with varying backgrounds and appropriate professional competency as necessary to review the effect of the research protocol on the individual's privacy rights and related interests.

In addition, the final rule further restricts the NPRM's proposed requirement that the privacy board include at least one member who was ***82536** not affiliated with the entity conducting the research, or related to a person who is affiliated with such entity. Under the final rule, the board must include at least one member who is not affiliated with the covered entity, not affiliated with any entity conducting or sponsoring the research, and not related to any person who is affiliated with such entities.

The other documentation requirements for the composition of an IRB and privacy board remain the same.

2. Waiver of authorization criteria. The NPRM proposed to prohibit the use or disclosure of protected health information for research without individual authorization as stipulated in proposed § 164.508 unless the covered entity had documentation indicating that an IRB or privacy board had determined that the following waiver criteria had been met:

(i) The use or disclosure of protected health information involves no more than minimal risk to the subjects;

(ii) The waiver will not adversely affect the rights and welfare of the subjects;

(iii) The research could not practicably be conducted without the waiver;

(iv) Whenever appropriate, the subjects will be provided with additional pertinent information after participation;

(v) The research could not be practicably be conducted without access to and use of the protected health information;

(vi) The research is of sufficient importance so as to outweigh the intrusion of the privacy of the individual whose information is subject to the disclosure;

(vii) There is an adequate plan to protect the identifiers from improper use and disclosure; and

(viii) There is an adequate plan to destroy the identifiers at the earliest opportunity consistent with the conduct of the research, unless there is a health or research justification for retaining the identifiers.

The final rule continues to permit the documentation of IRB or privacy board approval of a waiver of an authorization as required by § 164.508, to indicate that only some or all of the § 164.508 authorization requirements have been waived. In addition, the final rule clarifies that the documentation of IRB or privacy board approval may indicate that the authorization requirements have been altered. Also, for all of the proposed waiver of authorization criteria that used the term "subject," we replace this term with the term "individual" in the final rule.

In addition, the final rule (1) eliminates proposed waiver criterion iv, (2) modifies proposed waiver criteria ii, iii, vi, and viii, and (3) adds a waiver criterion.

Proposed waiver criterion ii (waiver criterion § 164.512(i)(2)(ii)(B) in the final rule) is revised as follows to focus more narrowly on the privacy interests of individuals, and to clarify that it also pertains to alterations of individual authorization: "the alteration or waiver will not adversely affect the privacy rights and the welfare of the individuals." Under criterion § 164.512(i)(2)(ii)(B), the question is whether the alteration or waiver of individual authorization would adversely affect the privacy rights and the welfare of individuals, not whether the research project itself would adversely affect the privacy rights or the welfare of individuals.

Proposed waiver criterion iii (waiver criterion § 164.512(i)(2)(ii)(C) in the final rule) is revised as follows to clarify that it also pertains to alterations of individual authorization: "the research could not practicably be conducted without the alteration or waiver."

Proposed waiver criterion vi (waiver criterion § 164.512(i)(2)(ii)(E) in the final rule) is revised as follows to be more consistent with one of the Common Rule's requirements for the approval of human subjects research (Common Rule, §__.111(a)(2)): "the privacy risks to individuals whose protected health information is to be used or disclosed are reasonable in relation to anticipated benefits if any to individuals, and the importance of the knowledge that may reasonably be expected to result from the research." Under criterion § 164.512(i)(2)(ii)(E), the question is whether the risks to an individual's privacy from participating in the research are reasonable in relation to the anticipated benefits from the research. This criterion is unlike waiver criterion

§ 164.512(i)(2)(ii)(B) in that it focuses on the privacy risks and benefits of the research project more broadly, not on the waiver of individual authorization.

Proposed waiver criterion viii (waiver criterion § 164.512(i)(2)(ii)(G) in the final rule) is revised as follows: "there is an adequate plan to destroy the identifiers at the earliest opportunity consistent with the conduct of the research, unless there is a health or research justification for retaining the identifiers, or such retention is otherwise required by law."

In addition, the final rule includes another waiver criterion: waiver criterion § 164.512(i)(2)(ii)(H). The NPRM proposed no restriction on a researcher's further use or disclosure of protected health information that had been received under proposed § 164.510(j). The final rule requires that the covered entity obtain written agreement from the person or entity receiving protected health information under § 164.512(i) not to re-use or disclose protected health information to any other person or entity, except: (1) As required by law, (2) for authorized oversight of the research project, or (3) for other research for which the use or disclosure of protected health information would be permitted by this subpart. For instance, in assessing whether this criterion has been met, we encourage IRBs and privacy boards to obtain adequate assurances that the protected health information will not be disclosed to an individual's employer for employment decisions without the individual's authorization.

3. Required signature. The rule broadens the types of individuals who are permitted to sign the required documentation of IRB or privacy board approval. The final rule requires the documentation of the alteration or waiver of authorization to be signed by (1) the chair of, as applicable, the IRB or the privacy board, or (2) a member of the IRB or privacy board, as applicable, who is designated by the chair to sign the documentation.

Furthermore, the final rule makes the following three additions to the proposed documentation requirements for the alteration or waiver of authorization:

1. Identification of the IRB or privacy board. The NPRM did not propose that the documentation of waiver include a statement identifying the IRB or privacy board that approved the waiver of authorization. In the final rule we require that such a statement be included in the documentation of alteration or waiver of individual authorization. By this requirement we mean that the name of the IRB or privacy board must be included in such documentation, not the names of individual members of the board.

2. Description of protected health information approved for use or disclosure. The NPRM did not propose that the documentation of waiver include a description of the protected health information that the IRB or privacy board had approved for use or disclosure without individual authorization. In considering waiver of authorization criterion § 164.512(i)(2)(ii)(D), we expect the IRB or privacy board to consider the amount of information that is minimally needed for the study. The final rule requires that the documentation of IRB or ***82537** privacy board approval of the alteration or waiver of authorization describe the protected health information for which use or access has been determined to be necessary for the research by the IRB or privacy board. For example, if the IRB or privacy board approves only the use or disclosure of certain information from patients' medical records, and not patients' entire medical record, this must be stated on the document certifying IRB or privacy board approval.

3. Review and approval procedures. The NPRM would not have required documentation of IRBs' or privacy boards' review and approval procedures. In the final rule, the documentation of the alteration or waiver of authorization must state that the alteration or waiver has been reviewed and approved by: (1) an IRB that has followed the voting requirements stipulated in the Common Rule (§__.108(b)), or the expedited review procedures as stipulated in §__.110(b); or (2) a privacy board that has reviewed the proposed research at convened meetings at which a majority of the privacy board members are present, including at least one member who is not affiliated with the covered entity, not affiliated with any entity conducting or sponsoring the research, and not related to any person who is affiliated with any such entities, and the alteration or waiver of authorization is approved by the majority of privacy board members present at the meeting, unless an expedited review procedure is used.

For documentation of IRB approval that used an expedited review procedure, the covered entity must ensure that the documentation indicates that the IRB followed the expedited review requirements of the Common Rule (§__.110). For

documentation of privacy board approval that used an expedited review procedure, the covered entity must ensure that the documentation indicates that the privacy board met the expedited review requirements of the privacy rule. In the final rule, a privacy board may use an expedited review procedure if the research involves no more than minimal risk to the privacy of the individuals who are the subject of the protected health information for which disclosure is being sought. If a privacy board elects to use an expedited review procedure, the review and approval of the alteration or waiver of authorization may be carried out by the chair of the privacy board, or by one or more members of the privacy board as designated by the chair. Use of the expedited review mechanism permits review by a single member of the IRB or privacy board, but continues to require that the covered entity obtain documentation that all of the specified waiver criteria have been met.

Reviews Preparatory to Research

Under the NPRM, if a covered entity used or disclosed protected health information for research, but the researcher did not record the protected health information in a manner that persons could be identified, such an activity would have constituted a research use or disclosure that would have been subject to either the individual authorization requirements of proposed § 164.508 or the documentation of the waiver of authorization requirements of proposed § 164.510(j).

The final rule permits the use and disclosure of protected health information for research without requiring authorization or documentation of the alteration or waiver of authorization, if the research is conducted in such a manner that only de-identified protected health information is recorded by the researchers and the protected health information is not removed from the premises of the covered entity. For such uses and disclosures of protected health information, the final rule requires that the covered entity obtain from the researcher representations that use or disclosure is sought solely to review protected health information as necessary to prepare a research protocol or for similar purposes preparatory to research, no protected health information is to be removed from the covered entity by the researcher in the course of the review, and the protected health information for which use or access is sought is necessary for the research purposes. The intent of this provision is to permit covered entities to use and disclose protected health information to assist in the development of a research hypothesis and aid in the recruitment of research participants. We understand that researchers sometimes require access to protected health information to develop a research protocol, and to determine whether a specific covered entity has protected health information of prospective research participants that would meet the eligibility criteria for enrollment into a research study. Therefore, this provision permits covered entities to use and disclose protected health information for these preliminary research activities without individual authorization and without documentation that an IRB or privacy board has altered or waived individual authorization.

Research on Protected Health Information of the Deceased

The NPRM would have permitted the use and disclosure of protected health information of deceased persons for research without the authorization of a legal representative, and without the requirement for written documentation of IRB or privacy board approval in proposed § 164.510(j). In the final rule, we retain the exception for uses and disclosures for research purposes but in addition require that the covered entity take certain protective measures prior to release of the decedent's protected health information for such purposes. Specifically, the final rule requires that the covered entity obtain representation that the use or disclosure is sought solely for research on the protected health information of decedent, and representation that the protected health information for which use or disclosure is sought is necessary for the research purposes. In addition, the final rule allows covered entities to request from the researcher documentation of the death of the individuals about whom protected health information is being sought.

Good Faith Reliance

The final rule clarifies that covered entities are allowed to rely on the IRB's or privacy board's representation that the research proposal meets the documentation requirements of § 164.512(i)(1)(i) and the minimum necessary requirements of § 164.514.

In addition, when using or disclosing protected health information for reviews preparatory to research (§ 164.512(i)(1)(ii)) or for research solely on the protected health information of decedents (§ 164.512)(1)(iii)), the final rule clarifies that the covered entity may rely on the requesting researcher's representation that the purpose of the request is for one of these two purpose, and that the request meets the minimum necessary requirements of § 164.514. Therefore, the covered entity has not violated the rule if the requesting researcher misrepresents his or her intended use of the protected health information to the covered entity.

Additional Research Provisions

Research Including Treatment

To the extent that a researcher provided treatment to persons as part of a research study, the NPRM would have covered such researchers as health care providers for purposes of that treatment, and required that the researcher comply with all of the provisions of the rule that ***82538** would be applicable to health care providers. The final rule retains this requirement.

Individual Access to Research Information

Under proposed § 164.514, the NPRM would have applied the proposed provision regarding individuals' access to records to research that includes the delivery of treatment. The NPRM proposed an exception to individuals' right to access protected health information for clinical trials, where (1) protected health information was obtained by a covered entity in the course of clinical trial, (2) the individual agreed to the denial of access when consenting to participate in the trial (if the individual's consent to participate was obtained), and (3) the trial was still in progress.

Section 164.524 of the final rule retains this exception to access for research that includes treatment. In addition, the final rule requires that participants in such research be informed that their right of access to protected health information about them will be reinstated once the research is complete.

Obtaining the Individual's Authorization for Research

The NPRM would have required covered entities obtaining individuals' authorization for the use or disclosure of information for research to comply with the requirements applicable to individual authorization for the release of protected health information (proposed § 164.508(a)(2)). If an individual had initiated the use or disclosure of his/her protected health information for research, or any other purpose, the covered entity would have been required to obtain a completed authorization for the use or disclosure of protected health information as proposed in § 164.508(c).

The final rule retains these requirements for research conducted with authorization, as required by § 164.508. In addition, for the use and disclosure of protected health information created by a covered entity for the purpose, in whole or in part, of research that includes treatment of the individual, the covered entity must meet the requirements of § 164.508(f).

Interaction with the Common Rule

The NPRM stated that the proposed rule would not override the Common Rule. Where both the NPRM and the Common Rule would have applied to research conducted by the covered entity—either with or without individuals' authorization—both sets of regulations would have needed to be followed. This statement remains true in the final rule. In addition, we clarify that FDA's human subjects regulations must also be followed if applicable.

Section 164.512(j)—Uses and Disclosures to Avert a Serious Threat to Health or Safety

In the NPRM we proposed to allow covered entities to use or disclose protected health information without individual authorization—consistent with applicable law and ethics standards—based on a reasonable belief that use or disclosure of the protected health information was necessary to prevent or lessen a serious and imminent threat to health or safety of an individual or of the public. Pursuant to the NPRM, covered entities could have used or disclosed protected health information in these

emergency circumstances to a person or persons reasonably able to prevent or lessen the threat, including the target of the threat. The NPRM stated that covered entities that made disclosures in these circumstances were presumed to have acted under a reasonable belief if the disclosure was made in good faith, based on credible representation by a person with apparent knowledge or authority. The NPRM did not include verification requirements specific to this paragraph.

In § 164.512(j) of the final rule, we retain the NPRM's approach to uses and disclosures made to prevent or lessen serious and imminent threats to health or safety, as well as its language regarding the presumption of good faith. We also clarify that: (1) Rules governing these situations, which the NPRM referred to as "emergency circumstances," are not intended to apply to emergency care treatment, such as health care delivery in a hospital emergency room; and (2) the "presumption of good faith belief" is intended to apply only to this provision and not to all disclosures permitted without individual authorization. The final rule allows covered entities to use or disclose protected health information without an authorization on their own initiative in these circumstances, when necessary to prevent or lessen a serious and imminent threat, consistent with other applicable ethical or legal standards.

The rule's approach is consistent with the "duty to warn" third persons at risk, which has been established through case law. In Tarasoff v. Regents of the University of California (17 Cal. 3d 425 (1976)), the Supreme Court of California found that when a therapist's patient had made credible threats against the physical safety of a specific person, the therapist had an obligation to use reasonable care to protect the intended victim of his patient against danger, including warning the victim of the danger. Many states have adopted, through either statutory or case law, versions of the Tarasoff duty to warn. The rule is not intended to create a duty to warn or disclose. Rather, it permits disclosure to avert a serious and imminent threat to health or safety consistent with other applicable legal or ethical standards. If disclosure in these circumstances is prohibited by state law, this rule would not allow the disclosure.

As indicated above, in some situations (for example, when a person is both a fugitive and a victim and thus covered entities could disclose protected health information pursuant either to § 164.512(f)(2) regarding fugitives or to § 164.512(f)(3) establishing conditions for disclosure about victims), more than one section of this rule potentially could apply with respect to a covered entity's potential disclosure of protected health information. Similarly, in situations involving a serious and imminent threat to public health or safety, law enforcement officials may be seeking protected health information from covered entities to locate a fugitive. In the final rule, we clarify that if a situation fits one section of the rule (for example, § 164.512(j) on serious and imminent threats to health or safety), covered entities may disclose protected health information pursuant to that section, regardless of whether the disclosure also could be made pursuant to another section (e.g., § 164.512(f)), regarding disclosure to law enforcement officials).

The proposed rule did not address situations in which covered entities could make disclosures to law enforcement officials about oral statements admitting participation in violent conduct or about escapees.

In the final rule we permit, but do not require, covered entities to use or disclose protected health information, consistent with applicable law and standards of ethical conduct, in specific situations in which the covered entity, in good faith, believes the use or disclosure is necessary to permit law enforcement authorities to identify or apprehend an individual. Under paragraph (j)(1)(ii)(A) of this section, a covered entity may take such action because of a statement by an individual admitting participation in a violent crime that the covered entity reasonably believes may have resulted in serious physical harm to the victim. The ***82539** protected health information that is disclosed in this case is limited to the statement and to the protected health information included under the limited identifying and location information in § 164.512(f)(2), such as name, address, and type of injury. Under paragraph (j)(1)(ii)(B) of this section, a covered entity may take such action where it appears from all the circumstances that the individual has escaped from a correctional institution or from lawful custody.

A disclosure may not be made under paragraph (j)(1)(ii)(A) for a statement admitting participation in a violent crime if the covered entity learns the information in the course of counseling or therapy. Similarly, such a disclosure is not permitted if the covered entity learns the information in the course of treatment to affect the propensity to commit the violent crimes that are

described in the individual's statements. We do not intend to discourage individuals from speaking accurately in the course of counseling or therapy sessions, or to discourage other treatment that specifically seeks to reduce the likelihood that someone who has acted violently in the past will do so again in the future. This prohibition on disclosure is triggered once an individual has made a request to initiate or be referred to such treatment, therapy, or counseling.

The provision permitting use and disclosure has been added in light of the broadened definition in the final rule of protected health information. Under the NPRM, protected health information meant individually identifiable health information that is or has been electronically transmitted or electronically maintained by a covered entity. Under the final rule, protected health information includes information transmitted by electronic media as well as such information transmitted or maintained in any other form or medium. The new definition includes oral statements to covered entities as well as individually identifiable health information transmitted "in any other form."

The definition of protected health information, for instance, would now apply to a statement by a patient that is overheard by a hospital security guard in a waiting room. Such a statement would have been outside the scope of the proposed rule (unless it was memorialized in an electronic record), but is within the scope of the final rule. For the example with the hospital guard, the new provision permitting disclosure of a statement by an individual admitting participation in a violent crime would have the same effect as the proposed rule—the statement could be disclosed to law enforcement, so long as the other aspects of the regulation are followed. Similarly, where it appears from all the circumstances that the individual has escaped from prison, the expanded definition of protected health information should not prevent the covered entity from deciding to report this information to law enforcement.

The disclosures that covered entities may elect to make under this paragraph are entirely at their discretion. These disclosures to law enforcement are in addition to other disclosure provisions in the rule. For example, under paragraph § 164.512(f)(2) of this section, a covered entity may disclose limited categories of protected health information in response to a request from a law enforcement official for the purpose of identifying or locating a suspect, fugitive, material witness, or missing person. Paragraph § 164.512(f)(1) of this section permits a covered entity to make disclosures that are required by other laws, such as state mandatory reporting laws, or are required by legal process such as court orders or grand jury subpoena.

Section 164.512(k)—Uses and Disclosures for Specialized Government Functions

Application to Military Services

In the NPRM we would have permitted a covered entity providing health care to Armed Forces personnel to use and disclose protected health information for activities deemed necessary by appropriate military command authorities to assure the proper execution of the military mission, where the appropriate military authority had published by notice in the Federal Register (In the NPRM, we proposed that the Department of Defense would publish this Federal Register notice in the future.) The final rule takes a similar approach while making some modifications to the NPRM. One modification concerns the information that will be required in the Federal Register notice. The NPRM would have required a listing of (i) appropriate military command authorities; (ii) the circumstances for which use or disclosure without individual authorization would be required; and (iii) activities for which such use or disclosure would occur in order to assure proper execution of the military mission. In the final rule, we eliminate the third category and also slightly modify language in the second category to read: "the purposes for which the protected health information may be used or disclosed."

An additional modification concerns the rule's application to foreign military and diplomatic personnel. The NPRM would have excluded foreign diplomatic and military personnel, as well as their dependents, from the proposed definition of "individual," thereby excluding any protected health information created about these personnel from the NPRM's privacy protections. Foreign military and diplomatic personnel affected by this provision include, for example, allied military personnel who are in the United States for training. The final rule applies a more limited exemption to foreign military personnel only (Foreign diplomatic personnel will have the same protections granted to all other individuals under the rule). Under the final rule, foreign military personnel are not excluded from the definition of "individual." Covered entities will be able to use and disclose protected

health information of foreign military personnel to their appropriate foreign military authority for the same purposes for which uses and disclosures are permitted for U.S. Armed Forces personnel under the notice to be published in the Federal Register. Foreign military personnel do have the same rights of access, notice, right to request privacy protection, copying, amendment, and accounting as do other individuals pursuant to §§ 164.520-164.526 (sections on access, notice, right to request privacy protection for protected health information, amendment, inspection, copying) of the rule.

The NPRM likewise would have exempted overseas foreign national beneficiaries from the proposed rule's requirements by excluding them from the definition of "individual." Under the final rule, these beneficiaries no longer are exempt from the definition of "individual." However, the rule's provisions do not apply to the individually identifiable health information of overseas foreign nationals who receive care provided by the Department of Defense, other federal agencies, or by non-governmental organizations incident to U.S. sponsored missions or operations.

The final rule includes a new provision to address separation or discharge from military service. The preamble to the NPRM noted that upon completion of individuals' military service, DOD and the Department of Transportation routinely transfer entire military service records, including protected health information to the Department of Veterans Affairs so that ***82540** the file can be retrieved quickly if the individuals or their dependents apply for veterans benefits. The NPRM would have required consent for such transfers. The final rule no longer requires consent in such situations. Thus, under the final rule, a covered entity that is a component of DOD or the Department of Transportation may disclose to DVA the protected health information of an Armed Forces member upon separation or discharge from military service for the purpose of a determination by DVA of the individual's eligibility for or entitlement to benefits under laws administered by the Secretary of Veterans Affairs.

Department of Veterans Affairs

Under the NPRM, a covered entity that is a component of the Department of Veterans Affairs could have used and disclosed protected health information to other components of the Department that determine eligibility for, or entitlement to, or that provide benefits under the laws administered by the Secretary of Veterans Affairs. In the final rule, we retain this approach.

Application to Intelligence Community

The NPRM would have provided an exemption from its proposed requirements to the intelligence community. As defined in section 4 of the National Security Act, 50 U.S.C. 401a, the intelligence community includes: the Office of the Director of Central Intelligence Agency; the Office of the Deputy Director of Central Intelligence; the National Intelligence Council and other such offices as the Director may designate; the Central Intelligence Agency; the National Security Agency; the Defense Intelligence Agency; the National Imagery and Mapping Agency ; the National Reconnaissance Office; other offices within the DOD for the collection of specialized national intelligence through reconnaissance programs; the intelligence elements of the Army, the Navy, the Air Force, the Marine Corps, the Federal Bureau of Investigation, the Department of the Treasury, and the Department of Energy; the Bureau of Intelligence and Research of the Department of State; and such other elements of any other department or agency as may be designated by the President, or designated jointly by the Director of Central Intelligence and the head of the department or agency concerned, as an element of the intelligence community. It would have allowed a covered entity to use without individual authorization protected health information of employees of the intelligence community, and of their dependents, if such dependents were being considered for posting abroad. The final rule does not include such an exemption. Rather, the final rule does not except intelligence community employees and their dependents from the general rule requiring an authorization in order for protected health information to be used and disclosed.

National Security and Intelligence Activities

The NPRM included a provision, in § 164.510(f)—Disclosure for Law Enforcement Purposes—that would allow covered entities to disclose protected health information without consent for the conduct of lawful intelligence activities under the National Security Act, and in connection with providing protective services to the President or to foreign heads of state pursuant to 18 U.S.C. 3056 and 22 U.S.C. 2709(a)(3) respectively. The final rule preserves these exemptions, with slight modifications,

but moves them from proposed § 164.510(f) to § 164.512(k). It also divides this area into two paragraphs—one called "National Security and Intelligence Activities" and the second called "Protective services for the President and Others."

The final rule, with modifications, allows a covered entity to disclose protected health information to an authorized federal official for the conduct of lawful intelligence, counter-intelligence, and other national security activities authorized by the National Security Act and implementing authority (e.g., Executive Order 1233). The references to "counter-intelligence and other national security activities" are new to the final rule. The reference to "implementing authority (e.g. Executive Order 12333)" is also new. The final rule also adds specificity to the provision on protective services. It states that a covered entity may disclose protected health information to authorized federal officials for the provision of protective services to the President or other persons as authorized by 18 U.S.C. 3056, or to foreign heads of state or other persons as authorized by 22 U.S.C. 2709(a)(3), or for the conduct of investigations authorized by 18 U.S.C. 871 and 879.

Application to the State Department

The final rule creates a narrower exemption for Department of State for uses and disclosures of protected health information (1) for purposes of a required security clearance conducted pursuant to Executive Orders 10450 and 12698; (2) as necessary to meet the requirements of determining worldwide availability or availability for mandatory service abroad under Sections 101(a)(4) and 504 of the Foreign Service Act; and (3) for a family member to accompany a Foreign Service Officer abroad, consistent with Section 101(b)(5) and 904 of the Foreign Service Act.

Regarding security clearances, nothing prevents any employer from requiring that individuals provide authorization for the purpose of obtaining a security clearance. For the Department of State, however, the final rule provides a limited exemption that allows a component of the Department of State without an authorization to (1) use protected health information to make medical suitability determinations and (2) to disclose whether or not the individual was determined to be medically suitable to authorized officials in the Department of State for the purpose of a security clearance investigation conducted pursuant to Executive Order 10450 and 12698.

Sections 101(a)(4) and 504 of the Foreign Service Act require that Foreign Service members be available to serve in assignments throughout the world. The final rule permits disclosures to officials who need protected health information to determine availability for duty worldwide.

Section 101(b)(5) of the Foreign Service Act requires the Department of State to mitigate the impact of hardships, disruptions, and other unusual conditions on families of Foreign Service Officers. Section 904 requires the Department to establish a health care program to promote and maintain the physical and mental health of Foreign Service member family members. The final rule permits disclosure of protected health information to officials who need protected health information for a family member to accompany a Foreign Service member abroad.

This exemption does not permit the disclosure of specific medical conditions, diagnoses, or other specific medical information. It permits only the disclosure of the limited information needed to determine whether the individual should be granted a security clearance or whether the Foreign Service member of his or her family members should be posted to a certain overseas assignment.

Application to Correctional Facilities

The NPRM would have excluded the individually identifiable health information of correctional facility inmates and detention facility detainees from the definition of protected health information. Thus, none of the NPRM's ***82541** proposed privacy protections would have applied to correctional facility inmates or to detention facility detainees while they were in these facilities or after they had been released.

The final rule takes a different approach. First, to clarify that we are referring to individuals who are incarcerated in correctional facilities that are part of the criminal justice system or in the lawful custody of a law enforcement official—and not to individuals who are "detained" for non-criminal reasons, for example, in psychiatric institutions—§ 164.512(k) covers disclosure of protected health information to correctional institutions or law enforcement officials having such lawful custody. In addition, where a covered health care provider is also a health care component of a correctional institution, the final rule permits the covered entity to use protected health information in all cases in which it is permitted to disclose such information.

We define correctional institution as defined pursuant to 42 U.S.C. 13725(b)(1), as a "prison, jail, reformatory, work farm, detention center, or halfway house, or any other similar institution designed for the confinement or rehabilitation of criminal offenders." The rules regarding disclosure and use of protected health information specified in § 164.512(k) cover individuals who are in transitional homes, and other facilities in which they are required by law to remain for correctional reasons and from which they are not allowed to leave. This section also covers individuals who are confined to psychiatric institutions for correctional reasons and who are not allowed to leave; however, it does not apply to disclosure of information about individuals in psychiatric institutions for treatment purposes only, who are not there due to a crime or under a mandate from the criminal justice system. The disclosure rules described in this section do not cover release of protected health information about individuals in pretrial release, probation, or on parole, such persons are not considered to be incarcerated in a correctional facility.

As described in § 164.512(k), correctional facility inmates' individually identifiable health information is not excluded from the definition of protected health information. When individuals are released from correctional facilities, they will have the same privacy rights that apply to all other individuals under this rule.

Section 164.512(k) of the final rule states that while individuals are in a correctional facility or in the lawful custody of a law enforcement official, covered entities (for example, the prison's clinic) can use or disclose protected health information about these individuals without authorization to the correctional facility or the law enforcement official having custody as necessary for: (1) The provision of health care to such individuals; (2) the health and safety of such individual or other inmates; (3) the health and safety of the officers of employees of or others at the correctional institution; and (4) the health and safety of such individuals and officers or other persons responsible for the transporting of inmates or their transfer from one institution or facility to another; (5) law enforcement on the premises of the correctional institution; and (6) the administration and maintenance of the safety, security, and good order of the correctional institution. This section is intended to allow, for example, a prison's doctor to disclose to a van driver transporting a criminal that the individual is a diabetic and frequently has seizures, as well as information about the appropriate action to take if the individual has a seizure while he or she is being transported.

We permit covered entities to disclose protected health information about these individuals if the correctional institution or law enforcement official represents that the protected health information is necessary for these purposes. Under 164.514(h), a covered entity may reasonably rely on the representation of such public officials.

Application to Public Benefits Programs Required to Share Eligibility Information

We create a new provision for covered entities that are a government program providing public benefits. This provision allows the following disclosures of protected health information.

First, where other law requires or expressly authorizes information relating to the eligibility for, or enrollment in more than one public program to be shared among such public programs and/or maintained in a single or combined data system, a public agency that is administering a health plan may maintain such a data base and may disclose information relating to such eligibility or enrollment in the health plan to the extent authorized by such other law.

Where another public entity has determined that the appropriate balance between the need for efficient administration of public programs and public funds and individuals' privacy interests is to allow information sharing for these limited purposes, we do not upset that determination. For example, section 1137 of the Social Security Act requires a variety of public programs, including the Social Security program, state medicaid programs, the food stamp program, certain unemployment compensation programs,

and others, to participate in a joint income and eligibility verification system. Similarly, section 222 of the Social Security Act requires the Social Security Administration to provide information to certain state vocational rehabilitation programs for eligibility purposes. In some instances, it is a covered entity that first collects or creates the information that is then disclosed for these systems. We do not prohibit those disclosures.

This does not authorize these entities to share information for claims determinations or ongoing administration of these public programs. This provision is limited to the agencies and activities described above.

Second, § 164.512(k)(6) permits a covered entity that is a government agency administering a government program providing public benefits to disclose protected health information relating to the program to another covered entity that is a government agency administering a government program providing public benefits if the programs serve the same or similar populations and the disclosure of protected health information is necessary to coordinate the covered functions of such programs.

The second provision permits covered entities that are government program providing public benefits that serve the same or similar populations to share protected health information for the purposes of coordinating covered functions of the programs and for general management and administration relating to the covered functions of the programs. Often, similar government health programs are administered by different government agencies. For example, in some states, the Medicaid program and the State Children's Health Insurance Program are administered by different agencies, although they serve similar populations. Many states coordinate eligibility for these two programs, and sometimes offer services through the same delivery systems and contracts. This provision would permit the covered entities administering these programs to share protected health information of program participants to coordinate enrollment and services and to generally improve the health care operations of the programs. We note that this provision does not authorize the ***82542** agencies to use or disclose the protected health information that is shared for purposes other than as provided for in this paragraph.

Section 164.512(l)—Disclosures For Workers' Compensation

The NPRM did not contain special provisions permitting covered entities to disclose protected health information for the purpose of complying with workers' compensation and similar laws. Under HIPAA, workers' compensation and certain other forms of insurance (such as automobile or disability insurance) are “excepted benefits.” Insurance carriers that provide this coverage are not covered entities even though they provide coverage for health care services. To carry out their insurance functions, these non-covered insurers typically seek individually identifiable health information from covered health care providers and group health plans. In drafting the proposed rule, the Secretary was faced with the challenge of trying to carry out the statutory mandate of safeguarding the privacy of individually identifiable health information by regulating the flow of such information from covered entities while at the same time respecting the Congressional intent to shield workers' compensation carriers and other excepted benefit plans from regulation as covered entities.

In the proposed rule we allowed covered entities to disclose protected health information without individual consent for purposes of treatment, payment or health care operations—even when the disclosure was to a non-covered entity such as a workers' compensation carrier. In addition, we allowed protected health information to be disclosed if required by state law for purposes of determining eligibility for coverage or fitness for duty. The proposed rule also required that whenever a covered entity disclosed protected health information to a non-covered entity, even though authorized under the rule, the individual who was the subject of the information must be informed that the protected health information was no longer subject to privacy protections.

Like other disclosures under the proposed rule, the information provided to workers' compensation carriers for treatment, payment or health care operations was subject to the minimum necessary standard. However, to the extent that protected health information was disclosed to the carrier because it was required by law, it was not subject to the minimum necessary standard. In addition, individuals were entitled to an accounting when protected health information was disclosed for purposes other than treatment, payment or health care operations.

In the final rule, we include a new provision in this section that clarifies the ability of covered entities to disclose protected health information without authorization to comply with workers' compensation and similar programs established by law that provide benefits for work-related illnesses or injuries without regard to fault. Although most disclosures for workers' compensation would be permissible under other provisions of this rule, particularly the provisions that permit disclosures for payment and as required by law, we are aware of the significant variability among workers' compensation and similar laws, and include this provision to ensure that existing workers' compensation systems are not disrupted by this rule. We note that the minimum necessary standard applies to disclosures under this paragraph.

Under this provision, a covered entity may disclose protected health information regarding an individual to a party responsible for payment of workers' compensation benefits to the individual, and to an agency responsible for administering and/or adjudicating the individual's claim for workers' compensation benefits. For purposes of this paragraph, workers' compensation benefits include benefits under programs such as the Black Lung Benefits Act, the federal Employees' Compensation Act, the Longshore and Harbor Workers' Compensation Act, and the Energy Employees' Occupational Illness Compensation Program Act.

Additional Considerations

We have included a general authorization for disclosures under workers' compensation systems to be consistent with the intent of Congress, which defined workers' compensation carriers as excepted benefits under HIPAA. We recognize that there are significant privacy issues raised by how individually identifiable health information is used and disclosed in workers' compensation systems, and believe that states or the federal government should enact standards that address those concerns.

Section 164.514—Other Procedural Requirements Relating To Uses and Disclosures of Protected Health Information

Section 164.514(a)-(c)—De-identification

In § 164.506(d) of the NPRM, we proposed that the privacy standards would apply to "individually identifiable health information," and not to information that does not identify the subject individual. The statute defines individually identifiable health information as certain health information:

(i) Which identifies the individual, or

(ii) With respect to which there is a reasonable basis to believe that the information can be used to identify the individual.

As we pointed out in the NPRM, difficulties arise because, even after removing obvious identifiers (e.g., name, social security number, address), there is always some probability or risk that any information about an individual can be attributed to that individual.

The NPRM proposed two alternative methods for determining when sufficient identifying information has been removed from a record to render the information de-identified and thus not subject to the rule. First, the NPRM proposed the establishment of a "safe harbor": if all of a list of 19 specified items of information had been removed, and the covered entity had no reason to believe that the remaining information could be used to identify the subject of the information (alone or in combination with other information), the covered entity would have been presumed to have created de-identified information. Second, the NPRM proposed an alternative method so that covered entities with sufficient statistical experience and expertise could remove or encrypt a combination of information different from the enumerated list, using commonly accepted scientific and statistical standards for disclosure avoidance. Such covered entities would have been able to include information from the enumerated list of 19 items if they (1) believed that the probability of re-identification was very low, and (2) removed additional information if they had a reasonable basis to believe that the resulting information could be used to re-identify someone.

We proposed that covered entities and their business partners be permitted to use protected health information to create de-identified health information using either of these two methods. Covered entities would have been permitted to further use and disclose such de-identified information in any way, provided that they did not disclose the key or other mechanism that would have enabled the information to be re-identified, and provided that they reasonably believed that such use or disclosure of de-identified information would not have resulted in the use or ***82543** disclosure of protected health information.

A number of examples were provided of how valuable such de-identified information would be for various purposes. We expressed the hope that covered entities, their business partners, and others would make greater use of de-identified health information than they do today, when it is sufficient for the purpose, and that such practice would reduce the burden and the confidentiality concerns that result from the use of individually identifiable health information for some of these purposes.

In §§ 164.514(a)-(c) of this final rule, we make several modifications to the provisions for de-identification. First, we explicitly adopt the statutory standard as the basic regulatory standard for whether health information is individually identifiable health information under this rule. Information is not individually identifiable under this rule if it does not identify the individual, or if the covered entity has no reasonable basis to believe it can be used to identify the individual. Second, in the implementation specifications we reformulate the two ways in which a covered entity can demonstrate that it has met the standard.

One way a covered entity may demonstrate that it has met the standard is if a person with appropriate knowledge and experience applying generally accepted statistical and scientific principles and methods for rendering information not individually identifiable makes a determination that the risk is very small that the information could be used, either by itself or in combination with other available information, by anticipated recipients to identify a subject of the information. The covered entity must also document the analysis and results that justify the determination. We provide guidance regarding this standard in our responses to the comments we received on this provision.

We also include an alternate, safe harbor, method by which covered entities can demonstrate compliance with the standard. Under the safe harbor, a covered entity is considered to have met the standard if it has removed all of a list of enumerated identifiers, and if the covered entity has no actual knowledge that the information could be used alone or in combination to identify a subject of the information. We note that in the NPRM, we had proposed that to meet the safe harbor, a covered entity must have “no reason to believe” that the information remained identifiable after the enumerated identifiers were removed. In the final rule, we have changed the standard to one of actual knowledge in order to provide greater certainty to covered entities using the safe harbor approach.

In the safe harbor, we explicitly allow age and some geographic location information to be included in the de-identified information, but all dates directly related to the subject of the information must be removed or limited to the year, and zip codes must be removed or aggregated (in the form of most 3-digit zip codes) to include at least 20,000 people. Extreme ages of 90 and over must be aggregated to a category of 90+ to avoid identification of very old individuals. Other demographic information, such as gender, race, ethnicity, and marital status are not included in the list of identifiers that must be removed.

The intent of the safe harbor is to provide a means to produce some de-identified information that could be used for many purposes with a very small risk of privacy violation. The safe harbor is intended to involve a minimum of burden and convey a maximum of certainty that the rules have been met by interpreting the statutory “reasonable basis to believe that the information can be used to identify the individual” to produce an easily followed, cook book approach.

Covered entities may use codes and similar means of marking records so that they may be linked or later re-identified, if the code does not contain information about the subject of the information (for example, the code may not be a derivative of the individual's social security number), and if the covered entity does not use or disclose the code for any other purpose. The covered entity is also prohibited from disclosing the mechanism for re-identification, such as tables, algorithms, or other tools that could be used to link the code with the subject of the information.

Language to clarify that covered entities may contract with business associates to perform the de-identification has been added to the section on business associates.

Section 164.514(d)—Minimum Necessary

The proposed rule required a covered entity to make all reasonable efforts not to use or disclose more than the minimum amount of protected health information necessary to accomplish the intended purpose of the use or disclosure (proposed § 164.506(b)).

The proposed minimum necessary standard did not apply to uses or disclosures that were made by covered entities at the request of the individual, either to allow the individual access to protected health information about him or her or pursuant to an authorization initiated by the individual. The requirement also did not apply to uses and disclosures made: pursuant to the compliance and enforcement provisions of the rule; as required by law and permitted by the regulation without individual authorization; by a covered health care provider to a health plan, when the information was requested for audit and related purposes. Finally, the standard did not apply to the HIPAA administrative simplification transactions.

The proposed implementation specifications would have required a covered entity to have procedures to: (i) Identify appropriate persons within the entity to determine what information should be used or disclosed consistent with the minimum necessary standard; (ii) ensure that those persons make the minimum necessary determinations, when required; and (iii) within the limits of the entity's technological capabilities, provide for the making of such determinations individually. The proposal allowed a covered entity, when making disclosures to public officials that were permitted without individual authorization but not required by other law, to reasonably rely on the representations of such officials that the information requested was the minimum necessary for the stated purpose(s).

The preamble provided further guidance. The preamble explained that covered entities could not have general policies of approving all requests (or all requests of a particular type) without carefully considering certain criteria (see “Criteria,” below) as well as other information specific to the request. The minimum necessary determination would have needed to be consistent with and directly related to the purpose of the use or disclosure. Where there was ambiguity regarding the information to be used or disclosed, the preamble directed covered entities to interpret the “minimum necessary” standard to “require” the covered entity to make some effort to limit the amount of protected health information used/disclosed.

The proposal would have required the minimum necessary determination to take into consideration the ability of a covered entity to delimit the amount of information used or disclosed. The preamble noted that these determinations would have to be made under a reasonableness standard: covered entities would be required to make reasonable efforts and to incur reasonable expense to limit the use or ***82544** disclosure. The “reasonableness” of limiting particular uses or disclosures was to be determined based on the following factors (which were not included in the regulatory text):

a. The extent to which the use or disclosure would extend the number of persons with access to the protected health information.

b. The likelihood that further uses or disclosures of the protected health information could occur.

c. The amount of protected health information that would be used or disclosed.

d. The importance of the use or disclosure.

e. The potential to achieve substantially the same purpose with de-identified information. For disclosures, each covered entity would have been required to have policies for determining when protected health information must be stripped of identifiers.

f. The technology available to limit the amount of protected health information used/disclosed.

g. The cost of limiting the use/disclosure.

h. Any other factors that the covered entity believed were relevant to the determination.

The proposal shifted the "minimum necessary" burden off of covered providers when they were being audited by a health plan. The preamble explained that the duty would have been shifted to the payor to request the minimum necessary information for the audit purpose, although the regulatory text did not include such a requirement. Outside of the audit context, the preamble stated that a health plan would be required, when requesting a disclosure, to limit its requests to the information required to achieve the purpose of the request; the regulation text did not include this requirement.

The preamble stated that disclosure of an entire medical record, in response to a request for something other than the entire medical record, would presumptively violate the minimum necessary standard.

This final rule significantly modifies the proposed requirements for implementing the minimum necessary standard. For all uses and many disclosures and requests for disclosures from other covered entities, we require covered entities to implement policies and procedures for "minimum necessary" uses and disclosures. Implementation of such policies and procedures is required in lieu of making the "minimum necessary" determination for each separate use or disclosure as discussed in the proposal. Disclosures to or requests by a health care provider for treatment purposes are not subject to the standard (see § 164.502).

Specifically (and as further described below), the proposed requirement for individual review of all uses of protected health information is replaced with a requirement for covered entities to implement policies and procedures that restrict access and uses based on the specific roles of members of the covered entity's workforce. Routine disclosures also are not subject to individual review; instead, covered entities must implement policies and procedures to limit the protected health information in routine disclosures to the minimum necessary to achieve the purpose of that type of disclosure. The proposed exclusion of disclosures to health plans for audit purposes is deleted and replaced with a general requirement that covered entities must limit requests to other covered entities for individually identifiable health information to what is reasonably necessary for the use or disclosure intended. The other exclusions from the standard are unchanged from the proposed rule (e.g., for individuals' access to information about themselves, pursuant to an authorization initiated by the individual, for enforcement of this rule, as required by law).

The language of the basic "standard" itself is largely unchanged; covered entities must make reasonable efforts to use or disclose or to request from another covered entity, only the minimum amount of protected health information required to achieve the purpose of a particular use or disclosure. We delete the word "all" from the "reasonable efforts" that covered entities must take in making a "minimum necessary" determination. The implementation specifications are significantly modified, and differ based on whether the activity is a use or disclosure.

Similarly, a "minimum necessary" disclosure for oversight purposes in accordance with § 164.512(d) could include large numbers of records to allow oversight agencies to perform statistical analyses to identify deviations in payment or billing patterns, and other data analyses.

Uses of Protected Health Information

A covered entity must implement policies and procedures to identify the persons or classes of persons in the entity's workforce who need access to protected health information to carry out their duties, the category or categories of protected health information to which such persons or classes need access, and the conditions, as appropriate, that would apply to such access. Covered entities must also implement policies and procedures to limit access to only the identified persons, and only to the identified protected health information. The policies and procedures must be based on reasonable determinations regarding the persons or classes of persons who require protected health information, and the nature of the health information they require, consistent with their job responsibilities.

For example, a hospital could implement a policy that permitted nurses access to all protected health information of patients in their ward while they are on duty. A health plan could permit its underwriting analysts unrestricted access to aggregate claims information for rate setting purposes, but require documented approval from its department manager to obtain specific identifiable claims records of a member for the purpose of determining the cause of unexpected claims that could influence renewal premium rate setting.

The "minimum necessary" standard is intended to reflect and be consistent with, not override, professional judgment and standards. For example, we expect that covered entities will implement policies that allow persons involved in treatment to have access to the entire record, as needed.

Disclosures of Protected Health Information

For any type of disclosure that is made on a routine, recurring basis, a covered entity must implement policies and procedures (which may be standard protocols) that permit only the disclosure of the minimum protected health information reasonably necessary to achieve the purpose of the disclosure. Individual review of each disclosure is not required. Instead, under § 164.514(d)(3), these policies and procedures must identify the types of protected health information to be disclosed, the types of persons who would receive the protected health information, and the conditions that would apply for such access. We recognize that specific disclosures within a type may vary, and require that the policies address what is the norm for the type of disclosure involved. For example, a covered entity may decide to participate in research studies and therefore establish a protocol to minimize the information released for such purposes, e.g., by requiring researchers requesting disclosure of data contained in paper-based records to review the paper records on-site and to ***82545** abstract only the information relevant to the research. Covered entities must develop policies and procedures (which may be standard protocols) to apply to disclosures to routinely hired types of business associates. For instance, a standard protocol could describe the subset of information that may be disclosed to medical transcription services.

For non-routine disclosures, a covered entity must develop reasonable criteria for determining, and limiting disclosure to, only the minimum amount of protected health information necessary to accomplish the purpose of the disclosure. They also must establish and implement procedures for reviewing such requests for disclosures on an individual basis in accordance with these criteria.

Disclosures to health care providers for treatment purposes are not subject to these requirements.

Covered entities' policies and procedures must provide that disclosure of an entire medical record will not be made except pursuant to policies which specifically justify why the entire medical record is needed. For instance, disclosure of all protected health information to an accreditation group would not necessarily violate the regulation, because the entire record may be the "minimum necessary" for its purpose; covered entities may establish policies allowing for and justifying such a disclosure. Disclosure of the entire medical record absent such documented justification is a presumptive violation of this rule.

Requests for Protected Health Information

For requests for protected health information from other covered entities made on a routine, recurring basis, the requesting covered entities' policies and procedures may establish standard protocols describing what information is reasonably necessary for the purposes and limiting their requests to only that information, in lieu of making this determination individually for each request. For all other requests, the policies and procedures must provide for review of the requests on an individualized basis. A request by a covered entity may be made in order to obtain information that will subsequently be disclosed to a third party, for example, to obtain information that will then be disclosed to a business associate for quality assessment purposes; such requests are subject to this requirement.

Covered entities' policies and procedures must provide that requests for an entire medical record will not be made except pursuant to policies which specifically justify why the entire medical record is needed. For instance, a health plan's request for

all protected health information from an applicant for insurance would not necessarily violate the regulation, because the entire record may be the "minimum necessary" for its purpose. Covered entities may establish policies allowing for and justifying such a request. A request for the entire medical record absent such documented justification is a presumptive violation of this rule.

Reasonable Reliance

A covered entity may reasonably rely on the assertion of a requesting covered entity that it is requesting the minimum protected health information necessary for the stated purpose. A covered entity may also rely on the assertions of a professional (such as attorneys and accountants) who is a member of its workforce or its business associate regarding what protected health information he or she needs in order to provide professional services to the covered entity when such person represents that the information requested is the minimum necessary. As we proposed in the NPRM, covered entities making disclosures to public officials that are permitted under § 164.512 may rely on the representation of a public official that the information requested is the minimum necessary.

Uses and Disclosures for Research

In making a minimum necessary determination regarding the use or disclosure of protected health information for research purposes, a covered entity may reasonably rely on documentation from an IRB or privacy board describing the protected health information needed for research and consistent with the requirements of § 164.512(i), "Uses and Disclosures for Research Purposes." A covered entity may also reasonably rely on a representation made by the requestor that the information is necessary to prepare a research protocol or for research on decedents. The covered entity must ensure that the representation or documentation of IRB or privacy board approval it obtains from a researcher describes with sufficient specificity the protected health information necessary for the research. Covered entities must use or disclose such protected health information in a manner that minimizes the scope of the use or disclosure.

Standards for Electronic Transactions

We clarify that under § 164.502(b)(2)(v), covered entities are not required to apply the minimum necessary standard to the required or situational data elements specified in the implementation guides for HIPAA administrative simplification standard transactions in the Transactions Rule. The standard does apply for uses or disclosures in standard transactions that are made at the option of the covered entity.

Section 164.514(e)—Marketing

In the proposed rule, we would have required covered entities to obtain the individual's authorization in order to use or disclose protected health information to market health and non-health items and services.

We have made a number of changes in the final rule that relate to marketing. In the final rule, we retain the general rule that covered entities must obtain the individual's authorization before making uses or disclosures of protected health information for marketing. However, we add a new definition of "marketing" that clarifies that certain activities, such as communications made by a covered entity for the purpose of describing the products and services it provides, are not marketing. See § 164.501 and the associated preamble regarding the definition of marketing. In the final rule we also permit covered entities to use and disclose protected health information for certain marketing activities without individual authorization, subject to conditions enumerated at § 164.514(e).

First, § 164.514(e) permits a covered entity to use or disclose protected health information without individual authorization to make a marketing communication if the communication occurs in a face-to-face encounter with the individual. This provision would permit a covered entity to discuss any services and products, including those of a third-party, without restriction during a face-to-face communication. A covered entity also could give the individual sample products or other information in this setting.

Second, we permit a covered entity to use or disclose protected health information without individual authorization to make marketing communications involving products or services of only nominal value. This provision ensures that covered entities do not violate the rule when they distribute calendars, pens and other merchandise that generally promotes the covered entity.

Third, we permit a covered entity to use or disclose protected health information without individual authorization to make marketing communications about the health- ***82546** related products or services of the covered entity or of a third party if the communication: (1) Identifies the covered entity as the party making the communication; (2) to the extent that the covered entity receives direct or indirect remuneration from a third-party for making the communication, prominently states that fact; (3) except in the case of a general communication (such as a newsletter), contains instructions describing how the individual may opt-out of receiving future communications about health-related products and services; and (4) where protected health information is used to target the communication about a product or service to individuals based on their health status or health condition, explains why the individual has been targeted and how the product or service relates to the health of the individual. The final rule also requires a covered entity to make a determination, prior to using or disclosing protected health information to target a communication to individuals based on their health status or condition, that the product or service may be beneficial to the health of the type or class of individual targeted to receive the communication.

This third provision accommodates the needs of health care entities to be able to discuss their own health-related products and services, or those of third parties, as part of their everyday business and as part of promoting the health of their patients and enrollees. The provision is restricted to uses by covered entities or disclosures to their business associates pursuant to a contract that requires confidentiality, ensuring that protected health information is not distributed to third parties. To provide individuals with a better understanding of how their protected health information is being used for marketing, the provision requires that the communication identify that the covered entity is the source of the communication; a covered entity may not send out information about the product of a third party without disclosing to the individual where the communication originated. We also require covered entities to disclose any direct or indirect remuneration from third parties. This requirement permits individuals to better understand why they are receiving a communication, and to weigh the extent to which their information is being used to promote their health or to enrich the covered entity. Covered entities also are required to include in their communication (unless it is a general newsletter or similar device) how the individual may prevent further communications about health-related products and services. This provision enhances individuals' control over how their information is being used. Finally, where a covered entity targets communications to individuals on the basis of their health status or condition, we require that the entity make a determination that the product or service being communicated may be beneficial to the health of the type of individuals targeted, and that the communication to the targeted individuals explain why they have been targeted and how the product or service relates to their health. This final provision balances the advantages that accrue from health care entities informing their patients and enrollees of new or valuable health products with individuals' expectations that their protected health information will be used to promote their health.

Section 164.514(f)—Fundraising

We proposed in the NPRM to require covered entities to obtain authorization from an individual in order to use the individual's protected health information for fundraising activities.

As noted in § 164.501, in the final rule we define fundraising on behalf of a covered entity to be a health care operation. In § 164.514, we permit a covered entity to use protected health information without individual authorization for fundraising on behalf of itself, provided that it limits the information that it uses to demographic information about the individual and the dates that it has provided service to the individual (see the § 164.501 discussion of “health care operations”). In addition, we require fundraising materials to explain how the individual may opt out of any further fundraising communications, and covered entities are required to honor such requests. We permit a covered entity to disclose the limited protected health information to a business associate for fundraising on its own behalf. We also permit a covered entity to disclose the information to an institutionally related foundation.

By "institutionally related foundation," we mean a foundation that qualifies as a nonprofit charitable foundation under section 501(c)(3) of the Internal Revenue Code and that has in its charter statement of charitable purposes an explicit linkage to the covered entity. An institutionally related foundation may, as explicitly stated in its charter, support the covered entity as well as other covered entities or health care providers in its community. For example, a covered hospital may disclose for fundraising on its own behalf the specified protected health information to a nonprofit foundation established for the specific purpose of raising funds for the hospital or to a foundation that has as its mission the support of the members of a particular hospital chain that includes the covered hospital. The term does not include an organization with a general charitable purpose, such as to support research about or to provide treatment for certain diseases, that may give money to a covered entity, because its charitable purpose is not specific to the covered entity.

Section 164.514(g)—Underwriting

As described under the definition of "health care operations" (§ 164.501), protected health information may be used or disclosed for underwriting and other activities relating to the creation, renewal, or replacement of a contract of health insurance or health benefits. This final rule includes a requirement, not included in the NPRM, that health plans receiving such information for these purposes may not use or disclose it for any other purpose, except as may be required by law, if the insurance or benefits contract is not placed with the health plan.

Section 164.514(h)—Verification of Identity and Authority of Persons Requesting Protected Health Information

Disclosure of Protected Health Information

We reorganize the provision regarding verification of identity of individuals requesting protected health information to improve clarity, but we retain the substance of requirements proposed in the NPRM in § 164.518(c), as follows.

The covered entity must establish and use written policies and procedures (which may be standard protocols) that are reasonably designed to verify the identity and authority of the requestor where the covered entity does not know the person requesting the protected health information. The knowledge of the person may take the form of a known place of business, address, phone or fax number, as well a known human being. Where documentation, statements or representations, whether oral or written, from the person requesting the protected health information is a condition of disclosure under this rule or other law, this verification must involve obtaining such documentation statement, or representation. In such a case, additional verification is only required where this regulation (or other law) ***82547** requires additional proof of authority and identity.

The NPRM proposed that covered entities would be permitted to rely on the required documentation of IRB or privacy board approval to constitute sufficient verification that the person making the request was a researcher and that the research is authorized. The final rule retains this provision.

For most disclosures, verifying the authority for the request means taking reasonable steps to verify that the request is lawful under this regulation. Additional proof is required by other provisions of this regulation where the request is made pursuant to § 164.512 for national priority purposes. Where the person requesting the protected health information is a public official, covered entities must verify the identity of the requester by examination of reasonable evidence, such as a written statement of identity on agency letterhead, an identification badge, or similar proof of official status. Similarly, covered entities are required to verify the legal authority supporting the request by examination of reasonable evidence, such as a written request provided on agency letterhead that describes the legal authority for requesting the release. Where § 164.512 explicitly requires written evidence of legal process or other authority before a disclosure may be made, a public official's proof of identity and the official's oral statement that the request is authorized by law are not sufficient to constitute the required reasonable evidence of legal authority; under these provisions, only the required written evidence will suffice.

In some circumstances, a person or entity acting on behalf of a government agency may make a request for disclosure of protected health information under these subsections. For example, public health agencies may contract with a nonprofit agency to collect

and analyze certain data. In such cases, the covered entity is required to verify the requestor's identity and authority through examination of reasonable documentation that the requestor is acting on behalf of the government agency. Reasonable evidence includes a written request provided on agency letterhead that describes the legal authority for requesting the release and states that the person or entity is acting under the agency's authority, or other documentation, including a contract, a memorandum of understanding, or purchase order that confirms that the requestor is acting on behalf of the government agency.

In some circumstances, identity or authority will be verified as part of meeting the underlying requirements for disclosure. For example, a disclosure under § 164.512(j)(1)(i) to avert an imminent threat to safety is lawful only if made in the good faith belief that the disclosure is necessary to prevent or lessen a serious and imminent threat to the health or safety of a person or the public, and to a person reasonably able to prevent or lessen the threat. If these conditions are met, no further verification is needed. In such emergencies, the covered entity is not required to demand written proof that the person requesting the protected health information is legally authorized. Reasonable reliance on verbal representations are appropriate in such situations.

Similarly, disclosures permitted under § 164.510(a) for facility directories may be made to the general public; the covered entity's policies and procedures do not need to address verifying the identity and authority for these disclosures. In § 164.510(b) we do not require verification of identity for persons assisting in an individual's care or for notification purposes. For disclosures when the individual is not present, such as when a friend is picking up a prescription, we allow the covered entity to use professional judgment and experience with common practice to make reasonable inferences.

Under § 164.524, a covered entity is required to give individuals access to protected health information about them (under most circumstances). Under the general verification requirements of § 164.514(h), the covered entity is required to take reasonable steps to verify the identity of the individual making the request. We do not mandate particular identification requirements (e.g., drivers licence, photo ID), but rather leave this to the discretion of the covered entity. The covered entity must also establish and document procedures for verification of identity and authority of personal representatives, if not known to the entity. For example, a health care provider can require a copy of a power of attorney, or can ask questions to determine that an adult acting for a young child has the requisite relationship to the child.

In Subpart C of Part 160, we require disclosure to the Secretary for purposes of enforcing this regulation. When a covered entity is asked by the Secretary to disclose protected health information for compliance purposes, the covered entity must verify the same information that it is required to verify for any other law enforcement or oversight request for disclosure.

Use of Protected Health Information

The proposed rule's verification requirements applied to any person requesting protected health information, whether for a use or a disclosure. In the final regulation, the verification provisions apply only to disclosures of protected health information. The requirements in § 164.514(d), for implementation of policies and procedures for "minimum necessary" uses of protected health information, are sufficient to ensure that only appropriate persons within a covered entity will have access to protected health information.

Section 164.520—Notice of Privacy Practices for Protected Health Information

Section 164.520(a)—Right to Notice

We proposed to establish a right for individuals to receive adequate notice of how covered health care providers and health plans use and disclose protected health information, and of the individual's rights with respect to that information.

In the final regulation, we retain the general right for individuals to receive and the requirement for covered entities to produce a notice of privacy practices, with significant modifications to the content and distribution requirements.

We also modify the requirements with respect to certain covered entities. First, in § 164.500(b)(2), we clarify that a health care clearinghouse that creates or receives protected health information other than as a business associate of a covered entity must produce a notice. If a health care clearinghouse creates or receives protected health information only as a business associate of other covered entities, it is not required to produce a notice.

Second, in § 164.520(a)(2), we clarify the notice requirements with respect to group health plans. Individuals who receive health benefits under a group health plan other than through insurance are entitled to a notice from the group health plan; self-insured group health plans must maintain a notice that meets the requirements of this section and must provide the notice in accordance with the requirements of § 164.520(c). At a minimum, the self-insured group health plan's notice must describe the group health plan's privacy practices with respect to the protected health information it creates or receives through its self-insured arrangements. For example, if a group health plan maintains both fully-insured and self-insured arrangements, the group health plan must, at a minimum, maintain and provide a notice that describes its ***82548** privacy practices with respect to protected health information it creates or receives through the self-insured arrangements. This notice would be distributed to all participants in the self-insured arrangements (in accordance with § 164.520(c)(1)) and would also be available on request to other persons, including participants in the fully-insured arrangements.

Individuals who receive health benefits under a group health plan through an insurance contract (i.e., a fully-insured group health plan) are entitled to a notice from the issuer or HMO through which they receive their health benefits. The health insurance issuer or HMO must maintain and provide the notice in accordance with § 164.520(c)(1). In addition, some fully-insured group health plans are required to maintain and provide a notice of the group health plan's privacy practices. If a group health plan provides health benefits solely through an insurance contract with a health insurance issuer or HMO, and the group health plan creates or receives protected health information in addition to summary information (as defined in § 164.504(a)) and information about individuals' enrollment in or disenrollment from a health insurance issuer or HMO offered by the group health plan, the group health plan must maintain a notice that meets the requirements of this section and must provide the notice upon request of any person. The group health plan is not required to meet the other distribution requirements of § 164.520(c)(1). Individuals enrolled in such group health plans have the right to notice of the health insurance issuer or HMO's privacy practices and, on request, to notice of the group health plan's privacy practices. If the group health plan, however, provides health benefits solely through an insurance contract with a health insurance issuer or HMO, and the only protected health information the group health plan creates or receives is summary information (as defined in § 164.504(a)) and information about individuals' enrollment in or disenrollment from a health insurance issuer or HMO offered by the group health plan, the group health plan is not required to maintain or provide a notice under this section. In this case, the individuals enrolled in the group health plan would receive notice of the health insurance issuer or HMO's privacy practices, but would not be entitled to notice of the group health plan's privacy practices.

Third, in § 164.520(a)(3), we clarify that inmates do not have a right to notice under this section and a correctional institution that is a covered entity is not required to produce a notice. No person, including a current or former inmate, has the right to notice of such a covered entity's privacy practices.

Section 164.520(b)—Content of Notice

We proposed to require the notice to be written in plain language and contain each of the following elements: a description of the uses and disclosures expected to be made without individual authorization; statements that other uses and disclosures would be made only with the individual's authorization and that the individual could revoke such authorization; descriptions of the rights to request restrictions, inspect and copy protected health information, amend or correct protected health information, and receive an accounting of disclosures of protected health information; statements about the entity's legal requirements to protect privacy, provide notice, and adhere to the notice; a statement about how individuals would be informed of changes to the entity's policies and procedures; instructions on how to make complaints with the entity or Secretary; the name and telephone number of a contact person or office; and the date the notice was produced. We provided a model notice of information policies and procedures for covered health care providers.

In § 164.520(b), and immediately below in this preamble, we describe the notice content requirements for the final rule. As described in detail, below, we make substantial changes to the uses and disclosures of protected health information that must be described in the notice. Unlike the proposed rule, we do not include a model notice. We intend to develop further guidance on notice requirements prior to the compliance date of this rule. In this section of the final rule, we also refer to the covered entity's privacy "practices," rather than its "policies and procedures." The purpose of this change in vocabulary is to clarify that a covered entity's "policies and procedures" is a detailed documentation of all of the entity's privacy practices as required under this rule, not just those described in the notice. For example, we require covered entities to have policies and procedures implementing the requirements for "minimum necessary" uses and disclosures of protected health information, but these policies and procedures need not be reflected in the entity's notice. Similarly, we require covered entities to have policies and procedures for assuring individuals access to protected health information about them. While such policies and procedures will need to include documentation of the designated record sets subject to access, who is authorized to determine when information will be withheld from an individual, and similar details, the notice need only explain generally that individuals have the right to inspect and copy information about them, and tell individuals how to exercise that right.

A covered entity that adopts and follows the notice content and distribution requirements described below will have provided adequate notice. However, the requirements for the content of the notice are not intended to be exclusive. As with the rest of the rule, we specify minimum requirements, not best practices. Covered entities may want to include more detail. We note that all federal agencies must still comply with the Privacy Act of 1974. This means that federal agencies that are covered entities or have covered health care components must comply with the notice requirements of the Privacy Act as well as those included in this rule.

In addition, covered entities may want or be required to produce more than one notice in order to satisfy the notice content requirements under this rule. For example, a covered entity that conducts business in multiple states with different laws regarding the uses and disclosures that the covered entity is permitted to make without authorization may be required to produce a different notice for each state. A covered entity that conducts business both as part of an organized health care arrangement or affiliated covered entity and as an independent enterprise (e.g., a physician who sees patients through an on-call arrangement with a hospital and through an independent private practice) may want to adopt different privacy practices with respect to each line of business; such a covered entity would be required to produce a different notice describing the practices for each line of business. Covered entities must produce notices that accurately describe the privacy practices that are relevant to the individuals receiving the notice.

Required Elements

Plain Language

As in the proposed rule, we require the notice to be written in plain language. A covered entity can satisfy the plain language requirement if it makes a reasonable effort to: organize material to serve the needs of the reader; write short sentences in the active voice, using "you" and other pronouns; use common, everyday words in sentences; and divide material into short sections.

***82549**

We do not require particular formatting specifications, such as easy-to-read design features (e.g., lists, tables, graphics, contrasting colors, and white space), type face, and font size. However, the purpose of the notice is to inform the recipients about their rights and how protected health information collected about them may be used or disclosed. Recipients who cannot understand the covered entity's notice will miss important information about their rights under this rule and about how the covered entity is protecting health information about them. One of the goals of this rule is to create an environment of open communication and transparency with respect to the use and disclosure of protected health information. A lack of clarity in the notice could undermine this goal and create misunderstandings. Covered entities have an incentive to make their notice statements clear and concise. We believe that the more understandable the notice is, the more confidence the public will have in the covered entity's commitment to protecting the privacy of health information.

It is important that the content of the notice be communicated to all recipients and therefore we encourage the covered entity to consider alternative means of communicating with certain populations. We note that any covered entity that is a recipient of federal financial assistance is generally obligated under Title VI of the Civil Rights Act of 1964 to provide material ordinarily distributed to the public in the primary languages of persons with limited English proficiency in the recipients' service areas. Specifically, this Title VI obligation provides that, where a significant number or proportion of the population eligible to be served or likely to be directly affected by a federally assisted program needs service or information in a language other than English in order to be effectively informed of or participate in the program, the recipient shall take reasonable steps, considering the scope of the program and the size and concentration of such population, to provide information in languages appropriate to such persons. For covered entities not subject to Title VI, the Title VI standards provide helpful guidance for effectively communicating the content of their notices to non-English speaking populations.

We also encourage covered entities to be attentive to the needs of individuals who cannot read. For example, an employee of the covered entity could read the notice to individuals upon request or the notice could be incorporated into a video presentation that is played in the waiting area.

Header

Unlike the proposed rule, covered entities must include prominent and specific language in the notice that indicates the importance of the notice. This is the only specific language we require covered entities to include in the notice. The header must read, “THIS NOTICE DESCRIBES HOW MEDICAL INFORMATION ABOUT YOU MAY BE USED AND DISCLOSED AND HOW YOU CAN GET ACCESS TO THIS INFORMATION. PLEASE REVIEW IT CAREFULLY.”

Uses and Disclosures

We proposed to require covered entities to describe in plain language the uses and disclosures of protected health information, and the covered entity's policies and procedures with respect to such uses and disclosures, that the health plan or covered provider expected to make without individual authorization. The covered provider or health plan would have had to distinguish between those uses and disclosures required by law and those permitted but not required by law.

We also proposed to require covered health care providers and health plans to state in the notice that all other uses and disclosures would be made only with the individual's authorization and that such authorization could be revoked. The notice would also have been required to state that the individual could request restrictions on certain uses and disclosures and that the covered entity would not be required to agree to such a request.

We significantly modify these requirements in the final rule. Covered entities must describe all uses and disclosures of protected health information that they are permitted or required to make under this rule without authorization, including those uses and disclosures subject to the consent requirements under § 164.506. If other applicable law prohibits or materially limits the covered entity's ability to make any uses or disclosures that would otherwise be permitted under the rule, the covered entity must describe only the uses and disclosures permitted under the more stringent law.

Covered entities must separately describe each purpose for which they are permitted to use or disclose protected health information under this rule without authorization, and must do so in sufficient detail to place the individual on notice of those uses and disclosures. With respect to uses and disclosures to carry out treatment, payment, and health care operations, the description must include at least one example of the types of uses and disclosures that the covered entity is permitted to make. This requirement is intended to inform individuals of all the uses and disclosures that the covered entity is legally required or permitted to make under applicable law, even if the covered entity does not anticipate actually making such uses and disclosures. We do not require covered entities to distinguish in their notices between those uses and disclosures required by law and those permitted but not required by law.

Unlike the proposed rule, we additionally require covered entities that wish to contact individuals for any of the following activities to list these activities in the notice: providing appointment reminders, describing or recommending treatment alternatives, providing information about health-related benefits and services that may be of interest to the individual, or soliciting funds to benefit the covered entity. If the covered entity does not include these statements in its notice, it is prohibited from using or disclosing protected health information for these activities without authorization. See § 164.502(i).

In addition, if a group health plan, or a health insurance issuer or HMO with respect to a group health plan, wants the option to disclose protected health information to a group health plan sponsor without authorization as permitted under § 164.504(f), the group health plan, health insurance issuer or HMO must describe that practice in its notice.

As in the proposed rule, the notice must state that all other uses and disclosures will be made only with the individual's authorization and that the individual has the right to revoke such authorization.

We anticipate this requirement will lead to significant standardization of the notice. This language could be the same for every covered entity of a particular type within a state, territory, or other locale. We encourage states, state professional associations, and other organizations to develop model language to assist covered entities in preparing their notices.

Individual Rights

As in the proposed rule, covered entities must describe individuals' rights under the rule and how individuals may exercise those rights with respect to the covered entity. Covered entities must describe each of the following rights, as provided under the rule: the right to request restrictions ***82550** on certain uses and disclosures, including a statement that the covered entity is not required to agree to a requested restriction (§ 164.522(a)); the right to receive confidential communications of protected health information (§ 164.522(b)); the right to inspect and copy protected health information (§ 164.524); the right to amend protected health information (§ 164.526); and the right to an accounting of disclosures of protected health information (§ 164.528). We additionally require the notice to describe the right of an individual, including an individual that has agreed to receive the notice electronically, to obtain a paper copy of the notice upon request.

Covered Entity's Duties

As in the proposed rule, covered entities must state in the notice that they are required by law to maintain the privacy of protected health information, to provide a notice of their legal duties and privacy practices, and to abide by the terms of the notice currently in effect. In the final rule, we additionally require the covered entity, if it wishes to reserve the right to change its privacy practices and apply the revised practices to protected health information previously created or received, to make a statement to that effect and describe how it will provide individuals with a revised notice. (See below for a more detailed discussion of a covered entity's responsibilities when it changes its privacy practices.)

Complaints

As in the proposed rule, a covered entity's notice must inform individuals about how they can lodge complaints with the covered entity if they believe their privacy rights have been violated. See § 164.530(d) and the corresponding preamble discussion for the requirements on covered entities for receiving complaints. The notice must also state that individuals may file complaints with the Secretary. In the final rule, we additionally require the notice to include a statement that the individual will not suffer retaliation for filing a complaint.

Contact

As in the proposed rule, the notice must identify a point of contact where the individual can obtain additional information about any of the matters identified in the notice.

Effective Date

The notice must include the date the notice went into effect, rather than the proposed requirement to include the date the notice was produced. The effective date cannot be earlier than the date on which the notice was first printed or otherwise published. Covered entities may wish to highlight or otherwise emphasize any material modifications that it has made, in order to help the individual recognize such changes.

Optional Elements

As described above, we proposed to require covered entities to describe the uses and disclosures of protected health information that the covered entity in fact expected to make without the individual's authorization. We did not specify any optional elements.

While the final rule requires covered entities to describe all of the types of uses and disclosures permitted or required by law (not just those that the covered entity intends to make), we also permit and encourage covered entities to include optional elements that describe the actual, more limited, uses and disclosures they intend to make without authorization. We anticipate that some covered entities will want to distinguish themselves on the basis of their more stringent privacy practices. For example, covered health care providers who routinely treat patients with particularly sensitive conditions may wish to assure their patients that, even though the law permits them to disclose information for a wide array of purposes, the covered health care provider will only disclose information in very specific circumstances, as required by law, and to avert a serious and imminent threat to health or safety. A covered entity may not include statements in the notice that purport to limit the entity's ability to make uses or disclosures that are required by law or necessary to avert a serious and imminent threat to health or safety.

As described above, if the covered entity wishes to reserve the right to change its privacy practices with respect to the more limited uses and disclosures and apply the revised practices to protected health information previously created or received, it must make a statement to that effect and describe how it will provide individuals with a revised notice. (See below for a more detailed discussion of a covered entity's responsibilities when it changes its privacy practices.)

Revisions to the Notice

We proposed to require a covered entity to adhere to the terms of its notice, and would have permitted it to change its information policies and procedures at any time. We would have required covered health care providers and health plans to update the notice to reflect material changes to the information policies and procedures described in the notice. Changes to the notice would have applied to all protected health information held by the covered entity, including information collected under prior notices. That is, we would not have require covered entities to segregate their records according to the notice in effect at the time the record was created. We proposed to prohibit covered entities from implementing a change to an information policy or procedure described in the notice until the notice was updated to reflect the change, unless a compelling reason existed to make a use or disclosure or take other action that the notice would not have permitted. In these situations, we proposed to require covered entities to document the compelling reason and, within 30 days of the use, disclosure, or other action, change its notice to permit the action.

As in the proposed rule, covered entities are required to adhere to the terms of the notice currently in effect. See § 164.502(i). When a covered entity materially changes any of the uses or disclosures, the individual's rights, the covered entity's legal duties, or other privacy practices described in its notice, it must promptly revise its notice accordingly. See § 164.520(b)(3). (Pursuant to § 164.530(i), it must also revise its policies and procedures.) Except when required by law, a material change to any term in the notice may not be implemented prior to the effective date of the notice in which such material change is reflected. In the final rule, however, we revise the circumstances under and extent to which the covered entity may revise the practices stated in the notice and apply the new practices to protected health information it created or received under prior notice.

Under § 164.530(i), a covered entity that wishes to change its practices over time without segregating its records according to the notice in effect at the time the records were created must reserve the right to do so in its notice. For example, a covered

hospital that states in its notice that it will only make public health disclosures required by law, and that does not reserve the right to change this practice, is prohibited from making any discretionary public health disclosures of protected health information created or received during the effective period of that notice. If the covered hospital wishes at some point in the future to make discretionary disclosures for public health purposes, it must revise its notice to so state, and ***82551** must segregate its records so that protected health information created or received under the prior notice is not disclosed for discretionary public health purposes. This hospital may then make discretionary public health disclosures of protected health information created or received after the effective date of the revised notice.

If a second covered hospital states in its notice that it will only make public health disclosures required by law, but does reserve the right to change its practices, it is prohibited from making any discretionary public health disclosures of protected health information created or received during the effective period of that notice. If this hospital wishes at some point in the future to make discretionary disclosures for public health purposes, it must revise its notice to so state, but need not segregate its records. As of the effective date of the revised notice, it may disclose any protected health information, including information created or received under the prior notice, for discretionary public health purposes.

Section 164.530(i) and the corresponding discussion in this preamble describes requirements for revision of a covered entity's privacy policies and procedures, including the privacy practices reflected in its notice.

Section 164.520(c)—Provision of Notice

As in the proposed rule, all covered entities that are required to produce a notice must provide the notice upon request of any person. The requestor does not have to be a current patient or enrollee. We intend the notice to be a public document that people can use in choosing between covered entities.

For health plans, we proposed to require health plans to distribute the notice to individuals covered by the health plan as of the compliance date; after the compliance date, at enrollment in the health plan; after enrollment, within 60 days of a material revision to the content of the notice; and no less frequently than once every three years.

As in the proposed rule, under the final rule health plans must provide the notice to all health plan enrollees as of the compliance date. After the compliance date, health plans must provide the notice to all new enrollees at the time of enrollment and to all enrollees within 60 days of a material revision to the notice. Of course, the term “enrollees” includes participants and beneficiaries in group health plans.

Unlike the proposed rule, we do not require health plans to distribute the notice every three years. Instead, health plans must notify enrollees no less than once every three years about the availability of the notice and how to obtain a copy.

We also clarify that, in each of these circumstances, if a named insured and one or more dependents are covered by the same policy, the health plan can satisfy the distribution requirement with respect to the dependents by sending a single copy of the notice to the named insured. For example, if an employee of a firm and her three dependents are all covered under a single health plan policy, that health plan can satisfy the initial distribution requirement by sending a single copy of the notice to the employee rather than sending four copies, each addressed to a different member of the family.

We further clarify that if a health plan has more than one notice, it satisfies its distribution requirement by providing the notice that is relevant to the individual or other person requesting the notice. For example, a health insurance issuer may have contracts with two different group health plans. One contract specifies that the issuer may use and disclose protected health information about the participants in the group health plan for research purposes without authorization (subject to the requirements of this rule) and one contract specifies that the issuer must always obtain authorizations for these uses and disclosures. The issuer accordingly develops two notices reflecting these different practices and satisfies its distribution requirements by providing the relevant notice to the relevant group health plan participants.

We proposed to require covered health care providers with face-to-face contact with individuals to provide the notice to all such individuals at the first service delivery to the individual during the one year period after the compliance date. After this one year period, covered providers with face-to-face contact with individuals would have been required to distribute the notice to all new patients at the first service delivery. Covered providers without face-to-face contact with individuals would have been required to provide the notice in a reasonable period of time following first service delivery.

We proposed to require all covered providers to post the notice in a clear and prominent location where it would be reasonable to expect individuals seeking services from the covered provider to be able to read the notice. We would have required revisions to be posted promptly.

In the final rule, we vary the distribution requirements according to whether the covered health care provider has a direct treatment relationship with an individual, rather than whether the covered health care provider has face-to-face contact with an individual. See § 164.501 and the corresponding discussion in this preamble regarding the definition of indirect treatment relationship.

Covered health care providers that have direct treatment relationships with individuals must provide the notice to such individuals as of the first service delivery after the compliance date. This requirement applies whether the first service is delivered electronically or in person. Covered providers may satisfy this requirement by sending the notice to all of their patients at once, by giving the notice to each patient as he or she comes into the provider's office or facility or contacts the provider electronically, or by some combination of these approaches. Covered providers that maintain a physical service delivery site must prominently post the notice where it is reasonable to expect individuals seeking service from the provider to be able to read the notice. The notice must also be available on site for individuals to take on request. In the event of a revision to the notice, the covered provider must promptly post the revision and make it available on site.

Covered health care providers that have indirect treatment relationships with individuals are only required to produce the notice upon request, as described above.

The proposed rule was silent regarding electronic distribution of the notice. Under the final rule, a covered entity that maintains a web site describing the services and benefits it offers must make its privacy notice prominently available through the site.

A covered entity may satisfy the applicable distribution requirements described above by providing the notice to the individual electronically, if the individual agrees to receiving materials from the covered entity electronically and the individual has not withdrawn his or her agreement. If the covered entity knows that the electronic transmission has failed, the covered entity must provide a paper copy of the notice to the individual.

If an individual's first service delivery from a covered provider occurs electronically, the covered provider must provide electronic notice automatically and contemporaneously in response to the individual's first request for service. For example, the first time an individual requests to fill a prescription through a covered internet pharmacy, the pharmacy must automatically and contemporaneously provide the individual with the ***82552** pharmacy's notice of privacy practices. An individual that receives a covered entity's notice electronically retains the right to request a paper copy of the notice as described above. This right must be described in the notice.

We note that the Electronic Signatures in Global and National Commerce Act (Pub. L. 106-229) may apply to documents required under this rule to be provided in writing. We do not intend to affect the application of that law to documents required under this rule.

Section 164.520(d)—Joint Notice by Separate Covered Entities

The proposed rule was silent regarding the ability of legally separate covered entities to produce a single notice.

In the final rule, we allow covered entities that participate in an organized health care arrangement to comply with this section by producing a single notice that describes their combined privacy practices. See § 164.501 and the corresponding preamble discussion regarding the definition of organized health care arrangement. (We note that, under § 164.504(d), covered entities that are under common ownership or control may designate themselves as a single affiliated covered entity. Joint notice requirements do not apply to such entities. Single affiliated covered entities must produce a single notice, consistent with the requirements described above for any other covered entity. Covered entities under common ownership or control that elect not to designate themselves as a single affiliated covered entity, however, may elect to produce a joint notice if they meet the definition of an organized health care arrangement.)

The joint notice must meet all of the requirements described above. The covered entities must agree to abide by the terms of the notice with respect to protected health information created or received by the covered entities as part of their participation in the organized health care arrangement. In addition, the joint notice must reasonably identify the covered entities, or class of covered entities, to which the joint notice applies and the service delivery sites, or classes of service delivery sites, to which the joint notice applies. If the covered entities participating in the organized health care arrangement will share protected health information with each other as necessary to carry out treatment, payment, or health care operations relating to the arrangement, that fact must be stated in the notice.

Typical examples where this policy may be useful are health care facilities where physicians and other providers who have offices elsewhere also provide services at the facility (e.g. hospital staff privileges, physicians visiting their patients at a residential facility). In these cases, a single notice may cover both the physician and the facility, if the above conditions are met. The physician is required to have a separate notice covering the privacy practices at the physician's office if those practices are different than the practices described in the joint notice.

If any one of the covered entities included in the joint notice distributes the notice to an individual, as required above, the distribution requirement is met for all of the covered entities included in the joint notice.

Section 164.520(e)—Documentation

As in the proposed rule, we establish documentation requirements for covered entities subject to this provision. In the final rule, we specify that covered entities must retain copies of the notice(s) they issue in accordance with § 164.530(j). See § 164.530(j) and the corresponding preamble discussion for further description of the documentation requirements.

Section 164.522—Rights To Request Privacy Protection for Protected Health Information

Section 164.522(a)—Right of An Individual To Request Restriction of Uses and Disclosures

We proposed that individuals have the right to request that a covered health care provider restrict the use or disclosure of protected health information for treatment, payment, or health care operations. Providers would not have been required to agree to requested restrictions. However, a covered provider that agreed to a restriction could not use or disclose protected health information inconsistent with the restriction. The requirement would not have applied to permissible uses or disclosures under proposed § 164.510, including uses and disclosures in emergency circumstances under proposed § 164.510(k); when the health care services provided were emergency services; or to required disclosures to the Secretary under proposed § 164.522. We would have required covered providers to have procedures for individuals to request restrictions, for agreed-upon restrictions to be documented, for the provider to honor such restrictions, and for notification of the existence of a restriction to others to whom such protected health information is disclosed.

In the final rule, we retain the general right of an individual to request that uses and disclosures of protected health information be restricted and the requirement for covered entities to adhere to restrictions to which they have agreed. However, we include some significant changes and clarifications.

Under the final rule, we extend the right to request restrictions to health plans and to health care clearinghouses that create or receive protected health information other than as a business associate of another covered entity. All covered entities must permit individuals to request that uses and disclosures of protected health information to carry out treatment, payment, and health care operations be restricted and must adhere to restrictions to which they have agreed. A covered entity is not required to agree to a restriction. We note that restrictions between an individual and a covered entity for these or other purposes may be otherwise enforceable under other law.

Under § 164.522(a)(1)(i)(B), the right to request restrictions applies to disclosures to persons assisting in the individual's care under § 164.510(b). An individual may request that a covered entity agree not to disclose protected health information to persons assisting with the individual's care, even if such disclosure is permissible in accordance with § 164.510(b). For example, if an individual requests that a covered entity never disclose protected health information to a particular family member, and the covered entity agrees to that restriction, the covered entity is prohibited from disclosing protected health information to that family member, even if the disclosure would otherwise be permissible under § 164.510(b). We note that individuals additionally have the opportunity to agree or object to disclosures to persons assisting in the individual's care under § 164.510(b)(2). The individual retains the right to agree or object to such disclosures under § 164.510(b)(2), in accordance with the standards of that provision, regardless of whether the individual has requested a restriction under § 164.522(a). See § 164.510(b) and the corresponding preamble discussion regarding the individual's right to agree or object to disclosures to persons assisting in the individual's care.

In §§ 164.522(a)(1)(iii) and (iv) we clarify the requirements with respect to emergency treatment situations. In emergency treatment situations, a covered entity that has agreed to a restriction may use, or disclose to a health care provider, restricted protected health information that is ***82553** necessary to provide the emergency treatment. If the covered entity discloses restricted protected health information to a health care provider for emergency treatment purposes, it must request that the provider not further use or disclose the information. We expect covered entities to consider the need for access to protected health information for treatment purposes when considering a request for a restriction, to discuss this need with the individual making the request for restriction, and to agree to restrictions that will not foreseeably impede the individual's treatment. Therefore, we expect covered entities will rarely need to use or disclose restricted protected health information in emergency treatment situations. We do not intend, however, to adversely impact the delivery of health care. We therefore provide a means for the use and disclosure of restricted protected health information in emergency treatment situations, where an unexpected need for the information could arise and there is insufficient time to secure the individual's permission to use or disclose the restricted information.

In § 164.522(a)(1)(v) we clarify that restrictions are not effective under this rule to prevent uses and disclosures required by § 164.502(a)(2)(ii) or permitted under § 164.510(a) (regarding facility directories) or § 164.512 (regarding uses and disclosures for which consent, individual authorization, or opportunity to agree or object is not required). Covered entities are permitted to agree to such restrictions, but if they do so, the restrictions are not enforceable under this rule. For example, a provider who makes a disclosure under § 164.512(j)(1)(i) relating to serious and imminent threats will not be in violation of this rule even if the disclosure is contrary to a restriction agreed to under this paragraph.

In § 164.522(a)(2) we clarify a covered entity's ability to terminate a restriction to which it has agreed. A covered entity may terminate a restriction with the individual's written or oral agreement. If the individual's agreement is obtained orally, the covered entity must document that agreement. A note in the medical record or similar notation is sufficient documentation. If the individual agrees to terminate the restriction, the covered entity may use and disclose protected health information as otherwise permitted under the rule. If the covered entity wants to terminate the restriction without the individual's agreement, it may only terminate the restriction with respect to protected health information it creates or receives after it informs the individual of the termination. The restriction continues to apply to protected health information created or received prior to informing the individual of the termination. That is, any protected health information that had been collected before the termination may not be used or disclosed in a way that is inconsistent with the restriction, but any information that is collected after informing the individual of the termination of the restriction may be used or disclosed as otherwise permitted under the rule.

In § 164.522(a)(3), we clarify that a covered entity must document a restriction to which it has agreed. We do not require a specific form of documentation; a note in the medical record or similar notation is sufficient. The documentation must be retained for six years from the date it was created or the date it was last in effect, whichever is later, in accordance with § 164.530(j).

We eliminate the requirement from the NPRM for covered entities to inform persons to whom they disclose protected health information of the existence of any restriction on that information. A restriction is only binding on the covered entity that agreed to the restriction. We encourage covered entities to inform others of the existence of a restriction when it is appropriate to do so. We note, however, that disclosure of the existence of a restriction often amounts to a de facto disclosure of the restricted information itself. If a restriction does not permit a covered entity to disclose protected health information to a particular person, the covered entity must carefully consider whether disclosing the existence of the restriction to that person would also violate the restriction.

Section 164.522(b)—Confidential Communications Requirements

In the NPRM, we did not directly address the issue of whether an individual could request that a covered entity restrict the manner in which it communicated with the individual. As described above, the NPRM would have provided individuals with the right to request that health care providers restrict uses and disclosures of protected health information for treatment, payment and health care operations, but would not have required providers to agree to such a restriction.

In the final rule, we require covered entities to permit individuals to request that the covered entity provide confidential communications of protected health information about the individual. The requirement applies to communications from the covered entity to the individual, and also communications from the covered entity that would otherwise be sent to the named insured of an insurance policy that covers the individual as a dependent of the named insured. Individuals may request that the covered entity send such communications by alternative means or at alternative locations. For example, an individual who does not want his or her family members to know about a certain treatment may request that the provider communicate with the individual about that treatment at the individual's place of employment, by mail to a designated address, or by phone to a designated phone number. Similarly, an individual may request that the provider send communications in a closed envelope rather than a post card, as an "alternative means." Covered health care providers must accommodate all reasonable requests. Health plans must accommodate all reasonable requests, if the individual clearly states that the disclosure of all or part of the protected health information could endanger the individual. For example, if an individual requests that a health plan send explanations of benefits about particular services to the individual's work rather than home address because the individual is concerned that a member of the individual's household (e.g., the named insured) might read the explanation of benefits and become abusive towards the individual, the health plan must accommodate the request.

The reasonableness of a request made under this paragraph must be determined by a covered entity solely on the basis of the administrative difficulty of complying with the request and as otherwise provided in this section. A covered health care provider or health plan cannot refuse to accommodate a request based on its perception of the merits of the individual's reason for making the request. A covered health care provider may not require the individual to provide a reason for the request as a condition of accommodating the request. As discussed above, a health plan is not required to accommodate a request unless the individual indicates that the disclosure could endanger the individual. If the individual indicates such endangerment, however, the covered entity cannot further consider the individual's reason for making the request in determining whether it must accommodate the request.

A covered health care provider or health plan may refuse to accommodate a request, however, if the individual has ***82554** not provided information as to how payment, if applicable, will be handled, or if the individual has not specified an alternative address or method of contact.

Section 164.524—Access of Individuals to Protected Health Information

Section 164.524(a)—Right of Access

In the NPRM, we proposed to establish a right for individuals to access (i.e., inspect and obtain a copy of) protected health information about them maintained by a covered provider or health plan, or its business partners, in a designated record set.

As in the proposed rule, in the final rule we provide that individuals have a right of access to protected health information that is maintained in a designated record set. This right applies to health plans, covered health care providers, and health care clearinghouses that create or receive protected health information other than as a business associate of another covered entity (see § 164.500(b)). In the final rule, however, we modify the definition of designated record set. For a discussion of the significant changes made to the definition of designated record set, see § 164.501 and the corresponding preamble.

Under the revised definition, individuals have a right of access to any protected health information that is used, in whole or in part, to make decisions about individuals. This information includes, for example, information used to make health care decisions or information used to determine whether an insurance claim will be paid. Covered entities often incorporate the same protected health information into a variety of different data systems, not all of which will be utilized to make decisions about individuals. For example, information systems that are used for quality control or peer review analyses may not be used to make decisions about individuals. In that case, the information systems would not fall within the definition of designated record set. We do not require entities to grant an individual access to protected health information maintained in these types of information systems.

Duration of the Right of Access

As in the proposed rule, covered entities must provide access to individuals for as long as the protected health information is maintained in a designated record set.

Exceptions to the Right of Access

In the NPRM, we proposed to establish a right for individuals to access any protected health information maintained in a designated record set. Though we proposed to permit covered entities to deny access in certain situations relating to the particular individual requesting access, we did not specifically exclude any protected health information from the right of access.

In the final rule, we specify three types of information to which individuals do not have a right of access, even if the information is maintained in a designated record set. They are psychotherapy notes, information compiled in reasonable anticipation of, or for use in, a civil, criminal, or administrative action or proceeding, and certain protected health information maintained by a covered entity that is subject to or exempted from the Clinical Laboratory Improvements Amendments of 1988 (CLIA). Covered entities may, but are not required to, provide access to this information.

First, unlike the proposed rule, we specify that individuals do not have a right of access to psychotherapy notes.

Second, individuals do not have a right of access to information compiled in reasonable anticipation of, or for use in, a civil, criminal, or administrative action or proceeding. In the NPRM, we would have permitted covered entities to deny a request for access to protected health information complied in reasonable anticipation of, or for use in, a legal proceeding. We change the language in the final rule to clarify that a legal proceeding includes civil, criminal, and administrative actions and proceedings. In the final rule, we clarify that an individual does not have a right to this information by including it in the list of exceptions rather than stating that a covered entity may deny access to this information. Under this exception, the covered entity may deny access to any information that relates specifically to legal preparations but may not deny access to the individual's underlying health information. We do not intend to require covered entities to provide access to documents protected by attorney work-product privilege nor do we intend to alter rules of discovery.

Third, unlike the proposed rule, individuals do not have a right of access to protected health information held by clinical laboratories if CLIA prohibits such access. CLIA states that clinical laboratories may provide clinical laboratory test records and reports only to "authorized persons," as defined primarily by state law. The individual who is the subject of the information is not always included in this set of authorized persons. When an individual is not an authorized person, this restriction effectively prohibits the clinical laboratory from providing an individual access to this information. We do not intend to preempt CLIA and, therefore, do not require covered clinical laboratories to provide an individual access to this information if CLIA prohibits them from doing so. We note, however, that individuals have the right of access to this information if it is maintained by a covered health care provider, clearinghouse, or health plan that is not subject to CLIA.

Finally, unlike the proposed rule, individuals do not have access to protected health information held by certain research laboratories that are exempt from the CLIA regulations. The CLIA regulations specifically exempt the components or functions of "research laboratories that test human specimens but do not report patient specific results for the diagnosis, prevention or treatment of any disease or impairment of, or the assessment of the health of individual patients." 42 CFR 493.3(a)(2). If subject to the access requirements, these laboratories, or the applicable components of them, would be forced to comply with the CLIA regulations once they provided an individual with the access under this privacy rule. Therefore, to alleviate this additional regulatory burden, we have exempted these laboratories, or the relevant components of them, from the access requirements of this regulation.

Grounds for Denial of Access

In the NPRM we proposed to permit covered health care providers and health plans to deny an individual access to inspect and copy protected health information about them for five reasons: (1) a licensed health care professional determined the inspection and copying was reasonably likely to endanger the life or physical safety of the individual or another person; (2) the information was about another person (other than a health care provider) and a licensed health care professional determined the inspection and copying was reasonably likely to cause substantial harm to that other person; (3) the information was obtained under a promise of confidentiality from someone other than a health care provider and the inspection and copying was likely to reveal the source of the information; (4) the information was obtained by a covered provider in the course of a clinical trial, the individual agreed to the denial of access in consenting to participate in the trial, and the trial was in progress; and (5) the information was compiled in reasonable anticipation of, or for use in, a legal ***82555** proceeding. In the NPRM, covered entities would not have been permitted to use these grounds to deny individuals access to protected health information that was also subject to the Privacy Act.

In the final rule, we retain all of these grounds for denial, with some modifications. One of the proposed grounds for denial (regarding legal proceedings) is retained as an exception to the right of access. (See discussion above.) We also include additional grounds for denial and create a right for individuals to request review of certain denials.

There are five types of denials covered entities may make without providing the individual with a right to have the denial reviewed.

First, a covered entity may deny an individual access to any information that is excepted from the right of access under § 164.524(a)(1). (See discussion above.)

Second, we add a new provision that permits a covered entity that is a correctional institution or covered health care provider acting under the direction of a correctional institution to deny an inmate's request to obtain a copy of protected health information if obtaining a copy would jeopardize the health, safety, security, custody, or rehabilitation of the individual or other inmates or the safety of any officer, employee or other person at the correctional institution or responsible for the transporting of the inmate. This ground for denial is restricted to an inmate's request to obtain a copy of protected health information. If an inmate requests inspection of protected health information, the request must be granted unless one of the other grounds for denial applies. The purpose for this exception, and the reason that the exception is limited to denying an inmate a copy and not to denying a right

to inspect, is to give correctional institutions the ability to maintain order in these facilities and among inmates without denying an inmate the right to review his or her protected health information.

Third, as in the proposed rule, a covered entity may deny an individual access to protected health information obtained by a covered provider in the course of research that includes treatment of the research participants, while such research is in progress. For this exception to apply, the individual must have agreed to the denial of access in conjunction with the individual's consent to participate in the research and the covered provider must have informed the individual that the right of access will be reinstated upon completion of the research. If either of these conditions is not met, the individual has the right to inspect and copy the information (subject to the other exceptions we provide here). In all cases, the individual has the right to inspect and copy the information after the research is complete.

As with all the grounds for denial, covered entities are not required to deny access under the research exception. We expect all researchers to maintain a high level of ethical consideration for the welfare of research participants and provide access in appropriate circumstances. For example, if a participant has a severe adverse reaction, disclosure of information during the course of the research may be necessary to give the participant adequate information for proper treatment decisions.

Fourth, we clarify the ability of a covered entity to deny individuals access to protected health information that is also subject to the Privacy Act. In the final rule, we specify that a covered entity may deny an individual access to protected health information that is contained in records that are subject to the Privacy Act if such denial is permitted under the Privacy Act. This ground for denial exists in addition to the other grounds for denial available under this rule. If an individual requests access to protected health information that is also subject to the Privacy Act, a covered entity may deny access to that information for any of the reasons permitted under the Privacy Act and for any of the reasons permitted under this rule.

Fifth, as in the proposed rule, a covered entity may deny an individual access to protected health information if the covered entity obtained the requested information from someone other than a health care provider under a promise of confidentiality and such access would be reasonably likely to reveal the source of the information. This provision is intended to preserve a covered entity's ability to maintain an implicit or explicit promise of confidentiality. A covered entity may not, however, deny access to protected health information when the information has been obtained from a health care provider. An individual is entitled to have access to all information about him or her generated by the health care system (apart from the other exceptions we provide here). Confidentiality promises to health care providers should not interfere with that access.

As in the proposed rule, a covered entity may deny access to protected health information under certain circumstances in which the access may harm the individual or others. In the final rule, we specify that a covered entity may only deny access for these reasons if the covered entity provides the individual with a right to have the denial reviewed. (See below for a discussion of the right to review.)

There are three types of denials for which covered entities must provide the individual with a right to review. A denial under these provisions requires a determination by a licensed health care professional (such as a physician, physician's assistant, or nurse) based on an assessment of the particular circumstances and current professional medical standards of harm. Therefore, when the request is made to a health plan or clearinghouse, the covered entity will need to consult with a licensed health care professional before denying access under this provision.

First, as in the proposed rule, covered entities may deny individuals access to protected health information about them if a licensed health care professional has determined, in the exercise of professional judgment, that the access requested is reasonably likely to endanger the life or physical safety of the individual or another person. The most commonly cited example is when an individual exhibits suicidal or homicidal tendencies. If a licensed health care professional determines that an individual exhibits such tendencies and that permitting inspection or copying of some of the individual's protected health information is reasonably likely to result in the individual committing suicide, murder, or other physical violence, then the health care professional may

deny the individual access to that information. Under this reason for denial, covered entities may not deny access on the basis of the sensitivity of the health information or the potential for causing emotional or psychological harm.

Second, as in the proposed rule, covered entities may deny an individual access to protected health information if the information requested makes reference to someone other than the individual (and other than a health care provider) and a licensed health care professional has determined, in the exercise of professional judgment, that the access requested is reasonably likely to cause serious harm to that other person. On some occasions when health information about one person is relevant to the care of another, a physician may incorporate it into the latter's record, such as information from group therapy sessions and information about illnesses with a genetic component. This provision permits a covered entity to withhold information in such cases if ***82556** the release of such information is reasonably likely to cause substantial physical, emotional, or psychological harm.

Third, we add a new provision regarding denial of access requested by personal representatives. Under § 164.502(g), a person that is a personal representative of an individual may exercise the rights of the individual, including the right to inspect and copy protected health information about the individual that is relevant to such person's representation. The provision permits covered entities to refuse to treat a personal representative as the individual, generally, if the covered entity has a reasonable belief that the individual has been or will be subjected to domestic violence, abuse or neglect by the personal representative, or that treating the personal representative as the individual may endanger the individual and, in its professional judgment, the covered entity decides that it is not in the best interest of the individual to treat such person as the personal representative.

In addition to that provision, we add a new provision at § 164.524(a)(3)(iii) to clarify that a covered entity may deny a request to inspect or copy protected health information if the information is requested by a personal representative of the individual and a licensed health care professional has determined that, in the exercise of professional judgment, such access is reasonably likely to cause substantial harm to the individual who is the subject of the information or to another person. The health care professional need not have a reasonable belief that the personal representative has abused or neglected the individuals and the harm that is likely to result need not be limited to the individual who is the subject of the requested protected health information. Therefore, a covered entity can recognize a person as a personal representative but deny such person access to protected health information as a personal representative.

We do not intend these provisions to create a legal duty for the covered entity to review all of the relevant protected health information before releasing it. Rather, we are preserving the flexibility and judgment of covered entities to deny access under appropriate circumstances. Denials are not mandatory; covered entities may always elect to provide requested health information to the individual. For each request by an individual, the covered entity may provide all of the information requested or evaluate the requested information, consider the circumstances surrounding the individual's request, and make a determination as to whether that request should be granted or denied, in whole or in part, in accordance with one of the reasons for denial under this rule. We intend to create narrow exceptions to the right of access and we expect covered entities to employ these exceptions rarely, if at all. Covered entities may only deny access for the reasons specifically provided in the rule.

Review of a Denial of Access

In the NPRM, we proposed to require covered entities, when denying an individual's request for access, to inform the individual of how to make a complaint to the covered entity and the Secretary.

We retain in the final rule the proposed approach (see below). In addition, if the covered entity denies the request on the basis of one of the reviewable grounds for denial described above, the individual has the right to have the denial reviewed by a licensed health care professional who is designated by the covered entity to act as a reviewing official and who did not participate in the original decision to deny access. The covered entity must provide access in accordance with the reviewing official's determination. (See below for further description of the covered entity's requirements under § 164.524(d)(4) if the individual requests a review of denial of access.)

Section 164.524(b)—Requests for Access and Timely Action

In the NPRM, we proposed to require covered health care providers and health plans to provide a means for individuals to request access to protected health information about them. We proposed to require covered health care providers and health plans to take action on a request for access as soon as possible, but not later than 30 days following the request.

As in the proposed rule, the final rule requires covered entities to permit an individual to request access to inspect or to obtain a copy of the protected health information about the individual that is maintained in a designated record set. We additionally permit covered entities to require individuals to make requests for access in writing, if the individual is informed of this requirement.

In the final rule, we eliminate the requirement for the covered entity to act on a request as soon as possible. We recognize that circumstances may arise in which an individual will request access on an expedited basis. We encourage covered entities to have procedures in place for handling such requests. The time limitation is intended to be an outside deadline, rather than an expectation.

In the final rule, covered entities must act on a request for access within 30 days of receiving the request if the information is maintained or accessible on-site. Covered entities must act on a request for access within 60 days of receiving the request if the information is not maintained or accessible on-site. If the covered entity is unable to act on a request within the applicable deadline, it may extend the deadline by no more than 30 days by providing the individual with a written statement of the reasons for the delay and the date by which the covered entity will complete its action on the request. This written statement describing the extension must be provided within the standard deadline. A covered entity may only extend the deadline once per request for access. This provision permits a covered entity to take a total of up to 60 days to act on a request for access to information maintained on-site and up to 90 days to act on a request for access to information maintained off-site.

The requirements for a covered entity to comply with or deny a request for access, in whole or in part, are described below.

Section 164.524(c)—Provision of Access

In the NPRM, we proposed to require covered health care providers and health plans, upon accepting a request for access, to notify the individual of the decision and of any steps necessary to fulfill the request; to provide the information requested in the form or format requested, if readily producible in such form or format; and to facilitate the process of inspection and copying.

We generally retain the proposed approach in the final rule. If a covered entity accepts a request, in whole or in part, it must notify the individual of the decision and provide the access requested. Individuals have the right both to inspect and to copy protected health information in a designated record set. The individual may choose whether to inspect the information, to copy the information, or to do both.

In the final rule, we clarify that if the same protected health information is maintained in more than one designated record set or at more than one location, the covered entity is required to produce the information only once per request for access. We intend this provision to reduce covered entities' burden in complying with requests without reducing individuals' access to protected health information. We note that summary information and reports ***82557** are not the same as the underlying information on which the summary or report was based. Individuals have the right to obtain access both to summaries and to the underlying information. An individual retains the right of access to the underlying information even if the individual requests access to, or production of, a summary. (See below regarding requests for summaries.)

The covered entity must provide the information requested in the form or format requested if it is readily producible in such form or format. For example, if the covered entity maintains health information electronically and the individual requests an electronic copy, the covered entity must accommodate such request, if possible. Additionally, we specify that if the information is not available in the form or format requested, the covered entity must produce a readily readable hard copy of the information or another form or format to which the individual and covered entity can agree. If the individual agrees, including agreeing to

any associated fees (see below), the covered entity may provide access to a summary of information rather than all protected health information in designated record sets. Similarly, a covered entity may provide an explanation in addition to the protected health information, if the individual agrees in advance to the explanation and any associated fees.

The covered entity must provide the access requested in a timely manner, as described above, and arrange for a mutually convenient time and place for the individual to inspect the protected health information or obtain a copy. If the individual requests that the covered entity mail a copy of the information, the covered entity must do so, and may charge certain fees for copying and mailing. For requests to inspect information that is maintained electronically, the covered entity may print a copy of the information and allow the individual to view the print-out on-site. Covered entities may discuss the request with the individual as necessary to facilitate the timely provision of access. For example, if the individual requested a copy of the information by mail, but the covered entity is able to provide the information faster by providing it electronically, the covered entity may discuss this option with the individual.

We proposed in the NPRM to permit the covered entity to charge a reasonable, cost-based fee for copying the information.

We clarify this provision in the final rule. If the individual requests a copy of protected health information, a covered entity may charge a reasonable, cost-based fee for the copying, including the labor and supply costs of copying. If hard copies are made, this would include the cost of paper. If electronic copies are made to a computer disk, this would include the cost of the computer disk. Covered entities may not charge any fees for retrieving or handling the information or for processing the request. If the individual requests the information to be mailed, the fee may include the cost of postage. Fees for copying and postage provided under state law, but not for other costs excluded under this rule, are presumed reasonable. If such per page costs include the cost of retrieving or handling the information, such costs are not acceptable under this rule.

If the individual requests an explanation or summary of the information provided, and agrees in advance to any associated fees, the covered entity may charge for preparing the explanation or summary as well.

The inclusion of a fee for copying is not intended to impede the ability of individuals to copy their records. Rather, it is intended to reduce the burden on covered entities. If the cost is excessively high, some individuals will not be able to obtain a copy. We encourage covered entities to limit the fee for copying so that it is within reach of all individuals.

We do not intend to affect the fees that covered entities charge for providing protected health information to anyone other than the individual. For example, we do not intend to affect current practices with respect to the fees one health care provider charges for forwarding records to another health care provider for treatment purposes.

Section 164.524(d)—Denial of Access

We proposed in the NPRM to require a covered health care provider or health plan that elects to deny a request for inspection or copying to make any other protected health information requested available to the individual to the extent possible, consistent with the denial.

In the final rule, we clarify the proposed approach. A covered entity that denies access, in whole or in part, must, to the extent possible, give the individual access to any other protected health information requested after excluding the protected health information to which the covered entity has a ground to deny access. We intend covered entities to redact or otherwise exclude only the information that falls within one or more of the denial criteria described above and to permit inspection and copying of all remaining information, to the extent it is possible to do so.

We also proposed to require covered providers and health plans, upon denying a request for access in whole or in part, to provide the individual with a written statement in plain language of the basis for the denial and how the individual could make a complaint to the covered entity or the Secretary.

We retain the proposed approach. A covered entity that denies access, in whole or in part, must provide the individual with a written denial in plain language that explains the basis for the denial. The written denial could include a direct reference to the section of the regulation relied upon for the denial, but the regulatory citation alone does not sufficiently explain the reason for the denial. The written denial must also describe how the individual can complain to the covered entity and the Secretary and must include the name or title and the telephone number of the covered entity's contact person or office that is responsible for receiving complaints.

In the final rule, we impose two additional requirements when the covered entity denies access, in whole or in part. First, if a covered entity denies a request on the basis of one of the reviewable grounds for denial, the written denial must describe the individual's right to a review of the denial and how the individual may exercise this right. Second, if the covered entity denies the request because it does not maintain the requested information, and the covered entity knows where the requested information is maintained, the covered entity must inform the individual where to direct the request for access.

Finally, we specify a covered entity's responsibilities when an individual requests a review of a denial. If the individual requests a review of a denial made under § 164.524(a)(3), the covered entity must designate a licensed health care professional to act as the reviewing official. This reviewing official must not have been involved in the original decision to deny access. The covered entity must promptly refer a request for review to the designated reviewing official. The reviewing official must determine, within a reasonable period of time, whether or not to deny the access requested based on the standards in § 164.524(a)(3). The covered entity must promptly provide the individual with written notice of the reviewing official's decision and otherwise carry out the decision in accordance with the requirements of this section. ***82558**

Section 164.524(e)—Policies, Procedures, and Documentation

As in the proposed rule, we establish documentation requirements for covered entities that are subject to this provision. In accordance with § 164.530(j), the covered entity must retain documentation of the designated record sets that are subject to access by individuals and the titles of the persons or offices responsible for receiving and processing requests for access by individuals.

Section 164.526—Amendment of Protected Health Information

Section 164.526(a)—Right to Amend

In proposed § 164.516, we proposed to establish the individual's right to request a covered health care provider or health plan to amend or correct protected health information about the individual for as long as the covered entity maintains the information.

In § 164.526 of the final rule, we retain the general proposed approach, but establish an individual's right to have the covered entity amend, rather than amend or correct, protected health information. This right applies to protected health information and records in a designated record set for as long as the information is maintained in the designated record set. In the final rule, covered health care providers, health plans, and health care clearinghouses that create or receive protected health information other than as a business associate must comply with these requirements.

Denial of Amendment

We proposed to permit a covered health care provider or health plan to deny a request for amendment if it determined that the protected health information that was the subject of the request was not created by the covered provider or health plan, would not be available for inspection and copying under proposed § 164.514, or was accurate and complete. A covered entity would have been permitted, but not required, to deny a request if any of these conditions were met.

As in the proposed rule, the final rule permits a covered entity to deny a request for amendment if the covered entity did not create the protected health information or record that is the subject of the request for amendment. We add one exception to this

provision: if the individual provides a reasonable basis to believe that the originator of the protected health information is no longer available to act on the requested amendment, the covered entity must address the request for amendment as though the covered entity had created the information.

As in the proposed rule, a covered entity also may deny a request for amendment if the protected health information that is the subject of the request for amendment is not part of a designated record set or would not otherwise be available for inspection under § 164.524. We eliminate the ability to deny a request for amendment if the information or record that is the subject of the request would not be available for copying under the rule. Under § 164.524(a)(2)(ii), an inmate may be denied a copy of protected health information about the inmate. We intend to preserve an inmate's ability to request amendments to information, even if a copy of the information would not be available to the inmate, subject to the other exceptions provided in this section.

Finally, as in the proposed rule, a covered entity may deny a request for amendment if the covered entity determines that the information in dispute is accurate and complete. We draw this concept from the Privacy Act of 1974, governing records held by federal agencies, which permits an individual to request correction or amendment of a record "which the individual believes is not accurate, relevant, timely, or complete." (5 U.S.C. 552a(d)(2)). We adopt the standards of "accuracy" and "completeness" and draw on the clarification and analysis of these terms that have emerged in administrative and judicial interpretations of the Privacy Act during the last 25 years. We note that for federal agencies that are also covered entities, this rule does not diminish their present obligations under the Privacy Act of 1974.

This right is not intended to interfere with medical practice or to modify standard business record keeping practices. Perfect records are not required. Instead, a standard of reasonable accuracy and completeness should be used. In addition, this right is not intended to provide a procedure for substantive review of decisions such as coverage determinations by payors. It is intended only to affect the content of records, not the underlying truth or correctness of materials recounted therein. Attempts under the Privacy Act of 1974 to use this mechanism as a basis for collateral attack on agency determinations have generally been rejected by the courts. The same results are intended here.

Section 164.526(b)—Requests for Amendment and Timely Action

We proposed to require covered health care providers and health plans to provide a means for individuals to request amendment of protected health information about them. Under the NPRM, we would have required covered health care providers and health plans to take action on a request for amendment or correction within 60 days of the request.

As in the proposed rule, covered entities must permit individuals to request that the covered entity amend protected health information about them. We also permit certain specifications for the form and content of the request. If a covered entity informs individuals of such requirements in advance, a covered entity may require individuals to make requests for amendment in writing and to provide a reason to support a requested amendment. If the covered entity imposes such a requirement and informs individuals of the requirement in advance, the covered entity is not required to act on an individual's request that does not meet the requirements.

We retain the requirement for covered entities to act on a request for amendment within 60 days of receipt of the request. In the final rule, we specify the nature of the action the covered entity must take within the time frame. The covered entity must inform the individual, as described below, that the request has been either accepted or denied, in whole or in part. It must also take certain actions pursuant to its decision to accept or deny the request, as described below. If the covered entity is unable to meet the deadline, the covered entity may extend the deadline by no more than 30 days. The covered entity must inform the individual in writing, within the initial 60-day period, of the reason for the delay and the date by which the covered entity will complete its action on the request. A covered entity may only extend the deadline one time per request for amendment.

Section 164.526(c)—Accepting the Amendment

If a covered health care provider or health plan accepted a request for amendment, in whole or in part, we proposed to require the covered entity to make the appropriate change. The covered entity would have had to identify the challenged entries as amended or corrected and indicate the location of the amended or corrected information. ***82559**

We also proposed to require the covered provider or health plan to make reasonable efforts to notify certain entities of the amendment: 1) entities the individual identified as needing to be notified and 2) entities the covered provider or health plan knew had received the erroneous or incomplete information and who may have relied, or could foreseeably rely, on such information to the detriment of the individual.

The covered provider or health plan would also have been required to notify the individual of the decision to amend the information.

As in the proposed rule, if a covered entity accepts an individual's request for amendment or correction, it must make the appropriate amendment. In the final rule, we clarify that, at a minimum, the covered entity must identify the records in the designated record set that are affected by the amendment and must append or otherwise provide a link to the location of the amendment. We do not require covered entities to expunge any protected health information. Covered entities may expunge information if doing so is consistent with other applicable law and the covered entity's record keeping practices.

We alter some of the required procedures for informing the individual and others of the accepted amendment. As in the proposed rule, the covered entity must inform individuals about accepted amendments. In the final rule, the covered entity must obtain the individual's agreement to have the amended information shared with certain persons. If the individual agrees, the covered entity must make reasonable efforts to provide a copy of the amendment within a reasonable time to: (1) Persons the individual identifies as having received protected health information about the individual and needing the amendment; and (2) persons, including business associates, that the covered entity knows have the unamended information and who may have relied, or could foreseeably rely, on the information to the detriment of the individual. For example, a covered entity must make reasonable efforts to inform a business associate that uses protected health information to make decisions about individuals about amendments to protected health information used for such decisions.

Section 164.526(d)—Denying the Amendment

If a covered health care provider or health plan denied a request for amendment, in whole or in part, we proposed to require the covered entity to provide the individual with a written statement in plain language of the basis for the denial, a description of how the individual could submit a written statement of disagreement with the denial, and a description of how the individual could make a complaint with the covered entity and the Secretary.

We proposed to require covered health care providers and health plans to have procedures to permit the individual to file a written statement of disagreement with the denial and to include the covered entity's statement of denial and the individual's statement of disagreement with any subsequent disclosure of the disputed information. Covered entities would have been permitted to establish a limit to the length of the individual's statement of disagreement and to summarize the statement if necessary. We also proposed to permit covered entities to provide a rebuttal to the individual's statement with future disclosures.

As in the proposed rule, if a covered entity denies a request for amendment, it must provide the individual with a statement of denial written in plain language. The written denial must include the basis for the denial, how the individual may file a written statement disagreeing with the denial, and how the individual may make a complaint to the covered entity and the Secretary.

In the final rule, we additionally require the covered entity to inform individuals of their options with respect to future disclosures of the disputed information in order to ensure that an individual is aware of his or her rights. The written denial must state that if the individual chooses not to file a statement of disagreement, the individual may request that the covered entity include the individual's request for amendment and the covered entity's denial of the request with any future disclosures of the protected health information that is the subject of the requested amendment.

As in the proposed rule, the covered entity must permit the individual to submit a written statement disagreeing with the denial and the basis of such disagreement. The covered entity may reasonably limit the length of a statement of disagreement and may prepare a written rebuttal to the individual's statement of disagreement. If the covered entity prepares a rebuttal, it must provide a copy to the individual.

The covered entity must identify the record or protected health information that is the subject of the disputed amendment and append or otherwise link the following information to the designated record set: the individual's request for amendment, the covered entity's denial of the request, the individual's statement of disagreement (if any), and the covered entity's rebuttal (if any). If the individual submits a written statement of disagreement, all of the appended or linked information, or an accurate summary of it, must be included with any subsequent disclosure of the protected health information to which the disagreement relates. If the individual does not submit a written statement of disagreement, the covered entity must include the appended or linked information only if the individual requests that the covered entity do so.

In the final rule, we clarify that when a subsequent disclosure is a standard transaction adopted under the Transactions Rule that cannot accommodate the additional materials described above, the covered entity may separately disclose the additional material to the recipient of the transaction.

Section 164.526(e)—Actions on Notices of Amendment

We proposed to require any covered entity that received a notification of amendment to have procedures in place to make the amendment in any of its designated record sets and to notify its business associates, if appropriate, of amendments.

We retain the proposed approach in the final rule. If a covered entity receives a notification of amended protected health information from another covered entity as described above, the covered entity must make the necessary amendment to protected health information in designated record sets it maintains. In addition, covered entities must require their business associates who receive such notifications to incorporate any necessary amendments to designated record sets maintained on the covered entity's behalf. (See § 164.504 regarding business associate requirements.)

Section 164.526(f)—Policies, Procedures, and Documentation

As in the proposed rule, we establish documentation requirements for covered entities subject to this provision. In accordance with § 164.530(j), the covered entity must document the titles of the persons or offices responsible for receiving and processing requests for amendment.

§ 164.528—Accounting of Disclosures of Protected Health Information

Right to an Accounting of Disclosures

We proposed in the NPRM to grant individuals a right to receive an ***82560** accounting of all disclosures of protected health information about them by a covered entity for purposes other than treatment, payment, and health care operations. We proposed this right to exist for as long as the covered entity maintained the protected health information.

We also proposed that individuals would not have a right to an accounting of disclosures to health oversight or law enforcement agencies if the agency provided a written request for exclusion for a specified time period and the request stated that access by the individual during that time period would be reasonably likely to impede the agency's activities.

We generally retain the proposed approach in the final rule. As in the proposed rule, individuals have a right to receive an accounting of disclosures made by a covered entity, including disclosures by or to a business associate of the covered entity, for purposes other than treatment, payment, and health care operations, subject to certain exceptions as discussed below.

We revise the duration of this right under the final rule. Individuals have a right to an accounting of the applicable disclosures that have been made in the 6 year period prior to the date of a request for an accounting. We additionally clarify in § 164.528(b)(1) that an individual may request, and a covered entity may then provide, an accounting of disclosures for a period of time less than 6 years from the date of the request. For example, an individual could request an accounting only of disclosures that occurred during the year prior to the request.

In the final rule, we exclude several additional types of disclosures from the accounting requirement. Covered entities are not required to include in the accounting disclosures to the individual as provided in § 164.502; disclosures for facility directories, disclosures to persons involved in the individual's care, or other disclosures for notification purposes as provided in § 164.510; disclosures for national security or intelligence purposes as provided in § 164.512(k)(2); disclosures to correctional institutions or law enforcement officials as provided in § 164.512(k)(5); or any disclosures that were made by the covered entity prior to the compliance date of the rule for that covered entity.

We retain the time-limited exclusion for disclosures to health oversight and law enforcement agencies, but require rather than permit the exclusion for the specified time period. Covered entities must exclude disclosures to a health oversight agency or law enforcement official from the accounting for the time period specified by the applicable agency or official if the agency or official provides the covered entity with a statement that inclusion of the disclosure(s) in the accounting to the individual during that time period would be reasonably likely to impede the agency or official's activities. The agency or official's statement must specifically state how long the information must be excluded. At the expiration of that period, the covered entity is required to include the disclosure(s) in an accounting for the individual. If the agency or official's statement is made orally, the covered entity must document the identity of the agency or official who made the statement and must exclude the disclosure(s) for no longer than 30 days from the date of the oral statement, unless a written statement is provided during that time. If the agency or official provides a written statement, the covered entity must exclude the disclosure(s) for the time period specified in the written statement.

Content of the Accounting

We proposed in the NPRM to require the accounting to include all disclosures as described above, including disclosures authorized by the individual. The accounting would have been required to contain the date of each disclosure; the name and address of the organization or person who received the protected health information; a brief description of the information disclosed; and copies of all requests for disclosures. For disclosures other than those made at the request of the individual, the accounting would have also included the purpose for which the information was disclosed.

We generally retain the proposed approach in the final rule, but do not require covered entities to make copies of authorizations or other requests for disclosures available with the accounting. Instead, we require the accounting to contain a brief statement of the purpose of the disclosure. The statement must reasonably inform the individual of the basis for the disclosure. In lieu of the statement of purpose, a covered entity may include a copy of the individual's authorization under § 164.508 or a copy of a written request for disclosure, if any, under § 164.502(a)(2)(ii) or § 164.512. We also clarify that covered entities are only required to include the address of the recipient of the disclosed protected health information if the covered entity knows the address.

We add a provision allowing for a summary accounting of recurrent disclosures. For multiple disclosures to the same recipient pursuant to a single authorization under § 164.508 or for a single purpose under §§ 164.502(a)(2)(ii) or 164.512, the covered entity may provide a summary accounting addressing the series of disclosures rather than a detailed accounting of each disclosure in the series. In this circumstance, a covered entity may limit the accounting of the series of disclosures to the following information: the information otherwise required above for the first disclosure in the series during the accounting period; the frequency, periodicity, or number of disclosures made during the accounting period; and the date of the most recent disclosure in the series. For example, if under § 164.512(b), a covered entity discloses the same protected health information to a public health authority for the same purpose every month, it can account for those disclosures by including in the accounting the date of the first disclosure, the public health authority to whom the disclosures were made and the public health authority's address,

a brief description of the information disclosed, a brief description of the purpose of the disclosures, the fact that the disclosures were made every month during the accounting period, and the date of the most recent disclosure.

Provision of the Accounting

We proposed in the NPRM to require covered entities to provide individuals with an accounting of disclosures as soon as possible, but not later than 30 days following receipt of the request for the accounting.

In the final rule, we eliminate the requirement for the covered entity to act as soon as possible. We recognize that circumstances may arise in which an individual will request an accounting on an expedited basis. We encourage covered entities to implement procedures for handling such requests. The time limitation is intended to be an outside deadline, rather than an expectation. We expect covered entities always to be attentive to the circumstances surrounding each request and to respond in an appropriate time frame.

In the final rule, covered entities must provide a requested accounting no later than 60 days after receipt of the request. If the covered entity is unable to meet the deadline, the covered entity may extend the deadline by no more than 30 days. The covered entity must inform the individual in writing, within the standard 60-day deadline, of the reason for the delay and the date by which the covered entity will provide the request. ***82561** A covered entity may only extend the deadline one time per request for accounting.

The NPRM did not address whether a covered entity could charge a fee for the accounting of disclosures.

In the final rule, we provide that individuals have a right to receive one free accounting per 12 month period. For each additional request by an individual within the 12 month period, the covered entity may charge a reasonable, cost-based fee. If it imposes such a fee, the covered entity must inform the individual of the fee in advance and provide the individual with an opportunity to withdraw or modify the request in order to avoid or reduce the fee.

Procedures and Documentation

As in the proposed rule, we establish documentation requirements for covered entities subject to this provision. In accordance with § 164.530(j), for disclosures that are subject to the accounting requirement, the covered entity must retain documentation of the information required to be included in the accounting. The covered entity must also retain a copy of any accounting provided and must document the titles of the persons or offices responsible for receiving and processing requests for an accounting.

Section 164.530—Administrative Requirements

Designation of a Privacy Official and Contact Person

In § 164.518(a) of the NPRM, we proposed that covered entities be required to designate an individual as the covered entity's privacy official, responsible for the implementation and development of the entity's privacy policies and procedures. We also proposed that covered entities be required to designate a contact person to receive complaints about privacy and provide information about the matters covered by the entity's notice. We indicated that the contact person could be, but was not required to be, the person designated as the privacy official. We proposed to leave implementation details to the discretion of the covered entity. We expected implementation to vary widely depending on the size and nature of the covered entity, with small offices assigning this as an additional duty to an existing staff person, and large organizations creating a full-time privacy official. In proposed § 164.512, we also proposed to require the covered plan or provider's privacy notice to include the name of a contact person for privacy matters.

The final regulation retains the requirements for a privacy official and contact person as specified in the NPRM. These designations must be documented. The designation of privacy official and contact person positions within affiliated entities will

depend on how the covered entity chooses to designate the covered entity(ies) under § 164.504(b). If a subsidiary is defined as a covered entity under this regulation, then a separate privacy official and contact person is required for that covered entity. If several subsidiaries are designated as a single covered entity, pursuant to § 164.504(b), then together they need have only a single privacy officer and contact person. If several covered entities share a notice for services provided on the same premises, pursuant to § 164.520(d), that notice need designate only one privacy official and contact person for the information collected under that notice.

These requirements are consistent with the approach recommended by the Joint Commission on Accreditation of Healthcare Organizations, and the National Committee for Quality Assurance, in its paper "Protecting Personal Health Information; A framework for Meeting the Challenges in a Managed Care Environment." This paper notes that "accountability is enhanced by having focal points who are responsible for assessing compliance with policies and procedures * * * " (p. 29)

Training

In § 164.518(b) of the NPRM we proposed to require that covered entities provide training on the entities' policies and procedures to all members of the workforce likely to have access to protected health information. Each entity would be required to provide initial training by the date on which this rule became applicable. After that date, each covered entity would have to provide training to new members of the workforce within a reasonable time after joining the entity. In addition, we proposed that when a covered entity made material changes in its privacy policies or procedures, it would be required to retrain those members of the workforce whose duties were related to the change within a reasonable time of making the change.

The NPRM would have required that, upon completion of the training, the trainee would be required to sign a statement certifying that he or she received the privacy training and would honor all of the entity's privacy policies and procedures. Entities would determine the most effective means of achieving this training requirement for their workforce. We also proposed that, at least every three years after the initial training, covered entities would be required to have each member of the workforce sign a new statement certifying that he or she would honor all of the entity's privacy policies and procedures. The covered entity would have been required to document its policies and procedures for complying with the training requirements.

The final regulation requires covered entities to train all members of their workforce on the policies and procedures with respect to protected health information required by this rule, as necessary and appropriate for the members of the workforce to carry out their functions within the covered entity. We do not change the proposed time lines for training existing and new members of the workforce, or for training due to material changes in the covered entity's policies and procedures. We eliminate both the requirement for employees to sign a certification following training and the triennial re-certification requirement. Covered entities are responsible for implementing policies and procedures to meet these requirements and for documenting that training has been provided.

Safeguards

In § 164.518(c) of the NPRM, we proposed to require covered entities to put in place administrative, technical, and physical safeguards to protect the privacy of protected health information. We made reference in the preamble to similar requirements proposed for certain electronic information in the Notice of Proposed Rulemaking entitled the Security and Electronic Signature Standards (HCFA-0049-P). We stated that we were proposing parallel and consistent requirements for safeguarding the privacy of protected health information. In § 164.518(c)(3) of the NPRM, we required covered entities to have safeguards to ensure that information was not used in violation of the requirements of this subpart or by people who did not have proper authorization to access the information.

We do not change the basic proposed requirements that covered entities have administrative, technical and physical safeguards to protect the privacy of protected health information. We combine the proposed requirements into a single standard that requires covered entities to safeguard protected health information from accidental or intentional use or disclosure that is a violation of the requirements of this rule ***82562** and to protect against the inadvertent disclosure of protected health information to persons

other than the intended recipient. Limitations on access to protected health information by the covered entities workforce will also be covered by the policies and procedures for "minimum necessary" use of protected health information, pursuant to § 164.514(d). We expect these provisions to work in tandem.

We do not prescribe the particular measures that covered entities must take to meet this standard, because the nature of the required policies and procedures will vary with the size of the covered entity and the type of activities that the covered entity undertakes. (That is, as with other provisions of this rule, this requirement is "scalable.") Examples of appropriate safeguards include requiring that documents containing protected health information be shredded prior to disposal, and requiring that doors to medical records departments (or to file cabinets housing such records) remain locked and limiting which personnel are authorized to have the key or pass-code. We intend this to be a common sense, scalable, standard. We do not require covered entities to guarantee the safety of protected health information against all assaults. Theft of protected health information may or may not signal a violation of this rule, depending on the circumstances and whether the covered entity had reasonable policies to protect against theft. Organizations such as the Association for Testing and Materials (ASTM) and the American Health Information Management Association (AHIMA) have developed a body of recommended practices for handling of protected health information that covered entities may find useful.

We note that the proposed HIPAA Security Standards would require covered entities to safeguard the privacy and integrity of health information. For electronic information, compliance with both regulations will be required.

In § 164.518(c)(2) of the NPRM we proposed requirements for verification procedures to establish identity and authority for permitted disclosures of protected health information.

In the final rule, this material has been moved to § 164.514(h).

Use or Disclosure of Protected Health Information by Whistleblowers

In § 164.518(c)(4) of the NPRM, this provision was entitled "Implementation Specification: Disclosures by whistleblowers." It is now retitled "Disclosures by whistleblowers," with certain changes, and moved to § 164.502(j)(1).

Complaints to the Covered Entity

In § 164.518(d) of the NPRM, we proposed to require covered entities to have a mechanism for receiving complaints from individuals regarding the health plan's or provider's compliance with the requirements of this proposed rule. We did not require that the health plan or provider develop a formal appeals mechanism, nor that "due process" or any similar standard be applied. Additionally, there was no requirement to respond in any particular manner or time frame.

We proposed two basic requirements for the complaint process. First, the covered health plan or health care provider would be required to identify in the notice of information practices a contact person or office for receiving complaints. Second, the health plan or provider would be required to maintain a record of the complaints that are filed and a brief explanation of their resolution, if any.

In the final rule, we retain the requirement for an internal complaint process for compliance with this rule, including the two basic requirements of identifying a contact person and documenting complaints received and their dispositions, if any. We expand the scope of complaints that covered entities must have a means of receiving to include complaints concerning violations of the covered entity's privacy practices, not just violations of the rule. For example, a covered entity must have a mechanism for receiving a complaint that patient information is used at a nursing station in a way that it can also be viewed by visitors to the hospital, regardless of whether the practices at the nursing stations might constitute a violation of this rule.

Sanctions

In § 164.518(e) of the NPRM, we proposed to require all covered entities to develop, and apply when appropriate, sanctions against members of its workforce who failed to comply with privacy policies or procedures of the covered entity or with the requirements of the rule. Covered entities would be required to develop and impose sanctions appropriate to the nature of the violation. The preamble stated that the type of sanction applied would vary depending on factors such as the severity of the violation, whether the violation was intentional or unintentional, and whether the violation indicated a pattern or practice of improper use or disclosure of protected health information. Sanctions could range from a warning to termination. The NPRM preamble language also stated that covered entities would be required to apply sanctions against business associates that violated the proposed rule.

In the final rule, we retain the requirement for sanctions against members of a covered entity's workforce. We also require a covered entity to have written policies and procedures for the application of appropriate sanctions for violations of this subpart and to document those sanctions. These sanctions do not apply to whistleblower activities that meet the provisions of § 164.502(j) or complaints, investigations, or opposition that meet the provisions of § 164.530(g)(2). We eliminate language regarding business associates from this section. Requirements with respect to business associates are stated in § 164.504.

Duty To Mitigate

In proposed § 164.518(f), we would have required covered entities to have policies and procedures for mitigating, to the extent practicable, any deleterious effect of a use or disclosure of protected health information in violation of the requirements of this subpart. The NPRM preamble also included specific language applying this requirement to harm caused by members of the covered entity's workforce and business associates.

With respect to business associates, the NPRM preamble but not the NPRM rule text, stated that covered entities would have a duty to take reasonable steps in response to breaches of contract terms. Covered entities generally would not be required to monitor the activities of their business associates, but would be required to take steps to address problems of which they become aware, and, where the breach was serious or repeated, would also be required to monitor the business associate's performance to ensure that the wrongful behavior had been remedied. Termination of the arrangement would be required only if it became clear that a business associate could not be relied upon to maintain the privacy of protected health information provided to it.

In the final rule, we clarify this requirement by imposing a duty for covered entities to mitigate any harmful effect of a use or disclosure of protected health information that is known to the covered entity. We apply the duty to mitigate to a violation of the covered entity's policies and procedures, not just a violation of the requirements of the subpart. We resolve the ambiguities in the NPRM by imposing this duty on covered entities for harm caused by ***82563** either members of their workforce or by their business associates.

We eliminate the language regarding potential breaches of business associate contracts from this section. All other requirements with respect to business associates are stated in § 164.504.

Refraining from Intimidating or Retaliatory Acts

In § 164.522(d)(4) of the NPRM, in the Compliance and Enforcement section, we proposed that one of the responsibilities of a covered entity would be to refrain from intimidating or retaliatory acts. Specifically, the rule provided that "[a] covered entity may not intimidate, threaten, coerce, discriminate against, or take other retaliatory action against any individual for the filing of a complaint under this section, for testifying, assisting, participating in any manner in an investigation, compliance review, proceeding or hearing under this Act, or opposing any act or practice made unlawful by this subpart."

In the final rule, we continue to require that entities refrain from intimidating or retaliatory acts; however, the provisions have been moved to the Administrative Requirements provisions in § 164.530. This change is not just clerical; in making this change, we apply this provision to the privacy rule alone rather than to all the HIPAA administrative simplification rules. (The compliance and enforcement provisions that were in § 164 are now in Part 160, Subpart C.)

We continue to prohibit retaliation against individuals for filing a complaint with the Secretary, but also prohibit retaliation against any other person who files such a complaint. This is the case because the term "individual" is generally limited to the person who is the subject of the information. The final rule prohibits retaliation against persons, not just individuals, for testifying, assisting, or participating in an investigation, compliance review, proceeding or hearing under Part C of Title XI. The proposed regulation referenced the "Act," which is defined in Part 160 as the Social Security Act. Because we only intend to protect activities such as participation in investigations and hearings under the Administrative Simplification provisions of HIPAA, the final rule references Part C of Title XI of the Social Security Act.

The proposed rule would have prohibited retaliatory actions against individuals for opposing any act or practice made unlawful by this subpart. The final rule retains this provision, but applies it to any person, only if the person "has a good faith belief that the practice opposed is unlawful, the manner of the opposition is reasonable and does not involve a disclosure of protected health information in violation of this subpart." The final rule provides additional protections, which had been included in the preamble to the proposed rule. Specifically, we prohibit retaliatory actions against individuals who exercise any right, or participate in any process established by the privacy rule (Part 164 Subpart E), and include as an example the filing of a complaint with the covered entity.

Waiver of Rights

In the final regulation, but not in the proposed regulation, we provide that a covered entity may not require individuals to waive their rights to file a complaint with the Secretary or their other rights under this rule as a condition of the provision of treatment, payment, enrollment in a health plan or eligibility for benefits. This provision ensures that covered entities do not take away the rights that individuals have been provided in Parts 160 and 164.

Requirements for Policies and Procedures, and Documentation Requirements

In § 164.520 of the NPRM, we proposed to require covered entities to develop and document their policies and procedures for implementing the requirements of the rule. In the final regulation we retain this approach, but specify which standards must be documented in each of the relevant sections. In this section, we state the general administrative requirements applicable to all policies and procedures required throughout the regulation.

In § 164.530(i), (j), and (k) of the final rule, we amend the NPRM language in several respects. In § 164.530(i) we require that the policies and procedures be reasonably designed to comply with the standards, implementation specifications, and other requirements of the relevant part of the regulation, taking into account the size of the covered entity and the nature of the activities undertaken by the covered entity that relate to protected health information. However, we clarify that the requirements that policies and procedures be reasonably designed may not be interpreted to permit or excuse any action that violates the privacy regulation. Where the covered entity has stated in its notice that it reserves the right to change information practices, we allow the new practice to apply to information created or collected prior to the effective date of the new practice and establish requirements for making this change. We also establish the conditions for making changes if the covered entity has not reserved the right to change its practices.

We require covered entities to modify in a prompt manner their policies and procedures to comply with changes in relevant law and, where the change also affects the practices stated in the notice, to change the notice. We make clear that nothing in our requirements regarding changes to policies and procedures or changes to the notice may be used by a covered entity to excuse a failure to comply with applicable law.

In § 164.530(j), we require that the policies and procedures required throughout the regulation be maintained in writing, and that any other communication, action, activity, or designation that must be documented under this regulation be documented in writing. We note that "writing" includes electronic storage; paper records are not required. We also note that, if a covered entity is required to document the title of a person, we mean the job title or similar description of the relevant position or office.

We require covered entities to retain any documentation required under this rule for at least six years (the statute of limitations period for the civil penalties) from the date of the creation of the documentation, or the date when the document was last in effect, which ever is later. This generalizes the NPRM provision to cover all documentation required under the rule. The language on "last was in effect" is a change from the NPRM which was worded "unless a longer period applies under this subpart."

This approach is consistent with the approach recommended by the Joint Commission on Accreditation of Healthcare Organizations, and the National Committee for Quality Assurance, in its paper "Protecting Personal Health Information; A framework for Meeting the Challenges in a Managed Care Environment." This paper notes that "MCOs [Managed Care Organizations] should have clearly defined policies and procedures for dealing with confidentiality issues." (p. 29).

Standards for Certain Group Health Plans

We add a new provision (§ 164.530(k)) to clarify the administrative responsibilities of group health plans that offer benefits through issuers and HMOs. Specifically, a group health plan that provides benefits solely through an issuer or HMO, and that does not create, receive or maintain protected health ***82564** information other than summary health information or information regarding enrollment and disenrollment, is not subject to the requirements of this section regarding designation of a privacy official and contact person, workforce training, safeguards, complaints, mitigation, or policies and procedures. Such a group health plan is only subject to the requirements of this section regarding documentation with respect to its plan documents. Issuers and HMOs are covered entities under this rule, and thus have independent obligations to comply with this section with respect to the protected health information they maintain about the enrollees in such group health plans. The group health plans subject to this provision will have only limited protected health information. Therefore, imposing these requirements on the group health plan would impose burdens not outweighed by a corresponding enhancement in privacy protections.

Section 164.532—Transition Provisions

In the NPRM, we did not address the effect of the regulation on consents and authorizations covered entities obtained prior to the compliance date of the regulation.

In the final rule, we clarify that, in certain circumstances, a covered entity may continue to rely upon consents, authorizations, or other express legal permissions obtained prior to the compliance date of this regulation to use or disclose protected health information even if these consents, authorizations, or permissions do not meet the requirements set forth in §§ 164.506 or 164.508.

We realize that a covered entity may wish to rely upon a consent, authorization, or other express legal permission obtained from an individual prior to the compliance date of this regulation which permits the use or disclosure of individually identifiable health information for activities that come within treatment, payment, or health care operations (as defined in § 164.501), but that do not meet the requirements for consents set forth in § 164.506. In the final rule, we permit a covered entity to rely upon such consent, authorization, or permission to use or disclose protected health information that it created or received before the applicable compliance date of the regulation to carry out the treatment, payment, or health care operations as long as it meets two requirements. First, the covered entity may not make any use or disclosure that is expressly excluded from the consent, authorization, or permission. Second, the covered entity must comply with all limitations expressed in the consent, authorization, or permission. Thus, we do not require a covered entity to obtain a consent that meets the requirements of § 164.506 to use or disclose this previously obtained protected health information as long as the use or disclosure is consistent with the requirements of this section. However, a covered entity will need to obtain a consent that meets the requirements of § 164.506 to the extent that it is required to obtain a consent under § 164.506 from an individual before it may use or disclose any protected health information it creates or receives after the date by which it must comply with this rule.

Similarly, we recognize that a covered entity may wish to rely upon a consent, authorization, or other express legal permission obtained from an individual prior to the applicable compliance date of this regulation that specifically permits the covered

entity to use or disclose individually identifiable health information for activities other than to carry out treatment, payment, or health care operations. In the final rule, we permit a covered entity to rely upon such a consent, authorization, or permission to use or disclose protected health information that it created or received before the applicable compliance date of the regulation for the specific activities described in the consent, authorization, or permission as long as the covered entity complies with two requirements. First, the covered entity may not make any use or disclosure that is expressly excluded from the consent, authorization, or permission. Second, the covered entity must comply with all limitations expressed in the consent, authorization, or permission. Thus, we do not required a covered entity to obtain an authorization that meets the requirements of § 164.508 to use or disclose this previously obtained protected health information so long as the use or disclosure is consistent with the requirements of this section. However, a covered entity will need to obtain an authorization that meets the requirements of § 164.508, to the extent that it is required to obtain an authorization under this rule, from an individual before it may use or disclose any protected health information it creates or receives after the date by which it must comply with this rule.

Additionally, the final rule acknowledges that covered entities may wish to rely upon consents, authorizations, or other express legal permission obtained from an individual prior to the applicable compliance date for a specific research project that includes the treatment of individuals, such as clinical trials. These consents, authorizations, or permissions may specifically permit a use or disclosure of individually identifiable health information for purposes of the project. Alternatively, they may be general consents to participate in the project. A covered entity may use or disclose protected health information it created or received before or after to the applicable compliance date of this rule for purposes of the project provided that the covered entity complies with all limitations expressed in the consent, authorization, or permission.

If, pursuant to this section, a covered entity relies upon a previously obtained consent, authorization, or other express legal permission and agrees to a request for a restriction by an individual under § 164.522(a), any subsequent use or disclosure under that consent, authorization, or permission must comply with the agreed upon restriction as well.

We believe it is necessary to grandfather in previously obtained consents, authorizations, or other express legal permissions in these circumstances to ensure that important functions of the health care system are not impeded. We link the effectiveness of such consents, authorizations, or permissions in these circumstances to the applicable compliance date to give covered entities sufficient notice of the requirements set forth in §§ 164.506 and 164.508.

The rule does not change the past effectiveness of consents, authorizations, or other express legal permissions that do not come within this section. This means that uses or disclosures of individually identifiable health information made prior to the compliance date of this regulation are not subject to sanctions, even if they were made pursuant to documents or permissions that do not meet the requirements of this rule or were made without permission. This rule alters only the future effectiveness of the previously obtained consents, authorizations, or permissions. Covered entities are not required to rely upon these consents, authorizations, or permissions and may obtain new consents or authorizations that meet the applicable requirements of §§ 164.506 and 164.508.

When reaching this decision, we considered requiring all covered entities to obtain new consents or authorizations consistent with the requirements of §§ 164.506 and 164.508 before they would be able to use or disclose protected health information obtained ***82565** after the compliance date of these rules. We rejected this option because we recognize that covered entities may not always be able to obtain new consents or authorizations consistent with the requirements of §§ 164.506 and 164.508 from all individuals upon whose information they rely. We also refrained from impeding the rights of covered entities to exercise their interests in the records they have created. We do not require covered entities with existing records or databases to destroy or remove the protected health information for which they do not have valid consents or authorizations that meet the requirements of §§ 164.506 and 164.508. Covered entities may rely upon the consents, authorizations, or permissions they obtained from individuals prior to the applicable compliance date of this regulation consistent with the constraints of those documents and the requirements discussed above.

We note that if a covered entity obtains before the applicable compliance date of this regulation a consent that meets the requirements of § 164.506, an authorization that meets the requirements of § 164.508, or an IRB or privacy board waiver of authorization that meets the requirements of § 164.512(i), the consent, authorization, or waiver is effective for uses or disclosures that occur after the compliance date and that are consistent with the terms of the consent, authorization, or waiver.

Section 164.534—Compliance Dates for Initial Implementation of the Privacy Standards

In the NPRM, we provided that a covered entity must be in compliance with this subpart not later than 24 months following the effective date of this rule, except that a covered entity that is a small health plan must be in compliance with this subpart not later than 36 months following the effective date of the rule.

The final rule did not make any substantive changes. The format is changed so as to more clearly present the various compliance dates. The final rule lists the types of covered entities and then the various dates that would apply to each of these entities.

III. Section-by-Section Discussion of Comments

The following describes the provisions in the final regulation, and the changes we make to the proposed provisions section-by-section. Following each section are our responses to the comments to that section. This section of the preamble is organized to follow the corresponding section of the final rule, not the NPRM.

General Comments

We received many comments on the rule overall, not to a particular provision. We respond to those comments here. Similar comments, but directed to a specific provision in the proposed rule, are answered below in the corresponding section of this preamble.

Comments on the Need for Privacy Standards, and Effects of this Regulation on Current Protections

Comment: Many commenters expressed the opinion that federal legislation is necessary to protect the privacy of individuals' health information. One comment advocated Congressional efforts to provide a comprehensive federal health privacy law that would integrate the substance abuse regulations with the privacy regulation.

Response: We agree that comprehensive privacy legislation is urgently needed. This administration has urged the Congress to pass such legislation. While this regulation will improve the privacy of individuals' health information, only legislation can provide the full array of privacy protection that individuals need and deserve.

Comment: Many commenters noted that they do not go to a physician, or do not completely share health information with their physician, because they are concerned about who will have access to that information. Many physicians commented on their patients' reluctance to share information because of fear that their information will later be used against them.

Response: We agree that strong federal privacy protections are necessary to enhance patients' trust in the health care system.

Comment: Many commenters expressed concerns that this regulation will allow access to health information by those who today do not have such access, or would allow their physician to disclose information which may not lawfully be disclosed today. Many of these commenters stated that today, they consent to every disclosure of health information about them, and that absent their consent the privacy of their health information is “absolute.” Others stated that, today, health information is disclosed only pursuant to a judicial order. Several commenters were concerned that this regulation would override stronger state privacy protection.

Response: This regulation does not, and cannot, reduce current privacy protections. The statutory language of the HIPAA specifically mandates that this regulation does not preempt state laws that are more protective of privacy.

As discussed in more detail in later this preamble, while many people believe that they must be asked permission prior to any release of health information about them, current laws generally do not impose such a requirement. Similarly, as discussed in more detail later in this preamble, judicial review is required today only for a small proportion of releases of health information.

Comment: Many commenters asserted that today, medical records “belong” to patients. Others asserted that patients own their medical information and health care providers and insurance companies who maintain health records should be viewed as custodians of the patients' property.

Response: We do not intend to change current law regarding ownership of or responsibility for medical records. In developing this rule we reviewed current law on this and related issues, and built on that foundation.

Under state laws, medical records are often the property of the health care provider or medical facility that created them. Some state laws also provide patients with access to medical records or an ownership interest in the health information in medical records. However, these laws do not divest the health care provider or the medical facility of its ownership interest in medical records. These statutes typically provide a patient the right to inspect or copy health information from the medical record, but not the right to take the provider's original copy of an item in the medical record. If a particular state law provides greater ownership rights, this regulation leaves such rights in place.

Comment: Some commenters argued that the use and disclosure of sensitive personal information must be strictly regulated, and violation of such regulations should subject an entity to significant penalties and sanctions.

Response: We agree, and share the commenters' concern that the penalties in the HIPAA statute are not sufficient to fully protect individuals' privacy interests. The need for stronger penalties is among the reasons we believe Congress should pass comprehensive privacy legislation.

Comment: Many commenters expressed the opinion that the proposed ruled should provide stricter privacy protections. ***82566**

Response: We received nearly 52,000 comments on the proposed regulation, and make substantial changes to the proposal in response to those comments. Many of these changes will strengthen the protections that were proposed in the NPRM.

Comment: Many comments express concerns that their health information will be given to their employers.

Response: We agree that employer access to health information is a particular concern. In this final regulation, we make significant changes to the NPRM that clarify and provide additional safeguards governing when and how the health plans covered by this regulation may disclose health information to employers.

Comment: Several commenters argued that individuals should be able to sue for breach of privacy.

Response: We agree, but do not have the legislative authority to grant a private right of action to sue under this statute. Only Congress can grant that right.

Objections to Government Access to Protected Health Information

Comment: Many commenters urged the Department not to create a government database of health information, or a tracking system that would enable the government to track individuals health information.

Response: This regulation does not create such a database or tracking system, nor does it enable future creation of such a database. This regulation describes the ways in which health plans, health care clearinghouses, and certain health care providers may use and disclose identifiable health information with and without the individual's consent.

Comment: Many commenters objected to government access to or control over their health information, which they believe the proposed regulation would provide.

Response: This regulation does not increase current government access to health information. This rule sets minimum privacy standards. It does not require disclosure of health information, other than to the subject of the records or for enforcement of this rule. Health plans and health care providers are free to use their own professional ethics and judgement to adopt stricter policies for disclosing health information.

Comment: Some commenters viewed the NPRM as creating fewer hurdles for government access to protected health information than for access to protected health information by private organizations. Some health care providers commented that the NPRM would impose substantial new restrictions on private sector use and disclosure of protected health information, but would make government access to protected health information easy. One consumer advocacy group made the same observation.

Response: We acknowledge that many of the national priority purposes for which we allow disclosure of protected health information without consent or authorization are for government functions, and that many of the governmental recipients of such information are not governed by this rule. It is the role of government to undertake functions in the broader public interest, such as public health activities, law enforcement, identification of deceased individuals through coroners' offices, and military activities. It is these public purposes which can sometimes outweigh an individual's privacy interest. In this rule, we specify the circumstances in which that balance is tipped toward the public interest with respect to health information. We discuss the rationale behind each of these permitted disclosures in the relevant preamble sections below.

Miscellaneous Comments

Comment: Many commenters objected to the establishment of a unique identifier for health care or other purposes.

Response: This regulation does not create an identifier. We assume these comments refer to the unique health identifier that Congress directed the Secretary to promulgate under section1173(b) of the Social Security Act, added by section 262 of the HIPAA. Because of the public concerns about such an identifier, in the summer of 1998 Vice President Gore announced that the Administration would not promulgate such a regulation until comprehensive medical privacy protections were in place. In the fall of that year, Congress prohibited the Department from promulgating such an identifier, and that prohibition remains in place. The Department has no plans to promulgate a unique health identifier.

Comment: Many commenters asked that we withdraw the proposed regulation and not publish a final rule.

Response: Under section 264 of the HIPAA, the Secretary is required by Congress to promulgate a regulation establishing standards for health information privacy. Further, for the reasons explained throughout this preamble above, we believe that the need to protect health information privacy is urgent and that this regulation is in the public's interest.

Comment: Many commenters express the opinion that their consent should be required for all disclosure of their health information.

Response: We agree that consent should be required prior to release of health information for many purposes, and impose such a requirement in this regulation. Requiring consent prior to all release of health information, however, would unduly jeopardize public safety and make many operations of the health care system impossible. For example, requiring consent prior to release of health information to a public health official who is attempting to track the source of an outbreak or epidemic could endanger thousands of lives. Similarly, requiring consent before an oversight official could audit a health plan would make detection of

health care fraud all but impossible; it could take health plans months or years to locate and obtain the consent of all current and past enrollees, and the health plan would not have a strong incentive to do so. These uses of medical information are clearly in the public interest.

In this regulation, we must balance individuals' privacy interests against the legitimate public interests in certain uses of health information. Where there is an important public interest, this regulation imposes procedural safeguards that must be met prior to release of health information, in lieu of a requirement for consent. In some instances the procedural safeguards consist of limits on the circumstances in which information may be disclosed, in others the safeguards consist of limits on what information may be disclosed, and in other cases we require some form of legal process (e.g., a warrant or subpoena) prior to release of health information. We also allow disclosure of health information without consent where other law mandates the disclosures. Where such other law exists, another public entity has made the determination that the public interests outweigh the individual's privacy interests, and we do not upset that determination in this regulation. In short, we tailor the safeguards to match the specific nature of the public purpose. The specific safeguards are explained in each section of this regulation below.

Comment: Many comments address matters not relevant to this regulation, such as alternative fuels, hospital reimbursement, and gulf war syndrome.

Response: These and similar matters are not relevant to this regulation and will not be addressed further. ***82567**

Comment: A few commenters questioned why this level of detail is needed in response to the HIPAA Congressional mandate.

Response: This level of detail is necessary to ensure that individuals' rights with respect to their health information are clear, while also ensuring that information necessary for important public functions, such as protecting public health, promoting biomedical research, fighting health care fraud, and notifying family members in disaster situations, will not be impaired by this regulation. We designed this rule to reflect current practices and change some of them. The comments and our fact finding revealed the complexity of current health information practices, and we believe that the complexity entailed in reflecting those practices is better public policy than a perhaps simpler rule that disturbed important information flows.

Comment: A few comments stated that the goal of administrative simplification should never override the privacy of individuals.

Response: We believe that privacy is a necessary component of administrative simplification, not a competing interest.

Comment: At least one commenter said that the goal of administrative simplification is not well served by the proposed rule.

Response: Congress recognized that privacy is a necessary component of administrative simplification. The standardization of electronic health information mandated by the HIPAA that make it easier to share that information for legitimate purposes also make the inappropriate sharing of that information easier. For this reason, Congress included a mandate for privacy standards in this section of the HIPAA. Without appropriate privacy protections, public fear and instances of abuse would make it impossible for us to take full advantage of the administrative and costs benefits inherent in the administrative simplification standards.

Comment: At least one commenter asked us to require psychotherapists to assert any applicable legal privilege on patients' behalf when protected health information is requested.

Response: Whether and when to assert a claim of privilege on a patient's behalf is a matter for other law and for the ethics of the individual health care provider. This is not a decision that can or should be made by the federal government.

Comment: One commenter called for HHS to consider the privacy regulation in conjunction with the other HIPAA standards. In particular, this comment focused on the belief that the Security Standards should be compatible with the existing and emerging health care and information technology industry standards.

Response: We agree that both this regulation and the final Security Regulation should be compatible with existing and emerging technology industry standards. This regulation is "technology neutral." We do not mandate the use of any particular technologies, but rather set standards which can be met through a variety of means.

Comment: Several commenters claimed that the statutory authority given under HIPAA cannot provide meaningful privacy protections because many entities with access to protected health information, such as employers, worker's compensation carriers, and life insurance companies, are not covered entities. These commenters expressed support for comprehensive legislation to close many of the existing loopholes.

Response: We agree with the commenters that comprehensive legislation is necessary to provide full privacy protection and have called for members of Congress to pass such legislation to prevent unauthorized and potentially harmful uses and disclosures of information.

Part 160—Subpart A—General Provisions

Section 160.103—Definitions

Business Associate

The response to comments on the definition of "business partner," renamed in this rule as "business associate," is included in the response to comments on the requirements for business associates in the preamble discussion of § 164.504.

Covered Entity

Comment: A number of commenters urged the Department to expand or clarify the definition of "covered entity" to include certain entities other than health care clearinghouses, health plans, and health care providers who conduct standard transactions. For example, several commenters asked that the Department generally expand the scope of the rule to cover all entities that receive or maintain individually identifiable health information; others specifically urged the Department to cover employers, marketing firms, and legal entities that have access to individually identifiable health information. Some commenters asked that life insurance and casualty insurance carriers be considered covered entities for purposes of this rule. One commenter recommended that Pharmacy Benefit Management (PBM) companies be considered covered entities so that they may use and disclose protected health information without authorization.

In addition, a few commenters asked the Department to clarify that the definition includes providers who do not directly conduct electronic transactions if another entity, such as a billing service or hospital, does so on their behalf.

Response: We understand that many entities may use and disclose individually identifiable health information. However, our jurisdiction under the statute is limited to health plans, health care clearinghouses, and health care providers who transmit any health information electronically in connection with any of the standard financial or administrative transactions in section 1173(a) of the Act. These are the entities referred to in section 1173(a)(1) of the Act and thus listed in § 160.103 of the final rule. Consequently, once protected health information leaves the purview of one of these covered entities, their business associates, or other related entities (such as plan sponsors), the information is no longer afforded protection under this rule. We again highlight the need for comprehensive federal legislation to eliminate such gaps in privacy protection.

We also provide the following clarifications with regard to specific entities.

We clarify that employers and marketing firms are not covered entities. However, employers may be plan sponsors of a group health plan that is a covered entity under the rule. In such a case, specific requirements apply to the group health plan. See the preamble on § 164.504 for a discussion of specific "firewall" and other organizational requirements for group health plans and

their employer sponsors. The final rule also contains provisions addressing when an insurance issuer providing benefits under a group health plan may disclose summary health information to a plan sponsor.

With regard to life and casualty insurers, we understand that such benefit providers may use and disclose individually identifiable health information. However, Congress did not include life insurers and casualty insurance carriers as "health plans" for the purposes of this rule and therefore they are not covered entities. See the discussion regarding the definition of "health plan" and excepted benefits. ***82568**

In addition, we clarify that a PBM is a covered entity only to the extent that it meets the definition of one or more of the entities listed in § 160.102. When providing services to patients through managed care networks, it is likely that a PBM is acting as a business associate of a health plan, and may thus use and disclose protected health information pursuant to the relevant provisions of this rule. PBMs may also be business associates of health care providers. See the preamble sections on §§ 164.502, 164.504, and 164.506 for discussions of the specific requirements related to business associates and consent.

Lastly, we clarify that health care providers who do not submit HIPAA transactions in standard form become covered by this rule when other entities, such as a billing service or a hospital, transmit standard electronic transactions on their behalf. The provider could not circumvent these requirements by assigning the task to a contractor.

Comment: Many commenters urged the Department to restrict or clarify the definition of "covered entity" to exclude certain entities, such as department-operated hospitals (public hospitals); state Crime Victim Compensation Programs; employers; and certain lines of insurers, such as workers' compensation insurers, property and casualty insurers, reinsurers, and stop-loss insurers. One commenter expressed concern that clergy, religious practitioners, and other faith-based service providers would have to abide by the rule and asked that the Department exempt prayer healing and non-medical health care.

Response: The Secretary provides the following clarifications in response to these comments. To the extent that a "department-operated hospital" meets the definition of a "health care provider" and conducts any of the standard transactions, it is a covered entity for the purposes of this rule. We agree that a state Crime Victim Compensation Program is not a covered entity if it is not a health care provider that conducts standard transactions, health plan, or health care clearinghouse. Further, as described above, employers are not covered entities.

In addition, we agree that workers' compensation insurers, property and casualty insurers, reinsurers, and stop-loss insurers are not covered entities, as they do not meet the statutory definition of "health plan." See further discussion in the preamble on § 160.103 regarding the definition of "health plan." However, activities related to ceding, securing, or placing a contract for reinsurance, including stop-loss insurance, are health care operations in the final rule. As such, reinsurers and stop-loss insurers may obtain protected health information from covered entities.

Also, in response to the comment regarding religious practitioners, the Department clarifies that "health care" as defined under the rule does not include methods of healing that are solely spiritual. Therefore, clergy or other religious practitioners that provide solely religious healing services are not health care providers within the meaning of this rule, and consequently not covered entities for the purposes of this rule.

Comment: A few commenters expressed general uncertainty and requested clarification as to whether certain entities were covered entities for the purposes of this rule. One commenter was uncertain as to whether the rule applies to certain social service entities, in addition to clinical social workers that the commenter believes are providers. Other commenters asked whether researchers or non-governmental entities that collect and analyze patient data to monitor and evaluate quality of care are covered entities. Another commenter requested clarification regarding the definition's application to public health agencies that also are health care providers as well as how the rule affects public health agencies in their data collection from covered entities.

Response: Whether the professionals described in these comments are covered by this rule depends on the activities they undertake, not on their profession or degree. The definitions in this rule are based on activities and functions, not titles. For example, a social service worker whose activities meet this rule's definition of health care will be a health care provider. If that social service worker also transmits information in a standard HIPAA transaction, he or she will be a covered health entity under this rule. Another social service worker may provide services that do not meet the rule's definition of health care, or may not transmit information in a standard transaction. Such a social service worker is not a covered entity under this rule. Similarly, researchers in and of themselves are not covered entities. However, researchers may also be health care providers if they provide health care. In such cases, the persons, or entities in their role as health care providers may be covered entities if they conduct standard transactions.

With regard to public health agencies that are also health care providers, the health care provider "component" of the agency is the covered entity if that component conducts standard transactions. See discussion of "health care components" below. As to the data collection activities of a public health agency, the final rule in § 164.512(b) permits a covered entity to disclose protected health information to public health authorities under specified circumstances, and permits public health agencies that are also covered entities to use protected health information for these purposes. See § 164.512(b) for further details.

Comment: A few commenters requested that the Department clarify that device manufacturers are not covered entities. They stated that the proposal did not provide enough guidance in cases where the "manufacturer supplier" has only one part of its business that acts as the "supplier," and additional detail is needed about the relationship of the "supplier component" of the company to the rest of the business. Similarly, another commenter asserted that drug, biologics, and device manufacturers should not be covered entities simply by virtue of their manufacturing activities.

Response: We clarify that if a supplier manufacturer is a Medicare supplier, then it is a health care provider, and it is a covered entity if it conducts standard transactions. Further, we clarify that a manufacturer of supplies related to the health of a particular individual, e.g., prosthetic devices, is a health care provider because the manufacturer is providing "health care" as defined in the rule. However, that manufacturer is a covered entity only if it conducts standard transactions. We do not intend that a manufacturer of supplies that are generic and not customized or otherwise specifically designed for particular individuals, e.g., ace bandages for a hospital, is a health care provider. Such a manufacturer is not providing "health care" as defined in the rule and is therefore not a covered entity. We note that, even if such a manufacturer is a covered entity, it may be an "indirect treatment provider" under this rule, and thus not subject to all of the rule's requirements.

With regard to a "supplier component," the final rule addresses the status of the unit or unit(s) of a larger entity that constitute a "health care component." See further discussion under § 164.504 of this preamble.

Finally, we clarify that drug, biologics, and device manufacturers are not health care providers simply by virtue of their manufacturing activities. The manufacturer must be providing health care consistent with the final ***82569** rule's definition in order to be considered a health care provider.

Comment: A few commenters asked that the Department clarify that pharmaceutical manufacturers are not covered entities. It was explained that pharmaceutical manufacturers provide support and guidance to doctors and patients with respect to the proper use of their products, provide free products for doctors to distribute to patients, and operate charitable programs that provide pharmaceutical drugs to patients who cannot afford to buy the drugs they need.

Response: A pharmaceutical manufacturer is only a covered entity if the manufacturer provides "health care" according to the rule's definition and conducts standard transactions. In the above case, a pharmaceutical manufacturer that provides support and guidance to doctors and patients regarding the proper use of their products is providing "health care" for the purposes of this rule, and therefore, is a health care provider to the extent that it provides such services. The pharmaceutical manufacturer that is a health care provider is only a covered entity, however, if it conducts standard transactions. We note that this rule permits a covered entity to disclose protected health information to any person for treatment purposes, without specific authorization from

the individual. Therefore, a covered health care provider is permitted to disclose protected health information to a pharmaceutical manufacturer for treatment purposes. Providing free samples to a health care provider does not in itself constitute health care. For further analysis of pharmacy assistance programs, see response to comment on § 164.501, definition of "payment."

Comment: Several commenters asked about the definition of "covered entity" and its application to health care entities within larger organizations.

Response: A detailed discussion of the final rule's organizational requirements and firewall restrictions for "health care components" of larger entities, as well as for affiliated, and other entities is found at the discussion of § 164.504 of this preamble. The following responses to comments provide additional information with respect to particular "component entity" circumstances.

Comment: Several commenters asked that we clarify the definition of covered entity to state that with respect to persons or organizations that provide health care or have created health plans but are primarily engaged in other unrelated businesses, the term "covered entity" encompasses only the health care components of the entity. Similarly, others recommended that only the component of a government agency that is a provider, health plan, or clearinghouse should be considered a covered entity.

Other commenters requested that we revise proposed § 160.102 to apply only to the component of an entity that engages in the transactions specified in the rule. Commenters stated that companies should remain free to employ licensed health care providers and to enter into corporate relationships with provider institutions without fear of being considered to be a covered entity. Another commenter suggested that the regulation not apply to the provider-employee or employer when neither the provider nor the company are a covered entity.

Some commenters specifically argued that the definition of "covered entity" did not contemplate an integrated health care system and one commenter stated that the proposal would disrupt the multi-disciplinary, collaborative approach that many take to health care today by treating all components as separate entities. Commenters, therefore, recommended that the rule treat the integrated entity, not its constituent parts, as the covered entity.

A few commenters asked that the Department further clarify the definition with respect to the unique organizational models and relationships of academic medical centers and their parent universities and the rules that govern information exchange within the institution. One commenter asked whether faculty physicians who are paid by a medical school or faculty practice plan and who are on the medical staff of, but not paid directly by, a hospital are included within the covered entity. Another commenter stated that it appears that only the health center at an academic institution is the covered entity. Uncertainty was also expressed as to whether other components of the institution that might create protected health information only incidentally through the conduct of research would also be covered.

Response: The Department understands that in today's health care industry, the relationships among health care entities and non-health care organizations are highly complex and varied. Accordingly, the final rule gives covered entities some flexibility to segregate or aggregate its operations for purposes of the application of this rule. The new component entity provision can be found at §§ 164.504(b)-(c). In response to the request for clarification on whether the rule would apply to a research component of the covered entity, we point out that if the research activities fall outside of the health care component they would not be subject to the rule. One organization may have one or several "health care component(s)" that each perform one or more of the health care functions of a covered entity, i.e., health care provider, health plan, health care clearinghouse. In addition, the final rule permits covered entities that are affiliated, i.e., share common ownership or control, to designate themselves, or their health care components, together to be a single covered entity for purposes of the rule.

It appears from the comments that there is not a common understanding of the meaning of "integrated delivery system." Arrangements that apply this label to themselves operate and share information many different ways, and may or may not be financially or clinically integrated. In some cases, multiple entities hold themselves out as one enterprise and engage together

in clinical or financial activities. In others, separate entities share information but do not provide treatment together or share financial risk. Many health care providers participate in more than one such arrangement.

Therefore, we do not include a separate category of "covered entity" under this rule for "integrated delivery systems" but instead accommodate the operations of these varied arrangements through the functional provisions of the rule. For example, covered entities that operate as "organized health care arrangements" as defined in this rule may share protected health information for the operation of such arrangement without becoming business associates of one another. Similarly, the regulation does not require a business associate arrangement when protected health information is shared for purposes of providing treatment. The application of this rule to any particular "integrated system" will depend on the nature of the common activities the participants in the system perform. When the participants in such an arrangement are "affiliated" as defined in this rule, they may consider themselves a single covered entity (see § 164. 504).

The arrangements between academic health centers, faculty practice plans, universities, and hospitals are similarly diverse. We cannot describe a blanket rule that covers all such arrangements. The application of this rule will depend on the purposes for which the participants in such arrangements share protected health information, whether some or all participants are under common ownership or control, and similar matters. We note that physicians who have staff privileges at a covered ***82570** hospital do not become part of that hospital covered entity by virtue of having such privileges.

We reject the recommendation to apply the rule only to components of an entity that engage in the transactions. This would omit as covered entities, for example, the health plan components that do not directly engage in the transactions, including components that engage in important health plan functions such as coverage determinations and quality review. Indeed, we do not believe that the statute permits this result with respect to health plans or health care clearinghouses as a matter of negative implication from section 1172(a)(3). We clarify that only a health care provider must conduct transactions to be a covered entity for purposes of this rule.

We also clarify that health care providers (such as doctors or nurses) who work for a larger organization and do not conduct transactions on their own behalf are workforce members of the covered entity, not covered entities themselves.

Comment: A few commenters asked the Department to clarify the definition to provide that a multi-line insurer that sells insurance coverages, some of which do and others which do not meet the definition of "health plan," is not a covered entity with respect to actions taken in connection with coverages that are not "health plans."

Response: The final rule clarifies that the requirements below apply only to the organizational unit or units of the organization that are the "health care component" of a covered entity, where the "covered functions" are not the primary functions of the entity. Therefore, for a multi-line insurer, the "health care component" is the insurance line(s) that conduct, or support the conduct of, the health care function of the covered entity. Also, it should be noted that excepted benefits, such as life insurance, are not included in the definition of "health plan." (See preamble discussion of § 164.504).

Comment: A commenter questioned whether the Health Care Financing Administration (HCFA) is a covered entity and how HCFA will share data with Medicare managed care organizations. The commenter also questioned why the regulation must apply to Medicaid since the existing Medicaid statute requires that states have privacy standards in place. It was also requested that the Department provide a definition of "health plan" to clarify that state Medicaid Programs are considered as such.

Response: HCFA is a covered entity because it administers Medicare and Medicaid, which are both listed in the statute as health plans. Medicare managed care organizations are also covered entities under this regulation. As noted elsewhere in this preamble, covered entities that jointly administer a health plan, such as Medicare + Choice, are both covered entities, and are not business associates of each other by virtue of such joint administration.

We do not exclude state Medicaid programs. Congress explicitly included the Medicaid program as a covered health plan in the HIPAA statute.

Comment: A commenter asked the Department to provide detailed guidance as to when providers, plans, and clearinghouses become covered entities. The commenter provided the following example: if a provider submits claims only in paper form, and a coordination of benefits (COB) transaction is created due to other insurance coverage, will the original provider need to be notified that the claim is now in electronic form, and that it has become a covered entity? Another commenter voiced concern as to whether physicians who do not conduct electronic transactions would become covered entities if another entity using its records downstream transmits information in connection with a standard transaction on their behalf.

Response: We clarify that health care providers who submit the transactions in standard electronic form, health plans, and health care clearinghouses are covered entities if they meet the respective definitions. Health care providers become subject to the rule if they conduct standard transactions. In the above example, the health care provider would not be a covered entity if the coordination of benefits transaction was generated by a payor.

We also clarify that health care providers who do not submit transactions in standard form become covered by this rule when other entities, such as a billing service or a hospital, transmit standard electronic transactions on the providers' behalf. However, where the downstream transaction is not conducted on behalf of the health care provider, the provider does not become a covered entity due to the downstream transaction.

Comment: Several commenters discussed the relationship between section 1179 of the Act and the privacy regulations. One commenter suggested that HHS retain the statement that a covered entity means “the entities to which part C of title XI of the Act applies.” In particular, the commenter observed that section 1179 of the Act provides that part C of title XI of the Act does not apply to financial institutions or to entities acting on behalf of such institutions that are covered by the section 1179 exemption. Thus, under the definition of covered entity, they comment that financial institutions and other entities that come within the scope of the section 1179 exemption are appropriately not covered entities.

Other commenters maintained that section 1179 of the Act means that the Act's privacy requirements do not apply to the request for, or the use or disclosure of, information by a covered entity with respect to payment: (a) For transferring receivables; (b) for auditing; (c) in connection with—(i) a customer dispute; or (ii) an inquiry from or to a customer; (d) in a communication to a customer of the entity regarding the customer's transactions payment card, account, check, or electronic funds transfer; (e) for reporting to consumer reporting agencies; or (f) for complying with: (i) a civil or criminal subpoena; or (ii) a federal or state law regulating the entity. These companies expressed concern that the proposed rule did not include the full text of section 1179 when discussing the list of activities that were exempt from the rule's requirements. Accordingly, they recommended including in the final rule either a full listing of or a reference to section 1179's full list of exemptions. Furthermore, these firms opposed applying the proposed rule's minimum necessary standard for disclosure of protected health information to financial institutions because of section 1179.

These commenters suggest that in light of section 1179, HHS lacks the authority to impose restrictions on financial institutions and other entities when they engage in activities described in that section. One commenter expressed concern that even though proposed § 164.510(i) would have permitted covered entities to disclose certain information to financial institutions for banking and payment processes, it did not state clearly that financial institutions and other entities described in section 1179 are exempt from the rule's requirements.

Response: We interpret section 1179 of the Act to mean that entities engaged in the activities of a financial institution, and those acting on behalf of a financial institution, are not subject to this regulation when they are engaged in authorizing, processing, clearing, settling, billing, transferring, reconciling, or collecting payments for a financial institution. The statutory reference to 12 U.S.C. 3401 indicates that Congress chose to adopt the definition of financial institutions found ***82571** in the Right to Financial Privacy Act, which defines financial institutions as any office of a bank, savings bank, card issuer, industrial

loan company, trust company, savings association, building and loan, homestead association, cooperative bank, credit union, or consumer finance institution located in the United States or one of its Territories. Thus, when we use the term "financial institution" in this regulation, we turn to the definition with which Congress provided us. We interpret this provision to mean that when a financial institution, or its agent on behalf of the financial institution, conducts the activities described in section 1179, the privacy regulation will not govern the activity.

If, however, these activities are performed by a covered entity or by another entity, including a financial institution, on behalf of a covered entity, the activities are subject to this rule. For example, if a bank operates the accounts payable system or other "back office" functions for a covered health care provider, that activity is not described in section 1179. In such instances, because the bank would meet the rule's definition of "business associate," the provider must enter into a business associate contract with the bank before disclosing protected health information pursuant to this relationship. However, if the same provider maintains an account through which he/she cashes checks from patients, no business associate contract would be necessary because the bank's activities are not undertaken for or on behalf of the covered entity, and fall within the scope of section 1179. In part to give effect to section 1179, in this rule we do not consider a financial institution to be acting on behalf of a covered entity when it processes consumer-conducted financial transactions by debit, credit or other payment card, clears checks, initiates or processes electronic funds transfers, or conducts any other activity that directly facilitates or effects the transfer of funds for compensation for health care.

We do not agree with the comment that section 1179 of the Act means that the privacy regulation's requirements cannot apply to the activities listed in that section; rather, it means that the entities expressly mentioned, financial institutions (as defined in the Right to Financial Privacy Act), and their agents that engage in the listed activities for the financial institution are not within the scope of the regulation. Nor do we interpret section 1179 to support an exemption for disclosures to financial institutions from the minimum necessary provisions of this regulation.

Comment: One commenter recommended that HHS include a definition of "entity" in the final rule because HIPAA did not define it. The commenter explained that in a modern health care environment, the organization acting as the health plan or health care provider may involve many interrelated corporate entities and that this could lead to difficulties in determining what "entities" are actually subject to the regulation.

Response: We reject the commenter's suggestion. We believe it is clear in the final rule that the entities subject to the regulation are those listed at § 160.102. However, we acknowledge that how the rule applies to integrated or other complex health systems needs to be addressed; we have done so in § 164.504 and in other provisions, such as those addressing organized health care arrangements.

Comment: The preamble should clarify that self-insured group health and workmen's compensation plans are not covered entities or business partners.

Response: In the preamble to the proposed rule we stated that certain types of insurance entities, such as workers' compensation, would not be covered entities under the rule. We do not change this position in this final rule. The statutory definition of health plan does not include workers' compensation products, and the regulatory definition of the term specifically excludes them. However, HIPAA specifically includes most group health plans within the definition of "health plan."

Comment: A health insurance issuer asserted that health insurers and third party administrators are usually required by employers to submit reports describing the volume, amount, payee, basis for services rendered, types of claims paid and services for which payment was requested on behalf of it covered employees. They recommended that the rule permit the disclosure of protected health information for such purposes.

Response: We agree that health plans should be able to disclose protected health information to employers sponsoring health plans under certain circumstances. Section 164.504(f) explains the conditions under which protected health information may

be disclosed to plan sponsors. We believe that this provision gives sponsors access to the information they need, but protects individual's information to the extent possible under our legislative authority.

Group Health Plan

For response to comments relating to "group health plan," see the response to comments on "health plan" below and the response to comments on § 164.504.

Health Care

Comment: A number of commenters asked that we include disease management activities and other similar health improvement programs, such as preventive medicine, health education services and maintenance, health and case management, and risk assessment, in the definition of "health care." Commenters maintained that the rule should avoid limiting technological advances and new health care trends intended to improve patient "health care."

Response: Review of these and other comments, and our fact-finding, indicate that there are multiple, different, understandings of the definition of these terms. Therefore, rather than create a blanket rule that includes such terms in or excludes such terms from the definition of "health care," we define health care based on the underlying activities that constitute health care. The activities described by these commenters are considered "health care" under this rule to the extent that they meet this functional definition. Listing activities by label or title would create the risk that important activities would be left out and, given the lack of consensus on what these terms mean, could also create confusion.

Comment: Several commenters urged that the Department clarify that the activities necessary to procure and distribute eyes and eye tissue will not be hampered by the rule. Some of these commenters explicitly requested that we include "eyes and eye tissue" in the list of procurement biologicals as well as "eye procurement" in the definition of "health care." In addition, it was argued that "administration to patients" be excluded in the absence of a clear definition. Also, commenters recommended that the definition include other activities associated with the transplantation of organs, such as processing, screening, and distribution.

Response: We delete from the definition of "health care" activities related to the procurement or banking of blood, sperm, organs, or any other tissue for administration to patients. We do so because persons who make such donations are not seeking to be treated, diagnosed, or assessed or otherwise seeking health care for themselves, but are seeking to contribute to the health care of others. In addition, the nature of ***82572** these activities entails a unique kind of information sharing and tracking necessary to safeguard the nation's organ and blood supply, and those seeking to donate are aware that this information sharing will occur. Consequently, such procurement or banking activities are not considered health care and the organizations that perform such activities are not considered health care providers for purposes of this rule.

With respect to disclosure of protected health information by covered entities to facilitate cadaveric organ and tissue donation, the final rule explicitly permits a covered entity to disclose protected health information without authorization, consent, or agreement to organ procurement organizations or other entities engaged in the procurement, banking, or transplantation of cadaveric organs, eyes, or tissue for the purpose of facilitating donation and transplantation. See § 164.512(h). We do not include blood or sperm banking in this provision because, for those activities, there is direct contact with the donor, and thus opportunity to obtain the individual's authorization.

Comment: A large number of commenters urged that the term "assessment" be included in the list of services in the definition, as "assessment" is used to determine the baseline health status of an individual. It was explained that assessments are conducted in the initial step of diagnosis and treatment of a patient. If assessment is not included in the list of services, they pointed out that the services provided by occupational health nurses and employee health information may not be covered.

Response: We agree and have added the term "assessment" to the definition to clarify that this activity is considered "health care" for the purposes of the rule.

Comment: One commenter asked that we revise the definition to explicitly exclude plasmapheresis from paragraph (3) of the definition. It was explained that plasmapheresis centers do not have direct access to health care recipients or their health information, and that the limited health information collected about plasma donors is not used to provide health care services as indicated by the definition of health care.

Response: We address the commenters' concerns by removing the provision related to procurement and banking of human products from the definition.

Health Care Clearinghouse

Comment: The largest set of comments relating to health care clearinghouses focused on our proposal to exempt health care clearinghouses from the patient notice and access rights provisions of the regulation. In our NPRM, we proposed to exempt health care clearinghouses from certain provisions of the regulation that deal with the covered entities' notice of information practices and consumers' rights to inspect, copy, and amend their records. The rationale for this exemption was based on our belief that health care clearinghouses engage primarily in business-to-business transactions and do not initiate or maintain direct relationships with individuals. We proposed this position with the caveat that the exemptions would be void for any health care clearinghouse that had direct contact with individuals in a capacity other than that of a business partner. In addition, we indicated that, in most instances, clearinghouses also would be considered business partners under this rule and would be bound by their contracts with covered plans and providers. They also would be subject to the notice of information practices developed by the plans and providers with whom they contract.

Commenters stated that, although health care clearinghouses do not have direct contact with individuals, they do have individually identifiable health information that may be subject to misuse or inappropriate disclosure. They expressed concern that we were proposing to exempt health care clearinghouses from all or many aspects of the regulation. These commenters suggested that we either delete the exemption or make it very narrow, specific and explicit in the final regulatory text.

Clearinghouse commenters, on the other hand, were in agreement with our proposal, including the exemption provision and the provision that the exemption is voided when the entity does have direct contact with individuals. They also stated that a health care clearinghouse that has a direct contact with individuals is no longer a health care clearinghouse as defined and should be subject to all requirements of the regulation.

Response: In the final rule, where a clearinghouse creates or receives protected health information as a business associate of another covered entity, we maintain the exemption for health care clearinghouses from certain provisions of the regulation dealing with the notice of information practices and patient's direct access rights to inspect, copy and amend records (§§ 164.524 and 164.526), on the grounds that a health care clearinghouse is engaged in business-to-business operations, and is not dealing directly with individuals. Moreover, as business associates of plans and providers, health care clearinghouses are bound by the notices of information practices of the covered entities with whom they contract.

Where a health care clearinghouse creates or receives protected health information other than as a business associate, however, it must comply with all the standards, requirements, and implementation specifications of the rule. We describe and delimit the exact nature of the exemption in the regulatory text. See § 164.500(b). We will monitor developments in this sector should the basic business-to-business relationship change.

Comment: A number of comments relate to the proposed definition of health care clearinghouse. Many commenters suggested that we expand the definition. They suggested that additional types of entities be included in the definition of health care clearinghouse, specifically medical transcription services, billing services, coding services, and “intermediaries.” One commenter suggested that the definition be expanded to add entities that receive standard transactions, process them and clean them up, and then send them on, without converting them to any standard format. Another commenter suggested that the health care clearinghouse definition be expanded to include entities that do not perform translation but may receive protected

health information in a standard format and have access to that information. Another commenter stated that the list of covered entities should include any organization that receives or maintains individually identifiable health information. One organization recommended that we expand the health care clearinghouse definition to include the concept of a research data clearinghouse, which would collect individually identifiable health information from other covered entities to generate research data files for release as de-identified data or with appropriate confidentiality safeguards. One commenter stated that HHS had gone beyond Congressional intent by including billing services in the definition.

Response: We cannot expand the definition of "health care clearinghouse" to cover entities not covered by the definition of this term in the statute. In the final regulation, we ***82573** make a number of changes to address public comments relating to definition. We modify the definition of health care clearinghouse to conform to the definition published in the Transactions Rule (with the addition of a few words, as noted above). We clarify in the preamble that, while the term "health care clearinghouse" may have other meanings and connotations in other contexts, for purposes of this regulation an entity is considered a health care clearinghouse only to the extent that it actually meets the criteria in our definition. Entities performing other functions but not meeting the criteria for a health care clearinghouse are not clearinghouses, although they may be business associates. Billing services are included in the regulatory definition of "health care clearinghouse," if they perform the specified clearinghouse functions. Although we have not added or deleted any entities from our original definition, we will monitor industry practices and may add other entities in the future as changes occur in the health system.

Comment: Several commenters suggested that we clarify that an entity acting solely as a conduit through which individually identifiable health information is transmitted or through which protected health information flows but is not stored is not a covered entity, e.g., a telephone company or Internet Service Provider. Other commenters indicated that once a transaction leaves a provider or plan electronically, it may flow through several entities before reaching a clearinghouse. They asked that the regulation protect the information in that interim stage, just as the security NPRM established a chain of trust arrangement for such a network. Others noted that these "conduit" entities are likely to be business partners of the provider, clearinghouse or plan, and we should clarify that they are subject to business partner obligations as in the proposed Security Rule.

Response: We clarify that entities acting as simple and routine communications conduits and carriers of information, such as telephone companies and Internet Service Providers, are not clearinghouses as defined in the rule unless they carry out the functions outlined in our definition. Similarly, we clarify that value added networks and switches are not health care clearinghouses unless they carry out the functions outlined in the definition, and clarify that such entities may be business associates if they meet the definition in the regulation.

Comment: Several commenters, including the large clearinghouses and their trade associations, suggested that we not treat health care clearinghouses as playing a dual role as covered entity and business partner in the final rule because such a dual role causes confusion as to which rules actually apply to clearinghouses. In their view, the definition of health care clearinghouse is sufficiently clear to stand alone and identify a health care clearinghouse as a covered entity, and allows health care clearinghouses to operate under one consistent set of rules.

Response: For reasons explained in § 164.504 of this preamble, we do not create an exception to the business associate requirements when the business associate is also a covered entity. We retain the concept that a health care clearinghouse may be a covered entity and a business associate of a covered entity under the regulation. As business associates, they would be bound by their contracts with covered plans and providers.

Health Care Provider

Comment: One commenter pointed out that the preamble referred to the obligations of providers and did not use the term, "covered entity," and thus created ambiguity about the obligations of health care providers who may be employed by persons other than covered entities, e.g., pharmaceutical companies. It was suggested that a better reading of the statute and rule is that where neither the provider nor the company is a covered entity, the rule does not impose an obligation on either the provider-employee or the employer.

Response: We agree. We use the term "covered entity" whenever possible in the final rule, except for the instances where the final rule treats the entities differently, or where use of the term "health care provider" is necessary for purposes of illustrating an example.

Comment: Several commenters stated that the proposal's definition was broad, unclear, and/or confusing. Further, we received many comments requesting clarification as to whether specific entities or persons were "health care providers" for the purposes of our rule. One commenter questioned whether affiliated members of a health care group (even though separate legal entities) would be considered as one primary health care provider.

Response: We permit legally distinct covered entities that share common ownership or control to designate themselves together to be a single covered entity. Such organizations may promulgate a single shared notice of information practices and a consent form. For more detailed information, see the preamble discussion of § 164.504(d).

We understand the need for additional guidance on whether specific entities or persons are health care providers under the final rule. We provide guidance below and will provide additional guidance as the rule is implemented.

Comment: One commenter observed that sections 1171(3), 1861(s) and 1861(u) of the Act do not include pharmacists in the definition of health care provider or pharmacist services in the definition of "medical or other health services," and questioned whether pharmacists were covered by the rule.

Response: The statutory definition of "health care provider" at section 1171(3) includes "any other person or organization who furnishes, bills, or is paid for health care in the normal course of business." Pharmacists' services are clearly within this statutory definition of "health care." There is no basis for excluding pharmacists who meet these statutory criteria from this regulation.

Comment: Some commenters recommended that the scope of the definition be broadened or clarified to cover additional persons or organizations. Several commenters argued for expanding the reach of the health care provider definition to cover entities such as state and local public health agencies, maternity support services (provided by nutritionists, social workers, and public health nurses and the Special Supplemental Nutrition Program for Women, Infants and Children), and those companies that conduct cost-effectiveness reviews, risk management, and benchmarking studies. One commenter queried whether auxiliary providers such as child play therapists, and speech and language therapists are considered to be health care providers. Other commenters questioned whether "alternative" or "complementary" providers, such as naturopathic physicians and acupuncturists would be considered health care providers covered by the rule.

Response: As with other aspects of this rule, we do not define "health care provider" based on the title or label of the professional. The professional activities of these kinds of providers vary; a person is a "health care provider" if those activities are consistent with the rule's definition of "health care provider." Thus, health care providers include persons, such as those noted by the commenters, to the extent that they meet the definition. We note that health care providers are only ***82574** subject to this rule if they conduct certain transactions. See the definition of "covered entity."

However companies that conduct cost-effectiveness reviews, risk management, and benchmarking studies are not health care providers for the purposes of this rule unless they perform other functions that meet the definition. These entities would be business associates if they perform such activities on behalf of a covered entity.

Comment: Another commenter recommended that the Secretary expand the definition of health care provider to cover health care providers who transmit or "or receive" any health care information in electronic form.

Response: We do not accept this suggestion. Section 1172(a)(3) states that providers that "transmit" health information in connection with one of the HIPAA transactions are covered, but does not use the term "receive" or a similar term.

Comment: Some comments related to online companies as health care providers and covered entities. One commenter argued that there was no reason "why an Internet pharmacy should not also be covered" by the rule as a health care provider. Another commenter stated that online health care service and content companies, including online medical record companies, should be covered by the definition of health care provider. Another commenter pointed out that the definitions of covered entities cover "Internet providers who 'bill' or are 'paid' for health care services or supplies, but not those who finance those services in other ways, such as through sale of identifiable health information or advertising." It was pointed out that thousands of Internet sites use information provided by individuals who access the sites for marketing or other purposes.

Response: We agree that online companies are covered entities under the rule if they otherwise meet the definition of health care provider or health plan and satisfy the other requirements of the rule, i.e., providers must also transmit health information in electronic form in connection with a HIPAA transaction. We restate here the language in the preamble to the proposed rule that "An individual or organization that bills and/or is paid for health care services or supplies in the normal course of business, such as * * * an "online" pharmacy accessible on the Internet, is also a health care provider for purposes of this statute" (64 FR 59930).

Comment: We received many comments related to the reference to "health clinic or licensed health care professional located at a school or business in the preamble's discussion of "health care provider." It was stated that including "licensed health care professionals located at a school or business" highlights the need for these individuals to understand they have the authority to disclose information to the Social Security Administration (SSA) without authorization.

However, several commenters urged HHS to create an exception for or delete that reference in the preamble discussion to primary and secondary schools because of employer or business partner relationships. One federal agency suggested that the reference "licensed health care professionals located at a [school]" be deleted from the preamble because the definition of health care provider does not include a reference to schools. The commenter also suggested that the Secretary consider: adding language to the preamble to clarify that the rules do not apply to clinics or school health care providers that only maintain records that have been excepted from the definition of protected health information, adding an exception to the definition of covered entities for those schools, and limiting paperwork requirements for these schools. Another commenter argued for deleting references to schools because the proposed rule appeared to supersede or create ambiguity as to the Family Educational Rights and Privacy Act (FERPA), which gives parents the right to access "education" and health records of their unemancipated minor children. However, in contrast, one commenter supported the inclusion of health care professionals who provide services at schools or businesses.

Response: We realize that our discussion of schools in the NPRM may have been confusing. Therefore, we address these concerns and set forth our policy regarding protected health information in educational agencies and institutions in the "Relationship to Other Federal Laws" discussion of FERPA, above.

Comment: Many commenters urged that direct contact with the patient be necessary for an entity to be considered a health care provider. Commenters suggested that persons and organizations that are remote to the patient and have no direct contact should not be considered health care providers. Several commenters argued that the definition of health care provider covers a person that provides health care services or supplies only when the provider furnishes to or bills the patient directly. It was stated that the Secretary did not intend that manufacturers, such as pharmaceutical, biologics, and device manufacturers, health care suppliers, medical-surgical supply distributors, health care vendors that offer medical record documentation templates and that typically do not deal directly with the patient, be considered health care providers and thus covered entities. However, in contrast, one commenter argued that, as an in vitro diagnostics manufacturer, it should be covered as a health care provider.

Response: We disagree with the comments that urged that direct dealings with an individual be a prerequisite to meeting the definition of health care provider. Many providers included in the statutory definition of provider, such as clinical labs, do not have direct contact with patients. Further, the use and disclosure of protected health information by indirect treatment providers can have a significant effect on individuals' privacy. We acknowledge, however, that providers who treat patients only indirectly

need not have the full array of responsibilities as direct treatment providers, and modify the NPRM to make this distinction with respect to several provisions (see, for example § 164.506 regarding consent). We also clarify that manufacturers and health care suppliers who are considered providers by Medicare are providers under this rule.

Comment: Some commenters suggested that blood centers and plasma donor centers that collect and distribute source plasma not be considered covered health care providers because the centers do not provide "health care services" and the blood donors are not "patients" seeking health care. Similarly, commenters expressed concern that organ procurement organizations might be considered health care providers.

Response: We agree and have deleted from the definition of "health care" the term "procurement or banking of blood, sperm, organs, or any other tissue for administration to patients." See prior discussion under "health care."

Comment: Several commenters proposed to restrict coverage to only those providers who furnished and were paid for services and supplies. It was argued that a salaried employee of a covered entity, such as a hospital-based provider, should not be covered by the rule because that provider would be subject both directly to the rule as a covered entity and indirectly as an employee of a covered entity.

Response: The "dual" direct and indirect situation described in these comments can arise only when a health ***82575** care provider conducts standard HIPAA transactions both for itself and for its employer. For example, when the services of a provider such as a hospital-based physician are billed through a standard HIPAA transaction conducted for the employer, in this example the hospital, the physician does not become a covered provider. Only when the provider uses a standard transaction on its own behalf does he or she become a covered health care provider. Thus, the result is typically as suggested by this commenter. When a hospital-based provider is not paid directly, that is, when the standard HIPAA transaction is not on its behalf, it will not become a covered provider.

Comment: Other commenters argued that an employer who provides health care services to its employees for whom it neither bills the employee nor pays for the health care should not be considered health care providers covered by the proposed rule.

Response: We clarify that the employer may be a health care provider under the rule, and may be covered by the rule if it conducts standard transactions. The provisions of § 164.504 may also apply.

Comment: Some commenters were confused about the preamble statement: "in order to implement the principles in the Secretary's Recommendations, we must impose any protections on the health care providers that use and disclose the information, rather than on the researcher seeking the information," with respect to the rule's policy that a researcher who provides care to subjects in a trial will be considered a health care provider. Some commenters were also unclear about whether the individual researcher providing health care to subjects in a trial would be considered a health care provider or whether the researcher's home institution would be considered a health care provider and thus subject to the rule.

Response: We clarify that, in general, a researcher is also a health care provider if the researcher provides health care to subjects in a clinical research study and otherwise meets the definition of "health care provider" under the rule. However, a health care provider is only a covered entity and subject to the rule if that provider conducts standard transactions. With respect to the above preamble statement, we meant that our jurisdiction under the statute is limited to covered entities. Therefore, we cannot apply any restrictions or requirements on a researcher in that person's role as a researcher. However, if a researcher is also a health care provider that conducts standard transactions, that researcher/provider is subject to the rule with regard to its provider activities.

As to applicability to a researcher/provider versus the researcher's home institution, we provide the following guidance. The rule applies to the researcher as a covered entity if the researcher is a health care provider who conducts standard transactions for services on his or her own behalf, regardless of whether he or she is part of a larger organization. However, if the services

and transactions are conducted on behalf of the home institution, then the home institution is the covered entity for purposes of the rule and the researcher/provider is a workforce member, not a covered entity.

Comment: One commenter expressed confusion about those instances when a health care provider was a covered entity one day, and one who "works under a contract" for a manufacturer the next day.

Response: If persons are covered under the rule in one role, they are not necessarily covered entities when they participate in other activities in another role. For example, that person could be a covered health care provider in a hospital one day but the next day read research records for a different employer. In its role as researcher, the person is not covered, and protections do not apply to those research records.

Comment: One commenter suggested that the Secretary modify proposed § 160.102, to add the following clause at the end (after (c)) (regarding health care provider), "With respect to any entity whose primary business is not that of a health plan or health care provider licensed under the applicable laws of any state, the standards, requirements, and implementation specifications of this subchapter shall apply solely to the component of the entity that engages in the transactions specified in [§] 160.103." (Emphasis added.) Another commenter also suggested that the definition of "covered entity" be revised to mean entities that are "primarily or exclusively engaged in health care-related activities as a health plan, health care provider, or health care clearinghouse."

Response: The Secretary rejects these suggestions because they will impermissibly limit the entities covered by the rule. An entity that is a health plan, health care provider, or health care clearinghouse meets the statutory definition of covered entity regardless of how much time is devoted to carrying out health care-related functions, or regardless of what percentage of their total business applies to health care-related functions.

Comment: Several commenters sought to distinguish a health care provider from a business partner as proposed in the NPRM. For example, a number of commenters argued that disease managers that provide services "on behalf of" health plans and health care providers, and case managers (a variation of a disease management service) are business partners and not "health care providers." Another commenter argued that a disease manager should be recognized (presumably as a covered entity) because of its involvement from the physician-patient level through complex interactions with health care providers.

Response: To the extent that a disease or case manager provides services on behalf of or to a covered entity as described in the rule's definition of business associate, the disease or case manager is a business associate for purposes of this rule. However, if services provided by the disease or case manager meet the definition of treatment and the person otherwise meets the definition of "health care provider," such a person is a health care provider for purposes of this rule.

Comment: One commenter argued that pharmacy employees who assist pharmacists, such as technicians and cashiers, are not business partners.

Response: We agree. Employees of a pharmacy that is a covered entity are workforce members of that covered entity for purposes of this rule.

Comment: A number of commenters requested that we clarify the definition of health care provider ("* * * who furnishes, bills, or is paid for health care services or supplies in the normal course of business") by defining the various terms "furnish", "supply", and "in the normal course of business." For instance, it was stated that this would help employers recognize when services such as an employee assistance program constituted health care covered by the rule.

Response: Although we understand the concern expressed by the commenters, we decline to follow their suggestion to define terms at this level of specificity. These terms are in common use today, and an attempt at specific definition would risk the inadvertent creations of conflict with industry practices. There is a significant variation in the way employers structure their

employee assistance programs (EAPs) and the type of services that they provide. If the EAP provides direct treatment to individuals, it may be a health care provider. ***82576**

Health Information

The response to comments on health information is included in the response to comments on individually identifiable health information, in the preamble discussion of § 164.501.

Health Plan

Comment: One commenter suggested that to eliminate any ambiguity, the Secretary should clarify that the catch-all category under the definition of health plan includes "24-hour coverage plans" (whether insured or self-insured) that integrate traditional employee health benefits coverage and workers' compensation coverage for the treatment of on-the-job injuries and illnesses under one program. It was stated that this clarification was essential if the Secretary persisted in excluding workers' compensation from the final rule.

Response: We understand concerns that such plans may use and disclose individually identifiable health information. We therefore clarify that to the extent that 24-hour coverage plans have a health care component that meets the definition of "health plan" in the final rule, such components must abide by the provisions of the final rule. In the final rule, we have added a new provision to § 164.512 that permits covered entities to disclose information under workers' compensation and similar laws. A health plan that is a 24-hour plan is permitted to make disclosures as necessary to comply with such laws.

Comment: A number of commenters urged that certain types of insurance entities, such as workers' compensation and automobile insurance carriers, property and casualty insurance health plans, and certain forms of limited benefits coverage, be included in the definition of "health plan." It was argued that consumers deserve the same protection with respect to their health information, regardless of the entity using it, and that it would be inequitable to subject health insurance carriers to more stringent standards than other types of insurers that use individually identifiable health information.

Response: The Congress did not include these programs in the definition of a "health plan" under section 1171 of the Act. Further, HIPAA's legislative history shows that the House Report's (H. Rep. 104-496) definition of "health plan" originally included certain benefit programs, such as workers' compensation and liability insurance, but was later amended to clarify the definition and remove these programs. Thus, since the statutory definition of a health plan both on its face and through legislative history evidence Congress' intention to exclude such programs, we do not have the authority to require that these programs comply with the standards. We have added explicit language to the final rule which excludes the excepted benefit programs, as defined in section 2971(c)(1) of the PHS Act, 42 U.S.C. 300gg-91(c)(1).

Comment: Some commenters urged HHS to include entities such as stop loss insurers and reinsurers in the definition of "health plan." It was observed that such entities have come to play important roles in managed care delivery systems. They asserted that increasingly, capitated health plans and providers contract with their reinsurers and stop loss carriers to medically manage their high cost outlier cases such as organ and bone marrow transplants, and therefore should be specifically cited as subject to the regulations.

Response: Stop-loss and reinsurers do not meet the statutory definition of health plan. They do not provide or pay for the costs of medical care, as described in the statute, but rather insure health plans and providers against unexpected losses. Therefore, we cannot include them as health plans in the regulation.

Comment: A commenter asserted that there is a significant discrepancy between the effect of the definition of "group health plan" as proposed in § 160.103, and the anticipated impact in the cost estimates of the proposed rule at 64 FR 60014. Paragraph (1) of the proposed definition of "health plan" defined a "group health plan" as an ERISA-defined employee welfare benefit plan that provides medical care and that: "(i) Has 50 or more participants, or (ii) Is administered by an entity other than the

employer that established and maintains the plan[.]" (emphasis added) According to this commenter, under this definition, the only insured or self-insured ERISA plans that would not be regulated "health plans" would be those that have less than 50 participants and are self administered.

The commenter presumed that the we had intended to exclude from the definition of "health plan" (and from coverage under the proposed rule) all ERISA plans that are small (less than 50 participants) or are administered by a third party, whether large or small, based on the statement at 64 FR 60014, note 18. That footnote stated that the Department had "not included the 3.9 million 'other' employer-health plans listed in HCFA's administrative simplification regulations because these plans are administered by a third party. The proposed regulation will not regulate the employer plans but will regulate the third party administrators of the plan." The commenter urged us not to repeat the statutory definition, and to adopt the policy implied in the footnote.

Response: We agree with the commenter's observation that footnote 18 (64 FR 60014) was inconsistent with the proposed definition. We erred in drafting that note. The definition of "group health plan" is adopted from the statutory definition at section 1171(5)(A), and excludes from the rule as "health plans" only the few insured or self-insured ERISA plans that have less than 50 participants and are self administered. We reject the commenter's proposed change to the definition as inconsistent with the statute.

Comment: A number of insurance companies asked that long term care insurance policies be excluded from the definition of "health plan." It was argued that such policies do not provide sufficiently comprehensive coverage of the cost of medical care, and are limited benefit plans that provide or pay for the cost of custodial and other related services in connection with a long term, chronic illness or disability.

These commenters asserted that HIPAA recognizes this nature of long term care insurance, observing that, with respect to HIPAA's portability requirements, Congress enacted a series of exclusions for certain defined types of health plan arrangements that do not typically provide comprehensive coverage. They maintained that Congress recognized that long term care insurance is excluded, so long as it is not a part of a group health plan. Where a long term care policy is offered separately from a group health plan it is considered an excepted benefit and is not subject to the portability and guarantee issue requirements of HIPAA. Although this exception does not appear in the Administrative Simplification provisions of HIPAA, it was asserted that it is guidance with respect to the treatment of long term care insurance as a limited benefit coverage and not as coverage that is so "sufficiently comprehensive" that it is to be treated in the same manner as a typical, comprehensive major medical health plan arrangement.

Another commenter offered a different perspective observing that there are some long-term care policies—that do not pay for medical care and therefore are not "health plans." It was noted that most long-term care policies are reimbursement policies —that is, ***82577** they reimburse the policyholder for the actual expenses that the insured incurs for long-term care services. To the extent that these constitute "medical care," this commenter presumed that these policies would be considered "health plans." Other long-term care policies, they pointed out, simply pay a fixed dollar amount when the insured becomes chronically ill, without regard to the actual cost of any long-term care services received, and thus are similar to fixed indemnity critical illness policies. The commenter suggested that while there was an important distinction between indemnity based long-term care policies and expenses based long-term care policies, it may be wise to exclude all long-term care policies from the scope of the rule to achieve consistency with HIPAA.

Response: We disagree. The statutory language regarding long-term care policies in the portability title of HIPAA is different from the statutory language regarding long-term care policies in the Administrative Simplification title of HIPAA. Section 1171(5)(G) of the Act means that issuers of long-term care policies are considered health plans for purposes of administrative simplification. We also interpret the statute as authorizing the Secretary to exclude nursing home fixed-indemnity policies, not all long-term care policies, from the definition of "health plan," if she determines that these policies do not provide "sufficiently comprehensive coverage of a benefit" to be treated as a health plan (see section 1171 of the Act). We interpret the term "comprehensive" to refer to the breadth or scope of coverage of a policy. "Comprehensive" policies are those that cover a range

of possible service options. Since nursing home fixed indemnity policies are, by their own terms, limited to payments made solely for nursing facility care, we have determined that they should not be included as health plans for the purposes of the HIPAA regulations. The Secretary, therefore, explicitly excluded nursing home fixed-indemnity policies from the definition of "health plan" in the Transactions Rule, and this exclusion is thus reflected in this final rule. Issuers of other long-term care policies are considered to be health plans under this rule and the Transactions Rule.

Comment: One commenter was concerned about the potential impact of the proposed regulations on "unfunded health plans," which the commenter described as programs used by smaller companies to provide their associates with special employee discounts or other membership incentives so that they can obtain health care, including prescription drugs, at reduced prices. The commenter asserted that if these discount and membership incentive programs were covered by the regulation, many smaller employers might discontinue offering them to their employees, rather than deal with the administrative burdens and costs of complying with the rule.

Response: Only those special employee discounts or membership incentives that are "employee welfare benefit plans" as defined in section 3(1) of the Employee Retirement Income Security Act of 1974, 29 U.S.C. 1002(1), and provide "medical care" (as defined in section 2791(a)(2) of the Public Health Service Act, 42 U.S.C. 300gg-91(a)(2)), are health plans for the purposes of this rule. Discount or membership incentive programs that are not group health plans are not covered by the rule.

Comment: Several commenters agreed with the proposal to exclude "excepted benefits" such as disability income insurance policies, fixed indemnity critical illness policies, and per diem long-term care policies from the definition of "health plan," but were concerned that the language of the proposed rule did not fully reflect this intent. They asserted that clarification was necessary in order to avoid confusion and costs to both consumers and insurers.

One commenter stated that, while HHS did not intend for the rule to apply to every type of insurance coverage that paid for medical care, the language of the proposed rule did not bear this out. The problem, it was asserted, is that under the proposed rule any insurance policy that pays for "medical care" would technically be a "health plan." It was argued that despite the statements in the narrative, there are no provisions that would exempt any of the "excepted benefits" from the definition of "health care." It was stated that:

Although (with the exception of long-term care insurance), the proposed rule does not include the 'excepted benefits' in its list of sixteen examples of a health plan (proposed 45 CFR 160.104), it does not explicitly exclude them either. Because these types of policies in some instances pay benefits that could be construed as payments for medical care, we are concerned by the fact that they are not explicitly excluded from the definition of 'health plan' or the requirements of the proposed rule."

Several commenters proposed that HHS adopt the same list of "excepted benefits" contained in 29 U.S.C. 1191b, suggesting that they could be adopted either as exceptions to the definition of "health plan" or as exceptions to the requirements imposed on "health plans." They asserted that this would promote consistency in the federal regulatory structure for health plans.

It was suggested that HHS clarify whether the definition of health plan, particularly the "group health plan" and "health insurance issuer" components, includes a disability plan or disability insurer. It was noted that a disability plan or disability insurer may cover only income lost from disability and, as mentioned above, some rehabilitation services, or a combination of lost income, rehabilitation services and medical care. The commenter suggested that in addressing this coverage issue, it may be useful to refer to the definitions of group health plan, health insurance issuer and medical care set forth in Part I of HIPAA, which the statutory provisions of the Administrative Simplification subtitle expressly reference. See 42 U.S.C. 1320d(5)(A) and (B).

Response: We agree that the NPRM may have been ambiguous regarding the types of plans the rule covers. To remedy this confusion, we have added language that specifically excludes from the definition any policy, plan, or program providing or paying the cost of the excepted benefits, as defined in section 2971(c)(1) of the PHS Act, 42 U.S.C. 300gg-91(c)(1). As defined in the statute, this includes but is not limited to benefits under one or more (or any combination thereof) of the following:

coverage only for accident, or disability income insurance, or any combination thereof; liability insurance, including general liability insurance and automobile liability insurance; and workers' compensation or similar insurance.

However, the other excepted benefits as defined in section 2971(c)(2) of the PHS Act, 42 U.S.C. 300gg-91(c)(2), such as limited scope dental or vision benefits, not explicitly excepted from the regulation could be considered "health plans" under paragraph (1)(xvii) of the definition of "health plan" in the final rule if and to the extent that they meet the criteria for the definition of "health plan." Such plans, unlike the programs and plans listed at section 2971(c)(1), directly and exclusively provide health insurance, even if limited in scope.

Comment: One commenter recommended that the Secretary clarify that "health plan" does not include property and casualty benefit providers. The commenter stated that the clarifying language is needed given the "catchall" category of entities defined as "any other individual plan or group health plan, or combination thereof, that ***82578** provides or pays for the cost of medical care," and asserted that absent clarification there could be serious confusion as to whether property and casualty benefit providers are "health plans" under the rule.

Response: We agree and as described above have added language to the final rule to clarify that the "excepted benefits" as defined under 42 U.S.C. 300gg-91(c)(1), which includes liability programs such as property and casualty benefit providers, are not health plans for the purposes of this rule.

Comment: Some commenters recommended that the Secretary replace the term "medical care" with "health care." It was observed that "health care" was defined in the proposal, and that this definition was used to define what a health care provider does. However, they observed that the definition of "health plan" refers to the provision of or payment for "medical care," which is not defined. Another commenter recommended that HHS add the parenthetical phrase "as such term is defined in section 2791 of the Public Health Service Act" after the phrase "medical care."

Response: We disagree with the first recommendation. We understand that the term "medical care" can be easily confused with the term "health care." However, the two terms are not synonymous. The term "medical care" is a statutorily defined term and its use is critical in making a determination as to whether a health plan is considered a "health plan" for purposes of administrative simplification. In addition, since the term "medical care" is used in the regulation only in the context of the definition of "health plan" and we believe that its inclusion in the regulatory text may cause confusion, we did not add a definition of "medical care" in the final rule. However, consistent with the second recommendation above, the statutory cite for "medical care" was added to the definition of "health plan" in the Transactions Rule, and thus is reflected in this final rule.

Comment: A number of commenters urged that the Secretary define more narrowly what characteristics would make a government program that pays for specific health care services a "health plan." Commenters argued that there are many "payment" programs that should not be included, as discussed below, and that if no distinctions were made, "health plan" would mean the same as "purchaser" or even "payor."

Commenters asserted that there are a number of state programs that pay for "health care" (as defined in the rule) but that are not health plans. They said that examples include the WIC program (Special Supplemental Nutrition Program for Women, Infants, and Children) which pays for nutritional assessment and counseling, among other services; the AIDS Client Services Program (including AIDS prescription drug payment) under the federal Ryan White Care Act and state law; the distribution of federal family planning funds under Title X of the Public Health Services Act; and the breast and cervical health program which pays for cancer screening in targeted populations. Commenters argued that these are not insurance plans and do not fall within the "health plan" definition's list of examples, all of which are either insurance or broad-scope programs of care under a contract or statutory entitlement. However, paragraph (16) in that list opens the door to broader interpretation through the catchall phrase, "any other individual or group plan that provides or pays for the cost of medical care." Commenters assert that clarification is needed.

A few commenters stated that other state agencies often work in partnership with the state Medicaid program to implement certain Medicaid benefits, such as maternity support services and prenatal genetics screening. They concluded that while this probably makes parts of the agency the "business partner" of a covered entity, they were uncertain whether it also makes the same agency parts a "health plan" as well.

Response: We agree with the commenters that clarification is needed as to the rule's application to government programs that pay for health care services. Accordingly, in the final rule we have excepted from the definition of "health plan" a government funded program which does not have as its principal purpose the provision of, or payment for, the cost of health care or which has as its principal purpose the provision, either directly or by grant, of health care. For example, the principal purpose of the WIC program is not to provide or pay for the cost of health care, and thus, the WIC program is not a health plan for purposes of this rule. The program of health care services for individuals detained by the INS provides health care directly, and so is not a health plan. Similarly, the family planning program authorized by Title X of the Public Health Service Act pays for care exclusively through grants, and so is not a health plan under this rule. These programs (the grantees under the Title X program) may be or include health care providers and may be covered entities if they conduct standard transactions.

We further clarify that, where a public program meets the definition of "health plan," the government agency that administers the program is the covered entity. Where two agencies administer a program jointly, they are both a health plan. For example, both the Health Care Financing Administration and the insurers that offers a Medicare+Choice plan are "health plans" with respect to Medicare beneficiaries. An agency that does not administer a program but which provides services for such a program is not a covered entity by virtue of providing such services. Whether an agency providing services is a business associate of the covered entity depends on whether its functions for the covered entity meet the definition of business associate in § 164.501 and, in the example described by this comment, in particular on whether the arrangement falls into the exception in § 164.504(e)(1)(ii)(C) for government agencies that collect eligibility or enrollment information for covered government programs.

Comment: Some commenters expressed support for retaining the category in paragraph (16) of the proposal's definition: "Any other individual or group health plan, or combination thereof, that provides or pays for the cost of medical care." Others asked that the Secretary clarify this category. One commenter urged that the final rule clearly define which plans would meet the criteria for this category.

Response: As described in the proposed rule, this category implements the language at the beginning of the statutory definition of the term "health plan": "The term 'health plan' means an individual or group plan that provides, or pays the cost of, medical care * * * Such term includes the following, and any combination thereof * * *" This statutory language is general, not specific, and as such, we are leaving it general in the final rule. However, as described above, we add explicit language which excludes certain "excepted benefits" from the definition of "health plan" in an effort to clarify which plans are not health plans for the purposes of this rule. Therefore, to the extent that a certain benefits plan or program otherwise meets the definition of "health plan" and is not explicitly excepted, that program or plan is considered a "health plan" under paragraph (1)(xvii) of the final rule.

Comment: A commenter explained that HIPAA defines a group health plan by expressly cross-referencing the statutory sections in the PHS Act and the Employee Retirement Income ***82579** Security Act of 1974 (ERISA), 29 U.S.C. 1001, et seq., which define the terms "group health plan," "employee welfare benefit plan" and "participant." See 29 U.S.C. 1002(l) (definition of "employee welfare benefit plan," which is the core of the definition of group health plan under both ERISA and the PHS Act); 29 U.S.C. 100217) (definition of participant); 29 U.S.C. 1193(a) (definition of "group health plan," which is identical to that in section 2791(a) of the PHS Act).

It was pointed out that the preamble and the text of the proposed rule both limit the definition of all three terms to their current definitions. The commenter reasoned that since the ERISA definitions may change over time through statutory amendment, Department of Labor regulations or judicial interpretation, it would not be clear what point in time is to be considered current. Therefore, they suggested deleting references to "current" or "currently" in the preamble and in the regulation with respect to these three ERISA definitions.

In addition, the commenter stated that as the preamble to the NPRM correctly reflected, HIPAA expressly cross-references ERISA's definition of "participant" in section 3(7) of ERISA, 29 U.S.C. 1002(7). 42 U.S.C. 1320d(5)(A). The text of the privacy regulation, however, omits this cross-reference. It was suggested that the reference to section 3(7) of ERISA, defining "participant," be included in the regulation.

Finally, HIPAA incorporates the definition of a group health plan as set forth in section 2791(a) of the PHS Act, 42 U.S.C. 300gg-91(a)(l). That definition refers to the provision of medical care "directly or through insurance, reimbursement, or otherwise." The word "reimbursement" is omitted in both the preamble and the text of the regulation; the commenter suggested restoring it to both.

Response: We agree. These changes were made to the definition of "health plan" as promulgated in the Transactions Rule, and are reflected in this final rule.

Small Health Plan

Comment: One commenter recommended that we delete the reference to $5 million in the definition and instead define a "small health plan" as a health plan with fewer than 50 participants. It was stated that using a dollar limitation to define a "small health plan" is not meaningful for self-insured plans and some other types of health plan coverage arrangements. A commenter pointed out that the general definition of a health plan refers to "50 or more participants," and that using a dollar factor to define a "small health plan" would be inconsistent with this definition.

Response: We disagree. The Small Business Administration (SBA) promulgates size standards that indicate the maximum number of employees or annual receipts allowed for a concern (13 CFR 121.105) and its affiliates to be considered "small." The size standards themselves are expressed either in number of employees or annual receipts (13 CFR 121.201). The size standards for compliance with programs of other agencies are those for SBA programs which are most comparable to the programs of such other agencies, unless otherwise agreed by the agency and the SBA (13 CFR 121.902). With respect to the insurance industry, the SBA has specified that annual receipts of $5 million is the maximum allowed for a concern and its affiliates to be considered small (13 CFR 121.201). Consequently, we retain the proposal's definition in the final rule to be consistent with SBA requirements.

We understand there may be some confusion as to the meaning of "annual receipts" when applied to a health plan. For our purposes, therefore, we consider "pure premiums" to be equivalent to "annual receipts."

Workforce

Comment: Some commenters requested that we exclude "volunteers" from the definition of workforce. They stated that volunteers are important contributors within many covered entities, and in particular hospitals. They argued that it was unfair to ask that these people donate their time and at the same time subject them to the penalties placed upon the paid employees by these regulations, and that it would discourage people from volunteering in the health care setting.

Response: We disagree. We believe that differentiating those persons under the direct control of a covered entity who are paid from those who are not is irrelevant for the purposes of protecting the privacy of health information, and for a covered entity's management of its workforce. In either case, the person is working for the covered entity. With regard to implications for the individual, persons in a covered entity's workforce are not held personally liable for violating the standards or requirements of the final rule. Rather, the Secretary has the authority to impose civil monetary penalties and in some cases criminal penalties for such violations on only the covered entity.

Comment: One commenter asked that the rule clarify that employees administering a group health or other employee welfare benefit plan on their employers' behalf are considered part of the covered entity's workforce.

Response: As long as the employees have been identified by the group health plan in plan documents as performing functions related to the group health plan (consistent with the requirements of § 164.504(f)), those employees may have access to protected health information. However, they are not permitted to use or disclose protected health information for employment-related purposes or in connection with any other employee benefit plan or employee benefit of the plan sponsor.

Part 160—Subpart B—Preemption of State Law

We summarize and respond below to comments received in the Transactions rulemaking on the issue of preemption, as well as those received on this topic in the Privacy rulemaking. Because no process was proposed in the Transactions rulemaking for granting exceptions under section 1178(a)(2)(A), a process for making exception determinations was not adopted in the Transactions Rule. Instead, since a process for making exception determinations was proposed in the Privacy rulemaking, we decided that the comments received in the Transactions rulemaking should be considered and addressed in conjunction with the comments received on the process proposed in the Privacy rulemaking. See 65 FR 50318 for a fuller discussion. Accordingly, we discuss the preemption comments received in the Transactions rulemaking where relevant below.

Comment: The majority of comments on preemption addressed the subject in general terms. Numerous comments, particularly from plans and providers, argued that the proposed preemption provisions were burdensome, ineffective, or insufficient, and that complete federal preemption of the "patchwork" of state privacy laws is needed. They also argued that the proposed preemption provisions are likely to invite litigation. Various practical arguments in support of this position were made. Some of these comments recognized that the Secretary's authority under section 1178 of the Act is limited and acknowledged that the Secretary's proposals were within her statutory authority. One commenter suggested that the exception determination process would result in a very costly and laborious and sometimes inconsistent analysis of the occasions in which state law would ***82580** survive federal preemption, and thus suggested the final privacy regulations preempt state law with only limited exceptions, such as reporting child abuse. Many other comments, however, recommended changing the proposed preemption provisions to preempt state privacy laws on as blanket a basis as possible.

One comment argued that the assumption that more stringent privacy laws are better is not necessarily true, citing a 1999 GAO report finding evidence that the stringent state confidentiality laws of Minnesota halted the collection of comparative information on health care quality.

Several comments in this vein were also received in the Transactions rulemaking. The majority of these comments took the position that exceptions to the federal standards should either be prohibited or discouraged. It was argued that granting exceptions to the standards, particularly the transactions standards, would be inconsistent with the statute's objective of promoting administrative simplification through the use of uniform transactions.

Many other commenters, however, endorsed the "federal floor" approach of the proposed rules. (These comments were made in the context of the proposed privacy regulations.) These comments argued that this approach was preferable because it would not impair the effectiveness of state privacy laws that are more protective of privacy, while raising the protection afforded medical information in states that do not enact laws that are as protective as the rules below. Some comments argued, however, that the rules should give even more deference to state law, questioning in particular the definitions and the proposed addition to the "other purposes" criterion for exception determinations in this regard.

Response: With respect to the exception process provided for by section 1178(a)(2)(A), the contention that the HIPAA standards should uniformly control is an argument that should be addressed to the Congress, not this agency. Section 1178 of the Act expressly gives the Secretary authority to grant exceptions to the general rule that the HIPAA standards preempt contrary state law in the circumstances she determines come within the provisions at section 1178(a)(2)(A). We agree that the underlying statutory goal of standardizing financial and administrative health care transactions dictates that exceptions should be granted only on narrow grounds. Nonetheless, Congress clearly intended to accommodate some state laws in these areas, and the Department is not free to disregard this Congressional choice. As is more fully explained below, we have interpreted the

statutory criteria for exceptions under section 1178(a)(2)(A) to balance the need for relative uniformity with respect to the HIPAA standards with state needs to set certain policies in the statutorily defined areas.

The situation is different with respect to state laws relating to the privacy of protected health information. Many of the comments arguing for uniform standards were particularly concerned with discrepancies between the federal privacy standards and various state privacy requirements. Unlike the situation with respect to the transactions standards, where states have generally not entered the field, all states regulate the privacy of some medical information to a greater or lesser extent. Thus, we understand the private sector's concern at having to reconcile differing state and federal privacy requirements.

This is, however, likewise an area where the policy choice has been made by Congress. Under section 1178(a)(2)(B) of the Act and section 264(c)(2) of HIPAA, provisions of state privacy laws that are contrary to and more stringent than the corresponding federal standard, requirement, or implementation specification are not preempted. The effect of these provisions is to let the law that is most protective of privacy control (the “federal floor” approach referred to by many commenters), and this policy choice is one with which we agree. Thus, the statute makes it impossible for the Secretary to accommodate the requests to establish uniformly controlling federal privacy standards, even if doing so were viewed as desirable.

Comment: Numerous comments stated support for the proposal at proposed Subpart B to issue advisory opinions with respect to the preemption of state laws relating to the privacy of individually identifiable health information. A number of these comments appeared to assume that the Secretary's advisory opinions would be dispositive of the issue of whether or not a state law was preempted. Many of these commenters suggested what they saw as improvements to the proposed process, but supported the proposal to have the Department undertake this function.

Response: Despite the general support for the advisory opinion proposal, we decided not to provide specifically for the issuance of such opinions. The following considerations led to this decision. First, the assumption by commenters that an advisory opinion would establish what law applied in a given situation and thereby simplify the task of ascertaining what legal requirements apply to a covered entity or entities is incorrect. Any such opinion would be advisory only. Although an advisory opinion issued by the Department would indicate to covered entities how the Department would resolve the legal conflict in question and would apply the law in determining compliance, it would not bind the courts. While we assume that most courts would give such opinions deference, the outcome could not be guaranteed.

Second, the thousands of questions raised in the public comment about the interpretation, implications, and consequences of all of the proposed regulatory provisions have led us to conclude that significant advice and technical assistance about all of the regulatory requirements will have to be provided on an ongoing basis. We recognize that the preemption concerns that would have been addressed by the proposed advisory opinions were likely to be substantial. However, there is no reason to assume that they will be the most substantial or urgent of the questions that will most likely need to be addressed. It is our intent to provide as much technical advice and assistance to the regulated community as we can with the resources available. Our concern is that setting up an advisory opinion process for just one of the many types of issues that will have to be addressed will lead to a non-optimal allocation of those resources. Upon careful consideration, therefore, we have decided that we will be better able to prioritize our workload and be better able to be responsive to the most urgent and substantial questions raised to the Department, if we do not provide for a formal advisory opinion process on preemption as proposed.

Comment: A few commenters argued that the Privacy Rule should preempt state laws that would impose more stringent privacy requirements for the conduct of clinical trials. One commenter asserted that the existing federal regulations and guidelines for patient informed consent, together with the proposed rule, would adequately protect patient privacy.

Response: The Department does not have the statutory authority under HIPAA to preempt state laws that would impose more stringent privacy requirements on covered entities. HIPAA provides that the rule promulgated by the Secretary may not preempt state laws that are in conflict ***82581** with the regulatory requirements and that provide greater privacy protections.

Section 160.201—Applicability

Comment: Several commenters indicated that the guidance provided by the definitions at proposed § 160.202 would be of substantial benefit both to regulated entities and to the public. However, these commenters argued that the applicability of such definitions would be too limited as drafted, since proposed § 160.201 provided that the definitions applied only to "determinations and advisory opinions issued by the Secretary pursuant to 42 U.S.C. 1320d-7." The commenters stated that it would be far more helpful to make the definitions in proposed § 160.202 more broadly applicable, to provide general guidance on the issue of preemption.

Response: We agree with the comments on this issue, and have revised the applicability provision of subpart B below accordingly. Section 160.201 below sets out that Subpart B implements section 1178. This means, in our view, that the definitions of the statutory terms at § 160.202 are legislative rules that apply when those statutory terms are employed, whether by HHS, covered entities, or the courts.

Section 160.202—Definitions

Contrary

Comment: Some commenters asserted that term "contrary" as defined at § 160.202 was overly broad and that its application would be time-consuming and confusing for states. These commenters argued that, under the proposed definition, a state would be required to examine all of its laws relating to health information privacy in order to determine whether or not its law were contrary to the requirements proposed. It was also suggested that the definition contain examples of how it would work in practical terms.

A few commenters, however, argued that the definition of "contrary" as proposed was too narrow. One commenter argued that the Secretary erred in her assessment of the case law analyzing what is known as "conflict preemption" and which is set forth in shorthand in the tests set out at § 160.202.

Response: We believe that the definition proposed represents a policy that is as clear as is feasible and which can be applied nationally and uniformly. As was noted in the preamble to the proposed rules (at 64 FR 59997), the tests in the proposed definition of "contrary" are adopted from the jurisprudence of "conflict preemption." Since preemption is a judicially developed doctrine, it is reasonable to interpret this term as indicating that the statutory analysis should tie in to the analytical formulations employed by the courts. Also, while the court-developed tests may not be as clear as commenters would like, they represent a long-term, thoughtful consideration of the problem of defining when a state/federal conflict exists. They will also, we assume, generally be employed by the courts when conflict issues arise under the rules below. We thus see no practical alternative to the proposed definition and have retained it unchanged. With respect to various suggestions for shorthand versions of the proposed tests, such as the arguably broader term "inconsistent with," we see no operational advantages to such terms.

Comment: One comment asked that the Department clarify that if state law is not preempted, then the federal law would not also apply.

Response: This comment raises two issues, both of which deserve discussion. First, a state law may not be preempted because there is no conflict with the analogous federal requirement; in such a situation, both laws can, and must, be complied with. We thus do not accept this suggestion, to the extent that it suggests that the federal law would give way in this situation. Second, a state law may also not be preempted because it comes within section 1178(a)(2)(B), section 1178(b), or section 1178(c); in this situation, a contrary federal law would give way.

Comment: One comment urged the Department to take the position that where state law exists and no analogous federal requirement exists, the state requirement would not be "contrary to" the federal requirement and would therefore not trigger preemption.

Response: We agree with this comment.

Comment: One commenter criticized the definition as unhelpful in the multi-state transaction context. For example, it was asked whether the issue of whether a state law was "contrary to" should be determined by the law of the state where the treatment is provided, where the claim processor is located, where the payment is issued, or the data maintained, assuming all are in different states.

Response: This is a choice of law issue, and, as is discussed more fully below, is a determination that is routinely made today in connection with multi-state transactions. See discussion below under Exception Determinations (Criteria for Exception Determinations).

State Law

Comment: Comments noted that the definition of "state law" does not explicitly include common law and recommended that it be revised to do so or to clarify that the term includes evidentiary privileges recognized at state law. Guidance concerning the impact of state privileges was also requested.

Response: As requested, we clarify that the definition of "state law" includes common law by including the term "common law." In our view, this phrase encompasses evidentiary privileges recognized at state law (which may also, we note, be embodied in state statutes).

Comment: One comment criticized this definition as unwieldy, in that locating state laws pertaining to privacy is likely to be difficult. It was noted that Florida, for example, has more than 60 statutes that address health privacy.

Response: To the extent that state laws currently apply to covered entities, they have presumably determined what those laws require in order to comply with them. Thus, while determining which laws are "contrary" to the federal requirements will require additional work in terms of comparing state law with the federal requirements, entities should already have acquired the knowledge of state law needed for this task in the ordinary course of doing business.

Comment: The New York City Department of Health noted that in many cases, provisions of New York State law are inapplicable within New York City, because the state legislature has recognized that the local code is tailored to the particular needs of the City. It urged that the New York City Code be treated as state law, for preemption purposes.

Response: We agree that, to the extent a state treats local law as substituting for state law it could be considered to be "state law" for purposes of this definition. If, however, a local law is local in scope and effect, and a tier of state law exists over the same subject matter, we do not think that the local law could or should be treated as "state law" for preemption purposes. We do not have sufficient information to assess the situation raised by this comment with respect to this principle, and so express no opinion thereon.

More Stringent

Comment: Many commenters supported the policy in the proposed definition of "individual" at proposed § 164.502, which would have permitted unemancipated minors to exercise, on ***82582** their own behalf, rights granted to individuals in cases where they consented to the underlying health care. Commenters stated, however, that the proposed preemption provision would leave in place state laws authorizing or prohibiting disclosure to parents of the protected health information of their minor children and would negate the proposed policy for the treatment of minors under the rule. The comments stated that such state laws should be treated like other state laws, and preempted to the extent that they are less protective of the privacy of minors.

Other commenters supported the proposed preemption provision—not to preempt a state law to the extent it authorizes or prohibits disclosure of protected health information regarding a minor to a parent.

Response: Laws regarding access to health care for minors and confidentiality of their medical records vary widely; this regulation recognizes and respects the current diversity of state law in this area. Where states have considered the balance involved in protecting the confidentiality of minors' health information and have explicitly acted, for example, to authorize disclosure, defer the decision to disclose to the discretion of the health care provider, or prohibit disclosure of minor's protected health information to a parent, the rule defers to these decisions to the extent that they regulate such disclosures.

Comment: The proposed definition of "more stringent" was criticized as affording too much latitude to for granting exceptions for state laws that are not protective of privacy. It was suggested that the test should be "most protective of the individual's privacy."

Response: We considered adopting this test. However, for the reasons set out at 64 FR 59997, we concluded that this test would not provide sufficient guidance. The comments did not address the concerns we raised in this regard in the preamble to the proposed rules, and we continue to believe that they are valid.

Comment: A drug company expressed concern with what it saw as the expansive definition of this term, arguing that state governments may have less experience with the special needs of researchers than federal agencies and may unknowingly adopt laws that have a deleterious effect on research. A provider group expressed concern that allowing stronger state laws to prevail could result in diminished ability to get enough patients to complete high quality clinical trials.

Response: These concerns are fundamentally addressed to the "federal floor" approach of the statute, not to the definition proposed: even if the definition of "more stringent" were narrowed, these concerns would still exist. As discussed above, since the "federal floor" approach is statutory, it is not within the Secretary's authority to change the dynamics that are of concern.

Comment: One comment stated that the proposed rule seemed to indicate that the "more stringent" and "contrary to" definitions implied that these standards would apply to ERISA plans as well as to non-ERISA plans.

Response: The concern underlying this comment is that ERISA plans, which are not now subject to certain state laws because of the "field" preemption provision of ERISA but which are subject to the rules below, will become subject to state privacy laws that are "more stringent" than the federal requirements, due to the operation of section 1178(a)(2)(B), together with section 264(c)(2). We disagree that this is the case. While the courts will have the final say on these questions, it is our view that these sections simply leave in place more stringent state laws that would otherwise apply; to the extent that such state laws do not apply to ERISA plans because they are preempted by ERISA, we do not think that section 264(c)(2) overcomes the preemption effected by section 514(a) of ERISA. For more discussion of this point, see 64 FR 60001.

Comment: The Lieutenant Governor's Office of the State of Hawaii requested a blanket exemption for Hawaii from the federal rules, on the ground that its recently enacted comprehensive health privacy law is, as a whole, more stringent than the proposed federal standards. It was suggested that, for example, special weight should be given to the severity of Hawaii's penalties. It was suggested that a new definition ("comprehensive") be added, and that "more stringent" be defined in that context as whether the state act or code as a whole provides greater protection.

An advocacy group in Vermont argued that the Vermont legislature was poised to enact stronger and more comprehensive privacy laws and stated that the group would resent a federal prohibition on that.

Response: The premise of these comments appears to be that the provision-by-provision approach of Subpart B, which is expressed in the definition of the term "contrary", is wrong. As we explained in the preamble to the proposed rules (at 64 FR 59995), however, the statute dictates a provision-by-provision comparison of state and federal requirements, not the overall

comparison suggested by these comments. We also note that the approach suggested would be practically and analytically problematic, in that it would be extremely difficult, if not impossible, to determine what is a legitimate stopping point for the provisions to be weighed on either the state side or the federal side of the scale in determining which set of laws was the "more stringent." We accordingly do not accept the approach suggested by these comments.

With respect to the comment of the Vermont group, nothing in the rules below prohibits or places any limits on states enacting stronger or more comprehensive privacy laws. To the extent that states enact privacy laws that are stronger or more comprehensive than contrary federal requirements, they will presumably not be preempted under section 1178(a)(2)(B). To the extent that such state laws are not contrary to the federal requirements, they will act as an overlay on the federal requirements and will have effect.

Comment: One comment raised the issue of whether a private right of action is a greater penalty, since the proposed federal rule has no comparable remedy.

Response: We have reconsidered the proposed "penalty" provision of the proposed definition of "more stringent" and have eliminated it. The HIPAA statute provides for only two types of penalties: fines and imprisonment. Both types of penalties could be imposed in addition to the same type of penalty imposed by a state law, and should not interfere with the imposition of other types of penalties that may be available under state law. Thus, we think it is unlikely that there would be a conflict between state and federal law in this respect, so that the proposed criterion is unnecessary and confusing. In addition, the fact that a state law allows an individual to file a lawsuit to protect privacy does not conflict with the HIPAA penalty provisions.

Relates to the Privacy of Individually Identifiable Health Information

Comment: One comment criticized the definition of this term as too narrow in scope and too uncertain. The commenter argued that determining the specific purpose of a state law may be difficult and speculative, because many state laws have incomplete, inaccessible, or non-existent legislative histories. It was suggested that the definition be revised by deleting the word "specific" before the word "purpose." Another commenter argued ***82583** that the definition of this term should be narrowed to minimize reverse preemption by more stringent state laws. One commenter generally supported the proposed definition of this term.

Response: We are not accepting the first comment. The purpose of a given state enactment should be ascertainable, if not from legislative history or a purpose statement, then from the statute viewed as a whole. The same should be true of state regulations or rulings. In any event, it seems appropriate to restrict the field of state laws that may potentially trump the federal standards to those that are clearly intended to establish state public policy and operate in the same area as the federal standards. To the extent that the definition in the rules below does this, we have accommodated the second comment. We note, however, that we do not agree that the definition should be further restricted to minimize "reverse preemption," as suggested by this comment, as we believe that state laws that are more protective of privacy than contrary federal standards should remain, in order to ensure that the privacy of individuals' health information receives the maximum legal protection available.

Sections 160.203 and 160.204—Exception Determinations and Advisory Opinions

Most of the comments received on proposed Subpart B lumped together the proposed process for exception determinations under section 1178(a)(2)(A) with the proposed process for issuing advisory opinions under section 1178(a)(2)(B), either because the substance of the comment applied to both processes or because the commenters did not draw a distinction between the two processes. We address these general comments in this section.

Comment: Numerous commenters, particularly providers and provider groups, recommended that exception determinations and advisory opinions not be limited to states and advocated allowing all covered entities (including individuals, providers and insurers), or private sector organizations, to request determinations and opinions with respect to preemption of state laws. Several commenters argued that limiting requests to states would deny third party stakeholders, such as life and disability income insurers, any means of resolving complex questions as to what rule they are subject to. One commenter noted that because it

is an insurer who will be liable if it incorrectly analyzes the interplay between laws and reaches an incorrect conclusion, there would be little incentive for the states to request clarification. It would also cause large administrative burdens which, it was stated, would be costly and confusing. It was also suggested that the request for the exception be made to the applicable state's attorney general or chief legal officer, as well as the Secretary. Various changes to the language were suggested, such as adding that "a covered entity, or any other entity impacted by this rule" be allowed to submit the written request.

Response: We agree, and have changed § 164.204(a) below accordingly.

The decision to eliminate advisory opinions makes this issue moot with respect to those opinions.

Comment: Several commenters noted that it was unclear under the proposed rule which state officials would be authorized to request a determination.

Response: We agree that the proposed rule was unclear in this respect. The final rule clarifies who may make the request for a state, with respect to exception determinations. See, § 160.204(a). The language adopted should ensure that the Secretary receives an authoritative statement from the state. At the same time, this language provides states with flexibility, in that the governor or other chief elected official may choose to designate other state officials to make such requests.

Comment: Many commenters recommended that a process be established whereby HHS performs an initial state-by-state critical analysis to provide guidance on which state laws will not be preempted; most suggested that such an analysis (alternatively referred to as a database or clearinghouse) should be completed before providers would be required to come into compliance. Many of these comments argued that the Secretary should bear the cost for the analyses of state law, disagreeing with the premise stated in the preamble to the proposed rules that it is more efficient for the private market to complete the state-by-state review. Several comments also requested that HHS continue to maintain and monitor the exception determination process, and update the database over time in order to provide guidance and certainty on the interaction of the federal rules with newly enacted or amended state laws that are produced after the final rule. Some comments recommended that each state be required to certify agreement with the HHS analyses.

In contrast, one hospital association noted concerns that the Secretary would conduct a nationwide analysis of state laws. The comment stated that implementation would be difficult since much of the law is a product of common law, and such state-specific research should only be attempted by experienced health care attorneys in each jurisdiction.

Response: These comments seem to be principally concerned with potential conflicts between state privacy laws and the privacy standards, because, as is more fully explained below, preemption of contrary state laws not relating to privacy is automatic unless the Secretary affirmatively acts under section 1178(a)(2)(A) to grant an exception. We recognize that the provisions of sections 1178(b) (state public health laws), and 1178(c) (state regulation of health plans) similarly preserve state laws in those areas, but very little of the public comment appeared to be concerned with these latter statutory provisions. Accordingly, we respond below to what we see as the commenters' main concern.

The Department will not do the kind of global analysis requested by many of these comments. What these comments are in effect seeking is a global advisory opinion as to when the federal privacy standards will control and when they will not. We understand the desire for certainty underlying these comments. Nonetheless, the reasons set out above as the basis for our decision not to establish a formal advisory opinion process apply equally to these requests. We also do not agree that the task of evaluating the requirements below in light of existing state law is unduly burdensome or unreasonable. Rather, it is common for new federal requirements to necessitate an examination by the regulated entities of the interaction between existing state law and the federal requirements incident to coming into compliance.

We agree, however, that the case is different where the Secretary has affirmatively acted, either through granting an exception under section 1178(a)(2)(A) or by making a specific determination about the effect of a particular state privacy law in, for

example, the course of determining an entity's compliance with the privacy standards. As is discussed below, the Department intends to make notice of exception determinations that it makes routinely available.

We do not agree with the comments suggesting that compliance by covered entities be delayed pending completion of an analysis by the Secretary and that states be required to certify agreement with the Secretary's analysis, as we are not institutionalizing the advisory opinion/analysis process upon which these comments are predicated. ***82584** Furthermore, with respect to the suggestion regarding delaying the compliance date, Congress provided in section 1175(b) of the Act for a delay in when compliance is required to accommodate the needs of covered entities to address implementation issues such as those raised by these comments. With respect to the suggestion regarding requiring states to certify their agreement with the Secretary's analysis, we have no authority to do this.

Comment: Several commenters criticized the proposed provision for annual publication of determinations and advisory opinions in the Federal Register as inadequate. They suggested that more frequent notices should be made and the regulation be changed accordingly, to provide for publication either quarterly or within a few days of a determination. A few commenters suggested that any determinations made, or opinions issued, by the Secretary be published on the Department's website within 10 days or a few days of the determination or opinion.

Response: We agree that the proposed provision for annual publication was inadequate and have accordingly deleted it. Subpart B contains no express requirement for publication, as the Department is free to publish its determinations absent such a requirement. It is our intention to publish notice of exception determinations on a periodic basis in the Federal Register. We will also consider other avenues of making such decisions publicly available as we move into the implementation process.

Comment: A few commenters argued that the process for obtaining an exception determination or an advisory opinion from the Secretary will result in a period of time in which there is confusion as to whether state or federal law applies. The proposed regulations say that the federal provisions will remain effective until the Secretary makes a determination concerning the preemption issue. This means that, for example, a state law that was enacted and enforced for many years will be preempted by federal law for the period of time during which it takes the Secretary to make a determination. Then if the Secretary determines that the state law is not preempted, the state law will again become effective. Such situations will result in confusion and unintended violations of the law. One of the commenters suggested that requests for exceptions be required only when a challenge is brought against a particular state law, and that a presumption of validity should lie with state laws. Another commenter, however, urged that "instead of the presumption of preemption, the state laws in question would be presumed to be subject to the exception unless or until the Secretary makes a determination to the contrary."

Response: It is true that the effect of section 1178(a)(2)(A) is that the federal standards will preempt contrary state law and that such preemption will not be removed unless and until the Secretary acts to grant an exception under that section (assuming, of course, that another provision of section 1178 does not apply). We do not agree, however, that confusion should result, where the issue is whether a given state law has been preempted under section 1178(a)(2)(A). Because preemption is automatic with respect to state laws that do not come within the other provisions of section 1178 (i.e., sections 1178(a)(2)(B), 1178(b), and 1178(c)), such state laws are preempted until the Secretary affirmatively acts to preserve them from preemption by granting an exception under section 1178(a)(2)(A).

We cannot accept the suggestion that a presumption of validity attach to state laws, and that states not be required to request exceptions except in very narrow circumstances. The statutory scheme is the opposite: The statute effects preemption in the section 1178(a)(2)(A) context unless the Secretary affirmatively acts to except the contrary state law in question.

With respect to preemption under sections 1178(b) and 1178(c) (the carve-outs for state public health laws and state regulation of health plans), we do not agree that preemption is likely to be a major cause of uncertainty. We have deferred to Congressional intent by crafting the permissible releases for public health, abuse, and oversight broadly. See, §§ 164.512(b)—(d) below. Since

there must first be a conflict between a state law and a federal requirement in order for an issue of preemption to even arise, we think that, as a practical matter, few preemption questions should arise with respect to sections 1178(b) and 1178(c).

With respect to preemption of state privacy laws under section 1178(a)(2)(B), however, we agree that the situation may be more difficult to ascertain, because the Secretary does not determine the preemption status of a state law under that section, unlike the situation with respect to section 1178(a)(2)(A). We have tried to define the term "more stringent" to identify and particularize the factors to be considered by courts to those relevant to privacy interests. The more specific (than the statute) definition of this term at § 160.202 below should provide some guidance in making the determination as to which law prevails. Ambiguity in the state of the law might also be a factor to be taken into account in determining whether a penalty should be applied.

Comment: Several comments recommended that exception determinations or advisory opinions encompass a state act or code in its entirety (in lieu of a provision-specific evaluation) if it is considered more stringent as a whole than the regulation. It was argued that since the provisions of a given law are typically interconnected and related, adopting or overriding them on a provision-by-provision basis would result in distortions and/or unintended consequences or loopholes. For example, when a state law includes authorization provisions, some of which are consistent with the federal requirements and some which are not, the cleanest approach is to view the state law as inconsistent with the federal requirements and thus preempted in its entirety. Similarly, another comment suggested that state confidentiality laws written to address the specific needs of individuals served within a discreet system of care be considered as a whole in assessing whether they are as stringent or more stringent than the federal requirements. Another comment requested explicit clarification that state laws with a broader scope than the regulation will be viewed as more stringent and be allowed to stand.

Response: We have not adopted the approach suggested by these comments. As discussed above with respect to the definition of the term "more stringent," it is our view that the statute precludes the approach suggested. We also suggest that this approach ignores the fact that each separate provision of law usually represents a nuanced policy choice to, for example, permit this use or prohibit that disclosure; the aggregated approach proposed would fail to recognize and weigh such policy choices.

Comment: One comment recommended that the final rule: permit requests for exception determinations and advisory opinions as of the date of publication of the final rule, require the Secretary to notify the requestor within a specified short period of time of all additional information needed, and prohibit enforcement action until the Secretary issues a response.

Response: With respect to the first recommendation, we clarify that requests for exception determinations may be made at any time; since the process for issuing advisory opinions has not been adopted, this recommendation is moot as it pertains ***82585** to advisory opinions. With respect to the second recommendation, we will undertake to process exception requests as expeditiously as possible, but, for the reasons discussed below in connection with the comments relating to setting deadlines for those determinations, we cannot commit at this time to a "specified short period of time" within which the Secretary may request additional information. We see no reason to agree to the third recommendation. Because contrary state laws for which an exception is available only under section 1178(a)(2)(A) will be preempted by operation of law unless and until the Secretary acts to grant an exception, there will be an ascertainable compliance standard for compliance purposes, and enforcement action would be appropriate where such compliance did not occur.

Sections 160.203(a) and 160.204(a)—Exception Determinations

Section 160.203(a)—Criteria for Exception Determinations

Comment: Numerous comments criticized the proposed criteria for their substance or lack thereof. A number of commenters argued that the effectiveness language that was added to the third statutory criterion made the exception so massive that it would swallow the rule. These comments generally expressed concern that laws that were less protective of privacy would be granted exceptions under this language. Other commenters criticized the criteria generally as creating a large loophole that would let state laws that do not protect privacy trump the federal privacy standards.

Response: We agree with these comments. The scope of the statutory criteria is ambiguous, but they could be read so broadly as to largely swallow the federal protections. We do not think that this was Congress's intent. Accordingly, we have added language to most of the statutory criteria clarifying their scope. With respect to the criteria at 1178(a)(2)(A)(i), this clarifying language generally ties the criteria more specifically to the concern with protecting and making more efficient the health care delivery and payment system that underlies the Administrative Simplification provisions of HIPAA, but, with respect to the catch-all provision at section 1178(a)(2)(A)(i)(IV), also requires that privacy interests be balanced with such concerns, to the extent relevant. We require that exceptions for rules to ensure appropriate state regulation of insurance and health plans be stated in a statute or regulation, so that such exceptions will be clearly tied to statements of priorities made by publicly accountable bodies (e.g., through the public comment process for regulations, and by elected officials through statutes). With respect to the criterion at section 1178(a)(2)(A)(ii), we have further delineated what "addresses controlled substances" means. The language provided, which builds on concepts at 21 U.S.C. 821 and the Medicare regulations at 42 CFR 1001.2, delineates the area within which the government traditionally regulates controlled substances, both civilly and criminally; it is our view that HIPAA was not intended to displace such regulation.

Comment: Several commenters urged that the request for determination by the Secretary under proposed § 160.204(a) be limited to cases where an exception is absolutely necessary, and that in making such a determination, the Secretary should be required to make a determination that the benefits of granting an exception outweigh the potential harm and risk of disclosure in violation of the regulation.

Response: We have not further defined the statutory term "necessary", as requested. We believe that the determination of what is "necessary" will be fact-specific and context dependent, and should not be further circumscribed absent such specifics. The state will need to make its case that the state law in question is sufficiently "necessary" to accomplish the particular statutory ground for exception that it should trump the contrary federal standard, requirement, or implementation specification.

Comment: One commenter noted that a state should be required to explain whether it has taken any action to correct any less stringent state law for which an exception has been requested. This commenter recommended that a section be added to proposed § 160.204(a) stating that "a state must specify what, if any, action has been taken to amend the state law to comply with the federal regulations." Another comment, received in the Transactions rulemaking, took the position that exception determinations should be granted only if the state standards in question exceeded the national standards.

Response: The first and last comments appear to confuse the "more stringent" criterion that applies under section 1178(a)(2)(B) of the Act with the criteria that apply to exceptions under section 1178(a)(2)(A). We are also not adopting the language suggested by the first comment, because we do not agree that states should necessarily have to try to amend their state laws as a precondition to requesting exceptions under section 1178(a)(2)(A). Rather, the question should be whether the state has made a convincing case that the state law in question is sufficiently necessary for one of the statutory purposes that it should trump the contrary federal policy.

Comment: One commenter stated that exceptions for state laws that are contrary to the federal standards should not be preempted where the state and federal standards are found to be equal.

Response: This suggestion has not been adopted, as it is not consistent with the statute. With respect to the administrative simplification standards in general, it is clear that the intent of Congress was to preempt contrary state laws except in the limited areas specified as exceptions or carve-outs. See, section 1178. This statutory approach is consistent with the underlying goal of simplifying health care transactions through the adoption of uniform national standards. Even with respect to state laws relating to the privacy of medical information, the statute shields such state laws from preemption by the federal standards only if they are "more" stringent than the related federal standard or implementation specification.

Comment: One commenter noted that determinations would apply only to transactions that are wholly intrastate. Thus, any element of a health care transaction that would implicate more than one state's law would automatically preclude the Secretary's

evaluation as to whether the laws were more or less stringent than the federal requirement. Other commenters expressed confusion about this proposed requirement, noting that providers and plans operate now in a multi-state environment.

Response: We agree with the commenters and have dropped the proposed requirement. As noted by the commenters, health care entities now typically operate in a multi-state environment, so already make the choice of law judgements that are necessary in multi-state transactions. It is the result of that calculus that will have to be weighed against the federal standards, requirements, and implementation specifications in the preemption analysis.

Comment: One comment received in the Transactions rulemaking suggested that the Department should allow exceptions to the standard transactions to accommodate abbreviated transactions between state agencies, such as claims between a public health department and the state Medicaid ***82586** agency. Another comment requested an exception for Home and Community Based Waiver Services from the transactions standards.

Response: The concerns raised by these comments would seem to be more properly addressed through the process established for maintaining and modifying the transactions standards. If the concerns underlying these comments cannot be addressed in this manner, however, there is nothing in the rules below to preclude states from requesting exceptions in such cases. They will then have to make the case that one or more grounds for exception applies.

Section 160.204(a)—Process for Exception Determinations—Comments and Responses

Comment: Several comments received in the Transactions rulemaking stated that the process for applying for and granting exception determinations (referred to as "waivers" by some) needed to be spelled out in the final rule.

Response: We agree with these comments. As noted above, since no process was proposed in the Transactions rulemaking, a process for making exception determinations was not adopted in those final rules. Subpart B below adopts a process for making exception determinations, which responds to these comments.

Comment: Comments stated that the exception process would be burdensome, unwieldy, and time-consuming for state agencies as well as the Department. One comment took the position that states should not be required to submit exception requests to the Department under proposed § 160.203(a), but could provide documentation that the state law meets one of the conditions articulated in proposed § 160.203.

Response: We disagree that the process adopted at § 164.204 below will be burdensome, unwieldy, or time-consuming. The only thing the regulation describes is the showings that a requestor must make as part of its submission, and all are relevant to the issue to be determined by the Secretary. How much information is submitted is, generally speaking, in the requestor's control, and the regulation places no restrictions on how the requestor obtains it, whether by acting directly, by working with providers and/or plans, or by working with others. With respect to the suggestion that states not be required to submit exception requests, we disagree that this suggestion is either statutorily authorized or advisable. We read this comment as implicitly suggesting that the Secretary must proactively identify instances of conflict and evaluate them. This suggestion is, thus, at bottom the same as the many suggestions that we create a database or compendium of controlling law, and it is rejected for the same reasons.

Comment: Several comments urged that all state requests for non-preemption include a process for public participation. These comments believe that members of the public and other interested stakeholders should be allowed to submit comments on a state's request for exception, and that these comments should be reviewed and considered by the Secretary in determining whether the exception should be granted. One comment suggested that the Secretary at least give notice to the citizens of the state prior to granting an exception.

Response: The revision to § 160.204(a), to permit requests for exception determinations by any person, responds to these comments.

Comment: Many commenters noted that the lack of a clear and reasonable time line for the Secretary to issue an exception determination would not provide sufficient assurance that the questions regarding what rules apply will be resolved in a time frame that will allow business to be conducted properly, and argued that this would increase confusion and uncertainty about which statutes and regulations should be followed. Timeframes of 60 or 90 days were suggested. One group suggested that, if a state does not receive a response from HHS within 60 days, the waiver should be deemed approved.

Response: The workload prioritization and management considerations discussed above with respect to advisory opinions are also relevant here and make us reluctant to agree to a deadline for making exception determinations. This is particularly true at the outset, since we have no experience with such requests. We therefore have no basis for determining how long processing such requests will take, how many requests we will need to process, or what resources will be available for such processing. We agree that states and other requesters should receive timely responses and will make every effort to make determinations as expeditiously as possible, but we cannot commit to firm deadlines in this initial rule. Once we have experience in handling exception requests, we will consult with states and others in regard to their experiences and concerns and their suggestions for improving the Secretary's expeditious handling of such requests.

We are not accepting the suggestion that requests for exception be deemed approved if not acted upon in some defined time period. Section 1178(a)(2)(A) requires a specific determination by the Secretary. The suggested policy would not be consistent with this statutory requirement. It is also inadvisable from a policy standpoint, in that it would tend to maximize exceptions. This would be contrary to the underlying statutory policy in favor of uniform federal standards.

Comment: One commenter took exception to the requirement for states to seek a determination from the Department that a provision of state law is necessary to prevent fraud and abuse or to ensure appropriate state regulation of insurance plans, contending that this mandate could interfere with the Insurance Commissioners' ability to do their jobs. Another commenter suggested that the regulation specifically recognize the broad scope of state insurance department activities, such as market conduct examinations, enforcement investigations, and consumer complaint handling.

Response: The first comment raises an issue that lies outside our legal authority to address, as section 1178(a)(2)(A) clearly mandates that the Secretary make a determination in these areas. With respect to the second comment, to the extent these concerns pertain to health plans, we believe that the provisions at § 164.512 relating to oversight and disclosures required by law should address the concerns underlying this comment.

Section 160.204(a)(4)—Period of Effectiveness of Exception Determinations

Comment: Numerous commenters stated that the proposed three year limitation on the effectiveness of exception determinations would pose significant problems and should be limited to one year, since a one year limitation would provide more frequent review of the necessity for exceptions. The commenters expressed concern that state laws which provide less privacy protection than the federal regulation would be given exceptions by the Secretary and thus argued that the exceptions should be more limited in duration or that the Secretary should require that each request, regardless of duration, include a description of the length of time such an exception would be needed.

One state government commenter, however, argued that the 3 year limit should be eliminated entirely, on the ground that requiring a redetermination ***82587** every three years would be burdensome for the states and be a waste of time and resources for all parties. Other commenters, including two state agencies, suggested that the exemption should remain effective until either the state law or the federal regulation is changed. Another commenter suggested that the three year sunset be deleted and that the final rule provide for automatic review to determine if changes in circumstance or law would necessitate amendment or deletion of the opinion. Other recommendations included deeming the state law as continuing in effect upon the submission of a state application for an exemption rather than waiting for a determination by the Secretary that may not occur for a substantial period of time.

Response: We are persuaded that the proposed 3 year limit on exception determinations does not make sense where neither law providing the basis for the exception has changed in the interim. We also agree that where either law has changed, a previously granted exception should not continue. Section 160.205(a) below addresses these concerns.

Sections 160.203(b) and 160.204(b)—Advisory Opinions

Section 160.203(b)—Effect of Advisory Opinions

Comment: Several commenters questioned whether or not DHHS has standing to issue binding advisory opinions and recommended that the Department clarify this issue before implementation of this regulation. One respondent suggested that the Department clarify in the final rule the legal issues on which it will opine in advisory opinion requests, and state that in responding to requests for advisory opinions the Department will not opine on the preemptive force of ERISA with respect to state laws governing the privacy of individually identifiable health information, since interpretations as to the scope and extent of ERISA's preemption provisions are outside of the Department's jurisdictional authority.

One commenter asked whether a state could enforce a state law which the Secretary had indicated through an advisory opinion is preempted by federal law. This commenter also asked whether the state would be subject to penalties if it chose to continue to enforce its own laws.

Response: As discussed above, in part for reasons raised by these comments, the Department has decided not to have a formal process for issuing advisory opinions, as proposed.

Several of these concerns, however, raise issues of broader concern that need to be addressed. First, we disagree that the Secretary lacks legal authority to opine on whether or not state privacy laws are preempted. The Secretary is charged by law with determining compliance, and where state law and the federal requirements conflict, a determination of which law controls will have to be made in order to determine whether the federal standard, requirement, or implementation specification at issue has been violated. Thus, the Secretary cannot carry out her enforcement functions without making such determinations. It is further reasonable that, if the Secretary makes such determinations, she can make those determinations known, for whatever persuasive effect they may have.

The questions as to whether a state could enforce, or would be subject to penalties if it chose to continue to enforce, its own laws following a denial by the Secretary of an exception request under § 160.203 or a holding by a court of competent jurisdiction that a state privacy law had been preempted by a contrary federal privacy standard raise several issues. First, a state law is preempted under the Act only to the extent that it applies to covered entities; thus, a state is free to continue to enforce a “preempted” state law against non-covered entities to which the state law applies. If there is a question of coverage, states may wish to establish processes to ascertain which entities within their borders are covered entities within the meaning of these rules. Second, with respect to covered entities, if a state were to try to enforce a preempted state law against such entities, it would presumably be acting without legal authority in so doing. We cannot speak to what remedies might be available to covered entities to protect themselves against such wrongful state action, but we assume that covered entities could seek judicial relief, if all else failed. With respect to the issue of imposing penalties on states, we do not see this as likely. The only situation that we can envision in which penalties might be imposed on a state would be if a state agency were itself a covered entity and followed a preempted state law, thereby violating the contrary federal standard, requirement, or implementation specification.

Section 160.204(b)—Process for Advisory Opinions

Comment: Several commenters stated that it was unclear whether a state would be required to submit a request for an advisory opinion in order for the law to be considered more stringent and thus not preempted. The Department should clarify whether a state law could be non-preempted even without such an advisory opinion. Another commenter requested that the final rule explicitly state that the stricter rule always applies, whether it be state or federal, and regardless of whether there is any conflict between state and federal law.

Response: The elimination of the proposed process for advisory opinions renders moot the first question. Also, the preceding response clarifies that which law preempts in the privacy context (assuming that the state law and federal requirement are "contrary") is a matter of which one is the "more stringent." This is not a matter which the Secretary will ultimately determine; rather, this is a question about which the courts will ultimately make the final determination. With respect to the second comment, we believe that § 160.203(b) below responds to this issue, but we would note that the statute already provides for this.

Comment: Several commenters supported the decision to limit the parties who may request advisory opinions to the state. These commenters did not believe that insurers should be allowed to request an advisory opinion and open every state law up to challenge and review.

Several commenters requested that guidance on advisory opinions be provided in all circumstances, not only at the Secretary's discretion. It was suggested that proposed § 160.204(b)(2)(iv) be revised to read as follows: "A state may submit a written request to the Secretary for an advisory opinion under this paragraph. The request must include the following information: the reasons why the state law should or should not be preempted by the federal standard, requirement, or implementation specification, including how the state law meets the criteria at § 160.203(b)."

Response: The decision not to have a formal process for issuing advisory opinions renders these issues moot.

Sections 160.203(c) and 160.203(d)—Statutory Carve-Outs

Comment: Several commenters asked that the Department provide more specific examples itemizing activities traditionally regulated by the state that could constitute "carve-out" exceptions. These commenters also requested that the Department include language in the regulation stating that if a state law falls within several different exceptions, the state chooses which determination exception shall apply. ***82588**

Response: We are concerned that itemizing examples in this way could leave out important state laws or create inadvertent negative implications that laws not listed are not included. However, as explained above, we have designed the types of activities that are permissive disclosures for public health under § 164.512(b) below in part to come within the carve-out effected by section 1178(b); while the state regulatory activities covered by section 1178(c) will generally come within § 164.512(d) below. With respect to the comments asking that a state get to "choose" which exception it comes under, we have in effect provided for this with respect to exceptions under section 1178(a)(2)(A), by giving the state the right to request an exception under that section. With respect to exceptions under section 1178(a)(2)(B), those exceptions occur by operation of law, and it is not within the Secretary's power to "let" the state choose whether an exception occurs under that section.

Comment: Several commenters took the position that the Secretary should not limit the procedural requirements in proposed § 160.204(a) to only those applications under proposed § 160.203(a). They urged that the requirements of proposed § 160.204(a) should also apply to preemption under sections 1178(a)(2)(B), 1178(b) and 1178(c). It was suggested that the rules should provide for exception determinations with respect to the matters covered by these provisions of the statute; such additional provisions would provide clear procedures for states to follow and ensure that requests for exceptions are adequately documented.

A slightly different approach was taken by several commenters, who recommended that proposed § 160.204(b) be amended to clarify that the Secretary will also issue advisory opinions as to whether a state law constitutes an exception under proposed §§ 160.203(c) and 160.203(d). This change would, they argued, give states the same opportunity for guidance that they have under § 160.203(a) and (b), and as such, avoid costly lawsuits to preserve state laws.

Response: We are not taking either of the recommended courses of action. With respect to the recommendation that we expand the exception determination process to encompass exceptions under sections 1178(a)(2)(B), 1178(b), and 1178(c), we do not have the authority to grant exceptions under these sections. Under section 1178, the Secretary has authority to make exception

determinations only with respect to the matters covered by section 1178(a)(2)(A); contrary state laws coming within section 1178(a)(2)(B) are preempted if not more stringent, while if a contrary state law comes within section 1178(b) or section 1178(c), it is not preempted. These latter statutory provisions operate by their own terms. Thus, it is not within the Secretary's authority to establish the determination process which these comments seek.

With respect to the request seeking advisory opinions in the section 1178(b) and 1178(c) situations, we agree that we have the authority to issue such opinions. However, the considerations described above that have led us not to adopt a formal process for issuing advisory opinions in the privacy context apply with equal force and effect here.

Comment: One commenter argued that it would be unnecessarily burdensome for state health data agencies (whose focus is on the cost of healthcare or improving Medicare, Medicaid, or the healthcare system) to obtain a specific determination from the Department for an exception under proposed § 160.203(c). States should be required only to notify the Secretary of their own determination that such collection is necessary. It was also argued that cases where the statutory carve-outs apply should not require a Secretarial determination.

Response: We clarify that no Secretarial determination is required for activities that fall into one of the statutory carve-outs. With respect to data collections for state health data agencies, we note that provision has been made for many of these activities in several provisions of the rules below, such as the provisions relating to disclosures required by law (§ 164.512(a)), disclosures for oversight (§ 164.512(d)), and disclosures for public health (§ 164.512(b)). Some disclosures for Medicare and Medicaid purposes may also come within the definition of health care operations. A fuller discussion of this issue appears in connection with § 164.512 below.

Constitutional Comments and Responses

Comment: Several commenters suggested that as a general matter the rule is unconstitutional.

Response: We disagree that the rule is unconstitutional. The particular grounds for this conclusion are set out with respect to particular constitutional issues in the responses below. With respect to the comments that simply made this general assertion, the lack of detail of the comments makes a substantive response impossible.

Article II

Comment: One commenter contended that the Secretary improperly delegated authority to private entities by requiring covered entities to enter into contracts with, monitor, and take action for violations of the contract against their business partners. These comments assert that the selection of these entities to “enforce” the regulations violates the Executive Powers Clause and the Appointments and Take Care Clauses.

Response: We reject the assertion that the business associate provisions constitute an improper delegation of executive power to private entities. HIPAA provides HHS with authority to enforce the regulation against covered entities. The rules below regulate only the conduct of the covered entity; to the extent a covered entity chooses to conduct its funding through a business associate, those functions are still functions of the covered entity. Thus, no improper delegation has occurred because what is being regulated are the actions of the covered entity, not the actions of the business associate in its independent capacity.

We also reject the suggestion that the business associates provisions constitute an improper appointment of covered entities to enforce the regulation and violate the Take Care Clause. Because the Secretary has not delegated authority to covered entities, the inference that she has appointed covered entities to exercise such authority misses the mark.

Commerce Clause

Comment: A few commenters suggested that the privacy regulation regulates activities that are not in interstate commerce and which are, therefore, beyond the powers the U.S. Constitution gives the federal government.

Response: We disagree. Health care providers, health plans, and health care clearinghouses are engaged in economic and commercial activities, including the exchange of individually identifiable health information electronically across state lines. These activities constitute interstate commerce. Therefore, they come within the scope of Congress' power to regulate interstate commerce.

Nondelegation Doctrine

Comment: Some commenters objected to the manner by which Congress provided the Secretary authority to promulgate this regulation. These comments asserted that Congress violated the nondelegation doctrine by (1) not providing an "intelligible principle" to guide the agency, (2) not ***82589** establishing "ascertainable standards," and (3) improperly permitting the Secretary to make social policy decisions.

Response: We disagree. HIPAA clearly delineates Congress' general policy to establish strict privacy protections for individually identifiable health information to encourage electronic transactions. Congress also established boundaries limiting the Secretary's authority. Congress established these limitations in several ways, including by calling for privacy standards for "individually identifiable health information"; specifying that privacy standards must address individuals' rights regarding their individually identifiable health information, the procedures for exercising those rights, and the particular uses and disclosures to be authorized or required; restricting the direct application of the privacy standards to "covered entities," which Congress defined; requiring consultation with the National Committee on Vital and Health Statistics and the Attorney General; specifying the circumstances under which the federal requirements would supersede state laws; and specifying the civil and criminal penalties the Secretary could impose for violations of the regulation. These limitations also serve as "ascertainable standards" upon which reviewing courts can rely to determine the validity of the exercise of authority.

Although Congress could have chosen to impose expressly an exhaustive list of specifications that must be met in order to achieve the protective purposes of the HIPAA, it was entirely permissible for Congress to entrust to the Secretary the task of providing these specifications based on her experience and expertise in dealing with these complex and technical matters.

We disagree with the comments that Congress improperly delegated Congressional policy choices to her. Congress clearly decided to create federal standards protecting the privacy of "individually identifiable health information" and not to preempt state laws that are more stringent. Congress also determined over whom the Secretary would have authority, the type of information protected, and the minimum level of regulation.

Separation of Powers

Comment: Some commenters asserted that the federal government may not preempt state laws that are not as strict as the privacy regulation because to do so would violate the separation of powers in the U.S. Constitution. One comment suggested that the rules raised a substantial constitutional issue because, as proposed, they permitted the Secretary to make determinations on preemption, which is a role reserved for the judiciary.

Response: We disagree. We note that this comment only pertains to determinations under section 1178(a)(2)(A); as discussed above, the rules below provide for no Secretarial determinations with respect to state privacy laws coming within section 1178(a)(2)(B). With respect to determinations under section 1178(a)(2)(A), however, the final rules, like the proposed rules, provide that at a state's request the Secretary may make certain determinations regarding the preemptive effect of the rules on a particular state law. As usually the case with any administrative decisions, these are subject to judicial review pursuant to the Administrative Procedure Act.

First Amendment

Comment: Some comments suggested that the rules violated the First Amendment. They asserted that if the rule included Christian Science practitioners as covered entities it would violate the separation of church and state doctrine.

Response: We disagree. The First Amendment does not always prohibit the federal government from regulating secular activities of religious organizations. However, we address concerns relating to Christian Science practitioners more fully in the response to comments discussion of the definition of "covered entity" in § 160.103.

Fourth Amendment

Comment: Many comments expressed Fourth Amendment concerns about various proposed provisions. These comments fall into two categories—general concerns about warrantless searches and specific concerns about administrative searches. Several comments argued that the proposed regulations permit law enforcement and government officials access to protected health information without first requiring a judicial search warrant or an individual's consent. These comments rejected the applicability of any of the existing exceptions permitting warrantless searches in this context. Another comment argued that federal and state police should be able to obtain personal medical records only with the informed consent of an individual. Many of these comments also expressed concern that protected health information could be provided to government or private agencies for inclusion in a governmental health data system.

Response: We disagree that the provisions of these rules that permit disclosures for law enforcement purposes and governmental health data systems generally violate the Fourth Amendment. The privacy regulation does not create new access rights for law enforcement. Rather, it refrains from placing a significant barrier in front of access rights that law enforcement currently has under existing legal authority. While the regulation may permit a covered entity to make disclosures in specified instances, it does not require the covered entity make the disclosure. Thus, because we are not modifying existing law regarding disclosures to law enforcement officials, except to strengthen the requirements related to requests already authorized under law, and are not requiring any such disclosures, the privacy regulation does not infringe upon individual's Fourth Amendment rights. We discuss the rationale underlying the permissible disclosures to law enforcement officials more fully in the preamble discussion relating to § 164.512(f).

We note that the proposed provision relating to disclosures to government health data systems has been eliminated in the final rule. However, to the extent that the comments can be seen as raising concern over disclosure of protected health information to government agencies for public health, health oversight, or other purposes permitted by the final rule, the reasoning in the previous paragraph applies.

Comment: One commenter suggested that the rules violate the Fourth Amendment by requiring covered entities to provide access to the Secretary to their books, records, accounts, and facilities to ensure compliance with these rules. The commenter also suggested that the requirement that covered entities enter into agreements with their business partners to make their records available to the Secretary for inspection as well also violates the warrant requirement of the Fourth Amendment.

Response: We disagree. These requirements are consistent with U.S. Supreme Court cases holding that warrantless administrative searches of commercial property are not per se violations of the Fourth Amendment. The provisions requiring that covered entities provide access to certain material to determine compliance with the regulation come within the well-settled exception regarding closely regulated businesses and industries to the warrant requirement. From state and local licensure laws to the federal fraud and abuse statutes and regulations, the health care industry is one of the most ***82590** tightly regulated businesses in the country. Because the industry has such an extensive history of government oversight and involvement, those operating within it have no reasonable expectation of privacy from the government such that a warrant would be required to determine compliance with the rules.

In addition, the cases cited by the commenters concern unannounced searches of the premises and facilities of particular entities. Because our enforcement provisions only provide for the review of books, records, and other information and only during normal business hours with notice, except for exceptional situations, this case law does not apply.

As for business associates, they voluntarily enter into their agreements with covered entities. This agreement, therefore, functions as knowing and voluntary consents to the search (even assuming it could be understood to be a search) and obviates the need for a warrant.

Fifth Amendment

Comment: Several comments asserted that the proposed rules violated the Fifth Amendment because in the commenters' views they authorized the taking of privacy property without just compensation or due process of law.

Response: We disagree. The rules set forth below do not address the issue of who owns an individual's medical record. Instead, they address what uses and disclosures of protected health information may be made by covered entities with or without a consent or authorization. As described in response to a similar comment, medical records have been the property of the health care provider or medical facility that created them, historically. In some states, statutes directly provide these entities with ownership. These laws are limited by laws that provide patients or their representatives with access to the records or that provide the patient with an ownership interest in the information within the records. As we discuss, the final rule is consistent with current state law that provides patients access to protected health information, but not ownership of medical records. State laws that provide patients with greater access would remain in effect. Therefore, because patients do not own their records, no taking can occur. As for their interest in the information, the final rule retains their rights. As for covered entities, the final rule does not take away their ownership rights or make their ownership interest in the protected health information worthless. Therefore, no taking has occurred in these situations either.

Ninth and Tenth Amendments

Comment: Several comments asserted that the proposed rules violated the Ninth and Tenth Amendments. One commenter suggested that the Ninth Amendment prohibits long and complicated regulations. Other commenters suggested that the proposed rules authorized the compelled disclosure of individually identifiable health information in violation of State constitutional provisions, such as those in California and Florida. Similarly, a couple of commenters asserted that the privacy rules violate the Tenth Amendment.

Response: We disagree. The Ninth and Tenth Amendments address the rights retained by the people and acknowledge that the States or the people are reserved the powers not delegated to the federal government and not otherwise prohibited by the Constitution. Because HHS is regulating under a delegation of authority from Congress in an area that affects interstate commerce, we are within the powers provided to Congress in the Constitution. Nothing in the Ninth Amendment, or any other provision of the Constitution, restricts the length or complexity of any law. Additionally, we do not believe the rules below impermissibly authorize behavior that violates State constitutions. This rule requires disclosure only to the individual or to the Secretary to enforce this rule. As noted in the preamble discussion of “Preemption,” these rules do not preempt State laws, including constitutional provisions, that are contrary to and more stringent, as defined at § 160.502, than these rules. See the discussion of “Preemption” for further clarification. Therefore, if these State constitutions are contrary to the rule below and provide greater protection, they remain in full force; if they do not, they are preempted, in accordance with the Supremacy Clause of the Constitution.

Right to Privacy

Comment: Several comments suggested that the proposed regulation would violate the right to privacy guaranteed by the First, Fourth, Fifth, and Ninth Amendments because it would permit covered entities to disclose protected health information without the consent of the individual.

Response: These comments did not provide specific facts or legal basis for the claims. We are, thus, unable to provide a substantive response to these particular comments. However, we note that the rule requires disclosures only to the individual or to the Secretary to determine compliance with this rule. Other uses or disclosures under this rule are permissive, not required. Therefore, if a particular use or disclosure under this rule is viewed as interfering with a right that prohibited the use or disclosure, the rule itself is not what requires the use or disclosure.

Void for Vagueness

Comment: One comment suggested that the Secretary's use of a "reasonableness" standard is unconstitutionally vague. Specifically, this comment objected to the requirement that covered entities use "reasonable" efforts to use or disclose the minimum amount of protected health information, to ensure that business partners comply with the privacy provisions of their contracts, to notify business partners of any amendments or corrections to protected health information, and to verify the identity of individuals requesting information, as well as charge only a "reasonable" fee for inspecting and copying health information. This comment asserted that the Secretary provided "inadequate guidance" as to what qualifies as "reasonable."

Response: We disagree with the comment's suggestion that by applying a "reasonableness" standard, the regulation has failed to provide for "fair warning" or "fair enforcement." The "reasonableness" standard is well-established in law; for example, it is the foundation of the common law of torts. Courts also have consistently held as constitutional statutes that rely upon a "reasonableness" standard. Our reliance upon a "reasonableness" standard, thus, provides covered entities with constitutionally sufficient guidance.

Criminal Intent

Comment: One comment argued that the regulation's reliance upon a "reasonableness" standard criminalizes "unreasonable efforts" without requiring criminal intent or mens rea.

Response: We reject this suggestion because HIPAA clearly provides the criminal intent requirement. Specifically, HIPPA provides that a "person who knowingly and in violation of this part—(1) uses or causes to be used a unique health identifier; (2) obtains individually identifiable health information relating to an individual; or (3) discloses individually identifiable health information to another person, shall be punished as provided in subsection (b)." HIPAA section 1177 (emphasis added). Subsection (b) also relies on a knowledge standard in ***82591** outlining the three levels of criminal sanctions. Thus, Congress, not the Secretary, established the mens rea by including the term "knowingly" in the criminal penalty provisions of HIPAA.

Data Collection

Comment: One commenter suggested that the U.S. Constitution authorized the collection of data on individuals only for the purpose of the census.

Response: While it might be true that the U.S. Constitution expressly discusses the national census, it does not forbid federal agencies from collecting data for other purposes. The ability of agencies to collect non-census data has been upheld by the courts.

Relationship to Other Federal Laws

Comment: We received several comments that sought clarification of the interaction of various federal laws and the privacy regulation. Many of these comments simply listed federal laws and regulations with which the commenter currently must comply. For example, commenters noted that they must comply with regulations relating to safety, public health, and civil rights, including Medicare and Medicaid, the Americans with Disabilities Act, the Family and Medical Leave Act, the Federal Aviation Administration regulations, the Department of Transportation regulations, the Federal Highway Administration regulations, the Occupational Safety and Health Administration regulations, and the Environmental Protection Agency regulations, and alcohol

and drug free workplace rules. These commenters suggested that the regulation state clearly and unequivocally that uses or disclosures of protected health information for these purposes were permissible. Some suggested modifying the definition of health care operations to include these uses specifically. Another suggestion was to add a section that permitted the transmission of protected health information to employers when reasonably necessary to comply with federal, state, or municipal laws and regulations, or when necessary for public or employee safety and health.

Response: Although we sympathize with entities' needs to evaluate the existing laws with which they must comply in light of the requirements of the final regulation, we are unable to respond substantially to comments that do not pose specific questions. We offer, however, the following guidance: if an covered entity is required to disclose protected health information pursuant to a specific statutory or regulatory scheme, the covered entity generally will be permitted under § 164.512(a) to make these disclosures without a consent or authorization; if, however, a statute or regulation merely suggests a disclosure, the covered entity will need to determine if the disclosure comes within another category of permissible disclosure under §§ 164.510 or 164.512 or, alternatively, if the disclosure would otherwise come within § 164.502. If not, the entity will need to obtain a consent or authorization for the disclosure.

Comment: One commenter sought clarification as to when a disclosure is considered to be "required" by another law versus "permitted" by that law.

Responses: We use these terms according to their common usage. By "required by law," we mean that a covered entity has a legal obligation to disclose the information. For example, if a statute states that a covered entity must report the names of all individuals presenting with gun shot wounds to the emergency room or else be fined $500 for each violation, a covered entity would be required by law to disclose the protected health information necessary to comply with this mandate. The privacy regulation permits this type of disclosure, but does not require it. Therefore, if a covered entity chose not to comply with the reporting statute it would violate only the reporting statute and not the privacy regulation.

On the other hand, if a statute stated that a covered entity may or is permitted to report the names of all individuals presenting with gun shot wounds to the emergency room and, in turn, would receive $500 for each month it made these reports, a covered entity would not be permitted by § 164.512(a) to disclose the protected health information. Of course, if another permissible provision applied to these facts, the covered entity could make the disclosure under that provision, but it would not be considered to be a disclosure. See discussion under § 164.512(a) below.

Comment: Several commenters suggested that the proposed rule was unnecessarily duplicative of existing regulations for federal programs, such as Medicare, Medicaid, and the Federal Employee Health Benefit Program.

Response: Congress specifically subjected certain federal programs, including Medicare, Medicaid, and the Federal Employee Health Benefit Program to the privacy regulation by including them within the definition of "health plan." Therefore, covered entities subject to requirements of existing federal programs will also have to comply with the privacy regulation.

Comment: One comment asserts that the regulation would not affect current federal requirements if the current requirements are weaker than the requirements of the privacy regulation. This same commenter suggested that current federal requirements will trump both state law and the proposed regulation, even if Medicaid transactions remain wholly intrastate.

Response: We disagree. As noted in our discussion of "Relationship to Other Federal Laws," each law or regulation will need to be evaluated individually. We similarly disagree with the second assertion made by the commenter. The final rule will preempt state laws only in specific instances. For a more detailed analysis, see the preamble discussion of "Preemption."

Administrative Subpoenas

Comment: One comment stated that the final rule should not impose new standards on administrative subpoenas that would conflict with existing laws or administrative or judicial rules that establish standards for issuing subpoenas. Nor should the final

rule conflict with established standards for the conduct of administrative, civil, or criminal proceedings, including the rules regarding the discovery of evidence. Other comments sought further restrictions on access to protected health information in this context.

Response: Section 164.512(e) below addresses disclosures for judicial and administrative proceedings. The final rules generally do not interfere with these existing processes to the extent an individual served with a subpoena, court order, or other similar process is able to raise objections already available. See the discussion below under § 164.512(e) for a fuller response.

Americans with Disabilities Act

Comment: Several comments discussed the intersection between the proposed Privacy Rule and the Americans with Disabilities Act ("ADA") and sections 503 and 504 of the Rehabilitation Act of 1973. One comment suggested that the final rule explicitly allows disclosures authorized by the Americans with Disabilities Act without an individual's authorization, because this law, in the commenter's view, provides more than adequate protection for the confidentiality of medical records in the employment context. The comment noted that under these laws employers may receive information related to fitness for duty, pre-employment physicals, routine examinations, return to work examinations, examinations following other types of absences, examinations triggered by specific events, changes in ***82592** circumstances, requests for reasonable accommodations, leave requests, employee wellness programs, and medical monitoring.

Other commenters suggested that the ADA requires the disclosure of protected health information to employers so that the employee may take advantage of the protections of these laws. They suggested that the final rules clarify that employment may be conditioned on obtaining an authorization for disclosure of protected health information for lawful purposes and provide guidance concerning the interaction of the ADA with the final regulation's requirements. Several commenters wanted clarification that the privacy regulation would not permit employers to request or use protected health information in violation of the ADA.

Response: We disagree with the comment that the final rule should allow disclosures of protected health information authorized by the ADA without the individual's authorization. We learned from the comments that access to and use of protected health information by employers is of particular concern to many people. With regard to employers, we do not have statutory authority to regulate them. Therefore, it is beyond the scope of this regulation to prohibit employers from requesting or obtaining protected health information. Covered entities may disclose protected health information about individuals who are members of an employer's workforce with an authorization. Nothing in the privacy regulation prohibits employers from obtaining that authorization as a condition of employment. We note, however, that employers must comply with other laws that govern them, such as nondiscrimination laws. For example, if an employer receives a request for a reasonable accommodation, the employer may require reasonable documentation about the employee's disability and the functional limitations that require the reasonable accommodation, if the disability and the limitations are not obvious. If the individual provides insufficient documentation and does not provide the missing information in a timely manner after the employer's subsequent request, the employer may require the individual to go to an appropriate health professional of the employer's choice. In this situation, the employee does not authorize the disclosure of information to substantiate the disability and the need for reasonable accommodation, the employer need not provide the accommodation.

We agree that this rule does not permit employers to request or use protected health information in violation of the ADA or other antidiscrimination laws.

Appropriations Laws

Comment: One comment suggested that the penalty provisions of HIPAA, if extended to the privacy regulation, would require the Secretary to violate "Appropriations Laws" because the Secretary could be in the position of assessing penalties against her own and other federal agencies in their roles as covered entities. Enforcing penalties on these entities would require the transfer of agency funds to the General Fund.

Response: We disagree. Although we anticipate achieving voluntary compliance and resolving any disputes prior to the actual assessment of penalties, the Department of Justice's Office of Legal Counsel has determined in similar situations that federal agencies have authority to assess penalties against other federal agencies and that doing so is not in violation of the Anti-Deficiency Act, 31 U.S.C. 1341.

Balanced Budget Act of 1997

Comment: One comment expressed concern that the regulation would place tremendous burdens on providers already struggling with the effects of the Balanced Budget Act of 1997.

Response: We appreciate the costs covered entities face when complying with other statutory and regulatory requirements, such as the Balanced Budget Act of 1997. However, HHS cannot address the impact of the Balanced Budget Act or other statutes in the context of this regulation.

Comment: Another comment stated that the regulation is in direct conflict with the Balanced Budget Act of 1997 (“BBA”). The comment asserts that the regulation's compliance date conflicts with the BBA, as well as Generally Acceptable Accounting Principles. According to the comment, covered entities that made capital acquisitions to ensure compliance with the year 2000 (“Y2K”) problem would not be able to account for the full depreciation of these systems until 2005. Because HIPAA requires compliance before that time, the regulation would force premature obsolescence of this equipment because while it is Y2K compliant, it may be HIPAA non-compliant.

Response: This comment raises two distinct issues—(1) the investment in new equipment and (2) the compliance date. With regard to the first issue, we reject the comment's assertion that the regulation requires covered entities to purchase new information systems or information technology equipment, but realize that some covered entities may need to update their equipment. We have tried to minimize the costs, while responding appropriately to Congress' mandate for privacy rules. We have dealt with the cost issues in detail in the “Regulatory Impact Analysis” section of this Preamble. With regard to the second issue, Congress, not the Secretary, established the compliance data at section 1175(b) of the Act.

Civil Rights of Institutionalized Persons Act

Comment: A few comments expressed concern that the privacy regulation would inadvertently hinder the Department of Justice Civil Rights Divisions' investigations under the Civil Rights of Institutionalized Persons Act (“CRIPA”). These comments suggested clearly including civil rights enforcement activities as health care oversight.

Response: We agree with this comment. We do not intend for the privacy rules to hinder CRIPA investigations. Thus, the final rule includes agencies that are authorized by law to “enforce civil rights laws for which health information is relevant” in the definition of “health oversight agency” at § 164.501. Covered entities are permitted to disclose protected health information to health oversight agencies under § 164.512(d) without an authorization. Therefore, we do not believe the final rule should hinder the Department of Justice's ability to conduct investigations pursuant to its authority in CRIPA.

Clinical Laboratory Improvement Amendments

Comment: One comment expressed concern that the proposed definition of health care operations did not include activities related to the quality control clinical studies performed by laboratories to demonstrate the quality of patient test results. Because the Clinical Laboratory Improvement Amendments of 1988 (“CLIA”) requires these studies that the comment asserted require the use of protected health information, the comment suggested including this specific activity in the definition of “health care operations.”

Response: We do not intend for the privacy regulation to impede the ability of laboratories to comply with the requirements of CLIA. Quality control activities come within the definition of "health care operations" in § 164.501 because they come within the meaning of the term "quality assurance activities." To the extent they would not come within health care operations, but ***82593** are required by CLIA, the privacy regulation permits clinical laboratories that are regulated by CLIA to comply with mandatory uses and disclosures of protected health information pursuant to § 164.512(a).

Comment: One comment stated that the proposed regulation's right of access for inspection and copying provisions were contrary to CLIA in that CLIA permits laboratories to disclose lab test results only to "authorized persons." This comment suggested that the final rule include language adopting this restriction to ensure that patients not obtain laboratory test results before the appropriate health care provider has reviewed and explained those results to the patients.

A similar comment stated that the lack of preemption of state laws could create problems for clinical laboratories under CLIA. Specifically, this comment noted that CLIA permits clinical laboratories to perform tests only upon the written or electronic request of, and to provide the results to, an "authorized person." State laws define who is an "authorized person." The comment expressed concern as to whether the regulation would preempt state laws that only permit physicians to receive test results.

Response: We agree that CLIA controls in these cases. Therefore, we have amended the right of access, § 164.524(a), so that a covered entity that is subject to CLIA does not have to provide access to the individual to the extent such access would be prohibited by law. Because of this change, we believe the preemption concern is moot.

Controlled Substance Act

Comment: One comment expressed concern that the privacy regulation as proposed would restrict the Drug Enforcement Agency's ("the DEA") enforcement of the Controlled Substances Act ("CSA"). The comment suggested including enforcement activities in the definition of "health oversight agency."

Response: In our view, the privacy regulation should not impede the DEA's ability to enforce the CSA. First, to the extent the CSA requires disclosures to the DEA, these disclosures would be permissible under § 164.512(a). Second, some of the DEA's CSA activities come within the exception for health oversight agencies which permits disclosures to health oversight agencies for:

Activities authorized by law, including audits; civil, administrative, or criminal investigations; inspections * * * civil, administrative, or criminal proceedings or actions; and other activity necessary for appropriate oversight of the health care system.

Therefore, to the extent the DEA is enforcing the CSA, disclosures to it in its capacity as a health oversight agency are permissible under § 164.512(d). Alternatively, CSA required disclosures to the DEA for law enforcement purposes are permitted under § 164.512(f). When acting as a law enforcement agency under the CSA, the DEA may obtain the information pursuant to § 164.512(f). Thus, we do not agree that the privacy regulation will impede the DEA's enforcement of the CSA. See the preamble discussion of § 164.512 for further explanation.

Comment: One commenter suggested clarifying the provisions allowing disclosures that are "required by law" to ensure that the mandatory reporting requirements the CSA imposes on covered entities, including making available reports, inventories, and records of transactions, are not preempted by the regulation.

Response: We agree that the privacy regulation does not alter covered entities' obligations under the CSA. Because the CSA requires covered entities manufacturing, distributing, and/or dispensing controlled substances to maintain and provide to the DEA specific records and reports, the privacy regulation permits these disclosures under § 164.512(a). In addition, when the DEA seeks documents to determine an entity's compliance with the CSA, such disclosures are permitted under § 164.512(d).

Comment: The same commenter expressed concern that the proposed privacy regulation inappropriately limits voluntary reporting and would prevent or deter employees of covered entities from providing the DEA with information about violations of the CSA.

Response: We agree with the general concerns expressed in this comment. We do not believe the privacy rules will limit voluntary reporting of violations of the CSA. The CSA requires certain entities to maintain several types of records that may include protected health information. Although reports that included protected health information may be restricted under these rules, reporting the fact that an entity is not maintaining proper reports is not. If it were necessary to obtain protected health information during the investigatory stages following such a voluntary report, the DEA would be able to obtain the information in other ways, such as by following the administrative procedures outlined in § 164.512(e).

We also agree that employees of covered entities who report violations of the CSA should not be subjected to retaliation by their employers. Under § 164.502(j), we specifically state that a covered entity is not considered to have violated the regulation if a workforce member or business associate in good faith reports violations of laws or professional standards by covered entities to appropriate authorities. See discussion of § 164.502(j) below.

Department of Transportation

Comment: Several commenters stated that the Secretary should recognize in the preamble that it is permissible for employers to condition employment on an individual's delivering a consent to certain medical tests and/or examinations, such as drug-free workplace programs and Department of Transportation ("DOT")-required physical examinations. These comments also suggested that employers should be able to receive certain information, such as pass/fail test and examination results, fitness-to-work assessments, and other legally required or permissible physical assessments without obtaining an authorization. To achieve this goal, these comments suggested defining "health information" to exclude information such as information about how much weight a specific employee can lift.

Response: We reject the suggestion to define "health information," which Congress defined in HIPAA, so that it excludes individually identifiable health information that may be relevant to employers for these types of examinations and programs. We do not regulate employers. Nothing in the rules prohibit employers from conditioning employment on an individual signing the appropriate consent or authorization. By the same token, however, the rules below do not relieve employers from their obligations under the ADA and other laws that restrict the disclosure of individually identifiable health information.

Comment: One commenter asserted that the proposed regulation conflicts with the DOT guidelines regarding positive alcohol and drug tests that require the employer be notified in writing of the results. This document contains protected health information. In addition, the treatment center records must be provided to the Substance Abuse Professional ("SAP") and the employer must receive a report from SAP with random drug testing recommendations.

Response: It is our understanding that DOT requires drug testing of all applicants for employment in safety-sensitive positions or individuals being transferred to such positions. ***82594** Employers, pursuant to DOT regulations, may condition an employee's employment or position upon first obtaining an authorization for the disclosure of results of these tests to the employer. Therefore, we do not believe the final rules conflict with the DOT requirements, which do not prohibit obtaining authorizations before such information is disclosed to employers.

Developmental Disabilities Act

Comment: One commenter urged HHS to ensure that the regulation would not impede access to individually identifiable health information to entities that are part of the Protection and Advocacy System to investigate abuse and neglect as authorized by the Developmental Disabilities Bill of Rights Act.

Response: The Developmental Disabilities Assistance and Bill of Rights Act of 2000 ("DD Act") mandates specific disclosures of individually identifiable health information to Protection and Advocacy systems designated by the chief elected official of the states and Territories. Therefore, covered entities may make these disclosures under § 164.512(a) without first obtaining an individual's authorization, except in those circumstances in which the DD Act requires the individual's authorization. Therefore, the rules below will not impede the functioning of the existing Protection and Advocacy System.

Employee Retirement Income Security Act of 1974

Comment: Several commenters objected to the fact that the NPRM did not clarify the scope of preemption of state laws under the Employee Retirement Income Security Act of 1974 (ERISA). These commenters asserted that the final rule must state that ERISA preempts all state laws (including those relating to the privacy of individually identifiable health information) so that multistate employers could continue to administer their group health plans using a single set of rules. In contrast, other commenters criticized the Department for its analysis of the current principles governing ERISA preemption of state law, pointing out that the Department has no authority to interpret ERISA.

Response: This Department has no authority to issue regulations under ERISA as requested by some of these commenters, so the rule below does not contain the statement requested. See the discussion of this point under "Preemption" above.

Comment: One commenter requested that the final rule clarify that section 264(c)(2) of HIPAA does not save state laws that would otherwise be preempted by the Federal Employees Health Benefits Program. The commenter noted that in the NPRM this statement was made with respect to Medicare and ERISA, but not the law governing the FEHBP.

Response: We agree with this comment. The preemption analysis set out above with respect to ERISA applies equally to the Federal Employees Health Benefit Program.

Comment: One commenter noted that the final rule should clarify the interplay between state law, the preemption standards in Subtitle A of Title I of HIPAA (Health Care Access, Portability and Renewability), and the preemption standards in the privacy requirements in Subtitle F of Title II of HIPAA (Administrative Simplification).

Response: The NPRM described only the preemption standards that apply with respect to the statutory provisions of HIPAA that were implemented by the proposed rule. We agree that the preemption standards in Subtitle A of Title I of HIPAA are different. Congress expressly provided that the preemption provisions of Title I apply only to Part 7, which addresses portability, access, and renewability requirements for Group Health Plans. To the extent state laws contain provisions regarding portability, access, or renewability, as well as privacy requirements, a covered entity will need to evaluate the privacy provisions under the Title II preemption provisions, as explained in the preemption provisions of the rules, and the other provisions under the Title I preemption requirements.

European Union Privacy Directive and U.S. Safe Harbors

Comment: Several comments stated that the privacy regulation should be consistent with the European Union's Directive on Data Protection. Others sought guidance as to how to comply with both the E.U. Directive on Data Protection and the U.S. Safe Harbor Privacy Principles.

Response: We appreciate the need for covered entities obtaining personal data from the European Union to understand how the privacy regulation intersects with the Data Protection Directive. We have provided guidance as to this interaction in the "Other Federal Laws" provisions of the preamble.

Comment: A few comments expressed concern that the proposed definition of "individual" excluded foreign military and diplomatic personnel and their dependents, as well as overseas foreign national beneficiaries. They noted that the distinctions

are based on nationality and are inconsistent with the stance of the E.U. Directive on Data Protection and the Department of Commerce's assurances to the European Commission.

Response: We agree with the general principle that privacy protections should protect every person, regardless of nationality. As noted in the discussion of the definition of "individual," the final regulation's definition does not exclude foreign military and diplomatic personnel, their dependents, or overseas foreign national beneficiaries from the definition of individual. As described in the discussion of § 164.512 below, the final rule applies to foreign diplomatic personnel and their dependents like all other individuals. Foreign military personnel receive the same treatment under the final rule as U.S. military personnel do, as discussed with regard to § 164.512 below. Overseas foreign national beneficiaries to the extent they receive care for the Department of Defense or a source acting on behalf of the Department of Defense remain generally excluded from the final rules protections. For a more detailed explanation, see § 164.500.

Fair Credit Reporting Act

Comment: A few commenters requested that we exclude information maintained, used, or disclosed pursuant to the Fair Credit Reporting Act ("FCRA") from the requirements of the privacy regulation. These commenters noted that the protection in the privacy regulation duplicate those in the FCRA.

Response: Although we realize that some overlap between FCRA and the privacy rules may exist, we have chosen not to remove information that may come within the purview of FCRA from the scope of our rules because FCRA's focus is not the same as our Congressional mandate to protect individually identifiable health information.

To the extent a covered entity seeks to engage in collection activities or other payment-related activities, it may do so pursuant to the requirements of this rule related to payment. See discussion of §§ 164.501 and 164.502 below.

We understand that some covered entities may be part of, or contain components that are, entities which meet the definition of "consumer reporting agencies." As such, these entities are subject to the FCRA. As described in the preamble to § 164.504, covered entities must designate what parts of their organizations will be treated as covered entities for the ***82595** purpose of these privacy rules. The covered entity component will need to comply with these rules, while the components that are consumer reporting agencies will need to comply with FCRA.

Comment: One comment suggested that the privacy regulation would conflict with the FCRA if the regulation's requirement applied to information disclosed to consumer reporting agencies.

Response: To the extent a covered entity is required to disclose protected health information to a consumer reporting agency, it may do so under § 164.512(a). See also discussion under the definition of "payment" below.

Fair Debt Collection and Practices Act

Comment: Several comments expressed concern that health plans and health care providers be able to continue using debt collectors in compliance with the Fair Debt Collections Practices Act and related laws.

Response: In our view, health plans and health care providers will be able to continue using debt collectors. Using the services of a debt collector to obtain payment for the provision of health care comes within the definition of "payment" and is permitted under the regulation. Thus, so long as the use of debt collectors is consistent with the regulatory requirements (such as, providers obtain the proper consents, the disclosure is of the minimum amount of information necessary to collect the debt, the provider or health plan enter into a business associate agreement with the debt collector, etc.), relying upon debt collectors to obtain reimbursement for the provision of health care would not be prohibited by the regulation.

Family Medical Leave Act

Comment: One comment suggested that the proposed regulation adversely affects the ability of an employer to determine an employee's entitlement to leave under the Family Medical Leave Act ("FMLA") by affecting the employer's right to receive medical certification of the need for leave, additional certifications, and fitness for duty certification at the end of the leave. The commenter sought clarification as to whether a provider could disclose information to an employer without first obtaining an individual's consent or authorization. Another commenter suggested that the final rule explicitly exclude from the rule disclosures authorized by the FMLA, because, in the commenter's view, it provides more than adequate protection for the confidentiality of medical records in the employment context.

Response: We disagree that the FMLA provides adequate privacy protections for individually identifiable health information. As we understand the FMLA, the need for employers to obtain protected health information under the statute is analogous to the employer's need for protected health information under the ADA. In both situations, employers may need protected health information to fulfill their obligations under these statutes, but neither statute requires covered entities to provide the information directly to the employer. Thus, covered entities in these circumstances will need an individual's authorizations before the disclosure is made to the employer.

Federal Common Law

Comment: One commenter did not want the privacy rules to interfere with the federal common law governing collective bargaining agreements permitting employers to insist on the cooperation of employees with medical fitness evaluations.

Response: We do not seek to interfere with legal medical fitness evaluations. These rules require a covered entity to have an individual's authorization before the information resulting from such evaluations is disclosed to the employer unless another provision of the rule applies. We do not prohibit employers from conditioning employment, accommodations, or other benefits, when legally permitted to do so, upon the individual/employee providing an authorization that would permit the disclosure of protected health information to employers by covered entities. See § 164.508(b)(4) below.

Federal Educational Rights and Privacy Act

Comment: A few commenters supported the exclusion of "education records" from the definition of "protected health information." However, one commenter requested that "treatment records" of students who are 18 years or older attending post-secondary education institutions be excluded from the definition of "protected health information" as well to avoid confusion.

Response: We agree with these commenters. See "Relationship to Other Federal Laws" for a description of our exclusion of FERPA "education records" and records defined at 20 U.S.C. 1232g(a)(4)(B)(iv), commonly referred to as "treatment records," from the definition of "protected health information."

Comment: One comment suggested that the regulation should not apply to any health information that is part of an "education record" in any educational agency or institution, regardless of its FERPA status.

Response: We disagree. As noted in our discussion of "Relationship of Other Federal Laws," we exclude education records from the definition of protected health information because Congress expressly provided privacy protections for these records and explained how these records should be treated in FERPA.

Comment: One commenter suggested eliminating the preamble language that describes school nurses and on-site clinics as acting as providers and subject to the privacy regulation, noting that this language is confusing and inconsistent with the statements provided in the preamble explicitly stating that HIPAA does not preempt FERPA.

Response: We agree that this language may have been confusing. We have provided a clearer expression of when schools may be required to comply with the privacy regulation in the "Relationship to Other Federal Laws" section of the preamble.

Comment: One commenter suggested adding a discussion of FERPA to the "Relationship to Other Federal Laws" section of the preamble.

Response: We agree and have added FERPA to the list of federal laws discussed in "Relationship to Other Federal Laws" section of the preamble.

Comment: One commenter stated that school clinics should not have to comply with the "ancillary" administrative requirements, such as designating a privacy official, maintaining documentation of their policies and procedures, and providing the Secretary of HHS with access.

Response: We disagree. Because we have excluded education records and records described at 20 U.S.C. 1232g(a)(4)(B)(iv) held by educational agencies and institutions subject to FERPA from the definition of protected health information, only non-FERPA schools would be subject to the administrative requirements. Most of these school clinics will also not be covered entities because they are not engaged in HIPAA transactions and these administrative requirements will not apply to them. However, to the extent a school clinic is within the definition of a health care provider, as Congress defined the term, and the school clinic is engaged in HIPAA transactions, it will be a covered entity and must comply with the rules below. ***82596**

Comment: Several commenters expressed concern that the privacy regulation would eliminate the parents' ability to have access to information in their children's school health records. Because the proposed regulation suggests that school-based clinics keep health records separate from other educational files, these comments argued that the regulation is contrary to the spirit of FERPA, which provides parents with access rights to their children's educational files.

Response: As noted in the "Relationship to Other Federal Laws" provision of the preamble, to the extent information in school-based clinics is not protected health information because it is an education record, the FERPA access requirements apply and this regulation does not. For more detail regarding the rule's application to unemancipated minors, see the preamble discussion about "Personal Representatives."

Federal Employees Compensation Act

Comment: One comment noted that the Federal Employees Compensation Act ("FECA") requires claimants to sign a release form when they file a claim. This commenter suggested that the privacy regulation should not place additional restrictions on this type of release form.

Response: We agree. In the final rule, we have added a new provision, § 164.512(l), that permits covered entities to make disclosures authorized under workers' compensation and similar laws. This provision would permit covered entities to make disclosures authorized under FECA and not require a different release form.

Federal Employees Health Benefits Program

Comment: A few comments expressed concern about the preemption effect on FEHBP and wanted clarification that the privacy regulation does not alter the existing preemptive scope of the program.

Response: We do not intend to affect the preemptive scope of the FEHBP. The Federal Employee Health Benefit Act of 1998 preempts any state law that "relates to" health insurance or plans. 5 U.S.C. 8902(m). The final rule does not attempt to alter the preemptive scope Congress has provided to the FEHBP.

Comment: One comment suggested that in the context of FEHBP HHS should place the enforcement responsibilities of the privacy regulation with Office of Personnel Management, as the agency responsible for administering the program.

Response: We disagree. Congress placed enforcement with the Secretary. See section 1176 of the Act.

Federal Rules of Civil Procedure

Comment: A few comments suggested revising proposed § 164.510(d) so that it is consistent with the existing discovery procedure under the Federal Rules of Civil Procedure or local rules.

Response: We disagree that the rules regarding disclosures and uses of protected health information for judicial and administrative procedures should provide only those protections that exist under existing discovery rules. Although the current process may be appropriate for other documents and information requested during the discovery process, the current system, as exemplified by the Federal Rules of Civil Procedure, does not provide sufficient protection for protected health information. Under current discovery rules, private attorneys, government officials, and others who develop such requests make the initial determinations as to what information or documentation should be disclosed. Independent third-party review, such as that by a court, only becomes necessary if a person of whom the request is made refuses to provide the information. If this happens, the person seeking discovery must obtain a court order or move to compel discovery. In our view this system does not provide sufficient protections to ensure that unnecessary and unwarranted disclosures of protected health information does not occur. For a related discuss, see the preamble regarding "Disclosures for Judicial and Administrative Proceedings" under § 164.512(e).

Federal Rules of Evidence

Comment: Many comments requested clarification that the privacy regulation does not conflict or interfere with the federal or state privileges. In particular, one of these comments suggested that the final regulation provide that disclosures for a purpose recognized by the regulation not constitute a waiver of federal or state privileges.

Response: We do not intend for the privacy regulation to interfere with federal or state rules of evidence that create privileges. Consistent with The Uniform Health-Care Information Act drafted by the National Conference of Commissioners on Uniform State Laws, we do not view a consent or an authorization to function as a waiver of federal or state privileges. For further discussion of the effect of consent or authorization on federal or state privileges, see preamble discussions in §§ 164.506 and 164.508.

Comment: Other comments applauded the Secretary's references to Jaffee v. Redman, 518 U.S. 1 (1996), which recognized a psychotherapist-patient privilege, and asked the Secretary to incorporate expressly this privilege into the final regulation.

Response: We agree that the psychotherapist-patient relationship is an important one that deserves protection. However, it is beyond the scope our mandate to create specific evidentiary privileges. It is also unnecessary because the United States Supreme Court has adopted this privilege.

Comment: A few comments discussed whether one remedy for violating the privacy regulation should be to exclude or suppress evidence obtained in violation of the regulation. One comment supported using this penalty, while another opposed it.

Response: We do not have the authority to mandate that courts apply or not apply the exclusionary rule to evidence obtained in violation of the regulation. This issue is in the purview of the courts.

Federal Tort Claims Act

Comment: One comment contended that the proposed regulation's requirement mandating covered entities to name the subjects of protected health information disclosed under a business partner contract as third party intended beneficiaries under the

contract would have created an impermissible right of action against the government under the Federal Tort Claims Act ("FTCA").

Response: Because we have deleted the third party beneficiary provisions from the final rules, this comment is moot.

Comment: Another comment suggested the regulation would hamper the ability of federal agencies to disclose protected health information to their attorneys, the Department of Justice, during the initial stages of the claims brought under the FTCA.

Response: We disagree. The regulation applies only to federal agencies that are covered entities. To the extent an agency is not a covered entity, it is not subject to the regulation; to the extent an agency is a covered entity, it must comply with the regulation. A covered entity that is a federal agency may disclose relevant information to its attorneys, who are business associates, for purposes of health care operations, which includes uses or disclosures for legal functions. See § 164.501 (definitions of "business associate" and "health care operations"). The final rule provides specific provisions describing how federal agencies may provide ***82597** adequate assurances for these types of disclosures of protected health information. See § 164.504(e)(3).

Food and Drug Administration

Comment: A few comments expressed concerns about the use of protected health information for reporting activities to the Food and Drug Administration ("FDA"). Their concern focused on the ability to obtain or disclose protected health information for pre-and post-marketing adverse event reports, device tracking, and post-marketing safety and efficacy evaluation.

Response: We agree with this comment and have provided that covered entities may disclose protected health information to persons subject to the jurisdiction of the FDA, to comply with the requirements of, or at the direction of, the FDA with regard to reporting adverse events (or similar reports with respect to dietary supplements), the tracking of medical devices, other post-marketing surveillance, or other similar requirements described at § 164.512(b).

Foreign Standards

Comment: One comment asked how the regulation could be enforced against foreign countries (or presumably entities in foreign countries) that solicit medical records from entities in the United States.

Response: We do not regulate solicitations of information. To the extent a covered entity wants to comply with a request for disclosure of protected health information to foreign countries or entities within foreign countries, it will need to comply with the privacy rules before making the disclosure. If the covered entity fails to comply with the rules, it will be subject to enforcement proceedings.

Freedom of Information Act

Comment: One comment asserted that the proposed privacy regulation conflicts with the Freedom of Information Act ("FOIA"). The comment argued that the proposed restriction on disclosures by agencies would not come within one of the permissible exemptions to the FOIA. In addition, the comment noted that only in exceptional circumstances would the protected health information of deceased individuals come within an exemption because, for the most part, death extinguishes an individual's right to privacy.

Response: Section 164.512(a) below permits covered entities to disclose protected health information when such disclosures are required by other laws as long as they follow the requirements of those laws. Therefore, the privacy regulation will not interfere with the ability of federal agencies to comply with FOIA, when it requires the disclosure.

We disagree, however, that most protected health information will not come within Exemption 6 of FOIA. See the discussion above under "Relationship to Other Federal Laws" for our review of FOIA. Moreover, we disagree with the comment's assertion

that the protected health information of deceased individuals does not come within Exemption 6. Courts have recognized that a deceased individual's surviving relatives may have a privacy interest that federal agencies may consider when balancing privacy interests against the public interest in disclosure of the requested information. Federal agencies will need to consider not only the privacy interests of the subject of the protected health information in the record requested, but also, when appropriate, those of a deceased individual's family consistent with judicial rulings.

If an agency receives a FOIA request for the disclosure of protected health information of a deceased individual, it will need to determine whether or not the disclosure comes within Exemption 6. This evaluation must be consistent with the court's rulings in this area. If the exemption applies, the federal agency will not have to release the information. If the federal agency determines that the exemption does not apply, may release it under § 164.512(a) of this regulation.

Comment: One commenter expressed concern that our proposal to protect the individually identifiable health information about the deceased for two years following death would impede public interest reporting and would be at odds with many state Freedom of Information laws that make death records and autopsy reports public information. The commenter suggested permitting medical information to be available upon the death of an individual or, at the very least, that an appeals process be permitted so that health information trustees would be allowed to balance the interests in privacy and in public disclosure and release or not release the information accordingly.

Response: These rules permit covered entities to make disclosures that are required by state Freedom of Information Act (FOIA) laws under § 164.512(a). Thus, if a state FOIA law designates death records and autopsy reports as public information that must be disclosed, a covered entity may disclose it without an authorization under the rule. To the extent that such information is required to be disclosed by FOIA or other law, such disclosures are permitted under the final rule. In addition, to the extent that death records and autopsy reports are obtainable from non-covered entities, such as state legal authorities, access to this information is not impeded by this rule.

If another law does not require the disclosure of death records and autopsy reports generated and maintained by a covered entity, which are protected health information, covered entities are not allowed to disclose such information except as permitted or required by the final rule, even if another entity discloses them.

Comment: One comment sought clarification of the relationship between the Freedom of Information Act, the Privacy Act, and the privacy rules.

Response: We have provided this analysis in the “Relationship to Other Federal Laws” section of the preamble in our discussion of the Freedom of Information Act.

Gramm-Leach-Bliley

Comments: One commenter noted that the Financial Services Modernization Act, also known as Gramm-Leach-Bliley (“GLB”), requires financial institutions to provide detailed privacy notices to individuals. The commenter suggested that the privacy regulation should not require financial institutions to provide additional notice.

Response: We disagree. To the extent a covered entity is required to comply with the notice requirements of GLB and those of our rules, the covered entity must comply with both. We will work with the FTC and other agencies implementing GLB to avoid unnecessary duplication. For a more detailed discussion of GLB and the privacy rules, see the “Relationship to Other Federal Laws” section of the preamble.

Comment: A few commenters asked that the Department clarify that financial institutions, such as banks, that serve as payors are covered entities. The comments explained that with the enactment of the Gramm-Leach-Bliley Act, banks are able to form holding companies that will include insurance companies (that may be covered entities). They recommended that banks be held

to the rule's requirements and be required to obtain authorization to conduct non-payment activities, such as for the marketing of health and non-health items and services or the use and disclosure to non-health related divisions of the covered entity. ***82598**

Response: These comments did not provide specific facts that would permit us to provide a substantive response. An organization will need to determine whether it comes within the definition of "covered entity." An organization may also need to consider whether or not it contains a health care component. Organizations that are uncertain about the application of the regulation to them will need to evaluate their specific facts in light of this rule.

Inspector General Act

Comment: One comment requested the Secretary to clarify in the preamble that the privacy regulation does not preempt the Inspector General Act.

Response: We agree that to the extent the Inspector General Act requires uses or disclosures of protected health information, the privacy regulation does not preempt it. The final rule provides that to the extent required under section 201(a)(5) of the Act, nothing in this subchapter should be construed to diminish the authority of any Inspector General, including the authority provided in the Inspector General Act of 1978. See discussion of § 160.102 above.

Medicare and Medicaid

Comment: One comment suggested possible inconsistencies between the regulation and Medicare/Medicaid requirements, such as those under the Quality Improvement System for Managed Care. This commenter asked that HHS expand the definition of health care operations to include health promotion activities and avoid potential conflicts.

Response: We disagree that the privacy regulation would prohibit managed care plans operating in the Medicare or Medicaid programs from fulfilling their statutory obligations. To the extent a covered entity is required by law to use or disclose protected health information in a particular manner, the covered entity may make such a use or disclosure under § 164.512(a). Additionally, quality assessment and improvement activities come within the definition of "health care operations." Therefore, the specific example provided by the commenter would seem to be a permissible use or disclosure under § 164.502, even if it were not a use or disclosure "required by law."

Comment: One commenter stated that Medicare should not be able to require the disclosure of psychotherapy notes because it would destroy a practitioner's ability to treat patients effectively.

Response: If the Title XVIII of the Social Security Act requires the disclosure of psychotherapy notes, the final rule permits, but does not require, a covered entity to make such a disclosure under § 164.512(a). If, however, the Social Security Act does not require such disclosures, Medicare does not have the discretion to require the disclosure of psychotherapy notes as a public policy matter because the final rule provides that covered entities, with limited exceptions, must obtain an individual's authorization before disclosing psychotherapy notes. See § 164.508(a)(2).

National Labor Relations Act

Comment: A few comments expressed concern that the regulation did not address the obligation of covered entities to disclose protected health information to collective bargaining representatives under the National Labor Relations Act.

Response: The final rule does not prohibit disclosures that covered entities must make pursuant to other laws. To the extent a covered entity is required by law to disclose protected health information to collective bargaining representatives under the NLRA, it may to so without an authorization. Also, the definition of "health care operations" at § 164.501 permits disclosures to employee representatives for purposes of grievance resolution.

Organ Donation

Comment: One commenter expressed concern about the potential impact of the regulation on the organ donation program under 42 CFR part 482.

Response: In the final rule, we add provisions allowing the use or disclosure of protected health information to organ procurement organizations or other entities engaged in the procurement, banking, or transplantation of cadaveric organs, eyes, or tissue for the purpose of facilitating donation and transplantation. See § 164.512(h).

Privacy Act Comments

Comment: One comment suggested that the final rule unambiguously permit the continued operation of the statutorily established or authorized discretionary routine uses permitted under the Privacy Act for both law enforcement and health oversight.

Response: We disagree. See the discussion of the Privacy Act in "Relationship to Other Federal Laws" above.

Public Health Services Act

Comment: One comment suggested that the Public Health Service Act places more stringent rules regarding the disclosure of information on Federally Qualified Health Centers than the proposed privacy regulation suggested. Therefore, the commenter suggested that the final rule exempt Federally Qualified Health Centers from the rules requirements

Response: We disagree. Congress expressly included Federally Qualified Health Centers, a provider of medical or other health services under the Social Security Act section 1861(s), within its definition of health care provider in section 1171 of the Act; therefore, we cannot exclude them from the regulation.

Comment: One commenter noted that no conflicts existed between the proposed rule and the Public Health Services Act.

Response: As we discuss in the "Relationship to Other Federal Laws" section of the preamble, the Public Health Service Act contains explicit confidentiality requirements that are so general as not to create problems of inconsistency. We recognized, however, that in some cases, that law or its accompanying regulations may contain greater restrictions. In those situations, a covered entity's ability to make what are permissive disclosures under this privacy regulation would be limited by those laws.

Reporting Requirement

Comment: One comment noted that federal agencies must provide information to certain entities pursuant to various federal statutes. For example, federal agencies must not withhold information from a Congressional oversight committee or the General Accounting Office. Similarly, some federal agencies must provide the Bureau of the Census and the National Archives and Records Administration with certain information. This comment expressed concern that the privacy regulation would conflict with these requirements. Additionally, the commenter asked whether the privacy notice would need to contain these uses and disclosures and recommended that a general statement that these federal agencies would disclose protected health information when required by law be considered sufficient to meet the privacy notice requirements.

Response: To the extent a federal agency acting as a covered entity is required by federal statute to disclose protected health information, the regulation permits the disclosure as required by law under § 164.512(a). The notice provisions at § 164.520(b)(1)(ii)(B) require covered entities to provide a brief description of the purposes for which the covered ***82599** entity is permitted or required by the rules to use or disclose protected health information without an individual's written authorization. If these statutes require the disclosures, covered entities subject to the requirement may make the disclosure pursuant to § 164.512(a).

Thus, their notice must include a description of the category of these disclosures. For example, a general statement such as the covered entity "will disclose your protected health information to comply with legal requirements" should suffice.

Comment: One comment stressed that the final rule should not inadvertently preempt mandatory reporting laws duly enacted by federal, state, or local legislative bodies. This commenter also suggested that the final rule not prevent the reporting of violations to law enforcement agencies.

Response: We agree. Like the proposed rule, the final rule permits covered entities to disclose protected health information when required by law under § 164.512(a). To the extent a covered entity is required by law to make a report to law enforcement agencies or is otherwise permitted to make a disclosure to a law enforcement agency as described in § 164.512(f), it may do so without an authorization. Alternatively, a covered entity may always request that individuals authorize these disclosures.

Security Standards

Comment: One comment called for HHS to consider the privacy regulation in conjunction with the other HIPAA standards. In particular, this comment focused on the belief that the security standards should be compatible with the existing and emerging health care and information technology industry standards.

Response: We agree that the security standards and the privacy rules should be compatible with one another and are working to ensure that the final rules in both areas function together. Because we are addressing comments regarding the privacy rules in this preamble, we will consider the comment about the security standard as we finalize that set of rules.

Substance Abuse Confidentiality Statute and Regulations

Comment: Several commenters noted that many health care providers are bound by the federal restrictions governing alcohol and drug abuse records. One commenter noted that the NPRM differed substantially from the substance abuse regulations and would have caused a host of practical problems for covered entities. Another commenter, however, supported the NPRM's analysis that stated that more stringent provisions of the substance abuse provisions would apply. This commenter suggested an even stronger approach of including in the text a provision that would preserve existing federal law. Yet, one comment suggested that the regulation as proposed would confuse providers by making it difficult to determine when they may disclose information to law enforcement because the privacy regulation would permit disclosures that the substance abuse regulations would not.

Response: We appreciate the need of some covered entities to evaluate the privacy rules in light of federal requirements regarding alcohol and drug abuse records. Therefore, we provide a more detailed analysis in the "Relationship to Other Federal Laws" section of the preamble.

Comment: Some of these commenters also noted that state laws contain strict confidentiality requirements. A few commenters suggested that HHS reassess the regulations to avoid inconsistencies with state privacy requirements, implying that problems exist because of conflicts between the federal and state laws regarding the confidentiality of substance abuse information.

Response: As noted in the preamble section discussing preemption, the final rules do not preempt state laws that provide more privacy protections. For a more detailed analysis of the relationship between state law and the privacy rules, see the "Preemption" provisions of the preamble.

Tribal Law

Comments: One commenter suggested that the consultation process with tribal governments described in the NPRM was inadequate under Executive Order No. 13084. In addition, the commenter expressed concern that the disclosures for research purposes as permitted by the NPRM would conflict with a number of tribal laws that offer individuals greater privacy rights with respect to research and reflects cultural appropriateness. In particular, the commenter referenced the Health Research Code

for the Navajo Nation which creates a entity with broader authority over research conducted on the Navajo Nation than the local IRB and requires informed consent by study participants. Other laws mentioned by the commenter included the Navajo Nation Privacy and Access to Information Act and a similar policy applicable to all health care providers within the Navajo Nation. The commenter expressed concern that the proposed regulation research provisions would override these tribal laws.

Response: We disagree with the comment that the consultation with tribal governments undertaken prior to the proposed regulation is inadequate under Executive Order No. 13084. As stated in the proposed regulation, the Department consulted with representatives of the National Congress of American Indians and the National Indian Health Board, as well as others, about the proposals and the application of HIPAA to the Tribes, and the potential variations based on the relationship of each Tribe with the IHS for the purpose of providing health services. In addition, Indian and tribal governments had the opportunity to, and did, submit substantive comments on the proposed rules.

Additionally, disclosures permitted by this regulation do not conflict with the policies as described by this commenter. Disclosures for research purposes under the final rule, as in the proposed regulation, are permissive disclosures only. The rule describes the outer boundaries of permissible disclosures. A covered health care provider that is subject to the tribal laws of the Navajo Nation must continue to comply with those tribal laws. If the tribal laws impose more stringent privacy standards on disclosures for research, such as requiring informed consent in all cases, nothing in the final rule would preclude compliance with those more stringent privacy standards. The final rule does not interfere with the internal governance of the Navajo Nation or otherwise adversely affect the policy choices of the tribal government with respect to the cultural appropriateness of research conducted in the Navajo Nation.

TRICARE

Comment: One comment expressed concern regarding the application of the "minimum necessary" standard to investigations of health care providers under the TRICARE (formerly the CHAMPUS) program. The comment also expressed concern that health care providers would be able to avoid providing their records to such investigators because the proposed § 164.510 exceptions were not mandatory disclosures.

Response: In our view, neither the minimum necessary standard nor the final §§ 164.510 and 164.512 permissive disclosures will impede such investigations. The regulation requires covered entities to make all reasonable efforts not to disclose more than the minimum amount of protected health ***82600** information necessary to accomplish the intended purpose of the use or disclosure. This requirement, however, does not apply to uses or disclosures that are required by law. See § 164.502(b)(2)(iv). Thus, if the disclosure to the investigators is required by law, the minimum necessary standard will not apply. Additionally, the final rule provides that covered entities rely, if such reliance is reasonable, on assertions from public officials about what information is reasonably necessary for the purpose for which it is being sought. See § 164.514(d)(3)(iii).

We disagree with the assertion that providers will be able to avoid providing their records to investigators. Nothing in this rule permits covered entities to avoid disclosures required by other laws.

Veterans Affairs

Comment: One comment sought clarification about how disclosures of protected health information would occur within the Veterans Affairs programs for veterans and their dependents.

Response: We appreciate the commenter's request for clarification as to how the rules will affect disclosures of protected health information in the specific context of Veteran's Affairs programs. Veterans health care programs under 38 U.S.C. chapter 17 are defined as "health plans." Without sufficient details as to the particular aspects of the Veterans Affairs programs that this comment views as problematic, we cannot comment substantively on this concern.

Comment: One comment suggested that the final regulation clarify that the analysis applied to the substance abuse regulations apply to laws governing Veteran's Affairs health records.

Response: Although we realize some difference may exist between the laws, we believe the discussion of federal substance abuse confidentiality regulations in the "Relationship to Other Federal Laws" preamble provides guidance that may be applied to the laws governing Veteran's Affairs ("VA") health records. In most cases, a conflict will not exist between these privacy rules and the VA programs. For example, some disclosures allowed without patient consent or authorization under the privacy regulation may not be within the VA statutory list of permissible disclosures without a written consent. In such circumstances, the covered entity would have to abide by the VA statute, and no conflict exists. If the disclosures permitted by the VA statute come within the permissible disclosures of our rules, no conflict exists. In some cases, our rules may demand additional requirements, such as obtaining the approval of a privacy board or Institutional Review Board if a covered entity seeks to disclose protected health information for research purposes without the individual's authorization. A covered entity subject to the VA statute will need to ensure that it meets the requirements of both that statute and the regulation below. If a conflict arises, the covered entity should evaluate the specific potential conflicting provisions under the implied repeal analysis set forth in the "Relationship to Other Federal Laws" discussion in the preamble.

WIC

Comment: One comment called on other federal agencies to examine their regulations and policies regarding the use and disclosure of protected health information. The comment suggested that other agencies revise their regulations and policies to avoid duplicative, contradictory, or more stringent requirements. The comment noted that the U.S. Department of Agriculture's Special Supplemental Nutrition Program for Women, Infants, and Children ("WIC") does not release WIC data. Because the commenter believed the regulation would not prohibit the disclosure of WIC data, the comment stated that the Department of Agriculture should now release such information.

Response: We support other federal agencies to whom the rules apply in their efforts to review existing regulations and policies regarding protected health information. However, we do not agree with the suggestion that other federal agencies that are not covered entities must reduce the protections or access-related rights they provide for individually identifiable health information they hold.

Part 160, Subpart C—Compliance and Enforcement

Section 160.306(a)—Who Can File Complaints With the Secretary

Comment: The proposed rule limited those who could file a complaint with the Secretary to individuals. A number of commenters suggested that other persons with knowledge of a possible violation should also be able to file complaints. Examples that were provided included a mental health care provider with first hand knowledge of a health plan improperly requiring disclosure of psychotherapy notes and an occupational health nurse with knowledge that her human resources manager is improperly reviewing medical records. A few comments raised the concern that permitting any person to file a complaint lends itself to abuse and is not necessary to ensure privacy rights and that the complainant should be a person for whom there is a duty to protect health information.

Response: As discussed below, the rule defines "individual" as the person who is the subject of the individually identifiable health information. However, the covered entity may allow other persons, such as personal representatives, to exercise the rights of the individual under certain circumstances, e.g., for a deceased individual. We agree with the commenters that any person may become aware of conduct by a covered entity that is in violation of the rule. Such persons could include the covered entity's employees, business associates, patients, or accrediting, health oversight, or advocacy agencies or organizations. Many persons, such as the covered entity's employees, may, in fact, be in a better position than the "individual" to know that a violation has occurred. Another example is a state Protection and Advocacy group that may represent persons with developmental disabilities.

We have decided to allow complaints from any person. The term "person" is not restricted here to human beings or natural persons, but also includes any type of association, group, or organization.

Allowing such persons to file complaints may be the only way the Secretary may learn of certain possible violations. Moreover, individuals who are the subject of the information may not be willing to file a complaint because of fear of embarrassment or retaliation. Based on our experience with various civil rights laws, such as Title VI of the Civil Rights Act of 1964 and Title II of the Americans with Disabilities Act, that allow any person to file a complaint with the Secretary, we do not believe that this practice will result in abuse. Finally, upholding privacy protections benefits all persons who have or may be served by the covered entity as well as the general public, and not only the subject of the information.

If a complaint is received from someone who is not the subject of protected health information, the person who is the subject of this information may be concerned with the Secretary's investigation of this complaint. While we did not receive comments on this issue, we want to protect the privacy rights of this individual. This might ***82601** involve the Secretary seeking to contact the individual to provide information as to how the Secretary will address individual's privacy concerns while resolving the complaint. Contacting all individuals may not be practicable in the case of allegations of systemic violations (e.g., where the allegation is that hundreds of medical records were wrongfully disclosed).

Requiring That a Complainant Exhaust the Covered Entity's Internal Complaint Process Prior to Filing a Complaint With the Secretary

Comment: A number of commenters, primarily health plans, suggested that individuals should not be permitted to file a complaint with the Secretary until they exhaust the covered entity's own complaint process. Commenters stated that covered entities should have a certain period of time, such as ninety days, to correct the violation. Some commenters asserted that providing for filing a complaint with the Secretary will be very expensive for both the public and private sectors of the health care industry to implement. Other commenters suggested requiring the Secretary to inform the covered entity of any complaint it has received and not initiate an investigation or "take enforcement action" before the covered entity has time to address the complaint.

Response: We have decided, for a number of reasons, to retain the approach as presented in the proposed rule. First, we are concerned that requiring that complainants first notify the covered entity would have a chilling effect on complaints. In the course of investigating individual complaints, the Secretary will often need to reveal the identity of the complainant to the covered entity. However, in the investigation of cases of systemic violations and some individual violations, individual names may not need to be identified. Under the approach suggested by these commenters, the covered entity would learn the names of all persons who file complaints with the Secretary. Some individuals might feel uncomfortable or fear embarrassment or retaliation revealing their identity to the covered entity they believe has violated the regulation. Individuals may also feel they are being forced to enter into negotiations with this entity before they can file a complaint with the Secretary.

Second, because some potential complainants would not bring complaints to the covered entity, possible violations might not become known to the Secretary and might continue. Third, the delay in the complaint coming to the attention of the Secretary because of the time allowed for the covered entity to resolve the complaint may mean that significant violations are not addressed expeditiously. Finally, the process proposed by these commenters is arguably unnecessary because an individual who believes that an agreement can be reached with the covered entity, can, through the entity's internal complaint process or other means, seek resolution before filing a complaint with the Secretary.

Our approach is consistent with other laws and regulations protecting individual rights. None of the civil rights laws enforced by the Secretary require a complainant to provide any notification to the entity that is alleged to have engaged in discrimination (e.g., Americans with Disabilities Act, section 504 of the Rehabilitation Act, Title VI of the Civil Rights Act, and the Age Discrimination Act). The concept of "exhaustion" is used in laws that require individuals to pursue administrative remedies, such as that provided by a governmental agency, before bringing a court action. Under HIPAA, individuals do not have a right to court action.

Some commenters seemed to believe that the Secretary would pursue enforcement action without notifying the covered entity. It has been the Secretary's practice in investigating cases under other laws, such as various civil rights laws, to inform entities that we have received a complaint against them and to seek early resolution if possible. In enforcing the privacy rule, the Secretary will generally inform the covered entity of the nature of any complaints it has received against the entity. (There may be situations where information is withheld to protect the privacy interests of the complainant or others or where revealing information would impede the investigation of the covered entity.) The Secretary will also generally afford the entity an opportunity to share information with the Secretary that may result in an early resolution. Our approach will be to seek informal resolution of complaints whenever possible, which includes allowing covered entities a reasonable amount of time to work with the Secretary to come into compliance before initiating action to seek civil monetary penalties.

Section 160.306(b)(3)—Requiring That Complaints Be Filed With the Secretary Within a Certain Period of Time

Comment: A number of commenters, primarily privacy and disability advocacy organizations, suggested that the regulation require that complaints be filed with the Secretary by a certain time. These commenters generally recommended that the time period for filing a complaint should commence to run from the time when the individual knew or had reason to know of the violation or omission. Another comment suggested that a requirement to file a complaint with the Secretary within 180 days of the alleged noncompliance is a problem because a patient may, because of his or her medical condition, be unable to access his or her records within that time frame.

Response: We agree with the commenters that complainants should generally be required to submit complaints in a timely fashion. Federal regulations implementing Title VI of the Civil Rights Act of 1964 provide that "[a] complaint must be filed not later than '180 days from the date of the alleged discrimination' unless the time for filing is extended by the responsible Department official or his designee." 45 CFR 80.7(b). Other civil rights laws, such as the Age Discrimination Act, section 504 of the Rehabilitation Act, and Title II of the Americans with Disabilities Act (ADA) (state and local government services), also use this approach. Under civil rights laws administered by the EEOC, individuals have 180 days of the alleged discriminatory act to file a charge with EEOC (or 300 days if there is a state or local fair employment practices agency involved).

Therefore, in the final rule we require that complaints be filed within 180 days of when the complainant knew or should have known that the act or omission complained of occurred unless this time limit is waived by the Secretary for good cause shown. We believe that an investigation of a complaint is likely to be most effective if persons can be interviewed and documents reviewed as close to the time of the alleged violation as possible. Requiring that complaints generally be filed within a certain period of time increases the likelihood that the Secretary will have necessary and reliable information. Moreover, we are taking this approach in order to encourage complainants to file complaints as soon as possible. By receiving complaints in a timely fashion, we can, if such complaints prove valid, reduce the harm caused by the violation.

Section 160.308—Basis for Conducting Compliance Reviews

Comment: A number of comments expressed concern that the Secretary would conduct compliance reviews ***82602** without having received a complaint or having reason to believe there is noncompliance. A number of these commenters appeared to believe that the Secretary would engage in "routine visits." Some commenters suggested that the Secretary should only be able to conduct compliance reviews if the Secretary has initiated an investigation of a complaint regarding the covered entity in the preceding twelve months. Some commenters suggested that there should only be compliance reviews based on established criteria for reviews (e.g., finding of "reckless disregard"). Many of these commenters stated that cooperating with compliance reviews is potentially burdensome and expensive.

One commenter asked whether the Secretary will have a process for reviewing all covered entities to determine how they are complying with requirements. This commenter questioned whether covered entities will be required to submit plans and wait for Departmental approval.

Another commenter suggested that the Secretary specify a time limit for the completion of a compliance review.

Response: We disagree with the commenters that the final rule should restrict the Secretary's ability to conduct compliance reviews. The Secretary needs to maintain the flexibility to conduct whatever reviews are necessary to ensure compliance with the rule.

Section 160.310 (a) and (c)—The Secretary's Access to Information in Determining Compliance

Comment: Some commenters raised objections to provisions in the proposed rule which required that covered entities maintain records and submit compliance reports as the Secretary determines is necessary to determine compliance and required that covered entities permit access by the Secretary during normal business hours to its books, records, accounts, and other sources of information, including protected health information, and its facilities, that are pertinent to ascertaining compliance with this subpart. One commenter stated that the Secretary's access to private health information without appropriate patient consent is contrary to the intent of HIPAA. Another commenter expressed the view that, because covered entities face criminal penalties for violations, these provisions violate the Fifth Amendment protections against forced self incrimination. Other commenters stated that covered entities should be given the reason the Secretary needs to have access to its books and records. Another commenter stated that there should be a limit to the frequency or extent of intrusion by the federal government into the business practices of a covered entity and that these provisions violate the Fourth Amendment of the Constitution.

Finally, a coalition of church plans suggested that the Secretary provide church plans with additional procedural safeguards to reduce unnecessary intrusion into internal church operations. These suggested safeguards included permitting HHS to obtain records and other documents only if they are relevant and necessary to compliance and enforcement activities related to church plans, requiring a senior official to determine the appropriateness of compliance-related activities for church plans, and providing church plans with a self-correcting period similar to that Congress expressly provided in Title I of HIPAA under the tax code.

Response: The final rule retains the proposed language in these two provisions with one change. The rule adds a provision indicating that the Secretary's access to information held by the covered entity may be at any time and without notice where exigent circumstances exist, such as where time is of the essence because documents might be hidden or destroyed. Thus, covered entities will generally receive notice before the Secretary seeks to access the entity's books or records.

Other than the exigent circumstances language, the language in these two provisions is virtually the same as the language in this Department's regulation implementing Title VI of the Civil Rights Act of 1964. 45 CFR 80.6(b) and (c). The Title VI regulation is incorporated by reference in other Department regulations prohibiting discrimination of the basis of disability. 45 CFR 84.61. Similar provisions allowing this Department access to recipient information is found in the Secretary's regulation implementing the Age Discrimination Act. 45 CFR 91.34. These provisions have not proved to be burdensome to entities that are subject to these civil rights regulations (i.e., all recipients of Department funds).

We do not interpret Constitutional case law as supporting the view that a federal agency's review of information pursuant to statutory mandate violates the Fifth Amendment protections against forced self incrimination. Nor would such a review of this information raise Fourth Amendment problems. See discussion above regarding Constitutional comments and responses.

We appreciate the concern that the Secretary not involve herself unnecessarily into the internal operations of church plans. However, by providing health insurance or care to their employees, church plans are engaging in a secular activity. Under the regulation, church plans are subject to the same compliance and enforcement requirements with which other covered entities must comply. Because Congress did not carve out specific exceptions or require stricter standards for investigations related to church plans, incorporating such measures into the regulation would be inappropriate.

Additionally, there is no indication that the regulation will directly interfere with the religious practices of church plans. Also, the regulation as written appropriately limits the ability of investigators to obtain information from covered entities. The regulation provides that the Secretary may obtain access only to information that is pertinent to ascertain compliance with the regulation.

We do not anticipate asking for information that is not necessary to assess compliance with the regulation. The purpose of obtaining records and similar materials is to determine compliance, not to engage in any sort of review or evaluation of religious activities or beliefs. Therefore, we believe the regulation appropriately balances the need to access information to determine compliance with the desire of covered entities to avoid opening every record in their possession to the government.

Provision of Technical Assistance

Comment: A number of commenters inquired as to how a covered entity can request technical assistance from the Secretary to come into compliance. A number of commenters suggested that the Secretary provide interpretive guidance to assist with compliance. Others recommended that the Secretary have a contact person or privacy official, available by telephone or email, to provide guidance on the appropriateness of a disclosure or a denial of access. One commenter suggested that there be a formal process for a covered entity to submit compliance activities to the Secretary for prior approval and clarification. This commenter suggested that clarifications be published on a contemporaneous basis in the Federal Register to help correct any ambiguities and confusion in implementation. It was also suggested that the Secretary undertake an assessment of "best practices" of covered entities and document and promote the findings to serve as a convenient "road map" for other covered entities. Another commenter suggested that we work with providers to create implementation guidelines modeled after the interpretative ***82603** guidelines that HCFA creates for surveyors on the conditions of participation for Medicare and Medicaid contractors.

Response: While we have not in the final rule committed the Secretary to any specific model of providing guidance or assistance, we do state our intent, subject to budget and staffing constraints, to develop a technical assistance program that will include the provision of written material when appropriate to assist covered entities in achieving compliance. We will consider other models including HCFA's Medicare and Medicaid interpretative guidelines. Further information regarding the Secretary's technical assistance program may be provided in the Federal Register and on the HHS Office for Civil Rights (OCR) Web Site. While OCR plans to have fully trained staff available to respond to questions, its ability to provide individualized advice in regard to such matters as the appropriateness of a particular disclosure or the sufficiency of compliance activities will be based on staff resources and demands. The idea of looking at "best practices" and sharing information with all covered entities is a good one and we will explore how best to do this. We note that a covered entity is not excused from compliance with the regulation because of any failure to receive technical assistance or guidance.

Basis for Violation Findings and Enforcement

Comment: A number of commenters asked that covered entities not be liable for violations of the rule if they have acted in good faith. One commenter indicated that enforcement actions should not be pursued against covered entities that make legitimate business decisions about how to comply with the privacy standards.

Response: The commenters seemed to argue that even if a covered entity does not comply with a requirement of the rule, the covered entity should not be liable if there was an honest and sincere intention or attempt to fulfill its obligations. The final rule, however, does not take this approach but instead draws careful distinctions between what a covered entity must do unconditionally, and what a covered entity must make certain reasonable efforts to do. In addition, the final rule is clear as to the specific provisions where "good faith" is a consideration. For example, a covered entity is permitted to use and disclose protected health information without authorization based on criteria that includes a good faith belief that such use or disclosure is necessary to avert an imminent threat to health or safety (§ 164.512(j)(1)(i)). Therefore, covered entities need to pay careful attention to the specific language in each requirement. However, we note that many of these provisions can be implemented in a variety of ways; e.g, covered entities can exercise business judgement regarding how to conduct staff training.

As to enforcement, a covered entity will not necessarily suffer a penalty solely because an act or omission violates the rule. As we discuss elsewhere, the Department will exercise discretion to consider not only the harm done, but the willingness of the covered entity to achieve voluntary compliance. Further, the Administrative Simplification provisions of HIPAA provide that whether a violation was known or not is relevant in determining whether civil or criminal penalties apply. In addition, if a civil penalty applies, HIPAA allows the Secretary, where the failure to comply was due to reasonable cause and not to willful neglect,

to delay the imposition of the penalty to allow the covered entity to comply. The Department will develop and release for public comment an enforcement regulation applicable to all the administrative simplification regulations that will address these issues.

Comment: One commenter asked whether hospitals will be vicariously liable for the violations of their employees and expressed concern that hospitals and other providers will be the ones paying large fines.

Response: The enforcement regulation will address this issue. However, we note that section 1128A(1) of the Social Security Act, which applies to the imposition of civil monetary penalties under HIPAA, provides that a principal is liable for penalties for the actions of its agent acting within the scope of the agency. Therefore, a covered entity will generally be responsible for the actions of its employees such as where the employee discloses protected health information in violation of the regulation.

Comment: A commenter expressed the concern that if a covered entity acquires a non-compliant health plan, it would be liable for financial penalties. This commenter suggested that, at a minimum, the covered entity be given a grace period of at least a year, but not less than six months to bring any acquisition up to standard. The commenter stated that the Secretary should encourage, not discourage, compliant companies to acquire non-compliant ones. Another commenter expressed a general concern about resolution of enforcement if an entity faced with a HIPAA complaint acquires or merges with an entity not covered by HIPAA.

Response: As discussed above, the Secretary will encourage voluntary efforts to cure violations of the rule, and will consider that fact in determining whether to bring a compliance action. We do not agree, however, that we should limit our authority to pursue violations of the rule if the situation warrants it.

Comment: One commenter was concerned about the "undue risk" of liability on originators of information, stemming from the fact that "the number of covered entities is limited and they are unable to restrict how a recipient of information may use or re-disclose information * * *"

Response: Under this rule, we do not hold covered entities responsible for the actions of recipients of protected health information, unless the recipient is a business associate of the covered entity. We agree that it is not fair to hold covered entities responsible for the actions of persons with whom they have no on-going relationship, but believe it is fair to expect covered entities to hold their business associates to appropriate standards of behavior with respect to health information.

Other Compliance and Enforcement Comments

Comment: A number of comments raised questions regarding the Secretary's priorities for enforcement. A few commenters stated that they supported deferring enforcement until there is experience using the proposed standards. One organization asked that we clarify that the regulation does not replace or otherwise modify the self-regulatory/consumer empowerment approach to consumer privacy in the online environment.

Response: We have not made any decisions regarding enforcement priorities. It appears that some commenters believe that no enforcement action will be taken against a given covered entity until that entity has had some time to comply. Covered entities have two years to come into compliance with the regulation (three years in the case of small health plans). Some covered entities will have had experience using the standards prior to the compliance date. We do not agree that we should defer enforcement where violations of the rule occur. It would be wrong for covered entities to believe that enforcement action is based on their not having much experience in ***82604** using a particular standard or meeting another requirement.

We support a self-regulation approach in that we recognize that most compliance will be achieved by the voluntary activities of covered entities rather than by our enforcement activities. Our emphasis will be on education, technical assistance, and voluntary compliance and not on finding violations and imposing penalties. We also support a consumer empowerment approach. A knowledgeable consumer is key to the effectiveness of this rule. A consumer familiar with the requirements of this rule will be equipped to make choices regarding which covered entity will best serve their privacy interests and will know their rights under the rule and how they can seek redress for violations of this rule. Privacy-minded consumers will seek to protect the privacy

rights of others by bringing concerns to the attention of covered entities, the public, and the Secretary. However, we do not agree that we should defer enforcement where violations of the rule occur.

Comment: One commenter expressed concern that by filing a complaint an individual would be required to reveal sensitive information to the public. Another commenter suggested that complaints regarding noncompliance in regard to psychotherapy notes should be made to a panel of mental health professionals designated by the Secretary. This commenter also proposed that all patient information be maintained as privileged, not be revealed to the public, and be kept under seal after the case is reviewed and closed.

Response: We appreciate this concern and will seek to ensure that individually identifiable health information and other personal information contained in complaints will not be available to the public. The privacy regulation provides, at § 160.310(c)(3), that protected health information obtained by the Secretary in connection with an investigation or compliance review will not be disclosed except if necessary for ascertaining or enforcing compliance with the regulation or if required by law. In addition, this Department generally seeks to protect the privacy of individuals to the fullest extent possible, while permitting the exchange of records required to fulfill its administrative and program responsibilities. The Freedom of Information Act, 5 U.S.C. 552, and the HHS implementing regulation, 45 CFR part 5, provide substantial protection for records about individuals where disclosure would constitute an unwarranted invasion of their personal privacy. In implementing the privacy regulation, OCR plans to continue its current practice of protecting its complaint files from disclosure. OCR treats these files as investigatory records compiled for law enforcement purposes. Moreover, OCR maintains that disclosing protected health information in these files generally constitutes an unwarranted invasion of personal privacy.

It is not clear in regarding the use of mental health professionals, whether the commenter believes that such professionals should be involved because they would be best able to keep psychotherapy notes confidential or because such professionals can best understand the meaning or relevance of such notes. OCR anticipates that it will not have to obtain a copy or review psychotherapy notes in investigating most complaints regarding noncompliance in regard to such notes. There may be some cases where a review of the notes may be needed such as where we need to identify that the information a covered entity disclosed was in fact psychotherapy notes. If we need to obtain a copy of psychotherapy notes, we will keep these notes confidential and secure. OCR investigative staff will be trained to ensure that they fully respect the confidentiality of personal information. In addition, while the specific contents of these notes is generally not relevant to violations under this rule, if such notes are relevant, we will secure the expertise of mental health professionals if needed in reviewing psychotherapy notes.

Comment: A member of Congress and a number of privacy and consumer groups expressed concern with whether OCR has adequate funding to carry out the major responsibility of enforcing the complaint process established by this rule. The Senator stated that "[d]ue to the limited enforcement ability allowed for in this rule by HIPAA, it is essential that OCR have the capacity to enforce the regulations. Now is the time for OCR to begin building the necessary infrastructure to enforce the regulation effectively."

Response: We agree and are committed to an effective enforcement program. We are working with Congress to ensure that the Secretary has the necessary funds to secure voluntary compliance through education and technical assistance, to investigate complaints and conduct compliance reviews, to provide states with exception determinations, and to use civil and criminal penalties when necessary. We will continue to work with Congress and within the new Administration in this regard.

Coordination With Reviewing Authorities

Comment: A number of commenters referenced other entities that already consider the privacy of health information. One commenter indicated opposition to the delegation of inspections to third party organizations, such as the Joint Commission on the Accreditation of Healthcare Organizations (JCAHO). A few commenters indicated that state agencies are already authorized to investigate violations of state privacy standards and that we should rely on those agencies to investigate alleged violations of the privacy rules or delegate its complaint process to states that wish to carry out this responsibility or to those states that have a complaint process in place. Another commenter argued that individuals should be required to exhaust any state processes

before filing a complaint with the Secretary. Others referenced the fact that state medical licensing boards investigate complaints against physicians for violating patient confidentiality. One group asked that the federal government streamline all of these activities so physicians can have a single entity to whom they must be responsive. Another group suggested that OMB should be given responsibility for ensuring that FEHB Plans operate in compliance with the privacy standards and for enforcement.

A few commenters stated that the regulation might be used as a basis for violation findings and subsequent penalties under other Department authorities, such as under Medicare's Conditions of Participation related to patient privacy and right to confidentiality of medical records. One commenter wanted some assurance that this regulation will not be used as grounds for sanctions under Medicare. Another commenter indicated support for making compliance with the privacy regulation a Condition of Participation under Medicare.

Response: HIPAA does not give the Secretary the authority to delegate her responsibilities to other private or public agencies such as JCAHO or state agencies. However, we plan to explore ways that we may benefit from current activities that also serve to protect the privacy of individually identifiable health information. For example, if we conduct an investigation or review of a covered entity, that entity may want to share information regarding findings of other bodies that conducted similar reviews. We would welcome such ***82605** information. In developing its enforcement program, we may explore ways it can coordinate with other regulatory or oversight bodies so that we can efficiently and effectively pursue our joint interests in protecting privacy.

We do not accept the suggestion that individuals be required to exhaust their remedies under state law before filing a complaint with the Secretary. Our rationale is similar to that discussed above in regard to the suggestion that covered entities be required to exhaust a covered entity's internal complaint process before filing a complaint with the Secretary. Congress provided for federal privacy protection and we want to allow individuals the right to this protection without barriers or delay. Covered entities may in their privacy notice inform individuals of any rights they have under state law including any right to file privacy complaints. We do not have the authority to interfere with state processes and HIPAA explicitly provides that we cannot preempt state laws that provide greater privacy protection.

We have not yet addressed the issue as to whether this regulation might be used as a basis for violation findings or penalties under other Department authorities. We note that Medicare conditions of participation require participating providers to have procedures for ensuring the confidentiality of patient records, as well as afford patients with the right to the confidentiality of their clinical records.

Penalties

Comment: Many commenters considered the statutory penalties insufficient to protect privacy, stating that the civil penalties are too weak to have the impact needed to reduce the risk of inappropriate disclosure. Some commenters took the opposing view and stated that large fines and prison sentences for violations would discourage physicians from transmitting any sort of health care information to any other agency, regardless of the medical necessity. Another comment expressed the concern that doctors will be at risk of going to jail for protecting the privacy of individuals (by not disclosing information the government believes should be released).

Response: The enforcement regulation will address the application of the civil monetary and criminal penalties under HIPAA. The regulation will be published in the Federal Register as a proposed regulation and the public will have an opportunity to comment. We do not believe that our rule, and the penalties available under it, will discourage physicians and other providers from using or disclosing necessary information. We believe that the rule permits physicians to make the disclosures that they need to make under the health care system without exposing themselves to jeopardy under the rule. We believe that the penalties under the statute are woefully inadequate. We support legislation that would increase the amount of these penalties.

Comment: A number of commenters stated that the regulations should permit individuals to sue for damages caused by breaches of privacy under these regulations. Some of these commenters specified that damages, equitable relief, attorneys fees, and punitive damages should be available. Conversely, one comment stated that strong penalties are necessary and would preclude

the need for a private right of action. Another commenter stated that he does not believe that the statute intended to give individuals the equivalent of a right to sue, which results from making individuals third party beneficiaries to contracts between business partners.

Response: We do not have the authority to provide a private right of action by regulation. As discussed below, the final rule deletes the third party beneficiary provision that was in the proposed rule.

However, we believe that, in addition to strong civil monetary penalties, federal law should allow any individual whose rights have been violated to bring an action for actual damages and equitable relief. The Secretary's Recommendations, which were submitted to Congress on September 11, 1997, called for a private right of action to permit individuals to enforce their privacy rights.

Comment: One comment stated that, in calculating civil monetary penalties, the criteria should include aggravating or mitigating circumstances and whether the violation is a minor or first time violation. Several comments stated that penalties should be tiered so that those that commit the most egregious violations face stricter civil monetary penalties.

Response: As mentioned above, issues regarding civil fines and criminal penalties will be addressed in the enforcement regulation.

Comment: One comment stated that the regulation should clarify whether a single disclosure that involved the health information of multiple parties would constitute a single or multiple infractions, for the purpose of calculating the penalty amount.

Response: The enforcement regulation will address the calculation of penalties. However, we note that section 1176 subjects persons to civil monetary penalties of not more than $100 for each violation of a requirement or prohibition and not more than $25,000 in a calendar year for all violations of an identical requirement or prohibition. For example, if a covered entity fails to permit amendment of protected health information for 10 patients in one calendar year, the entity may be fined up to $1000 ($100 times 10 violations equals $1000).

Part 164—Subpart A—General Requirements

Part 164—Subpart B-D—Reserved

Part 164—Subpart E—Privacy

Section 164.500—Applicability

Covered Entities

The response to comments on covered entities is included in the response to comments on the definition of “covered entity” in the preamble discussion of § 160.103.

Covered Information

The response to comments on covered information is included in the response to comments on the definition of “protected health information” in the preamble discussion of § 164.501.

Section 164.501—Definitions

Designated record set

Comment: Many commenters generally supported our proposed definition of designated record set. Commenters suggested different methods for narrowing the information accessible to individuals, such as excluding information obtained without face-to-face interaction (e.g., phone consultations). Other commenters recommended broadening the information accessible to individuals, such as allowing access to "the entire medical record," not just a designated record set. Some commenters advocated for access to all information about individuals. A few commenters generally supported the provision but recommended that consultation and interpretative assistance be provided when the disclosure may cause harm or misunderstanding.

Response: We believe individuals should have a right to access any protected health information that may be used to make decisions about them and modify the final rule to accomplish this result. This approach facilitates an open and cooperative relationship between individuals and covered health care providers and health plans and allows individuals fair opportunities to know what health information may be ***82606** used to make decisions about them. We list certain records that are always part of the designated record set. For covered providers these are the medical record and billing record. For health plans these are the enrollment, payment, claims adjudication, and case or medical management records. The purpose of these specified records is management of the accounts and health care of individuals. In addition, we include in the designated record set to which individuals have access any record used, in whole or in part, by or for the covered entity to make decisions about individuals. Only protected health information that is in a designated record set is covered. Therefore, if a covered provider has a phone conversation, information obtained during that conversation is subject to access only to the extent that it is recorded in the designated record set.

We do not require a covered entity to provide access to all individually identifiable health information, because the benefits of access to information not used to make decisions about individuals is limited and is outweighed by the burdens on covered entities of locating, retrieving, and providing access to such information. Such information may be found in many types of records that include significant information not relevant to the individual as well as information about other persons. For example, a hospital's peer review files that include protected health information about many patients but are used only to improve patient care at the hospital, and not to make decisions about individuals, are not part of that hospital's designated record sets.

We encourage but do not require covered entities to provide interpretive assistance to individuals accessing their information, because such a requirement could impose administrative burdens that outweigh the benefits likely to accrue.

The importance to individuals of having the right to inspect and copy information about them is supported by a variety of industry groups and is recognized in current state and federal law. The July 1977 Report of the Privacy Protection Study Commission recommended that individuals have access to medical records and medical record information.[FN2] The Privacy Act (5 U.S.C. 552a) requires government agencies to permit individuals to review records and have a copy made in a form comprehensible to the individual. In its report "Best Principles for Health Privacy," the Health Privacy Working Group recommended that individuals should have the right to access information about them.[FN3] The National Association of Insurance Commissioners' Health Information Privacy Model Act establishes the right of an individual to examine or receive a copy of protected health information in the possession of the carrier or a person acting on behalf of the carrier.

Many states also establish a right for individuals to access health information about them. For example, Alaska law (AK Code 18.23.005) entitles patients "to inspect and copy any records developed or maintained by a health care provider or other person pertaining to the health care rendered to the patient." Hawaii law (HRS section 323C-11) requires health care providers and health plans, among others, to permit individuals to inspect and copy protected health information about them. Many other states have similar provisions.

Industry and standard-setting organizations also have developed policies to enable individual access to health information. The National Committee for Quality Assurance and the Joint Commission on Accreditation of Healthcare Organizations issued recommendations stating, "Patients' confidence in the protection of their information requires that they have the means to know what is contained in their records. The opportunity for patients to review their records will enable them to correct any errors and may provide them with a better understanding of their health status and treatment."[FN4] Standards of the American Society

for Testing and Materials state, "The patient or his or her designated personal representative has access rights to the data and information in his or her health record and other health information databases except as restricted by law. An individual should be able to inspect or see his or her health information or request a copy of all or part of the health information, or both."[FN5] We build on this well-established principle in this final rule.

Comment: Several commenters advocated for access to not only information that has already been used to make decisions, but also information that may be used to make decisions. Other commenters believed accessible information should be more limited; for example, some commenters argued that accessible information should be restricted to only information used to make health care decisions.

Response: We agree that it is desirable that individuals have access to information reasonably likely to be used to make decisions about them. On the other hand, it is desirable that the category of records covered be readily ascertainable by the covered entity. We therefore define "designated record set" to include certain categories of records (a provider's medical record and billing record, the enrollment records, and certain other records maintained by a health plan) that are normally used, and are reasonably likely to be used, to make decisions about individuals. We also add a category of other records that are, in fact, used, in whole or in part, to make decisions about individuals. This category includes records that are used to make decisions about any individuals, whether or not the records have been used to make a decision about the particular individual requesting access.

We disagree that accessible information should be restricted to information used to make health care decisions, because other decisions by covered entities can also affect individuals' interests. For example, covered entities make financial decisions about individuals, such as whether an individual's deductible has been met. Because such decisions can significantly affect individuals' interests, we believe they should have access to any protected health information included in such records.

Comment: Some commenters believed the rule should use the term "retrievable" instead of "retrieved" to describe information accessible to individuals. Other commenters suggested that the rule follow the Privacy Act's principle of allowing access only when entities retrieve records by individual identifiers. Some commenters requested clarification that covered entities are not required to maintain information by name or other patient identifier.

Response: We have modified the proposed definition of the designated record set to focus on how information is used, not how it is retrieved. Information may be retrieved or retrievable by name, but if it is never used to make decisions about any ***82607** individuals, the burdens of requiring a covered entity to find it and to redact information about other individuals outweigh any benefits to the individual of having access to the information. When the information might be used to affect the individual's interests, however, that balance changes and the benefits outweigh the burdens. We confirm that this regulation does not require covered entities to maintain any particular record set by name or identifier.

Comment: A few commenters recommended denial of access for information relating to investigations of claims, fraud, and misrepresentations. Many commenters suggested that sensitive, proprietary, and legal documents that are "typical state law privileges" be excluded from the right to access. Specific suggestions for exclusion, either from the right of access or from the definition of designated record set, include quality assurance activities, information related to medical appeals, peer review and credentialing, attorney-client information, and compliance committee activities. Some commenters suggested excluding information already supplied to individuals on previous requests and information related to health care operations. However, some commenters felt that such information was already excluded from the definition of designated record set. Other commenters requested clarification that this provision will not prevent patients from getting information related to medical malpractice.

Response: We do not agree that records in these categories are never used to affect the interests of individuals. For example, while protected health information used for peer review and quality assurance activities typically would not be used to make decisions about individuals, and, thus, typically would not be part of a designated record set, we cannot say that this is true in all cases. We design this provision to be sufficiently flexible to work with the varying practices of covered entities.

The rule addresses several of these comments by excepting from the access provisions (§ 164.524) information compiled in reasonable anticipation of, or for use in, a civil, criminal, or administrative action or proceeding. Similarly, nothing in this rule requires a covered entity to divulge information covered by physician-patient or similar privilege. Under the access provisions, a covered entity may redact information in a record about other persons or information obtained under a promise of confidentiality, prior to releasing the information to the individual. We clarify that nothing in this provision would prevent access to information needed to prosecute or defend a medical malpractice action; the rules of the relevant court determine such access.

We found no persuasive evidence to support excluding information already supplied to individuals on previous requests. The burdens of tracking requests and the information provided pursuant to requests outweigh the burdens of providing the access requested. A covered entity may, however, discuss the scope of the request for access with the individual to facilitate the timely provision of access. For example, if the individual agrees, the covered entity could supply only the information created or received since the date access was last granted.

Disclosure

Comment: A number of commenters asked that the definition of "disclosure" be modified so that it is clear that it does not include the release, transfer, provision of access to, or divulging in any other manner of protected health information to the individual who is the subject of that information. It was suggested that we revise the definition in this way to clarify that a health care provider may release protected health information to the subject of the information without first requiring that the patient complete an authorization form.

Response: We agree with the commenters' concern, but accomplish this result through a different provision in the regulation. In § 164.502 of this final rule, we specify that disclosures of protected health information to the individual are not subject to the limitations on disclosure of protected health information otherwise imposed by this rule.

Comment: A number of commenters stated that the regulation should not apply to disclosures occurring within or among different subsidiaries or components of the same entity. One commenter interpreted "disclosure" to mean outside the agency or, in the case of a state Department of Health, outside sister agencies and offices that directly assist the Secretary in performing Medicaid functions and are listed in the state plan as entitled to receive Medicaid data.

Response: We agree that there are circumstances under which related organizations may be treated as a single covered entity for purposes of protecting the privacy of health information, and modify the rule to accommodate such circumstances. In § 164.504 of the final rule, we specify the conditions under which affiliated companies may combine into a single covered entity and similarly describe which components of a larger organization must comply with the requirements of this rule. For example, transfers of information within the designated component or affiliated entity are uses while transfers of information outside the designated component or affiliated entity are disclosures. See the discussion of § 164.504 for further information and rationale. It is not clear from these comments whether the particular organizational arrangements described could constitute a single covered entity.

Comment: A commenter noted that the definition of "disclosure" should reflect that health plan correspondence containing protected health information, such as Explanation of Benefits (EOBs), is frequently sent to the policyholder. Therefore, it was suggested that the words "provision of access to" be deleted from the definition and that a "disclosure" be clarified to include the conveyance of protected health information to a third party.

Response: The definition is, on its face, broad enough to cover the transfers of information described and so is not changed. We agree that health plans must be able to send EOBs to policyholders. Sending EOB correspondence to a policyholder by a covered entity is a disclosure for purposes of this rule, but it is a disclosure for purposes of payment. Therefore, subject to the provisions of § 164.522(b) regarding Confidential Communications, it is permitted even if it discloses to the policyholder protected health information about another individual (see below).

Health care operations

Comment: Several commenters stated that the list of activities within the definition of health care operations was too broad and should be narrowed. They asserted that the definition should be limited to exclude activities that have little or no connection to the care of a particular patient or to only include emergency treatment situations or situations constituting a clear and present danger to oneself or others.

Response: We disagree. We believe that narrowing the definition in the manner requested will place serious burdens on covered entities and impair their ability to conduct legitimate business and management functions.

Comment: Many commenters, including physician groups, consumer groups, and privacy advocates, argued that we should limit the information that can be used for health care operations to de-identified data. They ***82608** argued that if an activity could be done with de-identified data, it should not be incorporated in the definition of health care operations.

Response: We disagree. We believe that many activities necessary for the business and administrative operations of health plans and health care providers are not possible with de-identified information or are possible only under unduly burdensome circumstances. For example, identified information may be used or disclosed during an audit of claims, for a plan to contact a provider about alternative treatments for specific patients, and in reviewing the competence of health care professionals. Further, not all covered entities have the same ability to de-identify protected health information. Covered entities with highly automated information systems will be able to use de-identified data for many purposes. Other covered entities maintain most of their records on paper, so a requirement to de-identify information would place too great a burden on the legitimate and routine business functions included in the definition of health care operations. Small business, which are most likely to have largely paper records, would find such a blanket requirement particularly burdensome.

Protected health information that is de-identified pursuant to § 164.514(a) is not subject to this rule. We hope this provides covered entities capable of de-identifying information with the incentive to do so.

Comment: Some commenters requested that we permit the use of demographic data (geographic, location, age, gender, and race) separate from all other data for health care operations. They argued that demographic data was needed to establish provider networks and monitor providers to ensure that the needs of ethnic and minority populations were being addressed.

Response: The use of demographic data for the stated purposes is within the definition of health care operations; a special rule is not necessary.

Comment: Some commenters pointed out that the definition of health care operations is similar to, and at times overlaps with, the definition of research. In addition, a number of commenters questioned whether or not research conducted by the covered entity or its business partner must only be applicable to and used within the covered entity to be considered health care operations. Others questioned whether such studies or research performed internal to a covered entity are “health care operations” even if generalizable results may be produced.

Response: We agree that some health care operations have many of the characteristics of research studies and in the NPRM asked for comments on how to make this distinction. While a clear answer was not suggested in any of the comments, the comments generally together with our fact finding lead to the provisions in the final rule. The distinction between health care operations and research rests on whether the primary purpose of the study is to produce “generalizable knowledge.” We have modified the definition of health care operations to include “quality assessment and improvement activities, including outcomes evaluation and development of clinical guidelines, provided that the obtaining of generalizable knowledge is not the primary purpose of any studies resulting from such activities.” If the primary purpose of the activity is to produce generalizable knowledge, the activity fits within this rule's definition of “research” and the covered entity must comply with §§ 164.508 or 164.512, including obtaining an authorization or the approval of an institutional review board or privacy board. If not and the activity otherwise

meets the definition of health care operations, the activity is not research and may be conducted under the health care operations provisions of this rule.

In some instances, the primary purpose of the activity may change as preliminary results are analyzed. An activity that was initiated as an internal outcomes evaluation may produce information that the covered entity wants to generalize. If the purpose of a study changes and the covered entity does intend to generalize the results, the covered entity should document the change in status of the activity to establish that they did not violate the requirements of this rule. (See definition of “research,” below, for further information on the distinction between “research” and “health care operations.”)

We note that the difficulty in determining when an activity is for the internal operations of an entity and when it is a research activity is a long-standing issue in the industry. The variation among commenters' views is one of many indications that, today, there is not consensus on how to draw this line. We do not resolve the larger issue here, but instead provide requirements specific to the information covered by this rule.

Comment: Several commenters asked that disease management and disability management activities be explicitly included in the definition of health care operations. Many health plans asserted that they would not be able to provide disease management, wellness, and health promotion activities if the activity were solely captured in the rule's definition of “treatment.” They also expressed concern that “treatment” usually applies to an individual, not to a population, as is the practice for disease management.

Response: We were unable to find generally accepted definitions of the terms “disease management” and “disability management.” Rather than rely on this label, we include many of the functions often included in discussions of disease management in this definition or in the definition of treatment, and modify both definitions to address the commenters' concerns. For example, we have revised the definition of health care operations to include population-based activities related to improving health or reducing health care costs. This topic is discussed further in the comment responses regarding the definition of “treatment,” below.

Comment: Several commenters urged that the definition of health care operations be illustrative and flexible, rather than structured in the form of a list as in the proposed rule. They believed it would be impossible to identify all the activities that constitute health care operations. Commenters representing health plans were concerned that the “static” nature of the definition would stifle innovation and could not reflect the new functions that health plans may develop in the future that benefit consumers, improve quality, and reduce costs. Other commenters, expressed support for the approach taken in the proposed rule, but felt the list was too broad.

Response: In the final rule, we revise the proposed definition of health care operations to broaden the list of activities included, but we do not agree with the comments asking for an illustrative definition rather than an inclusive list. Instead, we describe the activities that constitute health care operations in broad terms and categories, such as “quality assessment” and “business planning and development.” We believe the use of broadly stated categories will allow industry innovation, but without the privacy risks entailed in an illustrative approach.

Comment: Several commenters noted that utilization review and internal quality review should be included in the definition. They pointed out that both of these activities were discussed in the preamble to the proposed rule but were not incorporated into the regulation text. ***82609**

Response: We agree and have modified the regulation text to incorporate quality assessment and improvement activities, including the development of clinical guidelines and protocol development.

Comment: Several commenters stated that the proposal did not provide sufficient guidance regarding compiling and analyzing information in anticipation of or for use in legal proceedings. In particular, they raised concerns about the lack of specificity as to when "anticipation" would be triggered.

Response: We agree that this provision was confusing and have replaced it with a broader reference to conducting or arranging for legal services generally.

Comment: Hospital representatives pointed out the pressure on health care facilities to improve cost efficiencies, make cost-effectiveness studies, and benchmark essential health care operations. They emphasized that such activities often use identifiable patient information, although the products of the analyses usually do not contain identifiable health information. Commenters representing state hospital associations pointed out that they routinely receive protected health information from hospitals for analyses that are used by member hospitals for such things as quality of care benchmark comparisons, market share analysis, determining physician utilization of hospital resources, and charge comparisons.

Response: We have expanded the definition of health care operations to include use and disclosure of protected health information for the important functions noted by these commenters. We also allow a covered entity to engage a business associate to provide data aggregation services. See § 164.504(e).

Comment: Several commenters argued that many activities that are integral to the day-to-day operations of a health plan have not been included in the definition. Examples provided by the commenters include: issuing plan identification cards, customer service, computer maintenance, storage and back-up of radiologic images, and the installation and servicing of medical equipment or computer systems.

Response: We agree with the commenters that there are activities not directly part of treatment or payment that are more closely associated with the administrative or clerical functions of the plan or provider that need to be included in the definition. To include such activities in the definition of health care operations, we eliminate the requirement that health care operations be directly related to treatment and payment, and we add to this definition the new categories of business management (including general administrative activities) and business planning activities.

Comment: One commenter asked for clarification on whether cost-related analyses could also be done by providers as well as health plans.

Response: Health care operations, including business management functions, are not limited to health plans. Any covered entity can perform health care operations.

Comment: One commenter stated that the proposed rule did not address what happens to records when a covered entity is sold or merged with another entity.

Response: We agree and add to the definition of health care operations disclosures of protected health information for due diligence to a covered entity that is a potential successor in interest. This provision includes disclosures pursuant to the sale of a covered entity's business as a going concern, mergers, acquisitions, consolidations, and other similar types of corporate restructuring between covered entities, including a division of a covered entity, and to an entity that is not a covered entity but will become a covered entity if the reorganization or sale is completed. Other types of sales of assets, or disclosures to organizations that are not and would not become covered entities, are not included in the definition of health care operations and could only occur if the covered entity obtained valid authorization for such disclosure in accordance with § 164.508 or if the disclosure is otherwise permitted under this rule.

Once a covered entity is sold or merged with another covered entity, the successor in interest becomes responsible for complying with this regulation with respect to the transferred information.

Comment: Several commenters expressed concern that the definition of health care operations failed to include the use of protected health information for the underwriting of new health care policies and took issue with the exclusion of uses and disclosures of protected health information of prospective enrollees. They expressed the concern that limiting health care operations to the underwriting and rating of existing members places a health plan in the position of not being able to evaluate prudently and underwrite a consumer's health care risk.

Response: We agree that covered entities should be able to use the protected health information of prospective enrollees to underwrite and rate new business and change the definition of health care operations accordingly. The definition of health care operations below includes underwriting, premium rating, and other activities related to the creation of a contract of health insurance.

Comment: Several commenters stated that group health plans needed to be able to use and disclose protected health information for purposes of soliciting a contract with a new carrier and rate setting.

Response: We agree and add "activities relating to the * * * replacement of a contract of insurance" to cover such disclosures. See § 164.504 for the rules for plan sponsors of group health plans to obtain such information.

Comment: Commenters from the business community supported our recognition of the importance of financial risk transfer mechanisms in the health care marketplace by including "reinsurance" in the definition of health care operations. However, they stated that the term "reinsurance" alone was not adequate to capture "stop-loss insurance" (also referred to as excess of loss insurance), another type of risk transfer insurance.

Response: We agree with the commenters that stop-loss and excess of loss insurance are functionally equivalent to reinsurance and add these to the definition of health care operations.

Comment: Commenters from the employer community explained that there is a trend among employers to contract with a single insurer for all their insurance needs (health, disability, workers' compensation). They stated that in these integrated systems, employee health information is shared among the various programs in the system. The commenters believed the existing definition poses obstacles for those employers utilizing an integrated health system because of the need to obtain authorizations before being permitted to use protected health information from the health plan to administer or audit their disability or workers' compensation plan.

Other commenters representing employers stated that some employers wanted to combine health information from different insurers and health plans providing employee benefits to their workforces, including its group health plan, workers' compensation insurers, and disability insurers, so that they could have more information in order to better manage the occurrences of disability and illness among their workforces. They expressed concern ***82610** that the proposed rule would not permit such sharing of information.

Response: While we agree that integrating health information from different benefit programs may produce efficiencies as well as benefits for individuals, the integration also raises significant privacy concerns, particularly if there are no safeguards on uses and disclosures from the integrated data. Under HIPAA, we do not have jurisdiction over many types of insurers that use health information, such as workers' compensation insurers or insurers providing disability income benefits, and we cannot address the extent to which they provide individually identifiable health information to a health plan, nor do we prohibit a health plan from receiving such information. Once a health plan receives identifiable health information, however, the information becomes protected and may only be used and disclosed as otherwise permitted by this rule.

We clarify, however, that a covered entity may provide data and statistical analyses for its customers as a health care operation, provided that it does not disclose protected health information in a way that would otherwise violate this rule. A group health

plan or health insurance issuer or HMO, or their business associate on their behalf, may perform such analyses for an employer customer and provide the results in de-identified form to the customer, using integrated data received from other insurers, as long as protected health information is not disclosed in violation of this rule. See the definition of "health care operations," § 164.501. If the employer sponsors more than one group health plan, or if its group health plan provides coverage through more than one health insurance issuer or HMO, the different covered entities may be an organized health care arrangement and be able to jointly participate in such an analysis as part of the health care operations of such organized health care arrangement. See the definitions of "health care operations" and "organized health care arrangement," § 164.501. We further clarify that a plan sponsor providing plan administration to a group health plan may participate in such an analysis, provided that the requirements of § 164.504(f) and other parts of this rule are met.

The results described above are the same whether the health information that is being combined is from separate insurers or from one entity that has a health component and also provides excepted benefits. See the discussion relating to health care components, § 164.504.

We note that under the arrangements described above, the final rule provides substantial flexibility to covered entities to provide general data and statistical analyses, resulting in the disclosure of de-identified information, to employers and other customers. An employer also may receive protected health information from a covered entity for any purpose, including those described in comment above, with the authorization of the individual. See § 164.508.

Comment: A number of commenters asserted that the proposed definition appeared to limit training and educational activities to that of health care professionals, students, and trainees. They asked that we expand the definition to include other education-related activities, such as continuing education for providers and training of non-health care professionals as needed for supporting treatment or payment.

Response: We agree with the commenters that the definition of health care operations was unnecessarily limiting with respect to educational activities and expand the definition of health care operations to include "conducting training programs in which students, trainees, or practitioners in areas of health care learn under supervision to practice or improve their skills as health care providers." We clarify that medical rounds are considered treatment, not health care operations.

Comment: A few commenters outlined the need to include the training of non-health care professionals, such as health data analysts, administrators, and computer programmers within the definition of health care operations. It was argued that, in many cases, these professionals perform functions which support treatment and payment and will need access to protected health information in order to carry out their responsibilities.

Response: We agree and expand the definition of health care operations to include training of non-health care professionals.

Comment: One commenter stated that the definition did not explicitly include physician credentialing and peer review.

Response: We have revised the definition to specifically include "licensing or credentialing activities." In addition, peer review activities are captured in the definition as reviewing the competence or qualifications of health care professionals and evaluating practitioner and provider performance.

Health Oversight Agency

Comment: Some commenters sought to have specific organizations defined as health oversight agencies. For example, some commenters asked that the regulation text, rather than the preamble, explicitly list state insurance departments as an example of health oversight agencies. Medical device manufacturers recommended expanding the definition to include government contractors such as coding committees, which provide data to HCFA to help the agency make reimbursement decisions.

One federal agency sought clarification that several of its sub-agencies were oversight agencies; it was concerned about its status in part because the agency fits into more than one of the categories of health oversight agency listed in the proposed rule.

Other commenters recommended expanding the definition of oversight agency to include private-sector accreditation organizations. One commenter recommended stating in the final rule that private companies providing information to insurers and employers are not included in the definition of health oversight agency.

Response: Because the range of health oversight agencies is so broad, we do not include specific examples in the definition. We include many examples in the preamble above and provide further clarity here.

As under the NPRM, state insurance departments are an example of a health oversight agency. A commenter concerned about state trauma registries did not describe the registries' activities or legal charters, so we cannot clarify whether such registries may be health oversight agencies. Government contractors such as coding committees, which provide data to HCFA to support payment processes, are not thereby health oversight agencies under this rule. We clarify that public agencies may fit into more than one category of health oversight agency.

The definition of health oversight agency does not include private-sector accreditation organizations. While their work can promote quality in the health care delivery system, private accreditation organizations are not authorized by law to oversee the health care system or government programs in which health information is necessary to determine eligibility or compliance, or to enforce civil rights laws for which health information is relevant. Under the final rule, we consider private accrediting groups to be performing a health care operations function for covered entities. Thus, disclosures to private accrediting organizations are ***82611** disclosures for health care operations, not for oversight purposes.

When they are performing accreditation activities for a covered entity, private accrediting organizations will meet the definition of business associate, and the covered entity must enter into a business associate contract with the accrediting organization in order to disclose protected health information. This is consistent with current practice; today, accrediting organizations perform their work pursuant to contracts with the accredited entity. This approach is also consistent with the recommendation by the Joint Commission on Accreditation of Healthcare Organizations and the National Committee for Quality Assurance, which stated in their report titled Protecting Personal Health Information: A Framework for Meeting the Challenges in a Managed Care Environment (1998) that “Oversight organizations, including accrediting bodies, states, and federal agencies, should include in their contracts terms that describe their responsibility to maintain the confidentiality of any personally identifiable health information that they review.”

We agree with the commenter who believed that private companies providing information to insurers and employers are not performing an oversight function; the definition of health oversight agency does not include such companies.

In developing and clarifying the definition of health oversight in the final rule, we seek to achieve a balance in accounting for the full range of activities that public agencies may undertake to perform their health oversight functions while establishing clear and appropriate boundaries on the definition so that it does not become a catch-all category that public and private agencies could use to justify any request for information.

Individual

Comment: A few commenters stated that foreign military and diplomatic personnel, and their dependents, and overseas foreign national beneficiaries, should not be excluded from the definition of “individual.”

Response: We agree with concerns stated by commenters and eliminate these exclusions from the definition of “individual” in the final rule. Special rules for use and disclosure of protected health information about foreign military personnel are stated in § 164.512(k). Under the final rule, protected health information about diplomatic personnel is not accorded special treatment. While the exclusion of overseas foreign national beneficiaries has been deleted from the definition of “individual,” we have

revised § 164.500 to indicate that the rule does not apply to the Department of Defense or other federal agencies or non-governmental organizations acting on its behalf when providing health care to overseas foreign national beneficiaries. This means that the rule will not cover any health information created incident to the provision of health care to foreign nationals overseas by U.S. sponsored missions or operations. (See § 164.500 and its corresponding preamble for details and the rationale for this policy.)

Comment: Several commenters expressed concern about the interrelationship of the definition of "individual" and the two year privacy protection for deceased persons.

Response: In the final rule, we eliminate the two year limit on privacy protection for protected health information about deceased individuals and require covered entities to comply with the requirements of the rule with respect to the protected health information of deceased individuals as long as they hold such information. See discussion under § 164.502.

Individually Identifiable Health Information

Comment: A number of commenters suggested that HHS revise the definitions of health information and individually identifiable health information to include consistent language in paragraph (1) of each respective definition. They observed that paragraph (1) of the definition of health information reads: "(1) Is created or received by a health care provider, health plan, public health authority, employer, life insurer, school or university, or health care clearinghouse * * *;" in contrast to paragraph (1) of the definition of individually identifiable health information, which reads: "(1) Is created by or received from a health care provider, health plan, employer, or health care clearinghouse * * *" [Emphasis added.]

Another commenter asked that we delete from the definition of health information, the words "health or" to make the definition more consistent with the definition of "health care," as well as the words "whether oral or."

Response: We define these terms in the final rule as they are defined by Congress in sections 1171(4) and 1171(6) of the Act, respectively. We have, however, changed the word "from" in the definition of "individually identifiable health information" to conform to the statute.

Comment: Several commenters urged that the definition of individually identifiable health information include information created or received by a researcher. They reasoned that it is important to ensure that researchers using personally identifiable health information are subject to federal privacy standards. They also stated that if information created by a school regarding the health status of its students could be labeled "health information," then information compiled by a clinical researcher regarding an individual also should be considered health information.

Response: We are restricted to the statutory limits of the terms. The Congress did not include information created or received by a researcher in either definition, and, consequently, we do not include such language in the rule's definitions.

Comment: Several commenters suggested modifying the definition of individually identifiable health information to state as a condition that the information provide a direct means of identifying the individual. They commented that the rule should support the need of those (e.g., researchers) who need "ready access to health information * * * that remains linkable to specific individuals."

Response: The Congress included in the statutory definition of individually identifiable health information the modifier "reasonable basis" when describing the condition for determining whether information can be used to identify the individual. Congress thus intended to go beyond "direct" identification and to encompass circumstances in which a reasonable likelihood of identification exists. Even after removing "direct" or "obvious" identifiers of information, a risk or probability of identification of the subject of the information may remain; in some instances, the risk will not be inconsequential. Thus, we agree with the Congress that "reasonable basis" is the appropriate standard to adequately protect the privacy of individuals' health information.

Comment: A number of commenters suggested that the Secretary eliminate the distinction between protected health information and individually identifiable health information. One commenter asserted that all individually identifiable health information should be protected. One commenter observed that the terms individually identifiable health information and protected health information are defined differently in the rule and requested clarification as to the precise scope of coverage of the standards. Another commenter stated ***82612** that the definition of individually identifiable health information includes "employer," whereas protected health information pertains only to covered entities for which employers are not included. The commenter argued that this was an "incongruity" between the definitions of individually identifiable health information and protected health information and recommended that we remove "employer" from the definition of individually identifiable health information.

Response: We define individually identifiable health information in the final rule generally as it is defined by Congress in section 1171(6) of the Act. Because "employer" is included in the statutory definition, we cannot accept the comment to remove the word "employer" from the regulatory definition.

We use the phrase 'protected health information' to distinguish between the individually identifiable health information that is used or disclosed by the entities that are subject to this rule and the entire universe of individually identifiable health information. 'Individually identifiable health information' as defined in the statute is not limited to health information used or disclosed by covered entities, so the qualifying phrase 'protected health information' is necessary to define that individually identifiable health information to which this rule applies.

Comment: One commenter noted that the definition of individually identifiable health information in the NPRM appeared to be the same definition used in the other HIPAA proposed rule, Security and Electronic Signature Standards (63 FR 43242). However, the commenter stated that the additional condition in the privacy NPRM, that protected health information is or has been electronically transmitted or electronically maintained by a covered entity and includes such information in any other form, appears to create potential disparity between the requirements of the two rules. The commenter questioned whether the provisions in proposed § 164.518(c) were an attempt to install similar security safeguards for such situations.

Response: The statutory definition of individually identifiable health information applies to the entire Administrative Simplification subtitle of HIPAA and, thus, was included in the proposed Security Standards. At this time, however, the final Security Standards have not been published, so the definition of protected health information is relevant only to HIPAA's privacy standards and is, therefore, included in subpart E of part 164 only. We clarify that the requirements in the proposed Security Standards are distinct and separate from the privacy safeguards promulgated in this final rule.

Comment: Several commenters expressed confusion and requested clarification as to what is considered health information or individually identifiable health information for purposes of the rule. For example, one commenter was concerned that information exists in collection agencies, credit bureaus, etc., which could be included under the proposed regulation but may or may not have been originally obtained by a covered entity. The commenter noted that generally this information is not clinical, but it could be inferred from the data that a health care provider provided a person or member of person's family with health care services. The commenter urged the Secretary to define more clearly what and when information is covered.

One commenter queried how a non-medical record keeper could tell when personal information is health information within the meaning of rule, e.g., when a worker asks for a low salt meal in a company cafeteria, when a travel voucher of an employee indicates that the traveler returned from an area that had an outbreak of fever, or when an airline passenger requests a wheel chair. It was suggested that the rule cover health information in the hands of schools, employers, and life insurers only when they receive individually identifiable health information from a covered entity or when they create it while providing treatment or making payment.

Response: This rule applies only to individually identifiable health information that is held by a covered entity. Credit bureaus, airlines, schools, and life insurers are not covered entities, so the information described in the above comments is not protected health information. Similarly, employers are not covered entities under the rule. Covered entities must comply with this

regulation in their health care capacity, not in their capacity as employers. For example, information in hospital personnel files about a nurses' sick leave is not protected health information under this rule.

Comment: One commenter recommended that the privacy of health information should relate to actual medical records. The commenter expressed concern about the definition's broadness and contended that applying prescriptive rules to information that health plans hold will not only delay processing of claims and coverage decisions, but ultimately affect the quality and cost of care for health care consumers.

Response: We disagree. Health information about individuals exists in many types of records, not just the formal medical record about the individual. Limiting the rule's protections to individually identifiable health information contained in medical records, rather than individually identifiable health information in any form, would omit a significant amount of individually identifiable health information, including much information in covered transactions.

Comment: One commenter voiced a need for a single standard for individually identifiable health information and disability and workers' compensation information; each category of information is located in their one electronic data base, but would be subjected to a different set of use and transmission rules.

Response: We agree that a uniform, comprehensive privacy standard is desirable. However, our authority under the HIPAA is limited to individually identifiable health information as it is defined in the statute. The legislative history of HIPAA makes clear that workers' compensation and disability benefits programs were not intended to be covered by the rule. Entities are of course free to apply the protections required by this rule to all health information they hold, including the excepted benefits information, if they wish to do so (for example, in order to reduce administrative burden).

Comment: Commenters recommended that the definition of individually identifiable health information not include demographic information that does not have any additional health, treatment, or payment information with it. Another commenter recommended that protected health information should not include demographic information at all.

Response: Congress explicitly included demographic information in the statutory definition of this term, so we include such language in our regulatory definition of it.

Comments: A number of commenters expressed concern about whether references to personal information about individuals, such as “John Doe is fit to work as a pipe fitter * * *” or “Jane Roe can stand no more than 2 hours * * *”, would be considered individually identifiable health information. They argued that such “fitness-to-work” and “fitness for duty” statements are not health care because they do not reveal the type of ***82613** information (such as the diagnosis) that is detrimental to an individual's privacy interest in the work environment.

Response: References to personal information such as those suggested by the commenters could be individually identifiable health information if the references were created or received by a health care provider, health plan, employer, or health care clearinghouse and they related to the past, present, or future physical or mental health or condition, the provision of health care to an individual, or the past, present, or future payment for the provision of health care to an individual. Although these fitness for duty statements may not reveal a diagnosis, they do relate to a present physical or mental condition of an individual because they describe the individual's capacity to perform the physical and mental requirements of a particular job at the time the statement is made (even though there may be other non-health-based qualifications for the job). If these statements were created or received by one of more of the entities described above, they would be individually identifiable health information.

Law Enforcement Official

Comment: Some commenters, particularly those representing health care providers, expressed concern that the proposed definition of “law enforcement official” could have allowed many government officials without health care oversight duties to obtain access to protected health information without patient consent.

Response: We do not intend for the definition of "law enforcement official" to be limited to officials with responsibilities directly related to health care. Law enforcement officials may need protected health information for investigations or prosecutions unrelated to health care, such as investigations of violent crime, criminal fraud, or crimes committed on the premises of health care providers. For these reasons, we believe it is not appropriate to limit the definition of "law enforcement official" to persons with responsibilities of oversight of the health care system.

Comment: A few commenters expressed concern that the proposed definition could include any county or municipal official, even those without traditional law enforcement training.

Response: We do not believe that determining training requirements for law enforcement officials is appropriately within the purview of this regulation; therefore, we do not make the changes that these commenters requested.

Comment: Some commenters, particularly those from the district attorney community, expressed general concern that the proposed definition of "law enforcement official" was too narrow to account for the variation in state interpretations of law enforcement officials' power. One group noted specifically that the proposed definition could have prevented prosecutors from gaining access to needed protected health information.

Response: We agree that protected health information may be needed by law enforcement officials for both investigations and prosecutions. We did not intend to exclude the prosecutorial function from the definition of "law enforcement official," and accordingly we modify the definition of law enforcement official to reflect their involvement in prosecuting cases. Specifically, in the final rule, we define law enforcement official as an official of any agency or authority of the United States, a state, a territory, a political subdivision of a state or territory, or an Indian tribe, who is empowered by law to: (1) Investigate or conduct an inquiry into a potential violation of law; or (2) prosecute or otherwise conduct a criminal, civil, or administrative proceeding arising from an alleged violation of law.

Comment: One commenter recommended making the definition of law enforcement official broad enough to encompass Medicaid program auditors, because some matters requiring civil or criminal law enforcement action are first identified through the audit process.

Response: We disagree. Program auditors may obtain protected health information necessary for their audit functions under the oversight provision of this regulation (§ 164.512(d)).

Comment: One commenter suggested that the proposed definition of "law enforcement official" could be construed as limited to circumstances in which an official "knows" that law has been violated. This commenter was concerned that, because individuals are presumed innocent and because many investigations, such as random audits, are opened without an agency knowing that there is a violation, the definition would not have allowed disclosure of protected health information for these purposes. The commenter recommended modifying the definition to include investigations into "whether" the law has been violated.

Response: We do not intend for lawful disclosures of protected health information for law enforcement purposes to be limited to those in which a law enforcement official knows that law has been violated. Accordingly, we revise the definition of "law enforcement official" to include investigations of "potential" violations of law.

Marketing

Comments related to "marketing" are addressed in the responses to comments regarding § 164.514(e).

Payment

Comment: One commenter urged that the Department not permit protected health information to be disclosed to a collection agency for collecting payment on a balance due on patient accounts. The commenter noted that, at best, such a disclosure would only require the patient's and/or insured's address and phone number.

Response: We disagree. A collection agency may require additional protected health information to investigate and assess payment disputes for the covered entity. For example, the collection agency may need to know what services the covered entity rendered in order to resolve disputes about amounts due. The information necessary may vary, depending on the nature of the dispute. Therefore we do not specify the information that may be used or disclosed for collection activities. The commenter's concern may be addressed by the minimum necessary requirements in § 164.514. Under those provisions, when a covered entity determines that a collection agency only requires limited information for its activities, it must make reasonable efforts to limit disclosure to that information.

Comment: A number of commenters supported retaining the expansive definition in the proposed rule so that current methods of administering the claims payment process would not be hindered by blocking access to protected health information.

Response: We agree and retain the proposed overall approach to the definition.

Comment: Some commenters argued that the definition of "payment" should be narrowly interpreted as applying only to the individual who is the subject of the information.

Response: We agree with the commenter and modify the definition to clarify that payment activities relate to the individual to whom health care is provided.

Comment: Another group of commenters asserted that the doctor-patient relationship was already being interfered with by the current practices of managed care. For example, it was argued that the definition expanded the ***82614** power of government and other third party "payors," turning them into controllers along with managed care companies. Others stated that activities provided for under the definition occur primarily to fulfill the administrative function of managed health plans and that an individual's privacy is lost when his or her individually identifiable health information is shared for administrative purposes.

Response: Activities we include in the definition of payment reflect core functions through which health care and health insurance services are funded. It would not be appropriate for a rule about health information privacy to hinder mechanisms by which health care is delivered and financed. We do not through this rule require any health care provider to disclose protected health information to governmental or other third party payors for the activities listed in the payment definition. Rather, we allow these activities to occur, subject to and consistent with the requirements of this rule.

Comment: Several commenters requested that we expand the definition to include "coordination of benefits" as a permissible activity.

Response: We agree and modify the definition accordingly.

Comment: A few commenters raised concerns that the use of "medical data processing" was too restrictive. It was suggested that a broader reference such as "health related" data processing would be more appropriate.

Response: We agree and modify the definition accordingly.

Comment: Some commenters suggested that the final rule needed to clarify that drug formulary administration activities are payment related activities.

Response: While we agree that uses and disclosures of protected health information for drug formulary administration and development are common and important activities, we believe these activities are better described as health care operations and that these activities come within that definition.

Comment: Commenters asked that the definition include calculation of prescription drug costs, drug discounts, and maximum allowable costs and copayments.

Response: Calculations of drug costs, discounts, or copayments are payment activities if performed with respect to a specific individual and are health care operations if performed in the aggregate for a group of individuals.

Comment: We were urged to specifically exclude "therapeutic substitution" from the definition.

Response: We reject this suggestion. While we understand that there are policy concerns regarding therapeutic substitution, those policy concerns are not primarily about privacy and thus are not appropriately addressed in this regulation.

Comment: A few commenters asked that patient assistance programs (PAPS) should be excluded from the definition of payment. Such programs are run by or on behalf of manufacturers and provide free or discounted medications to individuals who could not afford to purchase them. Commenters were concerned that including such activities in the definition of payment could harm these programs.

For example, a university school of pharmacy may operate an outreach program and serve as a clearinghouse for information on various pharmaceutical manufacturer PAPS. Under the program state residents can submit a simple application to the program (including medication regimen and financial information), which is reviewed by program pharmacists who study the eligibility criteria and/or directly call the manufacturer's program personnel to help evaluate eligibility for particular PAPS. The program provides written guidance to the prescribing physicians that includes a suggested approach for helping their indigent patients obtain the medications that they need and enrollment information for particular PAPS.

Response: We note that the concerns presented are not affected by definition of "payment." The application of this rule to patient assistance programs activities will depend on how the individual programs operate and are affected primarily by the definition of treatment. Each of these programs function differently, so it is not possible to state a blanket rule for whether and how the rule affects such programs.

Under the example provided, the physician who contacts the program on behalf of a patient is managing the patient's care. If the provider is also a covered entity, he or she would be permitted to make such a "treatment" disclosure of protected health information if a general consent had been obtained from the patient. Depending on the particular facts, the manufacturer, by providing the prescription drugs for an individual, could also be providing health care under this rule. Even so, however, the manufacturer may or may not be a covered entity, depending on whether or not it engages in any of the standard electronic transactions (See the definition of a covered entity). It also may be an indirect treatment provider, since it may be providing the product through another provider, not directly to the patient. In this example, the relevant disclosures of protected health information by any covered health care provider with a direct treatment relationship with the patient would be permitted subject to the general consent requirements of § 164.506.

Whether and how this rule affects the school of pharmacy is equally dependent on the specific facts. For example, if the school merely provides a patient or a physician with the name of a manufacturer and a contact phone number, it would not be functioning as a health care provider and would not be subject to the rule. However, if the school is more involved in the care of the individual, its activities could come in within the definition of "health care provider" under this rule.

Comment: Commenters pointed out that drugs may or may not be "covered" under a plan. Individuals, on the other hand, may or may not be "eligible" for benefits under a plan. The definition should incorporate both terms to clarify that determinations of both coverage and eligibility are payment activities.

Response: We agree and modify the rule to include "eligibility".

Comment: Several commenters urged that "concurrent and retrospective review" were significant utilization review activities and should be incorporated.

Response: We agree and modify the definition accordingly.

Comment: Commenters noted that the proposed rule was not clear as to whether protected health information could be used to resolve disputes over coverage, including appeals or complaints regarding quality of care.

Response: We modify the definition of payment to include resolution of payment and coverage disputes; the final definition of payment includes "the adjudication * * * of health benefit claims." The other examples provided by commenters, such as arranging, conducting, or assistance with primary and appellate level review of enrollee coverage appeals, also fall within the scope of adjudication of health benefits claims. Uses and disclosures of protected health information to resolve disputes over quality of care may be made under the definition of "health care operations" (see above).

Comment: Some commenters suggested that if an activity falls within the scope of payment it should not be considered marketing. Commenters supported an approach that would bar such an activity from being construed as "marketing" even if performing that ***82615** activity would result in financial gain to the covered entity.

Response: We agree that the proposed rule did not clearly define "marketing," leaving commenters to be concerned about whether payment activities that result in financial gain might be considered marketing. In the final rule we add a definition of marketing and clarify when certain activities that would otherwise fall within that definition can be accomplished without authorization. We believe that these changes will clarify the distinction between marketing and payment and address the concerns raised by commenters.

Comment: Commenters asserted that HHS should not include long-term care insurance within the definition of "health plan." If they are included, the commenters argued that the definition of payment must be modified to reflect the activities necessary to support the payment of long-term care insurance claims. As proposed, commenters argued that the definition of payment would not permit long term care insurers to use and disclose protected health information without authorization to perform functions that are "compatible with and directly relate to * * * payment" of claims submitted under long term care policies.

Response: Long-term care policies, except for nursing home fixed-indemnity policies, are defined as health plans by the statute (see definition of "health plan," above). We disagree with the assertion that the definition of payment does not permit long term care insurers to undertake these necessary activities. Processing of premium payments, claims administration, and other activities suggested for inclusion by the commenters are covered by the definition. The rule permits protected health information to be used or disclosed by a health plan to determine or fulfill its responsibility for provision of benefits under the health plan.

Comment: Some commenters argued that the definition needs to be expanded to include the functions of obtaining stop-loss and ceding reinsurance.

Response: We agree that use and disclosure of protected health information for these activities should be permitted without authorization, but have included them under health care operation rather than payment.

Comment: Commenters asked that the definition be modified to include collection of accounts receivable or outstanding accounts. Commenters raised concern that the proposed rule, without changes, might unintentionally prevent the flow of information between medical providers and debt collectors.

Response: We agree that the proposed definition of payment did not explicitly provide for "collection activities" and that this oversight might have impeded a covered entity's debt collection efforts. We modify the regulatory text to add "collection activities."

Comment: The preamble should clarify that self-insured group health and workers' compensation plans are not covered entities or business partners.

Response: The statutory definition of health plan does not include workers' compensation products. See the discussion of "health plan" under § 160.103 above.

Comment: Certain commenters explained that third party administrators usually communicate with employees through Explanation of Benefit (EOB) reports on behalf of their dependents (including those who might not be minor children). Thus, the employee might be apprised of the medical encounters of his or her dependents but not of medical diagnoses unless there is an over-riding reason, such as a child suspected of drug abuse due to multiple prescriptions. The commenters urged that the current claim processing procedures be allowed to continue.

Response: We agree. We interpret the definition of payment and, in particular the term "claims management," to include such disclosures of protected health information.

Comment: One private company noted that pursuant to the proposed Transactions Rule standard for payment and remittance advice, the ASC X12N 835 can be used to make a payment, send a remittance advice, or make a payment and send remittance advice by a health care payor and a health care provider, either directly or through a designated financial institution. Because a remittance advice includes diagnostic or treatment information, several private companies and a few public agencies believed that the proposed Transactions Rule conflicted with the proposed privacy rule. Two health plans requested guidance as to whether, pursuant to the ASC X12N 835 implementation guide, remittance advice information is considered "required" or "situational." They sought guidance on whether covered entities could include benefits information in payment of claims and transfer of remittance information.

One commenter asserted that if the transmission of certain protected health information were prohibited, health plans may be required to strip remittance advice information from the ASC X12N 835 when making health care payments. It recommended modifying the proposed rule to allow covered entities to provide banks or financial institutions with the data specified in any transaction set mandated under the Transactions Rule for health care claims payment.

Similarly, a private company and a state health data organization recommended broadening the scope of permissible disclosures pursuant to the banking section to include integrated claims processing information, as contained in the ASC X12N 835 and proposed for adoption in the proposed Transactions Rule; this transaction standard includes diagnostic and treatment information. The company argued that inclusion of diagnostic and treatment information in the data transmitted in claims processing was necessary for comprehensive and efficient integration in the provider's patient accounting system of data corresponding with payment that financial institutions credit to the provider's account.

A state health data organization recommended applying these rules to financial institutions that process electronic remittance advice pursuant to the Transactions Rule.

Response: The Transactions Rule was published August 17, 2000, after the issuance of the privacy proposed rule. As noted by the commenters, the ASC X12N 835 we adopted as the "Health Care Payment and Remittance Advice" standard in the

Transactions Rule has two parts. They are the electronic funds transfer (EFT) and the electronic remittance advice (ERA). The EFT part is optional and is the mechanism that payors use to electronically instruct one financial institution to move money from one account to another at the same or at another financial institution. The EFT includes information about the payor, the payee, the amount, the payment method, and a reassociation trace number. Since the EFT is used to initiate the transfer of funds between the accounts of two organizations, typically a payor to a provider, it includes no individually identifiable health information, not even the names of the patients whose claims are being paid. The funds transfer information may also be transmitted manually (by check) or by a variety of other electronic means, including various formats of electronic transactions sent through a payment network, such as the Automated Clearing House (ACH) Network.

The ERA, on the other hand, contains specific information about the patients and the medical procedures for which ***82616** the money is being paid and is used to update the accounts receivable system of the provider. This information is always needed to complete a standard Health Care Payment and Remittance Advice transaction, but is never needed for the funds transfer activity of the financial institution. The only information the two parts of this transaction have in common is the reassociation trace number.

Under the ASC X12N 835 standard, the ERA may be transmitted alone, directly from the health plan to the health care provider and the reassociation trace number is used by the provider to match the ERA information with a specific payment conducted in some other way (e.g., EFT or paper check). The standard also allows the EFT to be transmitted alone, directly to the financial institution that will initiate the payment. It also allows both parts to be transmitted together, even though the intended recipients of the two parts are different (the financial institution and the provider). For example, this would be done when the parties agree to use the ACH system to carry the ERA through the provider's bank to the provider when it is more efficient than sending the ERA separately through a different electronic medium.

Similarly, the ASC X12N 820 standard for premium payments has two parts, an EFT part (identical to that of the 835) and a premium data part containing identity and health information about the individuals for whom health insurance premiums are being paid.

The transmission of both parts of the standards are payment activities under this rule, and permitted subject to certain restrictions. Because a financial institution does not require the remittance advice or premium data parts to conduct funds transfers, disclosure of those parts by a covered entity to it (absent a business associate arrangement to use the information to conduct other activities) would be a violation of this rule.

We note that additional requirements may be imposed by the final Security Rule. Under the proposed Security Rule, the ACH system and similar systems would have been considered “open networks” because transmissions flow unpredictably through and become available to member institutions who are not party to any business associate agreements (in a way similar to the internet). The proposed Security Rule would require any protected health information transferred through the ACH or similar system to be encrypted.

Comment: A few commenters noted the Gramm-Leach-Bliley (GLB) Act (Pub. L. 106-102) allows financial holding companies to engage in a variety of business activities, such as insurance and securities, beyond traditional banking activities. Because the term “banking” may take on broader meaning in light of these changes, the commenter recommended modifying the proposed rule to state that disclosure of diagnostic and treatment information to banks along with payment information would constitute a violation of the rule. Specifically, the organization recommended clarifying in the final rule that the provisions included in the proposed section on banking and payment processes (proposed § 164.510(i)) govern payment processes only and that all activities of financial institutions that did not relate directly to payment processes must be conducted through business partner contracts. Furthermore, this group recommended clarifying that if financial institutions act as payors, they will be covered entities under the rule.

Response: We recognize that implementation of the GLB Act will expand significantly the scope of activities in which financial holding companies engage. However, unless a financial institution also meets the definition of a "covered entity," it cannot be a covered entity under this rule.

We agree with the commenters that disclosure of diagnostic and specific treatment information to financial institutions for many banking and funds processing purposes may not be consistent with the minimum necessary requirements of this final rule. We also agree with the commenters that financial institutions are business associates if they receive protected health information when they engage in activities other than funds processing for covered entities. For example, if a health care provider contracts with a financial institution to conduct "back office" billing and accounts receivable activities, we require the provider to enter into a business associate contract with the institution.

Comment: Two commenters expressed support for the proposed rule's approach to disclosure for banking and payment processes. On the other hand, many other commenters were opposed to disclosure of protected health information without authorization to banks. One commenter said that no financial institution should have individually identifiable health information for any reason, and it said there were technological means for separating identity from information necessary for financial transactions. Some commenters believed that implementation of the proposed rule's banking provisions could lead banks to deny loans on the basis of individuals' health information.

Response: We seek to achieve a balance between protecting patient privacy and facilitating the efficient operation of the health care system. While we agree that financial institutions should not have access to extensive information about individuals' health, we recognize that even the minimal information required for processing of payments may effectively reveal a patient's health condition; for example, the fact that a person has written a check to a provider suggests that services were rendered to the person or a family member. Requiring authorization for disclosure of protected health information to a financial institution in order to process every payment transaction in the health care system would make it difficult, if not impossible, for the health care system to operate effectively. See also discussion of section 1179 of the Act above.

Comment: Under the proposed rule, covered entities could have disclosed the following information without consent to financial institutions for the purpose of processing payments: (1) The account holder's name and address; (2) the payor or provider's name and address; (3) the amount of the charge for health services; (4) the date on which services were rendered; (5) the expiration date for the payment mechanism, if applicable (e.g., credit card expiration date); and (6) the individual's signature. The proposed rule solicited comments on whether additional data elements would be necessary to process payment transactions from patients to covered entities.

One commenter believed that it was unnecessary to include this list in the final rule, because information that could have been disclosed under the proposed minimum necessary rule would have been sufficient to process banking and payment information. Another private company said that its extensive payment systems experience indicated that we should avoid attempts to enumerate a list of information allowed to be disclosed for banking and payment processing. Furthermore, the commenter said, the proposed rule's list of information allowed to be disclosed was not sufficient to perform the range of activities necessary for the operation of modern electronic payment systems. Finally, the commenter said, inclusion of specific data elements allowed to be ***82617** disclosed for banking and payment processes rule would stifle innovation in continually evolving payment systems. Thus, the commenter recommended that in the final rule, we eliminate the minimum necessary requirement for banking and payment processing and that we do not include a list of specific types of information allowed to be disclosed for banking and payment processes.

On the other hand, several other commenters supported applying the minimum necessary standard to covered entities' disclosures to financial institutions for payment processing. In addition, these groups said that because financial institutions are not covered entities under the proposed rule, they urged Congress to enact comprehensive privacy legislation to limit financial institutions' use and re-disclosure of the minimally necessary protected health information they could receive under the proposed rule. Several of these commenters said that, in light of the increased ability to manipulate data electronically, they were concerned

that financial institutions could use the minimal protected health information they received for making financial decisions. For example, one of these commenters said that a financial institution could identify an individual who had paid for treatment of domestic violence injuries and subsequently could deny the individual a mortgage based on that information.

Response: We agree with the commenters who were concerned that a finite list of information could hamper systems innovation, and we eliminate the proposed list of data items. However, we disagree with the commenters who argued that the requirement for minimum necessary disclosures not apply to disclosures to financial institution or for payment activities. They presented no persuasive reasons why these disclosures differ from others to which the standard applies, nor did they suggest alternative means of protecting individuals' privacy. Further, with elimination of the proposed list of items that may be disclosed, it will be necessary to rely on the minimum necessary disclosure requirement to ensure that disclosures for payment purposes do not include information unnecessary for that purposes. In practice, the following is the information that generally will be needed: the name and address of the individual; the name and address of the payor or provider; the amount of the charge for health services; the date on which health services were rendered; the expiration date for the payment mechanism, if applicable (i.e., credit card expiration date); the individual's signature; and relevant identification and account numbers.

Comment: One commenter said that the minimum necessary standard would be impossible to implement with respect to information provided on its standard payment claim, which, it said, was used by pharmacies for concurrent drug utilization review and that was expected to be adopted by HHS as the national pharmacy payment claim.

Two other commenters also recommended clarifying in the final rule that pharmacy benefit cards are not considered a type of “other payment card” pursuant to the rule's provisions governing payment processes. These commenters were concerned that if pharmacy benefit cards were covered by the rule's payment processing provisions, their payment claim, which they said was expected to be adopted by HHS as the national pharmacy payment claim, may have to be modified to comply with the minimum necessary standard that would have been required pursuant to proposed § 164.510(i) on banking and payment processes. One of these commenters noted that its payment claim facilitates concurrent drug utilization review, which was mandated by Congress pursuant to the Omnibus Budget Reconciliation Act of 1990 and which creates the real-time ability for pharmacies to gain access to information that may be necessary to meet requirements of this and similar state laws. The commenter said that information on its standard payment claim may include information that could be used to provide professional pharmacy services, such as compliance, disease management, and outcomes programs. The commenter opposed restricting such information by applying the minimum necessary standard.

Response: We make an exception to the minimum necessary disclosure provision of this rule for the required and situational data elements of the standard transactions adopted in the Transactions Rule, because those elements were agreed to through the ANSI-accredited consensus development process. The minimum necessary requirements do apply to optional elements in such standard transactions, because industry consensus has not resulted in precise and unambiguous situation specific language to describe their usage. This is particularly relevant to the NCPDP standards for retail pharmacy transactions referenced by these commenters, in which the current standard leaves most fields optional. For this reason, we do not accept this suggestion.

The term ‘payment card’ was intended to apply to a debit or credit card used to initiate payment transactions with a financial institution. We clarify that pharmacy benefit cards, as well as other health benefit cards, are used for identification of individual, plan, and benefits and do not qualify as “other payment cards.”

Comment: Two commenters asked the following questions regarding the banking provisions of the proposed rule: (1) Does the proposed regulation stipulate that disclosures to banks and financial institutions can occur only once a patient has presented a check or credit card to the provider, or pursuant to a standing authorization?; and (2) Does the proposed rule ban disclosure of diagnostic or other related detailed payment information to financial institutions?

Response: We do not ban disclosure of diagnostic information to financial institutions, because some such information may be evident simply from the name of the payee (e.g., when payment is made to a substance abuse clinic). This type of disclosure,

however, is permitted only when reasonably necessary for the transaction (see requirements for minimum necessary disclosure of protected health information, in § 164.502 and § 164.514).

Similarly, we do not stipulate that such disclosure may be made only once a patient has presented a check or credit card, because some covered entities hire financial institutions to perform services such as management of accounts receivables and other back office functions. In providing such services to covered entities, the financial institution will need access to protected health information. (In this situation, the disclosure will typically be made under a business associate arrangement that includes provisions for protection of the information.)

Comment: One commenter was concerned that the proposed rule's section on financial institutions, when considered in conjunction with the proposed definition of "protected health information," could have been construed as making covered entities' disclosures of consumer payment history information to consumer reporting agencies subject to the rule. It noted that covered entities' reporting of payment history information to consumer reporting agencies was not explicitly covered by the proposed rule's provisions regarding disclosure of protected health information without authorization. It was also concerned that the proposed rule's minimum necessary standard could have been interpreted to ***82618** prevent covered entities and their business partners from disclosing appropriate and complete information to consumer reporting agencies. As a result, it said, consumer reporting agencies might not be able to compile complete consumer reports, thus potentially creating an inaccurate picture of a consumer's credit history that could be used to make future credit decisions about the individual.

Furthermore, this commenter said, the proposed rule could have been interpreted to apply to any information disclosed to consumer reporting agencies, thus creating the possibility for conflicts between the rule's requirements and those of the Fair Credit Reporting Act. They indicated that areas of potential overlap included: limits on subsequent disclosures; individual access rights; safeguards; and notice requirements.

Response: We have added to the definition of "payment" disclosure of certain information to consumer reporting agencies. With respect to the remaining concerns, this rule does not apply to consumer reporting agencies if they are not covered entities.

Comment: Several commenters recommended prohibiting disclosure of psychotherapy notes under this provision and under all of the sections governing disclosure without consent for national priority purposes.

Response: We agree that psychotherapy notes should not be disclosed without authorization for payment purposes, and the final rule does not allow such disclosure. See the discussion under § 164.508.

Protected Health Information

Comment: An overwhelmingly large number of commenters urged the Secretary to expand privacy protection to all individually identifiable health information, regardless of form, held or transmitted by a covered entity. Commenters provided many arguments in support of their position. They asserted that expanding the scope of covered information under the rule would increase patient confidence in their health care providers and the health care system in general. Commenters stated that patients may not seek care or honestly discuss their health conditions with providers if they do not believe that all of their health information is confidential. In particular, many suggested that this fear would be particularly strong with certain classes of patients, such as persons with disabilities, who may be concerned about potential discrimination, embarrassment or stigmatization, or domestic violence victims, who may hide the real cause of their injuries.

In addition, commenters felt that a more uniform standard that covered all records would reduce the complexity, burden, cost, and enforcement problems that would result from the NPRM's proposal to treat electronic and non-electronic records differently. Specifically, they suggested that such a standard would eliminate any confusion regarding how to treat mixed records (paper records that include information that has been stored or transmitted electronically) and would eliminate the need for health care providers to keep track of which portions of a paper record have been (or will be) stored or transmitted electronically, and which are not. Many of these commenters argued that limiting the definition to information that is or has at one time been

electronic would result in different protections for electronic and paper records, which they believe would be unwarranted and give consumers a false sense of security. Other comments argued that the proposed definition would cause confusion for providers and patients and would likely cause difficulties in claims processing. Many others complained about the difficulty of determining whether information has been maintained or transmitted electronically. Some asked us to explicitly list the electronic functions that are intended to be excluded, such as voice mail, fax, etc. It was also recommended that the definitions of "electronic transmission" and "electronic maintenance" be deleted. It was stated that the rule may apply to many medical devices that are regulated by the FDA. A commenter also asserted that the proposal's definition was technically flawed in that computers are also involved in analog electronic transmissions such as faxes, telephone, etc., which is not the intent of the language. Many commenters argued that limiting the definition to information that has been electronic would create a significant administrative burden, because covered entities would have to figure out how to apply the rule to some but not all information.

Others argued that covering all individually identifiable health information would eliminate any disincentives for covered entities to convert from paper to computerized record systems. These commenters asserted that under the proposed limited coverage, contrary to the intent of HIPAA's administrative simplification standards, providers would avoid converting paper records into computerized systems in order to bypass the provisions of the regulation. They argued that treating all records the same is consistent with the goal of increasing the efficiency of the administration of health care services.

Lastly, in the NPRM, we explained that while we chose not to extend our regulatory coverage to all records, we did have the authority to do so. Several commenters agreed with our interpretation of the statute and our authority and reiterated such statements in arguing that we should expand the scope of the rule in this regard.

Response: We find these commenters' arguments persuasive and extend protections to individually identifiable health information transmitted or maintained by a covered entity in any form (subject to the exception for "education records" governed by FERPA and records described at 20 U.S.C. 1232g(a)(4)(B)(iv)). We do so for the reasons described by the commenters and in our NPRM, as well as because we believe that the approach in the final rule creates a logical, consistent system of protections that recognizes the dynamic nature of health information use and disclosure in a continually shifting health care environment. Rules that are specific to certain formats or media, such as "electronic" or "paper," cannot address the privacy threats resulting from evolving forms of data capture and transmission or from the transfer of the information from one form to another. This approach avoids the somewhat artificial boundary issues that stem from defining what is and is not electronic.

In addition, we have reevaluated our reasons for not extending privacy protections to all paper records in the NPRM and after review of comments believe such justifications to be less compelling than we originally thought. For example, in the NPRM, we explained that we chose not to cover all paper records in order to focus on the public concerns about health information confidentiality in electronic communications, and out of concern that the potential additional burden of covering all records may not be justified because of the lower privacy risks presented by records that are in paper form only. As discussed above however, a great many commenters asserted that dealing with a mixture of protected and non-protected records is more burdensome, and that public concerns over health information confidentiality are not at all limited to electronic communications.

We note that medical devices in and of themselves, for example, pacemakers, are not protected health information for purposes of this regulation. However, information in or from the device may ***82619** be protected health information to the extent that it otherwise meets the definition.

Comment: Numerous commenters argued that the proposed coverage of any information other than that which is transmitted electronically and/or in a HIPAA transaction exceeds the Secretary's authority under section 264(c)(1) of HIPAA. The principal argument was that the initial language in section 264(c)(1) ("If language governing standards with respect to the privacy of individually identifiable health information transmitted in connection with the transactions described in section 1173(a) of the Social Security Act * * * is not enacted by [August 21, 1999], the Secretary * * * shall promulgate final regulations containing such standards* * *") limits the privacy standards to "information transmitted in connection with the [HIPAA] transactions." The precise argument made by some commenters was that the grant of authority is contained in the words "such standards,"

and that the referent of that phrase was "standards with respect to the privacy of individually identifiable health information transmitted in connection with the transactions described in section 1173(a)* * *".

Commenters also argued that this limitation on the Secretary's authority is discernible from the statutory purpose statement at section 261 of HIPAA, from the title to section 1173(a) ("Standards to Enable Electronic Exchange"), and from various statements in the legislative history, such as the statement in the Conference Report that the "Secretary would be required to establish standards and modifications to such standards regarding the privacy of individually identifiable health information that is in the health information network." H. Rep. No. 104-736,104th Cong., 2d Sess., at 265. It was also argued that extension of coverage beyond the HIPAA transactions would be inconsistent with the underlying statutory trade-off between facilitating accessibility of information in the electronic transactions for which standards are adopted under section 1173(a) and protecting that information through the privacy standards.

Other commenters argued more generally that the Secretary's authority was limited to information in electronic form only, not information in any other form. These comments tended to focus on the statutory concern with regulating transactions in electronic form and argued that there was no need to have the privacy standards apply to information in paper form, because there is significantly less risk of breach of privacy with respect to such information.

The primary justifications provided by commenters for restricting the scope of covered individually identifiable health information under the regulation were that such an approach would reduce the complexity, burden, cost, and enforcement problems that would result from a rule that treats electronic and non-electronic records differently; would appropriately limit the rule's focus to the security risks that are inherent in electronic transmission or maintenance of individually identifiable health information; and would conform these provisions of the rule more closely with their interpretation of the HIPAA statutory language.

Response: We disagree with these commenters. We believe that restricting the scope of covered information under the rule consistent with any of the comments described above would generate a number of policy concerns. Any restriction in the application of privacy protections based on the media used to maintain or transmit the information is by definition arbitrary, unrelated to the potential use or disclosure of the information itself and therefore not responsive to actual privacy risks. For example, information contained in a paper record may be scanned and transmitted worldwide almost as easily as the same information contained in an electronic claims transaction, but would potentially not be protected.

In addition, application of the rule to only the standard transactions would leave large gaps in the amount of health information covered. This limitation would be particularly harmful for information used and disclosed by health care providers, who are likely to maintain a great deal of information never contained in a transaction.

We disagree with the arguments that the Secretary lacks legal authority to cover all individually identifiable health information transmitted or maintained by covered entities. The arguments raised by these comments have two component parts: (1) That the Secretary's authority is limited by form, to individually identifiable health information in electronic form only; and (2) that the Secretary's authority is limited by content, to individually identifiable health information that is contained in what commenters generally termed the "HIPAA transactions," i.e., information contained in a transaction for which a standard has been adopted under section 1173(a) of the Act.

With respect to the issue of form, the statutory definition of "health information" at section 1171(4) of the Act defines such information as "any information, whether oral or recorded in any form or medium" (emphasis added) which is created or received by certain entities and relates to the health condition of an individual or the provision of health care to an individual (emphasis added). "Individually identifiable health information", as defined at section 1171(6) of the Act, is information that is created or received by a subset of the entities listed in the definition of "health information", relates to the same subjects as "health information," and is, in addition, individually identifiable. Thus, "individually identifiable health information" is, as the term itself implies, a subset of "health information." As "health information," "individually identifiable health information"

means, among other things, information that is "oral or recorded in any form or medium." Therefore, the statute does not limit "individually identifiable health information" to information that is in electronic form only.

With respect to the issue of content, the limitation of the Secretary's authority to information in HIPAA transactions under section 264(c)(1) is more apparent than real. While the first sentence of section 264(c)(1) may be read as limiting the regulations to standards with respect to the privacy of individually identifiable health information "transmitted in connection with the [HIPAA] transactions," what that sentence in fact states is that the privacy regulations must "contain" such standards, not be limited to such standards. The first sentence thus sets a statutory minimum, first for Congress, then for the Secretary. The second sentence of section 264(c)(1) directs that the regulations "address at least the subjects in subsection (b) (of section 264)." Section 264(b), in turn, refers only to "individually identifiable health information", with no qualifying language, and refers back to subsection (a) of section 264, which is not limited to HIPAA transactions. Thus, the first and second sentences of section 264(c)(1) can be read as consistent with each other, in which case they direct the issuance of privacy standards with respect to individually identifiable health information. Alternatively, they can be read as ambiguous, in which case one must turn to the legislative history.

The legislative history of section 264 does not reflect the content limitation of the first sentence of section 264(c)(1). Rather, the Conference Report ***82620** summarizes this section as follows: "If Congress fails to enact privacy legislation, the Secretary is required to develop standards with respect to privacy of individually identifiable health information not later than 42 months from the date of enactment." Id., at 270. This language indicates that the overriding purpose of section 264(c)(1) was to postpone the Secretary's duty to issue privacy standards (which otherwise would have been controlled by the time limits at section 1174(a)), in order to give Congress more time to pass privacy legislation. A corollary inference, which is also supported by other textual evidence in section 264 and Part C of title XI, is that if Congress failed to act within the time provided, the original statutory scheme was to kick in. Under that scheme, which is set out in section 1173(e) of the House bill, the standards to be adopted were "standards with respect to the privacy of individually identifiable health information." Thus, the legislative history of section 264 supports the statutory interpretation underlying the rules below.

Comment: Many commenters were opposed to the rule covering specific forms of communication or records that could potentially be considered covered information, i.e., faxes, voice mail messages, etc. A subset of these commenters took issue particularly with the inclusion of oral communications within the scope of covered information. The commenters argued that covering information when it takes oral form (e.g., verbal discussions of a submitted claim) makes the regulation extremely costly and burdensome, and even impossible to administer. Another commenter also offered that it would make it nearly impossible to discuss health information over the phone, as the covered entity cannot verify that the person on the other end is in fact who he or she claims to be.

Response: We disagree. Covering oral communications is an important part of keeping individually identifiable health information private. If the final rule were not to cover oral communication, a conversation about a person's protected health information could be shared with anyone. Therefore, the same protections afforded to paper and electronically based information must apply to verbal communication as well. Moreover, the Congress explicitly included "oral" information in the statutory definition of health information.

Comment: A few commenters supported, without any change, the approach proposed in the NPRM to limit the scope of covered information to individually identifiable health information in any form once the information is transmitted or maintained electronically. These commenters asserted that our statutory authority limited us accordingly. Therefore, they believed we had proposed protections to the extent possible within the bounds of our statutory authority and could not expand the scope of such protections without new legislative authority.

Response: We disagree with these commenters regarding the limitations under our statutory authority. As explained above, we have the authority to extend the scope of the regulation as we have done in the final rule. We also note here that most of these commenters who supported the NPRM's proposed approach, voiced strong support for extending the scope of coverage to all

individually identifiable health information in any form, but concluded that we had done what we could within the authority provided.

Comment: One commenter argued that the term "transaction" is generally understood to denote a business matter, and that the NPRM applied the term too broadly by including hospital directory information, communication with a patient's family, researchers' use of data and many other non-business activities.

Response: This comment reflects a misunderstanding of our use of the term "transaction." The uses and disclosures described in the comment are not "transactions" as defined in § 160.103. The authority to regulate the types of uses and disclosures described is provided under section 264 of Pub. L. 104-191. The conduct of the activities noted by the commenters are not related to the determination of whether a health care provider is a covered entity. We explain in the preamble that a health care provider is a covered entity if it transmits health information in electronic form in connection with transactions referred to in section 1173(a)(1) of the Act.

Comment: A few commenters asserted that the Secretary has no authority to regulate "use" of protected health information. They stated that although section 264(b) mentions that the Secretary should address "uses and disclosures," no other section of HIPAA employs the term "use."

Response: We disagree with these commenters. As they themselves note, the authority to regulate use is given in section 264(b) and is sufficient.

Comment: Some commenters requested clarification as to how certain types of health information, such as photographs, faxes, X-Rays, CT-scans, and others would be classified as protected or not under the rule.

Response: All types of individually identifiable health information in any form, including those described, when maintained or transmitted by a covered entity are covered in the final rule.

Comment: A few commenters requested clarification with regard to the differences between the definitions of individually identifiable health information and protected health information.

Response: In expanding the scope of covered information in the final rule, we have simplified the distinction between the two definitions. In the final rule, protected health information is the subset of individually identifiable health information that is maintained or transmitted by covered entity, and thereby protected by this rule. For additional discussion of protected health information and individually identifiable health information, see the descriptive summary of § 164.501.

Comment: A few commenters remarked that the federal government has no right to access or control any medical records and that HHS must get consent in order to store or use any individually identifiable health information.

Response: We understand the commenters' concern. It is not our intent, nor do we through this rule create any government right of access to medical records, except as needed to investigate possible violations of the rule. Some government programs, such as Medicare, are authorized under other law to gain access to certain beneficiary records for administrative purposes. However, these programs are covered by the rule and its privacy protections apply.

Comment: Some commenters asked us to clarify how schools would be treated by the rule. Some of these commenters worried that privacy would be compromised if schools were exempted from the provisions of the final rule. Other commenters thought that school medical records were included in the provisions of the NPRM.

Response: We agree with the request for clarification and provide guidance regarding the treatment of medical records in schools in the "Relationship to Other Federal Laws" preamble discussion of FERPA, which governs the privacy of education records.

Comment: One commenter was concerned that only some information from a medical chart would be included as covered information. The commenter was especially concerned that transcribed material might not be considered covered information. ***82621**

Response: As stated above, all individually identifiable health information in any form, including transcribed or oral information, maintained or transmitted by a covered entity is covered under the provisions of the final rule.

Comment: In response to our solicitation of comments on the scope of the definition of protected health information, many commenters asked us to narrow the scope of the proposed definition to include only information in electronic form. Others asked us to include only information from the HIPAA standard transactions.

Response: For the reasons stated by the commenters who asked us to expand the proposed definition, we reject these comments. We reject these approaches for additional reasons, as well. Limiting the protections to electronic information would, in essence, protect information only as long as it remained in a computer or other electronic media; the protections in the rule could be avoided simply by printing out the information. This approach would thus result in the illusion, but not the reality, of privacy protections. Limiting protection to information in HIPAA transactions has many of the problems in the proposed approach: it would fail to protect significant amounts of health information, would force covered entities to figure out which information had and had not been in such a transaction, and could cause the administrative burdens the commenters feared would result from protecting some but not all information.

Comment: A few commenters asserted that the definition of protected health information should explicitly include “genetic” information. It was argued that improper disclosure and use of such information could have a profound impact on individuals and families.

Response: We agree that the definition of protected health information includes genetic information that otherwise meets the statutory definition. But we believe that singling out specific types of protected health information for special mention in the regulation text could wrongly imply that other types are not included.

Comment: One commenter recommended that the definition of protected health information be modified to clarify that an entity does not become a ‘covered entity’ by providing a device to an individual on which protected health information may be stored, provided that the company itself does not store the individual's health information.”

Response: We agree with the commenter's analysis, but believe the definition is sufficiently clear without a specific amendment to this effect.

Comment: One commenter recommended that the definition be amended to explicitly exclude individually identifiable health information maintained, used, or disclosed pursuant to the Fair Credit Reporting Act, as amended, 15 U.S.C. 1681. It was stated that a disclosure of payment history to a consumer reporting agency by a covered entity should not be considered protected health information. Another commenter recommended that health information, billing information, and a consumer's credit history be exempted from the definition because this flow of information is regulated by both the Fair Credit Reporting Act (FCRA) and the Fair Debt Collection Practices Act (FDCPA).

Response: We disagree. To the extent that such information meets the definition of protected health information, it is covered by this rule. These statutes are designed to protect financial, not health, information. Further, these statutes primarily regulate entities that are not covered by this rule, minimizing the potential for overlap or conflict. The protections in this rule are more appropriate for protecting health information. However, we add provisions to the definition of payment which should address these concerns. See the definition of ‘payment’ in § 164.501.

Comment: An insurance company recommended that the rule require that medical records containing protected health information include a notation on a cover sheet on such records.

Response: Since we have expanded the scope of protected health information, there is no need for covered entities to distinguish among their records, and such a notation is not needed. This uniform coverage eliminates the mixed record problem and resultant potential for confusion.

Comment: A government agency requested clarification of the definition to address the status of information that flows through dictation services.

Response: A covered entity may disclose protected health information for transcription of dictation under the definition of health care operations, which allows disclosure for "general administrative" functions. We view transcription and clerical services generally as part of a covered entity's general administrative functions. An entity transcribing dictation on behalf of a covered entity meets this rule's definition of business associate and may receive protected health information under a business associate contract with the covered entity and subject to the other requirements of the rule.

Comment: A commenter recommended that information transmitted for employee drug testing be exempted from the definition.

Response: We disagree that is necessary to specifically exclude such information from the definition of protected health information. If a covered entity is involved, triggering this rule, the employer may obtain authorization from the individuals to be tested. Nothing in this rule prohibits an employer from requiring an employee to provide such an authorization as a condition of employment.

Comment: A few commenters addressed our proposal to exclude individually identifiable health information in education records covered by FERPA. Some expressed support for the exclusion. One commenter recommended adding another exclusion to the definition for the treatment records of students who attend institutions of post secondary education or who are 18 years old or older to avoid confusion with rules under FERPA. Another commenter suggested that the definition exclude health information of participants in "Job Corps programs" as it has for educational records and inmates of correctional facilities.

Response: We agree with the commenter on the potential for confusion regarding records of students who attend post-secondary schools or who are over 18, and therefore in the final rule we exclude records defined at 20 U.S.C. 1232g(a)(4)(B)(iv) from the definition of protected health information. For a detailed discussion of this change, refer to the "Relationship to Other Federal Laws" section of the preamble. We find no similar reason to exclude "Job Corps programs" from the requirements of this regulation.

Comment: Some commenters voiced support for the exclusion of the records of inmates from the definition of protected health information, maintaining that correctional agencies have a legitimate need to share some health information internally without authorization between health service units in various facilities and for purposes of custody and security. Other commenters suggested that the proposed exclusion be extended to individually identifiable health information: created by covered entities providing services to inmates or detainees under contract to such facilities; of "former" inmates; and of persons who are in the custody of law enforcement officials, such as the United States Marshals Service and local police agencies. They stated that ***82622** corrections and detention facilities must be able to share information with law enforcement agencies such as the United States Marshals Service, the Immigration and Naturalization Services, county jails, and U.S. Probation Offices.

Another commenter said that there is a need to have access to records of individuals in community custody and explained that these individuals are still under the control of the state or local government and the need for immediate access to records for inspections and/or drug testing is necessary.

A number of commenters were opposed to the proposed exclusion to the definition of protected health information, arguing that the proposal was too sweeping. Commenters stated that while access without consent is acceptable for some purposes, it is not acceptable in all circumstances. Some of these commenters concurred with the sharing of health care information with other medical facilities when the inmate is transferred for treatment. These commenters recommended that we delete the exception for jails and prisons and substitute specific language about what information could be disclosed and the limited circumstances or purposes for which such disclosures could occur.

Others recommended omission of the proposed exclusion entirely, arguing that excluding this information from protection sends the message that, with respect to this population, abuses do not matter. Commenters argued that inmates and detainees have a right to privacy of medical records and that individually identifiable health information obtained in these settings can be misused, e.g., when communicated indiscriminately, health information can trigger assaults on individuals with stigmatized conditions by fellow inmates or detainees. It can also lead to the denial of privileges, or inappropriately influence the deliberations of bodies such as parole boards.

A number of commenters explicitly took issue with the exclusion relative to individuals, and in particular youths, with serious mental illness, seizure disorders, and emotional or substance abuse disorders. They argued that these individuals come in contact with criminal justice authorities as a result of behaviors stemming directly from their illness and assert that these provisions will cause serious problems. They argue that disclosing the fact that an individual was treated for mental illness while incarcerated could seriously impair the individual's reintegration into the community. Commenters stated that such disclosures could put the individual or family members at risk of discrimination by employers and in the community at large.

Some commenters asserted that the rule should be amended to prohibit jails and prisons from disclosing private medical information of individuals who have been discharged from these facilities. They argued that such disclosures may seriously impair individuals' rehabilitation into society and subject them to discrimination as they attempt to re-establish acceptance in the community.

Response: We find commenters' arguments against a blanket exemption from privacy protection for inmates persuasive. We agree health information in these settings may be misused, which consequently poses many risks to the inmate or detainee and in some cases, their families as described above by the commenters. Accordingly, we delete this exception from the definition of “protected health information” in the final rule. The final rule considers individually identifiable health information of individuals who are prisoners and detainees to be protected health information to the extent that it meets the definition and is maintained or transmitted by a covered entity.

At the same time, we agree with those commenters who explained that correctional facilities have legitimate needs for use and sharing of individually identifiable health information inmates without authorization. Therefore, we add a new provision (§ 164.512(k)(5)) that permits a covered entity to disclose protected health information about inmates without individual consent, authorization, or agreement to correctional institutions for specified health care and other custodial purposes. For example, covered entities are permitted to disclose for the purposes of providing health care to the individual who is the inmate, or for the health and safety of other inmates or officials and employees of the facility. In addition, a covered entity may disclose protected health information as necessary for the administration and maintenance of the safety, security, and good order of the institution. See the preamble discussion of the specific requirements at § 164.512(k)(5), as well as discussion of certain limitations on the rights of individuals who are inmates with regard to their protected health information at §§ 164.506, 164.520, 164.524, and 164.528.

We also provide the following clarifications. Covered entities that provide services to inmates under contract to correctional institutions must treat protected health information about inmates in accordance with this rule and are permitted to use and disclose such information to correctional institutions as allowed under § 164.512(k)(5).

As to former inmates, the final rule considers such persons who are released on parole, probation, supervised release, or are otherwise no longer in custody, to be individuals who are not inmates. Therefore, the permissible disclosure provision at § 164.512(k)(5) does not apply in such cases. Instead, a covered entity must apply privacy protections to the protected health information about former inmates in the same manner and to the same extent that it protects the protected health information of other individuals. In addition, individuals who are former inmates hold the same rights as all other individuals under the rule.

As to individuals in community custody, the final rule considers inmates to be those individuals who are incarcerated in or otherwise confined to a correctional institution. Thus, to the extent that community custody confines an individual to a particular facility, § 164.512(k)(5) is applicable.

Psychotherapy Notes

Comment: Some commenters thought the definition of psychotherapy notes was contrary to standard practice. They claimed that reports of psychotherapy are typically part of the medical record and that psychologists are advised, for ethical reasons and liability risk management purposes, not to keep two separate sets of notes. Others acknowledged that therapists may maintain separate notations of therapy sessions for their own purpose. These commenters asked that we make clear that psychotherapy notes, at least in summary form, should be included in the medical record. Many plans and providers expressed concern that the proposed definition would encourage the creation of "shadow" records which may be dangerous to the patient and may increase liability for the health care providers. Some commenters claimed that psychotherapy notes contain information that is often essential to treatment.

Response: We conducted fact-finding with providers and other knowledgeable parties to determine the standard practice of psychotherapists and determined that only some psychotherapists keep separate files with notes pertaining to psychotherapy sessions. These notes are often referred to as "process notes," distinguishable from "progress notes," "the medical record," or "official records." These process notes capture the therapist's ***82623** impressions about the patient, contain details of the psychotherapy conversation considered to be inappropriate for the medical record, and are used by the provider for future sessions. We were told that process notes are often kept separate to limit access, even in an electronic record system, because they contain sensitive information relevant to no one other than the treating provider. These separate "process notes" are what we are calling "psychotherapy notes." Summary information, such as the current state of the patient, symptoms, summary of the theme of the psychotherapy session, diagnoses, medications prescribed, side effects, and any other information necessary for treatment or payment, is always placed in the patient's medical record. Information from the medical record is routinely sent to insurers for payment.

Comment: Various associations and their constituents asked that the exceptions for psychotherapy notes be extended to health care information from other health care providers. These commenters argued that psychotherapists are not the only providers or even the most likely providers to discuss sensitive and potentially embarrassing issues, as treatment and counseling for mental health conditions, drug abuse, HIV/AIDS, and sexual problems are often provided outside of the traditional psychiatric settings. One writer stated, "A prudent health care provider will always assess the past and present psychiatric medical history and symptoms of a patient."

Many commenters believed that the psychotherapy notes should include frequencies of treatment, results of clinical tests, and summary of diagnosis, functional status, the treatment plan, symptoms, prognosis and progress to date. They claimed that this information is highly sensitive and should not be released without the individual's written consent, except in cases of emergency. One commenter suggested listing the types of mental health information that can be requested by third party payors to make payment determinations and defining the meaning of each term.

Response: As discussed above and in the NPRM, the rationale for providing special protection for psychotherapy notes is not only that they contain particularly sensitive information, but also that they are the personal notes of the therapist, intended to help him or her recall the therapy discussion and are of little or no use to others not involved in the therapy. Information in these notes is not intended to communicate to, or even be seen by, persons other than the therapist. Although all psychotherapy

information may be considered sensitive, we have limited the definition of psychotherapy notes to only that information that is kept separate by the provider for his or her own purposes. It does not refer to the medical record and other sources of information that would normally be disclosed for treatment, payment, and health care operations.

Comment: One commenter was particularly concerned that the use of the term "counseling" in the definition of psychotherapy notes would lead to confusion because counseling and psychotherapy are different disciplines.

Response: In the final rule, we continue to use the term "counseling" in the definition of "psychotherapy." During our fact-finding, we learned that "counseling" had no commonly agreed upon definition, but seemed to be widely understood in practice. We do not intend to limit the practice of psychotherapy to any specific professional disciplines.

Comment: One commenter noted that the public mental health system is increasingly being called upon to integrate and coordinate services among other providers of mental health services and they have developed an integrated electronic medical record system for state-operated hospitals, part of which includes psychotherapy notes, and which cannot be easily modified to provide different levels of confidentiality. Another commenter recommended allowing use or disclosure of psychotherapy notes by members of an integrated health care facility as well as the originator.

Response: The final rule makes it clear that any notes that are routinely shared with others, whether as part of the medical record or otherwise, are, by definition, not psychotherapy notes, as we have defined them. To qualify for the definition and the increased protection, the notes must be created and maintained for the use of the provider who created them i.e., the originator, and must not be the only source of any information that would be critical for the treatment of the patient or for getting payment for the treatment. The types of notes described in the comment would not meet our definition for psychotherapy notes.

Comment: Many providers expressed concern that if psychotherapy notes were maintained separately from other protected health information, other health providers involved in the individual's care would be unable to treat the patient properly. Some recommended that if the patient does not consent to sharing of psychotherapy notes for treatment purposes, the treating provider should be allowed to decline to treat the patient, providing a referral to another provider.

Response: The final rule retains the policy that psychotherapy notes be separated from the remainder of the medical record in order to receive additional protection. We based this decision on conversations with mental health providers who have told us that information that is critical to the treatment of individuals is normally maintained in the medical record and that psychotherapy notes are used by the provider who created them and rarely for other purposes. A strong part of the rationale for the special treatment of psychotherapy notes is that they are the personal notes of the treating provider and are of little or no use to others who were not present at the session to which the notes refer.

Comment: Several commenters requested that we clarify that the information contained in psychotherapy notes is being protected under the rule and not the notes themselves. They were concerned that the protection for psychotherapy notes would not be meaningful if health plans could demand the same information in a different format.

Response: This rule provides special protection for the information in psychotherapy notes, but it does not extend that protection to the same information that may be found in other locations. We do not require the notes to be in a particular format, such as hand-written. They may be typed into a word processor, for example. Copying the notes into a different format, per se, would not allow the information to be accessed by a health plan. However, the requirement that psychotherapy notes be kept separate from the medical record and solely for the use of the provider who created them means that the special protection does not apply to the same information in another location.

Public Health Authority

Comment: A number of the comments called for the elimination of all permissible disclosures without authorization, and some specifically cited the public health section and its liberal definition of public health authority as an inappropriately broad loophole that would allow unfettered access to private medical information by various government authorities.

Other commenters generally supported the provision allowing disclosure to public health authorities and to non-governmental entities ***82624** authorized by law to carry out public health activities. They further supported the broad definition of public health authority and the reliance on broad legal or regulatory authority by public health entities although explicit authorities were preferable and better informed the public.

Response: In response to comments arguing that the provision is too broad, we note that section 1178(b) of the Act, as explained in the NPRM, explicitly carves out protection for state public health laws. This provision states that: "[N]othing in this part shall be construed to invalidate or limit the authority, power, or procedures established under any law providing for the reporting of disease or injury, child abuse, birth or death, public health surveillance, or public health investigation or intervention." In light of this broad Congressional mandate not to interfere with current public health practices, we believe the broad definition of "public health authority" is appropriate to achieve that end.

Comment: Some commenters said that they performed public health activities in analyzing data and information. These comments suggested that activities conducted by provider and health plan organizations that compile and compare data for benchmarking performance, monitoring, utilization, and determining the health needs of a given market should be included as part of the public health exemption. One commenter recommended amending the regulation to permit covered entities to disclose protected health information to private organizations for public health reasons.

Response: We disagree that such a change should be made. In the absence of some nexus to a government public health authority or other underlying legal authority, covered entities would have no basis for determining which data collections are "legitimate" and how the confidentiality of the information will be protected. In addition, the public health functions carved out for special protection by Congress are explicitly limited to those established by law.

Comment: Two commenters asked for additional clarification as to whether the Occupational Safety and Health Administration (OSHA) and the Mine Safety and Health Administration (MSHA) would be considered public health authorities as indicated in the preamble. They suggested specific language for the final rule. Commenters also suggested that we specify that states operating OSHA-approved programs also are considered public health authorities. One comment applauded the Secretary's recognition of OSHA as both a health oversight agency and public health authority. It suggested adding OSHA-approved programs that operate in states to the list of entities included in these categories. In addition, the comment requested the final regulation specifically mention these entities in the text of the regulation as well.

Response: We agree that OSHA, MSHA and their state equivalents are public health authorities when carrying out their activities related to the health and safety of workers. We do not specifically reference any agencies in the regulatory definition, because the definition of public health authority and this preamble sufficiently address this issue. As defined in the final rule, the definition of "public health authority" at § 164.501 continues to include OSHA as a public health authority. State agencies or authorities responsible for public health matters as part of their official mandate, such as OSHA-approved programs, also come within this definition. See discussion of § 164.512(b) below. We have refrained, however, from listing specific agencies and have retained a general descriptive definition.

Comments: Several commenters recommended expanding the definition of public health authority to encompass other governmental entities that may collect and hold health data as part of their official duties. One recommended changing the definition of public health authority to read as follows: Public health authority means an agency or authority * * * that is responsible for public health matters or the collection of health data as part of its official mandate.

Response: We do not adopt this recommendation. The public health provision is not intended to cover agencies that are not responsible for public health matters but that may in the course of their responsibilities collect health-related information. Disclosures to such authorities may be permissible under other provision of this rule.

Comment: Many commenters asked us to include a formal definition of "required by law" incorporating the material noted in this preamble and additional suggested disclosures.

Response: We agree generally and modify the definition accordingly. See discussion above.

Research

Comment: We received many comments from supporting the proposed definition of "research." These commenters agreed that the definition of "research" should be the same as the definition in the Common Rule. These commenters argued that it was important that the definition of "research" be consistent with the Common Rule's definition to ensure the coherent oversight of medical research. In addition, some of these commenters also supported this definition because they believed it was already well-understood by researchers and provided reasonably clear guidance needed to distinguish between research and health care operations.

Some commenters, believed that the NPRM's definition was too narrow. Several of these commenters agreed that the Common Rule's definition should be adopted in the final rule, but argued that the proposed definition of "generalizable knowledge" within the definition of "research," which limited generalizable knowledge to knowledge that is "related to health," was too narrow. For example, one commenter stated that gun shot wound, spousal abuse, and other kinds of information from emergency room statistics are often used to conduct research with ramifications for social policy, but may not be "related to health." Several of these commenters recommended that the definition of research be revised to delete the words "related to health." Additional commenters who argued that the definition was too narrow raised the following concerns: the difference between "research" and "health care operations" is irrelevant from the patients' perspective, and therefore, the proposed rule should have required documentation of approval by an IRB or privacy board before protected health information could be used or disclosed for either of these purposes, and the proposed definition was too limited because it did not capture research conducted by non-profit entities to ensure public health goals, such as disease-specific registries.

Commenters who argued that the definition was too broad recommended that certain activities should be explicitly excluded from the definition. In general, these commenters were concerned that if certain activities were considered to be "research" the rule's research requirements would represent a problematic level of regulation on industry initiatives. Some activities that these commenters recommended be explicitly excluded from the definition of "research" included: marketing research, health and productivity management, quality assessment and improvement activities, and internal research conducted to improve health.

Response: We agree that the final rule's definition of "research" should be ***82625** consistent with the Common Rule's definition of this term. We also agree that our proposal to limit "generalizable knowledge" to knowledge that is "related to health," and "knowledge that could be applied to populations outside of the population served by the covered entity," was too narrow. Therefore, in the final rule, we retain the Common Rule's definition of "research" and eliminate the further elaboration of "generalizable knowledge." We understand knowledge to be generalizable when it can be applied to either a population inside or outside of the population served by the covered entity. Therefore, knowledge may be "generalizable" even if a research study uses only the protected health information held within a covered entity, and the results are generalizable only to the population served by the covered entity. For example, generalizable knowledge could be generated from a study conducted by the HCFA, using only Medicare data held by HCFA, even if the knowledge gained from the research study is applicable only to Medicare beneficiaries.

We rejected the other arguments claiming that the definition of "research" was either too narrow or too broad. While we agree that it is sometimes difficult to distinguish between "research" and "health care operations," we disagree that the difference between these activities is irrelevant from the patients' perspective. We believe, based on many of the comments, that individuals expect

that individually identifiable health information about themselves will be used for health care operations such as reviewing the competence or qualifications of health care professionals, evaluating provider and plan performance, and improving the quality of care. A large number of commenters, however, indicated that they did not expect that individually identifiable health information about themselves would be used for research purposes without their authorization. Therefore, we retain more stringent protections for research disclosures without patient authorization.

We also disagree with the commenters who were concerned that the proposed definition was too limited because it did not capture research conducted by non-profit entities to ensure public health goals, such as disease-specific registries. Such activities conducted by either non-profit or for-profit entities could meet the rule's definition of research, and therefore are not necessarily excluded from this definition.

We also disagree with many of the commenters who argued that certain activities should be explicitly excluded from the definition of research. We found no persuasive evidence that, when particular activities are also systematic investigations designed to contribute to generalizable knowledge, they should be treated any different from other such activities.

We are aware that the National Bioethics Advisory Commission (NBAC) is currently assessing the Common Rule's definition of "research" as part of a report they are developing on the implementation and adequacy of the Common Rule. Since we agree that a consistent definition is important to the conduct and oversight of research, if the Common Rule's definition of "research" is modified in the future, the Department of Health and Human Services will consider whether the definition should also be modified for this subpart.

Comment: Some commenters urged the Department to establish precise definitions for "health care operations" and "research" to provide clear guidance to covered entities and adequate privacy protections for the subjects of the information whose information is disclosed for these purposes. One commenter supported the definition of "research" proposed in the NPRM, but was concerned about the "crossover" from data analyses that begin as health care operations but later become "research" because the analytical results are of such importance that they should be shared through publication, thereby contributing to generalizable knowledge. To distinguish between the definitions of "health care operations" and "research," a few commenters recommended that the rule make this distinction based upon whether the activity is a "use" or a "disclosure." These commenters recommend that the "use" of protected health information for research without patient authorization should be exempt from the proposed research provisions provided that protected health information was not disclosed in the final analysis, report, or publication.

Response: We agree with commenters that at times it may be difficult to distinguish projects that are health operations and projects that are research. We note that this ambiguity exists today, and disagree that we can address this issue with more precise definitions of research and health care operations. Today, the issue is largely one of intent. Under the Common Rule, the ethical and regulatory obligations of the researcher stem from the intent of the activity. We follow that approach here. If such a project is a systematic investigation that designed to develop or contribute to generalizable knowledge, it is considered to be "research," not "health care operations."

In some instances, the primary purpose of the activity may change as preliminary results are analyzed. An activity that was initiated as an internal outcomes evaluation may produce information that could be generalized. If the purpose of a study changes and the covered entity does intend to generalize the results, the covered entity should document the fact as evidence that the activity was not subject to § 164.512(i) of this rule.

We understand that for research that is subject to the Common Rule, this is not the case. The Office for Human Research Protection interprets 45 CFR part 46 to require IRB review as soon as an activity meets the definition of research, regardless of whether the activity began as "health care operations" or "public health," for example. The final rule does not affect the Office of Human Research Protection's interpretation of the Common Rule.

We were not persuaded that an individual's privacy interest is of less concern when covered entities use protected health information for research purposes than when covered entities disclose protected health information for research purposes. We do not agree generally that internal activities of covered entities do not potentially compromise the privacy interests of individuals. Many persons within a covered entity may have access to protected health information. When the activity is a systematic investigation, the number of persons who may be involved in the records review and analysis may be substantial. We believe that IRB or privacy board approval of the waiver of authorization will provide important privacy protections to individuals about whom protected health information is used or disclosed for research. If a covered entity wishes to use protected health information about its enrollees for research purposes, documentation of an IRBs' or privacy board's assessment of the privacy impact of such a use is as important as if the same research study required the disclosure of protected health information. This conclusion is consistent with the Common Rule's requirement for IRB review of all human subjects research.

Treatment

Comment: Some commenters advocated for a narrow interpretation of ***82626** treatment that applies only to the individual who is the subject of the information. Other commenters asserted that treatment should be broadly defined when activities are conducted by health care providers to improve or maintain the health of the patient. A broad interpretation may raise concerns about potential misuse of information, but too limited an interpretation will limit beneficial activities and further contribute to problems in patient compliance and medical errors.

Response: We find the commenters' arguments for a broad definition of treatment persuasive. Today, health care providers consult with one another, share information about their experience with particular therapies, seek advice about how to handle unique or challenging cases, and engage in a variety of other discussions that help them maintain and improve the quality of care they provide. Quality of care improves when providers exchange information about treatment successes and failures. These activities require sharing of protected health information. We do not intend this rule to interfere with these important activities. We therefore define treatment broadly and allow use and disclosure of protected health information about one individual for the treatment of another individual.

Under this definition, only health care providers or a health care provider working with a third party can perform treatment activities. In this way, we temper the breadth of the definition by limiting the scope of information sharing. The various codes of professional ethics also help assure that information sharing among providers for treatment purposes will be appropriate.

We note that poison control centers are health care providers for purposes of this rule. We consider the counseling and follow-up consultations provided by poison control centers with individual providers regarding patient outcomes to be treatment. Therefore, poison control centers and other health care providers can share protected health information about the treatment of an individual without a business associate contract.

Comment: Many commenters suggested that “treatment” activities should include services provided to both a specific individual and larger patient populations and therefore urged that the definition of treatment specifically allow for such activities, sometimes referred to as “disease management” activities. Some argued that an analysis of an overall population is integral to determining which individuals would benefit from disease management services. Thus, an analysis of health care claims for enrolled populations enables proactive contact with those identified individuals to notify them of the availability of services. Certain commenters noted that “disease management” services provided to their patient populations, such as reminders about recommended tests based on nationally accepted clinical guidelines, are integral components of quality health care.

Response: We do not agree that population based services should be considered treatment activities. The definition of “treatment” is closely linked to the § 160.103 definition of “health care,” which describes care, services and procedures related to the health of an individual. The activities described by “treatment,” therefore, all involve health care providers supplying health care to a particular patient. While many activities beneficial to patients are offered to entire populations or involve examining health information about entire populations, treatment involves health services provided by a health care provider and tailored to the specific needs of an individual patient. Although a population-wide analysis or intervention may prompt a health care

provider to offer specific treatment to an individual, we consider the population-based analyses to improve health care or reduce health care costs to be health care operations (see definition of "health care operations," above).

Comment: A number of commenters requested clarification about whether prescription drug compliance management programs would be considered "treatment." One commenter urged HHS to clarify that provision by a pharmacy to a patient of customized prescription drug information about the risks, benefits, and conditions of use of a prescription drug being dispensed is considered a treatment activity. Others asked that the final rule expressly recognize that prescription drug advice provided by a dispensing pharmacist, such as a customized pharmacy letter, is within the scope of treatment.

Response: The activities that are part of prescription drug compliance management programs were not fully described by these commenters, so we cannot state a general rule regarding whether such activities constitute treatment. We agree that pharmacists' provision of customized prescription drug information and advice about the prescription drug being dispensed is a treatment activity. Pharmacists' provisions of information and counseling about pharmaceuticals to their customers constitute treatment, and we exclude certain communications made in the treatment context from the definition of marketing. (See discussion above.)

Comment: Some commenters noted the issues and recommendations raised in the Institutes of Medicine report "To Err Is Human" and the critical need to share information about adverse drug and other medical events, evaluation of the information, and its use to prevent future medical errors. They noted that privacy rules should not be so stringent as to prohibit the sharing of patient data needed to reduce errors and optimize health care outcomes. To bolster the notion that other programs associated with the practice of pharmacy must be considered as integral to the definition of health care and treatment, they reference OBRA '90 (42 U.S.C. 1396r-8) and the minimum required activities for dispensing drugs; they also note that virtually every state Board of Pharmacy adopted regulations imposing OBRA'90 requirements on pharmacies for all patients and not just Medicaid recipients.

Response: We agree that reducing medical errors is critical, and do not believe that this regulation impairs efforts to reduce medical errors. We define treatment broadly and include quality assessment and improvement activities in the definition of health care operations. Covered pharmacies may conduct such activities, as well as treatment activities appropriate to improve quality and reduce errors. We believe that respect for the privacy rights of individuals and appropriate protection of the confidentiality of their health information are compatible with the goal of reducing medical errors.

Comment: Some commenters urged us to clarify that health plans do not perform "treatment" activities; some of these were concerned that a different approach in this regulation could cause conflict with state corporate practice of medicine restrictions. Some commenters believed that the proposed definition of treatment crossed into the area of cost containment, which would seem to pertain more directly to payment. They supported a narrower definition that would eliminate any references to third party payors. One commenter argued that the permissible disclosure of protected health information to carry out treatment is too broad for health plans and that health plans that have no responsibility for treatment or care coordination should have no authority to release health information without authorization for treatment purposes.

Response: We do not consider the activities of third party payors, including health plans, to be ***82627** "treatment." Only health care providers, not health plans, conduct "treatment" for purposes of this rule. A health plan may, however, disclose protected health information without consent or authorization for treatment purposes if that disclosure is made to a provider. Health plans may have information the provider needs, for example information from other providers or information about the patient's treatment history, to develop an appropriate plan of care.

Comment: We received many comments relating to "disease management" programs and whether activities described as disease management should be included in the definition of treatment. One group of commenters supported the proposed definition of treatment that includes disease management. One commenter offered the position that disease management services are more closely aligned with treatment because they involve the coordination of treatment whereas health care operations are more akin to financial and ministerial functions of plans.

Some recommended that the definition of treatment be limited to direct treatment of individual patients and not allow for sharing of information for administrative or other programmatic reasons. They believed that allowing disclosures for disease management opens a loophole for certain uses and disclosures, such as marketing, that should only be permitted with authorization. Others recommended that the definition of disease management be restricted to prevent unauthorized use of individual health records to target individuals in a health plan or occupational health program. Many asked that the definition of disease management be clarified to identify those functions that, although some might consider them to be subsumed by the term, are not permitted under this regulation without authorization, such as marketing and disclosures of protected health information to employers. They suggested that disease management may describe desirable activities, but is subject to abuse and therefore should be restricted and controlled. One commenter recommends that we adopt a portion of the definition adopted by the Disease Management Association of America in October 1999.

On the other hand, many comments urged that disease management be part of the "treatment" definition or the "health care operations" definition and asked that specific activities be included in a description of the term. They viewed disease management as important element of comprehensive health care services and cost management efforts. They recommended that the definition of disease management include services directed at an entire population and not just individual care, in order to identify individuals who would benefit from services based on accepted clinical guidelines. They recommended that disease management be included under health care operations and include population level services. A commenter asserted that limiting disease management programs to the definition of treatment ignores that these programs extend beyond providers, especially since NCQA accreditation standards strongly encourage plans and insurers to provide these services.

Response: Disease management appeared to represent different activities to different commenters. Our review of the literature, industry materials, state and federal statutes,[FN6] and discussions with physician groups, health plan groups and disease management associations confirm that a consensus definition from the field has not yet evolved, although efforts are underway. Therefore, rather than rely on this label, we delete "disease management" from the treatment definition and instead include the functions often discussed as disease management activities in this definition or in the definition of health care operations and modify both definitions to address the commenters' concerns.

We add population-based activities to improve health care or reduce health care costs to the definition of health care operations. Outreach programs as described by the commenter may be considered either health care operations or treatment, depending on whether population-wide or patient-specific activities occur, and if patient-specific, whether the individualized communication with a patient occurs on behalf of health care provider or a health plan. For example, a call placed by a nurse in a doctor's office to a patient to discuss follow-up care is a treatment activity. The same activity performed by a nurse working for a health plan would be a health care operation. In both cases, the database analysis that created a list of patients that would benefit from the intervention would be a health care operation. Use or disclosure of protected health information to provide education materials to patients may similarly be either treatment or operations, depending on the circumstances and on who is sending the materials. We cannot say in the abstract whether any such activities constitute marketing under this rule. See §§ 164.501 and 164.514 for details on what communications are marketing and when the authorization of the individual may be required.

Comment: Many commenters were concerned that the definition of treatment would not permit Third Party Administrators (TPAs) to be involved with disease management programs without obtaining authorization. They asserted that while the proposed definition of treatment included disease management conducted by health care providers it did not recognize the role of employers and TPAs in the current disease management process.

Response: Covered entities disclose protected health information to other persons, including TPAs, that they hire to perform services for them or on their behalf. If a covered entity hires a TPA to perform the disease management activities included in the rule's definitions of treatment and health care operations that disclosure will not ***82628** require authorization. The relationship between the covered entity and the TPA may be subject to the business associate requirements of §§ 164.502 and 164.504. Disclosures by covered entities to plan sponsors, including employers, for the purpose of plan administration are addressed in § 164.504.

Comment: Commenters suggested that as disease management is defined only as an element of treatment, it could only be carried out by health care providers, and not health plans. They opposed this approach because health plans also conduct such programs, and are indeed required to do it by accreditation standards and HCFA Managed Care Organization standards.

Response: We agree that the placement of disease management in the proposed definition of treatment suggested that health plans could not conduct such programs. We revise the final rule to clarify that health plans may conduct population based care management programs as a health care operation activity.

Comment: Some commenters stated that the rule should require that disease management only be done with the approval of the treating physician or at least with the knowledge of the physician.

Response: We disagree with this comment because we do not believe that this privacy rule is an appropriate venue for setting policies regarding the management of health care costs or treatment.

Comment: Some industry groups stated that if an activity involves selling products, it is not disease management. They asked for a definition that differentiates use of information for the best interests of patient from uses undertaken for "ulterior purposes" such as advertising, marketing, or promoting separate products.

Response: We eliminate the definition of "disease management" from the rule. Often however, treatment decisions involve discussing the relevant advantages and disadvantages of products and services. Health plans, as part of payment and operations, sometimes communicate with individuals about particular products and services. We address these distinctions in the definitions of marketing and "health care operations" in § 164.501, and in the requirements for use and disclosure of protected health information for marketing in § 164.514.

Comment: Some health care providers noted that there is a danger that employers will "force" individual employees with targeted conditions into self-care or compliance programs in ways that violate both the employee's privacy interest and his or her right to control own medical care.

Response: Employers are not covered entities under HIPAA, so we cannot prohibit them under this rule from undertaking these or other activities with respect to health information. In § 164.504 we limit disclosure of health information from group health plans to the employers sponsoring the plans. However, other federal and/or state laws, such as disability nondiscrimination laws, may govern the rights of employees under such circumstances.

Comment: Many commenters urged that disease management only be allowed with the written consent of the individual. Others also desired consent but suggested that an opt-out would be sufficient. Other commenters complained that the absence of a definition for disease management created uncertainty in view of the proposed rule's requirement to get authorization for marketing. They were concerned that the effect would be to require patient consent for many activities that are desirable, not practicably done if authorization is required, and otherwise classifiable as treatment, payment, or health care operations. Examples provided include reminders for appointments, reminders to get preventive services like mammograms, and information about home management of chronic illnesses.

Response: We agree with the commenters who stated that the requirement for specific authorization for certain activities considered part of disease management could impede the ability of health plans and covered providers to implement effective health care management and cost containment programs. In addition, this approach would require us to distinguish activities undertaken as part of a formal disease management program from the same activities undertaken outside the context of disease management program. For example, we see no clear benefit to privacy in requiring written authorization before a physician may call a patient to discuss treatment options in all cases, nor do we see a sound basis for requiring it only when the physician was following a formal protocol as part of a population based intervention. We also are not persuaded that the risk to privacy

for these activities warrants a higher degree of protection than do other payment, health care operations or treatment activities for which specific authorization was not suggested by commenters.

Comment: A few commenters asked that we clarify that disclosure of protected health information about a prospective patient to a health care provider (e.g., a possible admission to an assisted living facility from a nursing facility) is a treatment activity that does not require authorization.

Response: We agree that the described activity is "treatment," because it constitutes referral and coordination of health care.

Comment: Comments called for the removal of "other services" from the definition.

Response: We disagree with the concept that only health care services are appropriately included in the treatment definition. We have modified this definition to instead include "the provision, coordination, or management of health care and related services." This definition allows health care providers to offer or coordinate social, rehabilitative, or other services that are associated with the provision of health care. Our use of the term "related" prevents "treatment" from applying to the provision of services unrelated to health care.

Comment: Several commenters stated that the definition of treatment should include organ and tissue recovery activities. They asserted that the information exchanged and collected to request consent, evaluate medical information about a potential donor and perform organ recoveries relates to treatment and are not administrative activities. When hospitals place a patient on the UNOS list it is transferring individually identifiable health information. Also, when an organ procurement organization registers a donor with UNOS it could be disclosing protected health information. Commenters questioned whether these activities would be administrative or constitute treatment.

Response: In the proposed rule we included in the definition of "health care" activities related to the procurement or organs, blood, eyes and other tissues. This final rule deletes those activities from the definition of "health care." We do so because, while organ and tissue procurement organizations are integral components of the health care system, we do not believe that the testing, procurement, and other procedures they undertake describe "health care" offered to the donors of the tissues or organs themselves. See the discussion under the definition of "health care" in § 160.103.

Comment: Some commenters recommended including health promotion activities in the definition of health care. ***82629**

Response: We consider health promotion activities to be preventive care, and thus within the definition of health care. In addition, such activities that are population based are included in the definition of health care operations.

Comment: We received a range of comments regarding the proper placement of case and disease management in the definitions and the perceived overlap between health care operations and treatment. Some consider that these activities are a function of improving quality and controlling costs. Thus, they recommend that the Secretary move risk assessment, case and disease management to the definition of health care operations.

Response: In response to these comments, we remove these terms from the definition of treatment and add case management to the definition of health care operations. We explain our treatment of disease management in responses to comments above. Whether an activity described as disease or case management falls under treatment or health care operations would depend in part on whether the activity is focused on a particular individual or a population. A single program described as a "case management" effort may include both health care operations activities (e.g., records analysis, protocol development, general risk assessment) and treatment activities (e.g., particular services provided to or coordinated for an individual, even if applying a standardized treatment protocol).

Comment: We received comments that argued for the inclusion of "disability management" in the treatment definition. They explained that through disability management, health care providers refer and coordinate medical management and they require contemporaneous exchange of an employee's specific medical data for the provider to properly manage.

Response: To the extent that a covered provider is coordinating health care services, the provider is providing treatment. We do not include the term "disability management" because the scope of the activities covered by that term is not clear. In addition, the commenters did not provide enough information for us to make a fact-based determination of how this rule applies to the uses and disclosures of protected health information that are made in a particular "disability management" program.

Use

Comment: One commenter asserted that the scope of the proposal had gone beyond the intent of Congress in addressing uses of information within the covered entity, as opposed to transactions and disclosures outside the covered entity. This commenter argued that, although HIPAA mentions use, it is unclear that the word "use" in the proposed rule is what Congress intended. The commenter pointed to the legislative history to argue that "use" is related to an information exchange outside of the entity.

Response: We disagree with the commenter regarding the Congress' intent. Section 264 of HIPAA requires that the Secretary develop and send to Congress recommendations on standards with respect to the privacy of individually identifiable health information (which she did on September 11, 1997) and prescribes that the recommendations address among other items "the uses and disclosures of such information that should be authorized or required." Section 264 explicitly requires the Secretary to promulgate standards that address at least the subjects described in these recommendations. It is therefore our interpretation that Congress intended to cover "uses" as well as disclosures of individually identifiable health information. We find nothing in the legislative history to indicate that Congress intended to deviate from the common meaning of the term "use."

Comment: One commenter observed that the definition could encompass the processing of data by computers to execute queries. It was argued that this would be highly problematic because computers are routinely used to identify subsets of data sets. It was explained that in performing this function, computers examine each record in the data set and return only those records in the data set that meet specific criteria. Consequently, a human being will see only the subset of data that the computer returns. Thus, the commenter stated that it is only this subset that could be used or disclosed.

Response: We interpret "use" to mean only the uses of the product of the computer processing, not the internal computer processing that generates the product.

Comments: Some commenters asked that the Department clarify that individualized medical information obtained through a fitness for duty examination is not subject to the privacy protections under the regulation.

Response: As discussed above, we have clarified that the definition of "treatment" to include assessments of an individual. If the assessment is performed by a covered health care provider, the health information resulting from the assessment is protected health information. We note that a covered entity is permitted to condition the provision of health care when the sole purpose is to create protected health information for the benefit of a third person. See § 164.508(b). For example, a covered health care provider may condition the provision of a fitness for duty examination to an individual on obtaining an authorization from the individual for disclosure to the employer who has requested the examination.

Section 164.502—Uses and Disclosures of Protected Health Information: General Rules

Section 164.502(a)—General Standard

Comment: A few commenters requested an exemption from the rule for the Social Security and Supplemental Security Income Disability Programs so that disability claimants can be served in a fair and timely manner. The commenters were concerned

that the proposal would be narrowly interpreted, thereby impeding the release of medical records for the purposes of Social Security disability programs.

Another commenter similarly asked that a special provision be added to the proposal's general rule for uses and disclosures without authorization for treatment, payment, and health care operations purposes to authorize disclosure of all medical information from all sources to the Social Security Administration, including their contracted state agencies handling disability determinations.

Response: A complete exemption for disclosures for these programs is not necessary. Under current practice, the Social Security Administration obtains authorization from applicants for providers to release an individual's records to SSA for disability and other determinations. Thus, there is no reason to believe that an exemption from the authorization required by this rule is needed to allow these programs to function effectively. Further, such an exemption would reduce privacy protections from current levels. When this rule goes into effect, those authorizations will need to meet the requirements for authorization under § 164.508 of this rule.

We do, however, modify other provisions of the proposed rule to accommodate the special requirements of these programs. In particular, Social Security Disability and other federal programs, and public benefits programs run by the states, are authorized by law ***82630** to share information for eligibility purposes. Where another public body has determined that the appropriate balance between need for efficient administration of public programs and public funds and individuals' privacy interests is to allow information sharing for these limited purposes, we do not upset that determination. Where the sharing of enrollment and eligibility information is required or expressly authorized by law, this rule permits such sharing of information for eligibility and enrollment purposes (see § 164.512(k)(6)(i)), and also excepts these arrangements from the requirements for business associate agreements (see § 164.502(e)(1)).

Comment: A few commenters asked that the rule be revised to authorize disclosures to clergy, for directory purposes, to organ and tissue procurement organizations, and to the American Red Cross without patient authorization.

Response: We agree and revise the final rule accordingly. The new policies and the rationale for these policies are found in §§ 164.510 and 164.512, and the corresponding preamble.

Comment: One commenter recommended that the rule apply only to the “disclosure” of protected health information by covered entities, rather than to both “use” and “disclosure.” The commenter stated that the application of the regulation to a covered entity's use of individually identifiable health information offers little benefit in terms of protecting protected health information, yet imposes costs and may hamper many legitimate activities, that fall outside the definition of treatment, payment or health care operations.

Another commenter similarly urged that the final regulation draw substantive distinctions between restrictions on the “use” of individually identifiable health information and on the “disclosure” of such information, with broader latitude for “uses” of such information. The commenter believed that internal “uses” of such information generally do not raise the same issues and concerns that a disclosure of that information might raise. It was argued that any concerns about the potential breadth of use of this information could be addressed through application of the “minimum necessary” standard. The commenter also argued that Congressional intent was that a “disclosure” of individually identifiable health information is potentially much more significant than a “use” of that information.

Response: We do not accept the commenter's broad recommendation to apply the regulation only to the “disclosure” of protected health information and not to “use” of such information. Section 264 charges the Secretary with promulgating standards that address, among other things, “the uses and disclosures” of individually identifiable health information. We also do not agree that applying the regulation to “use” offers little benefit to protecting protected health information. The potential exists for misuse of protected health information within entities. This potential is even greater when the covered entity also provides services

or products outside its role as a health care provider, health plan, or health care clearinghouse for which "use" of protected health information offers economic benefit to the entity. For example, if this rule did not limit "uses" generally to treatment, payment and health care operations, a covered entity that also offered financial services could be able to use protected health information without authorization to market or make coverage or rate decisions for its financial services products. Without the minimum necessary standard for uses, a hospital would not be constrained from allowing their appointment scheduling clerks free access to medical records.

We agree, however, that it is appropriate to apply somewhat different requirements to uses and disclosures of protected health information permitted by this rule. We therefore modify the application of the minimum necessary standard to accomplish this. See the preamble to § 164.514 for a discussion of these changes.

Comment: A commenter argued that the development, implementation, and use of integrated computer-based patient medical record systems, which requires efficient information sharing, will likely be impeded by regulatory restrictions on the "use" of protected health information and by the minimum necessary standard.

Response: We have modified the proposed approach to regulating "uses" of protected health information within an entity, and believe our policy is compatible with the development and implementation of computer-based medical record systems. In fact, we drew part of the revised policy on "minimum necessary" use of protected health information from the role-based access approach used in several computer-based records systems today. These policies are described further in § 164.514.

Comment: One commenter asked that the general rules for uses and disclosures be amended to permit covered entities to disclose protected health information for purposes relating to property and casualty benefits. The commenter argued that the proposal could affect its ability to obtain protected health information from covered entities, thereby constricting the flow of medical information needed to administer property and casualty benefits, particularly in the workers' compensation context. It was stated that this could seriously impede property and casualty benefit providers' ability to conduct business in accordance with state law.

Response: We disagree that the rule should be expanded to permit all uses and disclosures that relate to property and casualty benefits. Such a broad provision is not in keeping with protecting the privacy of individuals. Although we generally lack the authority under HIPAA to regulate the practices of this industry, the final rule addresses when covered entities may disclose protected health information to property and casualty insures. We believe that the final rule permits property and casualty insurers to obtain the protected health information that they need to maintain their promises to their policyholders. For example, the rule permits a covered entity to use or disclose protected health information relating to an individual when authorized by the individual. Property and casualty insurers are free to obtain authorizations from individuals for release by covered entities of the health information that the insurers need to administer claims, and this rule does not affect their ability to condition payment on obtaining such an authorization from insured individuals. Property and casualty insurers providing payment on a third-party basis have an opportunity to obtain authorization from the individual and to condition payment on obtaining such authorization. The final rule also permits covered entities to make disclosures to obtain payment, whether from a health plan or from another person such as a property and casualty insurer. For example, where an automobile insurer is paying for medical benefits on a first-party basis, a health care provider may disclose protected health information to the insurer as part of a request for payment. We also include in the final rule a new provision that permits covered entities to use or disclose protected health information as authorized by workers' compensation or similar programs established by law addressing work-related injuries or illness. See § 164.512(l). These statutory programs establish channels of information sharing that are necessary ***82631** to permit compensation of injured workers.

Comment: A few commenters suggested that the Department specify "prohibited" uses and disclosures rather than "permitted" uses and disclosures.

Response: We reject these commenters' because we believe that the best privacy protection in most instances is to require the individual's authorization for use or disclosure of information, and that the role of this rule is to specify those uses and disclosures

for which the balance between the individuals' privacy interest and the public's interests dictates a different approach. The opposite approach would require us to anticipate the much larger set of all possible uses of information that do not implicate the public's interest, rather than to specify the public interests that merit regulatory protection.

Comment: A commenter recommended that the rule be revised to more strongly discourage the use of individually identifiable health information where de-identified information could be used.

Response: We agree that the use of de-identified information wherever possible is good privacy practice. We believe that by requiring covered entities to implement these privacy restrictions only with respect to individually identifiable health information, the final rule strongly encourages covered entities to use de-identified information as much as practicable.

Comment: One commenter recommended that when information from health records is provided to authorized external users, this information should be accompanied by a statement prohibiting use of the information for other than the stated purpose; prohibiting disclosure by the recipient to any other party without written authorization from the patient, or the patient's legal representative, unless such information is urgently needed for the patient's continuing care or otherwise required by law; and requiring destruction of the information after the stated need has been fulfilled.

Response: We agree that restricting other uses or re-disclosure of protected health information by a third party that may receive the information for treatment, payment, and health care operations purposes or other purposes permitted by rule would be ideal with regard to privacy protection. However, as described elsewhere in this preamble, once protected health information leaves a covered entity the Department no longer has jurisdiction under the statute to apply protections to the information. Since we would have no enforcement authority, the costs and burdens of requiring covered entities to produce and distribute such a statement to all recipients of protected heath information, including those with whom the covered entity has no on-going relationship, would outweigh any benefits to be gained from such a policy. Similarly, where protected health information is disclosed for routine treatment, payment and operations purposes, the sheer volume of these disclosures makes the burden of providing such a statement unacceptable. Appropriate protection for these disclosures requires law or regulation directly applicable to the recipient of the information, not further burden on the disclosing entity. Where, however, the recipient of protected health information is providing a service to or on behalf of the covered entity this balance changes. It is consistent with long-standing legal principles to hold the covered entity to a higher degree of responsibility for the actions of its agents and contractors. See § 164.504 for a discussion of the responsibilities of covered entities for the actions of their business associates with respect to protected health information.

Section 164.502(b)—Minimum Necessary

Comments on the minimum necessary standard are addressed in the preamble to § 164.514(d).

Section 164.502(c)—Uses or Disclosures of Protected Health Information Subject to an Agreed Upon Restriction

Comments on the agreed upon restriction standard are addressed in the preamble to § 164.522(a).

Section 164.502(d)—Uses and Disclosures of De-Identified Protected Health Information

Comments on the requirements for de-identifying information are addressed in the preamble to § 164.514(a)-(c).

Section 164.502(e)—Business Associates

Comments on business associates are addressed in the preamble to § 164.504(e).

Section 164.502(f)—Deceased Individuals

Comment: Most commenters on this topic generally did not approve of the Secretary's proposal with regard to protected health information about deceased individuals. The majority of these commenters argued that our proposal was not sufficiently protective of such information. Commenters agreed with the statements made in the preamble to the proposed rule that the privacy concerns addressed by this policy are not limited to the confidential protection of the deceased individual but instead also affects the decedent's family, as genetic information and information pertinent to hereditary diseases and risk factors for surviving relatives and direct family members may be disclosed through the disclosure of the deceased individual's confidential data. It was argued that the proposal would be inadequate to protect the survivors who could be negatively affected and in most cases will outlive the two-year period of protection. A number of medical associations asserted that individuals may avoid genetic testing, diagnoses, and treatment and suppress information important to their health care if they fear family members will suffer discrimination from the release of their medical information after their death. One commenter pointed out that ethically little distinction can be made between protecting an individual's health information during life and protecting it post-mortem. Further, it was argued that the privacy of the deceased individual and his or her family is far more important than allowing genetic information to be abstracted by an institutional or commercial collector of information. A few commenters asked that we provide indefinite protection on the protected health information about a deceased person contained in psychotherapy notes. One commenter asked that we extend protections on records of children who have died of cancer for the lifetime of a deceased child's siblings and parents.

The majority of commenters who supported increased protections on the protected health information about the deceased asked that we extend protections on such information indefinitely or for as long as the covered entity maintains the information. It was also argued that the administrative burden of perpetual protection would be no more burdensome than it is now as current practice is that the confidentiality of identifiable patient information continues after death. A number of others pointed out that there was no reason to set a different privacy standard for deceased individuals than we had for living individuals and that it has been standard practice to release the information of deceased individuals with a valid consent of the executor, next of kin, or specific court order. In addition, commenters referenced Hawaii's health care information privacy law (see ***82632** Haw. Rev. Stat. section 323C-43) as at least one example of a state law where the privacy and access provisions of the law continue to apply to the protected health information of a deceased individual following the death of that individual.

Response: We find the arguments raised by these commenters persuasive. We have reconsidered our position and believe these arguments for maintaining privacy on protected health information without temporal limitations outweigh any administrative burdens associated with maintaining such protections. As such, in the final rule we revise our policy to extend protections on the protected health information about a deceased individual to remain in effect for as long as the covered entity maintains the information.

For purposes of this regulation, this means that, except for uses and disclosures for research purposes (see § 164.512(i)), covered entities must under this rule protect the protected health information about a deceased individual in the same manner and to the same extent as required for the protected health information of living individuals. This policy alleviates the burden on the covered entity from having to determine whether or not the person has died and if so, how long ago, when determining whether or not the information can be released.

Comment: One commenter asked us to delete our standard for deceased individuals, asserting that the deceased have no constitutional right to privacy and state laws are sufficient to maintain protections for protected health information about deceased individuals.

Response: We understand that traditional privacy law has historically stripped privacy protection on information at the time the subject of the information dies. However, as we pointed out in the preamble to the proposed rule, the dramatic proliferation of electronic-based interchanges and maintenance of information has enabled easier and more ready access to information that once may have been de facto protected for most people because of the difficulty of its collection and aggregation. It is also our understanding that current state laws vary widely with regard to the privacy protection of a deceased individual's individually identifiable health information. Some are less protective than others and may not take into account the implications of disclosure

of genetic and hereditary information on living individuals. For these reasons, a regulatory standard is needed here in order to adequately protect the privacy interests of those who are living.

Comment: Another commenter expressed concern over the administrative problems that the proposed standard would impose, particularly in the field of retrospective health research.

Response: For certain research purposes, we permit a covered entity to use and disclose the protected health information of a deceased individual without authorization by a personal representative and absent review by an IRB or privacy board. The verification standard (§ 164.514(h)) requires that covered entities obtain an oral or written representation that the protected health information sought will be used or disclosed solely for research, and § 164.512(i)(1)(iii) requires the covered entity to obtain from the researcher documentation of the death of the individual. We believe the burden on the covered entity will be small, because it can reasonably rely on the representation of purpose and documentation of death presented by the researcher.

Comment: A few commenters argued that the standard in the proposed rule would cause significant administrative burdens on their record retention and storage policies. Commenters explained that they have internal policy record-retention guidelines which do not envision the retention of records beyond a few years. Some commenters complained about the burden of having to track dates of death, as the commenters are not routinely notified when an individual has died.

Response: The final rule does not dictate any record retention requirements for the records of deceased individuals. Since we have modified the NPRM to cover protected health information about deceased individuals for as long as the covered entity maintains the information, there will be no need for the covered entity to track dates of death.

Comment: A few commenters voiced support for the approach proposed in the proposal to maintain protections for a period of two years.

Response: After consideration of public comments, we chose not to retain this approach because the two-year period would be both inadequate and arbitrary. As discussed above, we agree with commenter arguments in support of providing indefinite protection.

Comment: A few commenters expressed concern that the regulations may be interpreted as providing a right of access to a deceased's records only for a two-year period after death. They asked the Department to clarify that the right of access of an individual, including the representatives of a deceased individual, exists for the entire period the information is held by a covered entity.

Response: We agree with these comments, given the change in policy discussed above.

Comment: A few commenters suggested that privacy protections on protected health information about deceased individuals remain in effect for a specified time period longer than 2 years, arguing that two years was not long enough to protect the privacy rights of living individuals. These commenters, however, were not in agreement as to what other period of protection should be imposed, suggesting various durations from 5 to 20 years.

Response: We chose not to extend protections in this way because specifying another time period would raise many of the same concerns voiced by the commenters regarding our proposed two year period and would not reduce the administrative burden of having to track or learn dates of death. We believe that the policy in this final rule extending protections for as long as the covered entity maintains the information addresses commenter concerns regarding the need for increased protections on the protected health information about the deceased.

Comment: Some commenters asserted that information on the decedent from the death certificate is important for assessment and research purposes and requested that the Department clarify accordingly that death certificate data be allowed for use in traditional public health assessment activities.

Response: Nothing in the final rule impedes reporting of death by covered entities as required or authorized by other laws, or access to death certificate data to the extent that such data is available publicly from non-covered entities. Death certificate data maintained by a covered entity is protected health information and must only be used or disclosed by a covered entity in accordance with the requirements of this regulation. However, the final rule permits a covered entity to disclose protected health information about a deceased individual for research purposes without authorization and absent IRB or privacy board approval.

Comment: A few commenters asked that we include in the regulation a mechanism to provide for notification of date of death. These commenters questioned how a covered entity or business partner would be notified of a death and subsequently be able to determine whether the two-year period of protection had expired and if they ***82633** were permitted to use or disclose the protected health information about the deceased. One commenter further stated that absent such a mechanism, a covered entity would continue to protect the information as if the individual were still living. This commenter recommended that the burden for providing notification and confirmation of death be placed on any authorized entity requesting information from the covered entity beyond the two-year period.

Response: In general, such notification is no longer necessary as, except for uses and disclosures for research purposes, the final rule protects the protected health information about a deceased individual for as long as the covered entity holds the record. With regard to uses and disclosures for research, the researcher must provide covered entities with appropriate documentation of proof of death, the burden is not on the covered entity.

Comment: A few commenters pointed to the sensitivity of genetic and hereditary information and its potential impact on the privacy of living relatives as a reason for extending protections on the information about deceased individuals for as long as the covered entity maintains the information. However, a few commenters recommended additional protections for genetic and hereditary information. For example, one commenter suggested that researchers should be able to use sensitive information of the deceased but then be required to publish findings in de-identified form. Another commenter recommended that protected health information about a deceased individual be protected as long as it implicates health problems that could be developed by living relatives.

Response: We agree with many of the commenters regarding the sensitivity of genetic or hereditary information and, in part for this reason, extended protections on the protected health information of deceased individuals. Our reasons for retaining the exception for research are explained above.

We agree with and support the practice of publishing research findings in de-identified form. However, we cannot regulate researchers who are not otherwise covered entities in this regulation.

Comment: One commenter asked that the final rule allow for disclosure of protected health information to funeral directors as necessary for facilitating funeral and disposition arrangements. The commenter believed that our proposal could seriously disrupt a family's ability to make funeral arrangements as hospitals, hospices, and other health care providers would not be allowed to disclose the time of death and other similar information critical to funeral directors for funeral preparation. The commenter also noted that funeral directors are already precluded by state licensing regulations and ethical standards from inappropriately disclosing confidential information about the deceased.

Further, the commenter stated that funeral directors have legitimate needs for protected health information of the deceased or of an individual when death is anticipated. For example, often funeral directors are contacted when death is foreseen in order to begin the process of planning funeral arrangements and prevent unnecessary delays. In addition, the embalming of the body is affected by the medical condition of the body.

In addition, it was noted that funeral directors need to be aware of the presence of a contagious or infectious disease in order to properly advise family members of funeral and disposition options and how they may be affected by state law. For example, certain states may prohibit cremation of remains for a certain period unless the death was caused by a contagious or infectious disease, or prohibit family members from assisting in preparing the body for disposition if there is a risk of transmitting a communicable disease from the corpse.

Response: We agree that disclosures to funeral directors for the above purposes should be allowed. Accordingly, the final rule at § 164.512(g)(2) permits covered entities to disclose protected health information to funeral directors, consistent with applicable law, as necessary to carry out their duties with respect to the decedent. Such disclosures are also permitted prior to, and in reasonable anticipation of, the individual's death.

Comment: Several commenters urged that the proposed standard for deceased individuals be clarified to allow access by a family member who has demonstrated a legitimate health-related reason for seeking the information when there is no executor, administrator, or other person authorized under applicable law to exercise the right of access of the individual.

Another commenter asked that the rule differentiate between blood relatives and family members and address their different access concerns, such as with genetic information versus information about transmittable diseases. They also recommended that the regulation allow access to protected health information by blood-related relatives prior to the end of the two-year period and provide them with the authority to extend the proposed two-year period of protection if they see fit. Lastly, the commenter suggested that the regulation address the concept of when the next-of-kin may not be appropriate to control a deceased person's health information.

Response: We agree that family members may need access to the protected health information of a deceased individual, and this regulation permits such disclosure in two ways. First, a family member may qualify as a "personal representative" of the individual (see § 164.502(g)). Personal representatives include anyone who has authority to act on behalf of a deceased individual or such individual's estate, not just legally-appointed executors. We also allow disclosure of protected health information to health care providers for purposes of treatment, including treatment of persons other than the individual. Thus, where protected health information about a deceased person is relevant to the treatment of a family member, the family member's physician may obtain that information. Because we limit these disclosures to disclosures for treatment purposes, there is no need to distinguish between disclosure of information about communicable diseases and disclosure of genetic information.

With regard to fitness to control information, we defer to existing state and other laws that address this matter.

Section 164.502(g)—Personal Representative

Comment: It was observed that under the proposed regulation, legal representatives with "power of attorney" for matters unrelated to health care would have unauthorized access to confidential medical records. Commenters recommended that access to a person's protected health information be limited to those representatives with a "power of attorney" for health care matters only. Related comments asked that the rule limit the definition of "power of attorney" to include only those instruments granting specific power to deal with health care functions and health care records.

Response: We have deleted the reference to "power of attorney." Under the final rule, a person is a personal representative of a living individual if, under applicable law, such person has authority to act on behalf of an individual in making decisions related to health care. "Decisions relating to health care" is broader than consenting to treatment on behalf of an individual; ***82634** for example, it would include decisions relating to payment for health care. We clarify that the rights and authorities of a personal representative under this rule are limited to protected health information relevant to the rights of the person to make decisions about an individual under other law. For example, if a husband has the authority only to make health care decisions about his wife in an emergency, he would have the right to access protected health information related to that emergency, but he may not have the right to access information about treatment that she had received ten years ago.

We note that the rule for deceased individuals differs from that of living individuals. A person may be a personal representative of a deceased individual if they have the authority to act on behalf of such individual or such individual's estate for any decision, not only decisions related to health care. We create a broader scope for a person who is a personal representative of a deceased individual because the deceased individual can not request that information be disclosed pursuant to an authorization, whereas a living individual can do so.

Comment: Some commenters asked that the NPRM provision allowing informal decision-makers access to the protected health information of an incapacitated individual should be maintained in the final rule.

Response: We agree with the commenters, and retain permission for covered entities to share protected health information with informal decision-makers, under conditions specified in § 164.510(b). A person need not be a personal representative for such disclosure of protected health information to be made to an informal decision-maker.

Comment: Commenters urged that individuals with mental retardation, who can provide verbal agreement or authorization, should have control over dissemination of their protected health information, in order to increase the privacy rights of such individuals.

Response: Individuals with mental retardation have control over dissemination of their protected health information under this rule to the extent that state law provides such individuals with the capacity to act on their own behalf. We note that a covered entity need not disclose information pursuant to a consent or authorization. Therefore, even if state law determines that an individual with mental retardation is not competent to act and a personal representative provides authorization for a disclosure, a covered entity may choose not to disclose such information if the individual who lacks capacity to act expresses his or her desire that such information not be disclosed.

Comment: A commenter suggested that the final rule should provide health plans with a set of criteria for formally identifying an incapacitated individual's decision-maker. Such criteria would give guidance to health plans that would help in not releasing information to the wrong person.

Response: The determination about who is a personal representative under this rule is based on state or other applicable law. We require that a covered entity verify the authority of a personal representative, in accordance with § 164.514(h) in order to disclose information to such person.

Comment: Commenters were troubled by the inclusion of minors in the definition of "individual" and believed that the presumption should be that parents have the right to care for their children.

Response: We agree that a parent should have access to the protected health information about their unemancipated minor children, except in limited circumstances based on state law. The approach in the final rule helps clarify this policy. The definition of "individual" is simplified in the final rule to "the person who is the subject of protected health information." (§ 164.501). We created a new section (§ 164.502(g)) to address "personal representatives," which includes parents and guardians of unemancipated minors. Generally, we provide that if under applicable law a parent has authority to act on behalf of an unemancipated minor in making decisions relating to health care about the minor, a covered entity must treat the parent as the personal representative with respect to protected health information relevant to such personal representation. The regulation provides only three limited exceptions to this rule based upon current state law and physician practice.

Comment: Many commenters agreed with our approach in the NPRM to give minors who may lawfully access health care the rights to control the protected health information related to such health care.

Several commenters disagreed with this approach and recommended that where states allow minors too much independence from parents, the rule should not defer to state law. One commenter suggested that we give an individual the right to control protected health information only when the individual reaches the age of majority.

Response: In the final rule, the parent, as the personal representative of a minor child, controls the protected health information about the minor, except that the parent does not act as a personal representative of the minor under the rule in three limited circumstances based on state consent law and physician practice. The final rule defers to consent laws of each state and does not attempt to evaluate the amount of control a state gives to a parent or minor. If a state provides an alternative means for a minor to obtain health care, other than with the consent of a parent, this rule preserves the system put in place by the state.

The first two exceptions, whereby a parent is not the personal representative for the minor and the minor can act for himself or herself under the rule, occur if the minor consents to a health care service, and no other consent to such health care service is required by law, or when the minor may lawfully obtain a health care service without the consent of a parent, and the minor, a court, or another person authorized by law consents to such service. The third exception is based on guidelines of the American Pediatric Association, current practice, and agreement by parents. If a parent assents to an agreement of confidentiality between a covered provider and a minor with respect to a health care service, the parent is not the personal representative of the minor with respect to the protected health information created or received subject to that confidentiality agreement. In such circumstances, the minor would have the authority to act as an individual, with respect to such protected health information.

Comment: Some commenters requested that we permit minors to exercise the rights of an individual when applicable law requires parental notification as opposed to parental consent.

Response: We adopt this policy in the final rule. If the minor consents to a health care service, and no other consent to such health care service is required by law, regardless of whether the consent of another person has also been obtained or notification to another person has been given, only the minor may be treated as the individual with respect to the protected health information relating to such health care service. The rule does not affect state law that authorizes or requires notification to a parent of a minor's decision to obtain a health care service to the extent authorized or required by such law. In addition, state parental notification laws do not affect the rights of minors under this regulation. ***82635**

Comment: Some commenters requested clarification that when a minor may obtain a health care service without parental consent and voluntarily chooses to involve a parent, the minor retains the rights, authorities and confidentiality protections established in this rule.

Response: We agree that minors should be encouraged to voluntarily involve a parent or other responsible adult in their health care decisions. The rule is not intended to require that minors choose between involving a parent and maintaining confidentiality protections. We have added language in § 164.502(g)(3)(i) to clarify that when a minor consents to a health care service and no other consent is required by law, if the minor voluntarily chooses to involve a parent or other adult, the minor nonetheless maintains the exclusive ability to exercise their rights under the rule. This is true even if a parent or other person also has consented to the health care service for which the minor lawfully consented. Under the rule, a minor may involve a parent and still preserve the confidentiality of their protected health information. In addition, a minor may choose to have a parent act as his or her personal representative even if the minor could act on his or her own behalf under the rule. If the minor requests that a covered entity treat a parent as his or her personal representative, the covered entity must treat such person as the minor's personal representative even if the minor consents to a health care service and no other consent to such health care service is required by law.

Comment: Some commenters requested that the rule provide for the preservation of patient confidences if a health care provider and a minor patient enter into an agreement of confidentiality and a parent assents to this arrangement.

Response: We have addressed this concern in the final rule by adding a provision that ensures that a minor maintains the confidentiality protections provided by the rule for information that is created or received pursuant to a confidential communication between a provider and a minor when the minor's parent assents to an agreement of confidentiality between the provider and the minor. (§ 164.502(g)(3)(ii)). The American Academy of Pediatrics Guidelines for Health Supervision III, which are meant to serve as "a framework to help clinicians focus on important issues at developmentally appropriate time intervals," recommends that physicians interview children alone beginning at the age of twelve (or as early as the age of ten if it is comfortable for the child). This recommendation is based on the fact that adolescents tend to underutilize existing health care resources, in part, because of a concern for confidentiality.[FN7] The recommended interview technique in the Guidelines states that the provider discuss the rules of confidentiality with the adolescent and the parent and that the adolescent's confidentiality should be respected. We do not intend to interfere with these established protocols or current practices. Covered entities will need to establish procedures to separate protected health information over which the minor maintains control from protected health information with respect to which the minor's parent has rights as a personal representative of the minor.

A covered provider may disclose protected health information to a parent, regardless of a confidentiality agreement, if there is an imminent threat to the minor or another person, in accordance with § 164.512(j)(1)(i).

Comment: Several commenters suggested that we add a provision in the final rule to provide minors and parents with concurrent rights under certain circumstances, particularly when the minor reaches 16 years of age or when a parent authorizes his or her minor child to exercise these rights concurrently.

Response: We do not add such provision in the final rule. We believe that establishing concurrent rights through this rule could result in problems that effect the quality of health care if the minor and the parent were to disagree on the exercise of their rights. The rule would not prevent a parent from allowing a minor child to make decisions about his or her protected health information and acting consistently with the minor's decision. In all cases, either the parent has the right to act for the individual with respect to protected health information, or the minor has the right to act for himself or herself. The rule does not establish concurrent rights for parents and minors.

Comment: Commenters requested clarification about the rights of an adult or emancipated minor with respect to protected health information concerning health care services rendered while the person was an unemancipated minor.

Response: Once a minor becomes emancipated or attains the age of majority, as determined by applicable state law, the parent is no longer the personal representative under § 164.502(g)(3) of such individual, unless the parent has the authority to act on behalf of the individual for some reason other than their authority as a parent. An adult or emancipated minor has rights under the rule with respect to all protected health information about them, including information obtained while the individual was an unemancipated minor.

Comment: One commenter pointed out that language in the definition of individual in the NPRM that grants a minor the rights of an individual when he or she "lawfully receives care without the consent of, or notification to, a parent * * *" would have the effect of granting rights to an infant minor who receives emergency care when the parent is not available.

Response: This result was not our intent. We have changed the language in § 164.502(g)(3)(i) of the final rule to provide a minor the right to act as an individual when the minor can obtain care without the consent of a parent and the minor consents to such care. Because an infant treated in an emergency situation would not be able to consent to care, the infant's parent would be treated as the personal representative of the infant. Section 164.502(g)(3)(ii) provides that the parent is not the personal representative of the minor under the rule if the minor may obtain health care without the consent of a parent and the minor, a court, or another person authorized by law consents to such service. If an infant obtains emergency care without the consent of a parent, a health care provider may provide such care without consent to treatment. This situation would fall outside the second exception, and the parent would remain the personal representative of the minor.

Comment: Commenters were concerned about the interaction of this rule with FERPA with respect to parents' right to access the medical records of their children.

Response: We direct the commenters to a discussion of the interaction between our rule and FERPA in the "Relationship to Other Federal Laws" section of the preamble.

Section 164.502(h)—Confidential Communications

Comments on confidential communications are addressed in the preamble to § 164.522(b). ***82636**

Section 164.502(i)—Uses and Disclosures Consistent With Notice

Comments on the notice requirements are addressed in the preamble to § 164.520.

Section 164.502(j)—Uses and Disclosures by Whistleblowers and Workforce Crime Victims

Comments: Some commenters wanted to see more limitations put on the ability to whistleblow in the final rule. These commenters were concerned about how disclosed protected health information would be used during and subsequent to the whistleblowing event and felt that adding additional limitations to the ability to whistleblow would help to alleviate these concerns. Some of these commenters were concerned that there was no protection against information later being leaked to the public or re-released after the initial whistleblowing event, and that this could put covered entities in violation of the law. Many commenters wanted to see the whistleblower provision deleted entirely. According to a number of health care associations who commented on this topic, current practices already include adequate mechanisms for informing law enforcement, oversight and legal counsel of possible violations without the need for patient identifiable information; thus, the provision allowing whistleblowers to share protected health information is unnecessary. Additionally, some commenters felt that the covered entity needs to be allowed to prohibit disclosures outside of legitimate processes. Some commenters were concerned about not having any recourse if the whistleblower's suspicions were unfounded.

Response: In this rule, we do not regulate the activities of whistleblowers. Rather, we regulate the activities of covered entities, and determine when they may be held responsible under this rule for whistleblowing activities of their workforce or business associates when that whistleblowing involves the disclosure of protected health information. Similarly, we regulate when covered entities must and need not sanction their workforce who disclose protected health information in violation of the covered entity's policies and procedures, when that disclosure is for whistleblowing purposes. See § 164.530(e). This rule does not address a covered entity's recourse against a whistleblower under other applicable law.

We do not hold covered entities responsible under this rule for whistleblowing disclosures of protected health information under the circumstances described in § 164.502(j). Our purpose in including this provision is to make clear that we are not erecting a new barrier to whistleblowing, and that covered entities may not use this rule as a mechanism for sanctioning workforce members or business associates for whistleblowing activity. We do not find convincing commenters' arguments for narrowing or eliminating the scope of the whistleblowing which triggers this protection.

Congress, as well as several states, have recognized the importance of whistleblower activity to help identify fraud and mismanagement and protect the public's health and safety. Whistleblowers, by their unique insider position, have access to critical information not otherwise easily attainable by oversight and enforcement organizations.

While we recognize that in many instances, de-identified or anonymous information can be used to accomplish whistleblower objectives, there are instances, especially involving patient care and billing, where this may not be feasible. Oversight investigative agencies such as the Department of Justice rely on identifiable information in order to issue subpoenas that are enforceable. Relevant court standards require the government agency issuing the subpoena to explain why the specific records requested are relevant to the subject of the investigation, and without such an explanation the subpoena will be quashed. Issuing

a subpoena for large quantities of individual records to find a few records involving fraud is cost prohibitive as well as likely being unenforceable.

We note that any subsequent inappropriate disclosure by a recipient of whistleblower information would not put the covered entity in violation of this rule, since the subsequent disclosure is not covered by this regulation.

Comments: A few commenters felt that the whistleblower should be held to a "reasonableness standard" rather than a "belief" that a violation has taken place before engaging in whistleblower activities. The commenters felt that a belief standard is too subjective. By holding the whistleblower to this higher standard, this would serve to protect protected health information from being arbitrarily released. Some commenters saw the whistleblower provision as a loophole that gives too much power to disgruntled employees to inappropriately release information in order to cause problems for the employer.

On the other hand, some commenters felt that all suspicious activities should be reported. This would ease potential whistleblowers' concerns over whether or not they had a legitimate concern by leaving this decision up to someone else. A number of commenters felt that employees should be encouraged to report violations of professional or clinical standards, or when a patient, employee, or the public would be put at risk. A small number of commenters felt that the whistleblower should raise the issue within the covered entity before going to the attorney, oversight agency, or law enforcement entity.

Response: We do not attempt to regulate the conduct of whistleblowers in this rule. We address uses and disclosures of protected health information by covered entities, and when a covered entity will violate this rule due to the actions of a workforce member or business associate. In the final rule, we provide that a covered entity is not in violation of the rule when a workforce member or business associate has a good faith belief that the conduct being reported is unlawful or otherwise violates professional or clinical standards, or potentially endangers patients, employees or the public. We concur that the NPRM language requiring only a "belief" was insufficient. Consequently, we have strengthened the standard to require a good faith belief that an inappropriate behavior has occurred.

Comment: A number of commenters believe that employees should be encouraged to report violations of professional or clinical standards, or report situations where patients, employees, or the public would be put at risk. Their contention is that employees, especially health care employees, may not know whether the problem they have encountered meets a legal threshold of wrongdoing, putting them at jeopardy of sanction if they are incorrect, even if the behavior did reflect violation of professional and clinical standards or put patients, employees, or the public at risk.

Response: We agree that covered entities should be protected when their employees and others engage in the conduct described by these commenters. We therefore modify the proposal to protect covered entities when the whistleblowing relates to violations of professional or clinical standards, or situations where the public may be at risk, and eliminate the reference to "evidence."

Comments: A significant number of those commenting on the whistleblower provision felt that this provision was contrary to the rest of the rule. ***82637** Whistleblowers could very easily release protected health information under this provision despite the fact that the rest of this rule works very hard to ensure privacy of protected health information in all other contexts. To this end, some commenters felt that whistleblowers should not be exempt from the minimum necessary requirement.

Response: As stated above, we do not regulate the conduct of whistleblowers. We discuss above the importance of whistleblowing, and our intention not to erect a new barrier to such activity. The minimum necessary standard applies to covered entities, not to whistleblowers.

Comments: Some commenters felt that disclosures of suspected violations should only be made to a law enforcement official or oversight agency. Other commenters said that whistleblowers should be able to disclose their concerns to long-term care ombudsmen or health care accreditation organizations, particularly because certain protected health information may contain evidence of abuse. Some commenters felt that whistleblowers should not be allowed to freely disclose information to attorneys.

They felt that this may cause more lawsuits within the health care industry and be costly to providers. Furthermore, allowing whistleblowers to go to attorneys increases the number of people who have protected health information without any jurisdiction for the Secretary to do anything to protect this information.

Response: We agree with the commenters who suggested that we recognize other appropriate entities to which workforce members and business associates might reasonably make a whistleblowing disclosure. In the final rule we expand the provision to protect covered entities for disclosures of protected health information made to accreditation organizations by whistleblowers. We agree with the commenters that whistleblowers may see these organizations as appropriate recipients of health information, and do not believe that covered entities should be penalized for such conduct.

We also agree that covered entities should be protected when whistleblowers disclose protected health information to any health oversight agency authorized by law to investigate or oversee the conditions of the covered entity, including state Long-Term Care Ombudsmen appointed in accordance with the Older Americans Act. Among their mandated responsibilities is their duty to identify, investigate and resolve complaints that are made by, or on behalf of, residents related to their health, safety, welfare, or rights. Nursing home staff often bring complaints regarding substandard care or abuse to ombudsmen. Ombudsmen provide a potentially more attractive outlet for whistleblowers since resolution of problems may be handled short of legal action or formal investigation by an oversight agency.

We disagree with commenters that the provision permitting disclosures to attorneys is too broad. Workforce members or business associates may not understand their legal options or their legal exposure when they come into possession of information about unlawful or other inappropriate or dangerous conduct. Permitting potential whistleblowers to consult an attorney provides them with a better understanding of their legal options. We rephrase the provision to improve its clarity.

Comment: One commenter suggested that a notice of information practices that omits disclosure for voluntary reporting of fraud will chill internal whistleblowers who will be led to believe—falsely—that they would violate federal privacy law, and be lawfully subject to sanction by their employer, if they reported fraud to health oversight agencies.

Response: The notice of information practices describes a covered entity's information practices. A covered entity does not make whistleblower disclosures of protected health information, nor can it be expected to anticipate any such disclosures by its workforce.

Comment: One commenter suggested that the whistleblower provisions could allow covered entities to make illegal disclosures to police through the back door by having an employee who believes there is a violation of law do the disclosing. Any law could have been violated and the violator could be anyone (a patient, a member of the patient's family, etc.)

Response: We have eliminated whistleblower disclosures for law enforcement purposes from the list of circumstances in which the covered entity will be protected under this rule. This provision is intended to protect the covered entity when a member of its workforce or a business associate discloses protected health information to whistleblow on the covered entity (or its business associates); it is not intended for disclosures of conduct by the individual who is the subject of the information or third parties.

Section 164.504—Uses and Disclosures—Organizational Requirements—Component Entities, Affiliated Entities, Business Associates and Group Health Plans

Section 164.504(a)-(c)—Health Care Component (Component Entities) and Section 164.504(d)—Affiliated Entities

Comment: A few commenters asked that the concept of "use" be modified to allow uses within an integrated healthcare delivery system. Commenters argued that the rule needs to ensure that the full spectrum of treatment is protected from the need for authorizations at the points where treatment overlaps entities. It was explained that, for example, treatment for a patient often includes services provided by various entities, such as by a clinic and hospital, or that treatment may also necessitate referrals

from one provider entity to another unrelated entity. Further, the commenter argued that the rule needs to ensure that the necessary payment and health care operations can be carried out across entities without authorizations.

Response: The Department understands that in today's health care industry, the organization of and relationships among health care entities are highly complex and varied. We modify the proposed rule significantly to allow affiliated entities to designate themselves as a single covered entity. A complex organization, depending on how it self-designates, may have one or several "health care component(s)" that are each a covered entity. Aggregation into a single covered entity will allow the entities to use a single notice of information practices and will allow providers that must obtain consent for uses and disclosures for treatment, payment, and operations to obtain a single consent.

We do not allow this type of aggregation for unrelated entities, as suggested by some commenters, because unrelated entities' information practices will be too disparate to be accurately reflected on a single consent or notice form. Our policies on when consent and authorization are required for sharing information among unrelated entities, and the rationale for these policies, is described in §§ 164.506 and 164.508 and corresponding preamble.

As discussed above, in the final rule we have added a definition of organized health care arrangement and permit covered entities participating in such arrangements to disclose protected health information to support the health care operations of the arrangement. See the preamble discussion of the definitions of organized health care ***82638** arrangement and health care operations, § 164.501.

Comment: Some commenters expressed concern that the requirement to obtain authorization for the disclosure of information to a non-health related division of the covered entity would impede covered entities' ability to engage in otherwise-permissible activities such as health care operations. Some of these commenters requested clarification that covered entities are only required to obtain authorization for disclosures to non-health related divisions if the disclosure is for marketing purposes.

Response: In the final rule, we remove the example of use and disclosure to non-health related divisions of the covered entity from the list of examples of uses and disclosures requiring authorization in § 164.508. We determined that the example could lead covered entities to the mistaken conclusion that some uses or disclosures that would otherwise be permitted under the rule without authorization would require authorization when made to a non-health related division of the covered entity. In the final rule, we clarify that disclosure to a non-health related division does not require authorization if the use or disclosure is otherwise permitted or required under the rule. For example, in § 164.501 we define health care operations to include conducting or arranging for legal and auditing services. A covered entity that is the health care component of a larger entity is permitted under the final rule to include the legal department of the larger entity as part of the health care component. The covered entity may not, however, generally permit the disclosure of protected health information from the health care component to non-health related divisions unless they support the functions of the health care component and there are policies and procedures in place to restrict the further use to the support of the health related functions.

Comment: Many commenters, especially those who employed providers, supported our position in the proposed rule to consider only the health care component of an entity to be the covered entity. They stated that this was a balanced approach that would allow them to continue conducting business. Some commenters felt that there was ambiguity in the regulation text of the proposed rule and requested that the final rule explicitly clarify that only the health care component is considered the covered entity, not the entity itself. Similarly, another commenter requested that we clarify that having a health care component alone did not make the larger entity a covered entity under the rule.

Response: We appreciate the support of the commenters on the health care component approach and we agree that there was some ambiguity in the proposed rule. The final rule creates a new § 164.504(b) for health care components. Under § 164.504(b), for a covered entity that is a single legal entity which predominantly performs functions other than the functions performed by a health plan, provider, or clearinghouse, the privacy rules apply only to the entity's health care component. A policy, plan, or program that is an "excepted benefit" under section 2791(c)(1) of HIPAA cannot be part of a health care component because it is

expressly excluded from the definition of "health plan" for the reasons discussed above. The health care component is prohibited from sharing protected health information outside of the component, except as otherwise permitted or required by the regulation.

At a minimum, the health care component includes the organizational units of the covered entity that operate as or perform the functions of the health plan, health care provider, or clearinghouse and does not include any unit or function of the excepted benefits plan, policy, or program. While the covered entity remains responsible for compliance with this rule because it is responsible for the actions of its workforce, we otherwise limit the responsibility to comply to the health care component of the covered entity. The requirements of this rule apply only to the uses and disclosures of the protected health information by the component entity. See § 164.504(b).

Comment: Some commenters stated that the requirement to erect firewalls between different components would unnecessarily delay treatment, payment, and health care operations and thereby increase costs. Other commenters stressed that it is necessary to create firewalls between the health care component and the larger entity to prevent unauthorized disclosures of protected health information.

Response: We believe that the requirement to implement firewalls or safeguards is necessary to provide meaningful privacy protections, particularly because the health care component is part of a larger legal organization that performs functions other than those covered under this rule. Without the safeguard requirement we cannot ensure that the component will not share protected health information with the larger entity. While we do not specifically identify the safeguards that are required, the covered entity must implement policies and procedures to ensure that: the health care component's use and disclose of protected health information complies with the regulation; members of the health care component who perform duties for the larger entity do not use and disclose protected health information obtained through the health care component while performing non-component functions unless otherwise permitted or required by the regulation; and when a covered entity conducts multiple functions regulated under this rule, the health care component adheres to the appropriate requirements (e.g. when acting as a health plan, adheres to the health plan requirements) and uses or discloses protected health information of individuals who receive limited functions from the component only for the appropriate functions. See §§ 164.504(c)(2) and 164.504(g). For example, a covered entity that includes both a hospital and a health plan may not use protected health information obtained from an individual's hospitalization for the health plan, unless the individual is also enrolled in the health plan. We note that covered entities are permitted to make a disclosure to a health care provider for treatment of an individual without restrictions.

Comment: One commenter stated that multiple health care components of a single organization should be able to be treated as a single component entity for the purposes of this rule. Under this approach, they argued, one set of policies and procedures would govern the entire component and protected health information could be shared among components without authorization. Similarly, other commenters stated that corporate subsidiaries and affiliated entities should not be treated as separate covered entities.

Response: We agree that some efficiencies may result from designating multiple component entities as a single covered entity. In the final rule we allow legally distinct covered entities that share common ownership or control to designate themselves or their health care components as a single covered entity. See § 164.504(d). Common ownership is defined as an ownership or equity interest of five percent or more. Common control exists if an entity has the power—directly or indirectly—to significantly influence or direct the actions or policies of another entity. If the affiliated entity contains health care components, it must implement safeguards to prevent the ***82639** larger entity from using protected health information maintained by the component entity. As stated above, organizations that perform multiple functions may designate a single component entity as long as it does not include the functions of an excepted benefit plan that is not covered under the rule. In addition, it must adhere to the appropriate requirements when performing its functions (e.g. when acting as a health plan, adhere to the health plan requirements) and uses or discloses protected health information of individuals who receive limited functions from the component only for the appropriate functions. At the same time, a component that is outside of the health care component may perform activities that otherwise are not permitted by a covered entity, as long as it does not use or disclose protected health information created or received by or on behalf of the health care component in ways that violate this rule.

Comment: Some commenters asked whether or not workers' compensation carriers could be a part of the health care component as described in the proposed rule. They argued that this would allow for sharing of information between the group health plan and workers' compensation insurers.

Response: Under HIPAA, workers' compensation is an excepted benefit program and is excluded from the definition of "health plan." As such, a component of a covered entity that provides such excepted benefits may not be part of a health care component that performs the functions of a health plan. If workforce members of the larger entity perform functions for both the health care component and the non-covered component, they may not use protected health information created or received by or on behalf of the health care component for the purposes of the non-covered component, unless otherwise permitted by the rule. For example, information may be shared between the components for coordination of benefits purposes.

Comment: Several commenters requested specific guidance on identifying the health care component entity. They argued that we underestimated the difficulty in determining the component and that many organizations have multiple functions with the same people performing duties for both the component and the larger entity.

Response: With the diversity of organizational structures, it is impossible to provide a single specific guidance for identifying health care components that will meet the needs of all organizations. Covered entities must designate their health care components consistent with the definition at § 164.504(a). We have tried to frame this definition to delineate what comes within a health care component and what falls outside the component.

Comment: A commenter representing a government agency recommended that only the component of the agency that runs the program be considered a covered entity, not the agency itself. In addition, this commenter stated that often subsets of other government agencies work in partnership with the agency that runs the program to provide certain services. For example, one state agency may provide maternity support services to the Medicaid program which is run by a separate agency. The commenter read the rule to mean that the agency providing the maternity support services would be a business associate of the Medicaid agency, but was unclear as to whether it would also constitute a health care component within its own agency.

Response: We generally agree. We expect that in most cases, government agencies that run health plans or provide health care services would typically meet the definition of a "hybrid entity" under § 164.504(a), so that such an agency would be required to designate the health care component or components that run the program or programs in question under § 164.504(c)(3), and the rules would not apply to the remainder of the agency's operations, under § 164.504(b). In addition, we have created an exception to the business associate contract requirement for government agencies who perform functions on behalf of other government agencies. Government agencies can enter into a memorandum of understanding with another government entity or adopt a regulation that applies to the other government entity in lieu of a business associate contract, as long as the memorandum or regulation contains certain terms. See § 164.504(e).

Comment: One commenter representing an insurance company stated that different product lines should be treated separately under the rule. For example, the commenter argued, because an insurance company offers both life insurance and health insurance, it does not mean that the insurance company itself is a covered entity, rather only the health insurance component is a covered entity. Another commenter requested clarification of the use of the term "product line" in the proposed rule. This commenter stated that product line should differentiate between different lines of coverage such as life vs. health insurance, not different variations of the same coverage, such as HMO vs. PPO. Finally, one commenter stated that any distinction among product lines is unworkable because insurance companies need to share information across product lines for coordinating benefits. This sharing of information, the commenter urged, should be able to take place whether or not all product lines are covered under the rule.

Response: We agree that many forms of insurance do not and should not come within the definition of "health plan," and we have excepted them from the definition of this term in § 160.103 applies. This point is more fully discussed in connection with

that definition. Although we do not agree that the covered entity is only the specific product line, as this comment suggests, the hybrid entity rules in § 164.504 address the substance of this concern. Under § 164.504(c)(3), an entity may create a health plan component which would include all its health insurance lines of business or separate health care components for each health plan product line. Finally, the sharing of protected health information across lines of business is allowed if it meets the permissive or required disclosures under the rule. The commenter's example of coordination of benefits would be allowed under the rule as payment.

Comment: Several commenters representing occupational health care providers supported our use of the component approach to prohibit unauthorized disclosures of protected health information. They requested that the regulation specifically authorize them to deny requests for disclosures outside of the component entity when the disclosure was not otherwise permitted or required by the regulation.

Response: We appreciate the commenters' support of the health care component approach. As members of a health care component, occupational health providers are prohibited from sharing protected health information with the larger entity (i.e., the employer), unless otherwise permitted or required by the regulation.

Comment: One commenter asked how the regulation affects employers who carry out research. The commenter questioned whether the employees carrying out the research would be component entities under the rule.

Response: If the employer is gathering its own information rather than obtaining it from an entity regulated by this rule, the information does not constitute protected health information since the employer is not a covered ***82640** entity. If the employer is obtaining protected health information from a covered entity, the disclosure by the covered entity must meet the requirements of § 164.512(i) regarding disclosures for research.

Comment: One commenter stated that the proposed rule did not clearly articulate whether employees who are health care providers are considered covered entities when they collect and use individually identifiable health information acting on behalf of an employer. Examples provided include, administering mandatory drug testing, making fitness-for-duty and return-to-work determinations, testing for exposure to environmental hazards, and making short and long term disability determinations. This commenter argued that if disclosing information gained through these activities requires authorization, many of the activities are meaningless. For example, an employee who fails a drug test is unlikely to give authorization to the provider to share the information with the employer.

Response: Health care providers are covered entities under this rule if they conduct standard transactions. A health care provider who is an employee and is administering drug testing on behalf of the employer, but does not conduct standard transactions, is not a covered entity. If the health care provider is a covered entity, then we require authorization for the provider to disclose protected health information to an employer. Nothing in this rule, however, prohibits the employer from conditioning an individual's employment on agreeing to the drug testing and requiring the individual to sign an authorization allowing his or her drug test results to be disclosed to the employer.

Comment: One commenter stated its belief that only a health center at an academic institution would be a covered entity under the component approach. This commenter believed it was less clear whether or not other components that may create protected health information “incidentally” through conducting research would also become covered entities.

Response: While a covered entity must designate as a health care component the functions that make it a health care provider, the covered entity remains responsible for the actions of its workforce. Components that create protected health information through research would be covered entities to the extent they performed one of the required transactions described in § 164.500; however, it is possible that the research program would not be part of the health care component, depending on whether the research program performed or supported covered functions.

Comment: Several commenters stated that employers need access to protected health information in order to provide employee assistance programs, wellness programs, and on-site medical testing to their employees.

Response: This rule does not affect disclosure of health information by employees to the employer if the information is not obtained from a covered entity. The employer's access to information from an EAP, wellness program, or on-site medical clinic will depend on whether the program or clinic is a covered entity.

Comment: One commenter stated that access to workplace medical records by the occupational medical physicians is fundamental to workplace and community health and safety. Access is necessary whether it is a single location or multiple sites of the same company, such as production facilities of a national company located throughout the country.

Response: Health information collected by the employer directly from providers who are not covered entities is outside the scope of this regulation. We note that the disclosures which this comment concerns should be covered by § 164.512(b).

Section 164.504(e)—Business Associates

Comment: Many commenters generally opposed the business partner standard and questioned the Secretary's legal authority under section 1172(a) of HIPAA to require business partner contracts. Others stated that the proposed rule imposed too great a burden on covered entities with regard to monitoring their business partners' actions. Commenters stated that they did not have the expertise to adequately supervise their business partners' activities—including billing, accounting, and legal activities—to ensure that protected health information is not inappropriately disclosed. Commenters argued that business partners are not "under the control" of health care providers, and that the rule would significantly increase the cost of medical care. Many commenters stated that the business partner provisions would be very time consuming and expensive to implement, noting that it is not unusual for a health plan or hospital to have hundreds of business partners, especially if independent physicians and local pharmacies are considered business partners. Many physician groups pointed out that their business partners are large providers, hospitals, national drug supplier and medical equipment companies, and asserted that it would be impossible, or very expensive, for a small physician group to attempt to monitor the activity of large national companies. Commenters stated that complex contract terms and new obligations would necessitate the investment of significant time and resources by medical and legal personnel, resulting in substantial expenses. Many commenters proposed that the duty to monitor be reduced to a duty to terminate the contractual arrangement upon discovery of a failure to comply with the privacy requirements.

In addition, many commenters argued that covered entities should have less responsibility for business partners' actions regarding the use and disclosure of protected health information. The proposed rule would have held covered entities responsible for the actions of their business partners when they "knew or reasonably should have known" of improper use of protected health information and failed to take reasonable steps to cure a breach of the business partner contract or terminate the contract. Many commenters urged that the term "knew or should have known" be clearly defined, with examples. Some commenters stated that covered entities should be liable only when they have actual knowledge of the material breach of the privacy rules by the business partner. Others recommended creation of a process by which a business partner could seek advice to determine if a particular disclosure would be appropriate. Some commenters stated that, in order to create an environment that would encourage covered entities to report misuses of protected health information, a covered entity should not be punished if it discovered an inappropriate disclosure.

Response: With regard to our authority to require business associate contracts, we clarify that Congress gave the Department explicit authority to regulate what uses and disclosures of protected health information by covered entities are "authorized." If covered entities were able to circumvent the requirements of these rules by the simple expedient of contracting out the performance of various functions, these rules would afford no protection to individually identifiable health information and be rendered meaningless. It is thus reasonable to place restrictions on disclosures to business associates that are designed to ensure that the personal medical information disclosed to them continues to be protected and used and further ***82641** disclosed only for appropriate (i.e., permitted or required) purposes.

We do not agree that business associate contracts would necessarily have complex terms or result in significant time and resource burdens. The implementation specifications for business associate contracts set forth in § 164.504 are straightforward and clear. Nothing prohibits covered entities from having standard contract forms which could require little or no modification for many business associates.

In response to comments that the "knew or should have known" standard in the proposed rule was too vague or difficult to apply, and concerns that we were asking too much of small entities in monitoring the activities of much larger business associates, we have changed the rule. Under the final rule, we put responsibility on the covered entity to take action when it "knew of a pattern of activity or practice of the business associate that constituted, respectively, a material breach or violation of the business associate's obligation under the contract * * *" This will preclude confusion about what a covered entity 'should have known.' We interpret the term "knew" to include the situation where the covered entity has credible evidence of a violation. Covered entities cannot avoid responsibility by intentionally ignoring problems with their contractors. In addition, we have eliminated the requirement that a covered entity actively monitor and ensure protection by its business associates. However, a covered entity must investigate credible evidence of a violation by a business associate and act upon any such knowledge.

In response to the concern that the covered entity should not be punished if it discovers an inappropriate disclosure by its business associate, § 164.504(e) provides that the covered entity is not in compliance with the rule if it fails to take reasonable steps to cure the breach or end the violation, while § 164.530(f) requires the covered entity to mitigate, to the extent practicable, any resultant harm. The breach itself does not cause a violation of this rule.

Comment: Some commenters voiced support for the concept of business partners. Moreover, some commenters urged that the rule apply directly to those entities that act as business partners, by restricting disclosures of protected health information after a covered entity has disclosed it to a business partner.

Response: We are pleased that commenters supported the business associate standard and we agree that there are advantages to legislation that directly regulates most entities that use or disclose protected health information. However, we reiterate that our jurisdiction under the statute limits us to regulate only those covered entities listed in § 160.102.

Comment: Many commenters strongly opposed the provision in the proposed rule requiring business partner contracts to state that individuals whose protected health information is disclosed under the contract are intended third party beneficiaries of the contract. Many noted that HIPAA did not create a private right of action for individuals to enforce a right to privacy of medical information, and questioned the Secretary's authority to create such a right through regulation. Others questioned whether the creation of such a right was appropriate in light of the inability of Congress to reach consensus on the question, and perceived the provision as a "back door" attempt to create a right that Congress did not provide. Some commenters noted that third party beneficiary law varies from state to state, and that a third party beneficiary provision may be unenforceable in some states. These commenters suggested that the complexity and variation of state third party beneficiary law would increase cost and confusion with limited privacy benefits.

Commenters predicted that the provision would result in a dramatic increase in frivolous litigation, increased costs throughout the health care system, and a chilling effect on the willingness of entities to make authorized disclosures of protected information. Many commenters predicted that fear of lawsuits by individuals would impede the flow of communications necessary for the smooth operation of the health care system, ultimately affecting quality of care. For example, some predicted that the provision would inhibit providers from making authorized disclosures that would improve care and reduce medical errors. Others predicted that it would limit vendors' willingness to support information systems requirements. One large employer stated that the provision would create a substantial disincentive for employers to sponsor group health plans. Another commenter noted that the provision creates an anomaly in that individuals may have greater recourse against business partners and covered entities that contract with them than against covered entities acting alone.

However, some commenters strongly supported the concept of providing individuals with a mechanism to enforce the provisions of the rule, and considered the provision among the most important privacy protections in the proposed rule.

Response: We eliminate the requirement that business associate contracts contain a provision stating that individuals whose protected health information is disclosed under the contract are intended third-party beneficiaries of the contract.

We do not intend this change to affect existing laws regarding when individuals may be third party beneficiaries of contracts. If existing law allows individuals to claim third party beneficiary rights, or prohibits them from doing so, we do not intend to affect those rules. Rather, we intend to leave this matter to such other law.

Comment: Some commenters objected to the proposed rule's requirement that the business partner must return or destroy all protected health information received from the covered entity at the termination of the business partner contract. Commenters argued that business partners will need to maintain business records for legal and/or financial auditing purposes, which would preclude the return or destruction of the information. Moreover, they argued that computer back-up files may contain protected health information, but business partners cannot be expected to destroy entire electronic back-up files just because part of the information that they contain is from a client for whom they have completed work.

Response: We modify the proposed requirement that the business associate must return or destroy all protected health information received from the covered entity when the business associate contract is terminated. Under the final rule, a business associate must return or destroy all protected health information when the contract is terminated if feasible and lawful. The business partner contract must state that privacy protections continue after the contract ends, if there is a need for the business associate to retain any of the protected health information and for as long as the information is retained. In addition, the permissible uses of information after termination of the contract must be limited to those activities that make return or destruction of the information not feasible.

Comment: Many commenters recommended that providers and plans be excluded from the definition of “business partner” if they are already governed by the rule as covered entities. Providers expressed particular concern about the inclusion of physicians with hospital privileges as business partners of the hospital, as each hospital would ***82642** be required to have written contracts with and monitor the privacy practices of each physician with privileges, and each physician would be required to do the same for the hospital. Another commenter argued that consultations between covered entities for treatment or referral purposes should not be subject to the business partner contracting requirement.

Response: The final rule retains the general requirement that, subject to the exceptions below, a covered entity must enter into a business associate contract with another covered entity when one is providing services to or acting on behalf of the other. We retain this requirement because we believe that a covered entity that is a business associate should be restricted from using or disclosing the protected health information it creates or receives through its business associate function for any purposes other than those that are explicitly detailed in its contract.

However, the final rule expands the proposed exception for disclosures of protected health information by a covered health care provider to another health care provider. The final rule allows such disclosures without a business associate contract for any activities that fall under the definition of “treatment.” We agree with the commenter that the administrative burdens of requiring contracts in staff privileges arrangements would not be outweighed by any potential privacy enhancements from such a requirement. Although the exception for disclosure of protected health information for treatment could be sufficient to relieve physicians and hospitals of the contract requirement, we also believe that this arrangement does not meet the true meaning of “business associate,” because both the hospital and physician are providing services to the patient, not to each other. We therefore also add an exception to § 164.502(e)(1) that explicitly states that a contract is not required when the association involves a health care facility and another health care provider with privileges at that facility, if the purpose is providing health care to the individual. We have also added other exceptions in § 164.502(e)(1)(ii) to the requirement to obtain “satisfactory assurances” under § 164.502(e)(1)(i). We do not require a business associate arrangement between group health plans and their

plan sponsors because other, albeit analogous, requirements apply under § 164.504(f) that are more tailored to the specifics of that legal relationship. We do not require business associate arrangements between government health plans providing public benefits and other agencies conducting certain functions for the health plan, because these arrangements are typically very constrained by other law.

Comment: Many commenters expressed concern that required contracts for federal agencies would adversely affect oversight activities, including investigations and audits. Some health plan commenters were concerned that if HMOs are business partners of an employer then the employer would have a right to all personal health information collected by the HMO. A commenter wanted to be sure that authorization would not be required for accreditation agencies to access information. A large manufacturing company wanted to make sure that business associate contracts were not required between affiliates and a parent corporation that provides administrative services for a sponsored health plan. Attorney commenters asserted that a business partner contract would undermine the attorney/client relationship, interfere with attorney/client privilege, and was not necessary to protect client confidences. A software vendor wanted to be excluded because the requirements for contracts were burdensome and government oversight intrusive. Some argued that because the primary purpose of medical device manufacturers is supplying devices, not patient care, they should be excluded.

Response: We clarify in the above discussion of the definition of "business associate" that a health insurance issuer or an HMO providing health insurance or health coverage to a group health plan does not become a business associate simply by providing health insurance or health coverage. The health insurance issuer or HMO may perform additional functions or activities or provide additional services, however, that would give rise to a business associate relationship. However, even when an health insurance issuer or HMO acts as a business associate of a group health plan, the group health plan has no right of access to the other protected health information maintained by the health insurance issuer or HMO. The business associate contract must constrain the uses and disclosures of protected health information obtained by the business associate through the relationship, but does not give the covered entity any right to request the business associate to disclose protected health information that it maintains outside of the business associate relationship to the group health plan. Under HIPAA, employers are not covered entities, so a health insurance issuer or HMO cannot act as a business associate of an employer. See § 164.504(f) with respect to disclosures to plan sponsors from a group health plan or health insurance issuer or HMO with respect to a group health plan.

With respect to attorneys generally, the reasons the commenters put forward to exempt attorneys from this requirement were not persuasive. The business associate requirements will not prevent attorneys from disclosing protected health information as necessary to find and prepare witness, nor from doing their work generally, because the business associate contract can allow disclosures for these purposes. We do not require business associate contracts to identify each disclosure to be made by the business associate; these disclosures can be identified by type or purpose. We believe covered entities and their attorneys can craft agreements that will allow for uses and disclosures of protected health information as necessary for these activities. The requirement for a business associate contract does not interfere with the attorney-client relationship, nor does it override professional judgement of business associates regarding the protected health information they need to discharge their responsibilities. We do not require covered entities to second guess their professional business associates' reasonable requests to use or disclose protected health information in the course of the relationship.

The attorney-client privilege covers only a small portion of information provided to attorneys and so is not a substitute for this requirement. More important, attorney-client privilege belongs to the client, in this case the covered entity, and not to the individual who is the subject of the information. The business associate requirements are intended to protect the subject of the information.

With regard to government attorneys and other government agencies, we recognize that federal and other law often does not allow standard legal contracts among governmental entities, but instead requires agreements to be made through the Economy Act or other mechanisms; these are generally reflected in a memorandum of understanding (MOU). We therefore modify the proposed requirements to allow government agencies to meet the required "satisfactory assurance" through such MOUs that contain the same provisions required of business associate contracts. As discussed elsewhere, we believe that direct regulation

of entities receiving protected health information can be as or more effective in protecting health ***82643** information as contracts. We therefore also allow government agencies to meet the required "satisfactory assurances" if law or regulations impose requirements on business associates consistent with the requirements specified for business associate contracts.

We do not believe that the requirement to have a business associate contract with agencies that are performing the specified services for the covered entity or undertaking functions or activities on its behalf undermines the government functions being performed. A business associate arrangement requires the business associate to maintain the confidentiality of the protected health information and generally to use and disclose the information only for the purposes for which it was provided. This does not undermine government functions. We have exempted from the business associate requirement certain situations in which the law has created joint uses or custody over health information, such as when law requires another government agency to determine the eligibility for enrollment in a covered health plan. In such cases, information is generally shared across a number of government programs to determine eligibility, and often is jointly maintained. We also clarify that health oversight activities do not give rise to a business associate relationship, and that protected health information may be disclosed by a covered entity to a health oversight agency pursuant to § 164.512(d).

We clarify for purposes of the final rule that accreditation agencies are business associates of a covered entity and are explicitly included within the definition. During accreditation, covered entities disclose substantial amounts of protected health information to other private persons. A business associate contract basically requires the business associate to maintain the confidentiality of the protected health information that it receives and generally to use and disclose such information for the purposes for which it was provided. As with attorneys, we believe that requiring a business associate contract in this instance provides substantial additional privacy protection without interfering with the functions that are being provided by the business associate.

With regard to affiliates, § 164.504(d) permits affiliates to designate themselves as a single covered entity for purposes of this rule. (See § 164.504(d) for specific organizational requirements.) Affiliates that choose to designate themselves as a single covered entity for purposes of this rule will not need business associate contracts to share protected health information. Absent such designation, affiliates are business associates of the covered entity if they perform a function or service for the covered entity that necessitates the use or disclosure of protected health information.

Software vendors are business associates if they perform functions or activities on behalf of, or provide specified services to, a covered entity. The mere provision of software to a covered entity would not appear to give rise to a business associate relationship, although if the vendor needs access to the protected health information of the covered entity to assist with data management or to perform functions or activities on the covered entity's behalf, the vendor would be a business associate. We note that when an employee of a contractor, like a software or IT vendor, has his or her primary duty station on-site at a covered entity, the covered entity may choose to treat the employee of the vendor as a member of the covered entity's workforce, rather than as a business associate. See the preamble discussion to the definition of workforce, § 160.103.

With regard to medical device manufacturers, we clarify that a device manufacturer that provides "health care" consistent with the rule's definition, including being a "supplier" under the Medicare program, is a health care provider under the final rule. We do not require a business associate contract when protected health information is shared among health care providers for treatment purposes. However, a device manufacturer that does not provide "health care" must be a business associate of a covered entity if that manufacturer receives or creates protected health information in the performance of functions or activities on behalf of, or the provision of specified services to, a covered entity.

As to financial institutions, they are business associates under this rule when they conduct activities that cause them to meet the definition of business associate. See the preamble discussion of the definition of "payment" in § 164.501, for an explanation of activities of a financial institution that do not require it to have a business associated contract.

Disease managers may be health care providers or health plans, if they otherwise meet the respective definitions and perform disease management activities on their own behalf. However, such persons may also be business associates if they perform disease management functions or services for a covered entity.

Comment: Other commenters recommended that certain entities be included within the definition of "business partner," such as transcription services; employee representatives; in vitro diagnostic manufacturers; private state and comparative health data organizations; state hospital associations; warehouses; "whistleblowers," credit card companies that deal with health billing; and patients.

Response: We do not list all the types of entities that are business associates, because whether an entity is a business associate depends on what the entity does, not what the entity is. That is, this is a definition based on function; any entity performing the function described in the definition is a business associate. Using one of the commenters' examples, a state hospital association may be a business associate if it performs a service for a covered entity for which protected health information is required. It is not a business associate by virtue of the fact that it is a hospital association, but by virtue of the service it is performing.

Comment: A few commenters urged that certain entities, i.e., collection agencies and case managers, be business partners rather than covered entities for purposes of this rule.

Response: Collection agencies and case managers are business associates to the extent that they provide specified services to or perform functions or activities on behalf of a covered entity. A collection agency is not a covered entity for purposes of this rule. However, a case manager may be a covered entity because, depending on the case manager's activities, the person may meet the definition of either a health care provider or a health plan. See definitions of "health care provider" and "health plan" in § 164.501.

Comment: Several commenters complained that the proposed HIPAA security regulation and privacy regulation were inconsistent with regard to business partners.

Response: We will conform these policies in the final Security Rule.

Comment: One commenter expressed concern that the proposal appeared to give covered entities the power to limit by contract the ability of their business partners to disclose protected health information obtained from the covered entity regardless of whether the disclosure was permitted under proposed § 164.510, "Uses and disclosures for which individual authorization is not required" (§ 164.512 in the final rule). Therefore, the commenter argued that the covered ***82644** entity could prevent the business partner from disclosing protected health information to oversight agencies or law enforcement by omitting them from the authorized disclosures in the contract.

In addition, the commenter expressed concern that the proposal did not authorize business partners and their employees to engage in whistleblowing. The commenter concluded that this omission was unintended since the proposal's provision at proposed § 164.518(c)(4) relieved the covered entity, covered entity's employees, business partner, and the business partner's employees from liability for disclosing protected health information to law enforcement and to health oversight agencies when reporting improper activities, but failed to specifically authorize business partners and their employees to engage in whistleblowing in proposed § 164.510(f), "Disclosures for law enforcement."

Response: Under our statutory authority, we cannot directly regulate entities that are not covered entities; thus, we cannot regulate most business associates, or 'authorize' them to use or disclose protected health information. We agree with the result sought by the commenter, and accomplish it by ensuring that such whistle blowing disclosures by business associates and others do not constitute a violation of this rule on the part of the covered entity.

Comment: Some commenters suggested that the need to terminate contracts that had been breached would be particularly problematic when the contracts were with single-source business partners used by health care providers. For example, one commenter explained that when the Department awards single-source contracts, such as to a Medicare carrier acting as a fiscal intermediary that then becomes a business partner of a health care provider, the physician is left with no viable alternative if required to terminate the contract.

Response: In most cases, we expect that there will be other entities that could be retained by the covered entity as a business associate to carry out those functions on its behalf or provide the necessary services. We agree that under certain circumstances, however, it may not be possible for a covered entity to terminate a contract with a business associate. Accordingly, although the rule still generally requires a covered entity to terminate a contract if steps to cure such a material breach fail, it also allows an exception to this to accommodate those infrequent circumstances where there simply are no viable alternatives to continuing a contract with that particular business associate. It does not mean, however, that the covered entity can choose to continue the contract with a non-compliant business associate merely because it is more convenient or less costly than doing business with other potential business associates. We also require that if a covered entity determines that it is not feasible to terminate a non-compliant business associate, the covered entity must notify the Secretary.

Comment: Another commenter argued that having to renegotiate every existing contract within the 2-year implementation window so a covered entity can attest to "satisfactory assurance" that its business partner will appropriately safeguard protected health information is not practical.

Response: The 2-year implementation period is statutorily required under section 1175(b) of the Act. Further, we believe that two years provides adequate time to come into compliance with the regulation.

Comment: A commenter recommended that the business partner contract specifically address the issue of data mining because of its increasing prevalence within and outside the health care industry.

Response: We agree that protected health information should only be used by business associates for the purposes identified in the business associate contract. We address the issue of data mining by requiring that the business associate contract explicitly identify the uses or disclosures that the business associate is permitted to make with the protected health information. Aside from disclosures for data aggregation and business associate management, the business associate contract cannot authorize any uses or disclosures that the covered entity itself cannot make. Therefore, data mining by the business associate for any purpose not specified in the contract is a violation of the contract and grounds for termination of the contract by the covered entity.

Comment: One commenter stated that the rule needs to provide the ability to contract with persons and organizations to complete clinical studies, provide clinical expertise, and increase access to experts and quality of care.

Response: We agree, and do not prohibit covered entities from sharing protected health information under a business associate contract for these purposes.

Comment: A commenter requested clarification as to whether sister agencies are considered business partners when working together.

Response: It is unclear from the comment whether the "sister agencies" are components of a larger entity, are affiliated entities, or are otherwise linked. Requirements regarding sharing protected health information among affiliates and components are found in § 164.504.

Comment: One commenter stated that some union contracts specify that the employer and employees jointly conduct patient quality of care reviews. The commenter requested clarification as to whether this arrangement made the employee a business partner.

Response: An employee organization that agrees to perform quality assurance for a group health plan meets the definition of a business associate. We note that the employee representatives acting on behalf of the employee organization would be performing the functions of the organization, and the employee organization would be responsible under the business associate contract to ensure that the representatives abided by the restrictions and conditions of the contract. If the employee organization is a plan sponsor of the group health plan, the similar provisions of § 164.504(f) would apply instead of the business associate requirements. See § 164.502(e)(1).

Comment: Some commenters supported regulating employers as business partners of the health plan. These commenters believed that this approach provided flexibility by giving employers access to information when necessary while still holding employers accountable for improper use of the information. Many commenters, however, stressed that this approach would turn the relationship between employers, employees and other agents "on its head" by making the employer subordinate to its agents. In addition, several commenters objected to the business partner approach because they alleged it would place employers at risk for greater liability.

Response: We do not require a business associate contract for disclosure of protected health information from group health plans to employers. We do, however, put other conditions on the disclosure of protected health information from group health plans to employers who sponsor the plan. See further discussion in § 164.504 on disclosure of protected health information to employers.

Comment: One commenter expressed concern that the regulation would discourage organizations from participating with Planned Parenthood since pro bono and volunteer services may have no contract signed. ***82645**

Response: We design the rule's requirements with respect to volunteers and pro bono services to allow flexibility to the covered entity so as not to disturb these arrangements. Specifically, when such volunteers work on the premises of the covered entity, the covered entity may choose to treat them as members of the covered entity's workforce or as business associates. See the definitions of business associate and workforce in § 160.103. If the volunteer performs its work off-site and needs protected health information, a business associate arrangement will be required. In this instance, where protected health information leaves the premises of the covered entity, privacy concerns are heightened and it is reasonable to require an agreement to protect the information. We believe that pro bono contractors will easily develop standard contracts to allow those activities to continue smoothly while protecting the health information that is shared.

Section 164.504(f)—Group Health Plans

Comment: Several commenters interpreted the preamble in the proposed rule to mean that only self-insured group health plans were covered entities. Another commenter suggested there was an error in the definition of group health plans because it only included plans with more than 50 participants or plans administered by an entity other than the employer (emphasis added by commenter). This commenter believed the "or" should be an "and" because almost all plans under 50 are administered by another entity and therefore this definition does not exclude most small plans.

Response: We did not intend to imply that only self-insured group health plans are covered health plans. We clarify that all group health plans, both self-insured and fully-funded, with 50 or more participants are covered entities, and that group health plans with fewer than 50 participants are covered health plans if they are administered by another entity. While we agree with the commenter that few group health plans with fewer than 50 participants are self-administered, the "or" is dictated by the statute. Therefore, the statute only exempts group health plans with fewer than 50 participants that are not administered by an entity other than the employer.

Comment: Several commenters stated that the proposed rule mis-characterized the relationship between the employer and the group health plan. The commenters stated that under ERISA and the Internal Revenue Code group health plans are separate legal entities from their employer sponsors. The group health plan itself, however, generally does not have any employees. Most operations of the group health plan are contracted out to other entities or are carried out by employees of the employer who

sponsors the plan. The commenters stressed that while group health plans are clearly covered entities, the Department does not have the statutory authority to cover employers or other entities that sponsor group health plans. In contrast, many commenters stated that without covering employers, meaningful privacy protection is unattainable.

Response: We agree that group health plans are separate legal entities from their plan sponsors and that the group health plan itself may be operated by employees of the plan sponsor. We make significant modification to the proposed rule to better reflect this reality. We design the requirements in the final regulation to use the existing regulatory tools provided by ERISA, such as the plan documents required by that law and the constellation of plan administration functions defined by that law that established and maintain the group health plan.

We recognize plan sponsors' legitimate need for health information in certain situations while, at the same time, protecting health information from being used for employment-related functions or for other functions related to other employee benefit plans or other benefits provided by the plan sponsor. We do not attempt to directly regulate plan sponsors, but pursuant to our authority to regulate health plans, we place restrictions on the flow of information from covered entities to non-covered entities. The final rule permits group health plans to disclose protected health information to plan sponsors, and allows them to authorize health insurance issuers or HMOs to disclose protected health information to plan sponsors, if the plan sponsors agree to use and disclose the information only as permitted or required by the regulation. The information may be used only for plan administration functions performed on behalf of the group health plan and specified in the plan documents. Hereafter, any reference to employer in a response to a comment uses the term “plan sponsor,” since employers can only receive protected health information in their role as plan sponsors, except as otherwise permitted under this rule, such as with an authorization.

Specifically, in order for a plan sponsor to obtain without authorization protected health information from a group health plan, health insurance issuer, or HMO, the documents under which the group health plan was established and is maintained must be amended to: (1) Describe the permitted uses and disclosures of protected health information by the plan sponsor (see above for further explanation); (2) specify that disclosure is permitted only upon receipt of a written certification that the plan documents have been amended; and (3) provide adequate firewalls. The firewalls must identify the employees or classes of employees or other persons under the plan sponsor's control who will have access to protected health information; restrict access to only the employees identified and only for the administrative functions performed on behalf of the group health plan; and provide a mechanism for resolving issues of noncompliance by the employees identified. Any employee of the plan sponsor who receives protected health information in connection with the group health plan must be included in the amendment to the plan documents. As required by ERISA, the named fiduciary is responsible for ensuring the accuracy of amendments to the plan documents.

Group health plans, and health insurance issuers or HMOs with respect to the group health plan, that disclose protected health information to plan sponsors are bound by the minimum necessary standard as described in § 164.514.

Group health plans, to the extent they provide health benefits only through an insurance contract with a health insurance issuer or HMO and do not create, receive, or maintain protected health information (except for summary information or enrollment and disenrollment information), are not required to comply with the requirements of §§ 164.520 or 164.530, except for the documentation requirements of § 164.530(j). In addition, because the group health plan does not have access to protected health information, the requirements of §§ 164.524, 164.526, and 164.528 are not applicable. Individuals enrolled in a group health plan that provides benefits only through an insurance contract with a health insurance issuer or HMO would have access to all rights provided by this regulation through the health insurance issuer or HMO, because they are covered entities in their own right.

Comment: We received several comments from self-insured plans who stated that the proposed rule did not fully appreciate the dual nature of an employer as a plan sponsor and as a insurer. These commenters stated that ***82646** the regulation should have an exception for employers who are also insurers.

Response: We believe the approach we have taken in the final rule recognizes the special relationship between plan sponsors and group health plans, including group health plans that provide benefits through a self-insured arrangement. The final rule allows

plan sponsors and employees of plan sponsors access to protected health information for purposes of plan administration. The group health plan is bound by the permitted uses and disclosures of the regulation, but may disclose protected health information to plan sponsors under certain circumstances. To the extent that group health plans do not provide health benefits through an insurance contract, they are required to establish a privacy officer and provide training to employees who have access to protected health information, as well as meet the other applicable requirements of the regulation.

Comment: Some commenters supported our position not to require individual consent for employers to have access to protected health information for purposes of treatment, payment, and health care operations. For employer sponsored insurance to continue to exist as it does today, the commenters stressed, this policy is essential. Other commenters encouraged the Department to amend the regulation to require authorization for disclosure of information to employers. These commenters stressed that because the employer was not a covered entity, individual consent is the only way to prohibit potential abuses of information.

Response: In the final regulation, we maintain the position in the proposed rule that a health plan, including a group health plan, need not obtain individual consent for use and disclosure of protected health information for treatment, payment and or health care operations purposes. However, we impose conditions (described above) for making such disclosures to the plan sponsor. Because employees of the plan sponsor often perform health care operations and payment (e.g. plan administration) functions, such as claims payment, quality review, and auditing, they may have legitimate need for such information. Requiring authorization from every participant in the plan could make such fundamental plan administration activities impossible. We therefore impose regulatory restrictions, rather than a consent requirement, to prevent abuses. For example, the plan sponsor must certify that any protected health information obtained by its employees through such plan administration activities will not be used for employment-related decisions.

Comment: Several commenters stressed that the regulation must require the establishment of firewalls between group health plans and employers. These commenters stated that firewalls were necessary to prevent the employer from accessing information improperly and using it in making job placements, promotions, and firing decisions. In addition, one commenter stated that employees with access to protected health information must be empowered through this regulation to deny unauthorized access to protected health information to corporate managers and executives.

Response: We agree with the commenters that firewalls are necessary to prevent unauthorized use and disclosure of protected health information. Among the conditions for group health plans to disclose information to plan sponsors, the plan sponsor must establish firewalls to prevent unauthorized uses and disclosures of information. The firewalls include: describing the employees or classes of employees with access to protected health information; restricting access to and use of the protected health information to the plan administration functions performed on behalf of the group health plan and described in plan documents; and providing an effective mechanism for resolving issues of noncompliance.

Comment: Several commenters supported our proposal to cover the health care component of an employer in its capacity as an administrator of the group health plan. These commenters felt the component approach was necessary to prevent the disclosure of protected health information to other parts of the employer where it might be used or disclosed improperly. Other commenters believed the component approach was unworkable and that distinguishing who was in the covered entity would not be as easy as assumed in the proposed rule. One commenter stated it was unreasonable for an employer to go through its workforce division by division and employee by employee designating who is included in the component and who is not. In addition, some commenters argued that we did not have the statutory authority to regulate employers at all, including their health care components.

One commenter requested more guidance with respect to identifying the health care component as proposed under the proposed rule. In particular, the commenter requested that the regulation clearly define how to identify such persons and what activities and functional areas may be included. The commenter alleged that identification of persons needing access to protected health information will be administratively burdensome. Another commenter requested clarification on distinguishing the component entity from non-component entities within an organization and how to administer such relationships. The commenter stated that

individuals included in the covered entity could change on a daily basis and advocated for a simpler set of rules governing intra-organizational relationships as opposed to inter-organizational relationships.

Response: While we have not adopted the component approach for plan sponsors in the final rule, plan sponsors who want protected health information must still identify who in the organization will have access to the information. Several of the changes we make to the NPRM will make this designation easier. First, we move from "component" to a more familiar functional approach. We limit the employees of the plan sponsor who may receive protected health information to those employees performing plan administration functions, as that term is understood with respect to ERISA compliance, and as limited by this rule's definitions of payment and health care operation. We also allow designation of a class of employees (e.g., all employees assigned to a particular department) or individual employees.

Although some commenters have asked for guidance, we have intentionally left the process flexible to accommodate different organizational structures. Plan sponsors may identify who will have access to protected health information in whatever way best reflects their business needs as long as participants can reasonably identify who will have access. For example, persons may be identified by naming individuals, job titles (e.g. Director of Human Resources), functions (e.g. employees with oversight responsibility for the outside third party claims administrator), divisions of the company (e.g. Employee Benefits) or other entities related to the plan sponsor. We believe this flexibility will also ease any administrative burden that may result from the identification process. Identification in terms such as "individuals who from time to time may need access to protected health information" or in other broad or generic ways, however, would not be sufficient.

Comment: In addition to the comments on the component approach itself, several commenters pointed out ***82647** that many employees wear two hats in the organization, one for the group health plan and one for the employer. The commenters stressed that these employees should not be regulated when they are performing group health plan functions. This arrangement is necessary, particularly in small employers where the plan fiduciary may also be in charge of other human resources functions. The commenter recommended that employees be allowed access to information when necessary to perform health plan functions while prohibiting them from using the information for non-health plan functions.

Response: We agree with the commenters that many employees perform multiple functions in an organization and we design these provisions specifically to accommodate this way of conducting business. Under the approach taken in the final regulation, employees who perform multiple functions (i.e. group health plan and employment-related functions) may receive protected health information from group health plans, but among other things, the plan documents must certify that these employees will not use the information for activities not otherwise permitted by this rule including for employment-related activities.

Comment: Several commenters pointed out that the amount of access needed to protected health information varies greatly from employer to employer. Some employers may perform many plan administration functions themselves which are not possible without access to protected health information. Other employers may simply offer health insurance by paying a premium to a health insurance issuer rather than provide or administer health benefits themselves. Some commenters argued that fully insured plans should not be covered under the rule. Similarly, some commenters argued that the regulation was overly burdensome on small employers, most of whom fully insure their group health plans. Other commenters pointed out that health insurance issuers —even in fully insured arrangements—are often asked for identifiable health information, sometimes for legitimate purposes such as auditing or quality assurance, but sometimes not. One commenter, representing an insurer, gave several examples of employer requests, including claims reports for employees, individual and aggregate amounts paid for employees, identity of employees using certain drugs, and the identity, diagnosis and anticipated future costs for "high cost" employees. This same commenter requested guidance in what types of information can be released to employers to help them determine the organization's responsibilities and liabilities.

Response: In the final regulation we recognize the diversity in plan sponsors' need for protected health information. Many plan sponsors need access to protected health information to perform plan administration functions, including eligibility and enrollment functions, quality assurance, claims processing, auditing, monitoring, trend analysis, and management of carve-

out plans (such as vision and dental plans). In the final regulation we allow group health plans to disclose protected health information to plan sponsors if the plan sponsor voluntarily agrees to use the information only in accordance with the purposes stated in the plan documents and as permitted by the regulation. We clarify, however, that plan administration does not include any employment-related decisions, including fitness for duty determinations, or duties related to other employee benefits or plans. Plan documents may only permit health insurance issuers to disclose protected health information to a plan sponsor as is otherwise permitted under this rule and consistent with the minimum necessary standard.

Some plan sponsors, including those with a fully insured group health plan, do not perform plan administration functions on behalf of group health plans, but still may require health information for other purposes, such as modifying, amending or terminating the plan or soliciting bids from prospective issuers or HMOs. In the ERISA context actions undertaken to modify, amend or terminate a group health plan may be known as "settlor" functions (see Lockheed Corp. v. Spink, 517 U.S. 882 (1996)). For example, a plan sponsor may require access to information to evaluate whether to adopt a three-tiered drug formulary. Additionally, a prospective health insurance issuer may need claims information from a plan sponsor in order to provide rating information. The final rule permits plan sponsors to receive summary health information with identifiers removed in order to carry out such functions. Summary health information is information that summarizes the claims history, expenses, or types of claims by individuals enrolled in the group health plan. In addition, the identifiers listed in § 164.514(b)(2)(i) must be removed prior to disclosing the information to a plan sponsor for purposes of modifying, amending, or terminating the plan. See § 164.504(a). This information does not constitute de-identified information because there may be a reasonable basis to believe the information is identifiable to the plan sponsor, especially if the number of participants in the group health plan is small. A group health plan, however, may not permit an issuer or HMO to disclose protected health information to a plan sponsor unless the requirement in § 164.520 states that this disclosure may occur.

Comment: Several commenters stated that health insurance issuers cannot be held responsible for employers' use of protected health information. They stated that the issuer is the agent of the employer and it should not be required to monitor the employer's use and disclosure of information.

Response: Under this regulation, health insurance issuers are covered entities and responsible for their own uses and disclosures of protected health information. A group health plan must require a health insurance issuer or HMO providing coverage to the group health plan to disclose information to the plan sponsor only as provided in the plan documents.

Comment: Several commenters urged us to require de-identified information to be used to the greatest extent possible when information is being shared with employers.

Response: De-identified information is not sufficient for many functions plan sponsors perform on behalf of their group health plans. We have created a process to allow plan sponsors and their employees access to protected health information when necessary to administer the plan. We note that all uses and disclosures of protected health information by the group health plan are bound by the minimum necessary standard.

Comment: One commenter representing church plans argued that the regulation should treat such plans differently from other group health plans. The commenter was concerned about the level of access to information the Secretary would have in performing compliance reviews and suggested that a higher degree of sensitivity is need for information related to church plans than information related to other group health plans. This sensitivity is needed, the commenter alleged, to reduce unnecessary intrusion into church operations. The commenter also advocated that church plans found to be out of compliance should be able to self-correct within a stated time frame (270 days) and avoid paying penalty taxes as allowed in the Internal Revenue Code.

Response: We do not believe there is sufficient reason to treat church plans differently than other covered entities. ***82648** The intent of the compliance reviews is to determine whether or not the plan is abiding by the regulation, not to gather information on the general operations of the church. As required by § 160.310(c), the covered entity must provide access only to information that is pertinent to ascertaining compliance with part 160 or subpart E of 164.

Comment: Several commenters stated that employers often advocate on behalf of their employees in benefit disputes and appeals, answer questions with regard to the health plan, and generally help them navigate their health benefits. These commenters questioned whether this type of assistance would be allowed under the regulation, whether individual consent was required, and whether this intervention would make them a covered entity.

Response: The final rule does nothing to hinder or prohibit plan sponsors from advocating on behalf of group health plan participants or providing assistance in understanding their health plan. Under the privacy rule, however, the plan sponsor could not obtain any information from the group health plan or a covered provider unless authorization was given. We do not believe obtaining authorization when advocating or providing assistance will be impractical or burdensome since the individual is requesting assistance and therefore should be willing to provide authorization. Advocating on behalf of participants or providing other assistance does not make the plan sponsor a covered entity.

Section 164.506—Consent for Treatment, Payment, and Health Care Operations

Comment: Many commenters supported regulatory authorization for treatment, payment, and health care operations. In particular, health plans, employers, and institutional providers supported the use of regulatory authorization for treatment, payment, and health care operations.

In contrast, a large number of commenters, particularly health care professionals, patients, and patient advocates, suggested that consent for treatment, payment, and health care operations should be required. Many commenters supported the use of consent for treatment, payment, and health care operations, considering this a requirement for maintaining the integrity of the health care system. Some commenters made a distinction between requiring and permitting providers to obtain consent.

Commenters nearly uniformly agreed that covered health care providers, health plans, and clearinghouses should not be prohibited from seeking authorization for treatment, payment, and health care operations. Some commenters stated that the prohibition against obtaining an authorization goes against professional ethics, undermines the patient-provider relationship, and is contrary to current industry practice.

Some commenters specifically noted the primacy of the doctor-patient relationship regarding consent. In general, commenters recommended that individually identifiable health information not be released by doctors without patient consent. A few commenters stated that prohibiting health care providers from obtaining consent could cause the patient to become suspicious and distrustful of the health care provider. Other commenters believed that clinicians have the responsibility for making sure that patients are fully informed about the consequences of releasing information. A few commented that the process of obtaining consent provided an opportunity for the patient and provider to negotiate the use and disclosure of patient information.

Commenters discussed how, when, and by whom consent should be sought. For example, some commenters viewed a visit between a health care provider and patient as the appropriate place for consent to be discussed and obtained. While others did not necessarily dispute the appropriateness of health care providers obtaining consent for uses and disclosures of protected health information from individuals, some said that it was appropriate for health plans to be permitted to obtain consent.

Response: In the NPRM we stated our concern that the blanket consents that individuals sign today provide these individuals with neither notice nor control over how their information is to be used. While we retain those concerns, we also understand that for many who participate in the health care system, the acts of providing and obtaining consent represent important values that these parties wish to retain. Many individuals argued that providing consent enhances their control; many advocates argued that the act of consent focuses patient attention on the transaction; and many health care providers argued that obtaining consent is part of ethical behavior.

The final rule amends our proposed approach and requires most covered health care providers to obtain a consent from their patients to use or disclose protected health information for treatment, payment, and health care operations. Providers who have

an indirect treatment relationship with the patient, as defined in § 164.501, cannot be expected to have an opportunity to obtain consent and may continue to rely on regulatory authorization for their uses and disclosures for these purposes.

As described in the comments, it is the relationship between the health care provider and the patient that is the basis for many decisions about uses and disclosures of protected health information. Much of the individually identifiable health information that is the subject of this rule is created when a patient interacts with a health care provider. By requiring covered providers to obtain consent for treatment, payment, and health care operations, the individual will have appropriate opportunity to consider the appropriate uses and disclosures of his or her protected health information. We also require that the consent contain a reference to the provider's notice, which contains a more detailed description of the provider's practices relating to uses and disclosures of protected health information. This combination provides the basis for an individual to have an informed conversation with his or her provider and to request restrictions.

It is our understanding that it is common practice for providers to obtain consent for this type of information-sharing today. Many providers and provider organizations stated that they are ethically obligated to obtain the patient's consent and that it is their practice to do so. A 1998 study by Merz, et al, published in the Journal of Law, Medicine and Ethics examined hospital consent forms regarding disclosure of medical information.[FN8] They found that 97% of all hospitals seek consent for the release of information for payment purposes; 45% seek consent for disclosure for utilization review, peer review, quality assurance, and/or prospective review; and 50% seek consent for disclosure to providers, other health care facilities, or others for continuity of care purposes. All of these activities fall within our definitions of treatment, payment, or health care operations.

In the final rule we have not required that health plans or health care clearinghouses obtain consent for their uses and disclosures of protected health information for treatment, payment, or health care operations. The rationale underlying the consent requirements for uses and disclosures by health care providers do not pertain to health plans and health care clearinghouses. First, current practice is varied, and there is little history of health plans obtaining ***82649** consent relating to their own information practices unless required to do so by some other law. This is reflected in the public comments, in which most health plans supported the regulatory authorization approach proposed in the NPRM. Further, unlike many health care providers, health plans did not maintain that they were ethically obligated to seek the consent of their patients for their use and disclosure activities. Finally, it is the unique relationship between an individual and his or her health care provider that provides the foundation for a meaningful consent process. Requiring that consent process between an individual and a health plan or clearinghouse, when no such unique relationship exists, we believe is not necessary.

Unlike their relationship with health care providers, individuals in most instances do not have a direct opportunity to engage in a discussion with a health plan or clearinghouse at the time that they enter into a relationship with those entities. Most individuals choose a health plan through their employer and often sign up through their employer without any direct contact with the health plan. We concluded that providing for a signed consent in such a circumstance would add little to the proposed approach, which would have required health plans to provide a detailed notice to their enrollees. In the final rule, we also clarify that an individual can request a restriction from a health plan or health care clearinghouse. Since individuals rarely if ever have any direct contact with clearinghouses, we concluded that requiring a signed consent would have virtually no effect beyond the provision of the notice and the opportunity to request restrictions.

We agree with the comments we received objecting to the provision prohibiting covered entities from obtaining consent from individuals. As discussed above, in the final rule we require covered health care providers with direct treatment relationships to obtain consent to use or disclose protected health information for treatment, payment, and health care operations. In addition, we have eliminated the provision prohibiting other covered entities from obtaining such consents. We note that the consents that covered entities are permitted to obtain relate to their own uses and disclosures of protected health information for treatment, payment, and health care operations and not to the practices of others. If a covered entity wants to obtain the individual's permission to receive protected health information from another covered entity, it must do so using an authorization under § 164.508.

"Consent" versus "Authorization"

Comment: In general, commenters did not distinguish between "consent" and "authorization." Commenters used both terms to refer to the individual's giving permission for the use and disclosure of protected health information by any entity.

Response: In the final rule we have made an important distinction between consent and authorization. Under the final rule, we refer to the process by which a covered entity seeks agreement from an individual regarding how it will use and disclose the individual's protected health information for treatment, payment, and health care operations as "consent." The provisions in the final rule relating to consent are largely contained in § 164.506. The process by which a covered entity seeks agreement from an individual to use or disclose protected health information for other purposes, or to authorize another covered entity to disclose protected health information to the requesting covered entity, are termed "authorizations" and the provisions relating to them are found in § 164.508.

Consent Requirements

Comment: Many commenters believed that consent might be problematic in that it could allow covered entities to refuse enrollment or services if the individual does not grant the consent. Some commenters proposed that covered entities be allowed to condition treatment, payment, or health care operations on whether or not an individual granted consent. Other commenters said that consent should be voluntary and not coerced.

Response: In the final rule (§ 164.506(b)(1)), we permit covered health care providers to condition treatment on the individual's consent to the covered provider's use or disclosure of protected health information to carry out treatment, payment, and health care operations. We recognize that it would be difficult, if not impossible, for health care providers to treat their patients and run their businesses without being able to use or disclose protected health information for these purposes. For example, a health care provider could not be reimbursed by a health plan unless the provider could share protected health information about the individual with the health plan. Under the final rule, if the individual refuses to grant consent for this disclosure, the health care provider may refuse to treat the individual. We encourage health care providers to exhaust other options, such as making alternative payment arrangements with the individual, before refusing to treat the individual on these grounds.

We also permit health plans to condition enrollment in the health plan on the individual's consent for the health plan to use and disclose protected health information to carry out treatment, payment, and health care operations (see § 164.506(b)(2)). The health plan must seek the consent in conjunction with the individual's enrollment in the plan for this provision to apply. For example, a health plan's application for enrollment may include a consent for the health plan to use or disclose protected health information to carry out treatment, payment, and/or health care operations. If the individual does not sign this consent, the health plan, under § 164.502(a)(1)(iii), is prohibited from using or disclosing protected health information about the individual for the purposes stated in the consent form. Because the health plan may not be able adequately to provide services to the individual without these uses and disclosures, we permit the health plan to refuse to enroll the individual if the consent is not signed.

Comment: Some commenters were concerned that the NPRM conflicted with state law regarding when covered entities would be required to obtain consent for uses and disclosures of protected health information.

Response: We have modified the provisions in the final rule to require certain health care providers to obtain consent for uses and disclosures for treatment, payment, and health care operations and to permit other covered entities to do so. A consent under this rule may be combined with other types of written legal permission from the individual, such as state-required consents for uses and disclosures of certain types of health information (e.g., information relating to HIV/AIDS or mental health). We also permit covered entities to seek authorization from the individual for another covered entity's use or disclosure of protected health information for these purposes, including if the covered entity is required to do so by other law. Though we do not believe any states currently require such authorizations, we wanted to avoid future conflicts. These changes should resolve the concerns raised by commenters regarding conflicts with state laws that require consent, authorization, or other types of written legal permission for uses and disclosures of protected health information. ***82650**

Comment: Some commenters noted that there would be circumstances when consent is impossible or impractical. A few commenters suggested that in such situations patient information be de-identified or reviewed by an objective third party to determine if consent is necessary.

Response: Covered health care providers with direct treatment relationships are required to obtain consent to use or disclose protected health information to carry out treatment, payment, and health care operations. In certain treatment situations where the provider is permitted or required to treat an individual without the individual's written consent to receive health care, the provider may use and disclose protected health information created or obtained in the course of that treatment without the individual's consent under this rule (see § 164.506(a)(3)). In these situations, the provider must attempt to obtain the individual's consent and, if the provider is unable to obtain consent, the provider must document the attempt and the reason consent could not be obtained. Together with the uses and disclosures permitted under §§ 164.510 and 164.512, the concerns raised regarding situations in which it is impossible or impractical for covered entities to obtain the individual's permission to use or disclose protected health information about the individual have been addressed.

Comment: An agency that provides care to individuals with mental retardation and developmental disabilities expressed concern that many of their consumers lack capacity to consent to the release of their records and may not have a surrogate readily available to provide consent on their behalf.

Response: Under § 164.506(a)(3), we provide exceptions to the consent requirement for certain treatment situations in which consent is difficult to obtain. In these situations, the covered provider must attempt to obtain consent and must document the reason why consent was not obtained. If these conditions are met, the provider may use and disclose the protected health information created or obtained during the treatment for treatment, payment, or health care operations purposes, without consent.

Comment: Many commenters were concerned that covered entities working together in an integrated health care system would each separately be required to obtain consent for use and disclosure of protected health information for treatment, payment, and health care operations. These commenters recommend that the rule permit covered entities that are part of the same integrated health care system to obtain a single consent allowing each of the covered entities to use and disclose protected health information in accordance with that consent form. Some commenters said that it would be confusing to patients and administratively burdensome to require separate consents for health care systems that include multiple covered entities.

Response: We agree with commenters' concerns. In § 164.506(f) of the final rule we permit covered entities that participate in an organized health care arrangement to obtain a single consent on behalf of the arrangement. See § 164.501 and the corresponding preamble discussion regarding organized health care arrangements. To obtain a joint consent, the covered entities must have a joint notice and must refer to the joint notice in the joint consent. See § 164.520(d) and the corresponding preamble discussion regarding joint notice. The joint consent must also identify the covered entities to which it applies so that individuals will know who is permitted to use and disclose information about them.

Comment: Many commenters stated that individuals own their medical records and, therefore, should have absolute control over them, including knowing by whom and for what purpose protected health information is used, disclosed, and maintained. Some commenters asserted that, according to existing law, a patient owns the medical records of which he is the subject.

Response: We disagree. In order to assert an ownership interest in a medical record, a patient must demonstrate some legitimate claim of entitlement to it under a state law that establishes property rights or under state contract law. Historically, medical records have been the property of the health care provider or medical facility that created them, and some state statutes directly provide that medical records are the property of a health care provider or a health care facility. The final rule is consistent with current state law that provides patients access to protected health information but not ownership of medical records. Furthermore, state laws that are more stringent than the rule, that is, state laws that provide a patient with greater access to protected health information, remain in effect. See discussion of “Preemption” above.

Electronically Stored Data

Comment: Some commenters stated that privacy concerns would be significantly reduced if patient information is not stored electronically. One commenter suggested that consent should be given for patient information to be stored electronically. One commenter believed that information stored in data systems should not be individually identifiable.

Response: We agree that storing and transmitting health information electronically creates concerns about the privacy of health information. We do not agree, however, that covered entities should be expected to maintain health information outside of an electronic system, particularly as health care providers and health plans extend their reliance on electronic transactions. We do not believe that it would be feasible to permit individuals to opt out of electronic transactions by withholding their consent. We note that individuals can ask providers and health plans whether or not they store information electronically, and can choose only providers who do not do so or who agree not to do so. We also do not believe that it is practical or efficient to require that electronic data bases contain only de-identified information. Electronic transactions have achieved tremendous savings in the health care system and electronic records have enabled significant improvements in the quality and coordination of health care. These improvements would not be possible with de-identified information.

Section 164.508—Uses and Disclosures for Which Authorization Is Required

Uses and Disclosures Requiring Authorization

Comment: We received many comments in general support of requiring authorization for the use or disclosure of protected health information. Some comments suggested, however, that we should define those uses and disclosures for which authorization is required and permit covered entities to make all other uses and disclosures without authorization.

Response: We retain the requirement for covered entities to obtain authorization for all uses and disclosures of protected health information that are not otherwise permitted or required under the rule without authorization. We define exceptions to the general rule requiring authorization for the use or disclosure of protected health information, rather than defining narrow circumstances in which authorization is required.

We believe this approach is consistent with well-established privacy principles, with other law, and with industry standards and ethical ***82651** guidelines. The July 1977 Report of the Privacy Protection Study Commission recommended that "each medical-care provider be considered to owe a duty of confidentiality to any individual who is the subject of a medical record it maintains, and that, therefore, no medical care provider should disclose, or be required to disclose, in individually identifiable form, any information about any such individual without the individual's explicit authorization, unless the disclosures would be" for specifically enumerated purposes such as treatment, audit or evaluation, research, public health, and law enforcement.[FN9] The Commission made similar recommendations with respect to insurance institutions.[FN10] The Privacy Act (5 U.S.C. 552a) prohibits government agencies from disclosing records except pursuant to the written request of or pursuant to a written consent of the individual to whom the record pertains, unless the disclosure is for certain specified purposes. The National Association of Insurance Commissioners' Health Information Privacy Model Act states, "A carrier shall not collect, use or disclose protected health information without a valid authorization from the subject of the protected health information, except as permitted by * * * this Act or as permitted or required by law or court order. Authorization for the disclosure of protected health information may be obtained for any purpose, provided that the authorization meets the requirements of this section." In its report "Best Principles for Health Privacy," the Health Privacy Working Group stated, "Personally identifiable health information should not be disclosed without patient authorization, except in limited circumstances' such as when required by law, for oversight, and for research.[FN11] The American Medical Association's Council on Ethical and Judicial Affairs has issued an opinion stating, "The physician should not reveal confidential communications or information without the express consent of the patient, unless required to do so by law [and] subject to certain exceptions which are ethically and legally justified because of overriding social considerations."[FN12] We build on these standards in this final rule.

Comment: Some comments suggested that, under the proposed rule, a covered entity could not use protected health information to solicit authorizations from individuals. For example, a covered entity could not use protected health information to generate a mailing list for sending an authorization for marketing purposes.

Response: We agree with this concern and clarify that covered entities are permitted to use protected health information in this manner without authorization as part of the management activities relating to implementation of and compliance with the requirements of this rule. See § 164.501 and the corresponding preamble regarding the definition of health care operations.

Comment: We received several comments suggesting that we not require written authorizations for disclosures to the individual or for disclosures initiated by the individual or the individual's legal representative.

Response: We agree with this concern and in the final rule we clarify that disclosures of protected health information to the individual who is the subject of the information do not require the individual's authorization. See § 164.502(a)(1). We do not intend to impose barriers between individuals and disclosures of protected health information to them.

When an individual requests that the covered entity disclose protected health information to a third party, however, the covered entity must obtain the individual's authorization, unless the third party is a personal representative of the individual with respect to such protected health information. See § 164.502(g). If under applicable law a person has authority to act on behalf of an individual in making decisions related to health care, except under limited circumstances, that person must be treated as the personal representative under this rule with respect to protected health information related to such representation. A legal representative is a personal representative under this rule if, under applicable law, such person is able to act on behalf of an individual in making decisions related to health care, with respect to the protected health information related to such decisions. For example, an attorney of an individual may or may not be a personal representative under the rule depending on the attorney's authority to act on behalf of the individual in decisions related to health care. If the attorney is the personal representative under the rule, he may obtain a copy of the protected health information relevant to such personal representation under the individual's right to access. If the attorney is not the personal representative under the rule, or if the attorney wants a copy of more protected health information than that which is relevant to his personal representation, the individual would have to authorize such disclosure.

Comment: Commenters expressed concern about whether a covered entity can rely on authorizations made by parents on behalf of their minor children once the child has reached the age of majority and recommended that covered entities be able to rely on the most recent, valid authorization, whether it was authorized by the parent or the minor.

Response: We agree. If an authorization is signed by a parent, who is the personal representative of the minor child at the time the authorization is signed, the covered entity may rely on the authorization for as long as it is a valid authorization, in accordance with § 164.508(b). A valid authorization remains valid until it expires or is revoked. This protects a covered entity's reasonable reliance on such authorization. The expiration date of the authorization may be the date the minor will reach the age of majority. In that case, the covered entity would be required to have the individual sign a new authorization form in order to use or disclose information covered in the expired authorization form.

Comment: Some commenters were concerned that covered entities working together in an integrated system would each be required to obtain authorization separately. These commenters suggested the rule should allow covered entities that are part of the same system to obtain a single authorization allowing each of the covered entities to use and disclose protected health information in accordance with that authorization.

Response: If the rule does not permit or require a covered entity to use or disclose protected health information without the individual's authorization, the covered entity must obtain the individual's authorization to make the use or disclosure. Multiple covered entities working together as an integrated delivery system or otherwise may satisfy this requirement in at least three ways. First, each covered entity may separately obtain an authorization directly from the individual who is the subject of the

protected health information to be used or disclosed. Second, one covered entity may obtain ***82652** a compound authorization in accordance with § 164.508(b)(3) that authorizes multiple covered entities to use and disclose protected health information. In accordance with § 164.508(c)(1)(ii), each covered entity, or class of covered entities, that is authorized to make the use or disclosure must be clearly identified. Third, if the requirements in § 164.504(d) are met, the integrated delivery system may elect to designate itself as a single affiliated covered entity. A valid authorization obtained by that single affiliated covered entity would satisfy the authorization requirements for each covered entity within the affiliated covered entity. Whichever option is used, because these authorizations are being requested by a covered entity for its own use or disclosure, the authorization must contain both the core elements in § 164.508(c) and the additional elements in § 164.508(d).

Sale, Rental, or Barter

Comment: Proposed § 164.508 listed examples of activities that would have required authorization, which included disclosure by sale, rental, or barter. Some commenters requested clarification that this provision is not intended to affect mergers, sale, or similar transactions dealing with entire companies or their individual divisions. A few commenters stated that covered entities should be allowed to sell protected health information, including claims data, as an asset of the covered entity.

Response: We clarify in the definition of health care operations that a covered entity may sell or transfer its assets, including protected health information, to a successor in interest that is or will become a covered entity. See § 164.501 and the corresponding preamble discussion regarding this change. We believe this change meets commenters' business needs without compromising individuals' privacy interests.

Comment: Some commenters supported the requirement for covered entities to obtain authorization for the sale, rental, or barter of protected health information. Some commenters argued that protected health information should never be bought or sold by anyone, even with the individual's authorization.

Response: We removed the reference to sale, rental, or barter in the final rule because we determined that the term was overly broad. For example, if a researcher reimbursed a provider for the cost of configuring health data to be disclosed under the research provisions at § 164.512(i), there may have been ambiguity that this was a sale and, therefore, required authorizations from the individuals who were the subjects of the information. We clarify in the final rule that if the use or disclosure is otherwise permitted or required under the rule without authorization, such authorization is not required simply because the disclosure is made by sale, rental, or barter.

Comment: Many commenters expressed concerns that their health information will be sold to pharmaceutical companies.

Response: Although we have removed the reference to sale, rental or barter, the final rule generally would not permit the sale of protected health information to a pharmaceutical company without the authorization of individuals who are the subjects of the information. In some cases, a covered entity could disclose protected health information to a pharmaceutical company for research purposes if the disclosure met the requirements of § 164.512(i).

Psychotherapy Notes

Comment: Public response to the concept of providing additional protections for psychotherapy notes was divided. Many individuals and most providers, particularly mental health practitioners, advocated requiring consent for use or disclosure of all or most protected health information, but particularly sensitive information such as mental health information, not necessarily limited to psychotherapy notes. Others thought there should be special protections for psychotherapy information based on the federal psychotherapist-patient privilege created by the U.S. Supreme Court in Jaffee v. Redmond and the need for an atmosphere of trust between therapist and patient that is required for effective psychotherapy. Several consumer groups recommended prohibiting disclosure of psychotherapy notes for payment purposes.

Some commenters, however, saw no need for special protections for psychotherapy communications and thought that the rules should apply the same protections for all individually identifiable information. Other commenters who advocated for no special protections based their opposition on the difficulty in drawing a distinction between physical and mental health and that special protections should be left to the states. Many health plans and employers did not support additional protections for psychotherapy notes because they stated they need access to this information to assess the adequacy of treatment, the severity of a patient's condition, the extent of a disability, or the ability to monitor the effectiveness of an individual's mental health care and eligibility for benefits. Other commenters, many from insurance companies, cited the need to have psychotherapy notes to detect fraud.

A few commenters said that it was not necessary to provide additional protections to psychotherapy notes because the "minimum necessary" provisions of the NPRM provide sufficient protections.

Response: In the final rule, a covered entity generally must obtain an authorization for disclosure of psychotherapy notes, or for use by a person other than the person who created the psychotherapy notes. This authorization is specific to psychotherapy notes and is in addition to the consent an individual may have given for the use or disclosure of other protected health information to carry out treatment, payment, and health care operations. This additional level of individual control provides greater protection than a general application of the "minimum necessary" rule. Nothing in this regulation weakens existing rules applicable to mental health information that provide more stringent protections. We do not intend to alter the holding in Jaffee v. Redmond.

Generally, we have not treated sensitive information differently from other protected health information; however, we have provided additional protections for psychotherapy notes because of Jaffee v. Redmond and the unique role of this type of information. There are few reasons why other health care entities should need access to psychotherapy notes, and in those cases, the individual is in the best position to determine if the notes should be disclosed. As we have defined them, psychotherapy notes are primarily of use to the mental health professional who wrote them, maintained separately from the medical record, and not involved in the documentation necessary to carry out treatment, payment, or health care operations. Since psychotherapy notes have been defined to exclude information that health plans would typically need to process a claim for benefits, special authorization for payment purposes should be rare. Unlike information shared with other health care providers for the purposes of treatment, psychotherapy notes are more detailed and subjective and are today subject to unique privacy and record retention practices. In fact, it is this separate existence and isolated use that allows us to grant the extra protection without causing an undue burden on the health care system. ***82653**

Comment: Many commenters suggested we prohibit disclosure of psychotherapy notes without authorization for uses and disclosures under proposed § 164.510 of the NPRM, or that protections should be extended to particular uses and disclosures, such as disclosures for public health, law enforcement, health oversight, and judicial and administrative proceedings. One of these commenters stated that the only purpose for which psychotherapy notes should be disclosed without authorization is for preventing or lessening a serious or imminent threat to health or safety (proposed § 154.510(k)). Another commenter stated that the rule should allow disclosure of psychotherapy notes without authorization for this purpose, or as required by law in cases of abuse or neglect.

Other commenters did not want these protections to be extended to certain national priority activities. They claimed that information relative to psychotherapy is essential to states' activities to protect the public from dangerous mentally ill offenders and abusers, to deliver services to individuals who are unable to authorize release of health care information, and for public health assessments. One commenter requested clarification of when psychotherapy notes could be released in emergency circumstances. Several commenters stated that psychotherapy notes should not be disclosed for public health purposes.

Response: We agree with the commenters who suggested extending protections of psychotherapy notes and have limited the purposes for which psychotherapy notes may be disclosed without authorization for purposes other than treatment, payment, or health care operations. The final rule requires covered entities to obtain authorization to use or disclose psychotherapy notes for purposes listed in § 164.512, with the following exceptions: An authorization is not required for use or disclosure of psychotherapy notes when the use or disclosure is required for enforcement of this rule, in accordance with § 164.502(a)(2)

(ii); when required by law, in accordance with § 164.512(a); when needed for oversight of the covered health care provider who created the psychotherapy notes, in accordance with § 164.512(d); when needed by a coroner or medical examiner, in accordance with § 164.512(g)(1); or when needed to avert a serious and imminent threat to health or safety, in accordance with § 164.512(j)(1)(i).

Comment: A commenter suggested that we follow the federal regulations governing confidentiality of alcohol and substance abuse records as a model for limited disclosure of psychotherapy notes for audits or evaluations. Under these regulations, a third party payor or a party providing financial assistance may access confidential records for auditing purposes if the party agrees in writing to keep the records secure and destroy any identifying information upon completion of the audit. (42 CFR part 2)

Response: We agree that the federal regulations concerning alcohol and drug abuse provide a good model for protection of information. However, according to our fact-finding discussions, audit or evaluation should not require access to psychotherapy notes. Protected health information kept in the medical record about an individual should be sufficient for these purposes. The final rule does not require authorization for use or disclosure of psychotherapy notes when needed for oversight of the covered health care provider who created the psychotherapy notes.

Comment: A provider organization urged that the disclosure of psychotherapy notes be strictly prohibited except to the extent needed in litigation brought by the client against the mental health professional on the grounds of professional malpractice or disclosure in violation of this section.

Response: We agree that psychotherapy notes should be available for the defense of the provider who created the notes when the individual who is the subject of the notes puts the contents of the notes at issue in a legal case. In the final rule, we allow the provider to disclose the notes to his or her lawyer for the purpose of preparing a defense. Any other disclosure related to judicial and administrative proceedings is governed by § 164.512(e).

Comment: One commenter requested that we prohibit mental health information that has been disclosed from being re-disclosed without patient authorization.

Response: Psychotherapy notes may only be disclosed pursuant to an authorization, except under limited circumstances. Covered entities must adhere to the terms of authorization and not disclose psychotherapy notes to persons other than those identified as intended recipients or for other purposes. A covered entity that receives psychotherapy notes must adhere to the terms of this rule—including obtaining an authorization for any further use or disclosure. We do not have the authority, however, to prohibit non-covered entities from re-disclosing psychotherapy notes or any other protected health information.

Comment: A provider organization argued for inclusion of language in the final rule that specifies that real or perceived "ownership" of the mental health record does not negate the requirement that patients must specifically authorize the disclosure of their psychotherapy notes. They cited a July 1999 National Mental Health Association survey, which found that for purposes of utilization review, every managed care plan policy reviewed "maintains the right to access the full medical record (including detailed psychotherapy notes) of any consumer covered under its benefit plan at its whim." At least one of the major managed health plans surveyed considered the patient record to be the property of the health plan and governed by the health plan's policies.

Response: Although a covered entity may own a mental health record, the ability to use or disclose an individual's information is limited by state law and this rule. Under this rule, a mental health plan would not have access to psychotherapy notes created by a covered provider unless the individual who is the subject of the notes authorized disclosure to the health plan.

Comment: Some commenters expressed concern regarding the burden created by having to obtain multiple authorizations and requested clarification as to whether separate authorization for use and disclosure of psychotherapy notes is required.

Response: For the reasons explained above, we retain in the final rule a requirement that a separate authorization must be obtained for most uses or disclosures of psychotherapy notes, including those for treatment, payment, and health care operations. The burden of such a requirement is extremely low, however, because under our definition of psychotherapy notes, the need for such authorization will be very rare.

Comment: One commenter stated that Medicare should not be able to require the disclosure of psychotherapy notes because it would destroy a practitioner's ability to treat patients effectively.

Response: We agree. As in the proposed rule, covered entities may not disclose psychotherapy notes for payment purposes without an authorization. If a specific provision of law requires the disclosure of these notes, a covered entity may make the disclosure under § 164.512(a). The final rule, however, does not require the disclosure of these notes to Medicare.

Comment: One commenter expressed concern that by filing a complaint an ***82654** individual would be required to reveal sensitive information to the public. Another commenter suggested that complaints regarding noncompliance in regard to psychotherapy notes should be made to a panel of mental health professionals designated by the Secretary. This commenter also proposed that all patient information would be maintained as privileged, would not be revealed to the public, and would be kept under seal after the case is reviewed and closed.

Response: We appreciate this concern and the Secretary will ensure that individually identifiable health information and other personal information contained in complaints will not be available to the public. This Department seeks to protect the privacy of individuals to the fullest extent possible, while permitting the exchange of records required to fulfill its administrative and program responsibilities. The Freedom of Information Act, 5 U.S.C. 552, and the HHS implementing regulation, 45 CFR part 5, protect records about individuals if the disclosure would constitute an unwarranted invasion of their personal privacy, as does the Privacy Act, 5 U.S.C. 552a. See the discussion of FOIA and the Privacy Act in the "Relationship to Other Federal Laws" section of the preamble. Information that the Secretary routinely withholds from the public in its current enforcement activities includes individual names, addresses, and medical information. Additionally, the Secretary attempts to guard against the release of information that might involve a violation of personal privacy by someone being able to "read between the lines" and piece together items that would constitute information that normally would be protected from release to the public. In implementing the privacy rule, the Secretary will continue this practice of protecting personal information.

It is not clear whether the commenter with regard to the use of mental health professionals believes that such professionals should be involved because they would be best able to keep psychotherapy notes confidential or because such professionals can best understand the meaning or relevance of such notes. We anticipate that we would not have to obtain a copy or review psychotherapy notes in investigating most complaints regarding noncompliance in regard to such notes. There may be some cases in which a quick review of the notes may be needed, such as when we need to identify that the information a covered entity disclosed was in fact psychotherapy notes. If we need to obtain a copy of psychotherapy notes, we will keep these notes confidential and secure. Investigative staff will be trained in privacy to ensure that they fully respect the confidentiality of personal information. In addition, while the content of these notes is generally not relevant to violations under this rule, we will secure the expertise of mental health professionals if needed in reviewing psychotherapy notes.

Comment: A mental health organization recommended prohibiting health plans and covered health care providers from disclosing psychotherapy notes to coroners or medical examiners.

Response: In general, we have severely limited disclosures of psychotherapy notes without the individual's authorization. One case where the information may prove invaluable, but authorization by the individual is impossible and authorization by a surrogate is potentially contraindicated, is in the investigation of the death of the individual. The final rule allows for disclosures to coroners or medical examiners in this limited case.

Comment: One commenter recommended prohibiting disclosure without authorization of psychotherapy notes to government health data systems.

Response: The decision to eliminate the general provision permitting disclosures to government health data systems addresses this comment.

Comment: Several commenters were concerned that in practice, a treatment team in a mental health facility shares information about a patient in order to care for the patient and that the provision requiring authorization for use and disclosure of psychotherapy notes would expose almost all privileged information to disclosure. They requested that we add a provision that any authorization or disclosure under that statute shall not constitute a waiver of the psychotherapist-patient privilege.

Response: Because of the restricted definition we have adopted for psychotherapy notes, we do not expect that members of a team will share such information. Information shared in order to care for the patient is, by definition, not protected as psychotherapy notes. With respect to waiving privilege, however, we believe that the consents and authorizations described in §§ 164.506 and 164.508 should not be construed as waivers of a patient's evidentiary privilege. See the discussions under § 164.506 and "Relationship to Other Laws," above.

Research Information Unrelated to Treatment

Definition of Research Information Unrelated to Treatment

Comment: The majority of commenters, including many researchers and health care providers, objected to the proposed definition of research information unrelated to treatment, asserting that the privacy rule should not distinguish research information unrelated to treatment from other forms of protected health information. Even those who supported the proposed distinction between research information related and unrelated to treatment suggested alternative definitions for research information unrelated to treatment.

A large number of commenters were concerned that the definition of research information unrelated to treatment was vague and unclear and, therefore, would be difficult or impossible to apply. These commenters asserted that in many instances it would not be feasible to ascertain whether research information bore some relation to treatment. In addition, several commenters asserted that the need for distinguishing research information unrelated to treatment from other forms of protected health information was not necessary because the proposed rule's general restrictions for the use and disclosure of protected health information and the existing protections for research information were sufficiently strong.

Of the commenters who supported the proposed distinction between research information related and unrelated to treatment, very few supported the proposed definition of research unrelated to treatment. A few commenters recommended that the definition incorporate a good faith provision and apply only to health care providers, because they thought it was unlikely that a health plan or health care clearinghouse would be conducting research. One commenter recommended defining research information unrelated to treatment as information which does not directly affect the treatment of the individual patient. As a means of clarifying and standardizing the application of this definition, one commenter also asserted that the definition should be based on whether the research information was for publication. In addition, one commenter specifically objected to the provision of the proposed definition that would have required that research information unrelated to treatment be information "with respect to which the covered entity has not requested payment from ***82655** a third party payor." This commenter asserted that patient protection should not be dependent on whether a health plan will pay for certain care.

Response: We agree with the commenters who found the proposed definition of research information unrelated to treatment to be impractical and infeasible to apply and have eliminated this definition and its related provisions in the final rule. Although we share concerns raised by some commenters that research information generated from research studies that involve the delivery of treatment to individual subjects may need additional privacy protection, we agree with the commenters who asserted that there is not always a clear distinction between research information that is related to treatment and research information that

is not. We found that the alternative definitions proposed by commenters did not alleviate the serious concerns raised by the majority of comments received on this definition.

Instead, in the final rule, we require covered entities that create protected health information for the purpose, in whole or in part, of research that includes treatment of individuals to include additional elements in authorizations they request for the use or disclosure of that protected health information. As discussed in § 164.508(f), these research-related authorizations must include a description of the extent to which some or all of the protected health information created for the research will also be used or disclosed for purposes of treatment, payment, and health care operations. For example, if the covered entity intends to seek reimbursement from the individual's health plan for the routine costs of care associated with the research protocol, it must explain in the authorization the types of information that it will provide to the health plan for this purpose. This information, and the circumstances under which disclosures will be made for treatment, payment, and health care operations, may be more limited than the information and circumstances described in the covered entity's general notice of information practices and are binding on the covered entity.

Under this approach, the covered entity that creates protected health information for research has discretion to determine whether there is a subset of research information that will have fewer allowable disclosures without authorization, and prospective research subjects will be informed about how research information about them would be used and disclosed should they agree to participate in the research study. We believe this provision in the final rule provides covered entities that participate in research necessary flexibility to enhance privacy protections for research information and provides prospective research subjects with needed information to determine whether their privacy interests would be adequately protected before agreeing to participate in a research study that involves the delivery of health care.

The intent of this provision is to permit covered entities that participate in research to bind themselves to a more limited scope of uses and disclosures for all or identified subsets of research information generated from research that involves the delivery of treatment than it may apply to other protected health information. In designing their authorizations, we expect covered entities to be mindful of the often highly sensitive nature of research information and the impact of individuals' privacy concerns on their willingness to participate in research. For example, a covered entity conducting a study which involves the evaluation of a new drug, as well as an assessment of a new un-validated genetic marker of a particular disease, could choose to stipulate in the research authorization that the genetic information generated from this study will not be disclosed without authorization for some of the public policy purposes that would otherwise be permitted by the rule under §§ 164.510 and 164.512 and by the covered entity's notice. A covered entity may not, however, include a limitation affecting its right to make a use or disclosure that is either required by law or is necessary to avert a serious and imminent threat to health or safety.

The final rule also permits the covered entity to combine the research authorization under § 164.508(f) with the consent to participate in research, such as the informed consent document as stipulated under the Common Rule or the Food and Drug Administration's human subjects regulations.

Enhance Privacy Protections for Research Information

Comment: A number of commenters argued that research information unrelated to treatment should have fewer allowable disclosures without authorization than those that would have been permitted by the proposed rule. The commenters who made this argument included those commenters who recommended that the privacy rule not cover the information we proposed to constitute research information unrelated to treatment, as well as those who asserted that the rule should cover such information. These commenters agreed with the concern expressed in the proposed rule that patients would be reluctant to participate in research if they feared that research information could be disclosed without their permission or used against them. They argued that fewer allowable disclosures should be permitted for research information because the clinical utility of the research information is most often unknown, and thus, it is unsuitable for use in clinical decision making. Others also argued that it is critical to the conduct of clinical research that researchers be able to provide individual research subjects, and the public at large, the greatest possible assurance that their privacy and the confidentiality of any individually identifiable research information will be protected from disclosure.

Several commenters further recommended that only the following uses and disclosures be permitted for research information unrelated to treatment without authorization: (1) For the oversight of the researcher or the research study; (2) for safety and efficacy reporting required by FDA; (3) for public health; (4) for emergency circumstances; or (5) for another research study. Other commenters recommended that the final rule explicitly prohibit law enforcement officials from gaining access to research records.

In addition, several commenters asserted that the rule should be revised to ensure that once protected health information was classified as research information unrelated to treatment, it could not be re-classified as something else at a later date. These commenters believed that if this additional protection were not added, this information would be vulnerable to disclosure in the future, if the information were later to gain scientific validity. They argued that individuals may rely on this higher degree of confidentiality when consenting to the collection of the information in the first instance, and that confidentiality should not be betrayed in the future just because the utility of the information has changed.

Response: We agree with commenters who argued that special protections may be appropriate for research information in order to provide research subjects with assurances that their decision to participate in research will not result in harm stemming from the misuse of the research information. We are aware that some researchers currently retain separate research records and medical records as a means of providing more stringent privacy protections for the research record. The final rule permits ***82656** covered entities that participate in research to continue to provide more stringent privacy protections for the research record, and the Secretary strongly encourages this practice to protect research participants from being harmed by the misuse of their research information.

As discussed above, in the final rule, we eliminate the special rules for this proposed definition of research information unrelated to treatment and its related provisions, so the comments regarding its application are moot.

Comment: Some commenters recommended that the final rule prohibit a covered entity from conditioning treatment, enrollment in a health plan, or payment on a requirement that the individual authorize the use or disclosure of information we proposed to constitute research information unrelated to treatment.

Response: Our decision to eliminate the definition of research information unrelated to treatment and its related provisions in the final rule renders this comment moot.

Comment: A few commenters opposed distinguishing between research information related to treatment and research information unrelated to treatment, arguing that such a distinction could actually weaken the protection afforded to clinically-related health information that is collected in clinical trials. These commenters asserted that Certificates of Confidentiality shield researchers from being compelled to disclose individually identifiable health information relating to biomedical or behavioral research information that an investigator considers sensitive.

Response: Our decision to eliminate the definition of research information unrelated to treatment and its related provisions in the final rule renders this comment moot. We would note that nothing in the final rule overrides Certificates of Confidentiality, which protect against the compelled disclosure of identifying information about subjects of biomedical, behavioral, clinical, and other research as provided by the Public Health Service Act section 301(d), 42 U.S.C. 241(d).

Privacy Protections for Research Information Too Stringent

Comment: Many of the commenters who opposed the proposed definition of research information unrelated to treatment and its related provisions believed that the proposed rule would have required authorization before research information unrelated to treatment could have been used or disclosed for any of the public policy purposes outlined in proposed § 164.510, and that this restriction would have significantly hindered many important activities. Many of these commenters specifically opposed this

provision, arguing that the distinction would undermine and impede research by requiring patient authorization before research information unrelated to treatment could be used or disclosed for research.

Furthermore, some commenters recommended that the disclosure of research information should be governed by an informed consent agreement already in place as part of a clinical protocol, or its disclosure should be considered by an institutional review board or privacy board.

Response: Our decision to eliminate the definition of research information unrelated to treatment and its related provisions in the final rule renders the first two comments moot.

We disagree with the comment that suggests that existing provisions under the Common Rule are sufficient to protect the privacy interests of individuals who are subjects in research that involves the delivery of treatment. As discussed in the NPRM, not all research is subject to the Common Rule. In addition, we are not convinced that existing procedures adequately inform individuals about how their information will be used as part of the informed consent process. In the final rule, we provide for additional disclosure to subjects of research that involves the delivery of treatment as part of the research authorization under § 164.508(f). We also clarify that the research authorization could be combined with the consent to participate in research, such as the informed consent document as stipulated under the Common Rule or the Food and Drug Administration's human subjects regulations. The Common Rule (§_.116(a)(5)) requires that "informed consent" include "a statement describing the extent, if any, to which confidentiality of records identifying the subject will be maintained." We believe that the research authorization requirements of § 164.508(f) complement the Common Rule's requirement for informed consent.

The Secretary's Authority

Comment: Several commenters, many from the research community, asserted that the coverage of "research information unrelated to treatment" was beyond the Department's legal authority since HIPAA did not give the Secretary authority to regulate researchers. These commenters argued that the research records held by researchers who are performing clinical trials and who keep separate research records should not be subject to the final rule. These commenters strongly disagreed that a health provider-researcher cannot carry out two distinct functions while performing research and providing clinical care to research subjects and, thus, asserted that research information unrelated to treatment that is kept separate from the medical record, would not be covered by the privacy rule.

Response: We do not agree the Secretary lacks the authority to adopt standards relating to research information, including research information unrelated to treatment. HIPAA provides authority for the Secretary to set standards for the use and disclosure of individually identifiable health information created or received by covered entities. For the reasons commenters identified for why it was not practical or feasible to divide research information into two categories—research information related to treatment and research information unrelated to treatment—we also determined that for a single research study that includes the treatment of research subjects, it is not practical or feasible to divide a researcher into two categories—a researcher who provides treatment and a researcher who does not provide treatment to research subjects. When a researcher is interacting with research subjects for a research study that involves the delivery of health care to subjects, it is not always clear to either the researcher or the research subject whether a particular research activity will generate research information that will be pertinent to the health care of the research subject. Therefore, we clarify that a researcher may also be a health care provider if that researcher provides health care, e.g., provides treatment to subjects in a research study, and otherwise meets the definition of a health care provider, regardless of whether there is a component of the research study that is unrelated to the health care of the research subjects. This researcher/health care provider is then a covered entity with regard to her provider activities if she conducts standard transactions.

Valid Authorizations

Comment: In proposed § 164.508(b)(1), we specified that an authorization containing the applicable required elements "must be accepted by the covered entity." A few comments requested clarification of this requirement. ***82657**

Response: We agree with the commenters that the proposed provision was ambiguous and we remove it from the final rule. We note that nothing in the rule requires covered entities to act on authorizations that they receive, even if those authorizations are valid. A covered entity presented with an authorization is permitted to make the disclosure authorized, but is not required to do so.

We want to be clear, however, that covered entities will be in compliance with this rule if they use or disclose protected health information pursuant to an authorization that meets the requirements of § 164.508. We have made changes in § 164.508(b)(1) to clarify this point. First, we specify that an authorization containing the applicable required elements is a valid authorization. A covered entity may not reject as invalid an authorization containing such elements. Second, we clarify that a valid authorization may contain elements or information in addition to the required elements, as long as the additional elements are not inconsistent with the required elements.

Comment: A few comments requested that we provide a model authorization or examples of wording meeting the "plain language" requirement. One commenter requested changes to the language in the model authorization to avoid confusion when used in conjunction with an insurer's authorization form for application for life or disability income insurance. Many other comments, however, found fault with the proposed model authorization form.

Response: Because of the myriad of types of forms that could meet these requirements and the desire to encourage covered entities to develop forms that meet their specific needs, we do not include a model authorization form in the final rule. We intend to issue additional guidance about authorization forms prior to the compliance date. We also encourage standard-setting organizations to develop model forms meeting the requirements of this rule.

Defective Authorizations

Comment: Some commenters suggested we insert a "good-faith reliance" or "substantial compliance" standard into the authorization requirements. Commenters suggested that covered entities should be permitted to rely on an authorization as long as the individual has signed and dated the document. They stated that individuals may not fill out portions of a form that they feel are irrelevant or for which they do not have an answer. They argued that requiring covered entities to follow up with each individual to complete the form will cause unwarranted delays. In addition, commenters were concerned that large covered entities might act in good faith on a completed authorization, only to find out that a component of the entity "knew" some of the information on the form to be false or that the authorization had been revoked. These commenters did not feel that covered entities should be held in violation of the rule in such situations.

Response: We retain the provision as proposed and include one additional element: the authorization is invalid if it is combined with other documents in violation of the standards for compound authorizations. We also clarify that an authorization is invalid if material information on the form is known to be false. The elements we require to be included in the authorization are intended to ensure that individuals knowingly and willingly authorize the use or disclosure of protected health information about them. If these elements are missing or incomplete, the covered entity cannot know which protected health information to use or disclose to whom and cannot be confident that the individual intends for the use or disclosure to occur.

We have attempted to make the standards for defective authorizations as unambiguous as possible. In most cases, the covered entity will know whether the authorization is defective by looking at the form itself. Otherwise, the covered entity must know that the authorization has been revoked, that material information on the form is false, or that the expiration date or event has occurred. If the covered entity does not know these things and the authorization is otherwise satisfactory on its face, the covered entity is permitted to make the use or disclosure in compliance with this rule.

We have added two provisions to make it easier for covered entities to "know" when an authorization has been revoked. First, under § 164.508(b)(5), the revocation must be made in writing. Second, under § 164.508(c)(1)(v), authorizations must include

instructions for how the individual may revoke the authorization. Written revocations submitted in the manner appropriate for the covered entity should ease covered entities' compliance burden.

Compound Authorizations

Comment: Many commenters raised concerns about the specificity of the authorization requirement. Some comments recommended that we permit covered entities to include multiple uses and disclosures in a single authorization and allow individuals to authorize or not authorize specific uses and disclosures in the authorization. Other commenters asked whether a single authorization is sufficient for multiple uses or disclosures for the same purpose, for multiple uses and disclosures for related purposes, and for uses and disclosures of different types of information for the same purpose. Some comments from health care providers noted that specific authorizations would aid their compliance with requests.

Response: As a general rule, we prohibit covered entities from combining an authorization for the use or disclosure of protected health information with any other document. For example, an authorization may not be combined with a consent to receive treatment or a consent to assign payment of benefits to a provider. We intend the authorizations required under this rule to be voluntary for individuals, and, therefore, they need to be separate from other forms of consent that may be a condition of treatment or payment or that may otherwise be coerced.

We do, however, permit covered entities to combine authorizations for uses and disclosures for multiple purposes into a single authorization. The only limitations are that an authorization for the use or disclosure of psychotherapy notes may not be combined with an authorization for the use or disclosure of other types of protected health information and that an authorization that is a condition of treatment, payment, enrollment, or eligibility may not be combined with any other authorization.

In § 164.508(b)(3), we also permit covered entities to combine an authorization for the use or disclosure of protected health information created for purposes of research including treatment of individuals with certain other documents.

We note that covered entities may only make uses or disclosures pursuant to an authorization that are consistent with the terms of the authorization. Therefore, if an individual agrees to one of the disclosures described in the compound authorization but not another, the covered entity must comply with the individual's decision. For example, if a covered entity asks an individual to sign an authorization to disclose protected health information for both marketing and fundraising purposes, but the individual only agrees to the fundraising disclosure, the ***82658** covered entity is not permitted to make the marketing disclosure.

Prohibition on Conditioning Treatment, Payment, Eligibility, or Enrollment

Comment: Many commenters supported the NPRM's prohibition of covered entities from conditioning treatment or payment on the individual's authorization of uses and disclosures. Some commenters requested clarification that employment can be conditioned on an authorization. Some commenters recommended that we eliminate the requirement for covered entities to state on the authorization form that the authorization is not a condition of treatment or payment. Some commenters suggested that we prohibit the provision of anything of value, including employment, from being conditioned on receipt of an authorization.

In addition, many commenters argued that patients should not be coerced into signing authorizations for a wide variety of purposes as a condition of obtaining insurance coverage. Some health plans, however, requested clarification that health plan enrollment and eligibility can be conditioned on an authorization.

Response: We proposed to prohibit covered entities from conditioning treatment, payment, or enrollment in a health plan on an authorization for the use or disclosure of psychotherapy notes (see proposed § 164.508(a)(3)(iii)). We proposed to prohibit covered entities from conditioning treatment or payment on authorization for the use or disclosure of any other protected health information (see proposed § 164.508(a)(2)(iii)).

We resolve this inconsistency by clarifying in § 164.508(b)(4) that, with certain exceptions, a covered entity may not condition the provision of treatment, payment, enrollment in a health plan, or eligibility for benefits on an authorization for the use or disclosure of any protected health information, including psychotherapy notes. We intend to minimize the potential for covered entities to coerce individuals into signing authorizations for the use or disclosure of protected health information when such information is not essential to carrying out the relationship between the individual and the covered entity.
