(af) "Dies in the line of duty" means a death that occurs, or occurred, as a direct and proximate result of a personal injury sustained by, or a single exposure to a hazardous material or condition experienced by, a law enforcement officer, fire fighter, or emergency medical services practitioner while he or she was engaged in a line of duty activity or that arose out of and as a result of such an individual's performance of a line of duty activity.

(ah) "Emergency medical services practitioner" has the meaning given in s. 256.01(5), except that in this section it applies only to an individual who is employed directly by a political subdivision or by a joint emergency medical services department operated jointly by 2 or more political subdivisions.

(am) "Law enforcement officer" means all of the following:

1. Any person employed by a political subdivision for the purpose of detecting and preventing crime and enforcing laws or ordinances and who is authorized to make arrests for violations of the laws or ordinances that the person is employed to enforce.

2. Any jailer who, under the direction of a sheriff under s. 59.27(1), keeps persons in a county jail.

3. A Marquette University police officer, as defined in s. 175.42(1)(b).

4. A state patrol officer, as that term is defined in s. 252.01(7).

5. A state capitol police officer.

6. A University of Wisconsin System police officer.

7. An officer of the division of criminal investigation.

8. A department of natural resources conservation warden.

9. A county sheriff, undersheriff, or deputy sheriff.

10. A chief of police.

11. A special agent employed by the department of revenue who is authorized to act under s. 73.031.

12. A state fair park police officer duly appointed under s. 42.01(2).

(ap) "Line of duty activity" means any employment-related action taken by a law enforcement officer, fire fighter, or emergency medical services practitioner that is required or authorized by law, rule, regulation, or condition of employment and for which compensation is provided by his or her employing agency or would have been eligible to have been provided by the employing agency if the law enforcement officer, fire fighter, or emergency medical services practitioner had been on duty when he or she took the action in question.

(as) "Local governmental unit" means a political subdivision, school district (as enumerated in s. 67.01(5)), sewerage district, drainage district, and, without limitation because of enumeration, any other political subdivision of the state.

(b) "Municipality" means any city, village, or town.

(c) "Political subdivision" means any municipality or county.

(2) Liability and worker's compensation insurance. The state or a local governmental unit may procure risk management services and liability insurance covering the state or local governmental unit and its officers, agents and employees and worker's compensation insurance covering officers and employees of the state or local governmental unit. A local governmental unit may participate in and pay the cost of risk management services and liability and worker's compensation insurance through a municipal insurance mutual organized under s. 611.23.

(3) Health insurance for unemployed persons. Any political subdivision may purchase health or dental insurance for unemployed persons residing in the political subdivision who are not eligible for medical assistance under s. 49.46, 49.468, 49.47, or 49.471(4)(a).

(4) Self-insured health plans. If a city, including a 1st class city, or a village provides health care benefits under its home rule power, or if a town provides health care benefits, to its officers and employees on a self-insured basis, the self-insured plan shall

comply with ss. 49.493(3)(d), 631.89, 631.90, 631.93(2), 632.722, 632.729, 632.746(10)(a)2. and (b)2., 632.747(3), 632.798, 632.85, 632.853, 632.855, 632.861, 632.867, 632.87(4) to (6), 632.885, 632.89, 632.895(9) to (17), 632.896, and 767.513(4).

(4m) Joint self-insured plans and stop loss insurance. (a) Notwithstanding sub. (1)(as), in this subsection, "local governmental unit" means a city, village, town, county, or school district.

(b) A local governmental unit and one or more other local governmental units, that together have at least 100 employees, may jointly provide health care benefits to their officers and employees on a self insured basis.

(bm) A technical college district and one or more other technical college districts, that together have at least 100 employees, may jointly do any of the following:

1. Provide health care benefits to their officers and employees on a self-insured basis.

2. Procure stop loss insurance.

3. Self-insure stop loss risk.

(c) Any plan under par. (b) or (bm)1. shall comply with the provisions listed in sub. (4).

(4t) Health insurance for protective services employees. If a 1st class city offers health care insurance to employees who are police officers, fire fighters, or emergency medical services practitioners, as defined in s. 256.01(5), the 1st class city shall also offer to the employees who are police officers, fire fighters, or emergency medical services practitioners a high-deductible health plan.

(5) Hospital, accident and life insurance. (a) In this subsection, "local governmental unit" includes the school district operating under ch. 119.

(b) The state or a local governmental unit may provide for the payment of premiums or cost sharing for hospital, surgical and other health and accident insurance and life insurance for employees and officers, their spouses, and dependent children. A local governmental unit may also provide for the payment of premiums or cost sharing for hospital and surgical care for its retired employees. In addition, a local governmental unit may, by ordinance or resolution, elect to offer to all of its employees a health care coverage plan through a program offered by the group insurance board under ch. 40. A local governmental unit that elects to participate under s. 40.51(7) is subject to the applicable sections of ch. 40 instead of this subsection.

(c)1. Except as provided in subds. 2. and 3., if a municipality provides for the payment of premiums for hospital, surgical, and other health insurance for its fire fighters, it shall continue to pay such premiums for the surviving spouse and dependent children of the fire fighter who dies in the line of duty.

1m. Except as provided in subds. 2. and 3., if a political subdivision, the state, the Board of Regents, or Marquette University provides for the payment of premiums for hospital, surgical, and other health insurance for its law enforcement officers or

emergency medical services practitioners, it shall continue to pay such premiums for the surviving spouse and dependent children of the law enforcement officer or emergency medical services practitioner who dies in the line of duty.

2. A political subdivision, the state, the Board of Regents, or Marquette University may not be required to pay the premiums described in subd. 1. or 1m. for a surviving spouse upon the remarriage of the surviving spouse or upon the surviving spouse reaching the age of 65.

3. An individual is not a dependent child for the purposes of subd. 1. or 1m. after the individual reaches the age of 26.

4. Except as needed to administer this paragraph, a political subdivision, the state, the Board of Regents, and Marquette University shall keep confidential any personally identifiable information, as defined in s. 19.62(5), of a surviving spouse and dependent children for whom the political subdivision, the state, the Board of Regents, or university makes a payment under this paragraph.

(d) If a political subdivision pays the premiums described in par. (c)1. or 1m., annually, in order to receive reimbursement, the political subdivision shall report to the department of revenue by March 15 of each year the amounts paid in the previous calendar year.

66.0139. Disposal of abandoned property

Currentness

(1) In this section, "political subdivision" means a city, village, town or county.

(2) A political subdivision may dispose of any personal property which has been abandoned, or remained unclaimed for a period of 30 days, after the taking of possession of the property by an officer of the political subdivision by any means determined to be in the best interest of the political subdivision. If the property is not disposed of in a sale open to the public, the political subdivision shall maintain an inventory of the property, a record of the date and method of disposal, including the consideration received for the property, if any, and the name and address of the person taking possession of the property. The inventory shall be kept as a public record for a period of not less than 2 years from the date of disposal of the property. Any means of disposal other than public auction shall be specified by ordinance. If the disposal is in the form of a sale, all receipts from the sale, after deducting the necessary expenses of keeping the property and conducting the sale, shall be paid into the treasury of the political subdivision.

(3) A political subdivision may safely dispose of abandoned or unclaimed flammable, explosive, or incendiary substances, materials, or devices that pose a danger to life or property in their storage, transportation, or use immediately after taking possession of the substances, materials, or devices without a public auction. The political subdivision, by ordinance or resolution, may establish disposal procedures. Procedures may include provisions authorizing an attempt to return to the rightful owner substances, materials, or devices that have a commercial value in normal business usage and do not pose an immediate threat to life or property. If enacted, a disposal procedure shall include a presumption that if the substance, material, or device appears to be or is reported stolen, an attempt will be made to return the substance, material, or device to the rightful owner.

(4) Except as provided in s. 968.20(3), a 1st class city shall dispose of abandoned or unclaimed dangerous weapons or ammunition without a public auction 12 months after taking possession of them if the owner has not requested their return. Disposal procedures shall be established by ordinance or resolution and may include provisions authorizing an attempt to return to the rightful owner any dangerous weapons or ammunition which appear to be stolen or are reported stolen. If enacted, a disposal procedure shall include a presumption that if the dangerous weapons or ammunition appear to be or are reported stolen an attempt will be made to return the dangerous weapons or ammunition to the rightful owner. The dangerous weapons or ammunition are subject to sub. (5).

(5) A political subdivision may retain or dispose of any abandoned, unclaimed or seized dangerous weapon or ammunition only under s. 968.20.

66.0143. Local appeals for exemption from state mandates

Currentness

(1) Definitions. In this section:

(a) "Political subdivision" means a city, village, town, or county.

(b) "State mandate" means a state law that requires a political subdivision to engage in an activity or provide a service, or to increase the level of its activities or services.

(2) Appeals for exemptions. (a) A political subdivision may file a request with the department of revenue for a waiver from a state mandate, except for a state mandate that is related to any of the following:

1. Health.

2. Safety.

(b) An administrative agency, or the department of revenue, may grant a political subdivision a waiver from a state mandate as provided in par. (c).

(c) The political subdivision shall specify in its request for a waiver its reason for requesting the waiver. Upon receipt of a request for a waiver, the department of revenue shall forward the request to the administrative agency that is responsible for administrating the state mandate. The agency shall determine whether to grant the waiver and shall notify the political subdivision and the department of revenue of its decision in writing. If no agency is responsible for administrating the state mandate, the department of revenue shall determine whether to grant the waiver and shall notify the political subdivision of its decision in writing.

(3) Duration of waivers. A waiver is effective for 4 years. The administrative agency may renew the waiver for additional 4-year periods. If a waiver is granted by the department of revenue, the department may renew the waiver under this subsection.

(4) Evaluation. By July 1, 2004, the department of revenue shall submit a report to the governor, and to the appropriate standing committees of the legislature under s. 13.172(3). The report shall specify the number of waivers requested under this section, a

description of each waiver request, the reason given for each waiver request, and the financial effects on the political subdivision of each waiver that was granted.

Subchapter II. Incorporation; Municipal Boundaries

W.S.A. 66.0201

66.0201. Incorporation of villages and cities; purpose and definitions

Currentness

(1) Purpose. It is the policy of this state that the development of territory from town to incorporated status proceed in an orderly and uniform manner and that toward this end each proposed incorporation of territory as a village or city be reviewed as provided in ss. 66.0201 to 66.0213 to assure compliance with certain minimum standards which take into account the needs of both urban and rural areas.

(2) Definitions. In ss. 66.0201 to 66.0213, unless the context requires otherwise:

(am) "Board" means the incorporation review board.

(ar) "Department" means the department of administration.

(bm) "Isolated municipality" means any existing or proposed village or city entirely outside any metropolitan community at the time of its incorporation.

(c) "Metropolitan community" means the territory consisting of any city having a population of 25,000 or more, or any 2 incorporated municipalities whose boundaries are within 5 miles of each other whose populations aggregate 25,000, plus all the contiguous area which has a population density of 100 persons or more per square mile, or which the department has determined on the basis of population trends and other pertinent facts will have a minimum density of 100 persons per square mile within 3 years.

(d) "Metropolitan municipality" means any existing or proposed village or city entirely or partly within a metropolitan community.

(dm) "Population" means the population of a local unit as shown by the last federal census or by any subsequent population estimate certified as acceptable by the department.

Subchapter II. Incorporation; Municipal Boundaries

W.S.A. 66.0203

66.0203. Procedure for incorporation of villages and cities

Currentness

(1) Notice of intention. At least 10 days and not more than 20 days before the circulation of an incorporation petition, a notice setting forth that the petition is to be circulated and including an accurate description of the territory involved shall be published within the county in which the territory is located as a class 1 notice, under ch. 985.

(2) Petition. (a) The petition for incorporation of a village or city shall be in writing signed by 50 or more persons who are both electors and freeholders in the territory to be incorporated if the population of the proposed village or city includes 300 or more persons; otherwise by 25 or more persons who are both electors and freeholders in the territory to be incorporated.

(b) The petition shall be addressed to and filed with the circuit court of a county in which all or a major part of the territory to be incorporated is located. The incorporation petition is void unless filed within 6 months of the date of publication of the notice of intention to circulate.

(c) The petition shall designate a representative of the petitioners, and an alternate, who shall be an elector or freeholder in the territory, and state that person's address; describe the territory to be incorporated with sufficient accuracy to determine its location and have attached to the petition a scale map reasonably showing the boundaries of the territory; specify the current resident population of the territory by number in accordance with the definition given in s. 66.0201(2)(dm); set forth facts substantially establishing the required standards for incorporation; and request the circuit court to order a referendum and to certify the incorporation of the village or city when it is found that all requirements have been met.

(e) No person who has signed a petition may withdraw his or her name from the petition. No additional signatures may be added after a petition is filed.

(f) The circulation of the petition shall commence not less than 10 days nor more than 20 days after the date of publication of the notice of intention to circulate.

(3) Hearing; costs. (a) Upon the filing of the petition the circuit court shall by order fix a time and place for a hearing giving preference to the hearing over other matters on the court calendar.

(b) The court may by order allow costs and disbursements as provided for actions in circuit court in any proceeding under this subsection.

(c) The court may, upon notice to all parties who have appeared in the hearing and after a hearing on the issue of bond, order the petitioners or any of the opponents to post bond in an amount that it considers sufficient to cover disbursements.

(4) Notice. (a) Notice of the filing of the petition and of the date of the hearing on the petition before the circuit court shall be published in the territory to be incorporated, as a class 2 notice, under ch. 985, and given by certified or registered mail to the clerk of each town in which the territory is located and to the clerk of each metropolitan municipality of the metropolitan community in which the territory is located. The mailing shall be not less than 10 days before the time set for the hearing.

(b) The notice shall contain:

1. A description of the territory sufficiently accurate to determine its location and a statement that a scale map reasonably showing the boundaries of the territory is on file with the circuit court.

2. The name of each town in which the territory is located.

3. The name and post-office address of the representative of the petitioners.

(4m) Incorporations involving portions of 2 towns. If the territory designated in the petition is comprised of portions of only 2 towns, the territory may not be incorporated unless the town board of each town adopts a resolution approving the incorporation.

(5) Parties. Any governmental unit entitled to notice pursuant to sub. (4), any school district which lies at least partly in the territory or any other person found by the court to be a party in interest may become a party to the proceeding prior to the time set for the hearing.

(6) Annexation resolution. Any municipality whose boundaries are contiguous to the territory may also file with the circuit court a certified copy of a resolution adopted by a two-thirds vote of the elected members of the governing body indicating a willingness to annex the territory designated in the incorporation petition. The resolution shall be filed at or prior to the hearing on the incorporation petition, or any adjournment granted for this purpose by the court.

(7) Action. (a) No action to contest the validity of an incorporation on any grounds, whether procedural or jurisdictional, may be commenced after 60 days from the date of issuance of the certificate of incorporation by the secretary of administration.

(b) An action contesting an incorporation shall be given preference in the circuit court.

(8) Function of the circuit court. (a) After the filing of the petition and proof of notice, the circuit court shall conduct a hearing at the time and place specified in the notice, or at a time and place to which the hearing is duly adjourned.

(b) On the basis of the hearing the circuit court shall find if the standards under s. 66.0205 are met. If the court finds that the standards are not met, the court shall dismiss the petition. Subject to par. (c), if the court finds that the standards are met the court shall refer the petition to the board. Upon payment of any fee imposed under s. 16.53(14), the board shall determine whether the standards under s. 66.0207 are met.

(c)1. The court shall determine whether an annexation proceeding that affects any territory included in the incorporation petition has been initiated under s. 66.0217, 66.0219, or 66.0223. A court shall consider an annexation proceeding under s. 66.0223 to have been initiated upon the posting of a meeting notice by a city or village that states that the city or village is considering enacting an ordinance under s. 66.0223.

2. If the court determines that an annexation proceeding described under subd. 1. was initiated before the publication of the notice under sub. (1), the court shall refer the petition to the board when the annexation proceeding is final. If the annexation is determined to be valid, the court shall exclude the annexed territory from the territory proposed to be incorporated when it refers the petition to the board.

3. If the court determines that an annexation proceeding described under subd. 1. was initiated after, and within 30 days after, the publication of the notice under sub. (1), the annexation may not proceed until the validity of the incorporation has been determined. If the incorporation is determined to be valid and complete, the annexation is void. If the incorporation is determined to be invalid, the annexation may proceed.

4. If the court determines that an annexation proceeding described under subd. 1. was initiated on the same date as the publication of the notice under sub. (1), the court shall determine which procedure was begun first on that date and that action may proceed and the other action may not proceed unless the first action fails.

5. If the court determines that an annexation proceeding described under subd. 1. was initiated more than 30 days after the publication of the notice under sub. (1), the annexation is void.

(9) Function of the board. (a) Upon receipt of the petition from the circuit court and payment of any fee imposed under s. 16.53(14), the board shall make any necessary investigation to apply the standards under s. 66.0207.

(b) Within 30 days after the receipt by the board of the petition from the circuit court and payment of any fee imposed under s. 16.53(14), whichever is later, any party in interest may request a hearing. Upon receipt of the request, the board shall schedule a hearing at a place in or convenient to the territory sought to be incorporated.

(c) Notice of the hearing shall be given in the territory to be incorporated by publishing a class 2 notice, under ch. 985, and by mailing the notice to the designated representative of the petitioners or any 5 petitioners and to all town and municipal clerks entitled to receive mailed notice of the petition under sub. (4).

(d) Subject to par. (dm), unless the court sets a different time limit, the board shall prepare its findings and determination, citing the supporting evidence, within 180 days after receipt of the referral from the court and payment of any fee imposed under s. 16.53(14), whichever is later. The findings and determination shall be forwarded by the board to the circuit court. Copies of the

findings and determination shall be sent by certified or registered mail to the designated representative of the petitioners, and to all town and municipal clerks entitled to receive mailed notice of the petition under sub. (4).

(dm) The time period specified or set by the court under par. (d) shall be stayed for a reasonable period of time to allow for alternative dispute resolution of any disagreements between interested parties that result from the filing of an incorporation petition if all interested parties agree to this stay and provide written notice of their agreement to the board and to the circuit court.

(e) The determination of the board made in accordance with the standards under ss. 66.0205, 66.0207 and 66.0217(6)(c) shall be one of the following:

1. The petition as submitted is dismissed.

2. The petition as submitted is granted.

3. The petition as submitted is dismissed with a recommendation that a new petition be submitted to include more or less territory as specified in the department's findings and determination.

(f)1. If the board determines that the petition shall be dismissed under par. (e)1., the circuit court shall issue an order dismissing the petition. Except as provided in subd. 2., if the board grants the petition, the circuit court shall order an incorporation referendum as provided in s. 66.0211.

2. If sub. (4m) applies, the court shall dismiss the petition if the court does not find that the resolutions required under sub. (4m) have been adopted. Paragraph (g) does not apply to this subdivision.

(g) The findings of both the court and the board shall be based upon facts as they existed at the time of the filing of the petition.

(h) Except for an incorporation petition which describes the territory recommended by the board under sub. (9)(e)3., no petition for the incorporation of the same or substantially the same territory may be entertained for one year following the date of dismissal under par. (f) of the petition or the date of any election at which incorporation was rejected by the electors.

(i) If the board fails to make a determination within the time limit under par. (d), the board shall refund the fees imposed by the board under s. 16.53(14) and shall then make a determination as quickly as possible.

(10) Certain towns may become a city or village. A town that is adjacent to a village that contains an electronics and information technology manufacturing zone that is designated under s. 238.396(1m) may become a city or village if the town holds, and approves, an incorporation referendum as described in s. 66.0211(3). None of the other procedures contained in ss. 66.0201 to 66.0213 need to be fulfilled, and no approval by the board under s. 66.0207 is necessary for the town to become a city or village.

66.0205. Standards to be applied by the circuit court

Currentness

Before referring the incorporation petition as provided in s. 66.0203(2) to the board, the court shall determine whether the petition meets the formal and signature requirements and shall further find that the following minimum requirements are met:

(1) Isolated village. Area, one-half square mile; resident population, 150.

(2) Isolated city. Area, one square mile; resident population, 1,000; density, at least 500 persons in any one square mile.

(3) Metropolitan village. Area, 2 square miles; resident population, 2,500; density, at least 500 persons in any one square mile.

(4) Metropolitan city. Area, 3 square miles; resident population, 5,000; density, at least 750 persons in any one square mile.

(5) Standards when near 1st, 2nd or 3rd class city. If the proposed boundary of a metropolitan village or city is within 10 miles of the boundary of a 1st class city or 5 miles of a 2nd or 3rd class city, the minimum area requirements are 4 and 6 square miles for villages and cities, respectively.

Notes of Decisions (9)

W. S. A. 66.0205, WI ST 66.0205
Current through 2023 Act 272, published April 10, 2024.

End of Document

W.S.A. 66.0207

66.0207. Standards to be applied by the board

Currentness

(1) Requirements. The board may approve for referendum only those proposed incorporations which meet the following requirements:

(a) *Characteristics of territory.* The entire territory of the proposed village or city shall be reasonably homogeneous and compact, taking into consideration natural boundaries, natural drainage basin, soil conditions, present and potential transportation facilities, previous political boundaries, boundaries of school districts, shopping and social customs. An isolated municipality shall have a reasonably developed community center, including some or all features such as retail stores, churches, post office, telecommunications exchange and similar centers of community activity.

(b) *Territory beyond the core.* The territory beyond the most densely populated one-half square mile specified in s. 66.0205(1) or the most densely populated square mile specified in s. 66.0205(2) shall have an average of more than 30 housing units per quarter section or an assessed value, as defined in s. 66.0217(1)(a) for real estate tax purposes, more than 25 percent of which is attributable to existing or potential mercantile, manufacturing or public utility uses. The territory beyond the most densely populated square mile as specified in s. 66.0205(3) or (4) shall have the potential for residential or other urban land use development on a substantial scale within the next 3 years. The board may waive these requirements to the extent that water, terrain or geography prevents the development.

(2) Additional considerations. In addition to complying with each of the applicable standards set forth in sub. (1) and s. 66.0205 in order to be approved for referendum, a proposed incorporation must be in the public interest as determined by the board upon consideration of the following:

(a) *Tax revenue.* The present and potential sources of tax revenue appear sufficient to defray the anticipated cost of governmental services at a local tax rate which compares favorably with the tax rate in a similar area for the same level of services.

(b) *Level of services.* The level of governmental services desired or needed by the residents of the territory compared to the level of services offered by the proposed village or city and the level available from a contiguous municipality which files a certified copy of a resolution as provided in s. 66.0203(6).

(c) *Impact on the remainder of the town.* The impact, financial and otherwise, upon the remainder of the town from which the territory is to be incorporated.

(d) *Impact on the metropolitan community.* The effect upon the future rendering of governmental services both inside the territory proposed for incorporation and elsewhere within the metropolitan community. There shall be an express finding that the proposed incorporation will not substantially hinder the solution of governmental problems affecting the metropolitan community.

66.0209. Review of incorporation-related orders and decisions

Currentness

(1) The order of the circuit court made under s. 66.0203(8) or (9)(f) may be appealed to the court of appeals.

(2) The decision of the board made under s. 66.0203(9) is subject to judicial review under ch. 227.

(3) Where a proceeding for judicial review is commenced under sub. (2), appeal under sub. (1) may not be taken and the time in which the appeal may be taken does not commence to run until judgment is entered in the proceeding for judicial review.

(4) An incorporation referendum ordered by the circuit court under s. 66.0203(9)(f) may not be stayed pending the outcome of further litigation, unless the court of appeals or the supreme court, upon an appeal or upon the filing of an original action in the supreme court, concludes that a strong probability exists that the order of the circuit court or the decision of the board will be set aside.

Subchapter II. Incorporation; Municipal Boundaries

W.S.A. 66.0211

66.0211. Incorporation referendum procedure

Currentness

(1) Order. The circuit court's order for an incorporation referendum shall specify the voting place and the date of the referendum, which shall be not less than 6 weeks from the date of the order, and name 3 inspectors of election. If the order is for a city incorporation referendum the order shall further specify that 7 alderpersons shall be elected at large from the proposed city. The city council at its first meeting shall determine the number and boundaries of wards in compliance with s. 5.15(1) and (2), and the combination of wards into aldermanic districts. The number of alderpersons per aldermanic district shall be determined by charter ordinance.

(2) Notice of referendum. Notice of the referendum shall be given by publication of the order of the circuit court in a newspaper having general circulation in the territory. Publication shall be once a week for 4 successive weeks. The first publication may not be more than 4 weeks before the referendum.

(3) Return. An incorporation referendum shall be conducted in the same manner as an annexation referendum under s. 66.0217(7) to the extent applicable except that the ballot shall contain the words “For a city [village]” and “Against a city [village]”. The inspectors shall make a return to the circuit court.

(4) Costs. If the referendum is against incorporation, the costs of the election shall be borne by the towns involved in the proportion that the number of electors of each town within the territory proposed to be incorporated, voting in the referendum, bears to the total number of electors in the territory voting in the referendum. If the referendum is for a village or city, the costs shall be charged against the municipality in the apportionment of town assets.

(5) Certification of incorporation. If a majority of the votes in an incorporation referendum are cast in favor of a village or city, the clerk of the circuit court shall certify the fact to the secretary of administration and supply the secretary of administration with a copy of a description of the legal boundaries of the village or city and the associated population and a copy of a plat of the village or city. Within 10 days of receipt of the description and plat, the secretary of administration shall forward 2 copies to the department of transportation and one copy each to the department of administration and the department of revenue. The secretary of administration shall issue a certificate of incorporation and record the certificate.

Municipalities (Ch. 59 to 68)
Chapter 66. General Municipality Law (Refs & Annos)
Subchapter II. Incorporation; Municipal Boundaries

W.S.A. 66.0213

66.0213. Powers of new village or city: elections; adjustment of taxes; reorganization as village

Currentness

(1) Village or city powers. A village or city incorporated under ss. 66.0201 to 66.0213 is a body corporate and politic, with powers and privileges of a municipal corporation at common law and conferred by these statutes.

(2) Existing ordinances. Ordinances in force in the territory incorporated or any part of the territory, to the extent not inconsistent with chs. 61 and 62, continue in force until altered or repealed.

(3) Interim officers. All officers of the village or town embracing the territory that is incorporated as a village or city continue in their powers and duties until the first meeting of the board of trustees or common council at which a quorum is present. Until a village or city clerk is chosen and qualified all oaths of office and other papers shall be filed with the circuit court with which the petition was filed. The court shall deliver the oaths and other papers with the petition to the village or city clerk when that clerk qualifies.

(4) First village or city election. (a) Within 10 days after incorporation of the village or city, the county clerk of the county in which the petition was filed shall fix a time for the first election, and where appropriate designate the polling place or places, and name 3 inspectors of election for each place. The time for the election shall be fixed no less than 40 nor more than 50 days after the date of the certificate of incorporation issued by the secretary of administration, irrespective of any other provision in the statutes. Nomination papers shall conform to ch. 8 to the extent applicable. Nomination papers shall be signed by not less than 5 percent nor more than 10 percent of the total votes cast at the referendum election, and be filed no later than 15 days before the time fixed for the election. Ten days' previous notice of the election shall be given by the county clerk by publication in the newspapers selected under s. 66.0211(2) and by posting notices in 3 public places in the village or city, but failure to give notice does not invalidate the election.

(b) The election shall be conducted as prescribed by ch. 6. The inspectors shall make returns to the county clerk who shall, within 14 days after the election, canvass the returns and declare the result. The clerk shall notify the officers-elect and issue certificates of election. If the first election is on the first Tuesday in April the officers elected and their appointees shall commence and hold their offices as for a regular term. Otherwise they shall commence within 14 days and hold their offices until the regular village or city election and the qualification of their successors and the terms of their appointees expire as soon as successors qualify.

(5) Taxes levied before incorporation; how collected and divided. If a village or city is incorporated after the assessment of taxes in any year and before the collection of the taxes, the tax assessed shall be collected by the town treasurer of the town or the town treasurers of the different towns of which the village or city formerly constituted a part, and all moneys collected from the tax levied for town purposes shall be divided between the village or city and the town or the towns, as provided by s. 66.0235(13)(a)1., for the division of property owned jointly by towns and villages.

(6) Reorganization of city as village. If the population of any city falls below 1,000 as determined by the United States census, the council may upon filing of a petition conforming to the requirements of s. 8.40 containing the signatures of at least 15 percent of the electors submit at any general or city election the question whether the city shall reorganize as a village. If three-fifths of the votes cast on the question are for reorganization the mayor and council shall record the return in the office of the register of deeds, file a certified copy with the clerk of the circuit court, and immediately call an election, to be conducted as are village elections, for the election of village officers. Upon the qualification of the officers, the board of trustees shall declare the city reorganized as a village, and the reorganization is effective. The clerk shall certify a copy of the declaration to the secretary of administration who shall file the declaration and endorse a memorandum of the declaration on the record of the certificate of incorporation of the city. Rights and liabilities of the city continue in favor of or against the village. Ordinances, so far as within the power of the village, remain in force until changed.

Notes of Decisions (20)

W. S. A. 66.0213, WI ST 66.0213
Current through 2023 Act 272, published April 10, 2024.

End of Document

W.S.A. 66.0215

66.0215. Incorporation of certain towns adjacent to 1st class cities

Currentness

(1) Petition. If the resident population of a town exceeds 5,000 as shown by the last federal census or by a census under sub. (2), if the town is adjacent to a 1st class city and contains an equalized valuation in excess of $20,000,000 and if a petition signed by 100 or more persons, each an elector and taxpayer of the town, containing the signatures of at least 50 percent of the owners of real estate in the town and requesting submission of the question to the electors of the town, is filed with the clerk of the town, the procedure for becoming a 4th class city is initiated.

(2) Referendum. At the next regular meeting of the town board following the filing of the petition under sub. (1), the board by resolution shall provide for a referendum by the electors of the town. The resolution shall conform to the requirements of s. 5.15(1) and (2) and shall determine the numbers and boundaries of each ward of the proposed city and the time of voting, which may not be earlier than 6 weeks after the adoption of the resolution. The resolution may direct that a census be taken of the resident population of the territory on a day not more than 10 weeks previous to the date of the election, exhibiting the name of every head of a family and the name of every person who is a resident in good faith of the territory on that day, and the lot or quarter section of land on which that person resides, which shall be verified by the affixed affidavit of the person taking the census.

(3) Notice of referendum. Notice of the referendum shall be given by publication of the resolution in a newspaper published in the town, if there is one, otherwise in a newspaper designated in the resolution, once a week for 4 successive weeks, the first publication to be not more than 4 weeks before the referendum.

(4) Voting procedure. The referendum shall be conducted in the same manner as elections for supervisors of the town board. The question appearing on the ballot shall be “Shall the town of ... become a 4th class city?”. Below the question shall appear 2 squares. To the left of one square shall appear the words “For a city” and to the left of the other square shall appear the words “Against a city”. The inspectors shall make a return to the clerk of the town.

(5) Certificate of incorporation. If a majority of the votes are cast in favor of a city the clerk shall certify the fact to the secretary of administration, together with the result of the census, if any, and 4 copies of a description of the legal boundaries of the town and 4 copies of a plat of the town. The secretary of administration shall then issue a certificate of incorporation, and record the certificate in a book kept for that purpose. Two copies of the description and plat shall be forwarded by the secretary of administration to the department of transportation and one copy to the department of revenue.

(6) City powers. A city incorporated under this section is a body corporate and politic, with the powers and privileges of a municipal corporation at common law and conferred by ch. 62.

(7) Existing ordinances. Ordinances in force in the territory or any part of the territory, to the extent not inconsistent with ch. 62, continue in force until altered or repealed.

(8) Interim officers. All officers of the town embracing the territory incorporated as a city continue in their powers and duties until the first meeting of the common council at which a quorum is present. Until a city clerk is chosen and qualified all oaths of office and other papers shall be filed with the town clerk, with whom the petition was filed, who shall deliver them with the petition to the city clerk when the city clerk is qualified.

(9) First city election. Within 10 days after incorporation of the city, the town board and the town clerk who received the petition shall fix a time for the first city election, designate the polling place or places, and name 3 inspectors of election for each place. Ten days' previous notice of the election shall be given by the clerk by publication in the newspapers selected under sub. (3) and by posting notices in 3 public places in the city. Failure to give notice does not invalidate the election. The election shall be conducted as is prescribed by chs. 5 to 12. The inspectors shall make returns to the board which shall, within 14 days after the election, canvass the returns and declare the result. The clerk shall notify the officers-elect and issue certificates of election. If the first election is on the first Tuesday in April the officers elected and their appointees commence and hold their offices as for a regular term. Otherwise they commence within 14 days and hold until the regular city election and the qualification of their successors, and the term of their appointees expires as soon as successors qualify.

End of Document

W.S.A. 66.02162

66.02162. Incorporation of certain towns contiguous to 3rd class cities or villages

Currentness

(1) Conditions. A town board may initiate the procedure for incorporating its town as a village under this section by adopting a resolution providing for a referendum by the electors of the town on the question of whether the town should become a village if on the date of the adoption of the resolution any of the following is satisfied:

(a) All of the following conditions apply:

1. The most recent federal decennial census shows that the resident population of the town exceeds 6,300.

2. The town is contiguous to a 3rd class city.

3. The most recent data available from the department of revenue show that the equalized value for the town exceeds $600,000,000.

4. In one of the 5 years before the year in which the town board adopts the resolution, the town's equalized value increased more than 7 percent, compared to the town's equalized value for the prior year.

5. The town board of the town is authorized to exercise village powers.

6. The town has entered into, and is bound by, at least 2 separate cooperative boundary agreements under s. 66.0307 with at least 2 municipalities.

7. The town has created at least one tax incremental financing district as authorized under s. 60.23(32).

8. The town has established at least one town sanitary district under subch. IX of ch. 60.

(b) All of the following conditions apply:

1. The most recent federal decennial census shows that the resident population of the town exceeds 2,300.

2. The most recent data available from the department of revenue show that the equalized value for the town exceeds $190,000,000.

3. The area of the town exceeds 40 square miles.

4. The town is contiguous to a village to which all of the following conditions apply:

a. The most recent federal decennial census shows that the resident population of the village is less than 300.

b. The area of the village is less than 2 square miles.

c. The aggregate net tax rate of the village, as determined by the department of revenue under s. 70.114(3), is greater than 36 mills.

5. The village under subd. 4. and the town are located in a county for which the most recent federal decennial census shows that the resident population is less than 150,000.

(2) Referendum resolution. The resolution of the town board required under sub. (1) shall do all of the following:

(a) Certify that the requirements under sub. (1) are satisfied.

(b) Contain a description of the territory to be incorporated sufficiently accurate to determine its location and a statement that a scale map reasonably showing the boundaries of the territory is on file with the town clerk.

(c) Determine the numbers and boundaries of each ward of the proposed village, conforming to the requirements of s. 5.15(1) and (2).

(d) Determine the date of the referendum, which may not be earlier than 6 weeks after the adoption of the resolution.

(3) Notice of referendum. The town clerk shall publish the resolution adopted under sub. (1) in a newspaper published in the town. If no newspaper is published in the town, the town clerk shall publish the resolution in a newspaper designated in the resolution. The town clerk shall publish the resolution once a week for 4 successive weeks, the first publication to be not more than 4 weeks before the referendum.

(4) Voting procedure. The referendum shall be conducted in the same manner as elections for town board supervisors. The question appearing on the ballot shall be: “Shall the town of .... become a village?” Below the question shall appear 2 squares. To the left of one square shall appear the words “For a village,” and to the left of the other square shall appear the words “Against a village.” The inspectors shall make a return to the town clerk.

(5) Certificate of incorporation. If a majority of the votes are cast in favor of a village, the town clerk shall certify that fact to the secretary, together with 4 copies of a description of the legal boundaries of the town, and 4 copies of a plat of the town. The town clerk shall also send the secretary an incorporation fee of $1,000. Upon receipt of the town clerk's certification, the incorporation fee, and other required documents, the secretary shall issue a certificate of incorporation and record the certificate in a book kept for that purpose. The secretary shall provide 2 copies of the description and plat to the department of transportation and one copy to the department of revenue. The town clerk shall also transmit a copy of the certification and the resolution under sub. (1) to the county clerk.

(6) Action. No action to contest the validity of an incorporation under this section on any grounds, whether procedural or jurisdictional, may be commenced after 60 days from the date of issuance of the certificate of incorporation by the secretary. In any such action, the burden of proof as to all issues is upon the person bringing the action to show that the incorporation is not valid. An action contesting an incorporation shall be given preference in the circuit court.

(7) Village powers. A village incorporated under this section is a body corporate and politic, with the powers and privileges of a municipal corporation at common law and conferred by ch. 61.

(8) Existing ordinances. Ordinances in force in the territory or any part of the territory, to the extent not inconsistent with this section or ch. 61, continue in force until altered or repealed.

(9) Existing intergovernmental and cooperative boundary agreements. Intergovernmental cooperation agreements entered into under s. 66.0301 and cooperative boundary agreements approved under s. 66.0307, to which a town incorporating under this section is a party, that are still in effect on the effective date of the incorporation, shall continue in force until altered or repealed, to the extent allowed under the agreements. When incorporated under this section, a village shall be considered the town's successor with respect to such agreements.

(10) Interim officers, first village election. Section 66.0215(8) and (9), as it applies to a town that is incorporated as a city under s. 66.0215, applies to a town that is incorporated as a village under this section.

(11) Sunset. This section does not apply after June 30, 2020.

W.S.A. 66.0217

66.0217. Annexation initiated by electors and property owners

Currentness

(1) Definitions. In this section, unless the context clearly requires otherwise:

(a) "Assessed value" means the value for general tax purposes as shown on the tax roll for the year next preceding the filing of any petition for annexation.

(b) "Department" means the department of administration.

(c) "Legal description" means a complete description of land to be annexed without internal references to any other document, and shall be described in one of the following ways:

1. By metes and bounds commencing at a monument at the section or quarter section corner or at the end of a boundary line of a recorded private claim or federal reservation in which the annexed land is located and in one of the following ways:

a. By government lot.

b. By recorded private claim.

c. By quarter section, section, township and range.

2. If the land is located in a recorded and filed subdivision or in an area subject to a certified survey map, by reference as described in s. 236.28 or s. 236.34(3).

(d) "Owner" means the holder of record of an estate in possession in fee simple, or for life, in land or real property, or a vendee of record under a land contract for the sale of an estate in possession in fee simple or for life but does not include the vendor under a land contract. A tenant in common or joint tenant is an owner to the extent of his or her interest.

(e) “Petition” includes the original petition and any counterpart of the original petition.

(f) “Real property” means land and the improvements to the land.

(g) “Scale map” means a map that accurately reflects the legal description of the property to be annexed and the boundary of the annexing city or village, and that includes a graphic scale on the face of the map.

(2) Direct annexation by unanimous approval. Except as provided in this subsection and sub. (14), and subject to ss. 66.0301(6)(d) and 66.0307(7), if a petition for direct annexation signed by all of the electors residing in the territory and the owners of all of the real property in the territory is filed with the city or village clerk, and with the town clerk of the town or towns in which the territory is located, together with a scale map and a legal description of the property to be annexed, an annexation ordinance for the annexation of the territory may be enacted by a two-thirds vote of the elected members of the governing body of the city or village without compliance with the notice requirements of sub. (4). In an annexation under this subsection, subject to sub. (6), the person filing the petition with the city or village clerk and the town clerk shall, within 5 days of the filing, mail a copy of the scale map and a legal description of the territory to be annexed to the department and the governing body shall review the advice of the department, if any, before enacting the annexation ordinance. No territory may be annexed by a city or village under this subsection unless the territory to be annexed is contiguous to the annexing city or village.

(3) Other methods of annexation. Subject to ss. 66.0301(6)(d) and 66.0307(7), and except as provided in sub. (14), territory contiguous to a city or village may be annexed to the city or village in the following ways:

(a) *Direct annexation by one-half approval.* A petition for direct annexation may be filed with the city or village clerk if it has been signed by either of the following:

1. A number of qualified electors residing in the territory subject to the proposed annexation equal to at least the majority of votes cast for governor in the territory at the last gubernatorial election, and either of the following:

a. The owners of one-half of the land in area within the territory.

b. The owners of one-half of the real property in assessed value within the territory.

2. If no electors reside in the territory subject to the proposed annexation, by either of the following:

a. The owners of one-half of the land in area within the territory.

b. The owners of one-half of the real property in assessed value within the territory.

(b) *Annexation by referendum.* A petition for a referendum on the question of annexation may be filed with the city or village clerk signed by a number of qualified electors residing in the territory equal to at least 20 percent of the votes cast for governor

in the territory at the last gubernatorial election, and the owners of at least 50 percent of the real property either in area or assessed value. The petition shall conform to the requirements of s. 8.40.

(4) Notice of proposed annexation. (a) An annexation under sub. (3) shall be initiated by publishing in the territory proposed for annexation a class 1 notice, under ch. 985, of intention to circulate an annexation petition. The notice shall contain:

1. A statement of intention to circulate an annexation petition.

2. A legal description of the territory proposed to be annexed and a copy of a scale map.

3. The name of the city or village to which the annexation is proposed.

4. The name of the town or towns from which the territory is proposed to be detached.

5. The name and post-office address of the person causing the notice to be published who shall be an elector or owner in the area proposed to be annexed.

6. A statement that a copy of the scale map may be inspected at the office of the town clerk for the territory proposed to be annexed and the office of the city or village clerk for the city or village to which the territory is proposed to be annexed.

(b) The person who has the notice published shall serve a copy of the notice, within 5 days after its publication, upon the clerk of each municipality affected, upon the clerk of each school district affected and upon each owner of land in a town if that land will be in a city or village after the annexation. Service may be either by personal service or by certified mail with return receipt requested. If required under sub. (6)(a), a copy of the notice shall be mailed to the department as provided in that paragraph.

(5) Annexation petition. (a) An annexation petition under this section shall state the purpose of the petition, contain a legal description of the territory proposed to be annexed and have attached a scale map. The petition shall also specify the population of the territory. In this paragraph, "population" means the population of the territory as shown by the last federal census, by any subsequent population estimate certified as acceptable by the department or by an actual count certified as acceptable by the department.

(b) No person who has signed a petition may withdraw his or her name from the petition. No additional signatures may be added after a petition is filed.

(c) The circulation of the petition shall commence not less than 10 days nor more than 20 days after the date of publication of the notice of intention to circulate. The annexation petition is void unless filed within 6 months of the date of publication of the notice.

(6) Department review of annexations. (a) *Annexations within populous counties.* No annexation proceeding within a county having a population of 50,000 or more is valid unless the person publishing a notice of annexation under sub. (4) mails a copy of the notice to the clerk of each municipality affected and the department, together with any fee imposed under s. 16.53(14), within

5 days of the publication. The department shall within 20 days after receipt of the notice mail to the clerk of the town within which the territory lies and to the clerk of the proposed annexing village or city a notice that states whether in its opinion the annexation is in the public interest or is against the public interest and that advises the clerks of the reasons the annexation is in or against the public interest as defined in par. (c). The annexing municipality shall review the advice before final action is taken.

(b) *Alternative dispute resolution.* The department shall make available on its public website a list of persons who identify themselves to the department as professionals qualified to facilitate alternative dispute resolution of annexation, boundary, and land use disputes. Persons identifying themselves to the department as qualified professionals shall submit to the department a brief description of their qualifications, including membership in relevant professional associations and certifications in areas such as planning and alternative dispute resolution. The department may edit the descriptions for inclusion on the list using any criteria that, in the department's determination, is appropriate. The department may include with the list a disclaimer that the department is not responsible for the accuracy of the descriptions, and that inclusion of a person on the list does not represent endorsement by the department. The department may include links from the list to other websites, such as those of relevant professional associations and county dispute resolution centers.

(c) *Definition of public interest.* For purposes of this subsection "public interest" is determined by the department after consideration of the following:

1. Whether the governmental services, including zoning, to be supplied to the territory could clearly be better supplied by the town or by some other village or city whose boundaries are contiguous to the territory proposed for annexation which files with the circuit court a certified copy of a resolution adopted by a two-thirds vote of the elected members of the governing body indicating a willingness to annex the territory upon receiving an otherwise valid petition for the annexation of the territory.

2. The shape of the proposed annexation and the homogeneity of the territory with the annexing village or city and any other contiguous village or city.

(d) *Direct annexation by unanimous approval.* 1. Upon the request of the town affected by the annexation, the department shall review an annexation under sub. (2) to determine whether the annexation violates any of the following, provided that the town submits its request to the department within 30 days of the enactment of the annexation ordinance:

a. The requirement under sub. (2) regarding the contiguity of the territory to be annexed with the annexing city or village.

b. The requirement under sub. (14)(b).

2. Following its review, and within 20 days of receiving the town's request, the department shall send a copy of its findings to any affected landowner, the town affected by the annexation, and the annexing city or village. If the department does not complete its review and send a copy of its findings within 20 days of receiving the town's request, the effect on the town and the annexing city or village shall be the same as if the department found no violation of the requirements specified in subd. 1. If the department finds that an annexation violates any requirement specified in subd. 1., the town from which territory is annexed may, within 45 days of its receipt of the department's findings, challenge the annexation in circuit court.

3. If the town commences an action to challenge the annexation and the circuit court rules against the town, the town shall pay the court costs and the city's or village's reasonable attorney fees incurred in defending the annexation. If the town commences

an action to challenge the annexation and the circuit court rules in the town's favor and upholds the town's challenge, the city or village shall pay the court costs and the town's reasonable attorney fees incurred in challenging the annexation.

(7) Referendum. (a) *Notice.* 1. Within 60 days after the filing of the petition under sub. (3), the common council or village board may accept or reject the petition and if rejected no further action may be taken on the petition. Acceptance may consist of adoption of an annexation ordinance. Failure to reject the petition obligates the city or village to pay the cost of any referendum favorable to annexation.

2. If the petition is not rejected the clerk of the city or village with whom the annexation petition is filed shall give written notice of the petition by personal service or registered mail with return receipt requested to the clerk of any town from which territory is proposed to be detached and shall give like notice to any person who files a written request with the clerk. The notice shall indicate whether the petition is for direct annexation or whether it requests a referendum on the question of annexation.

3. If the notice indicates that the petition is for a referendum on the question of annexation, the clerk of the city or village shall file the notice as provided in s. 8.37. If the notice indicates that the petition is for a referendum on the question of annexation, the town clerk shall give notice as provided in par. (c) of a referendum of the electors residing in the area proposed for annexation to be held not less than 70 days nor more than 100 days after the date of personal service or mailing of the notice required under this paragraph. If the notice indicates that the petition is for direct annexation, no referendum shall be held unless within 30 days after the date of personal service or mailing of the notice required under this paragraph, a petition conforming to the requirements of s. 8.40 requesting a referendum is filed with the town clerk as provided in s. 8.37, signed by at least 20 percent of the electors residing in the area proposed to be annexed. If a petition requesting a referendum is filed, the clerk shall give notice as provided in par. (c) of a referendum of the electors residing in the area proposed for annexation to be held not less than 70 days nor more than 100 days after the receipt of the petition and shall mail a copy of the notice to the clerk of the city or village to which the annexation is proposed. The referendum shall be held at a convenient place within the town to be specified in the notice.

(b) *Clerk to act.* If more than one town is involved, the city or village clerk shall determine as nearly as is practicable which town contains the most electors in the area proposed to be annexed and shall indicate in the notice required under par. (a) that determination. The clerk of the town so designated shall perform the duties required under this subsection and the election shall be conducted in the town as are other elections.

(c) *Publication of notice.* The notice shall be published in a newspaper of general circulation in the area proposed to be annexed on the publication day next preceding the referendum election and one week prior to that publication.

(d) *How conducted.* The referendum shall be conducted by the town election officials but the town board may reduce the number of election officials for that election. The ballots shall contain the words “For annexation” and “Against annexation” and shall otherwise conform to the provisions of s. 5.64(2). The election shall be conducted as are other town elections in accordance with chs. 6 and 7 to the extent applicable.

(e) *Canvass; statement to be filed.* The election inspectors shall make a statement of the holding of the election showing the whole number of votes cast, and the number cast for and against annexation, attach their affidavit to the statement and immediately file it in the office of the town clerk. They shall file a certified statement of the results in the office of the clerk of each other municipality affected.

(f) *Costs.* If the referendum is against annexation, the costs of the election shall be borne by the towns involved in the proportion that the number of electors of each town within the territory proposed to be annexed, voting in the referendum, bears to the total number of electors in that territory, voting in the referendum.

(g) *Effect.* If the result of the referendum is against annexation, all previous proceedings are nullified. If the result of the referendum is for annexation, failure of any town official to perform literally any duty required by this section does not invalidate the annexation.

(8) Annexation ordinance. (a) An ordinance for the annexation of the territory described in the annexation petition under sub. (3) may be enacted by a two-thirds vote of the elected members of the governing body not less than 20 days after the publication of the notice of intention to circulate the petition and not later than 120 days after the date of filing with the city or village clerk of the petition for annexation or of the referendum election if favorable to the annexation. If the annexation is subject to sub. (6) the governing body shall first review the reasons given by the department that the proposed annexation is against the public interest. An ordinance under this subsection may temporarily designate the classification of the annexed area for zoning purposes until the zoning ordinance is amended as prescribed in s. 62.23(7)(d). Before introduction of an ordinance containing a temporary classification, the proposed classification shall be referred to and recommended by the plan commission. The authority to make a temporary classification is not effective when the county ordinance prevails during litigation as provided in s. 59.69(7).

(b) The ordinance may annex the territory to an existing ward or may create an additional ward.

(c) The annexation is effective upon enactment of the annexation ordinance. The board of school directors in a 1st class city is not required to administer the schools in any territory annexed to the city until July 1 following the annexation.

(9) Filing requirements; surveys. (a) The clerk of a city or village which has annexed territory shall file immediately with the secretary of administration a certified copy of the ordinance, certificate and plat, and shall send one copy to each company that provides any utility service in the area that is annexed. The city or village shall also file with the county clerk or board of election commissioners the report required by s. 5.15(4)(b). The clerk shall record the ordinance with the register of deeds and file a signed copy of the ordinance with the clerk of any affected school district. Failure to file, record or send does not invalidate the annexation and the duty to file, record or send is a continuing one. The ordinance that is filed, recorded or sent shall describe the annexed territory and the associated population. The information filed with the secretary of administration shall be utilized in making recommendations for adjustments to entitlements under the federal revenue sharing program and distribution of funds under ch. 79. The clerk shall certify annually to the secretary of administration and record with the register of deeds a legal description of the total boundaries of the municipality as those boundaries existed on December 1, unless there has been no change in the 12 months preceding.

(b) Within 10 days of receipt of the ordinance, certificate and plat, the secretary of administration shall forward 2 copies of the ordinance, certificate and plat to the department of transportation, one copy to the department of administration, one copy to the department of revenue, one copy to the department of public instruction, one copy to the department, one copy to the department of natural resources, one copy to the department of agriculture, trade and consumer protection and 2 copies to the clerk of the municipality from which the territory was annexed.

(c) Any city or village may direct a survey of its present boundaries to be made, and when properly attested the survey and plat may be filed in the office of the register of deeds in the county in which the city or village is located. Upon filing, the survey and plat are prima facie evidence of the facts set forth in the survey and plat.

(10) Qualifications of electors and owners; elector determination. (a) Under this section, qualifications as to electors and owners shall be determined as of the date of filing a petition, except that all qualified electors residing in the territory proposed for annexation on the day of a referendum election may vote in the election. Residence and ownership shall be bona fide and not acquired for the purpose of defeating or invalidating the annexation proceedings.

(b) For purposes of this section, if a number of electors cannot be determined on the basis of reported election statistics, the number shall be determined in accordance with s. 60.74(6).

(11) Action to contest annexation. (a) An action on any grounds, whether procedural or jurisdictional, to contest the validity of an annexation shall be commenced within the time after adoption of the annexation ordinance provided by s. 893.73(2). During the action, the application of, and jurisdiction over, any county zoning in the area annexed is as provided under s. 59.69(7).

(b) An action contesting an annexation shall be given preference in the circuit court. The court and the parties are encouraged to consider the application of s. 802.12 to an action contesting an annexation.

(c) Except as provided in sub. (6)(d) 2., no action on any grounds, whether procedural or jurisdictional, to contest the validity of an annexation under sub. (2), may be brought by any town.

(12) Validity of plats. If an annexation is declared invalid but before the declaration and subsequent to the annexation a plat is submitted and is approved as required in s. 236.10(1)(a), the plat is validly approved despite the invalidity of the annexation.

(13) Effective date of annexations. Because the creation of congressional, legislative, supervisory and aldermanic districts of equal population is a matter of statewide concern, any annexation action that affects a tract of land that is the subject of an ordinance enacted or resolution adopted by any city during the period from January 1, 1990, to April 1, 1991, or any later date, expressing an intent to not exercise the city's authority to annex territory before April 1, 1991, or the specified later date, taken by a municipality during the period beginning on April 1 of the year commencing after each federal decennial census of population and ending on June 30 of the year commencing after that census, is effective on July 1 of the year commencing after that census or at such later date as may be specified in the annexation ordinance. This subsection first applies to annexations effective after March 31, 1991.

(14) Limitations on annexation authority. (a)1. Except as provided in subd. 2., no territory may be annexed by a city or village under this section unless the city or village agrees to pay annually to the town, for 5 years, an amount equal to the amount of property taxes that the town levied on the annexed territory, as shown by the tax roll under s. 70.65, in the year in which the annexation is final.

2. No payments under subd. 1. must be made if the city or village, and the town, enter into a boundary agreement under s. 66.0225, 66.0301, or 66.0307.

(b)1. No territory may be annexed by a city or village under this section if no part of the city or village is located in the same county as the territory that is subject to the proposed annexation unless one of the following applies:

a. The town board adopts a resolution approving the proposed annexation.

b. The annexation is by unanimous approval under sub. (2).

2. Any subsequent annexation by the city or village in the county of the territory annexed under subd. 1. shall either be approved by the town board or be annexed by unanimous approval under sub. (2).

(15) Law applicable. Section 66.0203(8)(c) applies to annexations under this section.

LAW REVISION COMMITTEE PREFATORY NOTE--2017 ACT 360

This bill is a remedial legislation proposal, requested by the Legislative Technology Services Bureau and introduced by the Law Revision Committee under s. 13.83(1)(c)4. and 5., stats. After careful consideration of the various provisions of the bill, the Law Revision Committee has determined that this bill makes minor substantive changes in the statutes, and that these changes are desirable as a matter of public policy.

Notes of Decisions (255)

W. S. A. 66.0217, WI ST 66.0217
Current through 2023 Act 272, published April 10, 2024.

West's Wisconsin Statutes Annotated
Municipalities (Ch. 59 to 68)
Chapter 66. General Municipality Law (Refs & Annos)
Subchapter II. Incorporation; Municipal Boundaries

W.S.A. 66.0219

66.0219. Annexation by referendum initiated by city or village

Currentness

As a complete alternative to any other annexation procedure, and subject to sub. (10) and ss. 66.0301(6)(d) and 66.0307(7), unincorporated territory which contains electors and is contiguous to a city or village may be annexed to the city or village under this section. The definitions in s. 66.0217(1) apply to this section.

(1) Procedure for annexation. (a) The governing body of the city or village to which it is proposed to annex territory shall, by resolution adopted by two-thirds of the members-elect, declare its intention to apply to the circuit court for an order for an annexation referendum, and shall publish the resolution in a newspaper having general circulation in the area proposed to be annexed, as a class 1 notice, under ch. 985. The governing body shall prepare a scale map of the territory to be annexed, showing it in relation to the annexing city or village. The resolution shall contain a description of the territory to be affected, sufficiently accurate to determine its location, the name of the municipalities directly affected and the name and post-office address of the municipal official responsible for the publication of the resolution. A copy of the resolution together with the scale map shall be served upon the clerk of the town or towns from which the territory is to be detached within 5 days of the date of publication of the resolution. Service may be either by personal service or by registered mail and if by registered mail an affidavit shall be on file with the annexing body indicating the date on which the resolution was mailed. The annexation is considered commenced upon publication of the resolution.

(b) Application to the circuit court shall be by petition subscribed by the officers designated by the governing body, and shall have attached the scale map, a certified copy of the resolution of the governing body and an affidavit of the publication and filing required under par. (a). The petition shall be filed in the circuit court not less than 30 days but no more than 45 days after the publication of the notice of intention.

(2) Protest to court by electors; hearing. (a) If, prior to the date set for hearing upon an application filed under sub. (1)(b), there is filed with the court a petition signed by a number of qualified electors residing in the territory equal to at least a majority of the votes cast for governor in the territory at the last gubernatorial election or the owners of more than one-half of the real property in assessed value in the territory, protesting against the annexation of the territory, the court shall deny the application for an annexation referendum. If a number of electors cannot be determined on the basis of reported election statistics, the number shall be determined in accordance with s. 60.74(6).

(b) If a petition protesting the annexation is found insufficient the court shall proceed to hear all parties interested for or against the application. The court may adjourn the hearing from time to time, direct a survey to be made and refer any question for examination and report. A town whose territory is involved in the proposed annexation shall, upon application, be a party and is entitled to be heard on any relevant matter.

(3) Dismissal. If for any reason the proceedings are dismissed, the court may order entry of judgment against the city or village for disbursements or any part of disbursements incurred by the parties opposing the annexation.

(4) Referendum election; when ordered and held. (a) If the court, after the hearing, is satisfied that the description of the territory or any survey is accurate and that the provisions of this section have been complied with, it shall make an order so declaring and shall direct a referendum election within the territory described in the order, on the question of whether the area should be annexed. Such order shall be filed as provided in s. 8.37. The order shall direct 3 electors named in the order residing in the town in which the territory proposed to be annexed lies, to perform the duties of inspectors of election.

(b) The referendum election shall be held not less than 70 days nor more than 100 days after the filing of the order as provided in s. 8.37, in the territory proposed for annexation, by the electors of that territory as provided in s. 66.0217(7), so far as applicable. The ballots shall contain the words “For Annexation” and “Against Annexation”. The certification of the election inspectors shall be filed with the clerk of the court, and the clerk of any municipality involved, but need not be filed or recorded with the register of deeds.

(c) All costs of the referendum election shall be borne by the petitioning city or village.

(5) Determination by vote. (a) If a majority of the votes cast at the referendum election is against annexation, no other proceeding under this section affecting the same territory or part of the same territory may be commenced by the same municipality until 6 months after the date of the referendum election.

(b) If a majority of the votes cast at the referendum election is for annexation, the territory shall be annexed to the petitioning city or village upon compliance with s. 66.0217(9).

(6) Temporary zoning of area proposed to be annexed. An interim zoning ordinance to become effective only upon approval of the annexation at the referendum election may be enacted by the governing body of the city or village. The ordinance may temporarily designate the classification of the annexed area for zoning purposes until the zoning ordinance is amended as prescribed in s. 62.23(7)(d). The proposed interim zoning ordinance shall be referred to and recommended by the plan commission prior to introduction. Authority to make a temporary classification is not effective when the county zoning ordinance prevails during litigation as provided in s. 59.69(7).

(7) Appeal. An appeal from the order of the circuit court is limited to contested issues determined by the circuit court. An appeal shall not stay the conduct of the referendum election, if one is ordered, but the statement of the election results and the copies of the certificate and plat may not be filed with the secretary of administration until the appeal has been determined.

(8) Law applicable. Sections 66.0203(8)(c) and 66.0217(11) apply to annexations under this section.

(9) Territory excepted. This section does not apply to any territory located in an area for which a certificate of incorporation was issued before February 24, 1959, by the secretary of state, even if the incorporation of the territory is later held to be invalid by a court.

(10) Limitations on annexation authority. (a)1. Except as provided in subd. 2., no territory may be annexed by a city or village under this section unless the city or village agrees to pay annually to the town, for 5 years, an amount equal to the amount of property taxes that the town levied on the annexed territory, as shown by the tax roll under s. 70.65, in the year in which the annexation is final.

2. No payments under subd. 1. must be made if the city or village, and the town, enter into a boundary agreement under s. 66.0225, 66.0301, or 66.0307.

(b) No territory may be annexed by a city or village under this section if no part of the city or village is located in the same county as the territory that is subject to the proposed annexation unless all of the following occur:

1. The town board adopts a resolution approving the proposed annexation.

2. The county board of the county in which the territory is located adopts a resolution approving the proposed annexation.

W.S.A. 66.0221

66.0221. Annexation of and creation of town islands

Currentness

(1) Upon its own motion and subject to sub. (3) and ss. 66.0301(6)(d) and 66.0307(7), a city or village, by a two-thirds vote of the entire membership of its governing body, may enact an ordinance annexing territory which comprises a portion of a town or towns and which was completely surrounded by territory of the city or village on December 2, 1973. The ordinance shall include all surrounded town areas except those that are exempt by mutual agreement of all of the governing bodies involved. The annexation ordinance shall contain a legal description of the territory and the name of the town or towns from which the territory is detached. Upon enactment of the ordinance, the city or village clerk immediately shall file 6 certified copies of the ordinance with the secretary of administration, together with 6 copies of a scale map. The city or village shall also file with the county clerk or board of election commissioners the report required by s. 5.15(4)(b). The secretary of administration shall forward 2 copies of the ordinance and scale map to the department of transportation, one copy to the department of natural resources, one copy to the department of revenue and one copy to the department of administration. This subsection does not apply if the town island was created only by the annexation of a railroad right-of-way or drainage ditch. This subsection does not apply to land owned by a town government which has existing town government buildings located on the land. No town island may be annexed under this subsection if the island consists of over 65 acres or contains over 100 residents. Section 66.0217(11) applies to annexations under this subsection. Except as provided in sub. (2), after December 2, 1973, no city or village may, by annexation, create a town area which is completely surrounded by the city or village.

(2) A city or village may, by annexation, create a town area that is completely surrounded by the city or village if a cooperative plan for boundary change under s. 66.0301(6) or 66.0307, to which the town and the annexing city or village are parties, applies to the territory that is annexed.

(3)(a)1. Except as provided in subd. 2., no territory may be annexed by a city or village under this section unless the city or village agrees to pay annually to the town, for 5 years, an amount equal to the amount of property taxes that the town levied on the annexed territory, as shown by the tax roll under s. 70.65, in the year in which the annexation is final.

2. No payments under subd. 1. must be made if the city or village, and the town, enter into a boundary agreement under s. 66.0225, 66.0301, or 66.0307.

(b) No territory may be annexed by a city or village under this section if no part of the city or village is located in the same county as the territory that is subject to the proposed annexation unless all of the following occur:

1. The town board adopts a resolution approving the proposed annexation.

2. The county board of the county in which the territory is located adopts a resolution approving the proposed annexation.

66.0223. Annexation of territory owned by a city or village

Currentness

(1) In addition to other methods provided by law and subject to sub. (2) and ss. 66.0301(6)(d) and 66.0307(7), territory owned by and lying near but not necessarily contiguous to a village or city may be annexed to a village or city by ordinance enacted by the board of trustees of the village or the common council of the city, provided that in the case of noncontiguous territory the use of the territory by the city or village is not contrary to any town or county zoning regulation. The ordinance shall contain the exact description of the territory annexed and the names of the towns from which detached, and attaches the territory to the village or city upon the filing of 7 certified copies of the ordinance with the secretary of administration, together with 7 copies of a plat showing the boundaries of the territory attached. The city or village shall also file with the county clerk or board of election commissioners the report required by s. 5.15(4)(b). Two copies of the ordinance and plat shall be forwarded by the secretary of administration to the department of transportation, one copy to the department of administration, one copy to the department of natural resources, one copy to the department of revenue and one copy to the department of public instruction. Within 10 days of filing the certified copies, a copy of the ordinance and plat shall be mailed or delivered to the clerk of the county in which the annexed territory is located. Sections 66.0203(8)(c) and 66.0217(11) apply to annexations under this section.

(2) No territory may be annexed by a city or village under this section if no part of the city or village is located in the same county as the territory that is subject to the proposed annexation unless all of the following occur:

(a) The town board adopts a resolution approving the proposed annexation.

(b) The county board of the county in which the territory is located adopts a resolution approving the proposed annexation.

(c) The city or village, and the town, enter into a boundary agreement under s. 66.0225, 66.0301, or 66.0307.

LAW REVISION COMMITTEE PREFATORY NOTE--2017 ACT 360

This bill is a remedial legislation proposal, requested by the Legislative Technology Services Bureau and introduced by the Law Revision Committee under s. 13.83(1)(c)4. and 5., stats. After careful consideration of the various

provisions of the bill, the Law Revision Committee has determined that this bill makes minor substantive changes in the statutes, and that these changes are desirable as a matter of public policy.

Notes of Decisions (2)

Current through 2023 Act 272, published April 10, 2024.

End of Document

W.S.A. 66.0225

66.0225. Stipulated boundary agreements in contested boundary actions

Currentness

(1) Definitions. In this section, "municipality" means a city, village, or town.

(2) Contested annexations. Any 2 municipalities whose boundaries are immediately adjacent at any point and who are parties to an action, proceeding, or appeal in court for the purpose of testing the validity of an annexation may enter into a written stipulation, compromising and settling the litigation and determining the portion of the common boundary line between the municipalities that is the subject of the annexation. The court having jurisdiction of the litigation, whether the circuit court, the court of appeals, or the supreme court, may enter a final judgment incorporating the provisions of the stipulation and fixing the common boundary line between the municipalities involved. A stipulation changing boundaries of municipalities shall be approved by the governing body of each municipality and s. 66.0217(9) and (11) shall apply. A change of municipal boundaries under this section is subject to a referendum of the electors residing within the territory whose jurisdiction is subject to change under the stipulation, if within 30 days after the publication of the stipulation to change boundaries in a newspaper of general circulation in that territory, a petition for a referendum conforming to the requirements of s. 8.40 signed by at least 20 percent of the electors residing within that territory is filed with the clerk of the municipality from which the greater area is proposed to be removed and is filed as provided in s. 8.37. The referendum shall be conducted as are annexation referenda. If the referendum election fails, all proceedings under this section are void.

(3) Contested boundary actions. (a) In this subsection, "boundary action" means an action, proceeding, or appeal in court contesting the validity of an annexation, consolidation, detachment, or incorporation.

(b) If 2 municipalities whose boundaries are immediately adjacent at any point are parties to a boundary action, the municipalities may enter into an agreement under s. 66.0301(6) or s. 66.0307 as part of a stipulation to settle the boundary action. The court may approve and make part of the final judgment a stipulation that includes an agreement under s. 66.0301(6) or s. 66.0307.

(4) Authority for certain stipulations. A stipulation that is court-approved under this section before January 19, 2008, that affects the location of a boundary between municipalities, is not invalid as lacking authority to affect the location of the boundary.

Chapter 66. General Municipality Law (Refs & Annos)
Subchapter II. Incorporation; Municipal Boundaries

W.S.A. 66.0227

66.0227. Detachment of territory

Currentness

Subject to ss. 66.0301(6)(d) and 66.0307(7), territory may be detached from a city or village and attached to a city, village or town to which it is contiguous as follows:

(1) A petition signed by a majority of the owners of three-fourths of the taxable land in area within the territory to be detached or, if there is no taxable land in the territory, by all owners of land in the territory, shall be filed with the clerk of the city or village from which detachment is sought, within 120 days after the date of publication of a class 1 notice, under ch. 985, of intention to circulate a petition of detachment.

(2) An ordinance detaching the territory may be enacted within 60 days after the filing of the petition, by a vote of three-fourths of all the members of the governing body of the detaching city or village and its terms accepted within 60 days after enactment, by an ordinance enacted by a vote of three-fourths of all the members of the governing body of the city, village or town to which the territory is to be attached. The failure of a governing body to adopt the ordinance under this subsection is a rejection of the petition and all proceedings are void.

(3) The governing body of a city, village or town involved may, or if a petition conforming to the requirements of s. 8.40 signed by a number of qualified electors equal to at least 5 percent of the votes cast for governor in the city, village or town at the last gubernatorial election, demanding a referendum, is presented to it within 30 days after the passage of either of the ordinances under sub. (2) shall, submit the question to the electors of the city, village or town whose electors petitioned for detachment, at a referendum election called for that purpose not less than 70 days nor more than 100 days after the filing of the petition, or after the enactment of either ordinance. The petition shall be filed as provided in s. 8.37. If a number of electors cannot be determined on the basis of reported election statistics, the number shall be determined in accordance with s. 60.74(6). The governing body of the municipality shall appoint 3 election inspectors who are resident electors to supervise the referendum. The ballots shall contain the words “For Detachment” and “Against Detachment”. The inspectors shall certify the results of the election by their attached affidavits and file a copy with the clerk of each town, village or city involved, and none of the ordinances may take effect nor be in force unless a majority of the electors approve the question. The referendum election shall be conducted in accordance with chs. 6 and 7 to the extent applicable.

(4) If an area that has been subject to a city or village zoning ordinance is detached from one municipality and attached to another under this section, the zoning ordinance and any regulations, approvals, and conditions imposed under the ordinance continue in effect until the ordinance or the particular regulation, approval, or condition is specifically changed by official action of the

governing body of the municipality. If the detachment or attachment is contested in the courts, the zoning ordinance and any regulations, approvals, and conditions imposed under the ordinance of the detaching municipality continue in effect, and the detaching city or village retains jurisdiction over the zoning in the area affected until final disposition of the court action. This subsection does not expand or modify the authority of a municipality to change a zoning ordinance, any regulation, approval, or condition imposed under a zoning ordinance, or any nonconforming use.

(5) The ordinance, certificate and plat shall be filed and recorded in the same manner as annexations under s. 66.0217(9)(a). The requirements for the secretary of administration are the same as in s. 66.0217 (9)(b).

(6) Because the creation of congressional, legislative, supervisory and aldermanic districts of equal population is a matter of statewide concern, any detachment action that affects a tract of land that is the subject of an ordinance enacted or resolution adopted by a city during the period from January 1, 1990, to April 1, 1991, or any later date, expressing an intent to not exercise the city's authority to annex territory before April 1, 1991, or the specified later date, taken by a municipality during the period beginning on April 1 of the year commencing after each federal decennial census of population and ending on June 30 of the year commencing after that census, is effective on July 1 of the year commencing after that census or at a later date as specified in the detachment ordinance. This subsection first applies to detachments effective after March 31, 1991.

W.S.A. 66.0229

66.0229. Consolidation

Currentness

(1) General procedures. Subject to ss. 66.0301(6)(d) and 66.0307(7), a town, village or city may be consolidated with a contiguous town, village or city, by ordinance, passed by a two-thirds vote of all the members of each board or council, fixing the terms of the consolidation and ratified by the electors at a referendum held in each municipality. The ballots shall bear the words, "for consolidation", and "against consolidation", and if a majority of the votes cast in each municipality are for consolidation, the ordinances shall take effect and have the force of a contract. The ordinance and the result of the referendum shall be certified as provided in s. 66.0211(5); if a town the certification shall be preserved as provided in ss. 66.0211(5) and 66.0235, respectively. Consolidation does not affect the preexisting rights or liabilities of any municipality and actions on those rights or liabilities may be commenced or completed as if there were no consolidation. A consolidation ordinance proposing the consolidation of a town and a city or village shall, within 10 days after its adoption and prior to its submission to the voters for ratification at a referendum, be submitted to the circuit court and the department of administration for a determination of whether the proposed consolidation is in the public interest. The circuit court shall determine whether the proposed ordinance meets the formal requirements of this section and shall then refer the matter to the department of administration, which shall find as prescribed in s. 66.0203 whether the proposed consolidation is in the public interest in accordance with the standards in s. 66.0207. The department's findings have the same status as incorporation findings under ss. 66.0203 to 66.0213.

(2) Town of Rochester in Racine county and the village of Rochester may consolidate. The town of Rochester, in Racine County, and the village of Rochester may consolidate if all of the procedures contained sub. (1) are fulfilled, except that the consolidation ordinance need not be submitted to the circuit court for a determination and the department of administration for a public interest finding, as otherwise required, and the consolidation may be completed without any circuit court determination or department of administration findings.

66.0230. Town consolidation with a city or village

Currentness

(1)(a) In addition to the method described in s. 66.0229(1) and subject to subs. (2), (3), and (4) and to ss. 66.0301(6)(d) and 66.0307(7), all or part of a town may consolidate with a contiguous city or village by ordinance passed by a two-thirds vote of all of the members of each board or council and ratified by the electors at a referendum held in each municipality.

(b) With regard to the referendum, the ballots shall bear the words "for consolidation," and "against consolidation," and if a majority of the votes cast in each municipality are for consolidation the ordinances shall take effect and have the force of a contract. The ordinance and the result of the referendum shall be certified as provided in s. 66.0211(5).

(c) Consolidation does not affect the preexisting rights or liabilities of any municipality and actions on those rights or liabilities may be commenced or completed as if there were no consolidation.

(2) All or part of a town may consolidate with a city or village under sub. (1) if all of the following apply:

(a) The town, and the city or village, adopt identical resolutions that describe the level of services that residents of the proposed city or village will receive, or have access to, in at least all of the following areas:

1. Public parks services.

2. Public health services.

3. Animal control services.

4. Library services.

5. Fire and emergency rescue services.

6. Law enforcement services.

(b) The town, and the city or village, adopt identical resolutions that relate to the ownership or leasing of government buildings.

(c) The city or village with which the town wishes to consolidate enters into a separate boundary agreement, subject to approval of the town board of the town to be consolidated, with every city, village, and town that borders the proposed consolidated city or village. Each boundary agreement shall determine the boundaries between the parties to the agreement. The boundary agreement shall state the term of the agreement and shall contain the procedures under which the agreement may be amended during its term. A boundary agreement entered into under this paragraph is a binding contract upon the parties.

(d) The consolidating town, and city or village, agree to adopt a comprehensive plan under s. 66.1001 for the consolidated city or village, and the comprehensive plan takes effect on the effective date of the consolidation.

(e) At least some part of the consolidated city or village receives sewage disposal services.

(3) If less than an entire town consolidates with a city or village under sub. (1), the consolidation may not take effect unless the town enters into an agreement with a city, village, or town that has a common boundary with the remnant of the town that is not consolidated under which the town remnant becomes part of the city, village, or town with the common boundary. If a town remnant becomes part of a city or village, an agreement described under this subsection shall be included in each boundary agreement under sub. (2)(c) that is entered into by a city, village, or town that borders the remnant. An agreement entered into under this subsection is a binding contract upon the parties.

(4) In this section, a municipality that borders or has a common boundary with another municipality includes municipalities that intersect at only one point.

66.0231. Notice of certain litigation affecting municipal status or boundaries

Currentness

If a proceeding under ss. 61.187, 61.189, 61.74, 62.075, 66.0201 to 66.0213, 66.0215, 66.02162, 66.0217, 66.0221, 66.0223, 66.0227, 66.0301(6), or 66.0307 or other sections relating to an incorporation, annexation, consolidation, dissolution or detachment of territory of a city or village is contested by instigation of legal proceedings, the clerk of the city or village involved in the proceedings shall file with the secretary of administration 4 copies of a notice of the commencement of the action. The clerk shall file with the secretary of administration 4 copies of any judgments rendered or appeals taken in such cases. The notices or copies of judgments that are required under this section may also be filed by an officer or attorney of any party of interest. If any judgment has the effect of changing the municipal boundaries, the city or village clerk shall also file with the county clerk or board of election commissioners the report required by s. 5.15(4)(b). The secretary of administration shall forward to the department of transportation 2 copies and to the department of revenue and the department of administration one copy each of any notice of action or judgment filed with the secretary of administration under this section.

Current through 2023 Act 272, published April 10, 2024.

End of Document

W.S.A. 66.0235

66.0235. Adjustment of assets and liabilities on division of territory

Currentness

(1) Definition. In this section, "local governmental unit" means town sanitary districts, school districts, technical college districts, towns, villages and cities.

(2) Basis. (a) Except as otherwise provided in this section or in s. 60.79(2)(c) when territory is transferred, in any manner provided by law, from one local governmental unit to another, there shall be assigned to the latter local governmental unit such proportion of the assets and liabilities of the first local governmental unit as the assessed valuation of all taxable property in the territory transferred bears to the assessed valuation of all the taxable property of the entire local governmental unit from which the territory is taken according to the last assessment roll of the local governmental unit. The clerk of a local governmental unit to which territory is transferred, within 30 days of the effective date of the transfer, shall certify to the clerk of the local governmental unit from which territory was transferred and to the clerk of the school district in which the territory is located a metes and bounds description of the land area involved. Upon receipt of the description the clerk of the local governmental unit from which the territory was transferred shall certify to the department of revenue and to the clerk of the school district in which the territory is located the latest assessed value of the real and personal property located within the transferred territory, and shall make any further reports as needed by the department of revenue in the performance of duties required by law.

(b) When the transfer of territory from one local governmental unit to another results from the incorporation of a new city or village, the proportion of the assets and liabilities assigned to the new city or village shall be based on the average assessed valuation for the preceding 5 years of the property transferred in proportion to the average assessed valuation for the preceding 5 years of all the taxable property of the entire local governmental unit from which the territory is taken, according to the assessment rolls of the local governmental unit for those years. The certification by the clerk of the local governmental unit from which territory was transferred because of the incorporation shall include the assessed value of the real and personal property within the territory transferred for each of the last 5 years. The preceding 5 years shall include the assessment rolls for the 5 calendar years prior to the incorporation.

(2c) School districts. (a) *Standard procedure.* 1. When territory is transferred in any manner provided by law from one school district to another, there shall be assigned to each school district involved such proportion of the assets and liabilities of the school districts involved as the equalized valuation of all taxable property in the territory transferred bears to the equalized valuation of all taxable property of the school district from which the territory is taken. The equalized valuation shall be certified by the department of revenue upon application by the clerk of the school district to which the territory is transferred.

2. The clerk of any school district to which territory is transferred, within 30 days of the effective date of the transfer, shall certify to the clerk of the local governmental unit from which the territory was transferred a metes and bounds description of the land area involved. Upon receipt of the description the clerk of the local governmental unit from which the territory was

transferred shall certify to the department of revenue the latest assessed value of the real and personal property located within the transferred territory, file one copy of the certification with the school district clerk and one copy with the department of public instruction and make any further reports as needed by the department of revenue in the performance of duties required by law.

(b) *Alternative procedure.* Two or more school districts may, by identical resolutions adopted by a three-fourths vote of the members of each school board concerned, establish an alternative method to govern any adjustment of their assets and liabilities. The authority of this paragraph applies wherever the boards find that the adoption of the resolution is necessary to provide a more equitable method than is provided in par. (a). The resolutions shall be adopted no later than 120 days after the effective date of the transfer of territory and may be adopted prior to the transfer. The resolutions adopted shall be recorded in the office of the register of deeds.

(2m) Attachment and detachment within 5 years. If territory is attached to or consolidated with a school district, and the territory or any part of the territory is detached from the district within 5 years after the attachment or consolidation, the school district to which it is transferred is entitled, in the apportionment of assets and liabilities, only to the assets or liabilities or proportionate part apportioned to the school district as the result of the original attachment or consolidation.

(3) Real estate. (a) The title to real estate may not be transferred under this section except by agreement, but the value of real estate shall be included in determining the assets of the local governmental unit owning the real estate and in making the adjustment of assets and liabilities.

(b) The right to possession and control of school buildings and sites passes to the school district in which they are situated immediately upon the attachment or detachment of any school district territory becoming effective, except that in 1st class city school districts the right to possession and control of school buildings and sites passes on July 1 following the adoption of the ordinance authorized by s. 66.0217(8). The asset value of school buildings and sites shall be the value of the use of the buildings and sites, which shall be determined at the time of adjustment of assets and liabilities.

(c) When as a result of an annexation a school district is left without a school building, any moneys are received by the school district as a result of the division of assets and liabilities required by this section, which are derived from values that were capital assets, the moneys and interest on the moneys shall be held in trust by the school district and dispensed only for procuring new capital assets or remitted to an operating district as the remainder of the suspended district becomes a part of the operating district, and may not be used to meet current operating expenditures. The boards involved shall, as part of their duties in division of assets and liabilities in school districts, make a written report of the allocation of assets and liabilities to the state superintendent of public instruction and any local superintendent of schools whose territory is involved in the division of assets.

(4) Public utilities. A public utility plant, including any dam, power house, power transmission line and other structures and property operated and used in connection with the plant, belongs to the local governmental unit in which the major portion of the patrons of the utility reside. The value of the utility, unless fixed by agreement of all parties interested shall be determined and fixed by the public service commission upon notice to the local governmental units interested, in the manner provided by law. The commission shall certify the amount of the compensation to the clerks of each local governmental unit interested and that amount shall be used by the apportionment board in adjusting assets and liabilities.

(5) Apportionment board. The boards or councils of the local governmental units, or committees selected for that purpose, acting together, constitute an apportionment board. When a local governmental unit is dissolved because all of its territory is transferred the board or council of the local governmental unit existing at the time of dissolution shall, for the purpose of this

section, continue to exist as the governing body of the local governmental unit until there has been an apportionment of assets by agreement of the interested local governmental units or by an order of the circuit court. After an agreement for apportionment of assets has been entered into between the interested local governmental units, or an order of the circuit court becomes final, a copy of the apportionment agreement, or of the order, certified to by the clerks of the interested local governmental units, shall be filed with the department of revenue, the department of natural resources, the department of transportation, the state superintendent of public instruction, the department of administration, and with any other department or agency of the state from which the town may be entitled by law to receive funds or certifications or orders relating to the distribution or disbursement of funds, with the county treasurer, with the treasurer of any local governmental unit, or with any other entity from which payment would have become due if the dissolved local governmental unit had continued in existence. Subject to ss. 79.006 and 86.303(4), payments of forest crop taxes under s. 77.05, of transportation aids under s. 20.395, of state aids for school purposes under ch. 121, payments for managed forest land under subch. VI of ch. 77 and all payments due from a department or agency of the state, from a county, from a local governmental unit, or from any other entity from which payments would have become due if the dissolved local governmental unit had continued in existence, shall be paid to the interested local governmental unit as provided by the agreement for apportionment of assets or by any order of apportionment by the circuit court and the payments have the same force and effect as if made to the dissolved local governmental unit.

(6) Meeting. The board or council of the local governmental unit to which the territory is transferred shall fix a time and place for meeting and give a written notice of the meeting to the clerk of the local governmental unit from which the territory is taken at least 5 days prior to the date of the meeting. The apportionment may be made only by a majority of the members from each local governmental unit who attend, and in case of committees, the action shall be affirmed by the board or council represented by the committee.

(7) Adjustment, how made. (a) The apportionment board shall determine, except for public utilities, assets and liabilities from the best information obtainable and shall assign to the local governmental unit to which the territory is transferred its proper proportion of assets and liabilities by assigning the excess of liabilities over assets, or by assigning any particular asset or liability to either local governmental unit, or in another manner that meets the requirements of the particular case.

(b) If a proportionate share of any indebtedness existing by reason of municipal bonds or other obligations outstanding is assigned to a local governmental unit, that local governmental unit shall levy and collect upon all its taxable property, in one sum or in annual installments, the amount necessary to pay the principal and interest when due, and shall pay the amount collected to the treasurer of the local governmental unit which issued the bonds or incurred the obligations. The treasurer shall apply the moneys received strictly to the payment of the principal and interest.

(c) If the asset apportioned consists of an aid or tax to be distributed in the future according to population, the apportionment board shall certify to the officer, agency or department responsible for making the distribution each local governmental unit's proportionate share of the asset as determined in accordance with sub. (2). The officer, agency or department shall distribute the aid or tax directly to the several local governmental units according to the certification until the next federal census.

(8) Appeal to court. If the apportionment board is unable to agree, the circuit court of the county in which either local governmental unit is situated may, upon the petition of either local governmental unit, make the adjustment of assets and liabilities under this section, including review of any alternative method provided in sub. (2c)(b) and the correctness of the findings made under sub. (2c)(b).

(9) Transcript of records. If territory is detached from a local governmental unit, the proper officer of the local governmental unit from which the territory was detached shall furnish, upon demand by the proper officer of the local governmental unit

created from the detached territory or to which it is annexed, an authenticated transcript of all public records in that officer's office pertaining to the detached territory. The local governmental unit receiving the transcript shall pay for the transcript.

(10) State trust fund loans. When territory transferred in any manner provided by law from one local governmental unit to another is liable for state trust fund loans secured under subch. II of ch. 24, the clerk of the local governmental unit to which territory is transferred shall within 30 days of the effective date of the transfer certify a metes and bounds description of the transferred area to the clerk of the local governmental unit from which the land was transferred. The clerk of the local governmental unit from which territory was transferred shall then certify to the board of commissioners of public lands the effective date of the transfer of territory, the last preceding assessed valuation of the territory liable for state trust fund loans before transfer of a part of the territory and the assessed valuation of the territory transferred. The board shall in making its annual certifications of the amounts due on account of state trust fund loans distribute annual charges for interest and principal on outstanding loans covered by this subsection in the proportion that the assessed valuation of the territory transferred bears to the assessed valuation of the area liable for state trust fund loans as constituted immediately before the transfer of territory. A transfer of territory effective subsequent to January 1 of any year may not be considered until the succeeding year.

(10a) Corrections. The provisions of sub. (10) are applicable to school districts. Any errors, omissions or other defects in the tax certifications and levies in connection with the repayment of state trust fund loans by school districts for the year 1950 and all subsequent years may be corrected by the school district clerk in the tax levy certifications for following years.

(11) Designating districts. (a) Whenever a transfer of territory from one school district to another results in a change in the name of a school district which is liable for one or more state trust fund loans secured under subch. II of ch. 24, the clerk of the school district to which the territory was transferred shall, within 30 days of the effective date of such transfer, certify to the board of commissioners of public lands and the county clerk:

1. The name of the school district from which territory was transferred;

2. The effective date of such transfer;

3. The name of the school district to which the transfer was made immediately prior to the effective date of the transfer;

4. The name of the school district to which the transfer was made immediately after the effective date of the transfer.

(b) In making the annual certifications of the amounts due on account of state trust fund loans the board of commissioners of public lands shall use the new name of the school district. A transfer of territory effective subsequent to January 1 of any year may not be considered by it until the succeeding year.

(12) Time of transfer. When the governmental classification of a school district is changed, all of the assets and liabilities and the title to all school property shall vest in the new district by operation of law upon the effective date of the change.

(13) Taxes and assessment. (a) *General property taxes.* 1. Subject to subd. 2., if any territory is annexed, detached or incorporated in any year, general property taxes levied against the territory shall be collected by the treasurer of the local governmental unit in which the territory was located on January 1 of such year, and all moneys collected from the tax levied for

local municipal purposes shall be allocated to each of the local governmental units on the basis of the portion of the calendar year the territory was located in each of the local governmental units, and paid accordingly.

2. If a city or village is incorporated after January 1 and before April 1, the procedures described in subd. 1. shall be applied as if the city or village was incorporated on January 1 of the year in which it was incorporated and the territory shall be treated for purposes of ch. 70 as if the incorporation had occurred on January 1.

(aa) *Apportionment when town is nonexistent.* If the town in which territory was located on January 1 is nonexistent when the city or village determines its budget, any taxes certified to the town or required by law to be levied against the territory shall be included in the budget of the city or village and levied against the territory, together with the city or village tax for local municipal purposes.

(b) *Special taxes and assessments.* If territory is transferred from one local governmental unit to another by annexation, detachment, consolidation or incorporation, or returns to its former status by reason of court determination, any special tax or assessment outstanding against property in the territory shall be collected by the treasurer of the local governmental unit in which the property is located, according to the terms of the ordinance or resolution levying the tax or assessment. The special tax or assessment, when collected, shall be paid to the treasurer of the local governmental unit which levied the special tax or assessment, or if the local governmental unit is nonexistent, the collecting treasurer shall apply the collected funds to any obligation for which purpose the tax or assessment was levied and which remains outstanding. If no obligation is outstanding, the collected funds shall be paid into the school fund of the school district in which the territory is located.

(bb) *Apportionment when court returns territory to former status.* If territory which has been annexed, consolidated, detached or incorporated returns to its former status by reason of a final court determination, there shall be an apportionment of general property taxes and current aids and shared revenues between the local governmental units, and no other apportionment of assets and liabilities. The basis of the apportionment shall be determined by the apportionment board subject to appeal to the circuit court. The apportionment shall to the extent practicable equitably adjust the taxes, aids and revenues between the local governmental units involved on the basis of the portion of the calendar year the territory was located in the respective local governmental units.

(c) *Certification by clerk.* The clerk of the local governmental unit which assessed the special and general tax and special assessment shall certify to the clerk of the local governmental unit to which the territory was attached or returned, a list of all the property located in the attached or returned territory to which is charged any uncollected taxes and assessments. The certification shall be made within 30 days after the effective date of the transfer of the property, but failure to certify does not affect the validity of the claim.

Chapter 66. General Municipality Law (Refs & Annos)
Subchapter III. Intergovernmental Cooperation

W.S.A. 66.0301

66.0301. Intergovernmental cooperation

Currentness

(1)(a) Except as provided in pars. (b) and (c), in this section "municipality" means the state or any department or agency thereof, or any city, village, town, county, or school district, the opportunity schools and partnership programs under subch. IX of ch. 115 and subch. II of ch. 119, the superintendent of schools opportunity schools and partnership program under s. 119.33, or any public library system, public inland lake protection and rehabilitation district, sanitary district, farm drainage district, metropolitan sewerage district, sewer utility district, solid waste management system created under s. 59.70(2), local exposition district created under subch. II of ch. 229, local professional baseball park district created under subch. III of ch. 229, local professional football stadium district created under subch. IV of ch. 229, local cultural arts district created under subch. V of ch. 229, long-term care district under s. 46.2895, water utility district, mosquito control district, municipal electric company, county or city transit commission, commission created by contract under this section, taxation district, regional planning commission, housing authority created under s. 66.1201, redevelopment authority created under s. 66.1333, community development authority created under s. 66.1335, or city-county health department.

(b) If the purpose of the intergovernmental cooperation is the establishment of a joint transit commission, "municipality" means any city, village, town or county.

(c) For purposes of sub. (6), "municipality" means any city, village, or town.

(2) Subject to s. 59.794(2), and in addition to the provisions of any other statutes specifically authorizing cooperation between municipalities, unless those statutes specifically exclude action under this section, any municipality may contract with other municipalities and with federally recognized Indian tribes and bands in this state, for the receipt or furnishing of services or the joint exercise of any power or duty required or authorized by law. If municipal or tribal parties to a contract have varying powers or duties under the law, each may act under the contract to the extent of its lawful powers and duties. A contract under this subsection may bind the contracting parties for the length of time specified in the contract. This section shall be interpreted liberally in favor of cooperative action between municipalities and between municipalities and Indian tribes and bands in this state. If a municipality is required to establish or maintain an agency, department, commission, or any other office or position to carry out a municipal responsibility, and the municipality joins with another municipality by entering into an intergovernmental cooperation contract under this subsection to jointly carry out the responsibility, the jointly established or maintained agency, department, commission, or any other office or position to which the contract applies fulfills, subject to sub. (7), the municipality's obligation to establish or maintain such entities or positions until the contract entered into under this subsection expires or is terminated by the parties. In addition, if 2 or more municipalities enter into an intergovernmental cooperation contract and create a commission under this section to jointly or regionally administer a function or project, the

commission shall be considered, subject to sub. (7), to be a single entity that represents, and may act on behalf of, the joint interests of the signatories to the contract entered into under this section.

(3) Any contract under sub. (2) may provide a plan for administration of the function or project, which may include but is not limited to provisions as to proration of the expenses involved, deposit and disbursement of funds appropriated, submission and approval of budgets, creation of a commission, selection and removal of commissioners, and formation and letting of contracts.

(4) A commission created by contract under sub. (2) may finance the acquisition, development, remodeling, construction and equipment of land, buildings and facilities for regional projects under s. 66.0621. Participating municipalities acting jointly or separately may finance the projects, or an agreed share of the cost of the projects, under ch. 67.

(5) No commission created by contract under sub. (2) may, directly or indirectly, do any of the following:

(a) Acquire, construct or lease facilities used or useful in the business of a public utility engaged in production, transmission, delivery or furnishing of heat, light, power, natural gas or communications service, by any method except those set forth under this chapter or ch. 196, 197 or 198.

(b) Establish, lay out, construct, improve, discontinue, relocate, widen or maintain any road or highway outside the corporate limits of a village or city or acquire lands for those purposes except upon approval of the department of transportation and the county board of the county and the town board of the town in which the road is to be located.

(6)(a) Any 2 municipalities whose boundaries are immediately adjacent at any point may enter into a written agreement determining all or a portion of the common boundary line between the municipalities. An agreement under this subsection may include only the provisions authorized under this section and s. 66.0305, and one or more of the following:

1. That specified boundary lines apply on the effective date of the agreement.

2. That specified boundary line changes shall occur during the term of the agreement and the approximate dates by which the changes shall occur.

3. That specified boundary line changes may occur during the term of the agreement and the approximate dates by which the changes may occur.

4. That a required boundary line change under subd. 2. or an optional boundary line change under subd. 3. is subject to the occurrence of conditions set forth in the agreement.

5. That specified boundary lines may not be changed during the term of the agreement.

(b) The maximum term of an agreement under this subsection is 10 years. When an agreement expires, all provisions of the agreement expire, except that any boundary determined under the agreement remains in effect until subsequently changed.

(c)1. Before an agreement under this subsection may take effect, and subject to par. (e), it must be approved by the governing body of each municipality by the adoption of a resolution. Before each municipality may adopt a resolution, each shall hold a public hearing on the agreement or both municipalities shall hold a joint public hearing on the agreement. Before the public hearing may be held, each municipality shall give notice of the pending agreement and public hearing by publishing a class 1 notice, under ch. 985, and by giving notice to each property owner whose property is currently located in that municipality and in, or immediately adjacent to, the territory whose jurisdiction will change. Notice shall be given at least 20 days before the public hearing and notice to property owners shall be made by certified mail.

2. An agreement under this subsection is subject to a referendum of the electors residing within the territory whose jurisdiction is subject to change as a result of the agreement. After each municipality approves the agreement by adoption of a resolution, each municipality shall publish the agreement in the territory whose jurisdiction is subject to change as a result of the agreement as a class 1 notice, under ch. 985. A referendum shall be held if, within 30 days after the publication of the agreement, a petition for a referendum conforming to the requirements of s. 8.40, signed by at least 20 percent of the electors residing within the territory whose jurisdiction is subject to change as a result of the agreement is filed, in accordance with s. 8.37, with the clerk of each municipality that is a party to the agreement. The referendum shall be conducted jointly by the municipalities and shall otherwise be conducted as are annexation referenda. If the agreement is approved in the referendum, it may take effect. If the agreement is not approved in the referendum, it may not take effect.

(d) An agreement under this subsection may provide that, during the term of the agreement, no other procedure for altering a municipality's boundaries may be used to alter a boundary that is affected by the agreement, except an annexation conducted under s. 281.43(1m), regardless of whether the boundary is proposed to be maintained or changed or is allowed to be changed under the agreement. After the agreement has expired, the boundary may be altered.

(e) A boundary change included in an agreement under this subsection shall be accomplished by the enactment of an ordinance by the governing body designated to do so in the agreement. The filing and recording requirements under s. 66.0217(9)(a), as they apply to cities and villages under s. 66.0217(9)(a), apply to municipalities under this subsection. The requirements for the secretary of administration under s. 66.0217(9)(b), as they apply under that section, apply to the secretary of administration when he or she receives an ordinance that is filed under this subsection.

(f) No action to contest the validity of an agreement under this subsection may be commenced after 60 days from the date the agreement becomes effective.

(g) This subsection is the exclusive authority under this section for entering into an agreement that determines all or a portion of the common boundary line between municipalities.

(h) An agreement under this section that has been entered into before January 19, 2008, that affects the location of a boundary between municipalities, is not invalid as lacking authority under this section to affect the location of the boundary.

(7) With regard to a contract entered into under sub. (2) between 2 or more counties, which relates to the provision of services or facilities under a contract with an officer or agency of the state, the contract may not take effect unless it is approved in writing by the officer or chief of the agency that has authority over the contract for the provision of services or facilities. The contract must be approved or disapproved in writing by the officer or chief of the agency with regard to the matters within the scope of the contract for the provision of services or facilities within 90 days after receipt of the contract. Any disapproval shall detail

the specific respects in which the proposed contract fails to demonstrate that the signatories intend to fulfill their contractual responsibilities or obligations. If the officer or chief of the agency fails to approve or disapprove of the contract entered into under sub. (2) within 90 days after receipt, the contract shall be considered approved by the officer or chief of the agency.

Notes of Decisions (34)

W. S. A. 66.0301, WI ST 66.0301
Current through 2023 Act 272, published April 10, 2024.

End of Document

West's Wisconsin Statutes Annotated
Municipalities (Ch. 59 to 68)
Chapter 66. General Municipality Law (Refs & Annos)
Subchapter III. Intergovernmental Cooperation

W.S.A. 66.0303

66.0303. Municipal interstate cooperation

Currentness

(1) In this section, "municipality" has the meaning given in s. 66.0301(1)(a), except that with regard to agreements described in s. 66.0304, "municipality" includes a political subdivision, as defined in s. 66.0304(1)(f).

(2) A municipality may contract with municipalities of another state or with federally recognized American Indian tribes or bands located in another state for the receipt or furnishing of services or the joint exercise of any power or duty required or authorized by statute to the extent that laws of the other state or of the United States permit the joint exercise.

(3)(a) Except as provided in par. (b) and s. 66.0825(18), an agreement made under this section shall, prior to and as a condition precedent to taking effect, be submitted to the attorney general who shall determine whether the agreement is in proper form and compatible with the laws of this state. The attorney general shall approve any agreement submitted under this paragraph unless the attorney general finds that it does not meet the conditions set forth in this section and details in writing addressed to the concerned municipal governing bodies the specific respects in which the proposed agreement fails to meet the requirements of law. Failure to disapprove an agreement submitted under this paragraph within 90 days of its submission constitutes approval. The attorney general, upon submission of an agreement, shall transmit a copy of the agreement to the governor who shall consult with any state department or agency affected by the agreement. The governor shall forward to the attorney general any comments the governor may have concerning the agreement.

(b) An agreement under this section between a municipality of this state and a municipality of another state that relates to the receipt, furnishing, or joint exercise of fire fighting or emergency medical services need not be submitted to or approved by the attorney general before the agreement may take effect.

(4) An agreement entered into under this section has the status of an interstate compact, but in any case or controversy involving performance or interpretation of or liability under the agreement, the municipalities party to the agreement are real parties in interest and the state may commence an action to recoup or otherwise make itself whole for any damages or liability which it may incur by reason of being joined as a party. The action by the state may be maintained against any municipality whose act or omission caused or contributed to the incurring of damage or liability by the state.

End of Document

W.S.A. 66.0304

66.0304. Conduit revenue bonds

Currentness

(1) Definitions. In this section:

(a) "Agreement" means a contract entered into under this section by the political subdivisions which form a commission. The contract may be amended according to the terms of the contract, and the amended contract remains an agreement.

(b) "Bond" means any bond, note or other obligation issued or entered into or acquired under this section, including any refunding bond or certificate of participation or lease-purchase, installment sale, or other financing agreement.

(c) "Commission" means an entity created by two or more political subdivisions, who contract with each other under s. 66.0301(2) or 66.0303(2), for the purpose of issuing bonds under this section.

(d) "Member" means a party to an agreement.

(e) "Participant" means any public or private entity or unincorporated association, including a federally recognized Indian tribe or band, that contracts with a commission for the purpose of financing or refinancing a project that is owned, sponsored, or controlled by the public or private entity or unincorporated association.

(f) "Political subdivision" means any city, village, town, or county in this state or any city, village, town, county, district, authority, agency, commission, or other similar governmental entity in another state or office, department, authority, or agency of any such other state or territory of the United States.

(g) "Project" means any capital improvement, purchase of receivables, property, assets, commodities, bonds or other revenue streams or related assets, working capital program, or liability or other insurance program, located within or outside of this state.

(ge) "Public official" means an individual who holds, or has held, a local public office, as that term is defined in s. 19.42(7w), for a political subdivision in this state.

(h) "Revenue" means all moneys and fees received from any source by a commission.

(2) Attorney general review. (a) Before an agreement may take effect, the proposed agreement shall be submitted to the attorney general who shall determine whether the agreement is in proper form and compatible with the laws of this state. Subject to sub. (3)(d), the attorney general shall approve any agreement submitted under this subsection unless the attorney general finds that it does not meet the conditions set forth in this section and details in writing addressed to the concerned political subdivisions' governing bodies the specific respects in which the proposed agreement fails to meet the requirements of law. Failure to disapprove an agreement submitted under this subsection within 90 days of its submission constitutes approval. The attorney general, upon submission of an agreement, shall transmit a copy of the agreement to the governor, who may consult with any state department or agency. The governor shall forward to the attorney general any comments the governor may have concerning the agreement.

(b) No approval is required under this subsection for an amendment to an agreement to take effect, unless the amendment is to add a member or unless otherwise required by the terms of the agreement. A commission may not be dissolved under sub. (4m) without the approval of the attorney general, who shall certify to the commission and the participants that the dissolution resolution provides for the payment of any outstanding bonds or other obligations of the commission.

(3) Creation and organization. (a) Two or more political subdivisions may create a commission for the purpose of issuing bonds by entering into an agreement to do so under s. 66.0301(2) or 66.0303(2), except that upon its creation all of the initial members of a commission shall be political subdivisions that are located in this state. A commission that is created as provided in this section is a unit of government, and a body corporate and politic, that is separate and distinct from, and independent of, the state and the political subdivisions which are parties to the agreement.

(b) A commission shall be governed by a board, the members of which shall be appointed under the terms of the agreement. A majority of the board members shall be public officials or current or former employees of a political subdivision that is located in this state. Board members may be reimbursed for their actual and necessary expenses incurred in performing their duties to the extent provided in the agreement or the bylaws of the commission.

(c) An additional political subdivision may become a member of a commission, and a member may withdraw from a commission, as provided in the agreement. For an agreement to be valid, at least one commission member shall be a political subdivision that is located in this state and a commission shall consist of at least 2 political subdivisions. A commission may not take any action under this paragraph that would invalidate an agreement.

(d) No commission may be created under this section unless its agreement is submitted to the attorney general, under sub. (2), before October 1, 2010. Only one commission may be formed under this section. If more than one agreement is submitted to the attorney general before October 1, 2010, the attorney general must give preference to the agreement that submits with its documents a demonstration of support for its agreement from at least one statewide organization located in this state which represents the interests of political subdivisions and has political subdivisions among its membership.

(4) Powers of a commission. A commission has all of the powers necessary or convenient to carry out the purposes and provisions of this section. In addition to all other powers granted by this section, a commission may do any of the following:

(a) Adopt bylaws for the regulation of its affairs and the conduct of its business.

(b) Sue and be sued in its own name, plead and be impleaded.

(c) Acquire, buy, sell, lease as lessor or lessee, encumber, mortgage, hypothecate, pledge, assign, or transfer any property or interest in property that is located within or outside of this state.

(d) Enter into contracts related to the issuance of bonds.

(e) Issue bonds or refunding bonds, subject to sub. (5), to finance or refinance a project, including funding a reserve fund or capitalized interest, payment of costs of issuance and other costs related to the financing or refinancing, or credit enhancement, and enter into agreements related to the issuance of bonds, including liquidity and credit facilities, remarketing agreements, insurance policies, guaranty agreements, letter of credit or reimbursement agreements, indexing agreements, interest rate swap agreements, currency exchange agreements, commodity swap agreements, and other hedge agreements and any other like agreements, in each case with such payment, interest rate, currency security, remedy, and other terms and conditions as the commission determines.

(f) Employ or appoint agents, employees, finance professionals, and special advisers as the commission finds necessary and fix their compensation.

(g) Accept gifts, loans, or other aid.

(h) Establish and collect fees, plus administrative expenses, from participants who benefit from the commission's services, or services provided by an outside entity, and distribute the fees and expenses as provided in the agreement.

(i) Make loans to, lease property from or to, or enter into any other kind of an agreement with a participant or other entity, in connection with financing or refinancing a project.

(j) Mortgage, pledge, or otherwise encumber the commission's property or its interest in projects.

(k) Assign or pledge any portion of its interests in projects, mortgages, deeds of trust, indentures of mortgage or trust, leases, purchase or sale agreements or other financing agreements, or similar instruments, bonds, notes, and security interests in property, of a participant, or contracts entered into or acquired in connection with bonds.

(L) Issue, obtain, or aid in obtaining, from any person, any insurance or guarantee to, or for, the payment or repayment of interest or principal, or both, on any loan, lease, bond, or other obligation evidencing or securing such a loan, lease, bond, or obligation that is entered into under this section.

(m) Apply on its own behalf or on behalf of a participant to any unit of government for an allocation of volume cap, tax credit, subsidy, grant, loan, credit enhancement, or any other federal, state, or local program in connection with the financing or refinancing of a project.

(n) Invest any bond proceeds or any money held for payment or security of the bonds, or any contract entered into under this section, in any securities or obligations permitted by the resolution, trust agreement, indenture, or other agreement providing for issuance of the bonds or the contract.

(o) At the request of a participant, combine and pledge revenues of multiple projects for repayment of one or more series of bonds issued under this section.

(p) Purchase bonds issued by or on behalf of, or held by, any participant, any state or a department, authority, or agency of the state, or any political subdivision. Bonds purchased under this paragraph may be held by the commission or sold, in whole or in part, separately or together with other bonds issued by the commission.

(4m) Dissolution of a commission. Subject to sub. (2)(b) and subject to providing for the payment of its bonds, including interest on the bonds, and the performance of its other contractual obligations, a commission may be dissolved, by resolution, as provided in the agreement. If the commission is dissolved, the property of the commission shall be transferred to the political subdivisions who are parties to the agreement creating the commission as provided in the agreement.

(5) Issuance of bonds. (a) A commission may not issue bonds unless the issuance is first authorized by a bond resolution. A bond issued under this section shall meet all of the following requirements:

1. The face of the bond shall include the date of issuance and the date of maturity.

2. The face of the bond shall include the statements required under subs. (9)(c) and (11)(d).

3. The date of maturity may not exceed 50 years from the date of issuance.

4. The bond shall bear a rate of interest, either fixed or variable, specified by the resolution. Any variable rate of interest shall be made subject to a maximum rate.

5. Interest and principal shall be paid at the time and place specified in the resolution.

6. Bonds in a single issue may be composed of a single denomination or 2 or more denominations, as provided in the resolution.

7. The bond shall be payable in lawful money of the United States or, if provided in the resolution, another currency.

8. Bonds shall be registered as provided in the resolution.

9. Bonds shall be in the form, and executed in the manner, provided in the resolution.

(am) Notwithstanding par. (a), as an alternative to specifying the matters required to be specified in the bond resolution under par. (a), the resolution may specify members of the board or officers or employees of the commission, by name or position, to whom the commission delegates authority to determine which of the matters under specified par. (a), and any other matters that the commission deems appropriate, for inclusion in the trust agreement, indenture, or other agreement providing for issuance of the bonds as finally executed. A resolution under this paragraph shall specify at least all of the following:

1. The maximum principal amount of bonds to be issued.

2. The maximum term of the bonds.

3. The maximum interest rate to be borne by the bonds.

(b) A bond issued under this section may include, or be subject to, any of the following:

1. Early mandatory or optional redemption or purchase in lieu of redemption or tender, as provided in the resolution.

2. A provision providing a right to tender.

3. A trust agreement or indenture containing any terms, conditions, and covenants that the commission determines to be necessary or appropriate, but such terms, conditions, and covenants may not be in conflict with the resolution.

(c) The commission may purchase any bond issued under this section. Subject to the terms of any agreement with the bondholders, the commission may hold, pledge, resell, or cancel any bond purchased under this paragraph, except that a purchase under this paragraph may not effect an extinguishment of a bond unless the commission cancels the bond or otherwise certifies its intention that the bond be extinguished.

(d) The proceeds of a bond issued under this section may be used for one or more projects located within or outside of this state.

(e) The commission shall send notification to the department of revenue, on a form prescribed by the department, whenever a bond is issued under this section.

(6) Sale of bonds. (a) The sale of bonds under this section shall be conducted as provided in the bond resolution.

(b) A sale may be public or private. Bonds may be sold at the price or prices, and upon the conditions, determined by the commission. The commission shall give due consideration to the recommendations of the participants in the project when determining the conditions of sale.

(c) Bonds that are sold under this section may be serial bonds or term bonds, or both.

(d) If at the time of sale definitive bonds are not available, the commission may issue interim certificates exchangeable for definitive bonds.

(e) The commission shall disclose to any person who purchases a tax-exempt bond issued under this section that the interest received on such a bond is exempt from taxation, as provided in ss. 71.05(1)(c)10., 71.26(1m)(k), 71.36(1m), and 71.45(1t)(k).

(7) Bond security. (a) The commission may secure bonds by a trust agreement or indenture by and between the commission and one or more corporate trustees. A bond resolution, trust agreement, or indenture may contain provisions for pledging properties, revenues, and other collateral; holding and disbursing funds; protecting and enforcing the rights and remedies of bondholders; restricting individual rights of action by bondholders; and amendments, and any other provisions the commission determines to be reasonable and proper for the security of the bondholders or contracts entered into under this section in connection with the bonds.

(b) A pledge of property, revenues, or other collateral by a commission to secure the payment of the principal or redemption price of, or interest on, any bonds, or any reimbursement or similar agreement with any provider of credit enhancement for bonds, or any swap or other agreement entered into in connection with bonds, is binding on the parties and on any successors. The collateral shall immediately be subject to the pledge, and the pledge shall constitute a lien and security interest which shall attach immediately to the collateral and be effective, binding, and enforceable against the pledgor, its successors, purchasers of the collateral, creditors, and all others, to the extent set forth, and in accordance with, the pledge document irrespective of whether those parties have notice of the pledge and without the need for any physical delivery, recordation, filing, or further act.

(8) No personal liability. No board member of the commission is liable personally on the bonds or subject to any personal liability or accountability by reason of the issuance of the bonds, unless the personal liability or accountability is the result of willful misconduct.

(9) Bonds not public debt. (a) Unless otherwise expressly provided in the bond resolution, each issue of bonds by the commission shall be the limited obligation of the commission payable solely from amounts received by the commission from revenues derived from the project to be financed or refinanced or from any contract entered into or investment made in connection with the bonds and pledged to the payment of the bonds.

(b) The state and the political subdivisions who are parties to the agreement creating a commission under this section are not liable on bonds or any other contract entered into under this section, or for any other debt, obligation, or liability of the commission, whether in tort, contract, or otherwise.

(c) The bonds are not a debt of the state or the political subdivisions contracting to create a commission under this section. A bond issue under this section does not obligate the state or a political subdivision to levy any tax or make any appropriation for payment of the bonds. All bonds issued by a commission are payable solely from the funds pledged for their payment in accordance with the bond resolution or trust agreement or indenture providing for their issuance. All bonds shall contain, on their face, a statement regarding the obligations of the state, the political subdivisions who are parties to the agreement creating the commission, and the commission as set forth in this paragraph.

(10) Audits, fiscal year. (a) The board of a commission shall adopt a calendar year as its fiscal year for accounting purposes. The board shall annually prepare a budget for the commission.

(b) A commission shall maintain an accounting system in accordance with generally accepted accounting principles and shall have its financial statements and debt covenants audited annually by an independent certified public accountant, except that the commission by a unanimous vote may decide to have an audit performed under this paragraph every 2 years.

(c) A copy of the budget and audit shall be sent to the governing body of each political subdivision which is a party to the agreement that created the commission and filed with the secretary of administration and the legislative audit bureau.

(11) Limitations. (a) A commission may not issue bonds to finance a capital improvement project in any state or territory of the United States unless a political subdivision within whose boundaries the project is to be located has approved the financing of the project. A commission may not issue bonds to finance a capital improvement project in this state unless all of the political subdivisions within whose boundaries the project is to be located has approved the financing of the project. An approval under this paragraph may be made by the governing body of the political subdivision or, except for a 1st class city or a county in which a 1st class city is located, by the highest ranking executive or administrator of the political subdivision.

(b) This section provides a complete alternative method, to all other methods provided by law, to exercise the powers authorized in this section, including the issuance of bonds, the entering into of contracts related to those bonds, and the financing or refinancing of projects.

(bm) A project may be located outside of the United States or outside a territory of the United States if the borrower, including a co-borrower, of proceeds of bonds issued to finance or refinance the project in whole or in part is incorporated and has its principal place of business in the United States or a territory of the United States. To the extent that this paragraph applies to a borrower, it also applies to a participant if the participant is a nongovernmental entity.

(c) Any action brought to challenge the validity of the issuance of a bond under this section, or the enforceability of a contract entered into under this section, must be commenced in circuit court within 30 days of the commission adopting a resolution authorizing the issuance of the bond or the execution of the contract.

(d) Bonds issued under this section shall not be invalid for any irregularity or defect in the proceedings for their sale or issuance. The bonds shall contain a statement that they have been authorized and issued pursuant to the laws of this state. The statement shall be conclusive evidence of the validity of the bonds.

(12) State Pledge. The state pledges to and agrees with the bondholders, and persons that enter into contracts with a commission under this section, that the state will not limit, impair, or alter the rights and powers vested in a commission by this section, including the rights and powers under sub. (4), before the commission has met and discharged the bonds, and any interest due on the bonds, and has fully performed its contracts, unless adequate provision is made by law for the protection of the bondholders or those entering into contracts with a commission. The commission may include this pledge in a contract with bondholders.

W.S.A. 66.0305

66.0305. Political subdivision revenue sharing

Currentness

(1) Definition. In this section, "political subdivision" means a city, village, town, or county.

(2) Political subdivision revenue sharing agreement. Subject to the requirements of this section, any 2 or more political subdivisions may, by a majority vote of a quorum of their governing bodies, enter into an agreement to share all or a specified part of revenues derived from taxes and special charges, as defined in s. 74.01(4). One or more political subdivisions may enter into agreements under this section with federally recognized American Indian tribes or bands.

(3) Public hearing. At least 30 days before entering into an agreement under sub. (2), a political subdivision shall hold a public hearing on the proposed agreement. Notice of the hearing shall be published as a class 3 notice under ch. 985.

(4) Specifications. (a) An agreement entered into under sub. (2) shall meet all of the following conditions:

1. The term of the agreement shall be for at least 10 years.

2. The boundaries of the area within which the revenues are to be shared in the agreement shall be specified.

3. The formula or other means of determining the amount of revenues to be shared under the agreement shall be specified.

4. The date upon which revenues agreed to be shared under the agreement shall be paid to the appropriate political subdivision shall be specified.

5. The method by which the agreement may be invalidated after the expiration of the minimum period specified in par. (a)1. shall be specified.

(b) An agreement entered into under sub. (2) may address any other appropriate matters, including any agreements with respect to services or agreements with respect to municipal boundaries under s. 66.0225, 66.0301(6), or 66.0307.

(5) Contiguous boundaries. No political subdivision may enter into an agreement under sub. (2) with one or more political subdivisions unless the political subdivision is contiguous to at least one other political subdivision that enters into the agreement.

(6) Advisory referendum. (a) Within 30 days after the hearing under sub. (3), the governing body of a participating political subdivision may adopt a resolution calling for an advisory referendum on the agreement. An advisory referendum shall be held if, within 30 days after the hearing under sub. (3), a petition, signed by a number of qualified electors equal to at least 10 percent of the votes cast for governor in the political subdivision at the last gubernatorial election, is filed with the clerk of a participating political subdivision, requesting an advisory referendum on the revenue sharing plan. The petition shall conform to the requirements of s. 8.40 and shall be filed as provided in s. 8.37. If an advisory referendum is held, the political subdivision's governing body may not vote to approve the agreement under sub. (2) until the report under par. (d) is filed.

(b) The advisory referendum shall be held not less than 70 days nor more than 100 days after adoption of the resolution under par. (a) calling for the referendum or not less than 70 days nor more than 100 days after receipt of the petition under par. (a) by the municipal or county clerk. The municipal or county clerk shall give notice of the referendum by publishing a notice in a newspaper of general circulation in the political subdivision, both on the publication day next preceding the advisory referendum election and one week prior to that publication date.

(c) The advisory referendum shall be conducted by the political subdivision's election officials. The governing body of the political subdivision may specify the number of election officials for the referendum. The ballots shall contain the words “For the revenue sharing agreement” and “Against the revenue sharing agreement” and shall otherwise conform to the provisions of s. 5.64(2). The election shall be conducted as are other municipal or county elections in accordance with chs. 6 and 7, insofar as applicable.

(d) The election inspectors shall report the results of the election, showing the total number of votes cast and the numbers cast for and against the revenue sharing. The election inspectors shall attach their affidavit to the report and immediately file the report in the office of the municipal or county clerk.

(e) The costs of the advisory referendum election shall be borne by the political subdivision that holds the election.

Chapter 66. General Municipality Law (Refs & Annos)
Subchapter III. Intergovernmental Cooperation

W.S.A. 66.0307

66.0307. Boundary change pursuant to approved cooperative plan

Currentness

(1) Definitions. In this section:

(af) "Comprehensive plan" means an adopted plan that contains the elements under s. 66.1001(2) or, if a municipality has not adopted a plan that contains those elements, a master plan adopted under s. 62.23(2) or (3).

(am) "Department" means the department of administration.

(b) "Municipality" means a city, village or town.

(2) Boundary change authority. Any combination of municipalities may determine the boundary lines between themselves under a cooperative plan that is approved by the department under this section. A single city or village and a single town may use the mediated agreement procedure under sub. (4m) to determine a common boundary line under a cooperative plan that is approved by the department under this section. No boundary of a municipality may be changed or maintained under this section unless the municipality is a party to the cooperative agreement. The cooperative plan shall provide one or more of the following:

(a) That specified boundary line changes shall occur during the planning period and the approximate dates by which the changes shall occur.

(b) That specified boundary line changes may occur during the planning period and the approximate dates by which the changes may occur.

(c) That a required boundary line change under par. (a) or an optional boundary line change under par. (b) shall be subject to the occurrence of conditions set forth in the plan.

(d) That specified boundary lines may not be changed during the planning period.

(3) Cooperative plan. (a) *Who may prepare plan.* The municipalities that propose to set the boundary lines between themselves under this section shall prepare a cooperative plan.

(b) *Purpose of plan.* The cooperative plan shall be made with the general purpose of guiding and accomplishing a coordinated, adjusted and harmonious development of the territory covered by the plan consistent with the comprehensive plan of each participating municipality.

(c) *Content of plan; consistency with comprehensive plan*. The cooperative plan shall describe how it is consistent with each participating municipality's comprehensive plan.

(d) *Content of plan; boundaries and services.* The cooperative plan shall:

1. Identify any boundary change and any existing boundary that may not be changed during the planning period.

2. Identify any conditions that must be met before a boundary change may occur.

3. Include a schedule of the period during which a boundary change shall or may occur.

4. Include a statement explaining how any part of the plan related to the location of boundaries meets the approval criteria under sub. (5)(c) 5.

4m. Identify all highways within the territory covered by the plan of which each participating municipality has jurisdiction.

5. Describe the services to be provided to the territory covered by the plan, identify the providers of those services and indicate whether the provision of any service has received preliminary approval of any relevant governmental regulatory authority.

6. Include a schedule for delivery of the services described under subd. 5.

7. Include a statement explaining how provision under the plan for the delivery of necessary municipal services to the territory covered by the plan meets the approval criterion under sub. (5)(c)3.

8. Designate the municipalities that are participating in the cooperative plan and that are required to ratify any boundary changes by enacting an ordinance under sub. (10).

(e) *Content of plan; compatibility with existing law.* The cooperative plan shall describe how the plan is consistent with current state and federal laws, county shoreland zoning ordinances under s. 59.692, municipal regulations and administrative rules that apply to the territory affected by the plan.

(f) *Content of plan; planning period.* The cooperative plan shall specify the duration of the proposed planning period, which shall be for a period of 10 years, except that the duration of the proposed planning period may be for a period greater than 10 years if a duration greater than 10 years is approved by the department.

(g) *Content of plan; zoning agreement.* The cooperative plan shall include all agreements under sub. (7m).

(h) *Existing plans may be used.* A cooperative plan may be based on, contain elements of or duplicate any existing plan for the same territory.

(4) Procedure for adopting cooperative plan. (a) *Authorizing resolution.* Each municipality that intends to participate in the preparation of a cooperative plan under this section shall adopt a resolution authorizing participation in the preparation of the plan. Notice of each resolution shall be given in writing, within 5 days after the resolution is adopted, to all of the following:

1. The department, the department of natural resources, the department of agriculture, trade and consumer protection and the department of transportation.

2. The clerks of any municipality, school district, technical college district, sewerage district or sanitary district which has any part of its territory within 5 miles of a participating municipality.

3. The clerk of each county in which a participating municipality is located.

4. Any county zoning agency under s. 59.69(2) or regional planning commission whose jurisdiction includes a participating municipality.

(b) *Public hearing.* At least 60 days after adoption under par. (a) of the last resolution by a participating municipality and at least 60 days before submitting a cooperative plan to the department for review and approval under sub. (5), the participating municipalities shall hold a joint hearing on the proposed plan. Notice of the hearing shall be given by each participating municipality by class 3 notice under ch. 985.

(c) *Comment on plan.* Any person may comment on the plan during the hearing and may submit written comments before, at or within 20 days following the hearing. All comments shall be considered by each participating municipality. A county zoning agency under s. 59.69(2) or regional planning commission whose jurisdiction includes any participating municipality shall comment in writing on the plan's effect on the master plan adopted by the regional planning commission under s. 66.0309(9), or development plan adopted by the county board or county planning agency under s. 59.69(3), and on the delivery of municipal services, and may comment on any other aspect of the plan. A county in the regional planning commission's jurisdiction may submit comments on the effect of the cooperative plan on the master plan adopted under s. 66.0309(9) and on the delivery of county services or on any other matter related to the plan.

(d) *Adoption of final plan.* 1. Subject to subd. 2., after the public hearing under par. (b) and consideration of comments made on the proposed cooperative plan, the plan participants may revise the plan in response to the comments and may, by resolution adopted by each participating municipality, adopt a final version of the plan.

2. If within 30 days after the public hearing under par. (b) a petition opposing the plan, signed by a number of qualified electors equal to at least 10 percent of the votes cast for governor in the municipality at the last gubernatorial election, is filed with the clerk of a participating municipality, the final version of the plan may be adopted in that municipality only by an affirmative vote of three-fourths of the members of the municipality's governing body who are present and voting. The petition shall conform to the requirements of s. 8.40.

(e) *Advisory referendum.* 1. Within 30 days after adoption of a final plan under par. (d), the governing body of a participating municipality may adopt a resolution calling for an advisory referendum on the plan. An advisory referendum shall be held if, within 30 days after adoption of the final plan under par. (d), a petition, signed by a number of qualified electors equal to at least 10 percent of the votes cast for governor in the municipality at the last gubernatorial election, is filed with the clerk of a participating municipality and as provided in s. 8.37, requesting an advisory referendum on the cooperative plan. The petition shall conform to the requirements of s. 8.40.

2. The advisory referendum shall be held not less than 70 days nor more than 100 days after adoption of the resolution under subd. 1. calling for the referendum or not less than 70 days nor more than 100 days after receipt of the petition by the municipal clerk. The municipal clerk shall give notice of the referendum by publishing a notice in a newspaper of general circulation in the municipality, both on the publication day next preceding the advisory referendum election and one week prior to that publication date.

3. The advisory referendum shall be conducted by the municipal election officials. The governing body of the municipality may specify the number of election officials for the referendum. The ballots shall contain the words “For the cooperative plan” and “Against the cooperative plan” and shall otherwise conform to the provisions of s. 5.64(2). The election shall be conducted as are other municipal elections in accordance with chs. 6 and 7, insofar as applicable.

4. The election inspectors shall report the results of the election, showing the total number of votes cast and the numbers cast for and against the cooperative plan. The election inspectors shall attach their affidavit to the report and immediately file the report in the office of the municipal clerk. The election inspector shall file a certified report of the results in the office of the clerk of each municipality that is a party to the cooperative plan.

5. The costs of the advisory referendum election shall be borne by the municipality that holds the election.

(f) *Submittal of final plan to department.* If no advisory referendum is held under par. (e), the plan participants may submit the final version of the cooperative plan to the department for approval under sub. (5) at least 60 days but not more than 180 days after the public hearing under par. (b). If an advisory referendum is held under par. (e), each participating municipality shall determine, by resolution, whether to submit the final version of the cooperative plan to the department for approval under sub. (5). The resolution shall be adopted within 60 days after the last advisory referendum is held. If any of the plan participants fails or refuses to approve submittal of the cooperative plan to the department, the plan may not be submitted. Any written comment received by a participating municipality on any version of the cooperative plan shall be submitted to the department at the time that the cooperative plan is submitted. If the cooperative plan is not submitted to and approved by the department, it may not be implemented under this section by any of the participating municipalities.

(4m) Mediated agreement procedure. (a)1. As an alternative to the parties mutually invoking the procedure under this section, a city, village, or town may petition the department for mediation of a cooperative plan under this paragraph.

2. A city or village may petition for mediation if all of the following apply:

a. The city or village adopts an authorizing resolution under sub. (4)(a)(intro.) and requests in writing an adjacent town to adopt an authorizing resolution under sub. (4)(a)(intro.) and the town fails to adopt the resolution within 60 days after the request is received by the town.

b. The city or village has adopted a comprehensive plan.

3. A town may petition for mediation if all of the following apply:

a. The town adopts an authorizing resolution under sub. (4)(a)(intro.) and requests in writing an adjacent city or village to adopt an authorizing resolution under sub. (4)(a)(intro.) and the city or village fails to adopt the resolution within 60 days after the request is received by the city or village.

b. The town has adopted a comprehensive plan.

(b) A municipality that is authorized under par. (a) to petition the department for mediation and elects to do so shall submit the petition within 90 days after the municipality has adopted the authorizing resolution described in par. (a)2. a. or 3. a. Upon receipt of a petition for mediation, the department shall notify the nonpetitioning adjacent municipality identified in the petition that the petition has been submitted. Within 45 days after receipt of notice from the department that a petition has been submitted, the nonpetitioning municipality shall notify the department whether it agrees to engage in mediation to develop a cooperative plan under this section. Failure of the nonpetitioning municipality to timely notify the department is considered notice that the municipality does not agree to engage in mediation. The department shall send written notice of the nonpetitioning municipality's decision, on whether it will participate, to the petitioning municipality. If the nonpetitioning municipality refuses to engage in mediation, the petitioning municipality may not submit a petition under this paragraph involving the same nonpetitioning municipality for a period of 3 years after the department sends notice of the refusal.

(c)1. If a nonpetitioning town refuses under par. (b) to engage in mediation, the town may not contest any annexation of its territory to the petitioning city or village that is commenced during the shorter of the following periods:

a. The period of 270 days beginning after the town refuses under par. (b) to engage in mediation.

b. The period beginning on the date the town refuses under par. (b) to engage in mediation and ending on the date the town agrees to engage in mediation.

2. If a nonpetitioning city or village refuses under par. (b) to engage in mediation, an annexation of territory of the petitioning town to the nonpetitioning city or village that is commenced during the shorter of the following periods shall be reviewed by the department in the manner described under s. 66.0217(6), regardless of the population of the county in which the annexation

proceeding is commenced, and, notwithstanding s. 66.0217(11)(c), may be contested by the town if the department determines that the annexation is not in the public interest:

a. The period of 270 days beginning after the city or village refuses under par. (b) to engage in mediation.

b. The period on the date the city or village refuses under par. (b) to engage in mediation and ending on the date the city or village agrees to engage in mediation.

(d)1. If both the petitioning municipality and nonpetitioning municipality agree to engage in mediation to develop a cooperative plan under this section, the municipalities shall select a mediator. The department may assist the municipalities in selecting a mediator. If the municipalities are unable to agree on the selection of a mediator, the department shall furnish a list of 5 mediators to the municipalities. The municipalities shall alternatively strike a name from the list until one name remains, who shall be the mediator.

2. The mediator shall assist the parties through recognized mediation techniques to develop and reach agreement on a cooperative plan under this section. Unless the participating municipalities agree to extend the mediation period, the mediation period expires after 270 days. Unless they agree otherwise, the participating municipalities are equally responsible for the costs of the mediation.

(e) Before the participating municipalities engage in mediation under this subsection, each shall adopt a resolution under sub. (4)(a)(intro.) and provide the required notice of the resolution. Notwithstanding sub. (4)(b), if the participating municipalities agree on a cooperative plan under this subsection, a public hearing on the plan shall be held under sub. (4)(b) no sooner than 45 days after agreement is reached and at least 45 days before submitting the plan to the department for review and approval under sub. (5).

(f) If any litigation contesting annexation of territory of the petitioning or nonpetitioning town to the city or village is commenced during the 3-year period after the department receives the petition for mediation under par. (b), the judge shall under s. 802.12(2), unless the nonpetitioning municipality objects, order the parties to select a settlement alternative under s. 802.12(1)(i) as a means to attempt settlement.

(5) Department review and approval of local or cooperative plan. (a) *Generally.* The department shall make a written determination of whether to approve a cooperative plan within 90 days after receiving the plan unless the department and the parties to the plan agree to a longer determination period. The department shall consider written comments on the plan received by a municipality under sub. (4)(c) that is submitted to the department under sub. (4)(f) or from any other source. The department may request information relating to the cooperative plan, including any comprehensive plan or land use plan currently being utilized by any participating municipality, from that municipality, and from any county or regional planning commission. The department may seek and consider comments from any state agency on whether the cooperative plan is consistent with state laws and administrative rules under the agency's jurisdiction. Any state agency requested to comment on a cooperative plan shall comply with the request. The department shall issue its determination of whether to approve the cooperative plan in writing, supported by specific findings based on the criteria under par. (c). The approval or disapproval of a cooperative plan by the department under this section is not a contested case, as defined in s. 227.01(3), for purposes of ch. 227.

(b) *Hearing.* Any person may request a public hearing before the department on a cooperative plan submitted to the department for approval. A request for a public hearing shall be in writing and shall be submitted to the department within 10 days after the cooperative plan is received by the department. If requested, the department shall, and on its own motion the department may, hold a public hearing on the cooperative plan. If requested to hold a public hearing, the department is required to hold only one hearing, regardless of the number of requests for a hearing. Any public hearing under this paragraph shall be held in a municipality that is a party to the cooperative plan.

(c) *Approval of cooperative plan.* A cooperative plan shall be approved by the department if the department determines that all of the following apply:

1. The content of the plan under sub. (3)(c) to (e) is sufficient to enable the department to make the determinations under subds. 2. to 5.

2. The cooperative plan is consistent with each participating municipality's comprehensive plan and with current state laws, municipal regulations, and administrative rules that apply to the territory affected by the plan.

3. Adequate provision is made in the cooperative plan for the delivery of necessary municipal services to the territory covered by the plan.

5. The shape of any boundary maintained or any boundary change under the cooperative plan is not the result of arbitrariness and reflects due consideration for compactness of area. Considerations relevant to the criteria under this subdivision include quantity of land affected by the boundary maintenance or boundary change and compatibility of the proposed boundary maintenance or boundary change with natural terrain including general topography, major watersheds, soil conditions and such features as rivers, lakes and major bluffs.

6. Any proposed planning period exceeding 10 years is consistent with the plan.

(d) *Return and resubmittal of plan.* The department may return a cooperative plan, with comments, if the department determines that the cooperative plan, if revised, may constitute a plan that can be approved by the department. If a cooperative plan is returned under this paragraph, each participating municipality may revise the plan, as directed by the department, adopt the revised plan by resolution and resubmit the plan to the department within 90 days after the plan is returned. After receiving a resubmitted cooperative plan, the department shall make a determination on approval within 30 days.

(6) Binding elements of cooperative plan. If a cooperative plan is approved by the department under sub. (5) or an amended plan is approved under sub. (8), provisions in the plan to maintain existing boundaries, the boundary changes in the plan, the schedule for those changes, the plan for delivery of services, including road maintenance, and the schedule for those services are binding on the parties to the plan and have the force and effect of a contract.

(7) Other boundary procedures. (a) *Other procedures after hearing.* After the joint hearing under sub. (4)(b) is held, no other procedure, except the procedure under s. 281.43(1m), for altering a municipality's boundaries may be used to alter a boundary included in the proposed cooperative plan under sub. (3)(d)1. until the boundary is no longer included in the proposed

cooperative plan, the municipality withdraws from the proposed cooperative plan or the proposed cooperative plan fails to receive approval from the department, whichever occurs first.

(b) *Other boundary procedures during the planning period.* During the planning period specified under sub. (3)(f), no other procedure for altering a municipality's boundaries may be used to alter a boundary that is included in the cooperative plan under sub. (3)(d)1., except if an annexation is conducted under s. 281.43(1m), regardless of whether the boundary is proposed to be maintained or changed or is allowed to be changed under the plan. After the planning period has expired, the boundary may be altered.

(7m) Zoning in town territory. (a) If a town is a party to a cooperative plan with a city or village, the town and city or village may agree, as part of the cooperative plan, to authorize the town, city, or village to enact a zoning ordinance under s. 60.61, 61.35, or 62.23 for all or a portion of the town territory covered by the plan. The exercise of zoning authority by a town under this paragraph is not subject to s. 60.61(3) or 60.62(3).

(b)1. If a county zoning ordinance applies to the town territory covered by a cooperative plan subject to an agreement under par. (a), that ordinance and any regulations, approvals, and conditions imposed under the ordinance continue in effect until the ordinance or the particular regulation, approval, or condition is specifically changed by official action of the town, city, or village with authority to enact a zoning ordinance under the agreement under par. (a). This subdivision does not expand or modify the authority of a town, city, or village to change a zoning ordinance, any regulation, approval, or condition imposed under a zoning ordinance, or any nonconforming use.

2. If a zoning ordinance is enacted under par. (a), that zoning ordinance and any regulations, approvals, and conditions imposed under the ordinance continue in effect after the planning period ceases until the ordinance or the particular regulation, approval, or condition is specifically changed under other applicable law.

(c) This subsection does not affect zoning ordinances adopted under s. 59.692 or 87.30 or ch. 91.

(8) Amendments to cooperative plan. (a) *Authority to amend plan.* A cooperative plan may be amended during the planning period if all the parties to the plan agree to the amendment and if the amendment is approved by the department.

(b) *When full procedure required.* An amendment to a cooperative plan that proposes to change a municipality's boundary or to change the approved planning period shall follow the same procedure as that required for an original plan.

(c) *When expedited procedure may occur.* An amendment to a cooperative plan that does not propose to change a boundary or the planning period shall follow the same procedure as that required for an original plan except that the hearing under sub. (4)(b) is not required unless objection to the amendment is made in writing by any person to the clerk of a participating municipality. An amendment under this paragraph shall be adopted by resolution of each of the participating municipalities. Notice of the amendment and adopting resolution shall follow the procedures specified in sub. (4)(a). Notice that the amendment will be submitted directly to the department unless objection is made in writing shall be given by each participating municipality by a class 3 notice under ch. 985. If no written objection to the amendment is received within 7 days after the last required notice is published, the amendment may be submitted directly to the department for approval. If written objection is timely made, the public hearing and other requirements under sub. (4)(b) and (c) apply.

(9) Court review of department decision. The decision of the department under sub. (5)(c) or (d) or (8) to approve or not to approve a cooperative plan or an amendment to a plan is subject to judicial review under ch. 227.

(10) Boundary change ordinance; filing and recording requirements. A boundary change under a cooperative plan shall be accomplished by the enactment of an ordinance by the governing body designated to do so in the plan. The filing and recording requirements under s. 66.0217(9)(a), as they apply to cities and villages under s. 66.0217(9)(a), apply to municipalities under this subsection. The requirements for the secretary of administration are the same as those required in s. 66.0217(9)(b).

(11) Time for bringing action. No action to contest the validity of a cooperative plan under this section or an amendment to a cooperative plan, regardless of the grounds for the action, may be commenced after 60 days from the date on which the department approves the cooperative plan under sub. (5) or the amendment under sub. (8), respectively. No action relating to compliance with a binding element of a cooperative plan may be commenced later than 180 days after the failure to comply.

Notes of Decisions (2)

W. S. A. 66.0307, WI ST 66.0307
Current through 2023 Act 272, published April 10, 2024.

End of Document

W.S.A. 66.0309

66.0309. Creation, organization, powers and duties of regional planning commissions

Currentness

(1) Definitions. In this section:

(a) "Governing body" means the town, village or county board or the legislative body of a city.

(b) "Local governmental units" or "local units" means cities, villages, towns and counties.

(c) "Population" means the population of a local unit as shown by the last federal census or by any subsequent population estimate under s. 16.96.

(2) Creation of regional planning commissions. (a) A regional planning commission may be created by the governor, or a state agency or official as the governor designates, upon petition in the form of a resolution by the governing body of a local governmental unit and the holding of a public hearing on the petition. If the petition is joined in by the governing bodies of all the local units in the proposed region, including the county board of any county, part or all of which is in the proposed region, the governor may dispense with the hearing. Notice of any public hearing shall be given by the governor by mail at least 10 days in advance to the clerk of each local unit in the proposed region.

(b) If the governor finds that there is a need for a regional planning commission, and if the governing bodies of local units within the proposed region which include over 50 percent of the population and equalized assessed valuation of the region as determined by the last previous equalization of assessments, consent to the formation of such regional planning commission, the governor may create the regional planning commission by order and designate the area and boundaries of the commission's jurisdiction taking into account the elements of homogeneity based upon, but not limited to, such considerations as topographic and geographic conformations, extent of urban development, the existence of special or acute agricultural, forestry, conservation or other rural problems, uniformity of social or economic interests and values, park and recreational needs, civil defense, or the existence of physical, social and economic problems of a regional character.

(c) Territory included within a regional planning commission that consists of one county or less in area also may be included in the creation of a multicounty regional planning commission. The creation does not require that the existing regional planning commission consisting of one county or less in area be terminated or altered, but upon creation of the multicounty commission, the existing commission shall cease to have authority to make charges upon participating local governmental units under sub. (14) and shall adopt a name other than "regional planning commission".

(2m) Limitation on territory. No regional planning commission may be created to include territory located in 3 or more uniform state districts as established by 1970 executive order 22 dated August 24, 1970. Any existing regional planning commission which includes territory located in 3 or more uniform state districts shall be dissolved no later than December 31, 1972.

(3) Composition of regional planning commissions. (a) The membership composition of a regional planning commission which includes a city of the first class shall be as follows:

1. One member appointed by the county board of each county, part or all of which is initially within the region or is later added.

2. Two members from each participating county shall be appointed by the governor. At least one appointee shall be a person, selected from a list of 2 or more persons nominated by the county board, who has experience in local government in elective or appointive offices or who is professionally engaged in advising local governmental units in the fields of land-use planning, transportation, law, finance, engineering or recreation and natural resources development. The governor in making appointments under this subdivision shall give due weight to the place of residence of the appointees within the various counties encompassed by the region.

(b) For any region which does not include a 1st class city, the membership composition of a regional planning commission shall be in accordance with resolutions approved by the governing bodies of a majority of the local units in the region, and these units shall have in the aggregate at least half the population of the region. For the purposes of this determination a county, part or all of which is within the region, shall be counted as a local unit, but the population of an approving county shall not be counted. In the absence of the necessary approval by the local units, the membership composition of a commission shall be determined as follows:

1. For regions which include land in more than one county par. (a) shall apply.

2. For regions that include land in only one county, the commission shall consist of the following:

a. Three members appointed by the county board.

b. Three members appointed by the governing body of each city, village and town in the region having a population of 20,000 or more. If there is no city, village or town having a population of 20,000 or more, the governor shall appoint one member from each city, village or town with a population of 5,000 or more within the region. All governor appointees under this subd. 2.b. shall be persons who have experience in local government in elective or appointive offices or who are professionally engaged in advising local governmental units in the fields of land-use planning, transportation, law, finance or engineering.

c. Three members appointed at large by the governor. All governor appointees under this subd. 2.c. shall be persons who have experience in local government in elective or appointive offices or who are professionally engaged in advising local governmental units in the fields of land-use planning, transportation, law, finance or engineering.

(c) Terms of office for regional planning commission members shall be as follows:

1. If the composition of the commission is approved by local units under par. (b), the terms shall be as prescribed in the resolutions of approval.

2. For members of all other commissions the term is 6 years after the initial term. At the first meeting of the commission it shall be determined by lot which of the initial members shall have 2, 4 and 6-year terms, respectively, and each group shall be as nearly equal as may be.

(d) All regional planning commission members shall be electors of the state and reside within the region.

(4) Compensation; expenses. A per diem compensation may be paid members of regional planning commissions. This shall not affect in any way remuneration received by any state or local official who, in addition to serving as a state or local official, serves also as a member of the regional planning commission. All members may be reimbursed for actual expenses incurred as members of the commission in carrying out the work of the commission.

(5) Chairperson; rules of procedure; records. Each regional planning commission shall elect its own chairperson and executive committee and shall establish its own rules of procedure, and may create and fill other offices as it may determine necessary. The commission may authorize the executive committee to act for it on all matters under rules adopted by it. The commission shall meet at least once each year. It shall keep a record of its resolutions, transactions, findings and determinations, which shall be a public record.

(6) Director and employees. The regional planning commission shall appoint a director and such employees as it deems necessary for its work and may hire such experts and consultants for part-time or full-time service as may be necessary for the prosecution of its responsibilities.

(7) Advisory committees or councils; appointment. The regional planning commission may appoint advisory committees or councils whose membership may consist of individuals whose experience, training or interest in the program may qualify them to lend valuable assistance to the regional planning commission by acting in an advisory capacity in consulting with the regional planning commission on all phases of the commission's program. Members of advisory bodies shall receive no compensation for their services but may be reimbursed for actual expenses incurred in the performance of their duties.

(8) Functions, general and special. (a)1. The regional planning commission may take any of the following actions:

a. Conduct all types of research studies, collect and analyze data, prepare maps, charts and tables, and conduct all necessary studies for the accomplishment of its other duties.

b. Consistent with the elements specified in s. 66.1001, make plans for the physical, social and economic development of the region, and, consistent with the elements specified in s. 66.1001, adopt by resolution any plan or the portion of any plan so prepared as its official recommendation for the development of the region.

c. Publicize and advertise its purposes, objectives and findings, and distribute reports concerning these items.

d. Provide advisory services on regional planning problems to the local government units within the region and to other public and private agencies in matters relative to its functions and objectives, and may act as a coordinating agency for programs and activities of local units and agencies as they relate to its objectives.

2. All public officials shall, upon request, furnish to the regional planning commission, within a reasonable time, available information as it requires for its work. In general, the regional planning commission shall have all powers necessary to enable it to perform its functions and promote regional planning. The functions of the regional planning commission shall be solely advisory to the local governments and local government officials comprising the region.

(b) The regional planning commission shall make an annual report of its activities to the legislative bodies of the local governmental units within the region, and shall submit 2 copies of the report to the legislative reference bureau.

(9) Preparation of master plan for region. The regional planning commission shall have the function and duty of making and adopting a master plan for the physical development of the region. The master plan, with the accompanying maps, plats, charts, programs and descriptive and explanatory matter, shall show the commission's recommendations for physical development and shall contain at least the elements described in s. 66.1001. The regional planning commission may amend, extend or add to the master plan or carry any part or subject matter into greater detail.

(10) Adoption of master plan for region. The master plan shall be made with the general purpose of guiding and accomplishing a coordinated, adjusted and harmonious development of the region which will, in accordance with existing and future needs, best promote public health, safety, morals, order, convenience, prosperity or the general welfare, as well as efficiency and economy in the process of development. The regional planning commission may adopt the master plan as a whole by a single resolution, or, as the work of making the whole master plan progresses, may by resolution adopt a part or parts of the master plan, any part to correspond with one or more of the elements specified in s. 66.1001. The resolution shall refer expressly to the maps, plats, charts, programs and descriptive and explanatory matter, and other matters intended by the regional planning commission to form the whole or any part of the plan, and the action taken shall be recorded on the adopted plan or part of the adopted plan by the identifying signature of the chairperson of the regional planning commission and a copy of the plan or part of the adopted plan shall be certified to the legislative bodies of the local governmental units within the region. The purpose and effect of adoption of the master plan shall be solely to aid the regional planning commission and the local governments and local government officials comprising the region in the performance of their functions and duties.

(11) Matters referred to regional planning commission. The officer or public body of a local governmental unit within the region having final authority may refer to the regional planning commission, for its consideration and report, the location or acquisition of land for any of the items or facilities that are included in the adopted regional master plan. Within 20 days after the matter is referred to the regional planning commission or a longer period as may be stipulated by the referring officer or public body, the commission shall report its recommendations to the referring officer or public body. The report and recommendations of the commission shall be advisory only. A state agency may authorize the regional planning commission with the consent of the commission to act for the agency in approving, examining, or reviewing plats under s. 236.12(2)(ap). A regional planning commission authorized by a local unit on November 1, 1980, to act for the local unit in approving plats may continue to so act until the commission withdraws its consent or the local unit its approval. A local unit may authorize a regional planning commission, with the consent of the commission, to conduct an advisory review of plats.

(12) Local adoption of plans of regional commission; contracts. (a) Any local governmental unit within the region may adopt all or any portion of the plans and other programs prepared and adopted by the regional planning commission.

(b) In addition to the other powers specified in this section a regional planning commission may enter into a contract with any local unit within the region under s. 66.0301 to make studies and offer advice on any of the following topics:

1. Land use, thoroughfares, community facilities, and public improvements.

2. Encouragement of economic and other developments.

(13) Aid from governmental agencies; gifts and grants. Aid, in any form, for the purpose of accomplishing the objectives of the regional planning commission may be accepted from all governmental agencies whether local, state or federal, if the conditions under which aid is furnished are not incompatible with the other provisions of this section. The regional planning commission may accept gifts and grants from public or private individuals or agencies if the conditions under which the grants are made are in accordance with the accomplishment of the objectives of the regional planning commission.

(14) Budget and service charges. (a) For the purpose of providing funds to meet the expenses of a regional planning commission, the commission shall annually on or before October 1 prepare and approve a budget reflecting the cost of its operation and services to the local governmental units within the region. The amount of the budget charged to any local governmental unit shall be in the proportion of the equalized value for tax purposes of the land, buildings, and other improvements on the land of the local governmental unit, within the region, to the total equalized value within the region. The amount charged to a local governmental unit shall not exceed .003 percent of equalized value under its jurisdiction and within the region, unless the governing body of the unit expressly approves the amount in excess of that percentage. All tax or other revenues raised for a regional planning commission shall be forwarded by the treasurer of the local unit to the treasurer of the commission on written order of the treasurer of the commission.

(b) Where one-half or more of the land within a county is within a region, the chairperson of the regional planning commission shall certify to the county clerk, before August 1 of each year, the proportionate amount of the budget charged to the county for the services of the regional planning commission. Unless the county board finds the charges unreasonable, and institutes the procedures under par. (d), it shall take legislative action as necessary to provide the funds called for in the certified statement.

(c) Where less than one-half of the land within a county is within a region, the chairperson of the regional planning commission shall before August 1 of each year certify to the clerk of the local governmental unit involved a statement of the proportionate charges assessed to that local governmental unit. The clerk shall extend the amount shown in the statement as a charge on the tax roll under s. 281.43(2).

(d) If any local governmental unit makes a finding by resolution within 20 days of the certification to its clerk that the charges of the regional planning commission are unreasonable, it may take any of the following actions:

1. Submit the issue to arbitration by 3 arbitrators, one to be chosen by the local governmental unit, one to be chosen by the regional planning commission, and the third to be chosen by the first 2 arbitrators. If the arbitrators are unable to agree, the vote of 2 shall be the decision. The arbitrators may affirm or modify the report, and shall submit their decision in writing to the local governmental unit and the regional planning commission within 30 days of their appointment unless the time is extended by agreement of the commission and the local governmental unit. The decision is binding. An election to arbitrate is a waiver of

the right to proceed by action. Two-thirds of the expenses of arbitration shall be paid by the party requesting arbitration and the balance by the other.

2. If a local governmental unit does not elect to arbitrate, it may institute a proceeding for judicial review under ch. 227.

(e) By agreement between the regional planning commission and a local governmental unit, special compensation to the commission for unique and special services provided to the local governmental unit may be arranged.

(f) The regional planning commission may accept from any local governmental unit supplies, the use of equipment, facilities and office space and the services of personnel as part or all of the financial support assessed against the local governmental unit.

(15) Dissolution of regional planning commissions. Upon receipt of certified copies of resolutions recommending the dissolution of a regional planning commission adopted by the governing bodies of a majority of the local units in the region, including the county board of any county, part or all of which is within the region, and upon a finding that all outstanding indebtedness of the commission has been paid and all unexpended funds returned to the local units which supplied them, or that adequate provision has been made for the outstanding indebtedness or unexpended funds, the governor shall issue a certificate of dissolution of the commission which shall then cease to exist.

(16) Withdrawal. Within 90 days of the issuance by the governor of an order creating a regional planning commission, any local unit of government within the boundaries of the region may withdraw from the jurisdiction of the commission by a two-thirds vote of the members-elect of the governing body after a public hearing. Notice of withdrawal shall be given to the commission by registered mail not more than 3 nor less than 2 weeks before withdrawal and by publication of a class 2 notice, under ch. 985. A local unit may withdraw from a regional planning commission at the end of any fiscal year by a two-thirds vote of the members-elect of the governing body taken at least 6 months before the effective date of the withdrawal. However, the local unit shall be responsible for its allocated share of the contractual obligations of the regional planning commission continuing beyond the effective date of its withdrawal.

66.0312. Local health departments; mutual assistance

Currentness

(1) In this section "local health department" has the meaning given in s. 66.0314(1)(e).

(2)(a) Subject to sub. (3), upon the request of a local health department, the personnel of any other local health department may assist the requester within the requester's jurisdiction, notwithstanding any other jurisdictional provision.

(b) If a request for assistance is made under par. (a), payment for the requested services shall be made by one of the following methods:

1. If an agreement under s. 66.0301, or any other agreement between the parties, for the payment of such services exists, the terms of the agreement shall be followed.

2. If no agreement described under subd. 1. for the payment of such services exists, the governmental unit that receives the assistance is responsible for the personnel or equipment costs incurred by the responding agency if the responding agency requests payment of those costs.

(3) This section does not apply during a state of emergency declared by the governor under s. 323.10.

W.S.A. 66.0313

66.0313. Law enforcement; mutual assistance

Currentness

(1) In this section:

(a) "Law enforcement agency" has the meaning given in s. 165.83(1)(b) and includes a tribal law enforcement agency.

(b) "Tribal law enforcement agency" has the meaning given in s. 165.83(1)(e).

(2) Except as provided in sub. (4), upon the request of any law enforcement agency, including county law enforcement agencies as provided in s. 59.28(2), the law enforcement personnel of any other law enforcement agency may assist the requesting agency within the latter's jurisdiction, notwithstanding any other jurisdictional provision. For purposes of ss. 895.35 and 895.46, law enforcement personnel, while acting in response to a request for assistance, shall be deemed employees of the requesting agency and, to the extent that those sections apply to law enforcement personnel and a law enforcement agency acting under or affected by this section, ss. 895.35 and 895.46 shall apply to tribal law enforcement personnel and a tribal law enforcement agency acting under or affected by this section.

(3) The provisions of s. 66.0513 apply to this section and, to the extent that s. 66.0513 applies to law enforcement personnel and a law enforcement agency acting under or affected by this section, it applies to tribal law enforcement personnel and a tribal law enforcement agency acting under or affected by this section.

(4) A law enforcement agency, other than a tribal law enforcement agency, may not respond to a request for assistance from a tribal law enforcement agency at a location outside the law enforcement agency's territorial jurisdiction unless all of the following apply:

(a) One of the following applies:

1. The governing body of the tribe that created the tribal law enforcement agency adopts and has in effect a resolution that includes a statement that the tribe waives its sovereign immunity to the extent necessary to allow the enforcement in the courts of this state of its liability under sub. (2) and s. 66.0513 or another resolution that the department of justice determines will reasonably allow the enforcement in the courts of this state of the tribe's liability under sub. (2) and s. 66.0513.

2. The tribal law enforcement agency or the tribe that created the tribal law enforcement agency maintains liability insurance that does all of the following:

a. Covers the tribal law enforcement agency for its liability under sub. (2) and s. 66.0513.

b. Has a limit of coverage not less than $2,000,000 for any occurrence.

c. Provides that the insurer, in defending a claim against the policy, may not raise the defense of sovereign immunity of the insured up to the limits of the policy.

3. The law enforcement agency and the tribal law enforcement agency have in place an agreement under which the law enforcement agency accepts liability under sub. (2) and s. 66.0513 for instances in which it responds to a request for assistance from the tribal law enforcement agency.

(b) The tribal law enforcement agency requesting assistance has provided to the department of justice a copy of the resolution under par. (a)1., proof of insurance under par. (a)2., or a copy of the agreement under par. (a)3., and the department of justice has posted either a copy of the document or notice of the document on the Internet site it maintains for exchanging information with law enforcement agencies.

Current through 2023 Act 272, published April 10, 2024.

End of Document

W.S.A. 66.0314

66.0314. State of emergency; mutual assistance

Currentness

(1) In this section:

(a) “Emergency management program” means the emergency management program of a city, village, town, or county, under s. 323.14(1).

(b) “Emergency medical services program” means a program established under s. 256.12.

(c) “Fire department” means any public organization engaged in fire fighting or a private sector employer fire company or fire department organized as a nonstock, nonprofit corporation under ch. 181 or ch. 213 without the input of a municipality.

(d) “Incident command system” means a functional management system established to control, direct, and manage the roles, responsibilities, and operations of all of the agencies involved in a multi-jurisdictional or multi-agency emergency response, which may include authorities designated by a participating tribe or band.

(e) “Local health department” has the meaning given in s. 250.01(4), and also includes an entity designated by a participating tribe or band as a local health department.

(fe) “Tribe or band” means a federally recognized American Indian tribe or band in this state.

(2)(a) If the governor declares a state of emergency under s. 323.10, upon the request of a city, village, town, or county, or a person acting under an incident command system, the personnel of any emergency management program, emergency medical services program, fire department, or local health department may assist the requester within the requester's jurisdiction, notwithstanding any other jurisdictional provision.

(b) If a request for assistance is made under par. (a), the governmental unit that receives the assistance is responsible for the personnel or equipment costs incurred by the responding agency to the extent that federal, state, and other 3rd-party reimbursement is available if all of the following apply:

1. The responding agency meets the personnel and equipment requirements in the state plan under s. 323.13(1)(b).

2. The responding agency requests payment of those costs.

End of Document

W.S.A. 66.0315

66.0315. Municipal cooperation; federal rivers, harbors or water resources projects

Currentness

A county, town, city or village acting under its powers and in conformity with state law may enter into an agreement with an agency of the federal government to cooperate in the construction, operation or maintenance of any federally authorized rivers, harbors or water resources management or control project or to assume any potential liability appurtenant to a project and may do all things necessary to consummate the agreement. If a project will affect more than one municipality, the municipalities affected may jointly enter into an agreement under this section with an agency of the federal government carrying any terms and provisions concerning the division of costs and responsibilities that are mutually agreed upon. The affected municipalities may by agreement submit any determinations of the division of construction costs, responsibilities, or any other liabilities among them to an arbitration board. The determination of the arbitration board shall be final. This section shall not be construed as a grant or delegation of power or authority to any county, town, city, village or other local municipality to do any work in or place any structures in or on any navigable water except as it is otherwise expressly authorized by state law to do.

66.0316. Renew Wisconsin performance review

Currentness

(1) Definitions. In this section:

(a) "Analysis" means a performance analysis of the cost and benefit of a political subdivision providing a governmental service compared to a private person providing the same service.

(b) "Chief executive officer" has the meaning given in s. 66.1106(1)(a).

(c) "Department" means the department of revenue.

(d) "Extension" has the meaning given in s. 36.05(7).

(e) "Governmental service" means a service related to any of the following:

1. Law enforcement.

2. Fire protection.

3. Emergency services.

4. Public health.

5. Solid waste collection and disposal.

6. Recycling.

7. Public transportation.

8. Public housing.

9. Animal control.

10. Libraries.

11. Recreation and culture.

12. Human services.

13. Youth services.

(f) “Political subdivision” means any city, village, town, or county with a population greater than 2,500.

(2) Pilot program. The department shall establish a pilot program to study governmental services delivered by and to political subdivisions. The department shall solicit political subdivisions to participate in the program. Based on the department's solicitation, the department shall select 5 political subdivisions to form councils as provided under sub. (3) and shall include in that selection at least one county and at least one city, village, or town.

(3) Creation of council. (a) No later than January 1, 2002, each political subdivision selected under sub. (2) shall create a council consisting of 5 members, as follows:

1. The chief executive officer of the political subdivision, or his or her designee.

2. A member who is an employee of the political subdivision.

3. A member with cost accounting experience who is a resident of the political subdivision and who is not a political subdivision officer or employee.

4. Two members, not including the member under subd. 3., who are residents of the political subdivision and who are not political subdivision officers or employees.

(b) The political subdivision's chief executive officer shall appoint the council members under par. (a)2. to 4. The chief executive officer shall appoint 2 members to initial terms of 2 years and the remaining 2 members to initial terms of 4 years. The chief executive officer shall appoint the respective successors of the members under par. (a)2. to 4. to terms of 4 years. All members under par. (a)2. to 4. shall serve until their successors are appointed and qualified.

(c) The council shall organize annually at its first meeting to elect a chairperson. Four members of the council shall constitute a quorum.

(4) Duties of council. The council shall conduct an analysis of governmental services provided by the political subdivision with which the council is affiliated. In conducting such an analysis, the council shall do all of the following:

(a) Establish specific benchmarks for performance, including goals related to intergovernmental cooperation to provide governmental services.

(b) Conduct research and establish new methods to promote efficiency in the delivery of governmental services.

(c) Identify and recommend collaborative agreements to be developed with other political subdivisions to deliver governmental services.

(5) Data collection and analysis. (a) A council may conduct an analysis of a governmental service provided by the political subdivision with which the council is affiliated on its own or after receiving any of the following:

1. A written suggestion regarding delegating a governmental service to a private person.

2. A written complaint that a governmental service provided by the political subdivision is competing with the same or a similar service provided by a private person.

3. A written suggestion by a political subdivision employee or political subdivision employee labor organization to review a governmental service delegated to a private person.

(b) After receiving a suggestion or complaint under par. (a), the council shall meet to decide whether an analysis of the governmental service indicated in the suggestion or complaint is necessary. The council may hold hearings, conduct inquiries, and gather data to make its decision. If the council decides to analyze a governmental service under this paragraph, the council shall do all of the following:

1. Determine the costs of providing the governmental service, including the cost of personnel and capital assets used in providing the service.

2. Determine how often and to what extent the governmental service is provided and the quality of the governmental service provided.

3. Make a cost-benefit determination based on the findings under subds. 1. and 2.

4. Determine whether a private person can provide the governmental service at a cost savings to the political subdivision providing the service and at a quality at least equal to the quality of the service provided by the political subdivision.

5. If the council decides that a governmental service is not suitable for delegating to a private person, determine whether the governmental service should be retained in its present form, modified, or eliminated.

(c) After completing an analysis under par. (b), the council shall make a recommendation to the political subdivision providing the governmental service analyzed under par. (b) and publish the council's recommendation. The recommendation shall specify the recommendation's impact on the political subdivision and the political subdivision's employees.

(6) Training and assistance. The board of regents of the University of Wisconsin System shall direct the extension to assist councils created under this section in performing their duties under subs. (4) and (5). The board of regents shall ensure that council members are trained in how to do all of the following:

(a) Conduct an analysis of a governmental service.

(b) Determine ways to improve the efficiency of delivering a governmental service.

(c) Establish, quantify, and monitor performance standards.

(d) Prepare the reports required under sub. (7)(a) and (b).

(7) Reports. (a) On or before June 30, 2002, each council shall submit a report to the department describing the council's activities.

(b) On or before June 30, 2003, each council shall submit a final report to the department describing the council's activities and recommendations and the extent to which its recommendations have been adopted by the political subdivision with which the council is affiliated. A report submitted under this paragraph shall provide a detailed explanation of all analyses conducted under subs. (4) and (5).

(c) On or before July 31, 2003, the department shall submit a report concerning the activities and recommendations described in the reports submitted under pars. (a) and (b) to the legislature under s. 13.172(2) and to the governor. The department's report shall describe ways to implement such recommendations statewide.

Subchapter III. Intergovernmental Cooperation

W.S.A. 66.0317

66.0317. Cooperation region

Currentness

(1) Definitions. In this section:

(a) "Cooperation region" means a federal standard metropolitan statistical area. For purposes of this section, if only a part of a county is located in a federal standard metropolitan statistical area the entire county is considered to be located in the federal standard metropolitan statistical area.

(b) "Governmental service" has the meaning given in s. 66.0316(1)(e).

(d) "Municipality" means any city, village, or town.

(2) Area cooperation compacts. (a)1. Except as provided in subd. 3., beginning in 2003, a municipality shall enter into an area cooperation compact with at least 2 municipalities or counties located in the same cooperation region as the municipality, or with any combination of at least 2 such entities, to perform at least 2 governmental services.

3. A municipality that is not adjacent to at least 2 other municipalities located in the same cooperation region as the municipality may enter into a cooperation compact with any adjacent municipality or with the county in which the municipality is located to perform the number of governmental services as specified under subd. 1.

(b) An area cooperation compact shall provide a plan for any municipalities or counties that enter into the compact to collaborate to provide governmental services. The compact shall provide benchmarks to measure the plan's progress and provide outcome-based performance measures to evaluate the plan's success. Municipalities and counties that enter into the compact shall structure the compact in a way that results in significant tax savings to taxpayers within those municipalities and counties.

Municipalities (Ch. 59 to 68)
Chapter 66. General Municipality Law (Refs & Annos)
Subchapter IV. Regulation

W.S.A. 66.0401

66.0401. Regulation relating to solar and wind energy systems

Currentness

(1e) Definitions. In this section:

(a) "Application for approval" means an application for approval of a wind energy system under rules promulgated by the commission under s. 196.378(4g)(c)1.

(b) "Commission" means the public service commission.

(c) "Political subdivision" means a city, village, town, or county.

(d) "Wind energy system" has the meaning given in s. 66.0403(1)(m).

(1m) Authority to restrict systems limited. No political subdivision may place any restriction, either directly or in effect, on the installation or use of a wind energy system that is more restrictive than the rules promulgated by the commission under s. 196.378(4g)(b). No political subdivision may place any restriction, either directly or in effect, on the installation or use of a solar energy system, as defined in s. 13.48(2)(h)1.g., or a wind energy system, unless the restriction satisfies one of the following conditions:

(a) Serves to preserve or protect the public health or safety.

(b) Does not significantly increase the cost of the system or significantly decrease its efficiency.

(c) Allows for an alternative system of comparable cost and efficiency.

(2) Authority to require trimming of blocking vegetation. Subject to sub. (6)(a), a political subdivision may enact an ordinance relating to the trimming of vegetation that blocks solar energy, as defined in s. 66.0403(1)(k), from a collector surface, as defined under s. 700.41(2)(b), or that blocks wind from a wind energy system. The ordinance may include a designation of

responsibility for the costs of the trimming. The ordinance may not require the trimming of vegetation that was planted by the owner or occupant of the property on which the vegetation is located before the installation of the solar or wind energy system.

(3) Testing activities. A political subdivision may not prohibit or restrict any person from conducting testing activities to determine the suitability of a site for the placement of a wind energy system. A political subdivision objecting to such testing may petition the commission to impose reasonable restrictions on the testing activity.

(4) Local procedure. (a)1. Subject to subd. 2., a political subdivision that receives an application for approval shall determine whether it is complete and, no later than 45 days after the application is filed, notify the applicant about the determination. As soon as possible after receiving the application for approval, the political subdivision shall publish a class 1 notice, under ch. 985, stating that an application for approval has been filed with the political subdivision. If the political subdivision determines that the application is incomplete, the notice shall state the reason for the determination. An applicant may supplement and refile an application that the political subdivision has determined to be incomplete. There is no limit on the number of times that an applicant may refile an application for approval. If the political subdivision fails to determine whether an application for approval is complete within 45 days after the application is filed, the application shall be considered to be complete.

2. If a political subdivision that receives an application for approval under subd. 1. does not have in effect an ordinance described under par. (g), the 45-day time period for determining whether an application is complete, as described in subd. 1., does not begin until the first day of the 4th month beginning after the political subdivision receives the application. A political subdivision may notify an applicant at any time, after receipt of the application and before the first day of the 4th month after its receipt, that it does not intend to enact an ordinance described under par. (g).

3. On the same day that an applicant makes an application for approval under subd. 1. for a wind energy system, the applicant shall mail or deliver written notice of the application to the owners of land adjoining the site of the wind energy system.

4. A political subdivision may not consider an applicant's minor modification to the application to constitute a new application for the purposes of this subsection.

(b) A political subdivision shall make a record of its decision making on an application for approval, including a recording of any public hearing, copies of documents submitted at any public hearing, and copies of any other documents provided to the political subdivision in connection with the application for approval. The political subdivision's record shall conform to the commission's rules promulgated under s. 196.378(4g)(c)2.

(c) A political subdivision shall base its decision on an application for approval on written findings of fact that are supported by the evidence in the record under par. (b). A political subdivision's procedure for reviewing the application for approval shall conform to the commission's rules promulgated under s. 196.378(4g)(c)3.

(d) Except as provided in par. (e), a political subdivision shall approve or disapprove an application for approval no later than 90 days after the day on which it notifies the applicant that the application for approval is complete. If a political subdivision fails to act within the 90 days, or within any extended time period established under par. (e), the application is considered approved.

(e) A political subdivision may extend the time period in par. (d) if, within that 90-day period, the political subdivision authorizes the extension in writing. Any combination of the following extensions may be granted, except that the total amount of time for all extensions granted under this paragraph may not exceed 90 days:

1. An extension of up to 45 days if the political subdivision needs additional information to determine whether to approve or deny the application for approval.

2. An extension of up to 90 days if the applicant makes a material modification to the application for approval.

3. An extension of up to 90 days for other good cause specified in writing by the political subdivision.

(f)1. Except as provided in subd. 2., a political subdivision may not deny or impose a restriction on an application for approval unless the political subdivision enacts an ordinance that is no more restrictive than the rules the commission promulgates under s. 196.378(4g)(b).

2. A political subdivision may deny an application for approval if the proposed site of the wind energy system is in an area primarily designated for future residential or commercial development, as shown in a map that is adopted, as part of a comprehensive plan, under s. 66.1001(2)(b) and (f), before June 2, 2009, or as shown in such maps after December 31, 2015, as part of a comprehensive plan that is updated as required under s. 66.1001(2)(i). This subdivision applies to a wind energy system that has a nominal capacity of at least one megawatt.

(g) A political subdivision that chooses to regulate wind energy systems shall enact an ordinance, subject to sub. (6)(b), that is no more restrictive than the applicable standards established by the commission in rules promulgated under s. 196.378(4g).

(5) Public service commission review. (a) A decision of a political subdivision to determine that an application is incomplete under sub. (4)(a)1., or to approve, disapprove, or impose a restriction upon a wind energy system, or an action of a political subdivision to enforce a restriction on a wind energy system, may be appealed only as provided in this subsection.

(b)1. Any aggrieved person seeking to appeal a decision or enforcement action specified in par. (a) may begin the political subdivision's administrative review process. If the person is still aggrieved after the administrative review is completed, the person may file an appeal with the commission. No appeal to the commission under this subdivision may be filed later than 30 days after the political subdivision has completed its administrative review process. For purposes of this subdivision, if a political subdivision fails to complete its administrative review process within 90 days after an aggrieved person begins the review process, the political subdivision is considered to have completed the process on the 90th day after the person began the process.

2. Rather than beginning an administrative review under subd. 1., an aggrieved person seeking to appeal a decision or enforcement action of a political subdivision specified in par. (a) may file an appeal directly with the commission. No appeal to the commission under this subdivision may be filed later than 30 days after the decision or initiation of the enforcement action.

3. An applicant whose application for approval is denied under sub. (4)(f)2. may appeal the denial to the commission. The commission may grant the appeal notwithstanding the inconsistency of the application for approval with the political subdivision's planned residential or commercial development if the commission determines that granting the appeal is consistent with the public interest.

(c) Upon receiving an appeal under par. (b), the commission shall notify the political subdivision. The political subdivision shall provide a certified copy of the record upon which it based its decision or enforcement action within 30 days after receiving notice. The commission may request of the political subdivision any other relevant governmental records and, if requested, the political subdivision shall provide such records within 30 days after receiving the request.

(d) The commission may confine its review to the records it receives from the political subdivision or, if it finds that additional information would be relevant to its decision, expand the records it reviews. The commission shall issue a decision within 90 days after the date on which it receives all of the records it requests under par. (c), unless for good cause the commission extends this time period in writing. If the commission determines that the political subdivision's decision or enforcement action does not comply with the rules it promulgates under s. 196.378(4g) or is otherwise unreasonable, the political subdivision's decision shall be superseded by the commission's decision and the commission may order an appropriate remedy.

(e) In conducting a review under par. (d), the commission may treat a political subdivision's determination that an application under sub. (4)(a)1. is incomplete as a decision to disapprove the application if the commission determines that a political subdivision has unreasonably withheld its determination that an application is complete.

(f) Judicial review is not available until the commission issues its decision or order under par. (d). Judicial review shall be of the commission's decision or order, not of the political subdivision's decision or enforcement action. The commission's decision or order is subject to judicial review under ch. 227. Injunctive relief is available only as provided in s. 196.43.

(6) Applicability of a political subdivision or county ordinance. (a)1. A county ordinance enacted under sub. (2) applies only to the towns in the county that have not enacted an ordinance under sub. (2).

2. If a town enacts an ordinance under sub. (2) after a county has enacted an ordinance under sub. (2), the county ordinance does not apply, and may not be enforced, in the town, except that if the town later repeals its ordinance, the county ordinance applies in that town.

(b)1. Subject to subd. 2., a county ordinance enacted under sub. (4) applies only in the unincorporated parts of the county.

2. If a town enacts an ordinance under sub. (4), either before or after a county enacts an ordinance under sub. (4), the more restrictive terms of the 2 ordinances apply to the town, except that if the town later repeals its ordinance, the county ordinance applies in that town.

(c) If a political subdivision enacts an ordinance under sub. (4)(g) after the commission's rules promulgated under s. 196.378(4g) take effect, the political subdivision may not apply that ordinance to, or require approvals under that ordinance for, a wind energy system approved by the political subdivision under a previous ordinance or under a development agreement.

Notes of Decisions (4)

W. S. A. 66.0401, WI ST 66.0401
Current through 2023 Act 272, published April 10, 2024.

End of Document

W.S.A. 66.0403

66.0403. Solar and wind access permits

Currentness

(1) Definitions. In this section:

(a) “Agency” means the governing body of a municipality which has provided for granting a permit or the agency which the governing body of a municipality creates or designates under sub. (2). “Agency” includes an officer or employee of the municipality.

(b) “Applicant” means an owner applying for a permit under this section.

(c) “Application” means an application for a permit under this section.

(d) “Collector surface” means any part of a solar collector that absorbs solar energy for use in the collector's energy transformation process. “Collector surface” does not include frames, supports and mounting hardware.

(e) “Collector use period” means 9 a.m. to 3 p.m. standard time daily.

(f) “Impermissible interference” means the blockage of wind from a wind energy system or solar energy from a collector surface or proposed collector surface for which a permit has been granted under this section during a collector use period if such blockage is by any structure or vegetation on property, an owner of which was notified under sub. (3)(b). “Impermissible interference” does not include:

1. Blockage by a narrow protrusion, including but not limited to a pole or wire, which does not substantially interfere with absorption of solar energy by a solar collector or does not substantially block wind from a wind energy system.

2. Blockage by any structure constructed, under construction or for which a building permit has been applied for before the date the last notice is mailed or delivered under sub. (3)(b).

3. Blockage by any vegetation planted before the date the last notice is mailed or delivered under sub. (3)(b) unless a municipality by ordinance under sub. (2) defines impermissible interference to include such vegetation.

(g) "Municipality" means any county with a zoning ordinance under s. 59.69, any town with a zoning ordinance under s. 60.61, any city with a zoning ordinance under s. 62.23(7), any 1st class city or any village with a zoning ordinance under s. 61.35.

(h) "Owner" means at least one owner, as defined under s. 66.0217(1)(d), of a property or the personal representative of at least one owner.

(i) "Permit" means a solar access permit or a wind access permit issued under this section.

(j) "Solar collector" means a device, structure or a part of a device or structure a substantial purpose of which is to transform solar energy into thermal, mechanical, chemical or electrical energy.

(k) "Solar energy" means direct radiant energy received from the sun.

(L) "Standard time" means the solar time of the ninetieth meridian west of Greenwich.

(m) "Wind energy system" means equipment and associated facilities that convert and then store or transfer energy from the wind into usable forms of energy.

(2) Permit procedure. The governing body of every municipality may provide for granting a permit. A permit may not affect any land except land which, at the time the permit is granted, is within the territorial limits of the municipality or is subject to an extraterritorial zoning ordinance adopted under s. 62.23(7a), except that a permit issued by a city or village may not affect extraterritorial land subject to a zoning ordinance adopted by a county or a town. The governing body may appoint itself as the agency to process applications or may create or designate another agency to grant permits. The governing body may provide by ordinance that a fee be charged to cover the costs of processing applications. The governing body may adopt an ordinance with any provision it deems necessary for granting a permit under this section, including but not limited to:

(a) Specifying standards for agency determinations under sub. (5)(a).

(b) Defining an impermissible interference to include vegetation planted before the date the last notice is mailed or delivered under sub. (3)(b), provided that the permit holder shall be responsible for the cost of trimming such vegetation.

(3) Permit applications. (a) In a municipality which provides for granting a permit under this section, an owner who has installed or intends to install a solar collector or wind energy system may apply to an agency for a permit.

(b) An agency shall determine if an application is satisfactorily completed and shall notify the applicant of its determination. If an applicant receives notice that an application has been satisfactorily completed, the applicant shall deliver by certified mail or by hand a notice to the owner of any property which the applicant proposes to be restricted by the permit under sub. (7). The applicant shall submit to the agency a copy of a signed receipt for every notice delivered under this paragraph. The agency shall supply the notice form. The information on the form may include, without limitation because of enumeration:

1. The name and address of the applicant, and the address of the land upon which the solar collector or wind energy system is or will be located.

2. That an application has been filed by the applicant.

3. That the permit, if granted, may affect the rights of the notified owner to develop his or her property and to plant vegetation.

4. The telephone number, address and office hours of the agency.

5. That any person may request a hearing under sub. (4) within 30 days after receipt of the notice, and the address and procedure for filing the request.

(4) Hearing. Within 30 days after receipt of the notice under sub. (3)(b), any person who has received a notice may file a request for a hearing on the granting of a permit or the agency may determine that a hearing is necessary even if no such request is filed. If a request is filed or if the agency determines that a hearing is necessary, the agency shall conduct a hearing on the application within 90 days after the last notice is delivered. At least 30 days prior to the hearing date, the agency shall notify the applicant, all owners notified under sub. (3)(b) and any other person filing a request of the time and place of the hearing.

(5) Permit grant. (a) The agency shall grant a permit if the agency determines that:

1. The granting of a permit will not unreasonably interfere with the orderly land use and development plans of the municipality;

2. No person has demonstrated that she or he has present plans to build a structure that would create an impermissible interference by showing that she or he has applied for a building permit prior to receipt of a notice under sub. (3)(b), has expended at least $500 on planning or designing such a structure or by submitting any other credible evidence that she or he has made substantial progress toward planning or constructing a structure that would create an impermissible interference; and

3. The benefits to the applicant and the public will exceed any burdens.

(b) An agency may grant a permit subject to any condition or exemption the agency deems necessary to minimize the possibility that the future development of nearby property will create an impermissible interference or to minimize any other burden on any person affected by granting the permit. Such conditions or exemptions may include but are not limited to restrictions on the location of the solar collector or wind energy system and requirements for the compensation of persons affected by the granting of the permit.

(6) Record of permit. If an agency grants a permit:

(a) The agency shall specify the property restricted by the permit under sub. (7) and shall prepare notice of the granting of the permit. The notice shall include the identification required under s. 706.05(2)(c) for the owner and the property upon which the solar collector or wind energy system is or will be located and for any owner and property restricted by the permit under

sub. (7), and shall indicate that the property may not be developed and vegetation may not be planted on the property so as to create an impermissible interference with the solar collector or wind energy system which is the subject of the permit unless the permit affecting the property is terminated under sub. (9) or unless an agreement affecting the property is filed under sub. (10).

(b) The applicant shall record with the register of deeds of the county in which the property is located the notice under par. (a) for each property specified under par. (a) and for the property upon which the solar collector or wind energy system is or will be located.

(7) Remedies for impermissible interference. (a) Any person who uses property which he or she owns or permits any other person to use the property in a way which creates an impermissible interference under a permit which has been granted or which is the subject of an application shall be liable to the permit holder or applicant for damages, except as provided under par. (b), for any loss due to the impermissible interference, court costs and reasonable attorney fees unless:

1. The building permit was applied for prior to receipt of a notice under sub. (3)(b) or the agency determines not to grant a permit after a hearing under sub. (4).

2. A permit affecting the property is terminated under sub. (9).

3. An agreement affecting the property is filed under sub. (10).

(b) A permit holder is entitled to an injunction to require the trimming of any vegetation which creates or would create an impermissible interference as defined under sub. (1)(f). If the court finds on behalf of the permit holder, the permit holder shall be entitled to a permanent injunction, damages, court costs and reasonable attorney fees.

(8) Appeals. Any person aggrieved by a determination by a municipality under this section may appeal the determination to the circuit court for a review.

(9) Termination of solar or wind access rights. (a) Any right protected by a permit under this section shall terminate if the agency determines that the solar collector or wind energy system which is the subject of the permit is:

1. Permanently removed or is not used for 2 consecutive years, excluding time spent on repairs or improvements.

2. Not installed and functioning within 2 years after the date of issuance of the permit.

(b) The agency shall give the permit holder written notice and an opportunity for a hearing on a proposed termination under par. (a).

(c) If the agency terminates a permit, the agency may charge the permit holder for the cost of recording and record a notice of termination with the register of deeds, who shall record the notice with the notice recorded under sub. (6)(b) or indicate on any notice recorded under sub. (6)(b) that the permit has been terminated.

(10) Waiver. A permit holder by written agreement may waive all or part of any right protected by a permit. A copy of such agreement shall be recorded with the register of deeds, who shall record such copy with the notice recorded under sub. (6)(b).

(11) Preservation of rights. The transfer of title to any property shall not change the rights and duties under this section or under an ordinance adopted under sub. (2).

(12) Construction. (a) This section may not be construed to require that an owner obtain a permit prior to installing a solar collector or wind energy system.

(b) This section may not be construed to mean that acquisition of a renewable energy resource easement under s. 700.35 is in any way contingent upon the granting of a permit under this section.

Notes of Decisions (3)

W. S. A. 66.0403, WI ST 66.0403
Current through 2023 Act 272, published April 10, 2024.

End of Document

W.S.A. 66.0404

66.0404. Mobile tower siting regulations

Currentness

(1) Definitions. In this section:

(a) “Antenna” means communications equipment that transmits and receives electromagnetic radio signals and is used in the provision of mobile services.

(b) “Application” means an application for a permit under this section to engage in an activity specified in sub. (2)(a) or a class 2 collocation.

(c) “Building permit” means a permit issued by a political subdivision that authorizes an applicant to conduct construction activity that is consistent with the political subdivision's building code.

(d) “Class 1 collocation” means the placement of a new mobile service facility on an existing support structure such that the owner of the facility does not need to construct a free standing support structure for the facility but does need to engage in substantial modification.

(e) “Class 2 collocation” means the placement of a new mobile service facility on an existing support structure such that the owner of the facility does not need to construct a free standing support structure for the facility or engage in substantial modification.

(f) “Collocation” means class 1 or class 2 collocation or both.

(g) “Distributed antenna system” means a network of spatially separated antenna nodes that is connected to a common source via a transport medium and that provides mobile service within a geographic area or structure.

(h) “Equipment compound” means an area surrounding or adjacent to the base of an existing support structure within which is located mobile service facilities.

(i) “Existing structure” means a support structure that exists at the time a request for permission to place mobile service facilities on a support structure is filed with a political subdivision.

(j) “Fall zone” means the area over which a mobile support structure is designed to collapse.

(k) “Mobile service” has the meaning given in 47 USC 153 (33).

(L) “Mobile service facility” means the set of equipment and network components, including antennas, transmitters, receivers, base stations, power supplies, cabling, and associated equipment, that is necessary to provide mobile service to a discrete geographic area, but does not include the underlying support structure.

(m) “Mobile service provider” means a person who provides mobile service.

(n) “Mobile service support structure” means a freestanding structure that is designed to support a mobile service facility.

(o) “Permit” means a permit, other than a building permit, or approval issued by a political subdivision which authorizes any of the following activities by an applicant:

1. A class 1 collocation.

2. A class 2 collocation.

3. The construction of a mobile service support structure.

(p) “Political subdivision” means a city, village, town, or county.

(q) “Public utility” has the meaning given in s. 196.01 (5).

(r) “Search ring” means a shape drawn on a map to indicate the general area within which a mobile service support structure should be located to meet radio frequency engineering requirements, taking into account other factors including topography and the demographics of the service area.

(s) “Substantial modification” means the modification of a mobile service support structure, including the mounting of an antenna on such a structure, that does any of the following:

1. For structures with an overall height of 200 feet or less, increases the overall height of the structure by more than 20 feet.

2. For structures with an overall height of more than 200 feet, increases the overall height of the structure by 10 percent or more.

3. Measured at the level of the appurtenance added to the structure as a result of the modification, increases the width of the support structure by 20 feet or more, unless a larger area is necessary for collocation.

4. Increases the square footage of an existing equipment compound to a total area of more than 2,500 square feet.

(t) "Support structure" means an existing or new structure that supports or can support a mobile service facility, including a mobile service support structure, utility pole, water tower, building, or other structure.

(u) "Utility pole" means a structure owned or operated by an alternative telecommunications utility, as defined in s. 196.01(1d); public utility, as defined in s. 196.01(5); telecommunications utility, as defined in s. 196.01(10); political subdivision; or cooperative association organized under ch. 185; and that is designed specifically for and used to carry lines, cables, or wires for telecommunications service, as defined in s. 182.017(1g)(cq); for video service, as defined in s. 66.0420(2)(y); for electricity; or to provide light.

(2) New construction or substantial modification of facilities and support structures. (a) Subject to the provisions and limitations of this section, a political subdivision may enact a zoning ordinance under s. 59.69, 60.61, or 62.23 to regulate any of the following activities:

1. The siting and construction of a new mobile service support structure and facilities.

2. With regard to a class 1 collocation, the substantial modification of an existing support structure and mobile service facilities.

(b) If a political subdivision regulates an activity described under par. (a), the regulation shall prescribe the application process which a person must complete to engage in the siting, construction, or modification activities described in par. (a). The application shall be in writing and shall contain all of the following information:

1. The name and business address of, and the contact individual for, the applicant.

2. The location of the proposed or affected support structure.

3. The location of the proposed mobile service facility.

4. If the application is to substantially modify an existing support structure, a construction plan which describes the proposed modifications to the support structure and the equipment and network components, including antennas, transmitters, receivers, base stations, power supplies, cabling, and related equipment associated with the proposed modifications.

5. If the application is to construct a new mobile service support structure, a construction plan which describes the proposed mobile service support structure and the equipment and network components, including antennas, transmitters, receivers, base stations, power supplies, cabling, and related equipment to be placed on or around the new mobile service support structure.

6. If an application is to construct a new mobile service support structure, an explanation as to why the applicant chose the proposed location and why the applicant did not choose collocation, including a sworn statement from an individual who

has responsibility over the placement of the mobile service support structure attesting that collocation within the applicant's search ring would not result in the same mobile service functionality, coverage, and capacity; is technically infeasible; or is economically burdensome to the mobile service provider.

(c) If an applicant submits to a political subdivision an application for a permit to engage in an activity described under par. (a), which contains all of the information required under par. (b), the political subdivision shall consider the application complete. If the political subdivision does not believe that the application is complete, the political subdivision shall notify the applicant in writing, within 10 days of receiving the application, that the application is not complete. The written notification shall specify in detail the required information that was incomplete. An applicant may resubmit an application as often as necessary until it is complete.

(d) Within 90 days of its receipt of a complete application, a political subdivision shall complete all of the following or the applicant may consider the application approved, except that the applicant and the political subdivision may agree in writing to an extension of the 90 day period:

1. Review the application to determine whether it complies with all applicable aspects of the political subdivision's building code and, subject to the limitations in this section, zoning ordinances.

2. Make a final decision whether to approve or disapprove the application.

3. Notify the applicant, in writing, of its final decision.

4. If the decision is to disapprove the application, include with the written notification substantial evidence which supports the decision.

(e) A political subdivision may disapprove an application if an applicant refuses to evaluate the feasibility of collocation within the applicant's search ring and provide the sworn statement described under par. (b)6.

(f) A party who is aggrieved by the final decision of a political subdivision under par. (d)2. may bring an action in the circuit court of the county in which the proposed activity, which is the subject of the application, is to be located.

(g) If an applicant provides a political subdivision with an engineering certification showing that a mobile service support structure, or an existing structure, is designed to collapse within a smaller area than the setback or fall zone area required in a zoning ordinance, that zoning ordinance does not apply to such a structure unless the political subdivision provides the applicant with substantial evidence that the engineering certification is flawed.

(h) A political subdivision may regulate the activities described under par. (a) only as provided in this section.

(i) If a political subdivision has in effect on July 2, 2013, an ordinance that applies to the activities described under par. (a) and the ordinance is inconsistent with this section, the ordinance does not apply to, and may not be enforced against, the activity.

(3) Collocation on existing support structures. (a) 1. A class 2 collocation is a permitted use under ss. 59.69, 60.61, and 62.23.

2. If a political subdivision has in effect on July 2, 2013, an ordinance that applies to a class 2 collocation and the ordinance is inconsistent with this section, the ordinance does not apply to, and may not be enforced against, the class 2 collocation.

3. A political subdivision may regulate a class 2 collocation only as provided in this section.

4. A class 2 collocation is subject to the same requirements for the issuance of a building permit to which any other type of commercial development or land use development is subject.

(b) If an applicant submits to a political subdivision an application for a permit to engage in a class 2 collocation, the application shall contain all of the information required under sub. (2)(b)1. to 3., in which case the political subdivision shall consider the application complete. If any of the required information is not in the application, the political subdivision shall notify the applicant in writing, within 5 days of receiving the application, that the application is not complete. The written notification shall specify in detail the required information that was incomplete. An applicant may resubmit an application as often as necessary until it is complete.

(c) Within 45 days of its receipt of a complete application, a political subdivision shall complete all of the following or the applicant may consider the application approved, except that the applicant and the political subdivision may agree in writing to an extension of the 45 day period:

1. Make a final decision whether to approve or disapprove the application.

2. Notify the applicant, in writing, of its final decision.

3. If the application is approved, issue the applicant the relevant permit.

4. If the decision is to disapprove the application, include with the written notification substantial evidence which supports the decision.

(d) A party who is aggrieved by the final decision of a political subdivision under par. (c)1. may bring an action in the circuit court of the county in which the proposed activity, which is the subject of the application, is to be located.

(4) Limitations. With regard to an activity described in sub. (2)(a) or a class 2 collocation, a political subdivision may not do any of the following:

(a) Impose environmental testing, sampling, or monitoring requirements, or other compliance measures for radio frequency emissions, on mobile service facilities or mobile radio service providers.

(b) Enact an ordinance imposing a moratorium on the permitting, construction, or approval of any such activities.

(c) Enact an ordinance prohibiting the placement of a mobile service support structure in particular locations within the political subdivision.

(d) Charge a mobile radio service provider a fee in excess of one of the following amounts:

1. For a permit for a class 2 collocation, the lesser of $500 or the amount charged by a political subdivision for a building permit for any other type of commercial development or land use development.

2. For a permit for an activity described in sub. (2)(a), $3,000.

(e) Charge a mobile radio service provider any recurring fee for an activity described in sub. (2)(a) or a class 2 collocation.

(f) Permit 3rd party consultants to charge the applicant for any travel expenses incurred in the consultant's review of mobile service permits or applications.

(g) Disapprove an application to conduct an activity described under sub. (2)(a) based solely on aesthetic concerns.

(gm) Disapprove an application to conduct a class 2 collocation on aesthetic concerns.

(h) Enact or enforce an ordinance related to radio frequency signal strength or the adequacy of mobile service quality.

(i) Impose a surety requirement, unless the requirement is competitively neutral, nondiscriminatory, and commensurate with the historical record for surety requirements for other facilities and structures in the political subdivision which fall into disuse. There is a rebuttable presumption that a surety requirement of $20,000 or less complies with this paragraph.

(j) Prohibit the placement of emergency power systems.

(k) Require that a mobile service support structure be placed on property owned by the political subdivision.

(L) Disapprove an application based solely on the height of the mobile service support structure or on whether the structure requires lighting.

(m) Condition approval of such activities on the agreement of the structure or mobile service facility owner to provide space on or near the structure for the use of or by the political subdivision at less than the market rate, or to provide the political subdivision other services via the structure or facilities at less than the market rate.

(n) Limit the duration of any permit that is granted.

(o) Require an applicant to construct a distributed antenna system instead of either constructing a new mobile service support structure or engaging in collocation.

(p) Disapprove an application based on an assessment by the political subdivision of the suitability of other locations for conducting the activity.

(q) Require that a mobile service support structure, existing structure, or mobile service facilities have or be connected to backup battery power.

(r) Impose a setback or fall zone requirement for a mobile service support structure that is different from a requirement that is imposed on other types of commercial structures.

(s) Consider an activity a substantial modification under sub. (1)(s)1. or 2. if a greater height is necessary to avoid interference with an existing antenna.

(t) Consider an activity a substantial modification under sub. (1)(s)3. if a greater protrusion is necessary to shelter the antenna from inclement weather or to connect the antenna to the existing structure by cable.

(u) Limit the height of a mobile service support structure to under 200 feet.

(v) Condition the approval of an application on, or otherwise require, the applicant's agreement to indemnify or insure the political subdivision in connection with the political subdivision's exercise of its authority to approve the application.

(w) Condition the approval of an application on, or otherwise require, the applicant's agreement to permit the political subdivision to place at or collocate with the applicant's support structure any mobile service facilities provided or operated by, whether in whole or in part, a political subdivision or an entity in which a political subdivision has a governance, competitive, economic, financial or other interest.

(4e) Setback requirements. (a) Notwithstanding sub. (4)(r), and subject to the provisions of this subsection, a political subdivision may enact an ordinance imposing setback requirements related to the placement of a mobile service support structure that applies to new construction or the substantial modification of facilities and support structures, as described in sub. (2).

(b) A setback requirement may apply only to a mobile service support structure that is constructed on or adjacent to a parcel of land that is subject to a zoning ordinance that permits single-family residential use on that parcel. A setback requirement does not apply to an existing or new utility pole, or wireless support structure in a right-of-way that supports a small wireless facility, if the pole or facility meets the height limitations in s. 66.0414(2)(e)2. and 3.

(c) The setback requirement under par. (b) for a mobile service support structure on a parcel shall be measured from the lot lines of other adjacent and nonadjacent parcels for which single-family residential use is a permitted use under a zoning ordinance.

(d) A setback requirement must be based on the height of the proposed mobile service support structure, and the setback requirement may not be a distance that is greater than the height of the proposed structure.

(5) Applicability. If a county enacts an ordinance as described under sub. (2) the ordinance applies only in the unincorporated parts of the county, except that if a town enacts an ordinance as described under sub. (2) after a county has so acted, the county ordinance does not apply, and may not be enforced, in the town, except that if the town later repeals its ordinance, the county ordinance applies in that town.

Subchapter IV. Regulation

W.S.A. 66.0405

66.0405. Removal of rubbish

Currentness

Cities, villages and towns may remove ashes, garbage, and rubbish from such classes of places in the city, village or town as the board or council directs. The removal may be from all of the places or from those whose owners or occupants desire the service. Districts may be created and removal provided for certain districts only, and different regulations may be applied to each removal district or class of property. The cost of removal may be funded by special assessment against the property served, by general tax upon the property of the respective districts, or by general tax upon the property of the city, village or town. If a city, village or town contracts for ash, garbage or rubbish removal service, it may contract with one or more service providers.

Credits

<<For credits, see Historical Note field.>>

Editors' Notes

COMMENTS--1999 ACT 150, § 119

Note: Amended to expressly authorize contracting with one or more service providers for removal of ash, garbage or rubbish. Express authority is extended in order to mitigate possible antitrust issues if the city, village or town determines that the service can best be provided by one service provider.

Notes of Decisions (8)

Chapter 66. General Municipality Law (Refs & Annos)
Subchapter IV. Regulation

W.S.A. 66.0406

66.0406. Radio broadcast service facility regulations

Currentness

(1) Definitions. In this section:

(a) "Political subdivision" means any city, village, town, or county.

(b) "Radio broadcast services" means the regular provision of a commercial or noncommercial service involving the transmission, emission, or reception of radio waves for the transmission of sound or images in which the transmissions are intended for direct reception by the general public.

(c) "Radio broadcast service facilities" means commercial or noncommercial facilities, including antennas and antenna support structures, intended for the provision of radio broadcast services.

(2) Limitations on local regulation. Beginning on May 1, 2013, if a political subdivision enacts an ordinance, adopts a resolution, or takes any other action that affects the placement, construction, or modification of radio broadcast service facilities, the ordinance, resolution, or other action may not take effect unless all of the following apply:

(a) The ordinance, resolution, or other action has a reasonable and clearly defined public health or safety objective, and reflects the minimum practical regulation that is necessary to accomplish that objective.

(b) The ordinance, resolution, or other action reasonably accommodates radio broadcast services and does not prohibit, or have the effect of prohibiting, the provision of such services in the political subdivision.

(3) Continued application of existing regulations. If a political subdivision has in effect on May 1, 2013, an ordinance or resolution that is inconsistent with the requirements that are specified in sub. (2) for an ordinance, resolution, or other action to take effect, the existing ordinance or resolution does not apply, and may not be enforced, to the extent that it is inconsistent with the requirements that are specified in sub. (2).

(4) Denial of placement, construction, or modification of facilities. If a political subdivision denies a request by any person to place, construct, or modify radio broadcast service facilities in the political subdivision, the denial may be based only on the political subdivision's public health or safety concerns. The political subdivision must provide the requester with a written

denial of the requester's request, and the political subdivision must provide the requester with substantial written evidence which supports the reasons for the political subdivision's action.

Subchapter IV. Regulation

W.S.A. 66.0407

66.0407. Noxious weeds

Currentness

(1) In this section:

(a) “Destroy” means the complete killing of weeds or the killing of weed plants above the surface of the ground by the use of chemicals, cutting, tillage, cropping system, pasturing livestock, or any or all of these in effective combination, at a time and in a manner as will effectually prevent the weed plants from maturing to the bloom or flower stage.

(b) “Noxious weed” means Canada thistle, leafy spurge, field bindweed, any weed designated as a noxious weed by the department of natural resources by rule, and any other weed the governing body of any municipality or the county board of any county by ordinance or resolution declares to be noxious within its respective boundaries.

(3) A person owning, occupying or controlling land shall destroy all noxious weeds on the land. The person having immediate charge of any public lands shall destroy all noxious weeds on the lands. The highway patrolman on all federal, state or county trunk highways shall destroy all noxious weeds on that portion of the highway which that highway patrolman patrols. The town board is responsible for the destruction of all noxious weeds on the town highways.

(4) The chairperson of each town, the president of each village and the mayor or manager of each city may annually on or before May 15 publish a class 2 notice, under ch. 985, that every person is required by law to destroy all noxious weeds, as defined in this section, on lands in the municipality which the person owns, occupies or controls. A town, village or city which has designated as its official newspaper or which uses for its official notices the same newspaper as any other town, village or city may publish the notice under this subsection in combination with the other town, village or city.

(5) This section does not apply to Canada thistle or annual noxious weeds that are located on land that the department of natural resources owns, occupies or controls and that is maintained in whole or in part as habitat for wild birds by the department of natural resources.

Subchapter IV. Regulation

W.S.A. 66.0408

66.0408. Regulation of occupations

Currentness

(1) Definitions. In this section, "political subdivision" means a city, village, town, or county.

(2) Limitations on new regulations. (a) Except as provided in sub. (3), beginning on November 13, 2015, a political subdivision may not impose any occupational fees or licensing requirements on any profession if that profession is not subject to occupational fees or licensing requirements of the political subdivision on that date, but the political subdivision may continue to so regulate any profession that is subject to its occupational fees or licensing requirements on that date.

(b) With regard to the areas in which the department of safety and professional services may impose requirements on a contractor under s. 101.654, a political subdivision may not impose any requirements on a contractor that are more stringent than the requirements imposed by the department of safety and professional services under s. 101.654.

(c) Beginning on November 13, 2015, if the department of safety and professional services or an examining board, affiliated credentialing board, or other board in the department of safety and professional services imposes any new occupational fees or licensing requirements on any profession that was previously unregulated by the state, and if a political subdivision regulates that occupation when the state regulations take effect, the political subdivision may not continue to regulate that profession on or after the day on which the state regulations take effect and the political subdivision's regulations do not apply and may not be enforced.

(d) With regard to the areas in which any department of state government may impose occupational licensing requirements on any profession, a political subdivision may not impose any occupational licensing requirements on an individual who works in that profession that are more stringent than the requirements imposed by the department that regulates that profession.

(3) Exception. If a political subdivision has in effect an occupational fee or licensing requirement on the profession of photographer on November 13, 2015, that regulation does not apply and may not be enforced.

Subchapter IV. Regulation

W.S.A. 66.0409

66.0409. Local regulation of weapons

Currentness

(1) In this section:

(a) “Firearm” has the meaning given in s. 167.31(1)(c) and includes an airgun, as defined in s. 29.001(7).

(b) “Political subdivision” means a city, village, town or county.

(c) “Sport shooting range” means an area designed and operated for the practice of weapons used in hunting, skeet shooting and similar sport shooting.

(2) Except as provided in subs. (3) and (4), no political subdivision may enact or enforce an ordinance or adopt a resolution that regulates the sale, purchase, purchase delay, transfer, ownership, use, keeping, possession, bearing, transportation, licensing, permitting, registration, or taxation of any knife or any firearm or part of a firearm, including ammunition and reloader components, unless the ordinance or resolution is the same as or similar to, and no more stringent than, a state statute.

(3)(a) Nothing in this section prohibits a county from imposing a sales tax or use tax under subch. V of ch. 77 on any knife or any firearm or part of a firearm, including ammunition and reloader components, sold in the county.

(b)1. Nothing in this section prohibits a city, village or town that is authorized to exercise village powers under s. 60.22(3) from enacting an ordinance or adopting a resolution that restricts the discharge of a firearm.

2. Notwithstanding subd. 1., any ordinance or resolution that restricts the discharge of a firearm does not apply and may not be enforced if the actor's conduct is justified or, had it been subject to a criminal penalty, would have been subject to a defense described in s. 939.45.

3. Notwithstanding subd. 1., any ordinance or resolution that restricts the honorary discharge of a firearm that involves the use of only blanks and that is part of any of the following does not apply and may not be enforced:

a. An event, including a funeral, honoring a current or former member of the military, law enforcement officer, or professional fire fighter.

b. Military honors provided at a cemetery on Memorial Day or Veterans Day.

c. Military honors provided at a veterans memorial site.

(c) Nothing in this section prohibits a political subdivision from enacting or enforcing an ordinance or adopting a resolution that prohibits the possession of a knife in a building, or part of a building, that is owned, occupied, or controlled by the political subdivision.

(4)(a) Nothing in this section prohibits a political subdivision from continuing to enforce an ordinance or resolution that is in effect on November 18, 1995, and that regulates the sale, purchase, transfer, ownership, use, keeping, possession, bearing, transportation, licensing, permitting, registration or taxation of any firearm or part of a firearm, including ammunition and reloader components, if the ordinance or resolution is the same as or similar to, and no more stringent than, a state statute.

(am) Nothing in this section prohibits a political subdivision from continuing to enforce until November 30, 1998, an ordinance or resolution that is in effect on November 18, 1995, and that requires a waiting period of not more than 7 days for the purchase of a handgun.

(b) If a political subdivision has in effect on November 17, 1995, an ordinance or resolution that regulates the sale, purchase, transfer, ownership, use, keeping, possession, bearing, transportation, licensing, permitting, registration or taxation of any firearm or part of a firearm, including ammunition and reloader components, and the ordinance or resolution is not the same as or similar to a state statute, the ordinance or resolution shall have no legal effect and the political subdivision may not enforce the ordinance or resolution on or after November 18, 1995.

(c) Nothing in this section prohibits a political subdivision from enacting and enforcing a zoning ordinance that regulates the new construction of a sport shooting range or when the expansion of an existing sport shooting range would impact public health and safety.

(5) A county ordinance that is enacted or a county resolution that is adopted by a county under sub. (2) or a county ordinance or resolution that remains in effect under sub. (4)(a) or (am) applies only in those towns in the county that have not enacted an ordinance or adopted a resolution under sub. (2) or that continue to enforce an ordinance or resolution under sub. (4)(a) or (am), except that this subsection does not apply to a sales or use tax that is imposed under subch. V of ch. 77.

(6) Unless other facts and circumstances that indicate a criminal or malicious intent on the part of the person apply, no person may be in violation of, or be charged with a violation of, an ordinance of a political subdivision relating to disorderly conduct or other inappropriate behavior for loading a firearm, or for carrying or going armed with a firearm or a knife, without regard to whether the firearm is loaded or the firearm or the knife is concealed or openly carried. Any ordinance in violation of this subsection does not apply and may not be enforced.

66.0410. Local regulation of ticket reselling

Currentness

(1) Definitions. In this section:

(a) "Political subdivision" means a city, village, town, or county.

(b) "Ticket" means a ticket that is sold to an entertainment or sporting event.

(2) Reselling of tickets. (a) A political subdivision may not enact an ordinance or adopt a resolution and the Board of Regents of the University of Wisconsin System may not promulgate a rule or adopt a resolution prohibiting the resale of any ticket for an amount that is equal to or less than the ticket's face value.

(b) If a political subdivision or the Board of Regents of the University of Wisconsin System has in effect on April 22, 2004 an ordinance, rule, or resolution that is inconsistent with par. (a), the ordinance, rule, or resolution does not apply and may not be enforced.

66.0411. Sound-producing devices; impoundment; seizure and forfeiture

Currentness

(1) In this section, "sound-producing device" does not include a piece of equipment or machinery that is designed for agricultural purposes and that is being used in the conduct of agricultural operations.

(1m)(a) Any city, village, town or county may, by ordinance, authorize a law enforcement officer, at the time of issuing a citation for a violation of s. 346.94(16) or a local ordinance in strict conformity with s. 346.94(16) or any other local ordinance prohibiting excessive noise, to impound any radio, electric sound amplification device or other sound-producing device used in the commission of the violation if the person charged with such violation is the owner of the radio, electric sound amplification device or other sound-producing device and has 2 or more prior convictions within a 3-year period of s. 346.94(16) or a local ordinance in strict conformity with s. 346.94(16) or any other local ordinance prohibiting excessive noise. The ordinance may provide for impoundment of a vehicle for not more than 5 working days to permit the city, village, town or county or its authorized agent to remove the radio, electric sound amplification device or other sound-producing device if the vehicle is owned by the person charged with the violation and the sound-producing device may not be easily removed from the vehicle. Upon removal of the sound-producing device, an impounded vehicle shall be returned to its rightful owner.

(b) The ordinance under par. (a) may provide for recovery by the city, village, town or county of the cost of impounding the sound-producing device and, if a vehicle is impounded, the cost of impounding the vehicle and removing the sound-producing device. The ordinance under par. (a) shall provide that, upon disposition of the forfeiture action for the violation of s. 346.94(16) or a local ordinance in strict conformity with s. 346.94(16) or any other local ordinance prohibiting excessive noise and payment of any forfeiture imposed, the sound-producing device shall be returned to its rightful owner.

(c) The city, village, town or county may dispose of any impounded sound-producing device or, following the procedure for an abandoned vehicle under s. 342.40, any impounded vehicle which has remained unclaimed for a period of 90 days after disposition of the forfeiture action.

(d) This subsection does not apply to a radio, electric sound amplification device or other sound-producing device on a motorcycle.

(2)(a) Notwithstanding sub. (1m), any city, village, town or county may, by ordinance, authorize a law enforcement officer, at the time of issuing a citation for a violation of s. 346.94(16) or a local ordinance in strict conformity with s. 346.94(16) or any other local ordinance prohibiting excessive noise, to seize any radio, electric sound amplification device or other sound-producing device used in the commission of the violation if the person charged with such violation is the owner of the radio, electric sound amplification device or other sound-producing device and has 3 or more prior convictions within a 3-year period of s. 346.94(16) or a local ordinance in strict conformity with s. 346.94(16) or any other local ordinance prohibiting excessive noise.

(b) The ordinance under par. (a) may provide for impoundment of a vehicle for not more than 5 working days to permit the city, village, town or county or its authorized agent to remove the radio, electric sound amplification device or other sound-producing device if the vehicle is owned by the person charged with the violation and the sound-producing device may not be easily removed from the vehicle. Upon removal of the sound-producing device, an impounded vehicle shall be returned to its rightful owner upon payment of the reasonable costs of impounding the vehicle and removing the sound-producing device.

(c) The ordinance under par. (a) shall include provisions that treat any seized sound-producing device in substantially the manner provided in ss. 973.075(3), 973.076 and 973.077 for property realized through the commission of any crime, except that the sound-producing device shall remain in the custody of the applicable law enforcement agency; a district attorney or city, village or town attorney, whichever is applicable, shall institute the forfeiture proceedings; and, if the sound-producing device is sold by the law enforcement agency, all proceeds of the sale shall be retained by the applicable city, village, town or county.

(d) The city, village, town or county may, following the procedure for an abandoned vehicle under s. 342.40, dispose of any impounded vehicle which has remained unclaimed for a period of 90 days after disposition of the forfeiture action.

(e) This subsection does not apply to a radio, electric sound amplification device or other sound-producing device on a motorcycle.

Subchapter IV. Regulation

W.S.A. 66.0412

66.0412. Local regulation of real estate brokers, brokerage services

Currentness

(1) Definitions. In this section:

(a) "Broker" means a real estate broker licensed under ch. 452.

(b) "Local governmental unit" has the meaning given in s. 66.0131(1)(a).

(c) "Political subdivision" means any city, village, town, or county.

(2) Regulation of brokers, brokerage services. (a) A local governmental unit may not enact an ordinance or adopt a resolution that does any of the following:

1. In relation to the provision of real estate services, imposes any fees on brokers or on real estate brokerage services.

2. Imposes any regulations on the professional services provided by a broker or by a person who provides real estate brokerage services.

(b) If a local governmental unit has in effect on July 2, 2013, an ordinance or resolution that is inconsistent with par. (a), the ordinance or resolution does not apply and may not be enforced.

W.S.A. 66.0413

66.0413. Razing buildings

Currentness

(1) Authority and procedure. (a) *Definitions.* In this subsection:

1. “Building” includes any building or structure or any portion of a building or structure.

2. “Raze a building” means to demolish and remove the building and to restore the site to a dust-free and erosion-free condition.

(b) *Raze order.* The governing body, building inspector or other designated officer of a municipality may:

1. Except as provided in sub. (5), if a building is old, dilapidated, or out of repair and consequently dangerous, unsafe, unsanitary, or otherwise unfit for human habitation and unreasonable to repair, order the owner of the building to raze the building or, if the building can be made safe by reasonable repairs, order the owner to either make the building safe and sanitary or to raze the building, at the owner's option.

2. If there has been a cessation of normal construction of a building for a period of more than 2 years, order the owner of the building to raze the building.

(br) *Notice of unfitness for occupancy or use; penalty.* 1. If a building subject to an order under par. (b) is unsanitary and unfit for human habitation, occupancy or use and is not in danger of structural collapse, the building inspector or other designated officer shall post a placard on the premises containing the following notice: “This Building May Not Be Used For Human Habitation, Occupancy or Use.” The building inspector or other designated officer shall prohibit use of the building for human habitation, occupancy or use until necessary repairs have been made.

2. Any person who rents, leases or occupies a building which has been condemned for human habitation, occupancy or use under subd. 1. shall be fined not less than $5 nor more than $50 or imprisoned not more than 30 days for each week of the violation, or both.

(c) *Reasonableness of repair; presumption*. Except as provided in subs. (3) and (5), if a municipal governing body, building inspector, or designated officer determines that the cost of repairs of a building described in par. (b)1. would exceed 50 percent of the assessed value of the building divided by the ratio of the assessed value to the recommended value as last published

by the department of revenue for the municipality within which the building is located, the repairs are presumed unreasonable for purposes of par. (b)1.

(d) *Service of order.* An order under par. (b) shall be served on the owner of record of the building that is subject to the order or on the owner's agent if the agent is in charge of the building in the same manner as a summons is served in circuit court. An order under par. (b) shall be served on the holder of an encumbrance of record by 1st class mail at the holder's last-known address and by publication as a class 1 notice under ch. 985. If the owner and the owner's agent cannot be found or if the owner is deceased and an estate has not been opened, the order may be served by posting it on the main entrance of the building and by publishing it as a class 1 notice under ch. 985 before the time limited in the order begins to run. The time limited in the order begins to run from the date of service on the owner or owner's agent or, if the owner and agent cannot be found, from the date that the order was posted on the building.

(e) *Effect of recording order.* If a raze order issued under par. (b) is recorded with the register of deeds in the county in which the building is located, the order is considered to have been served, as of the date the raze order is recorded, on any person claiming an interest in the building or the real estate as a result of a conveyance from the owner of record unless the conveyance was recorded before the recording of the raze order.

(f) *Failure to comply with order; razing building.* An order under par. (b) shall specify the time within which the owner of the building is required to comply with the order and shall specify repairs, if any. If the owner fails or refuses to comply within the time prescribed, the building inspector or other designated officer may proceed to raze the building through any available public agency or by contract or arrangement with private persons, or to secure the building and, if necessary, the property on which the building is located if unfit for human habitation, occupancy or use. The cost of razing or securing the building may be charged in full or in part against the real estate upon which the building is located, and if that cost is so charged it is a lien upon the real estate and may be assessed and collected as a special charge, but may not be assessed and collected as a special tax. Any portion of the cost charged against the real estate that is not reimbursed under s. 632.103(2) from funds withheld from an insurance settlement may be assessed and collected as a special tax.

(g) *Court order to comply.* A municipality, building inspector or designated officer may commence and prosecute an action in circuit court for an order of the court requiring the owner to comply with an order to raze a building issued under this subsection if the owner fails or refuses to do so within the time prescribed in the order, or for an order of the court requiring any person occupying a building whose occupancy has been prohibited under this subsection to vacate the premises, or any combination of the court orders. A hearing on actions under this paragraph shall be given preference. Court costs are in the discretion of the court.

(h) *Restraining order.* A person affected by an order issued under par. (b) may within the time provided by s. 893.76 apply to the circuit court for an order restraining the building inspector or other designated officer from razing the building or forever be barred. The hearing shall be held within 20 days and shall be given preference. The court shall determine whether the raze order is reasonable. If the order is found reasonable the court shall dissolve the restraining order. If the order is found not reasonable the court shall continue the restraining order or modify it as the circumstances require. Costs are in the discretion of the court. If the court finds that the order is unreasonable, the building inspector or other designated officer shall issue no other order under this subsection in regard to the same building until its condition is substantially changed. The remedies provided in this paragraph are exclusive remedies and anyone affected by an order issued under par. (b) is not entitled to recover any damages for the razing of the building.

(i) *Removal of personal property.* If a building subject to an order under par. (b) contains personal property or fixtures which will unreasonably interfere with the razing or repair of the building or if the razing makes necessary the removal, sale or destruction

of the personal property or fixtures, the building inspector or other designated officer may order in writing the removal of the personal property or fixtures by a date certain. The order shall be served as provided in par. (d). If the personal property or fixtures are not removed by the time specified the inspector may store, sell or, if it has no appreciable value, destroy the personal property or fixture. If the property is stored the amount paid for storage is a lien against the property and against the real estate and, to the extent that the amount is not reimbursed under s. 632.103(2) from funds withheld from an insurance settlement, shall be assessed and collected as a special tax against the real estate if the real estate is owned by the owner of the personal property and fixtures. If the property is stored the owner of the property, if known, shall be notified of the place of storage and if the property is not claimed by the owner it may be sold at the expiration of 6 months after it has been stored. The handling of the sale and the distribution of the net proceeds after deducting the cost of storage and any other costs shall be as specified in par. (j) and a report made to the circuit court as specified in par. (j). A person affected by any order made under this paragraph may appeal as provided in par. (h).

(j) *Sale of salvage.* If an order to raze a building has been issued, the governing body or other designated officer under the contract or arrangement to raze the building may sell the salvage and valuable materials at the highest price obtainable. The net proceeds of the sale, after deducting the expenses of razing the building, shall be promptly remitted to the circuit court with a report of the sale or transaction, including the items of expense and the amounts deducted, for the use of any person entitled to the net proceeds, subject to the order of the court. If there remains no surplus to be turned over to the court, the report shall so state.

(k) *Public nuisance procedure.* A building which is determined under par. (b) 1. to be old, dilapidated or out of repair and consequently dangerous, unsafe, unsanitary or otherwise unfit for human habitation and unreasonable to repair may be proceeded against as a public nuisance under ch. 823.

(L) *Effect of subsection.* 1. Acts of municipal authorities under this subsection do not increase the liability of an insurer.

2. This section does not limit powers otherwise granted to municipalities by other laws of this state.

(2) Razing building that is a public nuisance; in rem procedure. (a) *Definitions.* In this subsection:

1. “Building” means a building, dwelling or structure.

2. “Public nuisance” means a building that, as a result of vandalism or any other reason, has deteriorated or is dilapidated or blighted to the extent that windows, doors or other openings, plumbing or heating fixtures, or facilities or appurtenances of the building are damaged, destroyed or removed so that the building offends the aesthetic character of the immediate neighborhood and produces blight or deterioration.

3. “Raze a building” means to demolish and remove the building and to restore the site to a dust-free and erosion-free condition.

(b) *Notification of nuisance.* If the owner of a building in a city, village or town permits the building to become a public nuisance, the building inspector or other designated officer of the city, village or town shall issue a written notice of the defect that makes the building a public nuisance. The written notice shall be served on the owner of the building as provided under sub. (1)(d) and shall direct the owner to remedy the defect within 30 days following service.

(c) *Failure to remedy; court order to remedy or raze.* 1. If an owner fails to remedy or improve the defect in accordance with the written notice under par. (b) within the 30-day period specified in the written notice, the building inspector or other designated

officer shall apply to the circuit court of the county in which the building is located for an order determining that the building constitutes a public nuisance. As a part of the application for the order from the circuit court the building inspector or other designated officer shall file a verified petition which recites the giving of written notice, the defect in the building, the owner's failure to comply with the notice and other pertinent facts. A copy of the petition shall be served upon the owner of record or the owner's agent if an agent is in charge of the building and upon the holder of any encumbrance of record under sub. (1)(d). The owner shall reply to the petition within 20 days following service upon the owner. Upon application by the building inspector or other designated officer the circuit court shall set promptly the petition for hearing. Testimony shall be taken by the circuit court with respect to the allegations of the petition and denials contained in the verified answer. If the circuit court after hearing the evidence on the petition and answer determines that the building constitutes a public nuisance, the court shall issue promptly an order directing the owner of the building to remedy the defect and to make such repairs and alterations as may be required. The court shall set a reasonable period of time in which the defect shall be remedied and the repairs or alterations completed. A copy of the order shall be served upon the owner as provided in sub. (1)(d). The order of the circuit court shall state in the alternative that if the order of the court is not complied with within the time fixed by the court, the court will appoint a receiver or authorize the building inspector or other designated officer to proceed to raze the building under par. (d).

2. In an action under this subsection, the circuit court before which the action is commenced shall exercise jurisdiction in rem or quasi in rem over the property that is the subject of the action. The owner of record of the property, if known, and all other persons of record holding or claiming any interest in the property shall be made parties defendant, and service of process may be made upon them.

3. It is not a defense to an action under this subsection that the owner of record of the property is a different person or entity than the owner of record of the property on or after the date the action was commenced if a lis pendens was filed before the change of ownership.

(d) *Failure to comply with court order.* If the order of the circuit court under par. (c) is not complied with within the time fixed by the court under par. (c), the court shall authorize the building inspector or other designated officer to raze the building or shall appoint a disinterested person to act as receiver of the property to do either of the following within a reasonable period of time set by the court:

1. Remedy the defect and make any repairs and alterations necessary to meet the standards required by the building code or any health order. A receiver appointed under this subdivision, with the approval of the circuit court, may borrow money against and mortgage the property held in receivership as security in any amount necessary to remedy the defect and make the repairs and alterations. For the expenses incurred to remedy the defect and make the repairs and alterations necessary under this subdivision, the receiver has a lien upon the property. At the request of and with the approval of the owner, the receiver may sell the property at a price equal to at least the appraised value of the property plus the cost of any repairs made under this subdivision. The selling owner is liable for those costs.

2. Secure and sell the building to a buyer who demonstrates to the circuit court an ability and intent to rehabilitate the building and to have the building reoccupied in a legal manner.

(e) *Receiver; order to raze.* 1. A receiver appointed under par. (d) shall collect all rents and profits accruing from the property held in receivership and pay all costs of management, including all general and special real estate taxes or assessments and interest payments on first mortgages on the property. A receiver under par. (d) shall apply moneys received from the sale of property held in receivership to pay all debts due on the property in the order set by law and shall pay any balance to the selling owner if the circuit court approves.

2. The circuit court shall set the fees and bond of a receiver appointed under par. (d) and may discharge the receiver as the court considers appropriate.

3. Nothing in this subsection relieves the owner of property for which a receiver has been appointed under par. (d) from any civil or criminal responsibility or liability except that the receiver has civil and criminal responsibility and liability for all matters and acts directly under the receiver's authority or performed at his or her discretion.

4. If a defect is not remedied and repairs and alterations are not made within the time limit set by the circuit court under par. (d), the court shall order that the building inspector or other designated officer proceed to raze the building.

5. All costs and disbursements to raze a building under this subsection shall be as provided under sub. (1)(f).

(3) Razing historic buildings. (a) In this subsection:

1. “Cost of repairs” includes the estimated cost of repairs that are necessary to comply with applicable building codes, or other ordinances or regulations, governing the repair or renovation of a historic building.

1m. “Historic building” means any building or object listed on, or any building or object within and contributing to a historic district listed on, the national register of historic places in Wisconsin, the state register of historic places or a list of historic places maintained by a municipality.

2. “Municipality” means a city, village, county or town.

(b) The state historical society shall notify a municipality of any historic building located in the municipality. If a historic district lies within a municipality, the historical society shall furnish to the municipality a map delineating the boundaries of the district.

(c) If an order is issued under this section to raze and remove a historic building and restore the site to a dust-free and erosion-free condition, an application is made for a permit to raze and remove a historic building and restore the site to a dust-free and erosion-free condition or a municipality intends to raze and remove a municipally owned historic building and restore the site to a dust-free and erosion-free condition, the municipality in which the historic building is located shall notify the state historical society of the order, application or intent. No historic building may be razed and removed nor the site restored to a dust-free and erosion-free condition for 30 days after the notice is given, unless a shorter period is authorized by the state historical society. If the state historical society authorizes a shorter period, however, such a period shall be subject to any applicable local ordinance. During the 30-day period, the state historical society shall have access to the historic building to create or preserve a historic record. If the state historical society completes its creation or preservation of a historic record, or decides not to create or preserve a historic record, before the end of the 30-day period, the society may waive its right to access the building and may authorize the person who intends to raze and remove the building, and restore the site to a dust-free and erosion-free condition, to proceed before the end of such period, except that such a person shall be subject to any applicable local ordinance.

(d) If a municipal governing body, inspector of buildings or designated officer determines that the cost of repairs to a historic building would be less than 85 percent of the assessed value of the building divided by the ratio of the assessed value to the recommended value as last published by the department of revenue for the municipality within which the historic building is located, the repairs are presumed reasonable.

(4) First class cities; other provisions. (a) First class cities may adopt by ordinance alternate or additional provisions governing the placarding, closing, razing and removal of a building and the restoration of the site to a dust-free and erosion-free condition.

(b) This subsection shall be liberally construed to provide 1st class cities with the largest possible power and leeway of action.

(5) Razing certain insured dwellings. (a) *Definitions*. In this subsection:

1. "Cost of repairs" includes the estimated cost of repairs that are necessary to comply with applicable building codes, or other ordinances or regulations, governing the repair or renovation of a dwelling.

2. "Covered damage" means damage that is covered by an insurance policy.

3. "Insured dwelling" means real property that is covered under an insurance policy and that is owned, occupied, and used primarily as a dwelling by the insured.

(b) *Insurer certification*. 1. No later than 14 days after real property has incurred damage, an insurer may provide a written certification through 1st class mail or electronic communication to a governing body, building inspector, or other designated officer of a municipality stating all of the following:

a. That the insurer reasonably believes the real property may qualify as an insured dwelling.

b. That the property owner or an insured has filed a claim for covered damage with the insurer or the insurer has reason to believe the property owner or an insured will file a claim for covered damage with the insurer.

c. That the insurer reasonably believes the claim may qualify as covered damage.

d. The date of damage to the insured dwelling, the insurance policy limits of the insured dwelling, the insurer's designated representative for the filed or anticipated claim, and the designated representative's mailing address, electronic mail address, and phone number.

2. A certification under this paragraph does not waive or limit any rights of the insurer under an insurance policy.

3. At any point prior to submitting a certification under subd. 1., an insurer may notify a governing body, building inspector, or other designated officer of a municipality that the insurer has determined the insured dwelling to be wholly destroyed. If at any point after submitting a certification under subd. 1. the insurer determines that the insured dwelling is wholly destroyed, the insurer shall notify the governing body, building inspector, or other designated officer of that determination.

(c) *Municipal assessment*. A governing body, building inspector, or other designated officer of a municipality may not issue a raze order under sub. (1)(b) for an insured dwelling for which an insurer has provided a certification under par. (b) unless the governing body, building inspector, or other designated officer does all of the following:

1. Provides notice of intent to issue a raze order to the owner of record of the insured dwelling, the holder of any encumbrance on the insured dwelling, and the insurer of the insured dwelling. The notice shall include a statement that materials may be submitted to the governing body, building inspector, or other designated officer under subd. 2. Notice under this subdivision shall be served in the manner provided under sub. (1)(d).

2. Accepts and considers materials that are submitted by any person entitled to notice under subd. 1., that assist in establishing the extent of the damage or the reasonable cost of repairs to the insured dwelling, and that are received within 30 days after provision of the notice under subd. 1. Materials that may be accepted and considered under this subdivision are limited to

damage estimates, evaluations of the cost of repairs, and the results of inspections of the property. When considering the materials submitted under this subdivision, the governing body, building inspector, or other designated officer shall consider the qualifications, expertise, and experience of the person that submitted the materials.

3. Conducts an on-site inspection of the insured dwelling to assess the extent of the damage.

4. Determines the estimated cost of repairs for the insured dwelling.

5. Determines that repair of the insured dwelling is not reasonable.

(d) *Cost of repair*. A municipal governing body, building inspector, or other designated officer of a municipality shall base its determination of the estimated cost of repairs for the insured dwelling under par. (c)4. on the materials accepted under par. (c)2. and similar materials produced by the municipal governing body, building inspector, or designated officer.

(e) *Reasonableness of repair*. If a municipal governing body, building inspector, or other designated officer of a municipality determines that the estimated cost of repairs of an insured dwelling does not exceed 70 percent of the insurance policy limits of the insured dwelling, the repairs are presumed reasonable.

(f) *Repair orders*. Nothing in this subsection shall preclude the governing body, building inspector, or other designated officer of a municipality from ordering the owner of an insured dwelling to make the building safe and sanitary under sub. (1)(b).

(g) *Application*. This subsection does not apply to any of the following:

1. A dwelling that the governing body, building inspector, or other designated officer of a municipality has determined to be in imminent danger of structural collapse and for which the property owner has failed to appropriately secure and limit access.

2. An insured dwelling that is the subject of a notification provided to the governing body, building inspector, or other designated officer of a municipality by an insurer pursuant to par. (b)3.

W. S. A. 66.0413, WI ST 66.0413
Current through 2023 Act 272, published April 10, 2024.

End of Document

W.S.A. 66.0414

66.0414 Small wireless facilities

Currentness

(1) Definitions. In this section:

(a) "Antenna" means communications equipment that transmits and receives electromagnetic radio signals and is used in the provision of wireless services.

(b) "Antenna equipment" or "wireless equipment" means equipment, switches, wiring, cabling, power sources, shelters, or cabinets associated with an antenna, located at the same fixed location as the antenna, and, when collocated on a structure, is mounted or installed at the same time as such antenna.

(c) "Antenna facility" means an antenna and associated antenna equipment, including ground-mounted antenna equipment.

(d) "Applicable codes" means the state electrical wiring code, as defined in s. 101.80(4), the state plumbing code promulgated under s. 145.02(2)(a), the fire prevention code under ch. SPS 314, Wis. Adm. Code, the Wisconsin commercial building code under chs. SPS 361 to 366, Wis. Adm. Code, the Wisconsin uniform dwelling code under chs. SPS 320 to 325, Wis. Adm. Code, and local amendments to those codes enacted solely to address imminent threats of destruction of property or injury to persons.

(e) "Applicant" means a wireless provider that submits an application.

(f) "Application" means an application for a permit under this section to collocate a small wireless facility or to install, modify, or replace a utility pole.

(g) "Collocate," "collocate on," or "collocation" means the placement, mounting, replacement, modification, operation, or maintenance of a small wireless facility on, or of ground-mounted antenna equipment adjacent to, a structure.

(h) "Communications facilities" means the set of equipment and network components, including wires and cables and associated facilities, used by a communications service provider to provide communications service.

(i) "Communications network" means a network used to provide a communications service.

(j) “Communications service” means cable service, as defined in 47 USC 522(6), telecommunications service, as defined in 47 USC 153(53), information service, as defined in 47 USC 153(24), or wireless service.

(k) “Communications service provider” means a person that provides communications service.

(L) “Facility” means an antenna facility or a structure.

(m) “Fee” means a one-time charge.

(n) “Governmental pole” means a utility pole that is owned or operated by the state or by a political subdivision in a right-of-way.

(o) “Investor-owned electric utility” means a public utility whose purpose is the generation, transmission, delivery, or furnishing of electric power but does not include a public utility owned and operated wholly by a municipality or a cooperative association organized under ch. 185.

(p) “Micro wireless facility” means a small wireless facility that does not exceed 24 inches in length, 15 inches in width, and 12 inches in height and that has no exterior antenna longer than 11 inches.

(q) “Permit” means written authorization required by the state or a political subdivision to perform an action, or initiate, continue, or complete a project.

(r) “Political subdivision” means any city, village, town, or county.

(s) “Rate” means a recurring charge.

(t) “Right-of-way” means the area on, below, or above a highway, as defined in s. 340.01(22), other than a federal interstate highway; sidewalk; utility easement, other than a utility easement for a cooperative association organized under ch. 185 for purposes of providing or furnishing heat, light, power, or water to its members only; or other similar property, including property owned or controlled by the department of transportation.

(u) “Small wireless facility” means a wireless facility to which all of the following apply:

1. The wireless facility satisfies any of the following:

a. The wireless facility is mounted on a structure 50 feet or less in height including any antenna.

b. The wireless facility is mounted on a structure no more than 10 percent taller than any other adjacent structure.

c. The wireless facility does not increase the height of an existing structure on which the wireless facility is located to a height of more than 50 feet or by 10 percent, whichever is greater.

2. Each antenna associated with the deployment of the wireless facility, excluding associated antenna equipment, is no more than 3 cubic feet in volume.

3. All other wireless equipment associated with the wireless facility specified in subd. 1., including the wireless equipment associated with the antenna and any preexisting associated equipment on the structure, is no more than 28 cubic feet in volume.

4. The wireless facility does not require registration as an antenna structure under 47 CFR part 17.

5. The wireless facility is not located on tribal land, as defined in 36 CFR 800.16(x).

6. The wireless facility does not result in human exposure to radio frequency in excess of the applicable safety standards specified in 47 CFR 1.1307.

(v) Except in par. (zp), "structure" means a utility pole or wireless support structure, whether or not it has an existing antenna facility.

(w) "Technically feasible" means that by virtue of engineering or spectrum usage the proposed placement for a small wireless facility, or its design, concealment measures, or site location can be implemented without a reduction in the functionality of the small wireless facility.

(x) "Utility pole" means a pole that is used in whole or in part by a communications service provider; used for electric distribution, lighting, traffic control, signage, or a similar function; or used for the collocation of small wireless facilities. "Utility pole" does not include a wireless support structure or electric transmission structure.

(y) "Utility pole for designated services" means a utility pole owned or operated in a right-of-way by the state, a political subdivision, or a utility district that is designed to, or used to, carry electric distribution lines, or cables or wires for telecommunications, cable, or electric service.

(z)1. "Wireless facility" means an antenna facility at a fixed location that enables wireless services between user equipment and a communications network, and includes all of the following:

a. Equipment associated with wireless services.

b. Radio transceivers, antennas, or coaxial, metallic, or fiber-optic cable located on, in, under, or otherwise adjacent to a utility pole or wireless support structure.

c. Regular and backup power supplies.

d. Equipment that is comparable to equipment specified in this subdivision regardless of technical configuration.

2. “Wireless facility” does not include any of the following:

a. The structure or improvements on, under, or within which equipment specified in subd. 1. is collocated.

b. Wireline backhaul facilities.

c. Coaxial, metallic, or fiber-optic cable that is between utility poles or wireless support structures or that is not adjacent to a particular antenna.

(za) “Wireless infrastructure provider” means any person, other than a wireless services provider, that builds or installs wireless communication transmission equipment, antenna equipment, or wireless support structures.

(zc) “Wireless provider” means a wireless infrastructure provider or a wireless services provider.

(zg) “Wireless services” means any service using licensed or unlicensed wireless spectrum, including the use of a Wi-Fi network, whether at a fixed location or by means of a mobile device.

(zL) “Wireless services provider” means any person who provides wireless services.

(zp) “Wireless support structure” means an existing freestanding structure that is capable of supporting small wireless facilities, except that “wireless support structure” does not include any of the following:

1. A utility pole.

2. A structure designed solely for the collocation of small wireless facilities.

(zt) “Wireline backhaul facility” means a facility for providing wireline backhaul service.

(zx) “Wireline backhaul service” means the transport of communications services by wire from small wireless facilities to a communications network.

(2) Rights-of-way. (a) *Applicability*. This subsection applies only to the activities of a wireless provider within a right-of-way.

(b) *Exclusive use prohibited*. Neither the state nor a political subdivision may enter into an exclusive arrangement with any person for the use of a right-of-way for the construction, operation, marketing, maintenance, or collocation of small wireless facilities or wireless support structures.

(c) *Rates and fees*. Subject to sub. (3)(e)3., the state or a political subdivision may charge a wireless provider a nondiscriminatory rate or fee for the use of a right-of-way with respect to the collocation of a small wireless facility or the installation, modification, or replacement of a utility pole in the right-of-way only if the state or political subdivision charges other entities for the use of the right-of-way. If the state or a political subdivision charges a wireless provider a rate or fee as described in this paragraph, all of the following apply:

1. Subject to subd. 5., the fee or rate must be limited to no more than the direct and actual cost of managing the right-of-way.

2. Except as provided in par. (d), the fee or rate must be competitively neutral with regard to other users of the right-of-way.

3. The fee or rate may not result in a double recovery by the state or political subdivision if existing fees, rates, or taxes imposed by a political subdivision on the wireless provider already recover the direct and actual cost of managing the right-of-way.

4. The fee or rate may not be in the form of a franchise or other fee based on revenue or customer counts.

5. The fee or rate may not exceed an annual amount equal to $20 multiplied by the number of small wireless facilities in the right-of-way in the state's or political subdivision's geographic jurisdiction.

6. Beginning on July 12, 2019, the state or a political subdivision may adjust a rate or fee allowed under this paragraph by 10 percent every 5 years, rounded to the nearest dollar. During each 5-year period, the adjustment may be applied incrementally or as a single adjustment.

(d) *Rate or fee adjustment*. 1. Except as provided in subd. 2., by the later of October 1, 2019, or 3 months after receiving its first request for access to the right-of-way by a wireless provider, the state or a political subdivision shall implement rates, fees, and terms for such access that comply with this subsection.

2. Agreements between a wireless provider and the state or a political subdivision that are in effect on July 12, 2019, and that relate to access to the right-of-way, remain in effect, subject to applicable termination provisions, except that by August 1, 2021, the state or political subdivision shall amend any such agreement to comply with the rates, fees, and terms required under this subsection.

(e) *Right of access*. 1. Except as otherwise provided in this subsection and subs. (3)(c)4. and 5. and (4), and notwithstanding ss. 182.017 and 196.58 and any zoning ordinance enacted by a political subdivision under s. 59.69, 60.61, 60.62, or 62.23, a wireless provider shall have the right to collocate small wireless facilities and construct, modify, maintain, and replace its own utility poles, or, with the permission of the owner, a 3rd party's utility pole, that supports small wireless facilities along, across, upon, and under a right-of-way. Such small wireless facilities and utility poles, and activities related to the installation and maintenance of the small wireless facilities and utility poles, may not obstruct or hinder travel, drainage, maintenance, or

the public health, safety, and general welfare on or around the right-of-way, or obstruct the legal use of the right-of-way for other communications providers, public utilities, cooperative associations organized under ch. 185 for the purpose of producing or furnishing heat, light, power, or water to their members only, or pipes or pipelines transmitting liquid manure. A political subdivision may enact an ordinance consistent with this subdivision.

2. Except as provided in subd. 4., the height of a utility pole installed, or modified, in a right-of-way may not exceed the greater of:

a. A height that is 10 percent taller than the tallest existing utility pole as of July 12, 2019, that is located within 500 feet of the new or modified utility pole in the same right-of-way.

b. Fifty feet above ground level.

3. The height of a small wireless facility installed, or modified, in a right-of-way may not exceed the greater of:

a. A height that is 10 percent taller than the existing utility pole or wireless support structure on which the small wireless facility is located.

b. Fifty feet above ground level.

4. A wireless provider may construct, modify, and maintain a utility pole, wireless support structure, or small wireless facility along, across, upon, and under a right-of-way that exceeds the height limits in this paragraph if the wireless provider complies with height limits under the zoning ordinances enacted by a political subdivision under s. 59.69, 60.61, 60.62, or 62.23.

5. With regard to the rights of a wireless provider to construct or modify a utility pole as described in subd. 1., a political subdivision may propose an alternate location for collocation, which the wireless provider shall use if it has the right to use the alternate structure on reasonable terms and conditions and the alternate location is technically feasible and does not impose material additional costs.

(f) *Damage and repair*. The state or a political subdivision may require a wireless provider to repair all damage that is directly caused by the activities of the wireless provider in a right-of-way involving its small wireless facilities or structures, and to return the right-of-way to its former condition before it was so damaged. If the wireless provider fails to make the required repairs within a reasonable amount of time after receiving a written request to do so from the state or a political subdivision, the state or political subdivision may make the necessary repairs and charge the liable party for the cost of the repairs. This paragraph does not prohibit a political subdivision from recovering damages under s. 86.02.

(g) *Nondiscrimination*. The state and political subdivisions must administer and regulate a right-of-way in a competitively neutral manner with regard to all users of the right-of-way.

(3) Permitting process. (a) *Applicability*. This subsection applies to the permitting for the collocation of small wireless facilities by a wireless provider within and outside a right-of-way and to the permitting for the installation, modification, and replacement

of associated utility poles by a wireless provider inside a right-of-way. Except as provided in this subsection and in subs. (2) and (4), neither the state nor a political subdivision may prohibit, regulate, or charge any person for the collocation of small wireless facilities.

(b) *Zoning*. Notwithstanding an ordinance enacted under s. 59.69, 60.61, 60.62, or 62.23, and except as provided in par. (c)4. and 5., small wireless facilities shall be classified as permitted uses and are not subject to a political subdivision's zoning ordinances if they are collocated in a right-of-way or outside a right-of-way if the property is not zoned exclusively for single-family residential use. For purposes of this paragraph and notwithstanding sub. (1)(u)3., the volume of a small wireless facility does not include preexisting associated wireless equipment on a structure outside the right-of-way.

(c) *Permits*. 1. Subject to subds. 4. and 5., the state or a political subdivision may require an application for a permit to collocate a small wireless facility and to construct, modify, maintain, or operate a new or replacement utility pole, provided such permit is of general applicability and does not apply exclusively to small wireless facilities. All of the following apply to such permit applications filed by an applicant:

a. Neither the state nor a political subdivision may require an applicant to perform services unrelated to the approval sought.

b. Neither the state nor a political subdivision may require an applicant that is a wireless provider to provide more information in its permit application than such a governmental unit requires from a communications service provider that is not a wireless provider and that applies for the same type of permit. The state or a political subdivision may require the types of information specified in subd. 2. in an application.

c. The state or a political subdivision shall notify an applicant in writing, within 10 days of receiving an application, whether it is complete. If an application is incomplete, the state or political subdivision shall specify why the application is incomplete. The processing deadlines under subd. 1. d., e., and f. restart at zero on the date that the applicant submits to the state or a political subdivision an application that includes information identified by the state or political subdivision to render the application complete.

d. Except as provided in subd. 1. g., if a permit application involves a new or replacement utility pole, and the state or a political subdivision fails to approve or deny the permit application under this section not later than 90 days after its receipt, the applicant may consider its permit application approved.

e. Except as provided in subd. 1. g., if a permit application proposes to collocate small wireless facilities on an existing structure and the state or a political subdivision fails to approve or deny the permit application under this section not later than 60 days after its receipt, the applicant may consider its permit application approved.

f. Except as provided in subd. 1. g., if there is any type of construction, building, or encroachment permit required by a political subdivision that relates to a permit under subd. 1. d. or e., and the political subdivision fails to approve or deny that permit application within the specified 60-day or 90-day time frame, the applicant may consider its permit application approved.

g. The applicant and the state or political subdivision may mutually agree to extend the deadline for the state or political subdivision to approve or deny a permit application under subd. 1. d., e., or f.

h. Subject to subd. 1. i., the state or a political subdivision shall approve a permit application unless it does not meet the applicable codes, sub. (2)(e)1., or the standards of an ordinance enacted pursuant to sub. (2)(e)1. If the permit application is denied for any of these reasons, the state or political subdivision shall provide the applicant with written documentation explaining the basis for the denial no later than the date that the permit application is denied. An applicant may cure the deficiencies identified in the documentation and resubmit the permit application no later than 30 days after receipt of the documentation without being required to pay an additional application fee. The state or a political subdivision shall approve or deny the revised permit application not later than 30 days after its receipt.

i. The state or a political subdivision may condition approval of a permit on compliance with reasonable and nondiscriminatory relocation, abandonment, or bonding requirements that are consistent with state law applicable to other occupiers of rights-of-way.

j. An applicant may file a consolidated permit application to collocate up to 30 small wireless facilities, or a greater number if agreed to by a political subdivision, provided that all the small wireless facilities in the application consist of substantially similar equipment and are to be placed on similar types of structures. In rendering a decision on a consolidated permit application, a political subdivision may approve a permit for some small wireless facilities and deny a permit for others, but the political subdivision may not use the denial of one or more permits as a basis to deny permits for all of the small wireless facilities in the application.

k. If an applicant's permit application is approved, the applicant shall commence the activity authorized by the permit no later than 365 days after its receipt and shall pursue work on the activity until completion. Neither the state nor a political subdivision may place any time limitation on an applicant that is related to the permit. An applicant may request that the state or a political subdivision terminate the applicant's permit.

2. The state or a political subdivision may require any of the following types of information in an application for a permit specified in subd. 1. (intro.):

a. The applicant's name, address, telephone number, e-mail address, and emergency contact information.

b. The names, addresses, telephone numbers, and e-mail addresses of all duly authorized representatives and consultants, if any, acting on behalf of the applicant with respect to the filing of the application.

c. A general description of the proposed small wireless facility and associated utility pole, if applicable. The scope and detail of such description shall be appropriate to the nature and character of the work to be performed, with special emphasis on those matters likely to be affected or impacted by the physical work proposed.

d. Site plans and detailed construction drawings to scale that identify the proposed small wireless facility and the proposed use of the right-of-way.

e. To the extent the proposed facility involves collocation on a new utility pole, existing utility pole, or existing wireless support structure, a structural report performed by a duly licensed engineer evidencing that the utility pole or wireless support structure

will structurally support the collocation, or that the utility pole or wireless support structure may and will be modified to meet structural requirements, in accordance with applicable codes.

f. If the small wireless facility will be collocated on a utility pole or wireless support structure owned by a 3rd party, other than a governmental pole or a utility pole for designated services, a certification that the wireless provider has permission from the owner to collocate on the utility pole or wireless support structure.

g. Certification by the wireless provider that the small wireless facility will comply with relevant federal communications commission regulations concerning 1) radio frequency emissions from radio transmitters and 2) unacceptable interference with public safety spectrum, including compliance with the abatement and resolution procedures for interference with public safety spectrum established by the federal communications commission set forth in 47 CFR 22.970 to 22.973 and 47 CFR 90.672 to 90.675.

h. Certification by the wireless provider that the small wireless facility will not materially interfere with any of the following: 1) the safe operation of traffic control equipment; 2) sight lines or clear zones for transportation or pedestrians; and 3) the federal Americans with Disabilities Act or similar federal or state standards regarding pedestrian access or movement.

i. A statement that the small wireless facility shall comply with all applicable codes.

3. Neither the state nor a political subdivision may institute an express or de facto moratorium on any of the following:

a. The filing, receiving, or processing of applications.

b. The issuance of permits or other approvals, if any, for the collocation of small wireless facilities or the installation, modification, or replacement of utility poles to support small wireless facilities.

4. A political subdivision may adopt aesthetic requirements governing the deployment of small wireless facilities and associated antenna equipment and utility poles in the right-of-way, subject to the following conditions:

a. The aesthetic requirements must be 1) reasonable in that they are technically feasible and reasonably directed to avoiding or remedying unsightly or out-of-character deployments; 2) no more burdensome than those applied to other types of infrastructure deployments; and 3) objective and published in advance.

b. Any design or concealment measures are not considered a part of the small wireless facility for purpose of the size parameters in the definition of a small wireless facility under sub. (1)(u).

c. A political subdivision may deny an application for not complying with aesthetic requirements only if the denial does not prohibit or have the effect of prohibiting the provision of wireless service.

5. A political subdivision may enact an ordinance to prohibit, in a nondiscriminatory way, a communications service provider from installing structures in the right-of-way of a historic district or an underground district, except that the ordinance may not

prohibit collocations or the replacement of existing structures. In this subdivision, a historic district is an area designated as historic by the political subdivision, listed on the national register of historic places in Wisconsin, or listed on the state register of historic places. In this subdivision, an underground district is an area designated by the political subdivision in which all pipes, pipelines, ducts, wires, lines, conduits, or other equipment, which are used for the transmission, distribution, or delivery of electrical power, heat, water, gas, sewer, or telecommunications equipment, are located underground. A political subdivision may require any collocation on or replacement of an existing structure to reasonably conform to the design aesthetics of the original structure in a historic or underground district. Any design or concealment measures are not considered a part of the small wireless facility for purposes of the size restrictions in the definition of "small wireless facility" under sub. (1)(u). The requirements of an ordinance enacted under this subdivision must be objective, technically feasible, no more burdensome than requirements applied to other types of infrastructure deployment, and reasonably directed at avoiding or remedying the intangible public harm of unsightly or out-of-character deployments. A political subdivision may not apply any requirements under an ordinance enacted under this subdivision in a manner that results in an effective prohibition of wireless service.

(d) *Application fees*. 1. Except as provided in subd. 2., the state or a political subdivision may only charge an application fee that is reasonable, nondiscriminatory, and recovers no more than a governmental unit's direct cost for processing an application, except that no application fee may exceed any of the following:

a. For an application that includes 5 or fewer small wireless facilities, $500.

b. For an application that includes more than 5 small wireless facilities, $500 plus $100 for each small wireless facility in excess of 5.

c. One thousand dollars for the installation or replacement of a utility pole together with the collocation of an associated small wireless facility.

2. Beginning on July 12, 2019, the state or a political subdivision may adjust a fee allowed under subd. 1. by 10 percent every 5 years, rounded to the nearest multiple of $5. During each 5-year period, the adjustment may be applied incrementally or as a single adjustment.

3. If the federal communications commission adjusts its levels for fees that are presumptively lawful under 47 USC 253 or 332(c)(7), the state or a political subdivision may adjust any impacted fee under subd. 1. on a pro rata basis, consistent with the federal communications commission's action.

(e) *Approvals not required*. Neither the state nor a political subdivision may require applications, permits, fees, or any other approval for any of the following:

1. Routine maintenance.

2. The replacement of a small wireless facility with a small wireless facility that is substantially similar to, or the same size or smaller than, the existing small wireless facility, except that the governmental unit may require the person seeking to replace the small wireless facility to obtain a permit to work within a right-of-way to complete such a replacement. For purposes of this subdivision, a small wireless facility does not include the structure on which it is collocated.

3. The installation, placement, maintenance, operation, or replacement of micro wireless facilities that are strung on cables between existing utility poles in compliance with the National Electrical Safety Code.

(f) *Traffic work permits*. Nothing in this section prohibits a political subdivision from requiring a work permit for work that will unreasonably affect traffic patterns or obstruct vehicular traffic in a right-of-way, provided that such permits are issued to any applicant on a nondiscriminatory basis upon terms and conditions that apply to the activities of any other person performing work in the right-of-way that requires excavation or the closing of sidewalks or traffic lanes.

(4) Collocation of small wireless facilities on governmental poles and utility poles for designated services. (a) A person owning or controlling a governmental pole or a utility pole for designated services may not enter into an exclusive arrangement with any person for the right to attach to, or use, such poles.

(b) The fees or rates charged by the owner of a pole described under par. (a), and the terms and conditions for such attachment or use, may not be discriminatory.

(c) The rate a political subdivision may charge a wireless provider to collocate a small wireless facility on a utility pole for designated services shall be governed by an agreement between the political subdivision and the wireless provider. If there is a failure to agree on the rate, the public service commission shall determine the compensation pursuant to the procedures in s. 196.04 and the determination shall be reviewable under s. 196.41.

(d)1. The rate an owner of a governmental pole other than a utility pole for designated services charges another person to collocate on the owner's pole shall be sufficient to recover the actual, direct, and reasonable costs related to the applicant's application for, and use of, space on the pole, except that subject to subd. 2., the total annual rate for a collocation and any related activities may not exceed the lesser of the actual, direct, and reasonable costs related to the collocation or $250 per year per small wireless facility. If a dispute arises concerning the appropriateness of a rate charged by the state or political subdivision under this subdivision, the governmental unit bears the burden of proving that the rate is reasonably related to the actual, direct, and reasonable costs incurred by the governmental unit.

2. Beginning on July 12, 2019, the owner of a governmental pole other than a utility pole for designated services may adjust a rate allowed under subd. 1. by 10 percent every 5 years, rounded to the nearest multiple of $5. During each 5-year period, the adjustment may be applied incrementally or as a single adjustment.

3. If the federal communications commission adjusts its levels for rates that are presumptively lawful under 47 USC 253 or 332(c)(7), the state or a political subdivision may adjust any impacted rate under subd. 1. on a pro rata basis, consistent with the federal communications commission's action.

(e)1. Except as provided in subd. 2., by the later of October 1, 2019, or 3 months after receiving its first request to collocate a small wireless facility on a governmental pole, other than a utility pole for designated services, the state or a political subdivision shall implement rates, fees, and terms for the collocation of small wireless facilities on governmental poles that comply with this subsection.

2. Agreements between a wireless provider and the state or a political subdivision that are in effect on July 12, 2019, and that relate to the collocation of small wireless facilities in the right-of-way, including the collocation of small wireless facilities on governmental poles, remain in effect, subject to applicable termination provisions, except that by August 1, 2021, the state or political subdivision shall amend any such agreement to comply with the rates, fees, and terms required under this subsection.

(f) With regard to a governmental pole that supports aerial cables used for video, communications, or electric service, and with regard to utility poles for designated services, the parties shall comply with the process for make-ready work under 47 USC 224 and its implementing regulations, including 47 CFR 1.1420 and 1.1422. The good faith estimate of the person owning or controlling such poles for any make-ready work necessary to enable the pole to support the requested collocation must include pole replacement if necessary.

(g) With regard to a governmental pole that does not support aerial cables used for video, communications, or electric service, the state or political subdivision shall provide a good faith estimate for any make-ready work necessary to enable the pole to support the requested collocation, including pole replacement if necessary, not later than 60 days beginning after receipt of a complete application, except that the governmental unit may provide the applicant with access to the governmental pole that is necessary for the applicant to make that estimate. Make-ready work, including any pole replacement, must be completed within 60 days after the applicant's written acceptance of a good faith estimate provided by the governmental unit or within 60 days after the applicant makes the estimate.

(h) A person owning or controlling a governmental pole other than a utility pole for designated services may not require more make-ready work than required to meet applicable codes or industry standards. Fees for make-ready work may not include any costs that are related to preexisting conditions, prior damage, or noncompliance with currently applicable standards. Fees for make-ready work, including any pole replacement, may not exceed actual costs or the amount charged to other communications service providers for similar work, and may not include any consultant fees or expenses.

(5) Dispute resolution. Except as provided in sub. (4)(c), and notwithstanding ss. 182.017(8)(a) and 196.58(4)(a), a court of competent jurisdiction shall determine all disputes arising under this section. Unless otherwise agreed to by the parties to a dispute, and pending resolution of a right-of-way access rate dispute, a political subdivision controlling access to and use of a right-of-way shall allow the placement of a small wireless facility or utility pole at a temporary rate of one-half of the political subdivision's proposed annual rate, or $20, whichever is less. Rates shall be reconciled and adjusted upon final resolution of the dispute. Pending the resolution of a dispute concerning rates for collocation of small wireless facilities on governmental poles or utility poles for designated services, the person owning or controlling the pole shall allow the collocating person to collocate on its poles, at annual rates of no more than $20 per year per pole, with rates to be reconciled and adjusted upon final resolution of the dispute.

(6) Indemnification. A wireless provider shall indemnify and hold harmless a political subdivision against any and all liability and loss from personal injury or property damage resulting from or arising out of, in whole or in part, the use or occupancy of rights-of-way by the wireless provider or its employees, agents, or contractors arising out of the rights and privileges granted under this section. A wireless provider has no obligation to indemnify or hold harmless against any liabilities and losses as may be due to or caused by the sole negligence of the political subdivision or its employees or agents.

(7) Federal law; contracts. Nothing in this section adds to, replaces, or supersedes federal laws regarding utility poles owned by investor-owned electric utilities nor shall this section impose or otherwise affect any rights, controls, or contractual obligations investor-owned electric utilities may establish with respect to their utility poles.

(8) Private property owners. Nothing in this section is intended to authorize a person to place, maintain, modify, operate, or replace a privately owned utility pole or wireless support structure or to collocate small wireless facilities on a privately owned utility pole, a privately owned wireless support structure, or other private property without the consent of the property owner.

(9) Communications services. (a) This section may not be construed or interpreted to authorize any entity to provide communications service without compliance with all applicable laws or to authorize the collocation, installation, placement, operation, or maintenance of any communications facilities, including wireline backhaul facilities, other than small wireless facilities and associated utility poles.

(b) Except as it relates to small wireless facilities subject to the permit and fee requirements established under this section and except as otherwise authorized by federal or state law, a political subdivision may not do any of the following:

1. Adopt or enforce any regulation or requirement on the placement or operation of communications facilities in rights-of-way by a communications service provider authorized under federal, state, or local law to operate in rights-of-way.

2. Regulate any communications service.

3. Impose or collect any tax, fee, or other charge for the provision of additional communications services over a communications service provider's communications facilities in a right-of-way.

End of Document

W.S.A. 66.0415

66.0415. Offensive industry

Currentness

(1) Except as provided under s. 62.23 (7a)(am), the common council of a city or village board may direct the location, management and construction of, and license, regulate or prohibit, any industry, thing or place where any nauseous, offensive or unwholesome business is carried on, that is within the city or village or within 4 miles of the boundaries of the city or village, except that the Milwaukee, Menominee and Kinnickinnic rivers with their branches to the outer limits of the county of Milwaukee, and all canals connecting with these rivers, together with the lands adjacent to these rivers and canals or within 100 yards of them, are within the jurisdiction of the city of Milwaukee. A town board has the same powers as are provided in this section for cities and villages as to the area within the town that is not licensed, regulated or prohibited by a city or village under this section. A business that is conducted in violation of a city, village or town ordinance that is authorized under this section is a public nuisance. An action for the abatement or removal of the business or an injunction to prevent operation of the business may be brought and maintained by the common council or village or town board in the name of this state on the relation of the city, village or town as provided in ss. 823.01, 823.02 and 823.07, or as provided in s. 254.58. Section 97.42 does not limit the powers granted by this section. Section 95.72 does not limit the powers granted by this section to cities or villages but powers granted to towns by this section are limited by s. 95.72 and by any orders and rules promulgated under s. 95.72.

(2) To prevent nuisance, a city or village may, subject to the approval of the appropriate town board, by ordinance enact reasonable regulations governing areas where refuse, rubbish, ashes or garbage are dumped or accumulated in a town within one mile of the corporate limits of the city or village.

W.S.A. 66.0416

66.0416. Certain businesses operated by minors

Currentness

(1) In this section:

(a) "Political subdivision" means a city, village, town, or county.

(b) "Stand operated by a minor" means a stand or other location at which goods other than potentially hazardous food, as defined in s. 97.30(1)(bm), are sold in occasional sales, as defined in s. 77.51(9), directly to consumers; that operates on a temporary, occasional basis; and that is operated solely by a person or persons under the age of 18 on private property with the permission of the property owner.

(2) No political subdivision may do any of the following:

(a) Enact an ordinance or adopt a resolution that prohibits a stand operated by a minor.

(b) Require a license or permit for, or impose a fee, charge, or surcharge on, any stand operated by a minor.

(c) Require a license or permit for a business that is operated by a person under the age of 18 and that is operated only occasionally. This paragraph does not apply to a business at which potentially hazardous food, as defined in s. 97.30(1)(bm), is sold.

(3) If a political subdivision has enacted an ordinance or adopted a resolution before November 27, 2019, that is inconsistent with sub. (2)(a), the ordinance or resolution does not apply and may not be enforced.

W.S.A. 66.0417

66.0417. Local enforcement of certain food and health regulations

Currentness

(1) An employee or agent of a local health department designated by the department of agriculture, trade and consumer protection under s. 97.41 or 97.615(2) may enter, at reasonable hours, any premises for which the local health department issues a license under s. 97.41 or 97.615(2) to inspect the premises, secure samples or specimens, examine and copy relevant documents and records, or obtain photographic or other evidence needed to enforce ch. 97, relating to those premises. If samples of food are taken, the local health department shall pay or offer to pay the market value of those samples. The local health department or department of agriculture, trade and consumer protection shall examine the samples and specimens secured and shall conduct other inspections and examinations needed to determine whether there is a violation of ch. 97, rules adopted by the department under those statutes, ordinances adopted by the village, city or county or regulations adopted by the local board of health under s. 97.41(7) or 97.615.

(2)(a) Whenever, as a result of an examination, a village, city or county has reasonable cause to believe that any examined food constitutes, or that any construction, sanitary condition, operation or method of operation of the premises or equipment used on the premises creates an immediate danger to health, the administrator of the village, city or county agency responsible for the village's, city's or county's agent functions under s. 97.41 or 97.615(2) may issue a temporary order and cause it to be delivered to the licensee, or to the owner or custodian of the food, or to both. The order may prohibit the sale or movement of the food for any purpose, prohibit the continued operation or method of operation of specific equipment, require the premises to cease any other operation or method of operation which creates the immediate danger to health, or set forth any combination of these requirements. The administrator may order the cessation of all operations authorized by the license only if a more limited order does not remove the immediate danger to health. Except as provided in par. (c), no temporary order is effective for longer than 14 days from the time of its delivery, but a temporary order may be reissued for one additional 14-day period, if necessary to complete the analysis or examination of samples, specimens or other evidence.

(b) No food described in a temporary order issued and delivered under par. (a) may be sold or moved and no operation or method of operation prohibited by the temporary order may be resumed without the approval of the village, city or county, until the order has terminated or the time period specified in par. (a) has run out, whichever occurs first. If the village, city or county, upon completed analysis and examination, determines that the food, construction, sanitary condition, operation or method of operation of the premises or equipment does not constitute an immediate danger to health, the licensee, owner, or custodian of the food or premises shall be promptly notified in writing and the temporary order shall terminate upon his or her receipt of the written notice.

(c) If the analysis or examination shows that the food, construction, sanitary condition, operation or method of operation of the premises or equipment constitutes an immediate danger to health, the licensee, owner, or custodian shall be notified within the effective period of the temporary order issued under par. (a). Upon receipt of the notice, the temporary order remains in

effect until a final decision is issued under sub. (3), and no food described in the temporary order may be sold or moved and no operation or method of operation prohibited by the order may be resumed without the approval of the village, city or county.

(3) A notice issued under sub. (2)(c) shall be accompanied by notice of a hearing as provided in s. 68.11(1). The village, city or county shall hold a hearing no later than 15 days after the service of the notice, unless both parties agree to a later date. Notwithstanding s. 68.12, a final decision shall be issued under s. 68.12 within 10 days of the hearing. The decision may order the destruction of food, the diversion of food to uses which do not pose a danger to health, the modification of food so that it does not create a danger to health, changes to or replacement of equipment or construction, other changes in or cessations of any operation or method of operation of the equipment or premises, or any combination of these actions necessary to remove the danger to health. The decision may order the cessation of all operations authorized by the license only if a more limited order will not remove the immediate danger to health.

(4) A proceeding under this section, or the issuance of a license for the premises after notification of procedures under this section, does not constitute a waiver by the village, city or county of its authority to rely on a violation of ch. 97 or any rule adopted under those statutes as the basis for any subsequent suspension or revocation of the license or any other enforcement action arising out of the violation.

(5)(a) Except as provided in par. (b), any person who violates this section or an order issued under this section may be fined not more than $10,000 plus the retail value of any food moved, sold or disposed of in violation of this section or the order, or imprisoned not more than one year in the county jail, or both.

(b) Any person who does either of the following may be fined not more than $5,000 or imprisoned not more than one year in a county jail, or both:

1. Assaults, restrains, threatens, intimidates, impedes, interferes with or otherwise obstructs a village, city or county inspector, employee or agent in the performance of his or her duties under this section.

2. Gives false information to a village, city or county inspector, employee or agent engaged in the performance of his or her duties under this section, with the intent to mislead the inspector, employee or agent.

66.0418. Prohibition of local regulation of certain foods, beverages

Currentness

(1) In this section "political subdivision" means a city, village, town, or county.

(2) (a) No political subdivision may enact an ordinance or adopt a resolution that prohibits or restricts the sale of food or nonalcoholic beverages based on the number of calories, portion size, or other nutritional criteria of the food or nonalcoholic beverage.

(b) If a political subdivision has enacted an ordinance or adopted a resolution before July 2, 2013, that is inconsistent with par. (a), the ordinance or resolution does not apply and may not be enforced.

Subchapter IV. Regulation

W.S.A. 66.0419

66.0419. Local regulation of auxiliary containers

Currentness

(1) In this section:

(a) "Auxiliary container" means a bag, cup, bottle, can, or other packaging that is designed to be reusable or single-use; that is made of cloth, paper, plastic, cardboard, corrugated material, aluminum, glass, postconsumer recycled material, or similar material or substrates, including coated, laminated, or multi-layer substrates; and that is designed for transporting or protecting merchandise, food, or beverages from a food service or retail facility.

(b) "Political subdivision" means a city, village, town, or county.

(2) No political subdivision may do any of the following:

(a) Enact or enforce an ordinance or adopt or enforce a resolution regulating the use, disposition, or sale of auxiliary containers.

(b) Prohibit or restrict auxiliary containers.

(c) Impose a fee, charge, or surcharge on auxiliary containers.

(3)(a) This section does not limit the authority of a political subdivision in operating a curbside recycling or commercial recycling program or an effective recycling program under s. 287.11 or in designating a recycling location.

(b) Subsection (2)(b) and (c) does not apply to the use of auxiliary containers on a property owned by the political subdivision.

End of Document

W.S.A. 66.0420

66.0420. Video service

Currentness

(1) Legislative findings. The legislature finds all of the following:

(a) Video service brings important daily benefits to state residents by providing news, education, and entertainment.

(b) Uniform regulation of all video service providers by this state is necessary to ensure that state residents receive adequate and efficient video service and to protect and promote the public health, safety, and welfare.

(c) Fair competition in the provision of video service will result in new and more video programming choices for consumers in this state, and a number of providers have stated their desire to provide that service.

(d) Timely entry into the market is critical for new entrants seeking to compete with existing providers.

(e) This state's economy would be enhanced by additional investment in communications and video programming infrastructure by existing and new providers of video service.

(f) Minimal regulation of all providers of video service within a uniform framework will promote the investment described in par. (e).

(g) Ensuring that existing providers of video service are subject to the same regulatory requirements and procedures as new entrants will ensure fair competition among all providers.

(h) This section is an enactment of statewide concern for the purpose of providing uniform regulation of video service that promotes investment in communications and video infrastructures and the continued development of this state's video service marketplace within a framework that is fair and equitable to all providers.

(2) Definitions. In this section:

(a) “Affiliate,” when used in relation to any person, means another person who owns or controls, is owned or controlled by, or is under common ownership or control with such person.

(b) “Basic local exchange service area” means the area on file with the public service commission in which a telecommunications video service provider provides basic local exchange service, as defined in s. 196.01(1g).

(c) “Cable franchise” means a franchise granted under s. 66.0419(3)(b), 2005 stats.

(d) “Cable operator” has the meaning given in 47 USC 522(5).

(e) “Cable service” has the meaning given in 47 USC 522(6).

(f) “Cable system” has the meaning given in 47 USC 522(7).

(g) Except as provided in sub. (8)(ag), “department” means the department of financial institutions.

(h) “FCC” means the federal communications commission.

(i) “Franchise fee” has the meaning given in 47 USC 542(g), and includes any compensation required under s. 66.0425.

(j)1. “Gross receipts” means all revenues received by and paid to a video service provider by subscribers residing within a municipality for video service, or received from advertisers, including all of the following:

a. Recurring charges for video service.

b. Event-based charges for video service, including pay-per-view and video-on-demand charges.

c. Rental of set top boxes and other video service equipment.

d. Service charges related to the provision of video service, including activation, installation, repair, and maintenance charges.

e. Administrative charges related to the provision of video service, including service order and service termination charges.

f. Revenues received from the provision of home shopping or similar programming.

g. All revenue, except for refunds, rebates, and discounts, derived by the video service provider for advertising over its video service network to subscribers within a municipality. If such revenue is derived under a regional or national compensation contract or arrangement between the video service provider and one or more advertisers or advertising representatives, the amount of revenue derived for a municipality shall be determined by multiplying the total revenue derived under the contract

or arrangement by the percentage resulting from dividing the number of subscribers in the municipality by the total number of regional or national subscribers that potentially receive the advertising under the contract or arrangement.

2. Notwithstanding subd. 1., "gross receipts" does not include any of the following:

a. Discounts, refunds, and other price adjustments that reduce the amount of compensation received by a video service provider.

b. Uncollectible fees, except that any uncollectible fees that are written off as bad debt but subsequently collected shall be included as gross receipts in the period collected, less the expenses of collection.

c. Late payment charges.

e. Amounts billed to video service subscribers to recover taxes, fees, surcharges or assessments of general applicability or otherwise collected by a video service provider from video service subscribers for pass through to any federal, state, or local government agency, including video service provider fees and regulatory fees paid to the FCC under 47 USC 159.

f. Revenue from the sale of capital assets or surplus equipment not used by the purchaser to receive video service from the seller of those assets or surplus equipment.

g. Charges, other than those described in subd. 1., that are aggregated or bundled with amounts described in subd. 1., including but not limited to any revenues received by a video service provider or its affiliates for telecommunications services, information services, or the provision of directory or Internet advertising, including yellow pages, white pages, banner advertisement, and electronic publishing, if a video service provider can reasonably identify such charges on books and records kept in the regular course of business or by other reasonable means.

h. Reimbursement by programmers of marketing costs actually incurred by a video service provider.

(k) "Household" means a house, apartment, mobile home, group of rooms, or single room that is intended for occupancy as separate living quarters. For purposes of this paragraph, "separate living quarters" are those in which the occupants live and eat separately from any other persons in the building and which have direct access from the outside of the building or through a common hall.

(L) "Incumbent cable operator" means a person who, immediately before January 9, 2008, was providing cable service under a cable franchise, expired cable franchise, or cable franchise extension, or under an ordinance or resolution adopted or enacted by a municipality.

(m) "Institutional network" means a network that connects governmental, educational, and community institutions.

(n) "Interim cable operator" means an incumbent cable operator that elects to continue to provide cable service under a cable franchise as specified in sub. (3)(b)2. a.

(p) “Large telecommunications video service provider” means a telecommunications video service provider that, on January 1, 2007, had more than 500,000 basic local exchange access lines in this state or an affiliate of such a telecommunication video service provider.

(r) “Municipality” means a city, village, or town.

(s) “PEG channel” means a channel designated for public, educational, or governmental use.

(sm) “Qualified cable operator” means any of the following:

1. A cable operator that has been providing cable service in this state for at least 3 years prior to applying for a video service franchise and that has never had a cable franchise revoked by a municipality.

2. An affiliate of a cable operator specified in subd. 1.

3. A cable operator that, on the date that it applies for a video service franchise, individually or together with its affiliates or parent company, is one of the 10 largest cable operators in the United States as determined by data collected and reported by the FCC or determined by information available to the public through a national trade association representing cable operators.

(t) “Service tier” means a category of video service for which a separate rate is charged.

(u) “State agency” means any board, commission, department, or office in the state government.

(um) “Telecommunications utility” has the meaning given in s. 196.01(10).

(v) “Telecommunications video service provider” means a video service provider that uses facilities for providing telecommunications service, as defined in s. 196.01(9m), also to provide video service.

(w) “Video franchise area” means the area or areas described in an application for a video service franchise under sub. (3)(d)2.

(x) “Video programming” means programming provided by, or generally considered comparable to programming provided by, a television broadcast station.

(y) “Video service” means any video programming service, cable service, or service provided via an open video system that complies with 47 USC 573, that is provided through facilities located at least in part in public rights-of-way, without regard to delivery technology, including Internet protocol technology or any other technology. “Video service” does not include any of the following:

1. Video programming provided by a commercial mobile radio service provider, as defined in s. 196.01(2g).

2. Video programming provided solely as part of and via a service that enables users to access content, information, electronic mail, or any other service offered over the public Internet.

(z) "Video service franchise" means a franchise issued under sub. (3)(f)2.

(zb) "Video service network" means wireline facilities, or any component thereof, located at least in part in the public right-of-way that deliver video service, without regard to delivery technology, including Internet protocol technology or any other technology. "Video service network" includes a cable system.

(zg) "Video service provider" means a person, including an incumbent cable operator, who is issued a video service franchise or a successor or assign of such a person.

(zm) "Video service provider fee" means the fee paid by a video service provider under sub. (7).

(3) Authority to provide video service. (a) *In general.* Except for an interim cable operator, and except as provided in par. (c) and sub. (11), no person may provide video service in this state unless the department has issued a video service franchise to the person and the person has provided the notice required under par. (h).

(b) *Incumbent cable operators.* 1. A municipality may not renew or extend the cable franchise of an incumbent cable operator that expires after January 9, 2008.

2. An incumbent cable operator may do one of the following:

a. Continue to provide cable service as an interim cable operator until the cable franchise expires.

b. Apply for a video service franchise. If an incumbent cable operator applies for a video service franchise, the cable franchise shall terminate and have no effect upon issuance of the video service franchise. Upon termination of the cable franchise, the municipality that granted the franchise shall, at the request of the incumbent cable operator, surrender, return, or take such other action as may be necessary to nullify any bond, letter of credit, or similar instrument intended to secure the performance of the incumbent cable operator under the cable franchise.

3. An incumbent cable operator whose cable franchise expires after January 9, 2008, may not, after expiration of the cable franchise, provide video service in this state unless the incumbent cable operator applies for a video service franchise under subd. 2. b. and, upon issuance of the video service franchise, provides the notice required under par. (h). An incumbent cable operator whose cable franchise expired before January 9, 2008, and who was providing cable service immediately before January 9, 2008, may continue to provide cable service if, no later than March 1, 2008, the incumbent cable operator applies for a video service franchise under subd. 2.b.

(c) *Other providers.* A person, other than an incumbent cable operator, who was providing video service immediately before January 9, 2008, may provide video service without a video service franchise issued by the department. This paragraph ceases to apply to such a person if the person does not apply for a video service franchise no later than March 1, 2008.

(d) *Application.* An applicant for a video service franchise shall submit an application to the department that consists of all of the following:

1. The location and telephone number of the applicant's principal place of business, the names of the principal executive officers of the applicant, and the names of any persons authorized to represent the applicant before the department.

2. A description of the area or areas of the state in which the applicant intends to provide video service.

3. The date on which the applicant intends to begin providing video service in the video franchise area.

4. An affidavit signed by an officer or general partner of the applicant that affirms all of the following:

a. That the applicant has filed or will timely file with the FCC all forms required by the FCC in advance of offering video service.

b. That the applicant agrees to comply with this section and all applicable federal statutes and regulations.

c. That the applicant is legally, financially, and technically qualified to provide video service.

5. A description of the services that the applicant proposes to provide.

(e) *Service upon municipalities.* 1. At the time that an applicant submits an application under par. (d), or a video service provider submits a notification regarding a modification to an application under par. (j), to the department, the applicant or video service provider shall serve a copy of the application or notification on each municipality in the video franchise area.

2. a. This subdivision applies only to a municipality that, under subd. 1., is served a copy of an application or that, under subd. 1., is served a copy of a notification relating to an expansion of the area or areas of the state in which a video service provider intends to provide video service, if the municipality has not previously been served a copy of an application under subd. 1. by that video service provider.

b. If a municipality specified in subd. 2.a. has granted any cable franchise that is in effect immediately before January 9, 2008, the municipality shall, no later than 10 business days after receipt of the copy, notify the applicant in writing of the number of PEG channels for which incumbent cable operators are required to provide channel capacity in the municipality, the amount and type of monetary support for access facilities for PEG channels required of incumbent cable operators as described in sub. (7)(em), and the percentage of revenues that incumbent cable operators are required to pay the municipality as franchise fees.

(f) *Department duties.* 1. After the filing of an application, the department shall notify the applicant in writing as to whether the application is complete and, if the department has determined that the application is not complete, the department shall state the reasons for the determination.

2. After the filing of an application that the department has determined is complete, the department shall determine whether an applicant is legally, financially, and technically qualified to provide video service. If the department determines that an applicant is legally, financially, and technically qualified to provide video service, the department shall issue a video service franchise to the applicant. If the department determines that an applicant is not legally, financially, and technically qualified to provide video service, the department shall reject the application and shall state the reasons for the determination.

4. The department shall promulgate rules for determining whether an applicant is legally, financially, and technically qualified to provide video service.

(g) *Effect of video service franchise.* A video service franchise issued by the department authorizes a video service provider to occupy the public rights-of-way and to construct, operate, maintain, and repair a video service network to provide video service in the video franchise area.

(h) *Notice before providing service*. No later than 10 business days before providing video service in a municipality in a video franchise area, a video service provider shall provide notice to the department and the municipality.

(i) *Expiration and revocation of video service franchise.* The department may revoke a video service franchise issued to a video service provider if the department determines that the video service provider has failed to substantially meet a material requirement imposed upon it by the department. Before commencing a revocation proceeding, the department shall provide the video service provider written notice of the department's intention to revoke the franchise and the department's reasons for the revocation and afford the video service provider a reasonable opportunity to cure any alleged violation. The department must, before revoking any video service franchise, afford a video service provider full due process that, at a minimum, must include a proceeding before a hearing officer during which the video service provider must be afforded the opportunity for full participation, including the right to be represented by counsel, to introduce evidence, to require the production of evidence, and to question or cross-examine witnesses under oath. A transcript shall be made of any such hearing. A video service provider may bring an action to appeal the decision of the department.

(j) *Modifications.* If there is any change in the information included in an application filed by a video service provider under this subsection, the video service provider shall notify the department and update the information within 10 business days after the change, except that if the video service provider determines to expand the area or areas of the state in which the video service provider intends to provide video service, the video service provider shall apply to the department for a modified video service franchise under par. (d). A video service provider that makes a notification regarding a change in the information specified in par. (d)3., 4., or 5., shall include with the notification a fee of $100. No fee is required for a notification regarding a change in the information specified in par. (d)1.

(k) *Annual fee.* 1. A video service provider shall pay an annual fee.

2. If a video service provider has 10,000 or less subscribers, the first annual fee required under subd. 1. shall be $2,000 and each subsequent annual fee shall be $100.

(4) Franchising authority. For purposes of 47 USC 521 to 573, the state is the exclusive franchising authority for video service providers in this state. No municipality may require a video service provider to obtain a franchise to provide video service.

(5) PEG channels. (a) *Maximum number of PEG channels.* 1. If an incumbent cable operator is providing channel capacity for PEG channels to a municipality under a cable franchise in effect immediately before January 9, 2008, the municipality shall require each interim cable operator or video service provider that provides video service in the municipality to provide channel capacity for the same number of PEG channels for which channel capacity is provided immediately before January 9, 2008.

2. a. Except as provided in subd. 2. b. and c., if no incumbent cable operator is providing channel capacity for PEG channels to a municipality under a cable franchise that is in effect immediately before January 9, 2008, then, if the municipality has a population of 50,000 or more, the municipality may require each interim cable operator and video service provider that provides video service in the municipality to provide channel capacity for up to 3 PEG channels, and, if the municipality has a population of less than 50,000, the municipality may require each interim cable operator and video service provider that provides video service in the municipality to provide channel capacity for no more than 2 PEG channels.

b. If an interim cable operator or video service provider distributes video programming to more than one municipality through a single headend or video hub office and the aggregate population of the municipalities is 50,000 or more, the municipalities may not require the interim cable operator or video service provider to provide, in the aggregate, channel capacity for more than 3 PEG channels under subd. 2.a.

c. If an interim cable operator or video service provider distributes video programming to more than one municipality through a single headend or video hub office and the aggregate population of the municipalities is less than 50,000, the municipalities may not require the interim cable operator or video service provider to provide, in the aggregate, channel capacity for more than 2 PEG channels under subd. 2.a.

3. An interim cable operator or video service provider shall provide any channel capacity for PEG channels required under this paragraph on any service tier that is viewed by more than 50 percent of the interim cable operator's or video service provider's customers.

4. If a municipality is not required to provide notice to a video service provider under sub. (3)(e)2., the video service provider's duty to provide any additional channel capacity for PEG channels that is required by the municipality under this paragraph first applies on the date that the video service provider begins to provide service in the municipality, and, if the municipality is required to provide notice under sub. (3)(e)2., the video service provider's duty to provide any such additional channel capacity first applies on the date that the video service provider begins to provide video service in the municipality or on the 90th day after the video service provider receives the municipality's notice, whichever is later.

(b) *Exceptions.* 1. a. Notwithstanding par. (a), an interim cable operator or video service provider may reprogram for any other purpose any channel capacity provided for a PEG channel required by a municipality under par. (a) if the PEG channel is not substantially utilized by the municipality. If the municipality certifies to the interim cable operator or video service provider that reprogrammed channel capacity for a PEG channel will be substantially utilized by the municipality, the interim cable operator or video service provider shall, no later than 120 days after receipt of the certification, restore the channel capacity for the PEG

channel. Notwithstanding par. (a)3., an interim cable operator or video service provider may provide restored channel capacity for a PEG channel on any service tier.

b. For purposes of this subdivision, a PEG channel is substantially utilized by a municipality if the municipality provides 40 hours or more of programming on the PEG channel each week and at least 60 percent of that programming is locally produced.

2. Notwithstanding par. (a), if a municipality fails to provide the notice specified in sub. (3)(e)2. before the deadline specified in sub. (3)(e)2., no interim cable operator or video service provider is required to provide channel capacity for any PEG channel, or monetary support for access facilities for PEG channels pursuant to sub. (7)(em), until the 90th day after the municipality provides such notice.

(c) *Powers and duties of municipalities.* 1. Except as otherwise required under pars. (a) and (d) and sub. (7)(em), a municipality may not require an interim cable operator or video service provider to provide any funds, services, programming, facilities, or equipment related to public, educational, or governmental use of channel capacity.

2. The operation of any PEG channel for which a municipality requires an interim cable operator or video service provider to provide channel capacity under par. (a), and the production of any programming appearing on such a PEG channel, shall be the sole responsibility of the municipality and, except as provided in par. (d)1., the interim cable operator or video service provider shall bear only the responsibility to transmit programming appearing on the PEG channel.

3. A municipality that requires an interim cable operator or video service provider to provide channel capacity for a PEG channel under par. (a) shall do all of the following:

a. Ensure that all content and programming that the municipality provides or arranges to provide for transmission on the PEG channel is submitted to the interim cable operator or video service provider in a manner and form that is capable of being accepted and transmitted by the interim cable operator or video service provider over its video service network without changing the content or transmission signal and that is compatible with the technology or protocol, including Internet protocol television, utilized by the interim cable operator or video service provider to deliver video service.

b. Make the content and programming that the municipality provides or arranges to provide for transmission on a PEG channel available in a nondiscriminatory manner to all interim cable operators and video service providers that provide video service in the municipality.

(d) *Duties of interim cable providers and video service providers.* 1. If a municipality requires an interim cable operator or video service provider to provide capacity for PEG channels under par. (a), the interim cable operator or video service provider shall be required to provide transmission capacity sufficient to connect the interim cable operator's or video service provider's headend or video hub office to the municipality's PEG access channel origination points existing as of January 9, 2008. A municipality shall permit the interim cable operator or video service provider to determine the most economically and technologically efficient means of providing such transmission capacity. If a municipality requests that such a PEG access channel origination point be relocated, the interim cable operator or video service provider shall be required to provide only the first 200 feet of transmission line that is necessary to connect the interim cable operator or video service provider's headend or video hub office to such origination point. A municipality shall be liable for the costs of construction of such a transmission line beyond the first 200 feet and for any construction costs associated with additional origination points, but not for the costs associated with the transmission

of PEG programming over such line. The interim cable operator or video service provider may recover its costs to provide transmission capacity under this subdivision by identifying and collecting a "PEG Transport Fee" as a separate line item on customer bills.

2. If the interconnection of the video service networks of interim cable operators or video service providers is technically necessary and feasible for the transmission of programming for any PEG channel for which channel capacity is required by a municipality under par. (a), the interim cable operators and video service providers shall negotiate in good faith for interconnection on mutually acceptable rates, terms, and conditions, except that an interim cable operator or video service provider who requests interconnection is responsible for interconnection costs, including the cost of transmitting programming from its origination point to the interconnection point. Interconnection may be accomplished by direct cable, microwave link, satellite, or any other reasonable method.

(5m) Contracts with University of Wisconsin campuses. If an incumbent cable operator has entered into an agreement with an institution or college campus within the University of Wisconsin System that is in effect on January 9, 2008, and that requires the incumbent cable operator to broadcast University of Wisconsin events on one of its channels, any video service provider that provides video service in the area in which the events are broadcast by the incumbent cable operator shall, upon the request of the institution or college campus, enter into an agreement with the institution or college campus that requires the video service provider to provide the same service on the same terms and conditions as the agreement between the institution or college campus and the incumbent cable operator.

(6) Institutional networks. Notwithstanding any franchise, ordinance, or resolution in effect on January 9, 2008, no state agency or municipality may require an interim cable operator or video service provider to provide any institutional network or equivalent capacity on its video service network.

(7) Video service provider fee. (a) *Duty to pay fee.* 1. Notwithstanding s. 66.0611 and except as provided in subds. 2. and 2m., a video service provider shall, on a quarterly calendar basis, calculate and pay to each municipality in which the video service provider provides video service a video service provider fee equal to the percentage of the video service provider's gross receipts that is specified in par. (b) and the monetary support for access facilities for PEG channels described in par. (em). A video service provider shall remit the fee to the municipality no later than 45 days after the end of each quarter. Except as provided in subd. 2. or par. (b)1., if the municipality is not required to provide notice under sub. (3)(e)2., the duty to remit the fee first applies to the quarter in which the video service provider begins to provide service in the municipality, and, if the municipality is required to provide notice under sub. (3)(e)2., the duty to remit the fee first applies to the quarter in which the video service provider begins to provide service in the municipality or to the quarter that includes the 45th day after the video service provider receives the municipality's notice, whichever quarter is later.

2. If a municipality fails to provide the notice specified in sub. (3)(e)2. before the deadline specified in sub. (3)(e)2., no video service provider is required to pay a video service provider fee, and no interim cable operator is required to pay a franchise fee, to the municipality until the 45th day after the end of the quarter in which the municipality provides the notice specified in sub. (3)(e)2.

2m. If a municipality requires a video service provider to pay a cost-based permit fee under a regulation under s. 182.017(1r), the video service provider may deduct the amount of the fee from any other compensation that is due to the municipality including the video service provider fee under subd. 1.

(b) *Amount of fee.* 1. Except as provided in subd. 2m., the percentage applied to a video service provider's gross receipts under par. (a)1. for each municipality shall be 5 percent or one of the following percentages, whichever is less:

a. If no incumbent cable operator was required to pay a franchise fee equal to a percentage of gross revenues to the municipality immediately before January 9, 2008, the municipality may specify a percentage of no more than 5 percent. The duty of a video service provider to pay the municipality a video service fee equal to such percentage shall first apply to the quarter that includes the 45th day after the municipality provides notice of the percentage to the video service provider.

b. If an incumbent cable operator was required to pay a franchise fee equal to a percentage of gross revenues to the municipality immediately before January 9, 2008, that percentage.

c. If more than one incumbent cable operator was required to pay a franchise fee equal to a percentage of gross revenues to the municipality immediately before January 9, 2008, the lowest such percentage.

2m. The percentage applied to a video service provider's gross receipts under par. (a)1. for a municipality shall be the percentage that applied under subd. 1. on December 31, 2018, less one of the following:

a. Beginning on January 1, 2020, 0.5 percent.

b. Beginning on January 1, 2021, 1.0 percent.

(c) *Generally accepted accounting principles.* All determinations and computations made under this subsection shall be made pursuant to generally accepted accounting principles.

(d) *Record review.* A municipality may, upon reasonable written request, for the purpose of ensuring proper and accurate payment of a video service provider fee, review the business records of a video service provider that is required to pay the municipality a video service provider fee.

(e) *Actions to enforce payment.* 1. A municipality or a video service provider may not bring an action concerning the amount of a video service provider fee allegedly due to the municipality unless the parties have first participated in and completed good faith settlement discussions. For purposes of any future litigation, all negotiations pursuant to this paragraph shall be treated as compromise negotiations under s. 904.08.

2. An action regarding a dispute over the amount of a video service provider fee paid or allegedly due under this subsection shall be commenced within 4 years following the end of the calendar quarter to which the disputed amount relates or be barred, unless the parties agree in writing to an extension of time. Notwithstanding ss. 814.01, 814.02, 814.03, and 814.035, no costs may be allowed in the action to either party.

(em) *PEG channel monetary support.* 1. This subdivision applies to an incumbent cable operator whose cable franchise is terminated under sub. (3)(b)2.b. The obligation that is actually imposed by a municipality prior to April 18, 2007, on such an

incumbent cable operator to provide monetary support for access facilities for PEG channels and that is contained in a cable franchise existing on January 9, 2008, shall continue until January 1, 2011.

2. The duty of an interim cable operator to provide monetary support for access facilities for PEG channels that is contained in a cable franchise existing on January 9, 2008, shall continue until January 1, 2011.

3. Each video service provider providing video service in a municipality shall have the same obligation to provide monetary support for access facilities for PEG channels as the incumbent cable operator with the most subscribers in the municipality as of January 9, 2008. To the extent that such incumbent cable operator provides such support in the form of a percentage of gross revenues or a per subscriber fee, any other video service provider shall pay the same percentage of gross revenues or per subscriber fee to the municipality as the incumbent cable operator. To the extent that such incumbent cable operator provides such support in the form of a lump sum payment without an offset to its franchise fee or video service provider fee, any other video service provider that commences service in the municipality shall pay the municipality a sum equal to the pro rata amount of such lump sum payment based on its proportion of video service customers in such municipality. The obligation to provide monetary support required under this subdivision shall continue until January 1, 2011.

4. For purposes of this paragraph, the proportion of video service customers of a video service provider shall be determined based on the relative number of subscribers as of the end of the prior calendar year as reported by all incumbent cable operators and holders of video service authorizations.

(f) *Itemization.* A video service provider may identify and collect the amount related to a video service provider fee and any fee imposed for monetary support for access facilities for PEG channels as described in par. (em) as a separate line item on customer bills.

(g) *Other fees.* A municipality may require the video service provider to pay any compensation under s. 66.0425, or, except as provided in a regulation under s. 182.017(1r), any permit fee, encroachment fee, degradation fee, or any other fee, for the occupation of or work within public rights-of-way.

(8) Discrimination; access to services. (ag) *Definition.* In this subsection, "department" means the department of agriculture, trade and consumer protection.

(am) *Discrimination prohibited.* 1. No video service provider may deny access to video service to any group of potential residential customers in the video service provider's video franchise area because of the race or income of the residents in the local area in which the group resides.

2. It is a defense to an alleged violation of subd. 1. based on income if, no later than 3 years after the date on which the video service provider began providing video service under this section, at least 30 percent of the households with access to the video service provider's video service are low-income households.

(b) *Access.* 1. A large telecommunications video service provider shall provide access to its video service to the following percentages of households within the large telecommunications video service provider's basic local exchange service area:

a. Not less than 35 percent no later than 3 years after the date on which the large telecommunications video service provider began providing video service under this section.

b. Not less than 50 percent no later than 5 years after the date on which the large telecommunications video service provider began providing video service under this section, or no later than 2 years after at least 30 percent of households with access to the large telecommunications video service provider's video service subscribe to the service for 6 consecutive months, whichever occurs later.

2. A large telecommunications video service provider shall file an annual report with the department regarding the large telecommunications video service provider's progress in complying with subd. 1.

(c) *Extensions and waivers.* A video service provider may apply to the department for an extension of any time limit specified in par. (am)2. or (b) or a waiver of a requirement to comply with par. (b). The department shall grant the extension or waiver if the video service provider demonstrates to the satisfaction of the department that the video service provider has made substantial and continuous efforts to comply with the requirements of this subsection and that the extension or waiver is necessary due to one or more of the following factors:

1. The video service provider's inability to obtain access to public and private rights-of-way under reasonable terms and conditions.

2. Developments and buildings that are not subject to competition because of exclusive service arrangements.

3. Developments and buildings that are not accessible using reasonable technical solutions under commercially reasonable terms and conditions.

4. Natural disasters.

5. Other factors beyond the control of the video service provider.

(d) *Alternative technologies.* A video service provider may satisfy the requirements of this subsection through the use of an alternative technology, other than satellite service, that does all of the following:

1. Offers service, functionality, and content demonstrably similar to the service, functionality, and content provided through the video service provider's video service network.

2. Provides access to PEG channels and messages broadcast over the emergency alert system.

(e) *Limitations.* Notwithstanding any other provision of this section, a telecommunications video service provider is not required to provide video service outside the provider's basic local exchange service area, and a video service provider that is an

incumbent cable operator is not required to provide video service outside the area in which the incumbent cable operator provided cable service at the time the department of financial institutions issued a video service franchise to the incumbent cable operator.

(9) Customer service standards. (a) Except as provided in par. (b), upon 90 days' advance notice, a municipality may require a video service provider to comply with the customer service standards specified in 47 CFR 76.309(c) in its provision of video service. Neither the department nor any municipality shall have the authority to impose additional or different customer service standards that are specific to the provision of video service.

(b) Except as provided in s. 100.209, no video service provider that provides video service in a municipality may be subject to any customer service standards if there is at least one other person offering cable or video service in the municipality or if the video service provider is subject to effective competition, as determined under 47 CFR 76.905, in the municipality. This paragraph does not apply to any customer service standards promulgated by rule by the department of agriculture, trade and consumer protection.

(9m) Local broadcast stations. (a) In this subsection, a "noncable video service provider" means a video service provider that is not a cable operator.

(b) If a local broadcast station is authorized to exercise against a cable operator the right to require mandatory carriage under 47 USC 534, or the right to grant or withhold retransmission consent under 47 USC 325(b), the local broadcast station may exercise the same right against a noncable video service provider to the same extent as the local broadcast station may exercise such right against a cable operator under federal law.

(c) A noncable video service provider shall transmit, without degradation, the signals that a local broadcast station delivers to the noncable video service provider, but is not required to utilize the same or similar reception technology as the local broadcast station or the programming providers of the local broadcast station.

(d) A noncable video service provider may not do any of the following:

1. Discriminate among or between local broadcast stations, or programming providers of local broadcast stations, with respect to the transmission of their signals.

2. Delete, change, or alter a copyright identification transmitted as part of a local broadcast station's signal.

(10) Limitation on rate regulation. The department or a municipality may not regulate the rates charged for any video service by an interim cable operator or video service provider that provides video service in a municipality if at least one other interim cable operator or video service provider is providing video service in the municipality and the other interim cable operator or video service provider is not an affiliate of the interim cable operator or video service provider. This subsection applies regardless of whether any affected interim cable operator or video service provider has sought a determination from the FCC regarding effective competition under 47 CFR 76.905.

(11) Transfer of video service franchise. A person who is issued a video service franchise may transfer the video service franchise to any successor-in-interest, including a successor-in-interest that arises through merger, sale, assignment,

restructuring, change of control, or any other transaction. No later than 15 days after the transfer is complete, the successor-in-interest shall apply for a video service franchise under sub. (3)(d) and comply with sub. (3)(e)1. The successor-in-interest may provide video service in the video franchise area during the period that the department reviews the application.

(12) Municipal cable system costs. (a) Except for costs for any of the following, a municipality that owns and operates a cable system, or an entity owned or operated, in whole or in part, by such a municipality, may not require nonsubscribers of the cable system to pay any of the costs of the cable system:

1. PEG channels.

2. Debt service on bonds issued under s. 66.0619 to finance the construction, renovation, or expansion of a cable system.

3. The provision of broadband service by the cable system, if the requirements of s. 66.0422(3d)(a), (b), or (c) are satisfied.

(am) Paragraph (a) does not apply to a municipality that, on March 1, 2004, was providing cable service to the public.

(b) Paragraph (a) does not apply to a municipality if all of the following conditions apply:

1. On November 1, 2003, the public service commission has determined that the municipality is an alternative telecommunications utility under s. 196.203.

2. A majority of the governing board of the municipality votes to submit the question of supporting the operation of a cable system by the municipality to the electors in an advisory referendum and a majority of the voters in the municipality voting at the advisory referendum vote to support the operation of a cable system by the municipality.

(13) Rule-making; enforcement. (a) The department of financial institutions may promulgate rules interpreting or establishing procedures for this section and the department of agriculture, trade and consumer protection may promulgate rules interpreting or establishing procedures for sub. (8).

(b) Except as provided in sub. (7)(e), a municipality, interim cable operator, or video service provider that is affected by a failure to comply with this section may bring an action to enforce this section. If a court finds that a municipality, interim cable operator, or video service provider has not complied with this section, the court shall order the municipality, interim cable operator, or video service provider to comply with this section. Notwithstanding ss. 814.01, 814.02, 814.03, and 814.035, no costs may be allowed in an action under this paragraph to any party.

(c) The department shall enforce this section, except sub. (8). The department may bring an action to recover any fees that are due and owing under this section or to enjoin a violation of this section, except sub. (8), or any rule promulgated under sub. (3)(f)4. An action shall be commenced under this paragraph within 3 years after the occurrence of the unlawful act or practice or be barred.

W.S.A. 66.0421

66.0421. Access to video service

Currentness

(1) Definitions. In this section:

(c) "Video service" has the meaning given in s. 66.0420(2)(y).

(d) "Video service provider" has the meaning given in s. 66.0420(2)(zg), and also includes an interim cable operator, as defined in s. 66.0420(2)(n).

(2) Interference prohibited. The owner or manager of a multiunit dwelling under common ownership, control or management or of a mobile home park or the association or board of directors of a condominium may not prevent a video service provider from providing video service to a subscriber who is a resident of the multiunit dwelling, mobile home park or of the condominium or interfere with a video service provider providing video service to a subscriber who is a resident of the multiunit dwelling, mobile home park or of the condominium.

(3) Installation in multiunit building. Before installation, a video service provider shall consult with the owner or manager of a multiunit dwelling or with the association or board of directors of a condominium to establish the points of attachment to the building and the methods of wiring. A video service provider shall install facilities to provide video service in a safe and orderly manner and in a manner designed to minimize adverse effects to the aesthetics of the multiunit dwelling or condominium. Facilities installed to provide video service may not impair public safety, damage fire protection systems or impair fire-resistive construction or components of a multiunit dwelling or condominium.

(4) Repair responsibility. A video service provider is responsible for any repairs to a building required because of the construction, installation, disconnection or servicing of facilities to provide video service.

Chapter 66. General Municipality Law (Refs & Annos)
Subchapter IV. Regulation

W.S.A. 66.0422

66.0422. Video service, telecommunications, and broadband facilities

Currentness

(1) In this section:

(b) “Local government” means a city, village, or town.

(c) “Telecommunications service” has the meaning given in s. 196.01(9m).

(d) “Video service” has the meaning given in s. 66.0420(2)(y).

(2) Except as provided in subs. (3), (3d), (3m), and (3n), no local government may enact an ordinance or adopt a resolution authorizing the local government to construct, own, or operate any facility for providing video service, telecommunications service, or broadband service, directly or indirectly, to the public, unless all of the following are satisfied:

(a) The local government holds a public hearing on the proposed ordinance or resolution.

(b) Notice of the public hearing is given by publication of a class 3 notice under ch. 985 in the area affected by the proposed ordinance or resolution.

(c) No less than 30 days before the public hearing, the local government prepares and makes available for public inspection a report estimating the total costs of, and revenues derived from, constructing, owning, or operating the facility and including a cost-benefit analysis of the facility for a period of at least 3 years. The costs that are subject to this paragraph include personnel costs and costs of acquiring, installing, maintaining, repairing, or operating any plant or equipment, and include an appropriate allocated portion of costs of personnel, plant, or equipment that are used to provide jointly both telecommunications services and other services.

(3) Subsection (2) does not apply to a local government if all of the following conditions apply:

(a) On November 1, 2003, the public service commission has determined that the local government is an alternative telecommunications utility under s. 196.203.

(b) A majority of the governing board of the local government votes to submit the question of supporting the operation of the facility for providing video service, telecommunications service, or Internet access service, directly or indirectly to the public, by the local government to the electors in an advisory referendum and a majority of the voters in the local government voting at the advisory referendum vote to support operation of such a facility by the local government.

(3d) Subsection (2) does not apply to a facility for providing broadband service to an area within the boundaries of a local government if any of the following are satisfied:

(a) The local government asks, in writing, each person that provides broadband service within the boundaries of the local government whether the person currently provides broadband service to the area or intends to provide broadband service within 9 months to the area and within 60 days after receiving the written request no person responds in writing to the local government that the person currently provides broadband service to the area or intends to provide broadband service to the area within 9 months.

(b) The local government determines that a person who responded to a written request under par. (a) that the person currently provides broadband service to the area did not actually provide broadband service to the area and no other person makes the response to the local government described in par. (a).

(c) The local government determines that a person who responded to a written request under par. (a) that the person intended to provide broadband service to the area within 9 months did not actually provide broadband service to the area within 9 months and no other person makes the response to the local government described in par. (a).

(3m) Subsection (2) does not apply to a facility for providing broadband service if all of the following apply:

(a) The municipality offers use of the facility on a nondiscriminatory basis to persons who provide broadband service to end users of the service.

(b) The municipality itself does not use the facility to provide broadband service to end users.

(c) The municipality determines that, at the time that the municipality authorizes the construction, ownership, or operation of the facility, whichever occurs first, the facility does not compete with more than one provider of broadband service.

(3n) Subsection (2) does not apply to a local government that, on March 1, 2004, was providing video service to the public.

(4) Notwithstanding sub. (2), a local government may enact an ordinance or adopt a resolution authorizing the local government to prepare a report specified in sub. (2)(c).

(5) If a local government enacts an ordinance or adopts a resolution that complies with the requirements of sub. (2), the local government must determine the cost incurred in preparing the report specified in sub. (2)(c). As soon as practicable after the local government generates revenue from a facility specified in sub. (2)(intro.), the local government shall use the revenues to reimburse the treasury of the local government for the cost determined under this subsection.

Subchapter IV. Regulation

W.S.A. 66.0423

66.0423. Transient merchants

Currentness

(1) In this section:

(a) “Sale of merchandise” includes a sale in which the personal services rendered upon or in connection with the merchandise constitutes the greatest part of value for the price received, but does not include a farm auction sale conducted by or for a resident farmer of personal property used on the farm or the sale of produce or other perishable products at retail or wholesale by a resident of this state.

(b) “Transient merchant” means a person who engages in the sale of merchandise at any place in this state temporarily and who does not intend to become and does not become a permanent merchant of that place.

(2) Cities and villages, and towns not subject to an ordinance enacted under s. 59.55(4), may, by ordinance, regulate the retail sales, other than auction sales, made by transient merchants and provide penalties for violations of those ordinances.

66.0425. Privileges in streets

Currentness

(1) In this section, “privilege” means the authority to place an obstruction or excavation beyond a lot line, or within a highway in a town, village, or city, other than by general ordinance affecting the whole public.

(2) A person may apply to a town or village board or the common council of a city for a privilege. A privilege may be granted if the applicant assumes primary liability for damages to person or property by reason of the granting of the privilege, is obligated to remove an obstruction or excavation upon 10 days' notice by the state or the municipality and waives the right to contest in any manner the validity of this section or the amount of compensation charged. The grantor of the privilege may require the applicant to file a bond that does not exceed $10,000; that runs to the town, village, or city and to 3rd parties that may be injured; and that secures the performance of the conditions specified in this subsection. If there is no established lot line and the application is accompanied by a blue print, the town or village board or the common council of the city may impose any conditions on the privilege that it considers advisable.

(3) Compensation for a privilege shall be paid into the general fund and shall be fixed by the governing body of a city, village or town or by the designee of the governing body.

(4) The holder of a privilege is not entitled to damages for removal of an obstruction or excavation, and if the holder does not remove the obstruction or excavation upon due notice, it shall be removed at the holder's expense.

(5) Third parties whose rights are interfered with by the granting of a privilege have a right of action against the holder of the privilege only.

(6) Subsections (1) to (5) do not apply to telecommunications carriers, as defined in s. 196.01(8m), telecommunications utilities, as defined in s. 196.01(10), alternative telecommunications utilities, as defined in s. 196.01(1d), public service corporations, or cooperatives organized under ch. 185 to render or furnish gas, light, heat, or power, or to cooperatives organized under ch. 185 or 193 to render or furnish telecommunications service, but the carriers, utilities, corporations and associations shall secure a permit from the proper official for temporary obstructions or excavations in a highway and are liable for all injuries to person or property caused by the obstructions or excavations.

(7) This section does not apply to an obstruction or excavation that is in place for less than 90 days, and for which a permit has been granted by the proper official. This section does not apply if a permit has been issued under s. 86.07(2) with respect to a manure hose, or written consent has been given under s. 86.16(1) with respect to a pipe or pipeline, transmitting liquid manure within or across the right-of-way of a highway.

(8) This section applies to an obstruction or excavation by a city, village or town in any street, alley, or public place belonging to any other municipality.

(9) Any person who violates this section may be fined not less than $25 nor more than $500 or imprisoned for not less than 10 days nor more than 6 months or both.

(10) A privilege may be granted only as provided in this section.

66.0427. Open excavations in populous counties

Currentness

In a town, city or village in a county with a population of 750,000 or more no excavation for building purposes, whether or not completed, may be left open for more than 6 months without proceeding with the erection of a building on the excavation. If an excavation remains open for more than 6 months, the building inspector or other designated officer of the town, village or city shall order that the erection of a building on the excavation begin forthwith or that the excavation be filled to grade. The order shall be served upon the owner of the land or the owner's agent and upon the holder of any encumbrance of record as provided in s. 66.0413(1)(d). If the owner of the land fails to comply with the order within 15 days after service of the order upon the owner, the building inspector or other designated officer shall fill the excavation to grade and the cost shall be charged against the real estate as provided in s. 66.0413(1)(f). Section 66.0413(1)(h) applies to orders issued under this section. This section does not impair the authority of a city or village to enact ordinances in this field.

66.0429. Street barriers; neighborhood watch signs

Currentness

(1) The governing body of a city, village or town may set aside streets or roads that are not a part of any federal, state or county trunk highway system for the safety of children in coasting or other play activities, and may obstruct or barricade the streets or roads to safeguard the children from accidents. The governing body of the city, village or town may erect and maintain on the streets or roads barriers or barricades, lights, or warning signs and is not liable for any damage caused by the erection or maintenance.

(2) A city or village which has a neighborhood watch program authorized by the law enforcement agency of the city or village and in which the residents of the city or village participate may, in a manner approved by the city council or village board, place within the right-of-way of a street or highway within its limits a neighborhood watch sign of a uniform design approved by the department of transportation. No sign under this subsection may be placed within the right-of-way of a highway designated as part of the national system of interstate and defense highways.

(3)(a) The governing body of a city may monitor or limit access to streets that are not part of any federal, state or county trunk highway system or connecting highway, as described in s. 84.02(11), for the purposes of security or public safety. The governing body of a city may authorize gates or security stations, or both, to be erected and maintained to monitor traffic or limit access on these streets. The restriction of access to streets that is authorized under this subsection does not affect a city's eligibility for state transportation aids.

(b) This subsection applies only to the city of Arcadia.

66.0431. Prohibiting operators from leaving keys in parked motor vehicles

Currentness

The governing body of a city, village or town may by ordinance require every passenger motor vehicle to be equipped with a lock suitable to lock either the starting lever, throttle, steering apparatus, gear shift lever or ignition system; prohibit any person from permitting a motor vehicle in the person's custody from standing or remaining unattended on any street, road, or alley or in any other public place, except an attended parking area, unless either the starting lever, throttle, steering apparatus, gear shift or ignition of the vehicle is locked and the key for that lock is removed from the vehicle; and provide forfeitures for violations of the ordinance. This section does not apply to motor vehicles operated by common carriers of passengers under ch. 194.

66.0433. Licenses for nonintoxicating beverages

Currentness

(1) A town board, village board or common council may grant licenses to persons it considers proper for the sale of beverages containing less than 0.5 percent of alcohol by volume to be consumed on the premises where sold and to manufacturers, wholesalers, retailers and distributors of these beverages. The fee for a license shall be not less than $5 nor more than $50, to be fixed by the board or council, except that where these beverages are sold for consumption off the premises the license fee shall be $5. The license shall be issued by the town, village or city clerk, shall designate the specific premises for which granted and shall expire the next June 30 after issuance. The full license fee shall be charged for the whole or a fraction of the year. No beverages described in this paragraph may be manufactured, sold at wholesale or retail or sold for consumption on the premises, or kept for sale at wholesale or retail or for consumption on the premises where sold, without a license issued under this paragraph.

(1m) If a place of business moves from the premises designated in the license to another location in the town, village or city within the license period, the licensee shall give notice of the change of location, and the license shall be amended accordingly without payment of an additional fee. A license is not transferable from one person to another.

(2) No license or permit may be granted to any person, unless to a domestic corporation or domestic limited liability company, not a resident of this state and of the town, village or city in which the license is applied for, nor, subject to ss. 111.321, 111.322 and 111.335, to any person who has been convicted of a felony, unless the person has been restored to civil rights.

(3) A town board, village board or common council may by resolution or ordinance adopt reasonable and necessary regulations regarding the location of licensed premises, the conduct of the licensed premises, the sale of beverages containing less than 0.5 percent of alcohol by volume and the revocation of any license.

Subchapter IV. Regulation

W.S.A. 66.0435

66.0435. Manufactured and mobile home communities

Currentness

(1) Definitions. In this section:

(am) "Community" means a manufactured and mobile home community.

(b) "Licensee" means any person licensed to operate and maintain a manufactured and mobile home community under this section.

(c) "Licensing authority" means the city, town or village wherein a manufactured and mobile home community is located.

(cg) "Manufactured and mobile home community" means any plot or plots of ground upon which 3 or more manufactured homes or mobile homes, occupied for dwelling or sleeping purposes, are located, regardless of whether a charge is made for the accommodation.

(cm) "Manufactured home" has the meaning given in s. 101.91(2) and includes any additions, attachments, annexes, foundations, and appurtenances.

(d) "Mobile home" has the meaning given in s. 101.91(10) and includes any additions, attachments, annexes, foundations and appurtenances.

(h) "Person" means any natural individual, firm, trust, partnership, association, corporation or limited liability company.

(hm) "Recreational mobile home" means a prefabricated structure that is no larger than 400 square feet, or that is certified by the manufacturer as complying with the code promulgated by the American National Standards Institute as ANSI A119.5, and that is designed to be towed and used primarily as temporary living quarters for recreational, camping, travel, or seasonal purposes.

(i) "Space" means a plot of ground within a manufactured and mobile home community, designed for the accommodation of one manufactured or mobile home.

(j) “Unit” means a single manufactured or mobile home.

(2) Granting, revoking or suspending license. (a) It is unlawful for any person to maintain or operate a community within the limits of a city, town or village, unless the person has received a license from the city, town or village.

(b) In order to protect and promote the public health, morals and welfare and to equitably defray the cost of municipal and educational services required by persons and families using communities for living, dwelling or sleeping purposes, a city council, village board and town board may do any of the following:

1. Establish and enforce by ordinance reasonable standards and regulations for every community.

2. Require an annual license fee to operate a community and levy and collect special assessments to defray the cost of municipal and educational services furnished to a community.

3. Limit the number of units that may be located in any one community.

4. Limit the number of licenses for communities in any common school district, if the development of a community would cause the school costs to increase above the state average or if an exceedingly difficult or impossible situation exists with regard to providing adequate and proper sewage disposal in the particular area.

(c) In a town in which the town board enacts an ordinance regulating manufactured and mobile homes under this section and has also enacted and approved a county zoning ordinance under the provisions of s. 59.69, the provisions of the ordinance which is most restrictive apply with respect to the establishment and operation of a community in the town.

(d) A license granted under this section is subject to revocation or suspension for cause by the licensing authority that issued the license upon complaint filed with the clerk of the licensing authority, if the complaint is signed by a law enforcement officer, local health officer, as defined in s. 250.01(5), or building inspector, after a public hearing upon the complaint. The holder of the license shall be given 10 days' written notice of the hearing, and is entitled to appear and be heard as to why the license should not be revoked. A holder of a license that is revoked or suspended by the licensing authority may within 20 days of the date of the revocation or suspension appeal the decision to the circuit court of the county in which the community is located by filing a written notice of appeal with the clerk of the licensing authority, together with a bond executed to the licensing authority, in the sum of $500 with 2 sureties or a bonding company approved by the clerk, conditioned for the faithful prosecution of the appeal and the payment of costs adjudged against the license holder.

(3) License and monthly municipal permit fee.

(a) The licensing authority shall collect from the licensee an annual license fee of not less than $25 nor more than $100 for each 50 spaces or fraction of 50 spaces within each community within its limits. If the community lies in more than one municipality the amount of the license fee shall be determined by multiplying the gross fee by a fraction the numerator of which is the number of spaces in the community in a municipality and the denominator of which is the entire number of spaces in the community.

(b) The licensing authority may collect a fee of $10 for each transfer of a license.

(c) 1. In addition to the license fee provided in pars. (a) and (b), each licensing authority shall collect from each unit occupying space or lots in a community in the licensing authority, except from recreational mobile homes as provided under par. (cm), from manufactured and mobile homes that constitute improvements to real property, from recreational vehicles as defined in s. 340.01(48r), and from camping trailers as defined in s. 340.01(6m), a monthly municipal permit fee computed as follows:

a. On January 1, the assessor shall determine the total fair market value of each unit in the taxation district subject to the monthly municipal permit fee.

b. The fair market value, determined under subd. 1.a., minus the tax-exempt household furnishings thus established, shall be equated to the general level of assessment for the prior year on other real and personal property in the district.

c. The value of each unit, determined under subd. 1. b., shall be multiplied by the general property gross tax rate, less any credit rate for the property tax relief credit, established on the preceding year's assessment of general property.

d. The total annual permit fee, computed under subd. 1. c., shall be divided by 12 and shall represent the monthly municipal permit fee.

2. The monthly municipal permit fee is applicable to units moving into the tax district any time during the year. The community operator shall furnish information to the tax district clerk and the assessor on units added to the community within 5 days after their arrival, on forms prescribed by the department of revenue. As soon as the assessor receives the notice of an addition of a unit to a community, the assessor shall determine its fair market value and notify the clerk of that determination. The clerk shall equate the fair market value established by the assessor and shall apply the appropriate tax rate, divide the annual permit fee thus determined by 12 and notify the unit owner of the monthly fee to be collected from the unit owner. Liability for payment of the fee begins on the first day of the next succeeding month and continues for the months in which the unit remains in the tax district.

3. A new monthly municipal permit fee and a new valuation shall be established each January and shall continue for that calendar year.

4. The valuation established is subject to review as are other values established under ch. 70. If the board of review reduces a valuation on which previous monthly payments have been made the tax district shall refund past excess fee payments.

5. The monthly municipal permit fee shall be paid by the unit owner to the local taxing authority on or before the 10th of the month following the month for which the monthly municipal permit fee is due.

6. The licensee of a community is liable for the monthly municipal permit fee for any unit occupying space in the community as well as the owner and occupant of each such unit, except that the licensee is not liable until the licensing authority has failed, in an action under ch. 799, to collect the fee from the owner and occupant of the unit. A municipality, by ordinance, may require the community operator to collect the monthly municipal permit fee from the unit owner.

8. The credit under s. 79.10(9)(bm), as it applies to the principal dwelling on a parcel of taxable property, applies to the estimated fair market value of a unit that is the principal dwelling of the owner. The owner of the unit shall file a claim for the credit with the treasurer of the municipality in which the property is located. To obtain the credit under s. 79.10(9)(bm), the owner shall attest on the claim that the unit is the owner's principal dwelling. The treasurer shall reduce the owner's monthly municipal permit fee by the amount of any allowable credit. The treasurer shall furnish notice of all claims for credits filed under this subdivision to the department of revenue as provided under s. 79.10(1m).

9. No monthly municipal permit fee may be imposed on a financial institution, as defined in s. 69.30(1)(b), that relates to a vacant unit that has been repossessed by the financial institution.

(cm) Recreational mobile homes and recreational vehicles, as defined in s. 340.01(48r), are exempt from the monthly municipal permit fee under par. (c). The exemption under this paragraph also applies to steps and a platform, not exceeding 50 square feet, that lead to a recreational mobile home or recreational vehicle, but does not apply to any other addition, attachment, patio, or deck.

(d) This section does not apply to a community that is owned and operated by any county under the provisions of s. 59.52(16)(b).

(e) If a unit is permitted by local ordinance to be located outside of a licensed community, the monthly municipal permit fee shall be paid by the owner of the land on which it stands, and the owner of the land shall comply with the reporting requirements of par. (c). The owner of the land may collect the fee from the owner of the unit and, on or before January 10 and on or before July 10, shall transmit to the taxation district all fees owed for the 6 months ending on the last day of the month preceding the month when the transmission is required.

(f) Nothing in this subsection prohibits the regulation by local ordinance of a community.

(g) Failure to timely pay the tax prescribed in this subsection shall be treated as a default in payment of property tax and is subject to all procedures and penalties applicable under chs. 70 and 74.

(h) Each local governing body may enact an ordinance providing a forfeiture of up to $25 for failure to comply with the reporting requirements of par. (c) or (e). Each failure to report is a separate offense.

(3m) Community operator reimbursement. A community operator who collects a monthly municipal permit fee from a unit owner may deduct, for administrative expenses, 2 percent of the monthly fees collected.

(4) Application for license. Original application for a community license shall be filed with the clerk of the licensing authority. Applications shall be in writing, signed by the applicant and shall contain the following:

(a) The name and address of the applicant.

(b) The location and legal description of the community.

(c) The complete plan of the community.

(6) Renewal of license. Upon application by any licensee, after approval by the licensing authority and upon payment of the annual license fee, the clerk of the licensing authority shall issue a certificate renewing the license for another year, unless sooner revoked. The application for renewal shall be in writing, signed by the applicant on forms furnished by the licensing authority.

(7) Transfer of license; fee. Upon application for a transfer of license the clerk of the licensing authority, after approval of the application by the licensing authority, shall issue a transfer upon payment of the required $10 fee.

(8) Distribution of fees. The licensing authority may retain 10 percent of the monthly municipal permit fees collected in each month, without reduction for any amounts deducted under sub. (3m), to cover the cost of administration. The licensing authority shall pay to the school district in which the community is located, within 20 days after the end of each month, such proportion of the remainder of the fees collected in the preceding month as the ratio of the most recent property tax levy for school purposes bears to the total tax levy for all purposes in the licensing authority. If the community is located in more than one school district, each district shall receive a share in the proportion that its property tax levy for school purposes bears to the total school tax levy.

(9) Municipalities; monthly municipal permit fees on recreational mobile homes and recreational vehicles. A licensing authority may assess monthly municipal permit fees at the rates under this section on recreational mobile homes and recreational vehicles, as defined in s. 340.01(48r), except recreational mobile homes and recreational vehicles that are located in campgrounds licensed under s. 97.67, recreational mobile homes that constitute improvements to real property, and recreational mobile homes or recreational vehicles that are located on land where the principal residence of the owner of the recreational mobile home or recreational vehicle is located, regardless of whether the recreational mobile home or recreational vehicle is occupied during all or part of any calendar year.

(10) Powers of municipalities. The powers conferred on licensing authorities by this section are in addition to all other grants of authority and are limited only by the express language of this section.

66.0438. Limitations on locally issued identification cards

Currentness

(1) Definition. In this section, "public assistance benefits" means services, benefits, payments, or other assistance provided under a program administered by the department of health services or the department of children and families under s. 253.06 or ch. 49.

(2) Towns and counties. (a) Except as provided in par. (b), no town or county may issue, or expend any funds for the issuance of, a photo identification card for any resident of the town or county.

(b) Notwithstanding par. (a), a town or county may issue, or expend funds for the issuance of, a photo identification card to any of the following individuals or for any of the following purposes:

1. An employee or elected official of the town or county, if the photo identification card relates to the employee's or official's job duties.

2. An employee of a vendor or contractor that contracts with the town or county, or an employee of a subcontractor that contracts with such a vendor or contractor, if the photo identification card relates to the employee's job duties for the town or county.

3. To use a transit system owned or operated by the town or county.

4. To use or access services or facilities owned by the town or county.

5. An employee of, or a student who is attending, an institution of higher education that contracts with the town or county, if the photo identification card relates to the employee's or student's job duties for the town or county.

(c) If a town or county has issued an identification card, other than a card described in par. (b), that has been used before April 27, 2016, as an identification document to establish proof of residence under s. 6.34(3)(a)3., that card is not valid for such purposes on or after April 27, 2016.

(3) Cities and villages. (a) If a city or village issues, or expends funds for the issuance of, a photo identification card for any resident of the city or village, the card must state clearly on its face, in 12 point type, "Not authorized for voting purposes."

(b) A photo identification card issued by, or at the direction of, a city or village, as described under par. (a), may not be used for any of the following purposes:

1. As an identification document to establish proof of residence under s. 6.34(3)(a)3.

2. As proof of identification under s. 6.79(2), 6.82(1)(a), 6.86, 6.87, or 6.875.

3. To obtain public assistance benefits.

(c) If a city or village has issued an identification card that has been used before April 27, 2016, as an identification document to establish proof of residence under s. 6.34(3)(a)3., that card is not valid for such purposes on or after April 27, 2016.

66.0440. Battery-powered, alarmed electric security fences

Currentness

(1) In this section:

(a) “Battery-powered, alarmed electric security fence” means an electric fence that satisfies all of the following:

1. Is equipped with an energizer that produces direct current and is powered by a commercial storage battery with a voltage of not greater than 12 volts.

2. Produces an electric charge on contact that satisfies standards provided by the International Electrotechnical Commission, as published in the latest version of the commission's standards for electric fence energizers.

3. Is connected to a system that is capable of signaling law enforcement.

4. Includes warning signage that a battery-powered, alarmed electric security fence is in operation.

5. Is surrounded by a perimeter fence or wall that is at least 5 feet in height.

6. Is no more than 10 feet in height, or 2 feet higher than the perimeter fence or wall, whichever is higher.

(b) “Political subdivision” means a city, village, town, or county.

(2) No political subdivision may do any of the following:

(a) Prohibit the installation or use of a battery-powered, alarmed electric security fence, except on property designated exclusively for residential use.

(b) Require a permit, other than an alarm system permit, for the installation or use of a battery-powered, alarmed electric security fence.

(c) Impose installation or operation requirements that are inconsistent with the standards set by the International Electrotechnical Commission for installation or operation of an electrified fence that is a component of a battery-powered, alarmed electric security fence.

(3) No person may locate a battery-powered, alarmed electric security fence on property designated exclusively for residential use.

66.0441. Quarries extracting certain nonmetallic minerals

Currentness

(1) Construction. (a) Nothing in this section may be construed to affect the authority of a political subdivision to regulate land use for a purpose other than quarry operations.

(b) Subject to pars. (c) and (d), nothing in this section may be construed to exempt a quarry from a regulation of general applicability placed by a political subdivision that applies to other property in the political subdivision that is not a quarry unless the regulation is inconsistent with this section.

(c) Nothing in this section may be construed to exempt a quarry from the application, outside of a nonmetallic mining licensing permit, of a requirement imposed by a political subdivision under ch. 349, a regulation of general applicability placed by a political subdivision that regulates access to property from roads for which the political subdivision is the maintaining authority, or a restriction on the use of roads for which the political subdivision is the maintaining authority.

(d) Nothing in this section may be construed to exempt a quarry from a restriction placed by a political subdivision regulating a nonconforming use under s. 59.69(10), 60.61(5), or 62.23(7).

(2) Definitions. In this section:

(a) “Active quarry” means a quarry that has operated during the preceding 12-month period.

(am) “Conditional use permit” means a form of approval, including a special exception or other special zoning permission, granted by a political subdivision pursuant to a zoning ordinance for the operation of a quarry.

(b) “Nonmetallic mining licensing ordinance” means an ordinance that is enacted by a political subdivision specifically regulating the operation of a quarry and that is not enacted pursuant to zoning authority.

(c) “Nonmetallic mining licensing permit” means a form of approval that is granted by a political subdivision pursuant to a nonmetallic mining licensing ordinance and that is specifically related to the operation of a quarry.

(d) “Permit” means a form of approval granted by a political subdivision for the operation of a quarry.

(e) “Political subdivision” means a city, village, town, or county.

(f) “Public works project” means a federal, state, county, or municipal project that involves the construction, maintenance, or repair of a public transportation facility or other public infrastructure and in which nonmetallic minerals are used.

(g) “Quarry” means the surface area from which nonmetallic minerals, including soil, clay, sand, gravel, and construction aggregate, that are used primarily for a public works project or a private construction or transportation project are extracted and processed.

(h) “Quarry operations” means the extraction and processing of minerals at a quarry and all related activities, including blasting, vehicle and equipment access to the quarry, and loading and hauling of material to and from the quarry.

(2m) Effective dates of certain ordinances. For purposes of sub. (3)(a)3., the date on which a town or county enacts a zoning ordinance that requires a conditional use permit for a quarry operator to conduct quarry operations is the date the ordinance becomes effective, except as follows:

(a) If a town that previously did not have a general zoning ordinance enacts a general zoning ordinance requiring a conditional use permit to conduct quarry operations and the town ceases to be covered by a county general zoning ordinance that required a conditional use permit to conduct quarry operations, a conditional use permit for a quarry in effect at the time of the transition from county zoning to town zoning shall continue in effect and the conditional use permit shall be treated as if it was originally issued by the town. For purposes of a conditional use permit subject to this paragraph, the date of the adoption of the town ordinance shall be deemed to be the date the conditional use permit was issued by the county but only with respect to requirements that were included in the county ordinance on the date the conditional use permit was issued and that were adopted in the town ordinance.

(b) If a town that has a general zoning ordinance requiring a conditional use permit to conduct quarry operations repeals its zoning ordinance and becomes subject to a county general zoning ordinance under s. 59.69(5)(c) and the county zoning ordinance requires a conditional use permit to conduct quarry operations, a conditional use permit for a quarry in effect at the time of the transition from town zoning to county zoning shall continue in effect and the conditional use permit shall be treated as if it was originally issued by the county. For purposes of a conditional use permit subject to this paragraph, the date of the adoption of the county ordinance shall be deemed to be the date the conditional use permit was issued by the town but only with respect to requirements that were included in the town ordinance on the date the conditional use permit was issued and that were adopted in the county ordinance.

(3) Limitations on local regulation. (a) *Permits*. 1. In this paragraph, “substantial evidence” means facts and information, other than merely personal preference or speculation, directly pertaining to the requirements that an applicant must meet to obtain a nonmetallic mining licensing permit and that a reasonable person would accept in support of a conclusion.

2. Consistent with the requirements and limitations in this subsection, except as provided in subd. 3., a political subdivision may require a quarry operator to obtain a conditional use permit or nonmetallic mining licensing permit to conduct quarry operations.

3. A political subdivision may not require a quarry operator of an active quarry to obtain a conditional use permit or nonmetallic mining licensing permit to conduct quarry operations unless prior to the establishment of quarry operations the political subdivision enacts an ordinance that requires the permit. A political subdivision that requires a quarry operator to obtain a nonmetallic mining licensing permit under this subdivision may not impose a requirement in the nonmetallic mining licensing permit pertaining to any matter regulated by an applicable zoning ordinance or addressed through conditions imposed or agreed to in a previously issued and effective conditional use permit. Any requirement imposed in a nonmetallic mining licensing permit shall be related to the purpose of the ordinance requiring the nonmetallic mining licensing permit and shall be based on substantial evidence. The duration of a nonmetallic mining licensing permit may not be shorter than 5 years.

(b) *Applicability of local limit*. If a political subdivision enacts a nonmetallic mining licensing ordinance requirement regulating the operation of a quarry that was not in effect when quarry operations began at an active quarry, the ordinance requirement does not apply to that quarry or to land that is contiguous to the land on which the quarry is located, if the contiguous land has remained continuously under common ownership, leasehold, or control with land on which the quarry is located from the time the ordinance was enacted; can be shown to have been intended for quarry operations prior to the enactment of the ordinance; and is located in the same political subdivision.

(c) *Hours of operation*. A political subdivision may not limit the times, including days of the week, that quarry operations may occur if the materials produced by the quarry will be used in a public works project that requires construction work to be performed during the night or an emergency repair.

(d) *Blasting*. 1. In this paragraph, "affected area" means an area within a certain radius of a blasting site that may be affected by a blasting operation, as determined using a formula established by the department of safety and professional services by rule that takes into account a scaled-distance factor and the weight of explosives to be used.

2. Except as provided under subds. 3. and 4. and s. 101.02(7y), a political subdivision may not limit blasting at a quarry.

3. A political subdivision may require the operator of a quarry to do any of the following:

a. Before beginning a blasting operation at the quarry, provide notice of the blasting operation to each political subdivision in which any part of the quarry is located and to owners of dwellings or other structures within the affected area.

b. Before beginning a blasting operation at the quarry, cause a 3rd party to conduct a building survey of any dwellings or other structures within the affected area.

c. Before beginning a blasting operation at the quarry, cause a 3rd party to conduct a survey of and test any wells within the affected area.

d. Provide evidence of insurance to each political subdivision in which any part of the quarry is located.

e. Provide copies of blasting logs to each political subdivision in which any part of the quarry is located.

f. Provide maps of the affected area to each political subdivision in which any part of the quarry is located.

g. Provide copies of any reports submitted to the department of safety and professional services relating to blasting at the quarry.

4. A political subdivision may suspend a permit for a violation of the requirements under s. 101.15 relating to blasting and rules promulgated by the department of safety and professional services under s. 101.15(2)(e) relating to blasting only if the department of safety and professional services determines that a violation of the requirements or rules has occurred and only for the duration of the violation as determined by the department of safety and professional services.

5. Nothing in this section exempts a quarry operator from applicable limitations on the time of day during which blasting activities may be conducted that are imposed by rules promulgated by the department of safety and professional services.

(e) *Quarry permit requirements*. 1. A political subdivision may not add a condition to a permit during the duration of the permit unless the permit holder consents.

2. If a political subdivision requires a quarry to comply with another political subdivision's ordinance as a condition for obtaining a permit, the political subdivision that grants the permit may not require the quarry operator to comply with a provision of the other political subdivision's ordinance that is enacted after the permit is granted and while the permit is in effect.

3. a. A town may not require, as a condition for granting a permit to a quarry operator, that the quarry operator satisfy a condition that a county requires in order to grant a permit that is imposed by a county ordinance enacted after the county grants a permit to the quarry operator.

b. A county may not require, as a condition for granting a permit to a quarry operator, that the quarry operator satisfy a condition that a town requires in order to grant a permit that is imposed by a town ordinance enacted after the town grants a permit to the quarry operator.

W.S.A. 66.0442

66.0442. Electric vehicle charging stations

Currentness

(1) In this section:

(a) "Level 1 charger" means a device with one or more charging ports and connectors for charging electric vehicles that operates on a circuit up to 120 volts and transfers alternating current electricity to a device in an electric vehicle that converts alternating current to direct current to recharge an electric vehicle battery.

(b) "Level 2 charger" has the meaning given for "AC Level 2" under 23 CFR 680.104.

(c) "Level 3 charger" means a direct current fast charger, as defined under 23 CFR 680.104, and analogous successor technologies.

(d) "Local governmental unit" means any of the following:

1. A city, village, town, or county.

2. A school district.

3. A special purpose district in this state.

4. An agency or corporation of an entity described in subd. 1. or 3.

5. A combination or subunit of an entity described in this paragraph.

(e) "Municipal utility" has the meaning given in s. 16.957(1)(q).

(2)(a) Except as provided in pars. (b) and (c), no local governmental unit may own, operate, manage, or lease an electric vehicle charging station containing a Level 1, Level 2, or Level 3 charger unless the charger is not available to the public and is used solely to charge vehicles owned or leased by the local governmental unit.

(b) A local governmental unit may own, operate, manage, or lease an electric vehicle charging station at which a Level 1 charger or Level 2 charger is available to the public if the local governmental unit makes all Level 1 chargers or Level 2 chargers installed before March 22, 2024, available for public use free of any charge.

(c) A local governmental unit may own, operate, manage, or lease an electric vehicle charging station at which a Level 1 charger or a Level 2 charger installed on or after March 22, 2024, is available to the public if the local governmental unit charges a reasonable fee for the electricity delivered or placed by all such Level 1 chargers and Level 2 chargers.

(3) Notwithstanding sub. (2) and subject to sub. (4), a local governmental unit may authorize an electric provider, as defined in s. 16.957(1)(f), or a person described in s. 196.01(5)(b)8. to own and operate an electric vehicle charging station at which a Level 1 charger, Level 2 charger, or Level 3 charger is available to the public on property owned by the local governmental unit.

(3m) An electric provider, as defined in s. 16.957(1)(f), or a person described in s. 196.01(5)(b)8. who is authorized under sub. (3) to own and operate an electric vehicle charging station at which a Level 1 charger, Level 2 charger, or Level 3 charger is available to the public on property owned by a local governmental unit, shall charge a reasonable fee for the electricity delivered or placed by all such chargers.

(4) Notwithstanding sub. (2), a municipal utility existing on March 22, 2024, may own and operate an electric vehicle charging station that is available to the public and may charge a fee for using the electric vehicle charging station that is based on the amount of kilowatt-hours of electricity that users consume if all of the following apply:

(a) The electric vehicle charging station receives any approvals from the public service commission required under ch. 196.

(b) No tax revenue subsidizes, directly or indirectly, any costs associated with the electric vehicle charging station. This paragraph does not prohibit a municipal utility from using grant money from this state that is distributed after approval by the joint committee on finance under s. 13.10 or the federal government to pay costs associated with constructing an electric vehicle charging station if the purpose of the grant is to expand the availability of electric vehicle charging infrastructure.

(c) Notwithstanding s. 66.0811(2), no revenue generated by the electric vehicle charging station is transferred to the general fund of the municipality that owns the municipal utility or otherwise directly or indirectly supplements any portion of the municipality's budget.

(5) No local governmental unit may require a private developer to install an electric vehicle charging station or allow the installation of an electric vehicle charging station on the developer's property as a condition of granting a building permit, conditional use permit, or other approval. This subsection does not apply to the enforcement of a voluntary contractual agreement between a developer and local governmental unit.

Chapter 66. General Municipality Law (Refs & Annos)
Subchapter V. Officers and Employees

W.S.A. 66.0501

66.0501. Eligibility for office

Currentness

(1) Deputy sheriffs and municipal police. No person may be appointed deputy sheriff of any county or police officer for any city, village or town unless that person is a citizen of the United States. This section does not apply to common carriers or to a deputy sheriff not required to take an oath of office.

(2) Eligibility of other officers. Except as expressly authorized by statute, no member of a town, village or county board, or city council, during the term for which the member is elected, is eligible for any office or position which during that term has been created by, or the selection to which is vested in, the board or council, but the member is eligible for any elective office. The governing body may be represented on city, village or town boards and commissions where no additional compensation, except a per diem, is paid to the representatives of the governing body and may fix the tenure of these representatives notwithstanding any other statutory provision. A representative of a governing body who is a member of a city, village or town board or commission may receive a per diem only if the remaining members of the board or commission may receive a per diem. This subsection does not apply to a member of any board or council described in this subsection who resigns from the board or council before being appointed to an office or position which was not created during the member's term in office.

(3) Appointments on consolidation of offices. Whenever offices are consolidated, the occupants of which are members of the same statutory committee or board and which are serving in that office because of holding another office or position, the common council or village board may designate another officer or officers or make any additional appointments as may be necessary to procure the number of committee or board members provided for by statute.

(4) Compatible offices and positions. (a) A volunteer fire fighter, emergency medical services practitioner, or emergency medical responder in a city, village, or town whose annual compensation from one or more of those positions, including fringe benefits, does not exceed $25,000 if the city, village, or town has a population of 5,000 or less, or $15,000 if the city, village, or town has a population of more than 5,000, may also hold an elective office in that city, village, or town. It is compatible with his or her office for an elected village or town officer to receive wages under s. 60.37(4) or 61.327 for work that he or she performs for the village or town.

(b) It is compatible with his or her office for a local public official, as defined in s. 19.42(7x), to serve as an election official appointed under s. 7.30(2)(a) and be compensated for that service, as provided under s. 7.03.

(5) Employees may be candidates. (a) In this subsection:

1. “Political subdivision” means a city, village, town, or county.

2. “Public employee” means any individual employed by a political subdivision, other than an individual to whom s. 164.06 applies and other than an individual to whom 5 USC 1502(a)(3) applies.

(b) No political subdivision may prohibit a public employee from being a candidate for any elective public office, if that individual is otherwise qualified to be a candidate. No public employee may be required, as a condition of being a candidate for any elective public office, to take a leave of absence during his or her candidacy. This subsection does not affect the authority of a political subdivision to regulate the conduct of a public employee while the public employee is on duty or otherwise acting in an official capacity.

Editors' Notes

COMMENTS--1999 ACT 150, § 267

Note: Amends the prohibition, in sub. (2), of payment of additional remuneration to a representative of a governing body who sits on a city, village or town board or commission. The amendment provides that a representative of a governing body who is a member of a city, village or town board or commission may receive a per diem if the remaining members of the board or commission also may receive a per diem.

W.S.A. 66.05015

66.05015. Background investigation

Currentness

(1) In this section, "political subdivision" means a city, village, town, or county.

(2)(a)1. Notwithstanding ss. 111.321, 111.322, and 111.335 and with the assistance of the department of justice, a political subdivision shall conduct a background investigation of any person, including a person appointed under a civil service system competitive examination procedure established under s. 59.52(8) or ch. 63, selected to fill a position with the political subdivision and who, in fulfilling the duties of the position, will have access to federal tax information received directly from the federal Internal Revenue Service or from a source that is authorized by the federal Internal Revenue Service.

2. Notwithstanding ss. 111.321, 111.322, and 111.335, at any interval determined appropriate by the political subdivision, a political subdivision may conduct additional background investigations of any person, including a person appointed under a civil service system competitive examination procedure established under s. 59.52(8) or ch. 63, for whom an initial background investigation has been conducted under subd. 1. and background investigations of any other person, including a person appointed under a civil service system competitive examination procedure established under s. 59.52(8) or ch. 63, employed by the political subdivision who, in fulfilling the duties of his or her position, has access to federal tax information received directly from the federal Internal Revenue Service or from a source that is authorized by the federal Internal Revenue Service.

(b) A background investigation under this section may include requiring the person to be fingerprinted on 2 fingerprint cards each bearing a complete set of the person's fingerprints, or by other technologies approved by law enforcement agencies. The department of justice shall submit any such fingerprint cards to the federal bureau of investigation for the purposes of verifying the identity of the person fingerprinted and obtaining records of his or her criminal arrests and convictions.

66.0502. Employee residency requirements prohibited

Currentness

(1) The legislature finds that public employee residency requirements are a matter of statewide concern.

(2) In this section, "local governmental unit" means any city, village, town, county, or school district.

(3)(a) Except as provided in sub. (4), no local governmental unit may require, as a condition of employment, that any employee or prospective employee reside within any jurisdictional limit.

(b) If a local governmental unit has a residency requirement that is in effect on July 2, 2013, the residency requirement does not apply and may not be enforced.

(4)(a) This section does not affect any statute that requires residency within the jurisdictional limits of any local governmental unit or any provision of state or local law that requires residency in this state.

(b) Subject to par. (c), a local governmental unit may impose a residency requirement on law enforcement, fire, or emergency personnel that requires such personnel to reside within 15 miles of the jurisdictional boundaries of the local governmental unit.

(c) If the local governmental unit is a county, the county may impose a residency requirement on law enforcement, fire, or emergency personnel that requires such personnel to reside within 15 miles of the jurisdictional boundaries of the city, village, or town to which the personnel are assigned.

(d) A residency requirement imposed by a local governmental unit under par. (b) or (c) does not apply to any volunteer law enforcement, fire, or emergency personnel who are employees of a local governmental unit.

66.0503. Combination of municipal offices

Currentness

(1) The office of county supervisor may be consolidated by charter ordinance under s. 66.0101:

(a) With the office of village president in any village which has boundaries coterminous with the boundaries of any supervisory district established under s. 59.10(3).

(b) With the office of alderperson or council member in any city in which the district from which the alderperson or council member is elected is coterminous with the boundaries of any supervisory district established under s. 59.10(3).

(2) After the effective date of adoption or repeal of a charter ordinance under this section, the clerk of the municipality shall file a copy of the ordinance with the clerk of the county within which the supervisory district lies. When so consolidated, nomination papers shall contain that number of signatures required under s. 8.10 for county supervisors and shall be filed in the office of the county clerk.

(3) Removal from office of any incumbent of an office consolidated under this section vacates the office in its entirety whether effected under ss. 17.09, 17.12 and 17.13 or other pertinent statute.

(4) Compensation for an office consolidated under this section shall be separately established by the several governing bodies affected by the consolidation as though no consolidation of offices had occurred.

(5) Tenure for an officer of an office consolidated under this section shall coincide with the term for county supervisors.

66.0504. Address confidentiality program

Currentness

(1) Definitions. In this section:

(a) "Actual address" has the meaning given in s. 165.68(1)(b).

(b) "Local clerk" means an individual, and an individual's deputy or assistant, who serves as one of the following:

1. A county clerk under s. 59.23.

2. A clerk of court under s. 59.40.

3. A municipal clerk as defined in s. 5.02(10).

4. A register of deeds under s. 59.43.

(c) "Program participant" has the meaning given in s. 165.68(1)(g).

(2) Identity protection. (a) If a program participant submits a written request to a local clerk that he or she keep the program participant's actual address private, the local clerk may not disclose any record in his or her possession that would reveal the program participant's actual address, except pursuant to a court order.

(b) The provisions of s. 165.68(3)(b)4. a., to the extent that they apply under s. 165.68, apply to a program participant's written request under par. (a).

End of Document

W.S.A. 66.0505

66.0505. Compensation of governing bodies

Currentness

(1) Definitions. In this section:

(a) “Elective officer” means a member or member-elect of the governing body of a political subdivision.

(b) “Political subdivision” means any city, village, town, or county.

(2) Establishment of salary. An elected official of any political subdivision, who by virtue of the office held by that official is entitled to participate in the establishment of the salary attending that office, shall not during the term of the office collect salary in excess of the salary provided at the time of that official's taking office. This provision is of statewide concern and applies only to officials elected after October 22, 1961.

(3) Refusal of salary. (a)1. Notwithstanding the provisions of s. 59.10(1)(c), (2)(c), (3)(f) to (j), 60.32, 61.193, 61.32, or 62.09(6), an elective officer may send written notification to the clerk and treasurer of the political subdivision on whose governing body he or she serves that he or she wishes to refuse to accept the salary that he or she is otherwise entitled to receive.

2. Except as provided in subd. 3., to be valid the notification must be sent no later than the day on which the elective officer takes the oath of office and before he or she performs any services in his or her official capacity, and the notification applies only to the taxable year in which the officer's election is certified or in which the officer is appointed, if the elective officer's current taxable year ends within 3 months of his or her certification or appointment, the notification applies until the end of his or her next taxable year.

3. Except as provided in subd. 2., to be valid the notification must be sent at least 30 days before the start of the elective officer's next taxable year, and the notification applies only to that taxable year although the notification may be renewed annually as provided in this subdivision.

4. If a clerk and treasurer receive notification as described in subd. 2. or 3., the treasurer may not pay the elective officer his or her salary during the time period to which the notification applies. Upon receipt of such notification, the political subdivision's treasurer shall not pay the elective officer the salary that he or she is otherwise entitled to receive, beginning with the first pay period that commences after notification applies.

(b) An elective officer, or officer-elect, who sends the written notification described under par. (a) may not rescind the notification. If an elective officer's notification no longer applies, the political subdivision's treasurer shall pay the elective officer any salary that he or she is entitled to receive, beginning with the first pay period that commences after the expiration of the notification.

W.S.A. 66.0506

66.0506. Referendum; increase in employee wages

Currentness

(1) In this section, "local governmental unit" means any city, village, town, county, metropolitan sewerage district, long-term care district, local cultural arts district under subch. V of ch. 229, or any other political subdivision of the state, or instrumentality of one or more political subdivisions of the state.

(2) If any local governmental unit wishes to increase the total base wages of its general municipal employees, as defined in s. 111.70(1)(fm), who are part of a collective bargaining unit under subch. IV of ch. 111, in an amount that exceeds the limit under s. 111.70(4)(mb)2., the governing body of the local governmental unit shall adopt a resolution to that effect. The resolution shall specify the amount by which the proposed total base wages increase will exceed the limit under s. 111.70(4)(mb)2. The resolution may not take effect unless it is approved in a referendum called for that purpose. The referendum shall occur in November for collective bargaining agreements that begin the following January 1. The results of a referendum apply to the total base wages only in the next collective bargaining agreement.

(3) The referendum question shall be substantially as follows: "Shall the ... [general municipal employees] in the ... [local governmental unit] receive a total increase in wages from $...[current total base wages] to $...[proposed total base wages], which is a percentage wage increase that is ... [x] percent higher than the percent of the consumer price index increase, for a total percentage increase in wages of ... [x]?"

W.S.A. 66.0508

66.0508. Collective bargaining

Currentness

(1) In this section, "local governmental unit" has the meaning given in s. 66.0506(1).

(1m) Except as provided under subch. IV of ch. 111, no local governmental unit may collectively bargain with its employees.

(2) If a local governmental unit has in effect on June 29, 2011, an ordinance or resolution that is inconsistent with sub. (1m), the ordinance or resolution does not apply and may not be enforced.

(3) Each local governmental unit that is collectively bargaining with its employees shall determine the maximum total base wages expenditure that is subject to collective bargaining under s. 111.70(4)(mb)2., calculating the consumer price index change using the same method the department of revenue uses under s. 73.03(68).

W.S.A. 66.0509

66.0509. Civil service system; veterans preference

Currentness

(1) Any city or village may proceed under s. 61.34(1), 62.11(5) or 66.0101 to establish a civil service system of selection, tenure and status, and the system may be made applicable to all municipal personnel except the chief executive and members of the governing body, members of boards and commissions including election officials, employees subject to s. 62.13, members of the judiciary and supervisors. Any town may establish a civil service system under this subsection. For veterans there shall be no restrictions as to age, and veterans and their spouses shall be given preference points in accordance with s. 63.08(1)(fm). The system may also include uniform provisions in respect to attendance, leave regulations, compensation and payrolls for all personnel included in the system. The governing body of any city, village or town establishing a civil service system under this section may exempt from the system the librarians and assistants subject to s. 43.09(1).

(1m)(a) A local governmental unit, as defined in s. 66.0131(1)(a), that does not have a civil service system on June 29, 2011, shall establish a grievance system not later than October 1, 2011.

(b) To comply with the grievance system that is required under par. (a), a local governmental unit may establish either a civil service system under any provision authorized by law, to the greatest extent practicable, if no specific provision for the creation of a civil service system applies to that local governmental unit, or establish a grievance procedure as described under par. (d).

(c) Any civil service system that is established under any provision of law, and any grievance procedure that is created under this subsection, shall contain at least all of the following provisions:

1. A grievance procedure that addresses employee terminations.

2. Employee discipline.

3. Workplace safety.

(d) If a local governmental unit creates a grievance procedure under this subsection, the procedure shall contain at least all of the following elements:

1. A written document specifying the process that a grievant and an employer must follow.

2. A hearing before an impartial hearing officer.

3. An appeal process in which the highest level of appeal is the governing body of the local governmental unit.

(e) If an employee of a local governmental unit is covered by a civil service system on June 29, 2011, and if that system contains provisions that address the provisions specified in par. (c), the provisions that apply to the employee under his or her existing civil service system continue to apply to that employee.

(2)(a) Any town may establish a civil service system under sub. (1) and in the departments that the town board may determine. Any person who has been employed in a department for more than 5 years before the establishment of a civil service system applicable to that department is eligible to appointment without examination.

(b) Any town not having a civil service system and having exercised the option of placing assessors under civil service under s. 60.307(3) may establish a civil service system for assessors under sub. (1), unless the town has come within the jurisdiction of a county assessor under s. 70.99.

(3) When any town has established a system of civil service, the ordinance establishing the system may not be repealed for a period of 6 years after its enactment, and after the 6-year period it may be repealed only by proceedings under s. 9.20 by referendum vote. This subsection does not apply if a town comes, before the expiration of the 6 years, within the jurisdiction of a county assessor under s. 70.99.

(4) Any civil service system established under the provisions of this section shall provide for the appointment of a civil service board or commission and for the removal of the members of the board or commission for cause by the mayor with approval of the council, by the city manager and the council in a city organized under ss. 64.01 to 64.15, and by the board in a village or town.

(5) All examinations given in a civil service system established under this section, including minimum training and experience requirements, for positions in the classified service shall be job-related in compliance with appropriate validation standards and shall be subject to the approval of the board or commission appointed under sub. (4). All relevant experience, whether paid or unpaid, shall satisfy experience requirements.

W.S.A. 66.0511

66.0511. Law enforcement agencies; certain policies

Currentness

(1) Definitions. In this section:

(a) "Choke hold" means the intentional and prolonged application of force to the throat, windpipe, or carotid arteries that prevents or hinders breathing or blood flow, reduces the intake of air, or reduces blood flow to the head.

(b) "Law enforcement agency" has the meaning given under s. 165.83(1)(b).

(2) Use of force policy. Each person in charge of a law enforcement agency shall prepare in writing a policy or standard regulating the use of force by law enforcement officers in the performance of their duties. The law enforcement agency shall make the policy or standard publicly available on a website maintained by the law enforcement agency or, if the agency does not maintain its own site, on a website maintained by the municipality over which the law enforcement agency has jurisdiction. If the policy or standard is changed, the law enforcement agency shall ensure the website displays the updated policy or standard as soon as practically possible but no later than one year after the change is made. The law enforcement agency shall also prominently display a means of requesting a copy of the policy or standard. If a person requests a copy of the policy or standard, the law enforcement agency shall provide a copy of the current policy or standard free of charge as soon as practically possible but no later than 3 business days after the request is made. A law enforcement agency may not authorize the use of choke holds by law enforcement officers in a policy or standard under this subsection, except in life-threatening situations or in self-defense. [1]

(3) Citizen complaint procedure. Each person in charge of a law enforcement agency shall prepare in writing and make available for public scrutiny a specific procedure for processing and resolving a complaint by any person regarding the conduct of a law enforcement officer employed by the agency. The writing prepared under this subsection shall include a conspicuous notification of the prohibition and penalty under s. 946.66.

<Text of subsec. (4) effective July 1, 2025 and repealed by 2023 WI Act 239, § 7, on June 30, 2029.>

(4) Human trafficking prevention and enforcement. Each person in charge of a law enforcement agency in a county that has received a recommendation from the human trafficking council under s. 165.29(1)(d) is encouraged to designate a law enforcement officer of the law enforcement agency to coordinate the law enforcement agency's human trafficking prevention and enforcement efforts.

66.0513. Police, pay when acting outside county or municipality

Currentness

(1) Any chief of police, sheriff, deputy sheriff, county traffic officer or other peace officer of any city, county, village or town, who is required by command of the governor, sheriff or other superior authority to maintain the peace, or who responds to the request of the authorities of another municipality, to perform police or peace duties outside territorial limits of the city, county, village or town where the officer is employed, is entitled to the same wage, salary, pension, worker's compensation, and all other service rights for this service as for service rendered within the limits of the city, county, village or town where regularly employed.

(2) All wage and disability payments, pension and worker's compensation claims, damage to equipment and clothing, and medical expense arising under sub. (1), shall be paid by the city, county, village or town regularly employing the officer. Upon making the payment the city, county, village or town shall be reimbursed by the state, county or other political subdivision whose officer or agent commanded the services out of which the payments arose.

W.S.A. 66.0517

66.0517. Weed commissioner

Currentness

(1) Definition. In this section, "noxious weeds" has the meaning given in s. 66.0407(1)(b).

(2) Appointment. (a) *Town, village and city weed commissioner.* The chairperson of each town, the president of each village and the mayor of each city may appoint one or more commissioners of noxious weeds on or before May 15 in each year. A weed commissioner shall take the official oath and the oath shall be filed in the office of the town, village or city clerk. A weed commissioner shall hold office for one year and until a successor has qualified or the town chairperson, village president or mayor determines not to appoint a weed commissioner. If more than one commissioner is appointed, the town, village or city shall be divided into districts by the officer making the appointment and each commissioner shall be assigned to a different district. The town chairperson, village president or mayor may appoint a resident of any district to serve as weed commissioner in any other district of the same town, village or city.

(b) *County weed commissioner.* A county may by resolution adopted by its county board provide for the appointment of a county weed commissioner and determine the duties, term and compensation for the county weed commissioner. When a weed commissioner has been appointed under this paragraph and has qualified, the commissioner has the powers and duties of a weed commissioner described in this section. Each town chairperson, village president or mayor may appoint one or more deputy weed commissioners, who shall work in cooperation with the county weed commissioner in the district assigned by the appointing officer.

(3) Powers, duties and compensation. (a) *Destruction of noxious weeds.* A weed commissioner shall investigate the existence of noxious weeds in his or her district. If a person in a district neglects to destroy noxious weeds as required under s. 66.0407(3), the weed commissioner shall destroy, or have destroyed, the noxious weeds in the most economical manner. A weed commissioner may enter upon any lands that are not exempt under s. 66.0407(5) and cut or otherwise destroy noxious weeds without being liable to an action for trespass or any other action for damages resulting from the entry and destruction, if reasonable care is exercised.

(b) *Compensation of weed commissioner.* 1. Except as provided in sub.(2)(b), a weed commissioner shall receive compensation for the destruction of noxious weeds as determined by the town board, village board, or city council upon presenting to the proper treasurer the account for noxious weed destruction, verified by oath and approved by the appointing officer. The account shall specify by separate items the amount chargeable to each piece of land, describing the land, and shall, after being paid by the treasurer, be filed with the town, village, or city clerk. The clerk shall enter the amount chargeable to each tract of land in the next tax roll in a column headed "For the Destruction of Weeds", as a tax on the lands upon which the weeds were destroyed. The tax shall be collected under ch. 74, except in case of lands which are exempt from taxation, railroad lands, or other lands for which taxes are not collected under ch. 74. A delinquent tax may be collected as is a delinquent real property tax under chs.

74 and 75 or as is a delinquent personal property tax under ch. 74. In case of railroad lands or other lands for which taxes are not collected under ch. 74, the amount chargeable against these lands shall be certified by the town, village, or city clerk to the secretary of administration who shall add the amount designated to the sum due from the company owning, occupying, or controlling the lands specified. The secretary of administration shall collect the amount chargeable as prescribed in subch. I of ch. 76 and return the amount collected to the town, city, or village from which the certification was received.

2. For the performance of duties other than the destruction of noxious weeds, a weed commissioner shall receive compensation to be determined by the town board, village board or city council.

Credits

<<For credits, see Historical Note field.>>

Editors' Notes

COMMENTS--1999 ACT 150, § 154

Note: Creates s. 66.0517 of the statutes in order to combine the provisions regarding weed commissioners contained in ss. 66.97 to 66.99. The latter statutes are repealed in Section 620 of this bill. The new provision specifies that the appointment of a town, village or city weed commissioner is optional. The provision also differs from s. 66.97 by treating a 1st class city in the same manner as any other city. Otherwise, ss. 66.97 to 66.99 are restated.

66.0601. Appropriations

Currentness

(1) Prohibited appropriations. (a) *Bonus to state institution.* No appropriation or bonus, except a donation, may be made by a town, village, or city, nor municipal liability created nor tax levied, as a consideration or inducement to the state to locate any public educational, charitable, reformatory, or penal institution.

(b) *Payments for abortions restricted.* No city, village, town, long-term care district under s. 46.2895 or agency or subdivision of a city, village or town may authorize funds for or pay to a physician or surgeon or a hospital, clinic or other medical facility for the performance of an abortion except those permitted under and which are performed in accordance with s. 20.927.

(c) *Payments for abortion-related activity restricted.* No city, village, town, long-term care district under s. 46.2895 or agency or subdivision of a city, village or town may authorize payment of funds for a grant, subsidy or other funding involving a pregnancy program, project or service if s. 20.9275(2) applies to the pregnancy program, project or service.

(2) Celebration of holidays. A town, county, school board, or school district may appropriate money for the purpose of initiating or participating in appropriate celebrations of any legal holiday listed in s. 995.20.

W.S.A. 66.0602

66.0602. Local levy limits

Currentness

(1) Definitions. In this section:

(a) "Debt service" includes debt service on debt issued or reissued to fund or refund outstanding municipal or county obligations, interest on outstanding municipal or county obligations, and related issuance costs and redemption premiums.

(ak) "Joint emergency medical services district" means a joint emergency medical services district organized by any combination of 2 or more cities, villages, or towns under s. 66.0301(2).

(am) "Joint fire department" means a joint fire department organized under s. 61.65(2)(a)3. or 62.13(1m), or a joint fire department organized by any combination of 2 or more cities, villages, or towns under s. 66.0301(2).

(au) "Municipality" means a city, village, or town.

(b) "Penalized excess" means the levy, in an amount that is at least $500 over the limit under sub. (2) for the political subdivision, not including any amount that is excepted from the limit under subs. (3), (4), and (5).

(c) "Political subdivision" means a city, village, town, or county.

(cm) "Tax incremental base" has the meaning given in s. 66.1105(2)(j).

(d) "Valuation factor" means a percentage equal to the greater of either the percentage change in the political subdivision's January 1 equalized value due to new construction less improvements removed between the previous year and the current or 0 percent. For a tax incremental district created after December 31, 2024, and for Tax Incremental District Number 10 created by the common council of the city of Evansville, and for Tax Incremental District Number 14 created by the common council of the city of Stevens Point, the valuation factor includes 90 percent of the equalized value increase due to new construction that is located in a tax incremental district, but does not include any improvements removed in a tax incremental district. [1]

(e) "Value increment" has the meaning given in s. 66.1105(2)(m).

(2) Levy limit. (a) Except as provided in subs. (3), (4), and (5), no political subdivision may increase its levy in any year by a percentage that exceeds the political subdivision's valuation factor. Except as provided in par. (b), the base amount in any year, to which the limit under this section applies, shall be the actual levy for the immediately preceding year. In determining its levy in any year, a city, village, or town shall subtract any tax increment that is calculated under s. 59.57(3)(a), 60.85(1)(L), or 66.1105(2)(i). The base amount in any year, to which the limit under this section applies, may not include any amount to which sub. (3)(e)8. applies.

(b) For purposes of par. (a), in 2018, and in each year thereafter, the base amount to which the limit under this section applies is the actual levy for the immediately preceding year, plus the amount of the payments under ss. 79.096 and 79.0965, and the levy limit is the base amount multiplied by the valuation factor, minus the amount of the payments under ss. 79.096 and 79.0965, except that the adjustments for payments received under s. 79.096 or 79.0965 do not apply to payments received under s. 79.096(3) or 79.0965(3) for a tax incremental district that has been terminated.

(2m) Negative adjustment. (a) If a political subdivision's levy for the payment of any general obligation debt service, including debt service on debt issued or reissued to fund or refund outstanding obligations of the political subdivision and interest on outstanding obligations of the political subdivision, on debt originally issued before July 1, 2005, is less in the current year than it was in the previous year, the political subdivision shall reduce its levy limit in the current year by an amount equal to the amount that its levy was reduced as described in this subsection.

(b)1. In this paragraph, "covered service" means garbage collection, fire protection, snow plowing, street sweeping, or storm water management, except that garbage collection may not be a covered service for any political subdivision that owned and operated a landfill on January 1, 2013. With regard to fire protection, "covered service" does not include the production, storage, transmission, sale and delivery, or furnishing of water for public fire protection purposes.

2. Except as provided in subd. 4., if a political subdivision receives revenues that are designated to pay for a covered service that was funded in 2013 by the levy of the political subdivision, the political subdivision shall reduce its levy limit in the current year by an amount equal to the estimated amount of fee revenue collected for providing the covered service, less any previous reductions made under this subdivision, not to exceed the amount funded in 2013 by the levy of the political subdivision.

3. Except as provided in subd. 4., if a political subdivision receives payments in lieu of taxes that are designated to pay for a covered service that was funded in 2013 by the levy of the political subdivision, the political subdivision shall reduce its levy limit in the current year by the estimated amount of payments in lieu of taxes received by the political subdivision to pay for the covered service, less any previous reductions made under this subdivision, not to exceed the amount funded in 2013 by the levy of the political subdivision.

4. The requirement under subd. 2. or 3. does not apply if the governing body of the political subdivision adopts a resolution that the levy limit should not be reduced and if the resolution is approved in a referendum. The procedure under sub. (4) applies to a referendum under this subdivision, except that the resolution and referendum question need not specify an amount of increase in the levy limit or the length of time for which the levy limit increase will apply .

(3) Exceptions. (a) If a political subdivision transfers to another governmental unit responsibility for providing any service that the political subdivision provided in the preceding year, the levy increase limit otherwise applicable under this section to the political subdivision in the current year is decreased to reflect the cost that the political subdivision would have incurred to provide that service, as determined by the department of revenue. The levy increase limit adjustment under this paragraph applies only if the transferor and transferee file a notice of service transfer with the department of revenue.

(b) If a political subdivision increases the services that it provides by adding responsibility for providing a service transferred to it from another governmental unit that provided the service in the preceding year, the levy increase limit otherwise applicable under this section to the political subdivision in the current year is increased to reflect the cost of that service, as determined by the department of revenue. The levy increase limit adjustment under this paragraph applies only if the transferor and transferee file a notice of service transfer with the department of revenue.

(c) If a city or village annexes territory from a town, the city's or village's levy increase limit otherwise applicable under this section is increased in the current year by an amount equal to the town levy on the annexed territory in the preceding year and the levy increase limit otherwise applicable under this section in the current year for the town from which the territory is annexed is decreased by that same amount, as determined by the department of revenue.

(d)1. If the amount of debt service for a political subdivision in the preceding year is less than the amount of debt service needed in the current year, as a result of the political subdivision adopting a resolution before July 1, 2005, authorizing the issuance of debt, the levy increase limit otherwise applicable under this section to the political subdivision in the current year is increased by the difference between these 2 amounts, as determined by the department of revenue.

2. The limit otherwise applicable under this section does not apply to amounts levied by a political subdivision for the payment of any general obligation debt service, including debt service on debt issued or reissued to fund or refund outstanding obligations of the political subdivision, interest on outstanding obligations of the political subdivision, or the payment of related issuance costs or redemption premiums, authorized on or after July 1, 2005, and secured by the full faith and credit of the political subdivision.

3. The limit otherwise applicable under this section does not apply to amounts levied by a county having a population of 750,000 or more for the payment of debt service on appropriation bonds issued under s. 59.85, including debt service on appropriation bonds issued to fund or refund outstanding appropriation bonds of the county, to pay related issuance costs or redemption premiums, or to make payments with respect to agreements or ancillary arrangements authorized under s. 59.86.

4. If the amount of a lease payment related to a lease revenue bond for a political subdivision in the preceding year is less than the amount of the lease payment needed in the current year, as a result of the issuance of a lease revenue bond before July 1, 2005, the levy increase limit otherwise applicable under this section to the political subdivision in the current year is increased by the difference between these 2 amounts.

5. The limit otherwise applicable under this section does not apply to amounts levied by a 1st class city for the payment of debt service on appropriation bonds issued under s. 62.62, including debt service on appropriation bonds issued to fund or refund outstanding appropriation bonds of the city, to pay related issuance costs or redemption premiums, or to make payments with respect to agreements or ancillary arrangements authorized under s. 62.621.

6. The limit otherwise applicable under this section does not apply to the amount that a political subdivision levies to make up any revenue shortfall for the debt service on a special assessment B bond issued under s. 66.0713(4).

(dm) For a tax incremental district created before January 1, 2025, if the department of revenue does not certify a value increment for a tax incremental district for the current year as a result of the district's termination, the levy increase limit otherwise applicable under this section in the current year to the political subdivision in which the district is located is increased by an amount equal to the political subdivision's maximum allowable levy for the immediately preceding year, multiplied by a percentage equal to 50 percent of the amount determined by dividing the value increment of the terminated tax incremental district, calculated for the previous year, by the political subdivision's equalized value, exclusive of any tax incremental district value increments, for the previous year, all as determined by the department of revenue.

(dq)1. For a tax incremental district created after December 31, 2024, and for Tax Incremental District Number 10 created by the common council of the city of Evansville, and for Tax Incremental District Number 14 created by the common council of the city of Stevens Point, if the department of revenue does not certify a value increment for the tax incremental district for the current year as a result of the district's termination, the levy increase limit otherwise applicable under this section in the current year to the political subdivision in which the district is located is increased by all of the following amounts: [2]

a. An amount equal to the political subdivision's maximum allowable levy for the immediately preceding year, multiplied by the amount determined by dividing 10 percent of the equalized value increase of the terminated tax incremental district, calculated as provided in subd. 2., by the political subdivision's equalized value, less any tax incremental district value increments, for the previous year, all as determined by the department of revenue.

b. If the life span of the tax incremental district was 75 percent or less of the length of the expected life span of the tax incremental district, measured as the period between the year the tax incremental district was created and the expected year of termination, as designated under s. 66.1105(4m)(b)2m., an additional amount equal to the political subdivision's maximum allowable levy for the immediately preceding year, multiplied by the amount determined by dividing 15 percent of the equalized value increase of the terminated tax incremental district, calculated as provided in subd. 2., by the political subdivision's equalized value, less any tax incremental district value increments, for the previous year, all as determined by the department of revenue.

2. The equalized value increase under subd. 1. and par. (dv) is calculated by adding the annual amounts reported under s. 66.1105(6m)(c)8. of the value of new construction in the district for each year that the district is active.

(ds) For a tax incremental district created before January 1, 2025, if the department of revenue recertifies the tax incremental base of a tax incremental district as a result of the district's subtraction of territory under s. 66.1105(4)(h)2., the levy limit otherwise applicable under this section shall be adjusted in the first levy year in which the subtracted territory is not part of the value increment. In that year, the political subdivision in which the district is located shall increase the levy limit otherwise applicable by an amount equal to the political subdivision's maximum allowable levy for the immediately preceding year, multiplied by a percentage equal to 50 percent of the amount determined by dividing the value increment of the tax incremental district's territory that was subtracted, calculated for the previous year, by the political subdivision's equalized value, exclusive of any tax incremental district value increments, for the previous year, all as determined by the department of revenue.

(dv) For a tax incremental district created after December 31, 2024, and for Tax Incremental District Number 10 created by the common council of the city of Evansville, and for Tax Incremental District Number 14 created by the common council

of the city of Stevens Point, if the department of revenue recertifies the tax incremental base of a tax incremental district as a result of the district's subtraction of territory under s. 66.1105(4)(h)2., the levy limit otherwise applicable under this section shall be adjusted in the first levy year in which the subtracted territory is not part of the value increment. In that year, the political subdivision in which the district is located shall increase the levy limit otherwise applicable by an amount equal to the political subdivision's maximum allowable levy for the immediately preceding year, multiplied by a percentage equal to 10 percent of the amount determined by dividing the equalized value increase, calculated as provided in par. (dq)2., attributable to the territory that was subtracted, calculated for the previous year, by the political subdivision's equalized value, exclusive of any tax incremental district value increments, for the previous year, all as determined by the department of revenue. [3]

(e) The limit otherwise applicable under this section does not apply to any of the following:

1. The amount that a county levies in that year for a county children with disabilities education board.

2. The amount that a 1st class city levies in that year for school purposes.

3. The amount that a county levies in that year under s. 82.08(2) for bridge and culvert construction and repair.

4. The amount that a county levies in that year to make payments to public libraries under s. 43.12.

5. The amount that a political subdivision levies in that year to make up any revenue shortfall for the debt service on a revenue bond issued under s. 66.0621 by the political subdivision or by a joint fire department if the joint fire department uses the proceeds of the bond to pay for a fire station and assesses the political subdivision for its share of that debt, under an agreement entered into under s. 66.0301, which is incurred by the joint fire department but is the responsibility of the political subdivision.

6. The amount that a county levies in that year for a countywide emergency medical system.

7. The amount that a village levies in that year for police protection services, but this subdivision applies only to a village's levy for the year immediately after the year in which the village changes from town status and incorporates as a village, and only if the town did not have a police force.

8. The amount that a political subdivision levies in that year to pay the unreimbursed expenses related to an emergency declared under s. 323.10, including any amounts levied in that year to replenish cash reserves that were used to pay any unreimbursed expenses related to that emergency. A levy under this subdivision that relates to a particular emergency initially shall be imposed in the year in which the emergency is declared or in the following year.

9. The political subdivision's share of any refund or rescission determined by the department of revenue and certified under s. 74.41(5).

(f)1. Subject to subd. 3., and unless a political subdivision makes an adjustment under par. (fm), if a political subdivision's allowable levy under this section in the prior year was greater than its actual levy in that year, the levy increase limit otherwise applicable under this section to the political subdivision in the next succeeding year is increased by the difference between

the prior year's allowable levy and the prior year's actual levy, as determined by the department of revenue, up to a maximum increase of 1.5 percent of the actual levy in that prior year.

3. The adjustment described in subd. 1. may occur only if the political subdivision's governing body approves of the adjustment by one of the following methods:

a. With regard to a city, village, or county, if the governing body consists of at least 5 members, by a majority vote of the governing body if the increase is 0.5 percent or less and by a three-quarters majority vote of the governing body if the increase is more than 0.5 percent, up to a maximum increase of 1.5 percent.

b. With regard to a city, village, or county, if the governing body consists of fewer than 5 members, by a majority vote of the governing body if the increase is 0.5 percent or less and by a two-thirds majority vote of the governing body if the increase is more than 0.5 percent, up to a maximum increase of 1.5 percent.

c. With a regard to a town, by a majority vote of the annual town meeting, or a special town meeting, if the town board has adopted a resolution approving of the adjustment by a majority vote of the town board if the increase is 0.5 percent or less and by a two-thirds majority vote of the town board if the increase is more than 0.5 percent, up to a maximum increase of 1.5 percent.

(fm)1. Subject to subds. 3. and 4., a political subdivision's levy increase limit otherwise applicable under this section may be increased by any amount up to the maximum adjustment specified under subd. 2.

2. The maximum adjustment allowed under subd. 1. shall be calculated by adding the difference between the political subdivision's valuation factor in the previous year and the actual percent increase in a political subdivision's levy attributable to the political subdivision's valuation factor in the previous year, for the 5 years before the current year, less any amount claimed under subd. 1. in one of the 5 preceding years, except that the calculation may not include any year before 2014, and the maximum adjustment as calculated under this subdivision may not exceed 5 percent.

3. The adjustment described in subd. 1. may occur only if the political subdivision's governing body approves of the adjustment by a two-thirds majority vote of the governing body and if the political subdivision's level of outstanding general obligation debt in the current year is less than or equal to the political subdivision's level of outstanding general obligation debt in the previous year.

4. This paragraph first applies to a levy that is imposed in 2015, and no political subdivision may make an adjustment under this paragraph if it makes an adjustment under par. (f) for the same year.

(g) If a county has provided a service in a part of the county in the preceding year and if a city, village, or town has provided that same service in another part of the county in the preceding year, and if the provision of that service is consolidated at the county level, the levy increase limit otherwise applicable under this section to the county in the current year is increased to reflect the total cost of providing that service, as determined by the department of revenue.

(h) 1. Subject to subd. 2., the limit otherwise applicable under this section does not apply to the amount that a city, village, or town levies in that year to pay for charges assessed by a joint fire department or a joint emergency medical services district,

but only to the extent that the amount levied to pay for such charges would cause the city, village, or town to exceed the limit that is otherwise applicable under this section.

2. The exception to the limit that is described under subd. 1. applies only if all of the following apply:

a. The total charges assessed by the joint fire department or the joint emergency medical services district for the current year increase, relative to the total charges assessed by the joint fire department or the joint emergency medical services district for the previous year, by a percentage that is less than or equal to the percentage change in the U.S. consumer price index for all urban consumers, U.S. city average, as determined by the U.S. department of labor, for the 12 months ending on August 31 of the year of the levy, plus 2 percent.

b. The governing body of each city, village, and town that is served by the joint fire department or the joint emergency medical services district adopts a resolution in favor of exceeding the limit as described in subd. 1.

(i)1. If a political subdivision enters into an intergovernmental cooperation agreement under s. 66.0301 to jointly provide a service on a consolidated basis with another political subdivision, and if one of the political subdivisions increases its levy from the previous year by an amount the parties to the agreement agree is needed to provide a more equitable distribution of payments for services received, the levy increase limit otherwise applicable under this section to that political subdivision in the current year is increased by that agreed amount.

2. If a political subdivision increases its levy as described in subd. 1. the other political subdivision, which is a party to the intergovernmental cooperation agreement and has agreed to the adjustment under subd. 1., shall decrease its levy in the current year by the same amount that the first political subdivision is allowed to increase its levy under subd. 1.

(j)1. Subject to subd. 2., if a municipality experiences a shortfall in its general fund due to a loss of revenue received by the municipality from the sale of water or another commodity to a manufacturing facility as a result of the manufacturer discontinuing operations at the facility, the limit otherwise applicable under this section may be increased by the amount that the municipality levies to make up for the revenue shortfall.

2. The maximum adjustment claimed under subd. 1. shall equal the revenue received by the municipality from the sale of water or another commodity, as described in subd. 1., in the year prior to the year in which the manufacturing facility closed. A municipality may claim the adjustment in more than one year, except that the sum of all such adjustments may not exceed the revenue loss to the municipality's general fund in the year that the manufacturer discontinues operations at the facility.

(k)1. Subject to subds. 2. and 3., if the village of Shorewood reduces its levy from the amount it would have levied for 2011 if not for an error in the valuation of Tax Incremental District Number 1 in the village, to compensate for that error, the limit otherwise applicable under this section to the village in 2012 is increased by the amount of the reduction, as determined by the department of revenue. The amounts added to the village's limit for 2012 under this subdivision may not exceed the amount by which the village underutilized its limit for 2011, as determined by the department of revenue.

2. If the village of Shorewood applies funds from the village's general fund in 2011 to replace amounts not levied to compensate for an error in the valuation of Tax Incremental District Number 1 in the village, the limits otherwise applicable under this section to the village in 2012 and 2013 are increased by the amount applied from the general fund in 2011, as determined by

the department of revenue. The village's limit increases under this subdivision for 2012 and 2013 do not increase the village's limit for any subsequent year.

3. The combined amount of increased levy in 2012 and 2013 by the village of Shorewood under subd. 2. may not exceed the amount of the funds applied from the general fund to replace amounts not levied in 2011 to compensate for an error in the valuation of Tax Incremental District Number 1 in the village.

(L) If the village of Warrens reduces its levy from the amount it would have levied for 2012 if not for an error in the valuation of Tax Incremental District Number 1 in the village, to compensate for that error, the limit otherwise applicable under this section to the village in 2013 is increased by the amount of the reduction, as determined by the department of revenue. The amounts added to the village's limit for 2013 under this paragraph may not exceed the amount by which the village underutilized its limit for 2012, as determined by the department of revenue.

(Lm) If the city of Fox Lake reduces its levy from the amount it would have levied for 2012 if not for an error in the valuation of Tax Incremental District Number 1 in the city, to compensate for that error, the limit otherwise applicable under this section to the city in 2013 is increased by the amount of the reduction, as determined by the department of revenue. The amounts added to the city's limit for 2013 under this paragraph may not exceed the amount by which the city underutilized its limit for 2012, as determined by the department of revenue.

(m)1. The levy increase limit otherwise applicable under this section to a city, village, or town in the current year is increased by $1,000 for each new single-family residential dwelling unit for which a city, village, or town issues an occupancy permit in the preceding year and that is all of the following:

a. Located on a parcel of no more than 0.25 acre in a city or village, or on a parcel of no more than one acre in a town.

b. Sold in the preceding year for not more than 80 percent of the median price of a new residential dwelling unit in the city, village, or town in the preceding year.

2. Amounts levied under this paragraph may be used only for police protective services, fire protective service, or emergency medical services.

3. If a city, village, or town levies an amount under this paragraph, the city, village, or town may not decrease the amount it spends for police protective services, fire protective services, or emergency medical services below the amount the city, village, or town spent in the preceding year.

(n)1. For a political subdivision that receives a payment under s. 79.04(5)(a) or (b), the limit otherwise applicable under this section is increased by the amount that the political subdivision levies in that year to replace a revenue reduction incurred under s. 79.04(5)(a) or (b). Subject to subd. 2., the amount levied under this paragraph for a particular property may not exceed the amount paid to the political subdivision under s. 79.04(5)(a)1. or (b)1. less the amount to be paid to the political subdivision under s. 79.04(5)(a) or (b) in the year in which the levy is imposed and less any amounts previously levied under this paragraph. A revenue reduction is incurred under this paragraph when the amount received by a political subdivision under s. 79.04(5)(a) or (b) in the current year is less than the amount received under s. 79.04(5)(a) or (b) in the previous year.

2. This paragraph applies to revenue reductions for which a payment under s. 79.04(5)(a) or (b) is made after November 23, 2019. If the first payment made under s. 79.04(5)(a) or (b) after November 23, 2019, is under s. 79.04(5)(a)2. to 5. or (b)2. to 5., the amount of the payment made under s. 79.04(5)(a) or (b) in the previous year shall be used in determining the maximum amount of revenue reduction incurred.

(4) Referendum exception. (a) A political subdivision may exceed the levy increase limit under sub. (2) if its governing body adopts a resolution to that effect and if the resolution is approved in a referendum. For purposes of this paragraph, the political subdivision may use its best estimate of its valuation factor, based on the most current data available to it. The resolution shall specify the proposed amount of increase in the levy, the purpose for which the increase will be used, and whether the proposed amount of increase is for the next fiscal year only or if it will apply on an ongoing basis. With regard to a referendum relating to any levy in an odd-numbered year, the political subdivision may call a special referendum for the purpose of submitting the resolution to the electors of the political subdivision for approval or rejection on the same election dates as when a school board may call for a referendum under s. 121.91(3). Otherwise, the referendum shall be held at the spring primary or election or partisan primary or general election.

(b) The clerk of the political subdivision shall publish type A, B, C, D, and E notices of the referendum under s. 10.01(2). Section 5.01(1) applies in the event of failure to comply with the notice requirements of this paragraph.

(c) The referendum shall be held in accordance with chs. 5 to 12. The political subdivision shall provide the election officials with all necessary election supplies. The form of the ballot shall correspond substantially with the standard form for referendum ballots under ss. 5.64(2) and 7.08(1)(a). The question shall be submitted as follows: “Under state law, the increase in the levy of the .... (name of political subdivision) for the tax to be imposed for the next fiscal year, ... (year), is limited to ....% (based on actual data or the political subdivision's best estimate), which results in a levy of $.... Shall the .... (name of political subdivision) be allowed to exceed this limit and increase the levy for the next fiscal year, ... (year), for .... (purpose for which the increase will be used), by a total of ....% (based on actual data or the political subdivision's best estimate), which results in a levy of $....?”. If the increase is for the next fiscal year only, the question shall include the percentage increase in the levy from the previous year's levy, and, if the increase is on an ongoing basis, the question shall include the amount of the increase for each fiscal year for which the increase applies.

(d) Within 14 days after the referendum, the clerk of the political subdivision shall certify the results of the referendum to the department of revenue. The levy increase limit otherwise applicable to the political subdivision under this section is increased in the next fiscal year by the percentage approved by a majority of those voting on the question. If the resolution specifies that the increase is for one year only, the amount of the increase shall be subtracted from the base used to calculate the limit for the 2nd succeeding fiscal year.

(5) Exception, certain towns. A town with a population of less than 3,000 may exceed the levy increase limit otherwise applicable under this section to the town if the town board adopts a resolution supporting an increase and places the question on the agenda of an annual town meeting or a special town meeting and if the annual or special town meeting adopts a resolution endorsing the town board's resolution. The limit otherwise applicable to the town under this section is increased in the next fiscal year by the percentage approved by a majority of those voting on the question. Within 14 days after the adoption of the resolution, the town clerk shall certify the results of the vote to the department of revenue.

(6) Penalties. Except as provided in sub. (6m), if the department of revenue determines that a political subdivision has a penalized excess in any year, the department of revenue shall do all of the following:

(a) Reduce the amount of the payment to the political subdivision under s. 79.02(1) in the following year by an amount equal to the amount of the penalized excess.

(b) Ensure that the amount of any reductions in payments under par. (a) lapses to the general fund.

(c) Ensure that the amount of the penalized excess is not included in determining the limit described under sub. (2) for the political subdivision for the following year.

(d) Ensure that, if a political subdivision's penalized excess exceeds the amount of aid payment that may be reduced under par. (a), the excess amount is subtracted from the aid payments under par. (a) in the following years until the total amount of penalized excess is subtracted from the aid payments.

(6m) Mistakes in levies. The department of revenue may issue a finding that a political subdivision is not liable for a penalty that would otherwise be imposed under sub. (6) if the department determines that the political subdivision's penalized excess is caused by one of the following clerical errors:

(a) The department, through mistake or inadvertence, has assessed to any county or taxation district, in the current year or in the previous year, a greater or less valuation for any year than should have been assessed, causing the political subdivision's levy to be erroneous in a way that directly causes a penalized excess.

(b) A taxation district clerk or a county clerk, through mistake or inadvertence in preparing or delivering the tax roll, causes a political subdivision's levy to be erroneous in a way that directly causes a penalized excess.

Editors' Notes

JOINT LEGISLATIVE COUNCIL PREFATORY NOTES--2015 ACT 256

This bill was prepared for the Joint Legislative Council's Study Committee on Review of Tax Incremental Financing.

Industrial Zoning Requirement in Tax Incremental Districts

Under current law, a resolution to create a tax incremental district (TID) must include a finding that not less than 50 percent, by area, of the real property within the district is at least one of the following: a blighted area; in need of rehabilitation or conservation work; suitable for industrial sites and zoned for industrial use; or suitable for mixed-use development. The resolution must also confirm that any real property within the district that is found suitable for industrial sites and is zoned for industrial use will remain zoned for industrial use for the life of the tax incremental district, and must declare that the district is a blighted area district, a rehabilitation or conservation district, an industrial district, or a mixed-use district based on the identification and classification of the property included within the district.

The bill specifies that the requirement related to maintenance of industrial zoning applies on to districts that declared to be industrial districts.

Planning Commission Notice for TID Amendments

Under current law, a TID's project plan may be amended for several reasons, including modification of the expenditures allowed in a TID's project plan, addition or subtraction of territory to the TID's boundaries, extension of the TID's lifespan, and donation of tax increments to another TID.

Generally, the process to amend a TID's project plan is similar to the process of creating a TID, requiring a public hearing held by the planning commission and adoption of resolutions by the planning commission, municipality, and joint review board (JRB) to approve the plan or amendment. As part of this process, the planning commission must publish a class 2 notice of its public hearing. The JRB must publish notice of its meeting as a class 1 notice, at least five days before the meeting.

Under current law, a class 2 notice consists of insertions of the notice for two consecutive weeks, with the last insertion at least a week prior to the meeting date, in the appropriate newspaper of record under ch. 985, stats. A class 1 notice, unless otherwise specified (for example, the requirement that the JRB must publish a notice five days before its meeting), requires a single insertion of the notice, at least a week prior to the meeting date, in the appropriate newspaper of record.

The bill amends the notice requirement of the planning commission from a class 2 notice to a class 1 notice with regard to notices relating to the TID amendment process.

Obsolete References

Over time, the statutes relating to tax incremental financing have been amended to include numerous provisions that are significantly limited in their scope, often relating to a single municipality or a particular TID. Often, these amendments offer special statutory authorization regarding creation, amendment, or lifespan of a particular district or class of districts or to TIDs in a particular municipality.

The bill repealed certain provisions of the statutes relating to tax incremental financing that the Department of Revenue (DOR) identified as obsolete.

Timing Penalty

Under current law, certain statutory and administrative deadlines relating to the allocation of positive tax increments to a TID combine to resolute in variation in the maximum number of positive increments that may be allocated to a TID, depending on the date on which a municipality acted to create the TID and its project plan. In particular, the maximum number of positive increments that a TID may receive is one fewer for a TID and project plan created after September 30 and before May 15 than for TIDs created on or after May 15 and before October 1.

For newly created TIDs, the bill extends a TID's lifespan and allocation period of positive tax increments by one year if the municipality that created the TID adopts the project plan for the TID after September 30 and before May 15.

Joint Review Board Review Period

Before a municipality's resolution to create a TID, amend a TID's project plan, or require DOR to redetermine a TID's base value may take effect, several steps are required. One of these steps is JRB approval of a municipality's

TID resolution. A JRB consists of members who represent the overlying taxation districts. In general, the JRB must approve the resolution by a majority vote within 30 days after receiving the resolution. The review period applicable to an industry-specific TID located in a town and an environmental remediation TID is not less than 10 days nor more than 30 days.

The bill amends the maximum review period the JRB has to approve a municipality's TID resolution from 30 days to 45 days after receiving the resolution.

Calculation of Levy Limit Exception

Generally, under the current local levy law, and subject to a number of exceptions, a city, village, town, or county (political subdivision) may not increase its base levy (the prior year's actual levy) in any year by more than the percentage change in the political subdivision's equalized value due to new construction, less improvements removed, including new construction that occurs in a TID between the previous year and the current year, but not less than 0 percent. Also, when determining its levy limit, a municipality must exclude the amount of any tax increment generated by property in a TID located in the municipality.

There are numerous exceptions that may be used to adjust a political subdivision's levy limit. One exception authorizes an increase in a municipality's levy limit for the year that a TID terminates. If DOR does not certify a TID as a result of the district's termination, the levy limit otherwise applicable is increased by an amount equal to the municipality's maximum allowable levy for the preceding year, multiplied by a percentage equal to 50 percent of the amount determined by dividing the terminated TID's value increment by the municipality's equalized value, as determined by DOR. The increase must be applied to the municipality's levy limit in the year that the TID terminates.

The bill specifies that the municipality's equalized value for the preceding year, as used in the calculation of the levy limit exception for the year that a TID terminates, excludes the value of any TID value increments.

[Section 2] This section excludes the value of any TID increments from the calculation of the levy limit exception that applies for the year a TID terminates.

LAW REVISION COMMITTEE NOTES--2015 ACT 191

This bill is a remedial legislation proposal, requested by the Department of Revenue and introduced by the Law Revision Committee under s. 13.83(1)(c)4. and 5., stats. After careful consideration of the various provisions of the bill, the Law Revision Committee has determined that this bill makes minor substantive changes in the statutes, and that these changes are desirable as a matter of public policy.

[Section 1] Removes the reference to the elections board, which was eliminated by 2007 Wisconsin Act 1.

Footnotes

1 Par. (d) is shown as amended by 2023 Wis. Acts 135 and 136 and as merged by the legislative reference bureau under s. 13.92 (2) (i).

2 Subd. 1. (intro.) is shown as amended by 2023 Wis. Acts 135 and 136 and as merged by the legislative reference bureau under s. 13.92 (2) (i).

3 Par. (dv) is shown as amended by 2023 Wis. Acts 135 and 136 and as merged by the legislative reference bureau under s. 13.92 (2) (i).

66.0603. Investments

Currentness

(1g) Definition. In this section, "governing board" has the meaning given under s. 34.01(1) but does not include a local exposition district board created under subch. II of ch. 229 or a local cultural arts district board created under subch. V of ch. 229.

(1m) Investments. (a) A county, city, village, town, school district, drainage district, technical college district or other governing board, other than a local professional football stadium district board created under subch. IV of ch. 229, may invest any of its funds not immediately needed in any of the following:

1. Time deposits in any credit union, bank, savings bank, trust company, or savings and loan association which is authorized to transact business in this state.

2. Bonds or securities issued or guaranteed as to principal and interest by the federal government, or by a commission, board or other instrumentality of the federal government.

3. Bonds or securities of any county, city, drainage district, technical college district, village, town or school district of this state.

3m. Bonds issued by a local exposition district under subch. II of ch. 229.

3p. Bonds issued by a local professional baseball park district created under subch. III of ch. 229.

3q. Bonds issued by a local professional football stadium district created under subch. IV of ch. 229.

3s. Bonds issued by the University of Wisconsin Hospitals and Clinics Authority.

3t. Bonds issued by a local cultural arts district under subch. V of ch. 229.

3u. Bonds issued by the Wisconsin Aerospace Authority.

4. Any security which matures or which may be tendered for purchase at the option of the holder within not more than 7 years of the date on which it is acquired, if that security has a rating which is the highest or 2nd highest rating category assigned by Standard & Poor's corporation, Moody's investors service or other similar nationally recognized rating agency or if that security is senior to, or on a parity with, a security of the same issuer which has such a rating.

5. Securities of an open-end management investment company or investment trust, if the investment company or investment trust does not charge a sales load, if the investment company or investment trust is registered under the investment company act of 1940, 15 USC 80a-1 to 80a-64, and if the portfolio of the investment company or investment trust is limited to the following:

a. Bonds and securities issued by the federal government or a commission, board or other instrumentality of the federal government.

b. Bonds that are guaranteed as to principal and interest by the federal government or a commission, board or other instrumentality of the federal government.

c. Repurchase agreements that are fully collateralized by bonds or securities under subd. 5.a. or b.

(b)1. A town, city, or village may invest surplus funds in any bonds or securities issued under the authority of the municipality, whether the bonds or securities create a general municipality liability or a liability of the property owners of the municipality for special improvements, and may sell or hypothecate the bonds or securities. Funds of an employer, as defined by s. 40.02(28), in a deferred compensation plan may also be invested and reinvested in the same manner authorized for investments under s. 881.01.

2. Funds of any school district operating under ch. 119, held in trust for pension plans intended to qualify under section 401(a) of the Internal Revenue Code, other than funds held in the public employee trust fund, may be invested and reinvested in the same manner as is authorized for investments under s. 881.01.

3. A school district may invest and reinvest funds that are held in trust, other than funds held in the public employee trust fund, solely to provide any of the following benefits, in the same manner as is authorized for investments under s. 881.01:

a. Post-employment health care benefits provided either separately or through a defined benefit pension plan.

b. Other post-employment benefits provided separately from a defined benefit pension plan.

4. A school board may not discuss or vote on establishing a trust fund to provide the benefits described in subd. 3. unless the notice of the school board meeting at which the discussion or vote may occur includes the issue as a separate agenda item.

5. A city, village, town, county, drainage district, technical college district, or other governing board as defined by s. 34.01(1) may invest and reinvest funds that are held in trust, other than funds held in the public employee trust fund, solely to provide any of the following benefits, in the same manner as is authorized for investments under s. 881.01:

a. Post-employment health care benefits provided either separately or through a defined benefit pension plan.

b. Other post-employment benefits provided separately from a defined benefit pension plan.

6. Funds that are held in trust to provide the benefits described in subds. 3. and 5. shall be held in a trust fund that is separate from all other trust funds created by, or under the control of, the local governmental unit.

(c) A local government, as defined under s. 25.50(1)(d), may invest surplus funds in the local government pooled-investment fund. Cemetery care funds, including gifts where the principal is to be kept intact, may also be invested under ch. 881.

(d) A county, city, village, town, school district, drainage district, technical college district or other governing board as defined by s. 34.01(1) may engage in financial transactions in which a public depository, as defined in s. 34.01(5), agrees to repay funds advanced to it by the local government plus interest, if the agreement is secured by bonds or securities issued or guaranteed as to principal and interest by the federal government.

(e) Subject to s. 67.11(2) with respect to funds on deposit in a debt service fund for general obligation promissory notes issued under s. 67.12(12), a county having a population of 750,000 or more, or a person to whom the county has delegated investment authority under sub. (5), may invest and reinvest in the same manner as is authorized for investments and reinvestments under s. 881.01, any of the following:

1. Moneys held in any stabilization fund established under s. 59.87(3).

2. Moneys held in a fund or account, including any reserve fund, created in connection with the issuance of appropriation bonds under s. 59.85 or general obligation promissory notes under s. 67.12(12) issued to provide funds for the payment of all or a part of the county's unfunded prior service liability.

3. Moneys appropriated or held by the county to pay debt service on appropriation bonds or general obligation promissory notes under s. 67.12(12).

4. Moneys constituting proceeds of appropriation bonds or general obligation promissory notes described in subd. 2. that are available for investment until they are spent.

5. Moneys held in an employee retirement system of the county.

(f) Subject to s. 67.11(2) with respect to funds on deposit in a debt service fund for general obligation promissory notes issued under s. 67.12(12), a 1st class city, or a person to whom the city has delegated investment authority under sub. (5), may invest and reinvest in the same manner as is authorized for investments and reinvestments under s. 881.01, any of the following:

1. Moneys held in any stabilization fund established under s. 62.622(3).

2. Moneys held in a fund or account, including any reserve fund, created in connection with the issuance of appropriation bonds under s. 62.62 or general obligation promissory notes under s. 67.12(12) issued to provide funds for the payment of all or a part of the city's unfunded prior service liability.

3. Moneys appropriated or held by the city to pay debt service on appropriation bonds or general obligation promissory notes under s. 67.12(12).

4. Moneys constituting proceeds of appropriation bonds or general obligation promissory notes described in subd. 2. that are available for investment until they are spent.

5. Moneys held in an employee retirement system of the city.

(g) A technical college district that receives funds from participation in an auction of digital broadcast spectrum administered by the federal communications commission may hold those funds in trust and may invest and reinvest those funds in the same manner authorized for investments under s. 881.01. Funds held in trust under this paragraph may only be distributed from the trust in a manner consistent with ch. 38 and in accordance with the terms of the trust. Any trust formed pursuant to this paragraph shall be separate from any other trust created by, or under the control of, the technical college district.

(2) Delegation of investment authority. A county, city, village, town, school district, drainage district, technical college district or other governing board, as defined in s. 34.01(1), may delegate the investment authority over any of its funds not immediately needed to a state or national bank, or trust company, which is authorized to transact business in this state if all of the following conditions are met:

(a) The institution is authorized to exercise trust powers under s. 221.0316 or ch. 223.

(b) The governing board renews annually the investment agreement under which it delegates its investment authority, and reviews annually the performance of the institution with which its funds are invested.

(3) Additional delegation of investment authority. (a) In addition to the authority granted under sub. (2), a school district operating under ch. 119 may delegate the investment authority over any of its funds not immediately needed and held in trust for its qualified pension plans to an investment manager who meets the requirements and qualifications specified in the trust's investment policy and who is registered as an investment adviser under the Investment Advisers Act of 1940, 15 USC 80b-3.

(b) In addition to the authority granted under sub. (2), a school district may delegate the investment authority over the funds described under sub. (1m)(b)3. to an investment manager who meets the requirements and qualifications specified in the trust's investment policy and who is registered as an investment adviser under 15 USC 80b-3.

(c)1. In addition to the authority granted under sub. (2), a city, village, town, county, drainage district, technical college district, or other governing board as defined by s. 34.01(1) may delegate the investment authority over the funds described under sub. (1m)(b)5. to an investment manager who meets the requirements and qualifications specified in the trust's investment policy and who is registered as an investment adviser under 15 USC 80b-3.

2. If a unit of government described under subd. 1. has established a trust described in sub. (1m)(b)5., it shall annually publish a written report that states the amount in the trust, the investment return earned by the trust since the last report was published, the total disbursements made from the trust since the last report was published, and the name of the investment manager if investment authority has been delegated under subd. 1.

(d)1. In addition to the authority granted under sub. (2), a technical college district may delegate the investment authority over the funds described under sub. (1m)(g) to an investment manager who meets the requirements and qualifications specified in the trust's investment policy and who is registered as an investment adviser under the Investment Advisers Act of 1940, 15 USC 80b-3.

2. If a technical college district has established a trust described in sub. (1m)(g), it shall annually publish a written report that states the amount in the trust, the investment return earned by the trust since the last report was published, the total disbursements made from the trust since the last report was published, and the name of the investment manager if investment authority has been delegated under subd. 1.

(4) Invested fund proceeds in populous cities, use. In a 1st class city, all interest derived from invested funds held by the city treasurer in a custodial capacity on behalf of any political entity, except for pension funds, is general revenue of the city and shall revert to the city's general fund upon the approval by the political entity evidenced by a resolution adopted for that purpose.

(5) Delegation of investment authority in connection with pension financing in populous cities and counties. The governing body of a county having a population of 750,000 or more, or a 1st class city, may delegate investment authority over any of the moneys described in sub. (1m)(e) or (f) to any of the following persons, which shall be responsible for the general administration and proper operation of the county's or city's employee retirement system, subject to the governing body's finding that such person has expertise in the field of investments:

(a) A public board that is organized for such purpose under county or city ordinances.

(b) A trustee, investment advisor, or investment banking or consulting firm.

66.0605. Local government audits and reports

Currentness

Notwithstanding any other statute, the governing body of a county, city, village or town may require or authorize a financial audit of a municipal or county officer, department, board, commission, function or activity financed in whole or part from municipal or county funds, or if any portion of the funds are the funds of the county, city, village or town. The governing body may require submission of periodic financial reports by the officer, department, board, commission, function or activity.

66.0607. Withdrawal or disbursement from local treasury

Currentness

(1) Except as otherwise provided in subs. (2) to (5) and in s. 66.0608(3m), in a county, city, village, town, or school district, all disbursements from the treasury shall be made by the treasurer upon the written order of the county, city, village, town, or school clerk after proper vouchers have been filed in the office of the clerk. If the statutes provide for payment by the treasurer without an order of the clerk, the clerk shall draw and deliver to the treasurer an order for the payment before or at the time that the payment is required to be made by the treasurer. This section applies to all special and general provisions of the statutes relative to the disbursement of money from the county, city, village, town, or school district treasury except s. 67.10(2).

(2) Notwithstanding other law, a county having a population of 750,000 or more may, by ordinance, adopt any other method of allowing vouchers, disbursing funds, reconciling outstanding county orders, reconciling depository accounts, examining county orders, and accounting consistent with accepted accounting and auditing practices, if the ordinance prior to its adoption is submitted to the department of revenue, which shall submit its recommendations on the proposed ordinance to the county board of supervisors.

(3) Except as provided in subs. (2), (3m) and (5), disbursements of county, city, village, town or school district funds from demand deposits shall be by draft or order check and withdrawals from savings or time deposits shall be by written transfer order. Written transfer orders may be executed only for the purpose of transferring deposits to an authorized deposit of the public depositor in the same or another authorized public depository. The transfer shall be made directly by the public depository from which the withdrawal is made. No draft or order check issued under this subsection may be released to the payee, nor is the draft or order check valid, unless signed by the clerk and treasurer. No transfer order is valid unless signed by the clerk and the treasurer. Unless otherwise directed by ordinance or resolution adopted by the governing body, a certified copy of which shall be filed with each public depository concerned, the chairperson of the county board, mayor, village president, town chairperson or school district president shall countersign all drafts or order checks and all transfer orders. The governing body may also, by ordinance or resolution, authorize additional signatures. In lieu of the personal signatures of the clerk and treasurer and any other required signature, the facsimile signature adopted by the person and approved by the governing body may be affixed to the draft, order check or transfer order. The use of a facsimile signature does not relieve an official from any liability to which the official is otherwise subject, including the unauthorized use of the facsimile signature. A public depository is fully warranted and protected in making payment on any draft or order check or transferring pursuant to a transfer order bearing a facsimile signature affixed as provided by this subsection notwithstanding that the facsimile signature may have been affixed without the authority of the designated persons.

(3m) A county, city, village, town or school district may process periodic payments through the use of money transfer techniques, including direct deposit, electronic funds transfer and automated clearinghouse methods. The county, municipal or school district treasurer shall keep a record of the date, payee and amount of each disbursement made by a money transfer technique.

(4) Except as provided in sub. (3m), if a board, commission or committee of a county, city, village, town or school district is vested by statute with exclusive control and management of a fund, including the audit and approval of payments from the fund, independently of the governing body, payments under this section shall be made by drafts or order checks issued by the county, city, village, town or school clerk upon the filing with the clerk of certified bills, vouchers or schedules signed by the proper officers of the board, commission or committee, giving the name of the claimant or payee, and the amount and nature of each payment.

(5) In a 1st class city, municipal disbursements of public moneys shall be by draft, order, check, order check or as provided under sub. (3m). Checks or drafts shall be signed by the treasurer and countersigned by the comptroller. Orders shall be signed by the mayor and clerk and countersigned by the comptroller, as provided in the charter of the city. Disbursements of school moneys shall be as provided by s. 119.50.

(6) Withdrawal or disbursement of moneys deposited in a public depository as defined in s. 34.01(5) by a treasurer as defined in s. 34.01(7), other than the elected, appointed or acting official treasurer of a county, city, village, town or school district, shall be by endorsement, written order, draft, share draft, check or other draft signed by the person or persons designated by written authorization of the governing board as defined in s. 34.01(1). The authorization shall conform to any statute covering the disbursement of the funds. A public depository is fully warranted and protected in making payment in accordance with the latest authorization filed with it.

(7) No order may be issued by a county, city, village, town, special purpose district, school district, cooperative education service agency or technical college district clerk in excess of funds available or appropriated for the purposes for which the order is drawn, unless authorized by a resolution adopted by the affirmative vote of two-thirds of the entire membership of the governing body.

W.S.A. 66.0608

66.0608. Protective services

Currentness

(1) Definitions. In this section:

(ak) "Emergency medical responder" has the meaning given in s. 256.01(4p).

(am) "Emergency medical responder volunteer funds" means funds of a municipality that are raised by employees of the municipality's emergency medical responder department, by volunteers, or by donation to the emergency medical responder department, for the benefit of the municipality's emergency medical responder department.

(aw) "Emergency medical services practitioner" has the meaning given in s. 256.01(5).

(b) "Emergency medical services practitioner volunteer funds" means funds of a municipality that are raised by employees of the municipality's emergency medical services practitioner department, by volunteers, or by donation to the emergency medical services practitioner department, for the benefit of the municipality's emergency medical services practitioner department.

(c) "Fire volunteer funds" means funds of a municipality that are raised by employees of the municipality's fire department, by volunteers, or by donation to the fire department, for the benefit of the municipality's fire department.

(f) "Municipality" means any city, village, or town.

(fm) "Political subdivision" means a city, village, town, or county.

(g) "Public depository" has the meaning given in s. 34.01(5).

(h) "Volunteer funds" means emergency medical services practitioner volunteer funds, fire volunteer funds, or emergency medical responder volunteer funds.

(2m) Maintenance of effort. (a) Beginning July 1, 2024, annually not later than July 1, except as provided in par. (c), all of the following apply:

1. A city, village, or town with a population of greater than 20,000 shall certify to the department of revenue that the city, village, or town has maintained a level of law enforcement that is at least equivalent to that provided in the city, village, or town in the previous year. The certification shall include a statement under par. (b)1. from the person in charge of providing law enforcement service for the city, village, or town, or for the city, village, or town under contract to provide this service.

2. A political subdivision shall certify to the department of revenue that the political subdivision has maintained a level of fire protective and emergency medical service that is at least equivalent to that provided in the political subdivision in the previous year. The certification shall include a statement under par. (b)2. from the person in charge of providing fire protective and emergency medical services for the political subdivision, or for the political subdivision under contract to provide this service.

3. A certification under this paragraph is not required to certify the same items under par. (b) or (c) that were certified in a prior statement.

(b)1. Except as provided in par. (c)1., [a certification under par. (a)1. shall include] [1] a statement that certifies that any of the following has been maintained at a level at least equivalent to the previous year:

a. Moneys raised by tax levy by the city, village, or town and expended for employment costs of law enforcement officers, as defined in s. 165.85(2)(c).

b. The percentage of the total moneys raised by tax levy by the city, village, or town that is expended for employment costs of law enforcement officers, as defined in s. 165.85(2)(c).

c. The number of full-time equivalent law enforcement officers, as defined in s. 165.85(2)(c), employed by or assigned to the city, village, or town, not including officers whose positions are funded by grants received from the state or federal government. The person in charge of providing law enforcement service for the city, village, or town may use any reasonable method of estimating the average number of full-time equivalent law enforcement officers employed by or assigned to the city, village, or town for the year, but may consider only positions that are actually filled.

2. Except as provided in par. (c)1., [a certification under par. (a)2. shall include] [2] a statement that certifies that any 2 of the following have been maintained at a level at least equivalent to the previous year:

a. The political subdivision's expenditures, not including capital expenditures or expenditures of grant moneys received from the state or federal government, for fire protective and emergency medical services.

b. The number of full-time equivalent fire fighters and emergency medical services personnel employed by or assigned to the political subdivision, not including fire fighters and emergency medical services personnel whose positions are funded by grants received from the state or federal government. For volunteer fire and emergency medical services, those volunteer fire fighters and emergency medical services personnel who responded to at least 40 percent of calls to which volunteer fire protective or

emergency medical services responded may be counted as full-time equivalent volunteer fire fighters and emergency medical services personnel under this subd. 2. b. The person in charge of providing fire protective and emergency medical services for the political subdivision may use any reasonable method of estimating the average number of full-time equivalent fire fighters and emergency medical services personnel employed by or assigned to the political subdivision for the year, but may consider only positions that are actually filled.

c. The level of training of and maintenance of licensure for fire fighters and emergency medical services personnel providing fire protective and emergency medical services within the political subdivision.

d. Response times for fire protective and emergency medical services throughout the political subdivision, adjusted for the location of calls for service.

(c)1. Except for a political subdivision that made a certification under subds. 2. to 4., if a political subdivision failed to make a certification under par. (b)1. or 2. in the previous year, in making the certification under par. (b)1. or 2., the political subdivision shall certify that the political subdivision has maintained a level of law enforcement or fire protective and emergency medical service that is at least equivalent to that provided in the most recent year that the political subdivision made a certification under par. (b)1. or 2. or to that provided in 2023, whichever year is most recent.

2. A political subdivision that has consolidated its law enforcement services or fire protective or emergency medical services with another political subdivision or entered into a contract with a private entity to provide fire protective or emergency medical services may provide a certified statement to that effect in lieu of certification under par. (b)1. or 2. This subdivision applies only to the year following consolidation or entry into a contract.

3. A political subdivision that has a newly established or joined a newly established law enforcement agency or fire protection or emergency medical service agency may provide a certified statement to that effect, in lieu of certification under par. (b)1. or 2. This subdivision applies only to the year following establishment of the agency.

4. If law enforcement services in a city, village, or town are provided solely by the county sheriff on a noncontractual basis, the city, village, or town may provide a certified statement to that effect, in lieu of certification under par. (b)1.

(3m) Separate accounts for municipal fire, emergency medical services practitioner, and emergency medical responder volunteer funds. (a) *General authority*. Subject to pars. (b) and (c), the governing body of a municipality may enact an ordinance that does all of the following:

1. Authorizes a particular official or employee of the municipality's fire department, emergency medical services practitioner department, or emergency medical responder department to deposit volunteer funds of the department for which the individual serves as an official or employee, in an account in the name of the fire department, emergency medical services practitioner department, or emergency medical responder department, in a public depository.

2. Gives the municipality's fire department, emergency medical services practitioner department, or emergency medical responder department, through the official or employee described under subd. 1., exclusive control over the expenditure of volunteer funds of the department for which the individual serves as an official or employee in an account described under subd. 1.

(b) *Limitations, requirements*. An ordinance enacted under par. (a) may include any of the following limitations or requirements:

1. A limit on the type and amount of funds that may be deposited into the account described under par. (a)1.

2. A limit on the amount of withdrawals from the account described under par. (a)1. that may be made, and a limit on the purposes for which such withdrawals may be made.

3. Reporting and audit requirements that relate to the account described under par. (a)1.

(c) *Ownership of funds*. Notwithstanding an ordinance enacted under par. (a), volunteer funds shall remain the property of the municipality until the funds are disbursed.

66.0609. Financial procedure; alternative system of approving claims

Currentness

(1) The governing body of a village or of a city of the 2nd, 3rd or 4th class may by ordinance enact an alternative system of approving financial claims against the municipal treasury other than claims subject to s. 893.80. The ordinance shall provide that payments may be made from the city or village treasury after the comptroller or clerk of the city or village audits and approves each claim as a proper charge against the treasury, and endorses his or her approval on the claim after having determined that all of the following conditions have been complied with:

(a) That funds are available for the claim pursuant to the budget approved by the governing body.

(b) That the item or service covered by the claim has been duly authorized by the proper official, department head or board or commission.

(c) That the item or service has been actually supplied or rendered in conformity with the authorization described in par. (b).

(d) That the claim is just and valid pursuant to law. The comptroller or clerk may require the submission of proof to support the claim as the officer considers necessary.

(2) The ordinance under sub. (1) shall require that the clerk or comptroller file with the governing body not less than monthly a list of the claims approved, showing the date paid, name of claimant, purpose and amount.

(3) The ordinance under sub. (1) shall require that the governing body of the city or village obtain an annual detailed audit of its financial transactions and accounts by a certified public accountant licensed or certified under ch. 442 and designated by the governing body.

(4) The system under sub. (1) is operative only if the comptroller or clerk is covered by a fidelity bond or insurance policy of not less than $5,000 in villages and 4th class cities, of not less than $10,000 in 3rd class cities, and of not less than $20,000 in 2nd class cities, as described in s. 61.25(intro.) or 62.09(4)(b).

(5) If an alternative procedure is adopted by ordinance in conformity with this section, the claim procedure required by ss. 61.25(6), 61.51, 62.09(10), 62.11 and 62.12 and other relevant provisions, except s. 893.80, is not applicable in the city or village.

W.S.A. 66.0615

66.0615. Room tax; forfeitures

Currentness

(1) In this section:

(a) "Commission" means an entity created by one municipality or by 2 or more municipalities in a zone, to coordinate tourism promotion and tourism development for the zone.

(am) "District" has the meaning given in s. 229.41(4m).

(b) "Hotel" has the meaning given in s. 77.52(2)(a)1.

(bt) "Marketplace provider" has the meaning given in s. 77.51(7i), to the extent that the marketplace provider facilitates the sale or furnishing of rooms, lodging, or other accommodations to transients under sub. (1m)(a).

(bu) "Marketplace seller" has the meaning given in s. 77.51(7j).

(c) "Motel" has the meaning given in s. 77.52(2)(a)1.

(d) "Municipality" means any city, village or town.

(de) "Occupant" means a person who rents a short-term rental through a marketplace provider.

(df) "Owner" means the person who owns the residential dwelling that has been rented.

(di) "Residential dwelling" means any building, structure, or part of the building or structure, that is used or intended to be used as a home, residence, or sleeping place by one person or by 2 or more persons maintaining a common household, to the exclusion of all others.

(dk) “Short-term rental” means a residential dwelling that is offered for rent for a fee and for fewer than 30 consecutive days.

(dm) “Sponsoring municipality” means a city, village or town that creates a district either separately or in combination with another city, village, town or county.

(e) “Tourism” means travel for recreational, business or educational purposes.

(f) “Tourism entity” means a nonprofit organization that came into existence before January 1, 2015, spends at least 51 percent of its revenues on tourism promotion and tourism development, and provides destination marketing staff and services for the tourism industry in a municipality, except that if no such organization exists, a municipality may contract with one of the following entities:

1. A nonprofit organization that spends at least 51 percent of its revenues on tourism promotion and tourism development, and provides destination marketing staff and services for the tourism industry in a municipality.

2. A nonprofit organization that was incorporated before January 1, 2015, spends 100 percent of the room tax revenue it receives from a municipality on tourism promotion and tourism development, and provides destination marketing staff and services for the tourism industry in a municipality.

(fm) “Tourism promotion and tourism development” means any of the following that are significantly used by transient tourists and reasonably likely to generate paid overnight stays at more than one establishment on which a tax under sub. (1m)(a) may be imposed, that are owned by different persons and located within a municipality in which a tax under this section is in effect; or, if the municipality has only one such establishment, reasonably likely to generate paid overnight stays in that establishment:

1. Marketing projects, including advertising media buys, creation and distribution of printed or electronic promotional tourist materials, or efforts to recruit conventions, sporting events, or motorcoach groups.

2. Transient tourist informational services.

3. Tangible municipal development, including a convention center.

(g) “Transient” has the meaning given in s. 77.52(2)(a)1.

(h) “Zone” means an area made up of 2 or more municipalities that, those municipalities agree, is a single destination as perceived by the traveling public.

(1m)(a) The governing body of a municipality may enact an ordinance, and a district, under par. (e), may adopt a resolution, imposing a tax on the sales price from selling or furnishing, at retail, except sales for resale, rooms or lodging to transients by hotelkeepers, motel operators, marketplace providers, owners of short-term rentals, and other persons or retailers selling or furnishing accommodations that are available to the public, irrespective of whether membership is required for use of the

accommodations. A tax imposed under this paragraph may be collected from the consumer or user, but may not be imposed on sales to the federal government and persons listed under s. 77.54(9a). A tax imposed under this paragraph by a municipality shall be paid to the municipality and, with regard to any tax revenue that may not be retained by the municipality, shall be forwarded by the municipality to a tourism entity or a commission if one is created under par. (c), as provided in par. (d). Except as provided in par. (am), a tax imposed under this paragraph by a municipality may not exceed 8 percent of the sales price. Except as provided in par. (am), if a tax greater than 8 percent of the sales price under this paragraph is in effect on May 13, 1994, the municipality imposing the tax shall reduce the tax to 8 percent, effective on June 1, 1994.

(am) A municipality that imposes a room tax under par. (a) is not subject to the limit on the maximum amount of tax that may be imposed under that paragraph if any of the following apply:

1. The municipality is located in a county with a population of at least 380,000 and a convention center is being constructed or renovated within that county.

2. The municipality intends to use at least 60 percent of the revenue collected from its room tax, of any room tax that is greater than 7 percent, to fund all or part of the construction or renovation of a convention center that is located in a county with a population of at least 380,000.

3. The municipality is located in a county with a population of less than 380,000 and that county is not adjacent to a county with a population of at least 380,000, and the municipality is constructing a convention center or making improvements to an existing convention center.

4. The municipality has any long-term debt outstanding with which it financed any part of the construction or renovation of a convention center.

(b)1. If a single municipality imposes a room tax under par. (a), the municipality may create a commission under par. (c). The commission shall contract with another organization to perform the functions of a tourism entity if no tourism entity exists in that municipality.

2. If 2 or more municipalities in a zone impose a room tax under par. (a), the municipalities shall enter into a contract under s. 66.0301 to create a commission under par. (c). If no tourism entity exists in any of the municipalities in the zone that have formed a commission, the commission shall contract with another organization in the zone to perform the functions of the tourism entity. Each municipality in a single zone that imposes a room tax shall levy the same percentage of tax. If the municipalities are unable to agree on the percentage of tax for the zone, the commission shall set the percentage.

3. A commission shall monitor the collection of room taxes from each municipality in a zone that has a room tax.

4. A commission shall contract with one tourism entity from the municipalities in the zone to obtain staff, support services and assistance in developing and implementing programs to promote the zone to visitors.

(c)1. If a commission is created by a single municipality, the commission shall consist of 4 to 6 members. One of the commission members shall represent the Wisconsin hotel and motel industry. Members shall be appointed under subd. 3.

2. a. If the commission is created by more than one municipality in a zone, the commission shall consist of 3 members from each municipality in which annual tax collections exceed $1,000,000, 2 members from each municipality in which annual tax collections exceed $300,000 but are not more than $1,000,000 and one member from each municipality in which annual tax collections are $300,000 or less. Except as provided in subd. 2.b., members shall be appointed under subd. 3.

b. Two additional members, who represent the Wisconsin hotel and motel industry, shall be appointed to the commission by the chairperson of the commission, shall serve for a one-year term at the pleasure of the chairperson and may be reappointed.

3. Members of the commission shall be appointed by the principal elected official in the municipality and shall be confirmed by a majority vote of the members of the municipality's governing body who are present when the vote is taken. Commissioners shall serve for a one-year term, at the pleasure of the appointing official, and may be reappointed.

4. The commission shall meet regularly, and, from among its members, it shall elect a chairperson, vice chairperson and secretary.

5. The commission shall report any delinquencies or inaccurate reporting to the municipality that is due the tax.

(d)1. A municipality that first imposes a room tax under par. (a) after May 13, 1994, shall spend at least 70 percent of the amount collected on tourism promotion and tourism development. Any amount of room tax collected that must be spent on tourism promotion and tourism development shall either be forwarded to the commission for its municipality or zone if the municipality has created a commission, or forwarded to a tourism entity.

2. Subject to par. (dm), if a municipality collects a room tax on May 13, 1994, it may retain not more than the same percentage of the room tax that it retains on May 13, 1994. If a municipality that collects a room tax on May 1, 1994, increases its room tax after May 1, 1994, the municipality may retain not more than the same percentage of the room tax that it retains on May 1, 1994, except that if the municipality is not exempt under par. (am) from the maximum tax that may be imposed under par. (a), the municipality shall spend at least 70 percent of the increased amount of room tax that it begins collecting after May 1, 1994, on tourism promotion and development. Any amount of room tax collected that must be spent on tourism promotion and tourism development shall either be forwarded to the commission for its municipality or zone if the municipality has created a commission, or forwarded to a tourism entity.

3. A commission shall use the room tax revenue that it receives from a municipality for tourism promotion and tourism development in the zone or in the municipality.

4. The commission shall report annually to each municipality from which it receives room tax revenue the purposes for which the revenues were spent.

5. The commission may not use any of the room tax revenue to construct or develop a lodging facility.

6. If a municipality issued debt or bond anticipation notes before January 1, 2005, to finance the construction of a municipally owned convention center or conference center, nothing in this section may prevent the municipality from meeting all of the terms of its obligation.

7. Notwithstanding the provisions of subds. 1. and 2., any amount of room tax revenue that a municipality described under s. 77.994(3) is required to spend on tourism promotion and tourism development shall be forwarded to, and spent by, the municipality's tourism entity, unless the municipality creates a commission and forwards the revenue to the commission.

8. The governing body of a tourism entity shall include either at least one owner or operator of a lodging facility that collects the room tax described in this section and that is located in the municipality for which the room tax is collected or at least 4 owners or operators of lodging facilities that collect the room tax described in this section and that are located in the zone for which the room tax is collected. Subdivision 4., as it applies to a commission, applies to a tourism entity.

(dm) Beginning with the room tax collected on January 1, 2017, by a municipality that collected a room tax on May 13, 1994, as described in par. (d)2., and retained more than 30 percent of the room tax collected for purposes other than tourism promotion and tourism development, such a municipality may continue to retain, each year, the greater of either 30 percent of its current year revenues or one of the following amounts:

1. For fiscal year 2017, the same dollar amount of the room tax retained as the municipality retained in its 2014 fiscal year.

2. For fiscal year 2018, the same dollar amount of the room tax retained as the municipality retained in its 2013 fiscal year.

3. For fiscal year 2019, the same dollar amount of the room tax retained as the municipality retained in its 2012 fiscal year.

4. For fiscal year 2020, the same dollar amount of the room tax retained as the municipality retained in its 2011 fiscal year.

5. For fiscal year 2021 and thereafter, the same dollar amount of the room tax retained as the municipality retained in its 2010 fiscal year.

(e)1. Subject to subd. 2., a district may adopt a resolution imposing a room tax under par. (a) in an amount not to exceed 3 percent of total room charges. A majority of the authorized members of the district's board may vote that, if the balance in a special debt service reserve fund of the district is less than the requirement under s. 229.50(5), the room tax imposed by the district under this subdivision is 3 percent of total room charges beginning on the next January 1, April 1, July 1 or October 1 after the payment and this tax is irrepealable if any bonds issued by the district and secured by the special debt service reserve fund are outstanding. A room tax imposed by a district under this subdivision applies within the district's jurisdiction, as specified in s. 229.43, and the proceeds of the tax may be used only for the district's debt service on its bond obligations. If a district stops imposing and collecting a room tax, the district's sponsoring municipality may impose and collect a room tax under par. (a) on the date on which the district stops imposing and collecting its room tax.

2. In addition to the room tax that a district may impose under subd. 1, if the district's only sponsoring municipality is a 1st class city, the district may adopt a resolution imposing an additional room tax. The additional percentage of room tax under

this subdivision shall be equal to the percentage of room tax imposed by the sponsoring municipality on the date on which the sponsoring municipality agrees to stop imposing and collecting its room tax, as described under s. 229.44(15). A district shall begin collecting the additional room tax imposed under this subdivision on the date on which the sponsoring municipality stops imposing and collecting its room tax. A room tax imposed by a district under this subdivision applies only within the borders of the sponsoring municipality and may be used for any lawful purpose of the district.

3. A district adopting a resolution to impose the taxes under subd. 1. or 2. shall deliver a certified copy of the resolution to the secretary of revenue at least 120 days before its effective date.

(f)1. The department of revenue shall administer the tax that is imposed under par. (a) by a district and may take any action, conduct any proceeding and impose interest and penalties.

2. Sections 77.51(12m), (13), (14), (14g), (15a), (15b), and (17), 77.52(3), (3m), (13), (14), (18), and (19), 77.522, 77.523, 77.58(1) to (5), (6m), and (7), 77.585, 77.59, 77.60, 77.61(2), (3m), (5), (8), (9), (12) to (15), and (19m), and 77.62, as they apply to the taxes under subch. III of ch. 77, apply to the tax described under subd. 1.

3. From the appropriation under s. 20.835(4)(gg), the department of revenue shall distribute 97.45 percent of the taxes collected under this paragraph for each district to that district and shall indicate to the district the taxes reported by each taxpayer in that district, no later than the end of the month following the end of the calendar quarter in which the amounts were collected. The taxes distributed shall be increased or decreased to reflect subsequent refunds, audit adjustments and all other adjustments. Interest paid on refunds of the tax under this paragraph shall be paid from the appropriation under s. 20.835(4)(gg) at the rate under s. 77.60(1)(a). Any district that receives a report along with a payment under this subdivision or subd. 2. is subject to the duties of confidentiality to which the department of revenue is subject under s. 77.61(5).

5. Persons who are subject to the tax under this subsection, if that tax is administered by the department of revenue, shall register with the department. Any person who is required to register, including any person authorized to act on behalf of a person who is required to register, who fails to do so is guilty of a misdemeanor.

(g) Sections 77.51(10), (12m), (13), (13g), (14), (14g), (15a), (15b), and (17), 77.52 (3), (3m), (13), (14), (18), and (19), 77.522, 77.523, 77.53(7), 77.54, 77.58(6m), and 77.585, as they apply to the taxes under subch. III of ch. 77, shall apply to the tax imposed under par. (a) by a municipality.

(1r)(a) A marketplace provider shall collect the tax imposed by a municipality under sub. (1m) for a marketplace seller, unless the marketplace provider has been issued a waiver under s. 77.52(3m)(b) or (c), and forward it to the municipality, on a quarterly basis, along with a form prepared by the department of revenue as described under par. (b), except that a marketplace provider shall forward the tax to the municipality more frequently if the marketplace provider and the municipality enter into a written agreement providing for more frequent submissions. The marketplace provider shall notify the marketplace seller that the marketplace provider has collected and forwarded the taxes described in this paragraph. A municipality may not impose and collect a room tax from the marketplace seller if the municipality collects the room tax as described in this paragraph.

(b) The form prepared by the department of revenue as described under par. (a) shall contain at least the following information about the room tax imposed under sub. (1m) on the marketplace provider:

1. The total sales for properties located in a municipality with a room tax.

2. The total number of nights properties located in a municipality with a room tax were rented.

3. The rate of the room tax applied to the amount specified in subd. 1.

4. The total tax due for properties located in a municipality with a room tax.

(c) No later than September 29, 2021, and updated annually, the department of revenue shall create a website that contains the following information about room tax collections:

1. The name and mailing address of each municipality that imposes a room tax under sub. (1m).

2. The rate of the room tax imposed by each municipality specified in subd. 1.

(2) As a means of enforcing the collection of any room tax imposed by a municipality or a district under sub. (1m), the municipality or district may do any of the following:

(a) If a municipality or district has probable cause to believe that the correct amount of room tax has not been assessed or that the tax return is not correct, inspect and audit the records of any person subject to sub. (1m) pertaining to the furnishing or selling of accommodations to determine the correct amount of room tax due. A determination under this paragraph shall be provided in writing within 4 years after the due date of the return, unless no return has been filed.

(b) Enact a schedule of forfeitures, not to exceed 5 percent of the tax under sub. (1m) or par. (c), to be imposed on any person subject to sub. (1m) who fails to comply with a request to inspect and audit the person's records under par. (a).

(c) Determine the tax under sub. (1m) according to its best judgment if a person required to make a return fails, neglects or refuses to do so for the amount, in the manner and form and within the time prescribed by the municipality or district.

(d) Require each person who is subject to par. (c) to pay an amount of taxes that the municipality or district determines to be due under par. (c) plus interest at the rate of 1 percent per month on the unpaid balance. No refund or modification of the payment determined may be granted until the person files a correct room tax return and permits the municipality or district to inspect and audit his or her financial records under par. (a).

(e) Enact a schedule of forfeitures, not to exceed 25 percent of the room tax due for the previous year under sub. (1m) or par. (c) or $5,000, whichever is less, to be imposed for failure to pay the tax under sub. (1m). This paragraph also applies to a marketplace provider that is required to collect and remit taxes imposed by a municipality under sub. (1m), but that fails to file a return as required in sub. (1r) or pay the required tax.

(2m)(a) To enforce the collection of a room tax imposed by a district under sub. (1m), the district may exchange audit and other information relating to the room tax with the department of revenue.

(b) To enforce the collection of a room tax imposed by a municipality under sub. (1m), the municipality may jointly inspect and audit the room tax records of a person subject to sub. (1m) with other municipalities only for the purpose of conducting a joint room tax audit. A municipality may provide audit and other information to the department of revenue, and may exchange audit and other room tax related information with any municipality that took part in conducting the joint audit.

(3) The municipality shall provide by ordinance and the district shall provide by resolution for the confidentiality of information obtained under subs. (1r) and (2) but shall provide exceptions for persons using the information in the discharge of duties imposed by law or of the duties of their office or by order of a court. The municipality or district may provide for the publishing of statistics classified so as not to disclose the identity of particular returns. The municipality or district shall provide that persons violating ordinances or resolutions enacted under this subsection may be required to forfeit not less than $100 nor more than $500.

(4)(a) Except as provided in par. (d), annually, on or before May 1, on a form created and provided by the department of revenue, every municipality that imposes a tax under sub. (1m) shall certify and report to the department all of the following:

1. The amount of room tax revenue collected, and the room tax rate imposed, by the municipality in the previous year.

2. A detailed accounting of the amounts of such revenue that were forwarded in the previous year for tourism promotion and tourism development, specifying the commission or tourism entity that received the revenue. The detailed accounting shall include expenditures of at least $1,000 made by a commission or a tourism entity.

3. A list of each member of the commission and each member of the governing body of a tourism entity to which the municipality forwarded room tax revenue in the previous year, and the name of the business entity the member owns, operates, or is employed by, if any.

4. For a municipality subject to sub. (1m)(dm), the amount of the room tax retained by the municipality in each of the following fiscal years: 2010, 2011, 2012, 2013, and 2014.

(b) The department of revenue shall collect the reports described in par. (a) and shall make them available to the public.

(c) The department of revenue may impose a penalty of not more than $3,000 on a municipality that does not submit to the department the reports described in par. (a). A municipality may not use room tax revenue to pay a penalty imposed under this paragraph. The penalty shall be paid to the department of revenue.

(d) Notwithstanding the requirement in par. (a)(intro.), the information specified in par. (a)4. may be certified and reported to the department only once if the municipality submits the information not later than May 1, 2022. The department shall make such information available to the public annually in the report described in par. (a)(intro.).

Chapter 66. General Municipality Law (Refs & Annos)
Subchapter VI. Finance; Revenues

W.S.A. 66.0617

66.0617. Impact fees

Currentness

(1) Definitions. In this section:

(a) "Capital costs" means the capital costs to construct, expand or improve public facilities, including the cost of land, and including legal, engineering and design costs to construct, expand or improve public facilities, except that not more than 10 percent of capital costs may consist of legal, engineering and design costs unless the municipality can demonstrate that its legal, engineering and design costs which relate directly to the public improvement for which the impact fees were imposed exceed 10 percent of capital costs. "Capital costs" does not include other noncapital costs to construct, expand or improve public facilities, vehicles; or the costs of equipment to construct, expand or improve public facilities.

(b) "Developer" means a person that constructs or creates a land development.

(c) "Impact fees" means cash contributions, contributions of land or interests in land or any other items of value that are imposed on a developer by a municipality under this section.

(d) "Land development" means the construction or modification of improvements to real property that creates additional residential dwelling units within a municipality or that results in nonresidential uses that create a need for new, expanded or improved public facilities within a municipality.

(e) "Municipality" means a city, village, or town.

(f) "Public facilities" means all of the following:

1. Highways as defined in s. 340.01(22), and other transportation facilities, traffic control devices, facilities for collecting and treating sewage, facilities for collecting and treating storm and surface waters, facilities for pumping, storing, and distributing water, parks, playgrounds, and land for athletic fields, solid waste and recycling facilities, fire protection facilities, law enforcement facilities, emergency medical facilities and libraries. "Public facilities" does not include facilities owned by a school district.

2. Notwithstanding subd. 1., with regard to impact fees that were first imposed before June 14, 2006, "public facilities" includes other recreational facilities that were substantially completed by June 14, 2006. This subdivision does not apply on or after January 1, 2018.

(g) "Service area" means a geographic area delineated by a municipality within which there are public facilities.

(h) "Service standard" means a certain quantity or quality of public facilities relative to a certain number of persons, parcels of land or other appropriate measure, as specified by the municipality.

(2) General. (a) A municipality may enact an ordinance under this section that imposes impact fees on developers to pay for the capital costs that are necessary to accommodate land development.

(b) Subject to par. (c), this section does not prohibit or limit the authority of a municipality to finance public facilities by any other means authorized by law, except that the amount of an impact fee imposed by a municipality shall be reduced, under sub. (6)(d), to compensate for any other costs of public facilities imposed by the municipality on developers to provide or pay for capital costs.

(c) Beginning on May 1, 1995, a municipality may impose and collect impact fees only under this section.

(3) Public hearing; notice. Before enacting an ordinance that imposes impact fees, or amending an existing ordinance that imposes impact fees, a municipality shall hold a public hearing on the proposed ordinance or amendment. Notice of the public hearing shall be published as a class 1 notice under ch. 985, and shall specify where a copy of the proposed ordinance or amendment and the public facilities needs assessment may be obtained.

(4) Public facilities needs assessment. (a) Before enacting an ordinance that imposes impact fees or amending an ordinance that imposes impact fees by revising the amount of the fee or altering the public facilities for which impact fees may be imposed, a municipality shall prepare a needs assessment for the public facilities for which it is anticipated that impact fees may be imposed. The public facilities needs assessment shall include, but not be limited to, the following:

1. An inventory of existing public facilities, including an identification of any existing deficiencies in the quantity or quality of those public facilities, for which it is anticipated that an impact fee may be imposed.

2. An identification of the new public facilities, or improvements or expansions of existing public facilities, that will be required because of land development for which it is anticipated that impact fees may be imposed. This identification shall be based on explicitly identified service areas and service standards.

3. A detailed estimate of the capital costs of providing the new public facilities or the improvements or expansions in existing public facilities identified in subd. 2., including an estimate of the cumulative effect of all proposed and existing impact fees on the availability of affordable housing within the municipality.

(b) A public facilities needs assessment or revised public facilities needs assessment that is prepared under this subsection shall be available for public inspection and copying in the office of the clerk of the municipality at least 20 days before the hearing under sub. (3).

(5) Differential fees, impact fee zones. (a) An ordinance enacted under this section may impose different impact fees on different types of land development.

(b) An ordinance enacted under this section may delineate geographically defined zones within the municipality and may impose impact fees on land development in a zone that differ from impact fees imposed on land development in other zones within the municipality. The public facilities needs assessment that is required under sub. (4) shall explicitly identify the differences, such as land development or the need for those public facilities, which justify the differences between zones in the amount of impact fees imposed.

(6) Standards for impact fees. Impact fees imposed by an ordinance enacted under this section:

(a) Shall bear a rational relationship to the need for new, expanded or improved public facilities that are required to serve land development.

(am) May not include amounts for an increase in service capacity greater than the capacity necessary to serve the development for which the fee is imposed.

(b) May not exceed the proportionate share of the capital costs that are required to serve land development, as compared to existing uses of land within the municipality.

(c) Shall be based upon actual capital costs or reasonable estimates of capital costs for new, expanded or improved public facilities.

(d) Shall be reduced to compensate for other capital costs imposed by the municipality with respect to land development to provide or pay for public facilities, including special assessments, special charges, land dedications or fees in lieu of land dedications under ch. 236 or any other items of value.

(e) Shall be reduced to compensate for moneys received from the federal or state government specifically to provide or pay for the public facilities for which the impact fees are imposed.

(f) May not include amounts necessary to address existing deficiencies in public facilities.

(fm) May not include expenses for operation or maintenance of a public facility.

(g) Except as provided under this paragraph, shall be payable by the developer or the property owner to the municipality in full upon the issuance of a building permit by the municipality. Except as provided in this paragraph, if the total amount of impact

fees due for a development will be more than $75,000, a developer may defer payment of the impact fees for a period of 4 years from the date of the issuance of the building permit or until 6 months before the municipality incurs the costs to construct, expand, or improve the public facilities related to the development for which the fee was imposed, whichever is earlier. If the developer elects to defer payment under this paragraph, the developer shall maintain in force a bond or irrevocable letter of credit in the amount of the unpaid fees executed in the name of the municipality. A developer may not defer payment of impact fees for projects that have been previously approved.

(7) Low-cost housing. An ordinance enacted under this section may provide for an exemption from, or a reduction in the amount of, impact fees on land development that provides low-cost housing, except that no amount of an impact fee for which an exemption or reduction is provided under this subsection may be shifted to any other development in the land development in which the low-cost housing is located or to any other land development in the municipality.

(7r) Impact fee reports. At the time that the municipality collects an impact fee, it shall provide to the developer from which it received the fee an accounting of how the fee will be spent.

(8) Requirements for impact fee revenues. Revenues from each impact fee that is imposed shall be placed in a separate segregated interest-bearing account and shall be accounted for separately from the other funds of the municipality. Impact fee revenues and interest earned on impact fee revenues may be expended only for the particular capital costs for which the impact fee was imposed, unless the fee is refunded under sub. (9).

(9) Refund of impact fees. Except as provided in this subsection, impact fees that are not used within 8 years after they are collected to pay the capital costs for which they were imposed shall be refunded to the payer of fees for the property with respect to which the impact fees were imposed, along with any interest that has accumulated, as described in sub. (8). Impact fees that are collected for capital costs related to lift stations or collecting and treating sewage that are not used within 10 years after they are collected to pay the capital costs for which they were imposed, shall be refunded to the payer of fees for the property with respect to which the impact fees were imposed, along with any interest that has accumulated, as described in sub. (8). The 10-year time limit for using impact fees that is specified under this subsection may be extended for 3 years if the municipality adopts a resolution stating that, due to extenuating circumstances or hardship in meeting the 10-year limit, it needs an additional 3 years to use the impact fees that were collected. The resolution shall include detailed written findings that specify the extenuating circumstances or hardship that led to the need to adopt a resolution under this subsection. For purposes of the time limits in this subsection, an impact fee is paid on the date a developer obtains a bond or irrevocable letter of credit in the amount of the unpaid fees executed in the name of the municipality under sub. (6)(g).

(10) Appeal. A municipality that enacts an impact fee ordinance under this section shall, by ordinance, specify a procedure under which a developer upon whom an impact fee is imposed has the right to contest the amount, collection or use of the impact fee to the governing body of the municipality.

Current through 2023 Act 272, published April 10, 2024.

End of Document

W.S.A. 66.0619

66.0619. Public improvement bonds: issuance

Currentness

(1) A municipality, in addition to any other authority to borrow money and issue its municipal obligations, may borrow money and issue its public improvement bonds to finance the cost of construction or acquisition, including site acquisition, of any revenue-producing public improvement of the municipality. In this section, unless the context or subject matter otherwise requires:

(a) "Debt service" means the amount of principal, interest and premium due and payable with respect to public improvement bonds.

(b) "Deficiency" means the amount by which debt service required to be paid in a calendar year exceeds the amount of revenues estimated to be derived from the ownership and operation of the public improvement for the calendar year, after first subtracting from the estimated revenues the estimated cost of paying the expenses of operating and maintaining the public improvement for the calendar year.

(c) "Municipality" means a county, sanitary district, public inland lake protection and rehabilitation district, town, city or village.

(d) "Public improvement" means any public improvement which a municipality may lawfully own and operate from which the municipality expects to derive revenues.

(2) The governing body of the municipality proposing to issue public improvement bonds shall adopt a resolution authorizing their issuance. The resolution shall set forth the amount of bonds authorized, or a sum not to exceed a stated amount, and the purpose for which the bonds are to be issued. The resolution shall prescribe the terms, form and contents of the bonds and other matters that the governing body considers necessary or advisable. The bonds may be in any denomination of not less than $1,000, shall bear interest payable annually or semiannually, shall be payable not later than 20 years from the date of the bonds, at times and places that the governing body determines, and may be subject to redemption prior to maturity on terms and conditions that the governing body determines. The bonds may be issued either payable to bearer with interest coupons attached to the bonds or may be registered under s. 67.09. The bonds may be sold at public competitive sale or by private negotiation. Sections 67.08 and 67.10 apply to public improvement bonds, except insofar as they are in conflict with this section, in which case this section controls.

(2m)(a) A resolution, adopted under sub. (2) by the governing body of a municipality, need not be submitted to the electors of the municipality for approval, unless within 30 days after the resolution is adopted there is filed with the clerk of the municipality a petition, conforming to the requirements of s. 8.40 and requesting a referendum on the resolution, signed by electors numbering

at least 10 percent of the votes cast in the municipality for governor at the last general election. A resolution, adopted under sub. (2), may be submitted by the governing body of the municipality to the electors without waiting for the filing of a petition.

(b) If a referendum is to be held on a resolution, the municipal governing body shall file the resolution as provided in s. 8.37 and shall direct the municipal clerk to call a special election for the purpose of submitting the resolution to the electors for a referendum on approval or rejection. In lieu of a special election, the municipal governing body may specify that the election be held at the next succeeding spring primary or election or partisan primary or general election.

(c) The municipal clerk shall publish a class 2 notice, under ch. 985, containing a statement of the purpose of the referendum, giving the amount of the bonds proposed to be issued and the purpose for which they will be issued, and stating the time and places of holding the election and the hours during which the polls will be open.

(d) The referendum shall be held and conducted and the votes cast shall be canvassed as at regular municipal elections and the results certified to the municipal clerk. A majority of all votes cast in the municipality decides the question.

(3) The reasonable cost and value of any services rendered by the public improvement to the municipality shall be charged against the municipality and shall be paid by it in monthly installments.

(4)(a) Gross revenues derived from the ownership and operation of the public improvement shall be first pledged to debt service on issued public improvement bonds. When in excess of debt service, the revenues are subject to all of the following requirements set by resolution or ordinance of the governing body fixing:

1. The proportion of revenues of the public improvement necessary for the reasonable and proper operation and maintenance of the public improvement.

2. The proportion of revenues necessary for the payment of debt service on the public improvement bonds. The revenues shall be paid into a special fund in the treasury of the municipality known as the “Public Improvement Bond Account”.

(b) At any time after one year's operation, the governing body may recompute the proportion of revenues assignable under par. (a) based upon experience of operation.

(c) All funds on deposit in a public improvement bond account, which are not immediately required for the purposes specified in this section, shall be invested in accordance with s. 66.0605.

(5) Annually, on or before August 1 the officer or department of the municipality responsible for the operation of the public improvement shall file with the governing body, or its designated representative, a detailed statement setting forth the amount of the debt service on the public improvement bonds issued for the public improvement for the succeeding calendar year and an estimate for that year of the total revenues to be derived from the ownership and operation of the public improvement and the total cost of operating and maintaining the public improvement.

(6)(a) If it is determined that there will be a deficiency for the ensuing calendar year, the municipality shall make up the deficiency, but the obligation to do so is limited to a sum which does not cause the municipality to exceed its municipal debt limits. The deficiency may be made up by the municipality from any available revenues, including a tax levy. The amount contributed by the municipality shall be deposited in the public improvement bond account and applied to the payment of debt service. Taxes levied under this paragraph are not subject to statutory limitations of rate or amount.

(b) The amount of any deficiency determined under par. (a) for the ensuing calendar year shall be related to the total debt service for that year. The ratio determines the outstanding indebtedness of the issue to be reflected as part of the municipality's indebtedness for the year.

(7) If revenue bonds have been issued by a municipality pursuant to law and an ordinance authorizing their issuance without limitation as to amount has been enacted by the governing body of the municipality, public improvement bonds may be issued under the ordinance with the same effect as though they were revenue bonds. The bonds are public improvement bonds and this section applies to the bonds, except that nothing contained in this subsection shall impair the contract between the municipality and the holders of outstanding revenue bonds. Liens created in favor of any outstanding revenue bonds issued under the ordinance apply to public improvement bonds issued under this subsection. The public improvement bonds are payable on a parity with the revenue bonds issued under the ordinance if the public improvement bonds are issued in compliance with the requirements of the ordinance for the issuance of parity bonds under the ordinance.

Chapter 66. General Municipality Law (Refs & Annos)
Subchapter VI. Finance; Revenues

W.S.A. 66.0621

66.0621. Revenue obligations

Currentness

(1) In this section:

(a) "Municipality" means a city, village, town, county, commission created by contract under s. 66.0301, public inland lake protection and rehabilitation district established under s. 33.23, 33.235 or 33.24, metropolitan sewerage district created under ss. 200.01 to 200.15 and 200.21 to 200.65, town sanitary district under subch. IX of ch. 60, a local professional baseball park district created under subch. III of ch. 229, a local professional football stadium district created under subch. IV of ch. 229, a local cultural arts district created under subch. V of ch. 229 or a municipal water district or power district under ch. 198 and any other public or quasi-public corporation, officer, board or other public body empowered to borrow money and issue obligations to repay the money and obligations out of revenues. "Municipality" does not include the state or a local exposition district created under subch. II of ch. 229.

(b) "Public utility" means any revenue producing facility or enterprise owned by a municipality and operated for a public purpose as defined in s. 67.04(1)(b) including garbage incinerators, toll bridges, swimming pools, tennis courts, parks, playgrounds, golf links, bathing beaches, bathhouses, street lighting, city halls, village halls, town halls, courthouses, jails, schools, cooperative educational service agencies, hospitals, homes for the aged or indigent, child care centers, regional projects, waste collection and disposal operations, sewerage systems, local professional baseball park facilities, local professional football stadium facilities, local cultural arts facilities, and any other necessary public works projects undertaken by a municipality.

(c) "Revenue" means all moneys received from any source by a public utility and all rentals and fees and, in the case of a local professional baseball park district created under subch. III of ch. 229 includes tax revenues deposited into a special fund under s. 229.685 and payments made into a special debt service reserve fund under s. 229.74 and, in the case of a local professional football stadium district created under subch. IV of ch. 229 includes tax revenues deposited into a special fund under s. 229.825 and payments made into a special debt service reserve fund under s. 229.830.

(2) This section does not limit the authority of a municipality to acquire, own, operate and finance in the manner provided in this section a source of water and necessary transmission facilities, including all real and personal property, beyond its corporate limits. A source of water 50 miles beyond a municipality's corporate limits shall be within the municipality's authority.

(3) A municipality may, by action of its governing body, provide for purchasing, acquiring, leasing, constructing, extending, adding to, improving, conducting, controlling, operating or managing a public utility, motor bus or other systems of public

transportation from the general fund, or from the proceeds of municipal obligations, including revenue bonds. An obligation created under sub. (4) or (5) is not an indebtedness of the municipality, and shall not be included in arriving at the constitutional debt limitation.

(3m) A county in which an electronics and information technology manufacturing zone designated under s. 238.396(1m) exists may issue bonds under this section whose principal and interest are paid only through sales and use tax revenues imposed by the county under s. 77.70. The county shall be and continue without power to repeal such tax or obstruct the collection of the tax until all such payments have been made or provided for.

(4) If payment of obligations is provided by revenue bonds, the following is the procedure for payment:

(a)1. The governing body of the municipality, by ordinance or resolution, shall order the issuance and sale of bonds, executed as provided in s. 67.08(1) and payable at times not exceeding 40 years from the date of issuance, and at places, that the governing body of the municipality determines. The bonds shall be payable only out of the special redemption fund. Each bond shall include a statement that it is payable only from the special redemption fund, naming the ordinance or resolution creating it, and that it does not constitute an indebtedness of the municipality. The bonds may be issued either as registered bonds under s. 67.09 or as coupon bonds payable to bearer. Bonds shall be sold in the manner and upon the terms determined by the governing body of the municipality.

2. Interest, if any, on bonds shall be paid at least annually to bondholders. Payment of principal on the bonds shall commence not later than 3 years after the date of issue or 2 years after the estimated date that construction will be completed, whichever is later. After the commencement of the payment of principal on the bonds, at least annually, the municipality shall make principal payments and, if any, interest payments to bondholders or provide by ordinance or resolution that payments be made into a separate fund for payment to bondholders as specified in the ordinance or resolution authorizing the issuance of the bonds. The amount of the annual debt service payments made or provided for shall be reasonable in accordance with prudent municipal utility management practices.

3. All revenue bonds may contain a provision authorizing redemption of the bonds, in whole or in part, at stipulated prices, at the option of the municipality on any interest payment date. The governing body of a municipality may provide in a contract for purchasing, acquiring, leasing, constructing, extending, adding to, improving, conducting, controlling, operating or managing a public utility, that payment shall be made in bonds at not less than 95 percent of the par value of the bonds.

(b) All moneys received from bonds issued under this section shall be applied solely for purchasing, acquiring, leasing, constructing, extending, adding to, improving, conducting, controlling, operating or managing a public utility, and in the payment of the cost of subsequent necessary additions, improvements and extensions. Bonds issued under this section shall be secured by a pledge of the revenues of the public utility to the holders of the bonds and to the holders of coupons of the bonds and may be additionally secured by a mortgage lien upon the public utility to the holders of the bonds and to the holders of coupons of the bonds. If a mortgage lien is created by ordinance or resolution, the lien is perfected by publication of the ordinance or resolution or by recording of the ordinance or resolution in the records of the municipality. In addition, the municipality may record the lien by notifying the register of deeds of the county in which the public utility is located concerning its issuance of bonds. If the register of deeds receives notice from the municipality, the register of deeds shall record any mortgage lien created. The public utility remains subject to the pledge and, if created, the mortgage lien until the payment in full of the principal and interest of the bonds. Upon repayment of bonds for which a mortgage lien has been created, the register of deeds shall, upon notice from the municipality, record a satisfaction of the mortgage lien. Any holder of a bond or of coupons attached to a bond may protect and enforce this pledge and, if created, the mortgage lien and compel performance of all duties required of the

municipality by this section. A municipality may provide for additions, extensions and improvements to a public utility that it owns by additional issues of bonds under this section. The additional issues of bonds are subordinate to all prior issues of bonds under this section, but a municipality may in the ordinance or resolution authorizing bonds permit the issue of additional bonds on a parity with prior issues. A municipality may issue new bonds under this section to provide funds for refunding any outstanding municipal obligations, including interest, issued for any of the purposes stated in sub. (3). Refunding bonds issued under this section are subject to all of the following provisions:

1. Refunding bonds may be issued to refinance more than one issue of outstanding municipal obligations notwithstanding that the outstanding municipal obligations may have been issued at different times and may be secured by the revenues of more than one public utility. Public utilities may be operated as a single public utility, subject to contract rights vested in holders of bonds or promissory notes being refinanced. A determination by the governing body of a municipality that any refinancing is advantageous or necessary to the municipality is conclusive.

4. The refunding bonds are not an indebtedness of a municipality, and shall not be included in arriving at the constitutional debt limitation.

5. The governing body of a municipality may include a provision in any ordinance or resolution authorizing the issuance of refunding bonds pledging all or part of the revenues of any public utility or utilities originally financed, extended or improved from the proceeds of any of the municipal obligations being refunded, and pledging all or part of the surplus income derived from the investment of a trust created in relation to the refunding.

6. This subsection constitutes full authority for the authorization and issuance of refunding bonds and for all other acts authorized by this subsection to be done or performed and the refunding bonds may be issued under this subsection without regard to the requirements, restrictions or procedural provisions contained in any other law.

(c) The governing body of a municipality shall, in the ordinance or resolution authorizing the issuance of bonds, establish a system of funds and accounts and provide for sufficient revenues to operate and maintain the public utility and to provide fully for annual debt service requirements of bonds issued under this section. The governing body of a municipality may establish a fund or account for depreciation of assets of the public utility.

(d) If a governing body of a municipality creates a depreciation fund under par. (c) it shall use the funds set aside to restore any deficiency in the special redemption fund specified in par. (e) for the payment of the principal and interest due on the bonds and for the creation and maintenance of any reserves established by the bond ordinance or resolution to secure these payments. If the special redemption fund is sufficient for these purposes, moneys in the depreciation fund may be expended for repairs, replacements, new constructions, extensions or additions of the public utility. Accumulations of the depreciation fund may be invested and the income from the investment shall be deposited in the depreciation fund.

(e) The governing body of a municipality shall by ordinance or resolution create a special fund in the treasury of the municipality to be identified as “the .... special redemption fund” into which shall be paid the amount which is set aside for the payment of the principal and interest due on the bonds and for the creation and maintenance of any reserves established by bond ordinance or resolution to secure these payments.

(f) At the close of the public utility's fiscal year, if any surplus has accumulated in any of the funds specified in this subsection, it may be disposed of in the order set forth under s. 66.0811(2).

(g) The reasonable cost and value of any service rendered to a municipality by a public utility shall be charged against the municipality and shall be paid by it in installments.

(h) The rates for all services rendered by a public utility to a municipality or to other consumers shall be reasonable and just, taking into account and consideration the value of the public utility, the cost of maintaining and operating the public utility, the proper and necessary allowance for depreciation of the public utility, and a sufficient and adequate return upon the capital invested.

(i) The governing body of a municipality may adopt all ordinances and resolutions necessary to carry into effect this subsection. An ordinance or resolution providing for the issuance of bonds may contain such provisions or covenants, without limiting the generality of the power to adopt an ordinance or resolution, as are considered necessary or desirable for the security of bondholders or the marketability of the bonds. The provisions or covenants may include but are not limited to provisions relating to the sufficiency of the rates or charges to be made for service, maintenance and operation, improvements or additions to and sale or alienation of the public utility, insurance against loss, employment of consulting engineers and accountants, records and accounts, operating and construction budgets, establishment of reserve funds, issuance of additional bonds, and deposit of the proceeds of the sale of the bonds or revenues of the public utility in trust, including the appointment of depositories or trustees. An ordinance or resolution authorizing the issuance of bonds or other obligations payable from revenues of a public utility constitutes a contract with the holder of bonds or other obligations issued pursuant to the ordinance or resolution.

(j) The ordinance or resolution required under par. (c) may set apart bonds equal to the amount of any secured debt or charge subject to which a public utility may be purchased, acquired, leased, constructed, extended, added to or improved. The ordinance or resolution shall set aside for interest and debt service fund from the income and revenues of the public utility a sum sufficient to comply with the requirements of the instrument creating the lien, or, if the instrument does not make any provision for it, the ordinance or resolution shall fix the amount which shall be set aside into a secured debt fund from month to month for interest on the secured debt, and a fixed amount or proportion not exceeding a stated sum, which shall be not less than 1 percent of the principal, to be set aside into the fund to pay the principal of the debt. Any surplus after satisfying the debt may be transferred to the special redemption fund. Public utility bonds set aside for the debt may be issued to an amount sufficient with the amount then in the debt service fund to pay and retire the debt or any portion of it. The bonds may be issued at not less than 95 percent of the par value in exchange for, or satisfaction of, the secured debt, or may be sold in the manner provided in this paragraph, and the proceeds applied in payment of the secured debt at maturity or before maturity by agreement with the holder. The governing body of a municipality and the owners of a public utility acquired, purchased, leased, constructed, extended, added to or improved under this paragraph may contract that public utility bonds providing for the secured debt or for the whole purchase price shall be deposited with a trustee or depository and released from deposit to secure the payment of the debt.

(k) A municipality purchasing, acquiring, leasing, constructing, extending, adding to or improving, conducting, controlling, operating or managing a public utility subject to a mortgage or deed of trust by the vendor or the vendor's predecessor in title to secure the payment of outstanding and unpaid bonds made by the vendor or the vendor's predecessor in title, may readjust, renew, consolidate or extend the obligation evidenced by the outstanding bonds and continue the lien of the mortgage, securing the mortgage by issuing bonds to refund the outstanding mortgage or revenue bonds at or before their maturity. The refunding bonds are payable only out of a special redemption fund created and set aside by ordinance or resolution under par. (e). The refunding bonds shall be secured by a mortgage lien upon the public utility, and the municipality may adopt all ordinances or resolutions and take all proceedings, following the procedure under this subsection. The lien has the same priority on the

public utility as the mortgage securing the outstanding bonds, unless otherwise expressly provided in the proceedings of the governing body of the municipality.

(L)1. If the governing body of a municipality, by ordinance or resolution, declares its intentions to authorize the issuance or sale of revenue bonds under this section, the governing body may, prior to issuance of the bonds and in anticipation of their sale, authorize the issuance of bond anticipation notes by the adoption of a resolution or ordinance. The notes shall be named "bond anticipation notes". Bond anticipation notes may be issued for the purposes for which the municipality has authority to issue revenue bonds. The ordinance or resolution authorizing the bond anticipation notes shall state the purposes for which the bond anticipation notes are to be issued and shall set forth a covenant of the municipality to issue the revenue bonds in an amount sufficient to retire the outstanding bond anticipation notes. The ordinance or resolution may contain other covenants and provisions, including a description of the terms of the revenue bonds to be issued. The municipality may pledge revenues of the public utility to payment of the principal and interest on the bond anticipation notes. Prior to issuance of the bond anticipation notes, the governing body may adopt an ordinance or resolution authorizing the revenue bonds.

2. Bond anticipation notes may be issued for periods of up to 5 years and may, by ordinance or resolution of the governing body of a municipality, be refunded one or more times, if the refunding bond anticipation notes do not exceed 5 years in term and if they will be paid within 10 years after the date of issuance of the original bond anticipation notes. Bond anticipation notes shall be executed as provided in s. 67.08(1) and may be registered under s. 67.09. These notes shall state the sources from which they are payable. Bond anticipation notes are not an indebtedness of the municipality issuing them, and no lien may be created or attached with respect to any property of the municipality as a consequence of the issuance of the notes.

3. Any funds derived from the issuance and sale of revenue bonds under this section and issued subsequent to the execution and sale of bond anticipation notes constitute a trust fund, and the fund shall be expended first for the payment of principal and interest of the bond anticipation notes, and then may be expended for other purposes set forth in the ordinance or resolution authorizing the revenue bonds. No bond anticipation notes may be issued unless a financial officer of the municipality certifies to the governing body of the municipality that contracts with respect to additions, improvements and extensions are to be let and that the proceeds of the notes are required for the payment of the contracts.

4. Following the issuance of the bond anticipation notes, revenues of the public utility may be paid into a fund to pay principal and interest on the bond anticipation notes, which moneys or any part of them may, by the ordinance or resolution authorizing the issuance of bond anticipation notes, be pledged for the payment of the principal of and interest on the notes. The ordinance or resolution shall pledge to the payment of the principal of the notes the proceeds of the sale of the revenue bonds in anticipation of the sale of which the notes were authorized to be issued and may provide for use of revenue of the public utility or other available funds for payment of principal on the notes. The notes are negotiable instruments.

6. A municipality authorized to issue or sell bond anticipation notes under this paragraph may, in addition to the revenue sources or bond proceeds, appropriate funds out of its annual tax levy for the payment of the notes. The payment of the notes out of funds from a tax levy is not an obligation of the municipality to make any other appropriation.

7. Bond anticipation notes are a legal form of investment for municipal funds under s. 66.0603(1m).

(5) A municipality which may own, purchase, acquire, lease, construct, extend, add to, improve, conduct, control, operate or manage any public utility may, by action of its governing body, in lieu of issuing bonds or levying taxes and in addition to any other lawful methods of paying obligations, provide for or secure the payment of the cost of purchasing, acquiring, leasing,

constructing, extending, adding to, improving, conducting, controlling, operating or managing a public utility by pledging, assigning or otherwise hypothecating, shares of stock evidencing a controlling interest in a public utility, or the net earnings or profits derived, or to be derived, from the operation of the public utility. The municipality may enter into the contracts and may mortgage the public utility and issue obligations to carry out this subsection. A municipality may issue additional obligations under this section, but those obligations are subordinate to all prior obligations, except that the municipality may in the ordinance or resolution authorizing obligations under this subsection permit the issue of additional obligations on a parity with those previously issued.

(6)(a) Revenue bonds issued by a local professional baseball park district created under subch. III of ch. 229 are subject to the provisions in ss. 229.72 to 229.81.

(b) Revenue bonds issued by a local professional football stadium district created under subch. IV of ch. 229 are subject to the provisions in ss. 229.829 to 229.834.

(c) Revenue bonds issued by a local cultural arts district created under subch. V of ch. 229 are subject to the provisions in ss. 229.849 to 229.853.

Editors' Notes

COMMENTS--1999 ACT 150, § 176

Note: 1999 Wis. Act 65 authorized the creation of local cultural arts districts and provided, in s. 66.067, that local cultural arts facilities "are public utilities within the meaning of s. 66.066." Similarly, 1999 Wis. Act 167 authorized the creation of local professional football districts and provided, in s. 66.067, that local professional football stadium facilities "are public utilities within the meaning of s. 66.066." 1999 Wis. Act 150 repealed s. 66.067 and added to the definition of "public utility" under s. 66.066(1)(b) the list of facilities which s. 66.067 had identified as public utilities. At the same time, Act 150 renumbered s. 66.066(1)(b) to be s. 66.0621(1)(b). However, Act 150 did not take into account the treatments of s. 66.067 by Acts 65 and 167 and so failed to include local cultural arts facilities and professional football stadium facilities in the definition of "public utility" in the new s. 66.0621(1)(b). It appears there was no intent in the Act 150 repeal to effect any substantive change. A note to the treatment of s. 66.067 by Act 150 states that the act "[r]epeals s. 66.067, relating to permissible public works projects, since the substance of the section has been incorporated into s. 66.0621(1)(b)." Further, the prefatory note to Act 150 states:

This bill is recommended by the joint legislative council's special committee on general municipal law recodification. The special committee was directed to recodify chapter 66 of the statutes by the process of reorganization into logical subchapters, sections and subunits, repeal of unnecessary or archaic and obsolete language, relocation of those provisions more appropriately placed elsewhere in the statutes and modernization of language where appropriate. The special committee was directed to refrain from recommending substantive changes that would significantly affect relationships between governmental units or engender substantial controversy in the legislative process.

COMMENTS--1999 ACT 150, § 176

Note: Repeals an archaic provision of the statutes regulating proceedings relating to a public utility that were begun prior to May 6, 1911.

66.0623. Refunding village, town, sanitary, and inland lake district bonds

Currentness

A village, town, town sanitary district established under s. 60.71(1), or public inland lake protection and rehabilitation district established under ch. 33 that has undertaken to construct a combined sewer and water system and issued revenue bonds payable from the combined revenues of the system and that is unable to provide sufficient funds to complete the construction of the system and to meet maturing principal of the revenue bonds, may, with the consent of all of the holders of noncallable bonds, refund all or any part of its outstanding indebtedness, including revenue bonds, by issuing term bonds maturing in not more than 20 years, payable solely from the revenues of the combined sewer and water system and redeemable at par on any interest payment date. The bonds may be issued as provided in s. 66.0621(4) and shall pledge income from hydrant rentals and all sewer and water charges and may contain any covenants authorized by law, except if bonds are issued under this section to refund floating indebtedness, the bonds are subject to the prior lien and claim of all bonds issued to refund revenue bonds issued prior to the refunding.

66.0625. Joint issuance of mass transit bonding

Currentness

(1) In this section:

(a) “Political subdivision” means a county, city, village or town.

(b) “Public transit body” means any transit or transportation commission or authority and public corporation established by law or by interstate compact to provide mass transportation services and facilities.

(2) In addition to the provisions of any other statutes specifically authorizing cooperation between political subdivisions or public transit bodies, unless those statutes specifically exclude action under this section, any political subdivision or public transit body may, for mass transit purposes, issue bonds or, with any other political subdivision or public transit body, jointly issue bonds.

W.S.A. 66.0626

66.0626. Special assessments or charges for contaminated well or wastewater system loans

Currentness

(1) In this section:

(a) "Contaminated private water supply" has the meaning provided in s. 281.75(1)(b).

(b) "Failing private on-site wastewater treatment system" has the meaning provided in s. 145.01(4m).

(c) "Political subdivision" means a city, village, town, or county.

(d) "Private on-site wastewater treatment system" has the meaning provided in s. 145.01(12).

(e) "Private water supply" has the meaning provided in s. 281.75(1)(f).

(f) "Well subject to abandonment" has the meaning provided in s. 281.75(1)(i).

(2) A political subdivision or its designee may, with the agreement of the owner of the private water supply, well, or wastewater treatment system, remediate a contaminated private water supply, fill and seal a well subject to abandonment, or rehabilitate, replace, or abandon a failing private on-site wastewater treatment system, that is located in the political subdivision, or may make a loan at or below the market interest rate, as defined in s. 281.59(1)(b), including an interest-free loan, to the owner of a contaminated private water supply, a well subject to abandonment, or a failing private on-site wastewater treatment system, that is located in the political subdivision, for those purposes. If a political subdivision takes any of the actions under this subsection, the political subdivision may, as a special charge under s. 66.0627 or special assessment under s. 66.0703, recover the costs of the remediation, the filling and sealing, or the rehabilitation, replacement, or abandonment, or collect the loan repayment. Notwithstanding s. 66.0627(4), a special charge imposed under this subsection may be collected in installments and may be included in the current or next tax roll for collection and settlement under ch. 74 even if the special charge is not delinquent.

W.S.A. 66.0627

66.0627. Special charges for current services and certain loan repayments

Currentness

(1) In this section:

(ad) “Brownfield revitalization project” means any of the following actions when taken upon premises that are located on, or that constitute, brownfields, as defined in s. 238.13 (1)(a):

1. Site assessment.

2. Remediation.

3. Lead or asbestos abatement.

4. Demolition.

5. Standard site preparation actions not included in subds. 1. to 4.

(am) “Energy efficiency or reliability improvement” means an improvement to a premises that reduces the usage of energy, or increases the efficiency or reliability of energy usage, at the premises, including energy storage or backup power generation improvements or improvements that facilitate participation in a microgrid.

(ao) “EV infrastructure improvement” means an improvement to a premises to provide facilities for charging vehicles that are fully or partially powered by electricity.

(b) “Political subdivision” means a city, village, town, or county.

(bk) “Renewable resource application” means any of the following:

1. An improvement to a premises that allows for the production of energy through the incorporation of solar thermal electric or photovoltaic energy.

2. An improvement to a premises that allows for the small scale derivation of electricity from a renewable resource listed under s. 196.378(1)(h).

3. A manure digestion or other biomass system that produces natural gas.

(bm) "Resiliency improvement" means an improvement to a premises intended to increase resilience or improve the durability of infrastructure, including an improvement intended to improve storm and wind durability or wind resistance or to assist in fire suppression or mitigation of damage from flooding.

(c) "Service" includes snow and ice removal, weed elimination, street sprinkling, oiling and tarring, repair of sidewalks or curb and gutter, garbage and refuse disposal, recycling, storm water management, including construction of storm water management facilities, tree care, removal and disposition of dead animals under s. 60.23(20), loan repayment under s. 70.57(4)(b), soil conservation work under s. 92.115, and snow removal under s. 86.105.

(cg) "Storm water control measure" means an improvement to a premises that uses structural or nonstructural measures, practices, techniques, or devices designed to mitigate the negative impacts of storm water runoff or other surface runoff to the premises, including an infiltration system, wet detention pond, constructed wetland, grassed swale, or vegetative roofing system. "Storm water control measure" does not include a rain barrel or cistern designed for temporary storage of precipitation.

(d) "Water efficiency improvement" means an improvement to a premises that reduces the usage of water, or increases the efficiency of water usage, at the premises.

(2) Except as provided in sub. (5), the governing body of a city, village or town may impose a special charge against real property for current services rendered by allocating all or part of the cost of the service to the property served. The authority under this section is in addition to any other method provided by law.

(3)(a) Except as provided in par. (b), the governing body of the city, village or town may determine the manner of providing notice of a special charge.

(b) Before a special charge for street tarring or the repair of sidewalks, curbs or gutters may be imposed, a public hearing shall be held by the governing body on whether the service in question will be funded in whole or in part by a special charge. Any interested person may testify at the hearing. Notice of the hearing shall be by class 1 notice under ch. 985, published at least 20 days before the hearing. A copy of the notice shall be mailed at least 10 days before the hearing to each interested person whose address is known or can be ascertained with reasonable diligence. The notice under this paragraph shall state the date, time and location of the hearing, the subject matter of the hearing and that any interested person may testify.

(4) A special charge is not payable in installments. If a special charge is not paid within the time determined by the governing body, the special charge is delinquent. A delinquent special charge becomes a lien on the property against which it is imposed

as of the date of delinquency. The delinquent special charge shall be included in the current or next tax roll for collection and settlement under ch. 74.

(5) Except with respect to storm water management, including construction of storm water management facilities, no special charge may be imposed under this section to collect arrearages owed a municipal public utility.

(6) If a special charge imposed under this section is held invalid because this section is found unconstitutional, the governing body may reassess the special charge under any applicable law.

(7) Notwithstanding sub. (2), no political subdivision may enact an ordinance, or enforce an existing ordinance, that imposes a fee on the owner or occupant of property for a call for assistance that is made by the owner or occupant requesting law enforcement services that relate to any of the following:

(a) Domestic abuse, as defined in s. 813.12(1)(am).

(b) Sexual assault, as described under ss. 940.225, 948.02, and 948.025.

(c) Stalking, as described in s. 940.32.

(8)(a)1. Except as provided in subd. 2., a political subdivision may make a loan, or enter into an agreement regarding loan repayments to a 3rd party for owner-arranged or lessee-arranged financing, to an owner or lessee of a premises that is a residential property containing at least 5 dwelling units or a nonresidential property and that is located in the political subdivision for a brownfield revitalization project or for the financing or refinancing of a project for making, installing, operating, or maintaining any of the following with regard to the premises:

a. An energy efficiency or reliability improvement.

b. A water efficiency improvement.

c. A renewable resource application.

d. An EV infrastructure improvement.

e. A resiliency improvement.

f. A storm water control measure.

2. A political subdivision may not make a loan or enter into an agreement under subd. 1. for the financing or refinancing of a project for making, installing, operating, or maintaining a resiliency improvement for a premises to which a floodplain zoning ordinance applies unless all of the following apply:

a. If the premises is a nonconforming building, as defined in s. 87.30(1d)(a)1., the building would be permanently repaired, reconstructed, or improved so as to comply with all applicable requirements of the floodplain zoning ordinance for the area of the floodplain that it occupies after completion of the resiliency improvement.

b. If the political subdivision participates in the National Flood Insurance Program, the owner or lessee of the premises agrees to maintain any flood insurance policy required under the program for the premises.

(ag)1. Subject to subd. 2., a political subdivision may make a loan, or enter into an agreement regarding loan repayments to a 3rd party for owner-arranged financing, to an owner of a premises located in the political subdivision for the purpose of replacing customer-side water service lines, as defined in s. 196.372(1)(a), containing lead.

2. If a political subdivision makes a loan under subd. 1., the political subdivision shall require each owner of a premises located in the political subdivision that is serviced by a customer-side water service line, as defined in s. 196.372(1)(a), containing lead to replace that customer-side water service line.

(am) If a political subdivision makes a loan or enters into an agreement under par. (a) 1. or (ag), the political subdivision may collect the amounts due under the loan or agreement as a special charge under this section. Notwithstanding sub. (4), a special charge imposed under this paragraph may be collected in installments and may be included in the current or next tax roll for collection and settlement under ch. 74 even if the special charge is not delinquent. If a political subdivision makes a loan, or enters into an agreement regarding loan repayments to a 3rd party, the repayment period may not exceed 30 years.

(b) A political subdivision that imposes a special charge under par. (am) may permit special charge installments to be collected by a 3rd party that has provided financing for the project under par. (a)1. and may require that the 3rd party inform the political subdivision if a special charge installment is delinquent.

(c) An installment payment authorized under par. (am) that is delinquent becomes a lien on the property that benefits from the project under par. (a)1. or (ag) as of the date of delinquency. A lien under this paragraph runs with the land and has the same priority as a special assessment lien.

(cm)1. If an installment payment authorized under par. (am) is delinquent, a lien under par. (c) may be enforced by foreclosure under s. 75.521.

2. The governing body of a county may assign the county's right to take judgment with respect to any parcel that is subject to subd. 1. to a 3rd party that is party to a loan repayment agreement under par. (a)1. or (ag). An assignment under this subdivision shall be in accordance with s. 75.106, except that s. 75.106(1) and (2)(d), (e), and (f) do not apply.

(d) A political subdivision that, under par. (a)1., makes a loan to, or enters an agreement with, an owner or lessee for a project under par. (a)1. shall require the owner or lessee to do all of the following:

1. For an energy efficiency or reliability improvement or water efficiency improvement, obtain a 3rd-party assessment of the baseline water or energy use of the owner or lessee's property and an assessment of the expected monetary savings due to the improvement or, for a renewable resource application, obtain an assessment of the renewable energy production of the application and the expected monetary benefit to be generated by the application. This subdivision does not apply to a loan or agreement for a brownfield revitalization project, a customer-side water service line replacement, an EV infrastructure improvement, a resiliency improvement, or a storm water control measure.

2. After the project under par. (a)1. is complete, provide a verification that the project was properly made, installed, or maintained or, for a loan or agreement solely for the operation of a project, that at the time the loan is made or the agreement entered into the project was in proper operational condition.

(f) A political subdivision shall require that the owner or lessee obtain the written consent of all holders of a mortgage of record on the premises as a condition of making a loan or entering into an agreement under par. (a)1.

Editors' Notes

COMMENTS--1999 ACT 150, § 170

Note: Restates s. 66.60(16), relating to special charges, and renumbers the provision to make it a separate section within ch. 66.

In addition:

1. Expands the examples in the definition of service to expressly include removal and disposition of dead animals under s. 60.23(20), conservation work under s. 92.115 [as renumbered by this bill] and snow removal under s. 86.105. Previously, these services were authorized to be funded by special assessment under s. 66.345, repealed by this bill. See Section 372 of this bill.

2. Expands the examples in the definition of service to expressly include recycling to reflect prevailing interpretation and current practice.

W.S.A. 66.0628

66.0628. Fees imposed by a political subdivision

Currentness

(1) In this section:

(a) “Political subdivision” means a city, village, town, or county.

(b) “Reasonable relationship” means that the cost charged by a political subdivision for a service provided to a person may not exceed the political subdivision's reasonable direct costs that are associated with any activity undertaken by the political subdivision that is related to the fee.

(2) Any fee that is imposed by a political subdivision shall bear a reasonable relationship to the service for which the fee is imposed.

(2m) A political subdivision may not impose a fee or charge related to the political subdivision enforcing an ordinance related to noxious weeds, electronic waste, or other building or property maintenance standards unless the political subdivision first notifies the person against whom the fee or charge is to be imposed that the fee or charge may be imposed. If the notice relates to a building that is not owner-occupied, the notice shall be provided to the owner by 1st class mail or electronic mail. If the owner of a property provides an electronic mail address to a political subdivision, the political subdivision may not impose a fee or charge related to the political subdivision enforcing an ordinance related to noxious weeds, electronic waste, or other building or property maintenance standards at that property unless the political subdivision first notifies the owner of the property using the electronic mail address provided. This subsection does not apply to a fee or charge related to the clearing of snow or ice from a sidewalk or to an ordinance violation that creates an immediate danger to public health, safety, or welfare.

(3) If a political subdivision enters into a contract to purchase engineering, legal, or other professional services from another person and the political subdivision passes along the cost for such professional services to another person under a separate contract between the political subdivision and that person, the rate charged that other person for the professional services may not exceed the rate customarily paid for similar services by the political subdivision.

(4)(a) Any person aggrieved by a fee imposed by a political subdivision because the person does not believe that the fee bears a reasonable relationship to the service for which the fee is imposed may appeal the reasonableness of the fee to the tax appeals commission by filing a petition with the commission within 90 days after the fee is due and payable. The commission's decision may be reviewed under s. 73.015. For appeals brought under this subsection, the filing fee required under s. 73.01(5)(a) does not apply.

(b) With regard to an appeal filed with the tax appeals commission under par. (a), the political subdivision shall bear the burden of proof to establish that a reasonable relationship exists between the fee imposed and the services for which the fee is imposed.

66.0701. Special assessments by local ordinance

Currentness

(1) Except as provided in s. 66.0721, in addition to other methods provided by law, the governing body of a town, village or 2nd, 3rd or 4th class city may, by ordinance, provide that the cost of installing or constructing any public work or improvement shall be charged in whole or in part to the property benefited, and make an assessment against the property benefited in the manner that the governing body determines. The special assessment is a lien against the property from the date of the levy.

(2) Every ordinance under this section shall contain provisions for reasonable notice and hearing. Any person against whose land a special assessment is levied under the ordinance may appeal in the manner prescribed in s. 66.0703(12) within 40 days of the date of the final determination of the governing body.

End of Document

W.S.A. 66.0703

66.0703. Special assessments, generally

Currentness

(1)(a) Except as provided in s. 66.0721, as a complete alternative to all other methods provided by law, any city, town or village may, by resolution of its governing body, levy and collect special assessments upon property in a limited and determinable area for special benefits conferred upon the property by any municipal work or improvement; and may provide for the payment of all or any part of the cost of the work or improvement out of the proceeds of the special assessments.

(b) The amount assessed against any property for any work or improvement which does not represent an exercise of the police power may not exceed the value of the benefits accruing to the property. If an assessment represents an exercise of the police power, the assessment shall be upon a reasonable basis as determined by the governing body of the city, town or village.

(c) If any property that is benefited is by law exempt from assessment, the assessment shall be computed and shall be paid by the city, town or village.

(2) The cost of any work or improvement to be paid in whole or in part by special assessment on property may include the direct and indirect cost, the resulting damages, the interest on bonds or notes issued in anticipation of the collection of the assessments, a reasonable charge for the services of the administrative staff of the city, town or village and the cost of any architectural, engineering and legal services, and any other item of direct or indirect cost that may reasonably be attributed to the proposed work or improvement. The amount to be assessed against all property for the proposed work or improvement shall be apportioned among the individual parcels in the manner designated by the governing body.

(3) A parcel of land against which a special assessment has been levied for the sanitary sewer or water main laid in one of the streets that the parcel abuts is entitled to a deduction or exemption that the governing body determines to be reasonable and just under the circumstances of each case, when a special assessment is levied for the sanitary sewer or water main laid in the other street that the corner lot abuts. The governing body may allow a similar deduction or exemption from special assessments levied for any other public improvement.

(4) Before the exercise of any powers conferred by this section, the governing body shall declare by preliminary resolution its intention to exercise the powers for a stated municipal purpose. The resolution shall describe generally the contemplated purpose, the limits of the proposed assessment district, the number of installments in which the special assessments may be paid, or that the number of installments will be determined at the hearing required under sub. (7), and direct the proper municipal officer or employee to make a report on the proposal. The resolution may limit the proportion of the cost to be assessed.

(5) The report required by sub. (4) shall consist of:

(a) Preliminary or final plans and specifications.

(b) An estimate of the entire cost of the proposed work or improvement.

(c) Except as provided in par. (d), an estimate, as to each parcel of property affected, of:

1. The assessment of benefits to be levied.

2. The damages to be awarded for property taken or damaged.

3. The net amount of the benefits over damages or the net amount of the damages over benefits.

(d) A statement that the property against which the assessments are proposed is benefited, if the work or improvement constitutes an exercise of the police power. If this paragraph applies, the estimates required under par. (c) shall be replaced by a schedule of the proposed assessments.

(6) A copy of the report when completed shall be filed with the municipal clerk for public inspection. If property of the state may be subject to assessment under s. 66.0705, the municipal clerk shall file a copy of the report with the state agency which manages the property. If the assessment to the property of the state for a project, as defined under s. 66.0705(2), is $50,000 or more, the state agency shall submit a request for approval of the assessment, with its recommendation, to the building commission. The building commission shall review the assessment and shall determine within 90 days of the date on which the commission receives the report if the assessment is just and legal and if the proposed improvement is compatible with state plans for the facility which is the subject of the proposed improvement. If the building commission so determines, it shall approve the assessment. No project in which the property of the state is assessed at $50,000 or more may be commenced and no contract on the project may be let without approval of the assessment by the building commission under this subsection. The building commission shall submit a copy of its determination under this subsection to the state agency that manages the property which is the subject of the determination.

(7)(a) Upon the completion and filing of the report required by sub. (4), the city, town or village clerk shall prepare a notice stating the nature of the proposed work or improvement, the general boundary lines of the proposed assessment district including, in the discretion of the governing body, a small map, the place and time at which the report may be inspected, and the place and time at which all interested persons, or their agents or attorneys, may appear before the governing body, a committee of the governing body or the board of public works and be heard concerning the matters contained in the preliminary resolution and the report. The notice shall be published as a class 1 notice, under ch. 985, in the city, town or village and a copy of the notice shall be mailed, at least 10 days before the hearing or proceeding, to every interested person whose post-office address is known, or can be ascertained with reasonable diligence. The hearing shall commence not less than 10 nor more than 40 days after publication.

(b) The notice and hearing requirements under par. (a) do not apply if they are waived, in writing, by all the owners of property affected by the special assessment.

(8)(a) After the hearing upon any proposed work or improvement, the governing body may approve, disapprove or modify, or it may rerefer the report prepared under subs. (4) and (5) to the designated officer or employee with directions to change the plans and specifications and to accomplish a fair and equitable assessment.

(b) If an assessment of benefits is made against any property and an award of compensation or damages is made in favor of the same property, the governing body shall assess against or award in favor of the property only the difference between the assessment of benefits and the award of damages or compensation.

(c) When the governing body finally determines to proceed with the work or improvement, it shall approve the plans and specifications and adopt a resolution directing that the work or improvement be carried out and paid for in accordance with the report as finally approved.

(d) The city, town or village clerk shall publish the final resolution as a class 1 notice, under ch. 985, in the assessment district and a copy of the resolution shall be mailed to every interested person whose post-office address is known, or can be ascertained with reasonable diligence.

(e) When the final resolution is published, all work or improvements described in the resolution and all awards, compensations and assessments arising from the resolution are then authorized and made, subject to the right of appeal under sub. (12).

(9) If more than a single type of project is undertaken as part of a general improvement affecting any property, the governing body may finally combine the assessments for all purposes as a single assessment on each property affected, if each property owner may object to the assessment for any single purpose or for more than one purpose.

(10) If the actual cost of any project, upon completion or after the receipt of bids, is found to vary materially from the estimates, if any assessment is void or invalid, or if the governing body decides to reconsider and reopen any assessment, it may, after giving notice as provided in sub. (7)(a) and after a public hearing, amend, cancel or confirm the prior assessment. A notice of the resolution amending, canceling or confirming the prior assessment shall be given by the clerk as provided in sub. (8)(d). If the assessments are amended to provide for the refunding of special assessment B bonds under s. 66.0713(6), all direct and indirect costs reasonably attributable to the refunding of the bonds may be included in the cost of the public improvements being financed.

(11) If the cost of the project is less than the special assessments levied, the governing body, without notice or hearing, shall reduce each special assessment proportionately and if any assessments or installments have been paid the excess over cost shall be applied to reduce succeeding unpaid installments, if the property owner has elected to pay in installments, or refunded to the property owner.

(12)(a) A person having an interest in a parcel of land affected by a determination of the governing body, under sub. (8)(c), (10) or (11), may, within 90 days after the date of the notice or of the publication of the final resolution under sub. (8)(d), appeal the determination to the circuit court of the county in which the property is located. The person appealing shall serve a written notice of appeal upon the clerk of the city, town or village and execute a bond to the city, town or village in the sum of $150 with 2 sureties or a bonding company to be approved by the city, town or village clerk, conditioned for the faithful prosecution of the appeal and the payment of all costs that may be adjudged against that person. The clerk, if an appeal is taken, shall prepare

a brief statement of the proceedings in the matter before the governing body, with its decision on the matter, and shall transmit the statement with the original or certified copies of all the papers in the matter to the clerk of the circuit court.

(b) The appeal shall be tried and determined in the same manner as cases originally commenced in circuit court, and costs awarded as provided in s. 893.80.

(c) If a contract has been made for making the improvement the appeal does not affect the contract, and certificates or bonds may be issued in anticipation of the collection of the entire assessment for the improvement, including the assessment on any property represented in the appeal as if the appeal had not been taken.

(d) Upon appeal under this subsection, the court may, based on the improvement as actually constructed, render a judgment affirming, annulling or modifying and affirming, as modified, the action or decision of the governing body. If the court finds that any assessment or any award of damages is excessive or insufficient, the assessment or award need not be annulled, but the court may reduce or increase the assessment or award of damages and affirm the assessment or award as so modified.

(e) An appeal under this subsection is the sole remedy of any person aggrieved by a determination of the governing body, whether or not the improvement was made according to the plans and specifications, and shall raise any question of law or fact, stated in the notice of appeal, involving the making of the improvement, the assessment of benefits or the award of damages or the levy of any special assessment. The limitation in par. (a) does not apply to appeals based on fraud or on latent defects in the construction of the improvement discovered after the period of limitation.

(f) It is a condition to the maintenance of an appeal that any assessment appealed from shall be paid when the assessment or any installments become due. If there is a default in making a payment, the appeal shall be dismissed.

(13) Every special assessment levied under this section is a lien on the property against which it is levied on behalf of the municipality levying the assessment or the owner of any certificate, bond or other document issued by public authority, evidencing ownership of or any interest in the special assessment, from the date of the determination of the assessment by the governing body. The governing body shall provide for the collection of the assessments and may establish penalties for payment after the due date. The governing body shall provide that all assessments or installments that are not paid by the date specified shall be extended upon the tax roll as a delinquent special assessment, as defined under s. 74.01(3), against the property and all proceedings in relation to the collection, return and sale of property for delinquent real estate taxes apply to the special assessment, except as otherwise provided by statute.

(14) If a special assessment levied under this section is held invalid because this section is found to be unconstitutional, the governing body may reassess the special assessment under any applicable law.

Subchapter VII. Special Assessments

W.S.A. 66.0705

66.0705. Property of public and private entities subject to special assessments

Currentness

(1)(a) The property of this state, except that held for highway right-of-way purposes or acquired and held for purposes under s. 85.08 or 85.09, and the property of every county, city, village, town, school district, sewerage district or commission, sanitary or water district or commission, or any public board or commission within this state, and of every corporation, company, or individual operating any railroad, telegraph, telecommunications, electric light, or power system, or doing any of the business mentioned in ch. 76, and of every other corporation or company is in all respects subject to all special assessments for local improvements.

(b) Certificates and improvement bonds for special assessments may be issued and the lien of the special assessments enforced against property described in par. (a), except property of the state, in the same manner and to the same extent as the property of individuals. Special assessments on property described in par. (a) may not extend to the right, easement or franchise to operate or maintain railroads, telegraph, telecommunications or electric light or power systems in streets, alleys, parks or highways. The amount represented by any certificate or improvement bond issued under this paragraph is a debt due personally from the corporation, company or individual, payable in the case of a certificate when the taxes for the year of its issue are payable, and in the case of a bond according to the terms of the bond.

(2) In this subsection, “assessment” means a special assessment on property of this state and “project” means any continuous improvement within overall project limits regardless of whether small exterior segments are left unimproved. If the assessment of a project is less than $50,000, or if the assessment of a project is $50,000 or more and the building commission approves the assessment under s. 66.0703(6), the state agency which manages the property shall pay the assessment from the revenue source which supports the general operating costs of the agency or program against which the assessment is made.

Current through 2023 Act 272, published April 10, 2024.

End of Document

W.S.A. 66.0707

66.0707. Assessment or special charge against property in adjacent city, village or town

Currentness

(1) A city, village or town may levy special assessments for municipal work or improvement under s. 66.0703 on property in an adjacent city, village or town, if the property abuts and benefits from the work or improvement and if the governing body of the municipality where the property is located by resolution approves the levy by resolution. The owner of the property is entitled to the use of the work or improvement on which the assessment is based on the same conditions as the owner of property within the city, village or town.

(2) A city, village or town may impose a special charge under s. 66.0627 against real property in an adjacent city, village or town that is served by current services rendered by the municipality imposing the special charge if the municipality in which the property is located approves the imposition by resolution. The owner of the property is entitled to the use and enjoyment of the service for which the special charge is imposed on the same conditions as the owner of property within the city, village or town.

(3) A special assessment or special charge under this section is a lien against the benefited property and shall be collected by the treasurer in the same manner as the taxes of the municipality and paid over by the treasurer to the treasurer of the municipality levying the assessment.

Editors' Notes

COMMENTS--1999 ACT 150, § 192

Note: [The creation of subsec. (2)] Expands the scope of s. 66.65, renumbered s. 66.0707, to include special charges. Currently, the provision is limited to special assessments against property in an adjacent city, village or town that abuts and benefits from a public work or improvement. See Sections 550 and 551 of this bill [sections 550 and 551 renumber § 66.65 as subsecs. (1) and (3) of this section].

Subchapter VII. Special Assessments

W.S.A. 66.0709

66.0709. Preliminary payment of improvements funded by special assessments

Currentness

(1) In this section:

(a) "Local governmental unit" has the meaning given in s. 66.0713(1)(c).

(b) "Public improvement" has the meaning given in s. 66.0713(1)(d).

(2) If it is determined that the cost of a public improvement is to be paid, in whole or in part, by special assessments against the property to be benefited by the improvement, the resolution authorizing the public improvement shall provide that the whole, or any stated proportion, or no part of the estimated aggregate cost of the public improvement, which is to be levied as special assessments, shall be paid into the treasury of the local governmental unit in cash. The public improvement may not be commenced nor any contract for the improvement let until the payment required by the resolution is paid into the treasury of the local governmental unit by the owner or persons having an interest in the property to be benefited. The payment shall be credited against the amount of the special assessments levied or to be levied against benefited property designated by the payer. If a preliminary payment is required by the resolution, the refusal of one or more owners or persons having an interest in the property to be benefited to pay any preliminary payments does not prevent the making of the improvement if the entire specified sum is obtained from the remaining owners or interested parties.

Chapter 66. General Municipality Law (Refs & Annos)
Subchapter IX. Public Works and Projects

W.S.A. 66.0901

66.0901. Public works, contracts, bids

Currentness

(1) Definitions. In this section:

(ae) "Agreement with a labor organization" means any agreement with a labor organization, including a collective bargaining agreement, a project labor agreement, or a community workforce agreement.

(am) "Labor organization" has the meaning given in s. 5.02(8m).

(as) "Municipality" means the state or a town, city, village, school district, board of school directors, sewer district, drainage district, technical college district or other public or quasi-public corporation, officer, board or other public body charged with the duty of receiving bids for and awarding any public contracts.

(b) "Person" means an individual, partnership, association, limited liability company, corporation or joint stock company, lessee, trustee or receiver.

(bm) "Political subdivision" means a city, village, town, or county.

(c) "Public contract" means a contract for the construction, execution, repair, remodeling or improvement of a public work or building or for the furnishing of supplies or material of any kind, proposals for which are required to be advertised for by law.

(d) "Subcontractor" means a person whose relationship to the principal contractor is substantially the same as to a part of the work as the latter's relationship is to the proprietor. A "subcontractor" takes a distinct part of the work in a way that the "subcontractor" does not contemplate doing merely personal service.

(1m) Method of bidding. (a) Except when necessary to secure federal aid, whenever a political subdivision lets a public contract by bidding, the political subdivision shall comply with all of the following:

1. The bidding shall be on the basis of sealed competitive bids.

2. The contract shall be awarded to the lowest responsible bidder.

(b) Except when necessary to secure federal aid, a political subdivision may not use a bidding method that gives preference based on the geographic location of the bidder or that uses criteria other than the lowest responsible bidder in awarding a contract.

(2) Bidder's proof of responsibility. A municipality intending to enter into a public contract may, before delivering any form for bid proposals, plans, and specifications to any person, except suppliers, and others not intending to submit a direct bid, require the person to submit a full and complete statement sworn to before an officer authorized by law to administer oaths. The statement shall consist of information relating to financial ability, equipment, experience in the work prescribed in the public contract, and other matters that the municipality requires for the protection and welfare of the public in the performance of a public contract. The statement shall be in writing on a standard form of a questionnaire that is adopted and furnished by the municipality. The statement shall be filed in the manner and place designated by the municipality. The statement shall not be received less than 5 days prior to the time set for the opening of bids. The contents of the statement shall be confidential and may not be disclosed except upon the written order of the person furnishing the statement, for necessary use by the public body in qualifying the person, or in cases of actions against, or by, the person or municipality. The governing body of the municipality or the committee, board, or employee charged with, or delegated by the governing body with, the duty of receiving bids and awarding contracts shall properly evaluate the statement and shall find the maker of the statement either qualified or unqualified.

(3) Proof of responsibility, condition precedent. No bid shall be received from any person who has not submitted the statement as provided in sub. (2), provided that any prospective bidder who has once qualified to the satisfaction of the municipality, committee, board or employee, and who wishes to become a bidder upon subsequent public contracts under the same jurisdiction, need not separately qualify on each public contract unless required so to do by the municipality, committee, board or employee.

(4) Rejection of bids. If the municipality, committee, board or employee is not satisfied with the sufficiency of the answer contained in the statement provided under sub. (2), the municipality, committee, board or employee may reject or disregard the bid.

(5) Corrections of errors in bids. If a person submits a bid or proposal for the performance of public work under any public contract to be let by a municipality and the bidder claims that a mistake, omission or error has been made in preparing the bid, the bidder shall, before the bids are opened, make known the fact that an error, omission or mistake has been made. If the bidder makes this fact known, the bid shall be returned to the bidder unopened and the bidder may not bid upon the public contract unless it is readvertised and relet upon the readvertisement. If a bidder makes an error, omission or mistake and discovers it after the bids are opened, the bidder shall immediately and without delay give written notice and make known the fact of the mistake, omission or error which has been committed and submit to the municipality clear and satisfactory evidence of the mistake, omission or error and that it was not caused by any careless act or omission on the bidder's part in the exercise of ordinary care in examining the plans or specifications and in conforming with the provisions of this section. If the discovery and notice of a mistake, omission or error causes a forfeiture, the bidder may not recover the moneys or certified check forfeited as liquidated damages unless it is proven before a court of competent jurisdiction in an action brought for the recovery of the amount forfeited, that in making the mistake, error or omission the bidder was free from carelessness, negligence or inexcusable neglect.

(6) Separation of contracts; classification of contractors. In public contracts for the construction, repair, remodeling or improvement of a public building or structure, other than highway structures and facilities, a municipality may bid projects based on a single or multiple division of the work. Public contracts shall be awarded according to the division of work selected for

bidding. Except as provided in sub. (6m), the municipality may set out in any public contract reasonable and lawful conditions as to the hours of labor, wages, residence, character and classification of workers to be employed by any contractor, classify contractors as to their financial responsibility, competency and ability to perform work and set up a classified list of contractors. The municipality may reject the bid of any person, if the person has not been classified for the kind or amount of work in the bid.

(6m) Prohibited practices. A municipality may not do any of the following in a specification for bids for a public contract under this section:

(a) Require that a bidder enter into or adhere to an agreement with a labor organization.

(b) Consider as a factor in making an award under this section whether any bidder has or has not entered into an agreement with a labor organization.

(c) Require that a bidder enter into, adhere to, or enforce any agreement that requires, as a condition of employment, that the bidder or bidder's employees become or remain members of, or be affiliated with, a labor organization or pay any dues, fees, assessments, or other charges or expenses of any kind or amount, or provide anything of value, to a labor organization or a labor organization's health, welfare, retirement, or other benefit plan or program.

(6s) Protected activity. Nothing in this section prohibits employers or employees from entering into agreements or engaging in any other activity protected by the National Labor Relations Act, 29 USC 151 to 169.

(7) Bidder's certificate. When bidding on a public contract, the bidder shall incorporate and make a part of the bidder's proposal for doing any work or labor or furnishing any material in or about any public work or contract of the municipality a sworn statement by the bidder, or if not an individual by one authorized, that the bidder or authorized person has examined and carefully prepared the proposal from the plans and specifications and has checked the same in detail before submitting the proposal or bid to the municipality. As a part of the proposal, the bidder also shall submit a list of the subcontractors the bidder proposes to contract with and the class of work to be performed by each. In order to qualify for inclusion in the bidder's list a subcontractor shall first submit a bid in writing, to the general contractor at least 48 hours prior to the time of the bid closing. The list may not be added to or altered without the written consent of the municipality. A proposal of a bidder is not invalid if any subcontractor and the class of work to be performed by the subcontractor has been omitted from a proposal; the omission shall be considered inadvertent or the bidder will perform the work personally.

(8) Settlement of disputes; defaults. Whenever there is a dispute between a contractor or surety or the municipality as to whether there is compliance with the provisions of a public contract as to the hours of labor, wages, residence, character and classification of workers employed by the contractor, the determination of the municipality is final. If a violation of these provisions occurs, the municipality may declare the contract in default and request the surety to perform or relet upon advertisement the remaining portion of the public contract.

(9) Estimates and release of funds. (a) Notwithstanding sub. (1)(as), in this subsection, “municipality” does not include the department of transportation.

(b) As the work progresses under a contract involving $1,000 or more for the construction, execution, repair, remodeling or improvement of a public work or building or for the furnishing of supplies or materials, regardless of whether proposals for

the contract are required to be advertised by law, the municipality, from time to time, shall grant to the contractor an estimate of the amount and proportionate value of the work done, which entitles the contractor to receive the amount of the estimate, less the retainage, from the proper fund. The retainage shall be an amount equal to not more than 5 percent of the estimate until 50 percent of the work has been completed. At 50 percent completion, further partial payments shall be made in full to the contractor and no additional amounts may be retained unless the architect or engineer certifies that the job is not proceeding satisfactorily, but amounts previously retained shall not be paid to the contractor. At 50 percent completion or any time after 50 percent completion when the progress of the work is not satisfactory, additional amounts may be retained but the total retainage may not be more than 10 percent of the value of the work completed. Upon substantial completion of the work, an amount retained may be paid to the contractor. When the work has been substantially completed except for work which cannot be completed because of weather conditions, lack of materials or other reasons which in the judgment of the municipality are valid reasons for noncompletion, the municipality may make additional payments, retaining at all times an amount sufficient to cover the estimated cost of the work still to be completed or may pay out the entire amount retained and receive from the contractor guarantees in the form of a bond or other collateral sufficient to ensure completion of the job. For the purposes of this section, estimates may include any fabricated or manufactured materials and components specified, previously paid for by the contractor and delivered to the work or properly stored and suitable for incorporation in the work embraced in the contract.

(11) Limitation on performance of private construction work by political subdivisions. (a) In this subsection, "construction project" means a road, sewer, water, stormwater, wastewater, grading, parking lot, or other infrastructure-related project or the provision of construction-related services for such a project.

(b) Except for work ancillary to replacing a utility-side water service line, as defined in s. 196.372(1)(c), containing lead that is performed with the consent of a private property owner and that does not involve replacing the customer-side water service line, as defined in s. 196.372(1)(a), containing lead, a political subdivision may not use its own workforce to perform a construction project for which a private person is financially responsible.

(12) Public building plan information. (a) In this subsection:

1. "Public building plan information" means construction plans, designs, specifications, and related materials for construction work undertaken, or proposed to be undertaken, by a municipality pursuant to a public contract.

2. "Public plan room" means a nonprofit organization that gathers and makes available to the public for inspection and copying public building plan information.

(b) Notwithstanding s. 19.35(3), if a municipality receives a request for public building plan information from a public plan room, the municipality shall provide the requested information by electronic copy, and without charging a fee, if all of the following apply:

1. The public building plan information relates to a structure or building constructed, or proposed to be constructed, by a municipality.

2. The public plan room allows the public to register and inspect or copy the public building plan information that it obtains under this subsection without charging a fee.

(c) A municipality shall provide the requested information under par. (b) even if the municipality contracts with another person to assist the municipality with public contracts, related construction projects, or the management and storage of public building plan information.

Chapter 66. General Municipality Law (Refs & Annos)
Subchapter X. Planning, Housing and Transportation

W.S.A. 66.1001

66.1001. Comprehensive planning

Currentness

(1) Definitions. In this section:

(a) "Comprehensive plan" means a guide to the physical, social, and economic development of a local governmental unit that is one of the following:

1. For a county, a development plan that is prepared or amended under s. 59.69(2) or (3).

2. For a city, village, or town, a master plan that is adopted or amended under s. 62.23(2) or (3).

3. For a regional planning commission, a master plan that is adopted or amended under s. 66.0309(8), (9) or (10).

(am) "Consistent with" means furthers or does not contradict the objectives, goals, and policies contained in the comprehensive plan.

(b) "Local governmental unit" means a city, village, town, county or regional planning commission that may adopt, prepare or amend a comprehensive plan.

(c) "Political subdivision" means a city, village, town, or county that may adopt, prepare, or amend a comprehensive plan.

(2) Contents of a comprehensive plan. A comprehensive plan shall contain all of the following elements:

(a) *Issues and opportunities element.* Background information on the local governmental unit and a statement of overall objectives, policies, goals and programs of the local governmental unit to guide the future development and redevelopment of the local governmental unit over a 20-year planning period. Background information shall include population, household and employment forecasts that the local governmental unit uses in developing its comprehensive plan, and demographic trends, age distribution, educational levels, income levels and employment characteristics that exist within the local governmental unit.

(b) *Housing element.* A compilation of objectives, policies, goals, maps and programs of the local governmental unit to provide an adequate housing supply that meets existing and forecasted housing demand in the local governmental unit. The element shall assess the age, structural, value and occupancy characteristics of the local governmental unit's housing stock. The element shall also identify specific policies and programs that promote the development of housing for residents of the local governmental unit and provide a range of housing choices that meet the needs of persons of all income levels and of all age groups and persons with special needs, policies and programs that promote the availability of land for the development or redevelopment of low-income and moderate-income housing, and policies and programs to maintain or rehabilitate the local governmental unit's existing housing stock.

(c) *Transportation element*. A compilation of objectives, policies, goals, maps and programs to guide the future development of the various modes of transportation, including highways, transit, transportation systems for persons with disabilities, bicycles, electric scooters, electric personal assistive mobility devices, walking, railroads, air transportation, trucking and water transportation. The element shall compare the local governmental unit's objectives, policies, goals and programs to state and regional transportation plans. The element shall also identify highways within the local governmental unit by function and incorporate state, regional and other applicable transportation plans, including transportation corridor plans, county highway functional and jurisdictional studies, urban area and rural area transportation plans, airport master plans and rail plans that apply in the local governmental unit.

(d) *Utilities and community facilities element.* A compilation of objectives, policies, goals, maps and programs to guide the future development of utilities and community facilities in the local governmental unit such as sanitary sewer service, storm water management, water supply, solid waste disposal, on-site wastewater treatment technologies, recycling facilities, parks, telecommunications facilities, power-generating plants and transmission lines, cemeteries, health care facilities, child care facilities and other public facilities, such as police, fire and rescue facilities, libraries, schools and other governmental facilities. The element shall describe the location, use and capacity of existing public utilities and community facilities that serve the local governmental unit, shall include an approximate timetable that forecasts the need in the local governmental unit to expand or rehabilitate existing utilities and facilities or to create new utilities and facilities and shall assess future needs for government services in the local governmental unit that are related to such utilities and facilities.

(e) *Agricultural, natural and cultural resources element.* A compilation of objectives, policies, goals, maps and programs for the conservation, and promotion of the effective management, of natural resources such as groundwater, forests, productive agricultural areas, environmentally sensitive areas, threatened and endangered species, stream corridors, surface water, floodplains, wetlands, wildlife habitat, metallic and nonmetallic mineral resources consistent with zoning limitations under s. 295.20(2), parks, open spaces, historical and cultural resources, community design, recreational resources and other natural resources.

(f) *Economic development element.* A compilation of objectives, policies, goals, maps and programs to promote the stabilization, retention or expansion, of the economic base and quality employment opportunities in the local governmental unit, including an analysis of the labor force and economic base of the local governmental unit. The element shall assess categories or particular types of new businesses and industries that are desired by the local governmental unit. The element shall assess the local governmental unit's strengths and weaknesses with respect to attracting and retaining businesses and industries, and shall designate an adequate number of sites for such businesses and industries. The element shall also evaluate and promote the use of environmentally contaminated sites for commercial or industrial uses. The element shall also identify county, regional and state economic development programs that apply to the local governmental unit.

(g) *Intergovernmental cooperation element.* A compilation of objectives, policies, goals, maps, and programs for joint planning and decision making with other jurisdictions, including school districts, drainage districts, and adjacent local governmental

units, for siting and building public facilities and sharing public services. The element shall analyze the relationship of the local governmental unit to school districts, drainage districts, and adjacent local governmental units, and to the region, the state and other governmental units. The element shall consider, to the greatest extent possible, the maps and plans of any military base or installation, with at least 200 assigned military personnel or that contains at least 2,000 acres, with which the local governmental unit shares common territory. The element shall incorporate any plans or agreements to which the local governmental unit is a party under s. 66.0301, 66.0307 or 66.0309. The element shall identify existing or potential conflicts between the local governmental unit and other governmental units that are specified in this paragraph and describe processes to resolve such conflicts.

(h) *Land-use element.* A compilation of objectives, policies, goals, maps and programs to guide the future development and redevelopment of public and private property. The element shall contain a listing of the amount, type, intensity and net density of existing uses of land in the local governmental unit, such as agricultural, residential, commercial, industrial and other public and private uses. The element shall analyze trends in the supply, demand and price of land, opportunities for redevelopment and existing and potential land-use conflicts. The element shall contain projections, based on the background information specified in par. (a), for 20 years, in 5-year increments, of future residential, agricultural, commercial and industrial land uses including the assumptions of net densities or other spatial assumptions upon which the projections are based. The element shall also include a series of maps that shows current land uses and future land uses that indicate productive agricultural soils, natural limitations for building site development, floodplains, wetlands and other environmentally sensitive lands, the boundaries of areas to which services of public utilities and community facilities, as those terms are used in par. (d), will be provided in the future, consistent with the timetable described in par. (d), and the general location of future land uses by net density or other classifications.

(i) *Implementation element.* A compilation of programs and specific actions to be completed in a stated sequence, including proposed changes to any applicable zoning ordinances, official maps, or subdivision ordinances, to implement the objectives, policies, plans and programs contained in pars. (a) to (h). The element shall describe how each of the elements of the comprehensive plan will be integrated and made consistent with the other elements of the comprehensive plan, and shall include a mechanism to measure the local governmental unit's progress toward achieving all aspects of the comprehensive plan. The element shall include a process for updating the comprehensive plan. A comprehensive plan under this subsection shall be updated no less than once every 10 years.

(2m) Effect of enactment of a comprehensive plan, consistency requirements. (a) The enactment of a comprehensive plan by ordinance does not make the comprehensive plan by itself a regulation.

(b) A conditional use permit that may be issued by a political subdivision does not need to be consistent with the political subdivision's comprehensive plan.

(3) Ordinances that must be consistent with comprehensive plans. Except as provided in sub. (3m), beginning on January 1, 2010, if a local governmental unit enacts or amends any of the following ordinances, the ordinance shall be consistent with that local governmental unit's comprehensive plan:

(g) Official mapping ordinances enacted or amended under s. 62.23(6).

(h) Local subdivision ordinances enacted or amended under s. 236.45 or 236.46.

(j) County zoning ordinances enacted or amended under s. 59.69.

(k) City or village zoning ordinances enacted or amended under s. 62.23(7).

(L) Town zoning ordinances enacted or amended under s. 60.61 or 60.62.

(q) Shorelands or wetlands in shorelands zoning ordinances enacted or amended under s. 59.692, 61.351, 61.353, 62.231, or 62.233.

(3m) Delay of consistency requirement. (a) If a local governmental unit has not adopted a comprehensive plan before January 1, 2010, the local governmental unit is exempt from the requirement under sub. (3) if any of the following applies:

1. The local governmental unit has applied for but has not received a comprehensive planning grant under s. 16.965(2), and the local governmental unit adopts a resolution stating that the local governmental unit will adopt a comprehensive plan that will take effect no later than January 1, 2012.

2. The local governmental unit has received a comprehensive planning grant under s. 16.965(2) and has been granted an extension of time under s. 16.965(5) to complete comprehensive planning.

(b) The exemption under par. (a) shall continue until the following dates:

1. For a local governmental unit exempt under par. (a) 1., January 1, 2012.

2. For a local governmental unit exempt under par. (a) 2., the date on which the extension of time granted under s. 16.965(5) expires.

(4) Procedures for adopting comprehensive plans. A local governmental unit shall comply with all of the following before its comprehensive plan may take effect:

(a) The governing body of a local governmental unit shall adopt written procedures that are designed to foster public participation, including open discussion, communication programs, information services, and public meetings for which advance notice has been provided, in every stage of the preparation of a comprehensive plan. The written procedures shall provide for wide distribution of proposed, alternative, or amended elements of a comprehensive plan and shall provide an opportunity for written comments on the plan to be submitted by members of the public to the governing body and for the governing body to respond to such written comments. The written procedures shall describe the methods the governing body of a local governmental unit will use to distribute proposed, alternative, or amended elements of a comprehensive plan to owners of property, or to persons who have a leasehold interest in property pursuant to which the persons may extract nonmetallic mineral resources in or on property, in which the allowable use or intensity of use of the property is changed by the comprehensive plan.

(b) The plan commission or other body of a local governmental unit that is authorized to prepare or amend a comprehensive plan may recommend the adoption or amendment of a comprehensive plan only by adopting a resolution by a majority vote of the entire commission. The vote shall be recorded in the official minutes of the plan commission or other body. The resolution shall refer to maps and other descriptive materials that relate to one or more elements of a comprehensive plan. One copy of an adopted comprehensive plan, or of an amendment to such a plan, shall be sent to all of the following:

1. Every governmental body that is located in whole or in part within the boundaries of the local governmental unit.

2. The clerk of every local governmental unit that is adjacent to the local governmental unit that is the subject of the plan that is adopted or amended as described in par. (b)(intro.).

4. After September 1, 2005, the department of administration.

5. The regional planning commission in which the local governmental unit is located.

6. The public library that serves the area in which the local governmental unit is located.

(c) No comprehensive plan that is recommended for adoption or amendment under par. (b) may take effect until the political subdivision enacts an ordinance or the regional planning commission adopts a resolution that adopts the plan or amendment. The political subdivision may not enact an ordinance or the regional planning commission may not adopt a resolution under this paragraph unless the comprehensive plan contains all of the elements specified in sub. (2). An ordinance may be enacted or a resolution may be adopted under this paragraph only by a majority vote of the members-elect, as defined in s. 59.001(2m), of the governing body. One copy of a comprehensive plan enacted or adopted under this paragraph shall be sent to all of the entities specified under par. (b).

(d) No political subdivision may enact an ordinance or no regional planning commission may adopt a resolution under par. (c) unless the political subdivision or regional planning commission holds at least one public hearing at which the proposed ordinance or resolution is discussed. That hearing must be preceded by a class 1 notice under ch. 985 that is published at least 30 days before the hearing is held. The political subdivision or regional planning commission may also provide notice of the hearing by any other means it considers appropriate. The class 1 notice shall contain at least the following information:

1. The date, time and place of the hearing.

2. A summary, which may include a map, of the proposed comprehensive plan or amendment to such a plan.

3. The name of an individual employed by the local governmental unit who may provide additional information regarding the proposed ordinance.

4. Information relating to where and when the proposed comprehensive plan or amendment to such a plan may be inspected before the hearing, and how a copy of the plan or amendment may be obtained.

(e) At least 30 days before the hearing described in par. (d) is held, a local governmental unit shall provide written notice to all of the following:

1. An operator who has obtained, or made application for, a permit that is described under s. 295.12(3)(d).

2. A person who has registered a marketable nonmetallic mineral deposit under s. 295.20.

3. Any other property owner or leaseholder who has an interest in property pursuant to which the person may extract nonmetallic mineral resources, if the property owner or leaseholder requests in writing that the local governmental unit provide the property owner or leaseholder notice of the hearing described in par. (d).

(f) A political subdivision shall maintain a list of persons who submit a written or electronic request to receive notice of any proposed ordinance, described under par. (c), that affects the allowable use of the property owned by the person. Annually, the political subdivision shall inform residents of the political subdivision that they may add their names to the list. The political subdivision may satisfy this requirement to provide such information by any of the following means: publishing a 1st class notice under ch. 985; publishing on the political subdivision's Internet site; 1st class mail; or including the information in a mailing that is sent to all property owners. At least 30 days before the hearing described in par. (d) is held a political subdivision shall provide written notice, including a copy or summary of the proposed ordinance, to all such persons whose property, the allowable use of which, may be affected by the proposed ordinance. The notice shall be by mail or in any reasonable form that is agreed to by the person and the political subdivision, including electronic mail, voice mail, or text message. The political subdivision may charge each person on the list who receives a notice by 1st class mail a fee that does not exceed the approximate cost of providing the notice to the person.

(5) Applicability of a regional planning commission's plan. A regional planning commission's comprehensive plan is only advisory in its applicability to a political subdivision and a political subdivision's comprehensive plan.

(6) Comprehensive plan may take effect. Notwithstanding sub. (4), a comprehensive plan, or an amendment of a comprehensive plan, may take effect even if a local governmental unit fails to provide the notice that is required under sub. (4) (e) or (f), unless the local governmental unit intentionally fails to provide the notice.

Notes of Decisions (5)

W. S. A. 66.1001, WI ST 66.1001
Current through 2023 Act 272, published April 10, 2024.

End of Document

West's Wisconsin Statutes Annotated
Municipalities (Ch. 59 to 68)
Chapter 66. General Municipality Law (Refs & Annos)
Subchapter XI. Development

W.S.A. 66.1101

66.1101. Promotion of industry; industrial sites

Currentness

(1) It is declared to be the policy of the state to encourage and promote the development of industry to provide greater employment opportunities and to broaden the state's tax base to relieve the tax burden of residents and home owners. It is recognized that the availability of suitable sites is a prime factor in influencing the location of industry but that existing available sites may be encroached upon by the development of other uses unless protected from encroachment by purchase and reservation. It is further recognized that cities, villages and towns have broad power to act for the commercial benefit and the health, safety and public welfare of the public. However, to implement that power, legislation authorizing borrowing is necessary. It is, therefore, the policy of the state to authorize cities, villages and towns to borrow for the reservation and development of industrial sites, and the expenditure of funds for that purpose is determined to be a public purpose.

(2) For financing purposes, the purchase, reservation and development of industrial sites undertaken by a city, village or town is a public utility within the meaning of s. 66.0621. In financing under that section, rentals and fees are considered to be revenue. Any indebtedness created under this section shall not be included in arriving at the constitutional debt limitation.

(3) Sites purchased for industrial development under this section or under any other authority may be developed by the city, village or town by the installation of utilities and roadways but not by the construction of buildings or structures. The sites may be sold or leased for industrial purposes but only for a fair consideration to be determined by the governing body.

Chapter 66. General Municipality Law (Refs & Annos)
Subchapter XII. Housing Authorities

W.S.A. 66.1201

66.1201. Housing authorities

Currentness

(1) Short title. Sections 66.1201 to 66.1211 may be referred to as the "Housing Authorities Law".

(2) Finding and declaration of necessity. It is declared that there exist in the state insanitary or unsafe dwelling accommodations and that persons of low income are forced to reside in insanitary or unsafe accommodations; that within the state there is a shortage of safe or sanitary dwelling accommodations available at rents which persons of low income can afford and that these persons are forced to occupy overcrowded and congested dwelling accommodations; that the conditions described in this subsection cause an increase in and spread of disease and crime and constitute a menace to the health, safety, morals and welfare of the residents of the state and impair economic values; that these conditions necessitate excessive and disproportionate expenditures of public funds for crime prevention and punishment, public health and safety, fire and accident protection, and other public services and facilities; that these slum areas cannot be cleared, nor can the shortage of safe and sanitary dwellings for persons of low income be relieved, through the operation of private enterprise, and that the construction of housing projects for persons of low income would, therefore, not be competitive with private enterprise; that the clearance, replanning and reconstruction of the areas in which insanitary or unsafe housing conditions exist and the providing of safe and sanitary dwelling accommodations for persons of low income are public uses and purposes for which public money may be spent and private property acquired and are governmental functions of state concern; that it is in the public interest that work on these projects be commenced as soon as possible in order to relieve unemployment which now constitutes an emergency; and the necessity in the public interest for the provisions of this section, is declared as a matter of legislative determination.

(2m) Discrimination. Persons otherwise entitled to any right, benefit, facility, or privilege under ss. 66.1201 to 66.1211 may not be denied the right, benefit, facility, or privilege in any manner for any purpose nor be discriminated against because of sex, race, color, creed, sexual orientation, status as a victim of domestic abuse, sexual assault, or stalking, as defined in s. 106.50(1m)(u), or national origin.

(3) Definitions. In ss. 66.1201 to 66.1211, unless a different meaning clearly appears from the context:

(a) "Area of operation" includes the city for which a housing authority is created, the area within 5 miles of the territorial boundaries of the city but not beyond the county limits of the county in which the city is located and the area within the limits of the city unless the city annexes the area of operation. "Area of operation" does not include any area which lies within the territorial boundaries of any city for which another housing authority is created by this section.

(b) “Authority” or “housing authority” means any of the public corporations established pursuant to sub. (4).

(c) “Bonds” means any bonds, interim certificates, notes, debentures or other obligations of the authority issued pursuant to ss. 66.1201 to 66.1211.

(cm) “City clerk” and “mayor” mean the clerk and mayor, respectively, of the city or the officers of the city charged with the duties customarily imposed on the clerk and mayor, respectively.

(d) “Commissioner” means one of the members of an authority appointed in accordance with ss. 66.1201 to 66.1211.

(e) “Community facilities” includes real and personal property, and buildings and equipment for recreational or social assemblies, for educational, health or welfare purposes and necessary utilities, when designed primarily for the benefit and use of the housing authority or the occupants of the dwelling accommodations, or for both.

(f) “Contract” means any agreement of an authority with or for the benefit of an obligee whether contained in a resolution, trust indenture, mortgage, lease, bond or other instrument.

(g) “Council” means the common council or other body charged with governing a city.

(h) “Federal government” includes the United States of America and any agency or instrumentality, corporate or otherwise, of the United States of America.

(i) “Government” includes the state and federal governments and any subdivision, agency or instrumentality, corporate or otherwise, of either of them.

(j) “Housing projects” includes all real and personal property, building and improvements, and community facilities acquired or constructed pursuant to a single plan either to demolish, clear, remove, alter or repair insanitary or unsafe housing or to provide safe and sanitary dwelling accommodations for persons of low income, or both. “Housing projects” includes the planning of buildings and improvements, the acquisition of property, the demolition of existing structures, the construction, reconstruction, alteration and repair of the improvements and all other related work.

(js) “Mixed development” means all real and personal property, buildings and improvements, and community facilities acquired, rehabilitated, or constructed pursuant to a single plan to revitalize, redevelop, or transfer one or more properties into a mixed-use or mixed-income development primarily to serve persons of low income or persons of low income and persons of moderate income with housing, commercial, and neighborhood amenities or other support services. “Mixed development” includes the planning of buildings and improvements, the acquisition of property, the demolition of existing structures, the construction, reconstruction, alteration, and repair of the improvements, and all other related work.

(k) “Mortgage” includes deeds of trust, mortgages, building and loan contracts, land contracts or other instruments conveying real or personal property as security for bonds and conferring a right to foreclose and cause a sale of the real property or personal property.

(L) "Obligee of the authority" or "obligee" includes any bondholder, trustee or trustees for any bondholders, any lessor demising property to the authority used in connection with a housing project or any assignee of the lessor's interest or any part of the lessor's interest, and the federal government, when it is a party to any contract with the authority.

(m) "Persons of low income" means persons or families who lack the amount of income necessary, as determined by the authority undertaking the housing project, to enable them, without financial assistance, to live in decent, safe and sanitary dwellings, without overcrowding.

(mg) "Persons of moderate income" means persons or families who qualify as having moderate income, as determined by the authority. The authority may not consider a household to be a person of moderate income if the household's income exceeds 120 percent of the median income for the area, unless an applicable guideline or regulation of the federal department of housing and urban development permits the household to qualify as having moderate income.

(n) "Real property" includes lands, lands under water, structures, and any easements, franchises and incorporeal hereditaments and every estate and right in an estate, legal and equitable, including terms for years and liens by way of judgment, mortgage or otherwise.

(o) "Slum" means any area where dwellings predominate which, by reason of dilapidation, overcrowding, faulty arrangement or design, lack of ventilation, light or sanitary facilities, or any combination of these factors, are detrimental to safety, health and morals.

(p) "State public body" means any city, town, village, county, municipal corporation, commission, district, authority, other subdivision or public body of the state.

(q) "Trust indenture" includes instruments pledging the revenues of real or personal properties.

(4) Creation of housing authorities. (a) When a council declares by resolution that there is need for an authority to function in the city, a public body corporate and politic then exists in the city and shall be known as the "housing authority" of the city. The authority may then transact business and exercise any powers granted to it under this section.

(b) The council shall adopt a resolution declaring that there is need for a housing authority in the city if the council finds that insanitary or unsafe inhabited dwelling accommodations exist in the city or that there is a shortage of safe or sanitary dwelling accommodations in the city available to persons of low income at rentals they can afford. In determining whether dwelling accommodations are unsafe or insanitary the council may take into consideration the degree of overcrowding, the percentage of land coverage, the light, air, space and access available to the inhabitants of the dwelling accommodations, the size and arrangement of the rooms, the sanitary facilities, and the extent to which conditions exist in the buildings which endanger life or property by fire or other causes.

(c) In any suit, action or proceeding involving the validity or enforcement of or relating to any contract of the authority, the authority shall be conclusively deemed to have become established and authorized to transact business and exercise its powers under this section upon proof of the adoption of a resolution by the council declaring the need for the authority. The resolution

is sufficient if it declares that there is a need for an authority and finds that either or both of the conditions described in par. (b) exist in the city. A copy of the resolution duly certified by the city clerk is admissible evidence in any suit, action or proceeding.

(5) Appointment, qualifications and tenure of commissioners. (a) When the council adopts a resolution under sub. (4), it shall promptly notify the mayor. Upon receiving the notice, the mayor shall, with the confirmation of the council, appoint 5 persons as commissioners of the authority, except that the mayor of a 1st class city that has created a housing authority before May 5, 1994, shall appoint 7 commissioners, at least 2 of whom shall be residents of a housing project acquired or constructed by the authority. No commissioner may be connected in any official capacity with any political party nor may more than 2 be officers of the city in which the authority is created. The powers of each authority shall be vested in the commissioners of the authority.

(b) The first 5 commissioners who are first appointed shall be designated by the mayor to serve for terms of 1, 2, 3, 4 and 5 years respectively from the date of their appointment and the 2 additional commissioners appointed by the mayor of a 1st class city under par. (a) shall be first appointed to terms of 3 and 5 years respectively. Thereafter, the term of office shall be 5 years. A commissioner shall hold office until his or her successor has been appointed and has qualified. Vacancies shall be filled for the unexpired term in the same manner as other appointments. Three commissioners constitute a quorum, except that in an authority with 7 commissioners, 4 commissioners constitute a quorum. The mayor shall file with the city clerk a certificate of the appointment or reappointment of any commissioner and the certificate is conclusive evidence of the proper appointment of that commissioner if that commissioner has been confirmed under this paragraph and has taken and filed the official oath before entering office. The council of a city may pay commissioners a per diem and mileage and other necessary expenses incurred in the discharge of their duties at rates established by the council.

(c) When the office of the first chairperson of the authority becomes vacant, the authority shall select a chairperson from among its members. An authority shall select from among its members a vice chairperson, and it may employ a secretary, who shall be executive director, technical experts and other officers, agents and employees, permanent and temporary and shall determine their qualifications, duties and compensation. An authority may call upon the city attorney or chief law officer of the city for legal services. An authority may delegate to one or more of its agents or employees powers or duties of the authority.

(6) Duty of the authority and its commissioners. The authority and its commissioners shall comply or cause compliance strictly with all provisions of ss. 66.1201 to 66.1211, with the laws of the state and with any contract of the authority.

(7) Interested commissioners or employees. No commissioner or employee of an authority may acquire any direct or indirect interest in any housing project or in any property included in any project or have any direct or indirect interest in any contract for insurance, materials or services to be furnished or used in connection with any housing project. If a commissioner or employee of an authority owns or controls a direct or indirect interest in any property included in any housing project, that person shall immediately disclose the interest in writing to the authority and the disclosure shall be entered upon the minutes of the authority. Failure to so disclose the interest constitutes misconduct in office.

(8) Removal of commissioners. For inefficiency or neglect of duty or misconduct in office, a commissioner of an authority may be removed by the mayor, but a commissioner may be removed only after having been given a copy of the charges at least 10 days before the hearing on the charges and an opportunity to be heard in person or by counsel. If a commissioner is removed, a record of the proceedings, together with the charges and findings, shall be filed in the office of the city clerk. To the extent applicable, the provisions of s. 17.16 relating to removal for cause apply to any removal.

(9) Powers of authority. An authority is a public body and a body corporate and politic, exercising public powers, and has all the powers necessary or convenient to carry out and effectuate the purposes and provisions of ss. 66.1201 to 66.1211, including the following powers in addition to others granted in this section:

(a) Within its area of operation to prepare, carry out, acquire, lease and operate housing projects approved by the council; to provide for the construction, reconstruction, improvement, alteration or repair of any housing project or any part of a housing project.

(am) On any property wholly or partially owned by a housing authority before October 1, 2021, and within its area of operation to prepare, carry out, acquire, lease, and operate mixed developments; and to provide for the construction, reconstruction, improvement, alteration, or repair of any mixed development or any part of a mixed development. This paragraph applies only to a housing authority created by a 1st class city.

(b) To take over by purchase, lease or otherwise any housing project undertaken by any government and located within the area of operation of the authority when approved by the council; to purchase, lease, obtain options upon, acquire by gift, grant, bequest, devise, or otherwise, any real or personal property or any interest in the real or personal property.

(c) To act as agent for any government in connection with the acquisition, construction, operation or management of a housing project or any part of a housing project.

(d) To arrange or contract for the furnishing of services, privileges, works, or facilities for, or in connection with, a housing project or the occupants of a housing project.

(e) To lease or rent any dwellings, houses, accommodations, lands, buildings, structures or facilities embraced in any housing project and, subject to the limitations contained in this section, to establish and revise the rents or charges for the housing project.

(f) Within its area of operation to investigate into living, dwelling and housing conditions and into the means and methods of improving those conditions; and to engage in research and studies on the subject of housing.

(h) To acquire by eminent domain any real property, including improvements and fixtures on the real property.

(i) To own, hold, clear and improve property, to insure or provide for the insurance of the property or operations of the authority against any risks, to procure insurance or guarantees from the federal government of the payment of any debts or parts of debts secured by mortgages made or held by the authority on any property included in any housing project.

(j) To contract for the sale of, and to sell, any part or all of the interest in real estate acquired and to execute contracts of sale and conveyances as the authority considers desirable.

(k) In connection with any loan, to agree to limitations upon its right to dispose of any housing project or part of a housing project.

(L) In connection with any loan by a government, to agree to limitations upon the exercise of any powers conferred upon the authority by ss. 66.1201 to 66.1211.

(m) To invest any funds held in reserve or sinking funds, or any funds not required for immediate disbursement, in property or securities in which savings banks may legally invest funds subject to their control.

(n) To sue and be sued, to have a seal and to alter the same at pleasure, to have perpetual succession, to make and execute contracts and other instruments necessary or convenient to the exercise of the powers of the authority.

(o) To make and amend and repeal bylaws, rules and regulations not inconsistent with ss. 66.1201 to 66.1211, to carry into effect the powers and purposes of the authority.

(p) To exercise all or any part or combination of powers granted in this section. No provisions of law with respect to the acquisition or disposition of property by other public bodies are applicable to an authority unless otherwise provided.

(q) To execute bonds, notes, debentures or other evidences of indebtedness which, when executed by a housing authority, are not a debt or charge against any city, county, state or any other governmental authority, other than against the authority itself and its available property, income or other assets in accordance with the terms of an evidence of indebtedness and of this section, and no individual liability exists for any official act done by any member of the authority. No authority may levy any tax or assessment.

(r) To provide by all means available under ss. 66.1201 to 66.1211 housing projects for veterans and their families regardless of their income. The projects are not subject to the limitations of s. 66.1205.

(s) Notwithstanding the provisions of any law, to acquire sites; to prepare, carry out, acquire, lease, construct and operate housing projects to provide temporary dwelling accommodations for families regardless of income who are displaced under ss. 66.1201 to 66.1331; to further slum clearance, urban redevelopment and blight elimination; and to provide temporary dwelling accommodations for families displaced by reason of any street widening, expressway or other public works project causing the demolition of dwellings.

(t) To participate in an employee retirement or pension system of the city which has declared the need for the authority and to expend funds of the authority for this purpose.

(u) To join or cooperate with one or more authorities in the exercise, either jointly or otherwise, of any of their powers for the purpose of financing, including the issuance of bonds, notes or other obligations and giving security for these obligations, planning, undertaking, owning, constructing, operating or contracting with respect to a housing project located within the area of operation of any one or more of the authorities. For this purpose an authority may by resolution prescribe and authorize any other housing authority, joining or cooperating with it, to act on its behalf with respect to any powers, as its agent or otherwise, in the name of the authority joining or cooperating or in its own name.

(v) To establish a procedure for preserving records of the authority by the use of microfilm, another reproductive device, optical imaging, or electronic formatting if authorized under s. 19.21(4)(c). The procedure shall assure that copies of records that are

open to public inspection continue to be available to members of the public requesting them. A photographic reproduction of a record or copy of a record generated from optical disc or electronic storage is deemed the same as an original record for all purposes if it meets the applicable standards established in ss. 16.61 and 16.612.

(w) To exercise any powers of a redevelopment authority operating under s. 66.1333 if done in concert with a redevelopment authority under a contract under s. 66.0301.

(x) To, within its area of operation, either by itself or with the department of veterans affairs, undertake and carry out studies and analyses of veterans housing needs and meeting those needs and make the study results available to the public, including the building, housing and supply industries.

(10) Eminent domain. (a) The authority may acquire by eminent domain any real property, including fixtures and improvements, which it deems necessary to carry out the purposes of ss. 66.1201 to 66.1211 after the adoption by it of a resolution declaring that the acquisition of the property described in the resolution is in the public interest and necessary for public use. The authority may exercise the power of eminent domain pursuant to ch. 32 or pursuant to any other applicable statutory provisions.

(b) At any time at or after the filing for condemnation, and before the entry of final judgment, the authority may file with the clerk of the court in which the petition is filed a declaration of taking signed by the duly authorized officer or agent of the authority declaring that all or any part of the property described in the petition is to be taken for the use of the authority. The declaration of taking is sufficient if it sets forth all of the following:

1. A description of the property.

2. A statement of the estate or interest in the property being taken.

3. A statement of the sum of money estimated by the authority to be just compensation for the property taken, which sum shall be not less than the last assessed valuation for tax purposes of the estate or interest in the property to be taken.

(c) From the filing of the declaration of taking under par. (b) and the deposit in court of the amount of the estimated compensation stated in the declaration, title to the property specified in the declaration vests in the authority and the property is condemned and taken for the use of the authority and the right to just compensation for the property vests in the persons entitled to the compensation. Upon the filing of the declaration of taking the court shall designate a day not exceeding 30 days after the filing, except upon good cause shown, on which the person in possession shall surrender possession to the authority.

(d) The ultimate amount of compensation vests in the manner provided by law. If the amount vested exceeds the amount deposited in court by the authority, the court shall enter judgment against the authority in the amount of the deficiency together with interest at the rate of 6 percent per year on the deficiency from the date of the vesting of title to the date of the entry of the final judgment subject to abatement for use, income, rents or profits derived from the property by the owner subsequent to the vesting of title in the authority. The court shall order the authority to deposit the amount of the deficiency in court.

(e) At any time before the vesting of title of property in the authority the authority may withdraw or dismiss its petition with respect to any of the property described in the petition.

(f) Upon vesting of title to any property in the authority, all the right, title and interest of all persons having an interest in, or lien upon, the property are divested immediately and these persons are entitled only to receive compensation for the property.

(g) Except as provided in this subsection with reference to the declaration of taking, the proceedings shall be as provided by law for condemnation, and the deposit in court of the amount estimated by the authority upon a declaration of taking shall be disbursed as provided by law for an award in condemnation proceedings.

(h) Property already devoted to a public use may be acquired, provided that no property belonging to any municipality or to any government may be acquired without its consent and that no property belonging to a public utility corporation may be acquired without the approval of the public service commission or other officer or tribunal, if any, having regulatory power over the public utility corporation.

(i) If a housing project or mixed development involves federal financial assistance, the duration of replacement housing payments to displaced tenants under the relocation plan is as provided under 42 USC 4624. This paragraph applies only to a project or development on a property wholly or partially owned before October 1, 2021, by a housing authority created by a 1st class city.

(11) Acquisition of land for government. The authority may acquire, by purchase or by the exercise of its power of eminent domain under sub. (10), any property, real or personal, for any housing project being constructed or operated by a government. The authority upon such terms and conditions, with or without consideration, as it shall determine, may convey title or deliver possession of property so acquired or purchased to the government for use in connection with a housing project.

(12) Zoning and building laws. All housing projects of an authority shall be subject to the planning, zoning, sanitary and building laws, ordinances and regulations applicable to the locality in which the housing project is situated.

(13) Types of bonds. (a)1. An authority may issue any bonds for its corporate purposes, including bonds on which the principal and interest are payable by any of the following methods:

a. Exclusively from the income and revenues of the housing project financed with the proceeds of the bonds, or with those proceeds together with a grant from the federal government in aid of the project.

b. Exclusively from the income and revenues of certain designated housing projects whether or not they were financed in whole or in part with the proceeds of the bonds.

c. From its revenues generally.

2. Any of the bonds under subd. 1. may be additionally secured by a pledge of any revenues or, subject to the limitations imposed under pars. (b) and (c), a mortgage of any housing project, projects or other property of the authority.

(b) Neither the commissioners of the authority nor any person executing the bonds is liable personally on the bonds by reason of their issuance.

(c) The bonds and other obligations of the authority are not a debt of any municipality located within its boundaries or of the state and this fact shall be stated on their face. Neither the state nor any municipality is liable for the bonds or other obligations, nor are they payable out of any funds or properties other than those of the authority.

(14) Form and sale of bonds. (a) Bonds of an authority shall be authorized by its resolution and may be issued in one or more series and shall bear any date, mature at any time, bear interest at any rate, be in any denomination, be in the form of coupon bonds or of bonds registered under s. 67.09, carry any conversion or registration privileges, have any rank or priority, be executed in any manner, be payable in any medium of payment, at any place, and be subject to any terms of redemption, with or without premium, that the resolution, its trust indenture or mortgage may provide. Any bond reciting in substance that it has been issued by an authority to aid in financing a housing project to provide dwelling accommodations for persons of low income shall be conclusively deemed, in any suit, action or proceeding involving the validity or enforceability of the bond or the security for the bond, to have been issued for such a housing project. Bonds of an authority are issued for an essential public and governmental purpose and are public instrumentalities and, together with interest and income, are exempt from taxes.

(b) The bonds may be sold at public or private sale as the authority provides. The bonds may be sold at any price determined by the authority.

(c) The bonds shall be executed as provided in s. 67.08(1).

(d) The authority may purchase, out of available funds, any bonds issued by it at a price not more than the principal amount of the bonds and the accrued interest. Bonds payable exclusively from the revenues of a designated project or projects shall be purchased only out of any revenues available for that purpose. All bonds so purchased shall be canceled. This paragraph does not apply to the redemption of bonds.

(e) Any provision of any law to the contrary notwithstanding, any bonds, interim certificates, or other obligations issued pursuant to ss. 66.1201 to 66.1211 are fully negotiable.

(15) Provisions of bonds, trust indentures, and mortgages. In connection with the issuance of bonds or the incurring of any obligation under a lease and in order to secure the payment of bonds or obligations, the authority may:

(a) Pledge by resolution, trust indenture, mortgage, subject to the limitations in this subsection, or other contract any of its rents, fees, or revenues.

(b) Covenant against mortgaging any of its property or against permitting any lien on its property.

(c) Covenant with respect to limitations on its right to sell, lease or otherwise dispose of any housing project or any part of a housing project, or with respect to limitations on its right to undertake additional housing projects.

(d) Covenant against pledging any of its rents, fees and revenues or against permitting any lien on its rents, fees and revenues.

(e) Provide for the release of property, rents, fees and revenues from any pledge or mortgage, and reserve rights and powers in, or the right to dispose of, property which is subject to a pledge or mortgage.

(f) Covenant as to the bonds to be issued pursuant to any resolution, trust indenture, mortgage or other instrument and as to the issuance of bonds in escrow or otherwise, and as to the use and disposition of the proceeds of the bonds.

(g) Provide for the terms, form, registration, exchange, execution and authentication of bonds.

(h) Provide for the replacement of lost, destroyed or mutilated bonds.

(i) Covenant that the authority warrants the title to the premises.

(j) Covenant as to the rents and fees to be charged, the amount to be raised each year or other period of time by rents, fees and other revenues and as to the use and disposition to be made of the revenues.

(k) Covenant as to the use of any of its property.

(L) Create special funds which segregate all of the following:

1. The proceeds of any loan or grant or both.

2. The rents, fees and revenues of a housing project.

3. Any moneys held for the payment of the costs of operations and maintenance of any housing projects or as a reserve for the meeting of contingencies in the operation and maintenance of housing projects.

4. Any moneys held for the payment of the principal and interest on its bonds or the sums due under its leases or as a reserve for the payments.

5. Any moneys held for any other reserves or contingencies.

(Lm) Covenant as to the use and disposal of the moneys held in funds created under par. (L).

(m) Redeem the bonds, covenant for their redemption and provide the terms and conditions of the bonds.

(n) Covenant against extending the time for the payment of its bonds or interest on the bonds by any means.

(o) Prescribe the procedure, if any, by which the terms of any contract with bondholders may be amended or abrogated, the amount of bonds the holders of which must consent to a contract amendment or abrogation and the manner in which consent may be given.

(p) Covenant as to property maintenance, replacement and insurance and the use and disposition of insurance moneys.

(q) Vest in an obligee of the authority, if the authority fails to observe or perform any covenant on its part to be kept or performed, the right to cure any default and to advance any moneys necessary for that purpose. The moneys advanced may be made an additional obligation of the authority with such interest, security and priority as may be provided in any trust indenture, mortgage, lease or contract of the authority.

(r) Covenant and prescribe as to the events of default and terms and conditions upon which any of its bonds shall become or may be declared due before maturity and as to the terms and conditions upon which the declaration and its consequences may be waived.

(s) Covenant as to the rights, liabilities, powers and duties arising upon the breach by it of any covenant, condition or obligation.

(t) Covenant to surrender possession of all or any part of any housing project upon the happening of a default, as defined in the contract, and to vest in an obligee the right to take possession and to use, operate, manage and control housing projects, and to collect and receive all rents, fees and revenues arising from the housing projects in the same manner as the authority itself might do and to dispose of the moneys collected in accordance with the agreement of the authority with the obligee.

(u) Vest in a trust the right to enforce any covenant made to secure, to pay, or in relation to the bonds, to provide for the powers and duties of a trustee, to limit liabilities of a trustee and to provide the terms and conditions upon which the trustee or the bondholders or any proportion of them may enforce any covenant.

(v) Make covenants other than the covenants that are authorized in this subsection.

(w) Execute all instruments that are necessary or convenient in the exercise of its powers or in the performance of its covenants or duties.

(x) Make covenants and do any act necessary or convenient in order to secure its bonds, or, in the absolute discretion of the authority, that tend to make the bonds more marketable. An authority may not mortgage any of its property except as provided in sub. (16).

(16) Power to mortgage when project financed with aid of government. (a) In this subsection, “government” includes the Wisconsin Housing and Economic Development Authority.

(b) In connection with any project financed in whole or in part, or otherwise aided by a government, whether through a donation of money or property, a loan, the insurance or guarantee of a loan, or otherwise, the authority may do any of the following:

1. Mortgage its property.

2. Grant security interests in its property.

3. Issue its note or other obligation as may be required by the government.

(17) Remedies of an obligee of authority. An obligee of the authority, subject to its contract, may do any of the following:

(a) By mandamus, suit, action or proceeding, all of which may be joined in one action, compel the authority and its commissioners, officers, agents or employees to perform every term, provision and covenant contained in any contract of the authority, and require the carrying out of any covenants and agreements of the authority and the fulfillment of all duties imposed upon the authority by ss. 66.1201 to 66.1211.

(b) By suit, action or proceeding enjoin any unlawful acts or things, or the violation of any of the rights of the obligee of the authority.

(c) By suit, action or proceeding cause possession of any housing project or any part of a housing project to be surrendered to any obligee having the right to possession pursuant to any contract of the authority.

(18) Additional remedies conferrable by mortgage or trust indenture. Any authority may by its trust indenture, mortgage, lease or other contract confer upon any obligee holding or representing a specified amount in bonds, lease or other obligations, the right upon the happening of an "event of default" as defined in the instrument:

(a) By suit, action or proceeding obtain the appointment of a receiver of any housing project of the authority or any part of a housing project. Upon appointment, a receiver may enter and take possession of the housing project or any part of the housing project and operate and maintain it, and collect and receive all fees, rents, revenues or other charges arising in the same manner as the authority itself might do. The receiver shall keep the moneys in a separate account or accounts and apply the moneys in accordance with the obligations of the authority as a court directs.

(b) By suit, action or proceeding require the authority and its commissioners to account as if it and they were the trustees of an express trust.

(19) Remedies cumulative. All the rights and remedies in this section are in addition to all other rights and remedies that may be conferred upon an obligee of the authority by law or by any contract with the authority.

(20) Subordination of mortgage to agreement with government. The authority may agree in any mortgage made by it that the mortgage is subordinate to a contract for the supervision by a government of the operation and maintenance of the mortgaged

property and the construction of improvements on the mortgaged property. A purchaser at a sale of the property of an authority pursuant to a foreclosure of a mortgage or any other remedy in connection with the foreclosure shall obtain title subject to the contract.

(21) Contracts with federal government. In addition to the powers conferred upon the authority by other provisions of ss. 66.1201 to 66.1211, the authority may borrow money or accept grants from the federal government for any housing project that the authority may undertake, take over any land acquired by the federal government for the construction or operation of a housing project, take over or lease or manage any housing project constructed or owned by the federal government, and to these ends, enter into any contracts, mortgages, trust indentures, leases or other agreements that the federal government may require including agreements that the federal government may supervise and approve the construction, maintenance and operation of the housing project. A council may take any action necessary to secure the financial aid and the cooperation of the federal government in the undertaking, construction, maintenance and operation of any housing project which the authority may undertake.

(22) Tax exemption and payments in lieu of taxes. The property of an authority is public property used for essential public and governmental purposes and the property and an authority are exempt from all taxes of the state or any state public body, except that the city in which a project or projects are located may fix a sum to be paid annually in lieu of taxes by the authority for the services, improvements, or facilities furnished to the property of the authority by the city. The amount paid in lieu of taxes may not exceed the amount that would be levied as the annual tax of the city upon the project. Property of an authority includes property in which an authority operating within a 1st class city or an entity in which an authority operating within a 1st class city holds an ownership interest holds a partial ownership interest if the property is held for any of the following purposes:

(a) As part of a financing or equity plan that includes state or federal tax credits, financing, funding, or rent subsidy.

(b) A purpose related to the conversion of a housing project to a rental or housing assistance program under a contract with the federal government.

(23) Reports. The authority shall at least once a year file with the mayor of the city a report of its activities for the preceding year.

(24) Bids. (a) When a housing authority has the approval of the council for any project authorized under sub. (9)(a) or (b), the authority shall complete and approve plans, specifications, and conditions for carrying out the project, and shall advertise by publishing a class 2 notice, under ch. 985, for bids for all work which the authority must do by contract. The authority is not required to submit for bidding any contract in an amount of $25,000 or less or, if the contract is for a project on a property wholly or partially owned before October 1, 2021, by a housing authority created by a 1st class city, $50,000 or less, but if the estimated cost of the contract, except a contract for a project on a property wholly or partially owned before October 1, 2021, by an authority created by a 1st class city, is between $10,000 and $25,000, the authority shall give a class 2 notice, under ch. 985, of the proposed work before the contract is entered into. A contract subject to bidding shall be awarded to the lowest qualified and competent bidder. Section 66.0901 applies to the bidding.

(ag) As an alternative to the advertising and bidding procedure under par. (a), an authority may contract under any purchase procedure authorized for the authority by the federal government.

(am) The authority may reject any bid required under par. (a).

(b) An authority may contract for the acquisition of a housing project without submitting the contract for bids as required by par. (a) if all of the following apply:

1. The contract provides for undertaking of the housing project on land not owned at the time of the contract by the authority except the contract may provide for undertaking of the housing project on land acquired and owned by a community development authority for the purpose of ss. 66.1105, 66.1301 to 66.1329, 66.1331 or 66.1333 if the community development authority is proceeding under this paragraph as provided by s. 66.1335(4).

2. The contract provides for conveyance or lease of the project to the authority after completion of the project.

3. The authority invites developers to submit proposals to provide a completed project and evaluates proposals according to site, cost, design, the developer's experience and other criteria specified by the authority.

(25) Liquidation and disposal of housing projects. (a) In any city or village the council or village board by resolution or ordinance, or the electors by referendum under s. 9.20, may require the authority to liquidate and dispose of a project held and operated under ss. 66.1201 to 66.1211 or 66.1331.

(b) If liquidation and disposal of a project is provided for under par. (a) the housing authority or other designated agency shall sell the project to the highest bidder after public advertisement, or transfer it to any state public body authorized by law to acquire the project. No project may be sold for less than its fair market value as determined by a board of 3 licensed appraisers appointed by the council or village board.

(c) The arrangements for the liquidation and disposal of a project shall provide for the payment and retirement of all outstanding obligations in connection with the project, together with interest on the obligations and any premiums prescribed for the redemption of any bonds, notes or other obligations before maturity.

(d) Any proceeds remaining after payment of the obligations under par. (c) shall be distributed in accordance with the federal law applicable at the time of the liquidation and disposal of the project. If no federal law is applicable to the liquidation and disposal of the project all remaining proceeds shall be paid to the city or village.

(e) If the highest bid received is insufficient for the payment of all obligations set forth in par. (c) the project shall not be sold unless the city or village provides sufficient additional funds to discharge the obligations.

(f) In order to carry out this subsection an authority or other designated agency shall exercise any option available to it for the payment and redemption of outstanding obligations set forth in par. (c) before maturity, if the city or village provides funds for payment and redemption.

(g) No actions taken under this subsection shall affect or diminish the rights of any bondholders or other obligees of the authority.

(h) In this subsection, “outstanding obligations” or “obligations” includes bonds, notes or evidences of indebtedness, as well as aids, grants, contributions or loans made by or received from any federal, state or local political government or agency.

(26) Dissolution of housing authority. Any housing authority may be dissolved upon adoption of an ordinance or resolution by the council or village board concerned declaring that the need for the authority no longer exists, that all projects under the authority's jurisdiction have been disposed of, that there are no outstanding obligations or contracts and that no further business remains to be transacted by the authority.

Chapter 66. General Municipality Law (Refs & Annos)
Subchapter XIII. Urban Redevelopment and Renewal

W.S.A. 66.1301

66.1301. Urban redevelopment

Currentness

(1) Short title. Sections 66.1301 to 66.1329 may be referred to as the "Urban Redevelopment Law".

(2) Finding and declaration of necessity. It is declared that in the cities of the state substandard and insanitary areas exist which have resulted from inadequate planning, excessive land coverage, lack of proper light, air and open space, defective design and arrangement of buildings, lack of proper sanitary facilities, and the existence of buildings, which, by reason of age, obsolescence, inadequate or outmoded design, or physical deterioration have become economic or social liabilities, or both. These conditions are prevalent in areas where substandard, insanitary, outworn or outmoded industrial, commercial or residential buildings prevail. These conditions impair the economic value of large areas, infecting them with economic blight, and these areas are characterized by depreciated values, impaired investments, and reduced capacity to pay taxes. These conditions are chiefly in areas which are so subdivided into small parcels in divided ownerships and frequently with defective titles, that their assembly for purposes of clearance, replanning, rehabilitation and reconstruction is difficult and costly. The existence of these conditions and the failure to clear, replan, rehabilitate or reconstruct these areas results in a loss of population by the areas and further deterioration, accompanied by added costs to the communities for creation of new public facilities and services elsewhere. It is difficult and uneconomic for individual owners independently to undertake to remedy these conditions. It is desirable to encourage owners of property or holders of claims on property in these areas to join together and with outsiders in corporate groups for the purpose of the clearance, replanning, rehabilitation and reconstruction of these areas by joint action. It is necessary to create, with proper safeguards, inducements and opportunities for the employment of private investment and equity capital in the clearance, replanning, rehabilitation and reconstruction of these areas. These conditions require the employment of capital on an investment rather than a speculative basis, allowing however the widest latitude in the amortization of any indebtedness created. These conditions further require the acquisition at fair prices of adequate areas, the gradual clearance of the areas through demolition of existing obsolete, inadequate, unsafe and insanitary buildings and the redevelopment of the areas under proper supervision with appropriate planning, land use and construction policies. The clearance, replanning, rehabilitation and reconstruction of these areas on a large scale basis are necessary for the public welfare. The clearance, replanning, reconstruction and rehabilitation of these areas are public uses and purposes for which private property may be acquired. Substandard and insanitary areas constitute a menace to the health, safety, morals, welfare and reasonable comfort of the citizens of the state. These conditions require the aid of redevelopment corporations for the purpose of attaining the ends recited in this subsection. The protection and promotion of the health, safety, morals, welfare and reasonable comfort of the citizens of the state are matters of public concern. Sections 66.1301 to 66.1329 are in the public interest.

(2m) Discrimination. Persons entitled to any right, benefit, facility, or privilege under ss. 66.1301 to 66.1329 may not be denied the right, benefit, facility, or privilege in any manner for any purpose nor be discriminated against because of sex, race, color,

creed, sexual orientation, status as a victim of domestic abuse, sexual assault, or stalking, as defined in s. 106.50(1m)(u), or national origin.

(3) Definitions. In ss. 66.1301 to 66.1329, unless a different intent clearly appears from the context:

(a) "Area" means a portion of a city which its planning commission finds to be substandard or insanitary, so that the clearance, replanning, rehabilitation or reconstruction of that portion is necessary or advisable to effectuate the public purposes declared in sub. (2). "Area" includes buildings or improvements not in themselves substandard or insanitary, and real property, whether improved or unimproved, the inclusion of which is considered necessary for the effective clearance, replanning, reconstruction or rehabilitation of the area of which the buildings, improvements or real property form a part and includes vacant land which is in such proximity to other land or structures that the economic value of the other land or structures is impaired.

(d) "Development" means a specific work, repair or improvement to put into effect a development plan and includes the real property, buildings and improvements owned, constructed, managed or operated by a redevelopment corporation.

(e) "Development area" means that portion of an area to which a development plan is applicable.

(f) "Development cost" means the amount determined by the planning commission to be the actual cost of the development or of the part of the development for which the determination is made. "Development cost" includes, among other costs, all of the following:

1. The reasonable costs of planning the development, including preliminary studies and surveys, neighborhood planning, architectural and engineering services and legal and incorporation expense.

2. The actual cost, if any, of alleviating hardship to families occupying dwelling accommodations in the development area where hardship results from the execution of the development plan.

3. The reasonable costs of financing the development, including carrying charges during construction.

4. Working capital in an amount not exceeding 5 percent of development cost.

5. The actual cost of the real property included in the development, of demolition of existing structures and of utilities, landscaping and roadways.

6. The amount of special assessments subsequently paid.

7. The actual cost of construction, equipment and furnishing of buildings and improvements, including architectural, engineering and builder's fees.

8. The actual cost of reconstruction, rehabilitation, remodeling or initial repair of existing buildings and improvements.

9. Reasonable management costs until the development is ready for use.

10. The actual cost of improving that portion of the development area which is to remain as open space, together with additions to development cost that equal the actual cost of additions to or changes in the development in accordance with the original development plan or after approved changes in or amendments to the development plan.

(g) "Development plan" means a plan for the redevelopment of all or any part of an area, and includes any amendments that are approved in accordance with the requirements of s. 66.1305(1).

(h) "Local governing body" means a common council, council, commission or other board or body vested by the charter of a city or other law with jurisdiction to adopt or enact ordinances or local laws.

(n) "Mortgage" means a mortgage, trust indenture, deed of trust, building and loan contract or other instrument creating a lien on real property, and the indebtedness secured by each of them.

(o) "Neighborhood unit" means a primarily residential district having the facilities necessary for well-rounded family living, such as schools, parks, playgrounds, parking areas and local shopping districts.

(p) "Planning commission" means the official bureau, board, commission or agency of a city that is authorized to prepare, adopt, amend or modify a master plan for the development of the city.

(q) "Real property" includes lands, buildings, improvements, land under water, waterfront property, and any easements, franchises and hereditaments, corporeal or incorporeal, and every estate, interest, privilege, easement, franchise and right in or appurtenant to the real property, legal or equitable, including rights-of-way, terms for years and liens, charges, or encumbrances by mortgage, judgment or otherwise.

(r) "Redevelopment" means the clearance, replanning, reconstruction or rehabilitation of an area or part of an area, and the provision of industrial, commercial, residential or public structures or spaces as may be appropriate, including recreational and other facilities incidental or appurtenant to the structures or spaces.

(s) "Redevelopment corporation" means a corporation carrying out a redevelopment plan under ss. 66.1301 to 66.1329.

State Statutes

Rules

Constitutional Provisions

Other Authorities

The State of Texas ("Texas") moves to intervene in defense of the Department of Education's ("the Department") Final Rule addressing Title IX obligations, which took effect on August 14, 2020.[1] At the start of this suit, Texas' interests were aligned with the Department. On January 20, however, President elect Joe Biden will assume office and redirect the Department's policy regarding Title IX. The President elect has condemned the Final Rule, calling it "a green light to ignore sexual violence" and promising to bring it to a "quick end." *The Biden Agenda for Women*, JOEBIDEN.COM, https://joebiden.com/womens-agenda/ (last visited Jan. 15, 2021). In light of this sea change, Texas can no longer rely on the Department to adequately represent its interests in defending the Final Rule.

BACKGROUND

During the Obama Administration, the Department issued its misguided 2011 Dear Colleague Letter[2] and 2014 Questions and Answers on Title IX Sexual Violence ("2014 Question and Answers").[3] Although neither underwent notice and comment rulemaking, the two guidance documents put recipients in a no-win situation where either conforming or failing to conform to the guidance documents would expose them to significant risk of litigation.[4] The President-elect played a key role in the development and implementation of the Obama Administration's policies

[4] *See*, *e.g.*, Taylor Mooney, *How Betsy DeVos plans to change the rules for handling sexual misconduct on campus*, CBS NEWS (Nov. 24, 2019) ("Prior to 2011, the number of lawsuits filed against universities for failing to provide due process in Title IX cases averaged one per year. It is expected there will be over 100 such lawsuits filed in 2019 alone."), https://www.cbsnews.com/news/title-ix-sexual-misconduct-on-campus-trump-administration-changing-obama-rules-cbsn-documentary/.

on sexual harassment,[5] including the changes the administration advanced regarding Title IX. The President-elect, in fact, stood as the Obama Administration's spokesperson for the Dear Colleague Letter, announcing its publication to students at the University of New Hampshire in Durham. *See* Press Release, U.S. Dept. of Educ., *Vice President Biden Announces New Administration Effort to Help Nation's Schools Address Sexual Violence* (Apr. 4, 2011), https://www.ed.gov/news/press-releases/vice-president-biden-announces-new-administration-effort-help-nations-schools-ad.

In response to growing criticism, the Department rescinded the Dear Colleague Letter and the 2014 Questions and Answers in 2017.[6] It soon became apparent, however, that the withdrawal could not repair the damage caused by the two guidance documents on its own, as there was significant confusion regarding recipients' obligations to combat sexual harassment. On May 19, 2020, therefore, the Department issued the Final Rule that is the subject of this action. The Final Rule, for the first time, clearly demarcated the outer boundaries of federal fund recipients' obligations under Title IX with respect to sexual harassment. It thereby reduced their risk of liability and resolved the dilemma of how to enforce Title IX without sacrificing the rights of either the victims of sexual harassment or the accused.

At the time this lawsuit commenced, the Department understood and respected the detrimental impact that the Obama Administration's misguided guidance documents had on common providers of education like Texas. That will all change on January 20, 2021 when the President-elect is inaugurated into office. The President-elect has not altered his opinion about

---

[5] Unless otherwise stated, the term "sexual harassment" encompasses all forms of sexual harassment, including sexual violence and sexual assault. Likewise, unless otherwise stated, the term, "academic institutions" encompasses all entities covered by the new Final Rule issued by the Department, including schools, colleges, and universities, both primary and secondary.

[6] *See* Candice Jackson, OCR, U.S. Dept. of Educ., Dear Colleague Letter (Sept. 9, 2017), https://www2.ed.gov/about/offices/list/ocr/letters/colleague-title-ix-201709.pdf.

Title IX policy since advocacy of the Dear Colleague Letter. He has announced his intent to advance the same objectives for Title IX as he did during the Obama Administration, which means curtailing, if not repealing outright, the reforms contained in the Final Rule. *See The Biden Plan To End Violence Against Women*, JOEBIDEN.COM, https://joebiden.com/vawa/ (last visited Jan. 15, 2021). To that end, the President-elect has promised his supporters that the Department under his administration will put a "quick end" to the Final Rule. *The Biden Agenda for Women*, JOEBIDEN.COM, https://joebiden.com/womens-agenda/ (last visited Jan. 15, 2021). As head of the executive branch, the incoming President will have authority over the Department. His objectives will inform the Department's approach to Title IX, up to and including the Department's defense of the Final Rule and the resolution of this lawsuit. Texas therefore files this motion to intervene.

LEGAL STANDARD

The Federal Rules provide two mechanisms for third-party intervention in a lawsuit: intervention of right under Federal Rule of Civil Procedure 24(a) and permissive intervention under Rule 24(b). For intervention of right to apply, the movant must demonstrate that: (1) the motion is timely; (2) the movant has a legally protected interest in the action; (3) the action must threaten to impair that interest; and (4) the movant's interest is not adequately represented by the existing parties. *See United States v. Facebook, Inc.*, 456 F. Supp. 3d 105, 108 (D.D.C. 2020). "[T]he inquiry" into these factors "is a flexible one, which focuses on the particular facts and circumstances surrounding each application." *Edwards v. City of Houston*, 78 F.3d 983, 999 (5th Cir. 1996). Accordingly, "intervention of right must be measured by a practical rather than technical yardstick." *Facebook*, 456 F. Supp. 3d at 108.

To qualify for permissive intervention, the movant must show: (1) an independent ground for subject matter jurisdiction; (2) a timely motion; and (3) a claim or defense that has a question

of law or fact in common with the main action. *Facebook*, 456 F. Supp. 3d at 108. "As its name would suggest, permissive intervention is an inherently discretionary enterprise." *E.E.O.C. v. Nat'l Children's Ctr., Inc.*, 146 F.3d 1042, 1046 (D.C. Cir. 1998). The D.C. Circuit has adopted "a liberal application in favor of permitting intervention." *Nuesse v. Camp*, 385 F.2d 694, 702 (D.C. Cir. 1967). A liberal approach to intervention is especially appropriate "where the subject matter of the lawsuit is of great public interest, the intervenor has a real stake in the outcome and the intervention may well assist the court in its determination through . . . the framing of issues." *Daggett v. Comm'n on Gov't Ethics*, 172 F.3d 104, 116–17 (1st Cir. 1999) (Lynch, J., concurring).

Texas meets the requirements for both intervention as of right and permissive intervention.

ARGUMENT

I. The Court should grant intervention as of right.

A. Texas' motion is timely.

In light of the impending change of Administrations, Texas moves to intervene in defense of the Final Rule. The motion is timely because it was filed close in time to the change in circumstances requiring intervention: President-elect Biden's inauguration on January 20. *See Smoke v. Norton*, 252 F.3d 468, 471 (D.C. Cir. 2001) (judging a motion to intervene timely because it was filed when "the potential inadequacy of representation came into existence").

The timeliness of a motion to intervene is "judged in consideration of all the circumstances." *Id.* (quoting *United States v. AT&T*, 642 F.2d 1285, 1295 (D.C. Cir. 1980)). Though the "time elapsed since the inception of the suit is relevant, measuring the length of time passed is not in itself the determinative test," *Roane v. Leonhart*, 741 F.3d 147, 151 (D.C. Cir. 2014) (internal citations omitted), "particularly where intervention is sought as of right." *Hodgson v. United Mine Workers of Am.*, 473 F.2d 118, 129 (D.C. Cir. 1972). Rather, "[t]he crucial date for

assessing the timeliness of a motion to intervene is when proposed intervenors should have been aware that their interests would not be adequately protected by the existing parties." *Smith v. Marsh*, 194 F.3d 1045, 1052 (9th Cir. 1999).

During the Trump Administration, Texas had no reason to intervene. Like Texas, the previous administration defended the Final Rule as an effective means of combating sexual harassment without sacrificing either clarity or constitutional liberties. The President-elect, however, has expressed open and adamant hostility to the Final Rule, necessitating Texas' intervention if it is to protect its interests. *See infra* at I.D; *see also W. Energy All. v. Zinke*, 877 F.3d 1157, 1169 (10th Cir. 2017) (holding that "the change in the Administration raises the possibility of 'divergence of interest' or a 'shift' during litigation"). The Department will cease adequately representing Texas' interests only after January 20, 2021 when the new administration takes over and begins implementing its own policies. This is not an occasion where a non-party sat on its rights. Texas has actively monitored the present action from the beginning and exhibited proper diligence in bringing its motion.

Further, the timing of Texas' motion does not prejudice any of the existing parties. As this Court previously held, courts "do not require timeliness for its own sake." *100Reporters LLC v. U.S. Dep't of Justice*, 307 F.R.D. 269, 275 (D.D.C. 2014) (quoting *Roane,* 741 F.3d at 151); *see Ute Indian Tribe of Uintah & Ouray Indian Reservation v. U.S. Dep't of the Interior*, 1:18-CV-00547 (CJN), 2020 WL 1465886, at *1 (D.D.C. Feb. 5, 2020) ("[T]he timeliness requirement was not designed to penalize prospective intervenors for failing to act promptly."). The requirement is instead "aimed primarily at preventing potential intervenors from unduly disrupting litigation, to the unfair detriment of the existing parties." Thus, "in assessing timeliness," the court must weigh "whether any delay in seeking intervention unfairly disadvantaged the original parties."

100Reporters, 307 F.R.D. at 275 (citing *Roane*, 741 F.3d at 151); *see* 7C Charles Alan Wright, *et al.*, Fed. Prac. & Proc. § 1916 (3d ed.) ("The most important consideration in deciding whether a motion for intervention is untimely is whether the delay in moving for intervention will prejudice the existing parties to the case.").

This case is still in its relatively early stages. The Department has not yet filed its answer. *See*, *e.g.*, *Wash. All. of Tech. Workers v. U.S. Dep't of Homeland Sec.*, 395 F. Supp. 3d 1, 19 (D.D.C. 2019) (deeming intervention timely after positively noting that defendant failed to file answer even though the case commenced three years ago); *Forest Cty. Potawatomi Cmty. v. United States*, 317 F.R.D. 6, 13 (D.D.C. 2016) (ruling intervention timely nine months after litigation commenced because it was filed before any of the defendants had filed an answer). And while the parties have started filing dispositive motions over the past month, Texas' addition will not disrupt or delay the parties' schedule or force the parties to assume additional work. Texas adopts, as its own, the arguments that the Department makes in its cross-motion for summary judgment and its brief opposing Plaintiff States' motion for summary judgment – both of which will be filed before January 20, 2021. Texas merely seeks the opportunity to defend these arguments after the Biden Administration assumes office and the Department is no longer able to adequately represent Texas' interests. Texas also agrees to abide by the schedule the parties negotiated. *See Cayuga Nation v. Zinke*, 324 F.R.D. 277, 284 (D.D.C. 2018) (requiring that intervening party submits non-cumulative arguments and complies with scheduling order). Texas' intervention therefore will have minimum impact on the original parties. If anything, Texas' addition will avert a potential disruption to the case should the federal government withdraw its support of the Final Rule and refuse to defend it. The motion is timely.

B. Texas has significant protectable interests directly affected by this litigation.

As a provider of public education, Texas has clear and substantial interests at stake in this action. Indeed, its interests are the "mirror-image" of Plaintiff States' interests. While the Plaintiff States allege that they "are being injured by the [Final Rule]," Texas "w[ould] be injured by [the Final Rule's] invalidation." *Builders Ass'n of Greater Chi. v. City of Chicago*, 170 F.R.D. 435, 440 (N.D. Ill. 1996).

Like Plaintiff States, Texas "administers a system of primary and secondary public education that is funded by both state and federal money." ECF 102 ¶ 274; *see also* Tex. Educ. Agency, 2020 *Comprehensive Biennial Report on Texas Public Schools* at 297 (Dec. 4, 2020) (reporting that Texas received $5.3 billion dollars for K-12 education), https://tea.texas.gov/sites/default/files/comp_annual_biennial_2020.pdf. The Texas Constitution charges the Texas Legislature "to establish and make suitable provision for the support and maintenance of an efficient system of public free schools." Tex. Const. art. VII, § 1. Pursuant to this charge, Texas funds, regulates, and oversees the second largest system of K–12 public education in the nation, serving over 5.4 million students across 1,200 school districts. Tex. Educ. Agency, *Enrollment in Texas Public Schools 2019-20* at 1 (Aug. 12, 2020), https://tea.texas.gov/sites/default/files/enroll_2019-20.pdf.

Texas also funds, supports, and administers a robust network of higher education—same as Plaintiff States. *See* ECF 102 ¶ 277. Texas is home to 119 public postsecondary institutions, including 37 universities and 82 two-year colleges and technical schools. *See* Tex. Higher Educ. Coordinating Bd., *2020 Texas Public Higher Education Almanac* at 28, 47 (Sept. 28, 2020), https://reportcenter.highered.texas.gov/agency-publication/almanac/2020-texas-public-higher-education-almanac/. While most states have just one or two public university systems, Texas has six. The largest of these systems—the University of Texas—has 14 separate locations that educate

approximately 240,000 students each year. *See About The University of Texas System*, THE UNIVERSITY OF TEXAS SYSTEM, https://www.utsystem.edu/about (last visited Jan. 15, 2021). All told, the State's entire network of higher education enrolled just shy of 1.7 million students in 2019. *See* Tex. Higher. Educ. Coordinating Bd., at 13.

Because Texas "receives federal funding from the Department for primary and secondary education, [Texas] and its public primary and secondary education systems are subject to" the Final Rule. ECF 102 ¶ 276. Likewise, "[e]ach of the institutions in [Texas's] systems of higher education receives federal funding and, as a result, is subject to the Rule" as well. ECF 102 ¶ 279. This means that Texas and its academic institutions have an obligation to investigate and enforce alleged violations of Title IX. Texas is intensely interested in the Final Rule as a result.

First, the Final Rule clarified the definition of sexual harassment as well as the conditions that must be met before a recipient's obligations under Title IX are activated. Invalidating the Final Rule would create uncertainty, harming the Texas institutions regulated under Title IX. *See infra* Part I.C. Earlier guidance had caused a great deal of uncertainty regarding recipients' legal responsibilities under Title IX.[7] Recipients did not know how to comply with the new mandates or whether failure to do so would incur legal consequences. *See* Janet Napolitano, *"Only Yes Means Yes": An Essay on University Policies Regarding Sexual Violence and Sexual Assault*, 33 YALE L. & POL'Y REV. 387, 394–395 (2015).

[7] The Task Force on Federal Regulation of Higher Education specifically identified the Dear Colleague Letter and 2014 Question and Answers as guidance documents that were meant to eliminate uncertainty but only led to more confusion. *See Recalibrating Regulation of Colleges and Universities* at 14 (Feb. 12, 2015), *available at* https://www.acenet.edu/Documents/Higher-Education-Regulations-Task-Force-Report.pdf.

In an abundance of caution, many academic institutions, including those funded by Texas, elected to revise their policies to cover a greater range of conduct and make it easier for administrators to arrive at a determination of guilt. *See Doe v. Univ. of Scis.*, 961 F.3d 203, 213 (3d Cir. 2020) (describing the pressure universities faced as a result of the Dear Colleague Letter). But that led to litigation. Hundreds of lawsuits have been filed since the Dear Colleague Letter was issued—a sizeable number of which academic institutions lost or settled. *See* Jonathan Taylor, Milestone: 600+ Title IX/Due Process Lawsuits in Behalf of Accused Students, Title IX for All (Apr. 1, 2020), https://www.titleixforall.com/milestone-600-title-ix-due-process-lawsuits-in-behalf-of-accused-students.

Second, the Final Rule reduced Texas' risk of liability. While previous guidance had supported an improperly broad view of Title IX liability, the Final Rule fixed those issues. By confining Title IX liability to proper limits set by statute, the Final Rule benefits Texas. If it were invalidated, Texas institutions would be subject to litigation expenses, which, in turn, would lead to higher compliance costs and diversion of resources.

In short, earlier guidance put Texas institutions between a rock and a hard place. Not following the guidance would risk federal enforcement actions, but following the guidance would lead to lawsuits, litigation expenses, and ultimately monetary settlements. *Id.*; *see also* Greta Anderson, *More Title IX Lawsuits by Accusers and Accused*, INSIDER HIGHER ED (Oct. 3, 2019), https://www.insidehighered.com/news/2019/10/03/students-look-federal-courts-challenge-title-ix-proceedings (describing the "high cost of addressing sexual misconduct. . . a lose-lose situation for universities"). The Final Rule, by contrast, resolves the dilemma. It provides clear guidance limiting Texas' liability and reducing expected litigation expenses.

These interests support intervention. If Plaintiff States' systems of public education give them standing to challenge the Final Rule, then Texas' system similarly gives it a protectable interest sufficient for intervention. *See Indep. Petrochemical Corp. v. Aetna Cas. & Sur. Co.*, 105 F.R.D. 106, 109 (D.D.C. 1985) (explaining that the court follows a "liberal formulation of the 'interest' test," which is more forgiving than the interest necessary to initiate a lawsuit); *Nuesse,* 385 F.2d at 700 (describing the purpose of the interest test as "involving as many apparently concerned persons as is compatible with efficiency and due process").

C. Disposition of this action may impair or impede Texas' ability to protect its interests.

As explained above, the Final Rule provides important benefits to Texas, its schools, and its citizens. It both limits the scope of potential Title IX liability and also provides clarity that helps schools follow the law. But Plaintiffs ask this Court to deprive Texas of those benefits by vacating the Final Rule. *See* ECF 102 § 14. Those "practical consequences" are more than sufficient to show impairment of Texas' interests. *Nat. Res. Def. Council v. Costle*, 561 F.2d 904, 909 (D.C. Cir. 1977). When a movant benefits from a regulation, invalidation of that regulation would necessarily impair the movant's interests. *See, e.g.*, *Wash. All. of Tech. Workers v. U.S. Dep't of Homeland Sec.*, 395 F. Supp. 3d 1, 20 (D.D.C. 2019); *Waterkeeper All., Inc. v. Wheeler*, 330 F.R.D. 1, 8 (D.D.C. 2018); *Envtl. Def. Fund, Inc. v. Costle*, 79 F.R.D. 235, 242 (D.D.C. 1978), *aff'd*, (D.C. Cir. July 31, 1978).

"[R]elegat[ion] to the status of amicus curiae" would not enable Texas to protect their interests in this case and "is not an adequate substitute for participation as a party." *Nuesse*, 385 F.2d at 704 n.10. In such a scenario, no party would provide a comprehensive defense of the Final Rule to the Court. Texas would not be able to file motions or appeal if necessary. *Id.* Although Texas acted as amicus curiae earlier in the proceeding, it did so when the Department adequately

represented Texas' interests and Texas was merely supplementing the Department's arguments. For the reasons stated below, those interests will diverge on January 20, 2021. *See infra* Part I.D. Texas will likely be the sole party then defending the Final Rule in its entirety, making it essential that its arguments be part of the Court's deliberations. "Participation by [Texas] as amicus curiae is not sufficient to protect against these practical impairments." *Feller v. Brock*, 802 F.2d 722, 730 (4th Cir. 1986). Texas should be granted intervenor status.

D. The parties no longer adequately represent Texas' interests.

Rule 24(a)'s inadequate representation requirement is "not onerous." *Fund For Animals, Inc. v. Norton*, 322 F.3d 728, 735 (D.C. Cir. 2003) (citing *Dimond v. District of Columbia*, 792 F.2d 179, 192 (D.C. Cir. 1986)). "[T]he burden of making that showing should be treated as minimal." *Trbovich v. United Mine Workers of Am.*, 404 U.S. 528, 538 n.10 (1972). Movants "ordinarily should be allowed to intervene unless it is clear that the party will provide adequate representation for the absentee." *United States v. Am. Tel. & Tel. Co.*, 642 F.2d 1285, 1293 (D.C. Cir. 1980); *see also Smuck v. Hobson*, 408 F.2d 175, 181 (D.C. Cir. 1969) (holding that the burden is on the parties opposing intervention to demonstrate that existing representation is adequate). After January 20, neither the Department nor the current Intervenor-Defendants will adequately represent Texas' interests.

1. The incoming administration is hostile to the Rule and Texas' interests.

As an initial matter, "the change in the Administration raises 'the possibility of divergence of interest' or a 'shift' during litigation." *W. Energy All*, 877 F.3d at 1169. This possibility, on its own, satisfies Rule 24(a)'s requirement of inadequate representation. *See Forest Cty. Potawatomi Cmty.*, 317 F.R.D. at 11 (stating that all movant need show is "a *possibility* that its interests may not be adequately represented absent intervention") (emphasis added). However, in addition to the

general uncertainty surrounding a change of party in the White House, the President-elect has repeatedly (and erroneously) asserted that the Final Rule is "a green light to ignore sexual violence." *The Biden Agenda for Women*, JOEBIDEN.COM, https://joebiden.com/womens-agenda/ (last visited Jan. 15, 2021). Promising to put a "quick end" to the Final Rule, he plans to "restore [earlier] Title IX guidance for colleges, including the 2011 Dear Colleague Letter."[8] *Id*; *The Biden Plan To End Violence Against Women*, JOEBIDEN.COM, https://joebiden.com/vawa/ (last visited Jan. 15, 2021). These statements are evidence of an unavoidable, fundamental divide between Texas and the Department under the President-elect's incoming administration. Texas cannot trust that the Department will serve as an adequate representative going forward.

2. Existing intervenors do not have the same interests as Texas.

Earlier in the proceedings, the Court permitted the intervention of three non-profits dedicated to promoting free speech and due process on college campuses. Although these organizations support the Final Rule, they represent "different interest[s]" than Texas. *Fund For Animals*, 322 F.3d at 737 (holding "that interests need not be wholly adverse" for representation to be inadequate). The Intervenor-Defendants advocate on behalf of students, alumni, and faculty, many of whom were subject to Title IX proceedings. Texas, in contrast, is a provider of public education, for which it and its associated academic institutions receive federal funds. Thus, whereas Intervenor-Defendants represent individuals whose rights may have been violated as a result of a Title IX action, Texas represents institutions subject to Title IX.

---

[8] The President-elect offered similar remarks in a statement he and his campaign released following the Department's announcement of the Final Rule, whereby he promised the Final Rule would "be put to a quick end in January 2021." Joe Biden, *Statement on the Trump Administration Rule to Undermine Title IX and Campus Safety* (May 6, 2020), https://medium.com/@JoeBiden/statement-by-vice-president-joe-biden-on-the-trump-administration-rule-to-undermine-title-ix-and-e5dbc545daa.

The differences between Texas and Intervenor-Defendants do not end there. As sovereign, Texas has an independent duty to provide "a quality education that enables [students] to achieve their potential and fully participate now and in the future in the social, economic, and educational opportunities of our state and nation." TEX. EDUC. CODE § 4.001. In doing so, Texas must respect the rights of students suffering from sexual harassment as well as those accused of misconduct. The Intervenor-Defendants, as private parties, are not subject to the same tensions. *Cf. Trbovich v. United Mine Workers of Am.*, 404 U.S. 528, 539 (1972) (concluding that government cannot adequately represent private parties because it is also entrusted with protecting vital public interests).

Because of these differences, Texas and the Intervenor-Defendants have adopted distinct legal positions, which has significant implications for the resolution of this case. Texas takes a position similar to the one advanced by the Department prior to the change in administration: namely, it emphasizes that the Final Rule is consistent with federal statutes that form the basis of Plaintiff States' suit. The Intervenor-Defendants, on the other hand, contend that the Constitution mandates many of the provisions in the Final Rule notwithstanding what is authorized by federal statute.

The Intervenor-Defendants explained in their motion to intervene that courts, including the D.C. Circuit, "look skeptically on government entities serving as adequate advocates for private parties." ECF 27 at 12 (quoting *Crossroads Grassroots Policy Strategies v. Fed. Election Comm'n*, 788 F.3d 312, 321 (D.C. Cir. 2015)). This is because governments often serve "numerous complex and conflicting interests" that have the potential to affect their approach to litigation. *Commonwealth of Pennsylvania v. President of the United States of Am.*, 888 F.3d 52, 61 (3d Cir. 2018) (citing *Kleissler v. U.S. Forest Serv.*, 157 F.3d 964, 973 (3d Cir. 1998)). The same logic

applies here, just in reverse. As private parties, the Intervenor-Defendants lack the complex and competing duties and concerns that define Texas' interest in Plaintiff States' challenge to the Final Rule.

II. In the alternative, the Court should permit permissive intervention.

Texas satisfies all the requisites for permissive intervention. *See New Hampshire v. Holder*, 293 F.R.D. 1, 8 (D.D.C. 2013) (requiring movant to show an independent ground for subject matter jurisdiction, a timely motion, and claim or defense that has a question of law or fact in common with the main action). The Court should exercise its "wide latitude" and permit Texas to intervene in this action even if Texas does not qualify for intervention as of right. *Sault Ste. Marie Tribe of Chippewa Indians v. Bernhardt*, 331 F.R.D. 5, 9 (D.D.C. 2019).

First, Texas has an independent ground for subject matter jurisdiction, as the action raises a federal question. *See* 7C Charles Alan Wright, *et al.*, Fed. Prac. & Proc. Civ. § 1917 (3d ed.) ("[T]he need for independent jurisdictional grounds is almost entirely a problem of diversity litigation. In federal-question cases there should be no problem of jurisdiction with regard to an intervening defendant nor is there any problem when one seeking to intervene as a plaintiff relies on the same federal statute as does the original plaintiff.").

Second, Texas' motion is timely. As explained above, the need for intervention arises on January 20, so Texas has not delayed, much less prejudiced any existing parties. *See supra* Part I.A.

Third, Texas' position in support of the Final Rule involves common questions of law and fact. *Nat'l Children's Ctr.,* 146 F.3d at 1047 (noting courts in this jurisdiction "afforded this requirement considerable breadth"). Both "the main action" and Texas' defense center on whether the Final Rule is consistent with Title IX and the Administrative Procedures Act. Fed. R. Civ. P.

24(b)(1)(B). Those common questions of law and fact are sufficient for permissive intervention. *See Weinberg v. Barry*, 604 F. Supp. 390, 392 n.1 (D.D.C. 1985).

Finally, the Court should exercise its discretion to permit intervention because Texas offers a unique, important perspective that is currently absent from the proceeding. *See Humane Soc. of U.S. v. Clark*, 109 F.R.D. 518, 521 (D.D.C. 1985) (judging it appropriate "[i]n light of the 'scope and complexity of plaintiffs' challenge,'" to have absent interests "directly represented"). Like Plaintiff States, Texas is a common provider of education, whose schools, universities, and other academic programing are subject to Title IX. But unlike Plaintiff States, Texas believes that the Final Rule will not only facilitate enforcement of Title IX but also discourage unconstitutional practices that have violated the rights of individuals accused of misconduct. *See Envtl. Def. Fund, Inc. v. Costle*, 79 F.R.D. 235, 244 (D.D.C. 1978), *aff'd*, (D.C. Cir. July 31, 1978) (considering whether movant will "supplement the position already taken by the other parties").

Texas can provide a broad-based defense of the Final Rule, enabling the Court to fully assess its validity through adversarial proceedings, despite the new Administration's change of position on the merits. *Clark*, 109 F.R.D. at 521 (granting intervention because movant showed "willingness and ability to contribute to the full development of the factual and legal issues presented").

CONCLUSION

For the foregoing reasons, the State of Texas respectfully requests that the Court grant its motion to intervene as a matter of right under Rule 24(a) or, in the alterative, for permissive intervention under Rule 24(b).

Date: January 19, 2021

KEN PAXTON
Attorney General of Texas

BRENT WEBSTER
First Assistant Attorney General

Unconstitutional or Preempted Validity Called into Doubt by Purl v. United States Department of Health and Human Services, N.D.Tex., Dec. 22, 2024

KeyCite Yellow Flag - Negative Treatment
Proposed Regulation

Code of Federal Regulations
Title 45. Public Welfare
Subtitle A. Department of Health and Human Services (Refs & Annos)
Subchapter C. Administrative Data Standards and Related Requirements (Refs & Annos)
Part 160. General Administrative Requirements (Refs & Annos)
Subpart A. General Provisions

45 C.F.R. § 160.103

§ 160.103 Definitions.

Currentness

Except as otherwise provided, the following definitions apply to this subchapter:

Act means the Social Security Act.

Administrative simplification provision means any requirement or prohibition established by:

(1) 42 U.S.C. 1320d–1320d–4, 1320d–7, 1320d–8, and 1320d–9;

(2) Section 264 of Pub.L. 104–191;

(3) Sections 13400–13424 of Public Law 111–5; or

(4) This subchapter.

ALJ means Administrative Law Judge.

ANSI stands for the American National Standards Institute.

Business associate:

(1) Except as provided in paragraph (4) of this definition, business associate means, with respect to a covered entity, a person who:

(i) On behalf of such covered entity or of an organized health care arrangement (as defined in this section) in which the covered entity participates, but other than in the capacity of a member of the workforce of such covered entity or arrangement, creates, receives, maintains, or transmits protected health information for a function or activity regulated by this subchapter, including claims processing or administration, data analysis, processing or administration, utilization review, quality assurance, patient safety activities listed at 42 CFR 3.20, billing, benefit management, practice management, and repricing; or

(ii) Provides, other than in the capacity of a member of the workforce of such covered entity, legal, actuarial, accounting, consulting, data aggregation (as defined in § 164.501 of this subchapter), management, administrative, accreditation, or financial services to or for such covered entity, or to or for an organized health care arrangement in which the covered entity participates, where the provision of the service involves the disclosure of protected health information from such covered entity or arrangement, or from another business associate of such covered entity or arrangement, to the person.

(2) A covered entity may be a business associate of another covered entity.

(3) Business associate includes:

(i) A Health Information Organization, E–prescribing Gateway, or other person that provides data transmission services with respect to protected health information to a covered entity and that requires access on a routine basis to such protected health information.

(ii) A person that offers a personal health record to one or more individuals on behalf of a covered entity.

(iii) A subcontractor that creates, receives, maintains, or transmits protected health information on behalf of the business associate.

(4) Business associate does not include:

(i) A health care provider, with respect to disclosures by a covered entity to the health care provider concerning the treatment of the individual.

(ii) A plan sponsor, with respect to disclosures by a group health plan (or by a health insurance issuer or HMO with respect to a group health plan) to the plan sponsor, to the extent that the requirements of § 164.504(f) of this subchapter apply and are met.

(iii) A government agency, with respect to determining eligibility for, or enrollment in, a government health plan that provides public benefits and is administered by another government agency, or collecting protected health information for such purposes, to the extent such activities are authorized by law.

(iv) A covered entity participating in an organized health care arrangement that performs a function or activity as described by paragraph (1)(i) of this definition for or on behalf of such organized health care arrangement, or that provides a service as described in paragraph (1)(ii) of this definition to or for such organized health care arrangement by virtue of such activities or services.

Civil money penalty or penalty means the amount determined under § 160.404 of this part and includes the plural of these terms.

CMS stands for Centers for Medicare & Medicaid Services within the Department of Health and Human Services.

Compliance date means the date by which a covered entity or business associate must comply with a standard, implementation specification, requirement, or modification adopted under this subchapter.

Covered entity means:

(1) A health plan.

(2) A health care clearinghouse.

(3) A health care provider who transmits any health information in electronic form in connection with a transaction covered by this subchapter.

Disclosure means the release, transfer, provision of access to, or divulging in any manner of information outside the entity holding the information.

EIN stands for the employer identification number assigned by the Internal Revenue Service, U.S. Department of the Treasury. The EIN is the taxpayer identifying number of an individual or other entity (whether or not an employer) assigned under one of the following:

(1) 26 U.S.C. 6011(b), which is the portion of the Internal Revenue Code dealing with identifying the taxpayer in tax returns and statements, or corresponding provisions of prior law.

(2) 26 U.S.C. 6109, which is the portion of the Internal Revenue Code dealing with identifying numbers in tax returns, statements, and other required documents.

Electronic media means:

(1) Electronic storage material on which data is or may be recorded electronically, including, for example, devices in computers (hard drives) and any removable/transportable digital memory medium, such as magnetic tape or disk, optical disk, or digital memory card;

(2) Transmission media used to exchange information already in electronic storage media. Transmission media include, for example, the Internet, extranet or intranet, leased lines, dial-up lines, private networks, and the physical movement of removable/transportable electronic storage media. Certain transmissions, including of paper, via facsimile, and of voice, via telephone, are not considered to be transmissions via electronic media if the information being exchanged did not exist in electronic form immediately before the transmission.

Electronic protected health information means information that comes within paragraphs (1)(i) or (1)(ii) of the definition of protected health information as specified in this section.

Employer is defined as it is in 26 U.S.C. 3401(d).

Family member means, with respect to an individual:

(1) A dependent (as such term is defined in 45 CFR 144.103), of the individual; or

(2) Any other person who is a first-degree, second-degree, third-degree, or fourth-degree relative of the individual or of a dependent of the individual. Relatives by affinity (such as by marriage or adoption) are treated the same as relatives by consanguinity (that is, relatives who share a common biological ancestor). In determining the degree of the relationship, relatives by less than full consanguinity (such as half-siblings, who share only one parent) are treated the same as relatives by full consanguinity (such as siblings who share both parents).

(i) First-degree relatives include parents, spouses, siblings, and children.

(ii) Second-degree relatives include grandparents, grandchildren, aunts, uncles, nephews, and nieces.

(iii) Third-degree relatives include great-grandparents, great-grandchildren, great aunts, great uncles, and first cousins.

(iv) Fourth-degree relatives include great-great grandparents, great-great grandchildren, and children of first cousins.

Genetic information means:

(1) Subject to paragraphs (2) and (3) of this definition, with respect to an individual, information about:

(i) The individual's genetic tests;

(ii) The genetic tests of family members of the individual;

(iii) The manifestation of a disease or disorder in family members of such individual; or

(iv) Any request for, or receipt of, genetic services, or participation in clinical research which includes genetic services, by the individual or any family member of the individual.

(2) Any reference in this subchapter to genetic information concerning an individual or family member of an individual shall include the genetic information of:

(i) A fetus carried by the individual or family member who is a pregnant woman; and

(ii) Any embryo legally held by an individual or family member utilizing an assisted reproductive technology.

(3) Genetic information excludes information about the sex or age of any individual.

Genetic services means:

(1) A genetic test;

(2) Genetic counseling (including obtaining, interpreting, or assessing genetic information); or

(3) Genetic education.

Genetic test means an analysis of human DNA, RNA, chromosomes, proteins, or metabolites, if the analysis detects genotypes, mutations, or chromosomal changes. Genetic test does not include an analysis of proteins or metabolites that is directly related to a manifested disease, disorder, or pathological condition.

Group health plan (also see definition of health plan in this section) means an employee welfare benefit plan (as defined in section 3(1) of the Employee Retirement Income and Security Act of 1974 (ERISA), 29 U.S.C. 1002(1)), including insured and self-insured plans, to the extent that the plan provides medical care (as defined in section 2791(a)(2) of the Public Health Service Act (PHS Act), 42 U.S.C. 300gg–91(a)(2)), including items and services paid for as medical care, to employees or their dependents directly or through insurance, reimbursement, or otherwise, that:

(1) Has 50 or more participants (as defined in section 3(7) of ERISA, 29 U.S.C. 1002(7)); or

(2) Is administered by an entity other than the employer that established and maintains the plan.

HHS stands for the Department of Health and Human Services.

Health care means care, services, or supplies related to the health of an individual. Health care includes, but is not limited to, the following:

(1) Preventive, diagnostic, therapeutic, rehabilitative, maintenance, or palliative care, and counseling, service, assessment, or procedure with respect to the physical or mental condition, or functional status, of an individual or that affects the structure or function of the body; and

(2) Sale or dispensing of a drug, device, equipment, or other item in accordance with a prescription.

Health care clearinghouse means a public or private entity, including a billing service, repricing company, community health management information system or community health information system, and "value-added" networks and switches, that does either of the following functions:

(1) Processes or facilitates the processing of health information received from another entity in a nonstandard format or containing nonstandard data content into standard data elements or a standard transaction.

(2) Receives a standard transaction from another entity and processes or facilitates the processing of health information into nonstandard format or nonstandard data content for the receiving entity.

Health care provider means a provider of services (as defined in section 1861(u) of the Act, 42 U.S.C. 1395x(u)), a provider of medical or health services (as defined in section 1861(s) of the Act, 42 U.S.C. 1395x(s)), and any other person or organization who furnishes, bills, or is paid for health care in the normal course of business.

Health information means any information, including genetic information, whether oral or recorded in any form or medium, that:

(1) Is created or received by a health care provider, health plan, public health authority, employer, life insurer, school or university, or health care clearinghouse; and

(2) Relates to the past, present, or future physical or mental health or condition of an individual; the provision of health care to an individual; or the past, present, or future payment for the provision of health care to an individual.

Health insurance issuer (as defined in section 2791(b)(2) of the PHS Act, 42 U.S.C. 300gg–91(b)(2) and used in the definition of health plan in this section) means an insurance company, insurance service, or insurance organization (including an HMO) that is licensed to engage in the business of insurance in a State and is subject to State law that regulates insurance. Such term does not include a group health plan.

Health maintenance organization (HMO) (as defined in section 2791(b)(3) of the PHS Act, 42 U.S.C. 300gg–91(b)(3) and used in the definition of health plan in this section) means a federally qualified HMO, an organization recognized as an HMO under State law, or a similar organization regulated for solvency under State law in the same manner and to the same extent as such an HMO.

Health plan means an individual or group plan that provides, or pays the cost of, medical care (as defined in section 2791(a)(2) of the PHS Act, 42 U.S.C. 300gg–91(a)(2)).

(1) Health plan includes the following, singly or in combination:

(i) A group health plan, as defined in this section.

(ii) A health insurance issuer, as defined in this section.

(iii) An HMO, as defined in this section.

(iv) Part A or Part B of the Medicare program under title XVIII of the Act.

(v) The Medicaid program under title XIX of the Act, 42 U.S.C. 1396, et seq.

(vi) The Voluntary Prescription Drug Benefit Program under Part D of title XVIII of the Act, 42 U.S.C. 1395w–101 through 1395w–152.

(vii) An issuer of a Medicare supplemental policy (as defined in section 1882(g)(1) of the Act, 42 U.S.C. 1395ss(g)(1)).

(viii) An issuer of a long-term care policy, excluding a nursing home fixed indemnity policy.

(ix) An employee welfare benefit plan or any other arrangement that is established or maintained for the purpose of offering or providing health benefits to the employees of two or more employers.

(x) The health care program for uniformed services under title 10 of the United States Code.

(xi) The veterans health care program under 38 U.S.C. chapter 17.

(xii) The Indian Health Service program under the Indian Health Care Improvement Act, 25 U.S.C. 1601, et seq.

(xiii) The Federal Employees Health Benefits Program under 5 U.S.C. 8902, et seq.

(xiv) An approved State child health plan under title XXI of the Act, providing benefits for child health assistance that meet the requirements of section 2103 of the Act, 42 U.S.C. 1397, et seq.

(xv) The Medicare Advantage program under Part C of title XVIII of the Act, 42 U.S.C. 1395w–21 through 1395w–28.

(xvi) A high risk pool that is a mechanism established under State law to provide health insurance coverage or comparable coverage to eligible individuals.

(xvii) Any other individual or group plan, or combination of individual or group plans, that provides or pays for the cost of medical care (as defined in section 2791(a)(2) of the PHS Act, 42 U.S.C. 300gg–91(a)(2)).

(2) Health plan excludes:

(i) Any policy, plan, or program to the extent that it provides, or pays for the cost of, excepted benefits that are listed in section 2791(c)(1) of the PHS Act, 42 U.S.C. 300gg–91(c)(1); and

(ii) A government-funded program (other than one listed in paragraph (1)(i)–(xvi) of this definition):

(A) Whose principal purpose is other than providing, or paying the cost of, health care; or

(B) Whose principal activity is:

(1) The direct provision of health care to persons; or

(2) The making of grants to fund the direct provision of health care to persons.

Implementation specification means specific requirements or instructions for implementing a standard.

Individual means the person who is the subject of protected health information.

Individually identifiable health information is information that is a subset of health information, including demographic information collected from an individual, and:

(1) Is created or received by a health care provider, health plan, employer, or health care clearinghouse; and

(2) Relates to the past, present, or future physical or mental health or condition of an individual; the provision of health care to an individual; or the past, present, or future payment for the provision of health care to an individual; and

(i) That identifies the individual; or

(ii) With respect to which there is a reasonable basis to believe the information can be used to identify the individual.

Manifestation or manifested means, with respect to a disease, disorder, or pathological condition, that an individual has been or could reasonably be diagnosed with the disease, disorder, or pathological condition by a health care professional with appropriate training and expertise in the field of medicine involved. For purposes of this subchapter, a disease, disorder, or pathological condition is not manifested if the diagnosis is based principally on genetic information.

Modify or modification refers to a change adopted by the Secretary, through regulation, to a standard or an implementation specification.

Organized health care arrangement means:

(1) A clinically integrated care setting in which individuals typically receive health care from more than one health care provider;

(2) An organized system of health care in which more than one covered entity participates and in which the participating covered entities:

(i) Hold themselves out to the public as participating in a joint arrangement; and

(ii) Participate in joint activities that include at least one of the following:

(A) Utilization review, in which health care decisions by participating covered entities are reviewed by other participating covered entities or by a third party on their behalf;

(B) Quality assessment and improvement activities, in which treatment provided by participating covered entities is assessed by other participating covered entities or by a third party on their behalf; or

(C) Payment activities, if the financial risk for delivering health care is shared, in part or in whole, by participating covered entities through the joint arrangement and if protected health information created or received by a covered entity is reviewed by other participating covered entities or by a third party on their behalf for the purpose of administering the sharing of financial risk.

(3) A group health plan and a health insurance issuer or HMO with respect to such group health plan, but only with respect to protected health information created or received by such health insurance issuer or HMO that relates to individuals who are or who have been participants or beneficiaries in such group health plan;

(4) A group health plan and one or more other group health plans each of which are maintained by the same plan sponsor; or

(5) The group health plans described in paragraph (4) of this definition and health insurance issuers or HMOs with respect to such group health plans, but only with respect to protected health information created or received by such health insurance issuers or HMOs that relates to individuals who are or have been participants or beneficiaries in any of such group health plans.

Person means a natural person (meaning a human being who is born alive), trust or estate, partnership, corporation, professional association or corporation, or other entity, public or private.

Protected health information means individually identifiable health information:

(1) Except as provided in paragraph (2) of this definition, that is:

(i) Transmitted by electronic media;

(ii) Maintained in electronic media; or

(iii) Transmitted or maintained in any other form or medium.

(2) Protected health information excludes individually identifiable health information:

(i) In education records covered by the Family Educational Rights and Privacy Act, as amended, 20 U.S.C. 1232g;

(ii) In records described at 20 U.S.C. 1232g(a)(4)(B)(iv);

(iii) In employment records held by a covered entity in its role as employer; and

(iv) Regarding a person who has been deceased for more than 50 years.

Public health, as used in the terms “public health surveillance,” “public health investigation,” and “public health intervention,” means population-level activities to prevent disease in and promote the health of populations. Such activities include identifying, monitoring, preventing, or mitigating ongoing or prospective threats to the health or safety of a population, which may involve the collection of protected health information. But such activities do not include those with any of the following purposes:

(1) To conduct a criminal, civil, or administrative investigation into any person for the mere act of seeking, obtaining, providing, or facilitating health care.

(2) To impose criminal, civil, or administrative liability on any person for the mere act of seeking, obtaining, providing, or facilitating health care.

(3) To identify any person for any of the activities described at paragraphs (1) or (2) of this definition.

Reproductive health care means health care, as defined in this section, that affects the health of an individual in all matters relating to the reproductive system and to its functions and processes. This definition shall not be construed to set forth a standard of care for or regulate what constitutes clinically appropriate reproductive health care.

Respondent means a covered entity or business associate upon which the Secretary has imposed, or proposes to impose, a civil money penalty.

Secretary means the Secretary of Health and Human Services or any other officer or employee of HHS to whom the authority involved has been delegated.

Small health plan means a health plan with annual receipts of $5 million or less.

Standard means a rule, condition, or requirement:

(1) Describing the following information for products, systems, services, or practices:

(i) Classification of components;

(ii) Specification of materials, performance, or operations; or

(iii) Delineation of procedures; or

(2) With respect to the privacy of protected health information.

Standard setting organization (SSO) means an organization accredited by the American National Standards Institute that develops and maintains standards for information transactions or data elements, or any other standard that is necessary for, or will facilitate the implementation of, this part.

State refers to one of the following:

(1) For a health plan established or regulated by Federal law, State has the meaning set forth in the applicable section of the United States Code for such health plan.

(2) For all other purposes, State means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

Subcontractor means a person to whom a business associate delegates a function, activity, or service, other than in the capacity of a member of the workforce of such business associate.

Trading partner agreement means an agreement related to the exchange of information in electronic transactions, whether the agreement is distinct or part of a larger agreement, between each party to the agreement. (For example, a trading partner agreement may specify, among other things, the duties and responsibilities of each party to the agreement in conducting a standard transaction.)

Transaction means the transmission of information between two parties to carry out financial or administrative activities related to health care. It includes the following types of information transmissions:

(1) Health care claims or equivalent encounter information.

(2) Health care payment and remittance advice.

(3) Coordination of benefits.

(4) Health care claim status.

(5) Enrollment and disenrollment in a health plan.

(6) Eligibility for a health plan.

(7) Health plan premium payments.

(8) Referral certification and authorization.

(9) First report of injury.

(10) Health claims attachments.

(11) Health care electronic funds transfers (EFT) and remittance advice.

(12) Other transactions that the Secretary may prescribe by regulation.

Use means, with respect to individually identifiable health information, the sharing, employment, application, utilization, examination, or analysis of such information within an entity that maintains such information.

Violation or violate means, as the context may require, failure to comply with an administrative simplification provision.

Workforce means employees, volunteers, trainees, and other persons whose conduct, in the performance of work for a covered entity or business associate, is under the direct control of such covered entity or business associate, whether or not they are paid by the covered entity or business associate.

Subchapter XI. General Provisions, Peer Review, and Administrative Simplification (Refs & Annos)
Part C. Administrative Simplification

42 U.S.C.A. § 1320d-5

§ 1320d-5. General penalty for failure to comply with requirements and standards

Currentness

(a) General penalty

(1) In general

Except as provided in subsection (b), the Secretary shall impose on any person who violates a provision of this part--

(A) in the case of a violation of such provision in which it is established that the person did not know (and by exercising reasonable diligence would not have known) that such person violated such provision, a penalty for each such violation of an amount that is at least the amount described in paragraph (3)(A) but not to exceed the amount described in paragraph (3)(D);

(B) in the case of a violation of such provision in which it is established that the violation was due to reasonable cause and not to willful neglect, a penalty for each such violation of an amount that is at least the amount described in paragraph (3)(B) but not to exceed the amount described in paragraph (3)(D); and

(C) in the case of a violation of such provision in which it is established that the violation was due to willful neglect--

(i) if the violation is corrected as described in subsection (b)(3)(A), [1] a penalty in an amount that is at least the amount described in paragraph (3)(C) but not to exceed the amount described in paragraph (3)(D); and

(ii) if the violation is not corrected as described in such subsection, a penalty in an amount that is at least the amount described in paragraph (3)(D).

In determining the amount of a penalty under this section for a violation, the Secretary shall base such determination on the nature and extent of the violation and the nature and extent of the harm resulting from such violation.

(2) Procedures

The provisions of section 1320a-7a of this title (other than subsections (a) and (b) and the second sentence of subsection (f)) shall apply to the imposition of a civil money penalty under this subsection in the same manner as such provisions apply to the imposition of a penalty under such section 1320a-7a of this title.

(3) Tiers of penalties described

For purposes of paragraph (1), with respect to a violation by a person of a provision of this part--

(A) the amount described in this subparagraph is $100 for each such violation, except that the total amount imposed on the person for all such violations of an identical requirement or prohibition during a calendar year may not exceed $25,000;

(B) the amount described in this subparagraph is $1,000 for each such violation, except that the total amount imposed on the person for all such violations of an identical requirement or prohibition during a calendar year may not exceed $100,000;

(C) the amount described in this subparagraph is $10,000 for each such violation, except that the total amount imposed on the person for all such violations of an identical requirement or prohibition during a calendar year may not exceed $250,000; and

(D) the amount described in this subparagraph is $50,000 for each such violation, except that the total amount imposed on the person for all such violations of an identical requirement or prohibition during a calendar year may not exceed $1,500,000.

(b) Limitations

(1) Offenses otherwise punishable

No penalty may be imposed under subsection (a) and no damages obtained under subsection (d) with respect to an act if a penalty has been imposed under section 1320d-6 of this title with respect to such act.

(2) Failures due to reasonable cause

(A) In general

Except as provided in subparagraph (B) or subsection (a)(1)(C), no penalty may be imposed under subsection (a) and no damages obtained under subsection (d) if the failure to comply is corrected during the 30-day period beginning on the first date the person liable for the penalty or damages knew, or by exercising reasonable diligence would have known, that the failure to comply occurred.

(B) Extension of period

(i) No penalty

With respect to the imposition of a penalty by the Secretary under subsection (a), the period referred to in subparagraph (A) may be extended as determined appropriate by the Secretary based on the nature and extent of the failure to comply.

(ii) Assistance

If the Secretary determines that a person failed to comply because the person was unable to comply, the Secretary may provide technical assistance to the person during the period described in subparagraph (A). Such assistance shall be provided in any manner determined appropriate by the Secretary.

(3) Reduction

In the case of a failure to comply which is due to reasonable cause and not to willful neglect, any penalty under subsection (a) and any damages under subsection (d) that is[2] not entirely waived under paragraph (3)[3] may be waived to the extent that the payment of such penalty[4] would be excessive relative to the compliance failure involved.

(c) Noncompliance due to willful neglect

(1) In general

A violation of a provision of this part due to willful neglect is a violation for which the Secretary is required to impose a penalty under subsection (a)(1).

(2) Required investigation

For purposes of paragraph (1), the Secretary shall formally investigate any complaint of a violation of a provision of this part if a preliminary investigation of the facts of the complaint indicate such a possible violation due to willful neglect.

(d) Enforcement by State attorneys general

(1) Civil action

Except as provided in subsection (b), in any case in which the attorney general of a State has reason to believe that an interest of one or more of the residents of that State has been or is threatened or adversely affected by any person who violates a provision of this part, the attorney general of the State, as parens patriae, may bring a civil action on behalf of such residents of the State in a district court of the United States of appropriate jurisdiction--

(A) to enjoin further such violation by the defendant; or

(B) to obtain damages on behalf of such residents of the State, in an amount equal to the amount determined under paragraph (2).

(2) Statutory damages

(A) In general

For purposes of paragraph (1)(B), the amount determined under this paragraph is the amount calculated by multiplying the number of violations by up to $100. For purposes of the preceding sentence, in the case of a continuing violation, the number of violations shall be determined consistent with the HIPAA privacy regulations (as defined in section 1320d-9(b)(3) of this title) for violations of subsection (a).

(B) Limitation

The total amount of damages imposed on the person for all violations of an identical requirement or prohibition during a calendar year may not exceed $25,000.

(C) Reduction of damages

In assessing damages under subparagraph (A), the court may consider the factors the Secretary may consider in determining the amount of a civil money penalty under subsection (a) under the HIPAA privacy regulations.

(3) Attorney fees

In the case of any successful action under paragraph (1), the court, in its discretion, may award the costs of the action and reasonable attorney fees to the State.

(4) Notice to Secretary

The State shall serve prior written notice of any action under paragraph (1) upon the Secretary and provide the Secretary with a copy of its complaint, except in any case in which such prior notice is not feasible, in which case the State shall serve such notice immediately upon instituting such action. The Secretary shall have the right--

(A) to intervene in the action;

(B) upon so intervening, to be heard on all matters arising therein; and

(C) to file petitions for appeal.

(5) Construction

For purposes of bringing any civil action under paragraph (1), nothing in this section shall be construed to prevent an attorney general of a State from exercising the powers conferred on the attorney general by the laws of that State.

(6) Venue; service of process

(A) Venue

Any action brought under paragraph (1) may be brought in the district court of the United States that meets applicable requirements relating to venue under section 1391 of Title 28.

(B) Service of process

In an action brought under paragraph (1), process may be served in any district in which the defendant--

(i) is an inhabitant; or

(ii) maintains a physical place of business.

(7) Limitation on State action while Federal action is pending

If the Secretary has instituted an action against a person under subsection (a) with respect to a specific violation of this part, no State attorney general may bring an action under this subsection against the person with respect to such violation during the pendency of that action.

(8) Application of CMP statute of limitation

A civil action may not be instituted with respect to a violation of this part unless an action to impose a civil money penalty may be instituted under subsection (a) with respect to such violation consistent with the second sentence of section 1320a-7a(c)(1) of this title.

(e) Allowing continued use of corrective action

Nothing in this section shall be construed as preventing the Office for Civil Rights of the Department of Health and Human Services from continuing, in its discretion, to use corrective action without a penalty in cases where the person did not know (and by exercising reasonable diligence would not have known) of the violation involved.

42 U.S.C.A. § 1320d-6

§ 1320d-6. Wrongful disclosure of individually identifiable health information

Currentness

(a) Offense

A person who knowingly and in violation of this part--

(1) uses or causes to be used a unique health identifier;

(2) obtains individually identifiable health information relating to an individual; or

(3) discloses individually identifiable health information to another person,

shall be punished as provided in subsection (b). For purposes of the previous sentence, a person (including an employee or other individual) shall be considered to have obtained or disclosed individually identifiable health information in violation of this part if the information is maintained by a covered entity (as defined in the HIPAA privacy regulation described in section 1320d-9(b)(3) of this title) and the individual obtained or disclosed such information without authorization.

(b) Penalties

A person described in subsection (a) shall--

(1) be fined not more than $50,000, imprisoned not more than 1 year, or both;

(2) if the offense is committed under false pretenses, be fined not more than $100,000, imprisoned not more than 5 years, or both; and

(3) if the offense is committed with intent to sell, transfer, or use individually identifiable health information for commercial advantage, personal gain, or malicious harm, be fined not more than $250,000, imprisoned not more than 10 years, or both.

Opinion 1.1.1 Patient-Physician Relationships

The practice of medicine, and its embodiment in the clinical encounter between a patient and a physician, is fundamentally a moral activity that arises from the imperative to care for patients and to alleviate suffering. The relationship between a patient and a physician is based on trust, which gives rise to physicians' ethical responsibility to place patients' welfare above the physician's own self-interest or obligations to others, to use sound medical judgment on patients' behalf, and to advocate for their patients' welfare.

A patient-physician relationship exists when a physician serves a patient's medical needs. Generally, the relationship is entered into by mutual consent between physician and patient (or surrogate).

However, in certain circumstances a limited patient-physician relationship may be created without the patient's (or surrogate's) explicit agreement. Such circumstances include:

(a) When a physician provides emergency care or provides care at the request of the patient's treating physician. In these circumstances, the patient's (or surrogate's) agreement to the relationship is implicit.

(b) When a physician provides medically appropriate care for a prisoner under court order, in keeping with ethics guidance on court-initiated treatment.

(c) When a physician examines a patient in the context of an independent medical examination, in keeping with ethics guidance. In such situations, a limited patient-physician relationship exists.

REPORT OF THE COUNCIL ON ETHICAL AND JUDICIAL AFFAIRS*

CEJA Report 1-A-01

Subject: The Patient-Physician Relationship

Presented by: Herbert Rakatansky, MD, Chair

Presented to: Reference Committee on Amendments to Constitution and Bylaws (William J. Mangold, Jr., MD, Chair)

Introduction

At the center of the history of the American Medical Association lies its *Code of Medical Ethics*. The original *Code* of 1847 promulgated an ethic that emphasized conduct rather than character. It was premised on the understanding that the very nature of the physician's responsibility consisted of caring for the sick and that this was a responsibility owed by all physicians to all patients.[1] Also, building upon the Hippocratic tradition, physicians were called upon to hold a sense of ethical obligation that rose above considerations of personal advancement.[2] According to one commentator, "the central moral commitment of the code was its dedication to something other than the physician's self-interest, that something being the primacy of the welfare of the patient."[3]

The current *Code*'s focus on the relationship between physician and patient is exemplified by the *Fundamental Elements of the Patient-Physician Relationship* issued in 1990.[4] In particular, physicians are to foster this partnership by providing information and allowing for autonomous decision-making, acting respectfully and in a timely manner, preserving confidentiality, ensuring continuity of care, and facilitating access to care. Despite this list of features of the relationship patients can expect from physicians and which physicians must strive to fulfill, the very nature of the patient-physician relationship remains unexamined.

The patient-physician relationship, which is at the heart of the AMA's *Code of Medical Ethics*, is the focus of this report.

Conceptualizing the patient-physician relationship

According to one medical ethicist, there is no single characterization that can properly do justice to the patient-physician relationship "given the complexity of professional styles, patient expectations and values, and contexts in which the relationship is established."[5] For example, patients treated for chronic diseases may have long-established relationships with their physicians, or may be interacting with a specialist for a single consult.

Irrespective of the circumstances of the encounter between patient and physician, medical ethicists have characterized it in terms of a moral activity. This has been found to arise from the condition that brings patients into contact with physicians, namely illness. "Healing is sought for concerns that go to the root of human existence: fears of death, deformity, and disability."[6] Patients have been described in terms of their vulnerability, and consequently exploitable state,

* Reports of the Council on Ethical and Judicial Affairs are assigned to the Reference Committee on Constitution and Bylaws. They may be adopted, not adopted, or referred. A report may not be amended, except to clarify the meaning of the report and only with the concurrence of the Council.

and their dependence on the medical expertise and the compassion of physicians. In order to maintain good health or to secure the treatments that will alleviate their ills, patients, or surrogate decision-makers on their behalf, agree to enter into relationships with physicians. At times, the agreement to enter into a relationship is implied, such as when a patient is unconscious and in need of emergency care, or when physicians provide a specific service at the request of the treating physician (e.g. the services of a pathologist). Physicians also agree to enter the relationship; either directly, as agents, or by previous contractual arrangements to treat a group of patients. The relationship, therefore, is established by mutual agreement. In some rare instances, such as legally mandated treatment as described in Opinion 2.065, "Court-Initiated Treatments in Criminal Cases,"[7] treatment may be provided by a physician even though a patient has not consented to entering into a relationship. In such circumstances, physicians remain bound by the same obligations.

Once the relationship has been established, patients should be confident that they are receiving the best medical care their physicians can provide, uncompromised by external factors. However, the medical profession currently finds itself amidst tensions between physicians' altruistic covenant to provide needed medical care to patients and the market ethos of profit-making.[8]

Ethical obligations of physicians

Trust is central to the patient-physician relationship. Physicians provide specialized knowledge and expert skills that are relied upon by patients. Physicians also hold considerable control over medical resources used for the benefit of patients.

Many ethicists have emphasized the obligation of fidelity that is owed whenever the physician establishes a relationship with the patient.[9] One important manifestation of this obligation of fidelity is the ethical obligation not to abandon a patient, which would undermine physicians' trustworthiness. CEJA Opinion 8.115, "Termination of the Physician-Patient Relationship" embodies this obligation to ensure continuity of care. Viewed from a different perspective, medicine is an act of "profession" whereby physicians promise to use their knowledge to help and to heal.[10]

The patient-physician relationship is held to high standards of conduct, as embodied in the *Code of Medical Ethics*. This characterization of the patient-physician relationship differs significantly from the contractual view of the relationship in which patients seek care and physicians provide it.[11] Ethically, it would be insufficient to view health care as an ordinary service and to allow care that patients request from physicians to be governed by the maxim "let the buyer beware."

However, much of the current health care delivery system operates according to the dynamics of the market. According to many participants in this system, profit-making is a legitimate goal and financial incentives are important tools in controlling health care resources. This reality confers even greater importance onto the principal feature of the patient-physician relationship, which require that patients' interests be given priority. Therefore, external factors that may result in compromising medical judgment deserve careful examination.

Conflicts of interest

Many ethicists have long argued that some effacement of self-interest is morally obligatory for physicians.[8] This notion is captured throughout the *Code of Medical Ethics*.

Conflicts between physicians' and patients' interests

Physicians' self-interest that may conflict with the interests of patients is addressed in unambiguous terms in Opinion 8.03, "Conflicts of Interest: Guidelines," which states that "Under no circumstances may physicians place their own financial interests above the welfare of their patients (…) If a conflict develops between the physician's financial interest and the physician's responsibilities to the patient, the conflict must be resolved to the patient's benefit."

More troubling in this era of managed care are some of the methods used to accomplish cost containment. Specifically, various risk-bearing arrangements that affect physicians' incomes according to their use of health care resources may lead to limitations that could be harmful to patients. In Opinion 8.054, "Financial Incentives and the Practice of Medicine," physicians are advised to evaluate financial incentives included in managed care contracts to ensure that quality of patient care is not compromised by placing physicians' payments at excessive risk or by setting unrealistic expectations for utilization. The Opinion also recommends that large financial incentives should be limited in order to prevent physicians' personal financial concerns from creating a conflict with their role as individual patient advocates.

Conflicts between individual patients and patient populations

Managed care's use of financial incentives to influence physicians' decision-making also has led to a shift from patient-focused medicine to population-based medicine. In order to stay within budgetary limits, physicians are urged, often through financial and other incentives, to consider the impact of the decisions they make on an entire group of patients, rather than on a single patient. Physicians who allow such incentives to color medical judgement become primarily agents of the health plan rather than of individual patients.[12] It would seem more likely that patients' trust in physicians will be best preserved if those who are ill can expect their physicians to be advocates for optimal care and not just some minimal standard.[12] However, systemic budgetary constraints may in fact prevent patients from obtaining access to the optimal level of care necessary to treat a condition. Faced with such prospects, patients must find allies who will assist them in gaining access to the resources needed to treat their condition. In an earlier report,[13] the Council clearly identified that physicians have a duty of patient advocacy that should not be altered by the system of health care delivery, and that requires physicians to advocate for any care they believe will materially benefit their patients.

Conclusion

The medical profession must strive to preserve the trust patients hold in their physicians. It cannot abandon ethical standards to economic forces. As individual physicians advocate for the care their individual patients require, so must the medical profession advocate for access to care for all. Individual physicians must work to forge strong alliances with their own patients, and the medical profession with the public, to preserve the integrity of the profession.

Recommendations

The Council recommends that the following be adopted and the remainder of the report be filed:

> The practice of medicine, and its embodiment in the clinical encounter between a patient and a physician, is fundamentally a moral activity that arises from the imperative to care for patients and to alleviate suffering. The relationship between patient and physician is based on trust and gives rise to physicians'

ethical obligations to place patients' welfare above their own self-interest and above obligations to other groups, and to advocate for their patients' welfare.

A patient-physician relationship is generally created by mutual agreement between physician and patient (or surrogate). In some instances the agreement is implied, such as in emergency care or when physicians provide services at the request of the treating physician. In rare instances, treatment without consent may be provided under court order (see Opinion 2.065). Nevertheless, the physician's obligations to the patient remain intact.

Within the patient-physician relationship, a physician is ethically required to use sound medical judgment, holding the best interests of the patient as paramount.

AMA *Code of Medical Ethics*

3.1.1 Privacy in Health Care

Protecting information gathered in association with the care of the patient is a core value in health care. However, respecting patient privacy in other forms is also fundamental, as an expression of respect for patient autonomy and a prerequisite for trust.

Patient privacy encompasses a number of aspects, including personal space (physical privacy), personal data (informational privacy), personal choices including cultural and religious affiliations (decisional privacy), and personal relationships with family members and other intimates (associational privacy).

Physicians must seek to protect patient privacy in all settings to the greatest extent possible and should:

(a) Minimize intrusion on privacy when the patient's privacy must be balanced against other factors.

(b) Inform the patient when there has been a significant infringement on privacy of which the patient would otherwise not be aware.

(c) Be mindful that individual patients may have special concerns about privacy in any or all of these areas.

(d) Be transparent with any inquiry about existing privacy safeguards for patient data but acknowledge that anonymity cannot be guaranteed and that breaches can occur notwithstanding best data safety practices.

Anti-abortion groups have 2 asks. RFK Jr. is listening.

Their support could make or break whether Senate confirms Kennedy for Trump's Cabinet.

Abortion opponents — concerned about Robert F. Kennedy's past comments supporting abortion access — have two major asks. | Rebecca Noble/Getty Images

By **MEGAN MESSERLY**, **ALICE MIRANDA OLLSTEIN** and **ADAM CANCRYN**
11/20/2024 12:00 PM EST

Robert F. Kennedy Jr. is on a mission to win over skeptical anti-abortion groups and their allies on Capitol Hill.

It could make or break whether the soon-to-be GOP-controlled Senate confirms him to serve as President-elect Donald Trump's Health and Human Services secretary.

Abortion opponents — concerned about Kennedy's past comments supporting abortion access — have two major asks: that he appoint an anti-abortion stalwart to a senior position in HHS and that he promise privately to them and publicly during his confirmation hearing to restore anti-abortion policies from the first Trump administration, according to four anti-abortion advocates

And Kennedy, according to a fifth person close to the Trump transition, is open to their entreaties.

The negotiations come amid growing recognition from Kennedy's inner circle and the broader Trump transition team that he needs to appease anti-abortion groups and those alarmed by his views on vaccines to secure the 50 votes needed for Senate confirmation. Trump's health secretary will play a key role in shaping abortion access, including through access to abortion pills, making the decision pivotal to anti-abortion advocates.

Kennedy, those close to him say, is chiefly focused on shaping the nation's public health and food policies. And because he has little personal interest in abortion policies, there's acknowledgment his confirmation could hinge on putting someone alongside him who does.

"He's all over the place on this issue," said one of the anti-abortion advocates.

Sen. James Lankford (R-Okla.), a prominent opponent of abortion who sits on the Senate Finance Committee, which will be responsible for advancing the nomination to a floor vote, has already made clear that he plans to press Kennedy on abortion-related issues.

"I have a lot of life questions," Lankford told POLITICO. "I want to know if the second Trump administration will have the same life perspective at HHS that the first one did. … They were very, very good about all the different issues."

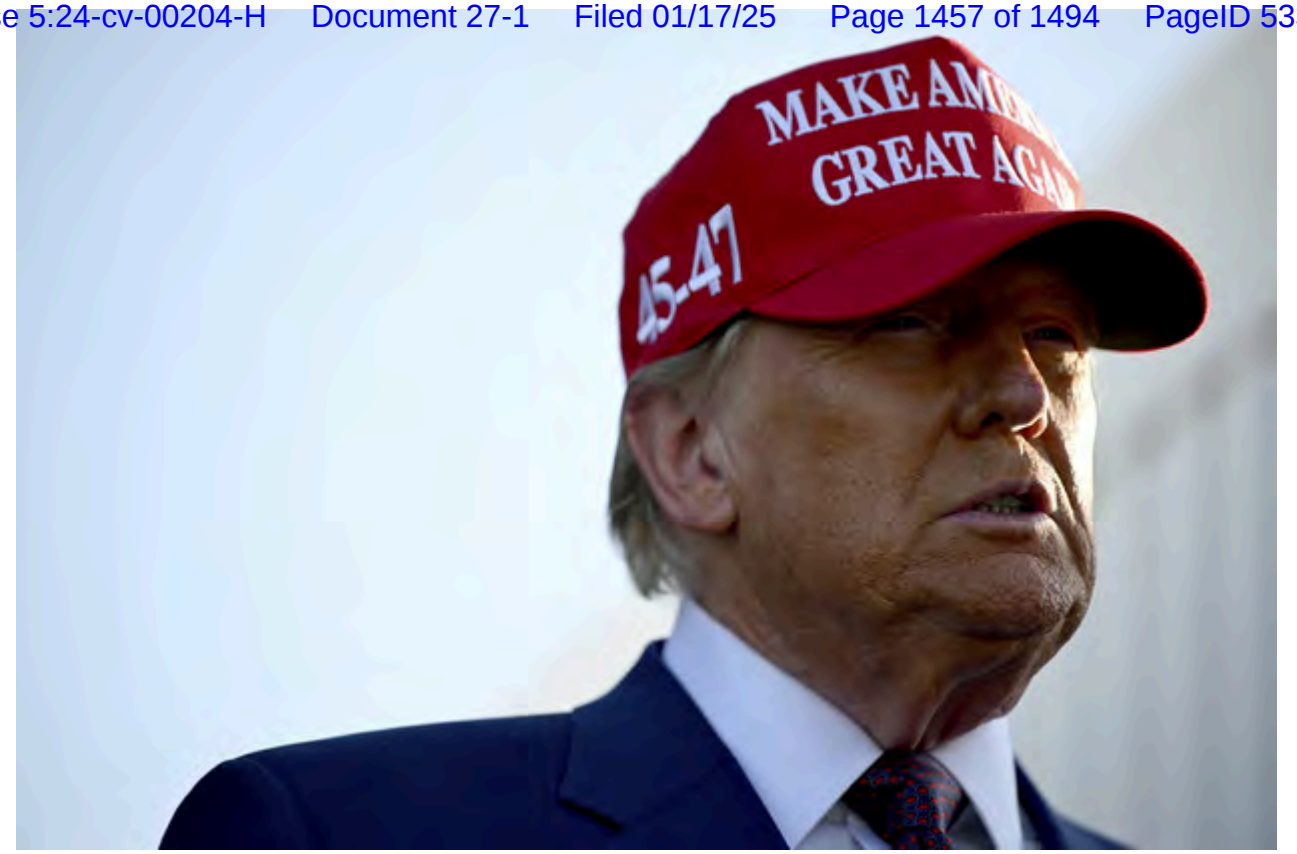
A spokesperson for the Trump transition did not immediately respond to a request for comment.

Among those anti-abortion advocates pushing for the senior HHS post are Roger Severino, director of HHS' Office for Civil Rights during the first Trump administration, and Eric Hargan, former deputy HHS secretary during the last administration. Neither responded to requests for comment.

At a minimum, anti-abortion groups want to see the Trump administration rescind the policies Biden implemented that expanded abortion access, such as the update to HIPAA privacy rules to cover abortions, as well as FDA rules making abortion pills available by mail and at retail pharmacies.

"We eagerly anticipate the day when the abortion pill is recognized for the evil it is and prohibited, and we encourage the President-elect to, at a minimum, swiftly reverse these changes made by the Biden administration," Brent Leatherwood, president of the Ethics and Religious Liberty Commission, the political arm of the Southern Baptist Convention, wrote in a recent memo to the Trump transition team outlining several of those policy priorities.

The advocates are also demanding the return of several Trump-era abortion rules, including the so-called Mexico City policy that blocked federal funding for international non-governmental organizations that provide or offer counseling on abortions, anti-abortion restrictions on federal family-planning clinics and a federal ban on discriminating against health care entities that refuse to cover abortion services or refer patients for the procedure when taxpayer dollars are involved.



Kennedy took a host of contradictory positions on abortion during his presidential campaign, which he suspended in July before endorsing President-elect Donald Trump. | Pool photo by Brandon Bell

"The accomplishments from President Trump's first term become the baseline for the second term," Susan B. Anthony Pro-Life America argued in its own memo, shared with POLITICO. "However, in order to even get to the baseline, there is much that must be undone from the Biden-Harris regime, which worked tirelessly to promote abortion in every nook and cranny of the federal government."

Kennedy took a host of contradictory positions on abortion during his presidential campaign, which he suspended in July before endorsing Trump. He said "every abortion is a tragedy" — but also that he identifies as "pro-choice" and believes "it is always the woman's right to choose." He hired an anti-abortion activist to his campaign and called for a national ban on abortion after 15 weeks of pregnancy and then reversed himself on that position.

The group Students for Life of America is less critical of Kennedy's abortion

The group's chief policy strategist, Kristi Hamrick, argued that the shift back in May is a sign that "he is someone who will listen" to their movement going

forward.

"When faced with evidence, he changed his views," she said. "How intelligent, refreshing and unlike so many in the health care space."

The group is also betting that Kennedy's environmental background will make him amenable to their pitch that abortion pills pose a threat to the U.S. water supply, and they are working to set up a meeting with him to make their case on cutting off patient access to the drugs.

Still, Students for Life is part of the chorus pushing for Severino — the lead author of Project 2025's health care chapter — to hold a prominent role at HHS, with Hamrick calling him "someone who knows just how corrupt and biased the agency is and who has ideas to fix it."

"They need to balance the HHS ticket with experience" due to Kennedy's lack of familiarity with government bureaucracy and federal funding streams, she said, adding that they trust someone who worked for years at the agency, like Severino, to make sure all of the Biden-era programs expanding access to abortion are rolled back.

Ben Leonard contributed to this report.

Trump's HHS nominee Robert F. Kennedy Jr. reassures pro-life senators with policy plans

Robert F. Kennedy Jr., President-elect Donald Trump's nominee to be secretary of Health and Human Services, arrives for meetings at the Hart Senate Office Building on Capitol Hill on Dec. 16, 2024, in Washington, D.C. | Credit: Chip Somodevilla/Getty Images

By Tyler Arnold

Washington, D.C. Newsroom, Dec 18, 2024 / 17:50 pm

Robert F. Kennedy Jr. is reassuring Republican senators that he will back certain pro-life policies if the Senate confirms him to lead the U.S. Department of Health and Human Services (HHS).

In November, U.S. President-elect Donald Trump **nominated Kennedy** to serve as the United States secretary of the HHS, a position that requires Senate confirmation. HHS oversees 10 agencies, including the Food and Drug Administration (FDA) and the Centers for Disease Control and Prevention (CDC).

Kennedy is a former Democrat. He **ran for president** as an independent in 2024 before **dropping out** and **endorsing Trump**.

Although Kennedy has supported legal abortion for his entire public career, he told pro-life senators in closed-door meetings that he would oppose taxpayer funds for abortion domestically and abroad and restore conscience protections.

"Today I got to sit down with [Kennedy] — we had a substantive discussion about American health care … [and] a good discussion, at length, about pro-life policies at HHS," Sen. Josh Hawley, R-Missouri, said in **a series of posts on X**.

According to Hawley, Kennedy told him that, if confirmed, he would reinstate **the Mexico City Policy**, which ends federal funding for overseas organizations that promote abortion. Trump reinstated the Mexico City Policy during his first term and said in **an October interview with EWTN News** that he would consider doing so again in a second term.

Hawley said Kennedy's plans include "ending taxpayer funding for abortions domestically" and "reinstating the bar on Title X funds going to organizations that promote abortion." He said that Kennedy also "pledged to reinstate conscience protections for health care providers."

Sen. Tommy Tuberville, R-Alabama, told reporters that he and Kennedy also talked about abortion, saying: "The big thing about abortion is that he's telling everybody … whatever President Trump [supports], I'm going to back him 100%."

"Basically, [Kennedy] and President Trump have sat down and talked about it and both of them came to an agreement," Tuberville said. "Roe v. Wade is gone, [abortion has] gone back to the states. Let the people vote on it."

Sen. Markwayne Mullin, R-Oklahoma, **told reporters** that Kennedy told him he "serves the will of the [incoming] president of the United States and he'll be pushing his policies forward."

"[Kennedy's] first thing is [that] we have too many abortions," Mullin said. "... His follow up to that is [that he is] serving at the will of the president of the United States. ... I think that should clear up that question for anyone."

Sen. Tim Scott, R-South Carolina, said **in a post on X** that he also spoke with Kennedy about abortion.

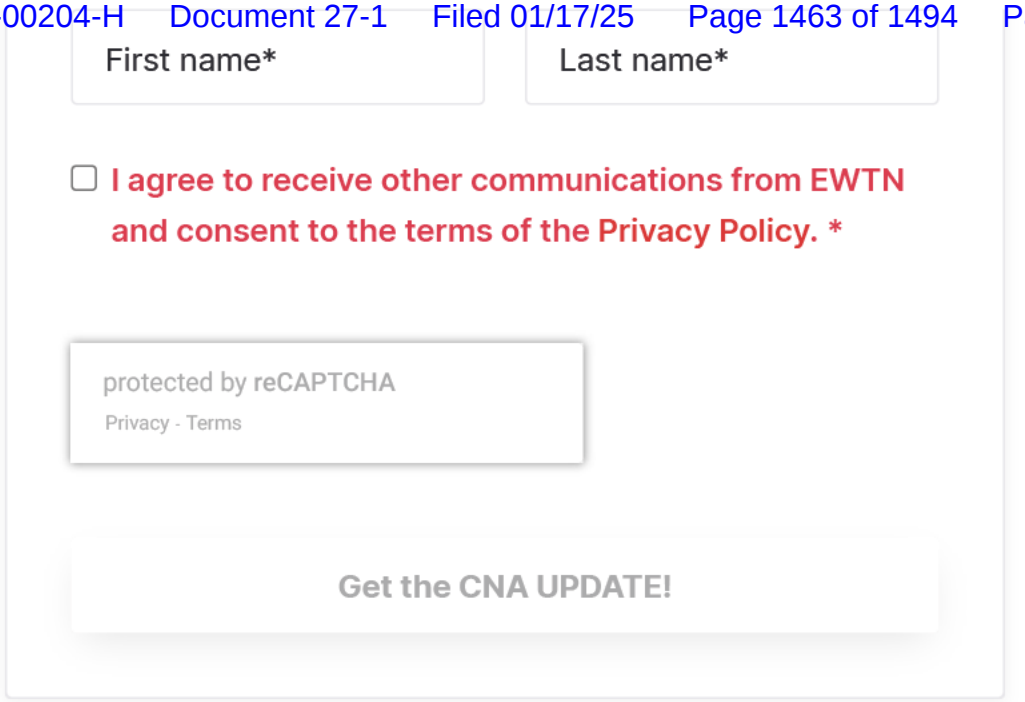
"I had a productive discussion with Robert F. Kennedy Jr. this evening about the future of our nation's health care system, preventing taxpayer-funded abortion, and Americans' long-term well-being," Scott said.

During his independent presidential campaign, Kennedy **first endorsed** abortion in all stages of pregnancy, including late-term abortion. He later **retracted that position** and said he would back restrictions at the point of fetal viability.

Kennedy also said during his campaign that **he would support** a "massive subsidized day care initiative" to reduce abortion without limiting legal access.

No word on chemical abortions

(Story continues below)



Tuberville, however, said that he did not speak with Kennedy about chemical abortions, which are regulated by the FDA. Trump himself **has said he will not** restrict access to **the abortion pill mifepristone**. Chemical abortions account for about half of all abortions in the country.

The FDA first approved mifepristone to be used in chemical abortions in 2000. Under current law, the drug is approved to abort an unborn child up to 10 weeks' gestation, at which point the child has a fetal heartbeat, early brain activity, and partially developed eyes, lips, and nostrils.

Mifepristone kills the child by blocking the hormone progesterone, which cuts off the supply of oxygen and nutrients. A second pill, misoprostol, is taken between 24 to 48 hours after mifepristone to induce contractions meant to expel the child's body from the mother, essentially inducing labor.

Pro-life advocates **have been urging** the incoming administration to restrict abortion drugs. Many activists have argued that the executive branch could prohibit the delivery of abortion drugs in the mail by **enforcing the Comstock Act** — a plan that has not been embraced by Trump.

POLITICS DONALD TRUMP

How Far Trump Would Go

ERIC CORTELLESSA / PALM BEACH, FLA. @EricCortellessa | April 30, 2024

In exclusive interviews, the former President lays out a second-term agenda that would reshape America and its role in the world.

This feature was published in April 2024.

Donald Trump thinks he's identified a crucial mistake of his first term: He was too nice.

We've been talking for more than an hour on April 12 at his fever-dream palace in Palm Beach. Aides lurk around the perimeter of a gilded dining room overlooking the manicured lawn. When one nudges me to wrap up the interview, I bring up the many former Cabinet officials who refuse to endorse Trump this time. Some have publicly warned that he poses a danger to the Republic. Why should voters trust you, I ask, when some of the people who observed you most closely do not?

As always, Trump punches back, denigrating his former top advisers. But beneath the typical torrent of invective, there is a larger lesson he has taken away. "I let them quit because I have a heart. I don't want to embarrass anybody," Trump says. "I don't think I'll do that again. From now on, I'll fire."

Six months from the 2024 presidential election, Trump is better positioned to win the White House than at any point in either of his previous campaigns. He leads Joe Biden by slim margins in most polls, including in several of the seven swing states likely to determine the outcome. But I had not come to ask about the election, the disgrace that followed the last one, or how he has become the first former—and perhaps future—American President to face a criminal trial. I wanted to know what Trump would do if he wins a second term, to hear his vision for the nation, in his own words.

Photograph by Philip Montgomery for TIME

The former President, at Mar-a-Lago on April 12, is rallying the right at home and seeking common cause with autocratic leaders abroad.

What emerged in two interviews with Trump, and conversations with more than a dozen of his closest advisers and confidants, were the outlines of an imperial presidency that would reshape America and its role in the world. To carry out a deportation operation designed to remove more than 11 million people from the country, Trump told me, he would be willing to build migrant detention camps and deploy the U.S. military, both at the border and inland. He would let red states monitor women's pregnancies and prosecute those who violate abortion bans. He would, at his personal discretion, withhold funds appropriated by Congress, according to top advisers. He would be willing to fire a U.S. Attorney who doesn't carry out his order to prosecute someone, breaking with a tradition of independent law enforcement that dates from America's founding. He is weighing pardons for every one of his supporters accused of attacking the U.S. Capitol on Jan. 6, 2021, more than 800 of whom have pleaded guilty or been convicted by a jury. He might not come to the aid of an attacked ally in Europe or Asia if he felt that country wasn't paying enough for its own defense. He would gut the U.S. civil service, deploy the National Guard to American cities as he sees fit, close the White House pandemic-preparedness office, and staff his Administration with acolytes who back his false assertion that the 2020 election was stolen.

Trump remains the same guy, with the same goals and grievances. But in person, if anything, he appears more assertive and confident. "When I first got to Washington, I knew very few people," he says. "I had to rely on people." Now he is in charge. The arranged marriage with the timorous Republican Party stalwarts is over; the old guard is vanquished, and the people who remain are his people. Trump would enter a second term backed by a slew of policy shops staffed by loyalists who have drawn up detailed plans in service of his agenda, which would concentrate the powers of the state in the hands of a man whose appetite for power appears all but insatiable. "I don't think it's a big mystery what his agenda would be," says his close adviser Kellyanne Conway. "But I think people will be surprised at the alacrity with which he will take action."

The courts, the Constitution, and a Congress of unknown composition would all have a say in whether Trump's objectives come to pass. The machinery of Washington has a range of defenses: leaks to a free press, whistle-blower protections, the oversight of inspectors general. The same deficiencies of temperament and judgment that hindered him in the past remain present. If he wins, Trump would be a lame duck—contrary to the suggestions of some supporters, he tells TIME he would not seek to overturn or ignore the Constitution's prohibition on a third term. Public opinion would also be a powerful

check. Amid a popular outcry, Trump was forced to scale back some of his most draconian first-term initiatives, including the policy of separating migrant families. As George Orwell wrote in 1945, the ability of governments to carry out their designs "depends on the general temper in the country."

Every election is billed as a national turning point. This time that rings true. To supporters, the prospect of Trump 2.0, unconstrained and backed by a disciplined movement of true believers, offers revolutionary promise. To much of the rest of the nation and the world, it represents an alarming risk. A second Trump term could bring "the end of our democracy," says presidential historian Douglas Brinkley, "and the birth of a new kind of authoritarian presidential order."

Trump steps onto the patio at Mar-a-Lago near dusk. The well-heeled crowd eating Wagyu steaks and grilled branzino pauses to applaud as he takes his seat. On this gorgeous evening, the club is a MAGA mecca. Billionaire donor Steve Wynn is here. So is Speaker of the House Mike Johnson, who is dining with the former President after a joint press conference proposing legislation to prevent noncitizens from voting. Their voting in federal elections is already illegal, and extremely rare, but remains a Trumpian fixation that the embattled Speaker appeared happy to co-sign in exchange for the political cover that standing with Trump provides.

At the moment, though, Trump's attention is elsewhere. With an index finger, he swipes through an iPad on the table to curate the restaurant's soundtrack. The playlist veers from Sinead O'Connor to James Brown to *The Phantom of the Opera*. And there's a uniquely Trump choice: a rendition of "The Star-Spangled Banner" sung by a choir of defendants imprisoned for attacking the U.S. Capitol on Jan. 6, interspersed with a recording of Trump reciting the Pledge of Allegiance. This has become a staple of his rallies, converting the ultimate symbol of national unity into a weapon of factional devotion.

The spectacle picks up where his first term left off. The events of Jan. 6, during which a pro-Trump mob attacked the center of American democracy in an effort to subvert the peaceful transfer of power, was a profound stain on his legacy. Trump has sought to recast an insurrectionist riot as an act of patriotism. "I call them the J-6 patriots," he says. When I ask whether he would consider pardoning every one of them, he says, "Yes, absolutely." As Trump faces dozens of felony charges, including for election interference, conspiracy to defraud the United States, willful retention of national-security secrets, and falsifying business records to conceal hush-money payments, he has tried to turn legal peril into a badge of honor.

In a second term, Trump's influence on American democracy would extend far beyond pardoning powers. Allies are laying the groundwork to restructure the presidency in line with a doctrine called the unitary executive theory, which holds that many of the

constraints imposed on the White House by legislators and the courts should be swept away in favor of a more powerful Commander in Chief.

Nowhere would that power be more momentous than at the Department of Justice. Since the nation's earliest days, Presidents have generally kept a respectful distance from Senate-confirmed law-enforcement officials to avoid exploiting for personal ends their enormous ability to curtail Americans' freedoms. But Trump, burned in his first term by multiple investigations directed by his own appointees, is ever more vocal about imposing his will directly on the department and its far-flung investigators and prosecutors.

[video id=FlgFvoZe autostart="viewable"]

In our Mar-a-Lago interview, Trump says he might fire U.S. Attorneys who refuse his orders to prosecute someone: "It would depend on the situation." He's told supporters he would seek retribution against his enemies in a second term. Would that include Fani Willis, the Atlanta-area district attorney who charged him with election interference, or Alvin Bragg, the Manhattan DA in the Stormy Daniels case, who Trump has previously said should be prosecuted? Trump demurs but offers no promises. "No, I don't want to do that," he says, before adding, "We're gonna look at a lot of things. What they've done is a terrible thing."

Trump has also vowed to appoint a "real special prosecutor" to go after Biden. "I wouldn't want to hurt Biden," he tells me. "I have too much respect for the office." Seconds later, though, he suggests Biden's fate may be tied to an upcoming Supreme Court ruling on whether Presidents can face criminal prosecution for acts committed in office. "If they said that a President doesn't get immunity," says Trump, "then Biden, I am sure, will be prosecuted for all of his crimes." (Biden has not been charged with any, and a House Republican effort to impeach him has failed to unearth evidence of any crimes or misdemeanors, high or low.)

Read More: *Trump Says 'Anti-White Feeling' Is a Problem in the U.S.*

Such moves would be potentially catastrophic for the credibility of American law enforcement, scholars and former Justice Department leaders from both parties say. "If he ordered an improper prosecution, I would expect any respectable U.S. Attorney to say no," says Michael McConnell, a former U.S. appellate judge appointed by President George W. Bush. "If the President fired the U.S. Attorney, it would be an enormous firestorm." McConnell, now a Stanford law professor, says the dismissal could have a cascading effect similar to the Saturday Night Massacre, when President Richard Nixon ordered top DOJ officials to remove the special counsel investigating Watergate. Presidents have the constitutional right to fire U.S. Attorneys, and typically replace their predecessors' appointees upon taking office. But discharging one specifically for refusing a President's order would be all but unprecedented.

Trump's radical designs for presidential power would be felt throughout the country. A main focus is the southern border. Trump says he plans to sign orders to reinstall many of the same policies from his first term, such as the Remain in Mexico program, which requires that non-Mexican asylum seekers be sent south of the border until their court dates, and Title 42, which allows border officials to expel migrants without letting them apply for asylum. Advisers say he plans to cite record border crossings and fentanyl- and child-trafficking as justification for reimposing the emergency measures. He would direct federal funding to resume construction of the border wall, likely by allocating money from the military budget without congressional approval. The capstone of this program, advisers say, would be a massive deportation operation that would target millions of people. Trump made similar pledges in his first term, but says he plans to be more aggressive in a second. "People need to be deported," says Tom Homan, a top Trump adviser and former acting head of Immigration and Customs Enforcement. "No one should be off the table."

Read More: *The Story Behind TIME's 'If He Wins' Trump Cover*

For an operation of that scale, Trump says he would rely mostly on the National Guard to round up and remove undocumented migrants throughout the country. "If they weren't able to, then I'd use [other parts of] the military," he says. When I ask if that means he would override the Posse Comitatus Act—an 1878 law that prohibits the use of military force on civilians—Trump seems unmoved by the weight of the statute. "Well, these aren't civilians," he says. "These are people that aren't legally in our country." He would also seek help from local police and says he would deny funding for jurisdictions that decline to adopt his policies. "There's a possibility that some won't want to participate," Trump says, "and they won't partake in the riches."

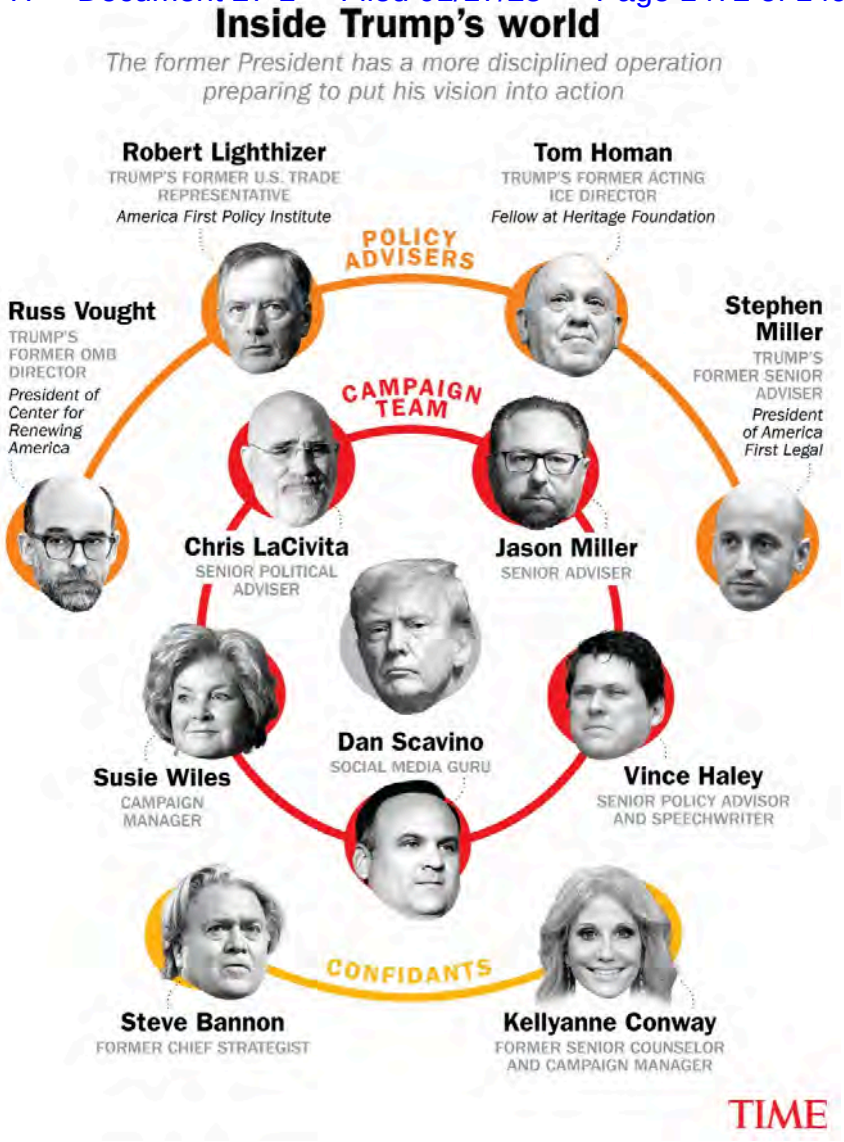
As President, Trump nominated three Supreme Court Justices who voted to overturn *Roe v. Wade,* and he claims credit for his role in ending a constitutional right to an abortion. At the same time, he has sought to defuse a potent campaign issue for the Democrats by saying he wouldn't sign a federal ban. In our interview at Mar-a-Lago, he declines to commit to vetoing any additional federal restrictions if they came to his desk. More than 20 states now have full or partial abortion bans, and Trump says those policies should be left to the states to do what they want, including monitoring women's pregnancies. "I think they might do that," he says. When I ask whether he would be comfortable with states prosecuting women for having abortions beyond the point the laws permit, he says, "It's irrelevant whether I'm comfortable or not. It's totally irrelevant, because the states are going to make those decisions." President Biden has said he would fight state anti-abortion measures in court and with regulation.

Trump's allies don't plan to be passive on abortion if he returns to power. The Heritage Foundation has called for enforcement of a 19th century statute that would outlaw the mailing of abortion pills. The Republican Study Committee (RSC), which includes more than 80% of the House GOP conference, included in its 2025 budget proposal the Life at Conception Act, which says the right to life extends to "the moment of fertilization." I ask

Trump if he would veto that bill if it came to his desk. "I don't have to do anything about vetoes," Trump says, "because we now have it back in the states."

Presidents typically have a narrow window to pass major legislation. Trump's team is eyeing two bills to kick off a second term: a border-security and immigration package, and an extension of his 2017 tax cuts. Many of the latter's provisions expire early in 2025: the tax cuts on individual income brackets, 100% business expensing, the doubling of the estate-tax deduction. Trump is planning to intensify his protectionist agenda, telling me he's considering a tariff of more than 10% on all imports, and perhaps even a 100% tariff on some Chinese goods. Trump says the tariffs will liberate the U.S. economy from being at the mercy of foreign manufacturing and spur an industrial renaissance in the U.S. When I point out that independent analysts estimate Trump's first term tariffs on thousands of products, including steel and aluminum, solar panels, and washing machines, may have cost the U.S. $316 billion and more than 300,000 jobs, by one account, he dismisses these experts out of hand. His advisers argue that the average yearly inflation rate in his first term—under 2%—is evidence that his tariffs won't raise prices.

Since leaving office, Trump has tried to engineer a caucus of the compliant, clearing primary fields in Senate and House races. His hope is that GOP majorities replete with MAGA diehards could rubber-stamp his legislative agenda and nominees. Representative Jim Banks of Indiana, a former RSC chairman and the GOP nominee for the state's open Senate seat, recalls an August 2022 RSC planning meeting with Trump at his residence in Bedminster, N.J. As the group arrived, Banks recalls, news broke that Mar-a-Lago had been raided by the FBI. Banks was sure the meeting would be canceled. Moments later, Trump walked through the doors, defiant and pledging to run again. "I need allies there when I'm elected," Banks recalls Trump saying. The difference in a second Trump term, Banks says now, "is he's going to have the backup in Congress that he didn't have before."



Trump's intention to remake America's relations abroad may be just as consequential. Since its founding, the U.S. has sought to build and sustain alliances based on the shared values of political and economic freedom. Trump takes a much more transactional approach to international relations than his predecessors, expressing disdain for what he views as free-riding friends and appreciation for authoritarian leaders like President Xi Jinping of China, Prime Minister Viktor Orban of Hungary, or former President Jair Bolsonaro of Brazil.

That's one reason America's traditional allies were horrified when Trump recently said at a campaign rally that Russia could "do whatever the hell they want" to a NATO country he believes doesn't spend enough on collective defense. That wasn't idle bluster, Trump tells me. "If you're not going to pay, then you're on your own," he says. Trump has long said the alliance is ripping the U.S. off. Former NATO Secretary-General Jens Stoltenberg credited Trump's first-term threat to pull out of the alliance with spurring other members to add more than $100 billion to their defense budgets.

But an insecure NATO is as likely to accrue to Russia's benefit as it is to America's. President Vladimir Putin's 2022 invasion of Ukraine looks to many in Europe and the U.S. like a test of his broader vision to reconstruct the Soviet empire. Under Biden and a bipartisan Congress, the U.S. has sent more than $100 billion to Ukraine to defend itself. It's unlikely Trump would extend the same support to Kyiv. After Orban visited Mar-a-Lago in March, he said Trump "wouldn't give a penny" to Ukraine. "I wouldn't give unless Europe starts equalizing," Trump hedges in our interview. "If Europe is not going

to pay, why should we pay? They're much more greatly affected. We have an ocean in between us. They don't." (E.U. nations have given more than $100 billion in aid to Ukraine as well.)

Read More: *Read the Full Transcripts of Donald Trump's Interviews With TIME*

Trump has historically been reluctant to criticize or confront Putin. He sided with the Russian autocrat over his own intelligence community when it asserted that Russia interfered in the 2016 election. Even now, Trump uses Putin as a foil for his own political purposes. When I asked Trump why he has not called for the release of *Wall Street Journal* reporter Evan Gershkovich, who has been unjustly held on spurious charges in a Moscow prison for a year, Trump says, "I guess because I have so many other things I'm working on." Gershkovich should be freed, he adds, but he doubts it will happen before the election. "The reporter should be released and he will be released," Trump tells me. "I don't know if he's going to be released under Biden. I would get him released."

America's Asian allies, like its European ones, may be on their own under Trump. Taiwan's Foreign Minister recently said aid to Ukraine was critical in deterring Xi from invading the island. Communist China's leaders "have to understand that things like that can't come easy," Trump says, but he declines to say whether he would come to Taiwan's defense.

Trump is less cryptic on current U.S. troop deployments in Asia. If South Korea doesn't pay more to support U.S. troops there to deter Kim Jong Un's increasingly belligerent regime to the north, Trump suggests the U.S. could withdraw its forces. "We have 40,000 troops that are in a precarious position," he tells TIME. (The number is actually 28,500.) "Which doesn't make any sense. Why would we defend somebody? And we're talking about a very wealthy country."

Transactional isolationism may be the main strain of Trump's foreign policy, but there are limits. Trump says he would join Israel's side in a confrontation with Iran. "If they attack Israel, yes, we would be there," he tells me. He says he has come around to the now widespread belief in Israel that a Palestinian state existing side by side in peace is increasingly unlikely. "There was a time when I thought two-state could work," he says. "Now I think two-state is going to be very, very tough."

Yet even his support for Israel is not absolute. He's criticized Israel's handling of its war against Hamas, which has killed more than 30,000 Palestinians in Gaza, and has called for the nation to "get it over with." When I ask whether he would consider withholding U.S. military aid to Israel to push it toward winding down the war, he doesn't say yes, but he doesn't rule it out, either. He is sharply critical of Israeli Prime Minister Benjamin Netanyahu, once a close ally. "I had a bad experience with Bibi," Trump says. In his telling, a January 2020 U.S. operation to assassinate a top Iranian general was supposed to be a joint attack until Netanyahu backed out at the last moment. "That was something I never forgot," he says. He blames Netanyahu for failing to prevent the Oct. 7 attack, when Hamas militants infiltrated southern Israel and killed nearly 1,200 people amid acts of brutality including burning entire families alive and raping women and girls. "It happened on his watch," Trump says.

On the second day of Trump's New York trial on April 17, I stand behind the packed counter of the Sanaa Convenience Store on 139th Street and Broadway, waiting for Trump to drop in for a postcourt campaign stop. He chose the bodega for its history. In 2022, one of the store's clerks fatally stabbed a customer who attacked him. Bragg, the Manhattan DA, charged the clerk with second-degree murder. (The charges were later dropped amid public outrage over video footage that appeared to show the clerk acting in self-defense.) A baseball bat behind the counter alludes to lingering security concerns. When Trump arrives, he asks the store's co-owner, Maad Ahmed, a Yemeni immigrant, about safety. "You should be allowed to have a gun," Trump tells Ahmed. "If you had a gun, you'd never get robbed."

On the campaign trail, Trump uses crime as a cudgel, painting urban America as a savage hell-scape even though violent crime has declined in recent years, with homicides

sinking 6% in 2022 and 15% in 2023, according to the FBI. When I point this out, Trump tells me he thinks the data, which is collected by state and local police departments, is rigged. "It's a lie," he says. He has pledged to send the National Guard into cities struggling with crime in a second term—possibly without the request of governors—and plans to approve Justice Department grants only to cities that adopt his preferred policing methods like stop-and-frisk.

To critics, Trump's preoccupation with crime is a racial dog whistle. In polls, large numbers of his supporters have expressed the view that antiwhite racism now represents a greater problem in the U.S. than the systemic racism that has long afflicted Black Americans. When I ask if he agrees, Trump does not dispute this position. "There is a definite antiwhite feeling in the country," he tells TIME, "and that can't be allowed either." In a second term, advisers say, a Trump Administration would rescind Biden's Executive Orders designed to boost diversity and racial equity.

Trump's ability to campaign for the White House in the midst of an unprecedented criminal trial is the product of a more professional campaign operation that has avoided the infighting that plagued past versions. "He has a very disciplined team around him," says Representative Elise Stefanik of New York. "That is an indicator of how disciplined and focused a second term will be." That control now extends to the party writ large. In 2016, the GOP establishment, having failed to derail Trump's campaign, surrounded him with staff who sought to temper him. Today the party's permanent class have either devoted themselves to the gospel of MAGA or given up. Trump has cleaned house at the Republican National Committee, installing handpicked leaders—including his daughter-in-law—who have reportedly imposed loyalty tests on prospective job applicants, asking whether they believe the false assertion that the 2020 election was stolen. (The RNC has denied there is a litmus test.) Trump tells me he would have trouble hiring anyone who admits Biden won: "I wouldn't feel good about it."

Policy groups are creating a government-in-waiting full of true believers. The Heritage Foundation's Project 2025 has drawn up plans for legislation and Executive Orders as it trains prospective personnel for a second Trump term. The Center for Renewing America, led by Russell Vought, Trump's former director of the Office of Management and Budget, is dedicated to disempowering the so-called administrative state, the collection of bureaucrats with the power to control everything from drug-safety determinations to the contents of school lunches. The America First Policy Institute is a research haven of pro-Trump right-wing populists. America First Legal, led by Trump's immigration adviser Stephen Miller, is mounting court battles against the Biden Administration.

The goal of these groups is to put Trump's vision into action on day one. "The President never had a policy process that was designed to give him what he actually wanted and campaigned on," says Vought. "[We are] sorting through the legal authorities, the mechanics, and providing the momentum for a future Administration." That includes a

litany of boundary-pushing right-wing policies, including slashing Department of Justice funding and cutting climate and environmental regulations.

Read More: *Fact-Checking What Donald Trump Said in His 2024 Interviews With TIME*

Trump's campaign says he would be the final decision-maker on which policies suggested by these organizations would get implemented. But at the least, these advisers could form the front lines of a planned march against what Trump dubs the Deep State, marrying bureaucratic savvy to their leader's anti-bureaucratic zeal. One weapon in Trump's second-term "War on Washington" is a wonky one: restoring the power of impoundment, which allowed Presidents to withhold congressionally appropriated funds. Impoundment was a favorite maneuver of Nixon, who used his authority to freeze funding for subsidized housing and the Environmental Protection Agency. Trump and his allies plan to challenge a 1974 law that prohibits use of the measure, according to campaign policy advisers.

Another inside move is the enforcement of Schedule F, which allows the President to fire nonpolitical government officials and which Trump says he would embrace. "You have some people that are protected that shouldn't be protected," he says. A senior U.S. judge offers an example of how consequential such a move could be. Suppose there's another pandemic, and President Trump wants to push the use of an untested drug, much as he did with hydroxychloroquine during COVID-19. Under Schedule F, if the drug's medical reviewer at the Food and Drug Administration refuses to sign off on its use, Trump could fire them, and anyone else who doesn't approve it. The Trump team says the President needs the power to hold bureaucrats accountable to voters. "The mere mention of Schedule F," says Vought, "ensures that the bureaucracy moves in your direction."

It can be hard at times to discern Trump's true intentions. In his interviews with TIME, he often sidestepped questions or answered them in contradictory ways. There's no telling how his ego and self-destructive behavior might hinder his objectives. And for all his norm-breaking, there are lines he says he won't cross. When asked if he would comply with all orders upheld by the Supreme Court, Trump says he would.

But his policy preoccupations are clear and consistent. If Trump is able to carry out a fraction of his goals, the impact could prove as transformative as any presidency in more than a century. "He's in full war mode," says his former adviser and occasional confidant Stephen Bannon. Trump's sense of the state of the country is "quite apocalyptic," Bannon says. "That's where Trump's heart is. That's where his obsession is."

These obsessions could once again push the nation to the brink of crisis. Trump does not dismiss the possibility of political violence around the election. "If we don't win, you know, it depends," he tells TIME. "It always depends on the fairness of the election." When I ask what he meant when he baselessly claimed on Truth Social that a stolen election "allows for the termination of all rules, regulations and articles, even those

found in the Constitution," Trump responded by denying he had said it. He then complained about the "Biden-inspired" court case he faces in New York and suggested that the "fascists" in America's government were its greatest threat. "I think the enemy from within, in many cases, is much more dangerous for our country than the outside enemies of China, Russia, and various others," he tells me.

Toward the end of our conversation at Mar-a-Lago, I ask Trump to explain another troubling comment he made: that he wants to be dictator for a day. It came during a Fox News town hall with Sean Hannity, who gave Trump an opportunity to allay concerns that he would abuse power in office or seek retribution against political opponents. Trump said he would not be a dictator—"except for day one," he added. "I want to close the border, and I want to drill, drill, drill."

Trump says that the remark "was said in fun, in jest, sarcastically." He compares it to an infamous moment from the 2016 campaign, when he encouraged the Russians to hack and leak Hillary Clinton's emails. In Trump's mind, the media sensationalized those remarks too. But the Russians weren't joking: among many other efforts to influence the core exercise of American democracy that year, they hacked the Democratic National Committee's servers and disseminated its emails through WikiLeaks.

Whether or not he was kidding about bringing a tyrannical end to our 248-year experiment in democracy, I ask him, Don't you see why many Americans see such talk of dictatorship as contrary to our most cherished principles? Trump says no. Quite the opposite, he insists. "I think a lot of people like it." —*With reporting by Leslie Dickstein, Simmone Shah, and Julia Zorthian*

Congress of the United States
Washington, DC 20515

June 16, 2023

VIA Federal eRulemaking Portal

The Honorable Xavier Becerra
Secretary
U.S. Department of Health and Human Services
200 Independence Avenue, S.W.
Washington, D.C. 20201

RE: Comments on Proposed Rule: HIPAA Privacy Rule To Support Reproductive Health Care Privacy, 88 FR 23506 (April 17, 2023), RIN: 0945-AA20, Docket No. 2023-07517

Dear Secretary Becerra:

We write to express our concern regarding the U.S. Department of Health and Human Services (HHS) proposed rule, "HIPAA Privacy Rule To Support Reproductive Health Care Privacy," 88 Fed. Reg. 23506 published on April 17, 2023 (the "Proposed Rule"), and to urge you to withdraw it immediately.

Abortion is not health care—it is a brutal act that destroys the life of an unborn child and hurts women. Congress did not authorize HHS to extend special provisions for abortion such as these under the guise of "health care." The Proposed Rule unlawfully thwarts the enforcement of compassionate laws protecting unborn children and their mothers, and directs health care providers to defy lawful court orders and search warrants.

The Proposed Rule creates special protections for abortion that limit cooperation with law enforcement, undermine the ability to report abuse, restrict the provision of public health information, and erase the humanity of unborn children. The Proposed Rule would interfere with valid state laws protecting life, arbitrarily permit abortionists to disclose protected health information (PHI) to defend themselves while silencing others, and unlawfully infringe on Congressional power.

The Supreme Court's decision in *Dobbs v. Jackson Women's Health Organization* returned the power to regulate or prohibit abortion back to people and their elected representatives. Under the Proposed Rule, HHS attempts to undermine enforcement of Federal and State abortion laws, simply because this administration disagrees with the Court's decision.

As Members of Congress, we have a Constitutional interest in ensuring that in issuing regulations under the Health Insurance Portability and Accountability Act of 1996 (HIPAA), HHS does not exceed its Congressionally authorized power.

I. Summary of the Health Insurance Portability and Accountability Act of 1996

Enacted by Congress in 1996, HIPAA mandated the development of national standards to prevent PHI from being disclosed without the patient's consent.[1] As required under Title II of HIPAA, HHS developed

[1] Public Law 104-191.

the Privacy Rule to regulate the use and disclosure of PHI by covered health entities, including both health care providers and health plans.[2]

In certain circumstances, the HIPAA Privacy Rule permits, but does not require, covered entities to use and disclose PHI without authorization from the patient. These circumstances include the following:

- **Exception for law enforcement purposes:** A covered entity may disclose PHI to a law enforcement official for a law enforcement purpose, including complying with a subpoena, a court order, or a warrant.[3] It may provide PHI in specific criminal, civil, and administrative proceedings.

- **Exceptions for abuse:** A covered entity may report child abuse and neglect to the appropriate government authority authorized by law to receive these reports.[4] It may also disclose PHI about an individual whom the covered entity reasonably believes to be a victim of abuse, neglect, or domestic violence to a government authority.[5]

- **Exception for serious and imminent threats to the health or safety of a person or the public:** A covered entity may disclose PHI if it believes the disclosure is necessary to prevent or lessen a serious or imminent threat to a person or to the public. [6]

- **Exception for public health data collection:** A covered entity may disclose PHI to a public health authority authorized by law to collect this information, including for the purpose of public health surveillance.[7]

II. Summary of Key Changes Made by the Proposed Rule

Definition of Reproductive Health Care

The HHS Proposed Rule creates an arbitrary and capricious new category for abortion under the umbrella of "reproductive health care," which is defined as "care, services, or supplies related to the reproductive health of the individual,".[8] The preamble to the Proposed Rule clarifies that this definition "applies broadly" and includes "non-prescription supplies" furnished either by a health care provider or an individual who is not a health care provider.[9] Under the Proposed Rule "seeking, obtaining, providing, or facilitating reproductive health care," such as abortion, broadly "includes, but is not limited to, any of the following: expressing interest in, inducing, using, performing, furnishing, paying for, disseminating information about, arranging, insuring, assisting, or otherwise taking action to engage in reproductive

[2] HIPAA Administrative Simplification. Regulation Text. 45 CFR Parts 160, 162, and 164 (Unofficial Version, as amended through March 26, 2013). https://www.hhs.gov/sites/default/files/ocr/privacy/hipaa/administrative/combined/hipaa-simplification-201303.pdf.
[3] 45 CRS § 164.512(f).
[4] Section 1178(b) of HIPAA [42 U.S.C. 1320d–7], 45 CFR § 164.512 (b)(1)(ii).
[5] 45 CFR § 164.512(c)(1)(i).
[6] 45 CFR § 164.512(j).
[7] 45 CFR § 164.512(b)(1)(i).
[8] Proposed 45 CFR § 160.103.
[9] 88 FR 23527.

health care; or attempting any of the same."[10] In addition to including performing surgical and chemical abortion, this definition would encompass actions like mailing abortion drugs, promoting abortion, illicitly transporting minors or victims of sexual abuse to undergo abortions, and providing equipment intended to induce abortions, to name only a few examples.

The Proposed Rule would systematically undercut pro-life state laws in order to give abortion special protection. As described below, the rule limits cooperation with law enforcement, restricts the provision of public health information, and strips unborn children from the scope of protections under the HIPAA Privacy Rule.

Changing the HIPAA Privacy Rule's Exception for Law Enforcement Purposes

The Proposed Rule amends the Privacy Rule to prohibit covered entities from cooperating with law enforcement or even following a court order by using or disclosing PHI "for a criminal, civil or administrative investigation into or proceeding against any person in connection with seeking, obtaining, providing, or facilitating" an abortion, or to identify any person for the purpose of initiating such an investigation or proceeding,[11] if one or more of following three conditions are met ("Rule of Applicability"):[12]

(1) the abortion is provided "outside of the state where the investigation or proceeding is authorized" and the abortion "is lawful in the state in which it is provided."

(2) the abortion is "protected, required, or authorized by Federal law, regardless of the state in which such health care is provided."

(3) the abortion is "provided in the state in which the investigation or proceeding is authorized" and the abortion "is permitted by the law of that state."

HHS states that the purpose of this proposed Rule of Applicability is to "limit the application of the prohibition to circumstances in which the care [the abortion] is lawful under the circumstances in which such health care is provided."[13] As explained further on, however, the Rule of Applicability is premised on dubious and untested legal arguments that displace vast swaths of State abortion laws and inhibit States in carrying out their legitimate interests in protecting unborn children.

Changing the HIPAA Exceptions for Abuse

This Proposed Rule interferes with, and exerts a chilling effect on, the investigation and reporting of child abuse and sexual abuse, protecting abusers instead of victims.

Consistent with Section 1178(b) of the Social Security Act (as added by HIPAA), the Privacy Rule allows covered entities to use or disclose PHI in reporting suspected child abuse or neglect to the appropriate government authority.[14] The Privacy Rule also allows for the disclosure of PHI to the appropriate

[10] Proposed 45 CFR § 164.502(a)(5)(iii)(B).
[11] Proposed 45 CFR § 164.502(a)(5)(iii)(A).
[12] Proposed 45 CFR § 164.502(a)(5)(iii)(C)(1),(2),(3).
[13] 88 FR 23530-23531.
[14] 45 CFR § 164.512(b)(1)(i).

government authority when the covered entity "reasonably believes [an individual] to be a victim of abuse, neglect, or domestic violence," subject to certain other requirements.[15]

Under the Proposed Rule, neither of these longstanding exceptions to protect victims of abuse would permit disclosures of PHI for investigating or prosecuting any individual for providing or facilitating an abortion (in the applicable circumstances) "when the report of abuse, neglect, or domestic violence is *based primarily* on the provision of reproductive health care" (emphasis added).[16] The broad definition of "reproductive health care" means this provision not only protects abortions sought or coerced by abusers to cover up their abuse, but also covers cases where the reporting is based on the administration of rape kits and medical treatment for victims of sexual assault. Consequently, the Proposed Rule would protect abusers and abortionists who turn a blind eye to them, while exerting a chilling effect on the reporting of child and sexual abuse and the ability of States to prosecute perpetrators of abuse.

HHS openly admits that it intends for this provision to protect abortionists rather than victims in a bid to override the will of pro-life States: "The Department is concerned that *recent state actions* may lead regulated entities to think that they are permitted to make such disclosures of PHI when they believe that persons who provide or facilitate access to reproductive health care are perpetrators of such crimes" (emphasis added).[17]

Changing the HIPAA Privacy Rule's Exception for Serious and Imminent Threats to the Health or Safety of a Person or the Public

The Privacy Rule allows a covered entity to disclose PHI when it is "necessary to prevent or lessen a serious and imminent threat to the health or safety of a person or the public" and is "to a person or persons reasonably able to prevent or lessen the threat, including the target of the threat."[18]

The Proposed Rule's redefinition limits the term "person" to a human being "who is born alive,"[19] wrongfully preventing the Privacy Rule's exception for a serious and imminent threat to the health or safety from applying to an unborn child. The use of this exception is appropriate for an unborn child because every pregnancy involves two patients, the unborn child and his or her mother. Both patients have their own DNA, sex, limbs, eye color, and heartbeat. Abortion is the most serious threat imaginable to the health and safety of the child in the womb.

Congress has recognized the unborn child explicitly in several laws, including the Unborn Victims of Violence Act,[20] the Emergency Medical Treatment and Active Labor Act (EMTALA),[21] and the National

[18] 45 CFR § 164.512(j).
[19] Proposed 45 CFR § 160.103.
[20] 18 U.S.C. § 1841 (establishing a separate offense for unborn children who are killed or injured through the commission of certain Federal crimes).
[21] 42 U.S.C. §§ 1395w-22(d)(B)(i), 1395dd(c)(1)(A)(ii), (c)(2)(A), (e)(1)(A)(i),(B)(ii) (recognizing threats to the health of the unborn child as well as the mother).

Childhood Vaccine Injury Act.[22] HHS regulations governing the Child Health Insurance Program similarly recognize the unborn child.[23]

The preamble to the Proposed Rule wrongly cites the Born Alive Infants Protection Act to limit the scope of protections in the Privacy Rule for unborn human beings. That law rightfully recognizes that children born alive, even after failed abortions, are "persons" under Federal law. However, the law did not thereby state that unborn children were not "persons." In fact, to avoid this very misunderstanding, the law included a rule of construction that states: "Nothing in this section shall be construed to affirm, deny, expand, or contract any legal status or legal right applicable to any member of the species homo sapiens at any point prior to being `born alive' as defined in this section."[24] Therefore, HHS' use of this 2002 law exclude "unborn children" as persons is arbitrary and capricious.

Changing the HIPAA Exception for Public Health

As directed by Section 1178(b) of the Social Security Act (as added by HIPAA), the Privacy Rule allows covered entities to use or disclose PHI in matters related to public health surveillance. The Proposed Rule arbitrarily thwarts legitimate public health oversight of the abortion industry. Specifically, the rule redefines "public health," to exclude "uses and disclosures for the criminal, civil, or administrative investigation into or proceeding against a person in connection with obtaining, providing, or facilitating" an abortion.[25] In addition, the Administration also clarifies that it believes state laws requiring the disclosure of PHI for purposes such as criminal, civil, or administrative investigations related to abortion are preempted by HIPAA.[26] It also states that public health reporting activities, including categories like "disease or injury," "birth," or "death," will exclude information about abortion for purposes of HIPAA.[27]

III. Key Anti-Life Consequences of the Proposed Rule

The Proposed Rule Interferes with Valid State Laws Protecting Life

The Proposed Rule interferes with the administration and enforcement of valid State laws that regulate or prohibit abortion. This is by design and in response to *Dobbs*, as HHS itself admits the rule would "create a conflict" with "some state laws."[28] HHS states that, in the circumstances when the Proposed Rule applies, "the state lacks any substantial interest in seeking the disclosure"[29] and elsewhere describes states as lacking even a "legitimate interest."[30]

Such assertions run directly counter to the ruling of the Supreme Court in *Dobbs*, which made clear that "[a] law regulating abortion . . . is entitled to a 'strong presumption of validity.'"[31] This presumption "must be sustained if there is a rational basis on which the legislature could have thought that it would serve legitimate state interests." Such legitimate interests "include respect for and preservation of

[29] 88 FR 23522.
[30] 88 FR 23531.
[31] *Dobbs v. Jackson Women's Health Org*., 142 S. Ct. 2228, 2284 (2022)

prenatal life at all stages of development, … the protection of maternal health and safety; the elimination of particularly gruesome or barbaric medical procedures; the preservation of the integrity of the medical profession; the mitigation of fetal pain; and the prevention of discrimination on the basis of race, sex, or disability."[32]

The Proposed Rule would contradict the presumption of validity of State abortion laws and massively expand the power of the Federal bureaucracy to undermine them. HHS would be empowered to launch investigations or impose crippling fines on health providers for obeying state laws, complying with state court orders, or cooperating with law enforcement.

Despite HHS claim that the Proposed Rule only applies when abortion related activities are lawful,[33] the rule will hamper the ability of states and the Federal government to investigate and enforce valid and enforceable pro-life laws.

This result stems from how each of the three prongs of the proposed Rule of Applicability is drafted:

1. ***Under the first prong of the Rule of Applicability, States that protect life would be unable to obtain PHI from health care providers to investigate the provision, trafficking or shipping of abortion drugs, or otherwise performing or facilitating abortion if the action begins, ends, or otherwise is connected with activities that occur in a State where abortion is legal.***

   HHS explains that "[t]he proposal is not limited to circumstances in which the health care has not yet been obtained, provided, or facilitated. It also includes situations *where the health care is ongoing* or has been completed" (emphasis added).

   Below is a non-exhaustive list of examples of circumstances where the prohibitions of the Proposed Rule appear to apply:

   - An out-of-State (or international) abortionist or abortion drug trafficker uses telemedicine or the mail to prescribe or transport an abortion drug.[34]
   - An abortionist begins the process of a late-term abortion in a State where abortion on demand is legal and he or another abortionist completes it in a State where abortion is prohibited (or vice-versa).
   - A child is trafficked across State lines without the consent of a parent to obtain an abortion. (Idaho recently enacted a law to prevent this.)[35]
   - A victim of sexual abuse is transported across State lines from a pro-life State to a pro-abortion State to undergo an abortion and cover up the abuser's crimes.

   It is arbitrary and capricious for the Proposed Rule to allow pro-abortion States to extend the reach of their radical abortion policies into pro-life States, while inhibiting pro-life States in enforcing laws that seek to do the contrary.

[32] Ibid.
[33] 88 FR 23531.
[34] Ibid., Footnote 270 further suggests HHS intends to protect the illegal interstate shipping of abortion drugs by citing the Department of Justice Office of Legal Counsel's misguided memo that seeks reinterpret longstanding Federal laws prohibiting the mailing and interstate carriage of abortion drugs.
[35] Idaho House Bill 242 (2023) https://legislature.idaho.gov/sessioninfo/2023/legislation/h0242.

To the extent State laws on abortion involve novel interjurisdictional issues between the States, it is the role of the Federal Courts, not HHS to adjudicate any constitutional questions that may arise in this context. HHS does not have the authority to declare that a sweeping category of State laws that protect life should not receive the presumption of validity that they are entitled to under *Dobbs*.

2. ***Under the second prong of the Rule of Applicability, HHS baselessly asserts that Federal law authorizes or even requires abortions that are prohibited under state law.***
As an example, HHS cites the Department of Veterans Affairs (VA) interim final rule, which purports to authorize VA to provide abortions on demand even in defiance of State law.[36] HHS fails to acknowledge, however, that a 1992 Federal law expressly prohibits the VA from providing abortions.[37] Furthermore, under the Assimilative Crimes Act, it is a Federal crime to violate a State abortion law in a Federal enclave located within that State.[38] As a second example, HHS cites the Emergency Medical Treatment and Labor Act (EMTALA), which the Biden administration claims "requires" the performance of abortion when a woman's health is at risk, preempting State laws prohibiting elective abortions.[39] In reality, EMTALA explicitly recognizes the health of the unborn child alongside the mother's health.[40]

   We ask that HHS provide a complete list and justification of every Federal law it believes protects, requires, or authorizes abortion or abortion-related activities in violation of State law, and which State laws on abortion HHS believes are unenforceable by reason of Federal law.

3. ***Under the third prong of the Rule of Applicability, HHS prevents health care providers from disclosing PHI to law enforcement or a Court if the State has not made the abortion at issue unlawful.***
The Proposed Rule would have a chilling effect on the ability of States to enforce their laws. HHS states: "if a state has not made the relevant reproductive health care unlawful, *it lacks a legitimate interest* in conducting a criminal, civil, or administrative investigation or proceeding into such health care where the investigation is centered on the mere fact that reproductive health care was or is being provided" (emphasis added).[41] This justification is without merit. States have a legitimate interest in investigating conduct that they have probable cause to believe may be unlawful. States that prohibit abortion except in limited circumstances, or only after the attainment of a certain gestational age or developmental milestone like a detectable heartbeat, must be allowed to investigate to determine whether or not a given abortion was lawful in the first place.

   Under the Proposed Rule, however, States would be forced to cede their powers to investigate criminal abortion-related activity to a health care provider (who may even be the subject of the investigation) and HHS' determination and understanding of State law. But in many cases, a violation of State law can only be determined through an investigation. HHS explains that a State investigation or proceeding regarding abortion could only obtain PHI "[w]here *the regulated entity determines* that the reproductive health care was provided under circumstances where it was unlawful"[42]

---

[36] 88 FR 23531.
[37] Section 106 of the Veterans Health Care Act of 1992 (38 USC 1710 note).
[38] 18 U.S.C. § 13.
[39] 88 FR 23531.
[40] 42 U.S.C. §§ 1395w-22(d)(B)(i), 1395dd(c)(1)(A)(ii), (c)(2)(A), (e)(1)(A)(i),(B)(ii).
[41] 88 FR 23531.
[42] Ibid.

(emphasis added). This makes the Proposed Rule completely unworkable and wrongfully assigns health care providers and HHS bureaucrats power to self-enforce and oversee, respectively, State abortion laws in manner unlike how any legitimate health care service is treated under the Privacy Rule. The Proposed Rule also creates confusion for health care providers, who could be subjected to crippling fines imposed by HHS for cooperating with legitimate State law enforcement activities and Court orders.

By tying its requirements to circumstances where the abortion is "permitted by the law of that state,"[43] the Proposed Rule unlawfully thwarts enforcement of Federal criminal laws on abortion, such as those mentioned below. Specifically, this prong would prohibit disclosures for purposes of enforcing Federal abortion laws in States where statutes permit the Federally-prohibited abortion or abortion-related activities at issue, such as partial-birth abortions.

The Proposed Rule Arbitrarily Permits Abortionists to Disclose PHI to Defend Themselves

The Proposed Rule arbitrarily and capriciously permits abortionists and others who facilitate abortion to disclosure abortion-related PHI "to defend any person in a criminal, civil, or administrative proceeding where liability could be imposed on that person for providing such health care,"[44] while simultaneously inhibiting the ability of the state to obtain that same information as part of an investigation or proceeding. The aim of the Proposed Rule is not, therefore, about protecting "an individual's highly sensitive PHI," as HHS asserts in numerous places;[45] rather, it is about insulating the abortion industry from accountability.

The Proposed Rule is Unlawful and Infringes on Congressional Power

The Proposed Rule is plainly unlawful, and, if finalized, would far exceed HHS' authorized power. HIPAA does not provide "clear authorization required by [the Supreme Court's] precedents" to promulgate regulations setting national policy on an issue of major political significance, which abortion surely is.[46] Moreover, the rule comes as Congress "conspicuously and repeatedly declined to enact" legislation similar in nature to the Proposed Rule.[47] The mere fact that HIPAA authorizes the preemption of contrary State laws does not change the fact Congress never authorized HHS to promulgate special protections for abortion, particularly, not to hinder valid criminal and civil investigations under State law.

Far from promoting abortion as the Proposed Rule would, Congress has on numerous occasions acted to limit abortion nationally and rejected attempts to use Federal law to expand or protect abortion. To the contrary, the Proposed Rule's attempt to create special protections for abortion unlawfully interferes with several Federal criminal laws that protect life and prohibit coercive family planning practices. These include: the Federal ban on partial birth abortions,[48] the Federal ban on the mailing and interstate shipment of abortion drugs,[49] the Assimilative Crimes Act (as explained above),[50] the Federal ban on trafficking in human fetal tissue,[51] the Federal ban on coercive abortion and sterilization in Federal

programs,[52] and the Federal ban on Female genital mutilation.[53] Congress' enactment of laws that limit abortion demonstrates Congressional intent that it never intended HIPAA to be used to promote or create special protections for abortion.

IV. Conclusion

This Proposed Rule far exceeds the power HHS was given by Congress to implement HIPAA. It massively expands the power of the federal bureaucracy to illegally override pro-life state laws and to undermine the decision of the Supreme Court in *Dobbs*. If finalized, the Proposed Rule will suppress compliance with Court orders and hamper necessary and legitimate investigations by law enforcement while protecting sex abusers and traffickers and individuals flooding the mail with deadly abortion drugs. We urge HHS to immediately withdraw this dangerous and irresponsible regulation.

How Trump nominees could make Project 2025 a reality

GOV & POLITICS | Jan 02, 2025 | 2:23 pm ET | By Amanda Becker/The 19th

SHARE

Donald Trump, at the time president of the United States, listens to then-Office of Management and Budget Acting Director Russ Vought deliver remarks prior to Trump signing executive orders on Oct. 9, 2019, in the Roosevelt Room of the White House. Official White House Photo by Shealah Craighead

Republican President-elect Donald Trump spent the closing months of his campaign trying to distance himself from a blueprint for his second term known as Project 2025.

Then, in the days after his victory, Trump picked major architects of the Heritage Foundation's vision for key posts in his next administration, setting the stage for them to implement a conservative Christian agenda that has the potential to reshape the federal government and redefine rights long held by all Americans, though likely to disproportionately impact women, LGBTQ+ people and vulnerable populations like the elderly and disabled.

One of these architects is Russell Vought, whom Trump has again tapped to lead his Office of Management and Budget, or OMB, an under-the-radar entity to most Americans that wields immense influence over the federal government by crafting the president's budget. If confirmed by the Senate, a very likely outcome, Vought will

This article was originally published by The 19th,

be optimally positioned to inject Project 2025's priorities – many of which reflect his career-long push to dismantle programs for low-income Americans and expand the president's authority – across the federal agencies and departments that OMB oversees.

Ben Olinsky, who advised Democratic former President Barack Obama on labor and workforce policy before joining the liberal-leaning Center for American Progress, where he works on issues related to the economy and governance, said that Vought's vision for OMB as presented in Project 2025 is "to basically change the plumbing so they can do whatever they want without any meaningful checks and balances" during Trump's second term.

a nonprofit newsroom covering gender, politics, and policy. The Arizona Mirror is a founding member of The 19th News Network.

"I think that it's important to really make sure [Americans] understand what the plans are for changing the plumbing," Olinsky said.

Vought has firsthand knowledge of the OMB's wide-ranging scope. During Trump's first term, he was OMB's deputy director, acting director and, finally, confirmed director. In those roles, he helped then-President Trump craft a plan to jettison job protections for thousands of federal workers and assisted with a legally ambiguous effort to redirect congressionally appropriated foreign aid for Ukraine.

In the years since, as Trump staved off legal threats and convictions to build a winning bid to return to the White House, Vought has refined his thinking and strategies about how to best force agencies to "come to heel and do what the president has been telling them to do," as he put it in a recent interview.

Vought has used two pro-Trump groups he founded – the nonprofit Center for Renewing America and its advocacy arm, America Restoration Action – to discredit structural racism as a driver for inequality and attempt to stymie diversity, equity and inclusion (DEI) efforts. In August, he told a pair of British journalists posing as potential donors that the Center for Renewing America is "an organization I helped turn into the Death Star," the fictional Star Wars space station that can destroy planets, and it "is accomplishing all of the debates you are reading about."

The chapter that Vought wrote for Project 2025 details how the Office of Management and Budget could be a vehicle to advance the Christian nationalist agenda he favors – and he has not hesitated to talk about it.

"I think you have to rehabilitate Christian nationalism," Vought told the British journalists at the Centre for Climate Reporting, which released video of the conversation that was recorded using hidden cameras.

In an interview with conservative activist Tucker Carlson shortly after Trump's reelection, Vought likened OMB to the "nerve center" through which a president can ensure their policy directives trickle down to the multitude of federal agencies and a civilian workforce of more than two million people.

"Properly understood, [OMB] is a President's air-traffic control system with the ability and charge to ensure that all policy initiatives are flying in sync and with the authority to let planes take off and, at times, ground planes that are flying off course," Vought wrote in Project 2025.

He sees two primary ways to ground wayward planes: by eliminating potential dissent within agencies and withholding money appropriated by Congress for projects and programs the president does not support.

Both would clear the way for Trump's next administration to implement many of the priorities detailed in Project 2025, which could essentially redefine rights, systems and cultural norms for all Americans.

Some of Project 2025's recommendations include restricting abortion access and supporting a "biblically based" definition of family, because the "male-female dyad is essential to human nature," by replacing policies related to LGBTQ+ equity with those that "support the formation of stable, married, nuclear families."

It also suggests transforming the FBI into a politically motivated entity to settle scores and barring U.S. citizens from receiving federal housing assistance if they live with anyone who is not a citizen or permanent legal resident, which would serve Trump's campaign promise to take extraordinary measures to crack down on illegal immigration. During remarks in September titled "Theology of America's Statecraft: The Case for Immigration Restriction," Vought justified the separation of families and condemned so-called sanctuary cities, or those that pass laws that limit their cooperation with federal immigration authorities. "Failing to secure the border is a complete abdication of [the government's] God-given responsibility," he said.

Olinsky explained that while many of the policies in Project 2025 have been floating around Republican circles in Washington for years without gaining much traction, the document is a detailed roadmap that shows how its authors believe they can finally deliver on key pieces of their conservative Christian agenda.

"One, it says all of the quiet parts out loud about the full scope of the agenda. And then the second thing, which I think is something folks should really pay attention to, is it says how they're going to accomplish it, practically, by using executive action," Olinsky said.

In many ways, Vought's approach to bending the federal government to a president's will began taking shape during Trump's first administration. In late 2020, as Trump's first term drew to a close, Vought helped him craft an executive order known as "Schedule F," which reclassified thousands of civil servants and, with that, stripped them of their job protections; Vought recommended that close to 90 percent of OMB's workforce be reclassified.

President Joe Biden rescinded the executive order on his third day in office. Project 2025 recommends reinstating it.

Former Trump officials, campaign advisers and others in his orbit have already identified as many as 50,000 federal employees who could be fired, according to published reports. And just last month, Senate Republicans blocked a Democratic effort to codify protections for these workers ahead of Trump's — and likely Vought's — return.

Sen. Tim Kaine of Virginia, a Democrat who sponsored the legislation to protect federal employees, warned of a "loyalty-based system that would impede the work of the federal government, expose people to intimidation and bring people into jobs that are not qualified to do them, thus risking the American public's safety and quality of life."

Vought is among the Trump loyalists who have been open about their desire to slash the federal workforce — as a route to purge critics, improve efficiency or both.

In the interview with Carlson, Vought said, "There certainly is going to be mass layoffs and firings, particularly at some of the agencies that we don't even think should exist." His language appeared to communicate an effort to ensure obedience and compliance. With the firings and layoffs, Vought said he wants to avoid having "really awesome Cabinet secretaries sitting on top of massive bureaucracies that largely don't do what they tell them to do."

Trump's transition team did not respond to requests to discuss Vought's selection for OMB or the chapter he wrote for Project 2025 about the agency. The 19th reached out to Vought through his Center for Renewing America, which likewise did not respond to a request for comment.

Power of the Purse

During Trump's first term, OMB helped find money to begin building a small section of wall along the U.S.-Mexico border — a key campaign promise Trump made in 2016 — "because Congress wouldn't give him the ordinary money," Vought told Carlson.

Trump also enlisted OMB to withhold $400 million in military aid that Congress approved for Ukraine, as Trump and his associates tried to pressure the country to investigate Biden and his family. The move prompted the abuse-of-power case House Democrats made against Trump during his first impeachment, when Vought defied a subpoena to testify. The Government Accountability Office, a nonpartisan watchdog, concluded that the scheme violated the 1974 Impoundment Control Act. Days later, the Republican-led Senate acquitted Trump. (Trump had eventually released the aid.)

When Trump subsequently nominated Vought to lead OMB in 2020, Democrats opposed him because of his approach to impoundment authority. He was nonetheless confirmed.

Vought's path to confirmation is all but certain this time around: Republicans control the Senate, the congressional chamber charged with approving presidential nominations. Very likely to feature in his confirmation hearings is Vought's belief that the OMB can help Trump overcome opposition and implement policy priorities, possibly including those contained in Project 2025, by redirecting or refusing to spend funds appropriated by Congress, which under the Constitution holds the power of the purse.

"Making Impoundment Great Again!" Vought wrote in June on X, riffing on the "Make America Great Again" slogan that has come to define Trump's movement.

Trump spent his campaign insisting that he had not read Project 2025 and did not know its authors. "I have no idea who is behind it. I disagree with some of the things they're saying and some of the things they're saying are absolutely ridiculous and abysmal," he wrote in a July post on his Truth Social platform.

But of the more than 350 people who contributed to Project 2025, at least 60 percent are linked to the incoming president, according to a list of contributors and their ties reviewed by The 19th. They range from appointees and nominees from Trump's first administration, like Vought, to members of his previous transition team and those who served on commissions and as unofficial advisers.

Democrats, including Vice President Kamala Harris, seized on Project 2025 during their campaigns to highlight the dangers they believe are posed by a second Trump presidency. At 920 pages, it offers a vision of government that is far more detailed and specific than the policy proposals put forward by Trump directly. The "Agenda 47" on Trump's campaign website was a list of 20 bullet points that included vague policies like "end the weaponization of government against the American people" and "unite our country by bringing it to new and record levels of success."

When Trump announced Vought as his OMB pick, he said Vought "knows exactly how to dismantle the Deep State and end Weaponized Government." His other selections for OMB leadership posts include anti-abortion activist Ed Martin and Vought's colleague at the Center for Renewing America, Mark Paoletta, whom the president-elect praised as a "conservative warrior."

One question as Trump takes office on January 20 and Vought, if confirmed, helps him control the government's workforce and purse strings, is which version of the country they will promote and whose rights are – and aren't – protected.
