RECOMMENDATIONS

A. Campus Culture and Student Experience

A guiding spirit behind this first set of recommendations is the report of the Joint Task Force Subcommittee on Pluralism (Appendix 3). Its focus is the promotion of a "culture of pluralism," defined as:

> Recognizing the diversity of identities and ideologies on campus, respecting, relating, and cooperating with one another, and connecting personal and campus civic values to advance our educational and research mission. These campus civic values are anchored in the University's Values Statement advancing respect for the rights, differences, and dignity of others; honesty and integrity in all dealings; conscientious pursuit of excellence in our work; accountability for actions and conduct in the community; and responsibility for the bonds and bridges that enable all to grow with and learn from one another.

Fostering a pluralistic campus atmosphere is connected with striving to realize the ideals represented by the University's 2018 Values Statement,[614] which calls for:

> "Respect for the rights, differences, and dignity of others"; "honesty and integrity in all dealings"; "conscientious pursuit of excellence in our work"; "accountability for actions and conduct in the community"; and "responsibility for the bonds and bridges that enable all to grow with and learn from one another."

The recommendations presented here suggest means by which these values can be embodied in our campus community's interactions in the classroom, student residences, and co-curricular life.

We call for changes in the following eight categories:

- Admissions: We believe classes at Harvard should consist of students who are eager to contribute to a learning community grounded in open inquiry and mutual respect.
- Early Student Experiences: Early student experiences, especially for undergraduate students, should focus on establishing norms that reflect Harvard's aspirations for its learning community.
- Academic Life: Students deserve a classroom experience that embodies the desired learning community — one free from antisemitism, anti-Israeli bias, and all forms of discrimination — and supported by enhanced course opportunities offered by Harvard's Schools and faculty.
- Co-Curricular Activities and Residential Life: Student organizations need support and guidance to ensure their activities do not have antisemitic or anti-Israeli impacts, so they can effectively contribute to the kind of learning community Harvard aspires to beyond the classroom.
- Building a Pluralistic Community: To foster a campus culture of pluralism at Harvard, a central hub for pluralism should be established.
- Religious Life: We believe that faith can be an important source of support for Harvard's students and an integral part of the learning community, and that steps can be taken to strengthen this aspect of campus life.
- Administrative Infrastructure: A robust administrative infrastructure is needed to support, coordinate, and sustain the efforts outlined above.
- Protest, Complaints, and Discipline: Protests must be authorized and must not disrupt the normal operations of the University, including conducting classes and providing unrestricted access to libraries and other campus buildings. Complaint mechanisms should be aligned across Harvard's Schools to the

[614] https://inclusionandbelongingtaskforce.harvard.edu/files/inclusion/files/vii._appendix_d._revised_values_statement.pdf

greatest extent possible, and should be easily accessed, user-friendly, and efficient. Disciplinary policies and enforcement should be substantive and equitable across Harvard's Schools.

Below, we lay out recommended actions in each of these eight categories.

Admissions

Student life at Harvard is profoundly shaped by which individuals we choose to attract and admit to our student body. Events of the past two years have caused us to worry that Harvard tends to admit some individuals who already see themselves as leaders with a mandate to act, rather than as learners who are curious, open to others, and aware that they need further education. Efforts are already underway in some Schools to correct this tendency, and we endorse them.

To reinforce and expand these efforts, we recommend that the staff and faculty responsible for admissions across all of Harvard's Schools take — or where applicable, continue to take and build upon — the following actions:

- **Articulate to prospective students that Harvard seeks to build a learning environment where each student is in genuine community with people with whom one may disagree.** Communicate clearly, as part of the admissions criteria, that Harvard expects all students to demonstrate civility, engage thoughtfully with one another, practice tolerance and empathy, and, above all, to cherish the opportunity to learn with and from one another.
- **Where feasible, incorporate application questions that assess an applicant's aptitude in navigating situations involving diverging viewpoints and commitments (as we understand Harvard College has recently done).** Additionally, in interview settings where applicable, prompt applicants to respond to ideas and opinions that may differ from their own. Admissions personnel should look favorably on demonstrations of empathetic and reasoned engagement and unfavorably on exhibitions of hostility, derision, or dismissiveness.
- **In evaluating candidates, prioritize demonstrated qualities such as bridge-building, particularly through participation in organizations and activities that promote dialogue across difference.** Look favorably upon experience in identity-based commitments and activism that involved constructive engagement with others who may hold differing viewpoints, as well as a demonstrated commitment to curiosity and self-education. Conversely, reject candidates who have track records of antisemitism, bias against Israelis based on their national origin, or other forms of identity-based discrimination, including anti-Muslim, anti-Arab, or anti-Palestinian bias.
- **Be open to collaboration with self-organized faculty volunteers aiming to reach out to admitted students who may, in view of recent events on campus, fear identity-based bias or hostility toward their personal commitments.** We are aware, for instance, of faculty groups eager to welcome Jewish and Israeli admitted students and to foster a sense of belonging even before matriculation. We encourage admissions leaders to work with such groups.

Early Student Experiences

Early experiences on campus have a disproportionate impact on student life. In Harvard College, for instance, events such as preorientation, orientation, and Convocation shape undergraduate students' impressions of our community and its norms. In some recent Convocations, protestors have stationed themselves near first-year students and have chanted pro-Palestinian and anti-Israeli slogans. Silence at the time from University leaders has conveyed to incoming students that such chanting is a welcome form of "discourse" in our community and that it is acceptable to alienate or intimidate some community members. Graduate students experience entrance lifecycle events of their own. For them as well as for

undergraduate students, first encounters with their fellow students should be designed to shape a learning community of open inquiry and mutual respect.

To achieve this goal, and in the spirit of the recommendations of the Joint Task Force Subcommittee on Pluralism, we recommend that organizers of early student experiences at all Harvard Schools implement the following:

- **Deeply examine and revise pre-orientation and orientation programs.** Encourage new students to engage constructively with peers who may hold differing worldviews from their own, ideally within a structured pluralism framework:
  - Ensure that all facilitators of early student activities are trained to cultivate a committed learning community among new students of different backgrounds and outlooks.
  - Create diverse cohorts of students in preorientation programs and consider whether the benefits of programs that are more monolithic outweigh the cost of creating homogenous social spheres at the beginning of one's Harvard journey.
  - In early student events, showcase returning students who can model civil and reasoned disagreement and lead constructive dialogues around contentious issues, thereby encouraging similar discussions among new students.
  - Given the current climate surrounding the Israeli-Palestinian conflict, engage Israeli and Palestinian leaders who are willing and able to model frank and genuine dialogue with one another, as part of early student programming.
  - Enlist respected faculty (e.g., faculty deans in the residential Houses of Harvard College) to reinforce the message that Harvard expects constructive engagement across differences and support faculty in developing programs that help facilitate this engagement.
  - Starting in the 2025-26 academic year, enlist Jewish and Muslim faculty and students to assist in the design of anti-bias materials that can be incorporated into orientation programs at Harvard College and other Harvard Schools in future years. These materials should address campus culture, antisemitism, and other forms of hate.
  - In instances where Schools may have ceded responsibility for pre-orientation and orientation programs to student groups, reclaim oversight to ensure a high-quality, coherent presentation that aims to integrate all students into a shared community.
- **Prepare all administrators who speak in opening programs, including the President and Provost, to intervene and speak up on the spot when agitation for alienation erupts at official events and activities.** At such moments, it is essential that leaders model the defense of the University's core function and protection of its learning environment.

Academic Life

What happens in Harvard's classrooms has both a direct and an indirect impact on student life. Critically, the actions of instructors influence whether students experience a culture of open inquiry and mutual respect within those spaces. These actions also shape the expectations students have about acceptable behavior and discourse during their time at Harvard outside the classroom.

The Task Force believes that every Harvard student should have full access to Harvard's educational opportunities, regardless of their religion, national origin, or political beliefs. Yet, in the course of our work, we heard from too many Jewish and Israeli students who said they have not fully enjoyed such access in recent years. They described instances where fellow students and even instructors created classroom environments that felt inhospitable.

Toward the goal of full access to educational opportunities, we recommend that all Harvard Schools and programs do the following:

- **Develop a set of rules and expectations for instruction.** These should respect the academic freedom, rights, and responsibilities of both instructors and students. While each School or unit must determine what is appropriate within its own specific context, we suggest the following as a starting point:
  - Instructors should clearly distinguish between their professional academic roles and their personal civic roles and refrain from political comment unrelated to course subject matter when they are teaching.
  - Schools should ensure that instructors are aware they may not refuse to teach students on the grounds of student identity or political or religious beliefs, nor may they discriminate among students on such grounds when conducting class or grading.
  - Instructors should value diverse identities and outlooks in the learning community. They should be open to divergent points of view and actively promote such openness among students, colleagues, and others.
  - Schools should ensure that instructors are aware they may not encourage students to adopt particular political stances or take specific political actions outside of class. For instance, we think it should be unacceptable for instructors to cancel class to facilitate student attendance at a protest or hold office hours onsite at a political event (as we understand some instructors did at the 2024 pro-Palestinian encampment). In our view, these should be basic expectations of all Harvard instructors, and falling short of these expectations should be seen as a sign that a teacher does not take their responsibilities as a Harvard teacher seriously, which should result in significant and lasting consequences.
  - Instructors should be adept at eliciting multiple viewpoints within their classrooms and should promptly address any behavior that undermines a learning environment grounded in open inquiry and mutual respect.
  - An instructor's ability to engage diverse opinions should be a factor in course evaluations and considered by the respective School and the University when hiring, promoting, and renewing the appointments of instructors.
- **Communicate and enforce expectations.** After developing these norms and expectations, each School should clearly communicate them to both instructors and students. Additionally, they should establish clear processes for addressing breaches of the norms and expectations if such processes are not already in place.
- **Create opportunities, support, and incentives for all instructors to learn how to facilitate difficult conversations across lines of difference in the classroom.**

As articulated in the "Report on Institutional Voice in the University," Harvard should ensure that its Schools, departments, centers, and programs refrain from supporting, promoting, or lending their names or Harvard's to activities and ideological campaigns that encourage alienation of segments of Harvard's learning community. To the extent this is not clear, we recommend that the University produce guidelines along these lines. The Provost's Office should track compliance with the Report and any such guidelines and then remedy breaches of them.

We understand that the Institutional Voice is a new policy, and we urge the Provost's Office to consider whether a Task Force or other reviewing body is needed to examine existing content to ensure that we meet our goals of including people with diverse opinions and backgrounds across the University's various classes, centers, and degree programs. To the extent that changes are necessary, we encourage copious engagement with difference.

This report has noted complaints by students about certain professional and graduate Schools where teaching about Israel/Palestine is, in their view, highly politicized and partisan, and where they feel unwelcome because of their political views or simply because of their nationality or ethno-religious identity. In addition to the general recommendations we have laid out thus far, the University's Central Administration should enter into a dialogue with the administration of each School, assess the presence of antisemitism and anti-Israel bias, and formulate School-specific remedies.

In considering curriculum and instruction within Harvard College, our Task Force recognized that students are not currently offered a sufficiently robust set of courses on Israel, the Israeli-Palestinian conflict, the wider Middle East, and conflict resolution. As a result, student views and debates on these topics often do not seem grounded in established facts, rigorous scholarship, and adequately considered perspectives. To correct this gap, we recommend the following:

- **Create opportunities for students to engage in a more comprehensive course of study on Israel and the Palestinians, Jewish Studies, and Peace and Conflict Studies.** Specifically, Harvard College should ensure that undergraduate students have substantially more opportunities to learn about antisemitism, Jewish history and culture, the history and politics of Israel, Zionism, and the Israeli-Palestinian conflict. To fulfill the College's mission of preparing "citizen leaders," students should have access to a series of courses—both large lecture courses (such as General Education courses) and small seminars—taught by a range of faculty. This will enable them to build deep content knowledge in these areas and shape their own informed viewpoints on these complex topics. The team implementing this recommendation should consider the following possibilities:
  - Hiring new faculty, potentially through a cluster hire to recruit a diverse range of faculty with differing views and methodologies.
  - Developing interdisciplinary courses, with some potentially counting towards the College's newly offered Certificate for Civic Engagement[615] or fulfilling requirements towards a secondary concentration.
  - Creating relevant research opportunities for students both by working as research assistants for faculty and through developing original projects.
  - Providing funds for practice-based opportunities, such as internships and shadowing opportunities, during the winter and summer terms and in the year following graduation.
  - Developing and funding travel opportunities for diverse groups of faculty and students through which they can build community, learn about complex situations, and engage in concrete community improvement projects.
- **Create opportunities for students to build skills in peace building and conflict resolution, utilizing the resources and expertise of University centers of excellence such as the Program on Negotiation at Harvard Law School.**
- **Fill the vacant positions at Harvard's Center for Jewish Studies (CJS).** CJS plays a vital role in teaching the history, religion, and culture of Jews from antiquity to the present. Unfortunately, due to recent and imminent departures and retirements in the Faculty of Arts and Sciences' Department of Near Eastern Languages and Civilizations and in Harvard Divinity School, CJS will lose five out of its seven core, ladder-faculty instructional staff. It is vital to refill these positions, all funded via endowed chairs, as quickly as possible.
- **In addition to the College, curricular attention to Judaism is urgently needed in multiple graduate and professional Schools.** Harvard Law School's Julis-Rabinowitz Program on Jewish and Israeli Law serves

[615] https://oue.fas.harvard.edu/certificate-civic-engagement

as a successful example of how education on Judaism can advance both the mission of a professional school and foster a student body that is more informed about issues that may contribute to antisemitism and manifestations of it. Although aspects of Harvard Divinity School's academic programs require significant reform, as outlined in Chapter 4, HDS could become a key player in constructing a healthy approach to the study of Judaism and Jewish civilization. A Jewish Ministry initiative, modeled after the successful model of the Buddhist Ministry Initiative,[616] could benefit students seeking to study Judaism within the larger context of world religion and prepare for leadership in Jewish communities beyond rabbinic ordination. Such an initiative could help address long-standing curricular deficits.

- We urge Harvard Divinity School to consider whether the addition of a ladder faculty member who writes and teaches in the mainstream of the modern American Jewish community would provide a voice that is missing on their campus. Such an addition could contribute to ensuring that the richness and diversity of the modern American Jewish mainstream are fully represented within the HDS community.

THE STUDY OF ISRAEL/PALESTINE

Both Task Forces agree on the need for more classroom instruction about Israel/Palestine and the Israeli-Palestinian conflict. The challenge is how to teach these subjects in ways that bridge rather than exacerbate political and emotional divisions. We must strive to avoid a situation (that has developed at other universities, including peer schools) where "Palestine Studies" becomes an instrument of faculty and student advocacy. Similarly, we must resist pressures for teaching about modern Israel as a defense against the country's critics. We urge avoiding having dueling courses taught from a Palestinian or Israeli "perspective" in which instructors hold fast to the identities of their subjects of study, and students are called upon to do the same.

Mindful of the fact that administrators at Harvard and other universities may read this, we wish to elaborate on this point. One of us has written on it at length, pointing out that scholars of "Israel Studies" and "Palestine Studies" often rely on different sources, methods, and approaches, which are best situated in conversation with one another as opposed to apart:[617]

> Scholars who work on Israel/Palestine must decide, therefore, if it is their responsibility to engage in overt political advocacy, to cloak that advocacy under a pretense to Weberian neutrality, or to aspire to neutrality even if it is impossible to attain. They must decide whether "civility," that is, rational, respectful, and courteous conversation, is a relic from a bygone era, a screen for the concealment and maintenance of hegemony, or if it has continuing value as a means of fostering constructive communication with an often angry and fearful public. I believe that unlike the realms of political discourse and public opinion (now expressed via limitless and unchecked access to the internet), academic conversation about Israel/Palestine can and should refract, rather than reflect, the conflict. To continue with the optical metaphor, an academic field of Israel/Palestine studies can help not only scholars and students, but also a broad, global public, see the area in a new light.

We acknowledge that the demands that teaching about Israel/Palestine places upon an instructor — ideally, a mastery of Arabic and Hebrew and a thorough knowledge of the history and politics of the Middle Eastern and the Jewish world — are great, and that even the most rigorous of scholars are situated in a subject-position that may carry with it bias and selectivity (even if unconscious). We therefore recommend that whenever possible introductory courses on Israel/Palestine be co-taught, as has been done, with considerable success, at Dartmouth.[618]

[618] Bernard Avishai, "Co-Teaching a Class on Israel and Palestine," *The New Yorker,* February 2, 2024. Accessed December 9, 2024.

One of us is teaching a course on the history of Israel/Palestine at Harvard in the Spring 2025 semester and, in the absence of a co-teacher, brings together sources that might be found in a Palestinian Studies course along with sources that might be found in its Israel Studies counterpart for each week: for example, comparing the post-1967 Israeli settlement movement with its effect upon the Palestinians in the West Bank by juxtaposing texts produced during the 1970s by activists in the Bloc of the Faithful movement with Sahar Khalifa's novel *Wild Thorns*.

THE STUDY OF ANTISEMITISM

The 2023-24 academic year, especially in the aftermath of October 7th, witnessed an unprecedented surge in reports of antisemitism, both at Harvard and around the globe. Harvard is well equipped to play a crucial role in combating antisemitism in many ways, with research being one of the most obvious. We urge Harvard to become a hub for antisemitism research by establishing a dedicated research project, ideally by appointing a globally renowned expert in the social scientific study of antisemitism to the faculty at a Harvard School, such as the Harvard Kennedy School of Government. This person could lead a robust program of research, teaching, mentoring graduate students and post-doctoral fellows, and fostering and invigorating the social scientific study of antisemitism while promoting scientific excellence in the field. This individual should be encouraged to cultivate ties with recently established centers for the study of antisemitism at the University of Michigan and New York University, as well as long-standing centers for antisemitism research in Israel, the United Kingdom, Germany, and other countries.

Co-Curricular Activities and Residential Life

Much of student life takes place outside of Harvard's classrooms — in clubs, dormitories, and residential houses, in various kinds of affinity spaces, and on social media. In academic year 2023-24, such venues were the sites of some of the most painful reported instances of antisemitism and anti-Israeli bias. We heard accounts of some Jewish and Israeli students feeling pressured to renounce Israel or risk significant social penalties, including the loss of friends, rejections from clubs, exclusion from social activities, and more.

While Harvard's Schools cannot force students to be friends with each other, they can and should establish rules and norms that aim at discouraging social exclusion based on religion or national origin. Toward this end, we recommend that each School implement the following:

- **Review, revise, if necessary, implement, and enforce responsible policies regarding student organizations.** This should complement the ethos of pluralism that Schools seek to cultivate. Specifically, we recommend that relevant administrators in each School:
  - Review and reinforce compliance with non-discrimination policies that govern all student organizations that are officially recognized by their respective Schools. Organizations failing to comply should not be allowed to operate on University property or use Harvard's name or resources.
  - Take appropriate action against unrecognized student organizations that "piggyback" on recognized groups to take advantage of privileges and resources that would otherwise be unavailable to them.
  - Ensure that the activities of recognized student organizations reflect the organizations' stated purpose and scope. The Task Force believes Harvard's student civil society only works if recognized organizations provide opportunities for connecting across common interests and affinities, mindful of the fact that it is highly desirable for members of the chess club, for example, to disagree on questions outside of the value of playing chess with their fellow Harvard students.
- **Mandate special training, if it has not been already, for students tasked with promoting diversity, equity, and inclusion within their respective student organizations.** This training should ensure alignment between efforts to promote inclusion and the University's Values Statement.

HHSHarv_00000341

- **For the co-curricular life of each of Harvard's Schools, adopt the measures recommended by the Joint Task Force Subcommittee on Pluralism.** Despite commendable recent efforts to promote dialogue between Jewish and Muslim students, these initiatives appear underattended. It is our understanding that the current campus climate can sometimes mean Arab and Muslim students who engage with Israeli students experience negative social repercussions, including shunning and alienation from their friends and social groups. For example, we are aware of disturbing accounts of bullying of Palestinians who merely showed an openness to dialogue. We believe that this kind of behavior should be combated, just as we believe work needs to be done to bridge differences among Jews with varying views on Israel. According to student organizers we spoke with who have facilitated small group discussions between Jewish and Arab students, there are Muslim and Arab students open to such engagement, but the prevailing campus culture discourages their involvement. We endorse the following measures recommended by the Joint Subcommittee:
  - Foster a series of prominent, public, civil, and reasoned debates on contentious geopolitical matters. These events should model respectful disagreement and include speakers representing a wide array of viewpoints, including prominent pro-Israeli leaders.
  - Recognize and support student leaders who make the peer-to-peer case for dialogue and inclusion, speak out against exclusionary practices like shunning, and strive to build bridges across differences. This could include awards, fellowships, and highlighting these students in appropriate events. Ensure these student leaders are committed to promoting civil discourse across differences, not solely within a particular group.
  - Establish a dedicated group of faculty members and administrators to support dialogue efforts between Muslim, Arab, and Palestinian students and their Jewish and Israeli peers. This group would actively encourage participation and promote a culture that values and supports these meaningful interactions.

We also recommend:

- **Formally recognize and celebrate staff and faculty who make substantial contributions to fostering constructive dialogue across differences within Harvard's academic community.**
- **Develop an assortment of grants, fellowships, and programs dedicated to studying campus culture and the Israeli-Palestinian conflict.** This might include grants for study and internships in Israel and other Middle Eastern countries.
- **At Harvard College, take specific steps to enhance aspects of its residential system, comprising both dorms in the Yard for first-year students and the Houses for upper-level students, which many regard as the hearth and home of the College community.** The steps outlined in the next set of bullets are intended to renew a sense of shared community and to counter tendencies towards demonization and division.
- **Staff involved in the undergraduate student housing system, including various deans, proctors, tutors, and others, should operate as a more collaborative and unified team, supported by stronger leadership from University Hall.** In particular, we recommend:
  - Improved orientation and regular in-service training should be implemented for all residential personnel in the Yard and the Houses. The goal should be ensuring they are equipped to foster engagement across a variety of differences, including national origin, viewpoint, and identity along multiple dimensions. This is especially crucial for faculty deans, who ultimately bear responsibility for the climate and culture of their individual Houses and oversee both staff and budgets.

- Best practices for cultivating a constructive ethos of pluralism within the housing system should be identified and disseminated, with a particular emphasis on how these practices can support and reinforce a similar ethos in academic settings.

While we commend Harvard College's current efforts to promote intellectual vitality, we caution that this focus on intellectual vitality in general should not overshadow the need for College leaders to address antisemitism and anti-Israeli bias directly. Educating students about intellectual vitality in orientation programs, for example, does not eliminate the need to educate them about matters like the Israeli-Palestinian conflict or the history of antisemitism. Similarly, conducting intellectual vitality training during orientation does not negate the need for antisemitism training.

Building a Pluralistic Community

In a joint effort between the two Task Forces, the Pluralism Subcommittee examined the resources that exist at Harvard for interfaith engagements, interdisciplinary collaborations, religious literacy, and community building, including the arts, as well as examine new resources, structures, and/or practices.

The focus was on promoting a culture of pluralism, defined as recognizing the diversity of identities and ideologies on campus, respecting, relating, and cooperating with one another, and connecting personal and campus civic values to advance our educational and research mission. These campus civic values are anchored in the University's Values Statement focused on advancing respect for the rights, differences, and dignity of others; honesty and integrity in all dealings; conscientious pursuit of excellence in our work; accountability for actions and conduct in the community; and responsibility for the bonds and bridges that enable all to grow with and learn from one another.

A broad focus on pluralism will ultimately be foundational to ensuring the experience of inclusion and belonging on our campus for members of Muslim, Arab, and Palestinian communities, and their allies. At the same time, we wish to underscore that it is crucial not to overlook the specific forms of hate and bias that the two anti-bias Task Forces are committed to addressing, including anti-Muslim, anti-Arab, anti-Palestinian sentiments, as well as antisemitism and anti-Israel biases. Directly confronting these particular issues by advancing a pluralism agenda ensures that our efforts are impactful and resonate with the experiences of those most affected, fostering a truly inclusive environment.

While the full report of the Joint Subcommittee is included in Appendix 3, here we note one of the main recommendations, which our full Task Force endorses as well:

- **Establish an institutional anchor for practices of pluralism on campus.**

  There is a need for a central hub for pluralism efforts on campus — to anchor the practices of the University around a commitment to pluralism, and to engage all members of our campus community in exploring, embracing, and bringing our University values to life across a variety of contexts — from orientation and onboarding to interdisciplinary exchanges and language learning, to interfaith experiences, student life, and the arts on campus.

  Though the University will need to determine the appropriate approach to implementation, the Joint Subcommittee report details two possible options: expanding the Harvard Foundation into the Harvard Foundation for Pluralism or creating a new University-wide Center for Pluralism that incorporates the Harvard Foundation, which would continue to be College-facing, as a program. Many other entities also work in these areas and the specific value-add of a Reimagined Harvard Foundation/Center for Pluralism would be to connect the academic enterprise of the University, along with campus expertise on issues of inclusion, belonging, and pluralism, to the administrative enterprise that fulfills these functions. As the University considers the design of the Reimagined Harvard Foundation/Center for Pluralism, three key principles are essential for success: faculty leadership,

HHSHarv_00000343

collaboration with OEDIB and other diversity offices on campus, and a strong staffing structure to support cross-functional work.

A Reimagined Harvard Foundation/Center for Pluralism should develop and implement programs that reinforce pluralism. For example, the Center/Foundation could support:

- a fellowship program for students;
- a campus awards program for students who lead in advancing a culture of pluralism on campus;
- engaging faculty with expertise in pluralism and connected subject areas to develop trainings and professional development opportunities for the campus;
- mediation resources for conflicts that involve issues of pluralism; and
- the work of OEDIB and School-specific Diversity, Inclusion, and Belonging offices to cultivate a campus-wide network of expertise on pluralism that all Schools could tap into in a shared way.

This Reimagined Center, in partnership with OEDIB, could also lead the Harvard Culture Collaborative, fostering faculty-staff partnerships to enhance research and learning in support of inclusion and belonging grounded in a commitment to pluralism. Several of the Task Force recommendations laid out above might also be advanced via this vehicle, including the development of new intellectual exchanges and innovative trainings.

The Task Force discussed the merits and potential challenges of using the Harvard Foundation as the hub for University-wide pluralism efforts. A detailed examination of these issues is warranted, as exploring these complexities was beyond the Task Force's remit. The Harvard Foundation currently focuses on undergraduate students, and there is a proposal to transform it into a Harvard Foundation/Center for Pluralism that serves the entire campus community, while preserving and indeed strengthening the current mandate of the Harvard Foundation. The Joint Subcommittee suggests structuring this Reimagined Harvard Foundation/Center for Pluralism as a School-based entity for easier integration with the University's mission. The Joint Subcommittee recommends significant investment from the Office of the President and Provost, as well as School deans, to establish faculty leadership and anchor pluralism practices across the campus.

Religious Life

In the wake of the traumatic of the October 7th attacks and the heightened tensions of the 2023-24 academic year, many Jewish students sought solace and support within Harvard's Jewish community, primarily centered around Harvard Hillel and Harvard Chabad. However, the events of academic year 2023-24 also exposed longstanding challenges and unmet needs within Jewish life, and indeed within religious life more broadly, at Harvard.

The Task Force's impression is that many faith communities at Harvard tend to be fragmented and internally divided, and that they engage in limited dialogue with one another.

While Harvard does not gather statistics on the religious affiliation of its students, several factors lead the Task Force to believe that the number of Jewish students may have decreased in recent decades. This apparent decline has made it increasingly challenging, across religious denominations of Judaism (e.g., Conservative, Orthodox, Reform), and in various areas of Jewish cultural life, to achieve the requisite quorum of peers required to hold certain religious and cultural Jewish activities, potentially affecting students' ability to experience and explore the richness of Jewish heritage and life.

In several listening sessions, non- and anti-Zionist Jewish students told us that they do not feel welcome at Hillel or Chabad.

Clearly, Harvard is missing opportunities to make religious life on campus a greater source of support and an integral part of the learning community we desire. To tap such opportunities, we recommend the following:

- Connect the Harvard Chaplains better with the residential system of Harvard College, so that students experiencing spiritual distress and isolation can more easily find support.
- Urge admissions leaders to consider applicants of all faiths who have played faith-based leadership roles in the past, including those who have shown an ability to build bridges across faiths. Admissions practices cannot favor certain applicants based on their religion, but they can consider faith-based leadership experience in the way they consider other kinds of leadership experience.
- Ensure that all personnel who teach and advise students are apprised of Harvard policies regarding reasonable accommodations when religious observances conflict with the academic calendar and the scheduled assignments and exams of individual courses. Such policies should not only fulfill statutory requirements but also meet a standard of inclusion. Students should be guided and supported in making appropriate arrangements with their instructors in such circumstances, and faculty should be receptive to requests for such accommodation. Calendars of religious observances, with brief descriptions of the practices and restrictions germane to each observance, should be made easily available, to consult when religious accommodation is requested.
- Create an Office of Religious, Ethical, and Spiritual Life, as described in the Subcommittee Report on Pluralism.

Administrative Infrastructure

The steps recommended above, while comprehensive, will only effectively take root and improve student life if the University, both centrally and within its individual Schools, ensures the administrative infrastructure is in place to support, coordinate, and sustain these efforts over the long term. To that end, the Task Force recommends that the University's leadership and the leadership of each School take the following concrete actions:

- **Include in the Office of Equity, Diversity, Inclusion, and Belonging (OEDIB), or another appropriate office in the Central Administration, a dedicated team member specifically tasked with addressing antisemitism and anti-Israel bias.** This individual should possess relevant training and experience regarding Jewish and Israeli identity and culture. Their responsibilities should include:
  - Serving as a readily accessible point of contact for receiving concerns about antisemitism and anti-Israeli bias and overseeing cases from initial complaint to resolution.
  - Providing direct support to students experiencing antisemitism or anti-Israeli bias as they navigate the complaint process, which can be emotionally challenging.
  - Collaborating proactively with other administrators across the University to ensure the inclusion and belonging of Jewish and Israeli students.
  - Engaging with Jewish, Israeli, and pro-Israeli students across Harvard's Schools, offering guidance and support to those who may be navigating a range of challenges, including experiences of shunning, alienation, and discrimination.
  - Working proactively to repair the distrust between many members of Harvard's Israeli and Jewish community and the OEDIB.
  - Staying abreast of antisemitism resources best practices from other institutions and organizations.
  - Developing and providing trainings to Schools, departments, administrative units, and campus groups on recognizing and addressing antisemitism and anti-Israeli bias.

  - Offering consultation and support to staff members across the University responding to concerns related to antisemitism and anti-Israeli bias.
  - Engage with deans, faculty, the Office of the President and Provost, the Office of the General Counsel, and OEDIB colleagues, to provide relevant insights and perspectives informed by Jewish culture, history, and community, particularly regarding emerging issues.

- **The University should explicitly acknowledge and address in an appropriate way that many Israeli and pro-Israeli students at Harvard have experienced shunning, alienation, social isolation, and discrimination from some of their peers, professors, and administrators on campus.** Harvard must unequivocally state that such behavior is unacceptable and fails to meet the expectations for the behavior of Harvard community members. Recognizing the intolerable reality faced by Israeli students is an essential first step toward fostering meaningful change and creating a truly inclusive environment.
- **Constitute in each School of the University a student-faculty-administration Working Group on Campus Culture to monitor and discuss situations that threaten the welfare and core functions of the learning community, to pursue ways of addressing and ameliorating such situations, and to act to improve campus community.** A responsibility of this group should include transforming campus culture by translating University norms into student activities and programming. These groups should represent diverse ethnic, religious, and political communities on campus, including Jewish, Israeli, Arab, and Muslim students, as well as leading administrators, and they should be funded to foster and support student initiatives toward a collegial and hospitable learning environment, including relevant high-profile events and culture-building activities. These groups should convene together periodically to report on challenges and successes and to learn best practices. They are intended to guide and catalyze the long-term development of campus culture, not to respond immediately to specific incidents.
- **Orient those in positions of advising students to the proper practices for reporting incidents.** Ensure that students know who to approach with concerns, and that those designated people know how to guide students on reporting, and how to follow up to make sure that students are apprised of responses to their reports, even when it may not be possible for legal reasons to disclose some details.
- **Launch a University Task Force of faculty, staff, and student leaders to tackle the special challenges of social media.** Social media sites, especially the anonymous Sidechat, have been the venues of particularly vicious displays of antisemitism and anti-Israel bias, as well as other biases. Conflicts among students are often full-blown and factionalized online before involved students have had a chance to interact on the matters at hand "IRL" (in real life).
- **Hold accountable any administrators, faculty, teaching staff, or advisors who encourage violations of rules that undermine the learning environment.**
- **Ensure, regarding all the efforts recommended in this document, that there be a clear locus of responsibility and accountability, metrics, ongoing measurement, and public reporting.**

In addition, the two anti-bias Task Forces jointly call for regular, in-depth demographic research and surveys on the sense of safety and well-being among Harvard community members. These efforts should prioritize, but not be limited to, groups who have historically faced challenges in expressing themselves and finding safety and belonging at Harvard, recognizing that these groups may evolve over time. In this regard, we specifically recommend:

- **Enhance regular University-wide Pulse surveys to assess the experiences of students, staff, and faculty, providing them a platform to voice concerns, suggest improvements, and propose additional areas of exploration.** Integrate a mechanism for community feedback on the survey itself, including suggestions for questions related to relevant concepts such as antisemitism and bias against Israelis, Muslims, Arabs, and Palestinians, and emerging trends.

- **To complement survey data and address potential limitations like response rates and survey fatigue, enhance the University's capacity to analyze existing administrative data, such as course enrollment, dropout rates, and other routine student touchpoints.** This analysis should be conducted with strict adherence to privacy policies (e.g., FERPA) and could be centralized within the University's Office of Institutional Research and potentially involve relevant faculty, researchers, and staff in coordination with Harvard's Central Administration and the various Schools.

Protest, Complaints, and Discipline

PROTEST

This report has stressed the need for Harvard to foster an inclusive campus environment where members of our pluralistic community engage with each other respectfully and appreciate perspectives different from our own. Those differences might be stark and, in the case of contentious issues like Israel/Palestine, fraught. At times, members of our community will choose to communicate their views on such issues through public protest. Public protest is no less legitimate a form of speech than private conversation or in-class discussion. Protest can effectively communicate to our community the gravity and urgent need for action that some of our members attribute to a current crisis, either within Harvard or beyond.

Like any other form of speech, protest must operate within certain guidelines. Freedom of speech does not justify harassment, bullying, or intimidation by one student toward another, nor does it justify unprofessional conduct by an instructor towards a student due to their political views, national origin, or religion. Protest must not disrupt the normal operations of the University, including conducting classes and providing unrestricted access to the libraries and other campus buildings.

The University has already taken steps to revise and strengthen its protest policies. In January 2024, President Garber and the deans of the University's Schools issued "Guidance on Protest and Dissent" clarifying the relevance of the University's 1970 Statement on Rights and Responsibilities to current protests. (This new document prohibited, among other things, certain indoor protests.) In August 2024, the University established additional policies prohibiting unauthorized outdoor camping and excessive noise on campus property, addressing concerns stemming from the Spring 2024 encampment and other disruptive demonstrations held during the 2023-24 academic year. These policies now in place, we feel, provide substance to the concept of time, place, and manner that has long prevailed in determining the limits of free speech in the United States.

Moving forward, however, the University faces challenges in proactively establishing limits on protest rather than making ad hoc determinations during protest events. While we do not recommend proactively prohibiting the use of certain words, phrases, or symbols, we do recommend that the University prohibit the masking of faces at protests. Such a prohibition will enable the Harvard University Police Department to maintain order at public gatherings and identify individuals who may be violating University policies. Similarly, to ensure the maintenance of the University's normal operations, we urge strict adherence to the existing prohibition against unauthorized and last-minute protests.

While unauthorized or disruptive protests are perhaps the most visible manifestation of policy violations, they should not overshadow the accounts in this report describing students' experiences of bullying, exclusion, and intimidation based on national origin or political views regarding Zionism and Israel. As noted in our June 2024 Preliminary Recommendations, students alleging such mistreatment have expressed concerns about a "lack of transparency, clarity, and clear process for the submission of complaints of antisemitic or otherwise hostile behavior."

COMPLAINTS

In addressing concerns about the complaint process, the Task Force acknowledges that Harvard's Non-Discrimination and Anti-Bullying (NDAB) policy was only implemented in September 2023. When the October 7th attack triggered a variety of events on campus, there had been no opportunity to assess how the new NDAB policy would interact with the other policies already in place within individual Schools. This unprecedented pressure test of a nascent system revealed, in our view, some fundamental flaws in its design, which we highlight here and believe require rectification. Importantly, by introducing significant confusion into the process, the implementation of NDAB may well have undermined what had been more stable processes under the previous system of administrative boards, which are responsible for handling disciplinary matters at the various Schools.

Both anti-bias Task Forces, in their preliminary recommendations, called for clear and transparent policies on protests, bias, and discrimination that would be consistent across the University and clearly communicated to all. Based on our Task Force's subsequent work, we offer the following additional recommendations.

- **The University's Office of Community Conduct (OCC) needs to clarify for the Harvard community that it is the University's Title VI office and is responsible for administering the University's Title VI compliance.** That clarification would need to include:
  - Clarifying that NDAB (the policy the OCC administers) is aligned with Title VI; or adjusting NDAB to improve alignment, if necessary, presumably by adding a venue for complaints with no clear perpetrator, and for complaints that can be made anonymously; or by adding an additional and specifically Title VI policy alongside NDAB.
  - Ensuring personnel who are employed in central offices and available across the University understand antisemitism; including ensuring improved training as well as cross-training across Schools to support development of shared understandings.
  - Better communicating the availability of those personnel and the entry points for access to them to the community.
- **As the University's Title VI office, the Office of Community Conduct should work to improve complaint processes, including the following improvements:**
  - Clear user-facing communications are needed to help people understand the different entry points into an incident reporting process, as well as the differences among different modes of reporting an incident and the differences between informal and formal processes.
  - User-facing communications should give students clear instructions as to where and how to file complaints.
  - Students should be updated as much as possible on the status of complaints.
  - Substantial consistency across Schools in both process and available sanctions, with School-specific alterations being kept to a minimum, including, at a minimum, bringing together administrators from across Schools to develop shared policy understanding, as well as exploring a transition from having separate handbooks and codes of conduct in every School to having a University-wide handbook with School-specific addenda.
- **Each School should consider appointing a specific faculty or staff member at each unit who is a navigator to assist students with making complaints.** This individual would be different from the Local Designated Resource (LDR) and would have no responsibility for judging whether a complaint should be dismissed, nor for determining whether a complaint falls under non-discrimination or bullying. The current system puts the LDR in the position of both advisor and judge, and this is a conflict of roles that needs to be corrected. The navigator would advise students where and how to file

complaints and provide updating. This would reduce confusion and allow students to feel heard, even if the substantive outcome is not to their liking. The navigator would support the LDR in the first phase of NDAB of connecting the complaining student and others involved to mediation or other informal resolution practices.

- **The University should initiate regular review of protest policies and complaint processes:**
  - Assess effectiveness, analyze enforcement trends, identify issues, and ensure alignment with evolving community needs.
  - Include feedback from frontline staff and the broader Harvard community.
  - Institute a process of regular review that is attached to a stable University-wide governance mechanism and includes faculty.
- **The University should aim to set a field standard for comparable reporting on the volume of complaints and the percentage that is resolved through mediation or other practices and the percentage that moves on to formal grievance filing or an administrative board proceeding.** This standard could parallel that for the Clery Act, which requires colleges and universities to report annually on sexual assault cases in aggregate. This reporting should include categories of sanctioned behavior as part of educating the campus about which actions are judged to be violations of NDAB.
- **The NDAB process needs to include a channel for reporting on incidents and patterns to University leadership even when no formal grievance is filed.**
- **There is a need for a channel through which complaints can be made anonymously, to protect a complainant from retaliation, and still reach University-level leaders.**

Improving the University's policies and procedures in the manner laid out above is in the best interests of the many Jewish, Israeli, Arab, Muslim, Palestinian, and pro-Palestinian community members negatively affected by these processes. It is also in the best interests of the staff and administrators of this university who are responsible for these policies. And it will certainly be necessary for the health of the Harvard community generally over the long term.

DISCIPLINE

While complaint resolution can take many forms, including voluntary mediation and other steps that fall short of punitive discipline, disciplinary action must remain a viable option. Yet, as discussed in our June 2024 Preliminary Recommendations, significant inconsistencies seem to exist in the policies and procedures of administrative boards and other disciplinary bodies across the University's various Schools. This has resulted in apparent disparities in the handling of disciplinary cases.

Therefore, the Task Force urges the University to establish clearer communication channels and strive for greater consistency in disciplinary procedures across its constituent Schools. We view the July 2024 announcement that the University Committee on Rights and Responsibilities[619] would use standardized fact-finding procedures for disciplinary cases involving multiple Schools as a positive step. However, this should be the beginning of a broader reform process encompassing the individual Schools' Administrative Boards and the interactions between them. The process should start with a University-wide committee of representatives from each School, tasked with comparing the Boards' remit, composition, operating procedures, and outcomes. The committee's objective should be recommending ways to achieve an optimal level of equalization and standardization across the Administrative Boards. Achieving this will help the University restore trust with many members of the Harvard community who want assurance that students who violate Harvard's policies will be treated fairly and equitably, with disciplinary consequences

[619] https://www.harvard.edu/president/news/2024/update-on-university-rights-and-responsibilities/

commensurate with the gravity of their infractions. To further restore trust, we recommend that the University — to the extent legally possible — provide an annual account, in an aggregated and anonymized form, of disciplinary cases University-wide, including the number and types of cases and their outcomes. Importantly, faculty should play a significant role on this committee, helping to address the information gaps that currently seem to hinder their ability to understand and engage with University policies and effectively mentor students.

When policies are on the books, they must be enforced consistently and impartially across all parts of the University to avoid even the appearance of institutional bias in their application. Uneven enforcement can feel arbitrary or selectively repressive to those who face disciplinary action, rather than a simple consequence of deciding to break a rule. This problem is further compounded by a lack of clarity and understanding surrounding these policies and their enforcement, a challenge that was particularly evident to us on the Longwood campus.

B. Governance Changes

In the course of our work, we encountered several surprising issues related to University governance, some detailed in Chapter 4. These issues included:

- Evident gaps in faculty and administrative governance, significantly degrading the academic programs in certain areas of the University and creating potential legal liability for the institution.
- Staff leading significant academic programs with insufficient oversight from the ladder faculty.
- Concerning performance of a small, but not insignificant, number of Harvard's teaching faculty.

To address these issues, we offer the following recommendations:

- **The President and Provost, either acting independently or with the counsel of a faculty advisory group, should establish a set of uniform standards for all Harvard academic programs, such as centers, institutes, and study abroad programs.** These standards should consider factors such as:
  - Requiring a faculty director, who is a responsible tenured member of the ladder faculty, to oversee all activities of such programs.
  - Establishing best practices for oversight boards of such programs.
  - Establishing best practices for visiting affiliations and appointments.

We were surprised to encounter significant academic programs that lacked any involvement from the ladder faculty, and we think as a nearly hard rule that the University should avoid creating programs like these in the future. We understand that this rule will not apply evenly across the University and that there are places and programs that can be run with the supervision of a dean's office and with the excellent staff and regular non-ladder faculty we can recruit. However, we think in general it is best to have oversight from ladder faculty with relevant expertise, and to the extent an activity is outside the scope of the expertise that exists at Harvard, it is an opportunity to think about adding skills and expertise to the faculty or, alternatively, admitting that we are not well-positioned to run a particular program, which is a healthy response, as we cannot do everything.

To the extent Harvard has expertise, and those experts are unwilling to commit the amount of time needed for meaningful and real supervision of a program, we may not be able run a proposed program with the necessary integrity. The right consequence of such a scenario would be to focus on other ventures as opposed to inviting faculty from other universities to supervise on an ad hoc basis.

We must avoid allowing staff and non-ladder faculty to create partisan projects on our letterhead, which degrades the brand and reputation of the University and is completely out of scope with our mission.

Importantly, at any given time, different Harvard Schools are capable of doing different things. Harvard is an institution that takes expertise very seriously, which is why we were surprised to find programs deeply outside the scope of a given faculty's expertise. When we found those programs, they often failed to operate at the same level of excellence as the activities within the core body of knowledge of the Harvard unit. We would do much better to partner with one another to create interdisciplinary programs than to hire non-ladder faculty to add expertise to a unit that would not merit a tenured appointment in the discipline.

The Task Force also believes the University should generally avoid partisan programs of instruction that seem aimed at training students to take sides on contested issues. While our scope did not permit extensive discussions with faculty across all units regarding the perceived instances of partisanship, those faculty members we did speak with were often shocked and unaware of the current climate — we particularly found this to be the case in discussions at Harvard Medical School. Many HMS faculty noted a significant shift towards a more politicized educational environment compared to their own training experiences.

It was especially strange to observe the following pattern. All Harvard Schools have rules regarding the time, place, and manner of permitted protest and are charged with administering those rules. But in some places in the University, we found programs of instruction that teach students to engage in disruptive protest. In effect, in some quarters — and not the majority, we should add — we found a deep tension at the heart of how we operate. It is thoroughly understandable that, when Harvard did enforce rules against some of those students, the students felt betrayed.

We also recommend increased oversight over Harvard-branded content. We find it particularly concerning that the two programs we found most problematic — the Palestine Program at the Harvard Chan School and RPL at HDS — also have recent journal publications authored by their organizers, who described their pedagogical approaches and promote their activities under the Harvard name and brand.

We believe the activities we identified in Chapter 4 present urgent brand and reputation concerns that imperil the University's pre-eminence and require immediate action.

- **Improve the incentives that Harvard's faculties have to monitor academic programs.** We observe that in some cases, when a Harvard School receives a grant or a donation to fund a program, the program quickly takes on a life of its own, growing and hiring staff. Ladder faculty insight is either non-existent or fleeting. Senior administrators appear to either lack the bandwidth to oversee the program or to take a hands-off approach to avoid antagonizing staff who have relationships with donors or students.

  To address problems like this, we urge the University to consider implementing a system of accountability where costs are assigned to Schools that fail to adequately supervise programs and other activities under their purview. This system should align with the best practices that are subject of the prior recommendations in this section on Governance Changes. Currently, incentives for diligent oversight appear weak and ineffective. By establishing clear lines of responsibility and consequences for inadequate supervision, the University can mitigate potential risks with certain programs and other activities across its Schools.

OUR CHARGE TO THE UNIVERSITY

The task of researching and writing this report has been profoundly challenging, as all involved care deeply about Harvard University. Our work has required us to examine situations where aspects of the Harvard community have broken down, resulting in deeply troubling experiences for many students, faculty, and staff. Too often, we heard these experiences reflect prejudice and intolerance based on individuals' identities, nationalities, and religious commitments. We have encountered places and instances where Harvard has fallen far short of the stated values it aspires to uphold.

Yet, throughout this process, we have also witnessed the potential for a better Harvard, the Harvard we cherish. The University's renown rests not only on its history, the many contributions of its graduates to the wider world, or the individual achievements of its faculty and students. Rather, from its vibrant undergraduate residential system to cutting-edge academic programs across the various Schools, Harvard's accomplishments stem from its enduring ability to forge and renew a purposeful community of research, teaching, and learning, strengthened by the rich tapestry of experiences woven by those who have met, learned, and grown together here.

Our work has revealed numerous examples of students, staff, and faculty dedicated to renewing and strengthening the Harvard community. For instance, three Schools highlighted in this report — the Harvard Chan School, HGSE, and HDS — have new deans committed to improving the climate and atmosphere at their Schools. In academic year 2024-25, HDS provided a book by a critical but committed Zionist, Yossi Klein Halevi, to all students, and invited all community members to a conversation with the author. This book provides a voice and a face for Zionists that seemed absent in the Religion and Public Life programming we reviewed, and it pushes back against dehumanization of Israelis. Similarly, the Dean of Harvard Medical School, in his Fall 2024 welcoming remarks to incoming students, powerfully stated, "We leave our politics at the door when we come to the bedside of a patient." In doing so, he reinforced a cornerstone of medical professionalism that we believe needs to be emphasized anew at HMS and in medical education generally.

These examples, encountered even as we have described instances where Harvard has fallen short, demonstrate Harvard's capacity to translate aspirations into action when University leadership and the broader Harvard community work together with shared resolve.

With this capacity in mind, we issue this charge to the University: it is clear to the Task Force that antisemitism and anti-Israel bias have been fomented, practiced, and tolerated not only at Harvard but also within academia more widely. We urge Harvard's leadership, including the president, provost, deans, faculties, and offices of equity, diversity, inclusion, and belonging to become champions in the fight against antisemitism and anti-Israeli bias — first at Harvard, and then as a model for institutions of higher learning everywhere. We further call on Harvard's leaders to combat, with equal resolve, all other forms of prejudice and intolerance, including anti-Muslim, anti-Arab, and anti-Palestinian bias. This charge is made with particular urgency to those Schools that operate in deeply politicized fields, such as medicine, public health, and education.

As a final recommendation, we urge the University to convene a subset of the members of this Task Force to monitor implementation and provide two post-report updates to the public.

We conclude by reflecting on the vital importance of this Task Force's efforts, alongside those of our sibling Task Force focused on anti-Muslim, anti-Arab, and anti-Palestinian bias. In moments when over 1,000 civilians are slaughtered in a single day, when tens of thousands of innocents suffer death and injury in the ensuing conflict, when millions are displaced, and when hostages remain captive — one might question the impact of actions taken within Harvard's leafy quadrangles and serene libraries, half a world away.

We believe such actions matter profoundly because of the model we set for the countless future leaders who pass through Harvard's gates. Harvard could model a world where individuals retreat into echo chambers of the like-minded, where differences are met with shunning and intimidation, and where divisions are amplified. Our students could be conditioned to seek out only those academic and extracurricular pursuits that position them as combatants in pre-existing ideological conflicts.

Yet, Harvard can — and must — model a world where the full spectrum of human talent converges, where engagement across profound differences is the norm, and where those very differences become wellsprings of creativity and imagination propelling progress on humanity's most pressing challenges.

It is our conviction that Harvard possesses both the capacity and the responsibility to provide this latter model. It is our hope that the actions recommended in this report, in concert with the recommendations of our sibling Task Force, will help illuminate the path forward.

Harvard, like the country and world it serves, is in need of profound repair. We must dedicate ourselves to this essential work, and we must do so as a unified and resolute community. Let us begin.

Appendices

Appendix 1: Recent Progress on Addressing Antisemitism and Anti-Israeli Bias Across Harvard

This Appendix provides an overview of some recent initiatives undertaken by Harvard Schools and key offices in the Central Administration since the 2023-24 academic year aimed at addressing antisemitism and anti-Israeli bias. The information presented here is based entirely on self-reports provided by these Schools and offices in response to a request from the Task Force co-chairs.

While the co-chairs acknowledge these reported efforts as important steps and promising signs of growing institutional commitment, several important caveats must be emphasized. The initiatives described are illustrative examples, not an exhaustive list. Furthermore, the Task Force has not independently verified the implementation or effectiveness of these actions. Crucially, their inclusion here does not imply that the significant concerns about antisemitism and anti-Israeli bias detailed elsewhere in the Task Force's report have been resolved or sufficiently addressed.

All that said, the self-reported actions provide important context for the Task Force's recommendations (presented in Chapter 5). Our recommendations seek to build upon this foundation of existing efforts by promoting the systemic change needed to create a truly inclusive and welcoming environment for all members of the Harvard community.

Training on Antisemitism and Anti-Israeli Bias

According to information provided to the Task Force, several Schools have implemented specialized training programs focused specifically on understanding antisemitism, anti-Israeli bias, and related forms of discrimination. These efforts appear aimed at equipping faculty, staff, and student leaders with the knowledge and tools to recognize problematic behaviors and create more inclusive environments.

- The University committed to hiring a new Office for Community Conduct (OCC) employee who will have responsibility for consulting on all complaints of antisemitism and supervising the preparation of the written report of such complaints that will be included in the annual report published by the OCC director.
- All OCC staff involved in reviewing complaints raising allegations of antisemitism will participate in expert training focused on recognizing and combating antisemitism and the IHRA definition of antisemitism.[620]
- Beginning in the 2025-26 academic year, Harvard will push out broadly to the University community training that is focused on recognizing and combating antisemitism. This will be mandatory for students, staff, and members of disciplinary boards.

[620] To be clear, the Task Force did not deliberate on, or endorse, any particular definition of antisemitism. As we mentioned in the Executive Summary, we defined antisemitism through the actual experiences of faculty, staff, and students, not with specific reference to any of the lengthy definitions of antisemitism.

- The University's Office for Equity, Diversity, Inclusion, and Belonging (OEDIB) devoted its annual Inclusion and Belonging Leadership Summit in academic year 2024-25 to the theme of "Committed to " Hate and Bias," with programming addressing antisemitism, anti-Israeli bias, and other forms of bias. Separately, OEDIB also held a moderated panel discussion on Title VI of the Civil Rights Act of 1964 that featured the general counsel from Hillel International and reviewed what is covered under Title VI and the role of universities in addressing incidents of harassment and discrimination.
- OEDIB led development of a series of seven sessions offered across the Harvard campus called "Honoring Our Shared Humanity: Combatting Islamophobia and Antisemitism." Developed through a partnership with Project Shema, the sessions focused on providing practical strategies to combat Islamophobia, antisemitism, and anti-Arab, and anti-Palestinian, and anti-Israeli biases on campus.
- The Harvard Kenneth C. Griffin Graduate School of Arts and Sciences (GSAS) held events in Fall 2024 with Project Shema, a training organization focused on addressing contemporary antisemitism, and earlier in the same year GSAS staff attended Brandeis University's Summer Institute on Countering Antisemitism in Higher Education.
- The Harvard T.H. Chan School of Public Health (Harvard Chan School) co-hosted "Honoring Our Shared Humanity: Combatting Islamophobia and Antisemitism" in October 2024 for the Longwood campus and will be bringing Project Shema to campus for three intensive workshops on antisemitism in the coming months, tailored to the School's administrative leadership, department chairs, students, staff, and faculty.
- Harvard University staff and Harvard College senior leadership and staff participated in multiple training sessions led by Brandeis University's Summer Institute on Antisemitism in Higher Education to deepen their understanding of antisemitism, its historical and contemporary manifestations, and effective strategies for responding to bias incidents.
- The College also organized Project Shema training sessions for residential staff, tutors, proctors, and other College staff to help recognize and challenge antisemitic tropes, equipping them with tools to foster nuanced discussions and a more supportive campus climate.
- The Harvard John A. Paulson School of Engineering and Applied Sciences held two workshops in February 2025 on combating antisemitism and Islamophobia, respectively.
- The Faculty of Arts and Sciences (FAS) has enhanced faculty training on antisemitism, anti-Israeli bias, and classroom climate. The Bok Center Director's remarks at New Faculty Institutes addressed concerns about antisemitism and anti-Israeli bias in classrooms and emphasized keeping personal politics out of teaching. Since the University's Non-Discrimination and Anti-Bullying (NDAB) Policy went into effect in Fall 2023, the FAS Office for Faculty Affairs has conducted 55 trainings for faculty, staff, and academic leadership.
- Harvard Law School (HLS) has begun piloting staff training focused on antisemitism.

Curricular Reviews and Academic Program Development

Schools have reported initiating reviews of their curricula and launching new academic initiatives intended to help ensure programs reflect diverse perspectives and promote inclusive excellence. These efforts include faculty searches in relevant fields, leadership transitions, program evaluations, and development of new academic offerings that address issues of religious and cultural understanding.

- The University has committed to hosting and sponsoring events with the goal of addressing antisemitism and increasing respect for and understanding of Harvard's Jewish and Israeli community members, including:

  - hosting, sponsoring, publicizing, and funding an annual academic symposium on the topic of antisemitism;
  - providing space and financial support for the Louis D. Brandeis Center for Human Rights Under Law to host an annual campus event; and
  - facilitating and funding an event at HKS on Israeli Jewish democracy.
- Harvard has committed to partnering prior to the 2025-26 academic year with an Israeli university (in addition to those in place already) and will offer Harvard students the opportunity to earn academic credit for participating in coursework from this university.
- The Harvard Graduate School of Education (HGSE) is undertaking a comprehensive curricular review entailing a detailed descriptive analysis of the course catalog, on a number of dimensions including enrollment and instructional cost, and are shifting to a content analysis, mapping and analyzing the curriculum by topics, competencies, and pedagogy types, in connection with HGSE's academic mission and commitment to excellence in learning and teaching.
- Harvard Divinity School (HDS) has appointed new leadership for the Religion and Public Life (RPL) program effective July 1, 2025, with the Academic Dean serving as interim director to help with the transition. Additionally, the School appointed a committee of four distinguished scholars from outside Harvard to review the RPL program. The committee will provide an independent evaluation of the program, focusing on academic quality, effectiveness, and alignment with institutional goals.
- HDS is taking steps towards the development of a Jewish Leadership Initiative, akin to the School's longstanding Buddhist Ministry Initiative, to prepare students for service in their congregations, broader communities, and beyond.
- HDS launched faculty searches in Fall 2024 for two positions that correlate strongly with the issues identified in this report: a Professor in Residence in Modern Jewish Studies and tenure-track Professor in Religion, Violence, and Peace.
- Through its Middle East Initiative and other frameworks, Harvard Kennedy School (HKS) currently provides a range of opportunities for students to learn about the Middle East and the Israeli-Palestinian conflict. HKS plans to expand course offerings that engage topics related to the Middle East, religion and politics, and issues of discrimination, including antisemitism and anti-Muslim bias, by searching for qualified adjunct faculty who can create classroom learning environments conducive to constructive conversation about difficult and contentious topics.
- GSAS's Equity, Diversity, Inclusion, and Belonging (EDIB) team is working closely with Harvard Hillel to develop a series of events with an academic focus addressing antisemitism.

Fostering Inclusive Community and Dialogue

In their communications with the Task Force, many Schools described efforts to build a more inclusive campus community, foster dialogue across differences, and cultivate skills for engaging with challenging or contentious issues. Based on these reports, Schools are developing frameworks for respectful discourse, creating spaces for meaningful exchange, and establishing community principles that value pluralism and inclusion.

- In February 2025, President Garber announced the award of four grants from the President's Building Bridges Fund for student-led initiatives focused on building community across faiths, cultures, and backgrounds.
- In October 2024, the Open Inquiry and Constructive Dialogue Working Group released its recommendations, which were accepted by President Garber, on strategies and best practices to

advance open and constructive learning environments including a required teaching module on constructive disagreement.

- In May 2024, following the recommendation of a faculty-led working group, the University adopted a policy on the "Institutional Voice," whereby University leaders will not issue official statements on behalf of the institution on matters of social or political significance that do not directly affect the University's core functions. (The Task Force is hopeful this will end the unproductive lobbying of administrators to issue statements that usually ended up satisfying nobody.)
- HGSE has dedicated resources to a broad effort to foster an inclusive community, led by a workgroup of faculty and administrators. This workgroup has drafted a strategic plan aiming to foster a dynamic campus community that values and promotes authentic dialogue and understanding across differences. The goal is to both leverage and enhance existing expertise across HGSE to ensure community members have the tools and disposition to further embed pluralism into their learning, teaching, research, advising, and field-based work.
- The Harvard Chan School initiated Harvard Chan LEADs (Learn & Engage Across Differences) to strengthen commitment to inclusivity and build capacity for meaningful discourse, including a module at student orientation and ongoing workshops and events.
- The Harvard Chan School is launching a Working Group on Constructive Engagement, with representatives from students, staff, trainees, and faculty. The working group is charged with developing practical recommendations for sustaining healthy pluralism at the School by nurturing an inclusive culture, encouraging open inquiry, and building capacity within all segments of the community to engage respectfully across differences.
- The Harvard Chan School has also created Principles of Citizenship, emphasizing respect and inclusivity, through a School-wide task force with representatives from student, alumni, staff, and academic appointees. It also launched a new Harvard Chan Citizenship Award to recognize students, staff members, and academic appointees who best exemplify the principles.
- HMS has implemented multiple initiatives to advance a culture of respectful discourse. The Dean of the Faculty of Medicine emphasized at White Coat Day that physicians must "leave their politics at the door" in patient care settings. HMS now requires all entering medical students to reflect on the School's Statement of Mutual Respect, supports dialogue series with relevant speakers, and has adjusted professionalism training to focus on tolerance, pluralism, and civil discourse. All master's students attended orientation sessions on civil discourse, while all PhD students developed community agreements for facilitated discussions in a required course.
- HKS has been immersed for several years in a robust "Candid and Constructive Conversations" project following extensive listening sessions, including signature events modeling constructive disagreement, a new online module, workshops during orientations, and facilitated discussions with diverse audiences.
- HKS held a day-long session for faculty to strengthen their capacities for constructive dialogue, including simulated classroom situations where students objected to taking on perspectives they felt were harmful.
- HDS developed programming to encourage dialogue across difference, including a "Community Read" of three books presenting different perspectives on the Israeli-Palestinian conflict.
- The FAS Civil Discourse initiative, launched in December 2023 by the Dean of the Faculty of Arts and Sciences and led by a tenured faculty member from the Government Department represents a long-term, high-profile commitment to fostering an environment of curiosity, ambition, mutual understanding, and achievement for the entire FAS community.

- HLS made restorative practices — facilitated dialogues aimed at repairing harm and rebuilding relationships — available to student group leaders focused on Israel and Gaza and launched a Community Connections Grant Program to encourage small-group discussions, build facilitation skills, and model constructive disagreement.
- In spring 2024, the Edmond and Lily Safra Center for Ethics began engaging in a Center-wide effort to expand its longstanding work on civil discourse, including a new Fellowship in Values Engagement. The Fellowship works with resident tutors to foster intellectual vitality by promoting ethical reflection and a culture of civil disagreement in undergraduate community life.
- In January 2024, Harvard College and PEN America hosted the Intellectual Vitality and Free Expression Student Summit aimed at fostering open, productive communication.

Strengthening Support for Jewish Students and Communities

According to information submitted to the Task Force, several Schools have taken steps to directly support Jewish students and communities through sustained engagement with Jewish organizations, dedicated programming, and regular communication between leadership and community members. These efforts appear aimed at ensuring Jewish students feel welcome, supported, and integrated into the broader campus community while having their specific concerns addressed.

- The University has developed and distributed a resource guide for all students, faculty, and staff to help them recognize and report online harassment. Harvard University Police Department (HUPD), working with Harvard's information security team, has processes in place to receive and act on these reports.
- Harvard has established 24/7 reporting mechanisms to allow community members to report antisemitic incidents anonymously. To directly address any allegations of antisemitism, Harvard has provided specialized resources and training on antisemitism and its manifestation on campus to those who adjudicate complaints under the Non-Discrimination Policy at all Schools.
- The University organized community support sessions led by the counseling team and Harvard's chaplains, which comprise more than 30 faith leaders representing Judaism and several other religions.
- Harvard has deployed additional law enforcement resources to protect Jewish students and ensure the safety of the entire community. Additionally, Harvard has increased coordination between HUPD and local and federal law enforcement to assess and respond to any potential or actual threats to the Harvard community.
- When circumstances warrant, Harvard has restricted access to Harvard Yard (the center of its Cambridge campus) and HMS has restricted access to the Longwood Campus Quadrangle to limit outside disruptions, better manage campus spaces, and ensure student safety.
- The University clarified that its inclusion and belonging efforts must reach all members of its community and has ensured that its "Inclusion and Belonging Student Leadership Council" includes Jewish student representation.
- Harvard leaders attend dinners at Harvard Hillel, Chabad, and other Jewish organizations across our community (both on campus and with alumni and other off-campus groups) to hear concerns and suggestions on improving the campus climate.
- Clinicians and staff from Harvard's Counseling and Mental Health Services (CAMHS) received cultural competency lectures from the then-Campus Rabbi at Harvard Hillel, who was a Harvard Chaplain, to provide a deeper understanding of antisemitism and enable better care for students.

- The University launched a webpage to provide information and guidance for planning events and programs with inclusion in mind, which include a multifaith calendar, a glossary of religious observances, and suggestions for inclusive catering.
- Harvard has committed to dedicating additional academic resources and opportunities to the study of antisemitism and to Hebrew and Judaic studies as a part of the Center for Jewish Studies at Harvard University and the Julis-Rabinowitz Program on Jewish and Israeli Law at Harvard Law School.
- Harvard has committed to issuing an Annual Report for the next 5 years from each Harvard School concerning Harvard's response to discrimination or harassment based on Title VI-protected traits.
- Harvard College held regular weekly meetings with Harvard Hillel to plan events, coordinate vigils, and address emergent concerns related to antisemitism on campus, ensuring Jewish students' perspectives, experiences, and needs were integrated into the College's broader inclusion efforts and students' concerns and issues were addressed.
- The Harvard Chan School has held and remains committed to holding regular meetings between the Dean of the Faculty, the School's senior leadership team, and members of the Jewish community. The Dean's Office has offered guidance to a new community-wide Jewish and Israeli support group for students, staff, and faculty across the Longwood area, which holds weekly lunches at the Harvard Chan School.
- HMS has reconfigured its Admitted Students Preview Days to focus on the academic, scientific, and clinical learning environment at HMS.
- Senior leaders at HDS have held meetings to establish clear lines of communication with Jewish students, Muslim students, and representatives from Harvard Hillel.
- Harvard School of Dental Medicine (HSDM) administrators and faculty allies have served as bridges between Jewish students and the administration, helping students understand policies that create a safe campus climate. Jewish faculty leaders at HSDM offer mentorship through both individual meetings and group gatherings. HSDM administrators also work closely with a Hillel staff member who is specifically dedicated to serving graduate and professional students, collaborating to promote activities and access to additional support resources.
- HKS hosts and funds several Shabbat dinners on campus, open to all members of the HKS community, and awards competitive student fellowships for a wide range of students, including those from Israel (previously Wexner Fellows, now Wolk fellows) and "emerging leaders from Israel and Palestine" (Ofer Fellows).
- The Office of the President provided funding for weekly Jewish community lunches on both the Cambridge and Longwood campuses. Kosher food is served at both.
- University Dining Services expanded access to Kosher food for students.

Reviewing and Strengthening Policies and Processes

Schools have reported implementing structural and policy changes that they believe will ensure programs are consistent with core academic values, that guidelines for events and conduct are clear and enforced, and that appropriate leadership and oversight mechanisms are in place. These administrative changes appear intended to institutionalize commitments to inclusivity and establish clearer expectations for community behavior.

- In March 2025, the University posted FAQs, clarifying that both Jewish and Israeli identity are covered by the Non-Discrimination and Anti-Bullying policy (NDAB), and that the IHRA definition

and examples will be used in applying NDAB. The FAQs further clarify that conduct targeting Zionism may violate the NDAB.

- In November 2024, the University issued Library Protest FAQs explaining how the University-Wide Statement on Rights and Responsibilities (USRR) applies to protests in Harvard's libraries.
- In September 2024, the University released Guidance explaining that doxxing violates the University-Wide Statement on Rights and Responsibilities' (USRR) prohibition against "intense personal harassment" and is "bullying" under the NDAB Policies.
- In August 2024, the University announced Updated Campus Use policies to centralize existing regulations and provide new guidelines to facilitate productive use of space and enforcement of policies. Among other things, these policies expressly prohibit camping with or without a tent.
- In July 2024, the University adopted new procedures to standardize fact-finding for disciplinary cases involving students from different Harvard Schools following the encampment in Spring 2024.
- In January 2024, the University issued updated Guidance on Protest and Dissent (endorsed by the Harvard Corporation) under the USRR. The Guidance makes clear that protests and rallies are prohibited in study and instructional areas, like classrooms and libraries, and in private areas, such as dorms and dining halls. Moreover, protestors are barred from blocking access to campus buildings, classrooms, and offices and preventing the free movement of people and vehicles.
- Harvard committed to issuing an annual statement for at least the next five years stating that antisemitism will not be tolerated and that the IHRA definition and examples will be used in applying NDAB.
- Harvard is in the process of instituting an Action Plan and training to ensure that all personnel charged with reviewing and evaluating complaints of potential shared ancestry discrimination, whether anonymous or informal, are applying similar standards consistent with the Policies and Procedures. This Action Plan will be submitted to the Department of Education OCR, with records of trainings.
- HGSE is designing a review of student groups and organizations, including affinity groups, to ensure that all are genuinely accessible and inclusive to all students, and that they are funded and administered equitably.
- HMS is codifying and enforcing policies regarding student group-sponsored events and establishing guidelines for faculty in the case of classroom disruptions, with policies and guidelines now written, approved, distributed, and currently in force.
- HMS is also advancing open inquiry through a new Task Force on Open Inquiry, convened and chaired by a former Dean of the Faculty of Medicine. This task force will evaluate culture and climate issues, assess the recommendations of this Task Force and interventions already in place, and issue recommendations that reconcile both the Task Force reports and ongoing changes.
- HDS launched a strategic planning process in Fall 2024 for the entire School to identify key areas of academic/scholarly growth, create better structures for oversight and guidance of centers and programs to ensure academic excellence, develop more consistent guidelines for selecting and reviewing non-ladder faculty teaching appointments, and enhance the academic quality of the overall learning experience.
- HSDM and HMS launched a new, more robust Student Organizations, Events, and Activities Manual, requiring open student membership, annual registration, clear guidelines on the use of Harvard names in communications, and established procedures for addressing policy violations.

- FAS created a Classroom Social Compact Committee that developed handbook language for students and instructors outlining expectations for classroom behavior. This language, which will be effective in academic year 2025-26, aims to advance academic freedom, engagement with a range of viewpoints, and a vibrant learning environment.
- The Harvard Graduate School of Design (GSD) implemented a new Campus Posting Policy, defining acceptable content and outlining procedures for non-compliance. The School also introduced a Statement of Mutual Respect and Public Discourse to foster an environment of open and civil dialogue and establish expectations for community members during events, meetings, and gatherings, including peaceful protests.
- HKS hired a full-time "Community and Professional Conduct Specialist" who acts as the HKS "Local Designated Resource," conducts training and education, and works closely with the University Office of Community Conduct.
- HKS also has established clear policies on "debate and dissent" which permit protest or dissent at events so long as it does not interfere with the speakers' right to speak or the audience's right to listen. The School has established protocols for handling potential disruptions at events and works closely with hosts and moderators to help them implement these protocols effectively.
- HLS improved guidance and enforcement regarding the use of campus spaces for protest and dissent, incorporating community input and feedback.

Conclusion

The initiatives described above represent what Schools and key offices in the Central Administration report as important steps in addressing the complex challenges of antisemitism and anti-Israeli bias at Harvard. While these self-reported efforts suggest institutional responsiveness to emerging concerns, the Task Force co-chairs recognize that more coordinated, comprehensive, and sustained efforts are necessary to create lasting change. We believe that many of them may have strong and positive impacts on the Harvard community that goes beyond concerns about antisemitism and anti-Israel bias, but many of these initiatives are still nascent, and their impact remains to be seen.

The recommendations presented in Chapter 5 of this report build upon these promising foundations, offering a comprehensive framework for addressing antisemitism and anti-Israeli bias across the University. By acknowledging both reported progress and areas requiring further attention, we aim to catalyze a more robust institutional commitment to creating a truly inclusive and welcoming environment where all members of the Harvard community can thrive.

Appendix 2: Preliminary Recommendations (June 2024)

June 24, 2024

Harvard University
Presidential Task Force on Combating Antisemitism
Preliminary Recommendations

I. Introduction

On January 19, 2024, Interim President Alan Garber established a Task Force on Combating Antisemitism. On February 25, he announced the Task Force's membership, which consists of two co-chairs (Professors Jared Ellias and Derek Penslar), seven additional ladder faculty, and two student representatives. Three officials from the University's Central Administration and a former executive director of Harvard Hillel serve as advisors.

The Task Force's charge is as follows:

> It will examine the recent history of antisemitism and its current manifestations on the Harvard campus. It will identify causes of and contributing factors to anti-Jewish behaviors on campus; evaluate evidence regarding the characteristics and frequency of these behaviors; and recommend approaches to combat antisemitism and its impact on campus.[621]

In March, the Task Force began its work with a series of preliminary meetings among its members and between its co-chairs and the co-chairs of the Task Force on Combating Anti-Muslim and Anti-Arab Bias. There followed two months of listening sessions that brought Task Force members into contact with students, faculty, and staff from throughout the University and its chaplaincy organizations — the College, GSAS, the professional Schools, Hillel and Chabad. In total, there have been more than forty listening sessions attended by over 500 Harvard affiliates.

As members of the Task Force recently wrote in the *Crimson*, the listening sessions provided abundant reports that since last October, and to some extent long before then, many Jewish students (and especially Israeli students) have been subject to shunning, harassment, and intimidation.[622] These findings reinforce the necessity of preliminary recommendations for policy changes that should be implemented at the earliest feasible date.

Our preliminary recommendations focus on short-term actionable items rather than long-term structural changes. The Task Force will devote the summer to intensive study of Jewish life at Harvard (historical and current) and existing policies regarding protest, complaints, and discipline. Working jointly with the Task Force on Combating Anti-Muslim and Anti-Arab Bias, our Task Force will consider the most effective means for bridging difference and fostering pluralism within our campus community.

The findings of our Task Force's summer research will be incorporated into a substantive report that will be submitted in the Fall. Our final report will offer a detailed analysis of how Harvard got into its current crisis of community and lay out proposals to transform our University culture for the better over the medium- and long-term.

II. Recommendations

CLARIFY HARVARD'S VALUES

A) When these recommendations are released to the public, they should be prefaced by a statement that antisemitism and anti-Israeli bias -- like Islamophobia, anti-Arab bias, racism, misogyny, homophobia, or transphobia -- are forms of hatred that have no place within the Harvard community. The statement should clarify further that:

- differences of religious observance and political affiliation are a matter of personal right.
- conversations about those differences should be grounded in mutual respect and appreciation of common belonging to the Harvard community.
- disagreement about contentious issues – including Israel/Palestine – do not justify aggression or malice, nor should it lead to exclusion from a Harvard-recognized organization or activity.

ACT AGAINST DISCRIMINATION, BULLYING, HARASSMENT, AND HATE

B) The situation of Israeli students at Harvard has been dire. They have frequently been subject to derision and social exclusion. Discrimination, bullying, or harassment based on an individual's Israeli nationality is a gross violation of University policy and, beginning immediately, must be both publicly condemned and subject to substantive disciplinary action. The administration should explore methods to build support systems for Israeli students and to ensure sufficient ability to prevent, or if needed, capably and speedily address, such issues in the future.

C) We have heard disturbing reports that faculty members and teaching fellows discriminate against or harass students because they are Israeli or have pro-Israel views. Harvard should make clear that such behavior by instructional staff is contrary to University policy and will be subject to disciplinary action when it occurs. As teaching fellows are often very early on in their teaching career, antisemitism and anti-Israeli bias need to be included in training for these essential employees in the College.

D) Social media has become an increasingly pernicious source of antisemitic text and images. The University should:

- encourage its constituent units to incorporate into their codes of conduct and values warnings about the damage to our community caused by intemperate speech and offensive imagery in social media postings.
- make clear that harassment, abuse and intimidation in Harvard-related social media postings could have disciplinary consequences.

E) In our listening sessions and many private meetings with students, we heard from many students who believe that extracurricular student life is now characterized by political litmus tests that make it impossible for some students to participate in activities because of political views unrelated to the activity. Students expressed deep regret that these barriers (along with others) prevented them from connecting with students whose political views on some topics might differ from their own but who share other interests and views.

We strongly believe that the University needs to ensure that extracurricular student life remains vibrant and accessible to all students and supportive of an overall culture of belonging, consistent with Harvard's values and principles of non-discrimination, across a diverse campus and student body.

IMPROVE DISCIPLINARY PROCESSES

F) At present students suffer from a lack of transparency, clarity, and clear process for the submission of complaints of antisemitic or otherwise hostile behavior. OEDIB staff as well as Academic Advisors and residential staff must be knowledgeable as to their own proper roles when approached by students complaining of antisemitic or otherwise hostile behavior. University employees who receive complaints should be trained to do so without prejudice, to guide students in the process of reporting, and to follow up, or ensure that there is follow-up, not only in an initial reply or form-message but until the matter is resolved. Those who have reported incidents need to be apprised as to where the matter stands (explaining, when necessary, that some details may not be communicated because of confidentiality concerns).

G) At present, the policies of administrative boards and other disciplinary bodies vary widely across the University's separate units, and there are significant disparities across units in the handling of disciplinary cases. There needs to be communication and a striving for consistency in disciplinary cases across the University's constituent units.

H) The lack of follow-up after complaints regarding antisemitic expression or behavior causes many members of the Harvard community to doubt that the University is committed to imposing substantive consequences for antisemitic expression or action. To restore the community's trust in Harvard's disciplinary processes, the University should — to the extent legally possible — reveal information about disciplinary cases (e.g., the number and outcomes of cases) in an aggregated and anonymized form.

IMPLEMENT EDUCATION AND TRAINING

I) At its most recent summit in April, the Office of Equity, Diversity, Inclusion, and Belonging demonstrated its commitment to include antisemitism awareness and training in its purview. In that spirit, the administration should institute anti-harassment training for all students, including examples of recent antisemitic incidents on campus and a review of the process to report incidents.

J) Orientation (including all pre-orientation programs) for new students (undergraduate, graduate, and professional), student organization leaders, peer advising fellows (PAF), residential undergraduate supervisors (Proctors and Tutors) should center around the construction of a Harvard community that celebrates diversity but is bound by common core values. To the extent that Orientation discusses issues of oppression and injustice, antisemitism and anti-Israeli bias should be included. Similarly, the First-Year International Program should include antisemitism training and condemn discrimination based on national origin.

FOSTER CONSTRUCTIVE DIALOGUE

K) The University should commit to fostering spaces for productive dialogue on difficult subjects in ways that support and affirm the ability of all students to participate. Possible initiatives include:

- A high-profile series of talks, attended by the President or Provost, between pairs of individuals who disagree vehemently on controversial issues but do so respectfully and productively.
- A series of talks by Harvard faculty on historic and contemporary relations between Christianity, Islam, and Judaism. The talks would be tailored for a broad audience and held in student residences to maximize undergraduate student attendance.
- Recognition of student leaders who are promoting constructive dialogue on campus about the Israeli-Palestinian conflict and other contentious issues.
- An award for student, faculty or staff innovation around combating antisemitism;

- Provision of incentives and funding for undergraduate collaborative research, dialogue groups, and events on resolution of the Israeli-Palestinian conflict. FAS' Intellectual Vitality Initiative should encourage the joint participation of Israeli, pro-Israeli, Palestinian, and pro-Palestinian students in such opportunities.

SUPPORT JEWISH LIFE ON CAMPUS

L) The University must ensure a welcoming environment for religiously observant Jewish students, faculty, and staff. To that end,

- Kosher hot lunches should be made available by the start of next term at Hillel or at least one of the River Houses and, due to its distance from the Yard, the Radcliffe Quad. Hot kosher dinners, which are currently available at Hillel, should also be available at the Quad.
- In all dining facilities, pork products should be clearly marked.
- Instructional staff must provide reasonable accommodation for observant students who miss class or examinations due to Jewish holidays or the Sabbath. The University should circulate guidance including a calendar of religious observances (Appendix A), the text and a plain English description of Massachusetts General Laws, Chapter 151C: § 2B, and a reminder that the law sets the lower bounds of accommodation for religion that instructors can exceed but not fail to meet.
- The University should explore allowing newly hired staff to "pull forward" yet-unearned vacation or personal leave days as necessary for religious observance, to assist observant Jewish new hires who lack the vacation time they need to blend their religious observance with their new role at Harvard University.
- The University should create a simple web address (e.g., www.harvard.edu/jewishcalendar) that will provide information on Jewish holidays for members of the community. Appendix A contains information on Jewish observance as well as dates of Jewish holidays. The list should be updated annually to allow academic units to *simply, easily and reliably* determine the days on which they should try to avoid scheduling events.

M) Students at the Longwood Campus discussed difficulty building relationships and connections across siloed Schools and the rest of the University. We recommend allowing, at least in some cases, equal membership rights for students in the Chan School of Public Health to clubs shared between the other health Schools, such as the Maimonides Society, which is the joint club for Jewish students in the Medical and Dental Schools.

Appendix included in the Preliminary Recommendations

APPENDIX A: Selected Jewish Religious Holidays and Observances (with dates for 2024-2025)

A note on Jewish holidays: Jewish holidays follow the Jewish (lunar) calendar, so appear on different days of the Gregorian calendar in every year. Some holidays are observed as one sacred day; others two days. Some liberal Jews only observe holidays for one day. The Jewish reckoning of a day starts at sundown and ends at nightfall the following day. This brief guide only includes the Jewish holidays that come with work restrictions, which would interfere with the ability of observant Jewish students, faculty, and staff to participate in University events, take exams, or go to class.

Shabbat — The core of Jewish observance is the observance of the Jewish Sabbath, which begins Friday evening 18 minutes before Sunset and lasts until nightfall on Saturday night. During this time, many observant Jews will refrain from engaging in work or even actively using electricity.

Rosh HaShanah — The start of the New Year of the Jewish Calendar. This two-day holiday is observed as a sabbath (see above). (In 2024, Rosh HaShanah runs from the evening of October 2 until nightfall on October 4)

Yom Kippur — The "Day of Atonement," a day of fasting, prayer, reflection, penitence, and forgiveness. This one-day holiday is observed as a sabbath. (In 2024, Yom Kippur runs from the evening of October 11 until nightfall on October 12)

Sukkot — The "Festival of Booths," of dwelling in temporary outdoor pavilions built specially each year for the holiday. The festival extends for seven days, but only the first two days of the holiday are observed like a sabbath. (In 2024, Sukkot runs from the evening of October 16 until nightfall on October 24, with the sabbath-like period beginning on the evening of October 16 until nightfall on October 18)

Shemini Atzeret and Simchat Torah — The "Eighth Day Convocation" concluding the biblical autumn period of pilgrimage, followed by Simchat Torah — The "Rejoicing of the Torah," concluding and starting anew the yearly cycle of scriptural readings in the synagogue. This two-day holiday is observed as a sabbath. (In 2024 Shemini Atzeret runs from the evening of October 24 through nightfall on October 26).

Passover (Pesach) — Passover, celebrating the Israelite exodus from slavery in Egypt and the start of the homeward journey to the Promised Land. The first two and last two days are holy days and observed as a sabbath. (In 2025 Pesach runs from the evening of April 12 until nightfall on April 20, with the first two-day sabbath-like period beginning on the evening of April 12 until nightfall on April 14, and the second two-day sabbath-like period beginning on the evening of April 18 until nightfall on April 20)

Shavuot — The "Feast of Weeks," at seven weeks from the Passover festival, marking the time of the barley harvest in the Land of Israel and associated ritual in the Jerusalem Temple. This two-day holiday is observed as a sabbath. (In 2025 Shavuot runs from the evening of June 1 until nightfall on June 3)

In general, many religiously observant Jewish students will refrain from using electricity, taking exams, and attending professional events on all Saturdays, the two days of Rosh Hashanah, the first two days of Sukkot, Shemini Atzeret, Simchat Torah, and the first two days and last two days of Pesach. These holidays usually fall within the academic year. Observant Jews will also refrain from work on the two days of Shavuot, which usually fall over the summer.

Appendix 3: Report from the Joint Subcommittee on Pluralism

Report from the Joint Subcommittee on Pluralism
To the Presidential Task Forces on Combating Anti-Semitism and Anti-Israeli Bias, and on Combating Anti-Muslim, Anti-Arab, and Anti-Palestinian Bias

December 2, 2024

Charge to the Committee: In May 2024, Danielle Allen and Ali Asani were charged by both Task Forces with establishing a joint subcommittee to examine the resources that exist at Harvard for interfaith engagements, interdisciplinary collaborations, religious literacy, and community building, including through the arts, and propose new resources, structures, and/or practices.

At the first meeting, the subcommittee agreed to organize its work by means of a framework of pluralism with the goal of advancing a campus culture of pluralism and the practices necessary to support it. That modification to the charge was reviewed and approved by the Task Force chairs.

Definition of Pluralism: The committee established the following framework for pluralism to guide its work:

We understand a culture of pluralism to entail a recognition that we are a campus:

- where people are diverse in their identities and divergent in their ideologies, and the concept of identity ranges broadly across race, ethnicity, gender, sexuality, faith, viewpoint, geographic background, and the wide variety of experiential characteristics; also there is diversity within groups, cultures, and religious traditions as well as between and across them;
- where even within a given identity there is much diversity;
- where we **respect, relate and cooperate** with each other;
- where the specific project of our cooperation is to advance an educational and research mission where all can learn and grow;
- where therefore we all bear responsibility for the quality of the relationships that support that cooperative project of learning and growth;
- and where that work requires that we connect our personal values and commitments to the shared civic values of our campus as expressed in the University Values Statement, thereby linking our personal identity and our Harvard civic identity.

Our committee also acknowledges that the definition sketched above includes our aspirations. For instance, we cannot always relate. Sometimes relating is hard when the differences are so real and run as deeply as they do. Yet we should aspire to relate and, even when relating is difficult, we should value one another as partners in learning.

Application of the Theme of Pluralism to the Themes of the Two Task Forces

The Presidential Task Forces on Combating Anti-Muslim, Anti-Arab, and Anti-Palestinian Bias and on Combating Antisemitism and Anti-Israeli Bias have both found a campus context in which students from a range of religious, cultural, ethnic, geographic, and ideological backgrounds have experienced harms to their experience of belonging on campus, limits on their abilities to express their views, and forms of bias.

Many of these experiences pre-dated the events of October 7, 2023. They were, however, after that date, significantly exacerbated by the efforts of members of our campus community to make sense of the Hamas attack on Israel, the ensuing conflict between Israel and Hamas (and now further parties), and the

resulting humanitarian crisis for Palestinians, and to find ways of communicating views about these matters and to advance related civic causes. How members of our community harmed one another brought to the surface weaknesses in how our existing paradigms for inclusion and belonging work for all members of our campus. While the original Inclusion and Belonging framework developed for the campus in 2018 prioritized "pluralism," as defined above, that pluralism framework for advancing inclusive excellence has often disappeared from view. While some members of our campus community have felt well supported by diversity, equity and inclusion offices on campus, many others had come to feel that these offices were not effectively supporting their needs, by virtue of largely prioritizing work around race, disability, and sexual and gender identity, and not engaging the many other aspects of identity listed above. Race, disability, and sexual and gender identity are all important aspects of human identity, but they do not suffice to capture the range of experiences people bring to campus. Supporting members of our campus community to thrive in a context where our differences can be very profound requires the broader and more multi-faceted framework of pluralism. A pluralism framework helps us view one another more holistically; encourages us to focus on how we can activate the assets that we all bring to campus from our different backgrounds; and asks us to develop a sense of some shared values, even as we also carry forward a variety of differing and even opposing commitments. A pluralism framework spurs intentionality in how we inhabit our several roles as students, educators, staff members, members of specific social communities, and citizens and civic participants, so that we can enjoy the rights and fulfill the responsibilities of all these roles. Ultimately, a pluralism framework should support efforts of all members of our campus community to connect their multi-faceted senses of personal identity to their identity as a member of the Harvard community, a role given definition by the values of the University.

University Values and Pluralism:

The Subcommittee also adopted the University Values Statement as a basic guide to its work, and especially the fifth value, focused on bonds and bridges. The Values Statement is as follows:

> Harvard University aspires to provide education and scholarship of the highest quality — to advance the frontiers of knowledge; to equip students, staff, and faculty and academic personnel for fulfilling experiences of life, work, and inclusive leadership in a complex world; and to provide all members of our diverse community with opportunities for growth. We pursue these goals for our own good and for the public good through the many ways that advancing and sharing knowledge can improve human flourishing and through the service and leadership of our community members on campus and beyond. Achieving these aims depends on the efforts of thousands of students, staff, and faculty and academic personnel across the University. Some make their contributions by engaging directly in teaching, learning, and research; others contribute by supporting and enabling those core activities in essential ways, while also pursuing professional growth.
>
> Whatever each person's individual role or location within Harvard, we owe it to one another to uphold certain basic values of the community. These include:
>
> - Respect for the rights, differences, and dignity of others.
> - Honesty and integrity in all dealings.
> - Conscientious pursuit of excellence in our work.
> - Accountability for actions and conduct in the community.
> - Responsibility for the bonds and bridges that enable all to grow with and learn from one another.

Motivation for the Committee's Work:

During the spring of 2024, both committees conducted extensive listening sessions on Task Force themes throughout the Harvard campus. In addition, a survey was fielded exploring challenges around bias and

inclusion. Also, another University Task Force on Open Inquiry and Constructive Dialogue explored related questions. The listening sessions, and the work of the Task Force on Open Inquiry and Constructive Dialogue, brought out clearly that all constituencies on campus found it difficult to discuss controversial issues, whether in the classroom or outside of it. In addition, many students found themselves experiencing social ostracism that undermined their learning experience, on account of their political views or views attributed to them. Students with religious commitments found it difficult to find places simply to practice their faith without their faith being politicized. The quantitative data revealed that questions of race and religion were both important to understanding people's experiences in addition to other demographic attributes.

Finally, in the listening sessions, when participants were asked to reflect on University values, key themes emerged: (1) that the values were reasonable but that the participants did not experience the University as living up to them; (2) that participants understood concretely what was entailed by the first four values, but not by the value of taking "responsibility for the bonds and bridges that enable all to grow with and learn from one another."

In sum, the listening sessions and quantitative data painted a clear picture of a campus that has no ethnic, religious, or racial "mainstream." In contrast to the University's early history as a school for and of Puritans, and in contrast to the 1970s, when the question was whether Harvard's white majority would be open to Black students or whether Christian students would include Jewish students in University organizations, now the question is how a community composed of a far wider range of people from a far wider range of backgrounds than nearly all have previously encountered, can activate the assets that all bring to our community for individual and shared thriving. Harvard University has actively chosen to organize itself around the value of pluralism, and now we need the culture and practices that can support that, but we do not yet have them.

Paradoxically, Harvard researchers have a long history of working on the value of pluralism, and the challenge of activating it for the well-being of a specific community, or society more generally. As Eboo Patel[623] points out, and as is documented in Louis Menand's ***The Metaphysical Club***,[624] pluralism, as an intellectual tradition can be traced back to the work of Harvard Professor William James. James argued "against Hegel's theory that the universe was one thing, countered that the universe was many things. Hegel's theory was known as monism.[625] James called his view 'pluralism.' … He proposed an intriguing metaphor: 'The pluralistic world is thus more like a federal republic than like an empire or a kingdom.'" Since the time of James, Harvard scholars from numerous disciplines have advanced our understanding of the nature and potential of pluralism, and pluralistic societies — from the work of John Rawls in philosophy to Michèle Lamont in sociology, Mina Cikara in psychology, Melani Cammett in government, and Diana Eck and Ali Asani in the study of religion, among many others. Yet as a campus we have done an imperfect job of drawing on this rich work to help ourselves advance in a direction that supports practices of pluralism, and the intellectual vitality, they can sustain.

There have been efforts. The Harvard Foundation was established by President Derek Bok and the Deans of Harvard University in 1981, as the Harvard Foundation for Intercultural and Race Relations with the mandate to "improve relations among racial and ethnic groups within the University and to enhance the quality of our common life." In pursuit of this mission, the Foundation has sought to involve students of all racial, ethnic, and cultural backgrounds in the ongoing enterprises of the University. The Foundation sponsors annual programs and activities that are designed to promote interracial and intercultural awareness and understanding in the Harvard community, as well as to highlight the cultural contributions

of students from all backgrounds. The Harvard Foundation for Intercultural and Race Relations runs through the hard work and dedication of many stakeholders such as full-time staff, undergraduate interns, an undergraduate student advisory board, member student organizations, race relations tutors, a faculty advisory committee, student volunteers, and various campus partners.

Over time, the Harvard Foundation came to focus its efforts on students in the College, rather than supporting the whole University, and to focus primarily on race relations, gender, and sexuality, a subset of a pluralism agenda. For the students whom the Foundation currently serves, it does valuable work.

In 2018, the University-wide Task Force on Inclusion and Belonging sought to establish pluralism as the basis for campus practices and to ensure that attention to diversity that emerges from religion, viewpoint, geographic origin, disability, and life experience (for instance, military service) would also receive due attention in work on campus culture. That Task Force report stressed the need for adequate support (including prayer spaces) for students of faith as well as the need to support a culture of academic freedom and civil discourse, as necessary parts of the work of inclusion and belonging, so that all voices may richly contribute to our campus teaching and learning.

The spring 2024 listening sessions and subsequent surveys made clear the urgent need to elevate that nascent focus on pluralism, civil discourse, and support for practices that help everyone on campus activate the assets they bring to campus from their remarkably wide array of backgrounds, for the sake of intellectual vitality and personal and community flourishing. **To achieve that elevation, the campus needs an organizational focal point for pluralism work.**

A few key principles should inform the design of that focal point.

First, the broad conception of pluralism laid out above should be at the center of the work, as well as the University's values statement, especially the fifth value.

Second, this focal point should serve faculty, staff, and students, across the whole University. No community should be left out of this work.

Third, this focal point should have faculty leadership, because a significant portion of the necessary work is intellectual and should be fully integrated with the academic mission of the University. The campus would benefit from routine engagement with the intellectual themes involved in the work of inclusion, belonging, and pluralism in ways that connect to the academic mission of the University and its standards of academic excellence. There is need to teach and support instruction in practices of pluralism; this work should be connected to the campus' teaching mission. There is important translational work to do to draw on the University's research enterprise to inform the University's organizational practices. As a "translational" entity, this focal point should facilitate the adaptation of rich scholarly material into tools and resources for use in applied and practical contexts. The importance of faculty leadership in this domain is a point that has now been made in many generations of reports. We hope this recommendation will not be overlooked again.

Fourth, the campus focal point for cultivating practices of pluralism should have a staffing structure that enables integration of academic resources, student affairs resources, and translational work. This principal points in the direction of establishment of this campus focal point inside a School, with a mission to serve the whole University, rather than as an inter-faculty initiative.

Fifth, the campus focal point for cultivating practices of pluralism should be well-connected to and working in partnership with the Office of Equity, Diversity, Inclusion, and Belonging, other Diversity, Inclusion, and Belonging offices on campus, and the Harvard Foundation so that the campus' inclusive excellence framework can evolve in partnership with, and not in competition with, efforts to deepen campus cultures of pluralism. Such connection and partnership should ensure that good work currently being done for specific campus communities continues even as additional work and a broadened mandate

are embraced. Such a partnership would also support developing an approach to issues of inclusion, belonging, and pluralism that can align approaches across staff, student, and faculty cohorts.

Sixth, the campus focal point for cultivating practices of pluralism should be well-connected to and working in partnership with a new Office of Religious, Spiritual, and Ethical Life, to advance interfaith opportunities and experiences, and to integrate engagement with religious identity fully within the work on pluralism. This should be an explicit and clearly communicated part of the mission of the entity.

Our subcommittee believes that such a focal point could be achieved by reimagining the existing Harvard Foundation as the Harvard Foundation for Pluralism, or by establishing a new University-wide Center for Pluralism, in which the Harvard Foundation is incorporated as a program. (A model for this kind of incorporation exists in the incorporation of the DuBois Institute within the Hutchins Center.) We recommend reimagining the Harvard Foundation or incorporating it in a new Center for Pluralism because of the importance of bringing different communities on our campus into a shared framework for pursuing inclusive excellence. The Harvard Foundation has already been through several evolutions in its operations; evolution is possible. On either path (a reimagined Foundation or a new Center incorporating the Foundation as a program), **special focus must be paid to ensure that the expansion does not detract from the services currently offered to undergraduate students and community members who are engaged with the existing institution.** At the same time, the importance of ensuring that the communities currently served by the Foundation are also connected to campus pluralism work brings us back again and again to the idea that a connection here is necessary.

The Committee's Work

Listening Sessions and Discussions

Participants	Learning Materials	Key Takeaways
School staff responsible for orientation	Readings and visit from Eboo Patel of Interfaith America about a pluralism framework; University Values Statement	Orientation leaders were receptive to using a pluralism framework; identified opportunities for bringing it to life in their programs; and communicated a need for further learning and professional development, particularly around how a pluralism framework connects to diversity, equity and inclusion work.
Office of the President	Documents tracings the history of the structure of religious life on campus	The President's Office is currently working on a redesign of structures to support religious life and recognizes the importance of interfaith resources; committee discussion included some dissent focused on the value of secularism.
Center Leaders	Discussion of draft proposal for dialogue series	Dialogue themes were developed for a potential presidentially-sponsored dialogue series, to model civil disagreement on challenging topics.
Arts Leaders	Reflection on University values statement	Arts Leaders collated all upcoming arts events relevant to Israel and Palestine; and are open to exploring expanded collaborations.
NELC Language Leaders	Reflection on challenges that emerge in contexts of Arabic and Hebrew instruction	NELC has added a diversity and civility statement to courses in the department; program leaders would appreciate support in identifying helpful professional development resources for language instructional staff; program leaders also see a need for

		tools to improve their ability to recruit and retain professionalized language instructional staff.
OEDIB and Harvard Foundation Leadership	Discussion of the history of the Harvard Foundation and pros and cons of different models for potentially reimagining the Foundation, or for potentially incorporating within a new center	The Harvard Foundation currently serves students and communities in important ways that should be protected, as part of any reimagining or incorporation within a Center for Pluralism; also best practices can be drawn from current work; reimagining might also bring opportunity to tackle strategic questions that have arisen.
Central student life leaders	Reflection on University values statement	Identified a need for student life leaders, EDIB personnel, and Local Designated Resources to have professional development opportunities around the University values.

Overarching Recommendation:

To establish a campus focal point for pluralism work, we recommend reimagining the Harvard Foundation as the Harvard Foundation for Pluralism, or establishing a new University-wide Center for Pluralism, in which the Harvard Foundation is incorporated as a program. (A model for this kind of incorporation exists in the incorporation of the DuBois Institute within the Hutchins Center.) A proliferation of entities in overlapping thematic areas is not ideal for both budgetary reasons and the potential to generate competition where there should be collaboration. For the sake of simplicity, we'll refer to whatever entity emerges based on this recommendation as the Reimagined Harvard Foundation/Center for Pluralism. The Reimagined Harvard Foundation/ Center for Pluralism would ground its work in the University values statement.

As design of a Reimagined Harvard Foundation/Center for Pluralism is considered, the three design principles named above are critical for the success of this endeavor: faculty leadership; partnership with OEDIB and other DIB offices on campus; and a robust staffing structure to support cross-functional work.

The goal of this recommendation is to anchor the practices of the University around a commitment to pluralism, and to engage all members of our campus community in exploring, bringing to life, and embracing our University values across a variety of contexts — from orientation and onboarding to interdisciplinary exchanges and language learning, to interfaith experiences, student life, and the arts on campus. Many other entities also work in these areas and the specific value-add of a Reimagined Harvard Foundation/Center for Pluralism would be to connect the academic enterprise of the University, and campus expertise on issues of inclusion, belonging, and pluralism, to the administrative enterprise that fulfills these functions.

A Reimagined Harvard Foundation/Center for Pluralism would need to serve the whole campus community. If the decision is to reimagine the Harvard Foundation, this reimagining might be modeled on recent reorganizations for Phillips Brooks House and the Office for the Arts, where they have been elevated in their reporting structures, restructured with regard to their engagement with faculty leadership, and expanded in their functions, as well as receiving University-level resources for their work. Special focus would need to be paid to ensure that the expansion does not detract from the services currently offered to community members who are engaged with the existing institution. Other campus models also exist to provide precedent for innovation in organizational structure, for instance the Harvard Center for International Development, which is housed in one School but serves the whole University and leads coordination across a set of allied and adjacent organizations. We would recommend taking as a model a School-based entity that serves the whole University campus, rather than an inter-faculty initiative. In general, School-based entities are more quickly

woven into the capillary structure of the University than IFIs; also IFIs generally support faculty research but do not as easily articulate with the teaching and co-curricular mission of the campus.

Finally, a Reimagined Harvard Foundation/Center for Pluralism should develop and implement programs that reinforce pluralism. For example, the Center/Foundation could support a fellowship program for students; a campus awards program for students who lead in advancing a culture of pluralism on campus; engaging faculty with expertise in pluralism and connected subject areas to develop trainings and professional development opportunities for the campus; mediation resources for conflicts that involve issues of pluralism; and the work of OEDIB and the School-specific DIB offices to cultivate a campus-wide network of expertise on pluralism that all Schools could tap into in a shared way, so that support is available for students from the full range of backgrounds, via expertise sharing across campus.

A Reimagined Harvard Foundation/Center for Pluralism offers a valuable opportunity to rethink the qualitative character of academic bureaucracy, a realm too often characterized by alienation and distance between faculty and staff. One of the most profound flaws of the traditional DEI framework — and indeed of much of contemporary university organization — is that it sustains this divide, reinforcing the sense that staff are functionaries rather than integral partners in the academic mission (See Appendix B for further thoughts emerging from subcommittee listening sessions on how the character of academic bureaucracy might be rethought.)

As a partner to OEDIB, a Reimagined Harvard Foundation/Center for Pluralism could spearhead the Harvard Culture Collaborative, under development by OEDIB, an interdisciplinary, faculty-led network designed to develop new research, learning initiatives, and pathways to advance the University's shared values, particularly focusing on inclusion and belonging. By leveraging faculty expertise, the collaborative will aim to cultivate an inclusive campus culture and develop related curricular and co-curricular programs that align with Harvard's broader strategic diversity agenda. Such a collaborative could:

1. Contribute to the development of orientation programming to integrate pluralism and inclusion.
2. Complement an office of religious life in supporting programming that respects and enhances diversity that relates to the wide range of faith backgrounds on campus.
3. Convene leaders of interdisciplinary centers to create dialogue series on substantively significant and challenging issues.
4. Collaborate with arts leaders on projects that resonate with the mission of pluralism and inclusion.

Achieving the Goal of a Reimagined Harvard Foundation/Center for Pluralism would require action steps as follows:

GOAL 1: Establish an institutional anchor for practices of pluralism on campus.

Responsible Party	Recommended Action Step
OPP	Invest in a Reimagined Harvard Foundation/Center for Pluralism on par with investments in OFA, and as a One Harvard entity to serve the whole University, even if administered in the College; seek partnering investments in a Reimagined Harvard Foundation/Center for Pluralism from all Schools to support a re-establishment of its University-wide mission; establish faculty leadership for the Reimagined Harvard Foundation/Center for Pluralism, charge the leadership of the Reimagined Harvard Foundation/Center for Pluralism with developing a next generation strategy for anchoring practices of pluralism on campus.

Deans	Support faculty leadership for a Reimagined Harvard Foundation/Center for Pluralism; Deans of all Schools invest in a revamped, One Harvard model for a Reimagined Harvard Foundation/Center for Pluralism.
Reimagined Harvard Foundation/Center for Pluralism	Under University and/or decanal leadership, and with restored faculty leadership and a faculty advisory committee, a Reimagined Harvard Foundation/Center for Pluralism to take responsibility for a One Harvard strategy for advancing University values and a culture of pluralism, including providing professional development across campus in University values, a culture of pluralism, and constructive dialogue for staff in OEDIB, CODOS, OFA, HUCA, and the informal cross-campus arts planning group; the faculty committee in religion and board of religious, ethical, and spiritual life; and House Dean teams and staff designated as Local Designated Resources, Orientation Leaders, Student Affairs leaders, or language instructors.

Further Recommendations:

The goal of creating a Reimagined Harvard Foundation/Center for Pluralism would work in tandem with five other, **independent goals but no less important** goals:

(1) **Advance the University's Values.** The University has established a strong framework of core values but these are not well-known on campus. They should anchor our efforts to navigate through challenging moments on campus, as well as the gray areas of campus interaction, that don't rise to the level of formal grievance processes.

(2) **Cultivate practices of pluralism anchored in the University's values.** It is not enough to name values to establish a culture of pluralism. Developing practices that bring those values to life is also important. The fifth University value — "taking responsibility for the bonds and bridges that enable all to grow with and learn from one another" — requires innovation in campus understanding of core practices that define our community.

(3) **Invest in strengthening interfaith opportunities on campus and support access to multilingualism for all.** The campus has over forty chaplains and an impressive array of ways of engaging with faith, belief, and the lack thereof. The time has come to create a University-wide Office of Religious, Spiritual, and Ethical Life (see below for further detail). A culture of pluralism would activate that diversity in support of increased religious literacy, mutual understanding, and opportunities for interfaith collaboration. Similarly, understanding the value of a pluralistic culture requires access to the cultures of others. This is especially acquired through language learning. We should be strengthening language learning on campus in support of multilingualism as a defining feature of our campus.

(4) **Inspire creativity in engagement with the concept of pluralism.** People participate best in pluralism when they are confident that their own identities are seen and supported. The Office for the Arts may be especially able to uplift and to celebrate the various cultures represented in the Harvard community, and also to create events that reflect, model, and encourage interchange among these heritages and living traditions.

(5) **Model civil disagreement by annually sponsoring Presidential level dialogues on substantive questions.** This goal addresses the common theme in listening sessions for both Task Forces that members of our campus community desired more intellectual engagement with the substantive issues in the crisis at a University-wide level. While recognizing that many Centers in campus have indeed been leading such engagement, there continues to be a need for such engagement

sponsored from the Offices of the President and Provost. Such further engagement should, however, build on the good efforts of many colleagues around campus. The goals of the dialogues would be: (1) to model constructive, respectful dialogue in conditions of pluralism; and (2) to make substantive progress toward improved understanding on themes subject to heated debate. See Appendix A [of this Appendix 2] for sample topics that might by curated for such a series.

These goals could be advanced as follows:

GOAL 2: Advance the University's values.

Responsible Party	Recommended Action Step
OPP	Add existing University Values' statement to University website and Provost's Office list of policies.
Deans	Incorporate the University's Values Statement in School policy documents and core School messaging; work with faculty leadership at Harvard Foundation to develop invitation and incentives for departments to engage in case-based workshops related to the University Values Statement.
Reimagined Harvard Foundation/Center for Pluralism	See above, Goal 1.

GOAL 3: Cultivate practices of pluralism anchored in the University's values.

Responsible Party	Recommended Action Step
OPP	Charge existing standing bodies with carrying out two initiatives- — one about advancing the University's values and one about advancing a culture of pluralism, reporting back at the end of each of the coming three years what they have done and what difference it is making in their work; bodies to be charged are the Reimagined Harvard Foundation/Center for Pluralism, OEDIB, CODOS, OFA, HUCA, and the informal cross-campus arts planning group; the faculty committee in religion and board of religious, ethical, and spiritual life; and House Deans.
Deans	Deans of all Schools should support staff at all levels in participating in professional development and professional communities of practice around University values, pluralism, and constructive dialogue.
Reimagined Harvard Foundation/Center for Pluralism	Coordinate pluralism work across OEDIB, CODOS, OFA, HUCA, and the informal cross-campus arts planning group; the faculty committee in religion and board of religious, ethical, and spiritual life; and House Deans.

GOAL 4: Inspire creativity in engagement with the concept of pluralism.

Responsible Party	Recommended Action Step
OPP	Invest in the Office of the Arts to seed a University-wide culture of creative engagements with the idea of pluralism; seek a partnering investment from every School; charge OFA with leading a University-wide conversation about space needs for arts programming.
Deans	Deans of all Schools invest in the Office of the Arts to seed a University-wide culture of creative engagements with the idea of pluralism and have Schools participate in campus-wide effort to identify improved spaces for the arts.
OFA, HUCA, and informal arts planning group	Connect the campus to the national Presidential Committee on Arts & Humanities, Artists for Understanding — brings together communities of artists from across lines of difference; explore creation of new routes to support student arts programming the relates to pluralism.

GOAL 5: Invest in strengthening multifaith opportunities on campus and support access to multilingualism for all.

Responsible Party	Recommended Action Step
OPP	Create an Office of Religious, Spiritual, and Ethical life to support students in their faith engagements and proactively advance interfaith programming, with this office ideally to be led by someone who also carries an academic appointment, whether ladder or non-ladder, as at our peers (Yale, Stanford, and until recently, Princeton); formalize the rights and responsibilities of chaplains and require adherence to University policies such as NDAB; create a feedback process for the director of the Office of Religious Life and the Chaplains, as well as mechanism for student input into the hire of the above roles; fund an application-based process for student proposals to advance interfaith initiatives. This Office should collaborate effectively with the Harvard Foundation/Center for Pluralism as well as with the Edmond and Lily Safra Center for Ethics.
Deans	The Dean of FAS and the Dean of Humanities should work with leaders of language instruction programs to identify tools that will improve the ability of program leaders to recruit and retain a highly professionalized corps of language instructors, particularly in language areas where thematic controversies can arise such as Arabic and Hebrew; while campus events post Oct. 7th, 2024, brought particular attention to these languages, the challenge of instructing students with differing relations to the societies and cultures connected to the language of instruction can appear across the curriculum, from Japanese and Korean to Ukrainian and Russian, and so on. We also recommend revisiting the reduction of the language requirement to 1 year.
Reimagined Harvard Foundation/Center for Pluralism	Partner with the Office of Religious Life to support interfaith engagements, and to ensure that religion, faith, and cultural identity connected to religious communities are fully taken into account in practices of pluralism.

GOAL 6: Model civil disagreement by annually sponsoring Presidential level dialogues on substantive questions, with multiple speakers representing a range of views per event, and a high caliber moderator.

Responsible Party	Recommended Action Step
OPP	Four questions have been proposed for 2024-25; see appendix. Given the passage of time, they would need to be updated prior to embarking on programming, but they provide an indication of the kind of direction intended.
Deans	Support build-out of audience for these events by seeking to avoid counter-programming.
Reimagined Harvard Foundation/Center for Pluralism	Annually convene directors of University-wide centers to explore potential themes for Presidential level dialogue series; annually convene directors of orientation at all Schools for intellectual engagement in support of professional development.

Conclusion

The Harvard campus is full of people who appreciate the pluralism of our community and long for that pluralism to be a source of intellectual vitality, rather than conflict. Our subcommittee believes that an explicit effort to anchor the culture of the campus around practices of pluralism will improve the teaching, learning, and working environment for everyone, strengthen the caliber of our debate on campus, and enhance the ability of all members of our community to make a positive difference on the issues they care about on campus and in the world.

Appendices included in the Report from the Joint Subcommittee on Pluralism

APPENDIX A: THE MAJOR QUESTIONS DIALOGUE SERIES — SAMPLE EVENTS

The reimagined Harvard Foundation for Pluralism would present dialogues over the course of the year. Each event would be organized around a question and would have four participants and a moderator. The four participants would represent a wide spread of opinion in relation to the question at hand. They would be selected for their academic and intellectual excellence.

Each event would be staged in a major campus venue and also livestreamed into other venues on campus. For instance, an event might be staged in Sanders Theater or the Smith Center, and then livestreamed into an auditorium in the Medical School, and vice versa. Some should be physically based on the Harvard Square campus and some in either Longwood or Allston. Events should be scheduled with a view to maximizing participation.

All interdisciplinary centers and student groups pertinent to the themes of the dialogues would be engaged by series organizers to secure co-sponsorships and co-marketing, to support campus-wide crowd-building for the conversations.

A set of sample dialogue themes developed by our subcommittee, in consultation with the leaders of interdisciplinary centers on campus, is as follows:

1. **The Road to 1948:** What was the history that led up to the events of 1948 and what key lessons from that history can help us think about the present? How did European nationalisms, antisemitism, Islamophobia, the general transition from empires to nation-states in the first half of

the 20th century, pan-Arab nationalism, newly established Arab countries, and Israelite/Jewish roots and indigeneity in the Middle East all play a role in that history?

2. **The Road to Oct 7 and Beyond:** Starting from roughly 2000, what is the history of the conflict that led up to the events of Oct 7, the Hamas attack on Israel, the ensuing conflict between Israel and Hamas (and now further parties), and the resulting humanitarian crisis for Palestinians? How does that history help us understand and contextualize the present? Who are the parties to the conflict and why? How is religion being used in this conflict? What can we learn from other cases where religion has been brought into deeply political issues about land and governance, such as Kashmir and Chechnya?
3. **Where do we go from here on campus?**: What does pluralism mean in the context of our University and our education? Can we support one another, across deeply experienced differences and disagreements, as partners in learning? How can we help people connect their personal identities to identification with a shared learning community, a Harvard identity? What can engagement with values offer us as we think about identity and community? What is the value and what are the opportunities of dialogue in our University community? What are the obstacles? And why should we even care?
4. **Antisemitism and Islamophobia in America — and at Harvard:** What are the sources of the surge in antisemitism and rise in Islamophobic incidents in the US over the past decade? How are these phenomena impacting Muslim and Jewish communities? How are these increases affecting college campuses? Can we see any hopeful countertrends or constructive phenomena in this regard? How does the social shunning of Israeli and Zionist students arise and figure in campus life? How are experiences of Palestinian invisibility on campus part of the present situation? What demands of assimilation or self-negation are being made on different communities and individuals, as a price of belonging? How can we instead forge a culture of pluralism?

APPENDIX B: RETHINKING ACADEMIC BUREAUCRACY AS A COLLABORATIVE ENTERPRISE

The creation of the Harvard Foundation/Center for Pluralism offers a valuable opportunity to re-think the qualitative character of academic bureaucracy, a realm too often characterized by alienation and distance between faculty and staff. One of the most profound flaws of the traditional DEI framework — and indeed of much of contemporary University organization — is that it sustains this divide, reinforcing the sense that staff are functionaries rather than integral partners in the academic mission.

1. A New Model of Administration

A Reimagined Harvard Foundation/Center for Pluralism could, for instance, reimagine staff roles. Leading staff members in the Foundation should hold hybrid positions that bridge the academic and administrative worlds, involving not only programmatic leadership but also direct engagement with academic instruction. Such roles would allow staff to participate as co-creators of Harvard's intellectual and institutional culture, modeling the collaboration necessary to bring pluralism to life. Harvard could set a transformative precedent, demonstrating that institutional pluralism begins with the very design of its positions and the relationships they enable. Some examples of the alternative model described here currently exist throughout the FAS, as when individuals hold positions that combine a Senior Lectureship appointment with an administrative appointment (for instance, several Directors of Undergraduate Studies).

2. Faculty and Staff Pluralism Workshops

To address the perennial sense of mission drift among faculty, students, and staff, the Reimagined Harvard Foundation/ Center for Pluralism should emulate Radcliffe's exploratory seminar project, offering a program of workshops designed to align diverse constituencies around the values of pluralism. Faculty and staff clusters, departments, and programs could apply for tailored workshops convened with outside experts to learn, strategize, and experiment with embedding pluralism in their work.

Imagine a retreat on pluralism and the social theory canon for Social Studies, or a seminar on teaching conservatism across cultures for the Government Department. Consider the potential of Gen Ed courses invigorated by guest speakers, curricular planning support, and the kind of intellectual scaffolding that inspires faculty to engage deeply with pluralist themes.

These workshops would provide not just a framework for implementing pluralism but an arena for grappling with its complexities — contextualizing it within the particular missions of various academic and administrative units. Through these efforts, the Foundation can help build intellectual and strategic bridges across the University.

3. A Year-Long Thematic Series for Sustained Intellectual Engagement

Pluralism is not something that can be cultivated in sporadic, one-off events. To deepen the intellectual and cultural engagement of the Harvard community, we recommend not only a year-long thematic series of signature events, but also a further surround of workshops, readings, lectures, and discussions.

This series would aim to move beyond the shallow rhetoric of inclusion and toward the kind of substantive engagement that equips students to think critically and empathetically across profound differences. Over four years, students would ideally participate in one or two such series, attending talks, engaging with readings, and sharing meals with interlocutors. This would be pluralism as lived, not merely invoked. It might be a way of earning course credit.

While a year-long series might narrow attendance in some respects, it would deepen our community's collective capacity to address pressing questions, foster informed debate, and cultivate habits of sustained intellectual inquiry. Dynamic feedback mechanisms would ensure that the themes and speakers reflect the intellectual vitality of the student body itself.

4. Leadership for Crisis Response and Inclusion

The leadership of the Reimagined Harvard Foundation/Center for Pluralism must reflect its dual mandate: to serve as a beacon of pluralist values and a steady hand during moments of crisis. This is no small charge. The leadership team must include individuals with the empathy, intellectual dexterity, and moral clarity to address the fractious issues that inevitably arise in a community as diverse as ours.

This leadership will be crucial in fostering trust across constituencies — among students who feel alienated, among faculty who feel skeptical, and among staff who too often feel undervalued. To succeed, the Reimagined Harvard Foundation/Center for Pluralism must see crisis response not as a detour from its mission but as central to the work of pluralism.

5. Revitalizing House Diversity Tutors and Local Engagement

The Reimagined Harvard Foundation/Center for Pluralism should look to its own history for inspiration. House diversity tutors once played a vital role in bridging the intellectual and social lives of students, particularly around issues of race and culture. While the needs of today's student body are broader and more complex, the Houses remain an invaluable resource. The Foundation should explore ways to integrate House-based programming into its broader mission, encouraging Houses to serve as microcosms of pluralism.

6. Alain Locke as a Symbol and Intellectual Guide

If the Foundation is to embody Harvard's commitment to pluralism, it must anchor itself in a lineage that is both intellectually rigorous and profoundly humane. Alain Locke, a Harvard alumnus, the first Black Rhodes Scholar, and one of the most incisive theorists of pluralism, offers such a touchstone.

Locke's vision of cultural pluralism — his insistence that diversity enriches the human experience and that cultural exchange can deepen our understanding of ourselves and others — resonates deeply with the mission of this Foundation. His reflections on race, culture, sexuality, and religion remain as urgent today as they were in his time. To center Locke in the Foundation's narrative is not merely to honor the past but to remind ourselves of the intellectual and moral stakes of the work ahead.

The links below provide an entry point into Locke's vision, which should inform both the narrative and programming of the Center:

- [Video on Alain Locke's life and work] (https://www.youtube.com/watch?v=KCaE_jQAPa0)
- [Stanford Encyclopedia of Philosophy: Alain Locke] (https://plato.stanford.edu/entries/alain-locke/)

Appendix 4: Listening Sessions Guidelines

March 2024

Prior to beginning of session

Self-introductions and introduction of facilitator (if present).

Explain the purpose of the session and your place in it. For instance, you might mention:

- to understand people's experiences;
- to learn from their suggestions for solutions;
- to understand what values they think should guide this work.

Assure the participants that you are there to attentively listen for the purpose of substantive and constructive action, including recommendations to the president on a rolling basis.

You might acknowledge that the task force was recently formed, but the issues and events that participants have been experiencing and dealing with have been going on for months, if not longer. People may be feeling fatigue about being asked to share their experiences yet again.

Remind everyone that we're adhering to the Chatham House Rule,[626] under which individuals may refer to the conversation, but not which speaker made a particular comment. That said, if we hear something that indicates danger, or a level of seriousness which requires a need to report out, we may have a legal obligation to share with the appropriate internal office(s).

Ask participants not to record, broadcast, or live tweet the event in the interests of creation of a safe and open space where people can speak freely. (If it seems necessary, mention that Massachusetts is a two-party consent state and so recording without permission risks violating Massachusetts law.)

For Zoom sessions, you may want to ask people to refrain from using chat, and not to take screenshots of any kind.

During the session

First 25 minutes

Question: Since October 7, [2023] have you experienced what you would consider to be antisemitism? What form(s) did it take? [Ask the audience to take a few minutes to write down their responses before speaking.]

Follow up: If participants speak of feeling unsafe or unprotected, ask them what they mean by these words.

Next 25 minutes

Appendix: Listening Session Template

Question: What would you like to see done to improve the situation of Jewish members of the Harvard community? What concrete measures would you like to see Harvard take? [If participants speak of being safe and protected, please ask what they mean if those terms have not already been clarified.]

[626] https://www.chathamhouse.org/about-us/chatham-house-rule

Question: How would you balance Harvard's commitments to academic freedom, freedom of expression, and the value of encountering views different from your own with your own sense of inclusion and well-being at Harvard?

Last 10 minutes

Question: Harvard's 2018 Values Statement[627] refers to "respect for the rights, differences, and dignity of others, honesty and integrity in all dealings, conscientious pursuit of excellence in one's work, accountability for actions and conduct in the community, and responsibility for the bonds and bridges that enable all to grow with and learn from one another." Does this statement correspond with your own sense of what Harvard should be? Has Harvard failed to realize these values? If so, how?

Question: Is there anything that we didn't ask that we should have asked?

Thank everyone for attending and participating.

Acknowledge this is not easy, and it is important.

Offer a brief summary of the main points expressed by the participants.

Let people know that they can send additional feedback to the facilitator via email (if this is true) and share the email address.

After the Session

Staff will prepare a brief written summary of the session's main takeaways, including representative data.

Facilitation tips (shared with us by the Center for Workplace Development)

Create opportunities for everyone to participate:

- In addition to keeping the group focused on the content of the discussion, keep track of how participants are communicating with each other, who has spoken and who hasn't spoken.
- If a person is quiet, ask if they have thoughts or ideas they want to share with the group.
- If a person dominates the discussion, ask them to hold their thoughts as others have ideas to share. Then, come back to them when possible.
- Set a time limit for responses (approximately 2 minutes each) to ensure everyone gets a turn.
- If multiple small conversations occur, ask everyone to focus on one conversation at a time.
- If there's silence, sit with it a bit. Try counting silently to 5 before you restate or rephrase the question. People sometimes need time to think before they respond.

If conflict arises:

- Reaffirm purpose and ground rules.
- Focus on the substance of the ideas or opinions — not personal style.

[627] https://inclusionandbelongingtaskforce.harvard.edu/files/inclusion/files/vii._appendix_d._revised_values_statement.pdf

- Remind participants that consensus is not the goal — hearing multiple perspectives is the goal.
- Offer the possibility that you move to the next question and come back to this later in the meeting if time allows.

If someone becomes forceful or disruptive:

- Remain calm, and politely but firmly ask the person to lower their voice so others feel comfortable sharing.
- Refocus the conversation on listening respectfully to different views rather than debating one perspective.
- Suggest taking a mini break of 1 or 2 minutes if emotions are running too high, then reconvene.

If someone cries:

- Acknowledge their emotions with empathy, pause briefly, and continue the conversation.
- Ask if they need a short break or would like to continue speaking.
- Remind others this is an understandably emotional topic and to listen supportively without judgment.

Appendix [to Appendix F]: Survey Instrument [302]

I. Introduction

At the end of the 2023-24 academic year, Harvard's two presidential task forces — one aimed at combating anti-Muslim, anti-Arab, and anti-Palestinian bias, the other aimed at combating antisemitism and anti-Israeli bias — jointly organized an opt-in survey of the Harvard community. Between May and September 2024, the online survey was open to students, faculty, and staff across all of Harvard's Schools.

The survey asked questions about respondents' sense of belonging and safety at Harvard and solicited what factors contributed to that sense of belonging and safety. The survey also asked respondents for their recommendations. The survey asked about respondents' identities, such as their religious, racial, and political identities. In this report, we detail the findings from the survey, including both qualitative and quantitative results.

The intent of the survey was to complement the listening sessions conducted by the two Task Forces in the Spring of 2024. It provided a structured way for a wider segment of the Harvard community to express their opinions in an anonymous format. Compared to participating in listening sessions, taking the survey required less time and could be done when convenient for the respondents rather than at a scheduled time, and in a way that allowed for anonymity, which was a serious concern for many respondents given incidents of being targeted and/or doxxed. We should note that the survey was not designed to be representative of the entire Harvard community for two reasons. First, we lacked an appropriate sampling frame for the affected/relevant communities. For instance, we do not know precisely how many Jewish identifying and Muslim identifying individuals are in the Harvard community. Similarly, there may likely be relevant populations from other demographic groups that hold views on the issues related to the Task Forces or may have experienced/observed bias but are not readily verifiable based on their demographics. Second, given the specific intent of the survey as noted above, it was not administered or marketed as a University-wide survey like the 2019 Pulse Survey, for instance, but rather distributed in a variety of channels on behalf of the two Task Forces. This survey exercise is therefore best viewed as a way to incorporate more opinions from those community-members who wanted to anonymously weigh in than listening sessions alone would allow and to also do so in a closed-ended format that enabled presenting quantitative results overall and by various relevant respondent demographic attributes as outlined in the pre-analysis plan. Importantly, the findings provide a window into the social, educational, and professional environment at Harvard. They also point to the need for the continuation and expansion of efforts that gauge the wellbeing of the community and ways to address their concerns.

A core finding is that most respondents do not feel comfortable expressing their political views and believe doing so would jeopardize their academic and professional careers. Most respondents also reported that that the 2023-24 year was worse than the previous year in terms of their sense of well-being and safety.

Faculty and staff feel a greater sense of belonging than students. They are more comfortable expressing their opinions and less likely to have personally experienced stereotyping and discrimination. Students feel particularly stifled in their ability to express themselves.

Muslim respondents are especially likely to say they do not feel a sense of belonging and safety at Harvard. Among students, we find that Jewish respondents and Muslim respondents have much more negative experiences than the two largest religious cohorts in our survey: Christians and Atheists/Agnostic/No Religious Affiliation. On nearly every measure, Muslim and Jewish identifiers are less comfortable sharing their views and are more likely to report experience with discrimination than Christians and Atheists/Agnostic/No Religious Affiliation. Among racial groups, Middle Eastern or North African (MENA) students offer the most negative experiences of any group.

When asked what factors contributed negatively or positively to their experience, the survey respondents are mostly in consensus that internal factors were more positive than external ones. Notably, external

events, external actors, and external media contributed negatively to their experiences, whereas student, faculty, and staff interaction contributed mostly positively. However, student interactions outside academic spaces, especially in online interactions, contributed negatively to the experiences of Jewish and Muslim students. Respondents evaluated University policies and administrative responses less positively.

II. Survey and Methodology

The survey was fielded starting late May 2024 with most responses coming in the earlier part of the summer. The data from this analysis spans from May 22 to September 15 and comprises of a total of 2,295 submitted responses. The survey was posted on the two Task Forces' websites. Responses were solicited by the task forces sharing the survey link with community members who had joined the listening sessions hosted by the task forces during the Spring semester. The link was also shared with various affinity groups.

The pre-analysis plan for this study is provided in the appendix along with the survey instrument. For each of the substantive questions in the survey, we show the overall distribution of responses. We also tabulate responses by subgroups within key demographics, including affiliation (e.g., faculty, staff, student), School, age, national identity, race/ethnicity, religious views, gender, sexuality, and political ideology. The sub-groups that show the most meaningful differences are in the main text while the remaining ones are in appendices. In places, we further subdivide the sample, for instance, we look at differences by religious affiliation just among students. We also employ regression analysis to better understand how a variety of background characteristics correspond to the substantive responses. The multivariate analysis is not explicitly described in the pre-analysis plan, but it is a helpful extension to the original plan and assists our understanding of the sample.

In Table 1 below, we show the distribution of respondents by demographic subgroup.

Table 1: Summary Statistics

Summary Statistics	Count	Percent		Count	Percent
	2295	100.00		2295	100.00
Affiliation			**Religion**		
Undergraduate	233	10.15	Agnostic/Atheist/No Religious Affiliation	875	38.13
Graduate/Post-Doc/Fellow	495	21.57	Christian	592	25.80
Faculty	489	21.31	Jewish	447	19.48

51-60	321	13.99	Other	170	7.41
61+	317	13.81	Prefer not to answer	243	10.59
Prefer not to answer	186	8.10			

Table 1 Note: Some categories do not sum to 100% since some respondents provided multiple responses to the same question. "Other" category for affiliation represents those that selected "Other" as their affiliation in the survey. "Other" category for religion aggregates: Buddhist, Hindu, Taoist, Shintoist, Sikh, Bahai, Jain, followers of folk religions, those who identified as spiritual, and those who chose to self-identify. "Other" category for School aggregates: HDS, HKS, GSD, HGSE, SEAS, HLS, Division of Continuing Education (including the Extension School), Central Administration, and those who simply selected "Other" as their School in the survey. "Other" category for gender aggregates: Gender Non-Conforming, Genderqueer, Nonbinary, Questioning, Transgender, and those who chose to self-identify. Other category for race aggregates: American Indian or Alaska Native, Native Hawaiian or Pacific Islander, and those who chose to self-identify. "Other" category for sexuality aggregates: Bisexual, Queer, Pansexual, Asexual, and those who chose to self-identify. "Other" category for ideology aggregates: Apolitical and those who chose to self-identify.

As we noted above, the survey was intended to provide an avenue for those affected by and/or desiring to express an opinion on matters related to the mandate of the two Task Forces — examining anti-Arab, anti-Israeli, anti-Muslim, anti-Palestinian, anti-Pro-Palestinian bias, and antisemitism as experienced by the Harvard community. Since this population frame is not readily identifiable and the survey was not administered as a University-wide survey, we cannot provide appropriate response rate numbers or say how representative our sample is of this population or of the underlying demographic populations such as race, religion, and political views (regarding the conflict). That said, we can use the 2019 Pulse survey — a University-wide effort at Harvard — as a benchmark Appendix D [of this Appendix 5] shows comparisons with the Pulse survey. As the first table shows, our sample here is 66% White, which is slightly higher than that in the Pulse data (59%). Asian/Asian Americans and Black respondents are underrepresented in our survey, and MENA respondents are slightly overrepresented, compared to Pulse. Respondents to this survey are twice as likely to not list a race (13% vs 6%) compared to Pulse.

By religion, Christian identifiers are effectively equally represented in this survey compared to Pulse (25% vs 26%). Muslim and especially Jewish respondents are somewhat overrepresented relative to the Pulse survey (3.9% vs 1.8% and 19.5% vs 6.8% respectively), as one may expect given the intent of the survey. "No religion" is the largest religious category in both surveys, with 38-39% of respondents identifying this way. Finally, a big difference between Pulse and this survey here is in the degree to which faculty and students are represented. In Pulse, there are 4 ½ times more students than faculty (45.7% vs 10.1%). In the current survey, faculty and students compose similar shares of the sample (21.3% and 26.5% respectively).

In addition to the survey questions that will be analyzed with quantitative methods, some survey questions solicited open-ended responses as a follow-up to the quantitative questions. While these were entirely optional, 81% of respondents provided at least one open-ended response. We analyze the qualitative data by directly reviewing responses from demographic groups that were outliers in their negative experiences as revealed in the quantitative analysis as well as by using machine learning techniques to help synthesize the main themes and salient responses for all respondents. The quotes were selected to reflect the main themes observed while protecting the respondents' identity. We present this qualitative analysis alongside the quantitative findings as it helps provide some more color and context.

III. Main Results

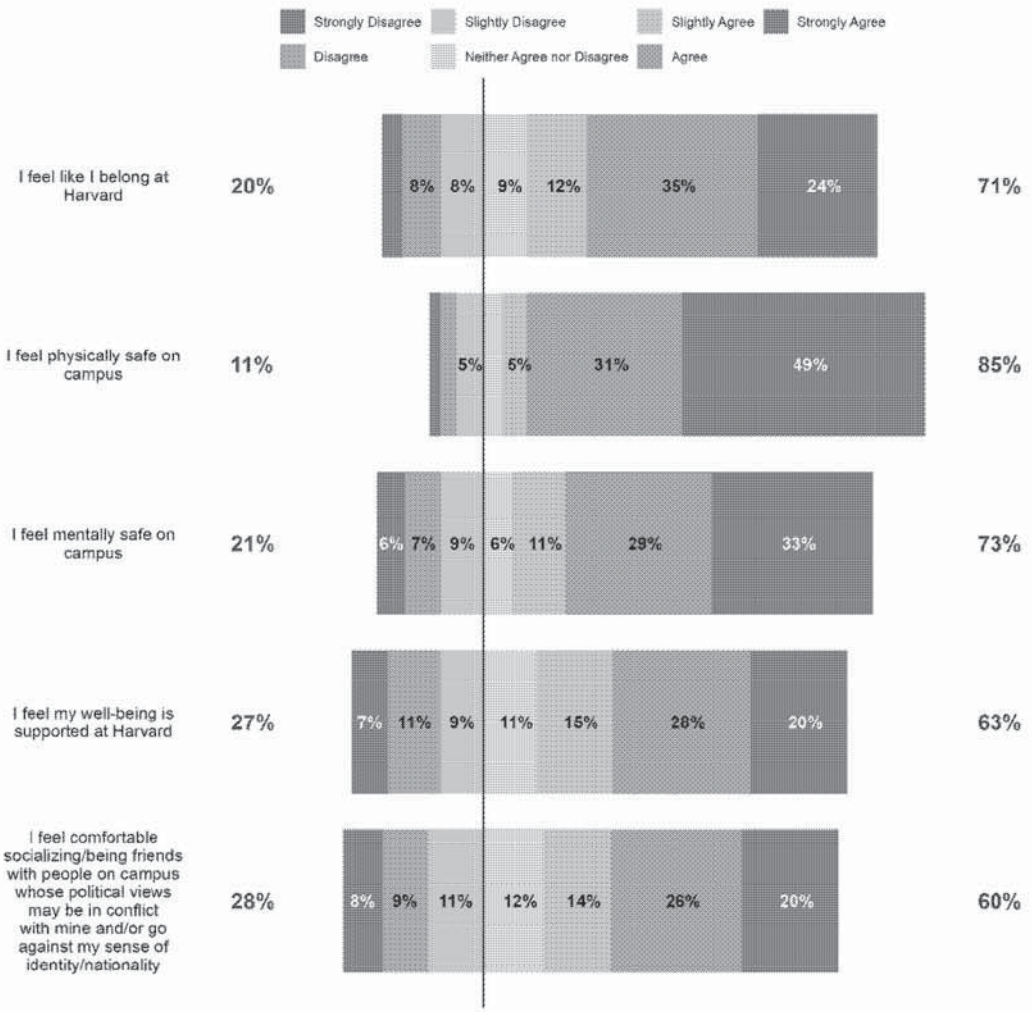

A. Safety, Belonging, and Free Expression

The first section of the online survey asked respondents a battery of ten agree/disagree questions. For each, respondents used a 7-point scale (from strongly disagree to strongly agree). They could also select that they preferred not to answer.

In Figure 1 below, we show responses to five of these ten agree/disagree items that relate to safety and belonging.[628] One in ten respondents (11%) reported they do not feel physically safe on campus. Twice as many reported that they do not feel like they belong or that they do not feel mentally safe on campus. Just over a quarter of respondents reported they do not believe their well-being is supported. Finally, 28% said they do not feel comfortable socializing with people on campus whose political views conflict with their own or go against their sense of identity. Thus, while most respondents reported positive sentiment toward their sense of safety, well-being, and comfort at Harvard, it is not uncommon for community-members to express negative sentiment either.

[628] We only report non-missing values for each question. Missing responses constitute 0.7-2.2% of all responses.

Figure 1: Safety and Belonging — All Respondents

Note:
Percentage labels omitted when less than 5 percent.
Percent Agree = Percent 'Slightly agree,' 'Agree,' or 'Strongly agree'.
Percent Disagree = Percent 'Slightly disagree,' 'Disagree,' or 'Strongly disagree.

As noted previously, respondents could also provide open-text responses to further elaborate on their quantitative responses. Specifically, we asked them to share recent and/or salient experience(s) — positive and/or negative — that could shed further light and/or nuance on their quantitative responses. Looking at this qualitative data helps further our understanding of the quantitative findings.[629]

Some respondents spoke directly to the low level of physical and mental safety they felt on campus. One respondent (#978, student) explained how "names being posted online so that people will search for those names and choose not to hire those people; faces being put on trucks and the campus doing nothing about it, students having guns pulled on them and having their rooms raided or their belongings thrown out also makes it a much less safe environment mentally and physically." Another respondent (#512, missing affiliation) wrote, "I am not comfortable and do not feel safe expressing my ethnic, religious or political self at Harvard, or even in this survey, for fear of retaliation. This has been the case for many years. The recent events on campus have only solidified this for me." A third (#135, missing affiliation) succinctly wrote, "I

[629] We provide excerpts directly from the quotations from respondents without changing any of their language. The only exception is that we correct obvious typos and spelling mistakes.

definitely do not feel safe on campus or in remote Harvard environments to express my political opinions and personal beliefs."

A key theme mentioned by respondents was how the response at Harvard to expressing opinions over the past year made Harvard less safe. Several respondents commented on Harvard's response directly — one respondent (#1460, student) wrote, "I have been very harshly punished by Harvard administrators for expressing my political views. These punishments have included sudden eviction from my source of housing and food, sudden termination from my job, the threat of not allowing me to complete the semester, the clear and material threat of calling in police against me, and the withholding of my degree for an entire year after I completed all my graduation credits with high honors… I have never felt more unsafe or unsupported in my life than I have at the hands of Harvard administrators this past year." Another respondent (#793, staff) echoed this sentiment, saying "I have felt unsafe by the way that Harvard has conducted themselves. People have been fired for speaking up for their beliefs and displaced from their homes. It is not right for a university to act this way when people have been peaceful, non-violent, and have not physically harmed anyone their actions."

Respondents also spoke to the lack of comfort and well-being they felt socially on campus. One respondent (#1803, student) noted, "I generally refrain from discussing political/controversial topics with members of the community who I do not know well because I find that conversations often become hostile and campus reputations are easily harmed." Another (#2167, student) wrote, "I do not feel mentally safe on campus. Though I am not Israeli, I have openly expressed sympathy for October 7th survivors and attended events for Holocaust survivors. I have faced many social consequences for not thinking in ways my classmates would deem progressive, which I find unreasonable."

Another frequent theme was a perceived lack of response by the University to outside actors — one respondent (#1091, student) wrote, "The sight of doxxing trucks and planes flying hateful messages like 'Harvard Hates Jews' around Harvard Square deeply disturbed me. Despite their prominent presence, it seemed like the University wasn't taking any action, which left me feeling perplexed and unsafe. The loud and repetitive circling of the planes over the yard heightened my anxiety, especially since I couldn't discern their intentions." Another respondent (#708, staff) described the presence of non-affiliated protestors on their safety — "I feel safe when it comes to Harvard and the people who are involved with the University. However, there are outside actors who will show up at the Science Plaza and pick fights with people for not supporting their cause. These same outside actors (or at least, other outside actors sharing their viewpoints) have attempted to assassinate the character of much more important people than myself on campus." Similarly, a different respondent (#2080, staff) noted that "the administration seems to prioritize external political interests over the well-being of internal community members, and has not done enough to earn trust among the community."

However, a few respondents had somewhat different views regarding safety and felt more comfortable despite the tumultuousness of the past year. One respondent (#1603, staff) said, "I have never felt unsafe on campus, but the camp in the yard made a big mess of trying to just get my own things done. I wish it had made a difference without disrupting everything and making folks angry but ineffective." Another respondent (#413, student) wrote, "Much of the discourse that would make someone feel unsafe or unable to express their opinions happens online. In my experience, people are often less combative in person and the negative climate is more digital." A third respondent (#532, staff) even stressed that the safety on Harvard's campus should encourage challenging conversations — "I think most of the students, faculty, and staff are perfectly capable of engaging in difficult dialogue… Harvard's campus is very likely the safest place on the planet for Palestinian, Israeli, Jewish, and Muslim students, faculty, and staff to engage in productive dialogue. Make it so, keep leaning into this. Wasted potential that can genuinely save lives is hard to witness."

HHSHarv_00000391

The remaining five agree/disagree items in this first battery of survey questions largely reflect on how comfortable or uncomfortable it is to express one's views on campus. Is it easy to express oneself? Do respondents feel they suffer professionally or academically, or face outright discrimination, when they express their views? Figure 2 shows overall results.[630]

This second graphic shows that discomfort with expressing one's views is quite common, and much more common than feeling physically or mentally unsafe. About half of all respondents reported that they are uncomfortable expressing their opinions and uncomfortable expressing their political opinions. Most respondents (59%) believe there are academic and professional penalties for expressing one's political views at Harvard. Nearly a third (29%) said that they have personally experienced discrimination, stereotyping, or biases because of their views on current events. When asked about expressing religious beliefs and disclosing ethnic identifications, a third of all respondents do not agree that they can do so comfortably.

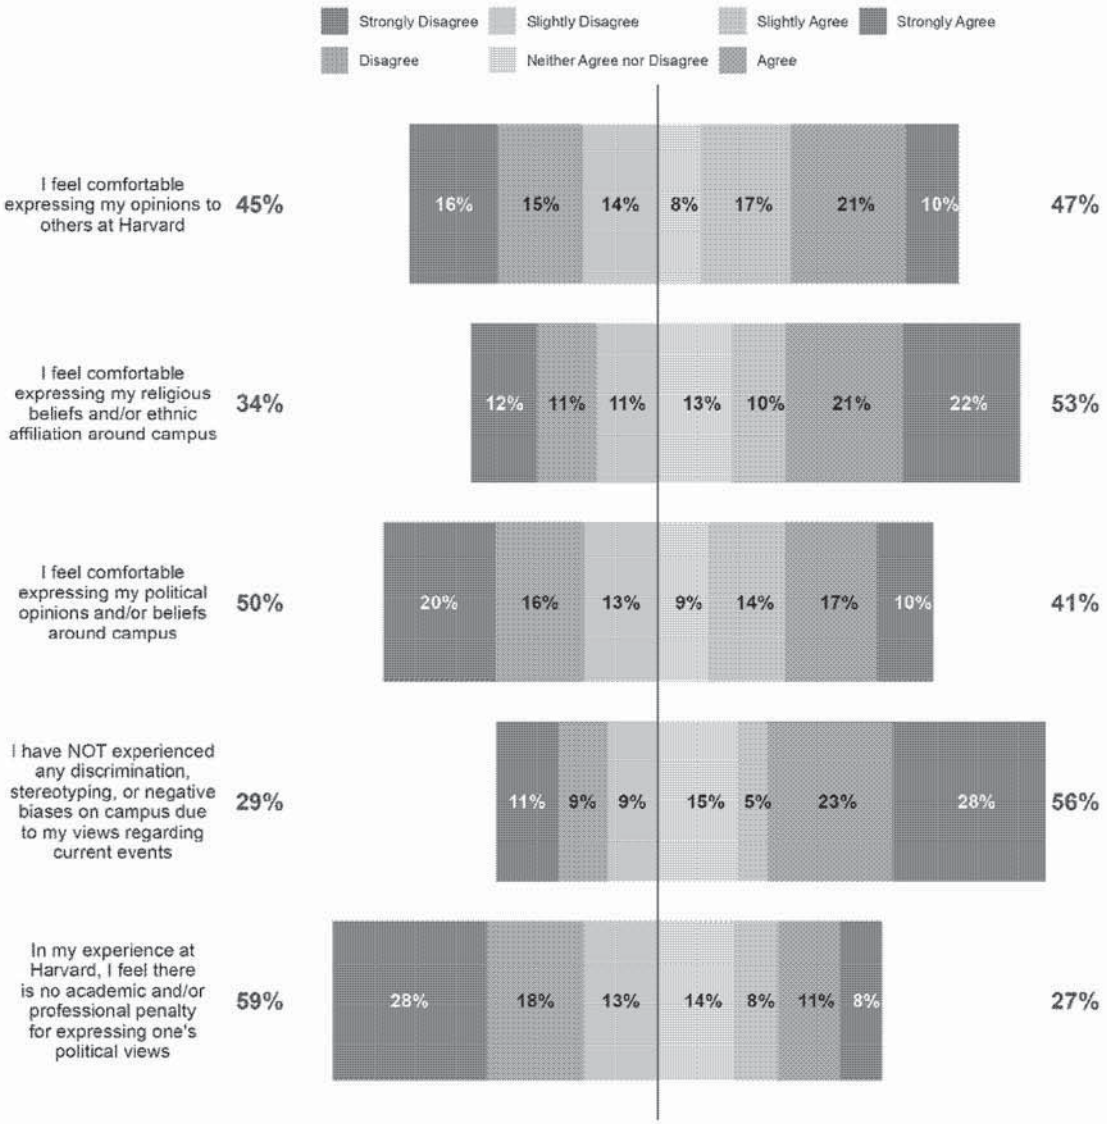

It is worth emphasizing that readers of this report may disagree about the normative interpretation of the results in these first two graphics. For instance, some may believe that at a university, faculty, staff, and students should all feel at liberty to express their views on political and other matters. If they do not feel comfortable doing so, this means the University is failing to create a culture of dialogue and debate. Others may believe, particularly for staff and faculty, that it is inappropriate to express one's personal views in the workplace. Thus, some readers may believe it would be better for more respondents to feel uncomfortable expressing their views.

As another example of normative disagreement, consider the item about being comfortable socializing with those on campus who have conflicting viewpoints. Some may believe that everyone should feel comfortable socializing with those who disagree with them politically; others may believe that community-members should not need to feel comfortable doing so.

Thus, while on some of these survey items, we think there would be widespread agreement about the interpretation of results (e.g., students feeling physically unsafe on campus is a problem), on other items, the interpretation of results would be more contested.

[630] We only report non-missing values for each question. Missing responses constitute 0.6-2.6% of all responses.

Figure 2: Freedom of Expression — All Respondents

Note:
Percentage labels omitted when less than 5 percent.
Percent Agree = Percent 'Slightly agree,' 'Agree,' or 'Strongly agree'.
Percent Disagree = Percent 'Slightly disagree,' 'Disagree,' or 'Strongly disagree.

Consistent with the quantitative results, respondents in the open-ended questions described a divisive environment on campus when it comes to political discourse. While respondents praised the diversity of Harvard, those who had been in classrooms or other settings that brought up political divisions described a level of discomfort. This sense of discomfort comes in many varieties. For instance, as one respondent (#932, staff) said, "I would never feel comfortable voicing my opinion on the current war in Gaza." The respondent does not share his/her identity with others. Another respondent (#894, staff) feels at home at Harvard because his/her views align with the majority view, but laments how unwelcome the environment is to those who are politically conservative. Harvard students, the respondent says, "are militantly passionate about certain approved views and they will make anyone who disagrees with the party line regret it."

Respondents feel they could be stigmatized or punished for expressing views outside of the mainstream views on campus. One respondent (#856, student) explained that "the climate at Harvard is such that unless you profess orthodox woke views, you're ostracized. Admin has contributed to this culture, as have some faculty. I've basically given up on the whole situation and don't particularly care at this point." Another (#346, staff) wrote, "While, in theory, there is freedom of speech, academic freedom, ethnic and religious diversity on and around Harvard, in reality those that are vocal or at either far end of a spectrum are often rejected. Given the dynamic and often volatile climate on campus, I find myself not wanting to discuss anything at all outside of just work related topics."

Respondents also reflect on institutional practices that lead to a strained environment for political expression. Several respondents believe that pressure from donors and external actors has led Harvard to punish students when they express dissenting viewpoints, with one respondent (#474, student) saying, "It was really astonishing to see the administration react so poorly towards student protesters simply to save face and protect donor interests. The administration simply could have let the students walk at their graduation without any consequence, but chose retributive action that ultimately eroded the faltering trust between the student body and the administrators." A staff member respondent (#132, staff) stated, "Freedom of expression has been severely restricted by OUTSIDE actors. Alumni and donors should NEVER have a say in Harvard life. Harvard is a FACULTY LED university, not donor led, not alumni led, not student led."

Respondents also reflected on the pressure coming from inside the University, with one (#297, fellow) saying "There is a peculiar sensitivity to expressing divergent views in light of recent events whether international or US-related. Often certain perspectives shared are constrained or deterred if they don't appear to align with University opinions. This breeds discontentment and likely civil disobedience." They also spoke about the effect that disciplinary action against protestors had on the overall sense of freedom of expression on campus — one respondent (#1067, staff) commented, "I have seen that Harvard administration has decided to pursue disciplinary action against staff and students who have peacefully protested, and in some cases simply been in the vicinity of the peaceful protesting. This makes me feel extremely uncomfortable with the administration's position on protecting free speech and the ability to express one's political views without fear of retaliation. It is Harvard's actions as an institution that is concerning to me, not the actions of students or staff with differing viewpoints."

Many respondents raised concerns about the unclear enforcement of free speech rules and confusion over the policies. One respondent (#2035, staff) said, "Harvard is consistently contradicting itself in advocating for free speech and social justice yet at the same time clamping down on those who speak out." Another (#2074, student) stated, "Honestly, I am agnostic to the School's policy on student speech but the sheer inconsistency of it astounds and disgusts me." A third respondent (#1054, staff) specifically explained their personal concerns: "As a staff member, I do not feel safe in expressing political opinions, particularly when they go against what many students and faculty seem to believe. While faculty and students seem to have license to express theirs, the University is lacking clear guidance, or at least clearly communicated guidance, on what staff members can and cannot say, as well as whether such speech is as supported as it is for faculty and students." A fourth (#907, student) similarly wrote, "I self censor these views because I do not believe to have any protection from the University on freedom of expression."

Another major theme arising from the open-ended responses is the sense that individuals no longer want to discuss views on campus. Some respondents explained they do so to avoid offending others even unintentionally or to prevent others from misinterpreting them. One respondent (#1008, post-doc) said "I simply don't express much of my political views, or if I do, I am careful to use tempered inclusive language," and another (#231, staff) similarly remarked, "The shifting definitions of terms that used to describe specific behaviors, actions, or identities has occurred under such ideological/partisan strain that it

is difficult to know how to express oneself, even when trying to comfort or empathize." A third respondent (#796, staff) though, explained how their views have shifted away from discussing sensitive topics in the workplace as a broader rule: "The events of this past year have made me question whether it is appropriate at all to be discussing my personal political views at work. As a person in a leadership role, I would not want my expression of views to inhibit more junior people or make them feel that they are not welcome or unable to advance because my views are different than theirs. Conversations with friends at work are different when they are during a break, but during working hours I sometimes wonder if we should all just be more mindful about when and how we express our views so others do not feel excluded."

A different group of respondents emphasized the importance of continuing to have difficult conversations openly on campus. "The penalties can be academic, professional, or social. Yet, I really want to push myself and others to have thicker skin, and better faith. It's impossible to stay comfortable, impossible to avoid 'harm.' Our freedom (of speech) should be exercised, not minimized," wrote one respondent (#217, staff). A second respondent (#2072, student) similarly commented, "While I find many conservative views antithetical to my own views, I think part of studying at a university is having your own views challenged. If we can't accept those with differing views at a place where diversity is encouraged, how can we expect society to do the same. I find that the University prides itself on diversity of thought, religion, sexuality, etc. — and that's a good thing, I love that about Harvard — but at least at the graduate level, I do not think enough emphasis is placed on accepting people with conservative views or at least welcoming them even if we disagree with their political values."

Finally, some respondents spoke positively about the status of free speech at Harvard and the administration's policies. One respondent (#1536, staff) wrote, "I feel the University has done a good job overall at trying to accommodate a very diverse set of opinions and feelings while honoring our values and the right to free speech." Another (#1409, staff) similarly commented, "In my relations with Harvard colleagues, I prefer to acknowledge differences, and despite our differences, focus on the good we can do together in fulfilling Harvard's noblest values, and when we have true consensus, act. I welcome the new Institutional Voice policy."

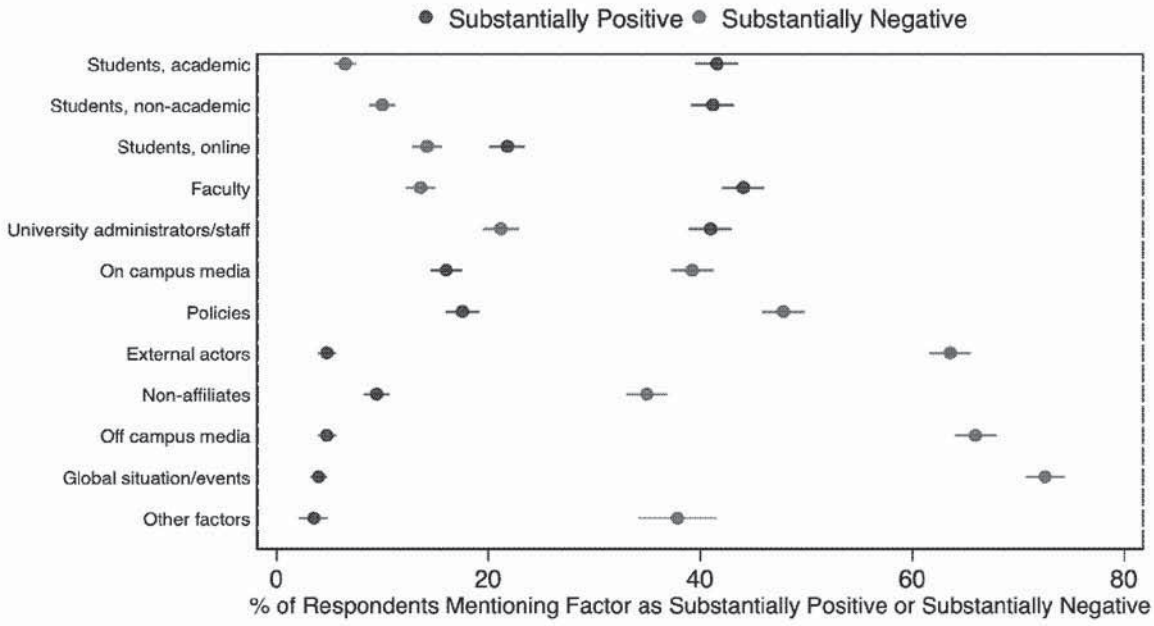

After answering this battery of ten agree/disagree questions, the survey asked respondents, "Compared to this time last year, how has your sense of safety, belonging, and/or ability to interact positively with the community on the Harvard campus changed?" Recall that respondents took this survey in the spring or summer of 2024, and so they were being asked to reflect on how they felt after the 2023-24 school year compared to after the 2022-2023 school year. They could say they felt the same or that things had become much worse, worse, better, or much better than the prior year. The data (see appendix B) shows — perhaps unsurprisingly given the circumstances of the 2023-24 school year — that there was a significant worsening with 61% reporting worsening situation (25% say much worse and 36% say worse). Thirty-six percent reported the situation was the same as a year before, and 3% said the situation was improved.

B. Contributing Factors

The survey asked respondents to reflect on the factors that contributed positively or negatively to their experience on campus. What factors made them feel "a sense of safety, belonging, and/or ability to interact with the community"? And what factors made things worse? Based on what the task forces had heard from the community in the open-ended listening sessions, we provided a pre-defined set of factors while allowing respondents to suggest additional factors (12.9% did). Since a given factor may contribute both positively and negatively, we allowed for both options: respondents could check that a factor contributed positively and/or negatively or that it did not have a substantial impact. Moreover, for each factor we allowed respondents to provide open-text details that we also include below.

Figure 3 below considers each factor in turn and presents the percentage of individuals who report this factor as positive and/or negative.[631] Overall, the findings make clear that interactions with faculty, students, and staff were seen as generally positive, whereas factors associated with media, external actors, and University policies were seen as generally negative. Recall that a large fraction of respondents to this survey are faculty and staff, and so their perceptions of interactions might differ than we restrict the sample just to students, as we do later on in this report.

Figure 3: Contributing Factors — All Respondents

Exact wording for each factor shown below:

Students, academic: In-person interactions with Harvard students in academic settings (e.g. classroom, lab, etc.)
Students, non-academic: In-person interactions with Harvard students in non-academic settings (e.g. extracurricular activity, event, or social gathering)
Students, online: Online interactions with Harvard students
Faculty: In-person or online interactions with Harvard faculty
University administrators/staff: In-person or online interactions with Harvard administration/staff
On campus media: On campus media coverage (print/social)
Policies: Harvard University and School policies
External actors: External actors' presence/influence on campus life and climate
Non-affiliates: In-person or online interactions with individuals not affiliated with Harvard
Off campus media: Off campus media coverage (print/social)
Global situation/events: Global situation/events
Other factor: Other factor

We now examine each potential factor in turn:

(1) In-person interactions with Harvard students in academic settings (e.g. classroom, lab, etc.)

41.6% rated a positive factor; 6.5% rated a negative factor.

In open-ended explanations, responses with positive reflections praised students for their thoughtfulness, intellect, and their desire to have open and honest discussions, even on controversial topics. One respondent (#2150, faculty) noted they "had a fantastic class, multi-cultural, from all parts of the world, different religions, and views. Classroom experience was still fantastic." Respondents felt that they benefit from a sense of community on campus centered around a desire to learn together, with one respondent (#1141, student) noting "In-person interactions with students is the heart of the on-campus connection. These interactions provide a sense of belonging and creative interaction that are essential to higher

[631] The omitted category for each factor consists of those that answered "not substantial/no opinion" for each factor or did not answer the questions. 0.4% of respondents did not answer the questions.

education." Most students, respondents said, understand that difficult political and social issues are complex and nuanced.

Respondents with negative evaluations found students to be easily offended when confronted with opinions they disagree with. One respondent (#1320, faculty) summarized this as "Students do not give others grace for differing opinions, and easily dismiss others in the course of class discussions. If someone misspeaks and then tries to course-correct, there is no forgiveness." Interactions with students in classes, some respondents noted, tend to be superficial and not lead to durable friendships and relationships. Some students are seen as struggling when discussing sensitive issues. Some respondents also have experienced directly either discrimination, bias, or teasing based on attributes such as their race or their political views.

(2) In-person interactions with Harvard students in non-academic settings (e.g. extracurricular activity, event, or social gathering)

41.2% rated a positive factor; 9.9% rated a negative factor.

Respondents expressed genuine excitement for the opportunity to learn from students from a diversity of backgrounds. Students are interested in what others think. One respondent (#324, staff) called students "thoughtful, curious, and wise." Another respondent explained that outside academic settings, students are not always discussing current events; they bond over shared interests like sports and entertainment.

Respondents who feel that student interactions in non-academic settings have been negative pointed to several contributing factors. One is that some students do not seem interested in exploring difficult issues with nuance, but rather want to be provocative or dominate conversations with their views. Another is that there is special difficulty in talking about sensitive issues such as race and gender without fear of retribution, with one respondent (#269, staff) saying they had "very intense social conversations in which it was made clear that if you didn't agree, you would be verbally attacked and criticized behind your back." A third is that students largely do not want to have deep conversations about issues.

(3) Online interactions with Harvard students

21.8% rated a positive factor; 14.1% rated a negative factor.

Respondents who found online interactions with students to be positive mostly articulated similar themes to those about in-person interactions. Namely, they find students online to be open, empathetic, thoughtful, and inquisitive. Respondents also reflected on the benefits of diversity of perspectives in online interactions. Much online interaction is not political at all. As one respondent (#152, faculty) said, their "online interactions with Harvard students have been very similar to this year as in prior years" adding that "political discussions basically never arise for me — we are scientists and stay focused on that."

Those with negative evaluations pointed to the intolerance they witness online. One respondent (#1075, student) suggested an increase among students in "racism, Islamophobia, and colonial mentalities." Another (#1111, NA) noted that they "hate that Sidechat and other University socials exist because they perpetuate radical views, student conflict, etc." A third respondent (#998, faculty) found online student behavior to be lacking nuance: "I have been very disappointed by the level of vitriol, ignorance, and binary thinking in these posts."

(4) In-person or online interactions with Harvard faculty

44.1% rated a positive factor; 13.6% rated a negative factor.

Respondents with positive insights about their interactions with Harvard faculty pointed to the supportive, thoughtful environments created by faculty, with one respondent (#278, faculty) noting "I saw colleagues engaging current events in unprecedented ways, reading deeply and broadly and wanting to discuss academic works on the topic". Most respondents feel energized by the professionalism and research-orientation of faculty, but typically avoid politics-related conversation, with one respondent (#152, faculty)

explaining: "Interactions have been very similar to in prior years (which is to say, positive), but it's important to note that political topics rarely (if ever) arise."

On the negative side, respondents find that discussions with faculty members are superficial because there is a general avoidance of sensitive subjects. Respondents also find that interactions can be difficult due to underlying power dynamics between faculty and students or because of a lack of diversity among faculty with respect to race and gender. One respondent (#1712, faculty) succinctly said, "They have power to decide my future. I am very careful how I present myself".

(5) In-person or online interactions with Harvard administration/staff

41.0% rated a positive factor; 21.1% rated a negative factor.

Respondents with positive interactions with administration and staff describe staff as helpful, collegial, and effective. One respondent praised technology, maintenance, and library staff. Another respondent (#395, staff) specifically praised staff for helping the University work through conflicts in a constructive way — "My interactions with administration and staff have all focused on finding a way through these problems and protecting students".

Respondents with negative interactions did not think staff and administration performed well in dealing with campus conflicts. Multiple respondents felt that staff-members approach difficult issues with increasingly inflexible, top-down methods, with one (#1788, student) explaining "Top-down policies around discipline, and restrictions on what they can say through public emails, made it difficult to have any good interactions".

(6) On campus media coverage (print/social)

16.0% rated a positive factor; 39.2% rated a negative factor.

Respondents with positive experiences with on-campus media praised campus publications for platforming a more diverse set of perspectives than off-campus publications. Respondents found on-campus media to be entertaining, informative, and leading to dialogue. One respondent (#277, faculty) noted "I found opinion pieces on both sides, some agreeable, some disagreeable; this is as it should be."

Those with negative experiences find that the on-campus publications, like mainstream publications, prioritize negative stories and casting blame, presenting a skewed view of Harvard. One respondent (#1520, staff) explained "I felt a lot of the media coverage was negative and did not provide for a full picture of what was happening across the University." Respondents find this approach is not constructive and does not help build a sense of community.

(7) Harvard University and School policies

17.5% rated a positive factor; 47.8% rated a negative factor.

Respondents with positive reviews of Harvard polices reported that policies succeed in being inclusive, thoughtful, and balanced. As one respondent (#853, staff) said, "I felt like policies tried to balance different views as best as possible."

Respondents with negative reviews had a wide variety of themes. One theme is that policies are made reactively rather than proactively, which undermines the goal of the University having a principled approach to campus issues. One respondent (#979, staff) explained this as follows: "The School policies have not felt clear and have seemed to change with the times rather than policies intended for the best academic honest approach". Another theme is that policies have failed to get the balance right between free expression and creating an inclusive environment. A third theme is that rules are vague, and enforcement of rules is inconsistent, and so students do not have a clear sense of what behaviors will be punished. Finally, respondents believe that University policies are politically biased. To some respondents,

the political bias disfavors pro-Palestinian voices. To others, the political bias disfavors conservative voices on issues such as race (e.g., diversity statements) and gender (e.g., use of pronouns).

(8) External actors' presence/influence on campus life and climate

4.7% rated a positive factor; 63.6% rated a negative factor.

Respondents who had positive reports about external actors pointed to several themes. Due to Harvard's standing, it is inevitable that outsiders will take interest in what happens on campus. One respondent (#1487, student) argued that this was good, explaining that "External actors, including speakers and commentators, help connect the campus to the real world and larger community in which we will serve." Outside actors can also be helpful in pointing out problems on campus. One respondent mentioned that outside actors helped to call out antisemitism on campus.

Respondents who had negative reports about outside actors point to the undue influence of certain actors, such as donors, on the University administration, which comes at the expense of the administration listening to on-campus stakeholders. Other respondents felt that outside interests have goals (such as advocating for a political position) that are at odds with the goals of the University (such as research and learning) — one respondent (#34, student) noted "I have gotten the sense that external actors often operate solely with their own interests in mind and without respect for our mission as academics."

(9) In-person or online interactions with individuals not affiliated with Harvard

9.5% rated a positive factor; 34.9% rated a negative factor.

Those who describe positive interactions with individuals not associated with Harvard reported a general satisfaction with discussions with friends. Some specifically felt they benefited from talking about some of the University-related conflicts with friends not affiliated with Harvard, with one respondent (#1983, faculty) explaining "I have found outsiders I talk to open, respectful and interested in learning more. While people have had, not infrequently, strong views on Harvard and how it has presented in the public forum over the last year; no one has given me trouble but instead they have been interested to hear what my experience and thoughts are". Another respondent (#1957, faculty) found that interactions with those outside Harvard helped pushed Harvard toward prioritizing "diversity of thought."

Respondents with negative interactions with individuals outside of Harvard point to the spillover between campus conflicts and those not affiliated with Harvard. Respondents received negative feedback about Harvard from outsiders, which affected their ability to do their work. They saw negative messaging about Harvard on social media. One respondent (#1731, staff) felt a lower sense of morale due to the tarnished reputation of Harvard in their community: "My community has been largely negative about the institution and so that has been tough to my sense of pride in my work."

(10) Off campus media coverage (print/social)

4.8% rated a positive factor; 66.0% rated a negative factor.

Respondents who pointed to positive attributes of media coverage expressed that most news about Harvard is positive and draws attention to work being done on campus. When it comes to media coverage of campus conflicts, some respondents felt that the outside coverage shined light on real problems on campus, such as a lack of viewpoint diversity. Finally, one respondent (#859, faculty) said outside media coverage was "good and useful to see how the events at Harvard compare with events at other universities."

Respondents who felt that off-campus media coverage was negative said that the stories reported about Harvard were negative, conflict-driven, biased, sensationalist, and not fully truthful. One respondent (#386, NA) explained "News and social media coverage has been highly skewed and, due to the nature of these medias, help worsen tensions. Headlines are simplistic, social media posts are short and snappy, neither provide nuanced coverage nor do they encourage nuanced and thoughtful engagement."

(11) Global situation/ events

4.0% rated a positive factor; 72.6% rated a negative factor.

Respondents who viewed global events as having a positive effect on them fell into two camps. Some respondents felt hopeful about the prospects of change in the world, a sense of connection to the world outside Harvard, and, as one respondent (#1248, fellow) put it, a feeling of "solidarity in the actions of others around the world." Another camp identified world events as catalyzing introspection and change on campus. As one respondent (#1722, faculty) put it, "Global events have provoked thoughts for everyone in terms of the role and appropriate behavior for both institutions and individuals."

Those who viewed global events negatively tie events, namely the war in Israel and Gaza, to campus conflicts. The war and the reactions to the war have been both polarizing on campus and constant topic of discourse. Some found the discourse around the war to be uncivil and lacking in nuance. Others viewed global events negatively not because of the effects on campus but rather because the "suffering and brutality in Israel and Palestine" (respondent #1747, staff) affected them emotionally. One respondent (#331, student) wrote they felt "overwhelmed and powerless in the face of enormous injustice."

(12) Other factors:

3.5% rated a positive factor; 37.8% rated a negative factor.

The positive additional factors primarily surfaced themes that were already reviewed above. Respondents felt positive about an environment conducive to open inquiry and a setting in which students can develop as people and express themselves. On the negative side, respondents emphasized the mood on campus is not good, with community members feeling isolated, feeling required to conform to viewpoints, and feeling that they have witnessed hateful behavior on campus.

IV. Heterogeneity by Affiliation, Religion, and Race

We now revisit the analysis in the previous section but focus on whether and how this varies across different demographic groups. We focus this section on dimensions where we find the most meaningful differences by subgroup, particularly as they relate to campus issues brought on by the events in the Middle East. We report on the other demographic groups (age, gender, nationality, political ideology, School, and sexual orientation), in the appendix. We do encourage readers to look at analyses of other subgroups, where there are meaningful differences as well. For instance, a common theme in some open-ended comments relates to a lack of ideological diversity and conservatives feeling stifled. Figure A4d shows meaningful differences between liberals and conservatives in their ability to express themselves.

We should caution that while comparisons within a demographic category — say between students and faculty — are interesting, they need to be interpreted carefully. As is standard in survey work, interpreting these differences as arising due to differential biases experienced by these groups assumes that the groups themselves did not differentially select to participate in the survey based on their experiences of bias. For example, if we find that student respondents report worse outcomes than faculty respondents, to ensure that this result would hold for the average student compared to the average faculty requires that a student with a given level of bias experienced is as likely to participate in the survey as a faculty member with a comparable bias experienced. While plausible, without being able to test for this explicitly, we need to be cautious in interpretating the results. As an additional reminder, when a finding references a respondent's affiliation, that finding only encompasses those who chose to respond to this survey and also chose to identify their religion, ethnicity, or other demographic characteristics in the survey.

A. Heterogeneity by Harvard Affiliation

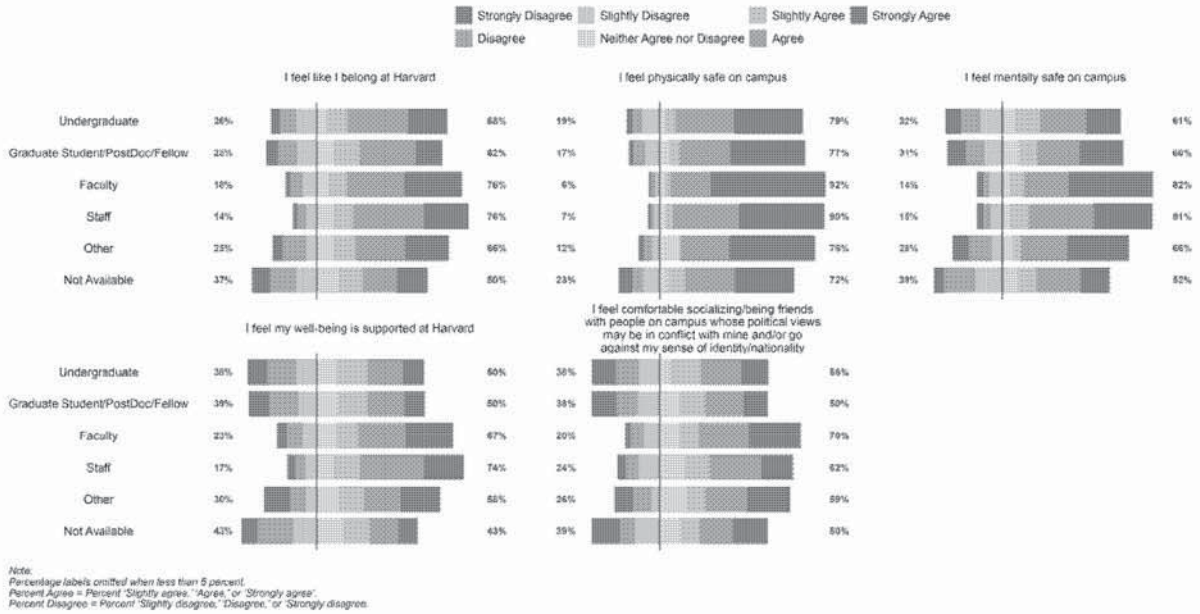

The results below present our previous findings separately by the Harvard affiliation of the respondent. The general result here is that student respondents (undergraduate students and graduates/fellows) tend to report more negative responses as compared to faculty and staff respondents (note: for the sake of brevity we will not always add the word "respondents" after each demographic category).

SAFETY, BELONGING, COMFORT, AND FREE EXPRESSION

For all measures reflecting on a sense of belonging, undergraduate and graduate students report worse outcomes. For the sake of completeness, we report results also for respondents who chose not to report their Harvard affiliation. These also tend to report worse outcomes, perhaps unsurprising, since their unwillingness to report their status may itself reflect their sense of belonging and well-being.

One in five (19%) undergraduate students report feeling physically unsafe on campus, and even for graduate students this number is quite high at 17%. Close to 40% of undergraduate and graduate students do not feel their well-being is supported at Harvard or that they are comfortable socializing with others on campus who have differing views.

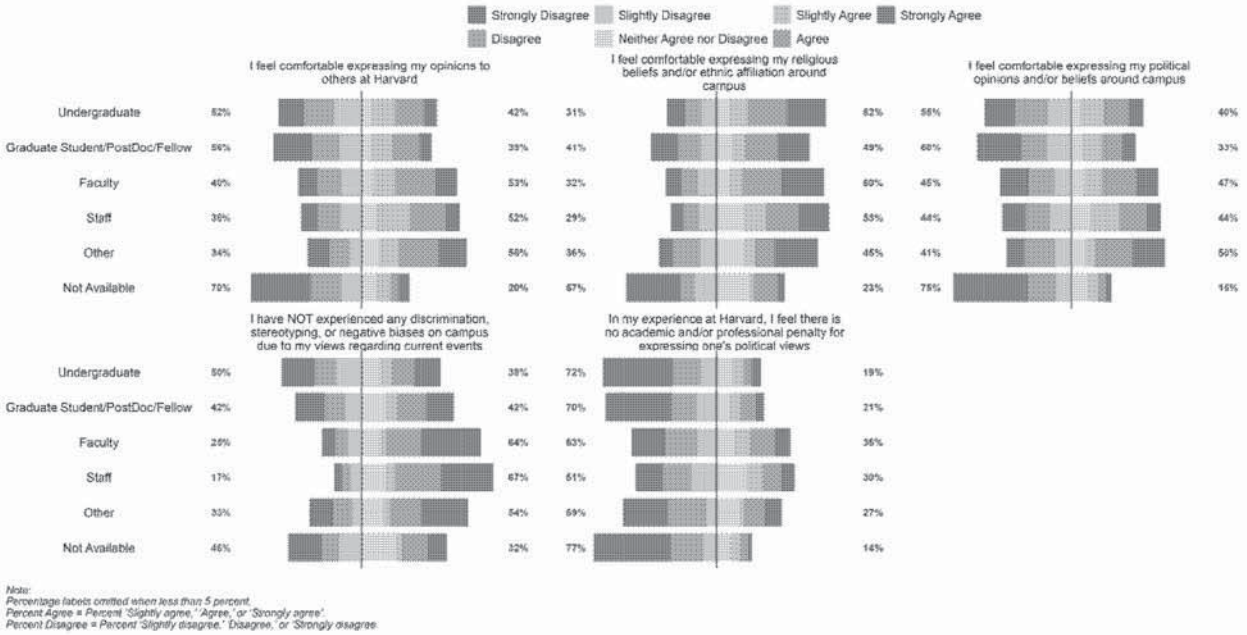

Figure 4: Safety and Belonging by Affiliation — All Respondents

Recall from the previous section that results related to free expression contained more negative evaluations than the ones regarding safety and belonging. Here, too, undergraduate and graduate students/fellows report more negative evaluations than others at Harvard. For instance, 72% of our undergraduate students and 70% of graduate students and fellows said that there is an academic and professional penalty for expressing their political views. The majority of faculty agree with this as well (53%).

Interestingly, the one area where the difference between students and faculty/staff is less stark is comfort around expressing one's religious beliefs and ethnic identity. On this item, undergraduate student and faculty are similarly uncomfortable (31% and 32%) while graduate students and fellows are the most uncomfortable (41%).

Figure 5: Freedom of Expression by Affiliation — All Respondents

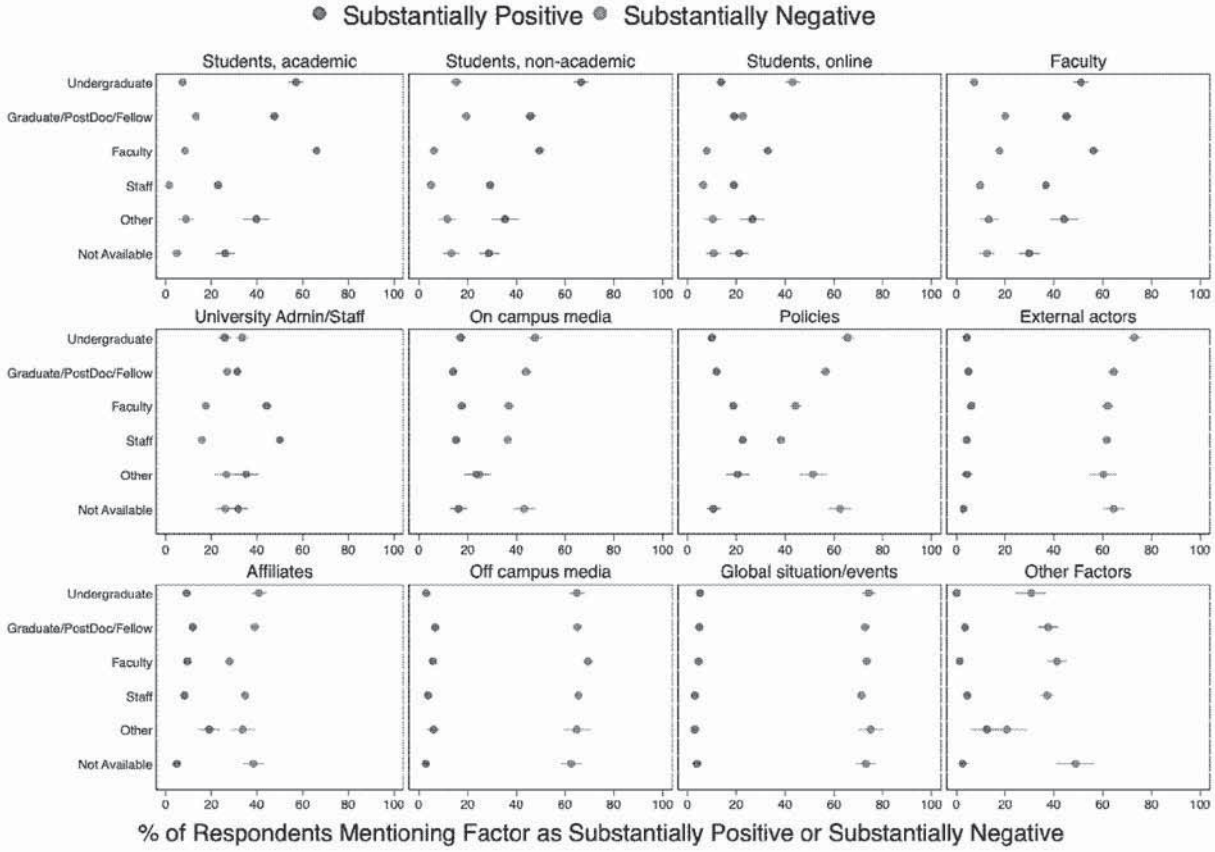

In examining the qualitative data, students talk about a range of issues. One student noted, "I have repeatedly felt physically unsafe on campus." (#649, student). Another student worries that "Having seen how Harvard has sanctioned or threatened student protestors, I no longer feel like the University has our safety at heart, nor that it does its utmost to defend academic freedom" (#876, student).

And while not everyone has expressed discrimination, students note the difficult situations others face because of their identity. As one student comments "I have not personally experienced discrimination of this sort because I fall into the majority view at my School — anti-genocide, anti-Hamas, anti-Netanyahu. I am not Jewish or Muslim, nor have I been active in the protests. However, I have had conversations with groups of my peers about taking a more active role. These conversations always acknowledge the real risks of doing so. We don't consider these to be safety risks; instead, we see how students like those at Columbia have been treated, and how our University president was forced out, and we recognize the possibility of social (and professional) censor that could derail our careers". (#487, student)

CONTRIBUTING FACTORS

The general pattern we had noted earlier was that for most factors internal to Harvard (except campus media and Harvard policies), more respondents reported them as positive. On the other hand, factors external to Harvard were widely seen as negative. As seen in the figures below, this pattern generally holds for the different Harvard affiliates. However, there are some nuances that we highlight below, again showcasing the more negative experiences for students. Students tend to report more negative and somewhat less positive roles of internal factors compared to faculty and staff. The starkest example of this is perhaps online interactions with students, which undergraduate students rate as more negative than positive (43% say it is negative while 14% say it is positive) and graduate students noting them somewhat similarly positive and negative (23% say it is negative while 19% say it is positive). In contrast to internal factors, we find less heterogeneity across Harvard affiliates with regards to factors external to Havard — all find them more negative than positive.

Figure 6: Contributing Factors by Affiliation — All Respondents

Students generally talk positively about their interactions with other students. One notes that "Working with other students is half the reason why I am here. This contributes to my sense of belonging" (#744, student). Another says that "engaging with other students in academic settings has made me feel like I can agree to disagree more, and I like learning why people think the way they do in an academic context" (#1426, student).

Students are also grateful that they have been supported by classmates. One noted that "I have had people ask me how I am doing in class and offer assistance in terms of study groups" (#965, student). Yet another respondent noted that "speaking with friends often proved to be the most fruitful way to discuss difficult themes and events." (#474, student)

But there is also a sense that students may be choosing carefully who to interact with. One student noted that "(I) was able to surround myself with people who have similar interests and do things that distracted from the political atmosphere on campus (or allowed me to talk about it in a safe space)" (#348, student).

But there are examples of negative student interactions, with one student noting that other students can be "Incredibly unfriendly and unwelcoming" and that there is a "lack of accountability in students being aggressive or offensive" (#845, student). Yet another student observes that they have had "very positive interactions with open minded people on campus, but interactions with other students has felt unproductive, and some students have acted provocatively, making me feel uncomfortable engaging in a peaceful protest. These students have had a hateful agenda and been uninterested in dialogue or common ground, just stoking anger and further disengagement across lines." (#1165, student)

The University's' policies received negative feedback from students, but for different sets of reasons. One student questioned: "Why were the protests allowed when they were in CLEAR violation of campus

policies?" (#2048, student) Another remarked that "Banning protests is a ridiculous policy. Inventing rules and secretively imposing academic sanctions to those who break them is unjust. The University has worked overtime trying to chill free speech." (#1871, student). Another student worried that "the University seemed to selectively enforce its policies, and it often generated more controversy than it was worth." (#934, student)

Even more negative is the students' views of external actors. One noted that "Outside agitators absolutely influence campus vibes and security" (#2154, student) and another that "outside media and alumni made Harvard too concerned about its reputation rather than its students" (#1412, student). Student respondents were quite attentive to external actors engaging in "doxxing." A student noted: "The doxxing trucks were an awful addition to the school campus this year, and did much harm to the student community, especially Muslim students. IT discouraged free speech and punished specific people for their political opinions. Furthermore, Harvard's inaction towards this harassment only exacerbated the situation and demonstrated Harvard's lack of care for its brown students." (#474, student) Another (#844, student) said that "I have seen many people attempt to photograph or record students, and it makes me feel less safe walking on campus, especially on the main campus."

Students noted that external individuals and media attention has been especially harmful. One student observed that "The amount of random protesters who come onto the school to yell at passerby students makes me feel uncomfortable when I'm walking to class" (#1070, student) Another wrote that it has been "incredibly stressful to have prominent figures constantly weighing in on Harvard and adding tension to difficult times on campus." (#1086, student) These concerns are well summarized by a student who remarks that "Politicians, journalists, donors, etc., all writing or talking about how terrible and violent the community at Harvard has become. This has been extremely divisive, both directly for the community, and in the way it has brought further negative media attention to us." (180, student)

B. Heterogeneity by Religion

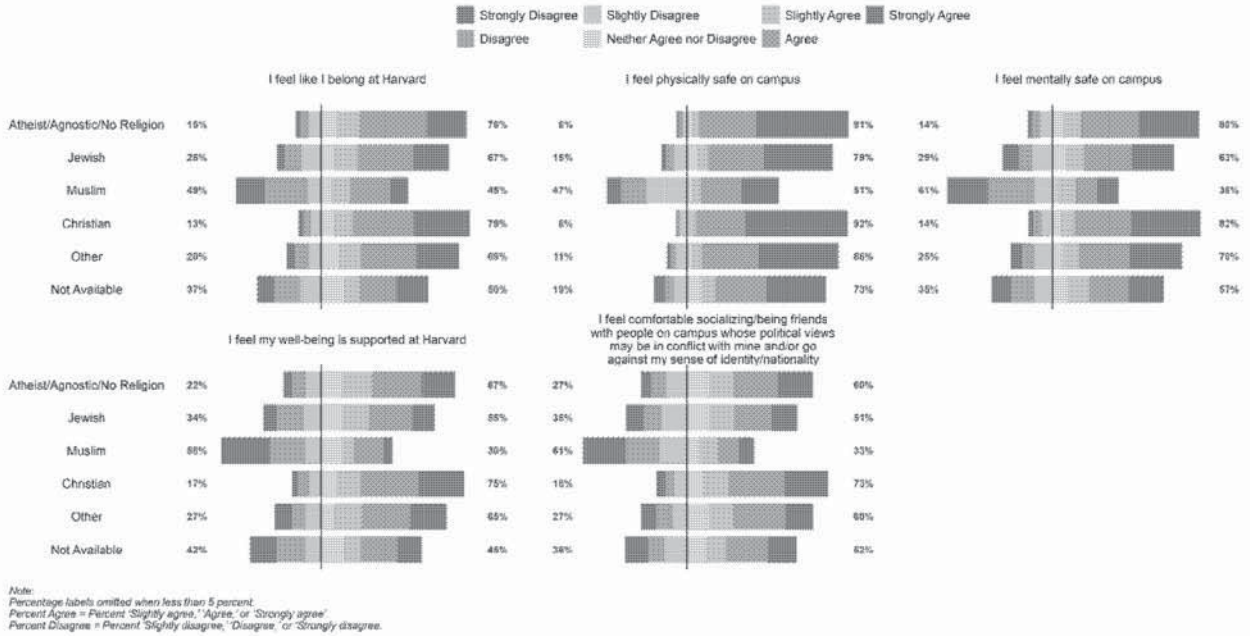

We now examine whether there are differences in experiences across individuals' self-declared religious identities. We combine some categories for ease of presentation. There is a nontrivial fraction of individuals who did not declare their religious identity and we separately report outcomes for them as well. The general result across all these questions is Muslims tend to report the worst outcomes, followed by Jews as well as those who chose not to report their religious affiliation.

SAFETY, BELONGING, COMFORT, AND FREE EXPRESSION

As seen in the figure below across all measures of safety and belonging we see Muslim community members report the most negative outcomes followed by Jewish community members. A common pattern seems to be Muslim respondents are four times as likely, and Jewish respondents twice as likely, to report negative sentiment compared to Christians and Atheists/Agnostic/No Religious Affiliation. The starkest comparison perhaps is physically safety where 47% of Muslim respondents report they are not physically safe on campus and 15% of Jewish respondents also feel physically unsafe relative to 6% for Christians and Atheists/Agnostic/No Religious Affiliation. The item with the highest rate of negative evaluations is the one asking if respondents feel comfortable socializing on campus with people with conflicting political views: 61% of Muslim respondents, 36% of Jewish respondents, 27% of Atheist/Agnostic/No Religious Affiliation respondents, and 18% of Christian respondents said they are not comfortable doing so.

HHSHarv_00000404

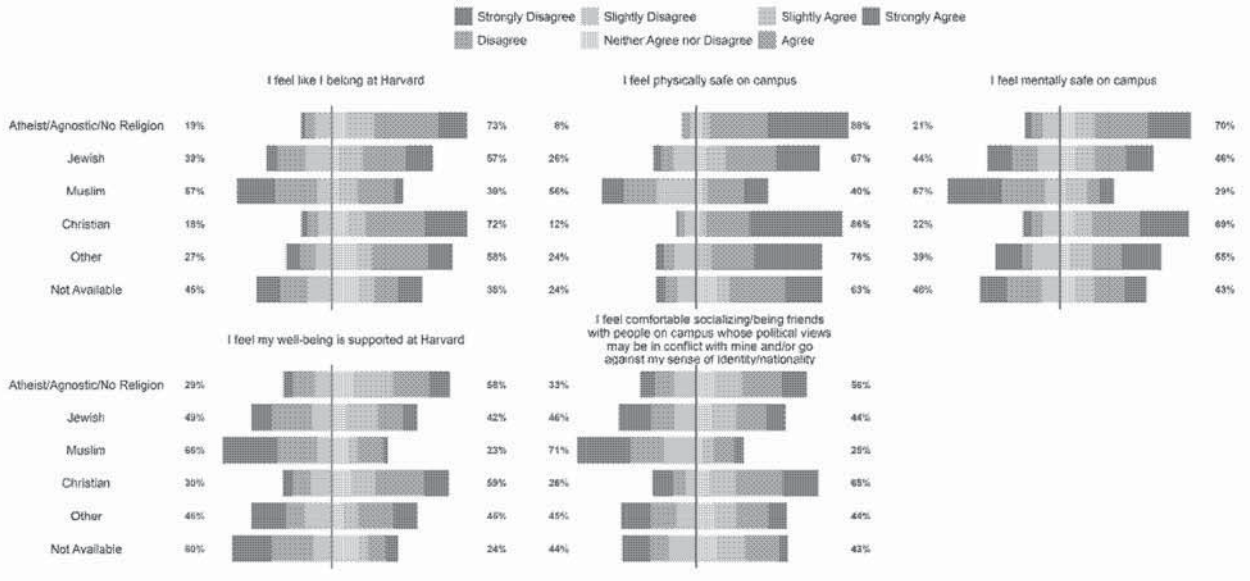

Figure 7: Safety and Belonging by Religion — All Respondents

Note:
Percentage labels omitted when less than 5 percent.
Percent Agree = Percent 'Slightly agree,' 'Agree,' or 'Strongly agree'.
Percent Disagree = Percent 'Slightly disagree,' 'Disagree,' or 'Strongly disagree.

Given our previous results that students tend to report worse outcomes, we felt it was instructive to show the religious heterogeneity for students (undergraduate student and graduates/fellows) only to see if the patterns change. Among student respondents, Muslims have the most negative evaluations followed by Jews though the ratios are somewhat less stark. Jewish students are roughly twice as likely as Christian students to report negative evaluations, while Muslim students are around 3 times more likely to do so as Christian students.

Figure 8: Safety and Belonging by Religion — Only Students

Note:
Percentage labels omitted when less than 5 percent.
Percent Agree = Percent 'Slightly agree,' 'Agree,' or 'Strongly agree'.
Percent Disagree = Percent 'Slightly disagree,' 'Disagree,' or 'Strongly disagree.

HHSHarv_00000405

Muslim and Jewish respondents offered many details about their sense of safety and belonging on campus. Beginning with Muslim respondents, several commented about the discrimination they face even though they take no political positions. Respondents encountered hostility if they present as Muslim, wear a hijab, or have a Muslim surname. One wrote (#89, student), "My peers who have lost their jobs simply for being in the leadership of Muslim faith organizations have been left out to dry once they had their offers revoked. Most of them never signed anything or participated in any activism." Another (#649, student) wrote, "Between October and December at the peak of the tension, I took Ubers at night to go from campus to home and would not use public transportation or walk at night alone for fear of my safety due to my Arab-looking and Muslim identity." Another (#1486, student): "As a Muslim woman who wears hijab, I have faced violent verbal and mental abuse across campus. I have been spat on, yelled at, and harassed in multiple places on campus."

For Muslim respondents who expressed solidarity with Palestinians, they found it was difficult to figure out how to express their political views without being accused of antisemitism. As one respondent (#38, staff) put it, "I avoid bringing up support for Palestine with anyone I don't know well as I'm worried about being labeled antisemitic. I fear this would negatively impact my career/promotion opportunities." Another (#162, student): "I often self-censor in fear that my opinion be misinterpreted or misunderstood and that I would be labeled antisemitic." Another (#505, student): "My hesitancy to speak up about my political beliefs lies in the fact that I feel as if being pro-Palestinian is automatically viewed as being antisemitic. For example, wearing a kefiyyeh, an indicator of Palestinian solidarity, may be considered antisemitic simply because of its affiliation with the pro-Palestinian cause. As a result, I do not and never plan to wear a kefiyyeh on campus. The ambiguity between what is considered antisemitic and what is considered rightfully pro-Palestine is what frustrates me most of all." Another (#1003, staff): "I don't wear the keffiyeh because I feel like I will be targeted. I already wear a hijab and have faced verbal abuse just because of that before. The definition of `antisemitism' has been stretched beyond belief (to people who simply want a ceasefire) and that is detrimental to Jewish people who are actually facing antisemitism."

Finally, some respondents felt that the chasm between sides in this conflict were too deep to allow for civic discourse. As one student (#901, student) wrote, "Why would I ever feel a sense of belonging here? I would rather be dead in Gaza than feel comfortable conversing with the people who defend a genocide that has murdered 10 of my family friends."

Muslim respondents noted multiple forms of racism they experience. One (#1863, student) said "There are, of course, the everyday instances of racism—a professor questioning my English (my native language!) in a way they would never question that of a White student, a lecturer playing an unprompted guessing game as to my family's country of origin, a student dismissively attributing my opinion to my religion in a seminar, an administrator telling us to be "grateful" when we challenged the bestowal of a University award upon an apologist for genocide, a fellowship interviewer indicating that my interests were too informed by my Muslimness and asking me what I would study if I weren't Muslim, an administrator calling the henna design from my culture ugly, my research constantly being mischaracterized by my department and beyond because work on Arabs and Muslims can't possibly be considered "theory," a *Crimson* reporter incorrectly reporting on an event I held and thus landing it (with my name and photo) on a right-wing website, my first-year adviser (who was also a senior administrator) recurringly confusing me with another female Muslim student three years my senior. Examples like these are endless."

Several Muslim respondents recognize antisemitism is real but is not zero sum with Islamophobia. As one wrote (#1210, student), "While I acknowledge Antisemitism is indeed an issue, this attitude should not project into believing that Islamophobia is lesser of an issue."

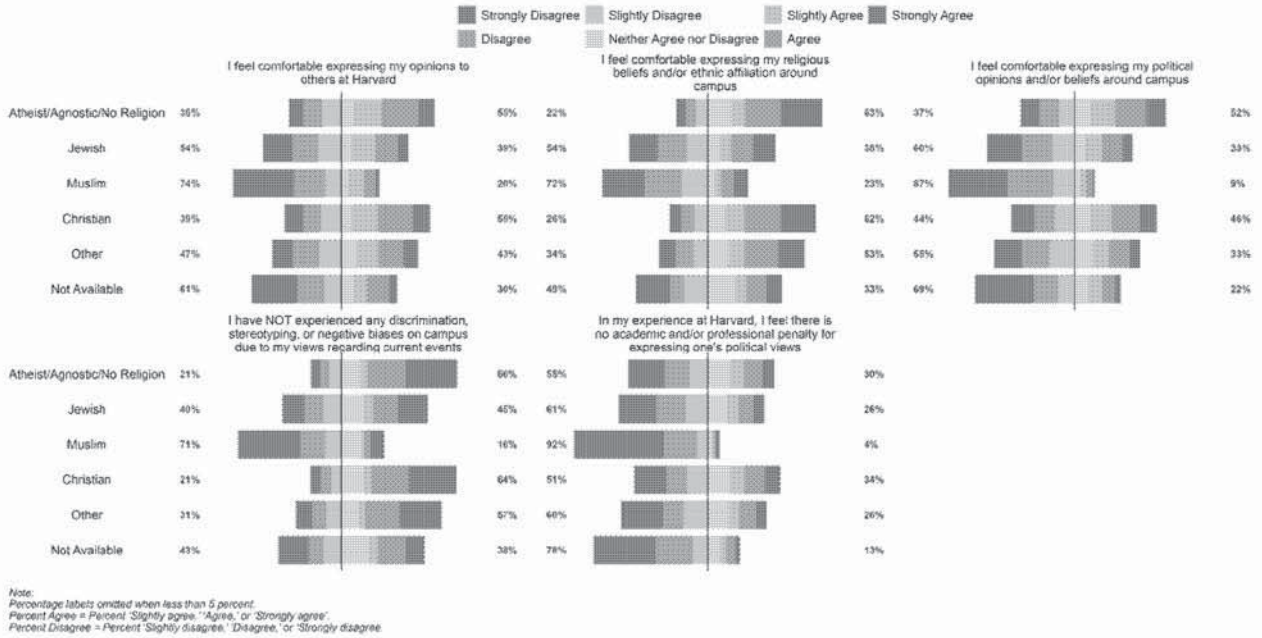

Among Jewish respondents, several themes emerged in the open-ended responses. The first is that a number of Jewish students felt targeted based on their Jewish identity. As one wrote (#361, student): "I've never

experienced antisemitism as profound and pervasive as it has been at Harvard. I left campus before the end of the semester to move back home due to the detrimental effects on my productivity and well-being. I've been stalked across Harvard Yard by students whose faces were completely covered by keffiyehs, I've been screamed at while attending outdoor, on campus events held by Harvard Chabad, and have encountered more swastikas and classic antisemitic canards than I did growing up in the Bible Belt." Another (#1251, fellow): "I hesitate to wear any visible symbols of my Jewish faith or to express support for Israel, due to potential negative reactions, or being perceived as wanting to inflame tensions." Another (#997, student): "I was in a class and had said that I spoke Hebrew. Right afterwards, someone pretended to stretch in order to punch me in the face. Although the professor saw it, she said nothing to the student. I also do not feel comfortable expressing my views even in the field that I study for fear that I will not receive funding or good letters of recommendation. I do not feel physically or intellectually safe at Harvard."

Jewish respondents reported that they pay social penalties for expressing support for Israel. As one said (#286, student): "As a Jewish student, I have been told that certain people (particularly the ones in the encampments) hate me for being pro-Israel. I have lost friendships because of it as well." Another (#118, student): "When I walk around campus, I do not fear for my physical safety. But I feel socially isolated. At times, I tried to have conversations with students whom I knew had different views, but this often did not go well. Even though I have not engaged in any counter-protests (or said anything publicly about the conflict), the students at the encampment refused to speak to me because, as one said, "I'm a Palestinian-hating Zionist." Maybe it was the fact that I wear a kippah that led them to believe that?" Another (#1273, staff): "I cannot express my opinions (two state solution and peace) as I know I would face backlash professionally and socially. It is almost like Jews have to pass a purity test to be 'a good jew' in order to be accepted." Another (#82, student): "I have felt totally alienated and alone on campus- anyone who was friendly to me before October 7th has gone to at best, ignoring me, or at worst saying awful comments to me about how `no Israeli is a civilian including babies who will grow up to be in the IDF' and that they want to scare all Zionists away from Harvard." Another (#1224, student): "The 'cancel' culture rules this campus. If you are not progressive, you should know that expressing your opinion == someone will cancel you and some doors will be closed for you, etc."

On measures of free expression (Figure 9), we see Muslim community members report the most disagreement with the items followed by Jewish community members. A common pattern seems to be Jewish members are twice as likely to disagree with the survey items compared to Christians and Atheists/Agnostic/No Religious Affiliation, while Muslim members are one-and-a-half more likely to report negative outcomes than Jewish members. Almost all (92%) of Muslim respondents, 61% of Jewish, 55% of Atheist/Agnostic/No Religious Affiliation, and 51% of Christian respondents say there is an academic or professional penalty for expressing political views. Another stark comparison is experiencing discrimination based on one's views: 71% of Muslim respondents report they experienced discrimination, bias, or negative stereotyping along with 40% of Jewish respondents and 21% of Christians and Atheists/Agnostic/No Religious Affiliation respondents.

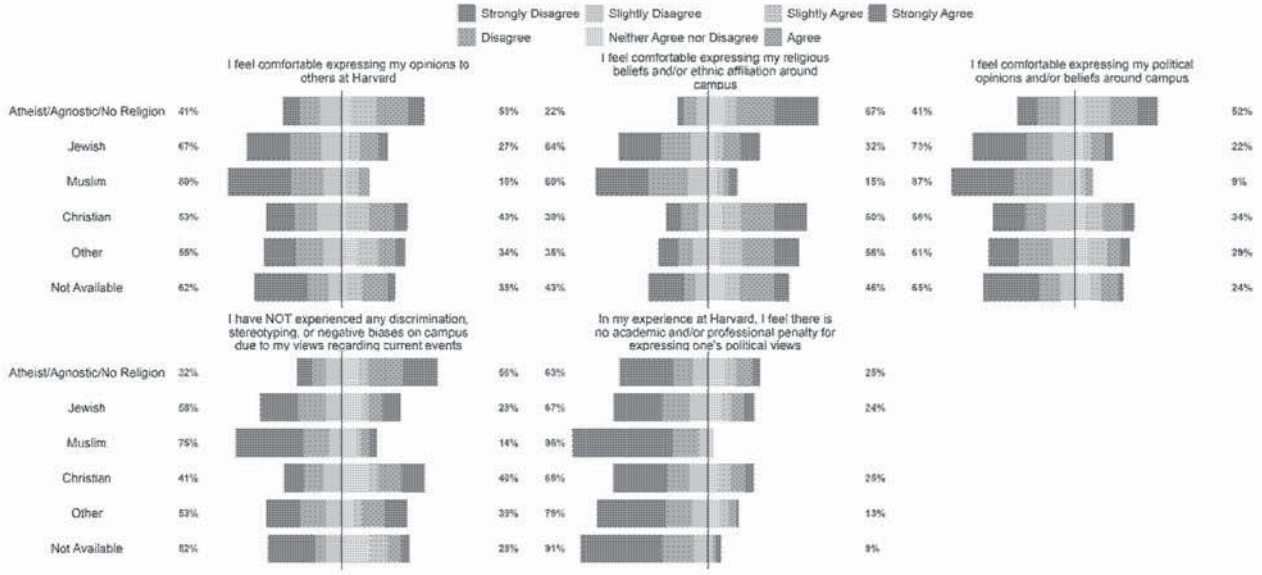

Figure 9: Freedom of Expression by Religion — All Respondents

Note:
Percentage labels omitted when less than 5 percent.
Percent Agree = Percent 'Slightly agree,' 'Agree,' or 'Strongly agree'.
Percent Disagree = Percent 'Slightly disagree,' 'Disagree,' or 'Strongly disagree.

As before, we also show the above results restricted to students and see the same patterns as previously — the ordering remains the same though the ratio of differences is reduced. For example, around two-thirds of students regardless of religious affiliation perceive academic and professional penalties from expressing their political views, though here too Muslim students are more likely to offer negative evaluations (96% negative).

Figure 10: Freedom of Expression by Religion — Only Students

Note:
Percentage labels omitted when less than 5 percent.
Percent Agree = Percent 'Slightly agree,' 'Agree,' or 'Strongly agree'.
Percent Disagree = Percent 'Slightly disagree,' 'Disagree,' or 'Strongly disagree.

Muslim respondents also reported they paid penalties for expressing support for Palestinians. One respondent said that a potential donor for a research project decided not to support the research after learning that the respondent signed a letter supportive of a ceasefire. Another wrote (#121, staff), "I have felt that my professional relationship with the leader of my organization at Harvard has deteriorated after she sensed my support for Palestinian freedom. For example, this leader started leaving me off emails and invites for teams that I have long been a part of."

Respondents who expressed support for the Palestinian cause felt harassed. For instance, one wrote (#412, student), "I myself have heard slurs and insults such as `terrorist', `baby-killer', `towelhead', and `antisemite' … because of my decision to wear a keffiyeh and show my solidarity with a people experiencing the worst crime known to humanity." One respondent (#302, faculty) wrote about how they were surveilled after being publicly supportive of Palestinians: "My boss has told me my colleagues are complaining to him that my social media posts are offensive. This is all because I am posting about Palestine. HR has found my posts compliant but it hasn't stopped them from surveilling me. My boss has refused to tell me what exactly was offensive or offered to facilitate a conversation with those who have been offended."

Muslim respondents perceived double standards in how the University responded to events on campus. As one wrote (#89, student), "If there were antisemitic trucks driving around campus and planes flying over with antisemitic slogans, I cannot help but believe Harvard would have done more to stop it." Another student (#314, student): "An antisemitic cartoon gets a University wide email from a president but doxxing, physical violence and a list of other crimes does not." Another student (#1966, student): "I have never before felt more disappointed and embarrassed to be a Harvard student. I find it appalling that Harvard can show empathy to other groups of oppressed people but does not extend that same responsibility to Palestinians."

Several Jewish students felt uncomfortable around the pro-Palestine protests. As one explained (#861, student), "For almost eight months Jews living in the Yard have been yelled at, or around them, things like 'globalize intifada'. I experienced the second intifada in Israel, in which suicide bombers kept blowing up in civilians centers, busses, coffee shops, night clubs — murdering over a thousand children, elderly, just people. Having that chanted daily without any repercussion, recourse, or help from the University has been a complete failure of the University to protect one of its smallest minority groups."

A common refrain from Jewish respondents was that there was a lack of nuance on campus, and Jewish students had difficulty taking a middle position on the conflict. One wrote (#383, student), "The abject canceling, dehumanization, and unwillingness to even engage with anyone who even slightly questions small aspects of the groupthink mentality has unfortunately characterized my final year at Harvard." Another (#570, student): "I am in my first year of grad school and I am afraid to meet new people (including both students and faculty) because they may very well think I am a monster for being a Jew and a Zionist (I believe that the State of Israel has a right to exist and is the homeland of the Jewish people. I also believe there should be a Palestinian state)." Another (#1650, faculty): "I think that the polarization has eliminated discussion of moderate liberal views on many issues — e.g., despite a two-state solution being the only viable path, it is hard to bring up in the current climate."

A number of Jewish respondents are supportive of Palestinian rights, anti-Zionist, and/or advocates of a ceasefire in the region. These respondents felt uncomfortable and upset as well. As one said (#46, faculty), "As a Jewish faculty member without the protections of tenure, I am afraid of publicly expressing my support for a ceasefire or Palestinian human rights. I was afraid to be even seen walking near the encampment lest someone doxx me and try to get me fired." Another (#1014, student): "As an anti-Zionist, pro-Palestinian Jewish student at Harvard, I have been targeted and harassed by Harvard students and faculty for my political views. At the same time, my Jewish identity is totally ignored by the Zionist

individuals telling me I am `pro-Hamas.' If my Jewish identity is addressed, I have been told I am antisemitic, not a real Jew, or a `kapo.'" Another (#486, student): "I am a Jewish student who holds pro-Palestinian and anti-Zionist views. I do not feel unsafe at all as a Jewish student at Harvard, but I do feel unsafe publicly demonstrating those political beliefs at Harvard although I think that my being Jewish makes me more comfortable voicing those beliefs than if I wasn't. However, I think that there is still a considerable effort to target Jews who stand up for Palestine, and I think Harvard should take steps such as recognizing Harvard Jews for Peace to protect us."

When asked if the 2023-24 school year was worse than prior years, Muslim and Jewish respondents had many reflections about the Israel/Hamas war and its effects on campus.

A student (#61, student) wrote, "Muslim students were almost constantly subjected to both internal and external persecution regardless of whether or not they had actually said anything about the conflict, and administration never provided support the way it has shown support for Jewish students." Muslim respondents specifically mentioned doxxing (i.e., publicizing names and faces of individual student activists and leaders) as a source of their negative feelings on the year.

Jewish respondents perceive a double-standard against them as well. As one student (#2136, student) wrote, "I lost faith that my classmates would treat me and my beliefs and opinions with respect. I felt isolated and threatened by chants that protesters claimed were made with good intent. However, while we broadly condemn microaggressions not for their intention but for their impact, we seem to not care at all about the impact of the chants that echo around campus."

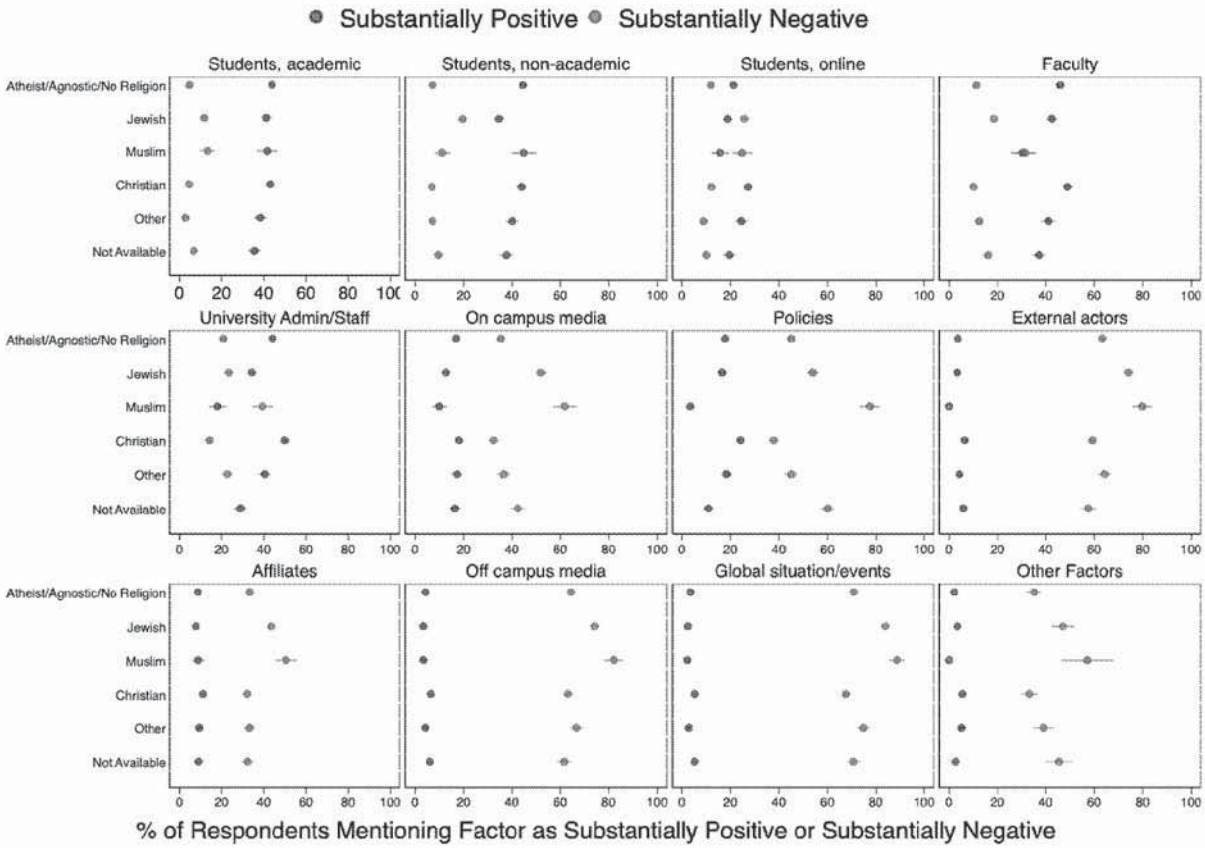

Jewish respondents largely said the year was worse than prior because they feel unwelcome. As one wrote (#95, student), "The barrage of antisemitic hate speech and protests outside of Harvard regulations (e.g. encampment) is nonstop and unrelenting. I feel completely unwelcome and out of place at Harvard now." Another wrote (#361, student), "Literally have been stalked across Harvard Yard by protestors while walking my dog, had "Heil Hitler" yelled at me twice while waiting for the M2, lost most of my non-Jewish friends and acquaintances on campus after posting about antisemitism I've been experiencing (nothing about Israel or politics). I've never felt less safe on a campus than I did this past year at Harvard."

Jewish respondents who were supportive of pro-Palestine protests also voiced dismay about being vilified for their views and the "consequences for standing up against genocide."

CONTRIBUTING FACTORS

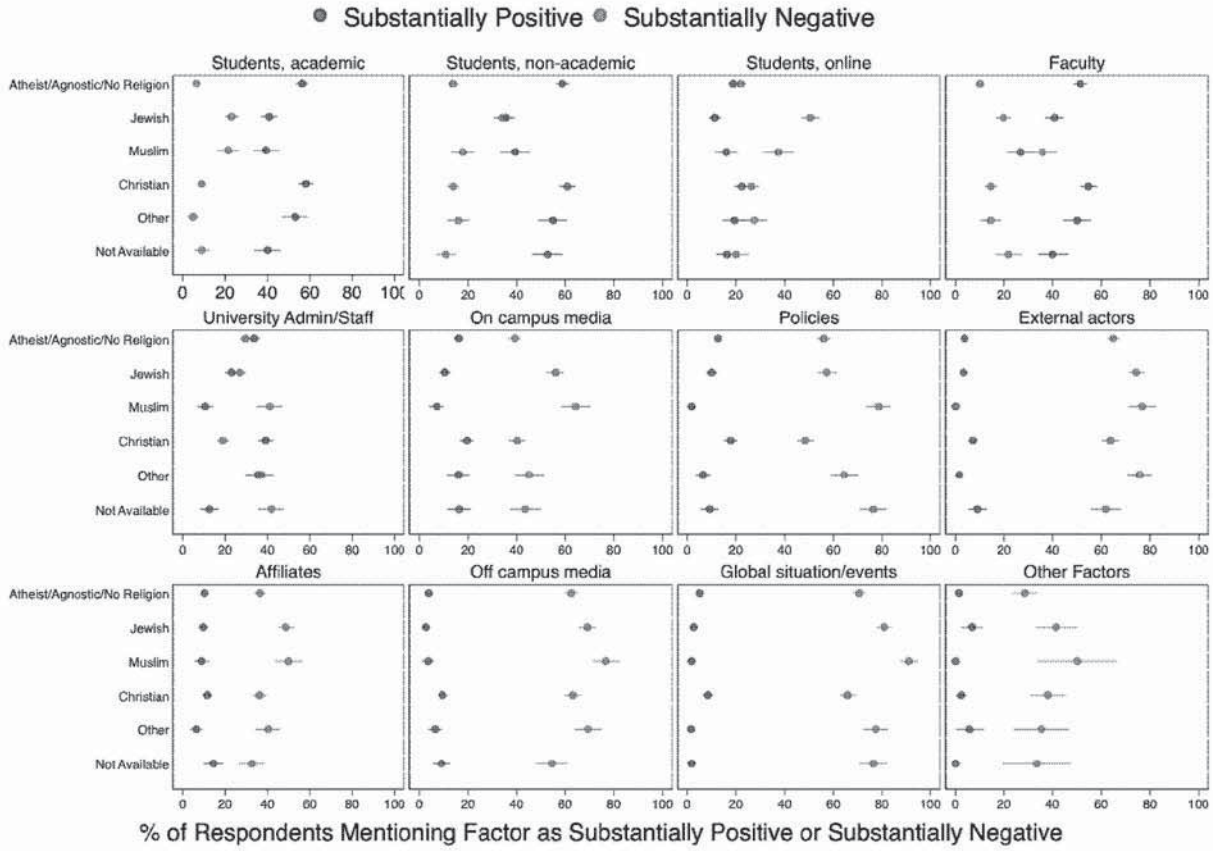

When examining factors that are contributing to the community's experiences, we tend to see similar patterns across the different religious groups as we saw previously. The few noteworthy effects may be that Jewish community members (especially students — see the subsequent figure) find non-academic interactions with students to be more negative than other religious groups, and Muslim respondents (especially students) are less happy with faculty and staff interactions, on-campus media, Harvard polices and several of the external factors.

Figure 11: Contributing Factors by Religion — All Respondents

The graph below presents the results but restricting to students only. The results mostly accentuate those presented above. Student online interactions with other students is now factor that is more negative than positive, especially for Muslim and Jewish students. For Jewish students, in-person non-academic interactions with fellow students is viewed equally negatively as positively.

Figure 12: Contributing Factors by Religion — Only Students

When asked to describe the positive and negative factors that contribute to their sense of belonging at Harvard, Muslim and Jewish respondents echoed similar themes as previously reported. With respect to their experience with other students, Muslim students citing positive stories wrote responses like that they "appreciated getting to know students by visiting encampments (#55, faculty)" and "Harvard students are, as a whole, immensely capable of nuanced interactions and curiosity — in a structured environment, they are willing to learn and discuss difficult ideas (#104, staff)". One respondent wrote (#302, faculty), "Working with students who have been bravely speaking up for justice in Palestine have been an inspiration. I respect them. I learn from them. I appreciate them." A student recounted a story of a dialogue that happened at an event (#1511, faculty): "Even when I was at an event discussing the dismal public health situation in the Occupied Palestinian territories and one of the other attendees called Arabs animals unwilling to make peace, I approached them after class to refute those general claims. We ended up having over an hour-long conversation and exchanged book recommendations and hugs."

Some Jewish respondents had similar positive experiences with other students, writing notes such as, "I have enjoyed lots of peaceful and productive academic discourse in my classes and sections (#349, student)" and that they appreciated "students open to listening and providing different perspectives in a respectful manner. (#1977, student)"

Muslim and Jewish respondents both also wrote about the negative experiences they have had with their peers. Among Muslim respondents, we saw messages such as this (#302, faculty): "I have been dismissed and silenced for speaking out about Palestine. Reactions from my peers have been shocking. Many have stopped speaking to me. Some (not sure how many) have made complaints about me." Another (#1028, student): "Blatant racism was expressed by a small minority of students in my cohort, but massively soured

my entire experience. I spent every Monday of the Fall dreading attending or speaking in class lest I be doxxed by my classmate who sent us emails she received from reporters asking for the names and contact information of Arab/Muslims students who were suspected to be pro-Palestine." Another (#1614, student): "In the days and weeks following October 7th, I noticed several Zionist classmates of mine checking my LinkedIn profile, when they had never looked at it before. This was clearly, to me, an attempt to dox me for any membership in organizations they deemed to be critical of Israel."

For Jewish students, many them pointed to the toxic student environment they witnessed on the social media platform, Sidechat. As one says (#30, student), "Have you seen sidechat? The amount of antisemitism there is unlike anything I've seen before." Another (#35, student): "Sidechat — people say horrible things. Antisemitic, antizionist, just plain hurtful about other students." Jewish students also experienced negative interactions with fellow students in class. As one wrote (#1305, student), "Students in my program make racist and discriminatory jokes about Jews and Christians. It is almost even worse outside of the school environment."

Some Muslim and Jewish students praised interactions with faculty for being kind and supportive. But others had negative comments about faculty. Muslim students wrote responses such as this (#926, student): "Certain members of Harvard faculty feel comfortable calling students `terrorist sympathizers' and are then somehow expected to maintain professional boundaries." Another (#55, faculty): "It has been hard to interact with faculty who are silent on the genocide and our complicity in it, or even worst, justify it." Another (#1146, student): "Harvard faculty have expressed outrageous and dangerous opinions that show clear anti-Arab and anti-Muslim bias." A Jewish respondent (#996, student) wrote that faculty contributed negatively because they showed "no empathy for the effects of October 7th on Jewish students." Another student noted (#1800, student): "My comments in class are always judged through the lens of `the Israeli is speaking'. Also, there have been many cases of anti-Israeli and anti-Jewish bigotry in classroom settings, mostly dismissed by the Professors in a way that would never fly for any other minority group.

Respondents have more lopsidedly negative comments about the Harvard administration and its policies. One Muslim respondent (#1467, student): "Harvard has abdicated any responsibility it has towards its students to conservative donors who now get to even dictate who receives a Harvard degree and who does not. There are no Harvard policies to protect Arab and Muslim students and other students of color." Another (#1749, faculty): "I am deeply disappointed in Harvard's treatment of its students. I'm appalled that the Board was able to interfere in the graduation of students who earned their degrees. I am not annoyed, I am appalled." Another (#121, staff): "I believe Harvard was creating rules and applying rules to stifle the pro-Palestine voice on campus."

Many of the negative comments about the administration and policies point to the influence of donors. Said one respondent (#121, staff), "I believe the pressure of Harvard's donors has reduced Harvard's academic freedom." Another (#1003, staff): "I think Harvard as an institution has really distanced itself as a rigorous, academic institution and has degraded itself in the eyes of the public. Personally, I will be quitting. The environment on campus has just been so toxic and I can't contribute to a university that values money and Zionism over education and its own students." Another (#1003, staff): "Big money donors. The sway they have on administration is shocking."

A Muslim student (#1486, student) pointed to double standards in enforcement of rules: "These policies were not harshly enacted in previous protests like the Occupy movement, but all of a sudden when they protest Israel the policies are used to crack down on Black and Brown students."

A Jewish student (#95, student) thought double standards cut the other way: "Harvard policies are a joke because they are enforced with a massive double standard. If protesters wore KKK regalia and chanted slogans offensive to large numbers of Black students, I doubt they would have been allowed to camp out in

Harvard yard for three weeks and escaped any disciplinary consequences." Another Jewish student (#383, student) wrote: "Hate speech apparently tolerated."

The role of outside actors was a negative contribution for many Muslim and Jewish students. Here are a couple of Muslim respondents: "Doxxing trucks! Airplane banners at Commencement! Zionist CEOs shouldn't be calling for the resignation and expulsion of children and students (#982, staff)." Another: "Doxxing, getting students fired, sending doxxing trucks to their homes, signed letter after signed letter calling Muslim students pedophiles and child-be-headers, etc (#1028, student)."

On the matter of outside actors, Jewish students had similar responses to Muslim students. "People who are not on campus and not actually experiencing what was happening presumed they knew what was happening on campus and injected themselves into campus life in inappropriate and detrimental ways. It made the environment on campus far worse (#742, student)." Another Jewish student: "The Zionists that drove around trucks with images of students labeling them as antisemitic were horrible (#1076, student)."

Finally, and not surprisingly, the war in Israel and Gaza itself was a major source of pain for many Muslim and Jewish respondents. As one Muslim respondent put it, "Forced famine. War crimes. Genocide. International organizations and the world's highest courts have been spoken. It's a very dark time in history. We are in a country and an institution that is not only denying these atrocities, we are actively supporting them (#302, faculty)." Another: "I felt like weeping or did weep pretty much ever day the past 8 months on campus and my pain was never once acknowledged by my teachers, administrators, or University leadership (#1614, student)." Another: "I don't like my family being murdered, held hostage, and then blamed for defending themselves (#30, student)."

A Jewish student noted that the pain is felt by everyone: "The ongoing war in Gaza is a disaster for all parties involved. Seeing the suffering of Palestinian noncombatants and Israel's existential security threats makes me feel sad and helpless (#95, student)."

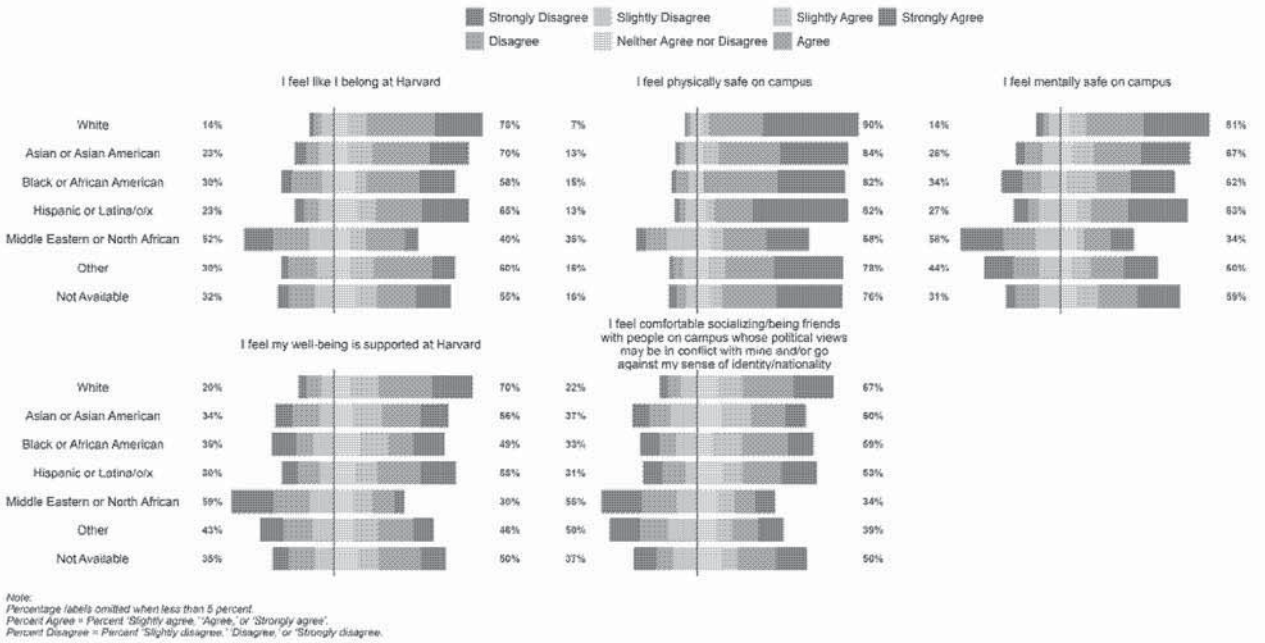

C. Heterogeneity by Race

We now examine whether there are differences in experiences across individuals' self-declared racial identities. We combine some categories for ease of presentation. The general result across all these questions is MENA community members tend to report the most negative evaluations, followed by Black, and then Asian and Hispanics, with Whites reporting the most positive evaluations.

SAFETY, BELONGING, COMFORT, AND FREE EXPRESSION

Across all the safety and belonging questions respondents who identify as Middle Eastern or North African (MENA) reported the most negative outcomes — 52% of them feel they do not belong at Harvard, 35% and 58% respectively do not feel physically and mentally safe on campus, 59% feel Harvard does not support their well-being, and 55% do not feel comfortable socially with others who hold differing views. MENA identifiers were almost twice as likely to offer negative evaluations as the next group articulating negative experiences — Black or African American students. Hispanic and Asian community members reported slightly more positive experiences than Black community members, and while mental safety is a similar issue for Hispanics as it is for Asians (27% feel mentally unsafe versus 26% for Asians), Asians reported their well-being is slightly less supported (34% versus 30% for Hispanics) and they are less comfortable socializing with others with differing views (37%) than Blacks (33%) and Hispanics (31%).

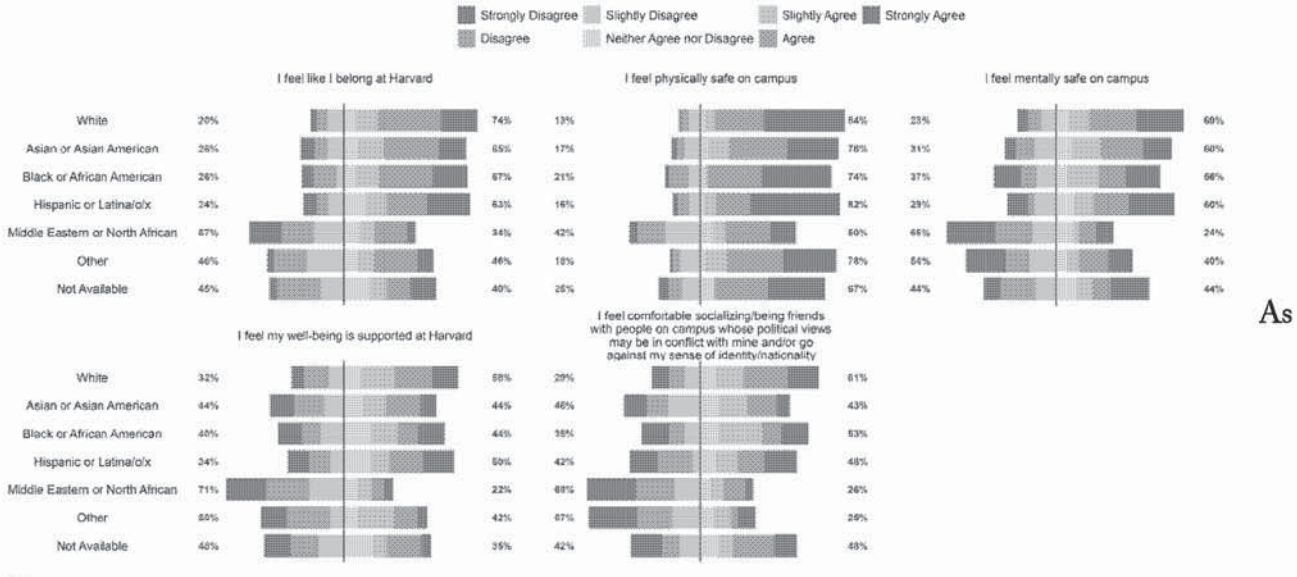

Figure 13: Safety and Belonging by Race — All Respondents

Note:
Percentage labels omitted when less than 5 percent.
Percent Agree = Percent 'Slightly agree,' 'Agree,' or 'Strongly agree'.
Percent Disagree = Percent 'Slightly disagree,' 'Disagree,' or 'Strongly disagree.

The next figure restricts the responses only to student respondents, where negative evaluations are especially common. Close to three-quarters of students who self-identify as MENA reported they do not feel mentally safe on campus or feel their well-being is supported by Harvard. Black students are typically the next group most likely to have negative experiences — especially in the case of physical safety (21% of Black students report feeling physically unsafe versus 17% for Asian and 16% for Hispanic students). On other items, such as those measuring comfort in socializing with those who hold differing views, Asian and Hispanic students are more likely to respond negatively than Black students.

Figure 14: Safety and Belonging by Race — Only Students

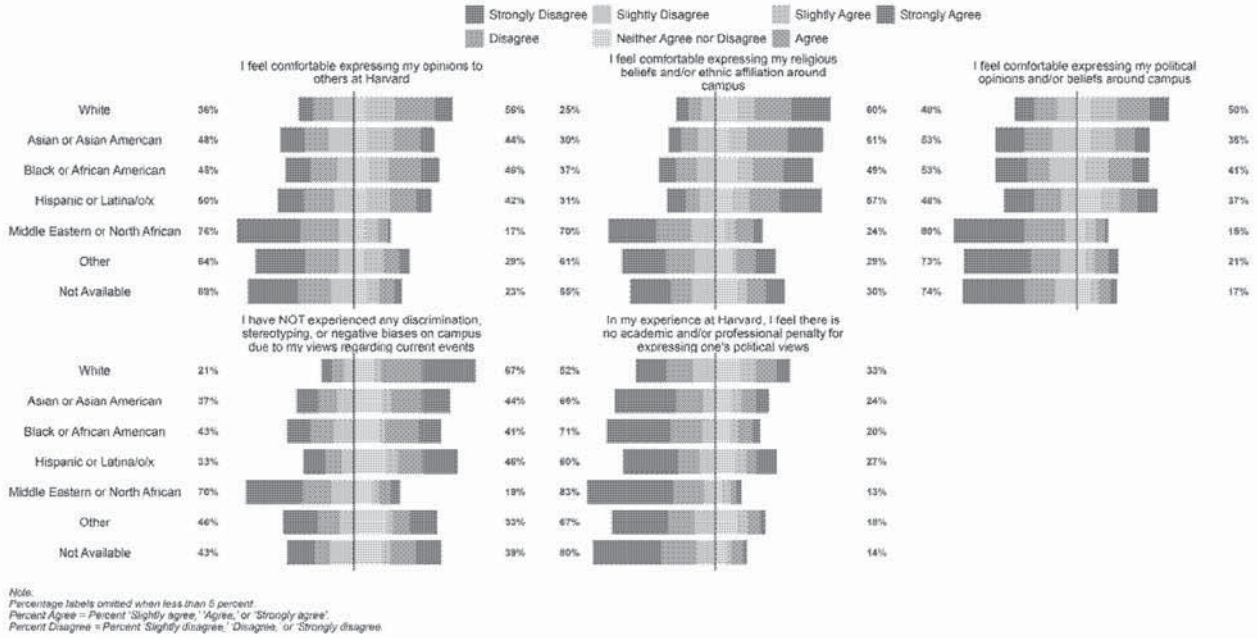

Note:
Percentage labels omitted when less than 5 percent.
Percent Agree = Percent 'Slightly agree,' 'Agree,' or 'Strongly agree'.
Percent Disagree = Percent 'Slightly disagree,' 'Disagree,' or 'Strongly disagree.

As

As the figure below shows, we again find the MENA community members reported the highest levels of concerns in being able to express their opinions. About four-fifths of the MENA respondents reported not being comfortable expressing their views, experiencing discrimination and facing professional and academic penalties for expressing their political views. While Black community members are typically the group next most likely to report negative experiences, in this case Asian and Hispanic community members are also close, and even White respondents report fairly high levels of discomfort expressing their views (25 to 40%), facing discrimination (21%), and facing academic or professional penalties (52%) when they do so.

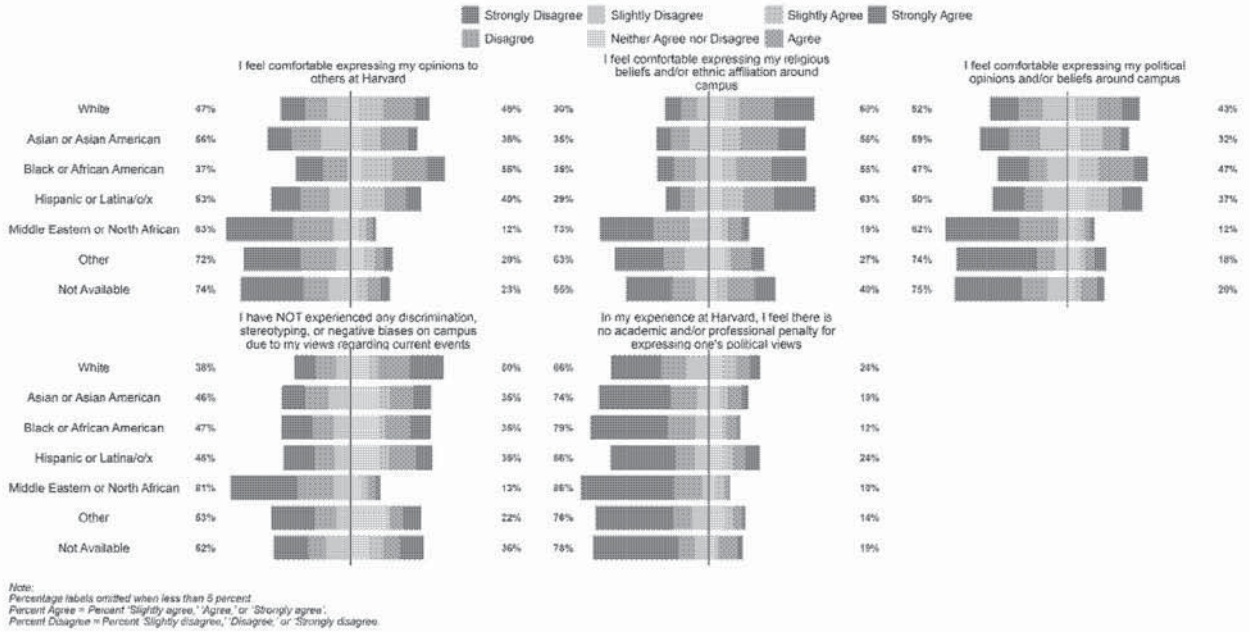

Figure 15: Freedom of Expression by Race — All Respondents

Note:
Percentage labels omitted when less than 5 percent.
Percent Agree = Percent 'Slightly agree,' 'Agree,' or 'Strongly agree'.
Percent Disagree = Percent 'Slightly disagree,' 'Disagree,' or 'Strongly disagree.'

Restricting to students (Figure 16) shows similar patterns with generally more negative evaluations on all the questions. As one example — even for White respondents, close to two-thirds reported there is an academic/professional penalty for expressing their political views; the corresponding number is 86% for MENA students.

Figure 16: Freedom of Expression by Race — Only Students

We now explore the open-ended responses by race focusing first on MENA given it is a large outlier. While there is overlap with our examination of religion — with a third of MENA respondents being Muslim and a quarter being Jewish — a reasonable fraction includes Christian, atheist, and others. And while the respondent numbers are not large enough to readily separate by national identity, the Israeli and Palestinian experiences seem especially distinct.

A MENA student notes that "Harvard, like most if not all American universities, is a place where the appearance of difference is tolerated, even welcome, but the reality of difference and the expression of difference is not. Diversity is skin-deep here — diversity of color, appearance, and identity markers is encouraged, but difference of opinion and worldview is suppressed in countless ways. This extends to all realms of thought." (#289, student) A faculty member noted that "As an Arab American who is committed to human rights for everyone, I have isolated and ostracized in the workplace and been silenced and threatened for speaking out." (#302, faculty) Another MENA faculty member reported, "In general, being Arab is hard — people just make a lot of assumptions about you, and you feel professional repercussions. Harvard has never made this easier, and in fact, in the past tried to limit discourse about being Arab or Palestinian. It feels like it has gotten worse this year." (#49, faculty). A staff member notes that "I fear sharing my Arab identity for fear of reprisal" (#1632, staff).

Jewish Israelis reported difficulty navigating campus tensions. As one said (#1174, student): "While I respect other students' privilege and right to make their voice heard and fully believe that Israel's actions deserve criticism, I have felt that a growing portion of the student body increasingly feels that the state where my entire family has lived for generations does not deserve to exist, and that my very existence as an Israeli Jew marks me in some way as morally in the wrong." Another (#44, student): "I have had professors who have found out that I'm Israeli (without even knowing my political beliefs themselves) treat me completely differently in and out of class after they find out. One professor literally cut me off from speaking in the middle of response I was giving in class and asked if anyone else wanted to speak instead of me." Another (#6, postdoc): "I'm Israeli and while I am appalled by the situation in Gaza, I support the

existence of the State of Israel where my family and friends live. This has somehow become a controversial opinion which I cannot state anywhere for the fear of being cancelled."

This is echoed by the Palestinian experience as well. A student noted that "Harvard has made it quite clear that as a Palestinian-American student, I am not welcome here. As someone who started at Harvard in Fall 2023, the things I have experienced this past year will forever shape how I feel at Harvard." The same student goes on to note that "Because of the genocide of my people, my mental health has been terrible this year, which has negatively affected my productivity. However, I am too scared to bring that up to my advisers because I fear that I would face discrimination, rather than support." (#1879, student)

One staff-person (#158, staff) wrote, "In most ways my work days chug along as usual, but there is a pit in my stomach anytime anything having to do with the conflict comes up. What will people say? My team knows I'm Palestinian — I feel all eyes are on me so I have to watch how I act and what I say."

A MENA student (#389, student) perceived double standards that made the year worse, saying, "I feel the University prioritized the concerns/feeling accepted of certain groups while dismissing other groups of students, specifically Arab ones felt ignored."

Black students also reported facing a lack of belonging. An undergraduate student notes that "I chose Harvard because I felt safe and seen when I visited before I enrolled. My first semester, however, showed me that the support only came from the students who looked like me, but to the larger community, we did not really matter. (#327, student)" A Black graduate student remarked that "I have experienced negative biases due to my views on current events and even due to my identity — there's a sort of assumption that solidarity with Gaza is equivalent to antisemitism, or that all Black women inherently carry some sort of antisemitism" (#2253, student). This is echoed by a Black staff member who noted that: "As a woman of color, I don't feel safe expressing my views, especially considering that President Gay was forced out not because she was antisemitic, but because she was a Black woman." (#169, staff). A Black faculty member (#1270, faculty) noted that "While I feel like I belong within certain communities at Harvard, I do not feel a strong sense of belonging to my School or a sense of shared identity with the Harvard administration. Events since the October 7th attacks have contributed to the sense that I do not fully belong at Harvard." The same respondent goes on to note that, "I also question whether the University would offer any support if politicians or other outside actors targeted me due to my work or scholarly positions. While I believe my scholarly positions are independent of my ethnic and religious background, I fear that those factors would also be held against me in this context." (#1270, faculty).

CONTRIBUTING FACTORS

We now turn to contributing factors and here, despite the large differences in sense of belonging, safety and ability to speak freely, we do not see large differences in the contributing factors across the different racial groups. The salient difference is that MENA community members rated their online interactions with students, faculty and staff, on campus media and Harvard's policies less favorably than other groups. The results for students are similar but just slightly more accentuated.

Figure 17: Contributing Factors by Race — All Respondents

The figure below now shows the responses restricting to students only.

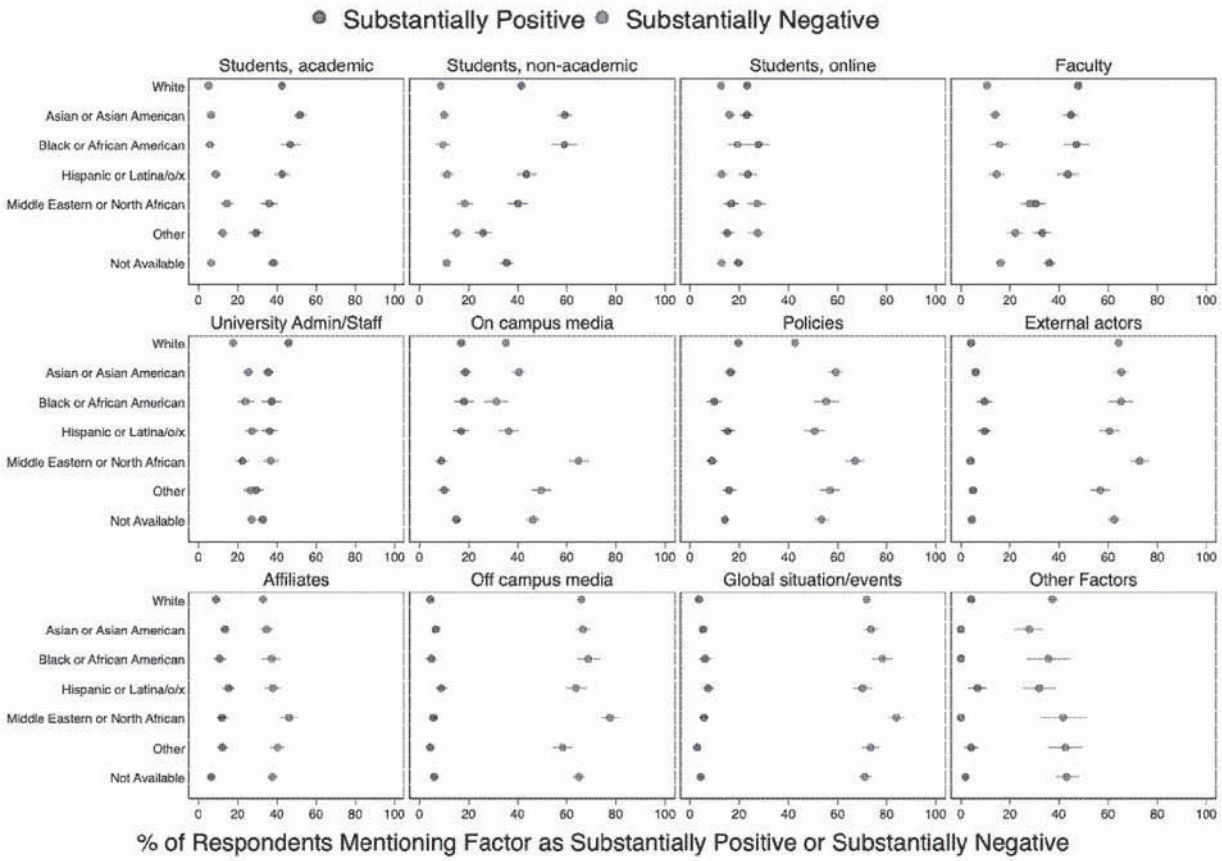

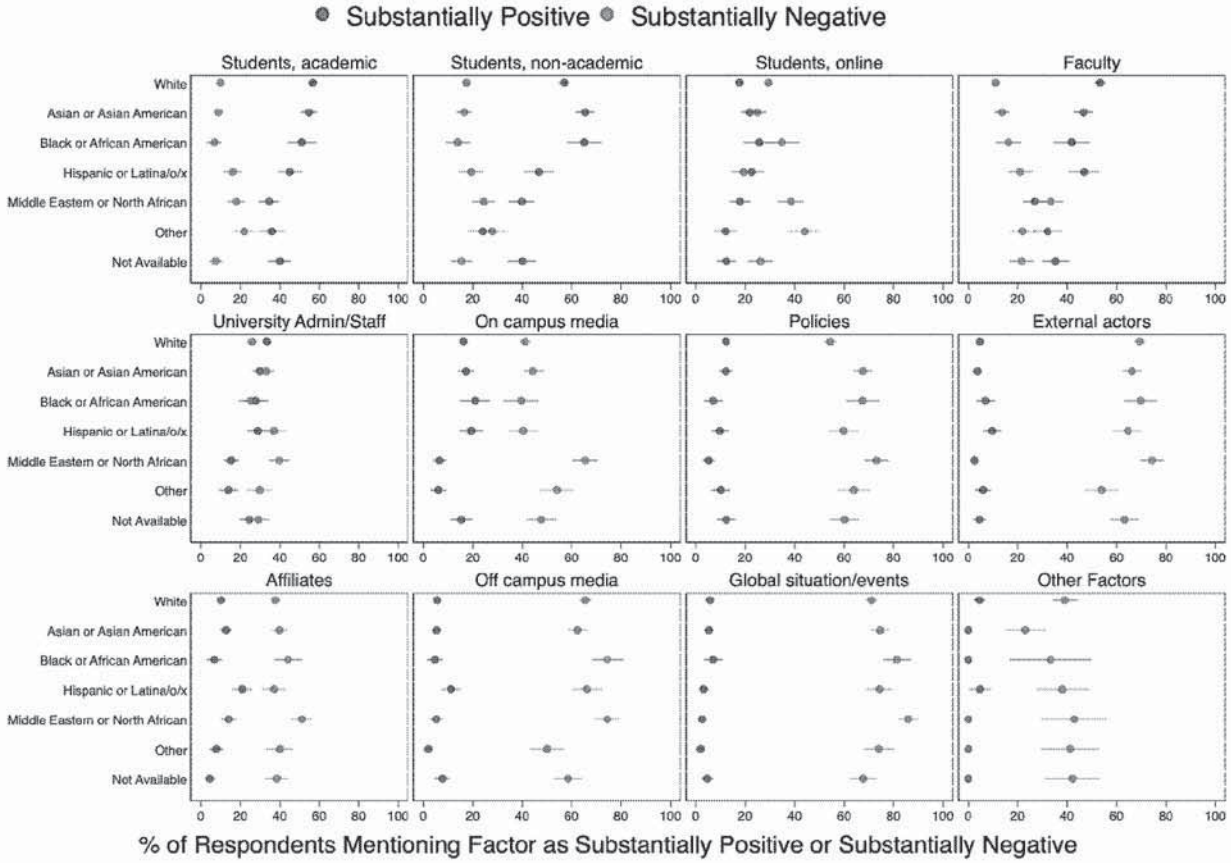

Figure 18: Contributing Factors by Race — Only Students

D. Regression Analysis on Religion and Race Heterogeneity

Our previous two sections have shown the there is substantial heterogeneity of impact by religion and race. Notably, Muslim and Jewish respondents as well as MENA respondents show the most negative evaluations. Given that MENA identity overlaps with both Muslim and Jewish, there is a question as to which dimension — race or religion — is more impactful in our results.

Table E1 in Appendix E shows the cross-tabulation of religion and race showing the extent of this overlap in our sample. Notably, the largest two religious categories for MENA respondents are Muslim and Jewish. Conversely, the two largest racial categories for Muslim respondents are MENA and Asian/Asian American. Given there is some overlap, we run multi-variate regression analysis (Appendix C) where for any of our given factors analyzed in the main body of our report (affiliation, religion, race) we show how our results are affected once we also control for other demographic attributes analyzed in the appendix (including gender, sexuality, political ideology, nationality).

Our results show that for the main outcomes our results are largely unaffected with the differences a given group experiencing remaining the same even when we have controlled for a range of other demographic attributes. This can be seen by comparing the odd number columns (results with no controls) with the subsequent even number ones (results with controls). The only case where our results are affected is the differential experience of Muslim and MENA respondents. While these two groups still show the most negative evaluations (within the religion and race categories respectively) even after we introduce other demographic controls, the magnitude of the differences for both are almost halved. Examining further, we find that this is because both Muslims and MENA identity have somewhat additive effects. In other

words, while non-MENA Muslim respondents report substantially negative evaluations, MENA Muslim respondents report even worse (at times twice as much) evaluations. Analogously, while Non-Muslim MENA respondents report large negative evaluations, Muslim MENA respondents have even larger negative evaluations: it is the combination of an individual being both Muslim and MENA that leads to the most negative evaluations. Tables C4a and C4b in the appendix show this further by simultaneously controlling for race and religion. As we can see the largest two (negative) effects are on the Muslim and MENA identities suggesting that both have distinct and separate impact. Moreover, for Tables C4a-b we see that adding more demographic controls (the odd numbered columns) does not affect either the coefficient on Muslim or MENA. This further confirms that our earlier results in Tables C2a-b and C3 a-b where the Muslim and/or MENA coefficients were affected due to controls was primarily driven by the overlap between Muslim and MENA categories.

While the data is somewhat limited to explore even finer sub-groups, we explore this further in Appendix E where we focus on SIX categories (respondent counts given in parenthesis) where we combine religion and race. Notably we separately present our results for the following respondents: (i) MENA Muslims (38); (ii) MENA Jews (36); (iii) MENA Other Religions (51); (iv) Non-MENA Muslims (51); (v) Non-MENA Jews (411); and (vi) non-MENA Other Religions (1710). We should caution though that some of the respondent counts are small and there is likely non-differential distribution of these categories across some of other demographic variables like Harvard affiliation etc. which is why we will also present regression results controlling for these additional demographics as well. Regardless, given the small sample sizes here, in comparing across race and religion categories, we draw suggestive inferences rather than firm conclusions. This is an area that we feel is worth exploring further using additional and more purposely collected data to study these adversely affected communities. That said, Figures E1 and E2 present now a more nuanced picture showing that while MENA Muslims typically express the most negative sentiment, the next most negative group is often MENA Jewish respondents, typically followed by Non-MENA Muslims and MENA respondents who are neither Muslim nor Jewish. Table E3 and E4 show the regression equivalent of these figures for the same six categories (the omitted category is non-MENA Other Religions) and present similar findings highlighting the adverse experiences that those with both MENA and Muslims/Jewish identities report. In the even numbered columns, we control for other demographic changes and while most results are unaffected there is a slight increase in the negative outcomes for non-MENA Jewish respondents likely because there is a higher fraction of faculty & staff than students in this category and we know from our results before that students tend to report worse outcomes than faculty and staff.

V. Respondents' Suggested Recommendations

The survey asked respondents to suggest specific recommendations that would be responsive to the concerns they may have raised in the questionnaire. We first used ChatGPT to help summarize themes in the recommendations suggested by students, faculty, and staff.

Among students, one key theme is about divestment and disclosure. A number of students recommend that the University divests financial interests in companies tied to Israel and/or to industries connected to warfare. Along these lines, students also recommended the University disclose investments in these areas.

A second theme relates to the enforcement of rules. Students would like clarity on rules related to free expression, and they would like for those rules to be enforced consistently in a content-neutral manner.

A third theme relates to claims about antisemitism, anti-Zionism, Islamophobia, anti-Arab bias and other forms of prejudice. Some students would like more education about what these terms mean to the

University. They also want the University to sanction those who behave prejudicially, and they want the University to do so consistently across targeted communities.

A fourth theme is about transparency in University procedures. Students want more information about how decisions are made, including disciplinary decisions and investment decisions. They'd like to know how large donors influence decisions.

A final theme is about inclusiveness. For some, Harvard has failed to be inclusive by hiring "so many antisemitic faculty members (#95, student)". For others, Harvard has failed to be inclusive by tolerating doxxing trucks. Still others feel that Harvard is not inclusive to pro-Palestine activists, who were treated negatively compared to activists of other social movements. And others report that Harvard could be more inclusive to religious students by offering more accommodations around their holiday observances.

Among faculty, the overall themes of recommendations were different. A core theme among faculty respondents was that Harvard should do more to engage students (including graduate students) in respectful dialogue, including on sensitive issues. Relatedly, faculty suggested more community-building and trust-building efforts so that the University feels more like a cohesive community. Faculty also raised several points related to ensuring the University is a place of free expression and not influenced by the interests of donors.

For staff, the theme of community-building also came up. Respondents want to see community-members spending more time together and more in dialogue. Staff also prioritized support for various subcommunities, such as "community members of color, its LGBTQAI+ community members, its community members with disabilities, etc (#83, staff)." Finally, staff members recommended both more transparency in University policies and improved communication across the University.

In addition to the AI-based review of all recommendations, we also read through the recommendations of Muslim and Jewish respondents. Among Muslim students, four key themes emerged.

One theme was around activism. Respondents recommend that students be given latitude to protest without fear of punishment from the University. Respondents recommend the University apologizes to students who were punished during the 2023-24 school year. Respondents call for the University to protect students who have been doxxed and support community-members when they are subjected to media attacks. Some ask for more security around Harvard Yard.

A second theme involves governance. Recommendations include divestment from Israel-related and military-related firms and disclosure of such investments. Respondents also recommend reducing the influence donors have on University policies and academic freedom. Some respondents want students to be more involved in governance around discipline and financial investments.

A third theme relates to education and dialogue. Respondents call for more educational opportunities to learn about the contemporary Middle East and specifically about "Palestine, Palestinian culture, and Palestinian history. (#290, student)" Respondents also want more opportunities for dialogue between Jewish and Palestinian community-members and more dialogue about the Israeli-Palestinian conflict.

A final theme from Muslim respondents is greater University support to the Muslim community. Recommendations include support for community-members dealing with Islamophobia and support in the form of programming around Ramadan.

Note that we also reviewed recommendation text for respondents by some racial categories, including Black respondents and MENA respondents. Black respondents and MENA respondents who were neither Jewish nor Muslim were largely overlapping with themes from Muslim students in terms of their suggested recommendations.

Among Jewish respondents, some recommendations were similar to those reported above and some were different. Perhaps the most common theme among Jewish respondents relates to protest, free expression, and discrimination. Respondents want Harvard to allow protests but to have clear and consistently applied rules, including clear consequences for the violation of rules. Several respondents mentioned the need for times, places, and manner rules so it is made clear that protests in venues such as classrooms and libraries are prohibited.

Second, Jewish respondents recommend that Harvard arrives at clear definitions of what it considers antisemitism. A number of respondents point to the lack of clarity on what amounts to antisemitism and a lack of understanding in the Harvard community of how antisemitism connects to anti-Zionism.

Third, respondents recommend Harvard adjust its recruitment policies both for students and faculty. For students, respondents recommend recruiting students more committed to learning and less to activism. For faculty, respondents recommend efforts to counterbalance the perceived left-wing orientation of professors. They recommend hiring more faculty who provide balanced perspectives and balanced course offerings.

Also, on the topic of education, respondents specifically recommend more course offerings related to Israel and Judaism across Harvard Schools in which Middle East politics is discussed. Respondents also suggest a research center that studies issues like antisemitism and anti-Arab prejudice together in a single center. On a similar theme, respondents call for more dialogue across difference and more open discussion on campus.

Fourth, respondents offered suggestions for adding offerings for community-members to explore a greater range of topics related to Jewish culture, languages, and religion. This includes the suggestion for creating a space for Jewish anti-Zionist students on campus.

Finally, a large number of Jewish respondents endorsed institutional neutrality as a guiding principle for the University. They also suggested reforming the University's engagement with DEI initiatives and staff. Many Jewish respondents feel that DEI offices are not able to satisfactorily engage with Jews as a minority group. Some would like DEI offices improve their engagement with Jewish community-members. Others would like to see DEI programs wound down.

In summarizing the above recommendations, we seek to emphasize that these recommendations have not been endorsed by two task forces nor by the authors of this auxiliary report. They simply reflect viewpoints of respondents to the survey.

VI. Conclusion

The results presented in the quantitative analysis shed light on the situation on Harvard's campus in the late Spring of 2024 as experienced by our students, staff, fellows and faculty. While they show sobering results — especially in terms of being able to have free enquiry and open discussions, and the experience of specific subgroups based on their religious and racial identities — they help by focusing on areas that can help heal our community. They also stress the importance of regularly collecting and analyzing data that take the pulse of how our community is feeling with respect to the educational, professional, and social environment. The results also raise several areas where further examination is needed.

Our results show that freedom of expression is one area where the most negative outcomes are perceived, especially for students. The latter is especially noteworthy to the extent we believe that students — who are developing their skills and need breathing room to make mistakes — should be more at ease with self-expression and not face academic, social, and professional risks from doing so.

Separate from the evidence on free expression, the responses from Muslim, Jewish, and MENA student respondents are troubling. Over a half of Muslim student respondents, a quarter of Jewish student respondents and a bit under a half of MENA student respondents do not feel physically safe on campus. A

clear majority Muslim, Jewish and ME students reported that they are not comfortable expressing their religious and ethnic identities on campus. On this measure, these groups appear very different from the other religions and racial groups.

While the task forces independently will offer recommendations specific to the Jewish/Israeli and Muslim/Arab/Palestinian communities, our primary recommendation in this document is a call for regular and in-depth research into community members and their sense of safety and well-being, with a particular focus on groups that appear to have a harder time expressing themselves and finding safety and comfort at Harvard.

Appendices included in the Analysis Report from the Joint Subcommittee on the Harvard-Wide Task Force Survey

APPENDIX A

A1. Heterogeneity by Age

SAFETY AND BELONGING

Figure A1a: Safety and Belonging by Age — All Respondents

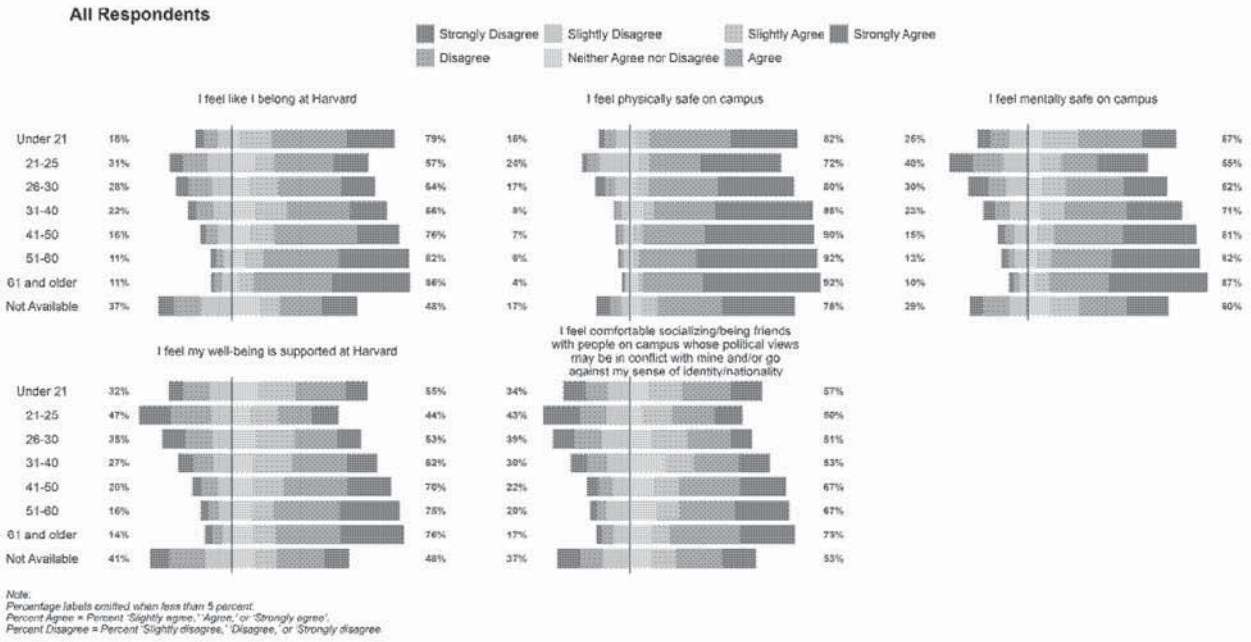

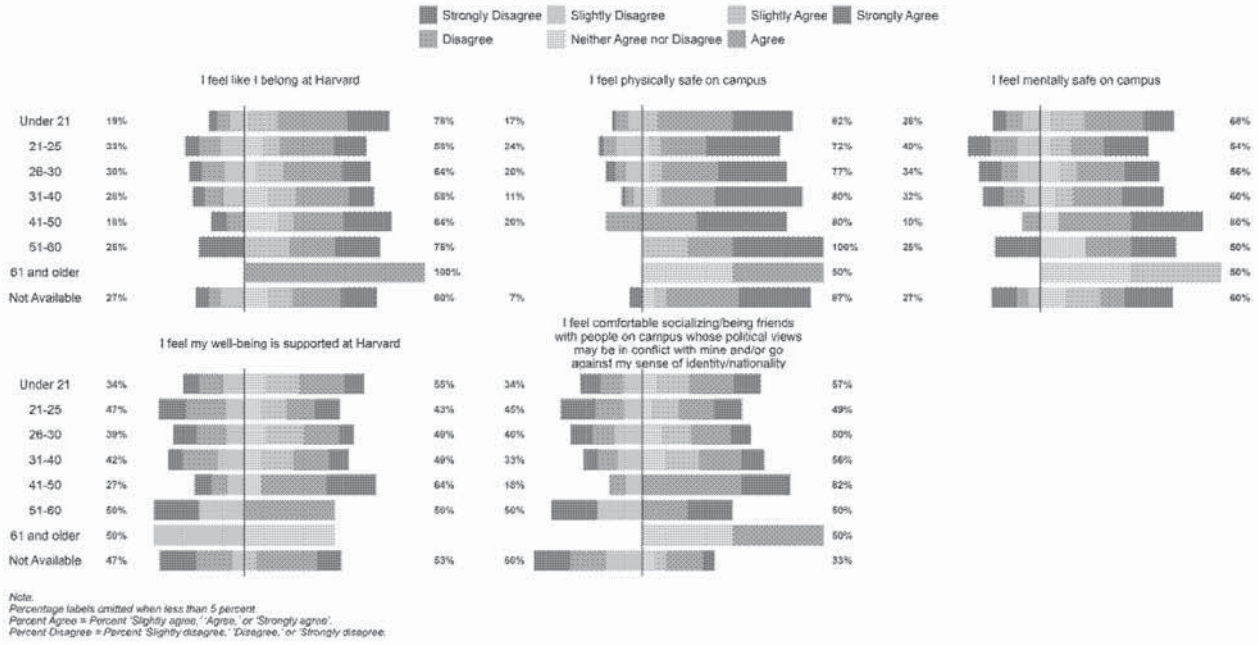

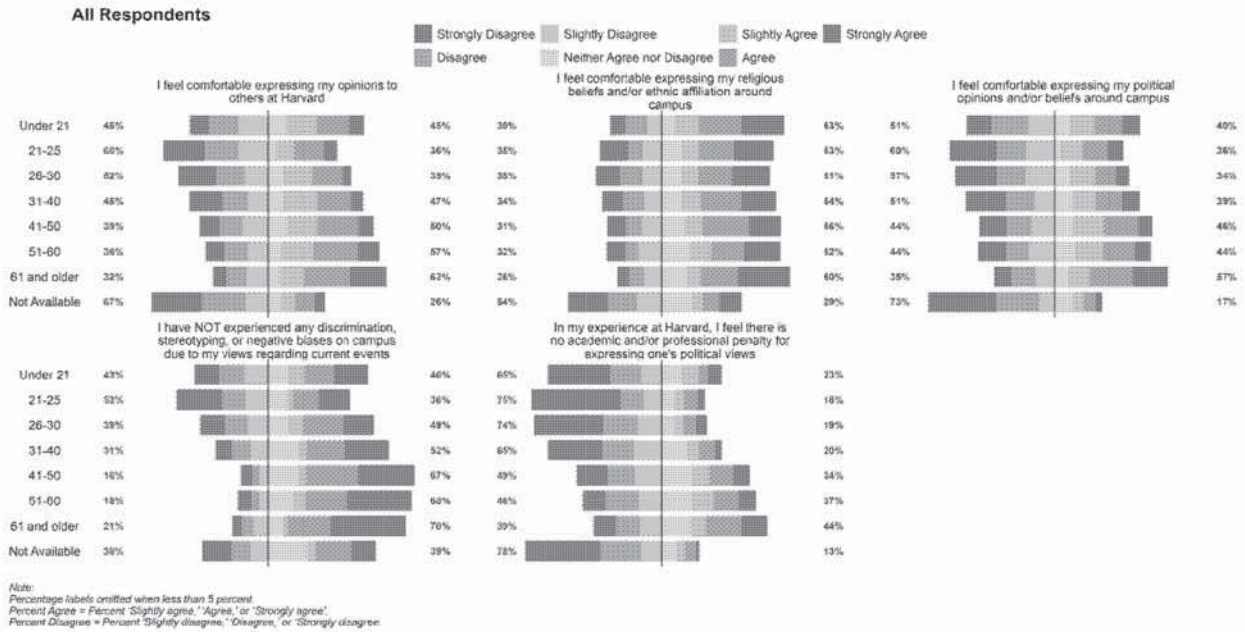

Figure A1b: Safety and Belonging by Age — Only Students

Note.
Percentage labels omitted when less than 5 percent.
Percent Agree = Percent 'Slightly agree,' 'Agree,' or 'Strongly agree'.
Percent Disagree = Percent 'Slightly disagree,' 'Disagree,' or 'Strongly disagree.

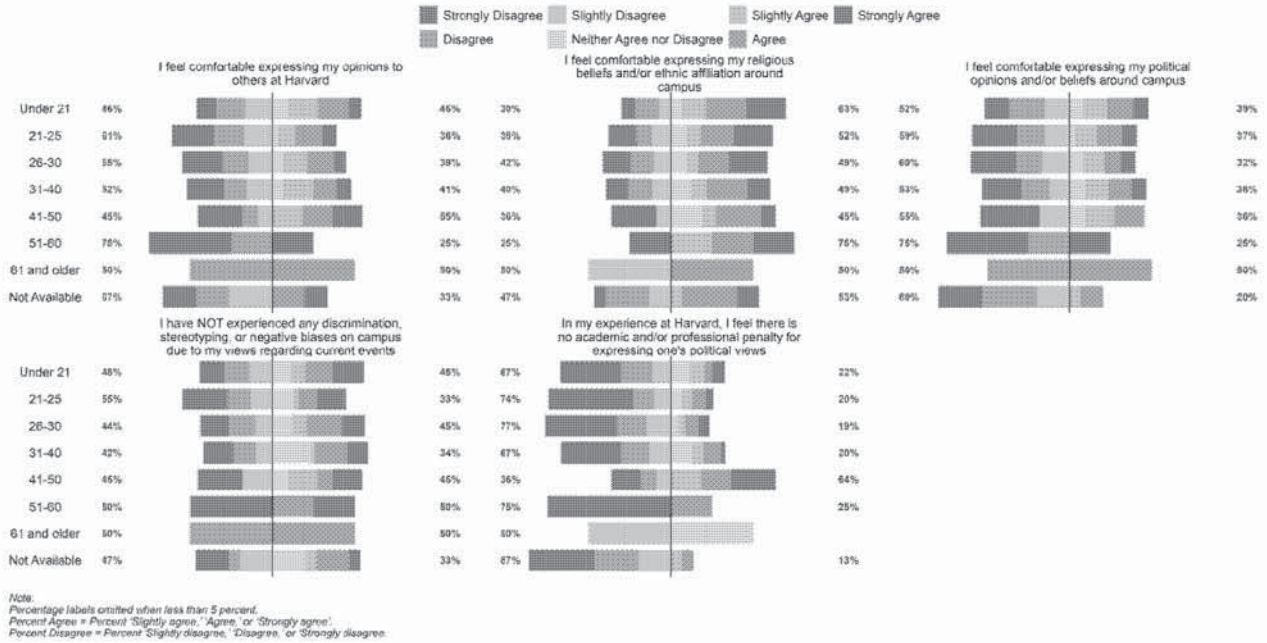

FREEDOM OF EXPRESSION

Figure A1c: Freedom of Expression by Age — All Respondents

Note:
Percentage labels omitted when less than 5 percent.
Percent Agree = Percent 'Slightly agree,' 'Agree,' or 'Strongly agree'.
Percent Disagree = Percent 'Slightly disagree,' 'Disagree,' or 'Strongly disagree.

Figure A1d: Freedom of Expression by Age — Only Students

Note:
Percentage labels omitted when less than 5 percent.
Percent Agree = Percent 'Slightly agree,' 'Agree,' or 'Strongly agree'.
Percent Disagree = Percent 'Slightly disagree,' 'Disagree,' or 'Strongly disagree.'

CONTRIBUTING FACTORS

Figure A1e: Contributing Factors by Age — All Respondents

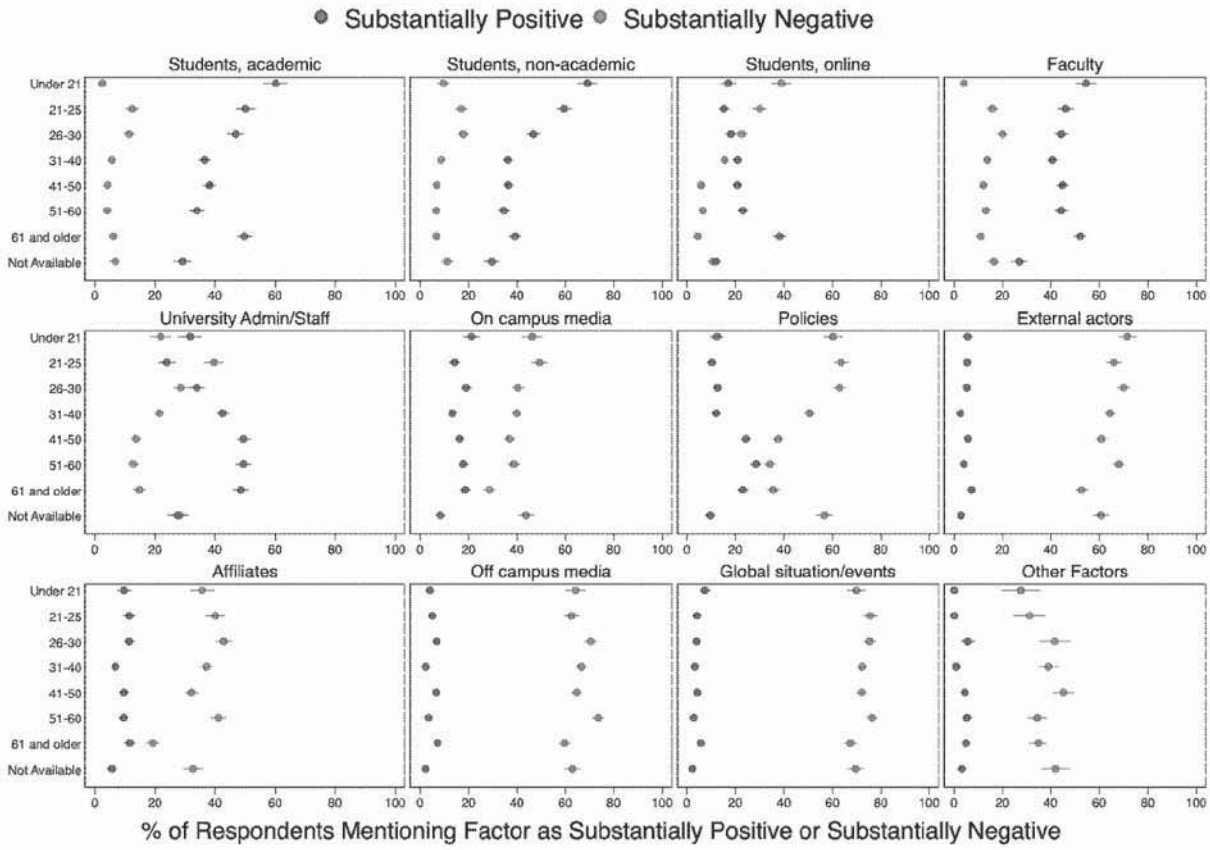

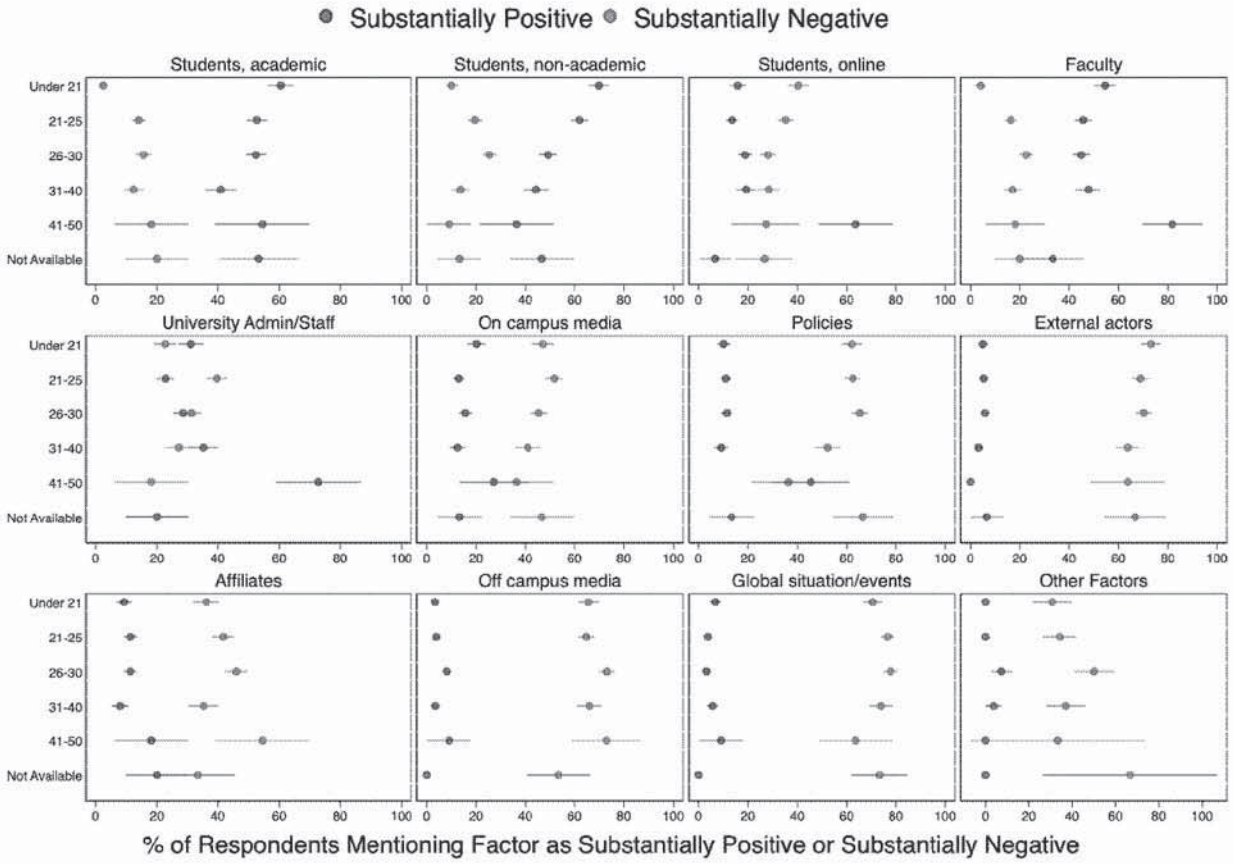

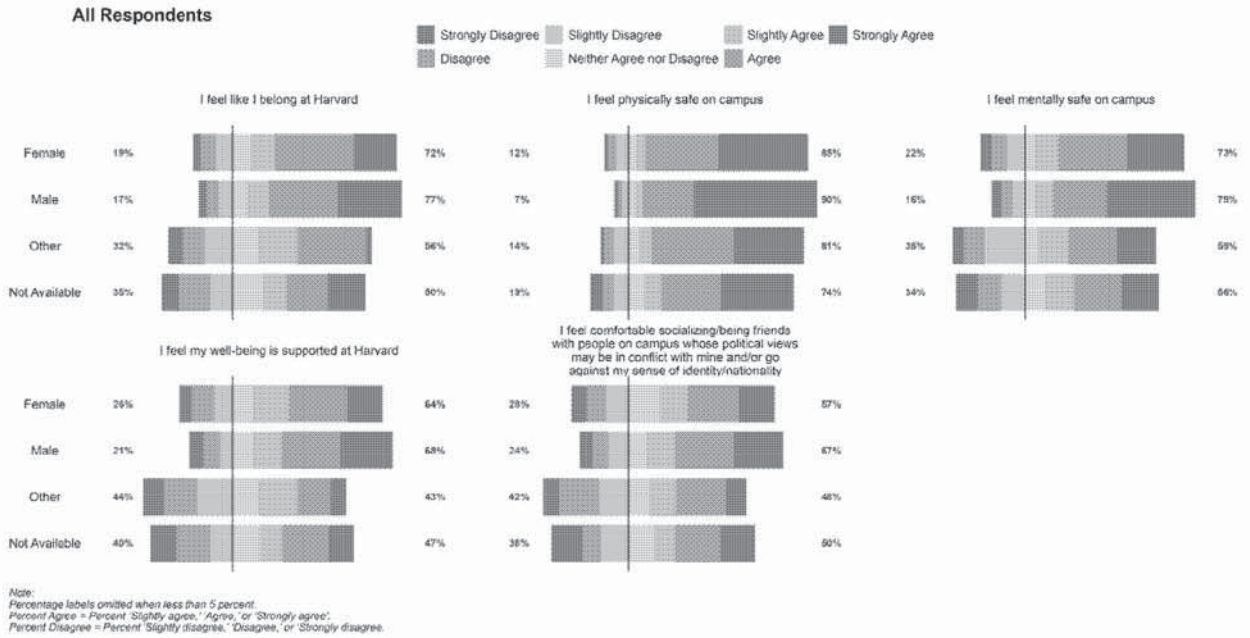

Figure A1f: Contributing Factors by Age — Only Students

APPENDIX F: PRE-ANALYSIS PLAN AND SURVEY INSTRUMENT

Phase I Community Survey: Pre-Analysis Plan

The goal of this pre-analysis plan is to specify, before any data collection or analysis, the approach that will be taken in analyzing the results of this survey. The survey will be distributed and administered online beginning in May 2024. The survey is open to all members of the Harvard community, including undergraduate and graduate students, faculty members, staff, and Harvard affiliates more broadly. It is only open to these members and their anonymity will be preserved. The survey exercise represents Phase I of longer term data gathering and analysis exercise. This phase will focus on getting the views of those members of the community who are currently more engaged and responsive to sharing their views. The subsequent phase will endeavor to also reach out to a wider Harvard-wide audience.

BACKGROUND

This survey is the first phase of a data collection effort aiming to provide a sense of the experiences and views of the Harvard community members, especially those most affected by and engaged in the events of the past several months. Note that this survey is not intended as a public opinion survey, but rather aims to offer insights into (i) how the community is feeling, particularly regarding their sense of belonging amidst recent events spanning the past several months, including those that may have led to antisemitic, anti-Israeli and anti-Arab, anti-Muslim, and anti-Palestinian biases and related concerns; (ii) what factors may be especially relevant in generating these experiences and biases; and (iii) what recommendations the community members may have in helping lessen some of the adverse experiences and biases faced. The survey, while focused on those who are more inclined to respond currently, will provide a systematic analysis of these issues and will also subsequently help inform the design and questions of a more representative survey that we hope to launch in the fall with the Harvard-wide community.

SURVEY ADMINISTRATION

Instrument

The survey includes four distinct sections:

1. Experiences of belonging, safety, and engagement at Harvard
2. Positive and negative factors influencing experiences
3. Recommendations to address concerns

4. Demographics

Each of these sections will include close-ended/multiple choice questions and open-ended questions that allow participants to elaborate on their experiences and suggestions.

Sample

The survey will be posted on a Harvard website and disseminated to Harvard affiliates through various means such as targeted emails, and word of mouth reminders. To take the survey, participants will be required to login using their HarvardKey credentials. This verification allows us to avoid duplication of survey responses by the same person and to avoid the inclusion of individuals outside of Harvard.

Note that since completing the survey is not mandatory, as well as the fact that the survey will be publicized to community members in varying ways, the sample might not be proportionally representative of the overall Harvard population; instead, it might represent the views of those individuals in the Harvard community who are more inclined and willing to share their opinions.

Confidentiality

Responses to the survey are confidential and anonymous. As soon as participants submit their survey responses, their personal credentials will be immediately separated from their answers and deleted. Survey administrators and research team members will not have access to respondents' identifying information. The research team will also mask/redact any potentially identifying information from text submitted in response to the open-ended items. Accordingly, respondents will never be identified in published results.

Incentives

We are not offering any gifts or monetary incentives to finish the survey at this time. Affiliates will be asked to take the survey voluntarily to shed light on their experiences and feedback.

Timeline for Administration and Communication Plan

The survey will be launched in May by placing them on the websites of both task-forces. Links will be shared with community members using various formal and informal fora.

REPORTING OF RESULTS AND ANALYSIS

Analysis

The survey collects both open-ended and multiple-choice questions that will be analyzed and published in ways that both complement each other but also acknowledge differences due to elicitation methods.

1. Multiple choice/close-ended questions: we will tabulate and report the number and percentage of each answer selected on these questions. The idea will be to provide a sense of the average and variation in the responses.

2. Open-ended questions: to protect confidentiality, we will not fully share all open-ended answers and comments received. Instead, we will synthesize the answers to these questions and select parts of comments (while minimizing any risk of jeopardizing anonymity) to highlight in public communications. If specific feedback or recommendations are repeatedly highlighted by different respondents in open-ended fields, we will highlight this in our synthesis. While the open-ended questions are typically associated with specific close-ended questions, we acknowledge that respondents may cover multiple themes in one long text response and may not always make the distinction of keeping their open-responses separate and specific to the close-ended question they are adjacent to or even the given open-ended question prompt. Therefore, in our analysis we will compile all the open-ended responses together so they can be appropriately analyzed based on their content and not just location, and as appropriate, use their placement in the survey to interpret the context if not clear from the response itself.

Points of Disaggregation

We will report the variable tabulations separately for the different sub-groups and demographics. In doing so, we will make sure not to combine any groups in a way that may reveal respondents' identity. Sub-groups we are considering include:

- Harvard affiliation
- Harvard School
- Age
- National identity
- Race/ethnicity identity
- Religious views
- Gender
- Sexual orientation
- Political views

Representativeness and Weighting Strategy

Since this survey is not administered through a University-wide dissemination, it is not intended to provide a representative view. Instead, it is meant to share the views of those individuals who are currently more engaged and willing to share their opinions. That said, we will share the response numbers (overall and by various sub-groups) to be able to give a sense of coverage across various groups. Moreover, we hope that by comparing these sub-groups to those in the subsequent Harvard-wide Pulse survey in the Fall semester, we will be able to determine whether a weighting scheme (if any) is appropriate to best present the results. We will not weigh the results unless we have evidence it is needed and will note instances of where it is used in reports.

Deliverables

The main deliverable of the report will be a public key findings report with infographics for the wider Harvard and public community. The report will include descriptive statistics and detailed analysis with inferential statistics. The analysis will also be utilized to inform the design and administration of the Harvard-wide 2024 Pulse Survey anticipated to be launched in the Fall of 2024.

Proposed Timeline for Survey Analysis

We anticipate the survey will run for the month of May 2024 till June 2024. Analysis will be carried out over the summer with a plan to have an interim findings report by mid-summer and a final analysis by end summer 2024.

APPENDIX: SURVEY INSTRUMENT

PTF Survey 2024

This survey is being conducted by the two Presidential Task Forces set up in response to concerns regarding anti-Arab, anti-Muslim, and Antisemitic biases faced by members of the Harvard community. The survey solicits views on our community members' well-being, experiences, and recommendations. It complements the listening sessions conducted over the past few months. The data gathered will document (i) how the community is feeling regarding their sense of belonging, safety, and ability to engage positively; (ii) what factors may be especially relevant in generating community experiences; and (iii) specific

recommendations for improvement. The last survey section gives you the option to self-identify along several attributes to enable a more informative analysis that preserves anonymity. We anticipate the fixed response part of the survey taking 5-10 minutes. We allow for and especially encourage open-ended responses as they provide valuable nuance and specificity. Survey responses will be kept anonymous and participation in the survey is voluntary. The data collected will be analyzed according to a pre-specified analysis plan publicly available here. To take the survey in Spanish, Portuguese, Mandarin, or Haitian Creole, please visit this link.

I. Experience

Thank you for beginning the survey! Your responses on each page are saved when you click the right arrow on the bottom. This allows you to re-login at a later time to complete the survey. However, no further changes will be possible once you submit the survey. Upon submission, response data is de-linked from your login credentials to ensure anonymity.

For the following statements, please rate how strongly you agree or disagree.

	Strongly disagree	Disagree	Slightly disagree	Neither agree nor disagree	Slightly agree	Agree	Strongly agree	Prefer not to answer
I feel like I belong at Harvard	○	○	○	○	○	○	○	○
I feel physically safe on campus	○	○	○	○	○	○	○	○
I feel mentally safe on campus	○	○	○	○	○	○	○	○
I feel my well-being is supported at Harvard	○	○	○	○	○	○	○	○
I feel comfortable expressing my opinions to others at Harvard	○	○	○	○	○	○	○	○
I have NOT experienced any discrimination, stereotyping, or negative biases on campus due to my views regarding current events	○	○	○	○	○	○	○	○
I feel comfortable expressing my religious beliefs and/or ethnic affiliation around campus	○	○	○	○	○	○	○	○

I feel comfortable expressing my political opinions and/or beliefs around campus	○	○	○	○	○	○	○	○
I feel comfortable socializing/being friends with people on campus whose political views may be in conflict with mine and/or go against my sense of identity/nationality	○	○	○	○	○	○	○	○
In my experience at Harvard, I feel there is no academic and/or professional penalty for expressing one's political views	○	○	○	○	○	○	○	○

Please describe in more detail below recent and/or salient experience(s) — positive and/or negative — that can shed further light and/or nuance on your responses above:

_____

_____

_____

_____

_____

Compared to this time last year, how has your sense of safety, belonging, and/or ability to interact positively with the community on the Harvard campus changed? Please elaborate using the open text-box and select multiple choices if you experienced both positive and negative changes.

☐ Became much worse this year. Please specify how / why: _____

☐ Became worse this year. Please specify how / why: _____

☐ Remained more or less the same this year. Please specify how / why: _____

☐ Became better this year. Please specify how / why: _____

☐ Became much better this year. Please specify how / why: _____

☐ Check if you were not on campus last year

II. Factors (positive and negative)

For each of the factors below, indicate whether they have contributed substantially positively and/or negatively to your sense of safety, belonging, and/or ability to interact with the community on campus. Note that the same factor could affect you positively or negatively. If a factor is not salient please select "Not substantial /No Opinion". Please also provide details on each substantial factor using the text boxes that appear at the end of the page based on your selections.

	Substantially positive	Substantially negative	Not substantial / no opinion
(1) In-person interactions with Harvard students in academic settings (e.g. classroom, lab, etc.)	○	○	○
(2) In-person interactions with Harvard students in non-academic settings (e.g. extracurricular activity, event, or social gathering)	○	○	○
(3) Online interactions with Harvard students	○	○	○
(4) In-person or online interactions with Harvard faculty	○	○	○
(5) In-person or online interactions with Harvard administration/staff	○	○	○
(6) On campus media coverage (print/social)	○	○	○
(7) Harvard University and School policies	○	○	○
(8) External actors' presence/influence on campus life and climate	○	○	○
(9) In-person or online interactions with individuals not affiliated with Harvard	○	○	○
(10) Off campus media coverage (print/social)	○	○	○
(11) Global situation/events	○	○	○

We now list each of the factors that you selected as affecting you substantially positively or negatively. Please provide details/specific examples on how you were affected for each by responding separately to the specific open text boxes below:

Positive: (1) In-person interactions with Harvard students in academic settings (e.g. classroom, lab, etc.)

_____

Negative: (1) In-person interactions with Harvard students in academic settings (e.g. classroom, lab, etc.)

_____

Positive: (2) In-person interactions with Harvard students in non-academic settings (e.g. extracurricular activity, event, or social gathering)

Negative: (2) In-person interactions with Harvard students in non-academic settings (e.g. extracurricular activity, event, or social gathering)

Positive: (3) Online interactions with Harvard students

Negative: (3) Online interactions with Harvard students

Positive: (4) In-person or online interactions with Harvard faculty

Negative: (4) In-person or online interactions with Harvard faculty

Positive: (5) In-person or online interactions with Harvard administration/staff

Negative: (5) In-person or online interactions with Harvard administration/staff

Positive: (6) On campus media coverage (print/social)

Negative: (6) On campus media coverage (print/social)

Positive: (7) Harvard University and School policies

Negative: (7) Harvard University and School policies

Positive: (8) External actors' presence/influence on campus life and climate

Negative: (8) External actors' presence/influence on campus life and climate

Positive: (9) In-person or online interactions with individuals not affiliated with Harvard

Negative: (9) In-person or online interactions with individuals not affiliated with Harvard

Positive: (10) Off campus media coverage (print/social)

Negative: (10) Off campus media coverage (print/social)

Positive: (11) Global situation/events

Negative: (11) Global situation/events

Positive: (12) Other Factor

Negative: (12) Other Factor

III: Recommendations

Please list up to five specific recommendations to help address some of the concerns that you have raised.

Recommendation 1:

Recommendation 2:

Recommendation 3:

Recommendation 4:

_____

_____

_____

Recommendation 5:

_____

_____

_____

_____

_____

Please share anything else that you feel is important to highlight regarding our campus community and current climate.

_____

_____

_____

_____

_____

IV. Demographics

Please share how you self-identify along the attributes below. Doing so will allow the analysis to be separately tabulated by these identities and provide a more informative examination. Under a given category you can also choose "Other" and specify an identity that is not included in the list. You can also select multiple identities in each category. Be assured that we will not combine these categories in ways that could risk revealing a specific respondent. That said, for each category you can choose "Prefer not to answer" if you prefer not to disclose a specific identity.

Which of the following best describes your current primary affiliation with Harvard?

☐ Undergraduate Student

☐ Graduate or Professional Student

☐ Staff

☐ Tenured or Tenure-Track Faculty

☐ Non-Ladder Faculty

☐ Fellow / Researcher

☐ Postdoctoral Fellow

☐ Other _____

☐ Prefer not to answer

Which Harvard Schools or Units are you affiliated with? (select all that apply)

- ☐ Harvard Business School (HBS)
- ☐ Harvard College
- ☐ Harvard Divinity School (HDS)
- ☐ Harvard Division of Continuing Education (including the Extension School)
- ☐ Harvard Faculty of Arts and Sciences (FAS)
- ☐ Harvard Kennedy School (HKS)
- ☐ Harvard Kenneth C. Griffin Graduate School of Arts and Sciences (GSAS)
- ☐ Harvard Graduate School of Design (GSD)
- ☐ Harvard Graduate School of Education (HGSE)
- ☐ Harvard John A. Paulson School of Engineering and Applied Sciences (SEAS)
- ☐ Harvard Law School (HLS)
- ☐ Harvard Medical School (HMS)
- ☐ Harvard Radcliffe Institute for Advanced Study
- ☐ Harvard School of Dental Medicine (HSDM)
- ☐ Harvard T.H. Chan School of Public Health (HSPH)
- ☐ Central Administration
- ☐ Other _____
- ☐ Prefer not to answer

Which age group best describes you?

- ☐ Under 21
- ☐ 21-25
- ☐ 26-30
- ☐ 31-40
- ☐ 41-50
- ☐ 51-60
- ☐ 61 and older
- ☐ Prefer not to answer

Which nationality identity best describes you? If you have multiple nationalities, please press command/control and select all that apply.

[drop-down list of countries with Prefer not to Answer option included]

Which racial/ethnic identity best describes you? (select all that apply)

☐ American Indian or Alaska Native

☐ Asian or Asian American

☐ Black or African American

☐ Hispanic or Latina/o/x

☐ Middle Eastern or North African

☐ Native Hawaiian or Pacific Islander

☐ White

☐ Prefer to self-identify _____

☐ Prefer not to answer

Which best describes your religious identity? Please select all that apply and specify the branch, sect, or denomination you follow in the corresponding box below, if applicable.

☐ Buddhism. Please specify branch, sect, or denomination if applicable: _____

☐ Christianity. Please specify branch, sect, or denomination if applicable: _____

☐ Hinduism. Please specify branch, sect, or denomination if applicable: _____

☐ Islam. Please specify branch, sect, or denomination if applicable: _____

☐ Judaism. Please specify branch, sect, or denomination if applicable: _____

☐ Taoism. Please specify branch, sect, or denomination if applicable: _____

☐ Folk religions. Please specify branch, sect, or denomination if applicable: _____

☐ Shinto. Please specify branch, sect, or denomination if applicable: _____

☐ Sikhism. Please specify branch, sect, or denomination if applicable: _____

☐ Bahテ。ハシテュ Faith. Please specify branch, sect, or denomination if applicable: _____

☐ Jainism. Please specify branch, sect, or denomination if applicable: _____

☐ Spiritual

☐ Agnostic

☐ No religion

☐ Atheist

☐ Prefer to self-identify _____

☐ Prefer not to answer

Which best describes your gender identity? (select all that apply)

☐ Gender nonconforming

☐ Genderqueer

☐ Man

☐ Nonbinary

☐ Questioning

☐ Transgender
☐ Woman

May 6, 2025

Dr. Alan Garber
Office of the President
Harvard University
Massachusetts Hall
Cambridge, MA 02138

Dr. Garber:

NIH is hereby providing notice that funding for the projects in the attached spreadsheet will be terminated pursuant to the National Institutes of Health ("NIH") Grants Policy Statement (GPS),[1] and 2 C.F.R. § 200.340(a)(4).

As reflected in the Notices of Award for the most recent budget period of these projects, the NIH Grants Policy Statement is incorporated as a term and condition of award. The GPS "includes the terms and conditions of NIH grants and cooperative agreements and is incorporated by reference in all NIH grant and cooperative agreement awards."[2] According to the GPS, "NIH may … terminate the grant in whole or in part as outlined in 2 CFR Part 200.340."[3] At the time the Notices of Award were issued for the most recent budget period, 2 C.F.R. § 200.340(a)(4) permitted termination "[b]y the Federal awarding agency or pass-through entity, to the greatest extent authorized by law, if an award no longer effectuates the program goals or agency priorities."

These awards no longer effectuate agency priorities. NIH is obligated to carefully steward grant awards to ensure taxpayer dollars are used in ways that benefit the American people and improve their quality of life. Your project does not satisfy these criteria.

NIH is responsible for ensuring that its limited resources are appropriately allocated. NIH policy is that grant dollars should support institutions that foster safe, equal, and healthy working and learning conditions conducive to high-quality research and free inquiry.[4] NIH policy is also that grant dollars should only support institutions that comply with principles and laws of nondiscrimination.

---

[1] https://grants.nih.gov/grants/policy/nihgps/nihgps.pdf.
[2] NIH GPS, Section 3.
[3] *Id.* at Section 8.5.2.
[4] NIH GPS, Section 4.

As relevant to NIH's policies, NIH understands that Harvard continues to engage in race discrimination including in its admissions process, and in other areas of student life, such as access to the Law Review at Harvard Law School.

NIH is also aware of recent events at Harvard University involving antisemitic action that suggest the institution has a disturbing lack of concern for the safety and wellbeing of Jewish students. Harvard's ongoing inaction in the face of repeated and severe harassment and targeting of Jewish students has ground day-to-day campus operations to a halt, deprived Jewish students of learning and research opportunities to which they are entitled, and brought shame upon the University and our nation as a whole. Indeed, as the Harvard Presidential Task Force on Combating Antisemitism and Anti-Israeli Bias concluded, actions at Harvard during the 2023-2024 academic year resulted in widespread abuse of Jewish and Israeli students by an institution "that mainstreamed and normalized what many Jewish and Israeli students experience as antisemitism and anti-Israeli bias."

Supporting research in such an environment is plainly inconsistent with NIH's priorities and *raison d'etre* of funding and championing the very best American research and educational institutions.

Although "NIH generally will suspend (rather than immediately terminate) a grant and allow the recipient an opportunity to take appropriate corrective action before NIH makes a termination decision,"[5] no corrective action is possible here. That is because, upon being made aware of systematic institutional failures to address deeply rooted antisemitism and racial discrimination, the University has refused to take appropriate action. NIH perceives these categorical rejections to manifest the University's unwillingness to take corrective action or implement necessary reforms. Therefore, no modification of the projects could align the projects with agency priorities.

Costs resulting from financial obligations incurred after termination are not allowable.[6] Nothing in this notice excuses either NIH or you from complying with the closeout obligations imposed by 2 C.F.R. §§ 200.344. NIH will provide any information required by the Federal Funding Accountability and Transparency Act or the Office of Management and Budget's regulations to *USAspending.gov*.[7]

Administrative Appeal

You may object and provide information and documentation challenging these terminations.

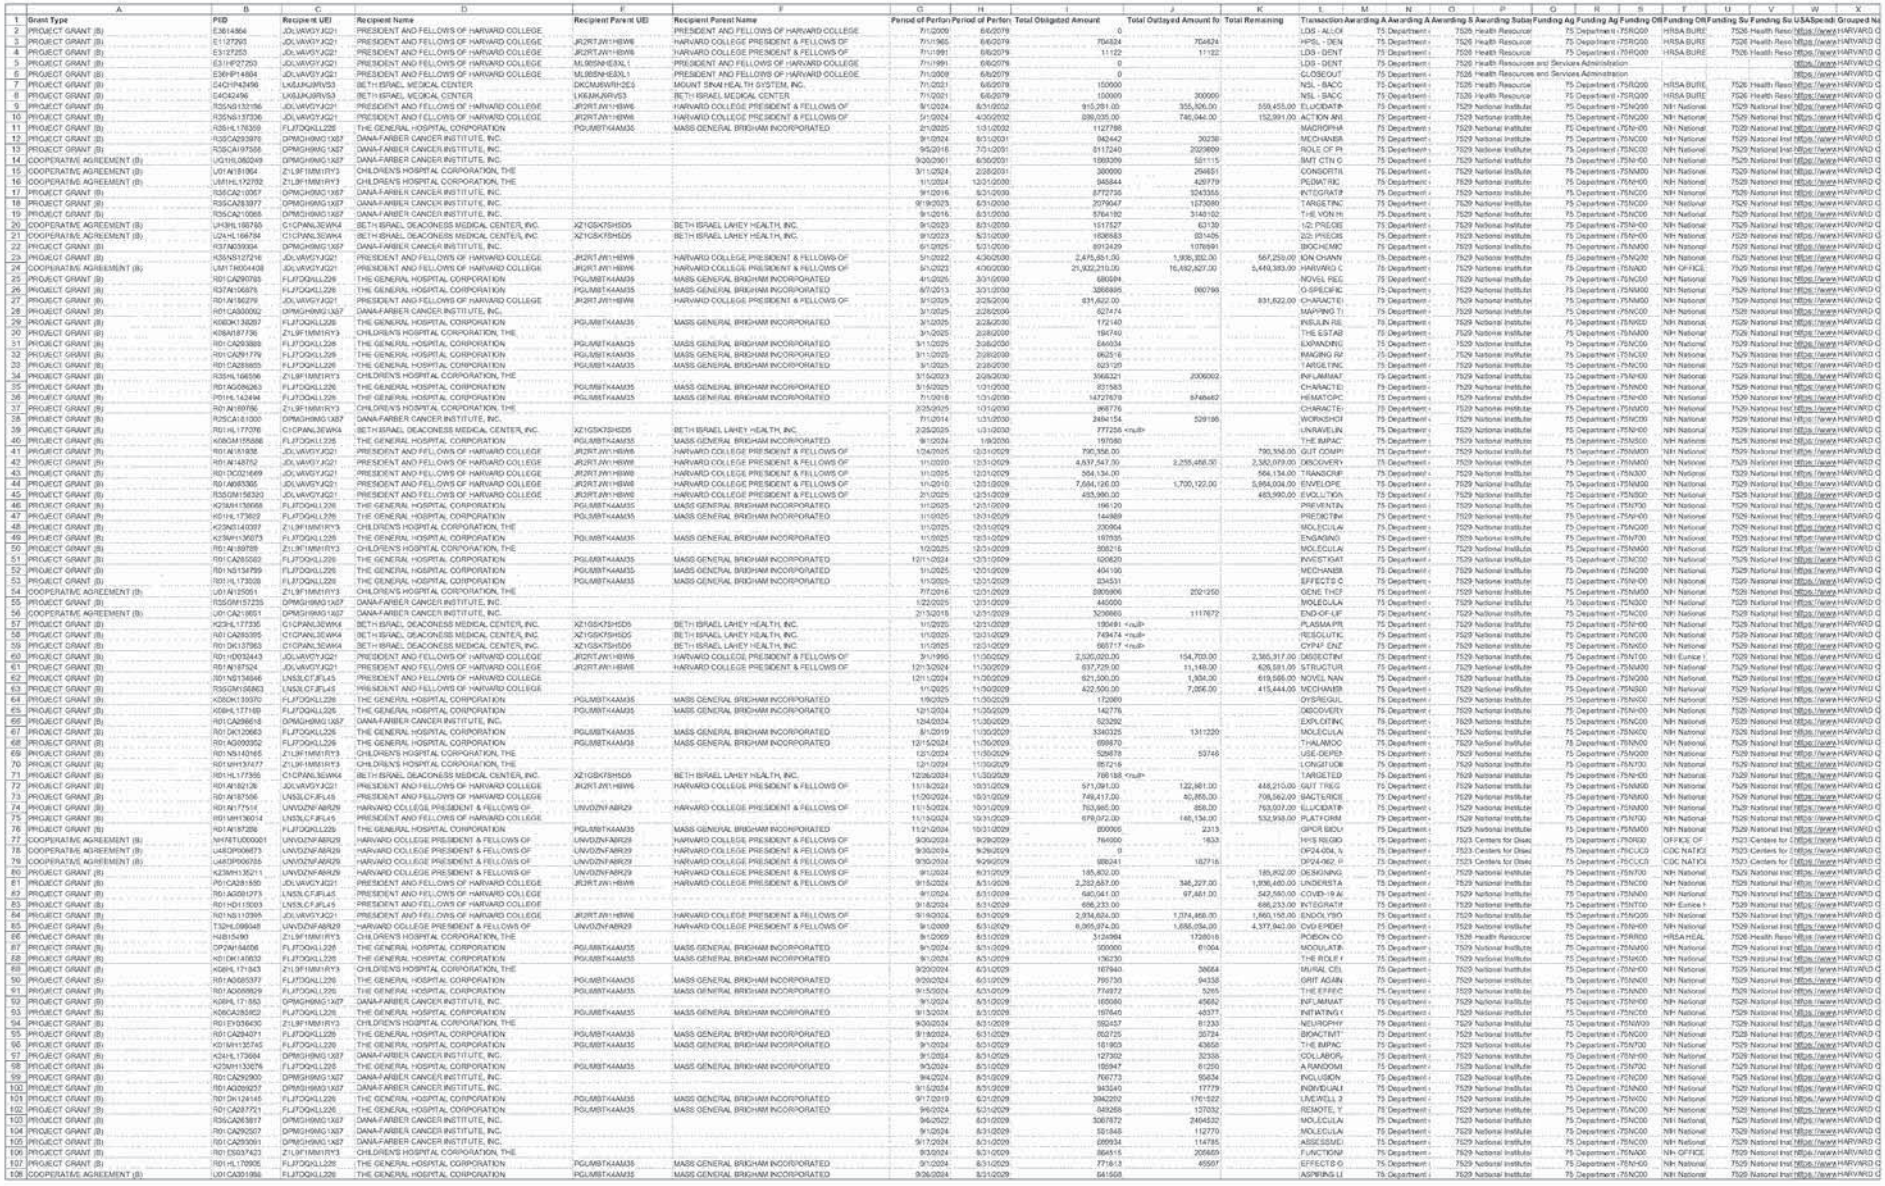

You must submit a request for such review to Director Bhattacharya no later than 30 days after this letter is received, except that if you show good cause why an extension of time should be granted, Dr. Bhattacharya may grant an extension of time.

The request for review must include a copy of this decision, must identify the issue(s) in dispute, and must contain a full statement of your position with respect to such issue(s) and the pertinent facts and reasons in support of your position. In addition to the required written statement, you shall provide copies of any documents supporting your claim.

Sincerely,

Michelle G. Bulls

SECTION I – AWARD DATA – 5R01AI182377-02

Principal Investigator(s):
[redacted]

Award e-mailed to: [redacted]

Dear Authorized Official:

The National Institutes of Health hereby awards a grant in the amount of $712,062 (see "Award Calculation" in Section I and "Terms and Conditions" in Section III) to HARVARD MEDICAL SCHOOL in support of the above referenced project. This award is pursuant to the authority of 42 USC 241 42 CFR 52 and is subject to the requirements of this statute and regulation and of other referenced, incorporated or attached terms and conditions.

Acceptance of this award, including the "Terms and Conditions," is acknowledged by the recipient when funds are drawn down or otherwise requested from the grant payment system.

Each publication, press release, or other document about research supported by an NIH award must include an acknowledgment of NIH award support and a disclaimer such as "Research reported in this publication was supported by the National Institute Of Allergy And Infectious Diseases of the National Institutes of Health under Award Number R01AI182377. The content is solely the responsibility of the authors and does not necessarily represent the official views of the National Institutes of Health." Prior to issuing a press release concerning the outcome of this research, please notify the NIH awarding IC in advance to allow for coordination.

Award recipients must promote objectivity in research by establishing standards that provide a reasonable expectation that the design, conduct and reporting of research funded under NIH awards will be free from bias resulting from an Investigator's Financial Conflict of Interest (FCOI), in accordance with the 2011 revised regulation at 42 CFR Part 50 Subpart F. The Institution shall submit all FCOI reports to the NIH through the eRA Commons FCOI Module. The regulation does not apply to Phase I Small Business Innovative Research (SBIR) and Small Business Technology Transfer (STTR) awards. Consult the NIH website http://grants.nih.gov/grants/policy/coi/ for a link to the regulation and additional important information.

If you have any questions about this award, please direct questions to the Federal Agency contacts.

Sincerely yours,

Nicole A Guidetti
Grants Management Officer
NATIONAL INSTITUTE OF ALLERGY AND INFECTIOUS DISEASES

For payment and HHS Office of Inspector General Hotline information, see the NIH Home Page at http://grants.nih.gov/grants/policy/awardconditions.htm

SECTION III – STANDARD TERMS AND CONDITIONS – 5R01AI182377-02

This award is based on the application submitted to, and as approved by, NIH on the above-titled project and is subject to the terms and conditions incorporated either directly or by reference in the following:

a. The grant program legislation and program regulation cited in this Notice of Award.
b. Conditions on activities and expenditure of funds in other statutory requirements, such as those included in appropriations acts.
c. 45 CFR Part 75.
d. National Policy Requirements and all other requirements described in the NIH Grants Policy Statement, including addenda in effect as of the beginning date of the budget period.
e. Federal Award Performance Goals: As required by the periodic report in the RPPR or in the final progress report when applicable.
f. This award notice, INCLUDING THE TERMS AND CONDITIONS CITED BELOW.

(See NIH Home Page at http://grants.nih.gov/grants/policy/awardconditions.htm for certain references cited above.)

Research and Development (R&D): All awards issued by the National Institutes of Health (NIH) meet the definition of "Research and Development" at 45 CFR Part§ 75.2. As such, auditees should identify NIH awards as part of the R&D cluster on the Schedule of Expenditures of Federal Awards (SEFA). The auditor should test NIH awards for compliance as instructed in Part V, Clusters of Programs. NIH recognizes that some awards may have another classification for purposes of indirect costs. The auditor is not required to report the disconnect (i.e., the award is classified as R&D for Federal Audit Requirement purposes but non-

Attachment 1 – Statement of Work

75A50123D00004_75A50124F61002

Preflight Tasks supporting the AVATAR Program

Background: The mission of the BARDA is to develop medical countermeasures (MCM) that address the public health and medical consequences of chemical, biological, radiological, and nuclear (CBRN) accidents, incidents and attacks, pandemic influenza, and emerging infectious diseases. This is achieved through support of the advanced development and procurement of drugs, vaccines and other products that are considered priorities for national health security. In addition to addressing specific threats, BARDA also supports a threat-agnostic posture through investing in a portfolio of technologies that are flexible and can address a multitude of threats, including MCMs that are built on versatile platforms that can be rapidly adapted to address a new threat.

Under the parent IDIQ with BARDA, interagency partners can request and award task orders. The National Aeronautics and Space Administration (NASA) Division of Biological & Physical Sciences has a two-pronged mission to pioneer scientific discovery in and beyond low Earth orbit to drive advances in science, technology, and space exploration to enhance knowledge, education, innovation, and economic vitality; and enable human spaceflight exploration to expand the frontiers of knowledge, capability, and opportunity in space. To support this mission, BARDA is issuing an RTOR to support the preflight work required to move forward with the AVATAR project with the potential for a follow-on task order to be issued by BARDA.

The overall objective of this Task Order is to complete administrative and scientific preflight work required for AVATAR's success and status on-board the Artemis 2 flight. The base-period work is for administrative efforts including but not limited to project management, the submission of the AVATAR revised science proposal, the production of the JSC Internal Review Board (IRB) protocol document and any necessary follow-on work, and the development of safety documents including the provision of chemical and biological information and data for all materials. Preflight work includes ground tests for determination of specimen return (live or fixed); optimization of culture conditions; optimization of methods for tissue chip development, characterization, and readout; and verification tests for all procedures and operations.

The overall objective of the AVATAR project is to advance our understanding of human astronaut physiology during spaceflight and on the Moon by leveraging human organ-on-a-chip (Organ Chip) microfluidic culture technology. This project will focus on development of human Bone Marrow Chips (BM Chips) lined by human cells to model hematopoietic changes that occur in the bone marrow in response to microgravity, radiation, and other environmental conditions that humans experience in spaceflight and on the Moon. The ultimate goal is to engineer BM Chips lined by cells from Artemis 2 & 3 astronauts that will accompany them on their missions to assess the impact of their spaceflight and their time on the surface of the moon on blood cell formation. The BM Chips will be engineered to be robust enough to fly to the

Statement of Work

Dated : July 31, 2019

Scope. Our IMPAc-TB Center represents a comprehensive and ambitious effort to identify common determinants of protection from *Mycobacterium tuberculosis* (Mtb) infection and disease progression that can be translated into improved vaccine strategies. We propose a large, multi-disciplinary, multi-institutional Center that will apply the tools of systems immunology to exclusive animal and human models of protection from Mtb infection and disease progression. The central projects leverage these best-in-class non-human primate (NHP) and human models, focusing on immunophenotypes with direct vaccine relevance, and are fully bridged through the study of acute Mtb exposure in London, where we have the capacity to understand outcomes using both PET/CT and PPD airway challenge. This Center is distinguished by the quality of the collaborating investigators and our integrated and well synthesized research program. We bring unique and cross-cutting technologic capacities—high-dimensional single-cell RNAseq, systems serology, CyTOF, and cross-species computational modeling—led by the pioneers of their respective fields who are already productively working with this team of TB investigators thanks to catalytic funding raised previously by this group. Finally, we are committed to iterative analyses and mechanistic dissection of these innate and adaptive correlates through studies in cutting-edge murine and ex vivo cellular models by leading experimental Mtb biologists.

Technical Requirements. Independently, and not as an agent of the Government, the Contractor shall furnish all necessary services, qualified professional, technical, and administrative personnel, material, equipment and facilities, not otherwise provided by the Government under the terms of this contract, as needed to perform the tasks set forth below. Specifically, the Contractor shall:

A. Leadership

1. Goals, governance, & strategic plan. Offeror shall ensure appropriate leadership to achieve goals, govern the projects and cores, and implement and evaluate progress toward a strategic plan, in line with the requirements of the Solicitation and priorities of the NIAID IMPAcTB program. The roles, activities, and experience of the multi-PI leadership team, comprising Drs. [redacted] and [redacted] are detailed in section 4.1.

Administrative leadership. Offeror shall ensure that the contact PI, [redacted] oversees preparation and submission of all documentation to NIH in line with contract requirements as detailed in Section 4.1. The Administrative Core will facilitate data and resource sharing by coordinating meetings, establishing multi-institutional MTAs, and assuring IRB and IACUC approvals enabling sharing of data and samples across the Center [redacted] will be supported by a Scientific and an Administrative Project Manager.

Program milestones and timelines. This proposal describes studies to be performed in an initial 18-month study period and over the course of a second 66-month study period.

	Deliverables	Project Month
Fortune/Harvard Administrative	Recommend candidates for External Scientific Advisory Board	1
	Participate in IMPAcTB Initiation Meeting in Bethesda	3

Subject: Stop-Work Order for Contract No. #75N93019C00071

Dear [redacted]:

You are notified that pursuant to FAR 42.1303, Stop-Work Orders, work is to be stopped on the referenced contract titled "Immune Mechanisms of Protection against Mycobacterium tuberculosis Center (IMPAc-TB)", effective immediately upon receipt of this notice.

This stop-work order shall remain in effect for 90 days unless Harvard University and the NIAID mutually agree to a further period. All reasonable steps should be taken to minimize the incurrence of costs allocable to the work covered by the order during the period of work stoppage.

You are to furnish written notice to any subcontractors of this action and direct them to stop work pertaining to this contract. You are to issue no further orders for materials or services under this contract for activities impacted by this order. You are also advised to cancel, when possible, or delay delivery on any orders for supplies or services already placed.

Sincerely,

George W. Kennedy -S

Dear Contractor:

Pursuant to the authority of FAR Part 42.1303 "Stop-Work Order," the Contracting Officer hereby issues a "Stop-Work Order" ordering the Contractor to "stop work" on all activities for purchase order 75N95023C00008.

You are hereby directed to cease all work under 75N95023C00008.

You are instructed not to issue further orders for materials or services related to the portion of the contract/order subject to the stop-work order, to direct any subcontractors to comply with the contents of this order, and to otherwise minimize costs.

This order shall remain in effect unless and until you are notified otherwise by a U.S. Department of Health and Human Services Contracting Officer.

Sincerely,

Nancy L. Lamon-kritikos -S

PRIVILEGED. DELIBERATIVE, PREDECISIONAL, ATTORNEY WORK PRODUCT

Already Done by Harvard

- Did not renew MOU with Birzeit University in West Bank.
- Faculty/Programs
  - Center for Middle Eastern Studies leadership dismissed.
  - Leadership of Religion and Public Life program at the Harvard Divinity School "departed suddenly" earlier this year.
  - Suspended Religion, Conflict, and Peace Initiative at HDS to "to rethink its focus and reimagine its future."
- Antisemitism lawsuit settlement implementation
  - Appoint an employee at its Office for Community Conduct to supervise and consult on antisemitism complaints.
  - Annual public report of Title VI violations and its response to those violations
  - IHRA definition + antisemitism trainings. Clarifying that Jewish and Israeli students are covered by existing policy.
  - Establish additional partnerships in Israel.
  - Investing additional resources
- Strengthened time, place, manner restrictions and enforcement.
  - Library demonstrations and classroom disruptions have been met with immediate consequences, including for involved faculty.
  - Librarian who removed photos of 10/7 hostages was immediately put on admin. leave and fired 2 days later.
  - Increased campus police patrols.
- Intellectual diversity.
  - FAS Dean Hoekstra told directors of FAS centers they would be required to meet with their divisional deans to explain how their programs are complying with recent guidance on intellectual diversity.
- Admissions
  - Promoting viewpoint diversity by requiring an admissions essay where applicants describe when they had a strong disagreement and how they resolved it in a tolerant manner.
  - Will return to requiring standardized test scores for admissions.
- Discipline
  - Overhauled fact-finding procedures for university disciplinary proceedings.
  - Faculty is voting this week on changes to disciplinary proceedings: only faculty trained to serve will be on disciplinary boards. There will be no appeals of disciplinary decisions short of expulsion.

CONFIDENTIAL

PRIVILEGED. DELIBERATIVE, PREDECISIONAL, ATTORNEY WORK PRODUCT

Menu

- Empower task forces/ensure reports are released. Should probably not be an ask, but we do want to have more info on why there hasn't been public movement since preliminary reports back in June '24.
- **Disciplinary reform and retrospective.**
  - Retrospective/review of discipline since 10/7. Address failures in holding rule violators accountable. Public reporting or reporting to TF.
  - Centralize discipline instead of many ad boards and faculty councils across the institution. Massively narrow scope.
    - Primacy of the presidency – appeals all end in the president's office.
  - Allow interim suspensions pending discipline or criminal proceedings when warranted.
  - Centralize complaint handling (fact finding procedures are already being standardized but not centralized).
  - Proactive enforcement, allow admin to initiate without requiring students to submit report first.
  - Zero tolerance for learning disruptions. Better enforcement of non-discrimination and anti-bullying policies.
  - More clarity on new rules – including IHRA (ensuring students understand the difference between criticism of Israel and antisemitism, and where that line may be crossed)
    - Where is it posted?
- **Student group accountability.**
  - Augmented Columbia accountability ask. Unrecognized groups must be held accountable, and recognized "cutout" groups must be treated the same as suspended/unrecognized organizations.
  - Protect the Harvard trademark. Unregistered groups like HOOP should not be using school trademarks.
- **Masking.** No masking for the purpose of concealing identity or intimidation. Masked students must wear ID at all times.
- **Governance reforms.**
  - Harvard Corporation/Board of Overseers.
    - End gatekeeping of Overseer candidates by Harvard Alumni Association
    - Promote viewpoint diversity (next slate should demonstrate this commitment).

CONFIDENTIAL

PRIVILEGED. DELIBERATIVE, PREDECISIONAL, ATTORNEY WORK PRODUCT

- Resolution/Exec Committee – subset of Corporation to negotiate, ensure implementation, and report on progress.
- * Further governance reforms/slim down *
- Faculty Council reforms or * abolition. *
  - Transparency
- A university-wide faculty senate does not currently exist but is something being planned and debated. Planning body held first meeting in December, very slow progress. Thoughts?

- **"Senior vice provost" oversight/review (install new leadership in problematic depts, same goals as CU) – CHOICE btwn this and receivership**
  - Center for Middle East Studies
  - **FXB (François-Xavier Bagnoud Center for Health and Human Rights).** FXB is undergoing an internal review/investigation.
    - As a result of the internal review, Harvard did not renew its MOU with Birzeit University this year, but Harvard should end that relationship in its entirety. Commit to never renew.
    - FXB continues to operate the Palestine Program for Health and Human Rights.
      - Its "Palestine Social Medicine Course" will not take place at Birzeit this year, but will likely take place in Jordan again.
  - FAS Department of Near Eastern Languages and Civilizations
  - FAS Ethnicity, Migration, Rights Program
  - FAS Jewish Studies
  - HDS Religion and Public Life Program *
    - End relationship with Dar al-Kalima University ("Decolonizing Power").
  - Carr Center for Human Rights
- **Reporting/collaborate with Feds on foreign funding, assets, etc.**
  - S117 FULL DISCLOSURE – formal, profs receiving foreign $, take appropriate action
  - DHS – report ALL students and faculty
  - Clery Act
- **Collaboration and cooperation with Boston/Cambridge PD.**
- **Elimination of all DEI**
  - Harvard Foundation for intercultural and race relations
- **Merit-based admissions reform – TOTAL compliance with SFFA**
  - **Comprehensive reforms.**
  - Provide clearer guidelines.
  - Commit to admissions study similar to Columbia, with public report.

CONFIDENTIAL

PRIVILEGED. DELIBERATIVE, PREDECISIONAL, ATTORNEY WORK PRODUCT

        - Title VI admissions investigation and report (contract w/ outside org. Peter*NC)
    - End prioritization of "activists" and DEI criteria.

- **Faculty and merit-based hiring reform**
    - **Accountability for faculty and staff involved in rule-breaking and promoting antisemitic encampments, etc.**
    - Tenure reform.
    - New hires (including tenure track) to promote viewpoint diversity and free exchange of ideas.
        - Commit to cluster hiring across the University (not just in one program/school).
    - Public change of stance on hiring priorities.
    - Adopt UChicago Shils report on hiring.
    - Clear guidelines on criteria for faculty hiring and tenure, with emphasis on intellectual diversity.
    - End prioritization of "activists" and DEI criteria.
- **"Legacy of antisemitism initiative"**
- **(Third-party) Monitoring and Financial Accountability**
    - ***Senior secured 1st Lien on all Harvard assets which will serve as collateral to pay back government from Harvard in event of non-compliance in the future***
- Minimum 15 years of acceptable leadership experience to become President / head of the university

CONFIDENTIAL

OFFICE OF HEALTHY HOMES AND
LEAD HAZARD CONTROL

May 12, 2025

Dr. Alan Garber
Office of the President
Harvard University
Massachusetts Hall
Cambridge, MA 02138

Dr. Garber:

This letter is to notify you that HUD's Office of Lead Hazard Control and Healthy Homes (OLHCHH) plans to terminate two Lead and Healthy Homes Technical Studies grants MAHHU0068-21 and MAHHU0069-22, pursuant to its authority under 2 C.F.R. § 200.340(a)(4) and the grant terms and conditions.

As provided in Section 45 of the Lead and Healthy Homes Technical Studies (LHHTS) Grant Programs Terms and Conditions, the award may be "terminated in whole or in part before the end of the performance period when the Grantee and/or subgrantee has failed to comply with the terms, conditions, standards, or provisions of this award, or if an award no longer effectuates the program goals or agency priorities." Additionally, 2 C.F.R. § 200.340(a)(4) provides that a Federal award may be terminated if "an award no longer effectuates the program goals or agency priorities."

HUD has determined that these awards no longer effectuate agency priorities. Harvard may object and provide information and documentation challenging these terminations as provided in Section 14 of the Lead and Healthy Homes Technical Studies (LHHTS) Grant Programs Terms and Conditions.

Harvard should commence closeout activities as described in Form HUD-1044, section II.8 and OLHCHH grant policy notice 2020-06, "Closeout Procedures for OLHCHH Grantees". Your Government Technical Representative will provide additional information in a follow-up communication to your assigned project managers.

Sincerely,
TARA

Dr. Garber:

This letter is to notify you that the United States Department of Housing and Urban Development (HUD) plans to terminate the Research Partnership cooperative agreement (RP-24-MA-002), pursuant to its authority under 2 C.F.R. § 200.340(a)(4).

As reflected in cooperative agreement RP-24-MA-002, "The award may be terminated in whole or in part before the end of the performance period." As noted in 2 C.F.R. § 200.339 "When the Federal agency or pass-through entity determines that noncompliance cannot be remedied by imposing specific conditions, the Federal agency or pass-through entity may "suspend or terminate the Federal award in part or in its entirety". Additionally, 2 C.F.R. § 200.340(a)(4) provides that a Federal award may be terminated if "an award no longer effectuates the program goals or agency priorities".

HUD has determined that this award no longer effectuates agency priorities. Harvard should initiate closeout activities as described in section 10 of the award terms and conditions and 2 C.F.R. 200.344, complete all remaining drawdowns for allowable, incurred expenses. As outlined in section 48(a) of the terms and conditions, costs resulting from financial obligations incurred after termination are not allowable. You may seek reimbursement for allowable costs incurred before the effective date of termination that do not pertain to the cancelation. Nothing in this notice excuses either HUD or you from complying with the closeout obligations imposed by 2 C.F.R. § 200.344. If you have any questions regarding this notice or require assistance with the closeout process, please contact your Grant Officer, Leatha.M.Blanks@hud.gov.

Sincerely,

Matthew Ammon

NASA Shared Services Center
Stennis Space Center, MS 39529

Reply to Attn of: **Procurement Division**

[redacted]
Harvard University
1033 Massachusetts Avenue [redacted]
Cambridge, Massachusetts 02138-5366

Subject: Grant Number 80NSSC24M0193

Dear [redacted]

The NASA Shared Services Center (NSSC) has completed the award of the subject grant/cooperative agreement and looks forward to working with your organization in its administration. Please take time to read through the award documents and note the contact information for the Administrative Grant Officer entered in Section 12 of the NASA Form 1687 as Administrator. To facilitate the efficient processing of grant awards and administration, the NSSC utilizes the Customer Contact Center to answer recipient questions and requests.

The grant award and administration by the NSSC does not change the line of communication between your organization and the NASA scientific, technical and educational communities. Please access the NSSC Grant Status Query System at https://www.nssc.nasa.gov/grantstatus to check the status of any future supplements to this award.

NASA Grant Recipients are able to draw down funds as necessary through the Department of Health and Human Services (DHHS) Payment Management System (PMS) unless indicated in the award. Grant Recipients who do not have an account with the DHHS Payment Management System (PMS) are required to complete an SF-1199A and Direct Deposit Sign-up on PMS's website. The instruction to begin the process may be found at https://pms.psc.gov/grant-recipients/access-newuser.html. *NOTE: The SAM account information for your organization should be the same information when the DHHS Payment Management System account is set up.*

NASA Insignia Guidelines
NASA has formulated new guidelines which are aimed to simplify and expand NASA Insignia use by NASA grantees (including cooperative agreement recipients, collectively herein, "Grantees"). The purpose of these guidelines is to increase awareness of NASA's mission activities via Grantee partnerships for a broader and more diverse population. Please see Guidance of NASA Insignia Use - UPDATED located at https://www.nssc.nasa.gov for more details.

Single Audit Requirements:
Remember, if your organization expends $750,000 or more during your fiscal year in Federal awards your organization must have a single audit conducted in accordance with 2 CFR 200.514 of the Uniform Guidance.

DATE

1.8 Extensions

1. Recipients may extend the expiration date of an award if additional time beyond the established end date is required to assure adequate completion of the original scope of work within the funds already made available. For this purpose, the recipient may make a one-time no-cost extension, not to exceed 12 months, prior to the established expiration date. Written notification of such an extension, with a supporting justification, must be submitted to the NASA Grant Officer via the NSSC's no-cost extension webform at least ten calendar days prior to the expiration of the award. A copy of the extension must also be forwarded to the cognizant Office of Naval Research (ONR) office Federal Industry Partner (FIP) if Federal property administration responsibilities have been delegated to a FIP. NASA reserves the right to disapprove the extension if the requirements set forth at 2 CFR § 200.308 (e)(2), Revision of budget and program plans, are not met.

2. All requests for subsequent no-cost extensions must be submitted in writing to the NASA Grant Officer for approval via the NSSC's no-cost extension webform at least 45 calendar days before the award expiration date.

3. Any extension that would require additional funding must be supported by a proposal submitted at least three months in advance of the end date of the period of performance.

4. Requests that extend the award's total to over $5 million and beyond five years must be submitted 90 calendar days before the period of performance ends.

   Note: NASA may consider NCE requests received after any of the deadlines stated above on a case-by-case basis and with sufficient justification from the award recipient.

1.9 Termination and Enforcement

1. Termination and enforcement actions taken by NASA will be in accordance to the provisions outlined in 2 CFR § 200.339, Remedies for noncompliance, through 2 CFR § 200.343, Effects of suspension and termination,
2. The award may be suspended or terminated in part or in its entirety as follows:

   a. By NASA if the recipient fails to comply with the terms and conditions of the award.

   b. By NASA, to the extent authorized by law, if an award no longer effectuates the program goals or agency priorities.

   c. By NASA with the consent of the recipient, in which case the two parties must agree upon termination conditions, including the effective date, and in the case of partial termination, the portion to be terminated.

   d. By the recipient upon sending NASA a written notification of the reasons for such termination, the effective date, and, in the case of partial termination, the portion to be terminated.

1.10 Change in Principal Investigator or Scope

5. By NASA or a pass-through entity pursuant to termination provisions included in the award.

Only a NASA GO may officially terminate an award. If an award is terminated, NASA will follow the notification of termination requirements established in 2 CFR § 200.341, Notification of termination requirement. When NASA terminates an award prior to the end of the POP due to the recipient's material failure to comply with the award's terms and conditions, the cognizant NASA GO must report the termination in the Responsibility/Qualification section of SAM.gov, in accordance with requirements at 2 CFR §§ 200.340(c)(1)-(c)(3).

35.1 Appealing a Suspended or Terminated Award

This section describes the appeal and reconsideration process that NASA makes available to award recipients concerning suspended or terminated grants and cooperative agreements.

1. 2 CFR § 200.340, Termination, authorizes Federal entities to suspend or terminate an award in whole or in part (see section 35.0, Award Termination). After the Federal entity has informed a recipient of its intent to terminate an award, NASA will terminate the award if the recipient:

    a. Fails to submit a timely appeal or request for reconsideration,

    b. Fails to provide a satisfactory justification to maintain its Federal assistance award, or

    c. Fails to resolve its non-compliance within the time specified by NASA.

2. Per 2 CFR § 200.342, Opportunities to object, hearings and appeals, NASA provides recipients the opportunity to appeal and provide information and supporting documentation to dispute the decision to suspend or terminate a Federal assistance award.

3. Per 2 CFR § 200.342, NASA must comply with requirements for hearings, appeals, or other administrative proceedings to which award recipients are entitled.

4. If a recipient disagrees with NASA's decision to suspend or terminate, it may appeal that decision in writing to NASA within 30 days of receipt of NASA's written notice. The appeal shall include:

    a. The reason the decision is being disputed and a justifiable reason its Federal assistance award should not be suspended or terminated. The recipient must provide a satisfactory rationale for maintaining its Federal assistance award.

Subject: [EXTERNAL] Urgent Grant Data Request

Hi Alex -

Josh asked me to work with agencies to collect a few data points for a small subset of grants by the end of the day. Are you the best POC at NASA for this? I will need current outlays for each grant and the current unliquidated obligations/unspent funds for each grant.

I have about 22 NASA grants in this subset.

Thanks,
Brandon

Hi team,

I believe you may have already done this exercise, but just to be sure, can we do a review of the contracts in the attached document and determine which are mission critical [redacted] DPP DPP

Thanks.

Subject: Harvard Contract Review

Hi team,

I believe you may have already done this exercise, but just to be sure, can we do a review of the contracts in the attached document and determine which are mission critical DPP

Notice of Termination harvard 5_8_25.pdf
Harvard Terminated List 5.8.25.xlsx

Alex,

Attached is NASA termination letter for the 5 selected Harvard Contracts determined by the A-suite based on mission impacts.

Per your request, attached is a short description of the 5 grants being terminated.

Through counsel with NASA OGC, [redacted] DPP/ACP [redacted]

Questions, please let me know.

Thank you,
Marvin

Vanessa. FYSA...

BLUF:
After DOGE request by GSA to terminate 22 Harvard contracts we conducted an internal review for cancellation and found:

- 3 contracts identified by SMD and
- 2 contracts by CoS.

[redacted] DPP

I am instructing Procurement to cancel 5 of 22 contracts. [redacted] DPP/ACP [redacted] OGC.

Alex,

You are correct, I checked with the team, the NASA Harvard letter was issued on last Friday.

Karla collaborated with NASA's Administrator Suite on this and followed NASA historical practice with contractor notification. [redacted] DPP/ACP Abhi and WHCO [redacted] DPP/ACP

Thanks,
Marvin

Minor correction:

The original list included 22 grants, one of which was already expired, bringing NASA to 21 in total.

NASA will terminate 5 out of 21 grants when we get the green light, leaving us with 16.

Subject: For Action: [EXTERNAL] Re: NASA Grants

Eli,

Please move out with the letter notifying Harvard of the termination of the 5 grants per Trey's email below. See the spreadsheet with highlighted grants.

Thank you,
Karla
