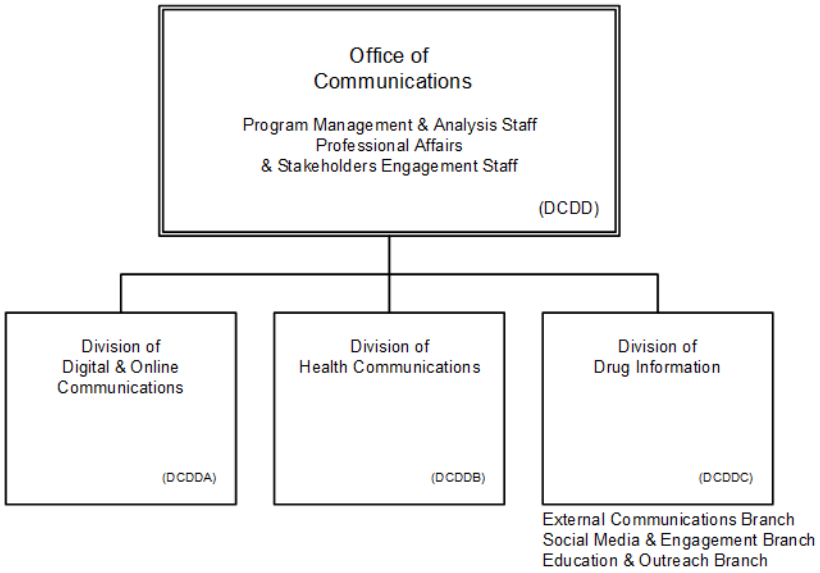
A Master Retention Register is a record that ranks employees within a competitive area based on four key factors: tenure, eligible veterans' preference for RIF, length of service, and performance. This ranking is used to determine the employee release order, if applicable, during a Reduction-in-Force (RIF). Accuracy of tenure and subgroup appointment is heavily dependent on the accuracy and quality of data captured, with inaccurate or incomplete data potentially impacting the overall reliability of the Master Retention Register and any subsequent retention register.



The Retention Registers developed by OPM HRS on behalf of HHS and its Operational Divisions were based on the data submitted by HHS. OPM is not liable for any misrepresentations in tenure or subgroup appointment and all questions or concerns regarding input data and/or any discrepancies in data represented on the Master Retention Register should be directed back to the Agency as the originator and retainer of EHRI and eOPF records. Inquiries relating to specific RIF actions taken should also be channeled to appropriate HHS staff, as the conducting authorities.

HHS's budget has grown 38% and # FTEs has grown 17% since FY 2019

SOURCE: HHS FY2020 and FY2025 Budget in Brief; Workforce Highlights Reports (January 2019 and December 2024)

HHS Has Significant Duplication & Inefficiencies

Redundancies in Shared Services

- **40+** Chief Information Officers
- **9+** Human Resource Departments
- **8+** Senior Finance Officials

Redundancies in Program Areas

- **HIV / AIDS**: CDC, HRSA, OGA
- **Translational Research**: APRA-H, CDC, ASPR, NIH
- **Women's Health**: HRSA, OASH, NIH

Redundancies in Regional Offices

- **ACL**: 10 regions
- **CMS**: 10 regions
- **FDA**: 220+ field offices
- **IHS**: 12 regional offices + 170 clinics
- **HRSA**: 10 HHS regions
- **OIG**: 10 HHS regions

Inefficiencies in Procurement

- **IT**: Competing systems (e.g., Teams and Zoom) and unused licenses
- **Staffing**: Multiple vehicles and rates for similar staffing / administrative services
- **Professional Services**: Multiple vehicles and rates for large contractors

Reduce HHS Offices by 39% from 28 to 17

Staff Divisions

- Immediate Office (IOS)
- Asst Secretary for Administration (ASA)
- Asst Secretary for Financial Resources (ASFR)
- Office of Chief Information Officer (OCIO)
- Assistant Secretary for Technology Policy (ASTP / ONC)
- General Counsel (OGC)
- Asst Secretary for Legislation (ASL)
- Asst Secretary for Public Affairs (ASPA)
- Intergovernmental / External Affairs (IEA)
- Asst Secretary for Planning & Evaluation (ASPE)
- Global Affairs (OGA)
- Assistant Secretary for Health (OASH)
- Departmental Appeals (DAB)
- Civil Rights (OCR)
- Medicare Hearings/Appeals (OMHA)

Operating Divisions

- Children and Families (ACF)
- Community Living (ACL)
- Healthcare Research/ Quality (AHRQ)
- ARPA-H
- Strategic Preparedness & Response (ASPR)
- Toxic Substances/Disease (ATSDR)
- Centers for Disease Control (CDC)
- Centers for Medicare and Medicaid (CMS)
- Food & Drug Administration (FDA)
- Health Resources & Services (HRSA)
- Substance Abuse & Mental Health (SAMHSA)
- Indian Health Service (IHS)
- National Institutes of Health (NIH)

SOURCE: https://www.hhs.gov/about/agencies/orgchart/index.html

Potential New HHS Organization Structure

Staff Divisions

- Immediate Office (IOS / ARPA-H)
- Chief Operating Officer (ASA)
- Chief Financial Officer (ASFR)
- Chief Technology Officer (OCIO / ASTP)
- General Counsel (OGC)
- Chief Medical Officer (OASH / ATSRD)
- Chief Strategy Officer (ASPE / AHRQ)
- Appeals (DAB / OCR / OMHA)
- External Affairs (ASL / ASPA / IEA)

Operating Divisions

- Children and Families (ACF)
- Strategic Preparedness & Response (ASPR)
- Centers for Disease Control (CDC / OGA)
- Centers for Medicare and Medicaid (CMS)
- Food & Drug Administration (FDA)
- Health Resources & Substance Abuse (HRSA / SAMHSA)
- Indian Health Service (IHS)
- National Institutes of Health (NIH)

Returning to 90% of FY 2019 staffing levels would result in a 12K RIF

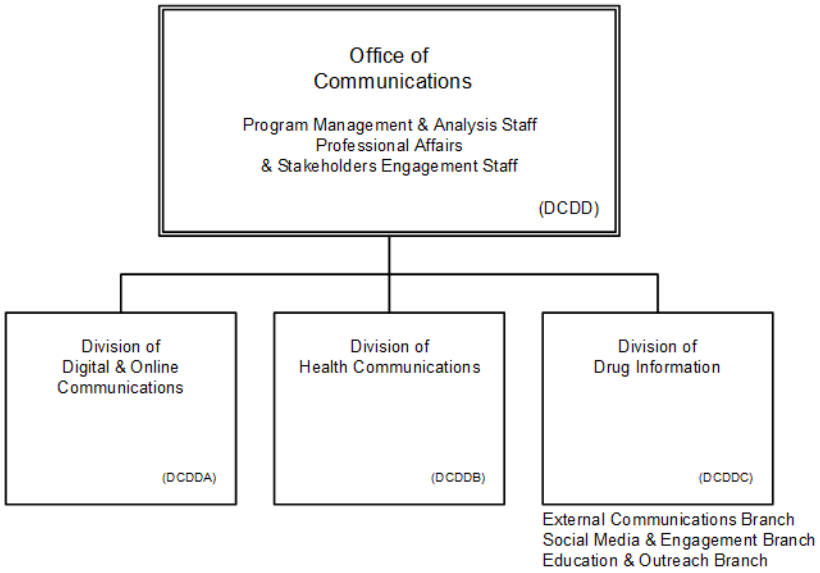
A Master Retention Register is a record that ranks employees within a competitive area based on four key factors: tenure, eligible veterans' preference for RIF, length of service, and performance. This ranking is used to determine the employee release order, if applicable, during a Reduction-in-Force (RIF). Accuracy of tenure and subgroup appointment is heavily dependent on the accuracy and quality of data captured, with inaccurate or incomplete data potentially impacting the overall reliability of the Master Retention Register and any subsequent retention register.



The Retention Registers developed by OPM HRS on behalf of HHS and its Operational Divisions were based on the data submitted by HHS. OPM is not liable for any misrepresentations in tenure or subgroup appointment and all questions or concerns regarding input data and/or any discrepancies in data represented on the Master Retention Register should be directed back to the Agency as the originator and retainer of EHRI and eOPF records. Inquiries relating to specific RIF actions taken should also be channeled to appropriate HHS staff, as the conducting authorities.

Subject: Re: CDC ACIP transparency - FYSA

For clarity, does HHS envision a proactive announcement around the posting of the COI information? If so, are we right to assume that it will be a HHS announcement? If reactive, we'll need to get moving on a statement and QA.

Subject: RE: CDC ACIP transparency - FYSA

Hi all
Circling back and wanted to close the loop on a few things

- Cate is routing language through HHS so that we can contact current and past ACIP members to let them know we will be posting COI (Cate- do you also want to have Kenya help with language re asking about voluntary disclosure of info on 450s? I know that is part 2 re COI, but may want to do in a single message)
- Cate/ Melinda have info going back 20+ years on COI mentioned at meetings
- I did check in on ACIP/MMWR issue Diane flagged for us
    - ACIP did not vote on MMWR and per staff, the slides were accurate that were presented to ACIP for vote
    - MMWR during the editing process by senior staff (unclear who) to make it more lay friendly changed language in one paragraph that made it less specific. This MMWR document was published days after the ACIP meeting The Advisory Committee on Immunization Practices' Interim Recommendation for Use of Pfizer-BioNTech COVID-19 Vaccine — United States, December 2020 | MMWR This is what language Rep Massie noted and it resulted in a subsequent erratum in MMWR Erratum: Vol. 69, No. 50 | MMWR *Consistent high efficacy (≥92%) was observed across age, sex, race, and ethnicity categories and among persons with underlying medical conditions. Efficacy was similarly high in a secondary analysis including participants both with or without evidence of previous SARS-CoV-2 infection*

Hi all,

I just wanted to give an update on the ACIP meeting disclosures. The team here has gone back through meetings from 2024-2000, documenting disclosures of members. We're still working on identifying all of the member terms (as requested on Friday evening), but that should be wrapped up today.

In the meantime, we are working with a web developer/IT to work on the best way to present this information, given that this is currently a long table of content. We should have some UX recommendations this morning and will start building out the dev site this afternoon.

Cate

Thanks for sending this- I wasn't on the COVID response back then so I wasn't aware of the video or this issue so I will see what I can find out- very helpful for us to see this as we look at how CDC can ensure transparency in the process and with our work. I know you said you didn't need answers, but it helps me to think through all of these questions/ issues to understand where we can improve or what we need to be cognizant of

- I pulled up the ACIP COI- and looks like 3 had COI and abstained from COVID vaccine vote
- I know Amanda Cohn and Anne Schuchat are no longer at CDC; will check on the other scientist
- I will find out timing of MMWR and erratum with the vote; usually the MMWR publication is done a few weeks after the vote and I don't think ACIP votes on the publication
- I'm not aware of other ACIP stories like this other than the one from 2002/2003 (but I also wasn't aware of this story)

Subject: CDC ACIP transparency - FYSA

HHS/CDC ACIP transparency team,

Flagging this story for potential use/reference related to the need for ACIP accountability. For clarification, Stefanie is the final word on comms strategy – I am only raising this story for awareness in case it can be useful in story-telling about the need for ACIP transparency/accountability!

Please see this Sharyl Attkisson/Tom Massie story about ACIP allegedly certifying false information about COVID vaccine effectiveness. In short, Rep Massie (a scientist) reviewed actual scientific data and discovered discrepancies between the data and CDC's conclusions. Rep Massie recorded his interactions with CDC. At first, CDC apologized and said the errors would be corrected, but the errors were not corrected. Rep Massie questioned CDC further. Rep Massie, amplified by Attkisson, questions the intent of CDC's representations and the unanimous consent and support from ACIP members.

Questions that come to my mind are:

- What is the timing of the ACIP-sanctioned CDC report? Who were the ACIP members at the time and what were their disclosed COIs? Did any of the COI's related to COVID-19 vaccine manufacturing/production/research?
- Did the "unanimous" supporting members include those with COI's? If so, were the COI's disclosed in the report? If not, why not?
- While ACIP members currently disclose COI's in meetings and those with conflicts abstain from voting, does that same exclusion of voting/participation extend also to certifying/supporting reports?
- Are other similar-type stories about questionable ACIP reports/certifications circulating? (if not, that's fine. This one example is egregious)

- Are the two CDC staff still employed at CDC?

I'm not posing the questions because I need answers but instead, ask them in case the answers might support the story about ACIP accountability and transparency.

Thank you,

Diane

This is the link to the story on X, followed immediately with two excerpts (with my highlights and colored font) immediately below.

https://x.com/SharylAttkisson/status/1893135372273541351

- "Here's the story where @RepThomasMassie recorded top CDC scientists/officials lying about what the original studies said about Covid vaccine effectiveness in those with natural immunity. **ALL of the vaccine advisers had signed off on the false info. They should not be advisers.** Either they don't read the info they sign (disqualifier) or they read it and agreed to mislead the public (disqualifier). I'm not sure which is worse. Clip is in the post below.

- In late 2020, @RepThomasMassie secretly recorded top CDC officials in what could be their first big Covid vaccine lie. Many would follow. @DrJBhattacharya weighed in on my TV program @FullMeasureNews Nobody has been held accountable."

  "Full video is here: https://fullmeasure.news/news/cover-story/cdc-investigation#"

I want to thank you for all your help, your time, and your hard work. We recognize this is a weekend and appreciate your diligence on complying with the presidential EO's.

Subject: notes and follow up questions - for review/feedback

Hi again,

I want to send notes from our call this morning just to be sure we are on the same page and we know our next steps. Our outstanding questions (so far) are below, and I've also attached the questions we sent up through Exec Sec yesterday. Please let us know if you have any additional questions, feedback, or specific notes to add/correct.

Thanks,
Sara

- Per HHS direction, the ACIP and the VIS websites are back up and all other vaccine content will go back up today. This excludes the ACIP recommendations for mpox. **Please provide guidance if this recommendation should be put back on the website as is until process for making changes can be finalized with OGC guidance.**
- Per HHS direction, data.cdc.gov has been turned on and is working its way back up online (all human activity to get it back on is completed and now it's dependent upon technology updates – people have already started getting access and this will fill out on a rolling basis).
- Per HHS direction, MMWR is back up on the web. All scientific content will be put back up/un-archived, including journals.
    - We will send a list of all journals with a link to the home page. As noted on the call, all journals reflect scientific content and do not change by Administration.
- All social media channels are live but some posts were removed. We stopped removing historical posts per ASPA guidance Friday morning. Any focus in the future will be on posts that are under the current administration, beginning on 1/20/2025.
- All web changes and data changes will focus on outward facing content.
- CDC will use the HHS-approved banner language at the top of the re-posted but unedited web pages that explains that the website is being updated to comply with the EO.
- CDC will propose buckets of content that will go back up in priority order while we are also working through the spreadsheet feedback. This includes:
    - Clinical guidelines – We need guidance on transgender-specific clinical guidelines.
    - Data – We specifically need guidance on things like YRBS data and reports.
- HHS has asked us to hold on removing any sites that are still in the ticketing system and report back how many pages were still in the queue for removal or editing. This guidance has been shared with communication leaders agency-wide.
- HHS will look at the existing spreadsheet to identify what does not need to go back up. CDC will use the color green to identify web pages that have gone back up. Red coding will mean the web page should stay down. Yellow will indicate that it should go back up (per HHS directive). We noticed some blue highlights in the spreadsheet. Can HHS confirm what that reflects?
    - When content isn't clear, HHS will want access to content to see whether or not to restore the content.

Cc: Ellington, Renata (CDC/NCHHSTP/OD) <[redacted]>; Burns, Stuart (CDC/IOD) <[redacted]>
Subject: Hepatitis B ACIP Question

Hi Adam and Mina-

I just wanted to connect you all after the ACIP agenda discussion I was a part of. Defer to Mina to provide more detail, but it sounds as if a Hep B question on birth dose may be on the agenda for a meeting sometime in September.

Mina- I think it would be GREAT to get Adam/NCHHSTP the question that HHS folks want to have discussed/voted on at that meeting. Seems like briefing materials from the program will be the basis for discussion at the actual meeting rather than a topic for a future workgroup given the desire to open and close the case in September.

Seems like DVH, once they have the actual question, could develop a briefer (like the MMRV one) so that the ACIP members could review the science on the question as a basis for discussion. Leave it to Mina to see if there are other presentations that might also be considered, as was the case for thimerosal and MMRV.

I will leave it to you all to iron out details, but it would be important to get the DVH folks the basis for their materials soon so they can get to working since September is getting close. Imagine good to get OSBI and OGC to agree to such a path forward.

Thanks
Demetre

Subject: RE: urgent update: ACIP recommendation memos RE: re proprietary information on your document

Hi Debra,
FDA is included because of the impact on manufacturing, and FDA was included in the review of the April ACIP recommendations, focused on the point/memo that mentioned FDA.
Jill

Reyn, Apparently, we need to remove the table that was included in the decision memo on thimerosal. It included a table that had information on the number of vaccines by manufacturer, of Mercury, free vaccines. It appears that is proprietary, and we should remove that from the decision memo. I think those may have already gone up. I'm not sure whose desk they are on currently.

Stuart

Stuart,
Could you please also ensure that anyone who has seen the document not share any of the information from the table with the vaccine manufacturers' names? You will note I actually removed the row with the names so it does not get sent further.
Should I also write to Nina about this or will you be able to let her know?
Thank you and I apologize I didn't make this clear when I sent this to you.

Importance: High

Dear Stuart,

I was just forwarded the ACIP decision memos and will get them reviewed by the appropriate people and back to you by 7/22. There is one extremely important edit: no proprietary information/drug manufacturers names or information can be included. I should have been clear that the table I sent you could not be shared/that it contained cc nfidential information. So the table needs to be removed. I actually made an alternative table but decided it is probably best without exact numbers. Are you still getting <10%? Based on which numbers? What I quoted at ACIP (between 4-5%) was from doses distributed, as you probably remember. I was told I should not share the exact numbers/names so gave a %. Maybe you could say the numbers of millions of estimated doses it decreased by year total but just round since these are estimates? Please send me an edited version when you get a chance so I can forward it to our legal team and get this completed on time. Thank you!

Good afternoon – Abby,

The attached word document now includes ACIP historical documents that OSBI retrieved during a site visit to the National Archives – Atlanta in Morrow, Georgia. The new pdfs have been highlighted to make it easier to identify what has been added. Although we have not been able to locate the 1964 charter establishment package, this update includes a document that summarizes discussions about ACIP responsibilities at the first two meetings in 1964.

I hope the additional information is useful and please let me know if you have any questions. Thank you.

Subject: RE: Request for current and historical ACIP information - OSBI response

Good afternoon, Abby,

We are able to find charters and packages for the previous 20 years, however unable to access items at CDC now with the national archives pertaining to years prior to 2002 (including the requested 1986 charter).

The attached word document includes copies of the signed charter renewals and amendments that have been located thus far (2002 – 2024). OSBI has included copies of the complete packages, if available. Also attached are the results of the email exchange and the spreadsheet provided by the Director of the National Archives at Atlanta regarding records for previous years. As noted in his email, all of these records are now in the custody of the National Archives and cannot be loaned back to the CDC. Retrieval of additional ACIP charter records now requires a physical visit to NARA to conduct an onsite search and may incur fees. Is that desired?

Regarding charter amendments, sharing the process for general awareness. Please note that, a charter amendment package submission includes several documents in addition to the specific edited draft charter. Proposed changes to the ACIP charter will also need to be made in the pertinent sections of the membership balance plan. OSBI staff can assist as needed with the development of the complete amendment package for clearance. Discretionary charter renewals and amendments including ACIP are required to be reviewed by the General Services Administration (two levels of review) in addition to the review by the HHS Office of the White House Liaison. Finally, upon approval by HHS and GSA, CDC has the delegated authority to sign the charter amendment package documents (copy of the delegation attached).

Regarding the status of the ACIP workgroup rosters and COI forms, please note that NCIRD is compiling the information and will share the results in a separate response.

I hope this information is helpful. Thanks.

Subject: Request for current and historical ACIP information

Good Morning Gladys, Melinda, and Rebecca,

As I think you are aware, CDC is in ongoing conversations with HHS regarding ways to increase transparency and inclusivity in ACIP deliberations and decision-making. I know NCIRD has some ideas in this regard, and IOD we will be setting some time in the future to discuss those and other ideas.

Ultimately, we expect to effect most if not all of the most transformative changes through a charter update.

To that end, Stuart Burns, who has been tapped to lead this effort, has requested the following items to inform his understanding of the current state of ACIP operations, as well as the historical glide path that brought us here.

Is it possible for you to find and send me the following items by COB tomorrow?

- Historical versions of the charter and rationale for each change:
  - Eps. The see original charter, pre 1986 charter, immediate post 1986 charter, and whatever charter was in place immediately before the 2024 update
- Lists of members for a sample of standing and time limited workgroups, as well as their COI submissions
  - Adult, child/adolescent, influenza
  - Child/maternal RSV and meningococcal workgroup COIs

If any of this is in the CDC library, I'm also happy to go hunting there and remove whatever response burden I can.

Thanks
Abby

The one time the FDA rep was not able to ask her question was because the presenter ran over time- I heard she was able to raise her point later in the meeting and also address the Novavax question from the day prior. Usually there is time for folks to ask ?s, but this was also a shortened meeting because it was postponed. Ex officio also usually don't speak as much as we want the voting members prioritized and not have feds do most of the speaking.

Sarah, I'm checking in on the thimerosal flu memo. We were waiting NCIRD review of Dr. Houry's comment on the con. Do we have a word version now that Deb and I will work through for a few additional changes before approval to go up.

Thanks,

Stuart

Subject: Request for NCIRD to Review Edit in Thimerosal ACIP Decision Memo

Good morning NCIRD Team:

Dr. Houry added a bullet under the "Cons" section of the attached thimerosal decision memo on p. 3 (edit also pasted below).

Cons:

- *Could result in increased costs due to less multi-dose influenza vaccine*

Could you please review that addition and provide feedback this morning?

Thank you,
Sarah

Hi Sarah,

NCIRD has completed the review our memos and the two VFC related bullets in the thimerosal memo, with some edits.

Please let us know if you need anything else.

Best,

Hilary

Subject: RE: +NCEZID/OD - Request for NCIRD to Review & Address Comments in ACIP Decision Memos from June 25-26, 2025, Meeting

Thank you, Demetre. I'm adding Janna Sayer and Amy McMillen from EZID OD to the chain, and they can coordinate review of the scientific content in the Thimerosal decision memo with ISO.

Janna/Amy: the Teams link to the ACIP Thimerosal decision memo for ISO scientific content review is here: https://cdc.sharepoint.com/:w:/t/OfficeoftheExecutiveSecretariat/EWqrZrJoClBHgdRD3x8hNFcBq_A-6rtOi7Tb1PfjGhc5Wg?e=VOuBHW

If ISO needs more time for review than by end of day today, that's okay. Please let me know if you have questions.

Thank you,
Sarah

Sarah-

Spoke to Dr Houry @Houry, Debra E. (CDC/IOD) and she agrees that the Thimerosal memo should go to ISO-EZID for review the scientific content. Recommend you loop them in.

Also, the NCIRD team will take a look at the section on VFC/Federal purchase in the thimerosal memo to confirm what we know and to review appropriateness of including specific dollar amounts in those two bullets.

Thanks

Subject: Request for NCIRD to Review & Address Comments in ACIP Decision Memos from June 25-26, 2025, Meeting
Importance: High

Hi NCIRD Team:

Dr. Houry reviewed the RSV and annual flu decision memos from your program and had a couple of content additions and also two comments/questions in the RSV memo for you to address. In addition, she requested that you review the thimerosal decision memo before she and OGC review.

The three memos are pasted at the below Teams links (please let me know if you cannot access). Could you please review and provide feedback/any tracked edits and comments by end of day today?

- https://cdc.sharepoint.com/:w:/t/OfficeoftheExecutiveSecretariat/EWqrZrJoClBHgdRD3x8hNFcBq_A-6rtOi7Tb1PfjGhc5Wg?e=VOuBHW

Hi Dr. Houry,

Based on the email chain I received with the decision memos, my understanding was that all three decision memos were cleared by NCIRD, but I defer to Mina and Stuart on this.

Regarding clearance, OGC does typically review before IOD but I was instructed to send these decision memos to both you and OGC at the same time. If you prefer, I'll work with OGC first on their clearance and then send to you for clearance.

Thank you,
Sarah

Thanks Deb.

I worked with the NCIRD team to produce the RSV and seasonal flu memos, but did not participate in the development of the thimerosal decision memo. I should not be on the "FROM" line on that memo.

Thanks for a chance to look at the memos again. I defer to others on content of the memo that did not get developed at NCIRD.

To: Monarez, Susan (CDC/IOD)
Cc: Houry, Debra E. (CDC/IOD); Burns, William S. (Stuart) (CDC/IOD)
Subject: ACIP operational ideas
Attachments: ACIP Ideas Plans.docx

Hi Susan,

Attached is the plan for how we might operationalize the ACIP recommendations around COI, public engagement, and transparency. Please let us know if you have any questions or feedback.

Thanks!

Sara

DRAFT/PRE-DECISIONAL/DELIBERATIVE

Increase Transparency in Conflicts of Interest (COI) for ACIP Members to help the public assess the independence of decision-making and reduce skepticism.

- The current COI process involves a required confidential OGE450 filing, which is reviewed by the ACIP Executive Secretary, the Office of the Federal Advisory Committee Act Program, and the Office of General Counsel (if necessary). This COI process is updated annually. ACIP's COI public disclosure requirements and restrictions are stricter and more comprehensive than OGE's to avoid even the appearance of a conflict. Work group representatives also screened for conflicts of interest by the ACIP Secretariat.
- Screening for conflicts of interest focuses primarily on relationships (financial or otherwise) with pharmaceutical companies.
- Members must verbally declare conflicts of interest at ACIP meetings. Members with conflicts recuse themselves from participating in deliberations and/or votes on issues related to that interest.
- While the conflicts are stated in the meeting and captured in meeting minutes, they are not currently available online.
- To improve transparency around the COI process and individual members' conflicts, the ACIP website could be updated with all publicly disclosable conflict information for each ACIP member.
- After each ACIP meeting this info could be included on the web page with the other materials from the meeting as a link called "ACIP Member Declarations of Interest" and list the declarations from that meeting. This would be consistent with the practices of FDA's VRPAC, which includes documenting COIs online and posting a letter explaining why they are giving a waiver, when applicable.
- This can only be done after the meeting because we have to rely on the public statements at the meeting.
- FDA posts a document online sharing which members of VRPAC have COIs to declare and also posts a letter which explains why any waivers were granted allowing members to participate. This model could be followed for ACIP.
- CDC could go back to Feb 2024 and list the declared interests from previous meetings and start posting them after meetings going forward, beginning with the February 2025 meeting. CDC could note that these are COIs as known since they would be updated over time based on any changes in COI status among members.
- CDC would welcome OGC's advice on what is legally allowed in terms of disclosures via FACA law and confidential disclosure filing. CDC would be interested in the maximum public COI disclosure within the bounds of what is legally allowed. Ideally, CDC could obtain approval from all ACIP members to publish more details about conflicts based on what is in their confidential disclosures and meeting declarations. OGC input on these issues would help determine how transparent this information can be on the internet.

Improve Public Engagement in ACIP Meetings to increase public input and make ACIP's process more inclusive.

- ACIP meetings are open to the public and allow for oral public comment, but these opportunities are often short, difficult to navigate, and not well-publicized.
- A Federal Register Notice is posted online approximately 30 days prior to the meeting, starting the written public comment period. The link to this notice is posted on the CDC ACIP website and through the Federal Register.
- CDC could post salient summaries of analyses and other information reviewed by the work group on the website prior to the day of the ACIP meetings. Currently, those materials are available on the website but often not early enough to inform the public comment period. With sufficient resources dedicated to increasing the transparency of the work groups, these materials could be posted simultaneously to the public comment period opens (assuming work groups have content) and associated with the public comment period links to drive comments specific to content being discussed by work groups and the full ACIP.
- In addition to increasing public comment opportunities, another way to improve public engagement would be to increase the number of consumers represented on the ACIP. Currently, the ACIP generally has one or two ACIP members that represent the public. CDC could work with partner and constituency groups to increase outreach to and participation of members of the public in the ACIP membership as well as in the written and oral public comment process.
- In most circumstances, there is more oral public comment time than speakers to fill the time. ACIP could expand public comment time and conduct additional outreach to a broader range of constituents to stimulate more public discourse.
- CDC could host town hall meetings with ACIP members and/or CDC experts to share more information about ACIP with the public and solicit feedback on what we can do better or differently. These town hall meetings would not be about specific recommendations but rather focused on the ACIP itself and its overall processes. This may be an additional way to seek input on increasing transparency and engagement with the public.

Increase Transparency in Vote Rationales - This would clarify decision-making processes and reinforce accountability.

- ACIP members vote on recommendations, but while the overall discussion is available, individual rationales for voting decisions are not systematically explained. However, asking each member to explain their vote has precedent from other FACAs and could be explored.
- To improve transparency in vote rationales, individual members of the ACIP could be required to publicly state their rationale for key votes, either during the meeting (captured in minutes) or in a written statement.
- The ACIP could identify opportunities to enhance efforts to educate consumers about the recommendations and individual considerations in more plain language for a non-provider population.
- Well in advance of the public comment period, CDC could post a summary of the Evidence to Framework tables that the ACIP workgroups use to document the

process and the considerations used to move from evidence to decisions. This would provide the public and others to review the considerations in advance of the public comment period and the ACIP meeting. This could be accompanied by the data presented to support the work groups' discussions and votes.

- In addition to sharing the EtR materials/summary for a given vote, ACIP could also publish a more plain language summary that describes the EtR framework and how that framework is used to evaluate the data to generate recommendations and decisions.

Subject: ACIP website

Jason/Deb -

Apologies for the late request, but we need to get the ACIP website up and functioning. It looks like several of the links are no longer functional. This is likely due to language modifications needing to be implemented.

If you could call me when you get this message, we can discuss the best approach for an expedited process.

Thanks!

Susan

Subject: prep for 8:30

Hi Susan,

I'm confirming with comms but I believe this is the list of questions that we both discussed with ASPA and discussed/sent up through Exec Sec when ASPA told us most were policy positions and needed to be discussed with Exec Sec. Questions about the Memo.docx

Below are my notes from our calls with HHS ASPA and Exec Sec. As you can see, we did not get many of our questions answered so we had to take them down due to the language of the EO guidance. I'm also attaching Cate's note from when she talked with ASPA who told her we should shut down data.cdc.gov if we didn't hear back by 4:50.

The comms team has a master spreadsheet in the works of everything that came down but the programs need to either their information and had until Wednesday to do that. We have a larger report due Friday that Exec Sec is planning to coordinate, and this was going to be used for that report. I'm not sure we'll have a full scale and scope of what came down at our 8:30 but they relate to all of the areas listed in the questions that couldn't easily be changed.

Cate, Nicole, Kevin, please correct anything I got wrong or add anything further that may be helpful.

Here are the notes:

- Submitted journal articles that have not been published – retract
  - Language should say we are following the language of the President's EO
- BRFSS in the field
  - Pull the question if possible or change to male/female
  - SOGI policy from HHS – push up through Exec Sec
  - Pull off website
- Terms globally recognized like gender-based violence
  - Ask via Exec Sec – policy question
  - LGBTQ raise to Exec Sec
- Forms, birth certificate data – Exec Sec
  - Animals – gender? raise to Exec Sec

  - All technical guidance – Exec Sec
- Data collection – Exec Sec
- Grants/coags – Exec Sec
- Campaigns – label as historical
- Social media – leave posts up for now
  - Remove or modify anything Jan 20 to now
  - Change descriptions, images, banners that don't comply
- Yes to communicate with partners about infectious disease threats and outbreaks
  - Meeting on Monday to discuss overall pause so bear with them until then but should be OK
- Send up normal FACA process around ACIP
  - Share normal process and what we plan to do via Nicole/Cate (this was about not posting the FRN Monday re: the public comment period)
- Journal submissions – ASPA will get an answer
- Media/ad buys – OK

Exec Sec – took questions and said they would share up but could not guarantee an answer. We did not hear back.

Sara

Hi Stuart,

When this was originally posted it was confusing. The web team has updated the site to clearly indicate that document was a review of the evidence prepared by CDC. Mrs. Redwood's presentation is now posted too so I hope this is clearer.

Subject: reviewing external SME presentations

Hi Stuart and Mina
I saw the news articles and X about Lyn's presentation that was taken down and put back up with 2 reference errors including wrong information from a study. I looked at website and don't see Kulsdorf slides. Have either of you reviewed these? As DFO for ACD I reviewed all the presentations not cleared by our SMEs. Even if it is from an outside presenter, these errors hurt our reputation, are labeled as CDC, and erode trust in our agency's credibility.

Subject: COVID-19 TOR (please use as model for other WG TORs)

Hi Rebecca,
Apologies, I didn't attach the latest COVID-19 TOR in the last email I just sent.
As you mentioned, this document has been posted on the ACIP site (thanks to Dayle and her group). The attached TOR has been reviewed by OSBI/OGC (CDC and HHS) and IOD and others in HHS have approved it. I've received direction to have the WGs use this TOR as the model.
Please note, for the RSV WG, the Chair is already drafting the activities and running it by other ACIP members on that WG; I will forward the draft as soon as I receive it.
I am adding NCEZID and NCHHSTP, so they also have the same TOR version to work with.
Thank you all!
Mina

Subject: RE: COVID-19 TOR (please use as model for other WG TORs)

Mina –

To clarify, while OGC reviewed earlier drafts of the Terms of Reference for the COVID-19 Work Group, we did not see the final nor clear it. In its reviews, OGC expressed legal concerns regarding the proposed role of the Work Group Chair relative to that of the committee DFO and Work Group Lead given FACA's clear statutory provisions that the agency maintains responsibility to define agendas/scope of topics addressed and membership. In addition, we provided legal advice to narrow WG topics to those that are within the scope of CDC's mission and authorities. While the ultimate content of the TOR is with the policymakers, those legal concerns remain.

Please send drafts of all additional Work Group TORs to OGC for review.

Kevin

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Demetre (and Adam),

Thanks for sharing with us the slide deck and the document summary. I shared the material with the other ACIP members who are part of the WG, and they are cc'd on this email.

We much appreciate the hard work put into this and hope we can work together to prepare a comprehensive report for the upcoming ACIP meeting.

Upon very careful review, we amend below a detailed list of questions and requests. We also attach the presentation with comments/questions added on specific slides.

These should add to the pending questions and requests we already shared with you regarding the data and analyses that would be important in informing our upcoming recommendations. We look forward to discussing with you, the WG leads and the CDC staff the next steps!

Beyond the detail feedback, we would like to share several key high-level issues:

1. The presentation should include more explicit analysis of risk of severe covid outcomes (hospitalization, ICU and death) per sub-groups. In fact, we believe that this should be a focus point versus providing a lot of detail on overall hospitalization load that does not translate to direct understanding of the individual risk. One potential way to communicate this is the overall risk of experiencing an outcome of 12-month season. It seems that some of this is already

presented (somewhat implicitly) in the slides provided, and below you can find specific suggestions (see 6)-8) below). Additionally, we repeat our request to see analysis of non-specific outcomes like all cause and flu-like hospitalizations and deaths.

2. Related to the analysis in 1) above, we would like to have better understanding of the precise definition of covid-associated hospitalizations/deaths. It seems like the current definition relies, at least partially on PCR tests which is not necessarily clinically meaningful. The data provided and existing literature suggest that there is a real concern of confounding of events 'because of covid' versus ' incidentally with covid', and this seems critical to have reliable risk assessment. Nominally, one should use admission diagnosis and discharge diagnosis to better discern which events are truly because of covid. We feel that this should be a central point of discussion. (see 1) below, and the data on children mortality that suggest that many of the counted deaths do not have covid on the death certificate).
3. Related to 1) above, we feel that there should be explicit analysis of prior exposure to infections and the implications it has on risk for severe outcomes. The data provided (end of 2022 – is there any updated data) suggest very high population exposure rates and given the known literature on the long and robust protection of prior infections with respect to severe outcomes, this should be more explicitly considered in the risk-benefit analysis.
4. The discussion re the risk from long covid and the respective potential protection of vaccination seems to rely on very shaky evidence. First, the analysis mixes old variants with omicron variants. Second, it is often based on papers that are methodologically weak and prone to bias and ignores papers that show contradictory results. They also do not analyze the impact of prior infections on the risk of long covid. We believe that the analysis should be revised accordingly. This analysis should be revised accordingly.
5. We have similar thoughts to 4) above with respect to the analysis of the risk to pregnant women, and the protection vaccination provides to the woman and the baby. This analysis should be revised accordingly and incorporate the fact that the risks and the benefits of vaccination during pregnancy were never evaluated appropriately in clinical trials.
6. We would like to underscore again our questions (and concerns) re the current safety and risk analysis of the covid vaccines (please see separate emails we shared).
7. We would like to underscore again out questions related to the definition of high risk patients and what more specific factors play a role in increased risk of severe covid outcome and potentially increased risk of AEs.
8. We feel that the very low uptake of the vaccine among healthcare professionals is a major ethical issue. How can medical professional recommend a vaccine that they elect not to take?
9. We ask that the cost-benefit analysis, will include assessment of the waste incurred by vaccines that are ultimately not used. There seems to be significant economic waste in that respect.

Thanks!

Robert, James and Retsef

List of questions:

1. We need clear definitions of what is counted as COVID hospitalization and death - and how with vs. because COVID is determined:

   - In particular, it will be important to consider the admission diagnosis and discharge diagnosis (should be available in hospital systems)

- Also from slide 29 it seem like covid deaths are counted even when it does not appear as the cause of death on the death certificate (see detail comment) – we need to have clarity on these definitions!

2. Data on long covid (slide 7) do not seem relevant to decision since it is related to pre-omicron times. What we need is assessment of the number of new long covid cases during the last season (under Omicron variants) and also assessment of the vaccine protection (how many needed to be vaccinated to prevent a long covid case:

   - The presentation seems to ignore the most rigorous study on long covid (https://www.bmj.com/content/380/bmj-2022-072529) that showed that the risk is significantly reduced for children and that vaccination has minimal to no impact. This is the only study that had rigorous control

3. Decrease of MIS-C over time reinforces item 2) above (slide 8)
4. Is there updated data on seroprevalence among children and also what data available on adults? This is super critical because it seems like most of the population has been exposed and has natural immunity (slide 9 and https://covid.cdc.gov/covid-data-tracker/#pediatric-seroprevalence)
5. Slides 11-12 shows decreased covid-associated hospitalization rates - do you have any thoughts on this?
6. Pediatric COVID-19–Associated Hospitalizations/mortality (Slide 15-29) – please create two slides (the rest is unnecessary and does not present relevant information):

   - Slide that includes the following: cumulative rate (per 100K) of covid-associated hospitalization per age group (< 6 mo, 6-23, 2-4, 5-11, 12-17) and separated to >= underlying condition and no condition.
   - Same slide but on ICU hospitalizations
   - Same slide but hospital mortality

7. As a control, please provide the overall annual rate of hospitalization (per 100K) of the < 6 mo and 6-23 mo. This will show whether covid is a specific reason for hospitalization or mostly incidental to hospitalizations that occur for other reasons.
8. Similar analysis to 6) for adults, broken by age groups 0f 19-29, 30-49, 50-64, 65-74 and over 75.
9. Slide 36 – Is misleading and in fact suggestive that most pregnant women do not get hospitalized because of covid. We need similar analysis to above re the risk of pregnant women to be hospitalized because of covid (how many covid hospitalizations per 100K pregnant women occurred over a year based on admission diagnoses). Then we need assessment as to the extent that vaccination will reduce this risks, and how well we understand the risks of vaccination during pregnancy.
10. Slide 42 – please add to the outcome all cause mortality and hospitalization, and all flu-like hospitalizations.
11. Slides 45-46 – please provide the data that supports these slides.
12. Slide 50 – can you please provide the data and analyses supporting the statements on the slide? There are strong statements in the slide re the efficacy of vaccination, and I am not sure I see data to support that.

13. Slide 51 – can you explain why do you think vaccinated children are over represented in the MISC group?
14. Slide 52 – the papers cited are weak methodologically and prone to bias. Also they do not consider individuals with prior infections/exposure which is almost all the population at the moment.
15. Slide 53 – the evidence provided re the protection of vaccination against infection/transmission is not convincing. The papers cited often provide statistically insignificant results, and also do not discern between the protection of prior infection versus vaccination. They also look mostly on symptomatic infections.
16. Slides 54-55 – can we please get the details of the study re the impact of vaccination against secondary attack rate. One concern is that vaccination could be confounded with other behaviors and conditions that could impact the attack rate,
17. Slide 57-59 – the vaccine safety analysis of the CDC requires the following clarifications: (i) what the working definitions of safety signal are; (ii) what are the risk windows being studied; (iii) how likely the current surveillance systems are to capture non specific AE that emerge over a long run; (iv) to what extent the CDC reviewed existing literature and several large scale studies that do show concerning safety issues and risks.
18. Please provide details on the model mentioned on slides 60-61. This model does not seem to address the most important questions: what is the risk level from covid to different sub-populations (as per different outcomes)? What is the risk reduction and its duration from vaccination per sub-population, and how it changes given prior infection? What are the potential risks of vaccination per sub-population?
19. Slide 62-65 re the risk of covid in pregnancy and the efficacy of vaccination to protect the mother and infants are highly misleading since and are based on papers that often study non omicron variants or using methodologies that highly prone to biases and confounding and questionable outcome definition (see discussion re covid associated hospitalizations. The also ignore other literature that shows different results. Finally, they do not account for the fact that the safety of vaccination during pregnancy was never evaluated in clinical trials.
20. Slides 66-71 are as summary that needs to be radically updated per all the comments above.
21. Slides 72-79 are based on multiple surveys – please add analysis of each survey re the potential biases and how representative the population sampled is. Also please add summary of surveys that ask about the perception re vaccine injuries.
22. Slides 80-91 – please explain better how the different surveys were conducted. It looks like the covid vaccines have relatively low trust in the population and particularly among HC professionals. These results seem to contradict the surveys in 21) above. This creates a moral issues – how medical professionals can recommend to the public something they do not do themselves....
23. Slides 92-100 – Given the low acceptance and high cost, could you please do an assessment based on prior season data of estimated wasteful cost of unused vaccines?
24. Slides 101-104 – Please explain the details of the different models and what extent they consider the significant waste of unused vaccines?
25. Slides 105-113 – I am not sure what the relevance is to the discussion, and some of the results presented seem to be contradictory to the actual uptake of the vaccine.

Retsef-

Ae per our meeting yesterday, I am attaching the EtR and an executive summary reflecting work that has occurred on the COVID-19 25-26 recommendation before the current terms of reference were implemented. We have color coded the document so you and other workgroup members can see where we had and had not yet completed work group finalization of the EtR document.

As always, these materials are subject to the confidentiality agreements that govern workgroup participation.

@Zadeh, Mina (CDC/OD/OCS) we look to you to advise Dr. Levi on the specifics of when this may or not be shared within the workgroup as you work to onboard new members.

Subject: RE: ISO current and past studies for ACIP committee members

Thanks Stuart. Happy to talk with you and team about this too
Would suggest each of the CIOs get the specific ?s needed for lit review by the work group NLT today (and this may have already happened but Hep B as of Thursday PM hadn't received anything yet). I know this is needed for the workgroups to develop draft data-driven recommendations; our SMEs need some time to do this. For the COVID ?s below, would suggest prioritizing those that correlate with information needed for a vote. The DFO and the ACIP staff have an important role in working with ACIP and workgroups to prioritize, streamline, and hone in on the ?s needed to be answered and then go to program with these requests. Dr. Alison Fountain who is in the OD can also help with fine tuning these questions from a clinical perspective and prioritizing with the ACIP staff team

Subject: RE: ISO current and past studies for ACIP committee members

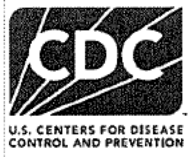
Hi Sarah,

Thank you so much for the information you provided. This is very helpful; I've shared it with the ACIP members.

I'd like to schedule a meeting this week with you, Chris, the COVID-19 WG Chair (Retsef Levi) to follow up on Vaccine Safety related questions. Would you please provide times that you or your delegates would be available (for 45 minutes-1 hr) this week?

The COVID-19 WG Chair has also asked to provide further information about the following studies (i.e., data, methodology, status including preliminary results):

- Mortality and Vaccination with COVID-19 vaccines
- Surveillance for Adverse Pregnancy and Birth Outcomes following COVID-19 Vaccine Exposures During Pregnancy
- COVID-19 Vaccine Safety, Spontaneous abortion (SB) and Stillbirth in the Vaccine Safety Datalink; two case control studies
- The Association Between COVID-19 mRNA Vaccination and Type 1 Diabetes in Children
- Modified self-controlled case series design for assessing mortality risk after COVID-19 vaccination
- Safety of Concomitant Seasonal Influenza, COVID-19 and Respiratory Syncytial (RSV) Vaccine Administration in the U.S. Elderly Population Aged 65+
- Ischemic stroke after bivalent COVID-19 vaccination: a self-controlled case series study in the Vaccine Safety Datalink
- Chronic Urticaria and Dermographism after COVID 19 Vaccine Booster
- COVID-19 Vaccination and Risk of Febrile Seizures in Young Children 6-59 months old in the Vaccine Safety Datalink, 6/18/22 – 12/31/24
- Examining the association between COVID-19 vaccination and oral lichen planus
- Risk of pulmonary embolism (PE) following simultaneous seasonal influenza, COVID-19 and RSV vaccination compared to sequential vaccination among older adults in the U.S.
- Safety of Simultaneous and Sequential Vaccination during Pregnancy in the VSD
- Evaluation of the Risk of Ischemic Stroke after SARS-CoV-2 mRNA Vaccines Using a Vaccinated Concurrent Comparator Analysis within the Vaccine Safety Datalink
- Association between juvenile idiopathic arthritis and the childhood schedule and COVID-19 vax
- Simultaneous mRNA COVID-19 and IIV4 Vaccination in Pregnancy Study



- Safety of simultaneous mRNA COVID-19 vaccine with other childhood vaccines in young children
- Safety of Pediatric COVID-19 Vaccination
- Simultaneous mRNA COVID-19 and Quadrivalent Inactivated Influenza Vaccine (IIV4) Vaccination Study
- A Prospective Observational Study to Evaluate the Safety of COVID-19 Vaccination in Pregnant Women
- Assessment of hypertensive disorders of pregnancy in women who received COVID-19 vaccine during pregnancy
- Assessment of maternal ICU admission + cardiovascular postpartum conditions in women who received COVID-19 vaccines during pregnancy
- Assessment of medical conditions in infants born to women who received COVID-19 vaccine during pregnancy
- Assessment of perinatal death and preterm birth in infants born to women who received COVID-19 vaccine during pregnancy
- Assessment of spontaneous abortion in women who received COVID-19 vaccine during pregnancy
- Assessment of birth defects in infants born to women who received COVID-19 vaccine during pregnancy
- Assessment of NICU admission in infants born to women who received COVID-19 vaccine during pregnancy

Is this something that your team can pull together easily?

Many thanks!

V/R

Subject: RE: ACIP - COVID 19 TOR --- for posting please

Hi Mina,

Can you confirm that CDC IOD/senior leadership would like these posted? I understand that there was still some discussion around the TOR so would like to be sure we have approval to post.

Dayle's team is standing by once we receive clearance/approval in writing from IOD leadership.

Note that the web content language is relatively easy to post. Typical practice would be for the PDF version of the document to be 508 compliant before posting. We can certainly post first and then make it 508 compliant. I just want to be sure Nina or others in OC are ok with this approach since my understanding is that is not preferred practice/policy but defer to Nina and her team on this.

Thank you
Rebecca

Importance: High

Hi Dayle,

I hope you are well. Attached are the Word and PDF versions of ACIP's COVID-19 WG TOR. This version has been reviewed by OSBI, OGC CDC/HHS, NCIRD, IOD, other HHS POCs and the WG Chair/ACIP members on the WG. Would you please update the ACIP WG site today – under COVID 19 (ACIP Work Groups | ACIP | CDC) – with the information below and a link at the bottom to the full document: (please feel free to change the font color to black, I used blue to separate it from my email text)

COVID-19 Immunizations

TOPICS UNDER DISCUSSION BY THE WORKGROUP

The following topics relevant to COVID-19 immunization for effective control of COVID-19 disease in the civilian population of the United States will be under discussion in the WG in multi-year efforts.

1. Risk-benefit and cost-benefit analyses of existing and newly FDA-authorized mRNA and other COVID-19 immunizations, and immunization schedules as it relates to COVID-19 immunization to inform use recommendations, personalized per age-group, major risk factors and health status.
2. To identify critical gaps in the existing scientific and clinical knowledge and methodologies related to the safety and efficacy of the COVID-19 immunizations, to inform the development of policy recommendations and further analyses and research by the CDC, other related federal agencies, and the scientific community.
3. To review and summarize data, clinical and scientific knowledge related to adverse events associated with COVID-19 immunizations to inform immunization recommendations in terms of precautions and contraindications to receipt of immunization.

DESCRIPTION of WORKGROUP ACTIVITIES

The following activities provide a framework for the COVID-19 immunization WG multi-year efforts which may involve data requests from other Federal and private partners:

1. Review and summarize existing data and published and unpublished research and clinical knowledge related to the safety, effectiveness, and immunogenicity of COVID-19 immunizations authorized or approved in the United States.
2. Summarize literature reviews of the epidemiology of COVID-19 disease and SARS-CoV-2 virus.
3. Assess the benefit-risk balance for administration of COVID-19 immunization products at the same time as other immunizations.
4. Identify areas where additional data and research are needed to inform COVID-19 immunization recommendations.
5. Develop COVID-19 immunization recommendations.
6. Review and summarize the existing clinical and scientific information available; and gaps in the existing knowledge, including from other federal agencies like the FDA, where appropriate relating to bio distribution, pharmacokinetics and persistence of the spike protein, mRNA, and lipid nanoparticles to inform immunization recommendations.
7. Review and summarize the existing clinical and scientific information (including from federal agencies like the FDA, where appropriate); gaps in the existing knowledge regarding potential impurities (e.g., DNA contamination and endotoxins) in existing immunization products and their health impacts to inform immunization recommendations.
8. Review and summarize the existing scientific knowledge, and gaps, regarding the cumulative short- and long-term impact of repeated boosting immunization including non-specific effects (e.g., IgG4 class switching, immune imprinting, viral evolution under leaky immunizations) to help inform immunization recommendations.
9. Examine the impact of COVID-19 immunization on COVID-19 and all cause deaths, hospitalizations, and disability to inform immunization recommendations.
10. Analyze existing data and scientific knowledge regarding cardiovascular, thrombotic, neurological, immunological and other serious adverse events potentially caused by COVID-19 immunization.

11. Review and summarize available data, information, and gaps regarding long-term Covid effects from scientific literature and clinical experience associated with COVID-19 immunization products and COVID-19 infection to inform policy recommendations.
12. Map existing COVID-19 immunization policies in countries around the world and how they compared to the US.
13. Analyze existing data and scientific knowledge related to the safety of COVID-19 immunization during pregnancy.

Advisory Committee on Immunization Practices,
Centers for Disease Control and Prevention (ACIP, CDC)
COVID-19 Immunization Workgroup
Terms of Reference
UPDATED: July 22, 2025

PURPOSE

This document defines the activities, membership, and administrative requirements associated with the establishment of a **COVID-19 Immunization Workgroup** under the Advisory Committee on Immunization Practices, Centers for Disease Control and Prevention (ACIP, CDC). ACIP utilizes subgroups of the Committee, known as Workgroups (WGs), to review relevant published and unpublished data, and clinical and scientific knowledge, and develop options for presentation to the full ACIP parent committee during its public meetings to facilitate discussion, deliberation and development of recommendations. ACIP WGs are intended to augment the effectiveness of ACIP. The direction, focus, and pace of both ACIP and the individual WGs are guided by CDC and HHS policies and priorities, and by the perceived need for expert input to inform development of CDC immunization policy. ACIP WGs serve a key **scientific role** in support of immunization policy development by ACIP. The COVID-19 Immunization WG has been specifically established to review data, as well as clinical and scientific knowledge on COVID-19 immunizations, to help develop COVID-19 immunization policy options for ~~and recommendations for~~ ACIP consideration to formulate advice to CDC and HHS leadership.

For the purposes of this document, Immunization refers to vaccines and other antibody protective products, to prevent disease, e.g., immunoglobulins.

BACKGROUND

COVID-19 is a disease caused by the SARS-CoV-2 virus. For some patients, COVID-19 can ~~still~~ be severe, causing significant morbidity and mortality. Currently there are three vaccine manufacturers (Moderna, Novavax, and Pfizer) with a combined four COVID-19 vaccines authorized or approved for use in the United States. As the SARS-CoV-2 virus evolves, new formulations of the COVID-19 vaccine have been developed to better ~~match~~ approximate currently circulating strains.

The COVID-19 WG was established in 2020 and met frequently to discuss immunization recommendations as the COVID-19 pandemic evolved. ACIP ~~meets three times per year~~has three scheduled meetings per year, and as needed, to provide recommendations on existing and/or newly developed vaccines.

Commented [DD1]: I wonder if this is correct. Is the clinical direction guided by policy? Seems like rather than direction, it should be "policy questions asked, its focus and pace..." is more appropriate. The data should drive the direction of the WG.

Commented [DH2]: Would not say perceived need- FACA mandates this- plus I would suggest for gold standard science you want external input for validation

Commented [DD3]: What does that mean? Seems like if its part of a FACA there is legislated need for external expert input, right?

Commented [DD4]: CDC and HHS develop the policy. ACIP recommends a direction

Commented [DD5]: Needs to be VERY clear that ACIP does not MAKE policy

Commented [DD6]: Does this include pediatric formulations to make the count 4?

Commented [DD7]: Match not a preferred way of describing this updating of the vaccine.

DRAFT
DELIBERTAIVE PRE_DECISIONAL
CONFIDENTIAL

According to the 21st Century Cures Act (PL 114-255), ACIP shall also, as appropriate, consider new vaccines or new indications at its next regularly scheduled meeting after licensure; if the Committee defers making a recommendation, it will provide an update on the status of its review. Additionally, ACIP shall make recommendations in a timely manner for vaccines that are designated as breakthrough interventions ~~therapy~~ or could be used in a public health emergency.

Commented [DD8]: Almost no vaccines are a therapy.

The purpose of this WG is to review available data, as well as clinical and scientific knowledge, to support the development of recommendations for ACIP consideration that are used to advise CDC and HHS.

Commented [DD9]: ACIP consideration is not the final step.

In accordance with the ACIP Charter, the COVID-19 WG will prepare information for the ACIP members to enable them to:

- Advise on population groups and/or circumstances in which a vaccine or related agent is recommended.
- Provide recommendations on contraindications and precautions for use of the vaccine and related agents and provide information on recognized adverse events.
- Provide recommendations that address the general use of vaccines and immune globulin preparations as a class of biologic agents, use of specific antibody products for prevention of infectious diseases, and special situations or populations that may warrant modification of the routine recommendations.
- Support committee deliberations on use of immunization to control disease including consideration of disease epidemiology and burden of disease, immunization safety, immunization efficacy and effectiveness, the quality of evidence reviewed, economic analyses, and implementation issues.
- Revise or withdraw their recommendation(s) regarding a particular immunization as new information on disease epidemiology, immunization effectiveness or safety, economic considerations, or other data that becomes available.

Commented [DD10]: These are great

The WG will also assist and support ACIP, in accordance with Section 1928 of the Social Security Act, to be able to establish and periodically review and, as appropriate, revise the list of immunization for administration to children and adolescents eligible to receive immunizations through the Vaccines for Children Program, along with schedules regarding the appropriate dose and dosing interval, and contraindications to administration of the pediatric immunization.

TOPICS UNDER DISCUSSION BY THE WORKGROUP

The following topics relevant to COVID-19 immunization for effective control of COVID-19 disease in the civilian population of the United States will be under discussion in the WG in multi-year efforts.

1) Risk-benefit and cost-benefit analyses of existing and newly FDA-authorized mRNA and other COVID-19 immunizations, and immunization schedules as it relates to COVID-19

DRAFT
DELIBERTAIVE PRE_DECISIONAL
CONFIDENTIAL

immunization to inform use recommendations, personalized per age-group, major risk factors and health status.

2) To identify critical gaps in the existing scientific and clinical knowledge and methodologies related to the safety and efficacy of the COVID-19 immunizations, to inform the development of policy recommendations and further analyses and research by the CDC, other related federal agencies, and the scientific community.

3) To review and summarize data, clinical and scientific knowledge related to adverse events associated with COVID-19 immunizations to inform immunization recommendations in terms of precautions and contraindications to receipt of immunization.

Commented [DH11]: What about benefits as well? Would suggest this statement be more balanced

DESCRIPTION of WORKGROUP ACTIVITIES

The following activities provide a framework for the COVID-19 immunization WG multi-year efforts which may involve data requests from other Federal and private partners:

1. Review and summarize existing data and published and unpublished research and clinical knowledge related to the safety, effectiveness, and immunogenicity of COVID-19 immunizations authorized or approved in the United States.
2. Summarize literature reviews of the epidemiology of COVID-19 disease and SARS-CoV-2 virus.
3. Assess the benefit-risk balance for administration of COVID-19 immunization products at the same time as other immunizations.
4. Identify areas where additional data and research are needed to inform COVID-19 immunization recommendations.
5. Develop COVID-19 immunization ~~policy~~ recommendations.
6. Review and summarize the existing clinical and scientific information available; and gaps in the existing knowledge, including from other federal agencies like the FDA, where appropriate relating to bio distribution, pharmacokinetics and persistence of the spike protein, mRNA, and lipid nanoparticles to inform immunization recommendations.
7. Review and summarize the existing clinical and scientific information (including from federal agencies like the FDA, where appropriate); gaps in the existing knowledge regarding potential impurities (e.g., DNA contamination and endotoxins) in existing immunization products and their ~~scientifically known~~ health impacts to inform immunization recommendations.
8. Review and summarize the existing scientific knowledge, and gaps, regarding the cumulative short- and long-term impact of repeated boosting immunization including non-specific effects (e.g., IgG4 class switching, immune imprinting, viral evolution under leaky immunizations) to help inform immunization recommendations.

Commented [DD12]: This is the key part of this sentence. This review does not exist to relitigate regulatory action.

Commented [DD13]: Seems like this phrase is implicit in the deliberations at ACIP WGs.

Commented [DD14]: There should be a why here as in the above. I wonder if the title of this section should be:

DESCRIPTION of WORKGROUP ACTIVITIES THAT INFORM THE DEVELOPMENT OF IMMUNIZATION RECOMMENDATIONS.

DRAFT
DELIBERTAIVE PRE_DECISIONAL
CONFIDENTIAL

9. Examine the impact of COVID-19 immunization on COVID-19 and all cause deaths, hospitalizations, and disability to inform immunization recommendations.
10. ~~Analyze~~ Review and help interpret existing data and scientific knowledge regarding cardiovascular, thrombotic, neurological and other ~~major~~ serious adverse events potentially caused by COVID-19 immunization.
11. Review and summarize available data, information, and gaps regarding long-term Covid effects from scientific literature and clinical experience associated with COVID-19 immunization products and COVID-19 infection to inform policy recommendations.
12. Map existing COVID-19 immunization policies in countries around the world and how they compared to the US.
13. ~~Analyze~~ Review and help interpret existing data and scientific knowledge related to the safety of COVID-19 immunization during pregnancy.

Commented [DD15]: Not sure the WG's job is to analyze data.

Commented [DD16]: Should change major to serious?

Commented [DH17]: This is ok, but see this more in NIH lane re long COVID

Commented [DD18]: WG doesn't analyze data,

MEMBERSHIP

Workgroup Leadership: The COVID-19 Immunizations WG is chaired by one of the ACIP, CDC members appointed to serve as Special Government Employees. The Workgroup Lead (WGL) is a federal employee, identified by the Immediate Office of the Director in consultation with the appropriate CDC program. The WG Chair, in consultation with the WGL, ACIP, CDC DFO, determines the WG's membership and work priorities and deliverables to the full committee.

Workgroup Membership: The COVID-19 Immunizations WG is composed of experts who are appointed based on their professional, scientific, technical, or other expertise. They are experts who are regarded as an authority or a practitioner of unique competence and skill by other persons in their profession, or occupation. Upon request, HHS federal agencies named in the ACIP charter may also appoint members to serve on WGs. The COVID-19 Immunizations WG will be composed of members from a variety of disciplines. The WG will engage with the following disciplines on WG activities to:

- Public health science and practice;
- Public health policy development, analysis, and implementation, including development and execution of immunization programs for children and adults;
- Clinical and medical practice, and patience-care experience;
- Epidemiology;
- Molecular biology;
- Immunology;
- Virology;
- Drug and vaccine safety; and
- Consumer perspectives and/or social and community aspects of immunization programs

Commented [DD19]: And vaccine

DRAFT
DELIBERTAIVE PRE_DECISIONAL
CONFIDENTIAL

Due to the complexity and variability of information to be gathered, additional external subject matter experts may also be invited to provide data and presentations to the WG and answer questions during COVID-19 Immunization WG meetings on an ad hoc basis. Such additional external subject matter experts will not be members of the WG and will not participate in any deliberations or WG discussions.

MEETINGS, ADMINISTRATION, and TIMELINES

1. Administrative Oversight: The WGL will work with the WG Chair to arrange meetings, document meeting proceedings, and report to the ACIP on the COVID-19 Immunization WG's activities and findings.
2. Meeting frequency and location: The COVID-19 Immunization WG will meet on an as needed basis as determined by the WG Chair and WGL. All COVID-19 Immunization WG meetings are convened virtually via teleconference.
3. Meeting structure: In addition to the WGL, at least two ACIP Special Government Employee members (one of whom serves as the COVID-19 Immunization WG Chair) must be present at each meeting for a quorum. An agenda, relevant publications, and background documents will be circulated as read ahead material prior to each meeting.
4. Conflicts of Interest: WG members will complete an ACIP WG Agreement and Conflict of Interest Certification process prior to participation on the WG. They will consent to abide by several guiding principles and disclose interests (e.g., employment, special interests, grants, or contracts) that a reasonable person could view as conflicts or potential conflicts of interest with their COVID-19 Immunization WG participation. Members will also disclose any potential conflicts of interest before each meeting. If a COVID-19 Immunizations WG member indicates a potential or actual conflict of interest, the ACIP, CDC DFO in consultation with the WGL will review and make a determination as to whether the individual must recuse themselves from participating in WG discussions that implicate such a conflict-of-interest concern.
5. Confidentiality: The discussions of the COVID-19 Immunizations WG may include information that is unpublished, protected, privileged, or confidential. WG deliberations, including policy options under consideration by the WG, are also considered confidential. Information of this nature must not be disseminated, distributed, or copied to persons not authorized to receive such information. When these types of information are distributed, the person/s presenting will identify the information as such, so all members are duly informed; and written materials shall be clearly marked as such. Unlike ACIP meetings, which are open to the public, COVID-19 Immunizations WG teleconferences are not subject to the open meeting requirements of the Federal Advisory Committee Act or the GSA Final Rule; data presented during these meetings/teleconferences are often proprietary and should not be distributed to people other than approved COVID-19 Immunizations WG members.
6. CDC Staff Involvement: CDC staff do not serve as members of the COVID-19 Immunizations WG but may provide administrative support and technical expertise to ACIP WGs, bringing subject matter expertise and current professional focus in areas relevant to the goas of the COVID-19 Immunizations WG. Consultation or informational presentations by CDC staff will be transparent and evident to minimize the risk of, or the appearance of, undue influence that would compromise the independence of the WG. The ACIP, CDC DFO and WGL of COVID-

19 Immunizations WG, in consultation with the Chair of the COVID-19 Immunizations WG, will monitor the interaction between the WG and the agency staff to ensure that the WG activities and work products are appropriate and that there is not undue influence by the CDC or by any special interest group on the activities or work products of the WG.

7. Timelines: ACIP WGs are established when needed and terminated once the activities and work products stated in the terms of reference have been completed and the WG's charge has been fulfilled.
8. Subject content: Findings and opinions of the COVID-19 Immunizations WG members will be discussed at meetings. The COVID-19 Immunizations WG's findings will be presented to ACIP for consideration for action (discussion, deliberation and decision).
9. Workgroup Meeting Summaries: Meeting minutes will be created to capture the information gathered during each COVID-19 Immunizations WG meeting and teleconference.
10. Workgroup findings: The COVID-19 Immunizations WG will present findings (briefing documents, background materials, presentations) to ACIP for consideration and deliberation in a public meeting. Final versions of all slides presented at the ACIP meeting will be posted on the ACIP website following the meeting and included in the committee's official records.
11. Workgroup Record Keeping: All CDC FACA committees, subcommittees, and WGs are subject to the Federal Records Act. All records will be uploaded in the Federal Advisory Committee Management Portal. The summary report and other WG documents will become part of the ACIP's official records as required by GENERAL RECORDS SCHEDULE 6.2: Federal Advisory Committee Records

RECORDKEEPING and REPORTING

The WG Chair and WGL will present findings/outcomes/observations/recommendations to the ACIP parent committee for discussion, deliberations, further development of recommendations and vote in an open public forum. Approved ACIP recommendations adopted by the CDC Director will be published in the Morbidity and Mortality Weekly Report (MMWR). In addition, approved ACIP recommendations will be included in the ACIP meeting minutes and annual report.

Houry, Debra E. (CDC/IOD)

Subject: RE: urgent update: ACIP recommendation memos RE: re proprietary information on your document

Hi Debra,
FDA is included because of the impact on manufacturing, and FDA was included in the review of the April ACIP recommendations, focused on the point/memo that mentioned FDA.

Reyn, Apparently, we need to remove the table that was included in the decision memo on thimerosal. It included a table that had information on the number of vaccines by manufacturer, of Mercury, free vaccines. It appears that is proprietary, and we should remove that from the decision memo. I think those may have already gone up. I'm not sure whose desk they are on currently.

Subject: re proprietary information on your document
Importance: High

Dear Stuart,

I was just forwarded the ACIP decision memos and will get them reviewed by the appropriate people and back to you by 7/22. There is one extremely important edit: no proprietary information/drug manufacturers names or information can be included. I should have been clear that the table I sent you could not be shared/that it contained confidential information. So the table needs to be removed. I actually made an alternative table but decided it is probably best without exact numbers. Are you still getting <10%? Based on which numbers? What I quoted at ACIP (between 4-5%) was from doses distributed, as you probably remember. I was told I should not share the exact numbers/names so gave a %. Maybe you could say the numbers of millions of estimated doses it decreased by year total but just round since these are estimates? Please send me an edited version when you get a chance so I can forward it to our legal team and get this completed on time. Thank you!

DEPARTMENT OF HEALTH & HUMAN SERVICES Office of the Secretary

[RECOMMENDATION] MEMO

Predecisional Draft

DATE: Tuesday, May 20, 2025
TO: Secretary Robert F. Kennedy, Jr.
THROUGH: Hannah Anderson, *Deputy Chief of Staff for Policy*
FROM: Reyn Archer, *Counselor to the Secretary*

SUBJECT: Replacing ACIP Members

ISSUE: ~~In 2023, the Biden administration expanded ACIP's membership count from 14 to 19. In December 2024, President Biden filled 3 open ACIP positions in an unprecedented post-election action. In January 2025, CDC began vetting candidates to fill a 4th vacant position. In addition, the Biden administration extended the terms of an additional 6 members.~~ With the current configuration the Trump Administration will only be able to add one member in 2024 with the majority of new members ~~be unable add new members~~ until 2027. This gives Biden appointees significant sway over ACIP and its recommendations until 2028.

Commented [DH1]: I'm not sure this is accurate so removed and added one sentence statement.

Recommendation – Two Options

Option #1

End the terms of all ~~19~~ existing ACIP Members and replace the entire membership with 9 new ACIP Members, making the Committee a more manageable size.

Commented [DH2]: Took number out since I think it is currently 17

Option #2 – Staff Recommendation

Replace at least ~~9~~10 of the current 1~~9~~7 Members of ACIP with new Trump Administration Appointees.

Considerations When Considering Current ACIP Member Terminations

In selecting members to remove and replace among the issues to consider are: (1) the expertise of the member, (2) the date on which the ACIP Member began service on ACIP, and (3) whether termination of a member who currently serves as a Work Group chair may have an adverse impact on ACIP due to the lack of continuity of knowledge on issues likely to come up for a vote in June including. ~~The more timely issues for the June meeting which are most likely to come up for votes are~~: Adult RSV, Maternal/Pediatric RSV, Influenza, HPV, and COVID-19. Other items that may come up for votes, but that are less timely are Meningococcal, and Mpox,

In selecting Members for replacement further considerations could be given to: (1) replacing the most recently appointed ACIP members based on their original appointment date, (2) replacing the longest-serving ACIP members though this would impact the current chair and next chair, (3)

replace the six who are not current work group chairs, or (4) ~~a~~ some combination of the above. Whatever option is pursued, replacement members should fill expertise gaps left by terminated members.

A decision should be made this week on options as it could take several weeks to complete ethics and COI vetting, develop new ACIP member package, and process travel in time for the in-person June meeting. A FRN to request new members is also a consideration, but this would not allow new members to be in place.

Background on Current ACIP Members

End Dates for Current ACIP Members:

2025	1 vacancy
July 2026	No vacancies
July 2027	4 vacancies
July 2028	10 vacancies
July 2029	4 vacancies

Below is a table detailing current ACIP members, their term start and end dates, extensions, workgroup memberships, chair positions, and areas of expertise. The list is in order of the newest member being listed first. Note also that not listed below are: (1) one vacancy, and (2) _____, whose reappointment is pending.

Name	Start	End	Term Extension?	Area of Expertise added to Committee	Workgroup Assignments (Red=chair)	Workgroup Chair (Yes or No)
ZUCKER, Jane	12/23/2024	6/30/2028	N	internal medicine, public health, public health response	Anthrax, HPV	Yes
LYONS, Karyn	12/20/2024	6/30/2028	N	nursing, public health, immunization programs	Schedules, Meningococcal	No
ASTURIAS, Edwin José	7/1/2024	6/30/2028	N	Pediatric infectious diseases	Chikungunya, mpox, Lyme disease	Yes
BREWER, Noel T.	7/1/2024	6/30/2028	N	social and behavioral science	HPV, COVID, Lyme disease	No
CHEN, Lin H.,	7/1/2024	6/30/2028	N	Travel medicine	Chikungunya, mpox	No
CHU, Helen Y.,	7/1/2024	6/30/2028	N	Pediatric infectious diseases, RSV	Maternal peds RSV, adult RSV	Yes
KAMBOJ, Mini	7/1/2024	6/30/2028	N	infections in immunocompromised patients	Pneumococcal, adult RSV	No
KUCHEL, George A.,	7/1/2024	6/30/2028	N	infections in the elderly	COVID, Pneumococcal	No
MOSER, Charlotte A.,	7/1/2024	6/30/2028	N	health education, consumer representative	Meningococcal, Schedules, Lyme disease	No
SCHECHTER, Robert	3/6/2024	6/30/2027	N	pediatrics, immunization programs	COVID, HPV, Pneumococcal, Influenza	Yes
TALBOT, Helen Keipp	3/5/2024	6/30/2025	Y	expertise in adult immunization, influenza	**ACIP chair**, Influenza, COVID	COMMITTEE CHAIR
JAMIESON, Denise J.,	3/4/2024	6/30/2027	N	Obstetrics and gynecology	CMV, maternal peds RSV	Yes
MALDONADO, Yvonne (Bonnie)	3/4/2024	6/30/2027	N	pediatrics, pediatric infectious diseases	Mpox, CMV	Yes
SHAW, Albert C.,	3/4/2024	6/30/2027	N	immunology, infections in the elderly	Adult RSV, Influenza	Yes
CINEAS, Sybil	7/28/2021	6/30/2025	N	Pediatric and adult medicine	Schedules, HPV	Yes
BROOKS, Oliver	7/26/2021	6/30/2025	N	Pediatrics	HPV, COVID, Maternal peds RSV	Yes
LOEHR, Jamie	7/26/2021	6/30/2025	Y	family medicine, private practice, health economics	Meningococcal, Pneumococcal, Influenza	Yes

Conclusion:

Secretary Kennedy therefore has full control over ACIP under statute and the Unitary Executive Theory including the appointment and removal of ACIP members at will.

Legal Authority:

Under the Unitary Executive Theory, full control of the Executive Branch is vested in the President. The President has extended his authority over the Public Health Service to the Secretary of Health and Human Services. The Secretary can use his authority to establish or terminate discretionary advisory committees under 42 USC § 217(a); this authority was used to establish ACIP.

Categories:	4

Was trying to figure out what the email from Hannah meant- below is what comes up when googling CDC and vaccine definition. LMK if this refers to something else and I can look into it.

https://apnews.com/article/fact-checking-976069264061

Experts say changes to CDC's vaccination definition are normal

By SOPHIA TULP

Published 1:47 PM EDT, February 9, 2022

CLAIM: The Centers for Disease Control and Prevention has changed its definition of vaccination because COVID-19 vaccines are ineffective.

AP'S ASSESSMENT: Missing context. The CDC has altered the language in the definition of vaccination on its website, including after the development of COVID-19 vaccines, but the changes were made to prevent potential misinterpretations, and did not alter the overall definition, according to the agency. Experts confirmed to The Associated Press that the changes reflect the evolution of vaccine research and technology.

THE FACTS: The suggestion that COVID-19 vaccine ineffectiveness led the CDC to change its definition of the word online was amplified this week by U.S. Rep. Thomas Massie, a Kentucky Republican who has been critical of pandemic mask and vaccine mandates.

Massie shared an image containing three definitions for the word "vaccination" with his 326,000 followers on Sunday. One was labeled "pre-2015" and described vaccination as: "Injection of a killed or weakened infectious organism in order to prevent disease." Another was dated 2015-2021 and said: "The act of introducing a vaccine into the body to produce immunity to a specific disease." The third was from September 2021, calling vaccination: "The act of introducing a vaccine into the body to produce protection from a specific disease."

Massie added the caption: "The vaccine that redefined vaccination," and in a follow-up tweet stated that he made the image by compiling definitions from the CDC's website, "using wayback machine to find copies of their old websites."

The claim has previously spread online from other sources, with the false suggestion that the definition changes prove the vaccines don't work.

The AP was able to verify through web archives that the language on a CDC page titled "Immunization Basics," has changed in these ways over time. But this does not mean that the agency altered it because of problems with the coronavirus vaccines.

The CDC told the AP in a statement that it made the language shifts to add detail and increase transparency.

"While there have been slight changes in wording over time to the definition of 'vaccine' on CDC's website, those haven't impacted the overall definition," the statement said, noting that the previous

definition "could be interpreted to mean that vaccines were 100% effective, which has never been the case for any vaccine."

Dr. John P. Moore, a professor of microbiology and immunology at the Weill Cornell School of Medicine, said Massie's remarks amounted to "disinformation" and were based on "semantics not science."

"I have no problem with the CDC's language tweaks," Moore wrote in an email to the AP. "They are informative, not sinister."

Moore explained that the vaccines protect against disease, not against infections. He said that while the strength of the antibody response can decrease "over a multi-month period," leading to reduced protection against infection, the vaccines are still effective overall because they continue to protect against severe disease and death. This is true for the omicron variant as well, he said.

Dr. Ryan Langlois, a microbiology and immunology professor at the University of Minnesota, says the CDC's changes "make total sense," and add nuance following emerging vaccine developments such as mRNA technology.

"We've repurposed this word, vaccination, from 200 plus years ago," said Langlois, who teaches a course on the history of vaccination. "It's always difficult when a word is so entrenched but the technology is changing. I think it's very, very clear that one of the things the CDC is trying to do is to try to update the definition with the updating technology."

Langlois said the changes also help to make the definition more accurate. He said the word "immunity" can be misleading with any vaccine, as "it's incredibly rare that that immunity is perfect."

"Their first definition had protection, and ultimately that's what a vaccine is supposed to do," he explained. "Then their second definition used the word 'to generate immunity' which is how the protection is derived. But immunity can be a misleading term, because people think if they're immune it's all or none. Immunity is not that simple and I think that's what they tried to do with their third definition. They went back to this protection idea because that's really what vaccines do."

This is part of AP's effort to address widely shared misinformation, including work with outside companies and organizations to add factual context to misleading content that is circulating online. Learn more about fact-checking at AP.

Good afternoon, Mary-

Thanks for the heads up. Our FACA team has not received communication from the Whitehouse Liaison's Office about new ACIP FACA appointments.

I am looping in our FACA team leadership for awareness. Gladys Lewellen is the CDC FACA Director.

Any information you can share to point us in the right direction is appreciated.

Hi Rita

By any chance are you vetting these individuals for roles as SGEs with the ACIP FACA for CDC? We just received an inquiry on status and are trying to sort out if a 450 has been assigned, if anyone is working with them etc. Thanks!

Mary

Hi IOD
Sara and I had a productive meeting this morning with our SBI team re FACA-

- New members 9-10- we need their CVs now- that will allow us to start putting them in the system and doing some of the COI reviews
- Onboard (forms/vetting needed)- would be helpful to know what WH is doing vs what we will need to do- here are the forms we use for ACIP:
    - OGE Form 450, Confidential Financial Disclosure Report – Note: CDC uses an electronic system to complete the OGE 450 (Ethics Program Activity Tracking System) see attached pdf version. https://www.oge.gov/web/oge.nsf/OGE%20Forms/2026049D943E0C34852585B6005A23CE/$FILE/OGE%20Form%20450%20Confidential%20Financial%20Disclosure%20Report.pdf?open
    - CDC form 1450 – Research-Support Project Funding (see attached pdf).
    - Emolument disclosure - HHS Form 697 – At CDC, the form below is in EPATS for SGEs to complete – see attached pdf version. https://www.hhs.gov/sites/default/files/hhs-697.pdf
    - Lobbyist Certification Form – see CDC form 1547 (attached pdf).
    - SGE annual ethics training – CDC's SGE training is located on the web page- Ethics | FAC | CDC – Specifically, Ethics Training for Special Government Employees | NIH Ethics Program.

  After all of the above is completed, the CIO completes a form pertinent to the needs of the committee. This allows each committee to execute even more stringent criteria regarding the mitigation of conflicts of interest.
- Offboard existing- need decision from HHS on how to proceed this week
    - Risk to offboard if workgroup chairs are offboarded without being replaced
    - Quorum: up to 19 members, 13 needed for quorum at present.
- Timing of forms/vetting
    - Focus: (match same level of vetting as existing members)
        - Conflict of interest, ethics, FRN (needs to run 15 days prior to meeting ~ June 10 at latest, ideal is early June)
        - Forms: 450 (financial disclosure), HHS 697 (foreign activity disclosure), CDC 1450 (Research support), CDC 1547 (ethics training, non-lobbyist certification)
    - Orientation
        - ACIP roles/responsibilities, FACA functions, Ethics training (online and briefing so they can ask questions)
    - Other items
        - OHR onboarding
        - Travel

- Approval by HHS

From our SBI team

Likely not needed given HHS direction:

- Designated Federal Officer and Committee Management Staff conduct strategic outreach to identify candidates from a variety of sources.
- CIO (Designated Federal Officer, Committee Management Specialist, CIO Director) critique candidates (NCIRD conducts multiple levels of review including utilizing a steering committee of experts to finalize candidates to serve on ACIP)
- CIO staff nominate members via a **draft** nomination package (consists of CVs, demographic information, summary of qualifications, etc.) for each candidate.
- OSBI edits/reviews the package and submits to OES for OD review/approval to transmit to HHS Office of the White House Liaison (WHL) .
- OES sends signed approval to OSBI for transmittal to HHS WHL.

Process would start here:

- HHS WHL sends OSBI the approved slate of candidates (may include substitutions by HHS or the White House),
- OSBI notifies CIO to prepare the **final** nomination package documents,
- CIO submits package to OSBI for review.
- OSBI finalizes the package and sends to OES for signature.
- OES sends signed documents to OSBI for transmittal
- OSBI transmits to HHS WHL for the Secretary's signature.
- Signed package documents returned to OSBI for processing.
- OSBI staff send out invitation package to approved candidates via email.
- Approved candidates accept or decline the invitation via email.
- Copies of the acceptance or declination shared with the sponsoring CIO.
- CIO sends out the welcome letters with instructions regarding the OHR onboarding process
- OHR sends email invitation regarding USA Staffing onboarding requirements.
- OHR facilitates the onboarding process including administering the oath of office.
- Simultaneously, the CIO enters the member into Navigator and initiates PARs action
- OSBI adds the new member into EPATS and send the invitation to complete the COI forms.
- OSBI facilitates completion of the on-line ethics training and all the conflict-of-interest forms.
- OSBI, CIO staff and OGC schedule new member orientation.

Subject: RE: 5.19.2025 ACIP w iOD, 9:30am and 4pm

Yes, agree- that's why I said this can't happen with proposed items for agenda- can raise and ask this be looked at for the future.

Re candidates, I think we should wait to review bios and slate formally until this comes to us. OGC said that if candidates actively promoted misinformation, were fired from a university, or do not have expertise for ACIP they could still move forward from HHS if no COI. So, long way of saying let's have the process go forward first and then you and I can raise any concerns on nominees for Stuart and Matt to transmit to HHS.

Debra Houry

Subject: RE: 5.19.2025 ACIP w iOD, 9:30am and 4pm

It would also be great to get a better understanding of the background of possible new appointees. ACIP works hard to make sure it has people with the correct clinical expertise needed on the committee. An example is making sure we have enough peds folks and folks with immunocompromised host experience.

On the Hep b issue, yes, that's correct. There are three paths to get a topic on the agenda:

1) Regular workgroup reconstituted and question presented with full data review and Evidence to Recommendation (EtR) Framework completed to be presented to the committee at regular pace, may take a couple of months.
2) Accelerated workgroup review, ad hoc ACIP meeting with ETR presented- less optimal in a non-public health emergency
3) Present the data directly to the committee without a workgroup and no ETR (strongly not recommended) since this may be a 2-3 day meeting covering ONLY this topic and the critical discussions that happen in the workgroup to guide recommendations will not inform the process.

Hope that helps!

Thanks for sending notes- two other things:
You and I mentioned that you can't just do votes on things at a meeting like Hep B- they need to reconstitute a workgroup to look at the data and evidence and then present at a subsequent ACIP meeting

Of note, Stuart had said all the people had been cleared by WH for ethics and were good to go, but when I asked to make sure all had done 450 forms and to connect with our FACA and SBI teams to ensure rest of paperwork done too it appears none of the ethics/ COI process has been started yet so it is not clear to me if these 10 members are "ready" as they need to go through FACA process before they would be confirmed. This is on my list to discuss with the SBI and OGC teams that review candidates

5.19.2025 ACIP w iOD, 9:30am

Monday, May 19, 2025
9:29 AM

Secretary Request on Members.

Members:
Secretary wants to replace 10 members on the ACIP committee. He has a bench of 10 ready to replace. He doesn't care which members. They think last minute appointments were a way to block. Didn't ask us for help. They know who they want to put on. They want us to remove the newest people on whether they are newly appointed. Who is first on, who is first off, and what is their area that they bring to the table.

Agenda Items:
If they are going to bring 10 new members, there are several issues to be discussed. One item that is included:

- Hepatitis B for healthy infants-eliminating
- Multidose vial- Thimerisol Free recommendation
- Vitamin K dose in kids???
- 7 year review of the childhood immunization schedule- announcement

Is there a hep B workgroup? What's time sensitive on the current agenda?

The new members may have trouble voting because they have not been on for long. Some of the members may be

HPV voting plan?

Created with OneNote.

5.19.2025 ACIP w iOD, 4pm

Monday, May 19, 2025
4:02 PM
Meeting to discuss iOS plan for change in membership of ACIP

From Stuart Burns:
Option 1: Remove all members and replace with new members reflecting the priorities of the administration
Option 2: Roll off enough to have new members as voting majority on the committee to reflect new admin perspective.

Stuart Burns will be writing a new memo to support this plan. Stated objective was to "depoliticize" the committee by installing people more aligned to the Secretary's agenda.

One topic discussed was removal of thimerisol from flu vaccines. Dr. H and I encouraged this change to come from FDA that has dominion over ingredients of vaccines. Stuart commented that this was Dr. Weldon's plan 2o years ago. We highlighted that the ACIP may not support a change given the lack of evidence that this ingredient causes adverse events but that FDA could decide to do this as a matter of principal to avoid the criticism that this generates despite the lack of a safety signal.

Cc: Daskalakis, Demetre (CDC/NCIRD/OD); Ford, Kenya S. (CDC/OGC)
Subject: RE: ACIP UPDATE: Draft vote language and agenda

With regard to notice and comment, we have not considered ACIP recommendations to be rulemakings. However, in an abundance of caution, CDC has followed a notice/comment process to assure a legal defense if ACIP actions adopted by the CDC Director should be challenged as violating the Administrative Procedure Act (APA). In its simplest form, the APA requires that the public be given notice of an intended agency action and that the public be given an opportunity to comment prior to finalizing that action. Therefore, with ACIP, the Federal Register Notice of an upcoming ACIP meeting includes notice to the public of the topics expected to be addressed at the meeting, and then a public comment session is conducted during the meeting prior to votes by the committee. In this instance, as Noah notes, influenza has been announced as a topic on the agenda for the June ACIP meeting.

Substantively, recommendations of FACA committees are expected to be undergirded by robust fact-finding, discussion, and deliberation by the outside expert committee members to create a record to help the advised agency understand the basis and rationale for the committee's recommendation to the agency in order for the agency to make an informed decision about whether or not to accept the committee's recommendation. As such, a process of developing presentations for ACIP consideration through research and analysis by an ACIP Work Group, presentation of the Work Group's product at a public session of the parent ACIP meeting, additional input in that session by relevant stakeholders among the committee's liaison representatives, opportunity for public comment, and committee deliberation prior to a committee vote would be the regular order steps for the committee. As Noah suggests below, the topic of flu vaccine and thimerosal could be added to the agenda for the August/September meeting following that regular order process.

Cc: Daskalakis, Demetre (CDC/NCIRD/OD) <[redacted]>
Subject: RE: ACIP UPDATE: Draft vote language and agenda

Good afternoon,

Rebecca is right; under the policies and procedures and charter, an ACIP member could introduce a motion to adopt a new recommendation outside of the workgroup process. This would be deviate from normal practice and I don't know of a recent example of them following such a process. The motion would then be discussed and, by majority vote, could be amended, postponed, adopted, or sent back to a workgroup. We might want to have OGC (Kevin) to make sure there are no notice/comment issues with a vote on a new recommendation, albeit for a topic announced for a vote in the FRN.

As others noted, it is helpful to the members to have a workgroup sort through the issues presented to the committee prior to a vote so the members can have good, precise recommendation language to work from and can think through potential or unanticipated issues (e.g., FDA regulatory equities, how to avoid vaccine shortages during flu season).

One option for the June meeting may be for the committee to direct the workgroup to examine the issue and present options at the August/September meeting. Then the issue can be presented in normal business in August/September, key stakeholders (e.g., FDA) could weigh in, public comment could be requested via FRN, and the issue could be openly presented and debated at the meeting. Then the members could amend and vote on the WG's presented options as they see fit.

Mina, I would be happy to chat tomorrow when I'm back in the office on the approach to think through approaches.

Thanks,

Noah

Cc: Daskalakis, Demetre (CDC/NCIRD/OD) <[redacted]>; Aleshire, Noah (CDC/OD/OPPE) <[redacted]>
Subject: Re: ACIP UPDATE: Draft vote language and agenda

Adding Noah to this chain for a policy read but will also ask the team here.

It would be atypical to have a vote when a workgroup has not considered the issue. I will try to see if this has ever happened before. That being said, I believe ACIP procedures would allow for an ACIP voting member to make a motion and then the other members could vote since flu is mentioned as a "vote" in the FRN. But there would NOT be a presentation or discussion on the science or evidence since the workgroup was not tasked with this issue.

I would appreciate Noah's read on this and we may also want OGC to confirm.

Thanks
Rebecca

Good morning, Stuart,

I just spoke with Nina who mentioned that you had requested more specific information related to the anticipated vote language for the upcoming ACIP meeting. Please see bottom of this email for the draft

language. Note that this typically is posted on the website during the public comment period and in advance of the meeting. We could post this at the same time as the agenda, once it is all cleared.

Do we have any updates on agenda clearance from HHS?

Also, the team has proposed a change in the order of topics on the agenda. We have historically done the sessions with votes first, followed by informational sessions, to ensure there was enough time to get through everything with the voting topics (see attached). The attached agenda reflects the order change.

Thanks
Rebecca

In addition, the team

Draft vote language for the ACIP June 2025 meeting
Several votes are planned during the June 2025, ACIP meeting.
The vote language shown below is considered draft. All vote language is subject to change and will continue to be updated in advance of the ACIP meeting.

Anticipated votes
RSV Vaccines – Maternal/Pediatric
Draft Vote: Long-acting* monoclonal antibodies are recommended as approved or authorized by FDA for infants <8 months of age born during or entering their first RSV season
Draft VFC Vote: Update the RSV vaccine VFC resolution to include recommendation for use of long-acting* monoclonal antibodies as approved or authorized by FDA for infants <8 months of age born during or entering their first RSV season
*Long-acting means only one dose is needed for protection during an RSV season

Influenza Vaccines
Draft Vote: Recommendations for influenza vaccination for the 2025-26 season

Subject: RE: ACIP UPDATE: Draft vote language and agenda

The best option is still FDA declaring this from their regulatory/production side of vaccines. If there is a preference that ACIP make this decision, this ends up being mainly a question of meeting order. I think it would be GREAT for Mina to connect with Noah on this.

Normally discussions in work groups with data review would lead to vote language. Given the state of the data on Thimerosal and the fact that there will not be a lot of time before the next ACIP meeting, such language may have to be motioned by one of the voting members during the meeting. The voting member could motion to add a second vote to the flu docket that reflects this language on Thimerosal. The rest is rules of order in terms of seconding the motion and taking this to a vote.

Subject: URGENT SARS-CoV-2 vaccine announcement follow up

Importance: High

All-

NCIRD has reviewed today's HHS announcement on SARS-CoV-2 vaccine and wanted to flag the following language:

"...as of today, the covid vaccine for healthy children and healthy pregnant women has been removed from the recommended immunization schedule."

As of this moment the schedule does not reflect the Secretary's announcement. I have met with OGC (copied) and recommend the following path forward to operationalize this announcement:

1. HHS drafts a "Secretary's directive" memo that memorializes this HHS policy change.
2. Add specificity in that memo around the populations for whom vaccine is no longer recommended per this HHS decision.
3. CDC address this change on the schedule based on the written directive from HHS, once signed.

We would be happy to review the memo to make sure that all of the operational steps are correct so that we can change the schedule to reflect the Secretary's decision/announcement. Per OGC we can't make the change until we have such an official directive in writing.

OGC and OPPE included on this chain.

Demetre Costas Daskalakis
Director, National Center for Immunization and Respiratory Diseases
Centers for Disease Control and Prevention (CDC)

Matt

According to OGC, CDC can operationize the Secretary's announcement on the COVID vaccine if we receive a written directive from HHS. CDC has no authority to pull down the current guidance until we receive a written directive. The directive needs to have as much specificity as possible. We need to define the age of "children", define healthy children, and define a healthy pregnant woman.

Once we the written directive has been sent through CDC OGC we can then adjust the vaccination schedule on the web site.

Thanks
Nina

SECRETARIAL DIRECTIVE ON PEDIATRIC COVID-19 VACCINES FOR CHILDREN LESS THAN 18 YEARS OF AGE AND PREGNANT WOMEN

May 19, 2025

The Department of Health and Human Services (HHS) continually considers and evaluates available science and evidence related to the safety and effectiveness of all currently available Food and Drug Administration (FDA) approved or authorized vaccines, and any risks of severe disease, hospitalization, and death to certain populations.

By Secretarial Directive on June 18, 2022, HHS ratified the Centers of Disease Control and Prevention (CDC) recommendations concerning use of Pfizer- BioNTech and the Moderna COVID-19 vaccines in the U.S. population for children ages six months through five years, consistent with the parameters of the Emergency Use Authorizations (EUAs) issued by FDA, for the Pfizer- BioNTech and the Moderna COVID-19 vaccines.[1]

By Secretarial Directive on June 24, 2022, HHS ratified the Centers of Disease Control and Prevention (CDC) recommendations concerning use of COVID-19 vaccines in the U.S. population for children ages six through 17 years, consistent with the parameters of EUAs issued by FDA.

The CDC also currently recommends the COVID-19 vaccine during pregnancy.[2]

Based on a review of the recommendation of the FDA and National Institutes of Health (NIH), I have determined that the known risks associated with use of COVID-19 vaccines in healthy U.S. children ages six months to 17 years do not outweigh the purported benefits of the vaccine. Accordingly, the HHS Secretarial Directives ratifying CDC recommendations for use of COVID-19 vaccines for children ages six months to 17 years and are rescinded.

Based on a review of the recommendation of the FDA, I have similarly determined that the lack of high-quality data demonstrating safety of the mRNA vaccines during pregnancy combined with the uncertainty of the benefits of vaccination pose potential risks to the mother and developing baby. Therefore, the CDC recommendation that pregnant women receive the COVID-19 vaccine is rescinded.

Accordingly, the CDC is directed to remove COVID-19 vaccines from the recommended Child and Adolescent Immunization Schedule by Age and recommended vaccines during pregnancy, as noted above.

Robert F. Kennedy, Jr.
Secretary

[1] The Pfizer and Moderna vaccines are currently approved by the FDA for children 12 years of age and older.

Susan and Matt,

Following up on the request from Reyn and Tracy Beth from FDA, NCIRD put together a slide deck that summarizes our data related to COVID-19 vaccination, specifically the recent changes to the schedule. Our team also put together a policy analysis related to the same schedule changes. Both documents are attached here. Note that the slide deck is very dense; we are happy to provide briefings on any of this material. Let me know if it is ok to send the attached slide deck and policy analysis to Reyn and FDA.

Based on both the policy and the data we wanted to initiate a policy discussion with you regarding the recommendation for pregnant women.

We would like to propose an additional look at the schedule as it relates to pregnant women and for you to consider the possibility of revisiting this with the Office of the Secretary if you agree. Although covered extensively in the attached Power Point, we summarized the data below that supports the following policy proposal:

Consider a shared clinical decision-making recommendation for pregnant women

Summary of data (refer to slides 3-19 in attached slide deck for more detail)
Receiving COVID-19 vaccine during pregnancy has benefits to both the baby and the pregnant woman herself. In 2024-2025, among infants <6 months of age, hospitalization rates were similar to persons 65-74 years of age. No COVID-19 vaccine products are approved for infants ages <6 months. Any protection must come from transfer of maternal antibodies, either from vaccination during pregnancy or prior infection.
Among infants <6 months hospitalized for COVID-19 in 2024-2025, 71% had no underlying conditions, 22% were admitted to the ICU, and 3.5% had any record of maternal COVID-19 vaccination during pregnancy. It is important for pregnant women, together with their healthcare providers, to make an informed choice to receive COVID-19 vaccination to protect themselves and provide protection for infants in their first months of life.

Additionally, in 2024-2025, 28.5% of women ages 15-49 years who were hospitalized with laboratory-confirmed SARS CoV-2 infection were pregnant, of whom, 50% had one or more underlying conditions.

Pregnant women are at risk for severe COVID-19 and adverse maternal outcomes. A recent systematic review and meta-analysis showed that pregnant women with SARS CoV-2 infection were at significantly increased risk of maternal mortality and ICU admission compared with uninfected pregnant women. Neonates born to women with SARS CoV-2 infection were more likely to be admitted to a neonatal care unit after birth, be born preterm or moderately preterm, and be born low birth weight. Another systematic review and meta-analysis showed that COVID-19 vaccination during pregnancy in any trimester was associated with a lower risk of stillbirth or neonatal death.

Of note, the reason CDC did not have a separate COVID-19 vaccination recommendation for pregnant women is because they were included under the universal recommendation.

Thanks,
Demetre

Demetre Costas Daskalakis
Director, National Center for Immunization and Respiratory Diseases
Centers for Disease Control and Prevention (CDC)
Department of Health and Human Services (HHS)
[redacted]

CDC COMMENT ON CITED REFERENCE: The conclusion of this paper states that COVID-19 vaccine appears to be safe during pregnancy with no increase in the incidence of preterm labor and small for gestational age compared to unvaccinated women. The study reports there were no differences between vaccinated and non-vaccinated patients with respect to primary outcomes, with the rate of preterm birth 5.5% in the vaccinated group compared to 6.2% in the unvaccinated group ($p = 0.31$). Findings indicated during the second trimester, there was an increased risk of preterm birth compared to their unvaccinated counterparts (8.1% vs. 6.2%, $p < 0.001$). Notably, there were no preterm births within two weeks after vaccine receipt in the second trimester, and the majority of the preterm births were in the late preterm period, suggesting that unmeasured confounding may have contributed to the results. Safety of COVID-19 vaccine in pregnant women has been evaluated in multiple studies (including published CDC studies). Evidence from these studies has been reviewed by the ACIP COVID-19 Vaccine Safety Technical Work Group (VaST) from 2020-2023, which found no safety concerns for pregnancy, maternal, or infant outcomes.

8. **CLAIM:** Yet another study showed an increase in **placental blood clotting** in pregnant mothers who took the vaccine.

CITED REFERENCE: COVID-19 vaccines and adverse events of special interest: A multinational Global Vaccine Data Network (GVDN) cohort study of 99 million vaccinated individuals - ScienceDirect

CDC COMMENT ON CITED REFERENCE: This referenced paper did not include pregnant women or any maternal outcomes as part of its analysis, including placental blood clotting. Safety of COVID-19 vaccine in pregnant women has been evaluated in multiple studies (including published CDC studies). Evidence from these studies has been reviewed by the ACIP COVID-19 Vaccine Safety Technical Work Group (VaST) from 2020-2023, which found no safety concerns for pregnancy, maternal, or infant outcomes.

Thank you
Demetre

Demetre Costas Daskalakis
Director, National Center for Immunization and Respiratory Diseases
Centers for Disease Control and Prevention (CDC)
Department of Health and Human Services (HHS)
[redacted]

4. **CLAIM:** A study from the UK of over 1.7 million children between the ages of 5 and 15 revealed that **cases of myo and pericarditis were found exclusively in those that received the COVID-19 vaccine**.

CITED REFERENCE: OpenSAFELY: Effectiveness of COVID-19 vaccination in children and adolescents | medRxiv

CDC COMMENT ON CITED REFERENCE: This non peer reviewed article on medRxiv observed myocarditis and pericarditis among vaccinated children and adolescents in the U.K. The study cohort did not include over 1.7 million children, only ~1.24 million: 513,192 eligible adolescents were matched with 410,463 unvaccinated controls and 177,360 eligible children were matched with 141,711 unvaccinated controls. 410,463 adolescents (12-15 yo) received Dose 1, 220,029 adolescents that also received Dose 2, 141,711 children (5-11 yo) received Dose 1 and 66,231 children also received Dose 2. The number of events was rare. This study used records from emergency room and hospitalizations and therefore would not capture control patients that did not seek care or sought care in other locations. There were 9 cases of pericarditis and 3 cases of myocarditis among adolescents who received the first dose of COVID-19 vaccine, and in children there were 3 cases of pericarditis and no cases of myocarditis after receipt of the 2nd dose. Among those children who received the first dose of COVID-19 vaccine, there were 3 cases of pericarditis and no cases of myocarditis; no cases of pericarditis or myocarditis were observed following the second dose.

5. **CLAIM:** A study from Japan showed that COVID-19 vaccination was significantly associated with the onset of myo and pericarditis. These occurred most often in males under 30.

CITED REFERENCE: SARS-CoV-2 mRNA vaccine-related myocarditis and pericarditis: An analysis of the Japanese Adverse Drug Event Report database - ScienceDirect

CDC COMMENT ON CITED REFERENCE: These findings from Japan align with those of the COVID-19 vaccine safety monitoring systems from other countries, including CDC and FDA vaccine safety systems, and confirm the published CDC and FDA findings and support the updated CDC clinical considerations. The risk of myocarditis and pericarditis observed in these systems was highest among males under the age of 30 years and among those who received Moderna COVID-19 vaccine.

6. **CLAIM:** A number of studies in pregnant women showed higher rates of **fetal loss** if vaccination was received before 20 weeks of pregnancy.

CITED REFERENCE: Miscarriage after SARS-CoV-2 vaccination: A population-based cohort study - Velez - 2024 - BJOG: An International Journal of Obstetrics & Gynaecology - Wiley Online Library

CDC COMMENT ON CITED REFERENCE: The conclusion of this paper states that "SARS-CoV-2 vaccination was not associated with miscarriage, while accounting for the competing risk of induced abortion." These findings are consistent with prior studies (including published studies from CDC) where the risk of miscarriage following the COVID-19 vaccine was not significant.

7. **CLAIM:** Another showed statistically significant increases in preterm birth.

CITED REFERENCE: Safety of SARS-CoV-2 vaccination during pregnancy- obstetric outcomes from a large cohort study | BMC Pregnancy and Childbirth | Full Text

children (6 mos-6 yr) has been reviewed by the ACIP COVID-19 Vaccine Safety Technical Work Group (VaST) from 2020-2023, which found no safety concerns.

2. **CLAIM:** Information provided by manufacturers for the COVID-19 vaccines state, "[s]afety and efficacy in individuals younger than 12 years of age have not been established," and "[a]vailable data on [COVID-19 vaccine] administered to pregnant women are insufficient to inform vaccine-associated risks in pregnancy."

CITED REFERENCE: Package Insert and FDA Approved Patient Labeling - COMIRNATY

CDC COMMENT ON CITED REFERENCE (FOR SAFETY): Postmarketing surveillance further characterizes the safety profile of licensed products, especially for groups within the general population excluded from clinical trials (in this case pregnant women and children under 12). CDC and FDA have conducted multiple post-marketing studies and analysis of safety data in these populations, and this information has been presented to advisory committees to inform vaccine policy, clinical considerations for healthcare providers, and to the public. Evidence from these studies in pregnancy has been reviewed by the ACIP COVID-19 Vaccine Safety Technical Work Group (VaST) from 2020-2023, which found no safety concerns for pregnancy, maternal, or infant outcomes. Evidence from these studies in young children (6 mos-6 yr) has been reviewed by the ACIP COVID-19 Vaccine Safety Technical Work Group (VaST) from 2020-2023, which found no safety concerns.

3. **CLAIM:** Myocarditis reports in VAERS after COVID-19 vaccination in 2021 was **223 times higher than the average of all vaccines combined for the past 30 years** – representing a **2500% increase**.

CITED REFERENCE: Determinants of COVID-19 vaccine-induced myocarditis - Jessica Rose, Nicolas Hulscher, Peter A. McCullough, 2024

CDC COMMENT ON CITED REFERENCE:
The reference utilized public use VAERS data to analyze unverified myocarditis reports to VAERS following COVID-19 vaccines and found an average of 10.8 reports of myocarditis were filed between 1990 and 2020 and "notably" 2414 reports of myocarditis were filed in 2021 alone. The report identified 3078 reports of "COVID-19 vaccine-induced myocarditis" (0.3% of all AEs), 76% resulted in emergency care and hospitalization, while 3% suffered death. The authors report that they considered myocarditis cases could present as sudden death but the only mention is a man aged 33 years who suffered a cardiac arrest after running which was 600 days following Dose 2 Pfizer and death of a 15 year old male who died 358 days following Dose 1 Pfizer during his hospital stay for other illness. Limitations of analysis of VAERS data are well known. CDC and FDA have conducted multiple post-marketing studies of the COVID-19 vaccines and this information has been presented to advisory committees to inform vaccine policy, clinical considerations for healthcare providers, and to the public

It should be noted that the Journal Editor and Sage issued an expression of concern for this study. The Editor and the publisher were alerted to potential issues with the research methodology and conclusions, and author conflicts of interest. Sage has contacted the authors of this article on this matter, and an investigation is underway. These authors have produced multiple studies that have been retracted, discredited, or flagged for false/misinformation. The senior author, Peter McCullough, has had his medical licenses revoked and has been involved in other controversies.

Subject: HHS FAQ on COVID-19 Schedule Change by Secretary's Directive
Attachments: COVID Vax FAQ_FINAL.pdf; COVID19 Recommendation FAQs_ References.pdf

Categories: 4

Deb-

As you are aware, HHS distributed a FAQ to support the Secretary's directive to change the Child and Adolescent Schedule and the Adult Schedule. The schedule changes moved vaccination for 6m-18 year olds to shared clinical decision making and removed pregnant women from both, moving them to "no recommendation/not applicable." As a reminder, no SMEs in NCIRD or NCEZID have seen the data memos/formulations that the FDA and NIH produced for the secretary to support this decision.

On Thursday, June 5, I was made aware of a FAQ that HHS had circulated to offices of Congress that discussed this decision (Attached). To my knowledge, neither NCIRD nor NCEZID had seen this FAQ until we requested it, having heard from others that it had ben circulated. NCIRD has already conducted a thorough summary of data on children and women and have synthesized it into one document that I have forwarded to iOD for their reference that addresses the inaccuracies of the FAQ.

Dan and I requested that the Immunization Safety Office review the HHS FAQ and has provided an analysis of the safety related statements made in this document. I have also attached this as a PDF and pasted below. It is my understanding that CDCW may have also requested such an analysis, but I wanted to send this to you for additional guidance on further sharing of this review of data/references used in this FAQ.

COVID-19 Recommendation FAQ: Review of References

1. **CLAIM:** In addition, after two years on the market, the safety and efficacy of the vaccines for healthy children younger than 12 or pregnant mothers has not been established by the manufacturers.

CITED REFERENCE: Package Insert and FDA Approved Patient Labeling - SPIKEVAX

CDC COMMENT ON CITED REFERENCE (FOR SAFETY): Postmarketing surveillance further characterizes the safety profile of licensed products, especially for groups within the general population excluded from clinical trials (in this case, pregnant women and children under 12). Hi Kevin,

We just discussed in IOD meeting, and we think it would be helpful to share with HHS comms the various campaigns we run so they can help us understand how they might want them to change. We are under the impression that we would not want to stop all flu communication during a severe flu season but rather make sure informed consent is encouraged. Is there an opportunity to share our content back up with HHS for further guidance?

Thanks,
Sara

Importance: High

Hello all,

I want to bring the email chain below to your attention. While we had previously been given the green light to proceed with paid communications, we have now been asked to take down paid campaigns related to the flu and vaccine promotion.

Given that this is the worst flu season in years, halting a campaign currently in the field presents significant reputational risk to the agency. There are also likely legal issues with contracts/appropriated funding.

Please see the attached spreadsheet for a rundown of existing paid media campaigns.

-kevin

Subject: RE: Request from HHS re flu and vaccines
Importance: High

You are correct. We were given the greenlight to continue with all ad buys that were already paid for in flight, but to regroup on anything that starts in March.
This request is a change and would mean pulling out of circulation things already paid for and in flight.

Attached is the spreadsheet that includes the list of the campaign buys and cost information that I have from ADCs.

To: Griffis, Kevin (CDC/OD/OC) <[redacted]>
Cc: Shockey, Caitlin E. (CDC/OD/OC) <[redacted]>
Subject: Request from HHS re flu and vaccines
Importance: High

Kevin,
Andrew Nixon/HHS gave me a call and asked that we pull out of circulation all campaign ad buys related to flu or anything encouraging shots or vaccinations.
He said this request came directly from the Secretary.
I noted that these have been paid for and are in flight and he acknowledged and asked that we work right away on things that are on social/online, magazines, and then will eventually need to do items that may be on bus stops or benches (if it includes those type of things).
He also mentioned that the plan is to transform to an informed consent campaign.

In looking at the campaign spend spreadsheet attached, I believe this impacts several programs. (Attaching the spreadsheet, in case helpful).

Seeking guidance on how best to proceed.

Thanks,
~Nicole

For awareness- Stefanie and Andrew called Nicole and asked her to pull down the wild to mild campaign
I asked Nicole to confirm that this is just the media buys and not our flu information on CDC websites that has the mild to wild logo but is focused on how high risk individuals can protect themselves
It would be helpful to understand too what needs to be done differently in future as this was message tested and audiences responded well to this campaign
When Nicole sends the requested memo to Stefanie I suggested she also include info on our metrics and testing

Stefanie, Andrew,
Thanks for the update.

I have moved forward with letting CDC leadership know that HHS has instructed we immediately pause the Wild to Mild flu campaign but the Get My Flu Shot campaign can remain in place.
I will also connect with the program and let them know that you would like a memo describing each campaign in full, including where it ran, cost, future, and how much has yet to been paid out.

Question for clarification – does the ask include pulling down flu content on the CDC website that is branded with Wild to Mild? For example, one-page highlights who are at high risk for flu and what individuals can do to protect themselves, including treatment. Or do you mean just pause campaign items in flight like paid and high impact ad placement? I checked in with the program and learned there are only 2 days left on the Wild to Mild paid ad buys. Double-checking if you would still like it paused.

Let me know if there is anything I am missing or did not understand correctly, as I was out running errands when you called.
Thanks,
~Nicole

Subject: RE: Request re flu campaigns/ad buys

Andrew,
Here are some of the flu campaign assets for February.

Note that there are two primary campaigns:

- Wild to Mild, which focuses on pregnant women and parents of kids
- Get My Flu Shot, which is a collaboration with the American Medical Association and the Ad Council

I have attached a few Wild to Mild assets from social media line ups.

The Ad Council assets are available here: GetMyFluShot | Homepage & Get My Flu Shot – No One Has Time for Flu

We also frequently promote graphics and prevention messages in other places as well, focusing on Health Care Providers, older adults, adults with chronic conditions, and the general public.

Let me know if you have additional questions or guidance.
Thanks,
~Nicole

Subject: Request re flu campaigns/ad buys

Andrew,
CDC leadership discussed and thought it would be helpful to share the various campaigns we run so you all could help us understand how you might want assets changed. They are under the impression that HHS would not want CDC to stop all flu communication during a severe flu season but rather make sure informed consent is encouraged. Is there an opportunity to share our content with you for further guidance?
Thanks,
~Nicole

To: Buzzelli, Matthew J (Matt) (CDC/IOD); Burns, Stuart (CDC/IOD); Witkofsky, Nina (CDC/IOD)
Subject: if helpful- re vaccines

From discussion this morning- sharing if helpful for TPs so that information is correct for the Secretary

https://www.chop.edu/vaccine-education-center/vaccine-safety/vaccine-ingredients/fetal-tissues

Can vaccines made using fetal cells alter a person's DNA?
Even though fetal cells are used to grow vaccine viruses, vaccines do not contain these cells or pieces of DNA that are recognizable as human DNA. People can be reassured by the following:

- When viruses grow in cells, the cells are killed because in most cases the new viruses burst the cells to be released.
- Once the vaccine virus is grown, it is purified, so that cellular debris and growth reagents are removed.
- During this process of purification, any remaining cellular DNA is also broken down. To learn more about DNA and vaccine, visit the "Vaccine ingredients – DNA" page.

Do vaccines contain parts of fetuses or fetal cells?
In order to grow viruses in the lab, cells need to be made into single cell suspensions, meaning they can no longer be grouped together in the form of tissues or organs. As such, vaccines do not contain "parts of fetuses."
Vaccines also do not contain fetal cells. Once the vaccine viruses are grown in the cells, the next step in the manufacturing process is to purify the vaccine viruses away from the cells and substances used to help cells grow. If you have ever picked blueberries, you can think of this part of the process as similar. While you are picking, you might get some of the blueberry plant — stems, leaves and even branches — in your berry bucket, but to use the berries, you remove all of those things, so your pie contains only the blueberries (and any other ingredients you choose to add).
This purification part of the process is important for two reasons. The first, and perhaps most obvious, is the manufacturing reason. From a manufacturer's perspective, an efficient process that results in the purest possible product makes the final product easier to characterize. However, as consumers, the second, and more important, reason matters more. A pure product will not introduce unnecessary components that could trigger immune responses or affect us in other ways.

Subject: Matt's Action Items

Hi All,

Here's what I'm tracking on.

Matt, I've added a new column to indicate if an item is for awareness of status vs. ready for a direct action by you. Also, for the ethics forms and Jordan's OF-8, I've gone ahead and attached the emails here so you don't have to go scrolling back through your inbox to locate them.

Action Items	Status	
ACIP member term extension	Email sent to Diane from on your behalf; no response yet	4/3/
Coordinated (with John Knox) emails to CDC and ASPR teams	John Knox sent email template for your review at 5:22 pm. Would like to coordinate sending in morning (proposed 8:00am)	4/4/
Jordan OF-8	Signature needed so he can start next week	4/4/

NIOSH lab closure/animal disposition memo	Deb to discuss OGC comments with Matt and then identify path forward to submit on time	4/4/
IRB member extension	Will have to you in the next hour or two	4/4/
OGE 278e financial disclosure report and updated ethics form	Emails with links/forms attached	4/4/
OARS HHS 520 for Nina	Email with links to system attached	4/4/
ASPR-CDC integration—high level picture	CDC/ORR and ASPR teams working to have something ready for Matt and John to review on weekend in advance of sharing with HHS	4/6/
Letter from Ambassador Eric Kneedler	GHC and Exec Teams working on bundled response to outreach from multiple Ambassadors	4/7/
Chamblee tour and NCIPC meeting--agenda, participants list	Draft agenda received; Abby to discuss with Matt, Stuart, and Deb	4/7/
NTE memos for HHS	Revisions received from Deb Lubar; Matt to review	4/7/
David Geier scientific ethics verification number	Flagged by Stuart in email sent 3:11pm Thursday, 4/3 –need to determine if David Geier has scientific ethics verification number and has taken required trainings to access CDC research data sets	4/7/
Review draft SOW for IOD Comms Contract	Vicki sent email with doc at 12:24pm Thursday, 4/3	4/7/
APHA attendance	Discuss next week (not urgent)	4/8/
Response to Karen Hacker	Deb Houry counseled not responding or responding using language that refers Karen to HHS HR.	4/8/
5 monthly Infectious Diseases Rapid Response Reserve Fund (IDRRRF)	OBPA signed off; Abby to review quickly for any flags	4/8/

Subject: VSD reactive talking points

Categories: 4

Hi all

Secretary Kennedy put out a statement on X yesterday about the Vaccine Safety Datalink. Given that there has been recent OGC involvement with VSD and the communication may generate media and exec sec/controlled correspondence queries for CDC, I wanted to share info that NCEZID pulled together as background if you are contacted. Thanks

Deb

Response to statements made about the VSD in https://x.com/SecKennedy/status/1931360039496712222

"In 1999, an in-house study of VSD showed an alarming and elevated rate for autism and neurological diseases among children receiving certain vaccines early in life. The CDC in-house researchers found an astronomical increased 11.35x risk in one run of the raw data and reduced that in a subsequent iteration to a still frightening 2.68x increased risk by unethically altering study protocols".

- We assumed that this statement refers to the preliminary screening analysis using automated VSD data, conducted by Epidemic Intelligence Service officer Thomas Verstraeten and presented at the 1999 EIS Conference; however, it is unclear as the relative risks presented in the abstract do not align with those in this statement.
- The final analysis showed no increased risk of autism. This analysis has undergone additional external reviews with the following conclusions:
  - IOM interpretation of study (2004):"given these strengths and limitations, and with the effect estimates, although nonsignificant, near or below 1, the study showed no association between TCVs [thimerosal-containing vaccines] and autism."
  - Re-analyses by Drs. Austin and Lally of Emory University at the RDC (2005)
    - Purpose: to resolve discrepancies between an initial unpublished report and the final publication, specifically by evaluating the impact of 6 differences in methodology used for the unpublished and final published report.
    - Conclusion: The researchers were able to duplicate the major findings of the study, and their overall conclusion was that the methodology used by CDC investigators was sound and that the findings are valid.

- Senate HELP Committee investigation (2009): investigated alleged misconduct by government agencies related to thimerosal vaccines and autism, and found that the following claims were unsubstantiated:
  - CDC did not convene the Simpsonwood Conference to cover up findings of causality
  - Dr. Thomas Verstraeten was not pressured into changing his findings
  - The CDC did not hide the Vaccine Safety Datalink from the public

- Because of the limitations of automated VSD data on assessing neurodevelopmental outcomes, two rigorous studies with primary data collection were conducted as a follow-up (neither of which showed evidence of an association between thimerosal-containing vaccines and autism or other neurodevelopmental outcomes):
  - Thompson WW, et al. Early Thimerosal exposure and neuropsychological outcomes at 7 to 10 years. *N Engl J Med.* 2007 Sept 27;357(13):1281-92
  - Price CS, et al. Prenatal and infant exposure to thimerosal from vaccines and immunoglobulins and risk of autism. *Pediatrics.* 2010 Oct;126(4):656-64. Epub 2010 Sep 13.

"CDC has repeatedly claimed to have lost the critical data underlying the research"

- The final, analytic database from the Verstraeten analysis was shared with HHS and NIH on March 14, 2025.
- The underlying data to the Verstraeten analysis are from the pre-2001 cycle files, which have not been lost. The existence of these archived cycle files has been repeatedly disclosed to HHS OGC as part of the investigation that was initiated on May 13, 2025.
- During interviews, HHS OGC inquired about other potential analytic datasets created by Verstraeten from the cycle files which are not the 'final' analytic dataset. For example, datasets before the exclusion criteria described in the manuscript (i.e., documentation of at least 2 polio vaccines by 1 year of age as a proxy for healthcare utilization at the HMO) were applied.
  - Extensive reviews of archived VSD files were undertaken, and there is no clearly labeled or documented dataset that appears to be *the* dataset that Verstraeten used to present preliminary findings at the 1999 Epidemic Intelligence Service Conference.
  - As described to HHS OGC lawyers, if there is interest in data that did not have these exclusion criteria applied, a new dataset would need to be constructed from the original cycle files; however, there are no guarantees that this would be an exact replicate of any earlier datasets created by Verstraeten.

"CDC has terminated the VSD data sharing program and taken draconian steps to prevent outside researchers from ever again accessing the VSD"

- The VSD data sharing program has not been terminated, as described here: Accessing and Using Data from the Vaccine Safety Datalink (VSD) | Vaccine Safety Systems | CDC.
- Two public-use datasets from VSD studies related to thimerosal-containing vaccines and neurodevelopmental outcomes are available to outside researchers and have been requested 27 times.
- In addition, external researchers may request access to VSD data from any published study for re-analysis through the NCHS Research Data Center.
- CDC is actively undertaking additional steps to make VSD data more accessible, including through creation of more public-use datasets.

"Beginning in 2001, CDC created an architecture of byzantine rules to block independent scientists from access. CDC also disaggregated the VSD data and put it under control of private corporations to further ensure that it could never be studied by external researchers"

- In 2001, the VSD implemented a Distributed Data Model (DDM) which allows VSD member healthcare organizations to assemble and maintain its computerized files on an on-site server and share analytic output and limited datasets.
- This model protects confidentiality of patient medical records at the member organizations, and allows organizations to retain ownership of their own source data.
- As described above, external researchers can request access to datasets from published VSD studies through the data sharing program.

"In 2002, the U.S. Congress Government Oversight Committee ordered CDC to allow Dr. Geier and his son to access the VSD data, which the agency maintains at enormous expense to the U.S. taxpayers. In extraordinary acts of insubordination, CDC repeatedly refused that Congressional order. When a frustrated Committee Chair, Representative Dan Burton, threatened to come personally to the CDC's Research Data Center (RDC) in Hyattsville to force the CDC to allow the Geiers to examine the data, the CDC responded that it would repel the Chairman with armed guards."

- Current ISO staff were not employed or engaged with this issue in 2002 when these hearings involving Representative Burton took place; therefore, we have no information on this purported exchange.
- We are unable to find documentation of these statements in publicly available sources.

"After two years and multiple Congressional subpoenas, CDC officials finally allowed the Geiers access. However, CDC continually obstructed the Geiers' ability to actually study the VSD. Among a long retinue of manufactured impediments, CDC assigned a pair of burly monitors to oversee the Geiers' every movement. Government officials whited out data before handing data sets to the Geiers. They forced the Geiers to review data in a windowless room heated to over 90 degrees Fahrenheit. They gave the researchers computers with no instructions on how to use them and no user interface. They wiped the Geiers' hard disks and destroyed their hard drives when the researchers temporarily left the study room. Ultimately, CDC officials sent letters to the HMOs that now controlled the data, falsely accusing the Geiers of misusing the data."

- The National Center for Health Statistics (NCHS) operates the Research Data Center (RDC) to provide access to restricted-use data from federal government agencies.
- The procedures in place through the RDC are designed to ensure that the confidentiality and privacy of medical record information of study participants are not compromised.
- The policies and procedures of the RDC are described in-depth at RDC website and apply to all researchers, and not selectively applied to certain researchers. As clearly stated on the RDC website, these include:
    - An RDC analyst supervises all visits.
    - Analytic datasets are created based only on the requested and approved variables. Therefore, data are not "whited out". Data are provided based on the approved variables.
    - RDC staff cannot assist the researcher with their analysis
    - Researchers cannot bring in any electronic communication devices.
    - As per RDC policies and procedures, no output will leave an RDC facility without review by an analyst. Any output must match the research questions in the approved application. In addition, researchers may only use their output and statistics in a way that does not pose any additional disclosure risks to participants.
- The RDC facilities (including the Hyattsville location) are all federal buildings, and therefore must comply with any federal standards related to building security, maintenance, and upkeep.
- In February 2004, CDC sent a letter (internal draft found in ISO archives) to the IRB Administrator for Northern California Kaiser Permanente informing her of concerns related to Dr. Geier's analyses at the Research Data Center in October 2003 and January 2004: potential breaches in confidentiality, execution

of unauthorized analyses, and renaming of files which would have allowed the researchers to leave the RDC with unauthorized files. These breaches risked violation of patient privacy that the Geiers had agreed to comply with.

"In 2005, the Institute of Medicine took testimony regarding the Geiers' ordeal and issued a scathing 140-page report with 27 recommendations for CDC to guarantee public access to the VSD. The CDC implemented none of these recommendations and continued to fight to keep the Geiers out of the VSD."

- The 2005 report "Vaccine Safety Research, Data Access, and Public Trust" is not a scathing review of the VSD; the report is balanced in describing the strengths and limitations of the VSD and data access.
- Many of the committee recommendations are now standard parts of the VSD data sharing program, including through the NCHS Research Data program. For example, the websites for these programs describe what data are available and the criteria for evaluation of proposals. Other recommendations related to archival of VSD study protocols, datasets, and outputs are currently in-place. Other recommendations related to making VSD data findings available to the public are also the current standard, as VSD data are routinely shared at public federal advisory committee meetings (ACIP, VRBPAC), and published in peer-reviewed literature.
- CDC continues to work to enhance access to VSD data. Efforts are ongoing to make de-identified datasets available from VSD studies, in addition to continued access to VSD data through the RDC.

As a result of CDC's efforts, David Geier is the only living independent researcher to have had access to the VSD.

- This is not accurate. For the two public-use datasets, 27 requests for these data have been made. Multiple secondary or re-analyses have been published for the 3 thimerosal-related studies from VSD:
    - Verstraeten, et al. Safety of Thimerosal-Containing Vaccines: A Two-Phased Study of Computerized Health Maintenance Organization Databases | Pediatrics | American Academy of Pediatrics. *Pediatrics.* 2003 Nov; 112(5):1039-1048.
        - Re-analysis by Dr. Harland Austin and Ms. Cathy Lally of Emory University at the RDC (not published but report available). In response to a Discover Order issued by the US Court of Federal Claims, the final dataset was made available to these researchers, who were able to duplicate the major findings of the study. The researchers concluded that the methodology used by CDC investigators was sound and that the findings were valid.
    - Thompson WW, et al. Early Thimerosal exposure and neuropsychological outcomes at 7 to 10 years. *N Engl J Med.* 2007 Sept 27;357(13):1281-92.
        - Smith MJ (University of Louisville), et al. On-time Vaccine Receipt in the First Year Does Not Adversely Affect Neuropsychological Outcomes | Pediatrics | American Academy of Pediatrics
        - Barile JP (Georgia State University), et al. Thimerosal Exposure in Early Life and Neuropsychological Outcomes 7–10 Years Later | Journal of Pediatric Psychology | Oxford Academic
    - Price CS, et al. Prenatal and infant exposure to thimerosal from vaccines and immunoglobulins and risk of autism. *Pediatrics.* 2010 Oct;126(4):656-64. Epub 2010 Sep 13.

Matt and John:
Thank you for your interest in CDC's available data related to vaccines and outcomes including autism spectrum disorder. As previously discussed, we are providing two de-identified, public use datasets to you. Here below are the publications which used those data:

- Price CS, et al. Prenatal and infant exposure to thimerosal from vaccines and immunoglobulins and risk of autism. *Pediatrics*. 2010 Oct;126(4):656-64. Epub 2010 Sep 13.
- Thompson WW, et al. Early Thimerosal exposure and neuropsychological outcomes at 7 to 10 years. *N Engl J Med*. 2007 Sept 27;357(13):1281-92.

In addition, we are also providing two additional datasets related to vaccines and autism spectrum disorder – one from VSD and one from what is now called the National Center on Birth Defects and Developmental Disabilities. These two additional datasets have not yet been fully de-identified and may contain direct or indirect identifiers that should be treated with caution to assure protection of privacy and confidentiality. Here below are the publications which used those data:

- Verstraeten, et al. Safety of Thimerosal-Containing Vaccines: A Two-Phased Study of Computerized Health Maintenance Organization Databases | Pediatrics | American Academy of Pediatrics. *Pediatrics*. 2003 Nov; 112(5):1039-1048.
- DeStefano, et al. Age at First Measles-Mumps-Rubella Vaccination in Children With Autism and School-Matched Control Subjects: A Population-Based Study in Metropolitan Atlanta | Pediatrics | American Academy of Pediatrics. *Pediatrics*. 2004 Feb; 113(2):259-266.

Below are the instructions to download these 4 datasets and other necessary documentation:

- [redacted]
- [redacted]

We are also attaching PDFs that provide additional information for each of the 4 datasets. Staff of CDC's Immunization Safety Office are available for any support needed.

The HHS Office of General Counsel has advised that CDC is legally required to maintain the confidentiality of personally identifiable information and other data points that could indirectly identify an individual. In order to assure compliance, any HHS employees, or other federal staff, who access these data must not re-release, share, provide access to, or otherwise make these data available to unauthorized users. Users of these data should also undertake the necessary security procedures to avoid inadvertent data breaches. If a need is identified to make these data available to external researchers, please notify us so that we can provide the necessary data use

agreements for external researchers, as indicated by the HHS Office of General Counsel in the memo dated March 13, 2025.

Applicable federal laws and regulations pertaining to these data include, but are not limited to:

a. Human subjects Common Rule 45 CFR Part 46
b. Assurance of Confidentiality, Section 308(d) of the Public Health Service Act (42 U.S.C. § 242m(d))
c. Privacy Act of 1974 (5 U.S.C. § 552a); and HHS Privacy Act regulations (45 C.F.R. Part 5b)
d. HIPAA Privacy Rule, 45 C.F.R. Parts 160 and 164

Thanks,
Dan

Thanks Karen
I don't think we should pursue a narrow focus on vaccines and autism- open to learning more about all of NIH's portfolio on autism if we are asked to do work on larger questions around autism, which are certainly important like environmental exposure and epigenetics, to understand what is driving increases

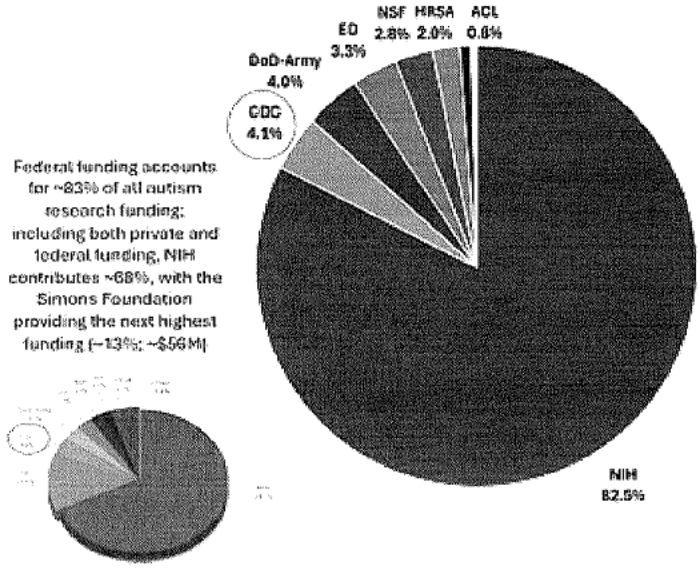
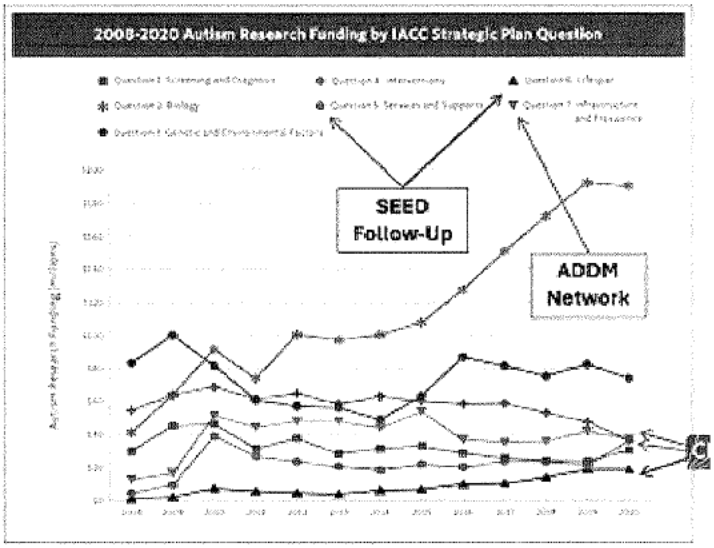
Subject: RE: ISO-NCBDDD coordination



Dear all,
As we look into how best to respond to questions about vaccine safety and autism, our group was looking at data from the Interagency Autism Coordinating Committee – as you can see NIH has the vast majority of funding and projects- it may be worth a meeting to understand what data elements they are collecting around vaccination as they have many large registries etc.

Best
Karen

CDC's Contribution to Federal Autism Research* Activities



Informed by the 2019-2020** Portfolio Analysis [LINK]
Conducted by the HHS Interagency Autism Coordinating Committee (IACC)

NIH funds 82.5% of federal autism research (~$285.5M)

Federal funding accounts for ~83% of all autism research funding; including both private and federal funding, NIH contributes ~68%, with the Simons Foundation providing the next highest funding (~13%; ~$56M)

*CDC considers ADDM, and moving forward possibly SEED Follow-Up, to be Public Health Surveillance activities rather than research
**Most recent data available from IACC

- *The Autism and Developmental Disabilities Monitoring (ADDM) Network funds ~$9M to 15 grantees to better understand autism prevalence*
- *The Study to Explore Early Development (SEED) funds ~$5M to 5 grantees address services and supports and lifespan issues*

Subject: update on VSD

Just wanted to send a quick update as I'm catching up on things from the weekend

- ***Briefing for Matt B***- Matt, Jen said you called with ?s about VSD on Friday; she and Dan will set up a briefing for you on Monday to do a deeper dive; the FAQ document I sent you and Susan I think is also a helpful resource. I've read it a few times and now get what the data can and can't do
- ***VSD dataset initial request***- 4 datasets were sent to NIH last week as requested. When we first met two weeks ago (CDC, NIH, HHS) the proposed plan was to have this competed for a third party independent group for analyses- I haven't heard anything further re this- didn't know if either of you had. From the most recent discussion Dan had with John Powers, I think John and potentially other contractors at NIH will be doing the analyses. Our CDC team is available if there are further ?s from NIH on the datasets.
- ***New requests for prospective VSD data***- Dan and team met and worked through options and he will follow up with NIH on Monday. As I mentioned on Friday, this would likely need IRB approval and a study question given how these sites and data systems are set up. I think there is a misperception that there is a cache of EHRs sitting in the data hub vs it being a passthrough for studies. CDC team has found workable option for NIH to move forward (ie developing study question and protocol)- this is what protocol and path CDC follows when we are looking at studies.
- ***NIH autism datasets***- CDC NCBDDD and vaccine scientists met with NIH national autism coordinator and NIMH scientists Friday to discuss coordination around recent autism requests at CDC including 1) NIH review of previously published CDC datasets, and 2) determining if NIH (or IACC) is aware of any ongoing NIH cohorts studies examining the etiology of autism. The NIH autism scientists were not aware of NIH leadership requests to CDC and had not been engaged in any discussions re autism with their leaders. They indicated most of their NIH data would be >10 years old as they aren't looking at vaccines in these datasets given the science base developed over the past 20 years. We were unable to get additional information during the call as the NIH autism scientists said they needed to talk to Dr. Memolli before they would engage in any technical discussions with CDC about NIH datasets that are available or other collaborations re autism.

Sorry for long email- trying to synthesize a few different trails and pursuits. Happy to discuss more at our check in tomorrow too

Subject: Call with NIH Friday

Deb,

ISO and NCBDDD met with Susan Daniels, the National Autism Coordinator, and several others within NIH's NIMH on Friday 3/21/3025 for a short call.

The purpose of the meeting was to discuss coordination around recent autism requests at CDC including 1) NIH review of previously published CDC datasets, and 2) determining if NIH (or IACC) is aware of any ongoing cohorts studies examining the etiology of autism. NIMH indicated they were not aware of any of the data review requests and would need to get back to CDC for a technical discussion at a later date, as this was not something they had discussed with their Acting Director.

Please let us know if you have questions- it was a short call.

Best,
Dana

Cc: Braden, Chris (CDC/NCEZID/OD); Meyer, Sarah (CDC/NCEZID/DHQP/ISO)
Subject: RE: Prep for Visitor

Hannah, Stuart:
As we prepare for David's access to the VSD files, I wanted to get your thoughts on a couple of issues I feel would help protect the Secretary and lead to an overall more successful evaluation of the data.

The first is regarding study ethics. I'm concerned that David will not be signing an assurance of confidentiality. While I recognize that OGC has determined that David, acting as the direct agent of the Secretary, is not legally bound to sign the assurance, there is still an ethical best practice that signing the assurance would help meet, and would help protect the Department. In particular, the VSD files being provided to David are not de-identified and contain over 100 million records with personally identifiable patient information of clinical encounters, diagnoses, and treatments. I see a problem here that we are allowing less assurance than is currently in place, given that all CDC staff and VSD investigators accessing the data have signed the statement of confidentiality. Additionally, the assurance of confidentiality has supported a longstanding trusted engagement with the data providers and co-investigators. The assurance assumes that partners are informed of studies being conducted by any site across the network. Failing to maintain that trusted relationship introduces risk for the department if VSD partners withdraw from the network, ending an extremely valuable tool for evaluating vaccine adverse events which is critically important for achieving the Secretary's priorities.

A second issue is regarding scientific practice. Over the many years of the VSD, a strength of the effort has been the shared scientific exploration and adherence to gold standard scientific methods. Best practices being implemented in VSD have required investigators to develop a study question and a proposed protocol which is presented to the network for discussion. This process helps refine the approach to data collection and analysis so that the work is optimized to answer the vaccine safety question. For this current effort, we do not have clarity on the study question, the analytic plan, the study endpoint, the timeline for completion, the use of parallel work to demonstrate replicability of findings, collaborators, review/clearance, or publication product. Some greater transparency on the study would help me to understand how the process adheres to the current scientific practice of the VSD, and the practices used by CDC investigators. Deviation from this process poses a reputational risk to HHS and CDC. Following current expected scientific practices for the VSD evaluation would strengthen the analysis and findings, helping to meet the Secretary's objectives.

Look forward to discussing.
Thanks
Dan.

Subject: RE: VSD next steps

Hi Reyn
Thanks so much for looping me and Nina in. I had checked in with Stuart and Dan earlier last week and they had indicated things were progressing and hadn't flagged anything other than Stuart didn't think the pre 2001 data were that useful (even with the PII). Unfortunately I will miss you on Thursday- I am out on leave Thursday/ Friday for a last quick vacation before school starts. Happy to hop on a call earlier this week with you to see where I can help; or we can debrief after your Thursday meeting so I can learn of next steps and what is needed. A few quick thoughts based on your email below

- Secretary buying the VSD data- does this mean pre 2002; pre 2025; or system going forward? Has OGC and office of science weighed in on what can/ can't be done and any contract modifications? I can add them to the Thursday meeting if helpful.
- Accelerating research- we are always interested in supporting new queries and explorations. Look forward to hearing the outcome of the meeting. I remember from the meeting we had with Hannah these site studies can take some time to stand up, but likely more helpful as data can be collected prospectively on outcomes of interest.
- Re technology and data- we have two offices, OCIO and OPDHST. OCIO is more the back house and does support technology; OPDHST is more the work with states and programs. With the IHS reassignments, the chief information officer, chief data officer, and forecasting lead were all placed on administrative leave and with RIFs we did lose some of the IT team with the planned HHS centralization and shared services. We have put actings in these leadership roles and are prioritizing laterals and details where we can too. OCIO reports to the COO (who is also acting) and OPDHST had been working directly with Susan (and Mandy before that) on many of these items given her interest and expertise. Having Susan on board will be great as I know she will want a human capital needs assessment done (and Christa our acting COO has starting looking at this) and will have thoughts re data and AI for the agency. Re the budget, Christa and Rachel have

focused on the SBC presentation and worked on the proposed initiatives; my understanding was the data budget briefing was more focused on some of the prior expenditures and a detailed breakdown of the line so I think the priority was on the SBC and FY 27 budget for this week. I haven't seen the requests to Jen/ OPDHST as I think these are going directly to her and she's been working with you and Matt VP but I can check in with her re status.

We look forward to having you meet with Susan in the next few weeks as we learn more about her priorities too so our team can focus on HHS and CDC Director initiatives.

Subject: VSD next steps

Dear Deb and Nina:

I spoke with Dan Jernigan yesterday about a next step related to the VSD databases stage 1 and 2.

After a lot of work with the team at CDC we finally were able to share David Geier's program files and connect him with the database from home.
We also learned that the 13 PIs have large data sets in petabytes of data which CDC cannot host or fully analyze. The Sec would like to understand a plan to modernize how the IT systems work (4 days to connect David) and know what is needed to up date the storage and analytics capacity. The goal is to bring past data sets into CDC and move to allow them to be public once the original studies are done. This is a requirement of the EO. Dan agrees in principle with caveats to assure we remove PII. This is also a deficiency. We don't have a rapid way to do that and we were initially told the pre2002 data might take months. Then we were told that it might take weeks. We are two weeks in and I don't think it has started. This is not a criticism of the teams it's a question of how we build that functionality. This needs to be clearly defined and added to the budget. We have one day. Also the Secretary wants to buy all the VSD data and put it in the office of the Secretary. This may be a leap but there are other ways to achieve this but today CDC is not ready to take big leaps. I am being told we must find a way to take big leaps. I need your help on this.

We also need to see all this in the budget process and I will be making sure that we discuss it next week. But the budget is moving and we need decide. If the centers can't do this quickly, OMB has given the director 5% budget moving authority. We will use this process instead.

A second point is that the Secretary is committed to accelerating the process of working with the VSD team and doing more research. I suggested to Dan that he think about how to expand staff and budget at VSD to answer key questions the Secretary wants. As a first step of this work, Dan agreed to host me, Stuart, David, and Lyn and his team on Thursday. I'll fly early AM and we will meet around 10:00am for a couple hours. Dan wanted to make sure you and Nina are aware of this.

We still are struggling to get OPHDST information to present to the Dep Sec. Matt VP has been working to refine it. It still needs work. The team must perform at a higher level. Three requests are out. One to survey each state and another to share the budget to know what is funded and what resources can still be programmed. The third is the 5 slide presentation to S2. Finally we are being told of loss of staff yet staff I understand are being brought in from other parts of CDC. We need to do a through review of the

health IT mission and determine what staff we need. Some may not be fit for purpose. We need to strengthen capabilities with outside contractors including for AI. Days not weeks, weeks not months. The leaders doing data sharing at Dep Sec are waiting on us to show up fully. The train has left the station and soon it will be challenging to sustain the narrative that CDC can help set up health data across AHA and CDC. IOS is open to CDC leading and Susan wants it. Right now we are getting feedback from the Deb Secs team that CDC is not keeping up. The team it seems is just not able to keep to the expected pace. Who is accountable for assessing the tech needs across the agency? What is the process of updating systems? How are these needs moved through a process to the budget? Who oversees performance of this team? This needs to be refined Monday as we have budget meetings on Tuesday and Wednesday. It's disappointing these three requests with the office mentioned above are lingering weeks and months.

I'd like to have lunch with you and Matt to go over a few other things as well.

I also want to make sure we have budget to restore the Journal of EID. Susan also wants this.

Thanks and looking forward to having Susan soon.

Reyn

Subject: Follow up on ASD Briefing Document
Attachments: Autism Study Action Plan_revised_3-10-25_5pm.docx

Good Evening,

First, I want to thank you for the way you came together last night and this morning to help inform the Increasing Transparency in Autism Action Plan proposal for HHS—and for answering all my questions as we pulled together the final version.

I'm attaching a clean version of the final document for your records.

For now, the immediate focus for next steps is on Actions 1 and 2. Specifically:

1. CDC will take action to make de-identified VSD data sets openly available
2. CDC and NIH will develop a study protocol for re-examining VSD data for an association between vaccine administration and ASD, and then the two agencies will convene a study group to execute that study protocol

Matt Buzzelli will oversee CDC's involvement, and CDC and NIH will identify agency leads for study protocol development.

Please don't hesitate to reach out if you have any questions.

Thanks
Abby

Increasing Transparency in Autism – Action Plan

OVERVIEW

Autism spectrum disorder (ASD) rates in the United States have increased substantially since the 1980s. Like ASD itself, the specific mix of biological, social, and environmental factors driving this rise are complex and not well understood. Greater awareness has contributed to observed increases in ASD rates, but it does not fully explain them. Some have posited a link between vaccines and ASD; however, repeated reviews by the IOM and others have found no evidence of a link between the two[1].. Nonetheless, concerns about vaccines and autism persist, and these affect public acceptance of vaccines.

As part of its *Executive Order, Establishing the President's Make America Healthy Again Commission*, the Administration has charged HHS to chair a USG-wide Commission charged with making recommendations to the President. The initial mission of the Commission shall be to advise and assist the President on how best to exercise his authority to address the childhood chronic disease crisis—including increasing rates of ASD.

To support this broader initiative, HHS--in partnership with CDC, NIH and FDA--will implement the following actions

1. identify an independent study group to re-examine any scientific evidence for an association between vaccine administration and ASD;
2. make existing data from VSD available to the study group and the broader public;
3. identify a second study group to examine a more complete set of factors associated with ASD—including, but not limited to, administration of vaccines--using additional available datasets; and
4. launch a new, prospective study to examine any possible associations between prenatal and postnatal exposures, including on-going vaccine administration, environmental exposures, infections, epigenetics, and autism and related neurodevelopmental outcomes.

Actions 1 and 2 are narrowly scoped to address remaining public questions around vaccine safety and links between vaccine administration and ASD. Actions 3 and 4 build on that initial work to fill high-priority knowledge gaps to evaluate how much potential ASD risk factors contribute to increased ASD prevalence in the United States.

These proposed actions will better ensure HHS resources are used to comprehensively detect and address what is contributing to the increasing rates of autism, as well as maximize access to developmental services.

BACKGROUND

Action 1: Identify independent study group to reexamine VSD data

[1] The Institute of Medicine reviewed over 200 studies in 2004 and more than 1,000 studies in 2011. A systematic review of 67 studies and a meta-analysis of 10 studies have also arrived at the same conclusion.

CDC will identify two or more study groups of nationally recognized vaccine and ASD experts that can scientifically and objectively evaluate potential associations between vaccines and autism and neurodevelopmental outcomes. CDC and other HHS operating divisions will identify appropriate contracting mechanisms to implement the studies, and where funds may be available for supporting this work.

Action 2: Make existing VSD data available

CDC will make available immediately, to the independent study groups, existing datasets prepared to address the possible association of ASD with vaccines. VSD has previously collected data related to vaccines and neurodevelopmental outcomes (including autism spectrum disorder). These datasets along with codebooks and other necessary documentation from these studies can be made available upon request to external researchers for re-analysis.

Action 3: Identify a second independent study group to evaluate a more complete set of factors associated with ASD using secondary data

HHS, in partnership with CDC, NIH, FDA, and other agencies as applicable, will identify additional expert study groups to conduct retrospective (Action 3) and prospective (Action 4) studies of possible associations between prenatal and postnatal exposures, including on-going vaccine administration, environmental exposures, infections, epigenetics, and autism and related neurodevelopmental outcomes. CDC, NIH and FDA have funded research and collected data related to potential drivers of ASD, and the agencies will identify and make relevant datasets available to the study group for analysis. Similarly, the agencies will support the study group as it seeks to identify other potential data sets that could be used to evaluate associations between ASD and vaccination and other environmental factors, correlation with genetic, proteomic, metabolomic, and other biophysiological data, geographic variability in prevalence, and other critical variables.

Action 4: Conduct a new, prospective study

HHS will launch a new study to evaluate the underlying etiology of ASD and related disorders through NIH and CDC. NIH could focus on epigenetics, neuroanatomy, clinical aspects, and cohort enrollment and CDC could collect population level and prenatal and postnatal exposure data. The study will collect primary, prospective data including vaccination and other environmental factors, correlation with genetic, proteomic, and other biophysiological data, geographic variability in prevalence, and other critical variables. To ensure transparency and credibility of the study, an external study oversight committee would be formed, to include nationally recognized scientific experts as well as community members and other stakeholders. Committee review of study protocol would ensure transparency and buy-in for any scientific results.

IMPLEMENTATION:

Action 1

CDC will identify two or more independent study groups to re-analyze existing datasets from VSD assessing thimerosal-containing vaccines and autism and neurodevelopmental outcomes. Existing contracts and grants will be leveraged to ensure that the study group can be formed expeditiously (likely within a few months), and that the re-analysis can be completed in a timely manner. Potential options (pending additional discussion) include:

- The Clinical Immunization Safety Assessment (CISA) Project, a network of vaccine safety experts from 8 medical research centers, through an existing IDIQ contract (the most rapid option).
- Commissioned reanalysis through the Global Vaccine Data Network, a multinational, investigator-led research network, through an existing grant.
- Commissioned reanalysis through analytical research groups; possible existing or new CDC mechanisms and timelines would need to be identified.

Action 2

CDC currently provides access to de-identified datasets from VSD studies on autism and neurodevelopmental to external researchers through a formal request process detailed on the VSD data sharing program website. Approximately 20 requests for use of the de-identified VSD datasets have been made by external researchers. Documentation such as codebooks and technical reports are also available on the VSD website.

Available datasets include those described in the following publications:

- Price CS, et al. Prenatal and infant exposure to thimerosal from vaccines and immunoglobulins and risk of autism. *Pediatrics.* 2010 Oct;126(4):656-64. Epub 2010 Sep 13.
- Thompson WW, et al. Early Thimerosal exposure and neuropsychological outcomes at 7 to 10 years. *N Engl J Med.* 2007 Sept 27;357(13):1281-92

CDC will work with the study group convened under Action 1 to access these data sets and provide interpretive support as needed.

Currently, CDC's data use agreements (DUAs) with VSB sites require IRB review and approval and a signed use form by proposed researchers. These requirements are intended to support transparent use of VSD data in a research study while meeting CDC's obligations to protect patient confidentiality. However, they also serve as checks on open data access and analysis of VSD and ASD associations.

CDC will work with HHS and OGC to revisit its DUAs with VSD sites to assess how to expand the availability of these de-identified data to interested users through public websites.

Action 3

HHS, in partnership with CDC, NIH, FDA, and other agencies as applicable, will identify and fund a second expert study group to examine links between ASD and a range of potential

exposures and risk factors, including, but not limited to, vaccine administration. With input from programmatic subject matter experts and data acquisition experts, the study group will identify other potential datasets and data assets of interest to support their work, as well as mechanisms to secure those data sets. In the case of data sets accessible through existing HHS contracting or similar mechanisms, a contract modification may be sufficient. If a new mechanism (e.g., a BAA) is considered, additional time may be necessary to set up the study group, define and secure data assets, and conduct analyses.

Depending on the scope of the work, CDC estimates total costs for data acquisition/contracts could range from $1M to $10M. Data storage and compute costs would range between $250,000 to $2M depending on number of data sources, hosting parameters, and other factors.

Ultimately, there are significant limitations to the secondary use of healthcare data assets and acquisitions not designed to examine associations, and thus need to determine which datasets, as well as what study questions could be meaningfully examined with such datasets and sources. Potentially could do updates similar to Vaccines are not associated with autism: An evidence-based meta-analysis of case-control and cohort studies – ScienceDirect and Safety of Vaccines Used for Routine Immunization of US Children: A Systematic Review | Pediatrics | American Academy of Pediatrics.

Additional activities, as described under Action 4, could address these limitations.

Action 4

To best assess the etiology of ASD, prospective studies from large, multi-site cohorts with primary data collection on a variety of potential environmental exposures using comprehensive ASD and developmental assessments, as well as biologic specimens, would be needed. Possible approaches include NIH leading clinical studies and supporting collaboration across HHS, given their strong infrastructure for ASD research, leveraging existing CDC partnerships (e.g., Autism and Developmental Disabilities Monitoring [ADDM], VSD) or competitive extramural research grants through NIH for external researchers. The timeline and budget for a comprehensive, prospective study would need to be developed based on final study objectives, but it is anticipated to cost several million dollars to implement.

Potential design approaches include:

- **Large, multi-site population-based cohort study** that begins following mothers from early pregnancy through childhood and in numerous geographic communities. Existing CDC contract mechanisms that could be leveraged still need to be explored.
- **US government-funded autism studies and surveillance networks:** These data sources currently do not collect vaccination history, and it is unlikely that detailed vaccination history of sufficient completeness or quality can be retrospectively collected and linked to enrolled participants. However, going forward, inclusion of vaccination history could be explored.
    - CDC: Autism and Developmental Disabilities Monitoring (ADDM) Network or Study to Explore Early Development (SEED), through existing CDC mechanisms.
    - CDC will explore other potential options with other federal agencies (e.g., NIH), with potentials for interagency agreements.

- **Electronic health record (EHR)-based systems to identify a cohort:** These systems would serve as a base population from which to recruit a cohort for standardized neurodevelopmental testing and additional data collection on potential exposures, early intervention services and educational records. Options potentially include:
    - **Vaccine Safety Datalink:** through existing IDIQ contract
    - **Other EHR-based systems with CDC relationships (e.g. COSMOS, United Health-Optum Labs, Health Verity, Truveta)** will be explored but are likely not viable options given that systems are de-identified, with limited ability to collect additional data, conduct neurodevelopmental testing, or collect specimens on patients.

Subject:	CDC Autism Study Action Plan
Attachments:	Autism Study Action Plan_09Mar2025.docx
Importance:	High

Dan, Dana, Jen –

We need to provide HHS with an Autism Study Action Plan tomorrow AM.

I have used our previous inputs and expanded based on some additional feedback.

Could you please review the document and provide input on all – I have highlighted areas I need help with to complete before our HHS meeting tomorrow at 11 am.

If you could please send all your inputs to Abby, Sara, and Deb **no later than 9 am tomorrow**, we can integrate and be prepared to brief HHS at 11 am.

I am available this evening and tomorrow morning should you have any questions. [redacted]

Please don't hesitate to call – no question is too small.

Thank you!!

Susan

Increasing Transparency in Autism – Action Plan

OVERVIEW

CDC recommends initiating four immediate actions to increasing transparency and scientific evidence related to possible associations between childhood vaccines and autism spectrum disorder (ASD). CDC, in partnership with NIH and FDA, could immediately implement the follow actions 1) identify independent study group to examine any potential scientific linkage between vaccine administration and autism; 2) immediately make available to study group existing data from VSD; 3) identify and make available to the study group additional datasets at CDC, NIH, FDA, and other sources that can provide increased scientific data to inform examination of potential linkage; and 4) launch an new, prospective study to examine any potential linkages between on-going vaccine administration and autism.

BACKGROUND

Action 1: Identify independent study groups

CDC will identify two or more study groups who can examine existing data related to ASD, including vaccination and other potential influencing factors. CDC will the appropriate contracting actions to be taken and from where the funds will be drawn.

Action 2: Use existing VSD data

CDC will make available immediately to the VSD study group datasets related to vaccines and ASD. VSD has previously collected data related to vaccines and neurodevelopmental outcomes (including autism spectrum disorder). These datasets along with codebooks and other necessary documentation from these studies can be made available upon request to external researchers for re-analysis.

Action 3: Identify additional existing datasets and perform meta-analysis to identify any other potential drivers of autism

In additional to CDC, NIH and FDA have funded research and collected data related to potential drivers of ASD. The agencies will work together to identify relevant datasets and facilitate access to the study group. CDC will fund an additional study group under the agency's data analytics group to aggregate as appropriate and perform a meta-analysis of existing, relevant data that could provide critical information related to the causes of autism. Data could include vaccination and other environmental factors, correlation with genetic, proteomic, metabolomic, and other biophysiological data, geographic variability in prevalence, and other critical variables

Action 4: Conduct new prospective study

CDC will launch a new study to evaluate the underlying etiology of ASD and related disorders. The study will collect primary, prospective data including vaccination and other environmental factors, correlation with genetic, proteomic, and other biophysiological data, geographic variability in prevalence, and other critical variables. To ensure transparency and credibility of the study, an external study oversight committee would be formed, to include nationally recognized scientific experts as well as community members and other stakeholders. Committee review of study protocol would ensure transparency and buy-in for any scientific results.

IMPLEMENTATION:

Action 1.
Dan/Mike/Sara:

- Please describe how you would establish a team to use the VSD data. Can we establish more than one study group to ensure independence and transparency?
- Please provide an estimate for when the study group will be established
- Please provide any necessary HHS actions needed to launch the study in a timely manner

Action 2.
VSD is a collaborative project between CDC and 13 healthcare organizations currently covering approximately 13.5 million people. VSD uses electronic health record (EHR) data from member sites to monitor safety of new vaccines and detect adverse events in near-real time, as well conduct rigorous epidemiologic studies on vaccine safety topics.

Available Data from VSD on Neurodevelopmental Outcomes
De-identified datasets from VSD studies on autism and neuropsychological outcomes can be obtained by external researchers. Documentation such as codebooks and technical reports are provided on the VSD data sharing program website.

Available datasets: Why can't we make the public use files from these two previous studies available on our website? Let's try to get to yes with any of the appropriate safeguards in place.

- Price CS, et al. Prenatal and infant exposure to thimerosal from vaccines and immunoglobulins and risk of autism. *Pediatrics.* 2010 Oct;126(4):656-64. Epub 2010 Sep 13.
- Thompson WW, et al. Early Thimerosal exposure and neuropsychological outcomes at 7 to 10 years. *N Engl J Med.* 2007 Sept 27;357(13):1281-92

CDC staff are available to assist with interpretation and access as needed.

Are Any Other VSD Data on Neurodevelopmental Outcomes Available?
Since its completion of the studies referenced above, VSD has not conducted any new prospective studies on the association between vaccines and neurodevelopmental outcomes, including autism spectrum disorder. All other subsequent studies from VSD (e.g., Barile, et al., Iqbal, et al., DeStefano, et al.) utilized the aforementioned de-identified datasets. However, VSD

investigators have identified learning, communication, or developmental disorders as potential outcomes of interest for studying the safety of the childhood immunization schedule.

Process to Access Data:
Investigators accessing these data are required to sign a Data Sharing and Use Agreement (DSUA). Signed agreements are received at publicdataset@cdc.gov, whereupon the data are securely transferred to the user. CDC staff are available for any needed assistance.

Action 3:

Jen (with support from Dan/Dana and teams):

- Please provide a contracting approach to fund a data analytics project out of your shop – I think you can probably sub-contract from an existing contract. I can help scope the SOW.
- Please add other datasets that we think useful beyond VSD (e.g., VAERS, UK Biobank, public and private sector claims data, other private sector data.etc) – the sub-contractor(s) will add more
- Please provide a timeline for when we can get the contract in place
- Please provide a timeline for when we think we can get the work started

Action 4:

Dan/Dana

- Please provide information on how we would launch this study
- Would we include NIH and FDA?
- Would we wait for the results of Actions 2 and 3? (I think yes, but please correct me)

Subject: RE: contract

Ok so some responses here--

- Verify that this activity is covered under the scope of work for David's contract – yes covered
- Confirm that the contracting company is aware of this activity – yes confirmed
- Confirm who the COR for David's work is (i.e., who is the FTE with oversight over this activity))—I will handle all administrative actions of the contract with the COR. You can view me as the Project Manager for OS.

Subject: RE: SES Performance Review

Hi Malia
I talked with our CDC leadership team and my performance progress review was already done last month. Delighted to meet with Matt Buckham as I haven't worked with him yet, but a few clarifications that may be helpful:

- I was the acting CDC Director the week of Jan 20th per COOP and delegation of authorities by Dr. Cohen until Dr. Monarez was named acting. After that, I was not named acting CDC Director. Susan was acting CDC Director from late Jan to late March and then Matt Buzzelli attended HHS meetings for Susan (and the Secretary mentioned this at a hearing) and the Secretary signed policy memos such as ACIP in the absence of an acting CDC Director.

Adding CDC team back- **Matt Buzzelli can weigh in as well**
Thanks all, just let me know how you wish to proceed. Apologies if I've made this more complicated than intended
Deb

Hi Dr. Houry,

HHS is under the impression that you were the acting CDC Director prior to Dr. Monarez's confirmation. This is why you received the request.

HHS response:

The IOS front office contacted Dr. Houry because she was in the acting role as Director of CDC initially. All OpDiv/StaffDiv heads performance plans were being handled by the IOS front office. Since Dr. Monarez was just confirmed, it is best that the IOS conduct the progress review for Dr. Houry and Dr. Monarez can conduct her closeout.

Subject: Policy Approval Process

Susan,

Let's get on a call this week to discuss in depth, but until we can connect directly, I wanted to elevate the absolute need for political review of major policy decisions at CDC. As you are aware, there are key priorities of the White House and the Secretary underway with your team at CDC and we want to ensure that IOS and CDC political leadership all have eyes on the decisions for approval/changes before they go into effect.

Please alert your staff that our IOS Counselor Dr. Reyn Archer and your Chief of Staff/Deputy Chief of Staff both need to review any major policy decision coming out of CDC before changes occur. I'll let Dr. Archer provide guidance on what constitutes "major", but until then please err on the side of caution. When it comes to the personnel changes of senior leadership or policy sensitive positions, the White House Liaison office should also be included.

Appreciate all you do to serve in your role and help facilitate this process. We will talk soon.

Make America Great!

Matt

Subject: RE: request from Stuart

Stuart,

We met with Sudevi Ghosh (OGC) and she is assisting with creating a straightforward DUA to share the restricted access dataset for the Age at First MMR Vaccination and Autism study. As soon as the DUA is ready, it should be able to go to Mr. O'Connor & team. We will share an estimated timeline as soon as we have it.

So far, we have identified the data and associated documentation and they appear to be compiled by the original research team in 2004. This is the data set referenced in your first request, but it is actually not a "public use" dataset. Although this dataset does not include identifiers like dates, names, or locations, it does include information on uncommon health conditions. Office of Science confirmed these data are protected by an Assurance of Confidentiality, so the DUA needs to comply with the parameters of the AOC. The historical DUA for these data (from 2004) involves submission of a research proposal for CDC review and included outdated language and terms that would seem onerous today. Sudevi suggested developing a basic updated DUA would be most practical and we agree.

Sincerely,
Matt

Subject: request from Stuart

Hi all- please see below for request from Stuart:

Matt and Eric,

There is a researcher that HHS (Dr. Reyn Archer) has asked us to assist in getting access to the data that was used for the DeStefano et al (2004) study related to MMR and Autism. The researcher is Daniel O'Connor ([redacted]

Would you please provide Daniel with the public use dataset? I understand that this can be provided relatively quickly and if so, would you be able to communicate directly with Daniel to share the process/data with him?

A second request is whether the original datasets that the study data originated from are available for access? If so, please share the process for accessing that data with me, Dr. Archer and Daniel.

Thank you for your help on this.

Subject: RE: Firefighter Program Issues At NIOSH--Two Programs Affected

Hi all,

We just talked with HHS about these issues. Here is what I know and what we are being asked to do.

- John Howard – HHS OGC is working through an options paper about what the options are for bringing him back. The ball is in HHS OGC's court about this.
- RIFs – We are being asked to bring all NIOSH staff in "critical functions" until their RIF end date (either June 2 or June 30, depending on what a RIF notice stated). Kelley, what is the best way to determine what are considered critical functions? We know the firefighters, mining, and lab folks are considered critical. What do we need to do to ask these folks to come back? From a business standpoint, I imagine OCIO and OSSAM will also need to be involved but I want to make sure I understand how it works from a programmatic and HR standpoint first. Kelley, HHS is also asking that all stop work on studies, projects, etc. be reversed. What needs to happen to make this possible? Hannah Anderson is asking for this to be done today (the directive given, the process started, etc.).

Longer term (not for today). Other questions that came up and actions we need to take are:

- Staff support – Reyn (our HHS counselor) wants a list of all divisions, staff, and functions within NIOSH to help determine what functions are critical and how to navigate them. I'm thinking we could use the Morgantown description along with a staffing list as a model, but let me know if you already have something you'd recommend using. I think the staffing list could be separate and we may want to think about the specific fields we'd want included. I'm thinking something that gets to expertise/function will be important for that staffing list.
- For all of the functions that have been eliminated through the RIFs, do we know of other parts of the agency or other parts of government that can do this work longer term? Could any of it be done through consultancy or contracts? This is a longer term question, not a today question.
- Does the firefighter investigation program include looking at cyanide exposures? Does that work sit in Cincinnati?
- For the laboratories, are our lab folks actually doing the lab work or do they reference/contract it out?
    - What can be joined up with other labs elsewhere in the longer term (like agriculture, etc)?
- Reyn also wants to get input from the firefighters, coal miners, and governors in various states that are most relevant to these activities about what they'd like to see done differently? He wants to be sure we are working holistically to solving actual problems, not assume we are doing what's needed without engagement.

Would it be helpful to talk as a group about how to navigate this?

Thanks,

Sara

Hi Kelley,

I just talked with Matt, and he said that we can't bring back all of the staff we're requesting but there is a strong desire to bring back the WV staff. Also, are all WV staff needed or would there be a way to consolidate? I think the next step is to look at 1) did the RIF get run in a way that would allow us to bring back Morgantown staff only (copying Nate to see what he thinks), 2) what would we lose in the other sites if we don't bring back all of the mining program, and 3) knowing that the RIF was run with full admin codes and this might not be allowed, is there any way to bring back a smaller group of folks in WV? Are there critical functions (not considering admin code) that could be brought back that would allow us to do the critical mining work in Morgantown without bringing back everyone?

Please let me know if you want to discuss.

Thanks so much,
Sara

Hi all,

Here is what I've pulled together using recent docs. Please see what might be missing and add/edit as you see fit. Also, let me know if you think I got any numbers wrong. See if you think what I'm proposing for

admin functions works and if you'd add anything else. Kelley, I'm thinking we could try to bring back any functions in the NIOSH OD that are critical for these programs and don't exist in NCEH. Pam, I'm hoping you can add some program and expertise info in alignment with what we have for NIOSH. Your edits and feedback are very much welcome and appreciated. I've turned on tracked changes just so we can all follow edits. Thank you!!!

Sara

Sara and Rachel, I need a list of our programs (like the one above) that covers all firefighter programs, all miner programs (black lung) and whatever program we administer that involves Lead. I need to know how many FTE's and whether they were RIF'd, including the WTC program. The goal is to consolidate the programs administratively (if possible). We need to identify the key employees to operate these functions. Can they be consolidated? Is the above list exhaustive of our programs that involve Firefighters and Miners? Stefanie will be calling me this afternoon to discuss. Sorry to bother you on a Sunday.

Cc: Holloway, Rachel (CDC/OD/OBPA) <[redacted]>
Subject: RE: Firefighter Program Issues At NIOSH--Two Programs Affected

Here is what was sent to the Hill on mining and firefighters. The mining program is eliminated in Passback. The firefighter cancer registry is still funded in the passback, but the staff were all riffed. I'm copying Rachel to see if she knows how the firefighter fatality investigation program is funded. I can't figure that out from the Passback info I have and I'm not sure what line it's supported out of. Rachel, do you know?

Mining Program -

- 141 FTEs
- 30 FTE's RIF'd

- 108 FTE's received RIF intent notice - Effective Riff date provided in the notice is June 30th. They would receive Riff notice on May 1st. Unless there is action to reverse this notice, these people will be RIF'd.

This work will not continue unless these individuals are reinstated. The Mining Program aims to eliminate mining fatalities, injuries, and illnesses through research and impactful solutions. Personnel located in Spokane, WA and Pittsburgh, PA have extensive knowledge and experience with above ground and underground mines, including coal, metal and critical mineral mines. Personnel possess training and advanced degrees in mining engineering, material engineering, civil engineering, and geophysics and have expertise in ventilation, roof stability, and explosive environments.

Firefighter Fatality Investigation and Prevention Program and the National Firefighter Registry (NFR) for Cancer (Cincinnati and Morgantown).

- For Firefighter Fatality Investigation Program- 22 FTE's, with 7 FTEs Rif'd and 7 receiving Rif intent notice
- For NFR for Cancer-33 FTE's, with 10 FTE's Rif'd and 19 receiving Rif intent notice

NIOSH conducts investigations of firefighter line-of-duty deaths to formulate recommendations for preven ting future deaths and injuries. Established by Congress, the NFR for Cancer administers and manages the NFR for Cancer with over 20,000 firefighters voluntarily enrolled. The program employs staff with expertise in occupational medicine, industrial hygiene, epidemiology, exposure assessment, and respiratory health. Both programs employ former firefighters who have unique and extensive knowledge of fire service rules and procedures for fighting fires and understand medical standards for firefighter fitness for duty.

Subject: Firefighter Program Issues At NIOSH--Two Programs Affected

Firefighter Fatality Investigation and Prevention Program (Division of Safety Research in Morgantown)

- Anticipating the loss of 7 out of 8 budgeted firefighter investigators
  - 3 Anticipated lost during probationary period
  - 2 Employment final offers rescinded
  - 1 Final offer not extended due to freeze
  - 1 Anticipated retirement in 2025 (this person is not available for new investigations because he has a backlog of cases)

Effects: Major slowdown in conducting fatality investigations given only one investigator.

National Firefighter Registry for Cancer (Division of Field Studies and Engineering in Cincinnati)

- Anticipating the loss of 5 out of 5 firefighters doing targeted Registry enrollment
  - 1 Firefighter terminated in probationary period
  - 4 Firefighters tentatively participating DRP (1 is "on the fence")

Effects: Slowdown in enrolling new firefighter registrants.

Let me know if you need more details.

Subject: RE: CDC Data Sources for Examining Trends in Profound Autism

Hi Bill,

Thank you for that additional clarification, which allows us to provide more specific details. The bottom line is that we have some intermediary files that precede the analytic dataset, but we do not have copies of original source data.

To the best of our understanding:

- The original source data for vaccination information was located at schools and those records never left the schools. For this study, MADDSP staff abstracted information from those records on site using Epi Info and the data were then transferred to the CDC mainframe. As you probably know, the CDC mainframe was retired over 10 years ago. We have not found any of the original Epi Info files in our searches.
- At some point before the mainframe was retired, these data were moved from the mainframe to the consolidated statistical platform (CSP) and converted into SAS files. There are some SAS files that still exist on the CSP that are related to this project, but we do not know their completeness or relation to the original or analytic datasets.
- There are no electronic project manuals or data dictionaries accompanying the files on the CSP; it is our understanding that these materials were only available as hard copies. Some of this documentation may still exist in hard copy files here, but records retention policy for research such as this would have been 11-20 years, so it is possible that this is no longer available.

We hope this information is helpful. Please let us know next steps and how we can be supportive as you take on this task.

Thanks,

Suzanne

Suzanne,

This is also relevant and important because Diana Schendel used the same data source to publish a 2007 study that examined a subgroup of autism cases referred to as "isolated autism". (See Table 3.)

Secretary Kennedy is particularly interested in having us examine isolated autism cases more closely using the DeStefano study data.

Thanks,

Bill

Subject: RE: CDC Data Sources for Examining Trends in Profound Autism

Suzanne,

Thank you for for the additional information.

We already know that the public use dataset for the DeStefano et al (2004) exists. Eric Weintraub from ISO has already made that that dataset available to HHS.

We are more interested in whether the original data sources exist. The vaccine records for the cases and control subjects were obtained from school vaccine records. The data from GA birth certificates were also merged into that dataset prior to proving me the cleaned dataset.

From the published manuscript:
***"Methods.* A case-control study was conducted in metropolitan Atlanta. Case children (*N* _ 624) were identified from multiple sources and matched to control children (*N* _ 1824) on age, gender, and school. Vaccination data were abstracted from immunization forms required for school entry. Records of children who were born in Georgia were linked to Georgia birth certificates for information on maternal and birth factors."**

FYI - I did all the analyses for the study and was provided a cleaned dataset with cases and controls already matched and the birth certificate data already merged. HHS would like access to the original data sources and would like to merge the data using those datasets to test additional hypotheses. If those datasets do not exist then we might need to create new datasets. As you know, the time and effort to create new datasets would be very time consuming and we would prefer not to have to start from scratch.

Thanks,

Bill

Subject: RE: CDC Data Sources for Examining Trends in Profound Autism

Hi Bill,

Thank you for that clarification. It is helpful for us to have a better understanding of the request so that we can be maximally responsive. The data for the 2004 DeStefano paper were pulled together in 2014 in response to a previous request and have been saved as a package by our colleagues in NCEZID/DHQP/ISO. These data were recently shared with HHS/NIH as part of a larger data transmission including VSD data, to respond to a request from HHS leadership.

As you are likely aware as a co-author, the 1996 MADDSP data were linked to vaccine records for this special study. The MADDSP data files themselves do not contain information on vaccination. For this reason, we think this existing data package is the fastest way to meet your needs. An additional advantage is that it was compiled by people who had greater familiarity with this special study at a more proximal time to the original analysis.

Please let us know if we can be of additional assistance or support.

Many thanks,

Suzanne

Subject: RE: CDC Data Sources for Examining Trends in Profound Autism

Suzanne,

Yes we are trying to find out if the source data for both the cases and control data are still available. It's a starting point for beginning to design new studies and test alternative hypotheses from the original DeStefano et al (2004) study.

At this point, I don't think a conference call will help us locate data sources. We just want to know whether the data sources are still accessible. So at this point you still have access to the MADDSP 1996 autism case data but you are uncertain if the source data for control subjects still exists. If you still have access to that data we would like to know it still exists. If you don't have access to that data, then we will need consider finding alternative data sources for the control subjects.

Again, this is a high priority for Secretary Kennedy, so if you could dedicate the time and staff necessary to find this data ASAP, we would greatly appreciate it.

Thanks,

Bill

Dear Bill,

Deron has accepted a new position as Division Director in DTBE and I am stepping into the role of Acting Center Director so would like to be part of the conversation.

The DeStefano paper states that the autism case data were derived from 1996 MADDSP data, but the controls were identified separately. We can work with you on the process for sharing the 1996 MADDSP data, however it may be helpful to discuss with you what specific data you need. Are you available for a call on Monday 6/16 at 9:30? If not, we can find another time that works.

Thanks,

Suzanne

Hi Bill,

The team has looked into your second question. Prior to 2000, the only other MADDSP surveillance data that included autism of which we are aware is the 1996 MADDSP Surveillance Dataset; we have access to those data.

In case it is of interest, data from 1996 MADDSP were published in the following article:
https://jamanetwork.com/journals/jama/fullarticle/195703

Best regards,

Deron

Subject: RE: CDC Data Sources for Examining Trends in Profound Autism

Bill,

Appreciate the interest in profound autism. To respond to your questions:

1. The profound ASD paper made use of the ADDM Network pooled dataset for surveillance year 2000 (the first year of the ADDM Network), which includes year 2000 data from MADDSP.

2. As mentioned above, we have the 2000 MADDSP data included in the ADDM pooled data for surveillance year 2000. Given the age of the data and staff changes in the years since these data were used, I cannot give you an immediate answer about 1996-1999 MADDSP data within the branch or center. It will take us time to look into this; we will let you know what we find. As a reminder, this work is proposed to move to AHA.

Sincerely,
Matt

Subject: follow up re Bill's email re detail

Importance: High

Stuart
As I mentioned to you in the hallway this afternoon, I'm disappointed in the unprofessional and uncalled for behavior of Bill Thompson related to his 50% detail. You asked me to help move a detail for Bill along and I have been working with OCOO and 2 Centers to make it happen as quickly as possible. I have not been part of the discussions with HHS/S1 about the scope of the detail, which is why I asked the Center to propose language for a scope of the detail that was explicitly very open to feedback.

My reputation is that of a collaborative leader who implements and gets things done. I do not appreciate Bill including the Secretary, HHS OGC, and HHS Chief of Staff on his response about the scope of the detail. This felt like a direct attack on me without first providing any input about the draft scope. I would have appreciated you or Bill revising the scope so we could easily move forward with the detail rather than bringing such high levels of HHS leadership into the discussion.

I will look to you for next steps on how you would like to handle providing this feedback to Bill and assuring HHS that we were working closely to ensure this detail was appropriately navigated. CC'ing Matt as well as I shared Bill's email with him and my concerns re professionalism.

Brooke,

NCBDDD put together this statement of work without input from me, Stuart Burns (CDC OD) or Secretary Kennedy. This SOW has nothing to do with the tasks that Secretary Kennedy has assigned me to carry out. It is actually one of the most absurd SOWs I have ever seen.

So, I am going to request that my detail be delayed until we have a new CDC Director and I will continue to carry out tasks as assigned to me by Stewart Burns and Secretary Kennedy. I will also continue to keep Division of Viral Hepatitis scientific work moving forward as part of my current DVH position.

Thanks,

Bill

Subject: Stuart- please review scope of work for detail

Hi Stuart
Please review the scope of work for the detail Suzanne has pulled together- I have not been in your conversations with Bill or HHS so we want to make sure this is accurate/ meets your expectations.

Is there any additional senior leader engagement in oversight and if so, what that will look like? Also, given RIFs to NCBDDD we wanted to confirm if any staff resources or needed- we assume he will be working alone and will not require support from current staff as he has been an expert in this area.

Please review and make any edits- once you are done, this should be able to be processed

Thx
Deb

Subject: FW: Starting steps for hiring process: Mark Blaxill Consultant/Expert SGE for the CDC Office of the Director
Attachments: CDC 209 (F) Distinguished Consultant Policy eff July 2020.pdf

Hi Stuart
Attached is the Title 42 requirements. A Center director over a scientific Center needs to be a T42 in order to supervise the division directors who are also T42. If it's a practice based center like PHIC, then a waiver for SES could be requested. The attached PDF mentions PhD or MD, publications, technical expertise, and other requirements. HRO has said Mark doesn't meet these requirements.

Given that NCBDDD is proposed for moving to AHA and would not be a Center in as soon as 2 weeks, I would suggest talking with Tom Engels and Dorothy Fink re a role in the maternal/child health section in AHA that could work on these issues. Happy to make the e-intro if helpful.

And, will send you the other email that has ?s re position description

Hi Deb,

Sharing the below reply from HRO. Unfortunately, the Title 42 hiring mechanism is not an option. Let me know if you'd like us to walk over to discuss further.

Subject: RE: Starting steps for hiring process: Mark Blaxill Consultant/Expert SGE for the CDC Office of the Director

Good morning, Clarissa.

Mr. Blaxill is not qualified to be a Distinguished Consultant, so that appointment type is not an option, see the screen shot above showing what types of education are required for a Distinguished Consultant. Mr. Blaxill has a MBA.

Here is the definition/purpose of a distinguished consultant under title 42:

---

3. POLICY

A. Coverage

Appointments under 42 U.S.C. § 209(f) may only be used to fill scientific positions, and selections must be made by an official who has been delegated the appropriate authority (See Section 3.F.), of this policy for more information on the authorized recruitment activities under 42 U.S.C. § 209(f).

Here are the qualfications required for distinguished consultants:

Subject: flu vaccines and pregnancy
Attachments: Safety of Thimerosal-containing influenza vaccines in pregnancy.docx

Hi Susan,

Attached is the document Deb and I worked with NCIRD and NCEZID on re: the issue of thimerosal in the flu vaccine and its relationship with pregnant women. Please let us know if you have any questions prior to sharing with HHS and if this format looks OK to you.

Thanks,
Sara

1) Which flu vaccines include thimerosal?

Multi-dose vials of flu vaccine contain thimerosal. This season, Sanofi and GSK have multidose vials that include thimerosal. The vaccines are:

- Sanofi: Fluzone® TIV (NDC 49281-0641-15)
- Seqirus: Afluria® TIV (NDC 33332-0124-10)
- Seqirus: Flucelvax® TIV (NDC 70461-0554-10)

These vaccines are licensed for ages 6+ months. More can be found at FDA's website, which includes specifics on concentrations Thimerosal and Vaccines | FDA.

2) What percentage of the flu vaccine administered or on the market has thimerosal?

CDC doesn't have doses administered information about flu vaccines, but we do query manufacturers to provide projections about how many doses they anticipate manufacturing each season. For the current, 2024-2025 season, U.S.-licensed manufacturers projected manufacturing approximately 148 million doses of flu vaccine. They estimated that approximately 6% of the doses manufactured would be the above listed thimerosal-containing vaccines.

3) Where are flu vaccines with thimerosal going nationwide?

Thimerosal is only in some multi-dose vials so it will be places that purchase multidose vials for administration of groups (such as mass clinics). CDC is checking in IQVIA data to see if we can pull any more information. CDC does not collect this information directly.

4) What is the history of the research on the safety of thimerosal?

Thimerosal-reduced and thimerosal-free flu vaccines became available in 2002 and 2003. At the time, the ACIP did not support for a preferential recommendation for use of this product in any population, including pregnant women. The committee felt that risks of thimerosal-containing influenza vaccine in pregnancy were unproven and the benefits of influenza vaccine exceeded that risk, if present. In 2004, the recommendation was revisited and remained unchanged.

Safety of Thimerosal-containing Influenza Vaccines During Pregnancy

- No safety concerns related to thimerosal-containing vaccines have been identified, other than rare hypersensitivity reactions.
    - Prevention and Control of Seasonal Influenza with Vaccines
- Available evidence suggests that prenatal exposure to thimerosal-containing vaccines is not associated with neurodevelopmental disorders, including autism spectrum disorder:
    - Prenatal and Infant Exposure to Thimerosal From Vaccines and Immunoglobulins and Risk of Autism | Pediatrics | American Academy of Pediatrics (2010): Case-control study from the VSD network of 256 children with autism spectrum

disorder (ASD) and 752 matched controls. Concluded that prenatal and early-life exposure to ethylmercury from thimerosal-containing vaccines and immunoglobulins was not related to increased risk of ASD.

- Early Thimerosal Exposure and Neuropsychological Outcomes at 7 to 10 Years | New England Journal of Medicine (2007): Cohort study from VSD network of 1,047 children aged 7-10 years that assessed the association between neuropsychological performance and exposure to mercury during the prenatal and neonatal periods and the first 7 months of life. Results did not support a causal association between early exposure to mercury from thimerosal-containing vaccines and immune globulins and deficits in neuropsychological functioning at age 7 to 10 years.

- Specifically for thimerosal-containing influenza vaccines, data from the Netherlands suggest that vaccination during pregnancy with a thimerosal-containing H1N1 vaccine was not associated with adverse pregnancy or infant outcomes.
  - Safety of vaccination against influenza A (H1N1) during pregnancy in the Netherlands: results on pregnancy outcomes and infant's health: cross-sectional linkage study - Maas - 2016 - BJOG: An International Journal of Obstetrics & Gynaecology - Wiley Online Library (2015): Among 1,920 pregnant women who completed questionnaires linked with the Netherlands Perinatal Registry, growth, developmental scores, and infection-related healthcare visits did not differ between pregnant women vaccinated in the 2nd or 3rd trimester with thimerosal-containing H1N1 vaccines and unvaccinated women.
- A recent systematic review did not identify an association between influenza vaccination during pregnancy and adverse childhood health outcomes, including neurological, behavioral, or developmental outcomes, among children aged <5 years.
  - Early Childhood Health Outcomes Following In Utero Exposure to Influenza Vaccines: A Systematic Review | Pediatrics | American Academy of Pediatrics
- Furthermore, the Institute of Medicine reviewed over 200 scientific studies that examined thimerosal-containing vaccines and autism, concluding that studies "consistently provided evidence of no association between thimerosal-containing vaccines and autism."
  - Immunization Safety Review: Vaccines and Autism | The National Academies Press
- Many other studies have assessed maternal influenza vaccination and demonstrate overall safety, including several CDC studies:
  - Trivalent inactivated influenza vaccine and spontaneous abortion - PubMed
  - Association of spontaneous abortion with receipt of inactivated influenza vaccine containing H1N1pdm09 in 2010–11 and 2011–12 - ScienceDirect
  - Inactivated influenza vaccine and spontaneous abortion in the Vaccine Safety Datalink in 2012–13, 2013–14, and 2014–15 - ScienceDirect
  - Inactivated Influenza Vaccine During Pregnancy and Risks for Adverse Obstetric Events
  - Monovalent H1N1 influenza vaccine safety in pregnant women, risks for acute adverse events - ScienceDirect

- Adverse events in pregnant women following administration of trivalent inactivated influenza vaccine and live attenuated influenza vaccine in the Vaccine Adverse Event Reporting System, 1990-2009 - ScienceDirect
- Reports of cell-based influenza vaccine administered during pregnancy in the Vaccine Adverse Event Reporting System (VAERS), 2013–2020 - ScienceDirect; Surveillance of adverse events after seasonal influenza vaccination in pregnant women and their infants in the Vaccine Adverse Event Reporting System, July, 2010 – May, 2016 - PMC

Opportunities for Further Exploration

- While a small percentage of flu vaccines contain thimerosal, the ACIP or CDC could consider explicitly noting that pregnant women can opt to get non-thimerosal containing vaccine during seasonal flu vaccination as part of shared decision making with their provider.
- Further study on this issue would be difficult because of the low percent of vaccines that contain thimerosal.

Subject: Website of Concern for IOS Notification

Hi Susan, Matt, and Nina –

We were alerted to a website that looks very similar to the CDC website: https://cdc.chdstaging.org/. We also received an article related to this: https://open.substack.com/pub/infoepi/p/cdc-clone-site-rife-with-false-vaccine?r=1ydpy&utm_medium=ios. We notified OGC (Kenya Ford, copied here) and she recommended we try to confirm the source before we determine how to proceed. She also suggested we notify IOS (Diane, Stephanie, Hannah, and Andrew). Would one of you like to do that or do you want that sent up through ASPA channels? I'm also copying Nicole and Jamila for awareness.

Of note, this could be both impersonating a government website and misusing our trademarked logo, so we may need a cease and desist to address.

Thanks,

Sara

Please advise on what should be done about this and who to notify? Should this be flagged for FTC and HHS/OS? Thanks

Hi all
I see the note re HHS autism- wasn't aware about this until tonight- NCBDDD let me know that they have already received an inquiry from Reuters on the CDC MMWR ADDM (they are vetting through comms channels) but not sure how this would have happened as our CDC SMEs did not give any embargoed copies to the media. Has HHS shared embargoed copies of the CDC report? If so, this would have been a draft version and not a cleared version

Sharing draft action items in case helpful for today's afternoon meeting. Refined list to come later as usual

Action Items	Status	

CDC Role-Based Training--Cybersecurity	Must complete by April 15th or system access will be revoked.	4
Night book	Pending receipt	4
Ethics Training	OS OGC sent email indicating you must complete initial ethics training (IET) within 3 months after your start date. Next available instance is April 21, from 12:30 - 2:00. Email from Kimoy Ellis (came 11:57am on 4/9/25). Linda placed hold on calendar	4
New Role/Title for Nina	Move Nina to a single role/ position description.	4
Budget Leave Behind (Graphic)	Tasked to Rachel, Will, and Abby to develop--group will meet Monday afternoon	4
FY23 Thefts, Loss, and Releases RTC	Review and approve Report to Congress and associated letters (links available in email linked to action item title)	4
Kody Performance Plan	Created by Jennifer Norton and available in PMAS (see email sent at 9:16am on Friday, 4/11)	4
Review draft SOW for IOD Comms Contract	Put on hold while HHS does their review of consolidated comms functions.	4
Secretary Autism Press Conference	Nina and Stuart leading CDC support for HHS materials, talking points for Secretary. Press release 1:00pm Tuesday; press conference Wednesday morning	4
STAC Reports	Received review/clear request. Deadline for HHS submission is 4/16.	4
Complete additional CDC mandatory trainings	Flagged as overdue by OCS--all should be accessible in EASI: 1) 2024 Emergency Preparedness Training- due date: 03/20/2025; 2) CDC Information Security for Executives- due date: 03/15/2025; 3) CDC Overview of Federal Records Management- due date: 03/20/2025; 4) HHS Initial Ethics Orientation- due date: 03/20/2025	4
HHS Contract Efficiency Review	Received updates for 4/14/2025; will update again before 4/16/2025	4
Confirm interest in APHA attendance so can submit conference memo	Teams have reached out to indicate that, if you want to go, we need to confirm and get into approval systems	4
Matt's annual performance plan	Need to complete and submit	4
WH Weekly Report	First draft shared by OCS. Due to HHS by 4:00pm	4
Weekly report to HHS	Prepared and ready	4
Kody AL	Request made in EASI	4
ACIP Transparency Plan--Memo Materials for HHS	Tasked to Stuart and Abby to pull together	4
Policy alignment and big opportunities briefers for Secretary	Meetings set or leaders from 4 CIOs (ORR, OPHDST, NCEZID, OS/OGC) to get them started on developing product that indicate 6-month plans for advancing Admini priorities, big ideas, and associated asks for HHS in 4 key areas: readiness/response (domestic and international stage); data; emerging ID or safe food/water (transition big ideas); new mechanisms for public private partnerships, esp. with venture capital funds/interested investors. 6 month plans to indicate how we will advance Admin priorities; big ideas/asks = additional ways we COULD advance	~ d

	priorities, and what we'd need to make that happen. Additional background: a. How we plan to advance Admin priorities b. Where we could go big/different, and what that would take (how Sec could help us move from "step by step" to "step change" c. Readiness/response (positioning ourselves as a global response leader—branded projection of soft power)à Kate, Ian, Henry, Deb H (pull from ASPR-CDC integration vision and plans) d. New mechanisms and approaches for public private partnership, e.g., with venture capitalà Deb Truss, Deb H, Sam Posner, Noah Aleshire e. Infectious disease (resurrect transition big ideas)à Dan J, Deb H, and his team f. Data and CDC as the source of truth for what's happening in nations health, as well as data for resilience, signal detection, rapid action at home (and abroad?)

Hi all

Just wanted to share the below FB post from Trump's prior surgeon general. Our autism program has received quite a bit of concerns after the Secretary spoke yesterday. And, although autism is moving to AHA as the Secretary mentioned- the CDC budget was decreased for that work and HRSA's line was cut. There were a few irregularities too on the slides that our staff would have suggested presenting differently. I know our program and scientists want the Secretary and his messages to land successfully without distraction. In prior administrations, TPs, slides, etc were sent to programs and science for review to help with this. I hope we can move to this collaborative approach moving forward.

Subject: FW: Two questions: ELC Funding and VFC

Hi Kenya – you provided me this very helpful answer the other week – today we are hopping on the phone with the State of Texas – who as I understand it – still is interested in potentially receiving money. Can you join us today for the pre-brief with CDC? I added you to the invite.

Ken

---

2. What legally needs to happen or should be considered before CDC would communicate to a state (such as Texas) that they can ask for ELC money that could be used for Measles testing?

Presuming this is not related to the recently pulled back COVID funds, there are two main options.

The first option is that the ELC recipient could submit a recipient-initiated request for supplemental funding, where the recipient asks for additional funding to undertake an activity considered to be within the scope of the existing NOFO. In general, a recipient always has to ability to submit a request for supplemental funding if

needed, whether for an emergency need or to continue work that they are currently funded to execute. If CDC concurs with the ask, CDC will need to provide new (i.e., supplemental) funds. This largely depends on the ask and whether there is available funding.

Second, the ELC recipient could undertake a post-award action. In that situation, the ELC recipient could go into their existing ELC budget/award and identify unobligated funding and seek to redirect those funds to focus on measles testing. The ELC recipient should work with their CDC ELC program official and their CDC grants management official or specialist to ensure those funds are available, and, if so, available for this specific use, and/or whether there needs to be any agency prior approvals to redirect those funds. Arguably, the ELC award's scope would allow for measles testing. However, in a budget year, if money needed to be moved from certain already-specified budget categories, that could be worked out between the ELC recipient and the respective CDC staff.

In addition, apart from the ELC award, the state may also have other awards from CDC that they could tap into, depending on what is meant by testing and surveillance and the scope of the NOFO. The state should again talk to their respective grants folks to see if the awards are in their scope.

If the request does pertain to the recently pulled back COVID funding, as of now, recipients have been notified that those funds are no longer available for any use. Even if they had been available, as COVID dollars, as a matter of appropriations law, there would need to be a showing that the proposed use of the funds had a nexus to the underlying purpose of the appropriation (i.e., if COVID dollars, there would need to be showing of a nexus between COVID and the proposed use for measles testing).

Received.

I believe the vaccines used for VFC is based on ACIP's schedule, but will look into how that might affect removal.

As for ELC, I believe all states receive that grant funding, so it may be a matter of looking at the scope of their existing grant and asking for the ability to use the funds for that purpose (if they can't already).

But let us look into both questions and confirm and add any info that is needed.

Subject: Two questions: ELC Funding and VFC

Hi Kenya,

Two questions for you:

1. What legally needs to happen or should be considered if a vaccine is going to be removed from the VFC program at CDC?
2. What legally needs to happen or should be considered before CDC would communicate to a state (such as Texas) that they can ask for ELC money that could be used for Measles testing?

Subject: some talking points about statement on moving vaccine injury program to CDC if asked (from Secretary's interview on Fox)- and issues for consideration

Key points:
Secretary Kennedy on Fox News mentioned transferring vaccine injury compensation to CDC. We are not aware of any proposed reorganization for this and flagging that this would have the potential to create several unintended consequences. This is especially true if multiple vaccine activities lose their autonomy and are combined with a single organizational unit. Some concerns include:

- **Misperception** by vaccine recipients, healthcare providers, and the public that vaccines are not safe;
- **Confusion** for vaccine recipients and the public on how to request compensation for possible vaccine injuries versus how to submit an adverse event report;
- **Real or perceived conflicts** of interest related to vaccine safety, effectiveness, and injury if the functions are combined into a single organizational unit;
- Delayed processing of compensation claims resulting from **limited resources and staff**.

More Specifics:

- It is important that Vaccine Safety remain a neutral, independent function – one that is separated organizationally from vaccine recommendations and information and from compensation for vaccine injuries.
- Co-locating VICP with CDC's Immunization Safety Office would lead to confusion about the distinction between these two separate programs, leading to false/incorrect reporting and the potential for patient safety issues. For example, if individuals don't understand the difference between reporting an adverse event after vaccination through VAERS and submitting a petition under the VICP, or if they believe that by submitting a VAERS report, they could potentially receive compensation, this provides incentives to falsely or incorrectly report adverse events, which would skew vaccine safety data and hinder CDC's ability to identify and respond to a true safety signal. Additionally, if individuals are not clear that submitting a VAERS report and a petition under the VICP require separate actions, an individual could miss an opportunity to submit a claim for and/or receive compensation they may be owed.
- By co-locating vaccine safety and effectiveness programs and vaccine injury compensation programming in the same organizational unit, there may be a perception that one vaccine program's outcomes and findings will influence the other programs. For example, there could be a perception that the agency may not be fully transparent about its vaccine safety findings for fear of increased claims and resources required to administer vaccine injury compensation programming. These perceived conflicts of interest could impact CDC's rigorous efforts around transparency and program integrity.
- The U.S. vaccine safety program has been consistently underfunded. By combining it with an extensive vaccine compensation program with its own history of limited resources and more

30(b)(6) Deposition of

DEPARTMENT OF HEALTH AND HUMAN SERVICES

through GAREY RICE

having been sworn, testified as follows:

EXAMINATION

BY MS. HINSON:

Q Mr. Rice, can you state and spell your name, for the record, please?

A My name is Garey Rice, spelled G-a-r-e-y, last name R-i-c-e.

Q And do you understand that today you are testifying on behalf of the Department of Labor about topics listed in the deposition notice?

A Department of Labor?

Q Sorry, Department of Health and Human Services.

Apologies, it's been a long day.

A HHS.

Q Yeah. So I've got a couple of ground rules to hopefully make things go as smoothly as possible today.

First, please continue to give

verbal answers instead of shaking or nodding your head, that just makes it easier for the court reporter to get a clear transcript; can you do that?

A Yes.

Q It's important we don't speak over each other. So I will try to let you finish and if you can try and let me finish that would be great; can you do that?

A Yes.

Q Are you represented by counsel today?

A My HHS counsel.

Q And DOJ, as well?

A Yes.

Q Your counsel might object to a question, that's fine, he's making an objection for the record, but unless he specifically instructs you not to answer you should just go ahead and answer; can we agree to that?

A Yes.

Q And if at any time you need a break, just let me know. I ask, though,

if you do want to take a break, you just answer any question that's pending at the time you ask for it; can we agree to that?

A Yes.

Q If you don't understand a question, just let me know and I'll try to rephrase it, but if you don't let me know I'm going to assume that means you understand it; is that fair?

A Yes.

Q Along the same lines, if at any point during the deposition you remember that you forgot to say something earlier or you want to give a more complete answer, please just let me know and we can put it on the record, so not a problem, but please just let me know; does that work?

A Yes.

Q Do you understand that you're testifying under penalty of perjury today?

A Yes.

Q Any reason that you cannot give

19173c2b-8370-4ccc-b770-46fbda9e23d5

complete and truthful testimony today?
A No.
Q Did you speak to anyone in preparation for your deposition today?
A Yes.
Q And who was that?
A My attorneys.
Q Did you speak to anyone besides your attorney?
A No.
Q Did you review anything to prepare for this deposition?
A Yes.
Q And did you bring any documents with you today?
A The only document I brought was the -- the actual response to the Court -- the supplemental response to the, I guess, the plaintiff's --
Q Interrogatories?
A Yes -- interrogatories, that is it.
Q And are you familiar with this lawsuit?
A Yes.

19173c2b-8370-4ccc-b770-46fbda9e23d5

Q And without revealing any communications you may have had with your attorneys, what do you know about this lawsuit?

A Basically what I read in the documents, the concern is basically understanding what the DOGE role at HHS was for the work that we're doing there for government efficiencies.

Q I wanted to just, like, identify a couple of terms that I'm going to use today.

First, if I refer to DOGE I'm talking about the US DOGE Service and the USDS Temporary Organization, collectively; does that work?

A Yes.

Q And when I'm talking about the DOGE team affiliates, that's people hired by or detailed to HHS since January 19th, 2025; does that work?

A Yes.

Q And I'm sorry, that's not even complete.

Since January 19th, 2025 to

work as part of the DOGE team; is that clear?

A Yes.

Q Okay. Great.

MS. HINSON: Can we mark this as Exhibit 1.

(Exhibit No. 1 was marked for identification.)

BY MS. HINSON:

Q All right. So you've just been handed what's been marked as Exhibit 1, which is the deposition notice for today's deposition.

And do you want to look at page 5 of that? And are you prepared to testify about topic two, except for access to and use of HHS sensitive systems?

A Yes.

Q Great.

So we spoke a moment ago about the DOGE team affiliates, and I'm just going to read a list of names to make sure we're talking about the same people, those are Amy Gleason, Brad Smith, Luke

Farritor, Edward Coristine, Marko Elez, Kyle Schutt, Conor Fennessy, Zach Terrell, Rachel Riley, and Jeremy Lewin; are you familiar with those names?

A Yes.

Q And given the -- based on the definition I gave earlier, are those people all DOGE team affiliates?

A Yes.

Q Since January 19, 2025, has anyone else worked at DOL as an employee -- or, gosh, sorry -- HHS as an employee or detailee while simultaneously being employed at DOGE?

A So simultaneously employed?

Q At DOGE?

A -- at DOGE? So what I'm saying is that a lot of those employees are detailed from other agencies to HHS.

Q Mm-hmm?

A So not necessarily employees of DOGE.

So I know, like, Amy Gleason and Brad Smith are dual appointees at DOGE and HHS.

Q So aside from the people that I already listed, is there anyone else working at HHS who's also employed at DOGE?

A No.

Q And aside from the people I listed, is there anyone who's been detailed to DOGE while simultaneously working or being detailed to HHS?

A No.

Q And aside from the people I listed, is there anyone else whose worked on the DOGE team while simultaneously being employed by another federal agency?

A So that's where I -- I think I need to understand what you mean, employed by another agency.

So, like -- like, Luke and a lot of the names that you gave are employed by other agencies that are detailed to HHS.

Q Mm-hmm.

A So I'm not sure I'm tracking what you mean when you say simultaneously employed by the DOGE, so -- the DOGE

affiliated HHS?

Q So what I'm trying to ask is just setting aside the people that I already named, is there anyone else who was employed at another agency and either has been detailed to or is employed by HHS?

A No.

Q Okay. And since January 19th, 2025, has anyone, besides the people I already listed, been hired at HHS to work on the DOGE team?

A No.

MS. HINSON: Can I have this marked as exhibits 2.

(Exhibit No. 2 was marked for identification.)

BY MS. HINSON:

Q So you've been handed what's been labeled Exhibit 2, and this is your declaration filed in this case on February 13th; do you recognize this?

A Yes.

Q Okay. And if you look at paragraph five, it says: I understand

that at least one USDS employee and one employee from another federal agency have been detailed to HHS within the last three weeks in furtherance of the EO.

Who are these two people you identified here?

A So this is in reference to Brad Smith and Luke Farritor.

Q And was Brad Smith the USDS employee?

A Yes.

Q And so Luke Farritor was the one detailed from another federal agency?

A Yes.

Q And then, in the next sentence, it says: I'm aware of at least one HHS employee not detailed from another agency is also involved in implementing the president's EO; who is that?

A That was Amy Gleason.

Q When did Amy Gleason begin working at HHS?

A Amy's worked at HHS for awhile, she -- before the start of the administration, I don't know the exact

dates she started. I knew she was with CMS under the US digital services.

Q Okay. And was she employed by HHS or was she detailed to HHS?

A Detailed -- employed.

MS. HINSON: Okay. Can this be Exhibit 3.

(Exhibit No. 3 was marked for identification.)

BY MS. HINSON:

Q Okay. So this is your declaration filed in this case, and on March 11th, 2025, can you look at paragraph seven, and it references to another USDS employee who is detailed for the Centers for Medicare/Medicaid services in furtherance of the EO in the same February 2025 timeframe; who is that?

A That was Amy.

Q All right. This is also Amy?

A Yes.

Q Okay. We spoke a few minutes ago about the fact that there are people who are employed at or detailed to HHS

while being employed by or detailed to other federal agencies; right?

A (Nodding.)

Q Is that a yes?

A Yes.

Q Okay. Is it the normal practice of HHS to have employees who are also detailed to other federal agencies?

A Yes. HHS details -- received details in and details people out to other agencies for all kinds of cost-cutting work across the government.

Q When HHS does that -- let me rephrase -- when HHS details an employee to another federal agency do they typically continue to work at HHS while being detailed?

A The -- the temp- -- depends on the terms of the detail. I mean, sometimes, if it's cost-cutting work, it's necessary for them to stay in tune with what they do at HHS while they're at another department, so -- so the answer is, is it just depends on the nature of the agreement.

Q Okay. And is it the normal practice for HHS to have employees from other federal agencies detailed at HHS who are performing work for both agencies at the same time?

A Yes, it happens.

Q Okay. What policies typically govern those relationships?

A So the policies that permit the detail in between agencies, generally, so it just depends, basically, on need and, again, like, were there cost-cutting activities. It's just general collaboration that we typically do details for.

Q In a normal course, how do you -- how does HHS coordinate work with the other agency that someone is being detailed from or to?

A Yeah.

MR. HUMPHREYS: Objection, foundation.

THE WITNESS: So I could answer?

///

BY MS. HINSON:

Q You can answer.

MR. HUMPHREYS: You can answer. I'll tell you if you can't.

A Okay. Okay. So it's a collaboration, so depending upon what is needed, you know, generally there's an agreement that comes out, and there's some description of what will or will not be done, what the need is that we're trying to solve by hiring generally what is, you know, some kind of a specialist that we have at HHS, or if it's something that we do where we have these kind of cost-cutting things where we're collaborating for a joint goal for the overall good of the government.

I -- it just really depends on what the need is at the time, how those ground rules are laid, and it's generally a collaborative process.

Q Okay. Why did HHS decide to enter into these cross-detailing arrangements with respect to the DOGE

team affiliates?

A I -- I think the -- the point was to kind of create the government efficiencies that we're looking for as part of the executive orders that have established DOGE.

So there were some expertise that was recommended and HHS accepted those experts to help us perform these tasks.

Q And who made that recommendation?

A I think Brad Smith made most of the recommendations, that I'm aware of.

Q And did he recommend that he be detailed to HHS?

MR. HUMPHREYS: Objection as to scope, but you can answer.

A I -- I think so, yes.

Q Who decided -- who at HHS made the decision to enter into these arrangements?

A Scott Rowell is the deputy chief of staff for operations.

Q And why did he decide to enter

into these arrangements?

A As it was a collaboration to make sure that we met the goals and the requirements of the executive order, so we were kind of building our scope and -- and team to get the accomplishments that we wanted to get to meet the requirements of the EO, executive order.

I said EO which is just a jargon for executive order, sorry.

MS. HINSON: Okay. Are we on 4 and 5?

(Exhibit No's. 4 and 5 were marked for identification.)

BY MS. HINSON:

Q Okay. So you've been handed two documents which have been labeled Exhibits 4 and 5, one starts at HHS28, and the other starts at HHS32, and they're both labeled or titled: Assignment Agreement Centers For Medicare and Medicaid Services From the Executive Offices of -- Executive Office of the President US DOGE Service; right?

First, who are these agreements

for?

MR. HUMPHREYS: I'm sorry, I may have missed what you said, but there's a difference in the title, one's HHS and one's CMS.

MS. HINSON: Thank you, that was actually going to be one of my questions.

A So the one for CMS, I believe, is for Amy Gleason.

Q Mm-hmm.

A And the one for HHS probably should be Brad.

Q Do you know if, aside from the differences, the one is the CMS and one is to HHS, do you know if these agreements are the same?

A I'd have to read them to verify that.

Q Oh, yeah, you don't need to do that, I just wasn't sure if you maybe knew.

A I mean, they -- it looks like a standard agreement, so there may be nuances within them that, you know, that

could change based on the two different organization's requirements, but it looks like a standard agreement.

Q Okay. If you look at Exhibit 4, on page HHS29, under USDS assignee, as well, the first bullet point, it says: Report to and be supervised by the CMS administrator or her designee when performing work under this agreement at CMS facilities and on CMS systems.

USDS assignees shall, however, report to and be supervised by their USDS supervisor when at USDS facilities and on USDS systems, even when performing work within the scope of the agreement.

Do you read this to mean that when Ms. Gleason is working at USDS or at DOGE, on DOGE systems, but doing CMS work, she is supervised by her DOGE supervisor?

MR. HUMPHREYS: Objection to form.

A I mean, not necessarily. I mean, when she's at USDS and working on

USDS systems, and doing USDS work, that's fine, but she can be at another location and work on CMS work.

Q Right. So this agreement says that she supervised by the USDS supervisor when at USDS facilities and on USDS systems, right, even when performing work within the scope of the agreement, and work -- is work within the scope of the agreement work for CMS?

A I mean -- I mean, I would say work would be CMS work in concert with, you know, the DOGE team goals to help us support the executive orders.

Q So this agreement creates the possibility that she can be doing CMS work that's supervised by DOGE; correct?

MR. HUMPHREYS: Objection to form.

A I -- I mean, I wouldn't say it would be supervised by -- I -- I see where you're going with this, but the interpretation is, that I would say CMS work is CMS work.

I mean, the way I would read it

is the -- when she's reporting to the US supervisor, USDS supervisor, when at USDS facilities, I mean, she could be working on CMS work for CMS supervision at the USDS facilities, if that's just where she is, it doesn't mean she's being supervised by them.

Q Doesn't the agreement say that USDS assignment shall be supervised by the USDS facility supervisors when at USDS and on USDS systems?

MR. HUMPHREYS: Objection.

Go ahead.

Selective quotation, I guess.

MS. HINSON: I can -- I'm happy to read the whole sentence.

MR. HUMPHREYS: Sure.

A I mean, it does say that, but if she's working -- it also says that end on USDS systems, if she's working on a CMS computer then I would say that she's working on CMS work.

Q Okay. What if she's on a USDS system and working on CMS work, is she

then supervised by her US CMS supervisor?

MR. HUMPHREYS: Objection to form.

A I mean, I would -- I still kind of feel like CMS work is CMS work.

Q I guess I don't understand what you mean when you say that.

A Well, as an employee of CMS, she's working on that work wherever she's doing it is a CMS product.

Q Mm-hmm.

A Okay. So I mean, you know, to say that the supervisors they're supervising what she's doing if she's doing something for CMS, I mean, it's like, you know, we all do things that involve other organizations and the government.

So in my job I work on things for FDA, and then I'm -- FDA and NIH and CDC, but it doesn't mean that I'm under their supervision.

So I guess that's why I'm saying it's like it's a very literally interpretation. It's not, you know, I

wouldn't necessarily say that the supervisor, you know, the USDS supervisor is standing there telling me what to do for CMS.

Q Okay. Just so I'm clear, your interpretation of the language that says: USDS assignees shall, however, report to and be supervised by their USDS supervisor when at USDS facilities and on USDS systems, even when performing work within the scope of the agreement, is that when Ms. Gleason is at USDS facilities and on USDS systems performing work within the scope of the agreement she'll be supervised by CMS?

MR. HUMPHREYS: Objection to form.

A I mean, if she's working for CMS I would say she's under their supervision. She should be taking the direction from the CMS team.

Q Okay. What does it mean to be on a USDS system versus a CMS system?

A To me, the CMS system would be the systems owned and operated by CMS,

where she's using her CMS access and computers to work there, and similarly for USDS.

Q Okay. If you look a little further down, it says: CMS will, and the first bullet point is: Ascertain and mitigate any conflicts of interest or confidentiality protocols during the assignment; do you see that?

A I do.

Q And if you look on -- on the Exhibit 5, at 33, has the same language; correct?

A Yes.

Q Did CMS or HHS identify any conflicts of interest with respect to Ms. Gleason or Mr. Smith?

MR. HUMPHREYS: Objection to scope.

You can answer if you know.

A No.

Q And what would HHS consider a relevant conflict of interest under the agreement?

MR. HUMPHREYS: Same

objection.

A I mean, it's hard for me to speculate, you know, what a conflict of interest would be, I mean, we're working on, you know, collaboration for the DOGE executive order.

So I'm not sure, like, I mean, what you mean by a conflict of interest. I mean, I'm --

Q Well, I -- I'm actually just wondering what the agency meant by conflicts of interest when, you know, it entered into this agreement.

A I mean, I think the conflict of interest, if something came up and the employee was telling us they were going to do something that would not be in the benefit of HHS for, you know, the executive orders, then I think that would be something that we would bring up and we would discuss and mitigate, so if it's something that we disagreed with.

Q If an employee or detailee were doing something to present the executive orders, themselves, and HHS disagreed

with it, would HHS consider that a conflict of interest?

MR. HUMPHREYS: Objection, vague.

BY MS. HINSON:

Q You can answer.

A Yes.

Q I want to switch gears a little bit to talk about training, and specifically about -- let me -- two systems, the health care integrated general ledger accounting system and the integrated data repository.

What is the integrated data repository?

MR. HUMPHREYS: Oh --

MS. HINSON: I'm trying to ask about training for them.

MR. HUMPHREYS: Yeah, give us a second. Do you want to go off the record for a second?

MS. HINSON: Yeah, fine.

(Discussion held off the record.)

///

BY MS. HINSON:

Q What is the integrated data repository or IDR?

A So I'm familiar with the system name, but I don't really know what it does.

Q Okay. Do you know what HIGLAS?

A That's the basic accounting system that CMS uses.

Q Okay. What training does a new user for IDR receive, typically?

A So they would -- would go through the basic training for rules of behavior, cyber security. They would have basic training for, you know, how to use the system, and they would also, you know, probably have special training for those two systems for the information that's in them, because they're HIGLAS, in particular financial systems.

We do a little higher level training for some of that, because the information that's in them is a little more sensitive than just, like, network access.

Q What kind of training do you do for HIGLAS?

A Well, like I said, I mean, there would be systems training that would happen, you know, how to use the system, be familiar with the system, all that kind of stuff.

There would be, like, a rules of behavior that just basically outlined what you -- you know, when you get access to the system what you can and cannot do and how you should use it as a government employee, that kind of stuff.

Cyber training is pretty standard with all systems and stuff like that.

Q Is there typically documentation for the training with IDR?

A Yes.

Q And is there typically documented training for HIGLAS?

A Yes.

Q If someone received training for IDR and HIGLAS is there some reason there wouldn't be documentation of it?

A No.

MS. HINSON: So you can take a look at -- actually -- okay. I think we're at Exhibit 6.

(Exhibit No. 6 was marked for identification.)

BY MS. HINSON:

Q Okay. So you've been handed exhibit -- I think it's Exhibit 6, and it's the defendant's objection and responses to the plaintiff's requests for discovery including supplemental responses.

And can you take a look at page 8, please. So the responses, here, says that, among other things, Mr. Farritor received a security briefing for HIGLAS and completed IDR computer-based training; do you see that, about the middle of the page?

A Where are we at, down here?

Q The second paragraph, before it says -- I'm sorry, I think we're on the wrong page. It's page 8.

A I've got page 8.

Q Did I hand you the wrong one? Oh, you know what, I have the old one here.

MS. MILTON: You just took his.

MS. HINSON: I took your copy but, yeah, I think that's the wrong -- I'm realizing I think that's the wrong one. My apologies.

Oh, these are not the supplementals, these are the originals.

MS. MILTON: Oh.

MS. HINSON: Okay.

MS. MILTON: He had them. He had a copy that he reviewed it.

MS. HINSON: Yes. Apologies.

Can we make this an exhibit, are you guys okay with that?

MR. HUMPHREYS: Yeah.

MS. HINSON: Yeah? And can you make it, actually, Exhibit 7, again, in that case? You can just

totally set that one aside.

Sorry, guys.

MR. HUMPHREYS: No problem.

MR. BERNIE: No problem.

(Exhibit No. 7 was marked for identification.)

BY MS. HINSON:

Q All right. So we're talking about Exhibit 7, which is actually the supplemental responses.

A Page 8?

Q Yes, go to page 8, please.

A What was the --

Q Sure.

Do you see where it says that Mr. Farritor completed a security briefing for HIGLAS and completed IDR computer-based training?

A Which paragraph?

Q Sure. It's, I think, right in there.

A I'm just reading, it says: Mr. Farritor acknowledged rules of behavior for general users, the rules of behavior for privileged users, security

briefing for HIGLAS, and completed IDR computer-based training, that's what you're talking about?

Q Yes.

A Okay. Yes.

Q Then, if you look at page 12, they're talking about Mr. Moghaddassi in here, and it says that he was granted permission to access IDR and HIGLAS, and that he did access IDR and HIGLAS, but if you look at the training he completed, it doesn't include that security training for HIGLAS or the IDR computer-based training.

A Users, yeah, security, yes, I see that.

Q Okay. So does that mean that Mr. Moghaddassi did not complete a security briefing for HIGLAS or IDR computer-based training?

A Yes, that's what it says.

Q Okay. Does a user typically have to complete those trainings before accessing HIGLAS and IDR?

A I can't say definitively on

that, because I'm not a user of those systems, but that's CMS so I know those are, like, the general trainings are the rules of behavior, the -- the privilege rules of cyber security, that kind of stuff. I don't know why there were -- the other trainings weren't done by him.

Q I guess I think I'm asking a slightly different question, which is just, in the normal course is a user permitted to access IDR without going through the IDR computer-based training?

MR. HUMPHREYS: Objection as to scope. You can answer if you know.

A I don't know.

Q And in the normal course is a user of -- or would a user of HIGLAS permitted to access HIGLAS without doing the security briefing?

MR. HUMPHREYS: Same objection.

A I don't know.

MS. HINSON: Okay. Can we take a break?

MR. HUMPHREYS: Sure. Okay.

(Recess.)

BY MS. HINSON:

Q First of all, I did want to fix something from earlier. I had read out a list of DOGE team affiliates, and I believe I missed someone, Aram Moghaddassi, yes?

A That was, like, I paused when you said it, it seemed like I was trying to keep up with when you read it, it felt like something was wrong, I knew the names you read were right, but I couldn't think who the other one was, yes.

Q Does it change -- does including him on the list of DOGE affiliates change any of your answers?

A No.

Q We also spoke a few minutes ago about HHS's assessing conflicts of interest for Ms. Gleason and Mr. Smith; do you remember that?

A Yes.

Q Did HHS do anything to assess conflicts of interest for Mr. Gleason --

or Ms. Gleason?

MR. HUMPHREYS: Objection as to scope, but can you answer.

A No.

Q And did HHS do anything to assess conflicts of interest for Mr. Smith?

MR. HUMPHREYS: Same objection.

A No. I'd just like to amplify that I mean per my knowledge, no conflict came up, so there was nothing to, you know, deal with, so --

Q How would -- how do conflicts typically come up?

A I mean, I -- I would say that if there was a conflict somebody would have a disagreement and we would sit down and talk about it, a conflict of interest based on, you know, what they were doing with the work, you know?

So if they ask us to do something that wasn't part of the DOGE agreement or something that would be a conflict.

Q So your understanding of conflict of interest is that it would be a disagreement about the work within the scope of the DOGE executive order?

MR. HUMPHREYS: Objection as to scope.

A Yeah, that's the way I took the context of the question.

Q Did HHS do anything to assess whether there -- whether Ms. Gleason or Mr. Smith had a financial interest that could be in conflict with the agency?

MR. HUMPHREYS: Same objection.

A When they're employed as part of the employment agreement they have to provide ethics clearances, and that's -- so ethics document on-board, so long as that's on-boarding of any employee.

Q And is that self-reporting?

MR. HUMPHREYS: Same objection.

A Yes.

Q With -- regarding Mr. Smith, I believe you testified earlier that he had

recommended that he be detailed to HHS; is that correct?

A Yes.

Q Okay. In what capacity did he make that recommendation?

MR. HUMPHREYS: Objection as to scope.

You can answer if you know.

A Just working with HHS full time that it made sense that he be detailed.

Q And I think I'm asking something a little bit different.

When Mr. Smith made that recommendation to HHS, what role was he acting in?

MR. HUMPHREYS: Objection to scope, but go ahead.

A He was acting as the HHS DOGE lead for HHS, lead to HHS.

Q Lead to HHS from DOGE?

A Yes.

Q All right. Has Mr. Smith continued to make recommendations in his capacity as a DOGE employee and since he has been detailed to HHS?

A The recommendations that he makes I interpret as his role as an HHS detail. He's making recommendations to HHS based on the work that we do, you know, his role with USDS, because he's in this dual appointment thing, that's -- I don't have any visibility into what he does with USDS.

Q How can you tell whether he's making a recommendation in his USDS capacity versus his HHS capacity?

A So I -- I don't know what his functions are at USDS. All I can tell you is he's making recommendations about the contracts activities, grants, things that we do at HHS to create efficiencies that we have within HHS.

Q So is it that you understand him to be acting in his capacity of HHS because he's making recommendations about HHS?

A Yes, he's -- yes.

Q Okay. Is there any other reason you understand him to be working in his capacity as an HHS employee when

he's making recommendations to HHS?

A Say that -- say that again? I'm sorry, that was a bit of a tongue twister.

Q Yeah, fair enough.

I'm trying to ask if that's the only reason you understand him to be acting in his HHS capacity versus his DOGE capacity?

MR. HUMPHREYS: Objection as to form.

A That's the only reason I have to believe that, yes.

Q Okay. Was Mr. Smith the HHS DOGE team lead before he was detailed to HHS?

A Yes.

Q Is he the HHS DOGE team lead now?

A Yes.

Q Has his -- has his responsibilities functionally changed since he was detailed to HHS?

A No.

MS. HINSON: All right. I

think that's it.

MR. HUMPHREYS: Great.

Give us two minutes to talk to him.

MS. HINSON: Sure.

MR. HUMPHREYS: Maybe five.

(Recess.)

MR. HUMPHREYS: Back on the record.

A I just wanted to clarify that Brad Smith was detailed to HHS at the start of the administration, so when he came to work for Mr. Rowell, on the 21st he introduced me to Brad that he was going to be, you know, our DOGE team lead here at HHS, and that's when I started working with him, so not that he was a DOGE employee at HHS but he was our HHS DOGE lead.

Q So had he -- when you say the 21st, is that the 21st of what month?

A January. Sorry.

Q And had he already been detailed to HHS on the 21st of January?

A Yes. Yes.

Q Do you know if he was detailed on the 20th of January?

A I don't know, he -- if it was the 20th or the 21st.

Q Okay. Are you able to make any functional distinction between his work as a -- actually, I think, never mind.

MS. HINSON: Okay. Thank you.

THE WITNESS: Okay.

MR. HUMPHREYS: Thanks a lot 3.

MR. KURLAND: Now you're done.

(Signature having not been waived, the deposition of GAREY RICE was concluded at 2:53 p.m.)

19173c2b-8370-4ccc-b770-46fbda9e23d5

ACKNOWLEDGMENT OF DEPONENT

I, GAREY RICE, do hereby acknowledge that I have read and examined the foregoing testimony, and the same is a true, correct and complete transcription of the testimony given by me and any corrections appear on the attached Errata sheet signed by me.

Presidential Documents

Title 3—

The President

Executive Order 14210 of February 11, 2025

Implementing the President's ''Department of Government Efficiency'' Workforce Optimization Initiative

By the authority vested in me as President by the Constitution and the laws of the United States of America, it is hereby ordered:

Section 1. *Purpose.* To restore accountability to the American public, this order commences a critical transformation of the Federal bureaucracy. By eliminating waste, bloat, and insularity, my Administration will empower American families, workers, taxpayers, and our system of Government itself.

Sec. 2. *Definitions.* (a) ''Agency'' has the meaning given to it in section 3502 of title 44, United States Code, except that such term does not include the Executive Office of the President or any components thereof.

(b) ''Agency Head'' means the highest-ranking official of an agency, such as the Secretary, Administrator, Chairman, or Director, unless otherwise specified in this order.

(c) ''DOGE Team Lead'' means the leader of the Department of Government Efficiency (DOGE) Team at each agency, as defined in Executive Order 14158 of January 20, 2025 (Establishing and Implementing the President's ''Department of Government Efficiency'').

(d) ''Employee'' has the meaning given to it by section 2105 of title 5, United States Code, and includes individuals who serve in the executive branch and who qualify as employees under that section for any purpose.

(e) ''Immigration enforcement'' means the investigation, enforcement, or assisting in the investigation or enforcement of Federal immigration law, including with respect to Federal immigration law that penalizes a person's presence in, entry, or reentry to, or employment in, the United States, but does not include assisting individuals in applying for immigration benefits or efforts to prevent enforcement of immigration law or to prevent deportation or removal from the United States.

(f) ''Law enforcement'' means:

(i) engagement in or supervision of the prevention, detection, investigation, or prosecution of, or the incarceration of any person for, any violation of law; or

(ii) the protection of Federal, State, local, or foreign government officials against threats to personal safety.

(g) ''Temporary employee'' has the meaning given to it in 5 C.F.R. part 316.

(h) ''Reemployed annuitant'' has the meaning given to it in 5 C.F.R. part 837.

Sec. 3. *Reforming the Federal Workforce to Maximize Efficiency and Productivity.* (a) *Hiring Ratio.* Pursuant to the Presidential Memorandum of January 20, 2025 (Hiring Freeze), the Director of the Office of Management and Budget shall submit a plan to reduce the size of the Federal Government's workforce through efficiency improvements and attrition (Plan). The Plan shall require that each agency hire no more than one employee for every four employees that depart, consistent with the plan and any applicable exemptions and details provided for in the Plan. This order does not affect the standing freeze on hiring as applied to the Internal Revenue Service. This ratio shall not apply to functions related to public safety, immigration

enforcement, or law enforcement. Agency Heads shall also adhere to the Federal Hiring Plan that will be promulgated pursuant to Executive Order 14170 of January 20, 2025 (Reforming the Federal Hiring Process and Restoring Merit to Government Service).

(b) *Hiring Approval.* Each Agency Head shall develop a data-driven plan, in consultation with its DOGE Team Lead, to ensure new career appointment hires are in highest-need areas.

(i) This hiring plan shall include that new career appointment hiring decisions shall be made in consultation with the agency's DOGE Team Lead, consistent with applicable law.

(ii) The agency shall not fill any vacancies for career appointments that the DOGE Team Lead assesses should not be filled, unless the Agency Head determines the positions should be filled.

(iii) Each DOGE Team Lead shall provide the United States DOGE Service (USDS) Administrator with a monthly hiring report for the agency.

(c) *Reductions in Force.* Agency Heads shall promptly undertake preparations to initiate large-scale reductions in force (RIFs), consistent with applicable law, and to separate from Federal service temporary employees and reemployed annuitants working in areas that will likely be subject to the RIFs. All offices that perform functions not mandated by statute or other law shall be prioritized in the RIFs, including all agency diversity, equity, and inclusion initiatives; all agency initiatives, components, or operations that my Administration suspends or closes; and all components and employees performing functions not mandated by statute or other law who are not typically designated as essential during a lapse in appropriations as provided in the Agency Contingency Plans on the Office of Management and Budget website. This subsection shall not apply to functions related to public safety, immigration enforcement, or law enforcement.

(d) *Rulemaking.* Within 30 days of the date of this order, the Director of the Office of Personnel Management (OPM) shall initiate a rulemaking that proposes to revise 5 C.F.R. 731.202(b) to include additional suitability criteria, including:

(i) failure to comply with generally applicable legal obligations, including timely filing of tax returns;

(ii) failure to comply with any provision that would preclude regular Federal service, including citizenship requirements;

(iii) refusal to certify compliance with any applicable nondisclosure obligations, consistent with 5 U.S.C. 2302(b)(13), and failure to adhere to those compliance obligations in the course of Federal employment; and

(iv) theft or misuse of Government resources and equipment, or negligent loss of material Government resources and equipment.

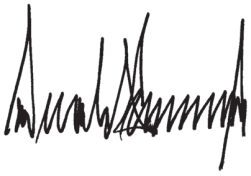
(e) *Developing Agency Reorganization Plans.* Within 30 days of the date of this order, Agency Heads shall submit to the Director of the Office of Management and Budget a report that identifies any statutes that establish the agency, or subcomponents of the agency, as statutorily required entities. The report shall discuss whether the agency or any of its subcomponents should be eliminated or consolidated.

(f) Within 240 days of the date of this order, the USDS Administrator shall submit a report to the President regarding implementation of this order, including a recommendation as to whether any of its provisions should be extended, modified, or terminated.

Sec. 4. *Exclusions.* (a) This order does not apply to military personnel.

(b) Agency Heads may exempt from this order any position they deem necessary to meet national security, homeland security, or public safety responsibilities.

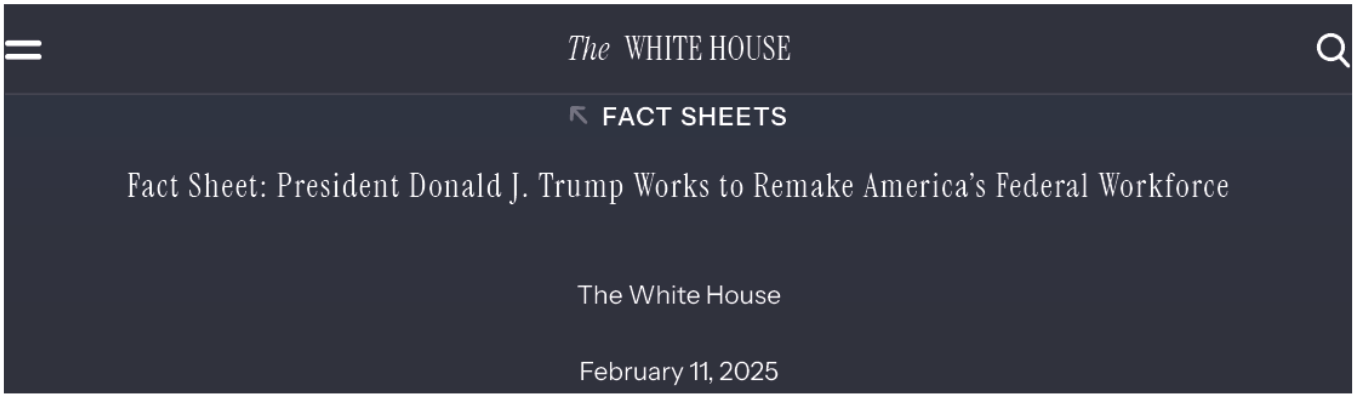
(c) The Director of OPM may grant exemptions from this order where those exemptions are otherwise necessary and shall assist in promoting workforce reduction.



Sec. 5. *General Provisions.* (a) Nothing in this order shall be construed to impair or otherwise affect:

(i) the authority granted by law to an executive department, agency, or the head thereof; or

(ii) the functions of the Director of the Office of Management and Budget relating to budgetary, administrative, or legislative proposals.



(b) This order shall be implemented consistent with applicable law and subject to the availability of appropriations.

(c) This order is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

THE WHITE HOUSE,
February 11, 2025.

Billing code 3395–F4–P

REFORMING THE FEDERAL WORKFORCE TO BETTER SERVE AMERICANS: Today, President Donald J. Trump signed an Executive Order implementing the President's Department of Government Efficiency (DOGE) workforce optimization initiative.

- The Executive Order will make the federal workforce more efficient and effective.
  - Agency Heads will coordinate and consult with DOGE to shrink the size of the federal workforce and limit hiring to essential positions.
  - The Office of Personnel Management will initiate a rulemaking to ensure federal employees are held to the highest standards of conduct.
- The Order will significantly reduce the size of government.
  - Upon expiration of the Day 1 hiring freeze and implementation of the hiring plan, agencies will be able to hire no more than one employee for every four employees that depart from federal service (with appropriate immigration, law enforcement, and public safety exceptions).
  - Agencies will undertake plans for large-scale reductions in force and determine which agency components (or agencies themselves) may be eliminated or combined because their functions aren't required by law.
- The Order exempts personnel and functions critical to national security, public safety, law enforcement, and immigration enforcement.

REDUCING THE UNNECESSARY FOOTPRINT OF GOVERNMENT: President Donald J. Trump is committed to reducing the size and scope of the federal government.

- There are too many federal employees.
  - Excluding active-duty military and Postal Service employees, the federal workforce exceeds 2.4 million.

    - No one knows exactly how many federal agencies exist, but the Federal Register lists over 400.

- The federal workforce contributes significantly to federal spending and debt.
    - In fiscal year 2022, the federal government spent nearly $300 billion on compensation for civilian employees, excluding pensions.
    - According to a recent congressional report, only 6% of federal workers report to work in-person on a full-time basis.

BUILDING ON PAST SUCCESS: President Trump has made reforming the federal workforce a key priority for his second term.

- President Trump has consistently worked to shrink the administrative state.
- His first term spurred robust economic growth and innovation through regulatory reform.
- Workforce reform in his second term will build on these successes.

U.S. Office of Personnel Management

MEMORANDUM

TO: Heads of Executive Departments and Agencies

FROM: Russell T. Vought, Director, Office of Management and Budget; Charles Ezell, Acting Director, Office of Personnel Management.

DATE: February 26, 2025

RE: Guidance on Agency RIF and Reorganization Plans Requested by *Implementing The President's "Department of Government Efficiency" Workforce Optimization Initiative*

I. Background

The federal government is costly, inefficient, and deeply in debt. At the same time, it is not producing results for the American public. Instead, tax dollars are being siphoned off to fund unproductive and unnecessary programs that benefit radical interest groups while hurting hard-working American citizens.

The American people registered their verdict on the bloated, corrupt federal bureaucracy on November 5, 2024 by voting for President Trump and his promises to sweepingly reform the federal government.

On February 11, 2025, President Trump's Executive Order *Implementing The President's "Department of Government Efficiency" Workforce Optimization Initiative* (*Workforce Optimization*) "commence[d] a critical transformation of the Federal bureaucracy." It directed agencies to "eliminat[e] waste, bloat, and insularity" in order to "empower American families, workers, taxpayers, and our system of Government itself."

President Trump required that "Agency Heads shall promptly undertake preparations to initiate large-scale reductions in force (RIFs), consistent with applicable law." President Trump also directed that, **no later than March 13, 2025**, agencies develop Agency Reorganization Plans.

The U.S. Office of Management and Budget ("OMB") and the U.S. Office of Personnel Management ("OPM") now submit guidance on these Agency RIF and Reorganization Plans ("ARRP"), along with the instruction that such plans be submitted to OMB and OPM.

II. Principles to Inform ARRPs

ARRPs should seek to achieve the following:

1. Better service for the American people;

2. Increased productivity;

3. A significant reduction in the number of full-time equivalent (FTE) positions by eliminating positions that are not required;

4. A reduced real property footprint; and

5. Reduced budget topline.

Pursuant to the President's direction, agencies should focus on the maximum elimination of functions that are not statutorily mandated while driving the highest-quality, most efficient delivery of their statutorily-required functions.

Agencies should also seek to consolidate areas of the agency organization chart that are duplicative; consolidate management layers where unnecessary layers exist; seek reductions in components and positions that are non-critical; implement technological solutions that automate routine tasks while enabling staff to focus on higher-value activities; close and/or consolidate regional field offices to the extent consistent with efficient service delivery; and maximally reduce the use of outside consultants and contractors. When taking these actions, agencies should align closures and/or relocation of bureaus and offices with agency return-to-office actions to avoid multiple relocation benefit costs for individual employees.

Agencies should review their statutory authority and ensure that their plans and actions are consistent with such authority.

Agency heads should collaborate with their Department of Government Efficiency ("DOGE") team leads within the agency in developing competitive areas for ARRPs. In addition, the agency should specifically identify competitive areas that include positions not typically designated as essential during a lapse in appropriations. When making this determination, agencies should refer to the functions that are excepted from the Antideficiency Act (ADA) in the Agency Contingency Plans submitted to OMB in 2019 as the starting point for making this determination.

III. Available Tools

In their ARRPs, agencies should employ all available tools to effectuate the President's directive for a more effective and efficient government and describe how they will use each. Such tools include:

1. Continuing to comply with the hiring freeze outlined in the January 20, 2025 Presidential Memorandum *Hiring Freeze* or (with approval of OPM and OMB) implementing the general principle that, subject to appropriate exemptions, no more than one employee should be hired for every four employees that depart;

2. Establishing internal processes that ensure agency leadership has visibility and/or direct sign-off on all potential job offers and candidates prior to extending offers;

3. Eliminating non-statutorily mandated functions through RIFs (Appendix 1 contains a sample timeline);

4. Removing underperforming employees or employees engaged in misconduct, and continuing to evaluate probationary employees;

5. Reducing headcount through attrition and allowing term or temporary positions to expire without renewal;

6. Separating reemployed annuitants in areas likely subject to RIFs; and

7. Renegotiating provisions of collective bargaining agreements (CBAs) that would inhibit enhanced government efficiency and employee accountability.

ARRPs should also list the competitive areas for large-scale reductions in force, the RIF effective dates (which may be a date prior to when the plan is submitted), the expected conclusion of the RIFs, the number of FTEs reduced, and additional impact of RIFs such as cancellation of related contracts, leases or overhead.

Agencies should also closely consider changes to regulations and agency policies, including changes that must be pursued through notice-and-comment rulemaking, that would lead to the reduction or elimination of agency subcomponents or speed up the implementation of ARRPs.

IV. Phase 1 ARRPs

Each agency will submit a Phase 1 ARRPs to OMB and OPM for review and approval **no later than March 13, 2025**. Phase 1 ARRPs shall focus on initial agency cuts and reductions. Each Phase 1 ARRP should identify:

1. A list of agency subcomponents or offices that provide direct services to citizens. Such subcomponents or offices should be included in ARRPs to improve services to citizens while eliminating costs and reducing the size of the federal government. But for service delivery subcomponents or offices, implementation shall not begin until certified by OMB and OPM as resulting in a positive effect on the delivery of such services.

2. Any statutes that establish the agency, or subcomponents of the agency, as statutorily required entities. Agency leadership must confirm statutes have not been interpreted in a way that expands requirements beyond what the statute actually requires. Instead, statutes should be interpreted to cover only what functions they explicitly require.

3. All agency components and employees performing functions not mandated by statute or regulation who are not typically designated as essential during a lapse in appropriations (because the functions performed by such employees do not fall under an exception to the ADA) using the Agency Contingency Plans submitted to OMB in 2019 referenced above.

4. Whether the agency or any of its subcomponents should be eliminated or consolidated; and which specific subcomponents or functions, if any, should be expanded to deliver on the President's priorities.

5. The specific tools the agency intends to use to achieve efficiencies, including, as to each, the number of FTEs reduced and any potential savings or costs associated with such actions in Fiscal Years 2025, 2026 and 2027:

    a. Continuation of the current hiring freeze;
    b. Regular attrition (e.g., retirement, movement between agencies and the private sector);
    c. Attrition through enhanced policies governing employee performance and conduct;
    d. Attrition through the termination or non-renewal of term or limited positions or reemployed annuitants;
    e. Attrition achieved by RIFs. Please refer to Appendix 1 for specific steps and timing. For purposes of the Phase 1 ARRP, the agency should include the following information:

        i. The competitive areas and organizational components that the agency has targeted or will target for initial RIFs, and
        ii. The agency's target for reductions in FTE positions via RIFs.

6. A list by job position of all positions categorized as essential for purposes of exclusion from large-scale RIFs, including the number per each job position and total by agency and subcomponent.

7. The agency's suggested plan for congressional engagement to gather input and agreement on major restructuring efforts and the movement of fundings between accounts, as applicable, including compliance with any congressional notification requirements.

8. The agency's timetable and plan for implementing each part of its Phase 1 ARRP.

V. Phase 2 ARRPs

Agencies should then submit a Phase 2 ARRP to OMB and OPM for review and approval **no later than April 14, 2025**. Phase 2 plans shall outline a positive vision for more productive, efficient agency operations going forward. Phase 2 plans should be planned for implementation by September 30, 2025. The Phase 2 plan should include the following additional information:

1. The agency's proposed future-state organizational chart with its functional areas, consolidated management hierarchy, and position titles and counts clearly depicted.

2. Confirmation that the agency has reviewed all personnel data, including each employee's official position description, four most recent performance ratings of record, retention service computation date, and veterans' preference status.

3. The agency's plan to ensure that employees are grouped, to the greatest extent possible, based on like duties and job functions to promote effective collaboration and management, and that the agency's real estate footprint is aligned with cross-agency efforts coordinated by GSA to establish regional federal office hubs.

4. Any proposed relocations of agency bureaus and offices from Washington, D.C. and the National Capital Region to less-costly parts of the country.

5. The competitive areas for subsequent large-scale RIFs.

6. All reductions, including FTE positions, term and temporary positions, reemployed annuitants, real estate footprint, and contracts that will occur in relation to the RIFs.

7. Any components absorbing functions, including how this will be achieved in terms of FTE positions, funding, and space.

8. The agency's internal processes that ensure agency leadership has visibility and/or direct sign-off on all potential job offers and candidates prior to extending offers.

9. The agency's data-driven plan to ensure new career appointment hires are in highest-need areas and adhere to the general principle that, subject to appropriate exemptions, no more than one employee should be hired for every four employees that depart. Until the agency has finalized its post-hiring-freeze plan, agencies should continue to adhere to the current hiring freeze.

10. Any provisions of collective bargaining agreements that would inhibit government efficiency and cost-savings, and agency plans to renegotiate such provisions.

11. An explanation of how the ARRPs will improve services for Americans and advance the President's policy priorities.

12. The framework and criteria the agency has used to define and determine efficient use of existing personnel and funds to improve services and the delivery of these services.

13. For agencies that provide direct services to citizens (such as Social Security, Medicare, and veterans' health care), the agency's certification that implementation of the ARRPs will have a positive effect on the delivery of such services. The certification should include a written explanation from the Agency Head and, where appropriate, the agency's CIO and any relevant program manager.

14. The programs and agency components not impacted by the ARRP, and the justification for any exclusion.

15. Plans to reduce costs and promote efficiencies through improved technology, including through the adoption of new software or systems, and elimination of duplicative systems.

16. Any changes to regulations and agency policies, including changes that must be pursued through notice-and-comment rulemaking, that would lead to the reduction or elimination of agency subcomponents, or speed up implementation of ARRPs.

17. The agency's timetable and plan for implementing each part of its Phase 2 ARRP, and its plan for monitoring and accountability in implementing its ARRPs.

Agencies should continue sending monthly progress reports each month on May 14, 2025, June 16, 2025, and July 16, 2025. All plans and reports requested by this memorandum should be submitted to OPM at tracking@opm.gov and OMB at workforce@omb.eop.gov; when submitting plans and reports, please ensure both OPM and OMB addresses are included on the message.

VI. Exclusions

Nothing in this memorandum shall have any application to:

1. Positions that are necessary to meet law enforcement, border security, national security, immigration enforcement, or public safety responsibilities;

2. Military personnel in the armed forces and all Federal uniformed personnel, including the U.S. Coast Guard, the Commissioned Corps of the U.S. Public Health Service, and the Commissioned Officer Corps of the National Oceanic and Atmospheric Administration;

3. Officials nominated and appointed to positions requiring Presidential appointment or Senate confirmation, non-career positions in the Senior Executive Service or Schedule C positions in the excepted service, officials appointed through temporary organization hiring authority pursuant to 5 U.S.C. § 3161, or the appointment of any other non-career employees or officials, if approved by agency leadership appointed by the President;

4. The Executive Office of the President; or

5. The U.S. Postal Service.

Finally, agencies or components that provide direct services to citizens (such as Social Security, Medicare, and veterans' health care) shall not implement any proposed ARRPs until OMB and OPM certify that the plans will have a positive effect on the delivery of such services.

cc: Chief Human Capital Officers ("***CHCOs***"), Deputy CHCOs, Human Resources Directors, Chiefs of Staff, and DOGE team leads.

Appendix 1- Sample RIF Timeline

This sample timeline is prepared in accordance with the U.S. Office of Personnel Management **Workforce Reshaping Operations Handbook.** RIF timing may vary based on agency-specific requirements, collective bargaining agreements, and workforce considerations. Agencies can accelerate these timelines through parallel processing, securing OPM waivers to policy, expediting process steps, and streamlining stakeholder coordination.

Step 1: Identification of Competitive Areas and Levels (by March 13, 2025 for Phase 1 ARRPs)

1. Identify competitive areas and levels and determine which positions may be affected. If applicable, seek OPM waiver approval to adjust competitive areas within 90 days of the RIF effective date.
2. For Phase 1 ARRPs, this step should be completed no later than March 13, 2025.

Step 2: Planning, Preparation & Analysis (up to 30 days)

1. Explore use of VSIP/VERA.
2. Conduct an impact assessment.
3. Review position descriptions for accuracy, validate competitive levels, and verify employee retention data (e.g., veteran preference, service computation dates).
4. Develop retention register.
5. Draft RIF notices and seek OPM waiver approval for a 30-day notification period.
6. Develop transition materials.
7. Notify unions (if required).
8. Prepare congressional notification (if required).

Step 3: Formal RIF Notice Period (60 days, shortened to 30 days with an OPM waiver)

1. Issue official RIF notices.
2. Provide employees with appeal rights, career transition assistance, and priority placement options.
3. Execute any required congressional notification and notice to the Department of Labor, state, and local officials, if applicable.

Step 4: RIF Implementation & Separation (Final Step)

1. Officially implement separations, reassignments, or downgrades.
2. Provide final benefits counseling, exit processing, and documentation.
3. Update HR systems and notify OPM of personnel actions.

HHS Announces Transformation to Make America Healthy Again

Washington, D.C. — March 27, 2025 — Today, the U.S. Department of Health and Human Services (HHS) announced a dramatic restructuring in accordance with President Trump's Executive Order, "Implementing the President's 'Department of Government Efficiency' Workforce Optimization Initiative."

The restructuring will address this and serve multiple goals without impacting critical services. First, it will save taxpayers $1.8 billion per year through a reduction in workforce of about 10,000 full-time employees who are part of this most recent transformation. When combined with HHS' other efforts, including early retirement and Fork in the Road, the restructuring results in a total downsizing from 82,000 to 62,000 full-time employees.

Secondly, it will streamline the functions of the Department. Currently, the 28 divisions of the HHS contain many redundant units. The restructuring plan will consolidate them into 15 new divisions, including a new Administration for a Healthy America, or AHA, and will centralize core functions such as Human Resources, Information Technology, Procurement, External Affairs, and Policy. Regional offices will be reduced from 10 to 5.

Third, the overhaul will implement the new HHS priority of ending America's epidemic of chronic illness by focusing on safe, wholesome food, clean water, and the elimination of environmental toxins. These priorities will be reflected in the reorganization of HHS.

Finally, the restructuring will improve Americans' experience with HHS by making the agency more responsive and efficient, while ensuring that Medicare, Medicaid, and other essential health services remain intact.

"We aren't just reducing bureaucratic sprawl. We are realigning the organization with its core mission and our new priorities in reversing the chronic disease epidemic," HHS Secretary Robert F. Kennedy, Jr. said. "This Department will do more – a lot more – at a lower cost to the taxpayer."

The specific contents of the restructuring plan that have been announced so far are as follows:

- Creation of the Administration for a Healthy America (AHA), which will combine multiple agencies the Office of the Assistant Secretary for Health (OASH), Health Resources and Services Administration (HRSA), Substance Abuse and Mental Health Services Administration (SAMHSA), Agency for Toxic Substances and Disease Registry (ATSDR), and National Institute for Occupational Safety and Health (NIOSH) into a new, unified entity. This centralization will improve coordination of health resources for low-income Americans and will focus on areas including, Primary Care, Maternal and Child Health, Mental Health, Environmental Health, HIV/AIDS, and Workforce development. Transferring SAMHSA to AHA will increase operational efficiency and assure programs are carried out because it will break down artificial divisions between similar programs.

- Strengthening the Centers for Disease Control and Prevention (CDC): the Administration for Strategic Preparedness and Response (ASPR), responsible for national disaster and public health emergency response, will transfer to the CDC, reinforcing its core mission to protect Americans from health threats.
- New Assistant Secretary for Enforcement: HHS will create a new Assistant Secretary for Enforcement to oversee the Departmental Appeals Board (DAB), Office of Medicare Hearings and Appeals (OMHA), and Office for Civil Rights (OCR) to combat waste, fraud, and abuse in federal health programs.
- Research and Evaluation for Health Policy: HHS will merge the Assistant Secretary for Planning and Evaluation (ASPE) with the Agency for Healthcare Research and Quality (AHRQ) to create the Office of Strategy to enhance research that informs the Secretary's policies and improves the effectiveness of federal health programs.
- Reorganization of the Administration for Community Living (ACL): Critical programs that support older adults and people with disabilities will be integrated into other HHS agencies, including the Administration for Children and Families (ACF), ASPE, and the Centers for Medicare and Medicaid Services (CMS). This reorganization will not impact Medicare and Medicaid services.

"Over time, bureaucracies like HHS become wasteful and inefficient even when most of their staff are dedicated and competent civil servants," Secretary Kennedy said. "This overhaul will be a win win for taxpayers and for those that HHS serves. That's the entire American public, because our goal is to Make America Healthy Again."

Fact Sheet: HHS' Transformation to Make America Healthy Again

Return to the press release </about/news/hhs-restructuring-doge.html>.

The restructuring of HHS is proceeding in accordance with President Trump's Executive Order, "Implementing the President's 'Department of Government Efficiency' Workforce Optimization Initiative." Over the past four years, during the Biden administration, HHS' budget increased by 38% and its staffing increased by 17%.

1. The plan combines personnel cuts, centralization of functions, and consolidation of HHS divisions, including:
    - The current 82,000 full-time employees will be reduced to 62,000
    - 28 divisions will be consolidated to 15
    - 10 regional offices will become 5
    - Human Resources, Information Technology, Procurement, External Affairs, and Policy will be centralized.

2. Regarding FDA, CDC, NIH, and CMS:

   - FDA will decrease its workforce by approximately 3,500 full time employees, with a focus on streamlining operations and centralizing administrative functions. This reduction will not affect drug, medical device, or food reviewers, nor will it impact inspectors.

   - The CDC will decrease its workforce by approximately 2,400 employees, with a focus on returning to its core mission of preparing for and responding to epidemics and outbreaks. This includes moving ASPR under CDC to enhance coordination of response efforts. NOTE: The "CDC" decrease would only be 1,400 if you included the individuals coming over from ASPR (approx. 1,000 individuals).

   - The NIH will decrease its workforce by approximately 1,200 employees by centralizing procurement, human resources, and communications across its 27 institutes and centers.

   - CMS will decrease its workforce by approximately 300 employees, with a focus on reducing minor duplication across the agency. This reorganization will not impact Medicare and Medicaid services.

3. The consolidation and cuts are designed not only to save money, but to make the organization more efficient and more responsive to Americans' needs, and to implement the Make America Healthy Again goal of ending the chronic disease epidemic.

4. No additional cuts are currently planned, but the Department will continue to look for further ways to streamline its operations and agencies.

5. A new Administration for a Healthy America (AHA) will consolidate the OASH, HRSA, SAMHSA, ATSDR, and NIOSH, so as to more efficiently coordinate chronic care and disease prevention programs and harmonize health resources to low-income Americans. Divisions of AHA include Primary Care, Maternal and Child Health, Mental Health, Environmental Health, HIV/AIDS, and Workforce, with support of the U.S. Surgeon General and Policy team.

6. HHS will have a new Assistant Secretary for Enforcement to provide oversight of the Departmental Appeals Board (DAB), Office of Medicare Hearings and Appeal (OMHA), and the Office for Civil Rights (OCR) to combat waste, fraud, and abuse.

7. HHS will combine the Assistant Secretary for Planning and Evaluation (ASPE) and Agency for Healthcare Research and Quality (AHRQ) into the Office of Strategy to conduct research that informs the Secretary's policies and evaluates the effectiveness of the Department's programs for a healthier America.

8. The critical programs within the Administration for Community Living (ACL) that support older adults and people of all ages with disabilities will be split across the Administration for Children and Families (ACF), Assistant Secretary for Planning and Evaluation (ASPE), and Centers for Medicare and Medicaid Services (CMS).

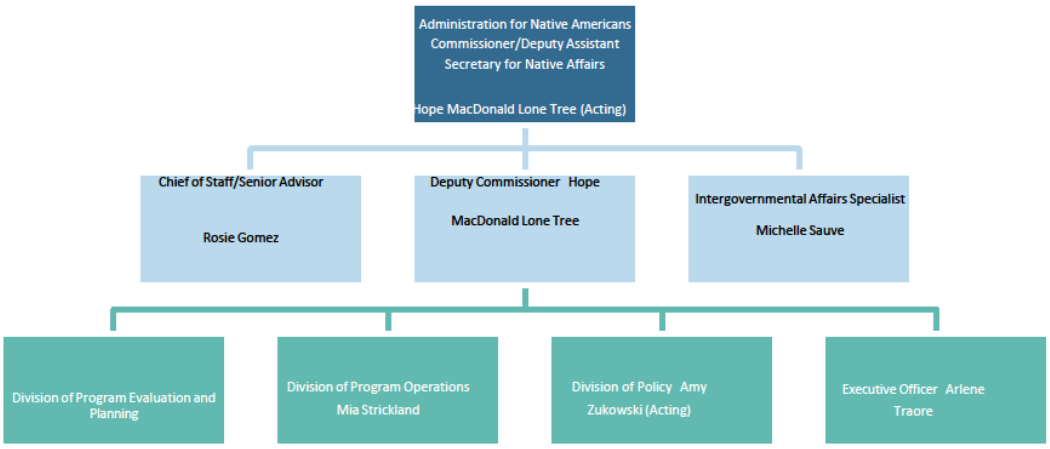
Organizational Chart

ADMINISTRATION FOR NATIVE AMERICANS (ANA)

Office Overview: Major Functions

The Administration for Native Americans (ANA), established by the Native Americans Programs Act of 1974 (NAPA), promotes the economic and social self-sufficiency of American Indians, Native Hawaiians, other Native American Pacific Islanders, and Alaska Natives. ANA accomplishes these mandates through grants that support social and economic development, improve tribal regulation of environmental quality, and preserve Native American/Indigenous languages. ANA also oversees the Native Hawaiian Revolving Loan Fund (NHRLF).

NAPA requires the Commissioner to submit annual reports to Congress on the social and economic condition of Native Americans and outcome evaluations of ANA-funded projects and the NHRLF. The 2023 Durbin-Feeling Native American Languages Act requires ANA to conduct a survey of the status of Native languages and submit a 2024 report to Congress.



Organizational Design and Leadership

ANA is led by a Commissioner who is nominated by the President and confirmed by the Senate and reports directly to the Assistant Secretary at ACF. In addition to providing executive leadership to ANA, the Commissioner serves as the Deputy Assistant Secretary for Native American Affairs, with the responsibility of being the "effective and visible advocate on behalf of Native Americans within the Department, and with other departments and agencies of the Federal Government regarding all Federal policies affecting Native Americans." The Commissioner also is the Chair of the HHS Intra-Departmental Council on Native American Affairs (ICNAA).

ANA includes four organizational components: Office of the Commissioner (OC), Division of Program Operations (DPO), Division of Program Evaluation and Planning (PEP), and Division of Policy.

- OC provides oversight for ANA administrative and policy functions (i.e., budget, program operations, planning and evaluation), and the NHRLF, which is administered by the State of Hawaii's Office of Hawaiian Affairs.
- DPO is responsible for developing NOFOs; providing T/TA to applicants and grant recipients; managing annual grant competitions; monitoring and supporting grant recipients; administering grant award portfolios; and serving as the liaison to the ACF Grants Management and Grants Policy Offices.

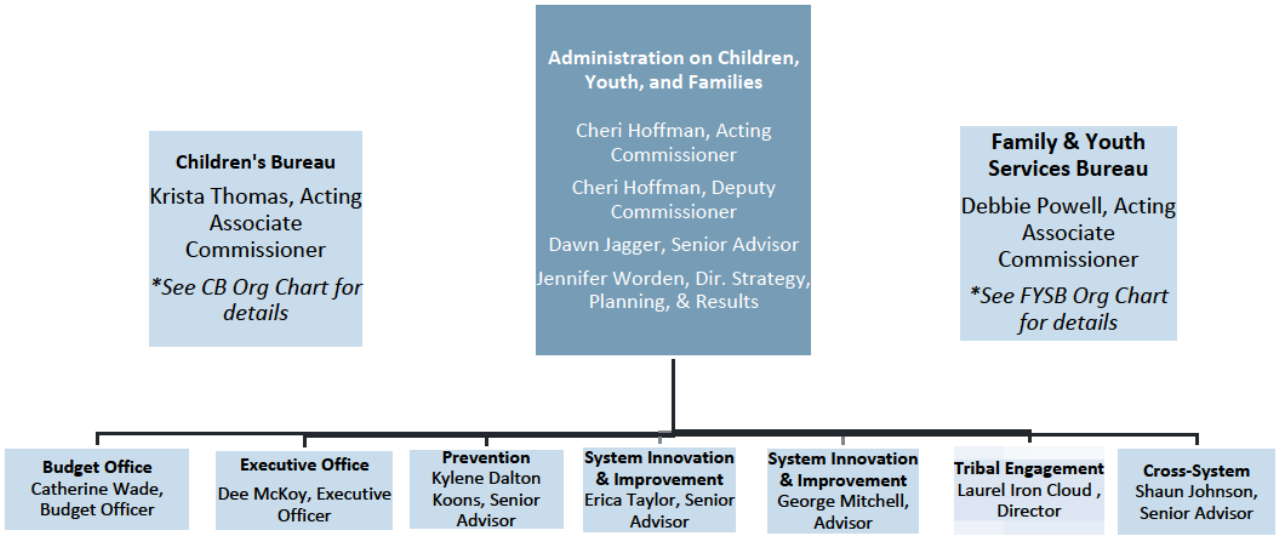
- PEP is responsible for oversight of program evaluation; developing reports (annual Report to Congress on Outcomes and Effectiveness), data analyses, and organizational studies to inform program improvement; and T/TA efforts.
- The Policy division evaluates, and coordinates policy issuances affecting grant recipients and Native American communities and develops strategies to address issues raised in tribal consultations.

ADMINISTRATION ON CHILDREN, YOUTH AND FAMILIES (ACYF)

Office Overview: Major Functions

The Administration on Children, Youth & Families (ACYF) sets priorities, vision, and oversight for the Children's Bureau (CB) and the Family and Youth Services Bureau (FYSB), including work to:

- *Strengthen Families* such that they have the opportunities, resources, and supports to raise their children in their own homes and communities and prevent entry into ACYF systems and programs.
- Enhance *Engagement and Collaboration for Prevention* across health and human services delivery in communities.
- Promote the sustained *Well-Being* of children within families and communities.
- Use *Evidence and Data* to drive innovation and policymaking to improve the lives of children, youth, and families.
- *Promote Excellence* in all aspects of ACYF's operations and foster a positive workplace and engaged workforce.



ACYF is led by a Presidentially appointed and Senate-confirmed Commissioner and a career Senior Executive Service Deputy Commissioner. A career team of Senior Advisors and other staff support the Commissioner and Deputy Commissioner in executing the vision and mission of ACYF, ensuring that the goals of the agency are efficiently achieved. ACYF oversees communications, administrative and budget functions, and strategic planning for all programs. These programs provide policy guidance and financial assistance to tribes, territories, and states, as well as grant recipient community-based organizations and academic institutions, to provide services to children, youth, and families. These resources carry out research and demonstration activities; manage learning opportunities and training; provide technical assistance, data, analytics, and compliance review; peer to peer learning; and disseminate information.

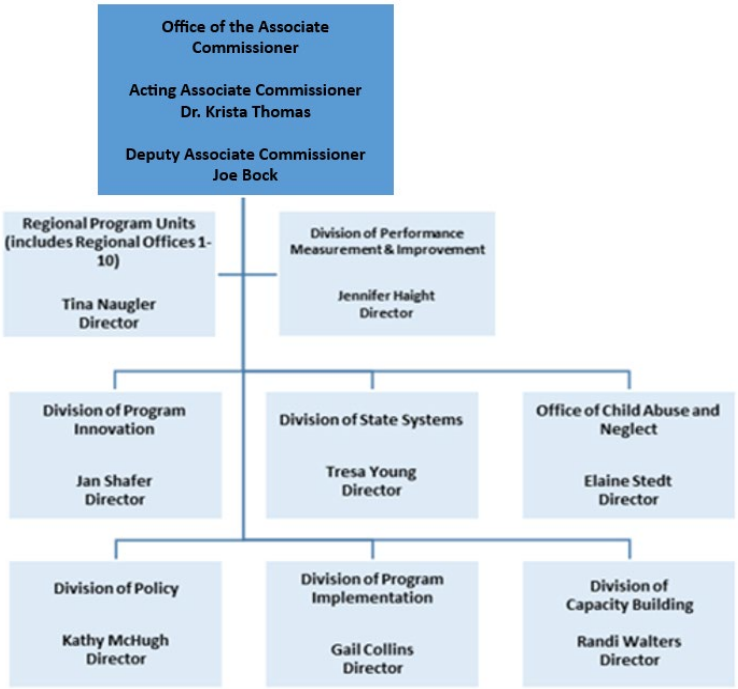
The Bureaus of ACYF work to achieve their mission through the following major activities:

- Providing program guidance on federal law, policy, and regulations
- Funding essential services, helping states and tribes operate every aspect of their service delivery systems
- Supporting social service innovation through peer-reviewed research and program development grants
- Providing training and technical assistance to improve service delivery
- Collaborating with states, territories, and tribes to improve service and achieve optimal outcomes for children, youth, and families

- Sharing research with children, youth, and family professionals to assist in the improvement of services.

The **Office of the ACYF Commissioner** is comprised of the Commissioner; Deputy Commissioner; a Director of Tribal Engagement, a Director of Strategy, Planning, and Results; a team of Senior Advisors on prevention, system innovation and improvement, cross-system policy, and tribal engagement; Special Assistants; Executive Assistant; Executive Officer and Budget Officer; and accompanying management and budget analysts. As a team, they provide the administrative (including Human Resources), budget, organizational and staff development, and program policy support for CB and FYSB. They amplify and elevate the work and accomplishments of the Bureaus, work in partnership with managers and staff, and are "force multipliers" on projects or goals of each Bureau. Presidentially appointed CB and FYSB Associate Commissioners report to the ACYF Commissioner and intentionally collaborate to achieve ACYF goals. See CB and FYSB Office Overviews for details on bureau organizational structure.

CHILDREN'S BUREAU (CB)



Office Overview: Major Functions

The Children's Bureau is the oldest federal agency for children (marking its centennial on April 9, 2012). It currently administers the Federal child welfare programs. With a budget of over $12 billion, the Bureau administers entitlement, formula, and discretionary grants.

The Children's Bureau directs the implementation of comprehensive monitoring protocols and data collection systems designed to assess and ensure states meet the standards and outcomes established for the federal child protection, adoption, foster care, and guardianship programs. National technical assistance efforts support best practices in child welfare programming to facilitate achievement of federal outcomes. The Bureau funds the development of innovative strategies for addressing barriers to outcome achievement through our service demonstration grant programs and research.

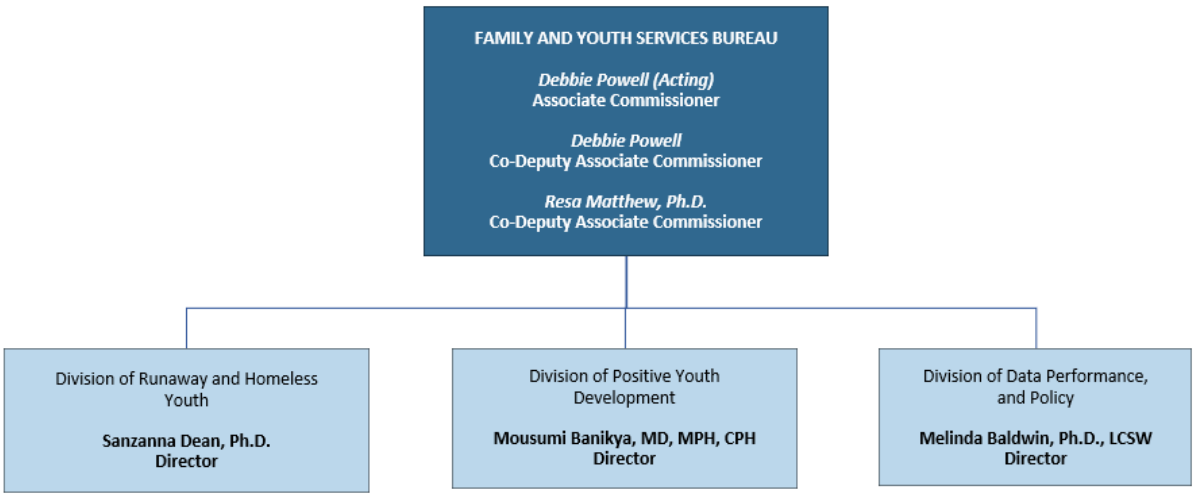
Organizational Design and Leadership

The Bureau is comprised of seven divisions in Central Office and 10 regional offices.

FAMILY AND YOUTH SERVICES BUREAU (FYSB)

Office Overview: Major Functions

The Family and Services Bureau (FYSB) administers grants to organizations that work to promote youth well-being, prevent, and end youth homelessness, and support a holistic adolescent approach by fostering collaborative partnerships across communities; leading in partnership with youth and young adults; promoting diversity, equity, inclusion, and accessibility; and supporting data-driven practices. The Bureau is comprised of the three divisions listed below, which includes two individual program divisions and one program support division.



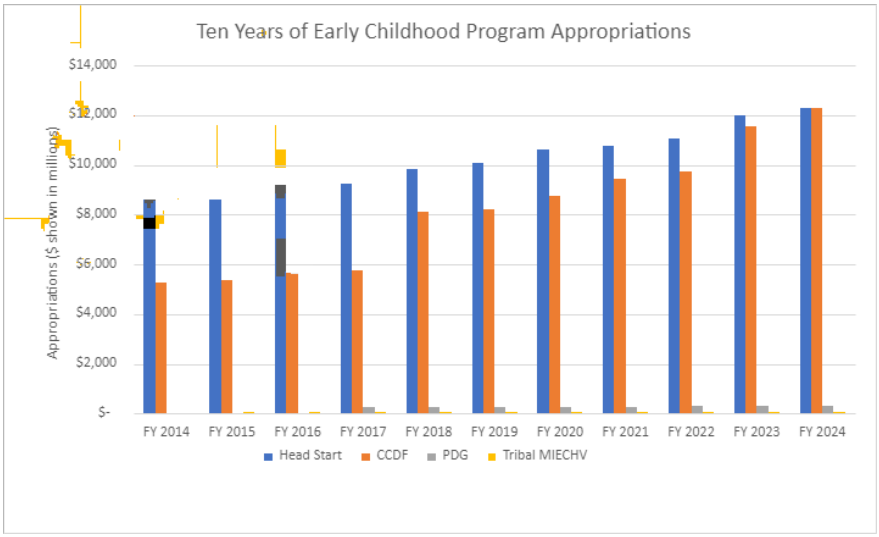
1. **Division of Runaway and Homelessness Youth (DRHY):** Administers the Runaway and Homeless Youth (RHY) Program that provides emergency shelter and comprehensive supportive services, street outreach, and longer-term transitional living and maternity group home programs to address the needs of youth who have runaway, are experiencing homelessness, or housing instability. Funding is administered to public and private organizations to address the needs of youth within their communities.
2. **Division of Positive Youth Development (DPYD):** Administers Adolescent Pregnancy Prevention (APP) Programs through grants and co-operative agreements awarded to states, territories, tribes, and community-based organizations to establish programs that promote positive youth development (PYD) and support APP efforts.
3. **Division of Data, Performance, and Policy (DDPP):** Provides leadership and direction for FYSB by informing program and policy development, innovation through evaluation methodologies, data collection and monitoring, and data analysis and conducts policy development and guidance for the two other FYSB divisions (DRHY and DPYD).

Organizational Design and Leadership

The Family and Youth Services Bureau is within the Administration on Children, Youth and Families and is led by the FYSB Associate Commissioner and Deputy Associate Commissioner.

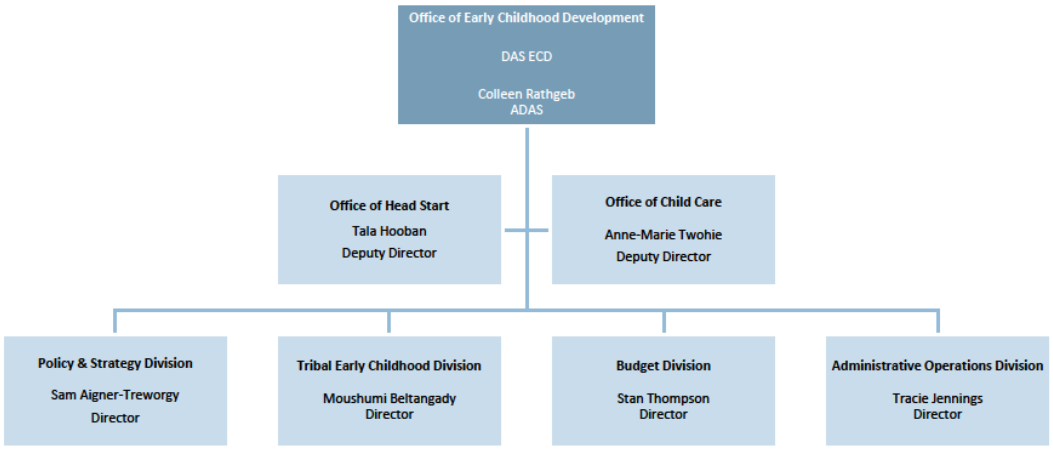
ADMINISTRATION FOR CHILDREN & FAMILIES

ACF Overview FY 2025



OFFICE OF EARLY CHILDHOOD DEVELOPMENT (ECD)

Office Overview: Major Functions



The Office of Early Childhood Development (ECD) is responsible for providing leadership, oversight, and coordination of early childhood systems and programs representing a total of nearly $25 billion and over one-third of ACF funding. ECD provides administrative, budget, policy, and other cross-cutting support across the Office of Child Care and the Office of Head Start, and directly administers the Preschool Development Grants Birth through Five (PDG B-5) and Tribal Maternal, Infant, and Early Childhood Home Visiting (Tribal MIECHV) programs. The Office of Child Care and the Office of Head Start leadership report to the Deputy Assistant Secretary for ECD, and the three offices work closely together to support a strong early childhood sector.

ECD oversees the administration of four early childhood programs with a total budget of $24.9B in FY24. Federal investment in early childhood programs has increased over the last decade.

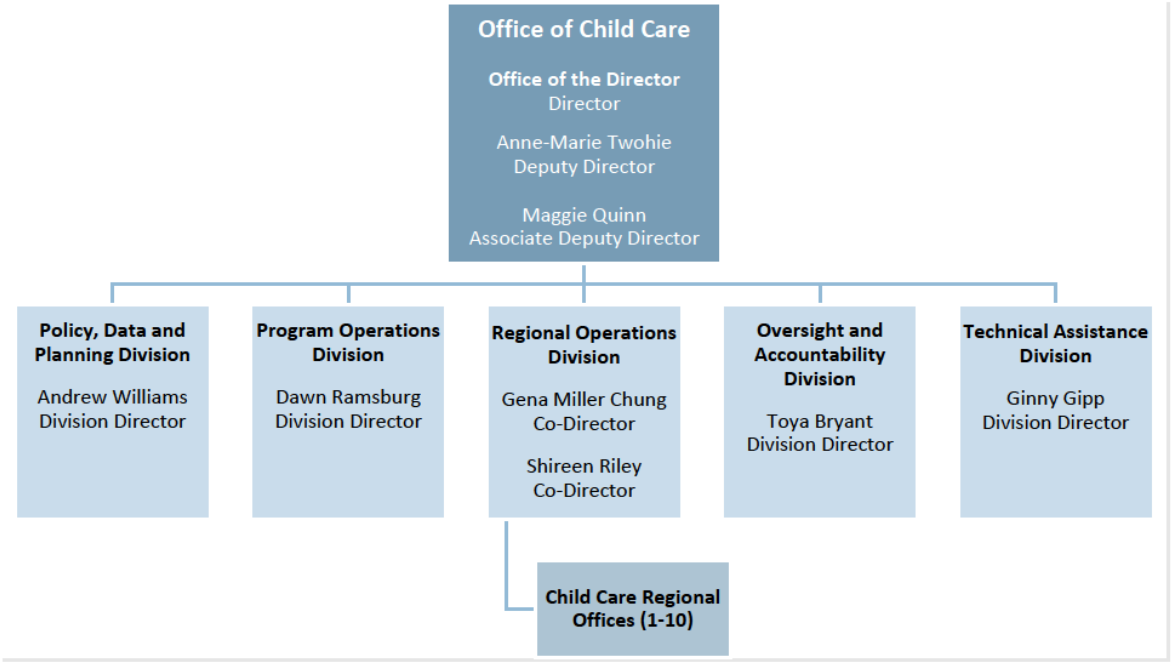
Organizational Design and Leadership

The Office of Early Childhood Development (ECD) provides administrative, budget, and programmatic support across all ECD offices, and administers the PDG B-5 and Tribal MIECHV grant programs. A total of 402 staff are currently serving across all ECD offices, including 50 staff within the Immediate Office of ECD, which contains four divisions: Administrative Operations, Budget, Policy and Strategy and Tribal Early Childhood Divisions.

- **The Policy and Strategy Division** administers the PDG B-5 program to states and territories, aimed at helping them build early childhood systems that support efficient and effective use of public dollars to best serve children and families. The Division also oversees two system-level research/TA centers and coordinates across federal TA resources to support state and local ECE systems leaders. The Division implements systems across OHS, OCC and ECD to support program alignment, and supports the ECD DAS and ADAS on early childhood program, policy, oversight, and budget formulation in line with Administration priorities.
- **The Tribal Early Childhood Division** administers the Tribal MIECHV program and the Tribal Early Learning Initiative (TELI) and supports implementation and coordination of early childhood programs and systems in tribal communities, coordinates tribal early childhood systems and activities across OHS, OCC, ECD and the federal government, leads engagement with Tribal leaders, and supports the DAS and ADAS on tribal early childhood program and policy matters.
- **The Budget Division** is responsible for budget execution and budget analysis to inform decision making, spending plans, and proposals across ECD, OHS, and OCC with the leadership of each office. Ensures timely and appropriate use of program funds across grants, ensuring budgetary resources are used in a manner consistent with appropriations.
- **The Administrative Operations Division** provides administrative and human resources support to ECD, OCC, and OHS. Leads recruitment, hiring and administrative onboarding, timekeeping, and personnel actions; travel; professional development; space management (for Central Office); and equipment and supplies management.

OFFICE OF CHILD CARE (OCC)

Office Overview: Major Functions



The Office of Child Care (OCC) administers the Child Care and Development Fund (CCDF), also referred to as the Child Care and Development Block Grant (CCDBG), which provided $12.3 billion in FY 2024 to state, territory, and tribal governments for financial assistance to help families with low income afford child care for children from birth to age 13 and to improve the quality of child care for all children. CCDF supports parent choice and access to care and promotes children's healthy development and learning by supporting child care licensing, quality improvement systems to help programs meet higher standards, and training and education for child care workers. OCC develops policy guidance, reviews triennial plans, delivers technical assistance, supports grant recipients in program implementation and administration, monitors for compliance, supports research, and broadly provides oversight to guide grant recipients' implementation of CCDF.

Organizational Design and Leadership

OCC has 114 federal employees and 15 contractors organized in the Office of the Director and five programmatic divisions in the central office, and 10 regional offices. The Deputy Director oversees the regional operations, technical assistance, and oversight and accountability divisions. The Associate Deputy Director oversees the program operations division; policy, data, and planning division; tribal work; and budget and administrative operations. Budget execution and administrative operations functions for OCC are housed in the Office of Early Childhood Development (ECD).

ADMINISTRATION FOR CHILDREN & FAMILIES

ACF Overview FY 2025

The **Office of the Director** sets the strategic and operational direction for the office, manages large-scale or high-profile activities involving multiple areas of OCC responsibility, manages budget resources and administrative work in partnership with ECD, and leads coordination with other ACF offices.

The **Policy, Data, and Planning Division** supports policy interpretation and develops guidance, leads policy development aligned with Administration priorities, leads budget formulation and coordinates grant award actions with the Office of Grants Management (OGM), provides technical assistance on legislative issues to Congress, manages administrative data collection and analysis, prepares reports, manages IT projects, and serves as the liaison for Government Accountability Office (GAO) studies.

The **Program Operations Division** develops and leads review of triennial CCDF state/territory and tribal plans, plan amendments, and waiver requests; reviews and approves tribal construction and Pub. L. 102-477 integration plans.

The **Regional Operations Division** manages and coordinates the work of the ten regional offices in partnership with the other Central Office divisions and represents the regional perspective in Central Office discussions and decisions.

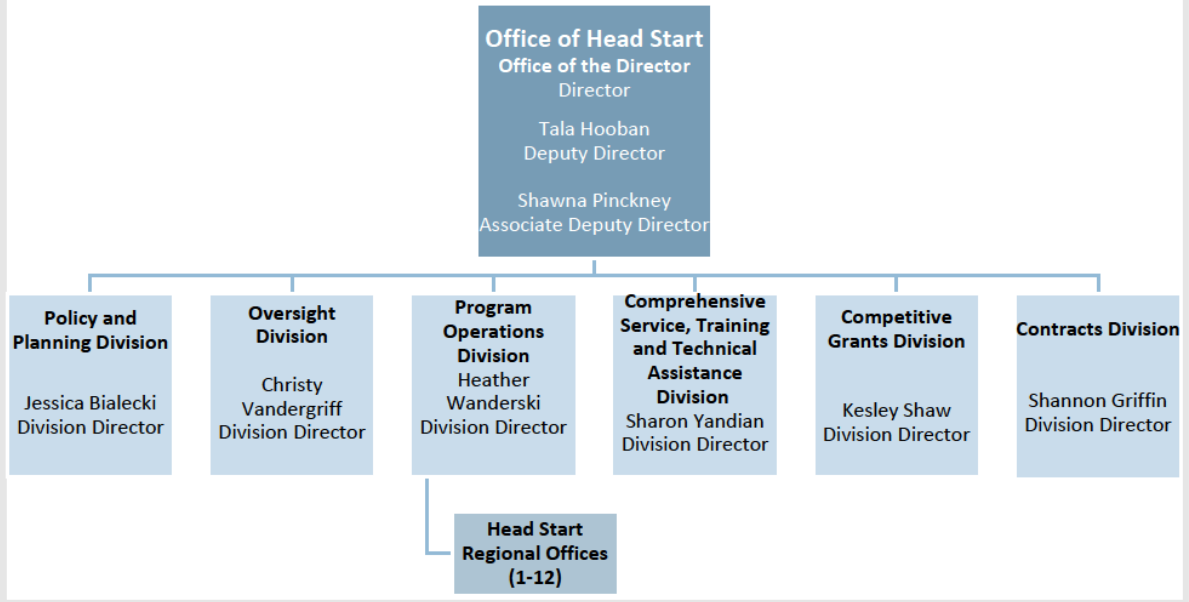
The **Oversight and Accountability Division** monitors lead agencies' implementation of CCDF provisions, conducts improper payment and error rate review, and reviews audits in collaboration with the Office of Grants Management (OGM), and serves as the liaison for Office of Inspector General (OIG) audits.

ADMINISTRATION FOR CHILDREN & FAMILIES

ACF Overview
FY 2025

The **Technical Assistance Division** supports state, territory, and tribal CCDF lead agencies in implementing CCDF requirements, provides oversight to TA National Center contracts, promotes best practices for high-quality child care programs, and manages OCC's websites and announcements.

OFFICE OF HEAD START (OHS)



Office Overview: Major Functions

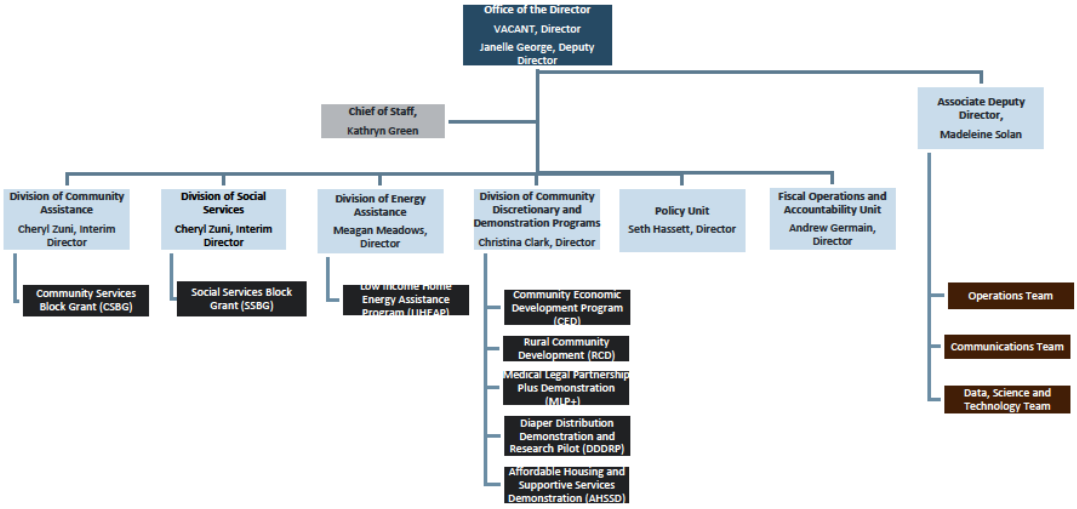
The Office of Head Start (OHS) administers the Head Start program, providing Head Start Preschool and Early Head Start services to support children's growth from birth to age 5 through services centered around early learning and development, health, and family well-being. OHS provided $12 billion in grant funding in FY2024 and provides oversight to approximately 1,600 private nonprofit and for-profit organizations, public agencies, Tribal governments, and school systems. OHS develops policy guidance, delivers training and technical assistance (TTA) system to assist grant recipients in providing high-quality early childhood education to eligible young children and their families.

Organizational Design and Leadership

- OHS has 235 federal employees across 7 divisions, and 12 regional offices.
- **The Office of the Director (OD)** oversees operational and long-range planning for OHS. The Division manages large-scale or high-profile activities involving multiple OHS areas of responsibility. OD manages information system and digital strategy across OHS, along with communications, including media relations, digital platforms, correspondence, Freedom of Information Act (FOIA) requests, and records management. The Deputy Director oversees policy and planning, oversight, comprehensive services, training and technical assistance, communication, and information systems teams. The Associate Deputy Director oversees program operations, competitive grants, and contracts.
- **The Policy and Planning Division** supports policy development and budget formulation aligned with administration priorities, interprets policy, develops guidance, provides technical assistance on legislative issues to Congress and prepares reports and serves as liaison to Office of Inspector General and Government Accountability Office.
- **The Oversight Division** assesses grantee performance, quality improvement, and compliance with applicable requirements and regulations through monitoring.
- **The Program Operations Division** provides oversight, direction, and guidance to the 12 Regional Offices, manages grantee operations, and Head Start program-level data systems, and oversees disaster recovery planning and award of supplemental funding. The **Regional Offices** administer funding and provide ongoing oversight and management to individual grant recipients.
- **The Comprehensive Services and Training and Technical Assistance Division (CSTTA)** provides leadership and support to Head Start Programs to implement high-quality comprehensive services. Through oversight and direction of the OHS TTA System, collaboration with federal agencies and other organizations, the Division builds knowledge, skills, and effective practices in early childhood development.

- **The Competitive Grants Division** manages discretionary grant competitions and provides oversight of interim grant management.
- **The Contracts Division** conducts ongoing oversight and monitoring of all OHS contracts. Provides expert technical assistance and guidance to OHS Contracting Officer Representatives on acquisitions and contract administration.

OFFICE OF COMMUNITY SERVICES (OCS)



Office Overview: Major Functions

The Office of Community Services (OCS) partners with states, communities, and agencies to reduce the causes of poverty, increase opportunity and economic security of individuals and families, and revitalize communities. OCS administers over $6.5 billion in mandatory, discretionary, and demonstration grants through four programmatic divisions and nine social service and community development programs:

- Affordable Housing and Supportive Services Demonstration (AHSSD): provides funding to owners of affordable housing properties to offer supportive services for their residents (e.g., financial literacy)
- Community Economic Development (CED): discretionary grants are awarded to non-profit community development corporations in disinvested communities for purposes of creating new jobs for low-income individuals, including Temporary Assistance for Needy Families recipients.
- Community Services Block Grant (CSBG): provides funds to states, tribes and territories to support services designed to ameliorate the causes and conditions of poverty by assisting low-income individuals, families and communities with services based on local needs, including employment, education, and adequate housing.
- Diaper Distribution Demonstration and Research Pilot (DDDRP): expands existing diaper distribution networks to address diaper need as well as connect individuals and families with support services to increase economic mobility.
- Low Income Home Energy Assistance Program (LIHEAP): provides funds to states, tribes and territories to assist low-income households in meeting home energy costs.
- Low Income Household Water Assistance Program (LIHWAP): provides funds to assist households with low-income with their water and wastewater bills. **NOTE: Funding is no longer available for LIHWAP.**
- Medical Legal Partnership Plus (MLP+): a demonstration grant program designed to increase capacity of MLPs to provide comprehensive legal services and wraparound social services.
- Rural Community Development (RCD): a discretionary grant program providing technical assistance to assist low-income communities in developing affordable, safe, water and wastewater treatment facilities.
- Social Services Block Grant (SSBG): provides funding to states and territories to increase economic self-sufficiency, prevent or ameliorate neglect, abuse, or the exploitation of children and adults, prevent, or reduce inappropriate institutionalization, and secure referrals for institutional care.

Organizational Design and Leadership

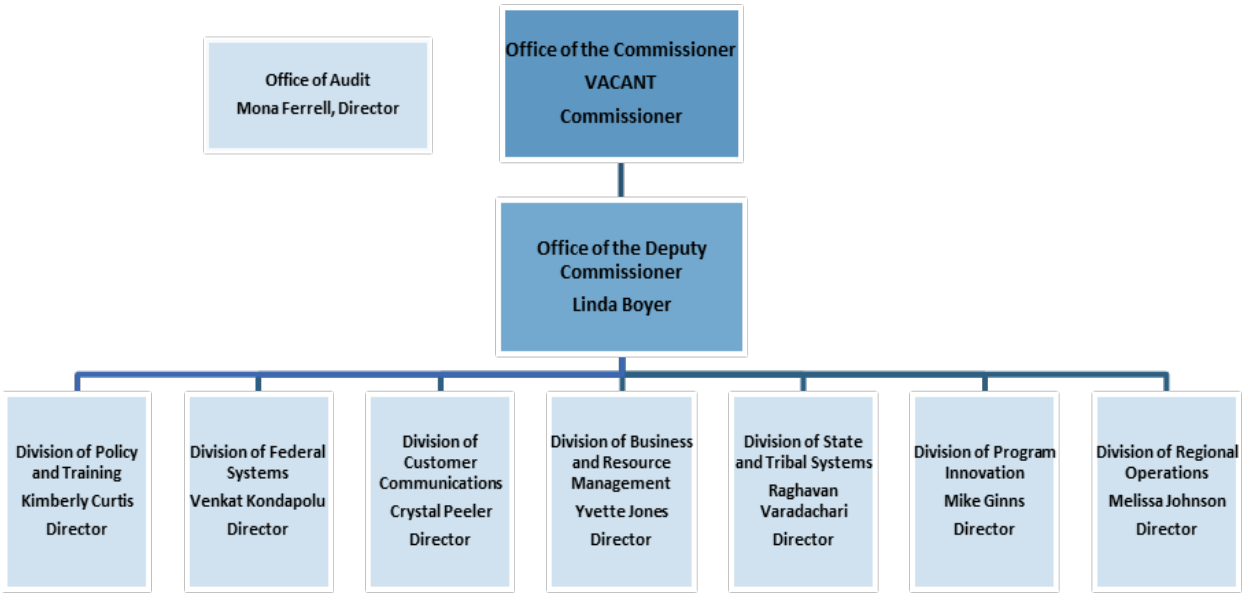
The Office of the Director provides policy, program, and operational leadership to approximately 90 staff members which includes federal employees, contractors, and fellows/organization affiliates. The OCS Director (political) provides executive direction and leadership to the OCS and coordinates all elements of the Office. The Deputy Director (career civil servant) assists the Director in carrying out the responsibilities of the Office and provides day-to-day supervision and oversight of OCS' four divisions and anti-poverty programs. The Associate Deputy Director (career civil servant) provides day-to-day supervision and oversight of all OCS operations, including human resources, acquisitions, communications, and data science and technology. The Chief of Staff assists the Deputy Director and Associate Deputy Director in carrying out the mission of OCS, supporting external and cross-department and intragovernmental collaborations, leading special projects, and supporting program leaders.

OFFICE OF CHILD SUPPORT SERVICES (OCSS)

Office Overview: Major Functions

OCSS's purpose is to partner with federal, state, tribal, and local governments, and other organizations to promote parental responsibility so children receive reliable support from both of their parents as they grow to adulthood. OCSS helps child support agencies in the states and tribes develop, manage, and run their programs effectively and according to federal law by:

- Financially supporting child support program operations
- Providing grants for state Access and Visitation programs
- Providing policy guidance and technical assistance
- Conducting audits and educational programs
- Supporting research and providing grants for program improvement
- Operating the Federal Parent Locator Service (FPLS) and the National Directory of New Hires (NDNH)
- Working with states to provide limited enforcement services such as federal tax refund intercepts and passport denials
- Working with employers and other private and public partners
- Helping to establish policy and training for intergovernmental child support cases



The child support program annually measures and reports its progress toward meeting these goals by making sure all children in child support cases (1) have paternity established; (2) have appropriate support orders; (3) receive timely and consistent financial support from parents as ordered; (4) receive payments on overdue support; and (5) are provided with efficient and responsive customer service in its program operations.

Organizational Design and Leadership

The Commissioner carries out the OCSS mission, maintains day-to-day operational responsibility for the program office, provides direction and leadership, and directly oversees the Office of Audit. The Deputy Commissioner reports to the Commissioner and provides day-to-day supervision and oversight of the Division of Federal Systems; Division of State and Tribal Systems; Division of Business and Resource Management; Division of Customer Communications; Division of Policy and Training; Division of Program Innovation; and Division of Regional Operations.

ADMINISTRATION FOR CHILDREN & FAMILIES

ACF Overview FY 2025

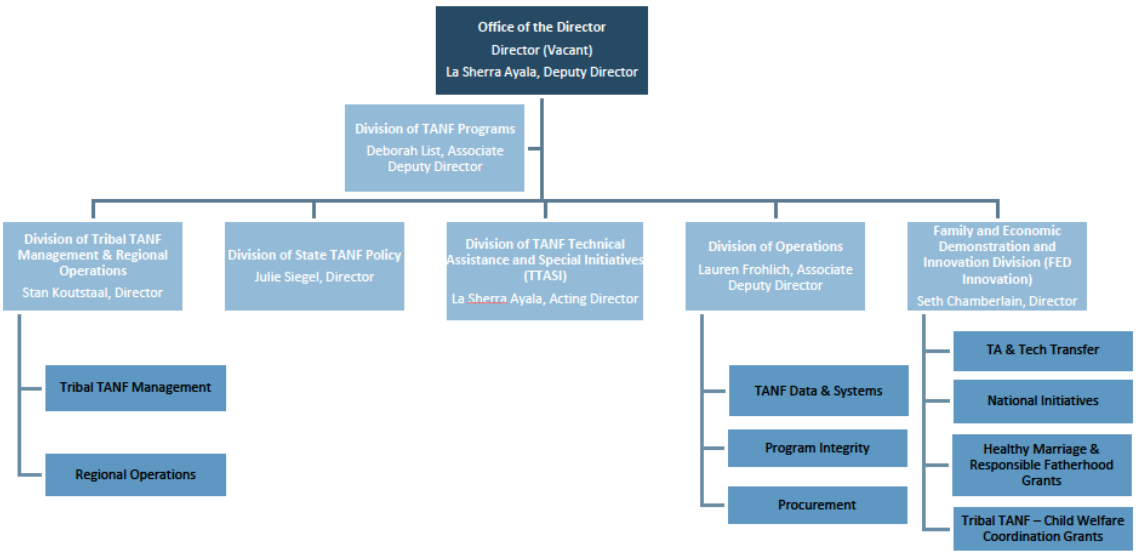
OFFICE OF FAMILY ASSISTANCE (OFA)

Office Overview: Major Functions

The Office of Family Assistance (OFA) administers federal grant programs that foster family economic security and stability, including the Temporary Assistance for Needy Families (TANF) program and the Tribal Temporary Assistance for Needy Families (Tribal TANF) program, Native Employment Works (NEW), Healthy Marriage and Responsible Fatherhood (HMRF) grants, and Tribal TANF-Child Welfare (TT-CW) Coordination grants.

The TANF program provides a fixed block grant to states, territories, and the District of Columbia to operate cash assistance programs and related services. Additionally, federally recognized American Indian tribes and Alaska Native organizations may elect to operate their own TANF programs.

OFA administers the NEW program to support tribal education, training, and employment activities. OFA also partners with the Bureau of Indian Affairs in the Department of Interior in working with federally recognized tribes and tribal consortia that coordinate their employment, training, and related services programs, including TANF and NEW, in an integrated plan and budget under Public Law 102-477.



OFA competitively awards HMRF grants to states, local governments, tribal entities, and community-based organizations. Additionally, OFA also administers eight grants to improve coordination of Tribal TANF and child welfare services provided to tribal families at risk of child abuse or neglect.

Organizational Design and Leadership

The Office of the Director provides policy, program, and operational leadership to OFA's approximately 70 staff in both the central and regional offices. OFA's Central Office includes divisions that oversee state and Tribal TANF programs, operations (including TANF data and systems), technical assistance, state TANF policy, and demonstrations and innovations (including HMRF and TTCW grants). In addition to the central office, OFA has offices in all 10 of ACF's regions that typically serve as the first direct link to state and grantees.

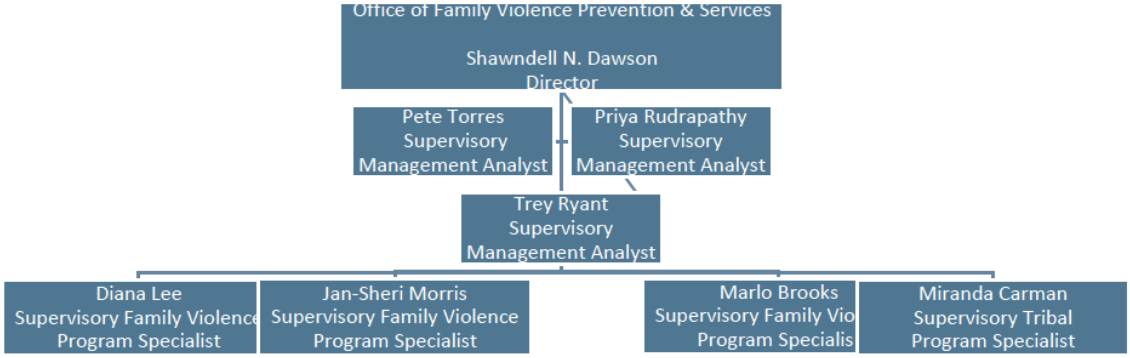
ADMINISTRATION FOR CHILDREN & FAMILIES

ACF Overview
FY 2025

OFFICE OF FAMILY VIOLENCE AND PREVENTION SERVICES (OFVPS)

Office Overview: Major Functions

Enacted into law since 1984 under the Child Abuse Prevention and Treatment Act (42 U.S.C. § 10401 - 10414), the Family Violence Prevention and Services Act (42 U.S.C. § et seg) (FVPSA) funds the federal response system to ensure vital crisis services and shelters are available to individuals experiencing domestic violence, dating violence, and family violence and their dependents.



The Office of Family Violence Prevention and Services (OFVPS) administers FVPSA funding and FVPSA grant programs with statutorily required services for the purposes of:

- Providing immediate shelter and supportive services for individuals experiencing domestic or dating violence and their dependents,
- Increasing public awareness and primary prevention of domestic and dating violence,
- Operating a national domestic violence hotline,
- Providing for specialized services to abused parents and their children, and
- Providing technical assistance and training relating to domestic and dating violence to local public agencies, non-profits, tribal organizations, and others, including the establishment of state domestic violence coalitions and national resource centers.

FVPSA Grant Programs include:

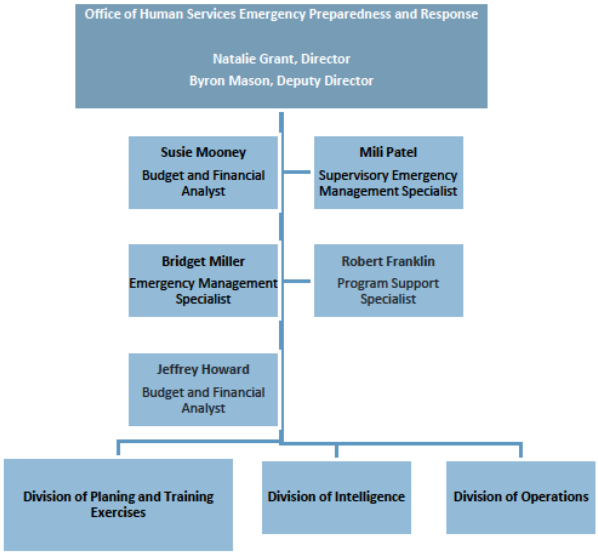
- Non-Competitive Mandatory/Formula Grants
    - State and Territorial Formula Grants
    - Native American Tribes Formula Grants
    - State and Territory Domestic Violence Coalitions Grants
- Competitive Discretionary Grants
    - Specialized Services to Abused Parents and their Children
    - Training and Technical Assistance Resource Centers Grants
    - National Domestic Violence Hotline Grants

Organizational Design and Leadership

OFFICE OF HUMAN SERVICES EMERGENCY PREPAREDNESS AND RESPONSE (OHSEPR)

Office Overview: Major Functions

OHSEPR is the emergency management office for ACF. OHSEPR promotes resilience of individuals, families, and communities prior to, during, and after federally declared disasters and public health emergencies.



OHSEPR provides leadership across ACF in planning, policy, and operations for emergency and disaster preparedness, response, and recovery. Additionally, OHSEPR provides disaster human services expertise to ACF grantees, partners, and stakeholders.

OHSEPR serves as the lead for HHS for Emergency Support Function #6 (ESF#6) – Mass Care, Emergency Assistance, Housing, and Human and Services planning, training, exercises, and operations. Additionally, OHSEPR directly administers the following programs:

- **Disaster Human Services Case Management (DHSCM) Program:** The DHSCM Program supports states, tribes, and territories in establishing the capacity to coordinate and provide disaster case management services. OHSEPR maintains the capability to deploy DHSCM teams to connect disaster survivors to resources and services that support their individual and family recovery from disaster. OHSEPR executes Immediate Disaster Case Management (IDCM) Program missions on behalf of the Federal Emergency Management Agency (FEMA) by deploying credentialed and trained disaster case managers to identify a disaster survivor's unmet needs, develop recovery plans, and connect them with resources.
- **U.S. Repatriation Program:** The U.S. Repatriation Program provides temporary assistance to private U.S. citizens and their dependents returned to the United States by the Department of State because of (1) destitution, illness, war, threat of war, or a similar crisis, and are without available resources or (2) mental illness.
- **ACF Continuity of Operations:** The Continuity of Operations (COOP) plan directs how ACF's mission essential functions (MEFs) are performed during a wide range of disruptions or emergencies. OHSEPR is responsible for executing two of the agency's five MEFs when the agency's COOP plan is activated: (1) Maintaining repatriation functions during times of peace and international crisis and (2) Continuing disaster human services support to ESFs #6, #8 Public Health and Medical Services, and the Health and Social Services Recovery Support Function.

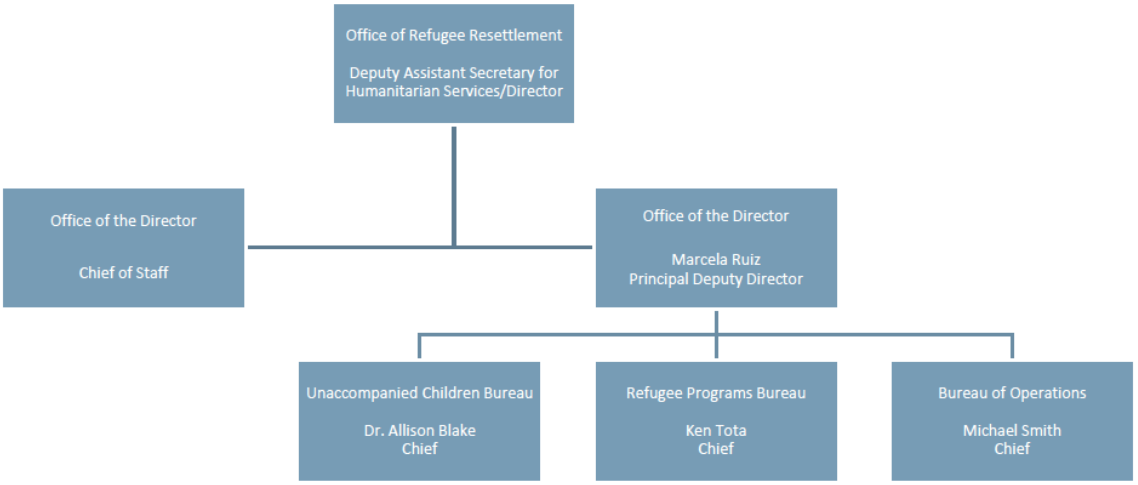
Organizational Design and Leadership

OHSEPR is led by the Director and Deputy Director. OHSEPR is comprised of the Office of the Director and three Divisions: Operations; Intelligence; Planning, Training, and Exercises.

OFFICE OF REFUGEE RESETTLEMENT (ORR)

Office Overview: Major Functions

The Office of Refugee Resettlement (ORR) promotes the health, well-being, and stability of refugees, unaccompanied children, and other eligible individuals and families, through culturally responsive, trauma-informed, and strength-based services. ORR is comprised of three distinct bureaus: the Refugee Program Bureau (RPB), the Unaccompanied Children Bureau (UCB), and the Bureau of Operations (BOO). The bureau chiefs report to the Office of the Director (OD).



Refugee Program Bureau (RPB) – The RPB programs aim to promote long-term self-sufficiency, assimilation, and well-being. Over the past four decades, Congress has expanded ORR's authority to serve refugees, asylees, Cuban/Haitian Entrants, Amerasians, victims of human trafficking, Special Immigrants from Iraq and Afghanistan, certain Afghan and Ukrainian Humanitarian Parolees, survivors of torture and their families, unaccompanied refugee minors, and certain Special Immigrant Juvenile Status or U status minors. Key RPB programs include the Refugee Career Pathways Program and economic development opportunities, the Matching Grant Program – which helps refugees and other eligible populations overcome barriers to employment with the goal of achieving economic self-sufficiency, entrepreneurship and business development, and youth engagement and mentoring.

Unaccompanied Children Bureau (UCB) – The UCB is responsible for providing care and services to unaccompanied children (UC) who are in federal custody by reason of their immigration status and are referred to ORR for care and custody, pursuant to the Homeland Security Act of 2002 and the William Wilberforce Trafficking Victims Protections Reauthorization Act of 2008. The Bureau maintains statistical information and data on each child and any actions concerning the child while the child is under the Director's care, oversees receipt and investigations of allegations of abuse, and monitors and inspects facilities and placement locations in which unaccompanied children reside. UCB staff ensure services are administered in a manner that supports child welfare standards of care and services, ensuring consideration of the child's best interest in care and custody decisions.

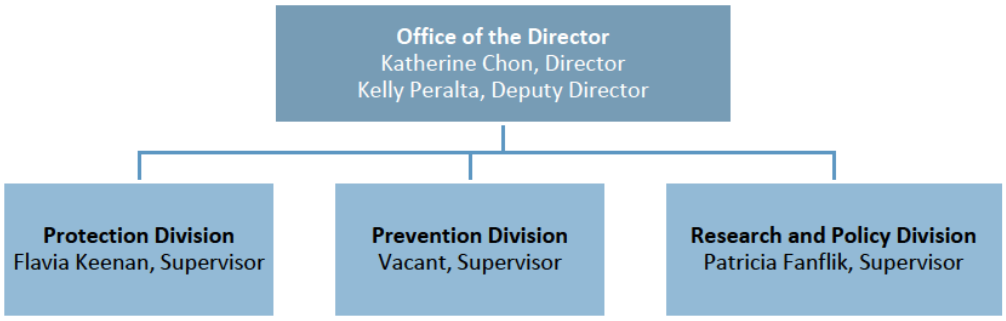
Bureau of Operations (BOO) – The BOO oversees the resourcing of operational requirements in support of ORR's mission. The Bureau of Operations receives mission requirements (budget, acquisitions, human resource requirements, and technology) and provides resources as directed by the ORR Director/DAS–HS and Principal Deputy Director. The team coordinates with ORR, ACF, and HHS counterparts to ensure regulatory compliance and timely response to requirements and maintains a customer service focus in meeting needs.

Organizational Design and Leadership

ORR senior leadership is comprised of the Deputy Assistant Secretary for Humanitarian Services/Director of ORR, Chief of Staff, and a Principal Deputy Director from the Senior Executive Service. The main organizational components are the Unaccompanied Children Bureau, the Refugee Programs Bureau, and the Bureau of Operations, each led by a Chief from the from the Senior Executive Service. ORR has approximately 700 full time employees onboard.

OFFICE ON TRAFFICKING IN PERSONS (OTIP)

Office Overview: Major Functions



The Office on Trafficking in Persons (OTIP) is responsible for the overall leadership of anti-trafficking programs and services under the purview of ACF in coordination with other HHS divisions and federal partners. OTIP's Director advises the Assistant Secretary on the development of anti-trafficking strategies, policies, and programs to prevent human trafficking, build health and human service capacity to respond to human trafficking, increase victim identification and access to services, and strengthen the long-term health and well-being outcomes of survivors of human trafficking. OTIP serves as the Secretariat for the HHS Task Force to Prevent Human Trafficking, co-chaired by ACF and the Office of the Assistant Secretary for Health.

OTIP consists of three divisions:

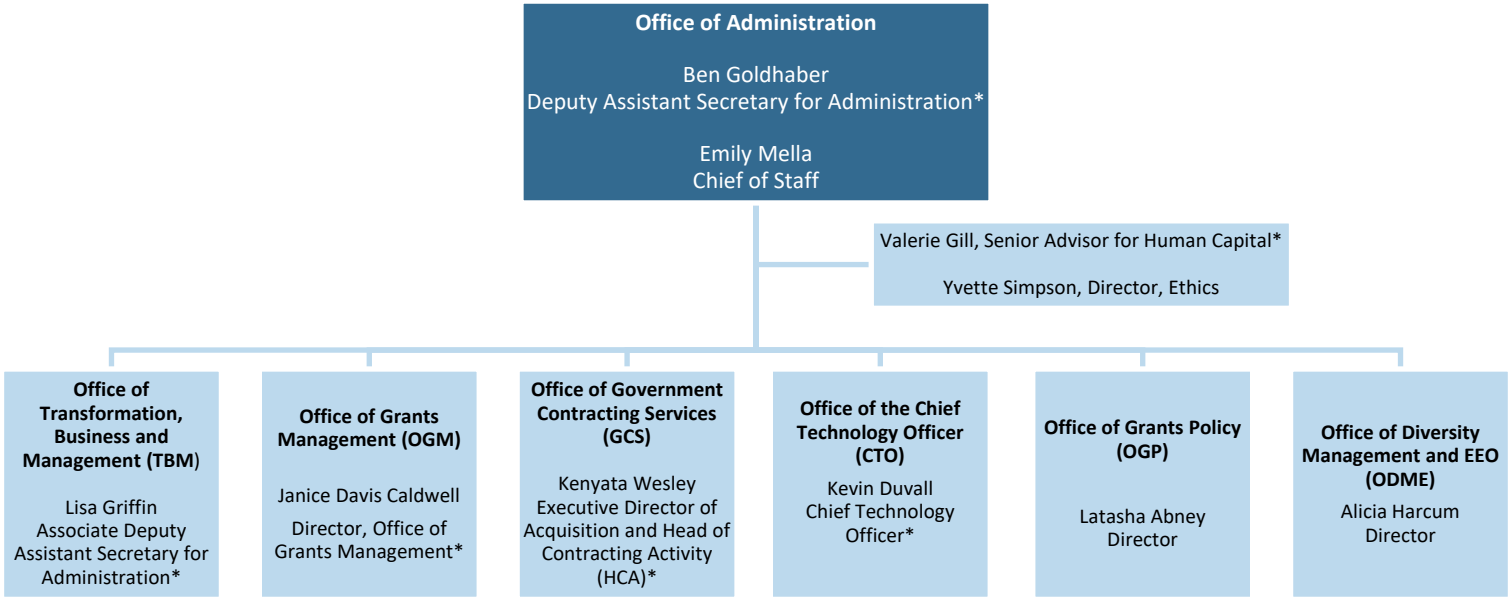
- **Protection Division:** OTIP funds community-based victim assistance grant programs and the National Human Trafficking Hotline. OTIP reviews requests for assistance received from federal, state, and local government agencies and non-governmental organizations and issues Adult Certification Letters and Child Eligibility Letters to victims of trafficking eligible for benefits and services authorized by the Trafficking Victims Protection Act.
- **Prevention Division:** OTIP builds the capacity of health and human service organizations to identify and respond to human trafficking through the National Human Trafficking Training and Technical Assistance Center, the SOAR Online trainings on human trafficking, regional coordination, and public-private partnerships. OTIP raises awareness about human trafficking through the Look Beneath the Surface p campaign and grant funding to local schools to implement skills-based human trafficking prevention education for school staff and students.
- **Research and Policy Division:** OTIP collaborates with other federal offices to strengthen understanding of human trafficking and effectiveness of prevention and response programs through data collection and analysis, program evaluations, and informational briefs on the implementation of federal legislation and topics of interest to grant recipients and organizations working to prevent human trafficking.

Organizational Design and Leadership

OTIP is led by a Director and Deputy Director and operates through three programmatic divisions (Protection, Prevention, Research and Policy).

Office of the Director
Katherine Chon, Director
Kelly Peralta, Deputy Director
Protection Division
Flavia Keenan, Supervisor
Prevention Division
Vacant, Supervisor
Research and Policy Division
Patricia Fanflik, Supervisor

OFFICE OF ADMINISTRATION (OA)



Office Overview: Major Functions

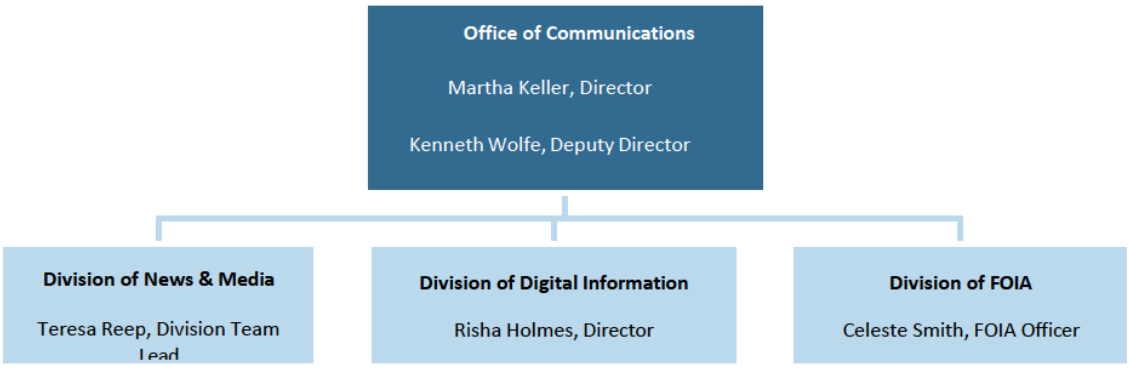
The Office of Administration (OA) leads or coordinates most management and administrative services for ACF and represents the following delegated roles for ACF: Chief Financial Officer (DASA), Head of Contracting Activity (Dir. GCS), Chief Grants Management Official (DASA), Settlement Official (DASA & OA COS), Deputy Ethics Official (DASA), and Chief Information Officer (CTO). Major activities include:

- **Managing grants to maximize ACF's investment in children and families** – comprehensive grants administration and policy from initial program planning to grant award and support throughout the entire lifecycle.
- **Procuring critical services for the agency through contracts** – planning, awarding, support, and supervision of ACF contracts, in partnership with program office acquisition managers, from start to finish.
- **Enabling programs through delivering and protecting technology** – technology expertise and services to translate service concepts into action while complying with federal information technology regulations.
- **Supporting ACF's workforce** – central programming and support for promoting employee development and wellbeing, provides key support and guidance for managers, and oversees formal processes to maintain the agency's commitment to ethical conduct and equal employment.
- **Managing the agency's business operations** – oversees shared services operations, performs functions of ACF's Chief Financial Officer, and provides for efficient utilization of resources.

Organizational Design and Leadership

OA is led by the Deputy Assistant Secretary for Administration who advises ACF leadership on all operational and administrative matters. OA has approximately 423 staff members onboard and is made up of 6 functional components:

*Positions are SES/SES equivalent.



OFFICE OF COMMUNICATIONS (OC)

Office Overview: Major Functions

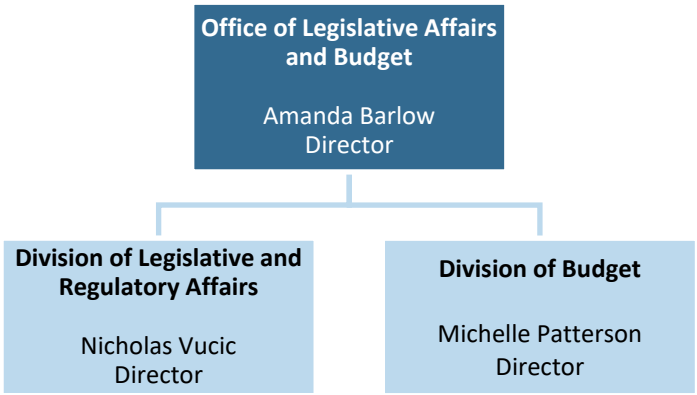
The Office of Communications (OC) develops, directs, coordinates, and implements communications strategy, media relations, digital communications, and communication services for ACF. OC provides leadership, direction, and oversight in promoting ACF's internal and external communications, policies, programs, and initiatives. OC oversees Freedom of Information Act (FOIA) requests; manages digital communications; and provides weekly media clips, a weekly internal newsletter, and communications product clearance services for ACF.

Organizational Design and Leadership

OC has the Office of the Director and three divisions. The Office of the Director provides direction and OC is comprised of the Office of the Director and three divisions. The Office of the Director provides direction and leadership in the areas of public relations policy and internal and external communications. The Division of News & Media coordinates news media relations strategy; responds to all media inquiries concerning ACF programs and related issues; develops fact sheets, news releases, feature articles for magazines and other publications on ACF programs and initiatives; manages preparation and clearance of speeches and official statements on ACF programs; and coordinates regional public affairs policies and activities pertaining to ACF programs and initiatives. The Division of Digital Information is responsible for managing ACF's public-facing digital presence. The Division of FOIA receives requests under the FOIA statute, elicits the requested records from program offices, reviews the records, redacts accordingly, and provides responses to the requestor.

OFFICE OF LEGISLATIVE AFFAIRS AND BUDGET (OLAB)

Office Overview: Major Functions



The Office of Legislative Affairs and Budget (OLAB) advises the Assistant Secretary for Children and Families, serving as the primary contact for HHS, the Executive Branch, and Congress on all ACF legislative, budget, and regulatory activities. OLAB is organized with two divisions with one focused on budget and the other on legislative and regulatory affairs.

The **Division of Legislative and Regulatory Affairs** coordinates the development of legislation ensuring that all proposed legislation supports ACF, Department, and Administration goals and priorities. The Division coordinates response to all Congressional inquiries, technical assistance requests, and Reports to Congress. The Division coordinates the preparation of briefing materials and testimony for the Assistant Secretary and other ACF leadership when appearing before Congress. The Division additionally manages the review and clearance of all ACF regulations and coordinates responses to GAO and OIG management engagements.

The **Division of Budget** prepares all major ACF budget documents, including the Congressional Justification and operating plans, and coordinates apportionment of the entire agency budget. As part of the budget development process, the Division forecasts budget authority, and outlays for mandatory spending programs. In addition, the Division administers the ACF Federal Administration budget, including funding for payroll and overhead costs and advises the Assistant Secretary on major administrative spending issues throughout the fiscal year.

Organizational Design and Leadership

OLAB currently has a total of 21 positions organized into three units: The Office of the Director, the Division of Budget, and the Division of Legislative and Regulatory Affairs.

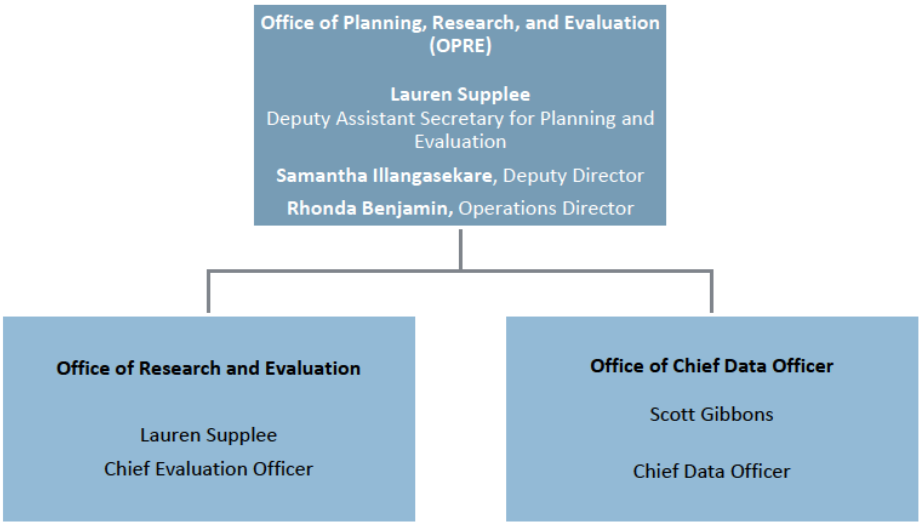
Office of Legislative Affairs and Budget
Amanda Barlow
Director
Division of Legislative and Regulatory Affairs
Nicholas Vucic
Director
Division of Budget
Michelle Patterson
Director

OFFICE OF PLANNING, RESEARCH AND EVLAUATION (OPRE)

Office Overview: Major Functions

OPRE serves as principal advisor to the Assistant Secretary for Children and Families on increasing the effectiveness and efficiency of programs designed to improve the economic and social well-being of children and families.

OPRE studies ACF programs and the populations they serve through rigorous research and evaluation projects using funds that Congress provides through several separate authorities. The office's work is guided by ACF's Evaluation Policy, which established five key principles to govern ACF's planning, conduct, and use of evaluation: rigor, relevance, transparency, independence, and ethics. OPRE also supports ACF programs in data-driven decision making by increasing the quality, usefulness, sharing, and analysis of data while protecting privacy and confidentiality. OPRE provides analytical support and technical assistance to ACF programs on effective data use.



OPRE carries out its work in close collaboration with ACF program offices. OPRE also coordinates several activities across ACF: Performance Management, Paperwork Reduction Act (PRA) compliance, data governance activities, and the ACF Data Community of Practice.

Organizational Design and Leadership

OPRE is led by the Deputy Assistant Secretary for Planning, Research, and Evaluation and the OPRE Deputy Director. It is composed of an Office of Research and Evaluation with three divisions focused on research and evaluation and an Office of the Chief Data Officer with two divisions focused on data, and an Office of the Director, which includes operational functions, budget, and administrative functions.

ADMINISTRATION FOR CHILDREN & FAMILIES

ACF Overview
FY 2025

FDA Functions: Statutory Requirements and Mission Support

OFFICE OF THE COMMISSIONER 3
- **Immediate Office of the Commissioner** 3
- **Office of the Chief Counsel** 3
- **Office of the Chief Medical Officer** 4
- **Office of the Chief Scientist** 4
- **Office of the Executive Secretariat** 5
- **Office of Digital Transformation** 5
- **Office of External Affairs** 5
- **Office of Minority Health [and Health Equity]** 6
- **Office of Operations** 6
- **Office of Policy, Legislation, and International Affairs** (OPLIA) 7
- **Office of Women's Health** 8

- **Office of Human Food Inspectorate** 39
- **Office of Import Operations** 40
- **Office of Medical Devices & Radiological Health Inspectorate** 40

OFFICE OF THE COMMISSIONER

- **Immediate Office of the Commissioner**
  - **Brief Overview:** Support the Commissioner and Principal Deputy Commissioner (PDC) in overseeing the full breadth of the FDA portfolio and execution of applicable laws.
  - **Functions Required by Statute:**
    - The Commissioner is responsible for direction and oversight of FDA (21 USC 393(d)).
    - Certain decisions/actions may not be delegated below the Commissioner, including suspension of certain registrations (21 USC 350d(b)(7), 364c), certain recalls (21 USC 350l, 364g), certain technology transfer agreements (15 USC 3710a(c)(5)(A)&(B)), and others.
  - **Other Functions in Support of Mission**
    - IO staff communicate the Commissioner's priorities to the Centers/Offices and work with them to advance cross-Center and high priority workstreams
    - IO staff keep the Commissioner and PDC informed about activities in the Centers/Offices so they can guide the agency and respond to external stakeholders
    - IO staff support the Commissioner and PDC through scheduling, ethics review, travel arrangements, clearing materials, preparing memoranda and talking points, and ensuring materials presented to the Commissioner are complete and responsive

- **Office of the Chief Counsel**
  - **Brief Overview:** Official source of legal advice to FDA and HHS officials on mission-critical activities. Provides legal advice on the interpretation of statutes and regulations, as well as the supportability of proposed actions and their judicial defensibility.
  - **Functions Required by Statute:**
    - Helps facilitate access to critical FDA-regulated products by advising on premarket, investigational use, and other applications/submissions (e.g., FDCA. 349, 505, 512, 515; PHSA 351).
    - Helps mitigate the impact of unsafe products through approval/license suspension and withdrawal, recalls, product seizures, administrative detention, and injunctions (e.g. FDCA 302-306, 412, 423, 505, 518; 21 CFR part 7); helps prevent entry of unsafe, counterfeit, or otherwise problematic foreign products through premarket inspections and import actions (e.g., FDCA 421, 704, 801).
    - Addresses risks posed by unsafe FDA-regulated products through prosecutions, civil proceedings, debarments, and investigator disqualifications (e.g., FDCA 301-307, 505). Also advises on conducting inspection activities (e.g., FDCA 704).
    - Directly supports preparation for and response to emergencies (e.g. shortages, foodborne illness outbreaks, and cybersecurity threats (e.g., FDCA 419, 424, 506C-506F, 524B, 564)).
    - Advises FDA in providing information to consumers and other stakeholders to help them make informed choices (e.g., FOIA; FDCA 417, 505(l), 505(r), 705, 1003).
    - Helps FDA develop, clear, revise, and withdraw rules, guidance documents, and enforcement policies (e.g., FDCA 701, 704).
    - Works closely with DOJ to defend FDA in lawsuits (e.g., FDCA; PHSA).
    - Provides legal advice in hearings under 21 CFR Parts 12-17 (required by the APA and FDCA/PHSA) and on administrative appeals and petitions under 21 CFR Part 10—including citizen petitions that could delay medical product approvals (required by the APA and FDCA/PHSA).

- **Office of the Chief Medical Officer**
  - **Brief Overview:** Provides executive leadership, coordination and oversight of cross-cutting clinical and regulatory matters, and public health preparedness and response.
  - **Functions Required by Statute:**
    - Designations for orphan drugs (& exclusivity) (21 USC 360bb, 360cc), rare pediatric disease (21 USC 360ff(d)), humanitarian use devices (21 USC 360j(m)).
    - Classifies medical products, facilitates FDA review (21 USC 353(g), 360bbb-2).
    - Awards Orphan Products (21 USC 360ee), Rare Neurodegenerative Disease (ACT for ALS, P.L. 117-79), and pediatric medical device development grants (Pediatric Medical Device Safety and Improvement Act of 2007, P.L. 110-85, § 305).
    - Provides bioethics and neonatology consults in support of premarket review (21 USC 355, 355a, 355c, 355d, 360c(f)(2), 360c(i)(1)(A), 360e; 42 USC 262).
    - Develops rules and guidances related to the protection of research participants, clinical trial modernization, and high-quality evidence (21st Century Cures Act (P.L. 114-255, §§ 3023-3024) and FDORA (P.L. 117-328, §§ 3602, 3606-3607)).
    - Coordinates pediatric safety activities (e.g., safety review) on medical products required by the BPCA (21 USC 355a) and the PREA (21 USC 355c).
    - Facilitates intra- and interagency work on medical countermeasures (MCMs) (21 USC 360bbb-4(b)(1), (b)(3)(A), (e), (g)). Facilitates DoD MCM work (P.L. 115-92).
  - **Functions Contemplated but Not Required by Statute:** Develops cross-cutting guidances requested by industry on particular topics such as human factor testing.
  - **Other Functions in Support of Mission:** Coordinates cross-FDA and interagency emergency responses to medical and critical food product shortages.

- **Office of the Chief Scientist**
  - **Brief Overview:** Leads FDA-wide scientific initiatives and programs; conducts research and testing in nationwide labs; regulates cosmetic products and color additives.
  - **Functions Required by Statute:**
    - Ensure quality and regulatory focus of FDA intramural research programs (21 USC 399a) and coordinate scientific training (21 USC 379l)
    - Occupational and lab safety (OSHA, 29 CFR 1904, 1910, etc.) and human subject protection for FDA led or supported research (45 CFR 46)
    - Enable innovation through partnerships and technology transfer (15 USC 3710) and oversee FDA Advisory Committees (5 USC 1001 et seq.)
    - Regulate cosmetics (FDCA 601-603 amended by the Modernization of Cosmetics Regulation Act of 2022); certify color additives (FDCA 721).
    - Regulatory testing to identify adulterated products (21 USC 351), develop tobacco standards (21 USC 387 (g)), prevent contaminated imports (21 USC 381), and support inspectional findings under FDCA 704(a)
    - Testing for the Shelf-Life Extension Program for DoD (21 USC 360bbb–3a)
    - Regulatory science, including research at the National Center for Toxicological Research (NCTR), to support FD&C Act standards, drug development tools, nanotechnology, emerging technologies, and medical countermeasures (21 USC 357, 399e, 360bbb-5a, 360bbb-4)
  - **Functions Contemplated but Not Required by Statute**
    - Testing to enable mitigations of drug shortages (FDCA 506C)
    - Coordination with Reagan Udall Foundation (21 USC 379dd)
  - **Other Functions in Support of Mission**

- Additional research to protect public health, support FDA's regulatory activities, and advance HHS priorities, such as in chemical safety, AI, and antimicrobial resistance.

- **Office of the Executive Secretariat**
  - **Brief Overview:** Delivers executive operations and facilitates development of intra- and inter-agency work product for the Commissioner and Principal Deputy Commissioner (PDC).
  - **Functions Required by Statute:**
    - Reviews, edits, and manages mandated reports to Congress and transmits them to HHS for submission to Congress. (21 USC 393; FDORA § 3628)
    - Maintains the Commissioner's and PDC's records in accordance with NARA.
    - Maintains the Public Calendar, required under 21 CFR 10.100, to educate public on FDA activities pursuant to 21 USC 393.
  - **Functions Contemplated but Not Required by Statute**
    - Formally connects FDA with HHS, other governmental organizations, and the public.
    - Manages the Commissioner's and PDC's correspondence and assignments from HHS.
  - **Other Functions in Support of Mission**
    - Coordinates briefings and meetings for the Commissioner.

- **Office of Digital Transformation**
  - **Brief Overview:** Leads enterprise Information Technology (IT) strategy, governance, resource management, and operations to optimize the FDA's technology infrastructure, data systems, and cybersecurity investments for maximum organizational value.
  - **Functions Required by Statute:**
    - IT Infrastructure and Operations (Federal Information Technology Acquisition Reform Act (FITARA); Clinger-Cohen Act (CCA); Federal Information Security Modernization Act (FISMA); E-Government Act; Modernizing Government Technology Act (MGT)).
    - Modernization and cloud (MGT; FITARA; FDORA § 3601-3614; PDUFA VII § 101-105).
    - Cybersecurity (FISMA; Federal Cybersecurity Enhancement Act; Computer Fraud and Abuse Act).
    - Digital Services and access (E-Government Act; Americans with Disabilities Act; Rehabilitation Act § 508; 21st Century IDEA).
    - Data and interoperability (Federal Records Act; Privacy Act).
    - CPIC and portfolio management (CCA; FITARA; MGT Act; E-Government Act).
    - Innovation and strategic planning to support modernization of FDA inspection and clinical trial activities (FDORA § 3601-3614; FDASIA § 701-717).
  - **Functions Contemplated but Not Required by Statute**
    - IT Services for records management (e.g., FOIA; PRA), meeting services (e.g., Federal Advisory Committee Act), and data analytics and reporting (e.g., Government Performance and Results Act).
  - **Other Functions in Support of Mission**
    - IT Service Desk and enterprise IT asset management supporting regulatory approvals, emergency response, and safety monitoring. 24/7 security operations for national security, law enforcement, and emergency information sharing.

- **Office of External Affairs**

- **Brief Overview:** Central point of communication and education about FDA's public health and regulatory activity.
- **Functions Required by Statute:**
  - Develops and disseminates agency-level communications from the Commissioner and leadership to the news media and public on FDA activities, including policies, initiatives, regulatory decisions, safety concerns, recalls and shortages. (21 USC 375, 21 USC 393(d)(2), 21 USC 360h(e), 21 USC 350l, 21 USC 360bbb-6, 21 USC 355(c) & (d), 21 USC 356(c), 21 USC 356(j), 5 USC 552, 42 USC 201 et seq, Plain Writing Act of 2010)
  - Oversees FDA.gov. (21st Century Integrated Digital Experience Act)
  - Develops and publishes MedWatch alerts. (21 USC 350l(g))
- **Functions Contemplated but Not Required by Statute**
  - Interfaces with patients and advocacy organizations to share patient perspectives with Centers for regulatory discussions. (FDASIA, Section 1137)
  - Manages translations and interpretation services (Title VI of the Civil Rights Act of 1964, FSMA Section 305, FDASIA Section 1138) and GovDelivery service.
- **Other Functions in Support of Mission**
  - Serves as liaison with HHS ASPA on all communications activities.
  - Promotes HHS priorities through various communications vehicles/channels.
  - Supports Commissioner in public engagements, including speechwriting.
  - Executes internal communications for employees on behalf of Commissioner.

- **Office of Minority Health [and Health Equity]**
  - **Brief Overview:** Promotes and protects the health of all Americans including rural Americans, older adults, and tribal communities, through research and communication.
  - **Functions Required by Statute:**
    - Establishment of Office of Minority Health and Director (42 USC 300 u-6a)
  - **Functions Contemplated but Not Required by Statute**
    - Support implementation of Demographic Rule (21 CFR 314.50 and 312.33)
    - Safety education and grants connected to appropriations for work on skin lightening products and chemical exposures (H. Rept. 118-124).
  - **Other Functions in Support of Mission**
    - Provide strategic leadership and coordination to promote enrollment and participation in clinical trials from representative populations to ensure data reflects the populations that will use products, improving generalizability of results.
    - Foster innovative and new methodologies in clinical trial design and execution to promote decentralized trials, improving access for rural and other communities.
    - Provide education activities such as materials related to the informed consent process to make clinical trials accessible to representative populations.

- **Office of Operations**
  - **Brief Overview:** Provides mission-critical programs required by statue in conjunction with essential support services across FDA.
  - **Functions Required by Statute:**
    - Leads the financial management (31 USC 902), accountability, and stewardship of FDA resources (31 USC 3512), management of the Working Capital Fund (21 USC 399i), and FDA procurement and contracting compliance (41 USC 3301)

- Leads FDA Workforce and Human Capital Management policies, including execution of hiring and performance management (5 USC 1101 note, 1103, 1104, 1302, 2302, 3301, 3302, 3396, 3397, 4101 et. seq., 4301, 5101, 7101 et seq., 8331)
- Leads FDA compliance with criminal and civil ethics and conflict of interest requirements (5 USC 13101-13111, 3110, 7342, 7351, 7352; 18 USC 201-209; 31 USC 1353; 41 USC 2101-2107)
- Leads and directs FDA Facilities and Asset Management services (40 USC 101)
- Lead on FOIA and privacy work (5 USC 552 and 552a), records management (44 USC 3101, 3301, 3501), Paperwork Reduction Act (44 USC 3501), and protecting proprietary and trade secret information (18 USC 1905)
- Directs the Agency's Equal Employment Opportunity (EEO) compliance (42 USC 2000 et seq.) and all activities related to reasonable accommodation (42 USC 12101 et seq.) and Alternative Dispute Resolution (5 USC 571–584)
- Directs FDA USPHS Commissioned Corps personnel policies and programs (10 USC 101; 42 USC 204, 207, 210, 215, 213, and 218a; 5 USC 552a and 2302)
- Leads FDA's classified information protection, security, background investigations, emergency preparedness and response, and Continuity of Operations planning (5 USC 9101; 40 USC 1315; 42 USC 5121 and 5195; 50 USC 3161)

  - **Functions Contemplated but Not Required by Statute**
    - Leads Agency compliance with HHS Supplemental Ethics Regulations applicable to FDA and preclearance requirements.

- **Office of Policy, Legislation, and International Affairs** (OPLIA)
  - **Brief Overview:** FDA's primary interface with HHS; EOP; the interagency; Congress; state, local, tribal, and territorial authorities; and global partners. Provide strategic policy direction to FDA's programs, ensuring alignment with Administration priorities; and work globally overseeing FDA foreign offices.
  - **Functions Required by Statute/Constitution**
    - Ensure FDA regs, guidances, etc. meet statutory requirements, and develop regulatory impact analyses (5 USC 551–559&601-612, 21 USC 371(h), 44 USC Chapter 35, 42 USC 4321, 16 USC 1531-1544); prepare Unified Agenda (5 USC 601, 2 USC 1501); develop guidance best practices (FDORA 2505); sign, issue Federal Register documents.
    - Manage congressional oversight matters (U.S. Const. art. I, 18 USC 1001); ensure compliance with approps statute, Committee Reports (U.S. Const. art. I); respond to Congress (FDCA 1003(d); 21 CFR 20.87; prepare legislative proposals for President's budget (CBA).
    - Perform global inspections (21 USC 374); develop arrangements with foreign governments; facilitate regulatory harmonization (21 USC 379, 383, 393, 19 USC 2578(a)), international cooperation (42 USC 242l), and supply chain security (21 USC 811); lead state & global engagements for drug importation (21 USC 384); build capacity of foreign governments (21 USC 399(a)).
    - Implement robust consultation with American Indian & Alaska Native tribes (25 USC); lead engagements with GAO, OIG, CRS, CBO, including implementing recommendations (31 USC 716, 1105, 720; 5 USC App. 1-13; 31 USC 3516).
  - **Other Functions in Support of Mission**
    - Direct interactions on Congressional authorization and appropriations matters, and with states and territories, including to address public health crises
    - Lead, coordinate cross-cutting policy (biotechnology, drug competition, AI).

- **Office of Women's Health**
  - **Brief Overview:** Leads the Agency on scientific, ethical, and policy issues relating to women's health; promotes adequate inclusion of women in clinical trials and analysis of data by sex.
  - **Functions Required by Statute:** P.L.111-148, "Improving Women's Health" (Sec. 3509): Establish goals for issues of concern to women's health, including adequate inclusion of women and analysis of data by sex in protocols and policies; report on women's participation in trials and the analysis of data by sex in testing of drugs, devices, and biologics; consult with stakeholders on Administration policy with regard to women; provide information to women and health care providers on areas where differences between men and women exist; serve as member of HHS Coordinating Committee on Women's Health.
  - **Other Functions in Support of Mission:**
    - Fund and conduct research on women's health topics and research to identify sex differences in the safety and efficacy of FDA-regulated products,
    - Develop and share scientific programming and educational resources to help women make informed health decisions throughout their lifespan on topics such as clinical trials, pregnancy, menopause, college women's health, healthy aging, safe medication use, caregiving and chronic diseases including but not limited to heart disease, diabetes, and high blood pressure.

- **Oncology Center of Excellence**
  - **Brief Overview:** Responsible for clinical review of oncology products undergoing expedited development, and regulatory policy to streamline and advance expedited development and review of these products (21 USC 399g).
  - **Functions Required by Statute:**
    - OCE staff review new drugs and biologics with dual roles in OCE and the Office of Oncologic Diseases (OOD) in CDER, including review of applications with RWE, patient experience data; establishing Medical Oncology Review teams; and modernization of clinical trial design (21 USC 355; 42 USC 262; §505F of FD&C Act; 21 USC 360bbb-8c; and §3001-3004, 3021-3022 CURES Act, FDORA §§ 3606, 3607).
    - Advance pediatric product development (§505B, §504, §505A 21 USC 355c) and Rare Cancers (FDCA 505(d).
    - Foster transparency and promote integrity of accelerated approval (FDCA506).
    - Implement review efficiencies including RTOR, Assessment Aid, Point Counterpoint, Summary Review, Project Facilitate, etc. (§3073, 3031 CURES Act, 21 CFR part 312)
    - Promote scientific programs across Centers, lead recruitment of cancer researchers and provide training in regulatory review. Facilitate workshops to interact with oncology experts and develop collaborations with HHS and VA (§3073 CURES Act).
  - **Functions Contemplated but Not Required by Statute:** Lead programs promoting applicability of global cancer clinical trials to U.S. patients and practices (21 CFR 314.106(b)).
  - **Other Functions in Support of Mission:** Several programs support statutorily mandated functions (e.g., Project Optimus to reform dosage optimization in drug development).

- **Office of Enterprise Transformation**
  - **Brief Overview:** Leads FDA high-priority enterprise business process initiatives to maximize FDA operational efficiency and overall productivity.

- **Other Functions in Support of Mission:** For critical statute-mandated FDA business processes, such as inspections and FOIA (5 U.S.C. § 552), OET works to optimize, create efficiencies for, and modernize supporting technology as follows:
  - For FOIA, OET leads a harmonized approach to business process and new commercial off-the-shelf technology (used by 28 other federal entities), improving process and communication while modernizing and de-duplicating technology.
  - For inspections, operational efficiencies including increased structured data collection for improved analytics and risk-based decision making, better communication, streamlined inspection reporting, and modernized technology leveraging mobile, cloud-based technology and replacing legacy systems.

- **Office of Planning, Evaluation, and Risk Management**
  - **Brief Overview:** Leads FDA's portfolio of planning; evaluation; performance management (including budget formulation); and enterprise risk management
  - **Functions Required by Statute:**
    - Collect, analyze, develop, and report on FDA enterprise-level performance, as required by: User Fee legislation (PDUFA, MDUFA, ADUFA, AGDUFA, BsUFA, GDUFA, OMUFA; MDUFMA); FDARA (P.L 115-52) Sections 902 and 903; FDASIA (P.L 112-144) Sec. 705.
    - Execute risk management requirements of FMFIA and OMB Circular No. A-123 to achieve efficiencies and identify and correct fraud, waste, and abuse.
    - Foundations for Evidence-Based Policymaking Act of 2018 (P.L. 115-435): authority to lead and direct FDA's planning and implementation of Title I requirements to use evidence and evaluation to optimize organizational efficiency and resources.
    - Develop FDA's performance metrics and ensure alignment with the HHS Strategic Plan. Address performance trends, integrate cross-center strategies, and support execution in line with Commissioner priorities and the budget (GPRA Pub. L. 103-62, GPRAMA Pub. L. 111-352, FAPA Pub. L. No. 118-190, and OMB Circular A-11).
    - Leads the assessment and development of FDA's organizational performance plans and strategic priorities in support of 5 U.S.C Chapter 43.

CENTER FOR BIOLOGICS EVALUATION AND RESEARCH

- **Office of the Center Director**
  - **Brief Overview:** Directs and coordinates all Center activities, including review and oversight of biological products and associated drugs and devices.
  - **Functions Required by Statute:**
    - Engages with DoD to expedite development and FDA's review of products for American warfighter – FDCA § 565; Pub. Law 115-92.
    - Coordinates CBER advanced manufacturing activities– FDCA §§ 506K, 506L, § 3016 of 21st Century Cures Act.
    - Issues emergency use authorizations for medical countermeasures – FDCA § 564.
    - Ensures regulatory submissions comply with legal/regulatory requirements - PHSA § 351, FDCA §§ 505, 510(k), 513(f)(2), 515, 520(m), including with regard to user fees as described in FDCA § 735(6).
    - Coordinates publication of regulations and guidance documents required by law – e.g., FDORA.
    - Manages product classification and jurisdiction activities for CBER– FDCA §§ 503(g), 513(g).

- Coordinates Rare Disease Program, international harmonization, other cross-Center activities related to product review (FDCA § 569A, 569C; 735).
- Leads Accelerated Approval Coordinating Council required by FDORA § 3210.

- **Functions Contemplated but Not Required by Statute**
  - Manages informal and formal dispute resolution process.
  - Supports FDA Rare Disease Innovation Hub: FDCA §§ 505, 569C & PHSA § 351.
- **Other Functions in Support of Mission**
  - Oversees Center engagement with Commissioner's Office and HHS; engages with public regarding Center priorities.

- **Office of Management**
  - **Brief Overview:** Manages budget, human capital, advisory committees, the White Oak campus vivarium, and compliance with ethics regulations.
  - **Functions Required by Statute:**
    - Ensures CBER spending is consistent w/relevant budgetary and appropriations laws.
    - Manages Resource Capacity Planning, hiring, mandatory time reporting, and financial transparency - FDCA §§ 736(c)(3), (b)(1)(F), (c)(2)(A).
    - Oversees performance measure reporting required by GPRA and GPRMA.
    - Manages advisory committees – FDCA §§ 505(n), 712; FACA.
    - Implements and ensures compliance with OSHA § 19.
  - **Functions Contemplated but Not Required by Statute**
    - Deploys resources in support of the Center's activities, including activities related to the review of human drug, medical device and biological product applications.
    - Conducts all hiring for the Center; manages and deploys CBER's cadre of USPHS Officers.
  - **Other Functions in Support of Mission**
    - Manages all of FDA's laboratory animal care and use program at White Oak.
    - Provides guidance and information regarding performance management.
    - Manages CBER workspace assignment and safety and accountable property.

- **Office of Compliance and Biologics Quality**
  - **Brief Overview:** Ensures the quality of biologics through entire lifecycle. Handles actions including suspensions, revocations, license denials, disqualification of investigators, compliance letters, and recommended civil and criminal actions, as well as biological product recalls.
  - **Functions Required by Statute:**
    - Contributes to review and approval and emergency use authorizations, including inspections, product testing and ensuring product quality – PHSA § 351, FDCA §§ 501(a)(2), 505, 564, 704.
    - Evaluates advertising & promotional materials - e.g., FDCA §§ 201(n), 502(a), (n)
    - Reviews postmarketing manufacturing changes – FDCA § 506A
    - Issues recalls of biological products and devices – PHSA § 351(d); FDCA § 518(e).
    - Monitors reports of biologic shortages and interruptions – FDCA § 506C & 506J.
    - Facilitates import/export of biologics; export certificates – FDCA §§ 801, 802.
  - **Functions Contemplated but Not Required by Statute**
    - Conducts surveillance activities to help prevent communicable diseases by HCT/Ps (PHSA § 361); directs & reviews surveillance and for cause inspections (FDCA § 704).
    - Works to mitigate CBER-regulated product shortages - FDCA § 506C & 506J.

- Evaluates biological product deviation reports/complaints for safety and compliance.
- Develops policies and compliance standards, including Current Good Manufacturing Practice (CGMP) regulations to ensure biological product quality.

- **Other Functions in Support of Mission**
  - Conducts tests on biological products submitted for release by manufacturers.
  - Prepares/distributes official U.S. reference preparations used in control testing.

- **Office of Biostatistics and Pharmacovigilance**
  - **Brief Overview:** Provides statistical and epidemiological evaluation of data submitted in support of regulatory requirements; conducts independent research on statistical and epidemiological methods for assessing the efficacy and safety of biological products.
  - **Functions Required by Statute:**
    - Contributes to review of products for approval or emergency authorization through statistical review and safety/risk analyses – PHSA § 351, FDCA §§ 505, 510(k), 513(f)(2), 515, 520(m), 564, FDCA §§ 735(6),737(9).
    - Post-marketing surveillance for CBER-regulated biologics, including all vaccines licensed in the U.S., to ensure continued safety, purity and potency – FDCA § 505(k), PHSA § 351.
    - Oversees CBER's real world evidence (RWE) program to support product review and approval – FDCA § 505F.
  - **Other Functions in Support of Mission**
    - Conducts statistical and epidemiological studies that support product review.
    - Manages the High-performance Integrated Virtual Environment which supports bioinformatics and artificial intelligence projects.

- **Office of Blood Research and Review**
  - **Brief Overview:** Responsible for the safety and availability of the nation's blood supply for transfusion and further manufacture of plasma therapeutics.
  - **Functions Required by Statute:**
    - Inspects and licenses blood establishments; reviews and approves/clears applications for blood and blood components for transfusion and further manufacture, and associated drugs and devices. PHSA § 351, FDCA §§ 505, 510, 513(f)(2), 515, 520(m), FDCA §§ 735(6), 737(9).
    - Prevents transmission of relevant transfusion transmitted infections – PHSA § 361.
    - Reviews investigational new drug applications and investigational device exemptions, including expanded access requests – FDCA § 505(i), 520(g) & 561, PHSA § 351(a)(3).
    - Reviews emergency use authorizations to facilitate availability of medical countermeasures in the event of an emergency – FDCA § 564.
    - Determines eligibility for expedited programs and advanced manufacturing technology and platform technology designation – FDCA §§ 506, 506K, 506L ,515B.
    - Monitors adverse event reports and postmarketing studies – FDCA §§ 505(k), 506B.
    - Monitors reports of significant interruptions in blood supply (FDCA § 506C); coordinates with federal and other partners regarding safety and availability of blood supply (42 USC 247d-12).
  - **Other Functions in Support of Mission**
    - Works with government partners to respond to threats to blood safety and develop safety/technical standards; laboratory research to enhance blood product safety.

- **Office of Vaccines Research and Review**
  - **Brief Overview:** Oversees the quality, safety, and effectiveness of vaccines for infectious disease, allergenics, and related biological products, as well as associated drugs and devices.
  - **Functions Required by Statute:**
    - Reviews and approves vaccines for infectious diseases and related biological products (e.g., live biotherapeutics, allergenics) and associated drugs and devices to ensure their safety, effectiveness, and quality under PHSA § 351, FDCA §§ 505, 510(k), 513(f)(2), 515, 520(m).
    - Reviews investigational new drug applications and investigational device exemptions, including expanded access requests – FDCA § 505(i), 520(g) & 561, PHSA § 351(a)(3).
    - Reviews requests for emergency use authorizations to facilitate availability of medical countermeasures in the event of an emergency – FDCA § 564
    - Determines eligibility for expedited programs and advanced manufacturing technology and platform technology designations – FDCA §§ 506, 506K, 506L, 515B
    - Monitors adverse event reports and postmarketing studies – FDCA §§ 505(k), 506B.
  - **Other Functions in Support of Mission**
    - Conducts laboratory research that supports the evaluation of the quality, safety, effectiveness, and manufacture of vaccines, allergenics, and related biological products and associated drugs and devices.

- **Office of Therapeutic Products**
  - **Brief Overview**: Oversees the quality, safety, and efficacy of therapeutic biologics including gene therapies, cell therapies, xenotransplantation products, and plasma protein therapeutics.
  - **Functions Required by Statute:**
    - Reviews applications for therapeutic biologic products and associated drugs and devices to ensure their safety, effectiveness, and quality under PHSA § 351, FDCA §§ 505, 510(k), 513(f)(2), 515, 520(m), FDCA § 735(6).
    - Reviews investigational new drug applications and investigational device exemptions, including expanded access requests – FDCA § 505(i), 520(g) & 561, PHSA § 351(a)(3).
    - Reviews requests for emergency use authorizations to facilitate availability of medical countermeasures in the event of an emergency – FDCA § 564.
    - Determines eligibility for expedited programs and advanced manufacturing technology and platform technology designations – FDCA §§ 506, 506K, 506L, 515B.
    - Monitors adverse event reports and postmarketing studies – FDCA §§ 505(k), 506B.
    - Solicits views of patients during product development process – FDCA § 569C.
    - Facilitates development of regenerative medicine standards – FDCA § 506G.
    - Contributes to development of guidance documents and regulations required by law, e.g., Food and Drug Omnibus Reform Act (FDORA).
  - **Functions Contemplated but Not Required by Statute**
    - Implements risk-based framework to oversee human cells and tissues to prevent transmission of communicable diseases– PHSA § 361.
  - **Other Functions in Support of Mission**
    - Conducts laboratory research that supports the evaluation of the quality, safety, efficacy of therapeutic biologics.

- **Office of Communication, Outreach and Development**
  - **Brief Overview:** Communicate biological drug product and device information to the public, manage website and disclosure of records; manage professional development program.
  - **Functions Required by Statute:**
    - Release/web posting of records including pursuant to FOIA requests, subpoenas, litigation, action packages for product approvals, and advisory committee materials – e.g., 5 USC 552; FDCA §§ 505(l)(2), 520(h), 712; 29 USC 794d.
    - Respond to small business inquiries to help them comply with FDA statutes and regulations – § 2013 of Contract with America Advancement Act of 1996.
    - Training (FDCA § 746), industry education, patient engagement (FDCA § 569C).
    - Post information regarding shortages and interruptions - FDCA § 506C(c).
  - **Functions Contemplated but Not Required by Statute**
    - Execute CBER's professional development program.
    - Make information available to the public; respond to inquiries from the public. FDCA 705
    - Coordinate Reports to Congress and engagement with GAO and OIG studies (FDCA and amendments)
    - Receive and triage emergency IND requests submitted under FDCA § 561.
  - **Other Functions in Support of Mission**
    - Coordinate meetings with industry associations, responses to Congressional inquiries and technical assistance and controlled correspondence (WH).

- **Office of Regulatory Operations**
  - **Brief Overview:** Provides the information technology, data, and other resources needed to execute regulatory work; supports the consistent execution of review efforts.
  - **Functions Required by Statute:**
    - Coordinates implementation of user fee programs, manages statutorily-required reports to Congress on activities and goals, decides user fee exemptions/waivers – e.g., FDCA §§ 736(d), 736B(a), 738A(a).
    - Leads CBER IT Modernization; coordinates training on regulatory topics. FDCA 746.
    - Coordinates review and issuance of priority review vouchers – FDCA §§ 524, 529.
    - Manages Capital Planning and Control for CBER IT applications (40 USC 1401(3))
    - Manages CBER compliance with federal records requirements, digitization and modernization (e.g., 44 USC Chap.31, FDCA § 701(a)).
    - Establishes/maintains data standards/e-submission requirements – FDCA §§ 505, 745A.
    - Develops/maintains regulatory information management systems – FDCA § 701(a).
    - Maintains public databases for approved biologic products – FDCA § 505(p).
  - **Functions Contemplated but Not Required by Statute**
    - Determines reference product exclusivity – PHSA § 351(k)(7).
  - **Other Functions in Support of Mission**
    - Oversees the technology, artificial intelligence and data infrastructure necessary to enable CBER's application review, safety surveillance, scientific testing, and inspections.

CENTER FOR DEVICES AND RADIOLOGICAL HEALTH

- **Office of the Center Director**
  - **Brief Overview:** Direct and coordinate the work of CDRH; provide governance for Center.
  - **Functions Required by Statute:**

- Lead continuous improvement initiatives for CDRH and conduct performance audits to fulfill statutory obligations and MDUFA commitments (FDCA 513(j))
- Work with foreign regulatory authorities to harmonize and reduce the burden of regulatory requirements; meet with industry, patients and other stakeholders (FDCA 803(c)(3), 1003(b)(3))
- Execute MDUFA reauthorization process, including consultation with Congress, stakeholders, and regulated industry, obtaining public input, and submitting final recommendations by the statutory deadline (FDCA 738A)

o **Functions Contemplated but Not Required by Statute**

- Execute the Total Product Lifecycle Advisory Program (TAP) pilot, working with enrolled device firms, consistent with MDUFA V commitments and to spur development of critical and innovative devices (FDAUFRA 2001(b))

o **Other Functions in Support of Mission**

- Coordinate with the Commissioner to ensure activities are aligned with strategic direction of the Agency and Department in support of Agency-wide initiatives
- Lead strategic initiatives, such as the Home as a Healthcare Hub initiative, to achieve better health outcomes, reduce chronic disease, and protect the public health

- **Office of Management**
  - **Brief Overview:** Develop and execute Center-wide management operations and essential financial, human capital, and core administrative functions.
  - **Functions Required by Statute:**
    - Recruitment, hiring, personnel, reorganizations & retention, ethics, labor & employee relations, performance management (5 USC 2301, 2302; 5 USC 903)
    - Budget request justifications (31 USC 1108, 1115(b) & 1116).
    - FMFIA enterprise risk management activities (31 USC 3512)
    - MDUFA financial management, annual Congressional financial reporting, FR notice requirements, user fee program commitments, small business waiver determinations (FDCA 738, 379, FDARA 903(a))
    - Other user fee management activities, including relating to MQSA, EREA, PDUFA (42 USC 263b, 21 USC 381, and FDCA 736B(b))
    - Acquisitions management services (e.g., 48 CFR 1.604, 6.1, 7.1, 13.301, 17.5)
    - Advisory committee management (FDCA 513; FDORA 3302)
  - **Functions Contemplated but Not Required by Statute**
    - Provide health and safety management and ensure continuity of operations

- **Office of Strategic Partnerships & Technology Innovation**
  - **Brief Overview:** Leads scientific collaborative and emerging technology activities of the Center.
  - **Functions Required by Statute:**
    - Ensure cybersecurity of devices (FDCA 524B, 513(i), 513(f)(2), 515, 520(m))
    - Premarket review of software and digital health technologies (FDCA § 520(o); 513(i), 513(f)(2), 515, 520(m))
    - Monitor discontinuance or interruption in production, maintain device shortage list, and take actions to mitigate the impact of device shortages (FDCA 506J)
    - Participate in emergency response activities (FDCA 564, 564A, 564B & 565)
    - Develop and manage IT solutions for electronic submissions (FDCA 745-745A)
    - Maintain standards recognition & conformity assessment program (FDCA 514)

- Develop patient science & engagement activities; review patient science data (FDCA 513(i), 513(f)(2), 515 & 569(c))
- Pediatric device development (FDAUFRA 5003, FDARA 708); premarket review of pediatric devices (FDCA 515A) and devices for rare disease (FDCA 520(m))

- **Functions Contemplated but Not Required by Statute**
  - Create critical agreements for collaboration with USG and non-governmental partners (National Technology and Transfer Act of 1995)
  - Qualify Medical Device Development Tools (MDDTs) in support of statutorily directed Least Burdensome Principles (see FDCA 513 and 515)
  - Participate in development of international standards for medical devices
- **Other Functions in Support of Mission**
  - Develop partnerships with hospitals to support pediatric device development
  - Collaborate with payors, including CMS, to increase access to innovative devices
  - Participate in Collaborative Communities across the device ecosystem to solve shared challenges, including for chronic diseases

- **Office of Science & Engineering Laboratories**
  - **Brief Overview:** Promote public health innovation and the timely development and technical review of medical devices through regulatory science.
  - **Functions Required by Statute:**
    - Provide essential expertise to premarket review teams for the review of biocompatibility, chemical characterization, complex engineering design and performance, digital health, and other technical components (FDCA 513(i), 513(f)(2), 515, 520(m))
    - Identify priorities and advances in regulatory science to promote public health innovation (FDCA 1003(c); FDASIA 1124(b))
    - Develop advanced methods to address regulatory and scientific gaps impeding the timely development of medical devices (FDCA 1003(c); FDASIA 1124(b))
    - Develop and use measurable metrics to integrate advances in regulatory science in regulatory decision making (FDCA 1003(c); FDASIA 1124(b))
    - Publish open-access tools to ensure that advances in regulatory science for devices are adopted by innovators and reviewers (FDCA 1003(c); FDASIA 1124(b))
    - Use collaborations to advance regulatory science priorities ((FDCA 1003(c) & 566)
    - Lead performance standards development for medical devices (FDCA 514)
    - Foster collaborations between the Center, Agency, and other science-based agencies to enhance the scientific expertise that advances the FDA mission (FDCA 1003(c))
  - **Functions Contemplated but Not Required by Statute**
    - Develop and publish MDDTs and regulatory science tools that support device innovation and efficient premarket review

- **Office of Product Evaluation and Quality**
  - **Brief Overview:** Oversee total product lifecycle evaluation of medical devices, including clinical investigations, regulatory review pathways, compliance and quality, and postmarket surveillance
  - **Functions Required by Statute:**
    - Authorize marketing of devices through the Premarket Approval (FDCA 515); De Novo classification (FDCA 513(f)(2)); Humanitarian Device Exemption (FDCA 520(m)); and 510(k)/Substantial Equivalence pathways (FDCA 510(k) & 513(i))
    - Evaluate adverse events, recalls, corrections, and removals (FDCA 519, 518(e), 519(g))

- Evaluate allegations and inspectional findings to identify adulterated and misbranded devices (FDCA 501 & 502)
- Oversee human subject protections (FDCA 520(g))
- Implement establishment registration & device listing requirements (FDCA 510)
- Implement the Mammography Quality Standards Act (MQSA) and related requirements to ensure access to quality mammography for the detection of breast cancer (PHSA § 354; FDCA 519, 537 & 704(e))
- Implement the Electronic Product Radiation Control Program to protect the public from exposure to radiation from electronic products (FDCA 531-542)
- Categorize complexity of in vitro diagnostic devices under CLIA (PHSA 353)
- Assess and report quarterly and annually on MDUFA performance (FDCA 738A)
- Verify user fees have been paid for premarket submissions (FDCA 738)

o **Functions Contemplated but Not Required by Statute**

- Develop and deliver training for review staff (see FDAUFRA 2001(b))
- Develop and provide resources for industry stakeholders and FDA review staff related to premarket submissions (see FDAUFRA 2001(b))
- Develop electronic submission templates for premarket submissions (FDAUFRA 2001(b))

o **Other Functions in Support of Mission**

- Provide feedback to industry stakeholders regarding future premarket submissions through CDRH's Presubmission Program (see FDAUFRA 2001(b))
- Develop Real World Data (RWD) and Real World Evidence (RWE) methods to support expanded indications and new device authorizations (FDAUFRA 2001(b); FDORA 3629)

- **Office of Policy**
  - **Brief Overview:** Oversee and coordinate the legal, regulatory, and policy functions of the Center; coordinate such activities across FDA and with HHS and OMB.
  - **Functions Required by Statute:**
    - Draft and facilitate clearance and publication of required regulations, orders, and guidances (e.g., FDCA 524B; FDORA 2511, 2514, 3606, 3607)
    - Perform required Paperwork Reduction Act (PRA) analyses (44 USC 3506)
    - Manage Center-level appeals of regulatory decisions (FDCA 517 & 517A) and the Medical Devices Dispute Resolution Panel (FDCA 562)
    - Review and facilitate clearance of reports and responses to Congress and the production of other information mandated by law (e.g., FDCA 515A; FDORA 3307, 3626, 3629, 3604; 21 CFR 20.87(b), 20.80(a), 20.61(c))
    - Process and respond to citizen petitions (21 CFR 10.30)
    - Support the transmittal of MDUFA reauthorization package to Congress (FDCA 738A)
  - **Functions Contemplated but Not Required by Statute**
    - Implement statutory provisions through public-facing regulations and guidance documents and related internal policies (FDCA 701)
    - Provide input to Chief Counsel on judicial review of agency action (FDCA 517)
    - Provide input and oversight on compliance and enforcement activities (see FDCA 301-304, 501-502, 518, 538-539)
    - Provide staff and public with ombuds dispute resolution services (FDCA 517A)
    - Respond to requests for information from Congress, the U.S. GAO and HHS OIG
  - **Other Functions in Support of Mission**
    - Lead Center implementation of executive directives from the EOP, HHS, and FDA

- Review public communications on safety and FDA actions (FDCA 567, 705 & 1003)

- **Office of Communication, Information Disclosure, Training and Education**
  - **Brief Overview:** Deliver communication, education, and information disclosure about medical devices and radiation-emitting products; train CDRH employees for success in their roles
  - **Functions Required by Statute:**
    - Process FOIA requests and requests for information sharing (e.g. intergovernmental requests) (5 USC 552, 18 USC 1905, FDCA 301(j), 520(c), 708; 21 CFR Part 20)
    - Develop required trainings (FDCA 513(j), 746 & 1003)
    - Create clear and machine-readable public communication and education for publishing on FDA.gov (PHSA 241)
  - **Functions Contemplated but Not Required by Statute**
    - Develop public communications relating to device authorizations, recalls, and other public safety announcements (FDCA 567 & 705)
    - Assist "small business" manufacturers (FDCA 738)
  - **Other Functions in Support of Mission**
    - Field inquiries from the public and disseminate consumer information through webinars, web updates, individual correspondence and other means
    - Provide training to meet agency mission for employees across CDRH

CENTER FOR DRUG EVALUATION AND RESEARCH

- **Office of the Center Director**
  - **Brief Overview:** Directs and coordinates the work of the Center; manages CDER's offices, budget, and operations.
  - **Functions Required by Statute**:
    - Assesses drug abuse potential for scheduling recommendations (CSA § 201) and provides annual estimates of medical, scientific, and reserve stock needs for Schedule I and II substances (Controlled Substances Act § 306; PHS Act § 302).
    - Works with DoD on development and availability of medical countermeasures (PL 115-92).
    - Leads patient-focused drug development efforts, for regulatory decision-making (21st Century Cures Act §§ 3001-3004).
    - Leads international standards harmonization to reduce manufacturers' regulatory burden (FDAMA § 410).
  - **Functions Contemplated but Not Required by Statute**
    - Prevents, mitigates, and resolves drug shortages by responding to applicants' mandatory supply disruption reports (FDCA 506C, 506D).
    - Addresses risks associated with problematic use of controlled substances (such as opioids), including under the SUPPORT Act (PL 115-271)

- **Office of Regulatory Policy**
  - **Brief Overview:** Implements statutory requirements and develops regulations, guidance, and procedures to support the development, approval, and marketing of human drugs.
  - **Functions Required by Statute:**
    - Responds to most citizen petitions, including petitions that could delay approval of a pending drug application (505(q), 505(w)).

- Responds to Freedom of Information Act requests (5 USC § 552) and fulfills CDER's proactive disclosure obligations related to drug approvals (505(l)(2)).
- Issues relisting determinations so generic versions of withdrawn drugs can be approved (505(j)(4)(I)).
- Works with OCC to defend the agency in legal challenges (e.g., hearing requests) to decisions to withdraw or not approve drugs (505(c)-(e)).
- Manages patent term extensions for patent holders (35 USC § 1576).
- Fulfills Paperwork Reduction Act requirements (44 USC §§ 3501-3521).

- **Functions Contemplated but Not Required by Statute**
  - Evaluates whether innovative products are eligible for exclusivity and assesses whether exclusivity delays approval of follow-on/generic products (505(c)).

- **Office of Management**
  - **Brief Overview:** Supports more than 6,000 employees and manages a $2 billion+ annual budget comprised of a mix of congressional appropriations and user fee programs.
  - **Functions Required by Statute:**
    - Executes multiple user fee programs (736, 744B, 744H, 744M)) by managing collections and processing waivers, exceptions and refunds.
    - Approves annual OGE-450s and outside activities requests to ensure compliance with conflict-of-interest statutes (18 U.S.C. 208).
    - Oversees financial management activities to ensure compliance with the Anti-Deficiency Act (includes 31 U.S.C. 1341).
  - **Other Functions in Support of Mission**
    - Provides financial management, acquisitions, human capital, property, safety, and travel support for CDER.

- **Office of Communications**
  - **Brief Overview:** Educates public about drug approval and safety information, responds to public inquiries, manages public health web pages and databases, and engages with external stakeholders (e.g., professional, industry, and health care organizations).
  - **Functions Required by Statute:**
    - Issues information to public on drug safety and effectiveness (505(k), FDASIA 1138).
    - Issues safety and other public health communications, including drug recalls, drug shortages, and label changes (505(k), FDASIA 1138).
    - Publishes drug information on FDA web pages, including Drugs@FDA, Orange Book, Purple Book, Monographs@FDA, Drug Safety-related Labeling Changes, and the REMS@FDA database 505(k), 505(l), 505(r), 505(t).
  - **Functions Contemplated but Not Required by Statute**
    - Manages Small Business and Industry Assistance program (5 U.S.C. 601-612)

- **Offices of Surveillance & Epidemiology**
  - **Brief Overview:** Works to detect, assess, prevent, and manage the risks of drugs.
  - **Functions Required by Statute:**
    - Ensures safety aspects of new drug applications (NDAs), abbreviated new drug applications (ANDAs), and biologic license applications (BLAs) and supplemental applications, including human factors and labeling (FDCA 505, 735(6)(F)).

- Establishes and manages Risk Evaluation and Mitigation Strategies (REMS) to ensure appropriate risk/benefit for intended drug use (FDCA 505-1).
- Evaluates postmarket safety events using FDA Adverse Event Reporting System and real-world data (e.g., Sentinel) to assess need for regulatory action, including safety labeling changes and postmarketing studies (FDCA 505(k), 505(o)).
- Evaluates pediatric drug safety signals to monitor safety in children (FDCA 505B(i)).

- **Office of Compliance**
  - **Brief Overview:** Protects patients and consumers from poor quality, unsafe, and ineffective drugs.
  - **Functions Required by Statute:**
    - Takes action against dangerous adulterated (e.g., contaminated), misbranded, and unapproved drugs, including compounded drugs (FDCA 301, 501, 502, 503A, 503B, and 505).
    - Ensures drugs meet safety, effectiveness, and quality requirements necessary for approval and continue to meet those high standards, through inspections, testing, and other oversight (FDCA 505, 505F, 510, 511, 704, 42 U.S.C. 289).
    - Promotes supply chain integrity and compliance for imported and exported drugs, including removing counterfeit and other harmful drugs (FDCA 301, 581-585, 801, 802, 804).
    - Enforces requirements associated with Clinicaltrials.gov (42 U.S.C. 282).
    - Administers drug registration and listing requirements (FDCA 510), which include essential information for FDA and outside parties to protect public health.
    - Oversees recalls of controlled substances that may cause deaths (FDCA 569D).
  - **Functions Contemplated but Not Required by Statute**
    - Helps prevent and mitigate drug shortages (FDCA 506C-506E).
    - Coordinates recalls of non-controlled substances.

- **Office of New Drugs**
  - **Brief Overview:** Regulates new drugs and biologics from early development under investigational new drug applications (INDs), through the review and approval of applications. Evaluates drug safety post-approval and modifies labeling as appropriate.
  - **Functions Required by Statute:**
    - Regulates development and labeling of new drugs (small molecules and biologics) from IND phase through approval of NDAs and BLAs, including for accelerated approval (FDCA 502, 505, 506(c), PHS Act 351).
    - Reviews and approves biosimilar drugs (PHS Act 351(k)) and regulates monograph (OTC) drugs (FDCA 505G).
    - Regulates pediatric drug development (FDCA 505A & B).
    - Authorizes Emergency Use Applications (EUAs) for drugs (FDCA 564).
    - Regulates expanded access for unapproved drugs (FDCA 561).
    - Plans and conducts advisory committee meetings (FDCA 505).
    - Assesses & manages post-market drug safety (FDCA 505, 505-1, & 506B).
    - Reviews and designates drugs for Breakthrough or Fast Track and facilitates their development (FDCA 506); evaluates technologies proposed for Platform Technology Designation under FDCA 506K.
    - Qualifies drug development tools (FDCA 507); manages susceptibility test interpretive criteria for antimicrobial drugs (FDCA 511A).
    - Issues and processes priority review vouchers (PRV) for several PRV programs; including evaluating tropical diseases proposed for PRVs (FDCA 524, 529, 565A).

- Evaluates formal dispute resolution requests challenging OND regulatory actions (FDCA 562) and provides clinical and scientific support for administrative hearings and appeals regarding specific regulatory actions (FDCA 505(c)-(e), 506(c)).

- **Functions Contemplated but Not Required by Statute**
  - Meets with industry to provide guidance throughout drug development, including pre-IND meetings (FDCA 505).

- **Office of Medical Policy**
  - **Brief Overview:** Leads modernization of clinical trials and evidence generation, including the use of artificial intelligence, digital health technology, and real-world evidence. Regulates prescription drug promotion.
  - **Functions Required by Statute:**
    - Leads RWE program to advance use of RWE for decision-making (FDCA 505F).
    - Promotes use of digital health technologies in clinical trials (FDCA 505; FDORA §§ 3606 and 3607).
    - Modernizes clinical trials designs, including decentralized trials (FDCA 505; 21st Century Cures Act § 3021; FDORA §§ 3606 and 3607).
    - Develops patient and healthcare provider-directed labeling, including Medication Guides (FDCA 201(n), 502(a), 505).
    - Takes action against misbranded prescription drugs due to false or misleading advertising or promotional labeling (FDCA 201(m), (n); 301(a), (b), (k); 302; 303; 304; 502(a), (c), (e), (f), (n)).
    - Implements provisions related to drug sponsors providing information to payors, formulary committees, or other similar entities (FDCA 502(gg)(1) & (gg)(2)); Consolidated Appropriations Act, 2023 § 3630).
  - **Other Functions in Support of Mission**
    - Identifies and removes barriers that may hinder AI adoption in drug development (Exec. Order No. 14179).

- **Office of Executive Programs**
  - **Brief Overview:** Oversees and leads Center-wide programs in support of drug development and oversight activities outlined below.
  - **Functions Required by Statute:**
    - Administers advisory committees to obtain expert advice, when needed, for drug application reviews and other public health decisions (Federal Advisory Committee Act § 3 et seq.)
    - Drafts various reports to Congress as required by statute such as annual appropriations reports for CURES (e.g. 21st Century Cures Act § 1002).
    - Administers Formal Dispute Resolution to resolve scientific and/or medical disputes between CDER and sponsors (FDCA 562)
    - Coordinates sharing of confidential commercial information across federal government entities and in compliance with statutory requirements (FDCA 301(j)).
    - Administers Product Jurisdiction Program to ensure combination products are reviewed by the appropriate Center (FDCA 563 and 503)
  - **Other Functions in Support of Mission**
    - Provides efficient resolution for stakeholder complaints to avoid formal dispute resolution through the ombudsman.

- Serves as CDER's executive secretariat and coordinates legislative affairs for CDER

- **Office of Translational Sciences**
  - **Brief Overview:** Conducts clinical pharmacology and biostatistics regulatory review, develops quantitative approaches for decision making in the review process, and conducts inspections of bioavailability/bioequivalence and nonclinical (GLP) studies.
  - **Functions Required by Statute:**
    - Provides clinical pharmacology and biostatistics reviews for NDAs, ANDAs, and BLAs (FDCA 505, 506(c), PHS Act § 351(a) & (k)); including user fee activities described ins 735(6), 744A(9), 744G(13).
    - Conducts comprehensive study-directed and surveillance inspections of firms that conduct pharmacokinetic, bioavailability/bioequivalence (BA/BE), Good Laboratory Practice (GLP), and Animal Rule (AR) studies in support of human drug applications (505(b), 505(i), 505(j), and 704 and PHS Act § 351).
    - Supports review and qualification of drug development tools (507).
    - Uses quantitative clinical pharmacology methods to ensure drugs are properly dosed and effective in children (505A and 505B).
    - Establishes technology transfer agreements with external stakeholders to foster innovation in drug development (15 USC §3701-3715, 35 USC §200-212).
  - **Other Functions in Support of Mission**
    - Develops and implements advanced analytics, machine learning, and artificial intelligence to optimize drug review processes.

- **Office of Strategic Programs**
  - **Brief Overview:** Manage strategic IT investment and development, and implementation of user fee programs; maintain regulatory data for statutorily-required reporting, and advance data standardization.
  - **Functions Required by Statute:**
    - Manage, evaluate, and implement CDER's IT portfolio (40 U.S.C. § 11101 et seq.) and Federal Information Technology Acquisition Reform Act to maximize impact of available resources.
    - Manage implementation of the User-fee Programs (PDUFA, GDUFA, OMUFA, BsUFA) across CDER including:
      - ❖ Lead reauthorization negotiations and generating data and analysis for mandated performance and financial reports (736B, 744C, 744N, 744I).
      - ❖ Manage resource capacity planning for PDUFA, BsUFA, and GDUFA (736, 744H, 744B))
    - Implement drug benefit-risk framework required by FDASIA (Sec 905).
    - Develop and maintain public facing portals to enable electronic data submission and enhance data standardization to increase efficiency and support regulatory decisions (FDCA 745A, 505F(a)(1), 21 CFR §11.1(b)).
  - **Functions Contemplated but Not Required by Statute**
    - Operate time reporting program which provides data required to ensure compliance with UFA legal and financial requirements (FDCA 736(g)(2); 744H(f)(2); 744B(i)(2))

- **Other Functions in Support of Mission**
  - Provide data analytics, data and decision science, and advanced economics expertise for review teams and Center-wide projects, including the Drug Supply Chain Analytical Network System.

- **Office of Pharmaceutical Quality**
  - **Brief Overview:** OPQ assures that quality medicines are available to the American public.
  - **Functions Required by Statute:**
    - Review applications and postapproval chemistry, manufacturing, and controls changes for drugs and biologics (FDCA 505(c) & (j) and 506A; PHS Act § 351(a) & (k) including the user fee activities described in FDCA 735(6), 744A(9), and 744G(13)).
    - Establish current good manufacturing practice (CGMP) standards; inspect against these standards through sampling/testing; and ensure marketed products comply with US Pharmacopeia quality standards (FDCA 501(a)(2)(B) & (b), 502, 505, and 704; PHSA 351).
    - Manage drug manufacturing facility inspection schedule to ensure such inspections are risk based (FDCA 510(h)).
    - Assess quality-related reports to identify potential grounds to suspend or withdraw approval of a drug (FDCA 505(e) & (k)).
    - Review drug quality aspects of OTC Monograph Order Requests (FDCA 505G(b)).
    - Evaluate requests for Platform Technology Designation and Advanced Manufacturing Technology Designation; implement the Emerging Technology program and assess requests for emerging manufacturing technologies (FDCA 506K, 506L, and 566A).
    - Assess shelf life and product quality to establish appropriate conditions of authorization for drugs under EUAs (FDCA 564(e)).
  - **Functions Contemplated but Not Required by Statute**
    - Ingest and analyze data on manufacturing volume (FDCA 510(j)).
    - Perform quality assessment of CMC proposals to address drug shortages.

- **Office of Generic Drugs**
  - **Brief Overview:** Ensures safety and effectiveness of high-quality generic drugs.
  - **Functions Required by Statute:**
    - Prioritize, review and approve ANDAs, amendments, and post-approval supplements (FDCA 505(j)); assess REMS for generics (505-1); and expedite reviews for drug shortage products (506C, including user fee activities described in 744B).
    - Ensure generic drug labeling accuracy (FDCA 502, 503D, and 505), including for state importation plans (804).
    - Evaluate and determine eligibility for and blocking by exclusivity periods for NDAs and ANDAs, and process NDA patent listing submissions for the Orange Book (FDCA 505(c), 505(j), 505(u), 505(v), 505A, and 506).
    - Act on requests for competitive generic therapy designations (FDCA 506H).
    - Respond to suitability petitions (FDCA 505(j)) and, together with ORP, citizen petitions potentially blocking generic drugs (FDCA 505(q)).
    - Assess therapeutic equivalence code requests for 505(b)(2) applicants and publish evaluations (FDCA 505(j)).
    - Publish updates on priority review applications (section 807 and 805 of FDARA (Pub. L. 115-52)); and publish the off-patent, off-exclusivity list (FDCA 505(j))
    - Post-market monitoring of ANDAs (FDCA 505(e), (k), and (j)).

- **Functions Contemplated but Not Required by Statute**
  - Develop and communicate (e.g. through product specific guidances and controlled correspondence) methods to show bioequivalence, especially for complex generics (FDCA 505(j))
  - Maintain the Inactive Ingredient Database to assist with efficient drug development (FDCA 505(j)).

CENTER FOR TOBACCO PRODUCTS

- **Office of the Center Director**
  - **Brief Overview:** Leads CTP actions to implement the Family Smoking Prevention and Tobacco Control Act (TCA).
  - **Functions Required by Statute:**
    - Prepares statutorily required Reports to Congress. (e.g., Sec. 106 of TCA)
  - **Functions Contemplated but Not Required by Statute**
    - Provides input on objectives and subject matter for the high volume of lawsuits challenging CTP decisions.
    - Adjudicates requests for supervisory review of marketing decisions for new tobacco products. (21 C.F.R. § 10.75)
  - **Other Functions in Support of Mission**
    - Provides overall leadership functions for CTP, including strategic planning and oversight, issues management, policy coordination, and direction to other CTP offices in performing functions required by statute .
    - Lead for interacting with and providing critical information about CTP initiatives and actions to Congress, GAO, OIG, public health entities, industry, other stakeholders, and the general public. (FDCA 1003)

- **Office of Management**
  - **Brief Overview:** Provides essential administrative functions for CTP.
  - **Functions Required by Statute:**
    - Assesses and collects tobacco product user fees—the sole source of funding for CTP—on a quarterly basis. (Sec. 919)
  - **Functions Contemplated but Not Required by Statute**
    - Manages CTP document control center, which annually processes thousands of regulatory submissions from industry. (e.g., FDCA 907, 910, 911).
  - **Other Functions in Support of Mission**
    - Manages administrative services, including budgeting, IT system development and maintenance, human capital management, training, ethics, contracting, records management, facilities, travel and timekeeping, and other logistical services.
    - Supports CTP call center that responds to questions from the public.

- **Office of Regulations**
  - **Brief Overview:** Leads development of regulations and guidance documents, conducts economic analyses of potential actions, and responds to citizen petitions.
  - **Functions Required by Statute:**
    - Ensures proposed rules and Federal Register notices include statutorily required information. (FDCA 906)

- Conducts economic analysis of potential regulatory actions. (5 USC Chapter 6)
- Provides the Tobacco Products Scientific Advisory Committee an opportunity to make recommendations on certain regulations. (FDCA 906, 907)
- Issues regulations or guidance required by the TCA, current and recent examples of which include: to require foreign manufacturers to register with FDA (FDCA 905); to address substantial equivalence pathway to market (FDCA 905); to address remote sales of tobacco products (FDCA 906); to address manufacturing practices (Sec. 906); to address modified risk tobacco products (FDCA. 911); to permit submission of a single application for a new product to be marketed and to be marketed as a modified risk product (FDCA 911); to require advertising restrictions for certain retailers (FDCA 913); to address testing, reporting, and disclosure of tobacco product constituents (FDCA 915); recordkeeping for tracking and tracing (FDCA 920); protecting children from cigarettes and smokeless tobacco products (Sec. 102 of TCA); and to issue and revise cigarette health warnings and smokeless tobacco health warnings. (Sec. 201, 202, 204, 205 of TCA)
- Responds to citizen petitions (5 USC 553; 21 CFR Part 10) and works with OMB to ensure compliance with the Paperwork Reduction Act. (44 USC Chapter 35; 5 CFR 1320).
- Consults with other Federal agencies prior to rulemaking, as appropriate. (FDCA 901(g))

- **Functions Contemplated but Not Required by Statute**
  - Authority to issue regulations on the following topics: tobacco product standards, including those related to nicotine yield and reduction or elimination of constituents, components, or properties of tobacco products (FDCA 907); uniform listing of tobacco products (FDCA 905); sale and distribution of tobacco products (FDCA 906); label statements (FDCA 903 and 906); and records and reports on tobacco products. (SFDCA 909)

- **Office of Science**
  - **Brief Overview:** Reviews applications and issues marketing decisions for new tobacco products; conducts and oversees scientific activities and surveillance systems.
  - **Functions Required by Statute:**
    - Reviews and issues science-based decisions on premarket applications for substantial equivalence, exemption from substantial equivalence, premarket tobacco product, and modified risk tobacco product pathways to market for new tobacco products. (FDCA 905j, 910, 911)
    - Reviews new evidence to evaluate whether to withdraw or suspend tobacco product marketing orders. (FDCA 910, 911)
    - Evaluates protocols and annual reports for post-market surveillance and studies for modified risk tobacco products. (FDCA 911)
    - Reviews submissions from manufacturers and importers and publicly displays a list of harmful and potentially harmful constituents of tobacco products. (FDCA 904)
    - Conducts consumer research on harmful and potentially harmful constituents. (FDCA 904)
    - Supports the Tobacco Products Scientific Advisory Committee. (FDCA 917)
    - Conducts research, surveillance, and/or evaluation to inform regulations and guidance required by the TCA. (FDCA 907)
  - **Functions Contemplated but Not Required by Statute**
    - Reviews ingredient and other health information submitted by manufacturers and importers (FDCA 904) and adverse event reports from industry and the public.
    - Authorized to contract for research, testing, and demonstrations. (FDCA 906)

- Manages and adjudicates requests for supervisory review of marketing decisions for new tobacco products. (21 CFR 10.75)
- Oversees the safety of investigational tobacco products. (FDCA 910)

- **Other Functions in Support of Mission**
  - Manages regulatory science research portfolio and tobacco product surveillance systems.

- **Office of Health Communication and Education**
  - **Brief Overview:** Disseminates information on regulatory actions and health risks.
  - **Functions Required by Statute:**
    - Reviews pre- and post-market marketing plans and reports for tobacco products. (FDCA Sec. 905(j), 910, 911)
    - Designs and distributes health warnings for cigarette and smokeless tobacco packages and advertising. (TCA 201, 202, 204)
    - Makes modified risk tobacco product applications publicly available. (FDCA 911)
    - Fulfills Freedom of Information Act responsibilities. (5 USC 552)
    - Ensures accessibility and appropriateness of required public disclosures of information. (Rehabilitation Act 508; Privacy Act 552a)
  - **Functions Contemplated but Not Required by Statute**
    - Supports efforts to prevent tobacco product use by children with data-driven public education (TCA 2, 3)
    - Educates adults about the relative health risks of tobacco products. (TCA 2, 3)
    - Educates retailers regarding Federal law to encourage compliance. (FDCA 906(d))
    - Publishes and disseminates information on regulatory actions and the health harms of tobacco products. (FDCA 705)

- **Office of Compliance and Enforcement**
  - **Brief Overview:** Leads efforts to ensure and monitor compliance with the TCA; takes action when violations occur; and administers registration and listing requirement for manufacturers.
  - **Functions Required by Statute:**
    - Assists small tobacco manufacturers. (FDCA 901)
    - Conducts/contracts for retailer inspections for compliance with tobacco sales provisions, including contracts with States. (FDCA 901, 906; TCA 103)
    - Builds cases and initiates enforcement action when tobacco products are adulterated or misbranded. (FDCA 902, 903)
    - Coordinates on detecting and refusing violative tobacco products at the border. (FDCA 801, 902, 903).
    - Maintains and provides public access to tobacco registration information. (FDCA 905)
    - Conducts biennial inspections of registered establishments that manufacture or process tobacco products. (FDCA 905)
    - Conducts tobacco product recall activities. (FDCA 908)
    - Coordinates with the Federal Trade Commission on enforcement related to labeling and advertising for cigarettes and smokeless tobacco. (FDCA 914)
    - Leads program for administrative civil money penalties and no-tobacco-sale orders for selling tobacco products to minors and selling unauthorized tobacco products (evidence collection, initiation of proceedings, case management support to attorneys in Office of Chief Counsel) (FDCA 303(f)(9), 906; TCA 102(a), 103; 21 CFR Part 1140)

- **Functions Contemplated but Not Required by Statute**
  - Represents FDA on interagency task force for e-cigarette enforcement. (FDCA 902, 903)
  - Supports tobacco product labs for testing to support enforcement actions. (FDCA 902)
  - Manages program for manufacturers to request whether a tobacco product is a pre-existing tobacco product, which may be legally marketed and used as a predicate in a substantial equivalence premarket application. (FDCA 905(j), 910)
  - Develops and provides webinars and other materials for industry to help them understand requirements to help achieve voluntary compliance with the law. (FDCA 906)

CENTER FOR VETERINARY MEDICINE

- **Office of the Center Director**
  - **Brief Overview:** Directs overall center activities and strategic planning; leads cross-cutting activities and support functions.
  - **Functions Required by Statute:**
    - Final product approval decisions and related FR notices (FDCA 512(i), 409, 740A).
    - Responsibilities under Paperwork Reduction Act (44 USC 3501 et. seq.); Freedom of Information Act (5 U.S.C. 552); Citizen Petitions (21 CFR 10.30); APA rulemaking (5 USC 553); GAO audits, Ombuds services (FDCA 562).
    - Dissemination of information on imminent danger to health/gross deception to consumers (FDCA 705).
    - International functions, e.g., collaboration, harmonization, reciprocal agreements (FDCA 1003(b)(3)).
  - **Functions Contemplated but Not Required by Statute**
    - Coordinate guidance development in compliance with GGPs (21 CFR 10.115); disseminate information about the results of investigations (FDCA 705); lead CVM efforts on addressing antimicrobial resistance and PFAS contamination.
  - **Other Functions in Support of Mission**
    - Communications/education related to critical animal/public health issues to protect the public and ensure transparency; primary contact and liaison for industry and consumers to support public health mission; center oversight/management necessary for efficient functioning.

- **Office of Management**
  - **Brief Overview:** Performs business and operational functions CVM-wide.
  - **Functions Required by Statute:**
    - Financial management activities to ensure compliance with the Anti-Deficiency Act (includes 31 USC 1341)
    - Ethics, including reviews of annual OGE-450s and outside activities requests to ensure compliance with conflict-of-interest statutes (18 USC 208)
    - Execute multiple user fee programs including required reports to Congress (FDCA 740, 740A, 741, 742, 743)
    - Records and Information management for CVM (Federal Records Act).
    - Performance management (GPRA – Government Performance and Results Act).
  - **Functions Contemplated but Not Required by Statute**:
    - Budget formulation, execution, reporting
    - Manage hiring, timekeeping, FLSA, FMLA, EEO

- Coordinating acquisitions, contracts, grants, interagency agreements, and purchase cards. (FFMIA, FISMA, FMFIA)

- **Other Functions in Support of Mission:**
  - Managing and tracking Congressional requirements.
  - Coordinates training including scientific training for product reviewers to ensure continued competency with latest science critical to health mission.
  - Acquisitions, human capital, property, safety, and travel support.
  - Support information technology

- **Office of New Animal Product Evaluation**
  - **Brief Overview**: Evaluate animal drug applications, determine whether they meet statutory standards for approval, recommend actions on applications to the Center Director, and act on investigational use exemption and authorization requests.
  - **Functions Required by Statute:**
    - Review new animal drug applications (21 USC 360b(b)); investigational use/authorizations (21 USC 360b(j)); applications for conditional approval (21 USC 360ccc); requests for certifications of medical gases (21 USC 360ddd); emergency use authorizations (21 USC 360bbb-3); designations as Priority Zoonotic Animal Drugs (21 USC 360b(b)(1)); environmental review for approvals (National Environmental Policy Act (NEPA) (42 USC 4321 et. seq.) and Endangered Species Act (16 USC 1531-1544)).
    - Provide patent term information to Patent and Trademark Office (35 USC 156) and information about controlled substances to DEA (21 USC 811(b)).
    - International activities, e.g. harmonization (21 USC393(b)(3)).
    - User fee mandatory public meetings/FR notices/consultations (21 USC 379j-1, ADUFA Reauthorization).
  - **Functions Contemplated but Not Required by Statute:**
    - Pre-approval and bioresearch monitoring (BIMO) inspections (FDCA 512(b)).
    - Develop standards for products subject to review (FDCA 512(b)).
    - Meetings between agency and sponsors (FDCA 512(b)).
    - Fulfill commitments made in ADUFA goals letter, including GFIs (FDCA 740A(d)(1)).

- **Office of Surveillance and Compliance**
  - **Brief Overview:** Conduct surveillance and monitoring to ensure the safety of food/food additives and the safety and effectiveness of animal drugs. Monitor the animal drug and food supply chain and coordinate response to supply chain issues and animal drug shortages. Evaluate food ingredients.
  - **Functions Required by Statute:**
    - Post-market activities related to animal food, drugs, and devices, including:
      - Drug and food registration/listing (FDCA 510 and 415).
      - Periodic food facility inspections (FDCA 421 (a)(2)(B)-(D)).
      - Review food additive petitions (FDCA 409); issue import tolerances (FDCA 512(a)(6)), export certificates (FDCA 801(e)(4)(A)), tolerances for unavoidable substances (FDCA 406), medicated feed mill licenses (FDCA 512(m).
      - Publish annual antimicrobial sales/distribution report (FDCA 512(l).
      - Provide notice and training related to food safety (FDCA 1008 and 1011).
  - **Functions Contemplated but Not Required by Statute**
    - Post-market activities (FDCA 302, 304, 344, 402, 403, 415, 423).

- Risk-based periodic drug inspections (FDCA 510(h)(3)).
- Review GRAS notices and other ingredient submissions.

- **Other Functions in Support of Mission**
  - Enforce animal drug and food adulteration and misbranding provisions to protect public health.
  - Mitigate drug shortages to protect public health and animal health.

- **Office of Applied Science**
  - **Brief Overview:** Conduct research to address pre- and post-market safety of animal food and drugs; results support post-market enforcement actions and pre-market product approvals.
  - **Functions Required by Statute:**
    - Safety studies to support Minor Use and Minor Species (MUMS) applications (FDCA 571, 572) and safety studies to support new animal drug applications.
  - **Functions Contemplated but Not Required by Statute**
    - Administer National Antimicrobial Resistance Monitoring System to monitor trends in antimicrobial resistance.
    - Support assessments of the potential impacts to human health related to antimicrobial new animal drugs in food-producing animals (contemplated by repeated appropriation of funds).
    - Coordinate Veterinary Laboratory Investigation and Response Network of diagnostic laboratories to investigate and respond to animal food, animal drug, and other safety issues; investigate consumer reports of food safety-related events (contemplated by FDCA 402).
  - **Other Functions in Support of Mission**
    - Conduct research relevant to animal drugs and food and to advance priorities, including to increase access to safe, effective animal products.
    - Develop and validate chemical animal drug residue detection assays to protect public health. Develop and validate analytical procedures for analyzing drugs, additives, and contaminants in animal tissues and animal feeds.

- **Office of Minor Use and Minor Species Animal Drug Development**
  - **Brief Overview:** Administer the Minor Use and Minor Species (MUMS) Animal Health Act of 2004, intended to make more drugs legally available to treat minor animal species and uncommon diseases in major animal species.
  - **Functions Required by Statute:**
    - Statute mandates establishment of OMUMS to oversee development and marketing of MUMS drugs (21 USC 393, note); determine minor use status (FDCA 571); grant MUMS designation; (FDCA 573); manage grant program associated with designation (FDCA 573(b)); and review drugs for inclusion on Minor Species Index (21 USC 360ccc-1).
  - **Functions Contemplated but Not Required by Statute**
    - Add species to definition of major species (FDCA 201(nn)), review required post-market indexing reports (FDCA 572(i)).
  - **Other Functions in Support of Mission**
    - Provide education and outreach to industry, veterinarians, and animal producers. Collaborate with domestic and international partners to promote animal health by increasing animal drug availability.

- **Office of Generic Animal Drugs**
  - **Brief Overview:** Evaluate generic new animal drug applications, determine whether they meet statutory standards for approval, recommend actions on applications to the Center Director, and act on investigational notices of exemption and authorization requests for generic new animal drugs.
  - **Functions Required by Statute:**
    - Review abbreviated new animal drug applications (FDCA 512(c)); investigational use/authorizations; suitability petitions (FDCA 512(n)); maintain list of approved NADAs (FDCA 512(n)).
    - International activities, e.g. harmonization (FDCA 1003(b)(3)).
    - User fee mandatory public meetings/FR notices/consultations (FDCA 742).
  - **Functions Contemplated but Not Required by Statute**
    - Pre-approval and BIMO inspections (FDCA 512 (b)).
    - Develop standards for products subject to review (FDCA 512(b)).
    - Meetings between the agency and the animal drug sponsor (FDCA 512 (b)).
    - Fulfill commitments made in AGDUFA goals letter (FDCA 742(d)(1)).

HUMAN FOODS PROGRAM

- **Office of Executive Programs**
  - **Brief Overview:** Provides essential project management and oversight for HFP's mission through leadership and coordination to ensure timely implementation of statutory requirements in food safety, nutrition, and chemicals added to food.
  - **Functions Required by Statute:**
    - Oversight and project management of key FDCA Act food provisions, including
      - ❖ Managing decision making processes across food programs (*Project Management Improvement and Accountability Act, 31 U.S.C. § 503*)
      - ❖ Leading and coordinating HFP processes for implementing legislation, including infant formula requirements (*Pub. L. No. 117-328*) and FSMA *(21 U.S.C. § 2201 et seq)* to meet statutory timelines, track resource utilization, and provide guidance on potential risks and failures.
      - ❖ Managing policy development for innovations in efforts to improve nutritional quality of the food supply (*Nutrition Labeling and Education Act, (21 U.S.C. § 343)).*
      - ❖ Coordinating modernization of FDA's program to reduce use of chemicals in food (e.g., PFAS, heavy metals, food dyes, etc.)
    - Lead **for execution of other statutes essential to FDA responsibilities,** including
      - ❖ Oversight of all food-related correspondence from HHS, Administration, Congress, and other stakeholders
      - ❖ Managing all mandatory reporting to Congress, GAO, OIG on progress of food regulatory activities
      - ❖ Liaising with Commissioner's office on all food-related decision making and notifications of significant public health threats or risks/violations

- **Office of Strategic Programs**
  - **Brief Overview:** Defines public health outcomes for FDA's human foods activities and the strategies to achieve them, develops outcome-based performance indicators and enterprise risk

management plans, measures progress and results, and objectively evaluates the effectiveness of the program in achieving long-term goals and outcomes.

- **Functions Required by Statute:**
  - Strategic Planning & Performance Management: The Chief Financial Officers Act of 1990 (PL 101-576), the Government Performance and Results Act (GPRA) of 1993 (PL 103-62), the GPRA Modernization Act of 2010 (PL 111-352)
  - Program Evaluation: The GPRA Modernization Act of 2010 (PL 111-352), The Foundations for Evidence-Based Policymaking Act of 2018 (PL 115-435)
  - Enterprise Risk Management: The Federal Managers' Financial Integrity Act of 1982 (PL 97-255)
  - FSMA Reporting & Evaluation: Performance measures and reports, studies, and evaluations of effectiveness required by FSMA (PL 111-353).

- **Office of Policy and International Engagement**
  - **Brief Overview:** Protects public health and safety by developing all rules, guidance, policies, delegations, petition responses, and legislation impacting safety and quality of human foods. Leads international food safety efforts for imports and exports, influences global food safety and nutrition standards, and implements trade agreements.
  - **Functions Required by Statute:**
    - Develop required rules and guidances that comply with all legal requirements (e.g., APA, GGPs, NEPA), on topics including food safety (FSMA, Public Health Service Act, Bioterrorism Act); allergen, menu, and vending labeling (21 USC 343); food and color additives (21 USC 348 & 379); equivalence (Pub.L. 103-465), emergency permit control (21 USC 344); and food tolerances (21 USC 346).
    - Support U.S. exports by issuing food export certification (21 USC 381).
    - Support efforts to harmonize regulatory requirements through internationally-focused activities(21 USC 383).
    - Promote government transparency and accountability by implementing FOIA, PRA, Privacy Act, and the Information Quality Act (Pub.L. 106-554) for the HFP.
    - Ensure safety of imported products by building capacity of foreign food safety programs to protect U.S. consumers (21 USC 399), section 305 of FSMA).
  - **Functions Contemplated but Not Required by Statute**
    - Draft regulatory documents to implement health and safety directives on topics including infant formula shortages (21 USC 350), nutrition labeling (e.g., “healthy” claim and symbol), action levels for contaminants in baby foods, dietary supplement safety (DSHEA), and modernizing food standards.
  - **Other Functions in Support of Mission**
    - Lead implementation of Executive Orders impacting foods regulatory programs.
    - Protect and influence U.S. positions by representing FDA in global food forums.

- **Office of Resource Management**
  - **Brief Overview:** Ensures the effective and efficient functioning of HFP by managing its budget, human capital, IT, ethics, facilities, and safety operations.
  - **Functions Required by Statute:**
    - **Budget:** Prepares and executes budgets (Budget and Accounting Act of 1921, Government Performance and Results Act (GPRA)) and ensures compliance with financial and acquisition

laws (includes 31 U.S.C. 1241, Federal Funding Accountability and Transparency Act (PL 109-282))
    - **Human Capital:** Recruits and retains a high-quality workforce while adhering to laws and executive orders governing federal hiring, workforce development, and employee relations (5 U.S.C. 2301, 2302, 903).
    - **IT:** Oversees scientific and regulatory IT systems critical for outbreak response and data security. (Federal Information Security Modernization Act (FISMA), the Clinger-Cohen Act, the E-Government Act of 2002, Paperwork Reduction Act, and Federal Records Act.)
    - **Facilities and Safety:** Provides safe, functional, and energy-efficient office and lab space and ensures compliance with laws (e.g., Federal Property and Administrative Services Act, Occupational Safety and Health Act (OSHA)).

- **Office of Communications, Education, and Engagement**
    - **Brief Overview:** Leads and manages all internal and external communications and relationships with a variety of stakeholders and audiences, protects the public with food safety information, and promotes nutrition information to improve health and wellbeing. Provides clear facts through plain language information and ensures transparency and that communication efforts are coordinated and timely to advance FDA goals and priorities.
    - **Functions Required by Statute:**
        - Ensuring transparency, providing public education, and communicating risk as required by 15 U.S.C. §§ 1451-1461, § 343, § 348, §350c, §355, §371, § 2201 et seq.; Government Accountability and Transparency Acts; 42 U.S.C. § 300hh-10 et seq..
    - **Other Functions in Support of Mission**
        - Ensures effective and transparent communication on food safety, chemical safety, and nutrition issues that are of high priority to the American public.
        - Manages National Food Safety Call Center to provide access to information about food safety. Already in FY25, the call center has taken in 10,500 cases.

- **Office of Surveillance Strategy and Risk Prioritization**
    - **Brief Overview:** Leads development, oversight, and associated activities of HFP's surveillance strategy to assess the overall state of the food supply. Provides data-driven risk-based framework to inform HFP priorities and optimize efficient use of resources.
    - **Functions Required by Statute:**
        - Triaging and ensuring response to consumer complaints, adverse event reporting, and food safety problems: directly supports laws that mandate surveillance systems and improved capacity to prevent, detect, and respond to food safety problems, including outbreak response and surveillance functions required by FSMA (Pub. L. No. 111-353 § 110, § 204, and § 205), required reporting by industry when exposure to food will cause serious adverse health consequences (Pub. L. 110-085 § 1005), adverse event reporting for dietary supplements (21 USC 350f), and registration by food facilities (21 U.S.C. § 350d).
        - Protecting consumers against allergens: monitors allergen prevalence/severity and informs improved labeling (Pub. L. No. 117-11).
        - Directing oversight based on public health risk: oversees prioritization, tracking, and evaluation of inspection, sampling, and import entry review resources for over 180,000 domestic and foreign facilities (21 USC § 350j, 381, 393) and ranks high-risk foods for

product tracing (21 USC § 2223). Regularly updates risk rankings of microbiological and chemical foodborne hazards as mandated by 21 USC § 2201.

- **Functions Contemplated but Not Required by Statute**
  - Foodborne illness attribution and risk ranking: Conducts foodborne illness attribution, risk ranking and prioritization, and risk analyses to support statutory requirements (21 USC § 2204). When detectable contaminants are found in food, conducts toxicological and exposure assessment to evaluate potential human health concerns that may require regulatory action.
- **Other Functions in Support of Mission**
  - Leads HFP's evaluation and adoption of emerging analytics including AI/ML applications.

- **Office of Coordinated Outbreak Response, Evaluation, and Emergency Preparedness**
  - **Brief Overview:** Leads HFP's emergency preparedness and response activities, including identifying and responding to foodborne outbreaks, food defense, traceability, and supply chain monitoring.
  - **Functions Required by Statute:**
    - Identifying & responding to foodborne illness outbreaks: Identify and respond to foodborne illness outbreaks (FSMA section 205, Pub. L 111-353), including sharing information with regulatory partners and the public during outbreaks (FSMA section 205, Pub. L 111-353); lead FDA's traceability program to rapidly and effectively trace food associated with outbreaks (FSMA section 204, Pub. L 111-353).
    - Managing food contamination events: Detect and respond to food contamination (FSMA section 108, Pub. L 111-353), including formal reports and recommendations based on food contamination event findings (FSMA section 110, Pub. L 111-353).
    - Protecting the food supply from intentional harm: Implement FDA's food defense program to prevent intentional adulteration (FSMA section 106, Pub. L 111-353).
  - **Functions Contemplated but Not Required by Statute**
    - Supporting food recalls: Identify adulterated foods and dietary supplements for market removal and compliance action (FDCA).
    - Supporting U.S. critical infrastructure: Strengthen food and agriculture critical infrastructure and supply chains in accordance with NSM-16.

- **Office of Compliance & Enforcement**
  - **Brief Overview:** Protects Americans by reducing exposure to unsafe and improperly labeled foods that can cause illness, injury, or death by determining when, where, and how FDA conducts food inspections, and taking necessary enforcement actions to stop illegal behavior.
  - **Functions Required by Statute:**
    - Remove/recall unsafe products from the market, including those that might cause serious adverse health consequences or death *(FDCA § 423).*
    - Deploy **enforcement actions** like injunctions *(§ 302)* and seizures (§ 304) for non-compliant industry and foods with false or misleading labeling *(§ 403)* or that may be contaminated with harmful germs, chemicals, or filth (e.g., rodents, insects) *(§ 402)*.
    - Direct inspection strategy: when, where, and how Congressionally mandated foreign and domestic food inspections occur *(§ 421)* and ensures adherence to food safety and public health laws such as food additive safety *(§ 409)*, infant formula safety *(§ 412)*, and foreign supplier verification *(§ 805).*

- Advance import safety: Runs safety certification program for importers *(§ 806)* and 3rd party audits for foreign suppliers for efficiency gains *(§ 808).*
- Protect supply of critical foods: Notifies Congress of infant formula recalls and performs related activities to ensure safety and prevent shortages. *(§ 412(k)).*

- **Functions Contemplated but Not Required by Statute**
  - Triages regulatory misconduct complaints: Directs appropriate follow-up.

- **Office of Integrated Food Safety Systems Partnerships**
  - **Brief Overview:** Establishes, educates, funds, and facilitates collaborative relations with federal, state, local, tribal, territorial and international regulatory agencies, as well as public health associations, industry, academia, and consumer groups, via federal statutes to maximize return on investment for public safety/health.
  - **Functions Required by Statute:**
    - Integrated Food Safety System**:** collaboration and coordination among federal, state, local, territorial, tribal, and international agencies to facilitate, coordinate, train, and rely on their inspections to meet FDA inspection mandates (FSMA § 201, 205, 209, 210, 305).
    - State and local governments partnerships to prevent foodborne illness: The Public Health Service Act (PHS), FDCA, and FSMA require that and provide for the FDA to cooperate with and aid state and local authorities to enforce FDA's and their health regulations and provide guidance to preserve and improve public health (including suppression of communicable diseases).

- **Office of Food Chemical Safety, Dietary Supplements & Innovation**
  - **Brief Overview:** Oversees the pre-market and post-market reviews of food additives, color additives, food contact substances, and dietary ingredients to ensure food chemical safety.
  - **Functions Required by Statute:**
    - Pre-market scientific and regulatory review for food additive petitions and food contact substance notifications (FDCA § 409) and color additive petitions (§ 721).
    - Post-market review of substances added to foods: Conducts post-market scientific and regulatory review functions for food additives and food contact substances for standards. Sections 402, 409 and for color additives under Section 721.
    - Conducts pre-market scientific review of safety notifications for certain new dietary ingredients used in dietary supplements under Section 413, as well as reviews of claims for dietary supplements under Section 403.
    - Post-market scientific and regulatory review of contaminants, choking hazards, food allergens, adulterants and pesticides (§ 402, 403, 408, 415-419).
    - Bottled Water Standards: Develops bottled drinking water standards in 21 CFR 165.110 and monitoring requirements in 21 CFR 129 under FDCA Section 410.
  - **Functions Contemplated but Not Required by Statute**
    - GRAS Notification Program to evaluate the safe use of substances exempted from authorization as a food additive under section 409.
    - Review of products derived from biotechnology to ensure new plant varieties made using biotechnology are safe and not adulterated under section 402.

- Reducing heavy metals in foods: Implements the Closer to Zero program to ensure lead and other heavy metals, when present in foods for infants and young children do not exceed safe levels. Supports work related to section 402.

- **Nutrition Center of Excellence**
  - **Brief Overview:** Leads on nutrition science, policy, and initiatives to reduce the burden of diet-related chronic diseases, and ensures adequate food and nutrition labeling, as well as the safety and nutritional adequacy of infant formula and other critical foods.
  - **Functions Required by Statute:**
    - Ensure food labeling provides protection and transparency for consumers**:** Provide critical expertise to develop and implement policy related to: nutrition and food labeling; allergen and gluten-free labeling; menu labeling; dietary supplement labeling; and standards of identity (21 USC 341; 21 USC 343); FD&C Act & amendments, e.g., FALCPA; FASTER; NLEA, FDAMA, DSHEA)
    - Protect U.S. consumers by evaluating compliance against misbranded foods and recommending compliance actions and follow-up activities (21 USC 343).
    - Ensure the safety and nutritional adequacy of infant formula: Conduct pre- and post-market review activities to ensure that infant formula and medical foods are safe and meet nutrient requirements (21 USC 350, 350a, 350a-1, 360ee(b), FDORA)
    - Conduct data science, evidence-building and research activities to inform transparent and rigorous decision-making related to nutrition, food ingredients, food standards, and critical foods (The Foundations for Evidence-Based Policymaking Act of 2018; Public Law 115-435).

- **Office of Laboratory Operations & Applied Science**
  - **Brief Overview:** Leads food safety and nutrition surveillance data collection and analysis operations (e.g. regulatory testing, method development, and validation) and technical support.
  - **Functions Required by Statute:**
    - Testing to detect deleterious contamination, adulteration and misbranding of human foods, including dietary supplements, infant formula and other critical foods (21 CFR § 106.55, § 119, § 2.10; 21 U.S.C. § 342, §343, §346; 40 CFR § 180)
    - Developing methods for food testing, sampling, and outbreak source tracking (21 U.S.C § 2223, § 381)
    - Testing of potable water samples for drinking and culinary purposes collected from operators of interstate travel conveyance (e.g., airlines) (21 CFR § 1240.83)
    - Review of external laboratory analytic methods and results (21 U.S.C § 350k)
    - Facilitating the acceleration of advanced research and development of security countermeasures during significant outbreaks of infectious diseases or bioterrorist attacks (42 U.S.C § 247d) and programs to provide surge capacity for emergency response (21 U.S.C § 2221 and § 2223)
    - Data generation to support risk assessments, rulemaking, program evaluations, and other evidence-driven activities (Public Law 115-435)

- **Functions Contemplated but Not Required by Statute**
  - Supporting safety of imports: Provide expert review of results, reports and studies submitted by laboratories for food that fail to comply with the FD&C Act (21 U.S.C. § 350k, 21 U.S.C § 1.1152, § 1.1153, and 1.1159).
- **Other Functions in Support of Mission**
  - Testing of animal feed to verify compliance, support early warning surveillance, and detect adulteration (21 CFR Chapter 1 Subpart E Part 507, 21 U.S.C. § 2102)

- **Office of Quality Assessment & Management**
  - **Brief Overview:** Assesses and monitors the efficacy and efficiency of HFP programs; manages data integrity and human subject protection compliance programs, and evaluation of external stakeholder food safety systems for leveraging by the Human Foods Program.
  - **Functions Required by Statute:**
    - Quality Management for the Human Foods Program, including Bioresearch Monitoring Program; 21 CFR Parts 58, 50, and 56, Human Subject Protection-related Studies; 45 CFR 46, Research Integrity; 42 U.S.C. § 289 and 42 CFR 93, Contractor Quality Assurance; 48 CFR § 12.208; Paperwork Reduction Act.
    - External Stakeholder Program Evaluation: FSMA directive to engage in Leveraging/Capacity Building with external stakeholders both domestic and foreign (FSMA Third Party and FSMA 205, 305,308, 808 of FDCA; 21 CFR Part 1 subpart M; 2021 FDA Appropriations Act for imported shrimp, 21 USC §1052, §1038, §2104, §2221, §2222, §2223, §2224, §2225, §2204
    - Optimization for efficiency and effectiveness: Evaluating programs in the Human Foods Program to increase efficiency and effectiveness of operations; The Foundations for Evidence-Based Policymaking Act of 2018 (Public Law 115-435), FSMA Sec. 104, Performance Standards.
  - **Other Functions in Support of Mission:**
    - Maintaining lab accreditation: ISO 17025 accreditation/quality assurance functions for regulatory testing laboratories in support of all HFP regulatory decision-making

- **Office of Microbiological Food Safety**
  - **Brief Overview:** Reduces the burden of pathogen-related foodborne illness in foods regulated by the FDA through development of risk-based policies and guidance, regulatory oversight, industry and regulator support, and identification of research needs.
  - **Functions Required by Statute:**
    - Manage risk to prevent foodborne illness across commodities and provide subject matter expertise to outbreak investigations and review of technical questions, compliance cases, inspectional findings, and cooperative programs (PHS Act 42 U.S.C. 264; FFDCA 21 U.S.C. 344, 349, 350.) Specific programs include seafood safety (Pub. L. 111–353; Pub. L. 104–180; Pub. L. 111–353), produce safety (FFDCA §350h; Pub. L. 111–353), beverage safety (FFDCA §349), infant formula (FFDCA §350a), sanitary transportation (FFDCA §350; Pub. L. 111–353), hazard analysis and preventive controls (FFDCA §350; Pub. L. 111–353), and non-amenable meats (FFDCA: 21 U.S.C. 321, 331-334, 342, 371, 381, 393; PHS Act 42 U.S.C. 243, 264, 271.)
    - Trains, standardizes, and certifies state and foreign regulatory personnel to promote uniformity of inspection and rating activities. (FFDCA §399).

- Ensuring safety of processed foods: Review of food processing processes as required by the Low Acid Canned Foods and Acidified Foods Regulations.

OFFICE OF INSPECTIONS AND INVESTIGATIONS

FDA's Office of Inspections and Investigations (OII) is comprised of commodity-based inspectorates and essential mission enabling offices charged with conducting tens of thousands of domestic and international inspections and investigations.

- **Office of Management**
  - **Brief Overview:** The Office of Management oversees human resources, financial management, acquisitions, and travel for OII to enable and sustain all OII statutorily mandated work such as inspections, investigations, imports and emergency response functions, as well as maintaining 194 facilities throughout the country.
  - **Functions Required by Statute:**
    - Oversees OII accounting and financial management(31 USC 3512)
    - Collects fees related to reinspection costs and Voluntary Qualified Importer Program (e.g., FDCA 744K, 806, 808)
    - Procures translation services for inspections, including the Congressionally mandated Foreign Unannounced Inspection Pilot (PL 117-328 (3615)).
  - **Other Functions in Support of Mission**
    - Equip those performing statutorily mandated work through various means: purchasing critical supplies for inspections; overseeing fleet of government vehicles; preparing travel for domestic and foreign inspections; hiring and staffing personnel; managing performance

- **Office of Animal Food Inspectorate**
  - **Brief Overview:** This office is responsible for inspecting domestic and foreign animal food facilities and overseeing state contract work on animal food.
  - **Functions Required by Statute:**
    - The Food Safety Modernization Act of 2011, 21 USC 350j, directs OII to inspect certain domestic food establishments every 3 years and 5 years for high risk and non-high-risk facilities, respectively.
    - 21 USC. 360b(m): Ensures medicated feed is in accordance with all manufacturing and labeling requirements prior to application approval.
    - 21 USC 350f: Evaluates reportable food reports where reasonable probability exists for serious adverse health consequences or death.
  - **Other Functions in Support of Mission**
    - Provides training for staff and state, local, tribal, and territorial (SLTT) agencies to conduct animal food inspections.
    - Coordinates inspections, investigations, and sample collections at animal food facilities with SLTT and foreign partners.
    - Oversees the removal of adulterated animal food products from the market through withdrawals and recalls and ensure the efficacy of such actions.

- **Office of Biologics Inspectorate**
  - **Brief Overview:** Responsible for conducting inspections at domestic and foreign establishments who manufacture blood and blood products, human cells, tissues, immunizations, vaccines, HCT/Ps, allergenic products, in vitro diagnostics including HIV and donor screening test kits, and other biologic drugs and medical devices, including in support of marketing applications.
  - **Functions Required by Statute:**
    - 21 USC 360(h) – Requires biologic products that are deemed a drug or a medical device to be inspected pursuant to a risk-based schedule.
  - **Other Functions in Support of Mission**
    - 42 USC 262 – regulation of biological products, authorizing inspection of establishments who manufacture and prepare any biological product.
    - Serves written orders of retention, recall, destruction, and cessation of manufacturing of HCT/P that is violative and where there is a risk of communicable disease transmission.
    - Collaborates with international regulatory partners to monitor and ensure the safety of the supply chain.

- **Office of Bioresearch Monitoring Inspectorate**
  - **Brief Overview:** This office conducts domestic and foreign inspections and investigations of clinical and nonclinical research to ensure protection of trial participants, determine adherence to regulations, and verify the integrity of data submitted in marketing applications to FDA.
  - **Functions Required by Statute:**
    - As part of the required application/marketing review process, conducts inspections for human and animal drugs, therapeutic biological drugs, biological products, medical devices, tobacco products and certain food products (FDCA 505, 512, 520, 910, 409; PHSA 351).
    - Conducts inspections for post-market adverse drug experience reporting and Risk Evaluation Mitigation Strategies for unknown adverse drug experiences and the inherent risks (FDCA 505(k), 505-1).
    - Conducts post-approval inspections of drug studies, required as a condition for expedited approval pathways (FDCA 505, 506).
  - **Other Functions in Support of Mission**
    - Investigations into complaints of scientific misconduct and registries/sources of Real-World Data/Real World Evidence.
    - Collaboration with international regulatory partners to monitor and ensure the safety of the supply chain.

- **Office of Business Informatics & Solutions Management**
  - **Brief Overview:** Builds and maintains the official data and storage systems that are necessary to house the list of regulated firms, historical industry records, evidence, findings, enforcement activities, and reports of inspections, investigations, imports and other statutorily mandated functions; enables OII's public facing data exchanges, dashboards, and performance goals.
  - **Functions Required by Statute:**
    - Systems overseen by OBISM are required for import admissibility decisions (21 USC 381) and to conduct inspections to meet relevant mandates with adequate information about facilities.

- Further, for field operations, these systems are necessary to meet recordkeeping obligations under the Federal Records Act, the Freedom of Information Act, and legal discovery obligations. See, e.g., 44 USC 3101 et seq.; 5 USC 552.

- **Other Functions in Support of Mission**
  - OBISM maintains systems that display data and other information for access by the public and other components and regulatory partners. These systems increase transparency and can avoid FOI or consultation requests.
  - OBISM also establishes MOUs with regulatory partners to enable the sharing of information between FDA and partner agencies. Along with MOUs, OBISM supports the development of agreements with partner agencies for those agencies to assist enforcing FDA statutes.

- **Office of Criminal Investigations**
  - **Brief Overview:** OCI is the law enforcement arm of the FDA, investigating serious criminal violations involving FDA-regulated products and by investigating allegations of misconduct, impropriety, conflict of interest, or other federal criminal violations by FDA employees.
  - **Functions Required by Statute:**
    - Develops cases working closely with DOJ to address criminal conduct through prosecutions and other judicial proceedings to address risks of unsafe regulated products.
    - 18 USC § 1365(g) gives OCI special agents the authority to investigate the tampering of FDA-regulated products.
    - 21 USC § 372(a)(1) gives OCI special agents the authority to conduct criminal investigations.
  - **Functions in Support of Mission**
    - Law enforcement and criminal investigations have resulted in settlements for the U.S. that exceed OII's budget; these investigations frequently result from referrals from OII statutorily mandated inspections.
    - OCI fosters public confidence by ensuring FDA's workforce remains ethical, trustworthy, and reliable via centralized investigative liaison between FDA and HHS Office of Inspector General (OIG).

- **Office of Field Operations and Response**
  - **Brief Overview:** This office directs tobacco inspections and internet fraud investigations; serves as the agency lead for coordinating emergency response activities; and implements quality initiatives over statutorily mandated functions.
  - **Functions Required by Statute:**
    - 21 USC 387e(g) - Requires FDA to inspect every tobacco establishment within registration requirements at least every two years.
    - 21 USC 335a – Debarment of corporations and individuals on behalf of the Secretary following certain felony convictions.
  - **Other Functions in Support of Mission**
    - 42 USC § 5121 et seq. - Conduct Federal disaster response and to maintain operational capability in support of the National Response Framework.
    - 21 USC § 301 et seq. and 42 USC 201 et seq.: Respond to public health emergencies and coordinate use of emergency medical countermeasures.

- Defense Production Act of 1950 and the Foreign Investment & National Security Act of 2007 - Authorizes FDA to coordinate review of Committee on Foreign Investment in the United States cases for potential FDA equities.

- **Office of Training & Education Development**
  - **Brief Overview:** Develops and delivers mission critical scientific and technical training, staff development programs and management training for OII staff who perform statutorily mandated work, SLTT partners along with other programs. OTED develops and supports qualification certification standards and testing for investigators and maintains Learning Management functions for internal and external partners.
  - **Functions Required by Statute:**
    - 21 USC 399c: FDCA requirement to set standards and administer training and education programs to train SLTT food safety officials.
  - **Other Functions in Support of Mission**
    - Certification and qualification programs.

- **Office of Human & Animal Drug Inspectorate**
  - **Brief Overview:** This office inspects human and animal drug establishments by coordinating and conducting domestic and foreign inspections and investigations to assess manufacturing processes and facilities.
  - **Functions Required by Statute:**
    - 21 USC 360(h) and 353b - Requires FDA to inspect drug manufacturers pursuant to a risk-based schedule using certain statutory factors, as well as compounding outsourcing facilities.
    - 21 USC 356c(g) - Requires prioritized inspections to address drug shortages.
    - 21 USC 355 – Requires domestic and foreign premarket inspections to inform the approvability of new human and animal drugs, including generic drugs, and post-approval inspections to determine compliance with FDCA requirements
  - **Other Functions in Support of Mission**
    - Evaluates field alert reports drug manufacturers are required to submit when marketed application drug products fail to meet quality specifications.
    - Coordinates with CDC to determine root cause of identified outbreaks related to drug products and to remove those identified products from the market.
    - Responds to consumer complaints.

- **Office of Human Food Inspectorate**
  - **Brief Overview:** Responsible for inspecting roughly 80,000 domestic and more than 100,000 foreign human food facilities through inspections, investigations, and sample collections, to protect the nation's human food supply and remove unsafe human food products from the market.
  - **Functions Required by Statute:**
    - 21 USC 350j: Inspects domestic registered high-risk food facilities, not less often than once every 3 years. Facilities not identified as high-risk facility are inspected not less often than once every 5 years. For foreign food facilities, the law directs OII to inspect at least 600

foreign facilities and double the inspections for 5 years until 19,200 facilities are inspected each year.
    - 21 USC 350a-1(i)(3): Inspects all infant formula manufacturers at least once a year.
    - 21 USC 350f: Evaluates reports of food for which a reasonable probability exists for serious adverse health consequences or death.
  - **Other Functions in Support of Mission**
    - Oversees removal of adulterated human food products from the market through withdrawals and recalls and ensures the efficacy of such actions.
    - In coordination with federal and SLTT partners, ensures human food served at national special security events is safe and in compliance with FDA laws.
    - Provides training and development for other federal and SLTT agencies to conduct human food inspections.

- **Office of Import Operations**
  - **Brief Overview:** Responsible for the screening of imported FDA-regulated products at over 300 U.S. ports, including international mail facilities and express courier hubs. Through inspections, sample collection, and regulatory reviews, OIO prevents dangerous and illicit goods from entering U.S. for public health protection.
  - **Functions Required by Statute:**
    - 21 USC 381(a): Requires OII to decide whether imported FDA-regulated products may enter the U.S. and to process refusals
  - **Other Functions in Support of Mission**
    - 21 USC 381(l & m): Screens imported food for potential bioterrorism.
    - 42 USC 201: Conducts security risk analysis for U.S. food supply.
    - 21 USC 384 & 384a: Conducts assessment of Canadian prescription drugs; inspects food importers to ensure supply chain safety, security, and integrity; and expedites food shipments that comply with 3rd party certification.
    - 21 USC 360mm: Conducts import oversight of radiation-emitting electronic products.
    - 42 USC 351 & 361: Conducts import oversight of biological products.
    - The Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities Act (SUPPORT Act) authorizes destruction of certain illicit smuggled drugs.
    - OIO partners with CBP to remove harmful products brought into the U.S. outside the import system.

- **Office of Medical Devices & Radiological Health Inspectorate**
  - **Brief Overview:** Responsible for domestic and foreign inspections and investigations of medical devices and radiological health products, including mammography facilities, to minimize risk while ensuring access to safe, effective, and high-quality medical devices and radiological health products. This includes monitoring, responding to, and investigating product recalls and consumer complaints.
  - **Functions Required by Statute:**
    - 21 USC 360(h): Inspects medical device manufacturers using risk-based schedule with specific statutory factors (21 U.S.C. §360h).

- 21 USC. 360e: Conducts premarket inspections to support the review of Premarket Approval (PMA) applications for Class III devices.
- 21 USC 356j(f): Conducts prioritized inspections to assist with a device shortage.

- **Other Functions in Support of Mission**
  - 21 USC 360nn: Conducts inspections of radiation-emitting electronic products.
  - 21 USC 360h-1 and 21 USC 360j: Monitors and assesses device recalls and identifies mitigating health risk strategies for defective or unsafe devices.
  - 42 USC 263b(g)(1): Inspects mammography facilities.
  - 42 USC 263b(g)(2): Audits state inspectors who conduct mammography inspections.

Subject: HHS Competitive Areas for Approval

OPM Memo (Final).pdf

OPM Competitive Area Grant (Fi...

HHS 25 MAR Competitive Are...

Dear Michael,

HHS is requesting OPM approval of competitive areas which will be in effect less than 90 days prior to a proposed effective date of a reduction of force, in accordance with 5 CFR 351.402(c). Please find attached a memorandum supporting HHS's request as well as a spreadsheet describing the details of each competitive area. I have also attached a proposed approval of the waiver, in case that is helpful.

Please note we will be sending one additional list of competitive areas tomorrow focused on CDC.

Sincerely,

Thomas J. Nagy Jr., MLER
Deputy Assistant Secretary for Human Resources/ Chief Human Capital Officer
Office of Human Resources
Mobil 202-531-5545

The U.S. Department of Health & Human Services
Hubert H. Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201

March 25, 2025

To: **Michael J. Mahoney, Office of Personnel Management**

From: **Tom Nagy, Human Capital Officer**

Subject: **Establishment of Competitive Areas**

This memorandum serves as the Department of Health & Human Services' (HHS) request to establish competitive areas and for an exception to the competitive area 90-day rule. Please find HHS's responses below with regards to our competitive areas.

1. Identification of the proposed competitive area, including the organizational segment, geographic location, and limits of the local commuting area.

Answer: Details of each proposed competitive area including the organizational segment and geographic location are included in the attached spreadsheet. Aligning with page 31 of OPM's Workforce Reshaping Operations Handbook, HHS defines local commuting areas as "any population center (or two or more neighboring centers) and the surrounding localities in which people live and can reasonably be expected to travel back and forth every day to their usual employment."

2. A description of how the proposed area differs from the one previously established for the same unit and geographic area.

Answer: To my knowledge, no competitive areas have been established by HHS for the units described in the attached spreadsheet. We have not found any documentation of previously defined or currently enacted competitive areas across HHS. The HHS Human Resources database (called Enterprise Human Capital Management or EHCM) contains a competitive area field; however, this field is blank for all employees.

3. An organizational chart of the agency showing the relationship between the organizational components within the competitive area and other components in the commuting area.

Answer: Organizational structure details for each competitive area are included in the attached spreadsheet.

4. The number of competing employees in the proposed competitive area.

Answer: The number of competing employees in each proposed competitive area is included in the attached spreadsheet.

5. A description of the operation, work function, staff, and personnel administration of the proposed area and, where appropriate, a description of how the area is distinguished from others in these respects.

Answer:

Overview. The Department of Health and Human Services (HHS) has a critical mission to enhance the health and well-being of all Americans, by providing for effective health and human services and by fostering sound, sustained advances in the sciences underlying medicine, public health, and social services. Currently, HHS is not well structured to achieve this goal. HHS has too many divisions, offices, functions, programs, and research organizations, which are extremely difficult for leaders and stakeholders to navigate. This problem grew worse during the COVID pandemic; our budget ballooned by 38% and our staff grew by 17% over the past five years. Our Agency Restructuring and RIF Plan (ARRP) is aimed at solving these problems.

Plan. Accordingly, our proposal establishes new competitive areas based on "Department ID." Department ID is the core administrative organization field for all HHS HR data in our HR database. Department ID is the separate administrative unit used for managing all HR across HHS; positions are currently added and subtracted at the level of these Department ID administrative units.

Since our restructuring planning process began, HHS has not created any new Department IDs. To my knowledge, HHS has not moved any individuals between Department IDs since the restructuring planning began. And all functions of a Department ID are unique to the specific Department ID. Therefore, it makes sense to define every competitive area in terms of a single Department ID.

Legal basis. Department ID meets the definition of a competitive area. A competitive area is defined in terms of an agency's organizational units and geographical location. 5 C.F.R. § 351.402(b). "A competitive area may consist of all or part of an agency." *Id.* And "[t]he minimum competitive area is a subdivision of the agency under *separate administration* within the local commuting area." *Id.* (emphasis added). Department IDs define organizational units within HHS that are under separate administration.

OPM defines "separate administration" to means the unit has (1) "the administrative authority to take or direct personnel actions"; (2) "the organizational unit is separately organized and clearly distinguished from other organizational units within the same local commuting area in regard to operation, work function, staff, and personnel management." OPM's Workforce Reshaping Operations Handbook at 30. OPM recognizes "that individual organizational components may be under separate administration even though many agencies reserve final approval of certain personnel actions to a higher level in the agency." *Id.* Moreover, "separate administration" is often noted in an agency's organizational manual or in its delegations of authority. *Id.*

Department ID defines units that are clearly distinguished in regard to operation, work function, and staff. They are separate administrative authorities. Employees are added or subtracted at the Department ID level. Usually, a Department ID will have its own decisionmaker. Other times, consistent with the OPM guidance referenced above, final approval of certain decisions is required above the Department ID level. But, overall, functions are organized by Department ID and hiring happens within these units.

6. A discussion of the circumstances that led to the proposed changes less than 90 days before a proposed reduction.

Answer: HHS is responding to the executive order *Implementing The President's "Department of Government Efficiency" Workforce Optimization Initiative*, dated February 11, 2025.

Mr. Tom Nagy
Human Capital Officer
Department of Health and Human Services
Hubert H. Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201

Dear Mr. Nagy,

The Office of Personnel Management (OPM) approves the Department of Health and Human Services' (HHS) March 25, 2025, request for OPM approval of competitive areas which will be in effect less than 90 days prior to the proposed effective date of reduction of force (RIF). Your request indicates that competitive areas will be established according to HHS Department ID. Furthermore, a 90-day waiver is necessary due to the impact of the executive order titled, *Implementing The President's "Department of Government Efficiency" Workforce Optimization Initiative* (February 11, 2025).

OPM approves your request in accordance with 5 C.F.R. 351.402(c). This provision requires OPM approval when a competitive area will be in effect less than 90 days prior to the effective date of a RIF. Divisions based on Department ID meet the definition of a competitive area. Department IDs appear to be the current organizational structure at HHS, and as described define organizational units that are under separate administration. *See* 5 C.F.R. 351.402(b).

Please contact Katika Floyd by email at katika.floyd@opm.gov or phone at 202-606-9531 should you or staff have any questions with this response.

Sincerely,

Veronica E. Hinton
Associate Director
Workforce Policy and Innovation

NOTE ON GEOGRAPHIC AREA - *For any geographic area listed as nationwide, the competitive area will be further broken down into each local commuting area, as defined by OPM regulations. For geographic areas that have multiple locations (e.g., Boston, Chicago, New York), each local commuting area, as defined by OPM regulations, will be a unique competitive area.

OPM Competitive Area Grant (Fi...

HHS 25 MAR Competitive Are...

Dear Michael,

HHS is requesting OPM approval of competitive areas which will be in effect less than 90 days prior to a proposed effective date of a reduction of force, in accordance with 5 CFR 351.402(c). Please find attached a memorandum supporting HHS's request as well as a spreadsheet describing the details of each competitive area. I have also attached a proposed approval of the waiver, in case that is helpful.

Please note we will be sending one additional list of competitive areas tomorrow focused on CDC.

Sincerely,

Thomas J. Nagy Jr., MLER
Deputy Assistant Secretary for Human Resources/ Chief Human Capital Officer
Office of Human Resources
Mobil 202-531-5545

The U.S. Department of Health & Human Services
Hubert H. Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201

March 25, 2025

To: **Michael J. Mahoney, Office of Personnel Management**

From: **Tom Nagy, Human Capital Officer**

Subject: **Establishment of Competitive Areas**

This memorandum serves as the Department of Health & Human Services' (HHS) request to establish competitive areas and for an exception to the competitive area 90-day rule. Please find HHS's responses below with regards to our competitive areas.

1. Identification of the proposed competitive area, including the organizational segment, geographic location, and limits of the local commuting area.

Answer: Details of each proposed competitive area including the organizational segment and geographic location are included in the attached spreadsheet. Aligning with page 31 of OPM's Workforce Reshaping Operations Handbook, HHS defines local commuting areas as "any population center (or two or more neighboring centers) and the surrounding localities in which people live and can reasonably be expected to travel back and forth every day to their usual employment."

2. A description of how the proposed area differs from the one previously established for the same unit and geographic area.

Answer: To my knowledge, no competitive areas have been established by HHS for the units described in the attached spreadsheet. We have not found any documentation of previously defined or currently enacted competitive areas across HHS. The HHS Human Resources database (called Enterprise Human Capital Management or EHCM) contains a competitive area field; however, this field is blank for all employees.

3. An organizational chart of the agency showing the relationship between the organizational components within the competitive area and other components in the commuting area.

Answer: Organizational structure details for each competitive area are included in the attached spreadsheet.

4. The number of competing employees in the proposed competitive area.

Answer: The number of competing employees in each proposed competitive area is included in the attached spreadsheet.

5. A description of the operation, work function, staff, and personnel administration of the proposed area and, where appropriate, a description of how the area is distinguished from others in these respects.

Answer:

Overview. The Department of Health and Human Services (HHS) has a critical mission to enhance the health and well-being of all Americans, by providing for effective health and human services and by fostering sound, sustained advances in the sciences underlying medicine, public health, and social services. Currently, HHS is not well structured to achieve this goal. HHS has too many divisions, offices, functions, programs, and research organizations, which are extremely difficult for leaders and stakeholders to navigate. This problem grew worse during the COVID pandemic; our budget ballooned by 38% and our staff grew by 17% over the past five years. Our Agency Restructuring and RIF Plan (ARRP) is aimed at solving these problems.

Plan. Accordingly, our proposal establishes new competitive areas based on "Department ID." Department ID is the core administrative organization field for all HHS HR data in our HR database. Department ID is the separate administrative unit used for managing all HR across HHS; positions are currently added and subtracted at the level of these Department ID administrative units.

Since our restructuring planning process began, HHS has not created any new Department IDs. To my knowledge, HHS has not moved any individuals between Department IDs since the restructuring planning began. And all functions of a Department ID are unique to the specific Department ID. Therefore, it makes sense to define every competitive area in terms of a single Department ID.

Legal basis. Department ID meets the definition of a competitive area. A competitive area is defined in terms of an agency's organizational units and geographical location. 5 C.F.R. § 351.402(b). "A competitive area may consist of all or part of an agency." *Id.* And "[t]he minimum competitive area is a subdivision of the agency under *separate administration* within the local commuting area." *Id.* (emphasis added). Department IDs define organizational units within HHS that are under separate administration.

OPM defines "separate administration" to means the unit has (1) "the administrative authority to take or direct personnel actions"; (2) "the organizational unit is separately organized and clearly distinguished from other organizational units within the same local commuting area in regard to operation, work function, staff, and personnel management." OPM's Workforce Reshaping Operations Handbook at 30. OPM recognizes "that individual organizational components may be under separate administration even though many agencies reserve final approval of certain personnel actions to a higher level in the agency." *Id.* Moreover, "separate administration" is often noted in an agency's organizational manual or in its delegations of authority. *Id.*

Department ID defines units that are clearly distinguished in regard to operation, work function, and staff. They are separate administrative authorities. Employees are added or subtracted at the Department ID level. Usually, a Department ID will have its own decisionmaker. Other times, consistent with the OPM guidance referenced above, final approval of certain decisions is required above the Department ID level. But, overall, functions are organized by Department ID and hiring happens within these units.

6. A discussion of the circumstances that led to the proposed changes less than 90 days before a proposed reduction.

Answer: HHS is responding to the executive order *Implementing The President's "Department of Government Efficiency" Workforce Optimization Initiative*, dated February 11, 2025.

Mr. Tom Nagy
Human Capital Officer
Department of Health and Human Services
Hubert H. Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201

Dear Mr. Nagy,

The Office of Personnel Management (OPM) approves the Department of Health and Human Services' (HHS) March 25, 2025, request for OPM approval of competitive areas which will be in effect less than 90 days prior to the proposed effective date of reduction of force (RIF). Your request indicates that competitive areas will be established according to HHS Department ID. Furthermore, a 90-day waiver is necessary due to the impact of the executive order titled, *Implementing The President's "Department of Government Efficiency" Workforce Optimization Initiative* (February 11, 2025).

OPM approves your request in accordance with 5 C.F.R. 351.402(c). This provision requires OPM approval when a competitive area will be in effect less than 90 days prior to the effective date of a RIF. Divisions based on Department ID meet the definition of a competitive area. Department IDs appear to be the current organizational structure at HHS, and as described define organizational units that are under separate administration. *See* 5 C.F.R. 351.402(b).

Please contact Katika Floyd by email at katika.floyd@opm.gov or phone at 202-606-9531 should you or staff have any questions with this response.

Sincerely,

Veronica E. Hinton
Associate Director
Workforce Policy and Innovation

NOTE ON GEOGRAPHIC AREA - *For any geographic area listed as nationwide, the competitive area will be further broken down into each local commuting area, as defined by OPM regulations. For geographic areas that have multiple locations (e.g., Boston, Chicago, New York), each local commuting area, as defined by OPM regulations, will be a unique competitive area.

Dear Michael,

HHS is requesting OPM approval of competitive areas which will be in effect less than 90 days prior to a proposed effective date of a reduction of force, in accordance with 5 CFR 351.402(c). Please find attached a memorandum supporting HHS's request as well as a spreadsheet describing the details of each competitive area. I have also attached a proposed approval of the waiver, in case that is helpful.

Please note we will be sending one additional list of competitive areas tomorrow focused on CDC.

Sincerely,

Thomas J. Nagy Jr., MLER
Deputy Assistant Secretary for Human Resources/ Chief Human Capital Officer

UNITED STATES OFFICE OF PERSONNEL MANAGEMENT
Washington, DC 20415

March 27, 2025

Mr. Thomas J. Nagy, Jr.
Chief Human Capital Officer
U.S. Department of Health and Human Services
200 Independence Avenue, S.W.
Washington, D.C. 20201

Dear Mr. Nagy:

The U.S. Office of Personnel Management (OPM) approves the U.S. Department of Health and Human Services (HHS) March 25 and 26, 2025, requests for approval of a competitive area which will be in effect less than 90 days prior to the proposed effective date of a reduction in force (RIF). Your requests indicate that a RIF is necessary in the HHS due to the impact of an Executive Order titled, "Implementing the President's 'Department of Government Efficiency' Workforce Optimization Initiative" (February 11, 2025). Section 3(c) of the EO states:

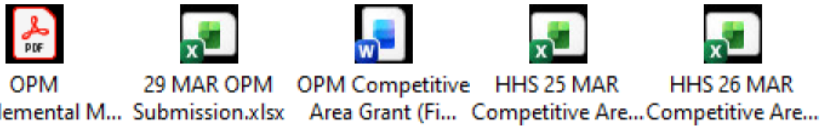
> (c) Agency Heads shall promptly undertake preparations to initiate large-scale reductions in force (RIFs), consistent with applicable law, and to separate from Federal service temporary employees and reemployed annuitants working in areas that will likely be subject to the RIFs. All offices that perform functions not mandated by statute or other law shall be prioritized in the RIFs, including all agency diversity, equity, and inclusion initiatives; all agency initiatives, components, or operations that my Administration suspends or closes; and all components and employees performing functions not mandated by statute or other law who are not typically designated as essential during a lapse in appropriations as provided in the Agency Contingency Plans on the Office of Management and Budget website. This subsection shall not apply to functions related to public safety, immigration enforcement, or law enforcement.

OPM approves your requests in accordance with 5 CFR 351.402(c). This provision requires OPM approval when a competitive area will be in effect less than 90 days prior to the effective date of a RIF. The competitive areas proposed in your requests were not previously established. They comprise the groups mentioned in your requests including their various divisions, offices, and units. HHS must confirm and document that any competitive area established meets the definition for separate administration:

- The organizational unit or subdivision is separately organized;
- It is clearly distinguished from other units with regard to operation, work function, staff, and personnel management; and

- It has the authority to take or direct personnel actions (e.g., establish or abolish positions).

Also, please note, a RIF cannot be effectuated until 60 days from the date an employee receives their notice. HHS should also review all applicable collective bargaining agreements for any additional requirements necessary to effectuate a RIF.



Please contact Katika Floyd by email at katika.floyd@opm.gov or phone at 202-606-9531 should you or staff have any questions with this response.

Sincerely,

Veronica E. Hinton
Associate Director
Workforce Policy and Innovation

Subject: OPM Submission - 3.29.2025

Good Afternoon Office of Personnel Management,

HHS is requesting OPM approval of competitive areas which will be in effect less than 90 days prior to a proposed effective date of a reduction of force, in accordance with 5 CFR 351.402(c). Please find attached a memorandum supporting HHS's request as well as a spreadsheet (labeled 29 MAR OPM Submission) describing the details of each competitive area. I have also attached a proposed approval of the waiver, in case that is helpful. And finally, I have attached two spreadsheets with additional competitive areas OPM approved earlier this week.

V/r,

Thomas J. Nagy Jr., MLER
Deputy Assistant Secretary for Human Resources/ Chief Human Capital Officer
Department of Health and Human Services
Office of Human Resources
Mobil 202-531-5545

The U.S. Department of Health & Human Services
Hubert H. Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201

March 29, 2025

To: **Michael J. Mahoney, Office of Personnel Management**

From: **Tom Nagy, Human Capital Officer**

Subject: **Establishment of Competitive Areas**

This memorandum serves as the Department of Health & Human Services' (HHS) request to establish competitive areas and for an exception to the competitive area 90-day rule. Please find HHS's responses below with regards to our competitive areas.

1. Identification of the proposed competitive area, including the organizational segment, geographic location, and limits of the local commuting area.

Answer: Details of each proposed competitive area including the organizational segment and geographic location are included in the attached spreadsheet. Aligning with page 31 of OPM's Workforce Reshaping Operations Handbook, HHS defines local commuting areas as "any population center (or two or more neighboring centers) and the surrounding localities in which people live and can reasonably be expected to travel back and forth every day to their usual employment."

2. A description of how the proposed area differs from the one previously established for the same unit and geographic area.

Answer: To my knowledge, no competitive areas have been established by HHS for the units described in the attached spreadsheet. We have not found any documentation of previously defined or currently enacted competitive areas across HHS. The HHS Human Resources database (called Enterprise Human Capital Management or EHCM) contains a competitive area field; however, this field is blank for all employees.

3. An organizational chart of the agency showing the relationship between the organizational components within the competitive area and other components in the commuting area.

Answer: Organizational structure details for each competitive area are included in the attached spreadsheet. Two additional spreadsheets with the competitive areas previously approved by OPM are also attached for your reference.

4. The number of competing employees in the proposed competitive area.

Answer: The number of competing employees in each proposed competitive area is included in the attached spreadsheet.

5. A description of the operation, work function, staff, and personnel administration of the proposed area and, where appropriate, a description of how the area is distinguished from others in these respects.

Answer:

Overview. The Department of Health and Human Services (HHS) has a critical mission to enhance the health and well-being of all Americans, by providing for effective health and human services and by fostering sound, sustained advances in the sciences underlying medicine, public health, and social services. Currently, HHS is not well structured to achieve this goal. HHS has too many divisions, offices, functions, programs, and research organizations, which are extremely difficult for leaders and stakeholders to navigate. This problem grew worse during the COVID pandemic; our budget ballooned by 38% and our staff grew by 17% over the past five years. Our Agency Restructuring and RIF Plan (ARRP) is aimed at solving these problems.

Plan. Accordingly, our proposal establishes new competitive areas based on "Department ID." Department ID is the core administrative organization field for all HHS HR data in our HR database. Department ID is the separate administrative unit used for managing all HR across HHS; positions are currently added and subtracted at the level of these Department ID administrative units.

Since our restructuring planning process began, HHS has not created any new Department IDs. To my knowledge, HHS has not moved any individuals between Department IDs since the restructuring planning began. And all functions of a Department ID are unique to the specific Department ID. Therefore, it makes sense to define every competitive area in terms of a single Department ID.

Legal basis. Department ID meets the definition of a competitive area. A competitive area is defined in terms of an agency's organizational units and geographical location. 5 C.F.R. § 351.402(b). "A competitive area may consist of all or part of an agency." *Id.* And "[t]he minimum competitive area is a subdivision of the agency under *separate administration* within

the local commuting area." *Id.* (emphasis added). Department IDs define organizational units within HHS that are under separate administration.

OPM defines "separate administration" to means the unit has (1) "the administrative authority to take or direct personnel actions"; (2) "the organizational unit is separately organized and clearly distinguished from other organizational units within the same local commuting area in regard to operation, work function, staff, and personnel management." OPM's Workforce Reshaping Operations Handbook at 30. OPM recognizes "that individual organizational components may be under separate administration even though many agencies reserve final approval of certain personnel actions to a higher level in the agency." *Id.* Moreover, "separate administration" is often noted in an agency's organizational manual or in its delegations of authority. *Id.*

Department ID defines units that are clearly distinguished in regard to operation, work function, and staff. They are separate administrative authorities. Employees are added or subtracted at the Department ID level. Usually, a Department ID will have its own decisionmaker. Other times, consistent with the OPM guidance referenced above, final approval of certain decisions is required above the Department ID level. But, overall, functions are organized by Department ID and hiring happens within these units.

6. A discussion of the circumstances that led to the proposed changes less than 90 days before a proposed reduction.

Answer: HHS is responding to the executive order *Implementing The President's "Department of Government Efficiency" Workforce Optimization Initiative*, dated February 11, 2025.

NOTE ON GEOGRAPHIC AREA - *For any geographic area listed as nationwide, the competitive area will be further broken down into each local commuting area, as defined by OPM regulations.

Mr. Tom Nagy
Human Capital Officer
Department of Health and Human Services
Hubert H. Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201

Dear Mr. Nagy,

The Office of Personnel Management (OPM) approves the Department of Health and Human Services' (HHS) March 29, 2025, request for OPM approval of competitive areas which will be in effect less than 90 days prior to the proposed effective date of reduction of force (RIF). Your request indicates that competitive areas will be established according to HHS Department ID. Furthermore, a 90-day waiver is necessary due to the impact of the executive order titled, *Implementing The President's "Department of Government Efficiency" Workforce Optimization Initiative* (February 11, 2025).

OPM approves your request in accordance with 5 C.F.R. 351.402(c). This provision requires OPM approval when a competitive area will be in effect less than 90 days prior to the effective date of a RIF. Divisions based on Department ID meet the definition of a competitive area. Department IDs appear to be the current organizational structure at HHS, and as described define organizational units that are under separate administration. *See* 5 C.F.R. 351.402(b).

Please contact Katika Floyd by email at katika.floyd@opm.gov or phone at 202-606-9531 should you or staff have any questions with this response.

Sincerely,

Veronica E. Hinton
Associate Director
Workforce Policy and Innovation

NOTE ON GEOGRAPHIC AREA - *For any geographic area listed as nationwide, the competitive area will be further broken down into each local commuting area, as defined by OPM regulations. For geographic areas that have multiple locations (e.g., Boston, Chicago, New York), each local commuting area, as defined by OPM regulations, will be a unique competitive area.

Thomas- given that this request has come through on a weekend and is consistent with a methodology for defining competitive areas that OPM has approved in the past, and given what I understand to be the extremely time- sensitive nature of the request (i.e. you are planning to send the notices today), OPM is granting preliminary approval of the request. Formal approval from WPI will be forthcoming next week.

Best,

Noah

Some people who received this message don't often get email from thomas.nagy@hhs.gov. Learn why this is important
Good Afternoon Office of Personnel Management,

HHS is requesting OPM approval of competitive areas which will be in effect less than 90 days prior to a proposed effective date of a reduction of force, in accordance with 5 CFR 351.402(c). Please find attached a memorandum supporting HHS's request as well as a spreadsheet (labeled 29 MAR OPM Submission) describing the details of each competitive area. I have also attached a proposed approval of the waiver, in case that is helpful. And finally, I have attached two spreadsheets with additional competitive areas OPM approved earlier this week.

UNITED STATES OFFICE OF PERSONNEL MANAGEMENT
Washington, DC 20415

March 31, 2025

Mr. Thomas J. Nagy, Jr.
Chief Human Capital Officer
U.S. Department of Health and Human Services
200 Independence Avenue, S.W.
Washington, D.C. 20201

Dear Mr. Nagy:

The U.S. Office of Personnel Management (OPM) approves the U.S. Department of Health and Human Services (HHS) March 31, 2025, request for approval of a competitive area which will be in effect less than 90 days prior to the proposed effective date of a reduction in force (RIF). Your request indicates that a RIF is necessary in the HHS due to the impact of an Executive Order titled, "Implementing the President's 'Department of Government Efficiency' Workforce Optimization Initiative" (February 11, 2025). Section 3(c) of the EO states:

> (c) Agency Heads shall promptly undertake preparations to initiate large-scale reductions in force (RIFs), consistent with applicable law, and to separate from Federal service temporary employees and reemployed annuitants working in areas that will likely be subject to the RIFs. All offices that perform functions not mandated by statute or other law shall be prioritized in the RIFs, including all agency diversity, equity, and inclusion initiatives; all agency initiatives, components, or operations that my Administration suspends or closes; and all components and employees performing functions not mandated by statute or other law who are not typically designated as essential during a lapse in appropriations as provided in the Agency Contingency Plans on the Office of Management and Budget website. This subsection shall not apply to functions related to public safety, immigration enforcement, or law enforcement.

OPM approves your request in accordance with 5 CFR 351.402(c). This provision requires OPM approval when a competitive area will be in effect less than 90 days prior to the effective date of a RIF. The competitive areas proposed in your request were not previously established. They comprise the groups identified in your enclosed request including their various divisions, offices, and units. HHS must confirm and document that any competitive area established meets the definition for separate administration:

- The organizational unit or subdivision is separately organized;

- It is clearly distinguished from other units with regard to operation, work function, staff, and personnel management; and
- It has the authority to take or direct personnel actions (e.g., establish or abolish positions).

Also, please note, a RIF cannot be effectuated until 60 days from the date an employee receives their notice. HHS should also review all applicable collective bargaining agreements for any additional requirements necessary to effectuate a RIF.

Please contact Katika Floyd by email at katika.floyd@opm.gov or phone at 202-606-9531 should you or staff have any questions with this response.

Sincerely,

KIMBERLY HOLDEN Digitally signed by KIMBERLY HOLDEN

Subject: Re: OPM Submission - 3.29.2025

Thomas- given that this request has come through on a weekend and is consistent with a methodology for defining competitive areas that OPM has approved in the past, and given what I understand to be the extremely time- sensitive nature of the request (i.e. you are planning to send the notices today), OPM is granting preliminary approval of the request. Formal approval from WPI will be forthcoming next week.

Best,

Noah

Good Afternoon Office of Personnel Management,

HHS is requesting OPM approval of competitive areas which will be in effect less than 90 days prior to a proposed effective date of a reduction of force, in accordance with 5 CFR 351.402(c). Please find attached a memorandum supporting HHS's request as well as a spreadsheet (labeled 29 MAR OPM Submission) describing the details of each competitive area. I have also attached a proposed approval of the waiver, in case that is helpful. And finally, I have attached two spreadsheets with additional competitive areas OPM approved earlier this week.

V/r,

Thomas J. Nagy Jr., MLER
Deputy Assistant Secretary for Human Resources/ Chief Human Capital Officer
Department of Health and Human Services
Office of Human Resources
Mobil 202-531-5545

UNITED STATES OFFICE OF PERSONNEL MANAGEMENT
Washington, DC 20415

March 31, 2025

Mr. Thomas J. Nagy, Jr.
Chief Human Capital Officer
U.S. Department of Health and Human Services
200 Independence Avenue, S.W.
Washington, D.C. 20201

Dear Mr. Nagy:

The U.S. Office of Personnel Management (OPM) approves the U.S. Department of Health and Human Services (HHS) March 29, 2025, request for approval of a competitive area which will be in effect less than 90 days prior to the proposed effective date of a reduction in force (RIF). Your request indicates that a RIF is necessary in the HHS due to the impact of an Executive Order titled, "Implementing the President's 'Department of Government Efficiency' Workforce Optimization Initiative" (February 11, 2025). Section 3(c) of the EO states:

> (c) Agency Heads shall promptly undertake preparations to initiate large-scale reductions in force (RIFs), consistent with applicable law, and to separate from Federal service temporary employees and reemployed annuitants working in areas that will likely be subject to the RIFs. All offices that perform functions not mandated by statute or other law shall be prioritized in the RIFs, including all agency diversity, equity, and inclusion initiatives; all agency initiatives, components, or operations that my Administration suspends or closes; and all components and employees performing functions not mandated by statute or other law who are not typically designated as essential during a lapse in appropriations as provided in the Agency Contingency Plans on the Office of Management and Budget website. This subsection shall not apply to functions related to public safety, immigration enforcement, or law enforcement.

OPM approves your request in accordance with 5 CFR 351.402(c). This provision requires OPM approval when a competitive area will be in effect less than 90 days prior to the effective date of a RIF. The competitive areas proposed in your request were not previously established. They comprise the groups identified in your enclosed request, including their various divisions, offices, and units. HHS must confirm and document that any competitive area established meets the definition for separate administration:

- The organizational unit or subdivision is separately organized;
- It is clearly distinguished from other units with regard to operation, work function, staff, and personnel management; and

- It has the authority to take or direct personnel actions (e.g., establish or abolish positions).

Also, please note, a RIF cannot be effectuated until 60 days from the date an employee receives their notice. HHS should also review all applicable collective bargaining agreements for any additional requirements necessary to effectuate a RIF.

Please contact Katika Floyd by email at katika.floyd@opm.gov or phone at 202-606-9531 should you or staff have any questions with this response.

Sincerely,

Veronica E. Hinton
Associate Director
Workforce Policy and Innovation

Enclosure

Subject:	HHS Competitive Areas Approval
Date:	Thursday, May 1, 2025 10:50:09 AM
Attachments:	30 APR Competitive Areas HHS.xlsx OPM Competitive Area Grant (Final).docx

Dear Michael and team,

HHS is requesting OPM approval of competitive areas which will be in effect less than 90 days prior to a proposed effective date of a reduction of force, in accordance with 5 CFR 351.402(c). Please find attached a memorandum supporting HHS's request as well as a spreadsheet describing the details of each competitive area. I have also attached a proposed approval of the waiver, in case that is helpful.

PREDECISIONAL

NOTE ON GEOGRAPHIC AREA - *For any geographic area listed as nationwide, the competitive area will be further broken down into each local commuting area, as defined by OPM regulations

Mr. Tom Nagy
Human Capital Officer
Department of Health and Human Services
Hubert H. Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201

Dear Mr. Nagy,

The Office of Personnel Management (OPM) approves the Department of Health and Human Services' (HHS) May 1, 2025, request for OPM approval of competitive areas which will be in effect less than 90 days prior to the proposed effective date of reduction of force (RIF). Your request indicates that competitive areas will be established according to HHS Department ID. Furthermore, a 90-day waiver is necessary due to the impact of the executive order titled, *Implementing The President's "Department of Government Efficiency" Workforce Optimization Initiative* (February 11, 2025).

OPM approves your request in accordance with 5 C.F.R. 351.402(c). This provision requires OPM approval when a competitive area will be in effect less than 90 days prior to the effective date of a RIF. Divisions based on Department ID meet the definition of a competitive area. Department IDs appear to be the current organizational structure at HHS, and as described define organizational units that are under separate administration. *See* 5 C.F.R. 351.402(b).

Please contact Katika Floyd by email at katika.floyd@opm.gov or phone at 202-606-9531 should you or staff have any questions with this response.

Sincerely,

Veronica E. Hinton
Associate Director
Workforce Policy and Innovation

Subject: HHS Competitive Areas Approval

Dear Michael and team,

HHS is requesting OPM approval of competitive areas which will be in effect less than 90 days prior to a proposed effective date of a reduction of force, in accordance with 5 CFR 351.402(c). Please find attached a memorandum supporting HHS's request as well as a spreadsheet describing the details of each competitive area. I have also attached a proposed approval of the waiver, in case that is helpful.

PREDECISIONAL

V/r,

Thomas J. Nagy Jr., MLER
Deputy Assistant Secretary for Human Resources/ Chief Human Capital Officer
Department of Health and Human Services
Office of Human Resources
Mobil 202-531-5545

Attorney Client communication (Privileged/Confidential)

UNITED STATES OFFICE OF PERSONNEL MANAGEMENT
Washington, DC 20415

May 2, 2025

Mr. Thomas Nagy
Deputy Assistant Secretary for Human Resources
Chief Human Capital Officer
Department of Health and Human Services
200 Independence Ave., SW
Washington, DC 20201

Dear Mr. Nagy:

The U.S. Office of Personnel Management (OPM) approves the U.S. Department of Health and Human Services (HHS) May 1, 2025, request for approval of a competitive area which will be in effect less than 90 days prior to the proposed effective date of a reduction in force (RIF). Your request indicates that a RIF is necessary in the HHS due to the impact of an Executive Order titled, "Implementing the President's 'Department of Government Efficiency' Workforce Optimization Initiative" (February 11, 2025). Section 3(c) of the EO states:

> (c) Agency Heads shall promptly undertake preparations to initiate large-scale reductions in force (RIFs), consistent with applicable law, and to separate from Federal service temporary employees and reemployed annuitants working in areas that will likely be subject to the RIFs. All offices that perform functions not mandated by statute or other law shall be prioritized in the RIFs, including all agency diversity, equity, and inclusion initiatives; all agency initiatives, components, or operations that my Administration suspends or closes; and all components and employees performing functions not mandated by statute or other law who are not typically designated as essential during a lapse in appropriations as provided in the Agency Contingency Plans on the Office of Management and Budget website. This subsection shall not apply to functions related to public safety, immigration enforcement, or law enforcement.

OPM approves your request in accordance with 5 CFR 351.402(c). This provision requires OPM approval when a competitive area will be in effect less than 90 days prior to the effective date of a RIF. The competitive areas proposed in your request were not previously established. They comprise the groups identified in your enclosed request including their various divisions, offices, and units. HHS must confirm and document that any competitive area established meets the definition for separate administration:

- The organizational unit or subdivision is separately organized;

- It is clearly distinguished from other units with regard to operation, work function, staff, and personnel management; and
- It has the authority to take or direct personnel actions (e.g., establish or abolish positions).

Also, please note, a RIF cannot be effectuated until 60 days from the date an employee receives their notice. HHS should also review all applicable collective bargaining agreements for any additional requirements necessary to effectuate a RIF.

Please contact Katika Floyd by email at katika.floyd@opm.gov or phone at 202-606-9531 should you or staff have any questions with this response.

Sincerely,

Kimberly A. Holden
Principal Deputy Associate Director
Workforce Policy and Innovation

DEPARTMENT OF HEALTH & HUMAN SERVICES
Office of the Secretary
Washington, D.C. 20201

March 31, 2025

Subject: Notice of Intent to Conduct a Reduction in Force (RIF)

Dear {{ FIRST_NAME }} {{ LAST_NAME }},

This notice is to inform you that HHS will be conducting a Reduction in Force (RIF) in accordance with the Office of Personnel Management (OPM) Workforce Reshaping Handbook and Title 5 of the Code of Federal Regulations (CFR) governing RIF procedures.

Reason for RIF:

The decision to conduct a RIF has been made in accordance with the Executive Orders signed by President Donald Trump—including the Department of Government Efficiency Workforce Optimization Initiative dated February 11, 2025 —and the Department of Health and Human Services' (HHS) broader strategy to improve its efficiency and effectiveness to make America healthier. This action is necessary to align our workforce with the agency's current and future needs and to ensure the efficient and effective operation of our programs.

Effective Date:

The RIF will take effect on June 2, 2025, with formal notices being issued to affected employees at least 60 days prior to the effective date, as required by Title 5 CFR.

Employee Rights and Support:

We understand that this announcement may cause concern and uncertainty. Please be assured that we are committed to supporting all affected employees throughout this process. Below are key points regarding your rights and the support available to you:

1. **Competitive Areas and Levels:**
    - The RIF will be conducted in your competitive area
      {{ DESCR }}

      in accordance with Title 5 CFR 351.402 and 351.403.
2. **Retention Standing:**
    - Employees will be ranked on a retention register based on tenure, veterans' preference, length of service, and performance ratings, as outlined in Title 5 CFR 351.501.
3. **Appeal Rights:**
    - Employees who receive a RIF notice have the right to appeal the decision to the Merit Systems Protection Board (MSPB) under Title 5 CFR 351.901.
4. **Placement Assistance:**

- We will provide career transition assistance, including resume workshops, career counseling, and job search resources. Additionally, we will coordinate with other Federal agencies to explore placement opportunities.

We recognize the valuable contributions of all our employees and deeply regret the need to take this action. Our priority is to ensure a fair and transparent process while providing the necessary support to those affected.

Thank you for your understanding and cooperation during this challenging time.

Sincerely,

Tom Nagy
HHS Chief Human Capital Officer

DEPARTMENT OF HEALTH & HUMAN SERVICES

Office of the Secretary

Washington, D.C. 20201

March 31, 2025

MEMORANDUM FOR: {{ FIRST_NAME }} {{ LAST_NAME }}

VIA EMAIL: {{ EMAIL_ADDRESS }}

FROM: Tom Nagy, Chief Human Capital Officer Specific Notice of

SUBJECT: Reduction in Force

In accordance with President Donald Trump's Executive Order 14210, dated February 11, 2025, and the Department of Health and Human Services' (HHS) broader reorganization strategy to improve its efficiency and effectiveness to make America healthier, HHS is executing a Reduction in Force (RIF). This memorandum constitutes a specific notice of a RIF.

I regret to inform you that you are being affected by a RIF action. This RIF is necessary to reshape the workforce of HHS.

This is your specific notice of the RIF. In accordance with the RIF procedures specified in Chapter 35 of Title 5 of the United States Code and Title 5 of the Code of Federal Regulations, Part 351, and HHS policy, you are being released from your competitive level based on your retention standing. Consequently, you will be separated from the Federal service effective **{{ TERMINATION_DATE }}.** In the event you are qualified and have assignment rights to a position that becomes available during the notice period, you will be informed via a specific, subsequent notice. Should the circumstances of the RIF otherwise change, this notice may be withdrawn.

Retention Standing

To conduct the RIF, retention registers were prepared which list employees in retention standing order by civil service tenure group and subgroup, veterans' preference, performance ratings, and length of Federal service. The following information was used to determine your retention standing as of the RIF effective date:

Competitive Area: {{ DESCR }}

Competitive Level: {{ GVT_COMP_LVL_PERM }}

Tenure Group & Subgroup: {{ GVT_TENURE }}

Veterans' Preference: {{ GVT_VET_PREF_RIF }}

Most Recent Performance Ratings: {{ ALL_REVIEWS }}

Additional Years of Credit Based on Performance Ratings: {{ ADD_YEARS }}

Reduction In Force Service Computation Date (SCD): {{ SERVICE_DT }}

Adjusted RIF Service Computation Date (SCD): {{ ADJ_SERVICE_DT }}

The adjusted RIF SCD includes all creditable military and civilian service and is adjusted with additional credit (up to a maximum of 20 years) for the performance ratings.

NOTE: All employees in your competitive area will be separated.

You have been reached for release from your competitive level in accordance with RIF regulations and procedures. You have no assignment rights to positions within your competitive area. Therefore, you will be separated from HHS at the close of business on {{ TERMINATION_DATE }}.

Based on a preliminary evaluation, you {{ SEVERENCE_ELIGIBLE }} eligible for severance pay pursuant to 5 U.S.C. § 5595.

If you are a competitive service employee, or a covered excepted service employee under HHS Instruction 330-2, you are eligible to have your name placed on the Reemployment Priority List and to participate in the Interagency Career Transition Assistance Plan (ICTAP). You are also eligible to participate in the HHS Career Transition Assistance Program. However, if you resign or retire before your separation under reduction in force, you will no longer be eligible for special selection priority under this program and you may lose eligibility for special selection priority through the Reemployment Priority List (RPL) and the ICTAP. Information and registration procedures for the RPL are included in the attachments to this notice.

Please contact your supervisor or email OHR-General-Inquiries@hhs.gov immediately if you believe any of the above information is incorrect.

RIF Package

Each employee impacted by the RIF has been sent documents that outline applicable benefits for which you may be eligible or entitled as appropriate. You may make an appointment with the Office of Human Resources (OHR) to obtain paper copies of the documents. You may make an appointment by contacting OHR-General-Inquiries@hhs.gov. In addition, the websites to certain relevant external benefits provided by other entities are found immediately below.

For training benefits under the Workforce Improvement Act of 1998, please see www.careeronestop.org.

For unemployment compensation benefits, please refer to the Department of Labor website at www.dol.gov.

For general information on transition assistance, please refer to the Office of Personnel Management website at www.opm.gov.

Appeal and Grievance Rights

U.S. Merit Systems Protection Board (MSPB)
If you believe your retention rights have not been applied correctly or have been violated, you may appeal this action to the MSPB. You may file your appeal with the MSPB's regional or field office serving the area where your duty station was located. The address of your regional or field office has been included in your RIF package.

For a complete listing of MSPB regional and field offices, see Appendix II of Part 1201 of the Board's regulations. Your appeal must be in writing and may be filed any time after receipt of this notice until no later than 30 calendar days after the effective date. Failure to file an appeal within the time limit may result in dismissal of the appeal as untimely filed. More information on filing appeals is included in your RIF package. You may also access the MSPB website at www.mspb.gov for additional and further detailed information on the appeal process.

Equal Employment Opportunity (EEO)
If you believe this personnel action is based in whole or in part on discrimination based on your race, color, religion, sex, national origin, age or disability, or in retaliation for prior protected activity you may file an EEO complaint with your designated HHS EEO representative:

{{ EEO_NAME }}

{{ EEO_EMAIL }}

{{ EEO_PHONE }}

You must contact your EEO representative no later than 45 calendar days of the effective date of your separation from Federal service. Alternatively, you may file an appeal with the MSPB as noted above and raise discrimination as an affirmative defense. However, you may not proceed through both forums; you must elect one or the other. You may access the U.S. Equal Employment Opportunity Commission (EEOC) website at www.eeoc.gov for additional and further detailed information on the Federal sector EEO process.

Office of Special Counsel
You may also seek corrective action before the U.S. Office of Special Counsel (OSC). Visit the OSC e-filing system web site at www.osc.gov, to access the online application. However, if you do so, you will be limited to whether the agency took one or more covered personnel actions against you in retaliation for making protected whistleblowing disclosures. If you choose to file

an action with OSC, you will be foregoing your right to file an MSPB appeal regarding this personnel action.

Conclusion

This action is being taken in accordance with the applicable civil service RIF regulations. Included in your RIF package is a copy of the Office of Personnel Management (OPM) RIF regulations, 5 C.F.R., Part 351. Further detailed information about the RIF regulations may also be accessed on the OPM website. You may make an appointment to review and obtain a copy of the RIF regulations and/or records pertaining to you by contacting OHR-General-Inquiries@hhs.gov.

The Employee Assistance Program (EAP) is available free to you and in most cases your immediate family. EAP counselors are available 24 hours a day, 365 days per year at 1-800-222-0364 or www.FOH4YOU.com.

If you are eligible for severance pay following your separation, the attached worksheet will allow you to calculate an estimate. Regardless, the following additional information is also available in your RIF package:

- Information on unemployment compensation under applicable State or District of Columbia programs.
- Training benefits under the Workforce Investment Act of 1998 (WIA).
- Request for authorization to release employment information to prospective employers.

Because you are being separated through a RIF action, you are eligible for career transition and placement assistance. Specifically, you are eligible for the HHS Reemployment Priority List (RPL), Career Transition Assistance Program (CTAP), and Interagency Career Transition Assistance Program (ICTAP). Your RIF package includes further information on these programs.

If you elect to resign before the effective date of the RIF, your separation will be considered involuntary for severance pay purposes and you will still be eligible to receive your severance pay. Please be advised that an early resignation may affect your eligibility for placement assistance and your appeal rights. It may also impact your ability to qualify for unemployment compensation and training benefits provided under WIA. You are encouraged to contact your State's Department of Labor and Employment for any questions regarding unemployment compensation. You are also encouraged to contact OHR-General-Inquiries@hhs.gov to determine how an early resignation may affect your benefits.

This RIF action does not reflect directly on your service, performance, or conduct. It is being taken solely for the reasons stated above, and because your duties have been identified as either unnecessary or virtually identical to duties being performed elsewhere in the agency. Leadership at HHS are appreciative of your service.

Please return a signed copy of the Acknowledgement of Receipt and Authorization for Release of Employment Information by email to OHR-General-Inquiries@hhs.gov within 14 days of receipt of this notice.

Office of Personnel Management,

HHS is requesting OPM approval of competitive areas which will be in effect less than 90 days prior to a proposed effective date of a reduction of force, in accordance with 5 CFR 351.402(c). Please find attached a memorandum supporting HHS's request as well as a spreadsheet (labeled HHS 31 MAR) describing the details of each competitive area. I have also attached three spreadsheets with additional competitive areas OPM approved last week (HHS 25 and HHS 25) and preliminary approved over the weekend (29 MAR). We are seeking final approval on both the 29 MAR and 31 MAR spreadsheets. Finally, I have attached a proposed approval of the waiver, in case that is helpful.

Thank you.

V/r,

Thomas J. Nagy Jr., MLER

Deputy Assistant Secretary for Human Resources/ Chief Human Capital Officer

Department of Health and Human Services

Office of Human Resources

Mobil 202-531-5545

NOTE ON GEOGRAPHIC AREA - *For any geographic area listed as nationwide, the competitive area will be further broken down into each local commuting area, as defined by OPM regulations.

The U.S. Department of Health & Human Services
Hubert H. Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201

March 31, 2025

To: **Michael J. Mahoney, Office of Personnel Management**

From: **Tom Nagy, Human Capital Officer**

Subject: **Establishment of Competitive Areas**

This memorandum serves as the Department of Health & Human Services' (HHS) request to establish competitive areas and for an exception to the competitive area 90-day rule. Please find HHS's responses below with regards to our competitive areas.

1. Identification of the proposed competitive area, including the organizational segment, geographic location, and limits of the local commuting area.

Answer: Details of each proposed competitive area including the organizational segment and geographic location are included in the attached spreadsheet. Aligning with page 31 of OPM's Workforce Reshaping Operations Handbook, HHS defines local commuting areas as "any population center (or two or more neighboring centers) and the surrounding localities in which people live and can reasonably be expected to travel back and forth every day to their usual employment."

2. A description of how the proposed area differs from the one previously established for the same unit and geographic area.

Answer: To my knowledge, no competitive areas have been established by HHS for the units described in the attached spreadsheet. We have not found any documentation of previously defined or currently enacted competitive areas across HHS. The HHS Human Resources database (called Enterprise Human Capital Management or EHCM) contains a competitive area field; however, this field is blank for all employees.

3. An organizational chart of the agency showing the relationship between the organizational components within the competitive area and other components in the commuting area.

Answer: Organizational structure details for each competitive area are included in the attached spreadsheet. Three additional spreadsheets with the competitive areas previously approved by OPM are also attached for your reference.

4. The number of competing employees in the proposed competitive area.

Answer: The number of competing employees in each proposed competitive area is included in the attached spreadsheet.

5. A description of the operation, work function, staff, and personnel administration of the proposed area and, where appropriate, a description of how the area is distinguished from others in these respects.

Answer:

Overview. The Department of Health and Human Services (HHS) has a critical mission to enhance the health and well-being of all Americans, by providing for effective health and human services and by fostering sound, sustained advances in the sciences underlying medicine, public health, and social services. Currently, HHS is not well structured to achieve this goal. HHS has too many divisions, offices, functions, programs, and research organizations, which are extremely difficult for leaders and stakeholders to navigate. This problem grew worse during the COVID pandemic; our budget ballooned by 38% and our staff grew by 17% over the past five years. Our Agency Restructuring and RIF Plan (ARRP) is aimed at solving these problems.

Plan. Accordingly, our proposal establishes new competitive areas based on "Department ID." Department ID is the core administrative organization field for all HHS HR data in our HR database. Department ID is the separate administrative unit used for managing all HR across HHS; positions are currently added and subtracted at the level of these Department ID administrative units.

Since our restructuring planning process began, HHS has not created any new Department IDs. To my knowledge, HHS has not moved any individuals between Department IDs since the restructuring planning began. And all functions of a Department ID are unique to the specific Department ID. Therefore, it makes sense to define every competitive area in terms of a single Department ID.

Legal basis. Department ID meets the definition of a competitive area. A competitive area is defined in terms of an agency's organizational units and geographical location. 5 C.F.R. § 351.402(b). "A competitive area may consist of all or part of an agency." *Id.* And "[t]he minimum competitive area is a subdivision of the agency under *separate administration* within

the local commuting area." *Id.* (emphasis added). Department IDs define organizational units within HHS that are under separate administration.

OPM defines "separate administration" to mean the unit has (1) "the administrative authority to take or direct personnel actions"; (2) "the organizational unit is separately organized and clearly distinguished from other organizational units within the same local commuting area in regard to operation, work function, staff, and personnel management." OPM's Workforce Reshaping Operations Handbook at 30. OPM recognizes "that individual organizational components may be under separate administration even though many agencies reserve final approval of certain personnel actions to a higher level in the agency." *Id.* Moreover, "separate administration" is often noted in an agency's organizational manual or in its delegations of authority. *Id.*

Department ID defines units that are clearly distinguished in regard to operation, work function, and staff. They are separate administrative authorities. Employees are added or subtracted at the Department ID level. Usually, a Department ID will have its own decisionmaker. Other times, consistent with the OPM guidance referenced above, final approval of certain decisions is required above the Department ID level. But, overall, functions are organized by Department ID and hiring happens within these units.

6. A discussion of the circumstances that led to the proposed changes less than 90 days before a proposed reduction.

Answer: HHS is responding to the executive order *Implementing The President's "Department of Government Efficiency" Workforce Optimization Initiative*, dated February 11, 2025.

Mr. Tom Nagy
Human Capital Officer
Department of Health and Human Services
Hubert H. Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201

Dear Mr. Nagy,

The Office of Personnel Management (OPM) approves the Department of Health and Human Services' (HHS) March 29, 2025 and March 31, 2025, request for OPM approval of competitive areas which will be in effect less than 90 days prior to the proposed effective date of reduction of force (RIF). Your request indicates that competitive areas will be established according to HHS Department ID. Furthermore, a 90-day waiver is necessary due to the impact of the executive order titled, *Implementing The President's "Department of Government Efficiency" Workforce Optimization Initiative* (February 11, 2025).

OPM approves your request in accordance with 5 C.F.R. 351.402(c). This provision requires OPM approval when a competitive area will be in effect less than 90 days prior to the effective date of a RIF. Divisions based on Department ID meet the definition of a competitive area. Department IDs appear to be the current organizational structure at HHS, and as described define organizational units that are under separate administration. *See* 5 C.F.R. 351.402(b).

Please contact Katika Floyd by email at katika.floyd@opm.gov or phone at 202-606-9531 should you or staff have any questions with this response.

Sincerely,

Veronica E. Hinton
Associate Director
Workforce Policy and Innovation

NOTE ON GEOGRAPHIC AREA - *For any geographic area listed as nationwide, the competitive area will be further broken down into each local commuting area, as defined by OPM regulations. For geographic areas that have multiple locations (e.g., Boston, Chicago, New York), each local commuting area, as defined by OPM regulations, will be a unique competitive area.
