

**IN THE UNITED STATES DISTRICT COURT
FOR THE DISTRICT OF MARYLAND**

SOCIETY OF GENERAL INTERNAL
MEDICINE, ET AL.,

Plaintiffs,

v.

ROBERT F. KENNEDY, JR., ET AL.,

Defendants.

Case No.: 8:25-cv-02751-BAH

**DEFENDANTS' MOTION TO DISMISS
OR, IN THE ALTERNATIVE, FOR SUMMARY JUDGMENT**

Defendants, by and through undersigned counsel, hereby move to dismiss this case for lack of subject matter jurisdiction pursuant to Federal Rule of Civil Procedure 12(b)(1) and for failure to state a claim pursuant to Federal Rule of Civil Procedure 12(b)(6). In the alternative, Defendants move for summary judgment pursuant to Federal Rule of Civil Procedure 56. Defendants' arguments in support of this motion are fully set forth in the attached Memorandum of Law.

Dated: October 7, 2026

Respectfully submitted,

Kelly O. Hayes
United States Attorney

Counsel for Defendants

**IN THE UNITED STATES DISTRICT COURT
FOR THE DISTRICT OF MARYLAND**

SOCIETY OF GENERAL INTERNAL
MEDICINE, ET AL.,

Plaintiffs,

v.

ROBERT F. KENNEDY, JR., ET AL.,

Defendants.

Case No.: 8:25-cv-02751-BAH

**MEMORANDUM OF LAW IN SUPPORT OF
DEFENDANTS' MOTION TO DISMISS
OR, IN THE ALTERNATIVE, FOR SUMMARY JUDGMENT**

TABLE OF CONTENTS

INTRODUCTION	1
BACKGROUND	2
A. The Statutory and Regulatory Framework Governing AHRQ.....	2
B. Factual Background.....	5
C. Procedural History.....	7
LEGAL STANDARDS	8
A. Motion to Dismiss for Lack of Subject Matter Jurisdiction Under Rule 12(b)(1) and for Failure to State a Claim Under Rule 12(b)(6).....	8
B. Motion for Summary Judgment Under Rules 56 and 12(d).....	10
ARGUMENT	9
I. Plaintiffs’ Claims Lack Any Factual or Legal Basis.....	11
II. Plaintiffs Lack Standing to Challenge AHRQ’s Refusal to Consider New Grant Applications and Award New Grants.....	12
III. This Court Lacks Jurisdiction Over Plaintiffs’ APA Claims	15
A. The Actions Plaintiffs Challenge Are Committed to Agency Discretion by Law.....	15
B. Plaintiffs Do Not Seek Judicial Review of a Discrete and Final Agency Action	17
C. The Tucker Act Precludes District Court Jurisdiction Over Plaintiffs’ Claims to the Extent They Challenge and Seek to Vacate AHRQ’s Decisions Not to Award Certain Continuation Grants	21
D. Plaintiffs Impermissibly Seek to Compel Agency Action That AHRQ Is Not Legally Required to Take	23
IV. Defendants Have Not Violated the PHS Act or AHRQ’s Regulations, and Therefore Count I Should Be Dismissed.....	25

V. Defendants Have Not Violated the Appropriations Acts,
and Therefore Counts II and III Should Be Dismissed 30

VI. Plaintiffs Cannot Rely Upon the ICA to Support an APA Contrary-to-Law Claim,
and Therefore Count IV Should Be Dismissed 31

 A. The ICA precludes judicial review under the APA 32

 B. Plaintiffs are not within the zone of interests that the ICA is meant to protect 35

VII. The Scope of Relief Sought in the Amended Complaint Is Impermissibly
Broad Because It Extends to Non-Parties with No Connection to Plaintiffs 36

CONCLUSION..... 37

Defendants, by undersigned counsel, hereby submit this Memorandum of Law in Support of Their Motion to Dismiss or, in the Alternative, for Summary Judgment (the “Motion”).

INTRODUCTION¹

Defendant Agency for Healthcare Research and Quality (AHRQ), a component agency of the Department of Health and Human Services (HHS), is generally tasked with improving the quality and safety of healthcare delivery in the United States. Congress appropriated \$369 million to AHRQ for fiscal year 2025 and \$345.38 million for fiscal year 2026. The appropriations were a lump-sum that could be used for any purpose in furtherance of AHRQ’s mission. Among other activities, AHRQ supports health services research through grant funding. Plaintiffs are organizations whose members (or in the case of one Plaintiff, itself) had grant applications pending with AHRQ and hoped to receive a portion of the lump-sum funds appropriated to AHRQ.

Plaintiff’s Amended and Supplemental Complaint for Declaratory and Injunctive Relief, ECF No. 46 (the “Amended Complaint” or “Am. Compl.”), asserts six claims under the Administrative Procedure Act, 5 U.S.C. § 551 *et seq.* (the “APA”), each premised on allegations that AHRQ unlawfully shut down its grant program in the summer of 2025. In support of this overarching contention, Plaintiffs point out that (1) AHRQ has not peer reviewed new grant applications or awarded new grants since that time, and (2) although AHRQ has awarded millions of dollars in continuation grants, AHRQ determined not to continue funding certain grants and issued notices to that effect in July 2026.

The notion that AHRQ has shut down its grant program is belied by publicly available data—acknowledged by Plaintiffs—showing that AHRQ has issued millions of dollars in continuation grants using its 2025 and 2026 appropriations since this lawsuit was filed. Moreover,

¹ Capitalized terms used but not defined in this Introduction shall have the meaning ascribed to them in the Background section of this brief.

nothing requires AHRQ to award new grants in any given fiscal year, to evaluate all applications for new grants, to award continuation grants, or to spend any specific amount of its lump-sum appropriations on grants of any type. The opposite is true. *See* 42 C.F.R. § 67.17(a), (e). Accordingly, there is simply no factual or legal basis for Plaintiffs' claims, and they should be dismissed for failure to state a claim.

In addition, threshold issues of standing and jurisdiction bar Plaintiffs' claims. Plaintiffs do not establish standing to bring their claims insofar as they challenge AHRQ's refusal to consider new grant applications and award new grants, because (among other reasons) they do not allege a cognizable injury in fact. This Court also lacks jurisdiction over Plaintiffs' APA claims because they challenge agency actions committed to agency discretion by law; fail to identify a discrete and final agency action subject to APA review; are precluded by the Tucker Act; and seek to compel agency action that AHRQ is not legally required to take.

Furthermore, Defendants have not violated any statute or regulation that could support Plaintiffs' contrary-to-law claims in Counts I, II, and III. Regarding Count IV, Plaintiffs cannot use alleged violations of the Impoundment Control Act, 2 U.S.C. § 681 *et seq.* (the "ICA"), to support their APA contrary-to-law claims, because the ICA precludes judicial review, and Plaintiffs are not within the zone of interests that the ICA was intended to protect.

For these reasons and those discussed below, Defendants respectfully request that the Motion be granted and the Amended Complaint be dismissed. In the alternative, summary judgment should be granted in Defendants' favor.

BACKGROUND

A. The Statutory and Regulatory Framework Governing AHRQ

AHRQ was established in 1999 pursuant to title IX of the Public Health Service Act, 42

U.S.C. § 299 *et seq.* (the “PHS Act”). AHRQ’s mission is “to enhance the quality, appropriateness, and effectiveness of health services, and access to such services, through the establishment of a broad base of scientific research and through the promotion of improvements in clinical and health system practices, including the prevention of diseases and other health conditions.” *Id.* § 299(b). The PHS Act broadly authorizes—and with respect to certain very specific areas of health services research, directs—AHRQ’s Director to provide grants in furtherance of these goals. *E.g.*, 42 U.S.C. § 299a(b)(1) (“The Director may provide training grants in the field of health services research”); *id.* § 299b-34(a) (“The Director . . . shall award—(1) technical assistance grants or contracts to eligible entities to provide technical support to institutions that deliver health care . . .”).

AHRQ’s grantmaking is governed by a set of regulations found at 42 C.F.R. § 67.10 *et seq.* AHRQ’s regulations confer nearly unlimited discretion upon the Administrator of AHRQ in determining whether to award any grant, providing:

Within the limits of available funds, the Administrator *may* award grants to those applicants whose projects are being considered for funding, which ***in the judgment of the Administrator***, will promote best the purposes of Title IX of the PHS Act . . . , AHCPR priorities, and the regulations of this subpart.

42 C.F.R. § 67.17(a) (emphasis added). In the context of awarding continuation grants (*i.e.*, funding that continues an already-approved project into a subsequent budget period, as opposed to funding a brand-new award), AHRQ’s regulations further provide that “[i]n all cases, continuation awards require a determination by the Administrator that continuation is in the best interest of the Federal Government.” *Id.* § 67.17(d). In addition, “[n]either the approval of any application nor the award of any grant commits or obligates the Federal Government in any way to make any additional, supplemental, continuation, or other award with respect to any approved application.” *Id.* § 67.17(e). There are no statutory or regulatory requirements regarding the timing for awarding grants, nor how much money AHRQ must put towards grant funding.

Regarding the application process, AHRQ's regulations provide that "[t]o apply for a grant, an entity or individual must submit an application in the form and at the time that the Administrator requires." *Id.* § 67.14(a). AHRQ invites applications for proposed projects through the public issuance of Notices of Funding Opportunities (NOFOs). AHRQ issues NOFOs primarily via Program Announcements and Requests for Applications, depending on the specificity and priority of the research area. Program Announcements identify broad areas of interest, encourage research pipelines that the agency wants to keep open year over year, and typically do not specify a number of grants to be awarded or have set aside funding. Requests for Applications are time-limited, narrowly defined opportunities that typically indicate the estimated amount of funds set aside for the competition and number of awards. *See generally* <https://www.ahrq.gov/funding/fund-ops/index.html>.² These announcements are made on Grants.gov and AHRQ's website and describe the purpose, scope, eligibility requirements, and submission procedures for each funding opportunity. NOFOs are issued at the discretion of the agency and may be modified or cancelled prior to award if agency priorities, funding availability, or other considerations change.³

AHRQ's regulations provide that in awarding grants, AHRQ must follow certain processes, including independent peer review. 42 C.F.R. § 67.15(a). After peer review, applications that are "recommended for further consideration" are evaluated by the Administrator, who exercises considerable discretion in assessing various specified factors and then "shall: give consideration for funding, defer for a later decision, pending receipt of additional information, or give no further

² *See also* <https://grants.nih.gov/grants/glossary.htm> (glossary of grant-related terms defining "Program Announcement" and "Request for Application"). (This glossary is often linked in AHRQ's NOFOs.)

³ A review of AHRQ's online grant archive (*see* <https://archive.ahrq.gov/fund/granarch.htm#PA>) reflects that a number of NOFOs have been cancelled in past years. *E.g.*, Notice of Cancellation of AHRQ RFA-HS-13-009 dated Apr. 30, 2013, which states "This Notice is to inform the scientific community of the cancellation of the [NOFO]. Applications submitted will not be reviewed," available at <https://grants.nih.gov/grants/guide/notice-files/NOT-HS-13-007.html>. *See also* Notice of Cancellation of PA17-260 and PA 17-261 dated Dec. 17, 2018, available at <https://grants.nih.gov/grants/guide/notice-files/NOT-HS-19-004.html>; Notice of Cancellation of PA 15-179 and PA 16-420 dated Dec. 18, 2018, available at <https://grants.nih.gov/grants/guide/notice-files/NOT-HS-19-005.html>.

consideration for funding, to any application for a grant under this subpart.” *Id.* § 67.16.

In the Further Consolidated Appropriations Act of 2024, Pub. L. No. 118-47 (the “2024 Appropriations Act”), Congress appropriated a lump-sum of \$369,000,000 to AHRQ “[f]or carrying out titles III and IX of the PHS Act, part A of title XI of the Social Security Act, and section 1013 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003.” 138 Stat. 460, 661-62. In the Full-Year Continuing Appropriations and Extensions Act of 2025, Pub. L. No. 119-4 (the “2025 Continuing Resolution”), Congress continued funding AHRQ at the same level for fiscal year 2025. 139 Stat. 9, 10-11, § 1101(a)(8). In the Consolidated Appropriations Act, 2026, Pub. L. No. 119-75 (the “2026 Appropriations Act,” and together with the 2024 Appropriations Act and the 2025 Continuing Resolution, the “Appropriations Acts”), Congress appropriated a lump-sum of \$345,380,000 to AHRQ for the same broad purposes as the 2024 Appropriations Act and the 2025 Continuing Resolution. 140 Stat. 173, 272.

Congress never authorized or appropriated money expressly for AHRQ’s grant program. The Appropriations Acts make no mention of grants at all. Rather, AHRQ funds grants out of its annual lump-sum appropriations provided under the Appropriations Acts.

B. Factual Background

Like many federal agencies, AHRQ has been in a period of transition. In March 2025, HHS announced a restructuring of its 28 divisions, including AHRQ, with the stated goals of saving taxpayer dollars, streamlining functions, and consolidating redundant units. *See* <https://www.hhs.gov/press-room/hhs-restructuring-doge.html>. On July 14, 2025, many AHRQ employees were let go via a reduction-in-force (the “RIF”). The legality of the RIF is not at issue.⁴

⁴ Nor could it be, as Plaintiffs do not have standing to challenge the RIF. *See State of Maryland v. U.S. Dep’t of Agric.*, 151 F.4th 197 (4th Cir. 2025) (holding that plaintiff states lacked standing to challenge the widespread termination of federal probationary employees, including at HHS).

The Amended Complaint alleges that AHRQ impermissibly shut down its grant program in the summer of 2025. *E.g.*, Am. Compl. ¶¶ 5-9. Yet, Plaintiffs *acknowledge* that, since that time, AHRQ has awarded millions of dollars in continuation grants using its 2025 and 2026 appropriations. *See* Am. Compl. ¶¶ 39 (“AHRQ spent only \$94 million on research grants in fiscal year 2025”); 42 (“AHRQ has spent only \$17 million on grants in the first eleven months of the fiscal year” 2026). According to the Tracking Accountability in Government Grants System (“TAGGS”) database, a publicly available source of HHS grants on which Plaintiffs themselves rely, AHRQ spent \$94,121,718 of its fiscal year 2025 appropriations on grants, including \$39,294,716 since this lawsuit was filed (in connection with 75 grants). *See* **Exhibit A** (discussed *infra* at 9-10). TAGGS further shows that AHRQ spent \$42,871,717 of its fiscal year 2026 appropriations in connection with 93 grants. *See* **Exhibit B** (discussed *infra* at 9-10). On or about July 15, 2026, AHRQ also issued notices to many grantees denying their applications for continued grant funding. Am. Compl. ¶ 43. Among other things, the notices informed the applicants that AHRQ had determined that continuation was not “in the best interest of the Federal Government” pursuant to 42 C.F.R. § 67.17. *Id.* ¶¶ 46-47.

Throughout this period of transition, AHRQ has been busy planning new projects and determining how it will spend its lump-sum appropriations. By September 30, 2026 (the last day of the fiscal year for the federal government), AHRQ had obligated substantially all of its apportioned budget authority for fiscal year 2026. *See* Declaration of Roger D. Klein (“**Klein Decl.**”) ¶ 3, attached hereto as **Exhibit C**.⁵ New projects funded by AHRQ’s fiscal year 2026 appropriations include a \$32.5 million joint initiative with the National Institutes of Health known

⁵ AHRQ’s 2026 apportioned budget authority does not include the \$27.7 million that was subject to the Proposed Rescission of Budget Authority dated September 25, 2026. Klein Decl. ¶ 3 n.1. *See* https://www.whitehouse.gov/wp-content/uploads/2026/09/September-Rescissions-Package-for-Speaker-Johnson_signed-9.25.26.pdf.

as Developing Evidence for Programs to Ensure Nutrition for Development or “DEPEND,” which aims to replace highly processed foods with nutrient-dense, real food at schools across the country; an \$11.8 million competition (the AHRQ Healthcare Choice and Competition Challenge to Improve Quality, Lower Prices, and Expand Access), which seeks to identify and study policy changes aimed at reducing ineffective regulation and increasing competition and patient choice, thereby lowering healthcare costs and improving outcomes; a \$7.95 million competition (the AHRQ Super Intelligence for Healthcare Improvement Initiative), which seeks research to build advanced AI systems that can make healthcare research faster, more continuously updated, and more usable in real-world care; and a \$7.5 million joint initiative with the Indian Health Service to help standardize care within tribal facilities, beginning with a program seeking to improve the management of sepsis in emergency care facilities in American Indian and Alaska Native communities. *See* Klein Decl. ¶ 4.⁶ Other projects are underway.

C. Procedural History

On August 21, 2025, Plaintiffs filed the original complaint, ECF No. 1. On September 3, 2026, the operative Amended Complaint was docketed. In it, Plaintiffs bring six claims under the APA. In Counts I-IV, Plaintiffs claim that the cessation of AHRQ’s grant program, failure to process new grant applications, and decisions not to award certain continuation grants violates the PHS Act and AHRQ regulations (Count I), the 2025 Continuing Resolution (Count II), the 2026 Appropriations Act (Count III), and the ICA (Count IV), and are thus contrary to law under Section 706(2)(A) of the APA. Am. Compl. ¶¶ 61-77. In Count V, Plaintiffs claim that the cessation of AHRQ’s grant program and AHRQ’s decisions not to award certain continuation grants are

⁶ Press releases for these programs are available here: <https://www.hhs.gov/press-room/hhs-depend-initiative-healthier-school-meals-real-food.html>; <https://www.ahrq.gov/news/newsroom/press-releases/healthcare-choice-challenge.html>; <https://www.ahrq.gov/si/sihealthcareimprovement.html>. (A press release regarding the joint initiative with the Indian Health Service is expected soon.)

arbitrary and capricious under Section 706(2)(A) of the APA. *Id.* ¶¶ 78-81. In Count VI, Plaintiffs claim that the failure to process new grant applications is agency action unlawfully withheld, which should be compelled under Section 706(1) of the APA. *Id.* ¶¶ 82-85. Plaintiffs ask this Court to enter an order “[d]eclar[ing] that Defendants’ action halting AHRQ grantmaking functions, including by refusing to consider new grant applications and denying continuing grant applications *en masse*, is contrary to law and/or arbitrary and capricious”; “[d]eclar[ing] unlawful and set[ting] aside . . . Defendants’ action rendering non-functional and halting AHRQ’s grantmaking program”; “[d]eclar[ing] unlawful and set[ting] aside . . . Defendants’ mass denial of continuation awards for existing AHRQ grantees”; “compelling Defendants to undertake statutorily required steps to peer review and evaluate pending new grant applications and to award new grants”; and “[e]njoin[ing] Defendants from taking any steps that hinder AHRQ’s ability to perform its statutorily mandated grantmaking tasks.” *Id.* at 28 (Prayer for Relief).

LEGAL STANDARDS

A. **Motion to Dismiss for Lack of Subject Matter Jurisdiction Under Rule 12(b)(1) and for Failure to State a Claim Under 12(b)(6).**

Rule 12(b)(1). A defendant can move for dismissal of a plaintiff’s case under Rule 12(b)(1) for lack of subject matter jurisdiction by asserting the plaintiff does not have any “right to be in the district court at all.” *Holloway v. Pagan River Dockside Seafood, Inc.*, 669 F.3d 448, 452 (4th Cir. 2012). Federal district courts are courts of limited jurisdiction, constrained to exercise only the authority conferred by Article III of the United States Constitution and affirmatively granted by federal statute. *Kokkonen v. Guardian Life Ins. Co.*, 511 U.S. 375, 377 (1994). The plaintiff bears the burden of establishing the court’s power to hear the case. *In re Moore*, 488 F. Supp. 3d 231, 235 (D. Md. 2020). In ruling on a Rule 12(b)(1) motion, the Court “may consider evidence outside of the pleadings without converting the motion to one for summary judgment.” *Id.* at 236.

Rule 12(b)(6). To defeat a Rule 12(b)(6) motion, a complaint must allege sufficient facts to state a plausible claim for relief. *Ashcroft v. Iqbal*, 556 U.S. 662, 678 (2009). A claim is plausible when “the plaintiff pleads factual content that allows the Court to draw the reasonable inference that the defendant is liable for the misconduct alleged.” *Id.* Legal conclusions or conclusory statements do not suffice and are not entitled to the assumption of truth. *Nemet Chevrolet, Ltd. v. Consumeraffairs.com, Inc.*, 591 F.3d 250, 255 (4th Cir. 2009). The factual allegations that are taken as true “must be enough to raise a right to relief above the speculative level.” *Bell Atl. Corp. v. Twombly*, 550 U.S. 544, 555 (2007).

In deciding a Rule 12(b)(6) motion, “the court may take judicial notice of publicly available information on state and federal government websites without converting the motion to one for summary judgment.” *Est. of Green v. City of Annapolis*, Case No. 24-cv-1351-MJM, 2025 WL 1029555, at *4 (D. Md. Apr. 7, 2025) (quoting *Est. of Green v. City of Annapolis*, 696 F. Supp. 3d 130, 147 (D. Md. 2023)). *See also United States v. Garcia*, 855 F.3d 615, 621 (4th Cir. 2017) (“This court and numerous others routinely take judicial notice of information contained on state and federal government websites.”).

Attached hereto as Exhibits A and B are lists of AHRQ’s grant actions with respect to fiscal year 2025 funds (Exhibit A) and fiscal year 2026 funds (Exhibit B). These documents were exported from TAGGS, an online database of HHS grants, which Plaintiffs rely upon in their Amended Complaint. *See* Am. Compl. ¶¶ 39 (referring to TAGGS as a “publicly available database of grantmaking by AHRQ and other HHS components”), 42, 54. To generate these Exhibits, undersigned counsel utilized the same method as Plaintiffs in connection with their motion for preliminary injunction (*see* ECF No. 4-1 at 8, n.8)—*i.e.*, by filtering the TAGGS database for awards with “Issue Date FY” of 2025 (/2026), “Funding FY” of 2025 (/2026), and

“Operating Division” of AHRQ; and then exporting the results into a PDF. *See* <https://taggs.hhs.gov/SearchAward>. In deciding this Motion, the Court may take judicial notice of the information contained in Exhibits A and B because it is publicly available information from a federal government website. *See, e.g., Green*, 2025 WL 1029555, at *4; *Garcia*, 855 F.3d at 621.

B. Motion for Summary Judgment Under Rules 56 and 12(d).

“Under [Federal Rule of Civil Procedure] 12(d) a Court may convert a motion to dismiss to one for summary judgment and consider matters outside the pleadings, but the parties must ‘be given a reasonable opportunity to present all the material that is pertinent to the motion.’” *U.S. Equal Emp’t Opportunity Comm’n v. Phase 2 Invs. Inc.*, 310 F. Supp. 3d 550, 560 (D. Md. 2018). Where “the movant expressly captions its motion ‘in the alternative’ as one for summary judgment, and submits matters outside the pleadings for the court’s consideration, the parties are deemed to be on notice that conversion under Rule 12(d) may occur; the court ‘does not have an obligation to notify parties of the obvious.’” *Id.*

Summary judgment is appropriate where “the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact.” Fed. R. Civ. P. 56(a). The mere existence of some alleged factual dispute in the case will not defeat an otherwise properly supported summary judgment motion. *Anderson v. Liberty Lobby, Inc.*, 477 U.S. 242, 247–48 (1986). Summary judgment is warranted if there is no genuine dispute of material fact. Fed. R. Civ. P. 56(e); *Matsushita Elec. Indus. Co. v. Zenith Radio Corp.*, 475 U.S. 574, 587 (1984). An issue of fact is “genuine” if the evidence is such that a reasonable fact finder could find in favor of the non-moving party. *Celotex Corp. v. Catrett*, 477 U.S. 317, 322-23 (1986). A fact is “material” if it has the potential to affect the outcome of the case under the applicable legal standard. *Anderson*, 477 U.S. at 248.

ARGUMENT

I. Plaintiffs’ Claims Lack Any Factual or Legal Basis.

In their Amended Complaint, Plaintiffs continue to press the counterfactual premise that AHRQ shut down (or “ceased” or “halted”) its grant program in the summer of 2025. Each of Plaintiffs’ six APA claims rest on these allegations. *See* Am. Compl. ¶¶ 65 (Count I—“Defendants’ cessation of AHRQ’s grant program . . . is in violation of the [PHS] Act and relevant AHRQ regulations”); 68 (Count II—“Defendants’ cessation of AHRQ’s grant program” violates the 2024 Appropriations Act and 2025 Continuing Resolution); 71 (Count III—“Defendants’ cessation of AHRQ’s grant program” violates the 2026 Appropriations Act); 77 (Count IV—“By making it impossible for AHRQ to spend the funds appropriated to it,” Defendants violated the ICA); 81 (Count V—“By halting AHRQ’s grantmaking program, Defendants have acted arbitrary and capriciously.”); 84 (Count VI—“By halting AHRQ’s grantmaking program,” Defendants have unlawfully withheld or unreasonably delayed agency action).

Yet, Plaintiffs *acknowledge* that AHRQ has awarded numerous continuation grants using millions of dollars of its 2025 and 2026 appropriations. *See* ECF No. 41-3 ¶¶ 39 (“AHRQ spent only \$94 million on research grants in fiscal year 2025”); 42 (“AHRQ has spent only \$17 million on grants in the first eleven months of the fiscal year” 2026). This is confirmed by publicly available information on TAGGS, which shows that AHRQ spent \$94,121,718 on grants in 2025 and \$42,871,717 on grants in 2026—a far cry from the total “cessation of AHRQ’s grant program” decried in the Amended Complaint. *See* Exhibits A, B (discussed *supra* at 9-10).

Moreover, to the extent Plaintiffs’ criticism is directed at *how much* AHRQ decided to spend in 2025 and 2026 on grants (which is concededly less than it spent in the past), *see* Am. Compl. ¶¶ 39, 42, 54, nothing requires AHRQ to spend more of its lump-sum appropriations on

its discretionary grant program. *See infra* at 30-31. Nor is AHRQ required to award new grants (or process new grant applications) in any given fiscal year. *Infra* at 25-29. Similarly, nothing requires AHRQ to award continuation grants. *Infra* at 26-27.

In short, there is simply no factual or legal basis for Plaintiffs’ claims. Plaintiffs fail to “raise a right to relief above the speculative level” and have not articulated “enough facts to state a claim to relief that is plausible on its face.” *Twombly*, 550 U.S. at 570. Accordingly, their claims should be dismissed.

II. Plaintiffs Lack Standing to Challenge AHRQ’s Refusal to Consider New Grant Applications and Award New Grants.⁷

To establish Article III standing, a plaintiff must show “(i) that he suffered an injury in fact that is concrete, particularized, and actual or imminent; (ii) that the injury was likely caused by the defendant; and (iii) that the injury would likely be redressed by judicial relief.” *TransUnion LLC v. Ramirez*, 594 U.S. 413, 423 (2021). A “concrete” injury is one that is “real, and not abstract.” *Id.* at 424 (quoting *Spokeo, Inc. v. Robins*, 578 U.S. 330, 340 (2016)). Concrete injuries may be “tangible”—*i.e.*, involve physical or monetary harm—or “intangible,” in which case they must “have a close relationship to harms traditionally recognized as providing a basis for lawsuits in

⁷ Solely for purposes of this Motion, Defendants assume the truth of Plaintiffs’ allegation that they have members whose grants were not awarded continuation funding. *See* Am. Compl. ¶ 56. At this stage, Defendants do not dispute Plaintiffs’ associational standing for the limited purpose of challenging AHRQ’s decisions not to continue funding grants awarded to their members. Plaintiffs, however, do not allege that any of their members received grants related to the Learning Health System Embedded Scientist Training and Research center program, which Plaintiffs allege are funded through the Patient-Centered Outcomes Research Trust Fund. *See id.* ¶¶ 27, 44, 50. As a result, Plaintiffs have not established associational standing to challenge AHRQ’s decisions not to continue funding such grants, as they have not alleged any injury to one of their members. *Summers v. Earth Island Inst.*, 555 U.S. 488, 498-99 (2009) (organizational standing case law “require[s] plaintiff-organizations to make specific allegations establishing that at least one identified member had suffered or would suffer harm” and to “nam[e] the affected members”).

Nevertheless, Plaintiffs’ claims related to AHRQ’s decisions not to award continuation grants should be dismissed for lack of jurisdiction because such funding decisions are committed to agency discretion by law (*infra* at 15-17), the aggregation of hundreds of agency actions does not qualify as a discrete agency action (*infra* at 17-21), and the Tucker Act precludes district court jurisdiction (*infra* at 21-23). Furthermore, even if there were jurisdiction to consider Plaintiffs’ claim and vacate AHRQ’s decisions, the relief requested is overbroad in that it affords relief to non-parties with no alleged affiliation to Plaintiffs. *Infra* at 36-37.

American courts.” *Id.* at 424-25. Examples of concrete intangible harms include reputational harms, disclosure of private information, intrusion upon seclusion, and “harms specified by the Constitution itself” (such as abridgment of free speech and infringement of free exercise). *Id.* at 425. However, “[t]he intangible harm of enduring a statutory violation, standing alone, typically won’t suffice under Article III—unless there’s a separate harm (or a materially increased risk of another harm) associated with the violation.” *O’Leary v. TrustedID, Inc.*, 60 F.4th 240, 243 (4th Cir. 2023). “In other words, ‘under Article III, an injury in law is not an injury in fact.’” *Id.* (quoting *TransUnion*, 594 U.S. at 427). Plaintiffs bear the burden of demonstrating standing, which they must do “for each claim that they press and for each form of relief that they seek.” *TransUnion*, 594 U.S. at 430-31 (“standing is not dispensed in gross”).

Here, Plaintiffs’ alleged injuries with respect to AHRQ’s refusal to consider pending applications for new grants⁸ are all intangible and include: (1) “not receiving adequate and timely responses to their applications”; (2) “hav[ing] no way of competing for [] funding”; and (3) “hav[ing] wasted hundreds of hours putting together applications that will never be reviewed.” Am. Compl. ¶ 58. Plaintiffs have not met their burden in demonstrating that these intangible harms have any “close relationship to harms traditionally recognized as providing a basis for lawsuits in American courts.” *TransUnion*, 594 U.S. at 425.

First, regarding Plaintiffs’ alleged injury in having not received responses to their applications, grant applicants are not entitled to a response. *Infra* at 27-29. Indeed, there are public examples of NOFOs being cancelled during prior administrations, which noted that “Applications

⁸ Because AHRQ has issued notices of its decisions regarding formerly pending continuation grant applications (awarding some and not others), any portions of the original complaint alleging a cause of action based on AHRQ’s failure to evaluate applications for *continuation* grants and seeking an Order compelling the same are now moot. Plaintiffs’ amendments appear to recognize this (*e.g.*, Am. Compl. at 28 ¶¶ a, d—Plaintiffs’ Prayer for Relief was amended to seek order compelling evaluation of “*new* grant applications”), and Defendants read the Amended Complaint as being limited to an alleged failure by AHRQ to evaluate *new* grant applications.

submitted will not be reviewed.” *Supra* note 3. Even if they were entitled to a response, a statutory violation alone is not a concrete harm, and Plaintiffs have not alleged that they suffered a harm that AHRQ’s regulations were aimed at preventing when they did not hear back on their applications. *E.g.*, *Dreher v. Experian Info. Sols.*, 856 F.3d 337, 345 (4th Cir. 2017) (“it would be an end-run around the qualifications for constitutional standing if any nebulous frustration resulting from a statutory violation would suffice as an informational injury”).

Second, regarding Plaintiffs’ lost-opportunity-to-compete theory of injury, AHRQ’s issuance of a NOFO does not guarantee that any grant will be awarded. At this point, there is no “competition” in which to compete. Am. Compl. ¶ 40 (“In March 2026, AHRQ pulled down all of its active notices of funding opportunities from NIH’s Guide for Grants and Contracts. Since then, AHRQ has not posted any new requests for applications or program announcements.”). Moreover, all of AHRQ’s previously active NOFOs were issued as Program Announcements, which describe continuing, new, or expanded program interests and typically do not have set aside funds or a defined timeline associated with an award. *Supra* at 4. Plaintiffs also acknowledge that their members are in various stages of the application process. Some have not been through peer review, and Plaintiffs do not allege that these applicants are likely to be awarded funding, which depends on a host of factors, including evaluation by an independent peer review panel.⁹ Am. Compl. ¶ 57; *but see id.* (alleging that certain applications were ranked highly in the peer review process and were likely to receive funding). Accordingly, Plaintiffs’ lost-opportunity-to-compete theory of harm does not fit the context of AHRQ’s grant program, which is far more elastic than the bid procedure context in which courts have found the loss of an opportunity to compete may

⁹ 42 C.F.R. § 67.15(d)(2)(iii) (requiring peer review panels to be independent). *See, e.g.*, *Clapper v. Amnesty Int’l USA*, 568 U.S. 398, 413-14 (2013) (“we have been reluctant to endorse standing theories that require guesswork as to how independent decisionmakers will exercise their judgment”).

constitute a cognizable Article III injury. *Compare Child Trends, Inc. v. U.S. Dep’t of Educ.*, 787 F. Supp. 3d 81, 95 (D. Md. 2025) (Hurson, J.) (finding that “the type of harm alleged by Plaintiffs—the loss of the right to bid—appears to register as an injury for Article III standing purposes” where plaintiffs had demonstrated “a probable expectation of competitiveness in bidding for grants and contracts” to fund statutorily-mandated programs).

Third, and finally, Plaintiffs’ injury in the form of having wasted time completing applications fails to articulate a concrete harm (the time was voluntarily expended in response to NOFOs that in no way guaranteed that any awards would be made at all, let alone to Plaintiffs); lacks causation (the time completing the applications was spent prior to any alleged unlawful action, not as a result thereof); and is not redressable (the time spent cannot be revived by any court order). Further, to redress this alleged injury, Plaintiffs seek prospective, equitable relief in the form of an Order compelling AHRQ to take “steps to peer review and evaluate pending new grant applications” Am. Compl. at 28 (¶ d). But “[p]rospective relief must . . . be justified by prospective injury,” not past expenses (like the spent time Plaintiffs point to here). *State of Maryland*, 151 F.4th at 209. Accordingly, Plaintiffs lack standing to bring claims challenging AHRQ’s refusal to consider new grant applications.

III. This Court Lacks Jurisdiction Over Plaintiffs’ APA Claims.

A. The Actions Plaintiffs Challenge Are Committed to Agency Discretion by Law.

Under the APA, agency action that is “committed to agency discretion by law” is not subject to judicial review. 5 U.S.C. § 701(a)(2). AHRQ has discretion regarding whether to award a grant (including the process of evaluating a grant application), the timeline for doing so, and the amount of any grants awarded. *See infra* at 25-30. AHRQ’s regulations expressly bestow nearly unlimited discretion upon the AHRQ Administrator regarding the award of grants—providing that

“the Administrator may award grants” to fund projects “which in the judgment of the Administrator” best promote the purposes underlying AHRQ’s governing laws and the agency’s priorities. 42 C.F.R. § 67.17(a). Similarly, “continuation awards require a determination by the Administrator that continuation is in the best interest of the Federal Government.” *Id.* § 67.17(d). These decisions are agency actions “committed to agency discretion by law” and unreviewable under the APA. *E.g., Webster v. Doe*, 486 U.S. 592, 600 (1988) (implementation of statute allowing agency to terminate an employee whenever the Director “shall deem such termination necessary or advisable in the interests of the United States” was “committed to agency discretion by law,” thus precluding APA review).

AHRQ’s grant funding decisions are “committed to agency discretion by law” for another reason—which is, as explained *infra* at 30-31, that the Appropriations Acts provide a lump-sum appropriation to AHRQ. One paradigmatic decision “traditionally regarded as committed to agency discretion” is “[t]he allocation of funds from a lump-sum appropriation.” *Lincoln v. Vigil*, 508 U.S. 182, 192-93 (1993) (holding that where Congress simply allocated an annual “lump-sum appropriation[.]” to the agency, the decision to no longer fund a particular program was “committed to agency discretion.”). “After all, the very point of a lump-sum appropriation is to give an agency the capacity to adapt to changing circumstances and meet its statutory responsibilities in what it sees as the most effective or desirable way.” *Id.* at 191. Lump-sum appropriations thus leave it to the agency to decide how “resources are best spent” and “whether a particular program ‘best fits the agency’s overall policies.’” *Id.* at 193 (quoting *Heckler v. Chaney*, 470 U.S. 821, 831 (1985)). While Congress may set outer guardrails on “permissible statutory objections,” courts have “no leave to intrude” so long as agencies adhere to those limits in allocating funding. *Id.*

Here, Congress appropriated a lump-sum amount to AHRQ in order to fulfill broad

statutory purposes. As in *Lincoln*, “Congress never authorized or appropriated moneys expressly for” AHRQ’s grant program; instead, AHRQ has paid for grants “out of annual lump-sum appropriations.” 508 U.S. at 187. Similarly, AHRQ determined, in its discretion, not to continue funding certain projects using its lump-sum appropriations. *Id.* at 188. Instead, AHRQ decided to fund other projects and initiatives, and it has obligated substantially all of its fiscal year 2026 apportioned budget authority in doing so. Klein Decl. ¶¶ 3, 4. The principles of *Lincoln* are directly applicable to these circumstances and preclude APA review over AHRQ’s decisions regarding how to spend its lump-sum appropriations.

B. Plaintiffs Do Not Seek Judicial Review of a Discrete and Final Agency Action.

The APA limits judicial review to “final agency action.” 5 U.S.C. § 704; *Nat’l Veterans Legal Servs. Program v. U.S. Dep’t of Defense*, 990 F.3d 834, 839 (4th Cir. 2021) (“each of the two components—agency action and finality of agency action—narrows the scope of judicial review”). The APA contemplates judicial review of specific, identifiable agency action, as that term is defined in the APA. *Norton v. Southern Utah Wilderness Alliance*, 542 U.S. 55, 62 (2004) (the categories of “agency action” subject to judicial review under the APA each “involve circumscribed, discrete agency actions”); *Lujan v. Nat’l Wildlife Fed.*, 497 U.S. 871, 891 (1990) (“[u]nder the terms of the APA, respondent must direct its attack against some particular ‘agency action’ that causes it harm”). This discreteness requirement prohibits “broad programmatic attacks” against an administrative agency for allegedly failing to meet its statutory obligations. *See Norton*, 542 U.S. at 64, 66 (“General deficiencies in compliance [with statutory mandates] . . . lack the specificity requisite for agency action.”). As the Supreme Court explained in *Norton*,

If courts were empowered to enter general orders compelling compliance with broad statutory mandates, they would necessarily be empowered, as well, to determine whether compliance was achieved—which would mean that it would ultimately become the task of the supervising court, rather than the agency, to work

out compliance with the broad statutory mandate, injecting the judge into day-to-day agency management. . . . ***The prospect of pervasive oversight by federal courts over the manner and pace of agency compliance with such congressional directives is not contemplated by the APA.***

542 U.S. at 66-67 (emphasis added).

Here, Plaintiffs, whose claims are premised on AHRQ’s “cessation” or “halting” of its grant program in July 2025 (Am. Compl. ¶¶ 65, 68, 71, 77, 81, 84), improperly attempt to challenge more than a years’ worth of agency conduct, which is ongoing, as though it were a discrete and final agency action. It is not. *E.g., Vill. of Bald Head Island v. U.S. Army Corps of Eng’rs*, 714 F.3d 186, 193 (4th Cir. 2013) (“The term ‘action’ as used in the APA is a term of art that does not include all conduct such as, for example, constructing a building, operating a program, or performing a contract.”). Rather than identify a specific action or event that they claim was unlawful, Plaintiffs challenge the agency’s broadscale operation (or, rather, alleged non-operation) of its grant program (*e.g.*, Am. Compl. ¶¶ 65, 68, 81, 84), the “mass denial of continuation awards for existing AHRQ grantees” concerning an alleged 150 separate grants (*e.g., id.* ¶¶ 43, 80), and the failure to process new grant applications (*e.g., id.* ¶¶ 84, 85). Plaintiffs assert generalized claims that AHRQ must “restart” its grantmaking program in order to comply with broad statutory mandates. *E.g., id.* ¶ 9 (“The Court should declare unlawful and set aside Defendants’ cessation of its grantmaking process, its refusal to consider and process grant applications, and its unreasoned denial of continuation funding awards. And the Court should require the agency to restart its grantmaking process, as required by law.”). This is precisely the kind of programmatic challenge that the Supreme Court rejected in *Norton*. 542 U.S. at 66.

Plaintiffs’ allegations that AHRQ “engage[d] in a mass denial of continuation awards for existing AHRQ grantees” (which underlie Count V, *see* Am. Compl. ¶ 80) and purportedly failed to process new grant applications (which underlie Count VI, *see id.* ¶ 85) also fail to satisfy the

APA's discreteness requirement. Through these allegations, Plaintiffs attempt to combine numerous individual actions (or, in the case of Count VI, failures to act) in order to bring a broader challenge. The Supreme Court rejected this approach to APA challenges in *Lujan v. Nat'l Wildlife Fed.*, 497 U.S. 871 (1990).

In *Lujan*, the plaintiff alleged that the Bureau of Land Management (BLM) had made various land-use decisions in violation of its statutory obligations. *Id.* at 890. Rather than challenge any of these actions individually, the plaintiff sought to challenge all of them together, grouped under what it described as a "land withdrawal review program." *Id.* The Supreme Court found that, in doing so, the plaintiff failed to plead "an identifiable action or event" reviewable under the APA, which requires a plaintiff to "direct its attack against some *particular* agency action that causes it harm." *Id.* at 891, 899. The Supreme Court explained that

the flaws in the entire 'program'—consisting principally of the many individual actions referenced in the complaint, and presumably actions yet to be taken as well—cannot be laid before the courts for wholesale correction under the APA, simply because one of them that is ripe for review adversely affects one of respondent's members.

Id. at 893.

Similarly, in *City of New York v. U.S. Dep't of Defense*, 913 F.3d 423, 433 (4th Cir. 2019), the Fourth Circuit rejected the plaintiffs' characterization of their claims "as simply an aggregation of many small claims, each one seeking to compel the individual reports required by the [governing statute]. On this view, what the cities seek is not programmatic because each specific act that DOD has failed to perform is discrete when considered on its own." The Fourth Circuit explained:

any limit on programmatic assessment would be rendered meaningless if such an argument prevailed. All governmental programs are the aggregation of individual decisions, many of which are required by law. ***The APA ensures that it is the individual decisions that are assessed as agency action***, rather than the whole administrative apparatus.

Id. (emphasis added).

These principles apply here. Plaintiffs in this case do not challenge any discrete agency action, but rather seek to force a sweeping overhaul of an alleged 150 denials of continuation grant applications and to compel the agency to convene peer review and formally evaluate any and all pending applications for new grants. In directing their claims at an aggregation of hundreds of agency actions, Plaintiffs contravene the “case-by-case approach” to judicial review that the APA requires. *Lujan*, 497 U.S. at 894.

The relief sought further establishes the programmatic nature of Plaintiffs’ claims. Plaintiffs seek vague relief directed at Defendants’ “action” in halting AHRQ’s grant program. Am. Compl. at 28 (¶¶ a, b). They further ask this Court to vacate an alleged 150 decisions not to award continuation grants (*id.* ¶ c)—sweeping action that necessarily reorders the agency’s priorities via judicial decree away from the new projects that AHRQ has chosen to support using its lump-sum appropriations. *See* Klein Decl. ¶ 4. It is also unclear how the Court could grant the relief sought (*e.g.*, compel Defendants to “undertake statutorily required steps to peer review and evaluate pending new grant applications and to award new grants” and enjoin “any steps that hinder AHRQ’s ability to perform its statutorily mandated grantmaking tasks,” *id.* ¶¶ d, e) without inserting itself into the day-to-day management of the agency. Granting Plaintiffs’ requested relief presents a substantial risk that it becomes “the task of the supervising court, rather than the agency, to work out compliance with [AHRQ’s] broad statutory mandate.” *Norton*, 542 U.S. at 66-67. At bottom, Plaintiffs seek the kind of wholesale improvement of agency operations that is not contemplated or authorized by the APA.

Furthermore, the alleged “cessation of AHRQ’s grants program,” taking place over the course of the past year, does not describe the kind of “final” agency action that is subject to judicial

review under the APA. To be final, “the action must mark the ‘consummation’ of the agency’s decisionmaking process” and “must be one by which ‘rights or obligations have been determined,’ or from which ‘legal consequences will flow.’” *Bennett v. Spear*, 520 U.S. 154, 177–78 (1997) (citations omitted). Neither of these conditions are satisfied. AHRQ spent \$94,121,718 in fiscal year 2025 on grants and \$42,871,717 in fiscal year 2026 on grants. *See* Exhibits A, B. As such, the record reflects an intention to continue (not “cease”) the grant program, albeit perhaps not in the form or on the timeline that Plaintiffs desire. Accordingly, there is no “final” agency action related to the alleged “cessation of AHRQ’s grant program” that is reviewable under the APA, and any such claims should be dismissed. *See, e.g., Mayor & City Council of Baltimore v. CFPB*, Case No. 25-cv-458-MJM, 2025 WL 814500, at *11-12 (D. Md. Mar. 14, 2025) (“Plaintiffs fail to make any showing of such a final agency decision. Instead, they challenge a disembodied and unrealized decision to drain the CFPB of its operating funds and reserves, without any evidence that such a decision has been reached at all or generated any legal consequences.”).

C. The Tucker Act Precludes District Court Jurisdiction Over Plaintiffs’ Claims to the Extent They Challenge and Seek to Vacate AHRQ’s Decisions Not to Award Certain Continuation Grants.

AHRQ’s denial of continuation funding to certain grantees via the notices of non-award dated July 15, 2026 each *individually* reflects a discrete and final agency action under the APA. As explained above, Plaintiffs do not challenge individual decisions, but rather bundle them all together, in contravention of the “case-by-case approach” required under the APA. *Supra* at 18-20. Nevertheless, should this Court find that Plaintiffs have identified a discrete and final agency action related to the non-award of certain continuation grants, the Court *still* lacks jurisdiction for another reason—which is that claims challenging an agency’s decisions regarding the funding of federal grants and seeking to vacate those decisions are subject to the Tucker Act and must be

brought, if at all, in the United States Court of Federal Claims.

The Tucker Act vests exclusive jurisdiction in the Court of Federal Claims over claims against the United States alleging breach of express or implied contracts over \$10,000. 28 U.S.C. § 1491(a). The APA, for its part, expressly provides that “[n]othing herein . . . confers authority to grant relief if any other statute that grants consent to suit expressly or impliedly forbids the relief which is sought.” 5 U.S.C. § 702.

Both the Supreme Court and the Fourth Circuit have recently considered the Tucker Act/APA jurisdictional divide in cases challenging agency decisions to terminate federal grants. *See Sustainability Inst. v. Trump*, 165 F.4th 817 (4th Cir. 2026); *Solutions in Hometown Connections v. Noem*, 165 F.4th 835 (4th Cir. 2026); *Nat’l Institutes of Health v. Am. Pub. Health Ass’n*, 145 S. Ct. 26 (Aug. 21, 2025) (hereinafter “*NIH*”); and *Dep’t of Educ. v. California*, 604 U.S. 650 (2025). In each case, the Courts held that the Tucker Act applied to the plaintiffs’ grant termination claims, such that they must be brought, if at all, in the Court of Federal Claims, not federal district court. The Courts further held that a federal district court lacks jurisdiction to vacate and set aside the grant terminations. *See Sustainability Inst.*, 165 F.4th at 828 (“An order vacating the government’s decision to terminate grants under the APA is in every meaningful sense an order requiring the government to pay those grants.”) (quoting *NIH*, 145 S. Ct. at 2664 (Gorsuch, J., concurring in part and dissenting in part)); *NIH*, 145 S. Ct. at 2659 (per curiam) (“The [stay] application is granted as to the District Court’s judgments vacating the Government’s termination of various research-related grants.”).

These principles apply here and preclude Plaintiffs from challenging the agency’s decisions not to award continuation grants and from obtaining relief in the form of setting aside those decisions. In particular, Plaintiffs ask this Court, in paragraph (c) of their Prayer for Relief, to

“[d]eclare unlawful and set aside as arbitrary, capricious, an abuse of discretion, or otherwise contrary to law Defendants’ mass denial of continuation awards for existing AHRQ grantees.” Am. Compl. at 28 (¶ c). This is precisely the form of relief that the Supreme Court and Fourth Circuit have held federal district courts lack jurisdiction to enter. *Sustainability Inst., NIH, supra*. See also 5 U.S.C. § 702 (“Nothing herein . . . confers authority to grant relief if any other statute that grants consent to suit expressly or impliedly forbids the relief which is sought.”). Accordingly, the Court lacks jurisdiction over Plaintiffs’ claims to the extent they challenge AHRQ’s decisions not to award certain continuation grants and seek to vacate those decisions.

D. Plaintiffs Impermissibly Seek to Compel Agency Action That AHRQ Is Not Legally Required to Take.

Count VI is expressly framed under Section 706(1) of the APA and seeks to compel agency action unlawfully withheld—namely, AHRQ’s evaluation of any pending applications for new grants. Am. Compl. ¶¶ 82-85. Counts I-V—while framed in terms of agency *action* “not in accordance with law” or “arbitrary” or “capricious” under Section 706(2)—likewise seek to compel agency action unlawfully withheld—namely, AHRQ’s resumption of its grant program as it previously existed and the expenditure of more money towards grants. *Id.* ¶¶ 9, 65, 68, 77, 81, at 28 (Prayer for Relief ¶¶ a, b, d, & e).¹⁰ Where an APA claim involves assertions that a federal agency failed to take statutorily mandated action, such a claim is properly characterized as a failure to act claim seeking to “compel agency action unlawfully withheld” under Section 706(1) of the

¹⁰ Defendants do not dispute that AHRQ’s decisions not to award certain continuation grants reflect agency action, rather than inaction. Thus, this subsection of the brief does not apply to Plaintiffs’ arbitrary-and-capricious APA claim challenging and seeking to vacate those decisions. Am. Compl. ¶ 80. That claim should nevertheless be dismissed for lack of jurisdiction because AHRQ’s decisions not to award continuation grants (and instead to use its lump-sum appropriations to fund other projects) are committed to agency discretion by law (*supra* at 15-17), the aggregation of hundreds of AHRQ’s decisions does not qualify as a discrete agency action (*supra* at 17-21), and the Tucker Act precludes district court jurisdiction (*supra* at 21-23). Furthermore, even if there were jurisdiction to consider Plaintiffs’ claim and vacate AHRQ’s decisions, the relief requested is overbroad in that it affords relief to non-parties with no alleged affiliation to Plaintiffs. *Infra* at 36-37.

APA. *See Norton*, 542 U.S. at 64-65 (noting that the claim in *Lujan* was “couched as unlawful agency ‘action’” but “would have fared no better if they had characterized the agency’s alleged ‘failure to revise land use plans in proper fashion’ . . . in terms of ‘agency action unlawfully withheld under § 706(1)’”). Here, Plaintiffs’ claims rest on allegations that Defendants failed to take action mandated by statute, and Plaintiffs ask this Court to compel Defendants to take such action. *See* Am. Compl. ¶¶ 9, 65, 68, 77, 81, at 28 (Prayer for Relief ¶¶ a, b, d, & e). Accordingly, Plaintiffs’ claims are properly considered under Section 706(1) of the APA.

Section 706(1) authorizes a court to “compel agency action *unlawfully* withheld.” 5 U.S.C. § 706(1) (emphasis added). In *Norton*, the Supreme Court explained that this means “the only agency action that can be compelled under the APA is action legally *required*”—i.e., “a precise, definite act about which an official has no discretion whatsoever.” 542 U.S. at 63 (internal quotations omitted). *See also Lovo v. Miller*, 107 F.4th 199, 211 (4th Cir. 2024) (“claims to compel agency action are limited to enforcement of a specific, *unequivocal* command, over which an official has no discretion.”). “The limitation to *required* agency action rules out judicial direction of even discrete agency action that is not demanded by law (which includes, of course, agency regulations that have the force of law).” *Norton*, 542 U.S. at 65.

Here, Plaintiffs ask this Court to order Defendants to restart AHRQ’s grantmaking program and “undertake statutorily required steps to peer review and evaluate grant applications and to award grants.” Am. Compl. at 28 (Prayer for Relief ¶¶ a, b, d, & e); *see also id.* ¶ 9 (“The Court should declare unlawful and set aside Defendants’ cessation of its grantmaking process, its refusal to consider and process grant applications, . . . , [a]nd the Court should require the agency to restart its grantmaking process, as required by law.”). But, as discussed in greater detail *infra* at 25-29, none of these tasks are mandated by statute or regulation. As a result, the Court lacks subject

matter jurisdiction to compel them under the APA.

IV. Defendants Have Not Violated the PHS Act or AHRQ’s Regulations, and Therefore Count I Should Be Dismissed.

In Count I, Plaintiffs allege that AHRQ is statutorily required to fund grants focused on certain aspects of the healthcare system. *See* Am. Compl. ¶¶ 21, 62 (citing 42 U.S.C. §§ 299b-1(b)-(c), 299b-4(b), 299b-31(c), 299b-34(a), 299b-36(d)(1) & (e)(3), 299b-37(e)). Yet, Plaintiffs acknowledge that AHRQ has a grant program and spent \$94,121,718 in fiscal year 2025 and \$42,871,717 in fiscal year 2026 on that program. Exhibits A, B. Plaintiffs make no allegation that AHRQ is not currently funding whatever limited grants are statutorily required. “It is not . . . proper to assume that the [plaintiff] can prove facts that it has not alleged or that the defendants have violated the [applicable] laws in ways that have not been alleged.” *Associated Gen. Contractors v. California State Council of Carpenters*, 459 U.S. 519, 526 (1983).

Nothing in the statutory or regulatory scheme governing AHRQ requires the agency to award new grants each year, nor are there any requirements that new grants be awarded on a particular timeline or in a particular amount. To the contrary, the regulations provide that grant applications must be submitted “in the form and at the time that the Administrator requires.” 42 C.F.R. § 67.14(a). And the regulations expressly bestow nearly unlimited discretion upon the AHRQ Administrator regarding whether to award a grant, providing:

Within the limits of available funds, the Administrator *may* award grants to those applicants whose projects are being considered for funding, which *in the judgment of the Administrator*, will promote best the purposes of Title IX of the PHS Act and (if applicable) section 1142 of the Social Security Act, AHCPR priorities, and the regulations of this subpart.

42 C.F.R. § 67.17(a) (emphasis added). The Fourth Circuit has repeatedly held that similar statutory/regulatory language is not mandatory such that an agency’s failure to act is not reviewable under the APA. *See Lovo*, 107 F.4th at 212-13 (interpreting regulation providing that

“USCIS *may* adjudicate [certain immigration-related] applications,” to mean that “whether to adjudicate the [] Applications at all is left to USCIS’s discretion”); *Gonzalez v. Cuccinelli*, 985 F.3d 366, 365-71 (4th Cir. 2021) (statute providing that “[t]he Secretary *may* grant work authorization . . .” was discretionary, and agency action could not be compelled under APA § 706).

AHRQ’s decisions not to continue funding certain grants and to allocate its lump-sum appropriations to other projects are not subject to APA review—those decisions are committed to agency discretion by law (as explained *supra* at 15-17) and the Tucker Act bars APA review (as explained *supra* at 21-23). In any event, AHRQ did not violate any statute or regulation when it issued notices of its decisions not to continue funding certain grants in July 2026. In the context of awarding continuation grants, AHRQ’s regulations provide that “[i]n all cases, continuation awards require a determination by the Administrator that continuation is in the best interest of the Federal Government.” 42 C.F.R. § 67.17(d). In addition, “[n]either the approval of any application nor the award of any grant commits or obligates the Federal Government in any way to make any additional, supplemental, continuation, or other award with respect to any approved application.” *Id.* § 67.17(e). Plaintiffs themselves agree that “AHRQ regulations make clear that award funding for multi-year grants is issued in one-year increments, and that the funding for every year of the grant period is not guaranteed” Am. Compl. ¶ 64.

Plaintiffs merely allege that AHRQ failed to discuss “grant-specific reasoning for the decision to deny continuation funding” in the notice letters, but that is simply not required. *Id.* ¶ 47. Instead, the regulations require “[i]n all cases” that the Administrator determines that “continuation is in the best interest of the Federal Government.” 42 C.F.R. § 67.17(d). These grants failed that criteria, as Plaintiffs acknowledge. The regulations do not require AHRQ to provide additional details to the grantees regarding its reasoning. Plaintiffs also cite 42 C.F.R. §

67.17(h) (Am. Compl. ¶¶ 47, 64), but that subsection merely provides that certain continuation awards “*may* be reviewed” It does not contain mandatory requirements, let alone require AHRQ to provide any specific information in denying continuation grant applications.

Finally, AHRQ has not violated any statute or regulation by failing to process every single pending grant application via the peer review and evaluation process on Plaintiffs’ desired timeline. Am. Compl. ¶¶ 22-23, 62-63, 83. The PHS Act provides: “Appropriate technical and scientific peer review shall be conducted with respect to each application for a grant . . . under this chapter.” 42 U.S.C. § 299c-1(a)(1). AHRQ’s implementing regulations provide that “[a]ll applications for support under this subpart will be submitted by the Administrator for review to a peer review group,” after which “the Administrator will evaluate applications recommended for further consideration, taking into account [certain specified] factors” and on that basis “shall: give consideration for funding, defer for a later decision, pending receipt of additional information, or give no further consideration for funding, to any application for a grant under this subpart” 42 C.F.R. §§ 67.15(a), 67.16(a), (b).

While these statutes and regulations use “shall” and/or “will”—words that are often considered mandatory—the Fourth Circuit instructs that “the impact of seemingly mandatory or permissive language depends heavily on the context in which it appears.” *Lovo*, 107 F.4th at 212. In *Lovo*, the Fourth Circuit considered analogous regulatory language (specifically, 8 C.F.R. § 212.7(e)(8), which provides that “USCIS *will* adjudicate a [certain immigration-related] application in accordance with” certain statutes) and held that, when properly viewed in context, it simply requires that “*when, in its discretion*, USCIS decides to adjudicate claims, it must do so in accordance with the standards and procedures laid out in the statute and regulations.” 107 F.4th at 213. The Fourth Circuit therefore held that the district court lacked jurisdiction to compel the

agency to act on the plaintiff's immigration application.

The same construction that the Fourth Circuit applied in *Lovo* applies to this case: when, in its discretion, AHRQ decides to award a grant (*see* 42 C.F.R. § 67.17(a), providing that “the Administrator *may* award grants . . .”), it may only do so after following the mandatory procedures, including the peer review and evaluation process, set forth in applicable statutes and regulations (*see* 42 U.S.C. § 299c-1(a)(1); 42 C.F.R. §§ 67.15(a), 67.16(a), (b)). As in *Lovo*, this Court lacks jurisdiction to compel AHRQ to evaluate all grant applications it receives.

Further, an interpretation of AHRQ's regulations as requiring, on the one hand, that any and all grant applications be processed via peer review and evaluation by the Administrator, yet, on the other hand, as permitting discretion over whether any particular grant is awarded at the end of that process, would be unreasonable and violate the “axiomatic canon of statutory interpretation which states that ‘to the extent possible, a court’s interpretation should ensure that the statutory scheme is coherent and consistent.’” *Healthkeepers, Inc. v. Richmond Ambulance Auth.*, 642 F.3d 466, 472, 474 (4th Cir. 2011) (“this Court has an obligation to construe statutes as being reasonable”). Such an interpretation would require a lengthy and expensive bureaucratic exercise (peer review) with no legal or practical consequence (a grant award)—an absurd result that is inconsistent with the regulations' evident purpose. In enacting its governing regulations, AHRQ did not mandate the administrative processes of peer review and Administrator evaluation merely for their own sake, but rather to ensure that it funds meritorious and scientifically rigorous research.

Further illustrating its absurdity, Plaintiffs' interpretation has no apparent limiting principle. In their view, AHRQ would be required to submit any grant application it receives to peer review and evaluation, regardless of whether the application is facially frivolous, nonresponsive to the funding announcement, or wholly disconnected from legitimate health-

services research. *See* Am. Compl. ¶ 63 (“The relevant regulation mandates that ‘[a]ll applications’ for AHRQ grants, other than certain small grants, ‘will be submitted . . . for review to a peer review group,’” quoting 42 C.F.R. § 67.15(a)(1)). An applicant could submit a proposal seeking to study how the placement of magazines in waiting rooms impacts patient mood and thereby reduces mortality, and AHRQ would be legally obligated to convene peer reviewers and formally evaluate the proposal. Nothing in Plaintiffs’ interpretation provides a principled basis for distinguishing such submissions from those they contend must receive peer review here.

Finally, even if these statutes and regulations could be interpreted as requiring AHRQ to evaluate and process grant applications as a general matter, there is no requirement that AHRQ do so on any particular timeline. As a result, the pace at which AHRQ evaluates grant applications is discretionary, and the Court lacks jurisdiction to compel AHRQ to act on Plaintiffs’ desired timeline. *See, e.g., Gonzalez*, 985 F.3d at 369 (agency action could not be compelled where “there [was] no timeline or mandate to act, adjudicate, or implement the provision”); *Tawah v. Noem*, Case No. 24-cv-3469-DKC, 2025 WL 2021661, at *4 (D. Md. July 18, 2025) (holding that “[b]ecause the statutory timeframe is still discretionary, the APA still does not authorize judicial review of asylum application adjudications . . . , and the court still lacks jurisdiction to review Plaintiff’s APA claim,” citing *Tawah v. Mayorkas*, Case No. 23-cv-02920-TJS, 2024 WL 2155060, at *3 (D. Md. May 14, 2024)); *Martynenko v. Donis*, Case No. 24-cv-02218-LKG, 2025 WL 1685667, at *4 (D. Md. June 16, 2025) (“the pace at which USCIS adjudicates asylum applications is left to the agency’s discretion. And so, the Plaintiff has also not shown that the Court may consider his claim under the APA.”).

Accordingly, Plaintiffs do not allege a violation of the PHS Act or AHRQ regulations that

can support Count I, and this claim should be dismissed.¹¹

V. Defendants Have Not Violated the Appropriations Acts, and Therefore Counts II and III Should Be Dismissed.

The Appropriations Acts do not require that AHRQ obligate all funds it has been appropriated in lump-sum, let alone that it obligate such funds towards grantmaking. The Appropriations Acts authorize funding for AHRQ in a lump-sum of \$369,000,000 (or \$345,380,000 for fiscal year 2026) “[f]or carrying out titles III and IX of the PHS Act, part A of title XI of the Social Security Act, and section 1013 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003.” 2024 Appropriations Act, 138 Stat. 460, 661-62; 2025 Continuing Resolution, 139 Stat. 9, 10-11, § 1101(a)(8); 2026 Appropriations Act, 140 Stat. 173, 272. *These are lump-sum appropriations, with no mandatory language at all.*

The Appropriations Acts do not, of their own force, compel AHRQ to obligate every dollar of appropriated funds. Nothing in the language of the Appropriations Acts (nor that of any other statute or regulation, *see supra* at 25-29) requires it.¹² The Supreme Court recently discussed the history of appropriations laws, explaining that such laws were originally enacted to function as a *limit* on Executive spending, and, accordingly, they often “provided the Executive discretion over how much to spend up to a cap.” *Consumer Fin. Prot. Bureau v. Cmty. Fin. Servs. Ass’n*, 601 U.S. 416, 429-34 (2024); *id.* at 442-43 (Kagan, J., concurring) (“Our government practice has been

¹¹ In similar vein (as discussed *supra* at 23-24), an order compelling AHRQ to award new grants or process new grant applications would violate the principles set forth in *Norton*, 542 U.S. at 64, because these are not actions that AHRQ is legally required to take. And, relatedly (as discussed *supra* at 15-17), an order compelling AHRQ to spend its lump-sum appropriation on grants or the processing of grant applications would be directly contrary to the Supreme Court’s holding in *Lincoln v. Vigil*, 508 U.S. 182, 192 (1993), which held that the allocation of funds from a lump-sum appropriation is committed to agency discretion by law and not reviewable.

¹² *Compare Child Trends*, 795 F. Supp. 3d at 722 (“Defendants have not only withheld funds appropriated by Congress but have also refused to carry out an express statutory mandate to operate Comprehensive Centers and RELs at the required capacity”); *Train v. City of New York*, 420 U.S. 35, 38-43 & n.2 (1975) (enforcing statutory mandate that appropriated funds “shall be allotted”); *In re Aiken Cnty.*, 725 F.3d 255, 259 (D.C. Cir. 2013) (Kavanaugh, J.) (holding that agencies “must follow statutory mandates so long as there is appropriated money available”); *Kane Cnty. v. United States*, 127 Fed. Cl. 696, 697 (Ct. Cl. 2016) (finding payments were mandatory pursuant to statute mandate that “appropriated sums shall be made available . . . for obligation or expenditure”).

replete with instances of general appropriations to be expended as directed by designated government agencies.”). Thus, it is now well-established that appropriations statutes need not, and often do not, require the agency to expend all funds appropriated to it. That is the case here, where Congress appropriated a lump-sum to AHRQ, included no mandatory language whatsoever, and left to AHRQ’s discretion how those appropriated funds are expended (or not expended).

Finally, even if the Appropriations Acts could be construed as requiring AHRQ to spend the entirety of its lump-sum appropriations, Plaintiffs cannot base an APA claim on alleged violations of the Appropriations Acts because the ICA precludes judicial review. *See infra* at 32-35 (similar argument that the ICA precludes judicial review of an APA challenge based on an alleged violation of the ICA itself). Some courts have rejected this argument in recent months, including in *AIDS Vaccine Advoc. Coal. v. U.S. Dep’t of State*, Case Nos. 25-cv-00400-AHA, 25-cv-00402-AHA, 2025 WL 2537200 (D.D.C. Sept. 3, 2025). However, on September 26, 2025, the Supreme Court granted the Government’s application to stay the *AIDS Vaccine* preliminary injunction, finding that “[t]he Government, at this early stage, has made a sufficient showing that the Impoundment Control Act precludes respondents’ suit, brought pursuant to the Administrative Procedure Act, to enforce the appropriations at issue here.” *Dep’t of State v. AIDS Vaccine Advoc. Coal.*, 606 U.S. ___, 146 S. Ct. 19 (Sept. 26, 2025). While the Supreme Court noted that “[t]his order should not be read as a final determination on the merits,” *id.*, the standard for the emergency relief that was granted includes “a strong showing that [the stay applicant] is likely to succeed on the merits.” *Nken v. Holder*, 556 U.S. 418, 426 (2009).

VI. Plaintiffs Cannot Rely Upon the ICA to Support an APA Contrary-to-Law Claim, and Therefore Count IV Should Be Dismissed.

As discussed, the Appropriations Acts do not, of their own force, require AHRQ to obligate all funding appropriated to it. It is the ICA that governs circumstances in which the President

makes a policy determination not to expend funds. But Plaintiffs cannot rely upon alleged violations of the ICA to support an APA contrary-to-law claim for at least two reasons: (1) the ICA is a statute that precludes judicial review under the APA; and (2) Plaintiffs are not within the zone of interests sought to be protected by the ICA.¹³

A. The ICA precludes judicial review under the APA.

A plaintiff may not seek review under the APA if “statutes preclude judicial review.” 5 U.S.C. § 701(a)(1). “[W]hen a statute provides a detailed mechanism for judicial consideration of particular issues at the behest of particular persons, judicial review of those issues at the behest of other persons may be found to be impliedly precluded.” *Block v. Cmty. Nutrition Inst.*, 467 U.S. 340, 349 (1984). *See also Sackett v. EPA*, 566 U.S. 120, 130 (2012) (“Where a statute provides that particular agency action is reviewable at the instance of one party, who must first exhaust administrative remedies, the inference that it is not reviewable at the instance of other parties, who are not subject to the administrative process, is strong.”).

In *Block*, the Supreme Court held that the Agricultural Marketing Agreement Act of 1937 precluded judicial review under the APA. 467 U.S. at 341. That statute allowed specific people (dairy handlers) to obtain judicial review in federal district court of certain decisions by the Secretary of Agriculture after exhausting administrative remedies. *Id.* at 346. Someone other than those specific people (consumers) tried to bring APA claims challenging the Secretary’s decisions. *Id.* at 347. The Supreme Court held that the plaintiff-consumers could not bring their claims

¹³ For the Court’s awareness, on October 7, 2026, the GAO issued a decision in which it concluded that the agency “violated the ICA when the agency, without submitting a special message to Congress, withheld funds from obligation and expenditure following the RIF of AHRQ personnel responsible for grant administration.” <https://www.gao.gov/products/b-337872>. GAO’s decision, which is not binding on this Court and with which AHRQ disagrees, is immaterial to the argument made herein—which is that Plaintiffs cannot bring an APA contrary-to-law claim based upon violations of the ICA. Indeed, the very existence of the GAO’s decision illustrates that the interbranch process set forth in the ICA and discussed below is in progress. There is no reason for the Court to interfere at this juncture by allowing Plaintiffs’ claim to proceed.

because the statute precluded judicial review, pointing to two aspects of the statute: (1) that the statutory scheme “contemplates a cooperative venture” between the dairy handlers and the Secretary, but nowhere did the statute allow for participation by consumers; and (2) that the dairy handlers were required to exhaust remedies before bringing suit, whereas consumers were not subject to exhaustion requirements. *Id.* at 345-48.

The ICA has these same characteristics. The ICA establishes a similar “cooperative venture” between the legislative and executive branches by providing for Congressional oversight when the Executive branch defers budgetary authority. There is no role for private parties to play in that scheme. At a high level, the ICA requires the President to submit a “special message” to Congress when he elects to rescind or defer budget authority. 2 U.S.C. §§ 683(a), 684(a). If the President improperly fails to submit a special message, then the Comptroller General—the head of the Government Accountability Office (GAO) and, as such, a legislative branch official—must make a report in lieu of the special message to Congress. *Id.* § 686(a). The ICA authorizes the Comptroller General to bring suit in the United States District Court for the District of Columbia, which is empowered to enter “any decree, judgment, or order which may be necessary or appropriate to make such budget authority available for obligation.” *Id.* § 687. Before bringing such suit, however, the Comptroller General is required to furnish an “explanatory statement . . . of the circumstances giving rise to the action contemplated” to the Speaker of the House of Representatives and the President of the Senate and wait 25 calendar days of continuous session of Congress. *Id.* In other words, just like the statute in *Block*, the ICA authorizes a particular individual—the Comptroller General—to bring a civil action, and, again like the statute in *Block*, the ICA prescribes a specific format and prerequisites for bringing that action.

The D.C. Circuit recently applied *Block* under nearly identical circumstances and held that

the ICA bars plaintiffs from bringing suit under the APA to enforce the ICA. *Global Health Council v. Trump*, 153 F.4th 1, 17-20 (D.C. Cir. 2025). The plaintiffs—organizations whose members received federal foreign assistance funds—asserted that the Executive Branch did not intend to expend all such funds appropriated under the 2024 Appropriations Act, that the failure to obligate all appropriated funds violated the ICA, and that these allegations could support an APA contrary-to-law claim. *Id.* The D.C. Circuit rejected plaintiffs’ arguments, finding that:

the ICA created a complex scheme of notification of the Congress, congressional action on a proposed rescission or deferral and suit by a specified legislative branch official if the executive branch violates its statutory expenditure obligations. *See* 2 U.S.C. § 682 *et seq.* Moreover, under the ICA, the Comptroller General may bring suit only 25 days after he has provided the Congress with a statement explaining “the circumstances giving rise to the action contemplated.” 2 U.S.C. § 687. As in *Block*, it does not make sense that the Congress would craft a complex scheme of interbranch dialogue but *sub silentio* also provide a backdoor for citizen suits at any time and without notice to the Congress of the alleged violation.

Id. at 18-19. Accordingly, the D.C. Circuit held that “the grantees have no cause of action to undergird their APA contrary-to-law claim.” *Id.* at 20. *Cf. AIDS Vaccine Advoc. Coal.*, 146 S. Ct. 19 (granting stay of injunction, finding that “[t]he Government, at this early stage, has made a sufficient showing that the Impoundment Control Act precludes respondents’ suit, brought pursuant to the Administrative Procedure Act, to enforce the appropriations at issue here.”). The same reasoning and conclusion apply in this case and preclude Count IV.

Defendants acknowledge this Court’s summary judgment ruling in *Child Trends, Inc. v. U.S. Dep’t of Educ.*, in which this Court considered *Global Health Council* and noted that the D.C. Circuit’s view that plaintiffs “‘lacked a cause of action to undergird their APA contrary-to-law claim’ on the basis of an alleged ICA violation” “is not universally shared.”¹⁴ 795 F. Supp. 3d

¹⁴ However, each of the cases cited in *Child Trends* for this point involved alleged violations of statutory mandates and not merely a violation of the ICA. *See New York v. Trump*, 769 F. Supp. 3d 119, 138 n. 13 (D.R.I. 2025) (statutes provided that the agency “shall” make certain grants according to a statutory formula, which the agency was allegedly violating); *Oregon Council for Humanities v. U.S. DOGE Service*, 794 F. Supp. 3d 840, 887 (D. Or. 2025) (similar);

700, 721 (D. Md. 2025). This Court went on, however, to distinguish *Global Health Council* on the basis that the plaintiffs alleged that “Defendants have not only withheld funds appropriated by Congress but have also refused to carry out an express statutory mandate,” and held that “[t]he combination of statutory violations sets the case at bar apart from the narrower set of circumstances before the D.C. Circuit in *Global Health Council*.” *Id.* at 722. As explained *supra* at 25-31, no such statutory violations exist in this case. Accordingly, while Defendants respectfully disagree with this Court’s *Child Trends* ruling to the extent it suggests that the ICA could form the basis of an APA contrary-to-law claim, the instant case involves “a materially different situation” (*id.*) that sets it apart from *Child Trends*.

B. Plaintiffs are not within the zone of interests that the ICA is meant to protect.

To invoke the APA, a plaintiff must establish that the injury it complains of “falls within the zone of interests sought to be protected by the statutory provision” at issue. *Air Courier Conference of Am. v. American Postal Workers Union*, 498 U.S. 517, 523 (1991). Where, as here, the plaintiff is not the object of a challenged regulatory action, the plaintiff has no right of review if its “interests are so marginally related to or inconsistent with the purposes implicit in the statute that it cannot reasonably be assumed that Congress intended to permit the suit.” *Clarke v. Securities Industry Assn.*, 479 U.S. 388, 399 (1987). “[T]he ‘relevant statute’ for an APA zone-of-interests analysis is not the APA itself, but the statute under which the relevant agency acted.” *Food & Drug Admin. v. R.J. Reynolds Vapor Co.*, 145 S.Ct. 1984, 1991, n.4 (2025).

Plaintiffs—organizations whose members hoped to be awarded some of AHRQ’s appropriated funds—are not within the zone of interests meant to be protected by the ICA. As discussed *supra* at 33, the ICA is directed at regulating the relationship between Congress and the

Rhode Island v. Trump, 781 F. Supp. 3d 25, 48-49 (D.R.I. 2025) (finding that the actions of the agency violated mandatory statutory duties).

Executive branch. It establishes a structure for interbranch dialogue when the President determines not to obligate appropriated funds. That structure provides no role for third parties like Plaintiffs.

In *Public Citizen v. Stockman*, 528 F. Supp. 824, 827-30 (D.C.C. 1981), the court undertook an extensive analysis of the ICA and its purposes, finding that:

Congress sought to retain principal dominion over the impoundment process and crafted a flexible scheme for involving the judiciary in disputes spawned by the Act's provisions. The Comptroller General's determination as to whether to bring suit, and Congress' decision whether to sanction the institution of such a suit, will obviously turn on a host of politically sensitive factors, including the potential impact that such a suit will have on the legislative-executive relationship.

Id. at 830. The court further explained that: "The value of section 1406 will be lessened considerably if private litigants are free to embroil the judiciary in controversies arising under the ICA; the courts would be forced to rule on the legality of executive withholdings in the absence of Congress' preliminary assessment of the crucial political dimensions involved in such a suit." *Id.* The court held that the ICA did not create a private right of action that would allow the plaintiff to sue under the ICA directly. *Id.* The court also expressly rejected the plaintiff's alternative argument that the suit could instead proceed under APA § 706, finding that the plaintiff's interests were not "within the zone of interests intended to be protected by the ICA," which "was clearly enacted to safeguard Congress' interests, not those of private citizens." *Id.* at 830 n.1. For the same reasons, Plaintiffs in this case do not fall within the zone of interests meant to be protected by the ICA, and therefore cannot bring an APA suit to enforce the ICA.

VII. The Scope of Relief Sought in the Amended Complaint Is Impermissibly Broad Because It Extends to Non-Parties with No Alleged Connection to Plaintiffs.

The scope of relief sought in the Amended Complaint is overbroad because it extends beyond what is necessary to remedy any injury to Plaintiffs or their members. Plaintiffs are membership associations and allegedly have some members whose continuation grant applications

were denied and/or whose new grant applications have not been evaluated. Am. Compl. ¶¶ 12, 13. Yet, Plaintiffs ask this Court to enter an order setting aside *all* of the agency’s decisions not to award continuation grants and compel the agency to peer review and evaluate *all* new grant applications—including those of individuals/entities who are not members of Plaintiffs and/or have no connection to this litigation. *Id.* at 28. To the extent any relief is appropriate in this case, it should be limited to that necessary to afford “complete relief between the parties,” rather than nonparties. *Trump v. CASA, Inc.*, 606 U.S. 831, 851 (2025).

CONCLUSION

For the foregoing reasons, Defendants’ Motion should be granted and the Amended Complaint dismissed with prejudice. In the alternative, summary judgment should be granted in Defendants’ favor.

Dated: October 7, 2026

Respectfully submitted,

Kelly O. Hayes
United States Attorney

EXHIBIT C

**IN THE UNITED STATES DISTRICT COURT
FOR THE DISTRICT OF MARYLAND**

SOCIETY OF GENERAL INTERNAL
MEDICINE, ET AL.,

Plaintiffs,

v.

ROBERT F. KENNEDY, JR., ET AL.,

Defendants.

Case No.: 8:25-cv-02751-BAH

DECLARATION OF ROGER D. KLEIN

1. I am the Director of the Agency for Healthcare Research and Quality (AHRQ). I assumed that position on June 30, 2025. I submit this declaration based on my personal knowledge and information available to me in my official capacity.

2. In my role as Director, I am familiar with AHRQ's budget, appropriations, and financial obligations, including AHRQ's obligations during fiscal year 2026.

3. As of September 30, 2026, AHRQ had obligated over 99% of its fiscal year 2026 apportioned budget authority.¹

4. AHRQ used its 2026 lump-sum appropriations to, among other things, support several new projects and initiatives. For example, in September 2026, AHRQ committed approximately \$30 million to support a joint initiative by AHRQ and the National Institutes of Health known as Developing Evidence for Programs to Ensure Nutrition for Development or "DEPEND." The DEPEND program aims to help schools replace highly processed foods with nutrient-dense, real food and identify effective, scalable strategies for improving school

¹ The available fiscal year 2026 apportioned budget authority excludes \$27.7 million subject to the Proposed Rescission of Budget Authority dated September 25, 2026.

meals. AHRQ also recently announced an \$11.8 million prize competition (the AHRQ Healthcare Choice and Competition Challenge to Improve Quality, Lower Prices, and Expand Access) under the America Creating Opportunities to Meaningfully Promote Excellence in Technology, Education, and Science (COMPETES) Reauthorization Act of 2010, as amended. (15 U.S.C. § 3719). The challenge asks researchers to identify and study actionable proposed policy changes aimed at reducing ineffective regulation and increasing competition and patient choice, thereby lowering healthcare costs and improving outcomes. In addition, AHRQ announced its Super Intelligence for Healthcare Improvement Initiative. This America COMPETES prize challenge offers up to \$7.95 million for an individual, team, or entity to build advanced AI systems that can make healthcare research faster, more continuously updated, and more usable in real-world care. AHRQ has also entered into a joint initiative with the Indian Health Service (IHS) to help standardize care within tribal facilities, beginning with a sepsis management program. AHRQ has committed \$7.5 million to this project, which seeks to improve early identification and management of sepsis in emergency care facilities in American Indian and Alaska Native communities. These are just a few recent examples of how AHRQ has exercised its discretionary authority to spend its fiscal year 2026 appropriations. Other exciting projects and initiatives are underway.

Pursuant to 28 U.S.C. § 1746, I declare under penalty of perjury that the foregoing is true and correct. Executed on October 7, 2026.

A handwritten signature in black ink, appearing to read "Roger D. Klein", is written over a horizontal line.

Roger D. Klein
Director, Agency for Healthcare Research and Quality

Case No.: 8:25-cv-02751-BAH

ORDER

Upon consideration of Defendants’ Motion to Dismiss or, in the Alternative, for Summary Judgment (the “Motion”) and all matters in support thereof and in opposition thereto, it is this this ____ day of _____, _____, by the United States District Court for the District of Maryland, hereby:

ORDERED that the Motion is **GRANTED**; and it is further

ORDERED that Plaintiffs’ Amended Complaint, ECF No. 46, is **DISMISSED WITH PREJUDICE**.

Brendan A. Hurson
United States District Judge
