

1 P R O C E E D I N G S

2 THE COURTROOM DEPUTY: This is Civil Matter 25-74,  
3 *Alignment Healthcare, Inc. v. U.S. Department of Health and*  
4 *Human Services, et al.*

5 Starting with plaintiff's counsel, please approach  
6 the podium and identify yourselves for the record.

7 MR. KIMBERLY: Good morning, Your Honor; Michael  
8 Kimberly for Alignment Healthcare.

9 THE COURT: Good morning. Good to see you.

10 MS. MUNDY: Good morning, Your Honor; Kara Wilcox  
11 Mundy on behalf of the defendants, and I'm joined at counsel  
12 table by Jared Littman.

13 THE COURT: Okay. Good morning, folks. Thanks.

14 All right. Quite a bit to cover. I have a hard  
15 stop at about 12:15. Given the discrete and sort of  
16 separate issues, I think it might make more sense just to  
17 handle these in order from counsel table, and we'll hear  
18 from the plaintiffs and then from the government on each  
19 issue in order.

20 Just as a prefatory matter, you know, I  
21 understand, Mr. Kimberly, that your clients are, you know --  
22 take these issues seriously, and that there may be a lot of  
23 money at stake going forward, and I've tried to accommodate  
24 your requested decision schedule to the extent that I can,  
25 but I must say that, you know, it seems as if -- and correct

1 me if I'm wrong -- that, you know, you folks waited to bring  
2 this case at least three or four months after the Star  
3 Rating, and some of the adjudicatory decisions may have been  
4 challengeable even prior to that.

5 You gave me a bunch of briefs in March raising  
6 seven discrete issues, and you asked for a ruling in two  
7 weeks. You know, again, I'm happy to accommodate that, but  
8 as you may have heard, we get a lot of PIs and TROs in this  
9 court, and this strikes me as maybe not an end run but, you  
10 know, somewhat inconsistent with the -- you know, the PI  
11 rules in this court. And I'm not sure whether you would  
12 have qualified for a PI based on irreparable harm, and, you  
13 know, you're putting this case in queue ahead of a lot of  
14 others also with important issues being raised.

15 But that said, I -- you know, I appreciate your  
16 client's interest in a prompt resolution and the  
17 implications going forward, and we've tried to accommodate  
18 you as best we can. All right?

19 All right. With that, you should feel free to  
20 raise any of the issues that you would like.

21 Just to put my cards on the table, I'm probably  
22 most interested in the oversampling issue and the first  
23 erroneous appeal issue related to the alleged late referral  
24 to CMS. But that said, start wherever you'd like.

25 MR. KIMBERLY: Thank you, Your Honor.

1 THE COURT: Sure.

2 MR. KIMBERLY: I'd be happy, too, to address the  
3 timing question --

4 THE COURT: Sure.

5 MR. KIMBERLY: -- if that's at all relevant.

6 THE COURT: Sure.

7 MR. KIMBERLY: First, we, of course, appreciate  
8 the Court's consideration of our request in the timetable  
9 that we gave. There was a fair amount of waiting for the  
10 administrative record. One reason we didn't seek  
11 preliminary relief is we believed we needed the  
12 administrative record to prove up our claims, and that was a  
13 60-day delay.

14 Having said that, I think in the current posture,  
15 if there is a decision from the Court really any time in the  
16 first half of June, maybe even into the third week, that  
17 should be sufficient to allow the parties, including CMS, to  
18 recalculate the Star Ratings as maybe necessary in light of  
19 the grant of any actual relief.

20 THE COURT: Okay. Well, what my plan is -- I've  
21 read all the papers. We've tried to digest the issues as  
22 best we can. Based on what we hear today, our plan would be  
23 to try to reach a ruling expeditiously. It may not be a  
24 full dressed memorandum opinion, but it will be enough to  
25 explain our reasoning and why we've come out the way that we

1 have. I'm not going to give you a particular date, but it  
2 will be sooner rather than later.

3 MR. KIMBERLY: Sure.

4 THE COURT: Okay.

5 MR. KIMBERLY: Very good. Thank you very much,  
6 Your Honor.

7 So I guess, if I may, I'll start with  
8 oversampling, Your Honor, since you put that on the table.  
9 I would also like an opportunity especially to stress the  
10 Spanish language survey administration problem.

11 THE COURT: Sure.

12 MR. KIMBERLY: But I understand you want to go one  
13 at a time so I'll address sampling first.

14 THE COURT: Okay.

15 MR. KIMBERLY: So as the Court knows, there is a  
16 significance testing component to the Star Ratings  
17 calculations. The Star Ratings calculations take account  
18 really of three general inputs. The first is the raw score  
19 on any particular measure; and the second is the reliability  
20 score, which is based on the quality of the data that is  
21 used to calculate the raw score; and the third is  
22 significance testing.

23 Through significance testing a contract can  
24 receive a higher overall Star Rating even when it has,  
25 compared to another plan, a lower raw score and an

1 equivalent reliability score, and this is particularly  
2 likely to be the case, as it has been, as we demonstrated,  
3 with Contract 3815, when other contracts engage in the  
4 practice of oversampling.

5 As a baseline matter --

6 THE COURT: If I could ask a clarification  
7 question --

8 MR. KIMBERLY: Sure.

9 THE COURT: -- just more generally. I should have  
10 started with this.

11 How many plans does Alignment offer roughly?

12 MR. KIMBERLY: Your Honor, I had that question  
13 this morning, and I don't know the answer to it.

14 MR. JOYCE: Numerous H contracts or plans?

15 MR. KIMBERLY: Yes.

16 MR. JOYCE: I think we have six contracts.

17 THE COURT: And three are at issue in this case,  
18 as I understand it.

19 MR. KIMBERLY: That is correct. Yes, Your Honor.

20 THE COURT: And what is an H contract?

21 MR. KIMBERLY: H is healthcare as opposed to  
22 drugs.

23 THE COURT: Okay. Got it.

24 MR. KIMBERLY: And the oversampling claim is  
25 relevant with respect to Contract H3815, which is the

1 California HMO.

2 THE COURT: Okay.

3 MR. KIMBERLY: So oversampling concerns the CAHPS  
4 survey. The CAHPS survey requires CMS to sample a minimum  
5 of 800 individual participants within any given contract  
6 unless the plan elects to oversample.

7 Oversampling is a possibility only when the  
8 contract actually has more than 800 individuals and when the  
9 plan is willing to pay for it. The survey that surveys  
10 8,000 people costs roughly ten times what a survey that  
11 costs 800 people will cost.

12 THE COURT: So Alignment had the opportunity to  
13 oversample. It just chose not to.

14 MR. KIMBERLY: That's correct, Your Honor.

15 THE COURT: Okay.

16 MR. KIMBERLY: And most plans do not oversample.

17 So those plans --

18 THE COURT: Well, if, as I take your argument to  
19 be, oversampling can only lead to an enhancement of the  
20 score based on increased statistical validity, then why  
21 would a large plan not choose to sample?

22 MR. KIMBERLY: Well, it's a fair question, Your  
23 Honor. I think it's one concerning general cost-benefit  
24 analysis. I think the scenarios that you've -- that we  
25 demonstrated with respect to 3815 in the briefing are

1 generally unusual where you see a plan that has oversampled  
2 that, in fact, has a lower raw score achieving a higher Star  
3 Rating. So I wouldn't say it's a circumstance in which  
4 oversampling all the time produces higher Star Ratings.  
5 It's really got to be right near a cut point.

6 THE COURT: Can it produce a lower Star Rating, as  
7 the government suggests?

8 MR. KIMBERLY: I think in theory it could, Your  
9 Honor.

10 THE COURT: Okay.

11 MR. KIMBERLY: If you were in a -- if there was an  
12 especially low performing plan, and nothing in our claim  
13 turns on the fact that oversampling always produces an  
14 advantage. I think as a practical matter only larger plans  
15 that are well-performing plans are ones that would engage  
16 strategically in oversampling. So even if not as a logical  
17 matter, as a practical matter it always confers an  
18 advantage.

19 But whether it confers an advantage or  
20 disadvantage, the point is oversampling is not reflective of  
21 plan performance and plan quality. The Star Ratings are  
22 intended to allow plan participants to compare plans and  
23 make a determination whether one plan offered by one  
24 Medicare Advantage organization is higher quality than  
25 another. And the use of oversampling means that some plans

1 will achieve higher Star Ratings giving perspective plan  
2 participants the impression that that plan is higher quality  
3 not because it actually has higher quality, not because it  
4 has actually performed better, but for the entirely  
5 analytically irrelevant reason that it has engaged in  
6 oversampling.

7 So --

8 THE COURT: But if a -- you know, if a baseball  
9 player gets a .350 batting average with a thousand at-bats,  
10 shouldn't I bet on that guy over the guy who gets a .350  
11 average over 200 at-bats?

12 MR. KIMBERLY: I wouldn't -- I guess the question  
13 is --

14 THE COURT: In other words, doesn't the validity  
15 that comes from a greater sample tell you something about  
16 the quality of the measure?

17 MR. KIMBERLY: Your Honor, respectfully, I think  
18 all it tells you is I think that there is more data to draw  
19 from.

20 THE COURT: Isn't that a good thing?

21 MR. KIMBERLY: It may be a good thing from a  
22 statistical point of view. If you're a number-cruncher  
23 working at CMS producing Star Ratings, it isn't necessarily  
24 a good thing, and I think anybody would look at it as  
25 irrelevant.

1 THE COURT: But if I'm betting on that guy to get  
2 a hit or not, I'm going to bet on the guy with the thousand  
3 data points as opposed to 200 data points, aren't I?

4 MR. KIMBERLY: Your Honor, I think that doesn't  
5 necessarily follow. That presumes that the contract that  
6 didn't oversample or, for that matter, did oversample but  
7 didn't oversample by as much is, in fact, performing -- is  
8 likely to perform at a lower level than one that does  
9 oversample. And especially when the raw scores are such  
10 that the one that doesn't oversample has a better raw score,  
11 there is not a reasoned basis that the agency has given for  
12 granting the oversampling contract to higher Star Ratings.

13 THE COURT: Okay. So if a plan had a poor raw  
14 score from the initial 800 sample, could oversampling  
15 confirm that poor score?

16 MR. KIMBERLY: I don't think oversampling could  
17 confirm it one way or the other. I think the idea is CMS  
18 has determined that 800 -- a sample of 800 is sufficient to  
19 derive Star Ratings, and any plan that meets that threshold  
20 is entitled to have the CAHPS scores included within its  
21 Star Rating calculations.

22 THE COURT: Okay.

23 MR. KIMBERLY: And at bottom, Your Honor, I would  
24 offer additionally that these really are not any of the  
25 rationales that the agency has given. The agency has just

1 asserted that oversampling is something that was available  
2 to Alignment; and, therefore, it sort of made its bed and  
3 now it must lie in it. It doesn't explain -- it doesn't  
4 offer a rational explanation as to how oversampling affects  
5 quality such that a plan with a lower raw score that  
6 oversamples should be effectively advertised to the  
7 consuming public as a higher quality plan than one that  
8 doesn't oversample and has a higher raw score.

9 THE COURT: Okay. Ms. Mundy, let me hear from  
10 you.

11 Thanks.

12 MS. MUNDY: I want to start with one point that  
13 Mr. Kimberly made, which is that they did a cost-benefit  
14 analysis here. Those were his words; i.e., Alignment made a  
15 decision that it would not want to sample --

16 THE COURT: I understand that, but why should that  
17 matter? If there is no relationship between or if he's  
18 right that oversampling does not tell me whether a plan is  
19 more reliable or not, or if a plan is performing better or  
20 not, then why does it matter that Alignment didn't see fit  
21 to spend however much money it would require to undertake  
22 the oversampling?

23 MS. MUNDY: Because reliability is important. I  
24 think we -- in the remaining parts and the issues that  
25 Mr. Kimberly raises regarding reliability of different

1 metrics, it is important to know -- and the Star Ratings do  
2 take into account -- whether or not the measure is more  
3 reliable or less reliable.

4 But oversampling is not a guarantee to higher  
5 scores, as Mr. Kimberly agreed; that it's possible to --  
6 that if a plan is low-performing on a particular measure, to  
7 have that -- if that reliability is greater, to have that  
8 low measure score baked in at a greater degree.

9 The Medicare Advantage and the Star Ratings plans  
10 generally are covering all Medicare Advantage plans across  
11 the country. I mean, this is a complicated endeavor by the  
12 agency codified in rule-making subject to many, you know,  
13 public inputs on how best to implement Congress's request  
14 for these Star Ratings. And so CMS was tasked with figuring  
15 out what is the floor. What is the statistical floor of  
16 what is needed for there to be enough reliable information  
17 in most circumstances for most measures, and that's where  
18 the number 800 came up.

19 THE COURT: Okay. Understood. But is a plus  
20 factor assigned for statistical significance above 800  
21 regardless of what the raw score is?

22 In other words, does CMS say because we have a  
23 greater sample, we are going to, you know, enhance the raw  
24 score regardless of what the starting point is?

25 MS. MUNDY: If --

1 THE COURT: Is there an independent benefit to a  
2 larger sample size beyond 800?

3 MS. MUNDY: Well, the reason that CMS gives this  
4 option -- and it is just CMS electing to give this option --  
5 is because plans themselves, when they have these large --  
6 you know, a large amount of beneficiaries on it, might want  
7 for their own benefit -- I mean, they are paying for this  
8 survey. They're doing this work. This is -- you know,  
9 they're getting these inputs from their beneficiaries on  
10 their plan performance.

11 And so that data is then reported to them. They  
12 can use those inputs and the answers to how they're doing on  
13 their survey. And if, for some reason, the plan would like  
14 more information, would elect -- believes that the sample  
15 size should be larger, they're entitled to do that.

16 And like I said, this is just an option CMS gives  
17 plans. It's not a requirement. And to the extent that it  
18 increases the reliability of a certain measure because of  
19 the way that they do significance testing, that can be a  
20 benefit and it can be a detriment.

21 THE COURT: Well, I guess my question is, so let's  
22 say one plan -- one large plan chooses not to sample, so  
23 there are 800 data points that CMS is averaging, right?

24 Another large plan, Plan B, decides to sample, so  
25 CMS now has, say, 2000 data points.

1 MS. MUNDY: Uh-huh.

2 THE COURT: Okay. Are the averages of those two  
3 set data sets just -- they are what they are, or is the plan  
4 that has 2000 points given a plus -- given an independent  
5 benefit because the sample size is larger?

6 MS. MUNDY: So the Star Ratings -- and this is on  
7 Page 17 of our reply, and it cites the administrative  
8 record, Pages 200 to 201. Star Ratings for these measures  
9 do take into account the distribution of where the scores  
10 fall just, you know, like the raw data points --

11 THE COURT: Right.

12 MS. MUNDY: -- the reliability of that score, and  
13 then there's a component about the significance -- whether  
14 the score is significantly different. So that's not  
15 significance testing but whether the score is significantly  
16 different from others.

17 THE COURT: Okay.

18 MS. MUNDY: And so that reliability metric, if you  
19 have more people who answer a certain question, can be  
20 enhanced as a result.

21 THE COURT: Okay. So the answer is yes.

22 MS. MUNDY: Yes.

23 THE COURT: There is an independent benefit or at  
24 least there could be an independent benefit to the --

25 MS. MUNDY: Oversampling can increase the

1 reliability, but that's not a guarantee that it increases  
2 the Star Rating score as a result.

3 THE COURT: Okay.

4 MS. MUNDY: I want to raise one other point with  
5 regards to oversampling, and that's going back to  
6 Alignment's initial complaint as well as their opening  
7 motion for summary judgment, and I'm looking at Count 3 of  
8 their complaint, Paragraphs 152 to 155.

9 In their complaint Alignment contended that they  
10 were unable to oversample, and their complaint was that  
11 oversampling is irrationally biased against smaller plans  
12 with fewer enrollees. They're seeking to invalidate H3815,  
13 a contract with over 91,000 enrollees.

14 Their complaint was about a bias against smaller  
15 plans, but this contract is anything but small. And as  
16 their complaint stands originally, their complaint was that  
17 CMS is acting arbitrarily and capriciously against small  
18 plans, and so our internal response to their brief was this  
19 contract is not small.

20 Alignment has many contracts, including some that  
21 receive five stars under the Star -- including one that  
22 received five stars this past year, one of the very few  
23 plans, Medicare Advantage plans, that did. That contract is  
24 far smaller.

25 THE COURT: So what's the legal significance of

1 that observation? That Alignment has not stated a claim?  
2 Is it a 12(b)(6) issue?

3 MS. MUNDY: The issue here is that what Alignment  
4 alleged was arbitrary and capricious in their complaint was  
5 that this unfairly disadvantages smaller plans. At this  
6 point now they're alleging that oversampling in any way,  
7 when you elect not to use it, is problematic, but that is  
8 not what their complaint --

9 THE COURT: So you're saying it's an improper  
10 amendment --

11 MS. MUNDY: Yes.

12 THE COURT: -- to the complaint by a brief.

13 MS. MUNDY: Yes.

14 So they pivoted in their opposition that now  
15 Alignment chose not to oversample and that CMS should  
16 disregard that choice, but CMS's methodology has always been  
17 to accurately reflect true performance. And there, as we've  
18 already discussed, are reasons why CMS has set the minimum  
19 sample size for 800.

20 And under the arbitrary and capricious standard  
21 CMS has shown -- has explained and provided a rationale for  
22 its belief about, when you're seeing all the Medicare  
23 Advantage plans in the country, the necessity to come up  
24 with a standard that's generally applicable to all plans.  
25 CMS has elected for plans who are, yes, paying for

1       oversampling; that if they want that data for themselves, if  
2       they feel that there's a perceived benefit to oversampling,  
3       including for them to get more information, that they have  
4       that benefit available to them.

5               High performers may benefit -- and we talk about  
6       this in our motion at 34 to 37 -- but low performers may  
7       not. CMS views the methodology as neutral because of the  
8       impact it may have enforcing those low Star Ratings.

9               Alignment's complaint is purely results oriented,  
10       and I think it shows in the fact that they're not asking you  
11       to disregard or to remove significance testing to any of the  
12       other contracts they're challenging today. They're only  
13       asking with regards to this one contract, and they have more  
14       than just the three that are at issue in this litigation.

15               But even amongst the litigation, they're only  
16       asking for this one to remove significance testing. In  
17       essence, they're asking you to carve out, to change the  
18       regulatory framework, for one contract that was unhappy with  
19       that cost-benefit analysis it did and decided that it did  
20       not want to pursue oversampling, and it alleged that it was  
21       harmed by the size of the plan, not the size of the sample,  
22       and is now pivoting to say that it shouldn't be held to  
23       account for its own cost-benefit analysis in figuring out  
24       how to conduct its sample.

25               Thank you.

1 THE COURT: Okay. Mr. Kimberly, why don't you  
2 address the amendment by pleading or amendment by brief  
3 issue first. And then, if you're right that the  
4 oversampling rules are arbitrary and capricious, why  
5 shouldn't that apply to all of your plans?

6 MR. KIMBERLY: So first the question about  
7 amendment by brief. I mean, our position all along, I  
8 think, has just been that oversampling confers an advantage,  
9 and some do it and some don't. And those that do who obtain  
10 the advantage obtain the advantage on the basis of something  
11 having nothing to do with plan quality.

12 So I point the Court, for example, to Paragraph 53  
13 where we allege, for example, the larger number of  
14 respondents a survey receives -- that's a question about the  
15 size of the survey, not the size of the plan -- the greater  
16 the significance CMS will assign to the contract's measure  
17 level mean score. In this way the allowance of oversampling  
18 confers substantial advantage on larger contracts.

19 That's a true statement. It's consistent with the  
20 theory that we have briefed, which confirms -- which very  
21 expressly states that what oversampling does is confer  
22 advantages on plans that are able and choose to engage in  
23 oversampling. There's, to my understanding, no notice --  
24 lack of notice on what the theory of our arbitrary and  
25 capricious claim on oversampling is.

1 THE COURT: Okay.

2 MR. KIMBERLY: I would say on the scope of relief,  
3 Your Honor, we have identified only one contract as to which  
4 this made a difference, and that's Contract 3815. We have  
5 no objection -- in our view, we don't have standing to  
6 require CMS to recalculate without observance of  
7 oversampling as to contracts that are not Alignment's or as  
8 to contracts that are not injured by oversampling, so we've  
9 focused on 38 --

10 THE COURT: Isn't the remedy to an arbitrary and  
11 capricious rule the vacatur of that rule?

12 MR. KIMBERLY: Well, I --

13 THE COURT: And wouldn't the vacatur apply across  
14 the board?

15 MR. KIMBERLY: It could, Your Honor, although I --  
16 my understanding, and certainly the way that we've intended  
17 to bring this claim, is as a challenge to the Star Rating  
18 itself. The Star Rating is a final agency action, and it's  
19 an applied example of this oversampling methodology.

20 THE COURT: Okay.

21 MR. KIMBERLY: So I think -- and this is the way  
22 we've seen the other Star Ratings cases go.

23 THE COURT: So it's an adjudication in a sense.

24 MR. KIMBERLY: That's one way to think of it, yes,  
25 I think so. And it's obviously --

1 THE COURT: I know there are a lot of these cases  
2 floating around. I have another one where the briefing has  
3 just been -- has just gotten ripe, and this is the only one  
4 that I've encountered. So I know that there are others, but  
5 this is my first rodeo.

6 MR. KIMBERLY: Well, in these other cases, I can  
7 represent to you, Your Honor, that the Courts have generally  
8 been vacating the Star Ratings and remanding to the agency  
9 for recalculation in a manner consistent with the illegality  
10 that the Court holds.

11 THE COURT: Got it.

12 All right. Why don't we move to the Erroneous  
13 Appeal No. 1.

14 MR. KIMBERLY: Okay, sure.

15 So, Your Honor, this is the mishandling of appeal  
16 case number ending in 2526 by Maximus, which is, as you  
17 know, a private for-profit entity to which the agency has  
18 delegated decision-making authority.

19 THE COURT: Right.

20 MR. KIMBERLY: Underlying this particular issue,  
21 Alignment dismissed a plan level request for reconsideration  
22 because it didn't include what's called a waiver of  
23 liability. And that's --

24 THE COURT: So if it had not been a dismissal, if  
25 it had been an affirmance of the denial --

1 MR. KIMBERLY: On the merits, correct.

2 THE COURT: -- you would agree, I take it, that  
3 the referral was late. But your position is because it was  
4 a dismissal, there was no obligation to refer the dismissal  
5 to CMS; so, therefore, there was no deadline in place, and,  
6 therefore, it could not have been late.

7 MR. KIMBERLY: I think that's right, Your Honor.

8 There are two relevant deadlines within this  
9 regulatory scheme. The first is the deadline for an  
10 aggrieved party to file a request for reconsideration. And  
11 the second is the deadline for the plan, independent of such  
12 a request, automatically to forward the matter to Maximus.

13 THE COURT: Yes.

14 MR. KIMBERLY: Here, because it was a dismissal,  
15 this is not a case covered by 422.590(b)(2). Rather, it's  
16 governed by 422.590(i). And so this is not a circumstance  
17 in which the -- in which Alignment was required to forward,  
18 without awaiting a request for reconsideration, the matter  
19 to Maximus. The fact that it did so anyway doesn't excuse  
20 Maximus's failure to deal with the case appropriately  
21 according to the applicable regulations.

22 So if I can just walk through those regulations, I  
23 think it would be helpful.

24 THE COURT: Sure.

25 MR. KIMBERLY: 422.592(d)(2) requires Maximus to

1 dismiss when it determines, quote, the party failed to make  
2 out a valid request for a reconsideration in writing by the  
3 appointed deadline. Here no party made a request for  
4 reconsideration at all. Requests for reviews of dismissals,  
5 as I mentioned, are covered by 422.590(i).

6 Now, CMS's position is that Maximus was correct to  
7 treat the appeal as if it were an affirmance on the merits,  
8 which would have required automatic forwarding under  
9 590(b)(2) because Maximus just did, as a matter of fact,  
10 forward it without awaiting a reconsideration request.

11 But the fact that Alignment forwarded it does not  
12 change the nature of the case. The case was a dismissal.  
13 It's covered by 590(i) and not 590(b)(2), and therefore it  
14 was a dismissal subject to review, if at all, only by  
15 election of the provider or the independent beneficiary  
16 under 422.582(i). And because there was no such request,  
17 there was no obligation to forward it. Because there was no  
18 obligation to forward it, the forwarding could not have been  
19 untimely under a provision that simply does not apply.

20 THE COURT: Okay. Ms. Mundy.

21 MS. MUNDY: When Alignment decided to forward the  
22 case to Maximus, it did so putting it into the posture that  
23 it was not a dismissal, because if it was a notice of  
24 dismissal, it would not have -- it would have sent the  
25 notice back to the complaining party and not to Maximus. So

1 Maximus --

2 THE COURT: But, in fact, it was a dismissal. Do  
3 you disagree with that?

4 MS. MUNDY: I do not disagree with that.

5 THE COURT: Okay. So --

6 MS. MUNDY: But the posture in which -- that  
7 Alignment sent it to Maximus, Maximus treated it as a  
8 decision on the merits, affirmed --

9 THE COURT: But it was erroneously forwarded as an  
10 affirmance on the merits --

11 MS. MUNDY: Right, it was forwarded --

12 THE COURT: -- when, in fact, it was something  
13 else.

14 MS. MUNDY: It was forwarded as an affirmance on  
15 the merits. So that is how Maximus adjudged it. It agreed  
16 with Alignment's decision, but the ding that Alignment got,  
17 the mark, was because of the timing. So Maximus looked at  
18 the file, agreed that Maximus was not required to -- you  
19 know, to pay that amount of money, but it held Alignment to  
20 account because Alignment believed it was supposed to have  
21 forwarded the file. It forwarded it because it would only  
22 forward something that you're receiving -- that -- a  
23 decision on the merits, and so that is how Maximus reviewed  
24 it.

25 THE COURT: But it erroneously agreed or

1 erroneously determined that it needed to forward the file as  
2 an affirmance on the merits when, in fact, it was a  
3 dismissal. So if -- you know, let's put substance over  
4 form. If the purpose of the Star Ratings is to assess, you  
5 know, plan performance and reliability, et cetera, at the  
6 end of the day this was a dismissal that did not require a  
7 referral.

8 MS. MUNDY: Sure. But if Align --

9 THE COURT: Why should -- you know, I understand  
10 how CMS treated it, but why should the plan be dinged for a  
11 deadline that really wasn't operative?

12 MS. MUNDY: Because Alignment had put itself into  
13 the posture of believing that this was something that needed  
14 to be forwarded, and this measure --

15 THE COURT: But the mistake that it made was  
16 misclassifying what was being forwarded, not really the  
17 timing of the forwarding. Isn't that fair?

18 MS. MUNDY: I think that the issue, as CMS sees  
19 it, and the reason that it impacts its Star Ratings is  
20 because Alignment, maybe for erroneous reasons, believed it  
21 was required to forward this file, but then if it believed  
22 it was required to file -- forward the file, then what --  
23 it's supposed to have done so within a certain amount of  
24 time. And so this measure is saying whether Alignment  
25 provides the information in a timely manner to Maximus.

1           And so Maximus reviewed this as a decision on the  
2 merits. Maximus did not review this as a decision of a  
3 dismissal because that's not something that Maximus would  
4 review in this instance and in this posture.

5           THE COURT: Okay. But if I'm -- if I believe that  
6 I'm required to file a tax return by April 15th, and I fail  
7 to do so, I can't be held liable for missing that deadline  
8 if, in fact, I was not required to file that return by April  
9 15th.

10           MS. MUNDY: Well, I think if you believed you were  
11 required to file a D.C. tax return and instead you were  
12 supposed to file a Maryland one, but in that D.C. tax return  
13 you certified to something that was untrue or you did  
14 something, then there could still be consequences that  
15 attach to an erroneous filing.

16           THE COURT: Okay.

17           MS. MUNDY: You know, if you -- I mean, this is in  
18 this hypothetical. You certified something. You certified  
19 an income, and they later found that you had misrepresented  
20 that, then you -- you know, that would carry with it some  
21 weight.

22           So here the thing that they're getting in trouble  
23 for is the timing issue. They put it in that posture before  
24 the independent review entity.

25           THE COURT: Okay.

1 Mr. Kimberly.

2 MR. KIMBERLY: Thank you, Your Honor.

3 My friend on the other side asserted that  
4 Alignment believed that this was a merits decision and had  
5 to be filed. I mean, it's also possible there was just a  
6 mistake. You know, mistakes happen. And the fact is, when  
7 a procedural error like this is made, it doesn't convert the  
8 underlying substance of the matter from dismissal into a  
9 merits decision.

10 THE COURT: Okay. I've heard enough on that one.

11 MR. KIMBERLY: Okay, great.

12 THE COURT: Where do you want to go from here?

13 MR. KIMBERLY: If you wouldn't mind, Your Honor,  
14 I'd like to touch on the Spanish language administration  
15 error.

16 THE COURT: Sure.

17 MR. KIMBERLY: And I'll note, Your Honor, that  
18 this has some overlap with the oversampling claim as a  
19 question of remedy. We have raised -- it appears in the  
20 dicta deduced by CMA that the over -- excuse me, that the  
21 Spanish language administration error impacted contracts  
22 H3443 and H3815. Our position is that if the Court were to  
23 rule in our favor on this point, the appropriate remedy  
24 would be a remand without consideration of the CAHPS survey  
25 data that's affected by this administration error, and if

1 the Court granted that relief, then it would subsume relief  
2 on the oversampling claim as well --

3 THE COURT: Okay.

4 MR. KIMBERLY: -- which concerns Contract H3815.

5 So the Spanish language administration error  
6 concerns the provision of the CAHPS surveys to the CMS  
7 selected samples of respondents in the language indicated by  
8 Alignment in the data that it provided to the CMS survey  
9 administrator.

10 On Page JA203 -- this is Administrative Record  
11 Page 172 -- the agency directs administrators, these third-  
12 party administrators of the CAHPS surveys, to make foreign  
13 language survey materials available to respondents in the  
14 manner requested by the plan. There's no debate here that  
15 Alignment requested the provision of only Spanish language  
16 surveys to it was 200 designated Spanish speakers.

17 THE COURT: 10 percent.

18 MR. KIMBERLY: 10 percent for 3815, 15 percent for  
19 3443.

20 THE COURT: Okay.

21 MR. KIMBERLY: Each contract had roughly 200  
22 designated Spanish speakers.

23 THE COURT: Okay.

24 MR. KIMBERLY: And what the data show, Your Honor,  
25 is that this has a negative impact on the CAHPS survey

1 results. We know this for three reasons.

2 One, CMS itself directs plans to consider the  
3 impact that providing surveys affirmatively in the language  
4 of the recipient has on survey responses, and it  
5 acknowledges that survey responses go up. And it makes  
6 sense. If you send Spanish language materials to Spanish  
7 speakers, the response rates will go up.

8 THE COURT: Okay. But in the English survey --  
9 English language surveys that some of the participants  
10 received, there was an instruction saying if you would like  
11 a Spanish survey, you can request one, right?

12 MR. KIMBERLY: So, Your Honor, I guess I didn't  
13 see that in the --

14 THE COURT: Okay.

15 MR. KIMBERLY: That's an option. That's one of  
16 the options that the survey vendor can execute to satisfy  
17 the requirements of the protocol. But, again, when the --  
18 that is a breach of the protocol. That is a breach of CMS's  
19 rules for the vendor to send an English language survey with  
20 a Spanish survey prompt to request a Spanish language  
21 survey, if they want --

22 THE COURT: Okay. I guess the bottom line here  
23 is, you know, admittedly it was -- it was Alignment's  
24 mistake or miscommunication with its survey provider or  
25 perhaps the survey provider's mistake, but once CMS became

1 aware of it, what else were they supposed to do besides, you  
2 know, assess whether the provision of the survey complied  
3 with their regulations, which they say that it did?

4 You know, what regulation or authority is there  
5 for your position, as I take it, that they should have  
6 thrown out those surveys even though it was not their fault  
7 that the surveys were sent in English rather than Spanish?

8 MR. KIMBERLY: Yes, so I don't think it's a  
9 question of fault one way or the other, and I certainly  
10 would say that it wasn't Alignment's fault. The data  
11 provided under the Court's protective order confirms that  
12 Alignment indicated who was to receive Spanish language  
13 surveys. It was DataStat, the survey administrator, who  
14 failed to provide Spanish language surveys to those total of  
15 49 individuals.

16 THE COURT: But it's the provider -- it's the  
17 plan's responsibility to select the survey administrator and  
18 to then direct the survey administrator as to what language  
19 the survey should be in regardless of whose mistake it was.  
20 That's not -- CMS is not involved in that process. Fair  
21 enough?

22 MR. KIMBERLY: Well, CMS used to be involved in  
23 this process. They used to administer the survey up until  
24 2010. In 2011 they outsourced it.

25 But they have a list of CMS-approved survey

1 vendors who contract with CMS and agree to follow CMS's  
2 protocols.

3 THE COURT: Okay. So that's my question. Is  
4 there a CMS protocol or rule that otherwise would require  
5 CMS to throw out those surveys once an error was detected?

6 MR. KIMBERLY: So I think -- I think the question  
7 there is just the APA.

8 THE COURT: Okay.

9 MR. KIMBERLY: So you've got a set of rules for  
10 how this survey is supposed to be administered. When the  
11 survey is not -- and across the board for, you know, the  
12 great majority of plans the survey is administered  
13 consistent with those stated protocols and requirements.

14 THE COURT: Okay. So the claim is an arbitrary  
15 and capricious claim. It's not a contrary to regulation or  
16 contrary to law claim.

17 MR. KIMBERLY: Well, right, because the protocols  
18 are subregulatory --

19 THE COURT: Okay.

20 MR. KIMBERLY: -- so that the issue is that the  
21 agency is treating -- through its third-party administrator  
22 is treating Alignment differently by not enforcing these  
23 protocols for administration of the CAHPS surveys for these  
24 two contracts.

25 THE COURT: Well, but, again, what protocol did

1 failure to throw out the erroneously dispatched English  
2 surveys --

3 MR. KIMBERLY: Right.

4 THE COURT: What protocol did that violate and  
5 how?

6 MR. KIMBERLY: So the protocol that was violated  
7 is the instructions concerning administration of survey and  
8 other languages on JA203. And our position is that -- I  
9 don't -- you know, I'll be interested to hear what my friend  
10 on the other side has to say about this, but I don't take  
11 their brief actually ever to deny that the survey was not  
12 administered consistent with this protocol. I understand  
13 them to come up with some explanations why it may have  
14 happened, but, again, it's not a process question.

15 The why doesn't matter. The point is the survey  
16 was not administered consistent with the protocol.

17 CMS all the time calculates Star Ratings for  
18 contracts without consideration of the CAHPS surveys. If  
19 the CAHPS survey doesn't reach a sufficient number of  
20 enrollees, they will not require a CAHPS survey. If there  
21 are other systemic problems with the CAHPS survey, they will  
22 disqualify it and not count it in the Star Ratings.

23 So the agency has a practice, when it is  
24 warranted, of not counting the CAHPS measures when there are  
25 problems with -- systemic problems with the CAHPS survey

1 that make its conclusion in a plan's Star Ratings  
2 inappropriate.

3 THE COURT: And I want to ask your colleague about  
4 this, but the government says that it did at least some  
5 degree of work to validate that.

6 MR. KIMBERLY: Right.

7 THE COURT: The responses were appropriate or  
8 valid, in other words. Why didn't the agency's validation  
9 procedures, whatever they were, why weren't those  
10 sufficient?

11 MR. KIMBERLY: So there are two answers to this.

12 THE COURT: Okay.

13 MR. KIMBERLY: The first, and I think most direct,  
14 is, again, this is not a procedural claim. We're not saying  
15 that CMS dropped the ball on procedure here. We're saying,  
16 look, we've seen the data now. Alignment's not allowed to  
17 see this data.

18 THE COURT: Okay.

19 MR. KIMBERLY: CMS and the survey vendor have and  
20 see the data, and they alone can confirm whether or not the  
21 concern about this error had taken place.

22 THE COURT: Okay.

23 MR. KIMBERLY: So all Alignment could do is raise  
24 it to CMS --

25 THE COURT: Okay.

1 MR. KIMBERLY: -- and wait for CMS to confirm  
2 whether or not its concern was true.

3 The question here is simply, now that we have  
4 shown that the concern was true, what's the remedy? If CMS  
5 had confirmed using the survey response --

6 THE COURT: I'm a little confused. Is the concern  
7 that CMS addressed the fact that 10 percent of the surveys  
8 were erroneously sent out in English, or was the concern  
9 that CMS addressed that the survey responses were valid or  
10 invalid because of the language barriers?

11 MR. KIMBERLY: No.

12 THE COURT: Did they look at the surveys and say  
13 -- the survey responses and say, no, you know, these look  
14 fine to us?

15 MR. KIMBERLY: So my understanding is they reached  
16 out to DataStat and they said, "Hey, did you follow the  
17 rules?"

18 THE COURT: Right.

19 MR. KIMBERLY: And DataStat said, "Yeah, we  
20 followed the rules."

21 THE COURT: Okay.

22 MR. KIMBERLY: And then they looked at the results  
23 at a general level and said, "These results fall generally  
24 within the range of results that we would expect. They  
25 don't look too whacky to us."

1 THE COURT: Okay.

2 MR. KIMBERLY: "So we are not doing any further  
3 investigation. We find your concern unfounded, and we  
4 shall, therefore, count the CAHPS survey for these two  
5 contracts."

6 THE COURT: Okay. You know, under the APA why  
7 isn't that a sufficient -- whether you agree or disagree --

8 MR. KIMBERLY: Right.

9 THE COURT: -- with their conclusions, why isn't  
10 that a sufficiently, you know, hard look at the issue?

11 MR. KIMBERLY: Because, again, this is not a  
12 procedural claim. This is a claim that the Star Ratings are  
13 based on CAHPS survey results that are obtained inconsistent  
14 with the protocols that were supposed to be followed.

15 I mean, you can imagine --

16 THE COURT: But that's true of the, you know,  
17 responses to many of these survey questions whether they're  
18 in Spanish or English. You know, the CMS looks at them and  
19 says these are valid or not. They're reliable or not. And  
20 there are different considerations that go into making those  
21 determinations.

22 Why isn't it the same here?

23 MR. KIMBERLY: Well, Your Honor, I think the point  
24 is that the only way, meaningfully, to confirm whether or  
25 not this concern was true was to look at what's called the

1 survey response data file, and this is referenced at JA198  
2 to 199. This is the file that Alignment is forbidden from  
3 reviewing.

4 Our point fundamentally is that it's not an answer  
5 to a substantive administration error that Alignment brought  
6 to the agency's attention for the agency to take a look but  
7 not take -- but not actually confirm whether or not the  
8 error actually took place.

9 Essentially what they did is they looked at it and  
10 they said -- this isn't the language they used but in  
11 substance it's what they said: It's unlikely that this  
12 actually happened. We looked at the data, and it's unlikely  
13 that this happened, so we're not going to look any further  
14 at this.

15 But the fact is the error did happen, and, if the  
16 agency had uncovered the error in the plan preview period,  
17 it would not have counted the CAHPS survey.

18 THE COURT: Okay.

19 MR. KIMBERLY: Thank you.

20 THE COURT: Ms. Mundy.

21 MS. MUNDY: There's quite a few things I'd like to  
22 address from my colleague.

23 The first is I'd like to talk about what the  
24 guidelines actually require, CMS's guidelines, and this is  
25 the cited page of the Administrative Record 174 or the Joint

1 Appendix 205. I'm sorry. That's 172, Joint Appendix 203.

2 The requirement for Spanish language  
3 questionnaires is this. Spanish language questionnaires  
4 must be made available to all Spanish-speaking enrollees in  
5 web, mail, and telephone administration. That's the  
6 requirement. They must be made available.

7 Alignment has not and cannot show that the Spanish  
8 language questionnaires were not made available, and that is  
9 because there are multiple ways for an individual even if  
10 the DataStat messed up, even if there was a perfect ability  
11 to match Alignment's data that it provided to DataStat to  
12 the survey sample. And let's say they got these 20 ones  
13 wrong -- which we're not agreeing they did, but just  
14 engaging in this hypothetical -- CMS only requires that the  
15 Spanish language questionnaires are made available. There  
16 is no evidence in the record that they were not made  
17 available to those individuals.

18 THE COURT: All right.

19 MS. MUNDY: Then there was a --

20 THE COURT: Okay. Let's stop there. There is  
21 evidence in the record that Alignment informed CMS that its  
22 vendor mistakenly sent English language surveys to folks who  
23 should have received Spanish language surveys. That's in  
24 the record.

25 MS. MUNDY: No, it's they're -- what's in the

1 record is their belief it happened. And the reason that's  
2 important is because when CMS corresponded with DataStat to  
3 understand -- and this was talked about in the brief.

4 CMS pulls the survey sample. They send it to the  
5 vendor. Alignment is not entitled to know who that sample  
6 is.

7 So what Alignment can do, if it wants to use its  
8 own files about who might be a Spanish speaker -- or there's  
9 other optional languages, but obviously for this purpose  
10 it's Spanish -- what they can do is they can provide a data  
11 file to the survey vendor. The vendor then must endeavor to  
12 match the records.

13 This is imperfect, and DataStat explains -- and  
14 the administrative record at AR1194 to '95 explains  
15 DataStat's process. If there's an address issue, if a name  
16 is incorrect, if there's a reason that DataStat believes it  
17 can't make a perfect match, it then can go back to the  
18 default as if this was a person designated as an English  
19 speaker.

20 And this is important also because what happens  
21 when there is this prenotification letter? Even if the  
22 contract has requested the use of any of the optional  
23 questionnaire translations -- and I'm reading from Page 173  
24 -- the vendors must mail a prenotification letter to all  
25 sampled enrollees in any of the 50 U.S. states or the

1 District of Columbia that is printed with English on one  
2 side and Spanish on the other side. That is to say that it  
3 is not as if even though Alignment provided this data, that  
4 there wasn't a notification of -- the prenotification letter  
5 didn't also get printed in Spanish.

6 And that the fact that this was in contention was  
7 raised in plaintiff's motion for a hearing in which we -- it  
8 contained substantive arguments that we did not get a chance  
9 to respond to, and so I've printed out, because I don't  
10 believe this is part of the Joint Appendix, the  
11 Administrative Record beginning at 403 to 450. And I have  
12 three copies here, which is the sample appendices from that  
13 guide about what the prenotification letter looks like to  
14 show that there's an English translation.

15 And even on the English side there's a line in  
16 Spanish about how to request it. But then, again, that  
17 prenotification letter must be also in Spanish even if one  
18 of those optional translations is -- or those optional  
19 methods.

20 And I say "optional" and am emphasizing "optional"  
21 because there is no word "must" for using these optional  
22 procedures. There's nothing in the technical guidance that  
23 suggests that there is a clear error if DataStat does not --  
24 or the survey vendor, whoever they may be; here, DataStat --  
25 does not do what Alignment asks them to do. It says survey

1 vendors may do any of the following at the request of the  
2 contract.

3 The only "must" in this whole section of technical  
4 guidance with regard to the Spanish language questionnaires  
5 is that they must be made available.

6 THE COURT: Okay. You can hand that up, if you'd  
7 like.

8 MS. MUNDY: So CMS --

9 THE COURT: Hand it to her, okay.

10 MS. MUNDY: And the explanation as to how they are  
11 used is on AR0173, which is that Joint Appendix. There's a  
12 section called "Mailing the Prenotification Letter."  
13 There's a section about whether -- what you do when they've  
14 not requested any of the optional methods, and then there's  
15 a section "if the contract has requested," which is the part  
16 I read from.

17 In addition, there's other ways that they get  
18 contacted about the survey, not just -- you know, there's  
19 the web. If they don't complete it, they get a telephone  
20 call. In each of those instances a beneficiary's able to  
21 select the Spanish translation.

22 So let's say they don't respond to the English.  
23 Maybe there's a -- you know, the person doesn't see the  
24 Spanish translation at the bottom or doesn't flip the page  
25 and see the Spanish translation on the back. When they get

1 that email link, it will have that language there, too.  
2 When they click the URL, it will go to the Spanish  
3 translation.

4 THE COURT: Okay. Okay. That was all in your  
5 briefs.

6 Let me ask you this. When Alignment raised the  
7 concern or the possibility that the vendor, you know, sent  
8 out surveys in the wrong language, what did CMS do in  
9 response to those to alleviate those concerns or to address  
10 those concerns?

11 MS. MUNDY: Sure.

12 THE COURT: Okay. Did it just investigate whether  
13 the vendor followed CMS's protocols for administering the  
14 survey, or did it go beyond that and somehow look at the  
15 data sets or the survey results that were returned by that  
16 cohort of people to assess the reliability and validity of  
17 those results?

18 MS. MUNDY: I think that they went beyond that.

19 THE COURT: Okay.

20 MS. MUNDY: So first they confirmed --

21 THE COURT: Did they do both of those things; and  
22 if so, how did they do the second? That's what I'm most  
23 concerned about.

24 MS. MUNDY: Sure. So the first thing they did is  
25 they discussed the issue with DataStat, and DataStat

1 confirmed. And I think the idea that -- we're talking about  
2 a group of 200; 188 people from the one contract, and then I  
3 know it's out of 201 for the other. Those individuals  
4 received the Spanish survey at Alignment's request. So CMS  
5 and even Alignment agrees that there is -- that there's  
6 clear evidence that Alignment used the data file. Alignment  
7 -- when CMS discussed the issue with DataStat, DataStat  
8 explained the matching process.

9 THE COURT: When you say "used the data file,"  
10 what exactly does that mean?

11 MS. MUNDY: Sorry. So there's three kinds of  
12 things that are happening at the same time.

13 THE COURT: Okay.

14 MS. MUNDY: CMS selects the sample. It sends it  
15 to DataStat.

16 If DataStat --

17 THE COURT: The sample of participants.

18 MS. MUNDY: Yes, so the 800 enrollees here.

19 THE COURT: Got it.

20 MS. MUNDY: So once they select those 800  
21 enrollees, that gets sent to DataStat. Alignment is not  
22 entitled to know who this sample is, so they send a file to  
23 DataStat of all -- and let's say it's for H3815 -- 91,000  
24 individuals, and they have, you know, their name, their  
25 address, some -- whatever the identifiable information is

1 that they need to provide.

2 THE COURT: Right.

3 MS. MUNDY: And they will have it marked. You  
4 know, we'd like this person to get the Spanish materials at  
5 first -- without the English, just the Spanish only, if  
6 that's their request. DataStat then is required to do a  
7 process of matching.

8 So CMS also has its own Spanish flags. It's  
9 usually not as robust as a plan who interacts with an  
10 individual on a more frequent basis. So they have the CMS  
11 data. They have Alignment's data. Then they're attempting  
12 to do that match.

13 If there's a reason that they can't do the match,  
14 the survey vendor is entitled to say we can send this in  
15 English knowing that there's the options all along for the  
16 optional surveys.

17 THE COURT: Understood, okay.

18 MS. MUNDY: So CMS reached out to DataStat to  
19 understand did you actually use the preferences that the  
20 plan provided for you. Yes, they confirmed they did.

21 They did an independent statistical analysis of  
22 the sampling to make sure that the sample CMS pulled was a  
23 sample that represented the likely Spanish speakers to make  
24 sure that that was a valid component. They confirmed it  
25 did. Then they evaluated separately the response patterns.

1 THE COURT: Okay.

2 MS. MUNDY: That's the information CMS has access  
3 to. CMS does not have -- they're not part of that  
4 contractual relationship between Alignment --

5 THE COURT: So in plain English, what does it mean  
6 to evaluate the response patterns?

7 MS. MUNDY: So they're looking at how many people  
8 responded using the Spanish survey, how many people  
9 responded -- some people who even are marked as Spanish  
10 speaking still respond in English. They might be a  
11 bilingual household. They might elect to respond in  
12 English. And they evaluated whether the patterns fall  
13 within the normal range of what they would expect for  
14 Spanish speakers.

15 Remember what their requirement is; that the  
16 Spanish surveys must be made available. So while --

17 THE COURT: Okay. Let me -- so that I understand  
18 it, you did not say that CMS actually looked at the  
19 responses from the enrollees who Alignment said received the  
20 wrong language survey. Do they go to -- do they go to the  
21 response level and say, "Do these make sense?"

22 MS. MUNDY: On what basis would CMS adjudge  
23 whether someone filled out the survey or didn't fill out the  
24 survey? People elect not to do surveys all the time.

25 THE COURT: Understood. But when they fill out

1 the survey, they ask questions. They ask questions about,  
2 you know, customer service.

3 MS. MUNDY: Uh-huh.

4 THE COURT: They ask questions about how easy it  
5 was to make an appointment.

6 MS. MUNDY: Right.

7 THE COURT: And if someone is responding to a  
8 survey in a -- you know, in a second language, one might  
9 wonder whether the survey responses make sense. Did they  
10 check the boxes? Did they write a narrative?

11 I don't know. I don't have a survey. I don't  
12 know what it looks like.

13 MS. MUNDY: Well, the surveys are like did you  
14 receive care in the last six months and the amount of time  
15 -- you know, when you requested an appointment, did you get  
16 the appointment in a reasonable amount of time? Yes or no.

17 THE COURT: Okay.

18 MS. MUNDY: So I'm not sure how CMS would go  
19 behind that and say that this person was incorrect in saying  
20 that they did receive care in the right amount of time, or  
21 no, it was too long of a wait or something like that.

22 THE COURT: Okay.

23 MS. MUNDY: And I think that's also whether  
24 someone responded to the survey and also whether they chose  
25 to respond in English or Spanish even if Spanish were

1 presented, because that's still an option for them. I don't  
2 think it's CMS's place or I don't think CMS has the ability  
3 to then say this person should have responded in Spanish  
4 because they're a Spanish speaking household.

5 THE COURT: Yes, okay.

6 MS. MUNDY: I just -- they did verify that the  
7 Spanish language surveys were available and administered to  
8 protocol.

9 And I know that Alignment says that they use words  
10 like the concern was true, but CMS does not agree that the  
11 surveys were not made available. CMS doesn't even assert,  
12 if 20 people received the survey initially in English  
13 despite the request, that that was an error because there  
14 are issues with matching.

15 But even assuming that DataStat made that error,  
16 even assuming that DataStat had enough information to do the  
17 match and that it wasn't just part of the normal process of  
18 reconciling the files, that doesn't mean that the surveys  
19 weren't made available to them. It means that they weren't  
20 sent a Spanish survey initially.

21 THE COURT: Got it.

22 MS. MUNDY: They would have received that double-  
23 sided letter.

24 THE COURT: Okay.

25 MS. MUNDY: CMS engaged with Alignment throughout.

1 And I know that at this time they're saying this wasn't a  
2 process-based complaint, but I think that their briefing and  
3 their complaint speak to CMS inaction.

4 CMS is administering these surveys on a tight time  
5 frame for any Medicare Advantage plan in this country. They  
6 do this plan preview process, and I think that the  
7 administrative record on all of the issues show that  
8 Alignment -- I mean, that CMS has taken Alignment's  
9 concerns, run them to the appropriate people that need to  
10 weigh in on this, getting answers, providing those answers  
11 in email to each one of Alignment's concerns, explaining the  
12 steps it took, explaining the conclusions that it drew. And  
13 I understand that Alignment disagrees with the conclusions  
14 that CMS made, but under the Administrative Procedure Act  
15 that's not enough.

16 The question in these cases of tremendous  
17 complexity with the Medicare statute is when we give  
18 deference to the Secretary's decision -- and that's *District*  
19 *Hospital Partners v. Burwell* -- the relevant question is not  
20 whether the agency's policy is the best or the only  
21 solution, but whether it is a reasonable one. And that's  
22 *Petal Gas Storage L.L.C. v. FERC*, a D.C. Circuit case from  
23 2007.

24 Under the *Motor Vehicle* standard where the agency  
25 must examine the relevant data and articulate the

1 satisfactory explanation, including that rational connection  
2 between the facts found and the choices made, to me there's  
3 no doubt that CMS heard these concerns, conducted its own  
4 investigation about whether the data should be included, and  
5 determined in this case it should.

6 And I think Mr. Kimberly's right, that CMS has  
7 this authority, has the ability to oversee these Star  
8 Ratings, and it does make changes to the Star Ratings based  
9 on the feedback that it gets in this plan preview process.  
10 It encourages this back-and-forth because it wants to get it  
11 right. And, in fact, in the administrative record you see  
12 multiple references of "Thank you for bringing this to our  
13 attention. We want to look at this again. We want to make  
14 sure it's right during the second plan preview."

15 THE COURT: Okay.

16 MS. MUNDY: And CMS did so here.

17 THE COURT: Okay. Thank you. I'm going to move  
18 things along.

19 Next issue, Mr. Kimberly.

20 MR. KIMBERLY: Thank you, Your Honor. If I may  
21 just very briefly note that the nature of our claim --

22 THE COURT: It's your own time that you're taking  
23 up.

24 MR. KIMBERLY: So I'll make this super quick.

25 THE COURT: I'll leave it to you to prioritize.

1 MR. KIMBERLY: The nature of our claim is look at  
2 this letter that's supposed to have the Spanish language at  
3 the bottom, and now imagine that the survey administrator  
4 just didn't include the Spanish language prompt at the  
5 bottom. Just didn't follow the protocol, didn't follow the  
6 rules. In that scenario, the survey vendor would not have  
7 done his job, and the survey data resulting would be  
8 affected by a protocol error.

9 THE COURT: Okay. Is there any evidence in the  
10 record that the actual survey results, the surveys that were  
11 returned, are not accurate because of the language issue?

12 MR. KIMBERLY: Well --

13 THE COURT: You have no way to know that, right?

14 MR. KIMBERLY: Well, I think what it shows is that  
15 -- what the data shows is unequivocally enrollees who were  
16 supposed to receive Spanish language didn't receive Spanish  
17 language. They received English language. And therefore  
18 their response rates went way down, and they responded less  
19 favorably. That's what Alignment's data shows and its  
20 comments to CMS suggested.

21 THE COURT: Okay.

22 MR. KIMBERLY: Your Honor, if I may, I'll touch  
23 briefly, I think, on, you know, one of the bigger issues in  
24 this case, which is the nondelegation issue.

25 THE COURT: Yes.

1 MR. KIMBERLY: I'll note that the Eastern District  
2 of Texas in the *United Healthcare* case under a closely  
3 related scenario recently found that the agency violated the  
4 nondelegation doctrine.

5 Here the scenario's a little different because we  
6 have Congress directing CMS to involve an independent review  
7 entity. Now, I think right away the trick here is that  
8 adjective "independent." It tells you that this is not an  
9 entity that is subject to review and supervision by the  
10 agency. This is 1395w-22(g)(4).

11 Now, the D.C. Circuit just last year held in  
12 *Alpine Securities* that, quote, for a delegation of  
13 government authority to a private entity to be  
14 constitutional, the private entity must act only as an aid  
15 to an accountable government agency that retains ultimate  
16 authority to approve, disapprove, or modify the private  
17 entity's actions and decisions.

18 THE COURT: Okay. So you're telling me that CMS  
19 does not have the authority to modify a finding by Maximus.

20 MR. KIMBERLY: That's correct, at both levels. At  
21 both the level of a decision where the claim is at issue and  
22 at the level where the plan is challenging a Maximus  
23 decision during the plan preview period under the Star  
24 Rating system. And we know this from 1395w-22(g)(5) and 42  
25 CFR 422.592(i). Both say decisions by the independent

1 review entity are final and binding, and they are not  
2 subject to review under Section 405B of the Social Security  
3 Act. They are not otherwise subject to reconsideration by  
4 the agency.

5 There is no supervision at all. It is a disavowal  
6 of supervision, in fact.

7 THE COURT: Well, there is email correspondence in  
8 the record where you are writing to CMS challenging  
9 Maximus's findings --

10 MR. KIMBERLY: Right.

11 THE COURT: -- in several respects, so what was  
12 the purpose of that correspondence if not to encourage or  
13 request that the CMS take action with respect to Maximus?

14 MR. KIMBERLY: Well, and that is certainly what  
15 Alignment did, but I think what JA12 and JA3 both show is  
16 that all CMS did was, in its word, send on the objection to  
17 Maximus, and all Maximus did was look at it and say, "No, we  
18 got it right the first time," and CMS did not exercise any  
19 supervision over that decision. It just reported it back to  
20 Alignment.

21 THE COURT: Whether it exercised supervision or  
22 not, did it have the authority to exercise supervision? Is  
23 there -- could it have done anything? You were ask -- you  
24 were writing it for a reason obviously.

25 MR. KIMBERLY: Well, right, because we think it

1 was wrongly decided. So I don't think you can fault an  
2 entity that's been wronged by Maximus to try to persuade CMS  
3 to override it, but I think in 13 --

4 THE COURT: Well, if you're trying to persuade CMS  
5 to override it, that presumes that CMS has the authority to  
6 override it, doesn't it?

7 MR. KIMBERLY: Well, but again, I don't think  
8 Alignment's position in the plan preview period changes the  
9 nature of the statutory and regulatory scheme which make  
10 very clear that CMS, in fact, cannot -- lacks all authority  
11 to override the determination of -- again, it's in the title  
12 -- an independent review --

13 THE COURT: So you were just whistling in the wind  
14 then.

15 MR. KIMBERLY: You might say that, Your Honor. I  
16 mean, truly I think that's what the *United Healthcare*  
17 decision in the Eastern District of Texas held, that this is  
18 just a rubber stamp process.

19 THE COURT: Okay. Ms. Mundy.

20 MR. KIMBERLY: Thank you.

21 MS. MUNDY: I think ultimately, like so many of  
22 Alignment's claims, this comes down to dissatisfaction that  
23 in this particular instance CMS did not agree with  
24 Alignment. I think the record is --

25 THE COURT: Well, let's assume that CMS did agree

1 with Alignment.

2 MS. MUNDY: They could have altered the Star --

3 THE COURT: What could it have done and under what  
4 authority could it have done it?

5 MS. MUNDY: So as part of the Star Ratings the  
6 plan preview process is codified into regulation. That  
7 preview process is that ability for CMS to modify the  
8 underlying data that forms the basis of Star Ratings.

9 THE COURT: Okay.

10 MS. MUNDY: I think it's clear from the record  
11 that CMS believed it had that final authority. I think it's  
12 clear from the record where CMS --

13 THE COURT: But I understand that there's a give-  
14 and-take during that preview process where CMS can assess  
15 comments and change the ratings.

16 MS. MUNDY: Uh-huh.

17 THE COURT: But if part of the rating was based on  
18 a decision by Maximus on appeal, an appellate decision by  
19 Maximus, does CMS have the authority to override Maximus's  
20 finding on appeal?

21 MS. MUNDY: Yes.

22 THE COURT: Okay. And where in the record does it  
23 say that?

24 MS. MUNDY: I think it's --

25 THE COURT: Or where in the regs does it say that?

1 MS. MUNDY: Sure. So the regulations -- and I can  
2 get the exact thing. It's about the plan preview process  
3 and where that allows CMS. I think the underlying  
4 administrative record -- this is an informal process, but  
5 the underlying administrative record shows with regard to  
6 Star Rating the CMS Star Ratings team retains that final  
7 ability. The same as with them asking to throw out the  
8 CAHPS survey data or anything else, that if CMS identifies  
9 an issue, then they can take action.

10 And CMS said, "We will" --

11 THE COURT: Even if the issue is a raw score or a  
12 proposed rating that resulted from a Maximus appeal  
13 decision?

14 MS. MUNDY: Sure. So if they believed Maximus got  
15 it wrong, and they said we don't want to count this, so now  
16 you maybe have a -- the denominator is now 17, and we'll  
17 look at -- instead of 18 for this contract, and we'll look  
18 at those 17 cases, and we'll identify your Star Rating.  
19 They noted that they would -- quote, will look at these  
20 cases again because they wanted to make sure that Alignment  
21 -- or, excuse me, that Maximus got it right.

22 They -- just because they agreed with --

23 THE COURT: All right. Let's stop there.

24 MS. MUNDY: Sure.

25 THE COURT: When you say we'll look at it again,

1 we want to make sure Maximus got it right, understood.

2 MS. MUNDY: Uh-huh.

3 THE COURT: And they contact Maximus, "Can you  
4 take a second look at this?"

5 MS. MUNDY: Uh-huh.

6 THE COURT: "There's been an objection. There are  
7 some concerns. Here are our views."

8 If Maximus says, "No, we got it right," is there  
9 any authority -- and if so, where? -- that CMS has to  
10 override that Maximus final decision?

11 MS. MUNDY: Yes, as far as it applies to Star  
12 Ratings. And I think that this issue -- the issue of  
13 whether an independent review -- whether there's an  
14 unconstitutional delegation, it's certainly CMS's position  
15 that it's not in any aspect of the Medicare Advantage plan.  
16 I want to be clear on that.

17 But I think that the issue before this Court is  
18 narrowly tailored to the impact of that independent review  
19 entity on Star Ratings, and I think the record demonstrates  
20 that CMS retained that final authority, that it was not a  
21 rubber stamp, and I --

22 THE COURT: It could disregard Maximus's decision.

23 MS. MUNDY: Yes, and I --

24 THE COURT: And, again, I hear you, but if I'm  
25 sitting down to write an opinion, and I want to cite

1 something to support that proposition, what do I cite?

2 MS. MUNDY: I think you -- I think you can cite  
3 what the cases say as what the standard is for  
4 nondelegation, which is that it's not merely a rubber stamp,  
5 and that -- let me find them before I -- and that the  
6 administrative record here, which is the issue before this  
7 Court, shows that CMS engaged meaningfully, that it retained  
8 that final ability to make a decision, and under the  
9 precedent in this circuit, that that is well within the  
10 bounds of the nondelegation doctrine.

11 THE COURT: That sounds pretty general to me.

12 MS. MUNDY: In the most recent D.C. Circuit  
13 decision, *Hight v. DHS*, the D.C. Circuit confirmed --

14 THE COURT: One more time on that case name.

15 MS. MUNDY: *Hight* -- H-I-G-H-T -- *v. DHS*, it's a  
16 2025 case. It confirms that fact-gathering by a private  
17 entity is lawful when the agency conducts its own review.  
18 That's the standard. There's no doubt, based on the  
19 administrative record, that CMS conducted its own review.  
20 There's no doubt that CMS did not say, "You're whistling in  
21 the wind. We can't do anything about what Maximus did."  
22 They took the time to look at those decisions.

23 Yes, they provided the rationale that Maximus  
24 provided, but it also agreed -- they said we are going to  
25 uphold these decisions indicating CMS was making an

1 affirmative decision to agree with Maximus's determination.

2 THE COURT: Okay.

3 MS. MUNDY: And the briefing here shows that CMS  
4 continues to maintain it got those two cases that were  
5 brought before CMS correctly. We're not saying Maximus got  
6 it wrong, but we didn't have any ability to change it.

7 CMS agreed with Maximus's decision, and maybe they  
8 could have disagreed. Maybe they could have said you're  
9 right, or they'd taken that in and they could have  
10 disregarded it. But they did agree, and there's a rational  
11 basis for this agreement as briefed here with those specific  
12 underlying cases as well.

13 THE COURT: Okay. Mr. Kimberly.

14 So flip side of that question to you: Is there  
15 any authority you can point to to say that a Maximus appeal  
16 decision is final and binding on CMS?

17 MR. KIMBERLY: Yes. It was the -- sorry, it was  
18 the provisions I cited to the Court earlier --

19 THE COURT: Okay.

20 MR. KIMBERLY: -- which include 1395w-22 Paragraph  
21 (g) (5), 42 CFR 422.592(i), 42 CFR 422.600(a), 42 CFR  
22 422.616. These all confirm that Maximus decisions are final  
23 and binding and not reviewable by CMS.

24 THE COURT: In connection with a Star Rating  
25 determination.

1 MR. KIMBERLY: Well, sure, but, Your Honor, I  
2 mean, this is like -- you might think of this as something  
3 like a collateral attack on the decision. It would be a  
4 strange end run around this process if an MAO could obtain  
5 CMS review that is foreclosed in the actual substantive  
6 regulatory context through the Star Rating system.

7 THE COURT: Okay.

8 MR. KIMBERLY: I think it would also be quite  
9 unusual for CMS to say yes, Maximus got it wrong in this  
10 context but allow the Maximus determination against the MAO  
11 to stand.

12 THE COURT: Okay.

13 MR. KIMBERLY: And I would just note on JA3, this  
14 is AR3 as well, CMS didn't say we're going back to look  
15 again. It said thank you for raising this. We are going  
16 back to Maximus to look again at these issues.

17 There's no indication that CMS did anything in  
18 this process other than punt these questions to Maximus and  
19 allow Maximus to resolve them, and this is precisely the  
20 scenario that the Eastern District of Texas said violates  
21 the nondelegation doctrine.

22 THE COURT: Okay.

23 MR. KIMBERLY: Thank you.

24 THE COURT: Next issue.

25 MR. KIMBERLY: Oh, sorry, next issue. I'm sorry,

1 I'm looking at the clock.

2 THE COURT: Next issue. And I've got about 10  
3 minutes.

4 MR. KIMBERLY: Okay, great. Okay. I'm sorry. I  
5 thought we were wrapping up.

6 All right. I did want to touch briefly on the  
7 minimum denominator issue. You know, this is another at  
8 bottom arbitrary and capricious issue that we raised. The  
9 minimum denominator question is one that goes to application  
10 of the Tukey Outlier Deletion Rule to these particular  
11 contracts, in particular the 3443 and 9686. The issue was  
12 raised in the rule-making.

13 THE COURT: By Alignment?

14 MR. KIMBERLY: By Alignment and others.

15 THE COURT: Okay. And when you say "the issue,"  
16 the removal of outlier data issue and the minimum  
17 denominator issue specifically?

18 MR. KIMBERLY: Yes, exactly. So the removal of  
19 outliers is, as a logical matter, certain to compress the  
20 cut points. If you've got a body of data points and you  
21 take out the outliers, you're going to be squished in the  
22 middle. That makes the system much more sensitive to  
23 movements in raw scores.

24 THE COURT: Okay. But keeping the outliers in  
25 leads to reliance --

1 MR. KIMBERLY: Right.

2 THE COURT: -- on unreliable data.

3 MR. KIMBERLY: Exactly. So what Alignment  
4 explained is if you're going to engage in outlier removal,  
5 the least that you need to do to ensure that the system  
6 continues to work is adjust the minimum denominator to  
7 address this increase in sensitivity which applied without a  
8 denominator adjustment means that many plans will be  
9 incapable of earning each of the five stars.

10 THE COURT: Okay. Regardless of the merits of  
11 that -- of your preferred approach, did CMS respond to that  
12 suggestion?

13 MR. KIMBERLY: Not meaningfully, Your Honor. I  
14 would point the Court to 88 Federal Register 22,296 to 297.  
15 And there -- this is the full extent of the agency's  
16 response to this issue. "Closer cut points do not  
17 necessarily imply lower reliability or lessen the ability to  
18 distinguish between contracts." That's it. That's all they  
19 said. It's an ipse dixit. It's no response at all, and  
20 there's no discussion at all in any of that response why  
21 adjusting the minimum denominator requirement isn't  
22 appropriate.

23 I would note just very briefly at --

24 THE COURT: You note in your briefs this  
25 hypothetical that if there are only 11 data points for a

1 particular measure and you eliminate one or if the plan  
2 flunks one of those data points, then they automatically  
3 drop from a 5 to a 3; there's no way to get a 4.

4 MR. KIMBERLY: Right.

5 THE COURT: I mean, I'm sure the math is right on  
6 that, but is that -- did that happen --

7 MR. KIMBERLY: Yes.

8 THE COURT: -- to one of your plans --

9 MR. KIMBERLY: Yes.

10 THE COURT: -- specifically? And, you know, I  
11 guess that is mathematically a feature of the rule, but why  
12 does that automatically show that, you know, the results are  
13 not reliable or indicative of performance?

14 MR. KIMBERLY: Yes, and actually the scenario that  
15 we described, which has happened, is one in which a plan  
16 goes from 5 to 2 with one error.

17 THE COURT: Okay.

18 MR. KIMBERLY: In our case --

19 THE COURT: Well, a score on one measure goes from  
20 5 to 2.

21 MR. KIMBERLY: Yes, exactly. That's correct.

22 THE COURT: That doesn't necessarily mean they  
23 overall -- right.

24 MR. KIMBERLY: So on two measures, plans make  
25 timely decisions about appeals and reviewing appeal

1 decisions. These are the two measures impacted by the  
2 Maximus issues. Contracts 3443 and 9686 dropped from 5  
3 stars to 3 stars with one error. So they were categorically  
4 incapable of achieving a 4 Star Rating on those measures.

5 Now, why is that arbitrary and capricious?

6 THE COURT: I'm sorry, I don't mean to interrupt  
7 you, but I'm going to forget. Was the adoption of the Tukey  
8 Outlier Rule challenged initially when it was first  
9 promulgated?

10 MR. KIMBERLY: I know there have been lawsuits  
11 concerning it. I don't think this issue has been challenged  
12 facially.

13 THE COURT: Okay. Okay.

14 MR. KIMBERLY: So we're raising it in this as-  
15 applied context.

16 You know, 1395w-23 Paragraph (o)(4) is what  
17 establishes the Star Ratings program, and it directs CMS to  
18 establish, quote, a 5 Star Rating system. It follows, I  
19 think, just as a matter of congressional objectives and  
20 common sense that in administering a 5-star system of  
21 ratings that each rated contract be able to achieve 5 stars.  
22 It's not a 4-star system --

23 THE COURT: Well, this doesn't -- if not being  
24 able to achieve one of the stars on one of the 40 measures  
25 or 36 measures, however many there are, that does not

1 prohibit or mean that a plan cannot achieve an overall  
2 measure of any stars, correct?

3 MR. KIMBERLY: Well, that's correct, Your Honor,  
4 but what the implementing regulations all make clear is that  
5 this 5-star system is implemented through measured level  
6 ratings that are also -- that reflect the same 5-star  
7 system.

8 THE COURT: Okay.

9 MR. KIMBERLY: And, you know --

10 THE COURT: Because there are certain -- as I  
11 understand it, there are cases where a particular plan may  
12 not receive any star at all, any Star Rating at all on a  
13 particular measure.

14 MR. KIMBERLY: Well, that -- and our position is  
15 that ought to be the case here. If you can't -- if you  
16 can't earn -- if, as a mathematical and factual matter, you  
17 can't earn each of the five ratings, then you shouldn't be  
18 subject to the rating at all. There ought to be a minimum  
19 denominator requirement that ensures that each rated plan  
20 can actually achieve each of the five stars on the relevant  
21 measures.

22 THE COURT: Okay.

23 MR. KIMBERLY: Thank you.

24 THE COURT: Ms. Mundy.

25 MS. MUNDY: I think my colleague's cite to the

1 congressional requirement for 5 Star Ratings is faulty logic  
2 for each individual measure for the reasons that Your Honor  
3 already pointed out. There's nothing to suggest that  
4 Alignment couldn't achieve, you know, an overall Star Rating  
5 on a given measure.

6 And I just want to discuss briefly the minimum  
7 denominator threshold. CMS makes a determination about what  
8 the minimum amount for any of the individual measures would  
9 be required to to ensure that the rating has meaning; i.e.,  
10 that it's statistically significant; that there wouldn't be  
11 noise in having that individual rating. And it makes that  
12 determination well in advance of the -- of those -- when  
13 they get the data points.

14 There's a second step that comes in that once they  
15 see which plans met the minimum denominator, that they then  
16 do that clustering algorithm, that they then remove the  
17 Tukey Outlier Deletion.

18 But what Alignment is asking for is an exception  
19 to this practice done universally for all plans in this  
20 predictable way that plans know what the minimum denominator  
21 is for a given measure going into it, and then they ask them  
22 to reverse the process to then -- once there's the cut  
23 points to ensure, to then look again, to look at that  
24 minimum denominator threshold, to ensure that they could  
25 meet every theoretical Star Rating increment on a given

1 measure.

2 This is asking CMS to undo a process that is  
3 codified in regulation and through guidance as to how Star  
4 Ratings are calculated, and the technical guidance is  
5 codified with a reference to the technical guidance.

6 THE COURT: Okay. Is Mr. Kimberly correct that  
7 the passage that he read was the sum and substance of the  
8 agency's response to the concern that Alignment raised in  
9 this regard?

10 MS. MUNDY: The section on -- there's been  
11 multiple rule-makings on Tukey Outlier Deletion, but CMS's  
12 position that because the numbers are closer together does  
13 not necessarily --

14 THE COURT: Understood.

15 MS. MUNDY: Yes, that is their response because  
16 it's true, as explained in the briefs, that when you're  
17 removing statistical outliers -- and CMS actually explained  
18 that for most measures there's no -- for many measures  
19 there's no outliers. For even ones where there's outliers  
20 there's not a significant shift.

21 For the very few that there is a shift, CMS feels  
22 that it better represents the actual data to distinguish  
23 between the plans.

24 THE COURT: I understand all that. I mean, going  
25 back to my baseball analogies, when they publish, you know,

1 a batting average, they throw out folks that have a minimum  
2 number because that's noise, and that would skew the  
3 results, and, as a result, the clusters, if they were going  
4 to cluster them, would be compressed.

5 But they raised a specific concern about the  
6 minimum number of denominators, and I guess my question is,  
7 is there a response by CMS to that specifically?

8 MS. MUNDY: No. They raised a response to  
9 compression, and CMS responded appropriately.

10 Their now solution in their briefing is to this  
11 idea of minimum denominators, which was not a part of the  
12 common end response in the rule-making.

13 THE COURT: Okay. Putting aside whether it was  
14 raised as a comment to the rule-making, was it raised in the  
15 preview -- the Star Rating preview process or at any time  
16 before the suit was filed here?

17 MS. MUNDY: I believe they did raise that in the  
18 Administrative Record, and CMS explains that the minimum  
19 denominators and Tukey Outlier Deletion is something that is  
20 codified in regulation, and that's not a place where CMS  
21 will say we'll throw out the Tukey Outlier Deletion for you  
22 and your plan only. That would be allowing them to not --

23 THE COURT: Okay. So is it in your briefs, that  
24 citation to how CMS responded during the preview period to  
25 the minimum denominator issue specifically?

1 MS. MUNDY: During the plan preview period? It's  
2 in the Joint -- it's in the Administrative Record.

3 THE COURT: Okay.

4 MS. MUNDY: I don't believe I cited to CMS's -- or  
5 CMS's response during the plan preview because I think  
6 Alignment accepted that this wasn't a place -- I think they  
7 raised these concerns, but I think they accepted -- they  
8 said we understand that this is the type of process that  
9 requires the regulatory change --

10 THE COURT: Okay.

11 MS. MUNDY: -- and so CMS was not engaging.

12 This was different from the Maximus issue. This  
13 is different from the Spanish language. This is sort of a  
14 -- CMS viewed it as a programmatic complaint.

15 THE COURT: I see. I see.

16 All right. I'm going to cut you folks off here.  
17 If we need any further information, we'll file something --  
18 we'll post something on the docket, but I think we have  
19 everything we need, and we will endeavor to get something  
20 out in the timetable that you all have requested. And,  
21 again, it may not be a full dressed memorandum opinion, but  
22 it will certainly explain where we've come out.

23 All right. We're adjourned.

24 (Whereupon the hearing was

25 adjourned at 12:28 p.m.)
