BENJAMIN POEHLING,

Plaintiff,

v.

UNITEDHEALTH GROUP, INC. *et al.*,
Defendants.

CASE NO. 2:16-cv-08697-FMO-PVCx

**JOINT BRIEF REGARDING CROSS
MOTIONS FOR SUMMARY
JUDGMENT**

Hon. Fernando M. Olguin

Hearing Date: September 5, 2024

Hearing Time: 10:00 a.m.

Courtroom: 6D

TABLE OF CONTENTS

	PAGE
UNITED’S INTRODUCTION	1
UNITED STATES’ INTRODUCTION	4
UNITED’S BACKGROUND	8
A. Medicare and Payments to MA Plans	8
B. Diagnosis Coding Discrepancies and Chart Review.....	10
C. Risk Adjustment Data Validation (“RADV”) Audits	12
D. United’s Complex Auditing Program and the Proposed Medical Record Review Rule (“MRRR”).....	13
E. The Diagnosis Codes at Issue.....	16
UNITED STATES’ BACKGROUND	18
LEGAL ARGUMENT REGARDING UNITED’S MOTION FOR SUMMARY JUDGMENT	32
I. UNITED’S LEGAL ARGUMENT ON ISSUE NO. 1: WHETHER THE COURT SHOULD GRANT SUMMARY JUDGMENT AS TO THE REVERSE FCA CLAIM	32
US RESPONSE TO ISSUE NO. 1: THE COURT SHOULD DENY SUMMARY JUDGMENT AS TO THE REVERSE FCA CLAIM	32
A. United’s Legal Argument: DOJ Cannot Show That United Was Overpaid	34
1. DOJ Cannot Show the Diagnosis Codes Were Unsupported	35
2. DOJ Cannot Show the Diagnosis Codes Resulted in Overpayments	39
US Response to Issue 1.A.: There is Abundant Evidence that Codes United Submitted for Payment Were Unsupported and that those Unsupported Codes Resulted in Overpayments	42
B. United’s Legal Argument: DOJ Cannot Show That United Violated Any Duty to Second-Guess Doctor-Certified Codes	48
1. DOJ Cannot Identify Any Independent Obligation	48
2. DOJ’s Red-Flag Theory Cannot Establish an Obligation	51
US Response to Issue 1.B.: United Had an Obligation to Return Money it Received for Unsupported Diagnosis Codes, Arising out of its Regulatory and Contractual Duties, as well as its Retention of an Overpayment	54

C.	United’s Legal Argument: DOJ Cannot Show That United’s Conduct Was Material to CMS’s Decision to Pay United.....	67
	US Response to Issue 1.C.: Materiality is Not an Element of the Claim at Issue, But Even if it Were, the United States Can Establish Materiality	69
D.	United’s Legal Argument: DOJ Cannot Show United “Conceal[ed]” or “Improperly Avoid[ed]” an Obligation to Return Money.....	75
1.	The FCA Requires a Fraudulent Act of Concealment.....	75
2.	United Did Not Undertake Any Deceptive Acts	77
	US Response to Issue 1.D.: The Reverse False Claims Provision of the FCA Does Not Require Proof of Deceptive Acts to Establish Knowing and Improper Avoidance of an Obligation.....	78
II.	UNITED’S LEGAL ARGUMENT ON ISSUE NO. 2: WHETHER THE COURT SHOULD GRANT SUMMARY JUDGMENT AS TO THE COMMON-LAW CLAIMS	81
	US RESPONSE TO ISSUE NO. 2: THE COURT SHOULD DENY SUMMARY JUDGMENT AS TO THE COMMON LAW CLAIMS.....	82
	LEGAL ARGUMENT REGARDING UNITED STATES MOTION FOR PARTIAL SUMMARY JUDGMENT	84
I.	UNITED STATES’ ARGUMENT.....	84
A.	Materiality is Not an Element Under the Second Prong of the Reverse False Claims Provision of the False Claims Act.....	84
	UNITED’S ARGUMENT	87
A.	The Reverse FCA Requires Proving That The Alleged Fraud Was Material	87
1.	The FCA’s Text and Structure Impose a Materiality Element	88
2.	Legislative History Confirms the Statutory Text and Structure	89
3.	DOJ’s Contrary Position Is Not Supported by the Case Law and Would Lead to Absurd Results	91
4.	This Case Illustrates the Critical Role Played by the Materiality Element.....	94
	UNITED’S CONCLUSION	97
	UNITED STATES’ CONCLUSION.....	97

----	--	----

UNITED’S INTRODUCTION

The DOJ alleges that United improperly kept money it was paid to provide healthcare to Medicare Advantage (“MA”) members. But after years of litigation, DOJ has not reviewed a single medical record of United’s MA members—the *only* evidence that could establish whether United may have been overpaid. That failure dooms all of DOJ’s claims.

The Centers for Medicare and Medicaid Services (“CMS”) pays insurers like United and other MA plans to cover their members’ healthcare costs. These payments are based in part on the members’ medical conditions, with the basic goal of paying MA plans more for taking care of sicker patients. Most of the diagnoses United submits to CMS for payment come directly from doctors, who certify that the patients they have seen have the health conditions, represented by alphanumeric diagnosis codes, listed on insurance claims forms. But doctors often fail to identify all the medical conditions their patients have on claims forms because they are typically paid based on the services they perform, not their patients’ diagnoses. MA plans like United thus obtain some of their patients’ underlying medical records (or “charts”) and hire medical coders to review the charts to capture additional diagnoses doctors may have missed in submitting claims forms.

DOJ’s theory in this case is novel. Unlike a traditional case of alleged “upcoding,” DOJ does not contend that United’s coders falsely documented *any* medical conditions. Nor does DOJ allege that United failed to convey accurately the diagnoses doctors submitted to it. DOJ also does not contend that there is anything inherently wrong with MA plans reviewing medical charts to submit more complete diagnostic information (which is an industry-standard practice). And DOJ likewise does not contend that United has an obligation to conduct audits of all the codes it receives from doctors, since MA plans should be allowed to rely on doctors’ certified codes—and no one expects perfect coding accuracy in this payment system.

DOJ’s sole contention is instead that if United coders who reviewed a chart did not identify a diagnosis code, then that necessarily means that a doctor who previously

1 certified and submitted the same code on a claim form did so in error. For example, in
2 DOJ's view, if a doctor's office submitted a "diabetes" code on a claim form after seeing
3 a patient, but United coders did not code "diabetes" in reviewing the medical chart for the
4 date of that claim, then the diabetes code *must* be invalid. DOJ believes that, in this
5 situation, the United coders were *always* right, and the doctor's office—where the patient
6 was seen and where the doctor certified the code—was *always* wrong.

7 The problem with DOJ's categorical theory is that it is not supported by any
8 evidence. For one, United's coders are unaware of what codes doctors have previously
9 submitted in claims forms and thus make no effort to validate those codes in performing
10 chart review. For another, DOJ's own coding expert concedes that there are multiple
11 reasons a United coder reviewing a chart might fail to identify a diagnosis code that is
12 actually present there. United's coders could be unfamiliar with the doctor's handwriting
13 or area of specialization, could be missing pages of the medical record, might have lacked
14 sufficient time to complete the review, or might simply have missed a diagnosis certified
15 by a doctor because a record was lengthy or complex. And, of course, as both sides' experts
16 agree, coders are human and make mistakes. The mere fact that United's coders may
17 identify different codes than those a doctor submits is not *evidence* sufficient to allow a
18 jury to conclude the doctor's office was necessarily wrong in submitting the code.

19 Accordingly, to meet its burden in opposing summary judgment, DOJ needed to
20 offer *something* other than mere coding differences to show that some or all of the 28
21 million doctor-certified codes at issue are unsupported. One obvious approach would have
22 been to review some or all of the medical charts at issue. DOJ could have hired an expert
23 to review charts and offer an opinion about the portion of the doctor-certified diagnosis
24 codes that are in fact not supported. Yet, after more than a decade of litigation in a case in
25 which DOJ seeks to punish United for billions of dollars, DOJ has chosen instead not to
26 review a *single* chart—not even a sample—perhaps because it was afraid of what that
27 review would show. DOJ must now accept the consequences of that decision, which is
28

1 that its experts are left hopelessly unable to say which (if any) of the diagnosis codes at
2 issue are unsupported.

3 Indeed, the only record evidence conclusively disproves the categorical assumption
4 on which DOJ's case rests. Outside this litigation, the government conducts routine audits
5 of MA plans. Through such audits, CMS reviewed medical records relating to roughly
6 6,500 of the 28 million diagnosis codes DOJ claims in this case are invalid. Crucially,
7 CMS coders found that an overwhelming percentage of the health conditions associated
8 with those codes—approximately 89%—*were* supported in the patients' medical records.
9 Put another way, 89% of the health conditions DOJ says United *knew* were false were in
10 fact supported by the patient's medical records. Faced with this undisputed fact, DOJ's
11 statistical expert bluntly conceded that DOJ's theory is wrong "to a certainty," and that the
12 record evidence provides "no reliable way" to estimate what doctor-submitted codes were
13 in fact unsupported in medical charts. This would leave a jury unable to do anything but
14 guess that some number of codes (ranging from 0 to 28 million) *might* have been invalid
15 and *might* have affected payment. That is far short of the evidence needed to survive
16 summary judgment.

17 There are also other insurmountable problems with DOJ's case. Although DOJ
18 argues that United should have second-guessed the codes doctors submitted in claims
19 forms that United's own reviewers did not capture, there is no rule, regulation, or other
20 source of law that imposes that obligation. CMS considered adopting exactly that rule in
21 2014 but abandoned it. That abandonment was unsurprising at the time, as commentators
22 noted that the proposed rule would have required a complex process of attempting to match
23 diagnosis codes submitted by doctors to particular medical charts and then reviewing those
24 charts to second-guess the doctors who certified the diagnoses as accurate. At any rate,
25 DOJ cannot plausibly assert that United committed fraud by failing to follow a rule that
26 CMS considered a decade ago but declined to adopt.

27 United has also been transparent with CMS about its conduct. When CMS proposed
28 the rule just described, United sought guidance from its regulator about its obligations.

1 When CMS later declined to finalize the rule, United informed CMS that it would no
2 longer second-guess doctor-submitted codes. United has repeated those facts every year
3 since in bid submissions and annual attestation transmittals, yet CMS has continued to pay
4 United's claims and has not taken remedial action of any kind against United. For these
5 reasons, as a matter of law, United's challenged acts involved no deception and were
6 immaterial to CMS's decision to pay United—both of which are required elements under
7 the False Claims Act ("FCA").

8 DOJ's common-law claims for payment by mistake and unjust enrichment fail for
9 many of the same reasons. They also fail because the parties' express contracts preclude
10 such quasi-contract causes of action. DOJ could have brought a contract claim but, perhaps
11 knowing that the law is settled that a "garden variety" breach of contract does not amount
12 to fraud under the FCA, chose not to do so.

13 The fact that this is a large and lengthy case does not change the fact that it is also
14 a textbook case for summary judgment. DOJ is seeking enormous damages and penalties
15 under a punitive fraud statute, and it must be held to its burden of opposing summary
16 judgment with evidence, not speculation. The Court should enter summary judgment.

17 UNITED STATES' INTRODUCTION

18 If a Medicare Advantage Organization (MAO) such as United receives a diagnosis
19 code from a provider, submits the diagnosis to CMS for risk adjustment payment, and then
20 later reviews the medical record from that provider, and finds that code to be unsupported,
21 the organization surely cannot hold onto the payment it received for that code without
22 further inquiry. Yet that is the core of United's argument. There is considerable evidence¹
23 from which a jury can reasonably conclude that the diagnosis codes at issue were
24 unsupported and resulted in overpayments, including United's own Chart Review coders'
25 review of the medical records, United's own data, and the United States' expert's
26

27 ¹ While the United States does not object to United's use of deposition testimony in support
28 of its motion for summary judgment, pursuant to FED. R. CIV. P. 56(c), it does not waive
any objection to the admissibility of such testimony at trial, pursuant to FED. R. CIV. P. 32
or Federal Rules of Evidence.

1 calculation of the financial impact of United’s failure to delete those codes. There is
2 binding precedent from the Ninth Circuit in *United States ex rel. Swoben v. United*
3 *Healthcare Ins. Co.*, 848 F.3d 1161 (9th Cir. 2016) that MAOs such as United have
4 longstanding duties prohibiting them from turning a blind eye to unsupported codes
5 submitted for payment. United’s remaining arguments likewise cannot support summary
6 judgment. Materiality is not an element of the reverse false claims provision at issue here,
7 but, regardless, United’s motion ignores material factual disputes concerning the April
8 2014 videoconference on which it relies. Finally, the plain text of the False Claims Act
9 (FCA) demonstrates that the reverse false claims provision at issue here does not require
10 an “act of deception” to prove liability.

11 A foundational principle of the MA program – unwavering since the program’s
12 inception – is that MAOs are paid only for diagnosis codes that are supported by the
13 beneficiary’s medical records (supported codes). MAOs are not required to audit every
14 single diagnosis code they submit, but they have contractual and regulatory duties –
15 incorporated into every MA contract – to undertake due diligence and make good faith
16 efforts to ensure that the diagnosis codes they submit to CMS are supported. CMS adopted
17 the FCA knowledge standard into those duties, meaning that an MAO must exercise due
18 diligence and conduct in good faith any audit of provider-submitted data it chooses to
19 conduct, and correct unsupported diagnosis codes that have been submitted for payment
20 revealed by those audits. In this case, United obtained information from its own internal
21 auditing program (Chart Review) that diagnosis codes that it had already submitted to
22 CMS for payment were unsupported. Rather than making a good faith effort to inquire as
23 to the accuracy of those codes and correct them as required by both regulation and contract,
24 it simply buried its head in the sand and did nothing but keep the money.

25 As opposed to a “novel theory,” the FCA allegation in this case is straightforward
26 – United violated the second prong of the reverse false claims provision, which imposes
27 liability on a person who “knowingly and improperly avoids. . . an obligation to pay. . .
28 the Government.” 31 U.S.C. § 3729(a)(1)(G). To prevail, the government must show only

1 that United: (1) improperly avoided its obligation to pay CMS; and (2) did so knowingly.
2 *See United States ex rel. Ormsby v. Sutter Health*, 444 F. Supp. 3d 1010, 1055-56 (N.D.
3 Cal. 2020). United’s obligation to pay arises from independent, yet legally and factually
4 aligned, sources: (1) its regulatory and contractual duties, and (2) its retention of an
5 overpayment. And there is ample evidence that by deliberately ignoring or recklessly
6 disregarding the negative results of its Chart Review, United knowingly and improperly
7 avoided its obligation and improperly retained billions of dollars.

8 Yet, United wants the Court to impose elements of proof beyond those of the reverse
9 false claims provision, and seeks to confuse the issues with reference to parts of the MA
10 program wholly unrelated to the allegations at issue. Since United cannot meet the real
11 issues and facts head-on, it instead uses its motion to set up and knock down strawmen
12 arguments. For example, United wholly ignores the express statement in the FCA that an
13 established duty does not have to be fixed at the time it gives rise to the obligation to pay. 31 U.S.C.
14 § 3729(b)(3). Indeed, United goes so far as to omit those four key words – “whether or not
15 fixed” – when quoting the statute, and instead argues that the government cannot prevail
16 unless it proves an overpayment fixed in time and amount. That simply is not the law.
17 Similarly, United invents a narrative in support of its contentions regarding materiality.
18 However, as the United States shows in its motion for partial summary judgment,
19 materiality is not a required element under the provision of the FCA at issue – and, in any
20 event, the facts show that the United States can establish materiality.

21 United also spends an inordinate amount of time on CMS’s RADV audits. But this
22 case has nothing to do with RADV audits. It is not an action to enforce RADV audits, and
23 it does not involve the same processes or standards applied in RADV audits – which take
24 place well after the deadline for MAOs to submit risk adjustment data. United also makes
25 much of a purported 89% RADV validation rate, but *even if* RADV audits had anything
26 to do with the issues in this case (they do not), the import of that analysis from United’s
27 expert is hotly disputed as a factual matter – e.g., the United States’ expert points out that
28

1 this calculation is utterly meaningless statistically – and therefore, cannot carry the day for
2 United at summary judgment.

3 United employs another red herring by vociferously complaining that *the*
4 *government* did not review the medical records underlying the diagnoses at issue in this
5 litigation. The key point, however, is that *United* reviewed the medical records in its Chart
6 Review audits. Indeed, United’s own certified coders reviewed each medical record –
7 many times twice – and did not find any support for the diagnosis codes at issue in this
8 case. United relied on those reviews to submit additional diagnosis codes generating over
9 \$7 billion in revenue for United, and those same reviews are equally sufficient to
10 demonstrate the absence of support for the codes at issue here. As a result of its coders’
11 work, United had knowledge of a potential overpayment, and the United States will
12 present evidence that United failed to meet its duties to undertake good faith measures to
13 ensure the accuracy of its diagnosis codes. Additionally, United’s complaint that the
14 government did not review any medical records is particularly disingenuous because
15 United steadfastly refused to produce any medical records in discovery, despite repeated
16 requests from the government and even a motion to compel.

17 In a similar vein, United mischaracterizes the government’s contention as United’s
18 “obligation to second-guess doctors’ certifications that their diagnoses accurately reflect
19 the patients’ health conditions.” Joint Brief, 32. That is not remotely the government’s
20 allegation. Rather, the United States contends that *when* United undertook a review of
21 medical records to second-guess its provider diagnoses, and collected \$7 billion as a result,
22 it obtained knowledge that its certified coders did not find support for some of the
23 diagnosis codes that it had already submitted for payment. Rather than act on that
24 information, United buried its head in the sand and ignored that information from its Chart
25 Reviews. United, as the largest MAO, simply cannot be excused from its obligation to
26 return to the Medicare Trust Funds billions of dollars to which it is not entitled.

27 The Court should reject United’s distortion of the governing legal standards and its
28 mischaracterization of the facts and deny United’s Motion for Summary Judgment. In

1 addition, the United States respectfully requests that this Court grant the United States’
2 motion for partial summary judgment that as a matter of law proving liability under the
3 second prong of the reverse false claim provision does not require a showing of
4 materiality.

5 UNITED’S BACKGROUND

6 A. Medicare and Payments to MA Plans

7 The Medicare Act establishes a federal health insurance program for seniors and
8 individuals with disabilities. Joint Statement of Uncontroverted Facts (“JS”) at D2; Exhibit
9 (“Ex.”) D-3 at 161. Parts A and B of the Act create the Traditional Medicare (“Medicare”)
10 program. 42 U.S.C. § 1395c *et seq.*; *id.* § 1395j *et seq.*; JS at D3-D5; Ex. D-3 at 161-62.
11 In Medicare, CMS pays doctors directly for the care they provide members. JS at D5; Ex.
12 D-3 at 162.

13 This case concerns Part C, the MA program in which CMS pays private insurers to
14 cover members’ medical care. 42 U.S.C. § 1395w-21 *et seq.*; *id.* §§ 1395w-23, 1395w-
15 24(a)(6)(A); 42 C.F.R. § 422.254(b)(1); JS at D6-D7, D9; Exs. D-1 at 9, 11-14, D-3 at
16 161-62, D-57 at 1448-9. The MA program has seen tremendous growth in recent years, as
17 MA plans are often able to provide superior benefits, like vision care and dental care,
18 without requiring additional premiums or other member payments. JS at D11-D14; Exs.
19 D-3 at 161, D-56 at 1340-41, 1343-1347, 1365, D-99 at 2671:21-75:23 .

20 Under MA, CMS pays MA plans a fixed amount per member to compensate plans
21 for insuring that member. JS at D9; Exs. D-57 at 1449, D-52 at 1230. MA plans are paid
22 more for enrolling members who are sicker than average for taking on the risk that those
23 members will be more costly to insure. JS at D15; Exs. D-86 at 2377, D-127 at 3245:20-
24 23. The process by which CMS pays MA plans based on the health status of their
25 beneficiaries is commonly referred to as “risk adjustment.” See JS at D10; Ex. D-149 at
26 3743. CMS determines which members are sicker by looking at the health conditions those
27 members have, as represented by diagnosis codes doctors submit through claims forms
28 (*see, e.g.*, Ex. D-40 at 944-45). JS at D16-D18, D21; Exs. D-18 at 658, D-54 at 1285, D-

1 132 at 3376:21-77:5. After a patient visits a doctor, the doctor records the patient's
2 diagnoses in a medical chart, then the doctor or the doctor's coder assigns one or more
3 corresponding diagnosis codes on a claim form (*see, e.g.*, Ex. D-150 at 3775-860). JS at
4 D19-D20; Ex. D-54 at 1285. The doctor then submits that claim form to CMS (if the
5 patient is in Medicare) or an MA plan (if in the MA program), certifying that the patient
6 has the medical conditions represented by the diagnosis codes submitted. *See* JS at D21,
7 D267; Exs. D-54 at 1285, D-44 at 1010-11, D-48 at 1204-05.

8 There are thousands of diagnosis codes coders can select when coding medical
9 charts. *See* JS at D23-D24; Exs. D-18 at 658, D-43 at 980. But for payment to MA plans
10 for the costs of insuring individuals, CMS groups diagnosis codes into Hierarchical
11 Conditions Categories ("HCCs"). *See* 42 C.F.R. § 422.2; JS at D16, D18; Ex. D-18 at 658.
12 Many different diagnoses are grouped to the same "HCC" or health condition. JS at D23-
13 D24; Exs. D-18 at 658, D-64 at 1851, n.145. For example, both a diagnosis code for "type
14 2 diabetes mellitus without complications" and the diagnosis code for "other specified
15 diabetes mellitus without complications" (as well as others) map to the same HCC of
16 "diabetes without complications" (HCC19). JS at D25-27; Ex. D-64 at 1860-61. CMS will
17 pay an MA plan the same amount regardless of which of the two diagnosis codes is
18 submitted. *Id.*; JS at D29-D31; Ex. D-57 at 1454. Similarly, diagnosis codes for numerous
19 different forms of malignant cancer (bone, lung, liver) would all establish that a patient
20 has the health condition of "metastatic cancer and acute leukemia" (HCC7), and any of
21 those numerous diagnosis codes would lead to the same payment for any given MA
22 member. JS at D28, D29-D31; Ex. D-64 at 1856-61, D-57 at 1454.

23 In addition, the payment for a condition—such as HCC19—is proper as long as a
24 single diagnosis code mapping to that HCC is supported by a single medical chart for the
25 member during the year. *See* JS at D29-D31; Ex. D-15 at 633 ("[A]ll that is required is
26 medical record documentation from one visit to a physician or a hospital, over the course
27
28

1 of the data collection year, to validate the audited HCC.”)² So, if three different doctors
2 submit seven different diagnoses that correspond to “diabetes without complication,” the
3 payment for that condition is valid as long as *one* of those doctors adequately documents
4 one of those diagnoses in one medical chart for the year. *Id.* The other six diagnoses from
5 an MA plan’s data, even if they are unsupported, do not affect the payment to the MA
6 plan. *Id.*

7 **B. Diagnosis Coding Discrepancies and Chart Review**

8 It is well known that, when filing claims forms, doctors often fail to identify all the
9 medical conditions with which they have diagnosed their patients and which they have
10 documented in the medical records. JS at D34-D35; Exs. D-117 at 2997:4-98:4, D-120 at
11 3050:12-23, D-54 at 1288. The principal reason is that doctors do not have the incentive
12 to list all supported diagnosis codes. JS at D36-D40; Exs. D-152 at 3872, D-48 at 1203,
13 D-87 at 2393:8-15, D-54 at 1288, D-42 at 965, D-99 at 2677:20-78:18. Doctors are
14 generally paid based on procedures (e.g., an office visit, an injection, etc.), not the
15 particular diagnosis codes included on a claim. See JS at D36; Exs. D-152 at 3872, D-87
16 at 2393:8-15. Doctors typically need only include one certified diagnosis code on a claims
17 form to justify the services the doctor provided. See JS at D37; Ex. D-107 at 2799:12-20.

18 Doctors also sometimes submit diagnosis codes on claims forms that are not
19 supported by the patients’ medical records. JS at D32; Ex. D-44 at 1010-11. This is
20 unsurprising. Diagnosis coding is a complex process, medical charts can be difficult to
21 read and understand, and coders have different levels of experience. JS at D56-63; Exs.
22 D-54 at 1291-96, 1307, D-108 at 2824:15-25:4, 2829:17-30:8, 2837:3-7, D-122A at

23 ² See also Ex. D-145 at 3676:23-77:7 (“Q. Right. The plan might go delete the code, but
24 just knowing that there was a single code that was unsupported, that alone wouldn’t tell
25 you you’ve been overpaid if you’re the plan, right? You would need to know, for
26 example, if another record supported the code, correct? A. Yes. Yes.”); Ex. D-60 at 1588,
27 1594 (“Reporting a diagnosis once during a year was deemed sufficient for the diagnosis
28 to be considered to be included in an enrollee profile. . . . It does not matter how many
times a condition is coded through the year or whether more than one ICD-10 code in an
HCC is reported.”); Ex. D-141 at 3546:2-6 (incorporating April 17 errata) (“I understand
that payments are based on the member demographics and the HCCs that the diagnoses
for that member map to for the year and that only a single instance of each HCC matters.
Multiple instances don’t change anything.”); Ex. D-57 at 1454.

1 3121:5-24:17, 3125:2-28:6, D-87 at 2403:21-05:2, 2409:1-10:5. CMS has long known that
2 some percentage of doctor-submitted diagnosis codes are unsupported by medical charts.³
3 Yet, CMS has acknowledged that MA plans have no general obligation to audit their data
4 to ensure the accuracy of provider-submitted diagnosis codes.⁴ MA plans are generally
5 entitled to rely on doctors' coding decisions despite CMS's awareness that doctors make
6 mistakes. *See* United MSJ, *supra* at 10-11.

7 Because doctors often fail to submit documented diagnoses through claims, MA
8 plans like United commonly obtain and review some patients' medical records (or
9 "charts") to capture additional diagnoses doctors may have missed in submitting claims
10 forms. JS at D41, D44; Exs. D-119 at 3027:17-28:11, D-99 at 2686:9-25, D-145 at 3669:3-
11 17. United hires medical coders as part of its chart review program for such reviews. JS at
12 D45, D48; Exs. D-88 at 2425:21-26:3, D-91 at 2512:23-13:10, D-95 at 2584:21-85:5.
13 United's chart review coders, typically based offshore, perform what are known as "blind"
14 reviews because they do not know what diagnosis codes that doctor has already submitted
15 in claims forms. JS at D49, D51-D53; Exs. D-1 at 28-29, D-89 at 2456:6-19, 2489:18-22,
16 2494:17-95:14, D-57 at 1464. United's chart review program does not try to undertake the
17 challenge of matching particular codes to particular charts from a particular doctor on a
18

19 ³ JS at D66-D67; Ex. D-97 at 2609:12-23, 2624:9-25:8 (Sean Cavanaugh—former director
20 of CMS's Center for Medicare—testifying: "Q. Setting aside your belief about the extent
21 to which it occurred, you agree that both fee for service and Medicare Advantage, you
22 know, submitted data included codes that were not supported by the medical records, and
23 omitted diagnostic codes that would be supported by the medical records? Right?
24 THE WITNESS: Yes, it was my understanding that that was true."); *see also*, Ex. D-117
25 at 2992:14-93:1 (Anne Hornsby—CMS corporate representative—testifying: "Q. So you
agree with this testimony that CMS was aware that the diagnosis codes that were coming
from providers to MA plans and then coming to CMS included some unmeasured error
rate; right? A. . . . yes, from the RADV audit process, CMS understood that there was
some error rate because that would be a typical result of the audit process."), D-66 at 2039,
D-155 at 3913:11-22.

26 ⁴ JS at D69-D70; Exs. D-137 at 3435:2-39:17, 3441:10-15, (C. Rice—CMS's Deputy
27 Director of the Center for Medicare—testifying: "Q. So your -- let me ask it this way:
Does a -- does a Medicare Advantage plan have to confirm, through record review, that
28 there is specific support for every single code that it submits for risk adjustment? A. No.");
D-46 at 1099 ("We recognize as well that, as Cigna said, there is no CMS requirement that
MA organizations verify every diagnosis submitted by providers."); D-116 at 2968:6-8
("CMS doesn't have a requirement that tells MAOs they must audit medical records").

1 particular date of service. JS at D50; Exs. D-57 at 1462-64, D-92 at 2547:22-48:4. This
2 means that United's coders are not looking at the chart with an eye toward the diagnoses
3 that doctor had previously submitted and are not making any judgment about whether
4 those codes are supported.⁵ JS at D53; Exs. D-89 at 2456:6-12, D-104 at 2761:2-8, D-57
5 at 1464 .

6 DOJ's own coding expert concedes that there are multiple reasons United coders
7 performing blind chart review might fail to identify a diagnosis code that is actually
8 documented in the medical record. JS at D56; Ex. D-87 at 2396:13-2400:16. United's
9 coders could be unfamiliar with the doctor's handwriting or area of specialization, could
10 be missing pages of the medical record, might have lacked sufficient time to complete the
11 review, or might simply have missed a diagnosis certified by a doctor because a record
12 was lengthy or complex. *See, e.g.*, JS at D58-D61; Exs. D-87 at 2404:4-05:2, D-54 at
13 1291-92; D-87 at 2402:6-04:3; D-93 at 2558:10-59:3; D-108 at 2836:17-37:7. For these
14 reasons, the mere fact that coders reach different outcomes in reviewing a medical record
15 as compared to the codes a doctor's office identified does not necessarily mean the United
16 coders were right and the doctors were wrong. JS at D55-D56, D246, D62; Exs. D-87 at
17 2396:13-400:16, 2404:12-16:, D-54 at 1307-10, D-96A at 2603:10-04:9.

18 **C. Risk Adjustment Data Validation ("RADV") Audits**

19 CMS conducts periodic audits of MA plans—called RADV audits—to determine
20 whether those plans received "overpayments." JS at D71; Exs. D-15 at 623, D-122A at
21 3104:24-05:2, D-117 at 2979:23-80:12. CMS targets particular MA contracts CMS
22 believes are more likely to result in overpayment to the plan. JS at D72-D73; Exs. D-18,
23 at 665-66, D-122A at 3108:2-10:9. To conduct RADV audits, CMS selects a sample of an
24 MA plan's members. *See* JS at D74; Exs. D-122A at 3113:7-14, D-18 at 661. MA plans
25 then submit medical charts for those sampled members, which CMS reviews. *See* JS at
26 _____

27 ⁵ As a practical matter, MA plans must conduct chart review, because Congress enacted
28 legislation that imposes a substantial downward adjustment to MA payment based on
differences in coding patterns between MA plans and traditional Medicare. *See* 42 U.S.C.
§ 1395w-23(a)(1)(C)(ii).

1 D75-D76; Exs. D-122A at 3113:5-14:10, D-15 at 632-33, D-18 at 661. If CMS finds at
2 least one diagnosis from a single chart that corresponds with the health condition for that
3 member for the year, then the condition is upheld and that payment to the MA plan is
4 appropriate. JS at D77-D78; Exs. D-122A at 3119:2-20:19, D-36 at 886-87, D-141 at
5 3523:14-21, D-117 at 2976:13-77:20.

6 CMS conducted RADV audits on certain United contracts for 5 of the 9 years in
7 question here and overwhelmingly validated United's data. JS at D81, D83, D88; Ex. D-
8 82 at 2365-67, D-84 at 2371, D-85 at 2373, D-64 at 1887-88, fig. 15. The audits validated
9 roughly 90% of the conditions for which United was paid. See JS at D83, D88-D89; Exs.
10 D-64 at 1887-88, fig. 15, D-141 at 3520:13-21:22. That level of accuracy was dramatically
11 higher than the data of other large MA plans. See JS at D84-D85; Exs. D-75 at 2256, D-
12 82 at 2365-67, D-122A at 3157:10-64:22. Indeed, after reviewing United's contracts and
13 correcting any discrepancies in the data, CMS found that United had been net *underpaid*
14 for 13 of the 15 contracts reviewed. JS at D91; Exs. D-122A at 3174:13-77:19, D-81 at
15 2342-44, D-83 at 2369 (showing that United was net underpaid by over \$261 million for
16 the contracts audited for 2011–13).

17 **D. United's Complex Auditing Program and the Proposed Medical Record**
18 **Review Rule ("MRRR")**

19 In 2009, the first year covered by this case, there was no rule that required MA plans
20 to design their chart review programs to second-guess diagnosis codes already submitted
21 by doctors. JS at D105-D107; Exs. D-116 at 2954:18-56:22, D-137 at 3473:3-16, D-97 at
22 2628:15-21, 2631:12-17. Admittedly, there was a rule requiring MA plans to attest
23 annually that their data is "accurate, complete, and truthful" based on the plans' "best
24 knowledge, information, and belief." 42 C.F.R. § 422.504(l); JS at D104; Ex. D-1 at 8.
25 Even so, it was true then (and remains true today) that MA plans do *not* have a general
26 obligation to audit their doctor-submitted diagnosis codes before signing the annual
27 attestation. See United MSJ, *supra* at 10-11, n.4; see also, e.g., JS at D69-D70; Ex. D-46
28 at 1099 ("[T]here is no CMS requirement that MA organizations verify every diagnosis

submitted by providers.”). There was also no CMS rule specifying how MA plans should conduct chart reviews. *See* JS at D106, D116; Ex. D-115 at 2955:22-56:22 (Q. “so that’s true to this day, right . . . [never] has CMS, you know, prescribed any requirements for [MA plans] as to how a medical record review must be conducted? A: that is correct.”).⁶

Nevertheless, United tried to develop a process to investigate certain doctor-submitted codes that had not been independently identified by a chart reviewer. JS at D108, D111; Exs. D-95 at 2589:11-18, D-91 at 2516:15-17:21. United implemented the program, which it named “Claims Verification,” in phases from 2010 to 2013. JS at D108-D111; Exs. D-57 at 1466, D-91 at 2516:15-17:21, D-95 at 2589:2-18. The process was time-consuming, complex, and created the possibility of introducing significant errors. JS at D112-D115; Exs. D-92 at 2528:10-29:9, 2535:13-36:15, D-147 at 3717:5-20.

In January 2014, CMS proposed a rule, the MRRR, that would have required MA plans conducting chart review to build the complex auditing program United was already running. *See* JS at D117; Ex. D-16 at 638. The MRRR would have “*strengthen[ed]* existing regulations” by requiring chart review programs to “be designed to identify errors in diagnoses submitted to CMS as risk adjustment data, regardless of whether the data errors would result in positive or negative payment adjustments.” *Id.* (emphasis added). Commentators like United opposed the rule, noting among other things that the process described in the MRRR was vague and would have been complex and burdensome to implement. *See* JS at D118-D119, D135; Exs. D-17 at 651-52, D-114 at 2928:23-29:18, D-124 at 3211:5-16, D-137 at 3455:20-56:12. In May 2014, CMS declined to finalize the MRRR. JS at D136; Ex. D-17 at 651-52.

⁶ *See also* Ex. D-97 at 2628:15-21 (“Q. When you took over as the director for the Center for Medicare, [in March or April 2014] was there any rule or regulation in place that affirmatively required Medicare Advantage plans to proactively review medical records, to audit them, and determine which, if any, codes were not supported? A. Not that I’m aware of.”); *see also* JS at D105; Ex. D-114 at 2925:10-15 (“Q. CMS never specified in regulation prior to this proposal that MA plans were required to design their medical record review rules to look for or identify overpayments? . . . A. Over and under, correct. Q. Otherwise, why would you be proposing the new regulation; right? A. Right.”).

1 For United, the proposed MRRR was especially perplexing because United had
2 *already* built the same kind of complex auditing program before January 2014. JS at D120-
3 D121; Exs. D-154 at 3891:8-21, D-144 at 3639:8-40:16, D-131 at 3352:17-53:24. The
4 MRRR was new, and it was prospective, both of which strongly implied there was no
5 (unwritten) preexisting rule already requiring MA plans to do the same thing. *See* JS at
6 D117-D119, D121; Exs. D-16 at 638, D-114 at 2928:23-29:18, D-144 at 3640:9-16, D-
7 154 at 3891:8-21. In the months that followed, United contacted CMS to clarify whether
8 United’s complex auditing program was already required. JS at D122-D127; Exs. D-9 at
9 421, 427, 445-46, 449, D-10 at 475-76, D-22 at 674-75, D-142 at 3600:3-20. After a
10 number of conversations, on April 29, 2014, United sent key executives to meet with top
11 officials from CMS. JS at D123-D126; Exs. D-9 at 445-46, D-10 at 475-76, D-22 at 674.
12 United’s witnesses testified (and their contemporaneous notes reflect) that during the
13 meeting, CMS told United that unless the proposed MRRR rule became final, MA plans
14 did not have an obligation to confirm whether diagnosis codes submitted by doctors are
15 supported in the medical records. *See* JS at D127, D130-D133; Exs. D-131 at 3352:17-
16 53:24, D-138 at 3487:24-88:10.⁷ CMS witnesses by contrast generally did not recall what
17 was said at the meeting. *See* JS at D128-D129; *see, e.g.*, Exs. D-137 at 3459:7-60:18, D-
18 145 at 3661:25-62:2. Regardless, it is undisputed that, in a follow-up letter, United
19 confirmed its understanding to CMS that “MA plans are [] not currently required to design
20 their medical record reviews to determine the accuracy of risk adjustment diagnoses [and
21 submit appropriate deletes].” JS at D133, D137; Ex. D-71 at 2208.

22
23
24
25
26 ⁷ *See* JS at D126; Ex. D-22 at 674-75 (T. Johnson notes from April 29, 2014 meeting,
27 noting that “CMS representatives reiterated that, under CMS regulations, MA plans were
28 not required to design their chart review programs for overall accuracy until the proposed
rule is finalized” and that Cheri Rice of CMS stated that “until the proposed rule relating
to medical records review was finalized, MA plans do not have a proactive responsibility
to confirm whether diagnoses submitted by physicians are correct”).

1 Shortly after CMS declined to finalize the MRRR, United told CMS that it was
2 ceasing its complex auditing program.⁸ United reiterated its understandings and disclosed
3 its practices repeatedly in subsequent bids and data attestations.⁹ CMS took no remedial
4 action against United. JS at D227-D231; Exs. D-8 at 384-89, D-131 at 3356:8-12.

5 **E. The Diagnosis Codes at Issue**

6 This case is different from cases involving alleged “upcoding”; DOJ does not
7 contend United’s coders falsely documented *any* medical conditions or that there is
8 anything fundamentally wrong with chart review. JS at D41; Exs. D-119 at 3027:17-28:11,
9 D-99 at 2686:13-25 . DOJ also does not contend that United failed to convey accurately
10 the diagnostic data doctors submitted to it. JS at D162; Exs. D-147 at 3707:22-09:14, D-
11 134 at 3395:7-21. And DOJ does not contend that United has an obligation to conduct
12 audits of all the codes it receives from doctors, since no one expects perfect coding
13 accuracy in this payment system. *See* United MSJ, *supra* at 10-11; *see also* D141; Ex. D-
14 35 at 759. Rather, DOJ’s case rests on the assumption that if United coders who reviewed
15 a chart did not identify a diagnosis code, then that necessarily means that a doctor who
16 previously submitted the same code on a claim form did so in error.

17 In order to understand DOJ’s theory, in 2016, United’s very first interrogatory asked
18 DOJ to identify every diagnosis code DOJ alleged United should have “deleted or
19 otherwise returned as an overpayment.” JS at D155; Ex. D-7 at 354. In response, DOJ
20 listed 28 million diagnosis codes (the “FIR” list). JS at D156; Exs. D-11B at 574-75, D-
21 141 at 3569:15-70:1. DOJ asserted that the list contained “every diagnosis code . . .
22 _____

23 ⁸ *See, e.g.*, JS at D137, D154; Exs. D-71 at 2207-08 (April 30, 2014 email from S. Nelson
24 to C. Rice (CMS) regarding 2012 DOS risk adjustment data attestation, noting that CMS
25 confirmed “that MA plans are [] not currently required to design their medical record
26 reviews to determine the accuracy of risk adjustment diagnoses”); D-25 at 689 (providing:
27 “We . . . adjusted projected risk scores to account for changes in our medical record review
28 processes. Specifically, based on multiple conversations with CMS and CMS’s treatment
29 of medical record review in its recent rulemaking process, the health plan has decided to
30 cease one of its prior processes that identified and deleted certain diagnoses codes through
31 the medical record review process.”).

32 ⁹ *See, e.g.*, JS at D150-D154; Exs. D-21 at 671 (email qualifying attestation for 2013
33 DOS); D-23 at 677-78 (attestation for 2014 DOS), D-33 at 729-30.

1 UnitedHealth . . . improperly failed to delete when UnitedHealth’s own reviewers found
2 no support for the diagnosis code in the member’s medical records.” JS at D157; Ex. D-5
3 at 289. As DOJ explained, “[f]or each diagnosis code on the United States’ list: (1) the
4 diagnosis code was submitted by UnitedHealth to CMS . . . ; (2) that medical record went
5 through UnitedHealth’s medical record review program; and (3) UnitedHealth’s own
6 reviewers did not find the diagnosis code to be supported by medical records.” JS at D158;
7 Ex. D-5 at 289. In another response, DOJ accused United of “failing to delete . . . diagnosis
8 codes . . . that its Chart Review program revealed were not supported by medical record
9 documentation.” JS at D159; Ex. D-12 at 597.

10 DOJ’s central allegation, memorialized in these responses, is that whenever a
11 doctor-certified diagnosis code was not identified in a chart review, that “revealed” the
12 diagnosis did not exist and any payment based on that diagnosis was invalid. For example,
13 in DOJ’s view, if a doctor submitted a “diabetes” code in a claim form after seeing a
14 patient, but United coders did not code “diabetes” in reviewing the medical chart, then the
15 diabetes code *must* be invalid because United’s coders reviewed the chart for the same
16 visit for which the doctor’s office submitted a code for diabetes. DOJ did not review *any*
17 medical records to test that allegation. JS at D165-D166; Exs. D-57 at 1547, D-110 at
18 2864:21-65:3.

19 Consistent with its categorical theory that every time United coders do not identify
20 a diagnosis that necessarily “revealed” the doctor was wrong, DOJ produced an expert,
21 Dr. Craig Garthwaite, to identify the set of diagnosis codes that were unsupported and led
22 to overpayments. *See* JS at D163-D164; Ex. D-57 at 1446-47. Dr. Garthwaite did not
23 review *any* medical charts and did not opine as to whether a single diagnosis code was in
24 fact unsupported. JS at D165-D166; Exs. D-57 at 1547, D-110 at 2864:21-65:3. Dr.
25 Garthwaite also disclaimed that he had, or would express at trial, any opinion as to the rate
26 at which the diagnosis codes at issue were unsupported. JS at D167-D168; Ex. D-110 at
27 2868:12-69:11. Instead, the Garthwaite report is *entirely* based on an assumption that
28

1 parallels DOJ's hypothesis that *every* diagnosis previously certified by a doctor but not
2 separately identified by a United chart reviewer is invalid. JS at D169; Ex. D-57 at 1547.

3 The report proceeds in two conceptual steps. *First*, Dr. Garthwaite identifies a set
4 of what he calls "potential deletes," which is the set of diagnosis codes submitted by
5 doctors in claims but not identified by United's chart reviewers: "To identify Potential
6 Deletes, I identify all diagnosis codes that are Submitted Diagnosis Codes but not
7 Supported Diagnosis Codes (i.e., all diagnosis codes from Reviewed Encounters that were
8 submitted to CMS but were not found to be supported in the Chart Review Program)." JS
9 at D170-D176; Ex. D-57 at 1484. *Second*, Dr. Garthwaite tried to determine the subset of
10 these "potential deletes" that impacted United's *payment* from CMS. Dr. Garthwaite called
11 this subset of codes "deletes." JS at D177-D178; Ex. D-57 at 1489-90. He identifies 1.97
12 million diagnosis codes as "deletes," or roughly 7% of the 28 million codes DOJ claims
13 in the First Interrogatory Response United was required to delete. JS at D179; Ex. D-65 at
14 1917-18, D-110 at 2875:18-21. The remaining 93% of the "potential deletes" concededly
15 had no payment impact. JS at D183; Ex. D-65 at 1916-19.

16 UNITED STATES' BACKGROUND

17 United's Contracts with CMS. Each year, United entered into contracts with CMS and
18 agreed to comply with "the requirements of this contract and applicable Federal statutes,
19 regulations, and policies." Pursuant to these contracts, United received a monthly payment
20 for each beneficiary enrolled in its health plans. See D-3, Dkt. 250-1, at 162-63 ¶¶ 6, 8-9
21 (undisputed by both parties). And as a condition for receiving those monthly payments,
22 United agreed that it would attest to the "accuracy, completeness, and truthfulness" of the
23 data it submitted to CMS "based on best knowledge, information and belief." See, e.g., P-
24 1A, at 3984 Art. II(A), 3986 Art. IV(D) (2017 PY Contract); see also P-1, at 3977 ¶ 7
25 (Joint Stipulation).

26 During the relevant time period, Optum, a member of United's corporate family and
27 a defendant in this case, performed risk adjustment services for United, including, among
28 other things, Chart Review and Coding, Claims Verification, and submitted beneficiary

1 data to CMS on behalf of the MAO Defendants. D-69, at 2116-2203; P-1, at 3977 ¶ 6; P-
2 1B, 3994-99 (Optum EDI Agreement); P-2, United 30(b)(6) (Cannon) (Jun. 6, 2023) Tr.
3 4021 at 31:11-18. Before submitting any data, both the MAO Defendants and Optum
4 signed EDI Agreements, P-1, at 3977 ¶ 2, which included the following terms: “Based on
5 best knowledge, information, and belief, that it will submit risk adjustment data that are
6 accurate, complete, and truthful” and “that it will research and correct risk adjustment data
7 discrepancies.” P-1C, at 4022 §§ A(5) and A(11) (Defendant MAO EDI Agreement); P-
8 1B, at 3994 §§ A(5) and A(11) (Optum EDI Agreement).

9 Risk Adjustment Payment Process. The monthly payments from CMS to MA Plans
10 are determined based on the health status of a beneficiary. *See* D-3, Dkt. 250-1, at 162-63
11 ¶¶ 6, 8-9 (undisputed by both parties). Diagnosis codes represent a specific health
12 condition (for example, diabetes) and are used to determine the health status of a
13 beneficiary. P-3, 2008 RAPS Participant Guide (Participant Guide) at 4039-40 § 6.2.
14 MAOs like United receive claims and encounter data, including diagnosis codes, from
15 healthcare providers who treat their beneficiaries. P-3, Participant Guide at 4034 § 2.2.2.
16 These diagnosis codes may have been coded by the healthcare providers themselves or by
17 office personnel or professional coders. *See* D-53, Acevedo (US Expert) Rebuttal Rep.
18 1272 ¶ 72. MAOs submit that diagnosis data to CMS. P-5, United 30(b)(6) (Sedor) Tr.
19 4074:19-4075:7. Separately, an MAO may conduct Chart Reviews (i.e., employ
20 professional coders to review a provider’s medical record for supportable diagnosis codes)
21 and submit additional diagnosis data emanating from that review. *Id.* Regardless of the
22 source of the data, MAOs bear the ultimate responsibility for the accuracy of the data they
23 submit to CMS. P-8, Medicare Managed Care Manual, Rev. 118 (Sept. 19, 2014), at 4200-
24 01 Ch.7 § 120.2.1.

25 Every diagnosis code submitted to CMS must be supported by documentation in the
26 medical record based on a face-to-face encounter with a provider (e.g., a doctor visit on
27 May 1, 2014 where it is documented in the patient’s medical record that he had COPD).
28 *See* P-60, 42 C.F.R. § 422.310(d)(1), at 4848; P-77, 45 C.F.R. § 162.1002(c)(2)-(3), at

4953-54; P-9, Managed Care Manual, at 4204-06 Ch. 7, Exhibit 30 (Aug. 13, 2004); P-8, Managed Care Manual, Rev. 118 (Sept. 19, 2014) at 4197-99 § 40; P-3, Participant Guide at 4036 § 3.2.4; P-5, United 30(b)(6) (Sedor) Tr. 4076:4-22. MAOs are required to delete incorrect diagnosis data (including unsupported codes). P-8, Managed Care Manual, Rev. 118 (Sept. 19, 2014), at 4197-99 Ch.7, § 40; P-3, Participant Guide at 4037-38 §§ 4.13-4.14, 4.16; P-5, United 30(b)(6) (Sedor) Tr. 4080:22-4081:21.

When determining payment to MAOs, CMS groups multiple diagnosis codes for similar or related conditions together under broader categories known as Hierarchical Condition Categories (HCCs). P-5, United 30(b)(6) (Sedor) Tr. 4062:25-4066:20. For example, both simple chronic bronchitis (diagnosis 4910) and interstitial emphysema (5181) map to Chronic Obstructive Pulmonary Disease (HCC 108). P-43 at 4472-4527 (2012 Risk Model Diagnoses); P-80, at 4983 (2013 Call Letter). CMS uses the HCCs associated with a particular beneficiary, together with certain demographic information, to calculate the beneficiary's "risk score." P-5, United 30(b)(6) (Sedor) Tr. 4063:14-4064:2. Because many of the HCCs are in hierarchies, only the highest HCC in the hierarchy will increase the risk score. *Id.* at 4064:12-4065:13. The risk score determines the monthly payment the MAO will receive for that beneficiary. *Id.* at 4067:25-4068:7, 4078:23-4079:6. Therefore, diagnosis codes that "map" to an HCC (i.e., diagnosis codes that feed into, or map, to the higher-level broader category, or HCC) directly increase the MAO's payment for that beneficiary. *Id.* at 4072:23-4073:5.

If an MAO submits multiple diagnosis codes for the same beneficiary that map to the same HCC, the CMS payment system only counts each HCC once per year in calculating the beneficiary's risk score (and thus payment). *Id.* at 4064:12-4065:13. This process for calculating risk scores is done automatically within the CMS system. P-3, Participant Guide at 4033, 4035, 4045-46 §§ 2.1, 2.2.4, 8.1 at Table 8A. Since the payment system automatically "maps" each diagnosis code to the appropriate HCC and only counts once each HCC impacting the risk score, MAOs do not need to determine whether multiple

1 diagnosis codes mapping to the same HCC have been submitted for a beneficiary before
2 submitting or deleting diagnosis codes. P-10, Rice Tr. 4216:13-4217:1, 4225:14-4226:3.

3 CMS recalculates all risk scores three times per year and makes interim payments
4 to MAOs monthly. P-5, United 30(b)(6) (Sedor) Tr. 4057:19-4058:4, 4067:16-4068:23,
5 4084:25-4085:6. Each time the risk scores are calculated, CMS uses whatever diagnosis
6 data the MAO has submitted up to that time, including additions and deletions, and adjusts
7 the per member/per month payment amount for each beneficiary. *Id.* at 4067:16-4068:23.
8 In other words, the final reconciliation automatically “trues up” the payments to the MAO
9 based on the data that is in the system at the time of the final reconciliation, and either
10 increases payments resulting from the submission of additional codes or recovers
11 overpayments resulting from the deletion of invalid codes (by reducing future payments).
12 *See id.* at 4067:16-4069:23. CMS sets deadlines for the submission of additional supported
13 codes before it conducts a final reconciliation. P-60, 42 C.F.R. § 422.310(g)(2), at 4850;
14 P-3, Participant Guide at 4032 § 1.4. While MAOs can correct (i.e., delete) previously
15 submitted data after the final submission deadline, MAO’s are not permitted to add
16 diagnosis codes to increase payments after final reconciliation. P-60, 42 C.F.R.
17 § 422.310(g)(2)(ii), at 4850; P-5, United 30(b)(6) (Sedor) Tr. 4067:16-4069:23. CMS
18 periodically reruns the risk scores and recalculates the MAO payments to account for
19 deletions made after the final submission deadline. *Id.* If an MAO deletes a code after the
20 final submission deadline, during a rerun the system again automatically calculates the
21 amount of any overpayment and recovers the overpayment by reducing future payments.
22 P-5, United 30(b)(6) (Sedor) Tr. 4072:4-22.

23 RADV Audits: CMS’s RADV audit process is completely distinct from the ordinary
24 MA payment process; this case is not about RADV Audits. *See* P-3, Participant Guide at
25 4042 § 7.1.1. RADV is a process that CMS uses to address mistaken payments, not an
26 assessment of damages for knowing conduct. P-56, CMS 30(b)(6) (Kapustij) Tr. 4796:5-
27 18 (“CMS is not conducting RADV Audits to determine if there is fraud.”). And the
28 RADV process differs from the payment process in important ways. In RADV Audits,

1 long after the final submission deadline, CMS allows MAOs to search for and submit up
2 to five medical records (from any source) in an attempt to show support for an HCC
3 selected for audit. D99, D100. This means that a RADV Audit could find support in a
4 medical record for a diagnosis code (that maps to the relevant HCC) that was never
5 submitted to CMS, or even one that was never submitted to the MAO by the provider. P-
6 6, Renjilian Tr. 4151:7-4152:14 (United Expert testifying that MAOs “can submit any
7 medical records in support of the HCC and they don’t necessarily need to relate to a
8 specific diagnosis that was submitted” and that RADV auditors may “consider[] a record
9 that is not associated with a submitted diagnosis code and find[] that record to support the
10 HCC”). In contrast, in the routine payment process, plans receive payment only for
11 diagnosis codes they actually submit to CMS in advance of the final submission deadline,
12 which must be supported by a medical record associated with a specific provider-
13 encounter for a specific date of service. P-6, Renjilian (United Expert) Tr. 4120:13-4123:7,
14 4155:23-4156:21; P-5, United 30(b)(6) (Sedor) Tr. 4069:9-14. United’s own expert agrees
15 that validation of an HCC in a RADV Audit does not mean that the provider-submitted
16 diagnosis codes are supported by the specific medical record reviewed in Chart Review.
17 P-6, Renjilian Tr. 4143:18-4144:5 (United Expert testifying that it is unknown “which
18 specific diagnosis was found by the RADV auditors to be supported, but it’s just that the
19 HCC was supported.”).

20 United’s Chart Review Program. United’s Chart Review program is an audit
21 process to “second-guess providers” to generate additional revenue from CMS by
22 identifying diagnosis codes supported by medical charts that its providers had not
23 submitted. Although the Chart Review program is central to this case, United provides
24 scant – and sometimes misleading – information about the program. United’s Chart
25 Review program was a highly sophisticated operation designed to “submit a more
26 complete health status from medical records collected on a member for appropriate
27 payment from CMS.” P-7, United 30(b)(6) (Baker) Tr. 4167:10–20. Chart Review was a
28 highly lucrative program for United; in fact, United estimated that for date of service years

2009–2016, CMS paid it more than \$7.2 billion in **additional** risk-adjustment payments for codes United added during Chart Review that were not previously submitted by providers. P-11 at 4245-47, United’s Responses and Objections to US Interrogatory Set Six, at Response to Interrogatory 18. In its Chart Review program, United collected charts from providers who had reported to United encounters with beneficiaries, and for which United had submitted diagnosis codes to CMS. *See* D47.

United’s policy was to use only certified medical coders for its Chart Reviews. P-12 at 4254-58, Chart Review Policy; P-7, United 30(b)(6) (Baker) Tr. 4180:1–4. United also trained its coding staff, both before they began coding charts and thereafter. *Id.* at 4180:5-4181:9. United measured its coders based on their coding accuracy. Coders had to achieve an accuracy score of 95% or higher on several sets of practice charts in order to successfully complete training and move into production (i.e., start reviewing charts for diagnosis codes that would be submitted to CMS). P-13, Coding Guide at 4261; P-7, United 30(b)(6) (Baker) Tr. 4179:11-15. Even after a coder moved into production, United employed quality assurance processes to ensure that the coder was meeting or exceeding a 95% accuracy standard. *Id.* at 4168:3-9, 4177:21-4178:4 (“[O]ur program was designed to have what they were coding to be at 95 percent or above accuracy.”).

United’s Chart Review was generally done in a “blind” fashion, meaning that the coder reviewing a particular chart did not know what diagnosis codes the provider had submitted. D51; P-7, United 30(b)(6) (Baker) Tr. 4184:18-22, 4186:17-4187:14. United instructed its coders to identify **all** risk-adjusting diagnosis codes supported by the charts for each date of service reviewed. P-14 at 4264, Coding Policy (“All ICD-9s that map to medical and/or Rx HCC will be coded for every date of service for that patient. . . . OptumInsight coding practice instructs those coding on its behalf to code all medical and Rx HCCs for every date of service of each patient.”); P-15, United 30(b)(6) (Baker) Tr. 4267:12-22. In fact, United evaluated coders based on their ability to identify diagnosis codes supported by the medical records, and assigned “completeness” scores based on whether a quality assurance coder identified additional diagnosis codes that had not been

1 identified by the initial coder. P-7, United 30(b)(6) (Baker) Tr. 4192:1-13. For dates of
2 service years 2014-2016, United also introduced a process called “second-level review,”
3 in which certain charts that had already gone through an initial blind chart review were
4 assigned to a second coder to conduct yet another blind review in an attempt to capture
5 even more diagnosis codes. D243; P-7, United 30(b)(6) (Baker) Tr. 4188:4-12 (second-
6 level review instituted because not every coder would get to “100 percent completeness”).

7 From the beginning of its Chart Review program, United was aware that providers
8 sometimes submit diagnosis codes to MAOs that were not supported in the underlying
9 medical records. *See* D32; P-73, at 4918-19 (2004 Presentation showing unsupported
10 provider-submitted diagnosis codes identified in a chart review performed by United’s
11 acquisition, Pacificare). Critically, United’s database contained all the provider reported
12 diagnosis codes that United submitted to CMS for payment, so United could readily
13 compare the codes identified from its Chart Review program with what had previously
14 been submitted. D-57, Garthwaite (US Expert) Report, at 1472-75 ¶¶ 69-75. In fact, United
15 **did** compare its Chart Review results to diagnosis codes it previously submitted to CMS
16 to identify codes found supported in Chart Review that were new (i.e., not previously
17 submitted for that beneficiary). P-76, Martin Tr. 4949:13-24 (United’s “x19 process”
18 compared diagnosis codes identified in Chart Review with diagnosis codes submitted from
19 providers for the same date of service before submitting the diagnosis codes identified in
20 Chart Review); P-72, United 30(b)(6) (Cannon) Tr. 4910:8-14 (same); P-5, United
21 30(b)(6) (Sedor) Tr. 4094:24-4095:22 (describing United’s process to “identify which of
22 those codes from a chart review were new and unique for submission” by comparing the
23 diagnosis codes that had been submitted by a provider with what had been found in the
24 chart review). Conversely, United **did not** run a comparison to identify diagnosis codes
25 previously submitted to CMS that were **not found supported** in United’s Chart Review of
26 the medical record associated with that submission. *See* D50, P-71 Bird Tr. 4905:22-
27 4906:8. In fact, other than in the limited “Claims Verification” program discussed below,
28 United took no steps to follow up on any such discrepancies for diagnoses submitted for

1 Service Years 2008-2016 and did not delete those codes. P-5, United 30(b)(6) (Sedor) Tr.
2 4108:24-4109:6. Those are the **only** codes at issue in this case.

3 United's Claims Verification Program. From 2010 to April 2014, United conducted
4 a limited audit program called Claims Verification. In Claims Verification, United
5 investigated some (though not nearly all) of the codes that United had submitted for
6 payment but were not found supported by its Chart Review coders. *See* P-16, United
7 30(b)(6) (Bird) Tr. 4271:11-4273:20; D-57, Garthwaite (US Expert) Report, at 1466-69
8 ¶¶ 55-60. Optum described its Claims Verification program as a Risk Adjustment
9 Compliance Service with the sole purpose of complying with CMS's expectation that
10 when plans conduct chart review, they "should be correcting/removing codes that were
11 submitted on claims and not supported in the corresponding charts." P-17, at 4293
12 ("Recently, CMS announced a settlement with SCAN health plan¹⁰ which outlined the
13 expectation that when plans conduct chart review, they should be correcting/removing
14 codes that were submitted on claims and not supported in the corresponding charts, *which*
15 *is the sole purpose of our Claims Verification offering.*") (emphasis added); *see also* P-16,
16 United 30(b)(6) (Bird) Tr. 4283:7-25 (noting the purpose of Claims Verification was to
17 submit "delete transactions" to CMS where "HCCs that were supposed to be evidenced in
18 a chart were either not evidenced in the chart, or not appropriately evidenced in the
19 chart.").

20 In Claims Verification, United compared the codes that United's coders identified
21 as supported in the medical records in the Chart Review program to the codes that United
22 had already submitted for payment in connection with the same medical record in order to
23 identify discrepancies to be investigated or deleted. *Id.* at Tr. 4282:1-12. United used
24 "matching logic" to compare: (a) the HCCs associated with the diagnosis codes that
25 providers had submitted to United in claims for services to its beneficiaries; and (b) the
26 HCCs associated with the diagnosis codes that United's own coders found supported based
27

28 ¹⁰ The SCAN settlement was an August 2012 FCA settlement, as United was aware. P-18,
at 4297 (March 7, 2013 CV Presentation).

1 on their review of those same beneficiaries' charts in Chart Review. *Id.* at 4286:21-24.
2 When HCCs associated with diagnosis codes that originated from providers were *not*
3 identified as supported in Chart Review, the corresponding medical records were placed
4 in the "CV inventory" for additional medical record review. *Id.* at 4284:20-4285:10.
5 Rather than simply deleting all such discrepancies, United further reviewed the charts to
6 determine if it could find support for those codes. *Id.* If United could not validate the
7 discrepant diagnosis codes by finding support in medical records through this review, it
8 deleted those diagnosis codes. *Id.* at 4277:24-4278:6. United designed Claims Verification
9 with a limited scope, such that only a small subset (less than 25%) of the charts that went
10 through Chart Review were deemed "eligible" for the Claims Verification. *See id.* at
11 4287:19-4289:21. United terminated Claims Verification entirely in 2014. *Id.* at 4272:22-
12 7274:11. Thus, in Claims Verification, United identified some of the diagnosis codes it
13 had submitted, but were not found supported in Chart Review, and deleted those diagnosis
14 codes. Pursuant to those deletes from Claims Verification program, CMS recouped more
15 than \$200 million from United. P-11 at 4249-50, Response to Interrogatory 20.

16 The Resulting Overpayments. United's own data shows that codes not found
17 supported in Chart Review had been submitted for payment and resulted in overpayments.
18 The government's expert witness, Dr. Craig Garthwaite, analyzed United's Chart Review
19 and risk adjustment data and identified diagnosis codes that were: (1) submitted for
20 payment by United; (2) not found to be supported by United's Chart Review Coders'
21 review of the medical record linked to that submission; and (3) not deleted. Dr. Garthwaite
22 also calculated how much United's payments would have decreased had United deleted
23 those codes. *See* D-57, Garthwaite Report, at 1446-47 ¶ 13. Dr. Garthwaite identified
24 approximately 2 million diagnosis codes, listed on Attachment 1 to his expert report, that
25 resulted in overpayments to United, and for which the government seeks damages. *Id.*; P-
26 74, Garthwaite Tr. 4938:10-11 ("There are millions of diagnosis codes, 1.9 million
27 diagnosis codes on Attachment 1"). According to Dr. Garthwaite's analysis, every
28 diagnosis code on Attachment 1 was submitted by United to CMS for risk adjustment

1 payment, linked to a Chart Review in United’s databases, and was not found supported by
2 United coders in that Chart Review when the coder was looking at the medical record
3 underlying the original provider-submitted diagnosis code for an encounter on given date
4 of service. D-57, Garthwaite Report, at ¶ 1446-47, 1479 ¶13, 85.

5 Dr. Garthwaite calculated that United’s risk adjustment payments for the relevant
6 time period would have decreased by approximately \$2.1 billion if United had deleted the
7 approximately 2 million diagnosis codes. *Id.* at 1446-47, 1480 ¶¶ 13-14, ¶ 86. Importantly,
8 Dr. Garthwaite essentially simulated CMS’s payment system process by searching data
9 that was submitted to CMS for any other diagnosis code that mapped to the same HCC as
10 the unsupported code and thus would have, pursuant to the CMS payment system rules,
11 resulted in a payment to the MAO for the HCC, before concluding that the unsupported
12 code had a financial impact (i.e., resulted in an overpayment). Dr. Garthwaite also took
13 his analysis one step further, as he removed diagnosis codes from his list of deletes if
14 United’s risk adjustment data contained another instance of a diagnosis code mapping to
15 the same HCC that was not impacted by the results of United’s Chart Review program,
16 even if that other instance was never submitted to CMS (essentially giving United “credit”
17 for diagnosis codes it could *not* have received from CMS in routine processing). D-57,
18 Garthwaite Report, at 1489 ¶ 116; P-74, Garthwaite Tr. 4935:5-13.

19 First Interrogatory Response. During discovery in this matter, Defendants requested
20 that the United States identify “every Diagnosis Code You allege UnitedHealth
21 ‘knowingly and improperly failed to delete . . . or otherwise return to the Medicare
22 Program [as an] overpayment.’” D-11B, US Responses and Objections to UnitedHealth’s
23 First Interrogatory (First Supplemental), at 573. The United States identified
24 approximately 28 million diagnosis codes responsive to this interrogatory. *Id.* While those
25 codes should have been deleted because they were unsupported, not all of those deletions
26 would have impacted payment, which is the question addressed by Dr. Garthwaite. P-10,
27 Rice Tr. 4216:13-4217:1, 4225:14-4226:3; P-74, Garthwaite Tr. 4937:16-22; *see also id.*
28 at 4930:13-4934:18 (explaining how his analysis is conceptually different from what he

understands is included in the US First Interrogatory Response). Additionally, Dr. Garthwaite conservatively did not include on his “deletes list” every diagnosis code that United’s Chart Review program showed was unsupported, but rather only included diagnosis codes that would impact a beneficiary’s risk score if deleted, and only included diagnosis codes where United’s risk adjustment databases contained no other instance of any diagnosis mapping to the same HCC, even those United never submitted to CMS. D-57, Garthwaite Report, at 1489 ¶ 116; P-74, Garthwaite Tr. 4935:5-13. Because Dr. Garthwaite is addressing a question fundamentally different from the question in United’s First Interrogatory, the resulting numbers are starkly different. To be clear, the United States is only seeking damages in this matter with respect to the approximately 2 million deletes identified by Dr. Garthwaite. United’s constant reference to the 28 million codes listed on the discovery response is nothing more than further attempt to muddy the facts.

Medical Record Review Rule. The Medical Record Review Rule (MRRR) was one part of a much broader rule that CMS proposed in January 2014 to address a wide range of MA topics. D-16 at 636-40, Contract Year 2015 Policy and Technical Changes to the Medicare Advantage Program, 79 Fed. Reg. 1918 (Jan. 10, 2014). The proposed rule provided that “medical record review methodology must be designed to identify errors in diagnoses submitted to CMS. . . regardless of whether the data errors would result in positive or negative payment adjustments.” *Id.* at 638. Because of stakeholder concerns with the broader rule, CMS ultimately did not finalize this provision in the final rule published in May 2014. P-92, at 5044, 5047, Contract Year 2015 Policy and Technical Changes to the Medicare Advantage Program, 79 Fed. Reg. 29,844, 29,926 (May 23, 2014) (to be codified at 42 C.F.R. pts. 417, 422-24); P-21, CMS 30(b)(6) (Hornsby) Tr. 4334:7-11; P-10, Rice Tr. 4227:23-4228:12. However, CMS advised MAOs that not finalizing the proposed MRRR did “not change CMS’s existing contractual requirement that MA organizations must certify (based on best knowledge, information, and belief) the accuracy, completeness, and truthfulness of the risk adjustment data they submit to CMS” and did “not change the long-standing risk adjustment data requirement that a diagnosis

submitted to CMS by an MA organization for payment purposes must be supported by medical record documentation.” P-92, at 5047. Before and after the MRRR was proposed, CMS’s longstanding regulatory and contractual requirements for MA plans remained the same. MA plans always had a duty to submit accurate, complete, and truthful data, and to delete unsupported diagnosis codes. P-10, Rice Tr. 4241:18-25; P-22, CMS 30(b)(6) (Hornsby) Tr. 4338:20-4339:21; P-20, Cavanaugh Tr. 4314:9-15; P-23, Blum Tr. 4344:16-19. CMS communicated this message directly to United at the time. *See, e.g.*, P-20, Cavanaugh Tr. 4315:15-20; P-24 at 4347-48, 2014 CMS/United correspondence.

April 29, 2014 Videoconference. United asserts that during a 45-minute videoconference on April 29, 2014, CMS advised United that it had no obligation to confirm the validity of codes not found supported in its Chart Review program until the proposed MRRR was finalized. Joint Brief, 15. United misstates the facts about this highly disputed videoconference between several CMS employees and several United employees. While United’s Chart Review program is at the heart of this case, United’s Claims Verification program was the focus of discussion at this brief videoconference. P-25, Nelson Tr. 4351:7-23 (United objectives of meeting were to get clarification on timing of proposed rule and get info to make decision on CV program), 4352:24-4353:5 (purpose of meeting was to discuss status and timing of proposed rule and “requirement or not” to have a CV program).

There is no evidence that United explained or that CMS understood that United was proposing to ignore the negative results of its Chart Review program, and ample evidence to dispute United’s contention that CMS consented to United’s decision to ignore those negative results. Further, there is abundant evidence that United did not even provide CMS with enough information about its Claims Verification program to allow CMS to provide specific guidance about United’s practices. P-10, Rice Tr. 4238:12-4239:2 (CMS did not know the details of United’s program or what review of potential unsupported codes had been done); 4236:20-4237:7 (CMS would have needed a lot more information about the scope of what United was doing, what information they had, and how much due diligence

1 they had done); P-26, CMS 30(b)(6) (Hornsby) Tr. 4364:4-19 (information provided was
2 vague); P-28 at 4376 (contemporaneous notes of Daniel Schumacher (UHC CFO) quoting
3 Cheri Rice as saying she did not know enough about United's process to make
4 "judgments").

5 Rather, CMS warned United that there are legal requirements in place, including
6 the False Claims Act, that govern the accuracy of data submitted to CMS. P-20,
7 Cavanaugh Tr. 4318:14-4319:2; P-10, Rice Tr. 4232:4-12 (Rice reminded United about
8 potential FCA exposure). Contemporaneous notes taken by United's Dan Schumacher
9 explicitly include these statements he attributed to CMS's Cheri Rice: "Not acceptable to
10 not delete what we know;" "If you have knowledge of deletes, you should delete;"
11 "Statutory obligations to report and repay;" "FCA implications;" "Haven't known enough
12 process to give feedback on our judgments." P-28 at 4376, Schumacher Notes. Relatedly,
13 Thad Johnson, United's in-house counsel who participated in the videocall, recalls that in
14 response to United raising the issue of "deletes" being submitted or in process, Rice raised
15 the topic of the FCA. P-29, Johnson Tr. 4379:21-4380:16.

16 CMS reiterated this message in writing following the meeting: "I would note that
17 regardless of the effective date of the proposed requirement related to medical record
18 reviews, there are other laws that do impose standards, requirements and responsibilities
19 on MA plans in connection with the federal payments they receive from CMS. We cannot
20 provide advice to United about the scope of those other laws. Nor can we provide advice
21 on whether United's plan course of action and/or purported limits on the scope of its
22 attestation are compliant with such other laws." P-24, at 4347 (2014 CMS/United
23 correspondence); P-10, Rice Tr. 4234:13-4235:1, 4236:13-17 (Rice's intent in sending this
24 email to United was "making clear that they should not take away from that meeting that
25 we had said that it was okay to stop the claims verification program, or that it was okay
26 not to continue to review and determine whether those questionable diagnoses were
27 accurate or not"). CMS has continued to reiterate that message to United since then. P-1D
28

1 at 4008-09; P-1E at 4011-12; P-1F at 4015-16 (CMS's responses to United's
2 correspondence sent with its 2014/2015/2016 Payment Year attestations).

3 Tellingly, United fails to mention that at the time it requested this meeting with
4 CMS, it knew that the DOJ had already been investigating this matter for approximately
5 two years. United likewise fails to mention that at the time it arranged to meet with CMS,
6 it was grappling with a projected \$500 million budget deficit and that high-ranking United
7 executives, including some of those that attended this videoconference, were considering
8 cancelling its Claims Verification program as part of a solution to bridge that budget gap.
9 P-81, MAPL009701356, at 4986, 4988 (UHC M&R Draft Business Plan 2015). These are
10 facts the jury should be able to consider in determining United's motivation for and
11 conduct related to – including its retelling of anything it “took away” from – that meeting.
12 Following the meeting, and upon receiving correspondence from United's outside counsel
13 with its “interpretation” of the events of the meeting, *see* P-40 at 4462-63 (Letter from
14 Latham & Watkins to DOJ), DOJ counsel responded, specifically referring to Ms. Rice's
15 correspondence, and further informing United that, “Thus, CMS did not agree that
16 UnitedHealth Group's planned actions and its purported limited attestation are compliant
17 with the laws that apply to Medicare Advantage plans. As you know, such laws include
18 the federal False Claims Act.” P-75 at 4942-43 (Letter from DOJ to Latham & Watkins).

19 Finally, a short videocall with one individual MAO (out of hundreds) is simply not
20 a forum in which CMS would dispense advice on how MAOs must comply with its
21 regulatory duties. *See* P-26, CMS 30(b)(6) (Hornsby) Tr. 4363:1-24 (CMS did not have
22 enough information, but even if it did, CMS does not provide advice in meetings like that);
23 P-27, Tudor Tr. 4373:3-11, 20-24 (CMS can provide information on what requirements
24 are, but does not opine on whether specific activity is compliant with a regulation).

LEGAL ARGUMENT REGARDING UNITED’S MOTION FOR SUMMARY JUDGMENT

I. UNITED’S LEGAL ARGUMENT ON ISSUE NO. 1: WHETHER THE COURT SHOULD GRANT SUMMARY JUDGMENT AS TO THE REVERSE FCA CLAIM

As relevant here, the FCA penalizes “[a]ny person who . . . knowingly conceals or knowingly and improperly avoids or decreases an obligation to pay or transmit money or property to the Government.” 31 U.S.C. § 3729(a)(1)(G). The Supreme Court has explained that “[w]hat matters is not the label the government attaches to a requirement [for payment], but whether the defendant knowingly violated a requirement that the defendant knows is material to the Government’s payment decision.” *Universal Health Servs., Inc. v. United States*, 579 U.S. 176, 181 (2016) (*Escobar*). To prevail, DOJ must prove that United (1) was overpaid, (2) knowingly violated an “obligation” to return money to the government, (3) engaged in conduct that was material to CMS’s decision to pay, and (4) engaged in some form of deceit to meet the “rigorous” definition of “fraud.” *Id.* at 187, 192.

DOJ’s case falters on each element. DOJ has no proof that the diagnoses at issue were incorrect or led to overpayments. DOJ also cannot show that United had any obligation to second-guess doctors’ certifications that their diagnoses accurately reflect the patients’ health conditions. DOJ also cannot show that United’s chart review practices were material to CMS’s payments, or that United took any steps to deceive CMS. For these four independent reasons, the Court should grant United’s motion for summary judgment.

US RESPONSE TO ISSUE NO. 1: THE COURT SHOULD DENY SUMMARY JUDGMENT AS TO THE REVERSE FCA CLAIM

The United States alleges that United violated the second prong of the reverse false claims provision. 31 U.S.C. § 3729(a)(1)(G). Under that provision, United is liable if it: (1) improperly avoided an obligation to pay; and (2) did so “knowingly.” *Sutter*, 444 F.

1 Supp. 3d at 1055-56. Congress first added the reverse FCA provision in 1986, to cover
2 Government money. . . that is knowingly retained by a person even though they have no
3 right to it.” *United States ex rel. Silingo v. WellPoint, Inc.*, 904 F.3d 667, 676 (9th Cir. 2018)
4 (citations omitted). Congress intended “to provide that an individual who makes a material
5 misrepresentation to avoid paying money owed the Government would be equally liable
6 under the Act as if he had submitted a false claim to receive money.” See S. Rep. No. 99-
7 345, at 18, *as reprinted in* 1986 U.S.C.C.A.N. 5266, 5283.

8 In 2009, Congress amended the FCA through the Fraud Enforcement and Recovery
9 Act of 2009 (FERA), “broaden[ing] the scope to which reverse false claims liability would
10 attach.” *United States ex rel. Customs Fraud Investigations, LLC. V. Victaulic Co.*, 839
11 F.3d 242, 253, 255 (3d Cir. 2016). Congress added a second prong to the reverse FCA
12 provision, which eliminated the need for a false statement and imposed liability on anyone
13 who “knowingly conceals **or knowingly and improperly avoids or decreases an**
14 **obligation to pay or transmit money or property to the Government.**” 31 U.S.C.
15 § 3729(a)(1)(G) (emphasis added). Under the reverse FCA provision, “avoiding” an
16 obligation to pay is when an individual is put on notice of a potential issue, is legally
17 obligated to address it, and does nothing. See *Kane ex rel. United States v. Healthfirst,*
18 *Inc.*, 120 F. Supp. 3d 370, 394 (S.D.N.Y. 2015).

19 Through FERA, Congress added the following definition of the term “obligation:”
20 “an established duty, **whether or not fixed**, arising from an express or implied contractual,
21 grantor-grantee, or licensor-licensee relationship, from a fee-based or similar relationship,
22 from statute or regulation, or from the retention of any overpayment.” 31 U.S.C.
23 § 3729(b)(3) (emphasis added). In doing so, Congress rejected prior court interpretations
24 of the reverse FCA provision that required an obligation to be a sum certain, and instead
25 adopted the Ninth Circuit standard that an obligation arises “where there is a relationship
26 between the Government and a person that ‘results in a duty to pay the Government money,
27 whether or not the amount owed is yet fixed.’” S. Rep. No. 111-10, at 14 (2009) (quoting
28 Brief for the Appellee at 24, *United States v. Bourseau*, 531 F.3d 1159, 1170 (9th Cir. 2008)).

1 Upon a finding of liability, a defendant must pay for “3 times the amount of damages
2 which the Government sustains because of the act.” 31 U.S.C. § 3729(a)(1); *Bourseau*,
3 531 F.3d at 1172. Damages are appropriately determined by simulating how CMS would
4 have calculated the amount of the improperly inflated interim payments – the overpayment
5 – if the unsupported diagnoses were withdrawn from CMS’s payment system. See
6 *Bourseau*, 531 F.3d at 1173 (affirming the government’s damages calculation which
7 simulated CMS’s reconciliation process).

8 In addressing the elements that must be proved in this case, United ignores the plain
9 language of the reverse FCA provision. Indeed, when quoting the statutory definition of
10 “obligation,” United misleadingly omits the key phrase “whether or not fixed” from
11 “established duty.” Joint Brief, 48. And United fails to cite a single case involving that
12 provision. Joint Brief, 32. Instead, United resorts to the Supreme Court’s decision in
13 *Universal Health Servs., Inc. v. United States ex rel. Escobar*, 579 U.S. 176 (2016), which
14 involved a direct false claim – not a reverse false claim – which has different statutory
15 language and substantially different elements of proof. *Escobar*, 579 U.S. at 187. United’s
16 reliance on *Escobar* is therefore misplaced.

17 **A. United’s Legal Argument: DOJ Cannot Show That United Was**
18 **Overpaid**

19 The threshold element for a reverse FCA case is that the defendant has money that
20 should have been returned to the government, i.e., that it was overpaid. To satisfy that
21 element here, DOJ must show that the diagnosis codes at issue were in fact unsupported
22 by the patient’s medical charts. In addition, not all invalid diagnosis codes lead to
23 overpayments, because other supported diagnoses could justify payment for the same
24 HCC. See United MSJ, *supra* at 9-10. DOJ must thus also show that any unsupported
25 diagnosis codes resulted in CMS overpaying United. DOJ has no evidence of either.

1 **1. DOJ Cannot Show the Diagnosis Codes Were Unsupported**

2 DOJ must show that the doctor-certified diagnoses were in fact not supported by the
3 patient's medical records. But DOJ has steadfastly refused to look at the only evidence
4 that could substantiate its allegations—the underlying medical charts. JS at D165-D168;
5 Ex. D-110 at 2864:21-65:3.

6 The relevant facts are undisputed. DOJ does not dispute that doctors certified that
7 every diagnosis code at issue here correctly reflected their patients' health conditions. JS
8 at D22, D161, D181-D182; Exs. D-40 at 944-45, D-126 at 3233:21-15. DOJ also does not
9 dispute that United accurately conveyed to CMS those same doctor-certified codes. JS at
10 D162; Exs. D-147 at 3707:22-09:3, D-134 at 3395:4-22. DOJ does not allege that it is
11 unlawful to conduct chart review programs, or challenge the accuracy of the codes
12 United's coders identified during chart review. *See* United MSJ, *supra* at 11-14. And DOJ
13 concedes that MA plans do *not* have any general obligation to second-guess doctor-
14 submitted diagnosis codes before submitting them to CMS for payment. *Id.* at 11, 13-14;
15 *see also, e.g.*, JS at D70; Ex. D-46 at 1099 ("We recognize as well that . . . there is no
16 CMS requirement that MA organizations verify every diagnosis submitted by providers.").

17 DOJ's sole contention is that anytime "UnitedHealth's own reviewers found no
18 support for [a] diagnosis code in the member's medical records," the diagnosis was
19 necessarily invalid, even if a doctor certified that diagnosis in claims forms. JS at D155-
20 D158; Ex. D-5 at 289. DOJ alleges that the 28 million doctor-submitted diagnosis codes
21 that United's chart reviewers did not identify during chart review were all "invalid." *See*
22 United MSJ, *supra* at 16-17. DOJ argues that United coders' failure to identify particular
23 diagnosis codes during chart review "revealed" that the diagnosis codes at issue "were not
24 supported by medical record documentation." JS at D159; Ex. D-12 at 593.

25 This is a sleight of hand. In truth, United's chart review program did not "reveal"
26 that any (let alone all) of these 28 million codes were unsupported. *See* United MSJ, *supra*
27 at 11-12. At most, the program revealed an unresolved discrepancy between United's
28 coders and a doctor (or doctor's coder). *See id.* As the party with the burden of proof, DOJ

1 needed to marshal sufficient evidence on which a jury could reasonably conclude which
2 (if any) of those codes are actually unsupported. And DOJ has *none*. Lacking any
3 evidence, DOJ cannot simply pretend all 28 million are unsupported and call it a day for
4 trial. *See In re Oracle Corp. Sec. Litig.*, 627 F.3d 376, 387 (9th Cir. 2010) (“the non-
5 moving party must come forth with evidence from which a jury could reasonably render
6 a verdict”). After all, “a jury is permitted to draw only those inferences of which the
7 evidence is reasonably susceptible; it may not resort to speculation.” *Brit. Airways Bd. v.*
8 *Boeing Co.*, 585 F.2d 946, 952 (9th Cir. 1978); *see Neely v. St. Paul Fire & Marine Ins.*
9 *Co.*, 584 F.2d 341, 345 (9th Cir. 1978). Here, DOJ’s theory is so wildly speculative and
10 unsound that *none* of its experts will opine which of the 28 million diagnosis codes were
11 in fact unsupported.

12 The core reason DOJ’s theory fails is that it does not account for the nature of
13 coding. DOJ’s own coding expert agreed that there are multiple reasons coders conducting
14 “blind” chart review—review without knowing what diagnosis codes a doctor
15 submitted—might at times miss valid diagnosis codes. JS at D54-D60, D246; Ex. D-53 at
16 1266, D-87 at 2403:21-05:2, 2396:13-400:16, 2409:1-10:5. United coders may not have a
17 complete collection of the medical charts, may have had insufficient time to review the
18 charts, may have had different degrees of experience in coding, and may have lacked
19 familiarity with the doctor’s medical specialty or handwriting. *See United MSJ, supra* at
20 11-12.¹¹ In addition, diagnosis coding is an inherently complex enterprise where human
21 errors occur, as multiple DOJ experts agreed. JS at D246; Exs. D-141 at 3515:25-16:14,

23 ¹¹ *See, e.g.*, JS at D54-D61, D98, D246; Exs. D-65 at 1919 (“[B]ased on my many years
24 of professional experience supervising coding reviews in a variety of circumstances, there
25 are many practical, real-world factors that can make it difficult to identify diagnosis codes
26 from a medical record comprehensively and with complete accuracy. These can include,
27 among other things, the time available for the review; the completeness, legibility and
28 clarity of the medical record documentation; and the skill and experience of the
reviewer.”); D-93 at 2557:10-58:1, D-87 at 2409:1-10:5, D-54 at 1292-93 (incomplete
record); D-87 at 2403:21-04:3, D-93 at 2558:10-59:3, D-54 at 1294, D-108 at 2829:17-
30:8 (legibility); D-108 at 2833:15-34:5, D-54 at 1301-02 (human error); Ex. D-53 at 1266
 (“human error is inevitable”); Ex. D-67 at 1209 (agreeing that two coders may reach
different results for a variety of reasons, including judgment, experience, provider
handwriting, and human error).

1 D-110 at 2861:6-7, D-87 at 2404:12-18. Even CMS coders miss supported codes when
2 reviewing charts in RADV.¹² In short, it is undisputed that (for whatever reason) two
3 coders reviewing the same medical record will at times reach different results. JS at D62-
4 D63; Exs. D-94, D-96A at 2603:10-04:9, D-108 at 2824:15-25:4, D-118 at 3009:2-11:16.
5 It is thus undisputed that at least sometimes the doctor—who diagnosed the patient and
6 certified the submitted diagnosis code as accurate—was correct, and United’s coders
7 simply missed the code. JS at D204; Ex. D-141 at 3515:9-17. For these reasons, no
8 reasonable jury could possibly find, as DOJ hypothesizes, that every single time an
9 offshore United coder reviewing a medical record failed to spot a diagnosis a doctor had
10 previously submitted and certified, that diagnosis was wrong.

11 Indeed, outside of this litigation, CMS’s own coders audited a portion of the health
12 conditions here at issue, and the results of those reviews eviscerate DOJ’s categorical
13 theory. In determining the validity of a diagnosis code, the ultimate standard is whether
14 CMS would have validated the diagnosis during a RADV audit. See JS at D31, D71; Ex.
15 D-117 at 2976:14-77:20 (confirming that when CMS validates a health condition (HCC)
16 in RADV “there is no change in payment. So there would be no overpayment”). Here,
17 there is an overlap of roughly 6,500 health conditions that correspond to the diagnoses at
18 issue in this case *and* that CMS’s coders also reviewed in RADV audits. JS at D184; Ex.
19 D-64 at 1887-89, fig. 15. Remarkably, *CMS validated 89% of those codes*. See JS at 185;
20 Exs. D-64 at 1887-89, fig. 15, D-141 at 3520:13-21:2, D-63 at 1763. This means that 89%
21 of the CMS-reviewed codes DOJ insists were “revealed” to be invalid in this litigation,
22 and that United allegedly knew were false, correspond to health conditions that were in
23 fact validated by CMS during RADV audits. It is hardly an exaggeration for United to
24

25
26
27 ¹² See, e.g., JS at D98; Exs. D-94 at 2567:17-69:16 (addressing when senior coder
28 overrides junior coder on whether a code is supported by medical record); D-112 at
2902:23-04:17 (“You have some tests that give you false positives and some tests that give
you false negatives. That’s why you repeat it. You have more than one person looking at
it.”).

1 assert that DOJ's made-for-litigation theory that *all* of those codes were false is without
2 any factual basis.¹³

3 DOJ's statistical expert, Dr. Stark, agrees. Like United's expert, Dr. Stark confirmed
4 that CMS auditors validated 89% of the health conditions corresponding to the overlapping
5 codes DOJ claims are fraudulent.¹⁴ He then testified that the conclusions reached by those
6 auditors prove "to a certainty" that DOJ's hypothesis is just plain wrong:

7 Q. The hypothesis is every time a United chart review coder fails to find a
8 diagnosis code submitted by a provider, the [health condition] associated with
9 that diagnosis code is not supported [in that year], that hypothesis is false,
correct?

10 A. I agree.

11 Q. Okay. And you agree that that's false to a certainty, right?

12 A. Yes, sir. Well, yes, my—if by "supported," we mean RADV found
support, yes.

13 JS at D204; Ex. D-141 at 3535:9-18.

14 The undisputed facts on this issue end the case. DOJ had options over the course of
15 more than a decade pursuing this case to try to create a jury question on this issue. It could
16 have reviewed all of the medical records to show *which ones* are in fact unsupported.
17 DOJ's coding expert testified that she would have been qualified to perform that review
18 but was not asked. JS at D205; Ex. D-87 at 2389:1-10. Alternatively, DOJ might also have
19 reviewed a statistically valid random sample (as it has in other cases) and sought to
20
21
22
23

24 ¹³ The RADV validation rate likely *understates* the real validation rate, since in RADV
25 CMS targets contracts and codes it believes are most likely to contain errors, and because
26 these validation rates are from before any United challenge to the conditions that CMS
found unsupported. JS at D72-D73; Exs. D-18 at 665-66, D-122A at 3108:2-10:9.

27 ¹⁴ See JS at D185; Ex. D-141 3520:21-21:2 ("Q. So the independent analysis that you
performed matched the same results as Mr. Renjilian on Figure 15 of his report, right? A.
The left panel? Q. Yes. A. For 2013 -- from 2011 through 2013, yes, sir."); see also JS
28 at D89; Ex. D-141 at 3560:7-65:23 (Dr. Stark calculating an 88.8% validation rate for
United HCCs audited in RADV for contract years 2011-2015).

1 extrapolate those results.¹⁵ DOJ did not do that either, disavowing any effort to sample.¹⁶
2 But having chosen neither the labor-intensive path nor the statistical one, DOJ is left with
3 no evidence at all. It would be particularly inappropriate in this fraud case seeking billions
4 of dollars in punishment to relieve DOJ of its burden of opposing summary judgment with
5 actual *evidence* on which a jury could reasonably rely.

6 **2. DOJ Cannot Show the Diagnosis Codes Resulted in Overpayments**

7 DOJ has also failed to show that any unsupported diagnosis codes actually resulted
8 in *overpayments* to United. The reverse FCA claim requires DOJ to show that the
9 diagnosis codes at issue caused United to be *overpaid*. 31 U.S.C. § 3729(a)(1)(G). For a
10 diagnosis code to result in an overpayment, that specific diagnosis code must not only be
11 unsupported by the medical chart, the health condition associated with that diagnosis code
12 must also be unsupported by any other diagnosis documented in any chart for the member
13 for that year. *See* United MSJ, *supra* at 9-10. As just explained, DOJ has no evidence on
14 the first point. DOJ likewise has no evidence on the second point.

15 The only DOJ expert to try to identify a set of allegedly unsupported diagnosis codes
16 that resulted in incremental payment to United is Dr. Garthwaite. JS at D163-D164; Ex.
17 D-57 at 1446-47. As noted, Dr. Garthwaite created a list of 1.97 million “deletes” by (1)
18 declaring all diagnoses missed in chart review to be unsupported because United’s chart
19 reviewers did not independently identify them and (2) filtering (through a complex
20 process) those allegedly unsupported diagnosis codes he calculates increased United’s
21 payment from CMS. JS at D179, D208-D209; Exs. D-65 at 1905, 1917-18, 1928-29. Dr.

23 ¹⁵ *See, e.g.*, JS at D206; Exs. D-18 at 657 (“[A]s part of the RADV audit methodology,
24 CMS will extrapolate RADV audit findings.”); D-47 at 1181-83 (using extrapolation to
25 calculate overpayments); D-38 at 904-05 (discussing use of extrapolation by DOJ in tax
cases).

26 ¹⁶ *See, e.g.*, JS at D207; Ex. D-4 at 240 (“United States and Relator’s Position: At this
27 time, Plaintiffs’ damages calculations for both its Chart Review and RACCR damages
28 analyses do not involve sampling or extrapolation. Rather, at this time, Plaintiffs intend to
identify the specific diagnoses that Defendants failed to delete.”); Dkt. 317 at 12-13 (“In
addition, as stated, the damages here are not based on sampling, extrapolation, or contract-
level payment error rates.”); D-6 at 344-45 (noting that the government refused to review
every medical record that United reviewed in chart review).

1 Garthwaite agrees that the remainder of the approximately 28 million diagnosis codes at
2 issue—roughly 26 million diagnosis codes—did not result in increased payment to United
3 because United’s data contained other support for the health condition. JS at D210; Exs.
4 D-57 at 1485-90, D-65 at 1917. What this means is that, as United’s expert calculated, and
5 no DOJ expert has challenged, *more than 93%* of the diagnosis codes DOJ alleged are *all*
6 unsupported in its First Interrogatory Response did not affect the payment United received
7 from CMS and thus could not have possibly led to an overpayment. JS at D183; Exs. D-
8 65 at 1916-19. And for the remaining 7% of codes, DOJ still must establish that the
9 diagnoses were not supported in the medical records in order for them to result in
10 overpayments. But DOJ has no evidence of that for the reasons discussed above, even as
11 to this smaller subset, since it has not reviewed a single medical record as part of this
12 litigation.

13 There is also another fundamental shortcoming. Dr. Garthwaite does not show that
14 even the 1.97 million codes he calls “deletes” actually represent overpayments. That is
15 because of the critical differences between (1) a diagnostic code and a *health condition* or
16 HCC, and (2) a single medical encounter and a payment year. *See* United MSJ, *supra* at
17 9-10. MA plans are paid a specific amount if a member has an HCC, such as “diabetes
18 without complications” (HCC19), and the payment would be the same whether the
19 member had type 2 diabetes without complications or some other type of diabetes that
20 maps to the same HCC. As Dr. Garthwaite himself put it, if an MA plan “submits multiple
21 diagnosis codes mapping to the same HCC for a beneficiary, the beneficiary’s risk score
22 does not depend on which specific diagnosis code was reported” or “how many times a
23 particular diagnosis code is reported within a service year.” JS at D232; Ex. D-57 at 1454.
24 In addition, so long as one doctor in that year documented in a single chart one of the many
25 possible diagnoses that corresponds to HCC19, the plan would be entitled to that same
26 payment. JS at D29, D213; Exs. D-15 at 632-33, D-60 at 1594, D-141 at 3545:20-46:10,
27 D-145 at 3680:15-82:7. What matters when determining whether a plan was overpaid is
28 thus not whether one particular *diagnosis* submitted by a particular doctor for a particular

1 visit is supported, but whether the medical records for the member *for the year* support the
2 *health condition (HCC)*. See JS at D29-D31; Ex. D-145 at 3676:23-77:7 (“Q. [J]ust
3 knowing that there was a single code that was unsupported, that alone wouldn’t tell you
4 you’ve been overpaid if you’re the plan, right? . . . You would need to know, for example,
5 if another record supported the code, correct? A. Yes.”).

6 For these reasons, Dr. Garthwaite cannot simply point to evidence that a diagnosis
7 code submitted by one doctor on a given day was unsupported. DOJ would further need
8 evidence that none of the member’s charts from any doctor documented the existence of
9 any diagnosis mapping to the same HCC during the year. For example, if an MA plan
10 received an incremental payment for a member for “diabetes without complications,” DOJ
11 would need evidence that none of the member’s charts for the year documented support
12 for any of the multiple diagnosis codes that map to that same HCC. DOJ has not even tried
13 to develop that evidence. DOJ has done nothing whatsoever to determine whether *other*
14 medical charts from other doctors on other dates during a year support the conditions
15 corresponding to the diagnosis codes at issue. Again, DOJ could have reviewed the set of
16 medical records for a sample of members and extrapolated from those findings, just as
17 CMS does during RADV, but chose not to do so, leaving it with nothing but speculation
18 about the portion of the Garthwaite deletes that are actual overpayments.¹⁷ See United
19 MSJ, *supra* at 35-39, n.15-16. Again, Dr. Stark thus concedes DOJ’s case is fundamentally
20 flawed:

21 Q. Based on the data that you have available and that you reviewed in your
22 work on this case, there is not a way to reliably estimate the fraction of
23 diagnosis instances in the final deletes—the Garthwaite final deletes list that
24 map to [a health condition of a member in a given year] that would be
25 supported by RADV auditors, right?

A. I agree with that.

26 ¹⁷ DOJ cannot fill this evidentiary hole with the RADV audits. Both parties’ experts agree
27 that the RADV audits are not a representative random sample of the diagnosis codes at
28 issue—which means they provide no basis on which DOJ could extrapolate the actual rate
of unsupported codes or reliably estimate how many of the diagnosis codes are
unsupported. JS at D186-D187, D190-D195; Exs. D-63 at 1769-70, 1776-77, D-135 at
3406:9-17, D-141 at 3573:7-78:11.

1 Q. And similarly, there is not a way to estimate the fraction that would not
2 be supported, correct?

3 A. I agree with that, too.

4 JS at D211-D212, D214; Ex. D-141 at 3581:11-22. A party with the burden of proof at
5 trial cannot overcome summary judgment by speculating that some number of codes may
6 have been unsupported and may have caused overpayments. It must present evidence from
7 which a jury could make that estimate. DOJ has no such evidence.

8 **US Response to Issue 1.A.: There is Abundant Evidence that Codes**
9 **United Submitted for Payment Were Unsupported and that those**
10 **Unsupported Codes Resulted in Overpayments**

11 United contends it is entitled to summary judgment because there is no evidence
12 from which a jury could reasonably conclude that codes United submitted for payment
13 were unsupported or that those unsupported codes resulted in overpayments. Joint Brief,
14 34-42. But there is abundant evidence in this case from which a jury could reasonably
15 reach both conclusions. As such, United is not entitled to summary judgment.

16 Codes United Submitted for Payment Were Unsupported. There is ample evidence
17 for a jury to find that the diagnosis codes at issue were unsupported. The coders that United
18 retained to review medical records in Chart Review were certified, trained, and quality
19 tested. P-12 at 4254-58, Chart Review Policy; P-7, United 30(b)(6) (Baker) Tr. 4168:3-9,
20 4177:21-4178:4, 4180:1-4. According to their instructions, these Chart Review coders
21 identified all the codes they found to be supported in the medical records they reviewed.
22 P-14, Coding Policy, at 4264; P-15, United 30(b)(6) (Baker) Tr. 4267:12-22. From 2014-
23 2016, United's coders reviewed many medical records twice. P-7, United 30(b)(6) (Baker)
24 Tr. 4190:17-4191:3; D-57, Garthwaite Report, at 1464 ¶ 51. United relied *exclusively* on
25 these coders' findings to submit to CMS *new* codes found through its Chart Review
26 process which United had not previously submitted to CMS – and received an additional
27 \$7.2 billion for these efforts. P-11 at 4245-47, Response to Interrogatory 18 (United
28 confirming through Interrogatory response). The United States' expert used United's own
data to identify the codes that had previously been submitted for payment, but were not

1 identified as supported by United’s Chart Review coders, D-57, Garthwaite Report, at
2 1446-47 ¶ 13, and United’s own expert does not challenge this analysis, P-6, Renjilian Tr.
3 4124:4-25 (United Expert testifying that he does not have an expert opinion whether Dr.
4 Garthwaite correctly identified Reviewed Encounters); *id.* at 4126:1-4129:2 (United
5 Expert testifying that he does not have an expert opinion as to whether Dr. Garthwaite
6 incorrectly identified diagnosis codes that were recorded in Chart Review nor that Dr.
7 Garthwaite incorrectly compared codes identified in Chart Review to those submitted by
8 providers.). A jury can conclude from this evidence that codes submitted for payment by
9 United were unsupported.

10 United, however, contends that the only avenue for a jury to find that the diagnosis
11 codes at issue were unsupported is for the United States to have conducted its own review
12 of these medical records. Joint Brief, 34-35, 37-38. This contention, however, wholly
13 misses the point. United’s own coders – who were certified, trained, and quality-tested –
14 already conducted a thorough review of these medical records. Those expert coders did
15 not find support for codes that United submitted for payment, which provided United with
16 information it had a regulatory and contractual duty not to ignore.

17 The Ninth Circuit has already rejected a similar argument made by United in
18 *Swoben*. The Court held that if an MAO’s “reviewer finds a previously reported diagnosis
19 code is not supported by the very medical record used to document the diagnosis code in
20 the first place, then the diagnosis code was reported in error, even if it is possible that some
21 other, unidentified record might support the same diagnosis.” 848 F.3d at 1176-77.
22 Nothing in *Swoben* or any other jurisprudence makes the duty to withdraw these codes
23 contingent upon a government record review.

24 Nor does liability based on United’s duties arising from the retention of an
25 overpayment require a government review of medical records. If “a [MA] insurer has
26 received a payment increment for a beneficiary’s diagnosis and discovers that there is no
27 basis for that payment in the underlying medical records, that is an overpayment that the
28 insurer must correct by reporting it to CMS within sixty days for refund.”

1 *UnitedHealthcare Ins. Co. v. Becerra*, 16 F. 4th 867, 870 (D.C. Cir. 2021). MAOs “are
2 required to refund payments based on unsupported diagnoses that they themselves
3 discover through the course of their business.” *Id.* at 877-78; *see also Sutter*, 444 F. Supp.
4 3d at 1068 (payments received by an MA participant predicated on unsupported diagnosis
5 codes are “‘overpayments’ subject to the reporting-and-return requirements of” the ACA).

6 United also asserts that the factual nature of coding, such as the complexity of
7 coding and reasons coders might miss a valid code, establish that no reasonable juror could
8 possibly find that the codes not found supported by United’s own coders were in fact not
9 supported. Joint Brief, 36-38. But that intensely factual argument goes to the weight and
10 credibility of the evidence, which only a jury can evaluate. And there are powerful reasons
11 for juries not to credit this evidence. Coding complexity and second-guessing doctors did
12 not prevent United from relying on its coders to find “additional” supported codes, and
13 United had no trouble relying on its coders’ judgment to submit those additional codes to
14 CMS and pocket the resulting \$7.2 billion. P-11 at 4245-47, Response to Interrogatory 18.
15 Furthermore, United could have taken additional steps to resolve ambiguities and confirm
16 whether such codes were in fact supported. *See* P-30, Acevedo (US Expert) Tr. 4397:6-13
17 (discussing physician queries); P-6, Renjilian (United’s Expert) Tr. 4157:7-4158:4
18 (discussing coders conferring to resolve disagreements); P-31, Blair (United’s Coding
19 Expert) Tr. 4404:24-4405:2 (discussing successfully resolving coder disagreement).

20 United also argues that initial results of medical record reviews in preliminary
21 RADV audit findings establish that the codes at issue were in fact supported. Joint Brief,
22 3, 37-38. Those preliminary findings are not final and are subject to change. P-32,
23 Declaration of Steven Ferraina (Jul. 12, 2024), at 4412-13 ¶ 8. Furthermore, United
24 implies the audits validated 89% of the codes listed in the United States’ First Interrogatory
25 Response. But the overlap between the tiny RADV sample (8,215 relevant RADV results)
26 and the 27.9 million codes in the Interrogatory Response is **less than 0.03%**. D-64
27 Renjilian Report, at 1885-86 ¶¶ 161-62. Nor does United acknowledge that Dr. Garthwaite
28 did not base any aspect of his damages analysis on the 28 million “Interrogatory codes,”

1 but instead concluded that only approximately 2 million codes were unsupported and
2 resulted in damage to the United States. As United’s own expert admits, it is statistically
3 improper to extrapolate from the tiny handful of codes from RADV audits to the entirety
4 of the United States’s damages analysis. P-6, Renjilian Tr. 4139:9-11 (“Well, as I’ve said,
5 I don’t think the RADV overlap can statistically or mathematically be extrapolated to any
6 population.”). The United States’ statistical expert agrees that any such extrapolation
7 would be “nonsense from a statistical perspective.” D-63, Stark Report, at 1768-69 § IV,
8 ¶ 41 (“the uncertainty in estimated support rates for individual HCCs is so large that the
9 estimates are not helpful”).

10 Importantly, “[w]hile RADV audits are intended to identify improper risk
11 adjustment payments, they are not specifically designed to detect fraud, nor are they
12 intended to identify all improper diagnosis submissions made by MAOs for risk
13 adjustment payment.” D-18 at 659, Policy and Technical Changes to the Medicare
14 Advantage Program for Years 2020 and 2021, 88 Fed. Reg. 6643, 6645 (Feb. 1, 2023) (to
15 be codified at 42 C.F.R. pt. 422). This, however, is not a RADV audit but an FCA case, in
16 which damages flow from knowing misconduct. United uses smoke and mirrors to confuse
17 the two, as a deceptive basis to argue that there is no evidence of liability. Unlike in a
18 RADV audit, the factual question here in determining the validity of a diagnosis code is
19 whether there is documentation in the medical record for that diagnosis code based on the
20 face-to-face encounter pursuant to which the code was identified (i.e., every submitted
21 diagnosis code matters in the payment process because diagnosis codes submitted to CMS
22 are a claim for payment. D-66 at 2039, Medicare+Choice Program, 65 Fed. Reg. 40,170,
23 40,268 (June 29, 2000). In a RADV audit, on the other hand, the question is whether an
24 HCC has been validated for the entire year and whether the MAO can identify some
25 medical record – even for a code that was never submitted to the MAO or to CMS – to
26 support the HCC. P-6, Renjilian (United Expert) Tr. 4143:12-17 (“It’s really saying that
27 the HCC is validated.”).

1 In a RADV audit, plans may submit up to five medical records for a given
2 beneficiary in an attempt to validate an HCC. Joint Brief, 12-13. So long as one diagnosis
3 code – from any of those medical records – that maps to the HCC is supported by any
4 medical record submitted by the MAO for RADV, payment for that HCC is not retracted.
5 Thus, in the RADV audit context, CMS gives the MAO “credit” for HCCs mapping to
6 diagnosis codes regardless of whether those codes had ever been submitted. As part of the
7 CMS payment process, however, “[e]ach diagnosis code submitted must be supported by
8 a properly documented medical record.” *Swoben*, 848 F.3d at 1168; *Silingo*, 904 F.3d at
9 673. An unsupported code must be deleted, P-10, Rice Tr. 4216:13-4217:1, 4225:14-
10 4226:3; P-8, Medicare Managed Care Manual, Rev. 118 (Sept. 19, 2014), Ch.7, at 4197-
11 99 § 40; P-3, Participant Guide at 4037-38 §§ 4.13-4.14, 4.16, and CMS’s payment system
12 internally accounts for other codes that are in the system at the time that may map to the
13 same HCC, reducing payment only when no other code in the system maps to the same
14 HCC. P-10, Rice Tr. 4216:13-4217:1, 4225:14-4226:3. Here, there is evidence (from
15 United’s own data and the government expert’s analysis thereof) that submitted diagnosis
16 codes reviewed by United’s Chart Reviewers were not found supported, and, thus, should
17 have been deleted.

18 Unsupported Codes Resulted in Overpayments. The United States’ expert
19 calculated the payment adjustments the CMS payment system would have made had
20 United deleted the unsupported codes, and the jury can reasonably conclude from this
21 evidence that the unsupported codes resulted in overpayments. D-57, Garthwaite Report,
22 at 1447 ¶ 14. Rather than concluding that each of those unsupported diagnosis codes
23 necessarily resulted in an overpayment, Dr. Garthwaite essentially simulated CMS’s
24 payment process, recalculating beneficiary risk scores after searching the data for any
25 other diagnosis code that mapped to the same HCC as the unsupported code. Pursuant to
26 the CMS payment rules, Dr. Garthwaite included that HCC in the calculation of that
27 beneficiary’s risk score, before concluding that the unsupported code had a financial
28 impact (i.e., an overpayment).

1 Furthermore, the testimony United relies on from one of the United States’ experts
2 (Dr. Stark) does not say what United asserts it does. Joint Brief, 38. Dr. Stark’s testimony
3 does not address, let alone contradict, that the diagnosis codes not found supported by
4 United’s coders were in fact unsupported. Nor does his testimony support United’s
5 argument that there is undisputed evidence as to this issue. Whether the HCC associated
6 with those unsupported codes was supported by another diagnosis code is a separate
7 question, and one that Dr. Stark does not address. He simply affirms that a diagnosis code
8 not found supported by United’s coder does not necessarily mean the associated HCC
9 would not be found supported in a RADV Audit – audits with different rules than the
10 regular payment process. But the United States is not seeking to conduct a RADV Audit.
11 P-57, Stark Tr. 4804:23-4805:21.

12 United also contends that for the United States to show the unsupported codes at
13 issue resulted in overpayments it must first hunt for other theoretical medical records that
14 may exist somewhere that support other codes that may map to the same HCC. Joint Brief,
15 40-41. No such extra step is part of the process CMS uses to calculate risk adjustment
16 payments to MAOs, and therefore none is required here. *See Bourseau*, 531 F.3d at 1173
17 (affirming the government’s damages calculation which simulated CMS’s reconciliation
18 process). As explained above, to the extent that United’s data submitted to CMS contains
19 other diagnosis codes that map to the same HCC as that of the code not found supported
20 in United’s Chart Review, the CMS payment system automatically accounts for the “other
21 code” when it processes the deletion of the unsupported code. The CMS system
22 recalculates payment based on all the data submitted by the plan that is in the system. CMS
23 does not hunt to see if there are other medical records somewhere supporting codes that
24 have not been submitted by the MAO before it recalculates payment. The government’s
25 expert simply undertook an analysis akin to CMS’s process. D-57, Garthwaite Report, at
26 1446-47 ¶ 13. The reasoning behind United’s “theoretical medical record support”
27 argument would prevent CMS from ever recalculating payments when an MAO deletes a
28 code and thus prevent CMS from recouping overpayments and is inconsistent with

1 United’s obligation to delete unsupported codes “even if it is possible that some other,
2 unidentified record might support the same diagnosis.” *Swoben*, 848 F.3d at 1177.

3 **B. United’s Legal Argument: DOJ Cannot Show That United Violated Any**
4 **Duty to Second-Guess Doctor-Certified Codes**

5 DOJ’s reverse FCA claim fails for the additional reason that it cannot show United
6 violated an “obligation” to return money. 31 U.S.C. § 3729(a)(1)(G). The FCA does not
7 create obligations; it instead defines an obligation as an “established duty” from “an
8 express or implied contractual, grantor-grantee, or licensor-licensee relationship, from a
9 fee-based or similar relationship, from statute or regulation, or from the retention of any
10 overpayment.” 31 U.S.C. § 3729(b)(3). DOJ must thus identify an independent source of
11 the obligation, yet it is unable to do so.

12 **1. DOJ Cannot Identify Any Independent Obligation**

13 No rule or guidance required MA plans to second-guess doctor-submitted diagnosis
14 codes whenever a chart reviewer did not identify that same code. DOJ’s corporate
15 representative, Dr. Hornsby, testified repeatedly that “CMS never tells MAOs how to
16 conduct medical record reviews.” JS at D105-D107; Ex. D-116 at 2956:8-10; *id.* at
17 2956:20-22 (“CMS never set out any guidance telling MAOs how to design medical record
18 reviews.”). Dr. Hornsby further testified that CMS was aware of MA-industry-chart-
19 review practice, which was to identify diagnoses supported in medical records without
20 using those reviews to second-guess diagnoses doctors had submitted. *See* JS at D65; Exs.
21 D-116 at 2959:8-60:20 (explaining CMS officials “talked a lot about” how the “search for
22 additional[] [supported diagnosis codes] was becoming more common”), D-140 at
23 3502:11-03:2, D-39 at 918. Despite this knowledge, CMS never adopted a rule detailing
24 how MA plans must conduct chart review. *See* United MSJ, *supra* at 13-15, n.6.

25 In 2014, CMS proposed to “strengthen existing regulations” by imposing this
26 obligation in the MRRR but declined to do so. *See id.* CMS staff recognized that this new
27 rule would have created new obligations, asserting in a memorandum that “[u]nder
28 existing regulation, there is no requirement for plans to audit medical records for

1 overpayments. If a plan is conducting medical record reviews to identify underpayments,
2 we recommend that they be required to audit as well for overpayments.” JS at D221
3 (emphasis added); Exs. D-79 at 2315, D-116 at 2963:19-66:13. CMS’s decision to propose
4 the MRRR reflected its understanding that the rule would “establish[] or change[] a
5 substantive legal standard,” thereby requiring formal rulemaking, including notice and
6 comment. 42 U.S.C. § 1395hh(a)(2). Yet, at the end of the day, CMS abandoned the
7 proposed rule.

8 That regulatory history bars DOJ’s claims. DOJ cannot impose through the punitive
9 FCA the very obligation CMS considered and rejected a decade ago. The Supreme Court
10 recently rejected a similar government attempt to achieve through backdoor means a
11 policy change that was considered and withdrawn during a formal rulemaking proceeding.
12 *See Azar v. Allina Health Servs.*, 587 U.S. 566, 584 (2019). DOJ’s position here is far
13 weaker than it was in *Allina*, given the fact that it is a punitive litigation position untethered
14 to *any* regulatory action. Indeed, the record evidence shows that CMS was fully aware that
15 its rules were unclear and decided, rather than adopt a rule, simply to follow the wave of
16 whistleblower litigation against MA plans. JS at D146; Ex. D-72 at 2210.

17 The two actual rules DOJ has at times invoked in this litigation do not support its
18 position. *First*, DOJ errs in relying on the rule requiring MA plans to attest “based on best
19 knowledge, information and belief” that their data is “accurate.” 42 C.F.R. § 422.504(l).
20 That rule does not require that all of an MA plan’s codes be accurate, which would impose
21 a sweeping auditing obligation CMS has long admitted does not exist (in a payment system
22 where coding errors are known to be common). JS at D66-D70; Exs. D-66 at 2039, D-46
23 at 1099, D-100 at 2716:10-19:5, D-116 at 2968:6-10, D-136 at 3423:7-24:6, D-137 at
24 3441:10-15. Nor does it require MA plans to represent anything about how they have
25 structured their chart review programs. Even if it did, United *told* CMS *in its attestations*
26 how it performed chart review, but CMS continued to pay United and took no remedial
27 action. *See* United MSJ, *supra* at 16. And DOJ does not dispute that United both accurately
28 transmitted the data it received from doctors to CMS and that the codes United’s reviewers

1 “added” during chart review were accurate. JS at D162; Exs. D-134 at 3394:7-21, D-147
2 at 3707:22-09:14. The attestation rule adds nothing.

3 Second, DOJ attempts to rely on the requirement that MA plans maintain an
4 “effective compliance program” to “prevent, detect, and correct non-compliance.” 42
5 C.F.R. § 422.503(b)(4)(vi). But unless *other* specific rules already obligated United to
6 investigate and delete diagnosis codes not independently identified by chart review, then
7 there was no relevant obligation for United to carry out through its compliance program.
8 DOJ’s position is thus entirely circular.

9 The best evidence that neither source of authority imposed the specific obligation
10 DOJ alleges here is that, long after the attestation and compliance requirements were in
11 effect, CMS proposed a new rule—the MRRR—which would have “strengthened existing
12 regulations” by creating an express obligation *for the first time*. See United MSJ, *supra* at
13 13-14. But CMS ultimately declined to finalize the MRRR. JS at D136; Ex. D-17 at 651-
14 52. In short, CMS proposed a rule it acknowledged would impose a new and prospective
15 obligation to investigate doctor-submitted codes; it then rejected that rule; and yet DOJ
16 now seeks to subject United to treble damages and penalties for noncompliance with the
17 very same obligation CMS proposed and rejected. The Court cannot allow such a claim to
18 proceed.

19 Given the withdrawal of the MRRR and the lack of clarity concerning the scope of
20 the two other rules on which DOJ relies, DOJ’s theory would also raise serious due process
21 concerns. “A fundamental principle in our legal system is that laws which regulate persons
22 or entities must give fair notice of conduct that is forbidden or required.” *FCC v. Fox*
23 *Television Stations, Inc.*, 567 U.S. 239, 253 (2012); *see also id.* at 257 (rejecting FCC
24 sanction where rules in effect at the time gave no notice that challenged conduct was
25 prohibited). This principle applies to the FCA, whose treble damages and civil money
26 penalties “are essentially punitive in nature.” *Vt. Agency of Nat. Res. v. United States ex*
27 *rel. Stevens*, 529 U.S. 765, 784 (2000). The Supreme Court reiterated these “concerns
28 about fair notice and open-ended liability” under the FCA. See *Escobar*, 579 U.S. at 192.

1 The obligation DOJ seeks to impose on United was not clearly established during the
2 relevant time, and the Court should avoid an interpretation of the supposed “obligation”
3 that raises due process concerns. *See Edward J. DeBartolo Corp. v. Fla. Gulf Coast Bldg.*
4 *& Const. Trades Council*, 485 U.S. 568, 575 (1988) (collecting constitutional avoidance
5 cases).

6 **2. DOJ’s Red-Flag Theory Cannot Establish an Obligation**

7 DOJ has at times shifted to a different approach, asserting that United had an
8 “obligation” to delete codes that it “knew” were unsupported. JS at D156; Exs. D-11A at
9 563-65, D-11B at 574-75. As already noted, there is no straight-faced argument that United
10 had *actual knowledge* that specific diagnosis codes were unsupported whenever its coders
11 did not identify them in chart review. Instead, DOJ appears to claim that MA plans have
12 an “obligation” to investigate those codes further because they have such a high risk of
13 error that it would be reckless or deliberately ignorant not to do so. For three independent
14 reasons, this “red flag” theory does not advance the ball.

15 *First*, it fails to avoid the problems described above. Even if a particular code
16 warranted further investigation, United was not overpaid unless the code was in fact
17 unsupported and resulted in overpayment (neither of which DOJ can prove). *See United*
18 *MSJ, supra* at 34-42. Any obligation to “investigate” suspicious codes cannot substitute
19 for the required showing of an overpayment, no matter how much DOJ tries to conflate
20 those distinct elements of an FCA claim.

21 *Second*, DOJ’s “red flag” theory must depend on the existence of some feature of
22 the 28 million diagnosis codes at issue that renders them more likely to be invalid than any
23 random code in an MA plan’s data. Otherwise, this alleged obligation would require MA
24 plans to audit all doctor-submitted codes, which CMS has conceded is not the law. JS at
25 D69-D70; Exs. D-116 at 2968:6-10, D-137 at 3441:10-15, D-100 at 2716:10-19:5, D-97
26 at 2628:15-21, D-46 at 1099. When asked whether there was any rule “that affirmatively
27 required Medicare Advantage plans to proactively review medical records, to audit them,
28 and determine which, if any, codes were not supported,” the former director of CMS’s

Center for Medicare, Sean Cavanaugh, testified “[n]ot that I am aware of.” JS at D69; Ex. D-97 at 2628:15-21.

On the critical comparison between the rate of error of the codes at issue here and *any other codes* submitted for payment, DOJ has *no* evidence. DOJ cannot identify anything about this particular set of diagnosis codes showing that they had a particularly high risk of error such that it would be reckless not to investigate them. And, again, the only record evidence shows the opposite. RADV auditors validated approximately 89% of the health conditions associated with diagnosis codes in DOJ’s FIR list—which is *higher* than the rate of validation of all the remaining HCCs in United’s data (87.6%). See JS at D185, D224-D225; Exs. D-63 at 1763, D-64 at 1887-89, D-141 at 3520:13-21:2, 3527:21-28:4.¹⁸ DOJ’s expert Dr. Stark independently confirmed these validation rates in his report and confirmed at his deposition that this differential higher rate of validation was statistically significant. See JS at D196, D226; Exs. D-63 at 1763, D-64 at 1887-89, D-141 at 3520:13-21:2, 3527:21-28:4. In other words, the RADV results showed that a code that was not identified by United in chart review was *more likely* to be valid than the broader universe of codes submitted by United.

Third, it is not “reckless” or “deliberately ignorant” to fail to act on a small probability that a diagnosis code might be unsupported and might constitute an overpayment. The term “reckless disregard” requires “a *substantial and unjustifiable risk* that . . . claims are false.” *United States ex rel. Schutte v. SuperValu Inc.*, 598 U.S. 739, 751 (2023) (emphasis added). To constitute recklessness, there must thus be an *objectively* high risk of error. See Restatement (Second) of Torts § 500(a) (1977) (explaining “[a]n objective standard is applied” to cover those who do not subjectively “appreciate the high degree of risk”). There must *in fact* be a high risk of error for a defendant to be reckless. Likewise, “deliberate ignorance” requires showing knowledge of a “substantial risk,” *Schutte*, 598 U.S. at 751, or a “high probability” that a fact exists and then taking deliberate

¹⁸ Dr. Stark validated Mr. Renjilian’s calculations with only one irrelevant “small discrepancy” for 2014–2015. See Ex. D-63 at 1765-66.

1 action to avoid learning the truth, *Siebert v. Gene Sec. Network, Inc.*, 75 F. Supp. 3d 1108,
2 1116–17 (N.D. Cal. 2014).

3 Here, there was indisputably not a high probability of overpayment. As shown by
4 the Garthwaite report, 93% of the diagnosis codes in question did not affect United’s
5 payment from CMS. *See* United MSJ, *supra* at 17-18, 39-40. That means if every one of
6 the codes Dr. Garthwaite calls “deletes” was unsupported, there was still only a 7%
7 probability that a diagnosis code submitted by a doctor and not identified in chart review
8 would be, if investigated, an overpayment. And as Dr. Stark confirmed through his
9 analysis, the RADV results prove “to a certainty” that codes in this 7% universe (the
10 Garthwaite “deletes”) are not all unsupported. *See* United MSJ, *supra* at 37-38. If even
11 half of that universe were supported, the odds that any one code on the FIR list would be
12 an overpayment after investigation would be only 3.5%. Regardless whether the risk of a
13 diagnosis code being an overpayment is 7% or 3.5%, such small chances of error are not
14 an “objectively” high risk of overpayment, particularly in a system that recognizes coding
15 errors are inevitable. Thus, failing to undertake the intense work to chase down potential
16 errors was not reckless as a matter of law.

17 In another context, the government agrees. In a recent guidance document from the
18 HHS’s Office of Inspector General (OIG), the government identified certain diagnoses as
19 being “at high risk of being miscoded” based on estimated error rates of 70% to 90%. JS
20 at D222-D223; Ex. D-45 at 1022. Such probabilities of error are orders of magnitude
21 higher than the risk that any of the diagnosis codes on DOJ’s “deletes” list were
22 overpayments. United is not aware of any case where a court held that failing to investigate
23 something like a 3.5%–7% risk of error was reckless.

24 For these reasons, DOJ cannot show that United violated any independent
25 obligation to return money to the government.
26
27
28

US Response to Issue 1.B.: United Had an Obligation to Return Money it Received for Unsupported Diagnosis Codes, Arising out of its Regulatory and Contractual Duties, as well as its Retention of an Overpayment

United's obligation to pay arises from its (1) existing contractual and regulatory duties, and independently (but relatedly) from (2) retention of an overpayment. Those duties require United to conduct its Chart Review in good faith and to exercise due diligence in taking steps to correct the submission of unsupported diagnosis codes, and prohibit United from turning a blind eye to unsupported codes submitted for payment. United's obligation to pay arises from these duties even if the amount owed is not yet fixed, and even before United has actual knowledge that codes are unsupported.

United's Regulatory Duties. United's argument that no rule requires it to take any steps after its Chart Review coders did not find support for certain codes, Joint Brief, 51-52, is the same argument it made in *Swoben*, 848 F.3d at 1174 (United argued it had no duty to do anything to address the codes not found supported by its reviewers, contending that "there was no 'authority [to] indicate that a [MA] plan was obliged to undertake affirmative steps to unearth potentially unsupported codes before it could certify the third-party risk adjustment data based on its 'best knowledge, information, and belief . . .'").

The Ninth Circuit flatly rejected United's argument, extensively analyzing United's regulatory due diligence, good faith and compliance duties, concluding that those longstanding duties obligated MAOs that conduct chart reviews to do so in good faith and to take steps to address errors, and prohibits turning a blind eye to unsupported codes submitted for payment. 848 F.3d at 1174-76. This Court too should reject that argument.

From the start of the MA program, CMS has always been clear that because diagnostic data is "used as a factor in calculating payments" and the data submission "represents a 'claim' for payment," accurate and complete data submissions are essential to ensure accurate risk adjustment payments. D-66 at 2039, Medicare+Choice Program, 65 Fed. Reg. at 40,268; *Silingo*, 904 F.3d at 673. "Each diagnosis code submitted must be supported by a properly documented medical record." *Swoben*, 848 F.3d at 1168; *see also*

1 *Silingo*, 904 F.3d at 673. MAOs “have an obligation to take steps to ensure the accuracy,
2 completeness, and truthfulness of” data submitted for payment. D-66 at 2039,
3 Medicare+Choice Program, 65 Fed. Reg. at 40,268; *Swoben*, 848 F.3d at 1174.

4 In 2000, CMS recognized that codes come to MAOs in great volume and from many
5 sources. D-66 at 2039, Medicare+Choice Program, 65 Fed. Reg. at 40,268. While MAOs
6 “cannot be reasonably expected to know that every piece of data is correct,” they are
7 obligated to undertake “due diligence” to ensure the accuracy and truthfulness of the codes
8 they submit for payment. *Id.*; *Swoben*, 848 F.3d at 1174. CMS holds MAOs to a “best
9 knowledge, information, and belief” standard and requires them to make “good faith
10 efforts to certify” the accuracy and truthfulness of codes they submit. D-66 at 2039,
11 Medicare+Choice Program, 65 Fed. Reg. at 40,268; *Swoben*, 848 F.3d at 1174. When an
12 MAO takes steps to verify risk adjustment data by conducting retrospective chart reviews,
13 it must conduct those reviews in good faith. *Swoben*, 848 F.3d at 1179. When it adopted
14 the “best knowledge, information, and belief” standard, CMS made clear that it was the
15 same standard as FCA knowledge, encompassing “not only actual knowledge of falsity
16 but also reckless disregard and deliberate ignorance.” D-66 at 2039, Medicare+Choice
17 Program, 65 Fed. Reg. at 40,268; *Swoben*, 848 F.3d at 1174.

18 The Ninth Circuit also held that United’s contention “that they were under no
19 obligation to take affirmative steps to address errors also ignores [42 C.F.R.] § 422.503,
20 which since 2005 has required [MAOs] to have effective compliance programs in place,
21 including ‘[p]rocedures for internal monitoring and auditing’ and for ‘ensuring prompt
22 response to detected offenses.’” *Swoben*, 848 F.3d at 1174 (citation omitted). The Ninth
23 Circuit held that conducting chart reviews “deliberately to avoid identifying erroneously
24 submitted diagnosis codes that might otherwise have been identified with reasonable
25 diligence” violates these regulatory duties. *Swoben*, 848 F.3d at 1175. Where an MAO
26 conducts blind chart reviews but “runs a unidirectional comparison with previously
27 submitted codes to reveal only under-reporting errors . . .,” it “turns a blind eye to the over-
28 reporting errors . . . [exhibiting] reckless disregard and deliberate ignorance toward the

1 truth or falsity of the data submitted to CMS” showing “a lack of diligence and an absence
2 of good faith.” *Swoben*, 848 F.3d at 1175-76. Using blind chart reviews “cannot excuse
3 failing to ‘check whether diagnosis codes previously submitted to CMS were included on
4 the list of diagnoses found by the reviewers to be supported by the medical records.’”
5 *Swoben*, 848 F.3d at 1175. If an MAO’s retrospective reviewer concludes that the medical
6 record that was used to document a submitted code does not support the code, “then the
7 code should be withdrawn.” *Swoben*, 848 F.3d at 1177 n.8; *Silingo*, 904 F.3d at 673 (“The
8 importance of accurate data certifications and effective compliance programs is obvious:
9 if enrollee diagnoses are overstated, then the capitation payments to [MAOs] will be
10 improperly inflated.”).

11 United contends that, because *Swoben* involved false certifications as direct false
12 claims and this case involves reverse false claims, its interpretation of United’s regulatory
13 duties is inapposite. United is wrong. These regulatory duties exist whether the United
14 States seeks to enforce them through a direct FCA action based on false certifications or
15 based on knowingly avoiding the obligation to pay as reverse false claims. There is no
16 requirement that the United States must only pursue a direct false claims action to enforce
17 these duties. Congress intended that a person who improperly avoids paying money owed
18 to the government should be equally liable as one who acts to obtain money. If United
19 received a diagnosis from a provider and hired an expert to review the chart who concluded
20 that the chart did not support the diagnosis, it would be absurd to conclude that United
21 could press ahead and submit that code for payment without further inquiry. No different
22 result is required here simply because United had already received payment by the time
23 its trained coders did their work.

24 Moreover, the Ninth Circuit did not limit its analysis only to duties arising from the
25 certification regulation. Instead, it also based its ruling on duties arising out of the
26 compliance regulation. In *Sutter*, the court applied *Swoben* to a reverse FCA action and
27 held that “[t]he *Swoben* court did not limit its holding – that MA Participants must submit
28 accurate diagnosis codes and withdraw unsupported codes – to false certifications and

1 compels the conclusion that MA Participants cannot bill CMS for false diagnosis codes
2 (and keep and not report the resulting overpayment).” 444 F. Supp. 3d at 1071 n.447
3 (citations omitted). Similarly, in *Graves v. Humana*, 281 F. Supp. 3d 1260, 1275 (S.D.
4 Fla. 2017), relator alleged that Humana (an MAO like United) deliberately ignored
5 overpayments it received for invalid diagnoses in violation of the reverse FCA. Relator
6 alleged that red flags “should have alerted Humana to investigate whether it had submitted
7 unsupported codes and received corresponding overpayments as a result.” *Id.* at 1276. The
8 court followed *Swoben*’s reasoning and ruled that liability under the reverse FCA arises
9 when an MAO conducts retrospective reviews similar to United’s Chart Review that
10 “either avoid or conceal over-reporting errors” because the MAO fails to act with diligence
11 and good faith. *Id.* at 1276. The court concluded it was a fact question for the jury to decide
12 whether Humana recklessly disregarded or deliberately ignored overpayments. *Id.* at
13 1275-76. Here too, whether United knowingly violated its duties and ignored
14 overpayments is a disputed issue for the jury to evaluate.

15 United’s Contractual Duties. United’s obligation to pay also arises out of its annual
16 contracts and EDI Agreements with CMS. Each year in its contracts with CMS, United
17 agreed to operate its plans in compliance with “applicable Federal statutes, regulations,
18 and policies (e.g., policies as described in the Call Letter, Medicare Managed Care
19 Manual, etc.).” *See, e.g.*, P-1A, at 3984 Art. II(A) (2017 PY Contract); P-1, at 3977 ¶ 2
20 (Joint Stipulation). United also agreed to sign and submit an attestation prior to the Final
21 Reconciliation, in which it must certify (based on best knowledge, information, and belief)
22 that the risk adjustment data it submits to CMS is “accurate, complete, and truthful.” *Id.*;
23 *see, e.g.*, P-1G at 4018 (2017 Attestation). These annual attestations reflect that MAOs are
24 required to undertake due diligence in good faith to ensure the accuracy and completeness
25 of their risk adjustment data and not to act in deliberate ignorance or reckless disregard of
26 the truth or falsity of its risk adjustment data. D-66 at 2039, Medicare+Choice Program,
27 65 Fed. Reg. at 40,268 (“However, we believe that [MAOs] have an obligation to
28 undertake ‘due diligence’ to ensure the accuracy, completeness, and truthfulness of

1 encounter data submitted to [CMS].”). At a minimum, “due diligence” requires United to
2 do *something* when it reviews a beneficiary’s medical record and does not find support for
3 a previously submitted diagnosis code. P-10, Rice Tr. 4224:16-24.

4 In addition, in order to submit diagnostic data to CMS’s data processing systems,
5 United was required to sign an EDI Agreement. P-8, Medicare Managed Care Manual,
6 Rev. 118 (Sept. 19, 2014), at 4200-01 Ch.7, §120.2.1. “The EDI Agreement is a contract
7 between the MAO and CMS attesting to the accuracy of the data submitted.” *Id.* Under
8 the EDI Agreement, United agreed that it was responsible for all risk adjustment data
9 submitted by “themselves, their employees, and agents,” that it would “submit risk
10 adjustment data that are accurate, complete, and truthful . . . [b]ased on best knowledge,
11 information, and belief,” and to “research and correct risk adjustment data discrepancies.”
12 P-1C, at 4002 §§ A.1, A.5 and A.11 (Defendant MAO EDI Agreement); P-1B at 3994
13 (same) (Optum EDI Agreement); *see also* P-1, at 3977 ¶¶ 2, 5, 6 (all EDI Agreements
14 signed by the MAO Defendants and Optum included the same terms).

15 Duty Arising from Retention of an Overpayment. Under the reverse FCA provision,
16 United’s obligation to pay the government also arises from its retention of an overpayment.
17 31 U.S.C. § 3729(b)(3). The governing statute, regulations, and caselaw establish that a
18 risk adjustment payment made to an MAO based upon an unsupported diagnosis code is
19 an overpayment. “Neither Congress nor CMS has ever treated an unsupported diagnosis
20 for a beneficiary as valid grounds for payment to a [MA] insurer.” *Becerra*, 16 F.4th at
21 869. MAOs have a duty to refund CMS for, and not retain, such overpayments. The FCA
22 imposes liability on a person who deliberately ignores or recklessly disregards information
23 of potential overpayments. United does not even mention these duties in its brief.

24 As noted above, a risk adjustment payment for an unsupported code is an
25 overpayment. *See supra*, at 42-48; *Silingo*, 904 F.3d at 673; *Becerra*, 16 F.4th at 870, 890;
26 *Sutter*, 444 F. Supp. 3d. at 1026, 1062 n.424, 1077. No court has ever held that an MAO
27 “can keep and not report or return payments based on unsupported codes.” *Id.* at 1072; *see*
28 *also id.* at 1060, 1068 n.441, 1071. If an MAO’s retrospective reviewer determines that

1 the underlying medical record does not support the code submitted, then the MAO should
2 delete the code. *Swoben*, 848 F.3d at 1177 n.8; *Sutter*, 444 F. Supp. 3d at 1067. CMS's
3 processing system then recalculates the respective payment amount and recoups the
4 payment associated with the deleted code. *Sutter*, 444 F. Supp. 3d at 1026.

5 Under the reverse false claims provision, health care providers may not avoid
6 liability simply by ignoring audits or terminating investigations that would have revealed
7 overpayments received from the government. See *United States ex rel. Keltner v.*
8 *Lakeshore Med. Clinic, Ltd.*, 2013 WL 1307013, at *3-4 (E.D. Wis. Mar. 28, 2013) (relator
9 stated a reverse false claim where defendant found high rates of upcoding by physicians
10 in audits but failed to follow up on non-audited claims). Here too there is evidence for the
11 jury to find that United deliberately ignored or recklessly disregarded the results of its
12 Chart Review audits in violation of the FCA.

13 In 2010, Congress codified this already existing obligation in the Patient Protection
14 and Affordable Care Act (ACA), Pub. L. No. 111-148, 124 Stat. 119 (2010). The ACA
15 was enacted a year after the FERA amendment to the FCA and is instructive as to what
16 Congress intended by defining obligation to include a duty arising "from the retention of
17 an overpayment." See *Graves v. Plaza Med. Ctrs., Corp.*, 281 F. Supp. 3d 1260, 1275
18 (S.D. Fla. 2017). The ACA mandated that an overpayment must be returned within 60
19 days after it is identified, 42 U.S.C. § 1320a-7k(d)(2), and defined overpayment as, "any
20 funds that a person receives or retains under [the Medicare or Medicaid programs] to
21 which the person, after applicable reconciliation, is not entitled." 42 U.S.C. § 1320a-
22 7k(d)(4)(B). Congress made explicit that continued retention of an overpayment beyond
23 the 60-day deadline is an "obligation" under the FCA. 42 U.S.C. § 1320a-7k(d)(3). Under
24 the ACA, therefore, an MAO must return to CMS an overpayment (payment for an
25 unsupported code) within 60 days of when the MAO identifies an overpayment, or it
26 otherwise becomes an obligation to pay under the FCA. *Id.* The statutory overpayment-
27 refund obligation "corrects particular mistaken payments to [MA] insurers that exceed
28 what the relevant medical records support." *Becerra*, 16 F.4th at 886.

1 If “a [MA] insurer has received a payment increment for a beneficiary’s diagnosis
2 and discovers that there is no basis for that payment in the underlying medical records,
3 that is an overpayment that the insurer must correct by reporting it to CMS within sixty
4 days for refund.” *Becerra*, 16 F.4th at 870. “Insurers are required to refund payments based
5 on unsupported diagnoses that they themselves discover through the course of their
6 business.” *Id.* at 877-78. *See also Sutter*, 444 F. Supp. 3d at 1068.

7 In accordance with the FCA’s deliberate ignorance and reckless disregard standard,
8 an overpayment is “identified” under the overpayment-refund statute when an MAO ““is
9 put on notice of a potential overpayment, rather than the moment when an overpayment is
10 conclusively ascertained.”” *Sutter*, 444 F. Supp. 3d at 1080 (citing *Kane*, 120 F. Supp. 3d
11 at 387-88). In *Sutter*, the court rejected the defendant’s argument that “identified” in the
12 overpayment-refund statute required showing that defendants “had actual knowledge of
13 specific unsupported diagnosis codes and payments based on those codes. . .,” holding that
14 an overpayment is identified when the defendant was put on notice of a potential
15 overpayment. *Id.* at 1078-80 (agreeing with the reasoning of *Kane*).

16 The court in *Kane* conducted an extensive analysis of the term “identified” in the
17 ACA, including the plain meaning of the text,¹⁹ legislative history, and legislative purpose
18 of the provision, concluding that put on notice was the correct interpretation, rejecting
19 defendants’ argument that identified means “classified with certainty.” *Kane*, 120 F. Supp.
20 3d at 384-91. Both the *Sutter* and *Kane* courts recognized that interpreting “identified” to
21 mean “classified with certainty” would lead to absurd results. *Sutter*, 444 F. Supp. 3d at
22 1079; *Kane*, 120 F. Supp. 3d at 388-90. The *Kane* court reasoned that “[u]nder the
23 Defendants’ framework, their obligation to pay would not be triggered until *after* they
24 have done the work necessary to determine conclusively the precise amount owed to the
25 Government, thus creating a perverse incentive to delay learning the amount due and
26 relegating the sixty-day period to merely the time within which they would have to cut the

27
28 ¹⁹ The court found that the plain meaning of “identified” was susceptible to two or more
reasonable meanings and consequently resort to canons of statutory construction was
warranted. *Kane*, 120 F. Supp. 3d at 385 (citation omitted).

1 check. This is likely not what Congress intended.” *Kane*, 120 F. Supp. 3d at 390. The court
2 held that “[i]t would be an *absurd result* to construe this robust anti-fraud scheme as
3 permitting willful ignorance to delay the formation of an obligation to repay the
4 government money that is due.” *Id.* at 390 (emphasis added); *see also Swoben*, 848 F.3d
5 at 1169 (“[i]f the requirement to return and report overpayments applied only to situations
6 where the [MAO]. . . has actual knowledge of the existence of an overpayment, then these
7 entities could easily avoid returning improperly received payments”).

8 Both the *Sutter* and *Kane* courts found that the put-on-notice standard was in line
9 with Congress’s purpose in passing the FCA and FERA, and incorporating, in the ACA, a
10 mandate to report and return Medicare and Medicaid overpayments. *Kane*, 120 F. Supp.
11 3d at 390-91; *Sutter*, 444 F. Supp. 3d at 1079. Both courts recognized that limiting
12 “identified” to when the overpayment has been conclusively ascertained “would frustrate
13 Congress’s intention to subject willful ignorance of Medicaid [and Medicare]
14 overpayments to the FCA’s stringent penalty scheme.” *Kane*, 120 F. Supp. 3d at 391;
15 *Sutter*, 444 F. Supp. 3d at 1079.

16 Further, both courts rejected defendants’ arguments that Congress’ choice of
17 “identified” instead of “known” overpayments reflects “an intent to impose a higher
18 standard than the FCA’s ‘knowing’ standard.” *Sutter*, 444 F. Supp. 3d at 1080; *Kane*, 120
19 F. Supp. 3d at 386-88. Both courts found that the legislative history was silent on why
20 Congress made this choice, and that to interpret “identified” to mean “when a provider is
21 put on notice of a potential overpayment, rather than the moment when an overpayment is
22 conclusively ascertained, is compatible with the legislative history of the FCA and the
23 FERA.” *Kane*, 120 F. Supp. 3d at 388; *Sutter*, 444 F. Supp. 3d at 1080.

24 Other courts have held that the “put on notice” standard is consistent with the
25 deliberate ignorance and reckless disregard standard in the FCA. *See, e.g., Graves*, 276 F.
26 Supp. 3d at 1348 (holding that a reasonable jury could find that an MAO knowingly
27 retained overpayments for unsupported codes where the MAO ignored red flags and failed
28 to investigate whether it had submitted unsupported codes); *see also Lakeshore Med.*

1 *Clinic*, 2013 WL 1307013, at *3-4. And the Ninth Circuit recognizes that being put on
2 notice of a potential error supports a finding of deliberate ignorance or reckless disregard.
3 *Silingo*, 904 F.3d at 681 (“Silingo simply claims that all of the defendant organizations
4 were equally *put on notice* by the warning signs that allegedly infected MedXM’s health
5 assessment reports. These allegations, if true, give rise to the reasonable inference that the
6 defendant organizations knowingly submitted false claims and used false records, or else
7 acted with reckless disregard or deliberate indifference of the falsity of the claims and
8 records”) (emphasis added).

9 Establishing United’s Obligation to Pay does not require showing an Objectively
10 High Risk of Overpayment. United contends that the United States cannot establish an
11 obligation to repay unless the government establishes that the codes at issue resulted in
12 such an “objectively” high risk of overpayment that United would be reckless or
13 deliberately ignorant not to investigate them further. Joint Brief, 52-53. United essentially
14 contends that unless the United States shows that there was an “objectively” high risk of
15 overpayment, United can turn a blind eye to evidence from its own Chart Review program.
16 *Id.* But United is not moving for summary judgment on the element of knowledge, which,
17 of course, is a highly fact intensive analysis for a jury to determine.

18 Moreover, United distorts the Supreme Court’s ruling in *United States ex rel.*
19 *Schutte v. SuperValu Inc.*, 598 U.S. 739 (2023). *SuperValu* does not require the
20 government to establish the existence of an “objectively” high risk of overpayment to
21 prove scienter. In fact, *SuperValu rejected* the contention that there was a “purely objective
22 safe harbor” with respect to scienter. *Id.* at 755. Instead, it held that the “FCA’s scienter
23 element refers to respondents’ knowledge and subjective beliefs – not to what an
24 objectively reasonable person may have known or believed.” *Id.* at 749.²⁰

25
26
27 ²⁰ The Court did not decide how or whether reckless disregard also includes an “objective
28 form of ‘recklessness’ . . . [since] it is enough to say that the FCA’s standards can be
satisfied by a defendant’s subjective awareness of the claim’s falsity or an unjustifiable
risk of such falsity.” *Id.* at 751 n.5.

1 The Supreme Court recognized that deliberate ignorance captures “defendants who
2 are aware of a substantial risk that their statements are false, but intentionally avoid taking
3 steps to confirm the statements’ truth or falsity,” and where “a person making a false
4 statement had shut his eyes to the facts, or purposely abstained from inquiring into them .
5 . . . ,” while reckless disregard “similarly captures defendants who are conscious of a
6 substantial and unjustifiable risk that their claims are false, but submit the claims anyway.”
7 *SuperValu*, 598 U.S. at 751.²¹

8 Importantly, the Supreme Court held that scienter turns on “what the defendant
9 thought when submitting the false claim – not what the defendant may have thought *after*
10 submitting it,” *id.* at 752 , and “[n]othing in *Safeco* suggests that we should look to facts
11 that the defendant neither knew nor had reason to know at the time he acted.” *Id.* at 755.
12 United bases its contention that there was no “objectively” high risk of overpayment on
13 (an incorrect perspective of) the work done by the United States’ expert in this litigation
14 to identify unsupported codes, and to calculate the impact on payments to United had it
15 deleted those codes. Joint Brief, 53 (referring to Dr. Garthwaite’s 2023 expert report). This
16 work, of course, was done many years after United decided to ignore the codes not found
17 supported by its Chart Review coders. United took no steps to address those errors when
18 it received its Chart Review results. P-5, United 30(b)(6) (Sedor) Tr. 4108:24-4109:6.
19 United neither knew nor had reason to know the after-the-fact risk of overpayment it relies
20 on here when it acted in deliberate ignorance or reckless disregard of its coders’ results.
21 As such, under *SuperValu*, the after-the-fact risk of overpayment alleged by United has no
22 bearing on its scienter or obligation to pay.²²

23 ²¹ The Court used the phrase “intentionally avoid taking steps to” learn the truth in
24 describing deliberate ignorance, *SuperValu*, 598 U.S. at 751, not “taking deliberate action
25 to avoid learning the truth” as United contends. *Supra* at 52-53 (citing *Siebert v. Gene Sec.*
26 *Network, Inc.*, 75 F. Supp. 3d 1108, 1116-17 (N.D. Cal. 2014)). In any event, the Ninth
Circuit made clear in *Swoben* that failing to make simple inquiries into the truth or falsity
of a claim constitutes deliberate ignorance. 848 F.3d at 1174.

27 ²² The same is true for after-the-fact RADV audit feedback. United obtained the
28 preliminary RADV audit data it relies on here many years after it took no steps to address
the errors found by its coders. P-32, Declaration of Steven Ferraina (Jul. 12, 2024) 4412
¶¶ 3, 6, 7 (initial feedback made available starting in April 2019); *see also* P-5, United

1 Additionally, United's argument conflates two different concepts – the *rate* at which
2 individual unsupported codes impact payment, and the overall *risk* of overpayment when
3 United knew of large numbers of unsupported diagnosis codes. Even if United were
4 correct that there was only a 7% probability that an individual unsupported diagnosis code
5 resulted in an overpayment, Joint Brief, 53, that *rate* would not establish anything about
6 the *risk* that millions of unsupported codes in the aggregate resulted in overpayments to
7 United. And United had every reason to know that risk was high. See P-11 at 4249-50,
8 Response to Interrogatory 20 (CMS recouped more than \$200 million from United for the
9 deletes submitted under Claims Verification).

10 Finally, United's argument again leads to absurd results. If United's duty to conduct
11 its Chart Review in good faith and to take steps to address errors only arises if it knows
12 there is an "objectively" high risk of overpayment, then United could easily avoid its duty
13 by doing nothing after receiving Chart Review results and never learning what the risk of
14 overpayment is. But doing nothing violates United's duties to conduct its Chart Review in
15 good faith and take steps to address errors as required by regulation and contract, as held
16 by the Ninth Circuit in *Swoben*. 848 F.3d at 1174-76.

17 Here, there is, at a minimum, a genuine dispute of material fact as to whether United
18 acted with deliberate ignorance or reckless disregard when it failed to make any inquiry
19 into the validity of previously submitted codes that were not found to be supported by
20 United's Chart Reviewers. The jury can find that when United's coders failed to find
21 support for diagnosis codes that United had previously submitted to CMS, United was
22 aware of a substantial risk that the diagnosis codes were unsupported, but intentionally
23 avoided taking any steps to inquire further into their validity. United's reliance on
24 information generated years after it performed Chart Review fails to establish that it is
25 entitled to summary judgment.

26 30(b)(6) (Sedor) Tr. 4059:13-4061:1 (MAOs had to submit all diagnosis data by the final
27 submission deadline, which was generally January 31st of the year following the payment
28 year). Consequently, United neither knew nor had reason to know of the after-the-fact
initial results of RADV medical record reviews at the time it ignored its negative Chart
Review results.

1 United’s Other Meritless Arguments Regarding its Regulatory and Contractual
2 Duties. United makes several other meritless arguments in an attempt to avoid its
3 longstanding contractual and regulatory duties. It contends that CMS’s decision in 2014
4 not to finalize a proposed rule relating to medical record reviews gives it a free pass to
5 ignore the negative results of its Chart Reviews. Joint Brief, 48-49. The proposed MRRR
6 provided that “medical record review methodology must be designed to identify errors in
7 diagnoses submitted to CMS . . . regardless of whether the data errors would result in
8 positive or negative payment adjustments.” D-16 at 638, Contract Year 2015 Policy and
9 Technical Changes to the Medicare Advantage Program, 79 Fed. Reg. at 2000.

10 But United ignores that on May 23, 2014, when CMS announced it was not adopting
11 the proposed MRRR, it expressly stated that this decision did not change the “long-
12 standing risk adjustment data requirement that a diagnosis submitted to CMS by an MA[O]
13 for payment purposes must be supported by medical record documentation,” nor the
14 “existing contractual requirement that MA[Os] must certify (based on best knowledge,
15 information, and belief) the accuracy, completeness, and truthfulness of the risk
16 adjustment data they submit to CMS.” P-92 at 5044, 5047, Contract Year 2015 Policy and
17 Technical Changes to the Medicare Advantage Program, 79 Fed. Reg. at 29,921-22,
18 29,926. And the “best knowledge, information, and belief” duty is the very one that the
19 Ninth Circuit concluded United violated when it ignored the results of its Chart Reviews.
20 *Swoben*, 848 F.3d at 1175-76. In so ruling, the Ninth Circuit expressly concluded that
21 CMS’s decision to not finalize the MRRR did not negate United’s longstanding
22 obligations nor give United a free pass to ignore the negative results of its Chart Reviews.
23 *Id.* at 1169. CMS’s decision not to finalize a rule requiring MAOs to design all their chart
24 reviews to identify over-reporting errors does not excuse an MAO from turning a blind
25 eye to over-reporting errors found in chart reviews it chooses to conduct.

26 Referring to the MRRR, United further contends that the United States cannot
27 impose a duty which “CMS considered and rejected a decade ago,” citing *Azar v. Allina*
28 *Health Servs.*, 587 U.S. 566, 584 (2019). Joint Brief, 49. But the duties at issue in this case

1 were not “considered and rejected a decade ago” because they were established long
2 before CMS proposed the MRRR and explicitly remained unchanged after CMS did not
3 finalize the MRRR. *Allina* is also inapposite because it held that where the government
4 establishes or changes a policy, it must do so through notice-and-comment rulemaking.
5 587 U.S. at 583-84. Here, United’s obligation to pay arises from regulation, contract, and
6 statute, not from a policy that did not go through notice-and-comment rulemaking.

7 Employing yet another red herring, United feebly asserts that the regulation
8 reflecting the good faith and due diligence standard does not require all codes submitted
9 by an MAO to be accurate, nor requires MA plans to represent something about how they
10 structured their chart reviews. Joint Brief, 49. But, of course, the United States is not
11 making these assertions, but instead contends that United’s turning a blind eye to over-
12 reporting errors found by its own coders shows “a lack of diligence and an absence of
13 good faith,” as *Swoben* concluded. 848 F.3d at 1175-76. In its similarly frail argument
14 disputing its compliance duties, Joint Brief, 50, United ignores completely the fact that the
15 Ninth Circuit held that the compliance regulations impose a duty on MA plans to take
16 affirmative steps to address errors. *Swoben*, 848 F.3d at 1174.

17 Additionally, United, with no relevant support, speciously contends that CMS’s
18 decision not to finalize the MRRR and the “lack of clarity” in the due diligence, good faith
19 and compliance regulations raise due process concerns. Joint Brief, 50-51. But United,
20 ignoring that the Ninth Circuit held that CMS has been clear since 2000 that plans are
21 required to undertake good faith efforts and to take steps to address errors by correcting
22 the submission of unsupported codes, *Swoben*, 848 F.3d at 1178-79, fails to address
23 evidence that it was aware that CMS applied the FCA’s knowledge standard to MAOs’
24 “best knowledge, information, and belief” requirement and expected MAOs to correct
25 submitted codes not found supported in their chart reviews. P-33, United 30(b)(6)
26 (Theisen) Tr. 4416:1-4419:17; *see also* P-17, at 4293 (referencing SCAN settlement).
27 Where rules have been clear for more than twenty years and a defendant was aware of
28 them, no due process concerns arise in applying them to the defendant.

1 **C. United’s Legal Argument: DOJ Cannot Show That United’s Conduct**
2 **Was Material to CMS’s Decision to Pay United**

3 DOJ also cannot show that the alleged fraud was “material” to CMS’s decision to
4 pay United. It is undisputed that CMS was aware of United’s chart review practices. See
5 United MSJ, *supra* at 10-11, 15-16. If CMS considered that practice to be material to its
6 payment decision, it would have refused to accept United’s bids, refused to pay United, or
7 taken *some* remedial action. It did *none* of those things. See United MSJ, *supra* at 16.

8 The starting point is the Supreme Court’s recent decision in *Escobar*. There, the
9 Court explained the FCA is “not a vehicle for punishing garden-variety breaches of
10 contract or regulatory violations,” but rather “material” misrepresentations that amount to
11 fraud. 579 U.S. at 193. This requirement is “rigorous.” *Id.* at 192. As the Court explained,
12 “if the Government pays a particular claim in full despite its actual knowledge that certain
13 requirements were violated, that is very strong evidence that those requirements are not
14 material.” *Id.* at 195. Since *Escobar*, the Ninth Circuit has confirmed that courts may
15 “properly dismiss an FCA claim on summary judgment based on a claimant’s failure to
16 meet the rigorous standard for materiality under the FCA,” including for “reverse false
17 claims.” *Kelly v. Serco, Inc.*, 846 F.3d 325, 333–36 (9th Cir. 2017).

18 This Court already followed *Escobar* in dismissing the three “attestation-based”
19 FCA claims at the pleading stage for failing to allege materiality. Those claims were based
20 on allegations that United’s attestations of accuracy were false because United knew that
21 diagnosis codes previously submitted by doctors were unsupported when its coders
22 conducting chart review did not independently identify them. As to those claims, the Court
23 held that DOJ failed to allege that the attestations were material to CMS’s payment
24 decision. See Dkt. 212 (quoting *Escobar*, 579 U.S. 176, 190–93 (2016)). The Court gave
25 DOJ the option to amend its complaint to address that deficiency, but DOJ declined to do
26 so.

27 Now, at summary judgment, DOJ’s remaining reverse FCA claim founders on the
28 same basic (and now undisputed) facts. Applying *Escobar*, there is “very strong evidence

1 that those requirements are not material,” because CMS knew about United’s chart review
2 practices, continued accepting United’s bids, and continued paying United’s claims “in
3 full despite its actual knowledge.” 579 U.S. at 195. CMS knew about the practices DOJ
4 now claims are fraudulent but did not alter its decision to contract with or pay United. *See*
5 United MSJ, *supra* at 10-11, 15-16; *see also* JS at D150-D154, D227-D228, D231; *see*,
6 *e.g.*, Exs. D-68 at 2113-14, D-21 at 671, D-8 at 384-89, D-140 at 3505:19-06:8. Nor did
7 CMS take remedial action at all. JS at D229-D230; Exs. D-8 at 0384-89, D-131 at 3356:8-
8 12.

9 This should not be a debatable point. In 2014, when CMS proposed adopting the
10 MRRR, United contacted CMS to clarify the rules. *See* United MSJ, *supra* at 15. In April
11 2014, United representatives met with CMS officials to discuss whether MA plans had an
12 affirmative obligation to confirm the validity of diagnosis codes submitted by doctors but
13 not identified by MA plan coders during chart review. *See id.* United witnesses recall that
14 CMS confirmed MA plans do not have such an obligation unless the proposed MRRR
15 became final (which it never did). JS at D127; Exs. D-131 at 3352:17-53:24, D-138 at
16 3487:24-88:10, D-22 at 674-75, D-24 at 680. CMS officials did not recall what was said
17 during the meeting, with only one attendee claiming a limited recollection at best. JS at
18 D128-D129; Exs. D-137 at 3460:11-18, D-145 at 3661:25-62:2, 3664:25-66:16, D-146 at
19 3701:8-03:25, D-105 at 2775:2-76:3, D-97 at 2637:22-38:3, 2640:2-18. What is
20 undisputed is that after the meeting, United disclosed year after year to CMS in subsequent
21 bids and attestations that it was ceasing (and later, had ceased) its complex auditing
22 program and thus no longer affirmatively sought to confirm such codes in its chart review
23 program. *See, e.g.*, JS at D150-D154; Exs. D-25 at 689, D-33 at 729-30, D-26 at 709-10,
24 D-31 at 725.

25 For these reasons, DOJ cannot satisfy *Escobar*’s “rigorous” materiality element,
26 which is an independent basis for granting summary judgment for United.
27
28

US Response to Issue 1.C.: Materiality is Not an Element of the Claim at Issue, But Even if it Were, the United States Can Establish Materiality

United’s materiality argument fails for four distinct reasons: (1) as discussed in the United States’ Motion for Partial Summary Judgment (MPSJ), *see infra* at 84-86, materiality is not an element of a claim under the second prong of 31 U.S.C. § 3729(a)(1)(G); and even if materiality were a requirement; (2) CMS did not have knowledge of United’s chart review practices; (3) the relevant question is whether specific unsupported codes are material, not United’s chart review practices generally; and (4) materiality can be established absent CMS terminating United’s MA contract or stopping payment.

First, United cites no case from any jurisdiction that discusses materiality within the context of the second prong of the reverse false claims provision. Rather, United attempts to contort *Escobar* to its unfounded theories, but *Escobar* only addresses materiality under the affirmative False Claim Act provision, 31 U.S.C. § 3729(a)(1)(A); 579 U.S. at 181; United States’ MPSJ, Joint Brief, 84-86. The only other case cited by United, *United States ex rel. Kelly v. Serco, Inc.*, 846 F.3d 325, 333-36 (9th Cir. 2017), also discusses materiality in the context of § 3729(a)(1)(A). Therefore, the Court can end the inquiry here and reject United’s materiality argument.

While the Court need not consider any of the factual information presented regarding materiality, United grossly distorts the record. United alleges that “it is undisputed that CMS was aware of United’s chart review practices.” Joint Brief, 67. It is, however, very much disputed what and when CMS knew about any of United’s internal practices. United admits that its Chart Review and Claims Verification program are not the same thing. D47; D109. United has set forth no evidence that it provided CMS with information about the details of its Chart Review program or its relationship to Claims

1 Verification. Instead, United relies on cursory high-level explanations of its Claims
2 Verification Program that it alleges it provided CMS in 2014²³ to support its argument.

3 United incredulously asserts that in a 45-minute videoconference, CMS officials
4 revised the bedrock deliberative ignorance/reckless disregard standard of the “best
5 knowledge, information, and belief” requirement and the FCA by allegedly confirming
6 that United could deliberately ignore information obtained in its Chart Review program
7 showing it had previously submitted unsupported codes. Joint Brief, 68. There is evidence,
8 however, that nothing of the sort occurred at the April 29 videoconference. United’s own
9 witnesses acknowledge that the videoconference focused on United’s Claims Verification
10 process (as opposed to Chart Review). P-34, Erickson Tr. 4425:17-4426:8; P-25, Nelson
11 Tr. 4352:24-4353:5; 4354:10-17. United could have asked CMS a simple, straightforward
12 question that cut to the heart of this case: If we review a medical record and do not find
13 support for a diagnosis code that we’ve already submitted, can we ignore that information
14 and neither delete those unsupported diagnoses, nor investigate further to determine their
15 accuracy? Rather than ask that straightforward question, United provided incomplete
16 information to CMS and focused on obtaining a statement to justify terminating its Claims
17 Verification program.

18 Both CMS and United witnesses recall CMS reminding United that the FCA applied
19 to United’s conduct under discussion. P-10, Rice Tr. 4232:4-12; P-29, Johnson Tr.
20 4379:25-4380:16; P-35, Schumacher Tr. 4432:18-4433:3; D-22, at 675 (Johnson
21 contemporaneous notes). And, importantly, Sean Cavanaugh, then Deputy Administrator
22 of CMS and Director of the Center for Medicare, categorically denies United’s
23 characterization that CMS endorsed United’s position that they could both cease the
24 Claims Verification process and not delete known unsupported codes. P-20, Cavanaugh
25 Tr. 4321:14-25; 4322:14-4323:23; P-36 at 4436-37 (2015 Cavanaugh email disputing
26 same). Rather, he recalls CMS making entirely different statements than those United has
27

28 ²³ United thus concedes that even any limited knowledge CMS had only occurred as of
2014 - well into the relevant period of this litigation.

1 set forth, namely that: aside from the proposed MRRR, United “should be aware there are
2 other statutes, regulations, requirements that apply to your obligation to submit complete
3 and accurate data. You should make sure you’re aware of them, and if you’re asking us
4 questions about how to specifically comply with the law, that’s more appropriately posed
5 to your own counsel.” P-20, Cavanaugh Tr. 4318:14-4319:2.

6 Based on notes taken at the meeting by United’s own executives, a jury may find
7 that CMS officials said they did not know enough about United’s processes to give
8 feedback on United’s proposed course of action, that it was unacceptable to not delete
9 what United knew were unsupported codes, and that there was an FCA requirement that
10 plans not knowingly keep overpayments. Dan Schumacher, then CFO of United
11 HealthCare, included in his notes these statements attributed to CMS’s Cheri Rice: “Not
12 acceptable to not delete what we know;” “If you have knowledge of deletes, you [should]
13 delete;” “Statutory obligation to report & repay;” “false claims act implications;” “Haven’t
14 known enough process to give feedback on our judgments.” P-28 at 4376 (Schumacher
15 Notes).

16 Following the April 29, 2014 videoconference, there is evidence that CMS was left
17 with very little understanding regarding United’s Claims Verification program and no
18 understanding of United’s Chart Review program. P-26, CMS 30(b)(6) (Hornsby) Tr.
19 4363:1-24; P-10, Rice Tr. 4236:20-4237:7; 4238:12-4239:2.

20 United’s follow-up email on April 30, 2014 provided no specific details to CMS
21 about United’s Claims Verification Program and included no details about Chart Review
22 whatsoever. P-24 at 4347-48 (2014 CMS/United correspondence). Importantly, United
23 fails to acknowledge that CMS responded by email on May 2, 2014 that, “[r]egardless of
24 the effective date of the proposed requirement related to medical record reviews, there are
25 other laws that do impose standards, requirements and responsibilities on MA plans in
26 connection with the federal payments they receive from CMS. We cannot provide advice
27 to United about the scope of those other laws. Nor can we provide advice on whether
28 United’s plan [sic] course of action and/or purported limits on the scope of its attestation

1 are compliant with such other laws.” *Id.* Ms. Rice testified that, with this email, she sought
2 to make clear “that [United] should not take away from that meeting that we had said that
3 it was okay to stop the claims verification program, or that it was okay not to continue to
4 review and determine whether those questionable diagnoses were accurate or not.” P-10,
5 Rice Tr. 4234:13-4235:1. United continued to email CMS yearly during the relevant
6 period reiterating that it had ceased its Claims Verification program and CMS responded
7 with that same message that it could not endorse United’s practices. *See* P-1D at 4008-09,
8 P-1E at 4011-12; P-1F at 4015-16.

9 United also claims that a short blurb it included with its MA bids after 2014 likewise
10 provided CMS with sufficient knowledge about United’s “Chart Review practices.”
11 Specifically, United points to the sentence, “[t]he health plan has decided to cease *one of*
12 its prior processes that identified and deleted certain diagnosis codes through the medical
13 record review process.” D-25 at 689 (emphasis added). But this statement did not, and
14 could not, give any meaningful information to CMS actuaries unfamiliar with United’s
15 processes and procedures. P-79, Spitalnic (US Expert, CMS Chief Actuary) Tr. 4978:16-
16 4979:4; P-38, CMS 30(b)(6) (Limmer) Tr. 4450:25-4451:20. Further, on its face it
17 suggests that the data review process that had been terminated was only “*one of*” United’s
18 programs identifying and deleting diagnosis codes in the medical review process.
19 Moreover, United has offered no evidence in this case that CMS’s actuaries actually
20 reviewed or considered this sentence when evaluating United’s bids. P-38, CMS 30(b)(6)
21 (Limmer) Tr. 4452:10-4453:19.

22 Therefore, contrary to United’s assertions, the evidence very much disputes that
23 CMS had “actual knowledge” of United’s Chart Review practices. *See, e.g., Escobar*, 579
24 U.S. at 195 (discussing actual knowledge of Government); *United States ex rel. Campie*
25 *v. Gilead Sci., Inc.*, 862 F.3d 890, 906-7 (9th Cir. 2017) (“[T]he parties dispute exactly
26 what the government knew and when, calling into question its ‘actual knowledge.’”).

27 Further, United obfuscates the question of what information or conduct would be
28 material to the government in a case brought under the second prong of the reverse false

1 claims provision, should such a requirement exist. United argues that “CMS knew about
2 the practices DOJ now claims are fraudulent but did not alter its decision to contract with
3 or pay United.” Joint Brief, 68. However, as United concedes, the United States does not
4 contend that chart review practices generally are “fraudulent.” Instead, the claim in this
5 case is that United knowingly ignored information that it received payment from CMS for
6 unsupported diagnosis codes. *See* Joint Brief, 16 (acknowledging that the Government
7 “does not contend . . . that there is anything fundamentally wrong with chart review”).
8 Even if CMS had generalized knowledge about United’s Chart Review program (which it
9 did not), such knowledge does not mean CMS knew of invalid codes. Without such
10 specific knowledge, CMS would not have known that payment adjustments were
11 necessary. Therefore, it is the diagnosis codes themselves that impact accurate MA
12 payments by CMS. *See Sutter*, 444 F. Supp. 3d at 1025. If a showing of materiality is
13 required here, it is whether the specific unsupported diagnosis codes are material to CMS
14 because, as described above, CMS adjusts payment when it has information that a specific
15 diagnosis code is unsupported – it does not pay MA Plans for codes that plans delete.
16 There is certainly evidence for the jury to conclude these unsupported codes are material.

17 Finally, even if the caselaw United relies on regarding materiality in the context of
18 affirmative false claims applied to the second prong of the reverse false claims provision,
19 United presents the law in a misleading manner. The FCA defines “material” as “having
20 a natural tendency to influence, or be capable of influencing, the payment or receipt of
21 money . . .” 31 U.S.C. § 3729(b)(4). The plain meaning of “tendency to influence” and
22 “capable of influencing” covers conduct beyond the exclusive question of whether CMS
23 would have refused to pay United if it had known of its chart review practices. United
24 omits reference to the FCA definition because it defeats United’s argument.

25 Likewise, United opportunistically ignores the relevant caselaw regarding
26 materiality by suggesting CMS’s continued contracting with and continued payments to
27 United are dispositive. However, *Escobar* makes clear that materiality is a holistic, fact-
28 intensive inquiry that “cannot rest on ‘a single fact or occurrence as always

determinative.’” *Escobar*, 579 U.S. at 191 (quoting *Matrixx Initiatives, Inc. v. Siracusano*, 563 U.S. 27, 39 (2011)). *Escobar* lists several non-dispositive factors for courts to consider in examining materiality. 579 U.S. at 194-95; *United States ex rel. Mei Ling v. City of Los Angeles*, Case No. CV 11-974 PSG (JCx), 2018 WL 3814498, at *13 (C.D. Cal. July 25, 2018) (“In sum, *Escobar* suggests that the following factors are relevant to the materiality inquiry: whether the violated requirement was expressly identified as a condition of payment, which, though ‘relevant, [is] not automatically dispositive’; whether the violation went to the essence of the bargain; whether the violation was minor or insubstantial; and the actions that the Government took in response to these or similar violations.”). The jury should be able to consider that many of the factors weigh in favor of a finding of materiality here, including that accurate diagnosis codes are a condition of payment, and that the violation was substantial.

United disregards the *Escobar* factors that weigh against its argument and improperly makes stopping payment and terminating contracts the *sine qua non* of materiality. See, e.g., *United States ex rel. Escobar v. Universal Health Servs., Inc.*, 842 F.3d 103, 110-12 (1st Cir. 2016) (finding on remand from the Supreme Court that materiality was sufficiently alleged despite continued payment by the Government). United wholly ignores the reality that CMS is charged with providing health coverage to more than 160 million people, including through the Medicare program. See P-39 at 4457, CMS website, <https://www.cms.gov/about-cms> (last visited July 15, 2024). CMS takes very seriously the critical importance of ensuring the continuity of coverage and care for this vulnerable population. P-26, CMS 30(b)(6) (Hornsby) Tr. 4360:14-22 (CMS “want[s] beneficiaries to have continuity of coverage and to be protected. . .”); 4361:4-14 (“beneficiary harm is the overarching reason for termination”). CMS could not simply stop making payments to United broadly or terminate its contract with United, as doing so would have had significant, deleterious consequences for *millions* of American seniors, including potential continuity of care concerns. P-26, CMS 30(b)(6) (Hornsby) Tr. 4362:7-17. Courts have recognized that there are circumstances where public interest concerns

1 may fairly weigh on an agency’s determination to continue payment. *See, e.g., Mei Ling*,
2 2018 WL 3814498 at *19.

3 **D. United’s Legal Argument: DOJ Cannot Show United “Conceal[ed]” or**
4 **“Improperly Avoid[ed]” an Obligation to Return Money**

5 DOJ’s reverse FCA claim fails for a final reason: There is no evidence United
6 committed any acts of deception. DOJ must show United not only knowingly retained
7 overpayments but also took affirmative deceptive steps to retain them. That requirement
8 is central to the definition of “fraud.” Yet, there is no evidence United engaged in any
9 fraudulent act. Instead, DOJ contends United’s mere knowing retention of an overpayment
10 is sufficient under the reverse FCA. That view directly contradicts the Supreme Court’s
11 command that the FCA is not “a vehicle for punishing garden-variety breaches of contract
12 or regulatory violations.” *Escobar*, 579 U.S. at 194. This Court should enforce the FCA’s
13 core fraud requirement.

14 **1. The FCA Requires a Fraudulent Act of Concealment**

15 The FCA is a fraud statute, and the key defining feature of fraud is deceptive acts.
16 The FCA does *not* cover non-fraudulent conduct. It “would be unreasonable to assume
17 [that the FCA] covers both fraudulent and nonfraudulent conduct Without fraud,
18 punitive damages—a mandatory penalty of up to \$10,000 for each claim and treble
19 damages—would seem an unreasonable levy against individuals guilty only of
20 ‘knowingly’ receiving an overpayment from the government fisc.” *Olson v. Fairview*
21 *Health Servs. of Minn.*, 831 F.3d 1063, 1074 (8th Cir. 2016). Like the common law of
22 fraud, the reverse FCA requires an affirmative act of deception. The statute penalizes
23 “[a]ny person who . . . knowingly *conceals* or knowingly and *improperly avoids* or
24 *decreases* an obligation to pay or transmit money or property to the government.” 31
25 U.S.C. § 3729(a)(1)(G) (emphasis added). Thus, it is insufficient for DOJ to show that a
26 defendant knowingly violated an obligation to pay or transmit money to the government.
27 The defendant must also take steps to “conceal” or “improperly avoid” or “decrease” that
28 obligation.

1 The common law confirms the plain meaning of the FCA. The Supreme Court has
2 made clear the “FCA is largely a fraud statute.” *United States ex rel. Schutte v. SuperValu*
3 *Inc.*, 598 U.S. 739, 750–51 (2023). Thus, “[i]n the absence of statutory text to the
4 contrary,” courts must interpret the FCA as incorporating “the well-settled meaning of
5 such a common-law term.” *Id.* at 751. At common law, fraud always required deception.
6 See 1 Joseph Story, *Commentaries on Equity Jurisprudence* §§ 205–79 (1846). The
7 common law distinguishes between fraudulent acts, like concealment, and non-fraudulent
8 acts, like non-disclosure. “[F]raudulent concealment—without any misrepresentation or
9 duty to disclose—can constitute common-law fraud. This does not mean, however, that
10 simple nondisclosure similarly constitutes a basis for fraud.” *United States v. Colton*, 231
11 F.3d 890, 899 (4th Cir. 2000). Instead, “concealment” “is characterized by deceptive acts
12 or contrivances intended to hide information, mislead, avoid suspicion, or prevent further
13 inquiry,” whereas “nondisclosure” is “characterized by mere silence.” *Id.*

14 In addition, acts such as breach of contract are not in and of themselves fraudulent.
15 See Restatement (Third) of Torts: Liability for Economic Harm § 10 (2018)
16 (distinguishing breach of contract from fraud and explaining that “[i]n short, the law of
17 fraud is concerned with various sorts of lies, not with . . . broken promises”); *id.* (“A party
18 who promises an act but then decides not to carry it out may be liable for breach of contract
19 or on a theory of promissory estoppel, but is not liable for fraud unless the statement of
20 intention was false when made.”). Courts have steadfastly held that “failing to disclose a
21 breach of promise does not transform a contract action into one for fraud.” *Compania Sud-*
22 *Americana de Vapores, S.A. v. IBJ Schroder Bank & Trust Co.*, 785 F. Supp. 411, 423
23 (S.D.N.Y. 1992); *cf. Myklatun v. Flotek Indus., Inc.*, 734 F.3d 1230, 1235–36 (10th Cir.
24 2013).

25 DOJ’s contrary position would have absurd results. The reverse FCA applies to all
26 “obligations” to transmit money to the government. This extends beyond “overpayments”
27 and includes payment obligations arising from contractual obligations. 31 U.S.C.
28 § 3729(b)(3); *see also, e.g., Kennard v. Comstock Res.*, 363 F.3d 1039, 1048 (10th Cir.

2004) (applying the reverse FCA to alleged underpayment of mineral royalties to the government). If there were no requirement for an affirmative deceptive act, then any deliberate failure to pay royalties or other payments or debts due under a contract would constitute fraud under the FCA. But “the common law does not permit a fraud claim based solely on contractual breach.” *United States ex rel. O’Donnell v. Countrywide Home Loans, Inc.*, 822 F.3d 650, 658 (2d Cir. 2016).

None of this means that DOJ cannot bring suit to recover overpayments. DOJ could sue for breach of contract. But DOJ did not bring a breach of contract claim here. Having failed to do so, DOJ cannot leverage the *in terrorem* effect of the FCA with its civil penalties and treble damages when the defendant has not taken the critical act of deception.

2. United Did Not Undertake Any Deceptive Acts

DOJ alleges that United knew that diagnosis codes were unsupported and thus violated its obligation to repay money to the government. Its theory is that United’s mere failure to return money owed to CMS is sufficient to satisfy the reverse FCA’s requirement to show fraud in the form of “knowingly conceal[ing]” or “knowingly and improperly avoid[ing] or decreas[ing]” an obligation to repay money. 31 U.S.C. § 3729(a)(1)(G). But DOJ offers no evidence United concealed its actions in any way, such as by destroying evidence or otherwise engaging in deceptive, fraudulent conduct to hide or avoid the obligation. And CMS has acknowledged that, without more, the mere existence of unsupported diagnosis codes or payment discrepancies does not equate to fraud. See JS at D233; Ex. D-122A at 3151:5-8 (“Q. But you understand that CMS has said in the RADV context that neither payment errors nor coding differences are fraud; right? A. Correct. In and of themselves, no.”).

Far from concealing its conduct, United *told* CMS that it was not validating the diagnoses submitted by doctors that were not independently identified by chart reviewers. See United MSJ, *supra* at 15-16, n.8. That is the opposite of fraud. In fact, it is exactly the type of conduct DOJ has recommended for regulated entities like United when facing uncertainty. Just last year, DOJ argued to the Supreme Court that “companies that seek

1 funds from the government . . . often have ready avenues for resolving ambiguity about
2 payment rules—for example, by consulting their contacts.” JS at D235, Ex. D-148 at 3733,
3 3738, Brief for United States at *25 n.4, *United States ex rel. Schutte v. SuperValu Inc.*,
4 598 U.S. 739 (2023); *id.* at 32 (“The government therefore relies on its contracting partners
5 to approach the inevitable ambiguities in good faith, following what they understand to be
6 the best interpretation and seeking clarification when necessary.”). Having disclosed its
7 chart-review practices and sought the sort of clarification DOJ told the Supreme Court
8 should be sought, United cannot now be held liable for defrauding the government under
9 the FCA.

10 **US Response to Issue 1.D.: The Reverse False Claims Provision of the**
11 **FCA Does Not Require Proof of Deceptive Acts to Establish Knowing**
12 **and Improper Avoidance of an Obligation**

13 United’s argument that the government cannot show that it improperly avoided an
14 obligation to return money because it purportedly did not commit any “acts of deception”
15 is based on two false premises. First, United contends that this is a fraud case, and “at
16 common law, fraud always required deception.” Joint Brief, 75-76. But this is not a
17 common law fraud case; it is an FCA case, and there is an entire body of caselaw analyzing
18 the statute, including the language of the reverse false claims provision. Second, United
19 contends that the reverse FCA provision requires showing an act of deception. But, the
20 second prong of the reverse FCA provision imposes liability on a person who “knowingly
21 and improperly avoids . . . an obligation to pay.” 31 U.S.C. § 3729(a)(1)(G).²⁴ This
22 provision does not require proof that United took affirmative deceptive steps. As discussed
23 above, the 2009 FERA amendments broadened the scope of the reverse FCA provision
24 and eliminated the need to show an affirmative use of a false statement. “[T]he post-FERA
25 FCA specifies that mere knowledge and avoidance of an obligation is sufficient, without
26 the submission of a false record, to give rise to liability.” *Victaulic Co.*, 839 F.3d at 255.

27
28 ²⁴ The FCA explicitly does not require “proof of specific intent to defraud.” 31 U.S.C. § 3729(b)(1)(A)-(B).

1 In similar situations, courts have held that the reverse FCA provision imposes
2 liability on defendants who do nothing after being put on notice of a potential
3 overpayment, thereby avoiding an obligation to pay money. For example, in *Kane*, the
4 defendants argued that the government needed to plead that they took “‘active and
5 conscious’ action to establish avoidance.” *Kane*, 120 F. Supp. 3d. at 393. In rejecting that
6 argument, the court surveyed various definitions of “avoid,” and ultimately found that
7 these definitions “support the conclusion that the plain meaning of ‘avoid’ includes
8 behavior where ***an individual is put on notice of a potential issue, is legally obligated to***
9 ***address it, and does nothing.***” *Id.* at 394 (emphasis added); *see also Lakeshore Med.*
10 *Clinic*, 2013 WL 1307013, at *4 (“If the *government* overpaid defendant for [evaluation
11 and management] services and defendant ***intentionally refused to investigate the***
12 ***possibility that it was overpaid***, it may have unlawfully avoided an obligation to pay
13 money to the government” (emphasis added)).

14 *Sutter* relied on *Kane* to find that plaintiffs had sufficiently pleaded that defendants
15 had violated the reverse FCA provision when they failed to take action after being put on
16 notice of thousands of false claims to the MA program. *Sutter*, 444 F. Supp. 3d at 1080-
17 81. The *Sutter* court, considering allegations that defendant healthcare providers who
18 submitted diagnosis codes to MAOs, including United, where various audits conducted by
19 the MAOs (including one by United) showed that submitted diagnosis codes were
20 unsupported, found that “[p]ayments based on false diagnosis codes are overpayments,”
21 and “internal and external reviews of diagnosis codes put the defendants on notice of the
22 potential overpayments.” *Id.* at 1077-78. The government alleged that the defendants
23 failed to report and return the overpayments within 60 days of their being identified, and
24 the overpayments therefore became “obligations” within the meaning of the reverse FCA
25 provision. *Id.* at 1080-81. The court found that in light of the allegations that the defendants
26 were on notice of the potential overpayments and did nothing, the government had
27 sufficiently pleaded that the defendants had “concealed or avoided obligations to pay the
28 government.” *Id.* at 1081. The same is true here – the government does not have to prove

1 that United committed an affirmative act of deception; rather, it only has to prove that
2 United was put on notice of potential overpayments, was legally obligated to address them,
3 and did nothing, which the evidence clearly shows.

4 United does not cite any cases applying its “affirmative deceptive act” requirement
5 to the second prong of the reverse FCA provision. Rather, it ignores the text of the statute
6 in favor of relying on common law fraud.²⁵ For example, United cites cases for the
7 proposition that common law fraud claims cannot be based solely on breach of contract.
8 Joint Brief, 76 (citing *Compania Sud-Americana de Vapores, S.A. v. IBJ Schroder Bank*
9 *& Tr. Co.*, 785 F. Supp. 411, 423 (S.D.N.Y. 1992); *Myklatun v. Flotek Indus., Inc.*, 734
10 F.3d 1230, 1235–36 (10th Cir. 2013), *United States ex rel. O’Donnell v. Countrywide*
11 *Home Loans, Inc.*, 822 F.3d 650, 662 (2d Cir. 2016). The Supreme Court has recognized
12 that certain elements of common law fraud are retained in the FCA to the extent they are
13 “**consistent with the statutory text**,” but of course “[t]he [FCA] abrogates the common law
14 in certain respects.” *Escobar*, 579 U.S. at 176 n.2 (emphasis added). United’s attempt to
15 shoehorn in a “deceptive acts” requirement is inconsistent with the statutory text of the
16 second prong of the reverse FCA provision and should be rejected.

17 United claims that the government’s position would lead to “absurd results,” Joint
18 Brief, 76-77, but there is nothing absurd about following the plain language of the FCA.
19 And there is certainly nothing absurd about employing the FCA to recoup billions of
20 dollars for the Medicare Trust Funds that United is not entitled to retain but refuses to
21 return. This Court should adhere to the statutory language of the FCA and reject United’s
22 self-serving attempt to insert into it an “affirmative deceptive act.”
23
24

25 ²⁵ The limited number of FCA cases cited by United are inapposite. United cites *Olson v.*
26 *Fairview Health Servs. of Minn.*, which held that the heightened pleading requirements of
27 FED. R. OF CIV. P. 9(b) applied to claims under the reverse FCA provision but did not
28 address what conduct constituted knowing and improper avoidance of an obligation to pay
under that provision. 831 F.3d 1063, 1072-74 (8th Cir. 2016). United also cites *Kennard*
v. Comstock Res., Inc., 363 F.3d 1039 (10th Cir. 2004), a case that predated the FERA
amendments to the FCA and does not address at all what sort of conduct violates the post-
FERA version of the FCA. *See id.* at 1047.

II. UNITED’S LEGAL ARGUMENT ON ISSUE NO. 2: WHETHER THE COURT SHOULD GRANT SUMMARY JUDGMENT AS TO THE COMMON-LAW CLAIMS

DOJ’s common-law claims for unjust enrichment and payment by mistake are equally unavailing and should be dismissed for at least two reasons.

First, both common-law claims are unavailable because of the existence of express contracts between the parties. “As a general rule, the existence of a valid contract precludes a plaintiff from asserting unjust enrichment and payment by mistake claims, which are based on quasi-contract theories.” *United States v. Symantec Corp.*, 471 F. Supp. 3d 257, 297–98 (D.D.C. 2020) (citing *United States v. First Choice Armor & Equip.*, 808 F. Supp. 2d 68, 77–78 (D.D.C. 2011)). This is a “foundational principle of contract law,” *United States v. Kellogg Brown & Root*, 800 F. Supp. 2d 143, 160 (D.D.C. 2011) (citation omitted), and courts regularly apply it to dismiss quasi-contract claims, including where the government is the plaintiff, *see, e.g., Lee v. Canada Goose US*, 2021 WL 2665955, at *9 (S.D.N.Y. June 29, 2021) (“[T]he court dismisses Plaintiff’s unjust-enrichment claim because such a claim is unavailable when there is an express agreement governing the dispute.” (citation omitted)).

There is no question that a contract exists between the parties here—DOJ attached the contracts to its Complaint. *See* JS at D234; Ex. D-1 at 36-56.²⁶ Courts in FCA cases regularly reject quasi-contract claims on this basis, and this Court should too. *See United States v. Sci. Applications Int’l Corp.*, 555 F. Supp. 2d 40, 60 (D.D.C. 2008) (holding in FCA case that “because the express contracts existing between the parties here preclude quasi-contractual claims, [defendant’s] motion for summary judgment on the

²⁶ Although plaintiffs may generally plead quasi-contract claims in the alternative, “these alternative claims ‘must be supported by, at the very least, an allegation that there is no valid contract.’” *Symantec Corp.*, 471 F. Supp. 3d at 298 (quoting *Kellogg Brown*, 800 F. Supp. 2d at 160). DOJ makes no such allegation here.

1 government's quasi-contractual claims [of unjust enrichment and payment by mistake]
2 will be granted").²⁷

3 Second, both common-law claims are based on DOJ's flawed FCA theory and fail
4 for many of the reasons discussed above. DOJ alleges that United received money from
5 CMS to which it was "not entitled, which unjustly enriched Defendants," because United
6 "received such money by claiming and retaining Medicare risk adjustment payments based
7 on invalid risk adjustment data." JS at D268; Ex. D-1 at 31. DOJ also alleges that it "paid
8 money to Defendants as a result of a mistaken understanding," specifically by paying
9 United's "claims for risk adjustment payments under the mistaken understanding that such
10 claims were based on valid risk adjustment data." JS at D269; Ex. D-1 at 32. But as
11 discussed above, DOJ has no evidence that the risk adjustment data at issue—the diagnosis
12 codes—were invalid. Nor does DOJ have evidence that the codes caused United to be
13 overpaid, let alone that CMS, which was aware of United's chart review process, paid by
14 mistake. And DOJ cannot show United had any obligation to return these funds. DOJ thus
15 cannot establish unjust enrichment or payment by mistake. *See, e.g., United States v. Aegis*
16 *Therapies, Inc.*, 2015 WL 1541491, at *14 (S.D. Ga. Mar. 31, 2015) (dismissing the
17 government's "claims for unjust enrichment (Count III) and payment by mistake (Count
18 IV)" because those "claims are purely derivative of the FCA claims," which the court
19 dismissed).

20 **US RESPONSE TO ISSUE NO. 2: THE COURT SHOULD DENY SUMMARY**
21 **JUDGMENT AS TO THE COMMON LAW CLAIMS**

22 This Court should also reject United's motion for summary judgment with respect
23 to the common law claims of unjust enrichment and payment by mistake. First, United
24 argues that the common law claims are defective because of the existence of a contract.

25 ²⁷ *See also, e.g., United States ex rel. Reeves v. Mercer Transp.*, 253 F. Supp. 3d 1242,
26 1255–56 (M.D. Ga. 2017) (dismissing "the Government's claims for unjust enrichment
27 and payment by mistake" in FCA case because of the parties' "underlying contract");
28 *United States v. First Choice Armor & Equip.*, 808 F. Supp. 2d 68, 77–78 (D.D.C. 2011)
(granting motion to dismiss "the payment by mistake count and the unjust enrichment
count" in FCA case because "the government acknowledges that its complaint alleges the
existence of an express contract between [defendant] and the United States").

1 Joint Brief, 81-82. United cites three out-of-circuit district court opinions with starkly
2 different facts, only one of which actually dismissed the United States’ quasi-contractual
3 claims. However, United’s exact argument was rejected by a district court in this Circuit,
4 and with almost identical facts. *See United States ex rel. Osinek v. Permanente Med. Grp.,*
5 *Inc.*, 640 F. Supp. 3d 885, 914-15 (N.D. Cal. 2022) (rejecting argument that payment by
6 mistake and unjust enrichment should be dismissed due to existence of a contract because
7 “the government has not simply alleged the violation of the CMS/Kaiser contract but also
8 the violation of federal regulations.”). In *Osinek*, as here, the government alleged that the
9 defendant MAOs violated the MA contracts *and* federal regulations with respect to the
10 risk adjustment data they submitted to CMS. *Id.* There, the defendant MAO made the same
11 argument that United advances here – namely that the quasi-contractual claims of unjust
12 enrichment and payment by mistake were unavailable to the government due to the
13 existence of MA contracts between the government and the defendants. *Id.* The *Osinek*
14 court squarely rejected this, reasoning that the trier of fact may “find that Kaiser’s failure
15 to comply with the ICD Guidelines was not a violation of the CMS/Kaiser contract” but
16 nevertheless was a violation of federal regulations, allowing the government to proceed
17 with a quasi-contractual theory at that point. *Id.* Even if quasi-contract claims cannot be
18 brought to enforce contractual obligations, they remain viable to recover erroneous
19 payments premised on regulatory violations.

20 Additionally, as the *Osinek* court held, “even if a quasi-contract claim might
21 ordinarily be barred where an express contract exists,” that rule does not apply where the
22 government is the plaintiff because the government’s “[well]-established right to sue for
23 money wrongfully or erroneously paid from the public treasury, [is] *a right arising*
24 *separate and apart from statute, regulation, or contract.*” *Id.* (second quoting *Agility Pub.*
25 *Warehousing Co. K.S.C.P. v. United States*, 969 F.3d 1355, 1365 (Fed. Cir. 2020)). As the
26 Supreme Court has held, “The Government by appropriate action can recover funds which
27 its agents have wrongfully, erroneously, or illegally paid.” *United States v. Wurts*, 303
28

U.S. 414, 415 (1938). The same rationale applies here and is sufficient to defeat United’s motion for summary judgment on the common law claims.

Second, United relies on another out-of-circuit district court case to argue that the claims for unjust enrichment are “purely derivative” of the FCA claims, and (according to United) are “based on DOJ’s flawed FCA theory and fail for many of the reasons discussed above.” Joint Brief, 82. This argument holds no more merit than United’s flawed arguments related to the FCA allegations. But this argument fails for another reason – United’s assertion that the common law claims are “purely derivative” of the FCA and therefore the two claims rise and fall together is wrong. The Ninth Circuit recognizes that such common law claims may be viable even where the United States is unable to prove every element of an FCA violation – for example, knowledge. *United States v. Mead*, 426 F.2d 118, 124, 125 n.6 (9th Cir. 1970). Because the jury can find United liable for the common law claims even if it does not find FCA liability, and United advances no independent reason why it is entitled to judgment as a matter of law on the common law claims, its motion should be denied.

LEGAL ARGUMENT REGARDING UNITED STATES MOTION FOR PARTIAL SUMMARY JUDGMENT

I. UNITED STATES’ ARGUMENT

A. Materiality is Not an Element Under the Second Prong of the Reverse False Claims Provision of the False Claims Act.

The United States brings this action under 31 U.S.C. § 3729(a)(1)(G), commonly known as the False Claims Act’s “reverse false claim” provision. The reverse false claim provision includes two parts, imposing liability on anyone who “knowingly makes, uses, or causes to be made or used, a false record or statement material to an obligation to pay or transmit money or property to the Government, *or knowingly conceals or knowingly and improperly avoids or decreases an obligation to pay or transmit money or property to the Government*”. 31 U.S.C. § 3729(a)(1)(G) (emphasis added). The United States is pursuing this case only under the second prong of this provision. At trial, the United States

1 will show that UnitedHealth violated the second prong of the reverse false claim provision
2 by knowingly and improperly avoiding its obligation to repay the Medicare Program for
3 Medicare Advantage Risk Adjustment payments it received for unsupported diagnosis
4 codes. To clarify the issues for trial, the United States now seeks partial summary
5 judgment that, as a matter of law, materiality is not a required element of establishing
6 liability under the second prong of the reverse false claim provision.

7 The fact that materiality is not an element of the second prong of the reverse false
8 claim provision is clear from the structure of the statutory text. As discussed below, Courts
9 have recognized that the text itself draws a meaningful distinction between the first prong
10 – which requires a “false record or statement *material* to an obligation” – and the absence
11 of that same requirement within the second prong.

12 In its 2018 ruling on Defendants’ Motion to Dismiss (MTD), the Court addressed
13 issues related to materiality, including in the broader context of the United States’ original
14 claims, which included claims under 31 U.S.C. § 3729(a)(1)(A), (a)(1)(B), and the first
15 prong of (a)(1)(G). *United States ex rel. Poehling v. UnitedHealth Group, Inc. et al.*, Case
16 No. CV 16-08697-MWF (SSx), 2018 WL 1363487 (C.D. Cal. Feb. 12, 2018). Yet, the
17 Court has not squarely addressed the threshold question of whether materiality is a
18 *required element* under the second prong of the reverse false claim provision. However,
19 since the 2018 MTD order, courts, including in the Ninth Circuit, have explicitly
20 recognized that materiality is not a required element of the second prong of the reverse
21 false claim provision.

22 The seminal case on materiality under the False Claims act, *Universal Health*
23 *Services v. United States ex rel. Escobar*, did not address materiality under the reverse
24 false claim provision, but rather focused on materiality with respect to affirmative false
25 claims under 31 U.S.C. § 3729(a)(1)(A). 579 U.S. 176, 181 (2016). Since *Escobar*,
26 several Courts have expressly held that materiality is not an element under the second
27 prong of the reverse false claim provision. For example, in *United States ex rel. Ormsby*
28 *v. Sutter Health*, an analogous case involving allegations that defendants knowingly

1 concealed or improperly avoided their obligation to return overpayments to the Medicare
2 Advantage program by failing to delete unsupported diagnosis codes, the Court held that
3 there was no materiality element under the second prong of the reverse false claim
4 provision. 444 F. Supp. 3d 1010, 1056 (N.D. Cal. 2020) (“The elements of a violation
5 under the second prong of the reverse-FCA provision are that the defendant (1) concealed
6 or improperly avoided or decreased an obligation to pay the government and (2) did so
7 knowingly. There is no requirement under the second prong to show that the defendant
8 used a false record or statement or that a record or statement was material.” (internal
9 citations omitted)). *See also United States ex rel. Jacobs v. Pac. Dermatology Inst., Inc.*,
10 Case No. EDCV 20-1906 JGB (SHKx), 2022 WL 17401522, at *13 (C.D. Cal. Aug. 16,
11 2022) (discussing the elements of a claim under the second prong of 31 U.S.C. §
12 3729(a)(1)(G)); *United States ex rel. Frey v. Health Mgmt. Sys., Inc.*, Civil Action No.
13 3:19-CV-0920-B, 2021 WL 4502275, at *7 (N.D. Tex. Oct. 1, 2021) (“Under 31 U.S.C. §
14 3729(a)(1)(G), the relator must prove either five or three elements. Both methods requires
15 [sic] relator to establish the “obligation” and “knowledge” elements. But only the first
16 method requires proving the materiality element.” (internal citations omitted)); *United*
17 *States ex rel. Little v. Shell Expl. & Prod. Co.*, No. CV H-07-871, 2017 WL 4742917, at
18 *29 n.260 (S.D. Tex. Aug. 18, 2017) (noting that Congress amended the reverse false
19 claim provision in 2009 “by articulating the materiality requirement *in the false record or*
20 *statement portion and adding an alternative in the absence of a false record or statement*
21 *that stated ‘knowingly conceals or knowingly and improperly avoids or decreases an*
22 *obligation’” (emphasis added)). Therefore, the United States respectfully requests that*
23 *this Court grant partial summary judgment that as a matter of law*²⁸ *proving liability under*
24 *the second prong of the reverse false claim provision does not require a showing of*
25 *materiality.*

26
27
28 ²⁸ Because the United States’ Motion for Partial Summary Judgment under FED. R. CIV. P.
56 is related to a pure issue of law, the United States is not submitting a Statement of
Undisputed Facts with its Motion.

1 **UNITED’S ARGUMENT**

2 DOJ’s sole basis for seeking partial summary judgment is its extreme argument that
3 the reverse FCA provision at issue here does not require the allegedly fraudulent conduct
4 to be *material*. In making that argument, DOJ asks this Court to ignore the Supreme
5 Court’s clear holding in another FCA case that “the common law could not have *conceived*
6 of ‘fraud’ without proof of materiality.” *Universal Health Servs., Inc. v. United States ex*
7 *rel. Escobar*, 579 U.S. 176, 193 (2016) (emphasis added) (citation omitted). DOJ’s
8 inconceivable motion should be denied.

9 The reverse FCA provides two bases for liability. See 31 U.S.C. § 3729(a)(1)(G).
10 The first prong imposes liability on one who “knowingly makes, uses, or causes to be
11 made or used, a false record or statement material to an obligation to pay or transmit money
12 or property to the Government.” *Id.* The second prong, which DOJ alleges United violated
13 in this case, imposes liability on one who “knowingly conceals or knowingly and
14 improperly avoids or decreases an obligation to pay or transmit money or property to the
15 Government.” *Id.* DOJ asserts that “materiality is not a required element of establishing
16 liability under the second prong of the reverse false claim provision.” DOJ Mot., *supra* at
17 85. That argument is baseless. Not only is materiality a cornerstone element of fraud, but
18 the text, structure, and history of the reverse FCA all require its “rigorous materiality
19 requirement” to be enforced. *Escobar*, 579 U.S. at 181. Precedent and common sense
20 require the same.

21 **A. The Reverse FCA Requires Proving That The Alleged Fraud Was**
22 **Material**

23 DOJ asserts that “the structure of the statutory text” shows that the second prong of
24 the reverse FCA does not include a materiality element. Yet DOJ fails to address the
25 Supreme Court’s unanimous decision in *Escobar* addressing a mirror-image structure in
26 the same statute. DOJ Mot., *supra* at 85-86. While noting that *Escobar* is “[t]he seminal
27 case on materiality under the False Claims [A]ct,” DOJ cannot reconcile its position with
28 that decision—and does not even try to do so. *Id.*

1 **1. *The FCA’s Text and Structure Impose a Materiality Element***

2 In *Escobar*, the Supreme Court addressed the materiality requirement in a provision
3 of the affirmative FCA, 31 U.S.C. § 3729(a)(1)(A), which imposes liability on one who
4 “knowingly presents, or causes to be presented, a false or fraudulent claim for payment or
5 approval.” That provision does not expressly include a materiality element. But the second
6 affirmative FCA provision that follows *does*: Section 3729(a)(1)(B) imposes liability on
7 one who “knowingly makes, uses, or causes to be made or used, a false record or statement
8 *material* to a false or fraudulent claim.” (emphasis added). Faced with this statutory
9 structure, the Supreme Court had no hesitation holding that *both* provisions require a
10 showing of materiality. *See* 579 U.S. at 190, 192-95.

11 Starting “with the language of the statute,” the Court recited the longstanding
12 principle of statutory interpretation that, “absent other indication, Congress intends to
13 incorporate the well-settled meaning of the common-law terms it uses.” *Id.* at 187
14 (citations omitted). The Court then explained that the common-law meaning of “fraud”
15 necessarily includes a “rigorous” materiality requirement. *Id.* at 192. As the Court held,
16 “the common law could not have *conceived of* ‘fraud’ without proof of materiality.” *Id.* at
17 193 (emphasis added) (citation omitted). What is more, that materiality standard is
18 “demanding”—the FCA “is not ‘an all-purpose antifraud statute,’ or a vehicle for
19 punishing garden-variety breaches of contract or regulatory violations.” *Id.* at 194 (citation
20 omitted). A rules violation cannot be material if the government would merely “have the
21 option to decline to pay if it knew of the defendant’s noncompliance.” *Id.* The Court
22 explained further, “if the Government pays a particular claim in full despite its actual
23 knowledge that certain requirements were violated, that is very strong evidence that those
24 requirements are not material.” *Id.* at 195. The Court thus unanimously enforced the
25 materiality requirement as to the first provision of the affirmative FCA,
26 Section 3729(a)(1)(A), even though it did not contain an express materiality requirement
27 like the second provision, Section 3729(a)(1)(B).

1 Indeed, the argument for including a materiality requirement in the first affirmative
2 FCA provision was so strong that DOJ conceded the point. Before the Supreme Court,
3 DOJ acknowledged the Court must adopt an interpretation “consistent with the FCA’s
4 common-law antecedents, and with this Court’s recognition that ‘the common law could
5 not have conceived of fraud without proof of materiality.’” Brief for the United States,
6 *Universal Health Servs., Inc. v. United States ex rel. Escobar*, 2016 WL 1554735, at *30
7 n.7 (Mar. 3, 2016) (conceding that both affirmative FCA provisions include a materiality
8 element but arguing for a weaker version of materiality than the Supreme Court adopted).
9 In doing so, DOJ recognized that even though the first affirmative FCA provision “does
10 not” have an express materiality requirement, the first provision must still be interpreted
11 as including a materiality requirement because “historically” such fraud terms were
12 understood “as limited to claims that are false or misleading in some *material* respect.” *Id.*

13 The reverse FCA provisions at issue here directly parallel the structure of the
14 affirmative FCA provisions in *Escobar*. The first reverse FCA prong, just like one of the
15 affirmative FCA provisions, includes an express materiality requirement tied to a false
16 statement—requiring a “false record or statement material to an obligation.” 31 U.S.C.
17 § 3729(a)(1)(G). But the second reverse FCA prong, like the other affirmative FCA
18 provision, does not. *See id.* The reasoning in *Escobar* applies just as clearly to this parallel
19 situation; even absent the express inclusion of the word “material,” the second prong of
20 the reverse FCA necessarily includes a materiality requirement because of its “common-
21 law antecedents” and the inconceivability of common-law fraud without a materiality
22 requirement. 579 U.S. at 193 (citation omitted). DOJ has no answer for *Escobar*, let alone
23 for its concession to the Supreme Court in that case.

24 **2. Legislative History Confirms the Statutory Text and Structure**

25 The legislative history likewise confirms that the second prong of the reverse FCA
26 includes a materiality element. In 2009, in the Fraud Enforcement and Recovery Act, Pub.
27 L. No. 111-21, 123 Stat. 1617 (“FERA”), Congress amended the FCA to add the second
28 prong of the reverse FCA at issue here. Before FERA, the reverse FCA contained only

1 one basis for liability, which required a “false record or statement to conceal, avoid, or
2 decrease an obligation to pay or transmit money or property to the Government.” 31 U.S.C.
3 § 3729(a)(7) (2008). This stood in contrast to the affirmative FCA provisions, which
4 contained two ways of establishing liability—one that required a false record or statement
5 and another that did not have that requirement. *See id.* § 3729(a)(1)–(2) (2008).

6 In FERA, Congress amended the reverse FCA with the goal of removing a
7 perceived loophole that resulted from the requirement of a “false record or statement,”
8 thereby making it parallel with the affirmative FCA. Both the Senate Judiciary report and
9 the Department of Justice acknowledged this targeted legislative objective. *See* Fraud
10 Enforcement and Recovery Act of 2009, S. Rep. No. 111-10 at 13-14 (Mar. 23, 2009).
11 The Senate Judiciary report explained that the reverse FCA as written at that time “does
12 not capture conduct described in [the affirmative FCA],” which extends beyond false
13 records or statements and includes “liability for actions to conceal, avoid, or decrease an
14 obligation directly to the Government.” *Id.* at 14. The report explained that FERA was
15 intended to “close[] this loophole.” *Id.*; *see also* Letter from M. Faith Burton, Acting
16 Assistant Attorney General, U.S. Dep’t of Justice, to Sen. Patrick Leahy, Chairman, Senate
17 Comm. On the Judiciary, at 2 (Feb. 24, 2009) (similar).

18 When FERA added a second basis for liability in the reverse FCA that did not
19 require a “false record or statement,” aligning it with the affirmative FCA, no one
20 suggested that the amendment would remove the longstanding common-law requirement
21 of materiality. Any such change would have been actively debated—or at least
22 *mentioned*—given the upheaval it would cause to the settled understanding that fraud must
23 be material. Yet there was no such debate or mention of eliminating the materiality
24 element. Congress “does not alter the fundamental details of a regulatory scheme in vague
25 terms or ancillary provisions—it does not, one might say, hide elephants in mouseholes.”
26 *Whitman v. Am. Trucking Assns.*, 531 U.S. 457, 468 (2001). If Congress had intended to
27 fundamentally redefine the FCA to omit the materiality requirement—thereby punishing
28 *immaterial* violations—it would have said so clearly, there would have been legislative

1 debate over that change, and it certainly would not have gone completely unnoticed until
2 this case over a decade later.

3 **3. DOJ's Contrary Position Is Not Supported by the Case Law and**
4 **Would Lead to Absurd Results**

5 DOJ's position on materiality is not only contrary to the text, structure, and history
6 of the FCA, it is also unsupported by the case law it invokes and would lead to untenable
7 outcomes.

8 *First*, DOJ incorrectly claims that "several Courts have expressly held that
9 materiality is not an element under the second prong of the reverse false claim provision."
10 DOJ Mot., *supra* at 85. None of the cases cited by DOJ hold any such thing. And counsel
11 is aware of no other case that does.

12 To the contrary, courts of appeal have applied *Escobar*'s materiality requirement
13 broadly to *all* FCA claims. *See, e.g., United States ex rel. Doe v. Heart Sol., PC*, 923 F.3d
14 308, 317 (3d Cir. 2019) (stating that *Escobar* "held that materiality is an element of *all*
15 *FCA claims*, regardless of whether the specific statutory provision lists materiality as an
16 element") (emphasis added); *United States ex rel. Foreman v. AECOM*, 19 F.4th 85, 105
17 (2d Cir. 2021) ("Although *Escobar* involved an implied false certification claim, nothing
18 in the opinion suggests that its materiality requirement was intended to be limited to that
19 specific theory of liability."). Similarly, in *Kelly v. Serco, Inc.*, 846 F.3d 325, 333–36 (9th
20 Cir. 2017), the Ninth Circuit confirmed that courts may "properly dismiss an FCA claim
21 on summary judgment based on a claimant's failure to meet the rigorous standard for
22 materiality under the FCA," including for "reverse false claims."

23 None of DOJ's cases conclude otherwise. DOJ first cites *United States ex rel.*
24 *Ormsby v. Sutter Health*, 444 F. Supp. 3d 1010 (N.D. Cal. 2020), claiming that it "held
25 that there was no materiality element under the second prong of the reverse false claim
26 provision." DOJ Mot., *supra* at 85-86. *Ormsby* contains no such holding. As DOJ's own
27 citation to *Ormsby* shows, that case merely held that the second prong of the reverse FCA
28 does not require showing "*a false record or statement* or that *a record or statement* was

1 material.” 444 F. Supp. 3d at 1056 (emphasis added). That quotation simply acknowledges
2 that the second prong of the reverse FCA no longer requires a false statement, which was
3 the legislative goal of FERA. *See supra*, at 89-90. *Ormsby* makes this point expressly in a
4 footnote, explaining that FERA was designed to eliminate the false statement requirement.
5 *See* 444 F. Supp. 3d at 1056 & n.408. In fact, no party in *Ormsby*—including DOJ—even
6 made the extreme no-materiality argument DOJ advances here. *See* United States’ Opp. to
7 Defs.’ Mot. to Dismiss, *United States ex rel. Ormsby v. Sutter Health, et al.*, No. 3:15-cv-
8 01062, Dkt. 82 (Aug. 27, 2019); Relator’s Opp. to Defs.’ Mot. to Dismiss, Dkt. 80 (Aug.
9 27, 2019). The court in *Ormsby* merely restated the impact of FERA—it did not *sua sponte*
10 issue a sweeping ruling that eliminated the reverse FCA’s materiality requirement.

11 DOJ’s three other citations also miss the mark. In *United States ex rel. Jacobs v.*
12 *Pac. Dermatology Inst., Inc.*, 2022 WL 17401522, at *13 (C.D. Cal. Aug. 16, 2022), the
13 court merely recited the elements for the reverse FCA’s second prong, noting that a relator
14 “need not show a false record or statement.” In *United States ex rel. Frey v. Health*
15 *Management Systems, Inc.*, 2021 WL 4502275, at *7 (N.D. Tex. Oct. 1, 2021), the court
16 issued no holding on whether materiality was a required element under the second prong
17 of the reverse FCA because it had already found that the relator had adequately pleaded
18 materiality under the first prong. And in *United States ex rel. Little v. Shell Exploration &*
19 *Production Co.*, 2017 WL 4742917, at *29 n.260 (S.D. Tex. Aug. 18, 2017), the FERA
20 amendments did not even apply to the case: “The parties and the United States agree that
21 the *pre-FERA* version of the FCA is applicable to the claims in this case.” (emphasis
22 added). *None* of these cases support DOJ’s position.

23 *Second*, DOJ’s attempt to eliminate the materiality requirement would result in
24 absurd outcomes never intended by Congress—not to mention outcomes the Supreme
25 Court already rejected in *Escobar*. There, the Supreme Court employed a vivid
26 hypothetical involving staplers to underscore the necessity of a rigorous materiality
27 requirement under the FCA. 579 U.S. at 195-96. The Court posited a scenario where the
28 government contracts for health services and includes a stipulation that contractors must

1 use “American-made staplers.” *Id.* at 195. At oral argument, DOJ argued that if the
2 contract made using American-made staplers a condition of payment, then a contractor
3 who otherwise fully performed the contracted health services but used “foreign staplers”
4 would be liable under the FCA regardless of whether its stapler use had any actual impact
5 on the government’s payment decision. *Id.* at 195-96. The Court swiftly rejected that
6 untenable position, explaining that the FCA “does not adopt such an extraordinarily
7 expansive view of liability.” *Id.* at 196. *Escobar* thus makes clear that, notwithstanding a
8 rule being contractually required or labeled a condition of payment, FCA liability does not
9 attach when violating such a rule would be immaterial because the government would not
10 have denied payment on that basis.

11 DOJ’s position here would allow exactly that untenable result. Under its view, a
12 defendant would incur liability under the reverse FCA in this very same stapler example
13 if the government simply added the allegation that the contractor *retained* the allegedly
14 noncompliant payments received under the contract—regardless of whether use of foreign
15 staplers would have had any impact on the government’s payment decision. DOJ thus asks
16 this Court to adopt the same “extraordinarily expansive view of liability” under the FCA
17 the Supreme Court unanimously rejected. *Id.* That would eviscerate *Escobar*. Just as the
18 affirmative FCA provisions necessitate a materiality requirement to prevent the statute
19 from becoming a tool for punishing minor infractions, the reverse FCA provisions must
20 also include a materiality requirement to maintain the integrity and purpose of the statute.
21 Without this safeguard, the reverse FCA would be susceptible to the same overreach and
22 misuse, transforming every minor regulatory misstep into actionable fraud, which the
23 Supreme Court explicitly directed courts to avoid. The Court should reject that radical
24 approach and enforce the FCA’s materiality requirement.

1 **4. This Case Illustrates the Critical Role Played by the Materiality**
2 **Element**

3 DOJ's argument is so extreme that, to counsel's knowledge, it is the first time that
4 DOJ has pressed this argument before any court. As already explained, DOJ conceded in
5 *Escobar* itself that a fraud statute like the FCA must be interpreted to include a materiality
6 requirement. *See supra*, at 88-89. And DOJ did not make this argument in *any* of the four
7 post-*Escobar* cases that DOJ incorrectly claims support its position. *See* DOJ Mot., *supra*
8 at 85-86; United States' Opp. to Defs.' Mot. to Dismiss, *United States ex rel. Ormsby v.*
9 *Sutter Health, et al.*, No. 3:15-cv-01062, Dkt. 82 (Aug. 27, 2019); United States'
10 Statement of Interest, *United States ex rel. Jacobs v. Pac. Dermatology Inst., Inc.*, No.
11 EDCV 20-1906 JGB (SHKx), Dkt. 38 (Mar. 25, 2022); United States' Statement of
12 Interest, *United States ex rel. Frey v. Health Mgmt. Sys., Inc.*, No. 3:19-CV-0920-B, Dkt.
13 32 (June 9, 2021); United States' Statement of Interest, *United States ex rel. Little v. Shell*
14 *Expl. & Prod. Co.*, No. CV H-07-871, Dkt. 251 (Dec. 23, 2016).

15 To be clear, there is no mystery as to why DOJ is resorting to this extreme argument
16 here: It is because the summary judgment record makes clear that CMS undisputedly knew
17 of United's conduct and did not consider it material to CMS's payment decision.
18 Accordingly, if the reverse FCA incorporates a materiality element—as it surely does—
19 then DOJ knows that its case cannot survive summary judgment.

20 As detailed above, DOJ cannot show that the alleged violation was material to
21 CMS's decision to pay United. *See* United MSJ, *supra* at 67-68 (citing evidence). CMS
22 was indisputably aware of United's chart review practices. *Id.* at 15-16. Notably, in 2014,
23 United met with CMS to discuss whether MA plans were required to confirm the validity
24 of diagnosis codes certified and submitted by doctors but not independently identified by
25 MA plan coders during chart review. JS at D123, D127; Exs. D-9 at 445-46, D-138 at
26 3487:24-88:10. And it is undisputed that United has repeatedly disclosed to CMS that it
27 did *not* affirmatively seek to confirm such codes in its chart review program. JS at D150-
28 D154; Exs. D-21 at 671, D-23 at 677, D-27 at 714, D-33 at 729-30, D-25 at 682. If CMS

1 considered those practices to be fraudulent, it would have refused to continue paying
2 United—or at least imposed some intermediate form of sanctions. *See* 42 C.F.R.
3 § 422.752. But it never did. JS at D227-231; Exs. D-9 at 384-88, D-131 at 3356:8-12. That
4 record—CMS’s “actual knowledge” of United’s conduct and its continued payment—is
5 “very strong evidence” that the purported fraudulent conduct was “not material.” *Escobar*,
6 579 U.S. at 195. DOJ comes nowhere close to satisfying the FCA’s “rigorous” materiality
7 requirement. *Id.* at 192.

8 Nor can DOJ reframe the materiality analysis by contending that CMS would have
9 taken action if it knew the specific diagnosis codes that were unsupported by medical
10 charts. Any such reframing cannot cure the materiality problem because it is inconsistent
11 with DOJ’s theory of fraud. In this case, DOJ has repeatedly argued that United’s conduct
12 was fraudulent because its chart-review process did not delete or investigate diagnosis
13 codes that doctors had certified and submitted to United, but which United’s coders did
14 not independently identify during their blind chart review. *See* United MSJ, *supra* at 16-
15 17. But CMS *knew* about this very process that DOJ now claims is fraudulent and
16 continued to pay United anyway. *Id.* at 13-16, 67-68, 77-78.

17 In addition, regardless of whether CMS knew *which* specific diagnosis codes
18 United’s coders did not independently identify, it knew that United was submitting
19 substantial volumes of such codes for reimbursement. *Id.* Nor can DOJ quibble over
20 whether CMS knew every minute detail of how United conducted chart review. CMS
21 knew all of the facts necessary for it to know that United was engaged in the very conduct
22 that DOJ now claims is fraudulent. *Id.* Yet CMS did not treat this conduct as fraudulent in
23 any way, neither declining payment, refusing to renew United’s contracts, nor imposing
24 any other form of lesser punishment whatsoever. JS at D229; Exs. D-8 at 384, 388-89, D-
25 131 at 3356:8-12.

26 DOJ also cannot solve its materiality problem by claiming that if United had
27 submitted requests to delete the diagnosis codes in question, CMS would have
28

1 automatically reduced United’s payments, thus rendering all of United’s action “material”
2 to payment. Such a sweeping theory fails in numerous respects.

3 *First*, that argument focuses on the wrong category for purposes of CMS’s payment
4 decision. While MA plans submit diagnosis codes to CMS, MA payment is ultimately
5 determined based on whether there is support for the beneficiary’s *health condition*. JS at
6 D31, D77; Exs. D-117 at 2976:13-77:20, D-145 at 3676:23-77:7. CMS validates a
7 beneficiary’s health condition provided that any medical chart or diagnosis code from a
8 doctor during the service year supports the condition—even if some other charts and
9 diagnosis codes do not. JS D39-D31; Ex. D-145 at 3676:23-77:7, D-141 at 3546:2-6. As
10 DOJ’s expert put it, if an MA plan “submits multiple diagnosis codes mapping to the same
11 HCC for a beneficiary, the beneficiary’s risk score does not depend on which specific
12 diagnosis code was reported” or “how many times a particular diagnosis code is reported
13 within a service year.” JS at D30; Ex. D-57 at 1454. An invalid diagnosis code is simply
14 immaterial when the same health condition is otherwise supported by valid data.

15 *Second*, the summary judgment record contains no evidence establishing that these
16 diagnosis codes were in fact unsupported and thus material to CMS’s payment decision.
17 To the contrary, the only direct evidence (the results of RADV audits of the overlapping
18 codes) shows that the health conditions for United’s beneficiaries—the relevant category
19 for payment—overwhelmingly *were* supported. JS D184-D185; Exs. D-64 at 1887-89, fig.
20 15. D-141 at 3520:13-21:2, D-63 at 1763.

21 *Third*, such a theory would gut the materiality requirement and leave *Escobar* an
22 empty shell. It is always true that CMS (or any other party) would accept a purported
23 repayment of an overpayment. If that were all that was required, DOJ could duplicate any
24 affirmative FCA claim with a reverse FCA claim, alleging that the government would have
25 accepted repayment of the funds obtained as a result of the false claims or statements if
26 offered. That would render the materiality element meaningless. It is well established that
27 the government cannot generate “redundant” reverse FCA claims this way. *See, e.g.,*
28 *United States v. Kinetic Concepts, Inc.*, 2017 WL 2713730, at *13-14 (C.D. Cal. 2017);

1 *Pencheng Si v. Laogai Rsch. Found.*, 71 F. Supp. 3d 73, 96-97 (D.D.C. 2014). Nor can it
2 defy *Escobar*'s clear admonition to "rigorous[ly]" enforce the FCA's materiality
3 requirement. 579 U.S. at 192.

4 **UNITED'S CONCLUSION**

5 For these reasons, this Court should grant United's motion for summary judgment,
6 and should deny DOJ's partial motion for summary judgment.

7 **UNITED STATES' CONCLUSION**

8 For the reasons above, United's motion for summary judgment should be denied
9 and the United States' motion for summary judgment should be granted.

BENJAMIN POEHLING,

Plaintiff,

v.

UNITEDHEALTH GROUP, INC. *et al.*,

Defendants.

CASE NO. 2:16-cv-08697-FMO-PVCx

**STATEMENT OF
UNCONTROVERTED FACTS**

Hon. Fernando M. Olguin

Hearing Date: September 5, 2024

Hearing Time: 10:00 a.m.

Courtroom: 6D

1 Pursuant to Local Rule 56-1 and the Order re Summary Judgment Motions (ECF
2 No. 365), UnitedHealth Group Incorporated and its affiliated entities named as Defendants
3 in this action (“United” and “Defendants”) and Plaintiff United States of America
4 (“Plaintiff”) hereby submit the following Joint Statement of Uncontroverted Facts in
5 connection with the Joint Brief regarding the Cross Motions for Summary Judgment.

DEFENDANTS' UNCONTROVERTED FACTS				
No.	Statement of Fact	Citation	Response	Citation
D1	For purposes of this litigation, the Defendants are collectively referred to as "United" or "UnitedHealth."	<i>See, e.g.</i> , Ex. D-1, Am. Compl. at 2-3	Undisputed.	
D2	Medicare is a federal health insurance program established under the Medicare and Medicaid Act for the elderly and disabled administered by the Centers for Medicare and Medicaid Services ("CMS").	42 U.S.C. § 1395c <i>et seq.</i> (federal statute noting the Medicare Part A program provides protection for those over the age of 65 and individuals under 65 who are disabled); <i>id.</i> § 1395j <i>et seq.</i> (federal statute providing that Medicare Part B is an insurance program is established "for aged and disabled individuals"); Ex. D-3, Dkt. No. 250-1 (Statement of Genuine Disputes and Additional Uncontroverted Facts ("Original SUF")) at A.1 (asserting that all parties to this litigation agree that "Medicare is a federal health insurance program for the elderly and disabled . . . administered by . . . CMS")	Undisputed.	
D3	Medicare Part A covers medical services furnished	<i>See</i> 42 U.S.C. § 1395c <i>et seq.</i> (federal statute describing	Undisputed that Medicare Part A covers	<i>See, e.g.</i> , Ex. P-41, 42 U.S. Code § 1395d(d) (describing hospice

DEFENDANTS' UNCONTROVERTED FACTS				
No.	Statement of Fact	Citation	Response	Citation
	by hospitals and other institutional doctors.	Medicare part A that states it provides protections for costs of “hospital, related post-hospital, home health services, and hospice care”); Ex. D-3, Original SUF at A.2 (noting that all parties to this litigation agree that Medicare Part A “covers medical services furnished by hospitals and other institutional care providers”)	medical services furnished by hospitals and other institutional providers. Otherwise disputed, mischaracterizes cited evidence.	coverage under Medicare Part A), Ex. P-42, 42 U.S. Code § 1395x(dd)(1) and (3)(B) (an attending physician for a hospice program may be a Physician, Nurse Practitioner, or a Physician’s Assistant)
D4	Medicare Part B is an optional supplemental insurance program that pays for items and services not covered by Part A, including outpatient physician services, clinical laboratory tests, and durable medical equipment, among other things.	42 U.S.C. § 1395l <i>et seq.</i> (federal statute describing coverage for Medicare Part B benefits); Ex. D-3, Original SUF at A.3 (noting that all parties to this litigation agree that Medicare Part B “is an optional supplemental insurance program that pays for items and services not covered by part A, including outpatient physician services, . . . clinical laboratory tests, and durable medical equipment, among other things” (internal quotations omitted))	Undisputed.	
D5	As a general matter, Medicare Parts A and B	Ex. D-143, Tee Dep. 19:11-44:11 (CMS employee	Undisputed.	

DEFENDANTS' UNCONTROVERTED FACTS				
No.	Statement of Fact	Citation	Response	Citation
	("Traditional Medicare") compensate providers on a fee-for-service ("FFS") basis.	describing his role as CMS Director of the Division of Practitioner Services (2018-present) and former roles as the Director of the Division of Encounter Data and Risk Adjustment Operations (2014-2018) and Deputy Director of the Division of Encounter Data and Risk Adjustment Operations (2013-2014)), 49:16-50:1 (defining Traditional Medicare); Ex. D-103, Duggan Dep. 223:8-9 (United expert explaining that "Traditional Medicare is fee for service and reimbursement is based on services"); Ex. D-3, Original SUF at A.7 (asserting that CMS pays providers directly for medical services under Parts A and B)		
D6	This matter concerns Part C and Part D of the Medicare Act.	Ex. D-1, Am. Compl. ¶¶ 54-65 (describing Medicare Parts C and D Risk Adjustment Payments)	Undisputed.	
D7	Medicare Part C, now known as Medicare Advantage (or the "Medicare	See 42 U.S.C. § 1395w-21 <i>et seq.</i> (federal statute outlining that Medicare+Choice	Undisputed.	

DEFENDANTS' UNCONTROVERTED FACTS

	Advantage program”), allows people to opt out of Parts A and B and instead enroll in health insurance plans offered by private insurers (“Medicare Advantage plans”).	individuals can enroll either in Medicare fee-for-service or a Medicare+Choice plan); Ex. D-143, Tee Dep. 26:23-27:4 (CMS employee describing that Medicare Advantage is an alternative to traditional Medicare); Ex. D-1, Am. Compl. ¶ 45 (same); Ex. D-3, Original SUF at A.4 (asserting that Medicare Part C is known as Medicare Advantage)		
D8	Medicare Part D allows people to obtain prescription drug coverage through Medicare Advantage plans.	Ex. D-1, Am. Compl. ¶ 46	Undisputed.	
D9	CMS pays the Medicare Advantage plans a fixed amount per month for each member that they insure, based in part on the relative health of the individual members.	Ex. D-57, Garthwaite Rep. (9/29/2023) ¶ 21 (government expert describing the per member, per month payments CMS makes to Medicare Advantage plans); Ex. D-52, Amended Acevedo Rep. (4/5/2024) ¶¶ 24-25 (government expert describing monthly premiums paid to Medicare Advantage plans); Ex. D-56, Duggan Rep. (9/29/2023)	Undisputed.	

DEFENDANTS' UNCONTROVERTED FACTS				
No.	Statement of Fact	Citation	Response	Citation
		¶ 16 (United expert explaining how CMS compensates Medicare Advantage plans)		
D10	Paying Medicare Advantage plans based on the relative health of their members is called "risk adjustment."	Ex. D-149, 2004 Advanced Notice Attachment 2 ("The Balanced Budget Act of 1997 (BBA) mandated that a risk adjustment payment methodology, incorporating information on beneficiaries' health status, be implemented in the Medicare+Choice (M+C) program no later than January 2000")	Undisputed.	
D11	Medicare Advantage plans may provide supplemental benefits to their members consisting of benefits that Traditional Medicare does not provide to its beneficiaries.	42 U.S.C. § 1395w-22(a)(3) (federal statute noting that Medicare+Choice plans may provide supplemental benefits to enrollees); <i>Matthews v. Leavitt</i> , 452 F.3d 145, 146 n.1 (2d Cir. 2006) (noting that Part C plans must provide the same benefits under Parts A and B and may also provide supplemental benefits); Ex. D-3, Original SUF at A.5 (same); Ex. D-56, Duggan Rep. (9/29/2023) ¶¶ 45, 53-54, 58, 91 (United expert	Undisputed.	

DEFENDANTS' UNCONTROVERTED FACTS				
No.	Statement of Fact	Citation	Response	Citation
		describing supplemental benefits Medicare Advantage plans may offer); Ex. D-127, Limmer 30(b)(6) Dep. 149:9-150:2 (CMS corporate representative agreeing that Medicare Advantage plans are required to use their rebate to provide supplemental benefits)		
D12	The supplemental benefits that Medicare Advantage plans can provide to their members include vision care.	Ex. D-56, Duggan Rep. (9/29/2023) ¶¶ 45, 58, 91 (United expert providing examples of supplemental benefits like vision care); Ex. D-99, Creighton Dep. (3/23/2022) 33:7-34:6 (former CMS employee Sean Creighton describing his prior role as the CMS Director for the Division of Payment Policy from 2007-2012), 41:21-45:23 (describing the additional benefits Medicare Advantage plans offer their beneficiaries, including vision care)	Undisputed.	
D13	The supplemental benefits that Medicare Advantage plans can provide to their	Ex. D-56, Duggan Rep. (9/29/2023) ¶¶ 53, 58, 91 (United expert providing	Undisputed.	

DEFENDANTS' UNCONTROVERTED FACTS

	members include dental care benefits.	examples of supplemental benefits like dental care); Ex. D-99, Creighton Dep. (3/23/2022) 41:21-45:23 (former CMS employee describing the additional benefits Medicare Advantage plans offer their beneficiaries, including dental care)		
D14	Medicare Advantage plans can provide these supplemental benefits to their members at no additional cost to those members.	Ex. D-56, Duggan Rep. (9/29/2023) ¶¶ 33,45, 54, 58 (United expert describing reduced costs in Medicare Part C); Ex. D-99, Creighton Dep. (3/23/2022) 23:12–26:11 (describing role as former CMS Deputy Administrator and Director of the Center for Medicare), 41:21-45:23 (describing reduced costs in Medicare Part C)	Undisputed.	
D15	The Medicare Advantage program is intended to pay Medicare Advantage plans more per month for the risk of insuring sicker beneficiaries and less per month for the risk of	Ex. D-86, Kronick Dep. Ex. 1535 at 3 (noting CMS pays MA plans more for older and sicker enrollees); Ex. D-127, Limmer 30(b)(6) Dep. 75:20-23 (CMS corporate representative describing that risk scores are	Undisputed.	

DEFENDANTS' UNCONTROVERTED FACTS				
No.	Statement of Fact	Citation	Response	Citation
	insuring healthier beneficiaries.	calculated based demographic variables and health conditions)		
D16	CMS uses hierarchical condition categories ("HCCs") to determine the payment that is received by the Medicare Advantage plan for the plan's beneficiaries.	Ex. D-97, Cavanaugh Dep. 49:22-50:17 (former CMS employee describing how HCCs are used to calculate costs for beneficiaries); Ex. D-18, 88 Fed. Reg. 6643, 6644 (Feb. 1, 2023) (describing HCCs and how those are used to calculate risk scores); Ex. D-73, Lara Dep. Ex. 1133-2 at 803-04 (same)	Undisputed.	
D17	Diagnosis codes are alphanumerical codes that represent a patient's health conditions.	Ex. D-132, Paul Dep. 16:1-29:1 (CMS employee Rebecca Paul describing her role as CMS Director for the Division of Plan Policy in the Medicare Plan Payment Group (2012-Present) and Senior Health Policy Analyst (2005-2012)), 31:21-32:5 (describing diagnosis codes and their use); Ex. D-67, Acevedo Dep. Ex. 1582 (government expert describing medical codes)	Disputed as to the description of Ex. D-67 in the citation parenthetical, mischaracterizes cited evidence. Otherwise, undisputed.	

DEFENDANTS' UNCONTROVERTED FACTS				
No.	Statement of Fact	Citation	Response	Citation
D18	HCCs are made up of groups of diagnosis codes that are related clinically and have similar cost implications.	Ex. D-18, 88 Fed. Reg. 6643, 6644 (Feb. 1, 2023) (describing HCCs); 42 C.F.R. § 422.2 (federal regulation noting that HCCs are groups of disease codes)	Undisputed.	
D19	After a patient visits a doctor, the doctor is expected to document the encounter, including the patient's diagnoses, in a medical chart.	Ex. D-54, Blair Rep. (9/29/2023) ¶ 7 (United expert describing what CMS uses to calculate payments to plans, including diagnosis codes reported by providers after patient visits); <i>see, e.g.</i> , Ex. D-150, MAPL006426592 (example of a medical chart)	Disputed to the extent the fact implies a doctor documents a diagnosis code in the medical record, conflicting evidence presented. Disputed to the extent that the fact states a doctor documents a diagnosis in the medical record, mischaracterizes cited evidence and conflicting evidence presented. Otherwise, undisputed.	Ex. D-54, Blair (United Expert) Rep. (Sept. 29, 2023), ¶ 7 ("After a patient visit, a provider submits the claim to the patient's MA Plan, which contains information about the patient visit, such as the services provided and relevant diagnosis codes. A provider may identify the diagnosis code(s) to submit on the claim or the provider may rely on coders to review the information documented in a patient's medical record and translate this information into diagnosis codes. The MA Plan then, in turn, submits the diagnosis codes for all its beneficiaries to CMS, and CMS uses this information (along with other characteristics of the beneficiary, including demographic information) to determine payment to the MA Plan for providing health coverage to this beneficiary."); Ex. D-150,

P-10, Rice Tr. 54:22-56:5 (clarifying that October 26, 2015 email referred to defining "specific steps" that CMS would "prescribe" for plans to meet reasonable diligence obligation.)

DEFENDANTS' UNCONTROVERTED FACTS

No.	Statement of Fact	Citation	Response	Citation
	specific steps a plan must take, at a minimum, to meet that requirement. For example, [CMS] could require them to self-audit (i.e., their own RADV audits). [CMS] could also revive the NPRM proposal we had that if a plan is checking a medical record for underpayments, they must also look for overpayments. . . . Another thought is getting more help supporting DOJ whistleblower activity. The volume of these cases is increasing and they often need technical assistance from [CMS] to evaluate whether to intervene and to support cases they choose to prosecute. We think the whistleblower activity could be as effective – or even more effective – than CMS audits in getting plans to do more to prevent and identify risk adjustment overpayments.”

Defendants.

1 This is a civil fraud action brought by the United States of America (“United
2 States” or “Government”) to recover treble damages and civil penalties under the False
3 Claims Act (“FCA”), 31 U.S.C. §§ 3729-3733, as well as for restitution and common
4 law damages, for monies unlawfully obtained and retained by Defendant UnitedHealth
5 Group Inc. and various of its direct and indirect subsidiaries (“Defendants”) involved in
6 Parts C and D of the Medicare Program. Defendants knowingly submitted false claims
7 and made false statements to the Medicare Program. Moreover, Defendants have
8 knowingly and improperly avoided their obligations to repay significant sums of money
9 to the Medicare Program.

10 Having filed a notice of intervention pursuant to 31 U.S.C. § 3730(b)(4), the
11 United States alleges for its amended complaint-in-partial-intervention (the “Amended
12 Complaint”) as follows:

13 **INTRODUCTION**

14 1. Millions of elderly and disabled individuals throughout the United States receive
15 their Medicare benefits through Parts C and D of the Medicare Program, hereinafter
16 referred to as the Medicare Advantage (MA) Program, which is administered by the
17 Government agency called the Centers for Medicare and Medicaid Services (“CMS”). A
18 central, distinguishing feature of the MA Program is the provision of Medicare benefits
19 by private healthcare insurance organizations, which are called Medicare Advantage
20 Organizations (“MA Organizations”). Medicare beneficiaries enroll in managed
21 healthcare insurance plans called Medicare Advantage Plans (“MA Plans”) and
22 prescription drug plans (“PD Plans”) that are offered by these MA Organizations. The
23 MA Plans are packages of healthcare insurance benefits and the PD Plans are packages
24 of prescription drug benefits. Hereinafter MA Plans and PD Plans are collectively
25 referred to as “Plans.”

26 2. The Government pays each MA Organization a fixed monthly payment for each
27 Medicare beneficiary enrolled in its Plans. The Government adjusts these payments for
28 various risk factors that affect expected healthcare expenditures, including the age,

gender, and health status of each beneficiary. The adjustments are intended to ensure that MA Organizations are paid more for beneficiaries whose healthcare expenses are *expected* to be more and less for beneficiaries whose health care expenses are *expected* to be less. However, these adjustments to the fixed monthly payments are made regardless of the actual services provided to the beneficiaries and, thus, regardless of whether those beneficiaries expected to need more or more costly services actually obtain more or more costly services, and whether those beneficiaries expected to need less or less costly services actually obtain less or less costly services.

3. To obtain payments based on adjustments for health status, MA Organizations submit diagnosis codes to the Government for the beneficiaries in their Plans. These diagnosis codes are from the beneficiaries' medical encounters with healthcare providers (*e.g.*, physician office visits and hospital stays) during the year prior to the actual payment year (often referred to as the "data collection" year or the "date of service" year). Payments are based on diagnoses from the prior year because they are used to predict the *expected* needs of a beneficiary for more or less costly healthcare services during the payment year. Using these diagnosis codes submitted by or on behalf of MA Organizations, the Government calculates a risk score for each beneficiary. The beneficiary's risk score is then used to calculate monthly payments to the MA Organization for that beneficiary for the payment year. In general, the more numerous and severe the conditions identified by the diagnosis codes, the higher the risk score for a beneficiary and, thus, the greater the risk adjustment payments made to the MA Organization for that beneficiary for the payment year.

4. This payment model creates powerful incentives for MA Organizations and their owners and operators to exaggerate the expected healthcare costs for the beneficiaries in their Plans by submitting invalid diagnosis codes and failing to comply with their obligation to retract invalid diagnoses. In order to combat these incentives and protect the Government from overpaying MA Organizations, the Government requires that submitted diagnoses be unambiguously supported and, thus, validated by the

beneficiaries' medical records for medical encounters during the data collection year. Medical records are the "source of truth" for the purpose of receiving and retaining risk adjustment payments.

5. The medical records that must support the diagnosis codes are not provided to the Government as part of the payment process. Instead, the Government requires that each MA Organization expressly certify that the diagnosis codes it has submitted for risk adjustment payments are accurate and truthful based on best knowledge, information, and belief. 42 C.F.R. § 422.504(l)(2). Each MA Organization must exercise due diligence in order to make this express certification. Each MA Organization must also "[a]dopt and implement an effective compliance program, which must include measures that prevent, detect, and correct non-compliance with [the Government's] program requirements as well as measures that prevent, detect, and correct fraud, waste, and abuse." 42 C.F.R. § 422.503(b)(4)(vi).

6. As explained by the United States Court of Appeals for the Ninth Circuit, CMS, in 2000, made clear that

Medicare Advantage organizations have always had "an obligation to take steps to ensure the accuracy, completeness, and truthfulness of the [medical] encounter data" [i.e., diagnoses] and "an obligation to undertake 'due diligence' to ensure the accuracy, completeness, and truthfulness of encounter data submitted to [CMS]." . . . CMS made perfectly clear that Medicare Advantage organizations would be "held responsible for making good faith efforts to certify the accuracy, completeness, and truthfulness of encounter data submitted."

United States ex rel. Swoben v. UnitedHealthcare Ins. Co., 848 F.3d 1161, 1174 (9th Cir. 2016) (quoting 65 Fed. Reg. 40,170, 40,268 (June 29, 2000)). The Ninth Circuit further explained that the requirement that MA Organizations take affirmative steps to address errors in their data is further demonstrated by "§ 422.503, which since 2005 has required Medicare Advantage organizations to have effective compliance programs in place,

THE MEDICARE PROGRAM

I. The Medicare Statute

43. Medicare is a federally-operated health insurance program administered by CMS. Medicare benefits individuals age 65 and older and the disabled. 42 U.S.C. § 1395c *et seq.* Parts A and B of the Medicare Program are known as “traditional” Medicare.

Medicare Part A covers inpatient and institutional care. Medicare Part B covers physician, hospital outpatient, and ancillary services and durable medical equipment.

44. Under Medicare Parts A and B, CMS reimburses healthcare providers (*e.g.*, hospitals and physicians) using what is known as a “fee-for-service” (“FFS”) payment system. Under an FFS payment system, healthcare providers submit claims to CMS for reimbursement for each service actually rendered, such as a physician office visit or a hospital stay. CMS then pays the providers directly for each service based on payment rates pre-determined by the Government.

45. Under Medicare Part C, Medicare beneficiaries can opt out of the traditional Medicare Program (Parts A and B) and instead enroll in MA Plans and receive health care services managed by those MA Plans. MA Plans must provide Medicare beneficiaries all the services that they are entitled to receive from the traditional Medicare Program.

46. Under Medicare Part D, Medicare beneficiaries can elect to enroll in either a Prescription Drug plan (known as a PD Plan) or an MA Plan that provides prescription drug coverage in addition to the physician office visit and hospital outpatient and inpatient coverage provided under Part C (known as an MAPD Plan). For simplicity, in this Amended Complaint, the Government refers to Parts C and D collectively as the MA Program and refers collectively to MA, PD, and MAPD Plans as Plans.

47. MA Organizations are “risk-bearing” entities that must be licensed by the State in which they are located. 42 C.F.R. §§ 422.2 & 422.503(b)(2). Each MA Organization agrees to bear the risk that the amount that it pays providers for the health services for a

1 particular beneficiary in one of its Plans may exceed the amount that it was paid to
2 insure the beneficiary.

3 48. Medicare beneficiaries who enroll in an MA, PD or MAPD Plan are considered
4 members of and enrollees in that Plan. In this Amended Complaint, the terms
5 beneficiaries, members, enrollees, and patients are used interchangeably, but mean the
6 same thing, that is, individuals enrolled in Plans.

7 49. MA Organizations' obligations to the MA Program and the requirements for them
8 to participate in the Program are set forth in federal regulations and, each year, the MA
9 Organizations must agree in writing to comply with those regulations and to other terms
10 and conditions in order to participate in the MA Program. 42 C.F.R. §§ 422.504 &
11 422.505 (Part C); 42 C.F.R. §§ 423.504 & 423.505 (Part D). In addition, MA
12 Organizations must comply with requirements set forth in statutes, such as the FCA, and
13 guidance documents, such as the Medicare Managed Care Manual, the Medicare
14 Prescription Drug Benefit Manual, the Risk Adjustment Participant Guides, and
15 Medicare Advantage operating instructions.

16 50. Related Entities include those entities that are related to an MA Organization by
17 common ownership or control and perform at least some of the MA Organization's
18 management functions. 42 C.F.R. §§ 422.2 & 422.500. As previously explained, the
19 UHG Managing Defendants are or were Related Entities.

20 51. First Tier Entities include those providers or provider groups that enter into a
21 written arrangement with an MA Organization to provide healthcare services to the
22 beneficiaries in the organization's Plan(s). 42 C.F.R. §§ 422.2 & 422.500. The capitated
23 providers in the RACCR Program were First Tier Entities.

24 52. The obligations of Related Entities and First Tier Entities to the MA Program are
25 also set forth in the MA Program regulations. Related Entities and First Tier Entities
26 must, among other things, (i) perform their services in a manner that complies with the
27 MA Organization's contractual obligations to the Government, *id.* at 422.504(i)(3)(iii);
28 agree to "comply with all applicable Medicare laws, regulations, and CMS instructions,"

1 *id.* at 422.504(i)(4)(v); and receive effective compliance training and education relating
2 to preventing fraud, waste, and abuse. *Id.* at § 422.503(b)(4)(vi)(C)(1). Furthermore, if
3 a Related Entity or First Tier Entity generates data relating to an MA Organization’s
4 claims for payments from the MA Program, it (as well as the MA Organization) must
5 certify the accuracy and truthfulness of the data. *Id.* at § 422.504(l)(3).

6 53. An MA Organization, however, cannot evade its legal and contractual obligations
7 to the Government by using Related Entities to manage it or by contracting with First
8 Tier Entities to provide services to its beneficiaries. An MA Organization “maintains
9 ultimate responsibility for adhering to and otherwise fully complying with all terms and
10 conditions of its contract with CMS.” 42 C.F.R. § 422.504(i)(1). Thus, an MA
11 Organization cannot delegate away its ultimate responsibility for its obligations to the
12 Government.

13 **II. Medicare Parts C and D Risk Adjustment Payments**

14 54. Under Part C, the Government pays each MA Organization a predetermined base
15 monthly amount for each Medicare beneficiary in its MA Plans. This monthly payment
16 is known as a “per-member, per-month” payment. This predetermined base payment
17 varies for each MA Plan depending on various factors, including amounts set forth in the
18 MA Plan’s bid submitted to the Government, the scope of medical services covered by
19 the Plan’s benefit package (all packages must cover at least those services offered by
20 Parts A and B of the Medicare Program), and the amount of premiums, deductibles, and
21 co-pays for which an enrollee in the Plan is responsible (Plans have different premiums,
22 deductibles and co-pays such that Plans with higher deductibles and co-pays may have
23 lower premiums).

24 55. Since 2000, Congress has also required that the payments be risk adjusted for each
25 beneficiary based on “such risk factors as age, disability status, gender, institutional
26 status, and *such other factors as [the Secretary of the United States Department of*
27 *Health and Human Services] determines to be appropriate, including adjustment for*
28 *health status . . . to ensure actuarial equivalence.”* 42 U.S.C. § 1395w-23(a)(1)(C)

1 (emphasis added). By risk adjusting for health status, the Government pays MA
2 Organizations more for beneficiaries with certain serious chronic medical conditions
3 and, thus, higher risk scores than for beneficiaries who do not have those conditions and,
4 thus, have lower risk scores.

5 56. Pursuant to 42 U.S.C. § 1395w-23(a)(1)(C), the Secretary has the authority to
6 determine how to adjust for health status. For example, the Secretary has the authority to
7 decide to risk adjust only for serious chronic medical conditions and to risk adjust by
8 requiring the submission of diagnoses from medical encounters that occurred the year
9 preceding each payment year and projecting the possibility of additional costs for each
10 payment year. The Secretary also has authority to decide what historical cost and/or
11 utilization data it should consider in projecting how much more it may cost an MA
12 Organization to provide services to a beneficiary who has been assigned a diagnosis
13 relating to a serious chronic medical condition.

14 57. From 2000 to 2004, the Secretary employed a Principal Inpatient Diagnostic Cost
15 Group (“PIP-DCG”) model that took into account diagnoses from inpatient hospital
16 stays to determine the risk scores of beneficiaries in MA Plans. The PIP-DCG model
17 was prospective. Diagnoses for one year were used to determine each beneficiary’s risk
18 score for the following payment year. During the 2000 to 2004 time period, MA
19 Organizations (which were then called Medicare + Choice Organizations) had many of
20 the same obligations that they have had since 2004. For instance, they had the obligation
21 to design and implement effective systems to monitor and review the accuracy and
22 truthfulness of the diagnoses they submitted for risk adjustment payments in order to
23 certify the accuracy and truthfulness of that data. See Medicare Managed Care Manual,
24 Chapter 7, Section 110.2 (entitled “Certification of Data Accuracy, Completeness, and
25 Truthfulness”) (Rev. 2, 10-01-01).

26 58. Since 2004, the Secretary has employed the Hierarchical Conditions Category
27 (“HCC”) model, which takes into account both demographic factors (such as age and
28 gender) and health status to determine the risk scores for beneficiaries in MA Plans.

1 With respect to health status, the model takes into account diagnoses from physician
2 office visits and hospital outpatient encounters as well as hospital inpatient stays. Like
3 the PIP-DCG model, the HCC model is prospective, meaning that it relies on diagnoses
4 assigned to a beneficiary in one year (referred to by CMS as the “data collection” year
5 but also generally known as the “date of service” or “DOS” year) to determine the risk
6 score for the beneficiary for the following year (often referred to as the “payment year”
7 or “PY”). The medical conditions included in the model are grouped into HCCs, which
8 are categories of clinically-related medical diagnoses. *See* 42 C.F.R. § 422.2. The
9 diagnoses grouped into HCCs include major, severe, and/or chronic illnesses. Related
10 groups of diagnoses are ranked on the basis of disease severity and the cost associated
11 with their treatment. Between 2004 and 2013, the CMS-HCC model included 70 HCCs.
12 Starting in 2014, the CMS-HCC model included 79 HCCs.

13 59. Under Medicare Part D, payments to PD or MAPD Plans for prescription drug
14 benefits are also risk-adjusted based on health status. As with Part C, Part D employs a
15 health-based risk adjustment model known as the Rx Hierarchical Condition Categories
16 (“RxHCC”) model. Like HCCs, RxHCCs are also groups of clinically-related medical
17 diagnoses that are ranked by disease severity and the cost associated with the
18 pharmaceutical drugs used to treat them.

19 60. The Government assigns a relative numerical value (also known as a relative
20 factor, multiplier, or coefficient) to each HCC and RxHCC group that correlates to the
21 predicted incremental costs of care associated with treating the medical conditions in
22 each category. It currently determines the relative values based on an analysis of the
23 additional amounts that it paid on average for the treatment of these major, severe, and
24 chronic medical conditions under Parts A and B of the Medicare Program. Higher
25 relative values are assigned to HCCs and RxHCCs that include diagnoses with greater
26 disease severity and greater costs associated with their treatment.

27 61. As previously stated, the HCC and RxHCC risk adjustment models are
28 prospective and a beneficiary’s risk score for a particular payment year is determined by

1 his or her medical conditions during the previous year (*i.e.*, the date of service year). For
2 risk adjustment payment purposes, these medical conditions must be documented by a
3 qualified healthcare provider (*e.g.*, a doctor) in the beneficiary's medical record during
4 the previous year. Accordingly, for risk adjustment payment purposes, the diagnosis
5 codes that the healthcare provider, his or her administrative or billing support staff, or
6 anyone else (such as the MA Organization or a Related Entity) assigns to a beneficiary
7 must be supported by the beneficiary's medical record.

8 62. Each beneficiary's risk score is calculated anew for each payment year. For
9 example, a beneficiary's risk score for payment year 2012 is determined by the
10 diagnoses that his or her qualified healthcare providers documented in his or her medical
11 records during medical encounters during date of service year 2011.

12 63. MA Organizations obtain diagnosis data from the healthcare providers that treat
13 the beneficiaries in their plans (as well as through other means and sources such as the
14 MA Organizations' own medical record reviews). Healthcare providers can transmit
15 diagnosis codes to MA Organizations with claims for payment for services rendered, in
16 encounter records reporting the services rendered, or by alternative means. In this
17 Amended Complaint, the United States refers to diagnosis codes reported by providers
18 through any means as "provider-reported diagnoses."

19 64. MA Organizations submit risk adjustment data, including diagnoses, to CMS
20 using CMS' Risk Adjustment Processing System ("RAPS"). Each RAPS submission
21 must include the following information: the Medicare beneficiary's identification
22 number (called a "HIC number" or "HICN"); the date(s) of the medical encounter (the
23 physician office visit, hospital outpatient visit, or hospital inpatient stay); the type of
24 provider (physician or hospital); and the diagnosis code(s) reported by the provider for
25 the encounter. Each RAPS submission is a claim for payment. If the data submitted is
26 invalid, the claim is false.

27 65. RAPS also has a field that is called a "Delete Indicator" and allows MA
28 Organizations and Related Entities to comply with their obligation to delete invalid

1 diagnoses that they previously submitted in order to withdraw or retract the invalid
2 diagnoses. That is, the RAPS system enables MA Organizations and Related Entities to
3 withdraw or retract their false claims for risk adjustment payments.

4 **DEFENDANTS' AGREEMENTS**

5 **I. The Annual Parts C and D Agreements**

6 66. As previously explained, in order to participate in the MA Program, the Defendant
7 MA Organizations were required to agree in writing to comply with the Part C and D
8 regulations and any other terms and conditions CMS deemed appropriate. 42 C.F.R.
9 §§ 422.504 & 422.505 (Part C); 42 C.F.R. §§ 423.504 & 423.505 (Part D). Each year
10 during the relevant time period, one or more executives of one or more of the UHG
11 Managing Defendants or their predecessors executed these written agreements or
12 renewals of these written agreements between the Defendant MA Organizations and
13 CMS.

14 67. The regulations specifying the terms and conditions of the contractual relationship
15 between MA Organizations and CMS have remained the same for many years.
16 Accordingly, from year to year, the terms and conditions of these written agreements
17 between the Defendant MA Organizations and CMS remained very similar, if not
18 identical.

19 68. The terms and conditions of the Part C agreements are exemplified by the attached
20 contract that Defendant UnitedHealthcare Plan of River Valley, Inc. entered into with
21 CMS relating to its participation in Medicare Part C in 2010. *See* Exhibit 1, attached
22 hereto. The terms and conditions of these Part C contracts include, among many other
23 things, that each of the MA Organizations agrees to (i) operate its Plans “in compliance
24 with the requirements of [the] contract and applicable Federal statutes, regulations, and
25 policies (e.g., policies as described in the Call Letter, Medicare Managed Care Manual,
26 etc.)” (Article II, Section A); (ii) “implement a compliance plan in accordance with the
27 requirements of § 422.503(b)(4)(vi)” (Article III, Section F); (iii) “[a]s a condition of
28 receiving a monthly payment under” the contract, “request payment under the contract

1 on the forms attached” to the contract, including “Attachment B (risk adjustment data)
2 which attest[s] to *(based on best knowledge, information and belief, as of the date*
3 *specified on the attestation form)* the accuracy, completeness, and truthfulness of the
4 data identified on” Attachment B (Article IV, Section C) (emphasis in the original); (iv)
5 ensure that related entities, contractors, and subcontractors that generated risk adjustment
6 data also attest to the accuracy and truthfulness of the data (Article IV, Section C.2); (v)
7 ensure that all agreements with related entities, contractors, and subcontractors specify
8 that the related entities, contractors, and subcontractors “must comply with all applicable
9 Medicare laws, regulations, and CMS instructions” (Article V, Section D(5)); and (vi)
10 comply with “Federal laws and regulations designed to prevent or ameliorate fraud,
11 waste, and abuse, including, but not limited to, applicable provisions of the Federal
12 criminal law [and] the False Claims Act (31 USC 3729 et seq.)” (Article IX, Section
13 A.1). In accordance with 42 C.F.R. § 422.510, the agreements also provided that CMS
14 may terminate the MA Organization’s participation in the MA Program if it determines
15 that the organization has submitted false data to it or “fail[ed] to provide CMS with valid
16 risk adjustment data.” Article VIII, Section B.1(a)(iv) & (vii).

17 69. The agreements for other years were very similar, if not identical. For example, in
18 September 2010, Tom Paul, the Chief Executive Office of UnitedHealthcare Medicare &
19 Retirement, executed a new agreement between Defendant UnitedHealthcare of
20 California (the successor to PacifiCare of California) and CMS relating to this MA
21 Organization’s participation in Medicare Part C in 2011. *See* Exhibit 2, attached hereto.
22 By executing this contract, UnitedHealthcare of California agreed to, among many other
23 things, (i) operate its Plans “in compliance with the requirements of [the] contract and
24 applicable Federal statutes, regulations, and policies (e.g., policies as described in the
25 Call Letter, Medicare Managed Care Manual, etc.)” (Article II, Section A); (ii)
26 “implement a compliance plan in accordance with the requirements of §
27 422.503(b)(4)(vi)” (Article III, Section F); (iii) “[a]s a condition of receiving a monthly
28 payment under” the contract, “request payment under the contract on the forms attached”

1 to the contract, including “Attachment B (risk adjustment data) which attest[s] to *(based*
2 *on best knowledge, information and belief, as of the date specified on the attestation*
3 *form)* the accuracy, completeness, and truthfulness of the data identified on” Attachment
4 B (Article IV, Section D); (iv) ensure that related entities, contractors, and
5 subcontractors that generated risk adjustment data also attest to the accuracy and
6 truthfulness of the data (Article IV, Section D.2); (v) ensure that all agreements with
7 related entities, contractors, and subcontractors specify that the related entities,
8 contractors, and subcontractors “must comply with all applicable Medicare laws,
9 regulations, and CMS instructions” (Article V, Section D.5); and (vi) comply with
10 “Federal laws and regulations designed to prevent or ameliorate fraud, waste, and abuse,
11 including, but not limited to, applicable provisions of the Federal criminal law [and] the
12 False Claims Act (31 USC 3729 et seq.)” (Article IX, Section A.1). The agreement also
13 provided that CMS had the right to terminate the agreement with the MA Organization if
14 it determined that the organization had submitted false data to it or “fail[ed] to provide
15 CMS with valid risk adjustment data.” Article VIII, Section B.1(a)(iv) & (vii). In
16 September 2010, Paul also executed an agreement with CMS relating to
17 UnitedHealthcare of California’s offering of prescription drug benefits under Medicare
18 Part D. This Part D agreement was, in all respects relevant to this Amended Complaint,
19 very similar to the one described above for the offering of healthcare insurance benefit
20 packages under Part C. Furthermore, in September 2010, Tom Paul executed the same
21 Part C and D agreements on behalf of other of the Defendant MA Organizations. All
22 these agreements were very similar, if not identical, to the ones he executed for
23 UnitedHealthcare of California.

24 70. In September 2011, August 2012, and August 2013, Scott Theisen, the Chief
25 Financial Officer of UnitedHealthcare Medicare & Retirement, executed agreements for
26 many of the Defendant MA Organizations relating to their participation in Medicare
27 Parts C and D for 2012, 2013, and 2014, respectively. *See, e.g.*, Exhibits 3, 4, & 5,
28 attached hereto (Defendant UnitedHealthcare of California’s Parts C agreements for

1 these years). In August 2014 and 2015, Brian Thompson, the Chief Financial Officer of
2 UnitedHealthcare Medicare & Retirement, executed agreements for many of the
3 Defendant MA Organizations relating to their participation in Medicare Parts C and D
4 for 2015 and 2016. See, e.g., Exhibits 6 & 7, attached hereto (Defendant
5 UnitedHealthcare of California’s Part C agreements for these years). These agreements
6 were, in all respects relevant to this Amended Complaint, very similar, if not identical, to
7 the agreements described in the preceding paragraphs relating to the agreements for 2010
8 and 2011 and imposed the same contractual obligations on the Defendant MA
9 Organizations as the earlier agreements.

10 71. The annual Attestations executed in order to renew existing contracts were also
11 very similar as shown by the following: In the fall of 2006, Jerry Knutson, the Chief
12 Financial Officer of Ovations and Jeff Putnam, the Chief Financial Officer of Secure
13 Horizons, executed Attestations renewing (for calendar year 2007) the existing contract
14 between PacifiCare of California (the predecessor of Defendant UnitedHealthcare of
15 California) and CMS. Knutson and Putnam attested that PacifiCare of California would
16 “comply with all applicable program guidance that CMS has issued to date and will issue
17 during the remainder of 2006 and 2007 pursuant to Medicare program authorizing
18 statutes and regulations, including but not limited to, . . . the CMS memoranda issued
19 through the Health Plan Management System (HPMS).” (HPMS is one of the web-
20 based systems used by CMS to provide program information to MA Organizations and is
21 used to communicate program requirements.) In September 2007, Joseph Haferman, the
22 Chief Financial Officer of Secure Horizons, executed another Attestation renewing the
23 existing contract for PacifiCare of California (this time for calendar year 2008).
24 Haferman thereby attested that PacifiCare of California would comply “with all
25 applicable program authorizing statutes and regulations and program guidance that CMS
26 has issued to date and will issue during the remainder of 2007 and 2008, including but
27 not limited to, . . . the Medicare Managed Care Manual, and CMS memoranda issued
28 through the Health Plan Management System (HPMS).” In September 2008, Kenneth

1 Burdick, the Chief Executive Officer of Secure Horizons at the time, executed another
2 Attestation renewing the existing contract for PacifiCare of California (this time for
3 calendar year 2009). Burdick thereby attested that PacifiCare of California would
4 comply “with all applicable Medicare program authorizing statutes and regulations and
5 program guidance that CMS has issued to date and will issue during the remainder of
6 2008 and 2009, including but not limited to, . . . the Medicare Managed Care Manual,
7 and the CMS memoranda issued through the Health Plan Management System
8 (HPMS).” In September 2009, both Tom Paul, the Chief Executive Officer of Ovations,
9 and John Way, the Chief Financial Officer of Secure Horizons, executed an Attestation
10 renewing the existing contract for PacifiCare of California (this time for calendar year
11 2010). They thereby attested that PacifiCare of California would comply “with all
12 applicable Medicare program authorizing statutes and regulations and program guidance
13 that CMS has issued to date or will issue during the remainder of 2009 and 2010,
14 including but not limited to, . . . the Medicare Managed Care Manual, and the CMS
15 memoranda issued through the Health Plan Management System (HPMS).”

16 72. The United States hereby incorporates by reference as if they were recited herein
17 and attached hereto all of the agreements that all of the Defendant MA Organizations
18 entered into with CMS relating to their participation in Medicare Parts C and D for 2007
19 to present date. All of these agreements were, in all respects relevant to this Amended
20 Complaint, very similar, if not identical, to the agreements described in the preceding
21 paragraphs.

22 **II. The Electronic Data Interchange Agreements**

23 73. In addition, since at least 2003, MA Organizations and entities that submit risk
24 adjustment data on their behalf have been required to execute Electronic Data
25 Interchange (“EDI”) agreements prior to submitting risk adjustment data. These EDI
26 agreements are considered contracts by which the MA Organizations attest to the
27 accuracy of the data submitted. Even if another entity submits the data, the MA
28 Organizations are still responsible for the content of the submissions. See 2003 Regional

1 Risk Adjustment Training for Medicare+Choice Organizations Participant Guide, §
2 6.1; 2004 Regional Risk Adjustment Training for Medicare+Choice Organizations
3 Participant Guide, § 4.1; 2005 Risk Adjustment Data Basic Training for Medicare
4 Advantage Organizations Participant Guide § 4.1; 2006 Risk Adjustment Data Basic
5 Training for Medicare Advantage Organizations Participant Guide § 4.1; 2007 Risk
6 Adjustment Data Training for Medicare Advantage Organizations Participant Guide §
7 4.1; 2008 Risk Adjustment Technical Assistance for Medicare Advantage Organizations
8 Participant Guide § 4.1; Risk Adjustment 101 Participant Guide § 2.1 (2013). See also
9 Medicare Managed Care Manual, Chapter 7, § 111.6.1 (Rev. 57, 08-13-04); *id.* § 120.2.1
10 (Rev. 114, 06-07-13). By executing these EDI forms, the MA Organizations agree that
11 (i) they will be responsible for all risk adjustment data submitted to CMS by themselves,
12 their employees, and their agents; (ii) they will submit risk adjustment data that is
13 accurate, complete, and truthful based on best knowledge, information, and belief; (iii)
14 *they will research and correct risk adjustment data discrepancies*; and (iv) CMS has the
15 right to audit and confirm the risk adjustment data, including diagnoses, submitted by the
16 MA Organization and the right of access to the beneficiaries' medical records to conduct
17 such audits.

18 74. Each of the Defendant MA Organizations and Defendants Optum (and its
19 predecessor, Ingenix) and Ovations executed these EDI agreements and submitted them
20 to the MA Program in order to submit risk adjustment data to and receive risk adjustment
21 payments from the MA Program. Pursuant to the express terms of these EDI
22 agreements, these Defendants promised to submit valid risk adjustment data to the MA
23 Program and *to research and correct any data discrepancies*.

24 75. For instance, in 2005, Joseph Haferman, the Chief Financial Officer of Defendant
25 Ovations, executed and submitted to CMS an EDI agreement in order to obtain a
26 "submitter ID" permitting Ovations to submit risk adjustment data on behalf of various
27 of the Defendant MA Organizations. See Exhibit 8, attached hereto. By executing this
28 agreement and submitting it to CMS on behalf of the "eligible organization," which was

1 identified as “United Health Group – Ovations” on the form, Defendants UHG and
2 Ovations and the Defendant MA Organizations each agreed that they would (i) be
3 responsible for all risk adjustment data submitted to CMS by themselves, their
4 employees, or their agents; (ii) submit accurate and truthful risk adjustment data; and
5 (iii) *research and correct discrepancies with its risk adjustment data*. In addition, each
6 of them agreed that CMS could audit the data and have access to medical records to
7 conduct such audits.

8 76. Additional examples include the EDI agreements that James Higgins, the Finance
9 Director of PacifiCare Health Systems, executed on behalf of the following Defendant
10 MA Organizations or their predecessors: On September 14, 2006, Higgins signed EDI
11 agreements for UnitedHealthcare Insurance Company of New York (contract numbers
12 H5515 and R5342); UnitedHealthcare Insurance Company (the name for a number of
13 different MA Organizations with contract numbers R3175, R5287, H1717, H2803,
14 H2001, H2003, H2111, H2408, H0624, H0620, H1303, H1509, H3921, H0319, H5500,
15 H2406, H4106, H3812, H3209, H5918, H5697, H5754, H0315, H2228, H1108, H4522,
16 H5532, H5516, H5507, H5440, H5417, H5424, H5008, H5527, H2226 and H5518);
17 PacifiCare of Nevada, Inc. (contract number H2949); PacifiCare of Arizona, Inc.
18 (contract number H0303); UnitedHealthcare of Alabama, Inc. (contract number H0151);
19 UnitedHealthcare of the Midwest, Inc. (contract number H2654); Oxford Health Plans
20 (CT), Inc. (contract number H0752); Oxford Health Plans (NJ), Inc. (contract numbers
21 H3113 and H3107); UnitedHealthcare of Ohio, Inc. (contract numbers H3659 and
22 H5678); UHC of California, then known as PacifiCare of California (contract number
23 H0543); UnitedHealthcare of Florida, Inc. (contract number H1080 and H9011);
24 UnitedHealthcare Benefits of Texas, Inc. (contract number H4590); UnitedHealthcare of
25 Utah, Inc. (contract number H4604); UnitedHealthcare of Arizona, Inc. (contract number
26 H0316); UnitedHealthcare of Arkansas, Inc. (contract number H0401); UnitedHealthcare
27 of Georgia, Inc. (contract number H1111); UnitedHealthcare of Tennessee, Inc. (contract
28 number H4406); UnitedHealthcare of New England, Inc. (contract number H4102);

1 UnitedHealthcare of Oregon, Inc. (contract number H3805); UnitedHealthcare of
2 Oklahoma, Inc. (contract number H3749); UnitedHealthcare of New York, Inc. (contract
3 number H3379); Oxford Health Plans (NY), Inc. (contract number H3307);
4 UnitedHealthcare of the Midlands, Inc. (contract number H2802); UnitedHealthcare of
5 North Carolina, Inc. (contract number H3456); PacifiCare of Colorado, Inc. (contract
6 number H0609); Sierra Health and Life Insurance Company, Inc. (contract number
7 H5652); UnitedHealthcare of Washington, Inc. (contract number H5005);
8 UnitedHealthcare of Wisconsin, Inc. (contract number H5253); and UnitedHealthcare
9 Community Plan of Texas, L.L.C. (contract number H4514). On November 2, 2006,
10 Higgins signed EDI agreements for UnitedHealthcare of the Midwest, Inc. (contract
11 number H3887), UnitedHealthcare Insurance Company of New York (contract number
12 H4720), and UnitedHealthcare Insurance Company (contract numbers H9418, H8000,
13 and H4779). On December 13, 2006, Higgins signed EDI agreements for
14 UnitedHealthcare Insurance Company (the name for a number of MA Organizations
15 with contract numbers H0408, H1286, H3435, H7274, H7254, H0410, and H6717) and
16 UnitedHealthcare of Wisconsin, Inc. (contract number H7187). On January 1, 2007,
17 Higgins signed an EDI agreement for UnitedHealthcare Insurance Company (contract
18 number H5435). On January 14, 2008, Higgins signed an EDI agreement for
19 UnitedHealthcare Insurance Company (contract numbers H3912 and H0710). *See, e.g.,*
20 Exhibit 9, attached hereto (September 14, 2006 EDI for PacifiCare of California).
21 Pursuant to these EDI agreements, each of these MA Organizations agreed that it would
22 (i) be responsible for all risk adjustment data submitted to CMS by itself, its employees,
23 or its agents; (ii) submit accurate and truthful risk adjustment data; and (iii) *research and*
24 *correct discrepancies with its risk adjustment data*. In addition, each of them agreed that
25 CMS could audit the data and have access to medical records to conduct such audits.
26 77. In addition, on January 14, 2008, Patricia Rasmussen, who worked as a manager
27 for Ingenix, signed EDI agreements for UnitedHealthcare Insurance Company (contract
28 numbers H4971, H0710, H3912, H7698, H4971, H0710, H6793, H5749, and H6228),

1 UnitedHealthcare of New England, Inc. (contract number H1944), and UnitedHealthcare
2 Insurance Company of New York (contract number H4720). On June 18, 2008,
3 Rasmussen signed an EDI agreement for PacifiCare of Nevada, Inc. (contract number
4 H7949). In January 2009, Rasmussen signed additional EDI agreements for
5 UnitedHealthcare Insurance Company (contract numbers H7444, H8748, H2182, and
6 H1949). Pursuant to these EDI agreements, each of these MA Organizations agreed that
7 it would (i) be responsible for all risk adjustment data submitted to CMS by itself, its
8 employees, or its agents; (ii) submit accurate and truthful risk adjustment data; and (iii)
9 *research and correct discrepancies with its risk adjustment data*. In addition, each of
10 them agreed that CMS could audit the data and have access to medical records to
11 conduct such audits.

12 78. On December 15, 2010, Timothy Noel, who was Vice President of Finance for
13 UnitedHealthcare Medicare & Retirement, signed an EDI agreement for Oxford Health
14 Plans (CT), Inc. (contract number H0755). On September 22, 2011, Noel signed an EDI
15 agreement for UnitedHealthcare Insurance Company of New York (contract number
16 H1537). Pursuant to these EDI agreements, each of these MA Organizations agreed that
17 it would (i) be responsible for all risk adjustment data submitted to CMS by itself, its
18 employees, or its agents; (ii) submit accurate and truthful risk adjustment data; and (iii)
19 *research and correct discrepancies with its risk adjustment data*. In addition, each of
20 them agreed that CMS could audit the data and have access to medical records to
21 conduct such audits.

22 79. On April 27, 2011, Scott Theisen, the Chief Financial Officer of UnitedHealthcare
23 Medicare & Retirement, submitted an EDI agreement for PacifiCare of California, which
24 included all the same promises. On October 21, 2013, Theisen also signed EDI
25 agreements for Care Improvement Plus Wisconsin Insurance Company (contract number
26 H3794) and Care Improvement Plus South Central Insurance Co. (contract number
27 H5322). Accordingly, each of these Defendant MA Organizations also agreed that it
28 would (i) be responsible for all risk adjustment data (which includes encounter data)

1 submitted to CMS by itself, its employees, or its agents; (ii) submit accurate and truthful
2 risk adjustment data; and (iii) *research and correct discrepancies with its risk adjustment*
3 *data*. In addition, each of them agreed that CMS could audit the data and have access to
4 medical records to conduct such audits.

5 80. Patricia Rasmussen also executed and submitted an EDI agreement so that Ingenix
6 could submit risk adjustment data on behalf of the Defendant MA Organizations. *See*
7 Exhibit 10, attached hereto. By doing this, Ingenix also agreed that it would (i) be
8 responsible for all risk adjustment data submitted to CMS by itself, its employees, or its
9 agents; (ii) submit accurate and truthful risk adjustment data; and (iii) *research and*
10 *correct discrepancies with its risk adjustment data*. In addition, it agreed that CMS
11 could audit the data and have access to medical records to conduct such audits. When
12 Ingenix became OptumInsight, Rasmussen also notified CMS (that is, CMS' contractor
13 Palmetto, which helped operate RAPS) that its records should be updated to reflect that
14 OptumInsight was making the risk adjustment submissions for the Defendant MA
15 Organizations. Rasmussen identified OptumInsight as "part of Optum." *See* Exhibit 11,
16 attached hereto.

17 81. Jeffrey Dumcum, a Senior Vice President at Optum, also executed an EDI
18 agreement in May 2011 in order to submit risk adjustment data (also known as encounter
19 data) to the MA Program on behalf of many of the Defendant MA Organizations,
20 including those MA Organizations listed in a letter sent by Theisen to CMS' contractor
21 in April 2011. By doing this, Dumcum agreed that Optum would be responsible for the
22 data it submitted, submit valid data, and *research and correct data discrepancies*. *See*
23 Exhibit 12, attached hereto.

24 82. All EDI agreements executed by the UHG Managing Defendants on their own
25 behalf and on behalf of the Defendant MA Organizations are incorporated by reference
26 in this Amended Complaint as if they were recited in full and attached hereto.

III. The Ingenix/Optum Service Agreements

83. Depending on the time period, Ingenix or Optum entered into internal agreements with Ovation or UnitedHealthcare regarding the risk adjustment-related services that Ingenix or Optum would provide to the Defendant MA Organizations. These services included, among other things, the submission of risk adjustment data to CMS and the management of the Chart Review, Claims Verification, and RACCR Programs. These internal agreements further confirm the parties' joint and several obligations to the MA Program to submit accurate and truthful risk adjustment data and to investigate and correct any data discrepancies. These agreements also exemplify the UHG Managing Defendants' understanding of their joint and several obligations to the MA Program. All of these agreements are incorporated herein by reference.

84. By way of example, the Memorandum of Understanding ("MOU") entered into between Optum and UnitedHealthcare for risk adjustment-related services rendered by Optum in 2011 exemplifies the obligations undertaken by Optum not only to UnitedHealthcare but to the MA Program. That MOU was executed by Jerry Knutson, Chief Financial Officer of Optum, and Scott Theisen, Chief Financial Officer of UnitedHealthcare Medicare & Retirement. Paul Bihm at Optum, Relator Poehling at UnitedHealthcare Medicare & Retirement, and Jason Bainbridge at UnitedHealthcare Community & State were copied on the MOU. (The MOU referred to UnitedHealthcare Medicare & Retirement and UnitedHealthcare Community & State collectively as "UnitedHealth Group's Public and Senior Markets Group ("PSMG")." This is but one of many examples of the confusion that Defendants have created by the way they used names of groups and entities interchangeably.) Pursuant to the MOU, Optum was compensated for its services through an "intercompany allocation of fees paid pursuant to [a separate] Management Agreement."

85. Pursuant to this 2011 MOU, Optum provided many risk adjustment-related services to the Defendant MA Organizations, including, but not limited to the submission of risk adjustment data to CMS "pursuant to CMS risk adjustment rules and

requirements” and conducting the Chart Review, Claims Verification, and RACCR Programs. Importantly, Optum also agreed to (i) conduct “[p]rovider engagement and education regarding accurate and complete diagnostic coding and documentation”; (ii) “[c]ontribute (along with PSMG) to the level of accuracy and completeness of diagnostic coding for a respective population by identifying opportunities to improve documentation and coding for accuracy, facilitating improvement in accuracy by working directly with providers to improve documentation and coding practices, and executing the timely and accurate submission of claim coding information to CMS, thereby ensuring appropriate revenues are being paid by CMS for the underlying risk inherent within the member population;” (iii) “[m]onitor[] the appropriateness and accuracy of provider coding;” and (iv) conduct “[i]nternal validation testing of outlier providers, internal validation testing of other sample populations and support CMS validation requirements.”

86. The 2011 MOU also included a “Medicare Advantage Regulatory Requirements Appendix.” This Appendix included Optum’s agreement to (i) “comply with all applicable federal and Medicare laws, regulations, and CMS instructions, including but not limited to . . . federal laws and regulations designed to prevent or ameliorate fraud, waste, and abuse, including but not limited to, applicable provisions of federal criminal law [and] the False Claims Act (31 U.S.C. § 3729 et seq.);” (ii) “perform services and provide the products set forth in the MOU in a manner consistent with and in compliance with [the Defendant MA Organizations’] obligations under the CMS Contact[s]; “ and (iii) certify in writing that the risk adjustment data it submitted to CMS was “accurate, complete, and truthful, based on [its] best knowledge, information and belief.” The Appendix further specified that UnitedHealthcare and the Defendant MA Organizations were accountable to CMS for fulfilling their regulatory and contractual obligations under the MA Program, including those that they had delegated to Optum under the MOU and, thus, that they were responsible for overseeing and monitoring Optum’s performance under the MOU.

DEFENDANTS' DATA INTEGRITY OBLIGATIONS

I. Obligation to Submit Valid Diagnoses

87. MA Organizations are entitled to risk adjustment payments based on the diagnosis codes that they submit to CMS *only* if the codes are from face-to-face medical encounters between the Medicare beneficiary and provider, the encounter occurred during the relevant date of service year, the provider was of a type and specialty acceptable for risk adjustment purposes, and at the time of the encounter, the provider documented the medical conditions identified by the diagnosis codes in the medical record based on acceptable documentation. In addition, codes should be based on documented conditions that require or affect patient care treatment or management. *See* Medicare Managed Care Manual, Chapter 7, Exhibit 30 (August 13, 2004) (stating that diagnosis codes submitted for risk adjustment payments should be for documented conditions that “require or affect patient care treatment or management”). *See also* 2008 Risk Adjustment Data Technical Assistance for Medicare Advantage Organizations Participant Guide (“2008 RA Participation Guide”) at § 6.4.1.

88. Risk adjustment claims are valid, and the resulting risk adjustment payments are therefore proper and justified, only to the extent that the diagnosis codes submitted by the MA Organizations are valid. The diagnoses must be coded according to the *International Classification of Diseases (ICD) Clinical Modification Guidelines for Coding and Reporting* (“ICD-9-CM” & “ICD-10-CM”) and documented with sufficient clinical specificity. *See* Medicare Managed Care Manual, Chapter 7, Exhibit 30 (August 13, 2004). In addition, codes cannot be submitted for diagnoses that are only probable or suspected, for diagnoses that are questionable, or for a condition that the provider is trying to rule out. *Id.*

89. Moreover, all diagnosis codes submitted by MA Organizations must be supported by medical record documentation. The 2004 Medicare Managed Care Manual stated that “M+C organizations [now known as MA Organizations] must submit risk adjustment data that are substantiated by the physician or provider’s full medical record.” Medicare

1 codes identifying those conditions, and give all of those codes to the UHG Managing
2 Defendants. But, the UHG Managing Defendants selectively utilized results of these
3 chart reviews – that is, the coders’ list of diagnosis codes – for the sole purpose of
4 identifying diagnosis codes that the providers had not reported and submitting ADDS for
5 additional risk adjustment payments. They did not utilize the coders’ lists of diagnosis
6 codes to determine if the providers had reported codes that were not supported by their
7 own medical records. If the UHG Managing Defendants had looked both ways and
8 deleted these unsupported and, thus, invalid provider-reported codes, their national Chart
9 Review Program would have been far less lucrative.

10 165. The UHG Managing Defendants’ national Chart Review Program was their largest
11 risk adjustment revenue-generating program. This program was started in 2005 as an
12 outgrowth of the chart review program that PacifiCare was already conducting.
13 Dumcum, Will, and other former PacifiCare employees became key participants in
14 designing, implementing, and managing the United Managing Defendants’ revenue-
15 generating national Chart Review Program. Will was the Program Manager for the
16 program.

17 166. During the first few years of the program, hundreds of thousands of charts were
18 reviewed each year in order to mine them for additional diagnosis codes. In 2008, The
19 Coding Source (“TCS”), a chart review/diagnosis coding vendor retained by Ingenix,
20 reported to Carol Thompson at Ingenix that “[s]ince 2005, TCS has partnered with
21 PacifiCare-United and Ingenix to support your HHC initiatives. TCS has successfully
22 completed 460,000 chart reviews for multiple United regions.”

23 167. In 2009, the UHG Managing Defendants significantly expanded the size of the
24 national Chart Review Program by providing Ingenix with the funds to acquire a coding
25 vendor called AIM Healthcare Services, Inc. and integrating Ingenix’s operations in
26 Santa Ana, California, and the AIM coding operations in Tennessee, and by providing
27 Ingenix with the funds to develop an in-house chart review computer database system
28 called ChartSync so that Ingenix’s in-house coders and third-party coding vendors could

1 electronically review medical records and electronically record the coding results of their
2 reviews. At or about the same time, the UHG Managing Defendants also expanded the
3 size of the Chart Review Program by providing Ingenix with the funds to open offices in
4 foreign countries (the Philippines and India) where it could hire foreign workers to
5 review beneficiaries' medical records in order to try to find additional diagnosis codes.

6 168. Due to the increased resources devoted to the Chart Review Program, the number
7 of medical records reviewed in the hunt for additional codes significantly increased over
8 time. For the first few years of the Chart Review Program, between 500,000 and
9 600,000 charts were reviewed each year. According to a presentation by Dumcum,
10 600,000 charts were reviewed in 2006 and, as of September 21, 2007, 400,000 charts had
11 been reviewed so far that year with 200,000 charts remaining for review during the
12 fourth quarter of 2007.

13 169. By 2010, the number of chart reviews had increased substantially to
14 approximately 850,000 charts for that year. For 2011 to 2014, approximately 1.5 million
15 charts were reviewed each year. The Government believes that, after 2014, the national
16 Chart Review Program was most likely similar in size.

17 170. As part of this national Chart Review Program, the UHG Managing Defendants
18 focused primarily on the review of charts from providers paid on a fee-for-service basis.
19 Ingenix and then Optum or their vendors obtained medical records from thousands of
20 these providers throughout the United States. They or their vendors sent these medical
21 records to coders that they employed in Tennessee, India, and the Philippines. They also
22 hired coding vendors to review these medical records. Those vendors were located in
23 various locations within and outside of the United States.

24 171. Physician groups owned by one or more of the UHG Managing Defendants also
25 had chart review programs. WellMed had a group called DataRaps that conducted
26 reviews of its physicians' medical records for patients in one or more Defendant MA
27 Organizations' MA plans. Southwest Medical Associates conducted some of its own
28

347. By virtue of the said false or fraudulent claim, the United States incurred damages and therefore is entitled to multiple damages under the False Claims Act, plus a civil penalty for each violation of the Act.

THIRD CLAIM FOR RELIEF

False Claims Act: Making or Using False Records or Statements

31 U.S.C. § 3729(a)(1)(B) (formerly 31 U.S.C. § 3729(a)(2))

348. The United States repeats and re-alleges the allegations contained in Paragraphs 1 to 340 above as though they are fully set forth herein.

349. Defendants violated 31 U.S.C. § 3729(a)(1)(B) as follows: Defendants knowingly (as “knowingly” is defined by 31 U.S.C. § 3729(b)(1)) made, used, or caused to be made or used, a false record or statement material to a false or fraudulent claim. Specifically, Defendants knowingly made, used, or caused to be made or used a false Risk Adjustment Attestation material to a false or fraudulent claim for risk adjustment payments from the Medicare Program.

350. Defendants violated former 31 U.S.C. § 3729(a)(2) as follows: Defendants knowingly made, used, or caused to be made or used, a false record or statement to get a false or fraudulent claim paid or approved by the Government. Specifically, Defendants knowingly made, used, or caused to be made or used a false Risk Adjustment Attestation to get a false or fraudulent claim for risk adjustment payments paid or approved by the Medicare Program.

351. By virtue of the said false record or statement, the United States incurred damages and therefore is entitled to multiple damages under the False Claims Act, plus a civil penalty for each violation of the Act.

FOURTH CLAIM FOR RELIEF

False Claims Act: Reverse False Claims

31 U.S.C. § 3729(a)(1)(G) (formerly 31 U.S.C. § 3729(a)(7))

352. The United States repeats and re-alleges the allegations contained in Paragraphs 1 to 340 above as though they are fully set forth herein.

353. Defendants violated the first part of 31 U.S.C. § 3729(a)(1)(G) as follows: Defendants knowingly (as “knowingly” is defined by 31 U.S.C. § 3729(b)(1)) made, used, or caused to be made or used, a false record or statement material to an obligation to pay or transmit money or property to the Government. Specifically, Defendants knowingly made, used, or caused to be made or used a false Risk Adjustment Attestation material to an obligation to repay risk adjustment payments to which they were not entitled from the Medicare Program.

354. Defendants also violated former 31 U.S.C. § 3729(a)(7) as follows: Defendants knowingly (as “knowingly” is defined by 31 U.S.C. § 3729(b)(1)) made, used, or caused to be made or used, a false record or statement to conceal, avoid or decrease an obligation to pay or transmit money or property to the Government. Specifically, Defendants knowingly made, used, or caused to be made or used, a false Risk Adjustment Attestation to conceal, avoid or decrease an obligation to repay risk adjustment payments to which they were not entitled from the Medicare Program.

355. By virtue of the said false record, statement, and other acts of concealment and improper avoidance, the United States incurred damages and therefore is entitled to multiple damages under the False Claims Act, plus a civil penalty for each violation of the Act.

FIFTH CLAIM FOR RELIEF

Unjust Enrichment

356. The United States repeats and re-alleges the allegations contained in Paragraphs 1 to 340 above as though they are fully set forth herein.

357. Defendants have received money from the United States to which Defendants were not entitled, which unjustly enriched Defendants, and for which Defendants must make restitution. Defendants received such money by claiming and retaining Medicare risk adjustment payments based on invalid risk adjustment data. In equity and good conscience, such money belongs to the United States and to the Medicare Program.

1 358. The United States is entitled to recover such money from Defendants in an amount
2 to be determined at trial.

3 **SIXTH CLAIM FOR RELIEF**

4 **Payment by Mistake**

5 359. The United States repeats and re-alleges the allegations contained in Paragraphs 1
6 to 340 above as though they are fully set forth herein.

7 360. The United States paid money to Defendants as a result of a mistaken
8 understanding. Specifically, the United States paid Defendants claims for risk
9 adjustment payments under the mistaken understanding that such claims were based on
10 valid risk adjustment data. Had the United States known the truth, it would not have
11 paid such claims. Payment was therefore by mistake.

12 361. As a result of such mistaken payments, the United States has sustained damages
13 for which Defendants are liable in the amount to be determined at trial.

14 **PRAYER**

15 **WHEREFORE**, the United States requests that judgment be entered in its favor
16 and against Defendants as follows:

17 362. On Claims I, II, III, and IV (False Claims Act), against all Defendants jointly and
18 severally, for the amount of the United States' damages, trebled as required by law,
19 together with the maximum civil penalties allowed by law, costs, post-judgment interest,
20 and such other and further relief as the Court may deem appropriate;

21 363. On Claim V (Unjust Enrichment), against all Defendants jointly and severally, for
22 an amount equal to the monies that Defendants obtained from the United States without
23 right and by which Defendants have been unjustly enriched, plus costs, pre- and post-
24 judgment interest, and such other and further relief as the Court may deem appropriate;
25 and

26 364. On Claim VI (Payment By Mistake), against Defendants for an amount equal to
27 the United States' damages, plus costs, pre- and post-judgment interest, and such other
28 and further relief as the Court may deem appropriate.

DEMAND FOR JURY TRIAL

The United States of America hereby demands a trial by jury.

Dated: November 17, 2017

EXHIBIT 1

Contract with Eligible Medicare Advantage (MA) Organization Pursuant to
 Sections 1851 through 1859 of the Social Security Act for the Operation
 of a Medicare Advantage Coordinated Care Plan(s)

CONTRACT 14-10251.1

Between

Centers for Medicare & Medicaid Services (hereinafter referred to as CMS)

and

UNITEDHEALTHCARE PLAN OF THE RIVER VALLEY, INC.,
 (hereinafter referred to as the MA Organization)

CMS and the MA Organization, an entity which has been determined to be an eligible Medicare Advantage Organization by the Administrator of the Centers for Medicare & Medicaid Services under 42 CFR 422.503, agree to the following for the purposes of sections 1851 through 1859 of the Social Security Act (hereinafter referred to as the Act).

(NOTE: Citations indicated in brackets are placed in the text of this contract to note the regulatory authority for certain contract provisions. All references to Part 422 are to 42 CFR Part 422.)

Final March 31, 2019

Article I

Term of Contract

The term of this contract shall be from the date of signature by CMS' authorized representative through December 31, 2010, after which this contract may be renewed for successive one-year periods in accordance with 42 CFR 422.505(c) and as discussed in Paragraph A in Article VII below. [422.505]

This contract governs the respective rights and obligations of the parties as of the effective date set forth above, and supersedes any prior agreements between the MA Organization and CMS as of such date. MA organizations offering Part D also must execute an Addendum to the Medicare Managed Care Contract Pursuant to Sections 1860D-1 through 1860D-42 of the Social Security Act for the Operation of a Voluntary Medicare Prescription Drug Plan (hereafter the "Part D Addendum"). For MA Organizations offering MA-PD plans, the Part D Addendum governs the rights and obligations of the parties relating to the provision of Part D benefits, in accordance with its terms, as of its effective date.

Article II

Coordinated Care Plan

A. The Medicare Advantage Organization agrees to operate one or more coordinated care plans as defined in 42 CFR 422.4(a)(1)(ii-iv), including at least one MA-PD plan as required under 42 CFR 422.4(c), as described in its final Plan Benefit Package (PBP) bid submission (benefit and price bid) proposal as approved by CMS and as attested to in the Medicare Advantage Attestation of Benefit Plan and Price, and in compliance with the requirements of this contract and applicable Federal statutes, regulations, and policies (e.g., policies as described in the Call Letter, Medicare Managed Care Manual, etc.).

B. Except as provided in paragraph (C) of this Article, this contract is deemed to incorporate any changes that are required by statute to be implemented during the term of the contract and any regulations or policies implementing or interpreting such statutory provisions.

C. CMS will not implement, other than at the beginning of a calendar year, requirements under 42 CFR Part 422 that impose a new significant cost or burden on MA organizations or plans, unless a different effective date is required by statute. [422.521]

D. This contract is in no way intended to supersede or modify 42 CFR, Part 422. Failure to reference a regulatory requirement in this contract does not affect the applicability of such requirements to the MA organization and CMS.

E. The MA organization must comply with all applicable requirements as described in CMS regulations and guidance implementing the Medicare Improvements for Patients and Providers Act of 2008.

Article III

Final Amended 2009

Functions To Be Performed By Medicare Advantage Organization

A. PROVISION OF BENEFITS

1. The MA Organization agrees to provide enrollees in each of its MA plans the basic benefits as required under §422.101 and, to the extent applicable, supplemental benefits under §422.102 and as established in the MA Organization's final benefit and price bid proposal as approved by CMS and listed in the MA Organization Plan Assertion of Benefit Plan and Price, which is attached to this contract. The MA Organization agrees to provide access to such benefits as required under subpart C in a manner consistent with professionally recognized standards of health care and according to the access standards stated in §422.112.

2. The MA Organization agrees to provide post-hospital extended care services, should an MA enrollee elect such coverage, through a skilled nursing home facility according to the requirements of section 1852(f) of the Act and §422.133. A skilled nursing home facility is a facility in which an MA enrollee resided at the time of admission to the hospital, a facility that provides services through a continuing care retirement community, a facility in which the spouse of the enrollee is residing at the time of the enrollee's discharge from the hospital, or hospital, or wherever the enrollee resides immediately before admission for extended care services.

[422.133; 422.504(a)(3)]

B. ENROLLMENT REQUIREMENTS

1. The MA Organization agrees to accept new enrollments, make enrollments effective, process voluntary disenrollments, and limit involuntary disenrollments, as provided in subpart B of part 422.

2. The MA Organization shall comply with the provisions of §422.110 concerning prohibitions against discrimination in beneficiary enrollment, other than in enrolling eligible beneficiaries in a CMA-approved special needs plan that exclusively enrolls special needs individuals as consistent with §§422.2, 422.4(a)(1)(c) and 422.52.

[422.504(a)(2)]

C. BENEFICIARY PROTECTIONS

1. The MA Organization agrees to comply with all requirements in subpart M of part 422, governing coverage determinations, grievances, and appeals. [422.504(a)(7)]

2. The MA Organization agrees to comply with the confidentiality and enrollee record accuracy requirements in §422.118.

3. **Beneficiary Financial Protections.** The MA Organization agrees to comply with the following requirements:

(a) Each MA Organization must adopt and maintain arrangements satisfactory to CMS to protect its enrollees from incurring liability for payment of any fees that are the legal obligation of the MA Organization. To meet this requirement the MA Organization must—

(i) Ensure that all contractual or other written arrangements with providers prohibit the Organization's providers from holding any beneficiary enrollee liable for payment of any fees that are the legal obligation of the MA Organization, and

(ii) Indemnify the beneficiary enrollee for payment of any fees that are the legal obligation of the MA Organization for services furnished by providers that do not contract, or that have not otherwise entered into an agreement with the MA Organization, to provide services to the organization's beneficiary enrollees. [422.504(g)(1)]

(b) The MA Organization must provide for continuation of enrollee health care benefits-

(i) For all enrollees, for the duration of the contract period for which CMS payments have been made; and

(ii) For enrollees who are hospitalized on the date its contract with CMS terminates, or, in the event of the MA Organization's insolvency, through the date of discharge. [422.504(g)(2)]

(c) In meeting the requirements of this section (C), other than the provider contract requirements specified in paragraph (C)(3)(a) of this Article, the MA Organization may use--

(i) Contractual arrangements;

(ii) Insurance acceptable to CMS;

(iii) Financial reserves acceptable to CMS; or

(iv) Any other arrangement acceptable to CMS. [422.504(g)(3)]

D. PROVIDER PROTECTIONS

1. The MA Organization agrees to comply with all applicable provider requirements in 42 CFR Part 422 Subpart E, including provider certification requirements, anti-discrimination requirements, provider participation and consultation requirements, the prohibition on interference with provider advice, limits on provider indemnification, rules governing payments to providers, and limits on physician incentive plans. [422.504(h)(6)]

2. Prompt Payment.

(a) The MA Organization must pay 95 percent of "clean claims" within 30 days of receipt if they are claims for covered services that are not furnished under a written agreement between the organization and the provider.

(i) The MA Organization must pay interest on clean claims that are not paid within 30 days in accordance with sections 1816(c)(2) and 1842(e)(2) of the Act.

(ii) All other claims from non-contracted providers must be paid or denied within 60 calendar days from the date of the request. [422.520(a)]

(b) Contracts or other written agreements between the MA Organization and its providers must contain a prompt payment provision, the terms of which are developed and agreed to by both the MA Organization and the relevant provider. [422.520(b)]

(c) If CMS determines, after giving notice and opportunity for hearing, that the MA Organization has failed to make payments in accordance with subparagraph (2)(a) of this section, CMS may provide--

(i) For direct payment of the sums owed to providers; and

(ii) For appropriate reduction in the amounts that would otherwise be paid to the MA Organization, to reflect the amounts of the direct payments and the cost of making those payments. [422.520(c)]

E. QUALITY IMPROVEMENT PROGRAM

1. The MA Organization agrees to operate, for each plan that it offers, an ongoing quality improvement program as stated in accordance with Section 1852(e) of the Social Security Act and 42 CFR 422.152.

2. Chronic Care Improvement Program

(a) Each MA organization must have a chronic care improvement program and must establish criteria for participation in the program. The CCIP must have a method for identifying enrollees with multiple or sufficiently severe chronic conditions who meet the criteria for participation in the program and a mechanism for monitoring enrollees' participation in the program.

(b) Plans have flexibility to choose the design of their program, however, in addition to meeting the requirements specified above, the CCIP selected must be relevant to the plan's MA population. MA organizations are required to submit annual reports on their CCIP program to CMS.

3. Performance Measurement and Reporting: The MA Organization shall measure performance under its MA plans using standard measures required by CMS, and report (at the organization level) its performance to CMS. The standard measures required by CMS during the term of this contract will be uniform data collection and reporting instruments, to include the Health Plan and Employer Data Information Set (HEDIS), Consumer Assessment of Health Plan Satisfaction (CAHPS) survey, and Health Outcomes Survey (HOS). These measures will address clinical areas, including effectiveness of care, enrollee perception of care and use of services, and non-clinical areas including access to and availability of services, appeals and grievances, and organizational characteristics. [422.152(b)(1), (e)]

4. Utilization Review

(a) An MA Organization for an MA coordinated care plan must use written protocols for utilization review and policies and procedures must reflect current standards of medical practice in processing requests for initial or continued authorization of services and have in effect mechanisms to detect both underutilization and overutilization of services. [422.152(b)]

(b) For MA regional preferred provider organizations (RPPOs) and MA local preferred provider organizations (LPPOs) that are offered by an organization that is not licensed or organized under State law as an HMOs, if the MA Organization uses written protocols for utilization review, those policies and procedures must reflect current standards of medical practice in processing requests for initial or continued authorization of services and include mechanisms to evaluate utilization of services and to inform enrollees and providers of services of the results of the evaluation. [422.152(c)]

5. Information Systems

(a) The MA Organization must:

(i) Maintain a health information system that collects, analyzes and integrates the data necessary to implement its quality improvement program,

(ii) Ensure that the information entered into the system (particularly that received from providers) is reliable and complete,

(iii) Make all collected information available to CMS. [422.152(f)(1)]

6. External Review

The MA Organization will comply with any requests by Quality Improvement Organizations to review the MA Organization's medical records in connection with appeals of discharges from hospitals, skilled nursing facilities, and home health agencies.

F. COMPLIANCE PLAN

The MA Organization agrees to implement a compliance plan in accordance with the requirements of §422.503(b)(4)(vi) [422.503(b)(4)(vi)]

G. COMPLIANCE DEEMED ON THE BASIS OF ACCREDITATION

CMS may deem the MA Organization to have met the quality improvement requirements of §1852(e) of the Act and §422.152, the confidentiality and accuracy of enrollee records requirements of §1852(f) of the Act and §422.118, the anti-discrimination requirements of §1852(b) of the Act and §422.110, the access to services requirements of §1852(d) of the Act and §422.112, and the advance directives requirements of §1852(i) of the Act and §422.128, the provider participation requirements of §1852(j) of the Act and 42 CFR Part 422, Subpart J, and the applicable requirements described in §422.165, if the MA Organization is fully accredited (and periodically reaccredited) by a private, national accreditation organization approved by CMS and the accreditation organization used the standards approved by CMS for the purposes of assessing the MA Organization's compliance with Medicare requirements. The provisions of §422.156 shall govern the MA Organization's use of deemed status to meet MA program requirements.

H. PROGRAM INTEGRITY

1. The MA Organization agrees to provide notice based on best knowledge, information, and belief to CMS of any integrity items related to payments from governmental entities, both federal and state, for healthcare or prescription drug services. These items include any investigations, legal actions or matters subject to arbitration brought involving the MA Organization (or MA Organization's firm if applicable) and its subcontractors (excluding contracted network providers), including any key management or executive staff, or any major shareholders (5% or more), by a government agency (state or federal) on matters relating to payments from governmental entities, both federal and state, for healthcare and/or prescription drug services. In providing the notice, the sponsor shall keep the government informed of when the integrity item is initiated and when it is closed. Notice should be provided of the details concerning any resolution and monetary payments as well as any settlement agreements or corporate integrity agreements.

2. The MA Organization agrees to provide notice based on best knowledge, information, and belief to CMS in the event the MA Organization or any of its subcontractors is criminally convicted or has a civil judgment entered against it for fraudulent activities or is sanctioned under any Federal program involving the provision of health care or prescription drug services.

I. MARKETING

1. The MA Organization may not distribute any marketing materials, as defined in 42 CFR 422.80(b) and in the Marketing Materials Guidelines for Medicare Advantage-Prescription Drug Plans and Prescription Drug Plans (Medicare Marketing Guidelines), unless they have been filed

with and nor disapproved by CMS in accordance with §422.80. The file and use process set out at §422.80(a)(2) must be used, unless the MA organization notifies CMS that it will not use this process.

2. CMS and the MA Organization shall agree upon language setting forth the benefits, exclusions and other language of the Plan. The MA Organization bears full responsibility for the accuracy of its marketing materials. CMS, in its sole discretion, may order the MA Organization to print and distribute the agreed upon marketing materials, in a format approved by CMS. The MA Organization must disclose the information to each enrollee electing a plan as outlined in 42 CFR 422.111.

3. The MA Organization agrees that any advertising material, including that labeled promotional material, marketing materials, or supplemental literature, shall be truthful and not misleading. All marketing materials must include the Contract number. All membership identification cards must include the Contract number on the front of the card.

4. The MA Organization must comply with the Medicare Marketing Guidelines, as well as all applicable statutes and regulations, including and without limitation Section 1851(h) of the Act and 42 CFR §§422.80, 422.111 and 422.50. Failure to comply may result in sanctions as provided in 42 CFR Part 422 Subpart O.

Article IV

CMS Payment to MA Organization

A. The MA Organization agrees to develop its annual benefit and price bid proposal and submit to CMS all required information on premiums, benefits, and cost sharing, as required under 42 CFR Part 422 Subpart F. ~~§422.504(a)(10)~~

B. Methodology. CMS agrees to pay the MA Organization under this contract in accordance with the provisions of section 1855 of the Act and 42 CFR Part 422 Subpart G. ~~§422.504(a)(9)~~

C. Attestation of payment data (Attachments A, B, and C)

As a condition for receiving a monthly payment under paragraph B of this article, and 42 CFR Part 422 Subpart G, the MA Organization agrees that its chief executive officer (CEO), chief financial officer (CFO), or an individual delegated with the authority to sign on behalf of one of these officers, and who reports directly to such officer, must request payment under the contract on the forms attached hereto as Attachment A (enrollment attestation) and Attachment B (risk adjustment data) which attest to *(based on best knowledge, information and belief, as of the date specified on the attestation form)* the accuracy, completeness, and truthfulness of the data identified on these attachments. The Medicare Advantage Plan Attestation of Benefit Plan and Price must be signed and attached to the executed version of this contract.

1. Attachment A requires that the CEO, CFO, or an individual delegated with the authority to sign on behalf of one of these officers, and who reports directly to such officer, must attest based on best knowledge, information, and belief that each enrollee for whom the MA Organization is requesting payment is validly enrolled, or was validly enrolled during the period for which payment is requested, in an MA plan offered by the MA Organization. The MA Organization

shall submit completed enrollment attestation forms to CMS, or its contractor, on a monthly basis. (NOTE: The forms included as attachments to this contract are for reference only. CMS will provide instructions for the completion and submission of the forms in separate documents. MA Organizations should not take any action on the forms until appropriate CMS instructions are made available.)

2. Attachment B requires that the CEO, CFO, or an individual delegated with the authority to sign on behalf of one of these officers, and who reports directly to such officer, must *attest to (based on best knowledge, information and belief, as of the date specified on the attestation form) that the risk adjustment data it submits to CMS under §422.310 are accurate, complete, and truthful*. The MA Organization shall make annual attestations to this effect for risk adjustment data on Attachment B and according to a schedule to be published by CMS. If such risk adjustment data are generated by a related entity, contractor, or subcontractor of an MA Organization, such entity, contractor, or subcontractor must also attest to (based on best knowledge, information and belief, as of the date specified on the attestation form) the accuracy, completeness, and truthfulness of the data. [422.504(b)]

3. The Medicare Advantage Plan Attestation of Benefit Plan and Price (an example of which is attached hereto as Attachment C) requires that the CEO, CFO, or an individual delegated with the authority to sign on behalf of one of these officers, and who reports directly to such officer, must attest *(based on best knowledge, information and belief, as of the date specified on the attestation form) that the information and documentation comprising the bid submission proposal is accurate, complete, and truthful and fully conforms to the Bid Form and Plan Benefit Package requirements, and that the benefits described in the CMS-approved proposed bid submission agree with the benefit package the MA Organization will offer during the period covered by the proposed bid submission*. This document is being sent separately to the MA Organization and must be signed and attached to the executed version of this contract, and is incorporated herein by reference. [422.504(d)]

Article V

MA Organization Relationship with Related Entities, Contractors, and Subcontractors

A. Notwithstanding any relationship(s) that the MA Organization may have with related entities, contractors, or subcontractors, the MA Organization maintains full responsibility for adhering to and otherwise fully complying with all terms and conditions of its contract with CMS. [422.504(i)(1)]

B. The MA Organization agrees to require all related entities, contractors, or subcontractors to agree that--

(1) HHS, the Comptroller General, or their designees have the right to inspect, evaluate, and audit any pertinent contracts, books, documents, papers, and records of the related entity(s), contractor(s), or subcontractor(s) involving transactions related to this contract, and

(2) HHS, the Comptroller General, or their designees have the right to inspect, evaluate, and audit any pertinent information for any particular contract period for 10 years from the final

date of the contract period or from the date of completion of any audit, whichever is later
[422.504(i)(2)]

C. The MA Organization agrees that all contracts or written arrangements into which the MA Organization enters with providers, related entities, contractors, or subcontractors (first tier and downstream entities) shall contain the following elements:

- (1) Enrollee protection provisions that provide—
 - (a) Consistent with Article III(C), arrangements that prohibit providers from holding an enrollee liable for payment of any fees that are the legal obligation of the MA Organization; and
 - (b) Consistent with Article III(C), provision for the continuation of benefits.
 - (2) Accountability provisions that indicate that the MA Organization may only delegate activities or functions to a provider, related entity, contractor, or subcontractor in a manner consistent with requirements set forth at paragraph D of this article.
 - (3) A provision requiring that any services or other activity performed by a related entity, contractor or subcontractor in accordance with a contract or written agreement between the related entity, contractor, or subcontractor and the MA Organization will be consistent and comply with the MA Organization's contractual obligations to CMS.
- [422.504(i)(3)]

D. If any of the MA Organization's activities or responsibilities under this contract with CMS is delegated to other parties, the following requirements apply to any related entity, contractor, subcontractor, or provider:

- (1) Written arrangements must specify delegated activities and reporting responsibilities
 - (2) Written arrangements must either provide for revocation of the delegation activities and reporting requirements or specify other remedies in instances where CMS or the MA Organization determine that such parties have not performed satisfactorily.
 - (3) Written arrangements must specify that the performance of the parties is monitored by the MA Organization on an ongoing basis
 - (4) Written arrangements must specify that either—
 - (a) The credentials of medical professionals affiliated with the party or parties will be either reviewed by the MA Organization; or
 - (b) The credentialing process will be reviewed and approved by the MA Organization and the MA Organization must audit the credentialing process on an ongoing basis.
 - (5) All contracts or written arrangements must specify that the related entity, contractor, or subcontractor must comply with all applicable Medicare laws, regulations, and CMS instructions
- [422.504(i)(4)]

E. If the MA Organization delegates selection of the providers, contractors, or subcontractors to another organization, the MA Organization's written arrangements with that organization must state that the MA Organization retains the right to approve, suspend, or terminate any such arrangement. [422.504(i)(5)]

F. As of the date of this contract and throughout its term, the MA Organization

- (1) Agrees that any physician incentive plan it operates meets the requirements of §422.208, and
- (2) Has assured that all physicians and physician groups that the MA Organization's physician incentive plan places at substantial financial risk have adequate stop-loss protection in accordance with §422.208(f) [422.208]

Article VI

Records Requirements

A. MAINTENANCE OF RECORDS

- 1. The MA Organization agrees to maintain for 10 years books, records, documents, and other evidence of accounting procedures and practices that--
 - (a) Are sufficient to do the following:
 - (i) Accommodate periodic auditing of the financial records (including data related to Medicare utilization, costs, and computation of the benefit and price bid) of the MA Organization.
 - (ii) Enable CMS to inspect or otherwise evaluate the quality, appropriateness and timeliness of services performed under the contract, and the facilities of the MA Organization.
 - (iii) Enable CMS to audit and inspect any books and records of the MA Organization that pertain to the ability of the organization to bear the risk of potential financial losses, or to services performed or determinations of amounts payable under the contract.
 - (iv) Properly reflect all direct and indirect costs claimed to have been incurred and used in the preparation of the benefit and price bid proposal.
 - (v) Establish component rates of the benefit and price bid for determining additional and supplementary benefits.
 - (vi) Determine the rates utilized in setting premiums for State insurance agency purposes and for other government and private purchasers; and
 - (b) Include at least records of the following:
 - (i) Ownership and operation of the MA Organization's financial, medical, and other record keeping systems
 - (ii) Financial statements for the current contract period and six prior periods.
 - (iii) Federal income tax or informational returns for the current contract period and six prior periods
 - (iv) Asset acquisition, lease, sale, or other action
 - (v) Agreements, contracts (including, but not limited to, with related or unrelated prescription drug benefit managers) and subcontracts
 - (vi) Franchise, marketing, and management agreements.
 - (vii) Schedules of charges for the MA Organization's fee-for-service patients.
 - (viii) Matters pertaining to costs of operations.
 - (ix) Amounts of income received, by source and payment.
 - (x) Cash flow statements.
 - (xi) Any financial reports filed with other Federal programs or State authorities.
- [422.504(d)]

2. Access to facilities and records. The MA Organization agrees to the following:

(a) The Department of Health and Human Services (HHS), the Comptroller General, or their designee may evaluate, through inspection or other means--

(i) The quality, appropriateness, and timeliness of services furnished to Medicare enrollees under the contract;

(ii) The facilities of the MA Organization; and

(iii) The enrollment and disenrollment records for the current contract period and ten prior periods.

(b) HHS, the Comptroller General, or their designees may audit, evaluate, or inspect any books, contracts, medical records, documents, papers, patient care documentation, and other records of the MA Organization, related entity, contractor, subcontractor, or its transferee that pertain to any aspect of services performed, reconciliation of benefit liabilities, and determination of amounts payable under the contract, or as the Secretary may deem necessary to enforce the contract.

(c) The MA Organization agrees to make available, for the purposes specified in section 4(A) of this article, its premises, physical facilities and equipment, records relating to its Medicare enrollees, and any additional relevant information that CMS may require, in a manner that meets CMS record maintenance requirements.

(d) HHS, the Comptroller General, or their designee's right to inspect, evaluate, and audit extends through 10 years from the final date of the contract period or completion of audit, whichever is later unless:

(i) CMS determines there is a special need to retain a particular record or group of records for a longer period and notifies the MA Organization at least 30 days before the normal disposition date;

(ii) There has been a termination, dispute, or fraud or similar fault by the MA Organization, in which case the retention may be extended to 10 years from the date of any resulting final resolution of the termination, dispute, or fraud or similar fault; or

(iii) HHS, the Comptroller General, or their designee determines that there is a reasonable possibility of fraud, in which case they may inspect, evaluate, and audit the MA Organization at any time. [422.504(e)]

B. REPORTING REQUIREMENTS

1. The MA Organization shall have an effective procedure to develop, compile, evaluate, and report to CMS, to its enrollees, and to the general public, at the times and in the manner that CMS requires, and while safeguarding the confidentiality of the doctor-patient relationship, statistics and other information as described in the remainder of this section (B). [422.516(a)]

2. The MA Organization agrees to submit to CMS certified financial information that must include the following:

(a) Such information as CMS may require demonstrating that the organization has a fiscally sound operation, including:

(i) The cost of its operations;

(ii) A description, submitted to CMS annually and within 120 days of the end of the fiscal year, of significant business transactions (as defined in §422.500) between the MA Organization and a party in interest showing that the costs of the transactions listed in paragraph 12(a)(v) of

- this section do not exceed the costs that would be incurred if these transactions were with someone who is not a party in interest; or
- (iii) If they do exceed, a justification that the higher costs are consistent with prudent management and fiscal soundness requirements;
 - (iv) A combined financial statement for the MA Organization and a party in interest if either of the following conditions is met:
 - (aa) Thirty-five percent or more of the costs of operation of the MA Organization go to a party in interest;
 - (bb) Thirty-five percent or more of the revenue of a party in interest is from the MA Organization. **[422.516(h)]**
 - (v) ~~Requirements for combined financial statements.~~
 - (aa) The combined financial statements required by paragraph (2)(a)(iv) must display in separate columns the financial information for the MA Organization and each of the parties in interest.
 - (bb) Inter-entity transactions must be eliminated in the consolidated column.
 - (cc) The statements must have been examined by an independent auditor in accordance with generally accepted accounting principles and must include appropriate opinions and notes.
 - (dd) Upon written request from the MA Organization showing good cause, CMS may waive the requirement that the organization's combined financial statement include the financial information required in paragraph (2)(a)(v) with respect to a particular entity. **[422.516(e)]**
 - (vi) A description of any loans or other special financial arrangements the MA Organization makes with contractors, subcontractors, and related entities.
 - (h) Such information as CMS may require pertaining to the disclosure of ownership and control of the MA Organization. **[422.504(f)(1)(ii)]**
 - (e) Patterns of utilization of the MA Organization's services.
3. The MA Organization agrees to participate in surveys required by CMS and to submit to CMS all information that is necessary for CMS to administer and evaluate the program and to simultaneously establish and facilitate a process for current and prospective beneficiaries to exercise choice in obtaining Medicare services. This information includes, but is not limited to:
- (a) The benefits covered under the MA plan;
 - (b) The MA monthly basic beneficiary premium and MA monthly supplemental beneficiary premium, if any, for the plan;
 - (c) The service area and continuation area, if any, of each plan and the enrollment capacity of each plan;
 - (d) Plan quality and performance indicators for the benefits under the plan including –
 - (i) Disenrollment rates for Medicare enrollees electing to receive benefits through the plan for the previous 2 years;
 - (ii) Information on Medicare enrollee satisfaction;
 - (iii) The patterns of utilization of plan services;
 - (iv) The availability, accessibility, and acceptability of the plan's services;
 - (v) Information on health outcomes and other performance measures required by CMS;
 - (vi) The recent record regarding compliance of the plan with requirements of this part, as determined by CMS, and

- (vii) Other information determined by CMS to be necessary to assist beneficiaries in making an informed choice among MA plans and traditional Medicare;
- (e) Information about beneficiary appeals and their disposition;
- (f) Information regarding all formal actions, reviews, findings, or other similar actions by States, other regulatory bodies, or any other certifying or accrediting organization;
- (g) Any other information deemed necessary by CMS for the administration or evaluation of the Medicare program. [422.504(f)(2)]
- 4. The MA Organization agrees to provide to its enrollees and upon request, to any individual eligible to elect an MA plan, all informational requirements under §422.64 and upon an enrollee's request, the financial disclosure information required under §422.516. [422.504(f)(3)]
- 5. Reporting and disclosure under ERISA.
 - (a) For any employees' health benefits plan that includes an MA Organization in its offerings, the MA Organization must furnish, upon request, the information the plan needs to fulfill its reporting and disclosure obligations (with respect to the MA Organization) under the Employee Retirement Income Security Act of 1974 (ERISA).
 - (b) The MA Organization must furnish the information to the employer or the employer's designee, or to the plan administrator, as the term "administrator" is defined in ERISA. [422.516(d)]
- 6. Electronic communication. The MA Organization must have the capacity to communicate with CMS electronically. [422.504(b)]
- 7. Risk Adjustment data. The MA Organization agrees to comply with the requirements in §422.310 for submitting risk adjustment data to CMS. [422.504(a)(8)]

Article VII

Renewal of the MA Contract

- A. Renewal of contract. In accordance with §422.505, following the initial contract period, this contract is renewable annually only if:
 - (1) The MA Organization has not provided CMS with a notice of intention not to renew; [422.506(a)]
 - (2) CMS and the MA Organization reach agreement on the bid under 42 CFR Part 422, Subpart F; and [422.505(d)]
 - (3) CMS informs the MA Organization that it authorizes a renewal.
- B. Nonrenewal of contract.
 - (1) Nonrenewal by the Organization.
 - (a) In accordance with §422.506, the MA Organization may elect not to renew its contract with CMS as of the end of the term of the contract for any reason, provided it meets the time frames for doing so set forth in subparagraphs (b) and (c) of this paragraph.
 - (b) If the MA Organization does not intend to renew its contract, it must notify--
 - (i) CMS, in writing, by the first Monday in June of the year in which the contract would end, pursuant to §422.506

(ii) Each Medicare enrollee, at least 90 days before the date on which the nonrenewal is effective. This notice must include a written description of all alternatives available for obtaining Medicare services within the service area including alternative MA plans, Medigap options, and original Medicare and prescription drug plans and must receive CMS approval prior to issuance.

(iii) The general public, at least 90 days before the end of the current calendar year, by publishing a CMS-approved notice in one or more newspapers of general circulation in each community located in the MA Organization's service area.

(c) CMS may accept a nonrenewal notice submitted after the applicable annual nonrenewal notice deadline if –

(i) The MA Organization notifies its Medicare enrollees and the public in accordance with subparagraph (1)(b)(ii) and (1)(b)(iii) of this section, and

(ii) Acceptance is not inconsistent with the effective and efficient administration of the Medicare program.

(d) If the MA Organization does not renew a contract under subparagraph (1), CMS will not enter into a contract with the Organization for 2 years from the date of contract separation unless there are special circumstances that warrant special consideration, as determined by CMS. [422.506(a)]

(2) CMS decision not to renew.

(a) CMS may elect not to authorize renewal of a contract for any of the following reasons.

(i) The MA Organization's level of enrollment, growth in enrollment, or insufficient number of contracted providers is determined by CMS to threaten the viability of the organization under the MA program and/or be an indicator of beneficiary dissatisfaction with the MA plan(s) offered by the organization.

(ii) For any of the reasons listed in §422.510(a) [Article VIII, section (B)(1)(a) of this contract], which would also permit CMS to terminate the contract.

(iii) The MA Organization has committed any of the acts in §422.752(a) that would support the imposition of intermediate sanctions or civil money penalties under 42 CFR Part 122 Subpart C.

(iv) The MA Organization did not submit a benefit and price bid or the benefit and price bid was not acceptable [422.505(d)].

(b) Notice. CMS shall provide notice of its decision whether to authorize renewal of the contract as follows:

(i) To the MA Organization by May 1 of the contract year, except in the event of (2)(a)(iv) above, for which notice will be sent by September 1.

(ii) To the MA Organization's Medicare enrollees by mail at least 90 days before the end of the current calendar year.

(iii) To the general public at least 90 days before the end of the current calendar year, by publishing a notice in one or more newspapers of general circulation in each community or county located in the MA Organization's service area.

(c) Notice of appeal rights. CMS shall give the MA Organization written notice of its right to reconsideration of the decision not to renew in accordance with § 422.644.
[422.506(b)]

Article VIII

Modification or Termination of the Contract

A. Modification or Termination of Contract by Mutual Consent

1. This contract may be modified or terminated at any time by written mutual consent.

(a) If the contract is modified by written mutual consent, the MA Organization must notify its Medicare enrollees of any changes that CMS determines are appropriate for notification within time frames specified by CMS. [422.508(a)(2)]

(b) If the contract is terminated by written mutual consent, except as provided in section (A)(2) of this Article, the MA Organization must provide notice to its Medicare enrollees and the general public as provided in section B(2)(b)(iii) and B(2)(b)(iii) of this Article. [422.508(a)(1)]

2. If this contract is terminated by written mutual consent and replaced the day following such termination by a new MA contract, the MA Organization is not required to provide the notice specified in section B of this article
[422.508(b)]

B. Termination of the Contract by CMS or the MA Organization

1. Termination by CMS

(a) CMS may terminate a contract for any of the following reasons:

(i) The MA Organization has failed substantially to carry out the terms of its contract with CMS.

(ii) The MA Organization is carrying out its contract with CMS in a manner that is inconsistent with the effective and efficient implementation of 42 CFR Part 427.

(iii) CMS determines that the MA Organization no longer meets the requirements of 12 CFR Part 422 for being a contracting organization.

(iv) There is credible evidence that the MA Organization committed or participated in false, fraudulent or abusive activities affecting the Medicare program, including submission of false or fraudulent data.

(v) The MA Organization experiences financial difficulties so severe that its ability to make necessary health services available is impaired to the point of posing an imminent and serious risk to the health of its enrollees, or otherwise fails to make services available to the extent that such a risk to health exists.

(vi) The MA Organization substantially fails to comply with the requirements in 42 CFR Part 422 Subpart M relating to grievances and appeals.

(vii) The MA Organization fails to provide CMS with valid risk adjustment data as required under §422.310 and 423.229(b)(3).

(viii) The MA Organization fails to implement an acceptable quality improvement program as required under 42 CFR Part 422 Subpart D.

(ix) The MA Organization substantially fails to comply with the prompt payment requirements in §422.520.

(x) The MA Organization substantially fails to comply with the service access requirements in §422.112.

(xi) The MA Organization fails to comply with the requirements of §422.208 regarding physician incentive plans.

(xii) The MA Organization substantially fails to comply with the marketing requirements in 422.80.

(b) Notice. If CMS decides to terminate a contract for reasons other than the grounds specified in section (B)(1)(a) above, it will give notice of the termination as follows:

(i) CMS will notify the MA Organization in writing 90 days before the intended date of the termination.

(ii) The MA Organization will notify its Medicare enrollees of the termination by mail at least 30 days before the effective date of the termination.

(iii) The MA Organization will notify the general public of the termination at least 30 days before the effective date of the termination by publishing a notice in one or more newspapers of general circulation in each community or county located in the MA Organization's service area.

(c) Immediate termination of contract by CMS.

(i) For terminations based on violations prescribed in paragraph (B)(1)(a)(i) of this article, CMS will notify the MA Organization in writing that its contract has been terminated effective the date of the termination decision by CMS. If termination is effective in the middle of a month, CMS has the right to recover the prorated share of the capitation payments made to the MA Organization covering the period of the month following the contract termination.

(ii) CMS will notify the MA Organization's Medicare enrollees in writing of CMS' decision to terminate the MA Organization's contract. This notice will occur no later than 30 days after CMS notifies the plan of its decision to terminate this contract. CMS will simultaneously inform the Medicare enrollees of alternative options for obtaining Medicare services, including alternative MA Organizations in a similar geographic area and original Medicare.

(iii) CMS will notify the general public of the termination no later than 30 days after notifying the MA Organization of CMS' decision to terminate this contract. This notice will be published in one or more newspapers of general circulation in each community or county located in the MA Organization's service area.

(d) Corrective action plan.

(i) General. Before terminating a contract for reasons other than the grounds specified in section (B)(1)(a)(v) of this article, CMS will provide the MA Organization with reasonable opportunity, not to exceed time frames specified at 42 CFR Part 422 Subpart N, to develop and receive CMS approval of a corrective action plan to correct the deficiencies that are the basis of the proposed termination.

(ii) Exception. If a contract is terminated under section (B)(1)(a)(v) of this article, the MA Organization will not have the opportunity to submit a corrective action plan.

(c) Appeal rights. If CMS decides to terminate this contract, it will send written notice to the MA Organization informing it of its termination appeal rights in accordance with 42 CFR Part 422 Subpart K. [422.510]

2. Termination by the MA Organization

(a) Cause for termination. The MA Organization may terminate this contract if CMS fails to substantially carry out the terms of the contract.

(b) Notice. The MA Organization must give advance notice as follows:

(i) To CMS, at least 90 days before the intended date of termination. This notice must specify the reasons why the MA Organization is requesting contract termination.

(ii) To its Medicare enrollees, at least 60 days before the termination effective date. This notice must include a written description of alternatives available for obtaining Medicare services within the service area, including alternative MA and MA-PD plans, PDP plans, Medigap options, and original Medicare and must receive CMS approval.

(iii) To the general public at least 60 days before the termination effective date by publishing a CMS-approved notice in one or more newspapers of general circulation in each community or county located in the MA Organization's geographic area.

(c) Effective date of termination. The effective date of the termination will be determined by CMS and will be at least 90 days after the date CMS receives the MA Organization's notice of intent to terminate.

(d) CMS' liability. CMS' liability for payment to the MA Organization ends as of the first day of the month after the last month for which the contract is in effect, but CMS shall make payments for amounts owed prior to termination but not yet paid.

(e) Effect of termination by the organization. CMS will not enter into an agreement with the MA Organization for a period of two years from the date the Organization has terminated this contract, unless there are circumstances that warrant special consideration, as determined by CMS. [422.512]

Article IX

Requirements of Other Laws and Regulations

A. The MA Organization agrees to comply with--

(1) Federal laws and regulations designed to prevent or ameliorate fraud, waste, and abuse, including, but not limited to, applicable provisions of Federal criminal law: the False Claims Act (31 USC 3729 et seq.), and the anti-kickback statute (section 1128B(b) of the Act); and

(2) HIPAA administrative simplification rules at 45 CFR parts 160, 162, and 164. [422.504(b)]

B. The MA Organization maintains ultimate responsibility for adhering to and otherwise fully complying with all terms and conditions of its contract with CMS, notwithstanding any relationships that the MA organization may have with related entities, contractors, or subcontractors. [422.504(i)]

C. In the event that any provision of this contract conflicts with the provisions of any statute or regulation applicable to an MA Organization, the provisions of the statute or regulation shall have full force and effect.

Article X

Severability

The MA Organization agrees that, upon CMS' request, this contract will be amended to exclude any MA plan or State-licensed entity specified by CMS, and a separate contract for any such excluded plan or entity will be deemed to be in place when such a request is made. [422.504(k)]

Article XI

Miscellaneous

- A. Definitions. Terms not otherwise defined in this contract shall have the meaning given to such terms in 42 CFR Part 422.
- B. Alteration to Original Contract Terms. The MA Organization agrees that it has not altered in any way the terms of this contract presented for signature by CMS. The MA Organization agrees that any alterations to the original text the MA Organization may make to this contract shall not be binding on the parties.
- C. Approval to Begin Marketing and Enrollment. The MA Organization agrees that it must complete CMS operational requirements prior to receiving CMS approval to begin Part C marketing and enrollment activities. Such activities include, but are not limited to, establishing and successfully testing connectivity with CMS systems to process enrollment applications for contracting with an entity qualified to perform such functions on the MA Organization's Sponsor's behalf and successfully demonstrating capability to submit accurate and timely price comparison data. To establish and successfully test connectivity, the MA Organization must:
 - 1) establish and test physical connectivity to the CMS data center;
 - 2) acquire user identifications and passwords;
 - 3) receive, store, and maintain data necessary to perform enrollments and send and receive transactions to and from CMS; and
 - 4) check and receive transaction status information.
- D. Incorporation of Applicable Addenda. All addenda checked off and initialed on the cover sheet of this contract by the MA Organization are hereby incorporated by reference.

In witness whereof, the parties hereby execute this contract

ATTACHMENT A

**ATTESTATION OF ENROLLMENT INFORMATION
RELATING TO CMS PAYMENT
TO A MEDICARE ADVANTAGE ORGANIZATION**

Pursuant to the contract(s) between the Centers for Medicare & Medicaid Services (CMS) and (UNITEDHEALTHCARE PLAN OF THE RIVER VALLEY, INC.), hereafter referred to as the MA Organization, governing the operation of the following Medicare Advantage plans (HOSP), the MA Organization hereby requests payment under the contract, and in doing so, makes the following attestation concerning CMS payments to the MA Organization. The MA Organization acknowledges that the information described below directly affects the calculation of CMS payments to the MA Organization and that misrepresentations to CMS about the accuracy of such information may result in Federal civil action and/or criminal prosecution. This attestation shall not be considered a waiver of the MA Organization's right to seek payment adjustments from CMS based on information or data which does not become available until after the date the MA Organization submits this attestation.

1. The MA Organization has reported to CMS for the month of (INDICATE MONTH AND YEAR) all new enrollments, disenrollments, and appropriate changes in enrollees' status with respect to the above-stated MA plans. Based on best knowledge, information, and belief as of the date indicated below, all information submitted to CMS in this report is accurate, complete, and truthful.

2. The MA Organization has reviewed the CMS monthly membership report and reply listing for the month of (INDICATE MONTH AND YEAR) for the above-stated MA plans and has reported to CMS any discrepancies between the report and the MA Organization's records. For those portions of the monthly membership report and the reply listing to which the MA Organization raises no objection, the MA Organization, through the certifying CEO/COO, will be deemed to have attested, based on best knowledge, information, and belief as of the date indicated below, to its accuracy, completeness, and truthfulness.

**ATTESTATION OF RISK ADJUSTMENT DATA INFORMATION RELATING TO
CMS PAYMENT TO A MEDICARE ADVANTAGE ORGANIZATION**

Pursuant to the contract(s) between the Centers for Medicare & Medicaid Services (CMS) and (UNITEDHEALTHCARE PLAN OF THE RIVER VALLEY, INC.), hereafter referred to as the MA Organization, governing the operation of the following Medicare Advantage plans (H0251), the MA Organization hereby requests payment

under the contract, and in doing so, makes the following attestation concerning CMS payments to the MA Organization. The MA Organization acknowledges that the information described below directly affects the calculation of CMS payments to the MA Organization or additional benefit obligations of the MA Organization and that misrepresentations to CMS about the accuracy of such information may result in Federal civil action and/or criminal prosecution.

The MA Organization has reported to CMS during the period of (INDICATE DATES) all (INDICATE TYPE - DIAGNOSIS ENCOUNTER) risk adjustment data available to the MA Organization with respect to the above-stated MA plans. Based on best knowledge, information, and belief as of the date indicated below, all information submitted to CMS in this report is accurate, complete, and truthful.

**UNITED STATES DISTRICT COURT
FOR THE CENTRAL DISTRICT OF CALIFORNIA**

UNITED STATES OF AMERICA *ex*
rel. BENJAMIN POEHLING,

Plaintiff,

v.

UNITEDHEALTH GROUP, INC. *et*
al.,

Defendants.

CASE NO. 2:16-cv-08697-MWF-SSx

**UNITEDHEALTH'S ANSWER TO
UNITED STATES' AMENDED
COMPLAINT-IN-PARTIAL-
INTERVENTION AND
COUNTERCLAIM**

1 Having filed a notice of intervention pursuant to 31 U.S.C. § 3730(b)(4), the
2 United States alleges in its Amended Complaint-In-Partial-Intervention and
3 Demand for Jury Trial (the “Government’s Amended Complaint” or “Amended
4 Complaint”) the allegations below. Defendants UnitedHealth Group Incorporated,
5 United HealthCare Services, Inc., UnitedHealthcare, Inc., UnitedHealthcare
6 Insurance Company, Ovations, Inc., Optum, Inc., OptumInsight, Inc.,
7 AmeriChoice of New Jersey, Inc., AmeriChoice of New York, Inc., Arizona
8 Physicians IPA, Inc., Care Improvement Plus of Maryland, Inc., Care
9 Improvement Plus of Texas Insurance Company, Care Improvement Plus South
10 Central Insurance Company, Care Improvement Plus Wisconsin Insurance
11 Company, Optum Insurance Co., Citrus Health Care, Inc., Health Plan of Nevada,
12 Inc., Medica HealthCare Plans, Inc., Oxford Health Plans (CT), Inc., Oxford
13 Health Plans (NJ), Inc., Oxford Health Plans (NY), Inc., PacifiCare Life and
14 Health Insurance Company, PacifiCare of Arizona, Inc., PacifiCare of Colorado,
15 Inc., PacifiCare of Nevada, Inc., Physicians Health Choice of Texas, LLC,
16 Preferred Care Partners, Inc., Rocky Mountain Health Maintenance Organization,
17 Incorporated, Sierra Health and Life Insurance Company, Inc., Symphonix Health
18 Insurance, Inc., UHC of California (f.k.a. PacifiCare of California), United Health
19 Care Ins. Co. and United New York, Unison Health Plan of Tennessee, Inc.,
20 UnitedHealthcare Benefits of Texas, Inc. (f.k.a. PacifiCare of Texas, Inc.),
21 UnitedHealthcare Community Plan of Ohio, Inc. (f.k.a. Unison Health Plan of
22 Ohio, Inc.), UnitedHealthcare Community Plan of Texas, L.L.C. (f.k.a. Evercare of
23 Texas, L.L.C.), UnitedHealthcare Community Plan, Inc. (f.k.a. UnitedHealthcare
24 of the Great Lakes Health Plan, Inc.), UnitedHealthcare Insurance Company of
25 New York, UnitedHealthcare of Alabama, Inc., UnitedHealthcare of Arizona, Inc.,
26 UnitedHealthcare of Arkansas, Inc., UnitedHealthcare of Florida, Inc.,
27 UnitedHealthcare of Georgia, Inc., UnitedHealthcare of New England, Inc.,
28 UnitedHealthcare of New York, Inc., UnitedHealthcare of North Carolina, Inc.,

UnitedHealthcare of Ohio, Inc., UnitedHealthcare of Oklahoma, Inc. (f.k.a. PacifiCare of Oklahoma, Inc.), UnitedHealthcare of Oregon, Inc. (f.k.a. PacifiCare of Oregon, Inc.), UnitedHealthcare of Pennsylvania, Inc. (f.k.a. Unison Health Plan of Pennsylvania, Inc.), UnitedHealthcare of Tennessee, Inc., UnitedHealthcare of the Midlands, Inc., UnitedHealthcare of the Midwest, Inc., UnitedHealthcare of Utah, Inc., UnitedHealthcare of Washington, Inc. (f.k.a. PacifiCare of Washington, Inc.), UnitedHealthcare of Wisconsin, Inc., and UnitedHealthcare Plan of the River Valley, Inc. (collectively, “UnitedHealth”) generally deny each and every allegation except those hereinafter specifically admitted.

On February 2, 2018, the Court granted in part and denied in part the UnitedHealth Defendants’ motion to dismiss. Dkt. 212. This Order dismissed, with leave to amend, the Government’s Second, Third, and Fourth Claims for Relief. On February 26, 2018, the Government notified the Court and the parties that it had “elected not to file a Second Amended Complaint-in-Intervention in this action.” Dkt. 217 at 2. Therefore, the only surviving claims against the UnitedHealth Defendants are the First, Fifth, and Sixth Claims for Relief. There are many allegations that clearly relate to the dismissed claims that are now surplusage and do not require a response. Notwithstanding that and while preserving all of its rights, UnitedHealth denies claims or allegations that do not relate to the Government’s First, Fifth, and Sixth Claims for Relief. UnitedHealth further answers the numbered paragraphs as follows:

INTRODUCTION

1. Paragraph 1 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 1 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute and regulations speak for themselves, and to the extent that the allegations in Paragraph 1 vary therefrom or

1 with other applicable statutory or decisional law, UnitedHealth denies those
2 allegations.

3 2. Paragraph 2 contains no allegations with respect to a particular
4 Defendant or claim, and therefore no response is required. However, to the extent
5 Paragraph 2 purports to summarize and/or describe the provisions of the Medicare
6 program, UnitedHealth states that the Medicare statute and regulations speak for
7 themselves, and to the extent that the allegations in Paragraph 2 vary therefrom or
8 with other applicable statutory or decisional law, UnitedHealth denies those
9 allegations.

10 3. Paragraph 3 contains no allegations with respect to a particular
11 Defendant or claim, and therefore no response is required. However, to the extent
12 Paragraph 3 purports to summarize and/or describe the provisions of the Medicare
13 program, UnitedHealth states that the Medicare statute and regulations speak for
14 themselves, and to the extent that the allegations in Paragraph 3 vary therefrom or
15 with other applicable statutory or decisional law, UnitedHealth denies those
16 allegations.

17 4. Paragraph 4 contains no allegations with respect to a particular
18 Defendant or claim, and therefore no response is required. However, to the extent
19 Paragraph 4 purports to summarize and/or describe the provisions of the Medicare
20 program, UnitedHealth states that the Medicare statute and regulations speak for
21 themselves, and to the extent that the allegations in Paragraph 4 vary therefrom or
22 with other applicable statutory or decisional law, UnitedHealth denies those
23 allegations.

24 5. Paragraph 5 contains no allegations with respect to a particular
25 Defendant or claim, and therefore no response is required. However, to the extent
26 Paragraph 5 purports to summarize and/or describe the provisions of the Medicare
27 program, UnitedHealth states that the Medicare statute and regulations speak for
28 themselves, and to the extent that the allegations in Paragraph 5 vary therefrom or

1 with other applicable statutory or decisional law, UnitedHealth denies those
2 allegations.

3 6. To the extent that Paragraph 6 contains legal conclusions, no response
4 is required. Paragraph 6 contains no allegations with respect to a particular
5 Defendant or claim, and therefore no response is required. However, to the extent
6 Paragraph 6 purports to summarize and/or describe the provisions of the Medicare
7 program or the Ninth Circuit's order in *United States ex rel. Swoben v.*
8 *UnitedHealthcare Ins. Co.*, 848 F.3d 1161 (9th Cir. 2016), UnitedHealth states that
9 the Medicare regulations and the order speak for themselves, and to the extent that
10 the allegations in Paragraph 6 vary therefrom or with other applicable statutory or
11 decisional law, UnitedHealth denies those allegations.

12 7. UnitedHealth admits that for many years, UnitedHealth Group
13 Incorporated has owned Medicare Advantage ("MA") Organizations that have
14 enrolled more MA beneficiaries than any other entity, and offers Medicare
15 Advantage Plans ("MA Plans") and prescription drug plans ("PD Plans") to
16 millions of elderly and disabled Medicare beneficiaries throughout the United
17 States. UnitedHealth also admits that in or around March 2017, approximately
18 229,000 Medicare beneficiaries in the Central District of California were enrolled
19 in MA Plans offered by UHC of California and Sierra Health and Life Insurance
20 Company, Inc. UnitedHealth denies the remaining allegations in Paragraph 7.

21 8. Paragraph 8 refers to the Complaint, a legal document, which speaks
22 for itself and to which no response is required. UnitedHealth denies the remaining
23 allegations in Paragraph 8.

24 9. UnitedHealth admits that some of the UnitedHealth Defendants
25 collectively received billions of dollars from the Medicare program each year in
26 relation to the Medicare beneficiaries enrolled in the Defendant MA
27 Organizations' Plans. UnitedHealth admits that certain Defendants conducted
28 programs and engaged in activities designed to improve the completeness of risk

adjustment data submitted on behalf of Defendant MA Organizations.

UnitedHealth denies the remaining allegations in Paragraph 9.

10. UnitedHealth admits that certain Defendants have conducted a Chart Review Program since in or about 2005. UnitedHealth admits that this program improved the completeness of risk adjustment data submitted for Defendant MA Organizations and that risk adjustment payments increased as a result. UnitedHealth denies the remaining allegations in Paragraph 10.

11. To the extent that Paragraph 11 contains legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 11.

12. To the extent that Paragraph 12 contains legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 12.

13. To the extent that Paragraph 13 contains legal conclusions, no response is required. UnitedHealth is without knowledge or information sufficient to form a belief as to the truth or falsity of the Government's estimations. UnitedHealth denies the remaining allegations in Paragraph 13.

14. To the extent the allegations in Paragraph 14 relate to claims that have been dismissed, they are surplusage and should be stricken. Paragraph 14 states legal conclusions to which no response is required. To the extent that Paragraph 14 contains any factual allegations regarding UnitedHealth, such allegations are denied.

15. Paragraph 15 states legal conclusions to which no response is required. To the extent that Paragraph 15 contains any factual allegations regarding UnitedHealth, such allegations are denied.

16. UnitedHealth admits that some of the UnitedHealth Defendants paid some of its provider groups on a capitated basis and others on a fee-for-service basis. UnitedHealth also admits that some of the UnitedHealth Defendants entered

1 into value-based agreements with some of its fee-for-service providers.

2 UnitedHealth denies the remaining allegations in Paragraph 16.

3 17. UnitedHealth admits that pursuant to some of the UnitedHealth
4 Defendants' contractual arrangements with capitated and certain other providers,
5 some of the UnitedHealth Defendants paid a percentage share of the payments that
6 some of the UnitedHealth Defendants received from the Medicare Program for the
7 beneficiaries under those providers' care. UnitedHealth denies the remaining
8 allegations in Paragraph 17.

9 18. Paragraph 18 states legal conclusions to which no response is
10 required. UnitedHealth denies the remaining allegations in Paragraph 18.

11 **JURISDICTION AND VENUE**

12 19. Paragraph 19 states legal conclusions to which no response is
13 required.

14 20. Paragraph 20 states legal conclusions to which no response is
15 required. To the extent a response is required, UnitedHealth admits that at least
16 one of the Defendants transacts business in the Central District of California.

17 21. Paragraph 21 states legal conclusions to which no response is
18 required. To the extent a response is required, UnitedHealth admits that at least
19 one of the Defendants can be found in, resides in, and transacts business in this
20 District. UnitedHealth denies the remaining allegations in Paragraph 21.

21 **PARTIES**

22 **I. Plaintiffs**

23 22. Paragraph 22 refers to the Complaint, a legal document, which speaks
24 for itself and to which no response is required. To the extent Paragraph 22
25 purports to summarize and/or describe the provisions of the Medicare program,
26 UnitedHealth states that the Medicare statute and regulations speak for themselves,
27 and to the extent that the allegations in Paragraph 22 vary therefrom or with other
28 applicable statutory or decisional law, UnitedHealth denies those allegations.

UnitedHealth admits that the United States filed its notice of partial intervention in this action on February 14, 2017.

23. UnitedHealth admits that the *qui tam* plaintiff (“Relator”), Benjamin Poehling, initiated this action by filing a complaint under the *qui tam* provisions of the False Claims Act (“FCA”) against UnitedHealth in March 2011. UnitedHealth admits that from 2004 through the end of 2012, Poehling was the Director of Finance for UnitedHealthcare. UnitedHealth denies the characterization of its Chart Review Program as a “revenue-generating activit[y].” UnitedHealth is without knowledge or information sufficient to form a belief as to the truth or falsity of the remaining allegations in Paragraph 23; therefore, such allegations are denied.

II. Defendants

24. UnitedHealth admits that UnitedHealth Group Incorporated is a publicly traded Delaware corporation and that it, along with some of its affiliates, have offices in various locations throughout the United States, including in the Central District of California. UnitedHealth denies the remaining allegations in Paragraph 24.

25. UnitedHealth admits that some of its MA Organizations offer one or more MA Plans and some also offer PD Plans. UnitedHealth admits that in or around 2008, UnitedHealth Group Incorporated had approximately 1.5 million beneficiaries enrolled in MA Plans operated by its affiliate entities and millions of beneficiaries enrolled in PD Plans operated by its affiliate entities. UnitedHealth admits that in or around 2009, UnitedHealth Group Incorporated had approximately 1.8 million beneficiaries enrolled in MA operated by its affiliate entities and millions of beneficiaries enrolled in PD Plans operated by its affiliate entities. UnitedHealth admits that in or around 2010, UnitedHealth Group Incorporated had approximately 2.1 million beneficiaries in MA Plans operated by its affiliate entities and millions of beneficiaries in PD Plans operated by its

1 affiliate entities. UnitedHealth admits that in or around 2011, UnitedHealth Group
2 Incorporated had approximately 2.2 million beneficiaries in MA Plans operated by
3 its affiliate entities and millions of beneficiaries in PD Plans operated by its
4 affiliate entities. UnitedHealth admits that in or around 2012, UnitedHealth Group
5 Incorporated had approximately 2.6 million beneficiaries in MA Plans operated by
6 its affiliate entities and millions of beneficiaries in PD Plans operated by its
7 affiliate entities. UnitedHealth denies the remaining allegations in Paragraph 25.

8 26. To the extent the allegations in Paragraph 26 relate to claims that have
9 been dismissed, they are surplusage and should be stricken. UnitedHealth admits
10 that the following entities named as Defendants in this action have had or have
11 previously had one or more agreements with the Government at some point since
12 2005 to offer MA and/or PD Plans to Medicare beneficiaries under Parts C and D
13 of the Medicare Program, and received payments from the Government pursuant to
14 these agreements: Citrus Health Care, Inc., which was a Florida corporation;
15 Health Plan of Nevada, Inc., which is a Nevada corporation; Medica HealthCare
16 Plans, Inc., which is a Florida corporation; and Physicians Health Choice of Texas,
17 LLC, which is a Texas limited liability company doing business as Physicians
18 Health Choice. UnitedHealth denies the remaining allegations in Paragraph 26.

19 27. UnitedHealth admits that United HealthCare Services, Inc. is a
20 Minnesota corporation and a direct subsidiary of UnitedHealth Group
21 Incorporated. UnitedHealth also admits that PacifiCare Health Systems, LLC and
22 PacifiCare Health Plan Administrators, Inc. merged into United HealthCare
23 Services, Inc. UnitedHealth denies the remaining allegations in Paragraph 27.

24 28. UnitedHealth admits that Ovations, Inc. is a Delaware corporation and
25 a direct subsidiary of United HealthCare Services, Inc. and an indirect subsidiary
26 of UnitedHealth Group Incorporated. UnitedHealth denies the remaining
27 allegations in Paragraph 28.

29. UnitedHealth admits that UnitedHealthcare, Inc. is a Delaware corporation. UnitedHealth admits that various UnitedHealthcare subsidiaries operate health benefit plans and provide healthcare benefits to Medicare beneficiaries under the MA Program. UnitedHealth denies the remaining allegations in Paragraph 29.

30. UnitedHealth admits that Optum, Inc. and OptumInsight, Inc. are Delaware corporations and indirect subsidiaries of UnitedHealth Group Incorporated. UnitedHealth admits that in 2011, OptumInsight became the successor to Ingenix, Inc. Paragraph 30 also refers to the Complaint, a legal document, which speaks for itself and to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 30.

31. Paragraph 31 states legal conclusions to which no response is required. To the extent Paragraph 31 contains any factual allegations, such allegations are denied.

32. Paragraph 32 states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 32.

33. UnitedHealth admits that, starting in 2007, its risk adjustment submission process was primarily performed within Ingenix and then within Ingenix's successor, Optum. UnitedHealth admits that Ingenix and then Optum submitted risk adjustment data to CMS' Risk Adjustment Processing System (RAPS) via IRADS. UnitedHealth admits that Ingenix and then Optum performed operational functions for Chart Review, Claims Verification, and Risk Adjustment Coding Compliance Review ("RACCR") programs. UnitedHealth admits that Ingenix and then Optum performed certain activities relating to risk adjustment from its office in the Central District of California and elsewhere. UnitedHealth denies the remaining allegations in Paragraph 33.

1 34. Paragraph 34 states legal conclusions to which no response is
2 required. Paragraph 34 also refers to the Complaint, a legal document, which
3 speaks for itself and to which no response is required.

4 35. UnitedHealth admits that Ingenix and then Optum also performed risk
5 adjustment-related services for third parties, who owned and operated their own
6 MA Organizations and offered their own Plans. UnitedHealth admits that these
7 third parties were sometimes referred to as Optum's commercial clients.
8 UnitedHealth admits that Ingenix and then Optum submitted risk adjustment data
9 to the Government on behalf of certain commercial clients. UnitedHealth admits
10 that Ingenix and then Optum conducted Chart Review and other programs for
11 certain commercial clients. UnitedHealth admits that Ingenix and then Optum
12 performed risk adjustment related work for certain commercial clients from offices
13 in this District and elsewhere. UnitedHealth denies the remaining allegations in
14 Paragraph 35.

15 36. UnitedHealth admits that in or around 2005 it acquired PacifiCare
16 Health Systems, PacifiCare of Arizona, Inc., incorporated in Arizona; PacifiCare
17 of California, incorporated in California; PacifiCare of Colorado, Inc., incorporated
18 in Colorado; PacifiCare of Nevada, Inc., incorporated in Nevada; PacifiCare of
19 Oklahoma, Inc., incorporated in Oklahoma; PacifiCare of Oregon, Inc.,
20 incorporated in Oregon; PacifiCare of Texas, Inc. incorporated in Texas; and
21 PacifiCare of Washington, incorporated in Washington. UnitedHealth also admits
22 that at various points in time, PacifiCare plans were referred to as Secure Horizons.
23 UnitedHealth admits that the aforementioned entities are indirect subsidiaries of
24 UnitedHealth Group Incorporated. UnitedHealth admits that in or around 2011,
25 PacifiCare of California became UHC of California. UnitedHealth denies the
26 remaining allegations in Paragraph 36.

27 37. UnitedHealth admits that PacifiCare Health Systems, LLC and
28 PacifiCare Health Plan Administrators, Inc. merged into United HealthCare

Services, Inc. in or around 2005. UnitedHealth admits that all PacifiCare MA Organizations and their successors were direct or indirect subsidiaries of UnitedHealth Group Incorporated. Paragraph 37 also refers to the Complaint, a legal document, which speaks for itself and to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 37.

38. UnitedHealth admits that prior to its acquisition of PacifiCare, PacifiCare had an office in Cypress, California. UnitedHealth is without knowledge or information sufficient to form a belief as to the truth or falsity of the remaining allegations in Paragraph 38; therefore, such allegations are denied. Additionally, Paragraph 38 states a legal conclusion to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 38.

39. UnitedHealth admits that in or around 2011, it acquired a share of WellMed Medical Management, Inc. In or around 2011, UnitedHealth also acquired entities such as Physician's Health Choice of Texas, LLC and Citrus Health Care, Inc., which operated in Texas, Florida, New Mexico, and Arkansas. UnitedHealth admits that at the time of the acquisition, Citrus Health Care, Inc. was a Florida corporation and a subsidiary of PHC Holdings of Florida, Inc. UnitedHealth denies the remaining allegations in Paragraph 39.

40. UnitedHealth admits that for many years, WMMI had affiliates that directly managed the provision of healthcare services, including WellMed Networks, Inc., WellMed Networks Inc. of Florida, WellMed Medical Management of Florida Inc., and WellMed Medical Group, PA. UnitedHealth admits that after the acquisition, WMMI became part of the UnitedHealth Group Incorporated group called OptumCare. UnitedHealth admits that WellMed's integrated health care delivery system includes more than 10,000 contracted physicians who provide healthcare to hundreds of thousands of Medicare beneficiaries in Texas and Florida, including those beneficiaries enrolled in

UnitedHealth's MA Plans. UnitedHealth denies the remaining allegations in Paragraph 40.

41. Paragraph 41 refers to the Complaint, a legal document, which speaks for itself and to which no response is required. To the extent Paragraph 41 contains any factual allegations, such allegations are denied.

DEFENDANTS' EXECUTIVES AND OTHER EMPLOYEES

42. To the extent Paragraph 42 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 42 with the exception of those specifically admitted below:

- Kyle Anderson was the Director of Financial Planning and Analysis at UnitedHealthcare from in or around 2009 to 2015.
- Jason Bainbridge worked for UnitedHealthcare in or around 2012.
- From in or around 2011 to 2015, Paul Balthazor was the Chief Financial Officer of UnitedHealthcare Community & State.
- Marc Beckmann worked for UnitedHealthcare Medicare & Retirement.
- In or around 2008, Jon Bird worked for Ingenix's Risk Adjustment Group, became Director of Revenue Projections in or around 2010, and became the Vice President of Risk Adjustment and Quality Analytics at Optum in or around 2013.

- Timothy Wicks served in a senior management position at Optum.

THE MEDICARE PROGRAM

I. The Medicare Statute

43. Paragraph 43 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 43 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute speaks for itself, and to the extent that the allegations in Paragraph 43 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. Paragraph 43 also states legal conclusions to which no response is required.

44. Paragraph 44 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent

Paragraph 44 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute speaks for itself, and to the extent that the allegations in Paragraph 44 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. Paragraph 44 also states legal conclusions to which no response is required.

45. Paragraph 45 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 45 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute speaks for itself, and to the extent that the allegations in Paragraph 45 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. Paragraph 45 also states legal conclusions to which no response is required.

46. Paragraph 46 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 46 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute speaks for itself, and to the extent that the allegations in Paragraph 46 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. Additionally, Paragraph 46 refers to the Complaint, a legal document, which speaks for itself and to which no response is required. Paragraph 46 also states legal conclusions to which no response is required.

47. Paragraph 47 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 47 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute speaks for itself, and to the extent that the allegations in Paragraph 47 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. Paragraph 47 also states legal conclusions to which no response is required.

48. Paragraph 48 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 48 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute speaks for itself, and to the extent that the allegations in Paragraph 48 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. Paragraph 48 refers to the Complaint, a legal document, which speaks for itself and to which no response is required.

49. Paragraph 49 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 49 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute, Medicare regulations, Medicare guidance documents, and the FCA speak for themselves, and to the extent that the allegations in Paragraph 49 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. Paragraph 49 also states legal conclusions to which no response is required.

50. To the extent Paragraph 50 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute speaks for itself, and to the extent that the allegations in Paragraph 50 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. Paragraph 50 also states legal conclusions to which no response is required.

51. To the extent Paragraph 51 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute speaks for itself, and to the extent that the allegations in Paragraph 51 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. Paragraph 51 also states legal conclusions to which no response is required.

1 52. Paragraph 52 contains no allegations with respect to a particular
2 Defendant or claim, and therefore no response is required. However, to the extent
3 Paragraph 52 purports to summarize and/or describe the provisions of the Medicare
4 program, UnitedHealth states that the Medicare statute speaks for itself, and to the
5 extent that the allegations in Paragraph 52 vary therefrom or with other applicable
6 statutory or decisional law, UnitedHealth denies those allegations. Paragraph 52
7 also states legal conclusions to which no response is required.

8 53. Paragraph 53 contains no allegations with respect to a particular
9 Defendant or claim, and therefore no response is required. However, to the extent
10 Paragraph 53 purports to summarize and/or describe the provisions of the Medicare
11 program, UnitedHealth states that the Medicare statute speaks for itself, and to the
12 extent that the allegations in Paragraph 53 vary therefrom or with other applicable
13 statutory or decisional law, UnitedHealth denies those allegations. Paragraph 53
14 also states legal conclusions to which no response is required.

15 **II. Medicare Parts C and D Risk Adjustment Payments**

16 54. Paragraph 54 contains no allegations with respect to a particular
17 Defendant or claim, and therefore no response is required. However, to the extent
18 Paragraph 54 purports to summarize and/or describe the provisions of the Medicare
19 program, UnitedHealth states that the Medicare statute speaks for itself, and to the
20 extent that the allegations in Paragraph 54 vary therefrom or with other applicable
21 statutory or decisional law, UnitedHealth denies those allegations. Paragraph 54
22 also states legal conclusions to which no response is required.

23 55. Paragraph 55 contains no allegations with respect to a particular
24 Defendant or claim, and therefore no response is required. However, to the extent
25 Paragraph 55 purports to summarize and/or describe the provisions of the Medicare
26 program, UnitedHealth states that the Medicare statute speaks for itself, and to the
27 extent that the allegations in Paragraph 55 vary therefrom or with other applicable
28

1 statutory or decisional law, UnitedHealth denies those allegations. Paragraph 55
2 also states legal conclusions to which no response is required.

3 56. Paragraph 56 contains no allegations with respect to a particular
4 Defendant or claim, and therefore no response is required. However, to the extent
5 Paragraph 56 purports to summarize and/or describe the provisions of the Medicare
6 program, UnitedHealth states that the Medicare statute speaks for itself, and to the
7 extent that the allegations in Paragraph 56 vary therefrom or with other applicable
8 statutory or decisional law, UnitedHealth denies those allegations. Paragraph 56
9 also states legal conclusions to which no response is required.

10 57. Paragraph 57 contains no allegations with respect to a particular
11 Defendant or claim, and therefore no response is required. However, to the extent
12 Paragraph 57 purports to summarize and/or describe the provisions of the Medicare
13 program, UnitedHealth states that the Medicare statute, Medicare regulations, and
14 Medicare guidance documents speak for themselves, and to the extent that the
15 allegations in Paragraph 57 vary therefrom or with other applicable statutory or
16 decisional law, UnitedHealth denies those allegations. Paragraph 57 also states
17 legal conclusions to which no response is required.

18 58. Paragraph 58 contains no allegations with respect to a particular
19 Defendant or claim, and therefore no response is required. However, to the extent
20 Paragraph 58 purports to summarize and/or describe the provisions of the Medicare
21 program, UnitedHealth states that the Medicare statute and regulations speak for
22 themselves, and to the extent that the allegations in Paragraph 58 vary therefrom or
23 with other applicable statutory or decisional law, UnitedHealth denies those
24 allegations.

25 59. Paragraph 59 contains no allegations with respect to a particular
26 Defendant or claim, and therefore no response is required. However, to the extent
27 Paragraph 59 purports to summarize and/or describe the provisions of the Medicare
28 program, UnitedHealth states that the Medicare statute speaks for itself, and to the

1 extent that the allegations in Paragraph 59 vary therefrom or with other applicable
2 statutory or decisional law, UnitedHealth denies those allegations.

3 60. Paragraph 60 contains no allegations with respect to a particular
4 Defendant or claim, and therefore no response is required. However, to the extent
5 Paragraph 60 purports to summarize and/or describe the provisions of the Medicare
6 program, UnitedHealth states that the Medicare statute speaks for itself, and to the
7 extent that the allegations in Paragraph 60 vary therefrom or with other applicable
8 statutory or decisional law, UnitedHealth denies those allegations.

9 61. Paragraph 61 contains no allegations with respect to a particular
10 Defendant or claim, and therefore no response is required. However, to the extent
11 Paragraph 61 purports to summarize and/or describe the provisions of the Medicare
12 program, UnitedHealth states that the Medicare statute speaks for itself, and to the
13 extent that the allegations in Paragraph 61 vary therefrom or with other applicable
14 statutory or decisional law, UnitedHealth denies those allegations.

15 62. Paragraph 62 contains no allegations with respect to a particular
16 Defendant or claim, and therefore no response is required. However, to the extent
17 Paragraph 62 purports to summarize and/or describe the provisions of the Medicare
18 program, UnitedHealth states that the Medicare statute speaks for itself, and to the
19 extent that the allegations in Paragraph 62 vary therefrom or with other applicable
20 statutory or decisional law, UnitedHealth denies those allegations.

21 63. Paragraph 63 contains no allegations with respect to a particular
22 Defendant or claim, and therefore no response is required. However, to the extent
23 Paragraph 63 purports to summarize and/or describe the provisions of the Medicare
24 program, UnitedHealth states that the Medicare statute speaks for itself, and to the
25 extent that the allegations in Paragraph 63 vary therefrom or with other applicable
26 statutory or decisional law, UnitedHealth denies those allegations. The final
27 sentence of Paragraph 63 describes the Complaint, a legal document, which speaks
28 for itself and to which no response is required.

64. Paragraph 64 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 64 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute speaks for itself, and to the extent that the allegations in Paragraph 64 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. Paragraph 64 also states legal conclusions to which no response is required.

65. Paragraph 65 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 65 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute speaks for itself, and to the extent that the allegations in Paragraph 65 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations.

DEFENDANTS' AGREEMENTS

I. The Annual Parts C and D Agreements

66. Paragraph 66 states legal conclusions to which no response is required. To the extent Paragraph 66 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute speaks for itself, and to the extent that the allegations in Paragraph 66 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. UnitedHealth admits that certain entities named as Defendants in this action entered into one or more agreements with the Government since 2005 to offer MA and/or PD Plans to Medicare beneficiaries under Parts C and D of the Medicare Program.

67. To the extent Paragraph 67 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute speaks for itself, and to the extent that the allegations in Paragraph 67 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies

1 those allegations. Paragraph 67 also states legal conclusions to which no response
2 is required.

3 68. To the extent the allegations in Paragraph 68 relate to claims that have
4 been dismissed, they are surplusage and should be stricken. To the extent
5 Paragraph 68 purports to describe a document or documents, such documents
6 speak for themselves and, as such, no response is required. UnitedHealth denies
7 the remaining allegations in Paragraph 68. Paragraph 68 also states legal
8 conclusions to which no response is required.

9 69. To the extent Paragraph 69 purports to describe a document or
10 documents, such documents speak for themselves and, as such, no response is
11 required. UnitedHealth denies the remaining allegations in Paragraph 69.

12 70. To the extent Paragraph 70 purports to describe a document or
13 documents, such documents speak for themselves and, as such, no response is
14 required. UnitedHealth denies the remaining allegations in Paragraph 70.

15 71. To the extent the allegations in Paragraph 71 relate to claims that have
16 been dismissed, they are surplusage and should be stricken. To the extent
17 Paragraph 71 purports to describe a document or documents, such documents
18 speak for themselves and, as such, no response is required. UnitedHealth denies
19 the remaining allegations in Paragraph 71.

20 72. Paragraph 72 contains no allegations with respect to a particular
21 Defendant or claim, and therefore no response is required. To the extent Paragraph
22 72 purports to describe a document or documents, such documents speak for
23 themselves and, as such, no response is required. UnitedHealth denies the
24 remaining allegations in Paragraph 72.

25 **II. The Electronic Data Interchange Agreements**

26 73. To the extent Paragraph 73 purports to summarize and/or describe the
27 provisions of the Medicare program, UnitedHealth states that the Medicare statute
28 and regulations speak for themselves, and to the extent that the allegations in

Paragraph 73 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. To the extent Paragraph 73 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. Paragraph 73 also states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 73.

74. To the extent Paragraph 74 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 74.

75. To the extent Paragraph 75 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. Paragraph 75 also states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 75.

76. To the extent Paragraph 76 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. Paragraph 76 also states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 76.

77. To the extent Paragraph 77 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. Paragraph 77 also states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 77.

78. To the extent Paragraph 78 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. Paragraph 78 also states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 78.

79. To the extent Paragraph 79 purports to describe a document or documents, such documents speak for themselves and, as such, no response is

1 required. Paragraph 79 also states legal conclusions to which no response is
2 required. UnitedHealth denies the remaining allegations in Paragraph 79.

3 80. To the extent Paragraph 80 purports to describe a document or
4 documents, such documents speak for themselves and, as such, no response is
5 required. Paragraph 80 also states legal conclusions to which no response is
6 required. UnitedHealth denies the remaining allegations in Paragraph 80.

7 81. To the extent Paragraph 81 purports to describe a document or
8 documents, such documents speak for themselves and, as such, no response is
9 required. Paragraph 81 also states legal conclusions to which no response is
10 required. UnitedHealth denies the remaining allegations in Paragraph 81.

11 82. Paragraph 82 contains no allegations with respect to a particular
12 Defendant or claim, and therefore no response is required. To the extent Paragraph
13 82 purports to describe a document or documents, such documents speak for
14 themselves and, as such, no response is required. UnitedHealth denies the
15 remaining allegations in Paragraph 82.

16 **III. The Ingenix/Optum Service Agreements**

17 83. To the extent Paragraph 83 purports to describe a document or
18 documents, such documents speak for themselves and, as such, no response is
19 required. UnitedHealth denies the remaining allegations in Paragraph 83.

20 84. To the extent Paragraph 84 purports to describe a document or
21 documents, such documents speak for themselves and, as such, no response is
22 required. UnitedHealth denies the remaining allegations in Paragraph 84.

23 85. To the extent Paragraph 85 purports to describe a document or
24 documents, such documents speak for themselves and, as such, no response is
25 required. UnitedHealth denies the remaining allegations in Paragraph 85.

26 86. To the extent Paragraph 86 purports to describe a document or
27 documents, such documents speak for themselves and, as such, no response is
28 required. UnitedHealth denies the remaining allegations in Paragraph 86.

DEFENDANTS' DATA INTEGRITY OBLIGATIONS

I. Obligation to Submit Valid Diagnoses

87. Paragraph 87 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 87 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute, regulations, and guidance, including the Medicare Managed Care Manual and the 2008 Risk Adjustment Data Technical Assistance for Medicare Advantage Organizations Participant Guide ("2008 RA Participant Guide"), speak for themselves, and to the extent that the allegations in Paragraph 87 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. UnitedHealth denies the remaining allegations in Paragraph 87. Paragraph 87 also states legal conclusions to which no response is required.

88. Paragraph 88 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 88 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute, regulations, and guidance speak for themselves, and to the extent that the allegations in Paragraph 88 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. UnitedHealth denies the remaining allegations in Paragraph 88. Paragraph 88 also states legal conclusions to which no response is required.

89. Paragraph 89 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 89 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute, regulations, and guidance speak for themselves, and to the extent that the allegations in Paragraph 89 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies

1 those allegations. UnitedHealth denies the remaining allegations in Paragraph 89.
2 Paragraph 89 also states legal conclusions to which no response is required.

3 90. Paragraph 90 contains no allegations with respect to a particular
4 Defendant or claim, and therefore no response is required. However, to the extent
5 Paragraph 90 purports to summarize and/or describe the provisions of the Medicare
6 program, UnitedHealth states that the Medicare statute, regulations, and guidance
7 speak for themselves, and to the extent that the allegations in Paragraph 90 vary
8 therefrom or with other applicable statutory or decisional law, UnitedHealth denies
9 those allegations. UnitedHealth denies the remaining allegations in Paragraph 90.
10 Paragraph 90 also states legal conclusions to which no response is required.

11 91. Paragraph 91 contains no allegations with respect to a particular
12 Defendant or claim, and therefore no response is required. However, to the extent
13 Paragraph 91 purports to summarize and/or describe the provisions of the Medicare
14 program, UnitedHealth states that the Medicare statute, regulations, and guidance
15 speak for themselves, and to the extent that the allegations in Paragraph 91 vary
16 therefrom or with other applicable statutory or decisional law, UnitedHealth denies
17 those allegations. UnitedHealth denies the remaining allegations in Paragraph 91.

18 92. Paragraph 92 contains no allegations with respect to a particular
19 Defendant or claim, and therefore no response is required. However, to the extent
20 Paragraph 92 purports to summarize and/or describe a document or documents,
21 such documents speak for themselves and, as such, no response is required.
22 UnitedHealth denies the remaining allegations in Paragraph 92.

23 93. Paragraph 93 contains no allegations with respect to a particular
24 Defendant or claim, and therefore no response is required. However, to the extent
25 Paragraph 93 purports to summarize and/or describe the provisions of the Medicare
26 program, UnitedHealth states that the Medicare statute, regulations, and guidance
27 speak for themselves, and to the extent that the allegations in Paragraph 93 vary
28

therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. UnitedHealth denies the remaining allegations in Paragraph 93.

94. Paragraph 94 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 94 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute, regulations, and guidance speak for themselves, and to the extent that the allegations in Paragraph 94 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. UnitedHealth denies the remaining allegations in Paragraph 94.

II. Obligation to Implement an Effective Compliance Program

95. Paragraph 95 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 95 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute, regulations, and guidance speak for themselves, and to the extent that the allegations in Paragraph 95 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. UnitedHealth denies the remaining allegations in Paragraph 95.

96. Paragraph 96 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 96 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute, regulations, and guidance speak for themselves, and to the extent that the allegations in Paragraph 96 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. UnitedHealth denies the remaining allegations in Paragraph 96.

97. Paragraph 97 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 97 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute, regulations, and guidance

1 speak for themselves, and to the extent that the allegations in Paragraph 97 vary
2 therefrom or with other applicable statutory or decisional law, UnitedHealth denies
3 those allegations. UnitedHealth denies the remaining allegations in Paragraph 97.

4 **III. Obligation to Attest to Validity of Risk Adjustment Data**

5 98. To the extent the allegations in Paragraph 98 relate to claims that have
6 been dismissed, they are surplusage and should be stricken. Paragraph 98 contains
7 no allegations with respect to a particular Defendant or claim, and therefore no
8 response is required. However, to the extent Paragraph 98 purports to summarize
9 and/or describe the provisions of the Medicare program, UnitedHealth states that
10 the Medicare statute, regulations, and guidance speak for themselves, and to the
11 extent that the allegations in Paragraph 98 vary therefrom or with other applicable
12 statutory or decisional law, UnitedHealth denies those allegations. Paragraph 98
13 also states legal conclusions to which no response is required.

14 99. To the extent the allegations in Paragraph 99 relate to claims that have
15 been dismissed, they are surplusage and should be stricken. Paragraph 99 contains
16 no allegations with respect to a particular Defendant or claim, and therefore no
17 response is required. However, to the extent Paragraph 99 purports to summarize
18 and/or describe the provisions of the Medicare program, UnitedHealth states that
19 the Medicare statute, regulations, and guidance speak for themselves, and to the
20 extent that the allegations in Paragraph 99 vary therefrom or with other applicable
21 statutory or decisional law, UnitedHealth denies those allegations. Paragraph 99
22 also states legal conclusions to which no response is required. UnitedHealth denies
23 the remaining allegations in Paragraph 99.

24 100. To the extent the allegations in Paragraph 100 relate to claims that
25 have been dismissed, they are surplusage and should be stricken. Paragraph 100
26 contains no allegations with respect to a particular Defendant or claim, and
27 therefore no response is required. However, to the extent Paragraph 100 purports
28 to summarize and/or describe the provisions of the Medicare program,

UnitedHealth states that the Medicare statute, regulations, and guidance speak for themselves, and to the extent that the allegations in Paragraph 100 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. Paragraph 100 also states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 100.

101. To the extent the allegations in Paragraph 101 relate to claims that have been dismissed, they are surplusage and should be stricken. Paragraph 101 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 101 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute, regulations, and guidance speak for themselves, and to the extent that the allegations in Paragraph 101 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. Paragraph 101 also states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 101.

102. To the extent the allegations in Paragraph 102 relate to claims that have been dismissed, they are surplusage and should be stricken. Paragraph 102 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 102 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute, regulations, and guidance speak for themselves, and to the extent that the allegations in Paragraph 102 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. Paragraph 102 also states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 102.

IV. Obligation to Delete Invalid Diagnoses

103. Paragraph 103 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent

Paragraph 103 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute, regulations, and guidance speak for themselves, and to the extent that the allegations in Paragraph 103 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. Paragraph 103 also states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 103.

104. Paragraph 104 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 104 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute, regulations, and guidance speak for themselves, and to the extent that the allegations in Paragraph 104 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. Paragraph 104 also states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 104.

105. To the extent the allegations in Paragraph 105 relate to claims that have been dismissed, they are surplusage and should be stricken. Paragraph 105 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 105 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute, regulations, and guidance speak for themselves, and to the extent that the allegations in Paragraph 105 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. Paragraph 105 also states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 105.

106. Paragraph 106 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent

Paragraph 106 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute, regulations, and guidance speak for themselves, and to the extent that the allegations in Paragraph 106 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. Paragraph 106 also states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 106.

107. Paragraph 107 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 107 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute, regulations, and guidance speak for themselves, and to the extent that the allegations in Paragraph 107 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. Paragraph 107 also states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 107.

108. Paragraph 108 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 108 purports to summarize and/or describe a document or documents, such documents speak for themselves and, as such, no response is required. Paragraph 108 also states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 108.

109. Paragraph 109 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 109 purports to summarize and/or describe a document or documents or data archive, such documents and data archive speak for themselves and, as such, no response is required. Paragraph 109 also states legal conclusions to which no

1 response is required. UnitedHealth denies the remaining allegations in Paragraph
2 109.

3 110. Paragraph 110 contains no allegations with respect to a particular
4 Defendant or claim, and therefore no response is required. However, to the extent
5 Paragraph 110 purports to summarize and/or describe the provisions of the
6 Medicare program, UnitedHealth states that the Medicare statute, regulations, and
7 guidance speak for themselves, and to the extent that the allegations in Paragraph
8 110 vary therefrom or with other applicable statutory or decisional law,
9 UnitedHealth denies those allegations. Paragraph 110 also states legal conclusions
10 to which no response is required. UnitedHealth denies the remaining allegations in
11 Paragraph 110.

12 111. Paragraph 111 contains no allegations with respect to a particular
13 Defendant or claim, and therefore no response is required. However, to the extent
14 Paragraph 111 purports to summarize and/or describe the provisions of the
15 Medicare program, UnitedHealth states that the Medicare statute, regulations, and
16 guidance speak for themselves, and to the extent that the allegations in Paragraph
17 111 vary therefrom or with other applicable statutory or decisional law,
18 UnitedHealth denies those allegations. UnitedHealth denies the remaining
19 allegations in Paragraph 111.

20 112. Paragraph 112 contains no allegations with respect to a particular
21 Defendant or claim, and therefore no response is required. However, to the extent
22 Paragraph 112 purports to summarize and/or describe the provisions of the
23 Medicare program, UnitedHealth states that the Medicare statute, regulations, and
24 guidance speak for themselves, and to the extent that the allegations in Paragraph
25 112 vary therefrom or with other applicable statutory or decisional law,
26 UnitedHealth denies those allegations. UnitedHealth denies the remaining
27 allegations in Paragraph 112.
28

1 113. UnitedHealth admits that Rebecca Martin knew how to make deletes
2 in RAPS. UnitedHealth admits that certain other employees knew the difference
3 between “open-period” and “closed-period” deletes. UnitedHealth denies the
4 remaining allegations in Paragraph 113.

5 114. Paragraph 114 states legal conclusions to which no response is
6 required. To the extent that Paragraph 114 contains any factual allegations
7 regarding UnitedHealth, such allegations are denied. UnitedHealth denies the
8 remaining allegations in Paragraph 114.

9 **THE FALSE CLAIMS ACT**

10 115. To the extent the allegations in Paragraph 115 relate to claims that
11 have been dismissed, they are surplusage and should be stricken. Paragraph 115
12 contains no allegations with respect to a particular Defendant or claim, and
13 therefore no response is required. However, to the extent Paragraph 115 purports
14 to summarize and/or describe the provisions of the FCA, UnitedHealth states that
15 the FCA speaks for itself, and to the extent that the allegations in Paragraph 115
16 vary therefrom or with other applicable statutory or decisional law, UnitedHealth
17 denies those allegations. UnitedHealth denies the remaining allegations in
18 Paragraph 115. Paragraph 115 also states legal conclusions to which no response
19 is required.

20 116. To the extent the allegations in Paragraph 116 relate to claims that
21 have been dismissed, they are surplusage and should be stricken. Paragraph 116
22 contains no allegations with respect to a particular Defendant or claim, and
23 therefore no response is required. However, to the extent Paragraph 116 purports
24 to summarize and/or describe the provisions of the FCA or the Fraud Enforcement
25 and Recovery Act of 2009 (“FERA”), UnitedHealth states that the FCA and FERA
26 speak for themselves, and to the extent that the allegations in Paragraph 116 vary
27 therefrom or with other applicable statutory or decisional law, UnitedHealth denies
28 those allegations. UnitedHealth denies the remaining allegations in Paragraph 116.

1 117. To the extent the allegations in Paragraph 117 relate to claims that
2 have been dismissed, they are surplusage and should be stricken. Paragraph 117
3 contains no allegations with respect to a particular Defendant or claim, and
4 therefore no response is required. However, to the extent Paragraph 117 purports
5 to summarize and/or describe the provisions of the FCA or FERA, UnitedHealth
6 states that the FCA and FERA speak for themselves, and to the extent that the
7 allegations in Paragraph 117 vary therefrom or with other applicable statutory or
8 decisional law, UnitedHealth denies those allegations. UnitedHealth denies the
9 remaining allegations in Paragraph 117.

10 118. Paragraph 118 contains no allegations with respect to a particular
11 Defendant or claim, and therefore no response is required. However, to the extent
12 Paragraph 118 purports to summarize and/or describe the provisions of the FCA or
13 FERA, UnitedHealth states that the FCA and FERA speak for themselves, and to
14 the extent that the allegations in Paragraph 118 vary therefrom or with other
15 applicable statutory or decisional law, UnitedHealth denies those allegations.
16 Paragraph 118 also states legal conclusions to which no response is required.
17 UnitedHealth denies the remaining allegations in Paragraph 118.

18 119. Paragraph 119 contains no allegations with respect to a particular
19 Defendant or claim, and therefore no response is required. However, to the extent
20 Paragraph 119 purports to summarize and/or describe the provisions of the FCA or
21 FERA, UnitedHealth states that the FCA and FERA speak for themselves, and to
22 the extent that the allegations in Paragraph 119 vary therefrom or with other
23 applicable statutory or decisional law, UnitedHealth denies those allegations.
24 UnitedHealth denies the remaining allegations in Paragraph 119.

25 120. Paragraph 120 contains no allegations with respect to a particular
26 Defendant or claim, and therefore no response is required. However, to the extent
27 Paragraph 120 purports to describe the provisions of the FCA, UnitedHealth states
28 that the FCA speaks for itself, and to the extent that the allegations in Paragraph

120 vary therefrom or with other applicable statutory or decisional law, such as *Universal Health Services, Inc. v. United States ex rel. Escobar*, 136 S. Ct. 1989 (2016), UnitedHealth denies those allegations. UnitedHealth denies the remaining allegations in Paragraph 120.

121. Paragraph 121 contains no allegations with respect to a particular Defendant or claim, and therefore no response is required. However, to the extent Paragraph 121 purports to summarize and/or describe the provisions of the FCA and the Bipartisan Budget Act of 2015, Public Law 114-74 (No. 2, 2015) (“BBA”), UnitedHealth states that the FCA and BBA speak for themselves, and to the extent that the allegations in Paragraph 121 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. UnitedHealth denies the remaining allegations in Paragraph 121.

THE FACTS

122. UnitedHealth admits that since at least 2005, certain Defendants conducted a Chart Review program in which millions of medical records were reviewed. To the extent Paragraph 122 purports to describe a document, the document speaks for itself and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 122.

I. Defendants Knew That Many Provider-Reported Diagnoses Were Invalid And That They Were Obligated To Undertake Good Faith Efforts To Identify And Delete Them¹

123. UnitedHealth admits that in connection with its acquisition of PacifiCare in 2005, UnitedHealth retained some PacifiCare employees who had experience performing work relating to risk adjustment. UnitedHealth denies the remaining allegations in Paragraph 123.

¹ The headings and sub-headings throughout the Amended Complaint do not constitute well-pleaded allegations of fact and therefore require no response.

1 124. UnitedHealth admits that Jeffrey Dumcum, Stephanie Will, Pam Holt,
2 and Pam Leal were former employees of PacifiCare who worked in risk
3 adjustment. UnitedHealth admits that Dumcum joined UnitedHealth as Director of
4 Finance at UnitedHealthcare; that Will joined UnitedHealth as Manager of
5 Finance; that Holt joined UnitedHealth as Manager of Network Operations at
6 UnitedHealthcare; and that Leal joined UnitedHealth as Director of Network
7 Management at UnitedHealthcare. UnitedHealth is without knowledge or
8 information sufficient to form a belief as to the truth or falsity of the remaining
9 allegations in Paragraph 124 regarding Holt and Leal's positions at PacifiCare
10 before they joined UnitedHealth; therefore, such allegations are denied.

11 UnitedHealth denies the remaining allegations in Paragraph 124.

12 125. UnitedHealth admits that from 2005 to 2007, Dumcum and Gardner
13 worked at the PacifiCare office in Santa Ana, California, and Holt and Leal worked
14 at the PacifiCare office in Cypress, California. UnitedHealth admits that in March
15 2007, Holt and Leal transferred to an office in Santa Ana, California.

16 UnitedHealth denies the remaining allegations in Paragraph 125.

17 126. To the extent Paragraph 126 purports to describe a document or
18 documents, such documents speak for themselves and, as such, no response is
19 required. UnitedHealth is without knowledge or information sufficient to form a
20 belief as to the truth or falsity of the remaining allegations in Paragraph 126;
21 therefore, such allegations are denied. UnitedHealth denies the remaining
22 allegations in Paragraph 126.

23 127. UnitedHealth admits that the Industry Collaboration Effort ("ICE")
24 was a volunteer, multi-disciplinary team of providers, health plans, associations,
25 state and federal agencies, and accrediting bodies working collaboratively to
26 improve healthcare regulatory compliance through education of the public.
27 UnitedHealth admits that ICE had a Risk Adjustment Data Acquisition &
28 Reporting ("RADAR") team. UnitedHealth further admits that after UnitedHealth

1 acquired PacifiCare, some former PacifiCare employees participated in ICE and its
2 RADAR team. UnitedHealth admits that Leal was the President and a member of
3 the Board of Directors of ICE around or before 2007. To the extent Paragraph 127
4 purports to describe a document or documents, such documents speak for
5 themselves and, as such, no response is required. UnitedHealth denies the
6 remaining allegations in Paragraph 127.

7 128. To the extent Paragraph 128 purports to describe a document or
8 documents, such documents speak for themselves and, as such, no response is
9 required. UnitedHealth denies the remaining allegations in Paragraph 128.

10 129. To the extent Paragraph 129 describes these documents, such
11 documents speak for themselves and, as such, no response is required.
12 UnitedHealth is without knowledge or information sufficient to form a belief as to
13 the truth or falsity of the remaining allegations in Paragraph 129; therefore, such
14 allegations are denied. UnitedHealth denies the remaining allegations in Paragraph
15 129.

16 130. To the extent Paragraph 130 purports to describe a document or
17 documents, such documents speak for themselves and, as such, no response is
18 required. UnitedHealth is without knowledge or information sufficient to form a
19 belief as to the truth or falsity of the remaining allegations in Paragraph 130;
20 therefore, such allegations are denied. UnitedHealth denies the remaining
21 allegations in Paragraph 130.

22 131. To the extent Paragraph 131 purports to describe a document or
23 documents, such documents speak for themselves and, as such, no response is
24 required. UnitedHealth is without knowledge or information sufficient to form a
25 belief as to the truth or falsity of the remaining allegations in Paragraph 131;
26 therefore, such allegations are denied.

27 132. UnitedHealth admits that the former PacifiCare employees were
28 aware that CMS could audit the diagnoses MA Organizations submitted for risk

1 adjustment payments. UnitedHealth denies the remaining allegations in Paragraph
2 132.

3 133. To the extent Paragraph 133 purports to describe a document or
4 documents, such documents speak for themselves and, as such, no response is
5 required. UnitedHealth is without knowledge or information sufficient to form a
6 belief as to the truth or falsity of the remaining allegations in Paragraph 133;
7 therefore, such allegations are denied. UnitedHealth denies the remaining
8 allegations in Paragraph 133.

9 134. To the extent Paragraph 134 purports to describe a document or
10 documents, such documents speak for themselves and, as such, no response is
11 required. UnitedHealth denies the remaining allegations in Paragraph 134.

12 135. UnitedHealth admits that after UnitedHealth's acquisition of
13 PacifiCare, Jeff Dumcum gave presentations to various UnitedHealth employees
14 regarding provider coding. To the extent Paragraph 135 purports to describe
15 documents, the documents speak for themselves and, as such, no response is
16 required. UnitedHealth is without knowledge or information sufficient to form a
17 belief as to the truth or falsity of the remaining allegations in Paragraph 135;
18 therefore, such allegations are denied. UnitedHealth denies the remaining
19 allegations in Paragraph 135.

20 136. To the extent Paragraph 136 purports to describe a document or
21 documents, such documents speak for themselves and, as such, no response is
22 required. UnitedHealth denies the remaining allegations in Paragraph 136.

23 137. UnitedHealth admits that in or about 2007, certain risk adjustment
24 operations moved to Ingenix. Additionally, UnitedHealth admits that Ingenix
25 served commercial clients. To the extent Paragraph 137 purports to describe a
26 document or documents, such documents speak for themselves and, as such, no
27 response is required. UnitedHealth denies the remaining allegations in Paragraph
28 137.

1 138. To the extent Paragraph 138 purports to describe a document or
2 documents, such documents speak for themselves and, as such, no response is
3 required. UnitedHealth is without knowledge or information sufficient to form a
4 belief as to the truth or falsity of the allegations in Paragraph 138; therefore, such
5 allegations are denied. UnitedHealth denies the remaining allegations in Paragraph
6 138.

7 139. UnitedHealth admits that it implemented an internal data validation
8 program on or about 2007 or 2008. To the extent Paragraph 139 purports to
9 describe a document or documents, the documents speak for themselves and, as
10 such, no response is required. UnitedHealth denies the remaining allegations in
11 Paragraph 139.

12 140. To the extent Paragraph 140 purports to describe a document or
13 documents, such documents speak for themselves and, as such, no response is
14 required. UnitedHealth is without knowledge or information sufficient to form a
15 belief as to the truth or falsity of the allegations in Paragraph 140; therefore, such
16 allegations are denied. UnitedHealth denies the remaining allegations in Paragraph
17 140.

18 141. UnitedHealth admits that CMS performed RADV audits.
19 UnitedHealth admits that Ingenix and then Optum performed IDV and RACCR to
20 review provider-reported diagnoses. To the extent Paragraph 141 purports to
21 describe a document or documents, such documents speak for themselves and, as
22 such, no response is required. UnitedHealth denies the remaining allegations in
23 Paragraph 141.

24 142. To the extent Paragraph 142 purports to describe a document or
25 documents, such documents speak for themselves and, as such, no response is
26 required. UnitedHealth denies the remaining allegations in Paragraph 142.

27 143. UnitedHealth admits that Ingenix implemented an internal data
28 validation program in or around 2007 or 2008. To the extent Paragraph 143

purports to describe a document or documents, the documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 143.

144. To the extent Paragraph 144 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 144.

145. To the extent Paragraph 145 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 145.

146. To the extent Paragraph 146 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 146.

147. UnitedHealth admits that Larry Renfro was the Chief Executive Officer of PSMG in or around May 2010. To the extent Paragraph 147 contains legal conclusions, no response is required. To the extent Paragraph 147 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. Additionally, to the extent Paragraph 147 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute and regulations speak for themselves, and to the extent that the allegations in Paragraph 147 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. UnitedHealth denies the remaining allegations in Paragraph 147.

148. UnitedHealth admits that Kimberly Halva was UnitedHealth Medicare & Retirement's Finance Compliance Officer from 2010 to 2013. UnitedHealth admits that Scott Theisen was the Chief Financial Officer of UnitedHealthcare Medicare & Retirement from in or around 2010 to 2013. To the extent Paragraph 148 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent Paragraph 148

contains legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 148.

149. To the extent Paragraph 149 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 149.

150. To the extent the allegations in Paragraph 150 relate to claims that have been dismissed, they are surplusage and should be stricken. To the extent Paragraph 150 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth admits that, since in or around 2008, certain provider groups submitted attestations to some of the UnitedHealth Defendants certifying that the diagnoses that they reported to some of the UnitedHealth Defendants were valid and met CMS's requirements. UnitedHealth denies the remaining allegations in Paragraph 150.

151. To the extent Paragraph 151 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 151.

152. To the extent Paragraph 152 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent a response is required, UnitedHealth denies the allegations in Paragraph 152.

153. To the extent Paragraph 153 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 153.

154. To the extent Paragraph 154 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 154.

1 155. To the extent Paragraph 155 purports to describe a document or
2 documents, such documents speak for themselves and, as such, no response is
3 required. UnitedHealth denies the remaining allegations in Paragraph 155.

4 156. To the extent Paragraph 156 purports to describe a document or
5 documents, such documents speak for themselves and, as such, no response is
6 required. UnitedHealth denies the remaining allegations in Paragraph 156.

7 157. UnitedHealth admits that UnitedHealthcare Medicare & Retirement
8 implemented the program eventually known as the RACCR program in or about
9 2009. To the extent Paragraph 157 purports to describe a document or documents,
10 such documents speak for themselves and, as such, no response is required. To the
11 extent Paragraph 157 states a legal conclusion, no response is required.
12 UnitedHealth denies the remaining allegations in Paragraph 157.

13 158. UnitedHealth admits that its Claims Verification (“CV”) program was
14 implemented in phases, that Phase I of the CV Program was performed in or
15 around 2010, and that Phase II of the CV Program was performed in or around late
16 2011 or early 2012. To the extent Paragraph 158 purports to describe a document
17 or documents, such documents speak for themselves and, as such, no response is
18 required. UnitedHealth denies the remaining allegations in Paragraph 158.

19 159. To the extent Paragraph 159 purports to describe a document or
20 documents, such documents speak for themselves and, as such, no response is
21 required. UnitedHealth denies the remaining allegations in Paragraph 159.

22 160. To the extent Paragraph 160 purports to describe a document or
23 documents, such documents speak for themselves and, as such, no response is
24 required. UnitedHealth denies the remaining allegations in Paragraph 160.

25 161. To the extent that Paragraph 161 contains legal conclusions, no
26 response is required. To the extent Paragraph 161 purports to describe a document
27 or documents, such documents speak for themselves and, as such, no response is
28 required. UnitedHealth denies the remaining allegations in Paragraph 161.

1 162. To the extent Paragraph 162 purports to describe a document or
2 documents, such documents speak for themselves and, as such, no response is
3 required. UnitedHealth denies the remaining allegations in Paragraph 162.

4 163. To the extent that Paragraph 163 contains legal conclusions, no
5 response is required. To the extent Paragraph 163 purports to describe a document
6 or documents, such documents speak for themselves and, as such, no response is
7 required. UnitedHealth denies the remaining allegations in Paragraph 163.

8 **II. Chart Reviews and Claims Verification**

9 **A. United's "Look One Way" Chart Review Program**

10 164. UnitedHealth admits that as part of its Chart Review Program, coders
11 reviewed beneficiaries' medical records. To the extent Paragraph 164 purports to
12 describe a document or documents, such documents speak for themselves and, as
13 such, no response is required. UnitedHealth denies the remaining allegations in
14 Paragraph 164.

15 165. UnitedHealth admits that some of the UnitedHealth Defendants have
16 performed some form of Chart Review since 2005. UnitedHealth admits that
17 Dumcum and Will became key participants in the Chart Review Program and that
18 Will was the Program Manager of the Chart Review Program. UnitedHealth is
19 without knowledge or information as to the identity of the "other former
20 PacificCare employees sufficient to form a belief as to the truth or falsity of the
21 remaining allegations in Paragraph 165; therefore, such allegations are denied.
22 UnitedHealth denies the remaining allegations in Paragraph 165.

23 166. UnitedHealth admits that hundreds of thousands of charts were
24 reviewed over the first few years of the Chart Review Program. To the extent
25 Paragraph 166 purports to describe a document or documents, such documents
26 speak for themselves and, as such, no response is required. UnitedHealth denies
27 the remaining allegations in Paragraph 166.

28

1 167. UnitedHealth admits that UnitedHealth Group Incorporated acquired
2 AIM Healthcare Services, Inc. in or around 2009. UnitedHealth admits that in or
3 about 2010, Ingenix developed ChartSync—an in-house chart review computer
4 database system that allowed coders to review medical records electronically—and
5 that in or about 2012 and 2011, Ingenix opened offices in the Philippines and
6 India, respectively, where coders could review codes. UnitedHealth denies the
7 remaining allegations in Paragraph 167.

8 168. To the extent Paragraph 168 purports to describe a document or
9 documents, such documents speak for themselves and, as such, no response is
10 required. UnitedHealth denies the remaining allegations in Paragraph 168.

11 169. To the extent Paragraph 169 purports to describe a document or
12 documents, such documents speak for themselves and, as such, no response is
13 required. UnitedHealth denies the remaining allegations in Paragraph 169.

14 170. UnitedHealth admits that Ingenix and then Optum or their vendors
15 obtained medical records from fee-for-service providers in numerous places in the
16 United States. UnitedHealth admits that Ingenix and then Optum or their vendors
17 sent some of these medical records to coders employed in Tennessee, India, and
18 the Philippines. UnitedHealth admits that Ingenix and then Optum hired coding
19 vendors located in various locations within and outside of the United States to
20 review medical records. UnitedHealth denies the remaining allegations in
21 Paragraph 170.

22 171. UnitedHealth admits chart review was conducted by or on behalf of
23 certain physician groups, including WellMed and Southwest Medical Associates.
24 UnitedHealth denies the remaining allegations in Paragraph 171.

25 172. To the extent Paragraph 172 purports to describe a document or
26 documents, such documents speak for themselves and, as such, no response is
27 required. UnitedHealth denies the remaining allegations in Paragraph 172.
28

1 173. To the extent Paragraph 173 purports to describe a document or
2 documents, such documents speak for themselves and, as such, no response is
3 required. UnitedHealth denies the remaining allegations in Paragraph 173.

4 174. To the extent Paragraph 174 purports to describe a document or
5 documents, such documents speak for themselves and, as such, no response is
6 required. UnitedHealth denies the remaining allegations in Paragraph 174.

7 175. UnitedHealth admits that its Chart Review Program was conducted
8 according to an annual cycle. To the extent Paragraph 175 purports to describe a
9 document or documents, such documents speak for themselves and, as such, no
10 response is required. UnitedHealth denies the remaining allegations in Paragraph
11 175.

12 176. UnitedHealth admits that some of the UnitedHealth Defendants had
13 revenue estimates for the Chart Review Program. UnitedHealth admits that some
14 of the UnitedHealth Defendants identified more codes supported by records
15 through subsequent reviews. To the extent Paragraph 176 purports to describe a
16 document or documents, such documents speak for themselves and, as such, no
17 response is required. UnitedHealth denies the remaining allegations in Paragraph
18 176.

19 177. To the extent the allegations in Paragraph 177 relate to claims that
20 have been dismissed, they are surplusage and should be stricken. To the extent
21 Paragraph 177 states legal conclusions, no response is required. UnitedHealth
22 denies the remaining allegations in Paragraph 177.

23 **B. United Knew It Was Obligated To Look Both Ways At The**
24 **Results Of Its Chart Reviews And Make DELETES As Well As**
25 **ADDS**

26 178. To the extent Paragraph 178 purports to describe a document, the
27 document speaks for itself and, as such, no response is required. UnitedHealth is
28 without knowledge or information sufficient to form a belief as to the truth or

1 falsity of Poehling's discussions and the allegations in Paragraph 178.

2 UnitedHealth denies the remaining allegations in Paragraph 178.

3 179. UnitedHealth denies that there were problems related to the diagnoses
4 reported by providers paid on a fee-for-service basis. To the extent Paragraph 179
5 purports to describe a document, the document speaks for itself and, as such, no
6 response is required. UnitedHealth is without knowledge or information sufficient
7 to form a belief as to the truth or falsity of the remaining allegations in Paragraph
8 179; therefore, such allegations are denied. UnitedHealth denies the remaining
9 allegations in Paragraph 179.

10 180. To the extent Paragraph 180 purports to describe a document or
11 documents, such documents speak for themselves and, as such, no response is
12 required. UnitedHealth is without knowledge or information sufficient to form a
13 belief as to the truth or falsity of the allegations in Paragraph 180; therefore, such
14 allegations are denied.

15 181. To the extent Paragraph 181 purports to describe a document or
16 documents, such documents speak for themselves and, as such, no response is
17 required. UnitedHealth is without knowledge or information sufficient to form a
18 belief as to the truth or falsity of the allegations in Paragraph 181; therefore, such
19 allegations are denied. UnitedHealth denies the remaining allegations in Paragraph
20 181.

21 182. To the extent Paragraph 182 purports to describe a document or
22 documents, such documents speak for themselves and, as such, no response is
23 required. UnitedHealth denies the remaining allegations in Paragraph 182.

24 183. To the extent Paragraph 183 purports to describe a document or
25 documents, such documents speak for themselves and, as such, no response is
26 required. UnitedHealth denies the remaining allegations in Paragraph 183.

27

28

1 184. To the extent Paragraph 184 purports to describe a document, the
2 document speaks for itself and, as such, no response is required. UnitedHealth
3 denies the remaining allegations in Paragraph 184.

4 185. To the extent Paragraph 185 purports to describe a document, the
5 document speaks for itself and, as such, no response is required. To the extent
6 Paragraph 186 states legal conclusions, no response is required. UnitedHealth
7 denies the remaining allegations in Paragraph 185.

8 186. UnitedHealth admits that Paul Bihm was a Vice President of General
9 Management at Optum in or around 2011. To the extent Paragraph 186 purports to
10 describe a document, the document speaks for itself and, as such, no response is
11 required. UnitedHealth denies the remaining allegations in Paragraph 186.

12 187. To the extent Paragraph 187 purports to describe a document or
13 documents, such documents speak for themselves and, as such, no response is
14 required. UnitedHealth denies the remaining allegations in Paragraph 187.

15 188. UnitedHealth admits that Eric Murphy was the President of Payer
16 Solutions at Optum in or around December 2011. To the extent Paragraph 188
17 purports to describe a document or documents, such documents speak for
18 themselves and, as such, no response is required. UnitedHealth denies the
19 remaining allegations in Paragraph 188.

20 189. To the extent Paragraph 189 purports to describe a document or
21 documents, such documents speak for themselves and, as such, no response is
22 required. UnitedHealth denies the remaining allegations in Paragraph 189.

23 190. UnitedHealth admits that William Miller was the Chief Executive
24 Officer of OptumInsight in or around September 2012. To the extent Paragraph
25 190 purports to describe a document or documents, such documents speak for
26 themselves and, as such, no response is required. To the extent Paragraph 190
27 states legal conclusions, no response is required. UnitedHealth denies the
28 remaining allegations in Paragraph 190.

1 191. UnitedHealth admits that prior to 2012, coders reviewed medical
2 records at providers' offices if the coder could not review the records electronically
3 because the provider did not want UnitedHealth to copy the record. UnitedHealth
4 further admits that UnitedHealthcare Medicare & Retirement made a policy
5 decision to stop this practice. To the extent Paragraph 191 purports to describe a
6 document or documents, such documents speak for themselves and, as such, no
7 response is required. UnitedHealth denies the remaining allegations in Paragraph
8 191.

9 192. To the extent Paragraph 193 purports to describe a document or
10 documents, such documents speak for themselves and, as such, no response is
11 required. UnitedHealth denies the remaining allegations in Paragraph 193.

12 193. To the extent Paragraph 193 purports to describe a document or
13 documents, such documents speak for themselves and, as such, no response is
14 required. UnitedHealth denies the remaining allegations in Paragraph 193.

15 194. To the extent Paragraph 194 purports to describe a document or
16 documents, such documents speak for themselves and, as such, no response is
17 required. UnitedHealth denies the remaining allegations in Paragraph 194.

18 195. To the extent Paragraph 195 purports to describe a document or
19 documents, such documents speak for themselves and, as such, no response is
20 required. UnitedHealth is without knowledge or information sufficient to form a
21 belief as to the truth or falsity of the remaining allegations in Paragraph 195;
22 therefore, such allegations are denied.

23 **C. United's Short-lived "Look Both Ways" Claims Verification**
24 **Program**

25 196. To the extent Paragraph 196 purports to describe a document or
26 documents, such documents speak for themselves and, as such, no response is
27 required. UnitedHealth denies the remaining allegations in Paragraph 196.
28

1 197. To the extent Paragraph 197 purports to describe a document or
2 documents, such documents speak for themselves and, as such, no response is
3 required. UnitedHealth denies the remaining allegations in Paragraph 197.

4 198. To the extent Paragraph 198 purports to describe a document or
5 documents, such documents speak for themselves and, as such, no response is
6 required. UnitedHealth denies the remaining allegations in Paragraph 198.

7 199. To the extent Paragraph 199 purports to describe a document or
8 documents, such documents speak for themselves and, as such, no response is
9 required. UnitedHealth denies the remaining allegations in Paragraph 199.

10 200. To the extent Paragraph 200 purports to describe a document or
11 documents, such documents speak for themselves and, as such, no response is
12 required. UnitedHealth denies the remaining allegations in Paragraph 200.

13 201. UnitedHealth admits that in or around 2012, UnitedHealthcare
14 Medicare & Retirement sent letters to capitated providers. To the extent Paragraph
15 201 purports to describe a document or documents, such documents speak for
16 themselves and, as such, no response is required. UnitedHealth denies the
17 remaining allegations in Paragraph 201.

18 202. UnitedHealth admits that UnitedHealthcare Medicare & Retirement
19 and Optum developed and implemented CV in phases over several years.
20 UnitedHealth admits that when there was a discrepancy between the provider-
21 reported diagnoses and the diagnosis codes identified by the coder as part of the
22 Chart Review Program, Optum undertook an additional review of the medical
23 record. UnitedHealth admits Optum did not delete diagnosis codes that were found
24 to be adequately supported by the medical record. To the extent Paragraph 202
25 purports to describe a document or documents, such documents speak for
26 themselves and, as such, no response is required. To the extent Paragraph 202
27 states legal conclusions, no response is required. UnitedHealth denies the
28 remaining allegations in Paragraph 202.

203. UnitedHealth admits that Optum did not generally contact providers during the CV process. UnitedHealth denies the remaining allegations in Paragraph 203.

204. To the extent Paragraph 204 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent Paragraph 204 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 204.

205. UnitedHealth denies the allegations in Paragraph 205.

206. To the extent Paragraph 206 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 206.

207. UnitedHealth admits that as part of Phase I, Ingenix sometimes contacted providers to determine whether or not there were additional medical records for particular beneficiaries. To the extent Paragraph 207 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 207.

208. UnitedHealth admits that Optum began conducting Phase II of its CV Program in approximately mid-2011 and that Phase II was completed in approximately early 2012. To the extent Paragraph 208 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent Paragraph 208 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 208.

209. UnitedHealth admits that Optum began the Phase III pilot in or about mid-2012. UnitedHealth admits that the Phase III pilot included a review of approximately 5,000 charts relating to encounters that took place in calendar year 2011. To the extent Paragraph 209 purports to describe a document or documents,

1 such documents speak for themselves and, as such, no response is required.

2 UnitedHealth denies the remaining allegations in Paragraph 209.

3 210. To the extent Paragraph 210 purports to describe a document or
4 documents, such documents speak for themselves and, as such, no response is
5 required. UnitedHealth denies the remaining allegations in Paragraph 210.

6 211. UnitedHealth admits that the CV Program continued to evolve after
7 research regarding how to structure the CV Program to best meet the goals of
8 identifying diagnosis codes that were unsupported by the medical record.
9 UnitedHealth admits that, as a result of that research, UnitedHealthcare Medicare
10 & Retirement added an expert-level review to the CV process. UnitedHealth
11 admits that UnitedHealthcare Medicare & Retirement discontinued its CV Program
12 in 2014. UnitedHealth denies the remaining allegations in Paragraph 211.

13 212. UnitedHealth admits that certain eligibility criteria were applied to
14 determine eligibility for inclusion in the CV Program. To the extent Paragraph 212
15 purports to describe a document, the document speaks for itself and, as such, no
16 response is required. To the extent Paragraph 213 states legal conclusions, no
17 response is required. UnitedHealth denies the remaining allegations in Paragraph
18 212.

19 213. UnitedHealth admits that, in or about 2013, UnitedHealthcare
20 Medicare & Retirement decided to add an expert-level review to the CV process.
21 To the extent Paragraph 213 purports to describe a document, the document speaks
22 for itself and, as such, no response is required. UnitedHealth denies the remaining
23 allegations in Paragraph 213.

24 214. To the extent Paragraph 214 states legal conclusions, no response is
25 required. UnitedHealth denies the remaining allegations in Paragraph 214.

26 215. To the extent Paragraph 215 purports to describe a document or
27 documents, such documents speak for themselves and, as such, no response is
28 required. UnitedHealth denies the remaining allegations in Paragraph 215.

216. To the extent Paragraph 216 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 216.

217. To the extent Paragraph 217 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 217.

218. To the extent Paragraph 218 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 218.

219. To the extent Paragraph 219 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 219.

220. To the extent Paragraph 220 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 220.

221. UnitedHealth admits that Marybeth Meyer assumed Mr. Poehling's role after he left the Company. To the extent Paragraph 221 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 221.

222. To the extent Paragraph 222 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 222.

223. UnitedHealth admits that, before UnitedHealthcare Medicare & Retirement discontinued the CV Program, UnitedHealthcare Medicare & Retirement and Optum sought guidance from CMS about the retroactivity of a proposed regulation requiring MA Organizations to design all medical record reviews to validate diagnoses submitted to CMS ("Proposed Rule"). To the extent

Paragraph 223 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 223.

224. UnitedHealth admits that Larry Renfro, the Chief Executive Officer of Optum, contacted senior government employees at CMS, including the Administrator of CMS, to ask whether UnitedHealth had an obligation to perform CV before the effective date of the Proposed Rule. To the extent Paragraph 224 purports to describe a document, the document speaks for itself and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 224.

225. UnitedHealth admits that on April 8, 2014, Renfro spoke with the CMS Administrator regarding UnitedHealth's obligation to perform CV in light of the Proposed Rule. To the extent Paragraph 225 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 225.

226. UnitedHealth admits that Nelson, Schumacher, Erickson, and Johnson went to Washington, D.C. on April 29, 2014 to speak with CMS employees responsible for the Medicare Advantage Program, including Cheri Rice, the Director of the Medicare Plan Payment Group at CMS. To the extent Paragraph 226 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent Paragraph 226 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 226.

227. To the extent Paragraph 227 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 227.

228. To the extent the allegations in Paragraph 228 relate to claims that have been dismissed, they are surplusage and should be stricken. To the extent

Paragraph 228 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 228.

229. UnitedHealth admits that the Department of Justice sent a letter to UnitedHealth's counsel after Rice sent her May 2 email. To the extent Paragraph 229 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 229.

230. To the extent Paragraph 230 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 230.

231. UnitedHealth admits that UnitedHealthcare Medicare & Retirement decided to discontinue its CV Program on or about May 27, 2014. To the extent Paragraph 231 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 231.

232. UnitedHealth denies the allegations in Paragraph 232.

233. UnitedHealth admits that Optum continued performing chart review for UnitedHealthcare after CV was discontinued. To the extent Paragraph 233 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 233.

234. To the extent Paragraph 234 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 234.

D. United Failed to Delete Diagnoses Invalidated By Its Own Chart Review Program

235. To the extent Paragraph 235 purports to describe a document, the document speaks for itself and, as such, no response is required. To the extent

Paragraph 235 states legal conclusions, no response is required. UnitedHealth is without knowledge or information sufficient to form a belief as to the truth or falsity of the allegations in Paragraph 235; therefore, such allegations are denied. UnitedHealth denies the remaining allegations in Paragraph 235.

236. To the extent that Paragraph 236 contains legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 236.

237. To the extent that Paragraph 237 contains legal conclusions, no response is required. UnitedHealth is without knowledge or information sufficient to form a belief as to the truth or falsity of the allegations in Paragraph 237; therefore, such allegations are denied. UnitedHealth denies the remaining allegations in Paragraph 237.

238. To the extent Paragraph 238 purports to describe the Complaint, the Complaint is a legal document that speaks for itself and, as such, no response is required. To the extent that Paragraph 238 contains any factual allegations regarding UnitedHealth, such allegations are denied. UnitedHealth is without knowledge or information sufficient to form a belief as to the truth or falsity of the allegations in Paragraph 238; therefore, such allegations are denied. To the extent that Paragraph 238 contains legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 238.

III. The RACCR Program

239. UnitedHealth admits that some of the UnitedHealth Defendants conducted the Chart Review and RACCR Programs. To the extent Paragraph 239 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 239.

**A. Defendants Knew That Their Financially-Incentivized Providers
Were Reporting Invalid Codes**

240. UnitedHealth admits that some of the UnitedHealth Defendants have arrangements that are value-based either in full or in part with providers, and to the extent Paragraph 240 purports to describe the contracts underlying these arrangements, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 240.

241. UnitedHealth admits that UnitedHealthcare Medicare & Retirement implemented RACCR to address and safeguard against potentially inaccurate coding by provider groups whose revenue was tied to risk adjustment revenue from CMS. To the extent Paragraph 241 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 241.

242. UnitedHealth admits Ingenix implemented an internal data validation program in or about 2007 or 2008. UnitedHealth admits that UnitedHealthcare Medicare & Retirement implemented the program eventually known as RACCR on or about 2009. UnitedHealth admits that the stated goal of RACCR is to address and safeguard against potentially inaccurate coding by provider groups whose revenue is tied to risk adjustment revenue from CMS. UnitedHealth denies the remaining allegations in Paragraph 242.

243. To the extent Paragraph 243 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 243.

**B. UnitedHealthcare Structured The RACCR Program To Limit
The Number Of Invalid Diagnosis Codes It Identified**

244. To the extent Paragraph 244 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 244.

245. UnitedHealth denies the allegations in Paragraph 245.

246. To the extent Paragraph 246 purports to describe a document, the document speaks for itself and, as such, no response is required. UnitedHealth is without knowledge or information sufficient to form a belief as to the truth or falsity of the allegations in Paragraph 246; therefore, such allegations are denied. UnitedHealth denies the remaining allegations in Paragraph 246.

247. UnitedHealth admits that for DOS 2008, 2009, and 2010 RACCR reviews, Optum defined outliers as HCCs that provider groups coded with a prevalence frequency of greater than 300% of the Optum National Rate (sometimes referred to as the national prevalence rate). UnitedHealth is without knowledge or information sufficient to form a belief as to the truth or falsity of the remaining allegations in Paragraph 247; therefore, such allegations are denied. To the extent Paragraph 247 purports to describe a document, the document speaks for itself and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 247.

248. UnitedHealth admits that for DOS 2011 and DOS 2012 RACCR reviews, Optum defined outliers as HCCs that provider groups coded with a prevalence frequency greater than two standard deviations of the Optum National Rate, which for those DOS years was calculated based on data from all providers classified as Tier 1 provider groups. UnitedHealth denies the remaining allegations in Paragraph 248.

249. UnitedHealth admits that some of its capitated providers are located in the Central District of California. UnitedHealth admits that Exhibit 14 lists capitated providers involved in RACCR reviews that are also located in the Central District of California. UnitedHealth denies the remaining allegations in Paragraph 249.

250. UnitedHealth admits that the sample size for 2011 and 2012 dates of service RACCR reviews was set at 50 beneficiaries per provider group per HCC selected for review. To the extent Paragraph 250 purports to describe a document

1 or documents, such documents speak for themselves and, as such, no response is
2 required. UnitedHealth denies the remaining allegations in Paragraph 250.

3 251. UnitedHealth admits that RACCR reviews focused on provider groups
4 where the HCCs selected for RACCR reviews did not attain a validation rate of
5 greater than 80%. To the extent Paragraph 251 states legal conclusions, no
6 response is required. UnitedHealth denies the remaining allegations in Paragraph
7 251.

8 252. UnitedHealth admits that for DOS 2008 and 2009 RACCR reviews,
9 Optum increased the number of members whose charts were reviewed for HCCs
10 that did not validate at greater than 80% based on the initial sample and that it
11 called this process an “incremental sample.” UnitedHealth admits that RACCR
12 reviews focused on provider groups where the HCCs selected for RACCR reviews
13 did not attain a validation rate of greater than 80%. To the extent Paragraph 252
14 purports to describe a document or documents, such documents speak for
15 themselves and, as such, no response is required. To the extent Paragraph 252
16 states legal conclusions, no response is required. UnitedHealth denies the
17 remaining allegations in Paragraph 252.

18 253. UnitedHealth admits that for DOS 2008 through DOS 2011,
19 lookbacks focused on instances in which an HCC validated at 80% or less at the
20 provider group level during RACCR sample reviews. To the extent Paragraph 253
21 purports to describe a document or documents, such documents speak for
22 themselves and, as such, no response is required. UnitedHealth denies the
23 remaining allegations in Paragraph 253.

24 **C. Despite Its Limited Scope, The RACCR Program Confirmed That**
25 **Financially Incentivized Providers Were Submitting Invalid**
26 **Diagnosis Codes**

27 254. UnitedHealth denies the allegations in Paragraph 254.
28

255. To the extent Paragraph 255 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 255.

256. To the extent Paragraph 256 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 256.

257. To the extent Paragraph 257 purports to describe a document, the document speaks for itself and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 257.

258. To the extent Paragraph 258 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 258.

259. To the extent Paragraph 259 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent Paragraph 259 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 259.

260. To the extent Paragraph 260 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth is without knowledge or information sufficient to form a belief as to the truth or falsity of the allegations in Paragraph 260; therefore, such allegations are denied. UnitedHealth denies the remaining allegations in Paragraph 260.

261. To the extent Paragraph 261 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent Paragraph 261 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 261.

262. To the extent Paragraph 262 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 262.

263. To the extent Paragraph 263 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 263.

264. To the extent Paragraph 264 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 264.

**D. UnitedHealthcare Knew It Was Obligated To Delete Invalid
Diagnosis Codes Identified Through The RACCR Reviews**

265. To the extent Paragraph 265 states legal conclusions, no response is required. To the extent Paragraph 265 purports to describe a document, the document speaks for itself and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 265.

266. UnitedHealth admits that Optum deleted diagnosis codes for DOS 2008 through DOS 2013 as a result of its RACCR reviews. To the extent Paragraph 266 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent Paragraph 266 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 266.

267. To the extent Paragraph 267 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent Paragraph 267 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 267.

268. To the extent Paragraph 268 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 268.

269. To the extent Paragraph 269 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 269.

270. To the extent Paragraph 270 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 270.

271. To the extent Paragraph 271 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 271.

272. Paragraph 272 states legal conclusions to which no response is required. To the extent that Paragraph 272 contains any factual allegations, such allegations are denied. UnitedHealth denies the remaining allegations in Paragraph 272.

273. Paragraph 273 states legal conclusions to which no response is required. To the extent Paragraph 273 contains any factual allegations, such allegations are denied. UnitedHealth denies the remaining allegations in Paragraph 273.

**E. Defendants Failed To Follow Their Own RACCR Protocol
Requiring 100 Percent Reviews**

274. UnitedHealth admits that for DOS 2008 through DOS 2011, lookbacks focused on instances in which an HCC validated at 80% or less at the provider group level during RACCR sample reviews. To the extent Paragraph 274 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 274.

275. Paragraph 275 contains no allegations with respect to a particular Defendant or claim and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 275.

276. To the extent Paragraph 276 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent Paragraph 276 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 276.

277. To the extent Paragraph 277 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent Paragraph 277 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 277.

278. To the extent Paragraph 278 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 278.

279. To the extent Paragraph 279 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 279.

F. Even After Identifying Miscoding By Providers, Defendants Failed To Delete Invalid Codes

280. To the extent Paragraph 280 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth is without knowledge or information sufficient to form a belief as to the truth or falsity of the allegations in Paragraph 280; therefore, such allegations are denied. UnitedHealth denies the remaining allegations in Paragraph 280.

281. To the extent Paragraph 281 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent Paragraph 281 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 281.

**G. UnitedHealthcare Medicare & Retirement Discontinued 100
Percent Reviews And Converted The RACCR Program Into A
Revenue Generating Program**

282. UnitedHealth admits that during the first half of 2014,
UnitedHealthcare Medicare & Retirement made changes to the RACCR Program.
To the extent Paragraph 282 states legal conclusions, no response is required.
UnitedHealth denies the remaining allegations in Paragraph 282.

283. UnitedHealth admits that beginning with DOS 2012,
UnitedHealthcare Medicare & Retirement refocused RACCR such that it did not
require providers to conduct lookback reviews. UnitedHealth denies the remaining
allegations in Paragraph 283.

284. To the extent Paragraph 284 purports to describe a document or
documents, such documents speak for themselves and, as such, no response is
required. UnitedHealth denies the remaining allegations in Paragraph 284.

285. UnitedHealth admits that beginning with DOS 2013 RACCR reviews,
UnitedHealthcare Medicare & Retirement used a different methodology to select
medical records. UnitedHealth denies the remaining allegations in Paragraph 285.

286. To the extent Paragraph 286 purports to describe a document or
documents, such documents speak for themselves and, as such, no response is
required. UnitedHealth denies the remaining allegations in Paragraph 286.

287. Paragraph 287 states legal conclusions to which no response is
required. To the extent Paragraph 287 contains any factual allegations, such
allegations are denied. UnitedHealth denies the remaining allegations in Paragraph
287.

288. UnitedHealth admits that during the first half of 2014,
UnitedHealthcare Medicare & Retirement made changes to the RACCR Program.
UnitedHealth denies the remaining allegations in Paragraph 288.

H. RACCR-Related Falsehoods In UnitedHealthcare's And Optum's Attestations

289. To the extent the allegations in Paragraph 289 relate to claims that have been dismissed, they are surplusage and should be stricken. UnitedHealthcare admits that it has submitted Risk Adjustment Attestations to the Medicare Program. UnitedHealth admits that Optum approved these Attestations before they were submitted.

290. To the extent the allegations in Paragraph 290 relate to claims that have been dismissed, they are surplusage and should be stricken. To the extent Paragraph 290 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent Paragraph 290 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 290.

291. To the extent the allegations in Paragraph 291 relate to claims that have been dismissed, they are surplusage and should be stricken. To the extent Paragraph 291 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent Paragraph 291 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 291.

292. To the extent the allegations in Paragraph 292 relate to claims that have been dismissed, they are surplusage and should be stricken. To the extent Paragraph 292 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent Paragraph 292 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 292.

IV. Defendants' False Risk Adjustment Attestations

293. To the extent the allegations in Paragraph 293 relate to claims that have been dismissed, they are surplusage and should be stricken. UnitedHealth

1 admits that UnitedHealthcare is required to submit a truthful Risk Adjustment
2 Attestation to the Medicare Program. UnitedHealthcare admits that it has
3 submitted Risk Adjustment Attestations to the Medicare Program. UnitedHealth
4 admits that Optum and Ingenix employees reviewed and approved these
5 Attestations and that Ovations and UnitedHealthcare employees reviewed and
6 signed these Attestations. To the extent Paragraph 293 states legal conclusions, no
7 response is required. UnitedHealth denies the remaining allegations in Paragraph
8 293.

9 294. To the extent the allegations in Paragraph 294 relate to claims that
10 have been dismissed, they are surplusage and should be stricken. To the extent
11 Paragraph 294 purports to describe a document or documents, such documents
12 speak for themselves and, as such, no response is required. UnitedHealth denies
13 the remaining allegations in Paragraph 294.

14 295. To the extent the allegations in Paragraph 295 relate to claims that
15 have been dismissed, they are surplusage and should be stricken. To the extent
16 Paragraph 295 states legal conclusions, no response is required. To the extent
17 Paragraph 295 purports to describe a document or documents, such documents
18 speak for themselves and, as such, no response is required. UnitedHealth denies
19 the remaining allegations in Paragraph 295.

20 **A. Defendants' Internal Attestation Approval Process**

21 296. To the extent the allegations in Paragraph 296 relate to claims that
22 have been dismissed, they are surplusage and should be stricken. To the extent
23 Paragraph 296 purports to describe a document or documents, such documents
24 speak for themselves and, as such, no response is required. UnitedHealth denies
25 the remaining allegations in Paragraph 296.

26 297. To the extent the allegations in Paragraph 297 relate to claims that
27 have been dismissed, they are surplusage and should be stricken. To the extent
28 Paragraph 297 purports to describe a document or documents, such documents

1 speak for themselves and, as such, no response is required. To the extent
2 Paragraph 297 purports to summarize and/or describe the provisions of the
3 Medicare program, UnitedHealth states that the Medicare statute and regulations
4 speak for themselves, and to the extent that the allegations in Paragraph 297 vary
5 therefrom or with other applicable statutory or decisional law, UnitedHealth denies
6 those allegations. To the extent Paragraph 297 states legal conclusions, no
7 response is required.

8 298. To the extent the allegations in Paragraph 298 relate to claims that
9 have been dismissed, they are surplusage and should be stricken. To the extent
10 Paragraph 298 purports to describe a document or documents, such documents
11 speak for themselves and, as such, no response is required. UnitedHealth denies
12 the remaining allegations in Paragraph 298.

13 299. To the extent the allegations in Paragraph 299 relate to claims that
14 have been dismissed, they are surplusage and should be stricken. Paragraph 299
15 states legal conclusions to which no response is required. To the extent Paragraph
16 299 purports to describe a document or documents, such documents speak for
17 themselves and, as such, no response is required. UnitedHealth denies the
18 remaining allegations in Paragraph 299.

19 300. To the extent the allegations in Paragraph 300 relate to claims that
20 have been dismissed, they are surplusage and should be stricken. Paragraph 300
21 states legal conclusions to which no response is required. To the extent Paragraph
22 300 purports to describe a document or documents, such documents speak for
23 themselves and, as such, no response is required. UnitedHealth denies the
24 remaining allegations in Paragraph 300.

25 301. To the extent the allegations in Paragraph 301 relate to claims that
26 have been dismissed, they are surplusage and should be stricken. Paragraph 301
27 states legal conclusions to which no response is required. To the extent Paragraph
28 301 purports to describe a document or documents, such documents speak for

1 themselves and, as such, no response is required. UnitedHealth denies the
2 remaining allegations in Paragraph 301.

3 302. To the extent the allegations in Paragraph 302 relate to claims that
4 have been dismissed, they are surplusage and should be stricken. Paragraph 302
5 states legal conclusions to which no response is required. To the extent Paragraph
6 302 purports to describe a document or documents, such documents speak for
7 themselves and, as such, no response is required. UnitedHealth denies the
8 remaining allegations in Paragraph 302.

9 303. To the extent the allegations in Paragraph 303 relate to claims that
10 have been dismissed, they are surplusage and should be stricken. Paragraph 303
11 states legal conclusions to which no response is required. To the extent Paragraph
12 303 purports to describe a document or documents, such documents speak for
13 themselves and, as such, no response is required. UnitedHealth denies the
14 remaining allegations in Paragraph 303.

15 304. To the extent the allegations in Paragraph 304 relate to claims that
16 have been dismissed, they are surplusage and should be stricken. Paragraph 304
17 states legal conclusions to which no response is required. To the extent Paragraph
18 304 purports to describe a document or documents, such documents speak for
19 themselves and, as such, no response is required. UnitedHealth denies the
20 remaining allegations in Paragraph 304.

21 305. To the extent the allegations in Paragraph 305 relate to claims that
22 have been dismissed, they are surplusage and should be stricken. Paragraph 305
23 states legal conclusions to which no response is required. To the extent Paragraph
24 305 purports to describe a document or documents, such documents speak for
25 themselves and, as such, no response is required. UnitedHealth denies the
26 remaining allegations in Paragraph 305.

27 306. To the extent the allegations in Paragraph 306 relate to claims that
28 have been dismissed, they are surplusage and should be stricken. To the extent

Paragraph 306 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 306.

307. To the extent the allegations in Paragraph 307 relate to claims that have been dismissed, they are surplusage and should be stricken. Paragraph 307 states legal conclusions to which no response is required. To the extent Paragraph 307 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 307.

308. To the extent the allegations in Paragraph 308 relate to claims that have been dismissed, they are surplusage and should be stricken. To the extent Paragraph 308 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 308.

B. The False Attestations Submitted To The Government

309. To the extent the allegations in Paragraph 309 relate to claims that have been dismissed, they are surplusage and should be stricken. To the extent Paragraph 309 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 309.

310. To the extent the allegations in Paragraph 310 relate to claims that have been dismissed, they are surplusage and should be stricken. Paragraph 310 states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 310.

311. To the extent the allegations in Paragraph 311 relate to claims that have been dismissed, they are surplusage and should be stricken. To the extent Paragraph 311 purports to describe a document or documents, such documents

1 speak for themselves and, as such, no response is required. UnitedHealth denies
2 the remaining allegations in Paragraph 311.

3 312. To the extent the allegations in Paragraph 312 relate to claims that
4 have been dismissed, they are surplusage and should be stricken. To the extent
5 Paragraph 312 purports to describe a document or documents, such documents
6 speak for themselves and, as such, no response is required. UnitedHealth denies
7 the remaining allegations in Paragraph 312.

8 313. To the extent the allegations in Paragraph 313 relate to claims that
9 have been dismissed, they are surplusage and should be stricken. To the extent
10 Paragraph 313 purports to describe a document or documents, such documents
11 speak for themselves and, as such, no response is required. UnitedHealth denies
12 the remaining allegations in Paragraph 313.

13 314. To the extent the allegations in Paragraph 314 relate to claims that
14 have been dismissed, they are surplusage and should be stricken. To the extent
15 Paragraph 314 purports to describe a document or documents, such documents
16 speak for themselves and, as such, no response is required. UnitedHealth denies
17 the remaining allegations in Paragraph 314.

18 315. To the extent the allegations in Paragraph 315 relate to claims that
19 have been dismissed, they are surplusage and should be stricken. To the extent
20 Paragraph 315 purports to describe a document or documents, such documents
21 speak for themselves and, as such, no response is required. UnitedHealth denies
22 the remaining allegations in Paragraph 315.

23 316. To the extent the allegations in Paragraph 316 relate to claims that
24 have been dismissed, they are surplusage and should be stricken. Paragraph 316
25 states legal conclusions to which no response is required. UnitedHealth denies the
26 remaining allegations in Paragraph 316.

27 317. To the extent the allegations in Paragraph 317 relate to claims that
28 have been dismissed, they are surplusage and should be stricken. To the extent

Paragraph 317 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 317.

318. To the extent the allegations in Paragraph 318 relate to claims that have been dismissed, they are surplusage and should be stricken. To the extent Paragraph 318 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 318.

319. To the extent the allegations in Paragraph 319 relate to claims that have been dismissed, they are surplusage and should be stricken. To the extent Paragraph 319 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 319.

320. To the extent the allegations in Paragraph 320 relate to claims that have been dismissed, they are surplusage and should be stricken. Paragraph 320 states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 320.

321. To the extent the allegations in Paragraph 321 relate to claims that have been dismissed, they are surplusage and should be stricken. To the extent Paragraph 321 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 321.

322. To the extent the allegations in Paragraph 322 relate to claims that have been dismissed, they are surplusage and should be stricken. To the extent Paragraph 322 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent Paragraph 322 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 322.

323. To the extent the allegations in Paragraph 323 relate to claims that have been dismissed, they are surplusage and should be stricken. Paragraph 323 states legal conclusions to which no response is required. To the extent Paragraph 323 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 323.

324. To the extent the allegations in Paragraph 324 relate to claims that have been dismissed, they are surplusage and should be stricken. Paragraph 324 states legal conclusions to which no response is required. To the extent Paragraph 324 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 324.

325. To the extent the allegations in Paragraph 325 relate to claims that have been dismissed, they are surplusage and should be stricken. To the extent Paragraph 325 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent Paragraph 325 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 325.

326. To the extent the allegations in Paragraph 326 relate to claims that have been dismissed, they are surplusage and should be stricken. Paragraph 326 states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 326.

327. To the extent the allegations in Paragraph 327 relate to claims that have been dismissed, they are surplusage and should be stricken. To the extent Paragraph 327 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent Paragraph 327 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 327.

V. Diagnoses Solely Determine Risk Adjustment Payments Based On Health Status

328. Paragraph 328 contains no allegations with respect to a particular Defendant or claim and, as such, no response is required. To the extent Paragraph 328 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute and regulations speak for themselves, and to the extent that the allegations in Paragraph 328 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations.

329. Paragraph 329 contains no allegations with respect to a particular Defendant or claim and, as such, no response is required. To the extent Paragraph 329 states legal conclusions, no response is required. To the extent Paragraph 329 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute and regulations speak for themselves, and to the extent that the allegations in Paragraph 329 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations.

330. To the extent the allegations in Paragraph 330 relate to claims that have been dismissed, they are surplusage and should be stricken. Paragraph 330 contains no allegations with respect to a particular Defendant or claim and, as such, no response is required. To the extent Paragraph 330 states legal conclusions, no response is required. To the extent Paragraph 330 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute and regulations speak for themselves, and to the extent that the allegations in Paragraph 330 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations.

331. UnitedHealth admits that UnitedHealthcare Medicare & Retirement submitted delete transactions to RAPS as a result of its RACCR and CV Programs. To the extent Paragraph 331 purports to describe a document or documents, such

documents speak for themselves and, as such, no response is required. To the extent Paragraph 331 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 331.

332. To the extent Paragraph 332 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. Paragraph 332 states legal conclusions to which no response is required. UnitedHealth denies the remaining allegations in Paragraph 332.

333. UnitedHealth is without knowledge or information sufficient to form a belief as to the truth or falsity of the allegations in Paragraph 333; therefore, such allegations are denied. To the extent Paragraph 333 states legal conclusions, no response is required. UnitedHealth denies the remaining allegations in Paragraph 333.

334. Paragraph 334 contains no allegations with respect to a particular Defendant or claim and, as such, no response is required. To the extent Paragraph 334 states legal conclusions, no response is required. To the extent Paragraph 334 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute and regulations speak for themselves, and to the extent that the allegations in Paragraph 334 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations.

335. To the extent the allegations in Paragraph 335 relate to claims that have been dismissed, they are surplusage and should be stricken. Paragraph 335 states legal conclusions to which no response is required. To the extent Paragraph 335 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute and regulations speak for themselves, and to the extent that the allegations in Paragraph 335 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. UnitedHealth denies the remaining allegations in Paragraph 335.

336. To the extent the allegations in Paragraph 336 relate to claims that have been dismissed, they are surplusage and should be stricken. Paragraph 336 states legal conclusions to which no response is required. To the extent Paragraph 336 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute and regulations speak for themselves, and to the extent that the allegations in Paragraph 336 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations. UnitedHealth denies the remaining allegations in Paragraph 336.

337. To the extent the allegations in Paragraph 337 relate to claims that have been dismissed, they are surplusage and should be stricken. To the extent Paragraph 337 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. To the extent Paragraph 337 purports to summarize and/or describe the provisions of the Medicare program, UnitedHealth states that the Medicare statute and regulations speak for themselves, and to the extent that the allegations in Paragraph 337 vary therefrom or with other applicable statutory or decisional law, UnitedHealth denies those allegations.

338. To the extent the allegations in Paragraph 338 relate to claims that have been dismissed, they are surplusage and should be stricken. To the extent Paragraph 338 states legal conclusions, no response is required. To the extent Paragraph 338 purports to describe a document or documents, such documents speak for themselves and, as such, no response is required. UnitedHealth denies the remaining allegations in Paragraph 338.

339. To the extent the allegations in Paragraph 339 relate to claims that have been dismissed, they are surplusage and should be stricken. To the extent Paragraph 339 states legal conclusions, no response is required. To the extent Paragraph 339 purports to describe a document or documents, such documents

1 speak for themselves and, as such, no response is required. UnitedHealth denies
2 the remaining allegations in Paragraph 339.

3 340. To the extent the allegations in Paragraph 340 relate to claims that
4 have been dismissed, they are surplusage and should be stricken. To the extent
5 Paragraph 340 states legal conclusions, no response is required. To the extent
6 Paragraph 340 purports to describe a document or documents, such documents
7 speak for themselves and, as such, no response is required. UnitedHealth denies
8 the remaining allegations in Paragraph 340.

9 **FIRST CLAIM FOR RELIEF**

10 **False Claims Act: Reverse False Claims**

11 **31 U.S.C. § 3729(a)(1)(G) (formerly 31 U.S.C. § 3729(a)(7))**

12 341. UnitedHealth incorporates its responses to each and every allegation
13 set forth above as if fully stated herein.

14 342. Paragraph 342 states legal conclusions to which no response is
15 required. To the extent Paragraph 342 contains any factual allegations, such
16 allegations are denied.

17 343. Paragraph 343 states legal conclusions to which no response is
18 required. To the extent Paragraph 343 contains any factual allegations, such
19 allegations are denied.

20 **SECOND CLAIM FOR RELIEF**

21 **False Claims Act: Presentation of False or Fraudulent Claims**

22 **31 U.S.C. § 3729(a)(1)(A) (formerly 31 U.S.C. § 3729(a)(1))**

23 344. The Second Claim for Relief has been dismissed, and therefore no
24 response is required.

25 345. The Second Claim for Relief has been dismissed, and therefore no
26 response is required.

27 346. The Second Claim for Relief has been dismissed, and therefore no
28 response is required.

1 347. The Second Claim for Relief has been dismissed, and therefore no
2 response is required.

3 **THIRD CLAIM FOR RELIEF**

4 **False Claims Act: Making or Using False Records or Statements**

5 **31 U.S.C. § 3729(a)(1)(B) (formerly 31 U.S.C. § 3729(a)(2))**

6 348. The Third Claim for Relief has been dismissed, and therefore no
7 response is required.

8 349. The Third Claim for Relief has been dismissed, and therefore no
9 response is required.

10 350. The Third Claim for Relief has been dismissed, and therefore no
11 response is required.

12 351. The Third Claim for Relief has been dismissed, and therefore no
13 response is required.

14 **FOURTH CLAIM FOR RELIEF**

15 **False Claims Act: Reverse False Claims**

16 **31 U.S.C. § 3729(a)(1)(G) (formerly 31 U.S.C. § 3729(a)(7))**

17 352. The Fourth Claim for Relief has been dismissed, and therefore no
18 response is required.

19 353. The Fourth Claim for Relief has been dismissed, and therefore no
20 response is required.

21 354. The Fourth Claim for Relief has been dismissed, and therefore no
22 response is required.

23 355. The Fourth Claim for Relief has been dismissed, and therefore no
24 response is required.

25 **FIFTH CLAIM FOR RELIEF**

26 **Unjust Enrichment**

27 356. UnitedHealth incorporates its responses to each and every allegation
28 set forth above as if fully stated herein.

1 357. Paragraph 357 states legal conclusions to which no response is
2 required. To the extent Paragraph 357 contains any factual allegations, such
3 allegations are denied.

4 358. Paragraph 358 states legal conclusions to which no response is
5 required. To the extent Paragraph 358 contains any factual allegations, such
6 allegations are denied.

7 **SIXTH CLAIM FOR RELIEF**

8 **Payment by Mistake**

9 359. UnitedHealth incorporates its responses to each and every allegation
10 set forth above as if fully stated herein.

11 360. Paragraph 360 states legal conclusions to which no response is
12 required. To the extent Paragraph 360 contains any factual allegations, such
13 allegations are denied.

14 361. Paragraph 361 states legal conclusions to which no response is
15 required. To the extent Paragraph 361 contains any factual allegations, such
16 allegations are denied.

17 **PRAYER**

18 **WHEREFORE**, the United States requests that judgment be entered in its
19 favor and against Defendants as follows:

20 362. Paragraph 362 contains a prayer for relief to which no response is
21 required. To the extent a response is required, UnitedHealth denies any remaining
22 allegations in the Amended Complaint and denies that the United States is entitled
23 to any relief whatsoever against UnitedHealth.

24 363. Paragraph 363 contains a prayer for relief to which no response is
25 required. To the extent a response is required, UnitedHealth denies any remaining
26 allegations in the Amended Complaint and denies that the United States is entitled
27 to any relief whatsoever against UnitedHealth.

28

364. Paragraph 364 contains a prayer for relief to which no response is required. To the extent a response is required, UnitedHealth denies any remaining allegations in the Amended Complaint and denies that the United States is entitled to any relief whatsoever against UnitedHealth.

GENERAL DENIAL

UnitedHealth denies each and every allegation in the United States' Complaint-In-Partial-Intervention that has not been admitted or responded to specifically. To the extent any allegations of fact remain unanswered, they are denied by UnitedHealth. UnitedHealth further denies that the United States is entitled to any of the relief sought in the Prayer for Relief, or any relief whatsoever.

AFFIRMATIVE DEFENSES

UnitedHealth pleads the following affirmative defenses and reserves the right to assert additional affirmative defenses to the extent that such defenses become known as a result of discovery or otherwise:

1. The United States' claims are barred, in whole or in part, by the statute of limitations.

2. The United States' claims are barred, in whole or in part, by the doctrine of estoppel.

3. The United States knew and approved of the particulars of UnitedHealth's claims for payment before such claims were presented but after UnitedHealth had alerted the United States to UnitedHealth's understanding of applicable Medicare Program requirements.

4. The conduct of the United States negates the materiality of any alleged misrepresentations by Defendants and thus, the United States and Relators cannot recover under the Amended Complaint against Defendants.

5. UnitedHealth is not vicariously liable for the acts alleged in the Complaint.

6. UnitedHealth is not liable to the extent that the United States failed to take adequate measures to mitigate damages.

7. The United States ratified, or otherwise consented to, the transactions and occurrences that are the subject of this action.

8. The United States' claims are barred, in whole or in part, by the doctrines of course of performance, course of dealing, and usage of trade. UnitedHealth's submissions to the United States during contract negotiations and modifications and its compliance efforts were consistent with its course of performance, its course of dealing, and usage of trade.

9. The United States' claims are barred, in whole or in part, by the existence of an express contract.

10. The United States' claims are barred, in whole or in part, because of its assumption of risk.

11. The United States' claims are barred, in whole or in part, because any recovery would result in unjust enrichment.

12. Every equitable claim is barred by the doctrine of unclean hands.

13. The United States' claims are barred because UnitedHealth made no express or implied false certification.

14. The United States at all times relevant to the Amended Complaint knew of the conduct allegedly engaged in by UnitedHealth and thus, the United States and Relators cannot recover under the Amended Complaint.

15. The services and products reimbursed by the United States under Medicare were worth what the government paid.

16. The United States' claims based on alleged conduct by UnitedHealth are barred, in whole or in part, by the fact that the United States has suffered no actual injury. The United States' claims based on alleged conduct by UnitedHealth are barred, in whole or in part, because of the prior public disclosures of the core allegations upon which the Amended Complaint's "false claims" allegations

1 purport to be based and/or because Relators are not an “original source” of the
2 information, as defined in the statutes therein, such that they are not entitled to
3 pursue this action or be awarded any recovery, nor the does the Court have
4 jurisdiction.

5 17. The United States’ causes of action and allegations in the Complaint
6 are vague, ambiguous and uncertain.

7 18. The United States’ claims against one or more Defendants are
8 misjoined with the United States’ claims against other Defendants and must be
9 severed.

10 19. Damages and claims for which the United States seeks relief in the
11 Complaint, if any, were caused by the acts, errors or omissions or other fault of
12 third parties and/or contributed to and/or other fault of third parties, for whose
13 conduct UnitedHealth was not responsible.

14 20. The United States’ alleged damages are speculative, uncertain, or
15 contingent and are not recoverable.

16 21. To the extent any damages are awarded against UnitedHealth, they
17 must be reduced pursuant to 31 U.S.C. § 3729(a)(2).

18 22. UnitedHealth reserves the right to add additional defenses as
19 discovery progresses.

COUNTERCLAIM

Defendants AmeriChoice of New Jersey, Inc., AmeriChoice of New York, Inc., Arizona Physicians IPA, Inc., Care Improvement Plus of Maryland, Inc., Care Improvement Plus of Texas Insurance Company, Care Improvement Plus South Central Insurance Company, Care Improvement Plus Wisconsin Insurance Company, Optum Insurance Co., Citrus Health Care, Inc., Health Plan of Nevada, Inc., Medica HealthCare Plans, Inc., Oxford Health Plans (CT), Inc., Oxford Health Plans (NJ), Inc., Oxford Health Plans (NY), Inc., PacifiCare Life and Health Insurance Company, PacifiCare of Arizona, Inc., PacifiCare of Colorado, Inc., PacifiCare of Nevada, Inc., Physicians Health Choice of Texas, LLC, Preferred Care Partners, Inc., Rocky Mountain Health Maintenance Organization, Incorporated, Sierra Health and Life Insurance Company, Inc., Symphonix Health Insurance, Inc., United HealthCare of California, Inc., UHC of California (f.k.a. PacifiCare of California), United Health Care Ins. Co. and United New York, Unison Health Plan of Tennessee, Inc., UnitedHealthcare Benefits of Texas, Inc. (f.k.a. PacifiCare of Texas, Inc.), UnitedHealthcare Community Plan of Ohio, Inc. (f.k.a. Unison Health Plan of Ohio, Inc.), UnitedHealthcare Community Plan of Texas, L.L.C. (f.k.a. Evercare of Texas, L.L.C.), UnitedHealthcare Community Plan, Inc. (f.k.a. UnitedHealthcare of the Great Lakes Health Plan, Inc.), UnitedHealthcare Insurance Company, UnitedHealthcare Insurance Company of New York, UnitedHealthcare of Alabama, Inc., UnitedHealthcare of Arizona, Inc., UnitedHealthcare of Arkansas, Inc., UnitedHealthcare of Florida, Inc., UnitedHealthcare of Georgia, Inc., UnitedHealthcare of New England, Inc., UnitedHealthcare of New York, Inc., UnitedHealthcare of North Carolina, Inc., UnitedHealthcare of Ohio, Inc., UnitedHealthcare of Oklahoma, Inc. (f.k.a. PacifiCare of Oklahoma, Inc.), UnitedHealthcare of Oregon, Inc. (f.k.a. PacifiCare of Oregon, Inc.), UnitedHealthcare of Pennsylvania, Inc. (f.k.a. Unison Health Plan of Pennsylvania, Inc.), UnitedHealthcare of Tennessee, Inc., UnitedHealthcare of

the Midlands, Inc., UnitedHealthcare of the Midwest, Inc., UnitedHealthcare of Utah, Inc., UnitedHealthcare of Washington, Inc. (f.k.a. PacifiCare of Washington, Inc.), UnitedHealthcare of Wisconsin, Inc., and UnitedHealthcare Plan of the River Valley, Inc. (collectively, “UnitedHealth MA Plans”)² state, allege, and request the following in the character of a counterclaim against Plaintiff the United States of America (“United States” or “Government”):

1. The responses and affirmative defenses contained in the Answer to the United States’ Amended Complaint-in-Partial-Intervention described above are incorporated by reference in this Counterclaim as if fully set forth herein.

JURISDICTION AND VENUE

2. This Court has subject matter jurisdiction over these Counterclaims pursuant to 28 U.S.C. §§ 1331 and 1367, as well as Federal Rule of Civil Procedure 13. To the extent jurisdiction and venue are proper under the Complaint, jurisdiction and venue are also proper under the Counterclaims, which arise out of the same transactions and occurrences alleged in the Complaint.

PARTIES

3. Plaintiff and Counter-Defendant United States of America has sued UnitedHealth on behalf of the United States Department of Health and Human Services (“HHS”).

4. The following Defendant and Counter-Plaintiff Medicare Advantage (“MA”) Organizations entered into one or more agreements with the Government during the relevant time period to offer MA Plans and/or Medicare Part D Plans to Medicare beneficiaries under Parts C and D of the Medicare Program, presented claims to the Government for risk adjustment payments under Parts C and D of the Medicare Program, and received risk adjustment payments from the Government.

² Should the Government substitute additional MA Plans as parties in this action in the place of erroneously named entities in its Amended Complaint, such additional MA Plans would constitute Counter-Plaintiffs as well.

1 a. Defendant and Counter-Plaintiff AmeriChoice of New Jersey, Inc., a
2 New Jersey corporation.

3 b. Defendant and Counter-Plaintiff AmeriChoice of New York, Inc., a
4 New York corporation.

5 c. Defendant and Counter-Plaintiff Arizona Physicians IPA, Inc., an
6 Arizona corporation.

7 d. Defendant and Counter-Plaintiff Care Improvement Plus of Maryland,
8 Inc., a Maryland corporation.

9 e. Defendant and Counter-Plaintiff Care Improvement Plus of Texas
10 Insurance Company, a Texas corporation insurance company.

11 f. Defendant and Counter-Plaintiff Care Improvement Plus South
12 Central Insurance Company, an Arkansas corporation insurance company.

13 g. Defendant and Counter-Plaintiff Care Improvement Plus Wisconsin
14 Insurance Company, a Wisconsin corporation insurance company.

15 h. Defendant and Counter-Plaintiff Citrus Health Care, Inc., a Florida
16 corporation.

17 i. Defendant and Counter-Plaintiff Health Plan of Nevada, Inc., a
18 Nevada corporation.

19 j. Defendant and Counter-Plaintiff Medica HealthCare Plans, Inc., a
20 Florida corporation.

21 k. Defendant and Counter-Plaintiff Oxford Health Plans (CT), Inc., a
22 Connecticut corporation.

23 l. Defendant and Counter-Plaintiff Oxford Health Plans (NJ), Inc., a
24 New Jersey corporation.

25 m. Defendant and Counter-Plaintiff Oxford Health Plans (NY), Inc., a
26 New York corporation.

27 n. Defendant and Counter-Plaintiff PacifiCare Life and Health Insurance
28 Company, an Indiana corporation insurance company.

1 o. Defendant and Counter-Plaintiff PacifiCare of Arizona, Inc., an
2 Arizona corporation.

3 p. Defendant and Counter-Plaintiff PacifiCare of Colorado, Inc., a
4 Colorado corporation.

5 q. Defendant and Counter-Plaintiff PacifiCare of Nevada, Inc., a Nevada
6 corporation.

7 r. Defendant and Counter-Plaintiff Physicians Health Choice of Texas,
8 LLC, a Texas limited liability company.

9 s. Defendant and Counter-Plaintiff Preferred Care Partners, Inc., a
10 Florida corporation.

11 t. Defendant and Counter-Plaintiff Sierra Health and Life Insurance
12 Company, Inc., a Nevada corporation.

13 u. Defendant and Counter-Plaintiff Symphonix Health Insurance, Inc.,
14 an Illinois corporation insurance company.

15 v. Defendant and Counter-Plaintiff United HealthCare of California,
16 Inc., a California corporation.

17 w. Defendant and Counter-Plaintiff UHC of California, a California
18 corporation.

19 x. Defendant and Counter-Plaintiff Unison Health Plan of Tennessee,
20 Inc., a Tennessee corporation.

21 y. Defendant and Counter-Plaintiff UnitedHealthcare Benefits of Texas,
22 Inc., a Texas corporation.

23 z. Defendant and Counter-Plaintiff UnitedHealthcare Community Plan
24 of Ohio, Inc., an Ohio corporation.

25 aa. Defendant and Counter-Plaintiff UnitedHealthcare Community Plan
26 of Texas, L.L.C., a Texas limited liability company.

27 bb. Defendant and Counter-Plaintiff UnitedHealthcare Community Plan,
28 Inc., a Michigan corporation.

1 cc. Defendant and Counter-Plaintiff UnitedHealthcare Insurance
2 Company, a Connecticut corporation insurance company.

3 dd. Defendant and Counter-Plaintiff UnitedHealthcare Insurance
4 Company of New York, a New York corporation insurance company.

5 ee. Defendant and Counter-Plaintiff UnitedHealthcare of Alabama, Inc.,
6 an Alabama corporation.

7 ff. Defendant and Counter-Plaintiff UnitedHealthcare of Arizona, Inc., an
8 Arizona corporation.

9 gg. Defendant and Counter-Plaintiff UnitedHealthcare of Arkansas, Inc.,
10 an Arkansas corporation.

11 hh. Defendant and Counter-Plaintiff UnitedHealthcare of Florida, Inc., a
12 Florida corporation.

13 ii. Defendant and Counter-Plaintiff UnitedHealthcare of Georgia, Inc., a
14 Georgia corporation.

15 jj. Defendant and Counter-Plaintiff UnitedHealthcare of New England,
16 Inc., a Rhode Island corporation.

17 kk. Defendant and Counter-Plaintiff UnitedHealthcare of New York, Inc.,
18 a New York corporation.

19 ll. Defendant and Counter-Plaintiff UnitedHealthcare of North Carolina,
20 Inc., a North Carolina corporation.

21 mm. Defendant and Counter-Plaintiff UnitedHealthcare of Ohio, Inc., an
22 Ohio corporation.

23 nn. Defendant and Counter-Plaintiff UnitedHealthcare of Oklahoma, Inc.,
24 an Oklahoma corporation.

25 oo. Defendant and Counter-Plaintiff UnitedHealthcare of Oregon, Inc., an
26 Oregon corporation.

27 pp. Defendant and Counter-Plaintiff UnitedHealthcare of Pennsylvania,
28 Inc., a Pennsylvania corporation.

1 qq. Defendant and Counter-Plaintiff UnitedHealthcare of Tennessee, Inc.,
2 a Tennessee corporation.

3 rr. Defendant and Counter-Plaintiff UnitedHealthcare of the Midlands,
4 Inc., a Nebraska corporation.

5 ss. Defendant and Counter-Plaintiff UnitedHealthcare of the Midwest,
6 Inc., a Missouri corporation.

7 tt. Defendant and Counter-Plaintiff UnitedHealthcare of Utah, Inc., a
8 Utah corporation.

9 uu. Defendant and Counter-Plaintiff UnitedHealthcare of Washington,
10 Inc., a Washington corporation.

11 vv. Defendant and Counter-Plaintiff UnitedHealthcare of Wisconsin, Inc.,
12 a Wisconsin corporation.

13 ww. Defendant and Counter-Plaintiff UnitedHealthcare Plan of the River
14 Valley, Inc., an Illinois corporation.

15 **FACTUAL ALLEGATIONS**

16 **I. Medicare Advantage Contracts**

17 **A. Medicare Advantage and CMS's "Risk Adjustment" Model**

18 5. The Medicare Act establishes a federal health insurance program for
19 disabled and elderly individuals. Traditional Medicare beneficiaries are often
20 referred to as fee-for-service ("FFS") beneficiaries because they receive healthcare
21 from a network of healthcare providers, including doctors and hospitals, whom the
22 federal government—through the Centers for Medicare and Medicaid Services
23 ("CMS")—reimburses based on the claims those providers submit for the services
24 they provide.

25 6. Congress created the Medicare Advantage program to allow
26 individuals eligible for traditional Medicare instead to receive healthcare benefits
27 through private insurance plans like the UnitedHealth MA Plans.

28

1 7. As with other types of health insurance, it costs more on average to
2 insure individuals who are projected to be sicker during the coverage period than it
3 does to insure individuals who are projected to be healthier during that same
4 period. Therefore, CMS adjusts the amount it pays to Medicare Advantage
5 organizations to reflect the projected health status of the MA plan's enrollees.

6 8. CMS designed and implemented a "risk adjustment" model to
7 determine how much to pay an MA plan in a given year. The model is designed to
8 predict how much it will cost an MA plan to care for the group of senior citizens
9 who are enrolled in that MA plan, based on an analysis of CMS's costs to care for
10 people with the same health conditions in traditional Medicare. The model relies
11 on medical diagnosis codes, which are numerical codes that correspond to illnesses
12 or medical conditions diagnosed by medical professionals. CMS uses the
13 diagnosis codes it receives from the physicians and other medical professionals
14 who treat traditional Medicare beneficiaries on a FFS basis to determine how much
15 it costs CMS to provide care for beneficiaries with a particular medical condition.
16 CMS then uses that data to predict how much it will cost an MA plan to insure an
17 individual with the same diagnosis code. CMS assumes that MA plans will see a
18 similar relationship between diagnosis codes and medical costs for the patients
19 enrolled in MA plans, and so it uses the analysis of its own FFS program codes and
20 costs to adjust MA plans' payment amounts as well.

21 9. CMS has long known that a substantial number of the diagnosis codes
22 in its own FFS claims data reflect conditions that are not sufficiently documented
23 in patients' corresponding medical charts. CMS thus has known that if it tried to
24 verify each reported diagnosis code by looking at the underlying medical records,
25 it would not always find specific entries in the medical charts that reflect the
26 specific diagnosis reported to CMS. It has recognized, however, that attempting to
27 verify all the diagnosis codes would be operationally difficult and, indeed, so
28

expensive as to be cost prohibitive. Instead, CMS includes supported and unsupported diagnosis codes alike in its calculations.

10. Using both supported and unsupported diagnosis codes to determine the average costs associated with medical conditions, rather than using just supported diagnosis codes, has the effect of lowering the average costs associated with the conditions. That reflects, among other things, the fact that patients who do not have a given condition (and whose diagnosis codes for that condition would therefore be unsupported) generally do not require the same level of healthcare services as patients who actually suffer from it. And because CMS does not distinguish between its supported and unsupported codes, the lower costs that CMS incurs for a FFS patient *without* a given condition (and whose diagnosis code for that condition is therefore unsupported) results on average in a lower payment to an MA plan for a patient who *does* have that condition (and a supported diagnosis code to go with it). This means that the payments CMS makes to MA plans are lower than they would be if CMS used only supported diagnosis codes in calculating its own average costs for a given condition.

11. Accordingly, by using unverified FFS codes to determine payment amounts, CMS already has reduced its per-code payment *in a way that accounts for the presence of unsupported diagnosis codes in claims data*. If CMS also required MA plans to delete all codes that are not supported in provider-submitted codes, such that they received payments only for supported codes even as CMS continued calculating payment amounts using both its supported and unsupported FFS codes, CMS would receive a windfall and the MA plans would be improperly underpaid.

B. Medical Chart Reviews

12. In the MA program, physicians and other healthcare providers submit diagnosis codes to the MA organizations, who in turn submit them to CMS.

1 13. MA organizations are not required or expected to double-check all
2 diagnosis codes they receive from providers in claims submissions. Doing so
3 would be logistically difficult, if not impossible, for the same reasons CMS chose
4 not to double-check its FFS codes when determining how much to adjust its
5 payments for specific diagnosis codes. CMS both expects and accepts that some
6 portion of data submitted by MA organizations—like CMS’s own FFS data—
7 would not be supported in the medical chart if one were to compare codes
8 submitted in claims to underlying medical records.

9 14. MA organizations are permitted to perform their own reviews of
10 certain medical charts if they choose to do so—and often do. Specialists in coding
11 diagnoses (known as “coders”) review the medical charts and determine what
12 codes are supported by the charts. MA organizations then submit those additional
13 diagnosis codes to CMS to demonstrate that the particular patients may require
14 more care in the successive period.

15 15. CMS never has issued any rules or regulations addressing the scope of
16 MA organizations’ reviews of medical charts. For example, there is no rule or
17 regulation requiring that MA plans perform a so-called “two-way look,” in which
18 their coders would not only affirmatively identify codes that should be submitted
19 but also validate the diagnosis codes *already* submitted by physicians and other
20 medical professionals.

21 16. Instead, CMS fully expects that MA organizations’ chart reviews will
22 result in a net increase in the number of diagnosis codes that MA plans submit for
23 risk adjustment purposes. In fact, *because* CMS anticipates that MA
24 organizations’ chart reviews will lead MA plans to identify more codes than they
25 would if they relied just on submissions by doctors and other health professionals
26 (as CMS does in the traditional Medicare program), CMS makes an across-the-
27 board reduction in its payments to MA plans. In 2018, for example, this
28 reduction—known as the “Coding Intensity Adjustment” because it adjusts for MA

1 plans' tendency to record diagnosis codes with more "intensity" than FFS
2 providers—will reduce MA plans' payments by 5.91 percent. CMS has studied the
3 issue and expressly found that the Coding Intensity Adjustment fully accounts for
4 the difference in coding practices between the MA and traditional Medicare
5 programs.

6 **C. Contract and Bid Process**

7 17. MA plans enter into annual contracts with CMS in which they agree
8 to provide insurance benefits to patients for the coming year in exchange for
9 payment from CMS.

10 18. The payment provision of these contracts provides that the MA plans
11 will develop an annual benefit and price bid proposal and submit that information
12 to CMS.

13 19. An MA plan's bid must reflect the MA organization's estimate of the
14 payment it will require to provide the benefits covered by Medicare Parts A and B
15 to a Medicare enrollee "with a national average risk profile." This payment
16 estimate must include "all estimated revenue required by the plan, including
17 administrative costs and return on investment."

18 20. To make these estimates, an MA plan must be able to calculate
19 anticipated revenues and expenses, including the cost of providing care to the
20 beneficiaries enrolled in the MA plan. In doing so, MA plans take into account
21 CMS's calculations about the relative amount it will cost to care for patients with
22 individual conditions, as well as "actuarial" assumptions, which are projections
23 about the number of beneficiaries with particular conditions that will enroll in the
24 plan during the year.

25 21. In deciding whether to accept an MA plan's bid, CMS is required by
26 law to determine whether the bid "reasonably and equitably reflects the plan's
27 estimated revenue requirements for providing the benefits under the plan." If the
28 bid does *not*, CMS cannot accept it.

22. If CMS accepts the bid (after determining that it is reasonable and equitable), CMS then agrees to pay the MA organization under the contract in accordance with the MA organization's bid and based on the submitted risk adjustment data and other amounts published by CMS.

D. CMS Told United and the Industry that MA Plans Are Not Required to Perform Chart Reviews that Include Efforts to Validate Previously Submitted Diagnosis Codes (Two-Way Looks)

23. As noted above, none of the thousands of rules and regulations issued by CMS requires MA plans to conduct chart reviews that "look both ways" or otherwise make their diagnosis data conform to a higher standard of accuracy than CMS itself utilizes with respect to its FFS data.

24. In fact, CMS told UnitedHealth that just the opposite is true.

25. For example, in 2014 CMS considered and then affirmatively decided *not* to finalize a proposed rule that would have prohibited MA organizations from performing reviews that only looked for additional diagnosis codes (known as "one-way" reviews).

26. In addition, UnitedHealth repeatedly made clear that it was not performing two-way reviews and sought specific guidance on the issue from CMS. CMS consistently confirmed that two-way reviews were not, and are not, required.

27. For example, in 2009, UnitedHealth explained to government auditors that its chart review program did not seek to verify diagnosis codes received from medical providers through the review of medical records. The government auditors never stated or even suggested that UnitedHealth was violating any rule or CMS contract by failing to verify the diagnosis codes UnitedHealth had received from providers, and the resulting audit did not find that UnitedHealth was out of compliance with any rule, regulation or contractual requirement.

28. Moreover, starting in 2011, the UnitedHealth MA Plans informed CMS each year in their bids that they made no effort to validate the diagnosis

1 codes they used in the bids by reviewing medical records: “As part of the
2 preparation of the bids, we did not attempt to validate any actual or projected risk
3 scores through a review of applicable medical records. . . .”

4 29. CMS did not advise a single UnitedHealth MA Plan that its failure to
5 validate provider-submitted codes was inappropriate or that validation of risk
6 scores based on a review of the medical records was required; rather, CMS
7 accepted these bids and paid the UnitedHealth MA Plans for the services provided.

8 30. In fact, during conversations between UnitedHealth and CMS over the
9 course of the spring and early summer of 2014, CMS confirmed multiple times that
10 “two-way” looks were not required.

11 31. Specifically, CMS told UnitedHealth that unless and until a proposed
12 rule governing the review of medical records became final, MA plans did not, and
13 do not, have an affirmative obligation to confirm whether diagnosis codes
14 submitted by physicians are supported in the medical records.

15 32. The UnitedHealth MA Plans memorialized this understanding,
16 including in subsequent bids and risk adjustment data attestations they provided to
17 CMS under the contracts.

18 **II. The UnitedHealth MA Plans Submitted Bids and Performed Contracts**
19 **In Reliance on the Government’s Representations and Conduct**

20 33. During the relevant period, the UnitedHealth MA Plans based their
21 bids on the understanding that they did not need to perform chart reviews to
22 identify unsupported codes from physicians, just as CMS does not look for
23 unsupported codes when calculating its average costs in the FFS program.

24 34. The lack of an obligation to perform chart reviews to identify
25 unsupported codes was an assumption underlying the UnitedHealth MA Plans’
26 bids. The UnitedHealth MA Plans took this lack of an obligation into account in
27 estimating the amounts they would need to bid in order to meet their revenue
28 requirements. CMS accepted these bids knowing that it had not imposed an

1 obligation to perform such reviews and that the assumptions on which the
2 UnitedHealth MA Plans' bids rested—which CMS was required by law to review
3 and, if appropriate, approve—did not include the performance of such two-way
4 looks.

5 **III. The Department of Justice Files Suit Against UnitedHealth**

6 35. *Qui tam* relator Benjamin Poehling filed this False Claims Act
7 ("FCA") case in 2011. The Department of Justice ("DOJ") investigated Poehling's
8 allegations for more than 6 years, during which time the case remained under seal.

9 36. DOJ formally intervened in the case and filed a Complaint-In-Partial-
10 Intervention on May 16, 2017. DOJ filed an Amended Complaint on November
11 17, 2017.

12 37. In its Amended Complaint, DOJ makes assertions directly contrary to
13 the guidance and instructions from CMS regarding the UnitedHealth MA Plans'
14 obligations to review medical records.

15 38. Despite knowing that CMS considered, and then rejected, a rule that
16 would have required MA plans conducting any review of medical records to
17 validate diagnosis codes previously submitted by providers, DOJ now claims that
18 the UnitedHealth MA Plans "were obligated to 'look both ways' at the results of
19 their chart reviews and delete unsupported provider-diagnoses." Moreover, despite
20 knowing that CMS told the UnitedHealth MA Plans that they had no obligation to
21 look for unsupported diagnosis codes during the course of any chart review, DOJ
22 now claims that the UnitedHealth MA Plans had a legal obligation to do so.

23 **CAUSES OF ACTION**

24 **Count 1: Breach of Contract**

25 39. The UnitedHealth MA Plans repeat and re-allege the allegations
26 contained in Paragraphs 1 to 38 above as though they are fully set forth herein.

1 40. During all time periods relevant for the Government's Amended
2 Complaint, CMS and certain UnitedHealth MA Plans had in place contracts
3 relating to the UnitedHealth MA Plans' participation in Medicare Part C.

4 41. The UnitedHealth MA Plans performed their obligations under their
5 contracts.

6 42. As part of the contract formation process, the UnitedHealth MA Plans
7 were required to submit bid proposals. CMS approved and accepted those bid
8 proposals, and agreed to pay the UnitedHealth MA plans based on their approved
9 bids.

10 43. The bids CMS approved and accepted were premised on the
11 understanding, and in some instances specified, that the UnitedHealth MA Plans
12 were not performing medical chart reviews to identify unsupported codes (i.e.
13 "two-way looks").

14 44. DOJ's Amended Complaint claims that the UnitedHealth MA Plans
15 were required to perform two-way looks, despite the fact that CMS previously
16 advised the UnitedHealth MA Plans that two-way looks were unnecessary and not
17 required. DOJ now seeks, after the fact, to alter fundamental assumptions built
18 into the UnitedHealth MA Plans' bids and, thus, their contracts with CMS.

19 45. The instant lawsuit improperly seeks to deprive the UnitedHealth MA
20 Plans of compensation they earned in exchange for providing insurance coverage
21 to millions of MA plan beneficiaries, on the ground that the UnitedHealth MA
22 Plans did not perform two-way looks or otherwise validate provider-submitted
23 codes. Depriving the UnitedHealth MA Plans of compensation on that ground
24 constitutes a breach of the terms of the contracts between the UnitedHealth MA
25 Plans and CMS. In addition, DOJ effectively seeks to withhold payment for
26 services already provided by the UnitedHealth MA Plans.

46. As a result of such breach, the UnitedHealth MA Plans have suffered damages and are entitled to recover for these damages in an amount to be determined at trial.

Count 2: Breach of Covenant of Good Faith and Fair Dealing

47. The UnitedHealth MA Plans repeat and re-allege the allegations contained in Paragraphs 1 to 46 above as though they are fully set forth herein.

48. During all time periods relevant for the Government's Amended Complaint, CMS and certain of the UnitedHealth MA Plans had in place legally enforceable contracts relating to the UnitedHealth MA Plans' participation in Medicare Part C. Every contract imposes a duty of good faith and fair dealing upon the parties in performance and enforcement of the contract.

49. The UnitedHealth MA Plans performed their obligations under their contracts.

50. In suing the UnitedHealth MA Plans for not performing two-way looks and other measures to review and delete codes, the Government breached the duty of good faith and fair dealing by demanding that the UnitedHealth MA Plans perform functions not required by the contracts or else face significant liability.

51. The Government further breached the covenant of good faith and fair dealing by continuing to accept benefits from the UnitedHealth MA Plans based on the parties' contracts, while simultaneously pursuing treble-damages recovery for payments it made pursuant to those contracts, in a manner designed to secure the benefits of its contracts with the UnitedHealth MA Plans without paying for those benefits.

52. As a result of any such breach of the covenant of good faith and fair dealing, the UnitedHealth MA Plans have suffered damages and are entitled to recover for these damages in an amount to be determined at trial.

Count 3: Fraudulent Inducement

53. The UnitedHealth MA Plans repeat and re-allege the allegations contained in Paragraphs 1 to 52 above as though they are fully set forth herein.

54. CMS made representations to the UnitedHealth MA Plans regarding the terms of the UnitedHealth MA Plans' contracts, both in the context of express contract negotiations and otherwise.

55. CMS expressly represented that the UnitedHealth MA Plans were not required to conduct two-way looks to verify and delete diagnosis codes.

56. CMS's past assertions on that point were legally correct. Nevertheless, DOJ now asserts that two-way looks *were* required. If DOJ's assertion is accurate—and the UnitedHealth MA Plans were required to conduct two-way looks when conducting chart reviews—then CMS's prior representations to the UnitedHealth MA Plans were false and lulled the UnitedHealth MA Plans into continuing to enter into contracts with CMS under false pretenses. Indeed, while the UnitedHealth MA Plans continue to believe that two-way looks were not, and are not, required during the course of chart reviews, if CMS knew, or was reckless in not knowing, that the UnitedHealth MA Plans were required to conduct two-way looks, then it deliberately deceived the UnitedHealth MA Plans.

57. CMS knew, and intended, that the UnitedHealth MA Plans would rely on CMS's representations and omissions regarding two-way looks.

58. The UnitedHealth MA Plans justifiably relied on CMS's representations and omissions in preparing their bids and entering into their contracts.

59. If the Government's current assertions are correct, and the UnitedHealth MA Plans were required to perform two-way looks, then CMS's prior representations and omissions fraudulently induced the UnitedHealth MA Plans to enter into their contracts with CMS.

60. As a result of CMS's fraudulent statements and omissions, the UnitedHealth MA Plans have suffered damages and are entitled to recover for these damages in an amount to be determined at trial.

Count 4: Negligent Misrepresentation

61. The UnitedHealth MA Plans repeat and re-allege the allegations contained in Paragraphs 1 to 60 above as though they are fully set forth herein.

62. CMS expressly represented to the UnitedHealth MA Plans on certain occasions that the UnitedHealth MA Plans would not be required under the contracts to conduct two-way looks or take other steps to verify and delete codes that CMS itself does not take.

63. CMS's past assertions on that point were legally correct. Nevertheless, DOJ now asserts that two-way looks *were* required. The UnitedHealth MA Plans therefore assert, in the alternative, that if two-way looks were required, then CMS's prior representations were false and negligent, and the UnitedHealth MA Plans were ignorant of the two-way look requirement.

64. CMS intended that the UnitedHealth MA Plans would rely on CMS's representations that the UnitedHealth MA Plans would not be required under the contracts to conduct two-way looks.

65. The UnitedHealth MA Plans justifiably relied on CMS's representations in preparing their bids and entering into their contracts.

66. If the Government's current assertions are correct, and the UnitedHealth MA Plans were required to perform two-way looks, then CMS negligently misrepresented the UnitedHealth MA Plans' medical record review obligations.

67. As a result of CMS's negligent misrepresentations, the UnitedHealth MA Plans have suffered damages and are entitled to recover for these damages in an amount to be determined at trial.

Count 5: Promissory Estoppel

68. The UnitedHealth MA Plans repeat and re-allege the allegations contained in Paragraphs 1 to 67 above as though they are fully set forth herein.

69. CMS clearly and unambiguously promised the UnitedHealth MA Plans that the UnitedHealth MA Plans would not be required to conduct two-way looks in their chart reviews.

70. The UnitedHealth MA Plans foreseeably and reasonably relied on CMS's representations in preparing their bids, which would have been higher if CMS had not promised that two-way looks would not be required.

71. As a result of CMS's promises, the UnitedHealth MA Plans have suffered damages and are entitled to recover for these damages in an amount to be determined at trial.

PRAYER FOR RELIEF

WHEREFORE, the UnitedHealth MA Plans request that the Amended Complaint be dismissed with prejudice and that the relief sought in same be denied. The UnitedHealth MA Plans further request that the counterclaims be granted and that the Court grant the relief sought in each of the counterclaims, costs, and disbursements of this litigation including attorney's fees, and such other and further relief in favor of the UnitedHealth MA Plans as this Court deems just and proper.

CASE NO. 2:16-cv-08697-MWF (SSx)

**STATEMENT OF GENUINE
DISPUTES OF MATERIAL FACT
IN OPPOSITION TO PLAINTIFFS'
MOTION FOR PARTIAL
SUMMARY JUDGMENT**

Date: September 17, 2018
Time: 10:00 a.m.
Courtroom: 5A
Judge: Hon. Michael W. Fitzgerald

UnitedHealth Group, Inc. (“United” or “UnitedHealth”) submits this Statement of Genuine Disputes and Additional Uncontroverted Facts under Local Rule 56-2 in response to the United States’ and relator Benjamin Poehling’s [Proposed] Statement of Uncontroverted Facts and Conclusions of Law.

PLAINTIFFS’ UNCONTROVERTED FACTS	UNITED’S RESPONSE
A. Medicare Parts A, B, and C	
1. Medicare is a federal health insurance program for the elderly and disabled, <i>see</i> 42 U.S.C. § 1395 <i>et seq.</i> , administered by the Centers for Medicare and Medicaid Services (“CMS”), an agency of the United States Department of Health and Human Services (“HHS”).	Undisputed.
2. Medicare Part A “covers medical services furnished by hospitals and other institutional care providers.” <i>Ne. Hosp. Corp. v. Sebelius</i> , 657 F.3d 1, 2 (D.C. Cir. 2011) (citing 42 U.S.C. §§ 1395c to 1395i-5).	Undisputed.
3. Medicare Part B “is an optional supplemental insurance program that pays for items and services not covered by Part A, including outpatient physician services,” as well as “clinical laboratory tests, and durable medical equipment,” among other things. <i>Id.</i> at 2 (citing 42 U.S.C. §§ 1395j to 1395w-4).	Undisputed.
4. Medicare Part C, now known as Medicare Advantage, allows people to opt out of Parts A and B and instead enroll in health insurance plans offered by private insurers, the Medicare	Undisputed.

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
Advantage Organizations ("MAOs"). <i>See</i> 42 U.S.C. §§ 1395w-21 to 1395w-29.	
5. MAOs "must provide enrollees the benefits and services (other than hospice care) that are available to people . . . under Medicare Parts A and B, <i>see</i> 42 U.S.C. § 1395w-22(a)(1), and may also offer supplemental benefits approved by the Secretary of [HHS], <i>see</i> 42 U.S.C. § 1395w-22(a)(3)." <i>Matthews v. Leavitt</i> , 452 F.3d 145, 146 n.1 (2d Cir. 2006).	Undisputed.
6. Pursuant to contracts with CMS, MAOs receive monthly payments from Medicare for each beneficiary enrolled in their Medicare Advantage (MA or Part C) plans and Prescription Drugs (PD or Part D) plans. <i>See, e.g.</i> Medicare Advantage Contract Between United Healthcare of California and CMS ("MA Contract"), 2011, Article IV, CMS Payment to MA Organization (Exhibit 1). ¹	Undisputed.
7. Under Parts A and B, CMS pays providers directly for medical services rendered to beneficiaries under a "fee-for-service" regime. <i>Methodist Hosp. of Sacramento v. Shalala</i> , 38 F.3d 1225, 1227 (D.C. Cir. 1994).	Undisputed.

¹ "United" is used herein to refer to all of the United Defendants in this action. Exhibits 1-8 are attached to the Declaration of Cheri Rice. Exhibits 9-15 are attached to the United States' and Relator Poehling's Request for Judicial Notice.

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
8. In contrast, under Part C, MAOs contract with providers to render services to the beneficiaries enrolled in their plans and pay those providers. For each beneficiary in a MA plan, CMS pays the MAO a monthly base amount (which CMS and the MAO agree to before the start of the payment year) which is adjusted for each beneficiary based on that beneficiary's risk score. 42 U.S.C. § 1395w-23(a)(1)(A).	Undisputed.
9. The adjusted amount is based on the characteristics of each beneficiary, including "such risk factors as age, ... gender, ... and such other factors as the Secretary determines to be appropriate, including adjustment for health status." <i>Id.</i> § 1395w-23(a)(1)(C)(i).	Undisputed.
10. Under this "risk adjustment" system, MAOs are paid the predicted cost of providing benefits to a given beneficiary (regardless of the services, if any, actually provided to the beneficiary).	Disputed. Plaintiffs have failed to provide any support for this purported uncontroverted fact as required by Local Rule 56-3. Although it is undisputed that "risk adjustment" payments are not made to cover services already provided to the beneficiary, United disputes the remainder of the statement as incomplete. In determining the "predicted cost of providing benefits to a given beneficiary," CMS' objective is to obtain "[r]isk scores [that] are consistent across both fee-for-service and Medicare Advantage settings," Declaration of David J. Schindler, July 23, 2018 ("Schindler Decl.") Ex. 1,

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
	2010 Rate Announcement, at AR4336, such that “[r]isk scores for beneficiaries with the same diagnoses and characteristics should be identical” in the MA and traditional Medicare programs, Schindler Decl. Ex. 2, GAO, <i>Medicare Advantage: Substantial Excess Payments Underscore Need for CMS to Improve Accuracy of Risk Score Adjustments</i>, at AR12043 (January 2013); <i>see also</i> Schindler Decl. Ex. 3, Gregory C. Pope et al., <i>Evaluation of the CMS-HCC Risk Adjustment Model: Final Report</i>, at AR011889, AR011892 (March 2011) (explaining that the CMS-HCC model is intended to “pay plans appropriately for their expected <i>relative</i> costs” and that “[t]he predicted costs from the risk adjustment models are . . . converted to relative risk factors so that payment adjustments can be made <i>relative</i> to the average Medicare beneficiary”) (emphasis added); <i>see also id.</i> at AR011892 (explaining that the cost predictions are designed to be accurate at the group level rather than for an individual beneficiary).
11. MAOs thus receive more for providing benefits to older and sicker people, and less for younger and healthier ones.	Disputed. Plaintiffs have failed to provide any support for this purported uncontroverted fact as required by Local Rule 56-3. United does not dispute that the risk adjustment system was designed to pay MAOs more for caring for older and sicker people and less for younger and healthier people, as compared to the average FFS beneficiary in the same area. However,

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
	MAOs do not always receive more money for providing benefits to sicker people in practice because patients' diagnoses are not always fully captured in the data reported to CMS. <i>See, e.g.,</i> Schindler Decl. Ex. 4, Medicare Payment Advisory Commission, Issues for Risk Adjustment in Medicare Advantage at 103-04, in <i>Report to Congress: Medicare and Health Care Delivery System</i> (Chapter 4), Washington, DC (June 2012) (finding inconstant coding of chronic conditions from year to year in both FFS and MA data); Schindler Decl. Ex. 5, Richard Kronick & W. Pete Welch, Measuring Coding Intensity in the Medicare Advantage Program, <i>Medicare & Medicaid Research Review</i>, 4(2), at E5 (2014) ("FFS coding is known to be both incomplete and variable. . . . [as] evidenced by lack of persistence in coding of chronic conditions"); Schindler Decl. Ex. 6, Deposition of Jeffrey Grant at 88:11-24 (March 20, 2018) ("March Grant Dep.") (Q: "Okay, and have you formed your own opinion?" A: "I have." Q: "And what is that opinion? . . ." THE WITNESS [A]: "That there is a degree of error in doctors' coding, that the codes on claims are not perfect." Q: "In the sense that the codes on claims do not capture everything in the medical chart? . . ." THE WITNESS [A]: "That is one potential problem"). To the extent this statement suggests otherwise, it is disputed.

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
12. Adjusting the monthly payments based on risk factors is the Secretary's method of ensuring "actuarial equivalence" between the average payments that CMS would expect to make under fee-for-service Medicare, and the payments that CMS makes to MAOs for covering an individual with the same characteristics. <i>Id.</i>	Disputed. This statement is argumentative and a legal conclusion that requires no response. To the extent a response is required, however, United disputes as incomplete Plaintiffs' characterization of the risk factor-based payment adjustments as the Secretary's method of ensuring "actuarial equivalence." Although 42 U.S.C. § 1395w-23(a)(1)(C)(i) imposes a requirement that the Secretary adjust the risk factor-based payments "so as to ensure actuarial equivalence," United disputes that the risk adjustment factors (coefficients) calculated by the Secretary comply with the statutory mandate, or that the Secretary's calculated risk adjustment factors would be legally compliant if plans had to delete unsupported codes when CMS does not audit its own data and has not implemented a mechanism to account for its own errors. <i>See Opp. to Mot. for Part. Sum. J.</i> at 3-4, 14, 21-26.
B. The Risk Adjustment Payment System	
13. When Congress established Part C, it directed the Secretary of HHS to implement "a risk adjustment methodology that accounts for variations in per capita costs based on	Undisputed.

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
health status and other demographic factors.” <i>Id.</i> § 1395w-23(a)(3)(C)(i). ²	
14. The Secretary has broad discretion under this provision to adopt a methodology and determine how to adjust payment levels based on the health status of Medicare beneficiaries.	Disputed. Plaintiffs have failed to provide any support for this purported uncontroverted fact as required by Local Rule 56-3. This statement is also argumentative and a legal conclusion that requires no response. United disputes as inaccurate Plaintiffs’ legal characterization regarding the Secretary’s alleged discretion with respect to her ability to deviate from the requirement of actuarial equivalence. <i>See</i> Opp. to Mot. for Part. Sum. J. at 3-4, 14, 21-22, 24-25.
15. Since 2004, the Secretary has used the Hierarchical Condition Category (HCC) model to determine these amounts under Part C.	Undisputed , except that this model was only fully applicable to payments beginning in 2007.
16. The Secretary has used a similar model (the RxHCC model) to risk adjust for health status under Part D. <i>See</i> 42 C.F.R. § 423.329(b)(1), (2).	Undisputed.
17. HCC is a complex regression model that collects and analyzes payment data in order to assign estimated costs to certain characteristics of Medicare beneficiaries such as age, gender, and health status.	Undisputed , provided that “payment data” refers to CMS’s unaudited FFS claims data.
18. The model includes a set of	Undisputed.

² Part C was established by the Balanced Budget Act of 1997, Pub. L. No. 105-33, 111 Stat. 251, 299 (Aug. 25, 1997).

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
multipliers – that is, “coefficients” – used to determine “the marginal (additional) cost” of each medical “condition or demographic factor (<i>e.g.</i>, age/sex group, Medicaid status, disability status).” Medicare Managed Care Manual, Pub. 100-16, Chapter 7, § 70.1 (June 7, 2013) (Exhibit 5).	
19. The multipliers are determined based on data included in claims submitted to CMS by providers for payments for their services to beneficiaries under Parts A and B of the Medicare Program. <i>See</i> Advance Notice of Methodological Changes for Calendar Year (CY) 2014 for Medicare Advantage (MA) Capitation Rates, Part C and Part D Payment Policies and 2014 Call Letter, at 17 (Feb. 15, 2013) (Exhibit 6).	Undisputed.
20. For each Part C beneficiary, the multipliers are added to form a “risk score” and then computed against the negotiated base (fixed) monthly rate to determine how much CMS will pay an MAO for insuring that beneficiary.³	Disputed. The CMS-HCC risk adjustment model does not purport to predict the precise medical expenses for a given beneficiary in any given year. The model’s explanatory power (as measured by R-squared) of

³ For example, a 72-year-old woman living independently without a disability would have “demographic” characteristics (*i.e.*, age, sex, institutional and disability statuses) assigned a coefficient of 0.348 in 2014. Announcement of Calendar Year (CY) 2014 Medicare Advantage Capitation Rates and Medicare Advantage and Part D Payment Policies, Table 1, at 67 (Exhibit 7). If the woman had no diagnosed conditions, an MAO would be paid 34.8% of its base rate. If the beneficiary had diabetes without complications, another 0.118 would be added to her score, which would become 0.466 (0.348 + 0.118). *Id.* Her expected healthcare costs would be 46.6% as much as the average beneficiary, and an MAO would thus be paid 46.6% of its base rate for covering her. A diagnosis of multiple sclerosis would add another 0.556 to her risk score, for a total of 1.022 (0.348 for demographics + 0.118 for diabetes without complications + 0.556 for

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
	individual variation in beneficiaries' expenditures was approximately 11 percent for the v12 model. Schindler Decl. Ex. 3, Evaluation of the CMS-HCC Risk Adjustment Model: Final Report, at AR011892-895; Schindler Decl. Ex. 7, Deposition of Jeffrey Grant at 320: 9-16 (May 16, 2018) ("May Grant Dep.") (A: "You're trying to predict large groups of people accurately. You're not trying to predict one individual's cost accurately. You're trying to get a reasonable relative risk score for people that have health conditions, people that don't have health conditions, people that have a mix of health conditions.")
21. MAOs submit diagnosis codes to CMS so the agency can apply the multipliers for each beneficiary's health status.	Disputed. Plaintiffs have failed to provide any support for this purported uncontroverted fact as required by Local Rule 56-3. United disputes the suggestion that MAOs submit diagnosis codes only for the purpose of CMS's applying "multipliers" for each beneficiary's health status. MAOs submit diagnoses codes to CMS for a variety of reasons. Per 42 C.F.R. § 422.310(f)(1), CMS may use risk adjustment data, which includes

multiple sclerosis). *Id.* at 68. Her expected healthcare costs would now be 102.2% as much as the average beneficiary, and an MAO would receive 102.2% of its base rate for covering her. Thus, when an MAO submits a diagnosis code that maps to an HCC for a beneficiary, that code increases the amount paid to the MAO for coverage. *See* 2000 Rule, 65 Fed. Reg. at 40268 (explaining that the diagnosis data is a claim for payment); *see generally* Defendants' Mem. in Support of Cross-Mot. for Summ. J. and in Opp'n to Plaintiff's Mot. for Summ. J., *United Healthcare Ins. Co. v. Hargan*, CV 16-157-RMC, Dkt. 57-1, at 14-16 (D.D.C. filed Dec. 4, 2017) ("APA case") (Exhibit 13).

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
	diagnosis codes, for a range of purposes described in § 422.310(f)(1)(i)-(ix), including but not limited to “conduct[ing] quality review and improvement activities,” and “update[ing] risk adjustment models.” Only one of the nine purposes listed is “[t]o determine the risk adjustment factors used to adjustment payments. . . .” Additionally, the risk scores of beneficiaries who switch from Medicare FFS to MA in a given year are not determined from data submitted by the MA plan. <i>Cf.</i> Schindler Decl. Ex. 8, Brad Piper & Hillary Millican, Medicare Advantage Risk Score Primer: What You Need to Know About Diagnoses Supporting Risk Scores and Revenue Payment Timing at 2, <i>Milliman White Paper</i> , (Oct. 2017).
22. Since 2004, they have submitted the codes through CMS’s Risk Adjustment Processing System (“RAPS”).	Undisputed.
23. In the last several years, they submit the codes through RAPS and CMS’ Encounter Data System (“EDS”).	Undisputed.
24. Each RAPS submission includes only a few data fields: the beneficiary’s identification number, the date of the medical encounter, the type of healthcare provider, and the diagnosis code(s) reported by the provider for that encounter. <i>See, e.g.,</i> 2013	Disputed. United disputes this statement to the extent that it implies that providers are the only acceptable source of diagnosis codes reported on RAPS submissions. MAOs are permitted to submit diagnosis code(s) not reported by the provider. <i>See, e.g.,</i>

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
Medicare Managed Care Manual, Pub. 100-16, chapter 7 at § 120.2.3 (Exhibit 5).	Schindler Decl. Ex. 9, CMS, 2012 <i>Regional Technical Assistance Participant Guide: Encounter Data</i> , §§ 2.4.3, 3.5.7, 3.5.7.1, 3.5.7.2 (Aug. 6-7, 2012); <i>see also</i> Schindler Decl. Ex. 7, May Grant Dep. at 163: 14–18 (Q: “Okay. The same question with respect to pulling charts for review. Is that an appropriate activity for MA plans to engage in?” MS. KRIEG: “Object to the question.” A: “Yes”). The remainder of the statement is undisputed.
25. RAPS also has a field called a “Delete Indicator” that allows MAOs to delete invalid diagnosis codes that were previously submitted and thereby retract the claim for payment for those invalid diagnoses. <i>Id.</i>	Undisputed.
26. A diagnosis that has been deleted in RAPS will not cause an increase in the risk score or risk adjusted payment that otherwise would have been based on the deleted diagnosis code.	Disputed. Plaintiffs have failed to provide any support for this purported uncontroverted fact as required by Local Rule 56-3. United disputes this statement to the extent it implies that every diagnosis code submitted in RAPs affects payment. Not all diagnosis codes submitted in RAPs affect risk scores and thereby payments. The rest of the statement is undisputed.
27. When an MAO acquires information about invalid diagnoses after payment is made, it can still delete the invalid diagnosis codes through RAPS, and CMS will reconcile	Disputed. United disputes the suggestion that it is always possible for an MAO to delete diagnosis codes submitted through RAPs. Until 2014, there was no formal process in place

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
its payments as part of a routine process. 42 C.F.R. § 422.310(g)(2)(ii).	for deleting diagnosis codes during the closed period. <i>See</i> Schindler Decl., Ex. 10, CMS, <i>Guidance for Reporting and Returning Medicare Advantage Organization and/or Sponsor Identified Overpayments to the Centers for Medicare & Medicaid Services (CMS)</i>, (Feb. 18, 2015) (announcing the process for reporting and returning overpayments beginning on January 1, 2015). United also disputes that CMS consistently reconciles or otherwise adjusts payments when plans do submit deletions.
28. EDS works much the same way with respect to the deletion of invalid diagnosis codes. <i>See</i> CMS 2012 Regional Technical Assistance Participant Guide, Encounter Data, at 3-32 to 3-33 (Exhibit 8).	Disputed. This statement is unclear as to what is meant by “much the same way” such that United cannot meaningfully assess the statement. For purposes of this motion the statement is disputed.
C. Part C and D Payment Data Integrity Requirements and Obligations	
29. MAOs have a financial incentive to submit as many risk-adjusting diagnoses as possible to generate as much payment as possible.	Disputed. Plaintiffs have failed to provide any support for this purported uncontroverted fact as required by Local Rule 56-3. United does not dispute that MAOs are paid in part based on the risk-adjusting diagnoses they submit to CMS and that they therefore have a financial incentive to submit complete risk adjustment data reflecting all of the diagnoses supported by the medical record. However, United disputes that MAOs have a financial incentive to submit “as

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
	many risk-adjusting codes as possible."
30. Accordingly, to ensure that payments are based on valid diagnosis data and are not improperly inflated, payment integrity requirements and obligations are imposed on MAOs.	Disputed. Plaintiffs have failed to provide any support for this purported uncontroverted fact as required by Local Rule 56-3. The alleged "fact" is also argumentative and a legal conclusion that requires no response.
31. These requirements and obligations are contractual as well as regulatory, and apply to all United MAOs and to entities related to these MAOs, including, the non-MAO United Defendants in this action. <i>See</i> Section D(5) of Article V of the MA Contract (Exhibit 1) (if any MAO responsibility is delegated to another entity, "all contracts or written agreements must specify that the related entity, contractor or subcontractor must comply with all applicable Medicare laws, regulations, and CMS instructions"); <i>see also</i> 42 C.F.R. §422.504(i)(3)(iii), (4)(v) (Part C) (requiring related entities and contractors to comply with the MAO's contractual obligations to CMS and to comply with all applicable Medicare laws, regulations, and CMS instructions); 42 C.F.R. § 423.505(i)(3)(iii), (iv) (Part D) (same).	Disputed. The alleged "fact" is argumentative and a legal conclusion that requires no response. United also objects on the grounds that the term "These requirements" is vague.
32. One of the most fundamental payment integrity requirements is that diagnoses must be substantiated by the beneficiaries' medical records to be valid and one of the most important	Disputed. Plaintiffs have failed to provide any support for this purported uncontroverted fact as required by Local Rule 56-3. The alleged "fact" is also argumentative and a legal

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
payment integrity obligations is that MAOs and their related entities and contractors delete unsubstantiated diagnoses when they have information, knowledge or a belief about them.	conclusion that requires no response.
33. In order to participate in the Part C and Part D programs, the Defendant MAOs were required to agree in writing to comply with Part C and D regulations and other terms and conditions. 42 C.F.R. §§ 422.503, 422.504 (Part C); 42 C.F.R. §§ 423.504, 423.505 (Part D).	Disputed. The alleged “fact” is argumentative and a legal conclusion that requires no response.
34. Each year, one or more executives of defendant UnitedHealthcare, Inc. or its affiliates or predecessors entered into these contracts with CMS on behalf of the Defendant MAOs. <i>See e.g.</i> Signature Attestation page at the end of Exhibit 1.	Disputed. United does not dispute that its executives signed Risk Adjustment Attestations. However, United objects on the grounds that the term “Each year” and “these contracts” is vague. Although unclear what Plaintiffs mean by “these contracts,” United also disputes that its “executives . . . entered into these contracts with CMS on behalf of the Defendant MAOs.”
35. During the payment years at issue in this case, the contracts obligated defendants to operate their Part C and D plans “in compliance with the requirements of [the] contract[s] and applicable Federal statutes, regulations, and policies (e.g., policies as described in the Call Letter, Medicare Managed Care Manual, etc.)” and to comply with “Federal laws and regulations designed to prevent or ameliorate fraud, waste, and abuse,” including the False Claims Act. <i>See,</i>	Disputed. United does not dispute that the language that appears in quotation marks appears in the cited contract. However, the interpretation of the contract is a legal conclusion that United disputes and that requires no response. This statement is also disputed as incomplete and misleading. The portion of the contracts only partially quoted by the government deals with MA plans’ agreements to operate a particular type of MA plan (a coordinated care plan, as opposed to

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
<i>e.g.</i>, Section A of Article II and Section A(1) of Article IX of the Part C contract, which is part of Exhibit 1.⁴	one of two other categories of MA plans – private FFS plans or MSA plans, <i>see</i> Schindler Decl. Ex. 11, 2017 Manual Chapter 1, §§ 20.1, 20.2; 42 C.F.R. § 422.4(a)) and the provision of services to beneficiaries as part of that “Coordinated Care Plan.” Ex. 1 to Decl. of Cheri Rice, at 6. That “coordinated care plan” governs the medical services that the plan is required to provide to its members, the conditions under which those services must be available, the providers through whom the plan will provide them, and so forth, and various requirements that apply to coordinated care type MA plans in particular. <i>See</i> 42 C.F.R. 422.4(a)(1); Schindler Decl. Ex. 11, 2017 Manual Chapter 1, § 20.2. It does not extend, however, to the manner in which CMS will pay the plan. The terms governing that issue are instead set out in Article IV, governing “CMS Payment to MA Organization.” <i>See</i> Opp. to Mot. for Part. Sum. J. at 33-36.
36. The contracts also required defendants to implement an effective compliance program in accordance with the Part C and D compliance regulations. <i>See, e.g.</i>, Section F of Art. III of the MA Contract and Section J of Art. II of the Part D Addendum, also	Disputed. United does not dispute that pursuant to the referenced MA Contract, the MAO defendants agreed to implement a compliance program in accordance with Part C and D compliance regulations. However, the interpretation of the contract is a legal

⁴ The Attestation of Benefit Plan, which is part of the contract, also requires compliance with the Medicare Managed Care Manual and other documents issued by CMS. This Attestation is included as part of Exhibit 1.

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
part of Exhibit 1.	conclusion that United disputes and that requires no response. <i>See</i> Opp. to Mot. for Part. Sum. J. at 30.
37. Since 2005, the Part C compliance regulation itself has obligated United to monitor for noncompliance with CMS requirements, identify compliance risks, and respond to and correct compliance problems, including taking "affirmative steps to address errors" in the data it submitted for payments. <i>United States ex rel. Swoben v. United Healthcare Ins. Co.</i>, 848 F.3d 1161, 1174 (9th Cir. 2016) (citing 42 C.F.R. § 422.503(b)(4)(vi), (vi)(F), (vi)(G) (2005)); <i>see also</i> 42 C.F.R., § 423.504(b)(4)(vi), (vi)(F), (vi)(G) (2007) (Part D compliance regulation setting forth same requirements).	Disputed. United does not dispute that the language that appears in quotation marks appears in the sources that are cited. However, the interpretation of these regulations and case law is a legal conclusion that United disputes and that requires no response. <i>See</i> Opp. to Mot. for Part. Sum. J. at 46-49.
38. The compliance regulations state that the MAO "must conduct appropriate corrective actions (for example, repayment of overpayments . . .)." 42 C.F.R. § 422.503(b)(4)(vi)(G)(2); <i>see also</i> 42 C.F.R., § 423.504(b)(4)(vi)(G)(2) (Part D) (same).	Disputed. United does not dispute that the language that appears in quotation marks appears in the cited source. However, the interpretation of these regulations is a legal conclusion that United disputes and that requires no response. Further, this factual allegation is disputed as incomplete. 42 C.F.R. § 422.503(b)(4)(vi)(G)(2) states that an MAO "must conduct appropriate corrective actions (for example, repayment of overpayments, disciplinary actions against responsible employees) in response to the potential violation referenced in paragraph (b)(4)(vi)(G)(1) of this section." 42 C.F.R. § 422.503(b)(4)(vi)(G)(1) states,

1 PLAINTIFFS' 2 UNCONTROVERTED FACTS	UNITED'S RESPONSE
	"If the MA organization discovers evidence of misconduct related to payment or delivery of items or services under the contract, it must conduct a timely, reasonable inquiry into that conduct." The analogous Part D regulations provide similarly. To the extent Plaintiffs' statement suggests otherwise, the cited regulations do not impose an obligation on MAOs to delete unsupported codes. <i>See Opp. to Mot. for Part. Sum. J. at 30.</i>
13 39. In 2013, the obligation to 14 withdraw erroneous risk adjustment 15 data was also reiterated in the Medicare 16 Managed Care Manual, which, as noted 17 above, was expressly incorporated into 18 all of the contracts. <i>See, e.g., 2013</i> 19 <i>Medicare Managed Care Manual, Pub.</i> 20 <i>100-16, chapter 7 at § 40 (Exhibit 5)</i> 21 <i>(stating: "If upon conducting an</i> 22 <i>internal review of submitted diagnosis</i> 23 <i>codes, the plan sponsor [or MAO]</i> 24 <i>determines that any ICD-9-CM</i> 25 <i>diagnosis codes that have been</i> 26 <i>submitted do not meet risk adjustment</i> 27 <i>submission requirements, the plan</i> 28 <i>sponsor [or MAO] is responsible for</i> <i>deleting the submitted ICD-9-CM</i> <i>diagnosis codes as soon as possible").</i>	Disputed. United does not dispute that the language that appears in quotation marks appears in the cited Medicare Managed Care Manual. However, the interpretation of the contract and Medicare Managed Care Manual is a legal conclusion that United disputes and that requires no response. Further, Plaintiffs mischaracterize the meaning of the cited provisions, which describe a responsibility to delete codes <i>if</i> a plan chooses to undertake an internal review of previously submitted codes <i>and</i> that review determines that submitted codes do not meet the risk adjustment submission requirements. <i>See Opp. to Mot. for Part. Sum. J. at 40.</i> To the extent Plaintiffs' statement suggests otherwise, the cited Manuals do not impose an obligation on MAOs to delete unsupported codes. Finally, the Manual is a guidance

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
	document that does not impose any legal obligations on plans and that United did not agree to comply with in its contract with CMS. <i>See</i> Opp. to Mot. for Part. Sum. J. at 32-33.
40. In addition, in accordance with 42 C.F.R. § 422.504(l) (Part C), the contracts obligated an officer of each United MAO to annually attest to the accuracy, completeness, and truthfulness of the diagnosis data submitted for risk adjustment payments based on best knowledge, information, and belief. <i>See</i> Section D.2 of Article IV of the MA Contract (Exhibit 1). ⁵	Disputed. Plaintiffs mischaracterize the cited regulation and contracts. The contracts and applicable regulation provide that a chief executive officer, a chief financial officer, "or an individual delegated the authority to sign on behalf of one of these officers, and who reports directly to such officer" can sign. 42 C.F.R. § 422.504(l); Pls.' Mem. of P. & A. in Supp. of Pls.' Mot. for Partial Summ. J., ECF No. 234-1 ("Mem.") Ex. 1 at 11, ECF No. 234-3.
41. This regulatory and contractual obligation also applied to each related entity and contractor that generated (that is, submitted) risk adjustment data for the United MAOs, including defendant Optum (and its predecessor, Ingenix). <i>Id.</i>	Disputed. The alleged "fact" is a legal conclusion that that requires no response.
42. Importantly, this contractual and regulatory attestation requirement imposed affirmative duties on the MAOs and their related entities and contractors.	Disputed. Plaintiffs have failed to provide any support for this purported uncontroverted fact as required by Local Rule 56-3. The alleged "fact" is also argumentative and a legal conclusion that requires no response. United further objects on the grounds that the term "affirmative duties" is

⁵ The Part D regulations include a similar attestation requirement for diagnoses submitted for risk adjustment payments under the prescription drug program. Under the applicable Part D regulation, these attestations are referred to as certifications. 42 C.F.R. § 423.505(k).

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
	vague and ambiguous.
43. As explained by the Ninth Circuit and “as CMS has long made clear,” to attest to the accuracy, completeness, and truthfulness of their risk adjustment data submitted to CMS, MAOs have always had a duty to take actions to ensure the accuracy, completeness, and truthfulness of the data and are responsible for “making good faith efforts” to certify the accuracy, completeness, and truthfulness of the data. <i>Swoben</i>, 848 F.3d at 1174 (citing 65 Fed. Reg. at 40,268); <i>see also</i> 2004 Manual (Exhibit 4), § 111.7 (discussing this requirement).	Disputed. United does not dispute that the language that appears in quotation marks appears in the cited source. However, the interpretation of case law and the underlying regulations and Managed Care Manual are legal conclusions that United disputes and that requires no response. <i>See</i> Opp. to Mot. for Part. Sum. J. at 31-33, 46-49. Further, in each year since 2014, United has submitted its risk adjustment data attestations subject to certain clarifications, including the understanding that it was not obligated to perform two-ways looks. In 2014, United explained that it had suspended the “process through which [it] review[s] certain medical records to determine the accuracy of risk adjustment diagnoses and submit[s] appropriate deletes” while it considered whether to make changes. <i>See</i> Schindler Decl. Ex. 12, Email from Steve Nelson to Cheri Rice dated April 30, 2014, produced at MARA1296259. In 2015 and 2016, United clarified that it “previously had a process through which [it] reviewed certain medical records to determine the accuracy of risk adjustment diagnoses and submitted appropriate deletes” but that it “ended this process and informed [CMS] of that decision.” Schindler Decl. Ex. 13, Email from Steve Nelson to Cheri Rice dated June 26, 2015, produced at MARA2152278; Schindler

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
	Decl. Ex. 14, Email from Cheri Rice to Johanna Kreisel dated June 7, 2016, produced at USBP000498420. It further clarified that the decision remained operative and explicitly communicated that United “did not use [its] previous process to determine whether diagnosis codes submitted through claims are unsupported in the medical record.” <i>See</i> Schindler Decl. Ex. 13, Email from Steve Nelson to Cheri Rice dated June 26, 2015, produced at MARA2152278; Schindler Decl. Ex. 14, Email from Cheri Rice to Johanna Kreisel dated June 7, 2016, produced at USBP000498420. United also made similar qualifications in its bid assumptions that CMS reviewed and approved prior to the parties executing the contracts here at issue. <i>See, e.g.,</i> Schindler Decl. Ex. 49, MA Supporting Documentation for CY2015 Bid, UHC of California, Inc., Contract No. H0543-001-000, dated Aug. 5, 2014 (emphasis added) (providing: “We . . . adjusted projected risk scores to account for changes in our medical record review processes. Specifically, <i>based on multiple conversations with CMS and CMS’s treatment of medical record review in its recent rulemaking process, the health plan has decided to cease one of its prior processes that identified and deleted certain diagnoses codes through the medical record review process</i>”); <i>see also</i> Opp. to Mot. for Part. Sum. J. at 36-38.
44. Thus, MAOs and their related	Disputed. The alleged “fact” is a legal

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
entities and contractors cannot turn blind eyes to information about the invalidity of their diagnosis data or act with reckless disregard or deliberate ignorance of the falsity of the data and one of the affirmative duties or actions that MAOs and their related entities and contractors must undertake because of the attestation requirement is to correct or withdraw erroneous data. <i>Id.</i> at 1174.	conclusion that United disputes and that requires no response.
45. The Medicare Managed Care Manual has long specified that diagnosis data must be substantiated by the beneficiaries' medical records – a requirement that has been in every version of the Manual since at least 2001. <i>See, e.g.</i>, 2001 Manual (Exhibit 3), §§ 110.3, 110.4 (requiring diagnosis data to “be substantiated by the hospital’s medical record”); 2004 Manual (Exhibit 4), §§ 111.1, 111.4, 111.8 and Exhibit 30 [to the Manual] (Aug. 13, 2004) (“a medical record must substantiate all diagnostic information provided to CMS”); 2013 Manual (Exhibit 5), § 40 (“All diagnosis codes submitted must be documented in the medical record”).	Disputed. United does not dispute that the language that appears in quotation marks appears in the cited sources. However, the rest of the statement, including the interpretation of the Medicare Managed Care Manuals, is a legal conclusion that United disputes and that requires no response. <i>See</i> Opp. to Mot. for Part. Sum. J. at 32-36, 39.
46. The Manual, in accordance with federal regulation, also has long specified that diagnoses be coded according to <i>International Classification of Diseases (ICD) Clinical Modification Guidelines for Coding and Reporting</i> and the ICD Guidelines have long specified that the	Disputed. The effect and interpretation of the Manual and ICD Guidelines are legal conclusions that United disputes and that require no response. Further, United disputes the contention that “the ICD Guidelines have long specified that the medical record must substantiate the diagnosis coding.” In

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
medical record must substantiate the diagnosis coding. <i>See, e.g.</i>, 2013 Manual § 40 (Exhibit 5); <i>see also</i> 45 C.F.R. §§ 162.103, 162.1000(a) and 162.1002(a)(1), (b)(1), (c)(2)(i) (by which the Secretary of HHS adopted certain “code sets as the standard medical data code sets[.]” including the ICD-9-CM (Ninth Edition) until it was superseded in October 2015 by the ICD-10-CM (Tenth Edition), and made their use mandatory for “covered entities,” which includes health plans and providers).	addition, the Manuals do not impose legal obligations and United did not contractually agree to comply with the Manuals in connection with submission of risk adjustment data or payment. <i>See</i> Opp. to Mot. for Part. Sum. J. at 32-41.
47. The Ninth Edition of the ICD Guidelines (effective during many of the years at issue here), “published by the United States Government” and “required for reporting diagnoses and diseases to all . . . [CMS] programs,” included the requirement of medical record documentation to substantiate diagnosis coding. Joint Appendix of Rulemaking Record Excerpts from APA case, ICD-9-CM Coding Guidelines, Preface at 1 (Exhibit 15); <i>see also id.</i> at 5 (explaining “[t]he importance of consistent, complete documentation in the medical record,” without which accurate diagnosis coding “is a difficult, if not impossible, task”).	Disputed. United does not dispute that the language that appears in quotation marks appears in the source that is cited. However, the effect and interpretation of the ICD Guidelines are legal conclusions that United disputes and that require no response. Further, United disputes Plaintiff’s contention that “[t]he Ninth Edition of the ICD Guidelines . . . included the requirement of medical record documentation to substantiate diagnosis coding.” <i>See</i> Opp. to Mot. for Part. Sum. J. at 39.
48. The Tenth Edition of the ICD Guidelines does the same. ICD-10-CM Official Guidelines for Coding and Reporting FY 2018, at 1 (Exhibit 16) (“importance of consistent, complete	Disputed. United does not dispute that the language that appears in quotation marks appears in the cited source. However, the effect and interpretation of the ICD Guidelines are legal

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
documentation in the medical record cannot be overemphasized").	conclusions that United disputes and that require no response. Further, United disputes Plaintiff's contention that the Tenth Edition of the ICD Guidelines included a requirement of medical record documentation to substantiate diagnosis coding. <i>See</i> Opp. to Mot. for Part. Sum. J.
49. Moreover, pursuant to their MA Contracts, the Defendant MAOs agreed "to comply with the requirements in § 422.310 for submitting risk adjustment data to CMS" and could be terminated if they "fail[ed] to provide CMS with valid risk adjustment data as required under § 422.310 and 423.329(b)(3)." <i>See</i> Section B.7 of Art. VI and Section B.1(a)(vii) of Article VIII of the MA Contract. ⁶	Disputed. United does not dispute that the language that appears in quotation marks appears in the MA Contract. However, the interpretation of the contract is a legal conclusion that United disputes and that requires no response.
50. One of the requirements of § 422.310 (a Part C regulation) pertains to the "[v]alidation of risk adjustment data."	Disputed. United does not dispute that the language that appears in quotation marks appears in 42 C.F.R. § 422.310. However, the interpretation of the regulation is a legal conclusion that United disputes and that requires no response. <i>See</i> Opp. to Mot. for Part. Sum. J. at 30-31.
51. Section 422.310(e) also establishes the medical record as the source for determining the validity of risk adjustment data: "MA	Disputed. United does not dispute that the language that appears in quotation marks appears in 42 C.F.R. § 422.310(e). However, the

⁶ The contracts are also subject to termination when "[t]here is credible evidence that the MA Organization committed or participated in false, fraudulent or abusive activities affecting the Medicare program, including the submission of false or fraudulent data." *See, e.g.,* Section B.1(a)(iv) of Article VIII of the MA Contract (Exhibit 1).

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
organizations and their providers and practitioners will be required to submit a sample of medical records for the validation of risk adjustment data, as required by CMS."	interpretation of the regulation is a legal conclusion that United disputes and that requires no response. <i>See</i> Opp. to Mot. for Part. Sum. J. at 30-31.
52. "There may be penalties for submission of false data." 42 C.F.R. § 422.310(e). ⁷	Disputed. United does not dispute that the language that appears in quotation marks appears in 42 C.F.R. § 422.310(e). However, the interpretation of the regulation is a legal conclusion that United disputes and that requires no response. <i>See</i> 30-31.
53. Similarly, the regulation relating to CMS' risk adjustment data validation (RADV) audits refers to the medical records as the source for validating diagnoses in order "to ensure risk adjusted payment integrity and accuracy." 42 C.F.R. § 422.311(a).	Disputed. United does not dispute that the language that appears in quotation marks appears in 42 C.F.R. § 422.311(a). However, the interpretation of the regulation is a legal conclusion that United disputes and that requires no response. This "fact" is also disputed as incomplete and potentially misleading. The provision Plaintiffs' cite discusses data validation in the specific context of Risk Adjustment Data Validation (RADV) audits rather than a general obligation to validate risk adjustment data. <i>See</i> Opp. to Mot. for Part. Sum. J. at 30-31. The entirety of the quoted subsection states: "In accordance with § 422.2 [Definitions] and § 422.310(e), the Secretary annually conducts RADV audits to ensure risk adjusted payment

⁷ Section 423.329(b)(3) addresses the collection of data for Part D risk adjustment based on health status. It references the requirements of section 422.310.

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
	integrity and accuracy.” 42 C.F.R. § 422.311(a). To the extent Plaintiffs’ statement suggests otherwise, it is disputed.
54. And, because the medical record is the “source of truth” for the determining the validity of risk adjustment data, United’s MA Contracts, in accordance with 42 C.F.R. § 422.504(e)(2), provided the government with the right to audit, evaluate, and inspect “medical records,” “patient care documentation, and other records” in the possession or control of the United MAOs, related entities, and contractors that relate to the “determination of amounts payable under the contract[s].” <i>See, e.g.</i>, Section A.2(b), (d) of Article VI of the MA Contract (Exhibit 1).	Disputed. United does not dispute that the language that appears in quotation marks appears in the cited contract and regulation. The rest of the statement is argumentative and a legal conclusion that United disputes and requires no response. Additionally, Plaintiffs have mischaracterized the meaning of the quoted language; the cited contract does not give “the government” a right; rather it provides that “HHS, the Comptroller General, or their designees may audit, evaluate, or inspect. . . medical records. . . patient care documentation, and other records of the MA Organization, . . . and determination of amounts payable under the contract. . .” Mem. Ex. 1 at 13, ECF No. 234-3; 42 C.F.R. § 422.504(e)(2) (providing similarly).
55. During the relevant time period, 2009-2017, the United Defendants were also bound by the terms and conditions of Electronic Data Interchange (“EDI”) Agreements.	Disputed. This statement is a legal conclusion that United disputes and requires no response.
56. The United MAOs and any related entity or contractor that submitted risk adjustment data on their behalf (here Optum and its predecessor, Ingenix) were required to execute these agreements in order to submit the data,	Disputed. This statement is a legal conclusion that United disputes and requires no response.

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
including diagnoses, to CMS' RAPS and EDS and to receive payments. <i>See, e.g.,</i> Electronic Data Interchange Agreement Between United and CMS (Exhibit 2); <i>see also</i> 2004 Manual (Exhibit 4), § 111.6.1 (discussing this requirement).	
57. Pursuant to the EDI Agreements, the defendant MAOs and Optum (and its predecessor, Ingenix) agreed that they were responsible for all risk adjustment data submitted by themselves, their employees, and agents and that "[b]ased on best knowledge, information, and belief, [they would] submit risk adjustment data that are accurate, complete, and truthful." <i>Id.</i> at Sections A.1 and 5.	Disputed. Plaintiffs have misquoted the language in the cited EDI Agreements. The EDI Agreements state that the MAO will be responsible "for all Medicare encounter data submitted to CMS by itself, its employees, or its agents," and that, "Based on best knowledge, information, and belief, [the MAO] will submit encounter data that are accurate, complete, and truthful." Mem. Ex. 2 at 43. Further, the interpretation of the EDI Agreements is a legal conclusion that United disputes and that requires no response. <i>See</i> Opp. to Mot. for Part. Sum. J. at 42.
58. Moreover, they agreed to "correct risk adjustment data discrepancies." <i>Id.</i> at Section A.11.	Disputed. Plaintiffs have misquoted the language in cited EDI Agreements. The source refers to "research[ing] and correct[ing] encounter data discrepancies." Mem. Ex. 2 at 43. Further, the interpretation of the EDI Agreements is a legal conclusion that United disputes and that requires no response. <i>See</i> Opp. to Mot. for Part. Sum. J. at 42.
59. Of equal significance, pursuant to the EDI Agreements, they also agreed that the government had the	Disputed. United does not dispute that the language that appears in quotation marks appears in the EDI Agreements.

PLAINTIFFS' UNCONTROVERTED FACTS	UNITED'S RESPONSE
right to "audit and confirm" the data submitted by them and that they would provide the government with access to "medical records related to the eligible organization's submissions" in order for the government to audit data and confirm that the submitted-diagnosis were supported by the medical records. <i>Id.</i> at Section A.4.	However, the interpretation of the EDI Agreements is a legal conclusion that United disputes and that requires no response. <i>See</i> Opp. to Mot. for Part. Sum. J. at 42.
60. Thus, the EDI Agreements also established the medical records as the "source of truth" for validating diagnosis data and Defendants' entitlement to payments.	Disputed. Plaintiffs have failed to provide any support for this purported uncontroverted fact as required by Local Rule 56-3. Plaintiffs' interpretation of the EDI Agreements is a legal conclusion that United disputes and that requires no response. <i>See</i> Opp. to Mot. for Part. Sum. J. at 42.
61. Any conclusion of law that is deemed a finding of fact is incorporated herein by this reference.	Disputed. To the extent any conclusion of law is deemed a finding of fact, United objects.

**ADDITIONAL MATERIAL FACTS AND EVIDENCE THAT PRECLUDES
PARTIAL SUMMARY JUDGMENT**

United presents the following additional material facts and evidence in opposition to the United States' and Ben Poehling's Motion for Partial Summary Judgment. As set forth in the Declaration of Abid R. Qureshi submitted pursuant to Federal Rule of Civil Procedure 56(d), filed concurrently, United expects to develop additional evidence on many of the factual matters that support the arguments in its Opposition through ongoing discovery in this litigation. See Declaration of Abid R. Qureshi, July 23, 2018.

**UNITED'S ADDITIONAL
MATERIAL FACTS AND
SUPPORTING EVIDENCE:**

A. Additional Material Facts Establishing the Impact of Diagnosis Coding Discrepancies on the Payment Rates Calculated by CMS

62. In determining the predicted cost of providing benefits to a given beneficiary, CMS' objective is to obtain "[r]isk scores [that] are consistent across both fee-for-service and Medicare Advantage settings, Schindler Decl. Ex. 1, 2010 Rate Announcement, at AR4336, such that "[r]isk scores for beneficiaries with the same diagnoses and characteristics should be identical" in the MA and traditional Medicare programs, Schindler Decl. Ex. 2, GAO, *Medicare Advantage: Substantial Excess Payments Underscore Need for CMS to Improve Accuracy of Risk Score Adjustments*, at AR12043.

63. In both traditional Medicare and Medicare Advantage providers sometimes submit diagnosis codes that

1	UNITED'S ADDITIONAL MATERIAL FACTS AND SUPPORTING EVIDENCE:	
2		
3		
4	do not correspond perfectly with patients' medical charts. <i>See, e.g.,</i> Schindler Decl. Ex. 15, Presentation from Division of Payment Validation at CMS0005886 (internal CMS presentation acknowledging that "In FFS Medicare, some portion of diagnoses on FFS claims are not documented in medical records."); Schindler Decl. Ex. 7, May Grant Dep. at 233:4-17 ("Q: So you are aware that there are errors [in FFS data], but you don't know the amount or extent because you believe there's no systematic study evaluating this issue? ... A: Again, 'aware' is a strong term. I would say it is my firm belief, having processed data for years, that any data set has errors in it. My experience with data would say that every data set you ever deal with that is a very large data set has some degree of error and the only question is what that degree of error is. And unless you study it, it is not knowable what that degree of error is.")

4	individual?" . . . "A. Yes. So this is	
5	again, with the God-like power to	
6	know everybody's cost, I know that	
7	these healthy people coded as sick cost	
8	the same as all the other healthy people	
9	and I magically already know they all	
10	cost \$500, an unknowable fact when	
11	running a risk adjustment calibration,	
12	but in this world I've created I know	
13	this. And so I have two people thrown	
14	into the sick category from a coding	
15	perspective, but from a cost perspective	
16	appropriately residing in the healthy	
17	category . . . And as you see from this -	
18	- and this is only -- by the way, it's a	
19	one-directional look at this, I will point	
20	out too, just looking at the incorrect	
21	coding, not going the other direction.	
22	The incorrectly -- incorrectly coded as	
23	sick, not healthy, incorrectly coded as	
24	healthy. It's not a robust presentation	
25	that has both sides. It's a one sided --	
26	. . . And then we just walk through it	
27	and say we haven't thrown any sick	
28	people into the healthy category	
	erroneously, so healthy people still cost	
	500 bucks apiece. But by virtue [sic]	
	adding two healthy people into the sick	
	population, you lower the perceived	
	average cost of the sick population....	
	Q: "So what is the principle that you're	
	illustrating with this example?" A:	
	"That if there is a pattern of	
	overreporting of diagnosis codes in fee	
	for service, then that pattern would	
	result in a underprediction of the	
	disease-related factors in the	

1	UNITED'S ADDITIONAL	
2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	model")	
5	68. CMS's own Division of Payment	
6	Validation used a simplified	
7	hypothetical to explain this concept	
8	internally to senior CMS leaders. In	
9	the slide presentation attached as	
10	Schindler Decl. Ex. 15, they	
11	hypothesized a scenario in which,	
12	when calibrating the CMS-HCC model,	
13	CMS identifies four FFS beneficiaries	
14	with the diagnosis code for diabetes	
15	and determines that the aggregate	
16	incremental healthcare costs for the	
17	four beneficiaries the following year	
18	were \$12,000. <i>Id.</i> at CMS0005888. In	
19	that scenario, CMS would conclude	
20	that the average per-patient cost	
21	associated with diabetes is \$3,000, and	
22	it would set the diabetes risk coefficient	
23	accordingly. <i>Id.</i> But, the presentation	
24	explained, suppose further that one of	
25	these diagnosis codes was a false	
26	positive; the beneficiary did not in fact	
27	have diabetes. That means that the	
28	\$12,000 was in reality attributable to	
	just three beneficiaries, such that the	
	true per-patient cost of diabetes was	
	actually \$4,000 ($\$12,000 \div 3$	
	beneficiaries). <i>Id.</i> at CMS0005888-89.	
	By averaging the cost over the four	
	beneficiaries with the diagnosis code,	
	rather than just the three beneficiaries	
	who actually have diabetes, CMS's	
	model produces a lower average	
	incremental cost (and associated risk	
	coefficient) than it would have done if	
	the diagnosis codes in the FFS data had	

UNITED'S ADDITIONAL MATERIAL FACTS AND SUPPORTING EVIDENCE:	
been perfectly accurate. As the CMS presentation put it, "Inclusion of undocumented diagnoses [in the FFS data] tends to reduce risk adjustment values." <i>Id.</i> at CMS0005888.	
69. Jeffrey Grant, one of CMS's risk adjustment experts, used a similar hypothetical when explaining to senior CMS officials that "Plans must submit like FFS to be paid full costs of sick population." Schindler Decl. Ex. 19, PowerPoint Presentation at 3, produced by UnitedHealth at USBP000011428; <i>see also</i> Schindler Decl. Ex. 20, Email from Jeffrey Grant to Thomas E. Hutchison dated May 29, 2009, produced at USBP000011424, attaching Schindler Decl. Ex. 19.	
70. In addition to recognizing the impact of coding discrepancies on payment rates internally, CMS also orally instructed MA plans that "if they stuck to how the data comes in to FFS, they would be paid correctly." Schindler Decl. Ex. 20 at USBP000011426 ("Plans were told that if they stuck to how the data comes in to FFS, they would be paid correctly."); Schindler Decl. Ex. 7, May Grant Dep. at 207:20-208:17 (testifying that CMS provided oral instructions to MA plans stating that "if they submitted data like fee for service, they would be paid equivalent to the calibration.")	
B. Additional Material Facts Establishing CMS Recognition Of The Need	

1	UNITED'S ADDITIONAL	
2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	To Assess MA Plans' Diagnosis Codes In Light Of The Codes Submitted In	
5	Traditional Medicare	
6	<i>1. The Coding Intensity Adjustment</i>	
7	71. Because MA risk adjustment is	
8	based on diagnosis codes, MA plans	
9	have an incentive "to find and report as	
10	many diagnoses as can be supported by	
11	the medical record"—to code with high	
12	"intensity." Schindler Decl. Ex. 5,	
13	Kronick & Welch, <i>supra</i> , at E3-E4.	
14	72. By contrast, reimbursement	
15	under traditional FFS Medicare	
16	generally is not tied to diagnoses, so	
17	the incentive for comprehensive coding	
18	is weaker. <i>See id.</i> at E3.	
19	73. MA plans therefore arrange for	
20	"chart reviews" to look for diagnoses	
21	documented in their beneficiaries'	
22	charts that a provider failed to code in	
23	claims data.	
24	74. CMS has long known that MA	
25	plans engage in chart review activities	
26	and, in effect, code more completely.	
27	<i>See, e.g.,</i> Schindler Decl. Ex. 21, 2009	
28	Advance Notice at AR004229-31	
	("CMS understands that MA plans	
	have made efforts to identify enrollees'	
	conditions and may be coding more	
	completely than FFS.")	
	75. Although CMS officials have	
	recognized that this is "an appropriate	
	activity for MA plans to engage in,"	
	<i>see, e.g.,</i> Schindler Decl. Ex. 7, May	

1	UNITED'S ADDITIONAL	
2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	Grant Dep. at 163:14-18, CMS also	
5	recognized that the divergent financial	
6	incentives between MA and traditional	
7	Medicare can lead to different coding	
8	patterns that affect risk adjustment	
9	payments.	
10	76. Medicare experts have long	
11	recognized that "for the purposes of	
12	creating an equitable MA payment	
13	system, the relevant question is	
14	whether MA risk scores are	
15	systematically different than those risk	
16	scores would be in FFS, and not which	
17	set of scores is more accurate" in an	
18	absolute sense. Schindler Decl. Ex. 5,	
19	Kronick & Welch, at E4 (emphasis	
20	added); Schindler Decl. Ex. 7, May	
21	Grant Dep. at 174:21 – 175:8 ("[T]hey	
22	are using accuracy not to talk about	
23	whether any specific diagnosis code in	
24	fee-for-services or managed care is	
25	accurate. It is to compare – to have	
26	comparable diagnoses. So it is	
27	accuracy of risk adjustment, really, not	
28	accuracy of coding . . . when they say	
	"inaccurate" they are not referring to	
	the accuracy or inaccuracy of any	
	specific code on any specific claim or	
	any specific RAP submission. They're	
	talking about comparable types of	
	data."); <i>id.</i> at 182:6-8 ("[T]he	
	definition of accuracy here," is that MA	
	plans "would be paid consistently with	
	how the model is calibrated.")	
	77. Congress understands this, too,	
	and in 2006 it instructed CMS to	

1	UNITED'S ADDITIONAL	
2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	analyze any “ <i>differences</i> in coding	
5	patterns between Medicare Advantage	
6	plans and providers under part A and B	
7	[i.e., traditional FFS Medicare].”	
8	Schindler Decl. Ex. 22, Pub. L. No.	
9	109-171, § 5301(b)(2), 120 Stat. 4, 51	
10	(2006) (emphasis added).	
11	78. Congress further said that, “to	
12	ensure payment accuracy,” CMS	
13	should adjust MA beneficiaries’ risk	
14	scores in light of those different coding	
15	patterns. <i>Id.</i>	
16	79. As recognized by the United	
17	States Government Accountability	
18	Office (“GAO”): “Risk scores for	
19	beneficiaries with the same diagnoses	
20	and characteristics should be identical,	
21	regardless of whether the beneficiaries	
22	are in an MA plan or Medicare FFS.”	
23	Schindler Decl. Ex. 2, GAO,	
24	<i>Substantial Excess Payments</i>	
25	<i>Underscore Need for CMS to Improve</i>	
26	<i>Accuracy of Risk Score Adjustments</i> , at	
27	AR012043; <i>see also</i> Schindler Decl.	
28	Ex. 6, March Grant Dep. at 117:7-18	
	(agreeing with this statement).	
	80. In other words, “the implicit	
	assumption in the design of the MA	
	payment system” is that if “Jane Doe	
	would have a risk score of 1.0 if she	
	were in FFS,” then “she would have	
	had the same risk score of 1.0 if she	
	were enrolled in MA.” Schindler Decl.	
	Ex. 5, Kronick & Welch, at E4; <i>See</i>	
	<i>also</i> Schindler Decl. Ex. 6, March	

1	UNITED'S ADDITIONAL	
2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	Grant Dep. at 122:2-23 (agreeing with this statement).	
5	81. Requiring MA plans to delete	
6	diagnosis codes that are unsupported	
7	even though CMS does not do the same	
8	for its FFS population would violate	
9	this fundamental risk adjustment	
10	requirement: it would result in an MA	
11	beneficiary having a lower risk score	
12	than an identical FFS beneficiary,	
13	resulting in a lower payment. <i>See,</i>	
14	<i>generally</i> , Schindler Decl. Ex. 19,	
15	USBP000011428 at 3 ("Plans must submit like FFS to be paid full costs of sick populations"); <i>see also</i> Schindler Decl. Ex. 7, May Grant Dep. at 274:22- 277:16	
16	82. CMS began imposing a	
17	downward adjustment to MA plans'	
18	risk scores in 2010, calculated to	
19	replicate the risk score-adjusted	
20	payments that would have resulted had	
21	plans not engaged in different coding activities. Schindler Decl. Ex. 1, 2010 Rate Announcement, at AR4334.	
22	83. CMS explained that, because the	
23	risk adjustment model is calibrated on FFS data,	
24	MA plans must code the way	
25	Medicare Part A and B providers do	
26	in order for risk adjustments to be	
27	valid. This means that MA	
28	<i>organizations are coding</i> <i>"accurately" when they are coding</i>	

1	UNITED'S ADDITIONAL	
2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	<i>in a manner similar to fee-for-</i>	
5	<i>service coding used on the</i>	
6	<i>beneficiaries to whom MA plan</i>	
7	<i>enrollees are being compared. In</i>	
8	<i>this sense, "differences" in coding</i>	
9	<i>patterns, regardless of the source,</i>	
10	<i>would make the MA plan coding</i>	
11	<i>"inaccurate" for purposes of</i>	
12	<i>implementing risk adjustment.</i>	
13	<i>Id. at AR4335 (emphases added).</i>	
14	84. CMS noted that several members	
15	of Congress had expressly recognized	
16	this relative notion of accuracy.	
17	Senator Grassley, for instance, had	
18	explained that the intensity adjustment	
19	provision was intended to address	
20	"coding that is inaccurate or	
21	incomplete for the purpose of	
22	establishing risk scores that are	
23	consistent across both fee-for-service	
24	and Medicare Advantage settings, even	
25	if such coding is accurate or complete	
26	for other purposes." <i>Id. at AR4336.</i>	
27	85. CMS has applied the Coding	
28	Intensity Adjustment in every year	
	since 2010. 42 U.S.C. § 1395w-	
	23(a)(1)(C)(ii).	
	86. CMS has never found that higher	
	MA coding intensity reflects the	
	inclusion of codes unsupported by	
	medical records; to the contrary, it has	
	said the data "fail[] to show a	
	systematic correlation between coding	
	pattern differences and errors in the	

1	UNITED'S ADDITIONAL	
2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	reporting of documented coding.”	
5	Schindler Decl. Ex. 1, 2010 Rate	
6	Announcement, at AR4337.	
7	87. Nevertheless, CMS continues to	
8	recognize that “to ensure payment	
9	accuracy,” it must account for	
10	“differential coding patterns in MA and	
11	FFS.” Schindler Decl. Ex. 23, 2014	
12	Rate Announcement, at AR4865.	
13	88. Each year, CMS reduces by a	
14	certain percentage the risk adjustment	
15	payments that an MA plan would	
16	otherwise have received based on the	
17	diagnosis codes it had submitted, in	
18	order to account for the MA plans’	
19	more complete coding. In 2017, for	
20	example, United expects that CMS will	
21	reduce its payment to United by	
22	approximately \$2.9 billion through its	
23	application of the Coding Intensity	
24	Adjustment. See Schindler Decl. Ex.	
25	24, Declaration of Mary Murley ¶ 9	
26	(July 23, 2018).	
27	89. CMS has found that “our	
28	methodology results in an accurate	
	measure of the coding differential	
	between FFS and MA.” Schindler	
	Decl. Ex. 25, 2013 Rate	
	Announcement, at AR4712.	
	90. Jeffrey Grant, one of only two	
	CMS officials deposed in this case to	
	date, testified that assuming the coding	
	intensity adjustment fully offsets any	
	activities that the plan undertakes to	

1	UNITED'S ADDITIONAL	
2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	code more completely, an MA plan	
5	would be <i>underpaid</i> if it were to audit	
6	just 25 percent of its members' charts	
7	(or even fewer) and delete any	
8	unsupported codes it found, while	
9	CMS continued its policy of not	
10	deleting such codes in the FFS data that	
11	it uses to calibrate its model. <i>See</i>	
12	Schindler Decl. Ex. 7, May Grant Dep.	
13	at 274:22-277:22 (Q: "Well, I want you	
14	now to assume, sir, in this hypothetical	
15	world that the coding intensity adjuster	
16	that we talked about earlier, I want you	
17	to assume that it fully offsets any	
18	activities that the plan undertakes to	
19	code more completely, chart reviews,	
20	home visits, whatever, but they're	
21	completely offset by the coding	
22	intensity adjuster. If the plan were to	
23	submit only the codes of people who	
24	are truly sick, to use your presentation	
25	example [Exhibit 1017], then that plan	
26	would be <i>underpaid</i> ." A: "In a	
27	hypothetical word that you are	
28	creating . . . in that world, in theory,	
	yes . . ." Q: "Mr. Grant, I want you to	
	again assume that the coding intensity	
	adjuster fully offsets all the activities	
	that a plan might undertake to code	
	more fully. I also want you to assume	
	that a plan audits every one of its charts	
	and deletes every unsupported code.	
	The problem that you highlight in your	
	slide presentation, Exhibit 1017, would	
	still exist in that scenario?" A: "In my	
	opinion, if you could have that	
	scenario, yes." Q: "The problem	

UNITED'S ADDITIONAL MATERIAL FACTS AND SUPPORTING EVIDENCE:	
would still exist?" A: "The problem would still exist if you have that scenario." Q: "Okay. Now I'd like to change the assumption slightly. Once again, the coding intensity adjuster fully offsets all activities that the plan undertakes that code more fully, but now the plan audits 50 percent of a chart, of its charts, and deletes the unsupported codes in that set. Would the problem still exist?" A: "Okay, we have multiple assumptions right? So we have the assumption that overcoding is the bias in the data. We have the assumption of perfect adjustment for plan coding activities. To a degree, it exists. It exists to a smaller amount." Q: "Same assumption regarding the coding intensity adjuster, but now the plan is auditing 25 percent of its charts and deleting the unsupported codes. Does the problem still exist? . . . " A: "Again, assumption of overcoding, endemic in fee for service, and assumption of plan – plan coding activities being 100 percent offset in theory it exists to the degree that diagnosis codes are deleted.")	
91. United performed chart reviews that covered significantly more than 25 percent of United's beneficiaries in 2009-2017. Schindler Decl. Ex. 52, Declaration of Jon Bird ¶ 6 (July 23, 2018).	

1	UNITED'S ADDITIONAL MATERIAL FACTS AND SUPPORTING EVIDENCE:	
2		
3		
4	92. Jeffrey Grant also testified that in his view he did not believe it was “improper” or “fraud” for a plan to perform one-way reviews that add additional diagnosis codes supported in the charts, without looking at whether previously submitted coded lack such support. Schindler Decl. Ex. 7, May Grant Dep. at 307:11-310:16 (Q: “Mr. Grant, I believe you testified earlier there was at least one plan for which you recall HRP performed a chart review while you were there; is this correct?” A: “Well there’s . . . more than one plan that we performed chart reviews for, yes.” Q: “Yeah. For the purpose of adding codes, you recall at least one plan?” A: “Yes.” Q: “And do you recall the identity of the plan?” A: “I do.” Q: “Okay. What is the identity?” A: “It was Coventry.” Q: “And in connection with that project, were you the relationship manager with Coventry?” A: “I was the overall relationship manager for Coventry, like all clients . . .” Q: “Is it fair to say that you were involved in that engagement?” A: “Right. And I oversaw all of our client engagements. I was the senior vice president for client services. I had client services that did the day-to-day for any client, and then if it was a special project that involved special skills, we might have people that were further managing the relationship with respect to that skill set because it required specialized

2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	skill.” Q: “Understood. The one	
5	instance in which you recalled in which	
6	there were review of charts to add	
7	codes, do you recall whether there were	
8	any efforts to reconcile those codes	
9	against previously submitted claims	
10	data?” A: “So from a coding	
11	perspective, we did totally blind	
12	coding, so the coders had no idea what	
13	was previously submitted. We did	
14	have the capacity not to duplicate	
15	submit [sic] diagnoses. We weren’t	
16	going one for one and trying to look at	
17	claims data and see if every claim was	
18	one-for-one backed by a diagnosis on	
19	that date.” Q: “As part of this effort,	
20	did HRP compare the codes identified	
21	in the blind coding effort against the	
22	claims data that was submitted by	
23	providers and delete codes that HRP’s	
24	coders did not identify?” . . . A: “I’m	
25	not sure. I believe we may have done –	
26	not systematically, not on a large-scale	
27	basis, but I believe there were cases	
28	where we did.” Q: “And at that time,	
	did you have a belief that not engaging	
	in such a systematic effort was	
	improper?” . . . A: “At that time, no.”	
	Q: “Okay. At that time, did you think it	
	was fraud?” A: “No, I did not	
	knowingly participate in [a] fraudulent	
	activity [laughter].” ⁸	

⁸ The prepared transcript of Mr. Grant’s deposition states: “No, I did not knowingly participate in the fraudulent activity.” United believes the transcript contains an error: Mr. Grant’s oral testimony on this issue did not contain the word “the” in describing “fraudulent activity.” Instead United understands Mr. Grant testified “I did not knowingly participate in a fraudulent

1 UNITED'S ADDITIONAL 2 MATERIAL FACTS AND 3 SUPPORTING EVIDENCE:	
4 93. Mr. Grant explained that in his 5 view, an MA plan's submission of an 6 unsupported code would be improper 7 only if it was making the "very specific 8 submission of a very specific data 9 element ... that [it] know[s] is 10 wrong.") <i>See id.</i> at 321:21-23.	
11 2. The RADV FFS Adjuster	
12 94. The purpose of Risk Adjustment 13 Data Validation ("RADV") audits is to 14 recover "overpayments." <i>See</i> Schindler 15 Decl. Ex. 18, 2010 RADV Rule, at 16 AR2819 ("Under the RADV audit 17 process we plan to recover the 18 overpayments identified during the 19 RADV audit.") (emphasis added).	
20 95. When CMS initiates a RADV 21 audit for a plan, it selects a sample of 22 the plan's enrollees for the audited 23 year, collects those enrollees' medical	

24 activity." On July 21, 2018, United requested that the court reporter review the video and revise the transcript to correct the error. The court reporter, however, declined to do so. United respectfully disagrees with the court reporter's decision not to revise the transcript. Prior to this statement and based on his experience at Health Risk Partners ("HRP")—a company Mr. Grant described as akin to "a risk adjustment support company" and where Mr. Grant worked from 2008-2010, Schindler Decl. Ex. 6, March Grant Dep. at 27:4-9—Mr. Grant testified that when HRP performed chart reviews for at least one MA plan whose relationship Grant managed, HRP did not engage in a systematic effort to compare the codes identified during chart review against the claims data submitted by providers and delete codes that HRP's coders did not identify. Mr. Grant further testified that he did not find this improper, which United believes implies he did not think it was fraudulent. Mr. Grant was not discussing a specific fraudulent incident. United therefore believes that Mr. Grant's oral testimony only makes sense given the context if he testified that he "did not knowingly participate in a fraudulent activity." For the Court's convenience and determination, United is submitting excerpts of Mr. Grant's video-taped deposition testimony at Schindler Decl. Ex. 59.

1	UNITED'S ADDITIONAL	
2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	records, and then assesses whether	
5	those records adequately support the	
6	enrollees' diagnosis codes. Schindler	
7	Decl. Ex. 26, Final RADV	
8	Methodology, at AR5312-13.	
9	96. In 2008, CMS announced that it	
10	would eventually start using its RADV	
11	audit findings to make "plan-level	
12	payment adjustments," meaning that it	
13	would extrapolate the results from the	
14	audited sample of the plan's	
15	beneficiaries to all of a plan's enrollees	
16	producing payment adjustment for the	
17	plan's entire contract with CMS.	
18	Schindler Decl. Ex. 43, Announcement	
19	of CY 2009 Parts C and D Rates and	
20	Policies, at 22 (Apr. 7, 2008).	
21	97. MA plans objected, and by 2010,	
22	CMS acknowledged a possible	
23	problem with defining	
24	"overpayment[s]" to include all	
25	payments resulting from unsupported	
26	diagnosis codes submitted by MA	
27	plans—namely, that the FFS data used	
28	to calibrate the risk adjustment model	
	contained coding discrepancies of its	
	own, meaning that MA payment	
	amounts already accounted for the	
	existence of some unsupported codes.	
	<i>See</i> Schindler Decl. Ex. 18, 2010	
	RADV Rule, at AR2826.	
	98. As commenters pointed out,	
	CMS needed to assess the discrepancy	
	rate in the FFS data and compare it to	
	the discrepancy rate of a given MA	

1	UNITED'S ADDITIONAL	
2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	plan before it could determine whether	
5	the plan had been overpaid. <i>See, e.g.,</i>	
6	Schindler Decl. Ex. 27, Public	
7	Comments of Aetna on the Proposed	
8	2009 RADV Rule at AR2627;

4	Proposed RADV Methodology, at	
5	AR5105-08; Schindler Decl. Ex. 32,	
6	Public Comments of United on the	
7	Proposed RADV Methodology, at	
8	AR5205-07.	
9	103. Among them was the American	
10	Academy of Actuaries, which stated	
11	that it was inappropriate to develop risk	
12	coefficients "with FFS data that ...	
13	were not validated or audited for	
14	accuracy" but then "apply those factors	
15	only to MA data that are validated."	
16	Schindler Decl. Ex. 33, Public	
17	Comments of the American Academy	
18	of Actuaries on the Proposed RADV	
19	Methodology, at AR5235-36. Doing so,	
20	it said, could result in "systematic	
21	underpayment." <i>Id.</i> at AR5236.	
22	104. Multiple commenters also noted	
23	that this approach would violate the	
24	statutory requirement that risk	
25	adjustment ensure "actuarial	
26	equivalence." <i>See, e.g.,</i> Schindler	
27	Decl. Ex. 30, Public Comments of	
28	Aetna at AR5053-54; Schindler Decl.	
	Ex. 31, Public Comments of Humana,	
	at AR5114 (Humana); see also 42	
	U.S.C. § 1395w-23(a)(1)(C)(i).	
	105. CMS officials acknowledged	
	that the commenters were right, stating	
	in internal CMS documents:	
	"The industry has argued that in	
	the RADV audits we are holding	
	them to a standard of perfection	
	for diagnosis coding but that	

1	UNITED'S ADDITIONAL MATERIAL FACTS AND SUPPORTING EVIDENCE:	
2		
3		
4	physician claims in FFS	
5	Medicare often include	
6	diagnoses that aren't supported	
7	in the medical record. And this	
8	wouldn't matter except that we	
9	use FFS claims data to develop	
10	our risk adjusters for Medicare	
11	Advantage. So when we estimate	
12	the relative cost of any given	
13	condition, we use diagnosis and	
14	cost data from FFS Medicare. So	
15	implicit in all of the adjustments	
16	we make to plans payments to	
17	account for the relative risk of	
18	their populations, are the factors	
19	that we developed using FFS	
20	data. ... [f]or our payments to	
21	be as accurate as possible, we	
22	should be using the same	
23	standard for both... To answer	
24	this issue, we can incorporate a	
25	FFS adjuster that estimates how	
26	much higher the plans payment	
27	would be if the model had been	
28	built using perfect data. This	
	factor would reduce the	
	estimated RADV overpayments	
	due from each plan. We think	
	this approach makes sense and	
	from a technical point of view	
	is the right thing to do.")	
	Schindler Decl. Ex. 16, FOIA	
	Agenda, at CMS0006200-01	
	(emphasis added).	
	106. When CMS published a revised	
	RADV methodology in February 2012,	

1	UNITED'S ADDITIONAL	
2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	it said that in determining any contract-	
5	level payment adjustments, it would	
6	apply a "FFS adjuster." Schindler	
7	Decl. Ex. 26, Final RADV	
8	Methodology, at AR5314.	
9	107. CMS explained that "[t]he FFS	
10	adjuster" would "account[] for the fact	
11	that the documentation standard used in	
12	RADV audits to determine [an MA]	
13	contract's payment error (medical	
14	records) is different from the	
15	documentation standard used to	
16	develop the Part C risk-adjustment	
17	model (FFS claims)." <i>Id.</i> at AR5314-	
18	15.	
19	108. If the effect of the unsupported	
20	codes in CMS's data is greater than or	
21	equal to the effect of the unsupported	
22	codes in the plan's data, the audit will	
23	conclude with a finding that there has	
24	been no overpayment such that "the	
25	final recovery amount is equal to zero."	
26	<i>Id.</i> at AR5314.	
27	109. CMS stated that the "amount of	
28	the adjuster" would "be calculated by	
	CMS based on a RADV-like review of	
	records submitted to support FFS	
	claims data." <i>Id.</i> at AR5315.	
	110. CMS has not yet published a	
	FFS adjuster or the FFS payment error	
	rate, despite publishing the relevant	
	methodology over six years ago. <i>See</i>	
	<i>Id.</i> at AR5314.	
	C. Additional Material Facts Establishing the Link Between This Motion	

1	UNITED'S ADDITIONAL MATERIAL FACTS AND SUPPORTING EVIDENCE:	
2		
3		
4	and United's Pending Administrative Challenges To The Government's Current Overpayment Theory	
5	111. In 2014, in connection with CMS's proposal of regulations about the "Reporting and returning of overpayments," multiple MA plans urged CMS to make explicit in its overpayment regulation the point that it had already recognized in its audit regulation: That "an overpayment cannot exist for an MA organization's particular contract unless CMS's payments to the [plan] as a whole are inaccurate in light of an appropriate Fee-for-Service Adjuster that is applied to the entire contract." Schindler Decl. Ex. 34, Public Comments of Humana on the Overpayment Rule, at AR907.	
16	112. United explained to the agency that, "[u]nder the Proposed Rule, [MA plans] will be undercompensated for the relative risk of their membership if they delete diagnosis codes from claims that are unsupported in a medical record and CMS does not simultaneously account for the equivalent diagnoses in FFS data." Schindler Decl. Ex. 35, Public Comments of United on the Overpayment Rule, at AR1041.	
25	113. CMS refused, announcing in its final rule (known as the "Overpayment Rule") that any undocumented diagnosis code would result in an overpayment to an MA plan: "[A] risk adjustment diagnosis that has been	

1	UNITED'S ADDITIONAL	
2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	submitted for payment but is found to	
5	be invalid because it does not have	
6	supporting medical record	
7	documentation would result in an	
8	overpayment," regardless of the errors	
9	in the agency's own FFS data.	
10	Schindler Decl. Ex. 36, Overpayment	
11	Rule, at AR1313.	
12		
13	114. The agency made no attempt to	
14	reconcile that view with its prior	
15	recognition of the need for a FFS	
16	adjuster when identifying	
17	overpayments through RADV audits.	
18	Instead, it argued that MA plans'	
19	contracts with CMS required them to	
20	"certify (based on best knowledge,	
21	information, and belief) the accuracy,	
22	completeness, and truthfulness of the	
23	risk adjustment data they submit to	
24	CMS." <i>Id.</i> ; see 42 C.F.R. § 422.504(l).	
25	It also asserted that the agency had a	
26	"long-standing risk adjustment data	
27	requirement that a diagnosis submitted	
28	to CMS by an MA organization for	
	payment purposes must be supported	
	by medical record documentation."	
	Schindler Decl. Ex. 36, Overpayment	
	Rule, at AR1314-15.	
	115. United subsequently brought an	
	Administrative Procedure Act suit	
	challenging the Overpayment Rule in	
	the U.S. District Court for the District	
	of Columbia. United has argued there	
	that unless CMS implements a	
	mechanism to account for unsupported	
	diagnosis codes in CMS's own FFS	

1	UNITED'S ADDITIONAL	
2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	data, requiring MA plans to delete	
5	unsupported codes in their provider-	
6	submitted data would violate CMS's	
7	statutory obligation under 42 U.S.C.	
8	§ 1395w-23(a)(1)(C)(i) to "ensure	
9	actuarial equivalence" between the MA	
10	and traditional Medicare programs.	
11	<i>See</i> Schindler Decl. Ex. 37, APA	
12	United Opening Br. at 8 (ECF 47-1).	
13	116. In addition, United has argued	
14	that requiring deletions by MA plans	
15	without comparable adjustments in the	
16	FFS data would violate CMS's	
17	statutory obligation to "us[e] the same	
18	methodology" when calculating risk	
19	scores of patients in the traditional	
20	Medicare program that it "expect[s] to	
21	be applied in making payments to MA	
22	plans. 42 U.S.C. § 1395w-23(b)(4).	
23	<i>See</i> Schindler Decl. Ex. 37, APA	
24	United Opening Br.	
25	117. In response, CMS has argued	
26	that the Overpayment Rule does not	
27	present a proper opportunity to	
28	challenge its present view that every	
	unsupported diagnosis code submitted	
	by an MA plan results in an	
	overpayment and must therefore be	
	deleted. Schindler Decl., Ex. 40, APA	
	CMS Reply Br., at 5-9 (ECF 64).	
	118. Relying on the same contractual,	
	regulatory, and sub-regulatory	
	provisions the government has invoked	
	here, CMS has argued there that MA	
	plans have long been required to delete	

1	UNITED'S ADDITIONAL	
2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	all unsupported codes they identified,	
5	and that the Overpayment Rule	
6	therefore changed nothing. <i>Id.</i>	
7	119. United has argued in turn that	
8	the contracts, manuals, and regulations	
9	are at best ambiguous, that they can	
10	and should be read in a manner	
11	consistent with CMS's adoption of a	
12	FFS Adjuster, and that if they are not	
13	read that way—and instead read to	
14	require deletion of all unsupported	
15	codes in MA data without any	
16	adjustment for the FFS data—then the	
17	provisions at issue would be unlawful	
18	in light of the statutory provisions	
19	discussed above. Schindler Decl. Ex.	
20	39, APA United Resp. Br., at 28-39	
21	(ECF 60).	
22	120. The parties completed summary	
23	judgment briefing in February (totaling	
24	over 200 pages), and Judge Collyer has	
25	scheduled argument for August 8,	
26	2018.	
27	D. Additional Material Facts Demonstrating that CMS Communicated to	
28	United that Two-Way Looks Were Not Required	
	121. Given the “volume and variety”	
	of diagnosis codes, CMS has	
	recognized that the presence of at least	
	some unsupported codes is	
	“inevitable.” Schindler Decl. Ex. 41,	
	2001 Medicare Managed Care Manual	
	§ 110.2, at AR5349.	
	122. In 2014, CMS considered and	

1	UNITED'S ADDITIONAL	
2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	then affirmatively decided not to	
5	finalize a proposed rule that would	
6	have prohibited MA organizations from	
7	performing reviews that only looked	
8	for additional diagnosis codes (known	
9	as "one-way" reviews). <i>See</i> Schindler	
10	Decl. Ex. 42, 79 Fed Reg 1918, 2000	
11	(January 10, 2014) (proposed medical	
12	record review rule); Schindler Decl.	
13	Ex. 36, 79 Fed Reg 29844, 29926 (May	
14	23, 2014) (finalized rule without	
15	medical record review component).	
16	123. During conversations between	
17	United and CMS over the course of the	
18	spring and early summer of 2014, CMS	
19	confirmed multiple times that "two-	
20	way" looks were not required. <i>See</i>	
21	Schindler Decl. Ex. 44, Deposition of	
22	Larry Renfro at 134:1 – 137:6 (May 6,	
23	2016) ("Renfro Dep.") (describing a	
24	conversation between Larry Renfro, the	
25	CEO of Optum, and then-Deputy	
26	Administrator of CMS Jonathan	
27	Blum); Renfro Dep. at 150:21 – 151:10	
28	(describing a telephone conversation	
	between Mr. Renfro and Marilyn	
	Tavener, then-Administrator of CMS,	
	on April 8, 2014); Schindler Decl. Ex.	
	45, MARA2160500 (reflecting the	
	same April 8, 2014 conversation	
	between Ms. Tavener and Mr. Renfro	
	regarding the implications of the	
	proposed rule); Schindler Decl. Ex. 46,	
	MARA1998459 (coordinating by email	
	an in-person meeting between senior	
	officials at CMS and United regarding	
	United's obligations in light of the	

1	UNITED'S ADDITIONAL	
2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	proposed medical record review rule);	
5	Schindler Decl. Ex. 47,	
6	MARA2157039 (T. Johnson notes	
7	from April 29, 2014 meeting between	
8	United and CMS officials).	
9	124. Specifically, in March 2014,	
10	Deputy Administrator of CMS	
11	Jonathan Blum told Larry Renfro, CEO	
12	of Optum (a United affiliate), that	
13	unless and until CMS adopted a	
14	regulation requiring MA plans to use	
15	their chart reviews to look both ways,	
16	there was no obligation for plans to do	
17	so. Schindler Decl. Ex. 44, Renfro	
18	Dep. at 134:1 – 137:6 (including	
19	testimony by Mr. Renfro that Mr. Blum	
20	“told me that at this point [the proposed	
21	rule]’s not in effect. As a result of not	
22	being in effect, we shouldn’t be doing	
23	it,” referring to United’s claims	
24	verification program).	
25	125. CMS Administrator Marilyn	
26	Tavener told Mr. Renfro the same	
27	thing in a subsequent telephone	
28	conversation. <i>See id.</i> at 150:21 –	
	151:10; 160:9 – 163:17 (including	
	testimony by Mr. Renfro paraphrasing	
	Ms. Tavener’s telling him that “If the	
	proposed rule goes into effect January	
	1, 2015, [United] should be doing	
	normal business, which means [United]	
	d[id] not have to be doing claims	
	verification”); <i>see also</i> Schindler Decl.	
	Ex. 45, MARA2160500 (reflecting the	
	same April 8, 2014 conversation	
	between Ms. Tavener and Mr. Renfro	

1	UNITED'S ADDITIONAL	
2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	regarding the implications of the	
5	proposed rule).	
6	126. On April 29, 2014, UnitedHealth	
7	sent four executives to meet with no	
8	fewer than five top officials from CMS:	
9	the new Deputy Administrator and	
10	Director of the Center for Medicare,	
11	Sean Cavanaugh; the Director of the	
12	Medicare Plan Payment Group, Cheri	
13	Rice; the Deputy Director of Medicare	
14	Parts C and D, Cynthia Tudor; the	
15	Special Assistant at CMS, Dan Farmer;	
16	and the Director of the Division of	
17	Capitated Plan Audits, Financial	
18	Services Group. Schindler Decl. Ex.	
19	47, MARA2157039 (T. Johnson notes	
20	from April 29, 2014 meeting between	
21	United and CMS officials).	
22	127. As Ms. Tavenner acknowledged	
23	during her deposition, Mr. Renfro set	
24	up this meeting between United and	
25	CMS to obtain clarification regarding	
26	United's obligations in light of the	
27	proposed rule. . See Deposition of	
28	Marilyn B. Tavenner at 126:15-127:10	
	(February 28, 2018) ("Tavenner Dep.")	
	(Q: You testified a moment ago you	
	said "I understand your concern,"	
	okay? What was the concern that you	
	understood Mr. Renfro to be expressing	
	to you? A: It's basically what's written	
	here. He was getting ready to sign an	
	attestation. He was unclear about what	
	to do with the records that he had	
	reviewed, and it didn't really get into as	
	much detail as was in this email, but it	

1	UNITED'S ADDITIONAL MATERIAL FACTS AND SUPPORTING EVIDENCE:	
2		
3		
4	was enough where the proposed rule, the fact that he wanted to sign for validation, he needed an answer. I referred him to the staff. Q: And he needed an answer about whether it was appropriate for United to cease looking for diagnosis codes to delete, correct? MR. FREEBORNE: Objection to form. A: He was looking for an answer about what he was supposed to do with the records he had reviewed, because he wanted to sign the attestation, and he wanted to make sure he did it correctly.”); <i>see also</i> Schindler Decl. Ex. 46, MARA1998459 (coordinating by email an in-person meeting between senior officials at CMS and United to “confirm [United’s] understanding”).	
5		
6		
7		
8		
9		
10		
11		
12		
13		
14		
15		
16	128. During that meeting, CMS told United that unless and until a proposed rule governing the review of medical records became final, MA plans did not, and do not, have an affirmative obligation to confirm whether diagnosis codes submitted by physicians are supported in the medical records. <i>See</i> Schindler Decl. Ex. 47, MARA2157039 (T. Johnson notes from April 29, 2014 meeting between United and CMS officials, noting that “CMS representatives reiterated that, under CMS regulations, MA plans were not required to design their chart review programs for overall accuracy until the proposed rule is finalized” and that Cheri Rice of CMS stated that “until the proposed rule relating to	
17		
18		
19		
20		
21		
22		
23		
24		
25		
26		
27		
28		

1	UNITED'S ADDITIONAL	
2	MATERIAL FACTS AND	
3	SUPPORTING EVIDENCE:	
4	medical records review was finalized,	
5	MA plans do not have a proactive	
6	responsibility to confirm whether	
7	diagnoses submitted by physicians are	
8	correct").	
9	129. United MA Plans memorialized	
10	this understanding, including in	
11	subsequent bids and risk adjustment	
12	data attestations they provided to CMS	
13	under the contracts. <i>See, e.g.,</i>	
14	Schindler Decl. Ex. 12,	
15	MARA1296259 (April 30, 2014 email	
16	from S. Nelson to C. Rice (CMS)	
17	regarding 2012 DOS risk adjustment	
18	data attestation, noting that CMS	
19	confirmed "that MA plans are . . . not	
20	currently required to design their	
21	medical record reviews to determine	
22	the accuracy of risk adjustment	
23	diagnoses"); Schindler Decl. Ex. 13,	
24	MARA2152278 (June 26, 2015 email	
25	from S. Nelson to C. Rice regarding	
26	2013 DOS risk adjustment data	
27	attestation, noting "During our	
28	conversations last year before the	
	proposed rule was withdrawn, CMS	
	confirmed to us that the proposed	
	requirements would not apply until the	
	effective date of the rule, and that MA	
	plans were thus not required to design	
	their medical record reviews to	
	determine the accuracy of risk	
	adjustment diagnoses); Schindler Decl.	
	Ex. 20, USBP000498420 (June 7, 2016	
	email from S. Nelson to C. Rice	
	regarding 2014 risk adjustment data	
	attestation, providing similarly);	

UNITED'S ADDITIONAL MATERIAL FACTS AND SUPPORTING EVIDENCE:	
Schindler Decl. Ex. 49, MA Supporting Documentation for CY2015 Bid, UHC of California, Inc., Contract No. H0543-001-000, at 8, dated Aug. 5, 2014 (emphasis added) (providing: "We . . . adjusted projected risk scores to account for changes in our medical record review processes. Specifically, <i>based on multiple conversations with CMS and CMS's treatment of medical record review in its recent rulemaking process, the health plan has decided to cease one of its prior processes that identified and deleted certain diagnoses codes through the medical record review process</i>").	
E. Additional Material Facts Demonstrating That Under the Government's Reading of the Contract, United's Bid Limitations Stating that United Was Not Validating Codes Were Incorporated Into the Contract's Payment Scheme As Well	
130. Article II of the MA contracts incorporates the "final Plan Benefit Package (PBP) bid submission (benefit and price bid proposal as approved by CMS. Rice Decl. Ex. 1, at 6.	
131. CMS requires MAOs to explain the assumptions underlying their bids, provide supporting documentation for their bids, and have an actuary certify that the assumptions are reasonable. <i>See, e.g., Schindler Decl. Ex. 51, Instructions for Completing the Medicare Advantage Bid Pricing Tools for Contracy Year 2014, at 95-110 (Apr. 5, 2013).</i>	

1	UNITED'S ADDITIONAL MATERIAL FACTS AND SUPPORTING EVIDENCE:	
2		
3		
4	132. Starting at least as early as 2011, United's final Plan Benefit Package each year explicitly stated: "[C]onsistent with our prior year activities ... [a]s part of the preparation of the bids, we did not attempt to validate any actual or projected risk scores through a review of applicable medical records or of the systems used to submit RAF data to CMS." Schindler Decl. Ex. 50, MA Supporting Documentation for CY2012 Bid, Pacificare of California, Inc., Contract No. H0543-007-000, at 5, dated June 5, 2011; <i>see also</i> Schindler Decl. Ex. 49, MA Supporting Documentation for CY2015 Bid, UHC of California, Inc., Contract No. H0543-001-000, at 8, dated Aug. 5, 2014 (stating in 2015 bid submission that "the health plan has decided to cease one of its prior processes that identified and deleted certain diagnosis codes through the medical record review process").

AMENDED JOINT RULE 26(f)
REPORT

DATE: April 9, 2018
TIME: 11 a.m.
COURTROOM: 5A

The Parties submit this amended Joint Report to the Court regarding the Rule 26(f) conference that counsel for the Parties conducted by telephone on December 8, 2017. At the Rule 26(f) conference, the Parties discussed the topics set forth in Rule 26(f), along with the topics set forth in the Court's February 28, 2018 Order Setting Scheduling Conference. The Parties then submitted a Joint Report on December 22, 2017 (Dkt. No. 191), which this Report updates and supersedes. The Parties' respective positions regarding each topic are set forth in detail below.

A. Statement of the Case

United States and Relator's Position: This is a civil fraud action under the False Claims Act ("FCA"), 31 U.S.C. §§ 3729-3733, as well as for restitution and common law damages, for monies unlawfully obtained and retained by Defendant UnitedHealth Group, Inc. and various of its direct and indirect subsidiaries ("Defendants") involved in Parts C and D of the Medicare Program.¹ Pursuant to its First Claim for Relief set forth in its First Amended Complaint ("FAC"), filed on November 17, 2017 (Dkt. No. 171), the United States alleges that Defendants violated 31 U.S.C. § 3729(a)(1)(G), known as the "reverse false claims" provision, by knowingly (as "knowingly" is defined by 31 U.S.C. § 3729(b)(1)) concealing or knowingly and improperly avoiding their obligations to repay significant sums of money to the Medicare Program.² Specifically, for over a decade, Defendants have been knowingly concealing and knowingly and improperly avoiding their contractual and regulatory obligations to repay risk adjustment payments to which they were not entitled from the Medicare Program. In particular, Defendants failed

¹ On February 12, 2018, this Court issued an Order granting Defendants' motion to dismiss the United States' Second, Third, and Fourth Claims for Relief under the False Claims Act but denying the motion as to the United States' First, Fifth, and Sixth Claims for Reliefs. (Dkt. No. 212) Accordingly, this statement about the case focuses on the First, Fifth, and Sixth Claims for Relief.

² On May 16, 2017, Plaintiff-Relator Benjamin Poehling filed his Second Amended Complaint (Dkt. No. 117) against Defendants. He is not pursuing any claims beyond those asserted by the United States.

1 to comply with their well-established contractual and regulatory obligations to
2 delete, withdraw, retract, or correct invalid diagnoses submitted by them to the
3 Medicare Program for risk adjustment payments based on the health status of
4 beneficiaries in their Medicare Advantage plans or to otherwise return to the
5 Medicare Program the overpayments based on the invalid diagnoses. On
6 information and belief, Defendants continue to engage in this unlawful conduct.

7 Pursuant to its Fifth Claim for Relief, the United States alleges that, based on
8 the same wrongful conduct, Defendants have been unjustly enriched by receiving
9 risk adjustment payments to which they were not entitled and must make
10 restitution. Pursuant to the Sixth Claim for Relief, the United States seeks to
11 recover the overpayments because they were paid by the United States based on
12 the mistaken belief that Defendants' diagnosis data was valid.

13 The United States' claims relate in part to Defendants' very large national
14 Chart Review Program, which they have conducted annually since 2005. The
15 United States alleges that Defendants systematically ignored the negative results of
16 their chart reviews, *i.e.*, results showing that diagnoses submitted by them for risk
17 adjustment payments were not supported by their beneficiaries' medical records,
18 and failed to comply with their obligations to delete the unsubstantiated diagnoses.
19 The United States Court of Appeals for the Ninth Circuit, in *United States ex rel.*
20 *Swoben v. UnitedHealthcare Ins. Co.*, 848 F.3d 1161, 1175-76 (9th Cir. 2016),
21 held that this type of conduct – turning a blind eye to information about
22 unsupported diagnoses – constitutes reckless disregard and deliberate ignorance
23 toward the truth or falsity of the data submitted to the Medicare Program. On
24 information and belief, Defendants have continued to ignore the negative results of
25 their Chart Review Program and, thus, have continued to avoid repaying the
26 Medicare Program overpayments based on invalid diagnoses. The United States
27 seeks to recover all overpayments due to Defendants' violation of the FCA.

28

1 In addition, the United States’ claims relate to Defendants’ disregard of
2 information from their Risk Adjustment Coding Compliance Review (“RACCR”)
3 Program about invalid diagnoses reported to them by their financially-incentivized
4 capitated and gainsharing providers. The United States alleges that Defendants
5 knew that these providers had a financial incentive to report invalid diagnoses to
6 increase risk adjustment payments and, based on the results of the RACCR
7 Program, that the providers actually or likely over-reported diagnoses, but
8 Defendants nonetheless continued to submit diagnoses from these providers and
9 knowingly and improperly avoided repaying Medicare for risk adjustment
10 payments based on invalid diagnoses from these providers.

11 UnitedHealth’s Position: This case arises from the United States’ and
12 Relator’s effort to change the rules governing obligations of Medicare Advantage
13 (“MA”) plans to verify data submitted by third-party healthcare providers. The
14 United States claims that UnitedHealth was obligated to undertake efforts to verify
15 diagnostic data from third-party healthcare providers that the government itself
16 does not undertake with respect to beneficiaries it insures under traditional
17 Medicare. UnitedHealth believes that the United States is seeking to impose
18 obligations that simply did not, and do not, exist. UnitedHealth submitted bids to
19 care for a population of beneficiaries based on a set of statutory and regulatory
20 rules administered by the Centers for Medicare and Medicaid Services (“CMS”).
21 Those rules include CMS’s risk adjustment methodology, which already reduces
22 the amount that UnitedHealth and other MA plans receive in a way that builds in
23 and reflects the existence of unsupported diagnosis codes. In addition, CMS
24 applies a statutory coding intensity adjustor, reducing payments to MA plans, to
25 account for Chart Review activities and other differences in coding patterns
26 between MA plans and CMS FFS data. UnitedHealth has not been overpaid,
27 unjustly enriched, or paid by mistake under those rules; to the contrary, requiring
28

UnitedHealth to delete unsupported diagnosis codes would result in UnitedHealth being *underpaid*.

Furthermore, UnitedHealth was transparent with CMS about the extent to which it was reviewing diagnosis codes submitted to it by providers, and CMS officials confirmed it was not required to do so-called “two-way looks” to double-check provider submissions. This suit is a misguided attempt to second guess that CMS guidance and oversight of the MA program, pursuing a windfall for the United States and Relator by forcing UnitedHealth to suffer a loss for playing by the rules CMS originally set up more than a decade after the fact. UnitedHealth has therefore asserted counterclaims for (1) Breach of Contract; (2) Breach of Covenant of Good Faith and Fair Dealing; (3) Fraudulent Inducement; (4) Negligent Misrepresentation; and (5) Promissory Estoppel.

B. Subject Matter Jurisdiction

United States and Relator’s Position: This Court has subject matter jurisdiction over Plaintiffs’ claims pursuant to 28 U.S.C. §§ 1331, 1345, & 1367(a) and 31 U.S.C. § 3732(a)-(b). The Court does not possess subject matter jurisdiction pursuant to 28 U.S.C. §§ 1331 and 1367 or Federal Rule of Civil Procedure 13 over Defendants’ counterclaims.

UnitedHealth’s Position: As to the counterclaims, this Court has subject matter jurisdiction pursuant to 28 U.S.C. §§ 1331 and 1367, as well as Federal Rule of Civil Procedure 13. To the extent jurisdiction is proper under the Complaint, it is also proper under the counterclaims, which arise out of the same transactions and occurrences alleged in the Complaint.

C. Legal Issues

United States and Relator’s Position: Many, if not most, of the key legal issues presented by this case have already been decided by the Ninth Circuit in its opinion in *Swoben*, including that (1) Defendants were not entitled to risk adjustment payments for diagnoses unsubstantiated by their beneficiaries’ medical

1 records, 848 F.3d at 1168 (“Each diagnosis code submitted must be supported by a
2 properly documented medical record”) (citations omitted); (2) Defendants were
3 obligated to exercise due diligence to ensure the validity of the diagnosis data they
4 submitted for risk adjustment payments and to take affirmative steps to address
5 errors in the diagnosis data they submitted for such payments, *id.* at 1174 (“The
6 defendants’ contention that they were under no obligation to take affirmative steps
7 to address errors . . . ignores § 422.503, which since 2005 has required Medicare
8 Advantage organizations to have effective compliance programs in place,
9 including ‘procedures for internal monitoring and auditing’ and for ‘ensuring
10 prompt response to detected offenses’”) (citing 42 C.F.R. § 422.503(b)(4)(vi),
11 (vi)(F), (vi)(G) (2005)); (3) Defendants were obligated to withdraw diagnoses
12 unsupported by their beneficiaries’ medical records, *id.* at 1185 n. 8 (“[I]f a
13 Medicare Advantage organization relied on medical record X to justify submitting
14 a particular diagnosis code to CMS initially, and the retrospective reviewer
15 concludes X does not support that diagnosis, then the code should be withdrawn”);
16 and (4) Defendants acted with actual knowledge that the diagnoses they submitted
17 were false when they withheld known errors from CMS and acted with reckless
18 disregard and deliberate ignorance about the falsity of the data submitted to CMS
19 when they turned a blind eye to the errors and did not withdraw them, *id.* at 1175-
20 76. The Court also rejected Defendants’ argument that, because CMS does not
21 verify diagnoses submitted under different parts of the Medicare Program (which
22 pay providers based on services rendered, not diagnoses submitted), Defendants
23 are entitled to risk adjustment payments based on diagnoses unsubstantiated by
24 their beneficiaries’ medical records. 848 F.3d at 1179 (rejecting this so-called
25 “actuarial equivalence” argument for “multiple reasons”).

26 In addition, in its February 12, 2018 opinion on Defendants’ Motion to
27 Dismiss (“MTD”) (Dkt. No. 212), this Court held that the United States’ FAC
28 adequately and “extensively alleges how central the diagnostic data is to the risk

1 adjustment payments CMS makes to Defendants” and “that the Government’s
2 FAC contains enough factual allegations of the effect of the submission of invalid
3 diagnosis codes on the Government’s risk adjustment payments, and on
4 Defendants’ retention of risk adjustment payment to which they are not entitled, to
5 satisfy the *Escobar* [materiality] standard.” Order on MTD at 19-20. This Court
6 further held that, with respect to the Government’s claims based on the second part
7 of the reverse false claims provision, 31 U.S.C. § 3729(a)(1)(G), “[t]he
8 Government has adequately pled facts showing that the Defendants have
9 knowingly avoided obligations to repay CMS by failing to delete invalid diagnosis
10 codes, and that such failure was material” and that “the issue here is . . . the
11 specific invalid diagnosis codes that Defendants submitted and failed to delete
12 despite information available to them.” *Id.* at 20-21. Accordingly, both the Ninth
13 Circuit and this Court have recognized the direct link between the invalid
14 diagnoses submitted by Defendants and the risk adjusted payments by Medicare.
15 *Swoben*, 848 F.3d at 1167-68 (“diagnoses codes contribute to an enrollee’s risk
16 score, which is used to adjust a base payment rate”); Order on MTD at 15 (“not
17 only do various contractual and regulatory materials require Defendants to submit
18 accurate diagnostic data, but that data is central to the calculation of the amount of
19 money CMS pays to Defendants”). Moreover, the Government believes that,
20 consistent with the Ninth Circuit in *Swoben*, this Court has recognized that
21 Defendants had a legal obligation to repay CMS by deleting invalid diagnosis
22 codes, including diagnoses unsubstantiated by the beneficiaries’ medical records.
23 *Id.*

24 Very recently, on March 23, 2018, Defendants filed an Answer to the FAC.
25 The Answer includes 21 enumerated affirmative defenses, some of which raise
26 new legal and factual issues. For example, Defendants contend that the wrongful
27 conduct alleged in the FAC was the fault of third parties (affirmative defense 19)
28 and that they are “not vicariously liable for the acts alleged in the” FAC

1 (affirmative defense 5), although Defendants also contend that they made a
2 voluntary disclosure to the Department of Justice of their wrongful conduct
3 pursuant to 31 U.S.C. § 3729(a)(2) (affirmative defense 21) and, thus, if they are
4 liable, their liability is limited to only double (not treble) damages. Defendants
5 also contend that the Government failed to mitigate damages (affirmative defense
6 6) although Defendants, in 2012, represented to the Department of Justice that they
7 were developing a program to delete unsubstantiated diagnoses and would do so
8 (FAC ¶ 190) and despite the fact that Defendants never informed CMS about the
9 specific unsubstantiated diagnoses that they failed to delete. *See* Order on MTD at
10 21 (“[G]eneralized knowledge does not amount to actual knowledge of specific
11 invalid diagnoses. Without such actual knowledge, CMS could not know how it
12 should change the risk adjustment payments.”) Other new issues raised by
13 Defendants’ affirmative defenses include, but are not limited to, that the “services
14 and products reimbursed by the United States under Medicare were worth what the
15 government paid” (affirmative defense 15), the Court does not possess subject
16 matter jurisdiction because the Relator is not an “original source” (affirmative
17 defense 16), and the Government’s claims against one or more Defendants are
18 improperly joined with its claims against other Defendants and must be severed
19 (affirmative defense 17). Plaintiffs are currently evaluating all 21 affirmative
20 defenses and presently anticipates moving to strike some of them under Rule
21 12(f)(2). Plaintiffs will need to conduct discovery relating to at least some of
22 Defendants’ affirmative defenses (depending on which remain), which may add
23 significantly to the amount of discovery that they need to conduct in this action.
24 For example, one of Defendants’ affirmative defenses is that “[t]he services and
25 products reimbursed by the United States under Medicare were worth what the
26 government paid” (affirmative defense 15). If the Court does not strike this
27 defense, then Plaintiffs would have to conduct extensive discovery about the
28

1 services and products that Defendants provided and whether they were worth what
2 the Government paid.

3 Moreover, on March 23, 2018, Defendants filed five counterclaims against
4 the Government. Defendants' counterclaims appear to be based in large part on
5 their meritless "actuarial equivalence" argument. Defendants seek to avoid their
6 legal obligations to delete diagnoses unsubstantiated by their chart reviews and to
7 retain payments for the invalid diagnoses. This is based on their legally erroneous
8 and entirely unreasonable interpretation of the terms "actuarial equivalence" and
9 "same methodology" in that part of the Medicare Statute relating to payments to
10 Medicare Advantage organizations ("MAOs"). There is nothing in the Medicare
11 Statute, including the use of those terms in the Statute, which entitles Defendants
12 to risk adjustment payments based on invalid diagnosis data. Defendants were
13 never entitled to payments based on invalid data and had longstanding contractual
14 and regulatory obligations to delete invalid diagnoses submitted by them for such
15 payments. Their attempt to avoid their obligations and keep substantial sums (at
16 least over one billion dollars for just four years) of Medicare funds and taxpayer
17 dollars to which they were never entitled should be summarily rejected by this
18 Court.

19 Plaintiffs believe that an early ruling by the Court on this "actuarial
20 equivalence" legal issue will streamline discovery and resolution of this case.
21 Alternatively, if Defendants are not asserting their "actuarial equivalence"
22 argument in this case as they appear to represent in their statement of the legal
23 issues (below), then they should stipulate that they are not asserting this argument
24 here and withdraw their numerous and burdensome document requests relating to
25 this issue.

26 The counterclaims also appear to be based on Defendants' contention that, in
27 2014, CMS purportedly misled them to believe that they could ignore the negative
28 results of their chart reviews – the results showing the diagnoses that were

1 unsubstantiated by the beneficiaries' charts – and avoid their obligation to delete
2 the invalid diagnoses. The Ninth Circuit, in *Swoben*, already rejected this
3 argument. It explained that, although CMS decided in 2014 not to finalize the
4 proposed rule prohibiting MAOs from designing chart reviews to only identify
5 diagnoses for additional payments, CMS made clear that MAOs remained
6 responsible for ensuring the validity of their data to avoid receiving or retaining
7 overpayments. 848 F.3d at 1169-70. The Ninth Circuit further explained that, in
8 2014, CMS finalized a regulation that had the same effect as the proposed
9 regulation because it required the return of overpayments resulting from the
10 submission of diagnoses that are unsupported by the beneficiaries' medical
11 records. *Id.* at 1185 n.4.³ Furthermore, according to Defendants' own senior
12 executives, in 2014, CMS told them that they could not ignore information about
13 invalid diagnoses from their reviews of medical records and that CMS could not
14 advise Defendants about their compliance with laws regarding their overpayment
15 obligations. (FAC ¶ 226 & 228-29).

16 The Government presently anticipates moving to dismiss the counterclaims.
17 Among other deficiencies with these counterclaims, it appears that Defendants'
18 alleged damages are anticipatory, contingent, and unripe in that they are premised
19 on this Court issuing a judgment requiring Defendants to repay the overpayments
20 due to their failure to delete invalid diagnosis data. The primary intent of

21
22 ³ The regulation that CMS finalized in 2014 is often referred to as the
23 Overpayment Rule, 42 C.F.R. § 422.326. It is the regulation that Defendants
24 challenge in their Administrative Procedure Act ("APA") case. That regulation
25 was issued pursuant to the Patient Protection and Affordable Care Act ("ACA"),
26 42 U.S.C. § 1320a-7k(d), which requires MAOs to report and return overpayments
27 no later than 60 days after their identification of the overpayments; otherwise, their
28 late overpayments become "obligations" under the FCA and the MAOs are subject
to liability under the reverse false claims provision of the FCA even if they
returned the overpayments after 60 days. The resolution of the APA case will not
resolve this FCA case. *See UnitedHealthcare Ins. Co. v. Price*, 2017 WL 2623783,
at 2-3 (D.D.C. June 14, 2017). This case does not involve the Overpayment Rule
because Defendants were not just late in returning the overpayments; they never
returned the overpayments. Nonetheless, in this case, Defendants are demanding
the production of documents relating to the Overpayment Rule.

Defendants' meritless counterclaims appears to be to divert the Government's resources from focusing on its document production and other efforts in this matter.

Pursuant to Rule 12(a)(2), the Government's response to the counterclaims is due within 60 days after service of the counterclaims on the United States Attorney, to and including May 22, 2018. The Government and Relator also seek the same 60 days to move to strike some or all of the affirmative defenses. Plaintiffs recently sent Defendants a proposed stipulation that Plaintiffs will file their motions to dismiss and to strike by May 22, 2018; Defendants may file their oppositions by June 11, 2018; Plaintiffs may file their replies by June 25, 2018; and the motions shall be heard on July 9, 2018. If Defendants do not agree to this stipulation, Plaintiffs will file an application with this Court seeking this relief.

In addition to issues identified elsewhere in this Report, including Section M, Plaintiffs anticipate that other legal issues may arise as discovery continues.

UnitedHealth's Position: This case centers on a dispute about the reciprocal contractual, regulatory, and statutory obligations of MA plans and CMS in the MA program. As the Parties, as well as this Court, have previously recognized, the "central" issues in the dispute are currently being litigated in an Administrative Procedures Act suit in the District of Columbia. See Order Denying Motion to Transfer at 4, ECF No. 154 (noting the government's agreement that "'identical arguments' . . . are 'central' to the cases"); see also *UnitedhealthCare Ins. Co. v. Hargan*, No. CV-16-RMC (D.D.C.).⁴ Those issues include whether MA plans are required to attempt to delete all unsupported diagnosis codes submitted to them by providers, even though the model CMS uses to determine payment amounts is based in part on unsupported codes that CMS itself collects in the Medicare Part A and B programs. CMS has acknowledged in the APA suit that it knowingly uses

⁴ Upon the resignation of former Secretary of Health and Human Services Thomas Price, UnitedHealth's APA action was automatically re-captioned with the name of Acting Secretary Eric Hargan.

1 unsupported diagnosis codes to estimate its expected costs for Medicare patients
2 whose care it pays for directly under Medicare Parts A and B. UnitedHealth has
3 argued that CMS’ choice has direct implications for the types of risk adjustment
4 data it collects from MA plans. Specifically, Congress has required CMS to use
5 the “same methodology” to determine payment amounts in the MA program, 42
6 U.S.C. § 1395w-23(b)(4), and has directed CMS to “ensure actuarial equivalence”
7 between the two programs, 42 U.S.C. § 1395w-23(a)(1)(C)(i). In light of those
8 statutory requirements, UnitedHealth believes that CMS cannot require MA plans
9 to use a different approach to the diagnosis codes they submit than the one CMS
10 itself uses, such as by requiring MA plans to delete all unsupported codes, unless
11 CMS also provides a means of adjusting for the different methodologies.

12 UnitedHealth and the United States have already fully briefed cross-motions
13 for summary judgment in the APA case addressing those issues. UnitedHealth
14 believes it would be inappropriate, inefficient, and a waste of judicial resources to
15 attempt to litigate those same issues here while they are already pending before the
16 APA court. If the APA court upholds the validity of the regulation there based on
17 a rejection of UnitedHealth’s arguments described above, UnitedHealth will not
18 seek to re-litigate the regulation’s validity here. If the APA court finds the
19 regulation *invalid*, then at that point the Parties will be able to address the
20 implications of such a decision for the United States’ claims here. The extent to
21 which the “actuarial equivalence” and “same methodology” requirements will need
22 to be addressed by this Court, and the timing of any such consideration by this
23 Court, thus depends on the outcome in the APA case. UnitedHealth remains
24 willing to discuss those issues with the United States in an attempt to avoid
25 unnecessary and inefficient briefing on the United States’ contemplated motion for
26 partial summary judgment on this issue (and has been open to such discussions
27 since the United States first raised the prospect of a motion for partial summary
28 judgment on this issue in November 2017).

1 Depending on how the APA case is resolved, there may also be other FCA-
2 and fact-specific issues to resolve in this case, including:

3 (i) Whether a physician's subjective clinical judgment regarding
4 diagnostic coding may give rise to a false claim under the FCA;

5 (ii) Whether any regulatory or contractual violations UnitedHealth did
6 commit were committed "knowingly," in light of the regulatory landscape and the
7 government's knowledge and approval of UnitedHealth's chart review processes;

8 (iii) Whether any alleged noncompliance was material to payment under
9 the FCA or the United States' unjust enrichment or payment by mistake claims;

10 (iv) Whether the acts of UnitedHealth resulted in damages actionable
11 under the FCA or claims of unjust enrichment and payment by mistake; and

12 (v) Whether the United States can sustain claims for unjust enrichment
13 and payment by mistake when valid contracts between the parties existed.

14 The United States has taken the position here, as it did on remand in
15 *Swoben*, that the Ninth Circuit's *Swoben* decision resolves many of these questions
16 in the United States' favor. That is incorrect. The Ninth Circuit's decision arose
17 following a dismissal on Rule 8 and 9(b) grounds, and resolved only the narrow set
18 of issues that were actually at issue there. Specifically, the Parties there disputed
19 the extent of detail that Rule 9(b) requires at the pleading stage in a case like this
20 one, and also the extent of the verification obligations imposed by the "best
21 knowledge, information, and belief" standard contained in the contractual
22 attestation. *See Swoben*, 848 F.3d 1178-79. The Ninth Circuit expressly *declined*
23 to address whether the United States' allegations stated a claim under the reverse
24 false claims provision. *Id.* at 1172 n.6. Accordingly, *Swoben* is of minimal
25 guidance now that this Court has dismissed the United States' attestation-based
26 claims (Dkt. 212), and the only FCA claim remaining is based on a theory that was
27 not addressed by the Ninth Circuit.

28

1 In addition, contrary to the United States’ contention, in granting in part
2 UnitedHealth’s motion to dismiss on February 12, 2018 (Dkt. 212), the Court did
3 not “recognize[] that [UnitedHealth] had a legal obligation to repay CMS by
4 deleting invalid diagnosis codes”—the Court merely held that, at this stage (where
5 factual allegations must be accepted as true), the FAC contained sufficient
6 allegations to plead materiality under the United States’ remaining causes of
7 action. (Order on MTD at 20-21.)

8 The United States also fundamentally misconstrues UnitedHealth’s
9 counterclaims and affirmative defenses. UnitedHealth’s counterclaims and
10 affirmative defenses do not rely on the actuarial equivalence issues being
11 separately litigated in the APA case. Rather, UnitedHealth’s counterclaims are
12 based on the fact that CMS failed to issue any rule or otherwise make clear any
13 requirement to perform two-way looks, affirmatively represented to UnitedHealth
14 that two-way looks were not required, knew that UnitedHealth understood it was
15 not under an obligation to perform two-way looks and relied on that understanding
16 in calculating its bids and entering into MA contracts with CMS, and continued to
17 enter into and pay UnitedHealth under such contracts. Yet the United States, years
18 after the fact, seeks to alter the fundamental assumptions built into UnitedHealth’s
19 bids, and thus, their contracts with CMS. The United States’ conduct under these
20 circumstances gives rise to UnitedHealth’s valid assertion of counterclaims
21 consisting of breach of contract, breach of the covenant of good faith and fair
22 dealing, fraudulent inducement, negligent misrepresentation, and promissory
23 estoppel. UnitedHealth is prepared to litigate any motions to dismiss and/or strike
24 its counterclaims and affirmative defenses.

25 **D. Parties, Evidence, etc.**

26 **1. Parties**

27 The Parties are Plaintiff United States of America, Relator Benjamin
28 Poehling, and Defendants UnitedHealth Group Incorporated, United HealthCare

Services, Inc., UnitedHealthcare, Inc., Ovations, Inc., Optum, Inc., and OptumInsight, Inc., as well as the numerous Medicare Advantage Organizations identified in paragraph 26 of the FAC. The full list of Defendants' parents and subsidiaries is available in UnitedHealth's Corporate Disclosure Statement, Dkt. No. 129, and UnitedHealth's Notice of Interested Parties, Dkt. 130.

2. Percipient Witnesses

United States and Relator's Position: Plaintiffs, at this early stage of the litigation and subject to the factual record developed during discovery, identify the following potential percipient witnesses in this case: The individuals identified in Plaintiffs' Initial Disclosures (served on Defendants on December 22, 2017) as individuals likely to have discoverable information that the Government and Relator may use to support their claims; Relator Benjamin Poehling; the current and former executives and employees of Defendants identified in paragraph 42 of the FAC; the individuals identified and/or described in the Declaration of Carol Wallack in Support of the United States' Opposition to United's Motion to Transfer, Dkt. No. 138-1; the current and former employees of the incentivized providers listed in Exhibits 14 and 15 of the FAC; the chart reviewers and diagnosis coders who reviewed charts and coded diagnoses as part of Defendants' Chart Review, Claims Verification, and RACCR Programs; certain current and former employees of CMS and its contractors, including Palmetto and ARDX; and certain current and former participants in a managed care industry group called the Industry Collaboration Effort ("ICE").

UnitedHealth's Position: In addition to the witnesses identified by the United States and the individuals identified in UnitedHealth's Initial Disclosures (served on the United States on December 22, 2017) as those likely to have discoverable information that UnitedHealth may use to support its claims and defenses, UnitedHealth anticipates, subject to the factual record developed during discovery, that the following may be key witnesses in this action: (1) Marilyn

1 Tavenner, the former Administrator of CMS; (2) Jonathan Blum, the former
2 Principal Deputy Administrator and Director of CMS; (3) Sean Cavanaugh, the
3 former Deputy Administrator and Director of CMS; (4) Cheri Rice, the Acting
4 Deputy Director of the Center for Medicare at CMS; (5) Jeffrey Grant, the former
5 Division Director, Capitated Payment; (6) Dan Farmer, the former Special
6 Assistant at CMS; (7) Julia Gorner, Director, Division of Capitated Plan Audits at
7 CMS; (8) Cynthia Tudor, Deputy Center Director, Parts C and D at CMS; (9)
8 Lateefah Hughes, the former Acting Deputy Group Director of Payment Policy and
9 Financial Management at CMS; (10) Tom Hutchinson, the former Director of the
10 Medicare Plan Payment Group at CMS; (11) Sean Creighton, the former Deputy
11 Group Director of Payment Policy and Financial Management at CMS; (12)
12 Jennifer Harlow, the Acting Director and Deputy Director of Medicare Plan
13 Payment Group, Division of Payment Systems at CMS; (13) Jonathan Smith, the
14 Director of the Medicare Plan Payment Group, Division of Retiree Drug Subsidy at
15 CMS; (14) current and former government officials who (a) devised the MA risk
16 adjustment methodology; (b) reviewed UnitedHealth's annual MA plan bids
17 setting forth its proposed capitated payment amounts; (c) established CMS'
18 average cost and risk calculations within specific geographic regions; (d)
19 developed the methodology CMS uses for its own audits of MA plans; and (e) set
20 forth diagnosis coding and medical documentation criteria used by the government
21 itself in auditing health plans; and (15) UnitedHealth employees who will testify to
22 the fact that they believed, and still believe, that UnitedHealth was paid properly
23 and never submitted false statements or claims and did not knowingly and
24 improperly retain any overpayments or avoid or decrease any obligations.

25 **3. Key Documents**

26 United States and Relator's Position: Plaintiffs, at this early stage of the
27 litigation and subject to the factual record developed during discovery, identify the
28 following potential key categories of documents in this case: The documents and

1 electronically stored information (“ESI”) identified in Plaintiffs’ Initial Disclosures
2 as documents and ESI that the Government and Relator may use to support their
3 claims; the documents referenced in the FAC; documents relating to Defendants’
4 Chart Review, Claims Verification, and RACCR Programs; documents relating to
5 Defendants’ knowledge (as that term is defined by the FCA) about inaccurate or
6 untruthful diagnoses submitted by providers, including diagnoses unsubstantiated
7 by the providers’ medical records; documents relating to Defendants’ obligation to
8 submit accurate and truthful risk adjustment data to Medicare for risk adjustment
9 payments, including the obligation to submit diagnoses substantiated by
10 beneficiaries’ medical records; documents relating to Defendants’ obligation to
11 retract, withdraw, or delete inaccurate or untruthful risk adjustment data submitted
12 to Medicare, including the obligation to retract, withdraw, or delete diagnoses
13 unsubstantiated by beneficiaries’ medical records; documents relating to
14 Defendants’ submission of inaccurate or untruthful risk adjustment data to
15 Medicare; documents relating to Defendants’ failure to retract, withdraw, or delete
16 inaccurate or untruthful risk adjustment data; documents relating to Defendants’
17 contracts and other agreements with CMS and their attestations; medical records
18 from the RACCR “financially incentivized” providers relating to the beneficiaries
19 whose diagnoses are at issue; documents regarding liability accruals and reserves
20 that one or more of the Defendants took relating to their Chart Review, Claims
21 Verification, and RACCR Programs; documents relating to Defendants’
22 communications with CMS about the above-mentioned issues; and documents
23 related to damages.

24 UnitedHealth’s Position: UnitedHealth anticipates, subject to the factual
25 record developed during discovery, that the key categories of documents in this
26 action include: (1) the documents and electronically stored information (“ESI”)
27 identified in UnitedHealth’s Initial Disclosures as documents and ESI that
28 UnitedHealth may use to support its claims and defenses; (2) documents

1 demonstrating that UnitedHealth was transparent with the government about its
2 claims verification program; (3) documents demonstrating that there was no
3 statutory or regulatory requirement for MA plans to “look both ways”; (4)
4 documents demonstrating that UnitedHealth did not knowingly retain any alleged
5 overpayments; and (5) documents demonstrating that the allegedly fraudulent
6 conduct was not material to payment.

7 **E. Damages**

8 United States and Relator’s Position: At this time, Plaintiffs’ damages
9 calculations for both its Chart Review and RACCR damages analyses do not
10 involve sampling or extrapolation. Rather, at this time, Plaintiffs intend to identify
11 the specific diagnoses that Defendants failed to delete. In addition, Defendants’
12 contention below that the FCA damages in this case should be reduced by an
13 undefined “benefit” conferred by them to the Medicare Program is unfounded.
14 There was no benefit to the Medicare Program from Defendants’ receipt and
15 retention of payments based on invalid data.

16 Furthermore, contrary to Defendants assertion below, Plaintiffs do not seek
17 Defendants’ assistance in determining their damages theories. However, Plaintiffs
18 do seek and have a right to obtain the data and related information in Defendants’
19 possession that Plaintiffs need to calculate all of the damages to the Medicare
20 Program.

21 Chart Review Damages: In this action, the Government seeks to recover its
22 damages for the 2009 payment year and all subsequent years during which
23 Defendants knowingly avoided their obligation to delete diagnoses invalidated by
24 their own chart reviews. To date, the Government has data to determine its
25 damages for payment years 2011 to 2014. Assuming that the Court will schedule
26 this action for trial for early 2020, the Government will limit its damages claim for
27 purpose of that trial to five additional payment years: 2009, 2010, and 2015 to
28

2017.⁵ Accordingly, the Government is now seeking to obtain from Defendants the data for those additional payment years. Based on experience from the investigation, as recounted below, it will take Defendants a significant amount of time to produce the data for the other five years and, thus, for the Government to perform the damages analyses.

In the investigation of this matter, Defendants produced data and other information for the Government to assess its damages for four of the years at issue, the 2011 to 2014 payment years. The Government requested this data from Defendants in July 2015. It took Defendants one year, until July 2016, to produce the data for all four years. In addition, after July 2016, Defendants continued to provide supplement data and information necessary to perform the damages analysis. According to a December 2, 2016 letter from Defendants to the Government, for those four years, Defendants' initial production included 47 files containing 828 million rows of data and totaling 150 GB of data and subsequent productions included 60 supplemental and replacement files totaling an additional 150 GB of data. This was not surprising as Defendants have conducted millions of chart reviews. (FAC ¶ 169)

As alleged in paragraph 237 of the FAC, the Government determined that, for 2011 to 2014, Defendants failed to repay the Medicare Program at least \$1.1 billion by failing to look both ways and delete diagnoses invalidated by their Chart Review Program. These damages are based on (1) a comparison of the results of Defendants' chart reviews for those four years with the diagnoses they submitted for payment for those years in order to identify the unsubstantiated diagnoses that should have been deleted, as alleged in paragraph 235 of the FAC, and (2) a computation of the overpayments made to Defendants based on those invalid diagnoses.

⁵ To the extent that Defendants are continuing to ignore the negative results of their current chart reviews and failing to delete the invalid diagnoses, the Government reserves its right to recover the damages for payment years after 2017.

1 On October 5, 2017, the United States served Defendants with its First
2 Request for Production of Documents, which includes specific requests for the
3 chart review and other data required to conduct the damages analyses for the 2009,
4 2010, and 2015 to 2017 payment years. To date, Defendants have not produced
5 any of the requested data. In a letter dated March 7, 2018, Defendants stated that
6 they anticipate producing data for 2015 to 2017 payment years by April 27, 2018,
7 but that they reserve their right to modify what years are included and the data that
8 Defendants will produce for the 2016 and 2017 payment years will not be
9 complete. Defendants have not stated when they will produce the data for the 2009
10 and 2010 payment years.

11 Defendants are refusing to provide complete chart review and other data for
12 the later payment years and to comply with Rule 26(e)'s requirement that
13 discovery responses be supplemented or corrected if they are incomplete or
14 incorrect. In a recent letter, Defendants state that they will not produce any chart
15 review and other data necessary to assess damages after January 31, 2018.
16 However, for the 2016 payment year, pursuant to a deadline set by CMS,
17 Defendants (and other MAOs) are allowed to submit diagnoses to the Medicare
18 Program until August 2, 2018. Thus, for that year, Defendants currently may be
19 performing chart reviews in order to submit additional diagnoses to increase
20 payments and they may continue to perform chart reviews and submit those
21 additional diagnoses until August 2, 2018. Similarly, for the 2017 payment year,
22 Defendants (and other MAOs) are allowed to submit diagnoses until September 14,
23 2018. Thus, for that year, Defendants also currently may be performing chart
24 reviews in order to submit additional diagnoses to increase payments and they may
25 continue to perform chart review and submit the additional codes until September
26 14, 2018. Accordingly, in order to obtain complete and accurate data to assess
27 damages for payment years 2016 and 2017, Defendants must provide the
28 Government with (i) the results of and other information about any chart reviews

1 relating to those years that were performed after January 31, 2018 and (ii) any
2 supplemental or corrected data relating to the beneficiaries whose charts were
3 reviewed for those years (for example, supplemental data would include any
4 additional diagnoses submitted by providers for those beneficiaries for those
5 years). Because Defendants have refused to do this, the Government will move to
6 compel the production of complete and accurate data for the 2016 and 2017
7 payment years.

8 In addition, since at least 2014, Defendants have submitted diagnoses
9 through two separate systems to CMS, the Risk Adjustment Processing System
10 (RAPS) and the Encounter Data Processing System (EDPS). Defendants have two
11 separate databases that they use to report into each system. Defendants' database
12 that submits diagnoses to RAPS is called IRADS. It includes data about all of the
13 beneficiaries in Defendants' MA Plans, including the beneficiaries whose charts
14 were reviewed in Defendants' Chart Review Program. This data includes, among
15 many other things, the dates of services of the medical encounters that the
16 beneficiaries had with providers, information identifying the providers, and the
17 diagnoses submitted by the providers. Defendants' database that submits
18 diagnoses to EDPS includes additional information about the beneficiaries, the
19 providers, and the beneficiaries' health status. That additional data is likely to be
20 very useful in assessing damages.

21 In its October 2017 Document Request, the Government requested data from
22 both of Defendants' databases, IRADS and the database that submits to EDPS, in
23 order to ensure that it has complete and accurate data to perform its damages
24 analyses. So far, Defendants have not agreed to provide the data from their
25 database that submits to EDPS. Accordingly, the Government will move to
26 compel its production.

27 After the requested documents and data are produced, the Government will
28 conduct the damages analyses for the 2009, 2010, 2015 to 2017 payment years.

1 The Government will present its damages pursuant to Rule 26(a)(2) relating to the
2 disclosure of expert testimony.

3 For the Government to even attempt to make its initial damages expert
4 disclosures by June 28, 2019 (the date proposed by Plaintiffs for initial expert
5 disclosures), Defendants need to complete their production of the chart review and
6 other data necessary to compute damages by September of 2018. In order for their
7 productions to be deemed complete, Defendants must provide all information
8 necessary for the Government to understand and interpret the data that they
9 produce. It is the Government's understanding that Defendants will insist that the
10 Government obtain this explanatory information through formal discovery
11 (interrogatories and depositions). Obtaining this information through formal
12 discovery will significantly add to the time and effort necessary for the
13 Government to make its initial damages expert disclosures.

14 RACCR Damages: Defendants themselves estimated the amount of the
15 overpayments they would have to return to the United States as a result of the
16 RACCR Program in the tens of millions of dollars per year during the time period
17 before they started phasing out the program. In December 2017, Plaintiffs served
18 Defendants with interrogatories to obtain the information necessary to conduct the
19 first phase of their determination of these overpayments. The interrogatories seek
20 information necessary to identify which financially-incentivized (capitated and
21 gainsharing) providers coded excessive numbers of diagnoses (more than three
22 times the average rate), including those providers who were included in the
23 RACCR Program and failed Defendants' sample validation test. The
24 interrogatories also seek information about the diagnoses that these providers
25 coded at these excessively high rates and the beneficiaries for whom they coded
26 these diagnoses. Defendants have not yet provided all of the information requested
27 by the interrogatories. After Defendants complete their provision of this
28 information (and assuming the information that Defendants provide is sufficient),

1 Plaintiffs plan to conduct the second phase of their overpayment analysis, which
2 will require obtaining medical records from the outlier providers and conducting
3 medical record reviews to determine the invalid diagnoses that Defendants should
4 have deleted. Defendants have not stated when they will complete their responses
5 to these interrogatories.

6 Defendants' Alleged Damages: Based on Defendants' counterclaims, it
7 appears that their purported damages are contingent entirely on their paying
8 damages to the Government in this action. Accordingly, at this time, Plaintiffs do
9 not believe that there will be a need to conduct separate damages analyses
10 pertaining to Defendants' counterclaims. However, because Defendants have
11 failed to provide any description of their purported damages or even a description
12 of their theory of damages either in their pleading setting forth their counterclaims
13 or in this report, Plaintiffs do not know whether their belief is correct. If it is
14 incorrect, Plaintiffs will need additional time to conduct fact and expert witness
15 discovery relating to Defendants' damages. Pursuant to Rule 26(e)(1)(B), the
16 Court should order Defendants to supplement their Rule 26(a)(1)(A) initial
17 disclosures to describe their damages as well as to list the witnesses and documents
18 supporting their counterclaims.

19 UnitedHealth's Position: UnitedHealth denies that it owes any damages
20 alleged in the FAC. UnitedHealth will have an alternate theory as to how damages
21 should be calculated if liability is established in light of the contracts and
22 reimbursement methodology and the FCA measure of damages, which take into
23 account the benefit already conferred on the government. UnitedHealth anticipates
24 challenging the propriety of sampling and extrapolation and asserting that a fee-
25 for-service adjustor must be applied to account for unsupported codes in the
26 diagnostic data of fee-for-service beneficiaries.

27
28

1 At this point in the litigation, UnitedHealth does not have sufficient
2 information to estimate damages associated with its counterclaims against the
3 United States regarding its obligations under the MA program.

4 UnitedHealth notes that the United States and Relator's position above on
5 Damages details discovery-related issues instead of setting forth "[t]he realistic
6 range of provable damages," as required by the Court's Order Setting Scheduling
7 Conference. UnitedHealth addresses the United States' mischaracterization of
8 these discovery issues below in the proper section, Status of Discovery (Section I).
9 The notion that the United States needs significantly more time to conduct routine
10 discovery in a case it brought—despite the advantages of a multi-year
11 investigation, detailed responses to dozens of complex (and sometimes improper
12 and nonsensical) interrogatories, more than 20 Civil Investigative Demand oral
13 examinations, over 630,000 documents produced by UnitedHealth during the
14 investigation and in *Swoben*, 6 document productions totaling nearly 66,000
15 documents already in this litigation, and 5 spreadsheets of over 125,000 lines of
16 data produced by UnitedHealth in response to the United States' First Set of
17 Written Interrogatories to Defendants—rings hollow.

18 The United States chose to bring this lawsuit, and it cannot now complain
19 about conducting routine discovery to which UnitedHealth is entitled and that
20 UnitedHealth needs to defend itself. The United States effectively is seeking
21 UnitedHealth's assistance in not only determining what their theory of damages is,
22 but also in determining whether there are any damages (there are not). This is
23 wholly improper and does not justify the United States delaying discovery or
24 failing to meet its discovery obligations.

25 **F. Insurance**

26 Coverage is available to UnitedHealth for certain claims in the FAC under
27 UnitedHealth's insurance policies, and UnitedHealth has agreed to make certain
28 documents relating to those policies available to Plaintiffs.

G. Motions

The United States and Relator's Position: As explained in Section C (Legal Issues), the Government presently anticipates filing a motion to dismiss Defendants' counterclaims. In addition, the Government and the Relator presently anticipate filing a separate motion to strike certain of Defendants' affirmative defenses. As explained in Sections E (Damages) and I (Status of Discovery), Defendants refuse to produce certain very relevant documents and Plaintiffs presently anticipate moving to compel the production of these documents.

In addition, the Government reserves the right to seek leave to (i) add any Medicare Advantage Organizations (or Part D Sponsors) directly or indirectly owned, affiliated with, or controlled by UnitedHealth Group that should be included in the list of such organizations set forth in paragraph 26 of the FAC; and, (ii) if necessary to recover its damages, to add any other entities affiliated with UnitedHealth Group that owned, controlled, or managed the Medicare Advantage Organizations. Information that has recently come to Plaintiffs attention indicates that some Medicare Advantage Organizations (or Part D Sponsors) directly or indirectly owned, affiliated with, or controlled by UnitedHealth Group may not have been expressly named in the FAC or may have been identified incorrectly. As needed, Plaintiffs will seek to stipulate with Defendants to amend the FAC to address these types of issues.

In addition to the motions identified in Section M, Plaintiffs anticipate considering additional motions as issues arise throughout the litigation. Plaintiffs may also file motions to exclude certain documents as evidence for use both in supporting summary judgment motions and at trial.

UnitedHealth's Position: UnitedHealth has engaged in good-faith discussions and negotiations on all issues raised by the United States during the course of discovery either to resolve or narrow any areas of disagreement between the Parties. Those discussions and negotiations are ongoing, and UnitedHealth is

1 committed to working with the United States to avoid or limit the necessity for
2 seeking intervention from the Court.

3 In addition, UnitedHealth reserves the right to seek leave to amend its
4 counterclaims to add or substitute any Medicare Advantage Organizations (or Part
5 D sponsors) that may subsequently be added or substituted by the United States in
6 its FAC.

7 Both Parties reserve the right to file non-dispositive pretrial motions,
8 including but not limited to motions related to discovery disputes, motions *in*
9 *limine*, and motions to exclude experts. Dispositive motions are addressed below.

10 **H. Manual for Complex Litigation**

11 The Parties do not believe the Manual for Complex Litigation should be
12 utilized in this case.

13 **I. Status of Discovery**

14 *The United States and Relator's Statement:*

15 In July 2017, the Court provided that “the Parties may engage in written
16 discovery (document requests and interrogatories) and may do so before a Rule
17 26(f) conference.” (Dkt. No. 133) Defendants have served the Government with
18 two sets of document requests and the Relator with one set of document requests.
19 The Government has also served Defendants with two sets of document requests.
20 The Government has also served Defendants with several interrogatories to which
21 Defendants are responding by producing documents.

22 *Government's Production of Documents:* The Government fully appreciates
23 that Defendants have a right to obtain documents and other information relevant to
24 the claims and defenses that are appropriately a part of this case. The Government
25 has been and will continue to be fully cooperative with Defendants in that regard.

26 The Government has been working cooperatively with Defendants in
27 responding to their 97 separate document requests (the total number in both sets),
28 which cover a very wide range of documents on many subject matters. The

1 Government spent many hours working with Defendants in the drafting of
2 mutually-agreeable proposed protective orders relating to the treatment of
3 confidential documents and other information and relating to the non-waiver of
4 privilege and protected documents. These protective orders were entered by the
5 Court on January 16, 2018. (Dkt. Nos. 197 & 198) In addition, on a regular basis
6 over the last six months, the Government has been in contact with Defendants
7 about their document collection and production activities through emails, letters,
8 telephone calls, and meetings. The Government spent many hours providing
9 Defendants with an extensive amount of information about its document collection
10 efforts and document review protocols and discussing these efforts and protocols
11 with Defendants' counsel. The Government identified its numerous document
12 custodians and multi-access email accounts from which it has collected documents,
13 and the Parties have agreed to provide titles and dates of employment for each of
14 their document custodians. The Government also identified the search terms used
15 to collect potentially responsive documents in the custodians' electronic files. In
16 addition, the Government provided Defendants with detailed information about its
17 Technology Assisted Review methodology being used to identify the responsive
18 documents in its enormous collection of electronic documents.

19 The Government also has spent many hours responding to Defendants'
20 requests that it expand its efforts to locate and collect documents, revise its search
21 terms for collecting electronic documents, and revise its Technology Assisted
22 Review methodology. The Government has complied with many of these requests.
23 The Government has also compromised and tried to minimize the burden of
24 discovery disputes needed to be resolved by the Court by agreeing to produce
25 documents relating to various issues that are irrelevant to this case, including, for
26 example, documents relating to CMS' methodology for conducting administrative
27 audits and the calculation of the statutory coding intensity adjustment that applies
28

1 to all MAOs. (However, the Government may still file one or more motions as
2 necessary to limit or prevent such wasteful discovery.)

3 The Government has also agreed to produce documents and privilege logs
4 on a rolling basis. In addition, it has agreed to prioritize the production of various
5 documents at Defendants' request so long as it is given reasonable notice and
6 Defendants' also agree to requests by the Government to prioritize the production
7 of certain documents such as the production of the data necessary to perform the
8 Government's damages analyses.

9 In response to Defendants' document requests, the United States has so far
10 collected over four terabytes of data, constituting over five million documents,
11 from more than 150 custodians at CMS and other parts of the Department of
12 Health and Human Services ("HHS"). The United States is still in the process of
13 collecting documents in response to Defendants' requests that it expand the search
14 terms that it is using to collect potentially responsive documents and expects to
15 collect a substantial amount of additional documents within the next several
16 months. In response to other requests made by Defendants, the United States is
17 also continuing to identify additional document custodians, including custodians at
18 the Office of the Secretary of HHS.

19 The United States must review all of the documents that it has collected and
20 will collect over the next several months. It must review these documents for
21 responsiveness, confidentiality (for example, for patient identifiable data and
22 information relating to other insurance companies which participate in the
23 Medicare Advantage Program), and privilege. To expedite the task of reviewing
24 and producing responsive, non-privileged documents, the United States is utilizing
25 targeted searches, Technology Assisted Review, and manual review. Even
26 utilizing these methods, however, the task of identifying responsive, non-
27 privileged documents and determining which of those are confidential is enormous.
28 The Government currently estimates that there are at least 500,000 documents that

1 its attorneys must manually review for privilege and this does not include the
2 manual, eyes-on privilege review that will need to be conducted for documents that
3 the Government has not yet collected. Contrary to Defendants’ assertion below,
4 Relator’s counsel cannot perform this privilege review of Government documents.
5 Government attorneys must exclusively perform this review. Furthermore,
6 contrary to Defendants’ assertion below, the Government is not inappropriately
7 relying on the deliberative process privilege or applying the privilege too broadly.
8 *See NLRB v. Sears, Roebuck & Co.*, 421 U.S. 132, 150 (1975) (privilege protects
9 documents that “reflect[] advisory opinions, recommendations and deliberations
10 comprising part of a process by which governmental decisions and policies are
11 formulated”); *Hongsermeier v. Commissioner of Internal Revenue*, 621 F.3d 890,
12 904 (9th Cir. 2010) (privilege protects documents that are “predecisional” and
13 “deliberative”).

14 The Government’s initial goal was to make rolling productions of
15 documents on a regular basis throughout 2018 and to substantially complete its
16 production by the end of 2018. This goal was premised on the hope that
17 Defendants would agree to withdraw at least some of its requests for irrelevant
18 documents, but they have not. In addition, this goal was premised on the hope that
19 the Court would agree with the Government’s proposal that fact witness
20 depositions by both Parties commence after both Parties substantially complete
21 their document productions. However, over the last several months, Defendants
22 diverted the Government’s resources because of their insistence that they conduct
23 expedited depositions of certain Government witnesses. This was exacerbated by a
24 change in Defendants’ position in insisting that the Government also produce
25 documents relating to these witnesses on an expedited basis even though neither
26 Defendants’ deposition notice nor subpoena relating to these witnesses had
27 requested such documents. In order to accommodate the noticed depositions of
28 two senior Government witnesses (including a former Administrator of CMS),

1 which went forward notwithstanding the Government's objection that they were
2 premature, the Government had to interrupt its document collection and review
3 efforts in response to Defendants' 97 document requests (sets one and two) in
4 order to prioritize the collection, review and production of documents relating to
5 these two deponents. This has impeded the Government's document review and
6 production efforts.

7 Furthermore, the Government's resources are now being diverted by
8 responding to Defendants' counterclaims and affirmative defenses. Government
9 counsel is now focused on preparing motions to dismiss the counterclaims and
10 strike some of the affirmative defenses.

11 To date, the Government has produced approximately 10,000 documents.
12 The tasks of identifying responsive documents and conducting manual, "eyes-on"
13 privilege and confidentiality reviews have consumed and will continue to consume
14 significant Government's resources until these reviews are completed. The
15 Government proposes that phased discovery, with fact witness depositions
16 commencing in November 2018, would significantly facilitate its completion of the
17 production of documents. If Defendants continue to expedite the depositions of
18 Government witnesses, the Government's resources will be diverted to defending
19 those depositions and producing attendant documents and, thus, discovery will
20 proceed in a piecemeal fashion. This diversion will be in addition to the diversion
21 caused by moving to dismiss Defendants' counterclaims and strike their
22 affirmative defenses. This diversion will further delay the Government's
23 completion of its production of documents.

24 It should not be surprising to Defendants that it would require significant
25 time for the Government to produce documents in response to their numerous and
26 broad requests. In the investigation, the approximately 600,000 documents
27 produced by Defendants were produced over a 4 year time period, from December
28 2012 to December 2016. Furthermore, the Government also believes that

Defendants will not substantially complete their document production in this action until at least the end of 2018.

Relator's Production of Documents: Relator has served his responses and objections to Defendants' document requests and is in the process of making a relatively small production of non-privileged, relevant documents. Following his departure from UnitedHealth in 2012, Relator gave UnitedHealth all non-privileged documents in his possession generated in the course of and directly related to his work at UnitedHealth (that is, UnitedHealth's documents). Moreover, pursuant to agreements between UnitedHealth and Relator, he destroyed all such UnitedHealth documents in his possession other than his performance reviews.

Defendants' Production of Documents: Plaintiffs presently anticipate moving to compel Defendants' production of various documents that they have refused to produce. As explained in Section E (Damages), this includes chart review and other data that is necessary to assess damages for payment years 2016 and 2017. As another example, this includes documents from the electronic and hard copy files of Steve Hemsley, the Chief Executive Officer of UnitedHealth Group from 2006 to 2017, and Janis Leafgren, Mr. Hemsley's Administrative Assistant, who (for instance) sent and received emails on behalf of Mr. Hemsley. On March 27, 2018, Defendants sent the Government a letter stating that it needs some undefined amount of additional time to decide whether it will produce documents from these relevant custodians' files. However, Mr. Hemsley engaged in activities relevant to this case. Among other things, Mr. Hemsley chaired Defendants' Risk Adjustment Advisory Board (FAC ¶ 42); the executives who managed Defendants' Medicare Advantage Plans regularly reported to Mr. Hemsley with respect to risk adjustment payment-related issues (*id.*); according to a 2011 documents produced by Defendants, Mr. Hemsley was "significantly involved in the oversight and management of" Defendants' "Medicare business"

(*id.*); and, Mr. Hemsley was aware of risk adjustment payment compliance issues (*id.* at ¶¶ 154 & 188). Moreover, Mr. Hemsley was intimately involved in the decision to terminate Defendants’ Claims Verification Program and revert to ignoring the negative results of Defendants’ chart reviews and failing to delete the diagnoses invalidated by those reviews. Mr. Hemsley is the one who directed Messrs. Renfro, Johnson, Nelson, and Schumacher and Ms. Erickson to speak with CMS about Defendants’ termination of their Claims Verification Program. (FAC ¶¶ 224-26, 230-31, & 234) Defendants have provided no valid justification for not searching these custodians’ files.

Plaintiffs also anticipate that they may challenge many of Defendants’ privilege assertions, including privilege assertions pertaining to the rendering of non-legal advice, the attendance of Defendants’ attorneys at business meetings to shield those meetings from discovery, and the participation of Defendants’ attorneys in non-legal communications to shield those communications from discovery.

UnitedHealth’s statement:

UnitedHealth’s statement on the collection and production of documents:

The United States opted to bring this lawsuit, yet it now balks at the notion of meeting its discovery obligations and allowing UnitedHealth to pursue discovery to which UnitedHealth is entitled so that it may properly and effectively defend itself. The United States complains about its resources being “diverted” by other standard litigation matters—such as defending depositions and responding to counterclaims and affirmative defenses—and attempts to justify its failure to meet its original document production deadline because of these “diverted resources.” Despite the advantage of conducting a multi-year investigation related to this matter, the United States curiously now appears to claim that it lacks the resources to properly litigate this matter and to meet its discovery deadlines. The notion that Plaintiffs—which currently have thirteen government attorneys and twenty active

1 attorneys for Relator (including twelve partners)—lack the resources to conduct
2 routine discovery in a timely manner is absurd.

3 Prior to filing the FAC, DOJ investigated this matter for more than five
4 years. During that time, UnitedHealth produced over 600,000 documents,
5 compiled detailed responses to dozens of complex interrogatories, and produced
6 more than twenty witnesses for Civil Investigative Demand oral examinations. In
7 *United States ex rel. Swoben v. Secure Horizons*, Case No. CV-09-5013 JFW
8 (JEMx), UnitedHealth produced over 34,000 documents, which are also responsive
9 in this case. The United States, in contrast, made two small productions totaling
10 less than 600 documents, the majority of which were publically available and re-
11 produced from another action.

12 In response to the United States' Complaint in this case, UnitedHealth has
13 been collecting documents from 118 custodians and 7 email distribution lists and
14 has collected approximately 70 million documents to date. In addition to the more
15 than 634,000 documents produced during the investigation and the *Swoben*
16 litigation, UnitedHealth has produced over 65,845 documents in this litigation. On
17 January 29, 2018, UnitedHealth produced 5 spreadsheets of over 125,000 lines of
18 data requested by the United States in its First Set of Written Interrogatories to
19 Defendants. UnitedHealth has also produced two privilege logs thus far—in
20 addition to the more than ten it produced during the investigation—and intends to
21 continue producing privilege logs on a monthly basis.

22 In contrast, the United States failed to produce a single document until late
23 February 2018—and only did so at the direction of Magistrate Judge Segal after
24 initially refusing to comply with its discovery obligations related to the depositions
25 of Marilyn Tavenner and Jeffrey Grant. The United States' first two productions
26 consisted of 893 documents total. Although the United States' deadline for its first
27 Technology Assisted Review production was the week of March 19, it failed to
28 make its production until March 28, when it produced approximately 9,500

1 documents—approximately one-sixth of the number of documents produced by
2 UnitedHealth in this litigation alone. UnitedHealth also notes that Relator has yet
3 to produce a single document in this matter, despite UnitedHealth serving
4 document requests on Relator on January 19, 2018.

5 UnitedHealth has already agreed that the United States need not log certain
6 categories of likely privileged documents (such as communications with the
7 Department of Justice or the Office of General Counsel), so the United States’
8 assertion that it will have to review over 500,000 documents (and counting) for
9 privilege is not primarily tied to attorney-client or work product privilege concerns.
10 Rather, it is the product of the United States’ inappropriately broad view of the
11 qualified deliberative process privilege, as demonstrated by the United States’ first
12 privilege log that it produced on March 30, 2018. The United States has asserted
13 deliberative process privilege over every single document on that log for which
14 CMS is a custodian—approximately eighty percent of the entire log. This
15 specious, over-expansive view is nothing more than a strategic attempt to yet again
16 deprive UnitedHealth of key information that UnitedHealth needs to defend itself
17 in a lawsuit that the United States chose to bring. For example, the United States
18 brazenly attempts to assert deliberative process privilege over documents the
19 government itself produced previously in response to a FOIA request. In response
20 to that request, these documents were produced partially redacted, suggesting they
21 had already undergone review by the relevant government agency outside of this
22 litigation and deemed appropriate for public disclosure.

23 UnitedHealth has also provided the United States with information regarding
24 its document collection efforts and document review protocols and will continue to
25 work cooperatively with the United States on discovery. UnitedHealth engaged in
26 good-faith negotiations with the United States and exchanged detailed information
27 about its Technology Assisted Review protocol, and the Parties have now agreed
28 on respective Technology Assisted Review protocols. While UnitedHealth

1 proposed that the Parties exchange additional information, including custodians’
2 job titles and employment history, regarding custodians on December 20, 2017, the
3 United States was not prepared to do so.

4 UnitedHealth’s statement regarding data productions: The United States’
5 Damages section (Section E, above) is replete with inaccuracies and misleading
6 statements, and it is highly inappropriate for a Rule 26(f) Joint Report. To avoid
7 any prejudice resulting from the United States’ tactics, UnitedHealth will briefly
8 respond to set the record straight, but UnitedHealth does not believe this Joint
9 Report is the proper vehicle to respond to each and every one of the United States’
10 assertions.

11 UnitedHealth has been working diligently and devoting substantial
12 resources—in addition to the overlapping resources it is expending to respond to
13 other document requests and interrogatories, deposing witnesses, moving to
14 dismiss the FAC, answering the United States’ 364-paragraph FAC, and
15 developing its counterclaims, among other things—to collect and produce data
16 responsive to various requests by the United States. UnitedHealth agreed to the
17 United States’ request that UnitedHealth prioritize dates of service years 2014
18 through 2016 and will be making a significant production on April 27, 2018, the
19 government’s unilaterally imposed deadline. Per the United States’ request,
20 UnitedHealth also agreed to produce the requested data for dates of service years
21 2008 and 2009 after April 27, 2018. UnitedHealth has been transparent with the
22 United States about its data productions, and the United States’ claim otherwise is
23 preposterous. The United States appears to be dictating how much time
24 UnitedHealth is going to require to produce responsive data to its extremely broad
25 data requests, but UnitedHealth clearly is better positioned to make that
26 determination. Accordingly, UnitedHealth has in good-faith proposed a discovery
27 schedule that not only meets the United States’ unilaterally imposed April 27, 2018
28

1 deadline but also gives UnitedHealth sufficient time to satisfy its discovery
2 obligations.

3 **J. Discovery Plan**

4 **1. Rule 26(a) Initial Disclosures – Rule 26(f)(3)(A)**

5 The Parties made their initial disclosures on December 22, 2017.

6 United States and Relator's Position: In their initial disclosures, Plaintiffs
7 provided Defendants with the results of their estimation of damages for the four
8 payment years (2011 to 2014) for their violations of the FCA relating to their chart
9 reviews. These results are also described in paragraphs 235 and 237 of the FAC.
10 At this time, Plaintiffs claim a work product privilege with respect to the analyses
11 underlying this damages estimate. In accordance with Rule 26(a)(2), the United
12 States and Relator will make their expert damages disclosures at the time set forth
13 in the Schedule entered by the Court.

14 As previously explained, Defendants have not produced documents and data
15 required to compute damages due to their one-way chart reviews for payment years
16 2009, 2010, 2015, 2016, and 2017.⁶ In addition, Defendants have agreed to
17 provide certain information responsive to the Government's interrogatories
18 concerning Defendants' RACCR program, but have not yet done so. Once
19 Defendants have completed their provision of information responsive to the
20 Government's interrogatories, Plaintiffs will use that information to propound
21 subpoenas to third-party providers who participated in Defendants' RACCR
22 program, to enable Plaintiffs to obtain and review medical records in the
23 possession of those third-party providers.

24 The United States proposes that it will comply with the requirements
25 imposed by Rule 26(a)(1)(A)(iii) when it makes its damages expert witness(es)
26 disclosures pursuant to Rule 26(a)(2)(B). The United States needs sufficient time

27 ⁶ If Defendants' unlawful one-way Chart Review Program has continued past
28 payment year 2017, the United States reserves its right to recover the additional
damages.

(approximately nine months) to perform all the work, including, but not limited to, the document review and data analyses, necessary in order to compute damages and make its damages expert witness(es) disclosures after Defendants complete their production of the required documents and data (assuming that the Defendants also cooperate in producing the data in a usable format).

UnitedHealth's Position: The United States' discussion in this section is once again largely unnecessary and inappropriate in a Joint Report. The Parties exchanged initial disclosures on December 22, 2017 and will revise or supplement as required as the matter moves forward.

UnitedHealth continued to work diligently and to devote substantial resources to collect and produce data sought by the United States, and UnitedHealth will be making a significant production of data on April 27, 2018. Again, the notion that the United States needs significantly more time to conduct routine discovery and develop its damages theory and analysis is baseless. The United States chose to file this lawsuit after the benefit of a multi-year investigation, detailed responses to dozens of complex interrogatories, numerous Civil Investigative Demand oral examinations, and UnitedHealth's production of hundreds of thousands of documents. The United States must now engage in timely discovery and cannot continue to delay meeting its obligations.

2. Subjects and Timing of Discovery – Rule 26(f)(3)(B)

The Parties' positions as to the specific dates for Non-Expert and Expert Discovery Cut-Off are set forth below and in Exhibit A. The Parties' positions as to the subjects on which discovery may be needed, and whether discovery should be conducted in phases or be limited to or focused on particular issues, are as follows:

United States and Relator's Position: Certain key issues in this case are purely legal issues because the underlying facts are undisputed and most of those legal issues have already been decided by the Ninth Circuit in *Swoben*. Discovery

1 is therefore unnecessary to resolve these legal issues. In particular, the
2 “materiality” of Defendants’ submission of false risk adjustment data is a purely
3 legal issue as are Defendants’ legal obligations to delete unsubstantiated diagnoses.
4 In addition, Defendants’ “actuarial equivalence” argument (if Defendants are
5 making it in this case) raises a purely legal issue about the meaning of that term as
6 used in Part C of Medicare Statute. Accordingly, discovery relating to the
7 “materiality” issue, Defendants’ contractual and regulatory obligations to delete
8 invalid diagnoses, and the “actuarial equivalence” issue should be precluded or, at
9 a minimum, limited by the Court pursuant to Rule 26(b)(1).

10 Plaintiffs believe that discovery, including third party discovery, should
11 focus on the results of Defendants’ medical record reviews conducted as part of
12 their Chart Review, Claims Verification, and RACCR Programs; Defendants’
13 knowledge (as that term is defined by the FCA) about inaccurate or untruthful
14 diagnoses submitted by providers, including diagnoses unsubstantiated by the
15 providers’ medical records; Defendants’ knowledge (as that term is defined by the
16 FCA) about their obligation to submit accurate and truthful risk adjustment data to
17 Medicare for risk adjustment payments, including the obligation to submit
18 diagnoses substantiated by beneficiaries’ medical records; Defendants’ knowledge
19 (as that term is defined by the FCA) about their obligation to retract, withdraw, or
20 delete inaccurate or untruthful risk adjustment data submitted to Medicare,
21 including the obligation to retract, withdraw, or delete diagnoses unsubstantiated
22 by beneficiaries’ medical records; Defendants’ submission of inaccurate or
23 untruthful risk adjustment data to Medicare; Defendants’ processes and procedures
24 for submitting risk adjustment data to CMS and for withdrawing, retracting, or
25 deleting such data; Defendants’ failure to retract, withdraw, or delete inaccurate or
26 untruthful risk adjustment data; Defendants’ communications with CMS about the
27 above-mentioned issues; Defendants’ contractual and financial relationship with
28 their “incentivized” capitated and gainsharing providers; the unsubstantiated and

1 invalid diagnoses that incentivized providers reported to Defendants and
2 Defendants submitted to CMS for risk adjustment payments; any affirmative
3 defenses that remain after the government and relator's motion to strike; and
4 damages.

5 Plaintiffs propose that discovery proceed in phases and we describe these
6 phases in detail below. Both Rules 16(c)(2)(F) and 26(d)(3) and the Court's
7 February 28, 2018 Order Setting Scheduling Conference contemplate the use of
8 phased discovery. Phased discovery is particularly appropriate in very large and
9 complex cases such as this.

10 Plaintiffs believe that this approach is warranted to ensure that this very
11 large case be conducted in the manner most efficient for the Court, the Parties,
12 third parties, and witnesses. Plaintiffs also strongly believe that fact witness
13 depositions should begin after (i) the Court resolves the Government's motion to
14 dismiss Defendants' counterclaims, the Plaintiffs' motion to strike Defendants'
15 affirmative defenses, and the motion for partial summary judgment on Defendants'
16 "actuarial equivalence" argument (unless Defendants stipulate that they are not
17 making this argument in this case); (ii) the Parties produce substantially all
18 relevant documents to each other relating to the fact witnesses; and (iii) privilege
19 issues and issues relating to the appropriate scope of discovery are resolved.
20 Otherwise, there is a significant risk that (i) significant time will be spent deposing
21 witnesses about issues relating to counterclaims that are later dismissed on legal
22 grounds by the Court and/or defenses that the Court strikes or disposes of on the
23 Government's motion for partial summary judgment; (ii) the Parties will seek to
24 depose the same witnesses multiple times because, subsequent to their depositions,
25 additional documents relating to the witnesses (or the topics on which they were
26 deposed) were collected and produced; and (iii) the Court will be unnecessarily
27 burdened with multiple motions for protective orders and motions to compel. By
28 making this request for phased discovery, the Government does not seek to prevent

1 Defendants from obtaining any needed and relevant evidence, as Defendants may
2 pursue all reasonable discovery efforts they desire. The Government simply seeks
3 to ensure that discovery is conducted in the most efficient manner possible as
4 appropriate for litigation of this magnitude.

5 In addition, Defendants' proposal that non-expert discovery be cut-off on
6 January 28, 2019 is not realistic and is extremely prejudicial to Plaintiffs. This
7 deadline will force Plaintiffs to take depositions of fact witnesses before
8 Defendants produce documents relevant to their depositions. It will also force the
9 Government to focus on defending depositions rather than completing its
10 document production. In addition, this January 28, 2019 deadline will not provide
11 the Government with sufficient time to analyze the chart review and other data that
12 Defendants produce in order for the Government to assess damages and to obtain
13 the additional information it needs to understand and interpret the data. As
14 previously stated, the Government will need to obtain this information by deposing
15 fact witnesses and serving interrogatories on Defendants. This deadline also will
16 not provide Plaintiffs with sufficient time to determine the overpayments due to the
17 incentivized providers' invalid diagnoses, which, as previously stated, requires that
18 Plaintiffs subpoena medical records and other documents from these providers and
19 then review the medical records.

20 Furthermore, Defendants' argument that Magistrate Judge Segal already
21 decided that phased discovery should not occur in this case is incorrect. Magistrate
22 Judge Segal allowed Defendants to conduct the depositions of only two
23 Government witnesses over the Government's objection that the depositions were
24 premature. Defendants represented to Magistrate Judge Segal that they would not
25 re-depose those witnesses a second time in this matter. Magistrate Judge Segal did
26 not hold a Rule 16(b) Scheduling Conference or consider the phased discovery
27 plan set forth by Plaintiffs below.

28

Phase One:

- The Parties should focus on the completion of production of documents; the resolution of objections to the production of documents based on relevancy, burden, etc.; and the resolution of privileges being asserted to withhold the production of documents. It is likely that the Court's intervention may be required to resolve objections and privilege issues and, thus, that the Parties will need to brief these issues. Resolution of these objections and privilege issues before fact witness depositions will streamline such depositions and ensure that they are conducted appropriately.
- By April 30, 2018, Defendants must disclose in writing whether they will rely on an advice of counsel, and/or good faith reliance defense, and describe their defense(s) in sufficient detail to permit Plaintiffs to conduct relevant discovery. Disclosure of this information under the proposed deadline will permit Plaintiffs to seek additional discovery on these issues during phase one, including documents over which Defendants waive privilege, as applicable, through assertion of the defense(s).
- By September 30, 2018, Defendants must complete their production of documents and data responsive to the one-way chart review damages-related discovery requests that have been served. After the production of the data, Defendants should work cooperatively with Plaintiffs to explain and answer questions concerning the data produced, including explaining the format and source of the data, and any abbreviations. The Court's imposition of this intermediate deadline on Defendants ensures that Plaintiffs will have sufficient time to review Defendants' production of documents and data needed to compute damages, to clarify or resolve any issues, to take depositions of fact witnesses knowledgeable about such documents and data, to propound and receive answers to interrogatories about such documents and data, and to prepare the required disclosures of damages expert

1 witness(es) before opening expert reports are due.

- 2 • The Parties may take discovery relating to the preservation, collection, and
3 production of documents, including the Defendants' production of data
4 requested by Plaintiffs in order to compute damages.
- 5 • The Parties may serve subpoenas on third parties in order to obtain
6 documents from them. Plaintiffs have already done so. For example,
7 Defendants objected to producing documents and data about the results of
8 their chart reviews on the ground that the results were in the possession of
9 third-parties. Consequently, Plaintiffs served third party subpoenas on three
10 companies that Defendants employed to review medical records as part of its
11 Chart Review Program in order to obtain the results of these reviews. But
12 then, two of the companies responded that Defendants directed them to
13 provide the documents and data to Defendants and the companies have not
14 yet produced the chart review results to Plaintiffs. In addition, Plaintiffs will
15 seek medical records from incentivized providers who were outliers (i.e.,
16 diagnosed certain medical conditions at unusually high rates) and whose
17 diagnoses had high invalidation rates based on the results of Defendants'
18 RACCR reviews. Plaintiffs have sought information (through
19 interrogatories) from Defendants identifying the beneficiaries whom those
20 incentivized providers diagnosed with those conditions in order to serve the
21 providers with subpoenas for those beneficiaries' medical records, and
22 Defendants have agreed to provide certain information responsive to those
23 interrogatories. Until Defendants complete their provision of information
24 necessary to identify these beneficiaries, Plaintiffs cannot serve the
25 providers with the subpoenas requesting their medical records. Review of
26 those medical records will enable the Plaintiffs to identify the
27 unsubstantiated diagnoses that Defendants submitted to the Medicare
28 Program but deliberately ignored or recklessly disregarded.

- The Parties may also propound interrogatories on each other. Plaintiffs propose that each side may, without seeking leave of Court, serve up to 30 interrogatories relating to the Government's claims in this action. Plaintiffs further state that they will seek the Court's permission to serve additional interrogatories relating to Defendants' counterclaims that are not dismissed and the affirmative defenses that remain after the Court rules on their motions.
- The Parties may also serve requests for admissions, which number should not be limited.
- Plaintiffs anticipate that Phase I will be the principal phase for written and document discovery, although the Parties will not be precluded, prior to the close of fact discovery, from submitting additional discovery requests to address discrete issues that arise or become clear later in the litigation, or to establish the authenticity and admissibility of documentary evidence if those evidentiary issues cannot be resolved cooperatively.

Phase Two:

- During this phase, the Parties should focus on conducting fact witness depositions. Plaintiffs estimate that, with respect to their claims (not Defendants counterclaims or affirmative defenses), they will need at least 100 hours for depositions of fact witnesses and at least an additional 14 hours for depositions of corporate entities conducted pursuant to Rule 30(b)(6) (such depositions and topics may be the subject of more than one notice) and propose that this phase of discovery start November 1, 2018 and end by May 31, 2019. This estimate of the number of hours for and the time it will take for fact witness depositions is based on the assumptions that (i) Defendants will work informally and cooperatively with Plaintiffs to provide the information necessary for Plaintiffs to understand Defendants' data relating to damages (otherwise additional time would be needed to depose

1 fact witnesses knowledgeable about the data; and (ii) there are no major
2 issues concerning the authenticity and admissibility of documents (which
3 would also require additional time to depose fact witnesses). This estimate
4 also does not include fact witness depositions relating to Defendants'
5 counterclaims or affirmative defenses. In addition, if Defendants fail to
6 work informally and cooperatively with Plaintiffs to provide the information
7 necessary for Plaintiffs to understand and interpret the chart review and
8 other data Defendants provide to determine damages, Plaintiffs seek an
9 additional 25 hours for depositions of witnesses who can provide this
10 information.

- 11 • Plaintiffs agree that the customary limitations regarding the duration of
12 depositions (seven hours) should remain, and that no individual will be
13 deposed more than once without a showing of good cause and leave of court.
14 However, Plaintiffs believe that, on the whole, fact witness depositions
15 should be limited by the number of total hours and not by the number of
16 witnesses. Plaintiffs need to depose many fact witnesses, but we believe that
17 many of them can be deposed in less than a full day. Defendants' request
18 that the Court limit the number of fact witness depositions to ten deponents
19 (with the Parties having the option to stipulate to more) is unreasonable.
20 The Government's use of the testimony it took during the investigation is
21 limited to impeachment and Defendants are currently producing additional
22 documents relating to those deponents. Accordingly, Plaintiffs must re-
23 depose many of those fact witnesses in this litigation. Furthermore, there are
24 many important fact witnesses that the Government did not depose during
25 the investigation. Defendants' proposed ten-deponent limit is also
26 undermined by the Parties' estimate that each of them will call numerous
27 witnesses at trial.
28

Phase Three:

- By June 28, 2019, approximately four weeks after the close of fact witness depositions, the Parties should make expert testimony disclosures pursuant to Rule 26(a)(2) addressing issues on which they bear the burden of proof. At this time, Plaintiffs anticipate that their disclosures will include experts on risk adjustment under Parts C and D of the Medicare Program; experts on diagnosis coding; and damages experts. However, because the Court has not yet had the opportunity to rule on various issues, Plaintiffs' disclosures may include other types of experts. Because of this uncertainty, it is also difficult to estimate the amount of time needed to conduct expert discovery, but Plaintiffs' current estimate is that responsive expert reports would be due by July 31, 2019, approximately four weeks after the opening expert reports, and expert depositions would be completed by September 30, 2019, approximately a month before summary judgment briefing. Accordingly, at this time, Plaintiffs estimate that expert discovery can be completed by September 30, 2019. Expert depositions should also be limited to 7 hours for each expert. In addition, as previously stated, Plaintiffs' ability to make their initial damages expert disclosures will depend on Defendants' timely production of the requested documents and data.

UnitedHealth's Position: The staged discovery process proposed by the United States appears intended to prevent UnitedHealth from obtaining the evidence it believes necessary to defend this case: the proposed restrictions and controls on discovery advocated by the United States will frustrate UnitedHealth from securing relevant and necessary evidence promptly. In this case, the United States already possesses a vast amount of documentary and testimonial information it obtained from UnitedHealth and other sources. UnitedHealth anticipates needing extensive discovery from the United States in order to prepare its defenses and counterclaims, including discovery relating to: the manner in which risk

1 adjustment factors are calculated; CMS' knowledge of UnitedHealth's and other
2 MA Plans' chart reviews and its awareness of industry-wide diagnostic coding
3 error rates and data verification practices during the relevant time period; any
4 attempts by the United States to calculate a Medicare fee-for-service error rate;
5 information concerning what those error rates are and their impact on payment
6 calculations; the United States' analysis of the assumptions and disclosures
7 contained in UnitedHealth's bids; the meaning of the "reasonable diligence"
8 standard; the decision not to finalize the medical record review rule; meetings and
9 communications between UnitedHealth and CMS regarding its obligations to
10 perform a "two-way-look" in light of this proposed rule; and the May 2014
11 overpayment rule. UnitedHealth will also seek discovery, including third-party
12 discovery, to identify what information, if any, Relator possesses, how Relator
13 obtained that information, and the source of that information. UnitedHealth
14 expressly reserves the right to conduct discovery on additional subjects and from
15 additional persons or entities as necessary and appropriate, and to make
16 appropriate objections to discovery requests.

17 UnitedHealth does not believe that phasing of discovery is necessary or
18 appropriate in this case and respectfully submits that it is an improper attempt by
19 the United States to impede UnitedHealth's efforts to defend itself. Rather than
20 lead to a more efficient discovery process, the United States' proposal would
21 prejudice UnitedHealth, and lead to both protracted discovery and increased costs.
22 For example, if UnitedHealth is unable to depose certain witnesses at the outset, it
23 will suffer delay in its attempt to effectively outline the scope of necessary
24 documents and other materials it may need.

25 Moreover, phased discovery would further delay UnitedHealth's access to
26 key fact witnesses and prejudice its ability to mount an effective defense in this
27 action. As noted above, for over five years, UnitedHealth has produced over
28 600,000 documents, compiled detailed responses to dozens of complex

1 interrogatories, and produced more than twenty witnesses for Civil Investigative
2 Demand oral examinations. While document productions are ongoing,
3 UnitedHealth requires the ability to take testimony of a number of current and
4 former government executives to effectively begin the defense of this action and to
5 identify potential other sources of documents and relevant information. However,
6 by the United States’ proposal, UnitedHealth would be precluded from doing so for
7 another *seven months*. Such an imbalance in the Parties’ access to witnesses is
8 antithetical to the spirit and purpose of the discovery rules, which advocate for
9 liberal and expeditious discovery and mutual knowledge of all relevant facts. For
10 similar reasons, Judge Segal noted during the Parties’ informal discovery
11 conference on November 20, 2017, that there is no such rule in the Federal Rules
12 that says a party is entitled to complete written discovery or to resolve written
13 discovery prior to the beginning of depositions. And, indeed, the Federal Rules of
14 Civil Procedure do not contemplate the proposed phasing of discovery the United
15 States advocates. During the Parties’ informal discovery conference on February
16 8, 2018, Judge Segal again noted that delayed or phased discovery is not “built-in”
17 in federal court and, when it is permitted, it is usually “with both parties’
18 agreement about the usefulness of phasing.” See February 8, 2018 Telephonic
19 Conf. Tr. 25:16-20. Otherwise, if one side is able to dictate the phasing of
20 discovery, it “can be used as a strategy point in a case” and gamesmanship. See *id.*
21 25:21-23.

22 The United States’ suggestion that depositions should only begin after the
23 Court resolves its forthcoming motion to dismiss UnitedHealth’s counterclaims,
24 motion to strike UnitedHealth’s affirmative defenses, and motion for partial
25 summary judgment is similarly unjustified. The United States in essence seeks a
26 stay of depositions during the pendency of the motions, which is not provided for
27 in the Federal Rules—otherwise, a case could be pending for months before
28 significant progress in the litigation is made. Similarly, the United States’

1 conclusory and generalized assertion that there will be privilege issues does not
2 justify postponing the commencement of depositions. Privilege issues exist in
3 most cases, yet most cases do not stall the commencement of depositions for close
4 to a year and a half after a complaint is filed, particularly where one side has
5 already had access to more than twenty witnesses. The propriety of a privilege
6 assertion cannot be addressed in a vacuum; it is typically best addressed in the
7 context of a specific question and the assertion of privilege in response. The
8 ordinary course is to resolve questions about the assertion of privilege in the
9 specific contexts in which they arise, so that the Court has a specific topic to
10 address.

11 UnitedHealth has only recently been afforded the opportunity to conduct
12 affirmative discovery to defend itself from the United States' baseless claims.
13 UnitedHealth is entitled to continue the process of reaching symmetry in the
14 discovery of factual information through depositions. During the December 18,
15 2017 telephonic conference before Judge Segal regarding The United States'
16 Motion for a Protective Order, Judge Segal stated that the United States had not
17 made a showing of undue burden or good cause sufficient to prevent UnitedHealth
18 from proceeding with depositions as laid out in the Federal Rules of Civil
19 Procedure. Judge Segal also stated that a pending motion for partial summary
20 judgment generally does not justify postponing depositions and that would be "the
21 exception and not the common practice." See December 18, 2017 Telephonic
22 Conf. Tr. 14:11-16. During the Parties' informal discovery conference on
23 February 8, 2018, Judge Segal again stated that UnitedHealth "ha[s] a right to
24 notice depositions" and reiterated that she likely would not enter a protective order
25 because there is "nothing in the rules that would justify it here." See February 8,
26 2018 Telephonic Conf. Tr. 26:23-27:1. Consistent with Judge Segal's admonition
27 that "given the complexity of this case . . . [it is not] inappropriate for a defendant
28 to be moving quickly to try and gather information and prepare its defenses"

UnitedHealth should be permitted to continue deposing government witnesses. See *id.* 27:8-10.

Phased discovery would also introduce significant disputes regarding whether certain discovery should or should not have been conducted during a particular phase – disputes for which there is no case law or guidance in the Federal Rules. Moreover, UnitedHealth does not agree to disclose whether it will rely on any specific defense by any date unilaterally imposed by the United States. Such a deadline is not mandated by the Federal Rules of Civil Procedure.

Finally, the United States’ proposed imposition of a unilateral deadline on UnitedHealth to complete production of documents responsive to damages-related discovery requests by September 2018 is unreasonable and inequitable, particularly in light of the fact that the United States has only just begun to produce documents in this matter. UnitedHealth is willing to work cooperatively with the United States to engage in mutual exchanges of information and to comply with its obligations under the Federal Rules.

3. Electronically Stored Information – Rule 26(f)(3)(C)

The Parties are aware of their duties regarding the preservation of discoverable information. The Parties have taken reasonable measures to comply with those duties as required by the Federal Rules of Civil Procedure and the Local Rules. The Parties have met and conferred pursuant to Federal Rule of Civil Procedure 26(f), and each represented that steps have been taken to preserve evidence relevant to this litigation. The Parties have agreed to a protocol for the exchange of Electronically Stored Information.

4. Privilege Issues – Rule 26(f)(3)(D)

The Parties negotiated a protective order governing non-waiver of privilege and protected material. Magistrate Judge Segal entered the order on January 16, 2018. (Dkt. No. 198)

1 **5. Changes to Federal and Local Rules – Rule 26(f)(3)(E)**

2 United States and Relator's Position: The changes that we propose are set
3 forth in our proposed discovery plan set forth in Section J.2 above.

4 UnitedHealth's Position: UnitedHealth reiterates that phased discovery is
5 inappropriate in this case. Exhibit A, and Subsections K and L below, address
6 UnitedHealth's position on the timing of discovery and proposed discovery
7 deadlines. UnitedHealth disagrees with the United States' hour-based calculation
8 of depositions. UnitedHealth's position is that each side will likely need more than
9 the 10 depositions permitted by the Federal Rules without leave, and that the
10 Parties should meet-and-confer as the need for additional depositions matures.
11 UnitedHealth agrees with the United States' proposal of 30 interrogatories by the
12 United States and Relator jointly and 30 interrogatories by UnitedHealth.

13 **6. Other Orders – Rule 26(f)(3)(F)**

14 United States and Relator's Position: As discussed above, Plaintiffs request
15 that the Court issue an order, pursuant to Rule 16(b)(3)(B)(i) and 16(c)(2)(F),
16 modifying the timing of initial disclosures under Rule 26(a)(1)(A)(iii) relating to
17 damages. The Government also provided Defendants with a proposed stipulation
18 and order relating to the scope of expert disclosures and discovery in order to
19 streamline that part of the case. The Government hopes that Defendants will agree
20 to this.

21 Pursuant to Rule 16(b)(3)(B)(ii), Plaintiffs also request that the Court limit
22 the scope of discovery to only factual issues and preclude discovery relating to
23 purely legal issues, including materiality, Defendants' legal obligations to delete
24 invalid diagnoses, and actuarial equivalence. In addition, pursuant to Rule
25 16(c)(2)(C), Plaintiffs believe it may benefit the case to make rulings in advance
26 on the authenticity and admissibility of certain evidence. This would include
27 evidence that may be relied upon for summary judgment motions as well as trial.

28

1 Accordingly, Plaintiffs request that the Parties be permitted to file motions relating
2 to authenticity and admissibility of documents at any time.

3 UnitedHealth's Position: UnitedHealth objects to the limiting of discovery
4 pursuant to Rule 16(b)(3)(B)(ii). UnitedHealth believes that CMS would not have
5 acted differently or sought repayment from UnitedHealth had it learned that
6 UnitedHealth allegedly retained overpayments and is entitled to discovery on this
7 topic, including discovery of facts which are relevant to UnitedHealth's ability to
8 establish this and other defenses, including the views of CMS employees about the
9 ambiguous regulatory requirements here at issue, which is relevant to scienter.

10 **K. Discovery Cut-Off**

11 United States and Relator's Position:

12 Plaintiffs propose that the non-expert discovery cut-off date be May 31,
13 2019.

14 UnitedHealth's Position:

15 UnitedHealth proposes that the non-expert discovery cut-off date be January
16 28, 2019.

17 **L. Expert Discovery**

18 The Parties agree to disclose expert witnesses consistent with the Federal
19 Rules of Civil Procedure, the Local Rules, and any order entered by this Court.
20 Plaintiffs' position with respect to the timing of expert witness disclosures (June
21 28, 2019 for initial disclosures and July 31, 2019 for rebuttal disclosures) and the
22 expert discovery cut-off date (September 30, 2019) are set forth in Section J.2
23 above (its discovery plan) and Exhibit A.

24 UnitedHealth proposes the following dates for expert witness disclosures
25 and expert discovery cut-off under Rule 26(a)(2).

26	Expert Disclosure – Initial	February 25, 2019
27	Expert Disclosure – Rebuttal	March 25, 2019
28	Completion of Expert Discovery	April 22, 2019

M. Dispositive Motions

The United States and Relator's Statement: The United States presently anticipates filing a motion to dismiss Defendants' counterclaims and the United States and Relator presently anticipate filing a motion to strike some of Defendants' affirmative defenses. The United States also intends to file a motion for partial summary judgment on Defendants' "actuarial equivalence" argument (unless Defendants stipulate that they are not asserting it in this case) because it presents a purely legal issue which can be adjudicated at this time and should be adjudicated at this time to avoid wasteful discovery. The United States may file other motions, including motions for summary judgment or partial summary judgment, on other issues concerning liability, damages, and issues raised in Defendants' Answer to the FAC. Plaintiffs may also file motions *in limine* because certain issues or defenses may be determined earlier on by such motions, especially with respect to the authenticity and/or admissibility of certain documents created by Defendants for purposes of litigation.

Plaintiffs propose that the last date to hear summary judgment motions be November 4, 2019.

UnitedHealth's Statement: UnitedHealth will oppose the United States' motion to dismiss and motion to strike. As noted above in Section C, UnitedHealth and the United States have already fully briefed cross-motions for summary judgment in the APA case addressing "actuarial equivalence" and it would be inappropriate, inefficient, and a waste of judicial resources to attempt to litigate those same issues here. In addition, as noted above in Section J, the United States has only recently begun to produce documents in this case. Accordingly, the filing of any summary judgment motion is drastically premature at this point in the litigation. UnitedHealth anticipates filing motions or cross motions for summary judgment, at the appropriate time and after the Parties have had the opportunity to conduct meaningful discovery.

UnitedHealth proposes the last date to hear summary judgment motions be May 20, 2019.

N. Settlement/Alternative Dispute Resolution (ADR)

The United States' Statement: In October 2016, pursuant to a request made by Defendants, the United States made a presentation to Defendants about their liability under the False Claims Act. After this presentation, Defendants' counsel notified the United States that it was not interested in discussing a settlement of this matter.

UnitedHealth's Position: In October 2016, the United States made a presentation concerning this case in which it refused even to acknowledge UnitedHealth's myriad defenses and asserted no formal settlement demand; accordingly, UnitedHealth did not make any settlement offer either. Based on the one-sided presentation the United States made in October 2016 and other discussions, UnitedHealth respectfully believes that settlement discussions are unlikely to be productive at this time.

A Notice to the Parties of Court-Directed ADR Program was entered on November 22, 2016, when this action was transferred to this Court. Dkt. No. 54. Pursuant to Local Rule 16-15.2, the Parties are filing concurrently a Request: ADR Procedure Selection. The Parties have agreed on ADR Procedure No. 3 (private dispute resolution).

O. Trial Estimate

The United States and Relator's Position: Plaintiffs estimate that their presentation of their claims at trial will take approximately 10-15 days and include approximately 25-30 witnesses (including experts), depending on whether the Court agrees that certain key issues are purely legal issues, the Court's resolution of dispositive motions, the Court's resolution of evidentiary issues prior to trial, the Parties' stipulation to the authenticity and admissibility of documents, and the Parties' admission of undisputable facts. Plaintiffs estimate that Defendants'

1 presentation of their defenses should take an equal or less number of days.

2 Accordingly, Plaintiffs have estimated a total of 20-30 days.

3 If the Court does not dismiss all of Defendants' counterclaims prior to trial,
4 Plaintiffs request that any trial relating to any of those claims be severed and
5 separate from the trial of their claims against Defendants, especially considering
6 their apparent contingent nature. At this time, Plaintiffs do not have an estimate
7 for the duration of a trial relating to the counterclaims.

8 UnitedHealth's Position: UnitedHealth estimates that the trial will take 24
9 to 32 days, including presentations by both sides. UnitedHealth anticipates calling
10 25-30 witnesses at trial, including experts.

11 UnitedHealth opposes the United States' request to sever or bifurcate
12 UnitedHealth's counterclaims at trial. The United States fails to provide any
13 substantive basis for its premature request to sever and bifurcate.

14 The Parties reserve their rights to modify these estimates as the case
15 progresses and to ask for additional time for rebuttal witnesses.

16 **P. Trial Counsel**

17 United States: Edward Crooke, Carol Wallack, Justin Draycott, Paul
18 Freeborne, John Lee, Jessica Krieg, and Paul Perkins from the U.S. Department of
19 Justice.

20 Relator: Eric R. Havian, Jessica T. Moore, Henry C. Su, from Constantine
21 Cannon; William Christopher Carmody, Arun Subramanian, from Susman
22 Godfrey; and Stephen S. Hasegawa from Phillips & Cohen.

23 Defendants: David J. Schindler, Daniel Meron, Kathryn H. Ruemmler, and
24 Abid R. Qureshi.

25 **Q. Independent Expert or Master**

26 At this time, the Parties do not anticipate a need for an independent expert or
27 master.

28

R. Timetable

The Parties' completed Schedule of Pretrial and Trial Dates is attached as Exhibit A.

S. Other Issues

At this time, the Parties do not have other issues.

Respectfully submitted,

I. INTRODUCTORY STATEMENTS

A. United States

This dispute arises out of UnitedHealth Group’s (“UnitedHealth” or “UHG”) refusal to reasonably respond to two discovery requests served by the United States that address central issues of this case. The United States’ Interrogatory No. 14 (“Interrogatory 14”) and Request for Production No. 147 (“Request 147”) together seek to discover UnitedHealth’s contentions about the diagnosis codes that the United States alleges UnitedHealth improperly failed to delete.

The central issue in this case is whether UnitedHealth improperly failed to delete diagnosis codes from its Medicare Part C risk adjustment submissions, after its own medical record reviews indicated that diagnoses it had previously submitted to CMS were, in fact, not supported by medical records. Pursuant to the rules and regulations governing Medicare Part C, Medicare Advantage Organizations (“MAOs”) such as UnitedHealth submit to CMS diagnosis codes associated with every beneficiary, which adjust that beneficiary’s risk score. As alleged in the Amended Complaint, the diagnosis codes that MAOs submit determine the payment that MAOs receive from CMS, and CMS requires that MAOs only submit diagnosis codes that are unambiguously supported by the beneficiaries’ medical records. (Declaration of Gregory Mason (“Mason Decl.”), Ex. C, United States’ Am. Compl., ECF No. 171, at ¶ 4). Because MAOs submit only diagnosis data, not the underlying medical records, MAOs must exercise due diligence and expressly certify that the diagnosis codes they have submitted for risk adjustment payments are accurate and truthful. *Id.* at ¶ 5. When an MAO discovers that a previously submitted diagnosis code was not supported by medical records, it is required to delete it in CMS’s risk adjustment payment system. *Id.* at ¶ 103.

As alleged in this case, UnitedHealth significantly increased the amount of risk adjustment payments it received from CMS by implementing medical record review programs, through which it collected millions of medical records from providers and employed coders to review those medical records and mine them for additional diagnosis

1 codes that the providers themselves did not report or record. *Id.* at ¶ 10. Although
2 UnitedHealth relied on its medical record reviews to submit additional diagnosis codes
3 and increase its risk adjustment payment from CMS, it systematically ignored medical
4 record reviews when they indicated that diagnosis codes UnitedHealth had previously
5 submitted to CMS were not supported by beneficiaries' medical records. *Id.* at ¶ 12.

6 In response to UnitedHealth's Interrogatory No. 1, the United States has identified
7 every diagnosis code that it contends UnitedHealth submitted to CMS to increase its risk
8 adjustment payments, and then improperly failed to delete when UnitedHealth's own
9 reviewers found no support for the diagnosis code in the beneficiary's medical records.
10 For each diagnosis code on the United States' list: (1) the diagnosis code was submitted
11 by UnitedHealth to CMS and was required, by regulation, to be supported by an underlying
12 medical record; (2) that medical record went through UnitedHealth's medical record
13 review program; and (3) UnitedHealth's own reviewers did not find the diagnosis code to
14 be supported by medical records. That is, each diagnosis code on the United States' list is
15 associated with a medical chart that UnitedHealth has already thoroughly reviewed, and
16 in none of those reviews found support for the diagnosis code in question. However,
17 UnitedHealth never deleted any of these diagnosis codes.

18 After the United States identified its list of all diagnosis codes it contends are at
19 issue, it served Interrogatory 14 and Request 147 to discover UnitedHealth's contentions
20 about the very same diagnosis codes. In particular, the United States seeks to discover
21 whether UnitedHealth contends that any of the diagnosis codes on the United States' list
22 were supported by medical records, despite not being found during any of UnitedHealth's
23 reviews of the associated medical records. The United States further seeks to discover
24 factual information related to UnitedHealth's medical record reviews.

25 Interrogatory 14 asks UnitedHealth to, with respect to every diagnosis code on the
26 United States' list: (A) identify which of those diagnosis codes, if any, UnitedHealth
27 contends were supported by a medical record, as well as the specific medical record
28 UnitedHealth contends provides such support, and (B) identify every medical record

1 review that UnitedHealth conducted (and the results of that review) for every code that
2 UnitedHealth contends it was not obligated to delete or otherwise return payment for,
3 regardless of whether the basis for UnitedHealth's contention is claimed support in an
4 underlying medical record or some other defense. (Mason Decl., Ex. A, UHG's Resps.
5 and Objs. to Interrog. 14). Request 147, as written, relatedly requests all medical records
6 associated with the diagnosis codes on the United States' list. (Mason Decl., Ex. B, UHG's
7 Resps. and Objs. to Req. 147). Importantly, as a result of the meet and confer process
8 following UnitedHealth's responses and objections to Request 147, the United States
9 agreed to limit its request for medical records to only those records associated with the
10 diagnosis codes that UnitedHealth contends were supported (*i.e.*, the medical records
11 UnitedHealth identifies in response to Part A of Interrogatory 14).

12 This discovery is an appropriate use of contention interrogatories, seeks factual
13 information regarding UnitedHealth's contentions and defenses, will substantially narrow
14 the issues for trial and the scope of document discovery, avoid wasteful trial preparation,
15 and possibly expedite the resolution of this case.

16 UnitedHealth initially refused to provide any response to either Interrogatory 14 or
17 Request 147. (Mason Decl., Ex. A; Mason Decl., Ex. B). Subsequently, UnitedHealth
18 agreed to produce some (but not all) of the underlying medical records, but that offer is
19 hollow without identifying which codes UnitedHealth contends are supported by medical
20 records (*i.e.*, responding to Interrogatory 14). Simply producing millions of medical
21 records alone does nothing to illuminate UnitedHealth's contentions.

22 UnitedHealth's position is unreasonable, would undermine the utility of contention
23 interrogatories, and would cause wasteful inefficiencies in discovery. Because
24 Interrogatory 14 is an appropriate contention interrogatory, UnitedHealth should be
25 compelled to answer it. Furthermore, UnitedHealth should be compelled to produce all
26 medical records associated with the diagnosis codes that UnitedHealth contends were
27 supported. Therefore, the Court should grant the United States' Motion and order a full
28 response to Interrogatory No. 14 and Request 147.

B. UnitedHealth

The government's motion to compel seeks to require United to conduct burdensome and extensive analysis United itself has not conducted, and may never conduct, much of it expert, in order to make the government's case for it. The government should have conducted this analysis while the matter was under investigation and *before* it filed its complaint, but the government failed to do so. The government should not now be permitted to abuse the discovery process in an ill-conceived attempt to cure fundamental defects in its case.

The core of this dispute centers on whether, under the guise of a contention interrogatory (Interrogatory 14A), the government may compel United to: (a) retain coding experts to review the list of approximately 28 million diagnosis codes the government alleges United knew were unsupported and was required to delete; (b) identify which medical records in United's possession, if any, correspond to those diagnosis codes; (c) direct the coding experts to review the resulting tens of millions of medical records to search for entries that correspond to the diagnosis codes on the government's list; and (d) provide the government now with the results of the coding experts' conclusions as to which codes among the 28 million are in fact supported – and thus necessarily (by omission) also which codes the experts conclude are *not* supported by the medical charts.

The Federal Rules, and numerous cases, make clear that the government cannot compel United to undertake this work. First, despite the government's strenuous insistence that Interrogatory 14A only seeks "facts" underlying United's defense, the reality is that only an expert can reach a conclusion as to which of the codes on the government's list are supported. The government's interrogatory thus does not seek disclosure of some underlying facts, it unabashedly seeks the *results* of that expert analysis, long in advance of when expert reports would be due, despite the fact that United might choose never to perform the expert analysis that the government now seeks. Second, aside from seeking to compel United to perform expert analysis, the government's interrogatory improperly seeks to shift the burden of proof in this case by requiring United to conduct extensive

1 analysis it has not undertaken in order to determine which of the 28 million diagnosis
2 codes on the government's list are supported, when it is the government's burden to prove
3 that all 28 million diagnosis codes are unsupported. United has repeatedly offered to
4 produce all the medical records in its possession to the government, which will allow the
5 government to conduct the expert analysis it seeks to compel United to perform. That is
6 all that is required under the Federal Rules.

7 Moreover, while United may contend at trial that the diagnosis codes on the
8 government's list are generally supported since they reflect the independent coding
9 decisions of medical providers, United has no obligation or burden to prove that point.
10 United is perfectly entitled simply to contest whatever evidence the government intends
11 to present to support its contention that all 28 million diagnosis codes are unsupported. To
12 the extent that United chooses to proffer expert testimony regarding any of diagnosis codes
13 on the government's list, it will make that disclosure when required by the scheduling
14 order in this case—not during fact discovery.

15 Interrogatory 14B is likewise improper. That interrogatory seeks to compel United
16 to conduct new, complex, analysis to help fill another hole in the government's case – its
17 allegation that United allegedly *knew* that the codes on the government's list were
18 unsupported. The government alleges that United possessed this knowledge because
19 United's coders allegedly reviewed the medical records that correspond to the 28 million
20 diagnosis codes on the government's list. In order to prove this allegation for the
21 government, Interrogatory 14B asks United, with respect to each of the 28 million codes,
22 to determine whether a United coder in fact reviewed the corresponding medical chart,
23 match the chart to the corresponding code on the government's list, and provide the results
24 of that chart review. United has not conducted such an analysis, and this analysis in no
25 way relates to any contention United is making or any defense United intends to advance
26 in this case. It is the government, not United, that alleges that United reviewed the medical
27 records corresponding to these 28 million codes, and it is the government that must
28 conduct the analysis to prove it. United has already produced to the government all the

1 datasets that contain the relevant information that United would need to conduct this
2 analysis; hence, the government already has all the information necessary to analyze that
3 data for itself. The Federal Rules require nothing more.

4 In response to RFP 147, United has offered to produce all the medical records in its
5 possession from the relevant time period that were subject to United's chart review, and
6 that offer remains open. Instead, the government asks United to produce only those
7 medical charts that correspond to codes United contends are supported in its response to
8 Interrogatory 14A. As recrafted, RFP 147 thus stands or falls with this Court's ruling as
9 to that interrogatory. If the court agrees with United that it need not respond to
10 Interrogatory 14A, then there will be no responsive records to produce.

11 United's positions are neither novel nor unfair. The relevant rules provide deadlines
12 for expert disclosures, witness lists, and pretrial exchange of exhibits. But even in complex
13 cases with millions of documents, parties are not required to identify during fact discovery
14 the specific evidence they intend to introduce at trial, much less on cross-examination, nor
15 to provide expert disclosures in response to alleged contention interrogatories. These rules
16 apply equally to the government, and there is no unfairness in requiring the government
17 to adhere to them.

18 **II. PROCEDURAL AND FACTUAL BACKGROUND**

19 **A. United States**

20 **1. The United States' Requests**

21 Interrogatory 14 is a contention interrogatory requesting that UnitedHealth identify
22 factual information regarding its contentions about the diagnosis codes at issue in this case.

23 **INTERROGATORY NO. 14:** For each Diagnosis set forth in the
24 United States' Response to Defendants' Interrogatory No. 11 that You
25 contend You were not obligated to delete or otherwise return payment
26 received for the Diagnosis to the Medicare Program, identify (A) all
27 documentation in each Chart(s), if any, that You contend supports that
28 Diagnosis, Including for each the Beneficiary (by name, HIC Number,

1 and date of birth), Date(s) of Service, Diagnosis Code(s), HCC(s)
2 and/or RxHCC(s), Provider (by individual name, group name, address,
3 NPI, Tax ID(s), and Provider ID); and (B) each Medical Record
4 Review(s) of the Chart(s) corresponding to that Diagnosis, Including
5 for each its date(s), type(s) (i.e., whether the Medical Record Review
6 was conducted as part of Chart Review, Internal Data Validation,
7 RACCR, Claims Verification, HQ-PAFs, or other UHG Medical
8 Record Review program), Chart Barcode, Load Date(s), and each
9 Diagnosis Code for which support was found, identified, validated, or
10 recorded in the Medical Record Review.

11 (Mason Decl., Ex. A). That is, for every diagnosis code on the United States' list of
12 diagnosis codes UnitedHealth improperly failed to delete that UnitedHealth disputes it was
13 obligated to delete, it must identify: (A) "all documentation in each Chart(s), if any, that
14 You contend supports that Diagnosis" and (B) "each Medical Record Review(s) of the
15 Chart(s) corresponding to that Diagnosis." *Id.* Part B effectively asks UnitedHealth to
16 identify every medical record review it conducted of any charts associated with every code
17 on the United States' list – assuming, of course, that UnitedHealth disputes it was obligated
18 to delete, regardless of the basis for that dispute, each of the codes. *Id.*

19 Request 147 seeks the production of all medical records associated with the
20 diagnosis codes on the United States' list:

21 **REQUEST FOR PRODUCTION NO. 147:**

22 All Chart(s) corresponding to, associated with, or related to each
23 Beneficiary, from each DOS Year(s) in which that Beneficiary is listed
24 in the United States' Response to Defendants' Interrogatory No. 1
25 (Including the United States' First Supplemental Response served on
26 August 17, 2020, the United States' Amended First Supplemental
27 Response served on October 13, 2020, the United States' Second
28 Supplemental Response served on October 30, 2020, and any other

subsequent responses).

(Mason Decl., Ex. B). As indicated above, the United States has agreed to limit this request to production of only those medical records UnitedHealth contends support a diagnosis code on the United States' list.

2. UnitedHealth's Response

In its Response, UnitedHealth refused to answer the Interrogatory:

Pursuant to and on the basis of these objections, UnitedHealth responds that this Interrogatory is an improper contention interrogatory that impermissibly seeks to shift the burden of proving an essential element of the government's False Claims Act case on to UnitedHealth and seeks expert opinion. UnitedHealth therefore does not intend to further respond to this Interrogatory.

(Mason Decl., Ex. A). UnitedHealth also refused to produce any documents responsive to Request 147:

Based upon its General and Specific Objections, UnitedHealth does not intend to produce documents responsive to this Request.

(Mason Decl., Ex. B).

In an effort to resolve this discovery dispute, the United States sought a meet and confer with UnitedHealth. See Mason Decl., ¶ 4. UnitedHealth indicated that it would produce the responsive medical records in its possession (but not those in its control that are in the possession of UnitedHealth's third party contractors), which would, according to UnitedHealth, amount to an estimated 21 million charts and take approximately 8 months to collect and produce. (Mason Decl., ¶ 6). UnitedHealth also stated that it would respond to Interrogatory 14 only by referring to those millions of charts, and would not otherwise supplement its response to the Interrogatory. *Id.*

During the meet and confer process, the United States proposed to resolve the dispute by offering a reasonable period of time during fact discovery for UnitedHealth to substantively answer the Interrogatory by identifying the diagnosis codes it contends were

1 supported by medical records, and limiting the document production to only those charts,
2 if any, associated with the diagnosis codes that UnitedHealth contends were supported.
3 (Mason Decl., ¶ 5).

4 UnitedHealth's position is that it is entitled to present evidence at trial – through
5 percipient witnesses or expert opinion testimony – that certain diagnosis codes on the
6 United States' list were supported by a medical record, without ever answering
7 Interrogatory 14 or otherwise identifying which diagnosis codes it believes are supported
8 by medical records during fact discovery.

9 **B. UnitedHealth**

10 1. Procedural and Factual Background

11 a. *The Government's Theory of the Case, United's Defenses, and*
12 *the Government's Response to United's First Interrogatory*

13 This case centers around the government's contention that United failed to delete
14 diagnosis codes that providers treating United beneficiaries had transmitted to United and
15 that United passed on to CMS, but that United allegedly subsequently came to know were
16 unsupported by the corresponding medical charts. In simplest terms, the government
17 alleges that United retained monies it was not entitled to retain, knew that it had thereby
18 received overpayments from the government, and then failed to return those monies.

19 The instant dispute centers on a list of 28 million diagnosis codes that this Court
20 ordered the government to create in order to comply with its obligation to identify, with
21 specificity, the diagnosis codes it contends United knew were "invalid" (i.e. unsupported
22 by any medical record), and thus represented overpayments that United was required to
23 return by deleting the codes. Each of the diagnosis codes set forth on the government's list
24 of 28 million allegedly false diagnosis codes was originally submitted by providers to
25 United on claim forms. For each diagnosis code, a coder in the provider's office, who is
26 familiar with the provider's documentation practices and handwriting, the particular
27 medical conditions that the provider may specialize in, and often the patient herself, made
28 an affirmative determination that the code at issue was in fact supported by the patient's
medical record.

1 Providers have no incentive to identify all of the appropriate diagnosis codes for a
2 patient because providers are generally not paid based on diagnosis codes (rather, they are
3 paid for rendering a particular service or providing treatment). In recognition of the fact
4 that provider coding is incomplete and does not fully reflect the complete health status of
5 a patient, United and other Medicare Advantage Plans have chart review programs that
6 look for codes to submit that are supported in the medical record. No one, including the
7 government, claims that chart reviews themselves are improper. To avoid biasing its
8 coders, United instructs its chart review coders to review a medical record “blind,”
9 meaning the coder does not have any knowledge regarding what diagnosis codes a
10 provider submitted on a claims form for that same patient. Chart review coders have a
11 finite amount of time to review what often amounts to very lengthy medical records and
12 do their best to identify the codes they see supported by the medical record they are
13 reviewing.

14 In some cases, a chart review coder reviewing a medical record for a particular
15 beneficiary may not identify a diagnosis code that the provider or provider’s coder
16 submitted on the claim form. Contrary to the government’s assertion, in none of those
17 instances is the United chart review coder making an affirmative determination that the
18 provider submitted a code that was not supported in the medical record. The coder cannot
19 make such a determination as the coder does not have any knowledge as to which codes
20 the provider originally submitted on the claim. At worst, the government might argue that
21 a chart review coder’s failure to list a diagnosis code creates an *implication* that the code
22 *might* not be supported by the particular chart the coder reviewed. At best, the code is
23 supported in the medical record and simply was overlooked by the United coder.

24 There are many reasons why a chart review coder conducting a “blind” review of a
25 medical record may not identify a diagnosis code submitted on the claim when that
26 diagnosis code is, in fact, supported in the medical record. To take a simple example, a
27 United coder may not be familiar with the provider’s handwriting, and thus may miss
28 perfectly valid diagnosis codes identified by the provider’s own staff. More than that,

1 coding requires judgment and interpretation of both the medical record and the complex
2 and myriad coding rules. Two coders may look at the same chart and observe different
3 things. The fact that a second coder does not identify all of the codes originally identified
4 by an initial coder thus does not render the original codes false or unsupported.
5 Alternatively, the second coder may well have made an error and missed some entry in
6 the medical record that documents the diagnosis code at issue. Nevertheless, the
7 government's theory is that every single time there is a discrepancy between an affirmative
8 coding decision by the provider that a code is supported and the coding results of United's
9 blind chart reviews, the provider's decision to code that particular code was necessarily
10 incorrect and the code was not supported.

11 In addition to proving that the diagnosis codes at issue were false, the government
12 also has to prove that United *knew* that the 28 million codes at issue were unsupported.
13 The government's list of codes, of course, did not exist prior to this litigation. Hence, the
14 government cannot allege that anyone at United had allegedly reviewed that list and
15 determined it contained unsupported codes. Instead, the government's theory of
16 knowledge appears to rest on its allegation that with respect to each of the 28 million codes
17 at issue, a United coder had reviewed the very medical chart associated with the specific
18 diagnosis code and by not identifying the code in that coder's coding results, thereby knew
19 the provider's code on the list was unsupported. As the government itself describes the
20 factual underpinning of this theory, "each diagnosis code on the United States' list is
21 associated with a medical chart that UnitedHealth has already thoroughly reviewed."
22 *United States' Portion, Section I.A. at 2.*

23 United has made clear throughout this matter that it vigorously disputes the
24 government's theory of the case, both as a legal and factual matter. As the Special Master
25 is aware, one of United's legal defenses, based on the statutory "actuarial equivalence"
26 mandate, is that it cannot be required to delete codes that it knows are unsupported unless
27 it knows that its rate of unsupported codes exceeds the rate in CMS's data. And as a factual
28 matter, United argues that for many reasons, including that the payment amounts to

1 Medicare Advantage Plans that CMS calculates already account for the existence of
2 unsupported codes, the presence of unsupported codes in a Medicare Advantage Plan's
3 data does not necessarily result in overpayment. *See* United Motion to Compel Medical
4 Records, concurrently filed on April 12, 2021. Hence, even if United somehow had
5 knowledge that a particular code on the government's list was unsupported, that would not
6 translate into knowledge that United was overpaid or was improperly retaining monies it
7 was not entitled to retain.

8 But United also disputes the government's underlying factual theory of "falsity"—
9 that simply because a United coder conducting a "blind" review did not identify a code
10 that a provider submitted on a claim form, the code must be unsupported and thus
11 "invalid."^{1,2} This should come as no surprise to the government. As early as its Motion to
12 Dismiss (Dkt. 182), United "vigorously dispute[d] the suggestion that merely because a
13 retrospective chart reviewer doing a 'blind' chart review did not identify every diagnosis
14 code that the provider's own coder had found, the provider's own codes were necessarily
15 wrong or suspect." Ex. M, Dkt. 182 at 6, n.3. United further explained that it would be
16 "remarkable" if a chart review coder conducting a "blind" review "consistently captured
17 every code that was supported in a given patient's chart." *Id.* To be sure, given the sheer
18 number of codes at issue here and the prevalent level of unsupported diagnosis codes
19 industry wide (including in CMS's own data) some number of the 28 million codes are
20 undoubtedly unsupported. But because each of the codes the government alleges United

21
22 ¹ The only government witness deposed on this topic to date made clear that he
23 agreed with United's position. Jeffrey Grant, a senior CMS official who oversaw creation
24 of the risk adjustment program, explained that even in his view, an MA plan's submission
25 of an unsupported code would be improper only if it was making the "very specific
26 submission of a very specific data element . . . that [it] know[s] is wrong." Ex. L, Grant
27 Dep. 321:21–23. He further stated that performing one-way reviews that add diagnosis
28 codes supported in the charts, without looking at whether previously submitted codes lack
such support, would not create the requisite knowledge. *Id.* at 322:18–323:15.

² Starting with Exhibit L, citations to "Ex." materials refer to exhibits to the Declaration of David J. Schindler filed herewith.

1 was required to delete was submitted to United by a provider who treated the patient,
2 United believes that the majority of the codes are likely supported by medical charts, and
3 that each code individually is, as a matter of probability, more likely to be supported than
4 not. United certainly denies that *all* of the codes are unsupported.

5 On January 3, 2020, United issued its First Interrogatory to the government, which
6 asked the government to identify each diagnosis code for the relevant payment years that
7 the government alleged United “knowingly and improperly failed to delete . . . or
8 otherwise return to the Medicare Program [as an] overpayment.” Ex. E. United issued that
9 interrogatory because the government had failed to allege in the Complaint which codes
10 were allegedly unsupported and United needed to know which codes, as a factual matter,
11 are at issue. After being ordered to do so, the government ultimately made four productions
12 of data collectively identifying 28 million diagnosis codes the government alleges are
13 false. The most recent production, completing this list, was in December 2020.

14 The government did not review a single medical record to create its list of 28
15 million diagnosis codes at issue, and it does not know whether the diagnosis codes on its
16 list are in fact unsupported. Instead, as the government candidly admits in its portion of
17 the Joint Stipulation, *see United States’ Portion, Section I.A. at 2*, the government created
18 its list by simply comparing the codes that United had received from providers and
19 submitted to CMS to the codes identified by United’s chart review coders who allegedly
20 reviewed the medical charts corresponding to those codes, and then listing all of the codes
21 that the provider had submitted but which the chart reviewer did not identify. In
22 responding to United’s First Interrogatory, the government set forth allegations only of
23 historical facts: it is a list of codes that the government alleges a United chart reviewer did
24 not identify when coding a chart. Not having reviewed a single medical record, the
25 government’s response did not reflect any medical coding analysis or conclusions as to
26 whether either the provider’s coding, or the results of United chart review coding, was in
27 fact correct under applicable coding guidelines.

b. *Interrogatory 14 and RFP 147*

On November 4, 2020, the government issued the instant discovery requests, both of which relate to medical records that correspond to the approximately 28 million diagnosis codes the government alleges represent overpayments that United was required to delete.

Interrogatory 14

Interrogatory 14 has two subparts, A and B,³ both of which apply to “each Diagnosis set forth in the United States’ Response to Defendants’ Interrogatory No. 1 that you contend you were not obligated to delete or otherwise return payment received for the Diagnosis to the Medicare Program.” Ex. N, United States’ Fourth Set of Interrogatories. For the universe of diagnosis codes United contends it was not obligated to delete, Subpart 14A asks United to identify “all documentation in each Chart(s), if any, that You contend supports that Diagnosis, Including for each the Beneficiary (by name, HIC Number, and date of birth), Date(s) of Service, Diagnosis Code(s), HCC(s) and/or RxHCC(s), Provider (by individual name, group name, address, NPI, Tax ID(s), and Provider ID.” *Id.* As the Special Master knows, United contends that it was not obligated to delete *any* of the 28 million diagnosis codes on the government’s list, regardless of whether some of those codes are not supported by a medical record. Hence, Interrogatory 14A requires United to identify and gather the over 20 million medical records corresponding to each of the 28 million codes on the government’s list and then to hire expert coders to review those tens of millions of charts to determine whether each code on the government’s list is or is not supported by the medical chart, and if it is, to point the government to the relevant portions of the medical record containing that documentation.

Subpart 14B requests that, for the universe of diagnosis codes United contends it

³ While not at issue in the current Joint Stipulation, United notes for the record and has made clear to the government that Interrogatory 14 contains two discrete subparts, A and B, which are separate lines of inquiry and therefore separate interrogatories.

1 was not obligated to delete, United identify “each Medical Record Review(s) of the
2 Chart(s) corresponding to that Diagnosis, Including for each its date(s), type(s) (i.e.,
3 whether the Medical Record Review was conducted as part of Chart Review, Internal Data
4 Validation, RACCR, Claims Verification, HQ-PAFs, or other UHG Medical Record
5 Review program), Chart Barcode, Load Date(s), and each Diagnosis Code for which
6 support was found, identified, validated, or recorded in the Medical Record Review.” *Id.*
7 As with Interrogatory 14A, this request requires United to engage in a massive and
8 complex matching analysis for the government to look for every instance in which any of
9 the government’s 28 million codes might have been the subject of a Medical Record
10 Review, and to set forth the results of such chart reviews. The government seeks to have
11 United perform this matching exercise to create evidence to buttress the government’s
12 claim that United had knowledge that the 28 million diagnosis codes on the government’s
13 list were unsupported and, therefore, constituted overpayments.

14
15 *RFP 147*

16 RFP 147 seeks “[a]ll Chart(s) corresponding to, associated with, or related to each
17 Beneficiary, from each DOS Year(s) in which that Beneficiary is listed in the United
18 States’ Response to Defendants’ Interrogatory No. 1.” Ex. O, United States’ Eighth Set of
19 Requests for Production. As written, this request encompassed every medical chart
20 relating to every beneficiary who appears on the government’s list from the years in
21 question – regardless of whether that chart had ever been reviewed by United or was even
22 associated with the particular diagnosis code submission that the government alleges
23 should have been deleted. On its face, RFP 147 would have required the production of
24 many tens of millions of medical charts. On January 29, 2021, the government attempted
25 to “narrow RFP 147 to only require production of the medical records associated with the
26 codes that UHG contends were supported.” *See* Ex. P, Jan. 29, 2021 email correspondence
27 between counsel for United and counsel for the United States and Relator. Specifically, as
28 the government clarifies its position in its portion of this Joint Stipulation, its request is

1 now limited to those medical records “UnitedHealth identifies in response to Part A of
2 Interrogatory 14.” *United States’ Portion, Section I.A. at 3*. RFP 147 is, therefore,
3 dependent entirely on whether United is required to respond to Interrogatory 14A; if the
4 Court agrees that United is not required to hire experts to engage in the coding reviews
5 that responding to Interrogatory 14A would require, then there would be no medical
6 records responsive to RFP 147 as now recrafted by the government.

7 On December 4, 2020, United issued its Responses & Objections to Interrogatory
8 14 and RFP 147 (“Responses”). *See* Exs. A, B. United objected to Interrogatory 14 and
9 RFP 147 on several grounds, including most importantly that Interrogatory 14 is an
10 impermissible contention interrogatory because (1) it seeks to improperly shift the burden
11 of proof for a main element of the government’s False Claims Act case to United and (2)
12 it seeks expert opinion, which is outside the scope of a proper contention interrogatory.
13 *See id.*

14 *c. United’s Efforts to Avoid This Dispute*

15 Since December 4, 2020, the parties have engaged in four meet and confers and
16 exchanged numerous correspondence regarding United’s Responses. Despite the parties’
17 best efforts, the parties have been unable to reach a resolution regarding the discovery
18 requests.

19 With respect to Interrogatory 14, United stood on its objection that it is not required
20 to conduct new and burdensome analysis for the government that United has not done for
21 itself, especially since the government has the burden of proving that the 28 million codes
22 are unsupported and that United knew they were unsupported. United has also reiterated
23 that Interrogatory 14A, in particular, is an improper attempt to require United to disclose
24 expert opinion and conclusions in the guise of fact discovery.

25 At the same time, United explained that it has either already produced, or is willing
26 to produce, all of the information that would allow the government to undertake each of
27 these analyses for itself. With respect to Interrogatory 14A, United has offered to produce
28 to the government every single medical record in United’s possession that United reviewed

1 as part of its chart review program, to allow the government to determine for itself which
2 of the codes on its list are or are not supported. *See* Ex. Q, Dec. 31, 2020 email
3 correspondence from A. Qureshi to counsel for the United States and Relator. With respect
4 to Interrogatory 14B, United offered to point the government to all of the data that United
5 has already produced that the government can use to attempt to match the codes on its list
6 to charts that United reviewed, and to the results of those reviews. *Id.* That would be the
7 very same data that United itself would use were it compelled to conduct this analysis for
8 the government. The government has turned down both proposals, insisting that United
9 conduct the complex analyses required to respond to Interrogatories 14A and 14B for the
10 government. *See* Exs. R, P, Jan. 21, 2021 and Jan. 29, 2021 email correspondence between
11 counsel for United and counsel for the United States and Relator.

12 With respect to RFP 147, the government's positions have vacillated dramatically
13 over time. As written, RFP 147 required United to produce all medical records in its
14 possession, custody, or control pertaining to any of the beneficiaries whose codes appear
15 on the government's list for the year in question – regardless of whether United reviewed
16 or possessed those records, and regardless of whether the charts corresponded to the
17 diagnosis codes appearing on the government's list. That request would have required
18 United to gather tens of millions of records, many from third party providers and many
19 with little to no relevance to this case. United therefore has proposed to the government
20 that instead it will produce all medical records in its possession that were subject to a chart
21 review. United's proposal would provide the government with all the materials necessary
22 to perform the expert coding analysis the government wishes United to perform for it.
23 United estimated and informed the government that even this proposal would entail
24 producing between 15 and 21 million medical records. *See* Ex. Q, Dec. 31, 2020 email
25 correspondence counsel for United and counsel for the United States and Relator.

26 When United originally proposed to produce all medical records in its possession,
27 the government expressed concern that United's proposal was too *narrow* because it did
28 not include medical records that may be in United's custody or control rather than in its

1 possession. See Ex. S, Jan. 6, 2021 email correspondence between counsel for United and
2 counsel for the United States and Relator. United explained in response that it did not
3 currently intend to collect medical records from third parties but that, if it did in the future,
4 it would provide those to the government.

5 On January 29, 2021, the government made an about face, this time suggesting that
6 United's offer was *too broad*.⁴ Ex. P, Jan. 29, 2021 email correspondence between counsel
7 for United and counsel for the United States and Relator. As the government describes its
8 current position, the government now asks that United produce "only those records
9 associated with the diagnosis codes that UnitedHealth contends were supported (i.e., the
10 medical records UnitedHealth identifies in response to Part A of Interrogatory 14)." *United*
11 *States' Portion, Section I.A. at 3*. Producing the subset of medical records now requested
12 by the government would therefore require United to first conduct the coding review of
13 the 28 million codes on the government's list that Interrogatory 14A would require.

14 Unfortunately, despite numerous meet and confers and the informal conference
15

16 ⁴ In its portion of the Joint Stipulation, the government writes that "as a result of the
17 meet and confer process following UnitedHealth's responses and objections to RFP 147,
18 the United States *agreed to limit* its request for medical records to only those records
19 associated with the diagnosis codes that UnitedHealth contends were supported (i.e., the
20 medical records UnitedHealth identifies in response to Part A of Interrogatory 14)." *United*
21 *States' Portion, Section I.A. at 3* (emphasis added). The government mischaracterizes the
22 facts. While the government's January 29 counter-proposal in theory does limit RFP 147,
23 the government proposed to limit the RFP at its own initiative and not in response to any
24 request by United. In fact, United is more than prepared to and has already agreed to
25 produce all of the medical records in its possession that were subject to a chart review for
26 the relevant time period. United does not need the government to narrow RFP 147 further.
27 And the government's suggestion that doing so is less burdensome to United is
28 disingenuous. The government is really attempting to narrow RFP 147, not because it
wants to create less burden for United, but because it wants United to go through the
exercise of identifying which charts United contends support the diagnosis codes at issue
so the government does not have to review any medical records. If anything, this
narrowing of RFP 147 is more burdensome for United because it requires United to have
an expert conduct extensive analysis in order to respond.

1 held before the Court, the parties remain at an impasse.

2 **III. ARGUMENT**

3 **A. United States**

4 1. Interrogatory 14

5 The United States is entitled to discover UnitedHealth's contentions about the
6 diagnosis codes at issue in this case during fact discovery. The United States is likewise
7 entitled to discover the facts surrounding each medical record review that UnitedHealth
8 conducted associated with every diagnosis code on the United States' list that
9 UnitedHealth contends it was not obligated to delete, regardless of which specific defense
10 it is relying on for that contention. Because Interrogatory 14 is a proper contention
11 interrogatory and UnitedHealth has asserted no proper objections supporting its refusal to
12 respond, the Court should compel UnitedHealth to answer fully Interrogatory 14. The
13 United States is likewise entitled to discover the facts surrounding each medical record
14 review that UnitedHealth conducted associated with every diagnosis code that
15 UnitedHealth disputes.

16 a. *Interrogatory 14 Is a Proper Contention Interrogatory.*

17 Interrogatory 14 is a proper interrogatory because it seeks factual information
18 relating to UnitedHealth's contentions about issues central to this case. *See* Fed. R. Civ.
19 P. 33(b) ("An interrogatory is not objectionable merely because it asks for an opinion or
20 contention that relates to fact or the application of law to fact"). Contention
21 interrogatories "can be most useful in narrowing and sharpening the issues, which is a
22 major purpose of discovery." Fed. R. Civ. P. 33 (Advisory Committee Notes); *see also*
23 *Boston v. ClubCorp USA, Inc.*, No. CV 18-3746 PSG (SS), 2019 WL 1873293, at *8 (C.D.
24 Cal. Mar. 11, 2019) (Segal, M.J.) ("Courts generally approve of appropriately-timed
25 contention interrogatories because they may serve several beneficial purposes, including
26 narrowing the issues, avoiding wasteful preparation, and, it is hoped, expedit[ing] a
27 resolution of the litigation.") (internal citations omitted).

28 Interrogatory 14 is a straightforward contention interrogatory that asks

1 UnitedHealth to identify its contentions about the diagnosis codes on the United States’
2 list, *i.e.*, the diagnosis codes that the United States has put in issue through its affirmative
3 allegations. Each diagnosis code on the United States’ list previously went through
4 UnitedHealth’s medical record review program, and UnitedHealth’s own reviewers did
5 not find support for the diagnosis code in the associated medical records. The United
6 States is entitled to discover if UnitedHealth now contends that there is support in a
7 medical record for any of the diagnosis codes on the United States’ list. And for each
8 diagnosis code that UnitedHealth contends is supported by medical records, the United
9 States is entitled to discover the documentation and medical records that UnitedHealth
10 contends support that diagnosis code. (Interrogatory 14(A)). Furthermore, for every
11 diagnosis code on the United States’ list (*i.e.*, every diagnosis code the United States
12 alleges UnitedHealth was obligated to delete because, in part, UnitedHealth subjected it to
13 a comprehensive medical record review), that UnitedHealth contends it was not obligated
14 to delete, the United States is entitled to discover the facts surrounding those medical
15 record reviews (Interrogatory 14(B)).

16 If UnitedHealth does not contend that any of the diagnosis codes on the United
17 States’ list were supported by medical records or will not otherwise dispute its obligation
18 to delete specific codes, it should say so in response to Interrogatory 14. That would not
19 only be burden-free, it would substantially narrow the issues in the case. However, if
20 UnitedHealth seeks to present evidence or argue that certain diagnosis codes on the United
21 States’ list were supported by medical records, it must disclose those contentions and their
22 factual basis during fact discovery. (Interrogatory 14(A)). Similarly, if UnitedHealth
23 disputes its obligation to delete any of the diagnosis codes at issue, the United States is
24 entitled to the factual information regarding the medical record reviews UnitedHealth
25 conducted with respect to those diagnosis codes. (Interrogatory 14(B)). *ClubCorp USA,*
26 *Inc.*, 2019 WL 1873293, at *7 (“The purpose of interrogatories is to facilitate trial
27 preparation, to provide facts, to narrow the issues, **and to reduce the chance of surprise.**”)
28 (emphasis added). UnitedHealth is not permitted to surprise the United States at trial by

1 arguing that certain diagnosis codes were in fact supported by medical records, or
2 disputing the results of its own medical record reviews, without ever disclosing those
3 contentions or the facts supporting them during fact discovery.

4 *b. UnitedHealth's Objections That Interrogatory 14 Improperly*
5 *Shifts the Burden of Proof Is Meritless.*

6 UnitedHealth's principal rationale for refusing to respond to Interrogatory 14 is its
7 baseless objection that a plaintiff may not propound a contention interrogatory on a matter
8 in which the defendant does not bear the burden of proof at trial. (Mason Decl., Ex. A,
9 UHG's Resps. and Objs. to Interrog. 14 ("A party bearing the burden of proof cannot
10 propound an interrogatory that effectively requires the responding party to prove the
11 propounding party's case by shifting the burden of proof.")). According to UnitedHealth,
12 Interrogatory 14 is improper "in that it seeks to improperly shift the burden of proof for a
13 main element of the government's False Claims Act case to UnitedHealth." *Id.*

14 The question of burden of proof does not determine whether information is
15 discoverable, nor whether an interrogatory is proper. On the contrary, "the ultimate burden
16 . . . does not dictate the scope of discovery." *SPH America, LLC v. Research In Motion*
17 *Ltd*, No. 13-CV-2320 CAB (KSC), 2016 WL 6305414, *2 (S.D. Cal. Aug. 16, 2016).
18 "Parties may obtain discovery regarding any nonprivileged matter that is relevant to any
19 party's claim **or defense** and proportional to the needs of the case." Fed. R. Civ. P.
20 26(b)(1) (emphasis added). UnitedHealth wrongly seeks to rewrite Rule 26(b)(1) to only
21 allow a plaintiff to discover information relevant to a defense upon which the defendant
22 bears the burden of proof.

23 Furthermore, "[n]owhere in the Federal Rules of Civil Procedure is it required that
24 a party who carries the ultimate burden on an issue at trial must establish a prima facie
25 case before it is entitled to discover information the other party may use to rebut the prima
26 facie case." *McKesson Information Solutions, LLC v. Epic Systems Corp.*, 242 FRD 689,
27 692 (N.D. Ga. 2007); *see also Jackson v. Equifax Inf. Servs. LLC*, No. 1:13-cv-02382-CC-
28 RGV, 2014 WL 12862681, at *3 (N.D. Ga. Sept. 26, 2014) ("contention interrogatories
are properly used to narrow and sharpen the issues before the Court and may be used to

1 discover the legal and factual bases of an opposing party's defenses, even if the party does
2 not bear any burden of proof on the issues to which those defenses relate"); *Linde v. Arab*
3 *Bank PLC*, No. CV-04-2799 (NG)(VVP), 2012 WL 957970, at *2 (E.D.N.Y. Mar. 21,
4 2012) (rejecting "the proposition that contention interrogatories may only explore a party's
5 'contentions' concerning issues on which the party bears the burden of proof"); *Moses v.*
6 *Halstead*, 236 F.R.D. 667, 674 (D. Kan. 2006) ("This Court has noted that such
7 interrogatories are helpful in that they may narrow and define the issues for trial and enable
8 the propounding party to determine the proof required to rebut the responding party's
9 claim or defense.").

10 Because Interrogatory 14 asks for the factual basis of UnitedHealth's defenses in
11 this case, it is a proper contention interrogatory notwithstanding that it is the United States'
12 burden of proof to establish that UnitedHealth improperly failed to delete the diagnosis
13 codes on its list. Interrogatory 14(A) simply requires UnitedHealth to state whether it
14 intends to present evidence, as one of its defenses, that certain of the diagnosis codes on
15 the United States' list are supported in those codes' underlying medical records and
16 identify the records that support that contention. Likewise, Interrogatory 14(B) only asks
17 for factual information about medical record reviews UnitedHealth has already conducted;
18 it does not require any additional analysis by UnitedHealth whatsoever.

19 Moreover, contention interrogatories are routinely permitted where they seek to
20 discover the factual basis for a party's denial of an allegation in a pleading. *See, e.g.,*
21 *GEICO v. Prushanksy*, 12-80556-Civ, 2013 WL 12077495, at *3 (S.D. Fla. Jan. 4, 2013)
22 ("The Court overrules the objection as the interrogatory simply seeks the factual basis for
23 GEICO's denial of paragraph 31 of the Counterclaim, which paragraph states how GEICO
24 allegedly breached its duty of good faith. There is no burden shifting, and this is a proper
25 contention interrogatory."); *Fridkin v. Minn. Mut. Life Ins. Co., Inc.*, No. 97 C 0332, 1998
26 WL 42322, at *5 (N.D. Ill. Jan. 29, 1998) (compelling a response to a contention
27 interrogatory that sought "the bases for Minnesota Mutual's denial of certain allegations
28 in Plaintiffs' Amended Complaint"); *Am. Gen. Life Ins. Co. v. Billard*, No. C10-1012,

2011 WL 13136619, at *3 (N.D. Iowa May 2, 2011) (ordering a full response to a contention interrogatory and related requests for production seeking “the factual basis for the denial of those paragraphs of the Complaint that are denied by the Billard Answer” and the production of any document “which proves or disproves any fact upon which Defendant bases its denial”); *Barkley v. Life Ins. Co. of N. Am.*, No. 3-07-CV-1498-M, 2008 WL 450138, at *1 (N.D. Tex. Feb. 19, 2008) (ordering a response to a contention interrogatory seeking “the basis for each of the denials expressed in Defendant’s Original Answer”), *as modified* (N.D. Tex. Mar. 12, 2008); *Schaap v. Exec. Indus., Inc.*, 130 F.R.D. 384, 388 (N.D. Ill. 1990) (ordering responses to contention interrogatories inquiring into the basis of Executive’s denials of certain allegations of the complaint, so as to “clarify, narrow, and sharpen the issues” and “ensure mutual access to all relevant facts”).

Just as in the cases cited above, Interrogatory 14 seeks the factual basis for the denial of an allegation in a pleading, specifically UnitedHealth’s denial of Paragraph 342 of the United States’ Amended Complaint. (Mason Decl., Ex. D, UnitedHealth’s Answer to Amend. Compl., ECF No. 223, at ¶ 342 (“Paragraph 342 states legal conclusions to which no response is required. To the extent Paragraph 342 contains any factual allegations, such allegations are denied.”)). UnitedHealth denied the factual allegations in the United States’ contention that UnitedHealth “knowingly and improperly failed to delete . . . the invalid diagnoses that had been submitted to the Medicare Program for risk adjustment payments which were made by the Medicare Program or knowingly and improperly failed to otherwise return to the Medicare Program the overpayments based on the invalid diagnoses.” *Id.* Moreover, UnitedHealth’s Interrogatory No. 1 (which sought and elicited the United States’ list of diagnosis codes that are the subject of this litigation), specifically sought the factual bases for the United States’ contention in Paragraph 342 of the Amended Complaint. (Mason Decl., Ex. E, UnitedHealth’s Interrog. No. 1). Because the United States’ Interrogatory 14 asks for the factual basis regarding which diagnosis codes on that list UnitedHealth contends were supported, it asks for UnitedHealth’s factual basis for denying the allegations in Paragraph 342. The United States is entitled to discover the

1 factual basis for UnitedHealth's denial of Paragraph 342 of the Complaint, and
2 Interrogatory 14 is therefore a proper contention interrogatory.

3 c. *UnitedHealth's Objection That Interrogatory 14 Improperly*
4 *Requests the Early Production of UnitedHealth's Expert*
Opinions Is Meritless.

5 The other objection that UnitedHealth relies on to support its refusal to answer
6 Interrogatory 14 is equally meritless. UnitedHealth contends that Interrogatory 14 is an
7 "improper contention interrogatory because it seeks expert opinion, not facts, which is
8 outside the scope of a proper contention interrogatory." (Mason Decl., Ex. A, UHG's
9 Resps. And Objects. to Interrog. 14).

10 This objection fundamentally misapprehends the information the United States is
11 seeking. Interrogatory 14 is a proper contention interrogatory because it requests only
12 information regarding the underlying facts (*i.e.*, the existence and source of medical record
13 support, as contended by UnitedHealth, for any of the diagnosis codes identified by the
14 United States), not any expert opinion about those facts. *See Amgen Inc. v. Sandoz Inc.*,
15 No. 14-cv-04741, 2017 WL 1352052, *2 (N.D. Cal. Apr. 13, 2017) (holding that
16 interrogatories "are not improper to the extent they seek only facts, not how an expert
17 would construe those facts"); *D&D Techs. (USA), Inc. v. Safetech Hardware Inc.*, 2013
18 WL 12142955, at *2 (C.D. Cal. Nov. 8, 2013) (ordering responding party to supplement
19 responses to interrogatories that sought "the legal and factual bases for [d]efendant's
20 contentions"); *Bayer Healthcare Pharm., Inc. v. River's Edge Pharm., LLC*, No.:
21 1:11-cv-1634-HLM, 2015 WL 11142425, at *7 (N.D. Ga. July 31, 2015), *report and*
22 *recommendation adopted*, 2015 WL 11142428 (N.D. Ga. Sept. 22, 2015) (The
23 "[i]nterrogatory ... did not ask for the expert's opinion or a conclusion of law, which, of
24 course, would have been rightfully objectionable. Rather, the interrogatory asked which
25 facts and legal theories Plaintiffs intend to rely on.").

26 Here, the interrogatory asks for UnitedHealth to identify facts – which diagnosis
27 codes it contends are supported by medical records, which medical records provide such
28 support, and the medical record reviews that UnitedHealth previously conducted of those

1 records. Contrary to UnitedHealth's meritless objection, the interrogatory does not ask
2 UnitedHealth to describe "how an expert would construe those facts." *See Amgen Inc.*, at
3 *2. Nor does it ask for UnitedHealth to describe "expert's opinion or a conclusion of law."
4 *See Bayer Healthcare Pharm., Inc.*, at *7. "The fact that an expert would ultimately put
5 the facts together to support the legal theory in an opinion is of no consequence as to
6 whether a responding party must timely supplement such an interrogato[r]y." *Id.*

7 UnitedHealth itself previously argued regarding its Interrogatory No. 1 that "[t]he
8 fact that the . . . Interrogatory may seek information that has been provided to an expert or
9 that relates to the subject of expert analysis does not provide . . . an excuse to avoid
10 responding . . . in full with the information reasonably available to it at the time of its
11 response." (Mason Decl., Ex. F, Ltr. From A. Qureshi dated March 17, 2020 at p. 4 (citing
12 *Menell v. Rialto Unified Sch. Dist.*, No. EDCV 15-2124-VAP (KKx), 2016 WL 3452920,
13 at *4 (C.D. Cal. June 20, 2016) ("The Court notes expert analysis does not relieve
14 Defendant of its obligation to investigate and provide information reasonably available to
15 it."))).

16 For these same reasons, any potential expert analysis UnitedHealth may propound
17 related to the issue of whether underlying medical records support specific diagnosis
18 codes, or related expert conclusions about any impact of that support, does not relieve
19 UnitedHealth of its obligation to timely investigate and provide during fact discovery
20 information reasonably available to it. In that same vein, Interrogatory 14(B) merely asks
21 UnitedHealth to identify every medical record review it conducted of any charts associated
22 with the diagnosis codes on the United States' list that UnitedHealth disputes.

23 Interrogatory 14 is therefore a proper contention interrogatory that does not call for
24 expert opinion.

25 *d. UnitedHealth's Proposed Response Under Fed. R. Civ. P.*
26 *33(d) is Improper.*

27 During the party's meet and confer process and the informal conference with
28 Special Master Segal, UnitedHealth suggested that, notwithstanding its initial
Interrogatory Response, it would respond to Interrogatory 14 by generally referencing

1 some tens of millions of medical records that it would eventually produce to the United
2 States. Not only does this not even address the response requested by Interrogatory 14(B),
3 but with respect to 14(A), this is an unreasonable position and does not satisfy
4 UnitedHealth's discovery obligations, because UnitedHealth's **contentions** cannot
5 possibly be found in underlying medical records. The documents do not speak for
6 themselves and do not contain any discernible clue as to what UnitedHealth's contentions
7 might be. Only UnitedHealth can say what its contentions are.

8 A party may answer interrogatories by reference to underlying documents only "if
9 the burden of deriving or ascertaining the answer will be substantially the same for either
10 party" and only if the responding party "specif[ies] the records that must be reviewed, in
11 sufficient detail to enable the interrogating party to locate and identify them as readily as
12 the responding party could." Fed. R. Civ. P. 33(d). Neither of those conditions are
13 satisfied here, where the United States has asked for UnitedHealth's **contentions**, and
14 UnitedHealth proposes responding with a blanket reference to tens of millions of
15 underlying medical records, without identifying, importantly, which of those tens of
16 millions of medical records it contends support one or more of the diagnosis codes on the
17 United States' list. UnitedHealth's proposed elaborate guessing game does not comport
18 with its discovery obligations.

19 For this very reason, Fed. R. Civ. P. 33(d) does not permit a party to respond to
20 contention interrogatories by reference to underlying documents. "[D]ocuments
21 themselves rarely, if ever, reveal contentions of fact or law . . . Only plaintiff can identify
22 its own contentions and the burden on defendants to try and divine plaintiff's contentions
23 from documents obviously imposes a greatly unequal burden on defendants . . . [and] a
24 mixture of contention interrogatories and requests for statements of fact . . . do not lend
25 themselves to answer by use of Rule 33(d)." *U.S. S.E.C. v. Elfindopan, S.A.*, 206 F.R.D.
26 574, 576-77 and n. 5 (M.D. N.C. 2002); *see also United States ex rel. Dougherty v. Guild*
27 *Mortg. Co.*, No. 16cv2909-JAH(BLM), 2020 WL 3542391, at *5 (S.D. Cal. June 30, 2020)
28 ("Merely directing Defendant to hundreds of loan records and citing to the general HUD

underwriting and origination requirements does not suffice to alert Defendant to what the Government's allegations are or what evidence it has to support its claims."); *Moeller v. Taco Bell Corp.*, No. C 02-5849 PJH (JL), 2008 WL 11454816, at *2 (N.D. Cal. Aug. 28, 2008) (party cannot rely on the document production option of FRCP 33(d) to respond to a contention interrogatory); *United States ex rel. Landis v. Tailwind Sports Corp.*, 317 F.R.D. 592, 594 (D.D.C. 2016) (same); *In re Ford Motor Co. DPS6 Powershift Transmission Prod. Liab. Litig.*, No. 2:18-ML-02814 AB (FFM), 2019 WL 6486048, at *2 (C.D. Cal. Oct. 17, 2019) (same); *Johnson Marcraft, Inc v. W. Sur. Co.*, No. 3:15-CV-01482, 2016 WL 3655299, at *2 (M.D. Tenn. July 8, 2016) (same).

UnitedHealth itself previously argued regarding its Interrogatory No. 1 that it is improper to answer a contention interrogatory by reference to documents: "The government's attempt at directing UnitedHealth to root through UnitedHealth's own documents to ascertain what diagnosis codes the government contends are at issue is improper and contrary to the requirements of the Federal Rules and applicable case law." (Mason Decl., Ex. F, Ltr. From A. Qureshi dated March 17, 2020 at p. 6 (citing *See Dancy v. Scribner*, No. 1:07-cv-00716-OWW-SMS PC, 2009 WL 3567850, at *2 (E.D. Cal. Oct. 27, 2009) ("This requires Plaintiff to answer Defendants' interrogatories with specificity. Plaintiff may not provide vague information or direct Defendants to comb through his exhibits to answer their own interrogatories."))). For these same reasons, UnitedHealth's proposal under Fed. R. Civ. P. 33(d) is improper.

Therefore, UnitedHealth may not properly respond to Interrogatory 14 simply by referring to tens of millions of medical records.

e. Compelling A Response to Interrogatory No. 14 Promotes Fairness and Efficiency.

A response to Interrogatory 14 will promote efficiency, because it will potentially narrow the issues in the case. If UnitedHealth is not defending this case by arguing that the diagnosis codes at issue were supported by medical records, it is wasteful for UnitedHealth to withhold that information now and force the parties and the Court to expend resources litigating that aspect of the case. It will also streamline document

1 discovery – UnitedHealth’s proposal to produce 21 million medical records in response to
2 Request 147 is not only unnecessary, but would unreasonably and exponentially expand
3 the scope of discovery and the schedule set in this case. If UnitedHealth responds to
4 Interrogatory 14(A), then the parties can agree to the production of only the subset of those
5 medical records, if any, associated with the diagnosis codes UnitedHealth contends were
6 supported. It makes no sense to require the production of 21 million records (which
7 UnitedHealth estimates will take approximately 8 months), when only a subset of those
8 records may ultimately be relevant to this litigation. More importantly, even if
9 UnitedHealth produced all 21 million records, that production is meaningless if it refuses
10 to identify which of those records it contends supports one of the diagnosis codes at issue
11 in this case.

12 Likewise, compelling an answer to Interrogatory 14 will avoid unfair surprise not
13 contemplated by the Federal Rules. UnitedHealth’s position is that it may (or may not)
14 present percipient witnesses and expert opinion testimony at trial to show that certain
15 diagnosis codes were supported by medical records, without ever identifying those
16 diagnosis codes or the associated medical records during fact discovery. This would put
17 the United States in the untenable position of having to rebut a defense that it never had
18 an opportunity to probe or otherwise prepare for during fact discovery. That is trial by
19 ambush, and not how civil discovery works. For this reason, it is not sufficient to wait
20 until UnitedHealth eventually provides this information in pretrial disclosures or expert
21 reports, which come long after the close of fact discovery.

22 Finally, compelling an answer to Interrogatory 14 would be consistent with Court’s
23 prior ruling on UnitedHealth’s Interrogatory No. 1, which required the United States to
24 expend extraordinary efforts to compile a list of each and every diagnosis code that the
25 United States contends is at issue in this case. In support of its position on Interrogatory
26 No. 1, UnitedHealth argued that “[i]n order to defend itself, United is entitled to know,
27 with specificity, which diagnosis codes it allegedly knew were false and affirmatively
28 chose not to delete.” (Mason Decl., Ex. G, UnitedHealth’s Counter-Proposal Regarding

UHC of California's First Interrogatory, at 1). Just as the United States was required to disclose which diagnosis codes it contends are unsupported, UnitedHealth should be required to disclose which codes it contends are supported by the medical records. This is not tit for tat; it is simply what discovery properly requires in this case. It would not only be inconsistent to require that the United States identify each diagnosis code at issue, and then not allow the United States to learn UnitedHealth's position as to those very same codes, but it would eviscerate the very purpose of what discovery was designed to do in a case, namely, narrow the issues for trial and eliminate the opportunity for the presentation of surprise evidence.

2. Request 147

The United States is entitled to the production of medical records associated with all of the diagnosis codes at issue in this case and Request 147 is thus a proper document request. UnitedHealth has asserted no proper basis for refusing to produce documents in its possession, custody, or control.

Because UnitedHealth has now agreed to produce *all* responsive documents in its possession, the parties' dispute at this point is much narrower. The United States continues to believe that it is unnecessary to incur the burden and delay of producing all records, when only a subset of the responsive records may be relied upon by UnitedHealth. Accordingly, the United States submits that, after UnitedHealth answers Interrogatory 14 and identifies every diagnosis code that it contends was supported by medical records, it must produce all medical records in its possession, custody, or control, that relate to the diagnosis codes that UnitedHealth contends were supported by medical records.

B. UnitedHealth

1. The Government's Motion to Compel on Interrogatory 14A
Should Be Denied

a. *Interrogatory 14A is an Improper Attempt to Use a Contention Interrogatory to Compel United to Perform the Expert Analysis that the Government Failed to Perform Before Filing Suit*

Interrogatory 14A does not seek to ferret out United's contentions of fact in this

1 case. Interrogatory 14A instead seeks to compel United to perform expert analysis in a
2 thinly veiled attempt to overcome a fundamental flaw in the government's case: namely,
3 having created and advanced a list of 28 million diagnosis codes it claims were
4 unsupported (and, therefore, "false"), the government now realizes that it failed to do the
5 work necessary to support that allegation. Instead of doing the work, under the guise of a
6 contention interrogatory, the government seeks to compel United to retain expert coders
7 to review the list of 28 million codes the government created and to endeavor to find
8 support for each of those diagnosis codes in the medical records pertaining to the
9 underlying beneficiaries corresponding to diagnosis codes on the government's list. Put
10 simply, the government seeks to compel United to do the expert work the government
11 should have done before filing this case and before promulgating a list of 28 million codes
12 it contends are unsupported.

13 It is well settled that contention interrogatories "are improper [when] they ask the
14 respondent to provide an expert opinion." *Amgen Inc. v. Sandoz Inc.*, No. 14-cv-04741-
15 RS (MEJ), 2017 WL1352052, at *2 (C.D. Cal. Apr. 13, 2017); *Montgomery v. Wal-Mart*
16 *Stores, Inc.*, No. 12cv3057-JLS (DHB), 2015 WL 11233384, at *6 (S.D. Cal. July 17,
17 2015); *Finjan, Inc. v. ESET, LLC*, No. 17CV183 CAB (BGS), 2018 WL 4772124, at*4
18 (S.D. Cal. Oct. 3, 2018). Courts in the Ninth Circuit have specifically held that while
19 interrogatories are proper "to the extent they seek only facts," interrogatories cannot
20 require a responding party to demonstrate "how an expert would construe those facts." See
21 *Amgen Inc.*, 2017 WL 1352052, at *2 (a contention interrogatory, which required the
22 respondent to show why the patented mechanism was nonobvious, impermissibly required
23 expert testimony); *Qualcomm Inc. v. Apple Inc.*, No. 3:17-CV-02398-DMS-MDD, 2018
24 WL 5829940, at *1 (S.D. Cal. Nov. 7, 2018).

25 The government does not appear to dispute this legal proposition. Instead, it insists
26 that Interrogatory 14A seeks only "facts." That claim grossly mischaracterizes the
27 complex, expert-driven process required to determine that a code is supported by a medical
28 record. To generate the list the government commands, United will need to retain expert

1 coders to review each of the 28 million diagnosis codes and then to compare those codes
2 to any of the medical records corresponding to the beneficiaries (patients) at issue.
3 Determining whether any or all of the 28 million codes are supported by a particular entry
4 in any of the relevant medical records cannot be done by lay people or lawyers. It must be
5 done by someone with specialized training and experience in risk adjustment coding:
6 namely, an expert. Put simply, interrogatory 14A falls squarely and unquestionably in the
7 realm of expert analysis and expert opinion, and any answer to Interrogatory 14A will be
8 expert opinion governed by Fed. R. Evid. 702. Interrogatory 14A is therefore procedurally
9 and substantively improper.

10 (A) Whether a Diagnosis Code Is Supported in a Medical
Record Requires Expert Opinion

11 Whether a diagnosis code is or is not supported in a medical record is an opinion,
12 not a fact, and, in any event, is a determination that only a coder can make.

13 To begin with, as the government's own documents recognize, coding involves the
14 exercise of judgment as to which different coders may disagree; whether a particular
15 diagnosis code is supported or not by a medical chart *is not a fact*. For example, in a
16 November 20, 2015 memorandum from the U.S. Department of Health and Human
17 Services ("HHS") Office of the Inspector General, HHS recognized that "[m]edical record
18 review consists of evaluating risk adjustment data to see if it supports the reported CMS-
19 HCC. While criteria does exist, in some cases, the medical reviewer must use their
20 judgment to make a decision." Ex. T, USBP060643694 (Confidential) at 1. The
21 government has also recognized that "[i]t is entirely possible for two different reviewers
22 to look at a medical record and come to opposite conclusions." *Id.*; *see also* Ex. U,
23 USBP059844500 (Confidential) at 2 (June 2011 email exchange in which a CMS
24 employee discusses appeals related to "RADV reviews of medical records" and states:
25 "everything stands or falls on what each side asserts is in the record (note, I didn't say—
26 what IS in the record. It is much more nuanced than that since coding is far from bench
27 science . . . it's fairly subjective at times"); Ex. V, USBP059164283(AEO) at 12 (February
28 2004 draft report regarding "Medicare+Choice Risk Adjustment Data Validation for CY

2001 Payments,” acknowledging the existence of “coding differences” that can be due to many factors, including “differences in interpretation of clinical documentation, differences in interpreting coding guidelines and judgment between coders”); Ex. W, 2018 Benefit Year Protocols at 91 (explaining that, in its Risk Adjustment Data Validation (“RADV”) audits, CMS employs a process called “Inter-Rater Reliability” or “IRR,” which is a “quality control measure to determine the accuracy of the abstraction diagnoses by Primary Coders when compared to Senior Coders. Medical records reviewed by the Primary Coder and sampled for IRR are then re-reviewed by a Senior Coder. The comparison of HCCs assigned to diagnoses found between the Primary Coder and the Senior Coder are then used to determine the Primary Coder’s IRR consistency measure”).⁵

Moreover, regardless of whether properly characterized as “art” or “science,” determining whether a particular diagnosis code is properly abstracted from a medical record undoubtedly requires expertise and specialized training. The government knows this. Each year, as part of its RADV audits, the government retains expert coders to conduct medical record reviews on behalf of the government to determine whether a diagnosis code submitted by a Medicare Advantage Plan is supported in a medical record. As part of this process, CMS provides these RADV coders with guidance for reviewing the underlying medical record documentation to identify potential support for a diagnosis code. This guidance provides that the “reviewers must first apply their expertise in documentation and official coding guidelines to each scenario.” Ex. Y, CMS RADV

⁵ Numerous experts within the healthcare industry have likewise recognized that coding is an art not a science and requires the exercise of judgment. *See* Ex. X, *Achieving Coding Consistency* at 1 (“[c]oding professionals know that the act of coding is not black and white—there is room for interpretation. A coder’s background and training, among other factors, will greatly influence the way he or she assigns codes”); *see id.* (quoting a coding manager as saying: “Coding is much more of an art than it is a science . . . So [coding professionals] definitely have a lot of room for interpretation.”); *see id.* (quoting a vice president of health information management at a healthcare company as saying: “[A] coder doesn’t just use books and resources, they also have to use their head, use their logic, their common sense, to make some decisions.”)).

1 Guidance at 6. The “reviewers” are certified and trained coding experts CMS retains to
2 conduct these RADV audits. *See* Ex. Z, RA Participant Guide at 159 (describing how CMS
3 uses “Medical Record Review Contractors (MRRCs)” in RADV that utilize “certified
4 coders to abstract diagnosis codes”). They are not lay people.

5 The application of expertise and guidance to interpret a medical record is
6 necessarily analysis, not fact. Moreover, this is expertise a lay person does not possess and
7 guidance a lay person does not understand and cannot interpret. One could not hand a lay
8 person a voluminous medical record and ask them to determine whether the record
9 adequately supports coding pythorax without fistula (ICD 10 code J86.9) or amyotrophic
10 lateral sclerosis (ICD-10 code G12.21) because the lay person has no training in reading
11 highly technical medical charts and would have no understanding of the “official coding
12 guidelines” that apply to the abstraction and selection from among thousands of possible
13 diagnosis codes.⁶

14 Numerous courts have thus recognized that only a coder qualified as an expert by
15 the court can testify as to whether a diagnosis code is supported in the record. *See, e.g.,*
16 *United States ex rel. Desrosiers v. Thaller*, No. 12-22445-CIV-LENARD/SELTZER,
17 2016 U.S. Dist. LEXIS 151220, at *6–7, *12–13 (S.D. Fla. Nov. 1, 2016) (holding that
18 professionally certified coder expert opinion that “57 of the 121 cases lacked sufficient
19 documentation to support the procedure coded” was not outside the expert’s area of
20

21 ⁶ In fact, there is no single comprehensive source of “official coding guidelines”
22 that detail how to accurately code diagnoses in the risk adjustment context. Rather, there
23 are multiple organizations and industry-accepted sources regarding risk adjustment
24 coding. For instance, CMS in-part relies upon official ICD Coding guidance as well as the
25 views of certifying bodies. Common sources of risk adjustment coding guidance include
26 the American Academy of Professional Coders (“AAPC”), which educates coders
27 primarily in physician-based settings, including AAPC Certified Risk Adjustment Coder
28 course guidance, and the American Health Information Association (“AHIMA”), which
educates coders primarily in hospital settings. CMS guidance expressly directs Medicare
Advantage plans to industry organizations for risk adjustment coding guidance. *See* Ex. Z,
RA Participant Guide at 155.

1 expertise in False Claims Act case concerning allegedly unnecessary and up coded medical
2 procedures); *United States ex rel. Armfield v. Gills*, No. 8:07-cv-2374-T-27TBM, 2012
3 WL 12918274, at *2 (M.D. Fla. July 6, 2012) (party advancing a coding expert—and court
4 agreeing she was qualified—to testify regarding improperly coded claims because she was
5 a certified professional coder and had twenty-five years of experience in medical coding
6 and billing); *Counts v. Pollock*, No. 3:18-cv-1072-J-39JBT, 2020 WL 5534444, at *2
7 (M.D. Fla. Aug. 21, 2020) (party advancing an expert—and court agreeing he was
8 qualified—to testify regarding whether plaintiff’s medical bills were properly coded
9 because “[h]e has numerous credentials, certifications, and recognitions in the field of
10 medical billing and coding”); *see also id.*, at *3 (finding that the coding expert’s testimony
11 is proper opinion testimony and would aid the jury because “[t]he ordinary juror is not
12 expected to have knowledge regarding [certain medical] codes, meaning expert testimony
13 regarding [medical] coding is appropriate”).

14 (B) Interrogatory 14A Asks for Expert Analysis and
15 Conclusions

16 Because responding to Interrogatory 14A would require expert analysis, it is not a
17 proper contention interrogatory. *Qualcomm* is persuasive on this point. In a patent
18 licensing dispute brought by Apple against Qualcomm, Qualcomm requested that Apple
19 “identify all patent license agreements concerning any of the Apple Accused
20 Functionalities that Apple contends are comparable to a license Apple would have taken
21 in a hypothetical negotiation in this case including certain details regarding those
22 comparable licenses.” *Qualcomm Inc.*, 2018 WL 5829940, at *1. Concluding that
23 “[w]hether a particular patent license is comparable to one that might be taken in a
24 hypothetical negotiation is considered to be a matter of expert opinion” and would
25 therefore be outside the scope of a contention interrogatory, the court held that Apple
26 would “not be required, in connection with this dispute, to provide the *opinions of its*
27 *experts* regarding the comparability of these licenses to that which may be taken in the
28 hypothetical negotiation.” *Id.* at 2 (emphasis added).

The government argues that an interrogatory that seeks “only information regarding

1 the underlying facts” and not ““how an expert would construe those facts”” is proper.
2 *United States’ Portion, Section III.A.1.c. at 25* (quoting *Amgen Inc.*, 2017 WL 1352052,
3 *2). But Interrogatory 14A does no such thing. Interrogatory 14A clearly seeks disclosure
4 of a coding expert’s ultimate opinion and conclusion: whether a diagnosis code is
5 supported by the medical chart under applicable coding guidelines, and if so, by which
6 entry. Use of a contention interrogatory for that purpose is improper.

7 (C) The Government’s Attempt to Equate Interrogatory 14A
8 with United’s First Interrogatory is Meritless

9 Lacking a persuasive argument that Interrogatory 14A does not seek the results of
10 expert analysis and conclusions, the government attempts to equate Interrogatory 14A
11 with United’s First Interrogatory, to which this Court required the government to respond.
12 *See United States’ Portion, Section III.A.1.e. at 28–29*. In fact, there is no similarity
13 whatsoever between the information sought by the government in its interrogatory and the
14 information it was required to disclose in response to United’s.

15 United’s First Interrogatory asked the government, as the plaintiff that brought this
16 action, to identify the diagnosis codes that it alleges constituted overpayments that United
17 knew of but failed to delete. In responding to United’s interrogatory, the government did
18 not review a single medical record to determine for itself whether any of the diagnosis
19 codes at issue are in fact supported by the medical chart in accordance with applicable
20 coding guidelines. Indeed, the government had not even requested a single medical chart
21 from United prior to undertaking its response to United’s Interrogatory. RFP 147, also at
22 issue in this motion, is its first such request. Instead, as the government acknowledges in
23 its portion of the Joint Stipulation, consistent with the flawed theory of liability it pled in
24 its complaint, the government’s response to United’s interrogatory consists of a list of
25 codes that the government claims that United submitted for payment but that its chart
26 review coders did not identify when conducting a chart review. *See United States’ Portion,*
27 *Section III.A.1.a. at 20*. While the government may have used expert data analysts to assist
28 in creating its list, its response consists of its allegations regarding historical facts: the
subset of previously submitted codes that United’s coders allegedly did not identify when

1 performing their chart reviews. United's interrogatory did not ask the government to
2 review medical charts or engage in diagnosis coding, and the government's response did
3 not disclose any expert opinions or conclusions.

4 Interrogatory 14A, by contrast, expressly asks United to identify which codes on
5 the government's list are in fact supported by the underlying medical records. As explained
6 above, only a trained coder can make that determination, and Interrogatory 14A thus
7 requires the disclosure of an expert's conclusions. There is no parallelism whatsoever
8 between the government's response to United's interrogatory and the government's
9 Interrogatory 14A.

10 The government's argument also overlooks the different obligations imposed on
11 plaintiffs and defendants. The government chose to bring this case and alleges that United
12 has retained billions of dollars in overpayments. A plaintiff cannot avoid informing the
13 defendant of the alleged overpayments it is seeking to recover. No countervailing duty is
14 imposed on defendants, who are fully entitled to put the government to its proof and to
15 wait to make its decisions about whether to conduct potential expert analysis for the time
16 when expert disclosures are required.

17 (D) United will Make Any Expert Analysis it Conducts
18 Available to the Government Through Expert Discovery

19 Because Interrogatory 14A improperly seeks expert discovery, United cannot be
20 compelled to respond to it, now or in the future. Interrogatories may not be used to seek
21 expert disclosures. As United has made clear to the government on multiple occasions,
22 however, to the extent that United has an expert conduct analysis of medical records to
23 identify whether support for any of the diagnosis codes at issue exists that it plans to use
24 at trial, United will disclose this analysis according to the Order Granting Stipulation
25 Regarding Expert Discovery entered by the Court on May 17, 2018 (Dkt. 233). That Order
26 sets forth the parties obligations with respect to expert disclosures, and the government
27 cannot require United to make expert disclosures during fact discovery. *See* Ex. AA,
28 Expert Discovery Stipulation.

b. *Interrogatory 14A is Improper Because it Would Require United to Conduct New and Time-Consuming Analysis that it Has Not and May Never Undertake and Reverses the Burden of Proof.*

Interrogatory 14A is also improper because it impermissibly seeks to require United to undertake extensive investigation and analysis it has not conducted and would shift the government's burden of proving falsity onto United. Interrogatory 14A is entirely inconsistent with United's discovery obligations and antithetical to the basic tenet of civil litigation: the plaintiff must prove its own case and cannot force the defendant to meet this burden instead. Therefore, United should not be required to respond.

It is well settled that a party cannot craft "interrogatories that require a party to make extensive investigations, research, or compilation or evaluation of data for the opposing party." 8B Wright, Miller & Marcus, Federal Practice and Procedure § 2174 (3d ed. 2013). Likewise, a party does not have a "duty to search out new information in response to interrogatories." *See* 7 Moore's Federal Practice - Civil § 33.102 (2021); *see also, City of Las Cruces v. United States*, No. CV 17-809 JCH/GBW, 2021 WL 330062, at *8 (D.N.M. Feb. 1, 2021) ("A party responding to an interrogatory 'is not required to make an extensive investigation'" (citation omitted); *Behrazfar v. Unisys Corp.*, No. SACV 08-0850-AG(RCX), 2009 WL 10673197, at *4 (C.D. Cal. June 3, 2009) (party need not respond to an interrogatory that would require extensive analysis that would include "at least 10 hours per employee . . . and cost more than \$600,000.00").

It is equally well established that in responding to an interrogatory "a party cannot ordinarily be forced to prepare its opponent's case," 8B Wright, Miller & Marcus, Federal Practice and Procedure § 2174 (3d ed. 2013), or "do the interrogating party's investigation for him." *City of Las Cruces*, 2021 WL 330062, at *8 (citations omitted). An interrogatory thus cannot be used to compel the responding party to create analysis that would prove elements of the case as to which the propounding party has the burden.

Interrogatory 14A runs afoul of these principles. Responding to the interrogatory would undoubtedly require United to undertake an extensive investigation and analysis for the government that United has not performed already (and may very well never perform),

1 and create new information. United has not reviewed the relevant medical records to
2 determine whether the codes on the government's list are, or are not, supported by those
3 medical records, and indeed may never do so. Yet, in order to respond to the government's
4 interrogatory, United would now have to retain hundreds of coders to review
5 approximately 20 million charts and to determine which of the codes on the government's
6 list of 28 million codes is or is not supported. If that is not an extensive investigation,
7 nothing is, and United cannot be compelled to undertake this work for the government.
8 *See Melder v. Allstate Corp.*, No. CV 03-2499, 2007 WL 9777975, at *4 (E.D. La. Nov.
9 5, 2007) (denying motion to compel Allstate to disclose insurance scores and credit scores
10 by "zip code, policy type [and] policy form," because Allstate did not keep that
11 information in that form and responding would require Allstate to undertake extensive
12 analysis and prepare its opponent's case for it.)

13 The analysis the government wishes to compel United to undertake would likewise
14 reverse the burden of proof and require United to prepare the government's case for it.
15 The government admits that "it is the United States' burden of proof to establish that
16 UnitedHealth improperly failed to delete the diagnosis codes on its list," *United States'*
17 *Portion, Section III.A.1.b. at 22*, and that includes first proving that the codes on its list
18 are in fact unsupported. Instead of accepting United's proposal to produce all medical
19 records in its possession so that the government can review them, Interrogatory 14A would
20 require United to review all of the codes on the government's list and identify for the
21 government which codes are supported. In doing so, United would thus necessarily be also
22 identifying (by the codes not included on its list) which codes were *not* supported, thereby
23 potentially producing evidence that the government could use to prove one element of the
24 government's case for it. The government cannot compel United to do this. *See In re*
25 *Facebook, Inc.*, No. MDL 12-2389, 2016 WL 5080152, at *4 (S.D.N.Y. July 7, 2016)
26 (ruling that defendant in a securities case did not have to respond to an interrogatory on a
27 "complicated matter" that "would amount to a collection of information akin to
28 Defendants' affirmative defense," reasoning that "[i]t would be inappropriate to require

1 Plaintiffs to devise a theory for an element which is not required for their prima facie
2 case”); *Allstate Corp.*, 2007 WL 9777975, at *4 (interrogatory cannot require the
3 defendant to undertake analysis that would prepare the plaintiff’s case for it).

4 It would be no answer to argue that Interrogatory 14A requires United to undertake
5 a coding review only as to those diagnostic codes that it contends are supported. To begin
6 with, because all of the diagnosis codes were submitted by providers, United believes that
7 *each* code, taken by itself, is presumptively valid and more likely than not supported by
8 the underlying medical record. Moreover, because the list of codes is not something that
9 United created, the only way that United could determine which of the 28 million codes
10 on the government’s list are or are not in fact supported would be by reviewing every
11 single one of them. And if United responded to Interrogatory 14A by reviewing only a
12 partial list of codes, it risks the government later attempting to prevent United from
13 introducing evidence at trial that other codes, too, are supported. As a practical matter,
14 therefore, responding to Interrogatory 14A would require United to review every single
15 code on the government’s list.

16 The cases relied on by the government, *United States’ Portion, Section III.A.1.b. at*
17 *21–22*, merely stand for the unremarkable proposition that a party may be required by an
18 interrogatory to provide reasonably available facts, even if those facts are relevant to an
19 issue as to which the propounding party has the burden. *See, e.g., McKesson Info. Sols.,*
20 *LLC v. Epic Sys. Corp.*, 242 F.R.D. 689, 692 (N.D. Ga. 2007) (requiring party to disclose
21 the date of its invention). None of those cases reject, or even discuss, the rule that a party
22 responding to an interrogatory request may not be compelled to conduct new time-
23 consuming *analysis* that it has not already conducted in order to prepare the other party’s
24 case for it.

25 2. The Government’s Motion to Compel a Response to
26 Interrogatory 14B Should Be Denied

27 As with Interrogatory 14A, Interrogatory 14B also seeks to require United to
28 undertake new, complex analysis, this time to assist the government in proving a different

1 element of its case – knowledge. The government’s theory of the case is that not only are
2 all the diagnosis codes on its list of 28 million codes unsupported, but that United *knew*
3 the codes were unsupported. And the government’s theory is that United knew the codes
4 were unsupported because with respect to each code on the government’s list, one of
5 United coders had allegedly reviewed the medical chart corresponding to the same
6 beneficiary, same date of service, and same provider, and yet had not identified the code
7 in the coder’s blinded coding results. In order to prove this theory, the government needs
8 to properly match a specific diagnosis code submitted by a provider on a claim to its
9 corresponding medical record reviewed by a United chart review coder and to the results
10 of that review. United for its part denies that its coders necessarily reviewed the medical
11 records, or portions of medical records, corresponding to the provider-submitted codes on
12 the government’s list. Moreover, establishing that a United coder reviewed a medical chart
13 that may have been the same chart relied upon by the provider when submitting the initial
14 code is not a premise of any aspect of United’s defense and does not form the basis of any
15 contention United may advance in this case.

16 In order to establish this critical and disputed aspect of the government’s theory of
17 liability, Interrogatory 14B requires United to take every single diagnosis code in the
18 government’s list of 28 million codes, and undertake the complex exercise, which United
19 has not conducted already, of matching the codes on the list to the charts reviewed by
20 United’s coders, and for ones that match, to report the results of the coding review (among
21 other details). As the government admits, *United States’ Portion, Section I.A. at 3*, the
22 Interrogatory requires United to do this for every code on its list, “regardless of whether
23 the basis for UnitedHealth’s contention [that it was not required to delete the code] is
24 claimed support in an underlying medical record or some other defense.”⁷ Interrogatory

25
26 ⁷ Although this request relates to those codes that United contends “it was not
27 obligated to delete or otherwise return payment received for,” as the Court is aware
28 United’s legal position in this case is that it was not obligated to delete *any* of the codes
on the government’s list. Interrogatory 14B thus requires United to conduct this matching
analysis for every one of the 28 million codes listed by the government.

1 14B is an improper interrogatory to which United should not be compelled to respond.

2 To begin with, although the government's portion of the Joint Stipulation repeatedly
3 refers to Interrogatory 14 as a "contention interrogatory," *see, e.g., United States' Portion,*
4 *Section I.A. at 3*, that characterization is wholly inapplicable to Interrogatory 14B. It is the
5 government who contends that United reviewed the medical charts corresponding to all
6 the codes on the government's list. United has not made any such contention, and no
7 defense United has raised or would raise in this case would depend on United proving that
8 the codes on the government's list correspond to the precise charts that United's coders
9 reviewed. Even if Interrogatory 14B had sought only existing factual information, that
10 information would be the facts underlying *the government's* contention, not United's
11 contention. Interrogatory 14B is thus not a valid contention interrogatory – it is simply a
12 naked attempt to get United to undertake an extensive and difficult matching exercise that
13 it has not conducted in order to prepare the government's case for it.

14 Even if Interrogatory 14B were actually a contention interrogatory, it is improper
15 for the same reasons that Interrogatory 14A is improper: it impermissibly forces United to
16 perform the government's analysis for it and shifts the burden of proving knowledge,
17 according to the government's theory, onto United. As discussed above, an interrogatory
18 cannot affirmatively force a responding party to perform a complicated analysis on behalf
19 of the propounding party. *See City of Las Cruces*, 2021 WL 330062, at *8 ("A party
20 responding to an interrogatory 'is not required to make an extensive investigation' or 'do
21 the interrogating party's investigation for him.'" (citations omitted)). If United is forced to
22 match diagnosis codes at issue to medical record reviews of records for the same date of
23 service, it would have to perform analysis it otherwise would not perform and has no need
24 to perform. Nor can the government shift the burden of proving an element of the
25 government's case—in this instance, knowledge—onto United. *See In re Facebook, Inc.*,
26 2016 WL 5080152, at *4.

27 United has repeatedly offered to respond to Interrogatory 14B by pointing the
28 government to the data that United has already produced and that the government can use

1 to conduct the matching analysis for itself. Tellingly, despite the fact that it has all the
2 tools and data necessary to perform the matching exercise it seeks to compel United to
3 perform, the government does not wish to perform that analysis itself. The government
4 bears the burden of proving its case and cannot compel United to create new information,
5 and conduct new and complicated analysis and investigations, in order to prepare the
6 government's case for it. That is particularly true where the government could do the work
7 on its own, yet apparently refuses to do so.

8 3. The Government's Motion to Compel Regarding RFP 147
9 Should Be Denied

10 The government has repeatedly rejected United's good-faith proposals to respond
11 to RFP 147. Specifically, United has offered to produce all of the medical charts in its
12 possession that went through United's chart reviews. After months of insisting that this
13 proposal, which United estimates would result in producing approximately 20 million
14 charts, was too *narrow*, the government now complains that this offer is too *broad* and
15 that United should produce only those "medical records UnitedHealth identifies in
16 response to Part A of Interrogatory 14." *United States' Portion, Section I.A. at 3.*

17 As now recast by the government, RFP 147 stands or falls with the Court's ruling
18 as to Interrogatory 14A. Because the government's proposal makes United's obligation to
19 respond to RFP 147 dependent on United's response to Interrogatory 14A, if the Court
20 agrees that United is not required to respond to that interrogatory then there would be no
21 medical records responsive to the government's recast version of RFP 147.

22 4. The Government's Claims of Sandbagging and Unfair Surprise
23 Are Baseless

24 United is not trying to hide the ball from the government and has no intention of
25 putting the government in the position of "having to rebut a defense that it never had an
26 opportunity to probe or otherwise prepare for." *United States' Portion, Section III.A.1.e.*
27 *at 28.* With respect to Interrogatory 14B, the government has all the information it needs
28 to perform the analysis, and derive the information, it seeks. In that regard, there is no

1 risk of surprise—provided the government is willing to do the work. Similarly, with
2 respect to Interrogatory 14A, United is prepared to produce all the medical records in its
3 possession, which would allow the government to perform the expert analysis of
4 determining which of its 28 million codes is supported or unsupported. In that way, the
5 government would certainly be prepared to rebut any defense United might mount that
6 was predicated on an analysis of the 28 million codes and/or a review of medical records
7 corresponding to the 28 million codes. Yet, here again, the government simply does not
8 want to do the work now that it should have done before bringing this case.

9 In any event, United simply has not determined whether and to what extent it will
10 introduce evidence at trial demonstrating that certain of the codes on the government's
11 list are supported as part of its defense, and so has not done the expert analysis that
12 would be required to respond to Interrogatory 14A.

13 To be completely clear, should United retain an expert to testify at trial that some,
14 or all, of the 28 million codes on the government's list are supported by specific medical
15 records that the expert reviews, that information will be produced during expert
16 discovery in a manner that provides the government sufficient time to prepare a rebuttal,
17 consistent with its obligations under the relevant discovery rules and under the Order
18 Granting Stipulation Regarding Expert Discovery. See, e.g., Fed. R. Civ. P. 26(a)(2); see
19 also Ex. AA, Expert Discovery Stipulation.

20 United's agreement to produce all the medical records in its possession also
21 disposes of the government's fear that a percipient witness might refer to one or more
22 medical charts as part of his/her testimony. Not surprisingly, given that the trial in this
23 case is nearly 2 years out, and given that fact discovery is still ongoing, United has not
24 endeavored to compile a list of exhibits it intends to use at trial. Yet, as long as United's
25 ultimate exhibits have been produced to the government during discovery, the government
26 has no basis to claim unfair surprise. This is true even though there are millions of charts
27 potentially at issue. For example, even in complex cases with millions of produced
28 documents, the parties have no obligation to disclose in advance of pretrial disclosures

1 which particular emails they intend to introduce at trial, especially those that will be used
2 during cross-examination. *See* Fed. R. Civ. P. 26(a)(3). The parties instead bear their own
3 responsibilities for developing their own cases based on their own review of the documents
4 produced. These rules apply equally to medical records as they do to emails. Moreover,
5 the government cannot complain about the massive scope of discovery in this case since
6 it is the government alone that framed the size of the case and who has put 28 million
7 codes at issue.

8 5. The Government’s Alternative Request that United Be
9 Foreclosed From Introducing Evidence at Trial Lacks Any
10 Foundation

11 Finally, the Court should reject outright the government’s request that “if
12 UnitedHealth is not compelled” to respond to the government’s requests, the Court should
13 issue an “Order foreclosing UnitedHealth from later introducing such evidence” at trial.
14 *United States’ Portion, Section IV at 46.*

15 To begin with, the government makes this request only in one sentence of the
16 Conclusion section of its portion of the Joint Stipulation. It does not address this request
17 in the body of its brief and provides literally no legal authority to support it. Under well-
18 established principles, the request is thus not adequately presented and the Court should
19 not address it on the merits. As the Central District has summarized the Ninth Circuit’s
20 treatment of analogous briefing deficiencies, “issues raised in a brief that are not supported
21 by argument are deemed abandoned.” *Fabricant v. United States*, No. CR 03-01257-
22 RSWL-1, 2015 WL 5923481, at *4 (C.D. Cal. Oct. 8, 2015) (citing *Martinez-Serrano v.*
23 *I.N.S.*, 94 F.3d 1256, 1259 (9th Cir. 1996) (citing *Acosta-Huerta v. Estelle*, 7 F.3d 139,
24 144 (9th Cir. 1992))). “Furthermore, issues referred to in the appellant’s statement of the
25 case but not discussed in the body of the brief are waived.” *Id.* “The Ninth Circuit has even
26 refused to consider constitutional matters that were neither briefed nor argued, but merely
27 asserted in conclusory terms.” *Id.* (citing *United States v. Mateo-Mendez*, 215 F.3d 1039,
28 1043 (9th Cir. 2000)). Under these principles, an argument raised for the first time in the

1 Conclusion of a brief, without any argument, is likewise waived. *See Erwin v. Shinseki*,
2 No. 09-1530, 2011 WL 1563942, at *6 (Vet. App. Apr. 27, 2011) (refusing to consider an
3 argument raised only in the “Conclusion” section of Erwin’s brief).

4 There is also no basis for the government’s request. United has not resisted
5 producing documents or data to the government. United has instead objected, on legal
6 grounds, to undertaking new analysis for the government as part of an interrogatory
7 response to help prepare the government’s case for it. And it has also objected that it may
8 not be required to disclose expert analysis or conclusions in response to an interrogatory.
9 If the Court agrees with these arguments, there would be no basis for punishing United for
10 prevailing by then precluding it at trial from introducing relevant and admissible evidence,
11 should it choose to do so.

12 Finally, unlike situations where a party objects, on the grounds of burden, to producing,
13 in response to a request for production, the only evidence that would permit the
14 requesting party to prove certain facts, and then attempting to capitalize on that refusal at
15 trial, United is merely objecting to undertaking the government’s trial preparation for it.
16 United has offered to produce to the government all of the medical records in United’s
17 possession that were subject to United chart reviews, and the government can review
18 those medical records to conduct its own expert analysis of whether some or, as it
19 alleges, all of the codes on its list are in fact unsupported. And United has already
20 produced to the government, and has offered to point the government to, all of the data
21 that would enable the government to conduct for itself the matching exercise it wishes to
22 compel United to undertake in response to Interrogatory 14B. United’s position does not
23 prevent the government from attempting to meet its burdens of proof in this case, and
24 there is thus no reason whatsoever to preclude United from introducing any evidence of
25 its own at trial.

26 **IV. PROPOSED RESOLUTION/CONCLUSION**

27 **A. United States**

28 The United States respectfully requests that the Court grant the United States’

Motion to Compel a Response to Interrogatory No. 14 and the production of all medical charts associated with any diagnosis codes UnitedHealth contends are supported by medical records, in response to Request for Production No. 147. Alternatively, if UnitedHealth is not compelled to disclose its contentions and produce the medical records it contends support a diagnosis code, the United States requests an Order foreclosing UnitedHealth from later introducing such evidence on the ground that it failed to produce it during fact discovery.

B. UnitedHealth

The Court should deny the government's Motion to Compel and not require United to respond to Interrogatory 14 or RFP 147, now or in the future.

WESTERN DIVISION
UNITED STATES DISTRICT COURT
CENTRAL DISTRICT OF CALIFORNIA

UNITED STATES OF AMERICA ex rel.
BENJAMIN POEHLING,

Plaintiffs,

vs.

UNITED HEALTH GROUP, INC., et. al.

Defendants.

Case No. CV 16-8697 FMO (SSx)

ORDER DENYING WITHOUT PREJUDICE
PLAINTIFF'S MOTION TO COMPEL RE
INTERROGATORY NO. 14 AND REQUEST
FOR PRODUCTION NO. 147

On April 16, 2021, Plaintiff United States (the "government") filed a motion to compel (the "Motion" or "MTC") seeking an order regarding Defendant United Health Group, Inc. and related entities ("UnitedHealth" or "UHG") to provide a supplemental response to Interrogatory No. 14 ("Interrogatory 14") and Request for Production No. 147 ("RFP 147" or "Request 147"). The parties submitted a Joint Stipulation in connection with the Motion. Each party also filed a Supplemental Memorandum. On May 20, 2021, the Special Master held a Zoom hearing on the

1 Motion. For the reasons discussed below, the Motion is DENIED without prejudice
2 to renewing the motion at a later stage in the litigation.
3

4 5 I. FACTUAL AND PROCEDURAL BACKGROUND

6
7
8 The government contends that UnitedHealth has refused to reasonably
9 respond to two discovery requests that address whether UnitedHealth improperly
10 failed to delete diagnosis codes from its Medicare Part C risk adjustment submission.
11 According to the government, UnitedHealth systematically ignored medical record
12 reviews when it indicated that diagnosis codes UnitedHealth previously submitted
13 to CMS were not supported by beneficiaries' medical records.
14
15

16 The government contends that it has identified every diagnosis code that
17 UnitedHealth submitted to CMS to increase its risk adjustment payments and then
18 improperly failed to delete when UnitedHealth's own review found no support for
19 the diagnosis code in the medical records. The government asserts that Interrogatory
20 14 and Request 147 are intended to discover UnitedHealth's contentions about the
21 very same diagnosis codes. The government seeks to discover whether
22 UnitedHealth contends that any of the diagnosis codes on the government's list were
23 supported by medical records, despite not being found during any of UnitedHealth's
24 reviews of the associated medical records.
25
26
27
28

1 Interrogatory 14 asked UnitedHealth to, with respect to every diagnosis code
2 on the government's list, (a) identify which code is supported by a medical record
3 and (b) identify every medical record review that UnitedHealth conducted. (MTC
4 at 5-7). Request 147 requests all medical records associated with the diagnosis codes
5 on the government's list. (Id. at 7).

6
7
8 In response to Interrogatory 14, UnitedHealth objected on the grounds that
9 "this Interrogatory is an improper contention interrogatory that impermissibly seeks
10 to shift the burden of proving an essential element of the government's False Claims
11 Act case on to UnitedHealth and seeks expert opinion." (Id. at 8). In response to
12 Request 147, UnitedHealth stated: "Based upon its General and Specific Objections,
13 UnitedHealth does not intend to produce documents responsive to this Request."
14

15
16 At the meet and confer on this issue, UnitedHealth indicated that it would
17 produce the responsive medical records in its possession. This production, however,
18 would require a production of approximately 21 million charts and take 8 months to
19 produce. This proposal did not resolve the discovery dispute.
20
21

22 The government asserts that, as it was required to provide a list of 28 million
23 diagnosis codes to comply with its obligation to identify the diagnosis codes it
24 contends UnitedHealth knew were invalid, UnitedHealth should now explain
25 whether medical records do or do not support these codes. (Id. at 9).
26
27
28

1 According to UnitedHealth, Interrogatory 14A requires it to identify the over
2 20 million medical records corresponding to each of the 28 million codes on the
3 government's list and then to hire experts to review those charts to determine
4 whether each code on the government's list is or is not supported by the medical
5 chart. Subpart 14B requests that UnitedHealth "[i]dentify each Medical record
6 Review(s) of the chart(s) corresponding to that Diagnosis, etc." According to UHG,
7 this request would also require it to engage in a massive and complex matching
8 analysis. RFP 147 seeks the documents that relate to the answer required in
9 Interrogatory 14.
10
11
12
13
14

15 II. INTERROGATORY 14 REQUIRES EXPERT ANALYSIS TO
16 RESPOND
17
18

19 Although the government argues that Interrogatory 14 is "only seeking facts,"
20 it would be impossible for anyone other than an expert to provide a reliable answer.
21 Only an expert -- or someone with specialized knowledge -- could do a fair
22 comparison of the medical records and the diagnosis codes to determine if the
23 medical record supported the code. It is also undeniable that the interrogatory would
24 impose a tremendous burden on the responding party to prepare an answer that does
25
26
27
28

1 not currently exist. For these reasons, Interrogatory 14 is an improper interrogatory
2 at this stage of the proceedings.

3
4 Contention interrogatories may be improper “[when] they ask the respondent
5 to provide an expert opinion.” Amgen Inc. v. Sandoz Inc., 2017 WL 1352052, at *2
6 (C.D. Cal. April 13, 2017); Montgomery v. Wal-Mart Stores, Inc., 2015 WL
7 11233384, at *6 (S.D. Cal. July 17, 2015). In addition, a court has discretion to
8 delay an answer to a contention interrogatory until designated discovery is complete
9 or at some other time. See Capacchione v. Charlotte-Mecklenburg Sch., 182 F.R.D.
10 486, 489 (W.D.N.C.1998) (stating that “[d]ue to the nature of contention
11 interrogatories, they are more appropriately used after a substantial amount of
12 discovery has been conducted - typically, at the end of the discovery period”). In
13 general, courts prefer to defer answers to contention interrogatories that are
14 propounded prematurely. See e.g., Everett v. USAir Group, Inc., 165 F.R.D. 1, 3
15 (D.D.C. 1995) (denying without prejudice motion to compel response to contention
16 interrogatory on grounds that interrogatory served too early in discovery process);
17 B. Braun Medical, Inc. v Abbott Lab., 155 F.R.D. 525, 527 (E.D. Pa. 1994) (“[T]here
18 is considerable support to defer answering contention interrogatories until the end of
19 the discovery period.”).

20
21 In the present action, the request seeks the application of expert knowledge to
22 facts, i.e., the medical records. This interrogatory cannot be answered until after
23
24
25
26
27
28

expert discovery is completed and only if UnitedHealth intends to assert a defense based upon this information. Indeed, parties generally provide this type of information through expert testimony. See United States ex rel. Desrosiers v. Thaller, 2016 WL 6441548, at *4-6 (S.D. Fla. Nov. 1, 2016) (whether medical codes submitted for reimbursement were proper was subject of expert testimony); Counts v. Pollock, 2020 WL 5534444, at *2 (M.D. Fla. August 21, 2020) (providing expert testimony on whether plaintiff's medical bills were properly coded); United States ex rel Armfield v. Gills, 2012 WL 12918274, at * 2 (M.D. Fla. 2012) (qualifying expert for testimony regarding improperly coded claims). Accordingly, this interrogatory is improper at this stage of the proceedings because it would require expert analysis to respond.

It is also undeniable that preparation of the response to the request would be extremely burdensome and costly. It would require UnitedHealth to pay for and create an analysis for 20 million documents. Ordinarily, a respondent is not required to undertake investigation and analysis to prepare a response to an interrogatory. See Behrazfar v. Unisys Corp., 2009 WL 10673197, at *4 (C.D. Cal. June 3, 2009) (party need not respond to an interrogatory that would require extensive analysis and cost). While this analysis and cost may be necessary at some point in the litigation, the Special Master concludes that it is premature to order UHG to undertake this analysis now.

1 UnitedHealth has stated that if it discloses during the expert discovery phase
2 that it has retained an expert to testify at trial that the 28 million codes on the
3 government's list are supported by medical records, that information will be
4 produced in a manner that provides the government sufficient time to prepare a
5 rebuttal. (MTC at 42). Nothing more is required during this phase of the litigation.
6
7 Because Request 14 is a contention interrogatory and requires expert analysis,
8 UnitedHealth is not required to prepare a response at this time.
9
10

11
12 III. REQUEST 147 IS DEPENDENT UPON A RESPONSE TO
13 INTERROGATORY 14 AND THEREFORE IS
14 DENIED WITHOUT PREJUDICE
15
16

17
18 Request 147 seeks: "All Chart(s) corresponding to, associated with, or related
19 to each Beneficiary, from each DOS Year(s) in which that Beneficiary is listed in
20 the United States Response to Defendants' Interrogatory No. 1 (Including the United
21 States' First Supplemental Response served on August 17, 2020, the United States
22 Amended First Supplemental Response served on October 13, 2020, the United
23 States' Second Supplemental Response served on October 30, 2020, and any other
24 subsequent responses)." (Mason Decl., Ex. B). The government agreed to limit this
25
26
27
28

1 request to production of only those medical records UHG contends supports a
2 diagnosis code on the government's list. (MTC at 7-8).

3
4 During the meet and confer process, UnitedHealth offered to produce the
5 responsive medical records in its possession which would amount to an estimated
6 21 million charts and take 8 months to collect and produce. This would allow the
7 government to review the medical records that UnitedHealth reviewed as part of its
8 chart review program and the government could then determine which of the codes
9 on its list are or are not supported. (MTC at 17). At the hearing on the MTC,
10 counsel for the government argued that at a minimum the medical records should be
11 produced to allow the government to review the medical evidence underlying
12 UnitedHealth's codes. Production of these records would allow the government to
13 determine for itself which of the codes on its list are supported or are not supported.
14
15
16
17

18 However, in the Motion itself, the government asserted the following: "After
19 the United States identified its list of all diagnosis codes it contends are at issue, it
20 served Interrogatory 14 and Request 147 to discover UnitedHealth's contentions
21 about the very same diagnosis codes. In particular, the United States seeks to
22 discovery whether UnitedHealth contends that any of the diagnosis codes on the
23 United States' list were supported by medical records, despite not being found
24 during any of UnitedHealth's reviews of the associated medical records. The United
25 States further seeks to discover factual information related to UnitedHealth's
26
27
28

1 medical record reviews.” (MTC at 2, ll. 18-24). The United States also noted:
2
3 “Request 147, as written, relatedly requests all medical records associated with the
4 diagnosis codes on the United States’ list. (citation omitted). Importantly, as a result
5 of the meet and confer process . . . the United States agreed to limit its request for
6 medical records to only those records associated with the diagnosis codes that
7 UnitedHealth contends were supported (i.e., the medical records UnitedHealth
8 identifies in response to Part A of Interrogatory 14).” (MTC at 3, ll. 5-11) . . .
9
10 “Subsequently, UnitedHealth agreed to produce some (but not all) of the underlying
11 medical records, but that offer is hollow without identifying which codes
12 UnitedHealth contends are supported by medical records (i.e., responding to
13 Interrogatory 14). Simply producing millions of medical records alone does nothing
14 to illuminate UnitedHealth’s contentions.” (MTC at 3, ll. 17-21).

15
16
17
18 As UHG observed, “RFP 147 is . . . dependent entirely on whether United is
19 required to Interrogatory 14A; if the Court agrees that United is not required to hire
20 experts to engage in the coding reviews that responding to Interrogatory 14A would
21 require, then there would be no medical records responsive to RFP 147 as now
22 recrafted by the government.” (MTC at 16, ll. 2-6). UHG, as part of the meet and
23 confer efforts, offered to produce to the government every medical record in
24 United’s possession that United reviewed as part of its chart review program, to
25 allow the government to determine for itself which of the codes on its list are or are
26
27
28

1 not supported. (MTC at 16, ll. 25-28; 17, ll. 1-2). The government rejected this
2 offer. UHG contends that the government's position regarding Request 147 has
3 "vacillated dramatically over time." (MTC at 17, ll. 12-13). At the hearing on the
4 MTC, the government did take a position that contradicted the government's prior
5 arguments in the MTC, i.e., the government argued that a response to Request 147
6 would be meaningful even without a response to Interrogatory 14.

7
8
9 The Special Master finds that the inconsistency in the government's
10 arguments undermines their persuasiveness. The Special Master concludes that if
11 the two discovery requests are related and linked as the government originally
12 argued, then the Order should be consistent regarding both requests. Accordingly,
13 the MTC is DENIED without prejudice as it pertains to Request 147. The
14 government may renew Request 147 if the requested documents are relevant to
15 UHG's defenses asserted at a later phase of the action.
16
17
18

CASE NO. CV 16-08697 FMO (SSx)

**DEFENDANT UHC OF
CALIFORNIA'S FIRST
INTERROGATORY TO THE
GOVERNMENT**

Assigned to Hon. Fernando Manzano
Olguin

DISCOVERY MATTER

PROPOUNDING PARTY: Defendant UHC of California

RESPONDING PARTY: Plaintiff United States Government

SET NO.: ONE (1)

TO THE RESPONDING PARTY AND TO ITS ATTORNEYS OF RECORD:

Please take notice that pursuant to Rule 33 of the Federal Rules of Civil Procedure and Rule 33-1 of the Local Civil Rules of the United States District Court for the Central District of California, Defendant UHC of California, by and through its undersigned attorneys, submits the following First Interrogatory to the Government (“Interrogatory”). UnitedHealth requests that the Government respond separately in writing to the following Interrogatory within thirty (30) days of service. The Definitions and Instructions set forth below shall govern the following Interrogatory, as well as responses to the Interrogatory.

DEFINITIONS

As used herein, the following terms and phrases shall have the following meanings:

1. The applicable definitions and rules of construction set forth in the Federal Rules of Civil Procedure and the local rules are incorporated herein by reference.

2. **“Beneficiary”** or **“Member”** shall mean an individual enrolled in a Medicare Advantage Plan.

3. **“CMS HCC”** means an HCC that is used for Medicare Part C.

4. **“Complaint”** shall mean the United States’ Amended Complaint-In-Partial Intervention And Demand For Jury Trial filed by the Government in this case on November 17, 2017, and any forthcoming amended complaints filed by the Government in this case.

5. **“Diagnosis Code(s)”** shall mean an ICD-9-CM or ICD-10 CM diagnosis code.

6. **“Date of Service Year(s)”** shall mean the year or years during which a Beneficiary had a medical encounter with a healthcare provider.

7. **“HCC”** shall mean a hierarchical condition category associated with one or more diagnosis codes (ICD-9-CM or ICD-10-CM codes) that represent the disease component of the beneficiary risk scores that are applied to Medicare Advantage payments.

8. **“Date of Service”** shall mean the date of a medical encounter or, if the encounter lasted more than 24 hours, the start and end dates for the encounter.

9. **“Each”** includes the word “every” and **“every”** includes the word “each,” **“any”** includes the word “all” and **“all”** includes the word “any,” **“and”** includes the word “or” and **“or”** includes the word “and,” as necessary to bring within the scope of each Request information that might otherwise be construed to be outside its scope.

10. **“Government”** shall mean the United States, its agencies, departments, components, agents, representatives, contractors, attorneys, consultants, and all other Persons acting on its behalf, including, but not limited to, any component of the United States Department of Justice, the United States Department of Health and Human Services, the Centers for Medicare & Medicaid Services, and all subdivisions and components thereof.

11. **“HIC Number”** shall mean a Beneficiary’s Health Insurance Claim Number.

12. **“NPI”** or **“National Provider Identifier”** shall mean the unique 10-digit identification number CMS issues to covered healthcare Providers.

13. **“Person”** shall mean natural persons, proprietorships, corporations, public corporations, municipal corporations, the federal government and all departments and agencies thereof, state governments, local governments, other governmental agencies, political subdivisions, partnerships, groups, associations or organizations.

1 14. **“Provider”** shall mean any provider of healthcare services including
2 individual providers such as physicians, physicians assistants, laboratories, medical
3 equipment providers, and nurse practitioners; institutional providers such as
4 hospitals and clinics; provider groups such as groups of physicians or associations
5 of physicians with other provider types; and any other type of providers of healthcare
6 services or items. “Provider” includes fee-for-service Providers, providers with
7 Gainshare Arrangements, and Providers with Capitation arrangements. “Provider”
8 also includes any past or present employee, contractor, or agent of any Provider. The
9 term “Provider” shall be given the broadest possible meaning when responding to
10 these Requests.

11 15. **“Provider ID”** shall mean the unique identifier(s) used to differentiate
12 the Provider in one or more of UnitedHealth’s Risk Adjustment Databases.

13 16. **“RxHCC”** means an HCC used for Medicare Part D.

14 17. **“Tax ID”** shall mean the nine-digit identification number used by the
15 Internal Revenue Service (IRS) for tax purposes.

16 18. **“United”** or **“UnitedHealth”** shall mean all the Defendants listed in
17 Your Complaint.

18 19. **“You”** and **“Your”** shall mean the Government and all Persons acting
19 on its behalf.

INSTRUCTIONS

1
2 1. In accordance with the Federal Rules of Civil Procedure, Your
3 obligation to respond to the Interrogatory is continuing. If you receive or discover
4 information after serving a response to the Interrogatory, You should supplement
5 Your responses promptly.

6 2. Whenever appropriate, the singular form of a word shall be interpreted
7 as plural, and vice versa. Similarly, the use of the present tense of a verb shall be
8 considered to include within its meaning the future and past tense, and vice versa.

9 3. The Interrogatory should be construed so as to include all time periods
10 relevant to the allegations and claims for damages contained in Your Complaint.

11 4. Whenever the conjunction “and” is used, it is also to be interpreted
12 disjunctively, and conversely; whenever the disjunctive ‘or’ is used, it is also to be
13 interpreted conjunctively.

14 5. Each Interrogatory is to be construed independently and not in
15 reference to any other Interrogatory for purposes of limiting the scope of the
16 Interrogatory. The answer to an Interrogatory shall not be supplied by referring to
17 the answer to another interrogatory unless the answer to the referenced interrogatory
18 supplies a complete and accurate answer to the Interrogatory being answered.

19 6. You are to produce all responsive information that are in Your
20 possession, custody or control, or in the possession, custody, or control of any of
21 Your agents, representatives, and consultants. Without limiting the term “control,”
22 responsive information is deemed to be within Your control if You have ownership,
23 possession, or custody or the information, or the right to secure the information from
24 any person. If You do not have responsive information in Your possession, custody,
25 or control, You must state so and answer the Interrogatory in part if You have part
26 of the responsive information.

27 7. If a claim of privilege is asserted in objecting to the Interrogatory, or
28 any sub-part thereof, and an answer is not provided on the basis of such assertion,

1 furnish the following information with respect to the Interrogatory as to which the
2 claim of privilege is asserted: (a) the nature of the privilege (including work product)
3 that is being claimed; and (b) the general topic of the information claimed to be
4 privileged to the extent possible in a manner consistent with the claimed privilege.

5 8. Whenever an Interrogatory calls for information with respect to “each”
6 one of a particular type or class of claims, matters, events, persons, or entities, of
7 which there is more than one, You are required to separately list, set forth, or identify
8 for each thereof all of the information requested.

9 9. If any meaning of any term in any Interrogatory is unclear to You,
10 without waiver of UnitedHealth’s right to seek a full and complete response to the
11 Interrogatory, You shall assume a reasonable meaning, state what the assumed
12 meaning is, and respond to the Interrogatory according to the assumed meaning.

13
14 **INTERROGATORY**

15 **INTERROGATORY NO. 1**

16 Identify for Date of Service Years 2008–2016 the Beneficiary (by name, HIC
17 Number, and date of birth), Date of Service, Diagnosis Code(s), CMS HCC(s) or
18 RxHCC(s), and Provider (by individual name, group name, address, NPI, Tax ID(s),
19 and Provider ID), that corresponds to each and every Diagnosis Code You allege
20 UnitedHealth “knowingly and improperly failed to delete . . . or otherwise return to
21 the Medicare Program [as an] overpayment.” United States’ Complaint ¶ 342, Dkt.
22 171.

No. CV 16-08697 FMO

UNITED STATES' RESPONSES AND
OBJECTIONS TO DEFENDANT UHC
OF CALIFORNIA'S SECOND SET OF
INTERROGATORIES TO THE
GOVERNMENT

PROPOUNDING PARTY: UHC OF CALIFORNIA, INC.

RESPONDING PARTY: UNITED STATES OF AMERICA

SET NUMBER: TWO

Preliminary Statement

Pursuant to Rules 26 and 33 of the Federal Rules of Civil Procedure and Rule 33 of the Local Civil Rules of the United States District Court for the Central District of California, the United States of America (“United States” or “government”), through its undersigned counsel, hereby provides its responses and objections to Defendant UHC of California’s (“UnitedHealth” or “Defendant”) Second Set of Interrogatories (“Second Set of Interrogatories”), dated February 4, 2021. The responses set forth herein are based on information now known to the United States and its undersigned attorneys, and will be revised, corrected, supplemented, amended, and clarified to the extent required by Rule 26 as discovery proceeds.

General Objections

The following objections apply to each and every separately numbered Interrogatory and are incorporated by reference to the extent applicable into the objection to each Interrogatory.

1. UnitedHealth’s Interrogatories are inconsistent with the spirit and letter of the Federal Rules of Civil Procedure (“Federal Rules”), which explain that an interrogatory ought to narrow and sharpen issues for trial. See Fed. R. Civ. P. 33 Advisory Committee’s Note. UnitedHealth’s extensive Interrogatories do just the opposite by asking the United States to respond to vague and illogical mischaracterizations of its arguments, and seeking vast amounts of information without the objective to narrow and sharpen issues for trial. For example, the Interrogatories demand that the United States (i) survey all CMS and HHS-OIG Individuals (as defined by UnitedHealth’s Second Set of Interrogatories, Definitions 4 and 12) to determine if anyone ever held a particular belief between 2008–2017; (ii)

1 reply to convoluted hypotheticals by stating what CMS and HHS-OIG Individuals
2 believe CMS would have done if it had known certain information during the period
3 2008–2017; and (iii) identify “all evidence and material facts” it relies on for its
4 contentions while discovery in this matter is still ongoing.

5 2. The United States objects to the Second Set of Interrogatories to the
6 extent they are vague, ambiguous, overbroad, unduly burdensome, or seek to impose
7 requirements upon the United States beyond those called for or permitted by the
8 Federal Rules, the Local Civil Rules of the United States District Court for the
9 Central District of California (“Local Rules”), or any order of the Court. The United
10 States responds below pursuant to its obligations under the Federal Rules and the
11 Local Rules, namely that the United States has taken and is continuing to undertake
12 reasonable efforts to identify information responsive to the Interrogatories.

13 3. The United States objects to the Second Set of Interrogatories to the
14 extent that a response requires disclosure of information protected by an applicable
15 privilege or protection, including, but not limited to, the attorney-client privilege,
16 work product doctrine, deliberative process privilege, law enforcement privilege,
17 common interest privilege, or investigative files privilege, and protections afforded
18 by Fed. R. Civ. P. 26(b), or any other applicable privilege. The United States will not
19 respond in such a way as to disclose such protected information, and inadvertent
20 identification or disclosure of privileged information by the United States shall not be
21 a waiver of any applicable privilege. Under Federal Rule of Evidence 502, Federal
22 Rule of Civil Procedure 26(b)(5)(B), other related sources of law, and the Court’s
23 Revised Protective Order Governing Non-Waiver of Privilege and Protected Material,
24 Dkt. 412, the government reserves any and all rights to claw back privileged
25 information it inadvertently discloses in response to the Second Set of Interrogatories.

26 4. The United States submits these responses subject to, without intending
27 to waive, but expressly reserving the right to object to other discovery procedures
28 involving or relating to the subject matter of the information in responses to the

1 Second Set of Interrogatories. The United States reserves the right to object on any
2 ground, at any time, to such other or supplemental requests as the Defendants may
3 propound involving or relating to the subject matter of the Second Set of
4 Interrogatories.

5 5. The United States reserves the right to supplement its responses to the
6 Second Set of Interrogatories at any time to the extent provided by the Federal Rules.

7 6. The assertion of the same, similar, or additional specific objections to the
8 Second Set of Interrogatories does not and should not be construed to waive or
9 modify any of the United States' general objections.

10 7. The United States objects to the Second Set of Interrogatories to the
11 extent they require the United States to draw legal conclusions, comment on the
12 merits of any affirmative defenses, or otherwise seek to impose any requirements
13 beyond those established by the Federal Rules or the Local Rules.

14 8. The United States objects to the Second Set of Interrogatories to the
15 extent that they contain multiple subparts numbered as a single Interrogatory. By
16 responding, the United States in no way waives its right to object that UnitedHealth
17 has exceeded the maximum number of interrogatories permitted under the Federal
18 Rules.

19 9. The United States objects to the Second Set of Interrogatories to the
20 extent they purport to require the United States to gather information in the
21 possession or custody of Government components beyond HHS-OIG and CMS on
22 the grounds that they are unduly burdensome and overbroad and that they seek
23 information not relevant to the claims or defenses in this action and disproportionate
24 to the needs of this case.

25 10. The United States objects to the Second Set of Interrogatories to the
26 extent they purport to require the United States to gather information in the
27 possession or custody of HHS-OIG where HHS-OIG is not the relevant agency for
28 payment purposes and therefore the Interrogatories are unduly burdensome,

1 overbroad, and seek information not relevant to the claims or defenses in this action
2 and disproportionate to the needs of this case.

3 11. To the extent the United States produces information or documents in
4 further response to these Interrogatories, it does not admit that the information or
5 documents are true, accurate, authentic, relevant, or admissible in this action. The
6 United States reserves the right to challenge on evidentiary grounds any information
7 or documents produced in response to these Interrogatories.

8 12. The fact that the United States has answered any part of all or any
9 particular interrogatory is not intended to and shall not be construed to be a waiver by
10 the United States of all or part of any objection to any interrogatory.

11 **Specific Objections to the Definitions and Instructions**

12 The United States objects to the Definitions and Instructions to the extent they
13 (i) seek to impose burdens on the United States that are different from, are
14 inconsistent with, or exceed those imposed by the Federal Rules and the Local Rules,
15 (ii) are vague or ambiguous, and/or (iii) render the Second Set of Interrogatories
16 overly broad, unduly burdensome, not proportionate to the needs of the case, and not
17 relevant. The United States further objects to the Second Set of Interrogatories to the
18 extent UnitedHealth has failed to define vague, ambiguous, and confusing terms.

19 **Definition 2:** The United States objects to the definition of “Believed” (Definition 2)
20 as vague, confusing, ambiguous, and irrelevant to the extent it is used in conjunction
21 with “CMS” or “HHS-OIG.” As entities, CMS and HHS-OIG cannot hold Beliefs.
22 The United States will interpret any Interrogatories involving “Believed” to apply
23 exclusively to individuals. The United States further objects because the Beliefs of
24 any individual CMS or HHS-OIG employee is irrelevant to any claim or defense in
25 this matter as CMS and HHS-OIG speak through official pronouncements. The
26 United States also objects to the definition of “Believed” in that “suppose” means
27 something different than “hold something as an opinion” or “think,” and this
28 definition encompassing two different meanings therefore renders UnitedHealth’s

1 Second Set of Interrogatories confusing and self-contradictory. The United States
2 will interpret “Believed” as to hold something as an opinion or to think.

3 **Definitions 3, 10, and 11:** The United States objects to the terms “CMS” (Definition
4 3), “Government” (Definition 10), and “HHS-OIG” (Definition 11) as overbroad and
5 irrelevant to the extent they include current and former contractors or consultants.
6 CMS and HHS-OIG speak through official pronouncements and do not speak through
7 its contractors or consultants, making information provided by contractors and
8 consultants overbroad and irrelevant for the purpose of responding to the Second Set
9 of Interrogatories. The United States objects to the definition of “Government”
10 (Definition 10) to the extent it includes any branch, agency, department, agent,
11 representative, contractor, attorney, consultant, or person acting on its behalf not
12 relevant to this action. This definition is plainly unreasonable, unduly burdensome,
13 and disproportionate to the needs of the case, in that it seeks to require the United
14 States to provide information not currently in the possession, custody, or control of
15 CMS or HHS-OIG. Subject to and without waiving these objections, the United
16 States interprets “Government” to mean CMS and HHS-OIG. To the extent the
17 United States interprets the use of “Government” in a specific Interrogatory as
18 directed at one, but not all, of the above components, the United States will state its
19 interpretation in its response. The United States further objects to the inclusion of
20 “attorneys” in the definitions to the extent that the inclusion of “attorneys” requires
21 the United States to gather information from attorneys within CMS’s Office of the
22 General Counsel (“OGC”), the Office of Counsel for the Inspector General
23 (“OCIG”), or the Department of Justice (“DOJ”). The United States is not searching
24 for, collecting, or providing information or materials from any attorney within OGC,
25 OCIG, or DOJ.

26 **Definitions 4 and 12:** The United States objects to the terms “CMS Individual”
27 (Definition 4) and “HHS-OIG Individual” (Definition 12) as irrelevant, unduly
28 burdensome, and beyond the scope of permissible discovery to the extent they

1 include all current or former contractors or current or former subcontractors, and
2 therefore demand that the United States obtain information from, or respond on
3 behalf of, persons or entities not reasonably accessible to the United States and over
4 whom the United States has no control. The United States further objects to the terms
5 “CMS Individual” and “HHS-OIG Individual” as overly broad and unduly
6 burdensome to the extent they include all current employees of each agency, which
7 includes thousands of people who are unlikely to have information relevant to these
8 interrogatories. The United States objects to the terms “CMS Individual” and “HHS-
9 OIG Individual” as overly broad and unduly burdensome to the extent they include
10 all former employees of each agency, and therefore purport to require the United
11 States to obtain information from, or to respond on behalf of, persons or entities not
12 reasonably accessible to the United States and over whom the United States has no
13 control. It is plainly unreasonable for the United States to survey each and every
14 current and former employee of CMS and/or HHS-OIG. The United States further
15 objects to the inclusion of “attorneys” in the definitions to the extent the inclusion of
16 “attorneys” requires the United States to gather information from attorneys within
17 OGC, OCIG, or DOJ. The United States is not searching for, collecting, or providing
18 information or materials from any attorney within OGC, OCIG, or DOJ.

19 **Definition 17:** The United States objects to the definition of “Person” (Definition
20 17) to the extent it is defined to mean “the federal government and all departments
21 and agencies thereof, state governments, local governments, [and] other
22 governmental agencies[.]” This definition is plainly unreasonable, unduly
23 burdensome, and disproportionate to the needs of the case, in that it seeks to require
24 the United States to provide information not currently in the possession, custody, or
25 control of CMS and HHS-OIG. Furthermore, the United States objects to the extent
26 each definition includes former CMS contractors for whom the United States
27 presently has no reasonable belief they possess or control non-duplicative information
28 relevant to any claim or defense in this case.

1 **Definition 18:** The United States objects to the definition of “Proposed Medical
2 Record Review Rule” (Definition 18) to the extent that it is overly broad, vague, and
3 misleading in that the definition cites to provisions of a proposed rule beyond the
4 proposed addition to 42 C.F.R. § 422.310(e). The United States will interpret
5 “Proposed Medical Record Review Rule” to only include the language at 79 Fed.
6 Reg. 1918, 2000 related to 42 C.F.R. § 422.310(e).

7 **Definitions 6 and 19:** The United States objects to the definitions of “Concerning”
8 (Definition 6) and “Relating to” and “regarding” (Definition 19) because the
9 definitions render the Second Set of Interrogatories vague, ambiguous, confusing,
10 overly broad, unduly burdensome, and disproportionate to the needs of the case.
11 Indeed, these terms are defined to seek any piece of information that in some way—
12 no matter how remote, indirect, or tangential—mentions or references matters set
13 forth in the Interrogatory. The United States responds to the Second Set of
14 Interrogatories by using these terms and the verbs constituting their definitions as
15 limited by the constraining adverb “directly.”

16 **Definition 22:** The United States objects to the definition of “Time Period”
17 (Definition 22) to the extent it seeks information outside the scope of the Parties’
18 agreement relating to a discovery cut-off date of May 16, 2017, with the exception of
19 discovery relating to CMS’s proposed rule *Medicare and Medicaid Programs; Policy*
20 *and Technical Changes to the Medicare Advantage, Medicare Prescription Drug*
21 *Benefit, Program of All-Inclusive Care for the Elderly (PACE), Medicaid Fee-for-*
22 *Service, and Medicaid Managed Care Programs for Years 2020 and 2021* (“Proposed
23 Rule”) and underlying FFS Adjuster Study. See August 9, 2019 D. Schindler email
24 to R. McAuliffe.

25 **Definition 24:** The United States objects to the definition of “You” and “Your”
26 (Definition 24) as overly broad to the extent these terms are intended to encompass
27 any agency, office, employee, agent, representative, officer, or contractor of either the
28 legislative or judicial branch, and insofar as these terms are defined to include

1 executive branch agencies and offices not relevant to this action. This is plainly
2 unreasonable, unduly burdensome, and disproportionate to the needs of the case, in
3 that it seeks to require the United States to provide information not currently in the
4 possession, custody, or control of CMS and HHS-OIG. Subject to and without
5 waiving these objections, the United States will interpret this term to mean CMS and
6 HHS-OIG. When appropriate, the United States will identify whether it is
7 interpreting “You” and “Your” as either CMS, HHS-OIG, or both in the context of
8 each specific Interrogatory.

9 **Instruction 3:** The United States objects to Instruction 3 as vague and ambiguous.
10 For the purposes of responding to these Interrogatories, the United States will
11 construe the relevant time period as January 1, 2004 through May 16, 2017, in
12 accordance with the parties’ agreed-upon discovery timeframe. However, with
13 respect to Interrogatory 6, the United States will construe the relevant time period as
14 January 1, 2004 to June 30, 2019, in accordance with the parties’ agreed-upon
15 discovery timeframe pertaining to discovery relating to CMS’s proposed rule
16 *Medicare and Medicaid Programs; Policy and Technical Changes to the Medicare*
17 *Advantage, Medicare Prescription Drug Benefit, Program of All-Inclusive Care for*
18 *the Elderly (PACE), Medicaid Fee-for-Service, and Medicaid Managed Care*
19 *Programs for Years 2020 and 2021* (“Proposed Rule”) and underlying FFS Adjuster
20 Study. See August 9, 2019 D. Schindler email to R. McAuliffe.

21 **Instruction 5:** The United States objects to Instruction 5 to the extent it seeks to
22 impose burdens upon the United States beyond those called for or permitted by the
23 Federal Rules or the Local Rules.

24 **Instruction 6:** The United States objects to Instruction 6 to the extent it seeks to
25 impose burdens upon the United States beyond those called for or permitted by the
26 Federal Rules or the Local Rules.

27 **Instruction 7:** The United States objects to Instruction 7 to the extent it seeks to
28 impose burdens upon the United States beyond those called for or permitted by the

1 Federal Rules or the Local Rules. The United States will assert any applicable
2 privileges and specify the material to which it applies per Fed. R. Civ. P. 26(b)(5)(A)
3 for all information responsive to an Interrogatory to which the United States has
4 agreed to produce but which is withheld on the basis of a privilege or protection.
5 **Instruction 8:** The United States objects to Instruction 8 to the extent it requires the
6 United States to identify “each” instance of duplicative, redundant, or repetitive
7 information.

8 **Specific Objections and Responses**

9 **INTERROGATORY NO. 2:** For each Diagnosis Code You identified in response
10 to UHC of California’s First Interrogatory, Identify all evidence and material facts
11 upon which You rely, or intend to rely, to support Your contention that these
12 Diagnosis Codes are “not supported by the beneficiaries’ medical records,” “false,”
13 or “invalid.” United States’ Am. Compl. ¶¶ 103, 342, Dkt. 171.

14 **Objections:** The United States incorporates by reference each of its General
15 Objections and Specific Objections to the Definitions and Instructions as if stated
16 herein. The United States objects to this Interrogatory as overly broad and unduly
17 burdensome to the extent it improperly requires the United States to lay out “all
18 evidence and material facts” of its case. *See Tubbs v. Sacramento Cty. Jail*, No.
19 CIVS060280LKKGGHP, 2008 WL 863974, at *1 (E.D. Cal. Mar. 28, 2008) (“‘Each
20 and every fact’ interrogatories pose problems for a responding party and a reviewing
21 court. Parties are not tasked with laying out every jot and tittle of their evidentiary
22 case in response to interrogatories.”); *Lucero v. Valdez*, 240 F.R.D. 591, 594 (D.N.M.
23 2007) (“Contention interrogatories should not require a party to provide the
24 equivalent of a narrative account of its case, including every evidentiary fact, details
25 of testimony of supporting witnesses, and the contents of supporting documents.”);
26 *Aldapa v. Fowler Packing Co. Inc.*, 310 F.R.D. 583, 591 (E.D. Cal. 2015).

27 The United States further objects that the Interrogatory calls for the disclosure
28 of information protected by privilege, insofar as it requests the identification of

1 evidence upon which the United States relies or intends to rely, which is protected by
2 the attorney work product doctrine. The United States further objects to this
3 Interrogatory on the ground that it is premature given that discovery is ongoing and
4 the material facts and evidence in this case are still being developed through
5 discovery. The United States further objects to this Interrogatory on the ground that
6 it is not required to identify its trial witnesses and exhibits at this stage in the
7 litigation, and will identify its evidence in accordance with the Federal Rules, and it is
8 not obligated to, and will not, identify “all evidence” in response to this Interrogatory.
9 By responding to this Interrogatory, the United States does not represent that it has
10 identified all material facts related to the topics requested, and reserves the right to
11 supplement or amend its responses and objections to this Interrogatory if it discovers
12 new, relevant, and responsive information. The United States further objects to this
13 Interrogatory on the ground that it calls for materials protected from disclosure by the
14 Order Granting Stipulation Regarding Expert Discovery entered by the Court on May
15 17, 2018, Dkt. 233. The United States further objects to this Interrogatory to the
16 extent it seeks the premature disclosure of expert opinion testimony, which is outside
17 the scope of a proper contention interrogatory.

18 **Response:** Subject to and without waiving the foregoing objections, the United
19 States responds as follows. Every Diagnosis Code included in the United States’
20 response to Interrogatory 1 was submitted to UnitedHealth as part of a claim from or
21 beneficiary encounter with a provider (“Provider Claim or Encounter”) and later
22 submitted by UnitedHealth to CMS for risk adjustment purposes. The medical
23 records associated with the Provider Claim or Encounter for every Diagnosis Code
24 included in the United States’ response to Interrogatory 1 were reviewed in
25 UnitedHealth’s process of reviewing medical records and abstracting or identifying
26 Diagnosis Codes for the purpose of submitting additional Diagnosis Codes to CMS
27 for risk adjustment payments (“Chart Review” or “Chart Review Program”). For
28 every Diagnosis Code included in the United States’ response to Interrogatory 1,

1 UnitedHealth's Chart Review did not identify that Diagnosis Code as one that was
2 supported by that medical record after review.

3 In its Chart Review Program, UnitedHealth instructed its Chart Review coders
4 to look for all medical conditions purportedly documented in the records, record all
5 Diagnosis Codes identifying those conditions, and report all of those Diagnosis Codes
6 to UnitedHealth. UnitedHealth coders were trained, qualified, and/or certified to
7 accurately identify Diagnosis Codes supported by the medical record, in accordance
8 with the Ninth or the Tenth Edition of the *International Classification of Diseases*
9 *(ICD) Clinical Modification Guidelines for Coding and Reporting* ("ICD
10 Guidelines"). UnitedHealth relied on its coders' accuracy to submit to CMS
11 Diagnosis Codes that were supported by the medical record but were not previously
12 submitted to UnitedHealth based on a Provider Claim or Encounter. UnitedHealth
13 attested to the validity of all of these additional submitted Diagnosis Codes based on
14 its Chart Review results. UnitedHealth's coders were required to meet quality
15 benchmarks of at least 95% for accuracy—defined as completeness in identifying all
16 risk adjusting Diagnosis Codes that were supported by the medical record in
17 accordance with ICD Guidelines—when reviewing and coding a medical record.

18 UnitedHealth conducted additional medical record reviews (through Quality
19 Assurance programs, Recode projects, Claims Verification, etc.) of many of the
20 medical records associated with Diagnosis Codes included in the United States'
21 response to Interrogatory 1. For example, in UnitedHealth's "Recode Project,"
22 UnitedHealth re-reviewed medical records that had already been through the Chart
23 Review Program. In the Recode Project, UnitedHealth liberalized its coding
24 standards in order to identify additional Diagnosis Codes that had not been submitted
25 by the provider, nor been found during Chart Review. None of these additional
26 medical record reviews found support in the beneficiary's medical records for any of
27 the Diagnosis Codes included in the United States' response to Interrogatory 1.

28 The United States will supplement its response to this Interrogatory as

1 appropriate.

2 **INTERROGATORY NO. 3:** For each Diagnosis Code You identified in response
3 to UHC of California's First Interrogatory, state in detail every material fact relating
4 to Your contention that UnitedHealth had Knowledge that these Diagnosis Codes
5 were "not supported by the beneficiaries' medical records," "false," or "invalid,"
6 including but not limited to the specific individuals at UnitedHealth who You contend
7 had such Knowledge. United States' Am. Compl. ¶¶ 103, 342, Dkt. 171.

8 **Objections:** The United States incorporates by reference each of its General
9 Objections and Specific Objections to the Definitions and Instructions as if stated
10 herein. The United States objects to this Interrogatory as overly broad and unduly
11 burdensome to the extent it improperly requires the United States to "state in detail
12 every material fact" of its evidentiary case. *See Tubbs v. Sacramento Cty. Jail*, No.
13 CIVS060280LKKGGHP, 2008 WL 863974, at *1 (E.D. Cal. Mar. 28, 2008) ("Each
14 and every fact' interrogatories pose problems for a responding party and a reviewing
15 court. Parties are not tasked with laying out every jot and tittle of their evidentiary
16 case in response to interrogatories."); *Lucero v. Valdez*, 240 F.R.D. 591, 594 (D.N.M.
17 2007) ("Contention interrogatories should not require a party to provide the
18 equivalent of a narrative account of its case, including every evidentiary fact, details
19 of testimony of supporting witnesses, and the contents of supporting documents.");
20 *Aldapa v. Fowler Packing Co. Inc.*, 310 F.R.D. 583, 591 (E.D. Cal. 2015).

21 The United States further objects to this Interrogatory on the ground that it is
22 premature given that discovery is ongoing and the material facts in this case are still
23 being developed through discovery. By responding to this Interrogatory, the United
24 States does not represent that it has identified every material fact related to the topics
25 requested, and reserves the right to supplement or amend its responses and objections
26 to this Interrogatory if it discovers new, relevant, and responsive information. The
27 United States further objects to this Interrogatory on the ground that it calls for
28 materials protected from disclosure by the Order Granting Stipulation Regarding

1 Expert Discovery entered by the Court on May 17, 2018, Dkt. 233. The United
2 States further objects to this Interrogatory to the extent it seeks the premature
3 disclosure of expert opinion testimony, which is outside the scope of a proper
4 contention interrogatory.

5 The United States also objects to this Interrogatory on the ground that it is
6 really two separate interrogatories—one seeking material facts underlying a
7 contention and another seeking the identity of knowledgeable witnesses. *See Safeco*
8 *of Am. v. Rawstron*, 181 F.R.D. 441, 445 (C.D. Cal. 1998); *see also Ott v. Mortg.*
9 *Inv'rs Corp. of Ohio*, No. 3:14-CV-00645-ST, 2015 WL 691643, at *1 (D. Or. Feb.
10 17, 2015) (“[O]nce a subpart of an interrogatory introduces a line of inquiry that is
11 separate and distinct from the inquiry made by the portion of the interrogatory that
12 precedes it, the subpart must be considered a separate interrogatory no matter how it
13 is designated.”). The Interrogatory requests that the United States: (1) identify “every
14 material fact relating to [the United States’] contention that UnitedHealth had
15 Knowledge that these Diagnosis Codes were ‘not supported by the beneficiaries’
16 medical records,’ ‘false,’ or ‘invalid,’” and (2) identify “the specific individuals at
17 UnitedHealth who [the United States] contend[s] had such Knowledge.”
18 UnitedHealth has therefore issued at least four interrogatories out of the 25
19 interrogatories permitted under the Federal Rules. By responding to this
20 Interrogatory, the United States in no way waives its right to object if UnitedHealth
21 exceeds the maximum number of permitted interrogatories.

22 The United States objects to this Interrogatory as premature, in that it requires
23 the United States to identify individuals who had Knowledge of relevant facts prior to
24 the completion of fact discovery, and in particular prior to the depositions of
25 UnitedHealth and individual witnesses under Federal Rule of Civil Procedure 30.
26 The United States will supplement its response to this Interrogatory as appropriate.
27 **Response:** Subject to and without waiving the foregoing objections, the United
28 States hereby incorporates its response to Interrogatory 2 into this response and

1 further states that UnitedHealth had Knowledge, as defined by 31 U.S.C. §
2 3729(b)(1)(A), of all of the facts set forth in the United States' response to
3 Interrogatory 2. In addition, UnitedHealth designed, implemented, and maintained
4 the database systems that contained all of the information necessary to determine that
5 Diagnosis Codes it had previously submitted to CMS were not found by
6 UnitedHealth's coders to have support in the beneficiaries' medical records, and
7 UnitedHealth deliberately ignored or recklessly disregarded the information in its
8 own databases. UnitedHealth received and maintained data from Provider Claims
9 and Encounters and also maintained the data containing the results of its Chart
10 Review Program. UnitedHealth had the ability to compare the results of every Chart
11 Review to the diagnosis data UnitedHealth had received from Provider Claims and
12 Encounters and then submitted to CMS for risk adjustment. UnitedHealth was able
13 to, and frequently did, analyze its Chart Review data to assess whether an HCC was
14 unique as to a specific beneficiary in a specific DOS year. UnitedHealth had
15 Knowledge that it must act in good faith and exercise due diligence in its submission
16 of Diagnosis Codes to CMS, and that it must, and did, expressly certify that the
17 Diagnosis Codes it submits for risk adjustment payments are accurate and truthful to
18 the best of its Knowledge. UnitedHealth did not review the results of its Chart
19 Review program in good faith or exercise due diligence in order to obtain and submit
20 true and accurate risk adjustment data to CMS. Instead, UnitedHealth systematically
21 and deliberately ignored the results of Chart Reviews that showed that Diagnosis
22 Codes received by UnitedHealth from Provider Claims and Encounters and then
23 submitted to CMS were not supported by the beneficiaries' medical records.
24 UnitedHealth knowingly and improperly avoided comparing the Diagnosis Codes
25 from Provider Claims and Encounters submitted by UnitedHealth to CMS for risk
26 adjustment with the results of Chart Review. UnitedHealth acted with reckless
27 disregard or deliberate ignorance of the truth or falsity of whether the Diagnosis
28 Codes it had submitted to CMS for risk adjustment were supported by the

1 beneficiaries' medical records.

2 UnitedHealth designed the Chart Review program at issue, and had Knowledge
3 of all relevant facts about the Chart Review program, including that UnitedHealth
4 instructed its Chart Review coders to look for all medical conditions purportedly
5 documented in the medical records, record all Diagnosis Codes identifying those
6 conditions, and report all of those Diagnosis Codes to UnitedHealth. UnitedHealth
7 therefore had Knowledge that every Diagnosis Codes included in the United States'
8 response to Interrogatory 1 was not found to be supported by any review of the
9 medical records. Nor has UnitedHealth contended that any of the Diagnosis Codes
10 included in the United States' response to Interrogatory 1 was in fact supported by a
11 medical record. UnitedHealth had Knowledge that its Claims Verification program
12 and other internal audit programs demonstrated that many Diagnosis Codes
13 UnitedHealth received from Provider Claims and Encounters and submitted to CMS
14 for risk adjustment were not found to have support in a medical record. Furthermore,
15 UnitedHealth had Knowledge that CMS's Risk Adjustment Data Validation audits of
16 select UnitedHealth Medicare Advantage Plans as well as HHS-OIG's Risk
17 Adjustment Data Validation audits of Pacificare of Texas and Pacificare of California
18 demonstrated that many Diagnosis Codes UnitedHealth received from Provider
19 Claims and Encounters and submitted to CMS for risk adjustment were not supported
20 by a medical record. From its own Internal Data Validation ("IDV") Program and
21 Risk Adjustment Coding Compliance Review ("RACCR"), UnitedHealth also had
22 Knowledge of inaccuracies in the Diagnosis Codes it received from Provider Claims
23 and Encounters, which UnitedHealth in turn submitted to CMS for risk adjustment.
24 UnitedHealth recklessly disregarded and deliberately ignored that IDV and RACCR
25 showed that significant percentages of the Diagnosis Codes reported to UnitedHealth
26 from Provider Claims and Encounters were not supported by the beneficiaries'
27 medical records.

28 Answering now the second and distinct part of this Interrogatory, the United

1 States states that the following UnitedHealth individuals have such Knowledge in that
2 they acted with actual knowledge, deliberate ignorance, or reckless disregard of the
3 truth or falsity of whether the Diagnosis Codes included in the United States'
4 response to Interrogatory 1 were supported by the beneficiaries' medical records:

10 The United States will supplement its response to this Interrogatory as appropriate.

11 **INTERROGATORY NO. 4:** State in detail every material fact Concerning Your
12 contention that UnitedHealth had Knowledge of “overpayments based on invalid
13 diagnoses,” United States’ Am. Compl. ¶ 342, Dkt. 171, including but not limited to
14 the specific individuals at UnitedHealth who You contend had such Knowledge.

15 **Objections:** The United States incorporates by reference each of its General
16 Objections and Specific Objections to the Definitions and Instructions as if stated
17 herein. The United States objects to this Interrogatory as overly broad and unduly
18 burdensome to the extent it improperly requires the United States to “state in detail
19 every material fact” of its evidentiary case. *See Tubbs v. Sacramento Cty. Jail*, No.
20 CIVS060280LKKGGHP, 2008 WL 863974, at *1 (E.D. Cal. Mar. 28, 2008) (“‘Each
21 and every fact’ interrogatories pose problems for a responding party and a reviewing
22 court. Parties are not tasked with laying out every jot and tittle of their evidentiary
23 case in response to interrogatories.”); *Lucero v. Valdez*, 240 F.R.D. 591, 594 (D.N.M.
24 2007) (“Contention interrogatories should not require a party to provide the
25 equivalent of a narrative account of its case, including every evidentiary fact, details
26 of testimony of supporting witnesses, and the contents of supporting documents.”);
27 *Aldapa v. Fowler Packing Co. Inc.*, 310 F.R.D. 583, 591 (E.D. Cal. 2015).

28 The United States further objects to this Interrogatory on the ground that it is

1 premature given that discovery is ongoing and the material facts in this case are still
2 being developed through discovery. By responding to this Interrogatory, the United
3 States does not represent that it has identified every material fact related to the topics
4 requested, and reserves the right to supplement or amend its responses and objections
5 to this Interrogatory if it discovers new, relevant, and responsive information. The
6 United States further objects to this Interrogatory on the ground that it calls for
7 materials protected from disclosure by the Order Granting Stipulation Regarding
8 Expert Discovery entered by the Court on May 17, 2018, Dkt. 233. The United
9 States further objects to this Interrogatory to the extent it seeks the premature
10 disclosure of expert opinion testimony, which is outside the scope of a proper
11 contention interrogatory.

12 The United States also objects to this Interrogatory on the ground that it is
13 really two separate interrogatories—one seeking material facts underlying a
14 contention and another seeking the identity of knowledgeable witnesses. *See Safeco*
15 *of Am. v. Rawstron*, 181 F.R.D. 441, 445 (C.D. Cal. 1998); *see also Ott v. Mortg.*
16 *Inv'rs Corp. of Ohio*, No. 3:14-CV-00645-ST, 2015 WL 691643, at *1 (D. Or. Feb.
17 17, 2015) (“[O]nce a subpart of an interrogatory introduces a line of inquiry that is
18 separate and distinct from the inquiry made by the portion of the interrogatory that
19 precedes it, the subpart must be considered a separate interrogatory no matter how it
20 is designated.”); *McCarthy v. Paine Webber Grp., Inc.*, 168 F.R.D. 448, 450 (D.
21 Conn. 1996) (observing that contention interrogatories “are distinct from
22 interrogatories that request identification of witnesses or documents that bear on the
23 allegations” (citing *In re Convergent Technologies Securities Litig.*, 108 F.R.D. 328,
24 332-33 (N.D. Cal. 1985)). The Interrogatory requests that the United States: (1)
25 identify “every material fact Concerning [the United States’] contention that
26 UnitedHealth had Knowledge of ‘overpayments based on invalid diagnoses,’” and (2)
27 identify “the specific individuals at UnitedHealth who [the United States] contend[s]
28 had such Knowledge.” UnitedHealth has therefore issued at least six interrogatories

1 out of the 25 interrogatories permitted under the Federal Rules. By responding to this
2 Interrogatory, the United States in no way waives its right to object if UnitedHealth
3 exceeds the maximum number of permitted interrogatories.

4 The United States objects to this Interrogatory as premature, in that it requires
5 the United States to identify individuals who had Knowledge of relevant facts prior to
6 the completion of fact discovery, and in particular prior to the depositions of
7 UnitedHealth and individual witnesses under Fed. R. Civ. P. 30. The United States
8 will supplement its response to this Interrogatory as appropriate.

9 **Response:** Subject to and without waiving the foregoing objections, the United
10 States hereby incorporates its responses to Interrogatories 2 and 3 into this response
11 and further states that UnitedHealth had Knowledge, as defined by 31 U.S.C. §
12 3729(b)(1)(A), of all of the facts set forth in the United States' response to
13 Interrogatories 2 and 3. Furthermore, UnitedHealth had Knowledge that the
14 Diagnosis Codes it submitted to CMS for each beneficiary determined the risk
15 adjustment payment CMS made to UnitedHealth for that beneficiary. UnitedHealth
16 had Knowledge that the risk-adjusting Diagnosis Codes that it submitted for each
17 beneficiary increased the risk adjustment payment CMS made to UnitedHealth for
18 that beneficiary, and that the risk-adjusting Diagnosis Codes that UnitedHealth
19 submitted as deletes or otherwise removed or corrected would cause CMS to reduce
20 the risk adjustment payment it made to UnitedHealth for that beneficiary.
21 UnitedHealth further had Knowledge that CMS's risk adjustment program requires
22 data accuracy and that it is permitted to only submit Diagnosis Codes that are
23 supported by the beneficiaries' medical records, as evidenced by the design and
24 implementation of its Chart Review Program, which reviewed records for additional
25 supported Diagnosis Codes. UnitedHealth had Knowledge that it was not entitled to
26 receive or retain risk adjustment payments based on Diagnosis Codes that are not
27 supported by a beneficiary's medical record. UnitedHealth had Knowledge that it
28 must act in good faith and exercise due diligence in its submission of Diagnosis

1 Codes to CMS, and that it must, and did, expressly certify that the Diagnosis Codes it
2 submits for risk adjustment payments are accurate and truthful to the best of its
3 Knowledge. UnitedHealth had Knowledge that it was required to implement a
4 compliance program, which must include measures that prevent, detect, and correct
5 non-compliance with CMS's program requirements as well as measures that prevent,
6 detect, and correct fraud, waste, and abuse. UnitedHealth had Knowledge that it was
7 required to delete Diagnosis Codes that were not supported by the medical record.

8 The following UnitedHealth individuals have such Knowledge in that they
9 acted with actual knowledge, deliberate ignorance, or reckless disregard of the truth
10 or falsity of whether the UnitedHealth had improperly received or retained
11 overpayments based on the Diagnosis Codes included in the United States' response
12 to Interrogatory 1:

18 The United States will supplement its response to this Interrogatory as appropriate.

19 **INTERROGATORY NO. 5:** Separately for each of the years 2008 to 2017,
20 Identify all CMS Individuals and HHS-OIG Individuals who Believed or expressed in
21 writing that CMS would not have paid or continued entering into MA contracts with
22 UnitedHealth if CMS had known that UnitedHealth was not “compar[ing] all chart
23 reviews to the provider reported diagnoses and delet[ing] all of the invalid provider-
24 reported diagnoses that they previously had submitted to the Medicare Program.”
25 United States’ Am. Compl. ¶ 185, Dkt. 171.

26 **Objections:** The United States incorporates by reference each of its General
27 Objections and Specific Objections to the Definitions and Instructions as if stated
28 herein. The United States further objects that this Interrogatory is overly broad,

1 unduly burdensome, vague, confusing, and ambiguous. This Interrogatory is overly
2 broad and unduly burdensome because on its face it seeks to require the United States
3 to investigate the communications and beliefs of all of the thousands of current and
4 former CMS employees, current and former HHS-OIG employees, as well as current
5 and former CMS and HHS-OIG contractors, for a period of nearly a decade. This is
6 plainly unreasonable. The United States objects that the Interrogatory is
7 disproportionate to the needs of this case because the potential relevance is
8 outweighed by the enormous burden sought by the Interrogatory. Further, the United
9 States objects that this Interrogatory is irrelevant because Government agencies,
10 including CMS and HHS-OIG, act through official policy and regulations and not the
11 beliefs or impressions of individual government agency employees. For the purposes
12 of responding to this Interrogatory, the United States has undertaken a reasonable
13 inquiry to identify information responsive to this Interrogatory, but objects to the
14 Interrogatory insofar as it purports to require the United States to identify “every”
15 CMS and HHS-OIG Individual who held a Belief and reiterates its statement that
16 CMS and HHS-OIG only act through official policy and regulations, not through the
17 private Beliefs of its employees. The United States’ Response to this Interrogatory
18 should not be interpreted or construed to represent or otherwise reflect the official
19 position of CMS or HHS-OIG.

20 The United States objects to the inclusion of current and former HHS-OIG
21 employees and contractors as irrelevant because, as the language of the Interrogatory
22 itself recognizes, it is CMS that makes MA payment and contract decisions, and
23 HHS-OIG does not make Risk Adjustment payment or contracting decisions. The
24 subjective beliefs and written expressions of HHS-OIG employees and/or contractors
25 about whether “CMS” would have paid or whether “CMS” would have entered into
26 contracts with UnitedHealth is not relevant to any claim or defense in this case.
27 Therefore, for purposes of responding to this Interrogatory, the United States will not
28 include “HHS-OIG Individuals.”

1 The United States further objects to the Interrogatory in that it asks the United
2 States to search every piece of writing by a given individual, to determine whether
3 they ever “expressed in writing” the topic sought by the Interrogatory. Such an
4 endeavor is overly broad, unduly burdensome, and not proportional to the needs of
5 the case. Moreover, the United States reiterates that any such writings, if they exist,
6 do not reflect the official position of CMS or HHS-OIG. The United States therefore
7 interprets “expressed in writing” to mean official and public pronouncements on
8 behalf of CMS.

9 The United States objects to this Interrogatory to the extent that it seeks
10 information from after May 16, 2017, the parties’ agreed-upon discovery cut-off. For
11 the purposes of responding to this Interrogatory, the United States interprets this
12 Interrogatory as seeking information only up to May 16, 2017. The United States
13 also objects to this Interrogatory as vague, confusing, and ambiguous because it
14 requires CMS individuals to recall whether they held beliefs or made written
15 statements speculating about what “CMS” would or would not have done in the
16 specified years based on information that the agency did not possess in those years.

17 The United States further objects on the ground that the Interrogatory is vague,
18 confusing, and unduly burdensome because it seeks a separate answer for each year
19 for what an individual “Believed” at the time and to the extent the Interrogatory
20 requires the United States to determine, year by year from 2008–2017, when a given
21 Belief began or ended. For the purpose of responding to this Interrogatory, the
22 United States will interpret “Believed” to mean that the personal belief was held at
23 some point during the relevant time period.

24 The United States further objects that this Interrogatory is vague, confusing,
25 and ambiguous because the phrase “that CMS would not have paid” is undefined and
26 unclear. Because the Interrogatory places no limitation on the phrase “would not
27 have paid,” the United States interprets that phrase to mean that CMS would not have
28 made any payments to UnitedHealth for any plans and any beneficiaries, regardless

1 of whether the beneficiaries were the subject of Chart Reviews and regardless of
2 whether the diagnoses submitted by UnitedHealth were supported or unsupported.
3 The United States further objects that this Interrogatory is vague, confusing, and
4 ambiguous because the phrase “would not have . . . continued entering into MA
5 contracts with UnitedHealth” is undefined and unclear. Because the Interrogatory
6 places no limitation on the phrase “would not have . . . continued entering into MA
7 contracts,” the United States interprets that phrase to mean that CMS would have
8 terminated all existing contracts and ceased entering into any new MA contracts with
9 UnitedHealth.

10 The United States objects that this Interrogatory is vague, confusing, and
11 ambiguous because it cites one sentence from one paragraph of the United States’
12 Amended Complaint and incorrectly contorts it into a distorted version of the United
13 States’ theory of UnitedHealth’s liability under the False Claims Act. The United
14 States alleges that UnitedHealth failed to delete invalid diagnosis codes that it had
15 Knowledge (as defined by the False Claims Act) were not supported by medical
16 records, and therefore knowingly avoided its obligation to pay CMS. This
17 Interrogatory is vague, ambiguous, confusing, and irrelevant because it focuses on the
18 design of UnitedHealth’s Chart Reviews rather than on UnitedHealth’s failure to
19 delete known invalid diagnosis codes. *See* MTD Order, Dkt. 212 at 21 (“As the
20 Government argues, the issue here is not the one-way Chart Review generally, but the
21 specific invalid diagnosis codes that Defendants submitted and failed to delete despite
22 information available to them.”). The United States objects to this Interrogatory as
23 inaccurate, improper, and misleading to the extent that it implies or suggests that the
24 United States’ Amended Complaint alleges that particular CMS Individuals held the
25 belief that CMS should terminate payments to or cease continuing to enter into MA
26 contracts with UnitedHealth when the cited portion of the complaint merely alleges in
27 part that “Defendants should and could have compared the results of *all* Chart
28 Reviews to the provider-reported diagnoses and deleted all of the invalid provider-

1 reported diagnoses that they previously had submitted to the Medicare Program.”
2 Am. Compl. ¶ 185, Dkt. 171.

3 The United States objects to this Interrogatory to the extent that it implies a
4 legal conclusion. Specifically, the United States objects to this Interrogatory as being
5 irrelevant and contrary to law insofar as it implies or suggests that termination of
6 payment or discontinuance of contracts is a requirement of materiality under the False
7 Claims Act. It is not. See MTD Order, Dkt. 212, at 20–21 (“[t]he Government has
8 adequately pled facts showing that the Defendants have knowingly avoided
9 obligations to repay CMS by failing to delete invalid diagnosis codes, and that such
10 failure was material”); see also *United States ex rel. Campie v. Gilead Sciences, Inc.*,
11 862 F.3d 890, 906 (9th Cir. 2017). This Interrogatory is vague, confusing, and
12 ambiguous because it mischaracterizes the United States’ position regarding
13 materiality under the False Claims Act, which is set forth in its Opposition to the
14 Motion to Dismiss, Dkt 194.

15 The United States further objects to this Interrogatory to the extent that it seeks
16 information protected from disclosure by an applicable privilege or protection.

17 **Response:** Subject to and without waiving the foregoing objections, the United
18 States responds that based on the information available, separately for each year in
19 the period 2008 through 2017, it has not identified any CMS individuals who
20 believed or expressed in writing that CMS would have stopped all payments to
21 UnitedHealth for all beneficiaries (whether or not their charts were reviewed) and all
22 diagnoses (whether those diagnoses were supported and unsupported) or would have
23 terminated all contracts with UnitedHealth and ceased entering into new contracts
24 with UnitedHealth if CMS had known that UnitedHealth was not “compar[ing] all
25 chart reviews to the provider reported diagnoses and delet[ing] all of the invalid
26 provider-reported diagnoses that they previously had submitted to the Medicare
27 Program.” The United States further responds that UnitedHealth led CMS to believe
28 that UnitedHealth was not deliberately ignoring the negative results of its Chart

1 Review Program that showed UnitedHealth that diagnoses it had submitted to CMS
2 for payment were invalid. CMS had no actual knowledge of the specific invalid
3 diagnosis codes submitted by UnitedHealth until the United States pursued its
4 investigation of the matter underlying this litigation. In this case, CMS is pursuing
5 the overpayments associated with the invalid diagnoses uncovered in the United
6 States' investigation. The United States will supplement its response to this
7 Interrogatory as appropriate.

8 **INTERROGATORY NO. 6:** For each CMS Individual or HHS-OIG Individual
9 who participated in or was involved in—including but not limited to drafting,
10 analyzing, revising, commenting on, or reviewing—the Study Underlying CMS's
11 Proposed Rule, provide a description, including the Time Period, of his or her
12 participation or involvement. This Interrogatory should be construed to cover the time
13 period January 1, 2004 to June 30, 2019.

14 **Objections:** The United States incorporates by reference each of its General
15 Objections and Specific Objections to the Definitions and Instructions as if stated
16 herein. The United States objects to the time period of this Interrogatory to the extent
17 it goes beyond the publication date (November 1, 2018) of the Study Underlying
18 CMS's Proposed Rule as overbroad, unduly burdensome, and irrelevant. Identifying
19 individuals who reviewed the Study Underlying CMS's Proposed Rule after it was
20 published has no bearing on the pre-publication development of the Study. Consistent
21 with its Objections to Definitions 3, 10, and 11, the United States interprets this
22 Interrogatory to exclude attorneys and is not searching for, collecting, or providing
23 information or materials from any attorney within OGC, OCIG, or DOJ.

24 **Response:** Subject to and without waiving the foregoing objections, the United
25 States responds as follows:

- 26 • The following individuals reviewed the Study: Jennifer Lazio (October 2017–
27 November 1, 2018); Jennifer Harlow (July 2018–November 1, 2018); Joanne
28 Davis (January 2018–October 2018); Carolyn Kapustij (May 2018–October

2018).

- The following individuals reviewed and commented on the Study: Delois J. Newkirk (2017–November 1, 2018); Blake Pelzer (September 2018–November 1, 2018); Paul Spitalnic (October 2017–November 1, 2018); Richard Coyle (September 2018); Abby Woodroffe (March 2018); Jesse Levy (March 2018).
- The following individuals conducted analysis for the Study: Michelle Hill (2017—November 1, 2018); Richard Griffith (June 2018 to August 2018).
- The following individuals drafted, analyzed, revised, commented on, and reviewed the Study: Jonathan Smith (January 2017–November 1, 2018), Hans Dutt (January 2017–November 1, 2018).

The United States will supplement its response to this Interrogatory as appropriate.

INTERROGATORY NO. 7: Separately for each of the years 2008 to 2017, Identify all CMS Individuals and HHS-OIG Individuals who Believed or expressed in writing that the existence of unsupported codes in CMS’s FFS Medicare data has the capacity to impact Risk Adjustment payments to MA Plans.

Objections: The United States incorporates by reference each of its General Objections and Specific Objections to the Definitions and Instructions as if stated herein. The United States objects to this Interrogatory as overly broad, unduly burdensome, vague, confusing, and ambiguous. This Interrogatory is overly broad and unduly burdensome because on its face it seeks to require the United States to investigate the communications and beliefs of all of the thousands of current and former CMS employees, current and former HHS-OIG employees, as well as current and former CMS and HHS-OIG contractors for a period of nearly a decade. This is plainly unreasonable. The United States objects that the Interrogatory is disproportionate to the needs of this case because the potential relevance is outweighed by the enormous burden sought by the Interrogatory. Further, the United States objects that this Interrogatory is irrelevant because Government agencies, including CMS and HHS-OIG, act through official policy and regulations and not the

1 beliefs or impressions of individual government agency employees. For the purposes
2 of responding to this Interrogatory, the United States has undertaken a reasonable
3 inquiry to identify information responsive to this Interrogatory, but objects to the
4 Interrogatory insofar as it purports to require the United States to identify “every”
5 CMS and HHS-OIG individual who held a Belief and reiterates its statement that
6 CMS and HHS-OIG only act through official policy and regulations, not through the
7 private Beliefs of its employees. The inclusion of any individuals in response to this
8 Interrogatory should not be interpreted or construed to mean that these individuals
9 represent or otherwise reflect the official position of CMS or HHS-OIG.

10 The United States further objects to the Interrogatory in that it asks the United
11 States to search every piece of writing by a given individual, to determine whether
12 they ever “expressed in writing” the topic sought by the Interrogatory. Such an
13 endeavor is overly broad, unduly burdensome, and not proportional to the needs of
14 the case. Moreover, the United States reiterates that any such writings, if they exist,
15 do not reflect the official position of CMS or HHS-OIG. The United States therefore
16 interprets “expressed in writing” to mean official and public pronouncements on
17 behalf of CMS. The United States objects to this Interrogatory as irrelevant and
18 overly broad to the extent it seeks information about the beliefs and written
19 expressions of HHS-OIG employees and/or contractors because HHS-OIG does not
20 make Risk Adjustment payment decisions for CMS. Therefore, for purposes of
21 responding to this Interrogatory, the United States will not include “HHS-OIG
22 Individuals.”

23 The United States objects to this Interrogatory to the extent that it seeks
24 information from after May 16, 2017, the parties’ agreed-upon discovery cut-off. For
25 the purposes of responding to this Interrogatory, the United States interprets this
26 Interrogatory as seeking information only up to May 16, 2017.

27 The United States further objects on the ground that the Interrogatory is vague,
28 confusing, and unduly burdensome because it seeks a separate answer for each year

1 for what an individual “Believed” at the time and to the extent the Interrogatory
2 requires the United States to determine, year by year from 2008–2017, when a given
3 Belief began or ended. For the purpose of responding to this Interrogatory, the
4 United States will interpret “Believed” to mean that the belief was held at some point
5 during the relevant time period.

6 The United States further objects that the Interrogatory is vague and ambiguous
7 because the terms “codes,” “unsupported,” “existence,” “has the capacity to,” and
8 “impact” are not defined terms. The United States interprets “codes” to mean any
9 data element relevant to a claim when the claim is submitted to CMS for payment.
10 This includes but is not limited ICD-9 and ICD-10 Diagnosis Codes. The United
11 States interprets “unsupported” to mean, in the context of Diagnosis Codes, that
12 Diagnosis Codes were not supported by the medical record. The United States
13 interprets “existence” to mean that something was included in the coding in CMS’s
14 FFS Medicare claims data at the time the FFS data was incorporated into the CMS
15 HCC Risk Adjustment Model. The United States interprets “has the capacity to” to
16 mean that something could potentially, theoretically, or in principle, affect Risk
17 Adjustment payments, regardless of whether it did, in fact, affect Risk Adjustment
18 payments. The United States interprets the term “impact” to include any potential
19 effect whatsoever on Risk Adjustment payments, regardless of whether the effect was
20 significant or insignificant, and regardless of whether the effect resulted in a higher
21 payment or a lower payment to MA Plans.

22 **Response:** Subject to and without waiving the foregoing objections, the United
23 States identifies the following individuals who Believed or expressed in writing that
24 any inaccuracies, including but not limited to Diagnosis Codes supported by a
25 medical record that were not submitted to CMS or Diagnosis Codes that were
26 submitted to CMS but were not supported by a medical record, in Medicare Fee-For-
27 Service data that existed within that data when it was used to calibrate the Risk
28 Adjustment model, could potentially, theoretically, or in principle, have some effect

1 on the risk adjustment payments made to MA plans, whether the effect occurred in
2 fact or not, whether the Diagnosis Codes were risk adjusting or not, whether the risk
3 adjusting Diagnosis Code was unique or not (with “unique” meaning that the
4 Diagnosis Code was the only risk adjusting Diagnosis Code mapping to a given HCC
5 within the relevant Part C HCC Risk Adjustment Model for a given beneficiary in a
6 given date of service year), whether the effect on risk adjustment payments was
7 significant or not, whether the effect resulted in increased or decreased payments to
8 MA plans. Individuals who Believed or expressed this in writing include the
9 following:

- 10 • Jonathan Smith
- 11 • Cheri Rice
- 12 • Monica Reed Asante
- 13 • Rebecca Paul
- 14 • Ashley Franzel
- 15 • Jennifer Lazio
- 16 • Paul Spitalnic
- 17 • Blake Pelzer
- 18 • Carolyn Kapustij
- 19 • Jennifer Lazio
- 20 • Richard Coyle
- 21 • Jennifer Harlow
- 22 • Hans Dutt

23 The United States will supplement its response to this Interrogatory as appropriate.

24 **INTERROGATORY NO. 8:** Separately for each of the years 2008 to 2017, Identify
25 all CMS Individuals and HHS-OIG Individuals who drafted, revised, analyzed, or
26 commented on language included in CMS’s Announcements regarding Medicare
27 Advantage Capitation Rates and Medicare Advantage and Part D Payment Policies
28 indicating that MA organizations are coding “accurately” when they are coding in a

1 manner similar to or reflecting the coding used on the beneficiaries in FFS Medicare
2 to whom MA Plan enrollees are being compared. See, e.g., CMS's April 7, 2008,
3 April 6, 2009, and April 1, 2013 Announcements for Calendar Years (CYs) 2009,
4 2010, and 2014 Medicare Advantage Capitation Rates and Medicare Advantage and
5 Part D Payment Policies at 20, 20–21, and 30, respectively.

6 **Objections:** The United States incorporates by reference each of its General
7 Objections and Specific Objections to the Definitions and Instructions as if stated
8 herein. The United States objects to this Interrogatory as irrelevant to the extent that
9 the language referenced from CMS's Annual Announcements is not relevant to a
10 claim or defense in this case. The United States objects to this Interrogatory as
11 vague, confusing, and ambiguous because it mischaracterizes CMS's responses to
12 comments in the Annual Announcements. The United States further objects to this
13 Interrogatory as confusing, vague, and ambiguous to the extent that the Interrogatory
14 does not specifically state the language subject to the inquiry for each year. Further,
15 the United States objects that the Interrogatory's demand to provide information
16 separately for each of the years 2008–2017 is disproportionate to the needs of this
17 case because the potential relevance is outweighed by the enormous burden placed on
18 the United States by this request. Therefore, the United States will not provide the
19 requested information separately for each year.

20 The United States objects to this Interrogatory to the extent that it seeks
21 information from after May 16, 2017, the parties' agreed-upon discovery cut-off. For
22 the purposes of responding to this Interrogatory, the United States interprets this
23 Interrogatory as seeking information only up to May 16, 2017.

24 The United States further objects to this Interrogatory to the extent that it seeks
25 information protected from disclosure by an applicable privilege or protection.
26 Consistent with its Objections to Definitions 3, 10, and 11, the United States
27 interprets this Interrogatory to exclude attorneys and is not searching for, collecting,
28 or providing information or materials from any attorney within OGC, OCIG, or DOJ.

1 **Response:** Subject to and without waiving the foregoing objections, the United
2 States responds that after a reasonable inquiry, it has identified the following
3 individuals as responsive to the Interrogatory:

- 4 • Anne Calinger
- 5 • Ilina Chaudhuri
- 6 • Julie Gover
- 7 • Jennifer Harlow
- 8 • Anne Hornsby
- 9 • Joanne Kong
- 10 • Thomas Kornfield
- 11 • Rebecca Paul
- 12 • Monica Reed-Asante
- 13 • Cheri Rice
- 14 • Kay Schneider
- 15 • Julie Uebersax

16 The United States will supplement its response to this Interrogatory as appropriate.

17 **INTERROGATORY NO. 9:** Identify all CMS Individuals and HHS-OIG
18 Individuals who participated in or were involved—including but not limited to
19 drafting, developing, analyzing, revising, commenting on, reviewing, or issuing—
20 CMS's Proposed Medical Record Review Rule and the decision not to finalize the
21 Proposed Medical Record Review Rule articulated in the May 23, 2014 Final Rule.

22 **Objections:** The United States incorporates by reference each of its General
23 Objections and Specific Objections to Definitions set forth above. The United States
24 further objects that this Interrogatory is overly broad, unduly burdensome, vague,
25 confusing and ambiguous.

26 The United States also objects to this Interrogatory to the extent that it contains
27 multiple discrete subparts that count as separate Interrogatories. *See Safeco of Am. v.*
28 *Rawstron*, 181 F.R.D. 441, 445 (C.D. Cal. 1998); *see also Ott v. Mortg. Inv'rs Corp.*

1 of *Ohio*, No. 3:14-CV-00645-ST, 2015 WL 691643, at *1 (D. Or. Feb. 17, 2015)
2 (“[O]nce a subpart of an interrogatory introduces a line of inquiry that is separate and
3 distinct from the inquiry made by the portion of the interrogatory that precedes it, the
4 subpart must be considered a separate interrogatory no matter how it is designated.”).
5 The Interrogatory requests that the United States: (1) identify “all CMS Individuals
6 and HHS-OIG Individuals who participated in or were involved—including but not
7 limited to drafting, developing, analyzing, revising, commenting on, reviewing, or
8 issuing—CMS’s Proposed Medical Record Review Rule” and (2) identify all CMS
9 Individuals and HHS-OIG involved in “the decision not to finalize the Proposed
10 Medical Record Review Rule articulated in the May 23, 2014 Final Rule.”
11 UnitedHealth has therefore issued at least 12 interrogatories out of the 25
12 interrogatories permitted under the Federal Rules. By responding to this
13 Interrogatory, the United States in no way waives its right to object if UnitedHealth
14 exceeds the maximum number of permitted interrogatories.

15 The United States objects that this Interrogatory is vague and ambiguous
16 because the terms “participated in,” “involved,” “reviewing,” and “issuing” are not
17 defined terms. The United States will interpret each of these terms to have their
18 ordinary meaning. The United States interprets “participated in” and “involved” to
19 mean actively take part in something. The United States interprets “reviewing” to
20 mean examine something formally with the possibility or intention of instituting
21 change, if necessary. The United States interprets “issuing” to mean publishing in the
22 Federal Register official and public pronouncements on behalf of CMS. Based on
23 these objections, the United States will not identify any individuals who only
24 received the language of the proposed rule or individuals who were only involved in
25 the CMS clearance process of the entire rule to the extent those individuals are not
26 otherwise responsive to the Request as defined above.

27 The United States further objects to this Interrogatory to the extent that it seeks
28 information protected from disclosure by an applicable privilege or protection.

1 Consistent with its Objections to Definitions 3, 10, and 11, the United States
2 interprets this Interrogatory to exclude attorneys and is not searching for, collecting,
3 or providing information or materials from any attorney within OGC, OCIG, or DOJ.

4 **Response:** Subject to and without waiving the foregoing objections, the United
5 States responds that after a reasonable inquiry, it has identified the following
6 Individuals as responsive to the Interrogatory:

- 7 • Jon Blum
- 8 • Maricruz Bonfante
- 9 • Shawn Braxton
- 10 • Nora Castro
- 11 • Sean Cavanaugh
- 12 • Ilina Chaudhuri
- 13 • Tim Englehardt
- 14 • Kellie Simons (Gombeski)
- 15 • Julie Gover
- 16 • Jennifer Harlow
- 17 • Debra Hennessy
- 18 • Anne Hornsby
- 19 • Amanda Johnson
- 20 • Whitney Johnson
- 21 • Marie Manteuffel
- 22 • Christopher McClintick
- 23 • Cheri Rice
- 24 • Kay Schneider
- 25 • Marilyn Tavenner
- 26 • Cynthia Tudor
- 27 • Julie Uebersax
- 28 • Jim Wickliffe

1 The United States will supplement its response to this Interrogatory as appropriate.

UNITED STATES' RESPONSES AND
OBJECTIONS TO DEFENDANT UHC
OF CALIFORNIA'S REQUESTS FOR
ADMISSION TO THE GOVERNMENT
(SET NO. TWO)

PROPOUNDING PARTY: UHC OF CALIFORNIA, INC.

RESPONDING PARTY: UNITED STATES OF AMERICA

SET NUMBER: TWO

Preliminary Statement

Pursuant to Rules 26 and 36 of the Federal Rules of Civil Procedure (“Federal Rules”) and Rule 36 of the Local Civil Rules of the United States District Court for the Central District of California, the United States of America (“United States” or “government”), through its undersigned counsel, provides these responses and objections to Defendant UHC of California’s (“UnitedHealth” or “Defendant”) Requests for Admission (Set No. Two), dated August 27, 2019 (“Second Requests”). The objections and responses set forth herein are based on information now known to the United States and its undersigned attorneys, and will be revised, corrected, supplemented, amended, and clarified to the extent required by Rule 26 as discovery proceeds.

General Objections

The following objections apply to each and every separately numbered Request and are incorporated by reference to the extent applicable into the objection to each Request.

1. The United States objects to the Second Requests to the extent they are vague, ambiguous, overbroad, unduly burdensome, or seek to impose requirements upon the United States beyond those called for or permitted by the Federal Rules of Civil Procedure, the Local Civil Rules of the United States District Court for the Central District of California, or any order of the Court. The United States responds below pursuant to its obligations under the Federal Rules and the Local Civil Rules, namely that the United States has taken and is continuing to undertake reasonable efforts to identify information responsive to the Requests.

1 2. The United States objects to the Second Requests to the extent they seek the
2 disclosure of information concerning the United States' investigation of this matter as
3 well as the United States' investigation in *United States of America ex rel. Swoben v.*
4 *SCAN Health Plan, et al.*, CV 09-5013 (JEMx), 2017 U.S. Dist. LEXIS 174308 (C.D.
5 Cal. Oct. 5, 2017) ("Swoben"). This includes, but is not limited to, the United States'
6 investigative efforts, its assessments of facts and allegations, its deliberative
7 processes concerning actions taken regarding this matter and *Swoben*, and other
8 information generated before and after the commencement of both this litigation and
9 *Swoben*. The United States objects on the grounds that such information is
10 privileged, work product protected, not relevant to claims or defenses, and not
11 proportional to the needs of the case.

12 3. The United States objects to logging the following information withheld on the
13 basis of privilege regarding both this and the *Swoben* action: (a) communications
14 between or among attorneys at the United States Department of Justice (DOJ),
15 including, but not limited to, attorneys at DOJ's Civil Division and the United States
16 Attorneys' Offices both during the Government's pre-complaint investigation and
17 after the Government commenced action; (b) communications between or among
18 attorneys at DOJ and attorneys at the United States Department of Health & Human
19 Services (HHS) both during the Government's pre-complaint investigation and after
20 the Government commenced action; (c) communications between or among attorneys
21 at DOJ and counsel for Relator James Swoben and/or counsel for Relator Benjamin
22 Poehling during the Government's pre-complaint investigation and after the
23 Government commenced action; (d) work product or other privileged documents
24 generated by or sent to or from attorneys for DOJ, HHS, Relator James Swoben
25 and/or Relator Benjamin Poehling and any of agents or contractors for said attorneys
26 both during the Government's pre-complaint investigation and after the Government
27 commenced action. The United States asserts this objection on the grounds that such
28 effort would impose undue and extraordinary burdens on the United States, seek

1 information not relevant to the claims and defenses in this action, and be
2 disproportionate to the needs of this case.

3 4. Pursuant to Rule 36, any admissions contained herein are for purposes of the
4 present action only and shall not be taken as admissions for any other purpose,
5 including for purposes of any other case.

6 5. By making the accompanying responses and objections to Defendant's Second
7 Requests, the government does not waive, and hereby expressly reserves, its right to
8 assert any and all objections as to the admissibility of any documents, testimony, or
9 information into evidence in this action, or in any other proceedings, on any and all
10 grounds including, but not limited to, competency, relevancy, materiality, privilege,
11 or admissibility. Further, the government makes the responses and objections herein
12 without in any way implying that it considers the Second Requests to be relevant or
13 material to the subject matter of this action.

14 6. The United States objects to the below Second Requests to the extent that a
15 response to such Request requires disclosure of information protected from disclosure
16 by an applicable privilege or protection, including, but not limited to, the attorney-
17 client privilege, work product doctrine, deliberative process privilege, law
18 enforcement privilege, common interest privilege, or investigative files privilege, and
19 protections afforded by Fed. R. Civ. P. 26(b), or any other applicable privilege. The
20 United States will not respond in such a way as to disclose such protected
21 information, but inadvertent identification or disclosure of privileged information by
22 the United States shall not be a waiver of any applicable privilege. Under Federal
23 Rule of Evidence 502, Federal Rule of Civil Procedure 26(b)(5)(B), other related
24 sources of law, and the Court's order regarding inadvertent disclosure of privileged
25 information [Doc. 198], the government reserves any and all rights to claw back
26 privileged information it inadvertently discloses in response to the Requests.

27 7. The United States submits these responses subject to, without intending to
28 waive, but expressly reserving the right to object to other discovery procedures

1 involving or relating to the subject matter of the information in responses to the
2 Second Requests. The United States reserves the right to object on any ground, at any
3 time, to such other or supplemental requests as the Defendants may propound
4 involving or relating to the subject matter of these Requests.

5 8. The United States objects to the Second Requests to the extent they are based
6 on inaccurate assumptions or misstatements of fact or misconstructions of law.
7 Nothing herein is intended to concede the accuracy of the assumptions, facts, or law
8 underlying the Second Requests.

9 9. The United States reserves the right to supplement its responses to each and
10 every Request at any time, up to and including trial, as provided by the Federal Rules.

11 10. The assertion of the same, similar, or additional objections to the below
12 Second Requests does not and should not be construed to waive or modify any of the
13 United States' general objections.

14 11. The United States objects to the Second Requests to the extent they require
15 the United States to draw legal conclusions, comment on the merits of any affirmative
16 defenses, or otherwise seek to impose any requirements beyond those established by
17 the Federal Rules or the Local Rules.

18 **Specific Objections to the Definitions and Instructions**

19 The United States objects to the Definitions and Instructions to the extent they
20 (i) seek to impose burdens on the United States that are different from, inconsistent
21 with, or exceed those imposed by the Federal Rules of Civil Procedure and the Local
22 Civil Rules, (ii) are vague or ambiguous, and/or (iii) render the Second Requests
23 overly broad, unduly burdensome, not proportionate to the needs of the case, and not
24 relevant. The United States further objects to the Second Requests to the extent they
25 use terms not defined by UnitedHealth.

26 **Definitions 5, 9, and 14:** The United States objects to the definition of
27 "Government" (Definition 9) to the extent it includes any branch, agency,
28 department, agent, representative, contractor, attorney, consultant, or person acting on

1 its behalf not relevant to this action. This definition is plainly unreasonable. Subject
2 to and without waiving these objections, the United States interprets “Government” to
3 mean CMS for purposes of the Second Requests. The United States further objects to
4 the term “Person” (Definition 14) to the extent it is defined to mean “the federal
5 government and all departments and agencies thereof, state governments, local
6 governments, other governmental agencies.” The United States objects to the
7 definitions of “CMS” (Definition 5), “Government” (Definition 9), and “Person”
8 (Definition 14) as unduly burdensome and disproportionate to the needs of the case to
9 the extent they require the United States to provide information not currently in the
10 possession, custody, or control of CMS, HHS Office of the Secretary and Immediate
11 Office of the Secretary and HHS-OIG. Furthermore, the United States objects to the
12 extent each definition includes former CMS contractors for whom the United States
13 presently has no reasonable belief they possess or control non-duplicative information
14 relevant to any claim or defense in this case.

15 **Definitions 10 and 16:** The United States objects to the definitions of “including,”
16 “relating to,” and “regarding” as rendering the Second Requests vague, ambiguous,
17 confusing, overly broad, and unduly burdensome and disproportionate to the needs of
18 the case. Indeed, these terms as defined to seek any piece of information that in some
19 way – no matter how remote, indirect, or tangential – mentions or references matters
20 set forth in the Request. The United States responds to these Second Requests by
21 using these terms and the verbs constituting their definitions as limited by the
22 constraining adverb “directly.”

23 **Definition 11:** The United States objects to the definition of “March 2014 Meeting”
24 to the extent that it includes a specific date in March that has not been established by
25 the evidence in this matter.

26 **Definition 12:** The United States objects to the definition of “Spring 2014 Phone
27 Call” to the extent that it includes specific dates in March and April that have not
28 been established by the evidence in this matter.

1 **Definition 13:** The United States also objects to the definition of “Medicare
2 Advantage Organization” and “MAO” (Definition 13) to the extent it is inconsistent
3 with the definition provided by 42 U.S.C. § 1395w-28(a)(1). For the purpose of
4 responding to the Requests, the United States shall use the definition of MA Plans
5 provided by 42 U.S.C. § 1395w-28(b)(1) and the definition of MAO provided by 42
6 U.S.C. § 1395w-28(a)(1).

7 **Definition 18:** The United States objects to the definition of “State” to the extent it
8 seeks to impose burdens on the United States that are different from, inconsistent
9 with, or exceed those imposed by the Federal Rules of Civil Procedure and the Local
10 Civil Rules.

11 **Definition 22:** The United States objects to the definition of “you” and “your” to the
12 extent these terms are intend to encompass any agency, office, employee, agent,
13 representative, officer, or contractor of either the legislative or judicial branch, and
14 insofar as these terms are defined to include executive branch agencies and offices
15 not relevant to this action. This is plainly unreasonable. Subject to and without
16 waiving these objections, the United States will interpret this term to mean CMS.

17 **Instruction 3:** The United States objects to Instruction 3 as vague and construes
18 each request to include the time period from January 1, 2004 through May 16, 2017.

19 **Instructions 4:** The United States objects to Instruction 4 to the extent it seeks to
20 impose burdens upon the United States beyond those called for or permitted by the
21 Federal Rules or the Local Rules for the Central District of California. The United
22 States will respond to unobjectionable Requests or portions of Requests to the best of
23 its present ability. The United States submits these responses subject to, without
24 intending to waive, but expressly reserving the right to revise, correct, supplement or
25 clarify any of the responses herein at any time up to and including trial. Said
26 responses are at all times without prejudice subject to such additional or different
27 information that discovery or further investigation may disclose.

28 **Instruction 5:** The United States objects to Instruction 5 to the extent it seeks to

1 impose burdens upon the United States beyond those called for or permitted by the
2 Federal Rules or the Local Rules for the Central District of California.

3 **Instruction 6:** The United States objects to Instruction 6 to the extent it seeks to
4 impose burdens upon the United States beyond those called for or permitted by the
5 Federal Rules or the Local Rules for the Central District of California. The United
6 States will assert any applicable privileges and specify the material to which it applies
7 per Fed. R. Civ. P. 25(b)(5)(A) for all information responsive to a request to which
8 the United States has agreed to produce but which is withheld on the basis of a
9 privilege or protection.

Specific Objections and Responses to Requests for Admission

REQUEST FOR ADMISSION NO. 18: Admit that during the March 2014 Meeting, Jonathan Blum met Larry Renfro in person.

Objection: The United States incorporates its General Objections and Specific Objections to the Definitions and Instructions as if stated herein, including but not limited to, its specific objections to the definition of “March 2014 Meeting.” The United States objects to this Request to the extent it calls for information that is already in UnitedHealth’s possession, custody, or control, or is otherwise available to UnitedHealth and to the extent that UnitedHealth is using this information to mischaracterize or misinterpret the facts. The United States objects to this Request to the extent it seeks information not relevant to a claim or defense in this case.

Response: Subject to and without waiving the foregoing objections, including regarding the specific date implicated, the United States admits this Request.

REQUEST FOR ADMISSION NO. 19: Admit that Larry Renfro requested the March 2014 Meeting with Jonathan Blum.

Objection: The United States incorporates its General Objections and Specific Objections to the Definitions and Instructions as if stated herein, including but not limited to, its specific objections to the definition of “March 2014 Meeting.” The United States objects to this Request to the extent it calls for information that is already in UnitedHealth’s possession, custody, or control, or is otherwise available to UnitedHealth and to the extent that UnitedHealth is using this information to mischaracterize or misinterpret the facts. The United States objects to this Request to the extent it seeks information not relevant to a claim or defense in this case.

Response: Subject to and without waiving the foregoing objections, including regarding the specific date implicated, the United States admits this Request to the extent that Larry Renfro requested a meeting with Jonathan Blum during this general time frame although Mr. Blum did not know the topic of the requested meeting ahead of time.

1 **REQUEST FOR ADMISSION NO. 20:** Admit that the March 2014 Meeting
2 between Jonathan Blum and Larry Renfro took place in Washington, D.C.

3 **Objection:** The United States incorporates its General Objections and Specific
4 Objections to the Definitions and Instructions as if stated herein, including but not
5 limited to, its specific objections to the definition of “March 2014 Meeting.” The
6 United States objects to this Request to the extent it calls for information that is
7 already in UnitedHealth’s possession, custody, or control, or is otherwise available to
8 UnitedHealth and to the extent that UnitedHealth is using this information to
9 mischaracterize or misinterpret the facts. The United States objects to this Request to
10 the extent it seeks information not relevant to a claim or defense in this case.

11 **Response:** Subject to and without waiving the foregoing objections, including
12 regarding the specific date implicated, the United States admits this Request.

13 **REQUEST FOR ADMISSION NO. 21:** Admit that no other Person attended the
14 March 2014 Meeting between Jonathan Blum and Larry Renfro.

15 **Objection:** The United States incorporates its General Objections and Specific
16 Objections to the Definitions and Instructions as if stated herein, including but not
17 limited to, its specific objections to the definitions of “Person” and “March 2014
18 Meeting.” The United States objects to this Request to the extent it calls for
19 information that is already in UnitedHealth’s possession, custody, or control, or is
20 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
21 information to mischaracterize or misinterpret the facts. The United States objects to
22 this Request to the extent it seeks information not relevant to a claim or defense in
23 this case.

24 **Response:** Subject to and without waiving the foregoing objections, including
25 regarding the specific date implicated, the United States admits this Request.

26 **REQUEST FOR ADMISSION NO. 22:** Admit that Jonathan Blum took notes
27 during the March 2014 Meeting with Larry Renfro.

28 **Objection:** The United States incorporates its General Objections and Specific

1 Objections to the Definitions and Instructions as if stated herein, including but not
2 limited to, its specific objections to the definition of “March 2014 Meeting.” The
3 United States objects to this Request to the extent it calls for information that is
4 already in UnitedHealth’s possession, custody, or control, or is otherwise available to
5 UnitedHealth and to the extent that UnitedHealth is using this information to
6 mischaracterize or misinterpret the facts.

7 **Response:** Subject to and without waiving the foregoing objections, including
8 regarding the specific date implicated, the United States denies this Request.

9 **REQUEST FOR ADMISSION NO. 23:** Admit that after the March 2014
10 Meeting between Jonathan Blum and Larry Renfro, Jonathan Blum took notes about
11 or otherwise memorialized the meeting in writing.

12 **Objection:** The United States incorporates its General Objections and Specific
13 Objections to the Definitions and Instructions as if stated herein, including but not
14 limited to, its specific objections to the definition of “March 2014 Meeting.” The
15 United States also objects to this Request to the extent that the undefined phrase “or
16 otherwise memorialized” is vague and ambiguous. For the purposes of this Request,
17 the United States defines “memorialized” as put in writing.

18 **Response:** Subject to and without waiving the foregoing objections, including
19 regarding the specific date implicated, the United States denies this Request.

20 **REQUEST FOR ADMISSION NO. 24:** Admit that after the March 2014
21 Meeting between Jonathan Blum and Larry Renfro, Jonathan Blum had
22 Communications with the Government regarding the meeting.

23 **Objection:** The United States incorporates its General Objections and Specific
24 Objections to the Definitions and Instructions as if stated herein, including but not
25 limited to, its specific objections to the definitions of “March 2014 Meeting” and
26 “Government.” The United States objects to this Request to the extent it seeks
27 disclosure of information that is protected from disclosure by an applicable privilege
28 or protection, including the attorney-client privilege, attorney work-product doctrine,

1 deliberative process privilege, and/or investigative files privilege. For the purposes
2 of this Request, the United States will interpret the definition of “Government” to
3 include only CMS.

4 **Response:** Subject to and without waiving the foregoing objections, including
5 regarding the specific date implicated, the United States admits this Request.

6 **REQUEST FOR ADMISSION NO. 25:** Admit that during the March 2014
7 Meeting, Jonathan Blum discussed UnitedHealth’s Claims Verification Program with
8 Larry Renfro.

9 **Objection:** The United States incorporates its General Objections and Specific
10 Objections to the Definitions and Instructions as if stated herein, including but not
11 limited to, its specific objections to the definition of “March 2014 Meeting.” The
12 United States also objects to this Request to the extent that the undefined term
13 “discussed” is vague and ambiguous. For purposes of this Request, the United States
14 defines “discussed” as a back and forth conversation on a particular topic. The
15 United States further objects to this Request to extent it is duplicative of Requests for
16 Admission Nos. 29 and 30. The United States also objects to this Request to the
17 extent it calls for information that is already in UnitedHealth’s possession, custody, or
18 control, or is otherwise available to UnitedHealth and to the extent that UnitedHealth
19 is using this information to mischaracterize or misinterpret the facts.

20 **Response:** Subject to and without waiving the foregoing objections, including
21 regarding the specific date implicated, the United States denies this Request. To the
22 extent it is possible Larry Renfro raised the topic of Claims Verification at this time,
23 Jonathan Blum did not have a sufficient understanding of UnitedHealth’s processes to
24 engage in a discussion with Mr. Renfro.

25 **REQUEST FOR ADMISSION NO. 26:** Admit that during the March 2014
26 Meeting, Jonathan Blum discussed the Proposed Medical Record Review Rule with
27 Larry Renfro.

28 **Objection:** The United States incorporates its General Objections and Specific

1 Objections to the Definitions and Instructions as if stated herein, including but not
2 limited to, its specific objections to the definition of “March 2014 Meeting.” The
3 United States also objects to this Request to the extent that the undefined term
4 “discussed” is vague and ambiguous. For purposes of this Request, the United States
5 defines “discussed” as a back and forth conversation on a particular topic. The
6 United States also objects to this Request to the extent it calls for information that is
7 already in UnitedHealth’s possession, custody, or control, or is otherwise available to
8 UnitedHealth and to the extent that UnitedHealth is using this information to
9 mischaracterize or misinterpret the facts.

10 **Response:** Subject to and without waiving the foregoing objections, including
11 regarding the specific date implicated, the United States admits that Larry Renfro
12 asked Jonathan Blum for clarification regarding the Proposed Medical Record
13 Review Rule during their one-on-one meeting in approximately March 2014. The
14 United States denies the remainder of this Request.

15 **REQUEST FOR ADMISSION NO. 27:** Admit that during the March 2014
16 Meeting, Larry Renfro asked Jonathan Blum what new requirements the Proposed
17 Medical Record Review Rule would impose on MAOs.

18 **Objection:** The United States incorporates its General Objections and Specific
19 Objections to the Definitions and Instructions as if stated herein, including but not
20 limited to, its specific objections to the definition of “March 2014 Meeting” and
21 “MAO.” The United States objects to this Request to the extent it calls for
22 information that is already in UnitedHealth’s possession, custody, or control, or is
23 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
24 information to mischaracterize or misinterpret the facts. The United States objects to
25 this Request to the extent it calls for any legal conclusion.

26 **Response:** Subject to and without waiving the foregoing objections, including
27 regarding the specific date implicated, the United States admits that Larry Renfro
28 asked Jonathan Blum for clarification regarding the Proposed Medical Record

1 Review Rule during their one-on-one meeting in approximately March 2014.

2 **REQUEST FOR ADMISSION NO. 28:** Admit that during the March 2014
3 Meeting, Larry Renfro told Jonathan Blum that the Proposed Medical Record
4 Review Rule would require MAOs to conduct Two-Way Looks beginning January 1,
5 2015.

6 **Objection:** The United States incorporates its General Objections and Specific
7 Objections to the Definitions and Instructions as if stated herein, including but not
8 limited to, its specific objections to the definition of “March 2014 Meeting” and
9 “MAO.” The United States objects to this Request to the extent it calls for
10 information that is already in UnitedHealth’s possession, custody, or control, or is
11 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
12 information to mischaracterize or misinterpret the facts. The United States objects to
13 this Request to the extent it calls for any legal conclusion.

14 **Response:** Subject to and without waiving the foregoing objections, including
15 regarding the specific date implicated, the United States admits that Larry Renfro
16 asked Jonathan Blum for clarification regarding the Proposed Medical Record
17 Review Rule during their one-on-one meeting in approximately March 2014.
18 However, the United States responds that, after a reasonable inquiry, it lacks
19 sufficient information to admit or deny the remainder of this Request.

20 **REQUEST FOR ADMISSION NO. 29:** Admit that during the March 2014
21 Meeting, Larry Renfro told Jonathan Blum that UnitedHealth had been conducting a
22 Claims Verification Program.

23 **Objection:** The United States incorporates its General Objections and Specific
24 Objections to the Definitions and Instructions as if stated herein, including but not
25 limited to, its specific objections to the definition of “March 2014 Meeting.” The
26 United States objects to this Request to extent it is duplicative of Request for
27 Admission Nos. 25 and 30. The United States also objects to this Request to the
28 extent it calls for information that is already in UnitedHealth’s possession, custody, or

1 control, or is otherwise available to UnitedHealth and to the extent that UnitedHealth
2 is using this information to mischaracterize or misinterpret the facts.

3 **Response:** Subject to and without waiving the foregoing objections, including
4 regarding the specific date implicated, the United States responds that, after a
5 reasonable inquiry, it lacks sufficient information to admit or deny this Request. To
6 the extent it is possible Larry Renfro raised the topic of Claims Verification at this
7 time, Jonathan Blum did not have a sufficient understanding of UnitedHealth's
8 processes to engage in a discussion with Mr. Renfro.

9 **REQUEST FOR ADMISSION NO. 30:** Admit that during the March 2014
10 Meeting, Larry Renfro told Jonathan Blum that UnitedHealth had been conducting a
11 Claims Verification Program since approximately 2012.

12 **Objection:** The United States incorporates its General Objections and Specific
13 Objections to the Definitions and Instructions as if stated herein, including but not
14 limited to, its specific objections to the definition of "March 2014 Meeting." The
15 United States objects to this Request to extent it is duplicative of Request for
16 Admission Nos. 25 and 29. The United States also objects to this Request to the
17 extent it calls for information that is already in UnitedHealth's possession, custody, or
18 control, or is otherwise available to UnitedHealth and to the extent that UnitedHealth
19 is using this information to mischaracterize or misinterpret the facts.

20 **Response:** Subject to and without waiving the foregoing objections, including
21 regarding the specific date implicated, the United States responds that, after a
22 reasonable inquiry, it lacks sufficient information to admit or deny this Request. To
23 the extent it is possible Larry Renfro raised the topic of Claims Verification at this
24 time, Jonathan Blum did not have a sufficient understanding of UnitedHealth's
25 processes to engage in a discussion with Mr. Renfro.

26 **REQUEST FOR ADMISSION NO. 31:** Admit that during the March 2014
27 Meeting, Jonathan Blum told Larry Renfro there was no then-current requirement for
28 MAOs to conduct Two-Way Looks when conducting reviews of a Member's

1 medical records.

2 **Objection:** The United States incorporates its General Objections and Specific
3 Objections to the Definitions and Instructions as if stated herein, including but not
4 limited to, its specific objections to the definition of “March 2014 Meeting” and
5 “MAO.” The United States also objects to this Request to the extent that the
6 undefined phrase “reviews of a Member’s medical records” is vague and ambiguous.
7 The United States interprets this phrase to mean Chart Review for purposes of this
8 request. The United States objects to this Request to the extent it calls for
9 information that is already in UnitedHealth’s possession, custody, or control, or is
10 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
11 information to mischaracterize or misinterpret the facts. The United States objects to
12 this Request to the extent it calls for any legal conclusion.

13 **Response:** Subject to and without waiving the foregoing objections, including
14 regarding the specific date implicated, the United States denies this Request.

15 **REQUEST FOR ADMISSION NO. 32:** Admit that during the March 2014
16 Meeting, Larry Renfro asked Jonathan Blum whether UnitedHealth should conduct
17 its Claims Verification Program before the Proposed Medical Record Review Rule
18 took effect.

19 **Objection:** The United States incorporates its General Objections and Specific
20 Objections to the Definitions and Instructions as if stated herein, including but not
21 limited to, its specific objections to the definition of “March 2014 Meeting.” The
22 United States objects to this Request to the extent it calls for information that is
23 already in UnitedHealth’s possession, custody, or control, or is otherwise available to
24 UnitedHealth and to the extent that UnitedHealth is using this information to
25 mischaracterize or misinterpret the facts. The United States objects to this Request to
26 the extent it calls for any legal conclusion.

27 **Response:** Subject to and without waiving the foregoing objections, including
28 regarding the specific date implicated, the United States admits that Larry Renfro

1 asked Jonathan Blum for clarification regarding the Proposed Medical Record
2 Review Rule during their one-on-one meeting in approximately March 2014. To the
3 extent it is possible Larry Renfro raised the topic of Claims Verification at this time,
4 Jonathan Blum did not have a sufficient understanding of UnitedHealth's processes to
5 engage in a discussion with Mr. Renfro.

6 **REQUEST FOR ADMISSION NO. 33:** Admit that during the March 2014
7 Meeting, Larry Renfro asked Jonathan Blum whether UnitedHealth should conduct
8 Two-Way Looks when conducting reviews of a Member's medical records before
9 the Proposed Medical Record Review Rule took effect.

10 **Objection:** The United States incorporates its General Objections and Specific
11 Objections to the Definitions and Instructions as if stated herein, including but not
12 limited to, its specific objections to the definition of "March 2014 Meeting." The
13 United States also objects to this Request to the extent that the undefined phrase
14 "reviews of a Member's medical records" is vague and ambiguous. The United
15 States interprets this phrase to mean Chart Review for purposes of this request. The
16 United States objects to this Request to the extent it calls for information that is
17 already in UnitedHealth's possession, custody, or control, or is otherwise available to
18 UnitedHealth and to the extent that UnitedHealth is using this information to
19 mischaracterize or misinterpret the facts. The United States objects to this Request to
20 the extent it calls for any legal conclusion.

21 **Response:** Subject to and without waiving the foregoing objections, including
22 regarding the specific date implicated, the United States admits that Larry Renfro
23 asked Jonathan Blum for clarification regarding the Proposed Medical Record
24 Review Rule during their one-on-one meeting in approximately March 2014. To the
25 extent it is possible Larry Renfro raised the topic of UnitedHealth's Chart Review,
26 Jonathan Blum did not have a sufficient understanding of UnitedHealth's processes to
27 engage in a discussion with Mr. Renfro.

28 **REQUEST FOR ADMISSION NO. 34:** Admit that during the March 2014

1 Meeting, Jonathan Blum told Larry Renfro he would look into Renfro's question
2 about whether UnitedHealth should continue to conduct Two-Way Looks in its
3 Claims Verification Program before the Proposed Medical Record Review Rule went
4 into effect.

5 **Objection:** The United States incorporates its General Objections and Specific
6 Objections to the Definitions and Instructions as if stated herein, including but not
7 limited to, its specific objections to the definition of "March 2014 Meeting." The
8 United States also objects to this Request to the extent that the undefined phrases
9 "look into" and "continue" are vague and ambiguous. The United States objects to
10 this Request to the extent it calls for information that is already in UnitedHealth's
11 possession, custody, or control, or is otherwise available to UnitedHealth and to the
12 extent that UnitedHealth is using this information to mischaracterize or misinterpret
13 the facts. The United States objects to this Request to the extent it calls for any legal
14 conclusion.

15 **Response:** Subject to and without waiving the foregoing objections, including
16 regarding the specific date implicated, the United States admits that Jonathan Blum
17 agreed to follow-up with individuals from CMS's staff regarding Larry Renfro's
18 request for clarity regarding the Proposed Medical Record Review Rule. However,
19 the United States denies the remainder of this Request.

20 **REQUEST FOR ADMISSION NO. 35:** Admit that Jonathan Blum spoke to
21 Larry Renfro via telephone during the Spring 2014 Phone Call.

22 **Objection:** The United States incorporates its General Objections and Specific
23 Objections to the Definitions and Instructions as if stated herein, including but not
24 limited to, its specific objections to the definition of "Spring 2014 Phone Call." The
25 United States objects to this Request to the extent it calls for information that is
26 already in UnitedHealth's possession, custody, or control, or is otherwise available to
27 UnitedHealth and to the extent that UnitedHealth is using this information to
28 mischaracterize or misinterpret the facts.

1 **Response:** Subject to and without waiving the foregoing objections, including
2 regarding the specific date implicated, the United States admits this Request.

3 **REQUEST FOR ADMISSION NO. 36:** Admit that Jonathan Blum spoke to
4 Larry Renfro during the Spring 2014 Phone Call to discuss UnitedHealth's Claims
5 Verification Program.

6 **Objection:** The United States incorporates its General Objections and Specific
7 Objections to the Definitions and Instructions as if stated herein, including but not
8 limited to, its specific objections to the definition of "Spring 2014 Phone Call." The
9 United States also objects to this Request to the extent that the undefined term
10 "discuss" is vague and ambiguous. For purposes of this Request, the United States
11 defines "discuss" as a back and forth conversation on a particular topic. The United
12 States objects to this Request to the extent it calls for information that is already in
13 UnitedHealth's possession, custody, or control, or is otherwise available to
14 UnitedHealth and to the extent that UnitedHealth is using this information to
15 mischaracterize or misinterpret the facts.

16 **Response:** Subject to and without waiving the foregoing objections, including
17 regarding the specific date implicated, the United States admits that Jonathan Blum
18 spoke with Larry Renfro by telephone as a follow-up to their earlier in-person
19 meeting. However, to the extent it is possible Larry Renfro raised the topic of
20 UnitedHealth's Claims Verification Program, Jonathan Blum did not have a sufficient
21 understanding of UnitedHealth's processes to engage in a discussion with Mr.
22 Renfro.

23 **REQUEST FOR ADMISSION NO. 37:** Admit that Jonathan Blum spoke to
24 Larry Renfro during the Spring 2014 Phone Call to discuss conducting Two-Way
25 Looks when conducting reviews of a Member's medical records.

26 **Objection:** The United States incorporates its General Objections and Specific
27 Objections to the Definitions and Instructions as if stated herein, including but not
28 limited to, its specific objections to the definition of "Spring 2014 Phone Call." The

1 United States also objects to this Request to the extent that the undefined phrase
2 “reviews of a Member’s medical records” is vague and ambiguous. The United
3 States interprets this phrase to mean Chart Review for purposes of this request. The
4 United States also objects to this Request to the extent that the undefined term
5 “discuss” is vague and ambiguous. For purposes of this Request, the United States
6 defines “discuss” as a back and forth conversation on a particular topic. The United
7 States objects to this Request to the extent it calls for information that is already in
8 UnitedHealth’s possession, custody, or control, or is otherwise available to
9 UnitedHealth and to the extent that UnitedHealth is using this information to
10 mischaracterize or misinterpret the facts. The United States objects to this Request to
11 the extent it calls for any legal conclusion.

12 **Response:** Subject to and without waiving the foregoing objections, including
13 regarding the specific date implicated, the United States admits that Jonathan Blum
14 spoke with Larry Renfro by telephone as a follow-up to their earlier in-person
15 meeting. However, the United States denies the remainder of this Request.

16 **REQUEST FOR ADMISSION NO. 38:** Admit that Jonathan Blum took notes
17 during the Spring 2014 Phone Call.

18 **Objection:** The United States incorporates its General Objections and Specific
19 Objections to the Definitions and Instructions as if stated herein, including but not
20 limited to, its specific objections to the definition of “Spring 2014 Phone Call.”

21 **Response:** Subject to and without waiving the foregoing objections, including
22 regarding the specific date implicated, the United States denies this Request.

23 **REQUEST FOR ADMISSION NO. 39:** Admit that after the Spring 2014 Phone
24 Call, Jonathan Blum took notes about or otherwise memorialized the meeting in
25 writing.

26 **Objection:** The United States incorporates its General Objections and Specific
27 Objections to the Definitions and Instructions as if stated herein, including but not
28 limited to, its specific objections to the definition of “Spring 2014 Phone Call.” The

1 United States also objects to this Request to the extent that the undefined phrases “or
2 otherwise memorialized” and “the meeting” are vague and ambiguous. For the
3 purposes of this Request, the United States defines “memorialized” as put in writing
4 and “the meeting” as a phone call between Mr. Renfro and Mr. Blum in
5 approximately Spring 2014.

6 **Response:** Subject to and without waiving the foregoing objections, including
7 regarding the specific date implicated, after a reasonable inquiry, the United States
8 responds that it lacks sufficient information to admit or deny this Request. To the
9 extent the United States identifies any writing by Mr. Blum regarding the phone call
10 between Mr. Renfro and Mr. Blum in approximately Spring 2014, it will supplement
11 this Response.

12 **REQUEST FOR ADMISSION NO. 40:** Admit that after the Spring 2014 Phone
13 Call, Jonathan Blum had Communications with the Government about the Spring
14 2014 Phone Call.

15 **Objection:** The United States incorporates its General Objections and Specific
16 Objections to the Definitions and Instructions as if stated herein, including but not
17 limited to, its specific objections to the definition of “Spring 2014 Phone Call” and
18 “Government.” The United States objects to this Request to the extent it seeks
19 disclosure of information that is protected from disclosure by an applicable privilege
20 or protection, including the attorney-client privilege, attorney work-product doctrine,
21 deliberative process privilege, and/or investigative files privilege. For the purposes
22 of this Request, the United States will interpret the definition of “Government” to
23 include only CMS.

24 **Response:** Subject to and without waiving the foregoing objections, including
25 regarding the specific date implicated, after a reasonable inquiry, the United States
26 responds that it lacks sufficient information to admit or deny this Request.

27 **REQUEST FOR ADMISSION NO. 41:** Admit that no other Person from the
28 Government participated in the Spring 2014 Phone Call.

1 **Objection:** The United States incorporates its General Objections and Specific
2 Objections to the Definitions and Instructions as if stated herein, including but not
3 limited to, its specific objections to the definitions of “Spring 2014 Phone Call,”
4 “Government,” and “Person.” For the purposes of this Request, the United States
5 will interpret the definition of “Government” to include only CMS. The United
6 States objects to this Request to the extent it calls for information that is already in
7 UnitedHealth’s possession, custody, or control, or is otherwise available to
8 UnitedHealth and to the extent that UnitedHealth is using this information to
9 mischaracterize or misinterpret the facts.

10 **Response:** Subject to and without waiving the foregoing objections, including
11 regarding the specific date implicated, the United States admits this Request.

12 **REQUEST FOR ADMISSION NO. 42:** Admit that Jonathan Blum did not Audio
13 Record the Spring 2014 Phone Call.

14 **Objection:** The United States incorporates its General Objections and Specific
15 Objections to the Definitions and Instructions as if stated herein, including but not
16 limited to, its specific objections to the definition of “Spring 2014 Phone Call.”

17 **Response:** Subject to and without waiving the foregoing objections, including
18 regarding the specific date implicated, the United States admits this Request.

19 **REQUEST FOR ADMISSION NO. 43:** Admit that the Government did not
20 Audio Record the Spring 2014 Phone Call.

21 **Objection:** The United States incorporates its General Objections and Specific
22 Objections to the Definitions and Instructions as if stated herein, including but not
23 limited to, its specific objections to the definitions of “Spring 2014 Phone Call” and
24 “Government.” The United States further objects to this request because it is unduly
25 burdensome for the United States to determine the actions of all “agencies,
26 departments, components, agents, representatives, contractors, attorneys, consultants,
27 and all other Persons acting on its behalf.”

28 **Response:** Subject to and without waiving the foregoing objections, including

1 regarding the specific date implicated, the United States admits that Jonathan Blum
2 did not audio record the phone call, but after a reasonable inquiry, the United States
3 responds that it lacks sufficient information to admit or deny this Request with
4 respect to the entire United States Government.

5 **REQUEST FOR ADMISSION NO. 44:** Admit that during the Spring 2014
6 Phone Call, Jonathan Blum told Larry Renfro that MAOs other than UnitedHealth
7 were asking if MAOs were required to conduct Two-Way Looks before the Proposed
8 Medical Record Review Rule took effect.

9 **Objection:** The United States incorporates its General Objections and Specific
10 Objections to the Definitions and Instructions as if stated herein, including but not
11 limited to, its specific objections to the definitions of “Spring 2014 Phone Call” and
12 “MAO.” The United States objects to this Request to the extent it calls for
13 information that is already in UnitedHealth’s possession, custody, or control, or is
14 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
15 information to mischaracterize or misinterpret the facts. The United States objects to
16 this Request to the extent it calls for any legal conclusion.

17 **Response:** Subject to and without waiving the foregoing objections, including
18 regarding the specific date implicated, the United States responds that, after a
19 reasonable inquiry, it lacks sufficient information to admit or deny this Request.

20 **REQUEST FOR ADMISSION NO. 45:** Admit that during the Spring 2014
21 Phone Call, Jonathan Blum told Larry Renfro that the Proposed Medical Record
22 Review Rule was not retroactive.

23 **Objection:** The United States incorporates its General Objections and Specific
24 Objections to the Definitions and Instructions as if stated herein, including but not
25 limited to, its specific objections to the definition of “Spring 2014 Phone Call.” The
26 United States objects to this Request to the extent it calls for information that is
27 already in UnitedHealth’s possession, custody, or control, or is otherwise available to
28 UnitedHealth and to the extent that UnitedHealth is using this information to

1 mischaracterize or misinterpret the facts. The United States objects to this Request to
2 the extent it calls for any legal conclusion.

3 **Response:** Subject to and without waiving the foregoing objections, including
4 regarding the specific date implicated, the United States denies this Request.

5 Jonathan Blum responded to Larry Renfro's inquiry simply by telling him to read the
6 Proposed Medical Record Rule.

7 **REQUEST FOR ADMISSION NO. 46:** Admit that Marilyn Tavenner spoke on
8 the phone with Larry Renfro on April 8, 2014.

9 **Objection:** The United States incorporates its General Objections and Specific
10 Objections to the Definitions and Instructions as if stated herein. The United States
11 objects to this Request to the extent it seeks information not relevant to a claim or
12 defense in this case. The United States objects to this Request to the extent it calls for
13 information that is already in UnitedHealth's possession, custody, or control, or is
14 otherwise available to UnitedHealth as it is duplicative of information sought and
15 obtained by UnitedHealth in the February 28, 2018 deposition of Marilyn Tavenner.
16 The United States additionally objects to the extent that UnitedHealth is using this
17 information to mischaracterize or misinterpret the facts.

18 **Response:** Subject to and without waiving the foregoing objections, the United
19 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
20 Spring of 2014, but after a reasonable inquiry, responds that it lacks sufficient
21 information to admit or deny whether a telephone call took place on April 8, 2014.

22 **REQUEST FOR ADMISSION NO. 47:** Admit that Larry Renfro requested the
23 April 8, 2014 call with Marilyn Tavenner.

24 **Objection:** The United States incorporates its General Objections and Specific
25 Objections to the Definitions and Instructions as if stated herein. The United States
26 objects to this Request to the extent it calls for information that is already in
27 UnitedHealth's possession, custody, or control, or is otherwise available to
28 UnitedHealth as it is duplicative of information sought and obtained by UnitedHealth

1 in the February 28, 2018 deposition of Marilyn Tavenner. The United States
2 additionally objects to the extent that UnitedHealth is using this information to
3 mischaracterize or misinterpret the facts.

4 **Response:** Subject to and without waiving the foregoing objections, the United
5 States admits that Larry Renfro requested a call with Marilyn Tavenner in the Spring
6 of 2014, but after a reasonable inquiry, responds that it lacks sufficient information to
7 admit or deny whether a telephone call took place on April 8, 2014. Ms. Tavenner's
8 recollection is consistent with her testimony in her February 28, 2018 deposition, "I
9 remember being approached by Larry to discuss a concern he had about the process
10 that involved a review of charts."

11 **REQUEST FOR ADMISSION NO. 48:** Admit that Marilyn Tavenner spoke on
12 the phone with Larry Renfro on April 8, 2014 regarding the Proposed Medical
13 Record Review Rule.

14 **Objection:** The United States incorporates its General Objections and Specific
15 Objections to the Definitions and Instructions as if stated herein. The United States
16 objects to this Request to the extent it calls for information that is already in
17 UnitedHealth's possession, custody, or control, or is otherwise available to
18 UnitedHealth as it is duplicative of information sought and obtained by UnitedHealth
19 in the February 28, 2018 deposition of Marilyn Tavenner. The United States
20 additionally objects to the extent that UnitedHealth is using this information to
21 mischaracterize or misinterpret the facts.

22 **Response:** Subject to and without waiving the foregoing objections, the United
23 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
24 Spring of 2014 regarding the Proposed Medical Record Review Rule, but after a
25 reasonable inquiry, responds that it lacks sufficient information to admit or deny
26 whether a telephone call took place on April 8, 2014.

27 **REQUEST FOR ADMISSION NO. 49:** Admit that Marilyn Tavenner took notes
28 during her April 8, 2014 phone call with Larry Renfro.

1 **Objection:** The United States incorporates its General Objections and Specific
2 Objections to the Definitions and Instructions as if stated herein.

3 **Response:** Subject to and without waiving the foregoing objections, the United
4 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
5 Spring of 2014, but after a reasonable inquiry, responds that it lacks sufficient
6 information to admit or deny whether a telephone call took place on April 8, 2014.
7 Further, after a reasonable inquiry, the United States responds that it lacks sufficient
8 information to admit or deny whether Ms. Tavenner took notes during her phone call
9 with Mr. Renfro, but can state that it was not Ms. Tavenner's practice to take notes
10 during phone calls. If the United States identifies notes taken by Ms. Tavenner
11 during her call with Mr. Renfro in the Spring of 2014, it will supplement this
12 Response.

13 **REQUEST FOR ADMISSION NO. 50:** Admit that after the April 8, 2014
14 telephone call between Marilyn Tavenner and Larry Renfro, Marilyn Tavenner took
15 notes about or otherwise memorialized the meeting in writing.

16 **Objection:** The United States incorporates its General Objections and Specific
17 Objections to the Definitions and Instructions as if stated herein. The United States
18 also objects to this Request to the extent that the undefined phrase "or otherwise
19 memorialized" is vague and ambiguous. For the purposes of this Request, the United
20 States defines "memorialized" as put in writing.

21 **Response:** Subject to and without waiving the foregoing objections, the United
22 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
23 Spring of 2014, but after a reasonable inquiry, responds that it lacks sufficient
24 information to admit or deny whether a telephone call took place on April 8, 2014.
25 Further, after a reasonable inquiry, the United States responds that it lacks sufficient
26 information to admit or deny whether Ms. Tavenner memorialized the call in writing
27 after the call. To the extent the United States identifies writing by Ms. Tavenner
28 regarding her call with Mr. Renfro in the Spring of 2014, it will supplement this

1 Response.

2 **REQUEST FOR ADMISSION NO. 51:** Admit that after the April 8, 2014
3 telephone call between Marilyn Tavenner and Larry Renfro, Marilyn Tavenner had
4 Communications with the Government about the call.

5 **Objection:** The United States incorporates its General Objections and Specific
6 Objections to the Definitions and Instructions as if stated herein, including but not
7 limited to, its specific objections to the definition of “Government.” The United
8 States objects to this Request to the extent it seeks disclosure of information that is
9 protected from disclosure by an applicable privilege or protection, including the
10 attorney-client privilege, attorney work-product doctrine, deliberative process
11 privilege, and/or investigative files privilege. For the purposes of this Request, the
12 United States will interpret the definition of “Government” to include only CMS.

13 **Response:** Subject to and without waiving the foregoing objections, the United
14 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
15 Spring of 2014, but after a reasonable inquiry, responds that it lacks sufficient
16 information to admit or deny whether a telephone call took place on April 8, 2014.
17 Further, the United States admits that following this telephone call with Larry Renfro,
18 Ms. Tavenner communicated with CMS regarding the call.

19 **REQUEST FOR ADMISSION NO. 52:** Admit that no other Person participated
20 in the April 8, 2014 call between Marilyn Tavenner and Larry Renfro.

21 **Objection:** The United States incorporates its General Objections and Specific
22 Objections to the Definitions and Instructions as if stated herein, including but not
23 limited to, its specific objections to the definition of “Person.”

24 **Response:** Subject to and without waiving the foregoing objections, the United
25 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
26 Spring of 2014, but after a reasonable inquiry, responds that it lacks sufficient
27 information to admit or deny whether a telephone call took place on April 8, 2014 or
28 whether any other person participated in the call.

1 **REQUEST FOR ADMISSION NO. 53:** Admit that Marilyn Tavenner did not
2 Audio Record the April 8, 2014 call between Marilyn Tavenner and Larry Renfro.

3 **Objection:** The United States incorporates its General Objections and Specific
4 Objections to the Definitions and Instructions as if stated herein.

5 **Response:** Subject to and without waiving the foregoing objections, the United
6 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
7 Spring of 2014, but after a reasonable inquiry, responds that it lacks sufficient
8 information to admit or deny whether a telephone call took place on April 8, 2014.
9 Further, the United States admits that Ms. Tavenner was not in the habit of audio
10 recording any of her telephone calls. To the extent the United States identifies an
11 audio recording made by Ms. Tavenner of her call with Mr. Renfro in Spring 2014, it
12 will supplement this Response.

13 **REQUEST FOR ADMISSION NO. 54:** Admit that the Government did not
14 Audio Record the April 8, 2014 call between Marilyn Tavenner and Larry Renfro.

15 **Objection:** The United States incorporates its General Objections and Specific
16 Objections to the Definitions and Instructions as if stated herein, including but not
17 limited to, its specific objections to the definition “Government.” The United States
18 further objects to this request because it is unduly burdensome for the United States
19 to determine the actions of all “agencies, departments, components, agents,
20 representatives, contractors, attorneys, consultants, and all other Persons acting on its
21 behalf.”

22 **Response:** Subject to and without waiving the foregoing objections, the United
23 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
24 Spring of 2014, but after a reasonable inquiry, responds that it lacks sufficient
25 information to admit or deny whether a telephone call took place on April 8, 2014.
26 Further, the United States admits that Ms. Tavenner was not in the habit of audio
27 recording any of her telephone calls, but after a reasonable inquiry, responds that it
28 lacks sufficient information to admit or deny this Request with respect to the entire

1 United States Government.

2 **REQUEST FOR ADMISSION NO. 55:** Admit that Marilyn Tavenner spoke on
3 the phone with Larry Renfro on April 8, 2014 regarding whether UnitedHealth was
4 obligated at that time to perform Two-Way Looks.

5 **Objection:** The United States incorporates its General Objections and Specific
6 Objections to the Definitions and Instructions as if stated herein. The United States
7 also objects to this Request to the extent that the undefined term “obligated” is vague
8 and ambiguous. The United States objects to this Request to the extent it calls for
9 information that is already in UnitedHealth’s possession, custody, or control, or is
10 otherwise available to UnitedHealth as it is duplicative of information sought and
11 obtained by UnitedHealth in the February 28, 2018 deposition of Marilyn Tavenner.
12 The United States additionally objects to the extent that UnitedHealth is using this
13 information to mischaracterize or misinterpret the facts. The United States objects to
14 this Request to the extent it calls for any legal conclusion.

15 **Response:** Subject to and without waiving the foregoing objections, the United
16 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
17 Spring of 2014 regarding the Proposed Medical Record Review Rule, but after a
18 reasonable inquiry, responds that it lacks sufficient information to admit or deny
19 whether a telephone call took place on April 8, 2014. Further, the United States
20 responds that after a reasonable inquiry, it lacks sufficient information to admit or
21 deny the remainder of this Request. Ms. Tavenner’s recollection is consistent with
22 her testimony in her February 28, 2018 deposition, “That he [Larry Renfro] was
23 asking me about something that was in the proposed rule that related to chart review,
24 and giving me his ideas on what he thought it meant, and I listened to him, and then I
25 referred him to our staff.”

26 **REQUEST FOR ADMISSION NO. 56:** Admit that Jonathan Blum spoke to
27 Marilyn Tavenner prior to April 8, 2014 about Mr. Blum’s March 2014 Meeting with
28 Larry Renfro.

1 **Objection:** The United States incorporates its General Objections and Specific
2 Objections to the Definitions and Instructions as if stated herein, including but not
3 limited to, its specific objections to the definition of “March 2014 Meeting.”

4 **Response:** Subject to and without waiving the foregoing objections, including
5 regarding the specific dates implicated, the United States responds that after a
6 reasonable inquiry, it lacks sufficient information to admit or deny this Request.

7 **REQUEST FOR ADMISSION NO. 57:** Admit that Jonathan Blum spoke to
8 Marilyn Tavenner prior to April 8, 2014 about Mr. Blum’s Spring 2014 Phone Call
9 with Larry Renfro.

10 **Objection:** The United States incorporates its General Objections and Specific
11 Objections to the Definitions and Instructions as if stated herein, including but not
12 limited to, its specific objections to the definition of “Spring 2014 Phone Call.”

13 **Response:** Subject to and without waiving the foregoing objections, including
14 regarding the specific dates implicated, the United States responds that after a
15 reasonable inquiry, it lacks sufficient information to admit or deny this Request.

16 **REQUEST FOR ADMISSION NO. 58:** Admit that Marilyn Tavenner told Larry
17 Renfro on April 8, 2014 that she spoke to Jonathan Blum about Blum’s Spring 2014
18 Phone Call with Renfro.

19 **Objection:** The United States incorporates its General Objections and Specific
20 Objections to the Definitions and Instructions as if stated herein, including but not
21 limited to, its specific objections to the definition of “Spring 2014 Phone Call.” The
22 United States objects to this Request to the extent it calls for information that is
23 already in UnitedHealth’s possession, custody, or control, or is otherwise available to
24 UnitedHealth and to the extent that UnitedHealth is using this information to
25 mischaracterize or misinterpret the facts.

26 **Response:** Subject to and without waiving the foregoing objections, including
27 regarding the specific dates implicated, the United States responds that after a
28 reasonable inquiry, it lacks sufficient information to admit or deny this Request.

1 **REQUEST FOR ADMISSION NO. 59:** Admit that Marilyn Tavenner told Larry
2 Renfro on April 8, 2014 that she spoke to Jonathan Blum about Blum's Spring 2014
3 Phone Call with Renfro regarding UnitedHealth's Claims Verification Program.

4 **Objection:** The United States incorporates its General Objections and Specific
5 Objections to the Definitions and Instructions as if stated herein, including but not
6 limited to, its specific objections to the definition of "Spring 2014 Phone Call." The
7 United States further objects to this Request to extent it is duplicative of Request for
8 Admission No. 58. The United States objects to this Request to the extent it calls for
9 information that is already in UnitedHealth's possession, custody, or control, or is
10 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
11 information to mischaracterize or misinterpret the facts.

12 **Response:** Subject to and without waiving the foregoing objections, including
13 regarding the specific dates implicated, the United States responds that after a
14 reasonable inquiry, it lacks sufficient information to admit or deny this Request.

15 **REQUEST FOR ADMISSION NO. 60:** Admit that Larry Renfro asked Marilyn
16 Tavenner on April 8, 2014 if she agreed with Jonathan Blum that there was no
17 requirement that UnitedHealth perform Two-Way Looks before the Proposed
18 Medical Record Review Rule went into effect.

19 **Objection:** The United States incorporates its General Objections and Specific
20 Objections to the Definitions and Instructions as if stated herein. The United States
21 objects to this Request to the extent that it purports to set forth a statement of
22 Jonathan Blum which has not been established by the evidence in this matter. The
23 United States objects to this Request to the extent it calls for information that is
24 already in UnitedHealth's possession, custody, or control, or is otherwise available to
25 UnitedHealth as it is duplicative of information sought and obtained by UnitedHealth
26 in the February 28, 2018 deposition of Marilyn Tavenner. The United States
27 additionally objects to the extent that UnitedHealth is using this information to
28 mischaracterize or misinterpret the facts. The United States objects to this Request to

1 the extent it calls for any legal conclusion.

2 **Response:** Subject to and without waiving the foregoing objections, the United
3 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
4 Spring of 2014 regarding the Proposed Medical Record Review Rule, but after a
5 reasonable inquiry, responds that it lacks sufficient information to admit or deny
6 whether a telephone call took place on April 8, 2014. The United States denies the
7 remainder of this Request. Ms. Tavenner's recollection is consistent with the
8 testimony in her February 28, 2018 deposition, "That he [Larry Renfro] was asking
9 me about something that was in the proposed rule that related to chart review, and
10 giving me his ideas on what he thought it meant, and I listened to him, and then I
11 referred him to our staff."

12 **REQUEST FOR ADMISSION NO. 61:** Admit that Larry Renfro asked Marilyn
13 Tavenner on April 8, 2014 whether UnitedHealth had to perform Two-Way Looks
14 prior to the implementation of the Proposed Medical Record Review Rule.

15 **Objection:** The United States incorporates its General Objections and Specific
16 Objections to the Definitions and Instructions as if stated herein. The United States
17 also objects to this Request to the extent that the undefined phrase "prior to the
18 implementation" is vague and ambiguous. The United States objects to this Request
19 to the extent it calls for information that is already in UnitedHealth's possession,
20 custody, or control, or is otherwise available to UnitedHealth as it is duplicative of
21 information sought and obtained by UnitedHealth in the February 28, 2018 deposition
22 of Marilyn Tavenner. The United States additionally objects to the extent that
23 UnitedHealth is using this information to mischaracterize or misinterpret the facts.
24 The United States objects to this Request to the extent it calls for any legal
25 conclusion.

26 **Response:** Subject to and without waiving the foregoing objections, the United
27 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
28 Spring of 2014 regarding the Proposed Medical Record Review Rule, but after a

1 reasonable inquiry, responds that it lacks sufficient information to admit or deny
2 whether a telephone call took place on April 8, 2014. Further, the United States
3 responds that after a reasonable inquiry, it lacks sufficient information to admit or
4 deny the remainder of this Request. Ms. Tavenner's recollection is consistent with
5 the testimony in her February 28, 2018 deposition, "That he [Larry Renfro] was
6 asking me about something that was in the proposed rule that related to chart review,
7 and giving me his ideas on what he thought it meant, and I listened to him, and then I
8 referred him to our staff."

9 **REQUEST FOR ADMISSION NO. 62:** Admit that Marilyn Tavenner told Larry
10 Renfro on April 8, 2014 that MAOs were not required to conduct Two-Way Looks
11 prior to the implementation of the Proposed Medical Record Review Rule.

12 **Objection:** The United States incorporates its General Objections and Specific
13 Objections to the Definitions and Instructions as if stated herein, including but not
14 limited to, its specific objections to the definition "MAO." The United States also
15 objects to this Request to the extent that the undefined phrase "prior to the
16 implementation" is vague and ambiguous. The United States objects to this Request
17 to the extent it calls for information that is already in UnitedHealth's possession,
18 custody, or control, or is otherwise available to UnitedHealth as it is duplicative of
19 information sought and obtained by UnitedHealth in the February 28, 2018 deposition
20 of Marilyn Tavenner. The United States additionally objects to the extent that
21 UnitedHealth is using this information to mischaracterize or misinterpret the facts.
22 The United States objects to this Request to the extent it calls for any legal
23 conclusion.

24 **Response:** Subject to and without waiving the foregoing objections, the United
25 States denies this Request. Ms. Tavenner's recollection is consistent with the
26 testimony in her February 28, 2018 deposition in response to questioning seeking to
27 illicit the same information. See Tavenner Dep. at 133:8-15 (Q: At any point did you
28 tell Mr. Renfro that UnitedHealth did not have an obligation to delete diagnosis codes

1 it knew to be unsupported by the medical record? A: We did not have that level of
2 detail in the conversation. In the conversation, he was just talking about he was
3 unclear what to do with the proposed rule sitting there.”), 111:2-6 (“Q: Okay. Do
4 you recall telling him that two-way looks were not required because this proposed
5 rule was not yet in effect? A: No. I recall sending him to the staff to ask that
6 question.”), 116:14- 117: 1 (“Q: With respect to the conversation you had with Mr.
7 Renfro, if his recollection of that conversation he had with you was that you told him
8 that United was not required to delete – to look for deletions because the proposed
9 rule was not yet in effect, would he be inaccurate? A: I told that I could not make
10 that decision, that that decision would be something he would have to discuss with
11 the staff and Medicare Advantage, and I sent him to those people.”)

12 **REQUEST FOR ADMISSION NO. 63:** Admit that Larry Renfro asked Marilyn
13 Tavenner on April 8, 2014 if he should talk to anyone else at CMS to confirm that
14 MAOs were not required to perform Two Way Looks prior to the implementation of
15 the Proposed Medical Record Review Rule.

16 **Objection:** The United States incorporates its General Objections and Specific
17 Objections to the Definitions and Instructions as if stated herein, including but not
18 limited to, its specific objections to the definitions of “CMS” and “MAO.” The
19 United States also objects to this Request to the extent that the undefined phrase
20 “prior to the implementation” is vague and ambiguous. The United States objects to
21 this Request to the extent it calls for information that is already in UnitedHealth’s
22 possession, custody, or control, or is otherwise available to UnitedHealth as it is
23 duplicative of information sought and obtained by UnitedHealth in the February 28,
24 2018 deposition of Marilyn Tavenner. The United States additionally objects to the
25 extent that UnitedHealth is using this information to mischaracterize or misinterpret
26 the facts. The United States objects to this Request to the extent it calls for any legal
27 conclusion.

28 **Response:** Subject to and without waiving the foregoing objections, including

1 regarding the specific date implicated, the United States denies this Request.

2 **REQUEST FOR ADMISSION NO. 64:** Admit that Marilyn Tavenner told Larry
3 Renfro on April 8, 2014 that Renfro did not need to talk to anyone else at CMS to
4 confirm that MAOs were not required to perform Two-Way Looks prior to the
5 implementation of the Proposed Medical Record Review Rule.

6 **Objection:** The United States incorporates its General Objections and Specific
7 Objections to the Definitions and Instructions as if stated herein, including but not
8 limited to, its specific objections to the definitions of “CMS” and “MAO.” The
9 United States also objects to this Request to the extent that the undefined phrase
10 “prior to the implementation” is vague and ambiguous. The United States objects to
11 this Request to the extent it calls for information that is already in UnitedHealth’s
12 possession, custody, or control, or is otherwise available to UnitedHealth as it is
13 duplicative of information sought and obtained by UnitedHealth in the February 28,
14 2018 deposition of Marilyn Tavenner. The United States additionally objects to the
15 extent that UnitedHealth is using this information to mischaracterize or misinterpret
16 the facts.

17 **Response:** Subject to and without waiving the foregoing objections, the United
18 States denies this Request.

19 **REQUEST FOR ADMISSION NO. 65:** Admit that Larry Renfro told Marilyn
20 Tavenner on April 8, 2014 that UnitedHealth was concerned that other MAOs were
21 not performing Two-Way Looks.

22 **Objection:** The United States incorporates its General Objections and Specific
23 Objections to the Definitions and Instructions as if stated herein, including but not
24 limited to, its specific objections to the definition of “MAO.” The United States
25 objects to this Request to the extent it calls for information that is already in
26 UnitedHealth’s possession, custody, or control, or is otherwise available to
27 UnitedHealth as it is duplicative of information sought and obtained by UnitedHealth
28 in the February 28, 2018 deposition of Marilyn Tavenner. The United States

1 additionally objects to the extent that UnitedHealth is using this information to
2 mischaracterize or misinterpret the facts.

3 **Response:** Subject to and without waiving the foregoing objections, including
4 regarding the specific date implicated, the United States responds that after a
5 reasonable inquiry, it lacks sufficient information to admit or deny the Request as
6 written.

7 **REQUEST FOR ADMISSION NO. 66:** Admit that Marilyn Tavenner told Larry
8 Renfro on April 8, 2014 that UnitedHealth was not required to perform Two-Way
9 Looks for dates of service years 2012, 2013, and 2014.

10 **Objection:** The United States incorporates its General Objections and Specific
11 Objections to the Definitions and Instructions as if stated herein. The United States
12 further objects to this Request to extent it is duplicative of Request for Admission No.
13 62. The United States objects to this Request to the extent it calls for information that
14 is already in UnitedHealth's possession, custody, or control, or is otherwise available
15 to UnitedHealth as it is duplicative of information sought and obtained by
16 UnitedHealth in the February 28, 2018 deposition of Marilyn Tavenner. The United
17 States additionally objects to the extent that UnitedHealth is using this information to
18 mischaracterize or misinterpret the facts. The United States objects to this Request to
19 the extent it calls for any legal conclusion.

20 **Response:** Subject to and without waiving the foregoing objections, the United
21 States denies this Request.

22 **REQUEST FOR ADMISSION NO. 67:** Admit that Marilyn Tavenner spoke on
23 the phone with Larry Renfro on April 26, 2014.

24 **Objection:** The United States incorporates its General Objections and Specific
25 Objections to the Definitions and Instructions as if stated herein. The United States
26 objects to this Request to the extent it seeks information not relevant to a claim or
27 defense in this case. The United States objects to this Request to the extent it calls for
28 information that is already in UnitedHealth's possession, custody, or control, or is

1 otherwise available to UnitedHealth as it is duplicative of information sought and
2 obtained by UnitedHealth in the February 28, 2018 deposition of Marilyn Tavenner.
3 The United States additionally objects to the extent that UnitedHealth is using this
4 information to mischaracterize or misinterpret the facts.

5 **Response:** Subject to and without waiving the foregoing objections, the United
6 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
7 Spring of 2014, but after a reasonable inquiry, responds that it lacks sufficient
8 information to admit or deny whether a telephone call took place on April 26, 2014.
9 Ms. Tavenner's recollection is consistent with the testimony in her February 28, 2018
10 deposition: "I remember being approached by Larry to discuss a concern he had
11 about the process that involved a review of charts." Tavenner Dep. at 110:3-13.

12 **REQUEST FOR ADMISSION NO. 68:** Admit that Larry Renfro requested the
13 April 26, 2014 call with Marilyn Tavenner.

14 **Objection:** The United States incorporates its General Objections and Specific
15 Objections to the Definitions and Instructions as if stated herein. The United States
16 objects to this Request to the extent it calls for information that is already in
17 UnitedHealth's possession, custody, or control, or is otherwise available to
18 UnitedHealth as it is duplicative of information sought and obtained by UnitedHealth
19 in the February 28, 2018 deposition of Marilyn Tavenner. The United States
20 additionally objects to the extent that UnitedHealth is using this information to
21 mischaracterize or misinterpret the facts.

22 **Response:** Subject to and without waiving the foregoing objections, the United
23 States admits that Larry Renfro requested a call with Marilyn Tavenner in the Spring
24 of 2014, but after a reasonable inquiry, responds that it lacks sufficient information to
25 admit or deny whether a telephone call took place on April 26, 2014. Ms. Tavenner's
26 recollection is consistent with the testimony in her February 28, 2018 deposition, "I
27 remember being approached by Larry to discuss a concern he had about the process
28 that involved a review of charts." Tavenner Dep. at 110:3-13.

1 **REQUEST FOR ADMISSION NO. 69:** Admit that no other Person from the
2 Government participated in the April 26, 2014 call between Marilyn Tavenner and
3 Larry Renfro.

4 **Objection:** The United States incorporates its General Objections and Specific
5 Objections to the Definitions and Instructions as if stated herein, including but not
6 limited to, its specific objections to the definitions of “Person” and “Government.”

7 **Response:** Subject to and without waiving the foregoing objections, the United
8 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
9 Spring of 2014, but after a reasonable inquiry, responds that it lacks sufficient
10 information to admit or deny whether a telephone call took place on April 26, 2014 or
11 whether any other person participated in the call.

12 **REQUEST FOR ADMISSION NO. 70:** Admit that Marilyn Tavenner took notes
13 during her April 26, 2014 call with Larry Renfro.

14 **Objection:** The United States incorporates its General Objections and Specific
15 Objections to the Definitions and Instructions as if stated herein.

16 **Response:** Subject to and without waiving the foregoing objections, the United
17 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
18 Spring of 2014, but after a reasonable inquiry, responds that it lacks sufficient
19 information to admit or deny whether a telephone call took place on April 26, 2014.
20 Further, after a reasonable inquiry, the United States responds that it lacks sufficient
21 information to admit or deny whether Ms. Tavenner took notes during her phone call
22 with Mr. Renfro, but can state that it was not Ms. Tavenner’s practice to take notes
23 during phone calls. To the extent the United States identifies notes taken by Ms.
24 Tavenner during the Spring 2014 phone call, it will supplement this Response.

25 **REQUEST FOR ADMISSION NO. 71:** Admit that after the April 26, 2014
26 telephone call between Marilyn Tavenner and Larry Renfro, Marilyn Tavenner took
27 notes about or otherwise memorialized the meeting in writing.

28 **Objection:** The United States incorporates its General Objections and Specific

1 Objections to the Definitions and Instructions as if stated herein. The United States
2 also objects to this Request to the extent that the undefined phrase “or otherwise
3 memorialized” is vague and ambiguous. For the purposes of this Request, the United
4 States defines “memorialized” as put in writing.

5 **Response:** Subject to and without waiving the foregoing objections, the United
6 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
7 Spring of 2014, but after a reasonable inquiry, responds that it lacks sufficient
8 information to admit or deny whether a telephone call took place on April 26, 2014.
9 Further, after a reasonable inquiry, the United States responds that it lacks sufficient
10 information to admit or deny whether Ms. Tavenner memorialized the call in writing
11 after the call. To the extent the United States identifies writing by Ms. Tavenner
12 regarding her call with Mr. Renfro in the Spring of 2014, it will supplement this
13 Response.

14 **REQUEST FOR ADMISSION NO. 72:** Admit that after the April 26, 2014
15 telephone call between Marilyn Tavenner and Larry Renfro, Marilyn Tavenner had
16 Communications with the Government about the call.

17 **Objection:** The United States incorporates its General Objections and Specific
18 Objections to the Definitions and Instructions as if stated herein, including but not
19 limited to, its specific objections to the definition of “Government.” The United
20 States objects to this Request to the extent it seeks disclosure of information that is
21 protected from disclosure by an applicable privilege or protection, including the
22 attorney-client privilege, attorney work-product doctrine, deliberative process
23 privilege, and/or investigative files privilege. For the purposes of this Request, the
24 United States will interpret the definition of “Government” to include only CMS.

25 **Response:** Subject to and without waiving the foregoing objections, the United
26 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
27 Spring of 2014, but after a reasonable inquiry, responds that it lacks sufficient
28 information to admit or deny whether a telephone call took place on April 26, 2014.

1 The United States admits the remainder of this Request.

2 **REQUEST FOR ADMISSION NO. 73:** Admit that Marilyn Tavenner did not
3 Audio Record the April 26, 2014 call between Marilyn Tavenner and Larry Renfro.

4 **Objection:** The United States incorporates its General Objections and Specific
5 Objections to the Definitions and Instructions as if stated herein.

6 **Response:** Subject to and without waiving the foregoing objections, the United
7 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
8 Spring of 2014, but after a reasonable inquiry, responds that it lacks sufficient
9 information to admit or deny whether a telephone call took place on April 26, 2014.
10 Further, the United States admits that Ms. Tavenner was not in the habit of audio
11 recording any of her telephone calls. To the extent the United States identifies an
12 audio recording made by Ms. Tavenner of her call with Mr. Renfro in Spring 2014, it
13 will supplement this Response.

14 **REQUEST FOR ADMISSION NO. 74:** Admit that the Government did not
15 Audio Record the April 26, 2014 call between Marilyn Tavenner and Larry Renfro.

16 **Objection:** The United States incorporates its General Objections and Specific
17 Objections to the Definitions and Instructions as if stated herein, including but not
18 limited to, its specific objections to the definition “Government.” The United States
19 further objects to this request because it is unduly burdensome for the United States
20 to determine the actions of all “agencies, departments, components, agents,
21 representatives, contractors, attorneys, consultants, and all other Persons acting on its
22 behalf.”

23 **Response:** Subject to and without waiving the foregoing objections, the United
24 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
25 Spring of 2014, but after a reasonable inquiry, responds that it lacks sufficient
26 information to admit or deny whether a telephone call took place on April 26, 2014.
27 Further, the United States admits that Ms. Tavenner was not in the habit of audio
28 recording any of her telephone calls, but after a reasonable inquiry, responds that it

1 lacks sufficient information to admit or deny this Request with respect to the entire
2 United States Government.

3 **REQUEST FOR ADMISSION NO. 75:** Admit that Marilyn Tavenner told Larry
4 Renfro on April 26, 2014 to request a meeting with CMS.

5 **Objection:** The United States incorporates its General Objections and Specific
6 Objections to the Definitions and Instructions as if stated herein, including but not
7 limited to, its specific objections to the definition “CMS.” The United States objects
8 to this Request to the extent it calls for information that is already in UnitedHealth’s
9 possession, custody, or control, or is otherwise available to UnitedHealth and to the
10 extent that UnitedHealth is using this information to mischaracterize or misinterpret
11 the facts.

12 **Response:** Subject to and without waiving the foregoing objections, the United
13 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
14 Spring of 2014, but after a reasonable inquiry, responds that it lacks sufficient
15 information to admit or deny whether a telephone call took place on April 26, 2014.
16 However, the United States admits that Marilyn Tavenner told Larry Renfro to
17 contact Jonathan Blum during a Spring 2014 phone call.

18 **REQUEST FOR ADMISSION NO. 76:** Admit that Larry Renfro told Marilyn
19 Tavenner on April 26, 2014 that UnitedHealth wanted to meet with CMS no later
20 than April 30, 2014.

21 **Objection:** The United States incorporates its General Objections and Specific
22 Objections to the Definitions and Instructions as if stated herein, including but not
23 limited to, its specific objections to the definition “CMS.”

24 **Response:** Subject to and without waiving the foregoing objections, the United
25 States admits that Marilyn Tavenner spoke by telephone with Larry Renfro in the
26 Spring of 2014, but after a reasonable inquiry, responds that it lacks sufficient
27 information to admit or deny whether a telephone call took place on April 26, 2014.
28 Further, after a reasonable inquiry, the United States responds that it lacks sufficient

1 information to admit or deny the remainder of this Request.

2 **REQUEST FOR ADMISSION NO. 77:** Admit that on April 27, 2014, Larry
3 Renfro informed Marilyn Tavenner that UnitedHealth wanted to schedule a meeting
4 with CMS no later than April 30, 2014.

5 **Objection:** The United States incorporates its General Objections and Specific
6 Objections to the Definitions and Instructions as if stated herein, including but not
7 limited to, its specific objections to the definition “CMS.” The United States objects
8 to this Request to the extent it calls for information that is already in UnitedHealth’s
9 possession, custody, or control, or is otherwise available to UnitedHealth and to the
10 extent that UnitedHealth is using this information to mischaracterize or misinterpret
11 the facts.

12 **Response:** Subject to and without waiving the foregoing objections, the United
13 States denies this Request as written. However, the United States admits that on
14 April 27, 2014 Larry Renfro sent Marilyn Tavenner an email bates labeled
15 MARA1296260. The United States denies that the email bates labeled
16 MARA1296260 specifically requests a meeting, but admits that the email states
17 “Prior to submitting our attestation this Wednesday, we would like to confirm that
18 our understanding is appropriate. Based on our conversation, I believe the
19 appropriate people for this conversation would be Sean Cavanaugh and Cheri Rice.”

20 **REQUEST FOR ADMISSION NO. 78:** Admit that Marilyn Tavenner received
21 an April 27, 2014 email bates labeled MARA1296260 from Larry Renfro requesting
22 a meeting with CMS.

23 **Objection:** The United States incorporates its General Objections and Specific
24 Objections to the Definitions and Instructions as if stated herein, including but not
25 limited to, its specific objections to the definition “CMS.”

26 **Response:** Subject to and without waiving the foregoing objections, the United
27 States admits that Marilyn Tavenner received an email from Larry Renfro, dated
28 April 27, 2014, which is bates labeled MARA1296260. The United States denies that

1 the email bates labeled MARA1296260 specifically requests a meeting, but admits
2 that the email states “Prior to submitting our attestation this Wednesday, we would
3 like to confirm that our understanding is appropriate. Based on our conversation, I
4 believe the appropriate people for this conversation would be Sean Cavanaugh and
5 Cheri Rice.”

6 **REQUEST FOR ADMISSION NO. 79:** Admit that UnitedHealth met with CMS
7 on April 29, 2014.

8 **Objection:** The United States incorporates its General Objections and Specific
9 Objections to the Definitions and Instructions as if stated herein, including but not
10 limited to, its specific objections to the definition “CMS.” The United States objects
11 to this Request to the extent it calls for information that is already in UnitedHealth’s
12 possession, custody, or control, or is otherwise available to UnitedHealth and to the
13 extent that UnitedHealth is using this information to mischaracterize or misinterpret
14 the facts.

15 **Response:** Subject to and without waiving the foregoing objections, the United
16 States admits that UnitedHealth met with certain employees of CMS on April 29,
17 2014.

18 **REQUEST FOR ADMISSION NO. 80:** Admit that CMS prepared a written
19 agenda for the April 29, 2019 meeting between CMS and UnitedHealth.

20 **Objection:** The United States incorporates its General Objections and Specific
21 Objections to the Definitions and Instructions as if stated herein, including but not
22 limited to, its specific objections to the definition “CMS.” The United States will
23 interpret this request as referencing a meeting on April 29, 2014 not 2019.

24 **Response:** Subject to and without waiving the foregoing objections, the United
25 States denies this Request.

26 **REQUEST FOR ADMISSION NO. 81:** Admit that CMS was aware that the
27 purpose of the April 29, 2014 meeting was to discuss the Proposed Medical Record
28 Review Rule.

1 **Objection:** The United States incorporates its General Objections and Specific
2 Objections to the Definitions and Instructions as if stated herein, including but not
3 limited to, its specific objections to the definition “CMS.” The United States objects
4 to this Request to the extent it calls for information that is already in UnitedHealth’s
5 possession, custody, or control, or is otherwise available to UnitedHealth and to the
6 extent that UnitedHealth is using this information to mischaracterize or misinterpret
7 the facts.

8 **Response:** Subject to and without waiving the foregoing objections, the United
9 States admits that the stated purpose of the April 29, 2014 meeting was ostensibly to
10 discuss the Proposed Medical Record Review Rule.

11 **REQUEST FOR ADMISSION NO. 82:** Admit that some participants in the April
12 29, 2014 meeting participated via videoconference.

13 **Objection:** The United States incorporates its General Objections and Specific
14 Objections to the Definitions and Instructions as if stated herein. The United States
15 objects to this Request to the extent it seeks information not relevant to a claim or
16 defense in this case. The United States objects to this Request to the extent it calls for
17 information that is already in UnitedHealth’s possession, custody, or control, or is
18 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
19 information to mischaracterize or misinterpret the facts.

20 **Response:** Subject to and without waiving the foregoing objections, the United
21 States admits this Request.

22 **REQUEST FOR ADMISSION NO. 83:** Admit that some participants in the April
23 29, 2014 meeting participated via teleconference.

24 **Objection:** The United States incorporates its General Objections and Specific
25 Objections to the Definitions and Instructions as if stated herein. The United States
26 objects to this Request to the extent it seeks information not relevant to a claim or
27 defense in this case. The United States objects to this Request to the extent it calls for
28 information that is already in UnitedHealth’s possession, custody, or control, or is

1 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
2 information to mischaracterize or misinterpret the facts.

3 **Response:** Subject to and without waiving the foregoing objections, after a
4 reasonable inquiry, the United States responds that it lacks sufficient information to
5 admit or deny this Request.

6 **REQUEST FOR ADMISSION NO. 84:** Admit that Sean Cavanaugh attended the
7 April 29, 2014 meeting between UnitedHealth and CMS.

8 **Objection:** The United States incorporates its General Objections and Specific
9 Objections to the Definitions and Instructions as if stated herein, including but not
10 limited to, its specific objections to the definition of “CMS.” The United States
11 objects to this Request to the extent it calls for information that is already in
12 UnitedHealth’s possession, custody, or control, or is otherwise available to
13 UnitedHealth and to the extent that UnitedHealth is using this information to
14 mischaracterize or misinterpret the facts.

15 **Response:** Subject to and without waiving the foregoing objections, the United
16 States admits this Request.

17 **REQUEST FOR ADMISSION NO. 85:** Admit that Cheri Rice attended the April
18 29, 2014 meeting between UnitedHealth and CMS.

19 **Objection:** The United States incorporates its General Objections and Specific
20 Objections to the Definitions and Instructions as if stated herein, including but not
21 limited to, its specific objections to the definition of “CMS.” The United States
22 objects to this Request to the extent it calls for information that is already in
23 UnitedHealth’s possession, custody, or control, or is otherwise available to
24 UnitedHealth and to the extent that UnitedHealth is using this information to
25 mischaracterize or misinterpret the facts.

26 **Response:** Subject to and without waiving the foregoing objections, the United
27 States admits this Request.

28 **REQUEST FOR ADMISSION NO. 86:** Admit that Cynthia Tudor attended the

1 April 29, 2014 meeting between UnitedHealth and CMS.

2 **Objection:** The United States incorporates its General Objections and Specific
3 Objections to the Definitions and Instructions as if stated herein, including but not
4 limited to, its specific objections to the definition of “CMS.” The United States
5 objects to this Request to the extent it calls for information that is already in
6 UnitedHealth’s possession, custody, or control, or is otherwise available to
7 UnitedHealth and to the extent that UnitedHealth is using this information to
8 mischaracterize or misinterpret the facts.

9 **Response:** Subject to and without waiving the foregoing objections, the United
10 States admits this Request.

11 **REQUEST FOR ADMISSION NO. 87:** Admit that Dan Farmer attended the
12 April 29, 2014 meeting between UnitedHealth and CMS.

13 **Objection:** The United States incorporates its General Objections and Specific
14 Objections to the Definitions and Instructions as if stated herein, including but not
15 limited to, its specific objections to the definition of “CMS.” The United States
16 objects to this Request to the extent it calls for information that is already in
17 UnitedHealth’s possession, custody, or control, or is otherwise available to
18 UnitedHealth and to the extent that UnitedHealth is using this information to
19 mischaracterize or misinterpret the facts.

20 **Response:** Subject to and without waiving the foregoing objections, the United
21 States admits this Request.

22 **REQUEST FOR ADMISSION NO. 88:** Admit that Julia Gerner attended the
23 April 29, 2014 meeting between UnitedHealth and CMS.

24 **Objection:** The United States incorporates its General Objections and Specific
25 Objections to the Definitions and Instructions as if stated herein, including but not
26 limited to, its specific objections to the definition of “CMS.” The United States
27 objects to this Request to the extent it calls for information that is already in
28 UnitedHealth’s possession, custody, or control, or is otherwise available to

1 UnitedHealth and to the extent that UnitedHealth is using this information to
2 mischaracterize or misinterpret the facts.

3 **Response:** Subject to and without waiving the foregoing objections, the United
4 States denies this Request.

5 **REQUEST FOR ADMISSION NO. 89:** Admit that, other than Sean Cavanaugh,
6 Cheri Rice, Cynthia Tudor, Dan Farmer, and Julia Gerner, no other person from
7 CMS or the Government attended the April 29, 2014 meeting.

8 **Objection:** The United States incorporates its General Objections and Specific
9 Objections to the Definitions and Instructions as if stated herein, including but not
10 limited to, its specific objections to the definitions of “CMS,” “Government,” and
11 “Person.” The United States objects to this Request to the extent it calls for
12 information that is already in UnitedHealth’s possession, custody, or control, or is
13 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
14 information to mischaracterize or misinterpret the facts.

15 **Response:** Subject to and without waiving the foregoing objections, the United
16 States denies this Request.

17 **REQUEST FOR ADMISSION NO. 90:** Admit that Karen Erickson, Thad
18 Johnson, Steve Nelson, and Dan Schumacher attended the April 29, 2014 meeting
19 between UnitedHealth and CMS.

20 **Objection:** The United States incorporates its General Objections and Specific
21 Objections to the Definitions and Instructions as if stated herein, including but not
22 limited to, its specific objections to the definition of “CMS.” The United States
23 objects to this Request to the extent it calls for information that is already in
24 UnitedHealth’s possession, custody, or control, or is otherwise available to
25 UnitedHealth and to the extent that UnitedHealth is using this information to
26 mischaracterize or misinterpret the facts.

27 **Response:** Subject to and without waiving the foregoing objections, the United
28 States admits this Request.

1 **REQUEST FOR ADMISSION NO. 91:** Admit that the Government Audio
2 Recorded the April 29, 2014 meeting.

3 **Objection:** The United States incorporates its General Objections and Specific
4 Objections to the Definitions and Instructions as if stated herein, including but not
5 limited to, its specific objections to the definition of “Government.” The United
6 States further objects to this request because it is unduly burdensome for the United
7 States to determine the actions of all “agencies, departments, components, agents,
8 representatives, contractors, attorneys, consultants, and all other Persons acting on its
9 behalf.” For the purposes of this Request, the United States will interpret the
10 definition of “Government” to include only CMS.

11 **Response:** Subject to and without waiving the foregoing objections, the United
12 States denies this Request to the extent that none of the individuals identified in
13 Request for Admission No. 89 Audio Recorded the April 29, 2014 meeting.
14 However, after a reasonable inquiry, the United States responds that it lacks sufficient
15 information to admit or deny this Request with respect to CMS or the entire United
16 States Government.

17 **REQUEST FOR ADMISSION NO. 92:** Admit that the Government Video
18 Recorded the April 29, 2014 meeting.

19 **Objection:** The United States incorporates its General Objections and Specific
20 Objections to the Definitions and Instructions as if stated herein, including but not
21 limited to, its specific objections to the definition of “Government.” The United
22 States further objects to this request because it is unduly burdensome for the United
23 States to determine the actions of all “agencies, departments, components, agents,
24 representatives, contractors, attorneys, consultants, and all other Persons acting on its
25 behalf.” For the purposes of this Request, the United States will interpret the
26 definition of “Government” to include only CMS.

27 **Response:** Subject to and without waiving the foregoing objections, the United
28 States denies this Request to the extent that none of the individuals identified in

1 Request for Admission No. 89 Video Recorded the April 29, 2014 meeting.

2 However, after a reasonable inquiry, the United States responds that it lacks sufficient
3 information to admit or deny this Request with respect to CMS or the entire United
4 States Government.

5 **REQUEST FOR ADMISSION NO. 93:** Admit that the April 29, 2014 meeting
6 lasted less than one hour.

7 **Objection:** The United States incorporates its General Objections and Specific
8 Objections to the Definitions and Instructions as if stated herein. The United States
9 objects to this Request to the extent it seeks information not relevant to a claim or
10 defense in this case. The United States objects to this Request to the extent it calls for
11 information that is already in UnitedHealth's possession, custody, or control, or is
12 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
13 information to mischaracterize or misinterpret the facts.

14 **Response:** Subject to and without waiving the foregoing objections, the United
15 States admits this Request.

16 **REQUEST FOR ADMISSION NO. 94:** Admit that Sean Cavanaugh took notes
17 during the April 29, 2014 meeting between UnitedHealth and CMS.

18 **Objection:** The United States incorporates its General Objections and Specific
19 Objections to the Definitions and Instructions as if stated herein, including but not
20 limited to, its specific objections to the definition of "CMS."

21 **Response:** Subject to and without waiving the foregoing objections, the United
22 States denies this Request.

23 **REQUEST FOR ADMISSION NO. 95:** Admit that after the April 29, 2014
24 meeting between UnitedHealth and CMS, Sean Cavanaugh took notes about or
25 otherwise memorialized the meeting in writing.

26 **Objection:** The United States incorporates its General Objections and Specific
27 Objections to the Definitions and Instructions as if stated herein, including but not
28 limited to, its specific objections to the definition of "CMS." The United States also

1 objects to this Request to the extent that the undefined phrase “or otherwise
2 memorialized” is vague and ambiguous. For the purposes of this Request, the United
3 States defines “memorialized” as put in writing.

4 **Response:** Subject to and without waiving the foregoing objections, the United
5 States denies this Request.

6 **REQUEST FOR ADMISSION NO. 96:** Admit that after the April 29, 2014
7 meeting between UnitedHealth and CMS, Sean Cavanaugh had Communications
8 with the Government about the meeting.

9 **Objection:** The United States incorporates its General Objections and Specific
10 Objections to the Definitions and Instructions as if stated herein, including but not
11 limited to, its specific objections to the definitions of “CMS” and “Government.”
12 The United States objects to this Request to the extent it seeks disclosure of
13 information that is protected from disclosure by an applicable privilege or protection,
14 including the attorney-client privilege, attorney work-product doctrine, deliberative
15 process privilege, and/or investigative files privilege. For the purposes of this
16 Request, the United States will interpret the definition of “Government” to include
17 only CMS.

18 **Response:** Subject to and without waiving the foregoing objections, the United
19 States admits this Request.

20 **REQUEST FOR ADMISSION NO. 97:** Admit that Cheri Rice took notes during
21 the April 29, 2014 meeting between UnitedHealth and CMS.

22 **Objection:** The United States incorporates its General Objections and Specific
23 Objections to the Definitions and Instructions as if stated herein, including but not
24 limited to, its specific objections to the definition of “CMS.”

25 **Response:** Subject to and without waiving the foregoing objections, the United
26 States denies this Request.

27 **REQUEST FOR ADMISSION NO. 98:** Admit that after the April 29, 2014
28 meeting between UnitedHealth and CMS, Cheri Rice took notes about or otherwise

1 memorialized the meeting in writing.

2 **Objection:** The United States incorporates its General Objections and Specific
3 Objections to the Definitions and Instructions as if stated herein, including but not
4 limited to, its specific objections to the definition of “CMS.” The United States also
5 objects to this Request to the extent that the undefined phrase “or otherwise
6 memorialized” is vague and ambiguous. For the purposes of this Request, the United
7 States defines “memorialized” as put in writing.

8 **Response:** Subject to and without waiving the foregoing objections, the United
9 States admits this Request to the extent Ms. Rice sent Mr. Nelson a follow up email
10 to the April 29, 2014 meeting, MARA1296257. The United States otherwise denies
11 this Request.

12 **REQUEST FOR ADMISSION NO. 99:** Admit that after the April 29, 2014
13 meeting between UnitedHealth and CMS, Cheri Rice had Communications with the
14 Government about the meeting.

15 **Objection:** The United States incorporates its General Objections and Specific
16 Objections to the Definitions and Instructions as if stated herein, including but not
17 limited to, its specific objections to the definitions of “CMS” and “Government.”
18 The United States objects to this Request to the extent it seeks disclosure of
19 information that is protected from disclosure by an applicable privilege or protection,
20 including the attorney-client privilege, attorney work-product doctrine, deliberative
21 process privilege, and/or investigative files privilege. For the purposes of this
22 Request, the United States will interpret the definition of “Government” to include
23 only CMS.

24 **Response:** Subject to and without waiving the foregoing objections, the United
25 States admits this Request.

26 **REQUEST FOR ADMISSION NO. 100:** Admit that Cynthia Tudor took written
27 notes during the April 29, 2014 meeting between UnitedHealth and CMS.

28 **Objection:** The United States incorporates its General Objections and Specific

1 Objections to the Definitions and Instructions as if stated herein, including but not
2 limited to, its specific objections to the definition of “CMS.”

3 **Response:** Subject to and without waiving the foregoing objections, the United
4 States admits that Cynthia Tudor took informal notes during the April 29, 2014
5 meeting.

6 **REQUEST FOR ADMISSION NO. 101:** Admit that after the April 29, 2014
7 meeting between UnitedHealth and CMS, Cynthia Tudor took written notes about or
8 otherwise memorialized the meeting in writing.

9 **Objection:** The United States incorporates its General Objections and Specific
10 Objections to the Definitions and Instructions as if stated herein, including but not
11 limited to, its specific objections to the definition of “CMS.” The United States also
12 objects to this Request to the extent that the undefined phrase “or otherwise
13 memorialized” is vague and ambiguous. For the purposes of this Request, the United
14 States defines “memorialized” as put in writing.

15 **Response:** Subject to and without waiving the foregoing objections, the United
16 States denies this Request.

17 **REQUEST FOR ADMISSION NO. 102:** Admit that after the April 29, 2014
18 meeting between UnitedHealth and CMS, Cynthia Tudor had Communications with
19 the Government about the meeting.

20 **Objection:** The United States incorporates its General Objections and Specific
21 Objections to the Definitions and Instructions as if stated herein, including but not
22 limited to, its specific objections to the definitions of “CMS” and “Government.”
23 The United States objects to this Request to the extent it seeks disclosure of
24 information that is protected from disclosure by an applicable privilege or protection,
25 including the attorney-client privilege, attorney work-product doctrine, deliberative
26 process privilege, and/or investigative files privilege. For the purposes of this
27 Request, the United States will interpret the definition of “Government” to include
28 only CMS.

1 **Response:** Subject to and without waiving the foregoing objections, the United
2 States responds that, after a reasonable inquiry, it lacks sufficient information to
3 admit or deny this Request

4 **REQUEST FOR ADMISSION NO. 103:** Admit that Dan Farmer took written
5 notes during the April 29, 2014 meeting between UnitedHealth and CMS.

6 **Objection:** The United States incorporates its General Objections and Specific
7 Objections to the Definitions and Instructions as if stated herein, including but not
8 limited to, its specific objections to the definition of “CMS.”

9 **Response:** Subject to and without waiving the foregoing objections, the United
10 States responds that, after a reasonable inquiry, it lacks sufficient information to
11 admit or deny this Request. To the extent the United States identifies notes by Mr.
12 Farmer taken during the April 29, 2014 meeting, it will supplement this Response.

13 **REQUEST FOR ADMISSION NO. 104:** Admit that after the April 29, 2014
14 meeting between UnitedHealth and CMS, Dan Farmer took written notes about or
15 otherwise memorialized the meeting in writing.

16 **Objection:** The United States incorporates its General Objections and Specific
17 Objections to the Definitions and Instructions as if stated herein, including but not
18 limited to, its specific objections to the definition of “CMS.” The United States also
19 objects to this Request to the extent that the undefined phrase “or otherwise
20 memorialized” is vague and ambiguous. For the purposes of this Request, the United
21 States defines “memorialized” as put in writing.

22 **Response:** Subject to and without waiving the foregoing objections, the United
23 States responds that, after a reasonable inquiry, it lacks sufficient information to
24 admit or deny this Request. To the extent the United States identifies a writing made
25 by Mr. Farmer regarding the April 2014 meeting, it will supplement this Response.

26 **REQUEST FOR ADMISSION NO. 105:** Admit that after the April 29, 2014
27 meeting between UnitedHealth and CMS, Dan Farmer had Communications with the
28 Government about the meeting.

1 **Objection:** The United States incorporates its General Objections and Specific
2 Objections to the Definitions and Instructions as if stated herein, including but not
3 limited to, its specific objections to the definitions of “CMS” and “Government.”
4 The United States objects to this Request to the extent it seeks disclosure of
5 information that is protected from disclosure by an applicable privilege or protection,
6 including the attorney-client privilege, attorney work-product doctrine, deliberative
7 process privilege, and/or investigative files privilege. For the purposes of this
8 Request, the United States will interpret the definition of “Government” to include
9 only CMS.

10 **Response:** Subject to and without waiving the foregoing objections, the United
11 States responds that, after a reasonable inquiry, it lacks sufficient information to
12 admit or deny this Request.

13 **REQUEST FOR ADMISSION NO. 106:** Admit that Julia Gerner took written
14 notes during the April 29, 2014 meeting between UnitedHealth and CMS.

15 **Objection:** The United States incorporates its General Objections and Specific
16 Objections to the Definitions and Instructions as if stated herein, including but not
17 limited to, its specific objections to the definition of “CMS.”

18 **Response:** Subject to and without waiving the foregoing objections, the United
19 States denies this Request.

20 **REQUEST FOR ADMISSION NO. 107:** Admit that after the April 29, 2014
21 meeting between UnitedHealth and CMS, Julia Gerner took written notes about or
22 otherwise memorialized the meeting in writing.

23 **Objection:** The United States incorporates its General Objections and Specific
24 Objections to the Definitions and Instructions as if stated herein, including but not
25 limited to, its specific objections to the definition of “CMS.” The United States also
26 objects to this Request to the extent that the undefined phrase “or otherwise
27 memorialized” is vague and ambiguous. For the purposes of this Request, the United
28 States defines “memorialized” as put in writing.

1 **Response:** Subject to and without waiving the foregoing objections, the United
2 States denies this Request.

3 **REQUEST FOR ADMISSION NO. 108:** Admit that after the April 29, 2014
4 meeting between UnitedHealth and CMS, Julia Gorner had Communications with
5 the Government about the meeting.

6 **Objection:** The United States incorporates its General Objections and Specific
7 Objections to the Definitions and Instructions as if stated herein, including but not
8 limited to, its specific objections to the definitions of “CMS” and “Government.”
9 The United States objects to this Request to the extent it seeks disclosure of
10 information that is protected from disclosure by an applicable privilege or protection,
11 including the attorney-client privilege, attorney work-product doctrine, deliberative
12 process privilege, and/or investigative files privilege. For the purposes of this
13 Request, the United States will interpret the definition of “Government” to include
14 only CMS.

15 **Response:** Subject to and without waiving the foregoing objections, the United
16 States denies this Request.

17 **REQUEST FOR ADMISSION NO. 109:** Admit that no one from CMS or from
18 the Government took written notes during the April 29, 2014 meeting between
19 UnitedHealth and CMS.

20 **Objection:** The United States incorporates its General Objections and Specific
21 Objections to the Definitions and Instructions as if stated herein, including but not
22 limited to, its specific objections to the definition of “CMS” and “Government.” The
23 United States further objects to this request because it is unduly burdensome for the
24 United States to determine the actions of all “agencies, departments, components,
25 agents, representatives, contractors, attorneys, consultants, and all other Persons
26 acting on its behalf.” For the purposes of this Request, the United States will
27 interpret the definition of “Government” to include only CMS, and will interpret
28 “CMS” to include only those individuals who attended the meeting on April 29,

1 2014. The United States objects to this Request to extent it is duplicative of Request
2 for Admission Nos. 94, 97, 100, 103 and 106.

3 **Response:** Subject to and without waiving the foregoing objections, the United
4 States denies this Request to the extent Ms. Tudor took informal notes during the
5 meeting.

6 **REQUEST FOR ADMISSION NO. 110:** Admit that after the April 29, 2014
7 meeting between UnitedHealth and CMS, no one from CMS or from the
8 Government took written notes about or otherwise memorialized the meeting in
9 writing.

10 **Objection:** The United States incorporates its General Objections and Specific
11 Objections to the Definitions and Instructions as if stated herein, including but not
12 limited to, its specific objections to the definitions of “CMS” and “Government.”
13 The United States further objects to this request because it is unduly burdensome for
14 the United States to determine the actions of all “agencies, departments, components,
15 agents, representatives, contractors, attorneys, consultants, and all other Persons
16 acting on its behalf.” For the purposes of this Request, the United States will
17 interpret the definition of “Government” to include only CMS, and will interpret
18 “CMS” to include only those individuals who attended the meeting on April 29,
19 2014. The United States also objects to this Request to the extent that the undefined
20 phrase “or otherwise memorialized” is vague and ambiguous. For the purposes of
21 this Request, the United States defines “memorialized” as put in writing. The United
22 States objects to this Request to extent it is duplicative of Request for Admission
23 Nos. 95, 98, 101, 104 and 107.

24 **Response:** Subject to and without waiving the foregoing objections, the United
25 States denies this Request to the extent Ms. Rice sent Mr. Nelson a follow up email to
26 the April 29, 2014 meeting, MARA1296257.

27 **REQUEST FOR ADMISSION NO. 111:** Admit that CMS indicated in the April
28 29, 2014 meeting that CMS understood prior to the meeting that UnitedHealth had

1 asked for the meeting with CMS to receive clarification regarding whether there was
2 a current requirement for MAOs to conduct Two-Way Looks when conducting Chart
3 Reviews.

4 **Objection:** The United States incorporates its General Objections and Specific
5 Objections to the Definitions and Instructions as if stated herein, including but not
6 limited to, its specific objections to the definition “CMS” and “MAO.” For the
7 purposes of this Request, the United States will interpret the definition of “CMS” to
8 include only those individuals who attended the meeting on April 29, 2014. The
9 United States objects to this Request to the extent it calls for information that is
10 already in UnitedHealth’s possession, custody, or control, or is otherwise available to
11 UnitedHealth and to the extent that UnitedHealth is using this information to
12 mischaracterize or misinterpret the facts.

13 **Response:** Subject to and without waiving the foregoing objections, the United
14 States denies this Request.

15 **REQUEST FOR ADMISSION NO. 112:** Admit that UnitedHealth told CMS at
16 the April 29, 2019 meeting that UnitedHealth’s understanding was that MAOs were
17 not required to conduct Two-Way Looks when conducting Chart Reviews prior to the
18 Proposed Medical Record Review Rule taking effect.

19 **Objection:** The United States incorporates its General Objections and Specific
20 Objections to the Definitions and Instructions as if stated herein, including but not
21 limited to, its specific objections to the definition “CMS” and “MAO.” The United
22 States will interpret this request as referencing a meeting on April 29, 2014 not 2019.
23 For the purposes of this Request, the United States will interpret the definition of
24 “CMS” to include only those individuals who attended the meeting on April 29,
25 2014. The United States also objects to this Request to the extent that the undefined
26 phrases “Chart Review” is vague and ambiguous. The United States objects to this
27 Request to the extent it calls for information that is already in UnitedHealth’s
28 possession, custody, or control, or is otherwise available to UnitedHealth and to the

1 extent that UnitedHealth is using this information to mischaracterize or misinterpret
2 the facts. The United States objects to this Request to the extent it calls for any legal
3 conclusion.

4 **Response:** Subject to and without waiving the foregoing objections, the United
5 States admits this Request.

6 **REQUEST FOR ADMISSION NO. 113:** Admit that Steve Nelson asked CMS in
7 the April 29, 2014 meeting whether UnitedHealth had to perform Two-Way Looks
8 when conducting Chart Reviews if the Proposed Medical Record Review Rule was
9 finalized.

10 **Objection:** The United States incorporates its General Objections and Specific
11 Objections to the Definitions and Instructions as if stated herein, including but not
12 limited to, its specific objections to the definition “CMS.” For the purposes of this
13 Request, the United States will interpret the definition of “CMS” to include only
14 those individuals who attended the meeting on April 29, 2014. The United States
15 also objects to this Request to the extent that the undefined phrases “Chart Review” is
16 vague and ambiguous. The United States objects to this Request to the extent it calls
17 for information that is already in UnitedHealth’s possession, custody, or control, or is
18 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
19 information to mischaracterize or misinterpret the facts. The United States objects to
20 this Request to the extent it calls for any legal conclusion.

21 **Response:** Subject to and without waiving the foregoing objections, the United
22 States admits this Request.

23 **REQUEST FOR ADMISSION NO. 114:** Admit that Steve Nelson asked CMS in
24 the April 29, 2014 meeting whether UnitedHealth had an obligation to perform Two-
25 Way Looks when conducting Chart Reviews prior to the implementation of the
26 Proposed Medical Record Review Rule.

27 **Objection:** The United States incorporates its General Objections and Specific
28 Objections to the Definitions and Instructions as if stated herein, including but not

1 limited to, its specific objections to the definition “CMS.” For the purposes of this
2 Request, the United States will interpret the definition of “CMS” to include only
3 those individuals who attended the meeting on April 29, 2014. The United States
4 also objects to this Request to the extent that the undefined phrases “Chart Review” is
5 vague and ambiguous. The United States objects to this Request to the extent it calls
6 for information that is already in UnitedHealth’s possession, custody, or control, or is
7 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
8 information to mischaracterize or misinterpret the facts. The United States objects to
9 this Request to the extent it calls for any legal conclusion.

10 **Response:** Subject to and without waiving the foregoing objections, the United
11 States admits this Request.

12 **REQUEST FOR ADMISSION NO. 115:** Admit that CMS told UnitedHealth in
13 the April 29, 2014 meeting that UnitedHealth was not required to perform Two-Way
14 Looks when conducting Chart Reviews prior to the Proposed Medical Record
15 Review Rule taking effect.

16 **Objection:** The United States incorporates its General Objections and Specific
17 Objections to the Definitions and Instructions as if stated herein, including but not
18 limited to, its specific objections to the definition “CMS.” For the purposes of this
19 Request, the United States will interpret the definition of “CMS” to include only
20 those individuals who attended the meeting on April 29, 2014. The United States
21 also objects to this Request to the extent that the undefined phrases “Chart Review” is
22 vague and ambiguous. The United States objects to this Request to the extent it calls
23 for information that is already in UnitedHealth’s possession, custody, or control, or is
24 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
25 information to mischaracterize or misinterpret the facts. The United States objects to
26 this Request to the extent it calls for any legal conclusion.

27 **Response:** Subject to and without waiving the foregoing objections, the United
28 States denies this Request. Further, the United States responds that on May 2, 2014,

1 Cheri Rice sent an email bates labeled MARA2157067 to Steve Nelson stating that
2 "...I would note that regardless of the effective date of the proposed requirement
3 related to medical record reviews, there are other laws that do impose standards,
4 requirements and responsibilities on MA plans in connection with the federal
5 payments they receive from CMS."

No. CV 16-08697 MWF (SSx)

UNITED STATES' RESPONSES AND
OBJECTIONS TO DEFENDANT UHC
OF CALIFORNIA'S REQUESTS FOR
ADMISSION TO THE GOVERNMENT
(SET NO. THREE)

PROPOUNDING PARTY: UHC OF CALIFORNIA, INC.

RESPONDING PARTY: UNITED STATES OF AMERICA

SET NUMBER: THREE

Preliminary Statement

Pursuant to Rules 26 and 36 of the Federal Rules of Civil Procedure (“Federal Rules”) and Rule 36 of the Local Civil Rules of the United States District Court for the Central District of California, the United States of America (“United States” or “government”), through its undersigned counsel, provides these responses and objections to Defendant UHC of California’s (“UnitedHealth” or “Defendant”) Requests for Admission (Set No. Three), dated December 13, 2019 (“Third Requests”). The objections and responses set forth herein are based on information now known to the United States and its undersigned attorneys, and will be revised, corrected, supplemented, amended, and clarified to the extent required by Rule 26 as discovery proceeds.

UnitedHealth’s 104 Requests for Admission in its Third Requests are in large part duplicative of both each other and the 97 Requests for Admission in UnitedHealth’s Second Set of Requests for Admission (“Second Requests”). For example, Request Nos. 165 and 167 are *identical*, and both are duplicative of 163, multiple Requests seek identical information and differ only in minor word changes (e.g. Request Nos. 138 and 139, 140 and 141), and multiple Requests are duplicative of the Second Requests (e.g. Request Nos. 116 and 112). Given the overlap and duplication among the Second and Third Requests and that the Third Request in large part seek information already in UnitedHealth’s possession, it is apparent that the Third Request was designed to burden, harass, and annoy the United States rather than seek information to serve any legitimate purpose. Further numerous Requests seek information already in UnitedHealth’s possession (e.g. Request Nos. 144 and 145) and again appear to be served only to increase the time and resources the United

1 States must spend in responding to discovery rather than facilitate proof on issues that
2 are central to the litigation and to narrow the dispute between the parties. See Fed. R.
3 Civ. P. 36 Advisory Committee's Note.

4 **General Objections**

5 The following objections apply to each and every separately numbered Request
6 and are incorporated by reference to the extent applicable into the objection to each
7 Request.

8 1. The United States objects to the Third Requests to the extent they are vague,
9 ambiguous, overbroad, unduly burdensome, or seek to impose requirements upon the
10 United States beyond those called for or permitted by the Federal Rules of Civil
11 Procedure, the Local Civil Rules of the United States District Court for the Central
12 District of California, or any order of the Court. The United States responds below
13 pursuant to its obligations under the Federal Rules and the Local Civil Rules, namely
14 that the United States has taken and is continuing to undertake reasonable efforts to
15 identify information responsive to the Requests.

16 2. The United States objects to the Third Requests to the extent they seek the
17 disclosure of information concerning the United States' investigation of this matter as
18 well as the United States' investigation in *United States of America ex rel. Swoben v.*
19 *SCAN Health Plan, et al.*, CV 09-5013 (JEMx)), 2017 U.S. Dist. LEXIS 174308
20 (C.D. Cal. Oct. 5, 2017) ("*Swoben*"). This includes, but is not limited to, the United
21 States' investigative efforts, its assessments of facts and allegations, its deliberative
22 processes concerning actions taken regarding this matter and *Swoben*, and other
23 information generated before and after the commencement of both this litigation and
24 *Swoben*. The United States objects on the grounds that such information is
25 privileged, work product protected, not relevant to claims or defenses, and not
26 proportional to the needs of the case.

27 3. The United States objects to logging the following information withheld on the
28 basis of privilege regarding both this and the *Swoben* action: (a) communications

1 between or among attorneys at the United States Department of Justice (DOJ),
2 including, but not limited to, attorneys at DOJ's Civil Division and the United States
3 Attorneys' Offices both during the Government's pre-complaint investigation and
4 after the Government commenced action; (b) communications between or among
5 attorneys at DOJ and attorneys at the United States Department of Health & Human
6 Services (HHS) both during the Government's pre-complaint investigation and after
7 the Government commenced action; (c) communications between or among attorneys
8 at DOJ and counsel for Relator James Swoben and/or counsel for Relator Benjamin
9 Poehling during the Government's pre-complaint investigation and after the
10 Government commenced action; (d) work product or other privileged documents
11 generated by or sent to or from attorneys for DOJ, HHS, Relator James Swoben
12 and/or Relator Benjamin Poehling and any of agents or contractors for said attorneys
13 both during the Government's pre-complaint investigation and after the Government
14 commenced action. The United States asserts this objection on the grounds that such
15 effort would impose undue and extraordinary burdens on the United States, seek
16 information not relevant to the claims and defenses in this action, and be
17 disproportionate to the needs of this case.

18 4. Pursuant to Rule 36, any admissions contained herein are for purposes of the
19 present action only and shall not be taken as admissions for any other purpose,
20 including for purposes of any other case.

21 5. By making the accompanying responses and objections to Defendant's Third
22 Requests, the government does not waive, and hereby expressly reserves, its right to
23 assert any and all objections as to the admissibility of any documents, testimony, or
24 information into evidence in this action, or in any other proceedings, on any and all
25 grounds including, but not limited to, competency, relevancy, materiality, privilege,
26 or admissibility. Further, the government makes the responses and objections herein
27 without in any way implying that it considers the Third Requests to be relevant or
28 material to the subject matter of this action.

1 6. The United States objects to the below Third Requests to the extent that a
2 response to such Request requires disclosure of information protected from disclosure
3 by an applicable privilege or protection, including, but not limited to, the attorney-
4 client privilege, work product doctrine, deliberative process privilege, law
5 enforcement privilege, common interest privilege, or investigative files privilege, and
6 protections afforded by Fed. R. Civ. P. 26(b), or any other applicable privilege. The
7 United States will not respond in such a way as to disclose such protected
8 information, but inadvertent identification or disclosure of privileged information by
9 the United States shall not be a waiver of any applicable privilege. Under Federal
10 Rule of Evidence 502, Federal Rule of Civil Procedure 26(b)(5)(B), other related
11 sources of law, and the Court's order regarding inadvertent disclosure of privileged
12 information [Doc. 198], the government reserves any and all rights to claw back
13 privileged information it inadvertently discloses in response to the Requests.

14 7. The United States submits these responses subject to, without intending to
15 waive, but expressly reserving the right to object to other discovery procedures
16 involving or relating to the subject matter of the information in responses to the Third
17 Requests. The United States reserves the right to object on any ground, at any time,
18 to such other or supplemental requests as the Defendants may propound involving or
19 relating to the subject matter of these Requests.

20 8. The United States objects to the Third Requests to the extent they are based on
21 inaccurate assumptions or misstatements of fact or misconstructions of law. Nothing
22 herein is intended to concede the accuracy of the assumptions, facts, or law
23 underlying the Third Requests.

24 9. The United States reserves the right to supplement its responses to each and
25 every Request at any time, up to and including trial, as provided by the Federal Rules.

26 10. The assertion of the same, similar, or additional objections to the below Third
27 Requests does not and should not be construed to waive or modify any of the United
28 States' general objections.

11. The United States objects to the Third Requests to the extent they require the United States to draw legal conclusions, comment on the merits of any affirmative defenses, or otherwise seek to impose any requirements beyond those established by the Federal Rules or the Local Rules.

Specific Objections to the Definitions and Instructions

The United States objects to the Definitions and Instructions to the extent they (i) seek to impose burdens on the United States that are different from, inconsistent with, or exceed those imposed by the Federal Rules of Civil Procedure and the Local Civil Rules, (ii) are vague or ambiguous, and/or (iii) render the Third Requests overly broad, unduly burdensome, not proportionate to the needs of the case, and not relevant. The United States further objects to the Third Requests to the extent they use terms not defined by UnitedHealth.

Definition 2: The United States objects to the definition of “Actuarial Equivalence” to the extent that it is vague and ambiguous. Subject to and without waiving these objections, for the purposes of responding to these Requests, the United States interprets “Actuarial Equivalence” as used by Congress in 42 U.S.C. § 1395w-23(a)(1)(C)(i).

Definition 6: The United States objects to the definition of “Beneficiary” or “Member” as overly broad. Subject to and without waiving this objection, for the purposes of responding to these Requests the United States interprets these terms to mean individuals enrolled in UnitedHealth's Medicare Advantage (MA) Plans under Part C of the Medicare Program, Prescription Drug (PD) Plans under Part D of the Medicare Program, and MAPD Plans under both Parts C and D of the Medicare Program.

Definitions 10, 21, 28, and 30: The United States objects to the definition of “Government” (Definition 21) to the extent it includes any agency, department, component, agent, representative, contractor, attorney, consultant, or person acting on its behalf not relevant to this action. This definition is plainly unreasonable. Subject

1 to and without waiving these objections, the United States interprets “Government” to
2 mean CMS for purposes of the Third Requests. The United States further objects to
3 the term “Person” (Definition 30) to the extent it is defined to mean “...the federal
4 government and all departments and agencies thereof, state governments, local
5 governments, other governmental agencies....” The United States objects to the
6 definitions of “CMS” (Definition 10), “Government” (Definition 21), “OIG”
7 (Definition 28), and “Person” (Definition 30) as unduly burdensome and
8 disproportionate to the needs of the case to the extent they require the United States
9 to provide information not currently in the possession, custody, or control of CMS
10 and HHS-OIG. Furthermore, the United States objects to the extent each definition
11 includes former CMS contractors for whom the United States presently has no
12 reasonable belief they possess or control non-duplicative information relevant to any
13 claim or defense in this case.

14 **Definition 15:** The United States objects to the definition of “DOJ” as unduly
15 burdensome and disproportionate to the needs of the case to the extent that it includes
16 any agencies components, offices, representatives, contractors, attorneys, consultants, or
17 any person acting on its behalf not relevant to this action. Definition 15 is plainly
18 unreasonable.

19 **Definitions 22 and 33:** The United States objects to the definitions of “including,”
20 “relating to,” and “regarding” as rendering the Third Requests vague, ambiguous,
21 confusing, overly broad, and unduly burdensome and disproportionate to the needs of
22 the case. Indeed, these terms as defined seek any piece of information that in some
23 way – no matter how remote, indirect, or tangential – mentions or references matters
24 set forth in the Request. The United States responds to these Third Requests by using
25 these terms and the verbs constituting their definitions as limited by the constraining
26 adverb “directly.”

27 **Definition 27:** The United States also objects to the definition of “Medicare
28 Advantage Organization” and “MAO” (Definition 27) to the extent it is inconsistent

1 with the definition provided by 42 U.S.C. § 1395w-28(a)(1). For the purpose of
2 responding to the Requests, the United States shall use the definition of MA Plans
3 provided by 42 U.S.C. § 1395w-28(b)(1) and the definition of MAO provided by 42
4 U.S.C. § 1395w-28(a)(1).

5 **Definition 32:** The United States objects to the definition of “Provider” as overbroad
6 and unduly burdensome and disproportionate to the needs of the case to the extent it
7 includes entities or individuals that cannot be used to submit diagnoses for risk
8 adjustment payments.

9 **Definition 34:** The United States objects to the definition of “Risk Adjustment” to the
10 extent it is inconsistent with 42 U.S.C. § 1395w-23 and 42 C.F.R. § 422.308(c)(1).

11 **Definition 35:** The United States objects to the definition of “Risk Adjustment
12 Attestation” as overly broad to the extent this term is intended to encompass all
13 attestations required by 42 C.F.R. § 422.504(l). Subject to and without waiving this
14 objection, the United States will interpret this term to have the meaning set forth in 42
15 C.F.R. § 422.504(l)(2) (“The CEO, CFO, or an individual delegated with the
16 authority to sign on behalf of one of these officers, and who reports directly to such
17 officer, must certify (based on best knowledge, information, and belief) that the data
18 it submits under § 422.310 are accurate, complete, and truthful.”).

19 **Definition 36:** The United States objects to the definition of “State” to the extent it
20 seeks to impose burdens on the United States that are different from, inconsistent
21 with, or exceed those imposed by the Federal Rules of Civil Procedure and the Local
22 Civil Rules.

23 **Definition 40:** The United States objects to the definition of “you” and “your” to the
24 extent these terms are intend to encompass any agency, office, employee, agent,
25 representative, officer, or contractor of either the legislative or judicial branch, and
26 insofar as these terms are defined to include executive branch agencies and offices
27 not relevant to this action. This is plainly unreasonable. Subject to and without
28 waiving these objections, the United States will interpret this term to mean CMS.

1 **Instruction 3:** The United States objects to Instruction 3 as vague and construes
2 each request to include the time period from January 1, 2004 through May 16, 2017.

3 **Instructions 4:** The United States objects to Instruction 4 to the extent it seeks to
4 impose burdens upon the United States beyond those called for or permitted by the
5 Federal Rules or the Local Rules for the Central District of California. The United
6 States will respond to unobjectionable Requests or portions of Requests to the best of
7 its present ability. The United States submits these responses subject to, without
8 intending to waive, but expressly reserving the right to revise, correct, supplement or
9 clarify any of the responses herein at any time up to and including trial. Said
10 responses are at all times without prejudice subject to such additional or different
11 information that discovery or further investigation may disclose.

12 **Instruction 5:** The United States objects to Instruction 5 to the extent it seeks to
13 impose burdens upon the United States beyond those called for or permitted by the
14 Federal Rules or the Local Rules for the Central District of California.

15 **Instruction 6:** The United States objects to Instruction 6 to the extent it seeks to
16 impose burdens upon the United States beyond those called for or permitted by the
17 Federal Rules or the Local Rules for the Central District of California. The United
18 States will assert any applicable privileges and specify the material to which it applies
19 per Fed. R. Civ. P. 25(b)(5)(A) for all information responsive to a request to which
20 the United States has agreed to produce but which is withheld on the basis of a
21 privilege or protection.

Specific Objections and Responses to Requests for Admission

REQUEST FOR ADMISSION NO. 116: Admit that UnitedHealth told CMS at the April 29, 2014 Meeting that UnitedHealth's understanding was that MAOs were not required to conduct Two-Way Looks when conducting Chart Reviews prior to the Proposed Medical Record Review Rule taking effect.

Objection: The United States incorporates its General Objections and Specific Objections to the Definitions and Instructions as if stated herein, including but not limited to, its specific objections to the definitions of "CMS" and "MAO." For the purposes of responding to this Request, the United States will interpret the definition of "CMS" to include only those individuals who attended the meeting on April 29, 2014. The United States objects to this Request as duplicative of Request for Admission No. 112 from the Second Set of Requests. The United States further objects to this Request to the extent it calls for information that is already in UnitedHealth's possession, custody, or control, or is otherwise available to UnitedHealth and to the extent that UnitedHealth is using this information to mischaracterize or misinterpret the facts. The United States objects to this Request to the extent it calls for any legal conclusion.

Response: Subject to and without waiving the foregoing objections, the United States admits this Request.

REQUEST FOR ADMISSION NO. 117: Admit that, other than Sean Cavanaugh, Cheri Rice, Cynthia Tudor, Dan Farmer, and Julie Uebersax, no other person from CMS or the Government attended the April 29, 2014 meeting.

Objection: The United States incorporates its General Objections and Specific Objections to the Definitions and Instructions as if stated herein, including but not limited to, its specific objections to the definitions of "CMS," "Government," and "Person." The United States objects to this Request to the extent it calls for information that is already in UnitedHealth's possession, custody, or control, or is otherwise available to UnitedHealth and to the extent that UnitedHealth is using this

1 information to mischaracterize or misinterpret the facts.

2 **Response:** Subject to and without waiving the foregoing objections, the United
3 States admits this Request.

4 **REQUEST FOR ADMISSION NO. 118:** Admit that, other than Sean Cavanaugh,
5 Cheri Rice, Cynthia Tudor, and Dan Farmer, no other person from CMS or the
6 Government attended the April 29, 2014 meeting.

7 **Objection:** The United States incorporates its General Objections and Specific
8 Objections to the Definitions and Instructions as if stated herein, including but not
9 limited to, its specific objections to the definitions of “CMS,” “Government,” and
10 “Person.” The United States objects to this Request to the extent it calls for
11 information that is already in UnitedHealth’s possession, custody, or control, or is
12 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
13 information to mischaracterize or misinterpret the facts.

14 **Response:** Subject to and without waiving the foregoing objections, the United
15 States denies this Request.

16 **REQUEST FOR ADMISSION NO. 119:** Admit that Julie Uebersax attended the
17 April 29, 2014 meeting.

18 **Objection:** The United States incorporates its General Objections and Specific
19 Objections to the Definitions and Instructions as if stated herein. The United States
20 objects to this Request to the extent it calls for information that is already in
21 UnitedHealth’s possession, custody, or control, or is otherwise available to
22 UnitedHealth and to the extent that UnitedHealth is using this information to
23 mischaracterize or misinterpret the facts.

24 **Response:** Subject to and without waiving the foregoing objections, the United
25 States admits this Request.

26 **REQUEST FOR ADMISSION NO. 120:** Admit that UnitedHealth told CMS at
27 the April 29, 2014 Meeting that UnitedHealth had suspended its Claims Verification
28 Program.

1 **Objection:** The United States incorporates its General Objections and Specific
2 Objections to the Definitions and Instructions as if stated herein, including but not
3 limited to, its specific objections to the definition of “CMS.” For the purposes of
4 responding to this Request, the United States will interpret the definition of “CMS” to
5 include only those individuals who attended the meeting on April 29, 2014. The
6 United States also objects to this Request to the extent that the undefined term
7 “suspended” is vague and ambiguous. For the purposes of responding to this
8 Request, the United States defines the term “suspended” as stopped or delayed
9 temporarily. The United States objects to this Request to the extent it calls for
10 information that is already in UnitedHealth’s possession, custody, or control, or is
11 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
12 information to mischaracterize or misinterpret the facts. The United States further
13 objects to this Request to the extent it calls for any legal conclusion.

14 **Response:** Subject to and without waiving the foregoing objections, after a
15 reasonable inquiry, the United States responds that it lacks sufficient information to
16 admit or deny this Request.

17 **REQUEST FOR ADMISSION NO. 121:** Admit that UnitedHealth told CMS at
18 the April 29, 2014 Meeting that UnitedHealth had suspended its Claims Verification
19 Program based in part on UnitedHealth’s discussions with CMS in March and April
20 2014.

21 **Objection:** The United States incorporates its General Objections and Specific
22 Objections to the Definitions and Instructions as if stated herein, including but not
23 limited to, its specific objections to the definition of “CMS.” For the purposes of
24 responding to this Request, the United States will interpret the definition of “CMS” to
25 include only those individuals who attended the meeting on April 29, 2014. The
26 United States also objects to this Request to the extent that the undefined term
27 “suspended” is vague and ambiguous. For the purposes of responding to this
28 Request, the United States defines the term “suspended” as stopped or delayed

1 temporarily. The United States objects to this Request to the extent it calls for
2 information that is already in UnitedHealth's possession, custody, or control, or is
3 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
4 information to mischaracterize or misinterpret the facts. The United States further
5 objects to this Request to the extent it calls for any legal conclusion.

6 **Response:** Subject to and without waiving the foregoing objections, after a
7 reasonable inquiry, the United States responds that it lacks sufficient information to
8 admit or deny this Request.

9 **REQUEST FOR ADMISSION NO. 122:** Admit that UnitedHealth told CMS at
10 the April 29, 2014 Meeting that UnitedHealth had suspended its Claims Verification
11 Program based in part on the inherent error rate in Fee-For-Service Medicare data.

12 **Objection:** The United States incorporates its General Objections and Specific
13 Objections to the Definitions and Instructions as if stated herein, including but not
14 limited to, its specific objections to the definition of "CMS." For the purposes of
15 responding to this Request, the United States will interpret the definition of "CMS" to
16 include only those individuals who attended the meeting on April 29, 2014. The
17 United States also objects to this Request to the extent that the undefined term
18 "suspended" is vague and ambiguous. For the purposes of responding to this
19 Request, the United States defines the term "suspended" as stopped or delayed
20 temporarily. The United States objects to this Request to the extent the phrase
21 "inherent error rate" is vague and ambiguous as it is undefined and the United States
22 lacks knowledge about what is being requested. The United States objects to this
23 Request as improper under Federal Rule of Civil Procedure 36 and applicable case
24 law to the extent it is compound in that it asks the United States to admit multiple
25 facts in one Request. The United States objects to this Request to the extent it calls
26 for information that is already in UnitedHealth's possession, custody, or control, or is
27 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
28 information to mischaracterize or misinterpret the facts. The United States further

1 objects to this Request to the extent it calls for any legal conclusion.

2 **Response:** Subject to and without waiving the foregoing objections, after a
3 reasonable inquiry, the United States responds that it lacks sufficient information to
4 admit or deny this Request.

5 **REQUEST FOR ADMISSION NO. 123:** Admit that UnitedHealth told CMS at
6 the April 29, 2014 Meeting that UnitedHealth had suspended its Claims Verification
7 Program based in part on the Proposed Medical Record Review Rule.

8 **Objection:** The United States incorporates its General Objections and Specific
9 Objections to the Definitions and Instructions as if stated herein, including but not
10 limited to, its specific objections to the definition of “CMS.” For the purposes of
11 responding to this Request, the United States will interpret the definition of “CMS” to
12 include only those individuals who attended the meeting on April 29, 2014. The
13 United States also objects to this Request to the extent that the undefined terms and
14 phrases “suspended” is vague and ambiguous. For the purposes of responding to this
15 Request, the United States defines the term “suspended” as stopped or delayed
16 temporarily. The United States objects to this Request as improper under Federal
17 Rule of Civil Procedure 36 and applicable case law to the extent it is compound in
18 that it asks the United States to admit multiple facts in one Request. The United
19 States objects to this Request to the extent it calls for information that is already in
20 UnitedHealth’s possession, custody, or control, or is otherwise available to
21 UnitedHealth and to the extent that UnitedHealth is using this information to
22 mischaracterize or misinterpret the facts. The United States further objects to this
23 Request to the extent it calls for any legal conclusion.

24 **Response:** Subject to and without waiving the foregoing objections, after a reasonable
25 inquiry, the United States responds that it lacks sufficient information to admit or deny
26 this Request.

27 **REQUEST FOR ADMISSION NO. 124:** Admit that UnitedHealth told CMS at
28 the April 29, 2014 Meeting about its Claims Verification Program.

1 **Objection:** The United States incorporates its General Objections and Specific
2 Objections to the Definitions and Instructions as if stated herein, including but not
3 limited to, its specific objections to the definition of “CMS.” For the purposes of
4 responding to this Request, the United States will interpret the definition of “CMS” to
5 include only those individuals who attended the meeting on April 29, 2014. The
6 United States also objects to this Request as vague and ambiguous to the extent that it
7 does not specify what UnitedHealth told CMS about its Claims Verification Program.
8 The United States further objects to this Request to the extent it calls for information
9 that is already in UnitedHealth’s possession, custody, or control, or is otherwise
10 available to UnitedHealth and to the extent that UnitedHealth is using this
11 information to mischaracterize or misinterpret the facts.

12 **Response:** Subject to and without waiving the foregoing objections, the United
13 States admits that UnitedHealth brought up the topic of its internal review processes
14 during the April 29, 2014 meeting, but after a reasonable inquiry, it lacks sufficient
15 information to admit or deny the remainder of this Request.

16 **REQUEST FOR ADMISSION NO. 125:** Admit that UnitedHealth told CMS at
17 the April 29, 2014 Meeting that its Claims Verification Program included a final step,
18 which consisted of a review of Diagnosis Codes by external coding experts.

19 **Objection:** The United States incorporates its General Objections and Specific
20 Objections to the Definitions and Instructions as if stated herein, including but not
21 limited to, its specific objections to the definition of “CMS.” For the purposes of
22 responding to this Request, the United States will interpret the definition of “CMS” to
23 include only those individuals who attended the meeting on April 29, 2014. The
24 United States objects to this Request to the extent the phrase “external coding
25 experts” is vague and ambiguous as it is undefined and the United States lacks
26 knowledge about what is being requested. The United States further objects to this
27 Request to the extent it calls for information that is already in UnitedHealth’s
28 possession, custody, or control, or is otherwise available to UnitedHealth and to the

1 extent that UnitedHealth is using this information to mischaracterize or misinterpret
2 the facts.

3 **Response:** Subject to and without waiving the foregoing objections, after a
4 reasonable inquiry, the United States responds that it lacks sufficient information to
5 admit or deny this Request.

6 **REQUEST FOR ADMISSION NO. 126:** Admit that UnitedHealth told CMS at
7 the April 29, 2014 Meeting about the number of Diagnosis Codes that UnitedHealth
8 had submitted as Deletes to CMS for 2012 Dates of Service prior to the April 29,
9 2014 Meeting.

10 **Objection:** The United States incorporates its General Objections and Specific
11 Objections to the Definitions and Instructions as if stated herein, including but not
12 limited to, its specific objections to the definition of “CMS.” For the purposes of
13 responding to this Request, the United States will interpret the definition of “CMS” to
14 include only those individuals who attended the meeting on April 29, 2014. The
15 United States objects to this Request to the extent it calls for information that is
16 already in UnitedHealth’s possession, custody, or control, or is otherwise available to
17 UnitedHealth and to the extent that UnitedHealth is using this information to
18 mischaracterize or misinterpret the facts.

19 **Response:** Subject to and without waiving the foregoing objections, after a
20 reasonable inquiry, the United States responds that it lacks sufficient information to
21 admit or deny this Request.

22 **REQUEST FOR ADMISSION NO. 127:** Admit that, at the April 29, 2014
23 Meeting, Cheri Rice asked UnitedHealth how many Diagnosis Codes for 2012 Dates
24 of Service had not yet gone through the entire Claims Verification Program process.

25 **Objection:** The United States incorporates its General Objections and Specific
26 Objections to the Definitions and Instructions as if stated herein. The United States
27 objects to this Request to the extent it calls for information that is already in
28 UnitedHealth’s possession, custody, or control, or is otherwise available to

1 UnitedHealth and to the extent that UnitedHealth is using this information to
2 mischaracterize or misinterpret the facts. The United States further objects to this
3 Request to the extent it is duplicative of Request for Admission No. 136.

4 **Response:** Subject to and without waiving the foregoing objections, after a
5 reasonable inquiry, the United States responds that it lacks sufficient information to
6 admit or deny this Request.

7 **REQUEST FOR ADMISSION NO. 128:** Admit that, at the April 29, 2014
8 Meeting, UnitedHealth told CMS that the number of new and unique Diagnosis
9 Codes for 2012 Dates of Service that had previously been submitted for deletion was
10 approximately 13,000.

11 **Objection:** The United States incorporates its General Objections and Specific
12 Objections to the Definitions and Instructions as if stated herein, including but not
13 limited to, its specific objections to the definition of “CMS.” For the purposes of
14 responding to this Request, the United States will interpret the definition of “CMS” to
15 include only those individuals who attended the meeting on April 29, 2014. The
16 United States also objects to this Request to the extent that the undefined term
17 “submitted for deletion” is vague and ambiguous. For the purposes of responding to
18 this Request, the United States defines “submitted for deletion” as making a Delete.
19 The United States objects to this Request to the extent the phrase “new and unique” is
20 vague and ambiguous as it is undefined and the United States lacks knowledge about
21 what is being requested. The United States objects to this Request to the extent it
22 calls for information that is already in UnitedHealth’s possession, custody, or control,
23 or is otherwise available to UnitedHealth and to the extent that UnitedHealth is using
24 this information to mischaracterize or misinterpret the facts.

25 **Response:** Subject to and without waiving the foregoing objections, the United
26 States admits that informal notes taken by Cynthia Tudor during the April 29, 2014
27 meeting appear to state “claims new deleted 13K from 2012.” However, the United
28 States responds that, after a reasonable inquiry, it lacks sufficient information to

1 admit or deny the remainder of this Request.

2 **REQUEST FOR ADMISSION NO. 129:** Admit that, at the April 29, 2014
3 Meeting, UnitedHealth told CMS that the number of new and unique Diagnosis
4 Codes for 2012 Dates of Service for which the entire Claims Verification Program
5 process had been completed, but which UnitedHealth had not yet submitted as
6 Deletes, was approximately 8,000.

7 **Objection:** The United States incorporates its General Objections and Specific
8 Objections to the Definitions and Instructions as if stated herein, including but not
9 limited to, its specific objections to the definition “CMS.” For the purposes of this
10 Request, the United States will interpret the definition of “CMS” to include only
11 those individuals who attended the meeting on April 29, 2014. The United States
12 objects to this Request to the extent the phrase “new and unique” is vague and
13 ambiguous as it is undefined and the United States lacks knowledge about what is
14 being requested. The United States objects to this Request to the extent it calls for
15 information that is already in UnitedHealth’s possession, custody, or control, or is
16 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
17 information to mischaracterize or misinterpret the facts.

18 **Response:** Subject to and without waiving the foregoing objections, the United
19 States admits that informal notes taken by Cynthia Tudor during the April 29, 2014
20 meeting appear to state “8k – completed steps – will delete.” However, the United
21 States responds that, after a reasonable inquiry, it lacks sufficient information to
22 admit or deny the remainder of this Request.

23 **REQUEST FOR ADMISSION NO. 130:** Admit that, at the April 29, 2014
24 Meeting, UnitedHealth told CMS that approximately 8,000 Diagnosis Codes for 2012
25 Dates of Service had not been submitted as Deletes due to UnitedHealth’s suspension
26 of its Claims Verification Program.

27 **Objection:** The United States incorporates its General Objections and Specific
28 Objections to the Definitions and Instructions as if stated herein, including but not

1 limited to, its specific objections to the definition of “CMS.” For the purposes of
2 responding to this Request, the United States will interpret the definition of “CMS” to
3 include only those individuals who attended the meeting on April 29, 2014. The
4 United States also objects to this Request to the extent that the undefined term
5 “submitted as deletes” is vague and ambiguous. For the purposes of responding to
6 this Request, the United States defines “submitted as deletes” as making a Delete.
7 The United States also objects to this Request to the extent that the undefined term
8 “suspension” is vague and ambiguous. For the purposes of responding to this
9 Request, the United States defines the term “suspension” as the act of stopping or
10 delaying something temporarily. The United States objects to this Request to the
11 extent it calls for information that is already in UnitedHealth’s possession, custody, or
12 control, or is otherwise available to UnitedHealth and to the extent that UnitedHealth
13 is using this information to mischaracterize or misinterpret the facts.

14 **Response:** Subject to and without waiving the foregoing objections, the United
15 States admits that informal notes taken by Cynthia Tudor during the April 29, 2014
16 meeting appear to state “8k – completed steps – will delete.” However, the United
17 States responds that, after a reasonable inquiry, it lacks sufficient information to
18 admit or deny the remainder of this Request.

19 **REQUEST FOR ADMISSION NO. 131:** Admit that, at the April 29, 2014
20 Meeting, UnitedHealth told CMS that UnitedHealth estimated that approximately
21 40,000 Diagnosis Codes might be deleted if UnitedHealth were to complete its
22 Claims Verification Program for 2012 Dates of Service.

23 **Objection:** The United States incorporates its General Objections and Specific
24 Objections to the Definitions and Instructions as if stated herein, including but not
25 limited to, its specific objections to the definition of “CMS.” For the purposes of
26 responding to this Request, the United States will interpret the definition of “CMS” to
27 include only those individuals who attended the meeting on April 29, 2014. The
28 United States also objects to this Request to the extent that the undefined terms and

1 phrases “might be deleted” and “complete” are vague and ambiguous and the United
2 States lacks knowledge of what is being requested. The United States objects to this
3 Request to the extent it calls for information that is already in UnitedHealth’s
4 possession, custody, or control, or is otherwise available to UnitedHealth and to the
5 extent that UnitedHealth is using this information to mischaracterize or misinterpret
6 the facts.

7 **Response:** Subject to and without waiving the foregoing objections, the United
8 States admits that informal notes taken by Cynthia Tudor during the April 29, 2014
9 meeting appear to state “universe in progress 41k – various stages – not finalized.”
10 However, the United States responds that, after a reasonable inquiry, it lacks
11 sufficient information to admit or deny the remainder of this Request.

12 **REQUEST FOR ADMISSION NO. 132:** Admit that, at the April 29, 2014
13 Meeting, UnitedHealth told CMS that the quality assurance process for Chart Review
14 was different from UnitedHealth’s Claims Verification Program.

15 **Objection:** The United States incorporates its General Objections and Specific
16 Objections to the Definitions and Instructions as if stated herein, including but not
17 limited to, its specific objections to the definition of “CMS.” For the purposes of
18 responding to this Request, the United States will interpret the definition of “CMS” to
19 include only those individuals who attended the meeting on April 29, 2014. The
20 United States also objects to this Request to the extent that the undefined phrase
21 “quality assurance process” is vague and ambiguous and the United States lacks
22 knowledge about what is being requested. The United States objects to this Request
23 to the extent it calls for information that is already in UnitedHealth’s possession,
24 custody, or control, or is otherwise available to UnitedHealth and to the extent that
25 UnitedHealth is using this information to mischaracterize or misinterpret the facts.

26 **Response:** Subject to and without waiving the foregoing objections, after a
27 reasonable inquiry, the United States responds that it lacks sufficient information to
28 admit or deny this Request.

1 **REQUEST FOR ADMISSION NO. 133:** Admit that, at the April 29, 2014
2 Meeting, UnitedHealth told CMS that UnitedHealth's Claims Verification Program
3 was a review of certain Beneficiaries' Charts to identify whether any Diagnosis
4 Codes previously submitted to CMS required submission as Deletes.

5 **Objection:** The United States incorporates its General Objections and Specific
6 Objections to the Definitions and Instructions as if stated herein, including but not
7 limited to, its specific objections to the definition of "CMS." For the purposes of
8 responding to this Request, the United States will interpret the definition of "CMS" to
9 include only those individuals who attended the meeting on April 29, 2014. The
10 United States further objects to this Request to the extent it calls for information that
11 is already in UnitedHealth's possession, custody, or control, or is otherwise available
12 to UnitedHealth and to the extent that UnitedHealth is using this information to
13 mischaracterize or misinterpret the facts. The United States also objects to this
14 Request to the extent it is duplicative of Request for Admission No. 134.

15 **Response:** Subject to and without waiving the foregoing objections, after a
16 reasonable inquiry, the United States responds that it lacks sufficient information to
17 admit or deny this Request.

18 **REQUEST FOR ADMISSION NO. 134:** Admit that, at the April 29, 2014
19 Meeting, UnitedHealth told CMS that UnitedHealth's Claims Verification Program
20 was a process to identify whether any Diagnosis Codes previously submitted to CMS
21 required submission as Deletes.

22 **Objection:** The United States incorporates its General Objections and Specific
23 Objections to the Definitions and Instructions as if stated herein, including but not
24 limited to, its specific objections to the definition of "CMS." For the purposes of
25 responding to this Request, the United States will interpret the definition of "CMS" to
26 include only those individuals who attended the meeting on April 29, 2014. The
27 United States also objects to this Request to the extent that the undefined term
28 "submission as Deletes" is vague and ambiguous. For the purposes of responding to

1 this Request, the United States defines “submission as Deletes” as making a Delete.
2 The United States objects to this Request to the extent it calls for information that is
3 already in UnitedHealth’s possession, custody, or control, or is otherwise available to
4 UnitedHealth and to the extent that UnitedHealth is using this information to
5 mischaracterize or misinterpret the facts. The United States also objects to this
6 Request to the extent it is duplicative of Request for Admission No. 133.

7 **Response:** Subject to and without waiving the foregoing objections, after a
8 reasonable inquiry, the United States responds that it lacks sufficient information to
9 admit or deny this Request.

10 **REQUEST FOR ADMISSION NO. 135:** Admit that, at the April 29, 2014
11 Meeting, UnitedHealth told CMS that the Chart Review quality assurance process
12 focused on reviewing Diagnosis Codes identified during Chart Review.

13 **Objection:** The United States incorporates its General Objections and Specific
14 Objections to the Definitions and Instructions as if stated herein, including but not
15 limited to, its specific objections to the definition of “CMS.” For the purposes of
16 responding to this Request, the United States will interpret the definition of “CMS” to
17 include only those individuals who attended the meeting on April 29, 2014. The
18 United States also objects to this Request to the extent that the undefined phrase
19 “quality assurance process” is vague and ambiguous and the United States lacks
20 knowledge about what is being requested. The United States objects to this Request
21 to the extent it calls for information that is already in UnitedHealth’s possession,
22 custody, or control, or is otherwise available to UnitedHealth and to the extent that
23 UnitedHealth is using this information to mischaracterize or misinterpret the facts.

24 **Response:** Subject to and without waiving the foregoing objections, after a
25 reasonable inquiry, the United States responds that it lacks sufficient information to
26 admit or deny this Request.

27 **REQUEST FOR ADMISSION NO. 136:** Admit that, at the April 29, 2014
28 Meeting, Cheri Rice asked UnitedHealth how many Diagnosis Codes for 2012 Dates

1 of Service UnitedHealth had not yet completed review of in its Claims Verification
2 Program.

3 **Objection:** The United States incorporates its General Objections and Specific
4 Objections to the Definitions and Instructions as if stated herein. The United States
5 objects to this Request to the extent it calls for information that is already in
6 UnitedHealth's possession, custody, or control, or is otherwise available to
7 UnitedHealth and to the extent that UnitedHealth is using this information to
8 mischaracterize or misinterpret the facts. The United States further objects to this
9 Request to the extent it is duplicative of Request for Admission No. 127.

10 **Response:** Subject to and without waiving the foregoing objections, after a
11 reasonable inquiry, the United States responds that it lacks sufficient information to
12 admit or deny this Request.

13 **REQUEST FOR ADMISSION NO. 137:** Admit that UnitedHealth told CMS at
14 the April 29, 2014 Meeting that UnitedHealth had suspended UnitedHealth's Claims
15 Verification Program pending UnitedHealth's decision regarding whether to no
16 longer continue its Claims Verification Program.

17 **Objection:** The United States incorporates its General Objections and Specific
18 Objections to the Definitions and Instructions as if stated herein, including but not
19 limited to, its specific objections to the definition of "CMS." For the purposes of
20 responding to this Request, the United States will interpret the definition of "CMS" to
21 include only those individuals who attended the meeting on April 29, 2014. The
22 United States also objects to this Request to the extent that the undefined term
23 "suspended" is vague and ambiguous. For the purposes of responding to this
24 Request, the United States defines the term "suspended" as stopped or delayed
25 temporarily. The United States objects to this Request as improper under Federal
26 Rule of Civil Procedure 36 and applicable case law to the extent it is compound in
27 that it asks the United States to admit multiple facts in one Request. The United
28 States objects to this Request to the extent it calls for information that is already in

1 UnitedHealth's possession, custody, or control, or is otherwise available to
2 UnitedHealth and to the extent that UnitedHealth is using this information to
3 mischaracterize or misinterpret the facts. The United States further objects to this
4 Request to the extent it calls for any legal conclusion.

5 **Response:** Subject to and without waiving the foregoing objections, after a
6 reasonable inquiry, the United States responds that it lacks sufficient information to
7 admit or deny this Request.

8 **REQUEST FOR ADMISSION NO. 138:** Admit that, at the April 29, 2014
9 Meeting, Cheri Rice told UnitedHealth that MAOs do not have to confirm whether
10 Diagnosis Codes submitted by Providers are supported by a Beneficiaries' Chart.

11 **Objection:** The United States incorporates its General Objections and Specific
12 Objections to the Definitions and Instructions as if stated herein, including but not
13 limited to, its specific objections to the definition of "MAO." The United States also
14 objects to this Request to the extent that the undefined term "confirm" is vague and
15 ambiguous. For the purposes of responding to this request, the United States defines
16 "confirm" as establishing the truth or accuracy of something. The United States
17 objects to this Request to the extent it calls for information that is already in
18 UnitedHealth's possession, custody, or control, or is otherwise available to
19 UnitedHealth and to the extent that UnitedHealth is using this information to
20 mischaracterize or misinterpret the facts. The United States further objects to this
21 Request to the extent it calls for any legal conclusion.

22 **Response:** Subject to and without waiving the foregoing objections, the United
23 States denies this Request.

24 **REQUEST FOR ADMISSION NO. 139:** Admit that, at the April 29, 2014
25 Meeting, Cheri Rice told UnitedHealth that UnitedHealth does not need to confirm
26 whether Diagnosis Codes submitted by Providers are supported by a Beneficiaries'
27 Chart.

28 **Objection:** The United States incorporates its General Objections and Specific

1 Objections to the Definitions and Instructions as if stated herein. The United States
2 also objects to this Request to the extent that the undefined term “confirm” is vague
3 and ambiguous. For the purposes of responding to this request, the United States
4 defines “confirm” as establishing the truth or accuracy of something. The United
5 States objects to this Request to the extent it calls for information that is already in
6 UnitedHealth’s possession, custody, or control, or is otherwise available to
7 UnitedHealth and to the extent that UnitedHealth is using this information to
8 mischaracterize or misinterpret the facts. The United States further objects to this
9 Request to the extent it calls for any legal conclusion. The United States objects to
10 this Request as duplicative of Request No. 138.

11 **Response:** Subject to and without waiving the foregoing objections, the United
12 States denies this Request.

13 **REQUEST FOR ADMISSION NO. 140:** Admit that, at the April 29, 2014
14 Meeting, Sean Cavanaugh told UnitedHealth that if an MAO does not have
15 Knowledge that a Diagnosis Code is not documented in a Beneficiary’s Chart, the
16 MAO does not need to submit that Diagnosis Code to CMS as a Delete.

17 **Objection:** The United States incorporates its General Objections and Specific
18 Objections to the Definitions and Instructions as if stated herein, including but not
19 limited to, its specific objections to the definitions of “CMS” and “MAO.” The
20 United States objects to this Request to the extent it calls for information that is
21 already in UnitedHealth’s possession, custody, or control, or is otherwise available to
22 UnitedHealth and to the extent that UnitedHealth is using this information to
23 mischaracterize or misinterpret the facts. The United States further objects to this
24 Request to the extent it calls for any legal conclusion.

25 **Response:** Subject to and without waiving the foregoing objections, the United
26 States denies this Request.

27 **REQUEST FOR ADMISSION NO. 141:** Admit that, at the April 29, 2014
28 Meeting, Sean Cavanaugh told UnitedHealth that if UnitedHealth does not have

1 Knowledge that Diagnosis Codes are not documented in a Beneficiary's Chart,
2 UnitedHealth would not need to submit those Diagnosis Codes to CMS as Deletes.

3 **Objection:** The United States incorporates its General Objections and Specific
4 Objections to the Definitions and Instructions as if stated herein, including but not
5 limited to, its specific objections to the definitions of "CMS." The United States
6 objects to this Request to the extent it calls for information that is already in
7 UnitedHealth's possession, custody, or control, or is otherwise available to
8 UnitedHealth and to the extent that UnitedHealth is using this information to
9 mischaracterize or misinterpret the facts. The United States further objects to this
10 Request to the extent it calls for any legal conclusion. The United States objects to
11 this Request as duplicative of Request No. 140.

12 **Response:** Subject to and without waiving the foregoing objections, the United
13 States denies this Request.

14 **REQUEST FOR ADMISSION NO. 142:** Admit that, at the April 29, 2014
15 Meeting, Cheri Rice told UnitedHealth that if an MAO does not have Knowledge that
16 a Diagnosis Code is not documented in a Beneficiary's Chart, then the MAO has not
17 received an Overpayment.

18 **Objection:** The United States incorporates its General Objections and Specific
19 Objections to the Definitions and Instructions as if stated herein, including but not
20 limited to, its specific objections to the definition of "MAO." The United States
21 objects to this Request to the extent it calls for information that is already in
22 UnitedHealth's possession, custody, or control, or is otherwise available to
23 UnitedHealth and to the extent that UnitedHealth is using this information to
24 mischaracterize or misinterpret the facts. The United States further objects to this
25 Request to the extent it calls for any legal conclusion.

26 **Response:** Subject to and without waiving the foregoing objections, the United
27 States denies this Request.

1 **REQUEST FOR ADMISSION NO. 143:** Admit that, at the April 29, 2014
2 Meeting, Cheri Rice told UnitedHealth that if UnitedHealth does not have Knowledge
3 that a Diagnosis Code is not documented in a Beneficiary's Chart, then UnitedHealth
4 has not received an Overpayment.

5 **Objection:** The United States incorporates its General Objections and Specific
6 Objections to the Definitions and Instructions as if stated herein. The United States
7 objects to this Request to the extent it calls for information that is already in
8 UnitedHealth's possession, custody, or control, or is otherwise available to
9 UnitedHealth and to the extent that UnitedHealth is using this information to
10 mischaracterize or misinterpret the facts. The United States further objects to this
11 Request to the extent it calls for any legal conclusion. The United States objects to
12 this Request as duplicative of Request No. 142.

13 **Response:** Subject to and without waiving the foregoing objections, the United
14 States denies this Request.

15 **REQUEST FOR ADMISSION NO. 144:** Admit that UnitedHealth submitted a
16 Risk Adjustment Attestation to CMS on April 30, 2014.

17 **Objection:** The United States incorporates its General Objections and Specific
18 Objections to the Definitions and Instructions as if stated herein, including but not
19 limited to, its specific objections to the definition of "CMS." The United States
20 objects to this Request to the extent it calls for information that is already in
21 UnitedHealth's possession, custody, or control, or is otherwise available to
22 UnitedHealth and to the extent that UnitedHealth is using this information to
23 mischaracterize or misinterpret the facts. The United States further objects to this
24 Request to the extent it calls for any legal conclusion.

25 **Response:** Subject to and without waiving the foregoing objections, the United
26 States admits this Request.

27 **REQUEST FOR ADMISSION NO. 145:** Admit that UnitedHealth submitted its
28 Risk Adjustment Attestation to CMS on April 30, 2014 electronically.

1 **Objection:** The United States incorporates its General Objections and Specific
2 Objections to the Definitions and Instructions as if stated herein, including but not
3 limited to, its specific objections to the definition of “CMS.” The United States
4 objects to this Request to the extent it seeks information not relevant to a claim or
5 defense in this case. The United States objects to this Request to the extent it calls for
6 information that is already in UnitedHealth’s possession, custody, or control, or is
7 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
8 information to mischaracterize or misinterpret the facts. The United States further
9 objects to this Request to the extent it calls for any legal conclusion.

10 **Response:** Subject to and without waiving the foregoing objections, the United
11 States admits this Request.

12 **REQUEST FOR ADMISSION NO. 146:** Admit that on April 30, 2014,
13 UnitedHealth informed CMS that UnitedHealth would not Delete Diagnosis Codes
14 that had not completed all steps in its Claims Verification Program at the time that
15 UnitedHealth suspended its Claims Verification Program.

16 **Objection:** The United States incorporates its General Objections and Specific
17 Objections to the Definitions and Instructions as if stated herein, including but not
18 limited to, its specific objections to the definition of “CMS.” The United States also
19 objects to this Request to the extent that the undefined term “suspended” is vague and
20 ambiguous. For the purposes of responding to this Request, the United States defines
21 the term “suspended” as stopped or delayed temporarily. The United States objects to
22 this Request to the extent it calls for information that is already in UnitedHealth’s
23 possession, custody, or control, or is otherwise available to UnitedHealth and to the
24 extent that UnitedHealth is using this information to mischaracterize or misinterpret
25 the facts. The United States further objects to this Request to the extent it calls for
26 any legal conclusion.

27 **Response:** Subject to and without waiving the foregoing objections, the United
28 States admits that Steve Nelson sent an email dated April 30, 2014, MARA1296257,

1 which stated:

2 We currently have a process through which we review certain medical records
3 to determine the accuracy of risk adjustment diagnoses and submit appropriate
4 deletes. This process already has resulted in the identification of and, in some
5 instances, the submission of deletes for 2012 dates of service. But based on the
6 proposed rule, including the preamble, and recent conversations with CMS, we
7 suspended that process for 2012 dates of service while we consider whether to
8 make changes. Pursuant to our discussion, however, we will soon submit for
9 deletion those diagnosis codes that have undergone a complete review and that
10 we have therefore identified as appropriate deletes. In the near future, we will
11 determine whether to continue our review process for the diagnosis codes
12 which were still under review at the time we suspended our process. In the
13 meantime, we will not delete these codes.

14 The United States denies the remainder of this Request.

15 **REQUEST FOR ADMISSION NO. 147:** Admit that on June 26, 2015,
16 UnitedHealth notified CMS that UnitedHealth terminated its Claims Verification
17 Program.

18 **Objection:** The United States incorporates its General Objections and Specific
19 Objections to the Definitions and Instructions as if stated herein, including but not
20 limited to, its specific objections to the definition of “CMS.” The United States also
21 objects to this Request to the extent that the undefined term “terminated” is vague and
22 ambiguous. For the purposes of responding to this Request, the United States defines
23 the term “terminated” as caused something to end. The United States objects to this
24 Request to the extent it calls for information that is already in UnitedHealth’s
25 possession, custody, or control, or is otherwise available to UnitedHealth and to the
26 extent that UnitedHealth is using this information to mischaracterize or misinterpret
27 the facts. The United States further objects to this Request to the extent it calls for
28 any legal conclusion.

1 **Response:** Subject to and without waiving the foregoing objections, the United
2 States admits that Steve Nelson sent an email dated June 26, 2015 to Cheri Rice,
3 MAPL000787445, which stated:

4 As we discussed last year, we previously had a process through which we
5 reviewed certain medical records to determine the accuracy of risk adjustment
6 diagnoses and submitted appropriate deletes. Based on our conversations with
7 CMS last year, CMS's withdrawal of the proposed rule, and CMS's ongoing
8 consideration of a FFS Adjuster to address diagnoses not supported by a
9 medical record in the context of RADV, we ended this process and informed
10 you of that decision. That decision remains operative for 2013 dates of service.
11 In particular, we did not use our previous process to determine whether
12 diagnosis codes submitted through claims are unsupported in the medical
13 record. We do have a quality assurance process that deletes codes initially
14 identified during chart review and that are later determined to be unsupported.

15 The United States denies the remainder of this Request.

16 **REQUEST FOR ADMISSION NO. 148:** Admit that UnitedHealth did not tell
17 CMS that it was conducting Two-Way Looks when it submitted its MA Part C
18 Supporting Documentation for CY2015 Bid in 2014.

19 **Objection:** The United States incorporates its General Objections and Specific
20 Objections to the Definitions and Instructions as if stated herein, including but not
21 limited to, its specific objections to the definition of "CMS." The United States
22 objects to this Request to the extent it calls for information that is already in
23 UnitedHealth's possession, custody, or control, or is otherwise available to
24 UnitedHealth and to the extent that UnitedHealth is using this information to
25 mischaracterize or misinterpret the facts. The United States further objects to this
26 Request to the extent it calls for any legal conclusion.

27 **Response:** Subject to and without waiving the foregoing objections, the United
28 States responds that UnitedHealth's Bid dated June 2, 2014, USBP000674257, stated:

1 We also adjusted projected risk scores to account for changes in our medical
2 record review processes. Specifically, based on multiple conversations with
3 CMS and CMS's treatment of medical record review in its recent rulemaking
4 process, the health plan has decided to cease one of its prior processes that
5 identified and deleted certain diagnoses codes through the medical record
6 review process.

7 Subject to and without waiving the foregoing objections, after a reasonable inquiry,
8 the United States responds that it lacks sufficient information to admit or deny the
9 remainder of this Request.

10 **REQUEST FOR ADMISSION NO. 149:** Admit that UnitedHealth told CMS it
11 was not conducting Two-Way Looks when it submitted its MA Part C Supporting
12 Documentation for CY2016 Bid in 2015.

13 **Objection:** The United States incorporates its General Objections and Specific
14 Objections to the Definitions and Instructions as if stated herein, including but not
15 limited to, its specific objections to the definition of "CMS." The United States
16 objects to this Request to the extent it calls for information that is already in
17 UnitedHealth's possession, custody, or control, or is otherwise available to
18 UnitedHealth and to the extent that UnitedHealth is using this information to
19 mischaracterize or misinterpret the facts. The United States further objects to this
20 Request to the extent it calls for any legal conclusion.

21 **Response:** Subject to and without waiving the foregoing objections, after a
22 reasonable inquiry, the United States responds that it lacks sufficient information to
23 admit or deny this Request.

24 **REQUEST FOR ADMISSION NO. 150:** Admit that UnitedHealth told CMS it
25 was not conducting Two-Way Looks when it submitted its MA Part C Supporting
26 Documentation for CY2017 Bid in 2016.

27 **Objection:** The United States incorporates its General Objections and Specific
28 Objections to the Definitions and Instructions as if stated herein, including but not

1 limited to, its specific objections to the definition of “CMS.” The United States
2 objects to this Request to the extent it calls for information that is already in
3 UnitedHealth’s possession, custody, or control, or is otherwise available to
4 UnitedHealth and to the extent that UnitedHealth is using this information to
5 mischaracterize or misinterpret the facts. The United States further objects to this
6 Request to the extent it calls for any legal conclusion.

7 **Response:** Subject to and without waiving the foregoing objections, the United
8 States admits that UnitedHealth’s Bid dated August 4, 2016, MAPL002840316,
9 stated:

10 In addition, prior to 2014, the health plan had a process of identifying and
11 deleting certain diagnosis codes through the medical record review process.
12 Based on multiple conversations with CMS in 2014 and CMS's treatment of
13 medical record review in its 2014 rulemaking process, the health plan ceased
14 this process in 2014. As a result, we will not reduce projected risk scores to
15 account for our previous process.

16 The United States denies the remainder of this Request.

17 **REQUEST FOR ADMISSION NO. 151:** Admit that Cheri Rice read Steve
18 Nelson’s April 30, 2014 Email.

19 **Objection:** The United States incorporates its General Objections and Specific
20 Objections to the Definitions and Instructions as if stated herein. The United States
21 further objects to this Request as vague, ambiguous, overly broad, and unduly
22 burdensome to the extent that it is not limited to a specific period of time. The United
23 States objects to this Request to the extent that UnitedHealth is using this information
24 to mischaracterize or misinterpret the facts. The United States further objects to this
25 Request to the extent it calls for any legal conclusion. The United States further
26 objects to this Request to the extent it is duplicative of Request for Admission Nos.
27 152 and 153.

28 **Response:** Subject to and without waiving the foregoing objections, the United

1 States admits this Request.

2 **REQUEST FOR ADMISSION NO. 152:** Admit that Cheri Rice read Steve
3 Nelson's April 30, 2014 Email on or before May 2, 2014.

4 **Objection:** The United States incorporates its General Objections and Specific
5 Objections to the Definitions and Instructions as if stated herein. The United States
6 objects to this Request to the extent that UnitedHealth is using this information to
7 mischaracterize or misinterpret the facts. The United States further objects to this
8 Request to the extent it calls for any legal conclusion. The United States further
9 objects to this Request to the extent it is duplicative of Request for Admission Nos.
10 151 and 153.

11 **Response:** Subject to and without waiving the foregoing objections, the United
12 States admits this Request.

13 **REQUEST FOR ADMISSION NO. 153:** Admit that Cheri Rice read Steve
14 Nelson's April 30, 2014 Email in its entirety on or before May 2, 2014.

15 **Objection:** The United States incorporates its General Objections and Specific
16 Objections to the Definitions and Instructions as if stated herein. The United States
17 objects to this Request to the extent that UnitedHealth is using this information to
18 mischaracterize or misinterpret the facts. The United States further objects to this
19 Request to the extent it calls for any legal conclusion. The United States further
20 objects to this Request to the extent it is duplicative of Request for Admission Nos.
21 151 and 152.

22 **Response:** Subject to and without waiving the foregoing objections, the United
23 States admits this Request.

24 **REQUEST FOR ADMISSION NO. 154:** Admit that Cheri Rice read in Steve
25 Nelson's April 30, 2014 Email that UnitedHealth had suspended its Claims
26 Verification Program.

27 **Objection:** The United States incorporates its General Objections and Specific
28 Objections to the Definitions and Instructions as if stated herein. The United States

1 also objects to this Request to the extent that the undefined term “suspended” is
2 vague and ambiguous. For the purposes of responding to this Request, the United
3 States defines the term “suspended” as stopped or delayed temporarily. The United
4 States further objects to this Request as vague, ambiguous, overly broad, and unduly
5 burdensome to the extent that it is not limited to a specific period of time. The United
6 States objects to this Request to the extent that UnitedHealth is using this information
7 to mischaracterize or misinterpret the facts. The United States objects to this Request
8 as improper under Federal Rule of Civil Procedure 36 and applicable case law to the
9 extent it is compound in that it asks the United States to admit multiple facts in one
10 Request. The United States further objects to this Request to the extent it calls for
11 any legal conclusion.

12 **Response:** Subject to and without waiving the foregoing objections, the United
13 States admits that Cheri Rice read Steve Nelson’s April 30, 2014 email and that the
14 email stated “We currently have a process through which we review certain medical
15 records to determine the accuracy of risk adjustment diagnoses and submit
16 appropriate deletes. ...we suspended that process for 2012 dates of services while
17 we consider whether to make changes.” However, the United States denies the
18 remainder of this Request.

19 **REQUEST FOR ADMISSION NO. 155:** Admit that Cheri Rice read in Steve
20 Nelson’s April 30, 2014 Email that UnitedHealth understood that MAOs were not
21 required to conduct Two-Way Looks.

22 **Objection:** The United States incorporates its General Objections and Specific
23 Objections to the Definitions and Instructions as if stated herein, including but not
24 limited to, its specific objections to the definition of “MAO.” The United States also
25 objects to this Request to the extent that the undefined terms “understood” is vague
26 and ambiguous. For purposes of this Request, the United States defines “understood”
27 as “grasped the meaning of.” The United States further objects to this Request as
28 vague, ambiguous, overly broad, and unduly burdensome to the extent that it is not

1 limited to a specific period of time. The United States objects to this Request to the
2 extent that UnitedHealth is using this information to mischaracterize or misinterpret
3 the facts. The United States objects to this Request as improper under Federal Rule
4 of Civil Procedure 36 and applicable case law to the extent it is compound in that it
5 asks the United States to admit multiple facts in one Request. The United States
6 objects to this Request to the extent it calls for any legal conclusion.

7 **Response:** Subject to and without waiving the foregoing objections, the United
8 States admits that Cheri Rice read Steve Nelson's April 30, 2014 email and that the
9 email stated "Fifth, as we discussed yesterday, CMS recently issued a proposed rule
10 that would, if finalized, require MA plans to design any medical record reviews to
11 determine the accuracy of risk adjustment diagnoses associated with those records.
12 During our conversation yesterday and other recent conversations, CMS confirmed to
13 us that these requirements do not apply until the effective date of the rule, and that
14 MA plans are thus not currently required to design their medical record reviews to
15 determine the accuracy of risk adjustment diagnoses." The United States denies the
16 remainder of this Request.

17 **REQUEST FOR ADMISSION NO. 156:** Admit that after Cheri Rice received
18 Steve Nelson's April 30, 2014 Email, Cheri Rice had Communications with one or
19 more individuals at CMS about the April 30, 2014 Email.

20 **Objection:** The United States incorporates its General Objections and Specific
21 Objections to the Definitions and Instructions as if stated herein, including but not
22 limited to, its specific objections to the definition of "CMS." The United States
23 objects to this Request to the extent it seeks disclosure of information that is protected
24 from disclosure by an applicable privilege or protection, including the attorney-client
25 privilege, attorney work-product doctrine, deliberative process privilege, and/or
26 investigative files privilege. The United States further objects to this Request as
27 vague, ambiguous, overly broad, and unduly burdensome to the extent that it is not
28 limited to a specific period of time. The United States objects to this Request to the

1 extent that UnitedHealth is using this information to mischaracterize or misinterpret
2 the facts. The United States objects to this Request as improper under Federal Rule
3 of Civil Procedure 36 and applicable case law to the extent it is compound in that it
4 asks the United States to admit multiple facts in one Request.

5 **Response:** Subject to and without waiving the foregoing objections, the United
6 States admits this Request.

7 **REQUEST FOR ADMISSION NO. 157:** Admit that after Cheri Rice received
8 Steve Nelson's April 30, 2014 Email, Cheri Rice had Communications with DOJ
9 about the April 30, 2014 Email.

10 **Objection:** The United States incorporates its General Objections and Specific
11 Objections to the Definitions and Instructions as if stated herein, including but not
12 limited to, its specific objection to the definition of "DOJ." The United States objects
13 to this Request as an improper abuse of Federal Rule of Civil Procedure 36 because
14 by its own terms it specifically seeks disclosure of information that is protected from
15 disclosure by the attorney-client privilege. The United States further objects to this
16 Request as vague, ambiguous, overly broad, and unduly burdensome to the extent
17 that it is not limited to a specific period of time. The United States objects to this
18 Request to the extent that UnitedHealth is using this information to mischaracterize or
19 misinterpret the facts. The United States objects to this Request as improper under
20 Federal Rule of Civil Procedure 36 and applicable case law to the extent it is
21 compound in that it asks the United States to admit multiple facts in one Request.

22 **Response:** Subject to the foregoing objections, the United States does not intend to
23 respond to this Request because responsive information, if any, is protected by the
24 attorney-client privilege.

25 **REQUEST FOR ADMISSION NO. 158:** Admit that after Cheri Rice received
26 Steve Nelson's April 30, 2014 Email, Cheri Rice had Communications with OIG
27 about the April 30, 2014 Email.

28 **Objection:** The United States incorporates its General Objections and Specific

1 Objections to the Definitions and Instructions as if stated herein, including but not
2 limited to, its specific objections to the definition of “OIG.” The United States
3 further objects to this Request as vague, ambiguous, overly broad, and unduly
4 burdensome to the extent that it is not limited to a specific period of time. The United
5 States objects to this Request to the extent that UnitedHealth is using this information
6 to mischaracterize or misinterpret the facts. The United States objects to this Request
7 as improper under Federal Rule of Civil Procedure 36 and applicable case law to the
8 extent it is compound in that it asks the United States to admit multiple facts in one
9 Request.

10 **Response:** Subject to and without waiving the foregoing objections, the United
11 States denies this Request.

12 **REQUEST FOR ADMISSION NO. 159:** Admit that Cheri Rice took notes
13 regarding her Communications with one or more individuals at CMS related to Steve
14 Nelson’s April 30, 2014 Email, including such notes before, during, and/or after the
15 Communication(s).

16 **Objection:** The United States incorporates its General Objections and Specific
17 Objections to the Definitions and Instructions as if stated herein, including but not
18 limited to, its specific objections to the definition of “CMS.” The United States
19 objects to this Request to the extent it seeks disclosure of information that is protected
20 from disclosure by an applicable privilege or protection, including the attorney-client
21 privilege, attorney work-product doctrine, deliberative process privilege, and/or
22 investigative files privilege. The United States further objects to this Request as
23 vague, ambiguous, overly broad, and unduly burdensome to the extent that it is not
24 limited to a specific period of time. The United States objects to this Request to the
25 extent that UnitedHealth is using this information to mischaracterize or misinterpret
26 the facts.

27 **Response:** Subject to and without waiving the foregoing objections, the United
28 States denies this Request.

1 **REQUEST FOR ADMISSION NO. 160:** Admit that Cheri Rice took notes
2 regarding her Communications with DOJ related to Steve Nelson's April 30, 2014
3 Email, including such notes before, during, and/or after the Communication(s).

4 **Objection:** The United States incorporates its General Objections and Specific
5 Objections to the Definitions and Instructions as if stated herein, including but not
6 limited to, its specific objections to the definition of "DOJ." The United States
7 objects to this Request as an improper abuse of Federal Rule of Civil Procedure 36
8 because by its own terms it specifically seeks disclosure of information that is
9 protected from disclosure by the attorney-client privilege. The United States further
10 objects to this Request as vague, ambiguous, overly broad, and unduly burdensome to
11 the extent that it is not limited to a specific period of time.

12 **Response:** Subject to the foregoing objections, the United States does not intend to
13 respond to this Request because responsive information, if any, is protected by the
14 attorney-client privilege.

15 **REQUEST FOR ADMISSION NO. 161:** Admit that Cheri Rice took notes
16 regarding her Communications with OIG related to Steve Nelson's April 30, 2014
17 Email, including such notes before, during, and/or after the Communication(s).

18 **Objection:** The United States incorporates its General Objections and Specific
19 Objections to the Definitions and Instructions as if stated herein, including but not
20 limited to, its specific objections to the definition of "OIG." The United States
21 further objects to this Request as vague, ambiguous, overly broad, and unduly
22 burdensome to the extent that it is not limited to a specific period of time. The United
23 States objects to this Request to the extent that UnitedHealth is using this information
24 to mischaracterize or misinterpret the facts.

25 **Response:** Subject to and without waiving the foregoing objections, the United
26 States denies this Request.

1 **REQUEST FOR ADMISSION NO. 162:** Admit that Cheri Rice provided some or
2 all of the content of Steve Nelson's April 30, 2014 Email to one or more individuals
3 at CMS.

4 **Objection:** The United States incorporates its General Objections and Specific
5 Objections to the Definitions and Instructions as if stated herein, including but not
6 limited to, its specific objections to the definition of "CMS." The United States
7 objects to this Request to the extent it seeks disclosure of information that is protected
8 from disclosure by an applicable privilege or protection, including the attorney-client
9 privilege, attorney work-product doctrine, deliberative process privilege, and/or
10 investigative files privilege. The United States further objects to this Request as
11 vague, ambiguous, overly broad, and unduly burdensome to the extent that it is not
12 limited to a specific period of time. The United States objects to this Request to the
13 extent that UnitedHealth is using this information to mischaracterize or misinterpret
14 the facts. The United States objects to this Request to the extent it calls for any legal
15 conclusion. The United States objects to this Request to extent it is duplicative of
16 Request for Admission No. 166.

17 **Response:** Subject to and without waiving the foregoing objections, the United
18 States admits this Request.

19 **REQUEST FOR ADMISSION NO. 163:** Admit that Cheri Rice provided some or
20 all of the content of Steve Nelson's April 30, 2014 Email to DOJ.

21 **Objection:** The United States incorporates its General Objections and Specific
22 Objections to the Definitions and Instructions as if stated herein, including but not
23 limited to, its specific objections to the definition of "DOJ." The United States
24 objects to this Request as an improper abuse of Federal Rule of Civil Procedure 36
25 because by its own terms it specifically seeks disclosure of information that is
26 protected from disclosure by the attorney-client privilege. The United States further
27 objects to this Request as vague, ambiguous, overly broad, and unduly burdensome to
28 the extent that it is not limited to a specific period of time. The United States objects

1 to this Request to the extent that UnitedHealth is using this information to
2 mischaracterize or misinterpret the facts. The United States objects to this Request to
3 the extent it calls for any legal conclusion. The United States objects to this Request
4 to extent it is duplicative of Request for Admission Nos. 165 and 167.

5 **Response:** Subject to the foregoing objections, the United States does not intend to
6 respond to this Request because responsive information, if any, is protected by the
7 attorney-client privilege.

8 **REQUEST FOR ADMISSION NO. 164:** Admit that Cheri Rice provided some or
9 all of the content of Steve Nelson's April 30, 2014 Email to OIG.

10 **Objection:** The United States incorporates its General Objections and Specific
11 Objections to the Definitions and Instructions as if stated herein, including but not
12 limited to, its specific objections to the definition of "OIG." The United States
13 further objects to this Request as vague, ambiguous, overly broad, and unduly
14 burdensome to the extent that it is not limited to a specific period of time. The United
15 States objects to this Request to the extent that UnitedHealth is using this information
16 to mischaracterize or misinterpret the facts. The United States objects to this Request
17 to the extent it calls for any legal conclusion. The United States objects to this
18 Request to extent it is duplicative of Request for Admission No. 168.

19 **Response:** Subject to and without waiving the foregoing objections, the United
20 States denies this Request.

21 **REQUEST FOR ADMISSION NO. 165:** Admit that Cheri Rice provided Steve
22 Nelson's April 30, 2014 Email to DOJ.

23 **Objection:** The United States incorporates its General Objections and Specific
24 Objections to the Definitions and Instructions as if stated herein, including but not
25 limited to, its specific objections to the definition of "DOJ." The United States
26 objects to this Request as an improper abuse of Federal Rule of Civil Procedure 36
27 because by its own terms it specifically seeks disclosure of information that is
28 protected from disclosure by the attorney-client privilege. The United States further

1 objects to this Request as vague, ambiguous, overly broad, and unduly burdensome to
2 the extent that it is not limited to a specific period of time. The United States objects
3 to this Request to the extent that UnitedHealth is using this information to
4 mischaracterize or misinterpret the facts. The United States objects to this Request to
5 the extent it calls for any legal conclusion. The United States objects to this Request
6 as harassing to extent it is duplicative of Request for Admission No. 163, and
7 identical to Request for Admission No. 167.

8 **Response:** Subject to the foregoing objections, the United States does not intend to
9 respond to this Request because responsive information, if any, is protected by the
10 attorney-client privilege.

11 **REQUEST FOR ADMISSION NO. 166:** Admit that Cheri Rice provided Steve
12 Nelson's April 30, 2014 Email to one or more individuals at CMS.

13 **Objection:** The United States incorporates its General Objections and Specific
14 Objections to the Definitions and Instructions as if stated herein, including but not
15 limited to, its specific objections to the definition of "CMS." The United States
16 objects to this Request to the extent it seeks disclosure of information that is protected
17 from disclosure by an applicable privilege or protection, including the attorney-client
18 privilege, attorney work-product doctrine, deliberative process privilege, and/or
19 investigative files privilege. The United States further objects to this Request as
20 vague, ambiguous, overly broad, and unduly burdensome to the extent that it is not
21 limited to a specific period of time. The United States objects to this Request to the
22 extent that UnitedHealth is using this information to mischaracterize or misinterpret
23 the facts. The United States objects to this Request to the extent it calls for any legal
24 conclusion. The United States objects to this Request to extent it is duplicative of
25 Request for Admission No. 162.

26 **Response:** Subject to and without waiving the foregoing objections, the United
27 States admits this Request.

28 **REQUEST FOR ADMISSION NO. 167:** Admit that Cheri Rice provided Steve

1 Nelson's April 30, 2014 Email to DOJ.

2 **Objection:** The United States incorporates its General Objections and Specific
3 Objections to the Definitions and Instructions as if stated herein, including but not
4 limited to, its specific objections to the definition of "DOJ." The United States
5 objects to this Request as an improper abuse of Federal Rule of Civil Procedure 36
6 because by its own terms it specifically seeks disclosure of information that is
7 protected from disclosure by the attorney-client privilege. The United States further
8 objects to this Request as vague, ambiguous, overly broad, and unduly burdensome to
9 the extent that it is not limited to a specific period of time. The United States objects
10 to this Request to the extent that UnitedHealth is using this information to
11 mischaracterize or misinterpret the facts. The United States objects to this Request to
12 the extent it calls for any legal conclusion. The United States objects to this Request
13 as harassing to extent it is duplicative of Request for Admission No. 163, and
14 identical to Request for Admission No. 165.

15 **Response:** Subject to the foregoing objections, the United States does not intend to
16 respond to this Request because responsive information, if any, is protected by the
17 attorney-client privilege.

18 **REQUEST FOR ADMISSION NO. 168:** Admit that Cheri Rice provided Steve
19 Nelson's April 30, 2014 Email to OIG.

20 **Objection:** The United States incorporates its General Objections and Specific
21 Objections to the Definitions and Instructions as if stated herein, including but not
22 limited to, its specific objections to the definition of "OIG." The United States
23 further objects to this Request as vague, ambiguous, overly broad, and unduly
24 burdensome to the extent that it is not limited to a specific period of time. The United
25 States objects to this Request to the extent that UnitedHealth is using this information
26 to mischaracterize or misinterpret the facts. The United States objects to this Request
27 to the extent it calls for any legal conclusion. The United States objects to this
28 Request to extent it is duplicative of Request for Admission No. 164.

1 **Response:** Subject to and without waiving the foregoing objections, the United
2 States denies this Request.

3 **REQUEST FOR ADMISSION NO. 169:** Admit that Cheri Rice's
4 Communications with one or more individuals at CMS regarding the April 30, 2014
5 Email in part related to UnitedHealth's suspension of its Claims Verification
6 Program.

7 **Objection:** The United States incorporates its General Objections and Specific
8 Objections to the Definitions and Instructions as if stated herein, including but not
9 limited to, its specific objections to the definition of "CMS." The United States also
10 objects to this Request to the extent that the undefined term "suspension" is vague
11 and ambiguous. For the purposes of responding to this Request, the United States
12 defines the term "suspension" as the act of stopping or delaying something
13 temporarily. The United States objects to this Request to the extent it seeks
14 disclosure of information that is protected from disclosure by an applicable privilege
15 or protection, including the attorney-client privilege, attorney work-product doctrine,
16 deliberative process privilege, and/or investigative files privilege. The United States
17 further objects to this Request as vague, ambiguous, overly broad, and unduly
18 burdensome to the extent that it is not limited to a specific period of time. The United
19 States objects to this Request to the extent that UnitedHealth is using this information
20 to mischaracterize or misinterpret the facts. The United States objects to this Request
21 to the extent it calls for any legal conclusion. The United States objects to this
22 Request as improper under Federal Rule of Civil Procedure 36 and applicable case
23 law to the extent it is compound in that it asks the United States to admit multiple
24 facts in one Request.

25 **Response:** Subject to and without waiving the foregoing objections, the United
26 States admits that Cheri Rice had Communications with one or more individuals at
27 CMS regarding the April 30, 2014 Email. However, after a reasonable inquiry, the
28 United States responds that it lacks sufficient information to admit or deny the

1 remainder of this Request.

2 **REQUEST FOR ADMISSION NO. 170:** Admit that Cheri Rice's
3 Communications with DOJ regarding the April 30, 2014 Email in part related to
4 UnitedHealth's suspension of its Claims Verification Program.

5 **Objection:** The United States incorporates its General Objections and Specific
6 Objections to the Definitions and Instructions as if stated herein, including but not
7 limited to, its specific objections to the definition of "DOJ." The United States also
8 objects to this Request to the extent that the undefined term "suspension" is vague
9 and ambiguous. For the purposes of responding to this Request, the United States
10 defines the term "suspension" as the act of stopping or delaying something
11 temporarily. The United States objects to this Request as an improper abuse of
12 Federal Rule of Civil Procedure 36 because by its own terms it specifically seeks
13 disclosure of information that is protected from disclosure by the attorney-client
14 privilege. The United States further objects to this Request as vague, ambiguous,
15 overly broad, and unduly burdensome to the extent that it is not limited to a specific
16 period of time. The United States objects to this Request to the extent that
17 UnitedHealth is using this information to mischaracterize or misinterpret the facts.
18 The United States objects to this Request to the extent it calls for any legal
19 conclusion. The United States objects to this Request as improper under Federal Rule
20 of Civil Procedure 36 and applicable case law to the extent it is compound in that it
21 asks the United States to admit multiple facts in one Request.

22 **Response:** Subject to the foregoing objections, the United States does not intend to
23 respond to this Request because responsive information, if any, is protected by the
24 attorney-client privilege.

25 **REQUEST FOR ADMISSION NO. 171:** Admit that Cheri Rice's
26 Communications with OIG regarding the April 30, 2014 Email in part related to
27 UnitedHealth's suspension of its Claims Verification Program.

28 **Objection:** The United States incorporates its General Objections and Specific

1 Objections to the Definitions and Instructions as if stated herein, including but not
2 limited to, its specific objections to the definition of “OIG.” The United States also
3 objects to this Request to the extent that the undefined term “suspension” is vague
4 and ambiguous. For the purposes of responding to this Request, the United States
5 defines the term “suspension” as the act of stopping or delaying something
6 temporarily. The United States further objects to this Request as vague, ambiguous,
7 overly broad, and unduly burdensome to the extent that it is not limited to a specific
8 period of time. The United States objects to this Request to the extent that
9 UnitedHealth is using this information to mischaracterize or misinterpret the facts.
10 The United States objects to this Request to the extent it calls for any legal
11 conclusion. The United States objects to this Request as improper under Federal Rule
12 of Civil Procedure 36 and applicable case law to the extent it is compound in that it
13 asks the United States to admit multiple facts in one Request.

14 **Response:** Subject to and without waiving the foregoing objections, the United
15 States denies this Request.

16 **REQUEST FOR ADMISSION NO. 172:** Admit that Cheri Rice’s
17 Communications with one or more individuals at CMS regarding the April 30, 2014
18 Email in part related to UnitedHealth’s statement that it understood from CMS that
19 MAOs were not required to conduct Two-Way Looks.

20 **Objection:** The United States incorporates its General Objections and Specific
21 Objections to the Definitions and Instructions as if stated herein, including but not
22 limited to, its specific objections to the definitions of “CMS” and “MAOs.” The
23 United States also objects to this Request to the extent that the undefined terms
24 “understood” is vague and ambiguous. For purposes of this Request, the United
25 States defines “understood” as “grasped the meaning of.” The United States objects
26 to this Request to the extent it seeks disclosure of information that is protected from
27 disclosure by an applicable privilege or protection, including the attorney-client
28 privilege, attorney work-product doctrine, deliberative process privilege, and/or

1 investigative files privilege. The United States further objects to this Request as
2 vague, ambiguous, overly broad, and unduly burdensome to the extent that it is not
3 limited to a specific period of time. The United States objects to this Request to the
4 extent it calls for any legal conclusion. The United States objects to this Request to
5 the extent that UnitedHealth is using this information to mischaracterize or
6 misinterpret the facts. The United States objects to this Request as improper under
7 Federal Rule of Civil Procedure 36 and applicable case law to the extent it is
8 compound in that it asks the United States to admit multiple facts in one Request.

9 **Response:** Subject to and without waiving the foregoing objections, the United
10 States admits that Cheri Rice had Communications with one or more individuals at
11 CMS regarding a response to the April 30, 2014 Email. However, after a reasonable
12 inquiry, the United States responds that it lacks sufficient information to admit or
13 deny the remainder of this Request.

14 **REQUEST FOR ADMISSION NO. 173:** Admit that Cheri Rice's
15 Communications with DOJ regarding the April 30, 2014 Email in part related to
16 UnitedHealth's statement that it understood from CMS that MAOs were not required
17 to conduct Two-Way Looks.

18 **Objection:** The United States incorporates its General Objections and Specific
19 Objections to the Definitions and Instructions as if stated herein, including but not
20 limited to, its specific objections to the definitions of "DOJ," "CMS," and "MAO."
21 The United States also objects to this Request to the extent that the undefined terms
22 "understood" is vague and ambiguous. For purposes of this Request, the United
23 States defines "understood" as "grasped the meaning of". . The United States objects
24 to this Request as an improper abuse of Federal Rule of Civil Procedure 36 because
25 by its own terms it specifically seeks disclosure of information that is protected from
26 disclosure by the attorney-client privilege. The United States further objects to this
27 Request as vague, ambiguous, overly broad, and unduly burdensome to the extent
28 that it is not limited to a specific period of time. The United States further objects to

1 this Request to the extent it calls for any legal conclusion. The United States objects
2 to this Request to the extent that UnitedHealth is using this information to
3 mischaracterize or misinterpret the facts. The United States objects to this Request as
4 improper under Federal Rule of Civil Procedure 36 and applicable case law to the
5 extent it is compound in that it asks the United States to admit multiple facts in one
6 Request.

7 **Response:** Subject to the foregoing objections, the United States does not intend to
8 respond to this Request because responsive information, if any, is protected by the
9 attorney-client privilege.

10 **REQUEST FOR ADMISSION NO. 174:** Admit that Cheri Rice's
11 Communications with OIG regarding the April 30, 2014 Email in part related to
12 UnitedHealth's statement that it understood from CMS that MAOs were not required
13 to conduct Two-Way Looks.

14 **Objection:** The United States incorporates its General Objections and Specific
15 Objections to the Definitions and Instructions as if stated herein, including but not
16 limited to, its specific objections to the definitions "OIG," "CMS," and "MAO." The
17 United States also objects to this Request to the extent that the undefined terms
18 "understood" is vague and ambiguous. For purposes of this Request, the United
19 States defines "understood" as "grasped the meaning of." The United States further
20 objects to this Request as vague, ambiguous, overly broad, and unduly burdensome to
21 the extent that it is not limited to a specific period of time. The United States objects
22 to this Request to the extent it calls for any legal conclusion. The United States
23 objects to this Request to the extent it calls for any legal conclusion. The United
24 States objects to this Request to the extent that UnitedHealth is using this information
25 to mischaracterize or misinterpret the facts. The United States objects to this Request
26 as improper under Federal Rule of Civil Procedure 36 and applicable case law to the
27 extent it is compound in that it asks the United States to admit multiple facts in one
28 Request.

1 **Response:** Subject to and without waiving the foregoing objections, the United
2 States denies this Request.

3 **REQUEST FOR ADMISSION NO. 175:** Admit that Cheri Rice sent the May 2,
4 2014 Email in response to Steve Nelson's April 30, 2014 Email.

5 **Objection:** The United States incorporates its General Objections and Specific
6 Objections to the Definitions and Instructions as if stated herein. The United States
7 objects to this Request to the extent it calls for information that is already in
8 UnitedHealth's possession, custody, or control, or is otherwise available to
9 UnitedHealth and to the extent that UnitedHealth is using this information to
10 mischaracterize or misinterpret the facts. The United States objects to this Request as
11 improper under Federal Rule of Civil Procedure 36 and applicable case law to the
12 extent it is compound in that it asks the United States to admit multiple facts in one
13 Request.

14 **Response:** Subject to and without waiving the foregoing objections, the United
15 States admits this Request.

16 **REQUEST FOR ADMISSION NO. 176:** Admit that Cheri Rice did not draft the
17 May 2, 2014 Email to Steve Nelson.

18 **Objection:** The United States incorporates its General Objections and Specific
19 Objections to the Definitions and Instructions as if stated herein. The United States
20 also objects to this Request to the extent that the undefined term "draft" is vague and
21 ambiguous. For the purposes of responding to this Request, the United States defines
22 the term "draft" as to put something in written form. The United States objects to this
23 Request to the extent it seeks information not relevant to a claim or defense in this
24 case. The United States objects to this Request to the extent it seeks disclosure of
25 information that is protected from disclosure by an applicable privilege or protection,
26 including the attorney-client privilege, attorney work-product doctrine, deliberative
27 process privilege, and/or investigative files privilege. The United States objects to
28 this Request to the extent that UnitedHealth is using this information to

1 mischaracterize or misinterpret the facts. The United States further objects to this
2 Request to extent it is duplicative of Request for Admission No. 177.

3 **Response:** Subject to and without waiving the foregoing objections, the United
4 States admits this Request.

5 **REQUEST FOR ADMISSION NO. 177:** Admit that Cheri Rice had assistance
6 with drafting the May 2, 2014 Email to Steve Nelson.

7 **Objection:** The United States incorporates its General Objections and Specific
8 Objections to the Definitions and Instructions as if stated herein. The United States
9 also objects to this Request to the extent that the undefined terms “assistance” and
10 “drafting” are vague and ambiguous. For the purposes of responding to this Request,
11 the United States defines the term “drafting” as putting in writing. For the purposes
12 of responding to this Request, the United States defines the term “assistance” as the
13 act of helping someone complete a task. The United States objects to this Request to
14 the extent it seeks information not relevant to a claim or defense in this case. The
15 United States objects to this Request to the extent it seeks disclosure of information
16 that is protected from disclosure by an applicable privilege or protection, including
17 the attorney-client privilege, attorney work-product doctrine, deliberative process
18 privilege, and/or investigative files privilege. The United States objects to this
19 Request to the extent it calls for any legal conclusion. The United States objects to
20 this Request to the extent that UnitedHealth is using this information to
21 mischaracterize or misinterpret the facts. The United States further objects to this
22 Request to extent it is duplicative of Request for Admission No. 176.

23 **Response:** Subject to and without waiving the foregoing objections, the United
24 States admits this Request.

25 **REQUEST FOR ADMISSION NO. 178:** Admit that CMS did not question
26 UnitedHealth’s suspension of its Claims Verification Program.

27 **Objection:** The United States incorporates its General Objections and Specific
28 Objections to the Definitions and Instructions as if stated herein, including but not

1 limited to, its specific objections to the definition of “CMS.” The United States also
2 objects to this Request to the extent that the undefined terms “question” and
3 “suspension” are vague and ambiguous. For the purposes of responding to this
4 Request, the United States defines the term “question” as asking about, expressing
5 uncertainty, or subjecting to analysis. For the purposes of responding to this Request,
6 the United States defines the term “suspension” as the act of stopping or delaying
7 something temporarily. The United States objects to this Request to the extent it calls
8 for information that is already in UnitedHealth’s possession, custody, or control, or is
9 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
10 information to mischaracterize or misinterpret the facts. The United States objects to
11 this Request to the extent it calls for any legal conclusion. The United States further
12 objects to this Request as vague, ambiguous, overly broad, and unduly burdensome to
13 the extent that it is not limited to a specific period of time. The United States further
14 objects to this Request to extent it is duplicative of Request for Admission No. 179.

15 **Response:** Subject to and without waiving the foregoing objections, the United
16 States denies this Request.

17 **REQUEST FOR ADMISSION NO. 179:** Admit that CMS did not challenge
18 UnitedHealth’s suspension of its Claims Verification Program.

19 **Objection:** The United States incorporates its General Objections and Specific
20 Objections to the Definitions and Instructions as if stated herein, including but not
21 limited to, its specific objections to the definition of “CMS.” The United States also
22 objects to this Request to the extent that the undefined terms “challenge” and
23 “suspension” are vague and ambiguous. For the purposes of responding to this
24 Request, the United States defines the term “challenge” as to dispute. For the
25 purposes of responding to this Request, the United States defines the term
26 “suspension” as the act of stopping or delaying something temporarily. The United
27 States objects to this Request to the extent it calls for information that is already in
28 UnitedHealth’s possession, custody, or control, or is otherwise available to

1 UnitedHealth and to the extent that UnitedHealth is using this information to
2 mischaracterize or misinterpret the facts. The United States objects to this Request to
3 the extent it calls for any legal conclusion. The United States further objects to this
4 Request as vague, ambiguous, overly broad, and unduly burdensome to the extent
5 that it is not limited to a specific period of time. The United States further objects to
6 this Request to extent it is duplicative of Request for Admission No. 178.

7 **Response:** Subject to and without waiving the foregoing objections, the United
8 States denies this Request.

9 **REQUEST FOR ADMISSION NO. 180:** Admit that Steve Nelson met with Sean
10 Cavanaugh on June 10, 2014.

11 **Objection:** The United States incorporates its General Objections and Specific
12 Objections to the Definitions and Instructions as if stated herein. The United States
13 objects to this Request to the extent it seeks information not relevant to a claim or
14 defense in this case. The United States objects to this Request to the extent it calls for
15 information that is already in UnitedHealth's possession, custody, or control, or is
16 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
17 information to mischaracterize or misinterpret the facts.

18 **Response:** Subject to and without waiving the foregoing objections, the United
19 States admits that a June 13, 2014 email bates labeled USBP001366276 reflects that
20 Sean Cavanaugh and Steve Nelson met on June 10, 2014 to discuss topics related to
21 Hep C and Notice to Beneficiaries, but after a reasonable inquiry, the United States
22 lacks sufficient information to admit or deny the remainder of this Request.

23 **REQUEST FOR ADMISSION NO. 181:** Admit that, other than Steve Nelson and
24 Sean Cavanaugh, no other person attended the June 10, 2014 Meeting.

25 **Objection:** The United States incorporates its General Objections and Specific
26 Objections to the Definitions and Instructions as if stated herein, including but not
27 limited to, its specific objections to the definition of "Person." The United States
28 objects to this Request to the extent it seeks information not relevant to a claim or

1 defense in this case. The United States objects to this Request to the extent it calls for
2 information that is already in UnitedHealth's possession, custody, or control, or is
3 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
4 information to mischaracterize or misinterpret the facts.

5 **Response:** Subject to and without waiving the foregoing objections, after a
6 reasonable inquiry, the United States responds that it lacks sufficient information to
7 admit or deny this Request.

8 **REQUEST FOR ADMISSION NO. 182:** Admit that the June 10, 2014 Meeting
9 took place in Person.

10 **Objection:** The United States incorporates its General Objections and Specific
11 Objections to the Definitions and Instructions as if stated herein. The United States
12 objects to this Request to the extent it seeks information not relevant to a claim or
13 defense in this case. The United States objects to this Request to the extent it calls for
14 information that is already in UnitedHealth's possession, custody, or control, or is
15 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
16 information to mischaracterize or misinterpret the facts.

17 **Response:** Subject to and without waiving the foregoing objections, after a
18 reasonable inquiry, the United States responds that it lacks sufficient information to
19 admit or deny this Request.

20 **REQUEST FOR ADMISSION NO. 183:** Admit that the June 10, 2014 Meeting
21 took place by videoconference.

22 **Objection:** The United States incorporates its General Objections and Specific
23 Objections to the Definitions and Instructions as if stated herein. The United States
24 objects to this Request to the extent it seeks information not relevant to a claim or
25 defense in this case. The United States objects to this Request to the extent it calls for
26 information that is already in UnitedHealth's possession, custody, or control, or is
27 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
28 information to mischaracterize or misinterpret the facts.

1 **Response:** Subject to and without waiving the foregoing objections, after a
2 reasonable inquiry, the United States responds that it lacks sufficient information to
3 admit or deny this Request.

4 **REQUEST FOR ADMISSION NO. 184:** Admit that the June 10, 2014 Meeting
5 took place by telephone.

6 **Objection:** The United States incorporates its General Objections and Specific
7 Objections to the Definitions and Instructions as if stated herein. The United States
8 objects to this Request to the extent it seeks information not relevant to a claim or
9 defense in this case. The United States objects to this Request to the extent it calls for
10 information that is already in UnitedHealth's possession, custody, or control, or is
11 otherwise available to UnitedHealth and to the extent that UnitedHealth is using this
12 information to mischaracterize or misinterpret the facts.

13 **Response:** Subject to and without waiving the foregoing objections, after a
14 reasonable inquiry, the United States responds that it lacks sufficient information to
15 admit or deny this Request.

16 **REQUEST FOR ADMISSION NO. 185:** Admit that the Government Audio
17 Recorded the June 10, 2014 Meeting.

18 **Objection:** The United States incorporates its General Objections and Specific
19 Objections to the Definitions and Instructions as if stated herein, including but not
20 limited to, its specific objections to the definition of "Government." The United
21 States further objects to this request because it is unduly burdensome for the United
22 States to determine the actions of all "agencies, departments, components, agents,
23 representatives, contractors, attorneys, consultants, and all other Persons acting on its
24 behalf." The United States objects to this Request to the extent it seeks information
25 not relevant to a claim or defense in this case.

26 **Response:** Subject to and without waiving the foregoing objections, the United
27 States denies that Sean Cavanaugh Audio Recorded the June 10, 2014 meeting.
28 However, after a reasonable inquiry, the United States responds that it lacks sufficient

1 information to admit or deny this Request with respect to CMS or the entire United
2 States Government.

3 **REQUEST FOR ADMISSION NO. 186:** Admit that the Government Video
4 Recorded the June 10, 2014 Meeting.

5 **Objection:** The United States incorporates its General Objections and Specific
6 Objections to the Definitions and Instructions as if stated herein, including but not
7 limited to, its specific objections to the definition of “Government.” The United
8 States further objects to this request because it is unduly burdensome for the United
9 States to determine the actions of all “agencies, departments, components, agents,
10 representatives, contractors, attorneys, consultants, and all other Persons acting on its
11 behalf.” The United States objects to this Request to the extent it seeks information
12 not relevant to a claim or defense in this case.

13 **Response:** Subject to and without waiving the foregoing objections, the United
14 States denies that Sean Cavanaugh Video Recorded the June 10, 2014 meeting.
15 However, after a reasonable inquiry, the United States responds that it lacks sufficient
16 information to admit or deny this Request with respect to CMS or the entire United
17 States Government.

18 **REQUEST FOR ADMISSION NO. 187:** Admit that Sean Cavanaugh took notes
19 during the June 10, 2014 Meeting.

20 **Objection:** The United States incorporates its General Objections and Specific
21 Objections to the Definitions and Instructions as if stated herein. The United States
22 objects to this Request to the extent it seeks information not relevant to a claim or
23 defense in this case.

24 **Response:** Subject to and without waiving the foregoing objections, the United
25 States denies this Request.

26 **REQUEST FOR ADMISSION NO. 188:** Admit that after the June 10, 2014
27 Meeting, Sean Cavanaugh took notes about or otherwise memorialized the meeting in
28 writing.

1 **Objection:** The United States incorporates its General Objections and Specific
2 Objections to the Definitions and Instructions as if stated herein. The United States
3 also objects to this Request to the extent that the undefined phrase “or otherwise
4 memorialized” is vague and ambiguous. For the purposes of this Request, the United
5 States defines “memorialized” as put in writing. The United States further objects to
6 this Request as vague, ambiguous, overly broad, and unduly burdensome to the extent
7 that it is not limited to a specific period of time. The United States objects to this
8 Request to the extent it seeks information not relevant to a claim or defense in this
9 case.

10 **Response:** Subject to and without waiving the foregoing objections, the United
11 States admits that Sean Cavanaugh sent an email to Steve Nelson on June 20, 2014
12 following up on their June 10, 2014 meeting. The United States denies the remainder
13 of this Request.

14 **REQUEST FOR ADMISSION NO. 189:** Admit that after the June 10, 2014
15 Meeting, Sean Cavanaugh had Communications with one or more individuals at CMS
16 about the meeting.

17 **Objection:** The United States incorporates its General Objections and Specific
18 Objections to the Definitions and Instructions as if stated herein, including but not
19 limited to, its specific objections to the definition of “CMS.” The United States
20 objects to this Request to the extent it seeks disclosure of information that is protected
21 from disclosure by an applicable privilege or protection, including the attorney-client
22 privilege, attorney work-product doctrine, deliberative process privilege, and/or
23 investigative files privilege. The United States further objects to this Request as
24 vague, ambiguous, overly broad, and unduly burdensome to the extent that it is not
25 limited to a specific period of time. The United States objects to this Request to the
26 extent it seeks information not relevant to a claim or defense in this case.

27 **Response:** Subject to and without waiving the foregoing objections, the United
28 States admits this Request.

1 **REQUEST FOR ADMISSION NO. 190:** Admit that after the June 10, 2014
2 Meeting, Sean Cavanaugh had Communications with DOJ about the meeting.

3 **Objection:** The United States incorporates its General Objections and Specific
4 Objections to the Definitions and Instructions as if stated herein, including but not
5 limited to, its specific objections to the definition of “DOJ.” The United States
6 objects to this Request as an improper abuse of Federal Rule of Civil Procedure 36
7 because by its own terms it specifically seeks disclosure of information that is
8 protected from disclosure by the attorney-client privilege. The United States further
9 objects to this Request as vague, ambiguous, overly broad, and unduly burdensome to
10 the extent that it is not limited to a specific period of time. The United States objects
11 to this Request to the extent it seeks information not relevant to a claim or defense in
12 this case.

13 **Response:** Subject to the foregoing objections, the United States does not intend to
14 respond to this Request because responsive information, if any, is protected by the
15 attorney-client privilege.

16 **REQUEST FOR ADMISSION NO. 191:** Admit that after the June 10, 2014
17 Meeting, Sean Cavanaugh had Communications with OIG about the meeting.

18 **Objection:** The United States incorporates its General Objections and Specific
19 Objections to the Definitions and Instructions as if stated herein, including but not
20 limited to, its specific objections to the definition of “OIG.” The United States
21 further objects to this Request as vague, ambiguous, overly broad, and unduly
22 burdensome to the extent that it is not limited to a specific period of time. The United
23 States objects to this Request to the extent it seeks information not relevant to a claim
24 or defense in this case.

25 **Response:** Subject to and without waiving the foregoing objections, the United
26 States denies this Request.

1 **REQUEST FOR ADMISSION NO. 192:** Admit that during the June 10, 2014
2 Meeting, Steve Nelson informed Sean Cavanaugh that UnitedHealth discontinued its
3 Claims Verification Program.

4 **Objection:** The United States incorporates its General Objections and Specific
5 Objections to the Definitions and Instructions as if stated herein. The United States
6 objects to this Request to the extent it calls for information that is already in
7 UnitedHealth's possession, custody, or control, or is otherwise available to
8 UnitedHealth and to the extent that UnitedHealth is using this information to
9 mischaracterize or misinterpret the facts. The United States objects to this Request to
10 the extent it calls for any legal conclusion.

11 **Response:** Subject to and without waiving the foregoing objections, after a
12 reasonable inquiry, the United States responds that it lacks sufficient information to
13 admit or deny this Request.

14 **REQUEST FOR ADMISSION NO. 193:** Admit that UnitedHealth discontinued
15 UnitedHealth's Claims Verification Program based in part on UnitedHealth's
16 understanding that the Proposed Medical Record Review Rule would not be
17 retroactive.

18 **Objection:** The United States incorporates its General Objections and Specific
19 Objections to the Definitions and Instructions as if stated herein. The United States
20 objects to this Request to the extent it calls for information that is already in
21 UnitedHealth's possession, custody, or control, or is otherwise available to
22 UnitedHealth and to the extent that UnitedHealth is using this information to
23 mischaracterize or misinterpret the facts. The United States objects to this Request to
24 the extent it calls for any legal conclusion. The United States objects to this Request
25 because by its nature it calls for the United States to provide information outside of
26 its possession, custody or control about UnitedHealth's motives, of which
27 UnitedHealth should presumably be aware.

28 **Response:** Subject to and without waiving the foregoing objections, the United

1 States responds that it lacks sufficient information to admit or deny this Request
2 because it seeks information regarding UnitedHealth's own beliefs and legal theories.
3 **REQUEST FOR ADMISSION NO. 194:** Admit that UnitedHealth told CMS that
4 UnitedHealth had discontinued UnitedHealth's Claims Verification Program based in
5 part on UnitedHealth's understanding that the Proposed Medical Record Review Rule
6 was not effective until it was finalized.

7 **Objection:** The United States incorporates its General Objections and Specific
8 Objections to the Definitions and Instructions as if stated herein, including but not
9 limited to, its specific objections to the definition of "CMS." The United States
10 objects to this Request to the extent it calls for information that is already in
11 UnitedHealth's possession, custody, or control, or is otherwise available to
12 UnitedHealth and to the extent that UnitedHealth is using this information to
13 mischaracterize or misinterpret the facts. The United States further objects to this
14 Request as vague, ambiguous, overly broad, and unduly burdensome to the extent
15 that it is not limited to a specific period of time. The United States objects to this
16 Request to the extent it calls for any legal conclusion. The United States objects to
17 this Request as improper under Federal Rule of Civil Procedure 36 and applicable
18 case law to the extent it is compound in that it asks the United States to admit
19 multiple facts in one Request.

20 **Response:** Subject to and without waiving the foregoing objections, the United
21 States admits that Steve Nelson sent an email dated April 30, 2014, MARA1296257,
22 which stated:

23 Fifth, as we discussed yesterday, CMS recently issued a proposed rule that
24 would, if finalized, require MA plans to design any medical record reviews to
25 determine the accuracy of risk adjustment diagnoses associated with those
26 records. During our conversation yesterday and other recent conversations,
27 CMS confirmed to us that these requirements do not apply until the effective
28 date of the rule, and that MA plans are thus not currently required to design

1 their medical record reviews to determine the accuracy of risk adjustment
2 diagnoses. We currently have a process through which we review certain
3 medical records to determine the accuracy of risk adjustment diagnoses and
4 submit appropriate deletes. This process already has resulted in the
5 identification of and, in some instances, the submission of deletes for 2012
6 dates of service. But based on the proposed rule, including the preamble, and
7 recent conversations with CMS, we suspended that process for 2012 dates of
8 service while we consider whether to make changes. Pursuant to our
9 discussion, however, we will soon submit for deletion those diagnosis codes
10 that have undergone a complete review and that we have therefore identified as
11 appropriate deletes. In the near future, we will determine whether to continue
12 our review process for the diagnosis codes which were still under review at the
13 time we suspended our process. In the meantime, we will not delete these
14 codes.

15 The United States denies the remainder of this Request.

16 **REQUEST FOR ADMISSION NO. 195:** Admit that CMS did not express to
17 UnitedHealth an issue or concern with UnitedHealth's discontinuation of its Claims
18 Verification Program.

19 **Objection:** The United States incorporates its General Objections and Specific
20 Objections to the Definitions and Instructions as if stated herein, including but not
21 limited to, its specific objections to the definition of "CMS." The United States also
22 objects to this Request to the extent that the undefined phrases "issue or concern" is
23 vague and ambiguous. The United States objects to this Request to the extent it seeks
24 information not relevant to a claim or defense in this case. The United States objects
25 to this Request to the extent it calls for information that is already in UnitedHealth's
26 possession, custody, or control, or is otherwise available to UnitedHealth and to the
27 extent that UnitedHealth is using this information to mischaracterize or misinterpret
28 the facts. The United States objects to this Request to the extent it calls for any legal

1 conclusion. The United States further objects to this Request as vague, ambiguous,
2 overly broad, and unduly burdensome to the extent that it is not limited to a specific
3 period of time. The United States further objects to this Request to extent it is
4 duplicative of Request for Admission Nos. 178, 179, and 196.

5 **Response:** Subject to and without waiving the foregoing objections, the United
6 States denies this Request.

7 **REQUEST FOR ADMISSION NO. 196:** Admit that at no time prior to the date on
8 which the Government filed its Complaint has CMS expressed to UnitedHealth an
9 issue or concern with UnitedHealth's discontinuation of its Claims Verification
10 Program.

11 **Objection:** The United States incorporates its General Objections and Specific
12 Objections to the Definitions and Instructions as if stated herein, including but not
13 limited to, its specific objections to the definition of "CMS." The United States also
14 objects to this Request to the extent that the undefined phrases "issue or concern" is
15 vague and ambiguous. The United States objects to this Request to the extent it seeks
16 information not relevant to a claim or defense in this case. The United States objects
17 to this Request to the extent it calls for information that is already in UnitedHealth's
18 possession, custody, or control, or is otherwise available to UnitedHealth and to the
19 extent that UnitedHealth is using this information to mischaracterize or misinterpret
20 the facts. The United States objects to this Request to the extent it calls for any legal
21 conclusion. The United States further objects to this Request to extent it is
22 duplicative of Request for Admission No. 178, 179, and 195.

23 **Response:** Subject to and without waiving the foregoing objections, the United
24 States denies this Request.

25 **REQUEST FOR ADMISSION NO. 197:** Admit that at no time prior to the date on
26 which the Government filed its Complaint has DOJ expressed to UnitedHealth an
27 issue or concern with UnitedHealth's discontinuation of its Claims Verification
28 Program.

1 **Objection:** The United States incorporates its General Objections and Specific
2 Objections to the Definitions and Instructions as if stated herein, including but not
3 limited to, its specific objections to the definition of “DOJ.” The United States also
4 objects to this Request to the extent that the undefined phrase “issue or concern” is
5 vague and ambiguous. The United States objects to this Request to the extent it seeks
6 information not relevant to a claim or defense in this case. The United States objects
7 to this Request to the extent it calls for information that is already in UnitedHealth’s
8 possession, custody, or control, or is otherwise available to UnitedHealth and to the
9 extent that UnitedHealth is using this information to mischaracterize or misinterpret
10 the facts. The United States objects to this Request to the extent it calls for any legal
11 conclusion. The United States objects to this Request to the extent it suggests the
12 DOJ personnel responsible for investigating and litigating this matter do not act on
13 behalf of their agency client.

14 **Response:** Subject to and without waiving the foregoing objections, the United
15 States denies this Request.

16 **REQUEST FOR ADMISSION NO. 198:** Admit that at no time prior to the date on
17 which the Government filed its Complaint has OIG expressed to UnitedHealth an
18 issue or concern with UnitedHealth’s discontinuation of its Claims Verification
19 Program.

20 **Objection:** The United States incorporates its General Objections and Specific
21 Objections to the Definitions and Instructions as if stated herein, including but not
22 limited to, its specific objections to the definition of “OIG.” The United States also
23 objects to this Request to the extent that the undefined phrase “issue or concern” is
24 vague and ambiguous. The United States objects to this Request to the extent it seeks
25 information not relevant to a claim or defense in this case. The United States objects
26 to this Request to the extent it calls for information that is already in UnitedHealth’s
27 possession, custody, or control, or is otherwise available to UnitedHealth and to the
28 extent that UnitedHealth is using this information to mischaracterize or misinterpret

1 the facts. The United States objects to this Request to the extent it calls for any legal
2 conclusion.

3 **Response:** Subject to and without waiving the foregoing objections, the United
4 States denies this Request.

5 **REQUEST FOR ADMISSION NO. 199:** Admit that on May 23, 2014, CMS
6 issued the May 23, 2014 Final Rule.

7 **Objection:** The United States incorporates its General Objections and Specific
8 Objections to the Definitions and Instructions as if stated herein, including but not
9 limited to, its specific objections to the definition of “CMS.” The United States
10 objects to this Request to the extent it calls for information that is already in
11 UnitedHealth’s possession, custody, or control, or is otherwise available to
12 UnitedHealth and to the extent that UnitedHealth is using this information to
13 mischaracterize or misinterpret the facts. The United States objects to this Request to
14 the extent it calls for any legal conclusion.

15 **Response:** Subject to and without waiving the foregoing objections, the United
16 States admits this Request.

17 **REQUEST FOR ADMISSION NO. 200:** Admit that the May 23, 2014 Final Rule
18 did not require MAOs to engage in Two-Way Looks.

19 **Objection:** The United States incorporates its General Objections and Specific
20 Objections to the Definitions and Instructions as if stated herein, including but not
21 limited to, its specific objections to the definition of “MAOs.” The United States
22 objects to this Request to the extent it calls for any legal conclusion. The United
23 States objects to this Request to the extent it calls for information that is already in
24 UnitedHealth’s possession, custody, or control, or is otherwise available to
25 UnitedHealth. The United States objects to this Request to the extent that
26 UnitedHealth is using this information to mischaracterize or misinterpret the facts,
27 particularly in that it mischaracterizes CMS’ statements contained in the Response to
28 Public Comments Section of the May 23, 2014 Final Rule: “However, we emphasize

1 that our decision to not finalize this regulatory proposal does not change CMS’
2 existing contractual requirement that MA organizations must certify (based on best
3 knowledge, information, and belief) the accuracy, completeness, and truthfulness of
4 the risk adjustment data they submit to CMS. Further, this decision does not change
5 the long- standing risk adjustment data requirement that a diagnosis submitted to
6 CMS by an MA organization for payment purposes must be supported by medical
7 record documentation.” 79 Fed. Reg. 29926. The United States objects to this
8 Request to the extent it is duplicative of Request for Admission Nos. 201 and 202.

9 **Response:** Subject to and without waiving the foregoing objections, the United
10 States admits that the May 23, 2014 Final Rule did not include language which
11 specifically required MAOs to conduct Two-Way Looks. However, the United States
12 denies the remainder of this Request particularly in the light of the fact that CMS
13 made very clear in the Final Rule that “our decision to not finalize this regulatory
14 proposal does not change CMS’ existing contractual requirement that MA
15 organizations must certify (based on best knowledge, information, and belief) the
16 accuracy, completeness, and truthfulness of the risk adjustment data they submit to
17 CMS. Further, this decision does not change the long-standing risk adjustment data
18 requirement that a diagnosis submitted to CMS by an MA organization for payment
19 purposes must be supported by medical record documentation.” 79 Fed. Reg. 29926.

20 **REQUEST FOR ADMISSION NO. 201:** Admit that the May 23, 2014 Final Rule
21 did not require MAOs to confirm that every Diagnosis Code submitted by a Provider
22 is documented in a Beneficiary’s Chart.

23 **Objection:** The United States incorporates its General Objections and Specific
24 Objections to the Definitions and Instructions as if stated herein, including but not
25 limited to, its specific objections to the definition of “MAOs.” The United States
26 objects to this Request to the extent it calls for any legal conclusion. The United
27 States objects to this Request to the extent it calls for information that is already in
28 UnitedHealth’s possession, custody, or control, or is otherwise available to

1 UnitedHealth. The United States objects to this Request to the extent that
2 UnitedHealth is using this information to mischaracterize or misinterpret the facts,
3 particularly in that it mischaracterizes CMS' statements contained in the Response to
4 Public Comments Section of the May 23, 2014 Final Rule: "However, we emphasize
5 that our decision to not finalize this regulatory proposal does not change CMS'
6 existing contractual requirement that MA organizations must certify (based on best
7 knowledge, information, and belief) the accuracy, completeness, and truthfulness of
8 the risk adjustment data they submit to CMS. Further, this decision does not change
9 the long- standing risk adjustment data requirement that a diagnosis submitted to
10 CMS by an MA organization for payment purposes must be supported by medical
11 record documentation." 79 Fed. Reg. 29926. The United States objects to this
12 Request to the extent it is duplicative of Request for Admission No. 200 and 202.

13 **Response:** Subject to and without waiving the foregoing objections, the United
14 States admits that the May 23, 2014 Final Rule did not include language which
15 specifically required MAOs to confirm that every Diagnosis Code submitted by a
16 Provider is documented in a Beneficiary's Chart. However, the United States denies
17 the remainder of this Request particularly in the light of the fact that CMS made very
18 clear in the Final Rule that "our decision to not finalize this regulatory proposal does
19 not change CMS' existing contractual requirement that MA organizations must
20 certify (based on best knowledge, information, and belief) the accuracy,
21 completeness, and truthfulness of the risk adjustment data they submit to CMS.
22 Further, this decision does not change the long-standing risk adjustment data
23 requirement that a diagnosis submitted to CMS by an MA organization for payment
24 purposes must be supported by medical record documentation." 79 Fed. Reg. 29926.

25 **REQUEST FOR ADMISSION NO. 202:** Admit that CMS did not finalize the
26 portion of the Proposed Medical Record Review Rule that would have required Two-
27 Way Looks.

28 **Objection:** The United States incorporates its General Objections and Specific

1 Objections to the Definitions and Instructions as if stated herein, including but not
2 limited to, its specific objections to the definition of “CMS.” The United States
3 objects to this Request to the extent it calls for any legal conclusion. The United
4 States objects to this Request to the extent it calls for information that is already in
5 UnitedHealth’s possession, custody, or control, or is otherwise available to
6 UnitedHealth. The United States objects to this Request to the extent that
7 UnitedHealth is using this information to mischaracterize or misinterpret the facts,
8 particularly in that it mischaracterizes CMS’ statements contained in the Response to
9 Public Comments Section of the May 23, 2014 Final Rule: “However, we emphasize
10 that our decision to not finalize this regulatory proposal does not change CMS’
11 existing contractual requirement that MA organizations must certify (based on best
12 knowledge, information, and belief) the accuracy, completeness, and truthfulness of
13 the risk adjustment data they submit to CMS. Further, this decision does not change
14 the long- standing risk adjustment data requirement that a diagnosis submitted to
15 CMS by an MA organization for payment purposes must be supported by medical
16 record documentation.” 79 Fed. Reg. 29926. The United States objects to this
17 Request to the extent it is duplicative of Request for Admission Nos. 200 and 201.
18 **Response:** Subject to and without waiving the foregoing objections, the United
19 States admits that the May 23, 2014 Final Rule did not include language which
20 specifically required MAOs to conduct Two-Way Looks. However, the United States
21 denies the remainder of this Request particularly in the light of the fact that CMS
22 made very clear in the Final Rule that “our decision to not finalize this regulatory
23 proposal does not change CMS’ existing contractual requirement that MA
24 organizations must certify (based on best knowledge, information, and belief) the
25 accuracy, completeness, and truthfulness of the risk adjustment data they submit to
26 CMS. Further, this decision does not change the long-standing risk adjustment data
27 requirement that a diagnosis submitted to CMS by an MA organization for payment
28 purposes must be supported by medical record documentation.” 79 Fed. Reg. 29926.

1 **REQUEST FOR ADMISSION NO. 203:** Admit that CMS removed the portion of
2 the Proposed Medical Record Review Rule that would have required Two-Way
3 Looks when it finalized the May 23, 2014 Final Rule in part related to comments
4 CMS received.

5 **Objection:** The United States incorporates its General Objections and Specific
6 Objections to the Definitions and Instructions as if stated herein, including but not
7 limited to, its specific objections to the definition of “CMS.” The United States
8 objects to this Request to the extent it calls for any legal conclusion. The United
9 States objects to this Request to the extent it seeks disclosure of information that is
10 protected from disclosure by an applicable privilege or protection, including the
11 attorney-client privilege, attorney work-product doctrine, deliberative process
12 privilege, and/or investigative files privilege. The United States objects to this
13 Request to the extent it calls for information that is already in UnitedHealth’s
14 possession, custody, or control, or is otherwise available to UnitedHealth. The
15 United States objects to this Request to the extent that UnitedHealth is using this
16 information to mischaracterize or misinterpret the facts, particularly in that it
17 mischaracterizes CMS’ statements contained in the Response to Public Comments
18 Section of the May 23, 2014 Final Rule: “However, we emphasize that our decision
19 to not finalize this regulatory proposal does not change CMS’ existing contractual
20 requirement that MA organizations must certify (based on best knowledge,
21 information, and belief) the accuracy, completeness, and truthfulness of the risk
22 adjustment data they submit to CMS. Further, this decision does not change the long-
23 standing risk adjustment data requirement that a diagnosis submitted to CMS by an
24 MA organization for payment purposes must be supported by medical record
25 documentation.” 79 Fed. Reg. 29926. The United States objects to this Request as
26 improper under Federal Rule of Civil Procedure 36 and applicable case law to the
27 extent it is compound in that it asks the United States to admit multiple facts in one
28 Request. The United States objects to this Request to the extent it is duplicative of

1 Request for Admission No. 204.

2 **Response:** Subject to and without waiving the foregoing objections, the United
3 States admits that CMS reviewed the comments it received regarding the Proposed
4 Medical Record Review Rule prior to finalizing the May 23, 2014 Final Rule.
5 However, the United States denies the remainder of this Request.

6 **REQUEST FOR ADMISSION NO. 204:** Admit that CMS did not finalize the
7 portion of the Proposed Medical Record Review Rule that would have required Two-
8 Way Looks in part related to comments CMS received.

9 **Objection:** The United States incorporates its General Objections and Specific
10 Objections to the Definitions and Instructions as if stated herein, including but not
11 limited to, its specific objections to the definition of “CMS.” The United States
12 objects to this Request to the extent it calls for any legal conclusion. The United
13 States objects to this Request to the extent it seeks disclosure of information that is
14 protected from disclosure by an applicable privilege or protection, including the
15 attorney-client privilege, attorney work-product doctrine, deliberative process
16 privilege, and/or investigative files privilege. The United States objects to this
17 Request to the extent it calls for information that is already in UnitedHealth’s
18 possession, custody, or control, or is otherwise available to UnitedHealth. The
19 United States objects to this Request to the extent that UnitedHealth is using this
20 information to mischaracterize or misinterpret the facts, particularly in that it
21 mischaracterizes CMS’ statements contained in the Response to Public Comments
22 Section of the May 23, 2014 Final Rule: “However, we emphasize that our decision
23 to not finalize this regulatory proposal does not change CMS’ existing contractual
24 requirement that MA organizations must certify (based on best knowledge,
25 information, and belief) the accuracy, completeness, and truthfulness of the risk
26 adjustment data they submit to CMS. Further, this decision does not change the long-
27 standing risk adjustment data requirement that a diagnosis submitted to CMS by an
28 MA organization for payment purposes must be supported by medical record

1 documentation.” 79 Fed. Reg. 29926. The United States objects to this Request as
2 improper under Federal Rule of Civil Procedure 36 and applicable case law to the
3 extent it is compound in that it asks the United States to admit multiple facts in one
4 Request. The United States objects to this Request to the extent it is duplicative of
5 Request for Admission No. 203.

6 **Response:** Subject to and without waiving the foregoing objections, the United
7 States admits that CMS reviewed the comments it received regarding the Proposed
8 Medical Record Review Rule prior to finalizing the May 23, 2014 Final Rule.
9 However, the United States denies the remainder of this Request.

10 **REQUEST FOR ADMISSION NO. 205:** Admit that CMS removed the portion of
11 the Proposed Medical Record Review Rule that would have required Two-Way
12 Looks from the Final Rule in part related to comments CMS received from entities
13 engaged in business related to the Medicare Advantage Program.

14 **Objection:** The United States incorporates its General Objections and Specific
15 Objections to the Definitions and Instructions as if stated herein, including but not
16 limited to, its specific objections to the definition of “CMS.” The United States also
17 objects to this Request to the extent that the undefined phrase “entities engaged in
18 business related to the Medicare Advantage Program” is vague and ambiguous. For
19 purposes of this Request, the United States defines “entities engaged in business
20 related to the Medicare Advantage Program” as MAOs. The United States objects to
21 this Request to the extent it calls for any legal conclusion. The United States objects
22 to this Request to the extent it seeks disclosure of information that is protected from
23 disclosure by an applicable privilege or protection, including the attorney-client
24 privilege, attorney work-product doctrine, deliberative process privilege, and/or
25 investigative files privilege. The United States objects to this Request to the extent it
26 calls for information that is already in UnitedHealth’s possession, custody, or control,
27 or is otherwise available to UnitedHealth. The United States objects to this Request
28 to the extent that UnitedHealth is using this information to mischaracterize or

1 misinterpret the facts, particularly in that it mischaracterizes CMS' statements
2 contained in the Response to Public Comments Section of the May 23, 2014 Final
3 Rule: "However, we emphasize that our decision to not finalize this regulatory
4 proposal does not change CMS' existing contractual requirement that MA
5 organizations must certify (based on best knowledge, information, and belief) the
6 accuracy, completeness, and truthfulness of the risk adjustment data they submit to
7 CMS. Further, this decision does not change the long- standing risk adjustment data
8 requirement that a diagnosis submitted to CMS by an MA organization for payment
9 purposes must be supported by medical record documentation." 79 Fed. Reg. 29926.
10 The United States objects to this Request as improper under Federal Rule of Civil
11 Procedure 36 and applicable case law to the extent it is compound in that it asks the
12 United States to admit multiple facts in one Request. The United States objects to
13 this Request to the extent it is duplicative of Request for Admission Nos. 206, 207
14 and 208.

15 **Response:** Subject to and without waiving the foregoing objections, the United
16 States admits that CMS reviewed the comments it received regarding the Proposed
17 Medical Record Review Rule prior to finalizing the May 23, 2014 Final Rule.
18 However, the United States denies the remainder of this Request.

19 **REQUEST FOR ADMISSION NO. 206:** Admit that CMS did not finalize the
20 portion of the Proposed Medical Record Review Rule that would have required Two-
21 Way Looks in part related to comments CMS received from entities engaged in
22 business related to the Medicare Advantage Program.

23 **Objection:** The United States incorporates its General Objections and Specific
24 Objections to the Definitions and Instructions as if stated herein, including but not
25 limited to, its specific objections to the definition of "CMS." The United States also
26 objects to this Request to the extent that the undefined phrase "entities engaged in
27 business related to the Medicare Advantage Program" is vague and ambiguous. For
28 purposes of this Request, the United States defines "entities engaged in business

1 related to the Medicare Advantage Program” as MAOs. The United States objects to
2 this Request to the extent it calls for any legal conclusion. The United States objects
3 to this Request to the extent it seeks disclosure of information that is protected from
4 disclosure by an applicable privilege or protection, including the attorney-client
5 privilege, attorney work-product doctrine, deliberative process privilege, and/or
6 investigative files privilege. The United States objects to this Request to the extent it
7 calls for information that is already in UnitedHealth’s possession, custody, or control,
8 or is otherwise available to UnitedHealth. The United States objects to this Request
9 to the extent that UnitedHealth is using this information to mischaracterize or
10 misinterpret the facts, particularly in that it mischaracterizes CMS’ statements
11 contained in the Response to Public Comments Section of the May 23, 2014 Final
12 Rule: “However, we emphasize that our decision to not finalize this regulatory
13 proposal does not change CMS’ existing contractual requirement that MA
14 organizations must certify (based on best knowledge, information, and belief) the
15 accuracy, completeness, and truthfulness of the risk adjustment data they submit to
16 CMS. Further, this decision does not change the long- standing risk adjustment data
17 requirement that a diagnosis submitted to CMS by an MA organization for payment
18 purposes must be supported by medical record documentation.” 79 Fed. Reg. 29926.
19 The United States objects to this Request as improper under Federal Rule of Civil
20 Procedure 36 and applicable case law to the extent it is compound in that it asks the
21 United States to admit multiple facts in one Request. The United States objects to this
22 Request to the extent it is duplicative of Request for Admission Nos. 205, 207 and
23 208.

24 **Response:** Subject to and without waiving the foregoing objections, the United
25 States admits that CMS reviewed the comments it received regarding the Proposed
26 Medical Record Review Rule prior to finalizing the May 23, 2014 Final Rule.
27 However, the United States denies the remainder of this Request.
28

1 **REQUEST FOR ADMISSION NO. 207:** Admit that CMS removed the portion of
2 the Proposed Medical Record Review Rule that would have required Two-Way
3 Looks from the Final Rule in part related to comments CMS received from MAOs.
4 **Objection:** The United States incorporates its General Objections and Specific
5 Objections to the Definitions and Instructions as if stated herein, including but not
6 limited to, its specific objections to the definition of “CMS.” The United States
7 objects to this Request to the extent it calls for any legal conclusion. The United
8 States objects to this Request to the extent it seeks disclosure of information that is
9 protected from disclosure by an applicable privilege or protection, including the
10 attorney-client privilege, attorney work-product doctrine, deliberative process
11 privilege, and/or investigative files privilege. The United States objects to this
12 Request to the extent it calls for information that is already in UnitedHealth’s
13 possession, custody, or control, or is otherwise available to UnitedHealth. The
14 United States objects to this Request to the extent that UnitedHealth is using this
15 information to mischaracterize or misinterpret the facts, particularly in that it
16 mischaracterizes CMS’ statements contained in the Response to Public Comments
17 Section of the May 23, 2014 Final Rule: “However, we emphasize that our decision
18 to not finalize this regulatory proposal does not change CMS’ existing contractual
19 requirement that MA organizations must certify (based on best knowledge,
20 information, and belief) the accuracy, completeness, and truthfulness of the risk
21 adjustment data they submit to CMS. Further, this decision does not change the long-
22 standing risk adjustment data requirement that a diagnosis submitted to CMS by an
23 MA organization for payment purposes must be supported by medical record
24 documentation.” 79 Fed. Reg. 29926. The United States objects to this Request as
25 improper under Federal Rule of Civil Procedure 36 and applicable case law to the
26 extent it is compound in that it asks the United States to admit multiple facts in one
27 Request. The United States objects to this Request to the extent it is duplicative of
28 Request for Admission Nos. 205, 206 and 208.

1 **Response:** Subject to and without waiving the foregoing objections, the United
2 States admits that CMS reviewed the comments it received regarding the Proposed
3 Medical Record Review Rule prior to finalizing the May 23, 2014 Final Rule.
4 However, the United States denies the remainder of this Request.

5 **REQUEST FOR ADMISSION NO. 208:** Admit that CMS did not finalize the
6 section of the Proposed Medical Record Review Rule that would have required Two-
7 Way Looks in part related to comments CMS received from MAOs.

8 **Objection:** The United States incorporates its General Objections and Specific
9 Objections to the Definitions and Instructions as if stated herein, including but not
10 limited to, its specific objections to the definition of “CMS.” The United States
11 objects to this Request to the extent it seeks disclosure of information that is protected
12 from disclosure by an applicable privilege or protection, including the attorney-client
13 privilege, attorney work-product doctrine, deliberative process privilege, and/or
14 investigative files privilege. The United States objects to this Request to the extent it
15 calls for any legal conclusion. The United States objects to this Request to the extent
16 it calls for information that is already in UnitedHealth’s possession, custody, or
17 control, or is otherwise available to UnitedHealth. The United States objects to this
18 Request to the extent that UnitedHealth is using this information to mischaracterize or
19 misinterpret the facts, particularly in that it mischaracterizes CMS’ statements
20 contained in the Response to Public Comments Section of the May 23, 2014 Final
21 Rule: “However, we emphasize that our decision to not finalize this regulatory
22 proposal does not change CMS’ existing contractual requirement that MA
23 organizations must certify (based on best knowledge, information, and belief) the
24 accuracy, completeness, and truthfulness of the risk adjustment data they submit to
25 CMS. Further, this decision does not change the long- standing risk adjustment data
26 requirement that a diagnosis submitted to CMS by an MA organization for payment
27 purposes must be supported by medical record documentation.” 79 Fed. Reg. 29926.
28 The United States objects to this Request as improper under Federal Rule of Civil

1 Procedure 36 and applicable case law to the extent it is compound in that it asks the
2 United States to admit multiple facts in one Request. The United States objects to
3 this Request to the extent it is duplicative of Request for Admission Nos. 205, 206
4 and 207.

5 **Response:** Subject to and without waiving the foregoing objections, the United
6 States admits that CMS reviewed the comments it received regarding the Proposed
7 Medical Record Review Rule prior to finalizing the May 23, 2014 Final Rule.
8 However, the United States denies the remainder of this Request.

9 **REQUEST FOR ADMISSION NO. 209:** Admit that CMS removed the portion of
10 the Proposed Medical Record Review Rule that would have required Two-Way
11 Looks from the Final Rule in part related to the breadth of the Proposed Medical
12 Record Review Rule.

13 **Objection:** The United States incorporates its General Objections and Specific
14 Objections to the Definitions and Instructions as if stated herein, including but not
15 limited to, its specific objections to the definition of “CMS.” The United States also
16 objects to this Request to the extent that the undefined term “breadth” is vague and
17 ambiguous. For purposes of this Request, the United States defines “breadth” as the
18 fact of including many different things. The United States objects to this Request to
19 the extent it calls for any legal conclusion. The United States objects to this Request
20 to the extent it seeks disclosure of information that is protected from disclosure by an
21 applicable privilege or protection, including the attorney-client privilege, attorney
22 work-product doctrine, deliberative process privilege, and/or investigative files
23 privilege. The United States objects to this Request to the extent it calls for
24 information that is already in UnitedHealth’s possession, custody, or control, or is
25 otherwise available to UnitedHealth. The United States objects to this Request to the
26 extent that UnitedHealth is using this information to mischaracterize or misinterpret
27 the facts, particularly in that it mischaracterizes CMS’ statements contained in the
28 Response to Public Comments Section of the May 23, 2014 Final Rule: “However,

1 we emphasize that our decision to not finalize this regulatory proposal does not
2 change CMS' existing contractual requirement that MA organizations must certify
3 (based on best knowledge, information, and belief) the accuracy, completeness, and
4 truthfulness of the risk adjustment data they submit to CMS. Further, this decision
5 does not change the long- standing risk adjustment data requirement that a diagnosis
6 submitted to CMS by an MA organization for payment purposes must be supported
7 by medical record documentation." 79 Fed. Reg. 29926. The United States objects
8 to this Request as improper under Federal Rule of Civil Procedure 36 and applicable
9 case law to the extent it is compound in that it asks the United States to admit
10 multiple facts in one Request. The United States objects to this Request to the extent
11 it is duplicative of Request for Admission No. 210.

12 **Response:** Subject to and without waiving the foregoing objections, the United
13 States denies this Request.

14 **REQUEST FOR ADMISSION NO. 210:** Admit that CMS did not finalize the
15 portion of the Proposed Medical Record Review Rule that would have required Two-
16 Way Looks in part related to the breadth of the Proposed Medical Record Review
17 Rule.

18 **Objection:** The United States incorporates its General Objections and Specific
19 Objections to the Definitions and Instructions as if stated herein, including but not
20 limited to, its specific objections to the definition of "CMS." The United States also
21 objects to this Request to the extent that the undefined term "breadth" is vague and
22 ambiguous. For purposes of this Request, the United States defines "breadth" as the
23 fact of including many different things. The United States objects to this Request to
24 the extent it calls for any legal conclusion. The United States objects to this Request
25 to the extent it seeks disclosure of information that is protected from disclosure by an
26 applicable privilege or protection, including the attorney-client privilege, attorney
27 work-product doctrine, deliberative process privilege, and/or investigative files
28 privilege. The United States objects to this Request to the extent it calls for

1 information that is already in UnitedHealth's possession, custody, or control, or is
2 otherwise available to UnitedHealth. The United States objects to this Request to the
3 extent that UnitedHealth is using this information to mischaracterize or misinterpret
4 the facts, particularly in that it mischaracterizes CMS' statements contained in the
5 Response to Public Comments Section of the May 23, 2014 Final Rule: "However,
6 we emphasize that our decision to not finalize this regulatory proposal does not
7 change CMS' existing contractual requirement that MA organizations must certify
8 (based on best knowledge, information, and belief) the accuracy, completeness, and
9 truthfulness of the risk adjustment data they submit to CMS. Further, this decision
10 does not change the long- standing risk adjustment data requirement that a diagnosis
11 submitted to CMS by an MA organization for payment purposes must be supported
12 by medical record documentation." 79 Fed. Reg. 29926. The United States objects
13 to this Request as improper under Federal Rule of Civil Procedure 36 and applicable
14 case law to the extent it is compound in that it asks the United States to admit
15 multiple facts in one Request. The United States objects to this Request to the extent
16 it is duplicative of Request for Admission No. 209.

17 **Response:** Subject to and without waiving the foregoing objections, the United
18 States denies this Request.

19 **REQUEST FOR ADMISSION NO. 211:** Admit that CMS removed the portion of
20 the Proposed Medical Record Review Rule that would have required Two-Way
21 Looks from the Final Rule in part related to the advisability of implementing the
22 Proposed Rule as drafted.

23 **Objection:** The United States incorporates its General Objections and Specific
24 Objections to the Definitions and Instructions as if stated herein, including but not
25 limited to, its specific objections to the definition of "CMS." The United States also
26 objects to this Request to the extent that the undefined phrase "advisability of
27 implementing" is vague and ambiguous and the United States lacks knowledge about
28 what is requested. The United States objects to this Request to the extent it calls for

1 any legal conclusion. The United States objects to this Request to the extent it seeks
2 disclosure of information that is protected from disclosure by an applicable privilege
3 or protection, including the attorney-client privilege, attorney work-product doctrine,
4 deliberative process privilege, and/or investigative files privilege. The United States
5 objects to this Request to the extent it calls for information that is already in
6 UnitedHealth's possession, custody, or control, or is otherwise available to
7 UnitedHealth. The United States objects to this Request to the extent that
8 UnitedHealth is using this information to mischaracterize or misinterpret the facts,
9 particularly in that it mischaracterizes CMS' statements contained in the Response to
10 Public Comments Section of the May 23, 2014 Final Rule: "However, we emphasize
11 that our decision to not finalize this regulatory proposal does not change CMS'
12 existing contractual requirement that MA organizations must certify (based on best
13 knowledge, information, and belief) the accuracy, completeness, and truthfulness of
14 the risk adjustment data they submit to CMS. Further, this decision does not change
15 the long- standing risk adjustment data requirement that a diagnosis submitted to
16 CMS by an MA organization for payment purposes must be supported by medical
17 record documentation." 79 Fed. Reg. 29926. The United States objects to this
18 Request as improper under Federal Rule of Civil Procedure 36 and applicable case
19 law to the extent it is compound in that it asks the United States to admit multiple
20 facts in one Request. The United States objects to this Request to the extent it is
21 duplicative of Request for Admission No. 212.

22 **Response:** Subject to and without waiving the foregoing objections, the United
23 States denies this Request.

24 **REQUEST FOR ADMISSION NO. 212:** Admit that CMS did not finalize the
25 Proposed Medical Record Review Rule that would have required Two-Way Looks in
26 part related to the advisability of implementing the Proposed Rule as drafted.

27 **Objection:** The United States incorporates its General Objections and Specific
28 Objections to the Definitions and Instructions as if stated herein, including but not

1 limited to, its specific objections to the definitions of “CMS.” The United States also
2 objects to this Request to the extent that the undefined phrase “advisability of
3 implementing” is vague and ambiguous and the United States lacks knowledge about
4 what is requested. The United States objects to this Request to the extent it calls for
5 any legal conclusion. The United States objects to this Request to the extent it seeks
6 disclosure of information that is protected from disclosure by an applicable privilege
7 or protection, including the attorney-client privilege, attorney work-product doctrine,
8 deliberative process privilege, and/or investigative files privilege. The United States
9 objects to this Request to the extent it calls for information that is already in
10 UnitedHealth’s possession, custody, or control, or is otherwise available to
11 UnitedHealth. The United States objects to this Request to the extent that
12 UnitedHealth is using this information to mischaracterize or misinterpret the facts,
13 particularly in that it mischaracterizes CMS’ statements contained in the Response to
14 Public Comments Section of the May 23, 2014 Final Rule: “However, we emphasize
15 that our decision to not finalize this regulatory proposal does not change CMS’
16 existing contractual requirement that MA organizations must certify (based on best
17 knowledge, information, and belief) the accuracy, completeness, and truthfulness of
18 the risk adjustment data they submit to CMS. Further, this decision does not change
19 the long- standing risk adjustment data requirement that a diagnosis submitted to
20 CMS by an MA organization for payment purposes must be supported by medical
21 record documentation.” 79 Fed. Reg. 29926. The United States objects to this
22 Request as improper under Federal Rule of Civil Procedure 36 and applicable case
23 law to the extent it is compound in that it asks the United States to admit multiple
24 facts in one Request. The United States objects to this Request to the extent it is
25 duplicative of Request for Admission No. 211.

26 **Response:** Subject to and without waiving the foregoing objections, the United
27 States denies this Request.
28

1 **REQUEST FOR ADMISSION NO. 213:** Admit that CMS did not finalize the
2 Proposed Medical Record Review Rule that would have required Two-Way Looks in
3 part because CMS thought Two-Way Looks were already required.

4 **Objection:** The United States incorporates its General Objections and Specific
5 Objections to the Definitions and Instructions as if stated herein, including but not
6 limited to, its specific objections to the definition of “CMS.” The United States
7 objects to this Request to the extent it calls for any legal conclusion. The United
8 States objects to this Request to the extent it seeks disclosure of information that is
9 protected from disclosure by an applicable privilege or protection, including the
10 attorney-client privilege, attorney work-product doctrine, deliberative process
11 privilege, and/or investigative files privilege. The United States objects to this
12 Request to the extent it calls for information that is already in UnitedHealth’s
13 possession, custody, or control, or is otherwise available to UnitedHealth. The
14 United States objects to this Request to the extent that UnitedHealth is using this
15 information to mischaracterize or misinterpret the facts, particularly in that it
16 mischaracterizes CMS’ statements contained in the Response to Public Comments
17 Section of the May 23, 2014 Final Rule: “However, we emphasize that our decision
18 to not finalize this regulatory proposal does not change CMS’ existing contractual
19 requirement that MA organizations must certify (based on best knowledge,
20 information, and belief) the accuracy, completeness, and truthfulness of the risk
21 adjustment data they submit to CMS. Further, this decision does not change the long-
22 standing risk adjustment data requirement that a diagnosis submitted to CMS by an
23 MA organization for payment purposes must be supported by medical record
24 documentation.” 79 Fed. Reg. 29926. The United States objects to this Request as
25 improper under Federal Rule of Civil Procedure 36 and applicable case law to the
26 extent it is compound in that it asks the United States to admit multiple facts in one
27 Request. The United States objects to this Request to the extent it is duplicative of
28 Request for Admission No. 214.

1 **Response:** Subject to and without waiving the foregoing objections, the United
2 States denies that CMS identified Two Way Looks as the only manner in which
3 MAOs could comply with their existing regulatory and contractual obligations.
4 However, the United States admits that CMS reaffirmed the existing obligations of
5 MA Organizations in the preamble to the Final Rule: “However, we emphasize that
6 our decision to not finalize this regulatory proposal does not change CMS’ existing
7 contractual requirement that MA organizations must certify (based on best
8 knowledge, information, and belief) the accuracy, completeness, and truthfulness of
9 the risk adjustment data they submit to CMS. Further, this decision does not change
10 the long-standing risk adjustment data requirement that a diagnosis submitted to CMS
11 by an MA organization for payment purposes must be supported by medical record
12 documentation.” 79 Fed. Reg. 29926.

13 **REQUEST FOR ADMISSION NO. 214:** Admit that CMS removed the portion of
14 the Proposed Medical Record Review Rule that would have required Two-Way
15 Looks from the Final Rule in part because CMS thought Two-Way Looks were
16 already required.

17 **Objection:** The United States incorporates its General Objections and Specific
18 Objections to the Definitions and Instructions as if stated herein, including but not
19 limited to, its specific objections to the definition of “CMS.” The United States
20 objects to this Request to the extent it calls for any legal conclusion. The United
21 States objects to this Request to the extent it seeks disclosure of information that is
22 protected from disclosure by an applicable privilege or protection, including the
23 attorney-client privilege, attorney work-product doctrine, deliberative process
24 privilege, and/or investigative files privilege. The United States objects to this
25 Request to the extent it calls for information that is already in UnitedHealth’s
26 possession, custody, or control, or is otherwise available to UnitedHealth. The
27 United States objects to this Request to the extent that UnitedHealth is using this
28 information to mischaracterize or misinterpret the facts, particularly in that it

1 mischaracterizes CMS' statements contained in the Response to Public Comments
2 Section of the May 23, 2014 Final Rule: "However, we emphasize that our decision
3 to not finalize this regulatory proposal does not change CMS' existing contractual
4 requirement that MA organizations must certify (based on best knowledge,
5 information, and belief) the accuracy, completeness, and truthfulness of the risk
6 adjustment data they submit to CMS. Further, this decision does not change the long-
7 standing risk adjustment data requirement that a diagnosis submitted to CMS by an
8 MA organization for payment purposes must be supported by medical record
9 documentation." 79 Fed. Reg. 29926. The United States objects to this Request as
10 improper under Federal Rule of Civil Procedure 36 and applicable case law to the
11 extent it is compound in that it asks the United States to admit multiple facts in one
12 Request. The United States objects to this Request to the extent it is duplicative of
13 Request for Admission No. 213.

14 **Response:** Subject to and without waiving the foregoing objections, the United
15 States denies that CMS identified Two Way Looks as the only manner in which
16 MAOs could comply with their existing regulatory and contractual obligations.
17 However, the United States admits that CMS reaffirmed the existing obligations of
18 MA Organizations in in the preamble to the Final Rule, "However, we emphasize that
19 our decision to not finalize this regulatory proposal does not change CMS' existing
20 contractual requirement that MA organizations must certify (based on best
21 knowledge, information, and belief) the accuracy, completeness, and truthfulness of
22 the risk adjustment data they submit to CMS. Further, this decision does not change
23 the long-standing risk adjustment data requirement that a diagnosis submitted to CMS
24 by an MA organization for payment purposes must be supported by medical record
25 documentation." 79 Fed. Reg. 29926.

26 **REQUEST FOR ADMISSION NO. 215:** Admit that CMS did not finalize the
27 Proposed Medical Record Review Rule that would have required Two-Way Looks in
28 part because CMS thought Two-Way Looks were burdensome for MAOs.

1 **Objection:** The United States incorporates its General Objections and Specific
2 Objections to the Definitions and Instructions as if stated herein, including but not
3 limited to, its specific objections to the definitions of “CMS” and “MAO.” The
4 United States also objects to this Request to the extent that the undefined term
5 “burdensome” is vague and ambiguous. For purposes of this Request, the United
6 States defines “burdensome” as difficult to carry out. The United States objects to
7 this Request to the extent it calls for any legal conclusion. The United States objects
8 to this Request to the extent it seeks disclosure of information that is protected from
9 disclosure by an applicable privilege or protection, including the attorney-client
10 privilege, attorney work-product doctrine, deliberative process privilege, and/or
11 investigative files privilege. The United States objects to this Request to the extent it
12 calls for information that is already in UnitedHealth’s possession, custody, or control,
13 or is otherwise available to UnitedHealth. The United States objects to this Request
14 to the extent that UnitedHealth is using this information to mischaracterize or
15 misinterpret the facts, particularly in that it mischaracterizes CMS’ statements
16 contained in the Response to Public Comments Section of the May 23, 2014 Final
17 Rule: “However, we emphasize that our decision to not finalize this regulatory
18 proposal does not change CMS’ existing contractual requirement that MA
19 organizations must certify (based on best knowledge, information, and belief) the
20 accuracy, completeness, and truthfulness of the risk adjustment data they submit to
21 CMS. Further, this decision does not change the long- standing risk adjustment data
22 requirement that a diagnosis submitted to CMS by an MA organization for payment
23 purposes must be supported by medical record documentation.” 79 Fed. Reg. 29926.
24 The United States objects to this Request as improper under Federal Rule of Civil
25 Procedure 36 and applicable case law to the extent it is compound in that it asks the
26 United States to admit multiple facts in one Request. The United States objects to
27 this Request to the extent it is duplicative of Request for Admission No. 216.
28 **Response:** Subject to and without waiving the foregoing objections, the United

1 States denies this Request.

2 **REQUEST FOR ADMISSION NO. 216:** Admit that CMS removed the portion of
3 the Proposed Medical Record Review Rule that would have required Two-Way
4 Looks from the Final Rule in part because CMS thought Two-Way Looks were
5 burdensome for MAOs.

6 **Objection:** The United States incorporates its General Objections and Specific
7 Objections to the Definitions and Instructions as if stated herein, including but not
8 limited to, its specific objections to the definitions of “CMS” and “MAO.” The
9 United States also objects to this Request to the extent that the undefined term
10 “burdensome” is vague and ambiguous. For purposes of this Request, the United
11 States defines “burdensome” as difficult to carry out. The United States objects to
12 this Request to the extent it calls for any legal conclusion. The United States objects
13 to this Request to the extent it seeks disclosure of information that is protected from
14 disclosure by an applicable privilege or protection, including the attorney-client
15 privilege, attorney work-product doctrine, deliberative process privilege, and/or
16 investigative files privilege. The United States objects to this Request to the extent it
17 calls for information that is already in UnitedHealth’s possession, custody, or control,
18 or is otherwise available to UnitedHealth. The United States objects to this Request
19 to the extent that UnitedHealth is using this information to mischaracterize or
20 misinterpret the facts, particularly in that it mischaracterizes CMS’ statements
21 contained in the Response to Public Comments Section of the May 23, 2014 Final
22 Rule: “However, we emphasize that our decision to not finalize this regulatory
23 proposal does not change CMS’ existing contractual requirement that MA
24 organizations must certify (based on best knowledge, information, and belief) the
25 accuracy, completeness, and truthfulness of the risk adjustment data they submit to
26 CMS. Further, this decision does not change the long- standing risk adjustment data
27 requirement that a diagnosis submitted to CMS by an MA organization for payment
28 purposes must be supported by medical record documentation.” 79 Fed. Reg. 29926.

1 The United States objects to this Request as improper under Federal Rule of Civil
2 Procedure 36 and applicable case law to the extent it is compound in that it asks the
3 United States to admit multiple facts in one Request. The United States objects to
4 this Request to the extent it is duplicative of Request for Admission No. 215.

5 **Response:** Subject to and without waiving the foregoing objections, the United
6 States denies this Request.

7 **REQUEST FOR ADMISSION NO. 217:** Admit that CMS did not finalize the
8 Proposed Medical Record Review Rule that would have required Two-Way Looks in
9 part because of the FFS Adjuster.

10 **Objection:** The United States incorporates its General Objections and Specific
11 Objections to the Definitions and Instructions as if stated herein, including but not
12 limited to, its specific objections to the definition of “CMS.” The United States
13 objects to this Request to the extent it calls for any legal conclusion. The United
14 States objects to this Request to the extent it seeks disclosure of information that is
15 protected from disclosure by an applicable privilege or protection, including the
16 attorney-client privilege, attorney work-product doctrine, deliberative process
17 privilege, and/or investigative files privilege. The United States objects to this
18 Request to the extent it calls for information that is already in UnitedHealth’s
19 possession, custody, or control, or is otherwise available to UnitedHealth. The
20 United States objects to this Request to the extent that UnitedHealth is using this
21 information to mischaracterize or misinterpret the facts, particularly in that it
22 mischaracterizes CMS’ statements contained in the Response to Public Comments
23 Section of the May 23, 2014 Final Rule: “However, we emphasize that our decision
24 to not finalize this regulatory proposal does not change CMS’ existing contractual
25 requirement that MA organizations must certify (based on best knowledge,
26 information, and belief) the accuracy, completeness, and truthfulness of the risk
27 adjustment data they submit to CMS. Further, this decision does not change the long-
28 standing risk adjustment data requirement that a diagnosis submitted to CMS by an

1 MA organization for payment purposes must be supported by medical record
2 documentation.” 79 Fed. Reg. 29926. The United States objects to this Request as
3 improper under Federal Rule of Civil Procedure 36 and applicable case law to the
4 extent it is compound in that it asks the United States to admit multiple facts in one
5 Request. The United States objects to this Request to the extent it is duplicative of
6 Request for Admission No. 218.

7 **Response:** Subject to and without waiving the foregoing objections, the United
8 States denies this Request.

9 **REQUEST FOR ADMISSION NO. 218:** Admit that CMS removed the portion of
10 the Proposed Medical Record Review Rule that would have required Two-Way
11 Looks from the Final Rule in part because of the FFS Adjuster.

12 **Objection:** The United States incorporates its General Objections and Specific
13 Objections to the Definitions and Instructions as if stated herein, including but not
14 limited to, its specific objections to the definition of “CMS.” The United States
15 objects to this Request to the extent it calls for any legal conclusion. The United
16 States objects to this Request to the extent it seeks disclosure of information that is
17 protected from disclosure by an applicable privilege or protection, including the
18 attorney-client privilege, attorney work-product doctrine, deliberative process
19 privilege, and/or investigative files privilege. The United States objects to this
20 Request to the extent it calls for information that is already in UnitedHealth’s
21 possession, custody, or control, or is otherwise available UnitedHealth. The United
22 States objects to this Request to the extent that UnitedHealth is using this information
23 to mischaracterize or misinterpret the facts, particularly in that it mischaracterizes
24 CMS’ statements contained in the Response to Public Comments Section of the May
25 23, 2014 Final Rule: “However, we emphasize that our decision to not finalize this
26 regulatory proposal does not change CMS’ existing contractual requirement that MA
27 organizations must certify (based on best knowledge, information, and belief) the
28 accuracy, completeness, and truthfulness of the risk adjustment data they submit to

1 CMS. Further, this decision does not change the long- standing risk adjustment data
2 requirement that a diagnosis submitted to CMS by an MA organization for payment
3 purposes must be supported by medical record documentation.” 79 Fed. Reg. 29926.
4 The United States objects to this Request as improper under Federal Rule of Civil
5 Procedure 36 and applicable case law to the extent it is compound in that it asks the
6 United States to admit multiple facts in one Request. The United States objects to
7 this Request to the extent it is duplicative of Request for Admission No. 217.

8 **Response:** Subject to and without waiving the foregoing objections, the United
9 States denies this Request.

10 **REQUEST FOR ADMISSION NO. 219:** Admit that CMS did not finalize the
11 Proposed Medical Record Review Rule that would have required Two-Way Looks in
12 part because of Actuarial Equivalence.

13 **Objection:** The United States incorporates its General Objections and Specific
14 Objections to the Definitions and Instructions as if stated herein, including but not
15 limited to, its specific objections to the definitions of “CMS” and “Actuarial
16 Equivalence.” The United States objects to this Request to the extent it calls for any
17 legal conclusion. The United States objects to this Request to the extent it seeks
18 disclosure of information that is protected from disclosure by an applicable privilege
19 or protection, including the attorney-client privilege, attorney work-product doctrine,
20 deliberative process privilege, and/or investigative files privilege. The United States
21 objects to this Request to the extent it calls for information that is already in
22 UnitedHealth’s possession, custody, or control, or is otherwise available to
23 UnitedHealth. The United States objects to this Request to the extent that
24 UnitedHealth is using this information to mischaracterize or misinterpret the facts,
25 particularly in that it mischaracterizes CMS’ statements contained in the Response to
26 Public Comments Section of the May 23, 2014 Final Rule: “However, we emphasize
27 that our decision to not finalize this regulatory proposal does not change CMS’
28 existing contractual requirement that MA organizations must certify (based on best

1 knowledge, information, and belief) the accuracy, completeness, and truthfulness of
2 the risk adjustment data they submit to CMS. Further, this decision does not change
3 the long- standing risk adjustment data requirement that a diagnosis submitted to
4 CMS by an MA organization for payment purposes must be supported by medical
5 record documentation.” 79 Fed. Reg. 29926. The United States objects to this
6 Request as improper under Federal Rule of Civil Procedure 36 and applicable case
7 law to the extent it is compound in that it asks the United States to admit multiple
8 facts in one Request. The United States objects to this Request to the extent it is
9 duplicative of Request for Admission No. 220.

10 **Response:** Subject to and without waiving the foregoing objections, the United
11 States denies this Request.

12 **REQUEST FOR ADMISSION NO. 220:** Admit that CMS removed the portion of
13 the Proposed Medical Record Review Rule that would have required Two-Way
14 Looks from the Final Rule in part because of Actuarial Equivalence.

15 **Objection:** The United States incorporates its General Objections and Specific
16 Objections to the Definitions and Instructions as if stated herein, including but not
17 limited to, its specific objections to the definitions of “CMS” and “Actuarial
18 Equivalence.” The United States objects to this Request to the extent it calls for any
19 legal conclusion. The United States objects to this Request to the extent it seeks
20 disclosure of information that is protected from disclosure by an applicable privilege
21 or protection, including the attorney-client privilege, attorney work-product doctrine,
22 deliberative process privilege, and/or investigative files privilege. The United States
23 objects to this Request to the extent it calls for information that is already in
24 UnitedHealth’s possession, custody, or control, or is otherwise available to
25 UnitedHealth. The United States objects to this Request to the extent that
26 UnitedHealth is using this information to mischaracterize or misinterpret the facts,
27 particularly in that it mischaracterizes CMS’ statements contained in the Response to
28 Public Comments Section of the May 23, 2014 Final Rule: “However, we emphasize

1 that our decision to not finalize this regulatory proposal does not change CMS'
2 existing contractual requirement that MA organizations must certify (based on best
3 knowledge, information, and belief) the accuracy, completeness, and truthfulness of
4 the risk adjustment data they submit to CMS. Further, this decision does not change
5 the long- standing risk adjustment data requirement that a diagnosis submitted to
6 CMS by an MA organization for payment purposes must be supported by medical
7 record documentation.” 79 Fed. Reg. 29926. The United States objects to this
8 Request as improper under Federal Rule of Civil Procedure 36 and applicable case
9 law to the extent it is compound in that it asks the United States to admit multiple
10 facts in one Request. The United States objects to this Request to the extent it is
11 duplicative of Request for Admission No. 219.

12 **Response:** Subject to and without waiving the foregoing objections, the United
13 States denies this Request.

28 Defendants.

No. CV 16-08697 FMO (SSx)

UNITED STATES' RESPONSES AND
OBJECTIONS TO DEFENDANT UHC
OF CALIFORNIA'S FIRST SET OF
INTERROGATORIES TO THE
GOVERNMENT

1 **PROPOUNDING PARTY: UHC OF CALIFORNIA, INC.**
2 **RESPONDING PARTY: UNITED STATES OF AMERICA**
3 **SET NUMBER: ONE**

4
5 **Preliminary Statement**

6 Pursuant to Rules 26 and 33 of the Federal Rules of Civil Procedure (“Federal
7 Rules”) and Rule 33 of the Local Civil Rules of the United States District Court for
8 the Central District of California, the United States of America (“United States” or
9 “government”), through its undersigned counsel, provides these responses and
10 objections to Defendant UHC of California’s (“UnitedHealth” or “Defendant”) First
11 Set of Interrogatories, dated January 3, 2020. The objections and responses set forth
12 herein are based on information now known to the United States and its undersigned
13 attorneys, and will be revised, corrected, supplemented, amended, and clarified to the
14 extent required by Rule 26 as discovery proceeds.

15 **General Objections**

16 The following objections apply to each and every separately numbered
17 Interrogatory and are incorporated by reference to the extent applicable into the
18 objection to each Interrogatory.

19 1. The United States objects to the First Set of Interrogatories to the extent it is
20 vague, ambiguous, overbroad, unduly burdensome, or seeks to impose requirements
21 upon the United States beyond those called for or permitted by the Federal Rules of
22 Civil Procedure, the Local Civil Rules of the United States District Court for the
23 Central District of California, or any order of the Court. The United States responds
24 below pursuant to its obligations under the Federal Rules and the Local Civil Rules,
25 namely that the United States has taken and is continuing to undertake reasonable
26 efforts to identify information responsive to the Interrogatories.

27 2. The United States objects to the First Set of Interrogatories to the extent they
28 seek the disclosure of information concerning the United States’ investigation of this

1 matter as well as the United States' investigation in *United States of America ex rel.*
2 *Swoben v. SCAN Health Plan, et al.*, CV 09-5013 JFW (JEMx), 2017 U.S. Dist.
3 LEXIS 174308 (C.D. Cal. Oct. 5, 2017) ("*Swoben*"). This includes, but is not limited
4 to, the United States' investigative efforts, its assessments of facts and allegations, its
5 deliberative processes concerning actions taken regarding this matter and *Swoben*,
6 and other information generated before and after the commencement of both this
7 litigation and *Swoben*. The United States objects on the grounds that such
8 information is privileged, work-product protected, not relevant to claims or defenses,
9 and not proportional to the needs of the case.

10 3. The United States objects to the below First Set of Interrogatories to the extent
11 that a response requires disclosure of information protected from disclosure by an
12 applicable privilege or protection, including, but not limited to, the attorney-client
13 privilege, work product doctrine, deliberative process privilege, law enforcement
14 privilege, common interest privilege, or investigative files privilege, and protections
15 afforded by Fed. R. Civ. P. 26(b), or any other applicable privilege. The United States
16 will not respond in such a way as to disclose such protected information, but
17 inadvertent identification or disclosure of privileged information by the United States
18 shall not be a waiver of any applicable privilege. Under Federal Rule of Evidence
19 502, Federal Rule of Civil Procedure 26(b)(5)(B), other related sources of law, and
20 the Court's order regarding inadvertent disclosure of privileged information [Doc.
21 198], the government reserves any and all rights to claw back privileged information
22 it inadvertently discloses in response to the First Set of Interrogatories.

23 4. The United States submits these responses subject to, without intending to
24 waive, but expressly reserving the right to object to other discovery procedures
25 involving or relating to the subject matter of the information in responses to the First
26 Set of Interrogatories. The United States reserves the right to object on any ground, at
27 any time, to such other or supplemental requests as the Defendants may propound
28 involving or relating to the subject matter of the First Set of Interrogatories.

1 5. The United States reserves the right to supplement its responses to the First Set
2 of Interrogatories at any time, up to and including trial, as provided by the Federal
3 Rules.

4 6. The assertion of the same, similar, or additional specific objections to the First
5 Set of Interrogatories does not and should not be construed to waive or modify any of
6 the United States' general objections.

7 7. The United States objects to the First Set of Interrogatories to the extent they
8 require the United States to draw legal conclusions, comment on the merits of any
9 affirmative defenses, or otherwise seek to impose any requirements beyond those
10 established by the Federal Rules or the Local Rules.

11 8. The United States objects to the First Set of Interrogatories to the extent that
12 any it contains multiple subparts numbered as a single Interrogatory. By responding,
13 the United States in no way waives its right to object that UnitedHealth has exceeded
14 the maximum number of interrogatories permitted under the Federal Rules of Civil
15 Procedure.

16 **Specific Objections to the Definitions and Instructions**

17 The United States objects to the Definitions and Instructions to the extent they
18 (i) seek to impose burdens on the United States that are different from, inconsistent
19 with, or exceed those imposed by the Federal Rules of Civil Procedure and the Local
20 Civil Rules, (ii) are vague or ambiguous, and/or (iii) render the First Set of
21 Interrogatories overly broad, unduly burdensome, not proportionate to the needs of
22 the case, and not relevant. The United States further objects to the First Set of
23 Interrogatories to the extent they use terms not defined by UnitedHealth.

24 **Definition 10:** The United States objects to the definition of "Government"
25 (Definition 10) to the extent it includes any branch, agency, department, agent,
26 representative, contractor, attorney, consultant, or person acting on its behalf not
27 relevant to this action. This definition is plainly unreasonable, unduly burdensome,
28 and disproportionate to the needs of the case, in that it seeks to require the United

1 States to provide information not currently in the possession, custody, or control of
2 CMS, HHS Office of the Secretary and Immediate Office of the Secretary and HHS-
3 OIG. Subject to and without waiving these objections, the United States interprets
4 “Government” to mean CMS, HHS Office of the Secretary and Immediate Office of
5 the Secretary, and HHS-OIG. To the extent the United States interprets the use of
6 “Government” in a specific Interrogatory as directed at one, but not all, of the above
7 components, the United States will state its interpretation in its response.

8 **Definition 13:** The United States objects to the term “Person” (Definition 13) to the
9 extent it is defined to mean “the federal government and all departments and agencies
10 thereof, state governments, local governments, [and] other governmental agencies[.]”
11 This definition is plainly unreasonable, unduly burdensome, and disproportionate to
12 the needs of the case, in that it seeks to require the United States to provide
13 information not currently in the possession, custody, or control of CMS, HHS Office
14 of the Secretary and Immediate Office of the Secretary and HHS-OIG. Furthermore,
15 the United States objects to the extent each definition includes former CMS
16 contractors for whom the United States presently has no reasonable belief they
17 possess or control non-duplicative information relevant to any claim or defense in this
18 case.

19 **Definition 19:** The United States objects to the definition of “You” and “Your” to
20 the extent these terms are intended to encompass any agency, office, employee, agent,
21 representative, officer, or contractor of either the legislative or judicial branch, and
22 insofar as these terms are defined to include executive branch agencies and offices
23 not relevant to this action. This is plainly unreasonable, unduly burdensome, and
24 disproportionate to the needs of the case, in that it seeks to require the United States
25 to provide information not currently in the possession, custody, or control of CMS,
26 HHS Office of the Secretary and Immediate Office of the Secretary and HHS-OIG.
27 Subject to and without waiving these objections, the United States will interpret this
28 term to mean the Department of Justice, CMS, HHS Office of the Secretary and

1 Immediate Office of the Secretary, and HHS-OIG.

2 **Instruction 3:** The United States objects to Instruction 3 as vague and ambiguous.
3 The United States construes the Interrogatory to encompass the time period from
4 Date of Service Years 2008-2016.

5 **Instruction 5:** The United States objects to Instruction 5 to the extent it seeks to
6 impose burdens upon the United States beyond those called for or permitted by the
7 Federal Rules or the Local Rules for the Central District of California.

8 **Instruction 6:** The United States objects to Instruction 6 to the extent it seeks to
9 impose burdens upon the United States beyond those called for or permitted by the
10 Federal Rules or the Local Rules for the Central District of California.

11 **Instruction 7:** The United States objects to Instruction 7 to the extent it seeks to
12 impose burdens upon the United States beyond those called for or permitted by the
13 Federal Rules or the Local Rules for the Central District of California. The United
14 States will assert any applicable privileges and specify the material to which it applies
15 per Fed. R. Civ. P. 25(b)(5)(A) for all information responsive to a request to which
16 the United States has agreed to produce but which is withheld on the basis of a
17 privilege or protection.

18 **Specific Objections and Responses**

19 **INTERROGATORY NO. 1:** Identify for Date of Service Years 2008–2016
20 the Beneficiary (by name, HIC Number, and date of birth), Date of Service,
21 Diagnosis Code(s), CMS HCC(s) or RxHCC(s), and Provider (by individual
22 name, group name, address, NPI, Tax ID(s), and Provider ID), that corresponds
23 to each and every Diagnosis Code You allege UnitedHealth “knowingly and
24 improperly failed to delete . . . or otherwise return to the Medicare Program [as
25 an] overpayment.” United States’ Complaint ¶ 342, Dkt. 171.

26 **Objection:** The United States incorporates its General Objections and Specific
27 Objections to the Definitions and Instructions as if stated herein. The United States
28 further objects to this Interrogatory on the grounds that it is oppressive and unduly

1 burdensome in that it seeks information that is more readily available to or in the
2 possession, custody, or control of the UnitedHealth defendants concerning their own
3 Beneficiaries and Diagnoses Codes reported on behalf of their own Beneficiaries.
4 The United States further objects to this Interrogatory in that it prematurely seeks the
5 disclosure of expert analysis and opinion. The United States will provide its expert
6 analyses and opinions in accordance with the expert discovery schedule set forth in
7 this case. The United States further objects to this Interrogatory in that, with fact
8 discovery still ongoing, the United States has not yet identified “each and every
9 Diagnosis Code” that the United States alleges that UnitedHealth knowingly and
10 improperly failed to delete and that the interrogatory therefore prematurely seeks the
11 United States’ contentions about “each and every Diagnosis Code.” Further,
12 UnitedHealth has inhibited the United States’ ability to identify “each and every
13 Diagnosis Code” by improperly refusing to produce – for more than a year and a half
14 – complete chart review data for the relevant time period. Indeed, UnitedHealth only
15 recently produced chart review data for Date of Service Years 2015 and 2016 on or
16 about December 6, 2019. The United States further objects to the extent that the
17 Interrogatory asks for information that the United States does not have or cannot
18 determine because of the manner in which UnitedHealth recorded and maintained
19 data. The United States further objects to the extent that UnitedHealth’s use of an
20 ellipsis is misleading and confusing and renders the quotation nonsensical.

21 **Response:** Subject to and without waiving the foregoing objections, the United
22 States responds that although fact discovery is ongoing, and expert disclosures are not
23 due until December 18, 2020, and that the United States reserves the right to
24 supplement and/or amend this answer in full or in part as it learns new information
25 and as expert analysis progresses, the United States alleges that UnitedHealth
26 Defendants “knowingly and improperly failed to delete in the RAPS system the
27 invalid diagnoses that had been submitted to the Medicare Program for risk
28 adjustment payments which were made by the Medicare Program to them or

1 knowingly and improperly failed to otherwise return to the Medicare Program the
2 overpayments based on the invalid diagnoses” for each and every Diagnosis Code
3 that was known (as that term is defined by the False Claims Act) to be unsupported
4 by medical records and that affected the amount of payment received by
5 UnitedHealth from the Medicare Program. The information UnitedHealth seeks is
6 readily available to or in its possession, custody, or control, and can be derived from
7 documents that UnitedHealth has produced including, but not limited to:
8 MARA1795523; MARA1795803; MARA768242; MARA2100494-495;
9 MARA2100496-MARA2100500; MARA2100501-502; MARA2117122;
10 MARA2117127-128; MARA2117129-137; MARA2117312-539; MARA2152913-
11 MARA2152925; MARA2152926; MARA2152922; MARA2152927-
12 MARA2152934; MARA2156616- 618; MARA2156619-6787; MARA2157305-
13 MARA2157320; MARA2157332 - MARA2157345; MARA2157351-
14 MARA2160459; MARA2160460-MARA2160489; MARA2160490 –
15 MARA2160498; MARA2160502 - MARA2160535; MARA2160687-
16 MARA2160695; MARA2160704-MARA2160725; MARA2160726 -
17 MARA2160729; MARA2160732-MARA2160735; MARA2160730 -
18 MARA2160731; MARA2160736-MARA2160737; MARA2180340-
19 MARA2180341; MARA2180342- MARA2180343; MAPL000724235-
20 MAPL000724836; MAPL001370197-MAPL001370236; MAPL001570602 -
21 MAPL001570606; MAPL002077000 - MAPL002079216; MAPL003292331-
22 MAPL003292498; MAPL003667028-MAPL003667128; MAPL003958939-
23 MAPL003959010; MAPL005462834- MAPL005462902; and MAPL006427492-
24 MAPL006427602.

25 Further, the United States refers to MARA1298042, MARA2092181,
26 MARA2157036, MARA2160501, and MARA2117116, incorporates as if fully set
27 forth herein and identifies all Diagnosis Codes contained therein that affected the
28 amount of payment received by UnitedHealth from the Medicare Program.

1 At this time and based upon the incomplete information and subject to the right to
2 supplement and/or amend this answer in full or in part, the United States additionally
3 identifies and incorporates into its answer the attached chart of representative
4 examples of Diagnosis Codes that UnitedHealth “knowingly and improperly failed to
5 delete in the RAPS system” or “knowingly and improperly failed to otherwise return
6 to the Medicare Program the overpayments based on” such diagnoses. The provider
7 information in the attached chart has been reproduced as it appears in the data that
8 UnitedHealth produced in this case, including missing fields, dummy values, and
9 placeholders, and we have preserved the convention of using "~" to indicate a
10 database null. Further, although the Interrogatory asked for the Provider ID, there is
11 no field designated Provider_ID and we have responded with the Provider_Nbr. For
12 COSMOS Providers, we have included two sets of provider information: the provider
13 information that results from a direct lookup in the Provider table (2A), and the
14 provider information that results from a lookup in the SAS_All_Providers table you
15 provided to us, linking the LOB_Cd associated with the encounter's LOB_Key to the
16 Site_Cd field. For non-COSMOS Providers, the second set of columns has been left
17 blank.

18 The United States will supplement its response to this Interrogatory as
19 appropriate and subject to the expert discovery schedule set forth in this case.

VERIFICATION

I, Amanda Johnson, declare that I am the Director of the Division of Encounter Data and Risk Adjustment Operations, and I am authorized to make this Verification on behalf of the United States. I have read the UNITED STATES' RESPONSES AND OBJECTIONS TO DEFENDANT UHC OF CALIFORNIA'S FIRST SET OF INTERROGATORIES TO THE GOVERNMENT dated February 3, 2020, and I personally know or have been informed of the contents thereof. The facts stated in the aforementioned responses are not all within my personal knowledge, but have been assembled by authorized employees and/or consultants of the United States, and I am informed by said employees and/or consultants that the facts stated therein are true at this time.

I declare under penalty of perjury under the laws of the United States that the foregoing is true and correct.

Executed on May _12, 2020 at 7:05 am_.

UNITED STATES' FIRST
SUPPLEMENTAL RESPONSES AND
OBJECTIONS TO DEFENDANT UHC
OF CALIFORNIA'S FIRST SET OF
INTERROGATORIES TO THE
GOVERNMENT

PROPOUNDING PARTY: UHC OF CALIFORNIA, INC.

RESPONDING PARTY: UNITED STATES OF AMERICA

SET NUMBER: ONE

Preliminary Statement

Pursuant to Rules 26 and 33 of the Federal Rules of Civil Procedure (“Federal Rules”) and Rule 33 of the Local Civil Rules of the United States District Court for the Central District of California, the United States of America (“United States” or “government”), through its undersigned counsel, hereby provides its first supplemental responses and objections to Defendant UHC of California’s (“UnitedHealth” or “Defendant”) First Set of Interrogatories, dated January 3, 2020. The objections and responses set forth herein are based on information now known to the United States and its undersigned attorneys, and will be revised, corrected, supplemented, amended, and clarified to the extent required by Rule 26 as discovery proceeds.

General Objections and Specific Objections to Definitions and Instructions

The United States incorporates by reference its General Objections and Specific Objections to Definitions and Instructions that are set forth in the United States’ Responses and Objections to Defendant UHC of California’s First Set of Interrogatories, dated February 3, 2020.

Specific Objections and Responses

INTERROGATORY NO. 1: Identify for Date of Service Years 2008–2016 the Beneficiary (by name, HIC Number, and date of birth), Date of Service, Diagnosis Code(s), CMS HCC(s) or RxHCC(s), and Provider (by individual name, group name, address, NPI, Tax ID(s), and Provider ID), that corresponds to each and every Diagnosis Code You allege UnitedHealth “knowingly and improperly failed to delete . . . or otherwise return to the Medicare Program [as an] overpayment.” United States’ Complaint ¶ 342, Dkt. 171.

1 **Response to Interrogatory No. 1:** The United States incorporates by reference each
2 of its General Objections and Specific Objections to the Definitions and Instructions
3 as if stated herein, and further incorporates by reference its specific objections to this
4 Interrogatory as set forth in United States' Responses and Objections to Defendant
5 UHC of California's First Set of Interrogatories, dated February 3, 2020.

6 Subject to and without waiving these objections, the United States also
7 incorporates its response to this Interrogatory as set forth in United States' Responses
8 and Objections to Defendant UHC of California's First Set of Interrogatories, dated
9 February 3, 2020, and further responds as follows. Although fact discovery is
10 ongoing, expert disclosures are not due until June 18, 2021, and the United States
11 reserves the right to supplement and/or amend this answer in full or in part as it learns
12 new information and as expert analysis progresses, the United States alleges that
13 UnitedHealth Defendants "knowingly and improperly failed to delete . . . the invalid
14 diagnoses that had been submitted to the Medicare Program for risk adjustment
15 payments which were made by the Medicare Program to them or knowingly and
16 improperly failed to otherwise return to the Medicare Program the overpayments
17 based on the invalid diagnoses" for each and every Diagnosis Code that was known
18 (as that term is defined by the False Claims Act) to be unsupported by medical
19 records and that affected the amount of payment received by UnitedHealth from the
20 Medicare Program.

21 At this time and subject to the United States' right to supplement and/or amend
22 this answer in full or in part, the United States additionally identifies and incorporates
23 into its answer the attached charts of Diagnosis Codes that UnitedHealth "knowingly
24 and improperly failed to delete" or "knowingly and improperly failed to otherwise
25 return to the Medicare Program the overpayments based on" such diagnoses for date
26 of service years (DOS) 2010-2013. The provider information in the attached charts
27 has been reproduced as it appears in the data that UnitedHealth produced in this case,
28 including missing fields, dummy values, and placeholders, and has preserved the

1 convention of using "~" to indicate a database null. Further, although the
2 Interrogatory asked for the Provider ID, there is no field designated Provider_ID and
3 the United States has responded with the Provider_Nbr. For COSMOS Providers, the
4 United States have included two sets of provider information: the provider
5 information that results from a direct lookup in the Provider table (2A), and the
6 provider information that results from a lookup in the SAS_All_Providers table
7 UnitedHealth provided to the United States, linking the LOB_Cd associated with the
8 encounter's LOB_Key to the Site_Cd field. For non-COSMOS Providers, the second
9 set of columns has been left blank.

10 The United States will supplement its response to this Interrogatory as
11 appropriate.

No. CV 16-08697 FMO

UNITED STATES' RESPONSES AND
OBJECTIONS TO DEFENDANT UHC
OF CALIFORNIA'S SECOND SET OF
INTERROGATORIES TO THE
GOVERNMENT

PROPOUNDING PARTY: UHC OF CALIFORNIA, INC.

RESPONDING PARTY: UNITED STATES OF AMERICA

SET NUMBER: THREE

Preliminary Statement

Pursuant to Rules 26 and 33 of the Federal Rules of Civil Procedure (“Federal Rules”) and Rule 33 of the Local Civil Rules of the United States District Court for the Central District of California, the United States of America (“United States” or “government”), through its undersigned counsel, hereby provides its responses and objections to Defendant UHC of California’s (“Defendant”) Third Set of Interrogatories, dated May 24, 2022. The objections and responses set forth herein are based on information now known to the United States and its undersigned attorneys, and will be revised, corrected, supplemented, amended, and clarified to the extent required by Rule 26 as discovery proceeds.

General Objections and Specific Objections to Definitions and Instructions

The following objections apply to each and every separately numbered Interrogatory and are incorporated by reference to the extent applicable into the objection to each Interrogatory.

1. UnitedHealth’s Interrogatories are inconsistent with the spirit and letter of the Federal Rules of Civil Procedure (“Federal Rules”), which explain that an interrogatory ought to narrow and sharpen issues for trial. *See* Fed. R. Civ. P. 33 Advisory Committee’s Note. UnitedHealth’s extensive Interrogatories do just the opposite by asking the United States to respond to vague and illogical mischaracterizations of its arguments, and seeking vast amounts of information without the objective to narrow and sharpen issues for trial. For example, the Interrogatories demand that the United States survey all “CMS and HHS-OIG Individuals” (as defined by UnitedHealth’s Third Set of Interrogatories, Definitions 8 and 22) to determine if anyone ever held a particular belief between 2008–2017.

1 2. The United States objects to the Third Set of Interrogatories to the extent
2 they are vague, ambiguous, overbroad, unduly burdensome, or seek to impose
3 requirements upon the United States beyond those called for or permitted by the
4 Federal Rules, the Local Civil Rules of the United States District Court for the
5 Central District of California (“Local Rules”), or any order of the Court. The United
6 States responds below pursuant to its obligations under the Federal Rules and the
7 Local Rules, namely that the United States has taken and is continuing to undertake
8 reasonable efforts to identify information responsive to the Interrogatories.

9 3. The United States objects to the Third Set of Interrogatories to the extent
10 that a response requires disclosure of information protected by an applicable privilege
11 or protection, including, but not limited to, the attorney-client privilege, work product
12 doctrine, deliberative process privilege, law enforcement privilege, common interest
13 privilege, or investigative files privilege, and protections afforded by Fed. R. Civ. P.
14 26(b), or any other applicable privilege. The United States will not respond in such a
15 way as to disclose such protected information, and inadvertent identification or
16 disclosure of privileged information by the United States shall not be a waiver of any
17 applicable privilege. Under Federal Rule of Evidence 502, Federal Rule of Civil
18 Procedure 26(b)(5)(B), other related sources of law, and the Court’s Revised
19 Protective Order Governing Non-Waiver of Privilege and Protected Material, Dkt.
20 412, the government reserves any and all rights to claw back privileged information it
21 inadvertently discloses in response to the Third Set of Interrogatories.

22 4. The United States submits these responses subject to, without intending
23 to waive, but expressly reserving the right to object to other discovery procedures
24 involving or relating to the subject matter of the information in responses to the Third
25 Set of Interrogatories. The United States reserves the right to object on any ground,
26 at any time, to such other or supplemental requests as the Defendants may propound
27 involving or relating to the subject matter of the Third Set of Interrogatories.
28

1 5. The United States reserves the right to supplement its responses to the
2 Third Set of Interrogatories at any time to the extent provided by the Federal Rules.

3 6. The assertion of the same, similar, or additional specific objections to the
4 Third Set of Interrogatories does not and should not be construed to waive or modify
5 any of the United States' general objections.

6 7. The United States objects to the Third Set of Interrogatories to the extent
7 they require the United States to draw legal conclusions, comment on the merits of
8 any affirmative defenses, or otherwise seek to impose any requirements beyond those
9 established by the Federal Rules or the Local Rules.

10 8. The United States objects to the Third Set of Interrogatories to the extent
11 that they contain multiple subparts numbered as a single Interrogatory. By
12 responding, the United States in no way waives its right to object that UnitedHealth
13 has exceeded the maximum number of interrogatories permitted under the Federal
14 Rules.

15 9. The United States objects to the Third Set of Interrogatories to the extent
16 they purport to require the United States to gather information in the possession or
17 custody of Government components beyond HHS-OIG and CMS on the grounds that
18 they are unduly burdensome and overbroad and that they seek information not
19 relevant to the claims or defenses in this action and disproportionate to the needs of
20 this case.

21 10. The United States objects to the Third Set of Interrogatories to the extent
22 they purport to require the United States to gather information in the possession or
23 custody of HHS-OIG where HHS-OIG is not the relevant agency for payment
24 purposes and therefore the Interrogatories are unduly burdensome, overbroad, and
25 seek information not relevant to the claims or defenses in this action and
26 disproportionate to the needs of this case.

27 11. To the extent the United States produces information or documents in
28 further response to these Interrogatories, it does not admit that the information or

documents are true, accurate, authentic, relevant, or admissible in this action. The United States reserves the right to challenge on evidentiary grounds any information or documents produced in response to these Interrogatories.

12. The fact that the United States has answered any part of all or any particular interrogatory is not intended to and shall not be construed to be a waiver by the United States of all or part of any objection to any interrogatory.

Specific Objections to the Definitions and Instructions

The United States objects to the Definitions and Instructions to the extent they (i) seek to impose burdens on the United States that are different from, are inconsistent with, or exceed those imposed by the Federal Rules and the Local Rules, (ii) are vague or ambiguous, and/or (iii) render the Third Set of Interrogatories overly broad, unduly burdensome, not proportionate to the needs of the case, and not relevant. The United States further objects to the Third Set of Interrogatories to the extent UnitedHealth has failed to define vague, ambiguous, and confusing terms.

Objections to Definition 1: The United States objects to the definition of “Believed” (Definition 1) in that “suppose” means something different than “hold something as an opinion” or “think,” and this definition encompassing two different meanings therefore renders UnitedHealth’s Third Set of Interrogatories confusing and self-contradictory. The United States will interpret “Believed” as to hold something as an opinion or to think.

Objections to Definition 5: The United States objects to the definition of “Chart Review” (Definition 5) as inconsistent with UnitedHealth’s chart review processes at issue in this litigation. The United States interprets “Chart Review” to mean UnitedHealth’s actual chart review process, in which certified coders were instructed to identify every risk-adjusting diagnosis code that had sufficient documentation support in a Chart.

Objections to Definitions 6, 20, and 21: The United States objects to the terms “CMS” (Definition 6), “Government” (Definition 20), and “HHS-OIG” (Definition

21) as overbroad and irrelevant to the extent they include current and former contractors or consultants. CMS and HHS-OIG speak through official pronouncements and do not speak through its contractors or consultants, making information provided by contractors and consultants overbroad and irrelevant for the purpose of responding to the Third Set of Interrogatories. The United States objects to the definition of “Government” (Definition 20) to the extent it includes any branch, agency, department, agent, representative, contractor, attorney, consultant, or person acting on its behalf not relevant to this action. This definition is plainly unreasonable, unduly burdensome, and disproportionate to the needs of the case, in that it seeks to require the United States to provide information not currently in the possession, custody, or control of CMS or HHS-OIG. Subject to and without waiving these objections, the United States interprets “Government” to mean CMS and HHS-OIG. To the extent the United States interprets the use of “Government” in a specific Interrogatory as directed only HHS-OIG or CMS (and not both), the United States will state its interpretation in its response. The United States further objects to the inclusion of “attorneys” in the definitions to the extent that the inclusion of “attorneys” requires the United States to gather information from attorneys within CMS’s Office of the General Counsel (“OGC”), the Office of Counsel for the Inspector General (“OCIG”), or the Department of Justice (“DOJ”). The United States is not searching for, collecting, or providing information or materials from any attorney within OGC, OCIG, or DOJ.

Objections to Definitions 7: The United States objects to the definition of “CMS-HCC Risk Adjustment Model” (Definition 7) as overly broad to the extent it includes iterations of the CMS-HCC Risk Adjustment Model (V12, V21, or V22) that were not used to calculate risk scores that were used determine payments to UnitedHealth. The United States interprets this definition to include only iterations of the CMS-HCC Risk Adjustment Model that were used to calculate risk scores that were used determine payments to UnitedHealth. The United States further objects to this

1 definition as overly broad to the extent it includes a timeframe that it is more
2 expansive that the timeframe for the damages sought in this matter. The United
3 States will interpret this definition to apply to iterations of the CMS-HCC Risk
4 Adjustment Model in use for 2008-2016 Date of Service Years/2009-2017 Contract
5 Years.

6 **Objections to Definitions 8 and 22:** The United States objects to the terms “CMS
7 Individual” (Definition 8) and “HHS-OIG Individual” (Definition 22) as irrelevant,
8 unduly burdensome, and beyond the scope of permissible discovery to the extent they
9 include all current or former contractors or current or former subcontractors, and
10 therefore demand that the United States obtain information from, or respond on
11 behalf of, persons or entities not reasonably accessible to the United States and over
12 whom the United States has no control. The United States further objects to the terms
13 “CMS Individual” and “HHS-OIG Individual” as overly broad and unduly
14 burdensome to the extent they include all current employees of each agency, which
15 includes thousands of people who are unlikely to have information relevant to these
16 interrogatories. The United States objects to the terms “CMS Individual” and “HHS-
17 OIG Individual” as overly broad and unduly burdensome to the extent they include
18 all former employees of each agency, and therefore purport to require the United
19 States to obtain information from, or to respond on behalf of, persons or entities not
20 reasonably accessible to the United States and over whom the United States has no
21 control. It is plainly unreasonable for the United States to survey each and every
22 current and former employee of CMS and/or HHS-OIG. The United States further
23 objects to the inclusion of “Person” in the definitions to the extent the inclusion of
24 “Person” includes attorneys and requires the United States to gather information from
25 attorneys within OGC, OCIG, or DOJ. The United States is not searching for,
26 collecting, or providing information or materials from any attorney within OGC,
27 OCIG, or DOJ.

28 **Objections to Definition 9:** The United States objects to the definition of “CMS

Contractor” as irrelevant, unduly burdensome, and beyond the scope of permissible discovery to the extent it includes all former contractors or former subcontractors, and therefore demands that the United States obtain information from, or respond on behalf of, persons or entities not reasonably accessible to the United States and over whom the United States has no control. The United States will not include former contractors or subcontractors in the definition of “CMS Contractor.”

Objections to Definitions 11 and 36: The United States objects to the definitions of “Concerning” (Definition 11) and “Relating to” and “regarding” (Definition 36) because the definitions render the Third Set of Interrogatories vague, ambiguous, confusing, overly broad, unduly burdensome, and disproportionate to the needs of the case. Indeed, these terms are defined to seek any piece of information that in some way—no matter how remote, indirect, or tangential—mentions or references matters set forth in the Interrogatory. The United States responds to the Third Set of Interrogatories by using these terms and the verbs constituting their definitions as limited by the constraining adverb “directly.”

Objections to Definition 12: The United States objects to the term “Corrected” (Definition 12) as vague because it is unclear where the referenced “remov[als]” and “changes” of Diagnosis Codes are made. The United States will interpret this to mean removals or change within the CMS databases from which data used to calibrate the CMS-HCC Risk Adjustment Model are pulled.

Objections to Definition 32: The United States objects to the definition of “Person” (Definition 32) to the extent it is defined to mean “the federal government and all departments and agencies thereof, state governments, local governments, [and] other governmental agencies[.]” This definition is plainly unreasonable, unduly burdensome, and disproportionate to the needs of the case, in that it seeks to require the United States to provide information not currently in the possession, custody, or control of CMS and HHS-OIG. Furthermore, the United States objects to the extent each definition includes former CMS contractors for whom the United States

1 presently has no reasonable belief they possess or control non-duplicative information
2 relevant to any claim or defense in this case.

3 **Objections to Definition 33:** The United States objects to the definition of
4 “Poehling Matter” as overly broad to the extent it includes *United States ex rel.*
5 *Swoben v. Secure Horizons*, CV-609-5013-JFW (JEM) (“Swoben”), which is a
6 separate litigation in which the Court declined to consolidate with this litigation, see
7 Statement of Decision Denying the United State of America’s Motion to Consolidate,
8 *United States ex rel. Swoben v. Secure Horizons*, CV-609-5013-JFW (JEM), Dkt.
9 295. The United State will not include the *Swoben* matter in this definition.

10 **Objections to Definition 42:** The United States objects to the definition of “You”
11 and “Your” to the extent these terms are intend to encompass any agency, office,
12 employee, agent, representative, officer, or contractor of either the legislative or
13 judicial branch, and insofar as these terms are defined to include executive branch
14 agencies and offices not relevant to this action. This is plainly unreasonable. Subject
15 to and without waiving these objections, the United States will interpret this term to
16 mean CMS and HHS-OIG. To the extent the United States interprets a specific
17 request as directed at only HHS-OIG or CMS (and not both), the United States will
18 state its interpretation in its response.

19 **Objections to Instructions**

20 **Objections to Instruction 3:** The United States objects to Instruction 3 as vague
21 and ambiguous. For the purposes of responding to these Interrogatories, the United
22 States will construe the relevant time period as January 1, 2004 through May 16,
23 2017, in accordance with the parties’ agreed-upon discovery timeframe. However,
24 with respect to Interrogatory 10, the United States will construe the relevant time
25 period as January 1, 2004 to June 30, 2019, in accordance with the parties’ agreed-
26 upon discovery timeframe pertaining to discovery relating to CMS’s proposed rule
27 *Medicare and Medicaid Programs; Policy and Technical Changes to the Medicare*
28 *Advantage, Medicare Prescription Drug Benefit, Program of All-Inclusive Care for*

1 *the Elderly (PACE), Medicaid Fee-for-Service, and Medicaid Managed Care*
2 *Programs for Years 2020 and 2021* (“Proposed Rule”) and underlying FFS Adjuster
3 Study. See August 9, 2019 D. Schindler email to R. McAuliffe.

4 **Objections to Instruction 5:** The United States objects to Instruction 5 to the extent
5 it seeks to impose burdens upon the United States beyond those called for or
6 permitted by the Federal Rules or the Local Rules.

7 **Objections to Instruction 6:** The United States objects to Instruction 6 to the extent
8 it seeks to impose burdens upon the United States beyond those called for or
9 permitted by the Federal Rules or the Local Rules.

10 **Objections to Instruction 7:** The United States objects to Instruction 7 to the extent
11 it seeks to impose burdens upon the United States beyond those called for or
12 permitted by the Federal Rules or the Local Rules. The United States will assert any
13 applicable privileges and specify the material to which it applies per Fed. R. Civ. P.
14 26(b)(5)(A) for all information responsive to an Interrogatory to which the United
15 States has agreed to produce but which is withheld on the basis of a privilege or
16 protection.

17 **Objections to Instruction 8:** The United States objects to Instruction 8 to the extent
18 it requires the United States to identify “each” instance of duplicative, redundant, or
19 repetitive information.

20 **Specific Objections and Responses**

21 **INTERROGATORY NO. 10** Explain in detail the bases upon which You contend
22 that the Study Underlying CMS’s Proposed Rule is relevant to any claim, defense,
23 contention, or issue in this litigation.

24 **Objections:**

25 The United States incorporates by reference each of its General Objections and
26 Specific Objections to the Definitions and Instructions as if stated herein. The United
27 States objects to the phrase “explain in detail” as vague and ambiguous, and will
28 interpret the phrase to mean “explain.” The United States objects to the phrase “any

1 claim, defense, contention, or issue in this litigation” as vague and ambiguous, and
2 objects to the phrase insofar as it purports to include “contentions” or “issues” that
3 are not part of any claim or defense. The United States will interpret this phrase to be
4 “any claim or defense in this litigation.” The United States objects to this
5 Interrogatory insofar as it purports to require the United States to explain the
6 relevance of facts to UnitedHealth’s claims or defenses. The United States further
7 objects to this Interrogatory in that it requests that the United States explain how the
8 Study Underlying CMS’s Proposed Rule is relevant to UnitedHealth’s defenses or
9 contentions. Because UnitedHealth has not given the United States sufficient
10 information to understand what its defenses and contentions are, the United States is
11 unable to explain how the Study Underlying CMS’s Proposed Rule is relevant to
12 them, and reserves the right to rely on the Study Underlying CMS’s Proposed Rule in
13 any way as it learns additional information about UnitedHealth’s defenses and
14 contentions in this case. The United States objects to this Interrogatory to the extent
15 it misstates the United States’ contentions in this matter.

16 **Response to Interrogatory No. 10:** Subject to and without waiving the foregoing
17 objections, the United States hereby states that it does not contend that the Study
18 Underlying CMS’s Proposed Rule is relevant to the claims in this matter. It is the
19 United States’ position that the FFS Adjuster is not relevant to its claims in this case,
20 and therefore no FFS Adjuster study (including the Study Underlying CMS’s
21 Proposed Rule or any study that UnitedHealth might conduct) is relevant to the
22 United States’ claims in this case. However, if UnitedHealth contends that error rates
23 in FFS data are relevant to its defenses, the United States reserves the right to cite the
24 Study Underlying CMS’s Proposed Rule.

25 **INTERROGATORY NO. 11:** Identify all CMS Individuals and HHS-OIG
26 Individuals who You contend Believed or expressed in writing that the existence of
27 unsupported Diagnoses in CMS’s FFS Medicare data reduces the average value of the
28 Relative Factors. This Interrogatory should be construed to cover the time period

1 January 1, 2004 to June 30, 2019.

2 **Objections:**

3 The United States incorporates by reference each of its General Objections and
4 Specific Objections to the Definitions and Instructions as if stated herein. The United
5 States objects to this Interrogatory to the extent it requests information beyond May
6 16, 2017. The parties' agreed-upon discovery timeframe only extends to June 30,
7 2019 for discovery relating to CMS's Proposed Rule and underlying FFS Adjuster
8 Study. See August 9, 2019 D. Schindler email to R. McAuliffe. Further, the United
9 States objects to this Interrogatory to the extent that it is irrelevant because
10 Government agencies, including CMS and HHS-OIG, act through official policy and
11 regulations and not the beliefs or impressions of individual employees or contractors.
12 The United States objects to this Interrogatory to the extent it misstates the United
13 States' contentions in this matter. The United States does not contend that CMS
14 Individuals and HHS-OIG Individuals Believed or expressed in writing that the
15 existence of unsupported Diagnoses in CMS's FFS Medicare data reduces the
16 average value of the Relative Factors. The United States objects to this Interrogatory
17 as vague as to the meaning of "reduces the average value of the Relative Factors." It
18 is unclear if the Request is asking whether the average value of *every* Relative Factor
19 is reduced or if, on average, the value of the group of Relative Factors is reduced (*i.e.*,
20 some could go up and some could down in value but, on average, the value of the
21 group of Relative Factors is reduced). The United States interprets this Request as
22 seeking information regarding whether the average value of every Relative Factor is
23 reduced.

24 **Response to Interrogatory No. 11:** Subject to and without waiving the foregoing
25 objections, the United States hereby states that it does not contend that any CMS and
26 HHS-OIG Individual Believed or expressed in writing that the existence of
27 unsupported Diagnoses in CMS's FFS Medicare data reduces the average value of the
28 Relative Factors. Rather, it is the United States' position that UnitedHealth

1 contracted with CMS on an annual basis to receive payments under the CMS- HCC
2 Risk Adjustment Model in place at the time of the contract and did, in fact, receive
3 payments under those contracts from CMS that were calculated under the existing
4 CMS-HCC Risk Adjustment Model, making the existence of unsupported Diagnoses
5 in CMS's FFS Medicare data and any potential impact that they may have on
6 Relative Factors wholly irrelevant to this matter.

7 **INTERROGATORY NO. 12:** State in detail every material fact upon which You
8 base Your contention that MA Organizations "were obligated to 'look both ways'" or
9 to otherwise design their Chart Review program to also validate Diagnoses reported
10 by Providers that the MA Organizations submitted to CMS. United States' Am.
11 Compl. ¶ 122, Dkt. 171.

12 **Objections:**

13 The United States incorporates by reference each of its General Objections and
14 Specific Objections to the Definitions and Instructions as if stated herein. The United
15 States further objects to this Interrogatory to the extent that it seeks information
16 protected from disclosure by an applicable privilege or protection. The United States
17 objects to this Interrogatory as overly broad and unduly burdensome to the extent it
18 improperly requires the United States to "state in detail every material fact" of its
19 evidentiary case. *See Tubbs v. Sacramento Cty. Jail*, No. CIVS060280LKKGGHP,
20 2008 WL 863974, at *1 (E.D. Cal. Mar. 28, 2008) ("Each and every fact'
21 interrogatories pose problems for a responding party and a reviewing court. Parties
22 are not tasked with laying out every jot and tittle of their evidentiary case in response
23 to interrogatories."); *Lucero v. Valdez*, 240 F.R.D. 591, 594 (D.N.M. 2007)
24 ("Contention interrogatories should not require a party to provide the equivalent of a
25 narrative account of its case, including every evidentiary fact, details of testimony of
26 supporting witnesses, and the contents of supporting documents."); *Aldapa v. Fowler*
27 *Packing Co. Inc.*, 310 F.R.D. 583, 591 (E.D. Cal. 2015). The United States objects
28 that this Interrogatory is vague, confusing, and ambiguous because it distorts the

1 meaning of the United States' contention and theory of UnitedHealth's liability under
2 the False Claims Act by citing an incomplete fragment of a sentence from one
3 paragraph of the United States' Amended Complaint. This Interrogatory is vague,
4 ambiguous, confusing, and irrelevant to the extent it focuses on the design of an
5 MAO's chart review program rather than on UnitedHealth's Chart Review program
6 and UnitedHealth's failure to delete known invalid diagnosis codes. *See* MTD Order,
7 Dkt. 212 at 21 ("As the Government argues, the issue here is not the one-way Chart
8 Review generally, but the specific invalid diagnosis codes that Defendants submitted
9 and failed to delete despite information available to them."). This Interrogatory
10 misstates the United States' contention.

11 **Response to Interrogatory No. 12:** Subject to and without waiving the foregoing
12 objections, the United States does not contend in Paragraph 122 of its Complaint that
13 MA Organizations, as defined in this set of Interrogatories, were generally obligated
14 to "look both ways" or to otherwise design their Chart Review program to also
15 validate Diagnoses reported by Providers that the MA Organizations submitted to
16 CMS. Rather, as is clear in Paragraph 122, when read in its entirety, the United
17 States contends that UnitedHealth *did* design, and implemented, its Chart Review
18 program to identify all codes supported by Charts, but chose to submit to CMS new
19 diagnosis codes identified by its Chart Review program that would lead to additional
20 payments from CMS while failing to delete or otherwise retract diagnosis codes
21 previously submitted by UnitedHealth to CMS that its Chart Review program
22 revealed were not supported by medical record documentation. In addition to the
23 United States' factual allegations made in its Amended Complaint, the United States
24 further sets forth the following material facts that relate to its contention but do not
25 recite every "jot and tittle" of the United States' evidentiary case:

- 26 • Before submitting Diagnoses to CMS for payment, UnitedHealth signed
27 Electronic Data Interchange agreements on behalf of each of its MA
28 Organizations, agreeing that "it will be responsible for all Medicare risk

- 1 adjustment data submitted to CMS by itself, its employees, or its agents[;]”
- 2 “Based on best knowledge, information, and belief, that it will submit risk
- 3 adjustment data that are accurate, complete, and truthful[;]” and “That it will
- 4 research and correct risk adjustment data discrepancies.”
- 5 • Since at least 2008, UnitedHealth has entered into annual contracts with CMS
 - 6 where it agreed to “operate one or more coordinated care plans . . . in
 - 7 compliance with the requirements of this contract and applicable Federal
 - 8 statutes, regulations, and policies (e.g., policies as described in the Call Letter,
 - 9 Medicare Managed Care Manual, etc.).”
 - 10 • After entering into these contracts, UnitedHealth submitted Diagnoses to CMS.
 - 11 • Some of these Diagnoses originated from Providers, who submitted Diagnoses
 - 12 to UnitedHealth as part of a claim or beneficiary encounter (“Provider Claim or
 - 13 Encounter”). Those Diagnoses were later submitted by UnitedHealth to CMS
 - 14 for risk adjustment purposes.
 - 15 • Some of the Diagnoses UnitedHealth submitted to CMS originated from its
 - 16 Chart Review program. In its Chart Review program, UnitedHealth reviewed
 - 17 medical records and abstracted or identified Diagnosis Codes for the purpose
 - 18 of submitting additional Diagnosis Codes to CMS for risk adjustment
 - 19 payments. In its Chart Review Program, UnitedHealth instructed its Chart
 - 20 Review coders to look for all medical conditions purportedly documented in
 - 21 the records, record all Diagnosis Codes identifying those conditions, and report
 - 22 all of those Diagnosis Codes to UnitedHealth.
 - 23 • UnitedHealth coders were trained, qualified, and/or certified to accurately
 - 24 identify Diagnosis Codes supported by the medical record, in accordance with
 - 25 the Ninth or the Tenth Edition of the International Classification of Diseases
 - 26 (ICD) Clinical Modification Guidelines for Coding and Reporting (“ICD
 - 27 Guidelines”). UnitedHealth relied on its coders’ accuracy to submit to CMS
 - 28 Diagnosis Codes that were supported by the medical record but were not

1 previously submitted to UnitedHealth based on a Provider Claim or Encounter
2 and thus not previously submitted by UnitedHealth to CMS. UnitedHealth's
3 coders were required to meet quality and accuracy benchmarks—defined as
4 completeness in identifying all risk adjusting Diagnosis Codes that were
5 supported by the medical record in accordance with ICD Guidelines—when
6 reviewing and coding a medical record.

- 7 • UnitedHealth conducted additional medical record reviews, including through
8 quality assurance programs, recode projects, and claims verification of many of
9 the medical records that were included in its Chart Review Program.
- 10 • Many of the Diagnoses submitted by Providers to UnitedHealth (and,
11 ultimately, by UnitedHealth to CMS) were not identified in UnitedHealth's
12 Chart Review Program or other medical record reviews, even though the Chart
13 associated with the Diagnoses was reviewed in UnitedHealth's Chart Review
14 Program and also, in some instances, in the other medical record reviews
15 Programs. UnitedHealth did not delete or otherwise retract these unsupported
16 codes.
- 17 • Since at least 2004, employees of UnitedHealth attended trainings conducted
18 by CMS and/or CMS contractors, participated in CMS user group calls, and
19 engaged in email, in person, or telephonic communications with CMS
20 employees or contractors and were consistently told that Diagnoses must be
21 supported by Charts and if a Diagnoses that impacts a beneficiary risk score is
22 not supported by a Chart, the Diagnoses must be deleted or otherwise retracted
23 from CMS data systems.
- 24 • Since at least 2004, employees of UnitedHealth have also reviewed and relied
25 on written CMS guidance, including Chapter 7 of the Medicare Managed Care
26 Manual, CMS training materials, HPMS memoranda, and CMS Participant
27 Guides, which say that Diagnoses must be supported by Charts and Diagnoses
28 that are not supported by Charts must be deleted or otherwise retracted from

1 the CMS data systems.

- 2 • Each year since at least 2010, employees of UnitedHealth signed annual
3 attestations relating to Diagnoses submitted to CMS for, at least, 2008 Dates of
4 Service through 2016 Dates of Service. Through these attestations,
5 UnitedHealth requested “payment under the contract.” Specifically,
6 UnitedHealth “acknowledge[d] that the information described below directly
7 affects the calculation of CMS payments to the MA Organization or additional
8 benefit obligations of the MA Organization and that misrepresentation to CMS
9 about the accuracy of such information may result in Federal civil action and/or
10 criminal prosecution” and further certifying “[b]ased on best knowledge,
11 information, and belief . . . , all information submitted to CMS in this report is
12 accurate, complete, and truthful.”
- 13 • UnitedHealth, in fact, received payments from CMS pursuant to its contract
14 with CMS based on the Diagnoses it submitted to CMS.
- 15 • UnitedHealth had knowledge, as defined by 31 U.S.C. § 3729(b)(1)(A), that
16 Diagnoses it received from Providers and submitted to CMS were not
17 supported by Chart documentation, as determined by its Chart Review Program
18 and, in some instances, other medical record reviews, but it failed to delete
19 those Diagnoses and thereby retained payments from CMS to which it was not
20 entitled.

21 **INTERROGATORY NO. 13** Separately for each of the years 2008 to 2017,
22 Identify all CMS Individuals and HHS-OIG Individuals who You contend Believed
23 or expressed in writing that MA Organizations were required to design their Chart
24 Review program to also validate Diagnoses reported by Providers that the MA
25 Organizations submitted to CMS.

26 **Objections:**

27 The United States incorporates by reference each of its General Objections and
28 Specific Objections to the Definitions and Instructions as if stated herein. The United

1 States further objects on the ground that the Interrogatory is vague, confusing, and
2 unduly burdensome because it seeks a separate answer for each year for what an
3 individual “Believed” at the time and to the extent the Interrogatory requires the
4 United States to determine, year by year from 2008–2017, when a given Belief began
5 or ended. Further, the United States objects to this Interrogatory to the extent that it
6 is irrelevant because Government agencies, including CMS and HHS-OIG, act
7 through official policy and regulations and not the beliefs or impressions of
8 individual employees or contractors. The United States objects to this Interrogatory
9 to the extent it misstates the United States’ contentions in this matter. The
10 Interrogatory states that the United States contends that MA Organizations were
11 required to *design* their Chart Review program to also validate Diagnoses reported by
12 Providers that the MA Organizations submitted to CMS. The United States makes no
13 such contention. The United States does not contend that UnitedHealth had to design
14 its Chart Review program in any particular way—rather, the United States contends
15 that UnitedHealth *did* design its Chart Review program to identify all supported
16 codes, but chose to submit new diagnosis codes identified by its Chart Review
17 program that would lead to additional payments from CMS while failing to delete
18 diagnosis codes submitted by Providers that its Chart Review program revealed were
19 not supported by medical record documentation. Thus, the beliefs or written
20 statements by CMS employees about *whether* MA Organizations have to design their
21 Chart Review programs to also validate Diagnoses reported by Providers that the MA
22 Organizations submitted to CMS are irrelevant and any exercise to ascertain those
23 beliefs or otherwise identify applicable writings would be meaningless and will not
24 narrow and sharpen issues for trial. *See* Fed. R. Civ. P. 33 Advisory Committee’s
25 Note.

26 **Response to Interrogatory No. 13:** Subject to and without waiving the foregoing
27 objections, the United States does not contend that any CMS and HHS-OIG
28 Individual Believed or expressed in writing that MA Organizations were required to

1 design their Chart Review program in any particular way. However, the United
2 States does contend that the obligations of MA Organizations include, among other
3 things, that if an MA Organization identifies Diagnoses reported by Providers that the
4 MA Organization submitted to CMS that are not supported by medical record
5 documentation, the MA Organization must delete or otherwise retract those
6 unsupported diagnosis codes from CMS data systems.

7 **INTERROGATORY NO. 15** Describe in detail how You implemented each of
8 Your policies, processes, and procedures Relating to Your retention, preservation, or
9 destruction of Documents and Electronically Stored Information.

10 **Objections:**

11 The United States incorporates by reference each of its General Objections and
12 Specific Objections to the Definitions and Instructions as if stated herein. The United
13 States objects to this Interrogatory as vague because it is unclear what information is
14 sought. The United States interprets this Interrogatory to request information about
15 the general policies set up to establish the principles, responsibilities, and
16 requirements for managing CMS and HHS-OIG records. Further, the United States
17 does not interpret this Interrogatory to request information about the litigation hold in
18 place in the Poehling Matter because, if UnitedHealth were requesting information
19 about the litigation hold in the Poehling Matter, it would have done so, as it did in
20 Interrogatory 14. The United States further objects to this Interrogatory to the extent
21 that it seeks information protected from disclosure by an applicable privilege or
22 protection. The United States interprets this Interrogatory to exclude attorneys and is
23 not searching for, collecting, or providing information or materials from any attorney
24 within OGC, OCIG, or DOJ. The United States further objects to this Interrogatory
25 to the extent that the information sought is publicly available, and the burden of
26 deriving the answer to this Interrogatory is substantially the same for both parties.
27 The United States further objects to this Interrogatory to the extent that the
28 information sought is contained in documents already produced in this matter, and the

1 burden of deriving the answer to this Interrogatory is substantially the same for both
2 parties.

3 **Response to Interrogatory No. 15:** Subject to and without waiving the foregoing
4 objections, the United States hereby responds that the information sought by this
5 Interrogatory can be derived from the following publicly-available sources and
6 documents already produced in this matter, including the following policy and
7 training documents:

- 8 • HHS Policy for Records Management, last reviewed on May 2020, *available at*
9 [https://www.hhs.gov/web/governance/digital-strategy/it-policy-archive/hhs-](https://www.hhs.gov/web/governance/digital-strategy/it-policy-archive/hhs-ocio-policy-for-records-management.html)
10 [ocio-policy-for-records-management.html](https://www.hhs.gov/web/governance/digital-strategy/it-policy-archive/hhs-ocio-policy-for-records-management.html);
- 11 • HHS Policy for Litigation Holds, dated November 29, 2016
12 (USBP009834298);
- 13 • HHS Policy for Records Management, dated November 25, 2015
14 (USBP000105908);
- 15 • HHS Policy for Records Management of Emails, dated May 15, 2008
16 (USBP000105921);
- 17 • HHS Records Management Procedures Manual, dated December 5, 2008
18 (USBP000105935);
- 19 • HHS Records Management Council (RMC) Charter, dated August 21, 2007
20 (USBP000105930);
- 21 • General Records Management Training (USBP000490288);
- 22 • Office of Personnel Management Operating Manual, The Guide to Personnel
23 Recordkeeping (USBP000490327);
- 24 • CMS Litigation Support Meeting Powerpoint, dated November 14, 2019
25 (USBP009834319);
- 26 • Procedures for Implementing Litigations Holds/Document Preservation in
27 Civil Litigation, Office of Strategic Operations and Regulatory Affairs, Centers
28 for Medicare & Medicaid Services, Last Updated – March 2013

1 (USBP009834304);

2 • OCIG ACRB Records Retention Guidance, dated March 17, 2020

3 (USBP009834292);

4 • OCIG Record Destruction Guidelines (USBP009834288).

5 The United States further responds that the information sought by this

6 Interrogatory can be derived from the following records schedules and related

7 documents already produced in this matter:

8 • Introduction to the General Records Schedules (USBP000490439);

9 • General Records Schedule 2.5: Employee Separation Records
10 (USBP000490244) and Crosswalk (USBP000490271);

11 • General Records Schedule 2.6: Employee Training Records
12 (USBP000490247); Crosswalk (USBP000490272); and Frequently Asked
13 Questions (USBP000490273);

14 • General Records Schedule 2.8: Employee Ethics Records
15 (USBP000490249);

16 • General Records Schedule 3.1: General Technology Management Records
17 (USBP000490255); Crosswalk (USBP000490279); and Frequently Asked
18 Questions (USBP000490280);

19 • General Records Schedule 5.4: Facility, Equipment, Vehicle, Property,
20 and Supply Records (USBP000490264);

21 • General Records Schedule 5.5: Mail, Printing, and Telecommunication
22 Service Management Records (USBP000490285);

23 • General Records Schedule Disposition Spreadsheet (USBP000490310);

24 • Office of the Inspector General Office of Audit Services Files Plan Rollup
25 (USBP000490311).

26 **INTERROGATORY NO. 16** Identify all Persons, including but not limited to CMS
27 Individuals and HHS-OIG Individuals, with responsibility for or involvement in
28 overseeing the implementation of policies Relating to Your retention, preservation, or

1 destruction of Documents and Electronically Stored Information.

2 **Objections:**

3 The United States incorporates by reference each of its General Objections and
4 Specific Objections to the Definitions and Instructions as if stated herein. The United
5 States objects to this Interrogatory as vague and overly broad because it is unclear
6 what is meant by “policies.” The United States will interpret “policies” to mean the
7 policies that are publicly available at: [https://www.hhs.gov/web/governance/digital-](https://www.hhs.gov/web/governance/digital-strategy/it-policy-archive/hhs-ocio-policy-for-records-management.html)
8 [strategy/it-policy-archive/hhs-ocio-policy-for-records-management.html](https://www.hhs.gov/web/governance/digital-strategy/it-policy-archive/hhs-ocio-policy-for-records-management.html). Further, the
9 United States does not interpret this Interrogatory to request information about the
10 litigation hold in place in the Poehling Matter because, if UnitedHealth were
11 requesting information about the litigation hold in the Poehling Matter, it would have
12 done so, as it did in Interrogatory 14. The United States further objects to this
13 Interrogatory as vague because it is unclear what constitutes “responsibility for or
14 Involvement in overseeing the implementation” and could, conceivably, extend to
15 each of the thousands of CMS and HHS-OIG employees as well as other individuals
16 tasked with maintaining or preserving records within the Executive Branch of the
17 United States government. The United States will interpret this Interrogatory to
18 pertain to the individuals with roles and responsibilities for implementing HHS
19 Policy for Records Management (“Records Management Policy”), last reviewed on
20 May 20 and available at [https://www.hhs.gov/web/governance/digital-strategy/it-](https://www.hhs.gov/web/governance/digital-strategy/it-policy-archive/hhs-ocio-policy-for-records-management.html)
21 [policy-archive/hhs-ocio-policy-for-records-management.html](https://www.hhs.gov/web/governance/digital-strategy/it-policy-archive/hhs-ocio-policy-for-records-management.html). The United States
22 further objects to this Interrogatory to the extent that it seeks information protected
23 from disclosure by an applicable privilege or protection. The United States interprets
24 this Interrogatory to exclude attorneys and is not searching for, collecting, or
25 providing information or materials from any attorney within OGC, OCIG, or DOJ.

26 **Response to Interrogatory No. 16:** Subject to and without waiving the foregoing
27 objections, the United States hereby states that Section 7 of the Records Management
28 Policy sets forth the roles and responsibilities of the HHS Secretary; the HHS

1 Secretary for Administration; the HHS Chief Information Office; the Agency Records
2 Management Officer; the Operating Divisions (“OpDiv”) Chief Information Officers;
3 the HHS Chief Information Security Officer; the OpDiv Chief Information Security
4 Officers; the OpDiv Records Management Officers; the OpDiv and Staff Divisions
5 (“StaffDiv”) Records Managers and Records Liaisons; the OpDiv and StaffDiv
6 Records Custodians; Managers and Supervisors; Contracting Officers and
7 Contracting Officer Representatives; HHS Employees, Contractors, Interns, and
8 Fellows; the Freedom of Information Act Official; the Office of the General Counsel;
9 the Office of the Inspector General; and IT Infrastructure and Operations and System
10 Managers with respect to records management.

11 **INTERROGATORY NO. 17** Identify for Date of Service Years 2004–2016, the
12 Number of Diagnoses Codes submitted in FFS Medicare that were audited in each
13 Date of Service Year through Medical Record Reviews by Medical Record Review
14 Contractors prior to calibrating or recalibrating the CMS-HCC Risk Adjustment
15 Model using Diagnoses Codes from that same Date of Service Year.

16 **Objections:**

17 The United States incorporates by reference each of its General Objections and
18 Specific Objections to the Definitions and Instructions as if stated herein. The United
19 States objects to this Interrogatory to the extent it calls for the United States to
20 prepare documents and/or perform data analysis that does not already exist. The
21 United States objects to this Interrogatory as irrelevant because, during each year of
22 the relevant time period, UnitedHealth’s MA Organizations entered into contracts
23 with CMS and agreed to receive payments based on the CMS-HCC Risk Adjustment
24 Model in place at the time. This is a case brought under the False Claims Act and it
25 does not involve any potential challenges by UnitedHealth to the CMS-HCC Risk
26 Adjustment Model payment system. Thus, any post-hoc analysis of the data used to
27 calibrate the model used for any such payments is irrelevant to the claims and
28 defenses in this matter and any substantive analysis by the United States in response

1 to this Interrogatory is not proportional to the needs of the case. The United States
2 objects to this Interrogatory as overly broad and not proportional to the needs of this
3 case to the extent that it seeks information relating to audits conducted for DOS years
4 irrelevant to the years for which damages are sought in this matter.

5 **Response to Interrogatory No. 17:** Subject to and without waiving the foregoing
6 objections, the United States hereby states that CMS regularly conducts audits of
7 claims submitted under Part A and Part B of the Medicare Program, some of which
8 included audits of diagnosis codes submitted with the claims data. To the extent
9 corrections were made to the claims, diagnosis codes, or costs and those changes
10 were applied in relevant databases in advance of the data pull for the data used in the
11 calibration or recalibration of the CMS-HCC Risk Adjustment Model, those
12 corrections were reflected in the data used in the calibration or recalibration of the
13 CMS-HCC Risk Adjustment Model. The United States has already produced
14 business records related to the Medical Record Reviews by Medical Record Review
15 Contractors of FFS Medicare, to the extent they existed, after a reasonable search
16 from which information responsive to this Interrogatory may be determined or
17 ascertained. The burden of determining or ascertaining the answer is substantially the
18 same for the United States as it is for UnitedHealth. The United States further states
19 that, after a reasonable inquiry, it has determined that CMS has not undertaken this
20 analysis, does not know the exact number of Diagnosis Codes responsive to this
21 Interrogatory, and, even using the data and business records CMS does possess
22 related to the Medical Record Reviews by Medical Record Review Contractors of
23 FFS Medicare (which were collected and produced to UnitedHealth), the United
24 States does not believe that it is possible to answer this Interrogatory.

25 **INTERROGATORY NO. 18** Identify for Date of Service Years 2004–2016, the
26 Number of Diagnoses Codes submitted in FFS Medicare that were Corrected in each
27 Date of Service Year through Medical Record Reviews by Medical Record Review
28 Contractors prior to calibrating or recalibrating the CMS-HCC Risk Adjustment

1 Model using Diagnoses Codes from that same Date of Service Year.

2 **Objections:**

3 The United States incorporates by reference each of its General Objections and
4 Specific Objections to the Definitions and Instructions as if stated herein. The United
5 States objects to this Interrogatory to the extent it calls for the United States to
6 prepare documents and/or perform data analysis that does not already exist. The
7 United States objects to this Interrogatory as irrelevant because, during each year of
8 the relevant time period, UnitedHealth's MA Organizations entered into contracts
9 with CMS and agreed to receive payments based on the CMS-HCC Risk Adjustment
10 Model in place at the time. This is a case brought under the False Claims Act and it
11 does not involve any potential challenges by UnitedHealth to the CMS-HCC Risk
12 Adjustment Model payment system. Thus, any post-hoc analysis of the data used to
13 calibrate the model used for any such payments is irrelevant to the claims and
14 defenses in this matter and any substantive analysis by the United States in response
15 to this Interrogatory is not proportional to the needs of the case. The United States
16 objects to this Interrogatory as overly broad and not proportional to the needs of this
17 case to the extent that it seeks information relating to audits conducted for DOS years
18 irrelevant to the years for which damages are sought in this matter.

19 **Response to Interrogatory No. 18:** Subject to and without waiving the foregoing
20 objections, the United States hereby states that CMS regularly conducts audits of
21 claims submitted under Part A and Part B of the Medicare Program, some of which
22 included audits of diagnosis codes submitted with the claims data. To the extent
23 corrections were made to the claims, diagnosis codes, or costs and those changes
24 were applied in relevant databases in advance of the data pull for the data used in the
25 calibration or recalibration of the CMS-HCC Risk Adjustment Model, those
26 corrections were reflected in the data used in the calibration or recalibration of the
27 CMS-HCC Risk Adjustment Model. The United States has already produced
28 business records related to the Medical Record Reviews by Medical Record Review

Contractors of FFS Medicare, to the extent they existed, after a reasonable search from which information responsive to this Interrogatory may be determined or ascertained. The burden of determining or ascertaining the answer is substantially the same for the United States as it is for UnitedHealth. The United States further states that, after a reasonable inquiry, it has determined that CMS has not undertaken this analysis, does not know the exact number of Diagnosis Codes responsive to this Interrogatory, and, even using the data and business records CMS does possess related to the Medical Record Reviews by Medical Record Review Contractors of FFS Medicare (which were collected and produced to UnitedHealth), the United States does not believe that it is possible to answer this Interrogatory.

Respectfully submitted,

Medicare Program; Changes to the Hospital Inpatient Prospective Payment Systems and Fiscal Year 2009 Rates; Payments for Graduate Medical Education in Certain Emergency Situations; Changes to Disclosure of Physician Ownership in Hospitals and Physician Self-Referral Rules; Updates to the Long-Term Care Prospective Payment System; Updates to Certain IPPS-Excluded Hospitals; and Collection of Information Regarding Financial Relationships Between Hospitals

AGENCY: Centers for Medicare and Medicaid Services (CMS), HHS.

ACTION: Final rules.

SUMMARY: We are revising the Medicare hospital inpatient prospective payment systems (IPPS) for operating and capital-related costs to implement changes arising from our continuing experience with these systems, and to implement certain provisions made by the Deficit Reduction Act of 2005, the Medicare Improvements and Extension Act, Division B, Title I of the Tax Relief and Health Care Act of 2006, the TMA, Abstinence Education, and QI Programs Extension Act of 2007, and the Medicare Improvements for Patients and Providers Act of 2008. In addition, in the Addendum to this final rule, we describe the changes to the amounts and factors used to determine the rates for Medicare hospital inpatient services for operating costs and capital-related costs. These changes are generally applicable to discharges occurring on or after October 1, 2008. We also are setting forth the update to the rate-of-increase limits for certain hospitals and hospital units excluded from the IPPS that are paid on a reasonable cost basis subject to these limits. The updated rate-of-increase limits are effective for cost reporting periods beginning on or after October 1, 2008.

In addition to the changes for hospitals paid under the IPPS, this document contains revisions to the patient classifications and relative weights used under the long-term care

hospital prospective payment system (LTCH PPS). This document also contains policy changes relating to the requirements for furnishing hospital emergency services under the Emergency Medical Treatment and Labor Act of 1986 (EMTALA).

In this document, we are responding to public comments and finalizing the policies contained in two interim final rules relating to payments for Medicare graduate medical education to affiliated teaching hospitals in certain emergency situations.

We are revising the regulatory requirements relating to disclosure to patients of physician ownership or investment interests in hospitals and responding to public comments on a collection of information regarding financial relationships between hospitals and physicians. In addition, we are responding to public comments on proposals made in two separate rulemakings related to policies on physician self-referrals and finalizing these policies.

DATES: *Effective Dates:* This final rule is effective on October 1, 2008, with the following exceptions: Amendments to §§ 412.230, 412.232, and 412.234 are effective on September 2, 2008. Amendments to §§ 411.357(a)(5)(ii), (b)(4)(ii), (1)(3)(i) and (ii), and (p)(1)(i)(A) and (B) and the definition of entity in § 411.351 are effective on October 1, 2009.

Applicability Dates: The provisions of § 412.78 relating to payments to SCHs are applicable for cost reporting periods beginning on or after January 1, 2009. Our process for allowing certain hospitals to opt out of decisions made on behalf of hospitals (as discussed in section III.7. of this preamble) are applicable on August 19, 2008.

Congress stipulated that hospitals paid based on the standardized amount should not receive additional payments based on the effect of documentation and coding changes that do not reflect real changes in case-mix. Similarly, we believe that hospitals paid based on the hospital-specific rate should not have the potential to realize increased payments due to documentation and coding improvements that do not reflect real increases in patients' severity of illness. While we continue to believe that section 1886(d)(3)(A)(vi) of the Act does not provide explicit authority for application of the documentation and coding adjustment to the hospital-specific rates, we believe that we have the authority to apply the documentation and coding adjustment to the hospital-specific rates using our special exceptions and adjustment authority under section 1886(d)(5)(I)(i) of the Act. The special exceptions and adjustment authority authorizes us to provide "for such other exceptions and adjustments to [IPPS] payment amounts * * * as the Secretary deems appropriate." In light of this authority, for the FY 2010 rulemaking, we plan to examine our FY 2008 claims data for hospitals paid based on the hospital-specific rate. In the FY 2009 IPPS proposed rule, we stated that if we find evidence of significant increases in case-mix for patients treated in these hospitals, we would consider proposing application of the documentation and coding adjustments to the FY 2010 hospital-specific rates under our authority in section 1886(d)(5)(I)(i) of the Act. As noted previously, the documentation and coding adjustments established in the FY 2008 IPPS final rule with comment period are cumulative. For example, the -0.9 percent documentation and coding adjustment to the national standardized amount in FY 2009 is in addition to the -0.6 percent adjustment made in FY 2008, yielding a combined effect of -1.5 percent in FY 2009. Given the cumulative nature of the documentation and coding adjustments, if we were to propose to apply the documentation and coding adjustment to the FY 2010 hospital-specific rates, it may involve applying the FY 2008 and FY 2009 documentation and coding adjustments (-1.5 percent combined) plus the FY 2010 documentation and coding adjustment, discussed in the FY 2008 IPPS final rule with comment period, to the FY 2010 hospital-specific rates.

Comment: A number of commenters opposed application of the documentation and coding adjustment to the hospital-specific rates. MedPAC

supported application of a documentation and coding adjustment to the prospective payment rates and the hospital-specific rates for all IPPS hospitals that are paid based on their reported case-mix. Another commenter supported application of a documentation and coding adjustment to the hospital-specific rates if analysis of FY 2008 claims data supports a positive adjustment and recommended a transition be considered if the data support a negative adjustment.

Response: We appreciate the comments received. We did not propose to apply the documentation and coding adjustment to the hospital-specific rates for FY 2009. Instead, as we indicated in the proposed rule and reiterated above, we intend to consider whether such a proposal is warranted for FY 2010. To gather information to evaluate these considerations, we plan to perform analyses on FY 2008 claims data to examine whether there has been a significant increase in case-mix for hospitals paid based on the hospital-specific rate. If we find that application of the documentation and coding adjustment to the hospital-specific rates for FY 2010 is warranted, we would include a proposal in the FY 2010 IPPS proposed rule, which would be open for public comment at that time.

3. Application of the Documentation and Coding Adjustment to the Puerto Rico-Specific Standardized Amount

Puerto Rico hospitals are paid based on 75 percent of the national standardized amount and 25 percent of the Puerto Rico-specific standardized amount. As noted previously, the documentation and coding adjustment we adopted in the FY 2008 IPPS final rule with comment period relied upon our authority under section 1886(d)(3)(A)(vi) of the Act, which provides the authority to adjust "the standardized amounts computed under this paragraph" to eliminate the effect of changes in coding or classification that do not reflect real changes in case-mix. Section 1886(d)(3)(A)(vi) of the Act applies to the national standardized amounts computed under section 1886(d)(3) of the Act, but does not apply to the Puerto Rico-specific standardized amount computed under section 1886(d)(9)(C) of the Act. In calculating the FY 2008 payment rates, we made an inadvertent error and applied the FY 2008 -0.6 percent documentation and coding adjustment to the Puerto Rico-specific standardized amount, relying on our authority under section 1886(d)(3)(A)(vi) of the Act. However, section 1886(d)(3)(A)(vi) of the Act authorizes application of a

documentation and coding adjustment to the national standardized amount and does not apply to the Puerto Rico-specific standardized amount. In this final rule, we are correcting this inadvertent error by removing the -0.6 percent documentation and coding adjustment from the FY 2008 Puerto Rico-specific rates. The revised FY 2008 Puerto Rico-specific operating standardized amounts are: \$1,471.10 for the labor share and \$901.84 for the nonlabor share for a hospital with a wage index greater than 1 and \$1,392.80 for the labor share and \$979.94 for the non-labor share for a hospital with a wage index less than or equal to 1. The revised FY 2008 Puerto Rico capital payment rate is \$202.89 (as discussed in section III.A.5.b. of the Addendum to this final rule). These revised rates are effective October 1, 2007, for FY 2008.

While section 1886(d)(3)(A)(vi) of the Act is not applicable to the Puerto Rico-specific standardized amount, we believe that we have the authority to apply the documentation and coding adjustment to the Puerto Rico-specific standardized amount using our special exceptions and adjustment authority under section 1886(d)(5)(I)(i) of the Act. Similar to SCHs and MDHs that are paid based on the hospital-specific rate, discussed in section II.D.2. of this preamble, we believe that Puerto Rico hospitals that are paid based on the Puerto Rico-specific standardized amount should not have the potential to realize increased payments due to documentation and coding improvements that do not reflect real increases in patients' severity of illness. Consistent with the approach described for SCHs and MDHs in section II.D.2. of the preamble of this final rule, for the FY 2010 rulemaking, we plan to examine our FY 2008 claims data for hospitals in Puerto Rico. As we indicated in the FY 2009 proposed rule, if we find evidence of significant increases in case-mix for patients treated in these hospitals, we would consider proposing application of the documentation and coding adjustments to the FY 2010 Puerto Rico-specific standardized amount under our authority in section 1886(d)(5)(I)(i) of the Act. As noted previously, the documentation and coding adjustments established in the FY 2008 IPPS final rule with comment period are cumulative. Given the cumulative nature of the documentation and coding adjustments, if we were to propose to apply the documentation and coding adjustment to the FY 2010 Puerto Rico-specific standardized amount, it may involve applying the FY 2008 and FY

2009 documentation and coding adjustments (–1.5 percent combined) plus the FY 2010 documentation and coding adjustment, discussed in the FY 2008 IPPS final rule with comment period, to the FY 2010 Puerto Rico-specific standardized amount.

Comment: Some commenters opposed application of the documentation and coding adjustment to the Puerto Rico-specific standardized amount. MedPAC supported application of a documentation and coding adjustment to the prospective payment rates and the hospital-specific rates for all IPPS hospitals that are paid based on their reported case-mix.

Response: We appreciate the comments. We did not propose to apply the documentation and coding adjustment to the Puerto Rico-specific standardized amount for FY 2009. Instead, as we indicated in the proposed rule, we intend to consider whether such a proposal is warranted for FY 2010. To gather information to evaluate these considerations, we plan to perform analyses on FY 2008 claims data to examine whether there has been a significant increase in case-mix for hospitals in Puerto Rico. If we find that application of the documentation and coding adjustment to the Puerto Rico-specific standardized amount for FY 2010 is warranted, we would include a proposal in the FY 2010 proposed rule, which would be open for public comment at that time.

4. Potential Additional Payment Adjustments in FYs 2010 Through 2012

Section 7 of Public Law 110–90 also provides for payment adjustments in FYs 2010 through 2012 based upon a retrospective evaluation of claims data from the implementation of the MS-DRG system. If, based on this retrospective evaluation, the Secretary finds that in FY 2008 and FY 2009, the actual amount of change in case-mix that does not reflect real change in underlying patient severity differs from the statutorily mandated documentation and coding adjustments implemented in those years, the law requires the Secretary to adjust payments for discharges occurring in FYs 2010 through 2012 to offset the estimated amount of increase or decrease in aggregate payments that occurred in FY 2008 and FY 2009 as a result of that difference, in addition to making an appropriate adjustment to the standardized amount under section 1006(d)(3)(A)(vi) of the Act.

In order to implement these requirements of section 7 of Public Law 110–90, we are planning a thorough retrospective evaluation of our claims

data. Results of this evaluation would be used by our actuaries to determine any necessary payment adjustments in FYs 2010 through 2012 to ensure the budget neutrality of the MS-DRG implementation for FY 2008 and FY 2009, as required by law. In the FY 2009 IPPS proposed rule, we described our preliminary analysis plans to provide the opportunity for public input.

In the proposed rule, we indicated that we intend to measure and corroborate the extent of the overall national average changes in case-mix for FY 2008 and FY 2009. We expect part of this overall national average change would be attributable to underlying changes in actual patient severity and part would be attributable to documentation and coding improvements under the MS-DRG system. In order to separate the two effects, we plan to isolate the effect of shifts in cases among base DRGs from the effect of shifts in the types of cases within base DRGs. The shifts among base DRGs are the result of changes in principal diagnoses while the shifts within base DRGs are the result of changes in secondary diagnoses. Because we expect most of the documentation and coding improvements under the MS-DRG system will occur in the secondary diagnoses, we believe that the shifts among base DRGs are less likely to be the result of the MS-DRG system and the shifts within base DRGs are more likely to be the result of the MS-DRG system. We also anticipate evaluating data to identify the specific MS-DRGs and diagnoses that contributed significantly to the improved documentation and coding payment effect and to quantify their impact. This step would entail analysis of the secondary diagnoses driving the shifts in severity within specific base DRGs.

In the proposed rule, we also stated that, while we believe that the data analysis plan described previously will produce an appropriate estimate of the extent of case-mix changes resulting from documentation and coding improvements, we may also decide, if feasible, to use historical data from our Hospital Payment Monitoring Program (HPMP) to corroborate the within-base DRG shift analysis. The HPMP is supported by the Medicare Clinical Data Abstraction Center (CDAC). From 1998 to 2007, the CDAC obtained medical records for a sample of discharges as part of our hospital monitoring activities. These data were collected on a random sample of between 30,000 to 50,000 hospital discharges per year. The historical CDAC data could be used to develop an upper bound estimate of the

trend in real case-mix growth (that is, real change in underlying patient severity) prior to implementation of the MS-DRGs.

In the FY 2009 IPPS proposed rule, we solicited public comments on the analysis plans described above, as well as suggestions on other possible approaches for conducting a retrospective analysis to identify the amount of case-mix changes that occurred in FY 2008 and FY 2009 that did not reflect real increases in patients' severity of illness.

Comment: A few commenters, including MedPAC, expressed support for the analytic approach described in the proposed rule. A number of other commenters expressed concerns about certain aspects of the approach and/or suggested alternate analyses or study designs. In addition, one commenter recommended that any determination or retrospective evaluation by the actuaries of the impact of the MS-DRGs on case-mix be open to public scrutiny prior to the implementation of final payment adjustments for FY 2010 through FY 2012.

Response: We thank the commenters for their comments. We will take all of the comments into consideration as we continue development of our analysis plans. Our analysis, findings, and any resulting proposals to adjust payments for discharges occurring in FYs 2010 through 2012 to offset the estimated amount of increase or decrease in aggregate payments that occurred in FY 2008 and FY 2009 will be discussed in future years' proposed rules, which will be open for public comment.

Comment: One commenter expressed concern about the impact that an adjustment to the FY 2010 through FY 2012 payment rates could have on small rural hospitals. The commenter stated that if CMS finds that there was an increase in aggregate payments in FY 2008 or FY 2009 that requires an offsetting adjustment to the FY 2010 through FY 2012 payment rates, CMS should consider a transition period before fully implementing such an adjustment.

Response: If our analysis suggests that an adjustment to the FY 2010 through FY 2012 payment rates is necessary, a proposal would be made in a future proposed rule and the public would have an opportunity to comment on the proposal at that time.

E. Refinement of the MS-DRG Relative Weight Calculation

1. Background

In the FY 2008 IPPS final rule with comment period (72 FR 47188), we

continued to implement significant revisions to Medicare's inpatient hospital rates by basing relative weights on hospitals' estimated costs rather than on charges. We continued our 3-year transition from charge-based relative weights to cost-based relative weights. Beginning in FY 2007, we implemented relative weights based on cost report data instead of based on charge information. We had initially proposed to develop cost-based relative weights using the hospital-specific relative value cost center (HSRVcc) methodology as recommended by MedPAC. However, after considering concerns raised in the public comments, we modified MedPAC's methodology to exclude the hospital-specific relative weight feature. Instead, we developed national CCRs based on distinct hospital departments and engaged a contractor to evaluate the HSRVcc methodology for future consideration. To mitigate payment instability due to the adoption of cost-based relative weights, we decided to transition cost-based weights over 3 years by blending them with charge-based weights beginning in FY 2007. In FY 2008, we continued our transition by blending the relative weights with one-third charge-based weights and two-thirds cost-based weights.

Also, in FY 2008, we adopted severity-based MS-DRGs, which increased the number of DRGs from 538 to 745. Many commenters raised concerns as to how the transition from charge-based weights to cost-based weights would continue with the introduction of new MS-DRGs. We decided to implement a 2-year transition for the MS-DRGs to coincide with the remainder of the transition to cost-based relative weights. In FY 2008, 50 percent of the relative weight for each DRG was based on the CMS DRG relative weight and 50 percent was based on the MS-DRG relative weight. We refer readers to the FY 2007 IPPS final rule (71 FR 47882) for more detail on our final policy for calculating the cost-based DRG relative weights and to the FY 2008 IPPS final rule with comment period (72 FR 47199) for information on how we blended relative weights based on the CMS DRGs and MS-DRGs.

As we transitioned to cost-based relative weights, some commenters raised concerns about potential bias in the weights due to "charge compression," which is the practice of applying a higher percentage charge markup over costs to lower cost items and services, and a lower percentage charge markup over costs to higher cost items and services. As a result, the cost-based weights would undervalue high

cost items and overvalue low cost items if a single CCR is applied to items of widely varying costs in the same cost center. To address this concern, in August 2006, we awarded a contract to RTI to study the effects of charge compression in calculating the relative weights and to consider methods to reduce the variation in the CCRs across services within cost centers. RTI issued an interim draft report in March 2007 which was posted on the CMS Web site with its findings on charge compression. In that report, RTI found that a number of factors contribute to charge compression and affect the accuracy of the relative weights. RTI found inconsistent matching of charges in the Medicare cost report and their corresponding charges in the MedPAR claims for certain cost centers. In addition, there was inconsistent reporting of costs and charges among hospitals. For example, some hospitals would report costs and charges for devices and medical supplies in the Medical Supplies Charged to Patients cost center, while other hospitals would report those costs and charges in their related ancillary departments such as Operating Room or Radiology. RTI also found evidence that certain revenue codes within the same cost center had significantly different markup rates. For example, within the Medicare Supplies Charged to Patients cost center, revenue codes for devices, implantables, and prosthetics had different markup rates than the other medical supplies in that cost center. RTI's findings demonstrated that charge compression exists in several CCRs, most notably in the Medical Supplies and Equipment CCR.

RTI offered short-term, medium-term, and long-term recommendations to mitigate the effects of charge compression. RTI's short-term recommendations included expanding the distinct hospital CCRs to 19 by disaggregating the "Emergency Room" and "Blood and Blood Products" from the Other Services cost center and by estimating regression-based CCRs to disaggregate Medical Supplies, Drugs, and Radiology cost centers. RTI recommended, for the medium-term, to expand the MedPAR file to include separate fields that disaggregate several existing charge departments. In addition, RTI recommended improving hospital cost reporting instructions so that hospitals can properly report costs in the appropriate cost centers. RTI's long-term recommendations included adding new cost centers to the Medicare cost report, such as adding a "Devices, Implants and Prosthetics" line under "Medical Supplies Charged to Patients"

and a "CT Scanning and MRI" subscripted line under "Radiology-Diagnostics".

Among RTI's short-term recommendations, for FY 2008, we expanded the number of distinct hospital department CCRs from 13 to 15 by disaggregating "Emergency Room" and "Blood and Blood Products" from the Other Services cost center as these lines already exist on the hospital cost report. Furthermore, in an effort to improve consistency between costs and their corresponding charges in the MedPAR file, we moved the costs for cases involving electroencephalography (EEG) from the Cardiology cost center to the Laboratory cost center group which corresponds with the EEG MedPAR claims categorized under the Laboratory charges. We also agreed with RTI's recommendations to revise the Medicare cost report and the MedPAR file as a long-term solution for charge compression. We stated that, in the upcoming year, we would consider additional lines to the cost report and additional revenue codes for the MedPAR file.

Despite receiving public comments in support of the regression-based CCRs as a means to immediately resolve the problem of charge compression, particularly within the Medical Supplies and Equipment CCR, we did not adopt RTI's short-term recommendation to create four additional regression-based CCRs for several reasons. We were concerned that RTI's analysis was limited to charges on hospital inpatient claims, while typically hospital cost report CCRs combine both inpatient and outpatient services. Further, because both the IPPS and OPSS rely on cost-based weights, we preferred to introduce any methodological adjustments to both payment systems at the same time. We have since expanded RTI's analysis of charge compression to incorporate outpatient services. RTI has been evaluating the cost estimation process for the OPSS cost-based weights, including a reassessment of the regression-based CCR models using both outpatient and inpatient charge data. Because the RTI report was not available until after the conclusion of our proposed rule development process, we were unable to include a summary of the report in the FY 2009 IPPS proposed rule. The IPPS-related chapters of RTI's interim report were posted on the CMS Web site on April 22, 2008, for a 60-day comment period, and we welcomed comments on the report. In this final rule, we are providing a summary of RTI's findings and the public comments

we received in section ILE.2. of the preamble of this final rule.

2. Summary of RTI's Report on Charge Compression

As stated earlier, subsequent to the release of the FY 2009 IPPS proposed rule, we posted on April 22, 2008, an interim report discussing RTI's research findings for the IPPS MS-DRG relative weights to be available during the public comment period on the FY 2009 IPPS proposed rule. This report can be found on RTI's Web site at: http://www.rti.org/reports/cms/HHSM-500-2005-00291/PDF/Refining_Cost_to_Charge_Ratios_200804.pdf. The IPPS-specific chapters, which were separately displayed in the April 2008 interim report, as well as the more recent OPSS chapters, are included in the July 2008 RTI final report entitled, "Refining Cost-to-Charge Ratios for Calculating APC and DRG Relative Payment Weights," that became available at the time of the development of this final rule. The RTI final report can be found on RTI's Web site at: http://www.rti.org/reports/cms/HHSM-500-2005-00291/PDF/Refining_Cost_to_Charge_Ratios_200807_Final.pdf.

RTI's final report distinguished between two types of research findings and recommendations: Those pertaining to the accounting or cost report data and those related to statistical regression analysis. Because the OPSS uses a hospital-specific CCR methodology, employs detailed cost report data, and estimates costs at the claim level, CMS asked RTI to closely evaluate the accounting component of the OPSS cost-based weight methodology. In reviewing the cost report data for nonstandard cost centers used in the crosswalk, RTI discovered some problems concerning the classification of nonstandard cost centers that impact both the IPPS and the OPSS. RTI reclassified nonstandard cost centers by reading providers' cost center labels. Standard cost centers are preprinted in the CMS-approved cost report software, while nonstandard cost centers are identified and updated periodically through analysis of frequently used labels. Under the IPPS, the line reassignments only slightly impact the 15 national aggregate CCRs used in the relative weight calculation. However, improved cost report data for CT Scanning, MRI, Nuclear Medicine, Therapeutic Radiology, and Cardiac Catheterization through line reassignments allowed for the reduction in aggregation bias by expanding the number of national CCRs available to separately capture these and other services. Importantly, RTI found that,

under the IPPS and the OPSS, this improvement to the cost reporting data reduces some of the sources of aggregation bias without having to use regression-based adjustments.

In general, with respect to the regression-based adjustments, RTI confirmed the findings of its March 2007 report that regression models are a valid approach for diagnosing potential aggregation bias within selected services for the IPPS and found that regression models are equally valid for setting payments under the OPSS. RTI also suggested that regression-based CCRs could provide a short-term correction until accounting data could be refined to support more accurate CCR estimates under both the IPPS and the OPSS. RTI again found aggregation bias in devices, drugs, and radiology and, using combined outpatient and inpatient claims, expanded the number of recommended regression-adjusted CCRs to create seven regression-adjusted CCRs for Devices, IV Solutions, Cardiac Catheterization, CT Scanning, MRI, Therapeutic Radiology, and Nuclear Medicine.

In almost all cases, RTI observed that potential distortions from aggregation bias and incorrect cost reporting in the OPSS relative weights were proportionally much greater than for MS-DRGs for both accounting-based and statistical adjustments because OPSS groups are small and generally price a single service. HCRIS line reassignments by themselves had little effect on most inpatient weights. However, just as the overall impacts on MS-DRGs were more moderate because MS-DRGs experienced offsetting effects in cost estimation among numerous revenue codes in an episode, a given hospital outpatient visit might include more than one service, leading to offsetting effects in cost estimation for services provided in the outpatient episode as a whole.

Notwithstanding likely offsetting effects at the provider-level, RTI asserted that, while some averaging is appropriate for a prospective payment system, extreme distortions in payments for individual services bias perceptions of service profitability and may lead hospitals to inappropriately set their charge structure. RTI noted that this may not be true for "core" hospital services, such as oncology, but has a greater impact in evolving areas with greater potential for provider-induced demand, such as specialized imaging services. RTI also noted that cost-based weights are only one component of a final prospective payment rate. There are other rate adjustments (wage index, IME, and DSH) to payments derived

from the revised cost-based weights and the cumulative effect of these components may not improve the ability of final payment to reflect resource cost. With regard to APCs and MS-DRGs that contain substantial device costs, RTI cautioned that other prospective payment system adjustments (wage index, IME, and DSH) largely offset the effects of charge compression among hospitals that receive these adjustments. RTI endorsed short-term regression-based adjustments, but also concluded that more refined and accurate accounting data are the preferred long-term solution to mitigate charge compression and related bias in hospital cost-based weights.

As a result of this research, RTI made 11 recommendations. The first set of recommendations is more applicable to the OPSS because it uses more granular HCRIS data and concentrates on short-term accounting changes to current cost report data. This set includes a recommendation that CMS immediately implement a review of HCRIS cost center assignments based on text searches of providers' line descriptions and reassign lines appropriately. The second set addresses short-term regression-based and other statistical adjustments. The third set focuses on clarifying existing cost report instructions to instruct providers to use all applicable standard cost centers, adding new standard cost centers (for Devices, CT Scans, MRIs, Cardiac Catheterization, and Infusion Drugs), and creating new charge category summaries in the MedPAR to match the new cost centers on the cost report. Specifically, the new MedPAR groups would be for Intermediate Care (revenue codes 0206 and 0214), Devices (revenue codes 0274, 0275, 0276 and 0278), IV Solutions (revenue code 0258), CT Scanning (revenue codes 035x), Nuclear Medicine (revenue codes 034x, possibly combined with 0404), and Therapeutic Radiology (revenue codes 033x). RTI also recommends educating hospitals through industry-led educational initiatives directed at methods for capital cost finding, specifically encouraging providers to use direct assignment of equipment depreciation and lease costs wherever possible, or at least to allocate moveable equipment depreciation based on the dollar value of assigned depreciation costs. Lastly, although not directly the focus of its study, RTI mentions the problem of nursing cost compression in the relative weights, and notes that cost compression within inpatient nursing services is a significant source of distortion in the various IPPS' relative

weights, possibly more so than any of the factors studied by RTI. RTI suggests that it may be best for hospitals to agree to expand charge coding conventions for inpatient nursing, which would foster increased use of patient-specific nursing incremental charge codes in addition to baseline unit-specific per-diem charges.

Comment: One commenter agreed with the enhancements made by RTI (in the portion of the RTI report that was made available to the public in the April 2008 report) to the model for disaggregating CCRs in the Medical Supplies cost center, but was "disappointed" that CMS did not post the complete report, including the impact of charge "decompression" on the APC weights under the OPSS, and urged CMS to release the full report as soon as possible to allow a comprehensive review of the findings applicable to both the IPPS and the OPSS.

Response: Because the final RTI report was not scheduled to be completed before July 2008, we were unable to make the complete report, including sections focusing on the OPSS, available to the public in April 2008. Because we wanted to give the public the benefit of a 60-day comment period on the IPPS sections of the RTI report that would generally coincide with the 60-day comment period on the FY 2009 IPPS proposed rule, we chose to make available in April 2008 those sections of the RTI report that specifically dealt with the IPPS MS-DRG relative weights. We note that on July 3, 2008, we included on the CMS Web site the link to the complete RTI report: http://www.rti.org/reports/cms/HHS-500-2005-00291/PDF/Refining_Cost_to_Charge_Ratios_200807_Final.pdf.

Comment: One commenter recommended that, for purposes of calculating the relative weights for FY 2009, CMS adopt RTI's recommendation to reassign cost center lines based on the provider's entered text description to correct errors in the assignment of costs and charges by hospitals in nonstandard cost centers on the cost report. The commenter also suggested that CMS adopt RTI's recommendation that, in the MedPAR file, intermediate care charges should be reclassified from the Intensive Care Unit cost center to the Routine cost center to correct a mismatch between where the intermediate care charges are assigned on the cost report (that is, in the Routine cost center) and where the charges are grouped in MedPAR (that is, with intensive care unit charges).

Response: The commenter's recommendations are important and are consistent with existing Medicare

policy. Currently, the MedPAR file incorrectly groups intermediate care charges with intensive care unit charges; intermediate care charges and costs are, in fact, to be included in the General Routine (that is, Adults and Pediatrics) cost center on the cost report, in accordance with section 2202.7.I.B. of the PRM-1. However, in its July 2008 report, RTI found that HCRIIS line reassignments by themselves had little effect on most inpatient weights (page 8). The impact of adopting these recommendations would likely be more pronounced if we were adopting regression-based CCRs for purposes of calculating the relative weights for FY 2009. However, because we are not using regression-based CCRs for FY 2009, we do not believe it is necessary to adopt the commenter's recommendations for the MS-DRG relative weights at this time, but will consider them for future rulemaking.

Comment: One commenter commended CMS for proposing to break out the existing line on the cost report for Medical Supplies Charged to Patients into two lines, one for costly devices and implants and the other for low-cost supplies, and for undertaking a comprehensive review of the cost report. However, the commenter observed that RTI's 2008 report demonstrates that additional lines are also needed to further break out drugs, radiology (CT scans and MRI scans) and cardiac catheterization because hospitals apply varying markups within these cost centers as well.

Response: We acknowledge, as RTI has found, that charge compression occurs in several cost centers that exist on the Medicare cost report. However, as we stated in the proposed rule, we proposed to focus on the CCR for Medical Supplies and Equipment because RTI found that the largest impact on the MS-DRG relative weights could result from correcting charge compression for devices and implants.

We note that in the CY 2009 OPSS/ASC proposed rule (73 FR 41490), we are proposing to break the single standard Drugs Charged to Patient cost center, Line 56, into two standard cost centers, Drugs with High Overhead Cost Charged to Patients and Drugs with Low Overhead Cost Charged to Patients, to reduce the reallocation of pharmacy overhead cost from expensive to inexpensive drugs and biologicals. We use the term "pharmacy overhead" here to refer to overhead and related expenses such as pharmacy services and handling costs. This proposal is consistent with RTI's recommendation for creating a new cost center with a CCR that would be used to adjust

charges to costs for drugs requiring detail coding. In the CY 2009 OPSS/ASC proposed rule, we note that comments on the proposed changes to the cost report for drugs should address any impact on both the inpatient and outpatient payment systems because both systems rely upon the Medicare hospital cost report for cost estimation. Furthermore, in that proposed rule, we specifically invited public comment on the appropriateness of creating standard cost centers for Computed Tomography (CT) Scanning, Magnetic Resonance Imaging (MRI), and Cardiac Catheterization, rather than continuing the established nonstandard cost centers for these services (73 FR 41431).

3. Summary of RAND's Study of Alternative Relative Weight Methodologies

A second reason that we did not implement regression-based CCRs at the time of the FY 2008 IPPS final rule with comment period was our inability to investigate how regression-based CCRs would interact with the implementation of MS-DRGs. In the FY 2008 final rule with comment period (72 FR 47197), we stated that we engaged RAND as the contractor to evaluate the HSRV methodology in conjunction with regression-based CCRs and we would consider their analysis as we prepared for the FY 2009 IPPS rulemaking process. We stated that we would analyze how the relative weights would change if we were to adopt regression-based CCRs and an HSRV methodology using fully-phased in MS-DRGs. We stated that we would consider the results of the second phase of the RAND study as we prepared for the FY 2009 IPPS rulemaking process. We had intended to include a detailed discussion of RAND's study in the FY 2009 IPPS proposed rule. However, due to some delays in releasing identifiable data to the contractor under revised data security rules, the report on this second stage of RAND's analysis was not completed in time for the development of the proposed rule. Therefore, we continued to have the same concerns with respect to uncertainty about how regression-based CCRs would interact with the MS-DRGs or an HSRV methodology, and we did not propose to adopt the regression-based CCRs or an HSRV methodology in the FY 2009 IPPS proposed rule. Nevertheless, we welcomed public comments on our proposals not to adopt regression-based CCRs or an HSRV methodology at that time or in the future. The RAND report on regression-based CCRs and the HSRV methodology was finalized at the conclusion of our proposed rule

Medicare Program; Policy and Technical Changes to the Medicare
Advantage and the Medicare Prescription Drug Benefit Programs

Thursday, April 15, 2010

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

***19678 ACTION:** Final rule.

SUMMARY: This final rule makes revisions to the regulations governing the Medicare Advantage (MA) program (Part C) and prescription drug benefit program (Part D) based on our continued experience in the administration of the Part C and D programs. The revisions strengthen various program participation and exit requirements; strengthen beneficiary protections; ensure that plan offerings to beneficiaries include meaningful differences; improve plan payment rules and processes; improve data collection for oversight and quality assessment, implement new policies and clarify existing program policy.

DATES: Effective Date: These regulations are effective on June 7, 2010. However, we note that because health and drug plans under the Part C and D programs operate under contracts with CMS that are applicable on a calendar year basis, the provisions will not be applicable prior to contract year January 1, 2011, except where otherwise noted.

Table of Contents

I. Background

A. Overview of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003

B. History and Overview

II. Provisions of the Proposed Rule and Analysis and Responses to Public Comments

A. Changes to Strengthen Our Ability To Distinguish for Approval Stronger Applicants for Part C and D Program Participation and To Remove Consistently Poor Performers

1. Require Notice of Intent to Apply Under Part C and D Within the Application Requirements (§ 422.501 and § 423.502)
2. Application Requirements (§ 422.501(c) and § 423.502(c)) and Evaluation and Determination Procedures for Determining Whether Applicants are Qualified for a Contract Under Parts C and D (§ 422.502 and § 423.503)
3. Deny Contract Qualification Applications Based on Past Contract Performance (§ 423.750 and § 422.750)
4. Use of Data to Evaluate Continued Ability to Act as a Qualified Sponsoring Organization Under Parts C and D (§ 422.504, and § 423.505)
5. Compliance Programs Under Part C and D (§ 422.503(b)(4)(vi) and § 423.504(b)(4)(vi))
6. Network Adequacy of Coordinated Care and Network-Based Private Fee-for-Service Plans Under Part C (§ 422.112)
7. Deemable Program Requirements Under Parts C and D (§ 422.156(b) (7), § 422.156 (f), § 423.165(b), and § 423.165(f))
8. Modify the Corrective Action Plan (CAP) Process as it Relates to Procedures for Termination and Nonrenewal of a Part C or D Contract By CMS (§ 422.506(b)(3), § 422.510(c)(1), § 423.507(b)(3), and § 423.509(c)(1))
9. Procedures for Imposing Intermediate Sanctions and Civil Money Penalties Under Part C and D (§ 422.756 and 423.756)
10. Termination of Contracts Under Parts C and D (§ 422.510(a) and § 423.509(a))
11. Request for Hearing Under Parts C and D (§ 422.662 and § 423.651)
12. Burden of Proof, Standard of Proof, Standard of Review and Conduct of Hearing (§ 422.660, § 423.650, § 422.676, and § 423.658)
13. Expedited Contract Terminations Procedures (§ 422.510, § 423.509, § 422.664, § 423.652, § 422.644, and § 423.642) Under Parts C and D
14. Time and Place of Hearing Under Parts C and D (§ 422.670 and § 423.655)
15. Discovery Under Parts C and D (§ 422.682 and § 423.661)
16. Review by the Administrator Under Parts C and D (§ 422.692(a) and § 423.666(a))
17. Reopening of an Initial Contract Determination or Decision of a Hearing Officer or the Administrator Under Parts C and D (§ 422.696 and § 423.668)
18. Prohibition of MA and Part D Applications for 2 Years after a Mutual Termination (§ 422.503(b)(6) and § 423.504(b)(5))

B. Changes to Strengthen Beneficiary Protections

1. Broker and Agent Requirements Under Parts C and D
2. Beneficiary Communications Materials Under Parts C and D (§ 422.2260, § 423.2262, § 423.2260, and § 423.2262)
3. Required Use of Standardized Model Materials Under Parts C and D (§ 422.2262 and § 423.2262)
4. Involuntary Disenrollment for Failure to Pay Plan Premiums Under Parts C and D (§ 422.74 and § 423.44)

Another commenter argued that CMS should not state that the transition period will be “as determined by CMS,” but rather specify how the transition period will be measured. The same commenter wrote that if CMS does finalize the proposed requirement, we should not apply it to any acquisition prior to issuance of the rule, as the organization would have already taken action based on transition-related guidance in the 2008 and 2009 call letters.

Response: As stated in the preamble to the proposed rule, based on our experience, we believe that our proposed timeline for transitions provides ample time for organizations and sponsors to ensure that benefit packages are sufficiently different and to notify enrollees of any changes. Because the transition period actually applies for *19740 the two contract years following the year of the acquisition or merger, that is, if a merger takes place in 2010, the MAO or sponsor would have until 2013 to offer meaningfully different plans, we believe this period is disruptive neither to plans nor to beneficiaries, and thus disagree with the commenter who asserted that a 3-year transition was needed to allow MA organizations and Part D plan sponsors to adapt their benefit structures and communicate to beneficiaries about the changes being made.

We clarify that only organizations or sponsors that merge or are acquired after the effective date of this final rule will be subject to the requirement at § 422.256(b)(4)(ii) and § 423.272(b)(3)(ii) that their offerings are meaningfully different after a 2-year transition period. In the case of plans offered by organizations or sponsors that merge or acquire other plans prior to the effective date of this regulation, the previously articulated 3-year transition period would apply.

3. Non-Renewing Low-Enrollment Plans (§ 422.506(b)(1)(iv), § 423.507(b)(1)(iii))

As part of our process to streamline and simplify the plan selection process for beneficiaries, and ensure that beneficiaries are only offered plans with long-term viability, we proposed in § 422.506(b)(1)(iv) and § 423.507(b)(1)(iii) to include, as a specific ground for non-renewal of a contract, a finding that a Part C or Part D plan has failed to attract a significant number of enrollees over a sustained period of time. We justified this requirement on the grounds that, as a general matter, continuing such a low enrollment plan was not consistent with effective and efficient administration of the Medicare program for purposes of section 1857(c)(2)(B) of the Act (incorporated for Part D under section 1860D-12(b)(3)(B) of the Act), which provides authority to terminate a contract under such circumstances. In the preamble to the proposed rule, we acknowledged that there may be instances in which low enrollment over a sustained period of time is a function of the type of beneficiaries served, geographic location, or other circumstances, and that we would consider continuing to renew a low enrollment plan in such situations including, but not limited to, chronic care SNPs offering health care services especially tailored to this category of beneficiaries and not available elsewhere or employer group health plans offering benefits augmenting those of an MA plan to employees of a small business. We further stated that, if a case could be made that low enrollment is justified, and the absence of such a plan would significantly limit beneficiary health care options in a service area, consistent with effective and efficient administration of the Part C or Part D benefit, we would not non-renew that plan. Similarly, we also stated that the threshold for low enrollment could fluctuate, although we noted that we used a threshold of 100 enrollees for purposes of reducing the number of low enrollment plans for contract year 2010. Therefore, we did not propose to revise our regulations to specify a specific threshold. We solicited comments on this approach and whether we had provided sufficient clarity on how we would determine whether a low-enrollment plan would be non-renewed.

Comment: Several commenters supported the proposal to non-renew low enrollment plans, but recommended that the threshold and guidelines we would use to apply this requirement (including such factors as the number of plans in a market, plan enrollment, and the number of years of operation with low enrollment numbers) be clear and transparent, and that they be made available publicly early in the year preceding the contract year to which they will apply. One commenter wrote that CMS should convene a working group prior to enacting our proposed policy to non-renew low enrollment plans. Another commenter wrote that CMS should consider low enrollment to be in the 250 to 500 enrollee range rather than 100 enrollees (the number used in our efforts to reduce low-enrollment plans for contract year 2010, as detailed in the preamble to our proposed rule). Another recommended a low enrollment threshold of 1000 enrollees because it believes that plans serving fewer than 1000 people in a service area would be unable to offer negotiated savings, quality managed care, or popular plan features. A commenter asked CMS to clarify what is meant by “a small number of enrollees over a period of time.”

Response: We agree that guidelines concerning minimum enrollment thresholds and criteria should be published annually and as early as possible in the year preceding the contract year to which they will apply. While we disagree that we should specify thresholds in regulations, we intend to provide opportunities for the public to review and comment on our proposed thresholds and criteria for assessing low enrollment for the following contract year (for example, through our annual call letter). We recognize that we must be flexible in assessing minimum enrollment to ensure that plans with legitimate reasons for low enrollments, such as lack of other health care plan options, specialized plan offering (such as, a chronic care SNP), or recent establishment of the plan, may continue to operate and that beneficiaries who might not otherwise have access to health care options offered by a low-enrollment plan will continue to have such access. Because we intend to provide for public input annually on our implementation guidance and will consider the suggestions for specific threshold amounts submitted by the commenters in that context, we do not believe the suggested “workgroup” to be necessary. With respect to the question of what constitutes “a small number of enrollees” over a period of time, the process described above may also be used to determine the number of enrollees that would trigger application of this regulation, as well as the period of time for which the small number would have to be sustained.

Comment: Another commenter recommended that CMS make clear that the length of time a plan has had low enrollment will be a primary factor in determining whether a plan is non-renewed, and that we should modify our regulations language to explicitly provide for “waivers” of the proposed requirement at § 422.506(b)(1)(iv) (§ 423.507(b)(1)(iii) for Part D plans) when special circumstances such as the type of beneficiaries served, geographic location, and absence of the plan would significantly limit beneficiary health care options in a service area.

Response: The length of time in which a plan has had low enrollment is only one of the factors that we will consider in determining whether it is consistent with effective and efficient administration of the Part C or Part D benefit. We will also consider the type of benefits being offered under the plan and the nature of the enrollment in the plan. As stated above, we recognize that we must be flexible in applying any minimum enrollment requirement to ensure that plans with legitimate reasons for low enrollments, such as lack of other health care plan options, specialized plan offering or recent establishment of the plan, may continue to operate. This flexibility will ensure that beneficiaries who might not otherwise have access to health care options offered by a low-enrollment plan will continue to have such access. Because we intend to apply this requirement in a flexible manner that considers the particular circumstances of each low enrollment plan, we do not ***19741** believe it is necessary to modify the proposed regulations at § 422.506(b)(1)(iv) and § 423.507(b)(1)(iii) to provide explicitly for “waivers” of this requirement.

Comment: A commenter recommended that non-renewed plans be permitted to passively enroll affected enrollees into another plan offered by the MA organization or Part D sponsor.

Response: With respect to the recommendation to provide for passive enrollment of beneficiaries in a non-renewed plan into another plan offered by that organization, we believe this is appropriate only in limited circumstances when a compelling case can be made that such passive enrollment is in beneficiaries' best interests. In making such determinations, we take into consideration criteria such as benefits, cost sharing, the provider network, and premiums to ensure a comparable plan offering. In all other cases, we believe it is most appropriate to leave enrollment decisions to beneficiaries, who will have an opportunity during the annual coordinated election period to select another MA plan or Part D plan offered by the MA organization or Part D sponsor offering the plan being terminated. If a plan is terminated or nonrenewed, the affected organization or sponsor must follow all beneficiary and CMS advance notification requirements as specified in §§ 422.506, 422.508, 422.510, and 422.512 (MA program regulations), §§ 423.507, 423.508, 423.509, and 423.510 (Part D program regulations) and related guidance for both programs. In addition, passive enrollment initiated by an organization or sponsor in the absence of CMS approval is not among the transactions permitted by us in our annual renewal/non-renewal guidance. Because of these requirements and policies, an MA organization or Part D sponsor wishing to enroll members from the terminating or non-renewing plan into another of their plans could not do this without prior CMS review and consent. If we were to determine that such a transaction was in beneficiaries' best interests, we would, as is our practice, facilitate and closely monitor the process. We note as well

that beneficiaries in terminated or non-renewed plans have guaranteed issue Medigap rights, access to information about other available health care options, and other information that will assist them in finding plans most suited to their needs.

Comment: Several commenters supported our proposal but asked that we make exceptions for SNPs. One commenter requesting the SNP exception wrote that “status as a SNP should be prima facie evidence that low enrollment is justified.” A few of these commenters specifically requested that such exceptions be codified in the final regulations text. One commenter requested an exception be made for employer group plans. One commenter requested an exception for MA-only plans, stating that enrollees who get their prescription drugs through some means other than an MA-PD should still have the option of remaining in an MA-only plan, and another commenter requested that “national” plans be exempted from these requirements.

Response: While we will consider exceptions on a case-by-case basis to any low-enrollment thresholds we establish, we do not believe it is necessary to exempt any specific plan type as a priority. As we stated in the preamble to the proposed rule, there may be reasons for exceptions based on plan type, geography, or special health conditions of enrollees served that warrant a waiver of the requirements. However, a specific plan type, for example, a SNP or employer group plan, will not automatically be exempt from the minimum enrollment standard for renewal due to plan type alone. While sustained low enrollment may well be justified in the case of certain SNPs serving individuals with a relatively rare condition, a SNP serving an individual with a more common disease such as diabetes, or serving dual eligibles, should be able to attract enrollees. Similarly, we do not believe there is justification for exempting MA-only plans or “national” plans from the requirements unless there are other reasons to exempt them (for example, lack of other health care plan options, the specialized nature of the plan, or the recent establishment of the plan).

4. Medicare Options Compare and Medicare Prescription Drug Plan Finder

In the proposed rule we asked for comments on ways to improve the web tools, Medicare Options Compare (MOC), and the Medicare Prescription Drug Plan Finder (MDPF). We summarize and respond to these comments below.

Comment: One commenter requested that CMS add a function to limit the information that can be seen in the MOC so that users of the tool can focus on information they need most.

Response: The 2011 contract year update will include functions that expand and collapse which will help users of the MOC better focus on specific information.

Comment: Another commenter asked that the MOC contain direct links to the plan(s) discussed, not just the organization's Web site as is now often the case.

Response: We are not making the suggested change at this time as we believe that MOC already includes sufficient information to contact plans.

Comment: Another commenter requested that the tool clearly indicate what is meant by an “enhanced plan,” even if this is just a general description in the tool of the typical features of an enhanced plan.

Response: We do not believe that revisions are necessary as information on enhanced plans is currently available in the glossary and at <http://www.medicare.gov/medicarereform/howtoread.asp>.

Comment: A commenter requested that CMS add back the search function in MPDPF notifying the user of the number of drugs covered by a particular plan. The same commenter requested that information be included about when a plan last updated its drug pricing information and that the tool includes information about coverage of drugs traditionally covered under Part B, for example, infused and injectable drugs for MA-PD plans.

Response: Currently the drugs an individual beneficiary takes may be entered and displayed to determine coverage, but the MPDPF does not permit display a list of all the drugs a plan covers as this would take a very long time for the tool to display. CMS reviews drug pricing on a regular basis and the data is updated monthly to reflect any changes. We believe the compare function best permits users to tailor their searches for the specific drugs in the specific forms that they need.

Comment: Another commenter wrote that the MOC is relatively thorough but inconsistent in that some plans in the tool do not include information about health care costs and that saved searches often yield different results when retrieved later. The commenter recommended that the tool be refined to allow the user to move easily back and forth between information for MA and Part D plans, that the conditions required for enrollment in a chronic care SNP be specified, and that the function concerning costs for tiers of drugs is “incredibly unfriendly and confusing.”

Response: We are considering how best to streamline and make the use of these comparative functions easier.

***19742 D. Changes To Improve Payment Rules and Processes**

This section addresses three payment issues under Part C. These provisions are outlined in Table 4.

Table 4^Improving Payment Rules and Processes

Provision	Part 417/422	Part 417/422	Part 423	Part 423
	Subpart	Section	Subpart	Section
Risk Adjustment Data Validation	Subpart F	§ 422.2	N/A	N/A.
Dispute and Appeals Process	Subpart G	§ 422.311		
Payments to Medicare Advantage Organizations- Actuarial Valuation	Subpart F	§ 422.254	N/A	N/A.
Determination of Acceptable Administrative Costs by HMO/CMP Cost Contract and Health Care Prepayment Plans (HCPPs)	Subpart O	§ 417.564	N/A	N/A.
Calculation of the Minimum Percentage Increase under Part C	Subpart G	§ 422.306	N/A	N/A.

1. Definitions Related to Risk Adjustment Data Validation Appeals (§ 422.2) and Addition of Medicare Advantage Organization Risk Adjustment Data Validation^Dispute and Appeal Procedures (§ 422.311)

In the October 22, 2009 proposed rule, we proposed regulations establishing an appeals process to be used by MA organizations to appeal the error calculation resulting from Risk Adjustment Data Validation (RADV) audits. As explained in the preamble of that proposed rule, under RADV audits and medical records are reviewed to determine whether they support diagnosis codes (known as Hierarchical Condition Codes, or HCCs) submitted to us under the MA risk adjustment methodology. Under this methodology, certain diagnosis codes are considered to signify higher costs for the enrollee, and therefore, we pay a higher amount to the MA organization for an enrollee to reflect these higher costs. If, in fact, a diagnosis code was not justified by the enrollee's medical condition, the higher payment amount associated with that diagnosis code would have been an overpayment. Under the RADV audit process we plan to recover the overpayments identified during the RADV audit. The appeals process we proposed in the October 22, 2009 proposed rule was intended to provide a mechanism for MA organizations to appeal the error calculation associated with the overpayments identified under RADV audits. We invited and received a large number of comments from health plans, managed care industry trade associations, and other interested parties regarding not only the proposed appeals process, but on the RADV audit process and underlying MA payment policy producing the overpayment

findings and our definitions proposed at § 422.2. Since neither the statute nor existing MA program regulations currently specify a process for appealing overpayments resulting from RADV audits, the appeals process we proposed was based on our authority to establish MA program standards by regulation at section 1856(b)(1) of the Act. Specifically, we proposed adding a new § 422.311 to part 422, subpart G, to specify RADV dispute and appeal rights for MA organizations. We proposed regulatory provisions allowing MA organizations that undergo RADV audit(s) to[^](1) submit physician and other practitioner signed attestations relating to physician and other outpatient medical records that had a missing signature, or credentials that resulted in a payment error finding; (2) dispute certain other types of medical record review-related findings through the use of a documentation dispute process; and (3) appeal our RADV payment error calculation. By availing themselves of these RADV dispute and appeal processes, we noted that MA organizations would be able to reduce their RADV payment error and thereby, reduce their overall estimated MA payment error. Therefore, we proposed the following provisions under part 422:

- To revise § 422.2 to add definitions of six terms that pertain to RADV activities, and thus to our proposals for implementing a RADV dispute and appeal processes.
- A new § 422.311 describing procedures that we would implement to afford MA organizations facing a potential overpayment determination resulting from RADV audits the opportunity to have certain potential RADV payment errors addressed in advance of RADV-audit-related payment error determinations, and to have other types of confirmed payment errors overturned. At § 422.311(a) and (b), we summarized the RADV audit procedures. Beginning with § 422.311(c), we proposed implementing a three-pronged RADV dispute and appeal procedure that MA organizations could employ to reduce their RADV payment error rate, including[^]
- Physician/practitioner attestation(s);
- Documentation dispute; and
- RADV payment error calculation appeal.

We noted that analysis of data originating from medical records submitted by MA organizations that have undergone RADV audit indicates that a substantial percentage of medical record-related payment error determinations are due to missing signatures or credentials on medical records. Medicare program rules dictate the necessity of physician signatures on medical records, and MA risk adjustment requirements dictate that risk adjustment diagnosis data be accepted only for health services that were provided by certain physician specialties. Therefore, RADV audit procedures require that, in addition to finding diagnosis information that would support the HCCs submitted by the MA organization for risk adjustment purposes, physician signatures, and appropriate credentials must be present on medical records. Medical records with missing signatures or credentials are scored as errors under RADV audit procedures. We estimated that if given the opportunity to do so, many physicians and other practitioners that provided the diagnosis information on RADV-reviewed medical records would in fact attest that they documented the information in these medical records, even though signatures and credentials were missing from those records. Moreover, the presence of a signature or credential attestation to accompany these medical records would in our opinion, provide justification for preventing both contract-level and national-level RADV payment errors ***19743** that would otherwise originate from medical record signature, or credential-related discrepancies.

Therefore, in proposed § 422.311(c)(1), we proposed to implement a process that would allow MA organizations to voluntarily submit CMS attestations (that is, attestations developed and pre-populated by CMS). These attestations would be signed by physicians/practitioners who would attest responsibility for providing and documenting the health services in the physician and outpatient medical record(s) that were submitted for RADV audit. We specified at proposed § 422.311(c)(1)(ii) and (iii) that MA organizations would be eligible to use attestations to address signature or credential-related discrepancies only from physician or outpatient medical records; attestations would not be allowed to address signature or credential-related discrepancies found on inpatient medical records. The proposed use of an attestation would not in any way supplant the medical record, nor would

it permit attesting physicians/practitioners to alter the existing medical record. Attestations would not be acceptable to address any issues outside of the RADV-audit process.

At proposed § 422.311(c)(1)(C)(iv), we indicated that we would prospectively notify MA organizations that if the “one best” medical record used to validate an audited HCC were missing a physician/practitioner signature or credential, the MA organization would be permitted to submit a CMS-RADV attestation along with the medical record, to fulfill the requirement that medical records contain physician/practitioner signatures and credentials.

We described the proposed process that we would jointly undertake to review attestations submitted for our review at proposed § 422.311(c)(1)(iv) and (v), noting the following:

- Only CMS-generated attestations that meet certain requirements described at § 422.311(c)(1) and (d) would be eligible for consideration. Failure to meet these requirements would result in us not reviewing or accepting submitted attestations.
- CMS attestations that have been altered or amended (for example, striking out prepopulated words and replacing them with hand-written replacement words) without instruction or written concurrence from us would not be accepted.
- Attestations would need to accompany the medical record at the same time that the medical record was submitted to us for RADV audit. MA organizations would not be permitted to submit attestations before or after submission of their RADV medical records.
- Attestations would need to originate from the physician/practitioner whose medical record accompanies and corresponds to the attestation. We would not accept attestations or medical records from any party other than the MA organization.
- Organizations would not be permitted to submit attestations during the documentation dispute or RADV reconsideration processes described at § 422.311(c)(2) and § 422.311(c)(3).

At proposed § 422.311(c)(1)(iv), we described the process that we would undertake to review attestations and notify appellant MA organizations of the results of these attestation reviews. Our attestation review determinations would be final and binding upon both parties and would not be eligible for further appeal.

We further proposed affording MA organizations the option of disputing other nonsignature or credential-types of RADV-related medical record diagnosis coding discrepancies via a proposed documentation dispute process that we described in new paragraph § 422.311(c)(2). Under our proposal, in order to be eligible for documentation dispute, MA organizations would need to submit their “one best” medical record in accordance with RADV medical record submission deadlines established by us during the RADV medical record request process.

At proposed § 422.311(c)(2)(a), we specified the types of RADV-related errors that would be eligible for the proposed documentation dispute process. The documentation dispute process would apply only to the errors that arise out of operational processing of medical records selected for RADV audits and submitted to us by established deadlines. In this context, errors that arise from operational processing mean errors that arise from the collection and processing of medical records for a RADV audit.

At § 422.311(c)(2)(ii), we proposed limitations that we would impose upon the documentation dispute process; namely that MA organizations would not be permitted to dispute any medical record coding discrepancies, nor would MA organizations be permitted to submit altogether new medical records in place of previously submitted medical records. Payment errors that resulted from missing medical records would not be eligible for documentation dispute. At proposed § 422.311(c)(2)(iii) and (iv), we indicated that we would prospectively notify MA organizations of RADV payment errors that would be eligible for documentation dispute, describe the documentation dispute process that we would undertake, along with the process that we would undertake to notify MA organizations of the results of documentation dispute reviews. As described at proposed §

422.311(c)(2)(v), our documentation dispute review determination would be final and binding upon both parties and would not otherwise be eligible for further administrative appeal.

Proposed § 422.311(c)(3) would establish an appeals process under which RADV payment error calculations would be subject to appeal. Unlike our proposed attestation process described at § 422.311(c)(1), and proposed documentation dispute process describe at § 422.311(c)(2), which would afford MA organizations the opportunity to dispute aspects of our medical record review process, the proposed RADV payment error calculation appeal process was specifically designed to afford MA organizations the opportunity to appeal our contract-level RADV payment error calculation. Under the proposed RADV payment error calculation appeal process, we proposed establishing a three-level appeal process whereby MA organizations may^

- Seek reconsideration;
- Appeal the reconsideration decision to an independent CMS Hearing Officer; and
- Appeal the decision of the independent CMS Hearing Officer to the CMS Administrator.

Given the complexity of RADV audits in general, and the calculation of RADV-related error rates in particular, we stated our belief that it was prudent to afford appellant MA organizations multiple-layers of RADV-related payment error appeal.

At proposed § 422.311(c)(3)(ii), we also specified that MA organizations would not, under the proposed RADV payment error calculation appeal process, be permitted to appeal medical record review errors, nor would MA organizations be permitted to seek formal appeal of physician or practitioner signature or credential-related review errors. We believed that medical record review-related issues would be addressed as a result of the rigorous medical record review process, and the attestation and documentation dispute processes described earlier in the proposed regulation. In accordance with our proposed regulation at § 422.311(c)(3)(i), the RADV payment error calculation appeals process would only apply to errors identified in the RADV payment error calculation. MA organizations would not be permitted to ***19744** utilize the payment error calculation appeal process as a method for submitting any medical records for consideration in the calculation of the payment error. In order to be eligible for RADV payment error calculation appeal, MA organizations would need to adhere to established RADV audit requirements, including the submission of medical records in the manner and by the deadlines specified by CMS.

Furthermore, we noted that MA organizations would not be permitted to appeal our RADV payment error calculation methodology. Our justification for excluding methodological appeals was two-fold. First, we said the methodology that we planned to employ to calculate RADV payment errors was methodologically sound and academically defensible. We stated that we intended to ensure that all MA organizations understand the RADV payment error calculation methodology by providing annual notice to all MA organizations of the methodology that will be employed for calculating Part C payment errors. MA organizations that object to CMS' RADV payment error calculation methodology would be given an opportunity to provide comment to us under ours annual notice of RADV audit methodology. Second, in addition to providing an annual notice of RADV audit methodology, we stated that we would provide an expanded explanation of methodology as part of each RDV audit report that we send to MA organizations that undergo RADV audit. Included in this expanded explanation of methodology would be RADV payment error calculation factors unique to each audited MA organization that would enable the MA organization to independently calculate its own RADV payment error.

At proposed § 422.311(c)(3)(iii) and (v), we specified that MA organizations would be notified of their RADV payment error calculation appeal rights at the time we issue a RADV audit report to that organization. MA organizations would have 30 calendar days from the date of this notice to submit a written request for reconsideration of its RADV payment error calculation. A request for reconsideration would need to specify the issues with which the MA organization disagrees, the reasons for the disagreements and explain why the organization believes the issues are eligible for reconsideration. The request for reconsideration would need to include additional documentary evidence that the MA organization considers material to the reconsideration, though

MA organizations would be prohibited from submitting medical record-related evidence such as new or previously submitted medical records or physician or practitioner attestations and from appealing any issues pertaining to the methodology applied in any part of the RADV audit. At proposed § 422.311(c)(3)(iv), we further specified that the MA organization would bear the burden of proof to demonstrate that our RADV payment error calculation was clearly incorrect.

We described our proposal regarding the conduct of a RADV payment error calculation reconsideration, the decision of the reconsideration official and the effect of the CMS reconsideration decision official at proposed § 422.311(c)(3)(e) and (f).

At proposed § 422.311(c)(3)(v) and (vi), we described the first level of RADV payment error calculation appeal, the request for reconsideration of our RADV payment error calculation. Under this process a CMS official or our contractor not otherwise involved in error-rate calculation activity would review our RADV payment error calculation and any written evidence submitted by the MA organization that pertains to CMS' RADV payment error calculation, recalculate the payment error utilizing our RADV payment error calculation methodology (as specified in our standard operating procedures), and render a determination whether the RADV payment error calculation was accurate. This CMS official or CMS contractor not otherwise involved in RADV error-rate calculation activity would recalculate and arrive at an independent RADV payment error. Whether the official or contractor agreed with our payment error calculation, or overturned the calculation and established a new RADV payment error, this party's RADV payment error calculation determination would be issued to a CMS reconsideration official. The CMS reconsideration official would review their analysis and make a determination whether to accept or reject the findings of the CMS official or CMS contractor that recalculated the RADV payment error. In instances when the CMS official or contractor recommended overturning CMS' RADV payment error calculation and the reviewing CMS reconsideration official agreed with the newly calculated RADV payment error, we would issue a reconsideration decision which informed the appealing MA organization in writing of its reconsideration decision, in effect, notifying the MA organization of its new RADV payment error. If the reconsideration official upheld the decision of the CMS official or contractor to sustain our initial RADV payment error calculation, the reconsideration official similarly would notify the appellant MA organization of its determination. In either instance, the decision of the reconsideration official would be final and binding, unless a request for hearing was filed by CMS or the appellant MA organization.

At proposed § 422.311(c)(4), we clarified that if CMS or an MA organization were dissatisfied with the decision of the CMS reconsideration official described at § 422.311(c)(3), CMS or the MA organization would be permitted to request a second-level RADV payment error calculation appeal, which is a hearing on the RADV payment error calculation determination. CMS or MA organization choosing to pursue a hearing would be required to file a request for hearing within 30 calendar days of the date the MA organization received the written RADV payment error calculation reconsideration decision, as described at proposed § 422.311(c)(3)(vi).

We noted that CMS or MA organizations requesting a hearing would need to do so in writing, including a copy of the CMS reconsideration official's decision to either uphold or overturn the initial RADV payment error calculation, and specify the findings or issues in that reconsideration decision that they disagreed with and why they disagreed with them. The hearing would be conducted by the CMS Office of Hearings and presided over by a CMS Hearing Officer who neither receives testimony nor accepts any new evidence that was not presented with the request for reconsideration of the RADV payment error calculation. The hearing would be held on the record, unless the parties requested, subject to the Hearing Officer's discretion, a live or telephonic hearing. The Hearing Officer would also be permitted to schedule a live or telephonic hearing upon their own motion. The CMS Hearing Officer would be limited to a review of the record that was used for the initial RADV payment error calculation and the reconsidered RADV payment error calculation.

Additionally, we noted that the Hearing Officer would have full power to make rules and establish procedures, consistent with the law, regulations, and CMS rulings. These powers would include the authority to take appropriate action in response to failure of an organization to comply with such procedures.

At proposed § 422.311(c)(4)(iv), we also indicated that the CMS Hearing Officer would review and decide ***19745** whether the reconsideration official's decision was correct and to notify CMS and the MA organization in writing of his/her decision, explaining the basis for the decision, which would be final and binding, unless the decision was reversed or modified by the CMS Administrator in accordance with § 422.311(c)(5).

We explained that the third level of RADV payment error calculation appeal that MA organizations can request would be discretionary review by the CMS Administrator. We described this proposed process at § 422.311(c)(5). At this level of appeal, CMS or the MA organization would be permitted to appeal the decision of the CMS Hearing Officer by requesting that the CMS Administrator review the CMS Hearing Officer's determination. Parties requesting CMS Administrator review would have to request the review within 30 calendar days of receipt of the CMS Hearing Officer's determination. If the Administrator agreed to review the case, the Administrator would review the Hearing Officer's decision as well as any other information included in the record of the Hearing Officer's decision and would determine whether to uphold, reverse, or modify the CMS Hearing Officer's decision. The Administrator's determination would be final and binding.

We also noted that, based on our experience with appeals of MA and Medicare Part D program contract determinations, we have determined that it would be necessary for us to establish a “compliance date” to use as a reference point in issuing a ruling regarding RADV audit findings. Therefore, we proposed at § 422.311(b)(2), to require that the compliance date for meeting Federal regulations requiring MA organizations to submit medical records for the validation of risk adjustment data (§ 422.310(e)) also be the due date when MA organizations (or their contractor(s)) selected for RADV audit would need to submit medical records to us. We stated we would inform an MA organization in writing regarding selection for RADV audit, including the due date for submission of medical records.

We invited and received a large number of comments from health plans, managed care industry trade associations, and other interested parties regarding not only the proposed appeals process described in proposed § 422.311^but also the RADV audit process and underlying Medicare Advantage payment policy. These comments have resulted in changes to our above-described proposals as discussed below.

While many comments that we received relate to the underlying RADV audit process and risk adjustment methodology and may not directly address the RADV appeals process specifically, we are responding to these comments, because they appear to be relevant to the RADV appeals process that we had proposed in our Notice of Proposed Rulemaking. Certain comments were outside the scope of our proposed rule and we have not included responses to those comments.

Comment: A comment alleged that it was premature for CMS to propose rules related to the RADV appeals process because the commenter stated that the Administrative Procedure Act (APA) required that the underlying RADV audit process giving rise to the overpayments that would be appealed under our proposed regulations be subjected to notice and comment rulemaking.

Response: We disagree and believe that the RADV audit process does not establish any substantive rules within the meaning of the APA or section 1871 of the Act, but rather is a means for ensuring that payments made to MA organizations comply with substantive rules governing MA payments that are set forth in the statute, and in regulations that have been subjected to notice and comment procedures. Regulations specifying that payment amounts are subject to audit (for example, § 422.504(d)(1)(i) have been subjected to notice and comment procedures, and provide ample notice of the fact that we have the right (and, indeed, the duty) to ensure that MA payment amounts are accurate. See also, § 422.310(e), which states that MA organizations and their providers and practitioners will be required to submit a sample of medical records for the validation of risk adjustment data, as required by CMS, and that there may be penalties for submission of inaccurate data.

Indeed, we would point out that throughout the Medicare program, and government programs generally, audit policies and procedures intended to ensure or verify payment accuracy assist in the enforcement of rules, and are not themselves substantive rules subject to APA notice and comment procedures. Therefore, to the extent we are providing a RADV appeals process, we are

providing an opportunity that does not currently exist for MA organizations to appeal audit findings that they would otherwise not have been permitted to question.

Comment: Some commenters stated that CMS did not follow proper procedures and stated that procedures set forth in our proposed regulations, such as our “one best medical record” and other documentation requirements, established a substantive legal standard governing the payment to MA organizations, and therefore, they had to be included in the annual notice of changes to payment methods required under section 1853(b)(2) of the Act, which requires that MA organizations be afforded an opportunity to comment on changes in the methodology for determining MA payments.

Response: We disagree. The requirement in section 1853(b)(2) of the Act to provide an advance notice of methodological changes to MA organizations of proposed changes to the methodology and assumptions used to compute annual MA capitation rates pertains to the methodology for determining the proper amount of payment. All substantive changes to the risk adjustment methodology at issue in the RADV audit process have been described in the annual advance notice. The RADV audit process and appeals procedures proposed in the October 22, 2009 proposed rule do not make any substantive changes in the methodology for determining MA payment amounts. Rather, they are designed to ensure that this payment methodology has been applied correctly, and the MA organization has received the amount to which it was entitled under this methodology. The risk adjustment methodology provides that a specific amount be paid if an enrollee has a particular condition. The RADV audits and appeals process are designed to ensure that the enrollee in fact has that condition, and that the MA organization is thus entitled to the amount that has been paid for that condition. The fact that audits might determine that an MA organization was not, in fact, paid correctly, is not a change in methodology or assumptions related to how the payment amount is to be determined and therefore is not subject to the advance notice requirements under section 1853(b)(2) of the Act. Nonetheless, in our October 22, 2009 proposed rule, we proposed to provide notice of RADV audit methodology to the public, as well as a summary of RADV methodology issues for each audited MA organization at the time we issue our audit finding pursuant to an actual RADV audit. We offered to provide details of our RADV audit methodology in an attempt to provide additional transparency related to the process. We anticipate providing additional notice of RADV audit methodology to the public by publishing the methodology in some *19746 type of Medicare program document^most likely in a Medicare manual later this year (2010).

Comment: A commenter stated that CMS was not complying with requirements in section 1871(a)(2) of the Act, which states that “No rule, requirement, or other statement of policy (other than a national coverage determination) that establishes or changes a substantive legal standard governing the scope of benefits, the payment for services, * * * shall take effect unless it is promulgated by the Secretary by regulation* * *”

Response: As discussed previously, the RADV audit process, and the appeals procedures addressed in this rulemaking, do not “establish” or “change” any “substantive legal standard governing * * * payment.” To the contrary, they are designed to ensure that the substantive legal standards for payment set forth in the statute and regulations are correctly applied. The substantive rules governing the amount of payment to which the MA organization is entitled are unchanged as governed by statute and implementing regulations.

Comment: A commenter urged that CMS suspend RADV audits until such time as CMS subjects the rules to notice and comment rulemaking.

Response: As discussed previously, we do not believe subjecting the RADV audit process to rulemaking is required or appropriate, there would be no basis for suspending the audit process.

Comment: One commenter noted that when the risk adjustment system was initially established, the Secretary was required to submit a report to Congress in accordance with section 1853(a)(3)(A) of the Act that documented the proposed method of risk adjustment of MA payment rates, and that included an evaluation of the method by an outside, independent actuary of the actuarial soundness of the proposal. The commenter believed that such an evaluation was required in the case of the RADV audit process.

Response: We disagree that RADV audits impact the risk adjustment system in any manner. As indicated earlier, RADV audits are solely to verify that the risk adjustment methodology is being correctly applied.

We also received a large number of comments from MA organizations, managed care trade associations and a law firm regarding RADV methodological-related issues. While some comments were not relevant to the rules that CMS proposed regarding the RADV appeals process, there were a number of comments that we believe should be addressed, and as such, we do so as follows.

Comment: Many commenters recommended that CMS independently test and validate its RADV methodology before CMS implements it. The commenters indicated that CMS failed to provide any record of submitting its methodologies to an academic review and that if CMS has done so, we should have included such studies with the proposed rule so that interested parties could review and comment on any of these academic studies. The commenters recommended that CMS provide a process that permits thorough review and comment by plans of RADV audit methodology issues before undertaking further RADV audits. Several commenters further recommended that all methodological issues pertaining to RADV audits be appealable.

Response: Previously in this preamble we indicate that the process of independently reviewing medical records to validate risk adjustment data submitted by MA organizations for payment purposes has been established and operational for more than 10 years. Over the course of this timeframe, we have been advised on the RADV process by statisticians, senior analysts, expert medical record coders, physicians, managed care professionals, and other health care providers. From a medical record coding perspective, we have secured expert direction from Peer Review Organizations (PROs) (in the past) and Quality Improvement Organizations (QIOs) (currently) by incorporating them into the RADV team. From an analytic design and implementation perspective, we have in the past and continue to employ senior level expert analysts from different academic fields as independent contributors to the RADV operations team to review and validate the accuracy of the findings across the RADV process, including peer review of statistical sampling and payment error calculation methodologies. The independent expert analysis and review is similar to that conducted in an academic setting in that the participating parties are credentialed in a specific field of study, such as statistics, and possess substantial years of expertise conducting similar processes and analyses. The independent methodology review processes also involve the use of internal controls, and tests for consistency and accuracy. RADV procedures are subject to the evaluation requirements of the CMS Annual Financial Audit.

In addition, the RADV methodology that we employ in the process of reporting a component of the national Part C payment error is similar to the methodological approach that we employ in conducting contract-specific RADV audits and error calculations. This methodology has been reviewed and approved by officials at the HHS.

This notwithstanding, in considering the commenters' questions, where necessary, we will incorporate additional independent third party review for purposes of validating RADV error-calculation methodology. As indicated in our proposed rule and cited elsewhere in the preamble to this final rule, we intend to publish its RADV methodology in some type of public document—most likely, a Medicare Manual, so that the public can review and provide comment as it deems necessary. Finally, to ensure that audited organizations understand how their RADV error rate was calculated, as indicated in our proposed rule, we further intend to describe our RADV methodology in each audited organization's RADV audit report.

Given these efforts to ensure that the RADV process is transparent to audited MA organizations and the public, and that the methodology used under that process is reasonable, consistent, and accurate, we do not believe any further action is required.

Comment: Several commenters argued that CMS should include Medicare plan enrollees for whom no diagnosis code was submitted under the risk adjustment methodology as part of its RADV error testing samples. These commenters also recommended that CMS include “under-coding” findings in the audit error estimates in order to more accurately account for members' health status.

Response: Our RADV audit policy does account for both underpayments and overpayments. The RADV process addresses under-coding through the application of rules for crediting a sampled enrollee with additional HCCs that are identified incidentally, during medical record review. We emphasize that these “additional” diagnoses were not originally submitted for payment for enrollees selected in the sample, and yet we provide audited organizations credit through our RADV medical record review process.

However, we have not and do not expect to sample enrollees for whom no HCCs were submitted. This is because the RADV is an audit process that is intended to validate the HCCs that were submitted by MA organizations in order to determine whether the additional payment amounts associated with these *19747 diagnosis codes were properly made. Under our separate Risk Adjustment Data Submission Process, the data submission period for any given payment year is lengthy and extends beyond the actual payment year, providing a substantial amount of time for organizations to submit and/or correct enrollee HCC risk adjustment data for any given payment year^to reflect of enrollee health status. This is sufficient time for plans to submit data on all their enrollees, including those with no HCCs. The RADV audit process is not intended to serve as a de facto mechanism for extending the HCC data submission deadlines under which MA organizations operate.

We received a number of comments from MA organizations and a law firm regarding the financial impact of RADV audits. While these comments did not pertain directly to our proposed RADV appeals procedures, some comments nevertheless indirectly impact the RADV appeals rules. Therefore, we respond to several of these comments here.

Comment: Several commenters suggested that CMS's proposed methodology to calculate and apply error rates and payment adjustments across contract years after payments were made undermines the actuarially-based risk assumptions inherent in Plans' bid submissions.

Response: Regarding the assertion that RADV audits undermine the Part C bidding process, beginning with the introduction of the HCC risk adjustment model for CY 2004, we have published clear guidelines to be followed by MA organizations in the collection and support of diagnosis codes underlying risk scores for plan enrollees. In their preparation of a MA bid, certifying actuaries are expected to ensure that the underlying data are reasonable and appropriate for the circumstance, including the base year risk scores. If the ultimate risk scores for a plan's population are lower than initially forecast by the certifying actuary, then the plan is likely to experience lower than expected margin. Conversely, if the ultimate risk scores for a plan's population are higher than initially forecast by the certifying actuary, then the plan is likely to experience greater than expected margin. These results illustrate the nature of health plan capitation and the risk borne by MA organizations.

Comment: Commenters stated that the establishment of an audit methodology that involves retrospective contract-level payment adjustments creates the potential for unpredictable retroactive liability that MA organizations could not have considered in developing bids for affected prior years. Commenters suggested that CMS' sampling methodology undercuts the mandate in section 1854(b)(6)(B)(iv) of the Act that MA organizations' rates reflect the revenue needs of the organization. The commenters assert that MA organizations did not develop bid submissions for calendar years 2006 through 2009 with an expectation that CMS would implement contract-wide payment adjustments based on provider documentation issues outside of the MA organizations' control. As a result, if payments effectively are reduced retroactively as the result of RADV audits, the bid submissions (and resulting payments) arguably would not adequately reflect Plans' risks, and MA organizations may be forced to dip into their reserves to repay dollars that were not anticipated to be at risk.

Response: We disagree. If plan bids are developed based on faulty data, such as inappropriate claim costs or risk score data, there is a greater likelihood of error in the bid projection. There are many factors that influence the accuracy of bid projection, and data quality is just one such factor. There is no legal authority to change a bid amount after it has been accepted regardless if additional information suggests that the bid is too high or too low.

In general, it is our belief that health plans are confusing actuarial equivalence in payment amount^ which demographic adjustments, risk adjustment methodology, and coding intensity adjustment are all designed to achieve^ with differences in

the way costs are documented. Because MA organizations are paid on a capitation basis, costs are not covered for a specific service provided. Rather, they are based on the actuarial value of such costs. The risk adjustment methodology uses diagnosis codes as a proxy for higher costs associated with a particular diagnosis. Because, under original Medicare, costs of specific services received are reimbursed, the diagnoses leading to such costs being incurred have a different relevance under original Medicare than they do under the Medicare Part C payment system. The risk adjustment methodology and RADV audit process that we employ to ensure accuracy under Medicare Part C actually further actuarial equivalence, rather than conflicting with it. The differences between MA and original Medicare are simply attributable to differences in how payment is made. It is these differences that necessitate the actuarial equivalence standard in the first place.

Comment: Several commenters questioned whether CMS's RADV medical record review coders have the qualifications and experience necessary to code RADV-related medical records. Commenters specifically questioned whether RADV coders were equipped to code accurately in situations in which clinical training may be required in order to recognize all extractable ICD-9 codes. They inquired into the certification and coding experience qualifications for the RADV coders.

Response: The coders that CMS uses to review RADV medical records are fully qualified to code RADV-related medical records. All coders are professionally certified for example, Certified Professional Coder (CPC), Certified Coding Specialist (CCS), Registered Health Information Administrator, (RHIA) and Registered Health Information Technician (RHIT), and must have prior experience coding medical records. Coders have access to physician consultation as needed. Coders also have access to our Independent Coding Consultant^a coding expert with more than 10 years of professional coding experience, which we require to be RHIA, coding certified and to have at least 5 years of experience in RADV-specific coding.

Comment: Several commenters objected to what they contend is a burden that RADV audits impose upon the physicians and physician practices who must produce medical records necessary to conduct audits. These commenters recommended that CMS take into account the potential impacts of more aggressive program integrity efforts on the medical practices that provide care to MA plan enrollees. Outside of the proposed rule, we have also received letters arguing that the burden associated with RADV audits is not limited to the CMS' audits but also extends to internal audit activity undertaken by Medicare health plans that mimics the RADV audits that we undertake for Medicare payment validation. These commenters raised concerns that Medicare health plans were misrepresenting their internal audit activity as official CMS RADV audits.

Response: Section 422.310(e) requires that providers who voluntarily enter into contracts with MA organizations submit data to CMS contractors/IVCs for RADV audits. In an effort to minimize the burden associated with this activity, we have developed best practices that we encourage health plans to employ in their efforts to gather medical records from providers and hospitals. To the extent MA organizations employ these practices, it is our belief that the impact of RADV audits on providers can be minimized.

***19748** We also understand the increasing need for providers to be able to distinguish when they are being asked for medical records in association with an MA plan's own audit or in accordance with an official Medicare program RADV audit which is subject to legislative requirements. Therefore, we issue letters on our letterhead that MA organizations must use when requesting medical records from providers when the request is specifically related to an official CMS RADV audit. Providers may rely upon these letters as an indicator that a given medical record request is for CMS' RADV, and providers may request this authorizing letter before responding to requests by the MA plan.

We received a large number of comments from MA organizations, managed care trade associations and a law firm regarding the "one best medical record" policy that CMS proposed to apply to the RADV program. By way of explanation, the "one best medical record" policy specifies that for any one sampled beneficiary^with any one HCC^the MA organization is allowed to select and submit supporting medical record documentation of a face-to-face encounter for a physician or outpatient visit (one date of service) or an inpatient stay (range of dates from admit to discharge). The face-to-face encounter would have needed to occur at some point during the data collection year (from January 1st to December 31[FNst]).

Comment: Commenters contended that the one best medical record policy forces plans to omit relevant data that could be supported through documentation that CMS does not permit[^]such as prescription drug data and lab results.

Response: The RADV risk adjustment model is based upon FFS claims data from specific risk adjustment provider types, and not alternative data sources, such as, prescription drug data or lab results. Therefore, the RADV audit process is based upon supporting medical record documentation from provider data sources that are used to calibrate the model. As for the one best medical record policy, while MA organizations that voluntarily submit HCCs for Medicare payment are prospectively paid based on these unaudited and unvalidated HCCs submissions, we, upon the recommendation of MA organizations, agreed to allow any one medical record from across an entire data collection period to validate an HCC incorporated into the payment to the MA organization.

Comment: Some commenters contend that if CMS is going to rely on the one best medical record policy to the exclusion of other sources of information that might confirm an HCC, the RADV appeals process should allow for HCC medical record review findings to be appealed.

Response: To address these comments as described in § 422.311(c)(2) of this final rule, we have revised the process so that MA organizations may appeal medical record review determinations in accordance with the procedures specified in § 422.311(c)(2).

Comment: A number of commenters argued that the one best medical record policy is flawed in that it provides an insufficient basis for confirming an HCC for members with chronic diseases when a collection of several records, perhaps from various providers, considered in the aggregate might better verify a patient's condition.

Response: We disagree. In the case of a chronic disease such as congestive heart failure, all that is required is medical record documentation from one visit to a physician or a hospital, over the course of the data collection year, to validate the audited HCC.

Comment: We received several comments comparing the RADV audit and appeals process to varying program attributes of the Medicare FFS program. For example, some commenters argued that CMS' one best medical record rule conflicts with Medicare FFS standards since there is no one best medical record rule applied to Medicare payment error-rate testing for FFS providers.

Response: Payment error-testing under original Medicare is different than payment error testing under Medicare Part C. Under original Medicare, much of what comprises the error testing regimen is aimed at validating that a particular level of service was provided and therefore justifies a given level of Medicare payment. Under RADV, the payment error testing focuses on validating HCCs by examining medical records to determine whether they contain supporting diagnostic codes. This error testing is aimed at validating that a particular Medicare beneficiary indeed has the medical condition for which the MA organization has been paid for, and not whether a particular level of service (for example, level 1 office visit vs. level 2 office visits) was provided. Moreover, there is no evidence to support the notion that the Congress, in establishing the Part C payment process, ever intended the Part C payment process to mimic payment processes under Original Medicare. Indeed, they are fundamentally different.

Moreover, we believe that the one best medical record policy and the operational process associated with it are far less restrictive than Medicare FFS. MA organizations are not limited to the specified date(s) of service they reported to us with regard to selecting a medical record as supporting documentation for a specific HCC. We continue to believe that the one best medical record policy is appropriate for the Medicare Part C risk adjusted payment system which is distinct from a FFS payment system where payment is determined on a claim-by-claim basis. Under Part C, we only require that plans send one HCC for payment for an entire year; it therefore logically follows that we would only require one medical record to validate this HCC.

Comment: Some commenters stated that the one best medical record rule was inconsistent with the mandate that MA payment adjustments be actuarially equivalent to the FFS sector.

Response: It is our belief that health plans are confusing actuarial equivalence in payment amount[^] which demographic adjustments, risk adjustment methodology, and coding intensity adjustment are all designed to achieve[^]with differences in the way costs are documented. Because MA organizations are paid on a capitation basis, costs are not covered for a specific service provided. Rather, they are based on the actuarial value of such costs. The risk adjustment methodology uses diagnosis codes as a proxy for higher costs associated with a particular diagnosis. Because, under original Medicare, costs of specific services received are reimbursed, the diagnosis leading to such costs being incurred has a different relevance under original Medicare than they do under the Medicare Part C payment system. The risk adjustment methodology and RADV audit process that we employs to ensure accuracy under Medicare Part C we believe furthers actuarial equivalence, rather than conflicts with it. The differences between MA and original Medicare are simply attributable to differences in how payment is made. It is these differences that necessitate the actuarial equivalence standard in the first place.

Comment: A commenter noted that in Medicare Part A and B appeal contexts, supplemental information and testimony are considered, and given such weight as the fact finder determines is appropriate.

Response: Under our proposed appeals procedures that affords MA organizations the ability to appeal the Part C error calculation specified at § 422.311(c)(3), the CMS Hearing Officer ***19749** has the discretion to conduct the hearing in alternative ways beyond conducting the hearing on the record. For example, the Hearing Officer can choose to conduct the hearing by way of teleconference or in person. The CMS Hearing Officer also has the discretion to request supplemental information or to accept testimony, as he or she deems necessary. Also, under the medical record review appeal processes that we specify at § 422.311(c)(2), we afford MA organizations the ability to submit supplemental information[^]the attestation reviewed by the IVC[^] to validate the same HCC that the Initial Validation Contractor (IVC) initially determined to be in error.

Comment: Several commenters, focusing on the relationship between MA organizations and their providers, noted that errors in documentation are ultimately attributable to providers, not MA organizations. These commenters argued that, due to the nature of the MA program, while CMS makes a capitated payment to organizations that have relationships with providers, these providers may not have an incentive to document the HCCs which affect payment to the MA organization. The commenters also stated that contract-level payment adjustments penalize MA organizations, while it is providers who are responsible for maintaining adequate records. A commenter also suggested that we accept “other data” to supplement, or substitute, a medical record.

Response: Section 422.504(i)(1) clarifies for MA organizations that they are ultimately responsible for the risk adjustment information submitted to CMS. This section of the regulations states, “Notwithstanding any relationship(s) that the MA organization may have with first tier, downstream, and related entities, the MA organization maintains ultimate responsibility for adhering to and otherwise fully complying with all terms and conditions of its contract with CMS.” MA organizations are further directed in § 422.504(i)(2) that all their “first tier, downstream, and related entities are required to agree that HHS, the Comptroller General, or their designees have the right to audit, evaluate, and inspect * * * medical records.” Therefore, while we acknowledge the comments, we maintain that it is the responsibility of MA organizations to ensure that they submit accurate risk adjustment information, and that the providers with whom they contract are aware that we have authority to audit medical records to verify this information.

We do not require MA organizations to submit HCCs for beneficiaries; MA organizations choose whether or not to do so. For risk adjustment diagnoses that are submitted, it is the responsibility of the MA organization to obtain appropriate documentation. If MA organizations are not confident in the information they obtain from their providers, they may wish to initiate education efforts, or include provisions in their contracts that ensure providers appropriately document diagnoses and provide medical record documentation to the plan upon request.

In regards to supplemental information, we have determined, and MA plans have been informed multiple times, that the appropriate format for obtaining risk adjustment information is a medical record. For validation purposes, plans are asked to submit the one best medical record documenting the HCC. We carefully determined the one best medical record policy, after

Federal Register / Vol. 79, No. 7 / Friday, January 10, 2014 / Proposed Rules

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

42 CFR Parts 409, 417, 422, 423, and 424

[CMS-4159-P]

RIN 0938-AR37

Medicare Program; Contract Year 2015 Policy and Technical Changes to the Medicare Advantage and the Medicare Prescription Drug Benefit Programs

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Proposed rule.

SUMMARY: The proposed rule would revise the Medicare Advantage (MA) program (Part C) regulations and prescription drug benefit program (Part D) regulations to implement statutory requirements; strengthen beneficiary protections; exclude plans that perform poorly; improve program efficiencies; and clarify program requirements. The proposed rule also includes several provisions designed to improve payment accuracy.

DATES: To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. on March 7, 2014.

ADDRESSES: In commenting, please refer to file code CMS-4159-P. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of four ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to <http://www.regulations.gov>. Follow the "Submit a comment" instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS-4159-P, P.O. Box 8013, Baltimore, MD 21244-8013.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS-4159-P, Mail Stop C4-26-03, 7500 Security Boulevard, Baltimore, MD 21244-1850.

4. *By hand or courier.* Alternatively, you may deliver (by hand or courier)

your written comments ONLY to the following addresses prior to the close of the comment period: a. For delivery in Washington, DC—Centers for Medicare & Medicaid Services, Department of Health and Human Services, Room 445-G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without federal government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

b. For delivery in Baltimore, MD—Centers for Medicare & Medicaid Services, Department of Health and Human Services, 7500 Security Boulevard, Baltimore, MD 21244-1850.

If you intend to deliver your comments to the Baltimore address, call telephone number (410) 786-9994 in advance to schedule your arrival with one of our staff members.

Comments erroneously mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: Christopher McClintick, (410) 786-4682, Part C issues. Marie Manteuffel, (410) 786-3447, Part D issues. Kristy Nishimoto, (206) 615-2367, Part C and D enrollment and appeals issues. Whitney Johnson, (410) 786-0490, Part C and D payment issues. Clarisse Owens, (410) 786-0880, Part C and D compliance issues. Frank Whelan, (410) 786-1302, Part D improper prescribing issues.

SUPPLEMENTARY INFORMATION: Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following Web site as soon as possible after they have been received: <http://www.regulations.gov>. Follow the search instructions on that Web site to view public comments.

Comments received timely will also be available for public inspection as they are received, generally beginning approximately 3 weeks after publication

of a document, at the headquarters of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244, Monday through Friday of each week from 8:30 a.m. to 4 p.m. To schedule an appointment to view public comments, phone 1-800-743-3951.

Table of Contents

I. Executive Summary

- A. Purpose
- B. Summary of the Major Provisions
 1. Eligibility of Enrollment for Individuals Not Lawfully Present in the United States
 2. Modifying the Agent/Broker Requirements, Specifically Agent/Broker Compensation
 3. Drug Categories or Classes of Clinical Concern
 4. Improving Payment Accuracy
 5. Risk Adjustment Data Requirements (§ 422.310)
- C. Summary of Costs and Benefits

II. Background

III. Provisions of the Proposed Regulations

- A. Clarifying Various Program Participation Requirements
 1. Closing Cost Contract Plans to New Enrollment (§ 422.2 and § 422.503)
 2. Two-Year Limitation on Submitting a New Bid in an Area Where an MA has been Required To Terminate a Low-Enrollment MA Plan (§ 422.504(a)(19))
 3. Authority To Impose Intermediate Sanctions and Civil Money Penalties (§ 422.752, § 423.752, § 422.760 and § 423.760)
 4. Contract Termination Notification Requirements and Contract Termination Basis (§ 422.510 and § 423.509)
 5. Reducing the Burden of the Compliance Program Training Requirements (§ 422.503(b)(4)(vi)(C) and § 423.504(b)(4)(vi)(C))
 6. Changes To Audit and Inspection Authority (§ 422.503(d)(2) and § 423.504(d)(2))
 7. Procedures for Imposing Intermediate Sanctions and Civil Money Penalties Under Parts C and D (§ 422.756 and § 423.756)
 8. Timely Access to Mail Order Services (§ 423.120)
 9. Collections of Premiums and Cost Sharing (§ 423.294)
 10. Enrollment Eligibility for Individuals Not Lawfully Present in the United States (§§ 417.2, 417.420, 417.422, 417.460, 422.1, 422.50, 422.74, 423.1, 423.30, and 423.44)
 - a. Basic Enrollment Requirements
 - b. Medicare Eligibility and Lawful Presence
 - c. Alignment of MA, PDP, and Cost Plan Eligibility With FFS Payment Exclusion Policy
 11. Part D Notice of Changes (§ 423.128(g))
 12. Separating the Annual Notice of Change (ANOC) From the Evidence of Coverage (EOC) (§ 422.111(a)(3) and § 423.128(a)(3))

at § 423.360, we do not believe that it is necessary to reopen a payment reconciliation after that 5-year period, nor do we believe it is necessary to reopen a reconsidered payment determination. Therefore, we propose to amend § 423.346 (a) such that CMS will only reopen the initial payment determination and will not reopen a reconsidered payment determination.

As stated in our final rule entitled, "Medicare Program; Medicare Prescription Drug Benefit" published in the *Federal Register* on January 28, 2005 (70 FR 4194), CMS can initiate a reopening on its own or an organization could request a reopening, but such reopenings are at CMS' discretion. In determining whether to reopen, we will consider a number of issues, including, but not limited to, whether the contract has terminated and received a final settlement. We will not approve a request to reopen for a contract that has terminated and received a final settlement. In addition, when we perform a reopening on its own initiative, contracts that have been terminated and settled will not be included in the reopening.

b. Coverage Gap Discount Reconciliation Reopening

Under § 423.2320(b), CMS performs a Coverage Gap Discount Reconciliation in which CMS reconciles interim payments with invoiced manufacturer discount amounts made available to each Part D plan's enrollee under the Discount Program. Since the interim coverage gap payments are estimates (76 FR 63017, 63027 (October 11, 2011)), a cost-based reconciliation is performed to ensure that Part D sponsors are paid dollar for dollar for all manufacturer discount amounts as reported on invoiced PDE data submitted for Part D payment reconciliation. Manufacturer discount amounts reported on PDE records submitted after the PDE submission deadline for reconciliation continue to be invoiced to manufacturers within a maximum of 3 years of the date of dispensing, and manufacturers remit payments for invoiced coverage gap discount amounts to Part D sponsors.

We propose to establish a reopening provision for the Coverage Gap Discount Reconciliation for the same reasons and under the same authority that we established a reopening provision for the Part D payment reconciliation process described in our final rule, "Medicare Program; Medicare Prescription Drug Benefit" published on January 28, 2005 (70 FR 4194, 4316). In a Health Plan Management System (HPMS) memorandum dated April 30,

2010, we stated that the final reconciled discount program payments are subject to the reopening provision in § 423.346. We anticipate rarely needing to reopen the Coverage Gap Discount Reconciliation as a result of the invoicing process that continues to occur after the reconciliation process. However, we want to leave open the option to reopen if unforeseen events result in underpayments or overpayments to Part D sponsors. Therefore, we propose to amend § 423.346 to accommodate reopening a Coverage Gap Discount Reconciliation.

Based on the preceding, we propose to revise § 423.346 by removing the phrase "or reconsidered" from paragraph (a), amending paragraph (a) to account for the proposed timing of the Part D reopening, removing paragraphs (a)(1) through (3) and (b)(1) through (3); adding a new paragraph (b) to accommodate a Coverage Gap Discount Reconciliation reopening; and revising paragraph (c) to eliminate the reference to "good cause."

4. Payment Appeals (§ 423.350)

Pursuant to § 423.2320 (b), we perform a Coverage Gap Discount Reconciliation in which we reconcile interim payments with invoiced manufacturer discount amounts made available to each Part D plan's enrollee under the Discount Program. Current regulations do not describe the appeals process for a Coverage Gap Discount Reconciliation. We propose to establish an appeals provision for the Coverage Gap Discount Reconciliation for the same reasons and under the same authority that was used to establish the Part D payment reconciliation appeals process described in our final rule, "Medicare Program; Medicare Prescription Drug Benefit" published on January 28, 2005 (70 FR 4194, 4317). In an HPMS memorandum dated April 30, 2010, CMS stated that the final reconciled discount program payments are subject to the appeals provisions in § 423.350, and we now propose to revise § 423.350 to accommodate a Coverage Gap Discount Reconciliation appeals process.

Consistent with the Part D payment appeals process currently described at § 423.350, the proposed changes establish an appeals process whereby the final reconciliation of the interim Coverage Gap Discount Program payments may be subject to appeal. As stated in our final rule describing the Part D payment appeals process (70 FR 4317 (January 28, 2005)), the Part D payment appeals process only applies to perceived errors in the application of the payment methodology and the

payment information submitted by the Part D sponsor cannot be appealed through this process. In the January 28, 2005 final rule (70 FR 4317), Part D plans are expected to submit payment information correctly and within the established timelines. We codified at § 423.350(a)(2) that payment information submitted to CMS under § 423.322 and reconciled under § 423.343 is final and may not be appealed nor may the appeals process be used to submit new information after the submission of information necessary to determine retroactive adjustments and reconciliations. We propose to amend § 423.350(a)(2) to include information that is submitted and reconciled under § 423.2320(b) is final and may not be appealed nor may the appeals process be used to submit new information after the submission of information necessary to determine retroactive adjustments and reconciliations.

Also consistent with the Part D payment appeals process, we propose that the request for a reconsideration of the Coverage Gap Discount Reconciliation must be filed within 15 days from the date of the final payment, which is the date of the final reconciled payment made under § 423.2320 (b). Therefore, we propose to amend § 423.350(b)(1) by adding a new paragraph (iv) to define the timeframe for filing a reconsideration of the Coverage Gap Discount Reconciliation.

Based on the preceding, we propose to revise § 423.350 by adding a new paragraph (a)(1)(v) to allow for an appeal of a reconciled coverage gap payment under § 423.2320 (b), by revising paragraph (a)(2) to indicate that the payment information submitted to CMS and reconciled under § 423.2320(b) is final and may not be appealed, and by adding a new paragraph (b)(1)(iv) to define the timeframe for appealing the final reconciled payment under § 423.2320(b).

5. Payment Processes for Part D Sponsors (§ 423.2320)

In our final rule entitled, "Medicare Program; Changes to the Medicare Advantage and the Medicare Prescription Drug Benefit Programs for Contract Year 2013 and Other Changes" (77 FR 22071, 22086; April 12, 2012), CMS described the payment process for Part D sponsors under the Coverage Gap Discount Program. Under § 423.2320(a), CMS provides monthly interim Coverage Gap Discount Program payments as necessary for Part D sponsors to advance coverage gap discounts to beneficiaries. Part D

sponsors report the gap discount amounts to CMS, and through a contractor, CMS invoices the manufacturers on a quarterly basis for the applicable discount amounts. The manufacturers repay each Part D sponsor directly for the invoiced amounts under the Medicare Coverage Gap Discount Program Agreement (Agreement) described at § 423.2315. Under § 423.2320(h), CMS reconciles the interim payments with amounts invoiced to manufacturers.

In the event that a manufacturer fails to provide the applicable discounts in accordance with the Agreement, we must impose civil money penalties (CMPs) equal to the sum of the applicable discount the manufacturer would have paid under the Agreement and 25 percent of that amount. The CMP that is equal to the sum of the applicable discount the manufacturer would have paid under the agreement is used to pay the applicable discount that the manufacturer had failed to provide.

In our final rule describing the payment process for Part D sponsors under the Coverage Gap Discount Program, we did not contemplate a payment process in the event that a manufacturer becomes bankrupt and does not pay the Part D sponsors for quarterly invoiced amounts under the Agreement. Even though we will impose a CMP on a bankrupt manufacturer in an effort to collect the unpaid invoiced amounts, the bankruptcy settlements will likely result in the CMP being modified or reduced. In order to ensure that the Part D sponsors have the funds available to advance the gap discounts at the point-of-sale, as required under section 1860D-14A(c)(1)(A)(ii) of the Act, we now propose to amend § 423.2320 such that we will assume financial liability for the applicable discount by covering the costs of the quarterly invoices that go unpaid by a bankrupt manufacturer at the time of the Coverage Gap Discount Reconciliation described at § 423.2320(b). We would then file a proof of claim with the bankruptcy court to recover those costs from the bankrupt manufacturer.

The proposed policy that CMS assumes financial liability for the applicable discounts in the event of a manufacturer bankruptcy is consistent with CMS' payment processes for Part D sponsors under the Medicare Coverage Gap Discount Program. Under § 423.2320 (a), CMS provides interim payments to ensure that Part D sponsors have the funds available to advance the coverage gap discount to beneficiaries at point of sale. Under § 423.2320 (b), CMS reconciles the interim payments with the invoiced manufacturer discount

amounts in order make the PDP sponsor whole for the gap discount amount provided to the beneficiaries at point of sale. (For more information on these provisions, see October 11, 2011 final rule (76 FR 63017, 63027).) In order to remain consistent with the intent of the Coverage Gap Discount Reconciliation to make the Part D sponsor whole for the gap discounts amounts advanced at point of sale, CMS must provide payments to the Part D sponsor to cover the cost of the applicable discount in the event that the manufacturer cannot pay the quarterly invoices due to a bankruptcy. We propose to cover the costs of unpaid quarterly invoices only in the event that a manufacturer becomes bankrupt. We would not cover the cost of unpaid quarterly invoices for any other reasons because, in the event that a manufacturer fails to pay the quarterly invoices, we will impose CMPs that will cover the cost of the unpaid invoices. In the event that a manufacturer becomes bankrupt, we are concerned that the court will either modify or reduce the amount of the CMP, making the CMP process ineffective for covering the cost of the invoices and leaving the Part D sponsor in the position of having to cover the costs of the gap discount.

We propose to implement this policy by adjusting the Coverage Gap Discount Reconciliation to account for quarterly invoices that go unpaid as a result of a manufacturer becoming bankrupt. This adjustment will only occur for manufacturer discount amounts as they are reported on PDEs submitted by the submission deadline for the Part D reconciliation.

Based on the preceding, we propose to add a new paragraph (c) to § 423.2320 to describe a process for accounting for quarterly invoiced amounts that go unpaid by a bankrupt manufacturer.

6. Risk Adjustment Data Requirements (§ 422.310)

We propose to strengthen existing regulations related to the accuracy of risk adjustment data by amending § 422.310 on risk adjustment data validation. First, we propose to renumber existing paragraph § 422.310(e) as paragraph (e)(2) and add new paragraph (e)(1), which would require that any medical record reviews conducted by an MA organization must be designed to determine the accuracy of diagnoses submitted under § 422.308(c)(1) and § 422.310(g)(2). (Paragraph § 422.308(c)(1) addresses adjustments to payments for health status, and paragraph § 422.310(g)(2) addresses deadlines for risk adjustment data submission, including the final risk

adjustment data submission deadline prior to CMS' calculation of the final risk factors for a payment year.) Under our proposal, medical record reviews conducted by an MA organization cannot be designed only to identify diagnoses that would trigger additional payments by CMS to the MA organization; and medical record review methodologies must be designed to identify errors in diagnoses submitted to CMS as risk adjustment data, regardless of whether the data errors would result in positive or negative payment adjustments. This proposed amendment furthers our goals of improving payment accuracy and reducing payment errors.

We also propose to amend § 422.310(g) regarding deadlines for submission of risk adjustment data. Our current procedures generally permit submission of risk adjustment data after the final risk adjustment submission deadline only to correct overpayments. We propose to revise the regulation to explicitly permit late submissions only to correct overpayments but not to submit diagnoses for additional payment.

Finally, we propose to align this regulation with proposed § 422.326 by making two additional changes in paragraph (g). First, we propose the deletion of the January 31 deadline in subparagraph (2) and replacing it with the statement that CMS will announce the deadline by which final risk adjustment data must be submitted to CMS or its contractor. This means that the risk adjustment data submission deadline would also function as the Part C applicable reconciliation date for purposes of proposed § 422.326 on overpayment rules, as discussed in section II.B.1.b. of this proposed rule. Second, we propose to add subparagraph (3) to § 422.310(g). Proposed paragraph (3) cites § 422.326 as the source of rules for submission of corrected risk adjustment data after the final risk adjustment data submission deadline, that is, after applicable reconciliation as defined at § 422.326(a).

7. RADV Appeals

a. Background

We published Risk Adjustment Data Validation (RADV) appeals regulations in the April 15, 2010 *Federal Register*. These rules were proposed and finalized under CMS's authority to establish Medicare Advantage (MA) program standards by regulation at section 1856(b)(1) of the Act and are found at § 422.311 et seq.

As explained in the preamble of that final rule, Subpart G of the MA regulations at part 422 describes how

payment is made to MA organizations. These payment principles are based on sections 1853, 1854, and 1858 of the Act. Subpart G also sets forth the requirements for making payments to MA organizations offering local and regional MA plans, including calculation of MA capitation rates. Section 1853(a)(3) of the Act requires that we risk adjust our payments to MA organizations. Risk adjustment strengthens the Medicare program by ensuring that accurate payments are made to MA organizations based on the health status plus demographic characteristics of their enrolled beneficiaries and ensures that MA organizations are paid appropriately for their plan enrollees (that is, less for healthier enrollees expected to incur lower health care costs and more for less healthy enrollees expected to incur higher health care costs). Accurate payments to MA organizations also help ensure that providers are paid appropriately for the services they provide to MA beneficiaries. In general, the current risk adjustment methodology relies on enrollee diagnoses, as specified by the International Classification of Disease, currently the Ninth Revision Clinical Modification guidelines (ICD-9-CM) to prospectively adjust capitation payments for a given enrollee based on the health status of the enrollee. Diagnosis codes determine the risk scores, which in turn determine the risk adjusted reimbursement. As a result, physicians and providers must focus attention on complete and accurate diagnosis reporting according to the official ICD-9-CM coding guidelines (that is, coding diagnoses accurately and to the highest level of specificity).

MA enrollee Hierarchical Condition Categories (HCCs) are assigned based on risk adjustment diagnoses from FFS claims and from risk adjustment data submitted to us by MA organizations via the Risk Adjustment Payment System (RAPS). The CMS-HCCs contribute to an enrollee's risk score, which is used to adjust a base payment rate. Essentially, the higher the risk score for an enrollee, the higher the expected health care cost for the enrollee. The HCC data that MA organizations submit to CMS via the RAPS system is self-reported by the MA organization and does not go through a validation review before being incorporated into a given beneficiary's risk profile. Since there is an incentive for MA organizations to potentially over-report diagnoses so that they can increase their payment, the Agency audits plan-submitted diagnosis data a few years later to ensure they are

supported by medical record documentation.

Verifiable medical record documentation is the key to accurate payment and successful data validation. We annually select contracts for RADV audits. RADV audits are intended to confirm the presence of risk adjustment conditions (that is, diagnoses that map to HCCs) as reported by MA organizations for their enrollees and confirmed via medical record documentation. RADV audits occur after the final risk adjustment data submission deadline for the MA contract year. We validate the HCC data submitted by MA organizations by reviewing hospital inpatient, hospital outpatient, and physician/practitioner provider medical records. The focus of this medical record review activity is on diagnoses related to the enrollee's HCC profile. Risk adjustment discrepancies are identified when the enrollee's HCCs used for payment (based upon MA organization-submitted data) differ from the HCCs assigned based on the medical record, under the RADV audit process. Risk adjustment discrepancies can be aggregated to determine an overall level payment error. In turn, payment error for a sample of contract enrollees can be extrapolated to calculate a contract-level payment error estimate.

Since finalizing these rules in 2010, we have conducted additional RADV audits and believe that some of the appeals provisions finalized in the 2010 RADV Appeals final rule should now be modified to prevent confusion, and to strengthen the RADV appeals process. We therefore, propose revisions to the RADV appeals regulations finalized in the April 15, 2010 Federal Register. These proposed revisions clarify program requirements and simplify the RADV appeals process. These proposed RADV provisions will apply to any RADV determinations issued on or after the effective date of this regulation.

b. RADV Definitions

We propose to amend the RADV definitions at § 422.2 as follows:

- Removing the following definitions:
 - ++ "Initial Validation Contractus (IVC)" means the first level of medical record review under the RADV audit process.
 - ++ "RADV payment error calculation appeal process" means an administrative process that enables MA organizations that have undergone RADV audit to appeal the CMS calculation of an MA organization's RADV payment error.
 - ++ "The one best medical record for the purposes of Medicare Advantage Risk Adjustment

Validation (RADV)" means the clinical documentation for a single encounter for care (that is, a physician office visit, an inpatient hospital stay, or an outpatient hospital visit) that occurred for one patient during the data collection period. The single encounter for care must be based on a face-to-face encounter with a provider deemed acceptable for risk adjustment and documentation of this encounter must be reflected in the medical record.

- Adding the following definition:
 - ++ "RADV appeal process" means an administrative process that enables MA organizations that have undergone RADV audit to appeal the Secretary's medical record review determinations and the Secretary's calculation of an MA organization's RADV payment error.
- Revising the following definitions:
 - ++ Risk adjustment data validation (RADV) audit means a payment audit of a Medicare Advantage (MA) organization administered by CMS or the Secretary that ensures the integrity and accuracy of risk adjustment payment data.
 - ++ "Attestation process" means a CMS-developed RADV process that enables MA organizations undergoing RADV audit to submit CMS-generated attestations for eligible medical records with missing or illegible signatures or credentials. The purpose of the CMS-generated attestations is to cure signature and credential issues for eligible medical records. CMS-generated attestations do not provide an opportunity for a provider or supplier to replace a medical record or for a provider or supplier to attest that a beneficiary has the medical condition.

c. Publication of RADV Methodology

In the October 22, 2009 Notice of Proposed Rule Making (NPRM), and as reinforced in the April 15, 2010 Final Regulation, CMS indicated that we would, "publish its RADV methodology in some type of public document—most likely, a Medicare Manual, so that the public can review and provide comment as it deems necessary". We also indicated that we would provide an annual notice of RADV audit methodology. Our last RADV-related notice of methodology was published in February, 2012. We will continue to publish a notice of the methodology employed, but will do so only if there is a change in the RADV methodology that would require publication. We note that these notices of RADV audit

methodology updated information provided on RADV audit methodology provided in the October 22, 2009 proposed rule and April 15, 2010 final rule.

In addition, we provided in the October 22, 2009 proposed rule preamble that we would provide an expanded explanation of methodology and payment error calculation factors as a part of each audit report of findings that we send to MA organizations that undergo RADV audit. Such explanation and factors have been and will continue to be part of the RADV audit report(s) that CMS provides health plans that have undergone RADV audits.

d. Proposal To Update RADV Appeals Terminology (§ 422.311)

Current RADV regulations utilize the following terms for the CMS-issued RADV audit report: Audit report post medical record review; RADV audit report; IVC-level RADV audit report; and RADV audit report of finding. This use of multiple terms to refer to what is the same audit report (the RADV audit report that CMS issues following conclusion of the medical record review portion of the audit) is potentially confusing. Therefore, we propose amending the RADV regulations throughout to adopt one common term to refer to RADV audit reports: "RADV Audit Report". By standardizing terminology throughout the RADV regulations, the proposed amendment provides clarity which may lead to increased efficiency. We welcome comment on this proposal.

As mentioned earlier in the description of RADV-related definitions that have changed, we have revised certain RADV-related definitions to accommodate changes to both the RADV audit process and the RADV appeals process. One definition that we have removed from the RADV regulations is Initial Validation Contractor, or IVC. The RADV medical record review process no longer utilizes "initial" and "secondary" validation contractors to conduct medical record review under RADV. Instead we now utilize medical record reviewers to code medical records undergoing RADV review. These reviewers may be employed by the same or different medical record review contractors. Therefore, the term "IVC" is no longer relevant to the RADV audit process. We therefore propose to remove this term from the RADV regulations at the following citations: § 422.311(c)(2)(i)(B) through (D); § 422.311(c)(2)(ii)(B); § 422.311(c)(2)(iii)(A), § 422.111(c)(2)(v), (vi), § 422.311(c)(3)(i)(A), and

§ 422.311(c)(3)(iii)(A) and (B). We invite comment on this proposal.

e. Proposal To Simplify the RADV Appeals Process

Currently, there are two types of RADV-related appeals processes described in Federal regulations at § 422.311 et seq.: Medical record review-determination appeals and RADV payment error calculation appeals. RADV medical record review-determination appeal requirements and procedures are discussed at § 422.311(b)(3) and § 422.311(c)(2). Medical record review determination appeal is a two-stage administrative appeal process: The first step is a hearing by a hearing officer, followed by a CMS Administrator-level review. This appeal procedure provides MA organizations with an opportunity to appeal RADV medical record review determinations that are made by coders reviewing the medical record documentation submitted by MA organizations undergoing RADV audit. The second type of RADV appeal, payment error calculation appeal, is discussed at § 422.311(c)(3). Payment error calculation appeal is a three-pronged appeal process: Reconsideration, followed by a hearing officer review, followed by CMS Administrator-level review. This appeal process was specifically designed to afford MA organizations the opportunity to appeal CMS's contract-level RADV payment error calculation.

We propose that the administrative appeals language described at § 422.311(b)(3) and § 422.311(c)(2) for RADV medical record review determination appeals and § 422.311(c)(3) for RADV payment error calculation appeals be replaced with new regulatory language proposed § 422.311(c)(1) et seq., that combines the two existing RADV appeal policies and procedures into one set of requirements and one process. We propose to combine the two RADV appeals processes into one combined RADV appeals process that is comprised of three administrative steps: Reconsideration, hearing officer review, and CMS Administrator-level review. A three-step administrative appeals process comprising reconsideration, hearing officer review, and Administrator-levels of review is a common administrative appeals model used elsewhere within the Medicare managed care program, such as in appealing contract award determinations and intermediate sanctions. The combined RADV appeal process that we are proposing at new § 422.311(c)(1) et seq., also has the

benefit of simplifying what is today a complex two-track appeal process into one process. While both CMS and the MA industry will benefit from simplifying this process, MA organizations also obtain an additional level of review under the combined approach since MA organizations will be afforded a reconsideration appeal step for medical record review determinations that is today—not part of the existing RADV appeal process. Shortening the existing two-track appeal process should also reduce the resources and level of effort needed from both MA organizations and CMS in participating in a RADV appeal proceeding. Under this proposal, MA organizations can simply request to appeal their RADV audit findings one time and specify whether they want to appeal either their medical record review determination(s), payment error calculation, or both. The specific details regarding this proposed process follow. We propose these changes based upon our experience with RADV appeals and because we hope to reduce the burden associated with undertaking RADV appeals on both MA organizations and CMS. The details of this proposed policy and procedure follows.

(1) Issues Eligible for RADV Appeal

Current regulations at § 422.311(c)(2) et seq., and § 422.311(c)(3) et seq., specify RADV-related medical record review and payment error calculation documents and issues eligible for the medical record review determination and payment error calculation appeal processes. We propose to amend the policies and procedures around issues eligible for RADV appeals at § 422.311(c)(2) and § 422.311(c)(3) by combining proposed policies and procedures for the existing two-pronged appeal approach into one set of policies and procedures for RADV appeals at the new § part 422.311(c)(2)(iv). At § 422.311(c)(2)(i), we propose that as a general rule, MA organizations may appeal RADV medical record review determinations and RADV payment error calculation, though in order to be eligible to pursue these appeals, we specify at proposed § 422.311(c)(2)(i)(A) and (B) that MA organizations must adhere to established RADV audit procedures and requirements and adhere to RADV appeals procedures and requirements. At § 422.311(c)(2)(ii) we propose that failure to follow RADV audit procedures and requirements and RADV appeals procedures and requirements will render the MA organization's request for RADV appeal invalid. Furthermore, at proposed § 422.311(c)(2)(iii) we stipulate that the

I. Executive Summary

A. Purpose

The purpose of this final rule is to make revisions to the Medicare Advantage (MA) program (Part C) and Prescription Drug Benefit Program (Part D) regulations based on our continued experience in the administration of the Part C and Part D programs and to implement certain provisions of the Affordable Care Act. This final rule is necessary to—(1) clarify various program participation requirements; (2) improve payment accuracy; and (3) make other clarifications and technical changes.

B. Summary of the Major Provisions

1. Modifying the Agent/Broker Requirements, Specifically Agent/Broker Compensation

The former regulatory compensation structure was comprised of a 6-year cycle that ended December 31, 2013. Under that structure, MA organizations and Part D sponsors provided an initial compensation payment to independent agents for new enrollees (Year 1), and paid a renewal rate (equal to 50 percent of the initial year compensation) for Years 2 through 6. MA organizations and Part D sponsors had the option to pay the 50 percent renewal rate for CY2014 (year 1). This compensation structure proved to be complicated to implement and monitor, and also created an incentive for agents to move beneficiaries as long as the fair market value (FMV) continued to increase each year. To resolve these issues, we proposed to revise the compensation structure. Under our proposal, MA organizations and Part D sponsors would continue to have the discretion to decide, on an annual basis, whether or not to use independent agents. Also, for new enrollments, MA organizations and Part D sponsors could determine what their initial rate would be, up to the CMS designated FMV amount. For renewals in Year 2 and subsequent years, with no end date, the MA organization or Part D sponsor could pay up to 35 percent of the current FMV amount for that year. We believed that revising the existing compensation

structure to allow MA organizations or Part D sponsors to pay up to 35 percent of the FMV for year 2 and subsequent years was appropriate based on a couple of factors. First, we believed that a 2-tiered payment system (that is, initial and renewal) would be significantly less complicated than a 3-tiered system (that is, initial, 50 percent renewal for years 2 through 6, and 25 percent residual for years 7 and subsequent years), and would reduce administrative burden and confusion for plan sponsors. Second, our analysis determined that 35 percent was the renewal compensation level at which the present value of overall payments under a 2-tiered system would be relatively equal to the present value of overall payments under a 3-tiered system (taking into account the estimated life expectancy for several beneficiary age cohorts). In addition to revising the agent and broker compensation structures, we proposed to amend the training and testing requirements as well as setting limits on referral fees (\$100) for agents and brokers.

We received more than 140 comments from agents, health plans, and trade associations opposing the 35 percent renewal rate, and instead suggesting that CMS maintain the 50 percent renewal rate. A number of commenters expressed concerns that the proposed reduction in compensation would represent a significant decrease from the current compensation limit, and a rate set at 50 percent of FMV would be in line with industry standard. They noted that the higher compensation amount would be particularly important for stand-alone prescription drug plans, as 35 percent would be insufficient to cover an agent's costs associated with the renewal transaction and could discourage agents from assisting in the annual evaluation of a Medicare beneficiary's options. Commenters also stated that, compared to current practice, the proposed 35 percent renewal rate is a reduction since a number of MA plans began offering a renewal rate of 50 percent for 10 years or more at the end of the 5-year cycle (2013). The majority of commenters also stated that agents play an important role in educating beneficiaries about Medicare and the proposed reduction in the renewal rate could reduce the level and quality of services provided to beneficiaries, thereby resulting in less information sharing and poorer plan choices by beneficiaries. Many commenters also stated that agents spend a significant amount of time in training, preparing, and educating beneficiaries and that the compensation

is already low relative to the hours spent. Some commenters also expressed concern that the lower compensation rate would discourage new agents from entering the MA market. Many agents stated they would have to stop selling MA products and instead sell other more profitable products. No plans strongly supported the 35 percent renewal rate. Therefore, we are modifying the compensation renewal rate from up to 35 percent to up to 50 percent. These changes will be applicable for enrollments effective January 2015. Because the proposed rate is similar to previous regulatory requirements, present CMS guidance, and industry practice, we believe this implementation timeframe is reasonable and appropriate. We are not finalizing the proposed changes to agent and broker training and testing at this time. We are finalizing limits on referral fees for agents as proposed.

2. Drug Categories or Classes of Clinical Concern

We are not finalizing any new criteria and will maintain the existing six protected classes.

3. Improving Payment Accuracy—Implementing Overpayment Provisions of Section 1128J(d) of the Social Security Act (§§ 422.326 and 423.360)

These proposed regulatory provisions codify the Affordable Care Act requirement establishing section 1128J(d) of the Act that MA organizations and Part D sponsors report and return identified Medicare overpayments.

We proposed to adopt the statutory definition of overpayment for both Part C and Part D, which means any funds that an MA organization or Part D sponsor has received or retained under Title XVIII of the Act to which the MA organization or Part D sponsor, after applicable reconciliation, is not entitled under such title. To reflect the unique structure of Part C and Part D payments to plan sponsors, we also propose to define two terms included in the statutory definition of overpayments: "funds" and "applicable reconciliation." We proposed to define funds as payments an MA organization or Part D sponsor has received that are based on data that these organizations submitted to CMS for payment purposes. For Part C we proposed that applicable reconciliation occurs on the annual final risk adjustment data submission deadline. For Part D, we proposed that applicable reconciliation occurs on the date that is the later of either the annual deadline for submitting prescription drug event

(PDE) data for the annual Part D payment reconciliations referred to in § 423.343(c) and (d) or the annual deadline for submitting DIR data.

In addition, we proposed to state in regulation that an MA organization or Part D sponsor has identified an overpayment if it has actual knowledge of the existence of the overpayment or acts in reckless disregard or deliberate ignorance of the existence of the overpayment. An MA organization or Part D sponsor must report and return any identified overpayment it received no later than 60 days after the date on which it identified it received an overpayment. The MA organization or Part D sponsor must notify CMS, using a notification process determined by CMS, of the amount and reason for the overpayment. Finally, we proposed a look-back period with an exception for overpayments resulting from fraud, whereby MA organizations and Part D sponsors would be held accountable for reporting overpayments within the 6 most recent completed payment years for which the applicable reconciliation has been completed.

We received approximately 30 comments from organizations and individuals. Generally, commenters supported establishing separate applicable reconciliation dates for Part C and Part D. Many commenters questioned when the 60-day period for reporting and returning begins, and what activities constitute reporting and returning an overpayment to CMS, including questions about estimating an amount of overpayment. A number of commenters also requested to clarify the standards for "identifying" an overpayment, including questions about the meaning of reasonable diligence. Finally, a few commenters recommended that we impose the same limitation on the look-back period for all overpayments, even those relating to fraud.

We are finalizing the provisions at §§ 422.326 and 423.360, with the following modifications. First, we add at the end of paragraph § 422.326(d) the phrase "unless otherwise directed by CMS for the purpose of § 422.311." Also, to increase clarity we revise §§ 422.336(c) and 423.360(c) regarding identified overpayments. Finally, we strike the following sentence in the proposed paragraphs on the 6-year look-back period: "Overpayments resulting from fraud are not subject to this limitation of the lookback period."

4. Risk Adjustment Data Requirements

We proposed several amendments to § 422.310 to strengthen existing regulations related to the accuracy of

risk adjustment data, including: (1) A requirement that medical record reviews, if used, be designed to determine the accuracy of diagnoses submitted under §§ 422.308(c)(1) and 422.310(g)(2); (2) a revision in the deadlines for submission of risk adjustment data; and (3) a limitation on the type and purpose of late data submissions. We also proposed a restructuring of subparagraph (g)(2) as

part of the revisions. We received approximately 25 comments from organizations and individuals regarding these proposals; many of the comments were concerned and critical of the proposals, highlighting vagueness and the potential for operational instability. For reasons discussed in more detail below in section III.B.2 of the preamble, we are not finalizing the proposed amendment regarding the scope of

medical reviews and we are not finalizing at this time the proposal to change the date for final risk adjustment data submission. We are finalizing as proposed the restructuring of §§ 422.310(g)(2) and the 422.310(g)(2)(ii) provision to prohibit submission of diagnoses for additional payment after the final risk adjustment data submission deadline.

C. Summary of Costs and Benefits

TABLE 2—SUMMARY OF COSTS AND BENEFITS

Provision description	Total costs	Transfers
Modifying the agent/broker requirements, specifically agent/broker compensation.	N/A	N/A
Improving Payment Accuracy	N/A	N/A
Eligibility of Enrollment for Incarcerated Individuals.		We estimate that this charge could save the MA program up to \$27 million in 2015, increasing to \$103 million in 2024 (total of \$650 million over this period), and could save the Part D program (includes the Part D portion of MA PD plans) up to \$46 million in 2015, increasing to \$153 million in 2024 (total of \$965 million over this period).

II. Background

A. General Overview and Regulatory History

The Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33) created a new “Part C” in the Medicare statute (sections 1851 through 1859 of the Social Security Act (the Act)) which established what is now known as the Medicare Advantage (MA) program. The Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173), enacted on December 8, 2003, added a new “Part D” to the Medicare statute (sections 1860D–1 through 42 of the Act) entitled the Medicare Prescription Drug Benefit Program (PDP), and made significant changes to the existing Part C program, which it named the Medicare Advantage (MA) Program. The MMA directed that important aspects of the Part D program be similar to, and coordinated with, regulations for the MA program. Generally, the provisions enacted in the MMA took effect January 1, 2006. The final rules implementing the MMA for the MA and Part D prescription drug programs appeared in the *Federal Register* on January 28, 2005 (70 FR 4568 through 4741 and 70 FR 4194 through 4585, respectively).

Since the inception of both Parts C and D, we have periodically revised our regulations either to implement statutory directives or to incorporate knowledge obtained through experience with both programs. For instance, in the September 18, 2008 and January 12, 2009 *Federal Register* (73 FR 54226 and 74 FR 1494, respectively), we issued Part C and D regulations to implement

provisions in the Medicare Improvement for Patients and Providers Act (MIPPA) (Pub. L. 110–275). We promulgated a separate interim final rule in January 16, 2009 (74 FR 2881) to address MIPPA provisions related to Part D plan formularies. In the final rule that appeared in the April 15, 2010 *Federal Register* (75 FR 19678), we made changes to the Part C and D regulations which strengthened various program participation and exit requirements; strengthened beneficiary protections; ensured that plan offerings to beneficiaries included meaningful differences; improved plan payment rules and processes; improved data collection for oversight and quality assessment; implemented new policies; and clarified existing program policy.

In a final rule that appeared in the April 15, 2011 *Federal Register* (76 FR 21432), we continued our process of implementing improvements in policy consistent with those included in the April 2010 final rule, and also implemented changes to the Part C and Part D programs made by recent legislative changes. The Patient Protection and Affordable Care Act (Pub. L. 111–148) was enacted on March 23, 2010, as passed by the Senate on December 24, 2009, and the House on March 21, 2010. The Health Care and Education Reconciliation Act (Pub. L. 111–152), which was enacted on March 30, 2010, modified a number of Medicare provisions in Pub. L. 111–148 and added several new provisions. The Patient Protection and Affordable Care Act (Pub. L. 111–148) and the Health Care and Education Reconciliation Act (Pub. L. 111–152) are collectively

referred to as the Affordable Care Act. The Affordable Care Act included significant reforms to both the private health insurance industry and the Medicare and Medicaid programs. Provisions in the Affordable Care Act concerning the Part C and D programs largely focused on beneficiary protections, MA payments, and simplification of MA and Part D program processes. These provisions affected implementation of our policies regarding beneficiary cost-sharing, assessing bids for meaningful differences, and ensuring that cost-sharing structures in a plan are transparent to beneficiaries and not excessive. In the April 2011 final rule, we revised regulations on a variety of issues based on the Affordable Care Act and our experience in administering the MA and Part D programs. The rule covered areas such as marketing, including agent/broker training; payments to MA organizations based on quality ratings; standards for determining if organizations are fiscally sound; low income subsidy policy under the Part D program; payment rules for non-contract health care providers; extending current network adequacy standards to Medicare medical savings account (MSA) plans that employ a network of providers; establishing limits on out-of-pocket expenses for MA enrollees; and several revisions to the special needs plan requirements, including changes concerning SNP approvals.

In a final rule that appeared in the April 12, 2012 *Federal Register* (77 FR 22072 through 22175), we made several changes to the Part C and Part D

programs required by statute, including the Affordable Care Act, as well as made improvements to both programs through modifications reflecting experience we have obtained administering the Part C and Part D programs. Key provisions of that final rule implemented changes closing the Part D coverage gap, or "donut hole," for Medicare beneficiaries who do not already receive low-income subsidies from us by establishing the Medicare Coverage Gap Discount Program. We also included provisions providing new benefit flexibility for fully-integrated dual eligible special needs plans, clarifying coverage of durable medical equipment, and combatting possible fraudulent activity by requiring Part D sponsors to include an active and valid prescriber National Provider Identifier on prescription drug event records.

B. Issuance of a Notice of Proposed Rulemaking

In the proposed rule titled "Contract Year 2015 Policy and Technical Changes to the Medicare Advantage and the Medicare Prescription Drug Benefit Programs," which appeared in the January 10, 2014 *Federal Register* (79 FR 1918), we proposed to revise the

Medicare Advantage (MA) program (Part C) regulations and prescription drug benefit program (Part D) regulations to implement statutory requirements; strengthen beneficiary protections; exclude plans that perform poorly; improve program efficiencies; and clarify program requirements. The proposed rule also included several provisions designed to improve payment accuracy.

C. Public Comments Received in Response to the CY 2015 Policy and Technical Changes to the Medicare Advantage and the Medicare Prescription Drug Benefit Programs Proposed Rule

We received approximately 7,600 timely pieces of correspondence containing multiple comments on the CY 2014 proposed rule. While we are finalizing several of the provisions from the proposed rule, there are a number of provisions from the proposed rule (for example, enrollment eligibility criteria for individuals not lawfully present in the United States) that we intend to address later and a few which we do not intend to finalize. We also note that some of the public comments were outside of the scope of the proposed

rule. These out-of-scope public comments are not addressed in this final rule. Summaries of the public comments that are within the scope of the proposed rule and our responses to those public comments are set forth in the various sections of this final rule under the appropriate heading. However, we note that in this final rule we are not addressing comments received with respect to the provisions of the proposed rule that we are not finalizing at this time. Rather, we will address them at a later time, in a subsequent rulemaking document, as appropriate.

D. Provisions Not Finalized in This Final Rule

As noted previously, some of the provisions of the proposed rule will be addressed later and, therefore, are not being finalized in this rule. Table 3 lists the provisions that were proposed but are not addressed at this time. We note that several provisions that were proposed are not being finalized in this rule and are effectively being withdrawn; those provisions are not listed in Table 3.

TABLE 3—PROVISIONS NOT FINALIZED AT THIS TIME

Proposed rule section	Topic
Clarifying Various Program Participation Requirements	
III.A.2	Two-year Limitation on Submitting a New Bid in an Area Where an MA has been Required to Terminate a Low-enrollment MA Plan (§ 422.504(a)(19)).
III.A.6	Changes to Audit and Inspection Authority (§ 422.503(d)(2) and § 423.504(d)(2)).
III.A.9	Collections of Premiums and Cost Sharing (§ 423.294).
III.A.10	Enrollment Eligibility for Individuals Not Lawfully Present in the United States (§§ 417.2, 417.420, 417.422, 417.460, 422.1, 422.50, 422.74, 423.1, 423.30, and 423.44).
III.A.11	Part D Notice of Changes (§ 423.128(g)).
III.A.12	Separating the Annual Notice of Change (ANOC) from the Evidence of Coverage (EOC) (§ 422.111(a)(3) and § 423.128(a)(3)).
III.A.14	Exceptions to Drug Categories or Classes of Clinical Concern (§ 423.120(b)(2)(vi)).
III.A.15	Medication Therapy Management Program (MTMP) under Part D (§ 423.153(d)(1)(v)(A))—outreach strategies.
III.A.16	Business Continuity for MA Organizations and PDP Sponsors (§ 422.504(e) and § 423.505(p)).
III.A.21	Efficient Dispensing in Long Term Care Facilities and Other Changes (§ 423.154).
III.A.23	Medicare Coverage Gap Discount Program and Employer Group Waiver Plans (§ 423.2325).
III.A.26	Payments to PDP Plan Sponsors For Qualified Prescription Drug Coverage (§ 423.308) and Payments to Sponsors of Retiree Prescription Drug Plans (§ 423.882).
III.A.32	Transfer of TrOOP Between PDP Sponsors Due to Enrollment Changes during the Coverage Year (§ 423.464).
III.A.37	Expand Quality Improvement Program Regulations (§ 422.152).
III.A.38	Authorization of Expansion of Automatic or Passive Enrollment Non-Renewing Dual Eligible SNPs (D-SNPs) to another D-SNP to Support Alignment Procedures (§ 422.60).
Improving Payment Accuracy

III.C.3	Good Cause Processes (§ 417.460, § 422.74 and § 423.44).
III.C.4	Definition of Organization Determination (§ 422.566).
III.C.5	MA Organizations May Extend Adjudication Timeframes for Organization Determinations and Reconsiderations (§ 422.568, § 422.572, § 422.590, § 422.618, and § 422.619).
Strengthening Our Ability to Distinguish Stronger Applicants for Part C and D Program Participation and to Remove Consistently Poor Performers	
III.D.1	Two-Year Prohibition When Organizations Terminate Their Contracts (§§ 422.502, 422.503, 422.506, 422.508, and 422.512).
III.D.2	Withdrawal of Stand-Alone Prescription Drug Plan Bid Prior to Contract Execution (§ 423.503).
III.D.3	Essential Operations Test Requirement for Part D (§§ 423.503(a) and (c), 423.504(b)(10), 423.505(b)(28), and 423.509).
III.D.4	Termination of the Contracts of Medicare Advantage Organizations Offering PDP for Failure for 3 Consecutive Years to Achieve 3 Stars on Both Part C and Part D Summary Star Ratings in the Same Contract Year (§ 422.510).
Implementing Other Technical Changes	
III.E.1	Requirements for Urgently Needed Services (§ 422.113).
III.E.2	Skilled Nursing Facility Stays (§§ 422.101 and 422.102).
III.E.3	Agent and Broker Training and Testing Requirements (§§ 422.2274 and 423.2274).
III.E.4	Deemed Approval of Marketing Materials (§ 422.2266 and § 423.2266).
III.E.5	Cross-Reference Change in the Part C Disclosure Requirements (§ 422.111).
III.E.6	Managing Disclosure and Recusal in P&T Conflicts of Interest: [Formulary] Development and Revision by a Pharmacy and Therapeutics Committee under PDP (§ 423.120(b)(1)).
III.E.8	Thirty-Six-Month Coordination of Benefits (COB) Limit (§ 423.466(b)).
III.E.9	Application and Calculation of Daily Cost-Sharing Rates (§ 423.153).
III.E.10	Technical Change to Align Regulatory Requirements for Delivery of the Standardized Pharmacy Notice (§ 423.562).
III.E.12	MA Organization Responsibilities in Disasters and Emergencies (§ 422.100).
III.E.14	Technical Changes to Align Part C and Part D Contract Determination Appeal Provisions (§§ 422.641 and 422.644).
III.E.15	Technical Changes to Align Parts C and D Appeal Provisions (§§ 422.660 and 423.650).
III.E.17	Technical Change to the Restrictions on use of Information under Part D (§ 423.322).

III. Provisions of the Proposed Regulations and Analysis of and Responses to Public Comments

A. Clarifying Various Program Participation Requirements

1. Closing Cost Contract Plans to New Enrollment (§ 422.503(b)(4))

To ensure that our original intent is realized and to eliminate the potential for organizations to move enrollees from one of their plans to another based on financial or some other interest, we proposed to revise paragraph § 422.503(b)(4)(vi)(G)(5) so that an "entity seeking to contract as an MA organization must [n]ot accept, or share, a corporate parent organization with an entity that accepts, new enrollees under a section 1876 reasonable cost contract in any area in which it seeks to offer an MA plan."

In making the proposed revision to paragraph § 422.503(b), we also proposed to add the definition of "parent organization" to § 422.2 of the MA program definitions, specifying that, "Parent organization means a legal entity that owns one or more other subsidiary legal entities." Although the MA program regulations do not currently define the term "parent organization," our proposed definition is consistent with the way the term is

currently used in the context of the MA program, for example, when assessing an organization's business structure. We requested comments on whether a parent organization with less than a 100 percent interest in a subsidiary legal entity should trigger the prohibition we proposed with the amendment at § 422.503(b)(4).

During the public notice and comment process, a handful of commenters provided their input on our proposal. Some of the respondents included multiple comments. The comments and our responses follow.

Comment: A commenter supported the proposal, stating that it would prevent possible shifting of sicker enrollees to cost plans and should result in Medicare savings.

Response: We thank the commenter for the support.

Comment: A commenter stated that there is no evidence of complaints about the current situation and thus no change in current policy is necessary.

Response: The intention of our initial rule was to ensure that situations not arise in which an entity was able to move an enrollee from one of its plans to another plan in the same area based on financial or other reasons that may not be in the enrollee's best interest. The current regulations limit this possibility to some extent, but, without the

proposed changes, would leave open the possibility that legal entities controlled by a shared parent organization could move enrollees from one plan to another, based on something other than the enrollee's best interest.

Comment: A commenter stated that risk-adjusted payments for MA plans eliminate any incentive for an entity to move sicker enrollees from an MA plan to a cost plan.

Response: While risk adjusted payments do help to account for costs associated with sicker enrollees, it may still be advantageous for an organization to move an enrollee from an MA plan to a cost plan. Even with risk adjustment, there are other reasons an organization might want to move enrollees from one plan to another to include enrollment and other interests based on the organization's business model.

Comment: A commenter stated that, because cost plan cost-sharing and premiums must be equal to the actuarial value of Medicare fee-for-service cost-sharing, cost plan enrollees with high health care needs would have high relative costs resulting in higher premiums for the cost plan, thus removing any incentive for moving sicker enrollees from an entity's MA plan to the cost plan.

overpayment pending completion of the reopening.

Response: For both the Part C and Part D programs, the provisions regarding reporting and returning identified overpayments become effective the day after the date of applicable reconciliation. As we have stated, MA organizations and Part D sponsors are deemed to have returned the overpayment when they have submitted corrected data that is the source of the overpayment. We will recover the overpayment amount through routine processing. For Part D, that means that if an overpayment is discovered after the initial reconciliation but prior to the reopening described at § 423.346, a Part D sponsor may request a reopening and submit the corrected data to fulfill its obligation to return the overpayment. The overpayment will be reconciled through the routine reopening process.

Comment: A commenter stated that the onus on plans for the calculation of an overpayment amount creates a risk that CMS may be overpaid/underpaid in the monies returned.

Response: As explained in proposed rule (79 FR 1997), we will recover overpayments through the correction of erroneous data and established payment adjustment processes. Therefore, we believe that the risk the commenter mentions does not exist because CMS' systems will calculate the exact amount to be recovered.

Comment: A few commenters objected to the fact that the proposed rule does not address situations in which a sponsor has overpaid CMS, and requested that this regulation also set forth rules by which CMS handles an organization's overpayments to CMS.

Response: This final rule is intended to implement section 1128(d) of the Act, which pertains only to overpayments the government made to contracting MA organizations and Part D sponsors.

Comment: A commenter requested that MA organizations and Part D sponsors be able to submit auditable estimates of an overpayment in lieu of determining which data is in error and submitting corrected data, given the fact that the administrative costs of determining a specific set of data deletes is significant relative to the size of the issue. The commenter recommended that CMS permit plans to proactively suggest the use of such tools to resolve potential overpayments.

Response: The use of auditable estimates is intended only for a limited set of circumstances. This may occur, for example, when the Part D reopening occurs prior to the end of the look-back period or if an MA organization or Part

D sponsor had a thoroughly-documented catastrophic loss of stored data. Information about the nature of such a request would be detailed in forthcoming operational guidance. Therefore, we will not allow, on a routine basis, submission of auditable estimates in lieu of submission of corrected data. By recovering overpayments based on the corrected payment data, we will be more likely to ensure that the most accurate overpayment amounts are returned to the Medicare Trust Fund.

Comment: A commenter expressed concern that this final rule could impose a boundless duty to troll medical records in search of unknown vulnerabilities, and requested that CMS make clear that Part C and Part D plans are not obliged to proactively search for an overpayment without reason to believe that a specific overpayment exists.

Response: The focus of this final rule is on ensuring that MA and Part D organizations return an overpayment when it is identified. For many years organizations have been obliged to submit accurate, complete, and truthful payment-related data, as described at §§ 422.504(l) and 423.505(k). Further, CMS has required for many years that diagnoses that MA organizations submit for payment be supported by medical record documentation. Thus, we have always expected that MA organization or Part D sponsor implement, during the routine course of business, appropriate payment evaluation procedures in order to meet the requirement of certifying the data they submit to CMS for purposes of payment. Therefore, we do not believe that §§ 422.326 and 423.360 represent such a new requirement.

Comment: A commenter requested that CMS confirm that the data submission requirement under this section is based on enrollment data and risk adjustment scores, and thus does not apply to direct overpayments from providers.

Response: Once an overpayment is identified, the MA or Part D organization is responsible for correcting the data that caused the overpayment. This is data that is routinely submitted to CMS for payment purposes, such as, risk adjustment data.

Comment: A commenter requested that CMS clarify if changes in a beneficiary's low income subsidy (LIS) status could result in an overpayment under this provision.

Response: As we stated in the proposed rule, we believe that MA organizations and Part D sponsors cannot be held accountable for the accuracy of the data controlled and

submitted to CMS by other entities. (We emphasize here that the term "other entities" used to discuss these overpayment provisions does not include the following parties referenced in §§ 422.504(l) and 423.505(l): first tier, downstream, and related entities, contractors, or subcontractors to the MA organization or Part D sponsor.) It is the Social Security Administration and the states that notify CMS of individuals whom they have determined to be eligible for the Part D LIS. We in turn provide the subsidy information, including effective date and level of subsidy, to the Part D plan in which the beneficiary enrolls. Although, we will not consider an overpayment to have occurred strictly due to changes in a beneficiary's LIS status, Part D sponsors are required to adjust prescription drug event (PDE) data to accurately reflect the beneficiary's LIS status.

Comment: A commenter supported our proposal for when overpayments have been identified.

Response: We appreciate the commenter's support for our proposal.

Comment: A few commenters requested that CMS provide more clarity or an example of what is meant by "acts in reckless disregard or deliberate ignorance."

Response: We are revising our definition of an identified overpayment to state that an MA organization or Part D sponsor has identified an overpayment when it has determined, or should have determined through the exercise of reasonable diligence, that the MA organization or Part D sponsor has received an overpayment.

As to the circumstances that give rise to a duty to exercise reasonable diligence, we are not able to anticipate all factual scenarios in this rulemaking. MA organizations and Part D sponsors are responsible for ensuring that payment data they submit to CMS are accurate, truthful, and complete (based on best knowledge, information, and belief), and are expected to have effective and appropriate payment evaluation procedures and effective compliance programs as a way to avoid receiving or retaining overpayments. Thus, at a minimum, reasonable diligence would include proactive compliance activities conducted in good faith by qualified individuals to monitor for the receipt of overpayments. However, conducting proactive compliance activities does not mean that the person has satisfied the reasonable diligence standard in all circumstances. In certain circumstances, for example, reasonable diligence might require an investigation conducted in good faith and in a timely manner by

qualified individuals in response to credible information of a potential overpayment.

We note that in discussing the standard term "reasonable diligence" in the preamble, we are interpreting the obligation to "report and return the overpayment" which is contained in section 1128(d) of the Social Security Act. We are not seeking to interpret the terms "knowing" and "knowingly", which are defined in the Civil False Claims Act and have been interpreted by a body of False Claims Act case law.

Comment: Some commenters thought that we had an overly broad interpretation of the statute and that there was no statutory basis for CMS to interpret the term "identified" in section 6402 of the Affordable Care Act to include "reckless disregard or deliberate ignorance of the existence of the overpayment." A commenter stated that the term "knowing" is not actually used in the overpayment standard set forth in section 6402(d) of the Affordable Care Act, so the mere existence of an errant reference to the False Claims Act definition of "knowing" does not give CMS sufficient basis to apply the expansive False Claims Act knowledge standard to the definition of "identified" under section 6402. This commenter noted that in an earlier version of the Affordable Care Act, H.R. 3962, used the False Claims Act knowledge standard in the section on reporting and returning of overpayments. The commenter also stated that the final version of the Affordable Care Act enacted by the Congress used the term "identified," and not the word "knowledge." This commenter believed that the Congress's explicit rejection of the False Claims Act knowledge standard, and use of the term "identified" in the final legislative language weighs against incorporating the False Claims Act knowledge standard into the regulatory provision.

Response: We disagree with the commenters' arguments. While we acknowledge that the terms "knowing" and "knowingly" are defined but not otherwise used in section 1128(d), we believe that the Congress intended for section 1128(d) to apply broadly. If the requirement to report and return overpayments applied only to situations where the MA organization or Part D sponsor has actual knowledge of the existence of an overpayment, then these entities could easily avoid returning improperly received payments and the purpose of the section would be defeated. Thus, we decline to read a narrow actual knowledge limitation into the law as suggested by commenters.

Comment: Several commenters recommended that CMS remove the language relating to "reasonable diligence" from the proposed regulation. These commenters believed that an identified overpayment should be limited to actual knowledge of an overpayment.

Response: For the reasons discussed previously, we decline to read a narrow actual knowledge limitation into the law as suggested by commenters.

Comment: A few commenters were concerned that by adding a reasonable diligence requirement, CMS appears to be suggesting that a much lower level of sponsor behavior—a failure to act reasonably—could trigger potential False Claims Act liability. One commenter stated that the phrase "reasonable diligence" is not a recognized or defined standard and is overly vague as to the obligations of plans to follow through on information received regarding a potential overpayment. The commenters have serious concerns about the implication of such a standard.

Response: We understand the commenters' concerns. However, we do not believe that it is inappropriate to expect that MA organizations and Part D sponsors act reasonably. We note that it is the statute that establishes liability under the False Claims Act for failure to report and return identified overpayments, pursuant to section 1128(d)(3).

c. Look-Back Period for Reporting and Returning Overpayments

We proposed at §§ 422.326(e) and 423.360(e) to codify a look-back period for MA organizations and Part D sponsors. MA organizations and Part D sponsors would be required to report and return any overpayment that they identify within the 6 most recent completed payment years. The statute of limitations related to the False Claims Act is 6 years from the date of the violation or 3 years from the date the relevant government official learns of the situation, but in no case more than 10 years from the date of the violation. CMS proposed 6 years as the look-back period because we believe this best balances government's interest in having overpayments returned with entities' interest in finality. Six years also is consistent with the CMP provisions, and maintenance of records requirements under the contracts. We also proposed that overpayments resulting from fraud would not be subject to this limitation of a look-back period.

We received the following comments on the look-back period, and our responses follow.

Comment: We received a few comments recommending that we shorten the 6-year look-back period. A commenter noted that permitting greater finality in overpayment reporting and recovery will decrease administrative costs and free up resources to focus on benefits. This commenter also stated that an organization would have to retain a significant amount of documentation to fully support and justify payments, more than what they would retain under CMS's 10-year record retention requirement. Several commenters recommended that the look-back period be 3 years to align with the RAC look-back period. A commenter noted that the 3-year period would also be consistent with the federal government's treatment of government contractors that are subject to the Federal Acquisition Regulation. A couple of commenters recommended that we implement a 4-year look-back period to align with the 4-year period that Medicare Administrative Contractors can reopen Medicare fee-for-service payment determinations.

Response: We disagree with the commenters' recommendations to shorten the look-back period. We note that section 1128(d) of the Act has no time limit to the obligation to report and return overpayments received by a provider or supplier. However, as we stated in the preamble to our proposed rule and again in this preamble to our final rule, we proposed 6 years as the look-back period because we believe this best balances government's interest in having overpayments returned with entities' interest in finality. Six years is consistent with the CMP provisions, and maintenance of records requirements under the contracts. It is also consistent with the False Claims Act in that the statute of limitations related to the False Claims Act is 6 years from the date of the violation or 3 years from the date the relevant government official learns of the situation, but in no case more than 10 years from the date of the violation. We believe that our final rule does not create additional recordkeeping burden or cost. Under § 422.504(d) and § 423.505(d), MA organizations and Part D sponsors are required to maintain for 10 years books, records, documents, and other evidence of accounting procedures and practices related to costs, financial statements, cash flow, etc.

Comment: A commenter requested that CMS clarify the parameters of the 6-year look-back provision.

Response: As we stated in the preamble to the proposed rule and this

final rule and again in §§ 422.326(e) and 423.360(e), MA organizations and Part D sponsors are required to report and return any overpayment that they identify within the 6 most recent completed payment years. That would mean, for example, after the initial reconciliation that takes place for Part D payments (that is, the determination on the final amount of direct subsidy described in § 423.329(a)(1), final reinsurance payments described in § 423.329(c), the final amount of the low income subsidy described in § 423.329(d), or final risk corridor payments as described in § 423.336) for contract year 2015 (which will take place at the end of 2016), Part D sponsors are obligated to report and return overpayments under § 423.360 for contract years 2010 through 2015.

Comment: A few commenters recommended that CMS impose the same limitation on the look-back period for all overpayments, even those relating to fraud. A commenter noted that under the statutory scheme set forth in section 6402 of the Affordable Care Act, the existence of an overpayment does not depend on, or otherwise reflect, the existence of fraud. Commenters also requested clarification from CMS whether MA organizations and Part D sponsors that become aware of an overpayment prior to the look-back period have an obligation to investigate and determine whether that overpayment resulted from fraud. These commenters were concerned that MA organizations and Part D sponsors would have to investigate potential overpayments indefinitely, no matter how far in the past they may have occurred, because these organizations would have to determine whether there was any fraud in connection with the potential overpayment in order to determine whether a reporting obligation exists.

Response: Upon further review, we agree with the commenters' suggestion that CMS impose the same limitation on the look-back period for all overpayments. Six years is consistent with the more commonly applicable FCA statute of limitations as well as the statute of limitations under section 1128A of the Act. Therefore, we have elected to establish a 6-year look-back period regardless of the nature of the overpayment, and we have amended the regulation text at §§ 422.326(e) and 423.360(e) accordingly. We note that the government may have other avenues for pursuing the return of overpayments due to false and fraudulent claims outside of these provisions.

Finally, we note that an MA organization's and Part D sponsor's

obligation to investigate and identify false and fraudulent claims is outside the scope of this final rule.

After consideration of the public comments received on the overpayment provisions, we are finalizing as proposed the following provisions: §§ 422.1, 422.300, 422.504(l), 423.1, and 423.505(k). We are finalizing the provisions at § 422.326, with the following modifications. First, we add at the end of paragraph (d) the phrase "unless otherwise directed by CMS for the purpose of § 422.311." Second, we strike the following sentences in the proposed paragraph on the six-year look-back period: "Overpayments resulting from fraud are not subject to this limitation of the lookback period." To increase clarity we also revise paragraph (c) regarding identified overpayments. We also are making a technical correction by redesignating proposed paragraph (d)(3) on enforcement as paragraph (e), and redesignating proposed paragraph (e) on the six-year look-back period as paragraph (f), and revising new paragraph (e) on enforcement to say "Any overpayment retained by an MA organization is an obligation under 31 U.S.C. 3729(b)(3) if not reported and returned in accordance with paragraph (d) above."

Finally, we are finalizing the provisions at § 423.360 with the following modifications. We strike the following sentence in the proposed paragraph on the six-year look-back period: "Overpayments resulting from fraud are not subject to this limitation of the lookback period." To increase clarity we also revise paragraph (c) regarding identified overpayments. We also are making a technical correction by redesignating proposed paragraph (d)(3) on enforcement as paragraph (e), and redesignating proposed paragraph (e) on the six-year look-back period as paragraph (f), and revising new paragraph (e) on enforcement to say "Any overpayment retained by a Part D sponsor is an obligation under 31 U.S.C. 3729(b)(3) if not reported and returned in accordance with paragraph (d)."

2. Risk Adjustment Data Requirements (§ 422.310)

We proposed several amendments to § 422.310 to strengthen existing regulations related to the accuracy of risk adjustment data. We proposed to renumber existing paragraph § 422.310(e) as paragraph (e)(2) and add new paragraph (e)(1), which would require that any medical record reviews conducted by an MA organization must be designed to determine the accuracy of diagnoses submitted under

§§ 422.308(c)(1) and 422.310(g)(2). Under our proposal, medical record reviews conducted by an MA organization could not be designed *only* to identify diagnoses that would trigger additional payments by CMS to the MA organization; medical record review methodologies would have to be designed to identify errors in diagnoses submitted to CMS as risk adjustment data, regardless of whether the data errors would result in positive or negative payment adjustments.

We also proposed to amend § 422.310(g) regarding deadlines for submission of risk adjustment data; our proposal was to restructure and revise subparagraph (g)(2) and add subparagraph (g)(3). Our current procedures generally permit submission of risk adjustment data after the final risk adjustment submission deadline only to correct overpayments. Thus, we proposed, at § 422.310(g)(2)(ii) to explicitly permit late submissions only to correct overpayments but not to submit diagnoses for additional payment so that the regulation text would be consistent with our procedures.

Finally, we proposed to make two additional changes in paragraph (g). First, we proposed the deletion of the January 31 deadline in paragraph (2) and replacing it with the statement that CMS will announce the deadline by which final risk adjustment data must be submitted to CMS or its contractor. We noted that the risk adjustment data submission deadline would also function as the Part C applicable reconciliation date for purposes of proposed § 422.326 on overpayment rules, also discussed in this final rule. Second, we proposed adding paragraph (3) to § 422.310(g). Proposed paragraph (3) cites § 422.326 as the source of rules for submission of corrected risk adjustment data after the final risk adjustment data submission deadline, that is, after applicable reconciliation as defined at § 422.326(a).

In response to the January 10, 2014 proposed rule, we received approximately 25 pieces of correspondence from organizations and individuals regarding these proposals. We received the following public comments and our responses follow.

Comment: Many commenters expressed concern about the vagueness and overly broad statement of CMS' proposal to amend § 422.310(e) to require that medical record reviews conducted by MA organizations be designed to determine the accuracy of diagnoses they submitted to CMS. Some commenters thought this implied a requirement to verify every diagnosis

submitted by every provider, while others thought this implied a restriction on the ability of plans to identify what medical records to review. Other commenters believed the proposed amendment limited plans' ability to review medical records for operational purposes other than risk-adjusted payment, such as focusing on only a portion of a medical record for a subset of beneficiaries in order to enhance HEDIS scores, conduct contract compliance reviews, and validate claims processing and billing.

Finally, a few commenters argued that CMS should offset the payment impact of diagnoses an MA organization submitted to CMS that were later found through medical record reviews to not be supported by medical record documentation by adjusting the amount of CMS' overpayment to the MA organization for the level of error in equivalent diagnoses in FFS claims data. Specifically, the commenters argued that CMS should give MA organizations a credit for erroneous diagnoses they submitted from their providers' claims up to the rate identified by CMS as the applicable FFS Adjustor in the RADV program. The commenters also argued that there is no reason to require that both MA and FFS diagnosis data be scrutinized for error rates when determining retroactive payment adjustments, while not engaging in a similar adjustment process when paying plans prospectively.

Response: We thank the commenters for their input. We are not finalizing the proposed amendment to § 410.322(e).

However, we emphasize that our decision to not finalize this regulatory proposal does not change CMS' existing contractual requirement that MA organizations must certify (based on best knowledge, information, and belief) the accuracy, completeness, and truthfulness of the risk adjustment data they submit to CMS. Further, this decision does not change the long-standing risk adjustment data requirement that a diagnosis submitted to CMS by an MA organization for payment purposes must be supported by medical record documentation.

Comment: A few commenters supported CMS' proposal to remove the current date of January 31 as the annual final risk adjustment data submission deadline and replace it with the provision that CMS will announce the deadline annually, with the proviso that CMS' timing of this annual deadline always allows sufficient opportunity for organizations to make final data submissions. Several other commenters stated their concern about this proposed change in deadline, including a concern

that CMS might announce a deadline earlier than January 31 in some years. These commenters requested that CMS clarify that the annual deadline would never be before January 31, and a few commenters suggested that the regulation state that the deadline is January 31 but may be extended. Finally, a few commenters requested that CMS not change the January 31 date to a floating date, in order to allow operational stability.

Response: We are not finalizing this proposal at this time.

Comment: Many commenters disagreed with CMS' proposal under § 410.322(g)(2) that, after the final risk adjustment data submission deadline, CMS would permit submission of data to correct overpayments but not permit late submission of diagnosis data that would result in additional payment, asserting that this asymmetrical approach does not promote CMS' stated goal of improving payment accuracy. The commenters maintained that an MA organization should be allowed to submit additional diagnoses after the final risk adjustment data submission deadline to correct not only an overpayment to the MA organization, but also an underpayment. A commenter recommended that, after the final deadline, MA organizations should be able to submit paired deletions-additions of diagnoses as long as the result is not an increased payment to the organization but a smaller reduction in payment than would otherwise occur if only the deletion were submitted; for example, an MA organization may want to delete the diagnosis code for diabetes with acute complications and replace it with the code for diabetes without complications so that it loses only some of the payment. Finally, a commenter requested that CMS allow exceptions to the general rule that no new diagnoses may be submitted after the final risk adjustment data submission deadline for special circumstances such as system failures, file formatting issues, and other technical problems.

Response: For a given payment year (which is a calendar year), CMS applies diagnoses from the previous year (the data collection year) to calculate beneficiary risk scores used to risk-adjust payments to MA organizations in the payment year. MA organizations must finalize any corrections and new submissions of diagnosis data for a data collection year by January 31 of the year after the payment year. That is, we allow 13 months after the end of the diagnosis year for MA organizations to identify errors in data they have submitted (that is, deleting diagnoses from CMS' systems) and to identify and

submit additional diagnoses that were not submitted during the diagnosis year. We believe that is a very reasonable period of time to finalize risk adjustment data for a diagnosis year.

These risk adjustment processes have been in place for many years, and we believe it is the responsibility of MA organizations to have internal audit processes in place allowing them to finalize their risk adjustment data for a payment year by the conclusion of this 13-month period. Therefore, we are finalizing, as proposed, the provision codified at § 422.310(g)(2)(i) that, after the final deadline, an MA organization may submit risk adjustment data to correct overpayments but not to add payments.

Comment: A commenter supported CMS' proposal to limit post-deadline modifications to deletions of incorrect diagnoses but requested that CMS offer one additional opportunity to eliminate unsupported diagnosis codes in advance of a RADV audit.

Response: When we are preparing to initiate a RADV audit cycle, all MA organizations are notified that they should eliminate unsupported diagnoses from CMS' systems by a date specified in the notice. Subsequently, we inform the contracts that have been selected for RADV.

In summary, after consideration of the public comments received, we are not finalizing the proposed amendment to § 410.322(e). Also, we are not finalizing at this time our proposal at § 422.310(g)(2)(ii) to remove the current date of January 31 as the annual final risk adjustment data submission deadline and replace it with the provision that CMS will announce the deadline annually. We are finalizing as proposed the restructuring of §§ 422.310(g)(2) and the 422.310(g)(2)(ii) provision to prohibit submission of diagnoses for additional payment after the final risk adjustment data submission deadline. We did not receive any comments on subparagraph (g)(3) and are finalizing it as proposed.

3. RADV Appeals

a. Background

We published final Risk Adjustment Data Validation (RADV) appeals regulations in the April 15 2010 *Federal Register* (75 FR 19677). These rules were proposed and finalized under our authority to establish Medicare Advantage (MA) program standards at section 1856(b)(1) of the Act and are found at § 422.311 et seq. Since finalizing these rules in 2010, we conducted additional RADV audits and determined that some of the appeals

provisions finalized in the 2010 RADV Appeals final rule should be modified to strengthen and streamline the RADV appeals process and to prevent confusion. Therefore, we proposed revisions to the RADV appeals regulations on January 10, 2014. These proposed RADV provisions will apply to any RADV determinations issued on or after the effective date of this regulation.

We proposed changing certain RADV definitions at § 422.2. Specifically, we proposed removing the definition Initial Validation Contractor (IVC); removing the definition of RADV payment error calculation appeal process; and removing the definition of "One Best Medical Record for the purposes of Medicare Advantage Risk Adjustment Data Validation (RADV)". In addition, we proposed adding one new definition by specifically defining the RADV appeals process. We also proposed revising the definitions of "Risk Adjustment Data Validation (RADV)" and "attestation process" within the RADV appeals context. Furthermore, we proposed amending RADV definitions at § 422.2 to specify that the Secretary, along with CMS, could conduct RADV audits.

At § 422.311, we proposed to update select RADV appeals terminology. We proposed amending the RADV regulations by adopting one common term to refer to RADV audit reports: "RADV Audit Report". As mentioned earlier, we proposed removing from the RADV regulations the term—"Initial Validation Contractor, or IVC," since RADV medical record review process no longer utilizes "initial" and "secondary" validation contractors to conduct medical record review under RADV. Instead, we now utilize medical record reviewers to code medical records who may be employed by the same or different medical record review contractors.

At § 422.311(c)(1), we proposed to simplify the RADV appeals process by combining the two existing RADV appeal procedures—one for medical record review and one for payment error calculation—into one set of requirements and one process comprised of three administrative steps: Reconsideration, hearing officer review, and CMS Administrator-level review. Combining these existing RADV medical record review determination and payment error calculation appeals policies and processes improves the overall appeals process by simplifying the overall RADV appeals process and reducing burden on all parties involved in the RADV appeals process. We also believed that doing so improves overall

RADV appeals procedures by providing clarity that leads to greater efficiencies in adjudicating RADV appeals. Within this overall framework, we also proposed defining issues that would be eligible for RADV appeal at § 422.311(c)(2) and issues that would not be eligible for RADV appeals under this combined-appeal process at § 422.311(c)(3). We further proposed defining the manner and timing of a request for RADV appeal at § 422.311(c)(2)(iii), a reconsideration process at § 422.311(c)(6), a hearing process at § 422.311(c)(7)(iv), and an Administrator-level review at § 422.311(c)(8).

At § 422.311(a), we proposed that the Secretary, along with CMS, be permitted to conduct RADV audits beginning with the effective date of this regulation. Because of the absence of a clearly-defined burden of proof standard for RADV medical record review determination appeals, at § 422.311(c)(4) we proposed adoption of a burden of proof standard for all RADV determinations—be they payment error calculation or RADV medical record review determinations—whereby the burden would be on MA organizations to prove, based on a preponderance of the evidence, that CMS's determination(s) was (were) erroneous. At § 422.311(b)(2) we proposed changing the compliance date for meeting RADV audit requirements for the validation of risk adjustment data to the due date when MA organizations selected for RADV audit must submit medical records to the Secretary—and not only CMS.

We received comments from health plans, managed care industry trade associations, providers, provider trade associations and other interested parties. These comments have resulted in changes to the previously described proposals, as discussed later in this section. Some of the comments we received did not apply to the proposed RADV appeals processes. However, because some of these comments apply to underlying RADV audit process, we are responding to certain comments because they appear to be relevant to the RADV appeals process. Other comments were clearly outside the scope of our proposed rule, so we have not included responses to those comments.

b. RADV Definitions

We proposed to amend the RADV definitions at § 422.2 as follows:

- Removing the following definitions:
 - ++ "Initial Validation Contractor (IVC)" means the first level of medical record review under the RADV audit process.

- ++ "RADV payment error calculation appeal process" means an administrative process that enables MA organizations that have undergone RADV audit to appeal the CMS calculation of an MA organization's RADV payment error.

- ++ "The one best medical record for the purposes of Medicare Advantage Risk Adjustment Validation (RADV)" means the clinical documentation for a single encounter for care (that is, a physician office visit, an inpatient hospital stay, or an outpatient hospital visit) that occurred for one patient during the data collection period. The single encounter for care must be based on a face-to-face encounter with a provider deemed acceptable for risk adjustment and documentation of this encounter must be reflected in the medical record.

- Adding the following definition:

- ++ "RADV appeal process" means an administrative process that enables MA organizations that have undergone RADV audit to appeal the Secretary's medical record review determinations and the Secretary's calculation of an MA organization's RADV payment error.

- Revising the following definitions:

- ++ Risk adjustment data validation (RADV) audit means a payment audit of a Medicare Advantage (MA) organization administered by CMS or the Secretary that ensures the integrity and accuracy of risk adjustment payment data.

- ++ "Attestation process" means a CMS-developed RADV process that enables MA organizations undergoing RADV audit to submit CMS-generated attestations for eligible medical records with missing or illegible signatures or credentials. The purpose of the CMS-generated attestations is to cure signature and credential issues for eligible medical records. CMS-generated attestations do not provide an opportunity for a provider or supplier to replace a medical record or for a provider or supplier to attest that a beneficiary has the medical condition.

We received no comments specifically recommending modifications to the proposed definitions as stated, though we did receive comments regarding the policy behind some of these definition changes. The policy comments will be addressed later in this rule, though we are finalizing the specific definitions without modification.

c. Publication of RADV Methodology

In the October 22, 2009 proposed rule, and as reinforced in the April 15, 2010 final rule, we indicated that we would, "publish its RADV methodology in some type of public document—most

likely, a Medicare Manual, so that the public can review and provide comment as it deems necessary". We also indicated that we would provide an annual notice of RADV audit methodology. Our last RADV-related notice of methodology was published in February 2012. We will continue to publish a notice of the methodology employed, but will do so only if there is a change in the RADV methodology that would require publication. We note that these notices of RADV audit methodology updated information provided on RADV audit methodology provided in the October 22, 2009 proposed rule and April 15, 2010 final rule.

In addition, we provided in the October 22, 2009 proposed rule preamble that we would provide an expanded explanation of methodology and payment error calculation factors as a part of each audit report of findings that we send to MA organizations that undergo RADV audit. Such explanation and factors have been and will continue to be part of the RADV audit report(s) that CMS provides health plans that have undergone RADV audits.

d. Proposal To Update RADV Appeals Terminology (§ 422.311)

Current RADV regulations utilize the following terms for the CMS-issued RADV audit report: Audit report post medical record review; RADV audit report; IVC-level RADV audit report; and RADV audit report of finding. This use of multiple terms to refer to what is the same audit report (the RADV audit report that CMS issues following conclusion of the medical record review portion of the audit) is potentially confusing. Therefore, we proposed amending the RADV regulations throughout to adopt one common term to refer to RADV audit reports: "RADV Audit Report". By standardizing terminology throughout the RADV regulations, the proposed amendment provides clarity which may lead to increased efficiency.

As mentioned earlier in the description of RADV-related definitions that have changed, we have revised certain RADV-related definitions to accommodate changes to both the RADV audit process and the RADV appeals process. One definition that we have removed from the RADV regulations is Initial Validation Contractor, or IVC. The RADV medical record review process no longer utilizes "initial" and "secondary" validation contractors to conduct medical record review under RADV. Instead we now utilize medical record reviewers to code medical records undergoing RADV review.

These reviewers may be employed by the same or different medical record review contractors. Therefore, the term "IVC" is no longer relevant to the RADV audit process. As a result, we proposed to remove this term from the RADV regulations at the following citations: § 422.311(c)(2)(i)(B) through (D); § 422.311(c)(2)(ii)(B); § 422.311(c)(2)(iii)(A), § 422.311(c)(2)(v), (vi), § 422.311(c)(3)(ii)(A), and § 422.311(c)(3)(iii)(A) and (B). We invited comment on this proposal.

Comment: A commenter requested that CMS verify that the medical record review error determination standard, which presently requires multiple review determinations by independent coders to confirm a CMS-HCC coding error, remains in effect and is not altered by this proposed rule.

Response: While we did not propose RADV coding changes, we believe the question merits a response. We believe that our proposal to remove the definition of "Initial Validation Contractor" (IVC) may have led some to believe that we were abandoning RADV audit processes that require multiple levels of independent medical record review (coding) by independent reviewers before we will confirm a CMS-HCC coding error. This standard has not changed, notwithstanding the removal of the term IVC from the RADV appeals rules. We continue to utilize medical record reviewers to code medical records undergoing RADV review, though these reviewers may now be employed by the same or different medical record review contractors. The principle of independent review and multiple confirmations of an identified CMS-HCC remain in effect.

e. Proposal To Simplify the RADV Appeals Process
