b	Did the sponsoring organization make a distribution to a donor, donor advisor, or related person?	9b				
10	Section 501(c)(7) organizations. Enter:					
a	Initiation fees and capital contributions included on Part VIII, line 12	10a				
b	Gross receipts, included on Form 990, Part VIII, line 12, for public use of club facilities	10b				
11	Section 501(c)(12) organizations. Enter:					
a	Gross income from members or shareholders	11a				
b	Gross income from other sources. (Do not net amounts due or paid to other sources against amounts due or received from them.)	11b				
12a	Section 4947(a)(1) non-exempt charitable trusts. Is the organization filing Form 990 in lieu of Form 1041?	12a				
b	If "Yes," enter the amount of tax-exempt interest received or accrued during the year.	12b				
13	Section 501(c)(29) qualified nonprofit health insurance issuers.					
a	Is the organization licensed to issue qualified health plans in more than one state? Note. See the instructions for additional information the organization must report on Schedule O.	13a				
b	Enter the amount of reserves the organization is required to maintain by the states in which the organization is licensed to issue qualified health plans	13b				
c	Enter the amount of reserves on hand	13c				
14a	Did the organization receive any payments for indoor tanning services during the tax year?	14a			No	
b	If "Yes," has it filed a Form 720 to report these payments? <i>If "No," provide an explanation in Schedule O</i>	14b				
15	Is the organization subject to the section 4960 tax on payment(s) of more than \$1,000,000 in remuneration or excess parachute payment(s) during the year? If "Yes," see the instructions and file Form 4720, Schedule N.	15			No	
16	Is the organization an educational institution subject to the section 4968 excise tax on net investment income? . . . If "Yes," complete Form 4720, Schedule O.	16			No	
17	Section 501(c)(21) organizations. Did the trust, or any disqualified or other person engage in any activities that would result in the imposition of an excise tax under section 4951, 4952, or 4953? . . . If "Yes," complete Form 6069.	17				

Section A. Governing Body and Management

		Yes	No
1a	Enter the number of voting members of the governing body at the end of the tax year If there are material differences in voting rights among members of the governing body, or if the governing body delegated broad authority to an executive committee or similar committee, explain in Schedule O.	18	
1b	Enter the number of voting members included in line 1a, above, who are independent	18	
2	Did any officer, director, trustee, or key employee have a family relationship or a business relationship with any other officer, director, trustee, or key employee?	2	No
3	Did the organization delegate control over management duties customarily performed by or under the direct supervision of officers, directors or trustees, or key employees to a management company or other person?	3	No
4	Did the organization make any significant changes to its governing documents since the prior Form 990 was filed?	4	No
5	Did the organization become aware during the year of a significant diversion of the organization's assets?	5	No
6	Did the organization have members or stockholders?	6	No
7a	Did the organization have members, stockholders, or other persons who had the power to elect or appoint one or more members of the governing body?	7a	No
7b	Are any governance decisions of the organization reserved to (or subject to approval by) members, stockholders, or persons other than the governing body?	7b	No
8	Did the organization contemporaneously document the meetings held or written actions undertaken during the year by the following:		
8a	The governing body?	8a	Yes
8b	Each committee with authority to act on behalf of the governing body?	8b	Yes
9	Is there any officer, director, trustee, or key employee listed in Part VII, Section A, who cannot be reached at the organization's mailing address? If "Yes," provide the names and addresses in Schedule O	9	No

Section B. Policies (This Section B requests information about policies not required by the Internal Revenue Code.)

	Yes	No	
10a	Did the organization have local chapters, branches, or affiliates?	10a	No
10b	If "Yes," did the organization have written policies and procedures governing the activities of such chapters, affiliates, and branches to ensure their operations are consistent with the organization's exempt purposes?	10b	
11a	Has the organization provided a complete copy of this Form 990 to all members of its governing body before filing the form?	11a	Yes
11b	Describe on Schedule O the process, if any, used by the organization to review this Form 990.		
12a	Did the organization have a written conflict of interest policy? If "No," go to line 13	12a	Yes
12b	Were officers, directors, or trustees, and key employees required to disclose annually interests that could give rise to conflicts?	12b	Yes
12c	Did the organization regularly and consistently monitor and enforce compliance with the policy? If "Yes," describe on Schedule O how this was done	12c	Yes
13	Did the organization have a written whistleblower policy?	13	Yes
14	Did the organization have a written document retention and destruction policy?	14	Yes
15	Did the process for determining compensation of the following persons include a review and approval by independent persons, comparability data, and contemporaneous substantiation of the deliberation and decision?		
15a	The organization's CEO, Executive Director, or top management official	15a	Yes
15b	Other officers or key employees of the organization	15b	Yes
	If "Yes" to line 15a or 15b, describe the process on Schedule O. See instructions.		
16a	Did the organization invest in, contribute assets to, or participate in a joint venture or similar arrangement with a taxable entity during the year?	16a	No
16b	If "Yes," did the organization follow a written policy or procedure requiring the organization to evaluate its participation in joint venture arrangements under applicable federal tax law, and take steps to safeguard the organization's exempt status with respect to such arrangements?	16b	

Section C. Disclosure

17 List the states with which a copy of this Form 990 is required to be filed

AL, AR, CA, FL, GA, HI, IL, KS, KY, MD, MA, MI, MN, MS, NH, NJ, NM, NY, NC, OR, PA, RI, SC, TN, UT, VA, WV, WI, CT, ND

18 Section 6104 requires an organization to make its Form 1023 (1024 or 1024-A, if applicable), 990, and 990-T (section 501(c)(3)s only) available for public inspection. Indicate how you made these available. Check all that apply.

☐ Own website ☐ Another's website ☒ Upon request ☐ Other (explain in Schedule O)

19 Describe in Schedule O whether (and if so, how) the organization made its governing documents, conflict of interest policy, and financial statements available to the public during the tax year.

20 State the name, address, and telephone number of the person who possesses the organization's books and records:

LEAH BINDER THE LEAPFROG GROUP 1775 K STREET NW 400 WASHINGTON, DC 20006 (202) 292-6713

Part VII Compensation of Officers, Directors, Trustees, Key Employees, Highest Compensated Employees, and Independent Contractors

Check if Schedule O contains a response or note to any line in this Part VII ☐

Section A. Officers, Directors, Trustees, Key Employees, and Highest Compensated Employees

1a Complete this table for all persons required to be listed. Report compensation for the calendar year ending with or within the organization's tax year.

- List all of the organization's **current** officers, directors, trustees (whether individuals or organizations), regardless of amount of compensation. Enter -0- in columns (D), (E), and (F) if no compensation was paid.
- List all of the organization's **current** key employees, if any. See the instructions for definition of "key employee."
- List the organization's five **current** highest compensated employees (other than an officer, director, trustee or key employee) who received reportable compensation (box 5 of Form W-2, box 6 of Form 1099-MISC, and/or box 1 of Form 1099-NEC) of more than \$100,000 from the organization and any related organizations.
- List all of the organization's **former** officers, key employees, or highest compensated employees who received more than \$100,000 of reportable compensation from the organization and any related organizations.
- List all of the organization's **former directors or trustees** that received, in the capacity as a former director or trustee of the organization, more than \$10,000 of reportable compensation from the organization and any related organizations.

See the instructions for the order in which to list the persons above.

☐ Check this box if neither the organization nor any related organization compensated any current officer, director, or trustee.

(A) Name and title	(B) Average hours per week (list any hours for related organizations below dotted line)	(C) Position (do not check more than one box, unless person is both an officer and a director/trustee)						(D) Reportable compensation from the organization (W-2/1099-MISC/1099-NEC)	(E) Reportable compensation from related organizations (W-2/1099-MISC/1099-NEC)	(F) Estimated amount of other compensation from the organization and related organizations

(Form 990)

Public Charity Status and Public Support

Complete if the organization is a section 501(c)(3) organization or a section 4947(a)(1) nonexempt charitable trust.
▶ Attach to Form 990 or Form 990-EZ.
▶ Go to www.irs.gov/Form990 for instructions and the latest information.

2022

Open to Public Inspection

Department of the Treasury
Internal Revenue Service

Name of the organization
THE LEAPFROG GROUP

Employer identification number
52-2359517

Part I

Reason for Public Charity Status (All organizations must complete this part.) See instructions.

The organization is not a private foundation because it is: (For lines 1 through 12, check only one box.)

- 1 ☐ A church, convention of churches, or association of churches described in **section 170(b)(1)(A)(i).**
- 2 ☐ A school described in **section 170(b)(1)(A)(ii).** (Attach Schedule E (Form 990).)
- 3 ☐ A hospital or a cooperative hospital service organization described in **section 170(b)(1)(A)(iii).**
- 4 ☐ A medical research organization operated in conjunction with a hospital described in **section 170(b)(1)(A)(iii).** Enter the hospital's name, city, and state:
- 5 ☐ An organization operated for the benefit of a college or university owned or operated by a governmental unit described in **section 170(b)(1)(A)(iv).** (Complete Part II.)
- 6 ☐ A federal, state, or local government or governmental unit described in **section 170(b)(1)(A)(v).**
- 7 ☐ An organization that normally receives a substantial part of its support from a governmental unit or from the general public described in **section 170(b)(1)(A)(vi).** (Complete Part II.)
- 8 ☐ A community trust described in **section 170(b)(1)(A)(vi).** (Complete Part II.)
- 9 ☐ An agricultural research organization described in **170(b)(1)(A)(ix)** operated in conjunction with a land-grant college or university or a non-land grant college of agriculture. See instructions. Enter the name, city, and state of the college or university:
- 10 ☒ An organization that normally receives: (1) more than 33 1/3% of its support from contributions, membership fees, and gross receipts from activities related to its exempt functions—subject to certain exceptions, and (2) no more than 33 1/3% of its support from gross investment income and unrelated business taxable income (less section 511 tax) from businesses acquired by the organization after June 30, 1975. See **section 509(a)(2).** (Complete Part III.)
- 11 ☐ An organization organized and operated exclusively to test for public safety. See **section 509(a)(4).**
- 12 ☐ An organization organized and operated exclusively for the benefit of, to perform the functions of, or to carry out the purposes of one or more publicly supported organizations described in **section 509(a)(1)** or **section 509(a)(2).** See **section 509(a)(3).** Check the box on lines 12a through 12d that describes the type of supporting organization and complete lines 12e, 12f, and 12g.
- a ☐ **Type I.** A supporting organization operated, supervised, or controlled by its supported organization(s), typically by giving the supported organization(s) the power to regularly appoint or elect a majority of the directors or trustees of the supporting organization. **You must complete Part IV, Sections A and B.**
- b ☐ **Type II.** A supporting organization supervised or controlled in connection with its supported organization(s), by having control or management of the supporting organization vested in the same persons that control or manage the supported organization(s). **You must complete Part IV, Sections A and C.**
- c ☐ **Type III functionally integrated.** A supporting organization operated in connection with, and functionally integrated with, its supported organization(s) (see instructions). **You must complete Part IV, Sections A, D, and E.**
- d ☐ **Type III non-functionally integrated.** A supporting organization operated in connection with its supported organization(s) that is not functionally integrated. The organization generally must satisfy a distribution requirement and an attentiveness requirement (see instructions). **You must complete Part IV, Sections A and D, and Part V.**
- e ☐ Check this box if the organization received a written determination from the IRS that it is a Type I, Type II, Type III functionally integrated, or Type III non-functionally integrated supporting organization.
- f Enter the number of supported organizations
- g Provide the following information about the supported organization(s).

(i) Name of supported organization	(ii) EIN	(iii) Type of organization (described on lines 1- 10 above (see instructions))	(iv) Is the organization listed in your governing document?		(v) Amount of monetary support (see instructions)	(vi) Amount of other support (see instructions)
			Yes	No		
Total						

(Complete only if you checked the box on line 5, 7, or 8 of Part I or if the organization failed to qualify under Part III. If the organization failed to qualify under the tests listed below, please complete Part III.)

Section A. Public Support

Calendar year (or fiscal year beginning in) ►	(a) 2018	(b) 2019	(c) 2020	(d) 2021	(e) 2022	(f) Total
1 Gifts, grants, contributions, and membership fees received. (Do not include any "unusual grant.") . . .						
2 Tax revenues levied for the organization's benefit and either paid to or expended on its behalf. . . .						
3 The value of services or facilities furnished by a governmental unit to the organization without charge..						
4 Total. Add lines 1 through 3						
5 The portion of total contributions by each person (other than a governmental unit or publicly supported organization) included on line 1 that exceeds 2% of the amount shown on line 11, column (f) . .						
6 Public support. Subtract line 5 from line 4.						

Section B. Total Support

Calendar year (or fiscal year beginning in) ►	(a) 2018	(b) 2019	(c) 2020	(d) 2021	(e) 2022	(f) Total
7 Amounts from line 4. . .						
8 Gross income from interest, dividends, payments received on securities loans, rents, royalties and income from similar sources. . . .						
9 Net income from unrelated business activities, whether or not the business is regularly carried on. .						
10 Other income. Do not include gain or loss from the sale of capital assets (Explain in Part VI.). . .						
11 Total support. Add lines 7 through 10						

12 Gross receipts from related activities, etc. (see instructions) 12

13 First 5 years. If the Form 990 is for the organization's first, second, third, fourth, or fifth tax year as a section 501(c)(3) organization, check this box and stop here ☐

Section C. Computation of Public Support Percentage

14 Public support percentage for 2022 (line 6, column (f) divided by line 11, column (f))	14	
15 Public support percentage for 2020 Schedule A, Part II, line 14	15	

16a 33 1/3% support test—2022. If the organization did not check the box on line 13, and line 14 is 33 1/3% or more, check this box and stop here. The organization qualifies as a publicly supported organization ☐

b 33 1/3% support test—2021. If the organization did not check a box on line 13 or 16a, and line 15 is 33 1/3% or more, check this box and stop here. The organization qualifies as a publicly supported organization ☐

17a 10%-facts-and-circumstances test—2022. If the organization did not check a box on line 13, 16a, or 16b, and line 14 is 10% or more, and if the organization meets the "facts-and-circumstances" test, check this box and stop here. Explain in Part VI how the organization meets the "facts-and-circumstances" test. The organization qualifies as a publicly supported organization ☐

b 10%-facts-and-circumstances test—2021. If the organization did not check a box on line 13, 16a, 16b, or 17a, and line 15 is 10% or more, and if the organization meets the "facts-and-circumstances" test, check this box and stop here. Explain in Part VI how the organization meets the "facts-and-circumstances" test. The organization qualifies as a publicly supported organization ☐

18 Private foundation. If the organization did not check a box on line 13, 16a, 16b, 17a, or 17b, check this box and see instructions ☐

Part III

Support Schedule for Organizations Described in Section 509(a)(2)

(Complete only if you checked the box on line 10 of Part I or if the organization failed to qualify under Part II. If the organization fails to qualify under the tests listed below, please complete Part II.)

Section A. Public Support						
Calendar year (or fiscal year beginning in) ►	(a) 2018	(b) 2019	(c) 2020	(d) 2021	(e) 2022	(f) Total
1 Gifts, grants, contributions, and membership fees received. (Do not include any "unusual grants.") .	55,752	435,427	1,419,432	1,365,819	1,837,788	5,114,218
2 Gross receipts from admissions, merchandise sold or services performed, or facilities furnished in any activity that is related to the organization's tax-exempt purpose	5,738,194	5,446,926	5,560,125	5,883,131	5,669,065	28,297,441
3 Gross receipts from activities that are not an unrelated trade or business under section 513						
4 Tax revenues levied for the organization's benefit and either paid to or expended on its behalf						
5 The value of services or facilities furnished by a governmental unit to the organization without charge						
6 Total. Add lines 1 through 5	5,793,946	5,882,353	6,979,557	7,248,950	7,506,853	33,411,659
7a Amounts included on lines 1, 2, and 3 received from disqualified persons	52,000	77,500	50,000	127,820	37,500	344,820
b Amounts included on lines 2 and 3 received from other than disqualified persons that exceed the greater of \$5,000 or 1% of the amount on line 13 for the year.	528,045	896,002	803,522	790,599	762,322	3,780,490
c Add lines 7a and 7b. .	580,045	973,502	853,522	918,419	799,822	4,125,310
8 Public support. (Subtract line 7c from line 6.)						29,286,349

Section B. Total Support						
Calendar year (or fiscal year beginning in) ►	(a) 2018	(b) 2019	(c) 2020	(d) 2021	(e) 2022	(f) Total
9 Amounts from line 6. . . .	5,793,946	5,882,353	6,979,557	7,248,950	7,506,853	33,411,659
10a Gross income from interest, dividends, payments received on securities loans, rents, royalties and income from similar sources. .	6,336	1,293	181	449	49,402	57,661
b Unrelated business taxable income (less section 511 taxes) from businesses acquired after June 30, 1975.						
c Add lines 10a and 10b.	6,336	1,293	181	449	49,402	57,661
11 Net income from unrelated business activities not included on line 10b, whether or not the business is regularly carried on.						
12 Other income. Do not include gain or loss from the sale of capital assets (Explain in Part VI.) . .						
13 Total support. (Add lines 9, 10c, 11, and 12.)	5,800,282	5,883,646	6,979,738	7,249,399	7,556,255	33,469,320
14 First 5 years. If the Form 990 is for the organization's first, second, third, fourth, or fifth tax year as a section 501(c)(3) organization, check this box and stop here.	☐					

Section C. Computation of Public Support Percentage			
15 Public support percentage for 2022 (line 8, column (f) divided by line 13, column (f))	15	87.500 %	
16 Public support percentage from 2021 Schedule A, Part III, line 15	16	87.620 %	

Section D. Computation of Investment Income Percentage			
17	Investment income percentage for 2022 (line 10c, column (f) divided by line 13, column (f))	17	0.170 %
18	Investment income percentage from 2021 Schedule A, Part III, line 17	18	0.030 %
19a	33 1/3% support tests-2022. If the organization did not check the box on line 14, and line 15 is more than 33 1/3%, and line 17 is not more than 33 1/3%, check this box and stop here . The organization qualifies as a publicly supported organization ► ☒		
b	33 1/3% support tests—2021. If the organization did not check a box on line 14 or line 19a, and line 16 is more than 33 1/3% and line 18 is not more than 33 1/3%, check this box and stop here . The organization qualifies as a publicly supported organization ► ☐		
20	Private foundation. If the organization did not check a box on line 14, 19a, or 19b, check this box and see instructions ► ☐		

Part IV Supporting Organizations

(Complete only if you checked a box on line 12 of Part I. If you checked box 12a, of Part I, complete Sections A and B. If you checked box 12b, of Part I, complete Sections A and C. If you checked box 12c, of Part I, complete Sections A, D, and E. If you checked box 12d, of Part I, complete Sections A and D, and complete Part V.)

Section A. All Supporting Organizations

		Yes	No
1	Are all of the organization's supported organizations listed by name in the organization's governing documents? If "No," describe in Part VI how the supported organizations are designated. If designated by class or purpose, describe the designation. If historic and continuing relationship, explain.		
2	Did the organization have any supported organization that does not have an IRS determination of status under section 509(a)(1) or (2)? If "Yes," explain in Part VI how the organization determined that the supported organization was described in section 509(a)(1) or (2).		
3a	Did the organization have a supported organization described in section 501(c)(4), (5), or (6)? If "Yes," answer lines 3b and 3c below.		
b	Did the organization confirm that each supported organization qualified under section 501(c)(4), (5), or (6) and satisfied the public support tests under section 509(a)(2)? If "Yes," describe in Part VI when and how the organization made the determination.		
c	Did the organization ensure that all support to such organizations was used exclusively for section 170(c)(2)(B) purposes? If "Yes," explain in Part VI what controls the organization put in place to ensure such use.		
4a	Was any supported organization not organized in the United States ("foreign supported organization")? If "Yes" and if you checked box 12a or 12b in Part I, answer lines 4b and 4c below.		
b	Did the organization have ultimate control and discretion in deciding whether to make grants to the foreign supported organization? If "Yes," describe in Part VI how the organization had such control and discretion despite being controlled or supervised by or in connection with its supported organizations.		
c	Did the organization support any foreign supported organization that does not have an IRS determination under sections 501(c)(3) and 509(a)(1) or (2)? If "Yes," explain in Part VI what controls the organization used to ensure that all support to the foreign supported organization was used exclusively for section 170(c)(2)(B) purposes.		
5a	Did the organization add, substitute, or remove any supported organizations during the tax year? If "Yes," answer lines 5b and 5c below (if applicable). Also, provide detail in Part VI , including (i) the names and EIN numbers of the supported organizations added, substituted, or removed; (ii) the reasons for each such action; (iii) the authority under the organization's organizing document authorizing such action; and (iv) how the action was accomplished (such as by amendment to the organizing document).		
b	Type I or Type II only. Was any added or substituted supported organization part of a class already designated in the organization's organizing document?		
c	Substitutions only. Was the substitution the result of an event beyond the organization's control?		
6	Did the organization provide support (whether in the form of grants or the provision of services or facilities) to anyone other than (i) its supported organizations, (ii) individuals that are part of the charitable class benefited by one or more of its supported organizations, or (iii) other supporting organizations that also support or benefit one or more of the filing organization's supported organizations? If "Yes," provide detail in Part VI .		
7	Did the organization provide a grant, loan, compensation, or other similar payment to a substantial contributor (defined in section 4958(c)(3)(C)), a family member of a substantial contributor, or a 35% controlled entity with regard to a substantial contributor? If "Yes," complete Part I of Schedule L (Form 990) .		
8	Did the organization make a loan to a disqualified person (as defined in section 4958) not described on line 7? If "Yes," complete Part I of Schedule L (Form 990).		
9a	Was the organization controlled directly or indirectly at any time during the tax year by one or more disqualified persons, as defined in section 4946 (other than foundation managers and organizations described in section 509(a)(1) or (2))? If "Yes," provide detail in Part VI .		
b	Did one or more disqualified persons (as defined on line 9a) hold a controlling interest in any entity in which the supporting organization had an interest? If "Yes," provide detail in Part VI .		
c	Did a disqualified person (as defined on line 9a) have an ownership interest in, or derive any personal benefit from, assets in which the supporting organization also had an interest? If "Yes," provide detail in Part VI .		
10a	Was the organization subject to the excess business holdings rules of section 4943 because of section 4943(f) (regarding certain Type II supporting organizations, and all Type III non-functionally integrated supporting organizations)? If "Yes," answer line 10b below.		
b	Did the organization have any excess business holdings in the tax year? (Use Schedule C, Form 4720, to determine whether the organization had excess business holdings).		

Part IV Supporting Organizations (continued)

		Yes	No
11	Has the organization accepted a gift or contribution from any of the following persons?		
a	A person who directly or indirectly controls, either alone or together with persons described on lines 11b and 11c below, the governing body of a supported organization?		
	11a		
b	A family member of a person described on 11a above?		
	11b		
c	A 35% controlled entity of a person described on line 11a or 11b above? If "Yes" to 11a, 11b, or 11c, provide detail in Part VI.		
	11c		

Section B. Type I Supporting Organizations

		Yes	No
1	Did the officers, directors, trustees, or membership of one or more supported organizations have the power to regularly appoint or elect at least a majority of the organization's directors or trustees at all times during the tax year? If "No," describe in Part VI how the supported organization(s) effectively operated, supervised, or controlled the organization's activities. If the organization had more than one supported organization, describe how the powers to appoint and/or remove directors or trustees were allocated among the supported organizations and what conditions or restrictions, if any, applied to such powers during the tax year.		
	1		
2	Did the organization operate for the benefit of any supported organization other than the supported organization(s) that operated, supervised, or controlled the supporting organization? If "Yes," explain in Part VI how providing such benefit carried out the purposes of the supported organization(s) that operated, supervised or controlled the supporting organization.		
	2		

Section C. Type II Supporting Organizations

		Yes	No
1	Were a majority of the organization's directors or trustees during the tax year also a majority of the directors or trustees of each of the organization's supported organization(s)? If "No," describe in Part VI how control or management of the supporting organization was vested in the same persons that controlled or managed the supported organization(s).		
	1		

Section D. All Type III Supporting Organizations

		Yes	No
1	Did the organization provide to each of its supported organizations, by the last day of the fifth month of the organization's tax year, (i) a written notice describing the type and amount of support provided during the prior tax year, (ii) a copy of the Form 990 that was most recently filed as of the date of notification, and (iii) copies of the organization's governing documents in effect on the date of notification, to the extent not previously provided?		
	1		
2	Were any of the organization's officers, directors, or trustees either (i) appointed or elected by the supported organization(s) or (ii) serving on the governing body of a supported organization? If "No," explain in Part VI how the organization maintained a close and continuous working relationship with the supported organization(s).		
	2		
3	By reason of the relationship described in line 2 above, did the organization's supported organizations have a significant voice in the organization's investment policies and in directing the use of the organization's income or assets at all times during the tax year? If "Yes," describe in Part VI the role the organization's supported organizations played in this regard.		
	3		

Section E. Type III Functionally-Integrated Supporting Organizations

1	Check the box next to the method that the organization used to satisfy the Integral Part Test during the year (see instructions):			
a	☐ The organization satisfied the Activities Test. Complete line 2 below.			
b	☐ The organization is the parent of each of its supported organizations. Complete line 3 below.			
c	☐ The organization supported a governmental entity. Describe in Part VI how you supported a government entity (see instructions)			
2	Activities Test. Answer lines 2a and 2b below.			
a	Did substantially all of the organization's activities during the tax year directly further the exempt purposes of the supported organization(s) to which the organization was responsive? If "Yes," then in Part VI identify those supported organizations and explain how these activities directly furthered their exempt purposes, how the organization was responsive to those supported organizations, and how the organization determined that these activities constituted substantially all of its activities.			
	2a			
b	Did the activities described on line 2a, above constitute activities that, but for the organization's involvement, one or more of the organization's supported organization(s) would have been engaged in? If "Yes," explain in Part VI the reasons for the organization's position that its supported organization(s) would have engaged in these activities but for the organization's involvement.			
	2b			
3	Parent of Supported Organizations. Answer lines 3a and 3b below.			
a	Did the organization have the power to regularly appoint or elect a majority of the officers, directors, or trustees of each of the supported organizations? If "Yes" or "No", provide details in Part VI.			
	3a			
b	Did the organization exercise a substantial degree of direction over the policies, programs and activities of each of its supported organizations? If "Yes," describe in Part VI. the role played by the organization in this regard.			
	3b			

1

☐ Check here if the organization satisfied the Integral Part Test as a qualifying trust on Nov. 20, 1970 (explain in **Part VI**). See instructions. All other Type III non-functionally integrated supporting organizations must complete Sections A through E.

Section A - Adjusted Net Income		(A) Prior Year	(B) Current Year (optional)
1	Net short-term capital gain	1	
2	Recoveries of prior-year distributions	2	
3	Other gross income (see instructions)	3	
4	Add lines 1 through 3	4	
5	Depreciation and depletion	5	
6	Portion of operating expenses paid or incurred for production or collection of gross income or for management, conservation, or maintenance of property held for production of income (see instructions)	6	
7	Other expenses (see instructions)	7	
8	Adjusted Net Income (subtract lines 5, 6 and 7 from line 4)	8	

Section B - Minimum Asset Amount		(A) Prior Year	(B) Current Year (optional)
1	Aggregate fair market value of all non-exempt-use assets (see instructions for short tax year or assets held for part of year):	1	
a	Average monthly value of securities	1a	
b	Average monthly cash balances	1b	
c	Fair market value of other non-exempt-use assets	1c	
d	Total (add lines 1a, 1b, and 1c)	1d	
e	Discount claimed for blockage or other factors (explain in detail in Part VI):		
2	Acquisition indebtedness applicable to non-exempt use assets	2	
3	Subtract line 2 from line 1d	3	
4	Cash deemed held for exempt use. Enter 0.015 of line 3 (for greater amount, see instructions).	4	
5	Net value of non-exempt-use assets (subtract line 4 from line 3)	5	
6	Multiply line 5 by 0.035	6	
7	Recoveries of prior-year distributions	7	
8	Minimum Asset Amount (add line 7 to line 6)	8	

Section C - Distributable Amount			Current Year
1	Adjusted net income for prior year (from Section A, line 8, Column A)	1	
2	Enter 85% of line 1	2	
3	Minimum asset amount for prior year (from Section B, line 8, Column A)	3	
4	Enter greater of line 2 or line 3	4	
5	Income tax imposed in prior year	5	
6	Distributable Amount. Subtract line 5 from line 4, unless subject to emergency temporary reduction (see instructions)	6	

7

☐ Check here if the current year is the organization's first as a non-functionally-integrated Type III supporting organization (see instructions)

Section D - Distributions		Current Year
1	Amounts paid to supported organizations to accomplish exempt purposes	1
2	Amounts paid to perform activity that directly furthers exempt purposes of supported organizations, in excess of income from activity	2
3	Administrative expenses paid to accomplish exempt purposes of supported organizations	3
4	Amounts paid to acquire exempt-use assets	4
5	Qualified set-aside amounts (prior IRS approval required - provide details in Part VI)	5
6	Other distributions (describe in Part VI). See instructions	6
7	Total annual distributions. Add lines 1 through 6.	7
8	Distributions to attentive supported organizations to which the organization is responsive (provide details in Part VI). See instructions	8
9	Distributable amount for 2022 from Section C, line 6	9
10	Line 8 amount divided by Line 9 amount	10

Section E - Distribution Allocations (see instructions)	(i) Excess Distributions	(ii) Underdistributions Pre-2022	(iii) Distributable Amount for 2022
1	Distributable amount for 2022 from Section C, line 6		
2	Underdistributions, if any, for years prior to 2022 (reasonable cause required-- explain in Part VI). See instructions.		
3	Excess distributions carryover, if any, to 2022:		
a	From 2017.		
b	From 2018.		
c	From 2019.		
d	From 2020.		
e	From 2021.		
f	Total of lines 3a through e		
g	Applied to underdistributions of prior years		
h	Applied to 2022 distributable amount		
i	Carryover from 2017 not applied (see instructions)		
j	Remainder. Subtract lines 3g, 3h, and 3i from line 3f.		
4	Distributions for 2022 from Section D, line 7: \$		
a	Applied to underdistributions of prior years		
b	Applied to 2022 distributable amount		
c	Remainder. Subtract lines 4a and 4b from line 4.		
5	Remaining underdistributions for years prior to 2022, if any. Subtract lines 3g and 4a from line 2. If the amount is greater than zero, explain in Part VI. See instructions.		
6	Remaining underdistributions for 2022. Subtract lines 3h and 4b from line 1. If the amount is greater than zero, explain in Part VI. See instructions.		
7	Excess distributions carryover to 2023. Add lines 3j and 4c.		
8	Breakdown of line 7:		
a	Excess from 2018.		
b	Excess from 2019.		
c	Excess from 2020.		
d	Excess from 2021.		
e	Excess from 2022.		

Part VI

Supplemental Information. Provide the explanations required by Part II, line 10; Part II, line 17a or 17b; Part III, line 12; Part IV, Section A, lines 1, 2, 3b, 3c, 4b, 4c, 5a, 6, 9a, 9b, 9c, 11a, 11b, and 11c; Part IV, Section B, lines 1 and 2; Part IV, Section C, line 1; Part IV, Section D, lines 2 and 3; Part IV, Section E, lines 1c, 2a, 2b, 3a and 3b; Part V, line 1; Part V, Section B, line 1e; Part V Section D, lines 5, 6, and 8; and Part V, Section E, lines 2, 5, and 6. Also complete this part for any additional information. (See instructions).

Return Reference	Explanation
------------------	-------------

If the organization answered "Yes" on Form 990, Part IV, Line 3, or Form 990-EZ, Part V, line 46 (Political Campaign Activities), then

- Section 501(c)(3) organizations: Complete Parts I-A and B. Do not complete Part I-C.
- Section 501(c) (other than section 501(c)(3)) organizations: Complete Parts I-A and C below. Do not complete Part I-B.
- Section 527 organizations: Complete Part I-A only.

If the organization answered "Yes" on Form 990, Part IV, Line 4, or Form 990-EZ, Part VI, line 47 (Lobbying Activities), then

- Section 501(c)(3) organizations that have filed Form 5768 (election under section 501(h)): Complete Part II-A. Do not complete Part II-B.
- Section 501(c)(3) organizations that have NOT filed Form 5768 (election under section 501(h)): Complete Part II-B. Do not complete Part II-A.

If the organization answered "Yes" on Form 990, Part IV, Line 5 (Proxy Tax) (see separate instructions) or Form 990-EZ, Part V, line 35c (Proxy Tax) (see separate instructions), then

- Section 501(c)(4), (5), or (6) organizations: Complete Part III.

Name of the organization THE LEAPFROG GROUP	Employer identification number 52-2359517
--	--

Part I-A Complete if the organization is exempt under section 501(c) or is a section 527 organization.

1	Provide a description of the organization's direct and indirect political campaign activities in Part IV. See instructions for definition of "political campaign activities."	
2	Political campaign activity expenditures. See instructions	\$
3	Volunteer hours for political campaign activities. See instructions	

Part I-B Complete if the organization is exempt under section 501(c)(3).

1	Enter the amount of any excise tax incurred by the organization under section 4955	\$
2	Enter the amount of any excise tax incurred by organization managers under section 4955	\$
3	If the organization incurred a section 4955 tax, did it file Form 4720 for this year?	☐ Yes ☐ No
4a	Was a correction made?	☐ Yes ☐ No
b	If "Yes," describe in Part IV.	

Part I-C Complete if the organization is exempt under section 501(c), except section 501(c)(3).

1	Enter the amount directly expended by the filing organization for section 527 exempt function activities	\$
2	Enter the amount of the filing organization's funds contributed to other organizations for section 527 exempt function activities	\$
3	Total exempt function expenditures. Add lines 1 and 2. Enter here and on Form 1120-POL, line 17b	\$
4	Did the filing organization file Form 1120-POL for this year?	☐ Yes ☐ No
5	Enter the names, addresses and employer identification number (EIN) of all section 527 political organizations to which the filing organization made payments. For each organization listed, enter the amount paid from the filing organization's funds. Also enter the amount of political contributions received that were promptly and directly delivered to a separate political organization, such as a separate segregated fund or a political action committee (PAC). If additional space is needed, provide information in Part IV.	

(a) Name	(b) Address	(c) EIN	(d) Amount paid from filing organization's funds. If none, enter -0-.	(e) Amount of political contributions received and promptly and directly delivered to a separate political organization. If none, enter -0-.
1				
2				
3				
4				
5				
6				

- A

Check

☐

if the filing organization belongs to an affiliated group (and list in Part IV each affiliated group member's name, address, EIN, expenses, and share of excess lobbying expenditures).
- B

Check

☐

if the filing organization checked box A and "limited control" provisions apply.

Limits on Lobbying Expenditures (The term "expenditures" means amounts paid or incurred.)		(a) Filing organization's totals	(b) Affiliated group totals												
1a Total lobbying expenditures to influence public opinion (grass roots lobbying)															
b Total lobbying expenditures to influence a legislative body (direct lobbying)															
c Total lobbying expenditures (add lines 1a and 1b)															
d Other exempt purpose expenditures		7,975,667													
e Total exempt purpose expenditures (add lines 1c and 1d)		7,975,667													
f Lobbying nontaxable amount. Enter the amount from the following table in both columns.		548,783													
<table><thead><tr><th>If the amount on line 1e, column (a) or (b) is:</th><th>The lobbying nontaxable amount is:</th></tr></thead><tbody><tr><td>Not over \$500,000</td><td>20% of the amount on line 1e.</td></tr><tr><td>Over \$500,000 but not over \$1,000,000</td><td>\$100,000 plus 15% of the excess over \$500,000.</td></tr><tr><td>Over \$1,000,000 but not over \$1,500,000</td><td>\$175,000 plus 10% of the excess over \$1,000,000.</td></tr><tr><td>Over \$1,500,000 but not over \$17,000,000</td><td>\$225,000 plus 5% of the excess over \$1,500,000.</td></tr><tr><td>Over \$17,000,000</td><td>\$1,000,000.</td></tr></tbody></table>		If the amount on line 1e, column (a) or (b) is:	The lobbying nontaxable amount is:	Not over \$500,000	20% of the amount on line 1e.	Over \$500,000 but not over \$1,000,000	\$100,000 plus 15% of the excess over \$500,000.	Over \$1,000,000 but not over \$1,500,000	\$175,000 plus 10% of the excess over \$1,000,000.	Over \$1,500,000 but not over \$17,000,000	\$225,000 plus 5% of the excess over \$1,500,000.	Over \$17,000,000	\$1,000,000.		
If the amount on line 1e, column (a) or (b) is:	The lobbying nontaxable amount is:														
Not over \$500,000	20% of the amount on line 1e.														
Over \$500,000 but not over \$1,000,000	\$100,000 plus 15% of the excess over \$500,000.														
Over \$1,000,000 but not over \$1,500,000	\$175,000 plus 10% of the excess over \$1,000,000.														
Over \$1,500,000 but not over \$17,000,000	\$225,000 plus 5% of the excess over \$1,500,000.														
Over \$17,000,000	\$1,000,000.														
g Grassroots nontaxable amount (enter 25% of line 1f)		137,196													
h Subtract line 1g from line 1a. If zero or less, enter -0-		0													
i Subtract line 1f from line 1c. If zero or less, enter -0-		0													
j If there is an amount other than zero on either line 1h or line 1i, did the organization file Form 4720 reporting section 4911 tax for this year?		☐ Yes ☐ No													

4-Year Averaging Period Under Section 501(h)

(Some organizations that made a section 501(h) election do not have to complete all of the five columns below. See the separate instructions for lines 2a through 2f.)

Lobbying Expenditures During 4-Year Averaging Period					
Calendar year (or fiscal year beginning in)	(a) 2019	(b) 2020	(c) 2021	(d) 2022	(e) Total
2a Lobbying nontaxable amount	444,043	462,469	512,283	548,783	1,967,578
b Lobbying ceiling amount (150% of line 2a, column(e))					2,951,367
c Total lobbying expenditures					
d Grassroots nontaxable amount	111,011	115,617	128,071	137,196	491,895
e Grassroots ceiling amount (150% of line 2d, column (e))					737,843
f Grassroots lobbying expenditures					

Part II-B Complete if the organization is exempt under section 501(c)(3) and has NOT filed Form 5768 (election under section 501(h)).

For each "Yes" response on lines 1a through 1i below, provide in Part IV a detailed description of the lobbying activity.

		(a)		(b)
		Yes	No	Amount
1	During the year, did the filing organization attempt to influence foreign, national, state or local legislation, including any attempt to influence public opinion on a legislative matter or referendum, through the use of:			
a	Volunteers?			
b	Paid staff or management (include compensation in expenses reported on lines 1c through 1i)?			
c	Media advertisements?			
d	Mailings to members, legislators, or the public?			
e	Publications, or published or broadcast statements?			
f	Grants to other organizations for lobbying purposes?			
g	Direct contact with legislators, their staffs, government officials, or a legislative body?			
h	Rallies, demonstrations, seminars, conventions, speeches, lectures, or any similar means?			
i	Other activities?			
j	Total. Add lines 1c through 1i			
2a	Did the activities in line 1 cause the organization to be not described in section 501(c)(3)?			
b	If "Yes," enter the amount of any tax incurred under section 4912			
c	If "Yes," enter the amount of any tax incurred by organization managers under section 4912			
d	If the filing organization incurred a section 4912 tax, did it file Form 4720 for this year?			

Part III-A Complete if the organization is exempt under section 501(c)(4), section 501(c)(5), or section 501(c)(6).

		Yes	No
1	Were substantially all (90% or more) dues received nondeductible by members?	1	
2	Did the organization make only in-house lobbying expenditures of \$2,000 or less?	2	
3	Did the organization agree to carry over lobbying and political expenditures from the prior year?	3	

Part III-B Complete if the organization is exempt under section 501(c)(4), section 501(c)(5), or section 501(c)(6) and if either (a) BOTH Part III-A, lines 1 and 2, are answered "No" OR (b) Part III-A, line 3, is answered "Yes."

1	Dues, assessments and similar amounts from members	1	
2	Section 162(e) nondeductible lobbying and political expenditures (do not include amounts of political expenses for which the section 527(f) tax was paid).		
a	Current year	2a	
b	Carryover from last year	2b	
c	Total	2c	
3	Aggregate amount reported in section 6033(e)(1)(A) notices of nondeductible section 162(e) dues .	3	
4	If notices were sent and the amount on line 2c exceeds the amount on line 3, what portion of the excess does the organization agree to carryover to the reasonable estimate of nondeductible lobbying and political expenditure next year?	4	
5	Taxable amount of lobbying and political expenditures. See Instructions	5	

Part IV Supplemental Information

Provide the descriptions required for Part I-A, line 1; Part I-B, line 4; Part I-C, line 5; Part II-A (affiliated group list); Part II-A, lines 1 and 2 (see instructions), and Part II-B, line 1. Also, complete this part for any additional information.

Return Reference	Explanation
------------------	-------------

Name of the organization THE LEAPFROG GROUP	Employer identification number 52-2359517
--	--

Part I Organizations Maintaining Donor Advised Funds or Other Similar Funds or Accounts.
Complete if the organization answered "Yes" on Form 990, Part IV, line 6.

	(a) Donor advised funds	(b) Funds and other accounts
1 Total number at end of year		
2 Aggregate value of contributions to (during year)		
3 Aggregate value of grants from (during year)		
4 Aggregate value at end of year		
5 Did the organization inform all donors and donor advisors in writing that the assets held in donor advised funds are the organization's property, subject to the organization's exclusive legal control?		☐ Yes ☐ No
6 Did the organization inform all grantees, donors, and donor advisors in writing that grant funds can be used only for charitable purposes and not for the benefit of the donor or donor advisor, or for any other purpose conferring impermissible private benefit?		☐ Yes ☐ No

Part II Conservation Easements.
Complete if the organization answered "Yes" on Form 990, Part IV, line 7.

1 Purpose(s) of conservation easements held by the organization (check all that apply).
☐ Preservation of land for public use (e.g., recreation or education)
☐ Protection of natural habitat
☐ Preservation of open space

☐ Preservation of an historically important land area
☐ Preservation of a certified historic structure

2 Complete lines 2a through 2d if the organization held a qualified conservation contribution in the form of a conservation easement on the last day of the tax year.

	Held at the End of the Year
a Total number of conservation easements	2a
b Total acreage restricted by conservation easements	2b
c Number of conservation easements on a certified historic structure included in (a)	2c
d Number of conservation easements included in (c) acquired after July 25, 2006, and not on a historic structure listed in the National Register	2d

3 Number of conservation easements modified, transferred, released, extinguished, or terminated by the organization during the tax year ▶ _____

4 Number of states where property subject to conservation easement is located ▶ _____

5 Does the organization have a written policy regarding the periodic monitoring, inspection, handling of violations, and enforcement of the conservation easements it holds?
☐ Yes ☐ No

6 Staff and volunteer hours devoted to monitoring, inspecting, handling of violations, and enforcing conservation easements during the year ▶ _____

7 Amount of expenses incurred in monitoring, inspecting, handling of violations, and enforcing conservation easements during the year ▶ \$ _____

8 Does each conservation easement reported on line 2(d) above satisfy the requirements of section 170(h)(4)(B)(i) and section 170(h)(4)(B)(ii)?
☐ Yes ☐ No

9 In Part XIII, describe how the organization reports conservation easements in its revenue and expense statement, and balance sheet, and include, if applicable, the text of the footnote to the organization's financial statements that describes the organization's accounting for conservation easements.

Part III Organizations Maintaining Collections of Art, Historical Treasures, or Other Similar Assets.
Complete if the organization answered "Yes" on Form 990, Part IV, line 8.

1a If the organization elected, as permitted under FASB ASC 958, not to report in its revenue statement and balance sheet works of art, historical treasures, or other similar assets held for public exhibition, education, or research in furtherance of public service, provide, in Part XIII, the text of the footnote to its financial statements that describes these items.

1b If the organization elected, as permitted under FASB ASC 958, to report in its revenue statement and balance sheet works of art, historical treasures, or other similar assets held for public exhibition, education, or research in furtherance of public service, provide the following amounts relating to these items:
(i) Revenue included on Form 990, Part VIII, line 1 ▶ \$ _____
(ii) Assets included in Form 990, Part X ▶ \$ _____

2 If the organization received or held works of art, historical treasures, or other similar assets for financial gain, provide the following amounts required to be reported under FASB ASC 958 relating to these items:
a Revenue included on Form 990, Part VIII, line 1 ▶ \$ _____
b Assets included in Form 990, Part X ▶ \$ _____

Part III

Organizations Maintaining Collections of Art, Historical Treasures, or Other Similar Assets (continued)

- 3
- Using the organization's acquisition, accession, and other records, check any of the following that are a significant use of its collection items (check all that apply):
- a☐ Public exhibition

b☐ Scholarly research

c☐ Preservation for future generations

d☐ Loan or exchange programs

e☐ Other
- 4
- Provide a description of the organization's collections and explain how they further the organization's exempt purpose in Part XIII.
- 5
- During the year, did the organization solicit or receive donations of art, historical treasures or other similar assets to be sold to raise funds rather than to be maintained as part of the organization's collection? . . .
- ☐ Yes

☐ No

Part IV

Escrow and Custodial Arrangements.

Complete if the organization answered "Yes" on Form 990, Part IV, line 9, or reported an amount on Form 990, Part X, line 21.

- 1a
- Is the organization an agent, trustee, custodian or other intermediary for contributions or other assets not included on Form 990, Part X?
- ☐ Yes

☐ No
- b
- If "Yes," explain the arrangement in Part XIII and complete the following table:
- c Beginning balance

d Additions during the year

e Distributions during the year

f Ending balance
- | | Amount |
|----|--------|
| 1c | |
| 1d | |
| 1e | |
| 1f | |
- 2a
- Did the organization include an amount on Form 990, Part X, line 21, for escrow or custodial account liability? . . .
- ☐ Yes

☐ No
- b
- If "Yes," explain the arrangement in Part XIII. Check here if the explanation has been provided in Part XIII
- ☐

Part V

Endowment Funds.

Complete if the organization answered "Yes" on Form 990, Part IV, line 10.

- | | (a) Current year | (b) Prior year | (c) Two years back | (d) Three years back | (e) Four years back |
|----|--|----------------|--------------------|----------------------|---------------------|
| 1a | Beginning of year balance | | | | |
| b | Contributions | | | | |
| c | Net investment earnings, gains, and losses | | | | |
| d | Grants or scholarships | | | | |
| e | Other expenditures for facilities and programs | | | | |
| f | Administrative expenses | | | | |
| g | End of year balance | | | | |
- 2
- Provide the estimated percentage of the current year end balance (line 1g, column (a)) held as:
- a Board designated or quasi-endowment ▶

b Permanent endowment ▶

c Term endowment ▶
- The percentages on lines 2a, 2b, and 2c should equal 100%.
- 3a
- Are there endowment funds not in the possession of the organization that are held and administered for the organization by:
- (i) Unrelated organizations

(ii) Related organizations
- | | Yes | No |
|--------|-----|----|
| 3a(i) | | |
| 3a(ii) | | |
| 3b | | |
- b
- If "Yes" on 3a(ii), are the related organizations listed as required on Schedule R?
- 4
- Describe in Part XIII the intended uses of the organization's endowment funds.

Part VI

Land, Buildings, and Equipment.

Complete if the organization answered "Yes" on Form 990, Part IV, line 11a. See Form 990, Part X, line 10.

Description of property	(a) Cost or other basis (investment)	(b) Cost or other basis (other)	(c) Accumulated depreciation	(d) Book value
1a Land				
b Buildings				
c Leasehold improvements		447,431	115,285	332,146
d Equipment		109,804	72,859	36,945
e Other		832,717	566,966	265,751
Total. Add lines 1a through 1e. (Column (d) must equal Form 990, Part X, column (B), line 10(c).) . . . ▶				634,842

Part VII Investments - Other Securities.

Complete if the organization answered "Yes" on Form 990, Part IV, line 11b. See Form 990, Part X, line 12.

(a) Description of security or category (including name of security)	(b) Book value	(c) Method of valuation: Cost or end-of-year market value
(1) Financial derivatives		
(2) Closely-held equity interests		
(3) Other _____		
(A)		
(B)		
(C)		
(D)		
(E)		
(F)		
(G)		
(H)		
Total. (Column (b) must equal Form 990, Part X, col. (B) line 12.)		

Part VIII Investments - Program Related.

Complete if the organization answered 'Yes' on Form 990, Part IV, line 11c. See Form 990, Part X, line 13.

(a) Description of investment	(b) Book value	(c) Method of valuation: Cost or end-of-year market value
(1)		
(2)		
(3)		
(4)		
(5)		
(6)		
(7)		
(8)		
(9)		
Total. (Column (b) must equal Form 990, Part X, col.(B) line 13.)		

Part IX Other Assets.

Complete if the organization answered 'Yes' on Form 990, Part IV, line 11d. See Form 990, Part X, line 15.

(a) Description	(b) Book value
(1) DEPOSITS	39,253
(2) OPERATING RIGHT OF USE ASSET	3,101,785
(2)	
(3)	
(4)	
(5)	
(6)	
(7)	
(8)	
(9)	
Total. (Column (b) must equal Form 990, Part X, col.(B) line 15.)	3,141,038

Part X Other Liabilities.

Complete if the organization answered 'Yes' on Form 990, Part IV, line 11e or 11f. See Form 990, Part X, line 25.

1. (a) Description of liability	(b) Book value
(1) Federal income taxes	
CAPITAL LEASE	5,270
OPERATING LEASE	3,447,896
REFUNDABLE ADVANCE	816,023
Total. (Column (b) must equal Form 990, Part X, col.(B) line 25.)	4,269,189
2. Liability for uncertain tax positions. In Part XIII, provide the text of the footnote to the organization's financial statements that reports the organization's liability for uncertain tax positions under FIN 48 (ASC 740). Check here if the text of the footnote has been provided in Part XIII ☒	

Part XI

Reconciliation of Revenue per Audited Financial Statements With Revenue per Return.

Complete if the organization answered 'Yes' on Form 990, Part IV, line 12a.

1	Total revenue, gains, and other support per audited financial statements		1	
2	Amounts included on line 1 but not on Form 990, Part VIII, line 12:			
a	Net unrealized gains (losses) on investments	2a		
b	Donated services and use of facilities	2b		
c	Recoveries of prior year grants	2c		
d	Other (Describe in Part XIII.)	2d		
e	Add lines 2a through 2d		2e	
3	Subtract line 2e from line 1		3	
4	Amounts included on Form 990, Part VIII, line 12, but not on line 1:			
a	Investment expenses not included on Form 990, Part VIII, line 7b	4a		
b	Other (Describe in Part XIII.)	4b		
c	Add lines 4a and 4b		4c	
5	Total revenue. Add lines 3 and 4c. (This must equal Form 990, Part I, line 12.)		5	

Part XII

Reconciliation of Expenses per Audited Financial Statements With Expenses per Return.

Complete if the organization answered 'Yes' on Form 990, Part IV, line 12a.

1	Total expenses and losses per audited financial statements		1	
2	Amounts included on line 1 but not on Form 990, Part IX, line 25:			
a	Donated services and use of facilities	2a		
b	Prior year adjustments	2b		
c	Other losses	2c		
d	Other (Describe in Part XIII.)	2d		
e	Add lines 2a through 2d		2e	
3	Subtract line 2e from line 1		3	
4	Amounts included on Form 990, Part IX, line 25, but not on line 1:			
a	Investment expenses not included on Form 990, Part VIII, line 7b	4a		
b	Other (Describe in Part XIII.)	4b		
c	Add lines 4a and 4b		4c	
5	Total expenses. Add lines 3 and 4c. (This must equal Form 990, Part I, line 18.)		5	

Part XIII

Supplemental Information

Provide the descriptions required for Part II, lines 3, 5, and 9; Part III, lines 1a and 4; Part IV, lines 1b and 2b; Part V, line 4; Part X, line 2; Part XI, lines 2d and 4b; and Part XII, lines 2d and 4b. Also complete this part to provide any additional information.

Return Reference	Explanation
PART X, LINE 2:	MANAGEMENT EVALUATED LEAPFROG'S TAX POSITIONS AND CONCLUDED THAT LEAPFROG HAS TAKEN NO UNCERTAIN TAX POSITIONS THAT REQUIRE ADJUSTMENT TO THE CONSOLIDATED FINANCIAL STATEMENTS TO COMPLY WITH THE PROVISIONS OF THIS GUIDANCE. GENERALLY, LEAPFROG IS NOT LONGER SUBJECT TO INCOME TAX EXAMINATIONS BY THE U.S. FEDERAL, STATE OR LOCAL TAX AUTHORITIES FOR THE YEAR BEFORE 2019.

Name of the organization THE LEAPFROG GROUP	Employer identification number 52-2359517
--	--

Part I

Questions Regarding Compensation

1a	Check the appropriate box(es) if the organization provided any of the following to or for a person listed on Form 990, Part VII, Section A, line 1a. Complete Part III to provide any relevant information regarding these items.		Yes	No
	☐ First-class or charter travel ☐ Travel for companions ☐ Tax idemnification and gross-up payments ☐ Discretionary spending account ☐ Housing allowance or residence for personal use ☐ Payments for business use of personal residence ☐ Health or social club dues or initiation fees ☐ Personal services (e.g., maid, chauffeur, chef)			
b	If any of the boxes on Line 1a are checked, did the organization follow a written policy regarding payment or reimbursement or provision of all of the expenses described above? If "No," complete Part III to explain	1b		
2	Did the organization require substantiation prior to reimbursing or allowing expenses incurred by all directors, trustees, officers, including the CEO/Executive Director, regarding the items checked on Line 1a?	2		
3	Indicate which, if any, of the following the filing organization used to establish the compensation of the organization's CEO/Executive Director. Check all that apply. Do not check any boxes for methods used by a related organization to establish compensation of the CEO/Executive Director, but explain in Part III.			
	☐ Compensation committee ☒ Independent compensation consultant ☒ Form 990 of other organizations ☒ Written employment contract ☒ Compensation survey or study ☒ Approval by the board or compensation committee			
4	During the year, did any person listed on Form 990, Part VII, Section A, line 1a, with respect to the filing organization or a related organization:			
a	Receive a severance payment or change-of-control payment?	4a		No
b	Participate in, or receive payment from, a supplemental nonqualified retirement plan?	4b		No
c	Participate in, or receive payment from, an equity-based compensation arrangement?	4c		No
	If "Yes" to any of lines 4a-c, list the persons and provide the applicable amounts for each item in Part III.			
	Only 501(c)(3), 501(c)(4), and 501(c)(29) organizations must complete lines 5-9.			
5	For persons listed on Form 990, Part VII, Section A, line 1a, did the organization pay or accrue any compensation contingent on the revenues of:			
a	The organization?	5a		No
b	Any related organization?	5b		No
	If "Yes," on line 5a or 5b, describe in Part III.			
6	For persons listed on Form 990, Part VII, Section A, line 1a, did the organization pay or accrue any compensation contingent on the net earnings of:			
a	The organization?	6a		No
b	Any related organization?	6b		No
	If "Yes," on line 6a or 6b, describe in Part III.			
7	For persons listed on Form 990, Part VII, Section A, line 1a, did the organization provide any nonfixed payments not described in lines 5 and 6? If "Yes," describe in Part III	7		No
8	Were any amounts reported on Form 990, Part VII, paid or accrued pursuant to a contract that was subject to the initial contract exception described in Regulations section 53.4958-4(a)(3)? If "Yes," describe in Part III	8		No
9	If "Yes" on line 8, did the organization also follow the rebuttable presumption procedure described in Regulations section 53.4958-6(c)?	9		

Part II Officers, Directors, Trustees, Key Employees, and Highest Compensated Employees. Use duplicate copies if additional space is needed.

For each individual whose compensation must be reported on Schedule J, report compensation from the organization on row (i) and from related organizations, described in the instructions, on row (ii). Do not list any individuals that are not listed on Form 990, Part VII.

Note. The sum of columns (B)(i)-(iii) for each listed individual must equal the total amount of Form 990, Part VII, Section A, line 1a, applicable column (D) and (E) amounts for that individual.

Case 9:25-cv-80526-DMM Document 88-78 Entered on FLSD Docket 10/28/2025 Page 37 of 37

Provide additional information for responses to questions on Schedule R. See instructions.

Return Reference	Explanation
PART I (B)	PROVIDING HEALTHCARE-RELATED SERVICES TO EMPLOYERS.

Exhibit 79

Check if Schedule O contains a response or note to any line in this Part III ☐

1 Briefly describe the organization's mission:

TO TRIGGER GIANT LEAPS FORWARD IN THE SAFETY, QUALITY, AND AFFORDABILITY OF U.S. HEALTH CARE BY USING TRANSPARENCY TO SUPPORT INFORMED HEALTH CARE DECISIONS AND PROMOTE HIGH-VALUE CARE.

2 Did the organization undertake any significant program services during the year which were not listed on the prior Form 990 or 990-EZ? ☐ Yes ☒ No
If "Yes," describe these new services on Schedule O.

3 Did the organization cease conducting, or make significant changes in how it conducts, any program services? ☐ Yes ☒ No
If "Yes," describe these changes on Schedule O.

4 Describe the organization's program service accomplishments for each of its three largest program services, as measured by expenses. Section 501(c)(3) and 501(c)(4) organizations are required to report the amount of grants and allocations to others, the total expenses, and revenue, if any, for each program service reported.

4a	(Code:) (Expenses \$ 3,663,443 including grants of \$) (Revenue \$ 272,914)
RATINGS: LEAPFROG FIELDS A VOLUNTARY SURVEY OF HOSPITALS AND AMBULATORY SURGERY CENTERS ON QUALITY AND SAFETY PRACTICES. THE SURVEYS INVOLVE MEASURE DEVELOPMENT AND ARE UPDATED ANNUALLY. THE HOSPITAL SURVEY ALSO INCLUDES A TOOL TO EVALUATE SYSTEMS FOR COMPUTERIZED PHYSICIAN ORDER ENTRY OF PHARMACEUTICALS. IN ADDITION, THE DATA FROM THE HOSPITAL SURVEY ARE COMBINED WITH DATA FROM OTHER SOURCES TO FURTHER UNDERSTAND HOSPITAL QUALITY AND SAFETY. THE ORGANIZATION PUBLICLY RATES U.S. HOSPITALS ON THEIR SAFETY IN AN INITIATIVE CALLED THE LEAPFROG HOSPITAL SAFETY GRADE.	

4b	(Code:) (Expenses \$ 2,064,535 including grants of \$) (Revenue \$ 5,469,784)
COMMUNICATIONS: LEAPFROG COLLECTS, ANALYZES AND DISSEMINATES HEALTH CARE DATA ON QUALITY AND SAFETY TO CONSUMERS AND PURCHASERS TO HELP THEM MAKE DECISIONS ON WHERE TO SEEK CARE. HEALTH CARE PROVIDERS ALSO FIND THE INFORMATION USEFUL FOR THEIR OWN IMPROVEMENT PROGRAMS AND THE OPPORTUNITY TO BENCHMARK AGAINST THEIR PEERS. LEAPFROG WORKS WITH PRINT, RADIO, TELEVISION, DIGITAL AND SOCIAL MEDIA PLATFORMS TO SPREAD INFORMATION ABOUT ITS HEALTH CARE RATINGS AND REPORTS.	

4c	(Code:) (Expenses \$ 1,439,172 including grants of \$) (Revenue \$ 73,955)
MEMBERSHIP: LEAPFROG WORKS WITH EMPLOYERS AND PURCHASERS OF HEALTH CARE TO ENCOURAGE TRANSPARENCY FROM THE HEALTH CARE COMMUNITY AND EDUCATE EMPLOYEES ON THE SAFEST AND HIGHEST QUALITY PROVIDERS. LEAPFROG ALSO COLLECTS DUES FROM AN ADVISORY COMMITTEE OF HEALTH CARE-FOCUSED COMPANIES WHO OFFER ADVICE AND SUGGESTIONS TO LEAPFROG BUT DO NOT HAVE A GOVERNING ROLE.	

4d	Other program services (Describe in Schedule O.)
(Expenses \$	including grants of \$) (Revenue \$)

4e	Total program service expenses	7,167,150
-----------	---------------------------------------	-----------

		Yes	No
1	Is the organization described in section 501(c)(3) or 4947(a)(1) (other than a private foundation)? <i>If "Yes," complete Schedule A</i>	Yes	
2	Is the organization required to complete <i>Schedule B, Schedule of Contributors</i> ? See instructions.	Yes	
3	Did the organization engage in direct or indirect political campaign activities on behalf of or in opposition to candidates for public office? <i>If "Yes," complete Schedule C, Part I</i>		No
4	Section 501(c)(3) organizations. Did the organization engage in lobbying activities, or have a section 501(h) election in effect during the tax year? <i>If "Yes," complete Schedule C, Part II</i>	Yes	
5	Is the organization a section 501(c)(4), 501(c)(5), or 501(c)(6) organization that receives membership dues, assessments, or similar amounts as defined in Rev. Proc. 98-19? <i>If "Yes," complete Schedule C, Part III</i>		No
6	Did the organization maintain any donor advised funds or any similar funds or accounts for which donors have the right to provide advice on the distribution or investment of amounts in such funds or accounts? <i>If "Yes," complete Schedule D, Part I</i>		No
7	Did the organization receive or hold a conservation easement, including easements to preserve open space, the environment, historic land areas, or historic structures? <i>If "Yes," complete Schedule D, Part II</i>		No
8	Did the organization maintain collections of works of art, historical treasures, or other similar assets? <i>If "Yes," complete Schedule D, Part III</i>		No
9	Did the organization report an amount in Part X, line 21 for escrow or custodial account liability; serve as a custodian for amounts not listed in Part X; or provide credit counseling, debt management, credit repair, or debt negotiation services? <i>If "Yes," complete Schedule D, Part IV</i>		No
10	Did the organization, directly or through a related organization, hold assets in temporarily restricted endowments, permanent endowments, or quasi endowments? <i>If "Yes," complete Schedule D, Part V</i>		No
11	If the organization's answer to any of the following questions is "Yes," then complete Schedule D, Parts VI, VII, VIII, IX, or X, as applicable.		
a	Did the organization report an amount for land, buildings, and equipment in Part X, line 10? <i>If "Yes," complete Schedule D, Part VI.</i>	Yes	
b	Did the organization report an amount for investments—other securities in Part X, line 12 that is 5% or more of its total assets reported in Part X, line 16? <i>If "Yes," complete Schedule D, Part VII</i>		No
c	Did the organization report an amount for investments—program related in Part X, line 13 that is 5% or more of its total assets reported in Part X, line 16? <i>If "Yes," complete Schedule D, Part VIII</i>		No
d	Did the organization report an amount for other assets in Part X, line 15 that is 5% or more of its total assets reported in Part X, line 16? <i>If "Yes," complete Schedule D, Part IX</i>	Yes	
e	Did the organization report an amount for other liabilities in Part X, line 25? <i>If "Yes," complete Schedule D, Part X</i>	Yes	
f	Did the organization's separate or consolidated financial statements for the tax year include a footnote that addresses the organization's liability for uncertain tax positions under FIN 48 (ASC 740)? <i>If "Yes," complete Schedule D, Part X</i>	Yes	
12a	Did the organization obtain separate, independent audited financial statements for the tax year? <i>If "Yes," complete Schedule D, Parts XI and XII</i>		No
b	Was the organization included in consolidated, independent audited financial statements for the tax year? <i>If "Yes," and if the organization answered "No" to line 12a, then completing Schedule D, Parts XI and XII is optional</i>	Yes	
13	Is the organization a school described in section 170(b)(1)(A)(ii)? <i>If "Yes," complete Schedule E</i>		No
14a	Did the organization maintain an office, employees, or agents outside of the United States?		No
b	Did the organization have aggregate revenues or expenses of more than \$10,000 from grantmaking, fundraising, business, investment, and program service activities outside the United States, or aggregate foreign investments valued at \$100,000 or more? <i>If "Yes," complete Schedule F, Parts I and IV</i>		No
15	Did the organization report on Part IX, column (A), line 3, more than \$5,000 of grants or other assistance to or for any foreign organization? <i>If "Yes," complete Schedule F, Parts II and IV</i>		No
16	Did the organization report on Part IX, column (A), line 3, more than \$5,000 of aggregate grants or other assistance to or for foreign individuals? <i>If "Yes," complete Schedule F, Parts III and IV</i>		No
17	Did the organization report a total of more than \$15,000 of expenses for professional fundraising services on Part IX, column (A), lines 6 and 11e? <i>If "Yes," complete Schedule G, Part I.</i> See instructions.		No
18	Did the organization report more than \$15,000 total of fundraising event gross income and contributions on Part VIII, lines 1c and 8a? <i>If "Yes," complete Schedule G, Part II</i>		No
19	Did the organization report more than \$15,000 of gross income from gaming activities on Part VIII, line 9a? <i>If "Yes," complete Schedule G, Part III</i>		No
20a	Did the organization operate one or more hospital facilities? <i>If "Yes," complete Schedule H</i>		No
b	If "Yes" to line 20a, did the organization attach a copy of its audited financial statements to this return?		
21	Did the organization report more than \$5,000 of grants or other assistance to any domestic organization or domestic government on Part IX, column (A), line 1? <i>If "Yes," complete Schedule I, Parts I and II</i>		No

Part IV Checklist of Required Schedules (continued)

		Yes	No
22	Did the organization report more than \$5,000 of grants or other assistance to or for domestic individuals on Part IX, column (A), line 2? If "Yes," complete Schedule I, Parts I and III		No
23	Did the organization answer "Yes" to Part VII, Section A, line 3, 4, or 5, about compensation of the organization's current and former officers, directors, trustees, key employees, and highest compensated employees? If "Yes," complete Schedule J	Yes	
24a	Did the organization have a tax-exempt bond issue with an outstanding principal amount of more than \$100,000 as of the last day of the year, that was issued after December 31, 2002? If "Yes," answer lines 24b through 24d and complete Schedule K. If "No," go to line 25a		No
b	Did the organization invest any proceeds of tax-exempt bonds beyond a temporary period exception?		
c	Did the organization maintain an escrow account other than a refunding escrow at any time during the year to defease any tax-exempt bonds?		
d	Did the organization act as an "on behalf of" issuer for bonds outstanding at any time during the year?		
25a	Section 501(c)(3), 501(c)(4), and 501(c)(29) organizations. Did the organization engage in an excess benefit transaction with a disqualified person during the year? If "Yes," complete Schedule L, Part I		No
b	Is the organization aware that it engaged in an excess benefit transaction with a disqualified person in a prior year, and that the transaction has not been reported on any of the organization's prior Forms 990 or 990-EZ? If "Yes," complete Schedule L, Part I		No
26	Did the organization report any amount on Part X, line 5 or 22 for receivables from or payables to any current or former officer, director, trustee, key employee, creator or founder, substantial contributor, or 35% controlled entity or family member of any of these persons? If "Yes," complete Schedule L, Part II		No
27	Did the organization provide a grant or other assistance to any current or former officer, director, trustee, key employee, creator or founder, substantial contributor, or employee thereof, a grant selection committee member, or to a 35% controlled entity (including an employee thereof) or family member of any of these persons? If "Yes," complete Schedule L, Part III		No
28	Was the organization a party to a business transaction with one of the following parties (see the Schedule L, Part IV instructions for applicable filing thresholds, conditions, and exceptions):		
a	A current or former officer, director, trustee, key employee, creator or founder, or substantial contributor? If "Yes," complete Schedule L, Part IV		No
b	A family member of any individual described in line 28a? If "Yes," complete Schedule L, Part IV		No
c	A 35% controlled entity of one or more individuals and/or organizations described in line 28a or 28b? If "Yes," complete Schedule L, Part IV		No
29	Did the organization receive more than \$25,000 in non-cash contributions? If "Yes," complete Schedule M		No
30	Did the organization receive contributions of art, historical treasures, or other similar assets, or qualified conservation contributions? If "Yes," complete Schedule M		No
31	Did the organization liquidate, terminate, or dissolve and cease operations? If "Yes," complete Schedule N, Part I		No
32	Did the organization sell, exchange, dispose of, or transfer more than 25% of its net assets? If "Yes," complete Schedule N, Part II		No
33	Did the organization own 100% of an entity disregarded as separate from the organization under Regulations sections 301.7701-2 and 301.7701-3? If "Yes," complete Schedule R, Part I	Yes	
34	Was the organization related to any tax-exempt or taxable entity? If "Yes," complete Schedule R, Part II, III, or IV, and Part V, line 1		No
35a	Did the organization have a controlled entity within the meaning of section 512(b)(13)?		No
b	If "Yes" to line 35a, did the organization receive any payment from or engage in any transaction with a controlled entity within the meaning of section 512(b)(13)? If "Yes," complete Schedule R, Part V, line 2		
36	Section 501(c)(3) organizations. Did the organization make any transfers to an exempt non-charitable related organization? If "Yes," complete Schedule R, Part V, line 2		No
37	Did the organization conduct more than 5% of its activities through an entity that is not a related organization and that is treated as a partnership for federal income tax purposes? If "Yes," complete Schedule R, Part VI		No
38	Did the organization complete Schedule O and provide explanations on Schedule O for Part VI, lines 11b and 19? Note. All Form 990 filers are required to complete Schedule O.	Yes	

Part V Statements Regarding Other IRS Filings and Tax Compliance		Yes	No
Check if Schedule O contains a response or note to any line in this Part V ☐			
1a	Enter the number reported in box 3 of Form 1096. Enter -0- if not applicable	33	
b	Enter the number of Forms W-2G included on line 1a. Enter -0- if not applicable	0	
c	Did the organization comply with backup withholding rules for reportable payments to vendors and reportable gaming (gambling) winnings to prize winners?	Yes	

2a Enter the number of employees reported on Form W-3, Transmittal of Wage and Tax Statements, filed for the calendar year ending with or within the year covered by this return	2a	22			
b If at least one is reported on line 2a, did the organization file all required federal employment tax returns?	2b	Yes			
3a Did the organization have unrelated business gross income of \$1,000 or more during the year?	3a			No	
b If "Yes," has it filed a Form 990-T for this year? <i>If "No" to line 3b, provide an explanation in Schedule O</i>	3b				
4a At any time during the calendar year, did the organization have an interest in, or a signature or other authority over, a financial account in a foreign country (such as a bank account, securities account, or other financial account)?	4a			No	
b If "Yes," enter the name of the foreign country: _____ See instructions for filing requirements for FinCEN Form 114, Report of Foreign Bank and Financial Accounts (FBAR).					
5a Was the organization a party to a prohibited tax shelter transaction at any time during the tax year?	5a			No	
b Did any taxable party notify the organization that it was or is a party to a prohibited tax shelter transaction?	5b			No	
c If "Yes," to line 5a or 5b, did the organization file Form 8886-T?	5c				
6a Does the organization have annual gross receipts that are normally greater than \$100,000, and did the organization solicit any contributions that were not tax deductible as charitable contributions?	6a			No	
b If "Yes," did the organization include with every solicitation an express statement that such contributions or gifts were not tax deductible?	6b				
7 Organizations that may receive deductible contributions under section 170(c).					
a Did the organization receive a payment in excess of \$75 made partly as a contribution and partly for goods and services provided to the payor?	7a			No	
b If "Yes," did the organization notify the donor of the value of the goods or services provided?	7b				
c Did the organization sell, exchange, or otherwise dispose of tangible personal property for which it was required to file Form 8282?	7c			No	
d If "Yes," indicate the number of Forms 8282 filed during the year	7d				
e Did the organization receive any funds, directly or indirectly, to pay premiums on a personal benefit contract?	7e			No	
f Did the organization, during the year, pay premiums, directly or indirectly, on a personal benefit contract?	7f			No	
g If the organization received a contribution of qualified intellectual property, did the organization file Form 8899 as required?	7g				
h If the organization received a contribution of cars, boats, airplanes, or other vehicles, did the organization file a Form 1098-C?	7h				
8 Sponsoring organizations maintaining donor advised funds. Did a donor advised fund maintained by the sponsoring organization have excess business holdings at any time during the year?	8				
9 Sponsoring organizations maintaining donor advised funds.					
a Did the sponsoring organization make any taxable distributions under section 4966?	9a				
b Did the sponsoring organization make a distribution to a donor, donor advisor, or related person?	9b				
10 Section 501(c)(7) organizations. Enter:					
a Initiation fees and capital contributions included on Part VIII, line 12	10a				
b Gross receipts, included on Form 990, Part VIII, line 12, for public use of club facilities	10b				
11 Section 501(c)(12) organizations. Enter:					
a Gross income from members or shareholders	11a				
b Gross income from other sources. (Do not net amounts due or paid to other sources against amounts due or received from them.)	11b				
12a Section 4947(a)(1) non-exempt charitable trusts. Is the organization filing Form 990 in lieu of Form 1041?	12a				
b If "Yes," enter the amount of tax-exempt interest received or accrued during the year.	12b				
13 Section 501(c)(29) qualified nonprofit health insurance issuers.					
a Is the organization licensed to issue qualified health plans in more than one state? Note. See the instructions for additional information the organization must report on Schedule O.	13a				
b Enter the amount of reserves the organization is required to maintain by the states in which the organization is licensed to issue qualified health plans	13b				
c Enter the amount of reserves on hand	13c				
14a Did the organization receive any payments for indoor tanning services during the tax year?	14a			No	
b If "Yes," has it filed a Form 720 to report these payments? <i>If "No," provide an explanation in Schedule O</i>	14b				
15 Is the organization subject to the section 4960 tax on payment(s) of more than \$1,000,000 in remuneration or excess parachute payment(s) during the year? If "Yes," see the instructions and file Form 4720, Schedule N.	15			No	
16 Is the organization an educational institution subject to the section 4968 excise tax on net investment income? . . . If "Yes," complete Form 4720, Schedule O.	16			No	
17 Section 501(c)(21) organizations. Did the trust, or any disqualified or other person engage in any activities that would result in the imposition of an excise tax under section 4951, 4952, or 4953? If "Yes," complete Form 6069.	17				

Section A. Governing Body and Management

		Yes	No
1a	Enter the number of voting members of the governing body at the end of the tax year If there are material differences in voting rights among members of the governing body, or if the governing body delegated broad authority to an executive committee or similar committee, explain in Schedule O.	17	
1b	Enter the number of voting members included in line 1a, above, who are independent	17	
2	Did any officer, director, trustee, or key employee have a family relationship or a business relationship with any other officer, director, trustee, or key employee?	2	No
3	Did the organization delegate control over management duties customarily performed by or under the direct supervision of officers, directors or trustees, or key employees to a management company or other person?	3	No
4	Did the organization make any significant changes to its governing documents since the prior Form 990 was filed?	4	No
5	Did the organization become aware during the year of a significant diversion of the organization's assets?	5	No
6	Did the organization have members or stockholders?	6	No
7a	Did the organization have members, stockholders, or other persons who had the power to elect or appoint one or more members of the governing body?	7a	No
7b	Are any governance decisions of the organization reserved to (or subject to approval by) members, stockholders, or persons other than the governing body?	7b	No
8	Did the organization contemporaneously document the meetings held or written actions undertaken during the year by the following:		
8a	The governing body?	8a	Yes
8b	Each committee with authority to act on behalf of the governing body?	8b	Yes
9	Is there any officer, director, trustee, or key employee listed in Part VII, Section A, who cannot be reached at the organization's mailing address? If "Yes," provide the names and addresses in Schedule O	9	No

Section B. Policies (This Section B requests information about policies not required by the Internal Revenue Code.)

		Yes	No
10a	Did the organization have local chapters, branches, or affiliates?	10a	No
10b	If "Yes," did the organization have written policies and procedures governing the activities of such chapters, affiliates, and branches to ensure their operations are consistent with the organization's exempt purposes?	10b	
11a	Has the organization provided a complete copy of this Form 990 to all members of its governing body before filing the form?	11a	Yes
11b	Describe on Schedule O the process, if any, used by the organization to review this Form 990.		
12a	Did the organization have a written conflict of interest policy? If "No," go to line 13	12a	Yes
12b	Were officers, directors, or trustees, and key employees required to disclose annually interests that could give rise to conflicts?	12b	Yes
12c	Did the organization regularly and consistently monitor and enforce compliance with the policy? If "Yes," describe on Schedule O how this was done	12c	Yes
13	Did the organization have a written whistleblower policy?	13	Yes
14	Did the organization have a written document retention and destruction policy?	14	Yes
15	Did the process for determining compensation of the following persons include a review and approval by independent persons, comparability data, and contemporaneous substantiation of the deliberation and decision?		
15a	The organization's CEO, Executive Director, or top management official	15a	Yes
15b	Other officers or key employees of the organization	15b	Yes
	If "Yes" to line 15a or 15b, describe the process on Schedule O. See instructions.		
16a	Did the organization invest in, contribute assets to, or participate in a joint venture or similar arrangement with a taxable entity during the year?	16a	No
16b	If "Yes," did the organization follow a written policy or procedure requiring the organization to evaluate its participation in joint venture arrangements under applicable federal tax law, and take steps to safeguard the organization's exempt status with respect to such arrangements?	16b	

Section C. Disclosure

17	List the states with which a copy of this Form 990 is required to be filed	AL, AR, CA, FL, GA, HI, IL, KS, KY, MD, MA, MI, MN, MS, NH, NJ, NM, NY, ND, OR, PA, RI, SC, TN, UT, WV, WI, CT
18	Section 6104 requires an organization to make its Form 1023 (1024 or 1024-A, if applicable), 990, and 990-T (section 501(c)(3)s only) available for public inspection. Indicate how you made these available. Check all that apply. ☐ Own website ☐ Another's website ☒ Upon request ☐ Other (explain in Schedule O)	
19	Describe in Schedule O whether (and if so, how) the organization made its governing documents, conflict of interest policy, and financial statements available to the public during the tax year.	
20	State the name, address, and telephone number of the person who possesses the organization's books and records: LEAH BINDER THE LEAPFROG GROUP 1775 K STREET NW 400 WASHINGTON, DC 20006 (202) 292-6713	

Check if Schedule O contains a response or note to any line in this Part VII ☐

Section A. Officers, Directors, Trustees, Key Employees, and Highest Compensated Employees

1a Complete this table for all persons required to be listed. Report compensation for the calendar year ending with or within the organization's tax year.

- List all of the organization's **current** officers, directors, trustees (whether individuals or organizations), regardless of amount of compensation. Enter -0- in columns (D), (E), and (F) if no compensation was paid.
- List all of the organization's **current** key employees, if any. See the instructions for definition of "key employee."
- List the organization's five **current** highest compensated employees (other than an officer, director, trustee or key employee) who received reportable compensation (box 5 of Form W-2, box 6 of Form 1099-MISC, and/or box 1 of Form 1099-NEC) of more than \$100,000 from the organization and any related organizations.
- List all of the organization's **former** officers, key employees, or highest compensated employees who received more than \$100,000 of reportable compensation from the organization and any related organizations.
- List all of the organization's **former directors or trustees** that received, in the capacity as a former director or trustee of the organization, more than \$10,000 of reportable compensation from the organization and any related organizations.

See the instructions for the order in which to list the persons above.

☐ Check this box if neither the organization nor any related organization compensated any current officer, director, or trustee.

(A) Name and title	(B) Average hours per week (list any hours for related organizations below dotted line)	(C) Position (do not check more than one box, unless person is both an officer and a director/trustee)						(D) Reportable compensation from the organization (W-2/1099-MISC/1099-NEC)	(E) Reportable compensation from related organizations (W-2/1099-MISC/1099-NEC)	(F) Estimated amount of other compensation from the organization and related organizations

SCHEDULE A
(Form 990)

Public Charity Status and Public Support

Complete if the organization is a section 501(c)(3) organization or a section 4947(a)(1) nonexempt charitable trust.
▶ Attach to Form 990 or Form 990-EZ.
▶ Go to www.irs.gov/Form990 for instructions and the latest information.

2023
Open to Public Inspection

Department of the Treasury
Internal Revenue Service

Name of the organization THE LEAPFROG GROUP	Employer identification number 52-2359517
--	--

Part I Reason for Public Charity Status (All organizations must complete this part.) See instructions.

The organization is not a private foundation because it is: (For lines 1 through 12, check only one box.)

- 1 ☐ A church, convention of churches, or association of churches described in **section 170(b)(1)(A)(i).**
- 2 ☐ A school described in **section 170(b)(1)(A)(ii).** (Attach Schedule E (Form 990).)
- 3 ☐ A hospital or a cooperative hospital service organization described in **section 170(b)(1)(A)(iii).**
- 4 ☐ A medical research organization operated in conjunction with a hospital described in **section 170(b)(1)(A)(iii).** Enter the hospital's name, city, and state:
- 5 ☐ An organization operated for the benefit of a college or university owned or operated by a governmental unit described in **section 170(b)(1)(A)(iv).** (Complete Part II.)
- 6 ☐ A federal, state, or local government or governmental unit described in **section 170(b)(1)(A)(v).**
- 7 ☐ An organization that normally receives a substantial part of its support from a governmental unit or from the general public described in **section 170(b)(1)(A)(vi).** (Complete Part II.)
- 8 ☐ A community trust described in **section 170(b)(1)(A)(vi).** (Complete Part II.)
- 9 ☐ An agricultural research organization described in **170(b)(1)(A)(ix)** operated in conjunction with a land-grant college or university or a non-land grant college of agriculture. See instructions. Enter the name, city, and state of the college or university:
- 10 ☒ An organization that normally receives: (1) more than 33 1/3% of its support from contributions, membership fees, and gross receipts from activities related to its exempt functions—subject to certain exceptions, and (2) no more than 33 1/3% of its support from gross investment income and unrelated business taxable income (less section 511 tax) from businesses acquired by the organization after June 30, 1975. See **section 509(a)(2).** (Complete Part III.)
- 11 ☐ An organization organized and operated exclusively to test for public safety. See **section 509(a)(4).**
- 12 ☐ An organization organized and operated exclusively for the benefit of, to perform the functions of, or to carry out the purposes of one or more publicly supported organizations described in **section 509(a)(1)** or **section 509(a)(2).** See **section 509(a)(3).** Check the box on lines 12a through 12d that describes the type of supporting organization and complete lines 12e, 12f, and 12g.
- a ☐ **Type I.** A supporting organization operated, supervised, or controlled by its supported organization(s), typically by giving the supported organization(s) the power to regularly appoint or elect a majority of the directors or trustees of the supporting organization. **You must complete Part IV, Sections A and B.**
- b ☐ **Type II.** A supporting organization supervised or controlled in connection with its supported organization(s), by having control or management of the supporting organization vested in the same persons that control or manage the supported organization(s). **You must complete Part IV, Sections A and C.**
- c ☐ **Type III functionally integrated.** A supporting organization operated in connection with, and functionally integrated with, its supported organization(s) (see instructions). **You must complete Part IV, Sections A, D, and E.**
- d ☐ **Type III non-functionally integrated.** A supporting organization operated in connection with its supported organization(s) that is not functionally integrated. The organization generally must satisfy a distribution requirement and an attentiveness requirement (see instructions). **You must complete Part IV, Sections A and D, and Part V.**
- e ☐ Check this box if the organization received a written determination from the IRS that it is a Type I, Type II, Type III functionally integrated, or Type III non-functionally integrated supporting organization.
- f Enter the number of supported organizations
- g Provide the following information about the supported organization(s).

(i) Name of supported organization	(ii) EIN	(iii) Type of organization (described on lines 1- 10 above (see instructions))	(iv) Is the organization listed in your governing document?		(v) Amount of monetary support (see instructions)	(vi) Amount of other support (see instructions)
			Yes	No

Part II

Support Schedule for Organizations Described in Sections 170(b)(1)(A)(iv) and 170(b)(1)(A)(vi)

(Complete only if you checked the box on line 5, 7, or 8 of Part I or if the organization failed to qualify under Part III. If the organization failed to qualify under the tests listed below, please complete Part III.)

Section A. Public Support

Calendar year (or fiscal year beginning in) ▶	(a) 2019	(b) 2020	(c) 2021	(d) 2022	(e) 2023	(f) Total
1 Gifts, grants, contributions, and membership fees received. (Do not include any "unusual grant.") . . .						
2 Tax revenues levied for the organization's benefit and either paid to or expended on its behalf						
3 The value of services or facilities furnished by a governmental unit to the organization without charge..						
4 Total. Add lines 1 through 3						
5 The portion of total contributions by each person (other than a governmental unit or publicly supported organization) included on line 1 that exceeds 2% of the amount shown on line 11, column (f) . .						
6 Public support. Subtract line 5 from line 4.						

Section B. Total Support

Calendar year (or fiscal year beginning in) ▶	(a) 2019	(b) 2020	(c) 2021	(d) 2022	(e) 2023	(f) Total
7 Amounts from line 4. . .						
8 Gross income from interest, dividends, payments received on securities loans, rents, royalties and income from similar sources. . . .						
9 Net income from unrelated business activities, whether or not the business is regularly carried on. .						
10 Other income. Do not include gain or loss from the sale of capital assets (Explain in Part VI.). . .						
11 Total support. Add lines 7 through 10						

12

Gross receipts from related activities, etc. (see instructions)

12

13

First 5 years. If the Form 990 is for the organization's first, second, third, fourth, or fifth tax year as a section 501(c)(3) organization, check this box and **stop here** ☐

Section C. Computation of Public Support Percentage

14	Public support percentage for 2023 (line 6, column (f) divided by line 11, column (f))	14	
15	Public support percentage for 2022 Schedule A, Part II, line 14	15	

16a

33 1/3% support test—2023. If the organization did not check the box on line 13, and line 14 is 33 1/3% or more, check this box and **stop here**. The organization qualifies as a publicly supported organization ☐

b

33 1/3% support test—2022. If the organization did not check a box on line 13 or 16a, and line 15 is 33 1/3% or more, check this box and **stop here**. The organization qualifies as a publicly supported organization ☐

17a

10%-facts-and-circumstances test—2023. If the organization did not check a box on line 13, 16a, or 16b, and line 14 is 10% or more, and if the organization meets the "facts-and-circumstances" test, check this box and **stop here**. Explain in Part VI how the organization meets the "facts-and-circumstances" test. The organization qualifies as a publicly supported organization ☐

b

10%-facts-and-circumstances test—2022. If the organization did not check a box on line 13, 16a, 16b, or 17a, and line 15 is 10% or more, and if the organization meets the "facts-and-circumstances" test, check this box and **stop here**. Explain in Part VI how the organization meets the "facts-and-circumstances" test. The organization qualifies as a publicly supported organization ☐

18

Private foundation. If the organization did not check a box on line 13, 16a, 16b, 17a, or 17b, check this box and see instructions ☐

Part III

Support Schedule for Organizations Described in Section 509(a)(2)

(Complete only if you checked the box on line 10 of Part I or if the organization failed to qualify under Part II. If the organization fails to qualify under the tests listed below, please complete Part II.)

Section A. Public Support						
Calendar year (or fiscal year beginning in) ►	(a) 2019	(b) 2020	(c) 2021	(d) 2022	(e) 2023	(f) Total
1 Gifts, grants, contributions, and membership fees received. (Do not include any "unusual grants.") .	435,427	1,419,432	1,365,819	1,837,788	2,496,336	7,554,802
2 Gross receipts from admissions, merchandise sold or services performed, or facilities furnished in any activity that is related to the organization's tax-exempt purpose	5,446,926	5,560,125	5,883,131	5,669,065	5,816,653	28,375,900
3 Gross receipts from activities that are not an unrelated trade or business under section 513						
4 Tax revenues levied for the organization's benefit and either paid to or expended on its behalf						
5 The value of services or facilities furnished by a governmental unit to the organization without charge						
6 Total. Add lines 1 through 5	5,882,353	6,979,557	7,248,950	7,506,853	8,312,989	35,930,702
7a Amounts included on lines 1, 2, and 3 received from disqualified persons	77,500	641,243	765,594	554,402	814,353	2,853,092
b Amounts included on lines 2 and 3 received from other than disqualified persons that exceed the greater of \$5,000 or 1% of the amount on line 13 for the year.	911,002	828,522	815,599	1,550,539	625,846	4,731,508
c Add lines 7a and 7b. .	988,502	1,469,765	1,581,193	2,104,941	1,440,199	7,584,600
8 Public support. (Subtract line 7c from line 6.)						28,346,102

Section B. Total Support						
Calendar year (or fiscal year beginning in) ►	(a) 2019	(b) 2020	(c) 2021	(d) 2022	(e) 2023	(f) Total
9 Amounts from line 6.	5,882,353	6,979,557	7,248,950	7,506,853	8,312,989	35,930,702
10a Gross income from interest, dividends, payments received on securities loans, rents, royalties and income from similar sources. .	1,293	181	449	49,402	43,878	95,203
b Unrelated business taxable income (less section 511 taxes) from businesses acquired after June 30, 1975.						
c Add lines 10a and 10b.	1,293	181	449	49,402	43,878	95,203
11 Net income from unrelated business activities not included on line 10b, whether or not the business is regularly carried on.						
12 Other income. Do not include gain or loss from the sale of capital assets (Explain in Part VI.) . . .						
13 Total support. (Add lines 9, 10c, 11, and 12.)	5,883,646	6,979,738	7,249,399	7,556,255	8,356,867	36,025,905
14 First 5 years. If the Form 990 is for the organization's first, second, third, fourth, or fifth tax year as a section 501(c)(3) organization, check this box and stop here.	☐					

Section C. Computation of Public Support Percentage		
15 Public support percentage for 2023 (line 8, column (f) divided by line 13, column (f))	15	78.680 %
16 Public support percentage from 2022 Schedule A, Part III, line 15	16	87.130 %

Section D. Computation of Investment Income Percentage		
17 Investment income percentage for 2023 (line 10c, column (f) divided by line 13, column (f))	17	0.260 %
18 Investment income percentage from 2022 Schedule A, Part III, line 17	18	0.030 %
19a 33 1/3% support tests-2023. If the organization did not check the box on line 14, and line 15 is more than 33 1/3%, and line 17 is not more than 33 1/3%, check this box and stop here. The organization qualifies as a publicly supported organization	☒	
b 33 1/3% support tests—2022. If the organization did not check a box on line 14 or line 19a, and line 16 is more than 33 1/3% and line 18 is not more than 33 1/3%, check this box and stop here. The organization qualifies as a publicly supported organization	☐	
20 Private foundation. If the organization did not check a box on line 14, 19a, or 19b, check this box and see instructions	☐	

Part IV Supporting Organizations

(Complete only if you checked a box on line 12 of Part I. If you checked box 12a, of Part I, complete Sections A and B. If you checked box 12b, of Part I, complete Sections A and C. If you checked box 12c, of Part I, complete Sections A, D, and E. If you checked box 12d, of Part I, complete Sections A and D, and complete Part V.)

Section A. All Supporting Organizations

		Yes	No
1	Are all of the organization's supported organizations listed by name in the organization's governing documents? If "No," describe in Part VI how the supported organizations are designated. If designated by class or purpose, describe the designation. If historic and continuing relationship, explain.		
1			
2	Did the organization have any supported organization that does not have an IRS determination of status under section 509(a)(1) or (2)? If "Yes," explain in Part VI how the organization determined that the supported organization was described in section 509(a)(1) or (2).		
2			
3a	Did the organization have a supported organization described in section 501(c)(4), (5), or (6)? If "Yes," answer lines 3b and 3c below.		
3a			
b	Did the organization confirm that each supported organization qualified under section 501(c)(4), (5), or (6) and satisfied the public support tests under section 509(a)(2)? If "Yes," describe in Part VI when and how the organization made the determination.		
3b			
c	Did the organization ensure that all support to such organizations was used exclusively for section 170(c)(2)(B) purposes? If "Yes," explain in Part VI what controls the organization put in place to ensure such use.		
3c			
4a	Was any supported organization not organized in the United States ("foreign supported organization")? If "Yes" and if you checked box 12a or 12b in Part I, answer lines 4b and 4c below.		
4a			
b	Did the organization have ultimate control and discretion in deciding whether to make grants to the foreign supported organization? If "Yes," describe in Part VI how the organization had such control and discretion despite being controlled or supervised by or in connection with its supported organizations.		
4b			
c	Did the organization support any foreign supported organization that does not have an IRS determination under sections 501(c)(3) and 509(a)(1) or (2)? If "Yes," explain in Part VI what controls the organization used to ensure that all support to the foreign supported organization was used exclusively for section 170(c)(2)(B) purposes.		
4c			
5a	Did the organization add, substitute, or remove any supported organizations during the tax year? If "Yes," answer lines 5b and 5c below (if applicable). Also, provide detail in Part VI , including (i) the names and EIN numbers of the supported organizations added, substituted, or removed; (ii) the reasons for each such action; (iii) the authority under the organization's organizing document authorizing such action; and (iv) how the action was accomplished (such as by amendment to the organizing document).		
5a			
b	Type I or Type II only. Was any added or substituted supported organization part of a class already designated in the organization's organizing document?		
5b			
c	Substitutions only. Was the substitution the result of an event beyond the organization's control?		
5c			
6	Did the organization provide support (whether in the form of grants or the provision of services or facilities) to anyone other than (i) its supported organizations, (ii) individuals that are part of the charitable class benefited by one or more of its supported organizations, or (iii) other supporting organizations that also support or benefit one or more of the filing organization's supported organizations? If "Yes," provide detail in Part VI .		
6			
7	Did the organization provide a grant, loan, compensation, or other similar payment to a substantial contributor (defined in section 4958(c)(3)(C)), a family member of a substantial contributor, or a 35% controlled entity with regard to a substantial contributor? If "Yes," complete Part I of Schedule L (Form 990) .		
7			
8	Did the organization make a loan to a disqualified person (as defined in section 4958) not described on line 7? If "Yes," complete Part I of Schedule L (Form 990).		
8			
9a	Was the organization controlled directly or indirectly at any time during the tax year by one or more disqualified persons, as defined in section 4946 (other than foundation managers and organizations described in section 509(a)(1) or (2))? If "Yes," provide detail in Part VI .		
9a			
b	Did one or more disqualified persons (as defined on line 9a) hold a controlling interest in any entity in which the supporting organization had an interest? If "Yes," provide detail in Part VI .		
9b			
c	Did a disqualified person (as defined on line 9a) have an ownership interest in, or derive any personal benefit from, assets in which the supporting organization also had an interest? If "Yes," provide detail in Part VI .		
9c			
10a	Was the organization subject to the excess business holdings rules of section 4943 because of section 4943(f) (regarding certain Type II supporting organizations, and all Type III non-functionally integrated supporting organizations)? If "Yes," answer line 10b below.		
10a			
b	Did the organization have any excess business holdings in the tax year? (Use Schedule C, Form 4720, to determine whether the organization had excess business holdings).		
10b			

Part IV Supporting Organizations (continued)

		Yes	No
11	Has the organization accepted a gift or contribution from any of the following persons?		
a	A person who directly or indirectly controls, either alone or together with persons described on lines 11b and 11c below, the governing body of a supported organization?		
	11a		
b	A family member of a person described on 11a above?		
	11b		
c	A 35% controlled entity of a person described on line 11a or 11b above? If "Yes" to 11a, 11b, or 11c, provide detail in Part VI.		
	11c		

Section B. Type I Supporting Organizations

		Yes	No
1	Did the officers, directors, trustees, or membership of one or more supported organizations have the power to regularly appoint or elect at least a majority of the organization's directors or trustees at all times during the tax year? If "No," describe in Part VI how the supported organization(s) effectively operated, supervised, or controlled the organization's activities. If the organization had more than one supported organization, describe how the powers to appoint and/or remove directors or trustees were allocated among the supported organizations and what conditions or restrictions, if any, applied to such powers during the tax year.		
	1		
2	Did the organization operate for the benefit of any supported organization other than the supported organization(s) that operated, supervised, or controlled the supporting organization? If "Yes," explain in Part VI how providing such benefit carried out the purposes of the supported organization(s) that operated, supervised or controlled the supporting organization.		
	2		

Section C. Type II Supporting Organizations

		Yes	No
1	Were a majority of the organization's directors or trustees during the tax year also a majority of the directors or trustees of each of the organization's supported organization(s)? If "No," describe in Part VI how control or management of the supporting organization was vested in the same persons that controlled or managed the supported organization(s).		
	1		

Section D. All Type III Supporting Organizations

		Yes	No
1	Did the organization provide to each of its supported organizations, by the last day of the fifth month of the organization's tax year, (i) a written notice describing the type and amount of support provided during the prior tax year, (ii) a copy of the Form 990 that was most recently filed as of the date of notification, and (iii) copies of the organization's governing documents in effect on the date of notification, to the extent not previously provided?		
	1		
2	Were any of the organization's officers, directors, or trustees either (i) appointed or elected by the supported organization(s) or (ii) serving on the governing body of a supported organization? If "No," explain in Part VI how the organization maintained a close and continuous working relationship with the supported organization(s).		
	2		
3	By reason of the relationship described in line 2 above, did the organization's supported organizations have a significant voice in the organization's investment policies and in directing the use of the organization's income or assets at all times during the tax year? If "Yes," describe in Part VI the role the organization's supported organizations played in this regard.		
	3		

Section E. Type III Functionally-Integrated Supporting Organizations

1	Check the box next to the method that the organization used to satisfy the Integral Part Test during the year (see instructions):			
a	☐ The organization satisfied the Activities Test. Complete line 2 below.			
b	☐ The organization is the parent of each of its supported organizations. Complete line 3 below.			
c	☐ The organization supported a governmental entity. Describe in Part VI how you supported a government entity (see instructions)			
2	Activities Test. Answer lines 2a and 2b below.			
a	Did substantially all of the organization's activities during the tax year directly further the exempt purposes of the supported organization(s) to which the organization was responsive? If "Yes," then in Part VI identify those supported organizations and explain how these activities directly furthered their exempt purposes, how the organization was responsive to those supported organizations, and how the organization determined that these activities constituted substantially all of its activities.			
	2a			
b	Did the activities described on line 2a, above constitute activities that, but for the organization's involvement, one or more of the organization's supported organization(s) would have been engaged in? If "Yes," explain in Part VI the reasons for the organization's position that its supported organization(s) would have engaged in these activities but for the organization's involvement.			
	2b			
3	Parent of Supported Organizations. Answer lines 3a and 3b below.			
a	Did the organization have the power to regularly appoint or elect a majority of the officers, directors, or trustees of each of the supported organizations? If "Yes" or "No", provide details in Part VI.			
	3a			
b	Did the organization exercise a substantial degree of direction over the policies, programs and activities of each of its supported organizations? If "Yes," describe in Part VI. the role played by the organization in this regard.			
	3b			

1

☐ Check here if the organization satisfied the Integral Part Test as a qualifying trust on Nov. 20, 1970 (explain in **Part VI**). See instructions. All other Type III non-functionally integrated supporting organizations must complete Sections A through E.

Section A - Adjusted Net Income		(A) Prior Year	(B) Current Year (optional)
1	Net short-term capital gain	1	
2	Recoveries of prior-year distributions	2	
3	Other gross income (see instructions)	3	
4	Add lines 1 through 3	4	
5	Depreciation and depletion	5	
6	Portion of operating expenses paid or incurred for production or collection of gross income or for management, conservation, or maintenance of property held for production of income (see instructions)	6	
7	Other expenses (see instructions)	7	
8	Adjusted Net Income (subtract lines 5, 6 and 7 from line 4)	8	

Section B - Minimum Asset Amount		(A) Prior Year	(B) Current Year (optional)
1	Aggregate fair market value of all non-exempt-use assets (see instructions for short tax year or assets held for part of year):	1	
a	Average monthly value of securities	1a	
b	Average monthly cash balances	1b	
c	Fair market value of other non-exempt-use assets	1c	
d	Total (add lines 1a, 1b, and 1c)	1d	
e	Discount claimed for blockage or other factors (explain in detail in Part VI):		
2	Acquisition indebtedness applicable to non-exempt use assets	2	
3	Subtract line 2 from line 1d	3	
4	Cash deemed held for exempt use. Enter 0.015 of line 3 (for greater amount, see instructions).	4	
5	Net value of non-exempt-use assets (subtract line 4 from line 3)	5	
6	Multiply line 5 by 0.035	6	
7	Recoveries of prior-year distributions	7	
8	Minimum Asset Amount (add line 7 to line 6)	8	

Section C - Distributable Amount			Current Year
1	Adjusted net income for prior year (from Section A, line 8, Column A)	1	
2	Enter 85% of line 1	2	
3	Minimum asset amount for prior year (from Section B, line 8, Column A)	3	
4	Enter greater of line 2 or line 3	4	
5	Income tax imposed in prior year	5	
6	Distributable Amount. Subtract line 5 from line 4, unless subject to emergency temporary reduction (see instructions)	6	

7

☐ Check here if the current year is the organization's first as a non-functionally-integrated Type III supporting organization (see instructions)

Part V

Type III Non-Functionally Integrated 509(a)(3) Supporting Organizations (continued)

Section D - Distributions		Current Year
1	Amounts paid to supported organizations to accomplish exempt purposes	1
2	Amounts paid to perform activity that directly furthers exempt purposes of supported organizations, in excess of income from activity	2
3	Administrative expenses paid to accomplish exempt purposes of supported organizations	3
4	Amounts paid to acquire exempt-use assets	4
5	Qualified set-aside amounts (prior IRS approval required - provide details in Part VI)	5
6	Other distributions (describe in Part VI). See instructions	6
7	Total annual distributions. Add lines 1 through 6.	7
8	Distributions to attentive supported organizations to which the organization is responsive (provide details in Part VI). See instructions	8
9	Distributable amount for 2023 from Section C, line 6	9
10	Line 8 amount divided by Line 9 amount	10

Section E - Distribution Allocations (see instructions)	(i) Excess Distributions	(ii) Underdistributions Pre-2023	(iii) Distributable Amount for 2023
1	Distributable amount for 2023 from Section C, line 6		
2	Underdistributions, if any, for years prior to 2023 (reasonable cause required-- explain in Part VI). See instructions.		
3	Excess distributions carryover, if any, to 2023:		
a	From 2018.		
b	From 2019.		
c	From 2020.		
d	From 2021.		
e	From 2022.		
f	Total of lines 3a through e		
g	Applied to underdistributions of prior years		
h	Applied to 2023 distributable amount		
i	Carryover from 2018 not applied (see instructions)		
j	Remainder. Subtract lines 3g, 3h, and 3i from line 3f.		
4	Distributions for 2023 from Section D, line 7: \$		
a	Applied to underdistributions of prior years		
b	Applied to 2023 distributable amount		
c	Remainder. Subtract lines 4a and 4b from line 4.		
5	Remaining underdistributions for years prior to 2023, if any. Subtract lines 3g and 4a from line 2. If the amount is greater than zero, explain in Part VI. See instructions.		
6	Remaining underdistributions for 2023. Subtract lines 3h and 4b from line 1. If the amount is greater than zero, explain in Part VI. See instructions.		
7	Excess distributions carryover to 2024. Add lines 3j and 4c.		
8	Breakdown of line 7:		
a	Excess from 2019.		
b	Excess from 2020.		
c	Excess from 2021.		
d	Excess from 2022.		
e	Excess from 2023.		

Part VI

Supplemental information. Provide the explanations required by Part II, line 10; Part II, line 17a or 17b; Part III, line 12; Part IV, Section A, lines 1, 2, 3b, 3c, 4b, 4c, 5a, 6, 9a, 9b, 9c, 11a, 11b, and 11c; Part IV, Section B, lines 1 and 2; Part IV, Section C, line 1; Part IV, Section D, lines 2 and 3; Part IV, Section E, lines 1c, 2a, 2b, 3a and 3b; Part V, line 1; Part V, Section B, line 1e; Part V Section D, lines 5, 6, and 8; and Part V, Section E, lines 2, 5, and 6. Also complete this part for any additional information. (See instructions).

Facts And Circumstances Test

Return Reference	Explanation
Case 9:25-cv-80526-DMM	Document 88-79 Entered on FLSD Docket 10/28/2025 Page 22 of 38

If the organization answered "Yes" on Form 990, Part IV, Line 3, or Form 990-EZ, Part V, line 46 (Political Campaign Activities), then

- Section 501(c)(3) organizations: Complete Parts I-A and B. Do not complete Part I-C.
- Section 501(c) (other than section 501(c)(3)) organizations: Complete Parts I-A and C below. Do not complete Part I-B.
- Section 527 organizations: Complete Part I-A only.

If the organization answered "Yes" on Form 990, Part IV, Line 4, or Form 990-EZ, Part VI, line 47 (Lobbying Activities), then

- Section 501(c)(3) organizations that have filed Form 5768 (election under section 501(h)): Complete Part II-A. Do not complete Part II-B.
- Section 501(c)(3) organizations that have NOT filed Form 5768 (election under section 501(h)): Complete Part II-B. Do not complete Part II-A.

If the organization answered "Yes" on Form 990, Part IV, Line 5 (Proxy Tax) (see separate instructions) or Form 990-EZ, Part V, line 35c (Proxy Tax) (see separate instructions), then

- Section 501(c)(4), (5), or (6) organizations: Complete Part III.

Name of the organization THE LEAPFROG GROUP	Employer identification number 52-2359517
--	--

Part I-A Complete if the organization is exempt under section 501(c) or is a section 527 organization.

1	Provide a description of the organization's direct and indirect political campaign activities in Part IV. See instructions for definition of "political campaign activities."	
2	Political campaign activity expenditures. See instructions	\$
3	Volunteer hours for political campaign activities. See instructions	

Part I-B Complete if the organization is exempt under section 501(c)(3).

1	Enter the amount of any excise tax incurred by the organization under section 4955	\$
2	Enter the amount of any excise tax incurred by organization managers under section 4955	\$
3	If the organization incurred a section 4955 tax, did it file Form 4720 for this year?	☐ Yes ☐ No
4a	Was a correction made?	☐ Yes ☐ No
b	If "Yes," describe in Part IV.	

Part I-C Complete if the organization is exempt under section 501(c), except section 501(c)(3).

1	Enter the amount directly expended by the filing organization for section 527 exempt function activities	\$
2	Enter the amount of the filing organization's funds contributed to other organizations for section 527 exempt function activities	\$
3	Total exempt function expenditures. Add lines 1 and 2. Enter here and on Form 1120-POL, line 17b	\$
4	Did the filing organization file Form 1120-POL for this year?	☐ Yes ☐ No
5	Enter the names, addresses and employer identification number (EIN) of all section 527 political organizations to which the filing organization made payments. For each organization listed, enter the amount paid from the filing organization's funds. Also enter the amount of political contributions received that were promptly and directly delivered to a separate political organization, such as a separate segregated fund or a political action committee (PAC). If additional space is needed, provide information in Part IV.	

(a) Name	(b) Address	(c) EIN	(d) Amount paid from filing organization's funds. If none, enter -0-.	(e) Amount of political contributions received and promptly and directly delivered to a separate political organization. If none, enter -0-.

Over \$17,000,000	\$1,000,000.														
g Grassroots nontaxable amount (enter 25% of line 1f)		141,953													
h Subtract line 1g from line 1a. If zero or less, enter -0-		0													
i Subtract line 1f from line 1c. If zero or less, enter -0-		0													
j If there is an amount other than zero on either line 1h or line 1i, did the organization file Form 4720 reporting section 4911 tax for this year?		☐ Yes ☐ No													

4-Year Averaging Period Under Section 501(h)

(Some organizations that made a section 501(h) election do not have to complete all of the five columns below. See the separate instructions for lines 2a through 2f.)

Lobbying Expenditures During 4-Year Averaging Period					
Calendar year (or fiscal year beginning in)	(a) 2019	(b) 2020	(c) 2021	(d) 2022	(e) Total
2a Lobbying nontaxable amount	462,469	512,283	548,783	567,811	2,091,346
b Lobbying ceiling amount (150% of line 2a, column(e))					3,137,019
c Total lobbying expenditures					
d Grassroots nontaxable amount	115,617	128,071	137,196	141,953	522,837
e Grassroots ceiling amount (150% of line 2d, column (e))					784,256
f Grassroots lobbying expenditures					

Part II-B Complete if the organization is exempt under section 501(c)(3) and has NOT filed Form 5768 (election under section 501(h)).

For each "Yes" response on lines 1a through 1i below, provide in Part IV a detailed description of the lobbying activity.

		(a)		(b)
		Yes	No	Amount
1	During the year, did the filing organization attempt to influence foreign, national, state or local legislation, including any attempt to influence public opinion on a legislative matter or referendum, through the use of:			
a	Volunteers?			
b	Paid staff or management (include compensation in expenses reported on lines 1c through 1i)?			
c	Media advertisements?			
d	Mailings to members, legislators, or the public?			
e	Publications, or published or broadcast statements?			
f	Grants to other organizations for lobbying purposes?			
g	Direct contact with legislators, their staffs, government officials, or a legislative body?			
h	Rallies, demonstrations, seminars, conventions, speeches, lectures, or any similar means?			
i	Other activities?			
j	Total. Add lines 1c through 1i			
2a	Did the activities in line 1 cause the organization to be not described in section 501(c)(3)?			
b	If "Yes," enter the amount of any tax incurred under section 4912			
c	If "Yes," enter the amount of any tax incurred by organization managers under section 4912			
d	If the filing organization incurred a section 4912 tax, did it file Form 4720 for this year?			

Part III-A Complete if the organization is exempt under section 501(c)(4), section 501(c)(5), or section 501(c)(6).

	Yes	No
1 Were substantially all (90% or more) dues received nondeductible by members?	1	
2 Did the organization make only in-house lobbying expenditures of \$2,000 or less?	2	
3 Did the organization agree to carry over lobbying and political expenditures from the prior year?	3	

Part III-B Complete if the organization is exempt under section 501(c)(4), section 501(c)(5), or section 501(c)(6) and if either (a) BOTH Part III-A, lines 1 and 2, are answered "No" OR (b) Part III-A, line 3, is answered "Yes."

1	Dues, assessments and similar amounts from members	1	
2	Section 162(e) nondeductible lobbying and political expenditures (do not include amounts of political expenses for which the section 527(f) tax was paid).		
a	Current year	2a	
b	Carryover from last year	2b	
c	Total	2c	
3	Aggregate amount reported in section 6033(e)(1)(A) notices of nondeductible section 162(e) dues .	3	
4	If notices were sent and the amount on line 2c exceeds the amount on line 3, what portion of the excess does the organization agree to carryover to the reasonable estimate of nondeductible lobbying and political expenditure next year?	4	
5	Taxable amount of lobbying and political expenditures. See Instructions	5	

Part IV Supplemental Information

Provide the descriptions required for Part I-A, line 1; Part I-B, line 4; Part I-C, line 5; Part II-A (affiliated group list); Part II-A, lines 1 and 2 (see instructions), and Part II-B, line 1. Also, complete this part for any additional information.

Return Reference	Explanation
------------------	-------------

Name of the organization THE LEAPFROG GROUP	Employer identification number 52-2359517
---	---

Part I Organizations Maintaining Donor Advised Funds or Other Similar Funds or Accounts.
Complete if the organization answered "Yes" on Form 990, Part IV, line 6.

	(a) Donor advised funds	(b) Funds and other accounts
1 Total number at end of year		
2 Aggregate value of contributions to (during year)		
3 Aggregate value of grants from (during year)		
4 Aggregate value at end of year		

5 Did the organization inform all donors and donor advisors in writing that the assets held in donor advised funds are the organization's property, subject to the organization's exclusive legal control?

☐ Yes ☐ No

6 Did the organization inform all grantees, donors, and donor advisors in writing that grant funds can be used only for charitable purposes and not for the benefit of the donor or donor advisor, or for any other purpose conferring impermissible private benefit?

☐ Yes ☐ No

Part II Conservation Easements.
Complete if the organization answered "Yes" on Form 990, Part IV, line 7.

1 Purpose(s) of conservation easements held by the organization (check all that apply).
☐ Preservation of land for public use (e.g., recreation or education) ☐ Preservation of an historically important land area
☐ Protection of natural habitat ☐ Preservation of a certified historic structure
☐ Preservation of open space

2 Complete lines 2a through 2d if the organization held a qualified conservation contribution in the form of a conservation easement on the last day of the tax year.

	Held at the End of the Year
a Total number of conservation easements	2a
b Total acreage restricted by conservation easements	2b
c Number of conservation easements on a certified historic structure included in (a)	2c
d Number of conservation easements included in (c) acquired after July 25, 2006, and not on a historic structure listed in the National Register	2d

3 Number of conservation easements modified, transferred, released, extinguished, or terminated by the organization during the tax year ▶ _____

4 Number of states where property subject to conservation easement is located ▶ _____

5 Does the organization have a written policy regarding the periodic monitoring, inspection, handling of violations, and enforcement of the conservation easements it holds? ☐ Yes ☐ No

6 Staff and volunteer hours devoted to monitoring, inspecting, handling of violations, and enforcing conservation easements during the year ▶ _____

7 Amount of expenses incurred in monitoring, inspecting, handling of violations, and enforcing conservation easements during the year ▶ \$ _____

8 Does each conservation easement reported on line 2(d) above satisfy the requirements of section 170(h)(4)(B)(i) and section 170(h)(4)(B)(ii)? ☐ Yes ☐ No

9 In Part XIII, describe how the organization reports conservation easements in its revenue and expense statement, and balance sheet, and include, if applicable, the text of the footnote to the organization's financial statements that describes the organization's accounting for conservation easements.

Part III Organizations Maintaining Collections of Art, Historical Treasures, or Other Similar Assets.
Complete if the organization answered "Yes" on Form 990, Part IV, line 8.

1a If the organization elected, as permitted under FASB ASC 958, not to report in its revenue statement and balance sheet works of art, historical treasures, or other similar assets held for public exhibition, education, or research in furtherance of public service, provide, in Part XIII, the text of the footnote to its financial statements that describes these items.

b If the organization elected, as permitted under FASB ASC 958, to report in its revenue statement and balance sheet works of art, historical treasures, or other similar assets held for public exhibition, education, or research in furtherance of public service, provide the following amounts relating to these items:
(i) Revenue included on Form 990, Part VIII, line 1 ▶ \$ _____
(ii) Assets included in Form 990, Part X ▶ \$ _____

2 If the organization received or held works of art, historical treasures, or other similar assets for financial gain, provide the following amounts required to be reported under FASB ASC 958 relating to these items:
a Revenue included on Form 990, Part VIII, line 1 ▶ \$ _____
b Assets included in Form 990, Part X ▶ \$ _____

Part III

Organizations Maintaining Collections of Art, Historical Treasures, or Other Similar Assets (continued)

3

Using the organization's acquisition, accession, and other records, check any of the following that are a significant use of its collection items (check all that apply):

a

☐ Public exhibition

b

☐ Scholarly research

c

☐ Preservation for future generations

d

☐ Loan or exchange programs

e

☐ Other

4

Provide a description of the organization's collections and explain how they further the organization's exempt purpose in Part XIII.

5

During the year, did the organization solicit or receive donations of art, historical treasures or other similar assets to be sold to raise funds rather than to be maintained as part of the organization's collection? . . .

☐ Yes

☐ No

Part IV

Escrow and Custodial Arrangements.

Complete if the organization answered "Yes" on Form 990, Part IV, line 9, or reported an amount on Form 990, Part X, line 21.

1a

Is the organization an agent, trustee, custodian or other intermediary for contributions or other assets not included on Form 990, Part X?

☐ Yes

☐ No

b

If "Yes," explain the arrangement in Part XIII and complete the following table:

c

Beginning balance

d

Additions during the year

e

Distributions during the year

f

Ending balance

	Amount
1c	
1d	
1e	
1f	

2a

Did the organization include an amount on Form 990, Part X, line 21, for escrow or custodial account liability? . . .

☐ Yes

☐ No

b

If "Yes," explain the arrangement in Part XIII. Check here if the explanation has been provided in Part XIII

☐

Part V

Endowment Funds.

Complete if the organization answered "Yes" on Form 990, Part IV, line 10.

	(a) Current year	(b) Prior year	(c) Two years back	(d) Three years back	(e) Four years back
1a	Beginning of year balance				
b	Contributions				
c	Net investment earnings, gains, and losses				
d	Grants or scholarships				
e	Other expenditures for facilities and programs				
f	Administrative expenses				
g	End of year balance				

2

Provide the estimated percentage of the current year end balance (line 1g, column (a)) held as:

a

Board designated or quasi-endowment ▶

b

Permanent endowment ▶

c

Term endowment ▶

The percentages on lines 2a, 2b, and 2c should equal 100%.

3a

Are there endowment funds not in the possession of the organization that are held and administered for the organization by:

(i)

Unrelated organizations

(ii)

Related organizations

b

If "Yes" on 3a(ii), are the related organizations listed as required on Schedule R?

	Yes	No
3a(i)		
3a(ii)		
3b		

4

Describe in Part XIII the intended uses of the organization's endowment funds.

Part VI

Land, Buildings, and Equipment.

Complete if the organization answered "Yes" on Form 990, Part IV, line 11a. See Form 990, Part X, line 10.

Description of property	(a) Cost or other basis (investment)	(b) Cost or other basis (other)	(c) Accumulated depreciation	(d) Book value
1a	Land			
b	Buildings			
c	Leasehold improvements	447,431	157,242	290,189
d	Equipment	122,243	95,917	26,326
e	Other	1,398,456	691,934	706,522
Total.	Add lines 1a through 1e. (Column (d) must equal Form 990, Part X, column (B), line 10(c).) . . . ▶			1,023,037

Schedule D (Form 990) 2022

Part VII Investments - Other Securities.

Complete if the organization answered "Yes" on Form 990, Part IV, line 11b. See Form 990, Part X, line 12.

(a) Description of security or category (including name of security)	(b) Book value	(c) Method of valuation: Cost or end-of-year market value
(1) Financial derivatives		
(2) Closely-held equity interests		
(3) Other _____		
(A)		
(B)		
(C)		
(D)		
(E)		
(F)		
(G)		
(H)		
Total. (Column (b) must equal Form 990, Part X, col. (B) line 12.)		

Part VIII Investments - Program Related.

Complete if the organization answered 'Yes' on Form 990, Part IV, line 11c. See Form 990, Part X, line 13.

(a) Description of investment	(b) Book value	(c) Method of valuation: Cost or end-of-year market value
(1)		
(2)		
(3)		
(4)		
(5)		
(6)		
(7)		
(8)		
(9)		
Total. (Column (b) must equal Form 990, Part X, col.(B) line 13.)		

Part IX Other Assets.

Complete if the organization answered 'Yes' on Form 990, Part IV, line 11d. See Form 990, Part X, line 15.

(a) Description	(b) Book value
(1) DEPOSIT	39,253
(2) OPERATING RIGHT OF USE ASSET	2,719,306
(2)	
(3)	
(4)	
(5)	
(6)	
(7)	
(8)	
(9)	
Total. (Column (b) must equal Form 990, Part X, col.(B) line 15.)	2,758,559

Part X Other Liabilities.

Complete if the organization answered 'Yes' on Form 990, Part IV, line 11e or 11f. See Form 990, Part X, line 25.

1. (a) Description of liability	(b) Book value
(1) Federal income taxes	
CAPITAL LEASE	3,412
OPERATING LEASE	3,057,608
REFUNDABLE ADVANCE	177,878
Total. (Column (b) must equal Form 990, Part X, col.(B) line 25.)	3,238,898

2. Liability for uncertain tax positions. In Part XIII, provide the text of the footnote to the organization's financial statements that reports the organization's liability for uncertain tax positions under FIN 48 (ASC 740). Check here if the text of the footnote has been provided in Part XIII ☒

Part XI

Reconciliation of Revenue per Audited Financial Statements With Revenue per Return.

Complete if the organization answered 'Yes' on Form 990, Part IV, line 12a.

1	Total revenue, gains, and other support per audited financial statements		1	
2	Amounts included on line 1 but not on Form 990, Part VIII, line 12:			
a	Net unrealized gains (losses) on investments	2a		
b	Donated services and use of facilities	2b		
c	Recoveries of prior year grants	2c		
d	Other (Describe in Part XIII.)	2d		
e	Add lines 2a through 2d		2e	
3	Subtract line 2e from line 1		3	
4	Amounts included on Form 990, Part VIII, line 12, but not on line 1:			
a	Investment expenses not included on Form 990, Part VIII, line 7b	4a		
b	Other (Describe in Part XIII.)	4b		
c	Add lines 4a and 4b		4c	
5	Total revenue. Add lines 3 and 4c. (This must equal Form 990, Part I, line 12.)		5	

Part XII

Reconciliation of Expenses per Audited Financial Statements With Expenses per Return.

Complete if the organization answered 'Yes' on Form 990, Part IV, line 12a.

1	Total expenses and losses per audited financial statements		1	
2	Amounts included on line 1 but not on Form 990, Part IX, line 25:			
a	Donated services and use of facilities	2a		
b	Prior year adjustments	2b		
c	Other losses	2c		
d	Other (Describe in Part XIII.)	2d		
e	Add lines 2a through 2d		2e	
3	Subtract line 2e from line 1		3	
4	Amounts included on Form 990, Part IX, line 25, but not on line 1:			
a	Investment expenses not included on Form 990, Part VIII, line 7b	4a		
b	Other (Describe in Part XIII.)	4b		
c	Add lines 4a and 4b		4c	
5	Total expenses. Add lines 3 and 4c. (This must equal Form 990, Part I, line 18.)		5	

Part XIII

Supplemental Information

Provide the descriptions required for Part II, lines 3, 5, and 9; Part III, lines 1a and 4; Part IV, lines 1b and 2b; Part V, line 4; Part X, line 2; Part XI, lines 2d and 4b; and Part XII, lines 2d and 4b. Also complete this part to provide any additional information.

Return Reference	Explanation
PART X, LINE 2:	MANAGEMENT EVALUATED LEAPFROG'S TAX POSITIONS AND CONCLUDED THAT LEAPFROG HAS TAKEN NO UNCERTAIN TAX POSITIONS THAT REQUIRE ADJUSTMENT TO THE CONSOLIDATED FINANCIAL STATEMENTS TO COMPLY WITH THE PROVISIONS OF THIS GUIDANCE. GENERALLY, LEAPFROG IS NO LONGER SUBJECT TO INCOME TAX EXAMINATIONS BY THE U.S. FEDERAL, STATE OR LOCAL TAX AUTHORITIES FOR YEARS BEFORE 2020.

Name of the organization THE LEAPFROG GROUP	Employer identification number 52-2359517
--	--

Part I

Questions Regarding Compensation

1a Check the appropriate box(es) if the organization provided any of the following to or for a person listed on Form 990, Part VII, Section A, line 1a. Complete Part III to provide any relevant information regarding these items. ☐ First-class or charter travel ☐ Travel for companions ☐ Tax idemnification and gross-up payments ☐ Discretionary spending account ☐ Housing allowance or residence for personal use ☐ Payments for business use of personal residence ☐ Health or social club dues or initiation fees ☐ Personal services (e.g., maid, chauffeur, chef)		Yes	No
b If any of the boxes on Line 1a are checked, did the organization follow a written policy regarding payment or reimbursement or provision of all of the expenses described above? If "No," complete Part III to explain	1b		
2 Did the organization require substantiation prior to reimbursing or allowing expenses incurred by all directors, trustees, officers, including the CEO/Executive Director, regarding the items checked on Line 1a?	2		
3 Indicate which, if any, of the following the filing organization used to establish the compensation of the organization's CEO/Executive Director. Check all that apply. Do not check any boxes for methods used by a related organization to establish compensation of the CEO/Executive Director, but explain in Part III. ☐ Compensation committee ☒ Independent compensation consultant ☒ Form 990 of other organizations ☒ Written employment contract ☒ Compensation survey or study ☒ Approval by the board or compensation committee			
4 During the year, did any person listed on Form 990, Part VII, Section A, line 1a, with respect to the filing organization or a related organization:			
a Receive a severance payment or change-of-control payment?	4a		No
b Participate in, or receive payment from, a supplemental nonqualified retirement plan?	4b		No
c Participate in, or receive payment from, an equity-based compensation arrangement?	4c		No
If "Yes" to any of lines 4a-c, list the persons and provide the applicable amounts for each item in Part III.			
Only 501(c)(3), 501(c)(4), and 501(c)(29) organizations must complete lines 5-9.			
5 For persons listed on Form 990, Part VII, Section A, line 1a, did the organization pay or accrue any compensation contingent on the revenues of:			
a The organization?	5a		No
b Any related organization?	5b		No
If "Yes," on line 5a or 5b, describe in Part III.			
6 For persons listed on Form 990, Part VII, Section A, line 1a, did the organization pay or accrue any compensation contingent on the net earnings of:			
a The organization?	6a		No
b Any related organization?	6b		No
If "Yes," on line 6a or 6b, describe in Part III.			
7 For persons listed on Form 990, Part VII, Section A, line 1a, did the organization provide any nonfixed payments not described in lines 5 and 6? If "Yes," describe in Part III	7		No
8 Were any amounts reported on Form 990, Part VII, paid or accrued pursuant to a contract that was subject to the initial contract exception described in Regulations section 53.4958-4(a)(3)? If "Yes," describe in Part III	8		No
9 If "Yes" on line 8, did the organization also follow the rebuttable presumption procedure described in Regulations section 53.4958-6(c)?	9		

Part II Officers, Directors, Trustees, Key Employees, and Highest Compensated Employees.

For each individual whose compensation must be reported on Schedule J, report compensation from the organization on row (i) and from related organizations, described in the instructions, on row (ii). Do not list any individuals that are not listed on Form 990, Part VII.

Note. The sum of columns (B)(i)-(iii) for each listed individual must equal the total amount of Form 990, Part VII, Section A, line 1a, applicable column (D) and (E) amounts for that individual.

[illegible]

Part III **Supplemental Information**

Case 9:25-cv-80526-DMM Document 88-79 Entered on FLSD Docket 10/28/2025 Page 32 of 38

Provide the information, explanation, or descriptions required for Part I, lines 1a, 1b, 3, 4a, 4b, 4c, 5a, 5b, 6a, 6b, 7, and 8, and for Part II. Also complete this part for any additional information.

Schedule O (Form 990) 2023

Name of the organization THE LEAPFROG GROUP	Employer identification number 52-2359517
--	--

Part I Identification of Disregarded Entities. Complete if the organization answered "Yes" on Form 990, Part IV, line 33.					
(a) Name, address, and EIN (if applicable) of disregarded entity	(b) Primary activity	(c) Legal domicile (state or foreign country)	(d) Total income	(e) End-of-year assets	(f) Direct controlling entity
(1) THE LEAPFROG GROUP DUE DILLIGENCE COOPERATIVE LLC 1660 L STREET NW SUITE 308 WASHINGTON, DC 20036 45-2397143	TO COLLECT, EVALUATE, AND SUMMARIZE INFORMATION ABOUT COMPANIES	DC	-298	3,310	THE LEAPFROG GROUP

Part II Identification of Related Tax-Exempt Organizations. Complete if the organization answered "Yes" on Form 990, Part IV, line 34 because it had one or more related tax-exempt organizations during the tax year.							
(a) Name, address, and EIN of related organization	(b) Primary activity	(c) Legal domicile (state or foreign country)	(d) Exempt Code section	(e) Public charity status (if section 501(c)(3))	(f) Direct controlling entity	(g) Section 512(b)(13) controlled entity?	
						Yes	No

Case 9:25-cv-80526-DMM Document 88-70 Entered on FLSD Docket 10/28/2025 Page 35 of 38

Part III

Identification of Related Organizations Taxable as a Partnership. Complete if the organization answered "Yes" on Form 990, Part IV, line 34, because it had one or more related organizations treated as a partnership during the tax year.

(a) Name, address, and EIN of related organization	(b) Primary activity	(c) Legal domicile (state or foreign country)	(d) Direct controlling entity	(e) Predominant income(related, unrelated, excluded from tax under sections 512-514)	(f) Share of total income	(g) Share of end-of- year assets	(h) Disproportionate allocations?		(i) Code V-UBI amount in box 20 of Schedule K-1 (Form 1065)	(j) General or managing partner?		(k) Percentage ownership
							Yes	No		Yes	No	

Part IV

Identification of Related Organizations Taxable as a Corporation or Trust. Complete if the organization answered "Yes" on Form 990, Part IV, line 34 because it had one or more related organizations treated as a corporation or trust during the tax year.

(a) Name, address, and EIN of related organization	(b) Primary activity	(c) Legal domicile (state or foreign country)	(d) Direct controlling entity	(e) Type of entity (C corp, S corp, or trust)	(f) Share of total income	(g) Share of end-of- year assets	(h) Percentage ownership	(i) Section 512(b)(13) controlled entity?	
								Yes	No

Part V Transactions With Related Organizations

Note. Complete line 1 if any entity is listed in Parts II, III, or IV of this schedule.

1 During the tax year, did the organization engage in any of the following transactions with one or more related organizations listed in Parts II-IV?

- a** Receipt of **(i)** interest, **(ii)** annuities, **(iii)** royalties, or **(iv)** rent from a controlled entity
- b** Gift, grant, or capital contribution to related organization(s)
- c** Gift, grant, or capital contribution from related organization(s)
- d** Loans or loan guarantees to or for related organization(s)
- e** Loans or loan guarantees by related organization(s)
- f** Dividends from related organization(s)
- g** Sale of assets to related organization(s)
- h** Purchase of assets from related organization(s)
- i** Exchange of assets with related organization(s)
- j** Lease of facilities, equipment, or other assets to related organization(s)
- k** Lease of facilities, equipment, or other assets from related organization(s)
- l** Performance of services or membership or fundraising solicitations for related organization(s)
- m** Performance of services or membership or fundraising solicitations by related organization(s)
- n** Sharing of facilities, equipment, mailing lists, or other assets with related organization(s)
- o** Sharing of paid employees with related organization(s)
- p** Reimbursement paid to related organization(s) for expenses
- q** Reimbursement paid by related organization(s) for expenses
- r** Other transfer of cash or property to related organization(s)
- s** Other transfer of cash or property from related organization(s)

Expert Panel's Guiding Principles on the Development of the Composite Leapfrog Hospital Safety Grade for U.S. Hospitals

The expert panel guiding The Leapfrog Group on the development of the Leapfrog Hospital Safety Grade has reached consensus that the following principles will guide their recommendations to Leapfrog for calculating the grade.

Purpose of Composite Score

The purpose of the composite score is to create a simple metric that will improve consumer and purchaser engagement around patient safety in U.S. hospitals. Ideally, this increased engagement will create additional market forces for hospitals to improve the safety of care delivery. In the dissemination of the grades, hospitals will be engaged to help them understand, prepare, and communicate about this score in a manner that promotes both respect and improvement.

Construct

The focus of this composite score is patient safety, which is being defined as "freedom from harm." We recognize that patient safety is a different, and a narrower, construct than hospital quality. The composite score should recognize both a hospital's efforts toward patient safety and the hospital's patient safety outcomes.

Inclusion of Measures

The performance measures that are used in creating the composite grade should have the following characteristics:

- Ideally can be obtained from a data source that publicly releases hospital-level data at the national level.
 - If no such data source exists, preference will be given to data sources with the following characteristics: provide consistent data across geographic locations, are transparent with their data, do not represent a financial burden for hospitals to report data or for Leapfrog to access the data, and have a mechanism in place to ensure the integrity of the data reported (e.g., attestation, audit, verification process).
- The measure is clearly related to patient safety.
- Measures that focus on outcomes are generally preferred to measures that focus on processes of care or structural factors. When outcome measures are unavailable, or are insufficiently robust (i.e., case-mix adjustment methods have not been fully worked out), proven process or structural measures will be utilized.
- If the measure focuses on processes of care or structural factors, it should have strong evidence of being correlated with safer patient outcomes.

Expert Panel's Guiding Principles on the Development of the Composite Leapfrog Hospital Safety Grade for U.S. Hospitals

- Measures should not be limited to those that are collected and publicly reported through the Leapfrog Hospital Survey.

Scientific Soundness of Measures

Measures that have been shown to be scientifically sound (e.g., valid, reliable) are preferred; however, lack of existing research on the scientific soundness of a measure does not preclude the inclusion of the measure in the composite. The scientific soundness of a measure is one consideration, amongst many, in deciding whether to include the measure in the composite. In addition, techniques such as reliability-adjustment should be used, when possible, to compensate for differences in the reliability of a measure.

Weighting Measures

The composite grade should recognize both a hospital's efforts toward patient safety and their achievements in patient safety. The composite grade shall have two domains – one made up of process/structural measures and the other of outcome measures. Each of the two measure domains should receive approximately 50% of the total weight of the composite, though this balance may need to evolve over time as the science matures.

The assignment of weights to individual measure within a domain should reflect criteria used by other national measurement entities to determine importance, such as NQF. These criteria include:

- The strength of evidence behind the measure
- The opportunity for improvement in hospital performance on the measure
- The impact of hospitals improving their performance, both on the severity of harm averted, as well as the number of patients who will avoid harm. That is, the weights should reflect both the severity of the problem and how often the problem occurs.

Imputing missing data

When a hospital is missing data for a particular performance measure, we recommend ignoring the measure and re-calibrating the weights within the domain so that hospitals are scored only on the measures for which their performance data are available.

In situations where a hospital does not have data available from the primary data source for a particular performance measure, but an alternative data source is available, data from the alternative or secondary data source can be used in the composite. If data are used from a secondary data source, attempts should be made to provide a grade that is equitable to what the hospital would have earned had the data been available from the primary data source.

Expert Panel's Guiding Principles on the Development of the Composite Leapfrog Hospital Safety Grade for U.S. Hospitals

If a hospital is missing data for a large number of performance measures, then a grade cannot be reliably calculated. In this situation, no grade should be issued for the hospital.

Evolution of the Composite Grade

The composite grade will evolve as the science of performance measurement improves. On a regular basis, the methods used to calculate the composite grade will be revisited; possible methodology modifications will be generated from analyses, expert panel input, and stakeholder comments. In addition, the individual performance measures that make-up the composite grade will be revisited on an regular basis, with structured processes to reassess the current measures and to identify new measures that could be added to and/or replace the current measures. The composite grade will also ideally serve as a 'living laboratory' to help push forward the science of patient safety performance measurement.

Transparency

The process of developing this composite score will be transparent to all parties that are interested. The weighting and calculation process will be transparent to hospitals, consumers, and others. Hospitals will have the opportunity to review their composite grades prior to public release.

Lives Lost and Lives Saved

The Leapfrog Group recently contracted with the Johns Hopkins Armstrong Institute for Patient Safety and Quality to update its estimate of deaths due to errors, accidents, injuries and infections at "A", "B", "C", "D" and "F" hospitals. Overall, an estimated 160,000 lives are lost annually from the avoidable medical errors that are accounted for in the Leapfrog Hospital Safety Grade, a significant improvement from 2016, when researchers estimated 205,000 avoidable deaths. The analysis also found that D and F hospitals carry nearly twice the risk of mortality of A hospitals. **Over 50,000 lives could be saved if all hospitals performed at the level of A graded hospitals.**

For more details, [view the full white paper](#).

P R O C E E D I N G S

THE VIDEOGRAPHER: Good morning.

We are going on the record at 9:09 a.m., on September 25th, 2025. This is media unit one of the video-recorded deposition of Dr. Matthew Austin taken in the matter of Good Samaritan Medical Center, Inc., et al., v. The Leapfrog Group, the United States District Court for the Southern District of Florida, West Palm Beach Division; Case No. 9:25-CV-08526 [sic.] -DMM.

My name is Curtis Roginski, representing Veritext. I'm the videographer. The court reporter is Marlene Kerr, also with Veritext.

Will counsel please identify yourselves and state whom you represent.

MS. LAWSON: Sara Lawson from Zuckerman Spaeder on behalf of the witness, Dr. Matthew Austin, and the Armstrong Institute.

MR. CRAIN: Lee Crain from Gibson Dunn & Crutcher for Plaintiffs.

MS. WOOD: Courtney Wood, Wilson Elser, on behalf of the Defendant, The Leapfrog Group.

1 MR. TOGIAS: Iason Togias on behalf of
2 Plaintiffs with Gibson Dunn & Crutcher.

3 THE VIDEOGRAPHER: Thank you.

4 Would the court reporter please swear in
5 the witness.

6 THE COURT REPORTER: Sure.

7 Would you please raise your right hand to
8 be sworn.

9 (Witness complied.)

10 THE COURT REPORTER: Do you promise and declare
11 under penalty of perjury the testimony you are about to
12 give will be the truth, the whole truth, and nothing but
13 the truth?

14 THE WITNESS: Yes.

15 THE COURT REPORTER: Thank you.

16 (Witness sworn.)

17 MR. CRAIN: I'm sorry. Could we pause for a
18 second?

19 THE COURT REPORTER: Sure.

20 MR. CRAIN: Do we have the realtime?

21 THE COURT REPORTER: You should.

1 MR. CRAIN: Oh, okay. We've got it there.

2 THE COURT REPORTER: Okay.

3 MR. TOGIAS: Is it on, though?

4 THE COURT REPORTER: It's up and running.

5 MR. CRAIN: Actually, can we go off for a
6 second? I'm sorry.

7 (Discussion held off the record regarding
8 the realtime feed.)

9 THE VIDEOGRAPHER: Off the record. The time is
10 9:10 a.m.

11 (Brief pause.)

12 THE VIDEOGRAPHER: This marks the beginning of
13 media unit number two. We're going back on the record.
14 The time is 9:12 a.m.

15 EXAMINATION

16 BY MR. CRAIN:

17 Q. Good morning, Dr. Austin.

18 A. Good morning.

19 Q. My name is Lee Crain. I am counsel for
20 Plaintiffs in this action.

21 Could you please just state your full name

Page 11

1 for the record.

2 A. Yeah, my full legal name is John Matthew
3 Austin, but I go by Matt Austin.

4 Q. And have you gone by any other names besides
5 those two?

6 A. No, I have not.

7 Q. Okay.

8 Have you ever been deposed before?

9 A. I have not.

10 Q. Okay.

11 I want to go through just some ground rules
12 at the start so we're on the same page. A couple of key
13 rules. You understand the court reporter is taking down
14 what you and I say to create a written transcript?

15 A. Uh-huh.

16 Q. And you understand this deposition is being
17 video-recorded?

18 A. Yes, I do.

19 Q. Because of Marlene and to help her out, we want
20 to make sure that we're taking time between the
21 questions and answers. So I'll do my best to let you

1 finish, and you do your best to let me finish. Fair
2 enough?

3 A. Sounds good. I'll do my best.

4 Q. It's a little unnatural, but we'll get through
5 it.

6 Answers need to be audible, so no shaking
7 heads or nodding, that sort of thing. Fair enough?

8 A. Fair enough.

9 Q. You understand you're under oath today as if
10 you were testifying in court?

11 A. Yes.

12 Q. Are you under any medications that would impair
13 your ability to testify truthfully today?

14 A. No.

15 Q. Is there any other reason you can't give
16 truthful testimony today?

17 A. No.

18 Q. Okay.

19 Occasionally, it will happen where I will
20 ask a bad question. Don't hesitate to ask if you have
21 questions, if you want me to restate the question, or if

1 you're confused. If you don't, I'm going to assume you
2 understand the question, but feel free to clarify any
3 time. Fair enough?

4 A. Fair enough.

5 Q. And then the last -- two last things. From
6 time to time, your attorney or Ms. Wood may object.
7 Unless they're instructing you not to answer, we're
8 going to ask you to answer the question. Clear enough?

9 A. That's clear enough.

10 Q. And then the last thing is we can take a break
11 any time, any time you need, any time anybody else
12 needs. The only thing we ask is not while a question is
13 pending. So we'll go through the question and answer
14 and then we can take a break, if that makes sense?

15 A. Yeah, that makes sense.

16 Q. Great.

17 Okay. So I want to just start right at the
18 top. Did you prepare for this deposition?

19 A. I did.

20 Q. Can you tell me what you did to prepare for the
21 deposition?

1 A. I met with my attorney and a paralegal
2 yesterday and also reviewed some documents that they had
3 sent me.

4 Q. Did you only meet with counsel one time?

5 A. To prepare for the deposition, yes.

6 Q. Did you meet with counsel other times regarding
7 this case?

8 A. We did have an early sort of exploratory call
9 shortly after Sara was named as my counsel.

10 Q. Okay.

11 MS. LAWSON: And I'm just going to object, just
12 interpose an objection just to make sure that Dr. Austin
13 understands that you can answer with respect to sort of
14 basic details, the who, what, where, when, why, and how
15 of our discussions, but those discussions are protected
16 by the attorney-client privilege. So I would just ask
17 and instruct you not to reveal the substance of any
18 discussions that you've had with me or any other of your
19 counsel from Zuckerman Spaeder, like my partner Marty
20 Himeles as well. So just to make that clear.

21

1 BY MR. CRAIN:

2 Q. Yes. And none of my questions are getting at
3 that. So I do not want the substance of your
4 communications with counsel. Fair enough?

5 A. Fair enough.

6 MR. TOGIAS: And just to flag, this is -- the
7 Zoom link, I don't see a live feed.

8 MR. CRAIN: We'll do it after.

9 BY MR. CRAIN:

10 Q. So how long did you meet with counsel --
11 yesterday, you said?

12 A. Yesterday, correct.

13 Q. And how long was that meeting?

14 A. It was approximately three hours.

15 Q. Was anybody else in attendance besides
16 Ms. Lawson -- did I get that right? I'm sorry -- and a
17 paralegal?

18 A. That was it.

19 Q. Okay. And you reviewed documents during that
20 session?

21 A. We reviewed some documents.

1 Q. Okay. Did you review documents outside of that
2 session with your counsel to prepare today?

3 A. No.

4 Q. Okay. Did you watch any videos?

5 A. No.

6 Q. Did you listen to any audio recordings?

7 A. No.

8 Q. Okay. Did you review any other -- any
9 transcripts from depositions in this case?

10 A. No.

11 Q. Did you review any transcripts of anything
12 else?

13 A. No.

14 Q. Let's see. Who have you talked to about this
15 deposition besides counsel?

16 A. So I've talked to my boss, Allen Kachalia, to
17 let him know that I was being deposed. I spoke to
18 Jordan Derk who at the time of -- or at least at the
19 start of the period was working with me on The Leapfrog
20 Group contract; and with Preeti Joshi, who currently is
21 working with me on the Leapfrog contract, my partner at

1 home, and my father who is an attorney.

2 Q. And just going down the line, what did you tell
3 Mr. Kachalia about the deposition?

4 A. I had let him know that there was a lawsuit and
5 that I was being deposed for testimony.

6 Q. And what did you talk to Mr. Derk about?

7 A. I let Mr. Derk know that he was going to be
8 receiving a subpoena for documents. We talked a little
9 bit about the lawsuit, as well as some other related
10 items.

11 Q. Did you talk about the methodology, the
12 Leapfrog Hospital Safety Grade methodology with him?

13 A. We didn't talk about that in detail.

14 Q. And what did you talk about with Ms. Joshi?

15 A. I let her know that there was going to be a
16 lawsuit and that she should come to me with any
17 questions or concerns that she had about that. And then
18 when she received notice that she needed to supply
19 documents, we talked about what she needed to supply and
20 how that would go.

21 Q. Okay. And she's a current employee at

1 Armstrong?

2 A. Correct.

3 Q. Okay.

4 And then with regard to your partner and
5 your father, did you talk about the substance of this
6 case at all?

7 A. I talked about what I was aware of based on the
8 public press releases that both organizations had put
9 out.

10 Q. And what did you say? Just can you give us a
11 general sense?

12 A. Yeah. My general sense is it felt like there
13 was a lot of factual errors in the press release in
14 terms of what tenant was claiming, that those things
15 were just factually wrong.

16 Q. I guess we'll come back to that.

17 And then a couple of other questions. Did
18 you talk to anybody at Leapfrog about this case?

19 A. Not -- so Leapfrog did give me a heads-up that
20 I was going to be receiving a subpoena. So that was the
21 sort of extent of the conversation.

1 Q. Okay.

2 And then did you also speak with counsel at
3 Wilson Elser, Ms. Wood's firm?

4 A. We had a brief conversation the day that I was
5 notified that I was going to be receiving a subpoena.

6 Q. Okay. And have you exchanged emails with
7 Wilson Elser?

8 A. I have not beyond the counsel at Johns Hopkins
9 requested Courtney and Kim's names and emails, and so I
10 supplied them with those.

11 Q. Okay.

12 Now, I want to just start with an exhibit
13 just to mark it. This will be Exhibit 1.

14 (Exhibit No. 1 was marked for
15 identification as of 9/25/2025.)

16 BY MR. CRAIN:

17 Q. Dr. Austin, do you recognize this document?

18 A. I do.

19 Q. And it was produced, if you see the bottom
20 right, by the Armstrong Institute?

21 A. Correct.

1 Q. And it's an email from Ms. Binder to a number
2 of folks, including yourself. Do you see that?

3 A. Yes, I do.

4 Q. And Ms. Binder told you, if you look towards
5 the bottom, she asked everybody in the email not to
6 email or talk about the case in writing. Do you see
7 that?

8 A. Can you point me to where that says that?

9 Q. Yes. So it says, number two: "Do not
10 communicate in writing about this matter, such as on
11 slack or email or texting."

12 Do you see that?

13 A. Yes.

14 Q. Did you adhere to that guidance?

15 A. So outside of sort of the need to communicate
16 with, say, my boss or with counsel, I did follow that.

17 Q. Okay.

18 And then she asks -- she says, number
19 one -- do you see that right above? -- "Please refer all
20 questions or concerns, whether you have them personally
21 or you hear them from external sources, to me, Missy,

1 Lauren, or Karen. Do not put them in writing. Call us
2 or come by my office."

3 Do you see that?

4 A. I do.

5 Q. Did you call any of those folks listed in
6 bullet one?

7 A. I did not.

8 Q. Okay.

9 And then did you come by her office?

10 A. I did not.

11 Q. Okay.

12 Now, did -- I want to talk just for a
13 second about the safety grade expert panel. Do you know
14 what I mean when I say that?

15 A. Yes.

16 Q. I assume you spent a decent bit of time with
17 that group.

18 A. Correct.

19 Q. Did you discuss the lawsuit with the expert,
20 the safety grade expert panel?

21 A. So we did have a meeting with the expert panel

1 already scheduled, and at that meeting, the decision was
2 to share with the expert panel that a lawsuit had been
3 filed.

4 Q. And what was discussed at the meeting? Like,
5 can you give a little more of a play-by-play?

6 A. I don't know if I can give a play-by-play
7 without specific notes in front of me. I don't even
8 remember who shared with the panel that the lawsuit had
9 been filed. I don't know if that was Ms. Binder,
10 Ms. Danforth, if it was counsel for Leapfrog. I really
11 don't remember who shared that information with them.
12 And it was more just to let them know since they had
13 been involved in the safety grade.

14 Q. Okay.

15 I'm going to mark another exhibit. This is
16 Exhibit 2, another Armstrong document.

17 (Exhibit No. 2 was marked for
18 identification as of 9/25/2025.)

19 BY MR. CRAIN:

20 Q. So Dr. Austin, do you recognize this document?

21 A. I do.

1 Q. And it's another, if you look at the bottom
2 right, another Armstrong-produced document?

3 A. Correct.

4 Q. And the email at the top, which you'll see as
5 we go through that usually the first email is the last
6 one in the way it's printed out, but you'll see it's
7 from you to Ms. Danforth. Do you see that?

8 A. Yes.

9 Q. And if you go to the next page, there's an
10 email -- actually, it starts on the bottom of page 1
11 from you. Do you see that, that May 1?

12 A. Correct.

13 Q. And then it's an email from you, it looks like,
14 to the Hospital Safety Grade Expert Panelists. Do you
15 see that?

16 A. Correct.

17 Q. And just to get a sense, take a second if you
18 haven't read it. I just want to know was anything
19 discussed on the expert panel that goes beyond what was
20 said in this email?

21 (Witness peruses document.)

1 THE WITNESS: I don't remember it being much
2 discussion beyond what's in the email.

3 BY MR. CRAIN:

4 Q. Does the email accurately depict what was
5 discussed?

6 A. Yes.

7 Q. Okay.

8 And if you go up in the email, there's an
9 email response from Ms. Danforth to you on May 1 at
10 12:35, p.m. Do you see that?

11 A. Yes.

12 Q. And she says, "Thanks, Matt. I've added Leah
13 Binder and Thomas Duff from Wilson Elser for the first
14 agenda item." Do you see that?

15 A. Correct.

16 Q. Does that refresh your recollection as to
17 whether Ms. Binder was there or whether she spoke at the
18 meeting?

19 A. I know that Ms. Binder was there, and I know
20 counsel was there, but I can't remember exactly who
21 actually led the conversation.

1 Q. Okay.

2 Do you typically lead the conversations in
3 those meetings?

4 A. We have a formal agenda, and we have sometimes
5 different individuals leading different agenda items
6 depending on the item. But I would say I'm one of the
7 primary folks for doing that.

8 Q. Okay.

9 And then just going to the top email, this
10 is an email from you to Ms. Danforth later that day. Do
11 you see that?

12 A. Yes.

13 Q. And it looks -- you say -- it's three lines
14 down -- "I quickly pulled the breakdown of Spring 2025
15 grades by survey submission status. Will work on adding
16 in percentages." Do you see that?

17 A. Yes.

18 Q. Percentages. I just -- I assume that refers to
19 the percentages that these numbers reflect?

20 A. Correct.

21 Q. Okay. And why did you pull these stats?

1 A. To have ready for the expert panel an
2 understanding of how hospital grades break down by the
3 imputation status that Leapfrog uses or did use in the
4 Spring 2025 grades.

5 Q. And just so we're on the same page, can you
6 tell me in your words what's Step 1, what's Step 2?

7 A. Yeah. So Step 1 is that if the hospital has
8 completed a recent Leapfrog Hospital Survey, which I
9 believe is currently defined as within the last survey
10 cycle, that that historical information is used for the
11 hospital.

12 Step 2 is if the hospital does not have a
13 recent survey on record, there is an imputation
14 methodology that is laid out in the methodology document
15 that explains how those scores will be imputed.

16 Q. And just to be clear, the methodology document,
17 is it the one that's linked on the website that's about
18 28, 29 pages?

19 A. I would need to --

20 MS. LAWSON: Object to form but go ahead. Go
21 ahead.

1 THE WITNESS: I would need to see it to
2 confirm.

3 BY MR. CRAIN:

4 Q. Okay. Yeah, let me -- what did you mean when
5 you said the methodology document?

6 A. Leapfrog makes available a public document that
7 explains the Hospital Safety Grade methodology.

8 Q. We'll grab additional documents.

9 And then on Step 1, you said survey cycle.
10 How long is that?

11 A. So if the hospital had completed a survey --
12 this is where I'm doing this from memory. So this is
13 where --

14 Q. It's not a memory test.

15 A. -- I want to be -- I believe what we've changed
16 it to is if the hospital had completed a survey in the
17 prior survey cycle, so if you're looking at 2025, if
18 they completed a 2024 survey, we'll use the 2024 survey
19 results.

20 Q. Okay.

21 So each cycle, just so I understand, is

1 once a year?

2 A. The survey itself is a once-a-year cycle.

3 Q. And the grades are issued twice a year?

4 A. Correct.

5 Q. I think we have that document for you just to
6 make sure we're on the same page.

7 MR. CRAIN: So we'll mark this as Exhibit 3.
8 I'm taking good notes today.

9 (Exhibit No. 3 was marked for
10 identification as of 9/25/2025.)

11 BY MR. CRAIN:

12 Q. You'll see there are other exhibit markings --
13 oh, sorry.

14 You'll see there are other deposition
15 stickers on here, but is Exhibit 3 of your deposition
16 the document you're referring to?

17 A. Yes.

18 Q. Okay.

19 Is there another document you're aware of
20 that outlines the methodology besides this?

21 A. There is a second document that explains how

1 numerical scores are converted into letter grades.

2 Q. What's the name of that document?

3 A. I don't know the official name of it. It is
4 publicly available on Leapfrog's Hospital Safety Grade
5 website.

6 Q. Got it.

7 Does that document includes also the
8 imputation methodology?

9 A. It does not.

10 Q. Okay.

11 All right. Keep on going.

12 MR. CRAIN: And then just for completeness, can
13 we do 64. And then I'm going to mark this Exhibit 4.

14 (Exhibit No. 4 was marked for
15 identification as of 9/25/2025.)

16 BY MR. CRAIN:

17 Q. This is another email produced by the Armstrong
18 Institute. Do you see that on the bottom right?

19 A. Uh-huh.

20 Q. And it's -- the top one is from you to
21 Ms. Danforth, cc'ing our friend Ms. Wood across the

1 table. Is that correct?

2 A. Correct.

3 Q. And you say, "Missy, thanks so much for putting
4 me in touch with Courtney and Kim. I just spoke with
5 Jordan about the lawsuit. I've copied Jordan on the
6 email chain so he has Courtney and Kim's contact
7 information."

8 Do you see that email?

9 A. Yeah, I do.

10 Q. Do this reflect what we discussed earlier, the
11 discussions you had with Mr. Derk and with Wilson Elser?

12 A. Correct.

13 Q. Any other discussions beyond those talked about
14 in this email?

15 MS. LAWSON: Object to form.

16 BY MR. CRAIN:

17 Q. Yeah, let me fix it.

18 About the case?

19 A. I had had a -- yeah, I had had a conversation
20 with Jordan earlier that day.

21 Q. Okay.

1 A. We talked about the subpoena coming.

2 Q. Okay.

3 And did you have conversations, either
4 phone or Zoom or in person, with Ms. Wood and Ms. Blair?

5 A. On the 25th of July, I had a call scheduled
6 with The Leapfrog Group to discuss regular work. That
7 was the day that the subpoenas were issued for Jordan
8 and myself. So as I remember, Courtney and Kim joined
9 that call to talk about the subpoenas and that we should
10 contact Johns Hopkins University to let them know we
11 were receiving subpoenas, and also that we shouldn't be
12 chatting with our colleagues at The Leapfrog Group about
13 the lawsuit.

14 Q. Conventional wisdom.

15 A. Yeah. But that we could talk about regular
16 business.

17 Q. Okay.

18 One other question before we shift gears.
19 You came today with a folio.

20 A. Uh-huh.

21 Q. What's in that folio?

1 A. It's actually the subpoenas.

2 Q. Okay.

3 A. And my pad of paper and a pen.

4 Q. Okay. I have to ask.

5 And when you say "the subpoenas," you mean
6 the document and the deposition subpoenas that led to us
7 being here today?

8 A. Correct.

9 Q. Okay. Anything else?

10 A. No.

11 Q. Okay.

12 I want to shift gears and just talk a
13 little more about your history and your education.

14 A. Uh-huh.

15 Q. So you went to the University of Michigan for
16 undergraduate?

17 A. Correct.

18 Q. Go blue!

19 And you graduated in 1995?

20 A. Correct.

21 Q. You later went to the University of Wisconsin,

1 Madison, right?

2 A. Correct.

3 Q. Okay. And you graduated with a Masters of
4 Science in Industrial Systems Engineering?

5 A. Correct.

6 Q. And then you went on to do your Ph.D.?

7 A. Correct.

8 Q. And just in a brief nugget, what is your Ph.D.
9 in?

10 A. My Ph.D. is in Industrial and Systems
11 Engineering with a focus on Healthcare Systems.

12 Q. When did you start getting interested in
13 healthcare?

14 A. 2005.

15 Q. Okay. And that was during -- that was at
16 Wisconsin, Madison?

17 A. Prior to Wisconsin, Madison.

18 Q. Got it.

19 What were you doing then?

20 A. I actually was working for Continental
21 Airlines.

1 Q. Interesting. How did that convert into a
2 healthcare interest?

3 A. I was interested in transitioning out of the
4 airline industry, and healthcare felt like a prime
5 opportunity for that.

6 Q. Okay.

7 And then you earned your Ph.D. I think in
8 2011. Is that right?

9 A. Correct. Yeah.

10 Q. And then between I think 2008 and 2012, you
11 were a director for The Leapfrog Group. Is that right?

12 A. That was my title --

13 Q. Okay.

14 A. -- that Leapfrog gave me, but I was not
15 employed by The Leapfrog Group.

16 Q. Okay.

17 Let's, just to ground us, I'm going to give
18 you everybody's favorite. LinkedIn.

19 MR. CRAIN: This will be Exhibit 5.

20 (Exhibit No. 5 was marked for
21 identification as of 9/25/2025.)

1 BY MR. CRAIN:

2 Q. Dr. Austin, what I've handed you is what --
3 well, tell me what I've handed you.

4 A. This is what appears to be my LinkedIn profile.

5 Q. Does it look generally accurate to you?

6 A. It does.

7 Q. Great.

8 And just going back, because it's not a
9 memory test, so I figured I'd ground you on the dates,
10 it says you were a director of Leapfrog Hospital Survey
11 from January 2008 to May 2012. Do you see that?

12 A. Correct.

13 Q. Is that -- is that generally right?

14 A. That is -- I actually was employed by the
15 Center for Health Systems Research and Analysis. So my
16 employer was --

17 Q. Got it.

18 A. -- actually CHSRA.

19 Q. Okay. The one right below?
20
21

1 (Whereupon, the court reporter seeks
2 clarification, which colloquy will not be
3 captured on the written record.)

4 BY MR. CRAIN:

5 Q. So you said you were employed by CHSRA during
6 that period?

7 A. Correct.

8 Q. Okay.

9 And you said a moment ago you weren't
10 employed by Leapfrog then. Have you ever been employed
11 by Leapfrog?

12 A. No.

13 Q. Okay.

14 Can you tell us the nature of your title as
15 director?

16 A. So in my role as a researcher at the Center for
17 Health Systems Research and Analysis, I was on a
18 contract with a PI who had a contract -- PI, principal
19 investigator -- with The Leapfrog Group, and I was
20 helping support that work.

21 Leapfrog wanted me to have the title

1 director of Leapfrog Hospital Survey, but that was not
2 my official work title. My official work title at
3 University of Wisconsin was researcher.

4 Q. Was the relationship you had between CHSRA and
5 Leapfrog a contractual relationship?

6 A. Yes.

7 Q. Got it. So Leapfrog had a contract with CHSRA?

8 A. Correct.

9 Q. And who was the PI at the time?

10 A. Barb Rudolph.

11 Q. Okay. And who is she?

12 A. She -- Dr. Barb Rudolph, she has a Ph.D. in
13 social work. She was a senior scientist at the Center
14 for Health Systems Research and Analysis.

15 Q. And what was her role at Leapfrog?

16 A. She helped support them with their measurement
17 and public reporting activities.

18 Q. Was she on the Leapfrog board?

19 A. She was not.

20 Q. Okay.

21 And who was the -- I can't recall if it's

1 president or CEO, but who was the leader of Leapfrog at
2 the time?

3 A. So Suzanne Delbanco was the CEO at that time.

4 Q. Okay.

5 And when did Ms. Binder take that role?

6 A. I believe it was early 2008.

7 Q. Okay. So approximately at the start of your
8 time working with Leapfrog. Is that right?

9 A. So I actually started working with The Leapfrog
10 Group in March of 2007 as part of a student research
11 assistantship.

12 Q. Okay. Got it.

13 So Ms. Binder came in towards the first
14 year or two of your time?

15 A. Correct.

16 Q. Okay.

17 What were your responsibilities either as a
18 director or researcher at the time?

19 A. Yeah. So I was responsible for developing
20 survey questions, analyses of data, working with experts
21 on developing measures, measure specifications, scoring

1 algorithms. Really everything related to putting out a
2 survey around quality and safety of hospitals.

3 Q. And at that time, did Leapfrog assign hospital
4 safety grades?

5 A. No.

6 Q. Approximately, when did that start?

7 A. That started in the Spring of 2012.

8 Q. Okay. We'll come to that a little bit more.

9 Just to round out, after you left
10 Wisconsin, where did you go?

11 A. I came here to Baltimore and to Johns Hopkins
12 University.

13 Q. And you've been here for about 12 years. Is
14 that right?

15 A. Correct.

16 Q. And during that whole time, have you worked
17 with The Leapfrog Group continuously?

18 A. Technically, my contract with The Leapfrog
19 Group didn't start until I think July of 2012, and I had
20 arrived here in May.

21 Q. Got it.

1 A. So just to clarify that.

2 Q. So from July 2012 to the present?

3 A. Correct.

4 Q. I want to shift gears and just talk about your
5 relationship and Armstrong's relationship with Leapfrog.

6 A. Uh-huh.

7 Q. So you said before, I think, there's a
8 contractual relationship between Armstrong and Leapfrog.
9 Is that right?

10 A. Correct.

11 Q. Tell me generally about how that works.

12 A. Yeah. So I serve as the principal investigator
13 on the contract for a portion of my time. So as a
14 research faculty member, I need to cover my effort with
15 grants and contracts, and so Leapfrog is part of that
16 coverage for the work I do.

17 Q. And forgive me. I just don't know. Generally,
18 what is a principal investigator?

19 A. The lead, the lead on a grant or contract.

20 Q. Got it. Okay.

21 And you said it covers a certain portion of

1 your time. Approximately, what time percentage is that?

2 A. It has ranged between [REDACTED].

3 Q. [REDACTED]. Okay. [REDACTED]

4 [REDACTED] percent of your time?

5 A. Correct.

6 Q. And Leapfrog also covers funding for you,
7 correct?

8 A. That is the funding that I'm speaking of.

9 Q. Got it.

10 And does that come to you in the form of
11 compensation?

12 A. That money is paid to Johns Hopkins University
13 --

14 Q. Okay.

15 A. -- who pays me a salary.

16 Q. Got it.

17 Let's look at a couple of documents.

18 MR. CRAIN: Maybe start with -- let's start
19 with 4. I'm going to mark this Exhibit 6.

20 (Exhibit No. 6 was marked for
21 identification as of 9/25/2025.)

1 BY MR. CRAIN:

2 Q. So Dr. Austin, do you recognize this document?

3 A. I do.

4 Q. And it's another Armstrong-produced document,
5 right?

6 A. Correct.

7 Q. What is it?

8 A. This is the contract between Johns Hopkins
9 University and The Leapfrog Group.

10 Q. And this is a 2018 version. Do you see that?

11 A. Correct.

12 Q. And if you look at Fees and Payment, it's
13 number 4A on the first page. Do you see that?

14 A. Yes.

15 Q. And it says: "Contractor shall be paid a fee
16 not to exceed \$[REDACTED]." Do you see that?

17 A. Yes.

18 Q. Does this reflect the funding that you were
19 talking about, the payment to Armstrong?

20 A. The payment goes to Johns Hopkins University.

21 Q. Got it. Not specifically to Armstrong?

1 A. Correct.

2 Q. And then if we can keep going to page -- I'm
3 going to refer to these numbers as Bates numbers. Do
4 you know what I mean when I say that? And I can tell
5 you if not.

6 A. Page number?

7 Q. Bates numbers.

8 A. No, I don't know what that is.

9 Q. So Bates numbers are these Armstrong numbers on
10 the bottom right.

11 A. Oh, okay. Okay.

12 Q. They're just a stamp that folks give when they
13 produced. And for some reason, there are two of them on
14 these pages, but I'm going to look at the top little
15 one, which is the page number.

16 So if you could go to Armstrong ending in
17 Bates 006, which also happens to be page 6 of the
18 contract.

19 A. Uh-huh.

20 Q. And do you see there first at the top it's
21 signed by Erica Mobley and Thomas F. Burns? Do you see

1 that?

2 A. Yes.

3 Q. And Erica Mobley, who is she?

4 A. She was at the time the director of operations
5 for The Leapfrog Group.

6 Q. She's since moved on?

7 A. Correct.

8 Q. Okay.

9 And then there's a budget further down,
10 down there. Do you see that?

11 A. Uh-huh.

12 Q. And it sort of delineates faculty, analysts,
13 and a few other things. Do you see it says faculty
14 \$[REDACTED]?

15 A. Correct.

16 Q. And that says: "[REDACTED] percent of J. Matt Austin's
17 time." Do you see that?

18 A. Uh-huh.

19 Q. And that refers to you, correct?

20 A. Correct.

21 Q. And does that reflect an amount that's

1 earmarked to you ultimately at the end of the day, or
2 how does that work?

3 A. That is an amount that the university will bill
4 Leapfrog Group for my efforts on the project.

5 Q. Okay. So the university bills Leapfrog for
6 your time, correct?

7 A. Correct.

8 Q. Is it hourly or just a flat fee?

9 A. I don't know for sure.

10 Q. Got it. Okay.

11 And does your compensation rise with this
12 -- or rise -- let me strike that. Bad question. That's
13 the first of many bad questions today.

14 If Leapfrog didn't pay this money, would
15 that affect your compensation?

16 A. Can you clarify that?

17 Q. Yeah.

18 I'm trying to understand -- so this, you
19 said, doesn't get paid to you directly, correct?

20 A. Correct.

21 Q. It gets paid to the university, right?

1 A. Correct.

2 Q. And the university gives you a salary, right?

3 A. Correct.

4 Q. What is the relationship between your salary
5 and grants generally? Let's start with that.

6 A. So as a faculty member, I'm on a three-year
7 contract, and that contract is at risk for nonrenewal if
8 I'm not covering a portion of myself in terms of grants
9 and contracts.

10 Q. Got it. Okay.

11 A. So there would be long-term impact to -- if
12 Leapfrog didn't pay the money to the university, but the
13 short-term is that there isn't an impact. I still
14 receive my salary.

15 Q. Got it. Okay.

16 So it affects your future contract with the
17 university, if any, right?

18 A. Correct.

19 Q. Okay.

20 A. As one of many grants and contracts that I've
21 had.

1 Q. Yeah, how many --

2 A. So it's not --

3 Q. Can you ballpark how many do you have in a
4 year?

5 A. Most contracts or grants last multiple years.
6 In my 12 years at Hopkins, I've probably had 10 to 11
7 different grants and contracts.

8 Q. Okay. All toll. And that includes Leapfrog as
9 one of those 10?

10 A. Correct.

11 Q. Okay. And the reason I clarify is there are
12 multiple contracts, right?

13 A. Yeah, right.

14 Q. Yeah.

15 Okay. And then what -- so I understand
16 this number is not directly paid to you. Can you give a
17 ballpark of what percentage that number is of your total
18 compensation?

19 A. The [REDACTED] percent.

20 Q. So this \$[REDACTED] is [REDACTED] percent of your salary in
21 that year, correct?

1 A. Correct. And then direct costs are added in
2 overhead as well.

3 Q. Yeah. And those are things like -- like what?

4 A. That includes fringe rights, so coverage of
5 health benefits --

6 Q. Got it.

7 A. -- and that stuff and --

8 Q. Got it.

9 A. -- then the university tacks on a percentage.

10 Q. Commission.

11 A. Yeah.

12 MS. LAWSON: Objection.

13 MR. CRAIN: Fair enough.

14 BY MR. CRAIN:

15 Q. Okay. So I just want to go through a couple of
16 these. Over -- do you have a general sense of over
17 time -- so this is a 2018 contract, correct? Has the
18 grant amount changed during -- you know, in the
19 preceding -- in the last six years?

20 A. Can you clarify when you say the grant has
21 changed?

1 Q. Yeah.

2 So I'm trying to get a sense of where the
3 numbers have gone. So there's the total number we saw
4 on the first page that's paid to Johns Hopkins.

5 A. Uh-huh.

6 Q. Has that generally gone up year over year?

7 A. There has been some fluctuation.

8 Q. Okay.

9 A. I'm trying to -- so there have been times where
10 Leapfrog has requested additional researchers at Hopkins
11 be included in the work, and so just by pure numbers,
12 the value, the dollar value of the contract has gone up
13 for that.

14 Q. Okay.

15 A. My salary has changed over time. So it has
16 increased based on just sort of salary changes, and
17 there's been some fluctuation in efforts.

18 Q. So when your salary has changed, the number
19 sort of earmarked to you as a percentage of your salary
20 goes up, correct?

21 MS. LAWSON: Object to form, but you can

1 answer.

2 THE WITNESS: Yeah, I mean, right. Leapfrog is
3 paying for a portion of my effort, of my total effort,
4 right. So if my salary goes up, they're paying more for
5 the portion of the effort that they're paying for.

6 BY MR. CRAIN:

7 Q. And when you say a portion of your effort, just
8 so it's clear, that means like your time on the job?

9 A. Correct.

10 Q. Let's take a look just before we move off this.
11 I want to look at Exhibit A, which is page little number
12 7.

13 A. Uh-huh.

14 Q. And this -- it says scope of work. Do you see
15 that?

16 A. Yes.

17 Q. And are you familiar generally with -- it's a
18 couple -- it's a few pages. Are you familiar with the
19 scope?

20 A. Yes, I am.

21 Q. Does this accurately depict the scope of work,

1 I'll say plus or minus, that you performed in your role
2 for Leapfrog?

3 A. Yes.

4 Q. Okay.

5 And I want to focus on particularly page
6 little Bates 9. Do you see that?

7 A. Uh-huh.

8 Q. And there's -- about halfway down the page, it
9 says: "Manage the hospital safety score expert panel
10 process." Do you see that?

11 A. Uh-huh.

12 Q. And it says -- I think it's bullet A -- "Have
13 periodic communications with client-approved national
14 expert panel either via teleconferences and/or written
15 communication, to solicit guidance on: One, which
16 performance measures should be considered for inclusion
17 in future versions of the safety score composite; and,
18 two, suggested adjustments for weighting individual
19 measures within the composite. The polling of panel
20 members of these topics will involve the use of
21 structured communication techniques; e.g., the Delphi

1 method."

2 Do you see that paragraph?

3 A. Uh-huh.

4 Q. Does this reflect your work with the Hospital
5 Safety Grade expert panel?

6 A. It does generally reflect that work.

7 Q. What -- are there any meaningful differences
8 between this language and what you actually do?

9 A. We've moved away recently from doing formal
10 polling of panel members.

11 Q. Okay. Does that -- is that what the Delphi
12 method refers to?

13 A. Yeah, that would be a --

14 Q. What is the Delphi method?

15 A. The Delphi method is a -- an approach to gain
16 and understand consensus where you basically go through
17 different rounds of voting where based on the first
18 round, you sort of narrow down to a smaller subset and
19 work towards where there's consensus.

20 Q. And is that -- I see it in here, but is that
21 how it actually worked at the expert -- at the safety

1 grade expert panel?

2 A. In earlier meetings of the safety grade expert
3 panel, 2011, 2012, 2013, we did put a little more of a
4 focus on having a formal process for that.

5 Q. Okay.

6 And I think you said that you -- I don't
7 have the realtime, so I don't remember exactly what you
8 said, but you said in recent years, you've sort of
9 gotten rid of the polling feature. Is that what you
10 testified to?

11 A. Correct.

12 Q. And approximately, when did that dissipate?

13 A. Probably 2014, 2015.

14 Q. Okay. So a little while ago?

15 A. Yeah.

16 Q. Yeah, okay.

17 And then B says -- if you go back to the
18 document, it says: "Work with the national expert panel
19 to gain consensus on the direction of future versions of
20 the safety score composite and/or understand and
21 document the differences among panel members on their

1 future visions."

2 Do you see that as well?

3 A. Yes.

4 Q. Accurate depiction of what you've done for
5 Leapfrog over the years?

6 A. Yes.

7 Q. Okay.

8 And then C: "Understand the direction set
9 by client's Board of Directors on the hospital safety
10 score and keep the national expert panel conceptually
11 aligned with the board's direction."

12 Do you see that?

13 A. Yes.

14 Q. Is that -- so the first question is, is that an
15 accurate statement of what you've done for Leapfrog, you
16 know, since, let's say, 2018 to the present?

17 A. Yes. My one caveat is I think the Board of
18 Directors has been less hands-on with the safety grade
19 as they were early on.

20 Q. Okay. And when you say "early on," what time
21 period are we talking about?

1 A. 2011 through 2014.

2 Q. Okay.

3 So is it fair to say in the early days when
4 the safety grade was being created, the Board was more
5 active?

6 A. Yes, that would be a fair statement.

7 Q. And over the years, the Board has been less
8 involved with respect to changes to the safety grade
9 methodology?

10 A. I have become less involved in communicating
11 with Leapfrog's board. So I can't speak to what
12 Ms. Binder or Ms. Danforth have been communicating to
13 the Board but --

14 Q. Got it. Okay.

15 So let me ask it this way then. This
16 document says one of your services -- if you look at the
17 top, it says: "Contractor will provide client with the
18 following services: Understand the direction set by the
19 client's Board of Directors on the hospital safety
20 score."

21 Do you feel since those early days that

1 you've had a sense of the direction set by the Board of
2 Directors?

3 A. I have not received any feedback that the
4 direction we're going is conflicting with what the Board
5 would want to do.

6 Q. Okay.

7 And have you received feedback that it's
8 consistent with what the Board would want to do?

9 A. As mentioned, I don't have as much
10 communication with the Board members. So Leapfrog staff
11 is sort of the filter for that. So I have not heard any
12 feedback that it's one way or another.

13 Q. Okay. So your understanding comes from
14 Leapfrog staff?

15 A. Correct.

16 Q. And it's your understanding of what the
17 organization wants, as opposed to the Board?

18 MS. LAWSON: Object to form.

19 BY MR. CRAIN:

20 Q. Well, what is your understanding? I'm trying
21 to get a sense of do you have an understanding of what

1 the Board wants, or do you have an understanding of what
2 Leapfrog staff want?

3 A. My direction that I've been given has been from
4 Leapfrog staff.

5 Q. Okay.

6 A. I don't know if that represents their own
7 thoughts or it represents their own thoughts and the
8 Board. I can't speak to that piece.

9 Q. And when you say "staff," who are we talking
10 about?

11 A. Leah Binder, the CEO, and Missy Danforth, the
12 senior vice president of healthcare ratings.

13 Q. Are those folks your primary contacts for
14 Leapfrog?

15 A. Yes.

16 Q. Are there others as well that you interact
17 with?

18 A. A couple of Missy Danforth's direct reports, so
19 Katie Burgraff Stewart and Jean-Luc Tilly. I have quite
20 a bit of contact with them as well.

21 Q. And Ms. Campione?

1 A. Yes, and Alex as well.

2 Q. And what's Ms. Campione's role?

3 A. She -- I don't know her exact title, but she's
4 the one that supports the Hospital Safety Grade program
5 from Leapfrog's side in terms of the analytics and all
6 that goes with that.

7 Q. And does she work with you closely in that
8 regard?

9 A. Yeah.

10 Q. And Mr. Tilly, what's his role?

11 A. Jean-Luc Tilly has a couple of areas of the
12 Leapfrog Hospital Survey that he champions and leads, as
13 well the ambulatory surgery center survey.

14 Q. Okay.

15 And then Ms. Stewart, what's her role?

16 A. Once again, she has certain areas of the
17 Leapfrog Hospital Survey that she champions.

18 Q. Okay.

19 Who do you interact with most at Leapfrog?

20 A. Missy Danforth.

21 Q. Who is the second?

1 A. Probably Katie --

2 Q. Okay.

3 A. -- Stewart.

4 Q. Stewart, yeah.

5 Okay. Let's just keep going. Okay. You
6 can set that -- or wait, actually. Sorry. There's one
7 other thing I want to take a look at.

8 If you go to page 7, just one page back --

9 A. Uh-huh.

10 Q. -- and there's a list of services called manage
11 the research base. Do you see that?

12 A. Yes.

13 Q. Can you just say generally what that entails?

14 A. Yeah. So this item is related to the Leapfrog
15 annual hospital survey, and it's just sort of being
16 aware of where -- what performance measures have been
17 recently endorsed, which are sort of out there in
18 national programs, doing literature reviews on topics.
19 So basically, ensuring that the measures that Leapfrog
20 is using in its Leapfrog Hospital Survey are valid,
21 reliable, evidence-based measures.

1 Q. Got it.

2 So stepping back a little bit, Leapfrog has
3 its hospital survey and its safety grades, right?

4 A. Correct.

5 Q. Are those the primary, like, sides of the
6 house, so to speak?

7 A. Those are their two primary reporting
8 initiatives, but there is the Leapfrog Ambulatory
9 Surgery Center Survey as well.

10 Q. Are you involved in any capacity in all three?

11 A. I am in all three.

12 Q. You are what? Sorry.

13 A. I am involved in all three.

14 Q. Okay. I thought you said I am an author. I
15 was going to say an author of what? But I guess I'll
16 ask that question. Do you author any of the hospital
17 survey? Do you draft any of it?

18 A. I do draft some of the survey questions,
19 measure specifications, end notes, FAQs.

20 Q. A lot of work.

21 A. It is a lot of work, yeah.

1 Q. Do you review each iteration of the hospital
2 survey?

3 A. I do.

4 Q. Top to bottom?

5 A. Not top to bottom.

6 Q. Okay. I would think that would take some time.

7 A. Yeah.

8 Q. Yeah.

9 The survey is about 350 pages. Am I right?

10 A. Correct.

11 Q. Okay.

12 And then with respect to the safety grade,
13 can you just explain your role?

14 A. Yeah. So the role has been to provide Leapfrog
15 with guidance and recommendations on the methodology,
16 and that includes what measures should be included in
17 the safety grade, how we might assign relative weights
18 to each of those measures.

19 Are you asking about currently or sort of
20 historically through the last 11 years?

21 Q. Fair question. I guess I'll start with has it

1 changed meaningfully in the past 11 years?

2 A. I would assess that my role has actually
3 diminished as Alex, Leapfrog, has gained more sort of
4 independence in what they're doing.

5 Q. Got it.

6 So let me ask you about that. The contract
7 in here says that you're being retained to provide
8 strategic -- let me just find the right word. What does
9 it say? Strategic counseling I think. Is that the --
10 do you recall that language?

11 A. I don't recall that language. The language I
12 typically use is to say strategic guidance.

13 Q. Guidance. That's it. Yeah, it's on page 7
14 under background, second paragraph, last sentence. You
15 see it says --

16 A. Uh-huh.

17 Q. -- you were retained to provide client, meaning
18 Leapfrog, with strategic guidance. Do you see that?

19 A. Uh-huh.

20 Q. So to your point of Leapfrog gaining more
21 independence, has the need for strategic guidance

1 diminished over the years?

2 A. Not for strategic guidance, no.

3 Q. So what is diminished as compared to strategic
4 guidance?

5 A. So as an example, in the early years of the
6 Hospital Safety Grade, I actually would be the one to
7 put together a histogram of the hospital safety scores
8 from the prior round, the current round, and we would
9 discuss that as a group in terms of what changes we were
10 seeing. That is now something that Alex would do.

11 So there's sort of an analytic piece that
12 has moved more internal to Leapfrog --

13 Q. Got it. Okay.

14 A. -- but not the strategic guidance part.

15 Q. And just what does strategic guidance mean?

16 A. Yeah. Strategic guidance is thinking about
17 what measures do we currently have in the composite
18 score, what are the changes that are happening like
19 within national programs, CMS, like measures that might
20 be retired, what are new measures that are out there,
21 what are gaps that we would like to try to fill, and are

1 there measures out there that we could use for that.

2 So it's trying to sort of think about
3 what's the right combination of measures to have in a
4 composite score of patient safety and then to also help
5 them think about how we might relatively weight those
6 against each other.

7 Q. So fair to say it's like more holistic as
8 opposed to something more granular that Ms. Campione
9 might do?

10 A. Correct.

11 Q. Okay.

12 I'm not going to put every contract in
13 front of you. You see me flipping.

14 Let me ask a question about just grants
15 before we move on.

16 A. Uh-huh.

17 Q. So you said, for instance -- so we see in the
18 contracts the percentage has changed over time as well,
19 that the grant towards your salary goes to. Do you
20 recall that?

21 A. Correct.

1 Q. Okay.

2 So we saw in 2018 the number allocated to
3 you was ■ percent, right? Of the remaining ■ percent,
4 does that come from other grants?

5 A. Correct.

6 Q. Okay. And how many grants fill that ■,
7 ballpark?

8 A. Two or three depending on the size of them.

9 Q. Okay. And are any of them as significant in
10 proportion as Leapfrog?

11 Let me -- let me -- that's a sort of
12 unwieldy question. Let me fix that. I saw you
13 thinking. So I'll build it a little more clearly.

14 So in 2018, the amount allocated to your
15 salary was ■ percent. Is that right?

16 A. Correct.

17 Q. Okay.

18 You said of the remaining ■ percent, there
19 were two or three other grants that filled that,
20 essentially, right?

21 A. Correct.

1 Q. Are any of those two to three grants also
2 ■ percent?

3 MS. LAWSON: And are you asking just specific
4 to 2018?

5 BY MR. CRAIN:

6 Q. Specific to 2018, yeah, if you recall.

7 A. I don't recall, but I could find that out.

8 Q. Okay.

9 A. I just don't remember offhand.

10 Q. Generally, you know, to the extent you know, do
11 you -- have you had other grants that were the same
12 significance in size as Leapfrog over the years?

13 A. This would be the most significant --

14 Q. Okay.

15 A. -- ongoing contract.

16 Q. Okay. Got it.

17 And the other two or three grants, as a
18 percentage of your compensation, can you ballpark
19 generally what they are?

20 MS. LAWSON: Object -- objection to form. And
21 maybe if you can clarify over time --

1 MR. CRAIN: Yeah.

2 MS. LAWSON: -- because I think he testified
3 earlier that he's had like nine or ten other grants.

4 MR. CRAIN: Yeah, I hear you.

5 MS. LAWSON: Yeah.

6 BY MR. CRAIN:

7 Q. So in a given year, let's say between 2018 and
8 2025, the other grants that are not Leapfrog, if you
9 can, approximately what percentage of your compensation
10 do they -- are they?

11 A. It varies from year to year. I'm more trying
12 to just think about what's on my CV and what those
13 efforts are. They might total up to another ■ percent.

14 Q. Total. Okay. Got it. Okay, so --

15 A. So a typical breakdown might be one that's ■,
16 one that's ■, and one that's ■.

17 Q. Okay. Got it. Okay. And I didn't mean it to
18 be a memory test.

19 A. No, no, no, no, no. I'm trying to answer
20 truthfully, but I don't really remember.

21 Q. Just your best estimate.

1 A. My best estimate, yeah.

2 Q. Okay.

3 MS. LAWSON: And if you're not sure, it's okay
4 to tell him that you're not sure because he wants to
5 know --

6 MR. CRAIN: Yeah.

7 MS. LAWSON: -- what you know.

8 THE WITNESS: Okay.

9 MR. CRAIN: I'm not asking you to guess.

10 THE WITNESS: Okay. Okay.

11 MS. LAWSON: Yes, he's not asking you to guess.

12 THE WITNESS: Okay.

13 MR. CRAIN: But your best estimate --

14 THE WITNESS: Okay.

15 MR. CRAIN: -- approximation as the expert of
16 you.

17 THE WITNESS: Right. Okay.

18 BY MR. CRAIN:

19 Q. So let's shift gears a little bit. Are you
20 doing okay on time?

21 A. Yeah.

1 Q. Okay, good. I mean break.

2 A. Yeah.

3 Q. Okay.

4 So I want to talk a little bit more about
5 the safety grade and what it does and what's it's
6 purpose. So --

7 MS. LAWSON: Actually, if we're going to
8 totally switch gears --

9 MR. CRAIN: Yeah. You want to --

10 MS. LAWSON: -- do you mind if we take a --

11 MR. CRAIN: Yeah, yeah. No, now is fine.

12 MS. LAWSON: A break? Yeah.

13 MR. CRAIN: Yeah. Good.

14 THE VIDEOGRAPHER: This marks the end of media
15 unit number two. We're going off the record. The time
16 is 10:05 a.m.

17 THE COURT REPORTER: This gives us a chance to
18 get the realtime going, too.

19 MR. CRAIN: Oh, yeah.

20

21

1 (Whereupon a short break was had, after
2 which the proceedings continued as
3 follows:)

4 (Exhibit No. 7 was marked for
5 identification as of 9/25/2025.)

6 THE VIDEOGRAPHER: This marks the beginning of
7 media unit number three. We're going back on the
8 record. The time is 10:22 a.m.

9 BY MR. CRAIN:

10 Q. Welcome back, Dr. Austin.

11 A. Thank you.

12 Q. It's like a commercial break on TV.

13 So I've given you what's been marked as
14 Exhibit 7. Do you recognize this document?

15 A. I do not.

16 Q. Okay. So I'll represent to you this is from
17 the Leapfrog Safety Grade website,
18 hospitalsafetygrades.org. Is that familiar to your?

19 A. I'm familiar with that website.

20 Q. Do you know -- like, are you -- do you look at
21 the website periodically or no?

1 A. Once in a great while.

2 Q. Okay.

3 So I'm just going to -- I sort of want to
4 walk through what the safety grade is and focus on some
5 of the language in this document if we can. And I -- so
6 starting with paragraph -- the first paragraph, you see
7 there's a sentence "the purpose" -- do you see that --

8 A. Uh-huh.

9 Q. -- at the bottom?

10 A. Uh-huh.

11 Q. "The purpose of the Leapfrog Hospital Safety
12 Grade is to bring this information to light in a way
13 that's easy for you, the consumer, to use."

14 I realize it says "this information," so I
15 probably need to go back. So I'll start at the top.

16 "One of the most significant problems with
17 today's healthcare system is the failure to make safety
18 and quality information available to the public. But
19 the public deserves this information so they can make
20 informed choices about where to receive care.

21 "The purpose of the Leapfrog Hospital

1 Safety Grade is to bring this information to light in a
2 way that's easy for you, the consumer, to use."

3 Do you see that?

4 A. Yep, I do.

5 Q. Do you agree with that paragraph?

6 MS. LAWSON: So I'll just object to form.

7 And just I want to clarify. I think
8 Dr. Austin, you testified you had not seen this before.

9 THE WITNESS: Correct.

10 I would generally agree. I would maybe
11 reframe the first sentence slightly differently.

12 BY MR. CRAIN:

13 Q. How so?

14 A. I might say that one of the significant
15 problems of today's healthcare system is how to best
16 share safety and quality information with the public.

17 Q. Okay.

18 A. I think information is available. I think
19 we've struggled to help people connect to that.

20 Q. So the difference being the failure language?

21 A. Yeah. I wouldn't say failure to make.

1 Q. Okay.

2 And then do you agree that the purpose of
3 the Leapfrog Hospital Safety Grade is to bring this
4 information to light in a way that it's easy for you,
5 the consumer, to use?

6 A. Yes.

7 Q. Okay.

8 And then is it right that -- if you go down
9 to the second page -- "Our letter grade scoring system
10 allows consumers to quickly assess the safety of their
11 local hospital and choose the safest hospital to seek
12 care." Do you see that?

13 A. Yes.

14 Q. Do you agree with that statement?

15 A. Yes.

16 Q. And then it says: "As consumers use the
17 Leapfrog Hospital Safety Grade more and more, we hope
18 more hospitals will be compelled to be open about their
19 safety and quality and participate in meaningful public
20 reporting."

21 Do you see that as well?

1 A. I do.

2 Q. And do you agree with that sentiment?

3 A. I don't know what the evidence or research
4 supporting the first clause is. I wouldn't necessarily
5 be able to speak to that part, about whether consumers
6 are using the safety grade more and more, but I would
7 agree with the last part.

8 Q. The last part being we hope more hospitals will
9 be compelled to be open about their safety and quality
10 and participate in meaningful public reporting?

11 A. Yes.

12 Q. Okay.

13 And just to be clear, do you have any role
14 in the creation, drafting, revision of Leapfrog's
15 websites?

16 A. If I'm asked to review something, I will review
17 it --

18 Q. Okay.

19 A. -- and provide back comments and feedback. But
20 they don't ask me to review every single thing on their
21 website.

1 Q. Okay. How often do they ask you to review the
2 website?

3 MS. LAWSON: Object to form.

4 BY MR. CRAIN:

5 Q. Generally, just over, you know, the last six
6 years.

7 A. Not very often. I mean, I don't know
8 everything that's on their website. You know, so I
9 don't know what the full scope is, so I can't speak
10 to --

11 Q. No, I hear you. Just so we're on the same
12 page, I'm talking about hospitalsafetygrades.org.

13 A. Right.

14 Q. Are you familiar generally with that website?

15 A. Right. Yeah, yeah, yeah, yeah. Right.

16 Q. And Leapfrog -- I forget the other one but the
17 Leapfrog.org website.

18 A. Uh-huh, right.

19 Q. And one of them refers typically to the survey,
20 right?

21 A. Uh-huh.

1 Q. And the other one is about the safety grades,
2 correct?

3 A. Correct.

4 Q. And do you have any specific recollection
5 sitting here today of any particular page on either of
6 those two websites you were asked to opine on?

7 A. I don't remember exactly. I'm sure through
8 12 years there has been something that I have reviewed,
9 but I couldn't speak to what that is and if it's still
10 up or if it's been taken down.

11 Q. Just asking for your memory today.

12 A. Yeah, yeah. I don't. I don't know.

13 Q. And just to fine-tune it a little bit, do you
14 have any specific recollection of opining on any part of
15 the website regarding the imputation methodology?

16 A. Can you be more specific with what exactly
17 you're referencing there?

18 Q. Yeah. So are you aware of any part of
19 Leapfrog's website that articulates its imputation
20 methodology on the safety grades for nonparticipating
21 hospitals in the survey?

1 A. I know there's some information in a prior
2 exhibit that we discussed that talks about the
3 imputation. I don't know if there's something on a
4 webpage itself. I just don't know what is actually --
5 what all the pages are and what's on them.

6 Q. Okay. Just to my question, do you have any
7 specific memory --

8 A. No, I don't have any specific memory.

9 Q. Let me just finish the question so it's clear.

10 Do you have any specific memory of being
11 asked the opine or otherwise opining on any portion of
12 Leapfrog's website regarding the imputation methodology?

13 A. I don't remember being asked to do that.

14 Q. Okay.

15 MR. CRAIN: Let's go to 67. I'll mark another
16 document. This will be Exhibit 8.

17 (Exhibit No. 8 was marked for
18 identification as of 9/25/2025.)

19 BY MR. CRAIN:

20 Q. Dr. Austin, do you recognize this document?

21 A. I recognize that this is a printout of a

1 webpage from Leapfrog's Hospital Safety Grade website.

2 Q. Do you have any reason to think that it's not
3 an accurate depiction of the website?

4 A. No, I have no reason to think so.

5 Q. Are you familiar generally with the "About the
6 Grade" website?

7 A. I'm familiar with that webpage, yes.

8 Q. I want to ask you a couple of questions about
9 the language on this page, just to your understanding.
10 Did you -- do you recall having any role in drafting
11 this page?

12 A. It is possible but I don't remember exactly
13 today.

14 Q. So page 1 -- and I apologize. There's no page
15 numbers on it but the first page and the second
16 paragraph, it says: "The Leapfrog Hospital Safety Grade
17 uses up to 30 national performance measures from the
18 Centers for Medicare & Medicaid Services, CMS, the
19 Leapfrog Hospital Survey, and information from other
20 sources of supplemental data."

21 Do you see that?

1 A. Yes.

2 Q. Is that a correct articulation of what the
3 Leapfrog Hospital Safety Grade uses?

4 A. That represents a summary of what has been the
5 formation of the Hospital Safety Grade in sort of its
6 entirety.

7 Q. Okay, fair enough. So let me ask you it this
8 way. Is that correct for the methodology as it exists
9 today?

10 A. Yes, minus that currently the safety grade I do
11 not believe is using information from other supplemental
12 data sources.

13 Q. Okay. What is the safety grade currently using
14 as a data source?

15 A. We're using data from the Centers for Medicare
16 & Medicaid Services and from the Leapfrog Hospital
17 Survey.

18 Q. Okay. So today there's no other supplemental
19 data sources being used with the grade, correct?

20 A. That is my recollection from the current
21 methodology.

1 Q. And when did that change? Approximately.

2 MS. LAWSON: So it really is a memory test.

3 THE WITNESS: It is a memory test.

4 BY MR. CRAIN:

5 Q. If he has a memory.

6 A. I don't know the year.

7 Q. Okay. Let me refresh your recollection a
8 little bit.

9 A. Okay.

10 Q. So in 2024, am I right that the imputation
11 methodology changed?

12 A. That is my recollection, yes.

13 Q. And then prior to that, there was a different
14 imputation methodology, right?

15 A. Correct. We've actually used four or five
16 different imputation methodologies over the 11, 12 years
17 of the Hospital Safety Grade.

18 Q. Okay.

19 Can you, at a high level, I'm not asking
20 for a memory test, just generally trace what you recall
21 of those four or five different models?

1 A. Yeah, yeah, yeah.

2 So when we met with the expert panel early
3 on to talk about the idea of the Hospital Safety Grade,
4 one of the identified issues was that we were likely to
5 encounter missing data, and how did we want to address
6 the issue of missing data.

7 The expert panel laid out five different
8 ideas of sort of generally-accepted approaches of how
9 that has been addressed.

10 The -- if I can remember the five --

11 Q. I can show you a document.

12 A. Okay.

13 And so we started initially with if we
14 didn't have data for a hospital for our measure, we
15 ignored that measure and put greater weight on the
16 measures for which we did have data. That evolved into
17 using supplementary data sources, specifically the
18 American Hospital Association survey was one of the key
19 data sources for that.

20 That evolved into calculating or assigning
21 the mean performance for hospitals based on cohorts, so

1 sort of the national mean based on the cohort that the
2 hospital fell into, and that has since evolved into
3 assigning the hospitals a lower performance score.

4 Q. That's the current methodology?

5 A. That's the current methodology.

6 Q. And when you say "lower performance score,"
7 that's limited achievement?

8 A. That is correct, how Leapfrog has
9 operationalized that.

10 Q. And in the current model, am I right that there
11 are two steps, right? The first step is the historical,
12 as you said earlier?

13 A. Correct.

14 Q. The second step is the limited achievement that
15 you were referring to, correct?

16 A. Correct.

17 Q. Okay.

18 So going back to the document, when we talk
19 about supplemental data sources, generally, am I right
20 that the AHA data was a supplemental data source?

21 A. Correct.

1 Q. And AHA is American Hospital Association?

2 A. Correct.

3 Q. I always mess that up. That's my aha moment.
4 I've been playing with that one.

5 MS. LAWSON: You delivered it well.

6 MR. CRAIN: Thank you. I'm going to use that
7 one at trial.

8 BY MR. CRAIN:

9 Q. So other forms of supplemental data, is there
10 any -- because CMS is not supplemental data, right?
11 Because it's covered on this page otherwise, correct?

12 A. Correct.

13 Q. Are there any other supplemental data that you
14 can recall Leapfrog using in the Hospital Safety Grade
15 scoring at any time?

16 A. Yes. So the American Hospital Association did
17 a separate survey around health information technology,
18 and we did use that to inform the scores for
19 computerized prescriber order entry. And that's one
20 that comes to my mind. There's none others that
21 immediately come to my mind, but that's not to say there

1 weren't others.

2 Q. Okay.

3 A. I just don't recall.

4 Q. Yeah, okay. So that's helpful.

5 I want to keep going down this document.

6 If you go to the bottom of that paragraph: "The
7 Leapfrog Hospital Safety Grade methodology has been peer
8 reviewed and published in the Journal of Patient
9 Safety."

10 Do you see that?

11 A. Yes.

12 Q. Now, does the Journal of Patient Safety --
13 there's a hyperlink there. Do you see that?

14 A. Uh-huh.

15 Q. And I don't have the document with me, but I'll
16 represent to you it goes to what I think is a 2014
17 article.

18 A. Correct.

19 Q. Does that article, the peer review that this
20 sentence is talking about to your knowledge?

21 A. Yes.

1 Q. And what does peer review mean, generally?

2 A. Peer reviewed, in at least the medical world,
3 which is really the only world I know, so that's all I
4 can speak to, when you submit to a journal, they
5 actually identify two to three external individuals to
6 actually read the manuscript, provide feedback, provide
7 recommendations of how to improve it. Those go back to
8 the editor of the journal, and the editor makes the
9 decision of what to share back with the authors in terms
10 of requested updates or revisions.

11 The peer reviewers could decide -- could
12 recommend that the article be rejected, right. They
13 don't feel like it's a high enough quality. And so it's
14 a process to sort of have some external review of the
15 work.

16 Q. And the 2014 article was peer reviewed?

17 A. Correct.

18 Q. Do you recall generally by whom?

19 A. I don't -- as an author, you're unaware of who
20 the peer reviewers are.

21 Q. Oh, interesting.

1 A. There's a movement recently toward moving --
2 making that transparent, but that has not necessarily
3 been the practice.

4 Q. Got it. Okay.

5 Do you remember any feedback they gave on
6 the article?

7 A. You're really testing my memory here.

8 Q. If you don't, that's okay.

9 A. Yeah, I don't. That was 10 years ago, 11 years
10 ago. I don't remember. I'm sure there was feedback
11 from -- almost every article has some degree of
12 feedback, but I don't remember what the feedback was or
13 to the degree.

14 Q. And I don't at all mean to stretch your memory.
15 If you don't remember --

16 A. Right. I don't.

17 Q. -- that's a perfectly fine answer, yeah, but I
18 have to ask.

19 So now going back, this article, it
20 analyzes an older methodology, right?

21 A. Correct. It was the methodology that was in

1 place at the time for the Hospital Safety Grade.

2 Q. In 2014, correct?

3 A. 2014, although -- it got published in 2014. We
4 wrote it in 2013, so this is probably an earlier
5 version.

6 Q. So do you think it's fair to say that the
7 current methodology has been peer reviewed?

8 A. I think it's fair to say that the general
9 approach remains consistent from 2013, 2014. The
10 individual measures that are included in the safety
11 grade has evolved over time.

12 Q. And just to be clear, though, to my question,
13 is it a fair statement to say the Leapfrog Hospital
14 Safety Grade methodology has been peer reviewed and
15 published in the Journal of Patient Safety in 2025?

16 A. I could argue that it does not say the current
17 Leapfrog Hospital Safety Grade methodology. It just
18 says that the methodology has been peer reviewed.

19 Q. If this is on the public consumer-facing
20 website today, do you think the consumer would
21 understand, looking at this, that this is referring to a

1 2014 methodology, not a 2025 methodology?

2 MS. LAWSON: Object to form. Go ahead.

3 BY MR. CRAIN:

4 Q. You can answer.

5 MS. LAWSON: You can answer.

6 THE WITNESS: I don't know what a consumer
7 would think or not think. Like, I haven't studied that.

8 BY MR. CRAIN:

9 Q. When you first -- this was the first time you
10 recall reading this sentence in a while, at least,
11 right?

12 A. The sentence meaning the one about the patient
13 safety?

14 Q. No, the one I read back to you. The Leapfrog
15 Hospital Safety Grade methodology has been peer reviewed
16 and published in the Journal of Patient Safety.

17 A. Uh-huh.

18 Q. You knew what that referred to, right?

19 A. Yes, I did.

20 Q. Did you think to yourself that's the same for
21 2025 as it was for 2014?

1 MS. LAWSON: Object to form, but you can
2 answer.

3 THE WITNESS: As I mentioned, I think the
4 general format of what we're doing with a composite
5 score made up of 25 measures that are weighted in two
6 domains remains consistent and solid throughout that
7 time frame.

8 Measures, for whatever -- I mean, measures
9 are going to come and go, right. CMS makes decisions
10 about retiring certain measures. They've added new
11 measures. So the safety grade does continue to evolve,
12 and I would say appropriately, right, like to sort of
13 keep up with the latest information and evidence.

14 BY MR. CRAIN:

15 Q. Has the imputation methodology or the
16 imputation model been peer reviewed?

17 A. That has not.

18 Q. Okay.

19 Okay. Let's keep going. I want to go to
20 -- let's see. Here we go. It's -- and I apologize.
21 There's no page number. If you go to the document, it's

1 the first, second, third, fourth, fifth page to the
2 paragraph starting "A hospital."

3 A. Uh-huh.

4 Q. Do you see that?

5 A. Yep.

6 Q. "A hospital must have enough safety data
7 available for our experts to issue them a letter grade.
8 Hospitals missing more than six process measures, more
9 than five outcome measures, or PSI90 are not graded.
10 All hospitals are encouraged to voluntarily report
11 additional safety data through the Leapfrog Hospital
12 Survey, but they are not required to do so to receive a
13 safety grade."

14 Do you see that language?

15 A. I do.

16 Q. So let's start with process measures. Do you
17 see it says hospitals missing more than six process
18 measures...are not graded?

19 A. Uh-huh.

20 Q. Is that an accurate statement?

21 A. As far as I know. I'm not the one implementing

1 the methodology, so I don't -- I can't speak to --

2 Q. Fair enough.

3 A. -- how it got implemented.

4 Q. Yeah, let me fix the question.

5 Based on your knowledge of how the
6 methodology works, not whether it's been implemented
7 faithfully or not, but purely based on your
8 understanding of the methodology, is that an accurate
9 explanation or articulation of the methodology?

10 A. Yes.

11 Q. Okay.

12 A. That is what we have set as minimum data
13 thresholds.

14 Q. So I want to talk about some process measures.
15 BCMA, are you familiar with that term?

16 A. Uh-huh.

17 Q. What is BCMA?

18 A. Barcode medication administration.

19 Q. And what is CPOE?

20 A. Computerized physician order entry.

21 Q. And you're familiar with hand hygiene?

1 A. Correct.

2 Q. As a measure, not generally.

3 And are you familiar with IC -- IPS?

4 A. Yes, ICU physician staffing.

5 Q. And those I'm going to generally talk about now
6 as we move forward as the four imputed measures.

7 A. Uh-huh.

8 Q. Do you understand what I'm talking about?

9 A. Uh-huh. Yes, I do.

10 Q. When a hospital does not report to Leapfrog's
11 survey, does Leapfrog have any data about the hospital's
12 performance on any of those four measures?

13 A. In the imputation method for Step 1, if a
14 hospital submitted a survey in the prior year, there may
15 be data on one or more of those four measures.

16 Q. Fair enough. What about for Step 2?

17 A. For Step 2, there wouldn't be recent data,
18 right. So there wouldn't be either a survey that was
19 submitted the prior year or a survey submitted this
20 year.

21 Q. Yeah. So if a hospital has never reported to

1 Leapfrog's survey, is it fair to say that Leapfrog has
2 no data on the actual performance of that hospital on
3 those four imputed measures?

4 A. We do not have any data that's been reported
5 through the survey, correct.

6 Q. So why is that not missing data?

7 A. Some I guess it could be one's definition of
8 missing. Those missing data thresholds were really
9 intended to not assign grades to small hospitals that
10 may not have enough data from CMS. So, as an example,
11 there are smaller hospitals that may not have had enough
12 central lines inserted during the reporting period to
13 actually have a central line associated blood stream
14 infection rate.

15 And so the intent of those missing data
16 thresholds was really to make sure we weren't assigning
17 grades to hospitals for which we had unreliable
18 information. It was not necessarily intended to allow
19 hospitals not to report.

20 Q. So is missing data really supposed to be absent
21 data? Like, you mentioned folks that don't have enough

1 central lines.

2 A. Missing data would refer to a measure for which
3 we don't have a value.

4 Q. And so just to put it concretely, when you say
5 "we don't have a value," who do you mean?

6 A. Meaning The Leapfrog Group doesn't have a
7 value.

8 Q. So how is that different -- so one of my
9 clients is Delray Medical Center in Florida, right. And
10 we always use Delray as the example. I don't know why,
11 but Delray is the example. We can pick any of them.

12 Leapfrog gave Delray a limited achievement
13 for hand hygiene. Are you generally aware of that?

14 A. I have not reviewed Delray's results but I --

15 Q. But you understand, as the plaintiff in this
16 case, it's a nonparticipating hospital, right?

17 A. Yes, that's my understanding.

18 Q. And it's -- one of the core elements of the
19 case is the Step 2 methodology, right, for imputation?

20 A. Correct.

21 Q. So based on that, you understand that Leapfrog

1 gave Delray a limited achievement for hand hygiene,
2 right?

3 A. That would be my understanding of how that
4 would get applied.

5 Q. And but -- so there's -- to your point a minute
6 ago, which I've now lost but I will find, you said
7 missing data would refer to a measure for which we don't
8 have a value. Isn't it right that Leapfrog has no value
9 for hand hygiene for Delray?

10 A. That would be correct.

11 Q. Okay.

12 So this paragraph is not correct, right,
13 the one we looked at on the document?

14 A. I think the distinction I would make is whether
15 an imputed score is considered missing or if it's
16 considered a value.

17 Q. You're going to have to say more about that
18 one. What do you mean by that?

19 A. Right. So Leapfrog imputed a score for Delray
20 for hand hygiene of 15 points out of 100.

21 Q. Yes.

1 A. So to me it sort of comes down to is that -- we
2 have a score for Delray for that measure. So it's not
3 missing.

4 Q. And how did Leapfrog pick that score?

5 A. Leapfrog -- so the reason Leapfrog chose
6 limited achievement is that has always been the bottom
7 performance category and it -- basically, given the lack
8 of information that we have about the hospital's
9 performance in hand hygiene, it felt like that was the
10 appropriate score to give, given the absence of
11 information that would tell us something otherwise, that
12 they were performing on a higher level.

13 Q. So is the assumption that Delray is performing
14 at the lowest level for hand wipe -- hand hygiene?

15 A. Given the lack of other information from them,
16 that is our assumption.

17 Q. One of the things that hand hygiene evaluates
18 is whether a hospital has a handwashing policy, right?

19 Let me strike that.

20 One of the things that the survey asks
21 about handwashing is about handwashing training. Are

1 you aware --

2 A. Correct. Yes.

3 Q. Do you have any knowledge of any hospital that
4 does not train doctors and nurses on hand hygiene?

5 MS. LAWSON: Object to form. You can answer.

6 BY MR. CRAIN:

7 Q. Your knowledge.

8 A. There are -- to be clear, what's asked in this
9 survey isn't just about training. It's the way that the
10 training is done, who is trained, and that was not
11 necessarily universally done across all hospitals. So
12 it extends just beyond training employees.

13 Q. Okay. Fair enough.

14 So coming back to this document again, so
15 the four imputed measures, do you agree that they are
16 process measures?

17 A. They are considered either process or
18 structural measures.

19 Q. But in terms of -- I understand that Leapfrog
20 puts its measures into two buckets, process or
21 structural or outcome. Is that right?

1 A. Correct.

2 Q. They all fit the process or structural, right?

3 A. Correct.

4 Q. There are also three others, three other
5 process measures that when a nonreporting hospital is
6 graded are left out of the scoring methodology, right?

7 A. Can you clarify that?

8 Q. Yeah.

9 Are you familiar with safe practice one?

10 A. Yes.

11 Q. And can you remind me what it is? If you
12 don't, I can pull it out.

13 A. Yeah, it's like leadership.

14 Q. Yeah. And are you familiar with safe practice
15 two?

16 A. Yes, which is culture measurement.

17 Q. And are you familiar with total nursing care
18 per patient hour?

19 A. Yes.

20 Q. Those are the three measures that -- for
21 nonparticipating hospitals that do not go into the

1 grade, correct?

2 A. Those are not imputed, correct.

3 Q. Those are not imputed. They're just discarded,
4 right?

5 A. They are ignored, and their relative weights
6 are assigned proportionately to the others.

7 Q. Redistributed, right?

8 A. Redistributed.

9 Q. Yeah. I don't mean to put words in your mouth,
10 but I think it's the word I've seen.

11 So then those are process and structural
12 measures, too, right?

13 A. Correct.

14 Q. So that's seven, right?

15 A. Correct.

16 Q. Okay.

17 And just to be clear, this document doesn't
18 say -- this is the Leapfrog website. I'm looking at it
19 again. Hospitals missing more than six process measures
20 are not graded. That's what it says. It doesn't say
21 hospitals -- strike that.

1 We just walked through Leapfrog does not
2 have data for seven process measures, right?

3 MS. LAWSON: Object to form. You can answer.

4 THE WITNESS: Okay.

5 BY MR. CRAIN:

6 Q. If you're confused, I can rephrase. Let me
7 build it up.

8 So we talked about the four imputed
9 measures, right?

10 A. Correct.

11 Q. We talked about the three what I'll call
12 discarded measures, correct? Do you understand what I'm
13 saying when I say that?

14 A. Yeah, I know the three you're referring to.

15 Q. And they're all process or structural measures,
16 right?

17 A. Correct.

18 Q. And there are seven of them?

19 A. Correct.

20 Q. And yet this document tells consumers that
21 hospitals missing more than six process measures are not

1 graded. Do you see that?

2 A. That is what the document says.

3 Q. And can you tell me again why that's accurate?

4 A. For me, it comes back to the question of is it
5 an imputed score, a score, or is it missing. And I
6 would argue it's a score. So for those four imputed
7 measures, those hospitals have scores. They aren't
8 missing data.

9 Q. Aren't missing data even though Leapfrog has no
10 data for those scores?

11 A. Even though Leapfrog does not have any
12 information that was reported by the hospital through
13 the Leapfrog Hospital Survey.

14 Q. Okay.

15 Okay. All right. Let's keep going. I
16 want to also talk about -- let's see if it's on this
17 page.

18 MR. CRAIN: Can we go to tab 65. This will be
19 Exhibit 9.

20 (Exhibit No. 9 was marked for
21 identification as of 9/25/2025.)

1 BY MR. CRAIN:

2 Q. So Dr. Austin, I've been giving you a document.
3 This one has, fortunately, a URL at the bottom. Do you
4 see that?

5 A. Uh-huh.

6 Q. And has page numbers, fortunately, too.

7 Do you recognize this document?

8 A. I do not.

9 Q. Okay. Do you have a general sense just from
10 looking at it what it purports to be at least?

11 A. Yeah, I do.

12 Q. Okay.

13 So I'll represent to you -- and you can see
14 on the URL at the bottom we pulled this off of
15 hospitalsafetygrades.org, which we talked about earlier
16 that's one of Leapfrog's websites, right?

17 A. Uh-huh.

18 Q. And this is a frequently asked questions page.
19 Do you see that?

20 A. Yes.

21 Q. Okay.

1 And I want to talk through a few things on
2 this document. First I want to start with there is a
3 "why." "Why should people" -- yeah. "Why should people
4 worry about a hospital's patient safety. Aren't all
5 hospitals the same?"

6 Do you see that on page 2?

7 A. Yes.

8 Q. And if you go down to about midway down the
9 paragraph, it says "and all." Do you see that?

10 A. Uh-huh.

11 Q. And it says: "And all hospitals are not the
12 same. Some hospitals are much safer than others. Johns
13 Hopkins Medicine researchers estimate that patients are
14 twice as likely to die of a preventable problem at a
15 "C," "D," or "F" hospital than an "A" hospital, and over
16 50,000 lives would be saved if all hospitals performed
17 the way "A" hospitals did."

18 Do you see that?

19 A. Yes.

20 Q. And I know you didn't write this, but do you
21 have any reason to think you are not the Johns Hopkins

1 researcher?

2 A. No, that is me.

3 Q. And do you have any reason to think that's not
4 referring to your white paper?

5 A. I have no reason to believe that it does not
6 refer to the white paper.

7 Q. And tell me, just so we're on the same page,
8 what is the white paper to which this is referring?

9 A. The white paper that -- so we, in 2016, did a
10 white paper that was referred to as "lives lost, lives
11 saved." And in 2019, we did an update to that. So I
12 don't know -- I believe this is referring to the 2019
13 updated white paper.

14 Q. And the 2019 updated white paper did not
15 analyze "A," "B," "C," "D," and "F" hospitals under the
16 current methodology, right?

17 A. No. They were -- that was done through -- I
18 would have to go back and look at the document but
19 probably based on like the Fall 2018 safety grades. I
20 don't -- yeah. I think we put it out in 2019, but I
21 think it may have been Fall of 2018 that we actually

1 used.

2 Q. And have you published any estimates of that
3 patients are twice as likely to die of a preventable
4 problem at a "C," "D," or "F" hospital than an "A"
5 hospital based on the 2025 methodology?

6 A. No, we have not.

7 Q. Do you have any understanding as to whether
8 that is correct today, or you just don't know?

9 A. We have done some early analysis around this
10 based on 2025, and these statements would remain true.

11 Q. Okay. Based on that early analysis?

12 A. Correct.

13 Q. Okay. And when did you conduct that analysis?

14 A. We started that back in March, April, somewhere
15 in that time frame.

16 Q. Okay. And so even though this is referencing
17 the 2019 white paper and the prior methodology, you're
18 saying based on the current imputed methodology the
19 twice as likely to die language is still correct?

20 A. Yes, I would stand by that.

21 Q. You would stand by it or you do?

1 A. I do.

2 Q. Okay.

3 And how did that analysis transpire?

4 A. Transpire? Can you clarify?

5 Q. How did it come to -- how did you -- why did
6 you conduct that analysis?

7 A. Yeah. So The Leapfrog Group asked that we look
8 at doing an update from the 2019 in 2025. So it was an
9 effort to follow through on that request and to provide
10 an updated analysis of where we're at.

11 Q. And have those analyses been released publicly
12 yet?

13 A. No.

14 Q. Okay, and why is that?

15 A. We -- you would have to ask The Leapfrog Group
16 on their decision and timing on that.

17 Q. Okay.

18 And you've not -- have you drafted a new
19 white paper?

20 A. I have started working on drafting a new white
21 paper. I have not finished that.

1 Q. Okay. Do you have any sense of when you're
2 going to publish that?

3 A. I don't have a sense of it.

4 Q. How far into the drafting are you?

5 A. I don't know how to estimate that. I mean,
6 it's actually updating the 2019 white paper. So I've
7 gone through at this point and made notes on which
8 values need to be updated, where we need to update
9 tables, but all that work would still need to be done.

10 Q. And is your analysis, would you say, an apples
11 to apples analysis between what you're doing today and
12 what was done in 2019?

13 A. It mirrors the spirit of what we did in 2019 in
14 that the measures themselves have changed between 2019
15 and now, but the approach of how we've estimated lives
16 lost and lives saved has remained consistent.

17 Q. And can you explain generally what that
18 approach is?

19 A. Yes. So what we've done is we have -- to
20 estimate the lives lost for looking at "A" hospital as
21 an aggregate, "B" hospital as an aggregate, "C" an

1 aggregate, and "D" and "F" hospitals an aggregate, we
2 look at the mean incidence rates of each of the patient
3 safety events that are included in the Hospital Safety
4 Grade. And from the literature, we've identified an
5 attributable mortality rate to each of those events.

6 So as an example, for central line
7 associated blood stream infections, one in every seven
8 patients who acquires one in the hospital passes away
9 from that. So if you are in a hospital that has a
10 higher rate of those, your risk of dying from one of
11 those increases.

12 And so we apply that against the admissions
13 that are in each of those buckets, so "A" hospitals,
14 "Bs", "Cs", "Ds", and "Fs" to estimate the number of
15 lives lost due to the preventable medical mistakes that
16 are included in the Hospital Safety Grade.

17 And we estimate. Let me put that word out
18 there very clearly. It's an estimate of the number of
19 lives that are lost.

20 Q. And why do you emphasize estimate?

21 A. Because we're -- for example, one assumption

1 that we have to make is the attributable mortality rate,
2 right. We're using that same rate in all four buckets,
3 "As," "Bs," "Cs," "Ds," and "Fs." The reality is we
4 might actually see that "A" hospitals have a lower
5 mortality rate when a patient develops a CLABSI than,
6 say, like a "D" and "F." But we're assuming that that
7 mortality rate is similar across all hospitals.

8 Q. Got it. Okay. Okay, we'll come back to that a
9 little bit more.

10 Okay. So then I want to go back to this
11 FAQ just before we go into other topics.

12 A. Sure.

13 Q. I want to talk about -- let's see. I lost the
14 question. Oh, here it is, page 3. It says: "Does a
15 hospital get a better safety grade if it reports to the
16 Leapfrog Hospital Survey?" Do you see that?

17 A. Uh-huh.

18 Q. And it says: "The Hospital Safety Grade
19 reflects how well a hospital does on safety, not whether
20 they complete the Leapfrog Hospital Survey." Do you see
21 that?

1 A. Uh-huh.

2 Q. And just one question on this line. Do you
3 believe, as, you know, familiar as you were with the
4 methodology, is that accurate with respect to
5 nonparticipating hospitals?

6 A. There are nonparticipating hospitals that have
7 received "As," "Bs," "Cs," "Ds," and "Fs."

8 Q. And do you think that is -- the Hospital Safety
9 Grade reflects how well a hospital does on safety, not
10 whether they complete the hospital survey. Do you agree
11 with that statement?

12 A. I do agree with that statement. I think
13 transparency is an important component of safety.

14 Q. Okay. Why do you say that?

15 A. Yeah. So hospitals that are choosing to share
16 their data through the Leapfrog Hospital Survey are
17 making that information transparent, and I think that
18 does tie to a safety culture of one where we want to
19 make information publicly available, hold ourselves
20 accountable. So I do think there is a link between
21 transparency and safety.

1 Q. Have you conducted any analysis to assess
2 whether hospitals that do not participate in the
3 Leapfrog survey are actually less safe than hospitals
4 that do?

5 A. Not that I can think of.

6 Q. Okay.

7 MR. CRAIN: I'm going to shift gears.
8 Everybody good on time? I'm going to switch topics.
9 You good?

10 BY MR. CRAIN:

11 Q. So I want to talk about the development of the
12 imputation models. So I'm going to focus you on the
13 2024 period. Is that fair enough?

14 A. Yep.

15 Q. Okay.

16 So in April 2024, the expert panel met to
17 discuss, among other things, imputation model. Do you
18 recall that meeting?

19 A. That sounds correct. I know we had a meeting
20 with them, and I think that was the timing of when we
21 talked about that topic.

1 Q. Yeah. And I'll get you a document.

2 MR. CRAIN: Can we get 32A, just to ground the
3 discussion. This will be Exhibit 10.

4 (Exhibit No. 10 was marked for
5 identification as of 9/25/2025.)

6 BY MR. CRAIN:

7 Q. Dr. Austin, do you recognize this document?

8 A. Yes.

9 Q. Okay. And this is an email thread leading up
10 to before and after I think the April 12th, 2024, expert
11 panel meeting. Do you see that?

12 A. Yes.

13 Q. Okay. And I want to just start at the -- where
14 is the attachment?

15 MR. CRAIN: Do we have the slide deck? 32 I
16 need also. Sorry. We have them separately.

17 So let's look at the deck, which was
18 attached to this email, but I think it's separate.
19 This will be Exhibit 11.

20 (Exhibit No. 11 was marked for
21 identification as of 9/25/2025.)

1 BY MR. CRAIN:

2 Q. Okay. So now this is the deck. Do you see
3 that, Dr. Austin?

4 A. I do, yeah.

5 Q. Okay. And it's attached to a Zoom invite -- or
6 to a meeting invite you sent on -- at some point but for
7 a meeting at April 12th at 4 to 5 p.m. Do you see that?

8 A. Yes.

9 Q. Okay.

10 And this was for the safety grade expert
11 panel's meeting for I think that year, right?

12 A. I believe that was the only meeting we held
13 with them in 2024.

14 Q. Okay.

15 And so going to the deck, I'm just going to
16 walk through it with you. And if you go to slide two,
17 which is Bates ending 437364 -- do you see that?

18 A. Uh-huh.

19 Q. And you lay out three topics, right?

20 A. Uh-huh.

21 Q. The first topic is update on swearing DHA

1 military treatment facilities.

2 (Whereupon, the court reporter seeks
3 clarification, which colloquy will not be
4 captured on the written record.)

5 BY MR. CRAIN:

6 Q. The second is feedback on reevaluating
7 imputation model, and the third is feedback on two
8 possible new outcome measures.

9 Do you see that?

10 A. Yes, I do.

11 Q. Okay.

12 And I want to focus on the middle one. So
13 if we can skip to what is page 7366 [sic].

14 A. Uh-huh.

15 Q. Now, do you see this slide is entitled "Problem
16 that We are Working to Solve?"

17 A. Uh-huh.

18 Q. And I want to just go back to the prior
19 exhibit. Well, I'll ask before we go there. Do you
20 recall who drafted this slide? If you don't, I can
21 refresh you.

1 A. I believe I actually am the one who probably
2 drafted this.

3 Q. Yeah. So if you look at the prior exhibit --

4 A. Uh-huh.

5 Q. -- this is Exhibit 10.

6 A. Uh-huh.

7 Q. On page 74782, do you see that?

8 A. 782, yes.

9 Q. And there's an email at the bottom from you to
10 Ms. Campione, Ms. Danforth, and Ms. Joshi. Do you see
11 that?

12 A. Yes.

13 Q. And it goes to the next page. And you say,
14 "Attached is an updated version of the slides. Alex,
15 these are looking good. I added in a slide at the start
16 of the imputation section that outlines the problems we
17 are trying to solve." Do you see that?

18 A. Yep.

19 Q. Does that refresh your recollection as to
20 whether you drafted --

21 A. Yep --

1 Q. -- this slide?

2 A. -- it does.

3 Q. Okay.

4 Just remember to let me finish before --

5 A. I'm sorry.

6 Q. -- and vice versa, just for Marlene.

7 So going back to the slide, why did you
8 draft this slide?

9 A. I thought it was helpful to remind the expert
10 panel of what are some of the challenges we are facing
11 with the current Hospital Safety Grade methodology and
12 why we might want to consider moving in a different
13 direction for imputation.

14 Q. Okay. And the challenges you're talking about
15 are the two bottom bullets, right?

16 A. Correct.

17 Q. Okay. And so the first one is imputed scores
18 have crept up, making imputation a more favorable choice
19 for lots of hospitals and has de incentivized true
20 transparency of performance, right?

21 A. Correct.

1 Q. Now, when you say imputation scores have crept
2 up, what's that based on?

3 A. So the imputation methodology at the time was
4 that it involved -- there was still the historic element
5 of Step 1.

6 Q. And I'll help you. I don't mean to interrupt,
7 but there's a slide that lays it out if it's helpful to
8 you.

9 A. Okay.

10 Q. It's 7369.

11 A. Uh-huh.

12 Q. Do you see that?

13 A. Yep, I do.

14 Q. Okay. Just in case it's helpful. But go on.

15 A. So the Step 1 was assigning the most recent
16 scores from the four past rounds of the safety grade,
17 and then Step 2 was actually looking at two different
18 mean performances. And what we had seen was a trend
19 with those scores were creeping up, which incentivized
20 hospitals to not report to the survey and, instead, to
21 take the imputed score.

1 Q. And how did you know it was driving that
2 incentive, that was the reason they were not reporting?

3 A. That feedback was clear from hospitals. They
4 had verbally shared that with Leapfrog.

5 Q. With you?

6 A. Not with me, with Leapfrog.

7 Q. Did you talk to any hospital that shared that
8 with you personally?

9 A. No.

10 Q. Okay.

11 And who did they share it with at Leapfrog?

12 A. From what I remember, Missy Danforth.

13 Q. Any sense of how many hospitals?

14 A. I don't have a sense of that.

15 Q. And do you have any other basis of knowledge to
16 support that statement besides what you said about
17 Ms. Danforth?

18 A. We have -- we numerically had been tracking the
19 mean score. So we did have empirical evidence of that
20 going up.

21 Q. Empirical evidence of scores going up?

1 A. Correct.

2 Q. But not necessarily empirical evidence of
3 nonparticipating hospitals making the decision not to
4 participate because the scores were going up?

5 A. I don't remember any evidence in that way.

6 Q. Okay.

7 Then the second -- just going back to slide
8 I think it's five, which is 7367 on the Bates number,
9 you see -- so the first bullet we just talked about is
10 primarily a problem with Step 2 in this old methodology.
11 Is that right?

12 A. Correct.

13 Q. And the second bullet is about Step 1, right?

14 A. Correct.

15 Q. And it says: "Hospitals are using Step 1
16 imputation, using their individual hospital's historical
17 data as a reason to not report on the current year
18 survey." Right?

19 A. Correct.

20 Q. Okay. So tell me a little bit about that
21 issue.

1 A. Yeah. Leapfrog had seen patterns where
2 hospitals were choosing to report one year, not report
3 the next year, report the next year as a way to sort of
4 keep their scores sort of used in the Hospital Safety
5 Grade without having to report to the survey every year.

6 Q. And what was your understanding of why those
7 hospitals weren't reporting every year?

8 A. I can't speak to why the hospitals were
9 choosing not to report.

10 Q. You have no understanding?

11 A. I have theories but I don't -- I haven't had
12 conversations with hospitals specifically about their
13 decision not to report.

14 Q. So same thing with respect to Step 1 -- 2 that
15 we just talked about, right? You said you --

16 MS. LAWSON: Object to form.

17 BY MR. CRAIN:

18 Q. Yeah, let me fix it.

19 So you said I have theories but I haven't
20 had conversations with hospitals specifically about
21 their decision not to report. That goes for either

1 decision not to report about Step 1 or Step 2, right?

2 A. That is for me personally I never had
3 conversations with hospitals about that.

4 Q. And did you ever have conversations with
5 Ms. Danforth about the hospitals that are deciding not
6 to report in the Step 1 context?

7 A. Yes.

8 Q. Okay. Tell me about those conversations.

9 A. So that was a similar point of feedback, that
10 she had had conversations with hospitals who had
11 indicated -- Leapfrog also has regional leaders, which
12 you may be familiar with. I think the regional leaders
13 were also hearing from hospitals that, oh, yeah, we're
14 not going to report this year because our scores still
15 get used in the Hospital Safety Grade.

16 So there had been sort of a current of
17 we're choosing to bypass transparency.

18 Q. And was that in relation to the burden of
19 completing the survey?

20 A. That's what I can't speak to.

21 Q. So you have no knowledge about the why?

1 A. I don't have any firsthand knowledge of the
2 why.

3 Q. Do you have any secondhand knowledge about the
4 why?

5 A. My secondhand knowledge would be burden would
6 be a consideration.

7 Q. Okay. And when you say "burden would be a
8 consideration," what do you mean by that?

9 A. So what I hear from hospitals generally, not
10 specific to this, is that at times, they feel like they
11 need to prioritize other quality improvement efforts and
12 may make a decision on where those priorities exist from
13 year to year.

14 Q. And when you say what you hear from hospitals,
15 that's not firsthand, right?

16 A. That has been firsthand, yes.

17 Q. So you do talk to hospitals?

18 A. I do talk to hospitals, not specifically about
19 whether they are reporting every year or every other
20 year.

21 Q. Okay.

1 A. I have had conversations with hospitals --
2 well, I guess I have had conversations with hospitals
3 about their decision to pause reporting.

4 Q. Okay. How many conversations, approximately?

5 A. Five to ten through ten years.

6 Q. Okay.

7 And have you had conversations with
8 hospitals about this imputation methodology at all at
9 any time?

10 MS. LAWSON: Well, I just want to object to
11 form.

12 Just to clarify, the imputation -- this
13 imputation methodology, are you asking about the current
14 2024?

15 MR. CRAIN: Yes.

16 MS. LAWSON: Yes. So just to clarify that.

17 THE WITNESS: I do not believe I've had any
18 conversations with hospitals about that.

19 BY MR. CRAIN:

20 Q. Okay.

21 So your knowledge today about hospitals'

1 decision-making with respect to reporting onto the
2 survey primarily comes from Ms. Danforth?

3 A. That would be a fair statement.

4 Q. Okay.

5 Okay. So going back to the deck, there's a
6 number of tables, and I want to go to slide -- it's the
7 slide with your proposal. Oh, here we go. Slide 13,
8 which is 7375.

9 A. Uh-huh.

10 Q. And this is the proposed future imputation
11 methodology. Do you see that?

12 A. Yes.

13 Q. Okay. This is not the methodology that
14 Leapfrog ultimately adopted, right?

15 A. Correct.

16 Q. Okay. Was this the methodology discussed at
17 the meeting?

18 A. Yes. This is what we put forward to the expert
19 panel.

20 Q. Okay. And you received feedback about this
21 proposal?

1 A. Correct.

2 Q. Right.

3 Okay. And just generally, can you explain
4 what the proposal was?

5 A. The proposal was that we would basically move
6 to a single form of imputation which would be the --
7 that we would use Step 2b imputation for all hospitals.

8 Q. And you would -- to your point, a single form
9 of imputation, that's the retire Step 1 bullet?

10 A. Correct. We would retire Step 1, and we would
11 move all hospitals to Step 2b.

12 Q. Okay. And which is 2b?

13 A. 2b, as it's described here, is that hospitals
14 would be assigned to cohorts and then the means of
15 scores from the first year of reporting would be used to
16 calculate the means.

17 Q. Okay.

18 A. And then the hospital would be assigned that
19 mean.

20 Q. Got it. Okay.

21 And then I just want to go -- so that was

1 the proposal you put out, correct?

2 A. Correct.

3 Q. And it was not the one that was adopted?

4 A. Correct.

5 Q. And we'll get to the why, but before we do
6 that, if you could go one slide back, slide 12.

7 A. Uh-huh.

8 Q. You see it says: "A slight dip in survey
9 participation occurred this past year as hospitals opted
10 to use past survey results in Step 1 imputation." Do
11 you see that?

12 A. Correct.

13 Q. So what is that based on? How did you know
14 that the slight dip was caused by hospitals using past
15 survey results in Step 1 imputation?

16 A. That is probably more just a -- based on
17 conversations that Ms. Danforth had had with hospitals.
18 I don't know if that's -- if we have anything
19 empirically to back up that statement.

20 Q. Okay. So you don't know whether that's
21 accurate or not?

1 A. I don't know whether that is -- yeah, correct.

2 Q. Okay.

3 So I want to talk a little bit about the
4 meeting itself. Do you recall whether other expert
5 panelists proposed alternative imputation methodologies?

6 A. I really don't remember the details of that
7 call.

8 Q. Okay.

9 Do you remember who was on it?

10 A. We have meeting notes of -- from that meeting,
11 but I don't recall who exactly was on that call.

12 Q. Okay.

13 So I want to go to tab 33. This is a
14 document I don't think you've seen before, so I'll just
15 preface that so you know.

16 A. Okay.

17 MR. CRAIN: And this will be Exhibit 12.

18 (Exhibit No. 12 was marked for
19 identification as of 9/25/2025.)

20 BY MR. CRAIN:

21 Q. It's huge. I'll walk you through it. So are

1 we good?

2 A. We're good.

3 Q. Okay.

4 So if you look back at exhibit -- the
5 exhibit with the email, which I think is Exhibit 10.

6 A. Uh-huh.

7 Q. Okay?

8 Do you see at the top there'd an email from
9 Ms. Campione to you?

10 A. Uh-huh.

11 Q. And it says, "Here is the link to the recording
12 if you need it for notes. Please let me know if you
13 have any issues with it."

14 A. Uh-huh.

15 Q. And it gives a URL and password, right?

16 A. Uh-huh.

17 Q. So the expert panel meeting was recorded?

18 A. Correct.

19 Q. Was that typically how it was done?

20 A. Yes.

21 Q. Okay.

1 And do you recall watching the video of the
2 recording at any point?

3 A. I did not.

4 Q. Okay. Do you recall reviewing a Zoom
5 transcript at any point?

6 A. I do not.

7 Q. Okay.

8 So I will represent to you this, what you
9 have in front of you, is a certified transcript of that
10 recording --

11 A. Okay.

12 Q. -- just for discussion purposes. And so I want
13 to just walk through a couple of things with you. So --
14 and I know you haven't seen this before, so I'll walk
15 you through it.

16 So if you go to the back of the document,
17 there's an index. Do you see that?

18 A. Uh-huh -- yes.

19 Q. Sorry. Yes?

20 A. Yes.

21 Q. Okay.

1 So the index, I want to just focus on a few
2 things. If you go to page 9 and you go to "L," do you
3 see the word "limited" appear on the index?

4 A. I do not.

5 Q. And I want to go to the word A -- excuse me, to
6 the portion of the index for "A." Do you see the word
7 "achievement"?

8 A. I see achieving but not achievement.

9 Q. Okay. And where is achieving? There it is.
10 Do you want to -- let's flip to 36.3. So page 36, line
11 3. Tell me when you're there.

12 A. I am there.

13 Q. And it says: "But achieving consensus is
14 difficult." Do you see that?

15 A. Yes.

16 Q. So that doesn't refer to limited achievement,
17 right?

18 A. It does not use that phrase.

19 Q. So based on this index, and to the best of your
20 recollection, did anybody at any time during the meeting
21 raise the idea that you could impute limited achievement

1 scores to nonparticipating hospitals?

2 A. I don't remember what was exactly said. I
3 would not be surprised if the Hospital Safety Grade
4 expert panelists weren't familiar with the term "limited
5 achievement."

6 Q. Sorry. Say that again. I think that was a
7 double negative.

8 A. I would not be surprised if the Hospital Safety
9 Grade expert panelists were not familiar with the term
10 limited achievement.

11 Q. Got it. Okay.

12 Is there another term they might use?

13 A. They might have used lowest performance score.

14 Q. Okay. What about zero?

15 A. It's possible that zero could have been
16 mentioned.

17 Q. Okay.

18 So I want to go to zero, too, in the index,
19 just to close that loop.

20 MS. WOOD: And Lee, I do just want to object to
21 form. I've never seen this document before either. Has

1 this been produced in discovery?

2 MR. CRAIN: It is being produced today.

3 MS. WOOD: Okay. And when was it -- was it
4 prepared on September 11th?

5 MR. CRAIN: I do not know the date, but we can
6 talk off the record. So your objection is noted.

7 BY MR. CRAIN:

8 Q. So do you see zero, Dr. Austin, in the index?

9 A. Uh-huh.

10 Q. Okay.

11 If you go to 40, it said -- in the index,
12 it said line 7, 7 to 11. Do you see that?

13 A. Yes.

14 Q. And I just want you to look at this page from,
15 say, line 6 to 11. Does this reflect anybody proposing
16 to impose a zero score for nonparticipating hospitals?

17 A. No, it doesn't.

18 Q. Okay.

19 Okay. So is it accurate to say that no one
20 suggested, based on the index, based on your memory,
21 that imposing a zero score for nonparticipating

1 hospitals?

2 MS. LAWSON: Object to form.

3 THE WITNESS: I honestly don't remember the
4 conversation.

5 BY MR. CRAIN:

6 Q. Okay.

7 A. I will clarify that what has been assigned is
8 not zero to hospitals.

9 Q. I understand.

10 So do you remember any other proposal made
11 during the expert panel meeting besides the one that you
12 proposed in the slides that we looked at?

13 A. I don't remember.

14 Q. Okay.

15 So I'll take you to one other that is in
16 here. Do you recall -- who is Dr. Pronovost, Peter
17 Pronovost?

18 A. He is one of the Hospital Safety Grade expert
19 panelists.

20 Q. Okay. And you worked with him previously at
21 Armstrong, right?

1 A. Correct.

2 Q. Okay.

3 Now, he proposes -- if you go to pages --
4 if you go to page 25 --

5 A. Uh-huh.

6 Q. -- oh, wait. Sorry. Page 26.

7 A. Uh-huh.

8 Q. And you see at line 18 it says Peter Pronovost
9 and colon?

10 A. Uh-huh.

11 Q. And he says, "Peter Pronovost: Missy, though,
12 to Arjun's point, I wonder in our model do we include
13 that if they're in the lowest quartile, that they stay
14 in that? You know what I mean? At least to reduce the
15 gaming."

16 Do you recall him saying that?

17 A. That's what it says here.

18 Q. Yeah. Do you have any independent --

19 A. I don't remember.

20 Q. Okay.

21 Do you know generally what that means, the

1 lowest quartile?

2 A. I would need to go back further up in the
3 document --

4 Q. If you want to take a look and --

5 A. -- to understand what the context was --

6 Q. Yeah, why don't you go back to page --

7 A. -- because I don't know what the discussion was
8 at that point.

9 Q. Go back to page 24 and start with
10 Dr. Srinivasan.

11 Who is Dr. Srinivasan?

12 A. He's at the Centers for Disease Control and
13 Prevention.

14 Q. Okay. And take a second.

15 (Witness peruses document.)

16 THE WITNESS: So I've read it. And can you
17 repeat your question?

18 BY MR. CRAIN:

19 Q. Yeah. I wanted to know if you have an
20 understanding of what Dr. Pronovost was referring to
21 when he's talking about the bottom quartile. And I

1 think Dr. Srinivasan talks about the bottom quartile,
2 too. And I will also preface, if you don't remember, I
3 can show you an email subsequently about the bottom
4 quartile, but I wanted to know if you have an
5 independent recollection.

6 A. I don't have a recollection of that.

7 Q. Okay. That's fine. It's not a memory test.
8 Again, we'll get to another document. I'm just going
9 through this.

10 I want to look at one other quick thing in
11 the index. If you go to "W," do you see the word
12 "willing"?

13 A. I do.

14 Q. Let's see. Where is it?

15 A. Oh, no. I don't see it.

16 Q. Yeah, I didn't see it.

17 Just to confirm, do you see the word
18 "willing" in the index?

19 A. I do not.

20 Q. Okay.

21 Do you know what the phrase "willing to

1 report" means?

2 A. That is the term that Leapfrog used prior to
3 limited achievement.

4 Q. Okay. So that was the lowest performing score,
5 right?

6 A. That was the phrase that was used for that in
7 the past.

8 Q. Okay. Do you recall when it was retired?

9 A. I could estimate 2018, 2019, somewhere around
10 there.

11 Q. And just -- I'm representing to you that the
12 index is from a certified court reporter. Based on this
13 index, the phrase "willing to report" or even just the
14 word "willing" was not discussed at this meeting,
15 correct?

16 A. I do not see the word "willing" in the index.

17 Q. Okay.

18 And you have no independent recollection of
19 a discussion of the phrase "willing to report" at the
20 meeting, right?

21 A. I do not.

1 Q. Okay.

2 Okay. I'm going to set this aside, and
3 we'll come back to it, so don't lose it.

4 (Whereupon, a discussion was held between
5 counsel regarding lunch schedule, which
6 portion was not included in the written
7 record.)

8 BY MR. CRAIN:

9 Q. Okay. So let's keep going.

10 So you mentioned there were minutes after
11 the meeting, right?

12 A. Correct.

13 Q. I want to start with tab 33A, which will be
14 Exhibit 13.

15 (Exhibit No. 13 was marked for
16 identification as of 9/25/2025.)

17 BY MR. CRAIN:

18 Q. So Dr. Austin, do you recognize this document?

19 A. I recognize the meeting notes that are behind
20 it.

21 Q. Behind it. Okay.

1 A. And I recognize the email.

2 Q. Yeah. Okay. So you have no reason to think
3 this wasn't sent and received?

4 A. Correct. Yes.

5 Q. Okay.

6 And you'll note in the bottom it's an
7 Armstrong-produced document, right?

8 A. Correct.

9 Q. So it's an email originally from the 16th from
10 Preeti Joshi. And remind us, who is she again?

11 A. Preeti is an analyst that works for me.

12 Q. Okay. And she works on the Leapfrog account?

13 A. Correct.

14 Q. Okay.

15 And she says first in that email, "Matt,
16 please review the attached Leapfrog Hospital Safety
17 Grade HSG" -- is that Hospital Safety Grade?

18 A. Uh-huh. Correct.

19 Q. -- "expert panel meeting notes, and let me know
20 your suggestions."

21 Then she follows up, right?

1 A. Correct.

2 Q. And she says -- it looks like it's a few hours
3 later that same day, April 16th -- "Matt, please
4 disregard the attachment of previous email and consider
5 the attached document for review. I accidentally attached
6 a different file with previous email."

7 Do you see that?

8 A. Yes.

9 Q. Okay.

10 And then going on to the notes, this is,
11 fair to say, her draft of the notes, right?

12 A. Correct.

13 Q. Okay.

14 And then just stepping back, does every
15 expert panel, safety grade expert panel have meeting
16 notes like these?

17 A. Yes. Could there be one or two for which we
18 just somehow didn't do them? Possibly. But the intent
19 is, yes, to have meeting notes like this.

20 Q. And is this the normal process where the person
21 who is reporting to you starts the first draft and you

1 revise?

2 A. Correct.

3 Q. Okay. And do you generally try to be accurate
4 with the meeting minutes?

5 A. Yes.

6 Q. Okay. What do you look for when you revise?

7 A. I look for accuracy. I try to highlight
8 broader themes. So as an example, often when the
9 analyst first starts working with me, the notes will be
10 incredibly, like, detailed. Sara said this. Bob said
11 this, right. So I try to sort of move it up a level,
12 right, and I try to be clear with sort of action items
13 of what we need to do next and to be clear with decision
14 points.

15 Q. Okay. And you still try to be faithful to the
16 discussion, right?

17 A. Correct.

18 Q. Okay.

19 So I'm going to set this one aside, and I
20 want to go to your version of the notes. Let's see.
21 Oh, wait. Come back. Sorry. Sorry. Let's start with

1 this. I'm all out of order.

2 Okay. So if we go down to Preeti's version
3 of the notes, do you see number two?

4 A. Uh-huh.

5 Q. Proposed changes to the imputation model,
6 right?

7 A. Uh-huh.

8 Q. And if you go, it looks like one, two, three
9 bullets down, it says "Peter asked."

10 A. Uh-huh.

11 Q. "Peter asked whether Leapfrog has a way to keep
12 the low-performing hospitals in the lowest quartile
13 using this Step 2 imputation model." Do you see that?

14 A. Uh-huh.

15 Q. Okay. Was that what we looked at in the
16 transcript a little while ago?

17 A. I don't know because I actually didn't fully
18 follow what Peter was trying to ask there.

19 Q. Okay. Got it.

20 A. To be really, really honest, I -- it didn't
21 make much sense to me.

1 Q. I've been trying to understand it, too, so I
2 get it.

3 Does this seem like a fair articulation of
4 what he was saying in the call?

5 A. If it's in the notes, I would say it's probably
6 a fair articulation, but I don't remember that myself.

7 Q. Okay.

8 Now, just to be clear, looking at this,
9 there is no indication -- and you can read the bullets.
10 They're pretty short -- that anyone was proposing giving
11 hospitals a zero or limited achievement or willing to
12 report, right?

13 A. Can you repeat your question, please?

14 Q. Yeah.

15 Is there any indication in these notes that
16 someone raised the idea during the meeting of giving
17 nonparticipating hospitals a zero or limited achievement
18 or willing to report for the imputed measures?

19 MS. LAWSON: Object to form, but you can
20 answer.

21 THE WITNESS: It doesn't necessarily explicitly

1 say that in these notes.

2 BY MR. CRAIN:

3 Q. Okay.

4 You say "explicitly." Do you have a reason
5 to believe those topics were discussed?

6 A. There was concerns about -- that Arjun raised
7 about a hospital that was performing very poorly and
8 that they would actually get an imputed score, so a
9 better score than what they would actually be -- so to
10 me that seems to be raising the question of whether the
11 current imputation model was rewarding poor performing
12 hospitals.

13 So, I mean, there could be an
14 interpretation of that.

15 Q. So you said the question was raised. My
16 question is was the answer provided, proposed answer?

17 A. I don't remember.

18 Q. Okay.

19 And do you see anything on this page from
20 what you read a few minutes ago from the transcript to
21 suggest that those solutions were proposed that I just

1 mentioned?

2 A. I don't see anything here that would indicate
3 that the actual solution that we landed on is what was
4 explicitly proposed by the expert panel.

5 Q. Okay. Let me ask you this question. Who
6 proposed the solution that you landed on?

7 A. I don't recall with certainty.

8 Q. Okay. Do you think it was Leapfrog, or do you
9 think it was the expert panel?

10 A. I'm guessing it was Leapfrog that proposed that
11 solution based on the concerns that the expert panel was
12 raising.

13 Q. Got it.

14 So to your framing before, the question was
15 raised and Leapfrog was supplying an answer?

16 A. Is your question during this call?

17 Q. During this period. April 2024 --

18 A. I don't remember with certainty how the
19 solution that is currently in use was developed.

20 Q. Okay.

21 I want to also take a look a couple bullets

1 down. It says, "Matt mentioned." Do you see that?

2 A. Uh-huh.

3 Q. And Matt, I take it, is you?

4 A. Correct.

5 Q. "Matt mentioned it is important to see whether
6 there is an actual difference in hospitals' performance
7 and whether there is some sort of bias in the
8 measurement against them. He said to minimize the
9 second, and if there are differences in hospitals'
10 performance, we can address the structural issues to fix
11 them."

12 Do you see that?

13 A. I do.

14 Q. So taking that one by one, what does the first
15 sentence mean?

16 MS. LAWSON: Might it be helpful for him to
17 just review the transcript of what he said?

18 MR. CRAIN: Yeah. I'm pulling that out now.

19 THE WITNESS: That would be helpful.

20 BY MR. CRAIN:

21 Q. But you know what, let's start with this

1 document and what's your understanding of this sentence,
2 and I'll try to find a line.

3 A. It's unclear to me what "them" is referring to
4 in this sentence. Like, I don't have the context to
5 remember what "them" is. To me, I was suggesting that,
6 perhaps, we needed to look at difference in performance
7 between -- yeah, I don't have a great sense just from --

8 Q. I can take you where the -- if you go back to
9 the transcript, page 27 is where you talk about bias.

10 MS. LAWSON: And you might want to just start
11 from the page preceding, which is the page we reviewed
12 previously, and just keep going on the discussion. I
13 think that might help.

14 (Witness peruses document.)

15 THE WITNESS: The context from the transcript
16 is such that we were talking about safety net hospitals
17 and some sort of concerns about bias in measurement for
18 those safety net hospitals.

19 BY MR. CRAIN:

20 Q. Only for them?

21 A. That is the context that Kathy McDonald had

1 brought up was the safety net hospitals.

2 Q. Fair enough. I get that she says that from
3 lines 3 to 11 on page 27, but you follow up, and you
4 say, "I think where I struggle is what is a true --
5 well, where is there a true difference in performance,
6 right, and where is there some sort of bias in the
7 measurement against them. Right?" And then Kathy says,
8 "Right." And then you say, "And I think we want to
9 minimize the second."

10 And so I guess the question I have out of
11 that is what does bias mean in that context?

12 A. Bias would refer to that there is some sort
13 of -- that there is some sort of structural -- I'm
14 trying to think of the right words for this. That there
15 is some sort of structural sort of -- there's something
16 structural about safety net hospitals that disadvantages
17 them.

18 Q. So you're talking about bias about the
19 hospitals or bias about the scoring methodology?

20 A. The bias in the hospitals. And I say that
21 because I think on the next page I talk about that

1 marginalized communities tend to receive care at less
2 safe hospitals. So I think the concern is that there is
3 a bias against safety net hospitals in terms of quality
4 and safety.

5 Q. So this doesn't refer to bias in the survey --
6 in the scoring methodology -- excuse me -- against
7 safety net hospitals?

8 A. I believe what this is referring to is actually
9 the bias in the challenges that safety net hospitals
10 face to prioritize quality and safety of care.

11 Q. And how does that factor into the imputation
12 methodology?

13 A. So safety -- well, to be clear, safety net,
14 there is no formal definition of that. If they are a
15 critical access hospital, they don't receive a Hospital
16 Safety Grade.

17 Q. What is a critical access hospital?

18 A. Critical access hospital, there is about 1,400
19 of them in the United States. They're small hospitals
20 that have 25 beds or less --

21 Q. Got it.

1 A. -- that are generally in rural areas and for
2 which the funding from the government is different,
3 basically to keep their doors open, and they are
4 generally in small, rural communities.

5 Q. And so I get there is no definition of safety
6 net hospital. What's your general understanding of what
7 that means?

8 A. One definition that I commonly use is it's
9 hospitals that care for greater proportions of patients
10 who have Medicaid as their primary insurance.

11 Q. Got it. And they can be for-profit or
12 nonprofit hospitals?

13 A. Correct.

14 Q. Okay. And so what type of -- so how does the
15 safety -- how does the imputation -- like, how does that
16 fact -- let me state the question in a real way rather
17 than stuttering way.

18 How does the safety net bias that you're
19 talking about here relate to the imputation methodology
20 that was the topic of the agenda here?

21 A. I believe what Kathy is looking at is -- was

1 looking at some of the safety net hospitals and just
2 making sure that they were going to be treated fairly.

3 Q. Okay. And is that -- is a difference in the
4 safety net hospitals, as compared to non-safety net
5 hospitals, their capacity to complete the survey?

6 A. I couldn't speak to that.

7 Q. Do they have fewer resources than non-safety
8 net hospitals?

9 A. They typically are more resource constrained
10 hospitals than larger hospitals -- or not larger
11 hospitals, than hospitals that are better funded.

12 Q. So did you understand Kathy to be saying that
13 she wanted to recognize the burden that they were
14 experiencing as compared to non-safety net hospitals?

15 A. I don't know if that was what she was implying
16 there.

17 Q. Okay.

18 So and then going back to your point about
19 bias, how would the imputation methodology -- strike
20 that. Sorry.

21 Going back to your point about bias, how

1 could the imputation methodology take that into account?

2 A. Which imputation methodology are we discussing?

3 Q. Any one, whether -- well, how could any
4 imputation methodology take into account the bias that
5 you're identifying here apparently as to safety net
6 hospitals?

7 A. Well, there's the concern that -- I mean, one
8 potential bias is that if other safety net hospitals are
9 performing less well and you choose to not complete the
10 survey, you're going to maybe get assigned the same
11 value as your average safety net hospital. So that
12 would be one way that a safety net hospital might face a
13 bias.

14 Q. Okay. But you need the definition of what
15 qualifies as a safety net hospital, right?

16 A. Correct. And Leapfrog has its own definition
17 that it uses for that.

18 Q. Is it different from yours?

19 A. I don't know.

20 Q. Okay. You have no knowledge of what that
21 definition is?

1 A. I couldn't say with exact certainty what their
2 definition is.

3 Q. Do you know in what context they have that
4 definition?

5 A. They have it in some of their data files
6 because a lot of their data licensees like to be able to
7 drill down on that type of detail, but I don't know what
8 -- how they get that source or what they are using for
9 them.

10 Q. Okay. Okay.

11 So going back to the notes, which I believe
12 is Exhibit 13, I want to go back to the bullet. Preeti
13 said, "Matt mentioned it is important to see whether
14 there is an actual difference in hospitals' performance
15 and whether there is some sort of bias in the measures
16 against them. He said to minimize the second, and if
17 there are differences in hospitals' performance, we can
18 address the structural issues to fix them."

19 Do you see that?

20 A. I do.

21 Q. Now, she doesn't mention safety net hospitals

1 there, right?

2 A. She does not.

3 Q. Okay. So -- okay. I'll leave it there.

4 MR. CRAIN: I think maybe we'll take a break
5 now. Do you want to do the lunch break now?

6 MS. LAWSON: We're off the record.

7 THE VIDEOGRAPHER: This marks the end of media
8 unit number three. We're going off the record. The
9 time is 11:49 a.m.

10 (Whereupon a lunch break was had, after
11 which the proceedings continued as
12 follows:)

13 THE VIDEOGRAPHER: This marks the beginning of
14 media unit number four. We're back on the record. The
15 time is 12:56 p.m.

16 BY MR. CRAIN:

17 Q. Okay. Welcome back.

18 A. Thank you.

19 Q. I hope you had a nice lunch.

20 A. Yeah. Thank you.

21 Q. So we were talking about the April 12th meeting

1 before we broke. Do you recall that?

2 A. Yes.

3 Q. I want to go back in time just a little bit.

4 The April 12th meeting, if you recall correctly from the
5 notes we saw, was between 4 and 5 o'clock.

6 A. Correct.

7 Q. And if you keep the notes out, if you look at
8 the portion where it says the attendees, do you see
9 that?

10 A. Yes.

11 Q. Dr. Romano is not on that list, right?

12 A. Correct.

13 Q. Okay. And do you recall that -- whether you
14 met with Dr. Romano earlier that day with regard to the
15 safety grade expert panel?

16 A. I can't say with certainty.

17 Q. Okay.

18 A. But I believe we met with him at some point
19 around that meeting.

20 Q. Okay. And that was -- do you recall who
21 attended that meeting?

1 A. I don't recall with certainty. I could
2 estimate who I think would be there, but I can't say
3 with certainty.

4 Q. That's okay. That's okay.

5 And before we go to -- I'll refresh you
6 with a document, but before we go there, who is
7 Dr. Patrick Romano?

8 A. So Dr. Patrick Romano is one of the Hospital
9 Safety Grade expert panelists.

10 Q. And what's his background?

11 A. He is a physician and health services
12 researcher at the University of California, Davis.

13 Q. And fair to say he's an expert in something?

14 A. He is.

15 MS. LAWSON: Object to form but go ahead.

16 THE WITNESS: Yeah. He would be perceived as
17 being an expert in quality measurements in healthcare.

18 BY MR. CRAIN:

19 Q. And have you worked with him for a long time?

20 A. Yes, I have.

21 Q. Did you work with him in the early days when

1 the safety grade was being developed?

2 A. Yes.

3 Q. And was he involved in the development of the
4 first imputation model around 2020, 2021?

5 A. We worked with Dr. Romano in thinking through
6 different options for the imputation.

7 Q. Okay. And do you know how long Dr. Romano has
8 been involved in any capacity with Leapfrog?

9 THE COURT REPORTER: I'm sorry. We just lost
10 connection.

11 MR. CRAIN: Should we go off?

12 THE COURT REPORTER: Could we?

13 MR. CRAIN: Can we go off the record.

14 THE COURT REPORTER: Just one quick second.

15 THE VIDEOGRAPHER: This marks the end of media
16 unit number four. We're going off the record. The time
17 is 12:58 p.m.

18 (Whereupon, the proceedings paused due to
19 technical difficulty, after which the
20 proceedings continued as follows:)

21 THE VIDEOGRAPHER: This marks the beginning of

1 media unit number five. We're going back on the record.

2 The time is 1 o'clock p.m.

3 BY MR. CRAIN:

4 Q. Great. Okay. We're back after a technical
5 glitch, and I'm going to ask the question that we
6 started before.

7 So was Dr. Romano involved in the
8 development of the first imputation model around
9 2020/21?

10 A. He was. To clarify, that wasn't -- it depends
11 on your definition of what is an imputation model. We
12 had had other imputation approaches prior to '20 to '21.

13 Q. Fair enough.

14 Was he involved in the development of that
15 model in --

16 A. Yes. He helped provide input and guidance.

17 Q. Okay.

18 MS. LAWSON: And just make sure that Mr. Crain
19 has finished his question, yes.

20 BY MR. CRAIN:

21 Q. And I think I had asked during the technical

1 glitch, so I'll make sure we get it, how long has
2 Dr. Romano been involved with Leapfrog?

3 A. Since 2011.

4 Q. Okay. So he came on after you joined or after
5 you got involved with Leapfrog, let's say?

6 A. He was part of the Hospital Safety Grade expert
7 panel that was formed in 2011.

8 Q. When the safety grade was originally being
9 developed?

10 A. Correct.

11 Q. Okay.

12 MR. CRAIN: Okay. So I'm going to mark as
13 Exhibit 14...

14 (Exhibit No. 14 was marked for
15 identification as of 9/25/2025.)

16 BY MR. CRAIN:

17 Q. Dr. Austin, do you see this is an
18 Armstrong-produced document?

19 A. Yes.

20 Q. And it's an email from you to you. Do you see
21 that?

1 A. Correct.

2 Q. Does this reflect notes that you took on
3 April 12th, 2024?

4 A. It reflects --

5 Q. I'll direct you to the subject matter, the
6 subject of the email.

7 A. Yes. It was my notes from the Hospital Safety
8 Grade expert panel meeting.

9 Q. And do you have a practice of sending yourself
10 notes over email?

11 A. I do.

12 Q. Okay. So this is a true and accurate, to the
13 best of your knowledge, copy of your notes from that
14 day?

15 A. Yes.

16 Q. Okay.

17 And on the top, it says: "Patrick
18 recommend keep Step 1." Do you see that?

19 A. Yes.

20 Q. Does that refresh your recollection of whether
21 you had a meeting with Dr. Romano on April 12th?

1 A. As I mentioned, I know we met with Dr. Romano
2 around that time because he was unable to make the
3 primary call, but I don't remember the exact timing of
4 when that was.

5 Q. Okay.

6 Do you -- is it correct that these bullets
7 one, two, and three below, "Patrick recommend keep Step
8 1," reflect your notes from the discussion with
9 Dr. Romano?

10 A. That would be likely to be true, yes.

11 Q. Okay. You don't have a specific memory, but
12 that's what the document --

13 A. Correct.

14 Q. -- indicates?

15 A. Yes.

16 Q. Okay. Again, just let's try not to talk over
17 each other.

18 Okay. And then the remainder of this
19 email, just going down, do those reflect your notes from
20 the subsequent expert safety grade panel meeting later
21 that day?

1 A. Yes.

2 Q. Okay.

3 That's all we need to talk about with this
4 document. You can set it aside.

5 MR. CRAIN: Now, I want to go to another
6 document. This will be 15, tab 34.

7 (Exhibit No. 15 was marked for
8 identification as of 9/25/2025.)

9 BY MR. CRAIN:

10 Q. And you will see on the bottom this was a
11 deposition exhibit from Ms. Campione as well. Do you
12 see that blue sticker?

13 A. Yes.

14 Q. Okay.

15 So the top email is from you to
16 Ms. Campione, Ms. Danforth, and Ms. Joshi. Do you see
17 that?

18 A. Yes.

19 Q. And I want to just go through -- if we could
20 start at the bottom, which is the first email, this will
21 be page -- if you could go to page 8331, the second to

1 the last page to orient. Good? Are you there?

2 A. Can you repeat that, please?

3 Q. Sorry.

4 Can you go to page 8331, the second to the
5 last page.

6 A. Yes.

7 Q. Okay.

8 And there's an email from Ms. Campione to,
9 among others, you at 12:17 p.m.?

10 A. Yes.

11 Q. And the subject is imputation changes. Do you
12 see that?

13 A. Yes.

14 Q. So Ms. Campione writes to you and others, "Hi
15 all, please find the table we discussed below. I also
16 included the underlying issues. Please feel free to
17 edit the response to this email." Do you see that?

18 A. Yes.

19 Q. Okay.

20 Do you have a recollection of her sending
21 this email?

1 A. I do remember seeing that table at the bottom
2 of the email, but I didn't remember the context of the
3 email.

4 Q. Do you remember seeing it from back then? Do
5 you remember from seeing it more recently?

6 A. I -- in showing this to me today, I very
7 distinctly remember her sending an email with this
8 table.

9 Q. Okay. Do you remember -- and you said you
10 don't remember the context. Do you remember anything
11 about why she sent it?

12 A. I would guess, based on what's here, it was to
13 sort of further refine a potential direction that we
14 would go for the imputation models.

15 Q. And this was about 10 days after the expert
16 panel meeting, right?

17 A. Correct.

18 Q. Okay.

19 So I want to just go through this chart a
20 little bit just to make sure we're on the same page.
21 Are you looking at the chart on 8332?

1 A. Uh-huh.

2 Q. Okay. So "no change" is the left-most column.
3 Do you see that?

4 A. Yes.

5 Q. And that's -- is it right that's basically the
6 model you had, right, at the time?

7 A. Correct.

8 Q. "Small change" says: "Shorten imputation to
9 past two rounds for Step 1." Do you see that?

10 A. Yes.

11 Q. Is that what you ultimately did, or is it
12 "moderate change" that Leapfrog ultimately imposed?

13 A. Are you asking about recent survey
14 participants?

15 Q. I'm asking -- yeah, I'm asking about Step 1 for
16 recent survey participants. I'll walk you through it.
17 I'll build it a little more clearly.

18 Under "small change" for Step 1, it says:
19 Shorten imputation to two past rounds. Do you see that?

20 A. Uh-huh.

21 Q. Does that reflect, to the best of your

1 understanding, an imputation of a historical score in
2 the past two rounds of the hospital survey?

3 A. Can you repeat that again, please?

4 Q. Yeah.

5 To the best of your understanding, does
6 this column, does this "small change" box in Step 1
7 reflect that you would propose to impute the historical
8 score for a nonparticipating hospital for the past two
9 rounds of the hospital survey? Am I reading that right?

10 A. That is not exactly my understanding.

11 Q. Okay. Can you give me your understanding?

12 A. Yeah. My understanding is what's being
13 proposed is for hospitals that have recently completed
14 the survey, how far of a lookback would we do to see if
15 there was a recent survey.

16 Q. Got it. And was that different from what I
17 said because I said nonparticipating hospitals?

18 A. Correct.

19 Q. Yeah, okay. Let me fix that. That's a fair
20 point.

21 For hospitals that are not participating

1 every year, is that a more apt understanding of what the
2 Step 1 is?

3 A. I would frame it as hospitals that have not
4 submitted the most recent hospital survey.

5 Q. Got it. But for which there exists a
6 historical survey response?

7 A. Correct.

8 Q. Okay.

9 So on the top in Step 1, small change, you
10 go back to the two past rounds of the survey, right?

11 A. That is what's being proposed under small
12 change.

13 Q. Then moderate change is you shorten imputation
14 to one past round, right?

15 A. Correct.

16 Q. And is that what you testified earlier -- is
17 that what ultimately Leapfrog did for Step 1?

18 A. I would have to defer to the methodology --

19 Q. Okay.

20 A. -- document on how that gets phrased or framed.

21 Q. Okay.

1 What do you think is the difference?

2 A. Difference from what?

3 Q. What's your hesitation as to why this is not
4 the same thing as you understand Leapfrog is doing today
5 for Step 1?

6 A. I guess I'm a little unclear on what moderate
7 change would actually be. So that's where I'm now sort
8 of second-guessing like, well, did we implement moderate
9 or did we implement small change?

10 Q. Okay.

11 A. My understanding, putting the words aside, is
12 that what we moved to was the ability for a hospital --
13 we would look back and see if a hospital submitted a
14 survey last year --

15 Q. Got it.

16 A. -- and if we did, we would use that.

17 Q. Okay.

18 A. But we wouldn't go any further back than that.

19 Q. Okay.

20 A. So I don't know how that translates into these
21 exact words.

1 Q. Okay.

2 I mean, I would read one past round to be
3 last year, but I don't know if that's right. You're not
4 sure about that either?

5 A. I'm not sure about that either.

6 Q. Okay.

7 Okay. And then "drastic change" is
8 eliminate Step 1. Do you see that?

9 A. Yes.

10 Q. And that you did not do, right?

11 A. Correct.

12 Q. But that was the proposal at the April 12th
13 meeting, to retire Step 1?

14 MS. LAWSON: Object to form.

15 THE WITNESS: The proposal that we introduced
16 at the Hospital Safety Grade expert panel meeting was to
17 eliminate Step 1.

18 BY MR. CRAIN:

19 Q. Yeah. Okay.

20 Now, in Step 2, if you could just go -- I
21 don't know if you feel more comfortable walking me

1 through it, or I could walk you through it, but Step 2,
2 the no change, it says: "Impute with the mean of first
3 time scores for their cohort." Do you see that?

4 A. Yes.

5 Q. And is that a no change, or is that sort of an
6 adaptation? I had understood the Step 2 to be the mean
7 of first time versus the mean of the cohort generally,
8 right?

9 A. At the time, the nonsurvey -- so Step 2 was --
10 yes, it was the lower of the mean of either first time
11 respondents or the mean of the cohort.

12 Q. Yeah, okay. So slightly different from what
13 the no change says here, right?

14 A. Correct.

15 Q. Okay.

16 And that small change -- there's a no
17 change, which is interesting. Do you see that?

18 A. Correct.

19 Q. Okay.

20 And then moderate change says: "Assign
21 hospitals to the bottom quartile or several standard

1 deviations below the mean." Do you see that?

2 A. Yes.

3 Q. Now, we saw in the transcript that we looked at
4 in the notes the discussion of the lowest quartile. Is
5 this what that's referring to, to the best of your
6 understanding?

7 MS. LAWSON: Object to form.

8 THE WITNESS: I would need to re-review the
9 transcript to refresh myself on what exactly the
10 conversation was about lowest quartile.

11 BY MR. CRAIN:

12 Q. Okay. I'm trying to think should we do that.
13 Would you like to do that? I'm happy to take you back
14 to it unless you have an understanding.

15 A. I don't have -- I mean, I saw in the
16 transcript there was conversation about lowest quartile.

17 Q. Yeah.

18 A. And there's, obviously, conversation here about
19 bottom quartile. I don't know if those two
20 conversations are the same thing. That's what I don't
21 know.

1 Q. Okay. So you don't have an independent
2 recollection of whether this column comes from the
3 discussion of the expert panel meeting or not?

4 A. Correct. I do not have an independent
5 recollection.

6 Q. Okay.

7 And then on the last one, the drastic
8 change, it says: "Impute with limited achievement
9 scores," right?

10 A. Correct.

11 Q. Okay.

12 And, again, we looked at the index, and
13 there was no discussion of limited achievement, right,
14 at least based --

15 MS. LAWSON: Object to form.

16 BY MR. CRAIN:

17 Q. At least based on the index?

18 MS. LAWSON: Object to form.

19 THE WITNESS: Correct. There was no use of
20 that explicit term.

21 BY MR. CRAIN:

1 Q. Yeah.

2 And there was no use of the term
3 willingness, as in willingness to report, right?

4 MS. LAWSON: Object to form.

5 THE WITNESS: Correct.

6 BY MR. CRAIN:

7 Q. Okay.

8 And in the index at least, when we looked
9 at the word "zero," there was no discussion of anybody
10 proposing that nonparticipating hospitals should get
11 zero in Step 2, right?

12 MS. LAWSON: Object to form. Go ahead.

13 THE WITNESS: Correct.

14 BY MR. CRAIN:

15 Q. Okay.

16 So let's go up a little bit on this box.
17 And you respond, do you see that, 12:27 p.m.?

18 A. I --

19 Q. I can give you a page number if you need it.

20 A. I do -- yep.

21 Q. Got it?

1 A. Yep. I do, yes.

2 Q. And you said, "Alex, this looks great. I'm
3 wondering do we, one, want to reflect that we're
4 already" -- doing -- "using" -- sorry -- "drastic change
5 for Step 2 for IPS? And, two, do we want to use a
6 different term for drastic change, like large change?"

7 Do you see that?

8 A. Yes.

9 Q. So just breaking that down, number one, can you
10 tell me what you understood yourself to mean when you
11 said: Do we want to reflect that we're already using
12 drastic change for Step 2 for IPS?

13 A. So as I remember it, we had already moved
14 imputation for IPS to be limited achievement.

15 Q. And when did that come about?

16 A. I don't remember exactly.

17 Q. Okay. And do you remember the basis?

18 A. The basis is we actually had information from
19 CMS, Centers for Medicare and Medicaid Services, that
20 could tell us whether a hospital operated an ICU. And
21 if they operated an ICU, and they had not submitted

1 information to the Leapfrog Hospital Survey about their
2 staffing, we were coming to the conclusion that they
3 didn't meet the staffing model that Leapfrog requires.

4 Q. Got it.

5 So you made the assumption based on the
6 existence of an ICU that they were performing at a level
7 of limited achievement?

8 A. To clarify, I'm not sure we were making an
9 assumption. We were -- we had a lack of information
10 about their staffing models. That would be the
11 equivalent of assigning limited achievement.

12 Q. Got it.

13 And is that, to your knowledge,
14 communicated anywhere on the Leapfrog website to
15 consumers?

16 A. I don't know.

17 Q. Okay.

18 Is that communicated in the methodology
19 document, that that's why Leapfrog assigns limited
20 achievement for IPS for nonparticipating hospitals?

21 A. I don't know for certainty.

1 Q. Okay. Do you want to take a look?

2 A. I can.

3 Q. I'm happy to take you there. That's Exhibit 3.

4 A. That sounds correct.

5 Q. I wrote them down today.

6 A. If my memory serves me right.

7 Q. Do you have it, Dr. Austin?

8 A. I do.

9 Q. And if you go to page 10, it talks about the
10 IPS model -- or the measure.

11 MS. LAWSON: This is for Spring 2025?

12 MR. CRAIN: Correct.

13 BY MR. CRAIN:

14 Q. The IPS, as you testified a minute ago, I
15 think, did not change, right, the imputation
16 methodology?

17 A. That was my comment back to Alex.

18 Q. Okay. Yeah.

19 But to the best of your recollection today,
20 between 2024 and 2025, Step 2 for IPS was always limited
21 achievement, right?

1 A. Correct.

2 Q. Okay.

3 So are you on page 10?

4 A. I am.

5 Q. Okay. So just take a look and read the IPS
6 block.

7 A. Yep. I have, yes.

8 Q. And does it provide any explanation, the
9 explanation you just gave for why hospitals receive
10 limited achievement if they don't participate in the
11 survey?

12 A. You would need to follow the last line that
13 says if a hospital didn't submit a survey, you need to
14 look at using secondary data sources.

15 Q. Okay. Let's go to that page. That's page 15?
16 Take a look. And it's on 15 and 16?

17 A. Yes.

18 Q. Yeah. Is there an explanation there?

19 A. On page 16 there is.

20 Q. Let's see. Where is it?

21 A. Note about IPS: Only hospitals that operate an

1 adult or pediatric medical and/or surgical or neuro ICU
2 are eligible for Step 2 imputation of the IPS measure.
3 A hospital's ICU designation is determined from the
4 number of beds reported on Worksheet 5-3 Part 1 of the
5 hospital's most recent CMS cost report. If your
6 hospital does not operate an ICU but shares a CMS
7 certification number, please contact the help desk.

8 Q. Sorry. I see that on page 15. You see it on
9 16?

10 A. I see it on 16.

11 MS. LAWSON: I also see it on 16.

12 THE WITNESS: Under Step 2.

13 BY MR. CRAIN:

14 Q. Step 2. Okay.

15 And your testimony is that language
16 communicates that if a hospital has an ICU and doesn't
17 participate, it automatically gets limited achievement?

18 A. That is the first sentence under Step 2.

19 Q. Okay.

20 A. If the hospital does not have historical data
21 from the last two rounds of the safety grade, the

1 hospital is assigned a point value that is equivalent to
2 receiving limited achievement for this measure on the
3 Leapfrog Hospital Survey.

4 Q. And so what you testified a minute ago, though,
5 was that the -- tell me if I'm misunderstanding -- that
6 the assumption is if a hospital has an ICU and is not
7 reporting, it's not meeting Leapfrog's standards, right?

8 A. We have assigned a score to hospitals. If we
9 know they operate an ICU based on the CMS cost report,
10 and they don't report to the Leapfrog Hospital Survey,
11 we are assigning them a score of limited achievement.

12 Q. Yes, but that was not directly responsive to my
13 question which was -- and I'll go back just to make sure
14 I say it the right way.

15 What you said a minute ago was that the
16 assumption is that if a hospital has an ICU, and they
17 are not reporting, that they are not meeting Leapfrog's
18 standards, right? That's what you said.

19 A. Correct. And then I corrected myself and did
20 not use the word "assumption." That was a poor choice
21 of word there.

1 Q. Okay. That's what I'm trying to understand.

2 A. Correct.

3 Q. Okay.

4 So maybe you tell me in your words then,
5 because now I'm a little confused by the change, why
6 does a hospital get assigned limited achievement if it
7 has an ICU and does not participate?

8 A. They receive a score of limited achievement
9 because we know they have an ICU, and we don't have any
10 information that would tell us whether or not they are
11 meeting the staffing models that Leapfrog asks hospitals
12 to have in the ICU.

13 Q. So why not impose some achievement and not
14 limited achievement?

15 A. Because the way Leapfrog's standards are set in
16 the survey is there are clear criteria of what needs to
17 be met for some achievement, considerable achievement,
18 and achieved the standard. And if you don't meet the
19 criteria for some achievement, you're in the limited
20 achievement bucket.

21 Q. But, again, you don't know either way whether a

1 given hospital is meeting some versus limited or -- I
2 forgot -- the top one, right?

3 A. Correct.

4 Q. Okay.

5 Okay. So let's go back to this document.
6 So that covers IPS Step 2.

7 The second part says, "Do we want to use a
8 different term for drastic change like large change?"
9 Why did you not like the phrase "drastic change"?

10 MS. LAWSON: Object to form.

11 BY MR. CRAIN:

12 Q. Did you not like the word "drastic change"?

13 A. I did not like the word "drastic change."

14 Q. With that now established, why did you not like
15 the phrase "drastic change"?

16 A. I'm trying to think. It felt -- it felt
17 sensational.

18 Q. Okay. What do you mean by sensational?

19 A. I personally think of the word "drastic" as
20 having sort of a sensational connotation, right. It's
21 extreme.

1 Q. Got it. Dramatic?

2 A. Dramatic. That would be a better word.

3 Q. We work with words for a living.

4 MS. LAWSON: I struggled not to interpose my
5 own.

6 BY MR. CRAIN:

7 Q. So did you feel dramatic was inaccurate or it
8 was a problem with the messaging and how it might be
9 received?

10 A. My concern was the messaging and how it would
11 be received.

12 Q. Okay.

13 MR. CRAIN: Oh, I'm sorry. Iason tells me I
14 said dramatic. No, I meant dramatic.

15 MR. TOGIAS: Oh, you meant it?

16 MR. CRAIN: Yeah.

17 MR. TOGIAS: Okay. Sorry.

18 MR. CRAIN: I meant dramatic.

19 BY MR. CRAIN:

20 Q. Let's see. Okay. So let's keep going up. Let
21 me see if there's anything else here. So you see the

1 chart is revised on page 8330?

2 A. Yes.

3 Q. And that, as best I can tell, is just changing
4 to reflect the limited achievement, you know, for IPS,
5 right?

6 MS. LAWSON: And Dr. Austin, you can read --
7 feel free to read through the whole email chain if you
8 need that to refresh your recollection.

9 (Witness peruses document.)

10 THE WITNESS: Can you repeat your question,
11 please?

12 BY MR. CRAIN:

13 Q. Yeah. I'm just looking at 8330, and it looks
14 like the change on the chart is just as you noted
15 before, that IPS was already doing the impute limited
16 achievement.

17 A. Correct.

18 Q. So there's no change there, right?

19 A. That is the only change from the prior chart.

20 Q. Yeah. Sorry. There's no change to IPS under
21 this chart?

1 A. Correct.

2 Q. Yeah.

3 Okay. Let's set this aside. Keep it at
4 the ready.

5 MR. CRAIN: Can I get 36. I'll mark this as
6 Exhibit 16.

7 (Exhibit No. 16 was marked for
8 identification as of 9/25/2025.)

9 BY MR. CRAIN:

10 Q. So Dr. Austin, do you recognize this document?

11 A. Yes. It's an email between myself and Leapfrog
12 staff.

13 Q. You get the hang of it now, these documents.

14 And you see on the bottom right it's an
15 Armstrong-produced document, right?

16 A. Correct.

17 Q. Okay. I want to start -- just go to the bottom
18 again to the first email in the chain, and if you need a
19 minute, take it. Whenever you're ready.

20 (Witness peruses document.)

21 THE WITNESS: Yes.

1 BY MR. CRAIN:

2 Q. Okay.

3 So the first email on the bottom is from
4 Ms. Campione, and it's to Ms. Danforth, you, and
5 Ms. Joshi. Do you see that at 5:41 p.m.?

6 A. Yes.

7 Q. And the subject is Step 2 imputation scores.
8 Do you see that?

9 A. Yes.

10 Q. And she says, "Hi all. I have some bad/good
11 news. The Step 2 scores aren't what we would like.
12 Turns out the hospitals that do the survey perform very
13 well. The BCMA scores below will likely drop with the
14 methodology changes, though."

15 Do you see that?

16 A. Yes.

17 Q. Do you have any understanding today of what she
18 meant by the Step 2 scores aren't what we would like?

19 MS. LAWSON: Object to form. Go ahead.

20 (Witness peruses documents.)

21 THE WITNESS: Where I'm hesitating is my sense

1 is she was looking at a subset of hospitals, and I don't
2 remember what that subset of hospitals was.

3 BY MR. CRAIN:

4 Q. Okay.

5 Do you remember the purpose of her running
6 that subset?

7 A. My recollection is it's somehow connected back
8 to conversations with the expert panel about imputation
9 and one of the scenarios that maybe someone suggested we
10 look at, but I couldn't explicitly say which scenario
11 that was.

12 Q. So we talked a little bit about quartile,
13 right? Do you remember that discussion?

14 A. Uh-huh.

15 Q. If you look at the chart right below her text,
16 do you see it says Mean of Bottom Quartile?

17 A. Yes.

18 Q. Okay. And it says the CPOE, hand hygiene, and
19 BCMA scores. Do you see that?

20 A. Yes.

21 Q. And I'll work you up the email now.

1 (Whereupon, the court reporter seeks
2 clarification, which colloquy will not be
3 captured on the written record.)

4 BY MR. CRAIN:

5 Q. Let's go up. You respond. Do you see that?

6 A. Yes.

7 Q. And you say, "Alex, would it be easy to look at
8 the same for first time reporters? We may have to
9 consider the option of just assigning the score for
10 limited achievement, which is actually consistent with
11 how we are approaching IPS."

12 Do you see that?

13 A. Yes.

14 Q. Okay.

15 Does this refresh your recollection as to
16 what she was running and why she was doing this?

17 A. Not really.

18 Q. Okay. It doesn't have to. That's okay.

19 A. Okay.

20 Q. Okay. So she responds it looks like five
21 minutes later. She says, "Not too difficult. I would

1 predict they're just slightly lower." And then you
2 respond at the top, "Thanks. Then maybe not worth the
3 effort."

4 Do you see all of that?

5 A. Yes.

6 Q. Okay.

7 Do you have any recollection today about
8 why you would say it's not worth the effort?

9 A. What I interpreted from Alex's statement was
10 that the results wouldn't be much different than what
11 she had originally produced.

12 Q. And the -- go ahead. Sorry.

13 A. So it didn't seem worth the analytical effort
14 to update it for something that wasn't meaningful
15 different -- meaningfully different in terms of Leapfrog
16 deciding how it wanted to move forward.

17 Q. And meaningfully different in this case meaning
18 lower, right?

19 A. Correct. She indicated that they would be
20 slightly lower.

21 Q. And you all wanted the numbers to be lower,

1 right?

2 MS. LAWSON: Object to form.

3 BY MR. CRAIN:

4 Q. You can answer.

5 A. There were concerns that the mean scores that
6 we had been using for imputation had been going up
7 considerably which created a disincentive for hospitals
8 to actually complete the survey.

9 Q. Yes. We saw that in the safety grade meeting,
10 right, that there were concerns that imputation scores
11 were creeping up?

12 A. That was one of the noted -- yeah.

13 Q. Right. On the slide that you drafted.

14 A. Correct.

15 Q. That was one of the bullets, right?

16 A. Correct.

17 Q. And in response to that, we saw that
18 Dr. Pronovost suggested a quartile approach, right?

19 MS. LAWSON: Object to form.

20 THE WITNESS: Once again, I -- in reading the
21 transcript, it wasn't super clear what Peter was exactly

1 discussing or suggesting.

2 BY MR. CRAIN:

3 Q. Let me phrase it a little bit differently that
4 I hope will be easier.

5 At the expert panel meeting, in the
6 transcript we saw him say the word "quartile." Fair?

7 A. Fair.

8 Q. Okay.

9 And then 10 days later -- let me just
10 double check. More than 10 days later we have
11 Ms. Campione sending around a chart that lays out, among
12 other things, the mean of bottom quartile. Do you see
13 that? That's on the last page.

14 A. Yes.

15 Q. Okay.

16 But the numbers are too high there, right?

17 MS. LAWSON: Object to form.

18 THE WITNESS: I don't know how to respond to
19 that. I mean, all of the data are here.

20 BY MR. CRAIN:

21 Q. So let's go to Ms. Danforth's email of

1 9:11 p.m. This is on page 2128. Do you see it?

2 A. Uh-huh.

3 Q. She said, "This is sort of what I was afraid of
4 but somehow more stark seeing the actual numbers. I do
5 think that we need to at least go wider" -- which I
6 understand to mean consider -- "going to limited
7 achievement." Do you see that?

8 A. Yes.

9 Q. Okay.

10 Do you understand what she is saying in
11 this email?

12 A. My understanding is she was indicating that the
13 numbers aligned with what she thought might be the case
14 and was recommending that we need to consider going to
15 limited achievement.

16 Q. Okay.

17 So just to build this out a little bit, at
18 this time, under the methodology that was governing, the
19 imputation under Step 2 was a straight mean, not a
20 lowest quartile mean but a straight mean, right? Do you
21 understand what I mean?

1 A. It was a -- there were two values that were
2 calculated for each hospital. There was the overall
3 mean and I believe that of -- the first time reporters
4 in the hospital got the lower of those two values.

5 Q. And the concern was those means were too high,
6 right?

7 A. The concern was that those means
8 disincentivized hospitals to report into the survey.

9 Q. Yes. Okay. Because they were too high, right?

10 A. Because they would give hospitals a lot of
11 credit when they wouldn't have to necessarily
12 demonstrate anything for that.

13 Q. Okay.

14 And you say when they wouldn't have to
15 demonstrate anything for that, but do you have any
16 empirical knowledge of whether that credit, so to speak,
17 would have been due as a matter of performance?

18 A. We don't have any empirical evidence on what a
19 hospital's performance would be when they don't report
20 because we don't actually have those data.

21 Q. On the measures for which you don't have data,

1 right? What I mean is you have other data, like CMS
2 data for those hospitals?

3 A. Correct.

4 Q. That's all I meant.

5 So then Ms. Campione runs a different mean,
6 right? The mean in this email is not the mean that you
7 all had been imputing as a part of Step 2 in the prior
8 methodology. Is that right?

9 A. My understanding is the very bottom table --

10 Q. Uh-huh.

11 A. -- where it says current Step 2 means for
12 reference are what the means had been that we were using
13 at the time.

14 Q. Okay.

15 And so but the mean in the top part where
16 it says the Mean of Bottom Quartile, am I understanding
17 right that that's taking the bottom quartile of
18 hospitals and calculating the mean of those hospitals?

19 A. That's what I don't know was what sample of
20 hospitals she was using for that calculation. I don't
21 know if it was all hospitals or if it was a subset of

1 hospitals.

2 Q. Okay.

3 So how would it work to calculate the mean
4 of bottom quartile for all hospitals?

5 A. I would take the full dataset of hospitals for
6 which we have data, identify the bottom 25 percent, and
7 calculate the mean of that sample.

8 Q. Okay. And do you have any reason to think
9 that's not what she did?

10 A. I don't have any reason to think it's not what
11 she did, but I also don't know that is what she did.

12 Q. Okay. Okay.

13 Okay. So we can set that aside.

14 MR. CRAIN: Okay. Let's go to tab 38. This
15 will be Exhibit 17.

16 (Exhibit No. 17 was marked for
17 identification as of 9/25/2025.)

18 BY MR. CRAIN:

19 Q. Okay. Dr. Austin, you have Exhibit 17, and you
20 see on the bottom it's an Armstrong document ending
21 16473?

1 A. Yes.

2 Q. And this is an email thread between you and
3 Ms. Joshi, right?

4 A. Yes.

5 Q. And this, if you look at the bottom two emails
6 on the first page, that's the emails we saw at a prior
7 exhibit where she's sending you her draft of the notes,
8 right?

9 A. Yes.

10 Q. Okay. And you say -- this is on May 14th. Do
11 you see that date?

12 A. Yes.

13 Q. So it's a few days after the email we just
14 looked at, which was dated April 22nd. Do you see that?

15 A. Yes.

16 Q. Okay. So this is after you've gone through the
17 analysis of the bottom quartile mean. It's after you've
18 gone through that email thread we just saw, right?

19 A. Yes.

20 Q. Okay.

21 In between that period of April 12th and

1 now May 14th, do you recall any other discussions you
2 had with members of the expert panel about the
3 imputation model?

4 A. I don't remember.

5 Q. Okay. You don't -- just to be clear, you don't
6 remember either way?

7 A. I don't remember either way.

8 Q. Okay.

9 So I want to go to the Word document here
10 of the attachment. And do you see -- is it -- these are
11 your revisions to the notes, correct?

12 A. Yes.

13 Q. And I want to walk through a few of these. You
14 start by at the top adding Tim Vogus to the attendees?

15 A. Yes.

16 Q. Any idea how you remembered he was there a
17 month later?

18 A. To be clear, I sent the edits back to Preeti a
19 month later.

20 Q. That's what the email suggests. If you look --
21 look on page 1.

1 A. But that doesn't mean I made the edits a month
2 later.

3 Q. Oh, so I'll represent to you that the metadata
4 shows that these are your changes.

5 A. Okay.

6 Q. I'm trying to see if there is a comment, too.
7 No. But I'll represent to you that the attachment shows
8 that you -- like you inserted the track changes.

9 Do you have any reason to think you didn't?

10 A. No. I'm wondering about the timing of when I
11 made the edits.

12 Q. Got it. Okay. That I don't know as well. So
13 you're saying you could have made these edits earlier?

14 A. Correct.

15 Q. Got it. Okay.

16 Do you recall, to do these edits, did you
17 watch the video of the meeting?

18 A. No.

19 Q. Okay. So you were going from memory, you
20 think?

21 A. Yes, and my own notes.

1 Q. And your own notes. And your own notes, would
2 they have been different from the email we saw earlier
3 where you sent it to and from yourself?

4 A. No. That was the extent.

5 Q. So I'm going to skip bullet one, which is on
6 the military treatment facilities again, and I want to
7 focus on your edits to bullet two. Do you see those?

8 A. Yes.

9 Q. Okay. And you say, "Matt provided the expert
10 panel with a quick overview of the current imputation
11 model approaches Leapfrog has been using and some of the
12 challenges those approaches have created for issuing
13 accurate grades." Do you see that?

14 A. Yes.

15 Q. Okay. And to the best of your recollection,
16 that is an accurate statement of what occurred at the
17 meeting, right?

18 A. Yes.

19 Q. Okay.

20 Then you say, "The current imputation model
21 has two steps when data are missing." Do you see that?

1 A. Yes.

2 Q. And I won't read them because we've been
3 through them, but just looking yourself at Step 1 and
4 Step 2, consistent with the slide deck that we saw?

5 A. Yes.

6 Q. And then you say, "Leapfrog's proposal was to
7 retire Step 1 of the model and use only Step 2,
8 assigning hospitals the mean score for their cohort."
9 Do you see that?

10 A. Yes.

11 Q. And then I want to skip down a bullet that you
12 delete. Do you see that?

13 A. Yes.

14 Q. And it says, "Missy gave an example of Stewart
15 Health System and said that Leapfrog's purpose by
16 implementing the Step 2 imputation model is not to
17 penalize hospitals or to motivate them to submit a
18 survey, but they don't want to report hospitals with the
19 highest scores when hospitals are not submitting the
20 hospital survey."

21 Do you recall why you deleted that bullet?

1 A. I believe I deleted that bullet because it felt
2 like a little too micro of a note to include in a
3 meeting summary.

4 Q. Got it. So it was not an edit for substance?

5 A. Can you define that?

6 Q. Yeah. Fair enough.

7 Did you delete it because you disagreed
8 that anything -- with anything in that bullet?

9 A. No, that was not my reason for deleting it.

10 Q. Okay.

11 Then let's keep going. So you then go --
12 there's a bullet we looked at before. "Matt mentioned
13 it's important to see whether there is an actual
14 difference in hospitals' performance and whether there
15 is some sort of bias in the measurement against them.
16 He said to minimize the second, and if there are
17 differences in hospitals' performance, we can address
18 the structural issues to fix them."

19 Do you see that?

20 A. Yes.

21 Q. And you deleted that one as well, right?

1 A. Yes.

2 Q. And similar, not to be so granular in the
3 meetings?

4 A. Yes.

5 Q. And then you added a bullet and you say, "The
6 experts' panel were in support of having hospitals share
7 their current performance, so liked the idea of imputing
8 the equivalent of willing to report to hospitals that do
9 not submit a survey."

10 Do you see that?

11 A. Yes.

12 Q. Now, you recall looking at the index of the
13 transcript, right?

14 A. Yes.

15 Q. And we saw the phrase "willing" did not appear
16 at least in the index, correct?

17 A. Yes.

18 Q. Where did this line come from?

19 A. So as mentioned, I'm not sure the expert panel
20 would have necessarily used the term "willing to report"
21 in their conversation. I would need to go back to the

1 transcript, but my guess is that there was communication
2 about putting them in the lowest performance category.

3 Q. Okay. So the phrase you would be looking for
4 is lowest performance category?

5 A. Or some context of that.

6 Q. Okay. And presumably you would want to review
7 the whole thing before committing one way or another?

8 A. Correct.

9 Q. Fair enough.

10 Okay. So to the best of your
11 recollection -- so strike that.

12 When creating the notes, you would have
13 wanted to be accurate, right?

14 A. Correct.

15 Q. Okay. And so just looking at these notes and
16 your edits, your best understanding of these edits is
17 that at some point somebody discussed the concept of
18 giving them the willing to report grade, right?

19 A. Correct.

20 Q. Okay.

21 A. And that others agreed with that point of view.

1 Q. Okay.

2 And then just to go back, do you remember
3 the chart we looked at, the drastic change chart?

4 A. Yes.

5 Q. You want to look at it again just so we're
6 not -- and that is exhibit --

7 A. Fifteen.

8 Q. Fifteen. Let's look at 15. And we can go to
9 the last page, 18332. Do you see that?

10 A. Yes.

11 Q. Okay.

12 And is it your testimony that the bottom
13 right box is the same as this willing to report?

14 A. Yes.

15 Q. Okay. And the bottom right box says impute
16 with limited achievement scores, right?

17 A. Yes.

18 Q. So your testimony is that at the meeting at
19 least somebody discussed the notion of imputing limited
20 achievement scores, maybe not by that word, and that
21 others agreed, right?

1 MS. LAWSON: Object to form.

2 THE WITNESS: From my notes here, it indicates
3 that the expert panel supported the idea of assigning
4 the bottom performance category.

5 BY MR. CRAIN:

6 Q. Okay. And do you recall -- strike that.

7 Okay. You can set that aside.

8 MR. CRAIN: Let's go to tab 43. This is going
9 to be Exhibit 18.

10 (Exhibit No. 18 was marked for
11 identification as of 9/25/2025.)

12 BY MR. CRAIN:

13 Q. All right. This is an email. The top one is
14 from Ms. Binder to Ms. Campione, cc'ing you and
15 Ms. Danforth. Do you see that?

16 A. Yes.

17 Q. Okay. And do you recognize this document?

18 MS. LAWSON: You can take a minute to read
19 through it all.

20 THE WITNESS: The email or the --

21 BY MR. CRAIN:

1 Q. Let's start with the email. Do you recognize
2 the email?

3 A. Yes.

4 Q. Okay. You recall it today?

5 A. Can you clarify that?

6 Q. Yeah. Do you recall receiving it?

7 A. I do recall Alex putting together a document
8 with the proposed changes to the methodology that would
9 go out for public comment.

10 Q. And is that the document, at least in edited
11 form, on page 9813?

12 A. Yes.

13 Q. Okay. And do you recall did any members of the
14 expert panel review and revise the document?

15 A. I don't remember explicitly if we shared this
16 document with them.

17 Q. Yeah. Okay. I mean -- I'll move on from that.
18 I'll move on from that.

19 So the attachment, do you see it says
20 Request for Public Comment?

21 A. Yes.

1 Q. Do you recall reviewing the document?

2 A. I don't recall.

3 Q. Okay. Just your best answer. That's all we
4 ask.

5 So I want to go -- I'll represent to you on
6 page 9814 these are Ms. Binder's tracked change edits to
7 the documents, and I want to just note a few things that
8 she tweaked. So if you go to the second -- tell me when
9 you're ready. No worries.

10 MS. LAWSON: The font is so small.

11 MR. CRAIN: Yeah, it is small. Sorry about
12 that.

13 BY MR. CRAIN:

14 Q. Are you good, Dr. Austin?

15 A. Yes.

16 Q. Okay.

17 So if you go to the second paragraph, to
18 ensure, do you see that?

19 A. Yes.

20 Q. And I apologize. It's in black and white, too,
21 which makes it harder.

1 But go down to the third line. The
2 original text said: "The panel recognized that the
3 current imputation method, which is used to fill in
4 missing data among hospitals that did not complete the
5 most recent Leapfrog survey, have influenced hospital
6 survey participation and may no longer be valid."

7 Do you see that?

8 A. Yes.

9 Q. Okay. She changed it to: "The panel advised
10 that Leapfrog modify the current imputation method,
11 which is used to fill in missing data among hospitals
12 that did not complete the most recent Leapfrog survey."

13 Is that consistent with your recollection
14 of who was advising? Did the panel actually advise
15 Leapfrog to change the methodology?

16 MS. LAWSON: Object to form but go ahead.

17 THE WITNESS: The Leapfrog Group has full
18 decision-making authority around its ratings and rating
19 systems and methodologies. So myself and all of the
20 expert panels are acting in an advisory capacity to
21 Leapfrog for that.

1 BY MR. CRAIN:

2 Q. Okay.

3 So is this accurate, this change?

4 A. Yeah, that change would be accurate.

5 Q. Okay.

6 And then if we go down, I want you to look
7 at -- can you read what she cut in the next paragraph?

8 A. Yes.

9 Q. Okay. "Note that Step 1 imputation will be
10 temporarily paused" -- oh, sorry. That's not the one I
11 wanted.

12 Go back up, excuse me, to the prior
13 paragraph. She cut a sentence: "The collective
14 recommendation was for Leapfrog to modify its current
15 imputation approach to encourage survey participation
16 and to improve user's confidence in the data that are
17 used to calculate scores."

18 Do you see that?

19 A. Yes.

20 Q. Okay. Was that accurate?

21 MS. LAWSON: Just to be clear, you're asking

1 was the sentence that she struck, that the collective
2 recommendation, was that sentence accurate?

3 MR. CRAIN: Correct. Not the strike. I don't
4 want to know if the strike was accurate. I want to know
5 if the sentence as written was accurate.

6 THE WITNESS: Okay.

7 (Witness peruses document.)

8 THE WITNESS: Yes.

9 BY MR. CRAIN:

10 Q. Okay.

11 Now, I want to go to her email. And what
12 she says is -- are you at the top?

13 A. Yes.

14 Q. The second paragraph: "I don't think we need
15 the sentence about influencing survey participation and
16 giving people confidence in validity. It sounds
17 defensive, like nobody participates in the survey and
18 our own TEP questions our validity. Actually, this
19 change affects a minority of hospitals and optimizes the
20 grade's already strong validity. Anyway, it's not
21 necessary to get into the why. It's enough that the

1 expert panel advised us to do the imputation in a
2 different way and not treat older, better data in an
3 equivalent way to new data."

4 Do you see that?

5 A. Yes.

6 Q. Okay.

7 And then did you agree that it sounded
8 defensive -- that's my first question -- the changes
9 that she cut?

10 MS. LAWSON: Object to form.

11 I think, just to clarify, do you agree that
12 the sentence she cut sounded defensive?

13 MR. CRAIN: Correct.

14 (Witness peruses document).

15 THE WITNESS: That wouldn't be the word I would
16 use to describe that sentence.

17 BY MR. CRAIN:

18 Q. What word would you use?

19 A. Explanatory.

20 Q. Okay.

21 And do you agree -- I mean, she says it

1 sounds like nobody participates in the survey and our on
2 TEP questions our validity. Did you have that same
3 reaction reading it?

4 A. That wasn't my own read of that sentence.

5 Q. What was your read of the sentence?

6 A. That we wanted to improve confidence in the
7 data that we were using and the score.

8 Q. And to encourage participation?

9 A. That would be a byproduct of that change.

10 Q. How would that be a byproduct?

11 A. If we're no longer imputing the mean scores, it
12 might encourage some hospitals, specifically those that
13 are performing better than the mean, to actually come in
14 and share their performance. I take that back. They
15 would have been already incentivized to do that.

16 It would incentivize hospitals that didn't
17 report and were below the mean to come in and report.

18 Q. Because the new score would be lower than their
19 performance?

20 A. Correct.

21 Q. Okay. And the new score would not necessarily

1 reflect their actual performance?

2 A. It's undetermined whether it would reflect
3 their performance or not.

4 Q. Because you don't know either way?

5 A. Because we don't know, exactly, where each
6 hospital is at.

7 Q. Yes. Okay.

8 And then I want to go back to her email.
9 And she says, "I think when we respond to the public
10 comments, we can be more pointed and specific about the
11 survey and imputation reasoning, if necessary. The
12 comments will give us a good gauge on the extent to
13 which we need to reveal all our reasoning and whether
14 the expert panelists will truly stand up for it when
15 push comes to shove."

16 Do you see that paragraph?

17 A. Yes.

18 Q. What's your understanding of what she meant
19 here?

20 A. That the -- putting out the proposed changes
21 wasn't the time to share all of the logic which led to

1 the decision to propose this, that that could come out
2 during the responses to the comments.

3 Q. And do you have any understanding by what she
4 means of whether the expert panelists will truly stand
5 up for it when push comes to shove?

6 A. I believe she meant that there could be some
7 pushback from hospitals about this proposed change and
8 would the expert panel stand with Leapfrog in this -- in
9 moving forward in this direction.

10 Q. Had the expert panel ever not stood with
11 Leapfrog in a change to the methodology?

12 A. No.

13 Q. Okay. So any understanding as to why this
14 might be different?

15 A. This change was the most direct in confronting
16 hospitals about their lack of participation in the
17 survey.

18 Q. What do you mean by direct?

19 A. In the past, all the imputation models, from
20 ignoring the measure to using secondary data sources to
21 calculating, assigning you the national mean didn't

1 necessarily direct -- confront a hospital to say you're
2 not submitting data and that's a problem with us.

3 We gave them sort of a pass. We found
4 another way to give them a score. So this was the most
5 direct confrontation on that.

6 Q. Was that the goal of the change?

7 A. I think the goal was multifold.

8 Q. Okay.

9 A. I think one, as mentioned, was to improve the
10 confidence of the data in terms of what data we were
11 using to calculate the scores. A secondary goal was to
12 increase or incentivize survey participation.

13 Q. Okay.

14 And then the confidence of the data, how
15 does it improve the confidence of the data to
16 automatically assign nonparticipating hospitals limited
17 achievement on the four imputed measures?

18 A. In the framework of the idea being that if we
19 don't have any information about your hospital -- so the
20 historical use of willing to report, the idea was that
21 was to acknowledge hospitals who were willing to be

1 transparent but didn't meet the standards that Leapfrog
2 had set.

3 So we don't have -- can you repeat your
4 question again, please?

5 Q. Sure. Sure.

6 I said -- you said -- so you talked about
7 one goal was the confidence of the data, right, and what
8 I asked was how does it improve the confidence of the
9 data to automatically assign nonparticipating hospitals
10 limited achievement on the four imputed metrics?

11 A. So when we were calculating the national mean
12 for hospitals, we don't necessarily have any information
13 that that hospital is an average performer in that area.
14 We are assuming they are average, and in a normal
15 distribution, half of hospitals are below the average.

16 So because we don't know anything about the
17 hospital and their performance in that way, in some ways
18 this idea of willing to report actually better reflects
19 what we do know.

20 Q. Better -- okay.

21 So I want to go and look at -- let's get

1 concrete with this.

2 MR. CRAIN: So this is Exhibit 19.

3 (Exhibit No. 19 was marked for
4 identification as of 9/25/2025.)

5 BY MR. CRAIN:

6 Q. So Dr. Austin, do you recognize this page, at
7 least generally?

8 A. Yes.

9 Q. Okay. This is the Delray Medical Center
10 Hospital Safety Grade page, right?

11 A. Yes.

12 Q. Have you ever seen Delray in particular?

13 A. No.

14 Q. Okay. But you know generally the format of how
15 these pages work, right?

16 A. Yes.

17 Q. Okay. So it's not necessarily the best because
18 it's a paper, and you can see it on a website instead,
19 but you get the gist, right?

20 A. Yes.

21 Q. So I want to go down the page. You see at the

1 top it says big "F," right, for Delray?

2 A. Yes.

3 Q. Okay.

4 And I want to go to page 2. And so this is
5 specifically on the handwashing measure, right?

6 A. Yes.

7 Q. And if you go just back to page 1, and it's a
8 little hard to tell because -- but if you line up the
9 handwashing at the top of page 2 with the gas gauge, do
10 you see that?

11 A. Yes.

12 Q. And there's a red gas gauge above handwashing,
13 right? And then it says: The hospital's score is 15,
14 right?

15 A. Yes.

16 Q. And it says: Worst hospital's score is 15,
17 correct?

18 A. Yes.

19 Q. And then it says: What safer hospitals do.

20 And before I go into that, I just want to
21 clarify again. Did you have any role in editing this

1 website, not specific to Delray but the safety grade
2 pages, generally?

3 A. I did review and help edit the descriptions
4 that are -- the handwashing and what safer hospitals do.

5 Q. Okay. So you're familiar with this language?

6 A. Yes.

7 Q. Okay.

8 And it says: "What safer hospitals do.
9 Hospitals provide training and implement policies to
10 make sure all hospital staff cleans their hands before
11 touching a patient." Do you see that?

12 A. Yes.

13 Q. Okay.

14 Now, you said a goal of the new
15 methodology, the first goal was -- let me just go back
16 to what it was. It's confidence in the data, right?

17 A. Correct.

18 Q. How does putting Delray at a 15 for handwashing
19 give confidence in the data?

20 A. Once again, we don't have any information from
21 Delray Medical Center about how they are doing toward

1 meeting Leapfrog's standard for hand hygiene, and,
2 therefore, in the absence of information, we're going to
3 assign the equivalent of willing to report, which is now
4 limited achievement.

5 Q. Even though they're not willing to report,
6 right? Correct?

7 A. Correct.

8 Q. Yeah.

9 So how does a consumer looking at this
10 page, though, feel confidence that the grade is
11 accurate?

12 A. I haven't studied how consumers review and
13 interpret this information, so I don't know if I can
14 speak to how they would interpret this.

15 Q. You buy things, right?

16 A. I do.

17 Q. And do you look at consumer reports, other
18 ratings types for products?

19 A. Yes.

20 Q. Do you trust that the rating is accurate that
21 those reports provide?

1 MS. LAWSON: Object to form. Go ahead.

2 THE WITNESS: I think it depends on the source.

3 BY MR. CRAIN:

4 Q. Fair enough. Give me one that you trust.

5 A. I can't think of one offhand, but I'd be more
6 inclined to trust something that was an individual
7 reviewing products against similar products.

8 Q. Okay. I'm not sure I understood that, but can
9 you clarify? Sorry.

10 A. Yeah. Meaning like if I wanted to buy a new
11 coffee maker --

12 Q. Yeah.

13 A. -- I would be more inclined to trust someone
14 who has reviewed coffee maker A against B, C, and D --

15 Q. Okay. Got it.

16 A. -- than someone just chiming in about coffee
17 maker A and what their experience was.

18 Q. Okay. That's -- okay. We can work with that
19 one.

20 So my question is if you have coffee maker
21 -- in your first analogy, right, coffee maker A, B, C,

1 and D, he's reviewing them all. If you find out that
2 for a subset of the coffee makers he's giving you
3 information about the quality of the product without
4 actually having reviewed it, does that instill
5 confidence in you or no?

6 A. It might give me pause.

7 Q. And how is that different from what we see
8 here?

9 A. Can you clarify that question?

10 Q. Yeah. So you said it might give you pause if
11 for certain of the coffee makers the ultimate rating
12 included measures for which the reviewer didn't have any
13 information, right? How is that different from
14 handwashing for Delray?

15 A. So I think what's notable is that the score has
16 an asterisk, which explains, I believe, how that score
17 was arrived at.

18 Q. So we'll come to the asterisk in a second. I'm
19 trying to get a sense of you said one of the goals of
20 the new model was to instill confidence in the data.
21 And you said another goal was to encourage

1 participation, right? How does it instill confidence in
2 data to represent that a hospital got the lowest score
3 on hand hygiene when you have no information about their
4 performance otherwise? Doesn't that undermine
5 confidence in the data?

6 MS. LAWSON: Object to form.

7 MR. CRAIN: Two questions.

8 MS. LAWSON: Two questions.

9 BY MR. CRAIN:

10 Q. You can pick either one or I can restart,
11 either or.

12 A. Can you restart?

13 Q. Sure. So -- that's a fair ask.

14 So I want to understand how does it instill
15 confidence in data to represent that a hospital got the
16 lowest score in hand hygiene where this page says
17 hospitals that are safer provide training and implement
18 policies to make sure all hospital staff cleans their
19 hands before touching a patient. How does it instill
20 confidence in data to give a hospital the lowest score
21 on that metric with no information?

1 A. That's what we're representing here is that we
2 have no information. That's what the asterisk is
3 telling you is we have no information.

4 Q. Okay. So the asterisk, you're saying -- so
5 does the asterisk undermine the score?

6 A. No. The asterisk is saying the hospital
7 declined to report their performance, so the score
8 reflects the lack of information available.

9 Q. So then how can the consumer feel confident
10 that the ultimate grade is accurate?

11 A. So Leapfrog is fully transparent with the
12 information it presents. A patient can review each of
13 the measures, decides what's important to them, what's
14 not important to them, and make decisions based on that
15 and other pieces of information that they may look for
16 and acquire.

17 Q. So I take the talking point. Do -- when you
18 say they're fully transparent, is that referring to the
19 methodology document that we looked at as Exhibit 3?

20 A. That is the methodology document. That is how
21 each of the individual scores on each of the individual

1 measures make up the composite.

2 Q. So let's take a different hospital. Delray,
3 you understand, got Step 2 imputation, right?

4 A. Yes.

5 Q. If I showed you a hospital for Step 1
6 imputation, is the website any different?

7 A. I don't know the answer to that.

8 Q. Okay. I will represent to you it's the same
9 asterisk. How does a consumer know whether a
10 nonparticipating hospital got Step 1 or Step 2
11 imputation?

12 A. I don't know enough about what those different
13 scenarios are on the website, so I can't.

14 Q. Do you have any reason to believe that Leapfrog
15 actually communicates to the consumer that Wood hospital
16 or Austin hospital got Step 1, as opposed to Crain
17 hospital Step 2?

18 MS. LAWSON: Object to form. Go ahead.

19 THE WITNESS: To answer that, I would need to
20 see an example of a hospital that had Step 1 imputation.

21 BY MR. CRAIN:

1 Q. Okay. But you have no reason today to think
2 that there is any difference in the presentation?

3 A. I don't know whether there is or is not.

4 Q. Okay.

5 Where on the page in front of you does it
6 say how the score was assigned?

7 A. Can you clarify that question?

8 Q. Yes.

9 So you pointed to the asterisk on this
10 package, right, and it says a score was assigned, right?

11 A. Correct.

12 Q. And you said you had a role in at least
13 reviewing that asterisk, right?

14 A. I don't know that that's true or not true.

15 Q. Okay. You said you had a role in reviewing
16 something on this page.

17 A. I reviewed the descriptions underneath
18 handwashing and what safer hospitals do.

19 Q. Got it. But you don't recall whether you
20 reviewed the asterisk?

21 A. Correct.

1 Q. Okay.

2 So it says a score was assigned, right?

3 Where does it say how the score was assigned?

4 A. Can you clarify the "how"?

5 Q. Sure. I'll give you an example. This was --
6 let's say a hospital is assigned a score through Step 1.

7 Where would it say that on this page?

8 A. I don't know where Leapfrog chose to put that.

9 Q. Okay.

10 Where does it say that Delray received a
11 score under Step 2?

12 A. That's what the asterisk is noting is that it
13 was -- they declined to report their performance, so a
14 score was assigned to reflect the lack of information
15 available.

16 Q. So you're saying that somebody reading that
17 will understand that the assignment of the score was
18 under Step 2?

19 MS. LAWSON: Object to form.

20

21 BY MR. CRAIN:

1 Q. Is that what you're saying?

2 A. I don't know how people read and interpret
3 things.

4 Q. Okay.

5 Do you think this is a clear explication of
6 how the score was assigned?

7 A. I think it puts in words what Leapfrog did. It
8 puts Step 2 into words.

9 Q. How does it put Step 2 into words?

10 A. There was a lack of information available --

11 Q. Uh-huh.

12 A. -- so a score was assigned to reflect the lack
13 of information.

14 Q. But a score could be assigned in any way,
15 right? How would a consumer know that it was assigned
16 with an automatic limited achievement?

17 MS. LAWSON: Object to form.

18 THE WITNESS: From the text that's there and
19 the asterisk, I'm not sure they would know how that was
20 assigned.

21 BY MR. CRAIN:

1 Q. Okay. Thank you.

2 And are you aware of any other page on
3 Leapfrog's website where that's explained besides
4 Exhibit 3, the methodology document?

5 A. I don't know if it is or not.

6 Q. Okay.

7 MR. CRAIN: Okay. Let's -- let's see. How
8 long have we been going? About an hour. Are you good
9 to keep going, or do you want a break?

10 THE WITNESS: Yep. I'm good.

11 MS. LAWSON: I was going to say can we take a
12 quick break?

13 MR. CRAIN: Yeah, that's fine. It's been about
14 an hour. It's not an endurance test.

15 THE VIDEOGRAPHER: This marks the end of media
16 unit number five. We're off the record. The time is
17 2:13 p.m.

18 (Whereupon a short break was had, after
19 which the proceedings continued as
20 follows:)

21 THE VIDEOGRAPHER: This marks the beginning of

1 media unit number six. We're going back on record. The
2 time is 2:38 p.m.

3 BY MR. CRAIN:

4 Q. So Dr. Austin, we were talking about the
5 website, and I think that's what you have in your hand.
6 You can put that aside for now. We're going to go back
7 to what we were talking about before we went down the
8 website rabbit hole.

9 You recall we were looking at Ms. Binder's
10 edits to the -- the public comment document. Do you
11 recall that?

12 A. Yes.

13 Q. Okay.

14 I just want to show you another email.

15 MR. CRAIN: This will be Exhibit 20.

16 (Exhibit No. 20 was marked for
17 identification as of 9/25/2025.)

18 BY MR. CRAIN:

19 Q. All right. Dr. Austin, you see the document,
20 the email at the top is from you?

21 A. Yes.

1 Q. Okay. Do you recognize this email thread?

2 A. Yeah. It's a continuation of the prior one.

3 Q. Yeah, the one -- the prior one being where

4 Ms. Binder gave her comments, right?

5 A. Correct.

6 Q. And do you see Ms. Danforth forwards you

7 Ms. Binder's email that we were looking at before, and

8 she says, "Hi, Matt. Since she mostly updated the parts

9 Peter and Patrick helped with, you can take a look and

10 let us know if you have any concerns? We'd love to get

11 this out Monday or Tuesday next week."

12 Do you see that?

13 A. Yes.

14 Q. First of all, does this refresh your

15 recollection as to whether Peter and Patrick helped with

16 this document?

17 A. Yeah. I will take it at its value or face

18 value. That's what it says, so that's what they had

19 done.

20 Q. And Peter refers to Dr. Pronovost?

21 A. Correct.

1 Q. And Patrick refers to Dr. Romano?

2 A. Correct.

3 Q. Okay. Both of whom have been involved with
4 Leapfrog for many years, right?

5 A. Correct.

6 Q. And you respond at 4:25. Do you see that?

7 A. Yes.

8 Q. And you say, "My only note is the "why" has
9 been edited out the explanation. So you don't really
10 explain why this change is being done. But it reads
11 fine. No concerns." Do you see that?

12 A. Yes.

13 Q. So you noted that the "why" was edited out,
14 right?

15 A. Yes.

16 Q. Would you have preferred to keep it in?

17 A. Prefer is, perhaps, a strong term. The
18 communication is coming from The Leapfrog Group, so they
19 get the final call on what it says. I thought it was --
20 it would be stronger to sort of explain why we were
21 doing this.

1 Q. So you thought -- okay. Got it.

2 And why did you think it would be stronger
3 to explain why you were doing it?

4 A. I think generally people like a context to why
5 something is being done.

6 Q. Would it have been more transparent to explain
7 the reasoning?

8 A. I don't know if transparent is the word I would
9 use for that. It would have been more complete.

10 Q. Okay.

11 Okay. You can set that one aside.

12 Let's see. So just going back to the
13 comment document, right, that we saw. You're aware that
14 it was issued to the public, right?

15 A. Yes.

16 Q. And you're aware that the public commented on
17 the proposal, right?

18 A. Yes.

19 Q. Did you have any role in reviewing the
20 comments?

21 A. I don't remember.

1 Q. Okay. Do you remember anything about the
2 comments generally?

3 A. I don't.

4 Q. Okay. Let's take a look at some and just see
5 if it jogs your memory.

6 MR. CRAIN: Iason, can you give me 45.

7 This will be Exhibit 21.

8 (Exhibit No. 21 was marked for
9 identification as of 9/25/2025.)

10 BY MR. CRAIN:

11 Q. Okay. Exhibit 21. So take a look at this
12 document, Dr. Austin. Do you recognize it at all?

13 A. I do not.

14 Q. Okay. I'm just going to read -- this is an
15 email from the Leapfrog help desk to Ms. Campione. I'm
16 just going to read -- do you see down the page it says
17 Becky Wenthold?

18 A. Yes.

19 Q. And she said, "I was [sic.] disappointed with
20 the 2024 proposed changes. These changes will penalize
21 hospitals that do not submit a Leapfrog survey. The

1 public will not understand nor dig into the methodology
2 of these grades, and hospitals will be falsely
3 represented with a lower grade because they choose not
4 to complete a survey. The survey is extremely time
5 intensive and, in a time when hospitals are barely
6 breaking even financially, they do not have the
7 resources to commit to this survey."

8 Do you see that?

9 A. Yes.

10 Q. You don't recall comments to this effect?

11 A. I do not remember reviewing Ms. Wenthold's
12 comments.

13 Q. Do you recall any other comments?

14 A. I don't remember reviewing the comments.

15 Q. Do you recall comments in favor of the change?

16 A. I don't remember seeing the comments that came
17 in from the public comment period.

18 Q. Okay. So just to close the loop, you have no
19 memory either way?

20 A. I have no memory of seeing them, but I see a
21 lot of information and a lot of -- so if someone

1 produced something and said I had reviewed it, it's
2 probably true, but I don't remember reviewing the
3 comments.

4 Q. Okay. It's possible but you just don't have a
5 recollection?

6 A. Correct.

7 Q. Okay.

8 And fair to say you disagree with what I
9 read, with her comment, or no?

10 MS. LAWSON: Object to form but go ahead.

11 BY MR. CRAIN:

12 Q. I can rephrase if it's helpful.

13 A. Could you rephrase?

14 Q. Yeah.

15 Is there any portion of what I read to you
16 from her comment that you agree with?

17 A. Of the sentences you've read or the ones that
18 go beyond that?

19 Q. Will your answer change?

20 A. It will.

21 Q. Okay. Start with the sentences I've read.

1 A. The sentences you have read, obviously, the
2 first sentence is her own opinion of what she sort of
3 sees the situation as. I don't disagree that the
4 changes will penalize hospitals that don't submit a
5 Leapfrog survey.

6 Q. Okay.

7 A. Her statement about the public won't understand
8 or dig into the methodology of these grades, I'm not
9 sure her nor I really know that to be the truth.

10 Q. Okay.

11 A. Hospitals will be falsely represented with a
12 lower grade I don't think is necessarily a truthful
13 statement.

14 Q. Is it possible because you don't know the
15 actual performance of nonrepresenting hospitals --
16 nonparticipating hospitals, excuse me?

17 A. Correct. So if she said possibly represented
18 with a lower grade.

19 Q. So let me ask it this way. Is it possible that
20 at least some hospitals will be falsely represented with
21 a lower grade than they otherwise would achieve based on

1 performance?

2 A. Right. So imputation by definition is trying
3 to estimate performance, and there is almost, by
4 definition, going to be some error, and that error may
5 be in the measured entity's favorite. It may be in the
6 measured entity's unfavor or disfavor.

7 But, I mean, it's imputation, right. So we
8 don't know the answer. So, therefore, we're trying to
9 estimate or guess an answer. So by definition,
10 imputation is going to have an error associated with it.

11 So when we were imputing higher scores with
12 a means for many hospitals, there was an error
13 associated with that as well.

14 Q. So it's your testimony that imputation is an
15 estimation of actual performance?

16 A. Correct.

17 Q. And is that true with regard to the automatic
18 assignment of limited achievement?

19 A. If we're imputing a score like we were doing
20 with limited achievement, there is the possibility for
21 error.

1 Q. So my question is a little bit different. So
2 let's break it down a little bit.

3 A. Okay.

4 Q. In the prior model for imputation, prior to
5 2024, let's go prior to 2021, you used American Hospital
6 Association data -- we had our aha moment -- to impute a
7 score for the hospitals, right?

8 A. Correct.

9 Q. Okay. And was that an estimation based on the
10 AHA data?

11 A. Yes.

12 Q. Okay.

13 Then when you get to 2024, you impute
14 limited achievement, correct?

15 A. Correct.

16 Q. Is that an estimation of performance or no?

17 A. That is an estimation of performance.

18 Q. Okay.

19 So going back to the website we looked at,
20 again for Delray you impute limited achievement on
21 handwashing, right?

1 A. Correct.

2 Q. So you are saying that's an estimation of their
3 actual performance on handwashing?

4 A. Yes.

5 Q. Okay. And that, again, is based on no data to
6 support it, right?

7 A. That is based on a lack of data.

8 Q. Yes. Okay. But it's an estimate, right?

9 A. It's an estimate.

10 Q. Okay.

11 Okay. Let's go back to the comment.

12 A. Okay. This extremely time intensive, once
13 again, extremely is a relative term, so I don't know how
14 Ms. Wenthold would define extremely.

15 Q. How would you characterize the burden?

16 A. What I hear from hospitals or I've heard from
17 hospitals is that it takes about 40-person hours to
18 complete it the first time but that in future years, as
19 hospitals refine their internal processes for reporting,
20 that that burden decreases.

21 Q. Okay. And which hospitals have you heard that

1 from?

2 A. I've heard that from Johns Hopkins Hospital
3 when I queried them on that question. I've heard that
4 from other hospitals that I couldn't necessarily name,
5 but that's just from poor memory.

6 Q. Fair enough.

7 Ballpark, how many did you ask?

8 A. I've maybe have heard that from three or four.

9 Q. Okay.

10 So going back to the comment.

11 A. Yeah. So what I would -- she is correct that
12 there is no option for the submission for a survey for a
13 health system; that Leapfrog's policy, since its
14 inception, has been for each individual brick and mortar
15 hospital to complete its own survey.

16 And her statement about excellent outcomes
17 will no longer be able to receive an A is actually
18 incorrect because there were two hospitals that actually
19 did get an A that did not complete a survey.

20 Q. Nationwide, right?

21 A. Nationwide.

1 Q. And that was on that first email we looked at
2 where you were pulling information --

3 A. Yes.

4 Q. -- for the lawsuit, right?

5 A. Yes.

6 Q. Just to make sure, I think that was Exhibit 1.

7 Okay. That's helpful.

8 MR. CRAIN: Okay. Let's go to tab 47. This
9 will be Exhibit 22.

10 (Exhibit No. 22 was marked for
11 identification as of 9/25/2025.)

12 BY MR. CRAIN:

13 Q. I'm sorry. This one is very small.

14 Dr. Austin, this is another comment, which
15 I think was submitted through what I believe is
16 Leapfrog's Zendesk platform. Do you see that?

17 A. Yes.

18 Q. My guess is -- have you not -- have you seen
19 this document before?

20 A. No, I haven't.

21 Q. Okay. So I want to just take you to the

1 bottom, and I think that's the comment. Do you see it's
2 from it looks like Alana Noble?

3 A. Yes.

4 Q. And she says, "We strongly disagree with the
5 proposed Fall 2024 Step 2 imputation. If Leapfrog is
6 going to implement this change, they need to offer
7 hospitals an option to opt out of being graded rather
8 than penalize a hospital for not submitting the resource
9 intensive survey. The survey is very resource intensive
10 outside of existing regulatory, quality operations and
11 quality improvement efforts. Hospitals that do not have
12 the resources to do the survey annually should not be so
13 adversely punished, especially in the post-COVID era
14 when resources are increasingly hard to come by and
15 retain."

16 And my question to you is: Why can't
17 Leapfrog give hospitals an option to opt out of being
18 graded?

19 MS. LAWSON: Object to form.

20 You can answer.

21 BY MR. CRAIN:

1 Q. To your understanding.

2 MS. LAWSON: I mean to your understanding.

3 BY MR. CRAIN:

4 Q. It's always to your understanding.

5 A. Right.

6 So the impetus for the Hospital Safety
7 Grade -- let me take us back a little bit in time.

8 So since 2001, Leapfrog has been doing a
9 voluntary survey of hospitals around quality and safety
10 practices. It has collected those data and made those
11 publicly available. One of the concerns for that model
12 is Leapfrog was collecting a lot of different data
13 points and reporting those out as individual data
14 points.

15 And what we know from conversations with
16 consumers and patients is that they strongly prefer
17 composite scores, star ratings, letter grades, that they
18 find that much more digestible.

19 Q. Easier to understand?

20 A. Easier to understand.

21 In addition to wanting to move towards a

1 letter grade, Leapfrog also wanted to -- the model that
2 Leapfrog was working from was the restaurant ratings in
3 like New York City, Los Angeles, right, where the health
4 department comes in. They do an assessment of the
5 restaurant, and the hospital has to post a letter grade
6 in their window with an A, a B, or a C.

7 And one of Leapfrog's board members
8 supposedly thought, oh, wouldn't it be great if we could
9 ask hospitals to do the same thing around the idea of
10 patient safety.

11 The concern with making it voluntary is
12 that it is a relative score, right. So the methodology
13 is such that hospitals are being compared to the
14 national mean, the standard deviation of the national
15 sample. And so it would be difficult to issue grades if
16 we were pulling from a selected subset of hospitals.

17 Q. Is that still true today where 80 percent of
18 inpatient beds are I think represented on the Leapfrog
19 survey?

20 A. So I see that as a little bit of a chicken and
21 egg situation.

1 Q. Okay. Tell me why.

2 A. That if Leapfrog made it voluntary, one
3 potential consequence of that would be fewer hospitals
4 would report to the survey, and, therefore, you would
5 lose that 80 percent capture that is currently there.

6 Q. Is it fair to characterize that as a slippery
7 slope problem?

8 A. I don't know how to characterize a slippery
9 slope.

10 Q. Okay.

11 I guess what I mean by that is you're
12 suggesting that if you make it voluntary, the number
13 20 percent of inpatient beds that were not responding
14 would increase, right?

15 A. That could be a potential consequence.

16 Q. Okay.

17 So to encourage greater participation, it
18 cannot be voluntary. Is that right? Take your time.

19 A. So one of the challenges Leapfrog was trying to
20 address with the Hospital Safety Grade was that there
21 had been a plateauing of hospital participation in the

1 survey.

2 Q. Okay.

3 A. And, therefore, we only had quality and safety
4 information for a -- not a small, a fraction of the
5 hospitals in the United States. And so by making it
6 nonvoluntary was an opportunity to have safety
7 information out there about as many hospitals in the
8 U.S. as possible.

9 And so if you make it voluntary, you sort
10 of defeat that goal of trying to have safety information
11 for as many as possible.

12 Q. Has that goal overtaken any goal to report
13 accurately on safety?

14 A. No.

15 Q. Okay. And why is that? Because -- strike
16 that.

17 We've talked a lot about how there are
18 errors, right, with any imputation methodology. Isn't
19 the most accurate way to get safety information out
20 there to not impute?

21 A. Can you rephrase the question?

1 Q. Yeah.

2 A. Or not rephrase but repeat the question.

3 Q. Oh, repeat? Yeah, repeat I can do because I
4 have the realtime.

5 We've talked a lot about how there are
6 errors with any imputation methodology, correct?

7 A. Correct.

8 Q. Isn't the most accurate way to get safety
9 information out there to not impute?

10 A. Are we discussing the scores, or are we
11 discussing the grades?

12 Q. Let's do both. Start with the score.

13 A. So for the score, I think that would have a
14 little more of an influence -- let me say that again.
15 The decision to impute a score would impact the overall
16 score.

17 Q. The overall grade?

18 A. The overall -- so just to clarify, when we
19 calculate the grade, what we're actually calculating is
20 a score, a numerical score. So each hospital has a
21 numerical score that's calculated. Those numerical

1 scores then get converted into letter grades.

2 Q. Yes. Got it.

3 A. So the letter grade, by definition, is a range
4 of scores, right. So it's less sensitive to the
5 decision to impute one measure or not to impute a
6 measure.

7 If we're talking about the actual numerical
8 score, the accuracy would be improved without
9 imputation.

10 Q. Okay.

11 So is it right that Leapfrog has
12 prioritized as a goal increasing participation as
13 compared to the accuracy of the score?

14 A. So when you say participation, what are you
15 referring to?

16 Q. Participation in the survey. Let me rephrase
17 it so it's clear.

18 Is it fair to say that Leapfrog has
19 prioritized encouraging greater participation in the
20 survey as compared to greater accuracy in the scoring of
21 a safety grade?

1 A. I don't see it as an absolute tradeoff in that
2 way.

3 Q. Okay. Is it -- why is that?

4 A. Because I think you can work towards both
5 goals. I don't think you necessarily have to completely
6 have one goal be worked towards at the detriment of the
7 other goal.

8 Q. You don't think that's what's happening with
9 imputation?

10 A. So to be clear, the decision to impute scores
11 is primarily driven by the desire to have more accuracy
12 in what we are issuing as a score grade. A potential
13 benefit of that is that hospitals may choose to come in
14 and report to the survey.

15 So that's why I don't see them as
16 necessarily diametrically opposed goals.

17 Q. Is the most accurate way to score excluding
18 imputation altogether?

19 A. Yes. As previously stated, you would have a
20 more accurate score without imputation.

21 Q. Okay.

1 And so going -- I don't know if I got an
2 answer to this question, though, but let me just be
3 really clear. So this comment says if Leapfrog is going
4 to implement this change, they need to offer hospitals
5 an option to opt out, right?

6 First, I guess stepping back, do you recall
7 any discussion of an opt out internally to either the
8 expert panel or Leapfrog?

9 A. No. That's never been the conversation.

10 Q. Okay. And why can an opt out not be provided?

11 A. If -- is your question is it possible for
12 Leapfrog to implement an opt out?

13 Q. Well, so --

14 A. Or --

15 Q. Yeah, fair question.

16 So there's the question of whether it's
17 physically possible. I assume it's physically possible
18 to implement an opt out, right?

19 A. Yes.

20 Q. Yeah.

21 Why does -- to your knowledge, why does

1 Leapfrog feel it can't allow an opt out?

2 A. This is my own speculation because I have not
3 discussed with Leapfrog this scenario. One might be
4 concerned that if you allow hospitals to opt out, most
5 of them will, and now what is your rating program if you
6 don't have many participates.

7 Q. And it's also -- what is your rating program,
8 meaning the grade, the survey, or both?

9 A. Potentially both.

10 Q. And going back to the restaurant analogy. You
11 mentioned the L.A. restaurant grades. Do you think
12 that's a fair analogy to what Leapfrog is able to do?

13 MS. LAWSON: Object to form.

14 BY MR. CRAIN:

15 Q. To your knowledge.

16 A. So Leapfrog can't require hospitals to post a
17 letter grade in their window.

18 Q. It also, unlike a regulatory agency, can't
19 compel participation, right? As a legal matter, right?

20 A. I will defer to lawyers on that.

21 Q. Fair enough. Okay.

1 Let me ask --

2 A. Leapfrog, what it's doing is it's using
3 publicly available data to make an assessment of a
4 hospital's patient safety performance.

5 Q. And it's also using the lack of data, right, to
6 make an assessment of performance?

7 A. That's using what data are available.

8 Q. Yeah.

9 A. And in some situations, that is data that's not
10 available.

11 Q. Yeah. Okay.

12 Okay. You can set that one aside.

13 I want to talk a little bit about the
14 imputed measures themselves so -- and we talked about
15 earlier in the day, it feels like hours ago, BCMA, CPOE,
16 IPS, and hand hygiene, right?

17 A. Correct.

18 Q. So I've been trying to understand why are those
19 the four that are imputed as compared to the three what
20 I called earlier in the day discarded measures. You may
21 feel free to call them something else, but why are those

1 different?

2 A. It is somewhat a function of historical
3 artifact and when the measure was introduced to the
4 Leapfrog Hospital Survey. So within those three
5 measures, we put the two safe practices into one bucket
6 and hand hygiene in the other bucket.

7 Q. Okay.

8 A. The safe practices I put in the sort of
9 historical artifact bucket in that when the decision was
10 to move towards secondary data sources, like the aha,
11 AHA hospital survey --

12 Q. That's my favorite.

13 A. There wasn't any data within that AHA survey
14 that matched up with those safe practices. Like, there
15 was nothing about leadership. There was nothing about
16 culture measurement.

17 So at that time, the decision was, okay,
18 we're going to continue to hold those in the
19 we're-just-going-to-ignore-the-measure-if-you-don't-have
20 -it bucket, which was the original imputation.

21 That historical sort of artifact has just

1 sort of rolled forward.

2 Q. Okay. Fair to say it was grandfathered in?

3 A. Yeah. It's a historical artifact of where we
4 started and where we're at.

5 The nursing workforce --

6 Q. Yep.

7 A. -- was just recently introduced to the Leapfrog
8 Hospital Survey, and the collective wisdom was perhaps
9 we don't have enough experience in data with that to
10 impute scores.

11 Q. So very helpful on the three.

12 I want to ask you also about the four, why
13 they are imputed, and I have a document that I think
14 might help us in what I've been trying to figure out.

15 MR. CRAIN: So this will be Exhibit 23.

16 (Exhibit No. 23 was marked for
17 identification as of 9/25/2025.)

18 BY MR. CRAIN:

19 Q. So this is another Armstrong-produced document.
20 You see that on the bottom, right?

21 A. Yes.

1 Q. And it's one of your notes to yourself. Do you
2 see that?

3 A. Yes.

4 Q. And it says: "Notes for today's call with
5 Dr. Romano." [sic] Right?

6 A. Yes.

7 Q. Okay.

8 April 12th, coincidentally, 2019. Do you
9 see that? I say coincidentally because the expert panel
10 meeting was also April 12th.

11 A. Okay.

12 MS. LAWSON: Of 2024.

13 MR. CRAIN: Yeah, of 2024. Sorry. It was my
14 own aha moment.

15 BY MR. CRAIN:

16 Q. So going down, you say, "Patrick, to guide
17 today's call, I put together some quick notes." Do you
18 see that?

19 A. Yes.

20 Q. And I can't tell if you sent this to him or
21 they were just talking points. Any sense?

1 A. They were notes for myself, I believe, for the
2 conversation with Dr. Romano.

3 Q. And do you remember this conversation? Feel
4 free to take a second to read through it if it's
5 helpful.

6 (Witness peruses document.)

7 THE WITNESS: Okay.

8 BY MR. CRAIN:

9 Q. Do you remember the context of this discussion?

10 A. I don't with certainty but based on the --

11 Q. Context clues?

12 A. -- context clues, it would be to talk about
13 maybe changing the imputation approach --

14 Q. And --

15 A. -- and missing data thresholds.

16 Q. Okay.

17 And you see it mentions AHA responses sort
18 of towards the bottom third of the page?

19 A. AHA responses?

20 Q. There's a bullet that says exceptions are BCMA.

21 A. Yes.

1 Q. Okay.

2 And just stepping back for a second, do you
3 recall a time where Leapfrog no longer had access to the
4 AHA data?

5 A. There was a point where AHA revoked Leapfrog's
6 license to use the data.

7 Q. Do you know why they did that?

8 A. My understanding is they had gotten -- strike
9 that.

10 I don't know why AHA revoked the license.

11 Q. When you said "my understanding," did you have
12 something that you heard about it?

13 A. I had heard that, you know, they were getting
14 complaints from their member hospitals about how those
15 data were being used by Leapfrog.

16 Q. Got it.

17 And complaints with respect to the
18 imputation into the methodology?

19 A. Complaints on two fronts. One was how the data
20 were being translated into scores for Leapfrog. Also,
21 some of the hospitals' data were pretty old, and they

1 felt like it was outdated and there really wasn't a
2 mechanism for them to update it. And there were sort of
3 logistical challenges, and my understanding is I think
4 AHA was like, we're out.

5 Q. We're out of this business?

6 A. Right -- what's that?

7 Q. We're out of this business?

8 A. We're out of this business.

9 Q. And when you say old, so I know like CMS data
10 has a lag, right? Yes?

11 A. Some of it does, yes.

12 Q. Was the AHA data a bigger lag than CMS?

13 A. I don't know the exact lag period for the AHA
14 survey.

15 Q. And what you had heard about why the AHA did
16 not want to license anymore, do you recall who that came
17 from?

18 A. The information that I heard from?

19 Q. Yeah, that you just shared with us about --

20 A. From Missy Danforth.

21 Q. Got it. Okay. So Ms. Danforth told you that.

1 Do you know where she got it?

2 A. I don't know.

3 Q. Okay.

4 Anything else you remember about why AHA
5 stopped licensing?

6 A. That's all I'm aware of.

7 Q. Okay.

8 So I want to look specifically at -- you
9 see in this document imputing data?

10 A. Yes.

11 Q. If you go down to the third bullet -- well,
12 let's go to the second bullet first for context. It
13 says: "Current Approach: Exclude the measure and
14 recalibrate the weights for the affected hospitals using
15 only those measures for which data are available."

16 Do you see that?

17 A. Yes.

18 Q. And can you sort of translate what that means?

19 A. Yeah. So the earliest approach of imputation
20 that we followed was to -- if a hospital was missing a
21 measure, we ignored that measure and we redistributed

1 the weights to other measures for which they did have
2 data.

3 Q. Okay.

4 And then there's a -- the next bullet says
5 exceptions, right?

6 A. Correct.

7 Q. And it says: "Exceptions are BCMA, CPOE, and
8 IPS, in which case we have created crosswalks between
9 the AHA responses and Leapfrog performance categories."

10 Do you see that?

11 A. Yes.

12 Q. What does the crosswalk mean?

13 A. The crosswalk was we looked at -- for hospitals
14 that reported to both the AHA survey and to the Leapfrog
15 Hospital Survey, we were able to compare their responses
16 on both and understand in an aggregate way what the
17 relationship was between a hospital's responses to the
18 AHA survey and how they were performing on the Leapfrog
19 Hospital Survey standards.

20 Q. So just to rearticulate, is it fair to say that
21 you had identified that the AHA data was a reasonable

1 enough proxy for the BCMA, CPOE, and IPS scores for
2 Leapfrog?

3 A. In our review and discussions of the AHA
4 survey, we felt like it represented a reasonable
5 approximation of the same quality -- or the same safety
6 standards.

7 Q. And is that the original reason why those three
8 became imputed measures, as opposed to discarded
9 measures?

10 A. Yes.

11 Q. Okay.

12 After Leapfrog lost the AHA data, do you
13 recall any time at which other crosswalks were
14 considered?

15 A. We explored other potential secondary data
16 sources. I can specifically remember having lots of
17 calls with HIMMS, H-I-M-M-S, which is a technology
18 consortium, to see if we could get relevant data related
19 to computerized physician order entry. And as we
20 reviewed their data, we didn't feel confident in that it
21 was getting us the same thing that we needed.

1 So we explored other options, just nothing
2 met.

3 Q. Okay.

4 So is it fair to say that those three
5 measures were essentially grandfathered in from the
6 period in which Leapfrog was using AHA as the crosswalks
7 to the Leapfrog scores?

8 A. We had been imputing scores for those measures
9 using the AHA datasets. That would be true.

10 Q. And it was grandfathered into the next
11 instantiation of the imputation methodology?

12 A. I would need to have better notes on what was
13 the next phase of the imputation methodology --

14 Q. Okay.

15 A. -- to remember what came next after that.

16 Q. Fair enough. Fair enough.

17 So subsequently -- like, the current
18 methodology still imputes on these three measures,
19 right?

20 A. Correct.

21 Q. Is there any particular reason, except for the

1 historical fact of Leapfrog having those crosswalks to
2 the AHA data, that those three are imputed as opposed to
3 other measures that are discarded that you're aware of?

4 A. I could argue that there is, perhaps, some
5 clinical, additional clinical relevance to those. I
6 mean, they do get higher weights in the safety grade.
7 They have been shown to be more effective as it relates
8 to safety and improving safety. So that's what I would
9 speak to.

10 Q. So my question is a little different, though.
11 You are, I think, providing a reason for why those are
12 valuable measures, right?

13 A. Correct.

14 Q. And, in fact, I could show you websites. I'll
15 just represent to you that sometimes Leapfrog puts out
16 information that says those are among the most important
17 measures. It sounds like you might agree with that?

18 A. Correct.

19 Q. Yeah. And they're significantly weighted,
20 right?

21 A. They have higher weights than some other

1 measures.

2 Q. I think the four imputed measures are
3 approximately a quarter to 30 percent of the grade. Are
4 you aware of that?

5 A. I couldn't agree or disagree with that.

6 Q. I mean, it's in the methodology document.

7 A. Right.

8 Q. We can set it aside. I'm not trying to, you
9 know, test you on it. It's all right.

10 So you're giving me reasons for why they
11 are important measures, correct? I want to know the --
12 whether there's an empirical reason or an evidence-based
13 reason for continuing imputation of them outside of the
14 crosswalks that we see in this email.

15 MS. LAWSON: Do you understand the question?
16 Are you clear on what the question is?

17 THE WITNESS: I think I am.

18 MS. LAWSON: Okay. I think he's asking is
19 there a historical -- like, other than the historical
20 experience --

21 MR. CRAIN: I think I'd asked just for no

1 speaking objections or coaching.

2 MS. LAWSON: Yeah, but I just want to make sure
3 that he's clear because we're covering this a second
4 time. We've asked it a -- you know, and I understand.
5 So I understand what your question is, and I just want
6 to make sure he understands so he can answer what you're
7 asking.

8 BY MR. CRAIN:

9 Q. Let me ask it again because I want to make sure
10 the record is clear.

11 So I said: You're giving me reasons for
12 why they are important measures, correct?

13 A. Correct.

14 Q. And I want to know whether there is an
15 empirical reason or some evidence-based reason for
16 continuing to impute these three measures in this email
17 outside of the crosswalks that Leapfrog had identified
18 between the AHA responses and Leapfrog performance
19 categories.

20 A. So the reason it would be important to keep
21 those measures in and to be imputed is because they have

1 a significant impact to patient safety. So to create a
2 composite score that doesn't include those measures
3 would be missing some very key components.

4 Q. For Step 2, where you're automatically
5 assigning limited achievement, doesn't that rationale
6 cut the other way?

7 A. I would disagree. We're actually imputing a
8 score for those because those measures are important.

9 Q. So I take it that those measures are important.
10 Set that aside for a second.

11 We've talked about the limited achievement,
12 right, the automatic assignment is not grounded in any
13 actual evidence about a given hospital's performance,
14 right, today?

15 A. The imputation is -- has an error component to
16 it by definition.

17 Q. Yes. So just -- I want you to answer my
18 question yes or no. The automatic assignment is not
19 grounded in any actual evidence about a given hospital's
20 performance today, correct?

21 A. Can you repeat that?

1 Q. Yeah. Glad to.

2 The automatic assignment of limited
3 achievement for the four imputed measures for a
4 nonparticipating hospital is not grounded in any actual
5 evidence about a nonparticipating hospital's performance
6 today, correct?

7 A. Back to the earlier point, we know the hospital
8 is not being transparent about their safety performance
9 and that safety is an important component of a culture
10 of safety.

11 Q. Okay. So I'll go down the line. An automatic
12 assignment of limited achievement for BCMA is not
13 grounded in any actual facts about a hospital's
14 performance on BCMA, right?

15 A. An imputed score is based on an assumption.

16 Q. Okay. And not actual facts on the ground about
17 performance, right?

18 A. Correct.

19 Q. Okay.

20 A. And that's true of all imputation.

21 Q. It wasn't necessarily true when you had the

1 crosswalks, right?

2 A. That's not completely true.

3 Q. Okay. Explain it for me.

4 A. Because when we had the crosswalks, we were
5 looking at large numbers of hospitals. So we might have
6 had 500 hospitals that reported to both the Leapfrog
7 Hospital Survey and the AHA survey. What we looked at
8 was what was basically the average performance.

9 If a hospital answered this in the AHA
10 survey, how did they, on average, perform on the
11 Leapfrog Hospital Survey? Some of the hospitals
12 performed better. Some performed worse. So there is a
13 degree of error there in imputation.

14 Q. But you had some sort of analysis to build that
15 out, right?

16 A. We had some secondary data sources to help us
17 inform those imputed scores.

18 Q. And today, for the methodology, there is no
19 secondary data source to help you inform the imputed
20 assignment of limited achievement?

21 A. Correct.

1 Q. Okay.

2 So is it fair to say that the reason these
3 three remain as imputed measures is largely, as you said
4 for the other ones, a historical artifact or no?

5 A. I think it's a combination of historical
6 artifact and their importance to the broad concept of
7 patient safety.

8 Q. Got it. Okay. So they're significant, so
9 Leapfrog didn't want to lose them, and also they had
10 been imputing based on other secondary data sources.
11 That combination is why they are still imputed measures
12 today. Is that fair?

13 A. Fair.

14 Q. Okay.

15 Why hand hygiene, which is not represented
16 here? Can you give me the history of that one?

17 A. So hand hygiene was introduced to the Leapfrog
18 Hospital Survey after -- well, don't quote me on this.
19 I believe after the AHA had pulled their data license.

20 Q. Okay. Got it.

21 Okay. So you had no opportunity to create

1 the crosswalk, correct?

2 A. Correct.

3 Q. Okay.

4 I want to show a document. So talking
5 about hand hygiene, again, is it your testimony today
6 that the limited achievement automatic assignment of
7 hand hygiene for nonparticipating hospitals in Step 2 --
8 stay with me -- is an accurate reflection of a
9 hospital's hand hygiene performance, an accurate
10 estimation?

11 A. My testimony is that it's an imputed score for
12 that hospital's performance on hand hygiene.

13 Q. And is it an accurate estimation of their
14 performance on the ground?

15 A. Imputation, by definition, has error.

16 Q. Okay. So for certain hospitals it may be
17 inaccurate?

18 A. Correct.

19 Q. Okay.

20 So I want to look at --

21 MR. CRAIN: This will be Exhibit 24.

1 (Exhibit No. 24 was marked for
2 identification as of 9/25/2025.)

3 BY MR. CRAIN:

4 Q. This is an Armstrong-produced document. Do you
5 see that on the bottom right?

6 A. Yes.

7 Q. And the top email is from you to a group of
8 folks at Leapfrog, I think, and Preeti Joshi. Do you
9 see that? And maybe a couple others.

10 A. Yes.

11 Q. And there's an attachment. It says: Leapfrog
12 Hand Hygiene Report Analysis June 3, 2024. Do you see
13 that?

14 A. Yes.

15 Q. And you write to the group, "As a follow-up
16 from our meeting a few weeks ago, attached are the
17 requested analyses for the hand hygiene report. I think
18 the analyses are pretty self-explanatory, but we are
19 happy to have a call to review if that would be
20 helpful."

21 Do you see that?

1 A. Yes.

2 Q. And then you go in I guess starting with --
3 first question: Did you draft -- I'm looking at page
4 5116. Do you see that?

5 A. Yes.

6 Q. Did you draft what looks like it's titled
7 Leapfrog Hand Hygiene Analysis for Landslide Report?

8 A. Preeti Joshi did this.

9 Q. Okay. Did you review it?

10 A. Yes.

11 Q. Okay. And what was the purpose of this
12 document?

13 A. Leapfrog was interested in putting out a
14 national report on its hand hygiene standard and where
15 hospitals had -- how they've improved over time on the
16 standard.

17 Q. Okay.

18 And so you go, it looks like to me, you go
19 question by question through the Leapfrog survey. Is
20 that right?

21 A. We looked at it both at the individual question

1 level -- yes. In this first part, it's looking at each
2 individual question.

3 Q. Okay. And fair to say for some questions there
4 is pretty -- you know, there's change between 2020 and
5 2023, and for others there's less change. Is that
6 right? I can be more concrete.

7 MS. LAWSON: I was going to object to form
8 there.

9 MR. CRAIN: Fair enough. I'll take it back.

10 BY MR. CRAIN:

11 Q. So question number one is provision of hand
12 hygiene training. Do you see that?

13 A. Yes.

14 Q. And in 2020, it looks like 92.8 percent --
15 well, tell me what the percentage reflects.

16 A. Yeah, that represents the percentage of
17 hospitals -- yeah, the denominator is the number of
18 hospitals that submitted responses to the hand hygiene
19 section of the Leapfrog survey. So the numerator would
20 be those that answered yes, that they meet Leapfrog's
21 requirements for that question.

1 Q. So 92.8 percent of hospitals in 2020 responding
2 to the survey met question one. Is that right?

3 A. Yes.

4 Q. Okay.

5 And that increases to 96.8 percent in 2021,
6 96.8 percent in 2022, and 97.9 percent in 2023. Do you
7 see that?

8 A. Yes.

9 Q. Okay.

10 And I guess the question that I have on any
11 of these, really, is: Is it your assumption that a
12 hospital that is not participating in the survey will
13 perform worse than these numbers as compared to the
14 participating hospitals?

15 A. Can you say that one more time, please?

16 Q. Yeah. So I'm trying to get at -- let's back up
17 a little bit.

18 So I'm trying to understand why Leapfrog
19 imputes for hand hygiene, right. And my question is it
20 seems like, at least based on this analysis, that most
21 hospitals, at least that report, do fairly well on the

1 hand hygiene questions. Is that fair to say or no?

2 A. So Leapfrog actually has fairly high standards,
3 and so for a hospital to meet a domain, they actually
4 have to answer "yes" to all of the questions in that
5 domain.

6 So, for example, in domain training and
7 education, only 85.7 percent answered yes to question
8 two in 2023. So at most, 85.7 percent of hospitals meet
9 that domain, and it's probably something less than that,
10 right.

11 So looking at individual questions may not
12 be the most accurate indicator of how hospitals are
13 doing on each of the domains as Leapfrog has defined
14 them.

15 Q. Okay. So in each of these four domains, you're
16 saying only the lowest denominator respondent are those
17 that passed the domain?

18 A. The lowest percentage within a domain would be
19 the absolute ceiling of the percentage of hospitals that
20 can meet that domain.

21 Q. Got it. Okay.

1 So for domain one, the most -- the highest
2 number of hospitals that would have met that domain are
3 85.7 percent of responding hospitals in 2023, correct?

4 A. Correct.

5 Q. Okay.

6 And do you have any basis to suggest that
7 nonperforming hospitals would be so much worse in
8 performance than 85.7 percent?

9 A. We don't have any information to know how they
10 would perform.

11 Q. So why is it fair to those hospitals to give
12 them the lowest score when the gross majority of
13 hospitals, at least in this domain, pass?

14 MS. LAWSON: Object to form. Go ahead.

15 THE WITNESS: So there are 15 percent of
16 hospitals, at least, that are not meeting the domain,
17 right. So how would we know if hospitals that don't
18 report are part of that 15 percent or part of the
19 85 percent?

20

21 BY MR. CRAIN:

1 Q. You don't know either way, right?

2 A. We don't know either way.

3 Q. Okay. But you assume that the hospitals in
4 that domain that are not reporting are necessarily part
5 of the 15 percent, right?

6 A. We don't have any information about those
7 hospitals, so we are imputing a score.

8 Q. You're imputing a score that estimates that
9 their performance is failing, essentially?

10 A. That they are in the bottom performance
11 category.

12 Q. Okay.

13 And then if you go to domain two, this is
14 infrastructure, do you see that?

15 A. Yes.

16 Q. And this is things like hand sanitizers?

17 A. Correct.

18 Q. Okay.

19 Forgive the question, but have you ever
20 been to a hospital for care?

21 A. Yes.

1 Q. Do you recall any room that you were in without
2 a sanitizer?

3 MS. LAWSON: Object to form.

4 THE WITNESS: So the Leapfrog survey questions
5 about hand sanitizers are fairly specific about the
6 location of them, whether they produce the correct
7 amount of alcohol-based hand gel, and whether or not the
8 hospital does audits to know if they actually have hand
9 gel in them. Because I think we've all experienced
10 going up to one and nothing comes out.

11 BY MR. CRAIN:

12 Q. Not fun.

13 A. So there is more than just about do you have
14 hand sanitizer dispensers. There's a lot more to that
15 standard.

16 Q. Fair enough.

17 So taking your bottom number, if you look
18 at domain two, this would imply that 90.5 percent, at a
19 maximum, passed this domain, right?

20 A. Ninety-one -- 90.5 --

21 Q. Ninety point five, right.

1 A. -- in 2023 --

2 Q. In 2023, correct.

3 A. -- would be the absolute ceiling.

4 Q. Yes.

5 Do you have any sense for what the number
6 actually is for the number of hospitals that passed this
7 domain?

8 A. I don't know offhand.

9 Q. Okay. Fair to say it's likely quite high
10 because of these numbers?

11 MS. LAWSON: Object to form but go ahead.

12 THE WITNESS: Yeah, I mean, I could -- you
13 know, you could assume that all of these were
14 independent, and if you multiply them together, you
15 would come up with an answer that's somewhere in the
16 63 percent, which is probably the floor. So it's
17 somewhere between 63 and 90.5.

18 BY MR. CRAIN:

19 Q. Okay.

20 So but, again, for hospitals that don't
21 participate, for this domain, effectively, they get the

1 lowest possible score, right?

2 A. So to be clear, the hand hygiene standard has
3 five domains. For a hospital to be in achieved the
4 standard, they need to -- if they're only collecting 100
5 hand hygiene observations a month, they need to meet all
6 five domains, which means they're saying "yes" to every
7 single question.

8 Q. Okay.

9 A. Seventy-four percent of hospitals in 2023
10 achieved the standard, so 26 percent did not.

11 Q. Yep. Okay. And that achieved the standard is
12 the highest, right?

13 A. Correct.

14 Q. Then how do you quantify the next three down?

15 A. We have a scoring algorithm that's available
16 online that details that. I couldn't recite what that
17 is, but the idea is basically if you meet a subset of
18 the domains, you get one category; if you meet fewer
19 domains, you get a lower category.

20 Q. Okay.

21 A. It's sort of assessed at the domain level but

1 then it rolls up into an overall score.

2 Q. Okay. No, fair enough.

3 So I guess then my question is why is hand
4 hygiene one of the imputed measures and not one of the
5 discarded measures?

6 A. Because its clinical relevance to patient
7 safety is paramount.

8 Q. Okay.

9 So, again, it's the same point. When we
10 talked about the other three, there were two reasons.
11 The first was the historical what I call grandfathering
12 in combined with the significance, right?

13 A. Correct.

14 Q. For this one, there's no historical, but it's
15 just, you're saying, it's so important, Leapfrog feels
16 it has to impute?

17 A. Correct.

18 Q. Okay. Okay. Let's leave it at that.

19 A. Okay.

20 MR. CRAIN: All right. I think we've been
21 going about an hour. Do you mind if we take a break?

1 MS. LAWSON: That's fine.

2 MR. CRAIN: Okay. Courtney, are you good?

3 MS. WOOD: Uh-huh.

4 THE VIDEOGRAPHER: This marks the end of media
5 unit number six. We're going off the record. The time
6 is 3:26 p.m.

7 (Whereupon a short break was had, after
8 which the proceedings continued as
9 follows:)

10 (Exhibit No. 25 was marked for
11 identification as of 9/25/2025.)

12 THE VIDEOGRAPHER: This marks the beginning of
13 media unit number seven. We're going back on the
14 record. The time is 3:43 p.m.

15 BY MR. CRAIN:

16 Q. Thank you, Dr. Austin.

17 So I've handed you what has been marked as
18 Exhibit 25. Do you see that document?

19 A. Yes.

20 Q. And this is an email from you to what I think
21 is the safety grade expert panel. Do you see that?

1 A. Yes.

2 Q. Okay. And the subject is: Final updates to
3 Leapfrog Hospital Safety Grade methodology for Fall of
4 2024. Do you see that?

5 A. Yes.

6 Q. And generally, can you tell me what this email
7 is?

8 A. This email is an email to the expert panel with
9 the attachment of the final updates to the safety grade
10 methodology for Fall of 2024.

11 Q. Okay. And you say, "Based on the expert
12 panel's thoughtful input and guidance, Leapfrog has
13 decided to move forward with updates to imputation
14 methodology used in the Hospital Safety Grade, effective
15 Fall '24." Do you see that?

16 A. Yes.

17 Q. Okay. Fall of 2024. Sorry. I think I said
18 that wrong. Do you see that as well?

19 A. Yes.

20 Q. Okay.

21 Now, just for the record, I want to be

1 clear. Did Leapfrog decide to adopt this methodology,
2 or did the expert panel decide to adopt it?

3 A. Leapfrog makes all the decisions about their
4 ratings and ratings programs. The work of the expert
5 panel, expert panels, myself, is all in a recommendation
6 advisory capacity.

7 Q. Okay. And are you aware of any document in
8 which the expert panel weighed in on this final proposal
9 as a group?

10 A. Not that I am aware of. Not that I'm aware of.

11 Q. Okay.

12 Do you know sitting today whether the
13 entire expert panel approved of this path forward?

14 A. We did not query the expert panel about whether
15 they approved this or not.

16 Q. Okay. Is it your view that they did approve
17 it?

18 A. It is -- from my point of view, we heard their
19 input and guidance. Leapfrog made a decision of how it
20 wanted to move forward, and we communicated that to the
21 expert panel.

1 Q. Okay.

2 Okay. All right. You can set that aside.

3 MR. CRAIN: Okay. I want to move on to another
4 topic. Tab 15, please. This will be Exhibit 26.

5 (Exhibit No. 26 was marked for
6 identification as of 9/25/2025.)

7 BY MR. CRAIN:

8 Q. All right. So Dr. Austin, you have in front --
9 well, what do you have in front of you?

10 A. I have in front of me our 2013 prepublished
11 ahead of print publication from the Journal of Patient
12 Safety.

13 Q. And we talked about this document a little bit
14 earlier today, right?

15 A. Correct.

16 Q. Okay. This is the document that was peer
17 reviewed that analyzed the methodology at least as it
18 stood back in 2023, right?

19 A. This was the methodology in 2012, early 2013.

20 Q. Okay. And you are the lead author on this
21 paper, correct?

1 A. Correct.

2 Q. As well as it looks like other folks on the
3 expert panel, safety grade expert panel?

4 A. Correct.

5 Q. And I see, for instance, Dr. Romano is here,
6 right?

7 A. Correct.

8 Q. Okay.

9 I want to ask you a few questions about
10 this. I'm going to go to -- starting at the top, do you
11 see the little -- on the left side at the top it says
12 "Methods."

13 A. Yes.

14 Q. And it says: "The Leapfrog Group sought advice
15 [sic.] from a panel of national patient safety experts
16 to develop a composite score." Do you see that?

17 A. Yes.

18 Q. Does that describe generally what this paper is
19 about?

20 A. The paper describes how -- the process Leapfrog
21 used to develop a composite score.

1 Q. Okay. And it says, the next sentence --

2 A. And we do some analyses of early rounds of the
3 grades to demonstrate what that looks like.

4 Q. Some early rounds of the grades to
5 demonstrate -- say more about what you mean.

6 A. Yeah. So let me look in the -- so we had done
7 some data analysis using composite safety scores for
8 2,652 general acute care hospitals, and we calculated
9 safety scores for those.

10 Q. Okay.

11 A. And we show that in figure one.

12 And then in tables two and three, we did
13 some analysis to look at how those safety scores varied
14 by different hospital characteristics, as well as by
15 state in the United States.

16 Q. Okay. And this is the document that we saw
17 that was linked to Leapfrog's website, right?

18 A. Correct.

19 Q. Okay.

20 I want to go to page 4, and I think it's
21 Bates number 668.

1 A. Yes.

2 Q. And there's a section, Dealing with Missing
3 Data. Do you see that?

4 A. Yes.

5 Q. And it says: "Although the expert panel
6 selected nationally reported measures, some data were
7 missing for hospitals that did not report to The
8 Leapfrog Group, and other data were missing because
9 hospitals did not meet CMS's minimum sample requirements
10 to publicly report their results."

11 Do you see that?

12 A. Yes.

13 Q. So this is the section that's, for lack of a
14 better word, dealing with missing data, right?

15 A. Correct.

16 Q. Okay.

17 So the next paragraph lays out, what it
18 looks like, five possible approaches for assessing
19 hospital performance when data were missing. Do you see
20 that?

21 A. Yes.

1 Q. Okay. And I'm going to not march through, but
2 it looks like number four is: "Give the hospital zero
3 credit for the measure." Do you see that?

4 A. Yes.

5 Q. And that's not -- Leapfrog has never done zero,
6 right?

7 A. Correct.

8 Q. They've done limited achievement, correct?

9 A. Correct.

10 Q. Okay. And limited achievement, just to be
11 clear, is the lowest measure, which can range anywhere
12 from 5 to 25 depending on the measure, right?

13 A. Correct.

14 Q. Okay.

15 And then number five says: "Exclude the
16 measure and recalibrate the weights for the affected
17 hospitals using only those measures for which data are
18 available." Right?

19 A. Correct.

20 Q. Now, the -- if you look at -- further down
21 there's a paragraph that says "After." Do you see that?

1 A. Yes.

2 Q. Okay. And it says: "After conducting
3 sensitivity analyses using each of the above approaches,
4 the panel recommended approach number five to address
5 missing data, excluding the measure for a hospital and
6 recalibrating the weights for those measures for which
7 performance data were available, for most measures."

8 Do you see that?

9 A. Yes.

10 Q. Okay. And was that generally the approach that
11 Leapfrog took in the ensuing years?

12 A. That was the approach Leapfrog used initially
13 with the hospital safety grades.

14 Q. Okay.

15 A. As previously mentioned, Leapfrog has evolved
16 its imputation approaches, working through actually at
17 least four out of the five here.

18 Q. Fair enough, yeah. So it's been a moving
19 target.

20 A. It's been evolving.

21 Q. Evolving. Fair enough.

1 So then the paragraph keeps going. The
2 next sentence is -- let's see. It's on the top of page
3 4 on the right side. "In this way." Do you see that?

4 A. Yes.

5 Q. "In this way, we avoided making questionable
6 assumptions about the performance of hospitals with
7 missing data, and we also maintain variation of the
8 final calculated scores by not imputing identical values
9 for all missing observations."

10 Do you see that language?

11 A. Yes.

12 Q. Okay.

13 So at least as of 2013, Leapfrog -- this
14 group of authors peer reviewed, came to the conclusion
15 that excluding the measure was the way to avoid making
16 questionable assumptions about the performance for
17 hospitals. Do you see that?

18 A. Yes.

19 Q. Okay. That changed, right?

20 A. That has evolved.

21 Q. Okay. Is it your view that Leapfrog is making

1 questionable assumptions today about the performance of
2 hospitals?

3 A. I don't believe that to be true.

4 Q. Okay. What's changed between this analysis and
5 today?

6 A. So what has changed is that the -- that we've
7 actually evolved through different imputation
8 approaches. So we started with number five, right.
9 Then we moved to number two, imputing based on other
10 available data. Then we moved to number one, which is
11 imputing performance at the national mean or median,
12 although we did that by cohorts. And then we eventually
13 landed here now at number three, which is imputing a
14 score above or below the median or mean.

15 So all of these are valid imputation
16 approaches. I think the choice of an imputation
17 approach needs to be in the context of sort of time,
18 place, situation.

19 So in 2012, when Leapfrog rolled out these
20 hospital safety grades, hospitals did not know these
21 were coming. So that needed to be sort of the context

1 in which an imputation decision was made.

2 If we fast-forward to 2024, now we've been
3 issuing safety grades for 25 rounds. Hospitals are very
4 aware of the grades. They're very aware of the measures
5 that go into the survey, and so you might have your
6 imputation approach evolve with that.

7 Q. So the assumptions change?

8 A. I don't know if assumptions have changed, but
9 the context has changed.

10 Q. So let me -- so first going back, you said
11 number three, impute a score above or below the median
12 or mean; e.g., minus one standard deviation. Do you see
13 that?

14 A. Yes.

15 Q. That's not what Leapfrog does today, right?

16 A. It is imputing a score below the mean.

17 Q. Below the mean, fair, but not by one standard
18 deviation, right?

19 A. That was just an example of how that could be
20 operationalized.

21 Q. The measure of limited achievement is more than

1 one standard deviation below, right?

2 A. I have not looked at a distribution of scores
3 to be able to answer that.

4 Q. Do you have an estimate as to what -- how much
5 lower than the standard deviation below -- one standard
6 deviation below the mean it is?

7 A. I don't know what that would be.

8 Q. Okay.

9 Okay. So going back, do you recall what
10 the questionable assumption the authors were worried
11 about in this paper was?

12 A. So I think the biggest concern was around
13 option number four, which would be to give the hospitals
14 zero credit for not reporting to Leapfrog.

15 Q. Why is that the biggest concern?

16 A. That was a concern in that hospitals didn't
17 know that this was coming, that we weren't really being
18 fair to hospitals to just assign zero right from the
19 get-go for not reporting.

20 Q. Is it more fair to assign -- would it be more
21 fair to assign zero now?

1 A. From my point of view, it feels like the
2 context and times have changed, and so I would say, yes,
3 that would feel like a more fair decision to make.

4 Q. More fair. Okay.

5 Is it more or less fair than limited
6 achievement?

7 A. It's probably less fair to assign zero than
8 limited achievement. With limited achievement,
9 hospitals are getting some credit. They're not getting
10 zero credits.

11 Q. No one gets zero, right?

12 A. No one gets zero.

13 Q. Okay. Zero is not an available score, correct?

14 A. Correct.

15 Q. Okay.

16 Then so the questionable assumption, just
17 to make sure I understand it, is about the startup of
18 the safety grade, as opposed to assumptions about
19 performance generally?

20 A. It's assumptions about the rollout of the
21 imputation and whether or not it was fair to assign a

1 score that penalized hospitals when they didn't know
2 that the safety grades were coming.

3 Q. Do you know if that language is in this paper?

4 A. I'm not sure that that -- I would have to
5 reread it.

6 Q. I mean, if you want to take a second and read
7 this section, which I think is the only section dealing
8 with this and just goes to the next page, I'm curious
9 does it articulate that as the questionable assumption
10 in here.

11 A. So in the -- that paragraph at the top of page
12 4, in the second paragraph it says: Finally, the third
13 and fourth approaches were rejected to avoid creating a
14 structural bias in favor of Leapfrog reporting
15 hospitals.

16 So as I mentioned, there was a concern
17 about doing that right from the get-go.

18 Q. But that doesn't say get-go, though. It's
19 talking about reporting versus nonreporting, right?

20 A. It was at that -- the article was written at a
21 point in time with experience only up until that point

1 of time, and that was our experience up 'til that point.

2 Q. Is there any structural bias today in favor of
3 reporting hospitals?

4 A. There are hospitals that report to the Leapfrog
5 Hospital Survey that score limited achievement. So a
6 score of limited achievement is not just for hospitals
7 that don't report. There are some hospitals that report
8 that receive that score as well.

9 Q. What does structural bias mean?

10 A. I guess in that context I would think of it as
11 some sort of bias in how we assign scores based on
12 whether they report or don't report to Leapfrog.

13 Q. And so based on that definition, you're still
14 maintaining there's no structural bias in favor of
15 reporting hospitals?

16 A. Based on what we just discussed, I would say
17 there is a structural bias against nonreporting
18 Leapfrog -- nonreporting hospitals.

19 Q. Okay. There is a structural bias?

20 A. There is a structural bias.

21 Q. Okay. That makes sense. Okay.

1 And that's one of the reasons this group of
2 authors, which included yourself and many of the safety
3 grade expert panelists, like Dr. Romano, rejected this,
4 it looks like, the third and four approaches, right?

5 A. At that point in time.

6 Q. Okay. And your position is the structural bias
7 has changed?

8 A. It's not that it has changed. It is more
9 apparent and can be addressed, right. So in the early
10 days of the safety grade, hospitals didn't even know
11 these grades were coming. A lot of them had never
12 completed the Leapfrog Hospital Survey.

13 Fast-forward 12 years, we're in a different
14 place where hospitals are very aware of the safety
15 grades. They're very aware of the survey, and so the
16 context has changed.

17 Q. So just to be clear, when you say addressed,
18 that's not addressing within the methodology. That's an
19 addressing in the context of hospitals could decide to
20 report?

21 A. Correct.

1 Q. Got it.

2 So the methodology doesn't take any
3 measures to address that structural bias?

4 A. Correct.

5 Q. Okay.

6 Okay. And then the other -- if you keep
7 going on that paragraph, it says: "By scoring hospitals
8 on" -- tell me when you're ready.

9 "By scoring hospitals on the available
10 data, the composite scores were based on what was known
11 about the hospital's performance, with no penalties for
12 missing data."

13 Do you see that?

14 A. Yes.

15 Q. Okay. Now, that also is different for today,
16 right?

17 A. That is different than today.

18 Q. Okay.

19 And at this time, scoring hospitals based
20 on what was known about the hospital's performance was
21 something this group of authors deemed advisable, right?

1 A. So to be clear, what we're representing is the
2 Hospital Safety Grade methodology. Not all authors were
3 part of the expert panel. And just to remind you, all
4 of the decisions about the methodology are ultimately
5 Leapfrog's to make.

6 Q. Yes.

7 A. So what we're writing up is the implications of
8 that decision. So when you asked about whether authors
9 agreed, to me it's not an agreement or disagreement.
10 It's were we stating what the facts were at that time.

11 Q. Okay. No, that's fair. So I got it. So
12 you're saying it's an empirical observation?

13 A. Correct.

14 Q. So the observation is by scoring hospitals on
15 the available data, the composite scores were based on
16 what was known about the hospital's performance with no
17 penalties for missing data. You're saying, just to make
18 sure I understand, you're not making a judgment about
19 whether that's good or bad. You're saying it's what's
20 being done?

21 A. Correct.

1 Q. Okay. Got it.

2 Now, this is the paper that Leapfrog touts
3 as having peer reviewed its methodology, right?

4 A. Correct.

5 Q. But there are multiple components, at least in
6 this paragraph that we've seen, that don't apply
7 anymore, right?

8 A. There are -- can you repeat the question?

9 Q. So we've walked through this paragraph about
10 different observations, the questionable assumptions,
11 the structural bias, and then the penalties for missing
12 data, all of which you said are not what Leapfrog does
13 today. They're not reflective of the methodology
14 Leapfrog uses today, correct?

15 A. Correct.

16 Q. Is it fair to say that this paper is a peer
17 reviewed assessment of the methodology today?

18 A. I'm going to be a little careful because I
19 don't know if Leapfrog's website says that it's a peer
20 reviewed of today, right. It's a peer reviewed of their
21 methodology, right.

1 So I'll go back to the previous point that
2 I think the overall structure of the composite score,
3 that it's based on two domains of measures, the data
4 sources, we're going to do relative weights, has
5 remained consistent and constant through time.

6 Have some of the individual decisions about
7 imputation -- obviously, some of that has evolved and
8 changed. So I don't know how to say whether or not it's
9 a fair representation of Leapfrog's methodology or not.

10 Q. Do you agree, yes or no, that Leapfrog's
11 current methodology has been peer reviewed?

12 A. Are you speaking of the Fall 2024 methodology?

13 Q. The one that's operative today.

14 A. I think it sort of depends on your definition
15 of what we mean by methodology. And I don't mean to get
16 into semantics, but I would still come back to like the
17 general structure of all of this is still the same.
18 Some of the nuance differences are different, but that
19 happens continuously throughout the last 12 years.

20 So I don't know how you would write a new
21 paper every time we change one measure or re-weight one

1 measure.

2 Q. So we talked about, maybe an hour ago, that the
3 imputed measures are significant, right?

4 A. I don't know if that's what we discussed.

5 Q. Okay. You talked about how they're
6 clinically -- they matter, right?

7 A. Correct. They're important elements of patient
8 safety.

9 Q. Yes.

10 A. Yes.

11 Q. And they weight quite heavily, right?

12 A. They make up somewhere between 20 and
13 30 percent.

14 Q. Yes, as we talked about.

15 A. Yeah.

16 Q. Is it -- so 30 percent, 20 to 30 percent of the
17 methodology is derived from an imputation model that
18 this paper did not comment on, correct?

19 MS. LAWSON: Object to form. Go ahead.

20 THE WITNESS: As listed under the imputation
21 methods, one of them is exactly what we're doing today.

1 BY MR. CRAIN:

2 Q. Which one? Three?

3 A. Number three.

4 Q. Okay. Impute a score below the mean, correct?

5 A. Correct.

6 Q. Okay. I guess this doesn't say how much far
7 below, right?

8 A. Correct.

9 Q. Because if the means that we saw earlier from
10 Ms. Campione's emails were in the 70s, 80s, and 90s, and
11 the imputation is 15, was that the type of difference
12 below the mean that you were contemplating when you
13 wrote this piece?

14 A. I think there was room for -- there was room
15 for decisions to be made around number three and what
16 sort of score above or below the mean or median. The
17 minus one standard deviation was just an example.
18 Obviously, number four is a more extreme example of
19 zero. So there's a range of options in between those
20 two.

21 Q. Okay.

1 So then I guess going back to my question,
2 we've talked about the imputation methodologies being 20
3 or 30 percent, being significant. Is it fair to say
4 that the current methodology has been peer reviewed
5 given that that substantial portion of it was never
6 reviewed?

7 A. I don't know how to answer that. I feel like
8 it is fair to say that because the primary structure of
9 the methodology has remained the same. Now, others
10 could have a different assessment of that. Some could
11 say, oh, wow, the imputation approaches make this
12 nonrepresentative. I guess that's just a disagreement
13 in how maybe we see the world.

14 Q. Okay. Fair enough.

15 So let me ask this question. The
16 imputation model, has that been peer reviewed?

17 A. No.

18 Q. Okay.

19 Okay. You can set that aside.

20 MR. CRAIN: Let's go to tab 21. This will be
21 Exhibit 27.

1 (Exhibit No. 27 was marked for
2 identification as of 9/25/2025.)

3 BY MR. CRAIN:

4 Q. Okay. So this is another, you see at the
5 bottom, Armstrong-produced document?

6 A. Yes.

7 Q. Do you recognize this one?

8 A. Yes. Well, it's been a while.

9 Q. What does it look like?

10 A. It says it's the meeting agenda. What it
11 actually represents is notes from the meeting.

12 Q. Maybe somebody built out the notes within the
13 agenda?

14 A. Correct.

15 Q. Okay.

16 A. And we just forgot to change the title.

17 Q. Any reason to think this isn't a true and
18 accurate depiction?

19 A. No.

20 Q. So I just have a couple of questions. If you
21 go to -- where is it again -- page 76, do you see theirs

1 is a big, bold "Unintentional consequences of how we
2 currently treat missing data"? Do you see that header
3 on page -- it's the first page?

4 A. Yes.

5 Q. Okay. And I want to go to page 2. And do you
6 see the bullet number two?

7 A. Yes.

8 Q. It says: "Imputation of the score when we have
9 missing data."

10 A. Yes.

11 Q. And it says: "Matt mentioned that expert panel
12 discussed this in the past and did not feel it supported
13 the goal of the safety grade." Do you see that?

14 A. Yes.

15 Q. So I want to break this down a little bit.

16 Now, do you recall making this statement at
17 an expert panel meeting? I recognize it's a while ago.

18 A. I don't remember --

19 Q. Okay.

20 A. -- that conversation.

21 Q. Is it accurate, to the best of your knowledge

1 today, that, looking at the top bullet, imputation of
2 the score when you have missing data is something the
3 expert panel discussed in the past?

4 A. So, yes, we have discussed imputation with
5 them.

6 Q. Okay. Just to build out the --

7 A. Right. Yes, that's fine.

8 Q. Just to get on the same page.

9 A. Yes.

10 Q. And now it says: Did not feel it supported the
11 goal of the safety grade.

12 A. I don't know what that refers to.

13 Q. Okay.

14 A. I will take ownership that the note-taking here
15 may not have been all that accurate, because I don't
16 even know what that refers to because I don't think they
17 -- they have never indicated that imputing scores
18 doesn't support the goal of the safety grade.

19 Q. Okay.

20 A. So I'm thinking that there might have been some
21 nuance to that that wasn't captured in the notes.

1 Q. What could the goal have been referring to?

2 A. I don't know for sure.

3 Q. Okay.

4 So if you go to the next bullet, do you see
5 how -- "Imputing scores for individual measures, like
6 safe practices, would incentivize them to report on the
7 survey." Do you see that?

8 A. Yes.

9 Q. First of all, does that reflect that the safety
10 grade expert panel considered imputing for safe
11 practices?

12 A. That was something that was, I guess, discussed
13 at that meeting.

14 Q. And as we talked about before, was decided
15 against, right?

16 A. Leapfrog has never imputed scores for --

17 Q. Safe practices?

18 A. -- safe practices.

19 Q. One or two?

20 A. One or two.

21 Q. Now, imputing -- it says: "Imputing scores for

1 individual measures would incentivize them to report on
2 the survey." Is that different from the goal reflective
3 in bullet one?

4 A. That I don't know how those connect.

5 Q. We've talked a little bit today about what the
6 goals of the safety grade are. I think we've talked
7 about information, right, as one goal, getting
8 information out there, correct?

9 A. Correct.

10 Q. We've talked about accuracy as another goal,
11 correct?

12 A. Yes.

13 Q. Are there any other goals that you can think
14 of, of the safety grade, that we haven't -- besides
15 those two?

16 A. None come to -- immediately come to mind.

17 Q. Okay.

18 So looking at this bullet, you noted
19 earlier today you endeavor to be accurate in these
20 notes, right?

21 A. That is our goal.

1 Q. And goal -- we talked about goals.

2 So you have no recollection or
3 understanding as to why imputation, at least at this
4 time, would be deemed not supportive of the goal of the
5 safety grade, at least the two goals that we've talked
6 about?

7 A. Yeah. I do not understand how that note ties
8 to everything else I know and understand.

9 Q. Okay. So you just don't remember, or it just
10 doesn't make sense anymore?

11 A. I don't remember what that was intending to --

12 Q. To say?

13 A. To say.

14 Q. Okay. I have to ask.

15 Okay. Let me just see. Yeah. Okay. You
16 can set that aside.

17 MR. CRAIN: And then just one more historical
18 document. Can we do tab 30. This is Exhibit 28.

19 (Exhibit No. 28 was marked for
20 identification as of 9/25/2025.)

21

1 BY MR. CRAIN:

2 Q. Dr. Austin, you have in front of you an email
3 thread between you, Ms. Danforth, Mr. Card, and Emma
4 Domico. Do you see that?

5 A. Correct.

6 Q. Who is Emma Domico?

7 A. Emma was the research analyst who was working
8 for me at the time on the Leapfrog contract.

9 Q. What Ms. Joshi does now?

10 A. Correct. She was in between Jordan and Preeti.

11 Q. Got it.

12 And who is Mr. Card?

13 A. Mr. Card worked for The Leapfrog Group and was
14 the analyst who was supporting the Hospital Safety
15 Grade. So he preceded Alex.

16 Q. Got it.

17 So I want to just look -- so it's a little
18 bit of a confusing email, but I'm going to walk you
19 through at least how I think I read it. So go to the
20 bottom, which is the first one.

21 A. Yes.

1 Q. And it's from you and it's dated August 25th,
2 2021, right?

3 A. Yes.

4 Q. And just for context, is this around the time
5 where AHA was rescinding the license?

6 A. I don't know -- I don't know the timing of the
7 AHA license.

8 Q. Okay. Do you remember generally what was
9 happening in 2021?

10 A. I don't other than COVID was.

11 Q. Fair enough. We all remember that one.

12 A. Yeah, but I don't remember what -- I don't
13 remember the timing of the AHA data because that was all
14 between Leapfrog and --

15 Q. Got it. Okay.

16 So I will at least represent to you that
17 this was -- well, we'll go through the document.

18 A. Okay.

19 Q. So you write -- you say, "Missy, Andrew: Next
20 Friday is the HSG" -- Hospital Safety Grade. Yes? Is
21 that right?

1 A. Yes.

2 Q. Okay.

3 A. Correct.

4 Q. -- "expert panel call. As Emma and I were
5 walking through agenda items, we would benefit from your
6 input/expertise." Do you see that?

7 A. Yes.

8 Q. And I want to focus on number two and start
9 with the bold. Do you see there's two pieces of text.
10 There's a bold and a sort of grayer one on each line?

11 A. Yes.

12 Q. Okay. So let's start with the bold. You say,
13 number two: "How to score hospitals missing
14 process/structural measures. Are we looking for
15 suggestions on imputation methods?" Do you see that?

16 A. Yes.

17 Q. And then if you go to four, it says:
18 "Penalizing hospitals if they don't report. Is this
19 part of agenda item number two? And is Leapfrog really
20 open to this idea? If not, I don't want to keep asking
21 their opinions."

1 Do you see that?

2 A. Yes.

3 Q. Now, we'll come back to this, but I just want
4 to explain to you what the gray is. So if you go one
5 up, the prior page, you see Ms. Danforth writes: "See
6 below"?

7 A. Yes.

8 Q. Okay.

9 So the gray, is it correct to say, those
10 are her comments interlined with your agenda?

11 A. Yes.

12 Q. Okay.

13 So on number two, she says in response to
14 your agenda point, she says, "Yes, and the idea to
15 impute for all missing, including safe practices and HH.
16 I will send a follow-up to the email that Andrew sent."

17 So can you tell me generally what are you
18 proposing as an agenda item, and what did you
19 understanding her response was?

20 A. So what we were proposing as an agenda item was
21 to discuss with the expert panel our imputation methods

1 for process and structural measures.

2 Q. Okay.

3 A. And Missy suggested back the idea that maybe we
4 impute for all missing, including safe practices and
5 hand hygiene.

6 Q. Okay.

7 And then if you go to four, you say -- you
8 have a separate agenda item, right?

9 A. Correct.

10 Q. And it says: "Penalizing hospitals if they
11 don't report. Is this part of agenda item number two?
12 And is Leapfrog really open to this idea?" You all caps
13 "really." Do you see that?

14 A. Yes.

15 Q. So why were you all capping really?

16 A. So back to attachment 27, back to Old Town
17 Alexandria, the Hilton, that was actually a point where
18 the expert panel actually brought up the idea of moving
19 towards an imputation approach where -- to penalize
20 hospitals --

21 Q. Okay.

1 A. -- if they didn't complete the Leapfrog
2 Hospital Survey.

3 So even though it got implemented in 2024,
4 as far back as 2017 conversations were happening about
5 whether or not this was the direction to go into.

6 Q. Okay.

7 A. So in 2021, it was like, is Leapfrog open to
8 this? Are they not open to this? I don't want to keep
9 asking the expert panel over and over again about this
10 if Leapfrog is not open to moving in this direction.

11 Q. Okay.

12 A. So that was the intent of that.

13 Q. And by this direction, you mean a penalty?

14 A. It could be a penalty. It could be an
15 imputation below the mean or median. It could take many
16 different forms, and I don't think a specific proposal
17 had been floated at that point.

18 Q. Okay.

19 And then -- so look at her response. She
20 says: "Remove. This is really covered in number two."
21 Do you see that?

1 A. Correct.

2 Q. Okay. And it sounds like you agree with that?

3 A. Well, I agree that that decision is part of
4 imputation, right. So as we go back to the five
5 imputation methods, number three was one of the possible
6 options, right. So that is part of the imputation
7 discussion is do we impute that a hospital is an average
8 performer? Do we impute that they're a better
9 performer? Right? Like, those are all decisions around
10 imputation.

11 Q. So and when you say "those," you mean the
12 decision of whether to penalize a hospital is part of
13 the analysis of how to impute or whether to impute?

14 A. So there were a couple of approaches that could
15 be taken, right. So if we go back to number 27, Old
16 Town Alexandria, one suggestion from the expert panel
17 was, well, would we want to assign some sort of explicit
18 negative penalty.

19 So we wouldn't necessarily work that into
20 the imputation of individual scores, but we would take
21 so much off of the final score for not being

1 transparent. So that was one idea of how that could be
2 manifested. This could be other ways of manifesting it.

3 Q. Yeah. No, I get that. I'm just trying to
4 understand. So the agenda item number two is how to
5 score hospitals missing process and structural measures.
6 Do you see that?

7 A. Correct.

8 Q. And the question of penalizing hospitals is
9 bound up in that discussion as well, correct?

10 A. I think what Missy was saying is she didn't see
11 that as being a unique part of the agenda, that that
12 would be -- could be incorporated into number two.

13 Q. Well, she said covered in number two, right?

14 A. Correct.

15 Q. And you agree with her?

16 A. I would agree that that, as we've discussed,
17 that that is an option for imputation.

18 Q. And is it fair to say over the years when this
19 topic has come up, the notion of penalizing hospitals
20 has been covered by the topic in number two?

21 A. It's been brought up in that space, yeah.

1 Q. Okay. Okay.

2 Let me take another look. I think that may
3 be it for this email. Yeah, we can set this one aside.

4 So I'm going to shift gears again. We're
5 getting there.

6 A. How many gears are there on this car?

7 Q. I've got a lot of gears. I've got a lot of
8 gears. We're getting close to the end gear. I've only
9 got so much time.

10 I want to talk about the 2019 white paper.

11 A. Okay.

12 Q. Okay? Oh, you seem excited for it.

13 A. I love it.

14 Q. Okay.

15 MR. CRAIN: So I want to start with -- let's go
16 to tab 58. And this is Exhibit 29.

17 (Exhibit No. 29 was marked for
18 identification as of 9/25/2025.)

19 BY MR. CRAIN:

20 Q. So, Dr. Austin, you see this is an email from
21 you to Ms. Campione, Ms. Danforth, and Ms. Bailey from

1 2025.

2 A. Yes. So this is not in reference to the
3 2019 --

4 Q. Yes.

5 A. -- report.

6 Q. It's the lives saved, lives lost, right?

7 A. Correct.

8 Q. Okay. This was the update you were talking
9 about, right?

10 A. This is the update that we've worked on but
11 have not published.

12 Q. Okay. I want to walk through this one, if I
13 can.

14 A. Okay.

15 Q. Okay. So maybe I was a little unfair. I'm
16 starting with 2025 and then I want to lead into the
17 white paper --

18 A. Okay.

19 Q. -- but I want to talk about your numbers here.

20 A. Okay.

21 Q. Okay?

1 So let's go to page -- so I want to look
2 at -- you see Ms. Campione's email on the bottom? It's
3 from her to you, and there's a table on page 0900. Do
4 you see that?

5 A. Yes.

6 Q. Okay. Now, this table -- tell me what this
7 table is.

8 A. So what this table represents is for three
9 points in time, 2016, 2019, and 2025, we have estimated
10 the number of lives lost due to preventable medical
11 mistakes that are captured through the Leapfrog Hospital
12 Safety Grade measures.

13 We also have estimated the number of lives
14 that could be saved if "B," "C," "D," and "F" hospitals
15 all performed as well as "A" hospitals. So we've
16 estimated that at three different points in time.

17 We also have done relative comparisons
18 between "B" and "A" hospitals, "C" and "A", "D" and "A"
19 and "F", and then we break the numbers down.

20 Q. So the chart that we're looking at here on page
21 0900, is it correct that the 2016 column reflects the

1 analysis done on the 2016 white paper, and the 2019
2 reflects the update?

3 A. Correct.

4 Q. Okay. And 2025 reflects, at least in draft
5 form, what the current numbers would be?

6 A. They represent, if we were to maintain the same
7 methodology we used in 2019, what the numbers would look
8 like in 2025.

9 Q. Okay. Can you -- and I'm happy to give you
10 documents if it's helpful, but can you generally
11 describe what that methodology is?

12 A. Yep.

13 Q. And if you need a document, we can get you that
14 document.

15 A. No, no. I can.

16 So what we do is for each grade, "A", "B",
17 "C", and we lump "D" and "Fs" together --

18 Q. Why is that?

19 A. Primarily due to small sample sizes of "F"
20 hospitals.

21 Q. Got it.

1 A. We're looking at less than 20 or 25.

2 Q. Okay.

3 A. For each of the outcome measures that are
4 included in the Hospital Safety Grade, we calculate a
5 mean incidence rate for each cohort of hospitals. So
6 "A" hospitals, how do they do on foreign objects
7 retained? "B" hospitals, how do they do on foreign
8 objects retained?

9 So we have basically an estimated incidence
10 rate of these events by hospitals.

11 Q. And just to translate that, estimated incidence
12 rate means how many times this thing happened?

13 A. Correct.

14 So we display it as a percentage, right?
15 You can think of like, oh, 1.2 percent of patients
16 develop a central line associated blood stream infection
17 in an "A" hospital. Some of those measures, outcome
18 measures are applicable just to patients who have had
19 surgery. Some are just applicable to patients who have
20 been in the intensive care unit.

21 And so we discount the total patients based

1 on who those -- who those measures apply to.

2 Q. Yep.

3 A. Then in terms of estimating the lives lost,
4 from the literature, we've identified the attributable
5 mortality rate to that event happening to a patient in a
6 hospital and their -- yeah, attributable mortality rate.

7 So as previously discussed, like for
8 central line associated blood stream infections, one out
9 of every seven patients who develop C infection in the
10 hospital will die.

11 And we're using that same attributable
12 mortality rate for all categories of hospitals. So that
13 is one of our limitations. We may have variation in
14 that "A" hospitals could actually have a lower mortality
15 rate than "D" and "F" hospitals, but we're making the
16 assumption of that mortality rate.

17 And so that is -- and then in addition to
18 the outcome measures, we're also using ICU physician
19 staffing because there is strong evidence linking
20 improvements in intensivists managing and comanaging
21 patients in the ICU and reduced mortality hospital-wide.

1 Q. Okay.

2 A. Well, both in the ICU and hospital-wide. And
3 so that's the one process and structural method that we
4 use as part of the analysis.

5 Q. So looking at this chart again, just as a
6 grounding mechanism, it looks like to me that there are
7 19 outcome measures and 1 process measure. Is that
8 right? That's what I'm seeing, the 19 and the 1.

9 A. Correct.

10 Q. Okay. And the one is, as you said, ICU
11 physician staffing, correct?

12 A. Correct.

13 Q. Okay. And so basically you're taking the
14 incidence times the mortality and outputting the amount
15 of estimated deaths?

16 A. We are for the outcome measures.

17 Q. Okay.

18 A. What we're doing for ICU physician staffing is
19 we're going back to the historical literature that
20 established the standard to say that there is a
21 30 percent reduction in hospital-wide mortality between

1 no intensivist and high intensivist staffing.

2 And so we actually go back to seventh or
3 eighth grade math, and we have the slope of a line. And
4 this is where hospitals are now at, and, therefore, if
5 we calculate the slope, it would be this point on the
6 line.

7 Q. Oh, boy. You're testing my math skills.

8 A. I test my own as well.

9 And so basically, hospitals that are fully
10 implemented we think have -- we estimate that they have
11 achieved the full impact of that.

12 Q. Okay.

13 A. And if hospitals are somewhere along that
14 continuum, they've achieved a portion of that impact.

15 Q. Okay.

16 So the mortality rating for ICU physician
17 staffing, am I right that it is based on a 2004 article
18 by Dr. Pronovost?

19 A. It's definitely by an article by Dr. Pronovost.
20 I couldn't speak to the year.

21 Q. Okay. Can we grab it?

1 A. I don't disagree with you that it was 2004.

2 Q. You don't know for sure?

3 A. I don't know for sure.

4 Q. I'll represent to you it's 2004. We may as
5 well pull it out. We have it if you want to take a
6 look.

7 A. Okay.

8 Q. My question is have you looked at the research
9 that's come sense to test that estimate?

10 A. So Leah Binder at The Leapfrog Group has asked
11 us to look at that. We have not found anything recently
12 that would be a better way for us to estimate that
13 value.

14 Q. Okay.

15 So I guess, one, have you heard of --
16 there's an article by -- do you know who Deena Kelly
17 Costa is?

18 A. I do not.

19 Q. Okay. I guess I'll just mark it to see if
20 you've seen this article before.

21 MR. CRAIN: Let's mark it as Exhibit 30.

1 (Exhibit No. 30 was marked for
2 identification as of 9/25/2025.)

3 BY MR. CRAIN:

4 Q. Does this article look familiar to you at all?

5 A. I'm not familiar with it.

6 Q. Okay.

7 So the title is: The Association Between
8 Daytime Intensivist Physician Staffing and Mortality in
9 the Context of Other ICU Organizational Practices: A
10 Multicenter Cohort Study.

11 Do you see that?

12 A. Yes.

13 Q. Do any of the authors -- are they familiar to
14 you, Dr. Wallace, Dr. Kahn, and Dr. Costa?

15 A. I do not know any of them.

16 Q. Okay.

17 Do you know the journal here?

18 A. I am familiar with critical care medicine, yes.

19 Q. Reputable journal?

20 A. As far as I know.

21 Q. Okay.

1 Now, I want to go down to Measurements and
2 Main Results, and there's a sentence just at the end
3 which seems to sort of give the bottom line starting
4 with "there." Do you see that?

5 A. Yes.

6 Q. "There was no association between daytime
7 intensivist physician staffing and in-hospital
8 mortality. After adjusting for interprofessional rounds
9 and protocols for mechanical ventilation, the effect of
10 daytime intensivist physician staffing remained
11 nonsignificant."

12 Do you see that?

13 A. Yes.

14 Q. I know you haven't read this article, but at
15 least based on the first page -- and feel free if you
16 want to flip through -- does this undermine the
17 assumptions that the white paper makes with respect to
18 IPS and mortality?

19 MS. LAWSON: Object to form.

20 THE WITNESS: So I think in research there
21 is -- I don't think one can look at one study

1 individually to assess whether there is a relationship
2 or not a relationship, right. I think if we think about
3 -- through humankind, there's lots of studies that have
4 been done. One will show red wine is good for the
5 heart. The next one will show, oh, no, you should stay
6 away from alcohol, right. And over time we sort of
7 build a body of literature.

8 What an additional -- one of the strengths
9 of the Pronovost article, if I'm remembering it
10 correctly, is it was actually a meta analysis. So it
11 actually looked at 15 to 20 different studies and
12 synthesized those results.

13 So it's not to say that every study is
14 going to show a relationship, but one study doesn't
15 necessarily negate a wider body of literature.

16 BY MR. CRAIN:

17 Q. Okay.

18 This is dated 2015. Do you see that?

19 A. Correct.

20 Q. And you've not seen this article, right?

21 A. I have not seen this.

1 Q. Okay. Is it something that you think you
2 should review in the next iteration or no?

3 A. I would be happy to review it and see what we
4 come to in terms of a conclusion.

5 Q. Okay. Okay.

6 So I want to go back to -- I want to just
7 go back to the chart again.

8 A. Yeah. Okay.

9 MS. LAWSON: Is that Exhibit 29?

10 MR. CRAIN: Yeah, 29, the email and the invite.

11 BY MR. CRAIN:

12 Q. Now, I want to just look at the differences in
13 mortality, right. So when you look at -- just take --
14 starting with "D" and "F," right, at the bottom. Do you
15 see that?

16 A. Yes.

17 Q. It says, focusing primarily -- focusing on the
18 outcome measures. It says 1.46 in 2019. Do you see
19 that?

20 A. For "D" and "F," correct.

21 Q. Correct.

1 And is that, just to make sure I understand
2 the numbers, is 1.46, that's 1.46 deaths?

3 A. Correct.

4 Q. Okay.

5 And then if you go down to "C," it's 1.40,
6 right?

7 A. Correct.

8 Q. To "B," it's 1.31, right?

9 A. Correct.

10 Q. And 1.22 for "A." Do you see that?

11 A. Correct.

12 Q. Is the difference just for outcome measures
13 between 1.22 for an "A" and 1.46 statistically
14 significant in your view?

15 A. I would need to do a statistical test to
16 determine whether that there is a statistical difference
17 there.

18 Q. Okay. It's not twice, right? There are not
19 two times as many deaths between -- in that comparison,
20 right?

21 A. Not in just comparing the outcome measures.

1 Q. Just comparing the outcome measures.

2 A. Correct.

3 Q. With respect to the ICU physician staffing,
4 fair to say the difference is more substantial, right?

5 A. Correct.

6 Q. Is the -- would you agree that the analysis
7 places -- like the number of deaths in the analysis is
8 significantly weighted to the ICU physician staffing
9 metric?

10 A. Yes. Although, there is a methodological
11 clarification that I should make because this will help
12 explain it to some degree. We actually take the number
13 of outcome measures, or we take the lives lost in the
14 outcome measures and actually divide that by two.

15 Q. Okay.

16 A. And the reason we do that is because we
17 recognize that there are some deaths that are probably
18 occurring in the ICU that are a result of not good care,
19 right.

20 So you may have developed a central line
21 blood stream infection. We didn't want to count that

1 twice, both in the outcome measures and the ICU
2 physician staffing.

3 So the methodological decision was to cut
4 the outcome measures in half. So we take each value and
5 divide by two so that we aren't double counting between
6 the two.

7 Q. And what was that based on? That's the
8 50 percent number?

9 A. Yeah, the 50 percent. That was just an
10 educated guess.

11 Q. Okay. Is it based on a study or is it based on
12 --

13 A. No. It was just sort of a collective wisdom of
14 people.

15 Q. The authors or other people?

16 A. Other people as well.

17 Q. Who were the other people?

18 A. So the initial work for this actually came out
19 of some work that The Leapfrog Group had done, Leah
20 Binder, with another consultant.

21 Q. Okay. Who is that?

1 A. I don't remember his name.

2 Q. Okay.

3 A. I can sort of picture him, but I don't remember
4 the name. And so it was out of that that the decision
5 was made to multiply it by 50 percent.

6 Q. Okay.

7 So if we look at the bottom, you're saying
8 that "D" and "F," the actual number is closer to 3 than
9 1.46?

10 A. Correct.

11 Q. Okay. Got it.

12 Okay. So then that's still I guess -- my
13 question still remains. The biggest difference, at
14 least it appears to me, between a "D" and "F" hospital
15 and an "A" hospital is the physician staffing mortality.
16 Is that right?

17 A. That is -- from what we're able to quantify in
18 terms of harm, that is where the biggest differences
19 are.

20 Q. Okay. And the mortality rating for that is
21 based on the Pronovost article, right?

1 A. Correct.

2 Q. Okay.

3 And then so let's go to another document.
4 I want to look primarily -- let's look at the chart,
5 actually, on the right side, so the 2025 metric.

6 A. Okay.

7 Q. Now, in all -- this is the first time, at least
8 for IPS and I think everywhere else, there's a slash.
9 Do you see that?

10 A. Yes.

11 Q. What does the slash reflect?

12 A. The slash is reflecting if we -- the value to
13 the right of the slash would be if we were to remove the
14 imputed scores for IPS.

15 Q. Yeah. And say more about that. You mean
16 remove the mortality for nonparticipating hospitals?

17 A. No. We would remove -- if a hospital had an
18 IPS score that was imputed, we would remove that from
19 the calculation.

20 Q. Okay. And that's the right side?

21 A. That is the right side.

1 Q. So the left side reflects -- tell me if this is
2 wrong. I'm just trying to understand. The left side of
3 the slash reflects the hospitals that are participating
4 with IPS scores based on their actual performance data,
5 and the right side includes nonparticipating hospitals
6 with the limited achievement assignment?

7 A. So the left-hand side would be the scores for
8 all hospitals that received a safety grade, including
9 those that were imputed.

10 Q. Okay.

11 A. The right-hand side would be just hospitals
12 that had a score reported through the Leapfrog Hospital
13 Survey.

14 Q. And that's the 80 percent of inpatient beds
15 we've been talking about?

16 A. Correct.

17 Q. Okay. Got it.

18 So the numbers are pretty different, right,
19 at least in certain categories?

20 MS. LAWSON: Object to form. Go ahead.

21 THE WITNESS: I don't know how you would define

1 pretty different.

2 BY MR. CRAIN:

3 Q. Fair enough.

4 If you go to "D" and "F," the difference is
5 7.98 on the left and 3.89 on the right. Do you see
6 that?

7 A. Correct.

8 Q. And if you go to "C," 4.92 and 2.52, right?

9 A. Correct.

10 Q. Now, the differences get smaller. So "B," it's
11 2.12 and 2.01, right?

12 A. Correct.

13 Q. And then "A," it's 1.53 versus 1.5, right?

14 A. Correct.

15 Q. And if I recall correctly, there were only two
16 hospitals that got an "A" with imputed scores, right?

17 A. Correct.

18 Q. So that -- did that explain why that's so close
19 together? Correct?

20 A. I would need to go back and look at the math,
21 but your statement about that there's two hospitals is

1 correct.

2 Q. Yeah. Okay.

3 Do you have a theory as to why the numbers
4 are so different left and right, at least for "D" and
5 "F" and "C"?

6 A. The difference between the two values is the
7 inclusion or exclusion of the imputed values.

8 Q. Is the number on the left or the right more
9 likely an accurate estimate?

10 MS. LAWSON: Object to form.

11 BY MR. CRAIN:

12 Q. Let me step back. You're trying to estimate
13 mortality of "A," "B," "C," "D," and "F" hospitals,
14 right?

15 A. Correct.

16 Q. You want to be accurate in the estimate as best
17 you can?

18 A. Yes, recognizing it's an estimate.

19 Q. Yes. So I'm going to posit that 4.92 versus
20 2.52 for the "C" hospitals, pretty different number of
21 deaths. Is that fair to say or you disagree? I mean,

1 it's almost double, right, on the left side.

2 A. That last part is true. It is almost double.

3 Q. So we'll just go with numerical. It's almost
4 double.

5 What is a more accurate estimate of the
6 mortality of "C" hospitals as a result of ICU physician
7 staffing? Is it 4.92 or is it 2.52?

8 A. I will say both are incorrect.

9 Q. Okay. I'm eager to hear why.

10 A. Well, one includes imputed values, which, by
11 definition, are not exact values.

12 Q. Okay.

13 A. The other one is excluding hospitals that we
14 don't have any data for. So there is some lives lost
15 attached to them. So both of them are actually -- both
16 of them are estimates in two different scenarios.

17 Q. You said a moment ago both of them are
18 incorrect.

19 A. Okay. Both of them are incorrect.

20 Q. Okay.

21 A. It's an estimate, so unless you hit it right on

1 the dot, an estimate is going to be incorrect.

2 Q. Which one is more incorrect?

3 A. I don't know how to judge that.

4 Q. Okay. So you don't know one way or another?

5 A. I don't know one way or another.

6 Q. Okay.

7 MR. CRAIN: So I want to take a look at a few
8 documents here. Give me one second. Oh, no wonder I
9 can't find it. It's actually in this document. Iason
10 knows them better than I do.

11 THE WITNESS: Which one?

12 BY MR. CRAIN:

13 Q. So this is Exhibit 30, what we were just
14 looking at -- oh, sorry, 29 I mean was the chart.

15 MS. LAWSON: 29.

16 MR. CRAIN: Yeah, Exhibit 29 with the chart.

17 BY MR. CRAIN:

18 Q. Okay. And this is from you to Ms. Campione,
19 Ms. Danforth, and Ms. Bailey, right?

20 A. Correct.

21 Q. Okay. So you send an email, and the tenor -- I

1 can read it all, but the tenor seems to be there's a
2 discussion about whether you include the imputed scores
3 in the mortality or not, right?

4 MS. LAWSON: Take a minute and read the email.

5 MR. CRAIN: Yeah, take a second.

6 (Witness peruses document.)

7 THE WITNESS: So, yeah, this is -- the tenor is
8 about the table that we just went through.

9 BY MR. CRAIN:

10 Q. Whether to include the imputed scores or not,
11 right?

12 A. Correct.

13 Q. Okay.

14 And you at the end say, "I would vote for
15 keeping the imputed IPS scores in place. My guess is
16 the averages with the imputed scores are closer to the
17 truth than averages excluding the imputed scores."
18 Right?

19 A. Correct.

20 Q. So what's that based on?

21 A. Well, I think I used the word "guess," so I

1 will qualify that. I guess it's somewhat informed by
2 that, you know, hospitals that choose not to disclose
3 likely may not be meeting Leapfrog's standards. Because
4 if they were meeting them, they would be more likely to
5 disclose them. So it was probably with that assumption.

6 Q. So that -- so okay. But it's multiple levels
7 of assumptions, right? I can build it out to see what I
8 mean.

9 So assumption one is that hospitals that
10 are not reporting are not meeting Leapfrog's standards,
11 right?

12 A. That is the assumption I just stated.

13 Q. And assumption two is that the failure to meet
14 Leapfrog's standards yields a higher mortality rate?

15 A. Correct, based on the literature.

16 Q. Okay. So it's an assumption, but you're saying
17 it's backed by literature?

18 A. Correct.

19 Q. And, again, meaning the Pronovost article?

20 A. Correct.

21 Q. Okay. So your guess is based on those two

1 assumptions?

2 A. Correct.

3 Q. Okay.

4 Do you have any understanding of where
5 Leapfrog is landing on this question, whether to include
6 the imputed or nonimputed?

7 A. I do not know.

8 Q. And just going back to the chart, I want to
9 just look at the numbers. Just go right to the top.
10 You see lives lost, lives saved? Do you see that?

11 A. Yes.

12 Q. Okay. And it's -- the numbers, again, you
13 know, are -- so I'll be factual about it. Lives lost,
14 if you exclude the imputed hospitals, it's about 30,000
15 fewer, right?

16 A. Correct.

17 Q. Okay. And if you exclude the imputed values,
18 it's also about 30,000 fewer on lives saved, right?

19 A. Correct.

20 Q. Okay. And so your view is that it is -- your
21 best guess is that those 30,000 are -- bear some

1 relation -- have some accuracy to them -- strike that.
2 That was a bad question. I know you were going to
3 object. And it was fair.

4 So let me ask another question then.

5 You said the numbers bear out the twice as
6 likely mortality point. Do you remember earlier in the
7 day we talked about Leapfrog says on its website that
8 Johns Hopkins researchers say you're two times likely to
9 die if you go to a "D" or an "F" hospital, as opposed to
10 an "A"?

11 A. I remember that conversation, but I don't
12 remember in what context.

13 Q. We were looking at the website, which we can
14 look at if someone will tell me the exhibit number, and
15 we talked about -- so maybe we can get that document out
16 just to ground us. I think it's exhibit --

17 MR. TOGIAS: It was tab 65.

18 MR. CRAIN: Sixty-five. So that's Exhibit 9.

19 MR. TOGIAS: Frequently asked questions.

20 MR. CRAIN: Yeah.

21 MS. LAWSON: It's on page 2.

1 MR. CRAIN: Yeah, I think that's right.

2 BY MR. CRAIN:

3 Q. Page 2 and it's under the second -- we talked
4 about -- remember this question? "Why should people
5 worry about a hospital's patient safety?" Do you
6 remember that?

7 A. Yes.

8 Q. And if you go to the end of that paragraph:
9 "All hospitals are not the same. Some hospitals are
10 much safer than others. John Hopkins Medicine
11 researchers estimate that patients are twice as likely
12 to die of a preventable problem at a "C," "D," or "F"
13 hospital than an "A" hospital, and over 50,000 lives
14 would be saved if all hospitals performed the way "A"
15 hospitals did."

16 Do you see that?

17 A. Yes.

18 Q. Okay. Now, first of all, the 50,000 lives,
19 based on this chart, going back to Exhibit 29, refers to
20 2019, right?

21 A. Correct.

1 Q. Okay.

2 Your 2025 numbers, I understand, are in
3 draft form, but it would either be 49,000 or 20,000
4 depending on the imputed scores, right?

5 A. Correct.

6 Q. Okay.

7 Now, this Johns Hopkins Medicine
8 researchers estimate that patients are twice as likely
9 to die of a preventable problem at a "C," "D," or "F"
10 hospital than an "A" hospital, do you see that?

11 A. Yes.

12 Q. Now, that -- is that based on the 2019 numbers?

13 A. Yes.

14 Q. Okay.

15 Now, you had said that that was also true
16 as for 2025, albeit in draft form. Do you recall that
17 testimony?

18 A. I think I mentioned that we were seeing
19 probably similar trends.

20 Q. Okay. Is that reflected here? Can you explain
21 to me just on this chart how that works?

1 A. Yeah. So I think Leapfrog took a little
2 liberty with the "twice," but if you take the 87 and the
3 91.8 --

4 Q. Where are you on that?

5 A. Sorry. 2019.

6 Q. Yep. Yep. I see that.

7 A. Those are close to 100 percent, or one could
8 make the argument, so that would be twice as likely --

9 Q. From 2019?

10 A. From 2019.

11 Q. Okay.

12 And what about today?

13 A. And then today the numbers are actually higher.
14 I was just sort of hedging a little bit about what that
15 would be because they range anywhere between
16 46.6 percent and 353.6.

17 Q. Okay. So that's -- it's different whether you
18 include the imputed or not, right?

19 A. Correct.

20 Now, as I look at this further, what I
21 think I would argue is that the number of lives saved

1 when we take out the imputed scores, the 20,252, is such
2 a significant drop-off. I don't know if that's --
3 that's where I had caution about why I thought that
4 seemed questionable to exclude the imputed scores.

5 Same with the 105. To be more clear, the
6 105 is quite a drop, and I don't think we've seen that
7 level of improvement in patient safety in the country,
8 and so I think that would oversell our efforts in
9 patient safety.

10 Q. Is this an annual number?

11 A. That would be an annual number.

12 Q. Okay.

13 A. Correct.

14 Q. So you're saying it would surprise you if it
15 was only 105,000 patients dying, as opposed to 161,000?

16 A. Correct.

17 Q. Okay. Got it. Okay.

18 A. So the 134 on the face felt like more of a
19 reasonable level of improvement that we would have seen.

20 Q. Because it's fewer lives -- it's more lives
21 lost?

1 A. It's fewer lives lost. So we've seen
2 improvements. We've gone from 161,000 lives lost due to
3 medical error to 134,000.

4 Q. It's fewer lives lost than 2019 but more lives
5 lost than without the imputed values?

6 A. Correct.

7 Q. Okay.

8 And then you're saying -- so how does that
9 equate now to the twice as likely to die for "C," "D,"
10 and "F"? Can you walk me through that?

11 A. Yeah, yeah. So that's what I was -- if you
12 look at the --

13 Q. The percent.

14 A. -- 2019 column --

15 Q. Yes, that I'm clear on.

16 A. The "C" versus "A", "D" and "F" versus "A,"
17 those are somewhere in the 100 percent range. Like I
18 said, I think Leapfrog took a little liberty there.

19 Q. Yeah.

20 But 2025?

21 A. For 2025, if we exclude -- if we include the

1 imputed scores, it's actually 133 to 353,000. We would
2 have to do some sort of blended average of those since
3 it says "C," "D," and "F."

4 Q. Yeah. And if you don't include it, it's 46 to
5 204?

6 A. Correct.

7 Q. Okay. And as you said, blended average because
8 there are -- I think there are more "C" hospitals --

9 A. There's a lot more "C" hospitals, right.

10 Q. Okay. Got it.

11 So maybe you just don't know today, but do
12 you have an estimate today as to whether it's really
13 accurate that you're twice as likely to die if you go to
14 a "C," "D," or "F" hospital as compared to an "A"
15 hospital?

16 A. Well, given my statement in the email about
17 Leapfrog, that I feel like the numbers with the imputed
18 scores are more reflective of the actual reality, that
19 would be something greater than twice. It would be
20 probably two and a half times.

21 Q. So --

1 A. So what we're seeing nationally is bigger gaps
2 between "A" hospitals and hospitals at the back of the
3 pack.

4 Q. And what's driving that in your view?

5 A. I believe it's -- I think hospitals have --
6 some hospitals have chosen to really invest time,
7 resources, energy, have created more of a learning
8 health system. I think they have just prioritized
9 safety in ways that other hospitals have chosen not to.

10 Q. And when you say those hospitals, you're
11 talking about the ones that report or the ones that
12 don't report?

13 A. A combination.

14 Q. Okay.

15 Okay. And then I'm going to show you one
16 more document.

17 So if you actually keep that exhibit in
18 front of you, 29, do you see there's a document -- go to
19 the first page.

20 A. Of 29?

21 Q. Of 29, yeah.

1 A. Okay.

2 Q. The email that we've been talking about with
3 the chart.

4 A. Yeah.

5 Q. Do you see there's an attachment that says
6 Lives Lost, Lives Saved Calculator 250515?

7 A. Yeah.

8 Q. Okay.

9 MR. CRAIN: So I just want to mark this as
10 Exhibit 31.

11 (Exhibit No. 31 was marked for
12 identification as of 9/25/2025.)

13 BY MR. CRAIN:

14 Q. So this is an Excel Spreadsheet. Do you see
15 the document?

16 A. Yes, I do.

17 Q. Do you know what this document is?

18 A. Yeah. It's the excel file we use to calculate
19 the lives lost and lives saved.

20 Q. And is that the one attached to this email?

21 A. This is the 2025 -- actually, this is the '25

1 version, yeah, 2025 version.

2 Q. And are you the author of this document?

3 A. Myself and the analyst together.

4 Q. Okay. Got it.

5 Okay. And this is a true and correct copy
6 of the Excel Spreadsheet we're talking about?

7 A. As far as from what I can see, yes.

8 Q. Yeah. And the two pages, right?

9 A. Yeah.

10 Q. Okay.

11 MR. CRAIN: Okay. Can we take five? Go off.

12 THE VIDEOGRAPHER: This marks the end of media
13 unit number seven. We're going off the record. The
14 time is 4:55 p.m.

15 (Whereupon a short break was had, after
16 which the proceedings continued as
17 follows:)

18 (Exhibit No. 32 was marked for
19 identification as of 9/25/2025.)

20 THE VIDEOGRAPHER: This marks the beginning of
21 media unit number eight. We're going back on the

1 record. The time is 5:07 p.m.

2 BY MR. CRAIN:

3 Q. All right. Thank you, Dr. Austin. We're in
4 the home stretch.

5 I've given you what's been marked as
6 Exhibit 32. Do you see it's an Armstrong-produced
7 Document, 14327?

8 A. Yes.

9 Q. Okay. And it's an email from Mr. Derk to you.
10 Do you see that?

11 A. Yes.

12 Q. And it's dated June 5th, 2019?

13 A. Yes.

14 Q. And it says, Subject: Lives Saved
15 Presentation. Do you see that?

16 A. Correct.

17 Q. And there's an attachment. Can you read that
18 attachment into the record?

19 A. Lives lost, Leapfrog partners 02190610.pptx
20 [sic.]

21 Q. And the rest of the document, is that the pptx

1 you just mentioned?

2 A. In reviewing it, I believe that is the case,
3 but there's nothing on here indicating the file name
4 so --

5 Q. Fair enough.

6 If you look at the title, it says: Lives
7 Lost, Lives Saved: The Comparative Analysis.

8 Do you see that?

9 A. Yes.

10 Q. And it's dated June 10th, 2019?

11 A. Yes.

12 Q. Okay.

13 So to the best of your understanding, this
14 is the PowerPoint attached to the email?

15 A. Yes.

16 Q. And I'll also note Armstrong produced it
17 sequentially from 14327 and forward.

18 A. Yeah. The only thing that strikes me as a bit
19 odd is how the presentation is dated June 10th, 2019,
20 but he sent the email on June 5th, 2019.

21 Q. Could it have been a draft?

1 A. That's a possibility.

2 Q. Like for a future presentation?

3 A. Yeah. That makes sense.

4 Q. So flip through the PowerPoint and just -- you
5 know, does it look like a true and accurate depiction of
6 the PowerPoint presentation that either you or he
7 prepared?

8 A. Are you asking me to verify whether each slide
9 is accurate?

10 Q. No, no. Fair enough. Let me start over.

11 Do you recognize this PowerPoint
12 presentation?

13 A. I don't remember this PowerPoint presentation.

14 Q. Okay. Do you recall giving a presentation in
15 2019 on the lives lost, lives saved?

16 A. I don't remember that --

17 Q. Okay.

18 A. -- but that's not to say I didn't do it.

19 Q. Okay.

20 Any reason to think this is not -- you
21 know, again, produced by Armstrong -- this is not a true

1 and accurate depiction of the email and the attachment?

2 A. No, there's no reason to believe that.

3 Q. Okay.

4 Do you remember anything about this
5 presentation at all?

6 A. I don't other than I think we were trying to
7 summarize the lives lost, lives saved analysis.

8 Q. Okay. So just flipping through, that's what
9 this PowerPoint does, it summarizes the methodology?

10 A. Yes.

11 Q. Okay.

12 And then I think you can set that one
13 aside.

14 And then just a question going back to the
15 2019 white paper. Was the 2019 white paper peer
16 reviewed?

17 A. It was not peer reviewed.

18 Q. Was the 2016 white paper peer reviewed?

19 A. The 2016 paper was reviewed by a couple of my
20 colleagues.

21 Q. Is that peer reviewed in the way that we talked

1 about earlier?

2 A. Peer reviewed in terms of journal articles is
3 usually the editors selecting who is going to review
4 your paper. This was me asking two colleagues who I
5 knew and trusted to look through it and provide input
6 and comments.

7 Q. So not peer reviewed in the academic sense?

8 A. Correct.

9 Q. Okay.

10 And 2019 was not peer reviewed in any
11 sense?

12 A. Correct, in the sense that it was an update
13 from 2016. So all we had done was update numbers.

14 Q. Is it right that Ms. Binder edited the white
15 paper in 2019?

16 A. It is possible that Ms. Binder provided some
17 edits to the white paper.

18 Q. Okay.

19 MR. CRAIN: With that, I will, pursuant to the
20 agreement of the parties, for division of time, pass the
21 witness and reserve the balance for recross.

1 MS. WOOD: You want to go off the record while
2 I get mic'd up?

3 MR. CRAIN: It's up to you. I'm happy to go
4 off. Yeah, that's fine. Let's go off.

5 THE VIDEOGRAPHER: This marks the end of media
6 unit number eight. We're going off the record. The
7 time is 5:11 p.m.

8 (Whereupon a short break was had, after
9 which the proceedings continued as
10 follows:)

11 THE VIDEOGRAPHER: This marks the beginning of
12 unit number nine. We're going back on the record. The
13 time is 5:13 p.m.

14 EXAMINATION

15 BY MS. WOOD:

16 Q. Dr. Austin, my name is Courtney Wood. I
17 represent the defendant, The Leapfrog Group, in this
18 matter.

19 I know you testified earlier that we had
20 met before previously when the subpoena came in. It's
21 good to see you again.

1 A. Good to see you as well.

2 Q. I don't have much to ask you today. However, I
3 have enjoyed listening to all of your testimony today,
4 and we appreciate you being here, so I just want to
5 thank you for that.

6 But to start, are you familiar with the
7 hospital grade calculator?

8 A. Yes, I am.

9 Q. Okay. And so is it fair to me -- fair for me
10 to say that there are 10 outcome measures that are
11 included on that grade calculator?

12 A. I couldn't speak to the current version of the
13 calculator. I have not seen it.

14 Q. Okay. But to your knowledge, are there 10
15 outcome measures that are used in the methodology
16 currently?

17 A. Can I refer to the --

18 Q. Sure. Yeah.

19 A. Okay.

20 Q. Was that Exhibit 3?

21 A. I think it's Exhibit 3, yeah.

1 Q. My apologies because I'm not going to know what
2 page it's on but --

3 A. That's fine. I actually know. It is actually
4 on page 6 and 7; 10, correct.

5 Q. Okay. Perfect.

6 And then is it fair to me -- for me to say
7 that those 10 outcome measures all come from CMS data?

8 A. For the five healthcare-associated infections,
9 the primary data source is the Leapfrog Hospital Survey,
10 and a secondary data source is the Centers for Medicare
11 & Medicaid Services.

12 Q. Correct.

13 And then for the process and structural
14 measures, there are 12 of those. Is that correct?

15 A. Correct.

16 Q. Okay.

17 And then are you aware that of those --
18 well, let's strike that.

19 So the 12 structural and process measures
20 come from survey data. Is that correct?

21 A. The seven of them, the Leapfrog Hospital Survey

1 is the primary data source. For 5 out of the 12, the
2 Centers for Medicare & Medicaid Services is the primary
3 data source.

4 Q. Right. And then we call those HCAHPS.

5 A. Correct.

6 (Whereupon, the court reporter seeks
7 clarification, which colloquy will not be
8 captured on the written record.)

9 BY MS. WOOD:

10 Q. Okay. And so to your knowledge, if a hospital
11 does not respond to the Leapfrog survey, then it does
12 not receive a score for the safe practices 1, safe
13 practices 2, and then the nursing care hours per patient
14 day. We were talking about that earlier. Is that still
15 correct?

16 A. Correct.

17 Q. Okay.

18 And so then to your knowledge, when a
19 nonreporting hospital does not respond to the hospital
20 survey, then those weights are redistributed to the
21 other nine measures in that process and structural?

1 A. Correct.

2 Q. Okay.

3 MR. CRAIN: I'm just going to object to form.

4 BY MS. WOOD:

5 Q. Okay. And then of those nine measures, we had
6 just indicated that five of those are the HCAHPS and
7 then the other four are the imputed measures that we
8 were talking about earlier. Is that correct?

9 A. So of the 12, process and structural measures,
10 5 of them come from HCAHPS, which is a patient
11 experience survey that goes to patients. The other
12 seven, the Leapfrog Hospital Survey is the primary data
13 source.

14 As previously discussed, four of those are
15 imputed if the hospital doesn't respond to the survey
16 and three are not imputed.

17 Q. Right. Okay.

18 So what I'm trying to get at is when the
19 hospital doesn't respond -- so those three that we were
20 talking about, the safe practice 1, the safe practice 2,
21 and then the nursing, we take those out and then the

1 weights are redistributed on those other nine, which are
2 the five HCAHPS and then the four imputed measures. Is
3 that correct?

4 MR. CRAIN: Objection to form. I just want to
5 lodge a standing objection to the leading, and then I
6 won't interrupt. But is it okay to stipulate to that?

7 MS. WOOD: Sure.

8 BY MS. WOOD:

9 Q. Is that your understanding?

10 A. Yes.

11 Q. Okay.

12 And would you agree with me when I say --
13 if I made the assertion that if a hospital performed
14 poorly on their HCAHPS scores, then those measures now
15 are getting greater impact on the overall grade?

16 MS. LAWSON: Object to form.

17 BY MS. WOOD:

18 Q. Yeah, let me rephrase it.

19 So since the weights are now a little bit
20 heavier on those HCAHPS scores and the four imputed
21 scores, it would be arguable that those five HCAHPS

1 scores now play a bigger role in going into the Hospital
2 Safety Grade. Is that correct?

3 MS. LAWSON: Object to form.

4 MR. CRAIN: Objection.

5 MS. LAWSON: You can still answer.

6 THE WITNESS: If the hospital does not have
7 data for those three measures, safe practice 1, safe
8 practice 2, nursing workforce, or nursing hours per
9 patient day, more weight is put on the remaining nine
10 measures and that would include the five HCAHPS
11 measures.

12 BY MS. WOOD:

13 Q. Right.

14 So is it fair to say then that if a
15 hospital had poor HCAHPS scores, then those would be
16 weighed heavier and could have a greater impact on the
17 Hospital Safety Grade?

18 MR. CRAIN: Objection to form.

19 THE WITNESS: So independent of the hospital's
20 performance, more weight would be put on those nine
21 measures. So I guess I'm just clarifying that whether

1 they're a good performer or poor performer, more weight
2 is going to be put on those.

3 BY MS. WOOD:

4 Q. Understood. And I would agree with that.

5 And do you have any opinion on how
6 significant that impact can be, whether, you know, say
7 if you're a great hospital and you have great HCAHPS
8 scores, and say you have bad -- and then you get the
9 imputed score because you're a nonresponding hospital,
10 do you have any opinion on what that impact might look
11 like on the Hospital Safety Grade?

12 MR. CRAIN: Object to form.

13 MS. LAWSON: Object to form.

14 THE WITNESS: So the -- I mean, one could test
15 out different scenarios of that question, right. So one
16 could -- the hospital may do really well on certain
17 measures, may not do well on others. There's not
18 necessarily universal, like, just because you're doing
19 well on one HCAHPS, that you're doing well on all
20 HCAHPS.

21 So one could sort of empirically test

1 different what-if scenarios, but I don't know if there's
2 a universal answer to your question.

3 BY MS. WOOD:

4 Q. Okay.

5 And so would it be true that if a hospital
6 was performing well on those five HCAHPS scores and then
7 still got those low imputed scores, that maybe those
8 five HCAHPS scores would actually -- let me rephrase
9 that.

10 So if the five HCAHPS scores were really
11 great scores and then you got those four imputed scores,
12 would it be fair to say that maybe those four imputed
13 scores wouldn't really have an impact then on the
14 overall Hospital Safety Grade?

15 MR. CRAIN: Objection to form.

16 THE WITNESS: There would be a potential
17 scenario where if the hospital does well on the HCAHPS
18 scores and does well on the outcome measures, that they
19 could have a pretty good safety score and safety grade.

20 BY MS. WOOD:

21 Q. Okay. And then would that be applicable as

1 well if there were poor scores for the HCAHPS?

2 A. Once again, it's -- the measures are not looked
3 at simply in isolation, right, because I think one would
4 also need to look at the outcome measures. So just --
5 it needs to be a slightly more holistic view of
6 performance.

7 Q. Okay.

8 And then we were talking about earlier how
9 there is never a zero that is imputed for any of those
10 four measures. Is that correct?

11 A. To the best of my recollection, that is
12 correct.

13 Q. Okay. And do you know why that is?

14 A. So we -- for the Leapfrog Hospital Survey
15 measures, we did have to come up with a way to assign a
16 numerical value to the performance categories, right.
17 So in the Leapfrog Hospital Survey, for those four
18 imputed measures hospitals get reported out as achieved
19 the standard, considerable achievement, some
20 achievement, and limited achievement. But for purposes
21 of incorporating those into the Hospital Safety Grade,

1 we needed to translate those into some sort of numerical
2 value.

3 And so we've used different approaches
4 through the years and for different measures for how to
5 assign those values. If we use hand hygiene as an
6 example, the assigned values are 100, 75, 50, and 25.
7 It was basically to give hospitals some numerical credit
8 for being in a performance category.

9 Q. And is it true that those numerical values on
10 the performance is used for both reporting and
11 nonreporting hospitals?

12 A. So the imputed values for those four measures
13 match what hospitals who report and get limited
14 achievement receive.

15 Q. Okay.

16 And do you ever recall speaking with
17 anybody, whether it's the expert panel or anybody at
18 Leapfrog, about considering imputing a zero for any of
19 those four measures rather than doing the limited
20 achievement, the considerable achievement?

21 A. I don't remember any explicit discussion about

1 zero; although, it's not to say that that hasn't come up
2 as a potential option.

3 Q. Okay.

4 And I want to look at Exhibit 27 again, and
5 this is the -- I think you had said earlier that these
6 were actually your notes from this expert panel meeting.
7 Was that right?

8 A. These were a set of notes.

9 Q. Okay. Because it just had said agenda at the
10 top, but then I think you had said that these were notes
11 following --

12 A. These are notes. I don't -- your question was
13 are these my notes. I don't know if they were my notes
14 or if these were notes prepared by someone else.

15 Q. Oh, okay. That's fair. But these would have
16 been notes following that meeting on this day?

17 A. Correct.

18 Q. And then if we can flip to that second page and
19 number three, and it's the last bullet point under
20 number three. It says: "The panel wondered what the
21 distributions would look like if Leapfrog assigned a

1 score of zero or lowest score possible for the missing
2 elements. Matt and Jordan will look into this following
3 the meeting."

4 Does that refresh your recollection in any
5 way on whether you or Jordan looked into that?

6 A. I don't remember what scenarios we actually ran
7 as a result of that meeting. It's possible that we -- I
8 don't remember. We could have just ran the lowest
9 possible scores. I don't know if we ran zero. I would
10 have to be refreshed on that.

11 Q. Yeah. That's okay.

12 And then do you remember anything else
13 regarding -- any other discussions during this meeting
14 about imputing zeros for those imputed measures?

15 A. Other than what's in the notes --

16 Q. Okay.

17 A. -- that the panel discussed that as a potential
18 scenario.

19 Q. Okay.

20 And then even after seeing this bullet
21 point, you don't recall speaking to anybody else on the

1 expert panel about this?

2 A. I don't remember.

3 Q. Do you recall if you ever spoke with Arjun
4 about this?

5 MR. CRAIN: Objection to form.

6 THE WITNESS: I don't remember if I spoke to
7 Arjun in particular about this topic.

8 BY MS. WOOD:

9 Q. Okay.

10 And usually, after following expert panel
11 meetings, do you ever reach out to some of the panelists
12 to discuss bullet points like this independently?

13 A. Yeah, we do.

14 Q. Okay. So it wouldn't be weird if you had
15 spoken with Arjun, but you just don't recall today?
16 That's something that you might do?

17 A. Correct.

18 Q. Okay. In addition to other panel members as
19 well. Arjun is just an example.

20 A. Correct.

21 MR. CRAIN: Objection to form.

1 BY MS. WOOD:

2 Q. Okay. And so then we were -- I was going to
3 use the handwashing as an example as well. So it's your
4 understanding that 15 is the imputed score for limited
5 achievement for handwashing?

6 A. Let me refer to Exhibit No. 3.

7 Q. Sure. No problem.

8 A. So slide 16 hand hygiene. Was that your --

9 Q. Yep.

10 A. Fifteen is the --

11 Q. Limited?

12 A. -- yep, limited achievement.

13 Q. Perfect. Thank you.

14 And then we were looking at Exhibit 3 again
15 for that, page 16. Hand hygiene, limited achievement,
16 the corresponding measure score is 15.

17 And so I think what you had just testified,
18 that that is both for nonreporting and reporting
19 hospitals, correct?

20 A. That is the score that's assigned to
21 nonreporting hospitals as well as reporting hospitals

1 who failed to meet the some achievement criteria.

2 Q. Right.

3 And so would you agree with me that
4 nonreporting hospitals are actually still receiving a
5 benefit by reviewing a score -- receiving a score that
6 is based on responding hospitals?

7 MS. LAWSON: Object to form.

8 MR. CRAIN: Object to form.

9 THE WITNESS: They are receiving a score -- can
10 you maybe explain more about when you say benefit?

11 BY MS. WOOD:

12 Q. Sure.

13 So if I'm a reporting hospital and I meet
14 the criteria for limited achievement, I get a 15
15 imputed. Is that correct?

16 A. Repeat that one more time.

17 Q. Sure.

18 So a hospital that responds to the survey
19 and they are filling out the hand hygiene portion of the
20 survey and based on the criteria they receive a 15 and
21 they get the limited achievement?

1 A. If the hospital doesn't meet the criteria for a
2 higher performance category --

3 Q. Correct.

4 A. -- they will get limited achievement.

5 Q. Right.

6 But then for the nonresponding hospitals,
7 we don't necessarily know what their hand hygiene
8 policies may be -- or I think earlier we were talking
9 about the hand sanitizer. You had mentioned that there
10 were several different criteria, correct?

11 A. Correct.

12 Q. And so would you say to me -- or would you
13 agree with me when I say that assigning a nonresponding
14 hospital the same score for limited achievement as a
15 responding hospital is giving the nonresponding hospital
16 a benefit?

17 MR. CRAIN: Objection to form.

18 MS. LAWSON: Object to form also.

19 THE WITNESS: I think that's a little bit in
20 the eye of the beholder. Is it better than zero? Yes.
21 Is it as good as 50? No.

1 BY MS. WOOD:

2 Q. Right.

3 A. So I don't know how to really answer that.

4 Q. Okay. So I guess I can ask it another way.

5 So if Leapfrog is not imputing a zero,
6 rather, they're imputing the 15, is Leapfrog making an
7 assumption that the hospitals who are not reporting are
8 actually performing to some extent rather than not
9 performing at all?

10 MR. CRAIN: Objection to form.

11 THE WITNESS: So Leapfrog in that situation is
12 giving nonreporting hospitals an equivalent score to
13 hospitals that have not met the criteria for some
14 achievement, and that can be a range, right. That can
15 be from a hospital that barely missed some achievement
16 to a hospital who has done nothing.

17 So there is a range of hospitals that are
18 getting the limited achievement based on responding.

19 BY MS. WOOD:

20 Q. Understood.

21 And now I want to look at Exhibit 19

1 quickly, and I will have you -- I'm sorry. I'll wait
2 until you're there. And then it's like this webpage.
3 Yes.

4 Okay. And can you flip to the second page
5 that we were talking about earlier. And then you see
6 the asterisk next to the number 15, and it says "This
7 Hospital's Score"?

8 A. Yes.

9 Q. And you would agree with me that that's the
10 limited achievement score for handwashing, correct?

11 A. That 15 is the same value that's assigned, yes,
12 to hospitals that receive limited achievement.

13 Q. Okay.

14 And then right next to it on the right
15 there it says "handwashing." So this would indicate
16 that this hospital, Delray Medical Center, received a 15
17 on the handwashing measure?

18 A. Yes.

19 Q. Okay.

20 And then I know earlier we were talking
21 about the asterisk next to the number 15 indicates to

1 the reader to go down to the end of the webpage there to
2 that disclosure.

3 A. Yes.

4 Q. Okay. And that disclosure says: "The hospital
5 declined to report their performance on this measure, so
6 a score was assigned to reflect the lack of information
7 available." Is that right?

8 A. Yes.

9 Q. Okay.

10 And I think earlier we were talking about
11 the "how," and I believe the question that you were
12 asked was does this webpage show how the score was
13 assigned. Do you recall being asked that question?

14 A. Yes.

15 Q. Okay. And would you agree with me that when it
16 says, so a score was assigned to reflect the lack of
17 information available, that that does indicate the how
18 here?

19 MR. CRAIN: Objection to form.

20 THE WITNESS: So I personally would agree with
21 that. I think the opposing counsel saw that

1 differently.

2 BY MS. WOOD:

3 Q. That's fair. I would agree with you on that
4 one.

5 So let's take it one step further. So if
6 we go back up to where the asterisk is linked to under
7 the hospital safety score 15 asterisk, and then do you
8 see right below that it says best hospital's score 100?

9 A. Yes.

10 Q. And then right below that it says average
11 hospital's score 74.40?

12 A. Yes.

13 Q. And then right below that it says worst
14 hospital's score 15?

15 A. Yes.

16 Q. Okay.

17 And so would you agree with me now, looking
18 at it from this perspective, considering those four
19 hospital scores in conjunction with the asterisk and the
20 disclosure at the bottom, that that shows how the scores
21 are assigned for this handwashing measure?

1 MS. LAWSON: Object to form.

2 MR. CRAIN: Object to form.

3 THE WITNESS: I personally don't think that the
4 display of the other three scores, the best hospital
5 average and worst, helps nor hurts the explanation of
6 how that 15 was assigned.

7 BY MS. WOOD:

8 Q. Okay. But do you think it makes it easier for
9 the reader of this webpage to look and see that if 15 is
10 this hospital's score and 15 is the worst hospital's
11 score, they can come to the conclusion that this
12 hospital is being assigned the worst hospital's score?

13 MS. LAWSON: Object to form.

14 MR. CRAIN: Objection to form.

15 THE WITNESS: I don't want to speculate what
16 people who come to the website, how they understand the
17 material.

18 BY MS. WOOD:

19 Q. That's fair.

20 But you would agree with me that at the
21 top, when it says this hospital's score 15 asterisk,

1 that matches at the bottom the worst hospital's score
2 15? It just doesn't include the asterisk?

3 A. Correct.

4 Q. Okay.

5 And I think earlier you may have testified
6 about whether or not the imputation model and the
7 current methodology penalizes hospitals. Do you
8 remember testifying about that?

9 A. We had a lot of conversation about imputation
10 today, so I would need to be refreshed on what --

11 Q. Sure.

12 A. Yeah, more detail might be needed there.

13 Q. Sure.

14 In your view, when Leapfrog was considering
15 the Fall 2024 methodology change, was the intent or the
16 purpose to change this imputation model to penalize
17 hospitals?

18 A. The goal was not to assess a penalty. The
19 goals were to improve the accuracy of the data and to
20 incentivize -- as a sub goal, incentivize survey
21 participation.

1 Q. Okay.

2 And then would it be fair to say that,
3 rather, the result then of the Fall 2024 methodology
4 change may be that hospitals feel penalized by receiving
5 those limited achievement scores?

6 MS. LAWSON: Object to form.

7 MR. CRAIN: Object to form.

8 THE WITNESS: I can't speak to how hospitals
9 feel.

10 BY MS. WOOD:

11 Q. Okay.

12 I think you said earlier that the
13 penalization is a byproduct of the imputation score. Do
14 you remember? And I'm not trying to mischaracterize
15 your testimony in any way. I just remember you
16 referencing it as being a byproduct.

17 A. Yeah, there may be a feeling of, yes, a
18 penalty.

19 Q. Okay. But that wasn't the intent or the
20 purpose of Leapfrog, to your knowledge?

21 A. That was not the stated intent.

1 Q. Okay.

2 Do you believe that hospitals should report
3 to the Leapfrog Hospital Survey?

4 A. I do.

5 Q. And why do you believe that?

6 A. Because I am a strong believer in transparency.
7 I think in transparency we create a better healthcare
8 system where we understand where our successes are,
9 where our failures are, and that those who are using the
10 healthcare system and those who are paying for the
11 healthcare system know how it's operated.

12 Q. And I know you have testified earlier that
13 sometimes you speak with hospitals in various
14 capacities. Have you ever heard any hospitals refer to
15 the Leapfrog Hospital Survey as kind of a benchmark or
16 an outline to improve their patient safety?

17 A. I -- can you repeat the question?

18 Q. Sure. Yeah.

19 I just know earlier you had testified that
20 sometimes you speak to hospitals in different
21 capacities. So the question I'm about to ask you, I'm

1 not insinuating that you have heard this before. I'm
2 asking if anybody at a hospital has discussed this with
3 you before.

4 But have any of the hospitals told you
5 that -- sorry. Now I'm forgetting my own question --
6 oh, that the Leapfrog Hospital Survey helps them put in
7 benchmarks and outline how they can improve on patient
8 safety measures?

9 A. So for purposes of the Leapfrog Hospital
10 Survey, I have had at least one conversation with a
11 hospital who does see the survey as an opportunity for
12 benchmarking their performance relative to others.

13 Q. And do you believe that to be true?

14 A. I believe it is a source of information for
15 hospitals on a very broad quality improvement journey.

16 Q. And based on your experience in working with
17 Leapfrog, would you understand that you -- or would you
18 testify to me that you understand the mission of
19 Leapfrog?

20 MR. CRAIN: Objection to form.

21 MS. WOOD: Yeah, I can fix that. I tripped

1 over that one.

2 BY MS. WOOD:

3 Q. Based on all your experience and working with
4 Leapfrog, it's been over a decade, almost two decades,
5 would you say that you understand what Leapfrog's
6 mission is?

7 A. Yes.

8 Q. And can you explain that to me in your own
9 words?

10 A. To me, it would be to drive improvements in the
11 quality of our healthcare system primarily using
12 transparency as the mechanism to do that.

13 Q. And do you believe that that's always been
14 Leapfrog's mission?

15 A. Yes.

16 Q. And do you believe that continues to be
17 Leapfrog's mission today?

18 A. Yes.

19 Q. Okay.

20 And so in your experience as a researcher
21 and as a principal faculty member at the Armstrong

1 Institute for patient safety and quality, do you believe
2 that Leapfrog's Hospital Safety Grade provides a benefit
3 to consumers?

4 A. I think sharing information in summary form is
5 what patients and consumers are seeking. So whether
6 that be a star rating, a letter grade, the research is
7 clear that that is what they find helpful for their
8 decision-making.

9 Q. Okay.

10 And have you done any research on whether
11 or not the patients benefit from those star ratings or
12 the Hospital Safety Grade?

13 A. No, I have not done any research on that.

14 Q. Have you read any research or peer reviewed
15 articles on that?

16 A. I have read some research on consumers' use of
17 publicly available quality and safety information. I
18 can't say it's the most recent. There may be more
19 recent information out there.

20 Q. And do you believe that consumers would lose
21 any sort of benefit if hospitals were not graded through

1 the Hospital Safety Grade?

2 MR. CRAIN: Objection to form.

3 THE WITNESS: Can you repeat the question one
4 time?

5 BY MS. WOOD:

6 Q. Sure.

7 If Leapfrog stopped grading hospitals, do
8 you think that that would have any negative impact on
9 consumers?

10 A. So the greatest benefit that's been noted for
11 public reporting of quality and safety information has
12 actually been the hospital's use of that information to
13 drive improvements within their own healthcare system.

14 -- hospital or healthcare system.

15 I don't want to be the bottom performer,
16 right, so I'm going to do what I need to do to get out
17 of the bottom. So in a sense, that improvement in
18 quality and safety has universal benefit, right.

19 Every patient that comes to that hospital
20 has some benefit of the hospital working to improve
21 their quality and safety.

1 Q. And would you say that the Hospital Safety
2 Grade also creates some competition between the
3 hospitals?

4 A. I don't know enough about that.

5 Q. Okay. I just wasn't sure if that's what you
6 were getting at. So that's okay.

7 And so then is it fair to say that if
8 Leapfrog stopped grading hospitals and now patients did
9 not have access to information on patient safety and
10 these measures, that could potentially harm patients?

11 A. I don't know about what the implications of
12 that would be.

13 Q. Okay.

14 Do you think that when patients have the
15 most accurate and transparent data when making their
16 informed decisions on where to treat, that that makes
17 them safer and protects them?

18 MS. LAWSON: Object to form.

19 MR. CRAIN: Object to form.

20 THE WITNESS: I believe that having information
21 is helpful in making a decision to where to receive

1 care.

2 BY MS. WOOD:

3 Q. And are you aware of any other rating systems
4 that are comparable to Leapfrog?

5 MR. CRAIN: Objection to form.

6 THE WITNESS: Can you define comparable?

7 BY MS. WOOD:

8 Q. Sure.

9 Do you believe think -- do you believe that
10 Leapfrog has any direct competitors?

11 A. There's no other entity I know that's putting
12 out a composite, composite and noncomposite
13 information -- well, let me start again.

14 I'm not aware of any other entity that's
15 putting out a composite score around the specific area
16 of patient safety. There are other entities, like the
17 Centers for Medicare & Medicaid Services that do publish
18 information about the quality and safety of care,
19 similar to what Leapfrog does.

20 Q. And do you have any knowledge about the CMS
21 star ratings?

1 A. I do.

2 Q. And what is your knowledge with regard to the
3 CMS star ratings?

4 MR. CRAIN: Object to form.

5 BY MS. WOOD:

6 Q. I guess we can start with do you have
7 experience with working with CMS in regard to those CMS
8 star ratings?

9 A. I do. I served on their technical expert
10 panel.

11 Q. Okay. Can you explain to me a little bit what
12 that was like?

13 A. Yeah. So that is a -- this is actually written
14 into federal legislation that CMS needs to publish a
15 star rating for hospitals. It is considered to be a
16 summary of all of the information that is shared on
17 their care compare website.

18 So early on in the technical expert panel
19 meetings, I would say, well, what are we actually trying
20 to measure? And the contractor was like, well, we're
21 supposed to summarize all the information. I'm like,

1 well, what's the underlying construct? We're just
2 supposed to summarize the information.

3 So it's not clear exactly what CMS is
4 measuring, but it is intended to be a summary of
5 information. And so what they do is they take the
6 measures that are publicly reported and have put those
7 into domains, and different domains get different
8 weights. They use Z-scores. It's all -- it's very
9 similar to how Leapfrog has gone about calculating
10 scores but just with a different set of measures and a
11 different set of constructs.

12 Q. To your knowledge, does CMS have any patient
13 safety measures that go into that star rating system?

14 A. They do.

15 Q. Okay.

16 And I know Leapfrog on their website
17 usually says, when looking at the Hospital Safety Grade,
18 consider other options or look to other sources. Does
19 that sound familiar to you?

20 MS. LAWSON: Object to form.

21 MR. CRAIN: Object to form.

1 THE WITNESS: I don't know what's said on the
2 website so...

3 BY MS. WOOD:

4 Q. Okay. Have you ever heard people at Leapfrog
5 discuss that patients should not only consider the
6 Hospital Safety Grade when choosing where to seek care?

7 A. Yes.

8 Q. Okay. And would you say that other -- strike
9 that.

10 Another source that patients could look at
11 is CMS star ratings. Is that correct?

12 MR. CRAIN: Object to form.

13 THE WITNESS: That is another publicly
14 available rating of hospitals.

15 BY MS. WOOD:

16 Q. And do you have any knowledge on how, I guess,
17 popular those star ratings are? You know, in your line
18 of business or speaking with hospitals, do you tend to
19 see that people rely on them or talked about relying on
20 them?

21 MS. LAWSON: Object to form.

1 MR. CRAIN: Objection to form.

2 THE WITNESS: So I can speak to my experience
3 with Johns Hopkins Medicine. The Board of Directors for
4 Johns Hopkins Medicine, as well as senior leaders,
5 have -- are very, very interested in the hospital safety
6 grades. And when they see that the safety grades are
7 dropping, there is usually a call for what's going to be
8 done to get us back to an "A" or to a "B."

9 So I think it's been a way to engage health
10 system leaders, Board of Directors, around the issue of
11 patient safety. That's just my experience with Johns
12 Hopkins Medicine.

13 BY MS. WOOD:

14 Q. Yeah.

15 And then does Johns Hopkins Medicine also
16 discuss their star ratings?

17 A. I believe so.

18 MS. WOOD: I think that's all that I have for
19 you.

20 THE WITNESS: Thank you.

21 MR. CRAIN: I have a little recross.

FURTHER EXAMINATION

BY MR. CRAIN:

Q. So just a few questions, Dr. Austin.

At one point counsel was asking you questions about whether the Leapfrog survey was a benchmark. Do you recall that line of questions?

A. Correct.

Q. And you said something like hospitals don't want to be the bottom performers. Do you recall testifying something to that effect?

A. Correct.

Q. Why don't hospitals want to be a bottom performer?

A. What I hear is that, specifically when you're dealing with physicians, they generally are individuals who have excelled throughout their lifetime in terms of academics and don't want to be perceived as being at the bottom.

Q. So to put it concretely, doctors working at a hospital don't want to work for an "F." Is that fair to say?

1 A. I can't speak for doctors working at "F"
2 hospitals.

3 Q. But the ones, the doctors you were just talking
4 about --

5 A. Yeah, they would -- yes. They would not want
6 to work at an "F" hospital.

7 Q. And fair to say that an "F" can damage a
8 hospital's reputation?

9 MS. LAWSON: Object to form.

10 THE WITNESS: I don't know -- well, what
11 reputation are you referring to?

12 BY MR. CRAIN:

13 Q. Fair enough.

14 So hospitals -- in your experience, do
15 hospitals have reputation in their communities, just
16 reputations for quality of care, for safety, that sort
17 of thing?

18 A. I think there are perceptions within
19 communities around which hospitals have higher quality
20 care than others.

21 Q. Can an "F" hospital -- can an "F" grade from

1 Leapfrog influence that perception?

2 A. I don't know.

3 Q. You have no opinion one way or another?

4 A. You didn't ask my opinion. You asked what I
5 knew.

6 Q. Okay. Fair enough. Fair enough.

7 Do you have an opinion?

8 You're getting good at this.

9 A. I don't know how much -- if reputation is --
10 well, let me start over.

11 I don't know how -- I don't know the
12 literature well enough to know how hospitals form
13 reputations in their communities.

14 Q. Okay.

15 A. Obviously, a component of that is consumers and
16 patients directly. There is media. There's a lot of
17 different influences, and I don't know how each of those
18 is tying into the Hospital Safety Grade and influencing
19 the reputation.

20 Q. Okay. Fair enough. I get it.

21 Okay. We talked -- you went back --

1 counsel went back to look at the Delray website again,
2 right. And you testified something to the effect of the
3 asterisk at the bottom of the page explains the how a
4 grade is assigned, right?

5 So I don't have a piece of paper for you,
6 but I'm going to do something a little avant-garde and
7 show you a website.

8 So I want to just direct you -- and just so
9 counsel can see, it's another Hospital Safety Grade
10 website. Do you see that?

11 So this is a hospitalsafetygrade.org
12 website. Can you see it okay?

13 A. I can.

14 Q. And do you see it says Pikeville Medical
15 Center? Do you see that?

16 A. Yes.

17 Q. And Pikeville is in Pikeville, Kentucky. Do
18 you know anything about Pikeville, Kentucky?

19 A. I do not.

20 Q. Okay.

21 What's the grade it gets?

1 A. They received a "D" in the Spring 2025 Hospital
2 Safety Grade.

3 Q. Okay.

4 So I want to go down and just look at safe
5 medication administration. Do you see that's toggled
6 there?

7 A. Yes.

8 Q. And that is the BCMA?

9 A. Correct.

10 Q. Okay.

11 So now, do you see what their score is?

12 A. It's a 25.

13 Q. Okay. And what's the worst score?

14 A. Twenty-five.

15 Q. Okay. And it has the little asterisk, right?

16 A. Correct.

17 Q. Now, read the asterisk for me. Can you read it
18 into the record?

19 A. The hospital declined to report their
20 performance on this measure, so a score was assigned to
21 reflect the lack of information available.

1 Q. Do you have any idea how the score was imputed?

2 A. Are you asking me do I know that, or do I know
3 that from what I'm reading there?

4 Q. From the information you have gathered from
5 this website or otherwise -- but you don't know
6 Pikeville, so I assume it's from this website -- how was
7 Pikeville's limited achievement score assigned?

8 A. I, Matt Austin, know that it was assigned based
9 on them not reporting to the survey, and they get
10 assigned a score based on that nonsubmission.

11 Q. So that's why it was assigned, right? It was
12 assigned because they didn't report, right?

13 A. Uh-huh.

14 Q. The question of how it was assigned I see as
15 conceptually different. Does that seem fair to you or
16 no?

17 A. I guess I see them as linked and maybe one in
18 the same. That's where I'm struggling to distinguish.

19 Q. So let me -- I can make it more concrete.

20 The imputation methodology as it applies
21 today has two steps, right?

1 A. Correct.

2 Q. Right? There is Step 1, historical, and Step
3 2, limited achievement, right?

4 A. Correct.

5 Q. Do you have any idea how Pikeville -- which
6 step was applied to Pikeville?

7 A. I know from the Hospital Safety Grade
8 methodology that declining to report on the measure is
9 what resulted in them getting a score assigned.

10 Q. But I'm asking a different question. I'll just
11 do it more directly. Did Pikeville get assigned limited
12 achievement through Step 1 or Step 2?

13 A. I don't know from what this is telling me
14 whether --

15 Q. And yet, to be clear, you testified earlier
16 that this asterisk explained how the score was assigned,
17 right?

18 A. I testified that the why and how to me were
19 sort of one in the same.

20 Q. Okay. So then just setting the semantics
21 aside, just looking at this asterisk, you have no idea

1 whether Pikeville got limited achievement through Step 1
2 or Step 2, correct?

3 A. I don't know that.

4 Q. Now, you -- sorry. Just to be clear. Correct?

5 A. Correct. I do not know whether they were
6 assigned a Step 1 or Step 2.

7 Q. Now, is it fair to say Step 1 is a little more
8 accurate because it relies at least on the prior year's
9 survey that Pikeville or another hospital might submit?

10 A. The underlying assumption is that a hospital's
11 specific information from a recent time period would be
12 a better indicator of current performance than just a
13 general imputed score.

14 Q. So Step 1 can be a better, I think you said,
15 better indicator of current performance, right?

16 A. Correct.

17 Q. Okay. And yet you have no idea whether
18 Pikeville is Step 1 or Step 2, right?

19 A. Not from what's shown here.

20 Q. Which, again -- can you state for the record
21 what is being shown here?

1 A. What's being shown here is the hospital's score
2 with an asterisk, which says the hospital declined to
3 report their performance on this measure, so a score was
4 assigned to reflect the lack of information available.
5 So that could be either Step 1 or Step 2.

6 Q. Great. Okay.

7 So we'll set Pikeville aside, our dear
8 friends in Kentucky.

9 A couple other questions. So counsel
10 raised the question of whether the limited achievement
11 score was a benefit, right? Do you recall that line?

12 A. Yes.

13 Q. Okay. Is it your testimony that assigning
14 limited achievement automatically in Step 2 is a
15 benefit?

16 A. I did not testify to that.

17 Q. I just want to understand if it is your
18 testimony.

19 A. That is my testimony, that it is not
20 necessarily a benefit.

21 Q. Can it be a benefit ever?

1 A. For some hospitals it could be a benefit.

2 Q. Now, why is that, though?

3 A. If the alternative was to assign zero,
4 assigning a 15 is better than a zero. But if we
5 assign -- if the decision was to assign 50, assigning 15
6 would be a negative. So I don't know if there's a
7 universal way of answering that question.

8 Q. Fair enough. So let me just lay it out this
9 way. If a hospital participated in the survey and
10 failed on every hand hygiene question, what score did
11 they get?

12 A. They would receive limited achievement.

13 Q. They wouldn't achieve zero, right?

14 A. They would be scored as limited achievement.

15 Q. So what is the benefit vis-à-vis the
16 nonparticipating hospital and the hospital that scores
17 zero down the line? Is there a benefit? Let's start
18 with that.

19 A. Can you repeat that again?

20 Q. Yeah.

21 Counsel was suggesting there's a benefit

1 that Leapfrog gives limited achievement versus zero.

2 But just to be clear, no hospital gets zero, right?

3 A. In the current scoring methodology, no hospital
4 gets zero.

5 Q. Even if the hospital failed every one of the
6 questions we looked at for hand hygiene, they would get
7 I think it's 15, right?

8 A. Correct.

9 Q. Okay.

10 A couple other lines. So we talked about
11 the Alexandria, Virginia notes. Do you remember that
12 document?

13 A. Yes.

14 Q. I think that was Exhibit --

15 A. Twenty-seven.

16 Q. -- 27. And you said at one point other than
17 the notes, I don't remember anything. I just want the
18 record to be clear. Do you remember the meeting, or are
19 you just looking at the notes?

20 A. I remember having an in-person meeting with the
21 expert panel. I can picture a conference room. I

1 honestly can't remember if it was this meeting or a
2 different meeting.

3 Q. I guess what I'll say is do you remember,
4 actually have a memory of what was said, or you just
5 have no reason to doubt the notes?

6 A. I have -- I do remember at this in-person
7 meeting, I do remember the conversation about whether an
8 explicit penalty should be something that's on the table
9 or if Leapfrog should consider assigning an explicit
10 penalty.

11 Q. Okay.

12 A. I do remember that, but I don't remember
13 whether it was this meeting or another meeting. But
14 when I look at these notes, this seems to corroborate
15 that it was this meeting.

16 Q. Okay. Fair enough.

17 And then I want you to just tell me
18 everything you remember about the discussion about the
19 penalty you're referring to just so it's clear.

20 A. So what I remember, which may be different than
21 what's in the notes, is specifically Dr. Andrew Bindman,

1 who at the time was the head of -- the director of the
2 Agency for Healthcare Research and Quality, which is the
3 federal agency that oversees quality and safety work.
4 From what I remember, Andy is -- broached the subject
5 of, well, hospitals should just be reporting to the
6 survey. Shouldn't we just like assign some sort of
7 penalty for them if they aren't reporting? That will
8 get them to report.

9 Q. Fair enough. Okay.

10 A. So that's what I remember.

11 Q. Yep.

12 A. Because I sort of remember where I was sitting,
13 where he was sitting.

14 Q. Okay. And anything else you remember about
15 that --

16 A. No. That's what I remember.

17 Q. Okay.

18 A couple of last questions. HCAHPS. So
19 you talked a little bit with counsel about HCAHPS,
20 right?

21 A. Correct.

1 Q. What does HCAHPS measure?

2 A. HCAHPS measures the patient experience of their
3 inpatient hospital stay.

4 Q. Okay. So if a hospital is loud, is that
5 reflected in HCAHPS?

6 A. So there are different domains within the
7 HCAHPS survey. One is quietness of the hospital
8 environment.

9 Q. Okay. Can you give us a sense of the others?

10 A. Yeah. So the five that are included in the
11 Hospital Safety Grade include physician communication,
12 nurse communication, communication about medicines.

13 Q. Not a memory test.

14 A. The other -- the five that we've included are
15 all related to communication --

16 Q. Okay.

17 A. -- and sort of the importance of communication
18 as it relates to patient safety.

19 Q. And there are other HCAHPS domains that are not
20 included?

21 A. Correct.

1 Q. Okay.

2 And HCAHPS, as you said, relates primarily
3 to patient satisfaction?

4 A. Patient experience.

5 Q. Experience. I'm sorry.

6 A. Yes, which is considered a different construct
7 than patient satisfaction.

8 Q. Got it. And is it a different construct from
9 safety?

10 A. There are -- there is probably some conceptual
11 overlap between safety and patient experience.

12 Q. Okay.

13 A. There's probably some overlap between patient
14 experience and patient satisfaction, to be fair.

15 Q. So like a Venn diagram?

16 A. Correct.

17 Q. Okay. Got it.

18 I think the last sequence, I want to go
19 back to Exhibit 3, the methodology document that you
20 were asked about. Do you recall that?

21 A. I remember being asked about the number of

1 measures --

2 Q. Yes.

3 A. Yes, in each domain.

4 Q. So I want to just -- a quick question for you.

5 Does Leapfrog -- for nonparticipating hospitals that are
6 imputed, does Leapfrog impute secondary data to assign a
7 score?

8 A. Is -- can you repeat that?

9 Q. Yeah, let me break it down. So let's go back
10 to the AHA days, right. So back then when Leapfrog was
11 using the American Hospital Association data, it was
12 using the AHA data as a secondary source that it was
13 imputing into the safety grade score. Is that fair or
14 no?

15 A. Correct. So the AHA data was the data that was
16 being used to impute a score.

17 Q. Okay. Because the imputation model is not
18 secondary data itself. It's a method of imputing
19 secondary data, right?

20 A. Correct.

21 Q. Okay. To impute, one needs secondary data,

1 right?

2 A. No.

3 Q. No. Okay. Tell me why.

4 A. So as outlined in the famous email where we
5 list the five different imputation options, one of them
6 is using secondary data to arrive at some sort of
7 estimate of the hospital's performance.

8 Q. Got it.

9 A. But one could just assign zero. One could
10 assign some value above or below the mean, right. So
11 one does not necessarily require secondary data to
12 impute a score.

13 Q. Okay. But if one is imputing secondary data,
14 there needs to be a secondary data source, in theory,
15 right?

16 A. Correct.

17 Q. Okay.

18 So I want to go to page 5 of the
19 methodology document, Exhibit 3. You see it's the
20 measures you were talking about before?

21 A. Yes.

1 Q. And do you see the top three at least are three
2 of the imputed measures, right?

3 A. Which page are you on?

4 Q. I'm looking at five.

5 A. Okay.

6 MS. LAWSON: Is it four of the slide, or is it
7 five of the slide?

8 BY MR. CRAIN:

9 Q. Oh, I'm sorry. It's the one -- I may be --
10 page 4. You're right. Page 4.

11 A. Okay.

12 Q. Okay. I'm pulling it off my electronic
13 version.

14 So my question is do you see where it says
15 Computerized Physician Order Entry right there?

16 A. Yes.

17 Q. And Primary Data Source is the 2024 Leapfrog
18 Hospital Survey, right?

19 A. Right.

20 Q. That's accurate, correct?

21 A. Correct.

1 Q. Secondary data source says the imputation model
2 applied, right?

3 A. Correct.

4 Q. For any hospital under Step 2, there isn't a
5 secondary data, right?

6 A. In the -- are you asking about the current?

7 Q. Yes.

8 A. In the current methodology, there is not
9 secondary data, correct.

10 Q. Under Step 2?

11 A. Under Step 2.

12 Q. Is there under Step 1, or would you not call
13 the historical secondary data?

14 A. I wouldn't call that secondary data.

15 Q. Okay.

16 So fair to say for CPOE, BCMA, IPS, and
17 hand hygiene there is no secondary data?

18 A. We are currently not using secondary data as
19 part of the imputation models.

20 Q. Okay.

21 MR. CRAIN: Okay. Nothing further from me.

1 You good?

2 You're free to go unless Sara wants to go.

3 MS. LAWSON: We can go off the record.

4 MR. CRAIN: Off the record.

5 THE VIDEOGRAPHER: This concludes the
6 deposition of Dr. Matthew Austin. This ends media unit
7 number nine. We're off the record. The time is
8 6:06 p.m.

9 THE COURT REPORTER: Ms. Lawson, will you be
10 handling signature for the witness, or are you waiving
11 signature?

12 MS. LAWSON: We'll read and sign.

13 She'll prepare a transcript of it so that
14 you can review your testimony and note any corrections.

15 THE COURT REPORTER: Ms. Wood, do you need a
16 rough draft as well?

17 MS. WOOD: Yes, if I can get a rough as soon as
18 possible.

19 (The deposition adjourned at 6:06 P.M.)
20
21

1 I, Marlene Kerr, a Notary Public of the
2 District of Columbia, do hereby certify that the
3 within-named witness personally appeared before me at
4 the time and place herein set out, and after having been
5 duly sworn by me, according to law, was examined by
6 counsel.

7 I further certify that the examination was
8 recorded stenographically by me, and this transcript is
9 a true record of the proceedings.

10 I further certify that I am not of counsel
11 to any of the parties, nor in any way interested in the
12 outcome of this action.

13 As witness my hand this 29th day of
14 September, 2025.

15 
16

Marlene Kerr

17 Notary Public

CERTIFICATE OF DEPONENT

I hereby certify that I have read and examined the foregoing transcript, and the same is a true and accurate record of the testimony given by me.

Any additions or corrections that I feel are necessary will be made on the Errata Sheet.

Matthew Austin

Date

(If needed, make additional copies of the Errata Sheet on the next page or use a blank piece of paper.)

Job Number: 7616361

September 29, 2025

Good Samaritan Medical Center Inc, Et Al. v. The Leapfrog Group

DEPOSITION OF: Dr. Matthew Austin (# 7616361)

The above-referenced witness transcript is available for read and sign.

Within the applicable timeframe, the witness should read the testimony to verify its accuracy. If there are any changes, the witness should note those on the attached Errata Sheet.

The witness should sign and notarize the attached Errata pages and return to Veritext at errata-tx@veritext.com.

According to applicable rules or agreements, if the witness fails to do so within the time allotted, a certified copy of the transcript may be used as if signed.

Yours,

Veritext Legal Solutions

Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY.

THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

P R O C E E D I N G S

VIDEO TECHNICIAN: Good morning. We are going on the record at 9:06 a.m. on September 10th, 2025.

Please note that the microphones are sensitive and may pick up whispering and private conversations.

Please mute your phones at this time. Audio and video recording will continue to take place unless all parties agree to go off the record.

This is media unit 1 of the video-recorded deposition of Ms. Lauren Bailey in the matter of Good Samaritan Medical Center, Inc., et al. versus The Leapfrog Group, filed in the United States District Court for the Southern District of Florida, West Palm Beach Division, case number 9:25-cv-80526-DMM.

My name is Orson Braithwaite representing Veritext Legal Solutions, and I am the videographer.

The court reporter is Christina Hotsko

1 from the firm Veritext Legal Solutions.

2 Counsel will now state their appearances
3 and affiliations for the record, beginning with
4 the noticing attorney.

5 MR. CHUNG: Daniel Chung of Gibson Dunn &
6 Crutcher for plaintiffs.

7 MR. KUNTZ: Andrew Kuntz, Gibson Dunn &
8 Crutcher, for plaintiffs.

9 MS. BLAIR: Kim Blair, Wilson Elser, for
10 defendants -- defendant.

11 MS. WOOD: Courtney Wood, Wilson Elser,
12 for defendant Leapfrog.

13 VIDEO TECHNICIAN: Thank you. Will the
14 court reporter please swear in the witness.
15 Whereupon,

16 LAUREN L. BAILEY,
17 being first duly sworn or affirmed to testify to
18 the truth, the whole truth, and nothing but the
19 truth, was examined and testified as follows:

20 EXAMINATION BY COUNSEL FOR PLAINTIFFS
21 BY MR. CHUNG:

22 Q. Good morning. Could you please state

1 your full name for the record.

2 A. Lauren Lytle Bailey.

3 Q. Have you gone by any other names?

4 A. No.

5 Q. Okay. Do you understand that the court
6 reporter sitting next to you is taking down
7 everything that's being said today, all the
8 questions and answers?

9 A. Yes.

10 Q. Okay. So before we start, I wanted to go
11 over some basic ground rules for the deposition.
12 Most of the ground rules are just to keep our
13 court reporter sane, so let's start with number
14 one.

15 Let's try not to talk over each other.
16 So if you can wait for me to finish a question
17 before you answer, and I'll do the same; I'll
18 wait until you finish your answer before I ask
19 the next question because the court reporter
20 can't take down two people talking at the same
21 time.

22 The next ground rule is to make sure that

1 your answers are audible and they're words. So
2 try to stay away from uh-huh or huh-uhs because
3 that's hard for the court reporter to take down.

4 You understand that you're testifying
5 under oath, Ms. Bailey?

6 A. Yes.

7 Q. All right. And you understand that by
8 taking that oath you're obligated to provide
9 truthful and accurate answers to the best of your
10 ability?

11 A. Yes.

12 Q. Okay. Are you taking any medications or
13 under the influence of any substances or is there
14 any reason that makes it difficult for you to
15 understand the questions I'm asking you or really
16 to understand what's happening today?

17 A. No.

18 Q. Okay. If you don't understand one of my
19 questions, please ask me to clarify them. I want
20 to make sure that you understand the questions
21 before you answer them.

22 Do you understand that?

1 A. Yes.

2 Q. Okay. From time to time, Ms. Blair may
3 lodge objections to my questions. In those
4 instances, unless Ms. Blair instructs you not to
5 answer the question, you must answer the
6 question.

7 Do you understand that?

8 A. Yes.

9 Q. Okay. You can take a break whenever you
10 want. Just let us know. The only thing we ask
11 is that we finish a question and answer before
12 taking a break. So no questions pending when we
13 take a break.

14 Do you understand that?

15 A. Yes.

16 Q. Okay. Terrific.

17 So just some background questions.

18 Have you ever had your deposition taken
19 before?

20 A. No.

21 Q. So this is your first time?

22 A. Yes.

1 Q. All right. Did you prepare for your
2 deposition today?

3 A. Yes.

4 Q. Okay. How did you go about preparing?

5 A. Met with our counsel, Kim and Courtney --

6 Q. Okay.

7 A. -- who are here in this room.

8 Q. Approximately how many times?

9 A. About three times.

10 Q. All right. And in the course of those
11 about three times you met with your counsel, did
12 you review any documents?

13 A. Yes. We reviewed documents, e-mails,
14 Slack messages.

15 Q. Okay. Terrific.

16 Did you review any documents outside of
17 those preparation sessions with your counsel?

18 A. Not without counsel, no.

19 Q. Your educational history. Can you just
20 go over your educational history?

21 A. Sure. I graduated from Brigham Young
22 University in 2011 with a bachelor of arts in

1 communications with an emphasis in public
2 relations and a minor in psychology.

3 Q. Okay. Apart from the bachelor of arts
4 degree from BYU, do you have any certifications
5 or licenses?

6 A. No.

7 Q. No? Okay. Any kind of advanced degrees?

8 A. No.

9 Q. No? Okay.

10 Any training in your field that you
11 regularly take?

12 A. I've regularly stay up to date on trends
13 within public relations. We use online classes,
14 like, from Udemy and things like that just to
15 stay as up to date as possible.

16 Q. Okay. Now, you mentioned that, with your
17 degree, you had a specialization in public
18 relations.

19 In the course of your -- and we'll get
20 into your employment history.

21 In the course of your -- the various jobs
22 you've held, are there any -- has it continued to

1 focus on public relations?

2 A. Yes.

3 Q. Okay. Let's get into your employment
4 history.

5 So can you just kind of outline for us
6 your employment history?

7 A. Yes. So when I graduated college, I
8 moved back to Seattle and I worked for Weber
9 Shandwick, which is a large global public
10 relations firm. I was hired into the consumer
11 technology practice. Within a year, when I got a
12 promotion, I changed to the healthcare practice.
13 And I've been working in healthcare PR for 13
14 years, since then.

15 So I transferred from the Seattle office
16 in Weber Shandwick to the D.C. office. And a
17 little while later, I got a new job working
18 in-house for Children's National Hospital here in
19 D.C. as a senior media relations specialist. So
20 I managed press that came onsite at the hospital.
21 I did celebrity events, crisis communications,
22 awards, things like that. That's actually how I

1 became familiar with Leapfrog Group. Children's
2 National Hospital had been awarded the top
3 children's hospital award by Leapfrog. And
4 coincidentally, I had just finished writing a
5 press release about it, and I got an e-mail from
6 a recruiter at the Leapfrog group about a
7 communications position at Leapfrog.

8 My only contacts with Leapfrog was from
9 that one press release I had written. I thought
10 it sounded interesting, so talked to the
11 recruiter, and I learned a lot more about
12 Leapfrog and a different part of healthcare,
13 which has been really interesting. I'm not sure
14 if you're aware, but Leapfrog represents
15 employers. So we were founded 25 years ago by a
16 lot of big companies, GM, GE, Boeing, Marriott.
17 They got together and they said, we don't know
18 what the quality and transparency of the
19 healthcare in hospitals for our employees is, and
20 we want to change that. And they started
21 Leapfrog in 2000, and we've been around since
22 then.

1 So again, I've been in healthcare for a
2 long time, but that wasn't a side of it I'd
3 thought of before. So I've been with Leapfrog
4 since 2017.

5 Q. Okay. And so when you -- at the time
6 when you first heard about f Leapfrog when you
7 were at Children's Hospital, at the time, did
8 Leapfrog have the hospital safety grade program
9 at the time?

10 A. Yes.

11 Q. Okay. What was your first position or
12 title at Leapfrog?

13 A. Communications manager.

14 Q. Okay. And is that the title you hold
15 today, or has that changed?

16 A. That's changed.

17 Q. Okay. And what is -- just tell us kind
18 of the progression since approximately 2017 in
19 terms of titles?

20 A. Sure. So I started as communications
21 manager in January of 2017. In 2020, I had my
22 first baby and made a decision that fall, for

1 personal reasons, to work part time. So at that
2 point, I was senior communications advisor until
3 June of 2024, when I was promoted to director of
4 communications, which is my title today.

5 Q. Okay. So as your -- as director of
6 communications since June of 2024, what are
7 your -- generally speaking, what are your roles
8 and responsibilities?

9 A. I oversee all external communications.
10 So that is generally public relations, media
11 relations. I manage our agency of record for PR,
12 CURA Strategies. I oversee the content of our
13 website. I oversee social media. I help with
14 speeches. I am in charge of the brand overall,
15 brand guidelines, things like that.

16 Q. Okay. So in terms of -- in terms of --
17 and we're taking this from Leapfrog's website --
18 right? -- the description of your -- are you a
19 member of the executive staff at Leapfrog?

20 A. I am a member of the management team.

21 Q. Right.

22 A. But I know on our website it says

1 executive staff, and that includes our CEO, VPs
2 and directors.

3 Q. Okay. According to the website, your --
4 as director of communications, you oversee all
5 strategic communications for Leapfrog, including
6 media relations, social media, and content
7 development, which is consistent with your
8 testimony.

9 Does that include communications with
10 hospitals themselves?

11 A. No.

12 Q. Okay. Who is in charge of or who
13 oversees communications with the hospitals
14 themselves?

15 A. Missy Danforth and her team.

16 Q. Okay. Do you have any interaction with
17 hospitals in your role?

18 A. Rarely. The only time I do is if I'm
19 working on a case study or something like that.

20 Q. Okay. And why is it that from -- so why
21 is it that, as director of communications, your
22 role doesn't include communications with

1 hospitals?

2 A. We're a really small organization. So it
3 may appear that we have roles that seem different
4 than maybe in large organizations. So I am one
5 person. I have one other full-time staff member.
6 We are the communications team. So we don't have
7 it in our bandwidth.

8 And the communications we have with
9 hospitals is very technical, so it's managed on
10 the ratings team side.

11 Q. Okay. You mention that you have one
12 other person on your team.

13 Who is that?

14 A. Nate Longmore. He's the communications
15 coordinator.

16 Q. All right. And what is his role?

17 A. He is the day-to-day for posting on
18 social media. He is the day-to-day for actually
19 doing the content posting on our website. He
20 does a lot of graphic design and just other
21 communications tasks.

22 Q. Okay. And he -- is he the only employee

1 at Leapfrog that reports to you, or do you have
2 other folks reporting to you?

3 A. He's the only one who reports to me.

4 Q. And who do you report to?

5 A. Karen Jupiter.

6 Q. All right. Anyone else at Leapfrog that
7 you report to?

8 A. No.

9 Q. Okay. And Karen Jupiter, what is her
10 role?

11 A. She's VP of development.

12 Q. What forms of communication do Leapfrog
13 employees use? And I mean internally within the
14 organization.

15 A. Outlook for e-mail. And we use Slack.

16 Q. And Slack is -- for purpose of chatting
17 or instant messaging?

18 A. Yes.

19 Q. Okay. Any other messaging platforms or
20 other forms of electronic communication that
21 Leapfrog employees use?

22 A. No, not that I can think of right now.

1 Q. Okay. We're going to turn to our first
2 exhibit.

3 MR. CHUNG: We're going to mark this
4 Exhibit 1.

5 (Bailey Deposition Exhibit 1 marked for
6 identification and attached to the
7 transcript.)

8 THE WITNESS: Thank you.

9 BY MR. CHUNG:

10 Q. All right. Ms. Bailey, just take a few
11 moments to look through it. Let me know if you
12 recognize it.

13 A. Yes. I recognize it.

14 Q. All right. And what is it?

15 A. It's my performance review from
16 January of this year.

17 Q. Okay. And so this is -- by this point
18 you had spent several months as director of
19 communications, which is your current role,
20 correct?

21 A. Yes.

22 Q. Okay. And who drafted this particular

1 document?

2 A. The first part of it is a
3 self-evaluation, so I drafted that part.

4 Q. Okay. And then the -- there's a second
5 part, right?

6 A. Yes.

7 Q. And -- which starts at -- if you look at
8 the bottom -- generally throughout this
9 deposition, I'll be referring -- in terms of
10 page numbers, I'll be referring to what's called
11 a Bates number, which is typically at the bottom
12 right-hand corner.

13 So the page with Bates number Leapfrog
14 395525, is this the second half that you're
15 referring to --

16 A. Yes.

17 Q. -- of the document?

18 And the author of that part is Karen
19 Jupiter, the VP of development that you
20 referenced earlier was your supervisor; is that
21 right?

22 A. Yes.

1 Q. Okay. I want to direct your attention to
2 the page before that, Bates number Leapfrog
3 395524. If you can turn to that.

4 There are a series of bullet points at
5 the top.

6 If you look at the fourth bullet point it
7 reads, Demonstrate deep knowledge of Leapfrog's
8 programs and initiatives with extensive knowledge
9 of Leapfrog's initiatives, including the hospital
10 safety grade and Leapfrog surveys. I remain a
11 go-to resource for staff seeking guidance or
12 clarity on programs and stakeholder relations.

13 Do you see that?

14 A. Yes.

15 Q. And is that a bullet point that you,
16 yourself, drafted?

17 A. Yes.

18 Q. All right. How did you go about -- or
19 how do you go about obtaining deep knowledge of
20 Leapfrog's programs and initiatives in your role?

21 A. I've been working at Leapfrog for over
22 eight-and-a-half years. So over the time, I have

1 learned more about Leapfrog's programs. As part
2 of my job, I am in charge of talking points and
3 preparing people for media interviews and
4 speaking engagements, so I have learned a lot
5 throughout the years from a communications
6 perspective.

7 Q. Okay. Does that include any kind of
8 focused discussion or trainings around the
9 organization's programs and initiatives?

10 MS. BLAIR: Objection to form.

11 THE WITNESS: Can you restate the
12 question?

13 BY MR. CHUNG:

14 Q. Sure.

15 Does this deep knowledge come about also
16 as a result of any trainings that you received on
17 the organization's programs and initiatives?

18 A. No, not that I can recall.

19 Q. So just kind of on-the-job training is
20 how you obtained this knowledge --

21 A. Yes.

22 Q. -- would you say? All right.

1 If you look at -- we're still in the same
2 document. Turn a couple pages before that. So
3 Bates ending in 5522.

4 If you look at the second-to-last bullet
5 point there it reads, Draft and edit
6 publications, articles, and blogs. I drafted
7 nine blog posts in 2024, providing valuable
8 thought leadership and supporting Leapfrog's
9 communications efforts.

10 Does -- are those blog posts written or
11 authored under your own name? Are they
12 ghostwriting for others?

13 What's the nature of those blog posts?

14 A. The blog is part of our newsroom. So I
15 when I write, I represent Leapfrog.

16 Q. Okay. So that's -- so they're -- is your
17 name kind of attached or explicitly named as the
18 author for those blog posts?

19 A. No. There's no specific author listed.

20 Q. Okay. The last sentence there regarding
21 the comprehensive brand guide in 2024, is that a
22 written document?

1 A. It is.

2 Q. Okay. And what -- can you just describe
3 generally what it is?

4 A. It's a general brand guide. It's pretty
5 standard in communications. It needed a refresh.
6 The one that we had was in Word. We use Canva
7 for graphic design now, primarily. So we
8 moved -- I moved it into Canva and ensured that
9 we were all on the same page. We've had some new
10 programs in the last couple of years started at
11 Leapfrog that weren't part of the previous brand
12 guide. So just getting it up to date.

13 Q. What were the new programs that weren't
14 in the previous version of the brand guide?

15 A. The Recognized Leader Program, which is
16 our partnership with the American Diabetes
17 Association.

18 Q. Any other programs?

19 A. Recognizing Excellence in Diagnosis I
20 think would be the other one.

21 Q. So let's get into the hospital safety
22 grade, which I'm sure you understand is one of

1 the topics -- right? -- involved in the matter
2 here.

3 What is Leapfrog's hospital safety grade?

4 A. It's a letter grade that we assign to all
5 general acute care hospitals in the United States
6 based on patient safety. So we look at
7 accidents, errors, injuries, infections.

8 Q. And what's the purpose of assigning
9 hospitals a hospital safety grade?

10 MS. BLAIR: Objection to form.

11 THE WITNESS: We created the safety grade
12 for consumers. Healthcare ratings can be
13 confusing, and consumers generally understand a
14 letter grade, A, B, C, D, F. So it was created
15 for consumers to have a place to start when
16 they're looking at hospitals.

17 BY MR. CHUNG:

18 Q. You just testified that we created the
19 hospital safety grade for consumers.

20 Who is the "we"?

21 A. I'm a communications professional, so I'm
22 used to saying "we," as in the Leapfrog Group. I

1 was not at Leapfrog personally when the safety
2 grade began.

3 Q. Do you know who -- understanding that you
4 came onboard, you know, after the safety grade
5 was created, do you know who originated or
6 created the hospital safety grade?

7 A. Leah Binder.

8 Q. Okay. And -- who is the founder of the
9 organization, correct?

10 A. She is not the founder. She's the second
11 CEO.

12 Q. Okay. Why does Leapfrog assign a single
13 letter grade to hospitals rather than using some
14 other form of rating like a numerical rating or a
15 percentage rating?

16 MS. BLAIR: Objection. Form.

17 THE WITNESS: I can only speak to that
18 from a communications perspective. And it's just
19 that -- like I said before, that consumers
20 generally understand a letter grade.

21 BY MR. CHUNG:

22 Q. Okay. Because it just -- reminds them of

1 school, basically, it's easy to understand, kind
2 of an A to F concept; is that right?

3 A. Yes.

4 Q. Do you know how the cutoff for each
5 grade -- let's say A to B, B to C -- is decided?

6 A. No. I'm not part of those conversations.

7 Q. Okay. Does Leapfrog intend for consumers
8 to rely on the hospital safety grade when they
9 make a decision about which hospital to go to?

10 A. Our communications messaging is that it's
11 a place to start. We recommend that patients
12 look at the safety grade for general patient
13 safety and then use other ratings, including the
14 Leapfrog hospital survey, U.S. News & World
15 Report, et cetera, to look at quality as well.

16 Q. Okay. So your -- does Leapfrog
17 explicitly tell or advise consumers to look at
18 other hospital ratings other than Leapfrog in
19 making their decisions where to go for their
20 care?

21 A. Yes. It's part of my regular
22 communications messaging.

1 Q. Okay. How is it determined which
2 hospitals are assigned a hospital safety grade?

3 A. In --

4 MS. BLAIR: Objection to form. Sorry.

5 THE WITNESS: In my understanding, it's
6 all general acute care hospitals in the U.S.

7 BY MR. CHUNG:

8 Q. Okay. Are there -- let's look at another
9 one.

10 Are there certain hospitals that are not
11 assigned a safety grade?

12 A. Specialty hospitals, like children's
13 hospitals, critical access hospitals.

14 Q. You testified earlier when you were in
15 the Children's Hospital system here in D.C. that
16 they received a recognition, correct?

17 A. No, I didn't say that. I said the safety
18 grade did exist when I was at Children's
19 National, but they're a children's hospital. So
20 they did the Leapfrog hospital survey, and that
21 was the top children's hospital award.

22 Q. I see. So they submitted a -- they

1 responded to Leapfrog's survey but did not
2 receive the safety grade; is that correct?

3 A. Correct. Children's hospitals do not
4 receive a safety grade at this time.

5 Q. Okay. And how often does Leapfrog
6 release hospital safety grades?

7 A. Twice a year.

8 Q. And why is it twice in a year as opposed
9 to annually or more frequently?

10 A. We want to include the most recent data
11 possible.

12 Q. Okay. Let's move on to how Leapfrog
13 arrives at hospital safety grades for individual
14 hospitals.

15 Are you familiar with Leapfrog's scoring
16 methodology behind the safety grade?

17 A. Yes. From a communications perspective,
18 I am.

19 Q. Okay. When you say -- you've testified a
20 number of times or you've prefaced your responses
21 with "from a communications perspective."

22 What does that mean?

1 A. I am not involved in the technical
2 aspects. I'm not a data scientist. I'm a
3 communications person. So I consider myself an
4 expert in our messaging but not in the data
5 science.

6 Q. Understood. All right. But you -- at
7 least in our first exhibit, Exhibit 1, in your
8 writeup of your evaluation, you represented that
9 you have deep knowledge, right, of the -- of the
10 organization's programs and initiatives,
11 including the hospital safety grade and the
12 hospital survey; is that right?

13 A. Yes. Within my role. Yes.

14 Q. Okay. Why don't we put at least two
15 versions of the scoring methodology as exhibits.

16 MR. CHUNG: So 41 and 45.

17 (Bailey Deposition Exhibit 2 marked for
18 identification and attached to the
19 transcript.)

20 BY MR. CHUNG:

21 Q. As we're getting the exhibits,
22 Ms. Bailey, do you have any role in designing

1 Leapfrog's scoring methodology behind the safety
2 grades?

3 A. No.

4 Q. All right. How about any role in
5 implementing that scoring methodology to specific
6 hospitals?

7 A. No.

8 Q. Do you have any role with respect to the
9 scoring methodology in terms of its content?

10 A. No.

11 Q. Do you have any input on the content or
12 provide feedback on the content?

13 A. No.

14 Q. Who at Leapfrog is, number one, involved
15 in the design of the scoring methodology?

16 A. Missy Danforth and Alex Campione.

17 Q. All right. And what are their roles?

18 A. Missy Danforth is the senior
19 vice-president for healthcare ratings. Alex
20 Campione is a program analyst for the safety
21 grade.

22 MR. CHUNG: All right. So we're going to

1 mark two exhibits, Exhibits 2 and 3.

2 And Exhibit 2 will be the spring 2025
3 safety grade scoring methodology and Exhibit 3
4 will be the preceding version, the spring 2024
5 scoring methodology.

6 (Bailey Deposition Exhibit 3 marked for
7 identification and attached to the
8 transcript.)

9 BY MR. CHUNG:

10 Q. Okay. So you mentioned Ms. Danforth and
11 Ms. Campione in being involved in the design of
12 the scoring methodology.

13 Is there anyone outside -- first of all,
14 is there anyone else within Leapfrog that's
15 involved in the design of the scoring
16 methodology?

17 A. Leah Binder I'm sure has a role in it.

18 Q. Okay. Anyone --

19 A. That's all I can recall.

20 Q. I'm sorry?

21 A. That's all.

22 Q. Okay. Anyone outside of the organization

1 involved in the design of the scoring
2 methodology?

3 A. The expert panel has a role in advising
4 on the methodology.

5 Q. Okay. And that's a good segue.

6 What is the expert panel?

7 A. The expert panel is a group of experts
8 who volunteer their time to Leapfrog to advise us
9 on methodology.

10 Q. Okay. Now, from the website, Leapfrog
11 tells consumers that Leapfrog works under the
12 guidance of an expert panel to select appropriate
13 measures and develop a scoring methodology.

14 Are you familiar with that language from
15 the website?

16 A. Yes.

17 Q. Okay. Did you have a -- were you
18 involved in putting together that particular
19 language?

20 A. No. It precedes my time.

21 Q. Okay. Now, there is -- do you understand
22 that there is -- there's a panel that consists of

1 patient safety experts? Are you aware of that?

2 A. For the Leapfrog hospital survey.

3 Q. Okay. Which -- and do you -- are you
4 aware that there was a change in the scoring
5 methodology in the spring to fall of 2024?

6 Are you aware of that?

7 A. Yes.

8 Q. Okay. Were there any experts from the
9 experts panel that were involved in that
10 methodology change in 2024?

11 A. I don't talk to the expert panel, so I
12 wouldn't know.

13 Q. Okay.

14 A. I assume.

15 Q. Well, I'm not asking you whether you
16 spoke to the expert panel.

17 Are you aware whether any experts from
18 the expert panel were involved in that
19 methodology change in 2024?

20 A. I don't know. It wasn't discussed with
21 me.

22 Q. Okay. How are panelists for that expert

1 panel selected?

2 A. I don't know.

3 Q. Do you know whether any of those
4 panelists are experts in disclosures to
5 consumers?

6 A. I don't know.

7 Q. Okay. How about in website design?

8 A. I don't know.

9 Q. Digital literacy?

10 A. I don't know.

11 Q. All right. Any of those -- do you know
12 whether any of those experts on the experts panel
13 have a background or are experts in
14 communications strategy?

15 A. I don't know.

16 Q. Okay. Do those panelists have to come
17 from organizations that participate in the
18 Leapfrog survey?

19 A. No.

20 Q. All right. Are there panelists that --
21 from organizations that do participate in the
22 Leapfrog survey?

1 A. I believe so. I'm not an expert in
2 everyone who's on the panel.

3 Q. Okay. Can you think of any members of
4 the expert panel that are from organizations that
5 participate in the hospital survey?

6 A. Not that I can recall off the top of my
7 head.

8 Q. Okay. Are you aware of any instances
9 where Leapfrog ended its relationship with a
10 patient safety expert on that expert panel
11 because their organization stopped participating
12 in the hospital survey?

13 A. I don't know. It would surprise me if
14 so.

15 Q. Okay. But you're not aware of an
16 instance?

17 A. I'm not aware, no.

18 Q. You testified I think in the first or
19 second question on this topic that these expert
20 panelists volunteer their time to Leapfrog; is
21 that right?

22 A. That's my understanding. Yes.

1 Q. So are panelists on this expert panel
2 compensated at all?

3 A. Not to my knowledge.

4 Q. Are the organizations that they came from
5 compensated in connection with the expert
6 panelists being on the expert panel?

7 A. Not to my knowledge.

8 Q. All right. What role does the expert
9 panel play in developing a scoring methodology?
10 And that's the language we just went over from
11 the website.

12 What's their role in developing a scoring
13 methodology?

14 A. I only know that generally they advise on
15 measures and help ensure that the safety grade is
16 up to the latest science.

17 Q. Okay. Who at Leapfrog works with the
18 safety grade? Do you work with them at all?

19 A. I do not. It's run by Missy Danforth.

20 Q. All right. Anyone else within Leapfrog
21 that works with them?

22 A. The safety grade expert panel? Not to my

1 knowledge.

2 Q. Okay. So it's just Missy Danforth that
3 works with the safety grade expert panel --

4 MS. BLAIR: Objection to form.

5 BY MR. CHUNG:

6 Q. -- is that right?

7 A. To my knowledge.

8 Q. Okay. So what is the process by which
9 these -- the hospital safety grade experts advise
10 on the hospital safety grade?

11 A. Can you restate the question?

12 Q. Is there a process or protocol that
13 Leapfrog follows in getting advice from the
14 patient safety health -- patient safety experts
15 on the experts panel?

16 A. I don't know.

17 Q. Are there any regular meetings with these
18 experts?

19 A. I'm not aware of when they meet.

20 Q. Okay. If a patient safety -- if the
21 patient safety experts make a recommendation with
22 respect to the scoring method- -- scoring

1 methodology, is Leapfrog obligated to implement
2 that recommendation?

3 A. No.

4 Q. And why not?

5 A. The Leapfrog hospital safety grade is
6 Leapfrog's program. So Missy Danforth and Leah
7 Binder would have the final decision.

8 Q. All right. So Leapfrog could reject a --
9 theoretically could reject a recommendation by
10 the patient safety experts.

11 A. Theoretically, yes.

12 Q. Do you know whether, if there's a
13 recommendation from the patient safety experts,
14 whether that recommendation has to be unanimous
15 among the members of that particular panel?

16 A. I don't know.

17 Q. Do the safety experts patient have to
18 approve the wording of any change in the scoring
19 methodology that Leapfrog adopts?

20 A. I don't know.

21 Q. On the website it says a hospital must
22 have enough safety data available for our experts

1 to issue them a letter grade.

2 So is it correct that the patient safety
3 experts themselves issue the letter grades?

4 MS. BLAIR: Objection to form.

5 THE WITNESS: I don't know. I'm not
6 involved in the assigning of safety grades.

7 BY MR. CHUNG:

8 Q. Does that -- just reading again, A
9 hospital must have enough safety data available
10 for experts to issue them a letter grade.

11 Is that accurate?

12 MS. BLAIR: Objection to form.

13 THE WITNESS: I think it's accurate
14 because it says "our experts." I mean, that
15 could include the expert panel; that could
16 include experts within Leapfrog.

17 BY MR. CHUNG:

18 Q. Which experts within Leapfrog are you
19 referring to?

20 MS. BLAIR: Objection to form as to the
21 document you're reading from.

22 THE WITNESS: Missy Danforth and Leah

1 Binder are experts.

2 BY MR. CHUNG:

3 Q. Are the patient safety experts involved
4 in the disclosures on Leapfrog's websites?

5 A. Can you repeat the question?

6 Q. Are the patient safety experts involved
7 in the disclosures on Leapfrog's websites?

8 A. I don't know. I don't talk to the expert
9 panel.

10 Q. So no -- just to be clear, you have no
11 communication whatsoever with members of the
12 expert panel?

13 A. Not that I can recall unless there's a
14 specific media opportunity or -- but I can't
15 recall something right now.

16 Q. Let's go to the next document.

17 MR. CHUNG: Tab 31.

18 THE WITNESS: Is that Exhibit 2?

19 MR. CHUNG: Oh, no, we're going to put
20 another document in front of you.

21 THE WITNESS: Okay. We don't open these.

22 MR. CHUNG: Yeah. We may go back to

1 those later.

2 THE WITNESS: Okay. I'll just put them
3 over here.

4 MR. CHUNG: So this will be Exhibit 4.
5 (Bailey Deposition Exhibit 4 marked for
6 identification and attached to the
7 transcript.)

8 BY MR. CHUNG:

9 Q. Ms. Binder [sic], we're putting Exhibit 4
10 in front of you. It's a series of Slack
11 messages.

12 A. Okay.

13 Q. Take a few moments to take a look at it.
14 Let me know when you recognize it.

15 Oh, Bailey, I'm sorry.

16 All right. So Ms. Bailey, these are
17 Slack Messages from May 1 of this year between
18 you and Ms. Jupiter.

19 What are you working on with Ms. Jupiter
20 in the course of this Slack conversation?

21 A. A lot of different things.

22 Q. Let's go through -- just let me know --

1 if you can tell us what you're working on.

2 A. We discussed IPPS, which is a proposed
3 rule with CMS. We provide comment letters.

4 We discussed some materials with our
5 American Diabetes Association program.

6 We discussed a contract for a
7 photographer.

8 Q. Is there also a discussion about a
9 followup statement that Ms. Binder is going to
10 make on the -- on this lawsuit?

11 A. Do you know what page you're looking at?

12 Q. Yeah. Why don't I focus you on Leapfrog
13 9912.

14 A. 9912? Okay. The last page?

15 Q. That's right. Yeah.

16 A. Yes. A statement for our website.

17 Q. Okay. Now, at about 6:12 p.m. -- just
18 looking at the markers on the right side -- you
19 write, I think we should link to results for each
20 hospital too so people can see their fully
21 transparent grades.

22 What are you referring to here?

1 A. From what I remember, the statement
2 that's currently on our website links to each of
3 the five plaintiff hospitals and their safety
4 grades.

5 Q. All right. And -- so what did you mean
6 by "so people can see fully transparent grades"?

7 A. The Leapfrog hospital safety grade is
8 fully transparent. Leapfrog stands for
9 transparency, so you'll probably see me saying
10 transparent a lot because we focus on being
11 transparent.

12 Q. So that's kind of -- that's language that
13 you often use from kind of a communications
14 perspective; is that right?

15 A. Yes.

16 Q. Then Ms. Jupiter writes, Not sure we want
17 to link expert panel, followed by we don't really
18 want them contacted.

19 Why didn't Ms. Jupiter want the expert
20 panel to be contacted in this context?

21 MS. BLAIR: Objection to form.

22 THE WITNESS: I don't know. You can see

1 in here that I was going to link to it. I don't
2 remember -- I don't know what she meant.

3 BY MR. CHUNG:

4 Q. All right. And then you write in
5 response, like you just testified, It's on our
6 website so I think it's okay. It is a point we
7 make a lot that we have the national expert
8 panel.

9 What does that mean? Why is the national
10 expert panel appointment -- a point that Leapfrog
11 makes a lot?

12 A. It's part of our standard messaging.

13 Q. Okay. And that standard messaging is
14 what, as relevant to this exchange here?

15 A. That we have a national expert panel
16 that's part of developing the safety grade
17 methodology.

18 Q. Again, just going back to what
19 Ms. Jupiter wrote here kind of in the middle of
20 your conversation, Not sure we want to link
21 expert panel. We don't really want them
22 contacted.

1 Was there a concern between you and
2 Ms. Bailey and others at Leapfrog about members
3 of that expert panel being contacted by the
4 press?

5 A. I'm Ms. Bailey.

6 Q. Ms. Bailey -- I'm sorry. Ms. Bailey.
7 We're going to do that again.

8 A. Okay.

9 Q. Was there a concern between you and
10 Ms. Jupiter and others at Leapfrog about the
11 press contacting members of the expert panel?

12 A. I don't know what Karen meant by this.

13 Q. All right. I'm not asking what
14 Ms. Jupiter meant by this.

15 But did you have any concerns about
16 members of the expert panel being contacted by
17 the press?

18 A. No.

19 Q. How about other members of Leapfrog? Did
20 Ms. Binder have any concerns about the expert
21 panel being contacted by the press?

22 A. I didn't discuss it with her.

1 Q. Okay. How about with Ms. Danforth?

2 A. I didn't discuss it with her.

3 Q. Ms. Campione?

4 A. I don't discuss that kind of thing with
5 Alex, no.

6 Q. Okay. Let's move on to the hospital
7 survey.

8 What is Leapfrog's hospital survey?

9 A. It is a voluntary survey that is annual
10 that all hospitals can choose to report to
11 Leapfrog on. And it measures quality and safety.

12 Q. Do you have any role in designing the
13 hospital survey?

14 A. No.

15 Q. Do you have any input on the content of
16 the hospital survey?

17 A. No.

18 Q. Have you ever reviewed the hospital
19 survey?

20 A. I proofread it.

21 Q. All right. Proofread it. So you have --
22 so what's the purpose of proofreading it?

1 A. Catch any typos or anything the ratings
2 team may have missed as far as grammar.

3 Q. All right. So it's just a hard
4 proofread. Doesn't have anything to do with the
5 content?

6 A. Correct.

7 Q. All right. Is there anyone -- so who
8 within Leapfrog is involved in designing the
9 hospital survey?

10 A. Missy Danforth and Katie Stewart
11 primarily.

12 Q. And what's Ms. Stewart's role?

13 A. She is the director of healthcare ratings
14 for Leapfrog.

15 Q. Is there anyone outside of Leapfrog
16 that's involved in the design of the hospital
17 survey?

18 A. We have an expert panel for every section
19 of the survey.

20 Q. And when you say every section of the
21 survey, what do you mean by that?

22 A. So some examples are medication safety,

1 maternity care. We have a patient and family
2 expert panel.

3 Q. Okay. And so each of those areas has a
4 corresponding section in the survey; is that
5 right?

6 A. Yes.

7 Q. All right. And what is the role of each
8 of those specific expert panels with respect to
9 their respective sections in the hospital survey?

10 A. It's very similar to the role with the
11 safety grade. They advise on measures and
12 methodology, share research that they're working
13 on, can stay up to the latest science.

14 Q. Okay. Do they -- do members of the
15 expert panels have to approve final versions of
16 the Hospital -- of the survey before it's issued?

17 A. I don't know.

18 Q. All right. Do the expert panels make
19 recommendations with respect to their respective
20 sections in the hospital survey?

21 A. As far as I understand, yes, that's their
22 role.

1 Q. All right. Is Leapfrog obligated to
2 adopt those recommendations?

3 A. No, not to my understanding.

4 Q. Are you aware of any instances when a
5 recommendation by the expert panel on the
6 hospital survey was not adopted by Leapfrog?

7 A. Not that I can recall.

8 Q. Okay. Do you have any role in reviewing
9 hospitals' responses to the survey?

10 A. No.

11 Q. Have you ever done that, reviewed any
12 responses to the hospital survey?

13 A. No.

14 Q. Who at Leapfrog is responsible for
15 reviewing those responses?

16 A. Missy Danforth's team. They work
17 together on it.

18 Q. All right. Now, Missy Danforth's team.
19 How many -- approximately how many members of the
20 team are there?

21 A. Eight to ten.

22 Q. And is it their responsibility to review

1 the many responses that the organization gets the
2 survey?

3 A. Yes.

4 MR. CHUNG: Let's go to the next
5 document.

6 So this will be Exhibit 5.

7 (Bailey Deposition Exhibit 5 marked for
8 identification and attached to the
9 transcript.)

10 BY MR. CHUNG:

11 Q. Now, Ms. Bailey, I've put in front of you
12 the hospital survey that's taken from the
13 website, a version taken from the website.

14 Do you recognize it?

15 A. Yes.

16 Q. Okay. Now, you see that the survey is
17 approximately 350 pages long.

18 Do you see that?

19 A. Yes.

20 Q. Okay. Have you -- do you know whether
21 Leapfrog has conducted any studies or collected
22 data on how long it takes hospitals to respond to

1 the survey?

2 A. I don't believe we've done anything
3 formally.

4 Q. Okay.

5 A. No.

6 Q. Do you know generally -- and this can be
7 a range -- how long it takes for hospitals to
8 respond or fill out the survey?

9 A. We've heard 40 to 80 hours.

10 Q. Okay. Where is that from? Where do you
11 hear that from?

12 A. The ratings team told me that, just
13 talking to hospitals I believe anecdotally.

14 Q. Okay. Are you aware of any concerns that
15 hospitals have raised about the amount of time or
16 resources it takes to respond to the survey?

17 A. Any hospital I talk to, they prioritize
18 Leapfrog and patient safety. So to them, it's no
19 time. To them, they spend a lot more time on
20 other ratings than they do on Leapfrog and don't
21 see it as a burden, so I haven't personally heard
22 complaints.

1 Q. Okay. You testified earlier that you
2 don't speak to hospitals.

3 So what's the nature of the
4 communications you're referring to here?

5 A. I testified earlier that I do case
6 studies. So that's the only specific instance I
7 can think of when I would talk to a hospital.

8 Q. Okay. And what -- did you conduct a case
9 study of how long hospitals or what -- kind of
10 the extent of resources hospitals have to
11 undertake to complete these surveys?

12 A. No.

13 Q. So what was the context in which you
14 got -- in which you heard from hospitals that --
15 about how long it takes for them to fill out this
16 survey?

17 A. When I'm preparing for a case study, we
18 usually do an interview. And I do a
19 pre-interview, which is very standard in
20 communications, where I just try to understand,
21 you know, their role with Leapfrog. You know,
22 what is your stance on Leapfrog? How long have

1 you done the survey? What parts of it are most
2 valuable to your organization?

3 And that helps me, as a communications
4 person, come up with the questions for the formal
5 interview. So we always ask them about the
6 survey as part of that.

7 Q. Okay. So apart from the conversations
8 you've had with hospitals, have you heard of any
9 concerns or complaints raised by hospitals about
10 the amount of time or resources it takes to
11 respond to the survey?

12 A. Not personally.

13 Q. Okay. Have you just -- from colleagues,
14 have you heard about -- heard a complaint or
15 concern along these lines?

16 A. Not that I can recall.

17 Q. Okay. Never heard a concern about -- or
18 a complaint about how long it takes?

19 A. Not particularly from hospital. I don't
20 work on the help desk, so I wouldn't -- I
21 wouldn't know.

22 Q. Okay. This is not -- this sort of issue

1 is not -- you mentioned the help desk. What is
2 that?

3 A. The help desk is in-house for Leapfrog.
4 We use nDesk. So hospitals and ambulatory
5 surgery centers, if they have questions, they
6 reach out to our staff through the help desk and
7 they get back to them.

8 Q. Okay. Have -- so putting aside kind of
9 how much time it takes to fill out or respond to
10 the survey, have any of the hospitals that you've
11 spoken to expressed concerns or complaint about
12 the content or the fairness of the hospital
13 survey?

14 A. No.

15 Q. All right. How about apart from --
16 putting aside your personal communications with
17 hospitals -- right? -- have you heard from
18 colleagues about hospitals expressing concerns
19 about the fairness of the hospital survey?

20 A. Not that I can recall.

21 Q. Okay. So is it -- have you heard -- in
22 your conversations with hospitals, have the

1 hospitals expressed anything kind of negative or
2 even ambivalent about the hospital survey?

3 A. Not that I can recall.

4 Q. Okay. So it's all been positive about
5 the hospital survey; is that right?

6 A. From a communications perspective? Yes.
7 Because we focus on hospitals that do the survey
8 for the case studies.

9 Q. Okay. Can you explain that? I'm not
10 quite sure I understand.

11 A. So as I said before, I do case studies
12 with hospitals occasionally. That's the only
13 time I could think of that I would have a direct
14 conversation with a hospital and would
15 potentially get feedback from them.

16 But we do case studies on hospitals that
17 complete the survey.

18 Q. Understood. So is it -- so is it fair to
19 say that, because you conduct case studies of
20 hospitals that complete the survey, that the
21 feedback you receive from those hospitals is
22 positive?

1 A. Yes.

2 Q. All right. Have you conducted any case
3 studies of hospitals that did not fill out the
4 survey?

5 A. Not that I can recall.

6 Q. Okay. Why not?

7 A. My job is to promote Leapfrog as a
8 communications person, so it -- it would be --
9 it's beneficial to do case studies on hospitals
10 that do the survey.

11 Q. So for these case studies, because it's
12 from a -- for a communications purpose, is the
13 goal with these case studies to basically
14 highlight or showcase hospitals that completed
15 the survey?

16 A. Yes. And use the survey to spur
17 change --

18 Q. All right.

19 A. -- and use it for benchmarking.

20 Q. And are these hospitals that received an
21 A for their hospital safety grade?

22 A. They are different programs. The

1 Leapfrog hospital survey and the Leapfrog
2 hospital safety grade are different.

3 So we've done case studies on children's
4 hospitals that don't get a safety grade.

5 We've done case studies on an hospital
6 that had an F on the safety grade and now has an
7 A on the safety grade.

8 So we've had a lot of different types of
9 stories.

10 Q. How often does Leapfrog make changes to
11 the hospital survey?

12 A. I know it's reviewed regularly and
13 changes are made just when necessary. Every year
14 we put out proposed changes if there are any
15 changes that are put out for public comment.

16 Q. So that's every year because the hospital
17 survey is issued annually, correct?

18 A. Yes. It is annual.

19 Q. Can you tell us about -- can you describe
20 for us step by step how that public comment
21 process works?

22 A. I'm not intimately involved in it, but

1 from my understanding, we -- my team posts it on
2 the website. And any public comments go through
3 the help desk. So again, Missy Danforth's team
4 reviews the public comments.

5 Q. All right. So it is -- public comment is
6 invited -- is it just on the website itself, or
7 are there other avenues for inviting public
8 comment?

9 A. From my understanding, it's through the
10 help desk.

11 Q. Okay. And who monitors that help desk
12 again?

13 A. Missy Danforth's team. They all do.

14 Q. Are any -- are any posts or feedback on
15 the help desk ever elevated to you for
16 communications purposes?

17 A. Sometimes reporters will reach out on the
18 help desk just because they're in the wrong
19 place, so they get sent to me.

20 Q. Do you ever -- have you ever monitored
21 the help desk because sometimes reporters or
22 members of the media placed their questions on

1 the help desk?

2 A. No. They'll just forward it to me and I
3 e-mail the reporter.

4 Q. Okay. Are you familiar with Leapfrog's
5 imputation model in its scoring methodology?

6 A. Yes. Generally.

7 Q. All right. And what is it, generally?

8 A. If we have a situation where we don't
9 have the data, we use an imputation model to
10 assign scores.

11 Q. All right. And how long has Leapfrog
12 used an imputation model in its scoring
13 methodology?

14 A. I believe at least for as long as I've
15 been at Leapfrog.

16 Q. Okay. And just to be clear, this is the
17 scoring methodology behind the hospital safety
18 grades, correct?

19 A. Correct.

20 Q. Why did -- so let's -- actually, let's
21 move on to the next document.

22 MR. CHUNG: This will be Exhibit 6.

1 (Bailey Deposition Exhibit 6 marked for
2 identification and attached to the
3 transcript.)

4 BY MR. CHUNG:

5 Q. So we've put Exhibit 6 in front of you,
6 Ms. Bailey. It's an e-mail exchange from
7 October 24, 2024.

8 Just let us know when you've had a chance
9 to look at it.

10 Have you had a chance to review it?

11 A. Yes.

12 Q. All right. What's being discussed here?

13 A. The imputation messaging. So anytime
14 there is a change in the methodology, we try to
15 be as transparent and definitely as accurate as
16 possible, so we update the frequently asked
17 questions on our website, as well as spokesperson
18 talking points, things like that.

19 Q. Okay. So you write here to Ms. Danforth
20 that you're working on synthesizing for FAQs,
21 messaging, et cetera.

22 So in terms of this imputation messaging,

1 where does it show up? You touched on it
2 earlier, but can you kind of list for us where
3 this messaging is incorporated?

4 A. Off the top of my head, it's in our
5 FAQs -- or at the time of this e-mail, like when
6 the fall 2024 safety grade was issued, it was in
7 our FAQs which we give to every press member that
8 we do any outreach to. It's linked at least
9 twice on our website.

10 That's all I can think -- it's an
11 internal talking points.

12 Q. Okay. In the first bullet point you
13 wrote, for purposes of this messaging, Annually,
14 Leapfrog's expert panel and researches at John
15 Hopkins Medicine review the scoring methodology
16 and have recommended modifying the current
17 imputation method used for filling in missing
18 data from hospitals that did not complete the
19 latest Leapfrog survey.

20 So is it correct that Leapfrog's expert
21 panel that we discussed earlier were the ones
22 that recommended adopting an imputation model?

1 A. From my understanding, yes.

2 Q. What is that understanding based on?

3 A. This messaging that I wrote was based on
4 a much longer writeup that Missy and her team put
5 together. So often my job as communications
6 manager is to take more complicated data science
7 type language and to make it make sense to the
8 lay public.

9 So that's what I was doing in this e-mail
10 exchange.

11 Q. Okay. So in that longer writeup that
12 Ms. Danforth and her team put together,
13 Ms. Danforth was -- and that team were
14 representing that the expert panel themselves
15 were recommending -- were recommending this
16 change in the imputation methodology?

17 A. Yes. That's my understanding.

18 Q. Did you -- was that consistent with your
19 own understanding, that it was the expert panel
20 that recommended this change in the imputation
21 methodology?

22 A. Yes.

1 Q. And what is your personal understanding
2 based on?

3 A. Being at Leapfrog for as long as I have
4 been. I generally know that the expert panel --
5 like, what their role is.

6 Q. All right. And so in this particular
7 instance with the change in the scoring
8 methodology, you -- your understanding was that
9 the expert panelists recommended this change just
10 based on your general understanding of their
11 role?

12 A. Yes.

13 Q. Okay. It also says here, just looking at
14 the same sentence, Annually, Leapfrog's expert
15 panel and researchers at John Hopkins Medicine
16 review the scoring methodology.

17 Is that annual review that's represented
18 here, is it consistent with your personal
19 understanding?

20 A. Yes.

21 Q. Okay. It also mentions that it's not
22 just the expert panel but researchers at John

1 Hopkins Medicine reviewed the scoring methodology
2 and made the recommendation here.

3 In this instance, do you have an
4 understanding as to why researchers at John
5 Hopkins Medicine were involved as well, in
6 addition to the members of the expert panel?

7 A. John Hopkins Medicine, the Armstrong
8 Institute for Patient Safety and Quality, they're
9 our research partner.

10 Q. What does that mean, research partner?

11 A. So Matt Austin is our research -- so he
12 is a researcher, from my understanding of what he
13 does, and he oftentimes, with me and the rest of
14 the staff, he's sharing the most up-to-date
15 research on things with us. He works with our
16 expert panels. He works closely with Missy
17 Danforth and has, as far as I know, for over
18 20 years.

19 Q. So for purposes of the review here of the
20 scoring methodology and the recommendation, is it
21 your -- let me put it another way, Ms. Bailey.

22 Is it typical for the expert panels --

1 for John Hopkins Medicine researchers to be
2 involved in this process?

3 A. Yes.

4 Q. So for all the -- so it's typical that,
5 annually, John Hopkins Medicine researchers
6 review Leapfrog's scoring methodology and make
7 recommendations?

8 A. Yes.

9 Q. So it's not just the expert panel that
10 engages in this; is that your understanding?

11 A. Yes.

12 Q. Okay. So this is about a change -- this
13 e-mail is about messaging around a change in the
14 imputation methodology in 2024.

15 What was that change?

16 A. It's this last bullet here, where we were
17 changing the way that the data for these four
18 measures -- CPOE, BCMA, ICU physician staffing
19 and hand hygiene -- were scored. So instead of,
20 I believe, four rounds of safety grade data, we
21 changed it to two rounds. And then if we don't
22 have that data, we assign hospitals a point value

1 equivalent to limited achievement, which reflects
2 the lack of data available.

3 Q. What do you mean by the four rounds
4 versus the two rounds?

5 A. So we call -- so we have safety grades
6 twice a year, in the spring and the fall, and we
7 call each of those a round; sometimes call them a
8 cycle.

9 Q. So what is that -- how is that relevant
10 here to the change in the imputation methodology?

11 A. Just reading from the paper. I don't --
12 can you restate the question?

13 Q. Sure. So what exactly is the change as
14 it relates to the number of rounds?

15 A. It's less.

16 Q. So there are fewer rounds -- so there are
17 fewer rounds -- I'm just trying to understand --
18 right? -- in terms of the number of rounds
19 involved -- right? -- in the safety grades, how
20 that's relevant to the change in the imputation
21 methodology.

22 A. So there are two steps to the imputation

1 methodology. Step 1 is using, if we don't have
2 the data for right now -- so, like, for the fall
3 safety grade, the data cutoff point snapshot date
4 is August 31st. So if we don't have the data for
5 2025 survey, we'll go back to safety grade
6 rounds. So I think six months, six more months.
7 And we can use those scores.

8 It used to be longer. Again, one of the
9 reasons a safety grade is twice a year is we want
10 to have the most up-to-date information possible.
11 So from my understanding, that's why we made that
12 specific change to step 1 of the imputation
13 model.

14 Q. Understood.

15 It also says here -- just going back to
16 Exhibit 6 -- if there's no data available for the
17 measure within the last two safety grade cycles,
18 Leapfrog will assign the hospital a point value
19 equivalent to receiving limited achievement.

20 So is this -- you just went over step 1.
21 Right?

22 Is this messaging around step 2 of a new

1 imputation methodology?

2 A. Yes.

3 Q. All right. Limited achievement. What
4 does that mean?

5 A. Limited achievement is a term that we use
6 in the Leapfrog hospital survey. And these four
7 measures come from the Leapfrog hospital survey.

8 We have performance categories, so
9 depending on how you score as a hospital, limited
10 achievement is the lowest.

11 Q. Okay. So where there's no data available
12 for a specific measure -- right? -- at least
13 among the four here involved, within the last two
14 safety grade cycles, is it correct that, under
15 step 2 of this change, Leapfrog will assign
16 automatically to that hospital a limited
17 achievement score for those particular -- for
18 that particular measure? Is that right?

19 A. Yes. For those four measures.

20 Q. Just taking a step back, why was it these
21 four metrics -- CPOE, BCMA, IPS and hand
22 hygiene -- why are they the four metrics involved

1 here?

2 A. I wasn't part of the conversations
3 exactly to choose measures. I'm not part of
4 that.

5 But from a communications perspective,
6 these measures are critical to patient safety.
7 We're talking CPOE and BCMA; that's medication
8 safety. Medication errors are the number one
9 most common type of error that happen in a
10 hospital. Very, very important that these
11 systems -- most hospitals have them -- but that
12 they actually work and are protecting patients.

13 ICU physician staffing. Again, very,
14 very important. There are studies that we
15 reference that having critical care doctors in
16 the ICU taking care of patients can reduce
17 mortality by 40 percent, which is huge for
18 patients.

19 And hand hygiene, washing your hands, is
20 the most effective way to reduce the spread of
21 infections.

22 Q. Okay. Well, I'm glad that you went one

1 by one, but I'm going to take you back through
2 each of them.

3 A. Okay.

4 Q. So starting with CPOE, why is it
5 appropriate for Leapfrog to use an imputation
6 model for CPOE?

7 MS. BLAIR: Objection to form.

8 THE WITNESS: I can't speak to that. I'm
9 not a data scientist.

10 BY MR. CHUNG:

11 Q. Okay. Well, from a communications
12 perspective?

13 A. I don't know.

14 Q. Okay. Why is it -- let's put it another
15 way.

16 Why do you understand it's appropriate
17 for Leapfrog to automatically assign a limited
18 achievement score for CPOE where it doesn't have
19 data according to step 2 of this change in
20 methodology?

21 MS. BLAIR: Objection to form.

22 THE WITNESS: From a communications

1 perspective, okay, would be patients have the
2 most at risk for this and they are the most at
3 risk if we understated a hospital's performance
4 on any of these four measures.

5 That's my opinion on it.

6 BY MR. CHUNG:

7 Q. That's your opinion? Okay.

8 So what do you mean by understating?

9 A. So limited achievement, as I testified
10 before, is the lowest achievement. If we
11 overstated that performance, patients have the
12 most to lose if they go into the hospital
13 thinking that this hospital scores high on
14 something that they actually don't report on.

15 Q. Okay. Is there a concern -- is there a
16 concern at all by automatically assigning the
17 lowest possible score -- right? -- the limited
18 achievement, in the absence of data on CPOE that
19 consumers might be misled?

20 MS. BLAIR: Objection to form.

21 THE WITNESS: I don't think so.

22

1 BY MR. CHUNG:

2 Q. Why not?

3 A. Because we've made it clear on the
4 website that the score is assigned.

5 Q. Okay. And which website are you
6 referring to?

7 A. Hospitalsafetygrade.org.

8 Q. So that's one of the two websites that
9 Leapfrog runs, correct?

10 A. Correct.

11 Q. Okay. Same series of questions for BCMA,
12 another one of the four imputed metrics.

13 Why is it appropriate for Leapfrog to use
14 an imputation model for BCMA with this -- this
15 change two-step process?

16 MS. BLAIR: Objection to form.

17 THE WITNESS: The same answer that I had
18 to the CPOE. Again, as I testified before, this
19 has to do with medication safety. It's the most
20 common type of error that happens in hospitals.
21 Patients have the most at risk if these systems
22 aren't working.

1 BY MR. CHUNG:

2 Q. Okay. Same question with respect to IPS.

3 MS. BLAIR: Objection. Form.

4 THE WITNESS: Same answer. That patients
5 have the most at risk. As I testified before,
6 having critical care doctors in the ICU is very
7 important for patients who are in critical
8 states.

9 BY MR. CHUNG:

10 Q. Okay. And then how about for the fourth
11 and final, hand hygiene?

12 A. Again, patients have the most at risk.
13 Hand hygiene is arguably the most important part
14 of not spreading infections.

15 Q. Okay. So why does Leapfrog use the
16 imputation model for CPOE, BCMA, IPS, and hand
17 hygiene, but does not use an imputation model for
18 a number of other measures? And in particular,
19 we're looking at safe practice 1, safe practice
20 2, and total nursing care hours per patient day
21 when there isn't a response from the hospital.

22 A. I don't know.

1 MS. BLAIR: Objection to form.

2 BY MR. CHUNG:

3 Q. Okay. Are you -- has Leapfrog received
4 complaints or concerns about the change in the
5 imputation methodology from last year?

6 A. I'm not aware. I'm not in those
7 conversations.

8 Q. Not aware of any feedback, negative or at
9 least -- negative feedback or concerns about the
10 change in imputation methodology?

11 A. No. I don't talk to hospitals in the
12 help desk.

13 Q. Okay. How about from your colleagues?

14 A. Not that I can recall.

15 Q. Do you know whether there are any plans
16 to further revise or update the imputation
17 methodology in the future?

18 A. I don't know.

19 Q. Did you have any role in the change to
20 the imputation methodology from last year?

21 A. No.

22 Q. Who at Leapfrog was involved in the

1 change?

2 A. It would be Missy Danforth, Leah Binder
3 primarily.

4 Q. All right. Any others within Leapfrog?

5 A. I'm not sure.

6 Q. All right. How about from outside of
7 Leapfrog? Anyone involved in the methodology
8 change? We went over some -- we went over the
9 messaging -- right? -- as it relates to the
10 expert panel and the John Hopkins researchers.
11 But apart from those individuals or institutions,
12 any others outside of Leapfrog that were involved
13 in the change to the imputation methodology from
14 last year?

15 A. I don't know. I don't think so.

16 Q. Okay. Are you aware whether -- in terms
17 of the expert panel itself, do you know which
18 section or group of the expert panelists were
19 involved in the imputation methodology change?

20 A. It's the safety grade expert panel.

21 Q. So none of the other -- you testified
22 earlier, at least with respect to the hospital

1 survey -- right? -- that there are separate,
2 we'll call them subpanels that are focused on
3 each of the sections.

4 Were any of those other expert panels
5 involved in the imputation methodology change?

6 A. I don't know.

7 Q. Okay. So in terms of the change, why --
8 as you understand it, why did Leapfrog decide to
9 automatically assign this lowest score, the
10 limited achievement score, for these imputed
11 metrics instead of the average hospital score, as
12 it had done previously?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: I don't know.

15 BY MR. CHUNG:

16 Q. Was there any -- as the communications
17 director -- right? -- was there any messaging,
18 communications-focused messaging, around that
19 very question, the question being why the change,
20 right?

21 A. Can you restate that?

22 Q. Sure.

1 Was there any messaging -- right? -- from
2 a communications perspective, around the question
3 of why Leapfrog decided to change the imputation
4 methodology from using the average hospital score
5 for step 2 to automatically assign the lowest
6 score under step 2?

7 A. Nothing beyond what's in Exhibit 6.

8 Q. Okay. So there's no -- so if we're
9 looking at Exhibit 6 -- right? -- am I correct
10 that there's -- in these bullet point messaging,
11 that there's nothing about -- that goes to why
12 Leapfrog went from just using the average
13 hospital score to automatically assign the
14 limited achievement score?

15 A. Yeah, no, that's generally too in the
16 weeds for communications messaging.

17 Q. Why is that too in the weeds?

18 A. I don't know. I'm not usually -- we
19 don't usually get that specific. As far as
20 communications goes, generally having too much
21 information can be confusing.

22 Q. But why -- if you could kind of explain

1 why messaging around that question -- right? --
2 the question that focuses on the actual change to
3 the imputation methodology, why that would be --
4 why that would be too confusing to include.

5 A. I mean, this is a small part of the
6 safety grade. I have a lot of other messaging
7 for the safety grade. This is four of the
8 measures.

9 So as a communications person, you only
10 have so much attention with people and there's a
11 lot of other messages. So this is what we chose
12 to do.

13 Q. What are the other messages around the
14 hospital safety grade?

15 A. What is the hospital safety grade? Why
16 is it important? What types of measures does it
17 include? Have there been any changes -- which is
18 where this comes in. Et cetera.

19 Q. Did you -- I asked you earlier whether
20 you had heard any feedback or complaints about
21 changes to the imputation methodology. Let me
22 just be a little bit more specific with that

1 question.

2 Have you heard from hospitals or just
3 more generally any concerns or complaints about
4 the scores, the limited achievement scores that
5 non-participating hospitals were automatically
6 receiving on these imputed metrics?

7 A. I can't recall any specifics, no.

8 Q. Okay. And is it correct that, with this
9 change in the imputation methodology, that
10 hospitals who don't participate in the survey get
11 lower hospital safety grades?

12 MS. BLAIR: Objection to form.

13 THE WITNESS: Can you restate the
14 question?

15 BY MR. CHUNG:

16 Q. Sure.

17 And is it correct that hospitals that do
18 not respond to the survey -- right? -- get lower
19 hospital safety grades as a result of this new
20 imputation methodology?

21 A. Not necessarily lower.

22 Q. Not necessarily? So can you explain

1 that?

2 A. So the -- if you did participate in the
3 hospital survey, you could score limited
4 achievement and you would get the same measure
5 score for these four measures.

6 So it doesn't necessarily mean it would
7 be better or worse.

8 Q. Okay. Are you aware that -- was -- what
9 was the purpose of the change in this
10 methodology?

11 MS. BLAIR: Objection to form.

12 THE WITNESS: I don't know.

13 BY MR. CHUNG:

14 Q. Okay. Are you aware that one of the
15 purposes of the change in methodology was to
16 penalize hospitals that did not participate in
17 the survey?

18 MS. BLAIR: Objection to form.

19 THE WITNESS: That's not my viewpoint.

20 BY MR. CHUNG:

21 Q. I understand -- I'm not asking for your
22 viewpoint.

1 Are you aware that that was one of the
2 purposes?

3 A. No. I don't think it's one of the
4 purposes.

5 Q. Okay. Are you aware that one of the
6 purposes of the change in the methodology was to
7 induce hospitals to participate in the survey?

8 A. No.

9 Q. No, you're not aware of it or, no, that's
10 not one of the purposes?

11 A. I'm not generally aware of it, no.

12 Q. What do you mean by generally aware of
13 it?

14 A. Like, I mean, logically, it is an
15 incentive. It's not the only incentive, major
16 incentive. I'd say the major incentive of doing
17 the survey is to be transparent and to show the
18 public how you're performing.

19 Q. So -- understand the logic, right? But
20 is that -- the purpose of incentivizing hospitals
21 to participate in the survey, was that a purpose
22 that you and your colleagues at Leapfrog

1 discussed?

2 MS. BLAIR: Objection to form. Mis- --

3 THE WITNESS: Can you restate?

4 BY MR. CHUNG:

5 Q. Did you and your Leapfrog colleagues
6 discuss that one of the purposes of the change in
7 methodology here was to induce hospitals to
8 participate in the survey?

9 A. Our job at Leapfrog is always to have
10 more hospitals do the survey. We would love if
11 every hospital did the survey, so it's always a
12 part of our conversation.

13 Q. My question is, with respect to the
14 change in the imputation methodology -- right?
15 Understand that, fine, that's generally something
16 that you discuss. Right? But specific to the
17 change in the imputation methodology, did you and
18 your colleagues at Leapfrog discuss that this
19 would be a way to induce more hospitals to
20 participate in the survey?

21 A. I don't remember having those
22 conversations myself.

1 Q. Was Leapfrog trying to induce hospitals
2 to participate by automatically giving
3 non-participating hospitals the lowest score on
4 the four imputed metrics?

5 MS. BLAIR: Objection to form. Asked and
6 answered.

7 THE WITNESS: I don't know.

8 BY MR. CHUNG:

9 Q. You don't know? Okay.

10 Was Leapfrog -- looking at another
11 perspective, for hospitals that actually
12 participated in the survey, that responded to the
13 survey, was this change in methodology a way to
14 appease those hospitals that were participating
15 in the survey?

16 A. No, I don't think so.

17 Q. Okay.

18 MR. CHUNG: Let's go to the next
19 document.

20 MS. BLAIR: Daniel, is it okay to take a
21 break?

22 MR. CHUNG: Yes. Of course. We've been

1 going for a while.

2 VIDEO TECHNICIAN: The time is 10:29 a.m.
3 Ending unit 1. We're off the record.

4 (A recess was taken.)

5 VIDEO TECHNICIAN: The time is 10:40 a.m.
6 This begins unit number 2. We're on the record.

7 MR. CHUNG: All right. Ms. Bailey, we're
8 going to mark the next document Exhibit 7.

9 (Bailey Deposition Exhibit 7 marked for
10 identification and attached to the
11 transcript.)

12 BY MR. CHUNG:

13 Q. And it's an e-mail chain from April of
14 this year, 2025.

15 Just take a few moments to look at it.

16 A. Okay. I read it.

17 Q. All right. So what's being discussed
18 here in this chain?

19 A. We were doing -- from what I remember, we
20 were preparing a presentation for our board of
21 directors. We had some newer board of directors.
22 We wanted to give them an overview of Leapfrog

1 programs.

2 Q. And let's turn your -- and was -- part of
3 this overview, did that include the new
4 imputation methodology?

5 A. I don't recall.

6 Q. Okay. Well, let's just focus on a few
7 pieces. In particular, Ms. Binder's -- the
8 initial kind of long e-mail that kicks off the
9 discussion.

10 So if you look at Bates ending 500, the
11 fourth bullet down of a series in Ms. Binder's
12 e-mail, she notes that -- the most important
13 things to convey in this speech.

14 So what is "this speech" referring to?

15 A. Meeting with our board of directors.

16 Q. Okay. And the fourth bullet down is, Why
17 the imputation strategy is controversial was
18 among the most important things to convey in this
19 speech.

20 Why was the imputation -- why is or was
21 the imputation strategy controversial?

22 A. I don't know why she necessarily used

1 this word. I don't remember exactly what was in
2 this presentation. It was a lot of our standard
3 slides.

4 But anytime there's a change at Leapfrog,
5 you know, we make sure our board knows about it.

6 Q. What is your understanding as to why the
7 imputation strategy was controversial?

8 A. From my history at Leapfrog, anytime
9 there is a change on the survey or the safety
10 grade, it could be controversial. It depends on
11 the person you talk to.

12 Q. Controversial to whom?

13 A. I don't know.

14 Q. Okay. But you said based on your time or
15 your experience at Leapfrog. Right?

16 So have there been experiences or
17 instances during your time there where a change
18 in the imputation strategy was controversial?

19 A. I mean, we're talking about the change
20 from fall 2024, and this --

21 Q. Well, I'm talking about what she is
22 referring to here in the fourth bullet point, why

1 the imputation strategy is controversial. Right?

2 So let's just start with have there been
3 instances during your time at Leapfrog where
4 there was controversy around the imputation
5 strategy?

6 A. I can't recall a specific instance.

7 Q. Okay. Do you have an understanding as to
8 why Ms. Binder wrote here that this particular --
9 that why the imputation strategy is controversial
10 was an important thing to convey to the board?

11 A. If this was written in April, that would
12 mean that it was about to be the second safety
13 grade since the new change. So it still was a
14 new change.

15 So again, any new changes would be
16 something we would make sure the board knew.

17 Q. Okay. Was the board involved in the
18 decision to change the imputation methodology?

19 A. Leah reports to the board, so they're
20 aware of changes.

21 Q. Okay. Putting aside awareness of the
22 changes, does the board have input into -- did

1 the board have input into the change in the
2 imputation methodology?

3 A. I believe so, from what I can remember.

4 Q. How were they involved? Or what sort of
5 input did they have?

6 A. It was discussed in board meetings before
7 it went out for public comment.

8 Q. So this is -- these were discussions
9 before the actual imputation methodology was
10 implemented and finalized?

11 A. Correct. While we were developing the
12 proposed changes.

13 Q. Okay. And so what were -- can you
14 describe those discussions with the board about
15 the -- about the proposed or the contemplated
16 change in imputation methodology?

17 A. I don't remember.

18 Q. Are you -- do you participate or are you
19 present at Leapfrog board meetings?

20 A. I take minutes.

21 Q. So you're there?

22 A. Yes.

1 Q. Okay. But you don't remember even just a
2 sketch -- right? -- of discussions at these board
3 meetings about the upcoming change in the
4 imputation methodology?

5 A. I don't remember. We've had a lot of
6 board meetings since then, and it's a small part
7 of my job.

8 Q. Okay. In the second-to last bullet
9 point -- we're looking at the same page, Bates
10 500 -- again, the most important things to convey
11 in this speech are the levers we pull to get
12 hospitals and ASCs to participate.

13 What were those -- what are or what were
14 those levers?

15 A. So as I mentioned earlier on, we're
16 founded by employers. And our board represents
17 employers. So they are employers themselves. We
18 also have patient advocates. So, you know,
19 that's the audience that we're talking to and
20 that's the audience that we're talking about with
21 the levers.

22 So we educate them on why the surveys are

1 important and how facilities can utilize them and
2 also how employers -- I think, in this instance,
3 we're talking specifically about hospitals and
4 ASCs. Our general messaging focuses on showing
5 your commitment to transparency and that you put
6 patient safety first in talking to hospitals and
7 ASCs, as well as you can use it for benchmarking
8 purposes.

9 Q. So how are those -- just to kind of break
10 that down, how are those levers to get hospitals
11 and ASCs to participate -- do you take this to
12 mean to participate in the survey?

13 A. Yes. To participate in the survey.

14 Q. Okay. So just going back to the
15 question.

16 How are each of those -- can you just
17 kind of describe how each of those are levers to
18 get hospitals to participate in the survey?

19 A. I wouldn't use the word "levers." I
20 would use the word, maybe, incentives or
21 advantages. Like how do we -- what are the
22 interests of hospitals, like --

1 Q. Why wouldn't --

2 A. -- how do they benefit.

3 Q. I'm sorry to interrupt you.

4 Why wouldn't you use the term "levers"
5 that Ms. Binder used here?

6 A. That's not a word I would use. I don't
7 really know what it means in this context
8 exactly.

9 Q. Okay. So using incentives -- right? --
10 as another word, how are each of those incentives
11 to get hospitals and ASCs to participate in this
12 survey?

13 A. If we're talking about benchmarking,
14 there are a lot of hospitals and ASCs that use
15 their survey results in benchmarking so they can
16 see year over year where the changes are.
17 Especially at the system level. A lot of systems
18 who really embrace transparency will use the
19 survey as a benchmark so they can see with all
20 their hospitals and their systems, you know,
21 where there may be opportunities to improve.

22 So that's a good incentive for them to

1 have that.

2 Q. Is the imputation methodology itself a
3 lever to get hospitals to participate in the
4 survey?

5 A. It's not one we use in messaging. I
6 wouldn't have been included in this from my
7 knowledge.

8 Q. Putting aside that it's not included in
9 messaging -- right? -- is it a lever, the
10 imputation methodology itself a lever to get
11 hospitals to participate in the survey?

12 MS. BLAIR: Objection to form.

13 THE WITNESS: I'd say it's an incentive.

14 BY MR. CHUNG:

15 Q. Okay. And how is it an incentive?

16 A. Because they have the opportunity to give
17 us more information about patient safety in those
18 measures. Potentially would have the opportunity
19 to score differently, potentially not. There's
20 no guarantee either way.

21 Q. Okay. At least -- would it be fair to
22 say that it is -- the imputation methodology is

1 an incentive to hospitals to participate at least
2 so that they don't get automatically scored --
3 given automatically a limited achievement score
4 in the four imputed metrics?

5 MS. BLAIR: Objection to form.

6 THE WITNESS: Can you repeat the
7 question?

8 BY MR. CHUNG:

9 Q. Sure.

10 Is it fair to say that it's an incentive
11 to hospitals to participate in the survey so that
12 they don't get the lowest score on the four
13 imputed metrics?

14 MS. BLAIR: Objection to form.

15 THE WITNESS: Possibly.

16 BY MR. CHUNG:

17 Q. Okay. She continues -- Ms. Binder in
18 this e-mail continues with, in other words --
19 well, we're looking at Bates 501. Let's just go
20 on to the next page.

21 About halfway down there's a
22 paragraph that starts, Then there needs to be a

1 slide.

2 Do you see that?

3 A. Yes.

4 Q. Okay. Then there needs to be a slide
5 about what Leapfrog does to grade a hospital when
6 they decline to report the survey. I think it's
7 very important for the board to understand what
8 we moved over time toward imputing the lowest
9 level of performance when we don't have recent
10 Leapfrog data.

11 Why was that important for the board to
12 understand?

13 A. Again, it was a change. Our board is not
14 made of healthcare professionals. It's made of
15 employers and patient safety advocates. So it's
16 not the same as talking to a data scientist, so
17 she wanted to make sure they understood since it
18 is a change.

19 Q. Okay. And then she continues, In other
20 words, the slides should not detail the
21 step-by-step imputation process. It should
22 summarize the strategic import of the imputation

1 process. This has been a shift over time and one
2 with significant policy ramifications for the
3 organization.

4 First, what was the strategic import that
5 she's referring to here?

6 A. I don't know.

7 Q. Don't know?

8 A. (No verbal response.)

9 Q. Do you recall having conversations with
10 Ms. Binder about that language around this time?

11 A. No. I mean, this is like a stream of
12 consciousness e-mail of edits, so I wouldn't take
13 it as a directive.

14 Q. Okay. What do you mean by a stream of
15 consciousness, stream of edits?

16 A. There's, you know, two pages,
17 single-spaced, of edits, so she was just quickly
18 writing her edits down.

19 Q. Okay. What were the significant policy
20 ramifications for Leapfrog that she was referring
21 to here?

22 A. I don't know.

1 Q. Okay. Just going back to that sentence,
2 The slide should not detail the step-by-step;
3 imputation process. It should summarize the
4 strategic import of the imputation process.

5 Why didn't she want the board to be
6 provided detail about the step-by-step imputation
7 process?

8 MS. BLAIR: Objection to form.

9 THE WITNESS: They had been provided the
10 step-by-step, in my recollection. At this time,
11 we had one hour to do this presentation, and this
12 was not the only focus of the presentation. So I
13 think she was giving a directive of, you know,
14 she recommends that this is what we show on the
15 slide for purpose of this meeting.

16 BY MR. CHUNG:

17 Q. Okay. But where the -- where there's a
18 change -- right? -- in the imputation
19 methodology -- right? -- don't you think it would
20 be important for the board to know what the
21 change itself was in terms of the steps of the
22 imputation methodology?

1 MS. BLAIR: Objection to form.

2 THE WITNESS: I mean, from my knowledge,
3 we're talking about, what, April 2025? So it was
4 already in place. So it's not that this was the
5 first time we talked to them. It had been
6 several times --

7 BY MR. CHUNG:

8 Q. So --

9 A. -- in my recollection.

10 Q. Okay. So you know that they'd -- they
11 had been already given the details about the
12 changes in the steps to the imputation
13 methodology by this time?

14 A. Yes.

15 Q. Okay. How?

16 A. As I testified before, in board meetings.

17 Q. Okay.

18 MR. CHUNG: Let's go to the next
19 document. This will be Exhibit 8.

20 (Bailey Deposition Exhibit 8 marked for
21 identification and attached to the
22 transcript.)

1 BY MR. CHUNG:

2 Q. Now, Ms. Danforth [sic], this is a -- it
3 looks like a presentation to the Leapfrog board
4 of directors dated April 28, 2025, that we
5 believe corresponds to the discussion over the
6 e-mail that we were looking at. But if you could
7 take a few moments to flip through it. Let me
8 know if you recognize it.

9 A. Sure. Ms. Bailey.

10 Q. Ms. Bailey. All right.

11 A. Too many.

12 Q. We'll get there.

13 Just for the record, what you're looking
14 at, Exhibit 8, we believe is what's discussed
15 and -- but it wasn't technically attached --
16 right? -- to the e-mail that we saw in Exhibit 7.

17 MR. CHUNG: And just for counsel, I think
18 the document attached as a child to the e-mail
19 earlier had a technical slip sheet.

20 MS. BLAIR: Oh, okay.

21 MR. CHUNG: So this is what we believe --
22 it's another copy that we believe should have

1 been attached to that e-mail.

2 THE WITNESS: I'm not sure if this was
3 the final version, but --

4 BY MR. CHUNG:

5 Q. Okay.

6 A. -- generally it looks...

7 The only piece of this presentation that
8 I really remember is this last piece. And this
9 looks like an old draft.

10 Q. When you say "last piece," it's the
11 last --

12 A. The very last -- the common objections to
13 Leapfrog.

14 Q. Okay.

15 A. I had a different format, I remember.

16 Q. The format was different in the final --

17 A. Yeah --

18 Q. -- so far as you remember?

19 A. -- this isn't the final. Yeah, this
20 looks like it was the very first draft.

21 Q. Okay. Let's go to 1092. Leapfrog 1092.
22 It's a slide titled, Leapfrog Strategy.

1 A. Okay.

2 Q. So here, the second bullet point reads,
3 Influence consumer decisionmaking and purchaser
4 payment strategy like contracting, network
5 design, and steerage.

6 What's being referenced here?

7 A. So this slide here is referencing back to
8 our founding. So these logos right here are
9 talking about -- these are some of the companies
10 that founded The Leapfrog Group. So we represent
11 employers and purchasers.

12 So that's what this slide number 2 is
13 about in the context of employers.

14 Q. Okay. What does it mean by influencing
15 consumer decisionmaking?

16 A. One of the purposes of Leapfrog is for
17 patients to know that not all hospitals are the
18 same.

19 Q. Okay. And what does purchaser payment
20 strategy mean?

21 A. I'm not an expert in this, but I believe
22 the next three that follow explain it. So direct

1 contracting might be -- maybe you've heard of
2 centers of excellence that some employers set up.
3 Network design is, I think -- I believe designing
4 which hospitals are in the network.

5 And steerage, kind of the same thing,
6 which hospitals are in the network.

7 Q. All right. Let's go to 1096.

8 So Leapfrog By the Numbers is the title
9 of this slide, and you see that it has a series
10 of statistics, Ms. Bailey?

11 A. Yes.

12 Q. Okay. So in the center of the top row it
13 says, Leapfrog websites received more than
14 2.3 million page views per year.

15 Do you see that?

16 A. Yes.

17 Q. Okay. And is that -- that encompasses
18 the two websites that we discussed earlier,
19 correct?

20 A. From my understanding, yes.

21 Q. Okay. And do you have -- as part of your
22 role as communications director, you oversee and

1 manage those two websites; is that right?

2 A. I do, but our PR firm is the one who
3 looks at Google Analytics, so they would be the
4 one to provide me stats like this.

5 Q. So the PR firm is CURA Strategies; is
6 that right?

7 A. Yes.

8 Q. Okay. So the grade, the hospital safety
9 grade, that Leapfrog gives to hospitals is seen
10 by an audience in the millions of people; is that
11 right?

12 MS. BLAIR: Objection to form.

13 THE WITNESS: Our website
14 receives millions of views. Yes.

15 BY MR. CHUNG:

16 Q. Okay. So in the bottom row on the right
17 it says, Every year Leapfrog ratings and data are
18 acceptable -- are accessible to 200 million-plus
19 employees, health plan members, and consumers
20 through Leapfrog's various partners and
21 resellers.

22 Do you see that?

1 A. Yes.

2 Q. Okay. So just putting those two
3 statistics together, the 2.3 million views of the
4 websites and then the 200 million-plus employees
5 and the other individuals that are referenced
6 here, is it fair to say that this is the universe
7 of people that at least potentially see the
8 hospital safety grades that are assigned to
9 hospitals?

10 A. That's my understanding, but there's a
11 very big overlap in that 2.3 million with the
12 2 million.

13 Q. 2 million or 200 million?

14 A. I'm saying, of the 200 million, the
15 website views, it's probably a lot of the same
16 people.

17 Q. And what makes you say that?

18 A. You can't see in Google Analytics who it
19 is, who they are, who's clicking on your website,
20 but just based on our communication strategy and
21 how Leapfrog is set up representing employers,
22 the primary way that we reach patients is not

1 necessarily them knowing what a safety grade is;
2 it's through employers.

3 Q. Okay. Understood.

4 Let's go to 1094.

5 So this is titled, Why hospitals
6 participate in the survey. And then we see a
7 series of statements here.

8 Are these the different reasons why
9 hospitals participate in the Leapfrog survey, the
10 hospital survey?

11 A. Yes. This is similar to what we were
12 talking about before with the incentives.

13 Q. Okay. So fair to say that hospitals --
14 various hospitals participate in the hospital
15 survey for different reasons?

16 A. Yes.

17 Q. All right. Just looking at the
18 page here, do any of the reasons given here
19 include that the hospitals have good patient
20 safety?

21 A. Can you restate the question?

22 Q. Sure.

1 Do any of the reasons enumerated here,
2 included here, include that the hospitals have
3 good patient safety?

4 MS. BLAIR: Objection to form.

5 BY MR. CHUNG:

6 Q. Is that one of the reasons included here?

7 A. I don't understand the question.

8 Q. Sure.

9 Do you see anywhere -- among the
10 reasons -- right? -- here -- you just testified
11 that these are the various reasons that hospitals
12 participate in the survey, correct?

13 A. Right.

14 Q. Right. And this is -- this is a
15 presentation being made to the board of Leapfrog,
16 correct?

17 A. Correct.

18 Q. All right. So of the reasons set forth
19 here -- right? -- are there any reasons that
20 point to hospitals having good patient safety?

21 A. No, not as written on this
22 page necessarily. I guess number 2 could kind of

1 be, make it easy for the public to find
2 information about their safety and quality.

3 Q. Okay. But fair to say that hospitals
4 that participate in the survey can do so or
5 actually do so for reasons other than their
6 safety record; is that right?

7 MS. BLAIR: Objection to form.

8 THE WITNESS: I don't understand the
9 question.

10 BY MR. CHUNG:

11 Q. Right. Are there -- based on what we see
12 on this slide here -- right? -- are there -- is
13 it fair to say that participating hospitals
14 respond to the survey for reasons other than
15 their safety record?

16 A. Yes. These are some of the reasons.

17 Q. Okay. Let's go to Bates 1116, which is
18 the last page you were referring to earlier.

19 A. Okay. Thank you.

20 Q. This one is titled, Common objections to
21 Leapfrog, and we're looking at Bates
22 Leapfrog 1116.

1 So again, this is presented to the board.

2 Is it correct that the statements on this
3 slide are common objections to the Leapfrog
4 survey? Is that right?

5 A. To be clear, yeah, common objections is a
6 communications term, so it doesn't mean that it's
7 -- we hear it all the time or anything. It's
8 just like an FAQ. So...

9 Q. Okay. I'm not sure I quite understand
10 that. Why is it like an FAQ?

11 A. So, like, common objections, it's kind
12 of, like, commonly asked questions, which doesn't
13 mean that they're asked all the time, it's just
14 what we think is important in our messaging.

15 Q. So why -- why are these objections called
16 common objections?

17 A. It's just a PR term.

18 Q. Okay. But fair to say that these are
19 objections or statements that appear in actual
20 feedback?

21 A. Probably.

22 Q. Well, where do you obtain these -- how do

1 you determine whether an objection is common or
2 not?

3 A. I know it says, "common objection," but
4 it's just a communications term. The way that we
5 came up with these bullets was just talking to
6 staff internally of what do we think that the
7 board should know and be able to answer.

8 Q. So this is -- so just to ask the question
9 again: Do these objections -- are these
10 objections based on actual objections from
11 hospitals and other parties?

12 A. Not things necessarily they actually
13 said, just a summary of types of topics.

14 Q. Okay. So taking what you just said, is
15 it -- it's not uncommon for hospitals to object
16 that Leapfrog data is self-reported?

17 A. That's a common question that we get.

18 Q. From hospitals; is that right?

19 A. I wouldn't necessarily know from
20 hospitals. But from reporters or people who are
21 new to Leapfrog, that's something they want to
22 know about.

1 Q. Okay. And this is -- you testified
2 earlier that, based on -- at least in part these
3 common objections were based on discussion
4 internally, right, within Leapfrog?

5 A. Correct.

6 Q. Right? So was this -- did those -- in
7 the course of those internal discussions, did you
8 learn from your colleagues that this particular
9 objection, that Leapfrog data is self-reported,
10 was one that came from hospitals?

11 A. No. This was -- I know this one because
12 this is one that reporters will ask.

13 Q. Okay. So I guess similar question: It's
14 not uncommon for hospitals to object that their
15 quality is evidenced in other ways; is that
16 right?

17 A. Which bullet are you referring to?

18 Q. Well, I guess the third one: Our efforts
19 to promote quality is evidenced by many accolades
20 received within the past year, so we don't need
21 to report to Leapfrog.

22 A. It's -- I'm not saying it's exact. The

1 reason there are quotes, to be clear, is so that
2 they know this isn't something that Leapfrog is
3 saying. That's why there are quotes in here.
4 It's just a form. It doesn't mean it's a pull
5 quote from a specific hospital or something.
6 Just to be clear.

7 This is something in general, a sentiment
8 that we've heard before, not me personally, but
9 from the ratings team that we've heard. And we
10 want -- you can't see the answers here, which
11 is -- if you had seen the final draft, I think it
12 would display it more clearly.

13 But what we're really getting at here is
14 what makes Leapfrog different.

15 Q. But the question is, is this an
16 objection -- right -- or at least a statement
17 that hospitals have made?

18 A. In my understanding, yes.

19 Q. Just going down the line here, is it not
20 uncommon for hospitals to object that their poor
21 safety grade is only because they did not
22 participate in the Leapfrog hospital survey?

1 A. Yeah. Hospitals have said that.

2 Q. Okay.

3 A. In this lawsuit they say that.

4 Q. And it's not uncommon to hear that
5 consumers are confused by having too many ratings
6 programs; is that right?

7 A. So the -- I wouldn't say that. I think
8 consumers can get confused. And this answer
9 leads in to why we created the hospital safety
10 grade as a single letter, for them to be more --
11 it's easier for consumers to understand that.

12 Q. So where -- so is this objection --
13 right? -- consumers are confused by having too
14 many ratings programs, why does Leapfrog
15 matter? -- is that coming from hospitals?

16 A. I don't know.

17 Q. Where is this coming from? Where is this
18 common objection coming from?

19 A. Again, this is a collective effort with
20 the Leapfrog team. We've had these for a long
21 time. So they come from various -- some of them
22 could just come from, you know, us talking as a

1 staff and saying, this is an important message
2 point and something someone might say.

3 Q. All right. But where is this --
4 understanding that it may come from your
5 discussions with your colleagues, but where does
6 this objection come from? Where -- kind of --
7 where was it -- where has it been heard or
8 observed?

9 MS. BLAIR: Objection to form. Asked and
10 answered.

11 THE WITNESS: In my opinion, it is the
12 reason we created the safety grade. And this
13 specific line I believe is on our safety grade
14 website.

15 BY MR. CHUNG:

16 Q. No, but my question is, where did this
17 statement come from? Where are you hearing this
18 concern or objection?

19 A. I don't know. Precedes my time.

20 Q. This slide or this deck precedes your
21 time?

22 A. No. This line, I said, we've used as a

1 reason why we created the safety grade, which
2 precedes my time.

3 Q. Okay. So this is -- I mean, are you
4 testifying that this is kind of -- this bullet
5 point is recycled from previous board
6 presentation decks from before your time?

7 MS. BLAIR: Objection to form.

8 THE WITNESS: Our messaging doesn't
9 change very much, so all of these bullets we've
10 been using for a long time.

11 BY MR. CHUNG:

12 Q. Okay. So -- but my question is this
13 particular bullet point.

14 Are you telling us that this is a bullet
15 point that's been recycled or has been used to
16 present to the board since before your time in?

17 A. I would assume so. I've seen it the
18 whole time I've been at Leapfrog.

19 Q. Okay. Has Leapfrog received any feedback
20 from insurers regarding the reliability of
21 hospital safety grades for non-responding
22 hospitals?

1 A. I don't know.

2 Q. All right. How about from consumers,
3 generally?

4 A. I haven't seen any. I don't know.

5 Q. Do you know whether Leapfrog has
6 considered not grading hospitals that don't
7 respond to the survey?

8 A. I don't know.

9 Q. Is that something that's ever discussed
10 between you and your colleagues?

11 A. I personally haven't heard it discussed,
12 no.

13 Q. Okay. Let's turn to our next document,
14 tab -- let's go with tab 7.

15 This will be Exhibit 10.

16 THE REPORTER: 9.

17 MR. CHUNG: 9, sorry.

18 (Bailey Deposition Exhibit 9 marked for
19 identification and attached to the
20 transcript.)

21 BY MR. CHUNG:

22 Q. Okay. Ms. Bailey, we put in front of you

1 Exhibit 9, which is The Leapfrog Group and
2 affiliate consolidated financial statements dated
3 June 30, 2024.

4 Have you seen this document before?

5 A. I believe I've seen it in the context of
6 it being presented at a board meeting.

7 Q. And are you -- what involvement do you
8 have at all in putting together the financial
9 statements of the organization?

10 A. No involvement.

11 Q. Do you have any input, provide any data,
12 for purposes of putting together the financial
13 statements?

14 A. No.

15 Q. Okay. Who is? Who's involved?

16 A. I know Leah is involved.

17 Q. Okay. If you look at page 5, or Bates
18 ending in 9789 -- and where you see two Bates
19 numbers in the lower right-hand corner, I'm going
20 to point to the one that's -- the top one. Okay?

21 A. Okay.

22 Q. You'll see here that this outlines the

1 revenue and support for the organization.

2 Do you see that?

3 A. Yes.

4 Q. The first line there, accolade licensing
5 revenue.

6 What is accolade licensing revenue?

7 A. The accolade licensing is licensing our
8 safety grade A and our top hospital logos to
9 hospitals.

10 Q. All right. And is this -- at least based
11 on this document, is this the single biggest
12 revenue source for the organization?

13 A. Looks like it in this document.

14 Q. Yeah. So 3. -- about \$3.29 million for
15 2024, correct?

16 A. Yes.

17 Q. Okay. And then there's -- the next item
18 down is data licensure.

19 What is that referring to?

20 A. We sell our data to, like, solutions
21 providers, health plans, companies like that.

22 Q. And which data is this referring to?

1 A. I believe this includes the safety grade
2 and the survey.

3 Q. Okay. So data collected from hospitals
4 that respond to the survey?

5 A. Yes.

6 Q. Okay. And what is the data around the
7 hospital safety grade that's licensed?

8 A. I don't know the specifics on that.

9 Q. Okay. But your understanding is that
10 this data licensure revenue encompasses licensing
11 of the hospital safety grade and the data
12 collected from hospitals to the survey?

13 A. Yes. That's my understanding.

14 Q. Okay. And is that the -- it looks like
15 that's the second highest revenue source, is that
16 right, \$2.17 million for 2024?

17 A. Yes.

18 Q. Okay. Membership is the third line down,
19 \$1.14 million in revenue.

20 What does this encompass?

21 A. I believe it's our partners advisory
22 committee dues.

1 Q. Okay. And what is the partners advisory
2 committee?

3 A. So as I mentioned before, our board
4 doesn't include -- if your business is 30 percent
5 or more healthcare, you're not on our board.

6 So we created the partners advisory
7 committee over ten years ago as a way to have a
8 formal relationship with healthcare companies
9 that want to be involved with Leapfrog. They
10 have no governance over Leapfrog.

11 Q. Okay. And so these entities or these
12 companies pay a membership fee -- is it an annual
13 membership fee to Leapfrog -- to be part of this
14 partners advisory committee?

15 A. Yes.

16 Q. And approximately how much is that
17 membership fee?

18 A. 35,000 is what I believe it is.

19 Q. Okay. Just a few lines down there's a
20 revenue source data products and reports that
21 corresponds to about \$314,000 in revenue for
22 2024.

1 What does this refer to?

2 A. I don't know.

3 Q. Now, do you have any involvement in the
4 Leapfrog annual meeting? We understand that the
5 organization has an annual meeting.

6 A. Yes. As the communications director, I'm
7 involved in the annual meeting.

8 Q. All right. How are you involved in that,
9 in the annual meeting?

10 A. I am part of our planning committee.
11 Again, we have a small staff, so we might do
12 things that wouldn't be particular in other
13 groups. We all really work together on this.

14 So Karen and Angela Hopkins, who is our
15 office administrator, really run point. I help
16 with whatever is needed but, of course, oversee
17 all of the printed publications, all of the
18 marketing, all of the social media, that kind of
19 thing.

20 Q. All right. And is the annual meeting a
21 source of revenue as well?

22 A. I don't think we consider it a source of

1 revenue. All I've heard is that we generally
2 lose money.

3 Q. All right. But in order to attend the
4 annual meeting, there's a fee required of
5 attendees; is that right?

6 A. Correct.

7 Q. Just going -- kind of stepping back, we
8 looked at a few of the line items here on the
9 financial -- from the statement.

10 How does Leapfrog raise money from the
11 hospital safety grades and the hospital survey
12 specifically?

13 A. Can you restate your question?

14 Q. Yes. So how does Leapfrog raise revenue
15 or money from the hospital safety grades and
16 hospital survey?

17 A. So I see it as we raise revenue so that
18 we can cover the costs of those programs. It
19 costs a lot in staff time, in website, in
20 everything that goes into these programs so it's
21 not --

22 Q. Ms. Bailey, that's not my question.

1 How does -- right? How does the
2 organization raise revenue or money from those
3 two programs?

4 A. I think it's just what's on here.

5 Q. Okay. Can you just --

6 A. All of these things.

7 Q. Can you just describe how it's done?

8 A. Oh. We just talked about accolade
9 licensing. We just talked about data licensure.

10 Q. Okay.

11 A. That's all I know.

12 Q. Okay. And what is -- can you break down
13 kind of how -- under the types of accolade
14 licensing, how that raises revenue for the
15 organization?

16 A. I don't understand the question.

17 Q. All right. Let's put it another way.

18 How many hospitals pay Leapfrog to
19 advertise their hospital safety grades?

20 A. I don't know the numbers.

21 Q. Okay. What does a hospital that does pay
22 Leapfrog to advertise their hospital safety

1 grade, what do they get through that payment?

2 A. They get the logo; it's like a badge they
3 can use in advertising.

4 Q. Okay. Is there any way for a hospital to
5 freely advertise their hospital safety grade
6 without paying Leapfrog?

7 A. Yes. Many do. That's the part I'm
8 involved in. I'm not involved in accolades. I'm
9 involved in that part, which is we provide
10 detailed press kits for hospitals they use for
11 free.

12 Q. Okay. Has Leapfrog ever told a hospital
13 to stop advertising a safety grade unless it paid
14 Leapfrog the fee?

15 A. Not that I can recall.

16 Q. Do you know whether Leapfrog receives any
17 advertising revenue from hospitals with, let's
18 say, a C or a lower than a C grade?

19 A. I don't know.

20 Q. All right. Generally speaking, when --
21 do you have any kind of statistics or do you know
22 generally whether -- in terms of kind of the

1 marketing for advertising of the hospital safety
2 grade, does Leapfrog focus on the hospitals that
3 have an A grade?

4 A. Can you restate? I don't understand the
5 question.

6 Q. In terms of the marketing -- right? --
7 for the advertising of the hospital safety grade,
8 does Leapfrog focus on hospitals that have
9 received an A grade? Or does it market more
10 generally to all hospitals that have received a
11 grade?

12 A. I don't do marketing. But if we're
13 talking about accolade licensing, that's -- A and
14 B are the only logos that I know my team creates.

15 MR. CHUNG: Let's go to tab 16.

16 This will be Exhibit 10.

17 (Bailey Deposition Exhibit 10 marked for
18 identification and attached to the
19 transcript.)

20 BY MR. CHUNG:

21 Q. So Ms. Bailey, Exhibit 10 is a short set
22 of Slack messages. Just let me know when you've

1 had a chance to look at it.

2 A. Okay. Yes. I've looked at it.

3 Q. Okay. So this is from March 21 of 2024,
4 a discussion with Ms. Jupiter.

5 And you write, at about 11:30 a.m., She
6 wants CURA to be ready to ask and help staff
7 answer common questions we get. Right?

8 So first of all, what's being discussed
9 here?

10 A. From what I remember -- so CURA is our PR
11 firm. And we had them come into the office and
12 give staff a presentation about PR 101.

13 Q. Okay. And so how does this -- the "she"
14 that you're discussing here, is that Leah Binder?
15 She wants CURA to be ready to ask and help staff
16 answer common questions we get.

17 A. I believe so.

18 Q. Okay. Now, these are -- when we went
19 over the board presentation earlier -- right? --
20 you said that -- kind of the common questions or
21 common objections there were based on discussions
22 you had internally within Leapfrog, right?

1 A. Yes.

2 Q. Here, the -- what you're writing here is
3 that Ms. Binder wants CURA to be ready and ask
4 and help staff answer common questions we get.

5 What did you mean by "common questions we
6 get"?

7 A. So this was for all of our staff. And a
8 good majority of our staff is the ratings team.
9 And part of my job as communications manager -- I
10 mean, director of communications, sorry -- is to
11 make sure we're all on the same page with how
12 we're responding to things. Even if I don't talk
13 to hospitals, they're talking to people, I have
14 an interest in ensuring we're on the same page.

15 Q. Okay. So the members of the ratings
16 team, this is the team under Ms. Danforth; is
17 that right?

18 A. Correct.

19 Q. Okay. And they're interacting or
20 communicating with hospitals?

21 A. Correct.

22 Q. All right. And they're the ones -- and

1 when we say -- when you're writing here to help
2 staff answer common questions we get, does that
3 mean common questions we or you're getting from
4 hospitals?

5 A. I don't remember exactly what I meant,
6 but I would infer that. Yes.

7 Q. Okay. You see where you write, just the
8 next line down, So, like, Leapfrog is pay for
9 play, where a hospital gets a bad CMS star rating
10 but an A. Why?

11 So this is -- the question about pay for
12 play, do you agree that's a common question
13 Leapfrog receives from hospitals?

14 A. Yes. I mean, that's what this -- it's
15 mentioned a lot in this current lawsuit we're
16 talking about.

17 Q. Well, we're talking about -- I'm talking
18 about in the context of this Slack messages -- of
19 these Slack messages from March 2024.

20 So at this time -- right? -- which
21 obviously preceded this lawsuit --

22 A. Uh-huh.

1 Q. -- is it fair to say that pay to play, a
2 question whether Leapfrog is pay to play, was
3 common enough that it's listed in the list of
4 commonly asked questions?

5 A. Yes. I'd say a lot of people are
6 confused about that. There's a lot of ratings,
7 and a lot of them are pay to play. Leapfrog is
8 not.

9 Q. Okay. The next one down, Or a hospital
10 gets a bad CMS star rating but an A,
11 presumably --

12 A. Uh-huh.

13 Q. -- from Leapfrog, right?

14 A. Uh-huh.

15 Q. Do you agree that that's a common
16 question Leapfrog receives from hospitals?

17 A. It was just an example. I don't know if
18 that's a common question. It's just -- I was
19 giving an example to Karen, who is not as
20 familiar with this.

21 Q. Right. But you started the discussion,
22 or at least kind of introduced these two items as

1 helping staff answer common questions we get.
2 Right? And I think you testified we get from
3 hospitals. Right?

4 A. Uh-huh.

5 Q. So just going back to the original
6 question, is this -- the question of a hospital
7 getting a bad CMS star rating but an A from
8 Leapfrog, is that a common question Leapfrog gets
9 from hospitals?

10 A. In my knowledge, it actually doesn't
11 happen that often that that's the case.

12 Q. My question is, is this a question -- a
13 common question you get from hospitals?

14 MS. BLAIR: Objection to form. Asked and
15 answered.

16 THE WITNESS: It's part of our commonly
17 asked question, which I explained is a
18 communications term. I don't know how often it's
19 asked. I just know that it comes up in
20 conversations internally, so it's one of my PR
21 priorities.

22

1 BY MR. CHUNG:

2 Q. Okay. Is this -- the pay for play
3 question -- right? -- is Leapfrog a pay for play
4 question [sic], is it a common question or
5 concern that you hear from regional leaders,
6 Leapfrog's regional leaders?

7 A. Can you restate the question?

8 Q. Right. The question of or the concern of
9 whether Leapfrog is pay to play -- right? -- is
10 that a concern or question that's relayed to you
11 by Leapfrog's regional leaders?

12 A. I believe they had heard -- like, some of
13 them have probably heard that before. Because
14 like I said, it can be confusing. There's a lot
15 of ratings, and a lot of them are pay for play.
16 Leapfrog is not.

17 MR. CHUNG: Let's go to tab --

18 BY MR. CHUNG:

19 Q. Ms. Bailey, are you aware that hospitals
20 that participate in the survey are required to
21 affirm that Leapfrog may use the survey
22 information in a commercial manner for profit?

1 A. Yes. I'm generally aware of that.

2 Q. Okay. And you're aware that that is
3 explicitly in the hospital survey?

4 A. I've heard that.

5 Q. Okay. Do you know how long Leapfrog has
6 required that affirmation from participating
7 hospitals?

8 A. I don't know.

9 Q. Does it precede your time, fair to say?

10 A. I don't know.

11 Q. Okay. Can a hospital opt out of that
12 affirmation and still respond to the survey?

13 A. I don't know.

14 Q. All right. Do you know whether -- have
15 you heard of any hospital voicing concerns or
16 asking that question, can they opt out of that
17 affirmation?

18 A. I haven't heard of it, no.

19 Q. All right. Any complaints from hospitals
20 about not being able to opt out of that
21 affirmation?

22 A. No, I haven't heard of any.

1 Q. Okay. All right. Going back to kind of
2 the revenue streams that we discussed earlier, am
3 I right that Leapfrog licenses the hospital
4 safety grades to insurance companies? We already
5 talked about hospitals, but do they also license
6 the hospital safety grades to insurance
7 companies?

8 MS. BLAIR: Objection to form.

9 THE WITNESS: I know we have before.

10 BY MR. CHUNG:

11 Q. Is that still in effect?

12 A. I don't know who our current licensees
13 are. I'm not involved in that.

14 Q. Okay. Do you know how -- in your
15 communications director role, do you have -- do
16 you communicate with insurance companies?

17 A. Not that I can think of.

18 Q. Okay. Have you ever communicated with
19 insurance companies while at Leapfrog?

20 A. We have -- some members of our partners
21 advisory committee are from health plans, so I've
22 talked to them before.

1 Q. All right. And what was the nature of
2 those discussions?

3 A. Very early on at Leapfrog, there were
4 only 12 staff members, so my job was bigger than
5 it is now, where I oversaw our stakeholder group,
6 so I oversaw our partners advisory committee from
7 2017 to 2020 and then also our regional leaders.

8 And during that time, our -- we have
9 co-chairs of all of our committees who are actual
10 members, and the co-chairs were from health
11 plans. So I talked to them about planning our
12 partners advisory committees quarterly.

13 Q. Okay. So you're at least generally aware
14 that Leapfrog licenses the hospital safety grades
15 to insurance companies, right?

16 A. Yes.

17 Q. Okay. How do those licensing deals work?

18 A. I don't know.

19 Q. Okay. What do the insurance companies --
20 what exactly are the insurance companies
21 licensing from Leapfrog?

22 MS. BLAIR: Objection to form.

1 THE WITNESS: Data.

2 BY MR. CHUNG:

3 Q. Which data?

4 A. Whatever data they're interested in. I
5 believe it's custom. Customized to the client.

6 Q. Okay. And this is the survey data
7 collected from hospitals, correct?

8 A. Yeah, it could be.

9 Q. Okay. Do they also license the hospital
10 safety grades themselves, the letter grades?

11 A. They could. Yes.

12 MS. BLAIR: Objection to form.

13 BY MR. CHUNG:

14 Q. Okay. So isn't Leapfrog incentivized to
15 have as many hospitals as possible participate in
16 the survey so that it can convince insurers that
17 the ratings have value?

18 A. I've never heard that as a primary goal.

19 Q. Okay. Does Leapfrog license hospital
20 survey data to researchers?

21 A. Yes.

22 Q. Okay. And are these researchers -- are

1 they institutions? Are they sole researchers?

2 What kind of researchers are they?

3 A. It's a variety. These sometimes come in
4 through our communications e-mail or through our
5 PR firm. Oftentimes it's even college students.
6 It's anyone who could be working on a research
7 paper and wanting to use Leapfrog data.

8 Q. And how does Leapfrog market this aspect,
9 the licensing of hospital survey data, to
10 researchers?

11 A. We don't market it to my knowledge.

12 Q. So so far as you're aware, these deals
13 come about as a result of researchers approaching
14 Leapfrog?

15 A. Correct.

16 Q. All right. And isn't Leapfrog
17 incentivized to have as many hospitals as
18 possible participate in the survey to convince
19 researchers that the data has value?

20 MS. BLAIR: Objection to form.

21 THE WITNESS: No, I don't think that's
22 what our focus is. I've never heard that as a

1 focus.

2 BY MR. CHUNG:

3 Q. Okay. Leapfrog also licenses hospital
4 survey data to businesses; is that right?

5 A. Yes. Like solution providers.

6 Q. Okay. And you've mentioned solution
7 providers before. But generally, who are these
8 solution providers?

9 A. I can't speak to who currently licenses.
10 I know that, you know, types of companies might
11 be, like, hand hygiene companies, like, GOJO who
12 owns Purell, like BioVigil, companies who have a
13 solution for hospitals and they want the data.

14 Q. Okay. Does Leapfrog market this hospital
15 survey data to these solutions providers?

16 A. I believe so. I'm not involved in the
17 marketing.

18 Q. Okay. So no with respect to researchers,
19 but yes or maybe with respect to solutions
20 providers; is that --

21 A. Yes.

22 Q. Okay. And how does it go about doing

1 that for the solutions providers?

2 MS. BLAIR: Objection to form.

3 THE WITNESS: I don't know. I'm not
4 involved in it.

5 BY MR. CHUNG:

6 Q. Okay. Do you know whether the survey
7 data -- the sale of the survey data is marketed
8 to solutions providers as part of their
9 participation in the partners advisory committee?

10 MS. BLAIR: Objection to form.

11 THE WITNESS: I know that they get a
12 discount on the data as part of the member
13 benefits.

14 BY MR. CHUNG:

15 Q. And how much is that discount?

16 A. I don't know.

17 Q. Okay. Are -- in terms of the kinds of
18 businesses that license hospital survey data, do
19 hospitals, competitor hospitals, license hospital
20 survey data? So let me just put it another way.

21 Do hospitals license the data of
22 competitor hospitals from Leapfrog?

1 MS. BLAIR: Objection to form.

2 THE WITNESS: I've never heard of that.

3 MR. CHUNG: Okay. Let's go to 72.

4 Exhibit 11.

5 (Bailey Deposition Exhibit 11 marked for
6 identification and attached to the
7 transcript.)

8 BY MR. CHUNG:

9 Q. All right. Ms. Bailey, Exhibit 11 is an
10 e-mail chain from July of 2024.

11 Okay. Have you had a chance to look
12 through it?

13 A. Yes.

14 Q. So let's just start with the first e-mail
15 from Ms. Binder to you --

16 A. Okay.

17 Q. -- July 9, 2024. She writes to you, I'm
18 at a meeting July 26 where they ask me to discuss
19 our work with HT and Turquoise Health and compare
20 price transparency and safety grade.

21 What is or who are HTA and Turquoise
22 Health?

1 A. HTA is the Healthcare Transformation
2 Alliance.

3 Turquoise Health, I don't know. I
4 actually didn't write that press release.

5 Q. Okay. So you don't know who or what
6 Turquoise Health is?

7 A. I can't remember right now.

8 Q. Okay. She continues, We did it last
9 year, and there was a press announcement,
10 et cetera. Could you give me the
11 background/press release on -- when you get a
12 chance? They're interested in other possible
13 uses of our data and what can be done to improve
14 survey reporting.

15 And then she concludes asking for any
16 further ideas from you or others.

17 And then you then describe in response,
18 Ms. Bailey, I think it's four ideas that we came
19 up with.

20 Do you see that?

21 A. Yes.

22 Q. Okay. And that is to -- and that you

1 wanted to get feedback from Kush Banerjee; is
2 that right?

3 A. Yes.

4 Q. And who is Kush Banerjee?

5 A. Kush Banerjee is the director of
6 licensure and -- I don't remember his exact
7 title, sorry. He just changed it.

8 Q. So, generally, what does he do?

9 A. He oversees the accolades and data
10 licensure programs.

11 Q. Okay. So this corresponds to the revenue
12 streams we were looking at earlier in the
13 financial statement?

14 A. Yes.

15 Q. Okay. So he responds after, it looks
16 like, reviewing four ideas that you came up with
17 for other possible uses of data.

18 Well, just to --

19 A. Uh-huh.

20 Q. -- let's go back to the e-mail -- the
21 second e-mail to Ms. [sic] Banerjee copying Jill
22 Berger. Who is Jill Berger?

1 A. She's the director of employer and payor
2 engagement, I think is her title.

3 Q. Okay. And what does that role involve?

4 A. She oversees our employer panel, as well
5 as our regional leaders.

6 Q. Okay. And so is this -- and so these
7 four additional ideas for use of the data, for
8 the hospital survey data, these are four ideas
9 that you came up with after brainstorming with
10 Ms. Berger; is that right?

11 A. Yes. I forgot to mention, she also
12 oversees our Bruce Bradley fellows, who are HR
13 mid-career professionals.

14 So these ideas -- I vaguely remember this
15 conversation, and these ideas were based on
16 projects that these fellows had done as part of
17 the fellowship.

18 Q. Okay. Now, Mr. Banerjee responds on
19 July 23rd. He writes -- it's fair to say that
20 he's commenting on the four ideas that you
21 presented to him?

22 A. Looks like it.

1 Q. Okay. He writes, Similarly, LF data
2 versus medical device or technologies is
3 interesting to measure a variation effectiveness
4 for the technologies and enable technology
5 companies to engage with us through the PAC or
6 data licensing.

7 Do you see that?

8 A. Yes.

9 Q. Okay. And the PAC, is that a reference
10 to the partners advisory committee?

11 A. Yes.

12 Q. Okay. So is he -- what's he saying here?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: I don't know. Let me read
15 it again.

16 BY MR. CHUNG:

17 Q. Sure.

18 A. I don't really understand the way he
19 worded this, but it looks like he's talking about
20 medical device --

21 Q. Yeah.

22 A. -- companies and --

1 Q. So is --

2 A. -- that they could license the data.

3 Q. I'm sorry. Is he referring to the fourth
4 idea that you raised with him, the Leapfrog data
5 and medical device and technology data?

6 A. That's what it looks like.

7 Q. Okay. So what is that -- can you
8 describe what idea that was, what that idea
9 encompassed?

10 So let's just kind of break it down.
11 Right?

12 A. Okay.

13 Q. So is the audience here -- right? -- the
14 potential partners or the purchasers of the data,
15 they are medical device companies and technology
16 companies; is that right?

17 A. Yes.

18 Q. Okay. And then it looks like this
19 sub-bullet there, technology's role in enhancing
20 hospital safety and quality, is that just kind of
21 a basic concept behind the idea?

22 A. Yes. That's what it looks like.

1 Q. Okay. And then, underneath that, data
2 sources, safety grades, and data on medical
3 devices and healthcare technologies, is that a
4 reference to the types of data sources at
5 Leapfrog that could be marketed to medical device
6 and technology companies, that could be of use to
7 them?

8 MS. BLAIR: Objection to form.

9 THE WITNESS: I don't know. I think so.

10 BY MR. CHUNG:

11 Q. Okay. Well, this is your idea, so --

12 A. Well, it's not -- this isn't my idea, so
13 let's be clear. Kush was on paternity leave, and
14 I was trying to fill in something while he was
15 coming back from paternity leave. Normally, he
16 would have brainstormed these ideas. This isn't
17 a regular part of my job. Leah just asked me to
18 talk to Jill.

19 Q. Okay.

20 A. And Jill works part time, so she doesn't
21 have time to send e-mails all the time. So this
22 was a compilation. It wasn't necessarily my

1 idea.

2 Q. Okay.

3 A. It was just my job to communicate it.
4 And there's -- a lot of that happens in my job at
5 Leapfrog.

6 Q. Okay. But these are ideas that, working
7 with Ms. Burger, that you compiled and sent on to
8 Kush, correct?

9 A. That's what it looks like.

10 Q. Okay. And so the idea here, Ms. Bailey,
11 that this is a proposal to approach --
12 potentially approach medical device and
13 technology companies to license safety grade --
14 the safety grades and data on medical devices and
15 healthcare technologies?

16 MS. BLAIR: Objection to form.

17 THE WITNESS: That's what it looks like.

18 BY MR. CHUNG:

19 Q. Okay. And to potentially engage medical
20 device and healthcare technologies to become
21 members of the partner advisory committee; is
22 that right?

1 A. Yes. That was part of Jill's job at the
2 time.

3 Q. Okay. Now, Mr. Banerjee continues --
4 just going back to his e-mail, The first two --
5 so the last paragraph of this e-mail.

6 The first two are interesting as well,
7 but I don't see that they can have the same
8 impact on driving data licensing and PAC
9 engagement from my revenue lens as the other two.

10 Is he saying here that the first two of
11 the four ideas that were presented in your
12 e-mail -- and this is the Leapfrog data and
13 public health data and Leapfrog data and social
14 determinants of health data -- right? Those are
15 the first two. That in his view don't have the
16 same impact as the third and fourth ideas from a
17 revenue perspective; is that right?

18 MS. BLAIR: Objection to form.

19 THE WITNESS: I take that to mean maybe
20 those are good PR ideas, but not for his job.

21 BY MR. CHUNG:

22 Q. Where does he refer to PR?

1 A. I'm just inferring that because my job is
2 PR. So that's the lens that I have when I do
3 things. Again, I don't normally do stuff like
4 that. I very vaguely remember this. And that's
5 what I take him to mean, is that it probably
6 wouldn't make sense for him, but like I said --
7 so in the second one, it says, Note, Stacy looked
8 at a fellow project, so that's, again, part of a
9 fellowship. So --

10 Q. Okay.

11 A. -- I think he was just saying it
12 wouldn't -- it doesn't make sense for him.

13 Q. So -- and then you respond up top,
14 Thanks, Kush. Great points re driving data
15 licensing. I think I'll just share 3 and 4 with
16 Leah from that lens. So happy you're back.

17 Do you see that?

18 A. Yes.

19 Q. Okay. So did you -- why did you only
20 share 3 and 4 with Leah, as opposed to the first
21 and second that Ms. [sic] Banerjee said would not
22 have the same impact from a revenue lens?

1 A. I don't remember. I just -- it looks
2 like I took his advice on it.

3 Q. Okay. Do you know whether Leapfrog
4 implemented any of these ideas?

5 A. I don't know.

6 MR. CHUNG: Let's go to tab 47.

7 This is Exhibit 12.

8 (Bailey Deposition Exhibit 12 marked for
9 identification and attached to the
10 transcript.)

11 BY MR. CHUNG:

12 Q. All right. Ms. Bailey, this is an e-mail
13 chain. You're not on the chain, but let me know
14 if any of it looks familiar to you. The e-mail
15 chain and the attachment.

16 A. I haven't seen this before, but it looks
17 like they're talking about the budget.

18 Q. Okay. If you look at the first page
19 Bates ending in 8278, there's an e-mail from
20 Ms. Binder to Ben Choi.

21 And I understand that Ben Choi was the
22 former CFO, am I right, of the organization?

1 A. Yeah, the interim.

2 Q. Interim CFO? Okay.

3 And she writes here, If we move toward
4 cost reduction as the primary strategy, it will
5 be much more severe than this, but I'm not going
6 there for now. We can address incremental
7 spending issues, but let's not lose focus on what
8 managers should be thinking about 24/7, which is
9 revenues.

10 That particular sentence, let's not lose
11 focus on what managers should be thinking about
12 24/7, which is revenues, is that a sentiment or
13 directive that Ms. Binder has shared with you or
14 communicated to you?

15 A. Not for the communications team, no.

16 Q. Okay. Have you heard from your
17 colleagues -- right? -- whether they're in
18 finance or in licensing, or really any
19 colleagues, about Ms. Binder communicating this
20 directive to them?

21 A. No, not that I can recall.

22 Q. Okay. Any -- is it a -- is generating

1 revenue -- ways of generating revenue, is it a
2 focus of Ms. Binder in running the organization?

3 A. Yeah. She's the CEO, so yes.

4 Q. Okay. And in what -- in your
5 interactions with her, in what ways has she
6 communicated with you that it is a focus?

7 A. I just know it's part of her job because
8 if we didn't have money, we couldn't run any of
9 our programs.

10 Q. All right. Are there any specific ways
11 of raising revenue that she -- that you've heard
12 her -- that you've heard her discuss?

13 A. No, not beyond what we've talked about.
14 Just accolades and data licensure is all I know.

15 Q. Okay. And in terms of the accolades and
16 data licensure, what has she said about those
17 particular programs for purposes of raising
18 revenue?

19 A. Just that they are revenue.

20 Q. Just that they are revenue? Is that what
21 you're testifying to?

22 A. Right. In the financial statements.

1 That's the extent that I'm involved in these
2 discussions.

3 Q. What has she said about raising more
4 revenue through those particular programs?

5 A. Nothing I can recall to me.

6 Q. Okay. Maybe not to you but to your
7 colleagues?

8 A. I don't know.

9 Q. All right. Has she discussed how to
10 change the hospital grading methodology in order
11 to generate more revenue through the accolade
12 licensing and the data licensure program?

13 A. Can you restate the question?

14 Q. Yes.

15 Has she discussed how the organization
16 can change the grading methodology or the scoring
17 methodology in order to generate more revenue
18 from accolade licensing?

19 A. I -- no, I don't recall her saying that.

20 Q. Who is Leapfrog's competition?

21 A. I've never heard Leah or anyone use the
22 word "competition." There's a lot of ratings

1 systems out there, but we're all fairly
2 consistent, us and other ratings organizations,
3 that we're different and unique and that
4 consumers should use what resonates with them.

5 Q. In your view -- putting aside what
6 Ms. Binder might have said or not said, in your
7 view, who are Leapfrog's competitors?

8 A. I mean, rating -- other large rating
9 systems, like U.S. News and World Report,
10 Healthgrades are the ones that come to mind.

11 Q. Okay. So those two. Any others?

12 A. Those are the only that come to mind.
13 But again, we tell people, like, even in our
14 social media, like, look at these ratings. When
15 the new U.S. World and News Report honor roll
16 comes out, we promote it on social media. And
17 they do the same for us. Like, we -- I wouldn't
18 say we're, like, normal competitors. We're a
19 nonprofit, so it's a bit different.

20 Q. Do you -- does Leapfrog track those
21 competitors, U.S. News and World Report and
22 Healthgrades, in terms of their -- in terms of

1 the products or developments in their products?

2 A. I don't know.

3 Q. Does Leapfrog engage directly with
4 hospitals, whether it's the leadership or
5 administrative staff, to encourage participation
6 in the hospital survey?

7 A. Can you restate the question?

8 Q. Yeah.

9 Does Leapfrog engage directly with
10 hospitals to encourage hospitals to participate
11 in the survey?

12 A. That's all done through our regional
13 leaders.

14 Q. Okay. Are there any resources, like
15 toolkits or consultants, that are provided to
16 hospitals to basically help them participate in
17 the survey?

18 A. Not that I can recall.

19 Q. Are there any partnerships with employers
20 or insurers or other third parties that use
21 hospital participation in the survey as a
22 criterion for contracting or inclusion in the

1 network?

2 A. I don't know.

3 Q. Does Leapfrog track hospital
4 participation rates over time?

5 A. Yes.

6 Q. All right. And what has Leapfrog kind of
7 witnessed in terms of that tracking?

8 A. Overall, it continues to increase every
9 year. During COVID, we saw it go down, just like
10 everything else in the world.

11 Q. Okay. And what steps -- where
12 participation declines -- right? -- or fails to
13 meet organizational goals, what does Leapfrog do
14 to address those declines or those changes?

15 A. From my knowledge, it only happened
16 during the pandemic. And that was a very unique
17 situation, so we kind of let it ride out. And as
18 soon as it was over, participation went back up.
19 That's my understanding.

20 Q. Okay. Did participation in the hospital
21 survey increase after the fall 2024 change to the
22 imputation methodology?

1 A. I don't know.

2 Q. Okay. Has Leapfrog conducted any studies
3 or analyzed whether survey participation improves
4 a hospital's safety grade over time?

5 MS. BLAIR: Objection to form.

6 THE WITNESS: Can you restate that?

7 BY MR. CHUNG:

8 Q. Yeah.

9 Has Leapfrog conducted any studies or
10 analyzed whether participation in the survey
11 improves a hospital's safety grade over time?

12 A. I don't know. I don't think so.

13 Q. You don't think that Leapfrog has ever
14 studied that?

15 A. Yeah, I don't know.

16 Q. Okay. All right. Let's move on to the
17 websites which we've discussed already a bit. So
18 what --

19 (Discussion off the record.)

20 MR. CHUNG: We're about to enter a new
21 section. Are you folks okay with taking a break
22 right now for lunch?

1 MS. BLAIR: Sure.

2 THE WITNESS: Sure.

3 MR. CHUNG: Let's do that, then.

4 VIDEO TECHNICIAN: The time is 11:56 a.m.
5 This ends unit 2. We're off the record.

6 (A recess was taken.)

7 VIDEO TECHNICIAN: The time is 12:59 p.m.
8 This begins unit number 3. We're on the record.

9 BY MR. CHUNG:

10 Q. So Ms. Bailey, we're now going to discuss
11 the two websites that we referenced earlier.

12 And am I correct that the two websites
13 that Leapfrog -- operated by Leapfrog are
14 the leapfroggroup.org and the
15 hospitalsafetygrade.org sites? Is that correct?

16 A. Yes.

17 Q. So what's the distinction between the
18 two? What's the purpose of each?

19 A. So on leapfroggroup.org, we house our
20 hospital and ASC survey results.

21 And on hospitalsafetygrade.org we house
22 the hospital safety grade results.

1 So the reason why we have the distinction
2 is because they are two distinct programs, so we
3 want to keep them separate.

4 Q. Okay. On the -- but do both websites --
5 can a consumer go on both websites and look up
6 their local hospital?

7 A. Yes.

8 Q. Okay. And just to be clear, both are
9 operated by Leapfrog, correct?

10 A. Correct.

11 Q. And as director of communications, can
12 you just tell us again what is your role with
13 respect to the websites?

14 A. I oversee the content that's on the
15 website and I work with the ratings team before
16 each survey year when we refresh the survey data
17 and then before each safety grade cycle to do
18 testing to make sure all the data went through
19 correctly.

20 Q. Okay. And in terms of the content of the
21 websites, to be clear, you oversee the content of
22 both websites; is that right?

1 A. Correct.

2 Q. Okay. And how does that work? What is
3 the process by which you oversee the content for
4 both websites?

5 A. Can you restate the question?

6 Q. Sure.

7 What I'm getting at is, how do you do it?
8 How do you oversee the contents of the websites?
9 Are there periodic checks that you conduct? Are
10 there -- how does it work?

11 A. Okay. So as I've testified before,
12 Leapfrog is a small organization, and we work
13 together in a lot of areas.

14 So there are sections of our website,
15 particularly leapfroggroup.org, that are actually
16 fully managed by the ratings team. So that would
17 be anything relating -- to do -- like, you
18 actually can fill out your survey through our
19 website. Like, it's all housed there.

20 So leapfroggroup.org has a lot more in
21 that aspect, and that's managed by the ratings
22 team. So I can't speak for that. We'll

1 sometimes make some changes, but that's overseen
2 by Missy Danforth and her team.

3 The other aspects of the website that I
4 am regularly updating would be, like, the
5 newsroom, our blog. Anytime there's things going
6 on that are, you know, PR worthy, they'll go in
7 either of those spots, or maybe both.

8 I also update the home page quite
9 frequently and updating program pages or
10 things -- the process there is just, if there is
11 a change, we'll update it. If there's a broken
12 link, we'll change it.

13 Q. Okay. How do you know or how do you
14 monitor or determine whether the website -- and
15 let's just focus on the leapfroggroup.org
16 website -- is up to date.

17 A. Sorry, can you restate the question?

18 Q. Sure.

19 How do you monitor or confirm that the
20 leapfroggroup.org website is up to date at any
21 given time?

22 A. It's a -- it's a team effort. So we're

1 all -- we all work on the back end of the
2 website.

3 Q. Okay. So that's the Leapfrog -- I think
4 you specified your response with respect to the
5 leapfroggroup.org website.

6 How about the hospitalsafetygrade.org
7 website? How do you oversee or monitor the
8 content on that website?

9 A. So that website is much more focused. So
10 that is just focused solely on the hospital
11 safety grade. So for that site, we update it
12 twice a year around the launch of a new round of
13 the safety grade.

14 Q. Okay. And so you are -- you oversee that
15 process?

16 A. Yes. I work with the ratings team on
17 that.

18 Q. Okay. So what we're going to do is,
19 because it's, I think, easier to follow, we're
20 going to, instead of using -- relying solely on
21 just printouts from the websites, we're actually
22 going to go on the websites themselves. We're

1 going to put a laptop in front of you and just
2 kind of --

3 A. Okay.

4 Q. -- have you kind of help us navigate
5 through both of the websites. Okay?

6 A. Okay.

7 MR. CHUNG: So why don't we do that.

8 THE WITNESS: Do you want me to put it
9 like this? Or --

10 BY MR. CHUNG:

11 Q. No, you can just put it in right front of
12 you.

13 A. Oh, okay.

14 Q. All right. So first things first, who
15 designed these websites?

16 A. I don't know. It was before my time.

17 Q. Okay. And I think the first thing we're
18 going to do is, are you aware that, upon a --
19 kind of a basic Google search of hospital safety
20 grade, that the two top website hits that come up
21 are the Hospital Safety Grade and then
22 The Leapfrog Group websites?

1 A. That makes sense.

2 Q. Okay. Why don't we just -- go ahead and
3 do that. If you can just type in --

4 A. Okay.

5 Q. -- hospital safety grade as a Google
6 search.

7 And do the search results reflect that --

8 A. Yes.

9 Q. -- Hospital Safety Grade up top and then
10 The Leapfrog Group below that?

11 A. Yes.

12 Q. Now, before we navigate through the --
13 actually, what we'll do is, let's look first at
14 the leapfroggroup.org website.

15 A. Okay.

16 Q. So if you can click on that. And then
17 what we'll do is...

18 MR. CHUNG: If you can get tab 19.

19 (Bailey Deposition Exhibits 13 and 14
20 marked for identification and attached to
21 the transcript.)
22

1 BY MR. CHUNG:

2 Q. Now, we're also going to put in front
3 of you a couple of exhibits marked Exhibits 13
4 and 14.

5 So looking at the leapfroggroup.org
6 webpage, can you just run a search for Delray
7 Medical Center, which is one of the plaintiff
8 hospitals in this matter?

9 A. Okay.

10 Q. Okay. And do you see that the first kind
11 of result of the page, after running that search,
12 there's a window that says there are four
13 facilities in your search that declined to
14 respond to Leapfrog's request for patient safety
15 and quality data.

16 Do you see that?

17 A. I see Delray Medical Center has declined
18 to respond.

19 Q. Okay. Got it. And so -- and you
20 understand that Delray Medical Center is one of
21 the plaintiff hospitals --

22 A. Yes.

1 Q. -- in this matter, one of the five,
2 correct?

3 A. Yes.

4 Q. Okay. And I think you testified that you
5 see -- is it a red box that says, Declined to
6 respond?

7 A. Yeah. The top is red.

8 Q. Top is red. Okay.

9 And does that correspond to Exhibit 13 in
10 front of you?

11 A. Yes.

12 Q. Okay. And then underneath that red box
13 that says, Delray Medical Center has declined to
14 respond, it says, What does this mean? Thousands
15 of hospitals nationwide report to Leapfrog
16 hospital survey to help patients and purchasers
17 make better healthcare decisions. This hospital
18 did not participate.

19 Do you see that?

20 A. Yes.

21 Q. Okay. So -- and you can't -- with this
22 pop-up, with the red bar across the top, does

1 that kind of obscure what's behind the pop-out
2 box in terms of the webpage?

3 A. It's gray behind the box.

4 Q. Yup. Okay. So I'm going to ask you to
5 click out of the pop-up.

6 A. Okay.

7 Q. And is it correct that, of all the
8 measures that are listed once you pop out of the
9 pop-up -- click out of the pop-up, the
10 webpage says that the hospital declined to
11 respond; is that right?

12 A. Yes.

13 Q. Okay. And is that reflected on
14 Exhibit 14 in front of you?

15 A. Yes.

16 Q. Okay. Just using the Delray Medical
17 Center example, right?

18 A. Yes.

19 Q. Okay. And am I right that there's no
20 hospital safety grade on this page? Am I right?

21 A. Correct. This is Leapfrog hospital
22 survey data.

1 Q. Okay. And then if you click on
2 preventing patient harm on that page.

3 Do you see that?

4 A. Yes.

5 Q. Okay. And just as an example, there's
6 a -- under the handwashing metric, it says,
7 Declined to respond.

8 Do you see that?

9 A. Yes.

10 Q. Okay. And there's no imputed score
11 delineated there; is that right?

12 A. Correct.

13 Q. Okay. Now, let's turn to -- we're now
14 going to turn to the other website, the
15 hospitalsafetygrade.org-

16 A. Okay.

17 Q. -- website. So if you can kind of toggle
18 back and then click on -- I think it was the
19 first --

20 A. Yeah --

21 Q. -- result.

22 A. Sorry, I didn't mean to interrupt you.

1 At the bottom of -- if you scroll to the
2 bottom of the page that we were just on, it says,
3 See this facility's safety grade. So that's what
4 I clicked on.

5 Q. Okay. If you can go back to the Google
6 results. Okay?

7 A. Okay.

8 Q. And then I think you said that the
9 hospitalsafetygrade.org website was the first
10 hit, right?

11 A. Yes.

12 Q. Okay. So let's just go to that.

13 A. Okay.

14 MR. CHUNG: This will be Exhibit 15.

15 (Bailey Deposition Exhibit 15 marked for
16 identification and attached to the
17 transcript.)

18 BY MR. CHUNG:

19 Q. All right. So kind of a similar
20 exercise, Ms. Bailey. If you can run a search
21 for Delray Medical Center on the
22 hospitalsafetygrade.org website.

1 A. Okay.

2 Q. And does the page specific to the Delray
3 Medical Center show up?

4 A. Yes.

5 Q. Okay. Great.

6 And is that, what we see on Exhibit 15,
7 what shows up on the computer?

8 A. Yes.

9 Q. Okay. And it shows that -- a box, a gray
10 box, that says this hospital grade is F, correct?

11 A. Yes.

12 Q. And in particular to the spring 2025,
13 which I believe is the most recent round of
14 safety grades; is that right?

15 A. Yes.

16 Q. Okay. So in contrast -- unlike on the
17 leapfroggroup.org website that we looked at
18 earlier, this website does not immediately have a
19 pop-up box indicating that the hospital did not
20 provide data to Leapfrog sufficient to rate the
21 hospital, correct?

22 A. Correct.

1 Q. Okay. Now, going to see full score, it
2 shows -- when we click on the tab -- I'm sorry.
3 When we click on tab practices to prevent
4 errors -- do you see that?

5 A. Yes.

6 Q. It's the fourth one across, right?
7 We see, for doctors order medications
8 through a computer, does it show that this
9 hospital scores a 15?

10 Do you see that?

11 A. Yes.

12 Q. And does this measure on the website
13 correspond to CPOE, so far as you understand?

14 A. Yes.

15 Q. Okay. And so is this one of the imputed
16 metrics under the new methodology?

17 A. Yes.

18 Q. Okay. And then for safe medication
19 administration, which is the next one over --
20 right? -- am I correct that it shows a score of
21 25?

22 A. Yes.

1 Q. And is the safe medication administration
2 measure, does that correspond to BCMA?

3 A. Yes.

4 Q. All right. And then for hand washing,
5 which is the next one over, it shows a score of
6 15, correct?

7 A. Yes.

8 Q. All right. And this measure is --
9 corresponds to hand hygiene that we already
10 discussed, correct?

11 A. Yes.

12 Q. All right. And these are all -- the ones
13 we've gone over so far, the three, are all,
14 again, imputed metrics under the new methodology,
15 correct?

16 A. Yes.

17 Q. All right. Now, if we go under the next
18 tab, doctors, nurses, and hospital staff, the one
19 on the right, there's a measure underneath
20 specially trained doctors for ICU patients.

21 Do you see that?

22 A. Yes.

1 Q. And do you see that the score there
2 for -- is a 15? Is that right?

3 A. It's a 5.

4 Q. 5, I'm sorry.

5 It's a 5, correct?

6 A. Yes.

7 Q. And does this measure correspond to IPS?

8 A. Yes.

9 Q. All right. And then for -- and again, is
10 this also one of the imputed metrics under the
11 methodology?

12 A. Yes.

13 Q. All right. And so for all of these
14 scores, the scores for Delray Medical Center
15 under these four imputed metrics, these are all
16 limited achievement scores, correct?

17 A. For the survey. Yes.

18 Q. Yes. For the survey. Right.

19 And if you look at the gas gauge type,
20 kind of the -- the picture or the scores for
21 these four imputed metrics, they're all set to
22 the lowest possible value.

1 Do you see that? Is that right?

2 A. Yes. Worse than average.

3 Q. Right. Worse than average. And they're
4 kind of -- the gas gauge is to the red, to the
5 left, right?

6 A. Yes.

7 Q. Okay. But they're not -- there isn't any
8 wording in those gas gauges along the lines of
9 decline to report, right, or not enough data,
10 correct?

11 A. Not on the gas gauge.

12 Q. Not in the gas gauge. Right.

13 So -- but there are certain measures on
14 this website where it is indicated that the
15 hospital declined to report; is that right?

16 A. Correct.

17 Q. Okay. And can you give us one or two
18 examples of -- for which measures that declined
19 to report pictorial shows up?

20 A. On this page, the one right now, it's
21 effective leadership to prevent errors and
22 nursing and bedside care for patients.

1 Q. Okay. And so it's only at the -- we're
2 looking right now above the fold, the
3 webpage above the fold; is that right?

4 A. I don't -- that's a newspaper term, so I
5 don't...

6 Q. Okay. That's a really unfair response.
7 So we're looking at kind of the
8 webpage as the consumer sees it, right?

9 A. Yes. We're reading the webpage.

10 Q. All right. So are there any
11 disclosures -- just looking at the webpage now,
12 without scrolling at all -- right? -- are there
13 any disclosures on the webpage about -- that
14 disclose that the hospital here, in this case
15 Delray Medical Center, did not provide data to
16 The Leapfrog Group?

17 A. There's only an asterisk, which is the
18 normal communication that there's more
19 information below.

20 Q. Okay. That asterisk corresponds to a
21 footnote, correct, toward the bottom of the page
22 as you scroll down to the bottom of the page,

1 correct?

2 A. Yes.

3 Q. All right. And you're familiar with all
4 of this because you oversee this website and the
5 other website, correct?

6 A. Correct.

7 Q. Okay. So -- and it's at the bottom of
8 the page in -- let's just go to it -- in the
9 smaller font where Leapfrog discloses that this
10 hospital did not provide data to The Leapfrog
11 Group, correct?

12 A. In notes and definitions, we're referring
13 to number 4 --

14 Q. Right.

15 A. -- which is an asterisk in bold red.

16 Q. Okay. And it says, Hospital declined to
17 report the performance on this measure, so a
18 score was assigned to reflect lack of information
19 available, correct?

20 A. Correct.

21 Q. And this footnote is in reference to the
22 four imputed metrics that are laid out above it,

1 correct?

2 A. Correct. There's an asterisk that --
3 yes.

4 Q. Right. Now, does this -- the footnote,
5 however, does not explain how that score was
6 assigned, correct?

7 A. Correct.

8 Q. Okay. So we have looked at -- we've kind
9 of scrolled through it and we've looked at each
10 of the two Leapfrog websites, or the websites
11 that are operated by Leapfrog.

12 Why doesn't Leapfrog use the same
13 disclosures as they relate to hospitals that
14 don't participate in the survey -- right? -- why
15 doesn't Leapfrog use the same disclosures on each
16 website?

17 MS. BLAIR: Objection to form.

18 THE WITNESS: They're complete -- they're
19 different programs. So the Leapfrog hospital
20 survey is a different program than the Leapfrog
21 hospital safety grade. The Leapfrog hospital
22 survey includes safety and quality.

1 BY MR. CHUNG:

2 Q. Okay. But we looked at -- so how does
3 that explain the difference between the
4 website -- the two websites as we just went over,
5 the parts that we went over?

6 A. They're different. So maybe a better way
7 to say it: So the survey is voluntary.
8 Hospitals choose or not choose to do the survey.

9 The safety grade is not voluntary. The
10 safety grade was designed so that it was assigned
11 to all general acute care hospitals for patients
12 to get as much information as possible.

13 Q. Okay. Was there ever a concern at
14 Leapfrog -- right? -- that consumers or visitors
15 to both websites would be confused about the
16 imputed metric scores for hospitals that did not
17 participate in the hospital survey?

18 MS. BLAIR: Objection to form.

19 THE WITNESS: Can you restate the
20 question?

21 BY MR. CHUNG:

22 Q. Yes.

1 Was there ever any concern at Leapfrog
2 that visitors to the websites, including
3 consumers, would be confused about imputed metric
4 scores for hospitals that did not participate in
5 the hospital survey?

6 A. No. That's the reason we did the
7 asterisk with the note. We feel that it's a
8 clear description that this was a score that was
9 assigned.

10 Q. Okay. Though the footnote -- the
11 asterisk and the footnote does not describe how
12 that automatic low score was assigned, correct?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: That's in our methodology.
15 We only have a certain amount of real estate on
16 the website. It wouldn't make sense -- it's
17 something in communications that's also important
18 to know -- this is our philosophy in
19 communications just generally in the field,
20 actually6 -- is that too much information can
21 actually be more confusing to consumers.

22 Consumers don't generally understand

1 what "imputed" means, but they understand basic
2 language, that this hospital declined to report
3 their performance on this measure, so a score was
4 assigned to reflect the lack of information
5 available.

6 BY MR. CHUNG:

7 Q. Okay. So I'm just going to ask the
8 question again: Was there ever any concern --
9 right? -- at Leapfrog that visitors to the
10 websites might be confused about the imputed
11 metric scores for hospitals that didn't report to
12 the survey?

13 A. Well, we made this so that they wouldn't
14 be confused.

15 Q. So the question -- yes? No? Were there
16 concerns or were there not concerns?

17 A. There were concerns, which is the reason
18 why we did the asterisk and disclosed it in bold
19 red as clear as possible.

20 Q. When you say as clear as possible, what
21 do you mean by that?

22 A. Like, we have it in bold in red, which

1 will draw people's eyes.

2 Q. Okay. But the -- it doesn't -- but the
3 footnote does not describe how that lowest
4 possible score was assigned to the hospital,
5 correct? Just to be clear.

6 MS. BLAIR: Objection to form.

7 THE WITNESS: Can you restate the
8 question?

9 BY MR. CHUNG:

10 Q. Yes. But am I correct that that
11 footnote does not inform the consumer --
12 right? -- the visitor to the website how that
13 lowest possible score was assigned to that
14 hospital, correct?

15 MS. BLAIR: Objection. Form.

16 THE WITNESS: That's not the purpose of
17 this part of the website.

18 BY MR. CHUNG:

19 Q. Okay.

20 A. It's the methodology.

21 Q. And so are -- when you say that's not the
22 purpose of the website, are consumers expected,

1 then, to be knowledgeable about the methodology?

2 A. No, I'm not saying that. Like, if you
3 look at all of the measures, it doesn't very
4 clearly explain how each thing was scored. We
5 put the most clear information possible for each
6 of the measures for consumers.

7 Q. Okay. Has Leapfrog -- all right. So you
8 testified about kind of -- well, has Leapfrog
9 received any feedback, first of all, from
10 hospitals regarding any confusion or
11 inconsistencies between the information presented
12 on the two websites?

13 A. Not that I can recall.

14 Q. Okay. How about any feedback -- has
15 Leapfrog received any feedback from patients --
16 right? -- consumers, regarding confusion or
17 possible inconsistencies between the information
18 presented on the websites?

19 A. Not that I can recall.

20 Q. Okay. Have you -- has Leapfrog received
21 any feedback from any party about confusion or
22 potential inconsistencies in the information

1 presented between the two websites?

2 A. Not that I can recall.

3 Q. Okay. Has Leapfrog ever conducted any
4 testing or surveys or other research to assess
5 whether consumers see the disclosures on each
6 website as opposed to -- Ms. Bailey, as opposed
7 to just seeing, for one, the grade -- right? --
8 on the website?

9 So the question is, yeah, has Leapfrog
10 ever studied whether consumers actually --
11 whether they actually look at or see the
12 disclosures on each of the websites?

13 A. I know that when the website was created,
14 I wasn't here. But from -- my understanding is
15 that we hired a low literacy expert. We also had
16 focus groups.

17 And the whole structure in general of the
18 website has not changed since then. So it was
19 developed with feedback from those experts.

20 Q. So -- I think you said low literacy
21 expert.

22 What is that?

1 A. We want to ensure that our website is
2 written to an eighth grade level of education.

3 Q. Okay. Is another word for that digital
4 literacy expert?

5 A. I don't know.

6 Q. Okay. Has there been -- do you know
7 when, approximately, that low literacy expert was
8 retained to advise on the website?

9 A. It was whenever we created this website,
10 and it was prior to my time at Leapfrog.

11 Q. Okay. Do you know whether that expert
12 looked at both websites or just one of them?

13 A. I don't know.

14 Q. All right. Have there been -- during
15 your time at Leapfrog over the last several
16 years, has a low literacy or a digital literacy
17 expert ever reviewed either or both of these
18 websites?

19 A. Not to my knowledge. We haven't made
20 substantial changes to how the data is displayed.

21 Q. Okay. Do you think it's realistic to
22 assume or to think that visitors, particularly

1 one with -- let's assume one with an eighth grade
2 literacy level -- right? -- low literacy, will
3 read a footnote at the bottom of the page on the
4 hospitalsafetygrade.org website?

5 A. I think -- yes, I think someone at an
6 eighth grade level would understand what an
7 asterisk means, and if they were interested, they
8 could learn more, scroll down.

9 Q. Okay. Do you -- so I'll ask it again.
10 Do you think it's reasonable or realistic
11 for such a consumer with the eighth grade
12 literacy level to read through that entire page,
13 to scroll down and then study the information at
14 the bottom of the page?

15 A. Yes. I think if they're interested in
16 the data, they'll read it.

17 Q. Okay. Does Leapfrog want consumers to
18 believe that the imputed metrics are based on
19 actual data?

20 MS. BLAIR: Objection to form.

21 THE WITNESS: No. I mean, we really --
22 we clearly say on this, a score was assigned to

1 reflect the lack of information available.

2 BY MR. CHUNG:

3 Q. Okay. And it's not disclosed here
4 that -- is it disclosed anywhere on the Hospital
5 Safety Grade website that the scores, the limited
6 achievement scores are automatically assigned to
7 these hospitals on these imputed metrics?

8 A. Can you say that again?

9 Q. Yeah. Is it anywhere disclosed -- is it
10 disclosed on the website, the
11 hospitalsafetygrade.org website, that
12 non-participating hospitals are automatically
13 assigned a limited achievement score on these
14 imputed metrics?

15 A. I think that it's clear because it says,
16 again, a score was assigned. And then if you see
17 this hospital score and you see worst hospital
18 score, you see that it was the lowest.

19 Q. Okay. Has Leapfrog ever considered
20 standardizing the disclosures or the presentation
21 of information across these two websites as it
22 relates to non-responding hospitals?

1 When I say non-responding, hospitals that
2 didn't respond to the hospital survey.

3 MS. BLAIR: Objection. Form.

4 THE WITNESS: Can you say the question
5 again.

6 BY MR. CHUNG:

7 Q. Sure has Leapfrog ever considered
8 standardizing -- right? -- making consistent
9 between the two websites the disclosures or the
10 presentation of information as it relates to
11 hospitals that do not participate in the hospital
12 survey?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: Because they're different
15 programs -- Leapfrog hospital safety grade and
16 Leapfrog hospital survey are different -- no.

17 BY MR. CHUNG:

18 Q. Okay. Let's talk about Leapfrog's
19 marketing.

20 So are you -- you're the communications
21 director. Do you have responsibilities with
22 respect to Leapfrog's marketing function?

1 A. Marketing is different than
2 communications, so --

3 Q. Okay.

4 A. -- I wouldn't consider that, no. What's
5 your definitions of marketing?

6 Q. Who's in charge of marketing?

7 A. We don't have a marketing person.

8 Q. All right. And you mentioned that --
9 other than CURA Strategies, are there any other
10 outside contractors or consultants that provide,
11 you know, public relations or communications
12 services?

13 A. We have a few services that we will use.
14 CURA Strategies is our agency of record.

15 We work with Nonprofit Megaphone, which
16 is a vendor who helps us with our Google ads. We
17 have a Google ad grant since we're a nonprofit.

18 We work with North American Network,
19 which is a radio vendor, around the safety grade
20 to help us get the safety grade out.

21 We work with ForeMedia, which kind of
22 does the same thing but for broadcast TV.

1 Q. Okay.

2 MR. CHUNG: Let's go to tab 22. This
3 will Exhibit 16.

4 (Bailey Deposition Exhibit 16 marked for
5 identification and attached to the
6 transcript.)

7 BY MR. CHUNG:

8 Q. All right. Ms. Bailey, I've put in front
9 of you Exhibit 16, which is titled, 2025 Regional
10 Leader Communications Toolkit: Launching
11 Leapfrog Surveys.

12 Take a few moments. Let me know if it
13 looks familiar to you.

14 A. Yes. I'm familiar with this.

15 Q. Okay. Is this a document that provides
16 instructions to Leapfrog regional leaders on how
17 to market the hospital survey?

18 A. I wouldn't use the word "market."
19 There's no money exchanged in our relationship
20 with regional leaders.

21 This is a toolkit that lives on their
22 intranet, you could call it, on our website, and

1 they can refer back to it throughout the year.

2 One of the primary responsibilities of
3 regional leaders are really to represent Leapfrog
4 in their markets, and so a really big part of
5 that is sending out physical letters to all the
6 hospitals on their rosters. So for our regional
7 leader in Seattle, they do all of the hospitals
8 in Seattle. And they also have ambulatory
9 surgery centers on their rosters.

10 Q. And so what is the purpose of regional
11 leaders reaching out to hospitals in their
12 markets?

13 A. Healthcare is local.

14 Q. So what's the purpose?

15 A. The purpose is that they represent
16 Leapfrog in their markets and they are -- as
17 employers, they represent employers in their
18 markets. So Leapfrog, again, was founded by
19 employers. And so the ask to participate in the
20 survey comes from the employer community.

21 Q. All right. So just in short, they are --
22 the regional leaders are responsible for

1 communicating with hospitals in their market to
2 try to get them to participate in the survey,
3 correct?

4 A. Yes. They send letters. Yes.

5 Q. Now, how do they -- what are the typical
6 kind of ways in which regional leaders try to
7 achieve that?

8 A. Most of them just send letters, physical
9 letters and e-mails.

10 Q. And does this toolkit -- it looks like
11 this toolkit includes suggestions of how to
12 format those letters --

13 A. Yes.

14 Q. -- or word those letters, correct?

15 A. Yes.

16 Q. Okay. If you look at, later in the
17 document, Bates ending 517, there's a chart.

18 A. Yes.

19 Q. And it's beginning to sound like a broken
20 record, but it's titled, Common objections and
21 frequently asked questions about Leapfrog and its
22 ratings.

1 Do you see that?

2 A. Yes.

3 Q. Okay. And there's a table that goes on
4 for, I think, several pages --

5 A. Yes.

6 Q. -- till the end of the document, correct?

7 The -- on this first page, the second
8 row, reads, under objection, Leapfrog data is
9 self-reported and, therefore, unreliable.

10 Do you see that?

11 A. Yes.

12 Q. And that is a common objection that we've
13 seen kind of in prior documents, including the
14 presentation to the board that we looked at,
15 correct?

16 A. The presentation to the board came from
17 this document. Yes.

18 Q. Okay. Now, turning to -- and is it --
19 looking at this document now, for this toolkit
20 for regional leaders, is this objection, Leapfrog
21 data is self-reported and, therefore, unreliable,
22 an objection that -- a common objection from

1 hospitals?

2 A. We've -- I testified before about this,
3 that, yes, we've heard this.

4 Q. Okay. Turning to the next page, so Bates
5 ending 518, it is the fifth objection down. It
6 reads, We believe something on the survey is not
7 risk-adjusted adequately and/or invalid or
8 unscientific.

9 Do you see that particular objection?

10 A. Yes, I do.

11 Q. Okay. And is it correct that that is
12 another common objection to the Leapfrog survey
13 from hospitals?

14 A. Again, in my testimony earlier, common
15 is -- common objections is just a PR term. It
16 doesn't mean we hear it all the time. It means
17 we think it's important for regional leaders to
18 have the answer to this question. Maybe we've
19 heard it before; maybe it was discussed with
20 staff that it could be asked.

21 Q. Okay. So this is -- but where does this
22 common objection come from?

1 A. We came up with these as staff members.

2 Q. So this is not based at all on feedback
3 or anything you've heard from hospitals; is that
4 your testimony?

5 A. I testified already about this, that,
6 yes, it is based on maybe conversations people
7 have had. It's not direct quotes. It's in
8 combination of maybe things we've heard over the
9 last, you know, 25 years and we are compiling
10 them into a PR document.

11 Q. All right. And what is the purpose of --
12 what's the purpose of listing out all of these
13 common objections for the regional leaders?

14 A. It helps to have all of our messaging in
15 one place. It's just a strategy that we use.
16 Again, this lives on the intranet. So we have a
17 very small staff. We have limited resources.
18 There's more regional leaders than there are
19 Leapfrog staff members, to be clear, so we don't
20 have the ability to, you know, be available all
21 the time to answer every question, so this saves
22 us a little time for them to have the common --

1 you know, our idea of what potentially they could
2 be asked, and they have an approved response.

3 And if they ask anything beyond this,
4 they know that they go -- they come to us.

5 Q. Okay. So -- you're right, that for each
6 of these common objections, there is a
7 proposed -- a proposed or recommended response
8 next to it, correct?

9 A. Yes.

10 Q. And am I correct that the purpose of
11 providing the common objections and the responses
12 is to give regional leaders a tool or a proposed
13 response in the event that a hospital voices one
14 or more of these common objections, correct?

15 A. Or one of their employers.

16 Q. Okay. But the hospitals as well,
17 correct?

18 A. Yes.

19 Q. All right. And the purpose of providing
20 these responses to the objections is it helps
21 regional leaders enlist more hospitals to
22 participate in the survey, correct?

1 A. Yeah. It helps them with their outreach
2 efforts.

3 Q. Okay. And the more hospitals that
4 respond to the survey, the more data that's
5 submitted to Leapfrog in conjunction with those
6 responses, correct?

7 A. Correct. But if you look at the safety
8 grade, 80 percent of hospitals respond, so we
9 already have a very full data set.

10 Q. Okay. It's also correct that -- can you
11 say that again? That 80 percent -- I'm sorry, I
12 didn't catch that response.

13 A. Yes. I believe that it's 80 percent of
14 hospitals report to Leapfrog that get a safety
15 grade.

16 Q. Okay. But there are still hospitals that
17 don't respond to the survey, correct?

18 A. Correct.

19 Q. All right. And there are hospitals that
20 have responded in the past but at some point
21 stopped responding to the survey, correct?

22 A. I've heard of that happening. Yes.

1 Q. And so one of the purposes of providing
2 this toolkit of common objections and responses
3 to the regional leaders is to try to convince
4 those hospitals either to participate in the
5 survey in the first instance or resume their
6 responses to the survey, correct?

7 A. Yes. It's important to our mission --

8 Q. All right.

9 A. -- that hospitals are transparent.

10 Q. It's also important to your mission to
11 have as many hospitals participate in the survey
12 as possible, correct?

13 A. Yes. We would love if all hospitals did
14 in the survey. We would have a lot of data for
15 patients.

16 Q. All right. And it also allows -- the
17 more hospitals that participate in the survey,
18 the more data from those hospitals you have,
19 correct?

20 A. Correct.

21 Q. And the more data you have, the more you
22 can license that data to third parties; is that

1 correct?

2 MS. BLAIR: Objection to form.

3 THE WITNESS: No, I wouldn't agree with
4 that. We don't -- we don't charge more based on
5 how much data is available.

6 BY MR. CHUNG:

7 Q. That's not my question. The question is,
8 the more data, hospitals' data you have
9 available, the more marketable that data is to
10 third parties, correct?

11 MS. BLAIR: Objection to form.

12 THE WITNESS: Yes. But I'd say it's
13 already very marketable. We already have a lot
14 of hospitals participating.

15 BY MR. CHUNG:

16 Q. Okay. Does Leapfrog pay for search
17 engine optimization for either or both of its
18 websites?

19 A. We just started this in July of this
20 year.

21 Q. All right. And what exactly is it paying
22 for in terms of that search engine optimization?

1 A. We're on month two of it, so I'm not
2 completely well versed. This is something that
3 Nate Longmore, our communications coordinator,
4 works on with Nonprofit Megaphone. It's a
5 service that they provide.

6 As of right now, we're in the very early
7 stages. So when you're in the very early stages
8 of SEL, my understanding is that, first, we're
9 looking for any pages that have broken links that
10 we may have missed or things like that to clean
11 up, and then we kind of move on from there.

12 Q. Okay. And is that for both websites?

13 A. I believe so.

14 Q. All right. Does Leapfrog partner with
15 any journalists or media outlets in anticipation
16 of publishing the hospital safety grades?

17 A. I would not use the word "partner." We
18 do pitch media, yes.

19 Q. All right. And approximately how many
20 journalists or these media outlets do you
21 pitch -- pitch what, exactly?

22 A. Leapfrog hospital safety grades and

1 trends in the safety grades. And again,
2 healthcare is local, and so it's a really
3 important of [sic] our strategy to get the safety
4 grades out to these local publications.

5 Q. Okay. Does Leapfrog embargo the hospital
6 grade results with these media outlets and
7 journalists?

8 A. Yes.

9 Q. And why does it do that?

10 A. To give the reporters more time to work
11 on their stories.

12 Q. All right.

13 MR. CHUNG: Let's go to tab 42.

14 (Bailey Deposition Exhibit 17 marked for
15 identification and attached to the
16 transcript.)

17 BY MR. CHUNG:

18 Q. We're going to look at a few other
19 sections of the websites, Ms. Bailey.

20 A. Okay.

21 Q. We're going to look at printouts.

22 And this is 17, I think.

1 Okay. Exhibit 17 is taken from the
2 hospitalsafetygrade.org website.

3 Do you recognize it?

4 A. Yes.

5 Q. Okay. It's a section, How to use the
6 grade.

7 And if you look at page 4 of the
8 document, in the second paragraph under the
9 heading What About Past Grades, in the second
10 paragraph there's a sentence that reads, Patients
11 should always decide on where to receive care
12 based on a hospital's current safety grade.

13 Do you see that?

14 A. Yes.

15 Q. Okay. So is the message to the consumers
16 here that a drop in a hospital's safety grade
17 means that the hospital has become more
18 dangerous?

19 A. That's not what that says. It says in
20 the context -- this is the context of past
21 grades. If you look at the beginning, it says,
22 What about past grades? So on the website, you

1 can click, View past grades. So we're saying,
2 look at the current safety grade; don't rely on
3 the old safety grade. The new data will be more
4 reflective of your experience today.

5 Q. Okay. So if -- my question is, is the
6 message here -- or one of the messages from this
7 sentence, from this section, that if the current
8 safety grade is lower or has dropped -- right? --
9 from previous safety grades, that that hospital
10 has become more dangerous? Is that part of the
11 message?

12 A. Not that it's become more dangerous, but
13 their patient safety has decreased.

14 Q. Okay. Does the messaging also include
15 that the consumer, as a result of seeing this
16 decrease or the drop in the safety grade, should
17 be more cautious about visiting that hospital?

18 A. Consumers should be cautious when
19 visiting any hospital. And we're very clear that
20 no hospital is perfectly safe. Not A-hospitals;
21 no hospital is safe. You should always be
22 cautious. We have a lot of tools on our website

1 for questions you should ask.

2 Q. I'm asking specific -- not generally,
3 Ms. Bailey, but specific to the message here that
4 we just went over.

5 Is the message or part of the message at
6 least that a consumer should, upon seeing this
7 change in the safety grade, be more cautious
8 about visiting that hospital?

9 A. Yes. We're not saying you shouldn't go
10 to a hospital. We're just saying, be aware of
11 the safety; ask questions.

12 Q. Okay. There is -- if we turn to the
13 previous page, so page 3 of the document, under
14 What measures are most important, there's a
15 handwashing bullet point.

16 Do you see that?

17 A. Yes.

18 Q. And handwashing is one of the imputed
19 metrics that we've gone over; is that right?

20 A. Yes.

21 Q. Now, it says, Does your hospital have a
22 handwashing policy to ensure that all staff

1 members are washing their hands before and after
2 patient contact.

3 Do you see that?

4 A. Yes.

5 Q. All right. So is Leapfrog telling
6 consumers here that one of the most important
7 measures they should consider when choosing a
8 hospital is handwashing?

9 A. Yes.

10 Q. Okay. Does it disclose here at all that
11 Leapfrog, under its imputation methodology,
12 automatically gives non-participating hospitals
13 the lowest grade possible on handwashing?

14 A. No. That wouldn't make sense in this
15 context.

16 Q. But no, correct?

17 A. No.

18 Q. That's not disclosed. All right.

19 MR. CHUNG: Let's go to document 43.
20 This will be Exhibit 18.

21

22

1 (Bailey Deposition Exhibit 18 marked for
2 identification and attached to the
3 transcript.)

4 BY MR. CHUNG:

5 Q. Okay. This is another section or excerpt
6 of the Hospital Grade -- Safety Grade website
7 titled, Choosing the best hospital.

8 Are you familiar with this section of the
9 website?

10 A. Yes.

11 Q. Okay. And is this a part of the website
12 that you oversee for content?

13 A. This is a page that we would consider
14 evergreen content. So I don't remember
15 personally making edits to this page.

16 Q. What do you mean by evergreen content?

17 A. It's something that -- I mean, I would,
18 like, triple check, but it's something that
19 really wouldn't change. A lot of our content on
20 some of the first half in the safety grade is
21 just, like, consumer information.

22 Q. Okay. So this is Exhibit 18.

1 So is it your testimony that you,
2 yourself, don't monitor this particular page for
3 any updates or whether it's accurate?

4 A. I mean, we look at the whole website all
5 the time, but I don't remember making changes to
6 this page personally.

7 Q. Okay. If you look at the first page, the
8 second paragraph, it reads, Your choice of
9 hospitals -- your choice of hospital could be a
10 life or death decision.

11 Do you see that?

12 A. Yes.

13 Q. All right. Is that messaging designed to
14 scare consumers upon reading -- coming to the
15 website?

16 MS. BLAIR: Objection to form.

17 THE WITNESS: I wouldn't use the
18 word "scare." It's to make them understand it's
19 an important decision.

20 BY MR. CHUNG:

21 Q. Okay. Is it, in fact, a life or death
22 decision, in your view?

1 A. Yes. It can be.

2 Q. Okay. To put it another way, does
3 Leapfrog expect consumers not to be scared when
4 they read that?

5 MS. BLAIR: Objection to form.

6 THE WITNESS: I don't know.

7 BY MR. CHUNG:

8 Q. Is this message, Your choice of hospital
9 could be a life or death decision, is it designed
10 to encourage consumers to use Leapfrog's hospital
11 safety grades when choosing a hospital?

12 A. Yes.

13 MR. CHUNG: Let's go to tab 44. This
14 will be Exhibit 19.

15 (Bailey Deposition Exhibit 19 marked for
16 identification and attached to the
17 transcript.)

18 BY MR. CHUNG:

19 Q. So Exhibit 19 is another section of the
20 same website. It's the frequently asked
21 questions about the Leapfrog hospital safety
22 grade.

1 Do you recognize this section?

2 A. Yes.

3 Q. All right. Is this evergreen as well
4 or --

5 A. No.

6 Q. All right. And so is this a section that
7 you check for accuracy and that it's up to date?

8 A. We update it before each safety grade
9 round.

10 Q. Okay. And do you also check for
11 accuracy?

12 A. Can you restate the question?

13 Q. Yes. Do you check this section, this FAQ
14 section, for accuracy?

15 A. Yes.

16 Q. Okay. How often do you do that?

17 A. Prior to each safety grade round, we
18 update the FAQs.

19 Q. Okay. Let's look at the second page.

20 This section tells the consumers or
21 readers that patients are twice as likely to die
22 of a prevental [sic] problem at a C, D, or

1 F-hospital than an A-hospital.

2 Do you see that?

3 A. Yes.

4 Q. All right. So similar question: Is the
5 strategy here to scare consumers away from
6 hospitals with C, D, or F safety grades?

7 MS. BLAIR: Objection to form.

8 THE WITNESS: It is not. It's just to
9 give information that not all hospitals are the
10 same.

11 BY MR. CHUNG:

12 Q. Do you think that this is an effective
13 way of -- of communicating that, that not all
14 hospitals are the same?

15 A. Can you restate your question?

16 Q. Do you think this sentence is an
17 effective way of communicating that not all
18 hospitals are the same?

19 A. Yes. That hospitals differ in their
20 patient safety.

21 Q. Why not just -- why not just tell the
22 consumer not all hospitals are the same, as

1 opposed to telling them that -- or representing
2 to them that patients are twice as likely to die
3 of a preventable problem at a C, D, or F?

4 MS. BLAIR: Objection to form.

5 THE WITNESS: Can you restate the
6 question?

7 BY MR. CHUNG:

8 Q. Yeah. Why not -- just kind of presenting
9 your own testimony, why not just tell consumers
10 that not all hospitals are the same?

11 MS. BLAIR: Objection to form.

12 THE WITNESS: We do say that as well.
13 But this is a study from John Hopkins that we
14 cite.

15 BY MR. CHUNG:

16 Q. Okay. Does Leapfrog want consumers to
17 think that visiting a hospital with a D or F
18 grade could seriously injure or kill them? Is
19 that part of the messaging?

20 A. The messaging is that you're more likely,
21 based on the preventable problems that are
22 represented in the safety grade.

1 Q. All right. And like the other message,
2 is this messaging designed to encourage consumers
3 to use the hospital safety grades when choosing a
4 hospital?

5 A. Yes.

6 Q. Now, the website also tells consumers
7 that the hospital safety grade reflects how well
8 a hospital does on safety, not whether they
9 complete the Leapfrog hospital survey.

10 Are you familiar with that?

11 A. Where are you reading from?

12 Q. This is from the frequently -- this is
13 actually --

14 A. Oh, it's --

15 Q. -- on page 3, I'm sorry.

16 A. Thank you.

17 Q. I should have directed you to that.

18 A. Thank you.

19 Q. So page 3, under that question, Does a
20 hospital get a better safety grade if it reports
21 the Leapfrog hospital survey -- there's a
22 sentence right underneath it.

1 Do you see that?

2 A. Yes.

3 Q. Okay. It's -- is that true?

4 A. Yes.

5 Q. All right. But if a hospital does not
6 respond to the survey or does not complete the
7 survey, it automatically receives the lowest
8 possible score on the four imputed metrics,
9 correct?

10 A. Just on those four metrics. Yes.

11 Q. Okay. And these are among the most
12 important metrics, I think you testified earlier,
13 correct?

14 A. Correct. But there are hospitals, let's
15 be clear, that don't get a safety grade that
16 still get an A. It's not automatically that you
17 get a bad grade.

18 Q. But on those four critical imputed
19 metrics, these non-participating hospitals are
20 given the lowest possible score without the
21 benefit of any actual data on those four metrics,
22 correct?

1 A. Correct. They're assigned that score.

2 MR. CHUNG: Let's go to tab 58.

3 So this will be 20.

4 (Bailey Deposition Exhibit 20 marked for
5 identification and attached to the
6 transcript.)

7 BY MR. CHUNG:

8 Q. So Ms. Bailey, Exhibit 20 is -- you've
9 got an e-mail chain from October 29 of 2024, and
10 then there's an attachment to it with what looks
11 like a markup of an FAQ about the hospital safety
12 grade.

13 A. Yes.

14 Q. So take a few moments. Let me know when
15 you've had a chance...

16 A. Yes.

17 Q. Okay. Do you recognize what's being
18 discussed in this e-mail chain?

19 A. Yes.

20 Q. So it appears that this is discussion
21 around frequently asked questions about the
22 Leapfrog hospital safety grade, correct?

1 A. Yes. The document we were just looking
2 at.

3 Q. Okay. This is coming off of the website,
4 the section that we just looked at, in
5 Exhibit 19, right?

6 A. Yes.

7 Q. All right. Now, if you look at the
8 page Bates ending 7096, it's the first page of
9 the markup of the FAQs.

10 And just to be clear, are the edits that
11 we see here on this document -- whose edits are
12 these?

13 Are they Ms. Binder's edits?

14 A. Yes. And this was to the fall 2024 FAQs.
15 And the one we just looked at was the spring 2025
16 FAQs.

17 Q. Okay. So on the first page of -- so
18 Bates ending 7096, toward the bottom there, one
19 of the FAQs is, Why did hospital X get an F and
20 why did hospital Y get an A?

21 Do you see that?

22 A. Yes. A little hard to read.

1 Q. Yes, I'm sorry. It's a little bit faint.

2 In brackets it says, Answer these
3 questions by being very specific about how the
4 asked-about hospital did on specific measures but
5 don't say how those measures caused the bad
6 grade. In other words, talk about the safety
7 measures, not the methodology.

8 Do you see that?

9 A. Yes. It's hard to read.

10 Q. Okay. Why did Ms. Binder not want to
11 talk about the methodology?

12 MS. BLAIR: Objection to form.

13 THE WITNESS: I don't know.

14 BY MR. CHUNG:

15 Q. Okay. On the next page, 7097, there's
16 another header titled, Does a hospital get a
17 better safety grade if it reports the Leapfrog
18 hospital survey?

19 Do you see that?

20 A. Yes.

21 Q. Okay. It's the very next one.

22 And then underneath it, the markup reads,

1 The hospital safety grade reflects how well a
2 hospital does on safety, not whether they
3 complete the Leapfrog hospital survey.

4 That corresponds to the sentence or the
5 response that we read on the preceding exhibit,
6 correct?

7 A. Yes. It looks like it's the same.

8 Q. So is that Ms. Binder's kind of edit with
9 respect to that FAQ?

10 A. Let me see. Track changes are hard
11 sometimes.

12 It looks like she actually may have just
13 moved that from -- if you look two paragraphs
14 down -- sorry, this is kind of hard to explain --
15 it says, Does a hospital get a better safety
16 grade if -- do you see how that's X'd out? I
17 think she just moved that paragraph up.

18 Q. Okay.

19 A. It's really hard to read with the
20 crosses, so I can't really tell if there are
21 differences or not.

22 Q. All right. When you saw the edit or her

1 comment about not wanting to talk about
2 methodology in the first part of the markup as to
3 why did hospital X get an F while another
4 hospital got an A -- right? -- did that concern
5 you at all about not -- about the consumer here
6 not getting an explanation for how the hospital
7 gets a grade under the new methodology?

8 MS. BLAIR: Objection to form.

9 THE WITNESS: No. I don't think she
10 meant that by -- what I take from this is that
11 this is an FAQ document. It's meant for
12 reporters. We keep it short. They get the
13 methodology printout as well separately. Every
14 reporter gets that.

15 BY MR. CHUNG:

16 Q. Well, I thought that this FAQ was on the
17 website.

18 A. It is.

19 Q. Isn't it addressed to consumers, visitors
20 to the website?

21 A. It is. It has multi purposes. We send
22 it to reporters as well.

1 Q. Okay. But the content here is on the
2 website, correct?

3 A. It's also on the website, yes.

4 Q. Okay. So we're staying on this document,
5 the markup of the FAQs. Let's go to Bates ending
6 in 7098, so the very next page.

7 There is -- one of the questions is, Are
8 there methodology changes in the fall 2024
9 Leapfrog hospital safety grade?

10 Do you see that?

11 A. Yes.

12 Q. Okay. Now, the original -- so if you
13 kind of try to kind of parse out what's been
14 deleted or edited -- right? -- part of the
15 original language here -- actually, do you know
16 who in the first instance drafted the FAQs as
17 well as the responses?

18 A. Me, in combination with Nate.

19 Q. Okay. And is -- are those -- is that
20 kind of taken what Ms. Binder edited here taken
21 directly from the website? Is she editing what's
22 on the website?

1 A. This right here is in addition to the
2 FAQs.

3 Q. All right. So this is new material?

4 A. Yes. This corresponds with -- I don't
5 know what exhibit at this point, but the e-mail
6 to Missy where we were talking about messaging
7 for the imputation change.

8 Q. Okay.

9 A. That's where this came from.

10 Q. So if you look at the language that's
11 been struck -- right? -- it reads, The Leapfrog
12 Group aims to provide the public with timely,
13 transparent information on hospitals' safety
14 performance. To uphold this commitment, Leapfrog
15 utilizes the best available data for calculating
16 hospital safety grades. Annually, Leapfrog's
17 expert panel and researchers at John Hopkins
18 Institute for Patient Safety and Quality --
19 actually, it's the Armstrong Institute, right?

20 A. Yes.

21 Q. -- and Leapfrog's expert panel and
22 researchers at the Armstrong Institute review the

1 scoring methodology and have recommended
2 modifying the current imputation method used for
3 filling in missing data from hospitals that did
4 not complete the latest Leapfrog survey.

5 Do you see that?

6 A. Yes.

7 Q. Okay. Now, according to the edits
8 here -- right? -- to the red-line here, what
9 comes out of it is in line with the
10 recommendations from the national expert panel
11 and John Hopkins advisors, Leapfrog changed the
12 way it estimates performance for hospitals that
13 declined to report to the Leapfrog hospital
14 survey.

15 So why was that change made from
16 basically an answer that says that the expert
17 panel, John Hopkins, Armstrong Institute, and
18 researchers have recommended modifying the
19 current imputation model -- right? -- to in
20 line with recommendations from the national
21 expert panel and John Hopkins advisors, Leapfrog
22 changed the way it estimates performance?

1 Do you have an understanding as to why
2 the change was made from the experts and John
3 Hopkins making that recommendation -- right? --
4 to Leapfrog changing the way -- changing the
5 imputation methodology in line with the
6 recommendation from the experts?

7 A. I don't know. And this isn't the final,
8 so it's -- I don't remember what the final text
9 even said.

10 Q. Okay. Putting aside whether it's final
11 or not, do you have an understanding as to why
12 that change was made?

13 A. No, I don't.

14 Q. Okay. Then we see for four out of the 30
15 measures -- and we see the four imputed
16 metrics -- right? --

17 A. Yes.

18 Q. -- that we've already discussed --
19 Leapfrog will first check the last two safety
20 grade cycles for available data. If none exist,
21 hospitals will receive a point value of 15 for
22 the measure, the lowest performance category.

1 This reflects analysis of actual performance of
2 hospitals with prior missing data as well as
3 expert consultation.

4 Do you see that?

5 A. Yes.

6 Q. Okay. How does this -- as you understand
7 it, how does this -- the description of the
8 change in imputation methodology, how does it
9 reflect analysis of actual performance of
10 hospitals with prior missing data?

11 A. I don't know. I didn't write it. I
12 don't know what she meant.

13 Q. Okay. And how does it reflect expert
14 consultation?

15 A. I don't know. Among our expert -- aside
16 from our expert panel, I don't know.

17 Q. Okay. But this is -- as communications
18 director, these frequently asked questions that
19 go out to, I think, by your testimony, to
20 reporters as well as to consumers on the website,
21 this is one of your responsibilities, correct?

22 A. Correct. But these are Leah's edits, and

1 I don't remember what we decided on.

2 Q. Are you responsible for understanding
3 Leah's edits?

4 A. Not necessarily what she meant by it
5 always. If we don't understand something, we'll
6 go to her and talk to her about it, but it looks
7 like Nate is the one who had those conversations.

8 Q. And Nate is a communications -- I think
9 manager?

10 A. Coordinator.

11 Q. -- coordinator who reports to you,
12 correct?

13 A. Correct.

14 Q. So as his manager, as his supervisor, do
15 you have responsible for at least understanding
16 Ms. Binder's edits?

17 A. I think it's unrealistic that I'd
18 understand her intention of every single edit she
19 makes.

20 Q. Okay. Is this an important edit?

21 A. I don't know.

22 Q. Do you agree that the change in the

1 imputation methodology in 2024 was an important
2 change to the methodology?

3 A. Yes. And this isn't the final. I
4 don't -- I honestly do not remember what the
5 final text was.

6 Q. Right. I'm not asking about the final
7 text. We're just focusing on this document here.

8 So given that the change in the
9 imputation methodology in the fall of 2024 was an
10 important change, was it important for you to
11 understand the messaging around that change in
12 the imputation methodology?

13 A. Yes.

14 Q. Okay. And was it important for you to
15 understand how the leader of the organization,
16 Leah Binder, viewed that change in the imputation
17 methodology?

18 A. Yes.

19 Q. All right. And was it important for you
20 to understand changes or edits she was making to
21 the messaging around that change in the
22 imputation methodology?

1 A. Yes.

2 Q. Okay. But your testimony here today is
3 that you do not understand where these changes
4 are coming from?

5 MS. BLAIR: Objection to form.

6 THE WITNESS: This line right here, I
7 mean, this was an edit almost a year ago. I
8 don't remember edits from a year ago.

9 BY MR. CHUNG:

10 Q. Okay. Does this -- sitting here today,
11 looking at these edits, does it raise any
12 concerns for you about whether Leapfrog was being
13 transparent about the effect of the methodology
14 change?

15 A. No. My understanding is Leah hasn't
16 shown me any instances where she's trying to not
17 be transparent. Our goal is always transparency.

18 Q. I'm not talking about generally. Right?
19 Looking at these edits here -- right? -- which I
20 understand, based on your testimony, you don't
21 remember -- right?

22 But reading these changes here today, do

1 they give you pause or any concerns about whether
2 Leapfrog was being transparent about the effect
3 of the methodology change?

4 A. No.

5 MS. BLAIR: Objection to form.

6 THE WITNESS: No.

7 BY MR. CHUNG:

8 Q. Okay. I think we went into this a bit
9 previously, but what processes does Leapfrog have
10 in place for soliciting or collecting consumer
11 patient feedback regarding the scoring
12 methodology and the hospital safety grades?

13 A. We publish proposed changes to both
14 annually, from what I can recall at the moment.
15 It's published on our website, on our home page.
16 I mean, technically, anyone could submit a public
17 comment.

18 Q. Okay. Has Leapfrog received -- and is
19 that -- that's directly through the website,
20 correct?

21 A. Correct.

22 Q. Other than the website, is there any

1 affirmative outreach by Leapfrog to hospitals or
2 other third parties about -- to solicit feedback
3 about changes in the scoring methodology or the
4 hospital safety grades?

5 A. It's all through their proposed changes.
6 So we'll send it out through our e-mail
7 newsletters, through social media. We'll send it
8 to our stakeholders.

9 Q. Okay. Has Leapfrog ever put together any
10 panels or committees or working groups to discuss
11 or address consumer feedback about the scoring
12 methodology or the safety grades?

13 A. Can you repeat the question?

14 Q. Sure.

15 Has Leapfrog ever convened any panels or
16 committees or working groups to assess consumer
17 feedback about the scoring methodology or the
18 safety grades?

19 A. In my understanding, creating the patient
20 and family expert panel was a piece of that.

21 Q. Okay. And how was -- can you just go
22 more into that?

1 A. I don't know any more about that. I just
2 know we created it to have a direct conversation
3 with patients and families.

4 Q. Okay. Have there been any instances
5 where consumer feedback has led to a change or a
6 revision in Leapfrog's scoring methodology?

7 A. Not that I can recall.

8 Q. All right. Any instances where consumer
9 feedback has led to a change in the way hospital
10 safety grades are assigned or reported?

11 A. Not that I can recall.

12 Q. Okay. Does Leapfrog have any formal
13 policies or guidelines that govern how consumer
14 feedback is to be considered or incorporated into
15 the scoring methodology of the safety grades?

16 A. I don't know.

17 Q. Can you think of any instances where
18 consumer feedback was explicitly rejected or
19 disregarded in the process of updating or
20 maintaining the scoring methodology?

21 A. Not to my knowledge.

22 Q. Are you aware of any instances in which

1 patients or members of the public have told you,
2 told Leapfrog, that they've delayed necessary
3 medical care as a result of the safety grades?

4 A. Not that I can recall.

5 Q. All right. Are you aware of any
6 instances in which patients or members of the
7 public have reported forgoing necessary medical
8 care as a result of Leapfrog's safety grades?

9 A. Not that I can recall.

10 Q. Are you aware of any instances in which
11 patients or members of the public have reported
12 having to transfer to a hospital that they had
13 previously avoided based on Leapfrog's safety
14 grade?

15 MS. BLAIR: Objection to form.

16 THE WITNESS: Can you restate the
17 question?

18 BY MR. CHUNG:

19 Q. Yes.

20 Are you aware of any instance when a
21 patient of -- a patient or a member of the public
22 telling Leapfrog that they had to transfer to a

1 hospital that they had previously avoided because
2 of the safety grade assigned to that hospital?

3 A. Sorry, I don't understand the question.

4 Q. Okay. We can move on.

5 A. Okay.

6 Q. Has Leapfrog received any feedback from
7 patients or their families indicating that the
8 safety grades have caused confusion about which
9 hospital to go to?

10 A. Not that I can recall.

11 Q. All right. Any feedback or complaints
12 from patients and their families that safety
13 grades have led them to make unsafe healthcare
14 decisions?

15 A. Not that I can recall.

16 Q. Okay. Has Leapfrog -- has Leapfrog heard
17 from any patients or family members about
18 instances that they had to travel further to
19 hospitals as a result of the hospital safety
20 grades?

21 A. Yes. I've done that myself for planned
22 care.

1 Q. I'm not talking about yourself. I'm
2 talking about patients or their family members.

3 Have you heard any instances like that?

4 A. We have a story in our annual report, our
5 last annual report, about a patient who traveled
6 to a hospital that had an A when he was injured
7 for something. It was a non-emergent injury.

8 Q. Okay. Any instances for an emergent
9 injury where a patient had to travel further to a
10 hospital based on the hospital safety grade?

11 A. No, I have not heard of that. And our
12 messaging explicitly says go to the closest
13 hospital in an emergency.

14 Q. Okay. Where is that messaging?

15 A. It's in the -- about the gray tab. Like,
16 the first tab on -- I'm visualizing it. It's the
17 first tab on our website. And it's a very normal
18 part of our communications, our talking points.

19 Q. Okay. Are you aware of any cases where
20 patients have gone to hospitals based on
21 Leapfrog's safety grades to hospitals that were
22 under investigation or had significant safety

1 concerns?

2 A. Can you repeat the question?

3 Q. Yeah. Are you aware of any cases where,
4 based on Leapfrog's safety grades, patients have
5 gone to hospitals that were under investigation
6 or had significant safety concerns?

7 A. Not that I can think of.

8 MR. CHUNG: Let's go to tab 29.

9 This will be Exhibit 21.

10 (Bailey Deposition Exhibit 21 marked for
11 identification and attached to the
12 transcript.)

13 BY MR. CHUNG:

14 Q. All right. Ms. Bailey, Exhibit 21 is an
15 e-mail chain from February of 2023.

16 A. Okay. I've read it.

17 Q. So in this e-mail chain -- it's a thread
18 about a reporter asking why a hospital -- the
19 Mission Hospital in Asheville, North Carolina --
20 had received A grades -- right? -- from Leapfrog,
21 despite low ratings from CMS for patient
22 experience and reports of poor quality care.

1 First of all, do you remember what's kind
2 of generally being discussed in this e-mail
3 chain?

4 A. Generally.

5 Q. Okay. So on the first page -- so Bates
6 ending 649 -- Ms. Binder responds to Elizabeth
7 Harmon and Patrice Brown.

8 Who are Elizabeth Harmon and Patrice
9 Brown?

10 A. Elizabeth Harmon was the senior
11 communications coordinator, I believe, was her
12 title.

13 Patrice Brown was the chief operating
14 officer.

15 Q. Okay. She writes, Missy or I can do
16 this. I really like help from a PR firm refining
17 our talking points because this is officially a
18 serious PR issue.

19 Why was this a serious PR issue?

20 A. This -- hold on, let me look at this
21 again.

22 Q. Let me just put it another way.

1 Was -- just reading Ms. Binder's e-mail
2 response here, was this a serious PR issue
3 because of potential news around Leapfrog's
4 methodology not being supported by CMS?

5 A. No.

6 Q. How do you know that?

7 A. I don't take it as that. I mean, that's
8 not my interpretation.

9 Just -- I interpret this as -- and this
10 was a couple of years ago, so I'm trying to
11 remember.

12 I interpret this as let's discuss the
13 messaging around A-hospitals. We know no
14 hospital is perfectly safe, not even an
15 A-hospital. We need to make sure we're on the
16 same page.

17 That's what I take this as.

18 Q. Okay. But there are -- if you look at
19 the reporter's e-mail here, what's kind of cut
20 and pasted from what the reporter wrote, there
21 are specific allegations here, correct --

22 A. Yes.

1 Q. -- that Mission -- that the hospital at
2 issue gets only two stars from CMS for patient
3 experience, yet Leapfrog, which intends to rank
4 for patient safety and regularly rates Mission an
5 A, and that rating is used by Mission in its
6 marketing.

7 So how is that disjunction or disparity a
8 serious PR issue?

9 A. I take it, again, as Leah just said, we
10 need to discuss -- I don't know, this was a
11 couple of years ago, but this isn't something
12 that comes up all the time. So I took it as her
13 saying, you know, this is something we do need to
14 discuss and take seriously.

15 Q. Okay. Was she -- there's another
16 sentence in that same paragraph from the
17 reporter's allegations: But I would like to know
18 how much of Leapfrog's annual revenue is earned
19 from fees that hospitals pay for using its rating
20 in their marketing.

21 How is that -- how did that contribute to
22 this being a serious PR issue?

1 A. I don't remember that part of this.

2 Q. Okay. Was there a concern that the
3 public relations or the PR around this issue
4 would allege that Leapfrog was a pay-to-play
5 scheme?

6 A. No, I don't think so.

7 Q. Okay. He go on to write, I'd also like
8 to learn if there are other ways in which
9 Leapfrog earns fees from the hospitals that it
10 rates.

11 What was the serious PR issue around that
12 allegation?

13 A. I don't think --

14 MS. BLAIR: Objection to form.

15 THE WITNESS: I don't think that's a
16 serious PR issue.

17 BY MR. CHUNG:

18 Q. Why not?

19 A. We're transparent about this stuff. I
20 don't see it as a PR issue.

21 Q. Okay. What did Ms. Binder think was a
22 serious PR issue around this allegation?

1 A. I don't know. I told you my opinion,
2 that I think it's just the two stars from CMS.
3 Although in this e-mail, it says, for patient
4 experience, which is just one part of the
5 Leapfrog hospital safety grade.

6 Q. Is -- Ms. Binder [sic], we've looked at
7 common objections, you know, common issues
8 previously, and one of them was allegations that
9 Leapfrog was pay to play, correct? We've seen
10 that.

11 A. Correct. Ms. Bailey.

12 Q. Ms. Bailey. I'm sorry.

13 Is this an example of one of the common
14 objections or observations from the public about
15 Leapfrog being a pay-to-play scheme?

16 A. Which? Can you specifically say which
17 part for me?

18 Q. The part that we just read: But I would
19 like to know how much of Leapfrog's annual
20 revenue is earned from fees that hospitals pay
21 for using its rating in their marketplace [sic].
22 I'd also like to learn if there are other ways in

1 which Leapfrog earns fees from hospitals that it
2 rates.

3 A. I infer the patient was trying to
4 understand -- again, there's a lot of ratings out
5 there that are completely pay for play, like
6 Healthgrades, so I think there is some
7 clarification there that we likely made. I
8 wasn't part of this.

9 Q. Okay. Has Leapfrog ever issued a
10 correction or a retraction of a safety grade
11 after learning that the grade it issued may have
12 misrepresented a hospital's actual safety or
13 quality of care? Has that ever happened?

14 A. Not that I can recall. Not that I can
15 recall.

16 Q. Okay. Has there ever been discussion
17 among your colleagues of the potential public
18 health risks associated with publishing safety
19 grades for hospitals where it lacks sufficient or
20 reliable data?

21 A. Can you restate the question?

22 Q. Yes.

1 Has there been any discussion among your
2 colleagues about the potential public health
3 risks associated with publishing safety grades
4 for hospitals where Leapfrog lacks sufficient or
5 reliable data?

6 A. I don't know.

7 Q. Okay. Is that -- given part of what
8 we've been discussing during this deposition is
9 about non-participating hospitals -- right? --
10 and that they're automatically assigned the
11 lowest possible score in the four imputed metrics
12 where there isn't data, has there ever been any
13 discussion among you and your colleagues about
14 whether assigning that lowest score on imputed
15 metrics might present a public health risk?

16 A. Not that I can recall.

17 Q. All right. I asked you, I think,
18 previously whether you're aware of any feedback
19 or complaints from hospitals regarding the
20 accuracy or fairness of their assigned safety
21 grades, but I'll ask again.

22 Are you aware of any feedback or

1 complaints from hospitals along those lines?

2 A. Can you restate the question?

3 Q. Yes.

4 Are you aware of any feedback or
5 complaints from hospitals regarding the accuracy
6 or fairness of the safety grades assigned to
7 them?

8 A. Besides the obvious, we're sitting in
9 this room today because your clients are very
10 unhappy with their safety grades.

11 Q. Apart from the -- the plaintiff hospitals
12 involved here.

13 A. Not that I can recall.

14 Q. Okay.

15 MR. CHUNG: Let's go to tab 23.

16 This is Exhibit 22.

17 (Bailey Deposition Exhibit 22 marked for
18 identification and attached to the
19 transcript.)

20 THE WITNESS: Okay. I've read it.

21 BY MR. CHUNG:

22 Q. Okay. Ms. Bailey, have you seen this --

1 the comment here, or this -- the feedback from
2 the help desk?

3 A. No.

4 Q. Do you recognize the format of this
5 document, that it's a comment submitted to the
6 help desk?

7 A. I don't look at the help desk, but I can
8 infer that it's from the help desk. Yes.

9 Q. All right. Now, the commenter here
10 writes that they're disappointed with the 2024
11 proposed changes.

12 And I should note, this is from May 21 of
13 2024.

14 And she writes that the changes will
15 penalize hospitals that do not submit a Leapfrog
16 survey. The public will not understand nor dig
17 into methodology of these grades, and hospitals
18 will be falsely represented with a lower grade
19 because they chose not to complete a survey.

20 Is that -- have you seen this feedback
21 before?

22 A. No, I haven't seen feedback from this.

1 Q. Okay. Is it a fair -- do you think
2 that's a fair characterization, that the proposed
3 changes in the imputation methodology will
4 penalize hospitals that do not submit a Leapfrog
5 survey by automatically assigning them the lowest
6 possible score on the four imputed metrics?

7 A. Can you restate the question?

8 Q. Yes.

9 Do you think it's a fair assessment, a
10 fair statement here, that the changes here will
11 penalize hospitals that do not submit a Leapfrog
12 survey?

13 A. No. I mean, I wouldn't agree with that.

14 Q. Okay. Why not?

15 A. I mean, I don't see it that way.

16 Q. Aren't -- well, aren't the hospitals, in
17 fact, being penalized for not participating in
18 the survey by being automatically assigned these
19 lowest possible scores on the four metrics?

20 MS. BLAIR: Objection to form.

21 THE WITNESS: I don't see it that way.
22

1 BY MR. CHUNG:

2 Q. Okay. How about the statement here that
3 the public will not understand nor dig into the
4 methodology of these grades?

5 I think you would agree with that, right?

6 A. It --

7 MS. BLAIR: Objection to form.

8 THE WITNESS: You'll see that Missy -- I
9 don't understand exactly how this works, but it
10 looks like Missy said that we should do a symbol.

11 So this was part of the -- from what I
12 understand. I'm not involved in looking at the
13 comments, but what I would -- here -- would --
14 what Missy said above, which -- let's make sure
15 it's clear on the website.

16 That's what I take from that.

17 BY MR. CHUNG:

18 Q. My question is -- I'm not -- we haven't
19 gotten to Missy's comment and your response yet.
20 Right?

21 But the comment or statement here that
22 the public will not understand nor dig into the

1 methodology of these grades -- right? -- wouldn't
2 you agree with that?

3 A. No.

4 MS. BLAIR: Objection to form.

5 THE WITNESS: I don't know if the public
6 will look into it or not.

7 BY MR. CHUNG:

8 Q. Okay. Well, you're a communications
9 director, right? I mean, you are -- you're a
10 communications professional.

11 Isn't it part of your expertise to at
12 least have a hypothesis as to what the public
13 will understand or delve into?

14 A. I mean, I don't -- I don't know what any
15 one person is going to understand or not
16 understand. My goal is just always to be as
17 transparent as we can be on the website.

18 Q. Right. But I think you've testified, I
19 think, repeatedly throughout your deposition that
20 describing the steps in the changed imputation
21 methodology is too in the weeds, correct?

22 A. Correct.

1 MS. BLAIR: Objection to form.

2 BY MR. CHUNG:

3 Q. All right. And I think that's consistent
4 with what the commenter here is saying, that the
5 public will not understand nor dig into the
6 methodology of these grades, correct?

7 A. Can you restate that?

8 Q. Yeah.

9 And is that -- the position you've taken
10 with respect to the changes in the imputation
11 methodology being too in the weeds, that's
12 basically what the commenter is saying here,
13 right? That the public will not understand nor
14 dig into the methodology of these grades,
15 correct?

16 A. Yes.

17 Q. Okay. And is it -- the next part of the
18 sentence here, that hospitals will be falsely
19 represented with a lower grade because they chose
20 not to complete a survey, isn't that a fair
21 observation, given that the public will not
22 understand how they got the grade in the first

1 place?

2 MS. BLAIR: Objection to form.

3 THE WITNESS: I don't think so. I don't
4 think that it's necessarily falsely
5 representative if a hospital did the survey; you
6 get the same score.

7 BY MR. CHUNG:

8 Q. Okay. But for those hospitals that do
9 end up getting a lower score -- right? -- isn't
10 it true -- isn't it a fair assessment that that
11 score is a false representation of that hospital?

12 MS. BLAIR: Objection to form.

13 THE WITNESS: I don't think so.

14 MR. CHUNG: Let's go on to the next tab,
15 24.

16 BY MR. CHUNG:

17 Q. Actually, before we go on to the next
18 one, the next sentence in the comment is the
19 survey is -- we're still on Exhibit 22 -- the
20 survey is extremely time-sensitive [sic] and in a
21 time when hospitals are barely breaking even
22 financially; they do not have the resources to

1 commit to this survey.

2 Is that -- what is your reaction to that
3 statement?

4 A. My reaction to that statement is that the
5 opposite of that is also true: If hospitals --
6 we've seen hospitals that do prioritize patient
7 safety make the time for this, and they spend a
8 lot less time on Leapfrog than a lot of other
9 ratings.

10 Q. Okay. But what do you make of this
11 particular statement itself? Is the survey
12 extremely time-intensive?

13 A. I don't think it is.

14 Q. Okay. And what is that based on?

15 A. My opinion.

16 Q. What is that opinion based on?

17 A. That we've heard from hospitals it takes
18 40 to 80 hours, and we're talking about an entire
19 year.

20 Q. Okay.

21 A. So I don't think that's a lot of time.

22 Q. All right. Have you heard also of

1 hospitals that do not have the resources to
2 commit to responding to the survey?

3 A. No, not personally, no.

4 Q. Okay.

5 MR. CHUNG: All right. Let's move on to
6 24, which will be Exhibit 23.

7 (Bailey Deposition Exhibit 23 marked for
8 identification and attached to the
9 transcript.)

10 BY MR. CHUNG:

11 Q. Now, Exhibit 23 is another comment
12 submitted through the help desk, we believe, in
13 response to the planned safety grade methodology
14 changes in 2024.

15 And Ms. Bailey, if you look at the --
16 kind of the last entry there, it reads, We
17 strongly disagree with the proposed fall 2024
18 step 2 imputation.

19 Do you see that?

20 A. Yes.

21 Q. Okay. If Leapfrog is going to implement
22 this change, they need to offer hospitals an

1 option to opt out of being graded rather than
2 penalize a hospital for not submitting the
3 resource-intensive survey.

4 Do you see that?

5 A. Yes.

6 Q. Okay. What is your reaction to that
7 particular comment?

8 MS. BLAIR: Objection to form.

9 THE WITNESS: My initial reaction is that
10 a theoretical option to opt out is completely
11 against the whole point of the safety grade,
12 which is to assign grades to hospitals and have
13 as much data as possible for patients.

14 BY MR. CHUNG:

15 Q. Okay. So part of -- I think you said
16 that one of the aims of the hospital safety grade
17 is to have as much data as possible for patients,
18 correct?

19 A. Correct.

20 Q. All right. But where, for
21 non-participating hospitals, the hospital safety
22 grades are based at least in part -- right? -- on

1 the absence of data, does that achieve that
2 mission?

3 MS. BLAIR: Objection to form.

4 THE WITNESS: I mean, I was specifically
5 talking about grades, like having more hospitals
6 graded available.

7 BY MR. CHUNG:

8 Q. Okay. But for a number of those
9 hospitals that are being graded -- right? -- that
10 didn't participate in the survey, that's not
11 based on actual data, correct?

12 MS. BLAIR: Objection to form.

13 BY MR. CHUNG:

14 Q. At least with respect to the four imputed
15 metrics; is that right?

16 A. It's our methodology.

17 Q. Okay. Hospitals who do not -- I'm just
18 reading further here: Hospitals who do not have
19 the resources to do the survey annually should
20 not be so adversely punished, especially in the
21 post-COVID era where resources are increasingly
22 hard to come by and retain.

1 What's your reaction to that comment?

2 A. My reaction to that comment is that -- I
3 mean, I think they're talking about burden --
4 right? -- of the survey. And we look at burden
5 differently at Leapfrog. We don't look at burden
6 as how long it takes a hospital to fill out a
7 survey. We think of burden -- of [sic] patients
8 of having the absence of that data.

9 Q. Okay. So the fact that a hospital does
10 not have resources or resources can -- are taken
11 away from actual care of patients is not a factor
12 that concerns Leapfrog?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: In my understanding, it's
15 not the actual clinicians who are doing the
16 survey. They're not the ones providing patient
17 care, in my understanding.

18 BY MR. CHUNG:

19 Q. Okay. What is your understanding as to
20 who is responding to the survey, then?

21 A. It's quality people. People are
22 specifically hired to do ratings programs, from

1 my knowledge of working in a hospital.

2 Q. There are -- so you're saying that there
3 are -- so no patient care resources are diverted
4 at all when having to respond to the survey? Is
5 that your testimony?

6 A. I'm not saying that. I'm not an expert
7 in hospitals.

8 I'm saying, from my understanding, it's
9 not the same people who are, you know, performing
10 surgeries that are doing the survey.

11 Q. Okay.

12 MR. CHUNG: Let's go to tab 25. This
13 will be Exhibit 24.

14 (Bailey Deposition Exhibit 24 marked for
15 identification and attached to the
16 transcript.)

17 BY MR. CHUNG:

18 Q. Similarly, Ms. Bailey, another comment in
19 response to the change in methodology in 2024.

20 So if you look at the second page toward
21 the bottom, the comment reads, Imputation step 2
22 model.

1 Do you see that?

2 A. Yes.

3 Q. Yes. And the commenter -- commentator
4 writes, We feel like this model is unnecessarily
5 punitive. We often skip survey submission
6 because the responses provided for IPS, hand
7 hygiene, BMCA [sic] and CPOE are largely
8 unchanged in the two-year period that was
9 allotted before negatively impacting grades, and
10 the FTE resource commitment to complete the
11 survey is already significant. There's no value
12 added by completed a survey every year or every
13 other year when practices in our hospitals have
14 not changed.

15 Is that a fair response to the change in
16 the imputation methodology? The -- first, that
17 the model is unnecessarily punitive?

18 A. I mean, I don't agree with that.

19 Q. Why don't you agree with that?

20 A. I've already testified that I don't think
21 it's unnecessarily punitive.

22 Q. Okay. What about the fact that at least

1 this particular hospital skips survey submission
2 because the responses provided for the four
3 imputed metrics is largely unchanged in the
4 two-year period?

5 MS. BLAIR: Objection.

6 BY MR. CHUNG:

7 Q. What's your reaction to that?

8 A. That I have -- I don't have any
9 information about that. I wouldn't be able to
10 speak to if it's accurate or not.

11 Q. If it is accurate, is it a fair criticism
12 of the change in the imputation methodology?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: I don't think so.

15 BY MR. CHUNG:

16 Q. And why not?

17 A. I don't -- I mean, I don't know -- I
18 don't run a hospital, so I don't know how this
19 is. I just know that these measures are
20 important, and our goal at Leapfrog is to have
21 the most up-to-date data possible.

22 Q. Right. But where that data for the four

1 imputed metrics has been largely unchanged in the
2 two-year period -- right? -- is it a fair reason
3 for a hospital then to not respond to the survey
4 in a given year?

5 MS. BLAIR: Objection to form.

6 BY MR. CHUNG:

7 Q. Especially where there are resource
8 constraints.

9 A. I don't know that it's not unchanged.

10 Q. I'm just asking you, if we assume that
11 what the commenter here is saying is true.

12 A. I don't know.

13 Q. Okay.

14 A. Not my area.

15 MR. CHUNG: Exhibit 25.

16 (Bailey Deposition Exhibit 25 marked for
17 identification and attached to the
18 transcript.)

19 BY MR. CHUNG:

20 Q. All right. Ms. Bailey, different format
21 here, but another response to the change --
22 proposed change in imputation methodology. This

1 is from June 2024 from Ascension.

2 Are you familiar with Ascension?

3 A. Just that it's a hospital system.

4 Q. Okay. Now, this is coming from the chief
5 advocacy officer, a Peter Leibold.

6 At the bottom of the first page of this
7 letter he writes, Ascension cannot support
8 Leapfrog's proposed update and strongly
9 encourages Leapfrog to refrain from implementing
10 it. We fundamentally believe that the hospital
11 safety grade and the hospital survey should
12 remain separate. The survey should not affect
13 the grades. We don't -- we believe this is not
14 in the best interest of public policy as not all
15 the hospitals have the information or
16 capabilities to complete the hospital survey. We
17 further believe it is unreasonable for an
18 optional survey to have such a significant
19 impact.

20 Is it your view that the survey is
21 optional?

22 A. Yes. It's voluntary.

1 Q. Okay. But where -- after the change in
2 the imputation methodology in 2024, is it fair to
3 say that the survey has effectively become a
4 required one for hospitals?

5 A. No, I don't think so.

6 MS. BLAIR: Objection.

7 Sorry. Objection to form.

8 BY MR. CHUNG:

9 Q. Go ahead.

10 A. There's still hospitals that get As that
11 don't do the survey.

12 Q. Okay. But where a non- -- formerly a
13 non-participating hospital risks a lower grade
14 because it's automatically assigned the lowest
15 possible grade on four imputed metrics, is it
16 fair to say that more hospitals will feel that
17 this is a required survey, as opposed to an
18 optional survey?

19 A. I don't know how hospitals will feel.
20 It's four of, you know, up to 32 measures.

21 Q. Okay. But by your own testimony,
22 these -- the four measures are among the most

1 critical for purpose of patient safety, correct?

2 MS. BLAIR: Objection to form.

3 THE WITNESS: Yeah. Yes.

4 BY MR. CHUNG:

5 Q. Isn't that part of the reason that they
6 were -- that they are the -- four of the metrics
7 that were selected for this imputation
8 methodology?

9 MS. BLAIR: Objection to form.

10 THE WITNESS: Yes. It still doesn't
11 change that it's just four of up to 32.

12 BY MR. CHUNG:

13 Q. Okay. But getting the lowest possible --
14 automatically getting the lowest possible score
15 on those four imputed metrics does increase the
16 risk that the hospital will get a lower resulting
17 safety grade; is that fair?

18 MS. BLAIR: Objection to form.

19 THE WITNESS: Not necessarily.

20 MR. CHUNG: Okay. Let's go to tab 27.

21 This will be 26.

22

1 (Bailey Deposition Exhibit 26 marked for
2 identification and attached to the
3 transcript.)

4 BY MR. CHUNG:

5 Q. Okay. Another comment and response to
6 the proposed imputation methodology.

7 So if you look at the final entry on the
8 second page, Ms. Bailey, the commenter here
9 outlines a number of what she calls more accurate
10 options.

11 Do you see that?

12 A. I'm not there yet.

13 Q. Okay.

14 A. Oh, I see the line now. Okay.

15 Q. Okay.

16 A. It starts with "rather"?

17 Q. Yup.

18 A. Is that where you're at?

19 Okay.

20 Q. And my question is, were any of these
21 alternatives discussed at Leapfrog?

22 A. I don't know.

1 MR. CHUNG: Let's go to -- let's skip
2 that.

3 THE WITNESS: Can we take a break next
4 time we're pending?

5 MR. CHUNG: We can take a break right
6 now.

7 THE WITNESS: Great.

8 VIDEO TECHNICIAN: The time is 2:49 p.m.
9 This ends unit 3. We're on the record.

10 (A recess was taken.)

11 VIDEO TECHNICIAN: The time is 3:04 p.m.
12 This begins unit number 4. We're on the record.

13 MR. CHUNG: All right. Ms. Bailey, we're
14 going to put another document in front of you
15 marked 27, Exhibit 27.

16 (Bailey Deposition Exhibit 27 marked for
17 identification and attached to the
18 transcript.)

19 BY MR. CHUNG:

20 Q. It's another Slack chat between yourself
21 and, I think, Katie Stewart.

22 A. Okay.

1 Q. And to start with, who is Katie Stewart?

2 A. Katie Stewart is the director of
3 healthcare ratings.

4 Q. And she works under Ms. Danforth; is that
5 right?

6 A. Yes.

7 Q. Why don't you take a few moments to
8 review that.

9 And so this is from November 15, 2024. I
10 want to direct your attention -- at 2:46 p.m., it
11 looks like Ms. Stewart asks you, Any thoughts on
12 what to say when a reporter is interested in two
13 hospitals that got worse because of the
14 imputation change?

15 Is this a particular -- specific instance
16 that she's referring to, so far as you're aware?

17 A. I don't remember this conversation, but
18 that's what I would infer, yes.

19 Q. Okay. And you respond, I know Leah said
20 she didn't want to lean in on the transparency
21 side, but that's what this is.

22 What did you mean here when Leah said she

1 didn't want in on the transparency side? Do you
2 remember?

3 A. I don't really remember this.

4 Q. Okay. Do you remember her saying that
5 she didn't want to lean in on the transparency
6 side?

7 A. I don't recall this -- like, talking
8 about this specifically.

9 Q. Okay. If we go down several lines, at
10 2:52 -- or, actually, up at 2:51, Ms. Stewart
11 writes, Not sure what else we can say.

12 And she continues, They should report.
13 LOL.

14 And you respond, Right. Totally. We are
15 focused on accuracy and having the most recent
16 data possible.

17 Does that refresh your recollection as to
18 what Ms. Binder was saying when she did not want
19 to lean in on the transparency side?

20 A. I really don't remember that
21 conversation. I remember the second half of that
22 sentence, that we want to encourage hospitals to

1 be transparent and report their data.

2 That's in line with our regular
3 messaging.

4 Q. Okay. But you don't recall what Leah
5 specifically was saying about not wanting to lean
6 in on the transparency side?

7 A. I don't remember. This was almost a year
8 ago.

9 Q. Okay.

10 A. I don't remember.

11 MR. CHUNG: Let's go to 59.

12 The story as well.

13 This will be 28 and 29.

14 (Bailey Deposition Exhibits 28 and 29
15 marked for identification and attached to
16 the transcript.)

17 BY MR. CHUNG:

18 Q. So Exhibit 28 is an e-mail chain.
19 Exhibit 29 is basically a statement, a public
20 statement, that's referenced in the e-mail chain.

21 So just take a few moments to review
22 that.

1 A. So I vaguely recall this.

2 Q. Okay. So you have a vague recollection
3 as to what's being discussed here.

4 A. Yes.

5 Q. So what is being discussed? And then
6 we'll go into more specifics.

7 A. A media request from AL.com, which is an
8 outlet in Alabama, about a Huntsville hospital.

9 Q. Okay. And is it that this Huntsville
10 hospital was issued a statement disputing
11 Leapfrog's spring 2025 hospital safety grade that
12 penalized the hospital for not completing the
13 survey? Is that what this is about?

14 MS. BLAIR: Objection to form.

15 THE WITNESS: From reading the context of
16 the e-mail and from what I remember, it was
17 actually -- the reporter first did a story about
18 their F, and then, in response, the hospital did
19 this statement.

20 BY MR. CHUNG:

21 Q. Okay.

22 A. That's my understanding.

1 Q. Have you had a chance to review the
2 statement as well that's Exhibit 29.

3 A. It's been a few months, so let me dig in.

4 Q. Okay. So Ms. Bailey, just focus in on
5 the first instance in the first paragraph of the
6 statement.

7 A. Okay.

8 Q. And this is a statement issued by
9 Huntsville Hospital.

10 The first paragraph reads, The Leapfrog
11 survey is not an accurate measure of patient
12 safety at Huntsville Hospital. The hospital did
13 not complete this voluntary 353-page survey, yet
14 Leapfrog chose to publish a rating with
15 incomplete information. This process is unfair
16 to the thousands of dedicated clinicians working
17 around the clock to care for the community and
18 response -- and respond to the emergencies
19 anytime they are called.

20 So is that kind of the gist of what the
21 reporter wants Leapfrog to respond to?

22 A. It looks like the reporter is just asking

1 for more data about the hospital.

2 Q. Okay.

3 A. And then how does Leapfrog respond to the
4 issues raised in the statement. That's what they
5 asked.

6 Q. All right. If you look at -- in the
7 e-mail chain, Bates ending in 1050, you write
8 June 4, 2025, to members of CURA Strategies,
9 Alexander [sic] Campione, Nate Longmore, and
10 Karen Jupiter.

11 You write, in the middle of your e-mail,
12 Leah is out until Tuesday. I'm not sure that
13 this warrants her needing to do a statement.
14 We'd like to keep this out of the press as much
15 as possible.

16 Why did you want to keep this out of the
17 press as much as possible?

18 A. It's not standard practice that we
19 publicize F grades.

20 Q. Okay. Is this -- is this publicizing an
21 F grade? Is that what is at issue here?

22 A. I mean, the original story that we're

1 talking about in this, from Huntsville Hospital,
2 is a story just about one F-hospital, and that's
3 not something that we proactively will pitch.
4 Our pitches are typically -- our priority is
5 focused on promoting positive stories,
6 A-hospitals.

7 Q. Okay. Even in response to a statement, a
8 public statement, from the hospital?

9 A. Can you restate your question?

10 Q. Yeah.

11 So even where the hospital has made a
12 public statement -- right? -- challenging its
13 grade and the process --

14 MS. BLAIR: Objection to form.

15 BY MR. CHUNG:

16 Q. -- you wanted to -- well, let me put it
17 another way.

18 What is the "this"? When you read that
19 sentence, We'd like to keep this out of press as
20 much as possible.

21 Right? So there's no -- I don't think
22 this is referring to a proactive press effort on

1 this issue. But how -- why did you want to keep
2 this out of the press as much as possible?

3 A. Just from my memory, specifically we just
4 didn't want more stories about F-hospitals in the
5 news.

6 Q. Okay. Did you -- was it keeping stories
7 about F-hospitals out of the news or was it
8 keeping stories out of the hospitals challenging
9 their hospital safety grades out of the news? Or
10 both?

11 A. From what I remember, it was the first,
12 keeping the -- like, our focus is not the
13 F-hospitals. We didn't want more stories in the
14 press about F-hospitals.

15 Q. Okay. Now, you suggested that, in
16 response, that the focus should be on how the
17 hospital is now going to participate in the
18 Leapfrog survey.

19 Do you see that?

20 A. Yes.

21 Q. Do you have an understanding as to why
22 where the hospital -- here, Huntsville

1 Hospital -- has called the Leapfrog survey not an
2 accurate measure of patient safety and that the
3 process is unfair -- do you have an understanding
4 as to why the hospital would now agree to commit
5 significant resources to complete the survey?

6 MS. BLAIR: Objection to form.

7 BY MR. CHUNG:

8 Q. Why is it doing that?

9 MS. BLAIR: Same objection.

10 THE WITNESS: I don't know why they're
11 doing the survey. They put in their statement
12 they're going to do the survey. I only know
13 what's written on this paper.

14 BY MR. CHUNG:

15 Q. All right. Fair to say that they're
16 feeling coerced into completing the survey?

17 MS. BLAIR: Objection to form.

18 THE WITNESS: I wouldn't say that, no.

19 BY MR. CHUNG:

20 Q. Have you gotten any sort of feedback from
21 hospitals that they feel like they're being
22 coerced into the survey because of this

1 methodology change?

2 A. Not that I can recall.

3 Q. Okay.

4 MR. CHUNG: Let's go to tab 60.

5 BY MR. CHUNG:

6 Q. Actually, before we go there, let's go --
7 we have another document relating to this
8 Huntsville, Alabama -- Huntsville Hospital.

9 A. Okay.

10 MR. CHUNG: And this will be Exhibit 30.
11 (Bailey Deposition Exhibit 30 marked for
12 identification and attached to the
13 transcript.)

14 BY MR. CHUNG:

15 Q. Now, relatedly, Ms. Bailey, Exhibit 30 is
16 an article I believe from AL.com as a follow-up
17 to this exchange regarding the Huntsville
18 Hospital.

19 Just let me know if you've seen it
20 before.

21 A. Yeah, that's what it looks like.

22 Q. Okay. And you'll see that it's based on

1 an interview with the Huntsville Hospital CEO
2 Jeff Samz; is that right?

3 A. Yes.

4 Q. And you'll see on the third page of the
5 document, in the middle of the page, he's quoted,
6 Now, because of the coercive nature of Leapfrog
7 creating a false score that is going to coerce
8 our hospital into completing a survey, I'm going
9 to take resources that could be used for patient
10 care or doing something productive and I'm going
11 to have to dedicate them for months to fill out a
12 survey. So publishing a score that is, by the
13 way they do it, low creates a false perception of
14 the safety of the organizations that don't
15 participate in the survey.

16 Does this refresh your recollection as to
17 why the Huntsville Hospital decided eventually to
18 fill out the survey?

19 A. I don't know that they have done the
20 survey. I only know what we're reading. I don't
21 have any other context.

22 Q. Okay. So this doesn't refresh your

1 recollection as to why they decided to eventually
2 submit to the survey?

3 A. I don't know if they do do the survey
4 today, and I don't know anything besides what
5 we're reading.

6 Q. Okay. So you've never -- you haven't
7 seen this article before?

8 A. I have seen this article. I'm just
9 saying I don't know anything beyond what we're
10 reading in this.

11 Q. Okay. Do you know whether there have
12 been any discussions with the Huntsville
13 Hospital -- with the CEO or other members of the
14 staff about their decision to respond to the
15 survey eventually?

16 A. I don't know, actually.

17 Q. Okay.

18 MR. CHUNG: Let's move on to 60. So this
19 will be Exhibits 31 and 32.

20 (Bailey Deposition Exhibits 31 and 32
21 marked for identification and attached to
22 the transcript.)

1 BY MR. CHUNG:

2 Q. All right. Ms. Bailey, Exhibits 31 and
3 32 are an e-mail chain and then an article that's
4 referenced in that e-mail chain arising from an
5 e-mail with a healthcare reporter in Cleveland
6 about another hospital disputing its spring 2025
7 hospital safety grade.

8 And I want to direct you first to the
9 e-mail from Julie Washington from Cleveland.com.

10 A. Yes.

11 Q. And this is on Bates ending 7440.

12 She addresses you, Hi, Lauren. I am a
13 healthcare reporter at the Cleveland Plain Dealer
14 and Cleveland.com, and I'm wanting to -- and I'm
15 writing about the spring Leapfrog grades. A
16 local hospital leader made the statement below,
17 and I wanted to run it past you because it
18 doesn't align with an explanation from Leapfrog's
19 CEO Leah Binder that I saw in Becker's. Can you
20 please clarify?

21 So -- it looks like Ms. Washington
22 excerpts from a statement from a local hospital

1 leader: In the past, Leapfrog carried forward
2 past responses for hospitals that did not fill
3 out a survey. Now, the safety nonprofit will no
4 longer carry four-year-old scores, and they
5 basically assign you the lowest ranking of the
6 people who completed the survey.

7 Do you recall, at least generally, this
8 discussion?

9 A. Yes. I remember generally.

10 Q. Okay. Now, what -- the second document,
11 so Exhibit 32, is the -- what we understand to be
12 the Becker's article that Ms. Washington is
13 alluding to. Okay? And it quotes Ms. Binder.

14 Do you see that?

15 A. Yes. I'm just reading it.

16 Q. In the fourth paragraph down it says --
17 or she says, We use the Leapfrog data when we
18 have that data. We impute scores for the data
19 when we don't have it. I think that the measures
20 that the hospitals are concerned about are four
21 out of the 30 measures we use in the hospital
22 safety grades.

1 Do you see that?

2 A. Yes.

3 Q. Okay. Is this the statement the reporter
4 was referring to as not aligning with what she
5 was hearing from the hospital?

6 A. I'd assume so. She's quoted one more
7 time in the next page.

8 Q. Okay.

9 A. Or two more times.

10 Q. Have you -- it sounds like you've
11 interacted with this reporter before, who's a
12 healthcare reporter for the Cleveland Plain
13 Dealer. Am I right?

14 A. Most likely. We talk to a lot of
15 reporters, so I don't remember specifically. But
16 Cleveland.com is an outlet that covers Leapfrog.
17 Yes.

18 Q. Okay. So if the healthcare reporter here
19 thought that these statements did align -- I
20 mean, what's your view as to whether ordinary
21 consumers or patients would think? Wouldn't they
22 also believe that these statements didn't align?

1 MS. BLAIR: Objection to form.

2 THE WITNESS: I don't know what the first
3 statement is that we're comparing. I don't see
4 what the first statement is.

5 BY MR. CHUNG:

6 Q. The first statement from -- the excerpt
7 from the hospital itself. At the bottom --

8 A. Where?

9 Q. -- of Bates ending 7440.

10 A. 7440?

11 Q. Yes.

12 A. Oh, this (indicating)?

13 Q. Correct. Yeah. Below the...

14 A. I mean, that's not accurate, what the
15 hospital said. We do still use past scores; it's
16 just a different time period.

17 Q. Right. That's if -- that's with respect
18 to step 1 of the imputation methodology, correct?

19 A. Right. That's what it looks like the
20 hospital is referring to, is step 1.

21 Q. Okay. But what -- doesn't this actually
22 refer to step 2, actually?

1 MS. BLAIR: Objection to form.

2 BY MR. CHUNG:

3 Q. If your old scores aren't applicable
4 under step 1, the hospital is assigned a lowest
5 ranking of all the hospitals who complete the
6 survey, correct?

7 A. I mean, to me, it sounds like this
8 hospital is confused. They didn't know that
9 step 1 was still in place.

10 I'm not sure. I don't know what the
11 hospital meant.

12 Q. Okay. Ms. Washington is asking you,
13 though -- she's observing that it does not align
14 with Ms. Binder's explanation, correct, in
15 Becker's.

16 A. That's what she's saying. Yes.

17 Q. Okay. So do you agree with her that the
18 two statements did not align?

19 MS. BLAIR: Objection to form.

20 THE WITNESS: I mean, I agree that the
21 hospital seems to be confused.

22

1 BY MR. CHUNG:

2 Q. Okay. How are they confused?

3 A. I just testified to that, that it seems
4 that they don't understand that the step 1 of the
5 imputation still exists.

6 Q. Okay. But is it incorrect that if --
7 that, in step 2, hospitals are assigned the
8 lowest possible grade or the lowest ranking of
9 the people who completed the survey?

10 A. Yeah, that's correct.

11 Q. Okay. So does that align with
12 Ms. Binder's statement from the Becker's article
13 that we use the Leapfrog survey when we have that
14 data; we impute scores for the data when we don't
15 have it?

16 Does Ms. Binder, in the Becker's article,
17 say anything about assigning those non-reporting
18 hospitals the lowest possible score?

19 A. Not in the quote, but I'm -- like, she
20 very well might have said it in an interview. We
21 can't control what pieces the reporter decides to
22 quote.

1 Q. Understood. But in what was published in
2 the article, it's not mentioned at all, it's not
3 disclosed at all, by Ms. Binder that the lowest
4 possible score is assigned to those
5 non-participating hospitals on those four
6 metrics, correct?

7 A. She didn't quote that part, but like I
8 said, Leah very well could have said it. We
9 can't control what a reporter reports.

10 Q. Do you know if she did?

11 A. I don't know. I don't staff her
12 interviews. You'd have to ask her.

13 Q. Okay. So the hospital -- so I think your
14 testimony is that the hospital at issue here is
15 confused about the methodology; is that right?

16 A. That's what I -- that's how I read it.
17 And that's how I read it at the time, too.

18 Q. Going back to one of my questions
19 earlier: If a hospital is confused about the
20 methodology, do you expect consumers -- isn't it
21 fair to say that consumers would be confused by
22 the methodology as well?

1 MS. BLAIR: Objection to form.

2 THE WITNESS: She's saying a local
3 hospital leader. I have no idea who this person
4 is, what their role is. They could very well
5 have the same knowledge as a consumer, so I can't
6 draw that inference.

7 MR. CHUNG: Okay. Let's go to tab 61.
8 This will be 33, Exhibit 33.

9 (Bailey Deposition Exhibit 33 marked for
10 identification and attached to the
11 transcript.)

12 BY MR. CHUNG:

13 Q. Okay. Exhibit 33 is an e-mail chain from
14 June 2024. And then you'll see a second part of
15 the document, Final updates to Leapfrog hospital
16 safety grade methodology for fall 2024.

17 Do you recognize this document?

18 A. I've seen it before. Yes.

19 Q. Okay. And what is it?

20 A. It looks like it's a draft of the final
21 updates for the safety grade methodology for fall
22 2024.

1 Q. Okay. So on the page ending Bates 0454,
2 Ms. Danforth writes to Ms. Binder, Mr. Austin,
3 and copying Alexandra Campione, Hi, Leah and
4 Matt. Alex did a great job responding to the
5 public comments we received and finalizing the
6 changes to the fall 2024 hospital safety grade
7 methodology.

8 Is that correct? Is that -- Alexander
9 [sic] Campione was responsible for responding to
10 the public comments here?

11 A. I don't know. I'm not her manager. I
12 don't know what she does. Like, I don't -- I
13 don't know.

14 Q. You don't know what she does?

15 A. Like, I don't know how they divide up
16 roles, but that's -- it looks like that's what
17 Missy said. So...

18 Q. Okay. Did you -- let's put it another
19 way.

20 As director of communications, did you
21 regularly communicate with Ms. Campione about the
22 change to the imputation methodology?

1 A. We talked about the changes. We -- not
2 that I recall we talked about the public
3 comments. That's typically separate.

4 Q. Okay. So do you know whether
5 Ms. Campione finalized the changes to the
6 imputation methodology?

7 A. I don't -- I don't know. That's what
8 this says. It looks like she proposed this draft
9 of the final changes, and they potentially
10 provided edits. I don't think I was on this
11 e-mail chain.

12 Q. Okay. Just looking at the next e-mail --
13 so Bates ending 0453 -- Ms. Binder writes,
14 responding to Ms. Danforth, Thanks, Missy and
15 Alex. This is a hard one to do.

16 Did you have an understanding as to what
17 she meant by that?

18 A. I don't know what she meant.

19 Q. Okay. Did you have any conversations
20 with Ms. Campione about this being a particularly
21 difficult project to work on? The imputation
22 methodology.

1 A. I don't -- I don't recall.

2 Q. Okay. You don't recall having any
3 conversations like that with Ms. Campione?

4 A. We talked about the messaging. Any
5 change comes with different challenges. I don't
6 recall any.

7 Q. Any change comes with -- I don't
8 understand.

9 A. Like -- can you restate your original
10 question?

11 Q. Yeah.

12 Did you have any discussions with
13 Ms. Campione about difficulties -- right? -- or
14 challenges relating to the changes to the
15 imputation methodology in fall 2024?

16 A. Yeah, I don't recall this specifically.
17 I know that anytime we're getting a final update
18 done, it can be challenging. There's a lot of
19 people you have to collaborate with, and it's a
20 big project. I think -- I mean, that's what I
21 think.

22 Q. Generally speaking? I'm asking specific

1 to this particular change in the imputation
2 methodology.

3 A. I don't know.

4 Q. You don't know?

5 A. I just said what I know.

6 Q. Okay. All right. Let's discuss the
7 lawsuit itself.

8 When did you first learn about the
9 lawsuit that's in front of us?

10 A. On April 30th.

11 Q. And was that the date the lawsuit was
12 filed?

13 A. I think so.

14 Q. Okay. How did you learn about the
15 lawsuit?

16 A. I was up late getting the website ready
17 for the safe grade launch the next morning and
18 got a call that it had been filed.

19 Q. Okay. Have you been involved in
20 Leapfrog's response to the lawsuit?

21 A. From a communications perspective, yes.

22 Q. Okay. And what do you mean by that, from

1 a communications perspective you've been involved
2 in the response to the lawsuit?

3 A. Well, in a lot of ways, there was -- we
4 needed a public relations response right away
5 because there were very aggressive lies being
6 told by, actually, your firm in the media, and we
7 needed to reply right away. So that was a public
8 relations concern.

9 Q. Okay. So what specific things did you do
10 as part of that effort?

11 A. We that evening, from my recollection,
12 put a short statement up on the website. The
13 next day we did a more detailed statement when we
14 had a little more time.

15 We reached out to local reporters with
16 publicly filed -- your publicly filed complaint.

17 Q. Anything else?

18 A. That's what I can recall right now.

19 Q. Okay. Who else has worked with you on
20 this response to the lawsuit from a
21 communications perspective?

22 MS. BLAIR: I'm going to just object to

1 the extent any of your communications involved
2 lawyers. But you can answer it to the extent it
3 did not involve communications with lawyers.

4 MR. CHUNG: Yes.

5 THE WITNESS: Can you repeat the
6 question?

7 BY MR. CHUNG:

8 Q. Yes.

9 Who else has worked with you on this
10 response to the lawsuit from a communications
11 perspective?

12 A. Generally, CURA Strategies. Leah Binder
13 has been involved. Missy Danforth, Karen
14 Jupiter.

15 Q. Okay. And has the -- and CURA
16 Strategies, am I correct that they have been --
17 that they were Leapfrog's PR consultant even
18 before this lawsuit?

19 A. Yes. We've been working with them for a
20 few years.

21 Q. And what role does CURA Strategies serve
22 in the context of the response to the lawsuit?

1 A. They manage the majority of our media
2 relations. So in this case, they did the same.
3 They did some research on what the local media is
4 like in the area and sent our statement and your
5 clients' complaint.

6 Q. Okay. Do you remember whose idea it was
7 to hire CURA in the first place? I'm not talking
8 about with respect to the lawsuit, but just going
9 back to when they first were hired.

10 A. It was a joint decision. I -- we did an
11 RFP. We do RFPs every three to four years with
12 our PR firms. This is the third firm I've worked
13 with since I've been at Leapfrog.

14 Q. And what were the other two -- so there
15 were two predecessor public relations firms that
16 Leapfrog worked with before CURA Strategies?

17 A. Yes.

18 Q. Okay. And which firms were those?

19 A. The Stern Group was the first one when I
20 first started. And then JPA Health
21 Communications. And now CURA Strategies.

22 Q. So why did you move on from those two

1 other PR firms to CURA Strategies?

2 A. For Stern, they were hired before I
3 started at Leapfrog. It's very normal for a
4 comms manager to start and to choose a new firm.
5 So I, as soon as I got comfortable with my job,
6 did an RFP and chose a firm that I thought would
7 meet our needs more.

8 With JPA, there was a lot of staff
9 turnover at the agency, very normal for PR firms.
10 They weren't meeting our needs. Decided to do an
11 RFP. Chose CURA Strategies.

12 Q. Okay. And you've testified that you've
13 worked with CURA Strategies for a few years now.

14 Is it since 2023?

15 A. Yes. Yes.

16 Q. Okay. So you've worked -- so CURA
17 Strategies has been the only PR consultant since
18 2023 for Leapfrog; is that correct? Have there
19 been any other PR consultants that you've worked
20 with during that time?

21 A. Not that I can recall.

22 Q. Okay. So do you have a sense of how much

1 Leapfrog has paid CURA Strategies since 2023
2 while they've been the PR consultant?

3 A. We pay them about \$1500 a month as a
4 retainer.

5 Q. Okay. Does --

6 A. Sorry, I meant 15,000. Is that what I
7 said?

8 MS. BLAIR: No. You said --

9 THE WITNESS: Sorry. 15,000 is how much
10 we pay.

11 BY MR. CHUNG:

12 Q. Okay. So is it just -- over the last two
13 or so years, is it correct that Leapfrog has
14 spent about \$400,000 on CURA Strategies?

15 A. I'm not great at mental math, but that
16 seems correct.

17 Q. Okay. And then, going forward, do you
18 have a budget for how much you're spending on
19 CURA Strategies?

20 A. In our budget, it's still the 15,000 a
21 month.

22 Q. Okay. And for 2025 and 2026, is it

1 accurate that Leapfrog has budgeted about
2 \$180,000 for CURA Strategies?

3 A. Per year?

4 Q. For 2025 to 2026. Yes.

5 A. Per year, that seems right.

6 Q. Okay. So that roughly translates to
7 about the \$15,000 per month kind of retention
8 arrangement you have with CURA Strategies?

9 A. Correct.

10 Q. Okay. How would you describe -- you
11 testified that you've been involved in the
12 communications aspect -- right? -- of responding
13 to the lawsuit.

14 How would you describe Leapfrog's
15 communication strategy regarding the lawsuit?

16 MS. BLAIR: Objection to form.

17 Also, to the extent it calls for any
18 attorney-client communications, do not reveal
19 those. But to the extent it calls for -- you can
20 answer that without revealing conversations your
21 attorney, you need to answer.

22 MR. CHUNG: Yup.

1 BY MR. CHUNG:

2 Q. I'm not interested in conversations with
3 counsel.

4 A. Right.

5 Q. But how would you describe that -- the
6 communication strategy of the organization
7 regarding the lawsuit.

8 A. I think our public statement on our
9 website is a great example of what our strategy
10 is, which is just to counter the false claims in
11 the complaint and to stand -- that we stand
12 behind our missions, that we are transparent,
13 that we are accurate.

14 Q. Okay. Has Leapfrog sought to promote
15 negative publicity regarding the five plaintiff
16 hospitals?

17 A. To counter false claims that we were
18 attacked with.

19 Q. Okay. And how have you gone -- how have
20 you achieved that, promoting negative publicity
21 about the five plaintiff hospitals?

22 MS. BLAIR: Objection to form.

1 THE WITNESS: I wouldn't say that -- can
2 you say it again?

3 BY MR. CHUNG:

4 Q. Yes.

5 How have you gone about doing that,
6 promoting negative publicity regarding the five
7 plaintiff hospitals?

8 MS. BLAIR: Same objection.

9 THE WITNESS: I wouldn't say negative
10 publicity. I mean, we've said -- we promote the
11 statement that's on our website, which is just
12 reiterating that these are the grades, that they
13 are poor grades. We stand behind our
14 methodology. You know, click on the safety grade
15 link and see their full grade.

16 BY MR. CHUNG:

17 Q. And that is -- that's just on the
18 website, correct?

19 A. Yes. It's a statement on the website and
20 we direct press to that.

21 Q. Okay. Any other measures that you have
22 taken with respect to promoting negative

1 publicity about the plaintiff hospitals in
2 response to the lawsuit?

3 MS. BLAIR: Objection to form.

4 THE WITNESS: We ran some Google ads.

5 BY MR. CHUNG:

6 Q. Can you tell us about that?

7 A. We have a Google ad grant, and we
8 regularly have, I'd say, like, 170-ish Google ads
9 running at a time, and we change them up,
10 depending on what's going on. Usually, because
11 of what we do, we want people to be searching
12 their local hospital ratings.

13 So it's normal for us for about, I'd say,
14 half or more of those Google ads to be directly
15 linking to hospitals' survey results or safety
16 grade results. So we had -- for just a couple of
17 the months, we had five of those running towards
18 the plaintiff hospitals.

19 Q. Okay. And how was that -- so just to be
20 clear, this Google ad strategy was if -- can you
21 just kind of go step by step what you had Google
22 do with respect to the strategy?

1 A. We have a -- Nonprofit Megaphone is the
2 one that administrates -- administers the ads.
3 But as far as my knowledge goes, it's just a
4 direct link to the safety grades for the five
5 hospitals.

6 Q. Okay. How do -- when does this direct
7 link show up, according to the strategy,
8 according to what you're describing?

9 A. I don't know. I assume -- I'm not a
10 Google ad expert, so we have a contractor who
11 works on it.

12 From my understanding, it's when you
13 Google the hospital, I think.

14 Q. So when you run a Google search for one
15 of the hospital names, the hospital safety grade
16 will show up? How does it work exactly?

17 A. From my understanding, in Google ads,
18 you'll see "sponsored," and you can click on it.
19 So it would say, Leapfrog hospital safety grade.

20 Q. So upon a Google search for one of the
21 plaintiff hospitals, a sponsored advertisement
22 linking to that particular hospital's hospital

1 safety grade will show up for the person running
2 the search, correct?

3 A. Yeah, not every person, but yes.

4 Q. What do you mean by not every person?

5 A. Like, if you look at the analytics, I
6 think five people saw it, so clearly it's not
7 every person. I hope -- I mean, I think there's
8 more than five people searching for these
9 hospitals. So...

10 Q. Okay. Who -- so who was responsible --
11 kind of who was tasked with devising Leapfrog's
12 communication strategy regarding the lawsuit?

13 A. Can you restate the question?

14 Q. Yeah.

15 Who was tasked? Was there a specific
16 person that was tasked with putting together
17 Leapfrog's strategy regarding the lawsuit?

18 A. I'd say me. It's my primary responsible.

19 Q. Okay. How was Leah Binder involved in
20 it, if at all?

21 A. She's involved in almost everything at
22 Leapfrog.

1 Q. Okay. So how was she involved in the
2 communication strategy?

3 A. Approving it. Giving input.

4 Q. Okay. Was it also approved by Leapfrog's
5 board?

6 A. The board usually doesn't get involved in
7 these kinds of things, but the board knew what we
8 were doing.

9 Q. Okay. Did they know that you were
10 engaging in this Google ads strategy as well?

11 A. I'm not sure. It's a very, very small
12 part of what we've been doing. It wasn't the
13 focus. It was just one tiny part of it.

14 Q. Okay. So the question is, was the board
15 aware of this Google ad strategy?

16 A. I don't know. They don't know
17 everything -- we don't tell them every single
18 thing we are doing. That would be way too much
19 information.

20 Q. Okay.

21 A. But we give them in our quarterly
22 reports, which I believe you've seen, we give

1 Google ad and Google analytics information.

2 Q. Okay.

3 MR. CHUNG: Let's go to tab 30. This
4 will be Exhibit 34.

5 (Bailey Deposition Exhibit 34 marked for
6 identification and attached to the
7 transcript.)

8 BY MR. CHUNG:

9 Q. Exhibit 34 is an e-mail chain from
10 March of 2025.

11 What's being discussed here with
12 Ms. Jupiter?

13 A. I don't remember. I don't remember this.

14 Q. In the first sentence you write that you
15 looked at articles that Ms. Jupiter sent you; is
16 that right?

17 A. That's what I said. Yes.

18 Q. Okay. Do you have an understanding as to
19 why Ms. Jupiter was sending these articles to
20 you?

21 A. I don't remember this. Let me read it.

22 Q. Okay. Take your time.

1 A. I don't remember this.

2 Q. Okay.

3 A. Looking at the time frame, it looks like
4 it may have had something to do with the letter
5 sent from your client.

6 Q. What do you mean by that?

7 A. Just looking at the time frame in March,
8 that I know that there were letters sent.

9 I wasn't involved in it, but I know that
10 a lot of these things were referenced in the
11 complaint letters.

12 Q. So are these -- are these articles, are
13 these references to instances in the past when
14 hospitals or other parties had criticized or
15 challenged Leapfrog's hospital safety grade
16 system?

17 MS. BLAIR: Objection to form.

18 THE WITNESS: I think that they were --
19 it looks it me that they were things that, yeah,
20 your firm brought up in the complaint, in the
21 letters.

22

1 BY MR. CHUNG:

2 Q. Okay. And how generally did -- how
3 generally did Leapfrog respond to these types of
4 complaints?

5 MS. BLAIR: Objection to form.

6 THE WITNESS: I don't understand the
7 question.

8 BY MR. CHUNG:

9 Q. How did -- with respect to all these
10 prior instances of hospitals challenging or
11 complaining about the hospital safety grades,
12 what was Leapfrog's general strategy of
13 responding to these complaints?

14 A. I mean, these are ten -- eight, ten very
15 unique situations. There isn't a -- like, we
16 handle everything on a case-by-case basis. I...

17 Q. How were they very unique situations?

18 A. We're talking about eight different
19 instances. We're -- like, they're all different
20 bullets. There's no connection that I see.

21 Q. Okay. But how are they -- why do you say
22 that they're very unique? What about them makes

1 you say that they're very unique?

2 A. They're different. Like, we're talking
3 about a study, talking about a report. And I
4 don't have any of the attachments, I can't tell
5 you specifics on these. I don't remember all of
6 these.

7 Q. Okay.

8 A. Mission Hospital, which we mentioned
9 earlier...

10 Q. So you don't have a recollection as to
11 why Ms. Jupiter was collecting and sending you
12 these articles?

13 A. I don't remember.

14 Q. Okay.

15 MR. CHUNG: Let's go on to 32. This will
16 be Exhibit 35.

17 (Bailey Deposition Exhibit 35 marked for
18 identification and attached to the
19 transcript.)

20 MR. CHUNG: Let's do 33 as well, the
21 talking points.

22

1 (Bailey Deposition Exhibit 36 marked for
2 identification and attached to the
3 transcript.)

4 BY MR. CHUNG:

5 Q. So Exhibit 35 and 36, we have got an
6 e-mail chain with Ms. Jupiter sending updated
7 talking points to regional leaders -- right? And
8 then Exhibit 36 are the talking points
9 themselves.

10 Do you recognize these documents?

11 A. Yes.

12 Q. All right. Why are talking points about
13 the lawsuit being sent to Leapfrog's regional
14 leaders?

15 A. In my understanding, we wanted them to be
16 informed in case they had questions.

17 Q. Okay. What's in those talking points?

18 A. Really nothing different than what's in
19 our public statement on our website.

20 Q. Okay.

21 A. It's just organized a little differently.

22 Q. Can you just tell us what's in the

1 talking points?

2 A. Sure. Starts with top-line messaging.
3 We talk about hospital-specific performance. And
4 then a section countering false claims.

5 Q. All right. So the top line, I think,
6 is -- the top-line message is, We encourage you
7 to focus on the very poor performance of these
8 hospitals on patient safety, first and foremost,
9 correct?

10 A. Oh, you're reading the --

11 Q. Yeah, the talking points --

12 A. The preamble?

13 Q. -- Exhibit 36.

14 Do you see that?

15 A. Yes, I see that.

16 Q. Okay. And you are -- above that you say
17 that We prefer you to avoid talking directly to
18 the press about the lawsuit. Instead, you may
19 direct them to Lauren -- to you.

20 Why did you express a preference to have
21 them avoid talking directly to the press about
22 the lawsuit?

1 A. Just standard operating procedure for us.

2 Q. And why is that standard operating
3 procedure? Is that standard operating procedure
4 specific to the regional leaders?

5 A. For the regional leaders, yes. I mean,
6 they don't know everything about Leapfrog and
7 they really only know what their coalition does.
8 So that's just standard operating procedure for
9 press. We always prefer that they direct them to
10 us.

11 Q. Okay. Now, turning to the second bullet
12 point under the countering false claims -- this
13 is on the second page, Bates ending 6116 --
14 you'll see there that Hospital participation in
15 the Leapfrog hospital survey has no automatic up
16 or down impact on a hospital's safety grade.

17 Do you see that particular bullet point?

18 A. Yes.

19 Q. All right. But doesn't declining to
20 participate in the survey automatically drop four
21 of the metrics down to the limited achievement
22 score?

1 MS. BLAIR: Objection to form. Asked and
2 answered.

3 THE WITNESS: Yeah, I've already talked
4 about this. No, it -- I stand by the statement,
5 it doesn't have an automatic up or down impact.
6 A hospital could do the survey and score the
7 same.

8 BY MR. CHUNG:

9 Q. That's not my question.

10 So my question was, doesn't declining to
11 participate in the survey automatically drop four
12 of the metrics down to the limited achievement
13 score?

14 A. No, it's not automatic. Because if
15 they -- if they had the data and they scored
16 that, it would be...

17 Q. That's --

18 A. I don't understand the question.

19 Q. No.

20 My question is, for hospitals that do not
21 participate in the survey -- right? -- aren't
22 their scores on the four imputed metrics

1 automatically assigned the limited achievement
2 score?

3 A. For those four --

4 Q. Yes.

5 A. -- not for the entire safety grade.

6 Q. That's been my question. For those
7 four --

8 A. Okay.

9 Q. -- imputed metrics.

10 A. Yes, for its four imputed metrics.

11 Q. Okay. So with respect to this bullet
12 point here that you're asking the regional
13 leaders to basically disseminate, is it accurate
14 to say that hospital participation or
15 non-participation in the survey has no automatic
16 up or down impact on a hospital's safety grade?

17 A. Yes. I already said yes. We stand by
18 these.

19 Also, we're telling them, do not talk to
20 people. This is just giving them background
21 information.

22 Q. Okay. Would you agree that

1 non-participation in the survey at least raises
2 the risk of that hospital getting a lower overall
3 hospital safety grade?

4 A. Possibly. As I've testified before,
5 there are hospitals that get As that don't do the
6 survey.

7 Q. Okay.

8 MR. CHUNG: Let's go to tab 34. This
9 will be Exhibit 37.

10 (Bailey Deposition Exhibit 37 marked for
11 identification and attached to the
12 transcript.)

13 BY MR. CHUNG:

14 Q. So it's an e-mail chain from May of 2025,
15 and it looks like CURA Strategies, a Lula
16 Hailesilassie, is attaching a day one coverage
17 report from the hospital safety grade
18 announcement.

19 Do you see that?

20 A. Yes.

21 Q. Okay. And then you, responding to -- or
22 forwarding this to Ms. Binder, Flagging this in

1 case you didn't see it. There hasn't been
2 anything new today on the lawsuit that we've seen
3 in the press.

4 Do you see that?

5 A. Yes.

6 Q. Okay. And Ms. Binder responds, Thanks,
7 Lauren. This coverage is great. Let's make a
8 goal to have one story at minimum every three
9 days about Tenet or one of the hospitals.

10 Now, you forward that message to
11 Ms. Jupiter with just an ellipses, dot-dot-dot.

12 What did you mean by that?

13 A. From what I can recall, like, we need to
14 talk about this.

15 Q. To Ms. Jupiter?

16 A. Yes.

17 Q. What do you mean by -- what did you need
18 to talk about?

19 A. Just I had never heard Leah say this
20 before. So -- she's my boss. I want to talk to
21 her about it.

22 Q. What about this directive did you need to

1 talk about, making it a goal to have one story at
2 a minimum every three days about Tenet or one of
3 the hospitals?

4 A. Just that it was something that Leah said
5 and we hadn't discussed the strategy and I wanted
6 to talk to my boss about it. That -- I...

7 Q. Did you have concerns about what Leah was
8 directing you to do?

9 A. I don't think I understood. And we
10 didn't do it, so...

11 Q. I'm not asking whether it eventually
12 happened or whether you eventually did it.

13 But did you have concerns about what Leah
14 was directing you to do here?

15 A. I didn't understand the goal of it.
16 This -- I can't recall exactly what -- this week
17 was incredibly stressful for us.

18 Q. Okay. So you didn't understand the goal
19 of it.

20 Did Ms. Jupiter share that concern about
21 what the goal of having this many stories was?

22 A. I don't recall this specific conversation

1 that we had. I only recall the outcome.

2 Q. Did you raise your question with Leah as
3 to what the goal of this strategy was?

4 A. I'm sure I did. I don't remember
5 exactly. Like I said, I only remember the
6 outcome.

7 Q. Okay. Not asking about the outcome.
8 Right?

9 What do you remember about discussions
10 you had with Ms. Binder about this strategy? And
11 the strategy, to be specific, is what she's
12 directing you to do here, right? One story -- at
13 least one story every three days about Tenet or
14 one of the hospitals.

15 A. From what I remember about the
16 conversation, the follow-up conversations we had,
17 understanding what she meant from it was simply
18 that we needed to do what we could to counter all
19 the false claims that were out there. We didn't
20 know what else was coming. We saw Mary Beth
21 Maloney saying a lot of very untrue things in the
22 press. We didn't know what else was planned.

1 Leah wanted to make sure we had a plan
2 and that we could defend ourselves.

3 That's what she meant, in my
4 understanding.

5 Q. So how was having one story at minimum
6 every three days about Tenet or one of the
7 hospitals consistent with that, with what you
8 just described?

9 A. I mean, I'd say just, again, getting our
10 side out there. And to me, it was about the
11 safety grades. I mean, if you look at our
12 statement, that's the very first thing, we stand
13 behind our safety grades, here's a link to them,
14 making sure the press locally know what the
15 safety grades were.

16 Q. Okay. Did you talk to Ms. Jupiter about
17 Ms. Binder's request after you had forwarded this
18 e-mail?

19 A. I really -- I don't remember the
20 specifics.

21 Q. I understand. But a moment ago you
22 didn't remember your discussions with -- anything

1 about your discussions with Ms. Binder, but then
2 you actually described them later on.

3 So can you give another shot at trying to
4 remember discussions with Ms. Jupiter about this?

5 MS. BLAIR: Objection to form.

6 THE WITNESS: I told you I remembered the
7 outcome, and the outcome was that discussion I
8 just explained. And that's all I remember.

9 BY MR. CHUNG:

10 Q. Okay. What kinds of stories? So the
11 directive here is to have one story at minimum
12 every three days about Tenet or one of the
13 hospitals, right?

14 A. That's what it says.

15 Q. All right. What about Tenet and/or the
16 hospitals did Ms. Binder want stories about every
17 few days?

18 A. I don't recall. We didn't do it, so I --
19 I don't know what she meant, specifics.

20 Q. Okay.

21 MR. CHUNG: Let's go to tab 35. This is
22 Exhibit 38.

1 (Bailey Deposition Exhibit 38 marked for
2 identification and attached to the
3 transcript.)

4 BY MR. CHUNG:

5 Q. So this is an e-mail chain from June 3rd,
6 2025 -- or May and June 2025.

7 And in the top e-mail, Ms. Bailey, to
8 Ms. Jupiter, there is a section about the lawsuit
9 itself, correct?

10 A. Correct.

11 Q. We've also been proactively pitching
12 updates around the Tenet Healthcare lawsuit to
13 national and local press to own the narrative.

14 Do you see that?

15 A. Yes.

16 Q. Okay. So these are outreaches to
17 national and local press outlets proactively to
18 give them updates, correct?

19 A. It's what I testified to before, that we
20 were sending the complaint and our statement.
21 Again, in this situation, we're being attacked by
22 a large healthcare system. We're a very small

1 nonprofit. We're doing anything we can to defend
2 ourselves and our reputation because this is a
3 huge reputational risk for us.

4 Q. Right. So what you just testified to now
5 and earlier were basically reactive strategy,
6 right? Reactive outreaches to press outlets to
7 counter what you're alleging are falsehoods,
8 correct?

9 A. Correct. Depends on how you look at it.

10 Q. So -- but here, what you're describing to
11 Ms. Jupiter are proactive pitching updates around
12 the Tenet Healthcare lawsuit to all these press
13 outlets to own the narrative.

14 A. Right.

15 Q. Do you see that?

16 A. Yes.

17 Q. So this is -- fair to say that this is a
18 different, but complementary strategy to the
19 reactive measures that you described?

20 A. It's the same strategy. I think it just
21 depends on how you look at it. We're at a
22 disadvantage when we're the ones being sued and

1 we're the ones being attacked in the press.

2 And so yes, I could see how you could see
3 that you might think it's reactive. But when I
4 use this word, proactive, what I remember is that
5 we wanted to send the complaint and countering
6 the false claims to reporters before we got a
7 reactive question from them.

8 Does that make sense?

9 Q. So what were you -- so you sent them the
10 complaint and the Leapfrog statement.

11 What else were you sending to these press
12 outlets in this proactive approach?

13 A. That's all I recall. Just anything
14 that's publicly filed.

15 Q. Okay. You're saying here that you're
16 proactively pitching updates around the Tenet
17 Healthcare lawsuit to national and local press.

18 What were these updates?

19 A. Anything that's publicly filed in the
20 suit.

21 Q. Okay. So can you give us -- can you kind
22 of outline for us what those updates were?

1 A. I am not a lawyer, so I don't know these
2 terms.

3 Q. I don't think you have to have a lawyer.

4 A. There was a -- well, there are. There
5 are documents that were filed by you, your firm.

6 Q. Okay.

7 A. So --

8 Q. So what were those --

9 A. Preliminary injunction. I remember that
10 one.

11 Q. Yeah.

12 A. I don't remember the rest of them.

13 Q. Okay. In addition to providing
14 filings -- right? -- from the lawsuit, were you
15 supplying these -- the national and local press
16 outlets with any other information or commentary
17 on the filings?

18 A. Leah did some interviews.

19 Q. Okay. How was -- just looking at the
20 second part of this sentence, you're pitching --
21 proactively pitching updates to own the
22 narrative.

1 How was Leapfrog trying to own the
2 narrative? What was this referring to?

3 A. Just a standard PR term. Again, in the
4 situation we're in, we're in the disadvantage.
5 We're the ones being sued. We're the ones being
6 attacked in the press. We're a very small
7 nonprofit. Our strategy was to do what we could
8 to own the narrative, to stand up for ourselves,
9 to show that we are transparent.

10 Q. Okay. How were -- what was the narrative
11 that you were trying to own?

12 A. That our safety grades are transparent
13 and accurate; we're not pay to play.

14 Q. Okay. Was part of that -- was part of
15 that -- did you include in that narrative how
16 non-participating hospitals are assigned their
17 safety grades?

18 A. I don't recall. I don't think so.

19 Q. Okay. Was that, I think in your words
20 earlier, too detailed to be included in the
21 narrative?

22 MS. BLAIR: Objection to form.

1 THE WITNESS: That wasn't the story that
2 we were pitching.

3 BY MR. CHUNG:

4 Q. Okay. Because it was inconvenient to
5 your story, correct?

6 MS. BLAIR: Objection to form.

7 THE WITNESS: No. We're pitching the
8 story that your firm is attacking our small
9 nonprofit that's trying to do a public service.
10 That's the story we're pitching.

11 BY MR. CHUNG:

12 Q. Okay. But as part -- what you're calling
13 an attack, wasn't that an attack on Leapfrog's
14 methodology for arriving at safety grades for
15 non-participating hospitals? Wasn't that part of
16 what you're calling the attack on Leapfrog?

17 A. The attack I'm referring to is what
18 Mary Beth Maloney did in the press.

19 Q. Okay. But I'm asking you, wasn't the
20 attack that you're alleging that you were
21 responding to -- right? -- part of that attack
22 was a criticism or a challenge to Leapfrog's

1 methodology for non-participating hospitals;
2 isn't that correct?

3 A. I mean, your complaint was over 50 pages
4 long. We're not going to outline every single
5 thing in it, but we attached it, shared it with
6 reporters proactively.

7 Q. Okay. I'm asking you to respond to my
8 question. All right?

9 Wasn't the criticism or challenge to the
10 methodology for non-participating hospitals part
11 of what you're calling the attack on Leapfrog?

12 MS. BLAIR: Objection to form. Asked and
13 answered.

14 THE WITNESS: It was one of the elements
15 in this 50-plus page complaint. Yes.

16 BY MR. CHUNG:

17 Q. Okay. And it wasn't part of your
18 narrative to comment -- to even comment on that
19 criticism of the methodology, correct?

20 MS. BLAIR: Objection to form.

21 THE WITNESS: It wasn't our primary
22 focus.

1 BY MR. CHUNG:

2 Q. Okay. And is it fair to say that it
3 wasn't part of your primary focus because it was,
4 in fact, a valid criticism of -- of the
5 methodology?

6 MS. BLAIR: Objection to form.

7 THE WITNESS: No.

8 MR. CHUNG: Okay. Let's go to 36.

9 Tab 36.

10 This is Exhibit 39.

11 (Bailey Deposition Exhibit 39 marked for
12 identification and attached to the
13 transcript.)

14 BY MR. CHUNG:

15 Q. Ms. Bailey, Exhibit 39 is an e-mail
16 exchange with CURA Strategies, and it includes a
17 meeting agenda with Leapfrog and CURA.

18 Do you see that?

19 A. Yes.

20 Q. All right. And on that agenda, there are
21 a handful of items.

22 The Tenet lawsuit coordination, what is

1 that referring to?

2 A. What we just talked about, the press
3 strategy.

4 Q. Okay. And underneath that it looks like
5 kind of an indentation: Patient story.

6 What is that referring to?

7 A. We, at the time -- so May 8th -- again,
8 this was the first week of the lawsuit. We were
9 really trying to figure out what our strategy
10 was, what was going on. We were considering
11 looking at patient stories. We had several
12 patients reach out to us with stories. We were
13 looking into that. We didn't pitch any to press
14 at this time.

15 Q. Okay. So this particular bullet point or
16 this idea did not come to fruition eventually?

17 A. Not at this time.

18 Q. Okay. And why not?

19 A. We just decided not to pursue it right
20 now.

21 Q. Understood that you decided not to pursue
22 it. But why not?

1 A. We just -- we just didn't do it. I
2 don't -- there were so many things going on at
3 this time, it just didn't -- it was not the
4 priority anymore.

5 Q. Were there not enough patient stories to
6 support that project?

7 A. No, that's not it.

8 Q. Were the --

9 A. We just -- sorry, go ahead.

10 Q. Were the patient stories not what you
11 were looking for in terms of this strategy?

12 A. No. We were just brainstorming
13 strategies and decided to not go with that one.

14 Q. Okay. The second kind of indented point
15 is paid media campaign.

16 What is that referring to?

17 A. The Google ads.

18 Q. Okay. The Google ads that you were
19 testifying to earlier where the hospital safety
20 grades for the five hospitals pop up upon a
21 search for those hospitals?

22 A. Correct.

1 Q. Okay. Any other aspects of a paid media
2 campaign that this included?

3 A. Not that I can recall.

4 MR. CHUNG: Let's go to tab 37. This
5 will be Exhibit 40.

6 (Bailey Deposition Exhibit 40 marked for
7 identification and attached to the
8 transcript.)

9 BY MR. CHUNG:

10 Q. Okay. This is a series of Slack messages
11 between yourself, Ms. Jupiter, and Nate Longmore
12 from May 12 of 2025.

13 A. Yes. I vaguely remember this.

14 Q. Okay. What's being discussed here?

15 A. I believe we were on the call -- a call,
16 and we were discussing the Google ads.

17 Q. Okay. And you write -- or Ms. Jupiter
18 writes up top, She has no clue how this works.

19 Who is the "she" she's referring to?

20 A. I think Leah. She doesn't know how
21 Google ads work.

22 Q. Okay. So just to be specific, what is

1 she referring to? What does Ms. Binder have no
2 idea -- has no clue about how what works?

3 MS. BLAIR: Objection. Form. Asked and
4 answered.

5 THE WITNESS: Yeah, I just said. The
6 Google ads -- she doesn't understand how Google
7 ads work.

8 BY MR. CHUNG:

9 Q. What is she not understanding about it?

10 A. She doesn't understand, like, how they
11 work. Like, just generally how they work.

12 Q. Okay. What did you -- you responded with
13 this emoji on the next line. What did you mean
14 by that emoji?

15 A. I don't know. It was a really stressful
16 call. I send a lot of emojis. I can't even tell
17 what it is.

18 Q. Okay. And Ms. Jupiter next asks, Why,
19 though? What would be the point?

20 And you responded, I don't get it.

21 And you note, further below, I'm afraid
22 to ask.

1 What did you not get?

2 A. I don't recall everything about this
3 conversation. There was back and forth about
4 what we would do with Google ads. I...

5 Q. Okay. Were you expressing that you did
6 not get or you did not understand what Ms. Binder
7 was trying to achieve with this Google ads idea?

8 A. That's what it looks like. Yeah.

9 Q. Okay. And what were you afraid to ask?

10 A. I don't remember.

11 Q. Okay. Why were you afraid to ask?

12 A. I don't remember.

13 Q. Now, further down, you wrote that Leah
14 said she wants to know if we can do ads where, if
15 someone searches those five hospitals, it shows
16 an ad with their safety grade URL and says they
17 have an X grade.

18 Why did Ms. Binder want to know if we can
19 do ads where, if someone searches those five
20 hospitals, it shows an ad with their safety grade
21 URL? Why did she want to know about this?

22 A. I was just recapping to Nate what she had

1 said because his WiFi was unstable, so it's just
2 what I testified to before.

3 Q. Yeah, but why did Leah want to know about
4 this?

5 MS. BLAIR: Objection to form.

6 THE WITNESS: Can you restate the
7 question?

8 BY MR. CHUNG:

9 Q. Yeah.

10 So you wrote, Leah said she wants to
11 know -- right? -- if we can do ads -- I'm not
12 going to repeat everything, but just this
13 line here.

14 Why did she want to know this?

15 A. She wanted us to do it.

16 Q. Okay. Did Ms. Binder want to further
17 publicize the hospital safety grades?

18 A. I already testified to what we did the
19 Google ads for. But again, at this time, we were
20 being attacked in the press. And we're a small
21 nonprofit. Trying to figure out what resources
22 we have.

1 Q. So my question was, did Ms. Binder want
2 to further publicize the plaintiff hospitals'
3 safety grades through this Google ads proposal?

4 A. Yes. We want to publicize the safety
5 grades.

6 Q. Okay. And was the purpose of that, a
7 further publicizing the plaintiff hospitals'
8 safety grades, to show more people the safety
9 grades that had been assigned to these plaintiff
10 hospitals?

11 A. I think more than anything it was just
12 feeling like there was something that we could do
13 in the midst of feeling attacked, and this was
14 something we could do. Got five clicks. Not
15 like a ton of people saw the ads.

16 Q. But putting aside kind of the result
17 here -- right? -- was the idea behind tying these
18 safety grades to the Google ads was to get the
19 maximum possible impact?

20 MS. BLAIR: Objection. Form.

21 THE WITNESS: Can you restate the
22 question?

1 BY MR. CHUNG:

2 Q. Were you trying to reach as many people
3 as possible in publicizing the hospital safety
4 grades of these hospitals?

5 A. Clearly, we weren't, since we got five
6 clicks, it wasn't, like, we put a lot of effort
7 towards it, so no.

8 Q. I'm not talking about the results.
9 Right? But was the goal here to reach as many
10 people as possible?

11 A. I don't think so.

12 Q. Okay. Then what was the goal here?

13 A. I don't know what the goal was. That's
14 what this whole Slack conversation is about.

15 Q. All right. Did you think this was a good
16 idea?

17 A. At this point, like I said, this was a
18 super-stressful meeting. It was a very stressful
19 couple of weeks. I'm one of two communications
20 persons dealing with all of this stuff. Like, I
21 was just trying to figure out my life in general
22 at this point.

1 Q. Ms. Binder [sic], that's not responsive.
2 Did you think that this was a good idea?

3 MS. BLAIR: Objection to form.

4 THE WITNESS: Ms. Bailey.

5 BY MR. CHUNG:

6 Q. Ms. Bailey. I'm sorry.

7 Did you think that this was a good idea?

8 A. I didn't think it would make an impact,
9 no.

10 Q. Okay. What did Ms. Jupiter think about
11 this idea?

12 MS. BLAIR: Objection to form.

13 THE WITNESS: She doesn't understand
14 Google ads, so she -- I mean, it's clear in the
15 Slack conversation she had no idea what was going
16 on.

17 BY MR. CHUNG:

18 Q. Okay. Let's go to the next page of the
19 Slack messages. This is Bates ending 1321.
20 Okay? And there's a continuing discussion, it
21 looks like, of this Google ads idea.

22 And at 2:36 p.m., Ms. Jupiter writes, So

1 she just wants to harass them?

2 And Mr. Longmore responds, I love that
3 the strategy is to become a Disney villain.

4 Is the "she" here Ms. Binder that they're
5 referring to?

6 A. Yes. I think Karen was trying to figure
7 out what she was saying.

8 Q. Okay. And is the "them" the plaintiff
9 hospitals?

10 A. I assume so, yes.

11 Q. Okay. Was that the view -- was that your
12 view, that Ms. Binder was -- just wanted to
13 harass the plaintiff hospitals by having their
14 hospital safety grades pop up with Google
15 searches?

16 A. My view is that we were trying to do what
17 we could to defend ourselves.

18 Q. I'm talking about specifically with this
19 idea. Right? With the -- with the Google
20 results.

21 Was it your view that this was just a
22 measure to just harass the plaintiff hospitals?

1 A. No, I don't think so.

2 Q. Okay. So it wasn't -- it looks like it
3 was Ms. Jupiter's view that this was a form of
4 harassment; is that right?

5 A. She was --

6 MS. BLAIR: Objection to form.

7 BY MR. CHUNG:

8 Q. Is that --

9 A. She wasn't asking. I don't think she --
10 she wasn't saying that she was harassing them.
11 She was asking what is the strategy; what is she
12 saying? That was my interpretation of her
13 message.

14 Q. Okay. In discussions -- putting aside
15 the Slack messages, did Ms. Jupiter express to
16 you that she believed that this strategy was just
17 harassment of the hospitals?

18 A. No. I don't remember her saying that.

19 Q. Okay. Now, Mr. Longmore writes, I love
20 that the strategy is to become a Disney villain.

21 What did Nate mean here?

22 MS. BLAIR: Objection.

1 BY MR. CHUNG:

2 Q. Or Mr. Longmore.

3 MS. BLAIR: Objection to form.

4 THE WITNESS: Nate, he's just making a
5 joke. He -- that's kind of his mood in the
6 office. He just tries to lighten the mood. We
7 were extremely stressed out these weeks, and
8 that's just -- it's a normal -- he just makes
9 jokes.

10 BY MR. CHUNG:

11 Q. Okay. Do you agree that, with this
12 Google results strategy, that Leapfrog was
13 responding to this lawsuit by becoming a Disney
14 villain? Did you agree with this sentence?

15 MS. BLAIR: Objection.

16 THE WITNESS: No. I knew it was a joke.
17 Like, that's how I read it. I read it as a joke.

18 BY MR. CHUNG:

19 Q. Okay. But it follows Ms. Jupiter's
20 comment that she was wondering whether Ms. Binder
21 just wanted to harass the hospitals -- right? --
22 with this Google ads idea; is that right?

1 A. Yes. He sent it right after.

2 MR. CHUNG: Let's go to tab 39. This
3 will be Exhibit 41.

4 (Bailey Deposition Exhibit 41 marked for
5 identification and attached to the
6 transcript.)

7 THE WITNESS: Can I ask the time? I'm
8 just curious how much time has passed.

9 VIDEO TECHNICIAN: 5 hours and 49
10 minutes.

11 THE WITNESS: Thank you.

12 BY MR. CHUNG:

13 Q. Okay. Exhibit 41 is an e-mail chain
14 involving Nonprofit Megaphone. I think you
15 testified to it earlier, but what is Nonprofit
16 Megaphone?

17 A. They're a vendor that administrates our
18 Google ads.

19 Q. Okay. And just looking through this
20 e-mail chain, is this a discussion about how
21 Nonprofit Megaphone is helping you use the grant
22 from Google for nonprofits?

1 A. Can you restate the question?

2 Q. Yes. Is this a discussion about how
3 Nonprofit Megaphone is helping Leapfrog use a
4 grant from Google for nonprofits?

5 A. Yes. It's about our Google ads.

6 Q. Okay. So what is -- I want to direct
7 your attention to -- so what exactly are the
8 services that Nonprofit Megaphone provides to
9 Leapfrog? What do they do for you?

10 A. We tell them what we want to promote, and
11 they develop and administer the Google ads based
12 on the money we get from Google every month as
13 part of our grant.

14 We can only publicize our website.
15 That's what we do.

16 Q. Okay. Turning your attention to Bates
17 ending in Leapfrog 1876.

18 A. Okay.

19 Q. You'll see there's an e-mail from you to
20 Noah Shelgren at Nonprofit Megaphone and others.

21 There's a list of what looks like ZIP
22 codes -- right? -- and cities and states.

1 What's the purpose of all of this?

2 A. It looks like we are geotargeting these
3 markets.

4 Q. Okay. So this is a way for -- this is a
5 list of markets that -- what is -- what do you
6 mean by geotargeting markets?

7 A. Just what I said in my e-mail, that it
8 was the -- so the Google ads that we have been
9 discussing --

10 Q. Right.

11 A. -- would just go to these specific
12 markets.

13 Q. Okay. And so when you look at the
14 preceding page, Bates ending in Leapfrog 1875,
15 Mr. Longmore's e-mail to Noah, he writes, We'd
16 also like to set it up so that, when someone
17 searches for any of the five specific hospitals,
18 it shows an ad displaying their hospital safety
19 grade.

20 Do you see that?

21 A. Yes.

22 Q. And this is kind of the proposal or the

1 idea that we've been discussing so far, correct?

2 A. Yes.

3 Q. Okay. And then the five plaintiff
4 hospitals are listed there?

5 A. Yes.

6 Q. Okay. Now, Mr. Shelgren responds, Hi,
7 Nate -- and this is going on to Bates ending in
8 1874 -- I believe we should be able to do this.
9 It's possible that Google might flag specific
10 hospital names, but as far as I know, this
11 wouldn't break any of the regulations for the
12 grant.

13 What do they mean by that?

14 MS. BLAIR: Objection to form.

15 THE WITNESS: I'm actually not sure
16 because we do regularly run links to specific
17 hospitals' ratings, so I'm actually not sure.

18 BY MR. CHUNG:

19 Q. Okay. How much in the Google grant money
20 has Leapfrog spent on the response to this
21 lawsuit?

22 A. For the Google grant?

1 Q. Yes.

2 A. Does it say in here? Not a lot. Looks
3 like 75 percent impressions and five clicks.
4 That's very, very low in comparison to the rest
5 of our ads.

6 I don't know what that equates to in
7 dollars.

8 Q. Okay.

9 MR. CHUNG: Let's move on to tab 50.

10 BY MR. CHUNG:

11 Q. Okay. Before, actually, we go into the
12 document, we discussed earlier about the board
13 meetings.

14 How often does Leapfrog's board of
15 directors meet?

16 A. Quarterly.

17 Q. And do you help prepare materials for
18 these board meetings?

19 A. Sometimes I help prepare the
20 communications updates as part of Leah's CEO
21 reports.

22 Q. And do you attend the meetings?

1 A. Yes. I take minutes during the meetings.

2 Q. So every quarterly board meeting, you're
3 there taking minutes at the meetings, correct?

4 A. Unless I am out for some reason. Yes.

5 Q. Okay. Do you ever present at the
6 meetings?

7 A. Not usually.

8 Q. All right. In the case -- in the
9 instances that you do, what do you typically
10 present on?

11 A. I don't recall having a specific
12 presentation. Typically, I'm just there to take
13 minutes.

14 Q. Okay.

15 MR. CHUNG: So I -- this will be
16 Exhibit 42.

17 (Bailey Deposition Exhibit 42 marked for
18 identification and attached to the
19 transcript.)

20 BY MR. CHUNG:

21 Q. So Ms. Binder, this is a document --
22 Ms. Bailey, this is a document that was produced

1 to us. It had a file name, board notes for
2 ME 6/25.

3 We don't have a parent e-mail or anything
4 that this was attached to.

5 But with that said, is this document
6 familiar to you?

7 A. Let me read it.

8 Q. Sure. And I can represent that this
9 document, actually, came from your custodial
10 files.

11 A. Okay. Yes, it looks like it's maybe
12 pasted from an e-mail with counsel.

13 Q. Okay. So is this document familiar to
14 you?

15 A. Not immediately.

16 Q. Okay. Did you participate in drafting
17 this document?

18 A. I don't remember this document.

19 I don't know where this document
20 originated from, but --

21 Q. Okay. Does the document, just reading
22 through the document, refresh your recollection

1 as to whether you presented at any board -- at a
2 board meeting regarding communication strategies?

3 A. We did have a special meeting with the
4 board about the lawsuit with counsel.

5 Q. Okay. So I'm just going to focus on a
6 few items here.

7 So under the -- on the first page, Bates
8 ending 21, there's a slide 2. Right? Do you see
9 that?

10 A. Yes.

11 Q. Up top. It reads, Our overall goal is to
12 make it clear to all hospitals that Leapfrog will
13 not compromise or back down. We will make it
14 painful for Tenet by drawing further attention to
15 their very poor performance with strategic media
16 coverage in local and national press?

17 Do you see that?

18 A. Yes.

19 Q. Okay. Is it correct to say that
20 Leapfrog's use of the Google advertisements was
21 part of this plan to make it painful for the
22 plaintiff hospitals?

1 A. That's -- no, that's not what we said.
2 We're talking specifically about media coverage
3 in this.

4 Q. Okay. So media coverage does not include
5 the Google advertisement strategy?

6 A. I wouldn't include that as part of media
7 coverage.

8 Q. All right. But the media coverage
9 itself, does that include the efforts to put out
10 a story about Tenet or one of the plaintiff
11 hospitals at minimum every three days? Is that
12 part of the strategy to make it painful for the
13 hospitals?

14 A. That didn't -- that wasn't our strategy.
15 That's just something that was brought up in an
16 e-mail.

17 Q. Right. But was that the intent of that
18 strategy, to make it painful for the hospitals?

19 A. Again, we're being attacked by Tenet
20 Healthcare, one of the biggest systems in the
21 country. We're a small nonprofit. So we're
22 trying to defend ourselves. That's what this

1 means to me.

2 Q. But would you agree here -- right? --
3 that the intent behind that strategy was to make
4 it painful for Tenet by drawing further attention
5 to their very poor performance?

6 MS. BLAIR: Objection to form.

7 THE WITNESS: Again, we're just defending
8 ourselves.

9 BY MR. CHUNG:

10 Q. Okay. Can you just respond to the
11 question?

12 Is this an accurate description of the
13 media strategy, to make it painful for Tenet and
14 the plaintiff hospitals?

15 MS. BLAIR: Objection to form. Asked and
16 answered.

17 THE WITNESS: I mean, that's what's
18 written.

19 BY MR. CHUNG:

20 Q. Okay. Do you recall -- many of these --
21 of what's -- much of what's in this document
22 seems to correspond to slides.

1 Do you remember preparing a slide
2 presentation that corresponds to these comments?

3 A. Vaguely. Again, this looks like it's
4 referring to a meeting that we had with counsel.

5 Q. Now, when we move -- if we go to the
6 third page of the document -- this is Bates
7 ending 2158, Ms. Bailey -- it reads, Here's an
8 overview of what's next for our media strategy.
9 Leah wrote an op-ed about an experience she had
10 with her grandmother at Delray, one of the
11 hospitals in the suit, in 2014 when they had an A
12 grade. We are actively pitching this to local
13 press now.

14 Were you involved in putting together
15 that op-ed?

16 A. Leah wrote it, I edited it, and Kara
17 pitched it.

18 Q. Okay. Next, we will file our motion to
19 dismiss, as Kim mentioned, this week and will
20 share that with reporters.

21 And then, the third paragraph there is,
22 Leah and Karen van Caulil are visiting Jupiter

1 Medical Center, which is a straight-A-hospital in
2 the area, with some of Karen's employer members.
3 We will pitch some in-person media interviews for
4 Leah while she's in town.

5 That particular paragraph, who is Karen
6 van Caulil?

7 A. She's on our board and she's our regional
8 leader for Florida.

9 Q. All right. And Jupiter Medical Center,
10 is that one of the hospitals in the same market
11 or similar market as the five plaintiff
12 hospitals?

13 A. To my understanding, yes.

14 Q. Okay. So it's one of the kind of
15 competitor hospitals to at least one of the
16 plaintiff hospitals; is that right?

17 MS. BLAIR: Objection to form.

18 THE WITNESS: I don't know who the
19 competitor hospitals are, but I know it's in the
20 area.

21 BY MR. CHUNG:

22 Q. Okay. And so this is under an overview

1 of what's next for the media strategy.

2 How was this visit by Ms. Binder and
3 Ms. van Caulil to Jupiter Medical Center part of
4 the media strategy related to the lawsuit?

5 MS. BLAIR: Objection to form.

6 THE WITNESS: This didn't end up
7 happening -- sorry, what was the question?

8 BY MR. CHUNG:

9 Q. My question is, putting aside whether it
10 happened or not --

11 A. Right.

12 Q. -- right? -- how was this visit by
13 Ms. Binder and Ms. van Caulil to Jupiter Medical
14 Center part of the media strategy in response to
15 the lawsuit?

16 MS. BLAIR: Objection to form.

17 THE WITNESS: I testified before that,
18 generally, our strategy for media is we prefer to
19 talk about improvement, positive stories. This
20 is a positive story in the market. So --
21 counteracting some negative stories.

22

1 BY MR. CHUNG:

2 Q. Were there negative stories about Jupiter
3 Medical Center that you were trying to counteract
4 as part of the lawsuit?

5 A. Oh, no, that's not what I meant. I meant
6 the other stories in the market are all about D-
7 and F-hospitals.

8 Q. Okay. So how was a visit to Jupiter
9 Medical Center part of this media strategy
10 related to the lawsuit?

11 MS. BLAIR: Objection to form.

12 THE WITNESS: We were going to pitch it
13 to -- it says right here, we're going to pitch it
14 to press that we're going to Jupiter Medical
15 Center.

16 BY MR. CHUNG:

17 Q. I understand that's what it says. But
18 why? Why was a visit to Jupiter Medical Center
19 part of the media strategy for responding to the
20 lawsuit?

21 MS. BLAIR: Objection to form.

22 THE WITNESS: Like I said before, we --

1 our strategy was to tell a positive story in the
2 market.

3 BY MR. CHUNG:

4 Q. Okay. Was the purpose here to highlight
5 Jupiter Medical Center and to steer patients or
6 consumers away from the plaintiff hospitals?

7 A. No.

8 Q. Okay. So I'm going to ask again: What
9 was the purpose, in the context of the lawsuit,
10 of Ms. Binder and Ms. van Caulil visiting Jupiter
11 Medical Center --

12 MS. BLAIR: Objection to --

13 BY MR. CHUNG:

14 Q. -- and pitching in-person media
15 interviews there?

16 MS. BLAIR: Objection to form. Asked and
17 answered.

18 THE WITNESS: Just to highlight a
19 straight-A-hospital.

20 BY MR. CHUNG:

21 Q. Okay. So by highlighting a
22 straight-A-hospital -- in this case, not just any

1 straight-A-hospital; Jupiter Medical Center,
2 competitor hospital to plaintiff hospitals --
3 what other reason is there, as it's relevant to
4 the media strategy, than to dissuade consumers
5 from going to the plaintiff hospitals?

6 A. I don't think, and I never thought, that
7 them going to Jupiter Medical Center would
8 dissuade patients or persuade them.

9 Q. So what was the purpose of, in your
10 words, highlighting Jupiter Medical Center in the
11 context of this media strategy?

12 MS. BLAIR: Objection to form. Asked and
13 answered.

14 THE WITNESS: To display a hospital that
15 has a straight-A and -- in the area and that does
16 well in the -- on the safety grade.

17 BY MR. CHUNG:

18 Q. Right. To -- that does well on the
19 safety grade in contrast -- right? -- to how the
20 five plaintiff hospitals did on their hospital
21 safety grade; is that correct?

22 MS. BLAIR: Objection to form.

1 THE WITNESS: No, we weren't going to
2 pitch that contrast story, no.

3 BY MR. CHUNG:

4 Q. What other purpose can there be, then, in
5 the context of the media strategy for this
6 litigation?

7 A. That's what we decided -- like, that --
8 we didn't do it, but that was what we wanted to
9 do. We were looking for any other types of
10 stories in the market. This was a
11 straight-A-hospital. Something we could talk
12 about to get Leapfrog's name out in local press.
13 It's not about the reputation of another
14 hospital. It's about Leapfrog's reputation.

15 Q. Okay. And it just so happens you're
16 focusing on a hospital that is a direct
17 competitor of certain of the plaintiff hospitals;
18 is that right?

19 A. Again, Mary Beth Maloney was attacking
20 Leapfrog in that market. We're looking for ways
21 to show Leapfrog's reputation. One way, by
22 telling a positive story in the market.

1 Q. Okay.

2 MR. CHUNG: Let's go to tab 51 and 52.

3 All right. This will be Exhibits --
4 let's go with the e-mail first -- 43 and 45. 43
5 and 44.

6 (Bailey Deposition Exhibits 43 and 44
7 marked for identification and attached to
8 the transcript.)

9 BY MR. CHUNG:

10 Q. All right. So Ms. Bailey, Exhibits 43
11 and 44 are an e-mail as well the Leah Binder
12 op-ed in the Palm Beach Post I think that you
13 alluded to earlier -- or that we were discussing
14 earlier.

15 A. Yes.

16 Q. And I think you testified that you helped
17 at least edit this op-ed; is that right?

18 A. Yes.

19 Q. And whose idea was it to do this op-ed?

20 A. Leah's.

21 Q. And why was the Palm Beach Post selected
22 for placement of the op-ed?

1 A. There aren't that many outlets in Palm
2 Beach. It's just the one that accepted op-eds.

3 Q. Okay. And in your e-mail, you write that
4 you think that the Palm Beach Post is the good
5 target for this since they are so hyper-local.

6 Do you see that?

7 A. Yes.

8 Q. Why was being hyper-local a good thing
9 for purposes of placing this op-ed?

10 A. Again, healthcare is local. So if we're
11 talking about a hospital, we want to place it in
12 that market.

13 Q. What do you mean by healthcare being
14 local? Why is that important?

15 A. Generally, people aren't traveling from
16 different markets to go to a hospital. So...

17 Q. Okay. So because healthcare is local,
18 meaning that generally people are not traveling
19 long distances to visit hospitals, the purpose
20 of -- is it correct that placing it in the Palm
21 Beach Post, the goal was reach local consumers;
22 is that right?

1 A. Yes.

2 Q. Okay. And to get Leapfrog's message
3 about the lawsuit to those local consumers in the
4 Palm Beach area, correct?

5 A. Yes.

6 Q. All right. And to -- and these are
7 consumers -- this is a relevant universe of
8 consumers of the five plaintiff hospitals,
9 correct?

10 A. Can you restate the question?

11 Q. Right.

12 This is the universe of consumers that
13 are going or not going to the five plaintiff
14 hospitals, correct?

15 A. It's Palm Beach, so I assume yes.

16 Q. Okay. And that -- not only for these
17 five plaintiff hospitals but for Jupiter Medical
18 Center as well, correct?

19 A. We don't talk about Jupiter in this, but
20 I assume that --

21 Q. That they're in this market, correct?

22 A. I think they are.

1 Q. They're in the market covered by the Palm
2 Beach -- by the Palm Beach Post here?

3 A. I don't know that for sure. I know that
4 they're close. I don't know Florida geography.

5 Q. Okay. So in the course of drafting
6 this -- the op-ed, was discussing or talking
7 about Leapfrog's change in imputation methodology
8 ever discussed as a possibility?

9 A. No. Leah drafted this independently. I
10 just looked at the draft that we see in this
11 e-mail here.

12 Q. Okay. Did you have -- did you ever
13 propose to or suggest to her maybe we should
14 disclose or be transparent about the imputation
15 methodology in your op-ed?

16 A. We never really talked about her op-ed.
17 She said she wanted to write an op-ed. She wrote
18 it and she sent it to me. We didn't have
19 conversations prior to this e-mail that I recall.

20 Q. Okay. So was the -- was one of the
21 purposes of the op-ed to basically impact the
22 reputation of the plaintiff hospitals here within

1 the Palm Beach market?

2 A. I don't see it that way. I see it as,
3 again, we're getting our side of the story out.

4 Q. Right. But do you see -- but is it fair
5 to say that at least one of the impacts of this
6 op-ed is to affect the reputation of the
7 plaintiff hospitals? Is that fair to say?

8 A. I mean, I don't think so. She talks
9 about how they -- how Delray Medical Center had
10 an A; her own grandmother went there. So I don't
11 think that's a reputation.

12 Q. Right. But she also focuses on the
13 performance -- right? -- of these hospitals; is
14 that right?

15 A. Right.

16 Q. Right. So by focusing on the
17 performance, isn't at least one of the potential
18 impacts of that focus to impact the reputation of
19 the plaintiff hospitals?

20 A. Maybe. I mean, the sole focus is
21 promoting Leapfrog.

22 Q. Okay.

1 MR. CHUNG: Let's go to -- actually,
2 we've been going a while. Why don't we take a
3 short break and come back.

4 THE WITNESS: Okay.

5 MR. CHUNG: So off the record.

6 MS. BLAIR: The time is 4:47 p.m. This
7 ends media 4. We're off the record.

8 (A recess was taken.)

9 VIDEO TECHNICIAN: The time is 5:02 p.m.
10 This begins unit number 5. We're on the record.

11 (Bailey Deposition Exhibit 45 marked for
12 identification and attached to the
13 transcript.)

14 BY MR. CHUNG:

15 Q. All right. Ms. Bailey, you have
16 Exhibit 45 already in front of you. It is a --
17 e-mails exchanged between Ms. Van Caulil and Leah
18 Binder regarding Ms. Binder's plan to visit
19 Jupiter Hospital.

20 Do you see that?

21 A. Yes.

22 Q. Okay. I want to direct your attention to

1 the second page Bates ending Leapfrog 8771.

2 And Ms. Binder writes here, We are
3 thinking of reaching out to Jupiter Medical
4 Center to see if they'd give a tour to me, and
5 hopefully you and some of your members. They are
6 a straight-A-hospital and happen to be in Palm
7 Beach County. Do you know them at all?

8 Do you see that?

9 A. Yes.

10 Q. Okay. And this is in May of 2025, right?
11 After the launch of the lawsuit; is that right?

12 A. Yes.

13 Q. Okay. And as we saw earlier in the
14 exhibit regarding the board presentation, a
15 potential visit, or at least the visit and media
16 strategy around Jupiter Medical Center, was part
17 of the PR strategy in response to the lawsuit,
18 correct?

19 A. Yes.

20 Q. Okay. And so are these discussions about
21 that particular strategy, about the potential
22 visit to Jupiter Medical Center?

1 A. Yes. It's what it looks like.

2 Q. Okay. Now, she goes on to write, The key
3 issue is keeping the safety grade in the news in
4 Palm Beach County.

5 Do you see that?

6 A. Yes.

7 Q. All right. Why was keeping the safety
8 grade in the news in Palm Beach County a key
9 issue, as Ms. Binder writes here?

10 A. Similar to what I testified to earlier,
11 that there was a lot of news in the Palm Beach
12 area. It was all focused on D- and F-hospitals.
13 We wanted a story out there about A-hospitals.

14 Q. All right. So there was a lot of -- now,
15 these -- the coverage of the D- and F-hospitals
16 in the Palm Beach market that you're referring to
17 are the plaintiff hospitals, correct?

18 A. Right. As a result to your clients
19 filing the lawsuit. Yes.

20 Q. So there was -- as you say, there was
21 some amount -- there was coverage already in the
22 market -- right? -- about the grades that had

1 been assigned to those particular hospitals,
2 correct?

3 A. Yes.

4 Q. Right. And the -- the purpose of -- the
5 purpose of this visit or this planned visit to
6 Jupiter Medical Center was because Jupiter
7 Medical Center was a, as it's written here, a
8 straight-A-hospital, right?

9 A. Yes.

10 Q. Okay. And straight-A-hospital is -- does
11 that mean that Jupiter Medical Center had
12 received a series of As over a period of time for
13 its hospital safety grade?

14 A. Yes.

15 Q. Right. And this is -- Jupiter Medical
16 Center is in the same kind of market as at least
17 some of the plaintiff hospitals, correct?

18 A. Yes.

19 MS. BLAIR: Objection to form.

20 BY MR. CHUNG:

21 Q. And so the purpose here was to
22 essentially provide a contrast -- right? --

1 between a straight-A-hospital and the D- and
2 F-hospitals that had already been covered in the
3 market, correct?

4 MS. BLAIR: Objection to form. Asked and
5 answered.

6 THE WITNESS: Right. It was to tell
7 another Leapfrog story in the market but of an
8 A-hospital.

9 BY MR. CHUNG:

10 Q. Okay. And so Leapfrog wanted to keep the
11 safety grade in the traditional news media, like
12 in the Palm Beach Post; was that part of kind of
13 the strategy here?

14 A. Right. Yes.

15 Q. All right. Is that true of the
16 online news media as well?

17 A. Yes. That's news media.

18 Q. Okay. How about social media? Was it a
19 goal here to keep the safety grade in the news as
20 it's reflected in social media?

21 A. No, that's not part of this.

22 Q. Okay. I think you had testified that one

1 of your responsibilities as communications
2 director is over social media, correct?

3 A. Yes. I oversee it.

4 Q. And what about social media do you
5 oversee?

6 A. The strategy.

7 Q. What do you mean by that?

8 A. Like, Nate Longmore does the everyday
9 posting. I don't micromanage everything he
10 posts, but we talk weekly about what's planned
11 for social media and brainstorm ideas.

12 Q. All right. Is it correct that Leapfrog
13 wanted to have people in this market or in
14 Florida talking about the Leapfrog grades on
15 social media?

16 A. I don't recall that. This is just
17 talking about media. That's what our focus --

18 Q. Just media generally; is that right?

19 A. Social -- sorry. We're talking about
20 traditional media in this.

21 Q. Okay. Was there anything that Leapfrog
22 did to try to get the plaintiff hospitals' grades

1 in the news on social media?

2 A. We posted our statement on social media.
3 That's all I can recall.

4 Q. Okay. And was the goal for other -- for
5 social media outlets or influencers or other
6 social media accounts to pick up on that posting?

7 A. No. It was to let our constituents know
8 that we're in this lawsuit.

9 Q. Okay. Are you aware that there is a
10 TikTok posting that broadcasts the hospital
11 safety grades for the plaintiff hospitals? Are
12 you aware of that TikTok posting?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: We don't deal with TikTok
15 really at all at Leapfrog, so I wouldn't --

16 BY MR. CHUNG:

17 Q. I'm not asking whether you deal with
18 TikTok. Are you aware that there's a TikTok
19 posting out there that basically broadcasts or
20 publicizes the D and F grades for the plaintiff
21 hospitals?

22 MS. BLAIR: Objection to form.

1 THE WITNESS: No, I don't recall seeing
2 it.

3 BY MR. CHUNG:

4 Q. Okay. You do realize -- I just want to
5 confirm that you realize that you're testifying
6 under oath.

7 A. Yes.

8 Q. Okay. And you're testifying that you're
9 not aware of any TikTok posting as it relates to
10 the D and F grades for these plaintiff hospitals?

11 A. Like, there might be TikToks out there,
12 but we don't have a TikTok account. We don't
13 reach out to TikTokers, so I don't -- I don't
14 understand the question.

15 Q. I'm not asking -- are you aware of any
16 TikTok postings -- right? -- that include or
17 broadcast the D and F safety grades for the five
18 plaintiff hospitals?

19 A. I don't know about the five plaintiff
20 hospitals in general. The only thing I could
21 think of that might be on TikTok is, like, the
22 really click-baity TikToks that --

1 Q. Okay.

2 A. They might pick up the safety grade, but
3 I don't --

4 Q. Are you aware of any click-bait TikTok
5 postings that have included or broadcast the D
6 and F grades for the plaintiff hospitals?

7 A. I don't recall the exact -- I mean, I
8 think -- there may have been something on TikTok.
9 I can't recall the exact TikTok. I don't -- I
10 don't understand the question.

11 Q. The question is, have you seen or heard
12 of any TikTok postings or TikTok accounts that
13 have -- that have broadcast or have mentioned the
14 D and F grades for the plaintiff safety -- the
15 plaintiff hospitals?

16 A. Have I heard of?

17 Q. Yes.

18 A. Maybe.

19 Q. Okay.

20 MR. CHUNG: Tab 64. Okay. This will be
21 Exhibit 46.

22

1 (Bailey Deposition Exhibit 46 marked for
2 identification and attached to the
3 transcript.)

4 BY MR. CHUNG:

5 Q. All right. This is an e-mail chain from
6 June of 2025. And I want to direct your
7 attention to the e-mail from Ms. van Caulil on
8 the first page where she writes, I have an
9 enthusiastic "yes" from Susan McBroom, the
10 director of human resources at Patriot Rail. She
11 serves on my board and executive committee, and
12 this year they won our "most engaged employer"
13 award. Waiting to hear back from Nancy Bolton at
14 Palm Beach Schools.

15 Do you see that?

16 A. Yes.

17 Q. Okay. And are these -- what is Patriot
18 Rail?

19 A. I don't know.

20 Q. Okay. How about Palm Beach Schools? How
21 are they relevant to Leapfrog?

22 A. It looks like they're some of the

1 employer members of the Florida Alliance for
2 Healthcare Value.

3 Q. Okay. Patriot Rail as well?

4 A. That's what it appears.

5 Q. Okay. Why was Ms. van Caulil scheduling
6 these entities to attend the planned visit to
7 Jupiter Medical Center by Ms. Binder?

8 A. It's normal. Again, Leapfrog represents
9 employers. So if we're going to a hospital,
10 typically with a regional leader, we'll have them
11 invite employer members.

12 Q. Okay. Has Ms. van Caulil been contacting
13 other Florida employers about the plaintiff
14 hospitals in particular?

15 A. I don't know.

16 Q. Okay. Is that part of -- a part of the
17 communications strategy?

18 A. Can you restate the question?

19 Q. Is part of the communications strategy in
20 the context of the lawsuit to have regional
21 leaders reach out to employers within their
22 networks about the lawsuit?

1 A. Not that I can recall about the lawsuit.

2 Q. Okay. Has Ms. van Caulil been contacting
3 other -- so was -- are there any other employers
4 within the network that Ms. van Caulil contacted
5 about possibly joining this Jupiter Medical
6 Center visit?

7 A. I don't see anything else in this e-mail.
8 I don't know anything beyond this e-mail.

9 Q. Okay. Has Leapfrog in any way broadcast
10 or shared specifically the D and F grades of the
11 plaintiff hospitals to employers within these
12 networks?

13 A. Can you restate the question?

14 Q. Yeah.

15 Has Leapfrog in any way publicized or
16 broadcast the D and F grades for the plaintiff
17 hospitals to employers within the Florida
18 network?

19 A. Not that I can recall. We have a
20 statement on our website.

21 Q. Okay. Has it engaged in any direct
22 outreach to employers in Florida within this

1 network about this lawsuit?

2 A. Not that I know of.

3 Q. Well, you're the director of
4 communications. Do you know whether that's
5 happened?

6 A. I don't know. I don't know.

7 Q. Was that part of the strategy, though? A
8 communications strategy?

9 A. No.

10 Q. All right.

11 MR. CHUNG: Let's go to tab 78.

12 Okay. This will be Exhibit 47, I think.

13 (Bailey Deposition Exhibit 47 marked for
14 identification and attached to the
15 transcript.)

16 BY MR. CHUNG:

17 Q. So Ms. Bailey, Exhibit 47 that you have
18 in front of you is -- I can represent to you that
19 this is another Slack conversation that was
20 produced to us yesterday by CURA Strategies,
21 Leapfrog's PR firm.

22 Now, do you -- are you on any Slack

1 conversations with members -- with personnel from
2 CURA?

3 A. No.

4 Q. No? Okay. So for the Slack messaging
5 that you engage in, that's all internal to
6 Leapfrog; is that right?

7 A. Yes.

8 Q. Okay. I want to direct -- this is kind
9 of a long document. I want to direct your
10 attention to the page with Bates 000466.

11 And who is Sarah Farinelli?

12 A. She's our day-to-day account lead at
13 CURA.

14 Q. Okay. And Lula -- whose name we've seen
15 a number of times -- who is Lulu?

16 A. She's another member of the team.

17 Q. And then Anne. Does that ring a bell?

18 A. Yes. She's the CEO of CURA Strategies.

19 Q. All right. How about Ariel Le?

20 A. I actually don't know her.

21 Q. Okay. So we're looking here, just based
22 on kind of the format of the document here, from

1 July 2025, going on to the next page Bates ending
2 467. I just want to turn to the next page.

3 And it says, under Anne, FYI from Lauren.
4 Hi, Anne and Sarah. We just received notice that
5 our motion to dismiss was unfortunately denied.
6 I wanted to give your team a heads-up in case you
7 receive any press inquiries. Please let us know
8 if anyone reaches out to you. We are regrouping
9 internally on Thursday afternoon and then I'll
10 follow up with any PR next steps. Best, Lauren.

11 Does this refer to an e-mail or some sort
12 of message that you sent to CURA after the motion
13 to dismiss in this case was denied?

14 A. That's what it looks like, yes.

15 Q. Okay. Do you recall sending this
16 message, at least the substance of the message,
17 just letting CURA know about the status of the
18 motion to dismiss?

19 A. Yes.

20 Q. Okay. And then Ms. Farinelli or -- Sarah
21 Farinelli responds, Crap. I was so sure it would
22 be dismissed.

1 If we look down several -- or in the
2 middle of the page, Stephanie Wright.

3 Who is Stephanie Wright?

4 A. She's another member of the team.

5 Q. Okay. And she writes, On Leah's e-mail,
6 I agree about having talking points ready, but I
7 don't know about complaining to Bloomberg. It
8 would be different if they had gone to the other
9 side for comment.

10 Do you see that?

11 A. Yes.

12 Q. And is she -- is Ms. Wright referring
13 to -- it looks like an e-mail that Ms. Binder
14 sent to CURA; is that right?

15 A. Yes.

16 Q. Okay. Do you recall this e-mail that
17 Ms. Binder sent to CURA?

18 A. Yes. Generally.

19 Q. All right. What was it about? We don't
20 have the e-mail, but what was it about?

21 A. So if you look at the Slack message right
22 before -- sorry.

1 Q. Yeah.

2 A. Yeah, so there's a story in Bloomberg Law
3 that came out and, from what I remember, Sarah
4 sent an e-mail flagging the news coverage, which
5 is normal. Anytime there's a new news story,
6 lawsuit or not, CURA will flag it to us; it's
7 part of their job responsibilities.

8 Q. Yes.

9 A. We were not contacted by Bloomberg Law.
10 So -- sometimes when there are stories that come
11 out and we weren't contacted, it can be
12 frustrating.

13 Q. Okay.

14 A. That's what I remember.

15 Q. Now, the CURA personnel here continue the
16 discussion. And Ms. Farinelli writes, What does
17 complain to Bloomberg mean? They didn't feature
18 commentary from Tenet either, just pulled from
19 the legal docs.

20 A. Uh-huh.

21 Q. Do you recall that being part of the
22 discussion with CURA around the motion to dismiss

1 coverage?

2 A. Yes. Yes. I remember more about this
3 now.

4 So I believe when Leah had sent this
5 e-mail that they're referencing, this was behind
6 a paywall, and I don't think she had seen the
7 full article. I think she just opened it and
8 read a few lines and she hadn't seen it in full
9 context and was assuming, I think, that the
10 reporter had interviewed the plaintiffs but not
11 us.

12 And I think that's what they're
13 discussing.

14 Q. Okay. So if you go on to the next page,
15 Bates ending CURA 468, Anne -- and what's Anne's
16 last name? I'm sorry.

17 A. Why am I blanking on her last name?

18 Q. That's fine. This is not a name memory
19 test.

20 A. It may come to me. I'm sorry. It's been
21 a lot of hours at this point.

22 Q. So -- Anne Woodbury.

1 A. Thank you. Thank you. I know her. I
2 just...

3 Q. So Ms. Woodbury -- I'm just trying to be
4 polite here -- she writes --

5 A. Thank you.

6 Q. -- the fact that it is Bloomberg, too, I
7 think is influencing her. She wants to hurt
8 Tenet and, to do that, she has to hit them
9 financially.

10 Do you see that?

11 A. Yes.

12 Q. All right. So after this motion to
13 dismiss was denied, is it correct that
14 Ms. Binder's goal was to hurt Tenet financially?

15 A. No, I don't agree that that was her goal.

16 Q. All right. Where is -- where is Anne
17 Woodbury getting this from, then?

18 A. I don't know. Like, I don't understand
19 the jump that happened in this Slack --

20 Q. Okay.

21 A. -- conversation.

22 Q. Well, we've gone over -- in terms of the

1 strategy of linking the D and F grades for the
2 plaintiff hospitals to Google search results --
3 right? -- wasn't the -- fair to say that at least
4 one of the purposes or goals of that strategy was
5 to hurt Tenet, correct?

6 A. Yes. Defending ourselves.

7 Q. Okay. Is it also fair to say that by --
8 is it also fair to say that the -- putting out
9 kind of negative publicity or stories -- one of
10 the purposes -- I'm not saying the sole
11 purpose -- that one of the purposes of trying to
12 get a story out about Tenet or one of the
13 hospitals at a minimum every three days was to
14 hurt Tenet? Is that fair?

15 MS. BLAIR: Objection to form.

16 THE WITNESS: Yes. We didn't do it.

17 BY MR. CHUNG:

18 Q. Okay. And is it fair to say that by --
19 at least this plan -- that one of the purposes of
20 this planned visit to Jupiter Medical Center, as
21 you said, was to highlight Jupiter, which was a
22 straight-A-hospital, correct?

1 A. Yes.

2 Q. Right. And Jupiter Medical Center is in
3 the same Palm Beach market of -- with at least
4 some of the plaintiff hospitals, correct?

5 A. Yes.

6 Q. And at least one of the purposes of that
7 planned visit was to basically provide a contrast
8 between a straight-A-hospital -- Jupiter Medical
9 Center -- and the D- and F-hospitals that were
10 the plaintiff hospitals, correct?

11 MS. BLAIR: Objection to form.

12 THE WITNESS: We were not talking about
13 the plaintiff hospitals as part of the visit.
14 No. We were just focusing on Jupiter.

15 BY MR. CHUNG:

16 Q. Okay. But would you say it's common
17 knowledge that Jupiter Medical Center and the
18 plaintiff hospitals are competitors in the Palm
19 Beach market?

20 MS. BLAIR: Objection to form. Asked and
21 answered.

22 THE WITNESS: Yes, I know that they're in

1 the same market.

2 BY MR. CHUNG:

3 Q. Okay. What is -- Leapfrog is a nonprofit
4 organization, correct?

5 A. Yes.

6 Q. All right. And it's also tax-exempt; is
7 that right?

8 A. Yes.

9 Q. All right. What is kind of the stated
10 goal of Leapfrog, consistent with this nonprofit
11 status?

12 A. Our mission is to improve American
13 healthcare through transparency.

14 Q. Okay. Do you know why it gets its
15 tax-exempt status?

16 A. Because we're a nonprofit.

17 Q. Okay. Do you -- I want to get your view
18 on this.

19 Do you think that paying a PR firm like
20 CURA Strategies to generate bad media against the
21 hospitals here is consistent with that nonprofit
22 purpose?

1 MS. BLAIR: Objection to form.

2 THE WITNESS: Our mission is to promote
3 our ratings, and we're promoting our ratings.

4 BY MR. CHUNG:

5 Q. Okay. But do you think that paying a
6 public relations firm to generate negative
7 publicity, bad media, against hospitals is
8 consistent with that purpose?

9 MS. BLAIR: Objection to form. Asked and
10 answered.

11 THE WITNESS: I don't understand the
12 question. Can you restate it?

13 BY MR. CHUNG:

14 Q. Well, I think -- what did you -- your
15 testimony regarding that -- you testified that
16 your mission, Leapfrog's mission, is to promote
17 ratings, right? You are promoting your ratings;
18 is that right?

19 MS. BLAIR: Objection to form.

20 THE WITNESS: We're promoting our
21 programs, yes.

22

1 BY MR. CHUNG:

2 Q. Okay. I think your testimony is that
3 you're promoting specifically ratings, correct?

4 A. Yes. Our programs are ratings programs.
5 Yes.

6 Q. Okay. And those ratings programs depend
7 on participation by as many hospitals as
8 possible, correct?

9 MS. BLAIR: Objection to form.

10 THE WITNESS: No. Leapfrog hospital
11 safety grades are assigned.

12 BY MR. CHUNG:

13 Q. Okay. But the -- but in terms of the
14 survey -- right? -- that depends on responses --
15 the success of the survey program depends on
16 more -- as many hospitals participating in that
17 survey as possible, correct?

18 MS. BLAIR: Objection to form.

19 THE WITNESS: Yes. We want hospitals to
20 participate in the survey.

21 BY MR. CHUNG:

22 Q. Okay. And so is generating -- is

1 generating bad media against hospitals that do
2 not participate in hospitals [sic], is that
3 consistent with that mission to get as many
4 hospitals to participate in the survey as
5 possible?

6 MS. BLAIR: Objection to form.

7 THE WITNESS: Our mission is not to
8 get -- that is not our mission. Our mission is
9 to improve healthcare through transparency.
10 We're talking about two different programs.

11 In the press we're talking -- what we're
12 talking about right now with the plaintiff
13 hospitals is the safety grade, not the survey.

14 BY MR. CHUNG:

15 Q. All right. But in order to -- I think
16 we're also talking about a survey as well. This
17 is -- these are hospitals that did not -- that
18 did not participate in the survey, correct?

19 A. Yes, but it's a different program. We're
20 not talking about the survey. We're talking
21 about the safety grade.

22 Q. When we're talking about the safety

1 grade, which context are you talking about?

2 A. You just said we're generating press
3 about the plaintiff hospitals. We're talking
4 about the safety grade.

5 Q. Right. But these are safety grades for
6 hospitals that did not participate in the survey,
7 correct?

8 A. Correct, but that's a different issue.

9 Q. And these hospitals, because they didn't
10 participate -- or at least in part because they
11 didn't participate in the survey, they received
12 the D and F grades, correct?

13 MS. BLAIR: Objection to form. Asked and
14 answered.

15 THE WITNESS: Like I've said before, we
16 don't know that their grade would change if they
17 participated in the survey.

18 MR. CHUNG: Okay. Why don't we take a
19 short break. I think we're almost done. Why
20 don't we take a short break.

21 MS. BLAIR: Okay.

22 VIDEO TECHNICIAN: The time is 5:27 p.m.

1 We're off the record.

2 (A recess was taken.)

3 VIDEO TECHNICIAN: The time is 5:32 p.m.

4 We're on the record.

5 BY MR. CHUNG:

6 Q. So Ms. Bailey, on the topic of your
7 compensation from Leapfrog, are there certain key
8 performance indicators that at least influence or
9 guide how much compensation you get from
10 Leapfrog?

11 A. Not beyond just fulfilling what's in my
12 job description.

13 Q. Okay. So just specifically, are -- you
14 know, the number of kind of views that the
15 Leapfrog websites get, is that a key performance
16 indicator or at least an indicator that you look
17 to or your supervisors or your managers look to
18 in terms of your performance?

19 A. Not in terms of my performance that I can
20 think of. We do track it and report it to the
21 board quarterly.

22 Q. Okay. Is that something that you'll look

1 to as at least one measure of -- of how the
2 communications strategy or the function of
3 Leapfrog is performing?

4 A. Yes. At least one of the aspects. Yes.

5 Q. Okay. What other kind of metrics --
6 right? -- or indicators do you track or do you
7 view as some indicator of how well the
8 communications function or strategy is working at
9 Leapfrog?

10 A. What we regularly track are social media
11 metrics, engagement rate on social media. We
12 track really basic Google analytics. By "we" I
13 mean CURA tracks that for that and reports to us
14 on a quarterly basis, which we report it to the
15 board. Really basic things like page views,
16 length of time on a page, top referral sources,
17 and then media coverage.

18 Q. Okay. And so is the goal then with
19 respect to those metrics, whether it's on the
20 webpage or social media, to increase that
21 engagement as much as possible as part of the
22 communications strategy?

1 A. Can you restate the question?

2 Q. Yeah. Is the goal with respect to the
3 metrics to increase those metrics?

4 A. Yes.

5 Q. Okay. And the -- and the idea behind
6 increasing those metrics is to reach as many
7 consumers as possible; is that the idea?

8 A. Right. We want to increase our reach.
9 Yes.

10 Q. Okay. And that includes increasing the
11 reach and impact of the hospital safety grades;
12 is that right?

13 A. Can you restate the question?

14 Q. And is part of that -- increasing the
15 reach wanting to broadcast as much as possible
16 the hospital safety grades program?

17 A. Yes.

18 Q. Okay. And as -- okay.

19 The -- I think last -- this past year,
20 your compensation was -- or your base
21 compensation was \$160,000; is that right?

22 A. Yes.

1 Q. Okay. And did you -- we understand that
2 you -- a bonus of 10 percent of that salary, of
3 \$16,000, was authorized?

4 A. Yes.

5 Q. Okay. And so what do you understand to
6 be kind of the reason for getting that bonus?
7 Why were you awarded that bonus?

8 A. My understanding is that it was just
9 always part of -- like, when I signed the
10 contract -- signed the offer letter to be a
11 director of communications, my understanding was
12 that probably most years I would get that bonus
13 as long as I did my job.

14 Q. Okay. Are you aware whether other
15 personnel, whether they're managers or executives
16 at Leapfrog, whether their compensation is tied
17 to certain metrics?

18 A. I don't know.

19 Q. Okay. So you're not aware how --
20 whether, let's say, for example, Ms. Binder's
21 compensation is tied to reaching certain
22 milestones or metrics?

1 A. I'm not sure.

2 Q. Okay. Your salary and the bonus, the
3 160,000 and the \$16,000 bonus, relatively
4 speaking, is that kind of high, mid, low for a
5 role of your type?

6 A. I'd say average.

7 Q. Average? Okay.

8 MR. CHUNG: No further questions. Thank
9 you.

10 THE WITNESS: Oh. Okay.

11 MS. BLAIR: That's it. I will order a
12 rough draft, as well as regular delivery of an
13 e-tran.

14 VIDEO TECHNICIAN: The time is 5:36 p.m.
15 This concludes today's deposition. We're off the
16 record.

17 (Whereupon, at 5:36 p.m., the videotaped
18 deposition of LAUREN L. BAILEY was
19 concluded.)

Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY.

THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

P R O C E E D I N G S

9:03 a.m.

THE VIDEOGRAPHER: Good morning. We are going on the record at 9:03 a.m. The date today is September 16, 2025. Please note that the microphones are sensitive and may pick up whispering and private conversations. Please mute your phones at this time. Audio and video recording will continue to take place unless all parties agree to go off the record.

This is media unit number 1 of the video-recorded deposition of Kushagra Banerjee, taken by counsel for the plaintiffs, in the matter of Good Samaritan Medical Center, Incorporated et al versus The LeapFrog Group, filed in the United States District Court for the Southern District of Florida, West Palm Beach Division. Case number 9:25-CV-80526-DMM.

The location of the deposition is Gibson Dunn & Crutcher LLP at 1700 M Street, Northwest, Washington, D.C. My name is Ellen Hebert, representing Veritext. I am the videographer. The court reporter is Laurie Donovan from

1 Veritext.

2 If there are any objections to proceeding,
3 please state them at the time of your appearance.
4 Counsel and all present will now state their
5 appearances and affiliations for the record,
6 beginning with the noticing attorney.

7 MR. CHUNG: Daniel Chung, Gibson Dunn &
8 Crutcher, for plaintiffs.

9 MR. DELWICHE: Noah Delwiche, Gibson Dunn &
10 Crutcher, for plaintiffs.

11 MS. WOOD: Courtney Wood, Wilson Elser, on
12 behalf of defendant LeapFrog.

13 THE VIDEOGRAPHER: Thank you.

14 Will the court reporter please swear in the
15 witness, and then counsel may proceed.

16 * * * * *

17 Whereupon,

18 KUSHAGRA BANERJEE,
19 having been first duly sworn, testified
20 upon his oath as follows:

21 EXAMINATION BY COUNSEL FOR PLAINTIFFS

22 BY MR. CHUNG:

23 Q Good morning. Could you please state your
24 full name for the record.

25 A Kushagra Banerjee.

1 Q And have you gone by any other names?

2 A I go by "Kush" --

3 Q Okay.

4 A -- day to day.

5 Q Great, and you understand that the court
6 reporter is taking down every question I ask and every
7 answer you give?

8 A Yes.

9 Q So before we start, I just want to go over a
10 few ground rules just to make things go as smoothly as
11 possible today.

12 The first is: Because the court reporter
13 cannot take down two people talking at the same time,
14 I ask you to wait until I finish my question before
15 your -- before you answer, and I'll do my best to wait
16 for you to finish your answer before I ask the next
17 question.

18 Do you understand that?

19 A Yes.

20 Q It's important that your answers are
21 audible, so an "uh-huh" or "huh-uh" are tough for our
22 court reporter to take down, so just know to, to make
23 your answers audible.

24 You, you also understand that you are
25 testifying under oath, correct?

1 A Yes.

2 Q Okay, and you understand by taking that
3 oath, you're promising to answer every question I ask
4 truthfully and to the best of your knowledge.

5 Do you understand that?

6 A Yes.

7 Q Okay. Are you taking any medications or
8 under the influence of any substance, or any reason
9 that might cause you not to understand my questions or
10 not understand what's happening today?

11 A No.

12 Q If you don't understand any of my questions,
13 please ask me to clarify it or rephrase it to
14 understand. It's important that you understand the
15 questions before you answer them.

16 Okay?

17 A Yes.

18 Q All right. From time to time, Ms. Wood may
19 object objections to questions I ask. In those
20 instances, you should answer the question unless
21 Ms. Wood instructs you specifically not to answer that
22 question.

23 Do you understand that?

24 A Yes.

25 Q Okay. You can take a break whenever you

1 want. The only ground rule with respect to breaks is
2 if there is a question pending, meaning you haven't
3 answered a question, let's wait until you answer the
4 question first before taking a break.

5 Do you understand that?

6 A Yes.

7 Q All right. Have you had your deposition
8 taken before today?

9 A No.

10 Q This is your first time?

11 A Yes.

12 Q Okay, and did you prepare for your
13 deposition in any way?

14 A Yes.

15 Q All right, and how -- just generally
16 describe how you prepared.

17 A I met with my counsel twice.

18 Q Twice, and is that with Ms. Wood, or were
19 there others?

20 A With -- yeah, with Courtney and Kim.

21 Q Okay. How many times did you meet with,
22 with your counsel?

23 A Twice.

24 Q Okay, and approximately how long did each of
25 those meetings take?

1 A Like five to eight hours --

2 Q Okay.

3 A -- each.

4 Q Did either or both of those meetings -- at
5 either or both of those meetings, were there -- was
6 there anyone else present besides yourself, Ms. Wood,
7 or Ms. Blair?

8 A Yes. The first meeting, others that were a
9 part of the, the deposition.

10 Q Okay. Who specifically?

11 A Leah Binder, Missy Danforth, Alex Campione,
12 Lauren Bailey, Karen Jupiter, Ralph Johnson, Katie
13 Stewart.

14 Q And it's your understanding -- and these are
15 all colleagues of yours from LeapFrog; is that right?

16 A Yes.

17 Q All right, and is -- was it your
18 understanding that all of those individuals were going
19 to be deposed as well?

20 A Yes. Josh Berlin was there as well.

21 Q Josh Berlin is another colleague?

22 A Josh is another colleague that was there.

23 Q And were -- and that was the first meeting
24 or second meeting?

25 A That was the first meeting.

1 Q All right, and were all of the individuals
2 that your list -- that you -- that listed there for
3 the entirety of the, the several hours?

4 A No, no. Just at the beginning and then,
5 then we met individually with Kim and Courtney.

6 Q Okay. Approximately how long did the
7 beginning of that meeting take where all of you were
8 present?

9 A Like two, three hours.

10 Q So roughly half of, half of the, of the
11 entirety of the session?

12 A Yes.

13 Q Okay. In your, in your preparation
14 sessions, did you go over any documents?

15 A Yes.

16 Q Okay. Just generally -- generally, what
17 kinds of documents did you go over?

18 A Some emails. The website. Generally emails
19 and websites.

20 Q Which website in particular?

21 A The Hospital Safety Grade website.

22 Q What about -- I understand that there's a
23 second website, The LeapFrog Group website. Did you
24 go over that website in connection with your
25 preparation?

1 A I don't, I don't know if we -- I don't know
2 if we did.

3 Q So other than meeting with counsel and a
4 number of your colleagues, did you -- how else did you
5 prepare for your deposition?

6 A That was really the extent of, of the, the
7 preparation --

8 Q Did you --

9 A -- that, that I did. That was, that was
10 the, the extent of the preparation that, that I, that
11 I did.

12 Q Did you review any documents on your own, so
13 outside of the couple meetings that you met with
14 counsel?

15 A No. I mean it was just those documents that
16 were, that were in question.

17 Q Okay, and then other than the two or three
18 hours at the beginning of the first meeting, did you
19 have any other discussions with LeapFrog colleagues to
20 prepare for your deposition?

21 A I, I spoke to Lauren and Karen briefly just
22 about how it went, and they -- I mean nothing of
23 substance, but I asked them about the deposition, and
24 they responded. I mean we didn't talk about anything
25 of substance about the deposition.

1 Q So this was -- so you spoke to Karen Jupiter
2 and Lauren Bailey after their respective depositions;
3 is that right?

4 A Yes. I just wanted to clarify. I did
5 review Karen's deposition, like the rough draft of it.
6 I, I forgot that one, that one piece.

7 Q Karen's deposition, Ms. Jupiter's deposition
8 transcript?

9 A Transcript, yes.

10 Q And was that provided to you by counsel?

11 A Yes.

12 Q Did you ask for it, or was it -- they just
13 provided it to you?

14 A It was provided to me.

15 Q Okay, and how about -- and you understand
16 that Ms. Bailey, Ms. Lauren Bailey was deposed as
17 well?

18 A Yes.

19 Q Okay. Did you -- were you provided her
20 deposition transcript?

21 A No, I was not.

22 Q And then in your -- so reviewing
23 Ms. Jupiter's deposition transcript was part of your
24 preparation as well; is that right?

25 A Yes. I, I skimmed through it.

1 Q In your discussions with -- in the
2 conversations that you had -- the conversation you had
3 with Ms. Jupiter after her deposition, I know you
4 said -- I know you testified that there was -- you
5 didn't discuss anything of substance, but what, what
6 did you discuss?

7 A I just asked her how it went, and she said
8 it went fine, and she, she just told me that she
9 mentioned me a couple times, so whenever I did get her
10 deposition, I was just kind of looking for like where,
11 where I was mentioned.

12 Q Did you discuss with her any of the topics
13 or questions that came up during the deposition, other
14 than mentions of you?

15 A Not, not really. It was, it was just how it
16 went, like, like how -- like did it go the whole time,
17 just generally about how the deposition -- I had never
18 done one before, and I was curious how that -- how it
19 worked.

20 Q Okay. How about with -- you also mentioned
21 that you had a conversation with Ms. Bailey after her
22 deposition, right? So what did you discuss with
23 Ms. Bailey?

24 A Just similar, how she was feeling and, and
25 how it went, and she mentioned the setup was similar

1 to how Karen described it. That was what, what I was
2 interested in.

3 Q Other than Ms. Bailey and, and Ms. Jupiter,
4 have you discussed your deposition with anyone else
5 from, from LeapFrog? And again other than the two or
6 three hours you spent with them at the beginning of
7 the first session.

8 A No.

9 Q Okay. Have you -- so putting aside
10 LeapFrog, folks from LeapFrog, have you discussed your
11 deposition with, with anyone else?

12 A No.

13 Q Let's go over your educational history.
14 Can you just go over your educational
15 history, undergraduate going forward.

16 A Yeah, so I went to undergrad at Washington
17 University in St. Louis, majored in biology and
18 anthropology. I completed a master's of healthcare
19 administration from the University of Pittsburgh.
20 Graduated in 2015.

21 I worked while I was doing the master's in
22 healthcare administration at a health plan, doing an
23 administrative residency program. They did manage
24 Medicare and Medicaid, and so I worked as an analyst
25 in strategic planning and new market development.

1 And then in 2015, that's when I started at
2 The LeapFrog Group.

3 Q So this was -- so is it, is it accurate that
4 your first -- well, let's actually go over your, your
5 employment history.

6 So you mentioned you worked as an, as an
7 analyst, and this was while you were in the master's
8 program at the University of Pittsburgh; is that
9 right?

10 A Yes.

11 Q Okay, and was that at -- what institution
12 did you work at?

13 A It was called Gateway Health Plan. It's now
14 called Highmark Wholecare. It's like a subsidiary of
15 Highmark Blue Cross/Blue Shield in western
16 Pennsylvania.

17 Q And when did you first become interested in
18 healthcare? Was it during college?

19 A Yes. Well, I, I've always been -- I feel
20 like I've been interested in healthcare at a young
21 age. I was pre-med and wanted some -- thinking I
22 wanted to become a doctor, so I took all those, all
23 the pre-med classes.

24 And during that -- during college, the
25 Affordable Healthcare Act was signed and put into

1 effect, and it made me kind of look, take a step back
2 and look at the healthcare industry and all the things
3 that go into -- it's not just -- it made me realize
4 it's not just about like a doctor and patient in a
5 room together. There's a lot more factors in play,
6 and there's, there's a lot of ways to make an impact.

7 So I started to explore other, other ways of
8 making an, an impact that didn't, you know, have the
9 time commitment of like going through medical school
10 and residency and the, the whole path they put you on.

11 So I, I was, I was looking at like
12 healthcare administration programs and the different
13 ways to, you know, to be involved in -- and the
14 different players that are involved, and -- in the,
15 the healthcare system, which, you know, still needs
16 fixing, but there's a, there's an opportunity --
17 there's lots of opportunities to make an impact.

18 So that's what kind of led me into the
19 healthcare administration, and when I -- even when I
20 was in that program, I realized that, you know,
21 there's health, health insurance companies and
22 providers and hospitals and ACOs, and there's lots
23 of -- there's even more nuance to it than I even
24 realized.

25 So that, that's kind of like the -- how I

1 kind of got to be -- get, get on that path, and then
2 there's been branching in paths ever, ever since.

3 Q Right. It's -- well, it's, it's certainly a
4 complex industry.

5 So while you were at Gateway Health, Gateway
6 Health Plan, what did you do there? What did your
7 role entail?

8 A So Gateway Health does managed Medicaid.
9 For like 20 years, they were in just the managed
10 Medicare space. They did dual eligibles. They're a
11 dual eligible health plan, so people that qualified
12 for Medicare and, and Medicaid, so very special needs
13 population, and were very successful in the model that
14 they set up there, but with increasing incentives for
15 being a high-quality health plan from NCQA and
16 reimbursement.

17 Medicare Advantage has continued to have an
18 increased I think footprint in the Medicare space.
19 They, they saw opportunity to take that model that was
20 successful in caring for patients and apply it to
21 Medicare Advantage, and so I -- as part of my role, I
22 was involved in some of the market research to
23 identify specific markets that would be, would be kind
24 of opportune for Gateway to consider entering, and
25 then all the logistics that go into a health plan

1 entering in a new market, to be able to even offer a
2 Medicare Advantage product.

3 So there are -- in order for a health plan
4 to offer a Medicare Advantage product, they have to
5 have contracts with hospitals and physicians, a
6 variety of different specialties, and be able to offer
7 them to the members.

8 So there's -- I call them adequacy and
9 access requirements, and one of my roles was kind of
10 like lay out like a project management system to kind
11 of coordinate the different departments and what they
12 needed so that we could do this effort, but also like
13 review some of the like provider contracts that, that
14 were -- that -- they called them like field sales
15 agents were, were going to try to contract with
16 individual hospitals and facilities and making sure we
17 have the 42 specialties that you need in order to, to,
18 to do that.

19 So it was, it was kind like a market
20 research role, and ultimately, by the end of my tenure
21 there, they were able to successfully launch into
22 three new states.

23 Q And it, and it sounds like it provided at
24 least part of a good transition to eventually what you
25 did at LeapFrog; is that right?

1 A Yeah, it was -- it's different, but it, it
2 did involve, you know, like kind of a business,
3 business development, business strategy, kind of
4 strategic thinking about taking, you know, a business
5 model that's success, that, that is successful and
6 kind of applying it and like see where there are needs
7 in the market and where, where the organization can
8 make further impact in the industry.

9 Q So am I right that you then went on to
10 LeapFrog after working first for a period of time at
11 Gateway?

12 A Yes.

13 Q All right, and how did that opportunity come
14 about?

15 A So my wife -- so we were living in
16 Pittsburgh. We graduated. My wife knew she was going
17 to Georgetown for, for her MBA program in the fall, so
18 I was looking for opportunities in the DC area so I
19 could move with her.

20 And so I actually had learned about LeapFrog
21 in my, in my MHA training. I took a quality in
22 patient safety course, and LeapFrog was one of the
23 many, many different organizations that we covered,
24 and so I saw -- I think I saw an article from, from
25 Leah that was posted in Forbes, and so I was, I was in

1 the job, job-hunting mode at that point.

2 And so I was looking at different companies,
3 and I saw that there was a business development role,
4 a coordinator role, and so I believe I reached out to
5 either through the website or to the contact that was
6 listed, listed there, and then I got an interview,
7 and, and I've been at LeapFrog ever since.

8 Q And was, was that in 2015, approximately?

9 A Yes.

10 Q So your first role; am I correct, it was a
11 marketing and business development coordinator role?

12 A Yes.

13 Q All right, and what -- just describe
14 generally what that role was.

15 A So I had the -- so I was under the -- I was
16 reporting to the director of communications, who had
17 been the, kind of the main liaison between LeapFrog's
18 current data licensees, which are organizations that,
19 that access rights to use the LeapFrog data, and part
20 of that was transitioning to be kind of the day-to-day
21 contact for some of, some of those, some of those data
22 licensees, and also kind of getting initiated into the
23 accolades licensing program that LeapFrog had.

24 Q And who was the director of communications
25 at that time?

1 A Erica Mobley.

2 Q So you were, it sounds like, the principal,
3 or at least initially you had responsibility with
4 respect to data licensing; is that right?

5 A Yes.

6 Q And then eventually the role or the
7 responsibilities expanded to the accolade licensing;
8 is that correct?

9 A Yes. I had -- I mean I had some, I had some
10 like initiation on, on both of them. Erica actually
11 went on maternity leave shortly after I started, so
12 part of it was kind of like just kind of getting up to
13 speed. It was kind of a crash course to get kind of
14 up to speed on both of those programs, but I, I did
15 have some responsibilities in both accolades and, and
16 the -- the accolades licensing program and the data
17 licensing program initially.

18 Q And then how -- what was your next role
19 after that?

20 A So I think a couple years in, I became
21 senior coordinator of business development or -- and
22 then I was in a manager level role, and then now a
23 director of licensing. It's all been kind of
24 increasing responsibilities to what is now like
25 oversight of the -- of both data licensing and the

1 accolades licensing.

2 Q Right now you're at a director level,
3 correct?

4 A Correct.

5 THE REPORTER: You said at --

6 BY MR. CHUNG:

7 Q At a director level, and as a director, is
8 it right -- is it correct that you are a member of the
9 executive staff at LeapFrog?

10 A I'm a member of the management team.

11 Q So -- and your current role is director of
12 licensing programs, correct?

13 A Correct.

14 Q And you started that -- when was that? When
15 did that begin?

16 A I think October of '24.

17 Q The -- you mentioned data licensing and
18 accolade licensing. What other programs do, do you
19 oversee at LeapFrog?

20 A Those are the primary two programs that I,
21 that I, that I work on.

22 Q Are there any other kind of products or
23 items that LeapFrog markets or derives a revenue from
24 that are not included within the, kind of the
25 umbrellas of data licensing and accolade licensing?

1 A No. Every -- I think every project that I
2 am on or involved with is directly related to, to the
3 licensing program, either data licensing or accolade
4 licensing.

5 Q Now, we're going to spend a fair amount of
6 time just digging into what exactly those programs are
7 made up of, but just so that we're clear kind of on
8 the universe of programs, on your, on your LinkedIn
9 page, there's a sentence in just the top summary where
10 it says, "I've launched new programs that generate
11 sustained revenue, expanded our market presence, and
12 built enduring relationships with stakeholders" and so
13 forth.

14 What are those -- are those -- what are
15 those new programs, first of all?

16 A Yeah, so it's all within either data
17 licensing or, or accolade -- or accolade licensing.
18 So for, for example, recently, in 2024, we launched
19 the diabetes recognized leader program. It's our new
20 rating for LeapFrog, based on excellence in diabetes
21 care, and hospitals complete an application survey,
22 and, and answer questions about how they manage care
23 for diabetes.

24 There is an -- for those that do well on it
25 and get the recognition, and they want to use the

1 recognition badge, they have, they have an opportunity
2 to purchase that, that badge and use it in promotions.
3 So we had an accolades badge program, and we did
4 outreach to those through, through a third-party
5 licensing firm, did that, did that outreach and that
6 was kind of the launch of our -- of that, of that
7 accolades program, so we kind of expanded into, into a
8 new program.

9 So I guess that's kind of one example of
10 expanding the accolades program, and that's, that's
11 one part of what I meant by that.

12 Q Okay. So new types of accolades programs is
13 what you meant?

14 A And similarly on data licensing as well.

15 Q Okay. Can you provide an example of a, of a
16 new program in the licensing program, data licensing
17 program?

18 A Let's see. Yeah, so, so there, there was a,
19 there was a program that we, that we launched. There
20 was a development of a, kind of a CPOE report,
21 computerized physician order entry report --

22 THE REPORTER: Computerized what?

23 THE WITNESS: Sorry. Computerized physician
24 order entry report, and the goal there was to
25 create a report from the information that we have

1 published on, on the, on the CPOE tool and
2 information that we have on the CPOE tool.

3 There are electronic health records
4 companies that are very familiar with, with
5 LeapFrog's reporting, and one of the things, my
6 understanding, is that we ask on the survey is
7 what EHR companies are admin-, administering
8 that -- their CPOE systems.

9 So this report was kind of designed to help
10 those organizations, those EHR companies, to
11 understand the performance of their systems in
12 catching common medication errors, and we wanted
13 to make that available to them so that it can
14 improve patient safety.

15 And so we, we tried to, you know, reach out
16 to some of those organizations, so we kind of
17 like launched that. Unfortunately, none of them
18 were, were interested in, in, in using it.

19 BY MR. CHUNG:

20 Q Okay. In terms of reporting, do you have
21 any LeapFrog employees that report to you?

22 A Not directly.

23 Q All right, and who do you report to?

24 A Missy Danforth.

25 Q Do you have any reporting relationship with,

1 with Leah, Leah Binder?

2 A I, I do not. I mean not, not -- I, I
3 report -- I guess I kind of report to her through,
4 through Missy right now.

5 Q Okay. You also -- just going back to your
6 LinkedIn. So we talked about the launch, at least a
7 couple examples of new programs that, that you
8 launched that generate sustained revenue.

9 What, what do -- what do you mean by
10 "sustained revenue"?

11 A Yeah, so not necessarily in the data
12 licensing example, because we --

13 THE REPORTER: Not necessarily in the what?

14 THE WITNESS: Not necessarily in the data
15 licensing example, because that, that, that
16 program we did wasn't successful right now. It's
17 relatively recent, but the, the accolades
18 programs, we have been able to get hospitals
19 to -- and, and other facilities -- to use the
20 LeapFrog marks, which is aligned with our
21 mission, and getting hospitals to be aware of
22 their patient safety, as, as assessed by
23 LeapFrog, and realize the value of that, and
24 continue, whenever they, you know, get an A again
25 or they reach LeapFrog Top Hospital status, to

1 come, to come back and tell their communities
2 about it, and that, in effect -- one of the end
3 results of that is increased revenue for, for
4 LeapFrog, because the program has, has continued
5 to grow along with the recognition and, and brand
6 of LeapFrog.

7 BY MR. CHUNG:

8 Q In, in your role as director of licensing
9 programs, would you say that generating or sustaining
10 or increasing revenue through the licensing programs
11 is one of, one of your primary goals?

12 A Yes, I would say that, because it is, and it
13 is -- because the program is so aligned with our
14 mission, the -- both data licensing and accolades
15 licensing, the more, the more organizations that are
16 using our data to assess quality and safety and making
17 that a component of how healthcare is decided, or in
18 educating the public through the accolades licensing
19 program, that, in effect, expands the brand
20 recognition of LeapFrog, increases awareness of
21 patient safety, and one of the results of that is, is
22 increased revenue, which goes back into sustaining our
23 mission.

24 Q The other component here is "expanding our
25 market presence."

1 What do you mean by that?

2 A So could you read the full, the full
3 sentence?

4 Q Yes. "I've launched new programs that
5 generate sustained revenue, expanded our market
6 presence." That's the sentence.

7 A Yeah, so LeapFrog is, is a relatively small
8 but I think mighty organization. I don't think
9 there's a hospital in the U.S. or health system that
10 hasn't heard of LeapFrog. So our, our -- the
11 awareness around LeapFrog with hospitals is I think
12 well-known, but the general public I think has --
13 there's still, there's still room to expand, expand
14 our presence among the general public.

15 And when you think about how people that are
16 paying for healthcare -- and really it's like, it's
17 individuals who are paying through premiums, but the
18 way the system is, employers and people that purchase
19 healthcare, health plans that are, that are making
20 the, you know, the big payments, there is not enough
21 awareness in, in those -- in a lot of -- for a lot of
22 employers about what's out there with -- in terms of
23 quality and safety, and I think the focus has been
24 kind of detracted into costs and getting the lowest
25 cost and not enough information about, about quality.

1 So LeapFrog has very important quality and
2 safety information, and some health purchasers know
3 about it, but there -- that has been an increasing --
4 that has been a focus of ours, to create more market
5 presence in those, in those areas and educating those
6 stakeholders about the importance, and we have made,
7 you know, some traction in being able to sustain that
8 and expand that market presence, and that's one of the
9 goals of, of mine in my role is try to expand our
10 market presence.

11 Q And is at least one purpose of expanding
12 that market presence to, to basically increase or
13 augment LeapFrog's brand? Is that one of the
14 purposes?

15 A Can you -- could you restate that.

16 Q Yes. Is one the purposes in expanding
17 LeapFrog's market presence to make LeapFrog's brand
18 more recognizable? Is that correct?

19 A Yes, I would say that's true.

20 Q And is at least one of the purposes also to
21 garner more interest in the licensing programs from,
22 from potential consumers?

23 A Can you, can you say that again? Which
24 licensing program?

25 Q Either or both.

1 A Yeah, so expanding -- could you just repeat
2 the question one more time.

3 Q Is at least one of the purposes of expanding
4 LeapFrog's market presence to get more hospitals and
5 other parties, right, to participate in LeapFrog's
6 licensing programs?

7 A Yes, yes. So like the -- so, for example,
8 the accolades program, there -- we want hospitals to
9 compete on not just like we have the shortest waiting,
10 waiting times or cafeteria, or the cafeteria food, you
11 know, Google reviews. We -- you might have seen
12 Google reviews. We want them to compete and do well
13 on areas that, you know, they work hard on, and to
14 improve patient care, first and foremost.

15 And the, the hospitals that do well and
16 receive these distinctions from LeapFrog, they have --
17 we want them to talk about it, and they are not
18 required in any way to purchase the logo. It's a
19 trademark logo, and the reason we license it is
20 because it is our brand, our branded logo, and so if
21 they want to use it, we give them a license to be able
22 to purchase that.

23 We want them to tell their communities that
24 they have an A or the Top Hospital, and they're --
25 they can do that for free by, by posting it on social

1 media, writing it on their website, but they want to
2 use the branded trademark logo. That's what the
3 licensing program is, to be clear on that.

4 And then so we -- whether it's plain text,
5 whether they use the logo, all of those things
6 contribute to expanding the, the brand awareness of
7 LeapFrog, which is what the purpose of creating the
8 safety grade was, was all about. So that makes it
9 kind of a mission-aligned program, in that we want to
10 create awareness. There's not enough awareness about
11 the importance of patient safety, and that is, that is
12 one of the primary -- that is the, that is the, one of
13 the main missions of LeapFrog Group.

14 MR. CHUNG: Understood.

15 All right. Why don't we go to tab 3. We're
16 going to mark this Exhibit 1.

17 (Exhibit 1 was marked for
18 identification.)

19 BY MR. CHUNG:

20 Q Mr. Banerjee, Exhibit 1 is an annual review
21 from LeapFrog, your -- one of the, one of your annual
22 reviews when you were data licensure program manager,
23 and I think it's from 2024, submitted to Ms. Danforth.

24 Do you see that?

25 A Yes.

1 Q Do you recognize the document just
2 generally?

3 A Yes.

4 Q What's the purpose of this? Just generally
5 describe what the purpose of the document is.

6 A So this is my annual review where I do kind
7 of a self-evaluation about my key responsibilities,
8 kind of outline the -- my goals for the year, and I
9 want to highlight the, some of the contributions that
10 I made and ideas that I, that I have going forward to
11 help the organization.

12 Q All right. In the very first sentence of
13 the attachment under "Key Responsibilities," you wrote
14 that it's "a bit tumultuous for the data licensure
15 program."

16 Do you see that?

17 A Yes.

18 Q Yeah, what did you mean by that?

19 A So probably what I meant was that we --
20 there were a couple of data licensees that we had that
21 chose to -- they chose to cancel their, their
22 agreement with us. We've had some new, some new ones
23 that came this year. So it was a bit of an
24 up-and-down year for, for the program, in that we, we
25 had -- we, we gained some and we lost some.

1 Q Okay, and toward the bottom of the page, you
2 wrote, "As I have learned, data license sales are a
3 hard game. Our data license sales funnel has 70 to
4 100 inbound inquiries per year that can result in just
5 a handful of licenses, and some sales such as MMO can
6 take over one year to close from the first meeting."

7 So I just want to focus on the time period
8 there. Why, why does it take over one year to close a
9 data license sale in at least some circumstances?

10 A I wish I knew, but there are a variety of
11 different organizations that, that license LeapFrog
12 data. Some of them, as I mentioned, are health plans.
13 Some of them -- in organizations like that, there is a
14 long legal review process. We have a relatively
15 complex data use agreement that has a lot of terms and
16 conditions in it, and so there is a lot of
17 back-and-forth on, on those terms.

18 There's, there's things like getting,
19 getting the internal funding, getting approval. I had
20 worked at a health plan before, so I know that there's
21 a lot of red tape and silos that, that happen, so in,
22 in, in getting something like this closed or executed.
23 So that -- all those things kind of play into why,
24 from my understanding, why it takes so long. They
25 don't all take a year, but we, we do see some take a

1 year. Sometimes it's even longer than a year.

2 Q You then write, "As Leah has said, closing a
3 data license sale is a big freaking deal, because most
4 of the LeapFrog's data licensees stay licensees for a
5 long time. Well, most of them, at least."

6 Are those -- are you just repeating kind of
7 what Ms. Binder said to you at some point about
8 closing a data license, license sale being "a big
9 freaking deal"?

10 A Yeah, I mean I think it was the, kind of the
11 essence of what she said.

12 Q Yeah.

13 A I can't remember the exact like when she
14 said that, but I do know that she does believe, and we
15 believe that the -- that these are hard to close.
16 It's hard to get somebody or an organization that is a
17 new licensee of LeapFrog data, and from what we have
18 seen, when they do license, many of them appreciate
19 the benefits of it for a long time.

20 And, and in a tumultuous year where some
21 have been added, some have, some have been lost, and
22 some of them that had been, you know, licensees,
23 customers for a very long time, when you, when you
24 lose that, that relationship, it hurts, but, but the
25 ones that, that stay, a lot of them have been

1 long-term committed partners for LeapFrog.

2 Q So just to -- if I understand, if I
3 understand correctly, because data licenses are often
4 hard to close or obtain, and second, once a party
5 becomes a data licensee, the likelihood of them
6 continuing to be a licensee is relatively high; is
7 that right?

8 A Yes.

9 Q Okay, and, and for those -- and is it
10 correct that data licensing, the data licensing
11 program is a relatively significant source of revenue
12 for the organization?

13 A Yes, yes.

14 Q So looking at -- actually, on that point, if
15 you look at the next page -- so when I refer to page
16 numbers, Mr. Banerjee, I'll be referring to what's
17 called a Bates number, so you look in the lower
18 right-hand corner, there's sometimes one or two Bates
19 numbers starting with "LeapFrog," so if you look at
20 the one ending in 4197; do you see that, LEAPFROG
21 4197?

22 A Yes.

23 Q Okay. So there is a section in the bottom
24 half called "Plan for Personal Goals for Upcoming
25 Year."

1 Do you see that in the middle of the page?

2 A Oh, yes.

3 Q And then below, "Become more involved in the
4 budgeting process." Why was that -- why did you
5 include this as a personal goal for the upcoming year,
6 to become more involved in the budgeting process?

7 A Well, I want to continue to grow in my
8 responsibilities at, at LeapFrog, and I was a manager
9 at the time of writing this, and so I wanted to show
10 that I have an aptitude to continue to grow.

11 And I know part of the oversight of being a
12 director of the licensing program is to have some
13 responsibility or more connection to the success of
14 the, the data, the data licensing program and accolade
15 licensing program.

16 And the primary goal is to expand use of, of
17 our data and get accolades use. One of the end
18 results of that is revenue, and, and so being a part
19 of the budgeting process and forecasting like where we
20 can be and how that can ultimately contribute to the
21 impact that we're making is -- was kind of my thinking
22 behind suggesting that I wanted to be part of the
23 budgeting process.

24 Q So the first sentence under that bullet
25 point, you wrote, "Accolades and data licensure are

1 the two biggest revenue line items on LeapFrog's
2 budget."

3 And is that true today as well?

4 A My understanding is yes.

5 Q Do you -- as a, as a director for the
6 licensing programs, do you now have involvement in the
7 budgeting process?

8 A I have -- I talked to, to Missy about --
9 Missy still, like I report to Missy, and she has --
10 she's more directly involved in the, the budgeting
11 process and getting the expenses and the, the
12 official -- getting the official numbers approved, but
13 I do have some input. I work with her daily,
14 frequently.

15 On the -- under the accolades program in
16 general and the data licensing program, I don't -- I'm
17 not yet like fully -- like I don't have like, like
18 leadership over the accolades and data licensing
19 program, but I, I do help in kind of determining like
20 specific numbers on -- that help contribute to what,
21 you know, what costs are going to be or what, what,
22 what potential -- like what revenue might look like
23 for, for the budget that will be presented later to
24 the board.

25 Q So just continuing in this paragraph, you

1 wrote, "I am for the most part aware, by customer, of
2 each program's strengths, weaknesses, opportunities,
3 and threats impact on revenue."

4 And then you continue to write that, "I know
5 that I can provide an additional context and lens to
6 help the organization to make realistic projections or
7 alert to areas that may need more support and
8 attention."

9 At the time that you wrote this in 2024, did
10 you have a sense that, that projections, budget and
11 projections for the licensure programs were not
12 realistic or aligned with what you were outlining here
13 in terms of your familiarity with the programs by
14 customer?

15 A Can you, can you restate the question.

16 Q So just looking at the sentence here, right,
17 did you, did you believe or at least have a sense that
18 the projections for revenue from the licensing
19 programs was in any way not realistic?

20 A So in the data licensing program, like we
21 had -- as I mentioned, like we had some ups and downs,
22 and -- in my view, looking, looking at the, like what
23 the budget numbers were, it seems like it's a, it's
24 kind of like a, the real, like the real -- the actuals
25 are kind of like a, up and, up and down, and the,

1 the -- like the budget didn't seem like it was kind of
2 accounting to what was happening in actuality.

3 So, so I, I think for the -- myself in my
4 role, doing the day-to-day of data licensing and
5 accolade licensing, I felt like I had my hands more on
6 the pulse of what is happening in realtime at the
7 organization, where the budget is I think more like a
8 static number that did not account for what was
9 happening in realtime, both positives and negatives.

10 So I think what I was trying to say here is
11 that I have my hands more on the pulse of what's
12 happening in the organization, for these specific
13 programs, which are the higher or the highest in terms
14 of revenue programs, and I can make a contribution to
15 making the budgets in the future more aligned with
16 what's happening day-to-day, if that, if that was of
17 interest to the organization to do that.

18 Q Like the word you used here is "realistic,"
19 or actually words, "realistic projections." So your
20 testimony was that you believed you could make
21 contributions, because you were closer to the
22 day-to-day, right, and then kind of the fluctuations
23 in the, in the program.

24 And you also mentioned that the budget
25 was -- I think the word you used is "static" number,

1 right? But was that static number, which is in the
2 budget, a, a realistic static number at the end of the
3 day for the programs?

4 A I don't -- I actually don't remember what
5 the numbers were at this point. This was last year's,
6 last year's budget.

7 Q I'm just taking you back to the --

8 A Right.

9 Q -- statement you're making here.

10 A Sure, yeah.

11 Q What the, what the thought or the sentiment
12 was.

13 A So I, I, I think my -- and just to go back
14 to what, what I was saying before, I, I -- the idea of
15 writing "realistic" was, was that I can get closer to
16 what the actuals are, because I have more of a sense
17 of the day-to-day of like what would actually come in,
18 in terms of revenue, for these specific programs,
19 which have I think high impact on what the --
20 percentage-wise, on what those actual numbers are
21 expected, expected to be.

22 Q Okay.

23 A And then -- so that's for the current year,
24 but also for, for future years.

25 Q You wanted to make sure that the, that the

1 projections in the budget were realistic, correct?

2 A Yes. I, I was suggesting that's a
3 contribution that I could help make to make a more,
4 more accurate type of forecasting of where we could
5 be, because that is, I know, an interest of -- like on
6 the, on the finance side of it and making, making the
7 budgets and what we present to the board.

8 All I'm saying here is I can help make a
9 contribution, because that is, that is of interest.
10 I'm not involved directly in the finance and putting
11 together those, those, you know, financial statements,
12 but to the extent that I can contribute, I, I was just
13 suggesting what I can provide to help in that, that
14 capacity, because I do know that on the senior
15 leadership team, they are all involved in -- they are
16 more so involved in constructing those numbers, and
17 that's, that's where I'd like to be eventually, which
18 is why I said that in my, in my annual review.

19 Q Okay. We're going to get into some basic
20 concepts now.

21 The first is the Hospital Safety Grade.
22 You're familiar with the Hospital Safety Grade, right?

23 A Yes.

24 Q What is that?

25 A The Hospital Safety Grade is, is an

1 initiative program that LeapFrog put together. I
2 believe it was -- it was before I started at LeapFrog
3 in, it was in 2012, and my understanding is that it
4 started with a, a grant LeapFrog received from the
5 Robert Wood Johnson Foundation --

6 THE REPORTER: Received from the what?

7 THE WITNESS: Sorry. From the Robert Wood
8 Johnson Foundation to create more awareness about
9 patient safety to the public, and it was -- that
10 is something that I think LeapFrog has become
11 widely recognized for through the, the Hospital
12 Safety Grade.

13 There are -- we gather some of the foremost
14 experts, researchers and clinicians that are
15 known in industry to help us to create a
16 methodology that we, we use to put together a
17 grading system for hospitals based exclusively on
18 patient safety. To my knowledge, it's the only
19 rating system on -- that looks at exclusively
20 patient safety and, and making the assessment.

21 So twice a year, we put out the hospital
22 safety grades for general acute care facilities.
23 Approximately 2,800 to 3,000 facilities are
24 graded, and the information is updated with the
25 latest available data that, that we have, are

1 able to find, and put into the methodology, and,
2 and then, and then publish the grades.

3 Transparency has been core to LeapFrog's
4 mission throughout, throughout our history, and
5 we apply that in the Hospital Safety Grade by
6 publishing not just what the overall grades are,
7 but the underlying measures that go into that, so
8 that -- and it was designed to be a very
9 consumer-friendly website so that anyone can --
10 any patient or family member can go and see the
11 information about the facilities and how, and how
12 they got -- and, and where they are performing
13 well and where they are not performing well.

14 And so that continues to be a, a focus for,
15 for LeapFrog to make, make this information
16 available to the public, making it easy to,
17 making it easy to understand, and, and now I
18 think it's going on 13 years of, of, of rating
19 facilities --

20 BY MR. CHUNG:

21 Q You mentioned --

22 A -- on patient safety.

23 Q You mentioned "methodology." Are you
24 involved in any way with the methodology that goes
25 into the Hospital Safety Grade?

1 A I'm not involved in the methodology.

2 Q You also mentioned "transparency." Do you
3 know whether LeapFrog discloses or explains the
4 methodology by which hospitals are assigned a
5 safety -- hospital safety grade?

6 A Yes. I know we publish the methodology on
7 our, on our website.

8 Q Okay. The actual methodology document
9 itself? Is that what you're referring to?

10 A Yes.

11 Q All right. Other than publishing or linking
12 that methodology, are you aware of anything on the
13 website that explains to consumers the methodology
14 behind how hospitals are assigned a safety grade?

15 A There, there's a number of pages on our
16 website that explain the Hospital Safety Grade, but
17 the, the full methodology is, is published on, on the
18 website.

19 Q And is the -- and is the expectation that
20 consumers read the, the full methodology?

21 A The -- it is there if they are interested to
22 explore the website. We try to make it as easy to
23 understand as possible.

24 Q And so how does, how does LeapFrog do that,
25 to make it as easy to understand as possible? I'm

1 focusing just on the methodology.

2 A Oh. So I -- well, I'm not involved in the
3 methodology, in the methodology or, or in the creation
4 of the website, so I'm just speaking like in, in
5 general about LeapFrog's philosophy of the LeapFrog
6 website, and, and so we -- our, our -- I know one of
7 our goals, LeapFrog's goals is to make it as easy and
8 transparent as possible, but I'm not directly involved
9 in, in making the website and, and, and doing that,
10 but that is a focus of, of the team that does that at
11 LeapFrog.

12 Q Okay. Well, I mean you testified that
13 LeapFrog tries to make it as easy to understand as
14 possible with respect to the methodology.

15 How does it do that?

16 MS. WOOD: Objection to form.

17 THE WITNESS: I, I don't know how they do
18 that.

19 BY MR. CHUNG:

20 Q Are you -- do you interact at all with --
21 you mentioned "experts" contribute to the methodology
22 behind the hospital safety grades. Do you have any
23 interaction with the experts that you described?

24 A No, I do not.

25 Q And who is responsible? Who has that

1 interaction from LeapFrog?

2 A Missy Danforth.

3 Q Do you have -- do you have an understanding
4 of the types of measures or metrics that LeapFrog uses
5 in its scoring methodology that generates the Hospital
6 Safety Grade?

7 A I have a, I have a general understanding.

8 Q Can you tell me just briefly what that
9 general understanding is.

10 A So there -- we published a methodology.
11 There's an -- we, we look at publicly available data
12 in the scoring on what our expert panel has determined
13 to be some of the most important measures that are
14 available to the public, or published anywhere, on
15 these facilities that help contribute in preventing
16 errors, accidents, injuries and infections that happen
17 in, in hospitals. They are what, from my
18 understanding, what are the most impactful for
19 specifically patient safety concerns.

20 So there are, there are outcomes measures.
21 There is some process and structural measures, and
22 they -- through the methodology, they assess the
23 performance on each of those. There's -- percentages
24 at each of the measures are, are assigned, and, and
25 then ultimately a score is produced, a numerical

1 score.

2 And then there's specific cutpoints, and the
3 cutpoints determine what the, what the letter grades
4 are. It takes the most publicly available data.
5 There's data snapshot dates for each cycle, spring or
6 fall, so it's the latest data that's available at
7 those -- during those specific cutpoints, and so that
8 we are able to appropriately score and report the data
9 for, for hospitals looking at the same time period,
10 reporting periods.

11 And, and then there's, of course, there's a
12 lot of processes that go into it that I'm -- I'm not
13 directly involved in it, but that's my general
14 understanding, and Missy can definitely speak to it a
15 lot better.

16 Q It sounds like you actually know a lot about
17 it. So what are -- you mentioned that -- you
18 mentioned publicly available data, right, that the
19 hospital safety grades are based on publicly available
20 data; is that right?

21 A Yes.

22 Q Okay. What are the, what are the sources of
23 that publicly available data?

24 A CMS is a significant source of the data.
25 The LeapFrog Hospital Survey is also considered

1 publicly available data, so -- because we publish all
2 the results on our, on our website.

3 I know those are two, two of the main
4 sources.

5 Q When you say that the LeapFrog -- which
6 we'll get into -- the LeapFrog Hospital Survey is
7 publicly available data, are you saying that all of
8 the data that participating hospitals submit in
9 response to the survey is available to the -- freely
10 available to the public?

11 A No. Their score. LeapFrog publishes scored
12 data on the, on the website, but yeah.

13 Q So you're referring to the scores
14 themselves, not the underlying data; is that correct?

15 A So primarily the score, yeah, the score, the
16 score data for the Hospital Safety Grade website.

17 Q So just to be clear, the data that hospitals
18 submit in response to the LeapFrog Hospital Survey,
19 are you testifying that that is publicly available?

20 MS. WOOD: Objection to form.

21 THE WITNESS: Can you repeat the question.

22 BY MR. CHUNG:

23 Q Yeah. The actual -- so I'm referring to the
24 data that hospitals that participate in the hospital
25 survey submit to LeapFrog; is that data publicly

1 available to the public?

2 A So, so like if -- for example, if they say I
3 have 504 beds, that's data they're submitting on the
4 survey. We're not scoring that data, but we are
5 putting that data, that information that they're
6 writing on there -- they're publishing on the website.

7 Separately, we, we also have -- like there's
8 a scoring algorithm. If we're talking about the
9 LeapFrog hospital survey and the ratings at
10 leapfroggroup.org, we, we do score information inputs,
11 and, and I'm not involved in that, to be clear, in, in
12 any, in any sense. I have a general understanding,
13 and I, I do answer questions from people that are
14 interested in the, the, the kind of output datasets
15 that LeapFrog has as part of the data licensing
16 program. So I'm just speaking from my experience,
17 which is kind of very high-level about it, about the
18 program.

19 So I, I do not work directly on the, on the
20 website or on the methodology, but, but just to answer
21 your question, yeah, data, data can mean a lot of
22 things, and so hospitals enter in information when
23 taking the survey. Some of that information is on the
24 website, like their -- what they've put in as their
25 hospital name, but they --

1 Q But, Mr. Banerjee, I'm talking about the
2 entirety, right, of the data that hospitals submit in
3 response to the hospital survey.

4 Are you saying that that is all publicly
5 available?

6 A No.

7 Q Okay, and, in fact, as, as the director in
8 charge of the licensing programs, one of those
9 programs is data licensure, correct?

10 A Yes.

11 Q Right, and at least a good portion of the
12 data that's being licensed is not publicly available;
13 otherwise, there wouldn't be a purpose to licensing
14 that data, correct?

15 A Can you repeat that again.

16 Q A good portion, good portion of the data
17 that, that LeapFrog licenses is not publicly
18 available, correct?

19 A Most of the data that is licensed by
20 organizations is publicly available, almost all,
21 almost all of it.

22 Q Okay. We can move on.

23 The, the hospital survey that you mentioned
24 a few times already, do you have any role in designing
25 that, that hospital survey?

1 A No, I don't. I have not.

2 Q Have you ever reviewed the hospital survey?

3 A I, I have looked at it.

4 Q Okay. What does looking at it mean?

5 A Oh, I mean I -- there's -- as I mentioned,
6 there's -- I talk to a lot of different types of
7 organizations that are interested in LeapFrog's
8 ratings and, and the data.

9 Sometimes they have specific questions about
10 the survey, so in those cases -- and I've worked at
11 LeapFrog for ten years now -- sometimes they ask
12 specific questions from the survey, and sometimes I
13 have someone on our team that's more familiar with it
14 answer those questions, but there are other times I go
15 into the survey and look up what the specific
16 questions are. So I have spent some, some time
17 looking at the, the survey before.

18 Q All right. Do you have any role in
19 reviewing the hospital responses to the hospital
20 survey?

21 A No.

22 Q So you don't review the data that, that
23 hospitals submit in response to the hospital survey?

24 A No.

25 Q Even in connection with your overseeing the

1 data licensure program?

2 A Right.

3 Q LeapFrog requires hospital survey
4 participants to affirm that LeapFrog can use the
5 survey information in a commercial manner for profit.

6 Are you aware of that provision in the, in
7 the hospital survey?

8 A I have seen that before.

9 Q Okay. Do you know how long LeapFrog has
10 required that affirmation?

11 A I do not.

12 Q All right. Do you know whether a hospital
13 can opt out of that affirmation and still complete the
14 survey?

15 A I, I do not know that. No, I do not know
16 that, but I do -- as a part of that affirmation, I
17 have seen that they, they do not own the data. It's
18 like higher up in that, in that paragraph. So they
19 don't -- the hospital is, does not -- they're
20 submitting this data. LeapFrog fully owns it, and so
21 just for full transparency, I think LeapFrog is kind
22 of doing a -- is telling them that in addition to not
23 owning it, this is what we are able to do with it, the
24 data.

25 Q And the purpose of essentially giving

1 ownership of the data to LeapFrog is so that LeapFrog
2 can license that data, correct?

3 A I, I believe -- that was -- I wasn't
4 involved when that was written.

5 Q I understand.

6 A But I suppose that would be, that would be
7 one of the reasons why.

8 Q Are you aware of any hospital that's ever
9 complained or has expressed a desire -- have you heard
10 any hospital complaining about not being able to opt
11 out of this affirmation?

12 A No, and I don't, I don't talk directly to
13 hospitals. I don't talk directly to the hospitals
14 anyway, but I -- no, I have not heard that.

15 Q You don't --

16 A Even anecdotally.

17 Q You don't interact with any hospital or
18 hospital systems at all?

19 A Not, not concerning completing the survey.
20 I have interacted with health systems before. As a
21 part of the data licensing programs, one of the things
22 we have available -- and actually, that was actually a
23 part of expanding the -- I couldn't think of an
24 example for, for data licensing, but we, we have a
25 health system support subscription, where a health

1 system that is trying to understand LeapFrog ratings
2 and get the most accurate timely data for their system
3 hospitals.

4 Sometimes there's like one, one person that
5 works in a health system that has, you know, 20
6 hospitals or 40 hospitals, and they wanted to get the
7 latest available information on those facilities. We
8 launched like a subscription to give them timely
9 datasets about -- that have the information for their
10 specific facilities.

11 So there's -- a component of that is their
12 hospital survey results, the responses for their
13 specific facilities, the safety -- for the safety
14 grade, the data that we're going to be using in order
15 to grade them are given to them well in advance of
16 when we publish the data.

17 And so that is all information that they can
18 get -- that the individual facilities can get -- I
19 mean there's no cost to them to get that, but we
20 launched this program, because we had a lot -- there
21 were a lot of health systems that were asking for this
22 timely information, and it requires an analyst on our
23 part --

24 THE REPORTER: What?

25 THE WITNESS: It requires an analyst from

1 our team to kind of coordinate and create those
2 files. So we, we began to make those, those
3 files available, and so there is a data use
4 agreement that, that the health system needs to
5 complete in order to get these, these files.

6 And so when we launched that program, I
7 started talking to health systems and people that
8 were in these roles, and kind of initiating them
9 what's, what's in this subscription, and, and so
10 that is kind of the capacity that I have talked
11 to, talked to health systems primarily.

12 BY MR. CHUNG:

13 Q How much is that subscription that you just
14 described?

15 A The pricing of that is based on the number
16 of hospitals that the health system has. So if it's a
17 two to five hospital health system, it's about \$2,500.
18 On the high end, I don't think it's above like
19 \$19,000.

20 Q Is this among the new programs that you
21 mentioned in your LinkedIn profile?

22 A Yes.

23 Q And this is -- so this is another way,
24 another program that basically packages or leverages
25 the data that's submitted by hospitals in response to

1 the survey, correct?

2 A So this is a, this is a program that
3 LeapFrog is taking information from -- that, that
4 we're -- for the survey. It's information that we own
5 from, from the survey.

6 Q Right.

7 A About these specific facilities.

8 Q Right.

9 A So not like the universe of, of hospitals
10 taking the survey. It's just their specific
11 facilities that they are interested in, and we're
12 giving them back the data that's already published on
13 our website, or that their hospitals have submitted to
14 the survey, and it's in a file so that they can kind
15 of look at it all in one place. They can get that
16 information from those hospitals. It's, it's just
17 kind of a coordination exercise on, on our part that
18 we're doing for, for those specific facilities.

19 Q LeapFrog has the data, and it basically
20 packages it, it packages it for the hospital systems,
21 correct?

22 A Yes, and so part of it is like the
23 coordination. The other thing is like the timing of,
24 of getting, of getting it. It might take a single
25 person at that health system some time to like reach

1 out to all these people, but LeapFrog has this
2 information that we can kind of package and give to
3 them for convenience.

4 Q Okay, and this is -- so this product, this
5 new product is marketed to hospital systems; is that
6 right?

7 A Yes, it is.

8 Q Okay, and, and when did that -- when did
9 this kind of new product -- when did you start this
10 new product?

11 A I want to say maybe like -- I don't remember
12 exactly, but 2018 maybe we started with -- and there's
13 a few that were interested, and then slowly, over
14 time, we -- based on requests that -- usually they
15 come in through the HelpDesk. We, we kind of initiate
16 those people that we have this available. It's
17 usually on request. We, we do have like a webpage
18 where we, where we show like what's available on it,
19 but usually it's at the request of somebody from the
20 system, saying like do you have anything that can help
21 us with getting these in a timely way, so -- and so
22 that's, that's why we made that available.

23 Q And so am I correct that in order for this
24 particular product to, to work or be successful, that
25 you need all of the hospitals within this particular

1 system to have actually responded to the survey; is
2 that right?

3 A We do not -- no, we do not need all the
4 hospitals in the system to, to respond to the, to the,
5 to the survey. I think -- I mean it's to their
6 benefit to -- if they, if -- they are usually health
7 systems that are very engaged with LeapFrog,
8 participating in the, in the survey, and so they would
9 want that information, but, but no, we don't, we don't
10 require them to, to have them all.

11 Q But if, but if let's say one or more
12 hospitals within their system actually did not respond
13 to the survey, the dataset would be incomplete,
14 correct?

15 A It would be incomplete for their purposes,
16 yes.

17 Q So for their purposes, it would be important
18 to have all the hospitals at least within their,
19 within their system to have actually responded to the
20 survey; is that right?

21 A Well -- well, I guess I don't really know
22 what they are using it for, but -- so if they were
23 just interested in the specific hospitals that were
24 completing the survey, then, then I guess it would
25 fill their purpose, but if they -- yeah, if they had

1 some that were not participating and it wasn't
2 important to them, then I guess they would -- if they,
3 if they wanted them to participate, and they weren't,
4 then, then, yeah, it would be incomplete for their
5 purposes.

6 MR. CHUNG: Why don't what go on to the next
7 document, seven.

8 (Discussion was held off the record
9 regarding a possible break.)

10 THE VIDEOGRAPHER: This marks the end of
11 media unit number 1. Going off the record, the
12 time is 10:22 a.m.

13 (Whereupon, a short recess was taken.)

14 THE VIDEOGRAPHER: This marks the beginning
15 of media unit number 2. Going back on the
16 record. The time is 10:38 a.m.

17 MR. CHUNG: Mr. Banerjee, we're going to put
18 in front of you our next exhibit, which will be
19 Exhibit 2.

20 (Exhibit 2 was marked for
21 identification.)

22 BY MR. CHUNG:

23 Q And this is financial statements for
24 LeapFrog. It's dated June 30, 2024.

25 Are you familiar with this document? Have

1 you seen it before? Just leaf through it. Take some
2 time.

3 A Okay. I've seen -- I have not seen this --
4 I have not, I have not seen this full document before,
5 but I have generally seen some financial statements
6 before.

7 Q Okay. So substantively you're familiar with
8 kind of the, the component statements that are in this
9 financial statement?

10 A Yes.

11 Q Okay. So I'm going to direct your attention
12 to -- if you look at LeapFrog Bates ending 9789, it's
13 like page five, basically.

14 A Yep.

15 Q Under "Revenue and Support," you'll see
16 that, according to this financial statement, LeapFrog
17 had revenues of about \$8.36 million.

18 Do you see that?

19 A Yes.

20 Q And has that -- so far as you're aware, has
21 that figure fluctuated over the past five years, or
22 has it remained steady?

23 A I'm, I'm not sure how -- I'm, I'm not sure
24 if it, if it has, but I believe it's been pretty
25 steady.

1 Q Okay.

2 Now, in terms of the particular line items,
3 you'll see that the first is accolade, accolade
4 licensing revenue, and the revenue from there for at
5 least 2024 was about \$3.29 million.

6 Do you see that?

7 A Yes.

8 Q And for the previous year, just a tick
9 below; about \$3.21 million.

10 Do you see that?

11 A Oh, I see. Let me see. Yes.

12 Q Is this the -- you testified earlier that
13 the licensing programs, accolade and data licensing,
14 are the two biggest revenue sources for the, for the
15 organization, correct?

16 A Yes.

17 Q And does this -- and between the two,
18 accolade licensing -- the accolade licensing program
19 is, is the bigger one; hence, the biggest revenue
20 source for the organization?

21 A Yes.

22 Q Okay. The "Data Licensure" line item,
23 you'll see there the revenue here for 2024 was
24 \$2.17 million; is that right?

25 A Yes.

1 Q Okay, and just -- I'm sorry. Going back to
2 the accolade licensing, just to be clear, that revenue
3 source depends on the, the hospital grades, correct?
4 That's licensing of the, the hospital safety grades,
5 correct?

6 A No. The -- so it's -- the accolades
7 licensing program, we're, yeah, we're licensing the
8 rights to use the logo --

9 Q Yes.

10 A -- for the safety grade, the Top Hospital
11 logo, and Diabetes Recognition logo, so not just the
12 safety grade, to clarify.

13 Q Right. So among those three, three sources
14 or programs that you mentioned, is it correct that
15 the, the licensing -- the right to use the Hospital
16 Safety Grade logo is the biggest component of those
17 three in terms of revenue?

18 A Oh, yes. Of those, yes, that's correct.
19 That's accurate.

20 Q So with respect to the Data Licensure line
21 item, am I correct that that revenue source depends on
22 LeapFrog basically commercializing the data that
23 hospitals submit in response to the hospital survey?

24 MS. WOOD: Objection to form.

25 THE WITNESS: Can you, can you clarify what

1 you mean by "commercializing"?

2 BY MR. CHUNG:

3 Q Monetizing, selling basically the right to
4 use that data.

5 A Yes. Selling the right to use the data and,
6 in some cases, the logos that are associated with the,
7 the programs.

8 Q The logos -- the right to use the logos is
9 also part of the data licensure program as well?

10 A It can be if it's specified in the data use
11 agreement.

12 Q Okay, but that's separate from the accolade
13 licensing?

14 A That, that is separate from the accolade
15 licensing.

16 Q The "Membership" line item here, it says for
17 2024 the revenue is about \$1.14 million. How is
18 this -- is this revenue source related in any way to
19 the hospital survey or the hospital grades?

20 A I believe that is for the partners advisory
21 committee. That's a separate program. Is it
22 associated -- what's the question?

23 Q Yeah, is it associated or related in any way
24 to the hospital survey and the hospital safety grades?

25 A The licensing programs. You're asking if

1 it's related to the licensing programs?

2 Q Yes.

3 A Okay. There are some organizations that are
4 partners, partners advisory committee members that
5 also license data as part of the data licensing
6 program, so there are, there are, I guess,
7 contributions that are the same organization.

8 One of the benefits in the partners advisory
9 committee, which I'm, I'm not a part of administering
10 that program, but there is a, like a discount on the
11 data that's available, if they are partners and
12 they're interested in accessing and the right --
13 having the rights to use the datasets.

14 Q How much of a discount is there for
15 companies that become part of the PAC?

16 A It's a 20 percent discount on, on data
17 licensing.

18 Q Just across the board, a 20 percent
19 discount?

20 A Yes.

21 Q Okay. The "Data Products and Reports," just
22 looking back at Exhibit 2, line item for, responsible
23 for about \$314,000 in revenue, what is -- what did
24 this refer to?

25 A So the Data Products and Reports are -- I

1 believe those are one-time reports. So the Data
2 Licensing line item is referring to organizations that
3 have completed a data use agreement that are getting
4 the latest of the -- they're typically one-year terms
5 agreements, standard, and all the data that's
6 available in that year, they're getting an update to
7 the latest available data that's available on the
8 respective websites, the Hospital Safety Grade or the
9 ratings on our leapfroggroup.org website. So there's
10 multiple deliverables, and getting access to, to those
11 datasets.

12 The Data Products and Reports are one-time
13 reports that LeapFrog creates for, for someone or some
14 organization that wants like a snapshot of, of data.
15 So I think there are specific benchmarking reports
16 that are available to hospitals that are included in
17 there. If there's an organization for some reason
18 that wanted just a snapshot of, of the data for -- and
19 with one specific measure, we'd create a report for
20 them, and that would be qualified under, under Data
21 Products and Reports.

22 Q So who are the customers for these kind of
23 the one-time reports? Are they hospitals? Are they
24 solution providers? Who is, who is getting these?

25 A I actually don't know the full scope.

1 That's, that's kind not -- I'm not really involved in
2 a lot of the one-time reports.

3 Q Who oversees that?

4 A Missy, Missy Danforth has oversight on those
5 data, data products and reports.

6 Q Okay. Do you know how these, these data
7 products and reports, this particular line item is
8 marketed?

9 A I don't know all the specific details of the
10 different -- of what's included under, under that line
11 item, to be, to be honest.

12 MR. CHUNG: Let's go to tab 20. This will
13 be Exhibit 3.

14 (Exhibit 3 was marked for
15 identification.)

16 BY MR. CHUNG:

17 Q So Exhibit 3 is a document titled "Business
18 Development Discovery Report." It's dated from
19 February of 2018. It says it's prepared by a Stephen
20 Gaus.

21 Does that -- do you know who Stephen Gaus
22 is?

23 A Yes. He's a former employee of LeapFrog.

24 Q What was his role?

25 A I believe it was the director of business

1 development.

2 Q All right. Did you work with him when he
3 was at, when he was at the organization?

4 A I did.

5 Q How did you -- what was the, kind of the
6 nature of the relationship with him?

7 A I reported to him for some period of time.

8 Q And this is when -- what role were you in
9 when you reported to him?

10 A I think I was a coordinator, senior
11 coordinator of business development, I believe.

12 Q Is there a business development director or
13 even manager role at the organization now?

14 A No, there is not.

15 Q Why is that?

16 A We -- I mean -- so let me, let me think
17 about why, why --

18 Q If you know.

19 A No, I don't, I don't know why there --

20 Q Okay.

21 A I don't know why there isn't.

22 Q All right.

23 So just if you've had a chance to look
24 through it, just let me know if you recognize it,
25 either specifically or generally familiar with it.

1 A I have -- I haven't seen this before, or I
2 don't remember seeing this.

3 Q Have you seen similar reports, you know,
4 later or other iterations of a business development
5 discovery report?

6 A No.

7 Q Okay, but at the time in February 2018, you
8 were reporting to Mr. Gaus when he was director of
9 business development; is that right?

10 A I, I reported to him for some period of
11 time, and then I -- while he was working at -- while
12 he was working at LeapFrog, I moved to report under
13 somebody else, so I don't, I don't remember the timing
14 of when I was reporting to him.

15 Q Okay. So if you turn to Bates ending 7484.
16 It's basically the second page.

17 So up top, the document reads, "The scope of
18 this document is to report on my assessment of The
19 LeapFrog Group's current state and the opportunity to
20 monetize its IP (intellectual property) to sustain
21 current transparency reporting on U.S. Healthcare's
22 Safety and Quality of Care for Acute Care Hospitals."

23 Now, in terms of the IP that is seeking to
24 be monetized here, is it your understanding that --
25 what's covered under LeapFrog's IP, as you understand

1 it?

2 A Actually, I don't, I don't really know like
3 what that -- I'm, I'm not really sure what this is
4 referring to. I mean I know that we have copyrights
5 on the survey and the trademark of the, of the logos
6 and that we own the data. That's what I understand to
7 be our, our intellectual property.

8 Q Okay, and then it says under "Hospital
9 Survey Participation," basically the next section,
10 "The participation rate by acute care hospitals
11 continues to grow, and currently 66 percent of
12 representative beds in the U.S. participate in The
13 LeapFrog Group's annual survey."

14 And then let's move on to the -- we'll skip
15 that next paragraph. Then there's a paragraph that
16 starts, "To maximize the value of The LeapFrog Group's
17 Data for licensing purposes, the level of
18 participation should continue to be increased so it
19 can be perceived as the most complete dataset, and
20 thus allowing defense of our pricing model and its
21 price points."

22 Do you see that?

23 A Sorry. Can you --

24 Q Yeah, if you can just focus on the paragraph
25 that starts "To maximize the value" --

1 A Oh, yes.

2 Q -- "of The LeapFrog" --

3 A Got it.

4 Q -- "Group's data."

5 A Got it.

6 Q All right.

7 A Yep.

8 Q "To maximize the value of The LeapFrog
9 Group's Data for licensing purposes, the level of
10 participation should continue to be increased so it
11 can be perceived as the most complete dataset, and
12 thus allowing defense of our pricing model and its
13 price points."

14 Do you see that?

15 A Yes.

16 Q So is it correct that the value, according
17 to this presentation here, the value of LeapFrog's
18 data that it licenses increases as more hospitals
19 respond to the survey with their data?

20 A I, I guess "value" meaning -- sorry. What
21 do you mean by "value"?

22 Q How do you -- I'm, I'm reading off the
23 document here, right?

24 A Yeah, I've never -- I haven't seen the --
25 I've actually never, never have seen this document

1 before.

2 Q Okay. Well, do you disagree with this, with
3 this sentence here?

4 A I think -- I'm sorry. I disagree with the
5 word "value," but like the price of the data, we
6 don't, we don't price it based on the number of
7 hospitals that are reporting. It's the same price,
8 regardless, but it is -- if there are specific markets
9 that -- where there is more participation in the
10 survey, then yeah, purchasers of, of healthcare could
11 utilize that information, then inform higher value
12 care.

13 So in that sense, it would, it would be more
14 valuable in the market and to the public, but for, for
15 LeapFrog, it would kind of be the same, regardless of
16 whether they're participating or not, in terms of like
17 our, our pricing model, which is referred to here.

18 Q Well, how about the, that the level of
19 participation, right? So he, kind of the, the middle
20 of the sentence, he writes that "the level of
21 participation should continue to be increased so it
22 can be perceived as the most complete dataset," right?

23 So let's put aside the pricing. We'll get
24 to --

25 A Oh, okay.

1 Q -- that later, right?

2 Do you agree with that, that the, the
3 greater the participation by hospitals, right, in the
4 Hospital Survey, the more complete the dataset is?

5 Do you agree with that?

6 A Yes. The more that participate, the more
7 complete the dataset is, yes.

8 Q And the more complete the dataset is, the
9 more valuable hospitals and solution providers and
10 other parties view that dataset; is that correct?

11 MS. WOOD: Objection to form.

12 THE WITNESS: Yes, so I will say that they
13 will -- the more that participate in the survey,
14 the more in alignment with LeapFrog's mission to
15 make this information usable in informing care
16 for patients, for purchasers, for the hospitals
17 that have assessment of their performance, it is
18 more valuable to, to the public and, as a result,
19 LeapFrog to have more participation in the
20 survey.

21 BY MR. CHUNG:

22 Q Right, because that, that -- understood.

23 And then this, the final part of this
24 sentence, "thus allowing defense of our pricing model
25 and its price points." Is it, is it fair to say -- I

1 mean just either based on what's written here or
2 otherwise, right, the, the more, the more complete the
3 dataset is, based on increased participation from
4 hospitals, it's not -- well, let me put it this way.

5 Is it correct that the greater the value
6 that hospitals and solution providers and other
7 parties see in the dataset, right, the easier it is
8 for you, as director of licensing programs, to
9 basically defend or sell the price at which you're
10 licensing these products?

11 MS. WOOD: Objection to form.

12 THE WITNESS: I mean I don't know if it, if
13 it makes it easier. I don't know if it makes it
14 easier or harder, but if -- it kind of depends on
15 the situation, the organization, because I mean
16 depending on the organization, it could be a, you
17 know, solution provider, that they are using the
18 data for just internal research and market
19 intelligence. They want to look at their, their
20 customers to see, you know, what the hand hygiene
21 performance is on the, on the survey.

22 They want to see prospective customers. Are
23 they participating in the survey or not? And is
24 there any case that they can make in working --
25 in doing that type of, of work with the hospitals

1 to improve performance, say, on the hand hygiene,
2 for, for example.

3 So, so yeah, I don't know exactly if it
4 would help in every situation with the -- in
5 terms of convincing them that this is, this is
6 something that they're interested in, but yeah,
7 they would have to make that assessment, if it,
8 if it makes, if it makes a difference or, or not,
9 and I'm not really sure how the price point
10 comes, comes into that.

11 BY MR. CHUNG:

12 Q Well, I'm looking at it from -- I'm asking
13 for your perspective, right, in, in marketing and
14 selling, right, the licenses -- the licenses.

15 In each of the examples that you just gave,
16 right, LeapFrog needs the data, right, that they're --
17 that each of these parties are asking for in order to
18 sell them a license, correct?

19 A Yes. So we, we do need -- we do need
20 participation from, from hospitals for the survey in
21 order to make the LeapFrog Hospital Survey dataset
22 available, and yeah, there, there have -- even when I
23 started at LeapFrog, I think there was maybe like
24 1,700, 1,800 hospitals that were participating in, in
25 the survey, and it is -- I, I -- and, and I know

1 there's, there's more today, but it's -- I don't think
2 it -- the, the pricing has never been on, on like the
3 number of, of hospitals that are participating.

4 THE REPORTER: The pricing has never been
5 on --

6 THE WITNESS: The, the price -- the pricing
7 has not been correlated with the number of
8 hospitals that are, that are participating.

9 BY MR. CHUNG:

10 Q Well, let's put aside the pricing, right?
11 In terms of attracting more customers, more consumers,
12 whether it's solution providers or hospitals or other
13 parties, is greater survey participation important to
14 attracting more of those customers to license the
15 products?

16 Is that fair to say?

17 A Yeah. In certain, in certain circumstances,
18 more participation could garner the interest of
19 specific types of organizations to, to look at, to
20 look at the, the LeapFrog Hospital Survey data, but it
21 could also -- even lack of participation in, in the
22 survey could still encourage, for example, a health
23 plan to work with, work with LeapFrog, get the, the
24 information about the survey, and then go to their
25 network hospitals and encourage participation in the,

1 in the survey to, to get that, get that assessment.

2 So in both cases, they would -- whether they
3 have the participation or not, that would be --
4 whether we had the participation or not, they would
5 still want to engage with us.

6 Q I see.

7 So for, for a hospital or say number of
8 hospitals that don't participate in the survey, you're
9 saying that, that that lack of participation in the
10 survey can incentivize hospitals, let's say, within
11 the same network to try to get those nonresponding
12 hospitals to, to respond to the survey?

13 A Could you repeat that again.

14 Q Sure. So I'm just kind of understanding
15 what you just testified to, right?

16 So for certain hospitals within a hospital
17 network that did not participate in the survey, that,
18 that hospitals within the same network are
19 incentivized to encourage those other nonparticipating
20 hospitals to actually participate in the survey; is
21 that correct?

22 A The health, the health plan can, can
23 encourage or incentivize the, the hospitals, even
24 nonparticipating hospitals, to, to participate in, in
25 the survey, and when -- yeah, when I say

1 "incentivize," I mean like potentially be like a
2 monetary incentive, but it could also be like a
3 quality improvement --

4 THE REPORTER: It could also be what?

5 THE WITNESS: I think I said there could be
6 a monetary incentive, but there could be a
7 quality improvement initiative that the health
8 plan is doing to raise the quality and awareness
9 of -- quality that uses some of the LeapFrog
10 Hospital Survey measures or the Hospital Safety
11 Grade.

12 And, and so they, they may use some of the
13 information. This is all -- this is all from my
14 understanding in talking to some of the current
15 data licensees. We give them the data, and then
16 they kind of take it and use it within the terms
17 of the data use agreement. So some of them use
18 it internally and in these types of initiatives,
19 so this is all from what I hear from our, our
20 data licensees.

21 BY MR. CHUNG:

22 Q Okay. So LeapFrog -- I mean is it fair to
23 say that LeapFrog has an incentive to get as many
24 hospitals as possible to respond to the hospital
25 survey?

1 A We want, we want as many hospitals as
2 possible to participate in the, in the LeapFrog
3 Hospital Survey.

4 Q And at least part of that incentive is a
5 financial incentive, correct?

6 A There I don't see a direct financial
7 incentive.

8 Q How is that -- how is that not a direct
9 financial incentive if, if you have more hospitals
10 participating in the survey, and, as you testified,
11 the dataset becomes more complete, right, and
12 hospitals and other customers see greater value,
13 right, in a more complete dataset, correct?

14 A There is no direct incentive, because if we
15 get more hospitals to participate in the survey, we,
16 we do not -- we're not charging -- if we have all of
17 our current customers, there is no change in what we
18 are charging them, because our pricing is not based on
19 the number of hospitals that are participating in the
20 survey.

21 Q Right. It's not so much the pricing
22 necessarily, Mr. Banerjee, but what I'm getting at --
23 and we went over this earlier -- is the number, right,
24 of, of hospitals and just other parties that
25 participate in the licensing programs; wouldn't you

1 say that that, there's a direct relationship with
2 respect to the number of participants, not
3 participants, but licensees or potential licensees?

4 A There, there -- more participation may, may
5 create more interest in, in specific markets with
6 specific organizations, that's true.

7 MR. CHUNG: Okay. Let's go to tab 9. This
8 will be Exhibit 4 for Mr. Banerjee.

9 (Exhibit 4 was marked for
10 identification.)

11 BY MR. CHUNG:

12 Q So Exhibit 4 is, is a document entitled "The
13 LeapFrog Long-Range Strategy Intent" for fiscal years
14 2026 to 2032, so I want to flip through that. Let me
15 know if you recognize it or are at least familiar with
16 the substance of the document.

17 (Witness peruses document.)

18 BY MR. CHUNG:

19 Q Have you had a chance to look at it?

20 A Yes, I have seen this. I believe I've seen
21 this before.

22 Q Okay. In what context have you seen it
23 before?

24 A I believe it was discussed at a, at a
25 management team meeting.

1 Q Okay, and approximately when?

2 A Looks like it was -- the board approved
3 December '24, so probably in -- I would imagine in
4 January.

5 Q If we look at the second page, Bates ending
6 17794, you'll see that there's an Objective 1. It's
7 the second page.

8 A Yes.

9 Q And under the Goal, the first goal is
10 "expand revenue from existing sources."

11 Do you see that?

12 A Yes.

13 Q All right, and in terms of the "Benchmark
14 Indicators" column, you'll see that the goal from 2025
15 to 2028 is to increase revenue -- first of all, in
16 September 2025, to set revenue at \$9 million.

17 Do you see that?

18 A Yes.

19 Q Okay, and then by 2028, \$12 million, and
20 then by 2031, \$18 million.

21 Do you know how those goals are determined?

22 A I do not.

23 Q Okay. Do you know whether these goals are
24 communicated to LeapFrog staff?

25 A I do not believe they, they were

1 communicated to LeapFrog staff.

2 Q All right. In your view, are these goals
3 realistic? Just kind of borrowing a term that you
4 used in the prior document.

5 A I think, I think they were discussed as
6 aspirational.

7 Q Okay. What does that mean to you?

8 A Something to shoot for.

9 Q Okay. Realistic?

10 A Um, realistic?

11 Q I'm just asking for your view.

12 A Oh. With, with the right strategies in
13 place, I think there's -- and the, and the time
14 horizon, which is, you know, three to five years out,
15 I feel like a lot is possible in that time, and I
16 think the discussion was around like, okay, if these
17 were the -- if these are the aspirational goals, like
18 what are the things we can do.

19 This is in the context of this being in the
20 management team meeting, and there are people that
21 have oversight of different programs, and we're all
22 looking at, you know, strengths of the program and
23 opportunities where -- where could we focus to kind of
24 maximize our efforts to drive the mission and then --
25 and, and reach these new heights.

1 Q So that's -- so we've already kind of --
2 you've already testified to and established that the
3 accolade licensing and the data licensing programs are
4 the two biggest sources of revenue for the
5 organization, correct?

6 A Yes.

7 Q So, so is it fair to say -- and again, I
8 want, I want your view. Is it fair to say that those
9 two licensing programs are critical to achieving
10 possibly, realistically, whatever you want to say,
11 right, these benchmark indicators?

12 A I, yeah, I think that they're important,
13 important components to be able to, to be able to, to
14 reach those, those goals.

15 Q Fair to say that they're the most important
16 components in terms of just pure numbers?

17 A From where we -- I guess from where we stand
18 now, it would, it would be the most important
19 component, but depending on where we focus
20 strategically to try and grow, they could become
21 diluted and become less of a -- a less part of the
22 increase goals, but, but I, I think that they, they
23 could be, they could be, still be significant, and
24 there's opportunity to expand licensing, the, the
25 licensing program.

1 And so I, I think that they will be -- I
2 think they will be -- maintain the percentage or maybe
3 increase, but depending on some of the other strategic
4 parts of the plan, we may, may see, and other ideas
5 that maybe not, are not even listed on here, they may
6 become a part of the -- a part of the pie,
7 percentage-wise.

8 Q So I heard a lot of "mays" in there. What,
9 what are these other ideas?

10 A I'm saying "may" because this is, this is
11 all like very aspirational, like brainstorming type of
12 session, so some of these ideas are not concrete.

13 Q Well, this is, as you see, a board-approved
14 document, correct?

15 A Yes.

16 Q So is this a -- is it, is it right to say
17 that this is a brainstorming session, this document,
18 if it's board-approved?

19 A So I'm, I'm not involved in the board --
20 like I don't attend the board meetings, and so I don't
21 know -- I, from what I understand, this was approved
22 by the board.

23 Q Yes.

24 A And then we identified the specific metrics
25 and, and goals, and how we're -- metrics and how we're

1 going to achieve specific aspirational goals to try,
2 try and reach some of these, some of these benchmarks.

3 Q So from, from your vantage point as director
4 of the licensing programs, how is -- how are your
5 programs? What are the goals or the plans behind your
6 programs to reach these benchmark indicators of
7 \$12 million by 2028 and \$18 million by 2031?

8 A So I think within my specific role, some of
9 the things I work on day-to-day is trying to
10 understand what our, what our current data licensees
11 are, like what they're doing and what they're
12 interested in, and how we can take that to, first,
13 like kind of retain those relationships and improve
14 them, if there's any level of analysis that we can
15 kind of provide to them about the, the information
16 that we have, the data we have about our ratings.

17 So one thing is -- so we don't have those
18 like kind of tumultuous years, we want to create
19 longstanding relationships with, with a lot of these
20 organizations and making it most useful to them.

21 In the process of doing that, identifying
22 what are those things that are making these
23 relationships, relationships successful, and kind of
24 presenting that to new, new audiences that, you know,
25 that reach out to us or that we interact with to show

1 them the value proposition of, of licensing the
2 LeapFrog -- having access to these ratings in a timely
3 way.

4 So being able to, to do that, to truly
5 understand what we offer in the, you know,
6 marketplace, and further enhance that, make it more,
7 make it more visible, part of it is improving --
8 increasing the brand awareness of LeapFrog in these
9 specific markets, increasing our market presence, as
10 we discussed earlier, I think all those things will
11 contribute to growing the, the brand that is, that is
12 LeapFrog and the programs that, that are associated
13 with it.

14 Q So let's look at specifically -- under the
15 "Benchmark Indicators" table, there's a section on
16 "data licensing revenue."

17 Do you see that? September 2025,
18 \$2.3 million data licensing revenue, and then there
19 are benchmarks for September 2028, for a 20 percent
20 increase from 2025, and then a further 20 percent
21 increase going to 2031. It's the same page.

22 A The same page? Okay, yeah.

23 Q Yes.

24 A I didn't see the 20 percent increase. So
25 the September 2025, eight new? Is that --

1 Q Yes, the data licensing revenue section. Do
2 you see that? We're looking at Bates ending 7794.

3 A Okay.

4 Q I see a look of confusion.

5 A I'm sorry. I'm --

6 Q There's a table. It's the next -- under
7 "Benchmark Indicators."

8 A Okay.

9 Q Okay, September -- it's the third cell on
10 down, below "Benchmark Indicators," it says
11 "September 2025, \$2.3 million dollars data licensing
12 revenue."

13 Do you see that?

14 A No, I don't. I can't see it.

15 Q Why don't you give me the --

16 A Yes, please.

17 Q Now do you see it?

18 A Yes.

19 Q Okay.

20 A Okay.

21 Q There's benchmarks going up 20 percent every
22 three years. Do you see that? From 2028 --

23 A Yes.

24 Q -- to 2031?

25 Are those benchmark indicators that you had

1 input in?

2 A No.

3 Q Okay. Are these -- from your viewpoint, are
4 these realistic benchmarks?

5 A For September 2025 -- well, I guess we're in
6 September 2025.

7 Q Yep.

8 A We were not there, so no.

9 Q Well, let's look at 2028, then. A
10 20 percent increase from 2025, is that realistic from
11 your viewpoint as the director of --

12 A Yeah.

13 Q -- this program?

14 A Yeah. I mean we have three years to get
15 there, so yes, I, I think that -- it seems reasonable.

16 Q How about for 2031?

17 A I guess it's possible, possible.

18 Q Okay. Are there benchmarks -- are there
19 benchmarks for these same time periods, 2028, 2031,
20 for the accolade licensing program?

21 A I don't, I don't think so.

22 Q Are you aware of any?

23 A No, I'm not.

24 Q Okay. So let's turn to Bates ending 7797.

25 A Okay.

1 Q All right. Do you see that -- this is under
2 an Objective 3, "Build communities that achieve the
3 mission."

4 If you go down several cells, there's
5 "Purchaser/employers: Enable purchasers and their
6 contractors to tie LeapFrog ratings to payment
7 decisions."

8 What does this -- what does this mean? What
9 do you understand this to mean?

10 A So I understand this to mean -- like so
11 LeapFrog was, was founded by employers and purchasers.
12 We want our data to be used to inform higher, higher
13 value care.

14 So we want to engage -- continue to engage
15 with employers and organizations purchasing
16 healthcare, and incorporating information from
17 LeapFrog and other, and other sources to -- that are
18 important in driving that higher value care.

19 So one of, one of the goals with employers
20 and purchasers that are listed here is that, is that
21 we want to continue to do that, and have those
22 stakeholders incorporated into, into, into contracting
23 with those, with those providers, so that they're --

24 Q "Providers" meaning hospitals?

25 A Sorry, yes, meaning hospitals.

1 Q Okay.

2 A And so that -- I mean that has been -- that
3 is a goal, one of the goals in, in, in providing that
4 data and making it actionable, is making that
5 available to employers and those types of
6 stakeholders.

7 Q In order to accomplish this goal, though, to
8 enable purchasers and contractors to tie LeapFrog
9 ratings to payment decisions, is it right that --
10 isn't it correct that LeapFrog has to have data
11 relating to those hospitals to provide to --

12 A Yeah.

13 Q -- to the purchasers and the contractors; is
14 that right?

15 A Yes.

16 Q Okay, and that means that in order to have
17 that data, they need, they need hospitals to basically
18 respond to the survey, correct, with their data?

19 A So it says "LeapFrog data," so it's
20 including the safety grade.

21 Q Right.

22 A So we, we -- it doesn't -- it's not just
23 necessarily talking about the, the survey, but the
24 safety grade as well, which LeapFrog can grade
25 facilities, regardless of whether they participate in

1 the survey.

2 Q Right, but in order for the -- but would you
3 say that, that purchasers and their contractors would
4 like to see data that's submitted by hospitals in
5 response to the survey data in order to make these
6 decisions about whether to tie payments to --

7 A Yes.

8 THE REPORTER: About whether to tie
9 payments to --

10 BY MR. CHUNG:

11 Q Whether to tie LeapFrog ratings to payment
12 decisions.

13 And so in that same vein, LeapFrog is
14 incentivized to get as many of those hospitals to
15 respond to the survey with their data, correct?

16 A Yes. We, we want to see as many hospitals
17 participating in the survey as possible.

18 Q So under "Health Plan," so just a couple
19 cells down on the same page, it reads, "Pressure plans
20 to tie LeapFrog ratings from payment decisions."

21 Do you see that? Under "Goal," right, so --

22 A Okay.

23 Q On the left-hand column, "Health Plans:
24 Pressure plans to tie LeapFrog ratings to payment
25 decisions."

1 A Yes.

2 Q Do you see that?

3 A I see it.

4 Q What does that mean?

5 A Okay. So I didn't write this, but what it
6 means is like -- is that we want to encourage, we want
7 to encourage health plans to tie LeapFrog ratings to
8 the payment decisions in, in working with, with
9 hospitals.

10 Q Why is the word "pressure" --
11 understanding --

12 A Yeah.

13 Q -- that you may not have --

14 A Yeah.

15 Q But it was, but it was a document for
16 discussion, right, at a management meeting --

17 A Yeah.

18 Q -- as you testified.

19 Why is, why is there pressure being applied
20 to plans to, to tie LeapFrog ratings to payment
21 decisions as a goal here?

22 A Yeah, so, I don't -- yeah, I don't know why
23 the word "pressure" is written, but we -- there is --
24 actually, nothing -- we, we don't have -- it's kind of
25 like an indirect encouragement, and I don't know how

1 we could directly pressure, but there are different
2 ways in which LeapFrog can make the case, either
3 through employers that are, that are working with
4 health plans, and some of them are self-insured. Some
5 of them have -- are, are, are group insured.

6 And some, somewhere along the lines between
7 the employer or the health plan or the, the TPA, they
8 are ultimately going back and having a contract with,
9 with the hospital, and so LeapFrog needs to -- you
10 know, we, we can do a better job of making the case of
11 why our, our -- there are ratings, and information is,
12 is valuable to, to impacting outcomes, and in a world
13 where the -- their payment -- the payment is not based
14 on outcomes, we want to factor into the payment
15 decision so that quality and safety is a
16 consideration, and so that's why that's, that's listed
17 as a goal.

18 But there's certainly more nuance than the
19 word "pressure," that is like we are many steps away
20 from even reaching the health plan and the contracting
21 process, so that, that's like the -- we don't have a
22 direct impact. We're not directly connected to the,
23 the contract, but we know that is a major way of, of
24 improving care that's happening at, at hospitals.

25 And so we're looking kind of upstream of

1 where -- what are the factors at play that make -- to
2 help make hospitals accountable to their patients in,
3 in preventing some of these, you know, terrible things
4 that, that can happen that often can be prevented, and
5 so we want to make that data actionable, and one of
6 the ways that we've identified -- and a lot of our
7 data licensees have, have shared with us is why
8 they're interested in, in LeapFrog data, is to have
9 actionable data by facility, and that's what they get
10 from, from LeapFrog data.

11 Q Right, and so in order to have actionable
12 data, right, for these hospitals -- and this is, this
13 is -- as you testified, this is what the health plans
14 want, correct? They want the actionable data for
15 these hospitals in order to make decisions regarding
16 payment, correct?

17 A They, they want actionable data.

18 Q Right.

19 A They want -- yeah.

20 Q So in order to have that actionable data,
21 the hospitals have to respond to the surveys, correct?

22 A So in order to have the actionable data --

23 Q Yes, to present to these health plans.

24 A Depending on the data -- so for the safety
25 grade, they don't necessarily need to, to -- they

1 don't, they don't necessarily need the, the, the
2 survey, but, but yes, for, for the LeapFrog Hospital
3 Survey, they, they do.

4 Q Okay. Do you know whether LeapFrog has been
5 successful in this goal of pressuring plans, health
6 plans to tie LeapFrog ratings to payment decisions?

7 A Have we been successful in that goal? I
8 mean I do know that there are a number of health plans
9 that, that use the LeapFrog data, and as I mentioned,
10 we don't know the full scope of how they're actually
11 implementing it in their contracting processes, but I
12 do know that is, that is a part of it for, for some of
13 them.

14 Q Do you have any involvement, Mr. Banerjee,
15 in the annual meeting, LeapFrog's annual meeting?

16 A I am not involved in, in organizing it, but
17 I do attend the annual meeting, and it is a, it is an
18 event, it's like an all-day event with sessions and
19 then a dinner at night, and it's kind of a
20 all-hands-on-deck type of event.

21 So every member of the LeapFrog staff is
22 trying to help in some capacity to coordinate the
23 event, but I'm not involved in, in the planning of it.

24 Q Okay.

25 A Just tell me what I need to do.

1 Q How about in -- are you involved in any way
2 in soliciting donations or contributions?

3 A No, I am not.

4 Q Your, your job is truly focused on the
5 licensing programs, correct?

6 A Yes.

7 Q Okay.

8 So in terms of -- let's just focus on the
9 licensing program of the Hospital Safety Grades. Is
10 it just A-graded hospitals, the hospitals that receive
11 an A grade, that are eligible to license their safety
12 grades?

13 A So the licensing program, the accolade
14 licensing program.

15 Q Yes.

16 A So the, the, the Hospital Safety Grade
17 accolade licensing program -- we're just talking about
18 the safe -- just for the safety grades?

19 Q Yes.

20 A We have A hospitals that are licensing
21 their -- the, the rights to use the, the A logo, but
22 there are some B hospitals that are also interested
23 in, in licensing, a few of them, but, but some of them
24 do --

25 Q Okay.

1 A -- license that B logo.

2 Q So there's not a hard eligibility
3 requirement that a hospital needs to have an A grade
4 in order to be able to license that grade; is that
5 your testimony?

6 A Yes.

7 Q Okay. So is it -- so is it that any
8 hospital, regardless of grade A, B, C, D, F, can
9 license their Hospital Safety Grade?

10 A We've never gotten a request for anything
11 lower than a B, but --

12 Q Okay.

13 A -- but I -- if someone wanted to . . .

14 Q So the target population of hospitals for
15 this licensing program are the A hospitals; fair to
16 say?

17 A Yes.

18 Q All right, but you've had possibly some B
19 hospitals?

20 A Yes.

21 Q Okay. Approximately how many hospitals pay
22 LeapFrog to, to license their Hospital Safety Grades,
23 just currently?

24 A For the safety grades, about 22 percent of,
25 of hospitals that receive an A choose to, choose to,

1 to license the logo, yep.

2 Q Okay. Can a hospital freely advertise their
3 Hospital Safety Grade without paying LeapFrog?

4 A Yes.

5 Q It's just the logo that's the issue; is that
6 correct?

7 A Exactly. Yeah, they, they can, they can,
8 they can write it plain text. They can't create their
9 own -- they can't create their own logo, but they are
10 encouraged to -- they're encouraged to promote
11 through, through plain text on their website, tell
12 their board, congratulate their staff.

13 We give them a free press release to -- that
14 they can share with their community that doesn't have
15 a logo on it. It has a quote from Leah about what the
16 safety grade means, and then we have a, a license -- a
17 website that shows what they can do with the Hospital
18 Safety Grade logo. It is kind of geared toward
19 educating about the, what they can do with licensing
20 the logo, but also tells them some of the free things
21 that they can do.

22 For hospitals that, you know, choose to
23 license, we give them template ads that talks about
24 some -- this is very aligned with our mission, and
25 these hospitals that receive As do a lot of things and

1 have very good outcomes on important patient safety
2 metrics, and part of our job is to help them to
3 communicate to the community about what some of those
4 things are.

5 So we have some template ads that have like
6 very, I think, good communication about hand hygiene
7 practices or their nursing workforce, that are all
8 things that contribute to patient safety, and I think
9 where they kind of someone struggle is how am I going
10 to communicate this to the community. We post those
11 template ads, so every hospital that gets an A can
12 see, even if they're not licensing the logo, how they
13 can communicate those things to the, to their
14 communities.

15 Q But as I understand it, all of these kind of
16 templates, right, and, and suggestions are part of
17 almost a package, right, that LeapFrog presents to
18 hospitals that get A grades; is that right?

19 A Yeah, so if I can --

20 Q Is that right?

21 A So, so no, no. No, not package in the sense
22 that they're -- they're not paying anything for it.

23 Q I'm not talking about --

24 A Okay.

25 Q I'm not talking about, you know --

1 A Yeah.

2 Q -- hospitals paying for the program, but
3 once it's determined, right, once it's determined that
4 a particular hospital has gotten, right, an A, an A
5 hospital grade, right, this is part of a -- this is
6 all -- everything that you described is part of
7 basically an orientation to the hospital about what
8 they can, what they can or should do with their, with
9 their hospital grade; is that correct?

10 A The licensing website shows what they can do
11 for free.

12 Q Right.

13 A And so there's a page that talks about these
14 are the things that you can do for free. This is when
15 we're like notifying them that they got -- we're
16 notifying them that they got an A.

17 Q And they're specifically referred to the
18 licensing website, right, when they are first notified
19 that they got an A, correct?

20 A Yeah, so ahead of the, the public release,
21 we -- when I say "we," we have a, we have a consultant
22 that we work with, TelAffects, and their job is to
23 reach out to all the facilities for the safety grade
24 program that received an A, and let them know that
25 your facility is receiving -- will be receiving an A

1 with the next release of the Hospital Safety Grade,
2 and, and the date.

3 This is, this is when it's going to be
4 announced. These are the, these are the free things
5 that you can do to, to make the announcement, and then
6 if you're interested in using the LeapFrog logo, we
7 have a license agreement that you can complete to get
8 access to those ahead of the, the public announcement,
9 to coordinate with whatever plans that they have or
10 they don't have to, to make the announcement.

11 Q And so we'll get into TelAffects later. We
12 have some documents --

13 A Oh, okay.

14 Q -- but TelAffects is a vendor that, that
15 LeapFrog has retained to assist with basically
16 marketing the licensing programs to A-grade hospitals;
17 is that correct?

18 A Yes.

19 MR. CHUNG: Okay. Let's go to the next
20 document, tab 11.

21 (Exhibit 5 was marked for
22 identification.)

23 BY MR. CHUNG:

24 Q All right. Mr. Banerjee, Exhibit 5 is an
25 email chain about the data licensing sales, and you're

1 on this with -- it looks like a forward from you to
2 TelAffects.

3 Do you see that?

4 A Yes.

5 Q Okay, and I just wanted to go briefly over
6 the email attachment, which is the LeapFrog Accolade
7 Licensure Letter of Agreement.

8 Do you see that?

9 A Yes.

10 Q All right. Is this the current letter of
11 agreement for accolade licensing for the organization?

12 A No. This is, this is from fall, fall 2024.

13 Q So there have been changes since then?

14 A Yes.

15 Q Okay. What, what changes to -- and I want
16 to focus just --

17 A Oh.

18 Q -- on the kind of prices here for the safety
19 grade.

20 A No.

21 Q Have there been --

22 A I'm sorry.

23 Q -- any changes to the pricing?

24 A No.

25 Q Okay. So it's still -- it still costs

1 \$29,900 for a hospital with 500 plus staffed beds to
2 license its Hospital Safety Grade or Top Hospital
3 designation?

4 A To license the logo, yes, that's right.

5 Q Why do the prices vary by the number of
6 staffed beds? What's your understanding there?

7 A So the staffed beds, they're -- so we try to
8 make the pricing equitable for different types of
9 hospitals. There's all sorts of different sized
10 hospitals that, that can receive this, that receive
11 the designation.

12 And so from our understanding, there are
13 facilities that, you know, they don't have any, any
14 marketing budget at all, and they -- or very little,
15 but they want to be able to promote their, their A
16 grade, and using the logo and having the LeapFrog
17 brand is an important component of that for them.

18 And then there are, there are others that
19 are very large health systems and hospitals, and they
20 can take out full-page ads in the Wall Street Journal,
21 and so they are -- we try to make it kind of
22 commensurate with what the, what the brand value is
23 worth, but kind of making it accessible for smaller
24 facilities versus larger facilities.

25 Q So the pricing is kind of scaled to the size

1 of, size of the hospital, correct?

2 A Yes.

3 Q And, and one, I suppose, manifestation or
4 measure of the size of the hospital is how many
5 staffed beds the hospital has, correct?

6 A Yes.

7 Q And is -- you mentioned that this is kind
8 of -- that this is a, an equitable kind of range of
9 prices, but is it also part of the rationale, part of
10 the rationale behind the pricing that it's better to
11 at least get some revenue, even if it's at a lower
12 price from, from let's say smaller hospitals, than no
13 revenue at all?

14 A We want smaller hospitals to be able to
15 promote the Hospital Safety Grade.

16 Q But you're charging them for that --

17 A Yeah.

18 Q -- correct?

19 A Right, yeah, yeah, we want to, we want to be
20 able to charge them, but if we price it too high, then
21 they won't have -- so these hospitals see value in
22 promoting with the logo. That's why they're choosing
23 to make that additional purchase, but -- so we, we
24 want to be able to make that available to them, and if
25 we price it too high so that they're not doing that,

1 we're kind of doing them a disservice, because they
2 are not able to use that to educate their patients and
3 the community in the same way.

4 Q They won't be able to pay for it, bottom
5 line?

6 A They won't be able to pay for it, but that's
7 why we want to make it equitable, not just because we
8 won't be able to charge them.

9 Q So the, the safety -- just on the safety --
10 continuing on the hospital safety grades, LeapFrog
11 also licenses the hospital safety grades to insurance
12 companies, correct?

13 A Yes.

14 Q All right, and we went over this a bit
15 earlier with respect to the, to the board-approved
16 document.

17 Do you know how many insurance companies
18 have licensing agreements with LeapFrog?

19 A I don't, I don't have -- I don't know the
20 exact number offhand.

21 Q How does LeapFrog go about approaching or
22 marketing to insurers about licensing the hospital
23 safety grades?

24 A So we don't do a lot of like outbound
25 marketing. Most of --

1 Q What do you do?

2 A Sorry?

3 Q What do you do?

4 A Oh, yeah, we -- most of it is inbound
5 inquiries that we get, primarily after the, like a
6 release of the Hospital Safety Grade release,
7 there's -- we see some inbound interest and, and
8 inquiries. We -- you know, I think we have some, some
9 posts on, on LinkedIn. Not recently, but we have
10 attended some, some conferences before for -- some
11 industry conferences to create some awareness and
12 education about, about what, what LeapFrog has in
13 terms of, of the data available.

14 Q How do these insurance companies that
15 license the hospital safety grades -- where do they
16 feature the hospital safety grades? How, how do they
17 use them?

18 A So there's two main ways. The first is they
19 want to -- they want to educate their members about
20 hospital, hospital safety and quality measures that
21 LeapFrog collects on, so they will take our data, they
22 have the rights to use it, and then some of the logos
23 that we provide them --

24 Q I'm actually focusing just on the hospital
25 safety grades, not the data.

1 A Okay. All right. So for the hospital
2 safety grades, they want to -- you know, LeapFrog is
3 widely recognized as a, as a brand in patient safety,
4 and they want to stand behind the, the transparency
5 and the accuracy and rigor that goes into the Hospital
6 Safety Grade. They don't want to just say like our
7 health plan assessment is -- that this is a
8 high-quality hospital, or just post the CMS star
9 ratings on there.

10 For whatever reason, some of them have -- do
11 post it, but they -- there's provider directory tools
12 that are available to members --

13 THE REPORTER: Provider what?

14 THE WITNESS: Provider directory tools that
15 are available to members, so that when those
16 members are seeking care through the resources
17 that the health plan makes available, there is
18 some information available from LeapFrog about
19 the facility.

20 Sometimes they have provider-level
21 information about specific doctors, but largely
22 what -- a lot of the health plans are interested
23 in supplementing, or some of them don't have any
24 facility-level information, and they want to use
25 the Hospital Safety Grade to show their members

1 and inform them about the quality and safety of
2 the data.

3 BY MR. CHUNG:

4 Q And it's, it's -- so these insurance
5 companies are basically just showing, featuring the
6 logo itself containing the Hospital Safety Grade to,
7 to the consumers; is that right?

8 A No. Well, yes. Sometimes they are --
9 they're kind of --

10 Q Isn't that what they're licensing, the logo
11 itself?

12 A They are licensing the logo and the
13 underlying data, so --

14 Q Okay.

15 A -- they have access, full access to the --
16 all the data that is on the Hospital Safety Grade
17 website. The, the grade for, for the current period,
18 the -- all the measures, the reporting periods, the
19 sources, the past grades; everything is all on the
20 safety grade website, but it's essentially kind of
21 like an offload from that website. They have access
22 to that. They can represent that individual
23 underlying data information on their website, or we
24 also give them the URL links to the specific hospital
25 page.

1 So if someone -- if a member is interested
2 in, in learning more information about the facility,
3 they can click on that, and it will direct to that
4 specific hospital page. Some of them choose to link
5 directly to the, the main LeapFrog website, because
6 they like the representation --

7 Q So that's one way.

8 A -- on our website.

9 Q What's the second way that you testified to?

10 A Oh, the other, the other way is -- it's more
11 internal use. So doing assessment, like internal
12 assessment of the quality and safety of, of, of the
13 hospitals that are in their, in their network or even
14 outside of their network; quality improvement
15 initiatives, different contracting use cases. We
16 don't have like full visibility on all, what all those
17 internal use cases are.

18 MR. CHUNG: Let's turn to tab 17. This will
19 be Exhibit 6.

20 (Exhibit 6 was marked for
21 identification.)

22 BY MR. CHUNG:

23 Q So Mr. Banerjee, Exhibit 6 is an email chain
24 from May of 2020. Take a look at that. Let me know
25 when you've had a chance to flip through it. It has

1 do with kind of the spring '22 accolade licensing
2 cycle.

3 A Okay. Spring '20.

4 Q 2020, yep.

5 A All right.

6 Q Yep. So I want to direct your attention to,
7 first of all, to Bates page -- it's really the second
8 page, Bates ending 5321.

9 A Okay.

10 Q And you write to Ms. Binder, copying
11 Ms. Mobley and Ms. Eidson, "Hi, Leah. We had six more
12 sales and \$60,000 in yesterday, including for Inova
13 hospitals (\$34,000). Our spring total is at 59
14 licenses," and then you kind of go on and provide
15 additional numbers there, right, "and we are following
16 up with rogue hospitals who posted ads without a
17 license, which sometimes translates into licenses. So
18 I believe there's still a significant opportunity left
19 for us . . . in the cycle."

20 How many hospitals per cycle do you find
21 that, typically, that post ads without a license?
22 First of all, what do you mean by "ads" here? Is it
23 the, the logo itself that they're posting without a
24 license?

25 A Yeah, so they sometimes -- so you're asking

1 how many?

2 Q Yeah, generally.

3 A I mean not -- most of them are -- comply
4 with, with like our, our terms of use in using the
5 logo, but there's, there's sometimes -- there's like a
6 handful, maybe like --

7 Q Okay.

8 A I don't know. Like five to ten.

9 Q So when you learn about a specific hospital
10 using the logo, right, without a license, what, what
11 do you do?

12 A So TelAffects handles, from beginning to
13 end, every part of the outreach. I don't interact
14 with any, any hospitals --

15 Q Understood, but --

16 A -- with that -- so, so --

17 Q -- what does, what does LeapFrog --

18 A Yeah, yeah.

19 Q -- do in these circumstance?

20 A So, so TelAffects does do the outreach to
21 inform them that we -- that they are not allowed to
22 create their own logo, and, and that they need to
23 take, they need to take down any -- if they have like
24 a different representation of, of the A logo, we let
25 them know that, that they need to take it down.

1 But maybe if they're not aware that we have
2 reached out to them about, about the rights to use the
3 logo, so they kindly introduce the idea and, and give
4 them a licensing agreement, if they are interested in
5 using that, to do that type of promotion, we kind of
6 have TelAffects inform them how to go about doing it
7 in the right way.

8 Q Okay. Let's --

9 A And so that's what I was kind of referring
10 to here, that like, oh, some of them were -- they
11 posted without a license, but some of those might be
12 interested in, in licensing.

13 Q Right, but when you make contact with them,
14 basically, that you might actually convert these
15 rogue --

16 A Right.

17 Q -- hospitals to actual licensees --

18 A Yes.

19 Q -- right? Okay.

20 So let's go to Bates ending 5323. You're
21 writing to Leah Binder, "Hi, Leah. We had a nice
22 sales day yesterday."

23 Do you see that?

24 A Yes.

25 Q Okay, and there are a few numbered items.

1 If you look at the second numbered item, "AHN's
2 biggest area competitor, UPMC, began licensing all
3 UPMC's A hospitals from us last fall, following their
4 100 percent system survey participation in 2018," and
5 then you write, "Got to love competition (\$130,000 in
6 new licensure sales in western PA in the last year),"
7 and then you say, "As a former Pittsburgher, I'm happy
8 to see our influence spread and factor in this
9 ultra-competitive environment."

10 What did you mean by "ultra-competitive
11 environment" here? What, what is that describing?

12 A So I lived in Pittsburgh for, for a little
13 bit.

14 Q Yep.

15 A And there's -- it's a, it's a -- having
16 lived there, I didn't really, really appreciate before
17 that that there are two major health systems and
18 health plans. Like it's kind of integrated finance
19 and delivery systems, where you have a health plan
20 that owns a health system, which in this case is
21 Allegheny Health Network, and then there's UPMC, which
22 has their own health plan, and they are very big
23 players in all of Pennsylvania.

24 And so I had -- I think I had a little bit
25 of extra insight into what the competition is. I

1 never lived anywhere where there's health systems that
2 are like actively attacking each other on TV. They're
3 like political ads, but for healthcare, and some
4 people are not in network, and they don't have access
5 to like well-known hospitals that they live very
6 close, close by to.

7 So I was just like adding in this internal
8 email some extra insight that I had from having lived
9 in -- lived there, that this is a very competitive
10 environment, and there, there are hospitals that are,
11 you know, attacking each other for all sorts of
12 different reasons, but they learn to, in this case,
13 kind of showcase that they're, they're competing on
14 patient safety, which is directly relevant to us, and
15 kind of using the Hospital Safety Grade to kind of
16 make that case to their constituents or stakeholders.

17 Q Right, and that's so -- and you highlight
18 here "\$130,000 in new licensure sales in western PA in
19 the last year," so this -- just based on kind of the
20 fact that you lived there, you observed this
21 ultra-competitive environment between these two health
22 systems. They are -- they're licensing their
23 health -- their hospital safety grades to compete
24 against one another, is that right, as part of the
25 competition against one another, correct?

1 A Right. They want to license the logo to use
2 LeapFrog as a, as a way of showcasing their patient
3 safety to their, to their communities.

4 Q Right, and in this, in this environment, the
5 ultracompetitive environment between these two,
6 that's -- that actually translated into, to benefit to
7 LeapFrog, correct, in terms of the revenue?

8 A Yes.

9 Q Okay.

10 Do you, in terms of -- does LeapFrog analyze
11 or have research on kind of competition, kind of the
12 competitiveness in certain markets among hospitals or
13 hospital networks?

14 A We -- I'm sure over time we've, we've looked
15 at specific health systems and regions to see, yeah,
16 where there's more competition, but it's kind of like
17 a moving landscape with different mergers and
18 acquisitions that are happening.

19 So in certain markets with different, you
20 know, like new acquisitions, we may like take a look
21 at, at seeing, you know, some of the different factors
22 of -- I mean specifically like with accolade
23 licensing, to see like, oh, is there any, is there any
24 impact on, on this change to, to the licensing
25 program, for example, like the licensing, accolade

1 licensing program, for example, to see if there's any
2 impact on, on any of like mergers or acquisitions or
3 like any -- I can't think of any specific examples,
4 but it is something that we could potentially look at,
5 that we have looked at.

6 Q Okay. Have the -- so just to break that
7 down, you have looked at kind of the competitiveness
8 among hospitals or hospital systems in markets for the
9 purposes of how to market or where to market the
10 licensing, the accolades licensing program?

11 A I can't think of any specific examples.

12 MR. CHUNG: Okay. Let's go to the next
13 document, tab 12. This will be Exhibit 7.

14 (Exhibit 7 was marked for
15 identification.)

16 BY MR. CHUNG:

17 Q So now we're going to -- you mentioned
18 TelAffects. We'll go over a document or two regarding
19 TelAffects.

20 So Exhibit 7 is a spring 2022 -- it looks
21 like a training presentation for TelAffects.

22 Do you see that?

23 A Yes.

24 Q How long has LeapFrog worked with
25 TelAffects, so far as you know?

1 A I think it was around 2016, 2017.

2 Q So around the time you started at the
3 organization?

4 A It was, it was after I started at the
5 organization.

6 Q Okay. Did you a role in, in retaining
7 TelAffects?

8 A I was -- we had a consultant that helped us
9 to find and initiate the relationship with TelAffects,
10 but I was kind of loosely involved in some of the, in
11 some of the informing and getting, getting them up to
12 speed on the, on the program.

13 Q Okay. So what, what do they do for -- just
14 briefly, what do they do for LeapFrog?

15 A So from the -- even this was before my time
16 at LeapFrog, but from the inception of the Hospital
17 Safety Grade program in 2012, we have always had an
18 independent licensing agent that does the accolade
19 sales for LeapFrog, and so the purpose of having an
20 independent licensing firm is to separate LeapFrog and
21 ensure that there's no conflict of interest between
22 the ratings that we're putting out and the licensing
23 of the logo, and so we have continued to maintain that
24 separation from the very beginning of the licensing
25 program.

1 When the licensing program started in 2012,
2 we had one individual licensing agent, just one person
3 that was responsible for sending emails to all the
4 facilities, letting them know about this, that, that
5 they -- that they're going to be -- that they have the
6 opportunity to use the, the LeapFrog logo, and they
7 can pay for it if, if they want.

8 So one of the purposes of moving from that
9 one to, to TelAffects -- TelAffects is a, is a
10 telesales firm. That's what they specialize in.
11 They're located in Florida.

12 Q What do you mean by "telesales"? It's like
13 telemarketing?

14 A Yes. It's kind of like they, they call --
15 they -- their projects and their, and their clients,
16 they call and -- it's pretty much like what -- they
17 run campaigns, like calling campaigns generally for,
18 for their other clients, to make, make sales to do
19 customer -- do customer engagement initiatives.

20 They, they actually do a lot more work than
21 even like that's in -- like our scope of work that I
22 don't, I don't have the full visibility on, but what
23 we -- when we worked -- when we started working with
24 them, we made it -- we tried to make it clear that we
25 wanted to create like, kind of like a customized

1 program, and we want them to be representatives of us,
2 of, of LeapFrog, to do this outreach to, to hospitals
3 and give them the opportunity to, to license the
4 LeapFrog marks and for -- well, it's -- there's a
5 couple different steps.

6 So one, make the notification about what the
7 grade is going to be.

8 Q Right.

9 A Tell them what they can do for free, and
10 most, probably most importantly, that this is -- they
11 are representing us in this, make it clear that they
12 are independent sales agents, and that we are -- that
13 they're not going to use any type of hard sales
14 tactics, and we're an independent nonprofit
15 organization.

16 If a hospital is not interested in, in using
17 the LeapFrog marks, the badge, then you kind of just
18 close the book on, on that specific hospital and kind
19 of move on to the next one. We just want to make sure
20 that every hospital that gets an A or the Top Hospital
21 award knows that they have -- if they want, they have
22 an opportunity to use, to use these marks. So that
23 is -- that's why we, we have them.

24 One of the other benefits we have of using
25 TelAffects is that this is, this has kind of in their,

1 in their wheelhouse. They're customizable, but then
2 they can also expand and shrink their consultants that
3 they have during the year, during times where LeapFrog
4 may need them more.

5 So during the weeks leading up to the public
6 release, where, you know, a lot of hospitals might be
7 interested in preparing for the public release, they
8 can have, you know, six or seven people that are
9 trained up.

10 Q So they can scale up or down --

11 A Yeah.

12 Q -- depending on, depending on the time,
13 right, but ultimately -- and thank you for going over,
14 you know, the services they, that they provide for
15 you.

16 They are an agent, am I right, for LeapFrog,
17 as you, as you testified to, to, to obtain or try to
18 obtain licensing agreements, right, with, with
19 hospitals; is that correct?

20 A Yes.

21 Q Okay. How much does LeapFrog pay
22 TelAffects? What's the compensation arrangement?

23 A They are paid hourly. There's some startup
24 fees, but I think we pay them around like 40 something
25 dollars an hour.

1 Q Okay. Per representative --

2 A Per representative.

3 Q -- that they send over?

4 A Yeah.

5 Q Okay. Do they receive -- are there any sort
6 of incentive components to the compensation tied to
7 specific licensing sales goals or the number of
8 agreements reached?

9 A We, we have -- for the, the frontline
10 salespeople, we do look at our, our goals for the
11 licensing, accolade licensing program --

12 Q Yes.

13 A -- and try to, during the cycle, forecast
14 where -- the trajectory of how we reach those goals,
15 and then align based on, based on how the accolade
16 sales have trended the year before. That's one
17 consideration, but our goal is, we try to set certain
18 benchmarks at certain days to, to make as realistic as
19 possible certain goals for them so that we can give
20 some type of compensation bonus for, for having a
21 specific set point, like number of sales through a
22 certain number of days.

23 Q Okay. So how much are those bonuses as a
24 percentage or just as an absolute number?

25 A Yeah, so they are -- they're generally

1 around five hundred -- \$500 for -- so there's
2 typically probably like eight dates in a year, in a,
3 in a cycle where we set those benchmarks, and they
4 start at like five hundred, and then if they reach
5 like a second level, it could be a thousand.

6 In one entire cycle, it could be somewhere
7 in the neighborhood of like \$8,000 to \$10,000 that are
8 potentially available if they, if they hit every,
9 every goal.

10 Q So this training, the training deck, this
11 is -- am I correct that this is a PowerPoint or
12 training deck that LeapFrog puts together and updates;
13 is that right?

14 A So this is, this is a training deck I think
15 that TelAffects has put -- this is something that
16 TelAffects has put together, based on information that
17 we have given, we've given them about the program.
18 What they do is we have a front --

19 Q Let me take you to the cover email -- I'm
20 sorry to interrupt you -- just to kind of -- it says
21 here "Alicia Vann."

22 Who is Alicia Vann? Looking at the very
23 first page of the exhibit.

24 A Oh, yeah, Alicia Vann was the senior
25 licensing agent for, for LeapFrog that works at

1 TelAffects.

2 Q Understood. Okay, but she has a LeapFrog
3 Group email address?

4 A Yes. She, she -- we, we give the, the
5 TelAffects agents LeapFrog Group email addresses.

6 Q Okay. So let's go to -- let's go into the
7 deck itself. If you'd go to Bates ending 4946.

8 A Oh, sorry. I was looking at the wrong
9 number.

10 Q Objectives. There you go.

11 All right. So it says here "LeapFrog
12 Group's Objectives," and for TelAffects, it's
13 "increase awareness of The LeapFrog Group and the
14 Hospital Safety Grades," and to "obtain signed
15 Agreement from hospitals to license the Hospital
16 Safety Grade for use in external and internal
17 marketing."

18 Do you see that?

19 A Yes.

20 Q All right, so one of the objectives -- the
21 two objectives is to get basically licenses, secure
22 licenses, right, from hospitals, correct?

23 A Yes.

24 Q And then it says that "The LeapFrog Group's
25 long-term goals" are "increase license sales to grow

1 resources that will help develop new strategies and
2 tools to support their mission to trigger giant leaps
3 in improvement of patient safety."

4 Do you see that?

5 A Yes.

6 Q And do you agree with that long-, that's a
7 long-term goal?

8 A Yes.

9 Q Okay. On the -- if we flip to Bates ending
10 958, it's a slide titled "Why license your A?"

11 Do you see that?

12 A Yes.

13 Q And the top bullet is "External Marketing,"
14 and it says "gain competitive edge on local
15 marketplace to drive increased patient traffic,
16 revenue," and then the next bullet point is
17 "recruitment of better doctors and medical
18 professionals," and the third is "educate patients on
19 hospital safety and reassure them of safe care."

20 So is this a part -- so this is a training
21 deck to train TelAffects representatives who are going
22 to be going out to solicit potential licensing
23 agreements from hospitals, correct?

24 A Yes.

25 Q So in essence, these are kind of talking

1 points that those TelAffects telemarketers are using
2 kind of out in the field?

3 A Yes.

4 Q Okay, and so fair to say that this
5 particular slide or this set of talking points is
6 directed for TelAffects telemarketers who are
7 targeting hospitals that have just received or maybe
8 have a -- have gotten repeat A hospital safety grades,
9 correct?

10 A Yes.

11 Q All right, and then so in terms of the --
12 the external marketing here refers to -- it looks like
13 the hospital's external marketing; is that correct?

14 A Yes. Right.

15 Q What they're able to market to the world,
16 using a license of the Hospital Safety Grade; is that
17 right?

18 A Yes.

19 Q All right, and so the first kind of piece of
20 external marketing is for that hospital to "gain
21 competitive edge in [the] local marketplace to drive
22 increased patient traffic."

23 Do you see that? I'm just looking up top.

24 A Oh, sorry. Was it under -- is that under
25 "Internal"?

1 Q Under "External Marketing."

2 A Oh, yes. Sorry. Yes, patient traffic, yes.

3 Q Right, so "gain a competitive edge" with
4 increased patient traffic and revenue, correct?

5 A Yes.

6 Q So part of the, kind of the pitch here that
7 TelAffects and LeapFrog are using is that if you
8 license -- by licensing your A health safety grade,
9 you can help drive upward patient traffic and revenue,
10 correct? That's part of the message?

11 A Yes.

12 Q Okay, and then the other message below that
13 is if you license your A health safety grade, you can
14 drive "recruitment of better doctors and medical
15 professionals"; is that right?

16 A Yes.

17 Q All right, and is it true that if this is --
18 if these are kind of external marketing messages, the
19 drivers for an A, for a hospital that receives an A
20 Hospital Safety Grade, would you agree that the
21 converse is true? And I'll just kind of lay it out
22 for you, that -- let's say a D or an F hospital, that
23 publicity of their D or F Hospital Safety Grade
24 lessens or hurts their competitive edge in the local
25 marketplace?

1 MS. WOOD: Objection to form.

2 THE WITNESS: Yes. I mean I think that,
3 that would, that would be -- yeah, I think that
4 could be -- yeah, it wouldn't help, it wouldn't
5 help their, their reputation, right.

6 BY MR. CHUNG:

7 Q And just kind of breaking it down, because
8 I'm very interested kind of in this line right here in
9 terms of the messaging.

10 So would the converse be true in the sense
11 that a D or, even worse, an F hospital would be
12 impacted or harmed with less patient traffic because
13 of the publicity surrounding that particular grade?

14 MS. WOOD: Objection to form.

15 THE WITNESS: I mean my focus has been on
16 the A hospital. I hadn't really thought about
17 the converse of -- like the impact of the safety
18 grades on D and F hospitals.

19 BY MR. CHUNG:

20 Q Okay. How about in terms of recruitment or
21 even retention, right, of staff, including doctors?
22 Do you think that a D or an F Hospital Safety Grade
23 would impact -- I think you testified earlier it would
24 certainly impact the reputation, but, by extension,
25 would impact their ability to recruit or maintain kind

1 of talented staff at a hospital?

2 A So the recruitment of better doctors and
3 medical professionals, that is an idea that came from
4 us, from, from TelAffects talking to some of the
5 hospitals and health systems that the license, the
6 Hospital Safety Grade, and that they see it as a way
7 to promote the, the safety.

8 There's connections to just the culture at
9 that facility that is represented, embodied in the
10 Hospital Safety Grade, and so we've kind of taken that
11 message and, and put it in here and kind of like, kind
12 of like -- in talking to -- having the licensing team
13 talking to some of these other facilities, that this
14 is another way to kind of think about what the
15 Hospital Safety Grade and the A means.

16 So that's just like -- that's why that's on
17 here, and I had not thought about what, what -- if
18 other hospitals -- and I don't know if other hospitals
19 are thinking about that from, from the opposite
20 perspective for -- I don't imagine that they're using
21 that to -- in recruitment or retention of medical
22 professionals.

23 Q Yeah, understood, because if, if this is
24 true for an A hospital, that an A grade helps with
25 recruitment of doctors and other staff, a D and F

1 grade would have the opposite effect, correct?

2 A Well, I think that the A hospitals that want
3 to use it this way are actively promoting it. I don't
4 think a D or F hospital would -- I think they just
5 wouldn't do anything about what -- in terms of
6 recruitment or retention.

7 Q Understood, but not so much that the
8 hospital itself, right, putting forward a D or an F
9 grade, but that the publication or the publicity
10 surrounding a D and F grade would have this impact.

11 Would you agree with that?

12 A I, I don't know if doctors and nurses, when
13 they're considering hospitals, if they're looking at
14 the hospital's safety grades.

15 I do, I do, I do know that the hospitals
16 that license have told us that they want to actively
17 use it for that purpose, but I'm just not -- I just
18 don't know if, if -- I mean certainly the D and F
19 hospitals aren't telling --

20 THE REPORTER: Hold on. Certainly the what?

21 THE WITNESS: Certainly the D and F
22 hospitals are not actively promoting it, and then
23 the other side of that is the doctors and nurses.
24 I don't know if they're looking at that whenever
25 they are considering the current place that

1 they're working at or considering working at one
2 of those facilities. I just don't know if that
3 hospital safety grade has any impact on that at
4 all.

5 BY MR. CHUNG:

6 Q Okay, but -- I kind of understand your
7 point, but fair to say that if a doctor or nurse or
8 other sort of professional staff, right, were exposed
9 to or learned of a D and F hospital safety grade for a
10 particular hospital, that that would make that
11 hospital less attractive, right --

12 MS. WOOD: Objection to form.

13 BY MR. CHUNG:

14 Q -- in terms of employment for that
15 particular professional?

16 Would you agree with that?

17 A I just, I just don't know what impact that
18 would have, honestly.

19 Q Well, in, in a competitive -- in terms of
20 the competitive edge, or to use the Pittsburgh
21 example, right, if you had a D and F hospital, you
22 know, competing with an A hospital, at least according
23 to the hospital safety grades, right; in terms of
24 recruitment and retention, the A hospital would have
25 the competitive edge over the D and F hospital,

1 correct?

2 MS. WOOD: Objection to form.

3 THE WITNESS: I think they would -- each
4 individual I think would have to make their own
5 assessment of, if what they, if they value it, if
6 they, if they want to go and look up the hospital
7 safety grades and see like what goes into it, I
8 think -- I just don't know. I haven't thought
9 about that before.

10 BY MR. CHUNG:

11 Q Let's go to --

12 (Discussion was held off the record
13 concerning a possible break.)

14 MR. CHUNG: Why don't we stop here and why
15 don't we take a break.

16 THE VIDEOGRAPHER: This marks the end of
17 media unit number 2. Going off the record, the
18 time is 12:20 p.m.

19 (Whereupon, the lunch recess was
20 taken.)

21 THE VIDEOGRAPHER: This marks the beginning
22 of media unit number 3. Going back on the
23 record, the time is 13:20 p.m.

24 BY MR. CHUNG:

25 Q All right. Before the break, we were

1 looking at Exhibit 7, basically the training deck for
2 TelAffects, Mr. Banerjee. Let's go back to that
3 document.

4 Now, let's turn to Bates stamp ending 5022.
5 It's basically page 63 or slide 63, just as another
6 shortcut.

7 Are you there?

8 A Yes.

9 Q All right. So this slide is titled
10 "Overcoming Common Objections." Do you know -- where
11 do these common objections come from? Are they what
12 you've heard from hospitals in previous cycles?

13 A Yeah, some of these we've heard from
14 other -- from hospitals. That's a feedback that we
15 received or, or questions where we might anticipate
16 there being an objection.

17 Q Okay, and so one of -- there are several
18 here, and the last one here is "people haven't heard
19 of the LeapFrog Group, it's not as recognized as U.S.
20 News or Consumer Reports."

21 Do you see that common objection?

22 A So we have, we have -- I don't know if we've
23 heard that specifically, but it's just --

24 THE REPORTER: You said I don't know?

25 THE WITNESS: I don't know if we've heard --

1 this was, this was from many years ago, but we --
2 as I mentioned before, LeapFrog is well-known
3 among hospitals, and I think there's probably
4 less general brand recognition amongst the
5 general public from LeapFrog compared to U.S.
6 News, which has lots of other accolades, even
7 extending beyond healthcare.

8 So it's probably a more recognizable brand
9 from a consumer perspective, and so as, you know,
10 hospitals are trying to determine how they want
11 to be perceived by the public and what brands
12 they want to connect themselves to and awards
13 they want to recognize, that is -- that may have
14 been an objection that we have heard, that we
15 have limited resources to allocate, limited
16 marketing budget, and we'd like to utilize
17 another recognition that's not related to patient
18 safety.

19 BY MR. CHUNG:

20 Q So let's, let's flip a few more. There are
21 some approved responses to these common objections, so
22 if you look at slide 66, Bates ending 5025, there is
23 an approved response corresponding to this "people
24 haven't heard of The LeapFrog" common objection.

25 Do you see that? Are you on the slide?

1 A Is that still --

2 Q 66.

3 A Yes, I see it.

4 Q All right. So you'll see there the
5 response, right, for the TelAffects telemarketers is
6 if you're presented with this common objection,
7 respond with "each year we are featured in hundreds of
8 magazine, newspaper, TV, and radio reports to
9 consumers everywhere. In 2020, over 2,300 hospitals
10 devoted time and resources to LeapFrog Group's
11 Hospital Safety Survey, one of our other hospital
12 safety initiatives."

13 So is it fair to say that LeapFrog, at least
14 in this response, uses the participation rate in the
15 hospital survey as basically an indication, a signal
16 to hospitals of LeapFrog's kind of brand?

17 A So one thing I'll say is we did not draft
18 this, this PowerPoint deck. No one at LeapFrog would
19 call it the Hospital Safety Survey.

20 Q Right, but my question is -- but my question
21 is -- so the number of -- at least in 2020, right? I
22 understand that there are probably successor versions
23 of this. The number of hospitals, 2,300 hospitals,
24 that devoted time and resources to the Hospital Safety
25 Survey, right, are highlighted here.

1 So is it, is it fair to say that LeapFrog is
2 using the number of hospitals or the kind of the
3 participation rate as an indicator of kind of the
4 extent of its brand at this time?

5 A I think what TelAffects was trying to do
6 here in drafting this statement is understanding, as
7 to my point earlier, about a lot of hospitals have
8 heard of LeapFrog, and so I think they're trying to
9 educate about we have -- we're very well-known amongst
10 other hospitals.

11 This is how other hospitals, including
12 hospitals that, that you were familiar with, may be
13 competing against on for patients, and LeapFrog's, you
14 know, safety and quality initiatives, specifically the
15 LeapFrog Hospital Survey is, is one of the things that
16 they devote time and resources to, because it's
17 important.

18 So I think it's kind of just using not the
19 general public -- so the first sentence is about
20 the -- how, how LeapFrog is featured in public-facing
21 media.

22 Q This "hundreds of magazines, newspaper, TV,
23 and radio reports to consumers everywhere," right?

24 A Right.

25 Q So it's featured -- it's signaling to the

1 objector, right --

2 A Right.

3 Q -- that the organization is featured in a
4 lot of media; is that correct?

5 A Yes.

6 Q Okay.

7 A And then the second sentence is about how
8 LeapFrog is recognized amongst other hospitals, so --

9 Q 2,300 hospitals, correct?

10 A Yes.

11 Q Right. So the number of hospitals that
12 participate in the survey is specifically called out,
13 correct?

14 A Yes.

15 Q Okay, and so the reason for that is that the
16 greater number of hospitals or the participation rate
17 among hospitals, the, the greater the brand of
18 LeapFrog is to, to potential licensing customers; is
19 that right?

20 A Yes, because the question is people have not
21 heard of the LeapFrog Group.

22 Q Right.

23 A And so the response to that is a lot of
24 hospitals have heard of it and a lot of the general
25 media has heard of it, so that's what those two

1 sentences are addressing.

2 Q So LeapFrog -- so LeapFrog then is better
3 positioned to sell accolade licensing when it can say
4 that more hospitals have participated in the hospital
5 survey and that LeapFrog has a lot of exposure in the
6 media; is that right?

7 A Yeah, that's generally true.

8 MR. CHUNG: All right. Let's move on to
9 next document, tab 18.

10 This will be Exhibit 8.

11 (Exhibit 8 was marked for
12 identification.)

13 BY MR. CHUNG:

14 Q All right, Mr. Banerjee, Exhibit 8 is a
15 document titled "Fall 2023 HSG and Top Hospital Sales,
16 December 11, 2023."

17 Do you recognize this document?

18 A I don't, I don't remember it specifically.

19 Q Okay. Well, let's focus just on a couple of
20 numbers, go through this quickly. So at the top it
21 shows -- it lists 72 percent renewal rate for hospital
22 safety grades.

23 Do you see that?

24 A Yes.

25 Q All right, and that's 57 out of 79

1 hospitals. Does that line up with kind of your,
2 generally with your recollection of the renewal rate
3 among Hospital Safety Grade licensees at this time?

4 A Yeah, I think that's in the range.

5 Q Okay. Just based on your experience in this
6 area, is that a relatively high renewal rate, kind of
7 when it comes to licensing in this world?

8 A That is -- and I've only had experience in
9 this program, but, but yeah, I think 70 percent has
10 been, has been among the, the higher renewal rates.
11 Sometimes 80 percent.

12 Q We went over this previously, but is it, is
13 it correct that the, that the majority of the accolade
14 licensees are A-grade hospitals?

15 A The majority of accolade licenses are
16 A-grade hospitals, yes.

17 Q So fair to say that the majority of the
18 renewals here are of A-grade hospitals?

19 A Yeah, this is -- HSG, Hospital Safety
20 Grade --

21 Q Hospital Safety Grade.

22 A Yeah, "HSG" written here is Hospital Safety
23 Grade renewal, so those are, those are A hospitals
24 that have licensed the year before, and then it is
25 a -- I don't think we have discussed this, but it's a

1 one-year licensing agreement, and there's two cycles.

2 So if they have an A and they want to use
3 the logo, we give them the current cycle logo. In the
4 subsequent cycle, if they get an A again, we give them
5 that logo again, updated for the current date stamp,
6 and then it expires, and then the subsequent cycle, if
7 they get an A again, they have an opportunity to, to
8 purchase the new logo.

9 Q Okay.

10 A So that's what the renewals are.

11 Q If we look at the next page, so Bates ending
12 8598, under the "No Interest Details," which is toward
13 the bottom of the page.

14 Do you see that?

15 A Yes.

16 Q Just looking that over, do you know what's
17 being -- can you describe what's being -- what's laid
18 out here in the bullet points?

19 A So this is information that the licensing
20 team collects on facilities they have reached out to
21 about licensing that have told them that they're not
22 interested in licensing, and so they're -- when they
23 provide any type of detail, try to, sometimes they --
24 most of the times we don't get any feedback, just no
25 responses, but sometimes they do give some level of

1 insight, and we try to track the reasoning for that.

2 Q And when you say "licensing team," that's
3 the TelAffects team?

4 A Yes.

5 Q Now, the penultimate bullet is "Chelsea
6 Hospital don't do pay-to-play licensing."

7 What did you take that to mean?

8 A Some -- well, some hospitals that we reach
9 out to, they, they don't -- we talked when they call
10 in. It could be to any, any, anyone that really works
11 at the hospital. Sometimes it's like the marketing
12 department, sometimes it's the quality, sometimes it's
13 people that have not heard of LeapFrog.

14 And so they talk to a lot of different types
15 of people. Some people are more educated on what
16 LeapFrog does, they have an understanding, and some do
17 not. I assume this is someone that doesn't know a lot
18 about what LeapFrog does. We don't do pay-to-play
19 licensing, but that is the response that they got, and
20 it's feedback that we, we welcome, because there's
21 still opportunities to educate people --

22 Q Is that a --

23 A -- when we have the opportunity.

24 Q Is that a comment that you have heard from,
25 from other hospitals or potential licensees?

1 A No --

2 Q Is this the first time --

3 A -- not --

4 Q This is the first time you're seeing it?

5 A I mean I don't -- it's not -- it is not
6 something we, we commonly hear. It doesn't, it
7 doesn't surprise me that, that there are -- that, that
8 there was someone at this hospital that, that thinks
9 that, but we do tell TelAffects we want to hear the
10 feedback, both positive and negative, of what, what
11 the perceptions of us are, and we want to take that
12 and take it as a, either a one -- take it as a
13 one-off, but really track it to see if like is this a
14 trend and a commonplace theme that we're, that we're
15 hearing, because it, it's not --

16 Q Why doesn't it surprise you to see this
17 comment?

18 A Why doesn't it surprise me?

19 Q Yes.

20 A Because I mean people have all sorts of
21 different perceptions of brands without really
22 understanding. Maybe they had a bad experience with
23 a -- they think we're a different type of
24 organization, like health grades that actually, from
25 my understanding, does do the ratings for, for

1 hospitals, but they also do consulting on how to
2 improve those grades.

3 So Hospital Safety Grade kind of sounds like
4 health grades, and someone that is picking up the
5 phone, I don't know what they're going through, they
6 hear Hospital Safety Grade, maybe they're thinking
7 health grade. I just don't know -- there's not enough
8 context around this specific situation, but it doesn't
9 surprise me that there would be confusion among brands
10 if this person has other experience with other
11 organizations, or maybe it's not even in healthcare,
12 and they think that -- they're distrustful of any type
13 of, of rating system.

14 Q Is that what it says here?

15 A It, it doesn't say that here, but there's no
16 context around what's written here.

17 Q But the fact is -- and this what we've been
18 discussing up until this point. The fact is that in
19 order for a hospital to use the Hospital Safety Grade
20 logo, right, it has to pay LeapFrog in order to use
21 that logo, correct?

22 A Yeah, in order to use the logo, they have to
23 pay LeapFrog for the logo.

24 MR. CHUNG: Okay. Let's go to tab 16. This
25 will be Exhibit 9.

1 (Exhibit 9 was marked for
2 identification.)

3 BY MR. CHUNG:

4 Q So Mr. Banerjee, this is an email chain from
5 November of 2023 that includes you and Missy Danforth
6 and Alexandra Campione, and you testified that you
7 report to Ms. Danforth, correct?

8 A Yes.

9 Q How about Ms. -- how about Ms. Campione?
10 What is her -- what is her role?

11 A She's a data analyst, a data manager for --
12 and she reports to Missy, and she works on the, the
13 Hospital Safety Grade program.

14 Q Okay. So she's on Ms. Danforth's team?

15 A Yes.

16 Q Right, and these are two of your colleagues
17 that were present at that initial prep meeting for,
18 for purposes of preparing for this deposition,
19 correct?

20 A That's right.

21 Q So let's start with the earliest or the
22 first email in the chain from November 8, 11:32 a.m.
23 Ms. Danforth is addressing you and Ms. Campione, "I'd
24 like to get a sense of the number of licensees that
25 don't submit a survey and the percentage of accolade

1 revenue those facilities represent for say the past
2 two years (last four rounds)."

3 Do you see that?

4 A Yes.

5 Q Okay. So why, why was she, Ms. Danforth,
6 asking you about the, the number of licensees that
7 don't submit a survey and the percentage of accolades
8 revenue those facilities represent for the past couple
9 years?

10 A I, I don't know why she was asking. I mean
11 this is from 2023, so I'm not sure what conversations
12 she had before with other teams, with Leah. I'm not
13 sure what the -- what prompted her to ask this
14 question.

15 Q Okay. What is she -- why do you think she
16 was asking for, for this information?

17 A I, I don't -- I'm not sure why -- I don't
18 know if I can say why I think that she -- I just don't
19 have any --

20 Q You have zero idea?

21 A No, I have no idea what, what the context
22 is, what prompted her to ask that, that question.

23 Q Okay. Well, let's go on to the next
24 paragraph.

25 "Due to Step 1 imputation and as the means

1 for the Step 2 imputed data increase over time, there
2 is the risk of reducing incentive to submit a survey
3 every year, and I'm starting to see this come through
4 in some of the questions we are getting on the
5 HelpDesk."

6 Okay. So what did you, what did you
7 understand her to be saying here?

8 A I mean she -- Missy knows the methodology a
9 lot more than I do. I don't work with the
10 methodology.

11 Q But she is, she is writing to you, correct,
12 to you and Alex?

13 A Yes, and Alex is a lot more familiar, but I
14 mean she worked -- she, she, she works with Missy --

15 Q Understood, but Alex --

16 A -- and Alex.

17 Q It's not just Alex. She's addressing this
18 to you and -- she's actually asking you and Alex,
19 correct?

20 A Well, there isn't a -- okay. There isn't a
21 question in the second -- on the second line.

22 Q So I'm asking, I'm asking you what did you
23 understand her to mean in this second paragraph?

24 A I assume that second line is more so for
25 Alex, because it's about the methodology, than for me.

1 Q Okay. Putting aside who you think it's
2 meant for, what do you understand this sentence to
3 mean?

4 A I'm understanding that this -- what she's
5 writing up is addressed to me and Alex. That line
6 about the methodology, I don't think she's expecting
7 me to like fully understand what she's talking about.
8 I think that outline is more for Alex. What I think
9 about it is I don't, I don't understand it.

10 Q You have no understanding whatsoever is your
11 testimony? Remember -- Mr. Banerjee, I'm going to
12 remind you that you're, you're under oath, so as such,
13 you have promised to answer my questions truthfully
14 and to the best of your ability.

15 So I'm going to ask: You have no -- what
16 did you understand her to be --

17 MS. WOOD: Objection to form; asked and
18 answered.

19 MR. CHUNG: The witness is not, not
20 responsive.

21 BY MR. CHUNG:

22 Q So please answer the question.

23 A My -- I mean my understanding is she, she's
24 telling Alex -- she's asking -- she's -- I don't have
25 the context of this, of this email, what's prompting

1 it.

2 The statement that she's writing here about
3 the imputation and the impact of it, I think it's a -
4 something she's reporting, an observation that, that
5 she's seeing.

6 The next line talks about financial risk,
7 and I think that is probably more directed for me, but
8 I don't, I don't see the -- I don't believe she's even
9 addressing me in this question, so I don't think I
10 should be expected to understand what it's saying,
11 what it's saying.

12 Q Let's start -- then let's skip to the third,
13 because it, it is -- you're, you're saying that one
14 was directed to you specifically.

15 All right. "I'd like to understand how
16 financial risk if we make changes to how we display
17 grades for hospitals that don't submit," do not
18 submit.

19 All right. If that one was meant for you,
20 what did it mean?

21 A Again, I think you would have to ask her
22 what she means.

23 Q This is your deposition, Mr. Banerjee.

24 A I know.

25 Q I'm asking for your understanding of what

1 this means --

2 A Right.

3 Q -- because it was directed to you.

4 A Right. So this, this was directed to me two
5 years ago, and I don't quite understand what, what it
6 means, but it sounds like -- I know Missy was new to
7 this role like for under -- so there was some
8 transitions that happened. I think earlier this year
9 in 2023, I started reporting to Missy, and so Missy
10 was not -- did not have oversight of the accolades
11 program or data licensing at that time, before that,
12 and then I was reporting to Missy.

13 And so I think she is -- and this is just
14 all speculating based on the timing of it, that she is
15 trying to put together like the impact of the
16 methodology with impact on programs that we
17 administer, like the licensing program.

18 So I think that's -- I think she's trying to
19 understand that, but you'd have to ask her, because
20 I -- you asked me for what I think.

21 Q Okay. So let's, let's take that. The --
22 going back to the first sentence, she writes, "I'd
23 like to get a sense of the number of licensees that
24 don't submit a survey and the percentage of accolades
25 revenue those facilities represent for say the past

1 two years."

2 So is that data that you would have had? As
3 at that time I think you were a manager or a senior
4 coordinator for the data licensing. Is that data that
5 you would have had? "The number of licensees that do
6 not submit a survey and the percentage of accolades
7 revenue those facilities represent for the past two
8 years."

9 A Yeah, I think, I think we could -- I mean I
10 think we, I think we were able to pull together those
11 data.

12 Q Okay, and then -- so in terms of -- and then
13 we go to the second paragraph, "Due to Step 1
14 imputation."

15 Now, do you under- -- do you have kind of a
16 general understanding of what "imputation" means here
17 in this context?

18 A I don't, I don't know the different steps of
19 imputation, but I do know that imputation is a, is a
20 part of the, the methodology of the safety grade.

21 Q Is it, is it correct that it is -- the
22 imputation methodology is the methodology that
23 LeapFrog uses when -- in circumstances where a
24 hospital has not responded to the survey with data?

25 A Yes. That's my, that's my understanding.

1 Q All right, and so what did you understand at
2 this time to be step, the Step 1 of the imputation
3 methodology?

4 A I, I don't know what the -- I don't know
5 what the different steps are of the imputation
6 methodology.

7 Q Okay.

8 A I just know what the output is.

9 Q What did you -- what do you understand the
10 output to be?

11 A I think with -- as you described the --
12 it -- the, the output of the imputation methodology
13 helps to fill the gaps in specific measures that
14 hospitals are now reporting on, on the survey.

15 Q Where LeapFrog does not have the data for
16 certain metrics, correct?

17 A Yes.

18 Q And then for the Step 2, she writes here,
19 "and as the means for the Step 2 imputed data increase
20 over time," right? Did you understand that to mean --
21 to be the step, the second step in the imputation
22 methodology, right, where again you don't have the
23 hospital's data because they didn't participate, that
24 the methodology basically takes the average, right, of
25 certain scores and then assigns a score to that

1 hospital?

2 MS. WOOD: Objection to form.

3 THE WITNESS: Sorry. Could you repeat --

4 BY MR. CHUNG:

5 Q Do you understand -- I take, I take your --
6 I mean I take your point that you're not intimately
7 familiar with the methodology, right, but are you kind
8 of generally familiar that at least as of the time
9 here in 2023, a few years ago, that the step -- second
10 step in this imputation methodology is where a
11 hospital has not submitted data, that the methodology
12 then takes basically an average, right, of available
13 data from certain cohorts of hospitals or certain
14 universe of hospitals, and then assigns that score to
15 the hospital?

16 A Yes.

17 Q Okay, and she's saying here, "as" -- she
18 writes here, "and as the means," right, for that
19 score, for that step, "Step 2 imputed data increase
20 over time," right?

21 So is it fair to say that she's at least
22 observing or she's telling you and Ms. Campione that
23 the means or that number, right, for that Step 2, Step
24 2 metric are increasing over time, there is a risk of
25 reducing incentive to submit a survey every year,

1 okay?

2 So I'm just kind of -- because this was
3 addressed to you, I'm kind of trying to get your
4 reaction or your understanding here.

5 Is it correct that, as she is observing that
6 Step 2 kind of average, right, that score increasing
7 over time for hospitals that did not participate in
8 the survey, that there is a risk that these hospitals
9 will not submit a survey every year?

10 MS. WOOD: Objection to form.

11 THE WITNESS: So yes, I think her concern is
12 that the way -- I mean you have to -- and I'm,
13 I'm --

14 BY MR. CHUNG:

15 Q We will.

16 A -- just speculating, but that there is some
17 sort of reverse incentive for participating, because
18 we are using I think the mean of reporting hospitals.

19 Q Right.

20 A And they -- by not reporting, they're
21 getting a score that's potentially higher than a
22 hospital that is reporting and not, not doing as well,
23 and so it is -- does not seem to be working, because
24 that doesn't quite make sense that the hospital that
25 does not report would get a higher score than someone

1 who does report that doesn't do well, and they're
2 still not submitting data.

3 Q Well, is she saying anything here about
4 nonparticipating hospitals getting a higher grade or
5 score than reporting hospitals?

6 A I guess I was kind of inferring that that,
7 that that would be the case, because that would --
8 because, because of the line where she says there's a,
9 there's a "risk of reducing incentive to submit,"
10 because the hospitals could get a higher score by not
11 submitting.

12 Q Right. At least a high, potentially a
13 higher score, right, because of this, because of this
14 pre- -- this, this version of the imputation
15 methodology that assigns kind of the average score,
16 correct?

17 A It, it seems that way.

18 Q Okay. So let's go back to the first
19 sentence; all right? "I'd like to get a sense of the
20 number of licensees that don't submit a survey," so
21 that kind of ties into the second sentence, "and the
22 percentage of accolades revenue," which is in your
23 wheelhouse, "the percentage of accolades revenue"
24 those hospitals, those nonparticipating hospitals
25 represent for the past two years, right?

1 So is she asking here for -- how much money
2 are we making in terms of accolades revenue from
3 hospitals that did not submit a survey, right? Is
4 that basically what she's asking?

5 A Yes.

6 Q All right. So she -- is it fair to say that
7 in asking or kind of relaying these observations to
8 you and asking for this info request, that she's
9 seeing kind of a relationship between participation or
10 nonparticipation in the hospital survey and accolades
11 licensing revenue?

12 MS. WOOD: Objection to form.

13 THE WITNESS: It seems -- with the context
14 that she is just coming in, she was more
15 intimately familiar with survey participation,
16 and Alex had those numbers. I have accolades
17 revenue information.

18 I think that she is coming into this role
19 and trying to understand what the, what the
20 connection there is, if any, between, between
21 these two things.

22 BY MR. CHUNG:

23 Q Okay. So let's go to the third, finally the
24 third line. "I'd like to understand how financial
25 risk if we make changes to how we display grades for

1 hospitals that don't submit."

2 What did you understand her to mean? What
3 was the change to "how we display grades for hospitals
4 that don't submit"? What is that a reference to?

5 A I'm actually -- I'm confused on that line
6 and what she means.

7 Q Okay. What do you think she, she meant or
8 means there -- meant there?

9 A I don't, I don't think it quite makes sense
10 to me, how we display grades, but -- yeah, it doesn't,
11 it doesn't quite make sense to me, but I guess if we
12 make any type of changes, she wanted to see what the
13 impact is on accolades, which she has just come into
14 taking responsibility for that and, and survey
15 participation, and I guess in relation to making
16 changes to the methodology, but that's a, that's a
17 guess.

18 Q Okay, but she's -- but in this email, she's
19 basically combining the two concepts, right, or
20 looking at both concepts?

21 A I think anytime a change is made on, on
22 anything that we do, we want to see like what kind of
23 impact that has in the organization or any of the
24 stakeholders that we, that we work with.

25 Q So what change are we -- are you referring

1 to here?

2 A She says if we make any changes, so if we
3 make any changes in how we display grades for
4 hospitals that don't submit. I assume she's talking
5 about the methodology, so any changes that we make,
6 she wants to see how, how that would impact anything,
7 anything else that we, that we do.

8 Q Okay. So a change in the imputation
9 methodology, she would want to, Ms. Danforth, and the
10 organization would want to see how a change in the
11 imputation methodology affects accolade licensing
12 revenue; is that correct?

13 MS. WOOD: Objection to form.

14 THE WITNESS: Yeah, it seems like she's,
15 she's trying to see if, if there are any
16 connections between people that don't submit and
17 accolades, and accolades revenue.

18 BY MR. CHUNG:

19 Q Okay, and so would the purpose -- is the
20 purpose of seeing if there's a connection, right,
21 between nonparticipating hospitals and accolade
22 licensing revenue, is the purpose of, of trying to
23 find out whether there's a connection there is whether
24 the, that accolade, that accolades licensing revenue
25 should in any way kind of inform how that methodology

1 should be changed?

2 Let me put it, let me put it another way,
3 all right?

4 So given kind of our discussion of this
5 email here and what Ms. Danforth -- you testified that
6 it looks like she's making connection, right, between
7 nonparticipation by certain hospitals, right, and
8 accolades licensing revenue, correct?

9 A Mm-hmm.

10 Q All right, and part of that connection is
11 how those nonparticipating hospitals are basically
12 using or perhaps taking advantage of the imputation
13 methodology, correct?

14 A So the, just to clarify, the accolades
15 revenue is for licensing -- licensing the right to use
16 the LeapFrog logo for A hospitals.

17 Q Right.

18 A So there's, probably on the face of it, like
19 very little, and I think there was some work that went
20 into this afterwards, that there's no really
21 connection between those two people that don't
22 license -- people that don't participate in the survey
23 are less engaged with LeapFrog.

24 Q Okay.

25 THE REPORTER: Are less engaged?

1 THE WITNESS: They are less engaged.

2 BY MR. CHUNG:

3 Q Right. So is she -- based on kind our
4 discussion right now of this email, is Ms. Danforth
5 thinking about whether the accolade licensing revenue,
6 right, the patterns in the accolade licensing revenue
7 should impact a potential change to the imputation
8 methodology?

9 MS. WOOD: Objection to form.

10 THE WITNESS: I, I'm not sure what -- I'm
11 not sure what she was thinking in, in asking, in
12 asking those, what the motivation served, asking
13 these questions and what she was going to like --
14 going to -- what she was really looking for in
15 the output of, of that, but I do -- I, I'm -- so
16 I'm speculating that it is to see what impact
17 there is to any substantial change that we make
18 in -- it's just an observation about the
19 imputation methodology, and she wants to see what
20 kind of impact it -- that might have on, on, on
21 the accolades program and what, what that means
22 for nonparticipating hospitals, and if there is
23 any connection there. I think it's kind of
24 like -- kind of an exploratory question.

25

1 BY MR. CHUNG:

2 Q Okay. So Ms. Campione responds -- we're
3 just going to the more recent emails. "Not a problem
4 I already have the previous licensing data, but if we
5 want to include this round's licensing, I'll need
6 data. Kush, do you have the licensing so far? We
7 could wait a few weeks so it's more accurate."

8 What does she mean here, "we could wait a
9 few weeks so it's more accurate"?

10 A So on November 8, it looks like it was in
11 the middle of the fall 2023 licensing, accolade
12 licensing campaign, probably ahead of the fall '23
13 announcement, which happens in November. I'm not sure
14 what the date, the date was, but generally that is
15 kind of a higher time for -- a lot of hospitals are
16 interested in the, the logo, so if you want -- so
17 if -- I think she's suggesting here that if we waited
18 a few weeks, we would have more information, more
19 accurate information of like what the fall 2023
20 license and sales look like.

21 Q Okay, and you, you respond, just looking at
22 top here of the document, "Could that be why HCA
23 suddenly stopped submitting? I think we looked at
24 this trend many years ago, and I believe there was
25 correlation to survey participation and As, as well as

1 participation and licensing."

2 What, what are you referring to here in your
3 response?

4 A Sorry. For which part?

5 Q What I just said up top, your response.

6 A Like the first sentence?

7 Q Yeah, let's start with the first sentence.

8 A Okay. So "could that be why HCA stopped" --
9 so HCA is a health, health system that, that didn't
10 submit to the LeapFrog Hospital Survey that year, and
11 so I think that was kind of maybe top of mind. I'm
12 not sure exactly what I was thinking. Maybe I
13 interpreted this email differently when I read it in
14 2023, but perhaps that was top of mind that they had
15 stopped submitting.

16 Missy; it sounds like she suggested that
17 there was a reverse incentive, and we know that
18 hospitals are keenly aware of what their hospital
19 safety grades are and, and the methodology, they pay
20 attention, and so I'm not sure if I knew the context,
21 if she was even talking about that, but I, I said that
22 in this internal email.

23 Q But you continue, "I think we looked at this
24 trend many years ago, and I believe there was
25 correlation to survey participation and As."

1 Do you -- is it still correct that there is
2 a correlation between hospital survey participation
3 and A grades?

4 A So survey participation and A grades, yes, I
5 think there is a correlation.

6 Q Okay, and what exactly is the correlation?
7 So is it hospitals that are -- hospitals that do
8 participate in the survey -- there's a positive
9 correlation between hospitals that do participate in
10 the survey and their receiving an A grade? What
11 exactly is the correlation being referred to here?

12 A So I don't know if, if there is an official
13 like correlation, because we kind of -- I think I
14 looked at this just kind of on the fly. I was looking
15 to see like what the percentages were. I don't
16 remember what the percentages are, but I think just
17 generally, hospitals that have As are -- hospitals
18 that participate in the survey are more engaged, and
19 they are more, I think, committed to transparency and,
20 and a lot -- some of the patient safety metrics.

21 Hospitals that get As, we hear that they are
22 kind of obsessive about patient safety and looking at
23 the LeapFrog measures, and making sure that their
24 facility is adhering to what's in the LeapFrog
25 Hospital Survey, which is represents industry best

1 practices and evidence-based care.

2 Q So the question, the question --

3 A Yeah, yeah.

4 Q -- Mr. Banerjee, was: Is there a -- does
5 there continue to be a correlation between survey
6 participation and A grades?

7 A Yes.

8 Q Okay. How about does there continue to be a
9 correlation between survey participation and accolades
10 licensing?

11 A Yes, I think there, there is a correlation
12 between those as well.

13 Q Okay. So the -- before we kind of move on
14 to another topic, I want to ask you some more
15 questions about the imputation methodology that was at
16 least referenced in this, in this particular exhibit.

17 To start, are you familiar with LeapFrog's
18 current imputation methodology?

19 A I'm, I'm not that familiar with it. I'm
20 just like loosely familiar that we use an imputation
21 methodology for, for a few measures on the, on the
22 Hospital Safety Grade.

23 Q Okay. Are you familiar -- did you -- do, do
24 you know that the imputation methodology that's in, in
25 effect now was the product of changes in the last

1 year, fall of 2024?

2 A Yes.

3 Q Okay. So the imputation methodology that
4 before the fall 2024 was different from what it is
5 today, correct?

6 A Yes.

7 Q All right. Does LeapFrog's imputation model
8 or the methodology allow it to give more hospitals
9 hospital safety grades?

10 A I don't know that.

11 Q Okay. So if -- when, when does -- as you
12 understand it, when does -- in what circumstances does
13 LeapFrog use the imputation methodology for a
14 particular hospital?

15 A There's certain measures. If the hospital
16 doesn't participate in the, in the survey, then
17 LeapFrog assigns, assigns a score for those.

18 Q For certain of the metrics?

19 A For certain of the measures, yeah.

20 Q Okay. So where a hospital -- where a
21 hospital does not respond to a survey, right, without
22 the imputation methodology, would LeapFrog be able to
23 give a hospital safety grade to that nonparticipating
24 hospital?

25 A I don't know. I know there's some details

1 on the methodology about having enough data and
2 measures, but I don't know what the -- I don't know
3 what the details of that are and the scoring, because
4 I'm not involved in the scoring --

5 Q Okay.

6 A -- in that assessment.

7 Q Well, I'm glad that you brought that up.

8 So isn't it the purpose of the imputation --
9 isn't the purpose of the imputation methodology, at
10 least in part, to give a nonparticipating hospital
11 the, basically the, the minimum, at least the minimum
12 number of measures so that LeapFrog can give it a
13 hospital safety grade?

14 MS. WOOD: Objection to form.

15 THE WITNESS: My only understanding is that
16 the, the measures that are imputed are, like are
17 determined by our expert panel to be critically
18 important for patient safety, and that's why they
19 are a part of the methodology and the imputation
20 model.

21 BY MR. CHUNG:

22 Q Right. I'm glad you raised that.

23 So because those imputed metrics, right,
24 that this methodology is designed to address are so
25 critical, without the imputation methodology, a

1 nonparticipating hospital -- you wouldn't have any
2 sort of number, right, for those four critical metrics
3 to base a hospital safety grade on, correct?

4 MS. WOOD: Objection to form.

5 THE WITNESS: The, the imputation
6 methodology I think kind of generously gives
7 hospitals that don't participate in the survey a
8 score that's equivalent to a hospital that does
9 take the survey and performs at the lowest level
10 on those measures. So that's my understanding of
11 the, of the imputation methodology.

12 BY MR. CHUNG:

13 Q Are you referring to the current imputation
14 methodology?

15 A I believe so.

16 Q And you're saying that -- I think you used
17 the word "generously."

18 Why did you use the word "generously"?

19 A Because hospitals -- and this is my
20 understanding of it, because I'm, I'm not an expert in
21 the methodology, but things like computerized
22 physician order entry and medication safety, it's like
23 the most -- one of the most common errors that happens
24 in, in hospitals.

25 There are, there are hospitals that want to

1 improve and even assess to see what level of safety
2 they have for their, their patients, and they take the
3 LeapFrog Hospital Survey. They don't do -- they don't
4 do well, but they learn from it, and they make
5 improvements.

6 Meanwhile, another hospital that is not
7 taking the survey, and doing that same assessment and,
8 and taking accountability and showing transparency,
9 they're getting the same score in the, in the
10 methodology, which is why I used the word "generous."

11 Q Okay.

12 A Because they are getting -- they're not
13 getting a zero. They're getting the lowest available
14 score, which is above zero.

15 Q The lowest available score, which is above
16 zero. So you're saying that the assignment of that
17 lowest available score to a nonparticipating hospital
18 is, is generous is your testimony?

19 A Can you repeat that last part.

20 Q Well, I'm just --

21 A I'm just making -- yeah.

22 Q I'm basically repeating your testimony.

23 A Yeah.

24 Q So you're saying that the assignment of that
25 lowest available score to a nonparticipating hospital

1 is, is generous?

2 A To a nonparticipating hospital, yes.

3 Q Okay. Is it -- are you aware that a number
4 of hospitals have not responded to the survey because
5 of, of resource constraints in responding to the
6 survey?

7 MS. WOOD: Objection to form.

8 THE WITNESS: I, I don't hear from
9 hospitals. I'm not on the -- I don't see
10 questions on the HelpDesk from hospitals about,
11 about participating in the survey. I haven't
12 heard that --

13 BY MR. CHUNG:

14 Q Okay.

15 A -- anecdotally from hospitals or anything
16 like that.

17 Q So in making that -- in, in comment --
18 making, commenting that the assignment of the lowest
19 available score is "generous" for these
20 nonparticipating hospitals, is this -- do you know --
21 are you assuming that these hospitals would have
22 received zero scores had they reported -- had they
23 responded to the survey?

24 A Can, can you repeat that?

25 Q Yep. Are you assuming that these

1 nonparticipating hospitals would have received a zero
2 score or a score lower than, than the limited
3 achievement score, had they reported?

4 A No. So on the ratings website,
5 ratings@leapfroggroup.org for the, for the survey,
6 the -- for a reporting hospital that receives the
7 lowest score gets one out of four bars, which is
8 called "limited achievement." A hospital that does
9 not submit to the survey is just reported as "declined
10 to respond" on that, on that website, and I'm not -- I
11 don't do the methodology or the website, but I have
12 been at LeapFrog for a while, so my understanding is
13 that it is better to be transparent.

14 Take the, take the survey, report on these
15 measures, but we still don't show zero out of four
16 bars. We show one out of four bars, limited
17 achievement, because that is a testament to
18 accountability and transparency that we want to see
19 all hospitals do, and that's why --

20 Q Is it a testament to accuracy? Do you think
21 it is an accurate score for those nonparticipating
22 hospitals?

23 A What do you mean by "accurate"?

24 Q Is it an accurate -- is it an accurate
25 assessment of their performance on those metrics?

1 A If a hospital takes the test and gets one
2 out of four bars for limited achievement, is it
3 accurate?

4 Q If a nonparticipating -- if a
5 nonparticipating hospital, right, that chose not to
6 submit data on one or more of these -- chose not to
7 submit or respond to the survey at all, are you
8 testifying that the assignment of the limited
9 achievement score -- automatic assignment of the
10 limited achievement score to that nonparticipating
11 hospital is an accurate reflection of that hospital's
12 performance on that metric?

13 A For the safety grade? So I don't know -- I
14 don't know if -- I don't know if it's accurate. I
15 do --

16 Q You don't, you don't know if it's accurate,
17 because it's not based on any data that the, that the
18 hospital submitted, correct?

19 MS. WOOD: Objection to form.

20 THE WITNESS: It is, it is based on publicly
21 available data. The hospital has not taken --

22 BY MR. CHUNG:

23 Q Which --

24 A -- accountability --

25 Q For the four imputed metrics --

1 A I, I -- do you mind?

2 Q -- which publicly available data is that
3 based on?

4 You're not answering the question,
5 Mr. Banerjee. I'm looking --

6 A What you asked me is if it was accurate.

7 Q Right. So what -- and I'm asking what --
8 and we've already gone over these imputed metrics,
9 right, that there's an imputation methodology, because
10 they're for, they're for metrics where the hospital
11 has not submitted any data, right? I think we went
12 over that, correct?

13 A Yes.

14 Q Right, because they haven't responded to the
15 survey, correct?

16 A Yes.

17 Q Right. On these four imputed metrics,
18 what's your understanding of the publicly available
19 data that they're based on?

20 A It's information from what hospitals report
21 on the LeapFrog Hospital Survey for those specific
22 measures.

23 Q What, what are the -- what are the public
24 sources that you're referring to where LeapFrog has
25 provided this information?

1 A Sorry. We're talking about the -- the
2 LeapFrog Hospital Survey is, is publicly available
3 data. So at the beginning of this, you asked me about
4 the Hospital Safety Grade and the data sources. CMS
5 data is one source. The LeapFrog Hospital Survey is
6 another data source that is used. Both are publicly
7 available data sources.

8 Q Right.

9 A These hospitals have chosen -- some
10 hospitals have chosen not to report to, to the
11 LeapFrog Hospital Survey.

12 Q Yes.

13 A Some hospitals choose not to report their
14 data to CMS. Like -- so we wouldn't have, we wouldn't
15 have that, that data.

16 Q Okay. So the, the question comes back to:
17 Is automatically assigning a limited achievement
18 score, the lowest available score on these four
19 imputed metrics, to a nonparticipating hospital, is
20 that an accurate -- is that accurate?

21 A Yes. I think that's -- that is, that is
22 what we do in the imputation methodology.

23 Q I understand that's what you do in the
24 imputation methodology, but is that -- is assigning
25 that limited achievement score an accurate reflection

1 of the hospital's performance on those imputed
2 metrics?

3 A I mean personally I think that we are giving
4 them the same score as somebody that does report and
5 does, does poorly, so that's why I had said that I
6 thought I was being, being generous.

7 Q I'm not talking about generous. Is it
8 accurate? My question is: Is it accurate?

9 A Accurate. Well, yes, I think it's, I think
10 it's accurate. I think it's accurate.

11 Q How is it accurate if there's no data?

12 A Because, because a part of -- these are
13 important measures. Our expert panel has determined
14 these are important measures for assessing patient
15 safety. These hospitals have an opportunity to submit
16 this information, because they are critically
17 important on patient care. Having a fully staffed ICU
18 with a physician that is certified in critical care
19 seven days a week impacts outcomes.

20 So that, that is -- I think that's one of
21 the reasons why that's on there and is important in
22 making that assessment. So it is in the methodology,
23 from my understanding, because that's, that's very
24 important.

25 So if a hospital reports to the survey, and

1 they have -- they're not meeting those criteria, they
2 will get the lowest score available, limited
3 achievement.

4 If a hospital does not report to the survey,
5 it seems accurate to me that they should get the
6 lowest score available, at the, at the most, and not,
7 and not above that in an imputation methodology. That
8 makes sense to me personally, but it's just what I
9 think personally. I don't, I don't have any
10 interaction with the methodology.

11 Q Well, let's put it another way.

12 Is at least one of the purposes of the
13 imputation methodology of automatically assigning the
14 lowest available score, right, to these
15 nonparticipating hospitals, is at least one the
16 purposes basically to penalize these hospitals for not
17 participating in the survey?

18 MS. WOOD: Objection to form.

19 THE WITNESS: I mean I don't know if it's
20 penalizing. I mean I don't know if it's
21 penalizing the hospital. It's not rewarding the
22 hospitals for not participating in the survey.

23 BY MR. CHUNG:

24 Q Okay. Is it, is it -- is one, at least one
25 of the purposes to penalize the hospital for not

1 responding to the survey?

2 A I mean these are --

3 Q Yes or no? Let's start with that.

4 A I don't think it's -- I don't think it's
5 penalizing them.

6 Q Okay. Is it punishing them for not
7 responding to the survey? One of the -- at least one
8 of the purposes -- may not be the sole purpose, but is
9 it one of the purposes?

10 A I mean "punishing" seems like a harsh, harsh
11 word. A hospital can take -- it cannot respond to
12 these and still get an A is my understanding, so I
13 don't, I don't think it's punishing them. I think
14 there's still opportunities. If they really don't
15 want to participate in the survey, they're not being
16 forced to.

17 Q Let's put it another way.

18 Is at least one of the purposes of this, the
19 imputation methodology of assigning the limited
20 achievement score automatically to nonparticipating
21 hospitals to encourage or incentivize those
22 nonparticipating hospitals in the future to
23 participate in the survey?

24 A We want every hospital to participate in, in
25 the survey.

1 Q Right. So is this imputation, this new
2 imputation methodology one of the ways in which
3 LeapFrog is trying to incentivize or encourage these
4 hospitals to participate in the survey?

5 A I don't know if that's the --

6 Q I asked: Is it one of the purposes?

7 A I was not involved in the determination of
8 the imputation methodology.

9 Q I understand that, Mr. Banerjee.

10 A So, so I don't know --

11 Q I'm asking you: In your view, is at least
12 one of the purposes behind this new imputation, the
13 current imputation methodology, to encourage -- let's,
14 let's start with encourage -- to encourage hospitals
15 that didn't -- that chose not to participate in the
16 survey to do so in the future?

17 A If, if I were to guess, it seems like that
18 could be, that could be an -- that could be something
19 that comes out of it. If a hospital even took enough
20 time to -- that didn't participate in the survey, to,
21 to look at the methodology and then made that
22 determination, I just don't know.

23 Q Why are you hesitating about this? Why is
24 there -- why are you hesitating about this --

25 A I've just never given it a lot of thought,

1 because I'm not involved in the methodology or thought
2 of it like, oh, from the perspective of a hospital,
3 how would I approach this if I was -- that is, that is
4 not in my day-to-day job description, so I haven't, I
5 haven't given a lot of thought to the methodology or
6 the impact of the imputation methodology in that way.

7 Q My question is not asking you whether you've
8 given this question that I just put in front of you a
9 lot of thought, all right?

10 My question is: Given that -- I mean we've,
11 we've discussed at least a few times that, you know,
12 hospitals -- the kind of the rate, right, or the
13 number of hospitals that participate in the survey is,
14 is important, right, to the licensing programs,
15 correct?

16 A Yes.

17 Q So because -- and you are the director of
18 the licensing program, correct?

19 A Yes.

20 Q All right. So the -- with this current
21 imputation methodology, right, is it, in your view, by
22 basically -- by assigning nonparticipating hospitals
23 the lowest -- I think it was your testimony, the
24 lowest available score on these imputed metrics, to
25 encourage these hospitals, hey, participate in the

1 future, and you may get something higher possibly than
2 the lowest available score?

3 MS. WOOD: Objection to form; asked and
4 answered.

5 BY MR. CHUNG:

6 Q You can answer.

7 A You asked me if, if this was the purpose of,
8 of doing it. I was not privy to the meetings when we
9 were determining what the purpose was, and so if, if
10 that is a byproduct of making these changes, then,
11 then that's, that's what it is, but if it was stated
12 as one of the purposes, then I would not know that.

13 And so are you asking me personally is it
14 one of the purposes? I wouldn't use the word
15 "purposes," but do I think it could have an impact? I
16 think it, I think it could have an impact.

17 Q What did you understand the purpose of the
18 change in the imputation methodology to be?

19 A Right. So it sounds like the -- it, it
20 seemed that the former methodology was rewarding
21 hospitals that did not participate in the survey and
22 gave them a higher score than a hospital that took the
23 survey and achieved the lowest available score, and so
24 it appears that the imputation had an effect in
25 righting that, but yeah, I don't -- that's the -- I

1 think that, that -- maybe that is the purpose. I
2 don't -- I just don't -- I don't know. I wasn't
3 involved in any part of that, those conversations,
4 so --

5 Q So what is even that understanding based on
6 if you -- I mean in response to my previous question
7 about whether one of the purposes was encouraging
8 hospitals to participate, you just, you just described
9 a purpose.

10 What, what is that based on, if you
11 hadn't --

12 A Yeah.

13 Q -- if you weren't involved in the
14 conversations at all?

15 A So, so yeah, perhaps they -- perhaps it was
16 one of the purposes. I, I just don't think about it
17 on, on the daily, so I'm, I'm kind of having a hard
18 time to kind of put it into words, like what, what my
19 role is. I'm -- this is kind of here in my role now.
20 I feel like I'm being asked to like speculate on, on
21 what the purpose was that, you know, other people were
22 more involved in and like actively deciding the, the
23 reasoning for what -- for, for the methodology.

24 Q Okay. Understood.

25 Let's look at it from your role, right, as

1 director of the licensing programs.

2 From your perspective -- let's put aside
3 what was discussed, the discussions that you were not
4 privy to, right, regarding why exactly LeapFrog
5 instituted this change in the imputation methodology.
6 Doesn't the, the current imputation methodology, you
7 know, positively serve your purposes in terms of
8 licensing programs?

9 MS. WOOD: Objection to form.

10 BY MR. CHUNG:

11 Q Let me put it another way.

12 Doesn't, doesn't the new imputation
13 methodology help you and, by extension, LeapFrog by,
14 by potentially encouraging more hospitals to
15 participate in the survey?

16 MS. WOOD: Objection to form.

17 THE WITNESS: So I don't think that's
18 necessarily true. I don't think more hospitals
19 participating in the survey impacts the --
20 directly impacts the data licensing program. We
21 do want more hospitals to participate in the
22 survey. There -- so for the, yeah, data
23 licensing, there, there are more hospitals
24 participating in the survey in specific markets,
25 and there might be more -- there might be more

1 interest in it, in the survey, the survey data.
2 For the safety grade, though. I'm not sure if
3 there would be, if there would be any impact on
4 that for data licensing and -- either that or
5 even for accolades that, that I can, that I can
6 think of right now.

7 BY MR. CHUNG:

8 Q Have any of potential or, you know, actual
9 licensing customers asked you or others about the
10 change in the imputation methodology in 2024?

11 A No, not that I can recall.

12 MS. WOOD: We've been going for an hour. I
13 think it's a good time to take a break.

14 MR. CHUNG: Okay. Why don't we take a
15 break.

16 THE VIDEOGRAPHER: This marks the end of
17 media unit number 3. Going off the record. The
18 time is 14:28 p.m.

19 (Whereupon, a short recess was taken.)

20 THE VIDEOGRAPHER: This marks the beginning
21 of media unit number 4. Going back on the
22 record. The time is 14:43 p.m.

23 BY MR. CHUNG:

24 Q Mr. Banerjee, before we get into documents,
25 did you -- your compensation at LeapFrog, is it -- is

1 any part of it tied to any revenue targets?

2 A No.

3 Q No? Okay. So there's nothing kind of in
4 your employment agreement or compensation package
5 where there's a bonus that's tied to revenue targets
6 or sales targets?

7 A No.

8 Q Okay. So is -- okay. We'll get into that
9 further. Why don't we move on to our next document.

10 A Thank you.

11 (Exhibit 10 was marked for
12 identification.)

13 BY MR. CHUNG:

14 Q All right. Exhibit 10 is an email and then
15 a presentation attached to it, a January 2024
16 presentation about 2023 hospital safety grade accolade
17 licensing.

18 Did you help put this together? I see that
19 Ms. Campione's name is across the front, but do you --
20 did you help put this together?

21 A No, I didn't. I didn't help put this
22 together. I think this was follow-up from some
23 analysis that Alex did. She may have needed the, like
24 some of the numbers on, on, on the, the latest sales,
25 but she, she has access -- she actually has access to

1 those. So she, she -- I mean she may have sent this
2 email in advance of this meeting where, where I looked
3 at it. I don't remember if I commented on it or not,
4 but I, I don't recall --

5 Q Do you recognize it?

6 A I do recognize --

7 Q Okay.

8 A I do recognize it.

9 Q And did it come out of -- was it part of a
10 follow-up to the discussion, the email discussion we
11 saw earlier among you, Ms. Danforth, and Ms. Campione
12 about the relationship between accolades licensing
13 revenue and the, basically the participation rate and
14 how non-, nonparticipating hospitals are scored?

15 A Yeah, it, it does appear that there -- that
16 that was -- this was in connection to that earlier
17 email.

18 Q Okay. So let's go to the second page, so
19 the Bates ending 3569. If you can turn to it, about
20 the second page of the presentation. In small writing
21 up top, there's "Slide 1 Notes."

22 Do you see that?

23 A Oh, yes. "Slide 1 Notes," yep.

24 Q It reads, "This analysis looked at the
25 relationship between individual hospitals

1 characteristic and the likelihood of hospitals
2 licensing their A grade, as well as our media coverage
3 in metropolitan areas. We wanted to understand what
4 hospital types were licensing and if increased media
5 coverage resulted in more licenses in the cities."

6 Who directed -- who at LeapFrog directed
7 this study to be done?

8 A Appears Missy.

9 Q Missy? Okay, and was the purpose of this
10 analysis in looking at these relationships to figure
11 out a strategy on, on the licensing program?

12 A Sorry. Can you repeat --

13 Q Yeah.

14 A -- the question.

15 Q Was, was a -- was the purpose of this
16 analysis and this PowerPoint to figure out how more
17 licenses could be sold from the accolade --

18 A Oh.

19 Q -- licensing program?

20 A No. I think, I think it has to do with
21 understanding the -- any type of relationship there,
22 there is between the licensing program and
23 characteristics of -- that we have on, on hospitals
24 that are -- the characteristics that we have on
25 hospitals.

1 Q Well, that's what the note says --

2 A Yeah.

3 Q -- but what's the purpose of the analysis?

4 A To see -- because this, this is a
5 presentation to, to TelAffects, this -- to identify
6 specific opportunities for, for the licensing program.

7 Q Okay.

8 A Yeah.

9 Q To sell more licenses, correct, bottom line?

10 A Yes.

11 Q All right. So on the next slide, Bates
12 ending 570, we have a graphic here that shows that
13 Hospital Safety Grade revenue had declined from fiscal
14 year 2022 to fiscal year 2023.

15 Do you see that?

16 A Yes. I mean kind of looks like it
17 plateaued.

18 Q Plateaued. Do you know why that was?

19 A No.

20 Q Okay. Flip a few more pages to Bates ending
21 573.

22 These are -- the title of the slide is --
23 are you there?

24 A Yes.

25 Q "Estimating the likelihood of licensing

1 modeled using fall 2023 licensing data."

2 And it says here that "survey" -- the first
3 kind of graphic there says, "Survey participants are
4 ten times more likely to license."

5 Do you see that?

6 A Yes.

7 Q All right, and is this consistent with your
8 kind of understanding of the correlation between
9 survey participation and licensing decisions? Is that
10 right?

11 A Yes.

12 Q All right. So is it correct that, based on
13 this correlation, LeapFrog has a financial incentive
14 to, to make sure that its grading methodology favors
15 participants in the hospital survey?

16 A No. I don't, I don't know if that's true.

17 Q Okay. How would you, how would you describe
18 the, the kind of the relationship, then, between the
19 grading methodology and participation in the hospital
20 survey?

21 A Well, so -- can you repeat the question. I
22 just --

23 Q Sure.

24 A -- want to make sure I'm answering --

25 Q I'm just asking -- so it doesn't -- given

1 this correlation, right, a positive correlation
2 between hospitals that participate in the survey,
3 right, and the likelihood that they license, right,
4 it's a, it's a -- they're ten times more likely to
5 license, doesn't -- just looking at this statistic,
6 doesn't LeapFrog have an incentive financially, right,
7 just economically, to have its grading methodology
8 favor participants -- hospitals that actually
9 participate in the survey?

10 MS. WOOD: Objection to form.

11 THE WITNESS: No, I don't, I don't think so.

12 BY MR. CHUNG:

13 Q Why not?

14 A Yeah, because I think it's -- the survey --
15 I think LeapFrog wants more participation in the
16 LeapFrog Hospital Survey --

17 Q Right.

18 A -- and have more engaged hospitals, more
19 engaged hospitals in LeapFrog.

20 What we found is hospitals that are more
21 engaged in, in doing the LeapFrog Hospital Survey --
22 this is not a surprising stat that they're ten times
23 more likely to license, because more engaged hospitals
24 are more interested in, if they have the Hospital
25 Safety Grade that's an A, to stand behind the LeapFrog

1 logo and marks and, and advertise it, because that's
2 what, that's what licensing is. It's using, using
3 that logo.

4 So if a hospital does not take the survey,
5 they wouldn't have any interest in standing behind
6 LeapFrog in the, in the marks if they got it -- if
7 they also got an A grade.

8 Q I understand that relationship, but by
9 virtue of this positive correlation, right, the more
10 participants, survey participants you have, right, the
11 more hospitals you have that are ten times more likely
12 to license their safety grade, correct?

13 A The more participants we have -- I just
14 don't know if I can say definitively that that -- if
15 that would, if that would be true. Right now, with
16 the people that are currently participating, they are
17 ten times more likely --

18 Q Right.

19 A -- to, to license, but for those that are
20 not participating, if they were participating, I don't
21 know if that would be impacted, if it would go down.
22 I don't know how -- what the impact would be on that,
23 on that, on that number.

24 Q Okay. Now, is it -- based on this -- well,
25 let's look at the second graphic.

1 "Renewals are ten times more likely to
2 license."

3 What does, what does that mean?

4 A Yeah, so that means hospitals that chose to
5 license their Hospital Safety Grade in one cycle, a
6 year has gone by, it's -- their license expires, they
7 learn they got an A again --

8 Q Right.

9 A -- and they want to continue to get access
10 to the latest logo and feature it. They are ten times
11 more likely -- those are renewals. Those would be ten
12 times more likely to license.

13 Q Okay. So -- understood. So by virtue of
14 this statistic, right, doesn't LeapFrog have at least
15 a financial incentive to give hospitals that licensed
16 before and had an A grade, to give the -- to continue
17 to give those hospitals A grades? Doesn't it at least
18 have a financial incentive to do so?

19 A Well, we know -- we separate the licensing
20 from, from the people that are doing the ratings at,
21 at LeapFrog, and so we try to make sure that there is
22 no incentive in, in doing the licensing, and that
23 there is no, there is no consideration of who is
24 licensing that's going into anything to do with the,
25 the methodology, which is why I have such limited

1 knowledge of -- I have knowledge of the accolades
2 licensing program, but I have like virtually no, no
3 insight or -- into like what actually goes into, to
4 making the, the methodology.

5 Q But isn't -- you report to Ms. Danforth,
6 right? You've testified to that a number of times,
7 right?

8 A Yes.

9 Q And -- but she also oversees -- one of her
10 principal responsibilities is overseeing the ratings
11 team, correct?

12 A Yes.

13 Q All right. So that whole team that's in
14 charge of the ratings and reviewing responses to the
15 hospital surveys and, and issuing the grades is --
16 reports to her, correct?

17 A Yes.

18 Q Right. So you got the same person
19 overseeing both of these functions, correct?

20 A Yes, relatively. In 2023, I started
21 reporting to, to Missy during a transition. I was
22 reporting to somebody else, but then --

23 Q So she is -- so Ms. Danforth -- at least
24 Ms. Danforth, then, is privy to discussion and
25 strategy around licensing program on the one hand; is

1 that correct?

2 A She, she is, yeah.

3 Q And that -- but she's also privy to what her
4 ratings team is doing in terms of scoring and grading
5 hospitals, correct?

6 A Yes.

7 Q Okay, and this is -- and in the discussion
8 we saw earlier where she was asking about the, the
9 connection, right, between accolades licensing and
10 participation in the survey and the financial risk,
11 right, of making changes in the imputation
12 methodology, she was directing you and Ms. Campione to
13 basically collect that information, correct?

14 A Yes.

15 Q Yeah, and Ms. Campione is -- she's kind of
16 on the, on the ratings team side of the house,
17 correct?

18 A Yes.

19 Q Right, and you're on the licensing side of
20 the house, correct?

21 A Yes.

22 Q Right, but she's asking you together to come
23 up with this, this information related to the
24 connection between licensing revenue and, and the
25 hospital survey responses, correct?

1 A Yes.

2 Q Okay. So let's look at the next graphic.
3 "Hospitals that have licensed in the past two years
4 are five times more likely to license."

5 What does this mean?

6 A So I think this is saying the hospitals that
7 have licensed -- that had a history of purchasing the
8 rights to use the logo have a higher likelihood than,
9 than the average, I guess, licensee to purchase the,
10 the logo and license again.

11 Q So, but this is basically the same measure
12 as the second graphic but kind of over a longer
13 timeframe; is that right?

14 A Than the previous graphic?

15 Q Right.

16 A I think the renewal is a back-to-back year,
17 whereas this is -- yeah, this is -- yeah, exactly,
18 longer timeframe, looking back two years.

19 Q Okay. So looking at this graphic and the
20 previous graphic, is it fair to say that LeapFrog has
21 at least a financial incentive to, to give hospitals
22 that license in the past two years, that they continue
23 to receive an A grade so that they can continue to
24 renew their license; is that right?

25 A I, I mean we -- that is not how we are

1 incentivized, and we make a lot of efforts to, to keep
2 it separate, and --

3 Q You have the same, you have the same
4 director, or I think it's vice president, right,
5 overseeing both functions, correct? And we have -- we
6 saw multiple emails where you, as director of
7 licensing, and Ms. Campione on the, on the ratings
8 team, are collecting the very information that feeds
9 into this presentation; isn't that right?

10 A Yeah, but the -- for the accolades program,
11 Missy has like high-level oversight of the program, so
12 that's why she, she asks, she asks for things. She
13 doesn't have direct access to the, the -- in, in the
14 day-to-day of like who is licensing and, and, and all
15 those, all those things, but she, she does get reports
16 on, on information like, like this.

17 Q Do you have any visibility into -- do you --
18 you work regularly with Ms. Campione; is that right?

19 A Right. No, I don't -- I mean I work with
20 her on like an as-needed basis, but we don't have like
21 a -- I don't interact with her even like weekly.
22 Sometimes, depending on the time of year, sometimes
23 we, we interact more or less.

24 Q Okay, and do you have, do you have
25 visibility into Ms. Danforth's kind of interaction

1 with her ratings team?

2 A Yes. I, I attend ratings team meetings --

3 Q And what's the purpose --

4 A -- and --

5 Q And what's the purpose of your attending
6 those ratings team meetings?

7 A Yeah, just to get a sense of what is, what's
8 the, the, the latest -- so I have -- there, there
9 is -- sorry. Let me think about the different ways.

10 So I report to Missy. We -- one of the ways
11 in which we -- I interact with the ratings team is
12 that we have a lot of data analysts that are on the
13 ratings team, and so one of the things we have done,
14 especially recently, is we want to make different
15 visualizations for their data available to data
16 licensees.

17 And so a lot of those analysts are on the,
18 on the ratings team, and the more interface that I can
19 get with them and get feedback about like -- about our
20 data licensees and how they are using our data, it
21 kind of becomes a more collaborative environment where
22 we can help -- we can work together to improve our
23 offerings to, to data, data licensees.

24 It's mostly on the data licensing side that
25 I'm interacting with a lot of the, the ratings team

1 members, but I do -- for accolades, Alex does -- has
2 helped with -- she's like very good at Excel and doing
3 data crunching, and it's kind of helped create
4 different reports and understandings like this about,
5 about data licensing and who is using, who is using
6 the -- licensing the, the LeapFrog marks for, for
7 promotion.

8 Q Okay. Even though she's on the ratings
9 team?

10 A Yes.

11 Q All right. Well, let's look at the next
12 page, so Bates ending 3575.

13 It says here that only three non-survey
14 participants licensed their safety grades in fall
15 2023; is that right?

16 A Yes.

17 Q All right, and that's compared to 133
18 participants who did participate in the survey,
19 correct?

20 A Yes.

21 Q All right, and then if we flip a few more
22 pages, Bates ending in 579, there is a graphic, it
23 says, "Hospitals projected to be eligible for spring
24 2024 accolades."

25 Do you see that?

1 A Mm-hmm.

2 Q All right. That graphic charts hospitals
3 from "more likely to license" to "less likely to
4 license."

5 Do you see that, going up and down?

6 A Yes.

7 Q All right. At the very top of the "More
8 Likely to License" end are -- "Renewals" has a "100"
9 next to it.

10 A All right. Yes.

11 Q And 100; what does that denote, that number?

12 A I think it's the number of hospitals.

13 Q That actually renewed?

14 A I think it's that are eligible to be for --
15 so they're not --

16 Q You're right.

17 A -- they, they have not renewed. I think
18 it's eligible --

19 Q Okay.

20 A -- for, for potentially licensing, and
21 they'll have the opportunity to license again.

22 Q And at the very bottom of the "Less Likely
23 to License" end are hospitals that did not complete
24 the 2023 survey, correct?

25 A Right.

1 Q All right, and that's 115 hospitals,
2 eligible hospitals, correct?

3 A Right.

4 Q All right. So if we look at the, the very
5 last page of the slides, so Bates ending 3581, you can
6 turn to it.

7 The bottom line recommendation here of, of
8 the deck that Alexandra put here -- put together is
9 "to target groups" -- to "update campaigns to target
10 groups with a high probability of licensing."

11 And the campaigns; are they the, the, the
12 accolades licensing and the survey licensing
13 campaigns?

14 A No. So within accolades licensing, there's
15 different -- so there's the eligible pool, so it's all
16 the A hospitals that do not currently have a license,
17 and so then those can be segmented into different
18 campaigns. So there's like a renewal campaign.

19 There's a system, system campaign, because
20 there's some health systems that have multiple
21 hospitals that make purchasing decisions together. So
22 we kind of segment those out.

23 I think there's probably some other ones
24 that I'm not, not listing, but those were -- yeah, we,
25 we try to segment them into different campaigns,

1 and -- because for some of them, like renewals, we
2 have specific percentages that we've seen, you know,
3 that renewals are in the 70 to 80 percent, but that's,
4 that's pretty normal. So we wanted to see if we were
5 tracking under that or, or doing, or doing more.

6 MR. CHUNG: Okay. Let's go to tab 32. This
7 will be Exhibit 11.

8 (Exhibit 11 was marked for
9 identification.)

10 BY MR. CHUNG:

11 Q So, Mr. Banerjee, Exhibit 11 is a, an email
12 chain that starts -- if you go to the back, the first
13 is from March 27 of 2025, and then going all the way
14 to most recently, May 5, so covering about, about a
15 month and a couple weeks.

16 Do you see that?

17 A Okay.

18 Q All right, and it's you -- is it a fair
19 summary of this email chain, you're providing
20 Ms. Binder daily or close to near daily updates on
21 sales revenues from the licensing programs?

22 A Yes.

23 Q Okay. Why are you giving Ms. Binder daily
24 or near daily updates on the, on the revenues from the
25 programs?

1 A Because accolades is, is a significant
2 contributor to LeapFrog's revenue, and our fiscal year
3 ends June 30, and so I keep her apprised on the, kind
4 of the daily activities during this, this time, which
5 is, I think -- I think it's the spring safety grade
6 release, about the, the latest daily sales, where we,
7 where we are.

8 And for her, I anticipate it has, you know,
9 a meaning in the overall financial picture and where
10 we can potentially be at the, at the year end, fiscal
11 year end.

12 Q Had she asked you to provide this -- the
13 frequency of updates here?

14 A Yes.

15 Q All right, and then on -- and how did --
16 when did she ask you for these frequent updates? This
17 is from this year.

18 A Yeah, I, I provide them for, for a lot of
19 cycles. I, I give daily, daily updates during a one-,
20 one- to two-month period, because there are -- like
21 from pretty much the day we start the early
22 notification period for the hospitals, going up to
23 like when the, when the public release is, just so she
24 has a sense of, of where we are and can factor that
25 into, you know, other discussions that she has about,

1 about the finance of the organization.

2 Q Okay. So this is spring, like, like you
3 said, about spring 2025.

4 Did Ms. Binder, when she gave you the
5 instruction, right, to provide these nearly, near
6 updates, did she explain why she wanted to see this --
7 the frequency of updates?

8 A I don't believe so, but I was, I was
9 inferring from the, just the nature of the importance
10 of the accolades program to the, to the finances of --
11 and just the timing of it with, you know, specific
12 board meetings and committee meetings that she has.

13 Q Okay, and so let's take a look at the second
14 page of the chain, Bates ending 5933, second page.

15 A Oh.

16 Q The email in the middle there from May 1,
17 2025 where you tell Ms. Binder, "Excited to share we
18 are at an all-time record for revenue for the spring
19 cycle and did so all before the public release," and
20 you set out a number of statistics, statistics there.

21 Do you see that?

22 A Yes.

23 Q All right. Okay, and then on 932, so the
24 first page of the document, you share -- it's four
25 days later -- that "accolades just crossed \$4 million

1 for FY25."

2 Do you see that?

3 A Oh, sorry. 5932?

4 Q The very first page.

5 A Oh, the very first page. Okay. Yes.

6 Q Okay. So she responds, "Wow! This is
7 fantastic!! Thank you."

8 Did she share with you any kind of other
9 response to this, kind of this record that, that
10 accolade licensing had broken just a couple days
11 earlier?

12 A No, not that I, not that I recall.

13 Q Okay. Fair to say that the accolade
14 licensing at this time had become even a greater
15 percentage of, of the organization's overall revenue,
16 is that right, given that you had broken a previous
17 record?

18 A I, I would think so.

19 Q Okay.

20 A But I don't know. Yeah, I don't know the
21 exact numbers.

22 MR. CHUNG: Let's go to 34, tab 34. This
23 will be Exhibit 12.

24 (Exhibit 12 was marked for
25 identification.)

1 BY MR. CHUNG:

2 Q So tab 34, Ms. Binder is forwarding a -- her
3 CEO report to the board from June 2025, and I want to
4 direct your attention to the first page of the report
5 itself, Bates ending 0828.

6 Do you see that?

7 A Yes.

8 Q All right, and close to the top there, she
9 writes, "LeapFrog rides the economic rollercoaster of
10 tariff policies and federal cost-cutting alongside the
11 rest of the world. We've already seen incremental
12 reductions in some of our revenues, including
13 licensure, partnership dues, and report sales."

14 Does that -- is that kind of consistent with
15 your recollection?

16 A Yes.

17 Q Okay. In contrast, if you look at the
18 second paragraph, she writes, "Surprisingly, we are
19 witnessing significant growth in one revenue area,"
20 and that's "accolade sales, the fees hospitals pay us
21 for the right to advertise a LeapFrog award like an A
22 Hospital Safety Grade," and this is -- dovetails from
23 your email earlier, that the total will be -- exceed
24 \$4 million, an all-time record for fiscal year 2025.

25 So with -- it sounds like other licensing

1 sales declined at the same time accolade licensing
2 revenue was increasing, correct?

3 A Yes.

4 Q Okay, and did Ms. Binder tell you or
5 underscore for you that in these circumstances, that
6 in this kind of climate, that there needs to be more
7 focus on accolade licensing?

8 A No. No, she, she didn't.

9 Q Okay. How about from Ms. Danforth; did she
10 place an emphasis during this time on accolade
11 licensing, given how well it was doing at this time?

12 A No.

13 Q Okay. What were the discussions kind of
14 among the organization around these, kind of the
15 trends in the, you know, revenue?

16 A I think at least in my role, LeapFrog in --
17 with the licensing programs -- in my role at LeapFrog
18 with the licensing programs, the, the focus has always
19 been primarily in -- on the data licensing program
20 more so than the, the accolade licensing program, but
21 that said, we, we did make -- and it had been a long
22 time before we made significant investments in the
23 accolade licensing program, but in the fall, or last
24 year, we did do a number of things.

25 This is like a website revamp for the

1 licensing program. We made some new logos and
2 template ads, and so I do think that kind of helped to
3 kind of revamp and establish the -- that, that program
4 and brand, and I think that we saw some, some benefit
5 in terms of revenue and better, I think, renewal
6 rates, and, and a positive impact of, of some of those
7 investments that we made into the program.

8 But the -- I think the focus has always
9 been, in my role -- and I spend more time, I think, on
10 data licensing than the -- than, than accolades, but
11 has always been on trying to improve the, the traction
12 of, of retention and engagement with our current data
13 licensees, but, but also to try to help expand
14 different -- and reach new use cases and, and
15 partnerships that we can use to, you know, further
16 enhance the, the use of, of the LeapFrog data.

17 Q So speaking of what I think what you're
18 referring to of new use cases, if you turn to Bates
19 ending 0830, there's a "Data Visualization Platform"
20 section.

21 Do you see that?

22 A Yes.

23 Q What is that?

24 A So that is a, a website that we established
25 where data licensees can go in to download the latest

1 available data that's available for the, for the
2 programs that they, that they purchase and, and
3 license the rights to use. If they have the rights to
4 use the logos, they can download and use those with
5 the terms of use of their agreement, but then we also
6 give them access to a data visualization tool.

7 It's a license to Amazon QuickSight, where
8 they can go in, and it allows them to create different
9 charts and filters on the data for the program that
10 they subscribe to and they license for -- if they are
11 a survey licensee, they can see the survey data
12 segmented by hospitals, specific measures, customized
13 like cohort for the type of hospitals -- for the
14 hospitals that they want to look at, and then export a
15 report that they can share with their internal teams,
16 or -- depending on what their rights are to use the
17 data, they can use it in that way.

18 MR. CHUNG: Let's -- I think this is a
19 segue, a good segue from accolade licensing to
20 the data licensing program.

21 Let's go to, let's go to tab 25. This will
22 be Exhibit 13.

23 (Exhibit 13 was marked for
24 identification.)
25

1 BY MR. CHUNG:

2 Q All right. So this -- Exhibit 13 from
3 January 2023, "Overview of Business Revenue Programs"
4 presentation.

5 Do you recognize this document?

6 A Yes, yes.

7 Q Did you participate in putting together this
8 document at all?

9 A Oh, January '23? I think, I think this was
10 initially made by one of my previous -- one of the
11 previous people that I reported to, and then I think I
12 refreshed this with some more updated data.

13 Q Okay.

14 A I'm not -- I can't remember if I'm -- I
15 looked at it and contributed to it. I don't remember
16 if I was like the primary.

17 Q Okay. Let's look at the slide 4, Bates
18 ending 5898, and you'll see that there are a number of
19 use cases, right?

20 You went -- you flipped too far.

21 A Oh.

22 Q 5898.

23 A I keep looking at the wrong number. Sorry.
24 Okay, got it.

25 Q The one up top.

1 The -- under the use cases, the "Value-
2 Purchasing Incentives/Quality Improvement" use case,
3 looks like it's responsible for 32 percent of the
4 annual revenue, at least for fiscal year '22.

5 What is that? What is the value-purchasing
6 incentives use case?

7 A So value -- so it's value-based purchasing.
8 LeapFrog has a value-based purchasing program that is
9 a series of reports that we provide to health plans
10 based on performance on the LeapFrog Hospital Survey,
11 and makes zero to 100 composite scores that allows the
12 health plan or purchaser to be able to rank facilities
13 based on metrics from the, the LeapFrog Hospital
14 Survey.

15 There were two health plans that purchased
16 those, those reports, and we provide them. So those
17 are the first two that are listed, Horizon and, and
18 Capital.

19 Q Okay.

20 A Where -- what I think this table is showing
21 is categorizing by licensees the different types of
22 use cases just generally. So those two are listed
23 under value-purchasing incentives.

24 The other two that are listed there are not
25 purchasing that program, the value-based purchasing

1 program. They are purchasing the, the LeapFrog
2 Hospital Survey datasets, and they're using it --
3 they're not purchasing the official value-based
4 purchasing program, but they're kind of making their
5 own program that's doing some type of quality
6 improvement and contracting.

7 So this table is kind of categorizing them
8 together.

9 Q Okay. So is this value-purchasing incentive
10 in the value-based program access to kind of the
11 totality of, of the data that all the hospitals have
12 submitted in response to the survey?

13 A They get, they get -- for, for two of them
14 that are listed here, for -- if someone purchases the
15 survey data, they get what amounts to a, essentially
16 like if you did an offload of our website, like a
17 download from ratings@leapfroggroup.org, there's
18 nowhere on our website where you can download all
19 the --

20 THE REPORTER: Slow down. There's
21 nowhere --

22 THE WITNESS: Sorry.

23 THE REPORTER: That you can --

24 THE WITNESS: There's nowhere on our website
25 where you can download everything that's on

1 ratings@leapfroggroup.org.

2 BY MR. CHUNG:

3 Q All right.

4 A What the licensees get is essentially,
5 essentially an Excel file that has all the hospitals
6 that are on our website. The net -- the like
7 demographic information, the scores, like official
8 scores for each measure, the reporting period, and
9 that is what they get, and what they do with that is
10 kind of based on their data use agreement.

11 And what we've -- I listed in this table is
12 how we generally understand these licensees to be
13 using, using the data, just for our, our general
14 understanding of who our licensees are and like
15 where -- how they're using it and what percentage
16 that, that accounts for.

17 Q Okay. So based on that description, right,
18 is the value -- the more data that's available, right,
19 through this value-purchasing incentive program, the
20 more valuable that program is to, to hospitals; is
21 that fair to say?

22 A So it is -- the more data that's available,
23 they want, they want to see is, is -- they want to see
24 all the hospitals reporting. So if there are
25 hospitals that, that are not reporting, they want to

1 see that, and, and so yes, it would be -- it would be
2 more --

3 Q So --

4 A -- more valuable to them, but it would not
5 change -- the, the word "valuable," like it's not,
6 it's not necessarily more valuable to LeapFrog,
7 because it wouldn't change our cost based on the, if
8 they're -- if individual hospitals are reporting or
9 not.

10 Q Well, wouldn't it make it more valuable to
11 LeapFrog, because then there are -- there might be
12 more hospitals out there that, that would license
13 through this program, given that more data makes it
14 more attractive?

15 A Why would, why would -- more hospitals would
16 license?

17 Q Yeah, more -- I mean you testified that the
18 more data that's available through this program --

19 A The hospitals wouldn't license.

20 Q The -- not the hospitals, but like solution
21 providers and other -- so who are, who are the
22 customers of this program that you're referring to?
23 These are the health plans?

24 A Yeah, these are -- yeah, some of these are,
25 are health plans that are listed.

1 Q All right. So let me just go back to -- so
2 the more data, right, that's available through this
3 value-based program, the more attractive the program
4 is to customers like Horizon and Capital, correct?

5 A Yes.

6 Q Yeah?

7 A Yeah, right, yeah.

8 Q So, and the more, the more data that this
9 value-based program encompasses, the -- I guess the
10 more chances, right, the more attractive it is to, to
11 potential additional licensees of this program,
12 correct?

13 A Well, I mean so Horizon and Capital all
14 have -- they both have like 100 percent participation
15 in their --

16 Q Right.

17 A -- in their markets, so --

18 Q But are there other -- I mean are there
19 other health plans, right, or insurance companies or
20 benefits providers, right, that potentially would be
21 interested in licensing or accessing this value-based
22 program?

23 A Yes.

24 Q Okay. What is a "value-added reseller"
25 licensee? Looks like they account for about

1 41 percent of the revenue. What are they?

2 A Yeah, so we, we license our data to
3 different organizations that have -- sometimes they
4 have applications and products that they want to
5 incorporate the LeapFrog data into, and then resell
6 that data and the ratings in an application, and
7 distribute it to other health plans or other specific
8 employer clients that they work with, or on a, like on
9 an actual application or website to reach members or
10 users.

11 So that's kind of what value-added resellers
12 are. It kind of encompasses a variety of different
13 types of organizations that -- they have the rights to
14 incorporate LeapFrog data and, and products for, for
15 resale.

16 Q Is the data in these programs more valuable
17 to these resellers if more hospitals participate and
18 submit data to the survey?

19 A Most of them, most of them are licensing the
20 Hospital Safety Grade.

21 Q They're only licensing the safety grade; is
22 that your testimony?

23 A Yeah, most of, most, most of our licensees
24 are, are using the Hospital Safety Grade. There
25 are -- I mean there are a few that use the, the

1 LeapFrog Hospital Survey dataset, but there is
2 definitely a skew towards the Hospital Safety Grade,
3 because it is a more publicly recognizable brand.

4 Q Including the value-added resellers, are you
5 saying that these -- testifying these value-added
6 resellers are, for the most part, licensing the
7 Hospital Safety Grade?

8 A Yes, a lot, a lot of them are. A lot of
9 them are, are doing the safety grade. Probably most
10 of them.

11 MR. CHUNG: Okay. Let's go to tab 26, which
12 will be Exhibit 14, I think.

13 (Exhibit 14 was marked for
14 identification.)

15 BY MR. CHUNG:

16 Q Mr. Banerjee, are you -- do you work with
17 regional -- LeapFrog's regional leaders at all?

18 A No, not, not a, not a lot. Just
19 occasionally.

20 Q Okay. So this presentation here that's
21 attached is from July 2023. It goes over how
22 employers and particular members of these regional
23 leader groups use LeapFrog data.

24 So how, how do they use LeapFrog data?

25 A The regional leaders?

1 Q Yes.

2 A So LeapFrog was founded by, you know, very
3 large employers. We continue to work with employers
4 through these regional business coalitions on health
5 that have employers in their areas and markets, and
6 they're keenly interested in the quality and safety of
7 the, of the hospitals in their area, and they, they
8 encourage participation in the LeapFrog Hospital
9 Survey and educate health plans in --

10 Q So my question is -- so let's go back to the
11 question. How do they, how do they use --

12 A Right.

13 Q -- LeapFrog data?

14 A So as a part of that, we give them access to
15 the datasets.

16 Q For free?

17 A For free.

18 Q Okay. So there's no regional leaders that
19 license data from LeapFrog?

20 A Yeah, they have a, they have a no-fee data
21 use agreement with LeapFrog to, to enable access to
22 the, the data.

23 Q Okay, and that covers both the, the data
24 licensure as well as the accolades licensing?

25 A No. The accolades licensing is just the

1 logos. So we, we give them the, the Excel datasets
2 for, for the survey and the, the safety grade.

3 MR. CHUNG: Okay. Let's go to tab 50, which
4 will be Exhibit 15.

5 (Exhibit 15 was marked for
6 identification.)

7 BY MR. CHUNG:

8 Q Okay. So Exhibit 15 is -- it's an email
9 chain from June and August of 2023 between you,
10 Ms. Danforth, and a potential purchaser of the VBP
11 program, and I think the hospital and an accolade.

12 Do you see that?

13 A Sorry. Is this on the front page?

14 Q If you can just go through --

15 A Oh, okay.

16 Q -- go through it.

17 A Oh, okay.

18 (Witness peruses document.)

19 BY MR. CHUNG:

20 Q Mr. Banerjee, are you at least kind of
21 generally familiar with what's being discussed here?

22 A Yeah, I think so.

23 Q Okay. I want to direct your attention to --
24 it's Bates ending 1 -- 5815. 5815.

25 Do you see that?

1 A Yes.

2 Q Okay. So Barbara Havens; there's a Barbara
3 Havens from Med Mutual.

4 Is that a health system in Ohio?

5 A That's -- it's a health plan.

6 Q A health plan in Ohio, and what is she
7 discussing in this email?

8 A So Barb Havens is -- she's a VP of network
9 management for Medical Mutual. She reached out to us
10 because she was interested in developing a, a strategy
11 for contracting with hospitals in, in her market, but
12 there was some -- and they -- and she was interested
13 in using LeapFrog data and, and metrics. So she had
14 some feedback from a facility, a health system in Ohio
15 that had concerns about, about doing that, so --

16 Q And I think you're referring to that these
17 certain hospitals, right, institutions were concerned
18 that "it would require additional resources and
19 staffing on their end to respond," it sounds like, to
20 the Hospital Survey; is that right?

21 A Yes.

22 Q Okay, "and were concerned about the full
23 scope of information being requested."

24 So safe to say that there was concern about
25 whether some of these hospitals were willing or able

1 to respond to the hospital survey, just given kind of
2 the resource constraints; is that right?

3 A It sounds like it.

4 Q Yeah, and then she says, "This was a
5 facility we were having discussions around including
6 LeapFrog as a quality incentive as part of their 2025
7 rates. If other facilities are feeling the same way
8 and move away from submitting their quality data, it
9 will be difficult to implement an incentive around
10 LeapFrog."

11 Is this a common -- a concern that you've
12 heard -- putting aside Ms. Havens and Med Mutual, is
13 this a concern that you've heard from other health
14 plans or consumers, that because of the, I guess the
15 possibility that hospitals won't respond to the
16 survey, given resource constraints, that there will be
17 less data, and hence, the, the data will be less
18 valuable?

19 A I can't think of a -- I can't think of
20 another --

21 Q Okay.

22 A -- instance.

23 Q Let me put it another way.

24 Why would hospital non-participation make it
25 difficult to, in her words, "implement an incentive

1 around LeapFrog"?

2 MS. WOOD: Objection to form.

3 THE WITNESS: Actually, I don't, I don't
4 quite understand the, I think the rationale in,
5 in that. It's -- I, I can kind of speculate, but
6 I don't --

7 BY MR. CHUNG:

8 Q Sure.

9 A Yeah.

10 Q Can you just tell us what, what you
11 understand?

12 A Yeah, what -- yeah, what I understand is
13 like they -- she was -- when you're in conversations
14 with her, it sounded like she wanted something that
15 she could run with, like immediately, for like a
16 contracting strategy, and if they did get, you know,
17 the survey data -- and, and actually, it's a -- she
18 was -- we specifically showed her the value-based
19 purchasing program, which is a derivative of, of the
20 survey, that not having that information at the start
21 would be difficult for them to implement a strategy,
22 especially for those hospitals that don't, that don't
23 report.

24 So they could, you know, create an
25 incentive, but then the hospitals, they would start

1 their relationship not being happy, not getting that
2 incentive program.

3 So yeah, that -- I guess that's my general
4 understanding.

5 Q And this is all sourced from hospitals
6 either declining or at least hesitating at submitting
7 their data, because it's a resource-intensive
8 exercise, right?

9 A This -- I mean this was one hospital, it
10 sounded like. I don't know if there were others that
11 had the same, but that -- she, she was concerned with
12 that, that one.

13 Q Okay.

14 A And it -- yeah.

15 Q And then if we look at -- if you direct your
16 attention to Bates ending 5811. 5811.

17 A Okay.

18 Q Okay. There's a paragraph toward the bottom
19 there, "Administrative Burden and Internal Costs," and
20 Ms. Havens writes, "Addressing the breadth of
21 measures/reporting expectations from LeapFrog, for the
22 hospital survey and safety grade, is very
23 resource-intensive."

24 Is that a fair -- do you think that's fair
25 feedback with respect to the hospital survey?

1 A Let me take a look at the email again.

2 Q Okay.

3 A Okay. Sorry. So I guess can you repeat the
4 question.

5 Q Yep. I mean is this, is this a fair
6 criticism of the hospital survey?

7 A That it's resource-intensive?

8 Q Yep.

9 A So from my understanding of -- and I haven't
10 gotten a lot of feedback directly, but I just heard
11 anecdotally about the, the hospital survey. I know it
12 is not for, especially the first time a hospital is
13 responding to the survey, it can take more time,
14 because it takes, you know, understanding the measures
15 and asking the right people for, for -- and trying to
16 understand like how to, how to collect the
17 information.

18 My understanding is that in subsequent
19 times, collecting it becomes a lot easier, and it's
20 not as burdensome, and that, you know, the LeapFrog
21 Hospital Survey, we -- the measures are -- largely, a
22 lot of the measures the hospitals are already
23 collecting, and they're -- they harmonize with other
24 reporting agencies.

25 There are, as I mentioned, EHR vendors that

1 have like specific LeapFrog reports that, that have
2 been designed. So I think the more little due
3 diligence that they do, the easier it is and the less
4 burdensome it is.

5 Q Have you ever --

6 A Do I, do I think it's intensive? I, I think
7 it's a, like a necessary thing, and I think it shows
8 accountability, and accountability is difficult, but
9 we're talking about patients and people's lives, and
10 so I, I think it makes an impact, and so I, I do think
11 that it is worth the effort.

12 MR. CHUNG: Okay. Let's turn to tab 13.

13 This will be Exhibit 16.

14 (Exhibit 16 was marked for
15 identification.)

16 BY MR. CHUNG:

17 Q All right. Now, this -- it appears to be
18 kind of a follow-on to that chain, Mr. Banerjee.

19 Do you see that?

20 A Yes.

21 Q All right, and on the Bates ending 129, so
22 on the second page of the document, Ms. Havens replies
23 to you, "We really want to move forward with the
24 LeapFrog VBC [sic] program," one of the programs that
25 you testified to earlier, "but really think we'll have

1 challenges from our providers in submission of the
2 data necessary to get their results."

3 Do you see that?

4 A Yes.

5 Q Okay. Did you take her to mean the "VBP"
6 program here?

7 A Yes.

8 Q Not "VBC"; is that right?

9 A Correct, correct.

10 Q And, and this necessary data that she's
11 referring to here is data from the hospital survey?

12 A Yes.

13 Q All right. So to really sell -- just based
14 on this particular instance, to, to be able to sell
15 the VBP program, it's -- would you say it's important
16 to have as many hospitals as possible complete the
17 hospital survey?

18 A I, I think it -- for this specific person,
19 they -- Barb, she -- it was important for her to have
20 more participation in the outset of implementing this
21 program, so, so yes, I do think it, it impacted the --
22 their willingness to start with the, with the VBP
23 program.

24 Q So Ms. Havens then writes that she would
25 "like to understand how complete the Safety Grade

1 Survey is, based on that secondary data."

2 Do you see that?

3 A Yes.

4 Q Okay, because the preceding, it says, "It
5 also says that if they don't submit, [LeapFrog] will
6 use secondary data when available."

7 What did you take her to mean in terms of
8 the secondary data? What does that mean?

9 A So she, she wanted to have an expanded --
10 she wanted to have -- she wanted an understanding, if
11 they license the Safety Grade data, that we would be
12 able to provide ratings that they could implement
13 their, their program on for, for the -- their network
14 facilities, and so there were more hospitals that,
15 that had ratings for the Hospital Safety Grade, and
16 they could use that as their -- as one of the factors
17 in their contracting process.

18 Q But what is she referring to when she says
19 she "would like to understand how complete the Safety
20 Grade Survey is, based on that secondary data"? What
21 was her concern there?

22 A I think she wanted to, to understand how
23 many hospitals we would have a, have a grade for after
24 using the, the, the secondary -- the -- after using
25 the secondary data.

1 So they had a bunch of hospitals in their
2 network that did not receive a -- they didn't receive
3 a safety grade, were ineligible for, for a safety
4 grade, but there were some that were perhaps eligible
5 for, for a survey.

6 And so I think in this exercise that she was
7 doing, she was looking at her list of eligible -- of,
8 of facilities and seeing how many applied to the
9 safety grade, and then how many applied to the survey,
10 and, and, and tried to see, would, would the safety
11 grade be an appropriate thing to use for their, their
12 hospitals. I mean they have like other specialty
13 hospitals that we don't give safety grades for, but
14 that they may be eligible to take the survey.

15 So I think she was trying to see where that,
16 where that delta was, and if there was an appropriate
17 use case for her in, in what she was trying to
18 accomplish.

19 MR. CHUNG: Okay. Why don't we, why don't
20 we take a break at this point. I think we've
21 gone a while.

22 THE WITNESS: Okay.

23 MR. CHUNG: All right?

24 THE WITNESS: Thank you.

25 THE VIDEOGRAPHER: This marks the end of

1 media unit number 4. Going off the record, the
2 time is 15:46 p.m.

3 (Whereupon, a short recess was taken.)

4 THE VIDEOGRAPHER: This marks the beginning
5 of media unit number 5. Going back on the
6 record, the time is 15:58 p.m.

7 (Exhibit 17 was marked for
8 identification.)

9 BY MR. CHUNG:

10 Q The next document, Exhibit 17, you'll see
11 that it's an email from a Paul Alper to a Todd
12 Fessler, copying you.

13 Who is Paul Alper?

14 A He's a consultant that LeapFrog has that
15 works on finding new partners advisory committee
16 members.

17 Q Okay. So not a LeapFrog employee, but an
18 outside consultant; is that right?

19 A Yes.

20 Q Okay. Do you work with him?

21 A No, not, not really.

22 Q Okay. So why -- now, there's a PowerPoint
23 attached to this entitled "LeapFrog's Data Available
24 for Licensing" from March of 2024.

25 Why is he sending -- first of all, who is

1 Todd Fessler at Milliman.com?

2 A So, so I don't know who Todd Fessler is
3 specifically, but he is probably someone that Paul
4 talked to about partners advisory committee, and
5 sometimes people that are approaching LeapFrog about
6 the partners advisory committee, there is like a, like
7 an orientation that LeapFrog also has data, and so
8 sometimes there is cross --

9 Q It's like a cross-selling?

10 A Cross-selling, handing off to, to me and
11 our -- sometimes there's people that reach out about,
12 about data, but they're also interested in
13 partnership, and so I might --

14 THE REPORTER: But they're what?

15 THE WITNESS: I'm sorry. They might also be
16 interested in partnership, so I would pass it
17 over to, pass it over to him.

18 BY MR. CHUNG:

19 Q So the presentation, the PowerPoint itself,
20 is this something that you put together?

21 A I think I had a hand in it, but I was not --
22 I don't think I was the lead in putting, in putting
23 this together.

24 Q Who was?

25 A I'm trying to remember from, from this time.

1 We, we, we have different consultants that we work
2 with that help us to make marketing materials.

3 Q So TelAffects is one of them?

4 A No, no. This -- so this is -- this would be
5 for data licensing, so either perhaps Rule of Three
6 or -- I mean I may have had a hand in, in like doing
7 some of the edits. I may have had a hand in doing
8 some of the edits.

9 Q Okay, so but this is, but this is -- given
10 that its focused on marketing of data licensing --

11 A Yes.

12 Q -- data licensing program, you would have
13 overseen putting together a presentation like this,
14 correct?

15 A Yes.

16 Q Okay. So let's focus on Bates ending in
17 450. It's slide number 5.

18 A Okay.

19 Q And it refers to "LeapFrog data on the
20 quality and safety of named hospitals and ASCs," and
21 up top, the first line is "Exclusive Data: LeapFrog
22 collects unique data by named facility at a national
23 level -- only available from LeapFrog."

24 And is this referring -- this encompasses
25 the data collected from hospitals in response to the

1 hospital survey, correct?

2 A Yes.

3 Q All right, and this is -- and you're kind of
4 marketing this to potential customers as LeapFrog --
5 data that's exclusive to LeapFrog; is that correct?

6 A Yes.

7 Q That it makes exclusively available to
8 potential licensees; is that right?

9 A Yes.

10 Q Okay, and in terms of -- and we've gone over
11 kind of this concept before, but the more hospitals
12 that respond to the survey, would it be fair to say
13 that the more exclusive that data becomes?

14 A I mean I guess "exclusive" -- it seems like
15 it means here that -- LeapFrog has data by facility,
16 and that's not available anywhere else, so I think
17 that's what is mostly meant by "exclusive."

18 Q And by "facilities," we mean hospitals?

19 A Hospitals, yes.

20 Q Hospitals that participate in the, in the
21 hospital survey, correct?

22 A Yes. LeapFrog is the, is the only reporting
23 entity that is doing it by individual
24 bricks-and-mortar facility, and that's different than
25 how others are reporting the data. So that's what

1 kind of makes it unique and exclusive, in that there
2 is no other way to get that level of detail on, on
3 like what the -- what's happening within the four
4 walls of that facility when it comes to some of these
5 measures.

6 Q But it's not only -- because we looked at
7 prior marketing materials that underscored the number
8 of hospitals that have responded to the survey, right?
9 I think we've gone at least over a couple of decks
10 that reference that.

11 So it's -- is it -- it's the level of detail
12 for each of the participating hospitals, but also just
13 the breadth and number of hospitals that have
14 participated that make this product, this data
15 exclusive; would you, would you agree with that?

16 A I, I mean we may mention that somewhere
17 else, but I guess we don't normally -- when we're
18 talking about that exclusive, we're talking about
19 what, what makes it -- it's kind of more specific to
20 the measures that we have in, in like the hospital-
21 level details.

22 Q Are you aware of any other organizations,
23 LeapFrog, U.S. News, health grades or otherwise, that
24 has data for the, the sheer number of hospitals that,
25 that LeapFrog has?

1 A I don't know what's available through those.

2 Q In terms of patient safety data, are you
3 aware of any other businesses, publications, you know,
4 organizations that have data for literally thousands
5 of -- most of the acute care hospitals in the United
6 States?

7 A Yes, CMS has data on --

8 Q Putting aside the government, any other
9 organizations?

10 A Oh, no, I'm not, I'm not aware.

11 Q Okay.

12 The next slide, and this is Bates ending in
13 451, this is a summary list of all the data licensing
14 options for customers; is that correct? 451. It's
15 the next page.

16 A Oh, okay. Got it. Yes. Okay.

17 Q All right. Is this a summary of data
18 licensing options for customers? What is this a list
19 of?

20 A This is highlighting some of the areas, like
21 general, like high-level areas that we look at on
22 all our -- across all of our programs, including
23 specific survey sections, like maternity care,
24 pediatric care, and -- but then -- well, it's a lot of
25 the survey, what we call "survey domains," and then

1 it's highlighting some of the composite scores that we
2 have, including the overall Hospital Safety Grade
3 rating, and the, the value-based purchasing composite
4 score.

5 Q Okay. So this is not -- these are not
6 licensing products or options for customers.
7 They're -- are you testifying -- are you saying that
8 these are general areas that are covered by the
9 exclusive data?

10 A Yes. This, this is highlighting, in
11 LeapFrog's data licensing offering, the, the various
12 areas of, of -- that are included in the survey
13 dataset and in the Hospital Safety Grade dataset and
14 in the value-based purchasing program.

15 Q So let's go to -- this would be LeapFrog
16 Bates ending 460. 460. Just keep going several
17 pages. There's a graphic there, "VBP Example:
18 Calculate Payments or Penalties."

19 THE REPORTER: Say it again. I'm sorry.

20 THE WITNESS: "VBP Example: Calculate
21 Payments or Penalties."

22 BY MR. CHUNG:

23 Q All right. Is this an example of how a
24 customer could use a VBP program?

25 A Yeah, so I, I don't remember seeing this

1 before, but, but yes, it is an example of how they
2 could use it.

3 Q Can you explain how this works or what, what
4 this represents?

5 A Yes. So the value-based purchasing program,
6 as I mentioned before, it's a series of reports that
7 gives a zero to 100 composite score for facilities
8 using the LeapFrog Hospital Survey. So we can only
9 create those reports for hospitals that take the
10 survey.

11 So what it is showing is the performance
12 using the overall value score on a, on a, like a
13 distribution to show where the hospital ranks like on,
14 on the distribution and like which decile -- I think
15 there's probably a key in here that's not shown.
16 There's probably a decile ranking, and then it's
17 making suggestions on how they can assign an, an
18 incentive program around using the, the value-based
19 purchasing program reports.

20 Q So what is the -- just looking at the, the
21 heading here, what, what is the -- what are the
22 payments? What is the payment referring to?

23 A So the, the payment is -- the value-based
24 purchasing program is designed for health plans that
25 are interested in using the LeapFrog value-based

1 purchasing reports as a way of -- to use in
2 contracting with hospitals.

3 So this is making suggestions on how they
4 can implement this program and make payments or, or
5 penalties, as determined by the information that's on
6 the, the report, or using it as like a supplement to
7 an existing program that they have. So it's meant to
8 be kind of a flexible program that they can kind of
9 implement however fits their, their contracting
10 process.

11 Q But the utility of this program to, to a
12 health plan depends on whether the hospitals that it's
13 interested in have actually responded to the survey,
14 correct?

15 A Yes. So we can only make reports for those
16 hospitals that, that participate in the survey.

17 Q Right. So to kind of effectuate this
18 particular program for health plans, it's important
19 for -- it's important for LeapFrog to, to have
20 hospitals respond to the survey, correct?

21 A Yes. So to -- we can make the reports for
22 the health plan, whether they have all the
23 participation in the, in the survey or not. It's kind
24 of up to the health plan to, if they want -- they see
25 value in getting 100 percent participation, they can

1 create the incentives to do that.

2 And we have seen that with -- we only have
3 two customers, actually only going down to one,
4 unfortunately, but they, they have, they have the
5 value-based purchasing program, and some of them, when
6 they had the program, they didn't have 100 percent
7 participation, and they decided to, to provide that
8 kind of incentive.

9 And I don't know exactly how it was, how it
10 was implemented, but they did get to 100 percent
11 participation, but they were paying the same, whether
12 they had, you know, 50 percent participation or
13 75 percent participation or 100 percent participation.
14 The value was, to them was getting the data, and so
15 they wanted to create the incentives to be able to do
16 that, and sometimes it works and sometimes it doesn't,
17 for them, but for LeapFrog, it's all kind of the same.
18 We can only create the reports if they submit to the
19 voluntary survey.

20 Q Understood. Okay.

21 So do you have a licensee, a health plan
22 that has actually implemented the example set out in
23 this slide?

24 A No. So to my knowledge, those health plans
25 are not currently doing any type of incentive

1 programs, but we don't have the full visibility of, of
2 how they're doing it. At some point they, they had
3 been doing it. I don't know if they're currently, if
4 they're currently doing this, but this is a suggestion
5 on how it could be, how it could potentially be used.

6 MR. CHUNG: Let's move on to the next
7 document, tab 15, and this will be Exhibit 18.

8 (Exhibit 18 was marked for
9 identification.)

10 BY MR. CHUNG:

11 Q Mr. Banerjee, Exhibit 18 is an email with a
12 PowerPoint attachment from around August of 2024, and
13 you are on this email with a Mallory Fries or Fries.

14 Who is Mallory Fries?

15 A Mallory is -- she's an employee of, of
16 LeapFrog, and works closely with me on data licensing
17 and accolades, accolades licensing.

18 Q Does she report to you?

19 A She doesn't report to me. She reports to
20 Missy.

21 Q All right. Which team is she on?

22 A She's on the -- she's on the ratings team.

23 Q Okay. So this is another example of a
24 member of the ratings team working directly with you
25 with respect to the licensing programs, correct?

1 A Yes. So I, I work, I work closely with
2 Mallory. I don't work with Alex very frequently at
3 all.

4 Q I'm just, I'm just asking about Mallory.

5 A Sure, yeah.

6 Q Did you draft the PowerPoint presentation?
7 Well, let's start with this. Do you recognize this,
8 the substance?

9 A Yes, I do, I do recognize it, and I do think
10 I, I do think I drafted it.

11 Q Okay. Now, in the cover email up top, you
12 write, "For the price increase target" -- second
13 paragraph. "For the price increase target, you can
14 reference this PPT presentation that has all the price
15 increase targets we approved for the documented price
16 increases from prior years."

17 Who, who directed you to make pricing
18 increases?

19 A I think I had -- I, so I track our data
20 licensees and --

21 Q Who directed -- the question is: Who
22 directed you to at least come up with these price
23 increases?

24 A Yeah, so I had a conversation with Missy
25 about how we haven't done a price increase on many

1 licensees.

2 Q So did Missy, did Missy Danforth direct you
3 to make these price increases?

4 A Yes. I, I know I, I talked to Missy and,
5 and Leah about these, about these price increases,
6 and, and so --

7 Q What did you discuss with them?

8 A Yeah, just the, the idea that we have --
9 there are several licensees that we have not increased
10 the price for some time, and that we want to make sure
11 that the data license is at fair market value.

12 There's also consideration about our current
13 price sheets for new customers, and there was
14 discussions on how we should think about how we are
15 pricing the data for new customers, for existing
16 customers, and understanding the current market value
17 of our, of our, of our datasets.

18 Q So who, who kind of initiated this
19 conversation about the price increases? Was it you or
20 Ms. Danforth or Ms. Binder or someone else?

21 A I can't recall who did, but it was
22 potentially me, because I, I look at the pricing and
23 do the invoicing on customers, so I can see -- I
24 regularly look at what the current rate is, what the
25 previous rate is. I can see that for certain

1 customers, that we have not increased the price for
2 some time.

3 So I imagine it was probably myself that
4 brought it up that we have not done this, and then I'm
5 not sure what initiated me to make this, but it could
6 be that I suggested that I could put together a
7 presentation to kind of highlight and show all of our
8 customers, where the price that they're currently
9 paying and --

10 Q Why don't we tie the discussion to an actual
11 slide, right?

12 So this is Bates ending 8167, page 2 of the
13 PowerPoint, titled "LeapFrog's current approach to
14 pricing and fee increases."

15 Do you see that?

16 A Yes.

17 Q Okay, and it says that for -- that LeapFrog
18 has targeted price "increases during renewals at three
19 to seven percent every two to three years."

20 Do you see that?

21 A Mm-hmm.

22 Q Okay. So where does -- can you describe for
23 us the process by which price increases are
24 determined -- or price changes. Let's say price
25 changes are determined.

1 A So we, we had -- what this was kind of
2 establishing was that we create more of a structure
3 for how price increases are, are determined.

4 Q So previous to this, there was no process or
5 structure; is that your testimony?

6 A I think we generally followed this
7 structure. It's just never been like formalized.

8 Q It's never been memorialized?

9 A Right.

10 Q So this -- so what, what's being described
11 here is what you understood or maybe recall to be kind
12 of generally what's happened over time; is that right?

13 A Yes.

14 Q Okay. So in terms of the, the rates of the
15 increases, three to five percent increases for larger
16 contracts, and how is a larger contract defined? Is
17 there a cutoff for that?

18 A I, I don't think we defined what a larger
19 contract is.

20 Q Can you give me a ballpark for what a,
21 quote-unquote, "larger contract" is?

22 A Above \$50,000. I mean I'm not -- we didn't
23 have a hard and fast rule, but it was just kind of
24 determined -- I mean I think on the subsequent page,
25 we, we did specify --

1 Q Yep.

2 A -- by the, by the customer, so we can kind
3 of look at that to see what, what that means.

4 Q And then "five to seven percent increases
5 for smaller contracts (business intelligence)."

6 What does "business intelligence" refer to?

7 A Yeah, so those are for like health solutions
8 -- healthcare solutions providers that do -- they work
9 with hospitals. They have devices, technology. They
10 do -- they're the ones that do consulting with, with
11 the hospitals, and they want insights into the
12 LeapFrog ratings and data, and so they are generally
13 using it -- they are all using it for internal use,
14 and so we have a, like a lesser fee for, for accessing
15 it for those internal use purposes.

16 Q So each time -- so there's a discussion
17 here, and this is August of 2024, right, and there
18 you're discussing with, with -- you had discussions
19 with Ms. Binder and Ms. Danforth about increasing
20 these licensing rates, right?

21 A Mm-hmm.

22 Q What -- at this time, did you have a
23 discussion as to how you could justify raising these
24 licensing rates?

25 A I, I know that inflation was very high

1 during that time.

2 Q So inflation is one?

3 A Yeah, but even like doing three to seven
4 percent every two years, with the rate at which things
5 had increased, and we hadn't increased in quite some
6 time, I think there was -- like a major concern was
7 like that's not even keeping up with, with inflation.

8 Q Other than -- so other than inflation, are
9 there other factors or kind of justifications --

10 A Yeah, so --

11 Q -- behind the, behind the rate increase that
12 you're discussing here?

13 A So there was -- I think there was inflation.
14 That was I think top of mind for a lot of people. The
15 other fact is that we had not increased for, for a
16 number of years from any of the customers.

17 And then I mentioned like fair market value
18 as understanding where -- how our datasets are
19 positioned in the market, and, and the, and the value
20 of them, especially concerning our current, our
21 current fee structure, which also had not moved for
22 new customers in quite a while.

23 I think those were the, some of the main
24 considerations.

25 Q So in terms of the fair market value,

1 presumably, its relevance is that fair market value
2 for the dataset had increased over time, correct?

3 A Yes, it has.

4 Q And what accounted for, in terms -- going
5 back to the justification of the price increases, what
6 accounted for -- what's your understanding or the
7 justification for why there was an increase in fair
8 market value of the dataset?

9 A Well, largely, LeapFrog has, has had a
10 growing brand recognition for, for a number, for a
11 number of years, especially with the, the safety
12 grade, which is most of what the inquiries are about,
13 about data licensing. More -- there's more and more
14 promotion amongst hospitals using that and touting
15 their, their safety records.

16 Q And is part of it also the competition
17 between the hospitals that we went over earlier, in
18 terms of kind of using the Hospital Safety Grade as a
19 way to compete with other hospitals; is that right?

20 A Yes, and I think all that contributes to the
21 increasing the brand, yeah, recognition, exactly.

22 Q And in particular -- we went over this
23 earlier, but in terms of increasing the, increasing
24 the brand, is it fair to say that this all ties back
25 to kind of our discussion about fair market value,

1 that more hospitals and markets were interested or
2 actually purchasing licenses of the Hospital Safety
3 Grades because of that better brand recognition; is
4 that right?

5 A Yeah, I think that was one of the
6 contributing factors.

7 Q Okay, because the, the ability to license
8 the hospital safety grades allowed -- allows at least
9 A-graded hospitals to enhance their reputation in
10 their markets; is that right?

11 A I believe that's the, the motivation,
12 because -- and it's -- and they want to specifically
13 use the logo to be able to do that, which they saw
14 value in, in using the logo specifically, and that's
15 why they chose licensing, and that, that way, they can
16 kind of tie themselves to the patient safety brand
17 that LeapFrog I think embodies.

18 Q Okay.

19 All right. Any other factors that go into
20 the increase in fair market value? The brand
21 recognition was one. Anything else?

22 A I mean I know -- I said it before, but
23 the -- I think the inflation was a significant cost --

24 Q We know that for sure.

25 A -- because the, like the -- I think we

1 talked about changing -- I don't know if we talked
2 about -- sorry. I'm just --

3 Q Mr. Banerjee, how about the size, just
4 overall size and breadth of the dataset? Does that --
5 did that contribute to the fair market value?

6 A I mean that wasn't a specific consideration
7 in, in this, in the, the price increase.

8 Q Let's turn to Bates ending 8172. That's
9 slide number 5.

10 So there are a series of increases,
11 recommended increases here for specific, looks like
12 customers, for Humana Government Business, and they
13 have a survey license.

14 Are you familiar with that?

15 A Yes.

16 Q Okay. There is a recommended increase of
17 20 percent.

18 Why such a high -- at least
19 percentage-wise -- price increase for this particular
20 customer and license?

21 A Yeah, so the -- Humana Government Business
22 is a federal contractor for the Defense Health Agency,
23 and they oversee their, the benefits or a health plan
24 for the TRICARE population.

25 So in 2018, they approached us because the

1 Defense Health Agency was making it a requirement to,
2 to purchase the LeapFrog Hospital Survey data, and
3 make the ratings available to, to members. Their
4 contract kind of locked them into a like a five-year
5 contract, and it was -- the pricing is based on the
6 number of covered lives or members that the data is
7 applied to.

8 So they had not had an increase in --
9 because of their contract with us, we had maintained
10 their rate. They were awarded another contract for
11 eight years, starting in -- actually, I think it was
12 delayed, and now it started this year, where they
13 expanded the number of members that they were applying
14 the data to.

15 So they gave us what the number of members
16 it was expanding to in the next contract, and as a
17 result of that and the, the pricing structure which
18 incrementally increased, their net increase was
19 20 percent.

20 MR. CHUNG: Understood.

21 Let's go to tab 30. This will be Exhibit
22 19.

23 (Exhibit 19 was marked for
24 identification.)
25

1 BY MR. CHUNG:

2 Q So Exhibit 19, an email -- we got an email
3 chain among Leah Binder, Ben Choi, Josh Berlin, and
4 Ms. Danforth.

5 First of all, who is Ben Choi?

6 A Ben Choi is a consultant for -- he was our
7 consultant for Rule of Three that we work with, and in
8 his role, he was essentially the interim chief
9 financial officer.

10 THE REPORTER: He was the what?

11 THE WITNESS: Interim CFO.

12 BY MR. CHUNG:

13 Q Did you ever report to him?

14 A No, I did not directly report to him.

15 Q Okay. How about Josh Berlin; who is that?

16 A Josh Berlin is the CEO of Rule of Three, and
17 is a strategic advisor for LeapFrog as a consultant.

18 Q Okay. So this is -- you can take a look.
19 There's an email chain and then a series of
20 attachments with historical accolade license and data
21 sales.

22 Did you ever work with -- did you work with
23 Ben Choi, or do you work with Ben Choi?

24 A No. He doesn't work at LeapFrog -- with
25 LeapFrog anymore, but I, I had worked with him in

1 different capacities to inform him, as he did the, the
2 finances, with the information he needed around
3 accolades or data sales.

4 Q Okay. So she -- Ms. Binder -- this is the
5 April 24th email on the first page. She writes, "If
6 we move toward cost reduction as the primary strategy,
7 it will be much more severe than this, but I'm not
8 going there for now. We can address incremental
9 spending issues, but let's not lose focus on what
10 managers should be thinking about 24/7, which is
11 revenues," right?

12 And at this time in 2024, were you, were you
13 a director by this point?

14 A No.

15 Q You were still a manager on -- in the data
16 licensing area, correct?

17 A Yes.

18 Q Is this consistent with what you, as a
19 manager -- and this is, this is an email kind of
20 discussing among, with Mr. Choi, around the licensing
21 programs.

22 Was this kind of the messaging at this time,
23 that managers should be thinking about, 24/7,
24 revenues?

25 A No. I mean I wasn't privy to this email.

1 Q You're not on the email, that's correct.

2 A I wasn't on it, so I'm not sure what she's
3 thinking at this time. I haven't heard her say that.
4 I've never heard -- I haven't heard her say that
5 before.

6 Q Okay. Is there anything that she has said
7 around this time or at any, any point, right, that,
8 that there needs to be a push for revenue generation?

9 A Yeah, we've had conversations about the
10 importance of revenues and to the mission, and, and
11 yeah, it is a, it is an important factor that, that we
12 consider.

13 Q Okay. Is there -- had there been -- at any
14 point, had she articulated concerns about revenues as
15 being important to cover for operations of the
16 organization?

17 A Revenues to operate -- could you restate
18 that.

19 Q Yeah, I mean you, you testified that
20 revenues were -- we had discussions around revenues
21 being important to the mission, right? How about to,
22 to LeapFrog's basic operations?

23 A Yeah, I mean I think it's -- I, I've heard
24 her say before that we want -- you know, we have, we
25 have expenses to do, to do all the work that we do in

1 the operations, and we want to continue to --
2 especially in my view -- the accolades and -- the
3 accolades program and the data licensing program
4 continue to look for new ways and use cases and
5 opportunities, even within the current work that we're
6 doing, to expand our presence, enhance use of our
7 data, further the mission, and the results of that is
8 revenue generation, which is also vitally important to
9 the organization.

10 Q Have there been -- I'm just kind of focusing
11 on the, on the language here. Did you have any
12 discussions with Ms. Binder about revenue generation
13 being important to compensating LeapFrog's executives?

14 A No.

15 Q No discussion about that?

16 A No.

17 Q Okay. Do you have a general -- do you have
18 a sense of how much LeapFrog's executives make in
19 terms of their -- in terms of their compensation?

20 A No. I mean I, I have -- I may have like a
21 general idea, but not -- I mean I, I have a general
22 idea, but I don't, I don't know like specifically how
23 much each executive makes.

24 Q Okay. Is there like a source where you can
25 learn how much each executive makes?

1 A Yeah, I think LeapFrog files a 990 that's
2 published online.

3 Q Okay. Have you ever looked at that, or --

4 A I haven't looked at it recently, but I've
5 looked at it in the past.

6 Q Are you aware that Ms. Binder made about
7 \$760,000 in total compensation during fiscal year
8 ending in June 2024?

9 MS. WOOD: Objection to form.

10 THE WITNESS: I -- yeah, I was aware that
11 she made a fair compensation during, during that
12 time.

13 BY MR. CHUNG:

14 Q Okay. When you first saw that, was it a
15 surprise to you? What was your reaction to it?

16 A I didn't really have a reaction to it.

17 Q You had no reaction?

18 A No, not, not really.

19 Q Okay. Is that a high level of compensation
20 for a nonprofit CEO?

21 A I don't really have a comparison to judge
22 that against.

23 Q How about Ms. Danforth; are you aware that
24 she made about \$446,000 during the same period?

25 A I was not aware of that.

1 Q Okay. Does that, does that surprise you?

2 A No.

3 Q Why not?

4 A Well, both -- I mean I know both Missy and
5 Leah are very committed to, to LeapFrog, and they have
6 been at LeapFrog for a very long time, even much
7 longer than I have, and have helped to really further
8 our, our mission and enhance our value, and they're so
9 committed to transparency and accountability and
10 accuracy in our programs. They have really helped to
11 grow and make the program what it is today, so for
12 those reasons.

13 MR. CHUNG: I'm going to show you -- let's
14 go to tab 54.

15 This will be Exhibit 20.

16 (Exhibit 20 was marked for
17 identification.)

18 BY MR. CHUNG:

19 Q Have you seen this document before?

20 A No, I have not.

21 Q Okay. Do you see there that with respect to
22 the current contract, there's discussion of CEO
23 compensation being "a proportion of revenue" of the
24 organization?

25 Do you see that?

1 A Sorry. Which line is that?

2 Q We're looking under "Current Contract."

3 A Oh, okay.

4 Q All right. Do you know why Ms. Binder would
5 be using the organization's total annual revenue as a
6 metric to determine her salary?

7 A No.

8 Q Have you had any discussions with her about
9 that?

10 A No.

11 Q Have you had any discussions between you and
12 your LeapFrog colleagues about how much Ms. Binder
13 makes as CEO of LeapFrog?

14 A No.

15 Q Zero discussion whatsoever?

16 A No.

17 Q All right.

18 Do you think it's appropriate for a CEO of a
19 501(c)(3) organization to tie their compensation to
20 the organization's total revenues?

21 MS. WOOD: Objection to form.

22 THE WITNESS: I mean I don't, I don't have
23 an opinion on it.

24 BY MR. CHUNG:

25 Q You don't have an opinion on, on what?

1 A On, on how, on how her compensation is, is
2 determined.

3 MR. CHUNG: Okay. Let's go -- let's go to
4 tab 51, and this will be Exhibit 21.

5 (Exhibit 21 was marked for
6 identification.)

7 BY MR. CHUNG:

8 Q So Exhibit 21 is an email around your annual
9 review. It looks like from mid-2023.

10 Do you see that?

11 A Yes.

12 Q Okay, and you're discussing your annual
13 compensation in this email chain, correct?

14 A Yes.

15 Q And you're asking for increased
16 compensation; is that right?

17 A Yes.

18 Q All right, and about how much were you
19 making at this time?

20 A Probably like \$100,000.

21 Q Okay, and you mentioned the fiscal year 2023
22 licensing budget goals in the context of, of your
23 compensation.

24 Did your compensation at this time depend in
25 any way on the licensing budget goals?

1 A No.

2 Q Okay, but you say here, "To address the
3 concern about not meeting FY23 licensing budget goals"
4 as kind of the top bullet point here.

5 So you write here, "Although I recognize the
6 FY23 licensing revenue was under the initial
7 benchmarks, where we ended up (just under) are a
8 direct result of my tireless efforts to engage and
9 retain our licensees," right?

10 So if you're -- I mean if you're testifying,
11 testifying here that the licensing budget goals did
12 not in any way play a factor in your compensation,
13 then why would you be raising it here, basically kind
14 of in an appeal to increase your compensation?

15 A So I'm trying to make the, the argument
16 that -- so I'm responsible for the, the data licensing
17 programs, and I understand that although I'm not
18 directly tied to the revenue, the revenue, that I
19 don't receive any type of bonus for reaching a certain
20 benchmark, that those will be considerations in my, in
21 my request for additional compensation during, during
22 my annual review.

23 Q Right. So to address the concern about not
24 meeting the licensing budget goals, so was -- the
25 concern was articulated to you, correct, that the

1 licensing budget goals had not been met; is that
2 right?

3 A It was, it was either articulated or, or
4 implied from, from my time at LeapFrog, understanding
5 that that is, that is something that is under
6 consideration.

7 Q So who articulated or implied that this was
8 a -- that not meeting the licensing budget goals was a
9 factor that would impact your compensation?

10 A From -- I've had a variety of people that I
11 have reported to over the years, and this, at this
12 point it was Patrice, so Patrice and Leah -- I've had
13 conversations with Leah during that time.

14 Q Okay, and what did she say in this vein?
15 Leah Binder. What did she say in this vein? What did
16 she specifically say on this topic?

17 A That, that the data licensing program, she'd
18 like to see more strides and specifically retention
19 of, of data licensees, and putting together kind of a
20 concrete plan to, to keep those relationships active,
21 understand how they're using it, and then look for and
22 advise on new ways to engage more types of
23 organizations that can use LeapFrog data.

24 THE REPORTER: That can use what?

25 THE WITNESS: That can use LeapFrog data.

1 BY MR. CHUNG:

2 Q And was this, was this in the context of a
3 discussion that, that the licensing budget goals had
4 not been met?

5 A I, I think this was like kind of preempting
6 that point that, that I think that was going to be
7 re-raised, and so to kind of get ahead of that, I was
8 trying to make the argument that we had, we had a lot
9 of moving pieces, and that we, we did sign new
10 licensees, but, much like that other year that we
11 discussed, we gained some and we lose some, and so I
12 was trying to give some context to -- in making my
13 case for increased compensation.

14 Q You said you also reported to Patrice Brown
15 at this time.

16 Who is Patrice Brown?

17 A Patrice Brown was the chief operating
18 officer for, for LeapFrog.

19 Q Okay. Did you -- so you had -- you
20 testified you had discussions with Ms. Binder and
21 Patrice Brown around licensing budget goals as a, kind
22 of a factor in your compensation.

23 How about Ms. Danforth? Did you have any
24 discussions with Ms. Danforth on that topic?

25 A I -- yeah, I believe so. In my, in my

1 annual review, we had a similar type of, type of
2 discussion.

3 Q Okay. Can you tell us about those
4 discussions?

5 A So I think in that one, that exhibit and my
6 annual review we reviewed earlier, I think I made a
7 similar, a similar type of discussion, that it was,
8 you know, an up-and-down year, but these are the
9 things that I'd like to do, and here are my goals and
10 benchmarks.

11 Q Okay.

12 Now, in the second bullet point, looking at
13 the same exhibit, Exhibit 20, you write, "I feel an
14 urgency to make my compensation fair. I don't believe
15 it is fair with my current market value or what we
16 would offer -- be offered to my current position
17 (i.e., I feel my tenure at LeapFrog has effectively
18 held me back by comparison)."

19 So just kind of focusing on that you don't
20 believe it's fair with your current market value, why
21 is that?

22 A I, I felt like I needed increased
23 compensation, because I feel like I work hard, and I
24 thought it was fair that they reconsider what my
25 salary is.

1 Q Okay. Did you, did you feel that the, the
2 licensing budget goals, right, that you were being
3 measured against were, were unfair?

4 A I guess I was -- there was really, I think,
5 no like demarcation of like where I needed to be --
6 like where we needed to be in order to get this type
7 of compensation, so for me to reach a, like that next
8 level that I was looking for, and so I think I was
9 just kind of expressing my frustration.

10 Q Well, understood, but you testified that you
11 had discussions with Ms. Patrice Brown, Ms. Binder,
12 and Ms. Danforth about your compensation in the
13 context, right, of not meeting these, these licensing
14 budget goals, right?

15 Then you also testified that -- it looks
16 like here you were also kind of leaning into the fact
17 that your -- you had a long tenure, right, at
18 LeapFrog, and is it -- was it your position that that
19 should be a factor in increased compensation?

20 A Yeah, I wasn't suggesting that my long
21 tenure means I should have more compensation, but I
22 was saying that if, if my position was open, then I
23 feel like it would have been a higher level position
24 with, with a higher level of compensation.

25 Q Okay, so but just going back to my, to my

1 previous question, do you, do you think that -- did
2 you think that your -- the, the fact that licensing
3 budget goals had not been met, right, was unfairly or
4 disproportionately a factor in your compensation
5 relative to your tenure at the, at the organization?

6 A Sorry. Can you repeat it? I just want to
7 make sure I understand.

8 Q Yeah. Did you think that -- did you think
9 that, that the not meeting the licensing budget goals,
10 right, was disproportionately a factor in how, how you
11 were compensated?

12 A I, I think I -- I don't know exactly. It's
13 always been kind of unclear to me what the criteria
14 is, but my, my conversations with, you know, all of,
15 all of my managers has led me to believe that, that if
16 there was a certain, you know, benchmark that we
17 reached and that -- for, for licensing, that, that
18 yes, I perhaps would have elevated, elevated sooner.

19 Q Okay. Do you think that's fair?

20 A I mean I don't know, I don't know if it's
21 fair, but I don't, I don't really get to decide.

22 Q Well, you're, you're voicing --

23 A Yeah.

24 Q -- your opinions here, actually kind of
25 asserting your opinions about whether your

1 compensation is fair.

2 So if you're able to voice these, at these
3 positions, is it fair or was it fair, in the context
4 of this kind of review, that the licensing budget
5 goals, where they were set, were factored into your
6 compensation to the point where you were not satisfied
7 with it?

8 A Yeah, I mean I did voice that I thought my
9 compensation should be, should be more fair. So yeah,
10 that was factored -- if it was one -- if the budget
11 goals were one of the things that factored into it,
12 I'm just trying to make the argument that it -- that
13 my compensation needed to be elevated, and other
14 things should be considered with all the other, like
15 the full breadth and scope of, of the work that I do.

16 Q Do you, do you believe you should be
17 compensated more as you bring in more revenue,
18 licensing revenue for LeapFrog?

19 A I mean I think that could, I think that
20 could factor -- that could factor and does not factor
21 into it. It continues to not factor into it.

22 Q It did in the past, right, in the context of
23 this email, right?

24 A Well, my, my -- well, my, my salary has
25 never been tied to the -- it has, it has not been tied

1 to the performance of . . .

2 Q Well, let's look at it another way.

3 The, the, the failure to meet the licensing
4 budget goals for fiscal year '23 held you back in
5 terms of your compensation, correct?

6 A I think that's a, that's not a question that
7 I can answer, because I don't determine my, my
8 compensation.

9 Q Okay.

10 So just going back to Ms. Binder's
11 compensation, right, of \$760,000 and it being -- we
12 looked at the document -- it being a percentage or
13 tied to the revenue, right, basically the economics,
14 the financial situation of, of the organization, would
15 you say that her -- you testified that your
16 compensation never tied to revenue, right? Do you
17 think it's appropriate for her compensation to be tied
18 to revenue?

19 A Well, we have very different jobs. I don't
20 even know the full scope of everything that she does.
21 I do know that she -- I mean her -- not just her
22 tenure at LeapFrog, but she is -- I mean she has
23 oversight of every part of the -- and responsibility
24 for every part of the organization as, as the leader
25 of the organization.

1 So I feel like it's not a, not a fair
2 comparison in comparing my, my role with, with hers,
3 and --

4 Q I'm not --

5 A -- looking at the compensation structure, I,
6 I, I don't -- I don't know how you can equate those.

7 Q I'm, I'm not asking -- I'm not asking about
8 the fairness or appropriateness of her --

9 A Oh.

10 Q -- compensation compared relative to
11 yours --

12 A Yeah.

13 Q -- right, but do you, do you think it's
14 appropriate for her compensation to be -- at least in,
15 in one way -- tied to the, the financial performance
16 of the organization?

17 A I don't have really an opinion on her
18 compensation structure.

19 Q Okay. You had an opinion as to your own
20 compensation, right? So what, what's stopping you
21 from offering at least a view on her compensation
22 structure?

23 A Because I know, I know my -- I know what I
24 do, and it affects my day-to-day and my life, but I
25 don't know, I don't know everything that -- I don't

1 even know everything that Leah does.

2 So, so yeah, I don't, I don't have an
3 opinion of it, because I'm not -- I feel like I'm not
4 informed enough about what, what she does for the
5 organization. I do know some of the things that she
6 does, and it is very different than, than the work
7 that I do.

8 Q Well, one of her -- one of the things that
9 she does, right, or oversees at the organization is
10 overseeing what you do; is that right?

11 A Yes.

12 Q To the point where, for certain periods of
13 the year, you're sending her your daily updates,
14 right, on revenue and number of licenses coming in
15 through licensing programs, correct?

16 A Right.

17 Q Right. So you do know one significant kind
18 of responsibility that she has or oversees with
19 respect to the organization, correct?

20 A Can you say that again.

21 Q Yes. So you are aware that she -- and I
22 think you testified earlier that the, the revenue from
23 the data licensing programs, right, is -- they are the
24 two most -- the data and the accolade licensing, the
25 two most significant components of the organization's

1 revenue, correct?

2 A Yes, the two highest, yes.

3 Q So fair to say that Ms. Binder's oversight
4 of those programs, right, working with you is one of
5 her -- a major responsibility for her, correct?

6 A Yes.

7 Q Okay, and do you think kind of in that, in
8 that context, that it's appropriate for her
9 compensation to be tied to, to revenue generation?

10 A So those are the top two things, but there's
11 so much more that goes into those top two things, that
12 contribute to those top two things.

13 So like the general brand awareness of
14 LeapFrog, the PR communications that we do with the
15 release of the Hospital Safety Grade, all of those
16 things feed into the brand reputation and contribute
17 to the accolades licensing, and wanting -- getting
18 hospitals to want to use the LeapFrog marks, the, the
19 data licensing, it's -- a lot of is on brand
20 reputation.

21 You know, as I mentioned, I learned about
22 LeapFrog -- Leah wrote an article in Forbes, and, and
23 so that is all contributing to LeapFrog's reputation,
24 and she has been the major driver of that. There's a
25 lot of things that she does that I'm not even aware

1 of. That's why I said we have very different jobs.

2 And then there's, of course, all these other
3 things that were on the, on the revenue and cost sheet
4 that she is actively involved in, more or less, and
5 all of those things are feeding into the mission, and
6 so although those two things seem like those are the
7 top two revenue drivers, which they are, a lot of it
8 is on building the brand, and Leah has helped, been
9 very instrumental in building the brand since she
10 started LeapFrog.

11 Q Right, and in fact, building all those, all
12 those things that you described that Ms. Binder does
13 toward building the brand are critical to your job,
14 correct?

15 A Yes.

16 Q Right. In order to be able to market and
17 sell licenses to solution providers and hospitals and
18 all the other parties, all of Ms. Binder's efforts and
19 others' efforts are critical toward -- critical toward
20 those efforts, right?

21 A Can you --

22 Q Let me -- so in trying to convince or trying
23 to obtain licenses, right, from solution providers,
24 hospitals and other, and other consumers of the
25 licensing products, what Ms. Binder does, right, in

1 terms of elevating or promoting the brand, are --
2 they're integral to your own efforts, correct?

3 A Yes.

4 Q And so at least one purpose of, of all the
5 things that you kind of enumerated that Ms. Binder and
6 others do is toward revenue generation; is that right?

7 A Yes.

8 Q Okay, and in fact, we looked at earlier at
9 Exhibit 15, she, she wrote to Ben Choi and Josh
10 Berlin -- you saw the earlier document -- that
11 managers should be thinking about revenues 24/7,
12 right? So that is -- is that -- kind of going back to
13 that, is that a sentiment or a message that you think
14 is important at LeapFrog?

15 A Yes, I do think it's -- I do think that the
16 revenue is important and helps to drive the mission.

17 MR. CHUNG: All right. Let's go to tab 14.
18 Exhibit 22.

19 (Exhibit 22 was marked for
20 identification.)

21 BY MR. CHUNG:

22 Q All right. So, Mr. Banerjee, Exhibit 22 is
23 an email chain involving you and Lauren Bailey, and
24 Leah Binder initially, right, from July of 2024, and
25 let's start with Ms. Binder's initial email, right,

1 where she is asking Ms. Bailey about "other possible
2 use of our data and what can be done to improve survey
3 reporting," right, stating that "any further ideas
4 from you or others you talk with," I think "[are]
5 welcome."

6 Do you see that?

7 A Mm-hmm.

8 Q All right, and then Ms. Bailey -- looks like
9 she forwards the message to you and to Ms. Berger. It
10 says, "Welcome back."

11 Were you, were you coming back from like
12 paternity leave?

13 A Yes.

14 Q Okay, and she lists four -- one, two, three,
15 four, four ideas where she wanted to get your feedback
16 in response to Ms. Binder's request.

17 Do you see that?

18 A Yes.

19 Q Okay, and so on the -- if we turn to the
20 first page, you respond with I think comments on the
21 four ideas, and you write, "Similarly, LF data" --
22 it's in the middle of the -- yeah. "Similarly, LF
23 data versus medical device or technologies is
24 interesting to measure of variation effectiveness for
25 the technologies, and enables the technology companies

1 to engage with us through the (PAC) partners advisory
2 committee," is that right, "or data licensing."

3 A Yes.

4 Q Okay. What did you -- what were you kind of
5 discussing here?

6 A In the, in the chain generally?

7 Q No, in that sentence that I just read.

8 A In that sentence, okay.

9 So they outlined some ideas, and one of the
10 ones that stuck out to me in that first sentence is
11 that looking at -- because we're thinking about
12 different ways of using -- how organizations can use
13 LeapFrog data, that we could examine -- I thought it
14 was interesting if we could examine the LeapFrog data,
15 so the survey or the safety grade data, and different
16 medical device companies, and what they were doing and
17 what they're interested in, to see like what the
18 effectiveness is of, like of those technologies.

19 So we have members of our partners advisory
20 committee that are hand hygiene solution providers.
21 They do electronic monitoring that helps the hospitals
22 that they work with meet specific standards in hygiene
23 measure, and so I thought it would be interesting if
24 we put together a report that had -- like I connected
25 with this idea that if we made a report for hand

1 hygiene solution providers, as an example, that
2 specifically had, you know, the list of hospitals and
3 who met the standard using electronic compliance
4 versus observation, and then made that available as a
5 potential use case of the data.

6 I mean maybe that's what we were saying. I
7 wasn't -- I didn't --

8 Q Well, I want to focus actually on the
9 second -- I understand that, but you responded to it,
10 correct?

11 A Yes.

12 Q And you assessed each of the four ideas,
13 correct --

14 A Yes.

15 Q -- in your response, and then you continue,
16 "The first two are interesting as well, but I don't
17 see that they can have the same impact on driving data
18 licensing and PAC engagement (from my revenue lens) as
19 the other two."

20 Do you see that?

21 A Yes.

22 Q All right, and so when you say that the
23 first two on her list, right, that you "don't see that
24 they can have the same impact on driving data
25 licensing from a revenue lens," are you meaning

1 that -- are you saying that the first two ideas on her
2 list aren't -- you don't see them as, as impactful
3 potential sources of revenue, right, from potential
4 licensees; is that right?

5 A So the question is always like how can our
6 data be useful and who would, and who would be
7 interested in it.

8 Q Right.

9 A So those two ideas I was interested in. I
10 can see who would be interested in it. So LeapFrog
11 data and medical device technology data, I think would
12 be able to identify like, oh, hand hygiene providers
13 would be interested in, in this information to
14 improve, improve hand hygiene compliance as measured
15 by the LeapFrog standard.

16 So it's like who, who would be able to use
17 that information to improve, improve performance
18 aligned with our mission, and then a byproduct of that
19 is, is revenue.

20 The value-based --

21 Q Why do you say that it's a -- you used the,
22 the word "byproduct" a number of times.

23 A Oh.

24 Q Why, why, why is this a byproduct?

25 A Oh, well, like one of the results of people

1 using our data is that they are paying for the data
2 and getting the rights to use and access the data, and
3 that generates revenue, and --

4 Q Are you, are you really saying that revenue
5 generation is a byproduct of -- a potential byproduct
6 of these two ideas when you say that you're looking at
7 this from my revenue lens? Is that your testimony,
8 Mr. Banerjee?

9 A Yeah, in this internal email, I was jumping
10 ahead, that the focus is always the -- getting people
11 to use our data, and revenue is a result of that. I
12 used the word byproduct. Result. So just to --

13 Q Are you testifying that you're not focused
14 on -- you weren't thinking primarily of -- in
15 assessing these four ideas, thinking about are these
16 revenue generations? Is that your testimony, that
17 wasn't your primary focus?

18 A So the primary -- the using of the data and
19 revenue kind of go -- they go kind of hand in -- they
20 go hand in hand.

21 Q Yes, but that's different from revenue being
22 a byproduct; is that right?

23 A It's a, it is a result of -- it's a result
24 of people using the data. If there isn't anyone to
25 use the data, there is no revenue.

1 Q Understood.

2 All right. So we -- Ms. Bailey responds
3 "Thanks, Kush. Great points re driving data
4 licensing. I think I'll just share 3 and 4 with Leah
5 from that lens. So happy you're back," right?

6 So she makes the decision -- is it fair to
7 say from this she's making the decision to just
8 highlight the third and fourth idea, based on your
9 kind of feedback that they were more viable from --
10 again, she borrows your, your language, from a
11 "revenue lens"?

12 A Yeah, just to be clear, the first two ideas,
13 I can't envision, from my perspective, who would use
14 the data, and I also can't envision who would pay for
15 the data with these, these ideas, but they go kind of
16 hand in hand. These are -- they don't name specific
17 types of organizations that would use the data.

18 Idea 3 and 4, I can directly see why there
19 would be interest from organizations to examine the
20 LeapFrog data, next to some of these other, some of
21 these other areas. They're of keen interest to, to
22 hospitals and people that work with hospitals.

23 The first two ideas are generally -- there's
24 no -- at least to me, nothing clear cut that can --
25 that have applicability, and so that's what -- that's

1 all I was saying in this email, that I can't see who
2 would use these data.

3 I can't, I can't, I can't see the path
4 forward with those first two, but 3 and 4, I can kind
5 of see it, based on what we currently do at LeapFrog,
6 and from the, from the data licensing program and my
7 experience, that there, there might be some
8 applicability in organizations that would be
9 interested in using our data, if we could make some
10 type of case, if there could be some kind of white
11 paper, you know, that we could, we could put out some
12 kind of report that comes out of this, then -- that
13 we, we can make available, like hand hygiene.

14 Q Were either of these ideas implemented?

15 A No.

16 MR. CHUNG: Okay. Why don't we take a short
17 break. We've been going a little while.

18 THE VIDEOGRAPHER: This marks the end of
19 media unit number 5. Going off the record, the
20 time is 17:11 p.m.

21 (Whereupon, a short recess was taken.)

22 THE VIDEOGRAPHER: This marks the beginning
23 of media unit number 6. Going back on the
24 record, the time is 17:20 p.m.

25

1 (Exhibit 23 was marked for
2 identification.)

3 BY MR. CHUNG:

4 Q So Mr. Banerjee, Exhibit 23 is an email
5 chain from December of 2024, if you just take a moment
6 to review it.

7 A Okay.

8 Q All right, and is it correct that this is a
9 thread between you and Ms. Danforth where you're
10 discussing a data licensee that was trying planning to
11 cancel its, its subscription?

12 A Yes.

13 Q Okay, and they were planning to cancel
14 because of budgetary issues; is that right?

15 A Yes.

16 Q All right, and -- so what is -- in the top
17 email on December 12, 2024, she writes, "FYI -- if it
18 comes to it, I want to push for them to get one year
19 of PAC for free and keep their license going -- harder
20 to restart license that PAC," right?

21 What did you understand her to be -- her
22 desire to be here?

23 A So HealthNet is a health plan, and as we
24 shared earlier, the contracts for data licensing
25 are -- they're long, and they take, they take a long

1 time.

2 The partners advisory committee does not
3 have a contract, even, so the idea of canceling a data
4 license, and if in the future they have budget, and
5 they wanted to restart, this is a very engaged health
6 plan that's a member of the partners advisory
7 committee and a data licensee.

8 We saw that the -- and so we did have
9 conversations with her from -- Barb from HealthNet
10 about, about this, and the -- canceling the license
11 would necessitate them to have a new contract, if they
12 were ever interested in doing it in the future, and so
13 this was kind of swapping the, the partners advisory
14 committee for the, the license, so they could continue
15 to access and use the data, and we would be giving
16 them a year of PAC membership for free.

17 Q All right, and she writes, "We'll need to
18 talk to Leah, but that is my preference," right?

19 So do you remember having a discussion with
20 Ms. Binder about this kind of "trade" that
21 Ms. Danforth was contemplating here?

22 A Yeah, I don't, I don't recall having the
23 conversation with Leah, but I believe Missy did, at
24 least, and, and then yeah, we decided to offer that.

25 Q Okay. Did they accept --

1 A They did.

2 Q -- the offer?

3 All right, and so did they continue to be a
4 data licensee?

5 A Yes. This, this all happened in the, in the
6 last year, and it's a one-year contract, so they're
7 still, they're still under contract.

8 MR. CHUNG: Understood. All right.

9 Let's go to tab 33. This will be Exhibit
10 24.

11 (Exhibit 24 was marked for
12 identification.)

13 BY MR. CHUNG:

14 Q So Exhibit 24, Mr. Banerjee, if you look at
15 the initial email you wrote, "I think this was one of
16 the invoices we were holding to pay during the cash
17 flow issues."

18 Do you see that? I think you're referring
19 to a TelAffects invoice.

20 A Oh, sorry. Which page was it?

21 Q The very first --

22 A Oh.

23 Q The original email, so going back --

24 A Oh, okay.

25 Q -- to the last page. Do you see that?

1 A Oh, the last page. Yes.

2 Q All right. You mentioned "the cash flow
3 issues" here.

4 What cash flow issues were you referring to?

5 A So I don't know all of the, all the details
6 around the, the cash flow issues that we were having
7 during this time, but my general understanding is that
8 we had -- because of the timing in which certain
9 invoices are created and paid, and expenses, the way
10 expenses were coming in, there was a period of time
11 where we had a lower level of cash reserves than we
12 would have liked to have.

13 And so that was creating a little bit of an
14 urgency in collecting some of those invoices that we
15 had not received yet, and even like some of the
16 payments that were going out for expenses, I know
17 those were -- there was a period of time when those
18 were closely being monitored, and I think that's the
19 timing of when these emails happened.

20 Q So a couple emails later, you, you ask
21 Mr. Johnson, "any update I can share with TA on when
22 they can expect the payment?"

23 Do you see that?

24 A Mm-hmm, oh, I did see that.

25 Q It's on the second page.

1 A Okay, yes.

2 Q Do you see that?

3 A Yes.

4 Q And then Mr. Johnson forwards the email to
5 Ms. Danforth, saying, "I'm not sure how to answer
6 Kush. Leah does not want us telling staff we still
7 have cash flow issues."

8 Do you have an understanding as to why
9 Ms. Binder did not want to tell staff that LeapFrog
10 was having cash flow issues?

11 A No, I don't, I don't know why.

12 Q Okay. Do you recall any kind of discussion
13 among the organization at this time around, around
14 cash flow problems and the need for revenue?

15 A I know there -- I mean there were, there
16 were discussions about it, but it's like to the extent
17 of -- we, we want to collect some of these -- like
18 especially some of the larger invoices that we were
19 expecting, and they had been like far overdue, and
20 that was kind of resulting in, in this little bit of
21 a, of a crunch, and then some of the expenses that
22 needed to be paid.

23 I mean that's, that's really the extent of
24 what, what I know about, and, and so any conversations
25 I had were about those -- collecting those invoices

1 that were outstanding or, like in this case, with
2 TelAffects delaying a payment a little bit, just so
3 that everything could be kind of smoothed, smoothed
4 out with what was coming in, what needed to go out.

5 Q Okay, and so in terms of collecting
6 invoices, these were invoices from licensees; is that
7 right?

8 A Yeah, some of them, some of them were
9 invoices from, from licensees.

10 Q Okay. So how -- what, what came of that?
11 Were you able to get invoices paid, or --

12 A Yes.

13 MR. CHUNG: Okay. Let's move on to the next
14 document, 35, and this will be Exhibit 25.

15 (Exhibit 25 was marked for
16 identification.)

17 BY MR. CHUNG:

18 Q All right. Exhibit 25 is -- it's an email
19 thread from June of this year between Ms. Binder and
20 Mr. Johnson, and there's a presentation attached to it
21 about LeapFrog's 2025 financials.

22 Do you see that?

23 A Yes.

24 Q All right, and if you look at the slide
25 ending in Bates number 285 -- it's the page behind the

1 cover page.

2 A Okay. Yes.

3 Q It says that "for the last ten years,
4 LeapFrog's revenue has grown 11.6 percent per year,"
5 right?

6 Just generally speaking, you've been at the,
7 at the organization for let's say roughly, roughly ten
8 years, right? Nine years? What has accounted for
9 that revenue growth of 11.6 percent per year?

10 A I think we have a lot more sources of, of
11 revenue than we had, but I -- so I haven't seen this
12 before. I think this was presented to the board, it
13 sounds like.

14 Q So the question --

15 A So --

16 Q -- is what --

17 A But, but --

18 Q From your understanding, what accounts for
19 that growth --

20 A Yeah.

21 Q -- in the revenue?

22 A So I think all the, all like the revenue
23 items that, that we saw, some of those didn't exist
24 when we started -- when I started ten years ago.

25 Q Which ones were those?

1 A I don't have the list in front of me, but I
2 know like donations were, were on there, and we, I
3 think, just started that around the time that Karen
4 Jupiter started to lead that initiative.

5 I think there's expansion of the, like the
6 reports that we make available, like those, like those
7 data products. I think the partners advisory
8 committee has grown a lot, especially in the last ten
9 years, and it kind of -- it looks different in terms
10 of this, how we, I mean how we, how we like run that,
11 run that program.

12 So yeah, I think a lot of those things have
13 contributed, and then, of course, like accolades have
14 contributed to those, and that program has grown a lot
15 over the years, and then, of course, data licensing,
16 which I know those are the, those are the top two, but
17 there's -- yeah, the pie has kind of grown in terms of
18 like the different sections, and, and then the --
19 yeah, the types of, the types of programs and the work
20 that we're doing even on existing programs, I think
21 they're all kind of growing.

22 Q All right. The next slide, Bates ending
23 286, for the fiscal year 2026 proposed budget, we have
24 an estimate that LeapFrog will make about six and a
25 half million dollars combined from accolades and data

1 licensure.

2 Do you see that?

3 A This is 86286?

4 Q 6286, yes.

5 A Okay. Yes.

6 Q All right. So \$4.3 million from accolades,
7 then about \$2.3 million from data licensure, correct?

8 A Yes.

9 Q And they -- as we've seen in other
10 documents, they are the two top revenue sources, among
11 at least the sources that are enumerated in these
12 documents, right?

13 A Right.

14 Q Okay, and in the following page, Bates 6287,
15 it says here that it estimates that LeapFrog will make
16 about a \$400,000 profit for fiscal year '26.

17 Do you see that at the bottom --

18 A Oh, yes.

19 Q -- that income?

20 Okay, and is that -- I mean based on your
21 understanding, is that typical for, for LeapFrog to
22 make some amount of profit during a fiscal year?

23 A I haven't seen the, the, like the, the net
24 income in most, most years. I know in the last couple
25 years we've been around, around break-even or under

1 break-even in the last couple years.

2 Q Okay. Next slide, Bates ending 6288, it
3 says "Key Assumptions: Revenues." The first bullet
4 point --

5 A Yes.

6 Q The first bullet point reads, "Accolades:
7 Projected growth in line with prior performance
8 trends; with growth, there are more eligible renewals
9 each round," and "Renewals have a much higher sales
10 rate."

11 Do you see that?

12 A Okay.

13 Q Okay. When it says "with growth, there are
14 more eligible renewals each round," what is the growth
15 that this presentation is referring to?

16 A Okay. So I don't even know who, I don't
17 know who, who drafted this, but if I were to, if I
18 were to guess, that "with growth," the growth of the
19 licensing program, there's more hospitals, presumably,
20 that are licensing the rights to use the marks, the
21 badge, that that creates more initiation to using, to
22 using it to promote patient safety.

23 And as a result, if those hospitals that got
24 an A, use the marks, if they happen to get an A again,
25 they would be eligible to be a renewal, and we see

1 that renewals have, have a higher conversion rate than
2 non-, than hospitals that have not used the marks
3 before.

4 So I think that, that idea is, is kind of
5 outlined here.

6 Q Okay. So is it -- just to -- are you saying
7 that the kind of initial step in this growth is that
8 there are more hospitals that are, that are
9 participating in the survey; is that right?

10 A I, I thought we were talking about the
11 safety grade.

12 Q Yeah, so I'm asking you what is the kind
13 of -- in terms of the growth that's referenced here,
14 right, you said that there are more hospitals -- the
15 growth there is a reference to more hospitals that are
16 licensing; is that right?

17 A Yes, more A hospitals that are licensing. I
18 think that's what it's, what it's, what it's referring
19 to.

20 Q So there's an increase over time, or
21 projected for this year, there's an increase in the
22 number of A hospitals, number one; is that correct?

23 A No. Number of A hospitals that are
24 licensing.

25 Q Okay.

1 A So we're seeing more hospitals are
2 interested in licensing, because there's -- we've seen
3 that actually the number of hospitals that are
4 licensing is kind of like pretty much stuck at
5 22 percent, so -- but, but we have, you know, a
6 significant number. If we see some growth in that,
7 and that there are more hospitals that are interested
8 in, in licensing, then we are seeing high, a high
9 renewal rate, and so those hospitals that are using
10 the logo would be more likely, we think, to renew each
11 round.

12 Q But going back to that first step, it's --
13 is another way of putting it that the projection here
14 is that you're going to get more than 22 percent of
15 the A hospitals to sign licensing agreements; is that
16 the idea?

17 A Yeah, we would, we would like more hospitals
18 to, to use, to use the, to use the logo to promote
19 patient safety.

20 Q And so once you're able to convert or get
21 more of those A hospitals, right, to, to license, the
22 next step there then is -- the next round or in
23 subsequent rounds, there are more eligible renewals
24 among those hospitals; is that right?

25 A Yes. Yeah.

1 Q All right.

2 A No, so they would be eligible renewals if
3 they got an A again.

4 Q Correct.

5 A Right?

6 Q Right. So in order for LeapFrog to obtain
7 renewals from these hospitals, these -- like you said,
8 the hospitals, they must continue to receive A grades,
9 correct?

10 A Yes.

11 Q Okay, and so that is, that is part of the
12 projection here, that with the growth, there will be
13 more eligible renewals each round, right?

14 A Yes.

15 Q It's projected that those A hospitals,
16 right, those greater number of A hospitals that enter
17 into licensing agreements will continue to get, to get
18 A's in subsequent rounds; is that correct?

19 A Yes. If they get, if they get A's in
20 subsequent rounds, they will be more likely than an
21 average hospital to, to license, and that is what we
22 were seeing in the, in the numbers.

23 Q Okay.

24 So how -- in order for this, in order for
25 this projection to come to fruition, right, how does,

1 how does LeapFrog -- what is the -- do you know what
2 the likelihood or what the patterns are, what the
3 likelihood is that a hospital that gets an A grade in
4 one round will repeat, will get an A grade in the next
5 round?

6 A No, I don't know that.

7 Q Okay. Does that -- is that something that
8 you've, that you've ever -- even if you don't know it
9 now, is that something that you ever looked into?

10 A I, I think, you know, Alex has probably done
11 an analysis on that before to see like what the, what
12 the changes are, just generally, from, from one round
13 to the other with respect to the grade, like with A
14 hospitals that move to B hospitals and B's that move
15 to A's.

16 MR. CHUNG: Okay. All right. Mr. Banerjee,
17 I don't have any more questions.

18 MS. WOOD: Okay.

19 MR. CHUNG: Thank you.

20 MS. WOOD: I'm good.

21 THE VIDEOGRAPHER: Thank you. We are off
22 the record at 17:42 p.m. This concludes today's
23 testimony given by Kushagra Banerjee. The total
24 number of media units used is 6 and will be
25 retained by Veritext.

(Signature having not been waived, the
video deposition of KUSHAGRA BANERJEE
was concluded at 5:42 p.m.)

ACKNOWLEDGEMENT OF WITNESS

I, Kushagra Banerjee, do hereby acknowledge
that I have read and examined the foregoing
testimony, and the same is a true, correct and
complete transcription of the testimony given by
me, and any corrections appear on the attached
Errata sheet signed by me.

Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY.

THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

P R O C E E D I N G S

VIDEO TECHNICIAN: Good morning. We are going on the record at 9:06 a.m. on September 22nd, 2025.

Please note that the microphones are sensitive and may pick up whispering and private conversations.

Please mute your phones at this time.

Audio and video recording will continue to take place unless all parties agree to go off the record.

This is media unit 1 of the video-recorded deposition of Ms. Leah Binder in the matter of Good Samaritan Medical Center, Inc., et al., versus The Leapfrog Group, filed in the United States District Court for the Southern District of Florida, West Palm Beach Division, case number 9:25-CV-80526-DMM.

My name is Orson Braithwaite representing Veritext Legal Solutions, and I am the videographer.

The Court Reporter is Christina Hotsko

1 from the firm Veritext Legal Solutions.

2 Counsel will now state their appearances
3 and affiliations for the record, beginning with
4 the noticing attorney.

5 MR. CHUNG: Daniel Chung, Gibson, Dunn &
6 Crutcher, for plaintiffs.

7 MR. TAKAGAKI: Mark Aaron Takagaki,
8 Gibson, Dunn & Crutcher, for plaintiffs.

9 MS. BLAIR: Kim Blair, Wilson Elser, for
10 Leapfrog Group.

11 MS. WOOD: Courtney Wood, Wilson Elser,
12 on behalf of defendant Leapfrog Group.

13 VIDEO TECHNICIAN: Thank you. Will the
14 court reporter please swear in the witness.
15 Whereupon,

16 LEAH F. BINDER,
17 being first duly sworn or affirmed to testify to
18 the truth, the whole truth, and nothing but the
19 truth, was examined and testified as follows:

20 EXAMINATION BY COUNSEL FOR PLAINTIFFS
21 BY MR. CHUNG:

22 Q. Good morning. Could you please state

1 your name -- full name for the record, please.

2 A. Leah Frieda Binder.

3 Q. Have you gone by any other names?

4 A. No.

5 Q. And you understand that the court
6 reporter is taking down everything that's being
7 said during this proceeding.

8 Do you understand that?

9 A. Yes.

10 Q. So before we get into the substance, I
11 just want to go over some basic ground rules that
12 are applicable to all depositions.

13 The first is that we should try our best
14 not to talk over each other. So if you could
15 wait for me to finish my question before you
16 answer, and I'll wait for you to finish your
17 answer before I move on to the next question.
18 It's important that you -- that any response you
19 give is with words. So an uh-huh or an huh-uh is
20 very tough for the court reporter to take down.
21 So that's very important.

22 You also understand that you're

1 testifying under oath and you understand that, by
2 taking that oath, you're promising to answer my
3 questions truthfully and accurately as possible.

4 Do you understand that?

5 A. Yes.

6 Q. All right. Are you taking any
7 medications or under the influence of any
8 substances or is there any reason today that
9 might prevent you or hinder you from
10 understanding my questions or what's happening
11 here today?

12 A. No.

13 Q. All right. If you don't understand one
14 of my questions, just ask me to clarify it and
15 I'll do my best to do that.

16 From time to time, your attorney may
17 object to certain of my questions. Unless
18 Ms. Blair instructs you not to answer the
19 question, though, you have to answer the
20 question.

21 Do you understand that?

22 A. Yes.

1 Q. All right. If you need a break at any
2 time, just let us know. The only ground rule
3 with respect to breaks is that I ask you to
4 answer any pending questions before we take a
5 break.

6 Do you understand that?

7 A. Yes.

8 Q. All right. So let's get started.

9 Have you ever had your deposition taken
10 prior to today?

11 A. Once, 30 years ago.

12 Q. Okay. And what kind of case was that?

13 A. It was a car accident I witnessed.

14 Q. All right. So you were not a party. You
15 were a witness to the car accident?

16 A. Yes.

17 Q. All right. And where was that -- where
18 was the case filed or where did it take place?

19 A. In New York.

20 Q. All right. And for today's purposes, do
21 you understand that you're testifying not only on
22 behalf of yourself in your personal capacity but

1 also with respect to certain topics on behalf of
2 The Leapfrog Group?

3 Do you understand that?

4 A. Yes.

5 Q. All right. And are you aware of what the
6 topics are generally based on discussions with
7 your counsel?

8 A. Yes.

9 Q. Okay. So at various points throughout
10 the deposition, I'll kind of identify for you
11 whether there's a topic tied to the questions I'm
12 going to ask you so you know when you'll be
13 testifying in your corporate representative
14 capacity and when you're testifying in your
15 personal capacity. Okay?

16 A. Yes.

17 Q. Did you prepare for your deposition
18 today?

19 A. Yes.

20 Q. And how did you prepare?

21 A. I met with counsel four times. And I
22 studied up, you know, read over our website,

1 looked at our materials, looked at our public
2 relations and our finances.

3 Q. Okay. When did you -- when did you --
4 when was the first preparation session with your
5 counsel?

6 A. About four weeks ago. It was a joint
7 session with all of the Leapfrog employees who
8 were deposed in this matter.

9 Q. Deposed or to be deposed?

10 A. To be deposed.

11 Q. To be --

12 A. I mean, nobody had been deposed yet.

13 Q. Okay. So that first session about four
14 weeks ago was with all of the Leapfrog employees
15 who had been noticed for deposition; is that
16 right?

17 A. Right. To sort of give us kind of the
18 deposition 101, what -- what it's going to be
19 like and et cetera. So...

20 Q. Okay. And who -- approximately how long
21 did that meeting take?

22 A. I can't remember. Two hours, something

1 like that.

2 Q. All right. And who led that meeting?

3 A. Counsel, Kim Blair.

4 Q. All right. Was there, like, an agenda
5 for that meeting or talking points for that
6 meeting?

7 MS. BLAIR: Objection to form.

8 To the extent you're asking her about
9 specific communications from counsel, I'm going
10 to instruct you not to answer that. You can
11 answer yes or no as to whether there was an
12 agenda, but the content of the agenda you cannot
13 disclose.

14 THE WITNESS: Okay. Yes, there was an
15 agenda.

16 BY MR. CHUNG:

17 Q. Okay. And thereafter -- so that initial
18 meeting was just a joint meeting with all the
19 other folks who had been noticed; is that right?

20 A. Yes.

21 Q. Okay. And then there were subsequently
22 three additional preparation sessions; is that

1 right?

2 A. Yeah, there was one short one and then
3 there was -- there were two longer ones.

4 Q. Okay. And were those subsequent -- the
5 other three -- just with yourself or were there
6 other Leapfrog employees present at those
7 sessions?

8 A. Just myself.

9 Q. All right. Did you review any documents
10 in preparation for this deposition. You
11 mentioned that you reviewed some materials, but
12 if you could go over what you reviewed.

13 A. I reviewed our board minutes and packets,
14 all of the materials that were given to our board
15 over the past couple of years. And I reviewed
16 some of the materials that had been given out in
17 prior depositions of employees. I reviewed our
18 website and I reviewed some of the information on
19 our methodology just to refresh myself, make sure
20 I had a memory for all the details -- or as many
21 of them as I'm aware of -- for the methodology.

22 Q. All right. And so -- you mentioned that

1 you reviewed the materials for other depositions
2 that have taken place --

3 A. Uh-huh.

4 Q. -- in this case.

5 And were those depositions of other
6 Leapfrog employees?

7 A. Yes.

8 Q. All right. Did you review the
9 deposition -- deposition transcripts of --

10 A. Yes.

11 Q. -- any -- anyone other than Leapfrog
12 employees?

13 A. No.

14 Q. All right. And so in terms of the other
15 depositions -- the transcripts of the other
16 depositions, did you review the one for Melissa
17 Danforth?

18 A. Yes.

19 Q. All right. How about Lauren Bailey?

20 A. Yes.

21 Q. Karen Jupiter?

22 A. Yes.

1 Q. Kush Banerjee?

2 A. Yes.

3 Q. Alexandra Campione?

4 A. Yes.

5 Q. All right. Any others?

6 A. I don't think so. Those are all the
7 employees --

8 Q. Those are all the folks who have been
9 deposed so far.

10 A. Right. Okay. Yeah. Yes.

11 Q. All right. Did you watch any videos in
12 preparation for today's deposition?

13 A. No.

14 Q. Did you listen to any audio recordings of
15 meetings or calls?

16 A. No.

17 Q. Did you -- what about transcripts of any
18 meetings?

19 A. I didn't -- for this deposition, I did
20 not review the -- any transcripts.

21 Q. Okay. But you mentioned I think you
22 reviewed board materials, like, minutes for board

1 meetings.

2 A. Right.

3 Q. Okay. But those are not transcripts,
4 correct?

5 A. Right. No, those are minutes.

6 Q. Did you speak with any of the other
7 Leapfrog deponents before their deposition? And
8 I'm not talking about that initial joint prep
9 session.

10 A. Uh-huh.

11 Q. But other than that.

12 MS. BLAIR: I'll object to form to the
13 extent counsel may have been involved.

14 But if counsel was not involved, please
15 answer the question.

16 BY MR. CHUNG:

17 Q. I'm not interested in any communications
18 you had with any of your colleagues that was
19 involved in the presence of counsel or involved
20 counsel.

21 A. I -- when counsel was not present, I
22 spoke to employees to give -- offer encouragement

1 and thanks for doing this.

2 Q. Okay. And who in particular?

3 A. All of them.

4 Q. All right. Did you -- in addition to
5 offering them thanks for doing this, did you
6 discuss anything else about the case with any of
7 the deponents?

8 A. I just said, speak from your heart, tell
9 the truth. That's it. That's all I said to my
10 employees outside of counsel, but even with
11 counsel.

12 Q. Okay. How about after their depositions?
13 You mentioned that you reviewed their deposition
14 transcripts, but did you have any conversations
15 with any of the other deponents after they had
16 finished their depositions?

17 A. Yes, with counsel present.

18 Q. Okay. And so were there -- so were there
19 discussions with other deponents after their
20 depositions but with counsel present? Is that
21 right?

22 A. Yes.

1 Q. All right. And were those meetings or
2 calls?

3 A. Yes.

4 Q. Okay. And were those with just -- again,
5 joint discussions with multiple deponents or with
6 just single deponents who had just finished their
7 depositions?

8 A. With counsel and with single deponents
9 and sometimes -- I don't think anybody else was
10 there -- and myself and maybe one other person
11 sometimes depending on who it was.

12 Q. Okay. And this was after each
13 deposition; is that right?

14 A. Uh-huh.

15 Q. And is it with -- was it for each -- for
16 all the folks who had been deposed: Ms. Jupiter,
17 Ms. Bailey, Ms. Campione, Mr. Banerjee, and then
18 Ms. Danforth?

19 A. Yes.

20 Q. Okay. So after each deposition there was
21 a meeting or a discussion with counsel present
22 and you?

1 A. Yes.

2 Q. Okay. Let's go into your background. If
3 we can just start with your educational
4 background, your schooling from college on
5 forward.

6 A. I went to Brandeis University, and I
7 graduated officially in 1985, but I was actually
8 the class of '84. My father died at the end
9 of '84, so I had delayed my graduation. But I am
10 very much a proud '84 graduate.

11 I then worked -- I worked in publishing
12 for a little while. And -- I liked books, so I
13 decided at the age of 22 -- that's kind of how
14 you make decisions about your career -- is, I
15 like books, I think I'll get into publishing. So
16 I got a job at a publisher in Cambridge,
17 Massachusetts, worked there for about a year, two
18 years. Then ended up moving to New York for -- I
19 was recruited for another job, another publisher,
20 worked there for a while.

21 And then real -- well, I worked for a
22 family-owned publisher that had a fascinating

1 background. They were called Schocken Books, and
2 they were founded by -- they were founded by a
3 Jewish family in -- I think, in Europe that had
4 fled Nazi Germany and burned their warehouse down
5 with all the books because they didn't want the
6 Nazis to take down the manuscripts. And they
7 just took one copy of each book, fled to New York
8 and Israel -- anyway, it was an incredible story.
9 And they had classic books, like Kafka, things
10 like that. It was a fascinating place to work.

11 And so -- and I worked for Miriam
12 Schocken, who was the granddaughter of the family
13 that fled. It was just an incredible experience.
14 However, that was a time period in the '80s when
15 a lot of businesses were -- especially in
16 publishing, medium-sized publishers, like this
17 one, were really not doing well. So they were
18 bought by Pantheon Books, which was part of
19 Random House. They retained two employees. One
20 was the editor, who was the acquisitions editor,
21 and one was me. I was the publicist.

22 And -- so I went over to Random House,

1 and it was very different. It wasn't this
2 family-owned business anymore. And it -- I --

3 Q. Ms. Binder, I'm going to stop you there.
4 Your educational history.

5 A. Oh, okay. After working there for a
6 while, I went to University of Pennsylvania and I
7 got two master's degrees, one from the Fels
8 Institute of Government and one from Annenberg
9 School for Communication.

10 Q. Okay. And those -- I think those degrees
11 you received in 1994; is that right?

12 A. Yes.

13 Q. Okay. Let's -- so post the advanced
14 degree, the master's degree, can you talk about
15 your employment history?

16 A. So after I was working in publishing in
17 New York, I wanted to go into nonprofit and I saw
18 this position for a special assistant to the CEO
19 of an organization called the National League for
20 Nursing. And I had not been particularly
21 interested in healthcare as a career, but I
22 decided to interview because it sounded

1 interesting. And -- the job sounded interesting.

2 So I interviewed with Pam Maraldo, who
3 was the CEO. And I really just wanted to work
4 for her. She was amazing.

5 Q. And when was that?

6 A. '86, something like that.

7 Q. I'm talking about after you got your
8 master's degree. Your employment history. That
9 was my question. What was --

10 A. Oh, I missed the part that -- you wanted
11 after my master's?

12 Q. Yes.

13 A. Okay. After my master's -- well, I was
14 working during my master's. I worked while I was
15 in school.

16 Q. Okay.

17 A. But -- I was working for the National
18 League for Nursing while I was in school. And
19 then I -- then what did I do? I went to Planned
20 Parenthood for one year. I was there -- I ended
21 up being their Senate lobbyist.

22 And then I went to -- then I was

1 recruited to go to New York City to work in the
2 Giuliani administration for Maria Mitchell, who
3 was the deputy -- I forgot her title; it wasn't
4 deputy mayor, but it was equivalent -- for
5 healthcare.

6 And then I worked there for four years
7 and then moved to Maine, where I was CEO of a
8 nonprofit called Healthy Community Coalition,
9 which was an affiliate of a health system called
10 the Franklin Community Health Network.

11 And I worked for the CEO of the network
12 and, over time, we grew it. We raised a lot of
13 money through grants and things like that, so it
14 grew.

15 And so I had more people. And he -- my
16 boss, Rick Batt, asked me to take on a few other
17 things within the hospital. So I started working
18 on, like, education in the hospital, public
19 relations in the hospital. I did a lot of stuff
20 in the hospital.

21 Q. And you mentioned that this network was a
22 not-for-profit organization --

1 A. Yes.

2 Q. -- is that right? Okay.

3 And am I right that you were there for
4 about nine years?

5 A. Eight.

6 Q. Eight years? Okay.

7 A. Uh-huh.

8 Q. 1999 to about 2000- --

9 A. 2008.

10 Q. '8, okay.

11 A. So -- yeah, but I was -- so
12 eight-and-a-half, maybe, something like that.

13 Q. Okay. So -- and then you moved on to
14 The Leapfrog Group, am I right, after that?

15 A. Yes.

16 Q. Okay. And how did that opportunity come
17 about?

18 A. Well, my boss, Rick, had announced he was
19 retiring in a year, and so I started to think
20 about what's my next step. And this was a rural
21 community with not that many opportunities unless
22 I wanted to compete for his position, which --

1 they certainly wanted me to, but I didn't want
2 that particular position.

3 So I started looking online and I saw
4 that there was a national search for the CEO of
5 The Leapfrog Group, and so I thought, wow, well,
6 I'll put my hat in the ring. The reason I was
7 interested in particular was because I had seen
8 the impact of the Leapfrog survey and the process
9 of Leapfrog, I had seen an impact at our system
10 that was extremely powerful. It was even more
11 impactful than, say, Joint Commission
12 accreditation in those visits. It had a huge
13 impact on really transforming our patient safety.

14 So I had seen that, and so I was very
15 supportive and very excited about the
16 opportunity, but really didn't think that they
17 would find me out of nowhere. You know, I was in
18 the middle of nowhere, literally.

19 And they -- obviously they did. I mean,
20 I went through several interviews with the search
21 committee and -- et cetera, and then they offered
22 me the position. So...

1 Q. Okay. Just backtracking a little bit.

2 In your several years at the Franklin
3 Community Health Network in the middle of
4 nowhere -- don't tell that to Maine folks -- in
5 your role there, am I right that kind of the
6 ultimate position that you reached was
7 vice-president --

8 A. Yes.

9 Q. -- of that organization?

10 A. I was, like, vice-president and CEO of
11 the Healthy Community Coalition.

12 Q. Understood. Okay.

13 And as part of and as vice-president and
14 CEO of that organization -- and again, it was a
15 501(c)(3), correct?

16 A. Yeah.

17 Q. Right. It sounds like, based on kind of
18 what you were talking about in terms of the
19 growth of the organization while you were there,
20 that one of the your responsibilities as CEO was
21 basically fundraising; is that right?

22 A. Yeah. Raising money primarily through

1 grant writing.

2 Q. Right. Raising money to fund the
3 operations of the organization; is that right?

4 A. Partly the operations, but also
5 particular projects that we wanted to do, such as
6 we had a mobile health unit that went around
7 giving flu shots and screenings throughout this
8 very poor community. And we had an adolescent
9 anti-tobacco campaign we got funding for. We had
10 a breast cancer screening program. Things like
11 that. Things that would be related to preventive
12 care.

13 Q. Okay. So you joined The Leapfrog Group
14 in 2008 as the CEO and president; is that right?

15 A. No. I joined as CEO.

16 Q. And then -- was the president title added
17 later on?

18 A. Yes.

19 Q. All right. And who are your direct
20 reports currently?

21 A. Missy Danforth, Ralph Johnson, Karen
22 Jupiter, Daran Gaus.

1 I think that's it.

2 Q. Okay. And Leapfrog, safe to assume, was
3 founded before you joined, correct?

4 A. Yes.

5 Q. In about 2000 or so?

6 A. 2000.

7 Q. All right. Now, I want to allude to
8 the -- Leapfrog's mission statement as it's set
9 forth on the website. I'm sure you're familiar
10 with it. Let me know if you're not.

11 But it says that the mission is to
12 trigger giant leaps forward in the safety,
13 quality, and affordability of U.S. healthcare by
14 using transparency to support informed healthcare
15 decisions and promote high-value care.

16 Are you familiar with that language from
17 the website?

18 A. Yes.

19 Q. Okay. Was that the mission or the
20 mission statement when you first joined as CEO in
21 2008?

22 A. "Trigger giant leaps forward" was always

1 the tagline. There was variations on the full
2 mission statement --

3 Q. Okay.

4 A. -- over time.

5 Q. But at least kind of in its current
6 version, whenever --

7 A. Uh-huh.

8 Q. -- it came into being, Leapfrog's mission
9 is -- the foundation of it is in transparency,
10 correct?

11 A. And patient safety in particular.

12 Q. Right. And the goal of using
13 transparency is to equip healthcare consumers
14 with information that really helps them make
15 informed healthcare decisions, right?

16 A. Yes. And also to inform purchasers who
17 are employers of companies that offer health
18 benefits -- to give them information as well to
19 ensure that their employees can get the very best
20 care.

21 Q. Okay. Has Leapfrog always been a
22 not-profit [sic]?

1 A. Yes.

2 Q. All right. When you started out in 2008,
3 how did Leapfrog fund its operations? Where did
4 it get its revenue?

5 A. They had a couple of grants that were
6 finishing. And Leapfrog also had a little bit of
7 revenue from licensing its data.

8 And -- I'm trying to remember. I think
9 those were the two main sources, the grants
10 and -- for different projects. And -- oh, and
11 they had -- I'm sorry. They had partners. They
12 had a partners program. These were industry
13 partners who paid dues to be part of Leapfrog.
14 Not in a governance way. They were never part of
15 governance.

16 And then they also had sponsorships and
17 things like that for annual meeting.

18 Q. Okay. So at the time when you joined,
19 what was the most significant source of revenue
20 among the ones that you enumerated?

21 A. I think it -- I'm not sure. It might
22 have been licensure, the licensure programs, but

1 I'm not sure.

2 Q. Okay. You mentioned that there was a
3 little bit of revenue from the data licensure
4 programs.

5 A. Yeah, yeah, but there was also lots of
6 revenue from -- not lots. There was not that
7 much revenue at all, but there was some revenue
8 from some programs. And they had a grant -- I
9 say "they" because I wasn't here when they got
10 it, but they got a grant from ARC. They had a
11 conference -- some conference sponsorships. They
12 had probably about 200,000 -- well, I'm trying to
13 remember. They had some money from the
14 partnerships. I just can't remember which was
15 the largest source.

16 Q. Okay. Now, what are the most significant
17 sources of revenue for the organization?

18 A. The number one source of revenue for us
19 right now is accolade sales. These are sales of
20 the logo for an A to hospitals that earn an A
21 from the hospital safety grade.

22 The second highest source of income is

1 licensure of our data.

2 Q. All right. And that's what you mentioned
3 earlier? This is the --

4 A. Uh-huh.

5 Q. -- licensure of data that the --

6 A. Yeah.

7 Q. -- organization collects or the hospital
8 survey; is that right?

9 A. From a variety of -- primarily the
10 survey, but also the safety grade itself.

11 Q. Okay. Now, you were the CEO when
12 Leapfrog launched the hospital safety grade
13 program in 2012, correct?

14 A. Yes.

15 Q. Was that the first year of the hospital
16 safety grade?

17 A. 2012. Yes.

18 Q. 2012. Okay.

19 How did that come to be, the safety grade
20 program?

21 A. There was a conversation at our board in
22 the year 2010. In 2010, we were reflecting as an

1 organization on progress of the United States
2 since To Err is Human.

3 To Err is Human was a report that was
4 issued by the Institute of Medicine, which -- now
5 called the National Academy of Medicine. That
6 report suggested that upwards of 100,000 people
7 were dying every year from preventable errors in
8 hospitals.

9 And the employers who formed Leapfrog
10 were outraged by that and wanted to form Leapfrog
11 as a way of getting more transparency so they
12 could identify where the issues were and they
13 could inform their employees about where the
14 hazards are.

15 So that was what -- and also, primarily,
16 they wanted to see a reduction in these problems
17 in hospitals and save some lives.

18 So in 2010, there was a reflection ten
19 years out, ten years after To Err is Human, how
20 are we doing as a country? How are we doing at
21 Leapfrog?

22 And there were a number of studies that

1 came out that year asking that question. And the
2 answer was, we're not doing well at all. It's
3 gotten -- the only evidence we have is it's
4 gotten worse. And -- in part because we can
5 measure it better.

6 So we can -- we're not -- To Err is
7 Human, they had to really estimate a lot because
8 there was just no measurement; there was no data.
9 They had to really bring some experts in and try
10 to figure it out from pulling records from
11 hospitals. And it was -- so it was an estimate.

12 And now they think -- they thought in
13 2010 it's more like twice that at least.

14 So the only evidence we had in 2010 was
15 that things got worse, that we made no progress;
16 things probably got worse.

17 And so that was a really big issue for
18 the board at Leapfrog. What does that mean for
19 us as an organization? Are we headed in the
20 right direction?

21 And we talked a lot about what's the
22 problem, and we -- I think the board felt -- I

1 completely agree -- that the problem with what
2 the Leapfrog model is is not that it's a bad idea
3 to have transparency in the marketplace. That
4 works in every market. It will work in
5 healthcare.

6 The problem we had was that hospitals
7 that chose not to be transparent and declined to
8 report to the survey just got a pass. So that
9 wasn't going to be a functional market if
10 hospitals were declining to report to the survey.
11 So -- and you don't have data from every
12 competitor in a market. So -- and there was no
13 other data source.

14 So we decided that what we had to do was
15 figure out how we can get enough data to be able
16 to have a functional market in healthcare so that
17 hospitals can compete to deliver top quality care
18 to the employees of these businesses that were
19 part of Leapfrog.

20 So that was what we set out to do. Then
21 the following year, one of our board members
22 said, you know, in L.A. -- I think he was talking

1 about L.A. -- they have this thing with
2 restaurants where restaurants -- they used to
3 have -- we've always had reporting publicly in
4 the newspaper of hygiene problems at restaurants.

5 Q. Yup. I'm familiar with it?

6 A. Yeah. So most people don't like reading
7 those because they're, like, gross. It's, like,
8 you've got to read about rats and stuff like
9 that. Right? So -- but -- most people ignored
10 them until they started grading the restaurants
11 and requiring the restaurants to post the grade
12 in their front window.

13 And once they started doing that, all of
14 a sudden -- the way our board member put it is
15 there's no more C-restaurants because no one
16 wants to go to a C-restaurants. And -- or it
17 just -- people don't -- they're scared of that.
18 So it had a real impact. People paid attention
19 to that.

20 So he said, why can't we just do that
21 with healthcare? Why can't we do that with
22 hospitals? And we put our heads together.

1 At that time, thanks to the Affordable
2 Care Act, there was suddenly data available from
3 CMS. That had not been available before, but we
4 now had it. We had some very good data on
5 patient safety by hospital, and we could use it.

6 So we suddenly realized that we could
7 grade hospitals and we could get all of them and
8 not wait for just the ones that are willing to be
9 transparent. We could do that.

10 Now, the data we had was not -- it was
11 good, but it wasn't enough. We wanted more. And
12 we wanted more comprehensive data, especially on
13 some of the areas that are the most dangerous for
14 patients, such as medication safety, which is the
15 number one error that hospitals make.

16 So we wanted more data. And so we
17 thought, well, let's get some experts together
18 and figure out how we could do it with CMS data.
19 AHA had some data. And Leapfrog had some data.
20 Let's see if we could put it all together into a
21 grade.

22 So I worked with Arnie Milstein, who is

1 still on our board. He came back to our board.
2 Actually, he was on the original board of
3 Leapfrog, and a founder of Leapfrog and very much
4 involved. He's now at Stanford. At the time, he
5 was at Pacific Business Group on Health. And
6 he -- and also, he worked as a consultant to
7 Boeing as part of -- he was part of Mercer.

8 Anyway, so Arnie and I worked together to
9 identify people for the expert panel. And the
10 first person I called beside Arnie was Lucian
11 Leape, who's, like -- he's sort of considered
12 like the father of the patient safety movement.
13 He sadly passed just about a month ago.

14 But, anyway, Lucian Leape gave me a
15 couple of people that he thought would be great.
16 He himself really was enthusiastic and joined the
17 expert panel.

18 And we -- the different -- he said, I've
19 got this young guy, he's brilliant, he's
20 written -- he's got tons of published research
21 already, he's at Harvard with me. I think he's
22 going places. And he wanted him. His name was

1 Ashish Jha who is now pretty well-known. He's
2 now the dean at Brown and he was the COVID
3 coordinator for a while --

4 Q. So Ms. Binder, I'm going to stop you
5 there because we are going to get to the expert
6 panel topic --

7 A. Okay.

8 Q. -- so why don't we -- you're kind of
9 skipping ahead to an area that I wanted to get
10 to --

11 A. Sure --

12 Q. -- later, but --

13 A. Well, anyway, I personally recruited the
14 expert -- you asked me how this -- founded, so
15 I'm going to tell you --

16 Q. Yeah.

17 A. So I personally recruited that expert
18 panel, along with Arnie and Lucian Leape. And
19 then they met, and we worked with -- we worked
20 with the scientific team that we had at the time
21 and we developed a whole -- a protocol for
22 figuring out how we take all this data and how we

1 weight it so that it will turn into, ultimately,
2 composite scores.

3 And there was a process to that that was
4 built on -- it was built on a platform, a
5 research platform, from ARC that Patrick Romano
6 had been instrumental in developing, which was we
7 weighed each measure by impact, opportunity, and
8 evidence based.

9 Q. And these are the 30 measures; is that
10 right?

11 A. At the time, it wasn't -- at the time,
12 actually, we had 40 or 45 that --

13 Q. So the number of --

14 A. -- we were looking at.

15 Q. -- total measures or metrics has changed
16 over time, correct?

17 A. Yeah. As the methodology has evolved
18 with the science and the evidence. But at the
19 time, we were looking at about 45 measures, some
20 of which were not very good that were available.

21 So they had to weight it, and some of
22 them they cut out because they didn't think they

1 were good.

2 Q. You testified just a little while ago
3 that a purpose -- or one of the purposes of the
4 health safety grade was to -- hospital safety
5 grade was to basically create a marketplace.

6 Right? Do you remember your testimony --

7 MS. BLAIR: Objection to form.

8 BY MR. CHUNG:

9 Q. -- on that?

10 A. I didn't say the safety grade was to
11 develop a marketplace. That was The Leapfrog
12 Group -- that Leapfrog wanted a marketplace --

13 Q. Okay.

14 A. -- that was functional.

15 Q. A --

16 A. That was before, they wanted --

17 THE REPORTER: I just can't get you both.

18 BY MR. CHUNG:

19 Q. Go ahead.

20 A. I was saying Leapfrog in 2010, which was
21 before the safety grade, wanted a functional
22 marketplace. They needed to have all hospitals

1 in.

2 Q. Okay. And am I correct that at least one
3 purpose of the hospital safety grade or -- that
4 came into being was to build or promote that
5 marketplace? Is that right?

6 A. Yes.

7 Q. And in this marketplace, hospitals would
8 be essentially competing against one another
9 based on the hospital safety grades that had been
10 assigned to them; is that right?

11 MS. BLAIR: Objection to form.

12 THE WITNESS: I don't think our goal was
13 to do anything with hospitals. Our goal was to
14 help patients and families and communities and
15 the employees of the purchasers to select the
16 right place to go. So I don't -- we weren't
17 focused on what impact specifically that would
18 have on hospitals except for the fact we hoped
19 that it would cause them to aim for an A.

20 BY MR. CHUNG:

21 Q. Right. And participate in the survey,
22 correct?

1 A. No. That wasn't a goal, per se. We just
2 wanted to have a letter grade available.

3 Q. Well, how would they -- how would the
4 hospital -- you said that one of the goals, at
5 least with respect to hospitals, was to encourage
6 them or -- encourage them to aim for an A,
7 correct?

8 A. Yes.

9 Q. Right? But in order to aim for an A, is
10 it correct that they would have to participate in
11 the hospital survey?

12 MS. BLAIR: Objection to form.

13 THE WITNESS: In order to aim for an A,
14 they would have to do well on most of the
15 measures in the grade, and most of the measures
16 come from CMS. So they would need to do very
17 well on patient safety. And CMS, if they
18 participated in the survey, they would have to do
19 well on that, too.

20 BY MR. CHUNG:

21 Q. Okay. Some questions about Leapfrog's
22 organizational structure. And this is topic 1

1 from the list of topics in the 30(b)(6) notice.

2 How many employees does Leapfrog have
3 currently?

4 A. 20.

5 Q. Any part-time employees?

6 A. No.

7 Q. All right. Does Leapfrog hire any
8 independent contractors or consultants?

9 A. Oh, yes. On occasion.

10 Q. Okay. And who are they currently?

11 A. We have a -- we have -- let's see. We
12 have a lot of contractors.

13 So John Hopkins Medicine. Matt Austin is
14 a contractor for the science behind the survey.

15 We have Raven -- we have -- which handles
16 some of the programming on our websites.

17 We have a company called Square that does
18 other kinds of programming for the data analysis
19 and the data collection through the survey and
20 safety grade.

21 Mathematica helps us with double-checking
22 calculations now and also helped us -- helps us

1 with some statistical analysis, things like that,
2 on occasion.

3 We have -- we have a number of -- let's
4 see. We have CURA, which is our public relations
5 firm.

6 We have a number of different consultants
7 who help us with, like -- we do radio -- we do,
8 like, some radio announcements around some of our
9 PR.

10 We have a photographer who works with us.
11 A videographer who works with us on the annual
12 meeting.

13 Q. Okay. Well, we'll discuss I think in
14 more detail some of the consultants.

15 But it sounds like a lot of contractors
16 and consultants --

17 A. Yes.

18 Q. -- is that right? All right.

19 And the organization has a board of
20 directors, right?

21 A. Yes.

22 Q. And what's the process for selecting

1 members of the board?

2 A. We have a nominations committee that
3 reviews a matrix of -- it's a matrix of the
4 skills and experiences, diversity, geographic
5 diversity and other kinds of diversity, of board
6 members, and then sets goals for what we are
7 going to need in the coming year, or coming two
8 years, and helps to identify candidates.

9 Then the nominations committee screens
10 those candidates by interviewing them and
11 ultimately decides on -- if they wish, they
12 decide on candidates they want to bring forward
13 to the board for election to the board.

14 Q. Okay.

15 A. And the board elects them.

16 Q. And do you attend board meetings?

17 A. Yes.

18 Q. All right. Does Leapfrog have any
19 advisory committees?

20 A. Yes.

21 Q. And what do they do?

22 A. We have a hospital advisory committee

1 that is offering us insights into the hospital
2 industry and concerns and priorities around
3 quality. They look at long-terms issues only.
4 We make it very clear in every communication with
5 them that they have no influence on current
6 programs, like the current survey or the current
7 safety grade. But we will ask them things like,
8 we know there's a nursing shortage; how is that
9 impacting hospitals and what are the kinds of
10 things you look to to improve nursing? For
11 instance, something that we would talk to the
12 hospital advisory committee about.

13 That -- so that's one committee. Do you
14 want to know more about their composition or any
15 of that? Or you just want me to tell you what --

16 Q. Just kind of high level, yeah.

17 A. Yeah. And then we have a partners
18 advisory committee that's industry partners,
19 meaning representatives of companies that do
20 business in the healthcare industry.

21 Leapfrog's board deliberately does not
22 have anyone on it who is in the healthcare

1 industry. If a board member gets a job within
2 the healthcare industry, they resign. They're --
3 and that's happened a few times.

4 Q. Okay.

5 A. So the partners advisory committee is an
6 opportunity for us to get some insight from
7 people who are clearly committed to the Leapfrog
8 mission because they pay dues to the organization
9 and we are able to get some insights from them.

10 We also have an ASC advisory committee,
11 because we now have an ASC survey.

12 I'm sure I'm -- let me think.

13 Q. Okay. We may come back to other advisory
14 committees, but --

15 A. Sure.

16 Q. All right. Let's -- I want to ask you a
17 few questions -- looping back to the expert panel
18 that you mentioned earlier, what's your role with
19 respect to the expert panel?

20 A. I watch it from a distance. So --

21 Q. What do you mean by that?

22 A. I rarely go to any of their meetings.

1 When they've had in-person one-day meetings,
2 which is, like, twice, I want to say, we've had,
3 I will go to those. But otherwise -- and those
4 are more like long-term planning kinds of
5 meetings.

6 But in terms of their deliberations,
7 which are sometimes in group meetings and
8 sometimes just one-on-one with Matt or Missy or
9 others, I do not -- I try to stay away from
10 those. I don't want the expert panelists to have
11 the impression that they're being watched by the
12 CEO. I want them to be independent and feel
13 comfortable being as absolutely candid as
14 possible.

15 So I have -- I learn about what their
16 views are by reading minutes or looking at, you
17 know, transcripts or -- and talking to,
18 particularly, Missy Danforth or Matt Austin. I
19 speak to those two very frequently to really
20 understand where the expert panel is on various
21 issues.

22 Q. So you may not attend many of the expert

1 panel meetings, but Ms. Danforth does; is that
2 right?

3 A. Yes.

4 Q. All right. And in addition to members of
5 her -- the ratings team; am I right about that?

6 A. Usually one member of -- I don't think
7 she wants to populate the whole meeting with --

8 Q. Right. But at --

9 A. -- just Leapfrog people.

10 Q. -- least Ms. Danforth and a member of
11 her --

12 A. Yeah.

13 Q. -- team.

14 A. Yes.

15 Q. Okay.

16 A. And Matt Austin also facilitates the
17 expert panel process.

18 Q. Is Matt Austin a member of the expert
19 panel?

20 A. No.

21 Q. All right. What is his role, then?

22 A. He's a facilitator. And he's also our

1 key scientific advisor. So he will -- so when
2 there's frequently follow-up from an expert --
3 any expert panel meeting, whether it's a
4 one-on-one with one member or the whole group,
5 they will often say, well, can you run some
6 analysis of something, or this or that, or can
7 you do a 0statistical -- blah, blah, blah.
8 There's often follow-up. He will do that.

9 And he will also -- or they'll say
10 there's been a couple of studies we just heard
11 about that came out; we need to look at those.
12 He'll get those studies, he'll do analyses for
13 them.

14 So the follow-up that has to do with the
15 scientific analysis and evidence base of our --
16 both our survey and our safety grade he works on.

17 And so for the process for the hospital
18 safety grade, he does that kind of analysis.

19 Q. Okay. Does Leapfrog itself present
20 proposed changes to the expert panel?

21 A. Uh-huh. Yeah.

22 Q. All right. And does the panel -- and is

1 the panel then expected to make a decision on
2 whether to adopt that change?

3 MS. BLAIR: Objection to form.

4 THE WITNESS: The panel is not -- they
5 don't make a group decision. It's a -- they --
6 they have a process for evaluating anything we
7 bring forward or anything that they bring
8 forward. Sometimes they bring it, or an
9 individual will bring it.

10 But they have a process that is sometimes
11 in a group meeting and sometimes separately for
12 ultimately reaching consensus on a particular
13 issue. But it is not a -- it's not a one
14 decision.

15 BY MR. CHUNG:

16 Q. What do you mean --

17 A. They don't vote. They don't vote.

18 Q. Oh. So there's no process --

19 A. It's a traditional -- it's a traditional
20 expert panel.

21 Q. So there's no process by which they vote
22 on a proposed change?

1 A. No. But they reach consensus and they
2 are -- and I make sure that there's consensus
3 whenever I agree to any change.

4 Q. How do you make sure that there's
5 consensus among all members of that panel?

6 A. Well, I will ask, first of all, Matt and
7 Missy exactly where each member of the expert
8 panel is on this issue or that issue. And
9 there's often lots of follow-up with individual
10 members of the expert panel to find that out.

11 If I actually really want to know, I'll
12 call one of the members myself. That has
13 happened occasionally.

14 But I would never go forward -- we're not
15 going to go forward with anything on the survey
16 or the safety grade where the expert panel
17 disagrees -- or any member of the expert panel
18 disagrees. We're very careful about making sure
19 that there's agreement.

20 And these are not -- these are not shy
21 people, so I know they'll tell me if there's a
22 problem. And -- or they'll tell Missy or Matt.

1 And so that -- so the process is not
2 Congress. This is a process that's, like, very
3 traditional expert panel -- scientific expert
4 panel process where they meet, they confer, they
5 ask for further follow-up, they look at other
6 studies, they look over time, we call someone;
7 they say -- you know, there's a process to and
8 it, and then ultimately they reach a consensus.

9 Q. And how is that -- is that consensus
10 memorialized?

11 A. It's memorialized because we put out for
12 public comment what we ultimately want to make
13 for a change, and --

14 Q. But my question is, is the -- you said
15 that the -- with respect to any proposed
16 change --

17 A. Yeah.

18 Q. -- the consensus has to be unanimous
19 among the members of the expert panel, correct?

20 A. There has to be --

21 Q. Right. But is --

22 A. -- there has to be consensus, yeah.

1 Q. You said unanimous consen- -- is it
2 unanimous consensus?

3 A. Yeah, I want unanimous consensus.
4 They're advisors to us so, in theory, if it
5 wasn't unanimous, we could still go forward with
6 it. But I like it unanimous.

7 Q. So how is that unanimity in the consensus
8 among the expert panel members memorialized?

9 A. It isn't.

10 Q. Okay.

11 A. It just -- we have the --

12 Q. Why not?

13 A. It's memorialized by the fact that -- we
14 don't have anything that says we voted on this or
15 this is the final thing. We don't -- because we
16 don't vote.

17 It's memorialized by the fact that the
18 expert panelists are okay when we put out for
19 public comment. They get a copy of what we're
20 putting out for public comment in advance, and
21 they will tell us in about two seconds if they
22 don't agree with something on there. But they've

1 agreed to it already.

2 So it's memorialized by the fact that
3 it's out for public comment, and they support it.

4 Q. But there isn't a separate documentation
5 or minutes or any sort of document where it's
6 memorialized that each member of the expert panel
7 has agreed to the proposed change; is that right?

8 A. Right.

9 MS. BLAIR: Objection to form. Asked and
10 answered.

11 BY MR. CHUNG:

12 Q. Does the expert panel make
13 recommendations?

14 A. Yes.

15 Q. All right. And is Leapfrog bound to
16 follow those recommendations?

17 A. Individuals within the expert panel make
18 recommendations all the time. Does the whole
19 expert panel end up agreeing that that's where it
20 should all go? Not always.

21 Q. I'm actually asking, does the whole
22 expert panel -- right? -- as a group, make

1 recommendations to Leapfrog?

2 A. No. Well, I mean -- I'm sorry. I'm not
3 sure I can even understand that. How does a
4 whole group make one recommendation?

5 Q. That's exactly my question.

6 Does the -- are there recommendations
7 that the expert panel makes to Leapfrog?

8 A. Recommendations that go out for public
9 comment are the consensus of the expert panel.

10 Q. But those recommendations -- but those
11 recommendations are coming from Leapfrog,
12 correct?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: They're coming from the
15 expert panel. These are not -- these are not
16 rubber stamp people. These are, like, in some
17 cases, world experts. They don't rubber stamp
18 what we bring them, and they didn't in this --

19 BY MR. CHUNG:

20 Q. I'm not asking about --

21 A. -- case either.

22 Q. -- rubber stamping, Ms. Binder.

1 You testified earlier that, with respect
2 to -- actually, why don't we illustrate it with a
3 specific example later on. We'll get to that
4 later.

5 All right. Let's talk about the scoring
6 methodology behind the hospital safety grade.

7 How did Leapfrog -- or actually, in terms
8 of the hospital safety grade itself, I understand
9 that Leapfrog uses, like, a report card scale --
10 right? -- A, B, C, D, F, for purposes of the
11 hospital safety grade.

12 Why not assign a numerical score, like 60
13 out of 100 or 80 out of 100 or 100 out of 100?

14 A. We chose to use a Z-score methodology.

15 Q. What does that mean?

16 A. A Z-score methodology is kind of like
17 grading on a curve. It allows you to score based
18 on how a hospital performs relative to others in
19 the cohort.

20 Q. Okay. So why use the A, B, C, D, F
21 scale?

22 MS. BLAIR: Objection to form.

1 THE WITNESS: The Z-score methodology is
2 what is behind the A, B, C, D, or F. So for
3 instance, a hospital that scores three
4 standard -- on the Z-score scores three standard
5 deviations below the mean would be like an F.

6 BY MR. CHUNG:

7 Q. Okay. Well, is one of the purposes -- at
8 least one of the purposes of using the A, B, C,
9 D, F scale of grades is that it's easy for
10 consumers to understand?

11 A. Yes.

12 Q. All right. Are you familiar with
13 Leapfrog's scoring methodology behind the
14 hospital safety grades?

15 A. Yes.

16 Q. All right. Do you have any role in
17 designing that scoring methodology?

18 A. Well, I'm the decisionmaker. So if
19 there's any fundamental change, yes, I would -- I
20 better be familiar with what's going on.

21 Q. Okay.

22 A. But I'm not a -- I'm not a, you know,

1 expert on -- I'm not an expert on statistics or
2 on healthcare measurement. I'm not Patrick
3 Romano. But I am -- obviously I do have to have
4 a strong familiarity with the methodology
5 because, ultimately, the buck stops with me; I
6 have to make the decisions.

7 Q. Okay. Who within Leapfrog is responsible
8 for designing the methodology?

9 A. There's a number of people who design
10 various aspects of the methodology.

11 Q. Okay. Can you just briefly go over them?

12 A. Well, Missy Danforth designs some
13 methodology for some of it.

14 Matt Austin has a lot to do with some
15 methodology for the survey, some aspects of --
16 for instance, when there's a new measure on the
17 survey, like, we'll need to come up with a
18 scoring methodology for it, and he will help us
19 and work with sometimes -- sometimes we'll hire a
20 statistician, even within Johns Hopkins, to help
21 us with that, to figure out how we're going to
22 score things, so --

1 Q. Do you have any role in designing the
2 survey, the hospital survey?

3 A. Do I have any role in --

4 Q. Yes.

5 A. -- the hospital survey?

6 Q. Yes.

7 A. I'm not sure what you mean by designing.

8 Q. Do you have any role in coming up with
9 the content or the questions or the requests in
10 the hospital survey?

11 A. I often will have a role in looking at a
12 particular issue that we know is coming to the
13 fore that is of great importance, and I will then
14 ask the team to start researching to see if this
15 is an area we should add to the survey that --
16 for instance, we have added to the survey
17 something on ER boarding, which is clearly
18 becoming an increasing major problem, and there's
19 been some studies recently that I was seeing.
20 And some physicians, actually, from Yale New
21 Haven Hospital had come to me personally and
22 said, we really want you to look at this issue;

1 it's a big problem in patient safety; it's
2 emerging nationally.

3 And so I asked the team to start
4 researching it. They did find a significant
5 amount of peer-reviewed research, which is very
6 important to us --

7 Q. Right.

8 A. And --

9 Q. And did that feedback make its way into
10 the survey eventually?

11 A. Yes.

12 Q. All right. Do you have any role in
13 reviewing responses from hospitals to the
14 hospital survey?

15 A. Yes. I read every one of them.

16 Q. Okay.

17 A. Or -- I'm sorry, wait a minute. Let me
18 be clear about that. Wait a minute.

19 The responses to the actual surveys that
20 are submitted? No, I don't read all those.

21 Q. What are you --

22 A. I'm sorry. What --

1 Q. -- referring to then?

2 A. -- I meant -- what I meant was the public
3 comments. So we have --

4 Q. Oh.

5 A. -- public comments that come in for the
6 safety grade, for the survey, frequently during
7 the year, and I read those.

8 Q. Okay. But not the actual survey -- the
9 data that's submitted in response to the survey,
10 you don't review that?

11 A. Sometimes, but rarely.

12 Q. Okay. How does Leapfrog verify the
13 accuracy of the information, the data --
14 right? -- submitted by hospitals in response to
15 the survey?

16 Let me kind of break that down.

17 A. Okay.

18 Q. Does Leapfrog conduct onsite audits of
19 hospitals pursuant to their survey responses?

20 A. For four or five hospitals, yes, we do.

21 Q. Four or five hospitals out of every
22 cycle; is that right?

1 A. Are you talking about the safety grade or
2 the survey?

3 Q. The survey.

4 A. The survey?

5 Q. Yeah.

6 A. For each year, we do the onsite -- the
7 onsite verification is about five hospitals.

8 Q. Okay. And that's out of the entire
9 population of hospitals --

10 A. For onsite only.

11 Q. If you can let me finish the question.

12 A. Sorry.

13 Q. And that's out of the entire population
14 of hospitals that have responded to the survey --

15 A. Yes.

16 Q. -- is that right?

17 A. Yes.

18 Q. All right. And how are those four or
19 five chosen?

20 A. They are fairly randomly selected.

21 Q. Okay.

22 A. I wouldn't say it's perfect random, but

1 they -- but fairly randomly.

2 Q. All right. And does -- am I right that
3 Leapfrog does not require sworn attestations from
4 responding hospitals?

5 A. They require attestations in order to
6 submit the survey.

7 Q. Are they sworn, though?

8 MS. BLAIR: Objection to form.

9 THE WITNESS: What's sworn mean?

10 BY MR. CHUNG:

11 Q. Are they -- sworn means --

12 A. By who? Who would swear them other than
13 the CEO at- -- attesting to when they submit the
14 survey.

15 Q. Are they notarized?

16 A. No, they're not notarized.

17 Q. All right. Does Leapfrog have mechanisms
18 to verify the truthfulness of survey responses?

19 A. Yes. Significantly.

20 Q. All right. How does it do that?

21 A. It has several layers of it, actually.

22 It has -- it has a verification at the

1 submission, which looks at patterns that don't
2 make sense or issues that don't make sense that
3 are quite complex.

4 So for instance, if a hospital says that
5 they're reporting on maternity care and they
6 said, we had 300 births this year, the electronic
7 programming within the survey will spit it back
8 and say, wait, you said 400 last year.

9 So there's very -- there's some pretty
10 significant built-in safeguards to assure the --
11 or not assure always, but to look at the
12 accuracy.

13 Then, once the survey arrives at us, once
14 it gets through that, then that's when our team
15 gets started. And our team has -- spends
16 enormous amounts of time requiring documentation
17 from a selection of hospitals. Every month they
18 demand documentation.

19 So for instance, there's a section on the
20 survey on a never-events policy. We ask
21 hospitals, do you have a never-events policy that
22 follows Leapfrog's guidelines? They require a

1 selection of hospitals every month to send us
2 their never-events policy and show us the board
3 minutes where it was approved.

4 Things like that. So it is extensively
5 verified every single month. So those -- so it's
6 a very intensive process.

7 And most hospitals that complete the
8 survey say this drives them crazy because we are
9 so picky and our team is so on top of things.

10 Q. Does every section of the survey have a
11 verification process?

12 A. Uh-huh.

13 Q. Okay. And when you mentioned earlier
14 that first step -- right? -- is it -- the first
15 step of the verification, is that an algorithm or
16 some sort of automated process?

17 A. It's an automated process.

18 Q. All right. Does a hospital face any
19 consequences for submitting inaccurate
20 information?

21 A. We'll decertify their survey and remove
22 it.

1 Q. What do you mean by remove it?

2 A. Remove it from public reporting. Or
3 sometimes we'll decertify the section where the
4 inaccuracy occurred.

5 Q. Okay. Does that mean it's basically as
6 if they never submitted it?

7 A. Yes. And then sometimes we will then ask
8 them to resubmit, which we'll then verify again.

9 Q. All right. Do they -- so can hospitals
10 update or correct their survey responses after
11 that initial submission?

12 A. Yes.

13 Q. All right. And what's the process for
14 correcting responses?

15 A. We send -- first we send notification to
16 them that they have 30 days to verify and/or
17 correct a particular issue that we've observed.
18 If they don't come back, we decertify that
19 section and then we come back to them again. And
20 we report it as either -- yeah, we -- we take
21 down that section of the survey or we take down
22 their entire hospital's results and we don't use

1 them in other programs such as the top hospital
2 qualification or the safety grade.

3 Q. Have hospitals -- has a hospital ever
4 been asked to revise their submission?

5 A. Yes. Well, they're asked to correct it.

6 Q. Okay. Has Leapfrog ever changed a
7 hospital's safety grade after it's been issued?

8 A. No.

9 Q. No? Okay. So once it's issued, that's
10 it?

11 A. One thing we will do, if we find that
12 there's something wrong with data underlying
13 it -- and that happened a lot with the AHA
14 data -- is we will remove their grade from
15 reporting. We have, I believe, done that in a
16 small handful of times.

17 Q. Okay.

18 A. But we have never changed a grade.

19 Q. All right.

20 MR. CHUNG: Why don't we turn to our
21 first document, which is tab 8.

22 So this will be Exhibit 1.

1 (Binder Deposition Exhibit 1 marked for
2 identification and attached to the
3 transcript.)

4 BY MR. CHUNG:

5 Q. So Ms. Binder, Exhibit 1 is an e-mail
6 chain from July through August of 2023 between
7 you and an Adhi Sharma from -- the CEO, Mount
8 Sinai South Nassau Hospital.

9 And I want to direct your attention first
10 to -- if you look at the lower right-hand -- on
11 these documents, I'll be identifying page numbers
12 by what's called the Bates number on the lower
13 right-hand corner.

14 A. Uh-huh.

15 Q. You'll see that. So this will be --
16 let's focus on Bates ending in 3130.

17 A. I'm probably going to need to read
18 through this because I don't recall this.

19 Q. Okay. Well, I'm going to direct your
20 attention to -- Mr. Sharma says he wanted to
21 bring to items to your attention for your
22 consideration.

1 Do you see that at the bottom of Bates
2 number 3130?

3 A. Yes.

4 Q. All right. And then he continues on to
5 the next page, The Leapfrog survey is lengthy,
6 with over 500 questions and data gathering
7 required for many of the questions. It is one of
8 the more resource-intensive surveys in many
9 hospitals, and health systems are still
10 struggling with significant workforce shortages.

11 Is it right that Mr. -- I think it's
12 Dr. Sharma -- is expressing that the survey is
13 burdensome for hospitals to complete? Is that
14 right?

15 A. That --

16 MS. BLAIR: Objection to form.

17 THE WITNESS: As I'm reading this, he
18 says that it's resource-intensive and many
19 hospitals are still struggling with workforce
20 shortages.

21 He also says that -- so is the Magnet
22 status survey.

1 BY MR. CHUNG:

2 Q. Yeah. I mean, do you agree with
3 Dr. Sharma's characterization of Leapfrog's
4 survey?

5 A. I don't agree that it's burdensome,
6 but -- no, I don't agree with his
7 characterization.

8 Q. Okay. So you don't agree that it's a
9 resource-intensive survey while hospitals are
10 facing staffing shortages?

11 A. Resource-intensive is relative. It's
12 nowhere near as resource-intensive as most of the
13 other kinds of work that a quality department
14 will do, such as prepare for accreditation,
15 handle registry reporting and things like that.

16 So those are extremely
17 resource-intensive. Those require the hiring of
18 full-time people all year to work on them.

19 This --

20 Q. But the --

21 A. -- ours is --

22 Q. -- survey is a voluntary survey --

1 A. -- a --

2 Q. -- correct? But the survey is a
3 voluntary survey, correct?

4 A. Yes.

5 Q. Okay. And the other items that you
6 mentioned that you called resource-intensive, are
7 those voluntary as well?

8 A. Registries are voluntary. They're
9 just -- the difference between registries and
10 Leapfrog is that registries almost never make the
11 data public. So there's no transparency
12 whatsoever.

13 Same with accreditation, which they -- I
14 mean, I guess they could choose not to be
15 accredited, but they will be accredited.

16 But that's still very resource-intensive.
17 Most of what a quality department is doing is
18 extensive -- extensive and requires -- some
19 registries require hiring at least one full-time
20 equivalent for the entire year.

21 Q. Okay.

22 A. Leapfrog requires about 80 hours of staff

1 time.

2 Q. Okay. And what is that based on?

3 A. That's based on conversations over time
4 that both Missy Danforth and myself have had.
5 We've asked repeatedly how long does it take, and
6 we get answers anywhere from 20 to 100 hours, and
7 most of them are around 80.

8 Q. So on the same page Dr. Sharma continues
9 that, The weight given to the patient experience
10 survey is disproportionate, and that one of the
11 reasons we -- or his hospital -- did not submit
12 in the past was simply because we knew that,
13 despite very strong quality measures, our patient
14 satisfaction scores would prevent us from --

15 A. Oh, I --

16 Q. -- performing as well --

17 A. -- am seeing this now.

18 Q. Do you see that?

19 A. Sorry.

20 Q. And so the question is, do you agree with
21 Dr. Sharma's statement here, position here, that
22 patient satisfaction scores can prevent a

1 hospital with strong quality measures from
2 performing well on the survey?

3 MS. BLAIR: Objection to form.

4 THE WITNESS: Yeah, I'm going to need to
5 read this because now, as you're saying this, I'm
6 realizing this is a gentleman who had the very
7 common problem of confusing the safety grade and
8 the survey.

9 So what I was just referring to was the
10 survey.

11 BY MR. CHUNG:

12 Q. Okay.

13 A. He's not actually talking about that.
14 He's talking -- even though he says it's the
15 survey, it's not the survey. He's talking about
16 the safety grade, because patient satisfaction,
17 which isn't patient -- it's patient experience
18 scores that are on the safety grade have been
19 correlated with good evidence, are the ones that
20 are correlated with outcomes in patient safety,
21 and that's where we use them.

22 But -- yeah, so that's what he's talking

1 about, as I read this.

2 Q. Okay. Now, in response to Dr. Sharma --
3 and I'm looking at Bates ending in 3129. So it's
4 basically -- it's your response, your first
5 response, to his e-mail.

6 You write, Hi, Rob.

7 And then in third paragraph you write,
8 There are -- but there are 30 measures considered
9 overall, so outstanding performance on some
10 measures can tip the scales in a hospital's favor
11 even when some other measures are mediocre.

12 Do you see that?

13 A. Yeah. I'm just going to take a minute to
14 read this --

15 Q. Sure.

16 A. -- because I don't recall it.

17 Okay. So --

18 Q. So just reading that sentence, does this
19 mean that a hospital can perform poorly in one
20 category but highly in another and receive a high
21 hospital safety grade?

22 A. Yes.

1 Q. Okay.

2 A. In fact, I'm -- probably most hospitals
3 will have some measures where they perform
4 poorly.

5 Q. Okay. Are -- just on a separate topic,
6 are pediatric or children's hospitals, included
7 in the hospital survey?

8 A. They're invited and -- they're invited to
9 participate and they can, and some do.

10 Q. All right. What do you consider to be
11 the definitions of a children's hospital?

12 A. A hospital that serves pediatric
13 patients.

14 Q. Okay. You're familiar with the
15 plaintiff -- the five plaintiff hospitals that
16 are involved in this case?

17 A. Yes.

18 Q. Okay. Are you aware that the St. Mary's
19 Hospital is a combined adult and children's
20 hospital? Do you understand -- do you know that?

21 A. I'm not sure --

22 Q. Not sure?

1 A. I'm not sure.

2 Q. Okay.

3 A. Most hospitals -- most general hospitals
4 also have pediatric patients. They have
5 patients -- so -- are you saying they serve
6 pediatric patients and -- or you're saying
7 they're two hospitals?

8 Q. They are -- it's a combined adult and
9 children's hospital.

10 Are you aware of that?

11 A. Now I am.

12 Q. Okay.

13 A. But you're saying that -- most general
14 hospitals --

15 Q. Let me just --

16 A. -- do serve --

17 Q. Let me --

18 A. -- pediatric patients, so I'm not
19 understanding how that makes them different from
20 other general hospitals.

21 Q. Do you know whether the Leapfrog safety
22 grade that's been assigned to St. Mary's accounts

1 for the fact that it serves both adults and
2 children?

3 MS. BLAIR: Objection to form.

4 THE WITNESS: The safety grade uses CMS
5 data, and CMS data is tied to adult patients. So
6 it's only going to be looking at the adult --
7 measures of how adult patients are treated.

8 BY MR. CHUNG:

9 Q. Okay. So it focuses on the adult
10 treatment, the adult population --

11 A. The safety --

12 Q. -- being treated at -- at that hospital,
13 correct?

14 A. The safety grade does. The survey is an
15 opportunity if they -- if it's a separate
16 hospital, the pediatric hospital is a separate
17 hospital, they would be able to also report on
18 their pediatric patients to the survey.

19 Q. Okay.

20 A. But it has nothing to do with the safety
21 grade.

22 Q. Understood. Thank you for making that

1 clear.

2 So with respect -- if a hospital that has
3 both an adult hospital and a children's hospital
4 is assigned, let's say, a D grade or an F grade,
5 that hospital safety grade is -- that grade is
6 solely for the adult -- the treatment or the
7 patient safety around adult -- the adult
8 population, right?

9 MS. BLAIR: Objection to form.

10 THE WITNESS: The safety grade measures
11 are primarily from CMS, and those measures apply
12 to -- those measures apply to adult populations.

13 However, some of the measures,
14 particularly the Leapfrog measures, would be
15 applicable to the pediatric patients as well. So
16 for instance, CPOE would be applicable. If they
17 are using a CPOE system, that would be applicable
18 to the -- that would affect the care of the
19 pediatric patients.

20 BY MR. CHUNG:

21 Q. Okay. But the CMS data that is -- that
22 the hospital safety grade is based on is focused

1 on the adult population; is that right?

2 A. I believe so, but I guess I would need
3 to -- I would need to check on that.

4 Q. Okay. I mean, if that's correct --
5 assuming that's correct, then a -- isn't the -- I
6 mean, for a consumer, let's say the parent of a
7 child -- right? -- that's looking for a hospital
8 in their area to send their child to for
9 pediatric care, if they see a D grade or an
10 F grade for a hospital that serves both adult and
11 children population and for want -- and for a
12 hospital that didn't report -- respond to the
13 survey, how does Leapfrog communicate to the
14 consumer, to that parent, that the hospital
15 safety grade is based on just CMS data that's
16 focused on the adult population?

17 MS. BLAIR: Objection to form.

18 THE WITNESS: We communicate the letter
19 grades. A hospital that has high rates of
20 problems that are in the CMS data is not going to
21 be safe for any of the patients. General. So
22 for instance, if they have a high rate of leaving

1 objects in after surgery or they have a high rate
2 of infection or central line infections, that's
3 not a safe environment. That's a problem.

4 So it is -- even though it's -- I'm not
5 sure, and I would have to check -- I'm not sure,
6 but I don't believe the CMS data is accounting
7 for pediatric patients, per se. It is still --
8 safety problems that are happening within a
9 hospital's four walls are going to affect all the
10 patients that are there.

11 BY MR. CHUNG:

12 Q. But assuming that the CMS data is just
13 focused on the adult population, I think what
14 you're saying is you would just extrapolate that
15 data to the children's population; is that right?

16 MS. BLAIR: Objection to form.

17 THE WITNESS: I don't extrapolate. I
18 would -- we provide --

19 BY MR. CHUNG:

20 Q. Isn't that what --

21 A. -- the information --

22 Q. -- you just did, though?

1 MS. BLAIR: Can you let her answer,
2 Daniel?

3 BY MR. CHUNG:

4 Q. Isn't that what you just did, though?

5 MS. BLAIR: No. Let her answer the
6 question.

7 BY MR. CHUNG:

8 Q. You testified, Ms. Binder, that if there
9 are certain issues relating to patient safety for
10 the adult population, that you're sure or that --
11 that will generally apply to the rest of the
12 hospital; isn't that what you testified to?

13 MS. BLAIR: Objection to form.
14 Mischaracterizes her testimony.

15 THE WITNESS: We provide the information
16 that people need to understand --

17 BY MR. CHUNG:

18 Q. If you can just answer the question,
19 Ms. Binder.

20 MS. BLAIR: Can you just let her give an
21 answer?

22 MR. CHUNG: I'm trying --

1 MS. BLAIR: You're asking very long --

2 MR. CHUNG: I'm trying -- actually, that
3 one was quite short.

4 BY MR. CHUNG:

5 Q. So if you could answer that question.

6 A. I would expect consumers to look at the
7 data that we provide and make their own
8 decisions.

9 Q. Okay.

10 A. That's why we provide them with as much
11 data as we do.

12 Q. Which data are you referring to?

13 A. How hospitals perform on each of the
14 measures that we use in the safety grade.

15 Q. On the hospital -- so you're referring to
16 the hospitalsafetygrade.org website.

17 A. Yes.

18 Q. Okay. The -- I wanted to ask you a few
19 questions about the certificate coach program.

20 Are you familiar with that?

21 A. No.

22 Q. All right. Is there --

1 A. We have a coach program, but it's not
2 certificate.

3 Q. Which coach program are you referring to?

4 A. Certified coach -- I don't think we call
5 it certified. It's a coach -- coach program.

6 Q. Okay. And what is that?

7 A. That is an opportunity for healthcare
8 industry leaders who are interested in
9 understanding the survey process and the hospital
10 safety grade, the measurement of it and the data
11 that's used, they want to understand that better,
12 it's an opportunity for them to have -- to be
13 educated on it and then take a test to see that
14 they know and understand the elements of the
15 survey and the elements of the safety grade.
16 It's only about the measures.

17 It's because a lot of industry leaders
18 had approached us and said, well, some of my
19 hospital clients are asking me if, you know -- if
20 this is going to help us with the intensivists
21 coverage in the ICU standard or something, and
22 they don't really understand the Leapfrog survey.

1 It's not really aimed at hospitals. They
2 haven't been interested in it because the
3 hospitals that report to the survey, and those
4 hospitals that get safety grades, do already know
5 a lot about their own measurement because they're
6 immersed in it, and that's their business. But
7 for somebody who's selling a product or involved
8 in the industry in some way, they often do not
9 have that level of familiarity with Leapfrog's
10 measurement.

11 Q. So is there any program, whether it's
12 coach, a consultant, whatever the verbiage may
13 be, is there any program that Leapfrog has
14 that -- where hospitals can take on -- you know,
15 pay for a consultant or a coach to help them with
16 the survey?

17 MS. BLAIR: Objection to form.

18 THE WITNESS: To help them with the
19 survey or to help -- well, first of all, we don't
20 offer consulting, but we do offer support for
21 quality leaders completing the survey.

22

1 BY MR. CHUNG:

2 Q. Quality leaders at the hospitals; is that
3 right?

4 A. Yeah. But we don't go to the hospitals,
5 but we do offer additional -- we offer a variety
6 of different supports for hospitals in completing
7 the survey and understanding the measures,
8 understanding the questions, understanding the
9 evidence behind them and what they should
10 prepare. We help them to prepare for our
11 verification process because pretty much every
12 hospital encounters that. So what kinds of
13 documents they should have -- they should have
14 prepared in advance.

15 We also educate them on some of the
16 topics that come up and why they matter. But
17 we -- that's all about --

18 Q. Is there a cost --

19 A. -- the survey --

20 Q. -- associated with this -- the
21 counseling, everything you described in the
22 program?

1 MS. BLAIR: Objection to form
2 regarding "counseling."

3 THE WITNESS: Again, we don't offer
4 consulting.

5 BY MR. CHUNG:

6 Q. Right.

7 A. We do offer -- there is -- most of it is
8 at no cost. We do a lot of one-on-one
9 conversations. There is one webinar series that
10 hospitals that want a really deep dive and want
11 extra can sign up for. Those typically are
12 signed up for by hospitals that have been in the
13 survey a long time and want even more nuanced
14 understanding of it. But 99 percent of what
15 we're offering is all free to all hospitals.
16 Help desk, lots of webinars, town hall calls we
17 call them. Also one-on-one -- numerous
18 one-on-one meetings and conversations between our
19 team and teams at hospitals.

20 Q. Okay. Just going back to the survey,
21 Leapfrog requires survey participants to affirm
22 that they may use the survey information in a

1 commercial manner for profit.

2 Do you -- does that language sound
3 familiar to you from the survey?

4 A. Yes.

5 Q. Okay. Can a hospital opt out of that
6 affirmation and still complete the survey?

7 A. They can complete the survey, but to
8 submit the survey, they do need to attest to it.

9 Q. Okay. Has any hospital ever complained
10 about not being able to opt out of that
11 attestation or affirmation regarding the
12 commercial use?

13 A. The attestation is longer than that and
14 it does require them to attest to the
15 truthfulness of what's on the survey --

16 Q. Right.

17 A. -- so that's why it's very important to
18 us. And we are as candid as possible about the
19 fact that we license the data.

20 Q. Okay.

21 A. Now, we license the ratings and our
22 assessment of their data, not what they submit to

1 us, per se.

2 Q. So in terms of -- and, in practice,
3 Leapfrog does use the survey information in a
4 commercial manner for profit; is that right?

5 MS. BLAIR: Objection to form.

6 THE WITNESS: We use the ratings that we
7 derive from the surveys that are submitted. We
8 use that for licensure.

9 BY MR. CHUNG:

10 Q. That's the hospital safety grade, the
11 accolade licensing program, or is that different?

12 A. No. That's different.

13 Q. Okay.

14 A. So you're asking me about the survey.

15 Q. Right.

16 A. You just asked me -- attestation that's
17 only on the survey; it's not on the safety grade.

18 Q. Right.

19 A. Okay. That data that's provided to us on
20 the survey that we ask hospitals to attest to its
21 truthfulness -- that's what that attestation is.

22 Q. Right.

1 A. -- and we, in turn, are truthful about
2 the fact that we license it -- that data, what
3 they submit to us, we score and we determine to
4 what extent that hospital meets our very high
5 standards for each one of the measures.

6 That is what we license, is their scores
7 on the variety of measures. We do not license
8 the raw content of their survey.

9 Q. Okay. But without the data that the
10 hospital is submitting in response to the survey,
11 you would not have the scores that you're
12 licensing; is that right?

13 A. That we're licensing for the survey.
14 Right.

15 Q. Okay. And then -- so in terms of the
16 licensing program, the data licensing program,
17 Leapfrog licenses that data to researchers; is
18 that right?

19 A. Yes.

20 Q. Okay. And they also license the data to
21 businesses; is that right?

22 A. Yes.

1 Q. Okay. What kinds of businesses?

2 A. Well, health plans are probably the
3 primary -- primary ones.

4 Also businesses that are themselves in --
5 publishers of data.

6 And also -- so for instance, companies --
7 well, companies that also publish data and they
8 incorporate Leapfrog data into their reporting.
9 One of the companies provides employers with
10 information that they can use to tell their
11 employees about various -- the quality of various
12 providers. They incorporate Leapfrog data. They
13 license the data to do that.

14 Q. So researchers, health plans, other
15 businesses.

16 Any persons or entities that also license
17 the survey data from Leapfrog?

18 A. Other than businesses and health plans,
19 not that I can think of.

20 Q. Do other hospitals -- do hospitals
21 license data from Leapfrog?

22 A. We provide some hospital systems, upon

1 request, with reports about their own systems.

2 Q. How about reports or data about other
3 hospitals?

4 A. Only insofar as their system will give
5 them benchmarks on how they compare nationally.
6 So the national part of the data, the national
7 numbers, are coming from our broader database,
8 but we'll give them their own performance
9 compared nationally.

10 Q. So --

11 A. So no, we -- to my knowledge, we have not
12 licensed the full data set to any hospitals. I
13 don't think they want that.

14 Q. Have any hospitals asked for license --
15 licensure to data for hospitals within their
16 regional market?

17 A. No.

18 Q. Okay. Your --

19 A. By the way, if they want to know their
20 regional market, we are public, so we're
21 transparent. I'm sorry to interrupt you, but I
22 just thought of something to add to the answer.

1 Q. Okay.

2 A. So if you're in the regional market, you
3 can look up on Leapfrog for free to see how your
4 other hospitals are doing or to go and find other
5 hospitals somewhere else in the country that
6 might be doing better than you on a particular
7 measure and so that you can ask them for advice.
8 We see that happen quite frequently, and I think
9 it's a positive trend.

10 Q. Okay.

11 MR. CHUNG: We've been going for about an
12 hour and a half or so. We're going to move on to
13 the next topic, so why don't we take a break.

14 MS. BLAIR: Sure.

15 VIDEO TECHNICIAN: The time is 10:28 a.m.
16 This ends unit 1. We're off the record.

17 (A recess was taken.)

18 VIDEO TECHNICIAN: The time is 10:55 a.m.
19 This begins unit number 2. We're on the record.

20 BY MR. CHUNG:

21 Q. So Ms. Binder, I wanted to ask you
22 questions about the scoring methodology behind

1 the hospital safety grades.

2 Fair to say that that methodology has
3 changed over time at least during your time as
4 CEO at Leapfrog?

5 A. It has changed a bit. Yes.

6 Q. Okay. And I want to put in front of you
7 the second exhibit, Exhibit 2.

8 (Binder Deposition Exhibit 2 marked for
9 identification and attached to the
10 transcript.)

11 BY MR. CHUNG:

12 Q. So Exhibit 2 is --

13 MS. BLAIR: Do you have copies of that?

14 MR. CHUNG: Yeah.

15 MS. BLAIR: Sorry. Thank you.

16 BY MR. CHUNG:

17 Q. -- is an in-person meeting agenda,
18 including expert panelists, and it says that
19 you're an attendee in terms of the board and
20 staff of Leapfrog.

21 Do you see that?

22 A. Yes, I do.

1 Q. And it's from June 14, 2017.

2 And these are -- these are meeting notes
3 from a meeting of the expert panel from that
4 date; is that right?

5 A. I'm not familiar with this document, so
6 I -- I don't know.

7 Q. Okay.

8 A. Looks like it.

9 Q. So there is -- towards the bottom of the
10 page, so Bates ending 3576 -- the first page, I
11 mean -- there is a heading, Unintentional
12 consequences of how we currently treat missing
13 data.

14 Do you see that?

15 A. Yes.

16 Q. And do you see that, towards the bottom,
17 that there are three possible solutions proposed?

18 A. Yes.

19 Q. All right. And then, on the second
20 page -- so Bates 3577 -- under number 2 it says,
21 Imputation of the score when we have missing
22 data.

1 Do you see that?

2 A. Yes.

3 Q. And then the first bullet point says,
4 Matt -- and fair to say that's referring to Matt
5 Austin, who you testified about earlier?

6 A. Yes.

7 Q. Okay. Matt mentioned that expert panel
8 discussed this in the past and did not feel it
9 supported the goal of the safety grade but that
10 imputation would incentivize hospitals to report.

11 Do you see that? I'm looking at the
12 second page, Ms. Binder.

13 A. Uh-huh.

14 Q. Do you see that language?

15 A. Yeah, I'm just going to need to read this
16 through --

17 Q. Okay.

18 A. -- to be sure that I understand the
19 context --

20 Q. Okay.

21 A. -- of what you just said.

22 Yeah, so I'm remembering this meeting

1 was --

2 Q. So I'm going to ask a question.

3 So is it -- so based on the language that
4 we just read across the top here, Matt mentioned
5 that expert panel discussed this in the past and
6 did not feel it supported the goal of the safety
7 grade but that imputing scores for individual
8 measures like safe practices would incentive them
9 to report on the survey -- so does this reflect
10 that members of the expert panel believe that
11 using the imputation method did not support the
12 goal of the safety grade? Is that right?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: It says that Matt mentioned
15 that the expert panel discussed this.

16 BY MR. CHUNG:

17 Q. Uh-huh.

18 A. So it's not altogether clear to me
19 what "this" is, because they seem to be talking
20 about safe practices, which they had discussed in
21 the past, should not be imputed.

22 Q. Okay.

1 A. So to the extent it's about safe
2 practices, they had discussed not applying
3 imputation to certain of the safe practices.

4 Q. Right. And that's --

5 A. That's probably what he's talking about,
6 but I don't know for certain.

7 Q. And is that because imputed scores on
8 safe practices would not actually reflect the
9 safety conditions or the safe practices at the
10 hospitals, correct?

11 MS. BLAIR: Object to form.

12 THE WITNESS: It's not described here
13 what the reasoning was in the past. But as I
14 recall, Sara Singer, one of the expert panelists
15 who is an expert on quality improvement, had
16 specifically cited three safe practices that she
17 felt that we did not have adequate evidence and
18 experience to impute in an accurate way. But she
19 was specifically referring to three safe
20 practices --

21 BY MR. CHUNG:

22 Q. Okay.

1 A. -- in the past.

2 Q. And at this point, in June 2017, our
3 understanding is that Leapfrog decided not to use
4 an imputation model for -- in the circumstances
5 where there was missing data for hospitals; is
6 that correct?

7 MS. BLAIR: Objection to form.

8 THE WITNESS: For the safe practices, the
9 specific safe practices, yes. We decided early
10 on, earlier in the course of it, not to apply an
11 imputation model for certain safe practices.

12 BY MR. CHUNG:

13 Q. Was there an imputation model or
14 imputation method for any of the metrics at this
15 time? I get your point regarding the safe
16 practice --

17 A. Uh-huh.

18 Q. -- but any, any metrics?

19 A. Yeah, I don't believe so. We had
20 secondary data from AHA, and we used that.

21 Q. Right. And fair to say that AHA was one
22 of your -- one of Leapfrog's principal sources

1 for secondary data on a number of metrics? Is
2 that right?

3 MS. BLAIR: Objection to form.

4 THE WITNESS: Well, CMS was also
5 secondary for the infection measures.

6 BY MR. CHUNG:

7 Q. Okay.

8 A. So we had two sources of secondary data.

9 Q. And AHA, as a source of secondary data,
10 that's data that is submitted or reported by the
11 hospitals to AHA, correct?

12 A. Yes.

13 Q. All right.

14 MR. CHUNG: Let's move on to 82 and 82a.

15 And this document -- we'll say Exhibits 3
16 and 4.

17 (Binder Deposition Exhibits 3 and 4
18 marked for identification and attached to
19 the transcript.)

20 BY MR. CHUNG:

21 Q. So Ms. Binder, what you have in front of
22 you, Exhibit 3 is an e-mail that Mr. Austin, Matt

1 Austin, sent to himself, and he's attached a file
2 that's named, Expert panel guiding principles.

3 Do you see that?

4 A. Yes.

5 Q. And it looks like Matt forwards an e-mail
6 from himself from July 3 of 2017.

7 Do you see that?

8 A. I see --

9 Q. Okay.

10 A. -- October 27th.

11 Q. That's right.

12 And then Exhibit 4, which is the
13 attachment to that e-mail, it's titled, Expert
14 Panel's Guiding Principles on the Development of
15 Leapfrog's Composite Patient Safety Score for
16 U.S. Hospitals.

17 Do you see that?

18 A. Yes.

19 Q. All right. Is this a document that
20 describes guiding principles that the expert
21 panel uses for any recommendations it makes in
22 calculating the hospital safety grade?

1 MS. BLAIR: Objection to form.

2 THE WITNESS: This is a draft.

3 BY MR. CHUNG:

4 Q. Right. A draft of that type of document,
5 correct? A draft of the guiding principles,
6 correct?

7 A. A draft of guiding principles that I'm
8 unclear have actually gone to the expert panel.
9 So it would be a draft they have not necessarily
10 seen. I don't know for sure.

11 Q. Okay. And we're looking at the second
12 page of this attachment, Bates ending in 4494.

13 And the first paragraph says, under
14 imputing missing data toward the bottom -- do you
15 see that?

16 A. Yes.

17 Q. -- When a hospital is missing data for a
18 particular performance measure, we recommend
19 ignoring the measure and recalibrating the weight
20 within the domain so that hospitals are scored
21 only on the measures for which their performance
22 data are available.

1 Did the expert panel recommend ignoring
2 measures when hospitals had missing data with
3 respect to those measures at any point during
4 this time?

5 A. As I mentioned, the safe practices, that
6 is the methodology that we've used for the three
7 safe practices that Sara Singer first brought up.
8 That is how we do it for those three safe
9 practices.

10 Q. Okay. Well, how about generally at this
11 time?

12 MS. BLAIR: Object to form.

13 BY MR. CHUNG:

14 Q. This is not --

15 A. I don't know generally.

16 Q. -- you will see that he doesn't qualify
17 this -- that he doesn't limit this to the safe
18 practices, right?

19 A. Okay. So there's no "he." I don't know
20 who drafted this. Maybe Matt did, but this is a
21 draft. So I don't know who's -- made these
22 comments.

1 Q. Understood.

2 So the question is, you recalled that
3 this -- this statement is applicable to the safe
4 practices that we were -- that we were discussing
5 earlier, correct?

6 MS. BLAIR: Objection to form.

7 BY MR. CHUNG:

8 Q. At least at this time?

9 A. I mean, that's a -- one wording of what
10 we do with three safe practices currently.

11 Q. Okay.

12 A. I don't know if it's perfectly accurate
13 wording. So -- this is a draft. We often have
14 drafts go back and forth quite a bit.

15 Q. Okay. Well, there's a comment bubble
16 next to it with an MA, and it states, May need to
17 update based on panel's final recommendation.

18 Did the panel, expert panel, make a final
19 recommendation along these lines to ignore --
20 when a hospital is missing data for a particular
21 performance measure, to ignore that measure and
22 recalibrate the weights within the domain so that

1 the hospital is scored only on the measures for
2 which their performance data is available?

3 A. You're asking me if the expert panel
4 followed up from this draft?

5 Q. Right.

6 A. I don't know. I don't know what they did
7 with this draft. I don't even know if they saw
8 it.

9 Q. Okay. If you turn to the next page,
10 Ms. Binder. Same section under this imputing
11 missing data, but the next page.

12 The last paragraph, it reads, If a
13 hospital is missing data for a large number of
14 performance measures, then a score cannot be
15 reliably calculated. In this situation, no score
16 should be issued for the hospital.

17 Is this a recommendation that the expert
18 panel made at this time?

19 MS. BLAIR: Objection to form.

20 THE WITNESS: Well, it --

21 BY MR. CHUNG:

22 Q. Is this a recommendation that the expert

1 panel made at this time?

2 A. This is a draft.

3 Q. I understand. But I'm asking -- I'm
4 not -- I'm asking -- I read this sentence from
5 the draft. But --

6 A. Yeah, this --

7 Q. -- did they make that recommendation?

8 A. Yes. That is a fundamental part of the
9 methodology from day one.

10 Q. So they did make that recommendation.

11 A. Uh-huh.

12 Q. Okay.

13 A. If they're missing a large number of
14 measures, yes. They have defined that over time,
15 but yes, they have -- if they're missing too much
16 data, they don't get a grade.

17 Q. Okay. Now, going back to the AHA data,
18 which was one of the secondary sources, along
19 with CMS -- CMS data, at some point, am I right
20 that Leapfrog stopped using AHA data as a
21 secondary source of data?

22 A. We were forced to.

1 Q. Yeah. And is it because the license ran
2 out? What was the issue there?

3 A. AHA told us they would no longer sell us
4 the data. They gave us one-year notice on that
5 and told us they wouldn't sell it to us.

6 Q. And that was -- when was that? About
7 2021?

8 A. Something like that.

9 Q. Okay. So did that -- that development
10 kind of spur Leapfrog to try to figure out a new
11 way to score hospitals when they were missing
12 data from the hospital?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: It spurred us to identify
15 an alternative secondary source, which we spent
16 considerable amount of time looking for. So we
17 looked at other organizations that collect data,
18 such as HIMSS, et cetera. We looked at surveys
19 that are out there. There's a number of them,
20 but none were either not [sic] available publicly
21 by a hospital or -- in fact, that's 90 percent of
22 them are not publicly available by hospitals.

1 Almost nothing publicly available by hospital,
2 hence the need for Leapfrog.

3 BY MR. CHUNG:

4 Q. Okay.

5 A. But there was no source that we could
6 identify as a secondary source that would be
7 adequate, meet our needs, and be publicly
8 available. So we -- that is -- so we looked at
9 imputation strategies and brought that to the
10 expert panel for sure.

11 Q. Okay.

12 MR. CHUNG: 71. This will be Exhibit 5.
13 (Binder Deposition Exhibit 5 marked for
14 identification and attached to the
15 transcript.)

16 BY MR. CHUNG:

17 Q. So Ms. Binder, Exhibit 5, it's an e-mail
18 chain from March 2021.

19 And is it correct that the participants
20 in this e-mail chain are members of the expert
21 panel and Leapfrog personnel?

22 A. Yes. I wasn't on this chain, that I can

1 see anyway --

2 Q. Yes.

3 A. -- so I'm going to need to read it.

4 Q. Okay. And just to kind of focus the
5 discussion -- please read it, but I will be
6 focusing first on -- it's really the Bates ending
7 in 1532.

8 A. Okay.

9 Q. So Ms. Binder --

10 A. Okay.

11 Q. -- I have, like, basically, two or three
12 questions --

13 A. Okay.

14 Q. -- for this document.

15 A. I'm now finished reading it.

16 Q. So on that page that I directed you to,
17 Bates 1532, Matt Austin writes to the group here
18 with a quick update on -- with respect to the
19 imputation approach, correct? Is that right?

20 A. On 32?

21 Q. Yes. 1532.

22 A. Oh, yes.

1 Q. And he writes that Leapfrog would no
2 longer use the step 2, using the mode of scores
3 assigned to hospitals in the same health system,
4 and instead the methodology would use step 1, use
5 a hospital's most recent score on the measure.

6 And then, as a step 3, use the mean of
7 the scores assigned to other like hospitals in
8 the U.S.

9 Do you see that?

10 A. Yes.

11 Q. All right. And is this the imputation
12 methodology that went into effect following this
13 update?

14 A. I believe so. I'd have to check with
15 Missy Danforth and Matt Austin about that, but I
16 believe that is --

17 Q. Okay.

18 A. -- the methodology that went into effect.

19 Q. So why don't we go to --

20 MR. CHUNG: 89 and 89a.

21 BY MR. CHUNG:

22 Q. Actually, one more question on that

1 e-mail. He writes on the next page, Bates ending
2 1533, after he goes through the steps, To offer
3 you some perspective on the implementation of the
4 imputation model, of the 101 hospitals that will
5 have one or more scores imputed and receive a
6 grade in the last round, 78 of the 101 will
7 receive the same grade as fall 2020.

8 And then he says, We were pleased to see
9 that the imputation of the scores didn't cause a
10 drastic shift in scoring.

11 Do you see that?

12 A. Yes.

13 Q. All right. Do you have an understanding
14 as to why he -- why the expert panel was pleased
15 to see that this imputation method didn't cause a
16 drastic shift in scoring?

17 MS. BLAIR: Object to form.

18 THE WITNESS: My assumption is because it
19 suggests that the imputation was clearly accurate
20 and was consistent with earlier data.

21 MR. CHUNG: All right. Okay.

22 THE WITNESS: I'd also say that this

1 exhibit is an excellent example of our expert
2 panel process. It really does show how it works.

3 MR. CHUNG: So next exhibits will be 6
4 and 7.

5 (Binder Deposition Exhibits 6 and 7
6 marked for identification and attached to
7 the transcript.)

8 BY MR. CHUNG:

9 Q. So Ms. Binder, kind of similar to other
10 exhibits, Exhibits 6 and 7 is an e-mail and then
11 you have an attachment which is titled, Final
12 Updates to the Leapfrog Hospital Safety Grade
13 Methodology for fall 2022.

14 You'll see that you're on the e-mail
15 chain.

16 A. Yes.

17 Q. Am I right that, for Exhibit 7 -- so with
18 the attachment -- that you edited this document
19 and tracked changes?

20 A. Yes.

21 Q. All right. And is this document -- this
22 document, am I right, responds to comments, or

1 public comments, about Leapfrog's 2022 hospital
2 safety grade methodology? Is that right?

3 A. This is a draft of the responses to
4 public comments.

5 Q. Right. Correct.

6 And then, by this time, 2022, Leapfrog
7 was using an imputation method for -- with
8 respect to hospitals for which it was missing
9 data, correct?

10 A. In fall of '22?

11 Q. Yeah.

12 A. We were using an imputation method.

13 Q. Okay.

14 A. Not the same one that we use now.

15 Q. Right.

16 So under responses to public comments the
17 document reads, Several commenters shared
18 concerns about allowing hospitals that did not
19 submit a 2022 Leapfrog hospital survey to receive
20 points for the hand hygiene score through the
21 safety grade imputation model.

22 Do you see that?

1 A. Yes.

2 Q. All right. And then you left a comment
3 here -- looking off to the right, and I apologize
4 for the size of the font here -- that We need to
5 emphasize survey participation is important.
6 Please clarify that available data is superior to
7 imputed data and up-to-date data is superior to
8 older data, but in testing for accuracy on this
9 measure, we have found reliability is maximized
10 for missing data when -- blah, blah, blah. Just
11 be honest, it's a tradeoff.

12 So is it correct that the imputation
13 method you are using in 2022 maximized
14 reliability in your view?

15 MS. BLAIR: Objection to form.

16 THE WITNESS: I'm sorry, I don't even
17 understand that question.

18 Are you asking me what I was talking
19 about in this document or are you asking me
20 something else?

21 BY MR. CHUNG:

22 Q. I'm asking you based on what you wrote as

1 a comment here --

2 A. Yes.

3 Q. -- in this document: Did you believe
4 that the imputation method that Leapfrog was
5 using in 2022 maximized reliability?

6 MS. BLAIR: Objection to form. Misstates
7 the comment.

8 BY MR. CHUNG:

9 Q. I should say, let me be more --

10 A. I --

11 Q. Let me be more precise.

12 A. Okay.

13 Q. Is it correct that, in 2022, you believed
14 that the imputation method that Leapfrog was
15 using maximized reliability with respect to
16 scoring hospitals in metrics for which you were
17 missing data?

18 A. That the prior -- so you're asking me,
19 did the prior method for imputation maximize
20 reliability?

21 Q. Yes. At the time. The imputation at the
22 time. Which you're right, it's different from

1 what it is now. Right.

2 A. Right.

3 MS. BLAIR: I'm going to object to form.

4 THE WITNESS: Okay. The maximum
5 reliability that we can get is when we have the
6 actual survey data, period.

7 BY MR. CHUNG:

8 Q. Okay.

9 A. And the survey -- what I was -- what
10 we're getting at in this comment is that the
11 survey is actually an extremely high standard,
12 that hospitals that complete the survey and do
13 well on it -- that's an "and" -- deserve the
14 credit for that within the methodology, and that
15 imputed --

16 Q. So --

17 A. -- data cannot --

18 Q. I'm just going to stop you there.

19 MS. BLAIR: Let her finish --

20 BY MR. CHUNG:

21 Q. You're not answering the question,
22 Ms. Binder.

1 My question was, based on your comment
2 here, was the imputation method that Leapfrog was
3 using at this time -- right? -- not now, but at
4 this time -- in your view, did that imputation
5 method maximize the reliability with respect to
6 metrics for which you didn't have data for a
7 particular hospital?

8 MS. BLAIR: Objection to form.

9 BY MR. CHUNG:

10 Q. Not reliability overall, but for these
11 hospitals on metrics for which you had missing
12 data.

13 A. At the time period that we were using
14 that older imputation method, it was the maximum
15 reliability that we could determine. However --

16 Q. Okay. Now --

17 A. -- times --

18 Q. -- I'm going to go on to --

19 A. No, I would like to finish my --

20 Q. I'm going to go on to --

21 A. You said we were going to -- I was able
22 to answer, and we were interrupting each other on

1 that.

2 Q. Okay. Let's hear that --

3 A. Can I answer?

4 Q. Yes.

5 A. Yes, thank you.

6 So at the time that we were using that
7 imputation methodology, it was appropriate. But
8 times change. Data changes. It evolves, and so
9 does the performance and so do the -- so as the
10 expert panel talked about in your earlier
11 exhibit, there are -- there's lots of evidence to
12 show that performance changes over time and that
13 we no longer can consider this imputation
14 strategy the most reliable.

15 Q. Okay. I was just asking at this time.

16 So -- all right. You also wrote in this
17 comment at the top, I prefer Alex's comment
18 below.

19 Do you see that?

20 A. I don't think so. I don't see it.

21 Q. Well, in the same comment bubble that we
22 were just going over, it's actually at the top of

1 that comment bubble.

2 A. Oh, okay.

3 Q. I prefer Alex's comment below.

4 Do you see that?

5 A. Uh-huh.

6 Q. All right. And is Alex referring to Alex
7 Campione --

8 A. Yes.

9 Q. -- Alexandra Campione?

10 A. Yes.

11 Q. Okay. And is she a member of the ratings
12 team?

13 A. Yes.

14 Q. Okay. And that is referring to
15 Ms. Campione's comment I think immediately below
16 yours; is that right?

17 A. I'm not sure. Probably.

18 Q. Okay. She writes in that comment bubble,
19 We could include language from spring 2022 public
20 comments: When hospitals decline to provide key
21 data, Leapfrog imputes scores using a methodology
22 designed to estimate their performance as

1 accurately as possible.

2 Do you see that?

3 A. I think so.

4 Q. Okay. She also wrote, Several different
5 options for imputation were tested for both
6 validity and reliability. Using the mean
7 performance rather than the bottom quartile or
8 decile produced the strongest agreement between
9 predicted and actual scores, meaning the use of
10 the mean most accurately resembled the actual
11 performance we could expect if hospitals were to
12 report to the Leapfrog hospital survey.

13 Do you see that in --

14 A. I don't. Where is that?

15 MS. BLAIR: It's in this bubble, the
16 second bubble.

17 THE WITNESS: The second bubble?

18 BY MR. CHUNG:

19 Q. Yes.

20 A. Okay. I just --

21 Q. If you could just read it.

22 A. I need to read it.

1 Q. If you could just read that comment
2 bubble that I just read from.

3 So Ms. Binder, my question is, was
4 Leapfrog's goal to estimate non-participating
5 hospitals' performance as accurately as possible?
6 Is that right?

7 A. Our goal is to estimate in -- as
8 accurately as possible in a way that will be most
9 useful for consumers.

10 Q. Right. So do the imputed scores -- and
11 we're just looking at the imputation method that
12 was used at this time, Ms. Binder.

13 The imputed scores, do they reflect a
14 hospital's actual performance on the metrics for
15 which you're missing data?

16 A. It's an imputed score. So...

17 Q. Not an actual performance, correct?

18 A. Well, what's actual? Like, is --
19 sometimes data is not even actual, so...

20 It is an imputation.

21 Q. Okay. And that imputation, was it
22 designed to get an estimate of the hospital's

1 performance on --

2 A. Yes.

3 Q. -- such a metric? All right.

4 But do they also -- do the metrics, where
5 you used the imputation method, do they also --
6 do they also reflect a lack of data with respect
7 to that metric?

8 MS. BLAIR: Objection to form.

9 THE WITNESS: I'm not sure I understand.

10 BY MR. CHUNG:

11 Q. Well, if you're estimating -- if the
12 imputation method here is to get an estimate of a
13 hospital's performance on a particular metric
14 where you didn't have the data, isn't it true
15 also that imputation assumes a lack of data for
16 that metric?

17 MS. BLAIR: Objection to form.

18 BY MR. CHUNG:

19 Q. Otherwise, you wouldn't need imputation,
20 correct?

21 MS. BLAIR: Same objection.

22 THE WITNESS: Not always. Not always.

1 For instance, as I think Patrick Romano talked
2 about in your earlier exhibit, you can use data
3 from last year's survey. And we have, you know,
4 25 years of experience with hospitals and
5 hospital surveys and ratings and some very good
6 information about how we could anticipate
7 hospital performance based on certain factors,
8 which are, I think, really nicely discussed and
9 debated by the expert panel in that last exhibit.

10 So, yeah, imputation is not just a wild
11 guess. Imputation is a very well-thought-through
12 estimate that's based on real evidence.

13 BY MR. CHUNG:

14 Q. All right. Leapfrog -- is it correct
15 that Leapfrog changed its scoring methodology
16 again in 2024?

17 A. Yes.

18 Q. All right. And that change was where it
19 started using the limited achievement score for
20 imputed metrics for hospitals that did not
21 participate in the survey; is that right?

22 A. Yes.

1 Q. All right.

2 A. For certain measures, yes.

3 Q. Yes, for certain measures. Exactly.

4 What was your role with respect to that
5 particular change in the imputation methodology?
6 We're looking at fall 2024.

7 A. I reviewed -- I reviewed information
8 about how the expert panel had discussed and
9 debated the issues around imputation.

10 I talked extensively with Matt Austin and
11 Missy Danforth and -- repeatedly. So this was a
12 series of discussions.

13 And I looked at some of the background
14 information that they had put together around
15 this and then made the decision that we would go
16 forward.

17 Q. What materials? You just testified that
18 there were materials --

19 A. Well, like this public comments. Things
20 like that.

21 Q. Okay. I think you mentioned materials
22 where the expert panelists were discussing the

1 methodology change.

2 Can you describe? What were those
3 materials exactly?

4 A. Well, they had a meeting, and I reviewed
5 the transcription of that meeting. And in
6 addition, there were some one-on-one
7 conversations that were recounted to me.

8 Q. Okay.

9 A. I needed to be reassured that every
10 member of the expert panel was solidly behind
11 this and really wanted this to go forward.

12 Q. Okay. And the meeting that you're
13 referring to, is that an April 12, 2024, meeting?

14 A. I don't recall the exact date but
15 something like that.

16 Q. Okay. Did you review any slides or other
17 materials that came out of that meeting?

18 A. Yes.

19 Q. Okay. Do you remember reviewing the
20 meeting agenda?

21 A. No.

22 Q. Okay. Did you actually attend that

1 meeting?

2 A. No.

3 Q. Okay. Why not?

4 A. As I said earlier, I don't attend most
5 expert panel meetings because I want the expert
6 panel to feel free to be as independent as
7 possible. I don't want them to get the
8 impression that there's some kind of executive
9 oversight on their deliberations. There isn't.
10 They're expected to be totally independent
11 volunteers.

12 Q. Okay. But Ms. Danforth and I think
13 Ms. Campione were there, right?

14 A. Yes.

15 Q. Okay. What did you understand occurred
16 at that April 12, 2024, meeting as it relates to
17 the imputation methodology?

18 A. There was some discussion about what
19 would be the best method. There were some that
20 felt that hospitals should get zero points for
21 the -- for the four measures that they were --
22 that was under discussion about imputation.

1 There was a lot of discussion about the
2 fact that, for those four measures, we've seen
3 what we call topping out. We've seen those
4 scores in hospitals that report to the survey
5 have gone way up. And so when we impute the
6 mean, we are giving hospitals a very, very high
7 score on these four very difficult standards in
8 the Leapfrog survey.

9 So it's like saying someone has gotten,
10 you know, a gold medal in the Olympics when they
11 are just playing JV soccer.

12 Q. And is this based on your review of, I
13 think you mentioned, a transcript of that
14 meeting; is that right?

15 A. I looked at the transcript. Yes.

16 Q. Okay. Was the -- based on your review of
17 the transcript of that meeting, was there any
18 discussion of the limited achievement proposal
19 that eventually became the methodology for
20 imputation?

21 A. There was a discussion about scoring
22 hospitals that don't complete the survey at

1 the -- either at the lowest quartile or the
2 lowest score of any hospital in the survey. Or
3 there was one very credible member of the expert
4 panel, just a superstar --

5 Q. Who was that?

6 A. Arjun Srinivasan. He's a superstar at
7 the CDC. He wanted zero points, which we didn't
8 go forward with that. But he was strongly
9 advocating for that.

10 Q. Okay.

11 A. We ended up giving, depending on the
12 measure, about 15 -- 5 to 15 points.

13 Q. Okay.

14 MR. CHUNG: Let's go to 73 and 73a.

15 So these are Exhibits 8 and 9.

16 (Binder Deposition Exhibits 8 and 9
17 marked for identification and attached to
18 the transcript.)

19 BY MR. CHUNG:

20 Q. So you'll see here, Ms. Binder, this is
21 an e-mail chain from May 15, 2024, where Preeti
22 Joshi is sending -- circulating expert panel

1 meeting notes.

2 Do you see that?

3 A. Yes.

4 Q. And who is Preeti Joshi?

5 A. She's a research analyst at Johns Hopkins
6 Medicine.

7 Q. Okay. Is she on the expert panel?

8 A. No.

9 Q. Okay. And then let's take a look at
10 Exhibit 9, which is what she circulated.

11 And then if you look at page 1, there's a
12 section under number 2, Proposed changes to the
13 imputation model.

14 Do you see that?

15 A. Yes. Again, I'm going to need to read
16 this now --

17 Q. Okay.

18 A. -- because I wasn't on this chain.

19 Q. All right.

20 A. Okay.

21 Q. Okay. So the notes -- under that
22 section, you'll see that Matt Austin provided the

1 expert panel with a quick overview of the current
2 imputation model/approaches Leapfrog has been
3 using and some of the challenges those approaches
4 have created for issuing accurate grades.

5 And then the notes continue, The current
6 imputation model has two steps when data are
7 missing -- and you'll see here it just describes
8 the imputation method at the time -- right? --
9 the two-step method --

10 A. Yes.

11 Q. -- and then the -- step 2 has been to
12 assign such a hospital the mean score of their
13 assigned cohort.

14 Do you see that?

15 A. Yes.

16 Q. Okay. And then the proposed change from
17 Leapfrog, the very next bullet point, is -- was
18 to retire step 1 of the model, which was to use a
19 hospital's historical data up to four rounds old,
20 and use only step 2, which was assigning
21 hospitals the mean score for their cohort.

22 Do you see that?

1 A. Yes.

2 Q. All right. Do you have an understanding
3 as to how Leapfrog reached the decision in this
4 proposal to remove step 1 from the imputation
5 process?

6 A. It's proposed changes. It's not a
7 decision.

8 Q. Okay. So --

9 A. And it didn't go forward that way.

10 Q. And this is from -- and these are notes
11 from the April 12, 2024, meeting that we've been
12 discussing, correct?

13 A. Right. And that was the discussion at
14 the April 12th meeting. Yes.

15 Q. Okay. So Leapfrog discussed with the
16 expert panel during the April 12, 2024, meeting
17 the possibility of removing a hospital's
18 historical data from that imputation process,
19 correct?

20 A. They did discuss that, and I think the
21 group was in favor of it. However, Patrick
22 Romano was not at the meeting, so they did follow

1 up with him, and he had, I think, a very
2 important and insightful perspective on that,
3 which we then shared, and that ended up being
4 what informed the final decision.

5 So this is not a decision; this was a
6 proposed --

7 Q. Right.

8 A. -- change. That's how the expert panel
9 process works.

10 Q. But there's no discussion in the -- in
11 the meeting notes here, there's no discussion of
12 assigning a limited achievement score, right?

13 A. Limited --

14 Q. On this -- in this document, the notes of
15 the April 12, 2024, meeting. Is that right?

16 A. They discussed assigning very low scores
17 or zero in the expert panel meeting.

18 Q. Where is that reflected here?

19 A. It's not here, but I read the transcripts
20 and they did discuss that.

21 Q. Okay. So a transcript would reveal that
22 they discussed --

1 A. I --

2 Q. -- assigning a zero score --

3 A. Yeah.

4 Q. -- or a limited achievement score; is
5 that right?

6 A. Yeah. And this is a summary. So the
7 summary of the meeting, he's showing what they --
8 sort of the consensus the group reached at the
9 end, proposed changes, and that's why --

10 Q. But limited achievement scores are not
11 mentioned anywhere in these notes, correct?

12 A. Well, limited achievement is 15 on CPOE
13 and 5 points on IPS. It already has a score
14 assigned.

15 Q. Okay.

16 A. If you complete the survey and you get
17 limited achievement on IPS, you get 5 points on
18 the safety grade. That's -- it's not -- it's
19 assumed.

20 Q. So after this expert panel meeting --
21 again, we're just focusing on this April 12,
22 2024, meeting -- the plan was to impute the mean

1 score for missing data only and not to use a
2 hospital's historical data; is that right?

3 MS. BLAIR: Object to form.

4 BY MR. CHUNG:

5 Q. This is based on what we just read, that
6 Leapfrog's proposal was to retire step 1 of the
7 model and use only step 2.

8 Do you see that?

9 Again, I'm just focusing on April 12,
10 2024, what came out of that meeting, Ms. Binder.

11 A. Okay. Yeah. That's the -- yeah, that's
12 the prior imputation model he's describing in
13 this. Current as of April 2024.

14 Q. Right. And then Leapfrog's proposal
15 during this April 12, 2024, meeting, Leapfrog's
16 proposal in this discussion with the expert
17 panel, was from the model at that time, let's
18 retire step 1 of that model --

19 A. Right.

20 Q. -- and just use step 2, i.e., let's just
21 assign non-reporting hospitals the mean score for
22 their cohort; is that right?

1 A. Right. And then Arjun -- that was
2 apparently what was presented to them, but then
3 they disagreed with that, and Arjun and Peter
4 Pronovost said, no, let's -- let's give them
5 lower scores than that.

6 Q. Where does it say that any of the expert
7 panelists disagreed with that proposal?

8 A. Peter asked whether Leapfrog has a way to
9 keep low-performing hospitals in the lowest
10 quartile. That's not the mean.

11 And then Arjun mentioned one of his
12 concerns with the current step 2 imputation
13 method is if a hospital is performing very
14 poorly, they would choose to not a submit a
15 survey and they'd get a better score than their
16 actual performance.

17 So that's disagreement. I mean, that's
18 how the expert panel debates and deliberates.

19 Q. You take that to mean disagreement with
20 the proposal.

21 A. No, I just take it to me deliberation
22 that the expert panel does. They were pushing

1 back on the original proposal from, apparently,
2 Matt, just -- what Matt would be presenting as
3 something from our team in general. And they
4 were saying, I think they should probably impute
5 a lower score, be more -- it would be more
6 accurate.

7 Q. Okay. Now -- so after this, the March --
8 or the April 2024 meeting, it's fair to say that
9 Leapfrog ultimately did not approach -- adopt the
10 approach of the proposal laid out in the bullet
11 point that we just --

12 A. Correct.

13 Q. -- read, right?

14 It settled on a different approach,
15 correct?

16 A. With the full consensus of the expert
17 panel, it settled -- it came up with a new
18 approach.

19 Q. All right. And it ultimately adopted a
20 different approach, correct?

21 A. Yes.

22 Q. All right. And instead of assigning

1 hospitals a mean score pursuant to step 2, as
2 it's described here, the new plan was to assign
3 non-participating hospitals the limited
4 achievement score; is that right? On the
5 selected metrics; is that right?

6 A. On the selected metrics, on the advice of
7 several expert panelists who proposed it --

8 Q. Okay. We'll get to that.

9 A. Uh-huh.

10 Q. And the limited achievement score was the
11 lowest score possible, is that right, on those
12 metrics?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: Limited achievement is on
15 the survey. And the hospital safety grade
16 interprets a limited achievement for each of the
17 four measures with a certain number of points
18 already, and that was retained. So example being
19 IPS is 5 points. A hospital that completes the
20 Leapfrog hospital survey and it gets limited
21 achievement on IPS would get automatically 5
22 points for IPS on the -- in their hospital safety

1 grade.

2 So it's a well-established scoring
3 methodology that is related to their performance
4 on the Leapfrog hospital survey.

5 BY MR. CHUNG:

6 Q. What do you mean by well-established?

7 A. It's been in place since the beginning of
8 the hospital safety grade.

9 Q. Okay.

10 MR. CHUNG: Let's go to 75 and 75a.

11 THE WITNESS: Oh, it says here,
12 actually -- no, they did discuss that. The
13 expert panel got a -- So like the idea of
14 imputing the equivalent of willing-to-report to
15 hospitals that do not submit a survey.

16 So actually, they do discuss that.

17 BY MR. CHUNG:

18 Q. What are you referring to?

19 A. On 8532 --

20 Q. Which exhibit --

21 A. -- Exhibit 9.

22 Q. -- are you referring to?

1 A. Exhibit 9, under the section 2, proposed
2 changes to the imputation model, the last dash,
3 The expert panel were in support of having
4 hospitals share their current performance, so
5 like the idea of imputing the equivalent of
6 willing-to-report to hospitals that do not submit
7 a survey.

8 So that -- so, yeah, they were aware that
9 willing-to-report equals the lowest score.

10 Q. Okay. Willing-to-report. What does that
11 mean?

12 A. Actually, that's how we used to refer to
13 one out of four bars.

14 So the hospital survey, which is, as you
15 know, different from the hospital safety grade,
16 for each measure, we score hospitals on the
17 extent to which they achieve the standard. And
18 they get one -- it's like cell phone bars -- one,
19 two, three, or four bars. Four bars mean you've
20 met the standard. Leapfrog's standards are very
21 high, so it's an excellent performance. One bar
22 means -- we used to call it willing-to-report.

1 So it's referred to here as willing-to-report.

2 Q. Okay.

3 A. Just means they're willing to be public
4 and transparent, which we give them one bar for.
5 But they didn't meet the standard otherwise.

6 Q. But these are -- but this
7 willing-to-report designation is for hospitals
8 that actually did respond to the survey, correct?

9 A. Yes.

10 Q. Okay. So this is different from the
11 scenario that we've been discussing of hospitals
12 that don't respond to the survey, correct?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: I don't think so. Can you
15 restate the question? I'm not -- I don't think
16 that's right.

17 BY MR. CHUNG:

18 Q. What -- so in terms of -- how do you take
19 this to mean that the limited achievement
20 imputation methodology that was eventually --
21 that was adopted, right? --

22 A. Uh-huh.

1 Q. -- was discussed during this April 12,
2 2024, meeting?

3 A. Right. So they -- they basically said
4 that they want to -- they liked the idea of
5 imputing the equivalent of willing-to-report,
6 which is one out of four bars, for each of those
7 four measures. And the equivalent of
8 willing-to-report is a scored amount on the
9 hospital safety grade.

10 Q. Okay. And you take that to mean what was
11 eventually adopted?

12 A. Well, that's part of what was adopted.
13 Yes.

14 Q. Okay.

15 A. Part of it. It's not the whole thing.

16 MR. CHUNG: Let's go on to our next
17 exhibits. These will be 10 and 11.

18 (Binder Deposition Exhibits 10 and 11
19 marked for identification and attached to
20 the transcript.)

21 BY MR. CHUNG:

22 Q. All right. So exhibits 10 and 11,

1 Ms. Binder, is an e-mail chain involving Patrick
2 Romano, Matt Austin, Missy Danforth, and
3 Alexandra Campione. It's from May 14, 2024.

4 A. Yes.

5 Q. And you'll see here Matt Austin e-mails
6 Mr. -- or Patrick Romano attaching what he
7 describes as language to share with hospitals
8 about the proposed changes; is that right?

9 A. Yes.

10 Q. Okay. And then at the bottom of page 1,
11 Dr. Austin follows up and writes, Peter offered
12 some suggested edits to clarify the concept of
13 imputation.

14 And --

15 A. I'm sorry, where is that? Am I
16 missing -- is that --

17 MS. BLAIR: It's at the bottom --

18 MR. CHUNG: Toward the bottom.

19 MS. BLAIR: -- very bottom. Other side.

20 THE WITNESS: Oh, okay.

21 MS. BLAIR: No, other side. He's
22 referring you to the bottom of 8275.

1 MR. CHUNG: Yes. Thank you.

2 THE WITNESS: Oh, I see. Yes.

3 BY MR. CHUNG:

4 Q. And is the Peter here likely referring to
5 Peter Pronovost? Is that right?

6 A. Yes.

7 Q. And he's a member of the expert panel,
8 correct?

9 A. Yes.

10 Q. Okay. And then Dr. Romano responds on
11 May 14 up above.

12 Do you see that?

13 A. Yes.

14 Q. All right. And he writes, I like the
15 simpler and more direct approach here. If the
16 goal is to penalize non-participants, you might
17 as well do so in a clear and unmistakable manner
18 while allowing for hospitals to manage their
19 burden and jump back on the wagon after a year.

20 Do you see that?

21 A. Yes.

22 Q. Okay. Is it correct that the new

1 imputation model will penalize non-participants?

2 MS. BLAIR: Objection to form.

3 THE WITNESS: That's not the intention.

4 We don't penalize -- we don't penalize hospitals.

5 That's not our goal. Our goal is to inform

6 consumers. So we don't do penalizing. We

7 don't -- that's not what we're about.

8 BY MR. CHUNG:

9 Q. So do you disagree with Dr. Romano's view
10 here?

11 A. I agreed with his -- I agreed in the end
12 with his recommendation in here. I don't agree
13 with the idea of penalize- -- that we are trying
14 to penalize hospitals. We aren't.

15 Q. But do you agree that the limited
16 achievement imputation model -- right? -- is --
17 it's punitive to non-participating hospitals?

18 Do you agree with that?

19 MS. BLAIR: Objection to form.

20 THE WITNESS: It's meant to be helpful to
21 consumers so that we are not overestimating the
22 performance of a hospital when we don't have --

1 when they've declined to report their data.

2 BY MR. CHUNG:

3 Q. I'm asking with respect to hospitals, not
4 consumers. Okay?

5 With respect to the non-participating
6 hospitals -- right? -- hospitals that have not
7 filled out the survey, responded to the hospital
8 survey, by automatically assigning those
9 hospitals on four of the most critical metrics a
10 limited achievement score, is that not punitive
11 to those non-participating hospitals for not
12 participating?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: It's not meant to be
15 punitive. It's meant to be informative to
16 consumers. That's what we're about.

17 BY MR. CHUNG:

18 Q. Okay.

19 A. Now, he has a different approach, which
20 he's laid out here, but I also thought his
21 recommendation was excellent -- it was a really
22 good compromise and a really good way to do it --

1 which was accepting the results from one year's
2 worth of survey results. And I think he makes a
3 good case for that, and that's what we ended up
4 doing.

5 So -- and we then brought that back to
6 the others on the expert panel who were the ones
7 recommending the original proposal that was sent
8 out to Patrick, as you can see from this chain,
9 actually, that they were supportive of.

10 And I think I think this is just another
11 great example of a very strong expert panel.

12 Q. So he writes, The underlying hypothesis
13 behind your proposed step 2 approach was that
14 hospitals stop reporting because their true
15 performance deteriorated relative to their
16 cohort.

17 Do you see that?

18 A. Yes.

19 Q. All right. And then he writes, My
20 hypothesis, by comparison, was that most
21 hospitals stop reporting because it is too
22 burdensome and because they only find market

1 value in an A grade, which proves impossible to
2 attain or maintain.

3 Do you see that?

4 A. Yes.

5 Q. Okay. And so he's articulating his view
6 that hospitals that don't -- do not participate
7 in this survey do so because they find it, in his
8 words, too burdensome, right?

9 MS. BLAIR: Objection to form.

10 THE WITNESS: If --

11 BY MR. CHUNG:

12 Q. I'm just asking you whether that's his
13 view, as it's articulated in this e-mail?

14 A. In this e-mail --

15 Q. Can you please answer the question? I'm
16 asking you --

17 MS. BLAIR: She's trying to answer the
18 question, Daniel.

19 MR. CHUNG: I don't think she is.

20 BY MR. CHUNG:

21 Q. The question is --

22 MS. BLAIR: She hasn't even started her

1 answer. I don't know how you know --

2 BY MR. CHUNG:

3 Q. The question is, is that his view as
4 articulated in this e-mail?

5 MS. BLAIR: Objection to form.

6 THE WITNESS: Say that -- what view,
7 again?

8 BY MR. CHUNG:

9 Q. That hospitals that do not participate in
10 the survey, they don't do it because they find it
11 too burdensome.

12 MS. BLAIR: Same objection.

13 THE WITNESS: In this e-mail, that
14 appears to be his view.

15 BY MR. CHUNG:

16 Q. All right. And --

17 A. But in the earlier exhibits --

18 Q. -- do you agree --

19 A. -- just so --

20 Q. -- with that hypothesis?

21 A. In the earlier exhibits --

22 Q. Do you agree with that hypothesis?

1 A. In the earlier exhibits --

2 Q. Do you agree with that hypothesis?

3 A. No, absolutely not. I --

4 Q. All right.

5 A. -- disagree with that --

6 Q. Now, at the end --

7 A. -- hypothesis.

8 THE REPORTER: I'm sorry. I can't take
9 both of you talking at the same time.

10 BY MR. CHUNG:

11 Q. Now, at the end of the e-mail, Dr. Romano
12 writes, If you want to penalize non-participants,
13 then don't pretend that you are imputing missing
14 values in a statistically optimal way. Just be
15 honest about your goal.

16 He's saying here that Leapfrog's approach
17 is pretending that the missing values are being
18 imputed in a statistically optimal way; is that
19 right?

20 MS. BLAIR: Objection to form.

21 THE WITNESS: No, I don't believe that's
22 what he's saying. But you should ask him.

1 BY MR. CHUNG:

2 Q. This is your deposition, Ms. Binder.

3 What do you understand him to be saying
4 here? What do you understand him to be saying?

5 A. That --

6 MS. BLAIR: Objection to form.

7 THE WITNESS: He seems to have a
8 perception of the intention of his colleagues on
9 the expert panel, as well as Leapfrog people,
10 Matt and Missy in particular. He seems to have a
11 perception of their intention, which is not, in
12 fact, their intention.

13 BY MR. CHUNG:

14 Q. Would you call his e-mail supportive of
15 the proposed methodology?

16 A. Yes. He comes up with a very good
17 recommendation.

18 Q. Okay. So even though he views the
19 methodology as penalizing non-participating
20 hospitals, you believe that he's supportive of
21 the proposed methodology?

22 MS. BLAIR: Objection to form.

1 THE WITNESS: You're asking about the
2 proposed methodology or the methodology that we
3 ended up with? Because we ended up with a
4 methodology at the end of this process --

5 BY MR. CHUNG:

6 Q. Right.

7 A. -- that is laid out quite elegantly in
8 these e-mails -- we ended up with a methodology
9 that I know he supports.

10 Q. Okay. And how do you know that he
11 supports that?

12 A. Because I know him personally, and Missy
13 has talked to him at length. He supports it.

14 I will not approve something if I have
15 any evidence that any expert panel member does
16 not approve it.

17 Q. Okay. And where was that memorialized?
18 Where was his support memorialized?

19 A. By conversations with Missy and
20 reassurances from Missy and also by sharing the
21 proposal that went out publicly for comment with
22 him and the others and, in the end, we did

1 actually do what he recommended.

2 Q. So these are verbal conversations that
3 you're referring to.

4 I asked, how was this memorialized in
5 writing?

6 A. I don't know.

7 Q. Okay.

8 A. I'm not -- it doesn't need to be. It
9 needs to be -- I need to be reassured. I'm
10 reassured from a variety of ways.

11 If any one of these expert panelists --
12 they are not shy. If they disagreed with the
13 proposal that we put out for public comment, they
14 would tell me instantly. They would be calling
15 me. And I would be very unhappy to hear that I
16 was misled.

17 I am not misled. I have an absolutely
18 incredible survey team and staff, and they are
19 accurate to me about what the perception of these
20 expert panelists are.

21 And the -- the conversation that you have
22 in e-mail here is really -- it's good to see.

1 Q. Okay.

2 A. -- because it's clearly well thought
3 through, and there's debate, there's no rubber
4 stamping here. There's a lot of thought. And we
5 ended up going with, I think, the right
6 methodology in the end.

7 Q. So just to be clear, after these
8 discussions, Leapfrog proposed an imputation
9 model where hospitals that were missing
10 historical data from the prior two rounds would
11 be given the limited achievement score for hand
12 hygiene, BCMA, CPOE, and the ICU physician
13 staffing; is that right?

14 MS. BLAIR: Objection to form.

15 THE WITNESS: I believe that's -- yeah.
16 I believe that's right.

17 BY MR. CHUNG:

18 Q. And this methodology replaced the mean
19 scores approach that had been used previously; is
20 that right?

21 A. It was -- yes. That's -- yes.

22 Q. Okay.

1 MR. CHUNG: Let's go to tab 14. This
2 will be Exhibit 12.

3 (Binder Deposition Exhibit 12 marked for
4 identification and attached to the
5 transcript.)

6 BY MR. CHUNG:

7 Q. So Ms. Binder, Exhibit 12 is an e-mail
8 discussing feedback on the hospital safety grade
9 changes.

10 And you see that on the second page Bates
11 ending 9812, Ms. Campione writes, We have
12 finalized the changes to the imputation
13 methodology. Both Peter and Patrick have
14 reviewed and signed off on the messaging.

15 And then she asked for your feedback; is
16 that right?

17 A. Yes.

18 Q. Okay. And this is on May 17, 2024; is
19 that right?

20 A. Yes.

21 Q. Okay. And then later that day you
22 respond that you provided some tweaks in an

1 attachment; is that right?

2 A. Yes.

3 Q. Okay. So let's go to -- so the
4 attachment is actually right after the e-mail
5 chain here. It's the request for public
6 comments, planned updates, the Leapfrog hospital
7 safety grade methodology for fall 2024.

8 If you turn to Bates ending -- and this
9 is -- is this a document here, the attachment,
10 that's intended to be put on Leapfrog's website?
11 Is that right?

12 A. Yes. We have a public comment process.
13 We put it out for public comment and then we
14 adver- -- not -- we publicize the fact that it's
15 available and we -- to encourage people to look
16 at it and offer public comments.

17 Q. Okay. If you look at Bates ending
18 9184 -- this is under the background section --
19 you'll see here that there is a sentence here
20 that's struck that reads, The collective
21 recommendation was for Leapfrog to modify its
22 current imputation approach to encourage survey

1 participation and to improve users' confidence in
2 the data that are used to calculate the score.

3 Do you see that?

4 A. Yes.

5 Q. Okay. And so the explanation that the
6 methodology change was to encourage participation
7 was struck, correct?

8 A. Yes.

9 Q. All right. And then looking back to your
10 e-mail -- so Bates ending in 9811, the very first
11 page of this document.

12 A. Yeah.

13 Q. You wrote that -- I don't think we need
14 the sentence about influencing survey
15 participation and giving people confidence and
16 validity. It sounds defensive.

17 Why did you think explaining how the
18 imputation methodology would influence
19 participation was defensive?

20 A. The purpose of the change -- proposed --
21 at this time proposed -- to the safety grade was
22 to be as accurate as possible. And that is what

1 the expert panel talked about. In all of the
2 documents that you've just provided in your
3 exhibits, they're not talking about -- the expert
4 panel is not saying, well, we're going to get
5 more participation in the survey.

6 So that was not the purpose of this
7 change. The purpose of this change was to
8 improve the accuracy.

9 Q. Okay.

10 A. So I felt that it sounds -- doesn't make
11 sense. I didn't think it made sense.

12 Q. Are you saying that it's inaccurate to
13 say that the change in the imputation model would
14 influence participation?

15 A. I don't know if it would influence
16 participation. Probably. Maybe. Depends.
17 Because if someone doesn't do well on the survey,
18 they can hurt their grade. So not necessarily.
19 It wouldn't -- certainly wouldn't be the purpose
20 for this methodology change. And nor do I see
21 that in the discussions by the expert panel.

22 Q. Okay. And then you write -- again,

1 focusing on the e-mail here -- It's enough that
2 the expert panel advised us to do the imputation
3 in a different way and not treat older better
4 data in an equivalent way to new data.

5 A. That they did discuss at length.

6 Q. Okay. And as I think we discussed
7 earlier, in terms of the -- in terms of the
8 limited achievement proposal that eventually was
9 put into place, did you get -- did every single
10 member of the expert panel approve that
11 methodology?

12 A. Yes.

13 Q. Okay. And how did you go about getting
14 the approval of every single member?

15 MS. BLAIR: Objection to form.

16 THE WITNESS: From -- my normal way of
17 finding out for sure that the expert panel is
18 fully behind methodology, which is I ask my
19 senior vice-president for healthcare ratings and
20 our --

21 BY MR. CHUNG:

22 Q. And that's Ms. Danforth?

1 A. Ms. Danforth. And Matt Austin. And I
2 meet with them extensively and we go over how --
3 the perspective of each member of the panel and
4 that they've looked at it.

5 You can see from the e-mails they have
6 plenty of evidence that the expert panel was
7 behind it.

8 And in addition, I make sure that this is
9 shared with the expert panelists prior to going
10 out for public comment. And so certainly if
11 there was disagreement by any member, I would --
12 we would have heard about it, you know,
13 instantly, because we put it out -- we gave it to
14 them prior to the public comment period.

15 Q. Okay. And so the imputation
16 methodology -- and again -- I'm going to ask
17 again, is the approval of every member of the
18 expert panel of the -- of this methodology
19 memorialized anywhere?

20 A. No. This isn't Congress. This is a
21 classic scientific expert panel. The process
22 that you see in these e-mails is exactly the way

1 the scientific process works.

2 Q. So the answer is no.

3 MS. BLAIR: Objection to form.

4 THE WITNESS: Memorialized? Other than
5 the usual method by which I know the expert
6 panelists are behind it, I -- I don't know --
7 well, there's no vote.

8 BY MR. CHUNG:

9 Q. Okay. Now, towards the end of your
10 e-mail to Ms. Campione here you write that the
11 public comments on the methodology will give us a
12 good gauge on the extent to which we need to
13 reveal all our reasoning and whether the expert
14 panelists will truly stand up for it when push
15 comes to shove.

16 Is it fair to say at this point you were
17 not sure if the expert panel would stand up for
18 the new methodology?

19 A. Yeah. As I said earlier, for me, it's
20 very important that not only do we have the okay,
21 so to speak, from each member of the expert panel
22 that they do support it -- which I was assured of

1 and I believed strongly, and still do -- but what
2 happens when you have a methodology change like
3 this is you sometimes get very strong opposition,
4 and they will go -- the opponents, which we would
5 hear from in the public comment period, or the
6 supporters sometimes -- would go directly to
7 individual members of the expert panel. So if
8 for some reason they were to change their mind or
9 not be able to say, no, this is -- I own this,
10 this is our methodology, then I would want to
11 know that right away. I wouldn't go forward with
12 something unless I had the strongest possible
13 support, even in the face of opposition.

14 And so that is another value of the
15 public comment period and why we are so -- why
16 Leapfrog is so interested in public comment and
17 why we reach out so frequently to the larger
18 communities that we serve, to make sure we're
19 getting the right kind of feedback and insights.
20 And we often make changes as a result of those
21 insights.

22 Q. Okay. When was this methodology

1 change -- when was the board notified of this
2 methodology change?

3 A. I believe I previewed it with them. I'm
4 trying -- I'll have to look through -- look
5 through all the board packets. But I believe I
6 previewed it with them --

7 Q. When was that?

8 A. -- in the spring. I believe in March.
9 And then also in June I told them about it.

10 Q. Okay. So in June --

11 MR. CHUNG: Why don't we go to the next
12 document. 91.

13 (Binder Deposition Exhibit 13 marked for
14 identification and attached to the
15 transcript.)

16 BY MR. CHUNG:

17 Q. Okay. This is -- Exhibit 13 is the CEO
18 report --

19 A. Yes.

20 Q. -- to the board from June 2024.

21 Is this a document that's distributed to
22 the board --

1 A. Yes.

2 Q. -- in connection with board meetings?

3 A. Yes.

4 Q. Prior to the meeting or when exactly?

5 A. Like a week prior to the meeting.

6 Q. Okay. Now, we look at the first page,
7 Bates ending in 072 under hospital safety grade
8 successful spring update.

9 You write that Leapfrog published its
10 planned updates to the safety grade methodology
11 and that the update dramatically lowers imputed
12 scores for certain measures for hospitals that
13 decline to report to the survey.

14 Do you see that?

15 A. Yes.

16 Q. Okay. And it says here, This should have
17 some impact on hospital reporting to the survey,
18 correct?

19 A. Yes.

20 Q. All right. So you -- and is this the
21 first time that you're apprising the board of the
22 change in methodology?

1 A. No.

2 Q. When did you --

3 A. I said in March.

4 Q. Okay.

5 A. And --

6 Q. And where -- where -- would it have been
7 in the CEO report for March?

8 A. Probably. But I certainly would have
9 verbally told them that we were working on it and
10 the expert panel was meeting.

11 Q. So it should -- so it should be reflected
12 in the board minutes; is that right?

13 A. I think so. Yeah. It should be.

14 Q. Okay.

15 MR. CHUNG: Why don't we go to -- this
16 will be Exhibit 14.

17 (Binder Deposition Exhibit 14 marked for
18 identification and attached to the
19 transcript.)

20 BY MR. CHUNG:

21 Q. So Exhibit 14 are the board minutes,
22 Ms. Binder, from the March 2024 meeting.

1 Do you see that?

2 A. Yes.

3 Q. Okay. Do you see anywhere here any
4 discussion of the new methodology?

5 A. No, I don't see it.

6 Q. Okay. So fair to say that June 2024 is
7 the first time the board is apprised of the
8 change in methodology?

9 A. No.

10 MS. BLAIR: Objection to form.

11 THE WITNESS: No. I did talk to them
12 about the fact that the expert panel was meeting
13 to discuss an update to the methodology.

14 BY MR. CHUNG:

15 Q. Is that reflected anywhere in the
16 minutes, the fact --

17 A. It's not --

18 Q. -- of the meeting?

19 A. -- reflected in the minutes.

20 Q. It's not.

21 A. No.

22 Q. Okay?

1 A. But I did discuss it with them.

2 Q. All right. Why would that not be
3 reflected in the minutes, Ms. Binder? Isn't that
4 something of -- that's pretty important?

5 MS. BLAIR: Objection to form.

6 THE WITNESS: I don't know why it's not
7 in the minutes.

8 BY MR. CHUNG:

9 Q. Okay. And during -- let's go back to the
10 June 2024 meeting.

11 Did you explain the two steps in the new
12 method -- imputation methodology with the board?

13 A. I believe -- I don't recall exactly
14 how -- what we did. The board does not typically
15 delve into the details of any methodology, but we
16 highlight where we think there are issues that
17 they should be aware of, which is what I'm sure I
18 did.

19 And then if the board feels like there's
20 board-level issues that they should address, they
21 will ask for an agenda item and they'll ask to
22 have it formally presented and discussed.

1 They did not do so in -- at least two
2 times that I talked to the board about this.

3 Q. Okay. But you did underscore in the CEO
4 report and at the meeting that the methodology
5 change should have some impact on hospital
6 reporting --

7 A. Yes.

8 Q. -- to the survey, correct?

9 A. Yes.

10 Q. And that was important to the board,
11 correct?

12 A. Oh, yes.

13 Q. And that's important to Leapfrog, right?

14 A. It's very important to Leapfrog. It's
15 the core of our mission.

16 Q. Right. To have as many hospitals respond
17 to the survey as possible, correct?

18 A. To have full hospital transparency.

19 Q. Right. Impact on hospital reporting is a
20 reference to participation in the hospital
21 survey --

22 A. Yes.

1 Q. -- is that right?

2 Okay. And so that was one of the goals
3 behind this change in the imputation methodology,
4 correct?

5 MS. BLAIR: Objection to form.

6 THE WITNESS: No.

7 BY MR. CHUNG:

8 Q. All right.

9 A. No, that was not the goal of the change
10 in the imputation methodology.

11 Q. Not the goal, but you're mentioning that
12 it's going to have some impact, correct?

13 A. Yes. This is the board of Leapfrog.
14 They need to know what the implications are to
15 The Leapfrog Group.

16 Q. Okay. Did the board approve the
17 methodology change?

18 A. The board does not ask -- delegates to me
19 the authority to approve methodology changes
20 or -- of this sort or changes to the survey. But
21 I do bring forward to inform them of when these
22 are -- such changes are on the table, and I tell

1 them what's going on and I explain what the
2 situation is and what I see as implications to
3 the organization. And if they wish, we will
4 certainly do a deep dive within the board level,
5 and they certainly have the authority to approve.

6 This is not a board of measurement
7 experts or clinicians. None of them come from
8 the healthcare industry. As I've talked earlier,
9 we're careful about the fact that the board does
10 not include industry leaders. So they really are
11 depending on the expert panel and the staff of
12 Leapfrog and Johns Hopkins to advise them.

13 Q. Okay.

14 MR. CHUNG: Let's go to tab 83.

15 BY MR. CHUNG:

16 Q. You mentioned a delegation.

17 Where is that delegation memorialized?

18 A. It's in the bylaws. The CEO is -- acts
19 on behalf of the board.

20 Q. With respect to the methodology as well?

21 A. I don't think it specifically says the
22 methodology, but I report to the board and...

1 Q. Okay.

2 A. That's how it works.

3 MR. CHUNG: So this will be Exhibit 15.

4 (Binder Deposition Exhibit 15 marked for
5 identification and attached to the
6 transcript.)

7 BY MR. CHUNG:

8 Q. So Exhibit 15 is -- it's a slide deck
9 entitled, Technical overview of the hospital
10 safety score from fall of 2012.

11 And you were CEO, what, four years in --
12 right? -- of the organization by this time?

13 A. Three-and-a-half. Yes.

14 Q. Okay. And you'll see that Ms. Danforth
15 and Matt Austin are the authors of the document.

16 Turn your attention to the Bates ending
17 8512. So it's the fourth page. Just let me know
18 when you get there. It's entitled, Role of the
19 expert panel and Leapfrog's board of directors.

20 Do you see that?

21 A. Uh-huh.

22 Q. And under Leapfrog's board of directors

1 it says, Final decisions related to measure set
2 scoring methodology.

3 Do you see that?

4 A. Yes.

5 Q. Final decisions relating to letter grade
6 assignments and oversight of all policies that
7 guide the hospital safety score.

8 A. Uh-huh.

9 Q. So isn't it correct that the board, board
10 of directors, their role includes final decisions
11 related to scoring methodology?

12 MS. BLAIR: Objection to form.

13 THE WITNESS: The board delegates to me
14 the authority to make these final decisions.

15 BY MR. CHUNG:

16 Q. Does it say that on here?

17 A. It doesn't have to. That's how it works.

18 Q. Okay.

19 A. That's how 99 percent of organizations
20 work.

21 Q. So this --

22 A. The board does not make operational

1 decisions. And the board is informed of these.
2 And when I believe it's something that has
3 enormous need for board involvement, then they
4 make the decision. But they're informed of the
5 decisions that I'm making, and they're holding me
6 accountable for doing so in a way that makes
7 sense.

8 And this slide is meant to distinguish
9 between the role of the board and the role of the
10 expert panel. The expert panel is not a
11 governing board, is what it's trying to say.

12 Q. So this -- are you saying that this
13 document is inaccurate --

14 MS. BLAIR: Objection to form.

15 BY MR. CHUNG:

16 Q. -- with respect to the --

17 A. It's --

18 Q. -- with respect to the board's role when
19 it --

20 A. It's perfectly --

21 Q. -- comes to --

22 A. -- accurate.

1 Q. -- the scoring methodology?

2 A. It's accurate.

3 Q. Okay. Even though they did not make the
4 final decision with respect to the change of
5 imputation methodology in 2024; is that --

6 A. They delegate to me the responsibility
7 for that.

8 Q. Okay. But that's not reflected on this
9 document, correct, the delegation itself?

10 A. The delegation is not reflected, no. But
11 that is assumed.

12 Q. Okay. Is it your view that the changes
13 in the imputation methodology are really
14 decisions to be made by you and the executive
15 staff of Leapfrog?

16 MS. BLAIR: Objection to form.

17 THE WITNESS: Is it --

18 BY MR. CHUNG:

19 Q. As opposed to the board.

20 A. It's not opposed to the board. I do it
21 with the full knowledge of the board.

22 Q. Okay. And we saw that, in the March 2024

1 board meeting minutes, there's no mention of your
2 mentioning the imputation methodology, right?

3 A. Yeah, I'd -- I should look at the full
4 agenda of that meeting. There may have been a
5 presentation on the agenda on the methodology.
6 But I definitely have discussed it with the
7 board, actually, repeatedly, board members, board
8 chair, executive committee, et cetera. It's been
9 a subject that we have discussed at length.
10 They're fully aware of it. And frankly, it's not
11 in my interest -- since they have delegated the
12 authority to me, it's not in my interest to not
13 let them know when something like this is
14 occurring and that it's important and that -- and
15 how the expert panel has advised us and what we
16 ultimately are -- and what we're learning from
17 public comment.

18 Q. Did you have separate conversations about
19 the methodology change with individual board
20 members?

21 A. Yes.

22 Q. Okay. Who did you have separate

1 conversations with?

2 A. Our board chair in particular that I
3 recall.

4 Q. Okay. And when were those conversations?

5 A. Over the course of at least March, maybe
6 earlier. Probably March --

7 Q. Okay.

8 A. -- through -- through the later board
9 meetings where it was discussed and approved.

10 Q. And is that with Linda Schwimmer? Is
11 that right?

12 A. Yes.

13 Q. Okay. Did you have conversations with
14 Vice Admiral -- I think it's Vice Chair or Vice
15 Admiral Raquel Bono?

16 A. I'm going to assume I did. I don't
17 recall specifically. But she is on the executive
18 committee, so I definitely discussed this with
19 the executive committee, as well as the board.

20 Q. Okay. Did you have conversations with
21 Michelle Martin?

22 A. I don't recall.

1 Q. How about Sally Welborn?

2 A. She is on the executive committee, so
3 yes, I would have in the context of the executive
4 committee.

5 Q. John Zern?

6 A. He's also on the executive committee.

7 Q. Rumay Alexander?

8 A. She is on the board, so she would have
9 heard it as part of a board -- I don't recall a
10 one-on-one conversation with her about this?

11 Q. Any one-on-ones with Irene Fraser?

12 A. Not that I recall.

13 Q. Carole Hemmelgarn?

14 A. Not that I recall specifically.

15 Q. Ellen Kelsay?

16 A. Not that I recall.

17 Q. Janet Lucas-Taylor?

18 A. Not that I recall.

19 Q. Kenneth Mendez?

20 A. Not that I recall.

21 Q. Arnold Mistein [sic]?

22 A. Arnold Milstein, yes. He's on the expert

1 panel as well as the board, and we talk
2 extensively.

3 Q. Dolores Mitchell?

4 A. Not that I recall.

5 Q. Aaron Schrader?

6 A. Not that I recall.

7 Q. Susan Sheridan?

8 A. Not that I recall.

9 Q. Karen van Caulil?

10 A. Not that I recall.

11 Q. Lina Walker?

12 A. Not that I recall.

13 Q. Kimberly Blair?

14 MS. BLAIR: Objection to form. I'm not
15 on the board.

16 BY MR. CHUNG:

17 Q. Did you have one-on-one conversations
18 about the change in imputation methodology with
19 Ms. --

20 A. I mean, not early on --

21 Q. -- Blair --

22 A. -- no.

1 MS. BLAIR: I'm going to object to form
2 and instruct you not to answer any conversations
3 you had with me as your legal counsel related to
4 a change in methodology.

5 BY MR. CHUNG:

6 Q. Did you have conversations with Ms. Blair
7 in 2024 about the change in methodology?

8 A. I've been instructed not to answer that
9 by counsel.

10 Q. The question is, yes or no.

11 Did you --

12 MS. BLAIR: You can answer yes or no.

13 THE WITNESS: Oh. Yes.

14 BY MR. CHUNG:

15 Q. Okay. Michelle Schreiber?

16 A. Yes.

17 Q. Okay. Christa-Marie Singleton?

18 A. No.

19 Q. Okay. Now -- so looking at the -- in
20 terms of just general -- taking a step back, the
21 board of directors meetings, they covered topics
22 including topics relating to Leapfrog's business;

1 is that right?

2 A. Yes.

3 Q. Okay. And those matters cover -- and I'm
4 not saying every -- that's the sole function of
5 the board meetings, but they covered topics like
6 the financial updates; is that right?

7 A. Yes.

8 Q. And operations updates?

9 A. Yes.

10 Q. And --

11 A. It's not -- they're not involved in
12 operations at any detailed level, but yes,
13 operations. Yes.

14 Q. Okay. And I think there's some long-term
15 planning discussions that happened at the board
16 meeting; is that right?

17 A. Long-term strategic intent.

18 Q. Okay. That's right. I think there's
19 some documents with that very title.

20 A. Yes.

21 Q. Do the board meetings, do they cover
22 legal advice at all?

1 A. What do you mean by that?

2 Q. Like, is there any component of the board
3 meetings where you're discussing legal matters?

4 MS. BLAIR: You can answer --

5 THE WITNESS: Yes.

6 MS. BLAIR: -- that yes or no.

7 BY MR. CHUNG:

8 Q. Okay. Sometimes, right? At some board
9 meetings where it's relevant; is that right?

10 A. Yes.

11 Q. Okay. Would you agree that financial
12 updates to the board are not -- don't involve
13 legal advice?

14 A. I'm trying to understand. Financial --

15 Q. Yeah.

16 A. -- updates don't involve legal advice?

17 Q. Right.

18 A. Right.

19 Q. Okay. How about the -- we mentioned the
20 operational updates to the board.

21 Do those involve legal advice?

22 A. I don't know.

1 Q. Okay. Does the organization have
2 in-house counsel, like a general counsel or --

3 A. No.

4 Q. No? Okay. Does Leapfrog use the Wilson
5 Elser firm as an equivalent to an in-house
6 counsel, though?

7 A. Yes.

8 Q. Okay. And you know that Ms. Blair
9 works -- is a partner at Wilson Elser; is that
10 right?

11 A. Yes.

12 Q. Okay. Is Ms. Blair essentially
13 Leapfrog's general counsel?

14 A. She's counsel to Leapfrog.

15 Q. Okay. But she attends board meetings,
16 correct?

17 A. Yes.

18 Q. And in fact, she attended the board
19 meetings throughout 2024, correct?

20 A. Yes.

21 Q. All right. And just generally, how long
22 has Ms. Blair been involved with Leapfrog?

1 A. I'm not certain of that, but something
2 like -- I don't know, actually. Five years?
3 Seven years? Something like that.

4 Q. Okay. So certainly before 2024.

5 A. Yes.

6 Q. Okay. Does Ms. Blair consult Leapfrog on
7 non-legal business matters?

8 A. No.

9 Q. Okay. What do you understand Ms. Blair
10 to be responsible for, then, with respect to
11 Leapfrog, other than this matter we have in front
12 of us?

13 A. Well, our board wants to know that
14 there's legal counsel at the table to assure that
15 we are compliant with all the laws.

16 Q. Okay. And that requires Ms. Blair's
17 attendance at all the board meetings?

18 A. Yes.

19 Q. Okay. What issues are you -- what laws
20 and what compliance with those laws are you
21 referring to?

22 A. I don't know, but things come up every

1 now and then. We'll be having a conversation and
2 discussing something and it seems like, well, I
3 wonder if that's right or that's right, and we
4 want to make sure that we have counsel present to
5 advise us.

6 Q. Okay. Just in case something comes up;
7 is that right?

8 A. Yeah. It's a common practice among
9 boards.

10 Q. Okay. Does Ms. Blair advise on licensing
11 agreements?

12 A. Yes. She looks at the contracts and
13 works, I believe, with the team when a licensee
14 wants to have a change to their agreement. So
15 she'll help to make sure that the language in our
16 contracts are compliant.

17 Q. This is Mr. Banerjee's team; is that
18 right?

19 A. Mr. Banerjee and also Missy Danforth and
20 the team.

21 Q. Okay. Because Missy -- because Ms.
22 Danforth oversees the licensing team --

1 A. Right.

2 Q. -- as well as the ratings team, correct?

3 A. Yes. It's typically Kush Banerjee who is
4 working with the contracts with individual
5 licensees.

6 Q. Okay. Does Ms. Blair advise on 990
7 filings?

8 A. No.

9 Q. Okay. How about on any sort of
10 employment issues?

11 A. Rarely. We have a -- we have a
12 contractor called Engage Healthcare that has
13 attorneys, and we typically rely on them for
14 advice regarding employment issues.

15 Q. Okay. Does Ms. Blair advise on any
16 issues relating to changes in the hospital
17 survey?

18 A. No. I don't believe so.

19 Q. Okay. How about changes with respect to
20 the scoring methodology?

21 A. No.

22 Q. Okay. Does Ms. Blair give Leapfrog

1 business advice in any -- in any way?

2 A. Other than looking at the legal language
3 in our contracts, no.

4 Q. Okay. Does -- so Ms. Blair -- it's
5 correct that Ms. Blair attends board meetings to
6 this day, correct?

7 A. Yes.

8 Q. All right.

9 A. We've always had counsel attend board
10 meetings.

11 Q. Okay. And can you just kind of tell us
12 again, what is Ms. Blair doing at the board
13 meetings?

14 A. She is listening and assuring that our
15 deliberations and our discussions and any issues
16 that come up are compliant with the law.

17 Q. Okay. Does Ms. Blair attend any other
18 Leapfrog meetings other than the board meetings?

19 A. Once in a while she's asked to attend
20 meetings, but rarely.

21 Q. Okay. Let's go to our next document.

22 MR. CHUNG: Tab 14. Oh, tab 15, I'm

1 sorry.

2 This will be Exhibit 16.

3 (Binder Deposition Exhibit 16 marked for
4 identification and attached to the
5 transcript.)

6 BY MR. CHUNG:

7 Q. All right. Ms. Binder, did -- in the
8 fall of 2024, did Leapfrog -- did the Leapfrog
9 website have a frequently asked questions
10 section?

11 A. Yes.

12 Q. Okay. Now, I'm just going to direct your
13 attention to the very first page of the exhibit,
14 which is an e-mail.

15 And towards the bottom of the e-mail you
16 write, Are you giving more A's now because of all
17 this improvement? Explain sliding scale. A's
18 tend to be better now.

19 Do you see that?

20 A. Yes. I'm going to have to refresh my
21 memory on this. But frequently asked questions
22 on our website are different from frequently

1 asked questions that we use internally for
2 spokespeople and people who are going in front of
3 the press or talking to hospitals or talking to
4 the public, et cetera. We have a set of talking
5 points to address those issues.

6 Q. But both are external facing, correct?

7 A. The frequently-asked questions, no,
8 they're not external -- there are some on our
9 website. There are actually lots of different
10 places on our website we have frequently asked
11 questions.

12 But I believe -- and I'd need to refresh
13 my memory on this particular e-mail, but I
14 believe these are internal talking points --

15 Q. Okay.

16 A. -- frequently asked questions that we use
17 for our own internal spokespeople. I believe
18 that's what he's talking about.

19 Q. Okay. So just focusing on that sentence,
20 Are you giving more A's now because of all this
21 improvement?

22 Do you see that?

1 A. Where is that?

2 Q. In the paragraph starting, Where are we
3 seeing improvements in patient safety?

4 Do you see that paragraph?

5 A. Oh, yeah. Okay.

6 Q. If you go down four lines -- or three
7 lines.

8 A. Right.

9 Q. Do you see that?

10 A. Uh-huh.

11 Q. Was Leapfrog giving out more A grades in
12 2023 and 2024 than in prior years?

13 A. No. We've given out pretty much
14 consistently the same number of A's.

15 Q. Same --

16 A. Slight changes up and down, up and down
17 depending on how the CMS data plays out. But
18 pretty much the same amount of A's every year.

19 Again, there are slight changes, but not
20 substantially.

21 These questions are -- this is definitely
22 for an internal document of questions that we do

1 hear and -- to be prepared to answer them.

2 Q. Okay. Let's go to the actual markup of
3 the frequently asked questions document. And if
4 you go to 397096 -- do you see that at the
5 bottom?

6 A. Yes.

7 Q. It's the first page of the document.

8 At the bottom of the page -- and are
9 these markups your -- is it your markup?

10 A. It looks like it is mine.

11 Q. Okay. You added a question here that
12 reads, Why did hospital X get an F? Why did
13 hospital Y get an A?

14 A. Yeah.

15 Q. And then under that, in brackets, you
16 wrote, at least in part, Don't say how those
17 measures caused a bad grade. In other words,
18 talk about the safety measures, not the
19 methodology.

20 Do you see that?

21 A. Yes.

22 Q. Okay. Why did you not want to talk about

1 the methodology?

2 A. Because when you're talking to a reporter
3 who is, in turn, talking to the lay public or
4 reporting for the lay public, they don't want to
5 hear about long explanations of methodology.
6 What's important about the safety grade is errors
7 and accidents and injuries and infections
8 happening in hospitals. So I want to make sure
9 that our spokespeople are continuing to talk
10 about those issues and not getting -- not going
11 on about the methodology.

12 Q. But don't reporters or even consumers
13 want to know -- the question here is -- why a
14 particular hospital got an F grade?

15 A. Uh-huh. Yeah. So what we advise people
16 to do in this case -- and I don't know, maybe you
17 have another exhibit with the final that this
18 ended up.

19 But what we advise our spokespeople to
20 say is, well, they did poorly on central
21 line infections, they were among the worst in the
22 country on patient experience reports or they --

1 you know, to be very specific to the reasons --
2 the specific measures of problems that happen in
3 hospitals. We should be very specific about
4 those when we're discussing the grades.

5 Q. But if it's -- but for specific measures,
6 including -- I'm focusing on the four imputed
7 metrics, which I think you testified earlier are
8 among the most important metrics; is that right?

9 MS. BLAIR: Objection to form.

10 THE WITNESS: I didn't say that. I
11 didn't testify that.

12 BY MR. CHUNG:

13 Q. All right. Well, let me put it another
14 way.

15 Are the four imputed metrics among the
16 most heavily weighted metrics in the scoring
17 methodology?

18 MS. BLAIR: Objection to form.

19 THE WITNESS: I think it depends on which
20 hospital is -- which hospital you're scoring.

21 BY MR. CHUNG:

22 Q. Okay. But specifically with respect to

1 those four imputed metrics, isn't it correct that
2 why a particular hospital got a limited
3 achievement score on that metric is because they
4 were automatically assigned that score because
5 they didn't participate?

6 MS. BLAIR: Objection to form.

7 THE WITNESS: If a reporter is to ask why
8 did that hospital get limited achievement and
9 they didn't report to the survey, and I look on
10 the website and I see that's what we say, that we
11 assigned a grade, that's what I would tell the
12 reporter.

13 But this is not what the question is on
14 here that I was editing and suggesting that the
15 team write this answer that the spokespeople at
16 Leapfrog would have, which is to have an
17 orientation toward advising reporters on what are
18 these problems in hospitals that we are noting in
19 each hospital's grade.

20 BY MR. CHUNG:

21 Q. Okay. If we -- and then under that
22 section in brackets you write, Terminology should

1 say the hospital earned their grade.

2 Do you see that?

3 A. Yes.

4 Q. Why did you add that comment? Let me put
5 it another way.

6 Why was it important to use the
7 word "earned"?

8 A. Because a hospital's performance is such
9 that they earned the grade that they get.

10 Q. But hospitals that don't respond to the
11 survey are still assigned a grade, right?

12 MS. BLAIR: Objection to form.

13 THE WITNESS: They -- according to the
14 methodology and with the advice of the expert
15 panel, they are -- they get a grade that is
16 reflective of their performance.

17 BY MR. CHUNG:

18 Q. Okay. And would you say that
19 non-participating hospitals earned their grade,
20 just using the verbiage here?

21 A. Absolutely they earned their grade. And
22 it's based on 28 of the 38 -- 32 measures in

1 particular.

2 Q. 28 of the --

3 A. Well, there's 32 measures in the grade,
4 so it's based on all 32 measures. But it is
5 based on the data that we have.

6 Q. But not on the four -- but not on --

7 A. Imputed --

8 Q. -- four, correct?

9 A. No. Imputed values are real -- that's
10 real measures to me.

11 Q. Okay. Though they're automatically
12 assigned a grade, correct, without the benefit of
13 any data on those metrics; is that right?

14 MS. BLAIR: Objection to form to the use
15 of "grade."

16 THE WITNESS: They're not assigned a
17 grade on those imputed measures at all.

18 BY MR. CHUNG:

19 Q. A score.

20 A. Each of those imputed measures, the
21 imputation is a score.

22 Q. Okay. And that score is a limited

1 achievement score that is automatically assigned
2 to those metrics without the benefit of any data
3 on those metrics, correct?

4 A. If the hospital has reported to the
5 survey in the past two cycles of the grade, then
6 we will use that data.

7 Q. But absent that?

8 A. Absent that, in the step 2, they will --
9 they are imputed with a one bar equivalent in
10 each of those four measures.

11 Q. All right.

12 A. Yes.

13 Q. And that imputation is not based on data,
14 actual data, submitted by the hospital, right?

15 A. It's based on --

16 Q. My question is --

17 A. -- extremely --

18 Q. -- that imputation is not based on -- is
19 not reflective of actual data submitted by the
20 hospital, correct?

21 A. Submitted by the hospital?

22 Q. Correct. That's what I asked.

1 A. It's reflective of data from -- it's
2 reflective of data --

3 Q. What --

4 A. -- based on our knowledge of how
5 hospitals perform when they don't report to the
6 survey --

7 Q. Okay.

8 A. -- and expert opinion.

9 Q. Okay. Let's turn to page 3 of the FAQ --
10 this FAQ document, Bates ending 7098.

11 Okay? Do you see that?

12 A. Actually, I see --

13 Q. The top number.

14 MS. BLAIR: Yeah.

15 THE WITNESS: Oh. Oh, I see. Okay.

16 Yes.

17 BY MR. CHUNG:

18 Q. So there is a question here that reads,
19 Are there methodology changes in the fall 2024
20 Leapfrog hospital safety grade.

21 Do you see that?

22 A. Yes.

1 Q. All right. And it says -- under that
2 question you wrote, In line with recommendations
3 from the national expert panel and Johns Hopkins
4 advisors, Leapfrog changed the way it estimates
5 performance for hospitals that declines to report
6 to the Leapfrog hospital survey; is that right?

7 A. Yes.

8 Q. Okay. Now, looking at the second half of
9 that sentence, is it correct that -- does it ever
10 -- is it correct that the change in methodology
11 is to estimate performance for hospitals that
12 decline to report to the hospital survey?

13 A. This is a draft, and I corrected their
14 draft.

15 Q. Okay.

16 A. So I probably would word that -- and it's
17 not the final. I'm sure it's not the final
18 because that is not quite how we would word it.

19 Q. Okay.

20 A. Changed the way it to...

21 Yeah.

22 Q. All right.

1 A. Yeah. I would tweak the wording to be a
2 little bit more accurate to be clear that it's
3 those -- that it's four of the measures.

4 Q. Okay.

5 MR. CHUNG: Let's go to tab 16.

6 So this will be Exhibits 17 and 18.

7 (Binder Deposition Exhibits 17 and 18
8 marked for identification and attached to
9 the transcript.)

10 BY MR. CHUNG:

11 Q. Okay. Exhibits 17 and 18, you have got
12 an e-mail and a PowerPoint that was attached to
13 it. And let's just focus on 17 for the time
14 being.

15 A. Oh, yeah. This was my PowerPoint skills.

16 Q. Okay. And just looking at the e-mail --
17 so Bates ending 0327 -- this is an e-mail from
18 you to a Paul Alper who I understand is a
19 consultant --

20 MS. BLAIR: Wait.

21 THE WITNESS: I don't think I have that.

22 MS. BLAIR: 0327? We don't have that

1 one. That's not what we have.

2 MR. CHUNG: Just a moment.

3 THE WITNESS: I have 2499.

4 MR. CHUNG: Just a moment.

5 BY MR. CHUNG:

6 Q. Ah. Okay. So Exhibit 17. We're looking
7 at the e-mail Bates ending 2499.

8 Are we now looking at the same thing?

9 Yes.

10 A. Yes.

11 Q. Okay. So let's look at the second
12 page of the document, Bates ending 2500.

13 A. Uh-huh. Yes.

14 Q. And you're writing to Ms. Bailey, who's
15 director of communications at this time; is that
16 right?

17 A. Yes.

18 Q. Okay. This Leapfrog 101 presentation
19 that's being referenced here, what is -- who's
20 the audience for this presentation?

21 A. I can't exactly recall. We do a lot of
22 Leapfrog 101 presentations. I can't recall what

1 this one was meant for.

2 Q. Well, let's go back to the e-mail. Just
3 going down to Bates ending 2500, it's the
4 paragraph starting, First, the most important
5 things to convey in this speech are -- and then,
6 going down a few bullets -- Why the imputation
7 strategy is controversial -- right?

8 Do you see that?

9 A. Yes.

10 Q. All right. What do you mean here? What
11 did you mean?

12 A. Why we're sitting here today is it's
13 controversial to hospitals that don't report --
14 decline to report to the survey.

15 It's also controversial, and has been in
16 the past, the imputation strategy, to hospitals
17 that do report to the survey and have expressed
18 their concern that we are inflating these scores
19 for hospitals that don't report.

20 Q. Okay. The next bullet point, The levers
21 we pull to get hospitals and ASCs to participate.

22 A. Yes.

1 Q. In terms of in terms of the levers --
2 right? -- is one of those levers the risk of a
3 failing grade to a hospital that doesn't
4 participate?

5 MS. BLAIR: Objection to form.

6 THE WITNESS: Well, first of all,
7 participation in the survey is not the same as
8 getting a hospital safety grade.

9 BY MR. CHUNG:

10 Q. Right.

11 A. So no.

12 Q. So what do you -- what do you mean by
13 levers here?

14 A. Well, we -- like any organization, we
15 have to find ways to influence the public in ways
16 that meet our mission. So one lever is, for
17 instance, our work with regional leaders who are
18 typically business groups on health. They have
19 memberships consisting of employers and other
20 purchasers in their community. And those
21 purchasers are the ones that ask hospitals to
22 please participate in the Leapfrog survey because

1 we would like to see that data publicly reported.

2 So that's a lever. We use -- like any
3 organization -- really, any organization of any
4 sort -- we use whatever we have in terms of our
5 influence to see change and to meet our mission.

6 Q. Okay. That's an example of one lever.

7 A. Yes.

8 Q. Is another lever the imputation strategy
9 itself in that it gets hospitals to participate
10 in the survey?

11 A. No. That's not the purpose of the
12 imputation strategy. We didn't see it that way.
13 Because the imputation strategy actually -- it
14 doesn't help or hurt the participation in the
15 survey necessarily. It can for some hospitals;
16 it cannot for others.

17 Q. But isn't it correct that in discussions
18 with members of your own expert panel, that the
19 experts themselves believed that this imputation
20 strategy was, at least in part, designed to get
21 more hospitals to participate that formerly were
22 not participating? Is that correct?

1 MS. BLAIR: Object to form.

2 THE WITNESS: I saw Patrick Romano
3 discuss that. But other than him, I don't think
4 they were seeing it that way. I think they did
5 see implications that they felt were of
6 importance for hospitals that declined to
7 participate. They definitely saw that as a
8 signal of performance in some way, and they
9 talked about that.

10 But that's -- you know, again, what I'm
11 concerned about is that -- from the expert panel
12 is that they agree with the ultimate
13 recommendation, and they did.

14 BY MR. CHUNG:

15 Q. Okay. I'm going to direct your attention
16 to the next page, Bates ending 2501.

17 There's a paragraph that starts, There
18 needs to be a slide about what Leapfrog does to
19 grade a hospital when they decline to report to
20 the survey.

21 Do you see that paragraph?

22 A. Yes.

1 Q. Okay. I think it's very important for
2 the board to understand that we moved over time
3 toward imputing the lowest level of performance
4 when we don't have recent Leapfrog data. In
5 other words, the slide should not detail the
6 step-by-step imputation process. It should
7 summarize the strategic import of the imputation
8 process. This has been a shift over time and one
9 with significant policy ramifications for the
10 organization.

11 A. Uh-huh.

12 Q. This is the second time we're seeing
13 you're saying that we shouldn't get into the
14 methodology. In this case, it's, we should not
15 detail the step-by-step imputation process.

16 With respect to the board, why isn't it
17 important to detail the step-by-step imputation
18 process?

19 MS. BLAIR: Object to form.

20 BY MR. CHUNG:

21 Q. You can answer.

22 A. So you're saying, with respect to the

1 board, why is it important not to detail the
2 imputation process?

3 Q. Why -- why -- why is it not important --
4 right? -- to share with them the steps in the new
5 imputation process?

6 A. Well, in the context of this
7 presentation, which I believe -- I would like to
8 know which we were talking about, but I believe
9 this was to new members of the board. I think
10 this was their orientation.

11 So this is a slide presentation that's
12 probably 30 slides. And this is -- these are new
13 members of the board who are not measurement
14 scientists or clinicians and they're not engaged
15 in the healthcare world, so they will not see the
16 forest for the trees. They won't understand
17 what's important about this.

18 It's very important to me to be as candid
19 and absolutely blunt as possible in our
20 communications so that they understand what's
21 most important about this. If you showed board
22 members who are, like, laypeople, here's this

1 step 1, step 2 imputation, they go -- they're not
2 necessarily going to realize what happened and
3 how this has evolved over time and why, and
4 why -- and the explanations that the expert panel
5 gave us for why that was important.

6 Q. So are you saying that board members, the
7 new board members, will not understand the
8 imputation process?

9 A. No. I just think that they -- they will
10 understand it, for sure, but this presentation
11 has 30 slides with 30 different areas of import.
12 And in this context, that would not convey the
13 message appropriately.

14 Q. Okay.

15 A. When you're speaking to people who --
16 you're trying to give them a broad overview of
17 everything that's going on, and I want to make
18 sure that they understand this very important
19 thing. That's how I felt was the best strategy
20 to do it in this context.

21 Q. Okay. Let's actually go to the slide
22 presentation itself. So if you go to Bates

1 ending in 104. It's 1104. And the slide is
2 titled, How the Survey Compares to Other
3 Measurement Programs.

4 A. Oh, I'm sorry, where is that then? It's
5 not this?

6 MS. BLAIR: It is.

7 MR. CHUNG: It is, yeah.

8 MS. BLAIR: It looks like this. It's
9 1104.

10 MR. CHUNG: Yeah. Exhibit 18.

11 THE WITNESS: Oh.

12 MR. CHUNG: Okay.

13 THE WITNESS: 1104? Okay.

14 BY MR. CHUNG:

15 Q. And the title of the slide is, How the
16 Survey Compares to Other Measurement Programs.

17 Do you see that?

18 A. Yes.

19 Q. Okay. And this includes -- shows a chart
20 listing Leapfrog, CMS, TJC, clinical registries,
21 and health plans; is that correct?

22 A. Yes.

1 Q. Okay. And what are these -- we know what
2 Leapfrog is.

3 CMS is -- what are these other entities
4 and why are they included here in this chart?

5 A. I think that people who are not immersed
6 in the measurement world will say, well, how is
7 Leapfrog different from the Joint Commission or
8 from all these registries, from all the other
9 stuff that hospitals are doing when they are
10 reporting on their quality and safety? Or how is
11 it different from what health plans do?

12 And so we're trying to sort of lay that
13 out, why we needed Leapfrog, because it plays a
14 very unique role amid all of those other efforts
15 at assessing and reporting on quality and safety.

16 Q. Okay. Now, it says here, under TJC and
17 then clinical registries, that one can opt out.

18 Do you see that?

19 A. Yes.

20 Q. Okay. And so, according to this chart,
21 hospitals can opt out of reporting to TJC and
22 these clinical registries; is that right?

1 A. No. It's tied to -- the row is publicly
2 reports by facility. They can opt out of
3 publicly reporting their Joint Commission
4 results.

5 Q. Okay. Does Leapfrog allow hospitals to
6 opt out of that?

7 A. If they report to our survey? If they
8 submit to our survey, they attest to the veracity
9 of the survey and they submit it. It is publicly
10 reported. That is our core mission.

11 Q. So the question is, can a hospital opt
12 out of that public disclosure, that public
13 reporting of that data?

14 A. By not reporting to the survey, they can
15 opt out.

16 Q. Okay. After submitting the data, can
17 they opt out?

18 A. No.

19 Q. Okay.

20 A. Of reporting their performance, I might
21 add. Their scores by Leapfrog.

22 Q. Can they get an exemption for completing

1 the survey?

2 MS. BLAIR: Object to form.

3 THE WITNESS: An exemption for completing
4 the survey?

5 BY MR. CHUNG:

6 Q. From completing the survey.

7 A. They just don't report. It's -- you
8 know, it's voluntary.

9 Q. Okay. And you're aware that the
10 plaintiff hospitals in this matter, they sought
11 to opt out of participating in the survey; is
12 that right?

13 A. They don't participate in the survey. So
14 they didn't just seek to opt out; they didn't --

15 Q. They just didn't, right?

16 A. Uh-huh.

17 Q. Okay.

18 A. Though I do see from some of the
19 discovery materials that they were interested in
20 reporting, but were told they couldn't, which was
21 interesting.

22 Q. The last row in the chart is a -- the

1 five-step verification process.

2 Do you see that?

3 A. Yes.

4 Q. Okay. And Leapfrog has an X in the
5 column next to it, right?

6 A. Yes.

7 Q. And does this mean that the other surveys
8 on this slide don't verify their data?

9 MS. BLAIR: Objection to form.

10 THE WITNESS: No, that's not what this
11 means.

12 BY MR. CHUNG:

13 Q. Okay. It just means that they don't have
14 the five-step verification process that Leapfrog
15 has?

16 A. Exactly.

17 Q. Okay.

18 A. But they each have their own processes,
19 I'm sure.

20 Q. The -- we're going back to -- earlier in
21 the morning we were discussing ways that Leapfrog
22 does and does not verify the data that it -- that

1 it receives from the hospitals.

2 Does Leapfrog visit hospitals that do not
3 participate in the survey and receive limited
4 achievement scores?

5 MS. BLAIR: Objection to form.

6 THE WITNESS: Visit for what purpose?

7 BY MR. CHUNG:

8 Q. Just for any purpose.

9 A. No formal visits, but I've certainly been
10 to hospitals and visited hospitals that don't
11 report to the survey.

12 Q. Okay. All right.

13 MR. CHUNG: We've been going a while.
14 We're going to the next section.

15 So why don't we -- should we break for
16 lunch now?

17 MS. BLAIR: Sure. Yeah.

18 MR. CHUNG: Why don't we do that.

19 VIDEO TECHNICIAN: The time is 12:54 p.m.
20 This ends unit 2. We're off the record.

21 (A recess was taken.)

22 VIDEO TECHNICIAN: The time is 1:52 p.m.

1 This begins unit number 3. We're on the record.

2 (Binder Deposition Exhibits 19 and 20
3 marked for identification and attached to
4 the transcript.)

5 BY MR. CHUNG:

6 Q. So Ms. Binder, our next document,
7 Exhibits 19 and 20, are an e-mail chain and short
8 attachments from July 15 of 2024. And I want to
9 direct your attention to -- you mentioned -- who
10 is Paul Alper?

11 A. He is a consultant to Leapfrog.

12 Q. Okay. And it appears that he sent a set
13 of slides or a slide for you to review; is that
14 right?

15 A. I believe so. I have to refresh my
16 memory on this e-mail.

17 Q. Okay. Just take a moment to review it.

18 Ms. Binder, I'm just going to ask a few
19 questions about that last bullet point in the
20 e-mail that starts with, We did change the
21 methodology for fall 2024.

22 A. Okay. I'm just getting to reading that

1 right this second.

2 Yes. Okay.

3 Q. All right. So by this time, is it right
4 that the methodology -- the imputation
5 methodology that we've been discussing all day so
6 far was put into effect?

7 A. I believe by July 15th, yes, I believe
8 so.

9 Q. Okay. And you're writing to Mr. Alper
10 that it would change the methodology so that
11 hospitals that don't report to the Leapfrog
12 survey this year or last year will be imputed
13 with the lowest score on hand hygiene and I'm
14 sure the survey team has a slide on that.

15 And then you continue to write, But
16 please be sure you thoroughly understand this
17 change and the talking points around it if you
18 decide -- if you do decide to use it. It's a
19 very big deal to hospitals and a major incentive
20 to report to the survey and you could easily get
21 a question on it.

22 So you wrote that the methodology change

1 was a major incentive to report -- for these
2 hospitals to report to the survey; is that
3 correct?

4 A. It's a very big deal to hospitals and a
5 major incentive to report to the survey. Yes --

6 Q. Right.

7 A. -- I wrote that here.

8 Q. And it would be a major -- it is a major
9 incentive for these hospitals to report to the
10 survey because they would face a higher risk of
11 receiving a low grade if they did not report; is
12 that right?

13 A. Not necessarily.

14 Q. But that was behind your comment here
15 that it would be a major incentive for hospitals
16 to report to the survey; is that right?

17 A. For some hospitals to report to the
18 survey because, if they do well -- particularly I
19 think he was at a conference where he was
20 speaking about hand hygiene, so he was going to
21 be speaking to hospitals that are very actively
22 involved in hand hygiene work. And so to that

1 audience, they would want to be able to report
2 that performance so they would -- you know, that
3 would help their grade.

4 For a lot of hospitals, they -- reporting
5 to the survey doesn't help their grade because
6 they don't do well.

7 Q. Okay. But that was -- that was one of
8 the kind of effects -- right? -- of this change
9 in the methodology that more hospitals would
10 respond to the survey, correct?

11 MS. BLAIR: Objection to form.

12 THE WITNESS: It's potentially an effect,
13 but --

14 BY MR. CHUNG:

15 Q. Right.

16 A. -- potentially not an effect.

17 Q. And, in fact, that was a purpose of --
18 one of the purposes of the imputation methodology
19 change; isn't that right?

20 A. No, that wasn't --

21 MS. BLAIR: Objection to form.

22 THE WITNESS: -- the purpose of the

1 methodology change.

2 BY MR. CHUNG:

3 Q. Well, does -- okay. Just to summarize,
4 Leapfrog assigns the limited achievement score
5 for a non-participating hospital on the imputed
6 metrics under this methodology change; is that
7 right?

8 A. Well, what I didn't say in this
9 paragraph was that there's also the -- if they
10 report -- you know, there's a step 1 where, if
11 they report in the prior year, they can get
12 scored from the prior year survey.

13 I didn't -- so I didn't go into the
14 details of it. I did tell him to go to the
15 survey team and get briefed and get the
16 information.

17 Q. Right. And you actually told him, be
18 sure you thoroughly understand this change,
19 correct?

20 A. Exactly.

21 Q. All right. But in this e-mail, you're
22 telling him that those that don't report to the

1 survey this year or last year will be assigned
2 the lowest score on hand hygiene, right? There's
3 no mention of the step 1 here, correct?

4 A. I didn't go into the full details of the
5 methodology. I told him to go and get that
6 information to make sure it's accurate.

7 Q. And your testimony is that it was not a
8 purpose at all behind the change in the
9 imputation methodology to encourage more
10 hospitals to respond to the survey. Not at all.

11 A. The purpose was to not overinflate -- you
12 asked me if --

13 Q. If you can answer the question. All
14 right?

15 Are you testifying that it was not a
16 purpose at all -- right? -- whether it's one of
17 the purposes or the purpose, to encourage
18 hospitals to report to the survey?

19 MS. BLAIR: Object to form.

20 THE WITNESS: We always want hospitals to
21 report to the survey. Like a hundred percent
22 participation in the survey. But that was not

1 the reason that we set out to change this
2 methodology.

3 BY MR. CHUNG:

4 Q. Okay. But did it at least become a
5 purpose or a reason to use this methodology?

6 MS. BLAIR: Objection to form.

7 THE WITNESS: No.

8 BY MR. CHUNG:

9 Q. So your -- the organization's desire to
10 have as many hospitals participate in the survey
11 as possible is completely divorced from this --
12 from the change in imputation methodology. They
13 have no relationship to each other whatsoever; is
14 that right?

15 MS. BLAIR: Objection. Form.

16 THE WITNESS: You're saying the
17 imputation methodology has no relationship to the
18 survey participation?

19 BY MR. CHUNG:

20 Q. I'm asking you, based on your testimony
21 so far, are you saying that there is absolutely
22 no relationship, no connection, between

1 Leapfrog's wish to have as many hospitals
2 participate in the survey as possible and the
3 change in this imputation methodology.

4 A. Certainly they're related. Absolutely
5 they're related. I just said they're related.
6 But it's not the purpose of changing the
7 methodology.

8 Q. Right. Despite your saying to Mr. Alper
9 that it's a -- the change in methodology is a
10 major incentive for hospitals to report to the
11 survey, correct?

12 A. That was the implication of this change,
13 but that was not the purpose of the change to the
14 methodology.

15 Q. Let's put it another way: Was it
16 contemplated, was it expected -- was it
17 contemplated that, in coming up with this
18 imputation methodology change, that it would be a
19 major incentive for hospitals to respond to the
20 survey?

21 MS. BLAIR: Objection to form.

22 THE WITNESS: It wasn't the purpose. I

1 mean, it wasn't the centerpiece or the purpose.
2 That wasn't what prompted it; that wasn't the
3 purpose.

4 BY MR. CHUNG:

5 Q. No, my question was, did Leapfrog
6 contemplate that the change in methodology, this
7 new methodology, would be a major incentive for
8 hospitals to report to the survey?

9 A. Yeah, we looked at it. We looked at that
10 issue. Certainly. It's right here. Definitely
11 looked at it.

12 Q. Okay. Are you aware of criticisms from
13 various hospitals about the change in the
14 imputation methodology?

15 A. I'm aware of hospitals critical on --
16 about the change from both a positive and a
17 negative way.

18 Q. Are you aware of criticisms from
19 hospitals that the change was unnecessarily
20 punitive?

21 A. I believe there were a couple of public
22 comments to that effect.

1 Q. Are you aware that there have been
2 criticisms from hospitals that it was penalizing
3 hospitals with insufficient resources?

4 A. I don't recall a particular public
5 comment to that effect, but there may have been
6 one.

7 Q. Okay. How about criticisms that the
8 public, the consumers, would not understand nor
9 dig into the change in methodology? Are you
10 aware of any criticisms along those lines?

11 A. That I'm not aware of.

12 Q. Okay. Are you aware of any criticisms
13 that hospitals -- from hospitals that the change
14 in methodology would cause hospitals with
15 insufficient resources to complete the survey?

16 A. It would cause hospitals with
17 insufficient resources to complete the survey?

18 Q. To divert -- to divert resources toward
19 complete the survey.

20 A. No, I haven't heard that criticism.

21 Q. All right. Have you heard the criticism
22 that, according to this imputation methodology,

1 that hospitals would be falsely represented with
2 a lower grade?

3 A. I have heard that criticism in public
4 comments.

5 Q. Okay. How about criticisms that the
6 change in methodology would result in an
7 inaccurate portrayal of the actual status of
8 patient safety at a hospital?

9 A. I've heard that comment from hospitals
10 that report to the survey as well as those that
11 don't.

12 Q. Okay. Do you recall, from your June 2024
13 CEO report that we saw before to the board, that
14 the change in the imputation methodology should
15 have some impact on hospital participation in the
16 survey?

17 Do you remember that comment?

18 A. Yes.

19 Q. All right. Are you aware that there is
20 not a single non-participating hospital in
21 Florida that received an A during the spring 2024
22 grade release?

1 A. In the State of Florida?

2 Q. Yes.

3 A. Yes.

4 Q. Okay. So you're aware of no A-hospitals
5 that were non-participants, correct?

6 A. In the State of Florida. Florida has a
7 high participation rate in general.

8 Q. Okay.

9 (Binder Deposition Exhibits 21 and 22
10 marked for identification and attached to
11 the transcript.)

12 BY MR. CHUNG:

13 Q. So Exhibits 21 and 22.

14 MS. BLAIR: Are you done with 20?

15 MR. CHUNG: Yes.

16 MS. BLAIR: Okay.

17 BY MR. CHUNG:

18 Q. So if you can look first, Ms. Binder, at
19 Exhibit 22, which is the standalone letter from
20 you to Kenneth Sands at HCA.

21 Do you see that?

22 A. Yes. I see that.

1 Q. All right. So directing your attention
2 to the fourth paragraph that starts, Our
3 successful partnership.

4 Do you see that?

5 A. Yes.

6 Q. All right. Our successful partnership is
7 why this letter is particularly difficult to
8 write. Unfortunately, you are no longer
9 qualified to serve on Leapfrog's hospital
10 advisory committee.

11 A. Right.

12 Q. And then, in the next sentence, you
13 write, Because of the board requirements, members
14 of the committee have to come from basically
15 hospitals that have participated in the most
16 recent survey; is that right?

17 A. Yes.

18 Q. Okay. And because HCA hospitals did not
19 participate in the 2023 survey, you're no longer
20 eligible.

21 A. Correct.

22 Q. So is it correct that because HCA did not

1 participate in the 2023 survey, Dr. Sands was not
2 allowed to serve on the hospital advisory
3 committee?

4 A. I'm trying to think if it's '23 or '24.
5 Probably '23 survey --

6 Q. Yeah.

7 A. -- that we would have written on
8 March 29th. Yeah, sounds right.

9 Q. Okay. So why was it necessary to remove
10 him from the committee?

11 A. Well, Leapfrog has a hospital advisory
12 committee that actually is competitive to get on.
13 A lot of hospitals submit nominations to get
14 themselves onto that committee. It is -- advises
15 Leapfrog and our board on -- as I said earlier,
16 about hospital industry trends in quality and
17 safety, long-term issues that they would advise
18 us to be looking forward to.

19 It's just a very important committee to
20 us and it's a very important committee, I think,
21 to hospitals just from the nominations we get.

22 So this letter -- the members of the

1 hospital advisory committee are hospitals -- are
2 from hospitals that report to the Leapfrog
3 hospital survey.

4 Q. So why was it necessary to remove
5 Dr. Sands from that committee?

6 A. Because his hospital system, all of them
7 stopped reporting to the Leapfrog survey in the
8 prior year.

9 Q. Okay. So was this a way of kind of
10 penalizing HCA for not participating in the
11 survey the prior year?

12 A. No, it's not penalizing. It's just
13 saying you're no longer. He's not qualified. We
14 want -- our hospital advisory committee should be
15 hospitals that participate in the survey.
16 Hospitals that don't participate clearly don't
17 want to be part of Leapfrog, but we certainly
18 welcome them if they want to participate in the
19 survey. But those are the folks that we need to
20 be working closely with.

21 Q. Okay.

22 MR. CHUNG: All right. This will be

1 Exhibit 23.

2 (Binder Deposition Exhibit 23 marked for
3 identification and attached to the
4 transcript.)

5 BY MR. CHUNG:

6 Q. So Exhibit 23, Ms. Binder, is a Slack
7 chat from October 4 of 2023 between Alexandra
8 Campione and Paige Lipscomb, who are both
9 employees of Leapfrog; is that right?

10 A. Paige is a former employee. But yes,
11 they were at the time.

12 Q. Okay. And I want to direct your
13 attention to page 2, Bates ending 0361.

14 A. I don't believe I've seen this one. I'm
15 going to need to read it.

16 Q. Okay. You're not on this chat. You're
17 not --

18 A. Right.

19 Q. It's just between the two ladies.
20 And so Paige writes, Why are convos so
21 bizarre?

22 Alex responds, This was the last meeting,

1 in a nutshell.

2 And then Alex continues, We were talking
3 about changing the scoring methodology to
4 penalize HCA?

5 So HCA refers to HCA Healthcare; is that
6 right? Or the HCA group of hospitals?

7 A. HCA Healthcare. Yes. The group.

8 Q. And these are hospitals, the HCA
9 hospitals, that had participated in the Leapfrog
10 surveys in the past, right?

11 A. Yes.

12 Q. Okay. But --

13 A. And they do now.

14 Q. But per the letter we saw earlier from
15 Dr. -- to Dr. Sands, they had stopped -- they had
16 not participated in the 2023 Leapfrog survey; is
17 that right?

18 A. I believe it was the '23. They paused
19 participation for one year.

20 Q. Right. And I think they eventually
21 rejoined, right? Or responded to surveys in the
22 future?

1 A. Yes. They've -- yes.

2 Q. Okay. Why would the new scoring
3 methodology here penalize HCA?

4 A. I don't know.

5 Q. Okay. Well --

6 A. I can tell you why HCA -- why they paused
7 participation, because they told me.

8 Q. Okay. Well, let's finish with this
9 document here and then we will get into that.

10 A. Okay.

11 Q. So Ms. Lipscomb, Paige, writes, I hate
12 that we don't do our ting -- or thing -- like we
13 manipulate everything.

14 Is it fair to say that she's referring to
15 the scoring methodology that Ms. Campione had
16 just mentioned?

17 MS. BLAIR: Objection to form.

18 THE WITNESS: I really don't know. I
19 haven't seen this before and I don't know.

20 BY MR. CHUNG:

21 Q. Okay. And then Ms. Campione responds,
22 Leah keeps grudges.

1 Do you think that she is referring to
2 you?

3 A. Yeah.

4 Q. Okay. And --

5 A. I'm not sure -- yeah.

6 Q. And what grudges is she talking about
7 here, so far as you understand it?

8 A. I have no idea.

9 Q. Is it a grudge --

10 A. I don't keep grudges.

11 Q. Is it a grudge -- you do not keep
12 grudges?

13 A. No.

14 Q. Okay. Is it a grudge against HCA for not
15 participating in the survey in 2023?

16 MS. BLAIR: Objection to form.

17 THE WITNESS: I don't know what she's
18 referring to.

19 BY MR. CHUNG:

20 Q. Okay. Well, you had just -- you
21 eventually, some months later, removed Dr. Sands
22 from the hospital advisory committee, correct?

1 A. He was no longer eligible to be on it, so
2 yes, I told him he cannot be on it --

3 Q. Right.

4 A. -- in a letter that was quite
5 conciliatory and open.

6 Q. But -- and then, during that same time,
7 the -- Leapfrog was discussing or contemplating a
8 change in the imputation methodology, correct?

9 A. Same time as what?

10 Q. As the time when you removed Dr. Sands
11 from the hospital advisory committee.

12 A. I don't recall --

13 MS. BLAIR: Objection to form.

14 THE WITNESS: -- the date.

15 BY MR. CHUNG:

16 Q. Okay. The -- you mentioned --

17 A. Something around there.

18 Q. The requirements to be qualified on the
19 hospital advisory committee, Ms. Binder, are
20 those enumerated somewhere? Memorialized
21 somewhere?

22 A. I'm sure there are.

1 Q. Okay. Where would they be memorialized?

2 A. In the file for the hospital advisory
3 committee, probably from whenever it was formed.
4 We've always opened it up to representatives from
5 hospitals that report to the survey.

6 Q. So what did you refer to -- it sounds
7 like you're not sure if or where it's
8 memorialized.

9 What did you refer to when removing
10 Dr. Sands from the hospital advisory committee?
11 What document containing the qualifications were
12 you relying on?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: I don't have it in front of
15 me, but we have lots of documents that discuss
16 the hospital advisory committee, its purpose, why
17 it was formed, why the board formed it, and who's
18 on it. And it does say that it is hospitals that
19 report to Leapfrog. It talks about there needs
20 to be, you know, a range of members from
21 different parts of the country from different
22 size of hospitals, from different roles within

1 hospitals. It's quite explicit about that.

2 I mean, we've had a lot of documents like
3 that --

4 BY MR. CHUNG:

5 Q. Okay.

6 A. -- but I obviously can't pull them out
7 right now.

8 Q. So just going back to the Slack chat that
9 we just discussed between Ms. Lipscomb and
10 Ms. Campione.

11 Do you recall any discussions with either
12 of them about penalizing HCA for not
13 participating in the 2023 survey?

14 A. I'm sorry, can you say that again.

15 Q. Yeah. Do you recall any discussions or
16 conversations you had with Ms. Lipscomb or
17 Ms. Campione around this time about punishing or
18 penalizing HCA for not responding to the 2023
19 survey?

20 A. No. I don't talk about penalizing
21 anyone.

22 Q. Okay.

1 A. And certainly not hospitals. That's not
2 my -- that's not language I use.

3 Q. HCA, the -- HCA Healthcare is a
4 relatively large group of hospitals; is that
5 correct?

6 A. Yes.

7 Q. So they were -- until he was removed,
8 HCA, would you say, is among the bigger kind of
9 hospital systems that were -- that participated
10 in the survey?

11 A. Among participants in the survey, I think
12 they would be among the larger ones, I guess.
13 But in general, they're a very large health
14 system.

15 Q. Okay. So when they declined or did not
16 participate in the 2023 survey, did you view that
17 as kind of a loss to Leapfrog in terms of
18 hospital participation in the survey? Just given
19 the relative size.

20 A. Yeah. I mean, in terms of the hospital
21 participation numbers, it was maybe, like, a
22 3 percent drop for the year. But that's not

1 definitive of anything. I mean, I certainly
2 would want -- what I really wanted was HCA to
3 continue to participate because they had a
4 hundred percent participation for many, many
5 years, and, you know, we were very proud of them
6 for that.

7 Q. Did it upset you when they told you that
8 they weren't going to participate in the 2023
9 survey?

10 A. It was -- sure. I was very disappointed.
11 Because, again, they've been participating every
12 year at a hundred percent. And it's also been,
13 for me, inspiring that they participate like that
14 because they participate even though some of
15 their hospitals don't actually do that well in
16 the survey, but they're publicly reporting;
17 they're transparent to me. That is just a really
18 inspiring sign that the hospital industry
19 believes in transparency and really wants to do
20 something about patient safety.

21 So for me, they were inspirational. They
22 were an important player.

1 In terms of participation in the survey,
2 it caused a slight drop, but it wasn't anything
3 noticeable in terms of any -- it was noticeable
4 but it wasn't a big deal in terms of
5 participation. But in terms of our mission and
6 inspiration and really wanting role-model
7 hospitals involved in the survey, it was
8 disappointing.

9 Q. So was their declining to participate in
10 2023 one of the reasons that Leapfrog decided to
11 change its imputation methodology?

12 A. No.

13 Q. Okay. Did you, in fact, hold a grudge
14 against HCA for this period of time for not
15 participating in the survey?

16 A. No.

17 Q. Disappointed, but not a grudge?

18 A. Right. I talked to them a few times. I
19 actually met with them and -- to find out -- to
20 understand what the suspension was. I know what
21 it was. They told me what it was repeatedly, and
22 that is that they did not like the new measure on

1 the Leapfrog hospital survey on nursing
2 workforce, which was causing -- they felt could
3 cause them some problems with some unions.

4 So they, you know, had said they wanted
5 us to take that off or reframe that question,
6 et cetera. We did not do that in the end and --
7 because we are independent, we didn't do it. And
8 they still came back, which -- to their credit.

9 Q. Okay.

10 A. But that is the sole reason that they
11 suspended their participation, at least according
12 to them.

13 Q. Okay. Just one moment.

14 We're now going to move on to the
15 websites, Leapfrog's websites, that is. And
16 that's one of the topics that you've been
17 designated to testify as a representative from
18 Leapfrog.

19 A. Yes.

20 Q. How many websites does Leapfrog operate?

21 A. Two.

22 Q. Two. And those are --

1 hospitalsafetygrade.org is one of them, and then
2 the second one is leapfroggroup.org?

3 A. Yes.

4 Q. Is there another one called ratings.org?

5 A. Ratings.org is incorporated into
6 leapfroggroup.org.

7 Q. Okay. Do you know roughly how many views
8 each of these websites receives annually?

9 A. Yes. Since I prepared because I am the
10 34 -- what is it? 340(b)? Is that what I'm
11 called?

12 MS. BLAIR: 30(b)(6).

13 MR. CHUNG: 30(b)(6).

14 THE WITNESS: 30(b)(6), sorry.

15 Okay. So The Leapfrog Group website got
16 915,000 views from September 24 to September 25.

17 The Hospital Safety Grade website got 2.5
18 million in that same time period.

19 BY MR. CHUNG:

20 Q. Okay. Ms. Binder, so the notebook in
21 front of you contains -- is it notes to kind of
22 aid your testimony here today?

1 A. To prepare, yeah --

2 Q. Okay.

3 A. -- for things I thought you would ask me,
4 particularly around -- in my role as
5 spokesperson --

6 MR. CHUNG: We're going to ask your
7 counsel to make a copy of those --

8 MS. BLAIR: Absolutely.

9 MR. CHUNG: -- and produce thereafter.

10 THE WITNESS: Happy to do that.

11 MS. BLAIR: Absolutely.

12 BY MR. CHUNG:

13 Q. Okay. Are you aware that, upon a Google
14 search of the words "hospital safety grade,"
15 these are the two top website hits that come up:
16 Hospitalsafetygrade.org first and then followed
17 by leapfroggroup.org?

18 A. I think it depends on who's Googling.
19 Right? But --

20 Q. Do you know?

21 A. Usually I see leapfroggroup first, but --
22 I don't know.

1 Q. Okay.

2 A. One of them.

3 Q. Do either or both of Leapfrog's
4 websites -- those two -- provide an explanation
5 of Leapfrog's methodology behind its scoring?

6 A. I'm confused. So -- which one? Which
7 scoring?

8 Q. The scoring methodology.

9 A. For what? For the safety grade or for
10 the hospital -- the survey? Or --

11 Q. The hospital safety grade.

12 A. So do either of the websites offer --

13 Q. An explanation --

14 A. -- of the scoring --

15 Q. -- of that scoring --

16 A. -- of the --

17 Q. -- methodology.

18 A. -- hospital safety grade? The Hospital
19 Safety Grade website has the methodology spelled
20 out, and it has links to the methodology in
21 numerous places on the website.

22 Q. Okay. And the methodology is the

1 18-or-so-page methodology document?

2 MS. BLAIR: Objection to form.

3 THE WITNESS: The methodology document
4 is -- I don't know how many pages it is, but it's
5 the document that's on the website.

6 BY MR. CHUNG:

7 Q. Okay. Has Leapfrog ever received
8 feedback from members of the public that the
9 scoring methodology for the hospital safety grade
10 is difficult to understand?

11 A. I don't recall any -- I don't recall
12 anybody complaining about that.

13 Q. Okay. Have either or both of the
14 websites been assessed by a low literacy or a
15 digital literacy expert?

16 A. The hospital safety grade website, yes,
17 has been.

18 Q. When was that?

19 A. When we launched it in about 2014.

20 Q. Okay.

21 A. And then it's -- every year periodically
22 we assess it ourselves and -- to see the literacy

1 level that the site is appearing at.

2 Q. How do you assess it yourself?

3 A. You can -- you can run through a series
4 of questions about the literacy level and figure
5 it out to be, like, eighth grade or something, I
6 think, was the last one.

7 Q. Who does that from Leapfrog?

8 A. Trying to -- I think our communications
9 team looks at it.

10 It's not a -- they're not experts in low
11 literacy, so we don't have the funds to do a full
12 expert analysis, but it was designed by a low
13 literacy expert, who then taught us how we can
14 assess our site to make sure that it continues to
15 function at that level.

16 Q. Has an expert reviewed either or both of
17 the websites after the fall 2024 imputation
18 methodology change?

19 MS. BLAIR: I'm just going to object to
20 form. If you're asking about the expert in this
21 litigation or just any --

22 MR. CHUNG: Any expert.

1 MS. BLAIR: Oh.

2 BY MR. CHUNG:

3 Q. A literacy or a digital -- low literacy
4 or digital literacy expert.

5 A. Well, for this litigation, we did have a
6 digital literacy expert --

7 Q. Apart from this litigation, sorry.

8 MR. CHUNG: Thank you.

9 THE WITNESS: Apart from when we founded
10 it in 2014?

11 BY MR. CHUNG:

12 Q. Correct.

13 A. No.

14 Q. Okay.

15 MR. CHUNG: Let's get the next couple of
16 exhibits.

17 (Binder Deposition Exhibits 24 and 25
18 marked for identification and attached to
19 the transcript.)

20 BY MR. CHUNG:

21 Q. All right. So Ms. Binder, the next
22 couple of exhibits, which are Exhibits 24 and 25,

1 are just -- they're printouts from the
2 leapfroggroup.org website.

3 Do they look familiar to you?

4 A. Yes.

5 Q. Okay. Terrific.

6 Now, on the Leapfrog -- just looking at
7 Exhibit 24 first -- all right?

8 A. Okay.

9 Q. And that's a screenshot of Delray Medical
10 Center's entry, right, or page from the
11 leapfroggroup.org website.

12 Do you see that?

13 A. It's a pop-up.

14 Q. Pop-up. Yes. Exactly.

15 And so on The Leapfrog Group website,
16 Leapfrog immediately shows a pop-up box, right,
17 notifying a user when a hospital has declined to
18 respond to the survey; is that right?

19 A. Yes.

20 Q. And when it says, Declined to respond,
21 what does that mean?

22 A. They declined to respond to the survey.

1 Q. Okay. And then you have to close out of
2 that pop-up box to view the information behind
3 it. Is that kind of the function --
4 functionality of the website?

5 A. I believe so.

6 Q. Okay. Now, turning to the next exhibit,
7 25, the next one in front of you.

8 A. Oh.

9 Q. And this is what the page on
10 leapfroggroup.org looks like for Delray Medical
11 Center after you've closed out the pop-up box; is
12 that right?

13 A. Yes.

14 Q. Okay. And then it shows -- this
15 page shows that Leapfrog does not have enough
16 information to rate the hospital, correct, on
17 each of the metrics; is that right?

18 A. It shows they declined to respond.

19 Q. Right. Are there any footnotes or
20 asterisks next to any of the metrics?

21 A. No.

22 Q. Okay. And then the webpage says that the

1 hospital, like you said, declined to respond next
2 to each and every one of those metrics, correct?

3 A. Right.

4 Q. And then -- but there's no safety grade
5 A, B, C, D, or F presented on the page, correct?

6 A. For the survey, we rate the
7 performance --

8 Q. The question is, is there a safety
9 grade --

10 A. No --

11 Q. -- present on the page?

12 A. -- because we don't grade on the survey.

13 Q. Okay. So let's turn to the next couple
14 of exhibits.

15 MR. CHUNG: This will be 26.

16 (Binder Deposition Exhibit 26 marked for
17 identification and attached to the
18 transcript.)

19 BY MR. CHUNG:

20 Q. Now we're going to turn to pages from the
21 other website, hospitalsafetygrade.org website.

22 A. Yes.

1 Q. Do you recognize that kind of snapshot?

2 A. Yes.

3 Q. Okay. Unlike on the leapfroggroup.org
4 website, this website does not immediately show a
5 pop-up box indicating that a hospital did not
6 provide data, right, to Leapfrog, correct?

7 A. Yes. Because we have data for this
8 hospital for the safety grade.

9 Q. All right. But for the -- but it doesn't
10 show -- well, it doesn't the same pop-up that we
11 see -- that we saw with the leapfroggroup.org
12 website, correct?

13 A. Right. Because no one responds to the
14 survey, so -- I mean, to the grade. So -- and we
15 have lots of measures to grade the hospital.

16 Q. Okay. So you chose not to do a pop-up
17 for the hospitalsafetygrade.org website?

18 MS. BLAIR: Objection to form.

19 THE WITNESS: A pop-up to say what?

20 BY MR. CHUNG:

21 Q. That the hospital did not respond to the
22 hospital survey.

1 A. Right. So we're not going to do a pop-up
2 since we have lots of measures on how this
3 hospital has done on patient safety.

4 Q. Okay.

5 A. So we don't need to say they declined
6 on --

7 Q. This webpage, though, shows a safety
8 grade for the hospital, right?

9 A. Yes.

10 Q. And in this case, an F for Delray; is
11 that right?

12 A. Yes.

13 Q. And then it shows a score for each of the
14 imputed metrics, correct? The four out of the
15 30 --

16 A. Uh-huh.

17 Q. -- imputed metrics? All right. Is that
18 a yes or no?

19 A. Yes. I'm sorry. Yes.

20 Q. And then there are these gas gauge scores
21 on --

22 A. Yes.

1 Q. -- this website.

2 And for the imputed metrics, like
3 handwashing, for example, they're set to the
4 lowest possible value, correct?

5 A. Yes.

6 Q. But they're not -- what you don't see
7 there is any sort of question mark with a decline
8 to report icon; is that right?

9 A. That's right.

10 Q. All right. But in fact, for those
11 imputed metrics, Delray, for example, declined to
12 report, right, those -- the metrics that normally
13 would be scored there, correct?

14 A. That's correct. And it's reported here
15 on the website.

16 Q. All right. And in fact, it's at the
17 bottom of the page, kind of below the fold, and
18 in footnotes, where Leapfrog discloses that the
19 hospital did not provide data to Leapfrog,
20 correct?

21 A. It's referenced through an asterisk
22 that's very large, and it's in red, so it's

1 pretty prominently displayed.

2 Q. Okay. So bottom of the page, correct?

3 A. Well, the asterisk is on the top of the
4 page, and the worst hospital score is also on the
5 top of the page.

6 Then the bottom of the page, which is
7 also fully on display on this page --

8 Q. Yes.

9 A. -- is in bright red type.

10 Q. Okay. And that footnote says, The
11 hospital declined to report their performance on
12 this measure, so a score was assigned to reflect
13 the lack of information available; is that right?

14 A. Yes.

15 Q. Okay. It doesn't say how that score was
16 assigned, does it?

17 A. That is how it was -- that's how it was
18 done. It was assigned.

19 Q. But my question is, it doesn't say how --
20 it says a score was assigned, correct?

21 A. That's how we got their score.

22 Q. But it doesn't say how the score was

1 assigned, correct?

2 MS. BLAIR: Objection to form.

3 THE WITNESS: That is how it was
4 assigned. That is how we got to the 15. It was
5 assigned. The hospital declined to report, so a
6 score was assigned to reflect the lack of
7 information available. That's how we got to 15.

8 BY MR. CHUNG:

9 Q. Okay. Let me put it another way.

10 That footnote does not explain or in any
11 way try to summarize, right, or distill the
12 imputation methodology by which the limited
13 achievement score was assigned for that metric,
14 correct?

15 MS. BLAIR: Objection to form.

16 THE WITNESS: That line does not describe
17 the imputation methodology, but it's certainly
18 well reported on the website.

19 BY MR. CHUNG:

20 Q. Is there a link to the survey methodology
21 next to this footnote anywhere?

22 A. I can't see below there, but no, not on

1 this page.

2 Q. Okay.

3 A. But there -- it's in plenty of other
4 places.

5 Q. So just kind of as an example for the
6 hand hygiene score, Delray here, for that imputed
7 metric, is it correct that they received a score
8 of 15? Is that right?

9 A. For --

10 Q. Actually --

11 A. It doesn't say --

12 Q. Actually, a -- doctors order medications
13 through a computer.

14 A. Yeah.

15 Q. That one, they were scored a 15, correct?

16 A. Yes.

17 Q. And that's the limited achievement score,
18 right?

19 A. Yes.

20 Q. Okay. And is that the CPOE score?

21 A. Yes.

22 Q. All right. And 15 is the worst possible

1 score; is that right?

2 MS. BLAIR: Objection to form.

3 THE WITNESS: It's the worst hospital
4 score.

5 BY MR. CHUNG:

6 Q. Yeah.

7 A. Those that report to the survey would get
8 a 15 if they did not meet the standard. It's an
9 extremely high standard.

10 Q. Does Leapfrog know that 15, this score,
11 is an actual reflection of Delray's CPOE score?

12 MS. BLAIR: Objection to form.

13 THE WITNESS: We imputed it based on
14 advice from the expert panel and our own
15 experience and knowledge of reporting on the
16 survey.

17 BY MR. CHUNG:

18 Q. Okay. Did Leapfrog or any of its
19 representatives visit Delray prior to issuing
20 this spring 2025 score?

21 A. No.

22 Q. And just --

1 A. We don't visit hospitals.

2 Q. And just -- you do not visit hospitals,
3 correct?

4 A. I don't personally visit hospitals
5 routinely.

6 Q. Okay.

7 A. Nor do most -- except to verify data, as
8 we described earlier. In our verification
9 process, we don't do routine visits. I actually
10 do a lot of visits in general with some of our
11 regional leaders to see hospitals.

12 Q. But for purposes of verifying data, no,
13 correct?

14 A. Right. No.

15 Q. All right. And then Leapfrog has not
16 received data from Delray on the CPOE metric,
17 correct?

18 A. Well, in the past we did.

19 Q. For purposes of this round.

20 A. No, we have not received data, nor have
21 they taken the test that we give hospitals that
22 report to the survey to determine if their CPOE

1 system is safe for their patients. That is an
2 intensive test that most hospitals, when they
3 first go in, don't pass. So we haven't had --
4 they haven't taken that test either.

5 Q. So does Leapfrog -- just standing here
6 today, does Leapfrog believe 15 is an accurate
7 score for Delray's CPOE?

8 MS. BLAIR: Objection to form.

9 THE WITNESS: We believe in the -- we
10 believe the imputation -- the imputation is the
11 most accurate information available on this
12 hospital's performance on this measure.

13 BY MR. CHUNG:

14 Q. So the question is, does Leapfrog believe
15 15 is an accurate score for Delray's CPOE?

16 MS. BLAIR: Objection to form.

17 THE WITNESS: We believe it is the most
18 accurate possible.

19 MR. CHUNG: Okay. This will be
20 Exhibit 27, Ms. Binder.
21
22

1 (Binder Deposition Exhibit 27 marked for
2 identification and attached to the
3 transcript.)

4 BY MR. CHUNG:

5 Q. Now, is -- this is an e-mail thread from
6 June of 2024.

7 Is this a discussion about the appearance
8 of the footnote on the Hospital Safety Grade
9 website?

10 A. I believe that's what it is. Yes.

11 Q. Okay. I'm going to direct your to
12 attention to page 3 of the document. It's Bates
13 ending 7865. It's an e-mail from Paulina Litter
14 to Ms. Campione.

15 And she asked about this language and she
16 writes, Maybe we can change it to say, so a score
17 was calculated using imputation for the measure.

18 Do you see that?

19 A. Yes.

20 Q. All right. And then in the preceding
21 page, Bates ending 7864, Ms. Campione responds,
22 That was the language Missy wanted, but Leah

1 wants something else that makes it sound like the
2 data we imputed wasn't random.

3 Is Ms. Campione correct that this is what
4 you wanted --

5 MS. BLAIR: Object to form.

6 BY MR. CHUNG:

7 Q. -- that you wanted something else that
8 makes it sound like the data we imputed wasn't
9 random?

10 A. The wording is off, but she was going in
11 the right direction in terms of what I expect in
12 terms of all public reporting efforts.

13 Q. So --

14 A. I don't believe the data is random, and I
15 wouldn't have used that word, but I do want
16 absolute clarity and bluntness for the public so
17 they understand that this data was not
18 calculated. I think that was what Paulina was
19 suggesting. And I didn't want that because that
20 would be an inaccurate assessment of what the
21 imputation was.

22 Q. Okay. Now I'm going to direct your

1 attention to page 1 of the document, Bates ending
2 7863.

3 And you see that Ms. Campione is
4 responding to suggestions for language from
5 Ms. Litter by explaining that we can't say
6 external data sources because we're arbitrarily
7 assigning them points associated with the bottom
8 scoring category.

9 And then she continues: Leah wants us to
10 make it sound like the expert panel approved it
11 and the assigning of these points was legitimate.

12 Do you agree with Ms. Campione that
13 Leapfrog's imputed metrics in this new
14 methodology did, in fact, assign the lowest
15 available score?

16 A. As step 2 we did.

17 Q. Right. Step 2.

18 A. And -- but it's not arbitrary. I don't
19 agree with the word "arbitrarily."

20 Q. She -- well, she used the word
21 "arbitrary," so --

22 A. I disagree with her use of the word

1 "arbitrary."

2 Q. Okay. Why do you disagree with her use
3 of the word "arbitrary"?

4 A. It wasn't arbitrary. It was very
5 well-thought-through.

6 Q. Right, but it is --

7 A. And very carefully vetted with experts
8 and 20 years of experience with hospital surveys
9 and hospitals.

10 So we put a lot of thought into how this
11 was done. It wasn't arbitrarily assigned.

12 Q. But it is a score, the limited
13 achievement score, that is automatically assigned
14 to --

15 A. No.

16 Q. -- non-participating hospitals, correct?

17 A. Yes.

18 Q. Okay.

19 A. Well, non-participating hospitals that
20 don't have any data to give us from the year
21 prior.

22 Q. Yeah. Always got to remember step 1.

1 A. Yes.

2 Q. And do you agree with Ms. Campione that
3 you wanted to make it sound like the expert panel
4 approved this methodology? Right?

5 A. Well, the wording on this is also
6 something -- you know, I wouldn't have -- it
7 isn't ideal, but it's what happens when people
8 are just quickly e-mailing each other. Because
9 it is, in fact, the case that the expert panel
10 approved this, and assigning these points was
11 completely valid.

12 So I -- but I also want our communication
13 of this to be clear to the lay public.

14 Q. Okay.

15 A. So I don't -- the wording here makes it
16 sound like I'm trying to fake something. I'm
17 not. I don't -- it's the opposite. I want us to
18 be very upfront and very clear with the public on
19 what we're doing and why we're doing it.

20 Q. Were your employees, like Ms. Campione,
21 concerned that Leapfrog was not being transparent
22 using this methodology?

1 A. Well, she's doing a very good job of
2 editing the language that would ultimately appear
3 on our website. I think she did a great job here
4 in working with Paulina to try to get at this
5 rather difficult-to-word statement to make
6 certain that it's clear and precise and that the
7 public can understand it. So she did a good job
8 with that.

9 Q. So putting the discussion aside, why
10 doesn't Leapfrog use the same disclosures related
11 to non-participating hospitals on both of the
12 websites, Hospital Safety Grade and Leapfrog
13 Group?

14 MS. BLAIR: Object to form.

15 THE WITNESS: The same which disclosures?

16 BY MR. CHUNG:

17 Q. Relating to non-participating hospitals.

18 A. So -- we do. We say declined to -- for
19 the measures that hospitals declined to respond
20 to, we put that on the safety grade website for
21 those measures. But those are a subset of the
22 many more measures that we are grading.

1 On the Leapfrog survey, it's everything,
2 because they don't respond to the entire survey.
3 So therefore, it's a different way of portraying
4 that message. But it is -- "declined to report"
5 is on both websites.

6 Q. Let me kind of slice it a little finer.

7 A. Okay.

8 Q. So given that the leapfroggroup.org
9 website doesn't have the grades for the
10 hospitals, the health safety grades for the
11 hospitals, nor does it show any imputation of
12 scores for those non-participating hospitals --
13 that's one, right? But on the other hand, the
14 hospitalsafetygrade.org website shows a hospital
15 safety grade for a hospital and, for a
16 non-participating hospital, shows the limited
17 achievement score -- right? -- for the imputed
18 metrics, isn't Leapfrog confusing visitors to
19 both websites about how it scores hospitals that
20 did not participate in the hospital survey?

21 MS. BLAIR: Objection to form.

22 THE WITNESS: We're doing the opposite.

1 We're being extremely blunt and extremely
2 transparent. We are showing all of the measures
3 that are used and -- to calculate the hospital
4 safety grade, of which the vast majority we do
5 have data from CMS for. And for those that we
6 impute, we're very blunt about that. You can see
7 it immediately.

8 Most -- in fact, I don't know of any
9 other public reporting ratings in healthcare that
10 offers that level of transparency of giving you
11 every single measure and how the hospital did on
12 every single measure.

13 So we are -- we go out of our way to be
14 extremely transparent.

15 BY MR. CHUNG:

16 Q. Okay. I'm not sure that's responsive to
17 the question.

18 Do you acknowledge that there are those
19 differences, however, for a non-participating
20 hospital, how they're presented between the
21 Hospital Safety Grade dot [sic] website and the
22 Leapfrog Group website?

1 MS. BLAIR: Objection to form.

2 THE WITNESS: Well, they're two different
3 things, so they're -- but the words "declined to
4 report" are applied appropriately.

5 BY MR. CHUNG:

6 Q. Okay. They're two different things.

7 A. Well, the survey is a voluntary survey
8 that they can choose not to participate in or to
9 participate in. If they decline, then we are
10 just saying, overall, they declined.

11 Whereas the hospital safety grade is 32
12 measures and, for most of them, we have data and
13 we are grading them.

14 Q. Has Leapfrog ever considered
15 standardizing the disclosures or the presentation
16 of information regarding non-participation --
17 non-participating hospitals between the two
18 websites?

19 MS. BLAIR: Objection to form.

20 THE WITNESS: I'm not really clear on
21 that. Can you --

22

1 BY MR. CHUNG:

2 Q. Yeah. Has Leapfrog ever considered
3 standardizing or harmonizing the disclosures
4 relating to non-participating hospitals between
5 the two websites?

6 MS. BLAIR: Objection to form.

7 THE WITNESS: So can you give me an
8 example of what you might mean by that?

9 BY MR. CHUNG:

10 Q. Do you -- let me put it this way. Do you
11 see any inconsistency between the two websites
12 with regard to how non-participating hospitals
13 are presented?

14 A. They are two different programs, so we
15 communicate performance of hospitals two
16 different ways. But we use the same term,
17 "declined to participate," as it applies to the
18 measures that we ask for in the survey. We do
19 that on the website for the survey and we do that
20 for the measures, applicable measures, on the
21 hospital safety grade.

22 Q. Okay. And is that clear -- are you -- is

1 that distinction made clear to the consumer?

2 A. It's clear on the website -- on the
3 Hospital Safety Grade website, it's very clear.

4 Q. Okay. How about on the leapfroggroup.org
5 website?

6 MS. BLAIR: Objection to form.

7 THE WITNESS: So --

8 BY MR. CHUNG:

9 Q. Let me put it this way: Is it your
10 expectation that a low literacy consumer --
11 right? -- visitor to the websites will understand
12 that distinction?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: They will understand
15 "declined to report" and they will understand,
16 for each of the measures, how we got them.

17 BY MR. CHUNG:

18 Q. Okay. But that would require -- that
19 would require this -- the low literacy consumer
20 to visit both websites, correct?

21 MS. BLAIR: Objection to form.

22 THE WITNESS: No. They can visit just

1 the Hospital Safety Grade website? Is that the
2 one you're focused on right now? Or which one do
3 you want me to answer to?

4 BY MR. CHUNG:

5 Q. Well, if they visited both websites --
6 right? -- is the expectation that they would --
7 they would not be confused -- right? -- by the
8 different information covered between the two
9 websites?

10 A. It's not different information, for one
11 thing. But the second thing is most -- the
12 Hospital Safety Grade website was designed for
13 the purpose of consumers doing their own personal
14 research. The hospital -- the leapfroggroup.org
15 has not been designed for consumers primarily.
16 It's designed for -- particularly for purchasers.

17 Q. But --

18 A. So they're designed for different
19 purposes. But that said, I think it's very clear
20 to anyone who visits those sites exactly where we
21 got the data, or didn't.

22 Q. Okay. I'm going to move on to another

1 topic. Leapfrog's revenue sources is topic 8
2 among the 30(b)(6) topics.

3 I think you testified earlier -- and you
4 can correct me if I'm wrong -- but the most
5 significant sources of data today, and for some
6 period of time, have been the accolade licensing
7 program and the data licensing program; is that
8 correct?

9 A. Not sources of data.

10 Q. Source -- I'm sorry, revenues.

11 A. Revenues.

12 Q. Revenue sources.

13 A. The largest source -- well, I testified
14 about -- you asked me about the first year of --
15 that I was at Leapfrog? I think.

16 Q. Yes. Well, let me just ask it another
17 way.

18 So are accolades licensing -- are the
19 accolades licensing and the data licensing
20 programs the two most significant sources of
21 revenue for the organization today?

22 A. Right now, those are the two largest

1 sources of revenue. Yes.

2 Q. Okay. Let's turn to -- and what,
3 generally speaking, has been the total revenue
4 for Leapfrog this past year?

5 A. It was around -- I think around
6 8 million.

7 Q. Okay. And has that -- has there been,
8 like, an increase over time since you've been
9 CEO? What's been the trend in terms of total
10 revenue?

11 A. The average increase in revenue has been
12 11.5 percent.

13 Q. So that's year over year, there's been an
14 increase of about 11.5 percent.

15 A. On average, yes.

16 Q. To what revenue sources do you attribute
17 that kind of year-over-year increase?

18 A. Really, all of them. We've had a major
19 increase in every single category of revenue.
20 But the largest bump came when we launched the
21 hospital safety grade and we began selling the
22 accolade license. So when hospitals get an A,

1 they can purchase -- for their own commercial
2 purposes, they're allowed to use the -- under
3 strict rules, they're allowed to use the A logo.

4 Q. Okay.

5 MR. CHUNG: Let's go to 27 and 27a.

6 Exhibit 28 and Exhibit 29.

7 (Binder Deposition Exhibits 28 and 29
8 marked for identification and attached to
9 the transcript.)

10 BY MR. CHUNG:

11 Q. So Ms. Binder, Exhibit 28 is an e-mail
12 chain from about April of 2024, and then there's
13 an attachment with some tables in it.

14 I'm going to be asking questions, really,
15 mainly about the e-mail, so if you want to take a
16 look at that.

17 A. Okay.

18 Oh, yeah. Okay. Yeah, I remember this.

19 Q. Okay. So who is Ben Choi?

20 A. He was an advisor on finance for Leapfrog
21 for about a year.

22 Q. Okay. Am I right that he was the interim

1 CFO for a period of time?

2 A. That was not his title, but he functioned
3 in some ways as a -- almost like a CFO. Maybe
4 not quite that significant a role, but he was --
5 he was the key finance person.

6 Q. Okay. And Josh Berlin, who is that?

7 A. Josh is the president of the consulting
8 firm that Ben came from. And Josh also has
9 consulted with us and advised us on sort of
10 different projects and strategies.

11 Q. Okay. Now, just turning to the second
12 page of the document, Bates ending 8279. Just
13 looking at Mr. Choi's e-mail to you, under
14 recommendation -- under realistic views, Mr. Choi
15 writes that they are forecasting to fall short on
16 top-line revenue by \$540,000.

17 Do you see that?

18 A. Yes.

19 Q. Okay. Then directing your attention to
20 the recommendations section toward the bottom of
21 the page --

22 A. Yes.

1 Q. -- he writes, Push really hard on
2 high-yield revenue opportunities.

3 And he lists membership, accolades,
4 annual meeting sponsorships.

5 Do you see that?

6 A. Yes.

7 Q. What does membership refer to here? Is
8 that the partners advisory committee?

9 A. Yes.

10 Q. Okay. And then accolades here refers to
11 what you testified to, the accolades licensing
12 program --

13 A. Yes.

14 Q. -- is that right?

15 All right. And then directing your
16 attention to the first page, you respond, If we
17 move toward cost reduction as the primary
18 strategy, it will be much more severe than this,
19 but I'm not going there for now. We can address
20 incremental spending issues, but let's not lose
21 focus on what managers should be thinking about
22 24/7, which is revenues.

1 Why do you want managers focused on
2 revenues 24/7? What is that comment?

3 A. So the survey and the hospital safety
4 grade are extremely expensive. They are -- and
5 from my perspective as the CEO of the
6 organization, I see them on the expense
7 line entirely. They are -- they're very, very
8 expensive to do them the way we do them, which is
9 first class.

10 So in order to maintain -- when you have
11 ups and downs and the exigencies of life, we will
12 not compromise on the integrity and the
13 excellence of our surveys and our hospital safety
14 grade. So my job is to make sure that we have
15 the funding to do that.

16 He talks about how we could cut staff
17 lunches or something like that. And I was like,
18 no, no, we've got to look at how we raise the
19 money that we need to maintain and sustain the
20 survey in a year when we had a contract that was
21 delayed that -- and another one that we canceled.

22 So there were just a couple of things

1 that were blips in the road. In the end, we
2 broke even at the end of the year. But I will
3 say that, for me, it was just we've got to raise
4 the money because we're not going to compromise
5 on the survey or the safety grade, which are
6 costs to us.

7 Q. All right. So the focus, just given the
8 expenses that you outline here, is that the
9 managers should be focusing on how to generate
10 revenues, correct?

11 A. They should -- everyone in the
12 organization, everyone in any nonprofit
13 organization, as to be thinking about fundraising
14 and revenue generating because that's how we
15 survive.

16 Q. Okay. And then you continue by saying
17 that you want managers focused on where they can
18 generate bookable revenues, and then you list a
19 number of bullet points, I think, are your ideas.

20 Do you see that?

21 A. Oh, yeah. Yeah.

22 Q. Okay. What do you mean by bookable

1 revenue?

2 A. Revenues that we -- that we can
3 incorporate into our statement at -- statements.

4 Q. Okay.

5 A. Bookable meaning, like, from an
6 accounting point of view, they are -- they meet
7 accounting principles for what we can -- what we
8 can recognize.

9 Q. Okay. And then you see there is a second
10 bullet point here: I have a nuclear strategy for
11 the CPOE report sales, which I will tell you
12 about tomorrow.

13 Are the CPOE reports part of the kind of
14 data licensing program?

15 A. They didn't exist then and they still
16 don't but -- well, not really. My thought had
17 been we have a lot of information on how
18 hospitals do on the CPOE test. We talked about
19 earlier where we test hospitals on how good a job
20 their systems do in alerting physicians to errors
21 that they may be making in their prescribing.
22 These are errors that would result in death or

1 really harm to the patient. It's a great test.

2 And my nuclear strategy, it turns out we
3 were already doing it. So actually, when I look
4 at it, I'm, like, oh, geez --

5 Q. Okay.

6 A. -- embarrassed because we already were
7 doing it. Which is -- I said, let's just give
8 the hospitals -- let's give them their own
9 results for free. Just give it out.

10 Q. So a few bullet points down, We should
11 plan for special discounts or sales, pushes
12 around accolade sales to get more in late May and
13 June.

14 What did you mean there?

15 A. Well, we issue safety grades twice a
16 year. So we issued -- when was this dated? So
17 we issued the update to the safety grade probably
18 right around the time -- probably after this,
19 somewhere around when this e-mail was written.

20 And when we're issuing the safety grade
21 update, that's when we sell to hospitals that get
22 an A. We offer them an opportunity to buy and

1 use their grade in their own, you know,
2 advertising or other commercial purposes.

3 So what I was suggesting is, let's have a
4 sale and discount -- let's try to really improve
5 the sales of the accolades for that particular
6 time period, given this is a challenging year.

7 Q. Okay. So it's through the use of
8 discounts and sales that you'll be pushing more
9 accolade sales during this time period; is that
10 right?

11 A. We would be -- I'm not sure what you mean
12 by pushing, but we would be offering discounts
13 to --

14 Q. I'm just using your language here.

15 A. I don't say pushing, do I?

16 Q. Pushes. Yeah.

17 A. Oh, okay --

18 Q. Special discounts.

19 A. Okay. Discounts and sales. Yeah,
20 discounts and sales strategy to try and improve
21 our sales on accolades.

22 Q. Okay. There is a -- expand marketing

1 around the certified coach program.

2 A. Uh-huh.

3 Q. Can you describe -- tell us what you were
4 referring to there?

5 A. Just do additional marketing to encourage
6 enrollment in the certified coach program.

7 Q. Okay. And this was another revenue
8 generator?

9 A. It was a strategy that we could think
10 about for generating more revenue.

11 Q. Okay. And can you -- how much -- what
12 are the fees or the charges associated with the
13 certified coach program?

14 A. I think it's, like, \$900 or something per
15 participant.

16 Q. Okay. And then the last bullet point,
17 There's a lot of attention to us around the
18 hospital safety grade release. How do we harness
19 that? More for marketing.

20 What did you mean there?

21 A. We get a lot of exposure and attention,
22 so we -- this would give us an opportunity -- for

1 instance, when we get a lot of exposure and
2 attention on anything we do, we'll get interest
3 in all of our programs. We'll suddenly start to
4 get interest in our partnership programs or our
5 annual meeting enrollments or registrations. It
6 just gins up a lot more interest. And we should
7 make sure we're strategic about that.

8 Q. And does that include more interest
9 around the hospital safety grade -- the accolade
10 licensing program as well?

11 A. Oh, yeah.

12 Q. Okay. And for the data licensing
13 programs as well?

14 A. Yeah, we usually get inquiries to the
15 data licensing program if we get a lot of
16 attention.

17 Q. Okay. And as part of that -- the -- part
18 of the marketing strategy that -- with the
19 release of hospital safety -- hospital safety
20 grades, is part of the marketing strategy to --
21 to let the public know how many hospitals have
22 received hospital survey grades -- hospital

1 safety grades, I'm sorry?

2 A. We don't market the hospital safety grade
3 to the public.

4 Q. Okay. Do you --

5 A. We publi- --

6 Q. How is that?

7 A. Well, we publicize it.

8 Q. What's the --

9 A. That's different.

10 Q. -- difference between marketing and
11 publicizing?

12 A. Well, marketing is when you run an ad or
13 you send out an e-mail that's from you saying,
14 you know, buy this, or something like that.

15 PR is when you go to the press and you
16 say, here's a great story, and they cover it on
17 their own. So it's different.

18 Q. Am I right that you have a vendor -- a
19 marketing or a telemarketing vendor called
20 TelAffects?

21 A. Yes.

22 Q. That assists you on various marketing; is

1 that right?

2 A. Yes.

3 Q. Right? And --

4 A. Well, no, on accolade sales.

5 Q. Right. And so TelAffects does market the
6 hospital safety grade program, correct?

7 A. Yes. Yes.

8 Q. Right. So it's not just publicizing the
9 hospital safety grade program; they actually do
10 market the hospital safety grade program; is
11 that --

12 A. They don't publicize it. They market.
13 And they're kept at arm's lengths from us for
14 that very reason. We on the Leapfrog side, and
15 with our PR firm, we publicize it; we try to get
16 conversations going about patient safety and
17 awareness around patient safety and the
18 importance of it. That is -- and that's central
19 to our mission as well.

20 Q. But TelAffects works for Leapfrog,
21 correct?

22 A. Yes.

1 Q. You pay TelAffects to market it, the
2 accolade licensing program.

3 A. Yes. We're really proud of that program.
4 It's very successful. And it's accomplished --
5 what's great about it is that it raises money for
6 us, which is very important, because we don't
7 survive without that. No money, no mission, if
8 you've ever heard that phrase.

9 But at the same time, even as it's
10 raising money for us, it's serving the mission
11 directly. Because when hospitals advertise an A
12 and tout their record on patient safety, both
13 externally to their community and internally to
14 their staff and their -- often they'll use it,
15 for instance, for nurses week. When they do
16 that, we are calling attention to the importance
17 of patient safety in brand new ways, and it's, I
18 think, it's very powerful and something that
19 we're proud to see happening.

20 Q. And when the hospitals tout their
21 grades -- typically it's an A grade that they
22 tout, right?

1 A. Yeah. Usually.

2 Q. And that's actually -- when hospitals do
3 that, that's actually good for Leapfrog's brand
4 as well.

5 Would you agree with that?

6 A. Yeah.

7 Q. Okay.

8 A. Well, it's mostly good for our mission.

9 Q. Right. Well -- okay.

10 And would it be fair to say that the more
11 hospitals that -- tout their grades, the better
12 it is for Leapfrog's brand?

13 A. I've never thought of it that way, but
14 maybe.

15 Q. Okay. I mean, that goes hand in hand
16 with -- you've testified to this at least a few
17 times already, that it's -- Leapfrog wants as
18 many hospitals to participate in the survey as
19 possible, correct?

20 A. Well, that's a different -- that's a
21 different issue.

22 Q. Right.

1 A. Because the hospital safety grade is
2 different. We give a grade to every hospital
3 that's qualified, for one, regardless of whether
4 they report to the survey. So it's a separate
5 issue.

6 Q. Right. But hospitals -- for those that
7 choose to respond, hospitals that respond to the
8 hospital survey, that data is used -- it's not
9 the only source of data -- is used to generate a
10 hospital safety grade for that hospital, correct?

11 A. It's certainly part of their grade. Yes.

12 Q. Okay.

13 A. And that's good or bad. So if they don't
14 do well on the survey -- which is a high bar, so
15 a lot of hospitals don't do well -- it could have
16 caused them to have a lower grade.

17 Q. Okay.

18 MR. CHUNG: Let's go to tab 28b.

19 Exhibit 30.

20 (Binder Deposition Exhibit 30 marked for
21 identification and attached to the
22 transcript.)

1 BY MR. CHUNG:

2 Q. So Ms. Binder, Exhibit 30 is a document
3 entitled, Leapfrog long-range strategic intent
4 for fiscal year 2026 to '32.

5 A. Yes.

6 Q. Board approved, September 2024.
7 Have you seen this document before?

8 A. Yes, I have.

9 Q. Okay.

10 A. The part that's board approved is the
11 first page.

12 Q. All right. Were you involved in putting
13 together this document?

14 A. Yes.

15 Q. All right. Now, if you turn to the
16 second page, Bates ending in 7794, you'll see
17 that, up top, objective 1 is to scale resources
18 to the capacity needed to make giant leaps for
19 patient safety and stop avoidable death and
20 suffering.

21 Do you see that?

22 A. Yes.

1 Q. And then, within that first objective,
2 there are a series of goals underneath, correct?

3 A. Yes.

4 Q. In the left-hand column. It says goal up
5 top.

6 A. Right, right.

7 Q. Yeah. And then the first, quote/unquote,
8 goal is to expand revenue from existing sources,
9 and then it goes through a series of revenue
10 sources, correct? Is that right?

11 A. Yes.

12 Q. Okay. So increasing Leapfrog's revenue
13 is at least the first mentioned goal behind this
14 objective, right?

15 A. Yes.

16 Q. All right. So under that, there are a
17 number of benchmark indicators there. Just
18 looking through, are those still accurate in
19 terms of the revenue?

20 A. These -- the benchmark indicators were
21 not actually finalized, so -- but they're
22 relatively accurate.

1 Q. Okay. How are they determined?

2 A. They were proposed by the management
3 team. We asked them to look at this, and then we
4 had an iterative process to consider at the
5 senior management team.

6 But as I said, I don't believe they're
7 final. In fact, I know that they're not final.

8 Q. Okay. Are these goals, the benchmark
9 indicators, are they communicated to Leapfrog
10 staff? Are they communicated to Leapfrog staff
11 generally?

12 A. We shared -- again, I don't know if this
13 is the final benchmark indicator as I look at it,
14 but we share whatever the board approves or the
15 board determines, yes.

16 Q. Okay. They may not be final, but I think
17 your testimony is that they're generally what you
18 understand the relevant benchmarks to be,
19 correct?

20 A. Relatively, yes.

21 Q. All right. So we've got September 2025,
22 \$9 million in revenue. And then, three years

1 later, a benchmark of 12 million. And then,
2 three years later for 2031, a benchmark of
3 \$18 million.

4 Do you see that?

5 A. Yes.

6 Q. Okay. How do these goals, the benchmark
7 indicators, influence -- you know, going up
8 3 million -- roughly 3 million per year, how do
9 they influence how you approach changes to the
10 hospital safety grade program?

11 MS. BLAIR: Objection to form.

12 THE WITNESS: I don't think of those in
13 the same way. So as I said, the hospital safety
14 grade program is expensive. So what -- the
15 influence I see is raising money to be able to
16 sustain it and do it in better and better ways.

17 BY MR. CHUNG:

18 Q. Right. And the safety -- if the hospital
19 safety grade program is -- actually, let me put
20 it another way.

21 How do these -- how do these goals
22 influence how you approach the accolade licensing

1 program, given that it's, you know, the most
2 significant revenue source?

3 A. Well, I think if you look at the goal
4 itself, we've talked about having less dependence
5 on accolade revenue as a percent of overall
6 revenue.

7 Q. Right.

8 A. Our board believes strongly in the
9 program and that it is serving our mission to
10 have the accolade program, that it's very
11 successful in terms of raising money. But they
12 want us to have other -- just diversify our
13 revenue sources over time so that we are less
14 dependent on that one source.

15 Q. Okay. Let's move on to -- if you look at
16 objective 3. So this goes to page -- the Bates
17 ending 7797.

18 A. Okay.

19 Q. Okay. And then you'll see, under the
20 goal here, the general public create
21 communication strategies that make the hospital
22 safety grade and Leapfrog itself household names.

1 Do you see that?

2 A. Yes.

3 Q. Okay. And so that's -- is another way of
4 putting that coming up with strategies with the
5 general public that increase or elevate the brand
6 of Leapfrog in the hospital safety grade?

7 A. We're just trying to make people aware of
8 the hospital safety grade.

9 Q. To the point where they're household
10 names; is that right?

11 A. Yes.

12 Q. Okay. And then one way to do that, or at
13 least one of the metrics, is just the number of
14 annual visits to the websites; is that right?

15 A. Right.

16 Q. Okay. And the goals here, the proposed
17 metrics, are to increase by 30 percent by 2028
18 and then by 100 percent for 2031.

19 Do you see that?

20 A. Yes.

21 Q. And how did you arrive at those goals?

22 A. As I said, I think this is an earlier

1 draft which kind of says X number, so that tells
2 me it's a draft --

3 Q. Yeah.

4 A. But -- and so there's -- it's just --
5 we're trying to set a six-year target for the
6 organization and then monitor that progress over
7 time. That's the purpose of the intent.

8 Q. Okay. Now, if you go down a few more
9 cells, under goal, it says, Purchasers/employers:
10 Enable purchasers and their contractors to tie
11 Leapfrog ratings to payment decisions.

12 A. Yes.

13 Q. Do you see that?

14 A. Uh-huh.

15 Q. All right. Now, in order to accomplish
16 this particular goal, isn't it correct that
17 Leapfrog has to convince purchasers and employers
18 that the Leapfrog ratings have value?

19 A. We have hundreds, if not thousands, of
20 employers and purchasers that are part of this
21 movement, so they are already -- not only do they
22 see value, they feel like they're part of

1 creating it.

2 So certainly we've got to engage as many
3 employers and purchasers as we can, but we have a
4 lot of them involved, which is what has been a
5 key success factor for the organization.

6 Q. But Ms. Binder, this is not -- this is
7 enumerated as a goal, not as the status quo,
8 right? The goal is to enable purchasers and
9 their contractors to tie Leapfrog ratings to
10 payment decisions, right?

11 A. Right. It's a long-term strategic
12 intent, and we want to always expand on how
13 purchasers and influencers use Leapfrog data.

14 We have purchasers -- we don't need to
15 convince them that Leapfrog is important. That
16 is -- I mean, there's always going to be
17 additional purchasers, I'm sure, we could bring
18 into the fold. But we have a lot of them already
19 engaged. They are the ones asking hospitals to
20 please report to the survey. They are very
21 actively involved with Leapfrog. They founded
22 Leapfrog.

1 So we have the engagement. But one of
2 the things that we always want to encourage more
3 employers to do is to think about how they are
4 contracting and paying for care in such a way
5 that they are incentivizing patient safety and
6 quality.

7 Q. Right. So in order -- so in order for
8 purchasers and employers to continue to be
9 engaged, is it fair to say that it's important
10 for Leapfrog to maintain or increase the value of
11 its ratings programs?

12 MS. BLAIR: Objection to form.

13 THE WITNESS: In what way do you mean
14 increase value?

15 BY MR. CHUNG:

16 Q. Convince -- basically convince --
17 increase value by at least maintaining or even
18 increasing the number of hospitals that
19 participate in the survey.

20 MS. BLAIR: Objection to form.

21 THE WITNESS: That has -- that has not
22 been something we've tied to the

1 purchaser/employer strategy.

2 BY MR. CHUNG:

3 Q. Okay. So under health plans, if you go
4 down a couple more cells, it reads, Pressure
5 plans to tie Leapfrog ratings to payment
6 decisions.

7 What does that mean?

8 A. Employers in particular have been vocal
9 with us on the need for them to come together
10 through Leapfrog to get health plans to tie
11 Leapfrog ratings, such as on patient safety and
12 quality, to its payment decisions. And one
13 employer will have a very difficult time having
14 any influence at all on a health plan, so they
15 look to Leapfrog as part of our core mission to
16 be able to be the voice for health plans getting
17 pressure from their own clients on the importance
18 of not just paying fee for service but actually
19 paying for excellence that you're looking for.

20 Q. So how does Leapfrog pressure plans to
21 tie Leapfrog ratings to payment decisions?

22 A. We bring employers together to say, we

1 want to see this and, what are you doing for it?

2 Q. Okay. Is the goal here to steer health
3 plans away from hospitals that do not participate
4 in the hospital survey?

5 A. No. That's not the goal, no.

6 Q. Has Leapfrog been successful in
7 pressuring these health plans to tie Leapfrog
8 ratings to payment decisions?

9 A. In some cases, but not -- not in an
10 overwhelming way.

11 Q. Okay.

12 MR. CHUNG: Let's go to tab 29b.

13 This will be Exhibit 31.

14 (Binder Deposition Exhibit 31 marked for
15 identification and attached to the
16 transcript.)

17 BY MR. CHUNG:

18 Q. All right. Ms. Binder, Exhibit 31 is a
19 memorandum to the board of directors' executive
20 committee dated February 25 of 2024.

21 A. Okay.

22 Q. Okay.

1 A. Let me just refresh my memory reading
2 through this.

3 Q. Sure.

4 A. Okay.

5 Q. Okay. Did you write this document?

6 A. Yes.

7 Q. All right. And in the second
8 paragraph you write that revenues were lower than
9 what we originally budgeted; they exceeded
10 expenses.

11 A. Yeah.

12 Q. And you cite, Ending the Money contract,
13 continuing delays in the Defense Health Agency
14 contract and struggles with Cigna.

15 A. Uh-huh.

16 Q. What is the Money contract referring to?

17 A. We had a contract with the -- it's like a
18 website called Money. It used to be Money
19 Magazine in the old days. And they asked us to
20 help them to issue an accolades program. So in
21 other words, Money top hospitals and things like
22 that.

1 Q. Okay.

2 A. We were not satisfied with the way they
3 were portraying those hospitals and how they were
4 doing it, so we ended up -- we ended the
5 contract.

6 We are extremely picky about how those
7 things get done.

8 Q. Okay.

9 A. And so we ended that contract.

10 And then the other --

11 Q. Actually, I was going to --

12 A. Oh.

13 Q. We don't need to go over the other ones.

14 But going down a couple of paragraphs
15 starting with -- the paragraph starting, We have
16 areas of challenge ahead with regard to licensure
17 of our data and continuing growth of development
18 revenues.

19 Do you see that?

20 A. Yes.

21 Q. And why were you facing challenges along
22 these lines?

1 A. Raising money is always a challenge in
2 any nonprofit. So in particular, in our case,
3 licensure of the data -- I think we'd had -- we
4 had a contract drop. We usually -- for licensure
5 contracts, we have very, very little churn. We
6 have very little dropouts. And Cigna had dropped
7 out. It was very disappointing to us. So I
8 think I was probably referring to that.

9 And in addition, we would really like to
10 see the growth in our licensure program. We're
11 really proud of that program too. That one is
12 extremely important to our mission because it
13 gets -- all of the data that we're collecting
14 through the survey, it gets -- when it's licensed
15 by other entities, we're able to put it in front
16 of millions, if not tens of millions, more
17 people. So it is very important to us to try to
18 get that program moving. It's also a very good
19 way for us to raise money.

20 And then -- you asked about the other --
21 what was the other one?

22 Q. Growth of development revenues.

1 A. Yeah. We have a development program
2 which is to ask for donations from individuals.
3 And that has just -- that's a fairly new program,
4 and it's been slowly growing.

5 Q. Okay. Now, almost to the end of this
6 document, at the bottom it says, So despite my
7 impatience to accelerate the pace of growth
8 strategies, I remain optimistic we're poised for
9 expansion that will impact patient safety if we
10 play our cards strategically.

11 A. Yeah.

12 Q. So the pace of growth -- this language
13 here, pace of growth strategies, that's focused
14 on the pace of -- growth -- the growth of
15 revenue; is that correct?

16 A. Well, it's everything.

17 Q. What do you --

18 A. If you have more --

19 Q. -- what are you really --

20 A. Because revenue --

21 Q. What are you really focusing on here
22 with -- what do you really --

1 A. Growth of --

2 Q. -- mean by --

3 A. -- the organization overall. So when we
4 are able to get more revenue through development
5 or all those other sources -- they talk about
6 several of them here -- when we're able to get
7 more revenue in, we then can invest that revenue
8 in expanding our programs which have been so
9 successful, such as the hospital safety grade,
10 the surveys, and then other surveys that we
11 are -- we've considered, such as nursing home
12 surveys or something like that.

13 There's other ways that we can impact
14 patient safety in places other than hospitals.
15 There's just a lot of things we could be doing if
16 we had more revenue.

17 Q. So more programs --

18 A. You could also --

19 Q. So more programs is part of the pace of
20 growth?

21 A. Maybe a low literacy expert to go over
22 our website. You just said that. I would love

1 that. And --

2 Q. More staff --

3 A. Well, it would require --

4 Q. -- would that be part of pace of growth
5 or kind of the aspirational pace of growth here?

6 A. To accomplish particular goals.

7 Q. Okay.

8 A. Yes.

9 Q. All right. And then does the pace of
10 growth here also involve getting more hospitals
11 involved with Leapfrog?

12 A. That has not --

13 MS. BLAIR: Objection to form.

14 THE WITNESS: That has not been on the
15 list. It's not here that --

16 BY MR. CHUNG:

17 Q. Why not?

18 A. Well, we want hospitals to report to the
19 survey. So that's always been on the list for
20 that. But as I said, that's a cost that we have
21 to pay for. More hospitals means more cost.

22 Q. All right. But --

1 A. So I see it as a cost. Raising money as
2 a separate issue so that we can afford to run
3 this first-class survey.

4 Q. Okay.

5 A. And if I can add one thing in terms of
6 revenue. If our goal was just revenue for the
7 sake of revenue, we would have a lot more money
8 and we probably would only focus on accolades.
9 We've been very successful with accolades. We'd
10 probably give every hospital an A if that was our
11 goal. That's not our goal.

12 Our goal is to improve patient safety --

13 Q. Well, you are a 501(c)(3) organization,
14 correct?

15 A. Yes. Our goal -- that's our goal; it's
16 our mission to improve patient safety.

17 Q. So if you were to focus just giving out
18 all A's in the accolades licensing program, that
19 would be a problem for --

20 A. Yes.

21 Q. Your 501(c)(3) registration, correct?

22 A. -- that would not be -- that's why we

1 don't do it --

2 Q. Okay.

3 A. -- and we wouldn't do it. But that's --
4 what I'm trying to say is that's why we focus on
5 revenue, is because we want to afford to pay for
6 the extremely important work we are doing, which
7 is making enormous progress on patient safety and
8 saving lives.

9 Q. Okay.

10 MR. CHUNG: Why don't we take a short
11 break here. We're on to the next topic in a
12 little bit.

13 THE WITNESS: Okay.

14 VIDEO TECHNICIAN: The time is 3:20 p.m.
15 This ends unit 3. We're off the record.

16 (A recess was taken.)

17 VIDEO TECHNICIAN: The time is 3:47 p.m.
18 This begins unit number 4. We're on the record.

19 BY MR. CHUNG:

20 Q. Ms. Binder, before the break we were
21 discussing how Leapfrog is a 501(c)(3)
22 organization, right?

1 And has Leapfrog ever been audited to
2 determine whether its activities comply with its
3 501(c)(3) status?

4 A. We have an annual audit by an independent
5 firm. And I believe they look at all aspects of
6 compliance with key legal requirements and
7 accounting principles, and that would be included
8 in that.

9 Q. Okay. Other than the annual audit, have
10 there been any other audits or investigations of
11 Leapfrog as it relates to whether its activities
12 comply with its 501(c)(3) status?

13 A. Well, other than the annual audit? No.

14 Q. Okay. Has anyone within Leapfrog ever
15 complained that its revenue-generating activities
16 do not further its charitable purpose?

17 A. No.

18 Q. Any complaints from the outside --
19 outside of Leapfrog in that vein?

20 A. No. Not to my knowledge.

21 Q. Topics 9 and 14 on the 30(b)(6) notice
22 have to do principally with Leapfrog's

1 compensation structure, so I wanted to ask: How
2 does Leapfrog set compensation for its executive
3 staff?

4 A. We do research on form 990s, which is the
5 tax form that is completed by nonprofit -- by
6 501(c)(3)s, typically, nonprofit organizations.
7 They're all required to disclose the annual
8 compensation of their highest paid employees and
9 I believe employees who earn over \$100,000 a
10 year.

11 So that gives us a very strong set of
12 competitive and comparative data that we can use
13 to figure out if we're -- if we're competitive in
14 terms of paying our executives.

15 Q. Who is the "we"? Who is getting and
16 reviewing this data and making decisions?

17 A. So -- well, I do it in partnership with
18 the manager who is -- when we're setting
19 compensation for the manager who has direct
20 reports. So for instance, for Missy Danforth,
21 Katie Stewart's compensation, we review her
22 compensation. We do this every year. We review

1 the compensation to ensure that it remains
2 competitive. And I'll do that with Missy.

3 We also call on Engage PEO. I think I
4 mentioned that they are the HR services firm that
5 we work with. And they give us benchmarking data
6 as well for our executives, and for all levels,
7 really, of employee so that we can gauge from
8 that as well.

9 And then -- I think that's the -- and
10 then we have a recruiter also who gives us -- who
11 does give us insights as well.

12 Q. Okay. Is compensation for any of the
13 executive staff tied to any performance goals?

14 A. So increases in compensation on the
15 annual review period is -- two things. One is
16 the performance of the organization against its
17 key benchmarks; and two is their own personal
18 performance towards their own job description.

19 Q. Okay. And who sets those goals, the
20 personal goals?

21 A. They're based on the job description, so
22 the supervisor of the person. So in my case, for

1 example, Missy Danforth has a job description.
2 We review the job description prior to the review
3 each year to make sure it's still accurate. And
4 then the employee self-reports how they believe
5 they are doing on these goals for their -- which
6 are in their job description. And then the
7 supervisor responds to those comments.

8 Q. Are the goals for any of these executive
9 staff for purpose of compensation, are there any
10 revenue goals among those goals?

11 A. In some cases, yes.

12 Q. Okay. Can you -- how about for you?

13 A. For my -- well, for my goals, not so
14 much. They want to know that the organization is
15 growing, so they will look at overall growth of
16 the organization in all forms.

17 I think in the earlier exhibit I touched
18 on a lot of the metrics that they're looking at.
19 So they certainly do want to know that I'm
20 raising money.

21 They also want to know that we're getting
22 the kind of traction we want in the market around

1 improving patient safety. So they want to know
2 both the revenue generation and the effectiveness
3 of our mission.

4 Q. So just to be clear, for your
5 compensation, there are no revenue-based
6 performance goals that you have to meet?

7 A. Well --

8 Q. Yes or no?

9 A. No.

10 Q. No? Okay.

11 A. But --

12 Q. But you mentioned that there are examples
13 of revenue-based performance goals.

14 Is this for other members of the
15 executive staff?

16 A. No. I'm primarily evaluated on the basis
17 of the organization's performance.

18 Q. I'm asking -- the question I just asked:
19 Are there other members of the executive staff
20 who do have revenue-based performance goals for
21 their compensation?

22 A. Yes. Yes.

1 Q. Okay. And who are those?

2 A. Karen. She's our development director.
3 So she -- so we are looking -- as part of her job
4 description, we are looking at, are you raising
5 money in the development campaign and are you
6 raising money in generating additional
7 sponsorships for the annual meeting?

8 And some of the revenue goals we've set
9 for her in terms of fundraising.

10 Q. This is Karen Jupiter?

11 A. Yes. Karen Jupiter.

12 Q. Okay. And who else?

13 A. I'm not sure.

14 Q. Melissa Danforth? Given that she
15 oversees the licensing programs, is she one?

16 A. Yeah, that was more of a temporary thing,
17 though, that she took on, because she had so much
18 turnover in trying to get the marketing
19 leadership correct and haven't been able to do
20 that.

21 Q. So the question is, are her -- is her
22 compensation tied to any revenue-based

1 performance goals?

2 A. Only inso- -- it's not in her specific
3 personal job description, so no, it is not, on a
4 personal level. But as I said, for the executive
5 team, their bonus levels are determined also, in
6 part, in consideration of the organization's
7 overall performance on our metrics, and those
8 include revenue.

9 Q. Okay. So not personal, but
10 organization-wide, their bonus depends on how the
11 overall organization does in terms of revenue; is
12 that right?

13 A. How --

14 MS. BLAIR: Objection to form.

15 THE WITNESS: Not in terms of revenue.
16 Just how the overall organization does. That
17 includes revenue, but it's not only revenue.
18 BY MR. CHUNG:

19 Q. Okay. How about Mr. Banerjee? Does
20 his --

21 A. No, his is not --

22 Q. Is his compensation, any part of it tied

1 to revenue-based performance goals?

2 A. No, it's not.

3 Q. Okay. So it's just Ms. Jupiter or is
4 there anyone else?

5 A. Well, all of the senior team is
6 compensated based on the performance of the
7 organization and -- in terms of their bonus, is
8 compensated in terms of the performance of the
9 organization and their performance on their
10 particular job description.

11 So the entire senior team, then, would be
12 compensated on the performance of the overall
13 organization, so that would include revenue in
14 that respect.

15 But you asked me about specifically on
16 the job descriptions. That's where I immediately
17 think of Karen Jupiter, since that is
18 fundamentally her job, to raise money for the
19 organization.

20 Q. Okay. Your -- am I right that your
21 compensation, at least for 2024, was about
22 \$760,000? Is that right?

1 A. I don't believe that's exactly right.
2 But the base is 575. And two years ago I believe
3 I had a bonus of \$100,000.

4 And then I think on the 990s, they also
5 account for benefits, so, like, health benefits,
6 all that value. So that's where it gets to 760.

7 Q. Okay.

8 A. Last year I made much less. And that's
9 not -- I don't believe it's out on the 990s yet,
10 but --

11 Q. Last year meaning -- what's the year?

12 A. So the fiscal year that's ending as of
13 June 30th, which would be fiscal year 2025.

14 Q. Okay.

15 A. My compensation last year was 575, and I
16 asked the board to not give me a bonus because I
17 wanted to preserve the bonus pool for my
18 executive team. They had done an incredible job,
19 and I wanted to maintain it for them.

20 So that, plus what's going to be on the
21 990 for that, is the 575 plus -- plus the value
22 of the health benefits and retirement benefits.

1 Q. But is it fair to say that your
2 compensation over time since you started as CEO
3 in about 2012 has increased?

4 A. Yes.

5 Q. Okay.

6 (Binder Deposition Exhibit 32 marked for
7 identification and attached to the
8 transcript.)

9 BY MR. CHUNG:

10 Q. Exhibit 32. Key elements of requested
11 changes to the CEO employment contract.

12 Do you see that?

13 A. Yes.

14 Q. Okay. And this is for a date of July 12,
15 2024.

16 Did you author this document?

17 A. Yes.

18 Q. Okay. And this is addressed to The
19 Leapfrog Group executive committee, correct?

20 A. Yes.

21 Q. All right. You write here -- what's the
22 purpose of this document?

1 A. My contract is renewing as of this '25
2 fiscal year, which this is the beginning of
3 that '25 fiscal year. I wanted to give them time
4 to think through what to do about my
5 compensation.

6 Q. Okay.

7 A. And I made the case -- I looked at the
8 comparables in the nonprofit world to give them
9 an assessment of how competitive my compensation
10 is and also some of the history of my
11 compensation.

12 Q. So you write toward the top there, second
13 sentence under the CEO position of my value,
14 Recruitment for this position, as well as other
15 senior positions, will include talent from
16 larger, better financed organizations, given the
17 need for experienced leadership and the level of
18 scrutiny Leapfrog is under.

19 What did you mean about the level of
20 scrutiny that Leapfrog was under? And this is --

21 A. Well, we're very --

22 Q. -- July 2024.

1 A. I mean, we get tens of thousands of press
2 citations and public attention. I'm on the
3 speaking circuits, speaking to thousands of
4 people every year. We are a very high-profile --
5 exceptionally high-profile organization for our
6 financial size.

7 Q. Okay. And then you write your
8 performance -- My performance in this position
9 has been a significant asset to the organization,
10 and over the past decade we have grown Leapfrog's
11 visibility and influence while also growing our
12 revenues by an average of 10 percent per year.

13 So you're including here, as part of
14 the -- kind of the pitch here, that you've been
15 responsible for growing Leapfrog's brand as well
16 as the revenues, correct?

17 A. Yeah. The next sentence talks about the
18 low staff turnover and expansion --

19 Q. I'm just focusing on what I just read.

20 Is that correct, that --

21 MS. BLAIR: Objection to form.

22

1 BY MR. CHUNG:

2 Q. -- your -- all right. I'll move on --

3 A. Which sentence? Over the past decade, we
4 have grown --

5 Q. Yeah.

6 A. -- Leapfrog's visibility and influence
7 while also growing our revenues by an -- yes,
8 that's true.

9 Q. Yes -- okay.

10 So I'm going to direct your attention to
11 the second page.

12 And under compensation request, you ask
13 for a bonus target of 15 to 25 percent of the
14 base.

15 Do you see that?

16 A. Yes.

17 Q. And then the dollar amount is set forth
18 there, 101,250 to 168,750.

19 What was the previous bonus target?

20 A. The previous bonus target was anywhere
21 from zero to \$100,000.

22 Q. Okay. And when was this new bonus target

1 meant to go into effect?

2 A. When we conclude the renewal of my
3 contract.

4 Q. Okay. And then in the next paragraph on
5 the same page you write that your base and bonus
6 request would get your compensation above the
7 median for similarly sized organizations.

8 Do you see that?

9 A. Depending on bonus, yeah.

10 Q. Yeah, depending on bonus.

11 So why did you think your compensation
12 should be above the median for similarly sized
13 organizations?

14 A. Because I've been at Leapfrog for
15 18 years and we are considered by many one of the
16 most successful nonprofit organizations in the
17 country.

18 Q. Okay. And part of that -- would you say
19 part of -- at least in light of your kind of --
20 your contributions here, part of that would be
21 the revenue generation as well, correct?

22 MS. BLAIR: Objection to form.

1 THE WITNESS: It's both revenue and
2 accomplishment of mission, but mostly mission.

3 BY MR. CHUNG:

4 Q. Okay. But you --

5 A. The whole purpose of revenue is mission.

6 Q. Right. But you do underscore that
7 revenue has grown while you've been CEO, correct?

8 A. Yes.

9 Q. All right. And that's a reason -- that's
10 one of the reasons for this request and the
11 increased compensation, correct?

12 A. Well, mainly it's the factors that I lay
13 out here on --

14 Q. I'm asking, is it one of the reasons
15 that's the grounds for your request for increase
16 in compensation?

17 A. Sure, it's one of the reasons.

18 Q. Okay. Would you say that Leapfrog's
19 success depends on participation by hospitals?

20 MS. BLAIR: Objection to form.

21 THE WITNESS: No.
22

1 BY MR. CHUNG:

2 Q. How is that?

3 A. Well, we -- there are many factors that
4 would determine success, but the most important
5 one is that we see improvement in patient safety.

6 Q. What would happen to Leapfrog if all
7 hospitals decided to stop responding to the
8 hospital survey?

9 MS. BLAIR: Objection to form.

10 THE WITNESS: I guess we'd be -- we'd try
11 another strategy to improve patient safety.

12 BY MR. CHUNG:

13 Q. Okay. But what would happen to Leapfrog
14 if all hospitals decided to stop responding to
15 the hospital survey?

16 A. We'd pursue --

17 MS. BLAIR: Objection.

18 THE WITNESS: -- a different strategy to
19 improve patient safety.

20 BY MR. CHUNG:

21 Q. Would you be concerned -- I mean, isn't
22 the foundation -- the foundational program of

1 Leapfrog the hospital survey?

2 A. It was the first program we launched, and
3 it's certainly key to our strategy of
4 transparency in an open marketplace, an open and
5 transparent marketplace in healthcare. We
6 certainly want that.

7 Q. Okay. Would you say it is -- the
8 hospital survey is necessary for Leapfrog's
9 survival?

10 MS. BLAIR: Objection to form.

11 THE WITNESS: No. We'd find some other
12 way to do it. But -- it's not going to go away.
13 But we would try another strategy. We've been
14 successful at pursuing various strategies over
15 our 25-year history. And we would do that
16 because patient safety is not going to wait.
17 People are -- it's third leading cause of death
18 in this country.

19 BY MR. CHUNG:

20 Q. The hospital survey, however -- we talked
21 about the hospital safety grade program
22 starting -- I think it was 2012, right?

1 A. Yes.

2 Q. But the hospital survey preceded your
3 time as CEO, correct?

4 A. Yes.

5 Q. So the hospital survey has been part of
6 Leapfrog -- has it been since the founding?

7 A. Yes.

8 Q. Okay. So I'm just going to ask the
9 question again: Does Leapfrog's success depend
10 on -- as it's currently put together, depend on
11 participation by hospitals?

12 MS. BLAIR: Objection to form.

13 THE WITNESS: Our current -- in our
14 current strategic design --

15 BY MR. CHUNG:

16 Q. Yeah.

17 A. -- we rely on hospital transparency to
18 drive a market for improved patient safety. That
19 is our strategy right now. Yes.

20 Q. Okay. Does Leapfrog provide any form of
21 public recognition such as awards or distinctions
22 to hospitals that participate in the survey?

1 A. Yes, we do.

2 Q. All right. And what are the criteria for
3 that type of -- for those recognitions?

4 A. So we have a top hospitals program and we
5 award based on a variety of factors such as they
6 have to have achieved a certain level of
7 performance in each one of the categories within
8 the Leapfrog hospital survey.

9 Q. Okay.

10 A. So they have to be among the top in
11 those -- it's a whole methodology, and we
12 publicly report that as always.

13 Q. Does Leapfrog ever engage with hospital
14 leadership or hospital administrative staff to
15 encourage participation in the survey?

16 A. Yes.

17 Q. Okay. How does it go about doing that?

18 A. Well, a whole variety of ways, but one is
19 that we work with our regional leaders and we
20 support them, and they are really the main voice
21 for Leapfrog in their communities, meeting with
22 hospitals, talking with hospitals, engaging

1 hospitals on behalf of their employer members.
2 That's one way.

3 The other way is what I would just call
4 sort of -- it's not informal, but it's anecdotal,
5 so to speak, is when myself and other leaders at
6 Leapfrog travel across the country and meet with
7 various hospitals and -- as well as our regional
8 leaders and others in conferences, et cetera.

9 So we have a number of general
10 strategies. I make it a point myself to visit at
11 least three to five hospitals every year, get a
12 tour, find out where the real challenges are.
13 There's really nothing like being on site and
14 really talking to these leaders personally.

15 So we do that, and a number of
16 Leapfrog -- the Leapfrog team does it. Sometimes
17 our board members as well go for tours and
18 conversations with hospital leaders.

19 Q. Are there any partnerships with employers
20 or insurers that use Leapfrog participation --
21 hospital participation in Leapfrog survey as a
22 criterion for contracting or inclusion in the

1 network?

2 A. I don't know. I know that some health
3 plans have put Leapfrog participation in their
4 initial -- in the initial contracts that they
5 present to hospitals, but my understanding is
6 often those are negotiated out before they
7 actually take place.

8 So I don't think there are any that have
9 stayed in place, but I don't know entirely.

10 Q. Okay. Does Leapfrog track hospital
11 participation rates over time?

12 A. Yes.

13 Q. Okay. And what trends has Leapfrog
14 identified in the participation rates?

15 A. They've been growing every year.

16 Q. Okay. And that's as part of kind of the
17 efforts that you just described; is that right?

18 A. Which efforts?

19 Q. The efforts that you just described about
20 the engagement with hospitals.

21 A. Oh. Well, there's a whole variety of
22 reasons besides direct engagement with

1 hospitals --

2 Q. Okay.

3 A. -- that cause -- that cause participation
4 rates to increase.

5 Q. Including changing the imputation
6 methodology last year; is that right?

7 MS. BLAIR: Objection to form.

8 THE WITNESS: That was not the purpose of
9 the change in the imputation.

10 BY MR. CHUNG:

11 Q. Okay. But it had the impact?

12 A. I don't know. Honestly don't know.

13 Q. Okay. You were hoping for that impact,
14 correct?

15 MS. BLAIR: Objection to form.

16 THE WITNESS: No. That was not the
17 purpose of the -- the imputation had a purpose:
18 Was for consumers so that they would not -- we
19 were not overstating the performance on safety of
20 any hospital. That is not -- we'd never want to
21 be doing that. It's not safe for consumers.

22

1 BY MR. CHUNG:

2 Q. Has Leapfrog ever analyzed whether survey
3 participation improves a hospital's safety grade?

4 A. Not the way you described it.

5 Q. I'm sorry?

6 A. Not the way you just described it.

7 Q. Okay. Well, how have -- how has Leapfrog
8 analyzed or studied --

9 A. We've looked at patterns on survey
10 participants versus non-participants in a whole
11 variety of areas, including their safety grades,
12 but also their particular performance on certain
13 CMS metrics.

14 Q. Well, what have you observed in terms of
15 the analysis of survey participants and
16 non-participants as it relates to their safety
17 grades?

18 A. Non-participants tend to not have as high
19 a grade.

20 Q. Okay. And is that -- is that recent data
21 after the imputation methodology change in 2024
22 or just more -- over a longer time period?

1 A. That's been consistent.

2 Q. Okay.

3 A. But let me just add that they --
4 non-participants have also consistently been able
5 to do well. So it isn't -- but in terms of
6 correlating or looking at the patterns between
7 the two kinds of hospitals, like the participants
8 and non-participants, there is generally, on
9 average, higher grades by participating
10 hospitals.

11 Q. Okay. So we're going to move on to
12 Leapfrog's marketing, which is another 30(b)(6)
13 topic.

14 How large is Leapfrog's marketing team?

15 A. We don't have anyone dedicated to just
16 marketing. We have -- I mean, Kush does mostly
17 contracting and responding to inquiries, so
18 that's partly marketing.

19 We have a lot of people who partly work
20 on marketing.

21 Q. And who are those people?

22 A. Kush, Missy, myself.

1 I'm trying to think. I think some of our
2 communications team will help with some, so Karen
3 Jupiter and Lauren Bailey do particularly
4 marketing around our partners program to try to
5 attract more partners and sponsorships.

6 Q. Okay. So you have communications
7 personnel working on marketing as well; is that
8 right?

9 A. For the partners program. And for the
10 annual meeting in particular. Actually, she
11 works a lot on attracting sponsors and interest
12 and registrations for the annual meeting.

13 Q. Do you know how much Leapfrog spends
14 on -- do you also use outside marketing firms to
15 help with marketing?

16 We mentioned TelAffects earlier, correct?

17 A. Yes. TelAffects is the main one that we
18 use for marketing purposes.

19 Q. Any others?

20 A. We have a design -- a designer, graphic
21 designer. We have a videographer that does some
22 video for our annual meeting that we then can use

1 in marketing.

2 So smaller contracts like that. But the
3 main one is TelAffects.

4 Q. Okay. And I'm aware that Leapfrog also
5 uses an outside service, CURA Strategies.

6 A. Yes.

7 Q. What do they do?

8 A. They're our public relations firm. So
9 they handle -- they handle informing the media
10 when Leapfrog has news and making sure that -- or
11 trying to get it covered.

12 Q. Okay. In terms of Leapfrog's marketing
13 strategy, how does the -- how do the hospital
14 safety grades fit into Leapfrog's marketing
15 strategy?

16 A. Well, for the accolades program, we -- we
17 have a number of strategies to -- aimed entirely
18 at hospitals for each round of the grade that
19 earn an A, which is a subset of them. We have a
20 number of strategies to try and engage them and
21 interest them in purchasing that logo and touting
22 their A. So those would be e-mails that are

1 directed at those A-hospitals. We do --
2 actually, it's mainly e-mails. We do some other
3 kinds of mailings, I guess, but that's mainly it.

4 Q. Okay. Does Leapfrog pay for search
5 engine optimization for any of its websites as
6 part of the marketing program?

7 A. We've dabbled in that with -- we got a
8 grant from -- a grant from Google that they give
9 to some non-profits to allow them to dabble in
10 search engine optimization, paying for some --
11 paying to be on the top of a search. And so
12 we -- it's a very small amount, but we've done
13 that.

14 And that's just dabbling. We don't have
15 the funds to really do that kind of SEO, really
16 sophisticated strategy.

17 Q. Okay. So just some specific questions
18 about how Leapfrog markets the hospital safety
19 grades to consumers.

20 How does Leapfrog decide how to describe
21 and explain the hospital safety grades in its
22 marketing?

1 A. We don't really market the hospital
2 safety grades except we market the accolade for
3 hospital safety grades.

4 Q. So how does it go about doing that?
5 What -- how do you decide -- how do you describe
6 the hospital safety grades when you're marketing
7 the accolades program?

8 A. We send e-mails that say, you got an A,
9 you know, you should be proud.

10 And some of the ways that hospitals that
11 earn an A, how they've been able to tout it in
12 their communities, with their boards, with
13 their -- just internally, externally.

14 We try to give them ideas. And -- that's
15 how we do it.

16 Q. And in fact, it's the licensing team
17 that's the first -- they're the first folks from
18 Leapfrog that notify a hospital of an A grade; is
19 that right?

20 A. No. We send a letter to the CEO signed
21 by me, and it's sent FedEx, so it's a hard copy,
22 sent to the CEOs that congratulate them on their

1 A.

2 Q. Is that the very first correspondence?

3 A. That they got an A? Yes.

4 Q. Okay. Isn't it -- doesn't the licensing
5 team send an e-mail, electronic communication, to
6 the hospital notifying them of the A first?

7 A. They also send a note. But the first
8 thing is the letter to the CEO, the hard copy
9 FedEx letter to the CEO.

10 Q. Okay.

11 A. But, I mean, CEOs don't always, you know,
12 let everyone know in five seconds, so we also
13 communicate with others at the hospital to make
14 sure they're aware and have time to consider how
15 they want to promote their A, which they can do
16 for free. And we make that clear in all of our
17 correspondence as well.

18 Q. Okay. Does Leapfrog try to convince
19 consumers that its grading methodology is
20 objective?

21 A. I don't know that we've used the
22 word "objective." Independent.

1 Q. Okay. Does Leapfrog try to convince
2 consumers that its grading methodology is
3 unbiased?

4 A. Yes.

5 Q. Okay. And you said independent?

6 A. Yes.

7 Q. All right. Why not objective?

8 A. I don't know --

9 Q. Is it because there are elements of the
10 scoring methodology that are subjective?

11 MS. BLAIR: Objection to form.

12 THE WITNESS: No, it's just -- it's just
13 not a great word.

14 BY MR. CHUNG:

15 Q. Why not?

16 A. Because in the scientific method, we're
17 always evolving and updating it, and it's not
18 commonly used in even scientific discussions to
19 say, well, this is objective, so this is it.
20 You -- it's just not a word that's used in an
21 evidence-based scientific environment, so we
22 tended to not use the word "objective."

1 Q. Okay. Is that a word that your expert
2 panelists have cautioned against using?

3 A. I don't think they've ever brought it up,
4 but it's just not a word that's commonly used in
5 any kind of scientific discourse.

6 Q. Okay. Does Leapfrog try to convince
7 consumers that the hospital safety grades are not
8 influenced by a hospital's participation or lack
9 of participation in the survey?

10 A. Do we try to convince people that it is
11 not influenced by the survey?

12 Q. Right.

13 A. No.

14 Q. All right. Is it true that a hospital's
15 lack of participation does not affect the
16 hospital's safety grade?

17 A. No. That's not true. And we don't say
18 that. That I know of, anyway.

19 Q. Okay. So it is true that a hospital's
20 lack of participation does affect its safety
21 grade?

22 MS. BLAIR: Objection to form.

1 THE WITNESS: It can affect their safety
2 grade for sure, up or down.

3 BY MR. CHUNG:

4 Q. Okay. Isn't it true that Leapfrog's
5 published hospital safety grades could cause
6 members of the public or patients to delay
7 necessary medical care?

8 MS. BLAIR: Objection to form.

9 THE WITNESS: Highly doubtful.

10 BY MR. CHUNG:

11 Q. Is it possible?

12 A. I don't know.

13 Q. You don't know? Is that your testimony,
14 you don't know whether it's possible?

15 A. I don't know if people would delay needed
16 medical care because of the hospital safety
17 grade. I've never heard of that ever happening.

18 Q. Okay. Well, take a member of the public
19 with Leapfrog grades, you know, in their mind.

20 Is it possible that they might drive past
21 a D- or an F-hospital and make a much longer
22 drive to an A-, B-, or C-hospital?

1 A. Is that --

2 MS. BLAIR: Objection to form.

3 THE WITNESS: Sure.

4 BY MR. CHUNG:

5 Q. Is there a risk there, is what I'm
6 asking?

7 A. The risk is if they go to a hospital
8 that's not safe. That's the risk.

9 Q. I'm asking you, is there a risk --
10 right? -- is a -- let's say a particular member
11 of the public, a consumer, with Leapfrog grades
12 in mind, might drive past a D- or F-hospital and
13 just drive further to an A-, B-, C- -- A-, B-, or
14 C-hospital based on their viewing of the grades?

15 MS. BLAIR: Objection to form.

16 THE WITNESS: Sorry, are you saying in an
17 emergency or are you just saying in general?

18 BY MR. CHUNG:

19 Q. In general.

20 A. I would think that they might not want to
21 go to a -- they'd want to -- prefer an
22 A-hospital. Sure.

1 Q. Okay. And they might do so even if the
2 D- or F-hospital has a type of unit or specialty
3 that the further-away hospital does not?

4 MS. BLAIR: Objection to form.

5 THE WITNESS: Well, it's not what we
6 advise, so we're very clear about advising that
7 you should take a look at the safety grade first,
8 because safety comes first. But then there are
9 other sources of information for other kinds of
10 quality metrics that you should also look at
11 regarding a hospital.

12 We're pretty clear about the fact that
13 you need to look at a variety of sources to
14 really evaluate where you want to seek care.

15 BY MR. CHUNG:

16 Q. Where is that made clear, what you just
17 articulated?

18 A. It's in our talking points. I believe
19 it's on our website. It's various places.
20 We're --

21 Q. What are the talking points? Where are
22 the talking points located?

1 A. I'm not sure exactly how to get there on
2 the website, but they're -- we -- it's a talking
3 point that we've used repeatedly.

4 Q. Okay. And what specifically is the
5 talking point that's on the website?

6 A. That you should consider -- it's probably
7 on the safety grade website, too.

8 That you should consider the safety of a
9 hospital first, because safety comes first, and
10 then you should be looking at other sources of
11 information. This is a common point that I've
12 made many times myself as well.

13 Q. Okay. But do the talking points on this
14 website go into these circumstances where, if a
15 hospital with a lower grade has a type of unit or
16 specialty that a further-away hospital with a
17 higher grade does not, that they should consider
18 the distance when deciding -- or consider whether
19 the hospital has the type of unit or specialty
20 that they need?

21 A. We don't talk about the distance, per se.
22 We do talk about looking at a variety of ratings

1 to understand how a hospital is doing on the
2 services that they provide.

3 Q. Okay. Are you aware of instances of
4 patients avoiding a D- or F-hospital only to be
5 sent back to that hospital because the A- or the
6 B-hospital they went to originally didn't have
7 the proper specialty for them?

8 MS. BLAIR: Objection to form.

9 BY MR. CHUNG:

10 Q. Have you heard of those instances?

11 A. I haven't.

12 Q. You have not?

13 A. I have not heard of them.

14 Q. Okay. Would it concern you if you heard
15 of those instances?

16 A. I mean, there's a lot of -- people go
17 from one hospital to another all the time for all
18 kinds of reasons --

19 Q. So you're not?

20 A. -- so I guess I wouldn't see that as a
21 particular red flag. The red flag is if they're
22 going to a hospital and they get harmed. That's

1 the stories I hear every day.

2 Q. Okay. Is it fair to say that Leapfrog
3 wants to influence where patients choose to
4 receive care?

5 MS. BLAIR: Objection to form.

6 THE WITNESS: We want to give consumers
7 information so they can make a good choice for
8 themselves and their families. Period. We're
9 not trying to do anything to or for hospitals.
10 We are about consumers.

11 BY MR. CHUNG:

12 Q. No, I'm not asking whether you're
13 influencing a patient to go to a specific
14 hospital -- right? But isn't it fair to say that
15 Leapfrog -- part of its mission is to influence
16 where patients choose to receive their care?

17 MS. BLAIR: Objection to form.

18 THE WITNESS: We're trying to influence
19 them to seek care at the safest, highest-quality
20 cases.

21 BY MR. CHUNG:

22 Q. Okay. So it's important -- so it's

1 important, based on that, that Leapfrog's
2 hospital safety grades are accurate; is that
3 right?

4 MS. BLAIR: Objection to form.

5 THE WITNESS: It's always been important
6 for all kinds of reasons.

7 BY MR. CHUNG:

8 Q. Okay. Because if the hospital safety
9 grades are not accurate, Leapfrog could be
10 running the risk of influencing a patient or a
11 family member to go to an unsafe hospital; is
12 that right?

13 A. But that's --

14 MS. BLAIR: Objection to form.

15 THE WITNESS: That's why we don't want to
16 inflate the performance of hospitals. We try not
17 to inflate their performance, and that's why we
18 err on the side of not inflating their
19 performance.

20 BY MR. CHUNG:

21 Q. Okay. Similar question: If the grades
22 are not -- if the hospital grades are not

1 accurate, then there's the risk of steering
2 patients away from safe hospitals, correct?

3 A. They are accurate, so I can't answer
4 that.

5 Q. All right. But if they're not accurate,
6 if the hospital safety grade is not accurate,
7 then there's a risk of steering them away from
8 actually safe hospitals, correct?

9 MS. BLAIR: Objection to form.

10 THE WITNESS: If we overstate the safety
11 of a particular hospital, there is the risk they
12 will go to a hospital that is less safe than they
13 thought.

14 BY MR. CHUNG:

15 Q. Okay.

16 A. That's the biggest risk.

17 Q. And if the hospital safety grade -- if a
18 hospital safety grade for a particular hospital
19 is not accurate, there's a risk that Leapfrog
20 could be influencing consumers to make decisions
21 about their healthcare that are actually
22 detrimental to their health; is that right?

1 MS. BLAIR: Objection to form.

2 THE WITNESS: No.

3 BY MR. CHUNG:

4 Q. That's not right?

5 A. No. As I said, the biggest risk is if we
6 were to inflate the performance of a hospital and
7 they go and it's not as safe as they hoped or
8 deserve. That's a risk.

9 Q. Okay.

10 A. To the consumer, that's the biggest risk.

11 Q. So it's not a risk if -- if a hospital
12 safety grade for a particular hospital is not
13 accurate, it's not a risk that Leapfrog could be
14 steering a consumer or influencing a consumer to
15 make a decision that's actually detrimental to
16 their health?

17 MS. BLAIR: Objection to form. Double
18 negative.

19 You can answer it if you know.

20 THE WITNESS: Can you restate it or say
21 it again?

22

1 BY MR. CHUNG:

2 Q. Right. If a hospital safety grade is not
3 accurate -- right? -- for a particular hospital,
4 isn't there a risk that Leapfrog could be
5 influencing a patient to make a decision about
6 their health that's detrimental to their health?

7 MS. BLAIR: Objection to form.

8 THE WITNESS: If it's not accurate --
9 you're saying if it's not accurate, which I
10 contend, of course, that it is accurate. But if
11 it's not accurate, could they be making a
12 decision that's detrimental to their health?

13 BY MR. CHUNG:

14 Q. Yes.

15 A. The risk is that it would be inaccurate
16 to the extent of overstating the hospital's level
17 of safety. That would -- and then -- then the
18 consumer goes to that hospital thinking that they
19 should -- that they feel safe there and they are
20 too complacent about the safety, and that is a
21 major, major risk to consumers.

22 Q. Okay. Has Leapfrog ever issued a

1 correction or a retraction of a hospital safety
2 grade after learning that the grades may have
3 misrepresented a hospital's actual safety or
4 quality of care? Has that ever happened?

5 A. We have pulled down grades when -- very
6 rarely, but we have pulled down a hospital's
7 grade entirely if we are given evidence that
8 form -- some part of the data was inaccurate.

9 This typically is brought to our
10 attention by a hospital, and they will say that
11 there was some inaccuracy which we get confirmed
12 from the data source, i.e., CMS. In that case,
13 we will bring down the grade entirely. We will
14 never change a grade.

15 Q. What do you mean by bring down the grade?

16 A. We'll take it down from public reporting.

17 Q. Okay. So that -- so essentially the
18 hospital does not get a grade; is that right?

19 A. Right.

20 Q. Okay.

21 A. But again, it's very rare, but it's when
22 there's evidence that something is wrong from the

1 data source.

2 Q. When is the last time that that happened?

3 A. I can't remember. Maybe a year ago.

4 Q. Okay. And which hospital?

5 A. I don't remember the hospital.

6 Q. Okay. Approximately how many times has
7 it happened during your time at Leapfrog?

8 A. Eight to ten times in my time at
9 Leapfrog. I worked -- since the safety grade
10 launch.

11 Q. Can you think of a particular hospital --
12 maybe not the most recent one -- where this
13 actually happened?

14 A. Well, it happened a lot when we had AHA
15 data. Not a lot. I mean, obviously, only eight
16 to ten times in 13 years, so it's not a lot. But
17 it was a particular issue with AHA data because
18 the hospitals would say, oh, that's wrong, AHA
19 reported the data to you, it was incorrect. And
20 we'd go back to AHA and they wouldn't -- AHA
21 would need to correct it. We would not correct
22 it unless AHA, the data source, corrected it.

1 And so AHA, if they didn't correct it
2 or -- then AHA would come back late in the
3 process and try to correct it. And in that case,
4 when we have, from the data source, information
5 that this was -- this particular measure was
6 incorrect, we would -- that's when we would pull
7 down the grade.

8 Q. Okay. Has Leapfrog ever considered the
9 potential public health risks associated with
10 publishing safety grades for hospitals where it
11 just doesn't have data?

12 A. We don't publish safety grades for
13 hospitals for which we do not have data.

14 Q. Okay. Has Leapfrog ever considered the
15 potential public health risks associated with
16 publishing safety grades for hospitals where it
17 doesn't have data for a number of metrics?

18 MS. BLAIR: Objection to form. Asked and
19 answered.

20 THE WITNESS: We don't publish safety
21 grades that we don't stand behind. Our criteria
22 for publishing the --

1 BY MR. CHUNG:

2 Q. That's not my question, Ms. Binder. Let
3 me put it another --

4 A. Well, I'm answering your question the way
5 I've interpreted it.

6 Q. Has Leapfrog ever considered the
7 potential public health risks associated with
8 publishing hospital safety grades for hospitals
9 where it doesn't have data for a number of
10 metrics?

11 MS. BLAIR: Objection to form.

12 BY MR. CHUNG:

13 Q. Have you ever -- has Leapfrog ever
14 considered the risks associated with that?

15 A. We look at the public health risks of
16 patient safety itself, which is, no matter what
17 the grade of the hospital, is a very significant
18 risk. It's the third leading cause of death, and
19 one in four patients admitted to a hospital
20 suffers an adverse event.

21 That is a major public health risk that
22 every one of us in this room and every American

1 faces at any hospital.

2 Q. So the answer is --

3 A. So that's what -- that's the public
4 health risk that we are most concerned with and
5 we believe people deserve to know. They deserve
6 to know about the risks that they face and where
7 we believe the risks are highest.

8 Q. So the answer is no.

9 MS. BLAIR: Objection to form. Asked and
10 answered.

11 MR. CHUNG: Hasn't answered the question.

12 MS. BLAIR: I think she's answered it
13 four times.

14 MR. CHUNG: Hasn't answer the question.

15 MS. BLAIR: That's the answer.

16 BY MR. CHUNG:

17 Q. So is the answer no?

18 A. No, we have not considered the public
19 health risks of going to a hospital that gets a
20 poor grade and -- or -- what is your question,
21 actually? Better say it again because I don't
22 understand it.

1 Q. Has Leapfrog ever considered the
2 potential public health risks associated with
3 publishing a safety grade for a hospital where it
4 just lacks data for a number of metrics?

5 MS. BLAIR: Objection. Asked and
6 answered.

7 THE WITNESS: We don't do that, so...

8 MR. CHUNG: Okay. We got an answer
9 finally.

10 MS. BLAIR: Yeah, I think she said that
11 originally, they don't grade hospitals without
12 data.

13 MR. CHUNG: No. Okay.

14 All right. Let's go to tab 9. This will
15 be Exhibit 33.

16 (Binder Deposition Exhibit 33 marked for
17 identification and attached to the
18 transcript.)

19 BY MR. CHUNG:

20 Q. So Ms. Binder, this is -- we looked at a
21 couple of documents earlier about HCA. This is,
22 I think, another one.

1 A. Yeah.

2 Q. But a different topic.

3 So it's an e-mail chain from 2023.

4 And I first want to direct your attention
5 to the second page, Bates ending in 1650. And
6 then Ms. Harmon writes that Leapfrog has received
7 a media request from a small local watchdog
8 investigative news outlet.

9 A. Wait, I don't have 1650. I have -- oh,
10 I'm sorry. I'm looking at the wrong number.

11 Q. It's the top one.

12 A. The top one. Okay. Yeah. Okay.

13 Q. And you'll see here that -- just at the
14 top of that second page, Ms. Harmon writes that
15 Leapfrog has received a media request from a
16 small local watchdog investigative news outlet
17 about Mission Hospital, which is purchased by
18 HCA.

19 A. Uh-huh.

20 Q. First of all, who is Elizabeth Harmon?

21 A. She was -- she is -- she's left Leapfrog
22 now, but she was the senior communications

1 specialist.

2 Q. Okay. And then if you go further down to
3 the middle of the -- further down the page,
4 you'll see that the request from the reporter
5 notes that Mission gets only two stars from CMS
6 for patient experience but that Leapfrog
7 regularly gives them an A safety grade.

8 Do you see that?

9 A. No --

10 Q. In the penultimate --

11 A. Oh, I see it now. Yeah.

12 Q. Yeah, the penultimate paragraph.

13 So my question is, do you know why
14 Leapfrog assigned an A grade to Mission Hospital
15 regularly while CMS rated the hospital with two
16 stars?

17 A. We follow the methodology, and the
18 methodology looks at their CMS -- their CMS
19 measures that are related to patient safety. CMS
20 Star program is a variety of measures, including,
21 but not only, patient safety. In fact, patient
22 safety is a smaller portion of the Star rating.

1 So they are not exactly the same.

2 So that's why I -- I believe Mission
3 Hospital, subsequent to this, but I'm not
4 positive, but I believe, subsequent to this,
5 their grade declined.

6 But this is exactly what I mean by risk
7 to consumers that we see. The biggest risk is
8 inflating or overstating the performance of a
9 hospital. So this is a case in point of where,
10 given the data that we had and the methodology
11 that we have, which we do stand behind, there's
12 going to be problems every now and then where
13 somebody -- we've had to overstate because we're
14 using data that's, you know, six months to a year
15 old or we're -- just various reasons. The data
16 is not perfect --

17 Q. Okay.

18 A. -- the methodology is not perfect, so we
19 end up with a situation like this which we really
20 don't like, but --

21 Q. So --

22 A. And that's what I've said in this e-mail.

1 Q. So moving further down the page, the
2 reporter requests to know how much of Leapfrog's
3 annual revenue is earned from fees that hospitals
4 pay for using its rating in their marketing. I'd
5 also like to learn if there are other ways in
6 which Leapfrog earns fees from the hospital that
7 it rates.

8 Is there any connection between
9 Leapfrog's revenue sources and the way it grades
10 hospitals?

11 A. No.

12 Q. Okay. I want to --

13 A. Those are kept separate. But the --
14 there's no -- this reporter, we would have given
15 them the answer. We would also have pointed to
16 it on the website.

17 We are open about how much we charge for
18 the accolades.

19 Q. You said you would have or did you?

20 A. Well, I don't recall it precisely, but --

21 Q. So let's go to the first page, your
22 response here.

1 A. Because we already make public what we
2 charge for accolades. So it would have been
3 there.

4 Q. Okay. But in your reply to Ms. Harmon's
5 e-mail, you state that this is officially a
6 serious PR issue; do you --

7 A. It is --

8 Q. -- do you see that?

9 A. -- yes.

10 Q. Okay. Is this a serious PR issue because
11 you've heard from other sources that Leapfrog is
12 pay to play and that these information requests
13 bear on that?

14 A. No, absolutely not.

15 Q. Okay. Why was it a -- was this not a
16 serious issue --

17 A. Because we --

18 Q. -- with the hospital survey?

19 A. No.

20 Q. How about with the hospital safety grade?

21 A. This is a serious issue of us overstating
22 the performance of a hospital through the

1 hospital safety grade --

2 Q. Right.

3 A. -- but that is what's going to happen in
4 imperfect rating systems of all sorts. And that
5 is what we feared. That's the public health
6 problem.

7 Q. Okay.

8 MR. CHUNG: Let's go to tabs 10 and 10a.
9 (Binder Deposition Exhibit 34 marked for
10 identification and attached to the
11 transcript.)

12 BY MR. CHUNG:

13 Q. All right. This is Exhibit 34. It's an
14 e-mail thread discussing what looks like a media
15 story about St. Luke's Hospital, Ms. Binder.

16 Do you see that?

17 A. Yes.

18 Q. All right. And it received an A safety
19 grade in the spring 2023, but then there's a
20 report of a former employee describing rusty and
21 damaged equipment being used on patients.

22 Do you see that?

1 A. Yes.

2 Q. Okay. So if you look at the bottom of
3 page 3 of the document Bates ending 9322, the --
4 Lula Hailesilassie, I think from CURA, writes
5 that an ex-employee exposed St. Luke's Hospital's
6 rusty and damaged equipment that is being used on
7 patients, and that St. Luke received an A grade
8 in the spring 2023 safety grade cycle.

9 Does Leapfrog take into account feedback
10 or stories like this when it computes the
11 hospital safety grade?

12 A. We don't look at this particular kind of
13 whistleblowing story. We can't -- there's no
14 reliable way to do that. There's no reliable way
15 to compare hospitals against each other on the
16 number of whistleblowers who come forward.
17 Pretty much every hospital will have some pretty
18 awful stories to tell from whistleblowers that we
19 do see --

20 Q. Every hospital? What's your basis for
21 that?

22 A. Oh, just general -- just my general

1 knowledge from 18 years at Leapfrog. We see it
2 all the time, that there's problems at every
3 hospital.

4 So, you know, our methodology is -- we're
5 using the best publicly available data that's
6 fair to compare hospitals against each other on.
7 And -- so that does not always include what a
8 whistleblower might -- might bring up.

9 Q. But -- so do you not consider or factor
10 in these reports at all in determining the
11 hospital safety grade for a particular hospital?

12 A. We have to use reliable, risk-adjusted
13 measurement. We have to use a measurement
14 process to offer a reliable grade that compares
15 hospitals against each other. Hospitals, I
16 think, would not respond well if we said, well,
17 this one had three whistleblowers, this one had
18 two, so this one gets a higher grade or
19 something.

20 That -- it's not justifiable and we
21 can't -- it doesn't have an evidence base for
22 grading.

1 Q. Okay. So none of that figures into the
2 hospital safety grade, is your testimony?

3 A. Well, it figures into Leapfrog. I mean,
4 we care deeply about these reports, and we --
5 it's very upsetting.

6 Q. Okay. Are you aware of any evidence that
7 Leapfrog's hospital safety grades have caused
8 reputational harm to hospitals?

9 A. We don't track that, so I don't know.

10 Q. Okay. Now, would you agree that before
11 Leapfrog issues a hospital safety grade to a
12 particular hospital, that hospital has a
13 preexisting reputation? Would you agree with
14 that kind of basic proposition?

15 A. Yes.

16 Q. Okay. And that reputation could be good
17 or bad or somewhere in the middle, right?

18 A. Yeah.

19 Q. Okay. For example, a hospital could have
20 a five-star CMS rating. And would you agree that
21 that's likely to positively impact a hospital's
22 reputation?

1 MS. BLAIR: Objection to form.

2 THE WITNESS: It depends. I mean, if
3 there's other ratings or other kinds of things
4 that make them look bad or they have 12
5 whistleblowers who have just come forward and are
6 on the front page of the paper, it's not going to
7 help that much.

8 BY MR. CHUNG:

9 Q. Okay. Receiving an A Leapfrog grade for
10 that same hospital would, would you say, help
11 that five-star CMS hospital's reputation?

12 MS. BLAIR: Objection to form.

13 THE WITNESS: Again, I would think so.
14 Maybe. But in the context of a variety of other
15 kinds of reputational issues, it would -- I'm not
16 sure which would -- could be pointed to as the
17 key thing.

18 MR. CHUNG: Okay. Let's go to tab 88.

19 This will be Exhibit 35.

20 (Binder Deposition Exhibit 35 marked for
21 identification and attached to the
22 transcript.)

1 BY MR. CHUNG:

2 Q. Okay. Exhibit 35, Ms. Binder, it's an
3 e-mail chain, I think principally between you and
4 Ms. Danforth. And you'll see that it has to do
5 with the Keck Medical Center.

6 Do you see that?

7 A. Yes.

8 Q. Okay.

9 A. But I don't recall this e-mail chain, so
10 I will need to read it.

11 Q. Yeah, please take a look.

12 I first want to direct your attention --
13 it's really the sixth page --

14 A. I'm not finished.

15 Okay.

16 Q. All right. So in Bates ending 861, Ling
17 Zheng from Keck writes to Ms. Danforth basically
18 requesting that Leapfrog suppress its PSI 90
19 score based on a change in how CMS evaluates
20 certain metrics. Is that what she's kind of
21 getting at?

22 A. Uh-huh, yes.

1 Q. And if you look at page 3 of the
2 document, Bates ending 858, there's a follow-on
3 from a Ms. Hall where she writes, We feel that
4 this seriously misrepresents to the public the
5 safety at Keck Hospital of USC when, in fact,
6 there's been no clinical or outcome changes,
7 merely the application of a new AHRQ methodology
8 to historical data. We remain concerned that
9 this unfairly harms our reputation.

10 So is it fair to say that Keck was
11 concerned that a lower safety grade here would
12 negatively impact its reputation in its market?

13 MS. BLAIR: Object to form.

14 THE WITNESS: I don't know. They don't
15 talk about that particular issue.

16 BY MR. CHUNG:

17 Q. Well, she says -- we just read it here:
18 We remain concerned that this unfairly harms our
19 reputation.

20 How do you read that statement?

21 A. Oh, so they're concerned about -- yeah,
22 then they are concerned about their --

1 Q. Okay.

2 A. -- grade as a result of this one measure.

3 Q. So looking at the next page, Bates ending
4 857, you write, just to Ms. Danforth, as a follow
5 on, I don't like their language about reputation.
6 How did this change affect their letter grade?

7 Why didn't you like their -- Ms. Hall's
8 language about reputation?

9 A. I don't recall why I said that, but...

10 Q. Okay. What did this -- what about the
11 language stood out to you, if you remember?

12 A. I don't recall.

13 Q. Okay. Did you disagree with the
14 connection that Ms. Hall was drawing between a
15 lower safety grade and the institution's
16 reputation?

17 A. I don't recall why I said it that way. I
18 think -- I can see that they might feel that
19 their reputation is at stake with any kind of
20 scoring system. So I can see that. But I think
21 what is clear --

22 Q. Well, they're focusing specifically on

1 the Leapfrog hospital safety grade here.

2 Are they talking about other scoring
3 systems?

4 A. No. They're talking about Leapfrog --

5 Q. Right.

6 A. -- and they're talking -- this is not a
7 marketing person who's writing to Leapfrog. This
8 is -- it looks like their quality -- their chief
9 medical officer.

10 Q. Right.

11 A. So their chief medical officer is
12 concerned about the risk adjustment on this one
13 measure, which further -- it seems like further
14 analysis was done. And it seems like that was --
15 that happened throughout a bunch of large
16 teaching hospitals and their PSI rate.

17 So compared to others, they were not
18 unduly harmed, so to speak. Their grade -- their
19 particular performance on this one measure was
20 not particularly harmed, it looks like.

21 But I'm not the expert on this. I would
22 definitely talk to Missy because I can't remember

1 exactly -- this was, like, two years ago.

2 Q. Has Leapfrog received any feedback from
3 hospitals regarding the accuracy or fairness of
4 their assigned safety grades?

5 A. Sure.

6 Q. Okay. From who?

7 A. We value that -- we ask for them --

8 Q. So the --

9 A. -- to come to us with --

10 Q. -- question is, from who?

11 A. From hundreds of hospitals, both positive
12 feedback and negative feedback. We get lots of
13 both. We ask for it. That's why we have a
14 public comment period. That's why we have a
15 whole variety of mechanisms that we use all the
16 time to encourage feedback.

17 Q. In terms of the negative feedback --

18 A. Yes.

19 Q. -- regarding the fairness and the
20 accuracy of an assigned safety grade, what's the
21 most prevalent feedback you hear?

22 VIDEO TECHNICIAN: Ms. Binder.

1 THE WITNESS: Oh, sorry.

2 Well, they don't like the low grade.

3 That's the -- they don't -- hospitals that get
4 lower grades will say it's not -- we don't agree
5 with the methodology.

6 BY MR. CHUNG:

7 Q. Okay. And how does Leapfrog respond to
8 that type of feedback?

9 A. We spend a lot of time, actually,
10 talking -- personally talking with hospitals that
11 get a low grade and going through the measures
12 that led to it and how it applied to the
13 methodology, et cetera, and helping them to set
14 goals to -- for their improvement. We don't tell
15 them how to improve, but we definitely can say,
16 here's an area where you have some shortcomings
17 that if you put a focus on -- for instance, you
18 have a very low -- a very high rate of central
19 line infections; here -- you know, you should
20 really focus on that. And -- among other things.
21 And we'll just take them through it.

22 We spend a lot of time with hospital CEOs

1 in particular that are unhappy with the grade
2 and, you know, that's -- we always do that for
3 free. We do it all the time. We spend more time
4 on -- with hospitals that have lower grades
5 typically because they -- it's -- you know, it's
6 upsetting to them, and we understand that.

7 I will tell you that we do see
8 improvement in those hospitals, and it's
9 incredibly gratifying. It's one of the best
10 parts of my job, frankly, is when I see a
11 hospital that's gone from, you know, an F or a D
12 to an A. And I see it all the time, and it's
13 really, really impressive.

14 Q. Are you --

15 A. Hospitals can do this.

16 Q. Are you aware of any cases where
17 Leapfrog's safety grades have conflicted with
18 other hospital quality ratings?

19 A. Yes.

20 Q. Okay. And how has Leapfrog addressed
21 those types of conflicts?

22 MS. BLAIR: Objection to form.

1 THE WITNESS: We point out how -- well,
2 it depends, actually. It just sort of depends on
3 what context.

4 So if a reporter is asking me about it,
5 they're saying, like, your example, they got five
6 stars from CMS but you gave them a C. Why? I
7 will say, because we are focused on patient
8 safety, and the five stars from CMS has less of a
9 focus on safety.

10 BY MR. CHUNG:

11 Q. Okay. So in those -- I'm glad that you
12 raised that example.

13 In response to a reporter who identifies
14 that sort of discrepancy or conflict --

15 A. Uh-huh.

16 Q. -- what you underscore for the reporter
17 is that CMS and Leapfrog are measuring different
18 things; is that right?

19 A. Well, some of the same things. There is
20 overlap.

21 Q. Right.

22 A. They do look at the same patient safety

1 measures we do, but they put less of a weight on
2 those. Of course, for us, it's a heavy weight.
3 For them, it's a much smaller weight. So
4 therefore, they will sometimes have a
5 different -- they're often correlated, but
6 sometimes, for a particular hospital, there may
7 be some difference.

8 Q. Okay. And we're looking in particular at
9 the CMS Star --

10 A. Yes.

11 Q. -- rating system, correct?

12 So that just given the different factors
13 and the weightings and the focus for one
14 particular hospital, what you're saying is that
15 the ratings can be very different between the
16 two, between Leapfrog and CMS; is that --

17 A. On occasion that will happen because CMS
18 is looking at a -- they're not looking at safety
19 measures the same way we are.

20 Q. Okay.

21 A. But we are looking at the same safety
22 measure -- many of the same safety measures.

1 Q. Okay.

2 MR. CHUNG: Why don't we take a break
3 here. We in the next topic.

4 MS. BLAIR: Sure.

5 VIDEO TECHNICIAN: The time is 4:52 p.m.
6 This ends unit 4. We're off the record.

7 (A recess was taken.)

8 VIDEO TECHNICIAN: The time is 5:22 p.m.
9 This begins unit number 5. We're on the record.

10 (Binder Deposition Exhibit 36 marked for
11 identification and attached to the
12 transcript.)

13 BY MR. CHUNG:

14 Q. All right. We're now going to put
15 Exhibit 36 in front of you, which is Leapfrog's
16 answer to the plaintiffs' amended complaint, and
17 this is topic 15 among the 30(b)(6) topics that
18 you've been designated for, Ms. Binder.

19 A. Yes.

20 Q. And you're familiar with Leapfrog's
21 answer here?

22 A. Yes.

1 Q. Okay. So we're going to look first --
2 we're going to go through a number of, basically,
3 Leapfrog's denials of various allegations here,
4 and then I'll ask you questions about those.

5 So, first, paragraph 2. So if you look
6 at page 3, paragraph 2, in Leapfrog's answer, it
7 denies the allegations that until last year TLG
8 continued to assign grades to plaintiffs based on
9 how similarly situated participating hospitals
10 performed on standard metrics.

11 But isn't it true that, until the fall of
12 2024, Leapfrog did grade the plaintiff hospitals
13 using an imputation method that assigned the mean
14 score of similarly situated hospitals?

15 A. Okay. I'm -- your question is kind of a
16 long one, so I got lost in the middle of it.
17 Sorry.

18 Q. Okay. So I'm just asking for the basis
19 for this denial here.

20 A. Well, the line Leapfrog continued to
21 assign grades to plaintiffs based on how
22 similarly situated participating hospitals

1 performed on standard metrics.

2 Q. Yes. So why deny that?

3 A. I'm just going to re-read this
4 paragraph to be clear on this.

5 Because we -- we are arguing about
6 similarly situated participating hospitals, what
7 that definition would be. And that's not a
8 good -- good characterization of our methodology,
9 as it was in that time period.

10 Q. Okay. So that's just incorrect, is what
11 you're testifying?

12 A. We're denying it, yes.

13 Q. Okay. So it's not correct that, until
14 the fall of 2024, Leapfrog graded plaintiff
15 hospitals using an imputation method that
16 assigned the mean score of similarly situated
17 hospitals?

18 MS. BLAIR: Objection to form. I think
19 you misread that sentence.

20 THE WITNESS: It says --

21 BY MR. CHUNG:

22 Q. I'm just reading it back to you.

1 MS. BLAIR: I think you misread it.

2 MR. CHUNG: Okay.

3 THE WITNESS: It says --

4 MS. BLAIR: -- we assigned grades.

5 MR. CHUNG: I'm not reading it --

6 MS. BLAIR: Oh, I'm sorry.

7 THE WITNESS: We assign -- until last --
8 it says -- this is what we denied: Until last
9 year, Leapfrog continued to assign grades to
10 plaintiffs based on how similarly situated
11 participating hospitals performed on standard
12 metrics.

13 BY MR. CHUNG:

14 Q. Okay. So why are --

15 A. I'm saying similarly situated
16 participating hospitals is not well defined. And
17 that's not -- that's not referring to imputation
18 or anything else in that particular sentence.
19 It's just a very questionable way of describing
20 our methodology.

21 Q. Okay. Let's move on to paragraph 22.

22 So direct -- I specifically wanted to ask

1 you about the last sentence in the paragraph: It
2 specifically explained its 2024 change was
3 designed to prevent non-participating hospitals
4 from inadvertently benefitting, compared to
5 hospitals that self-report, even though TLG has
6 no data to show how non-participation could
7 benefit a hospital.

8 Do you see that?

9 A. I don't, actually. That's paragraph --

10 Q. 22.

11 A. -- 22? I've got page 13?

12 Q. Yes. Going on to the next page. So the
13 last sentence.

14 It specifically explained...

15 A. Oh, yeah.

16 Q. Do you see that? If you can read that
17 sentence.

18 A. We deny that the purpose of the change in
19 2024 was to prevent non-participating
20 hospitals --

21 Q. Okay.

22 A. -- from anything. That was not the

1 purpose of the change.

2 Q. Well, I'm going to show you a document
3 titled, Final Updates to the Leapfrog Hospital
4 Safety Grade Methodology.

5 MR. CHUNG: This will be Exhibit 37.

6 (Binder Deposition Exhibit 37 marked for
7 identification and attached to the
8 transcript.)

9 BY MR. CHUNG:

10 Q. Okay. And if you look at the second
11 page, Ms. Binder, under responses to public
12 comments -- do you see that?

13 A. Yes.

14 Q. Okay. Under 4, comment or supported the
15 change to the imputation methodology, the second
16 sentence reads, Hospitals that choose not to
17 complete the survey should not inadvertently
18 benefit from hospitals that continue to strive to
19 make improvements and maintain Leapfrog
20 standards.

21 So given what this document says
22 regarding the change in the imputation

1 methodology, what's your basis for denying the
2 sentence -- the last sentence of paragraph 22?

3 A. It says --

4 MS. BLAIR: Objection to form.

5 THE WITNESS: It says it was
6 specifically -- it was designed to prevent. This
7 is a response to a comment that we agree that
8 there should not be an inadvertent benefit from
9 not reporting. That said, it is not -- it was
10 not the design -- it was not the centerpiece or
11 the purpose or the design of and the reason
12 for -- the fundamental reason for us to pursue
13 this methodology.

14 BY MR. CHUNG:

15 Q. Okay.

16 A. Fundamental reason --

17 Q. That's the basis --

18 A. -- is consumers --

19 Q. -- for your denial here; is that correct?

20 A. I believe so.

21 Q. Okay. Going to paragraph 24 in the
22 answer.

1 The plaintiffs' allegation here is that,
2 for the four imputed measures -- CPOE, BCMA, IPS,
3 and hand hygiene -- if a hospital does not
4 participate in TLG's survey, TLG assigns a point
5 value that is equivalent to receiving limited
6 achievement for this measure, its lowest possible
7 score, without any factual basis.

8 Do you see that?

9 A. Yes.

10 Q. All right. And the next sentence is, The
11 result is that hospitals who elect not to
12 participate in TLG's survey receive only 60 out
13 of 400 possible points in these four categories.

14 What's the basis for denying this
15 allegation?

16 A. The last sentence in this -- in
17 paragraph 24, it says, TLG has no basis to assign
18 that low value.

19 We have a basis to assign the low value.

20 Q. Okay. Paragraph 25, the next one:
21 Leapfrog denies that TLG's imputation model for
22 ranking non-participating hospitals directly

1 conflicts with TLG's own national expert panel's
2 guidance.

3 Do you see that?

4 A. Yes.

5 Q. All right. And then as TLG explains, not
6 all hospitals have enough data publicly available
7 to be eligible for a grade.

8 Why deny that?

9 A. We didn't deny that not all hospitals
10 have enough publicly available data to be
11 eligible for a grade.

12 Q. Okay. You're just denying the previous
13 sentence; is that right?

14 A. We deny -- let's see.

15 MS. BLAIR: I'll just object to form,
16 that it mischaracterizes the answer on page 16.

17 THE WITNESS: We admit to the allegations
18 that state, TLG explains not all hospitals have
19 enough data publicly available to be eligible for
20 a grade.

21 And we also admit to this allegation: As
22 per the national expert guidance, Leapfrog has

1 requirements for the minimum amount of data it
2 needs to issue an accurate grade.

3 So we admit to those.

4 BY MR. CHUNG:

5 Q. Okay.

6 A. And then we also admit to, you know,
7 hospitals missing more than six process measures
8 are not graded.

9 Q. Okay.

10 A. So the issue is imputed data, and we
11 count imputed data as data.

12 Q. Okay. Let's go to paragraph 26.

13 And Leapfrog denies the sentence: In
14 response, TLG falsely states the hospital safety
15 grade reflects how well a hospital does on
16 safety, not whether they complete the hospital
17 survey.

18 Does Leapfrog admit that it made that
19 statement?

20 MS. BLAIR: Objection to form.

21 THE WITNESS: The statement the -- which
22 statement?

1 BY MR. CHUNG:

2 Q. Exactly: The hospital safety grade
3 reflects how well a hospital does on safety, not
4 whether they complete the hospital survey.

5 Does Leapfrog stand by that statement?

6 A. I don't recall ever seeing that statement
7 made the way it's written here. Because -- but
8 that said, our focus is how well a hospital does
9 on safety, not whether they -- right? And
10 completing the survey is not what it's about.
11 It's doing well on the survey would be what we
12 would be looking at.

13 Q. Right. But this statement, the hospital
14 safety grade reflects how well a hospital does on
15 safety, not whether they complete the hospital --

16 A. That --

17 Q. -- survey, does -- is that -- does
18 Leapfrog stand by that statement?

19 A. Yes.

20 Q. Okay. Going to paragraph 57. Okay?
21 It's on page 29.

22 A. Okay.

1 Q. Okay. So it looks like Leapfrog admits
2 the first part of the allegation, which is
3 plaintiffs are among the many hundreds of
4 hospitals across the country who choose not to
5 participate in the survey.

6 But then Leapfrog denies the rest: Given
7 that non-participation, TLG could easily have
8 told consumers, as it does on the
9 leapfroggroup.org, it lacks sufficient data to
10 provide safety grades for plaintiffs. Instead,
11 it imputed scores to plaintiffs and gave them
12 failing or near failing grades on the
13 hospitalsafetygrade.org website.

14 What's the basis for this denial?

15 A. Well, there's a lot of basis in this
16 particular paragraph, which is very recklessly
17 written given what we know about, and what we
18 have clearly stated on our website, about our
19 methodology.

20 So we don't -- instead, it imputed scores
21 to plaintiffs and gave -- the grades come from
22 all of the measures within the grade methodology,

1 which is 32 measures, not just the imputed
2 measures.

3 Q. But is it incorrect that they were given
4 failing or near failing grades?

5 MS. BLAIR: Objection to form. Misstates
6 the context of the next sentence.

7 THE WITNESS: They were -- right.

8 BY MR. CHUNG:

9 Q. Well, that's -- my question is, is it
10 incorrect that they were given failing or near
11 failing grades?

12 A. They were given Ds and Fs.

13 Q. Okay. Is it correct that, for at least
14 some of the metrics -- right? -- I'm not --
15 again, I'm not reading from the answer here.

16 Is it correct that, at least for certain
17 of the metrics, they were -- the hospitals here
18 were given imputed scores?

19 A. That's not what this says.

20 Q. Yeah. But I'm --

21 A. There were four metrics that are subject
22 to imputation in a well-described and

1 well-thought-through process, and it is not only
2 the reason why they get Ds and Fs. And that's
3 how this is recklessly written. It is not an
4 accurate characterization at all of what happened
5 with the hospital safety grade and why these
6 hospitals did poorly on it.

7 Q. Okay. So paragraph 59, just a couple
8 down, about Delray Medical Center.

9 You would -- I think -- Leapfrog admits
10 that Leapfrog assigned Delray Medical Center the
11 F grade, right?

12 A. Yes.

13 Q. But the denial is, under its flawed
14 technology [sic], TLG assigned Delray Medical
15 Center the lowest possible score on multiple
16 criteria for which TLG had no information,
17 including handwashing -- these are the imputed
18 metrics, right?

19 A. Right.

20 Q. All right. So what is -- is it incorrect
21 that TLG assigned Delray Medical Center the
22 lowest possible score on these four imputed

1 metrics?

2 MS. BLAIR: Object to form.

3 THE WITNESS: The objection -- or the
4 denial would be around the line "to which TLG had
5 no information" and --

6 BY MR. CHUNG:

7 Q. Well, isn't it true -- Ms. Binder, isn't
8 it true that, for those four metrics -- right? --
9 the imputed metrics, TLG did not have data with
10 respect to those four imputed metrics? Isn't
11 that correct?

12 A. We have imputed data. And our imputed
13 data we stand behind.

14 Q. What is the imputed data? Is it the
15 score --

16 A. The score. The imputed score is based on
17 our experience and knowledge and the expert panel
18 recommendation. So it's based on that.

19 And -- so we would say that it is not
20 based on nothing, which is what this --

21 Q. Okay. But --

22 A. -- is sort of claiming.

1 Q. All right. So you're calling the scores
2 themselves data; is that right?

3 A. It's information. This says we had no
4 information. Imputed scores are information, and
5 they're based on -- they're based on thoughtful
6 consideration.

7 Q. In other words, are you saying that the
8 scores, the imputed scores here, the lowest
9 available scores, are based on the scores?

10 MS. BLAIR: I'll object to form.

11 BY MR. CHUNG:

12 Q. Is that what you're saying?

13 A. They're -- no. Scores are -- well, that
14 would be sort of circular reasoning to say the
15 scores are based on scores.

16 Q. That's what I take you to mean. So what
17 do you mean? You said that --

18 A. That imputed scores are information, and
19 that we came to those scores through a process
20 that is fundamentally thoughtful and informed.

21 Q. Okay. But are those scores based on any
22 data that TLG received from the hospital or from

1 any secondary sources?

2 A. It's not based on data we got from the
3 hospital, but it's not based on no information,
4 which is what this states.

5 Q. Okay. Paragraph 88. It reads that this
6 has directly caused -- that Leapfrog's messaging
7 around the safety grades has directly caused
8 plaintiffs harm to their reputation and good
9 will.

10 Do you deny that the D and F grades that
11 were assigned to the plaintiff hospitals have
12 damaged the reputation of the hospitals?

13 A. Those hospitals performed so poorly in so
14 many ways that I could never isolate it to just
15 Leapfrog.

16 Q. So are you denying it?

17 MS. BLAIR: Objection.

18 THE WITNESS: We've denied it.

19 BY MR. CHUNG:

20 Q. Okay. And that's the basis for your
21 denial; is that correct?

22 A. That it's impossible to know whether it's

1 Leapfrog or just other elements of the poor
2 performance of these hospitals --

3 Q. Okay.

4 A. -- that would cause them harm to their
5 reputation and good will which -- I haven't seen
6 evidence, but if there is evidence of that, which
7 there could be, that there's harm to their
8 reputation, it would be impossible -- or at least
9 I haven't seen any evidence or any way of
10 isolating that to Leapfrog.

11 Q. Okay. But would it be fair to say that,
12 just standing alone, that an F grade to a
13 hospital could negatively impact the reputation
14 of that hospital?

15 A. Yeah. It could, if it -- but it would
16 especially harm their reputation if they also had
17 one star or they had a bad press report --

18 Q. I'm just talking about a Leapfrog
19 F grade. I'm not talking about other measures.

20 A. It -- yeah, it could. I guess it could.

21 Q. Okay.

22 A. But it would be very hard to point that

1 out in a hospital that has other problems with
2 their safety performance and their quality.

3 Q. Let's go to -- has Leapfrog communicated
4 with any federal or state government agencies in
5 relation to this litigation?

6 A. We are in -- we are in communication with
7 CMS frequently on various topics. There is a
8 liaison to our board who is --

9 Q. My question is --

10 A. So --

11 Q. So with CMS, any communications with CMS
12 relating to this litigation, is my question.

13 A. I was trying to answer it.

14 Q. Right. I'm trying to get to the point.

15 So any questions --

16 A. I was right at that point, and then you
17 interrupted me. So --

18 Q. Okay.

19 A. All right? We have a liaison to our
20 board. Her name is Michelle Schreiber. She is
21 the director of quality programs at CMS. And so
22 she's been to the board meetings and she's fully

1 briefed on the lawsuit.

2 Q. Okay. Any -- and what's been the purpose
3 of those briefings?

4 A. To brief the board. As I said earlier,
5 I've briefed the board on -- well, with counsel
6 present, we have briefed the board on this
7 lawsuit.

8 Q. Okay. Has Leapfrog paid to lobby any
9 federal or state or local governments in relation
10 to this litigation?

11 A. No.

12 Q. No? Okay. Have you been involved in the
13 public relations aspect of Leapfrog's response to
14 this lawsuit?

15 A. Yes.

16 Q. All right. And in what capacity have you
17 been involved in the response?

18 A. I've been on the team within Leapfrog
19 that has worked with -- has worked on the
20 response to the lawsuit, starting when it was
21 filed.

22 Q. Okay.

1 MR. CHUNG: Let's go to tab 57. This
2 will be Exhibit 38.

3 (Binder Deposition Exhibit 38 marked for
4 identification and attached to the
5 transcript.)

6 BY MR. CHUNG:

7 Q. And you'll see here it's an e-mail thread
8 forwarded from Lauren Bailey to Karen Jupiter
9 sharing a thread she had with you.

10 Do you see that?

11 A. Yes.

12 Q. And you wrote, Let's make a goal to have
13 one story at a minimum every three days about
14 Tenet or one of the hospitals.

15 Do you see that?

16 A. Yes.

17 Q. All right. And why did you make that a
18 goal?

19 A. Because the plaintiff hospitals'
20 representative, who's one of your attorneys at
21 Gibson Dunn, had been all over the media in that
22 particular community telling falsehoods about

1 Leapfrog, and it was necessary for us to become
2 involved in having a voice in the media in that
3 local community, given that these falsehoods were
4 being thrown about in a very reckless way.

5 Q. And was part of that -- part of that
6 strategy of having one story at minimum every
7 three days about Tenet or one of the hospitals,
8 what were those stories going to be about?

9 A. Patient safety.

10 Q. Well, about Tenet or one of the
11 hospitals. Right? You specifically said that
12 you want to have one story at a minimum every
13 three days about Tenet or one of the plaintiff
14 hospitals. Right?

15 A. Uh-huh.

16 Q. So what about Tenet or the plaintiff
17 hospitals were you directing these stories to be
18 about?

19 A. Well, I wasn't saying what they
20 necessarily should be about, but with regard to
21 the hospitals, it would be about their
22 performance on different parts of their safety

1 grade or patient safety.

2 Q. Right. So the idea here was to have one
3 story at minimum every three days, a negative
4 story about Tenet or one of the plaintiff
5 hospitals; is that correct?

6 A. A story that would point out the record
7 on patient safety and/or respond to the
8 continuous series of lies, frankly, coming out
9 from the plaintiff hospitals and the
10 representative -- the lawyer representing them.

11 Q. But, here, it's specific to Tenet or --
12 or the hospitals, correct?

13 MS. BLAIR: Objection to form. Asked and
14 answered.

15 THE WITNESS: Yeah.

16 BY MR. CHUNG:

17 Q. Okay.

18 A. I mean, that's who's telling the lies, so
19 yes.

20 Q. Okay.

21 MR. CHUNG: So let's turn to
22 Exhibit 84 -- or tab 4, I'm sorry.

1 Okay. So we are going to mark this
2 Exhibit 39.

3 (Binder Deposition Exhibit 39 marked for
4 identification and attached to the
5 transcript.)

6 BY MR. CHUNG:

7 Q. So Ms. Binder, this relatively thick
8 exhibit, I'm going to represent to you that this
9 is a Slack conversation that was produced by
10 CURA Strategies in response to a subpoena that
11 was sent to them.

12 And I want to direct your page -- direct
13 your attention to the page ending Bates 467.
14 Okay.

15 And do you see toward the middle of the
16 page -- Sarah Farinelli, is she at CURA
17 Strategies?

18 A. Yes.

19 Q. Okay. Someone that's working on the
20 public relations for you relating to this -- the
21 lawsuit; is that right?

22 A. She's working -- yes, but also public

1 relations in general for Leapfrog.

2 Q. Okay. And then she sends an article from
3 Bloomberg Law about Leapfrog's motion to dismiss
4 being denied.

5 Do you see that?

6 A. Yes.

7 Q. Okay.

8 MR. CHUNG: And just so you have it,
9 we're going to mark this Exhibit 36, I think.

10 MS. BLAIR: 40.

11 MR. CHUNG: 40, sorry. The article
12 itself.

13 (Binder Deposition Exhibit 40 marked for
14 identification and attached to the
15 transcript.)

16 BY MR. CHUNG:

17 Q. And do you recognize this article? Is
18 this the article that's linked by Ms. Farinelli
19 in the chat?

20 A. I believe so.

21 Q. Okay.

22 A. Looks a little different, but...

1 MS. BLAIR: And for the record, Daniel,
2 this doesn't have a Bates number, but it comes
3 from...

4 MR. CHUNG: It comes from Bloomberg Law.

5 MS. BLAIR: Oh.

6 MR. CHUNG: It's what we printed out.

7 BY MR. CHUNG:

8 Q. So on -- if we continue, Stephanie Wight
9 is another CURA Strategies member; is that right?

10 A. Yes.

11 Q. Okay. And at 7:50, she writes that -- On
12 Leah's e-mail, I agree about having talking
13 points ready, but I don't know about complaining
14 to Bloomberg.

15 Do you see that?

16 A. Yes. I -- I always say to the PR firm
17 that we will not complain or try to get
18 retractions unless it's an extremely serious
19 problem.

20 Q. So what e-mail is -- do you know what
21 e-mail that Stephanie Wight is referring to here?

22 A. No.

1 Q. Okay. Did you want to complain to
2 Bloomberg Law about this article?

3 A. I very much doubt it. My usual statement
4 is only when it's a serious problem.

5 Q. Okay. But you don't remember this
6 specific instance whether you wanted to complain
7 to Bloomberg Law about this article?

8 A. I don't recall, but I don't believe I
9 wanted to.

10 Q. Okay.

11 A. Because it wouldn't be -- I almost never
12 want to.

13 Q. So moving to the next page ending in
14 Bates 468, at the top of the page, Ann writes,
15 The fact that it is Bloomberg, too, I think is
16 influencing her. She wants to hurt Tenet, and to
17 do that, she has to hit them financially.

18 Do you see that?

19 A. Yeah, but I don't know what she's talking
20 about.

21 Q. This doesn't reflect a conversation, any
22 sort of conversations, that you had with

1 CURA Strategies about the public relations
2 strategy?

3 A. No.

4 Q. You didn't want to hurt Tenet?

5 A. I want to make sure that coverage of this
6 is aggressive in defending our integrity and our
7 reputation, but that's not necessarily hurting
8 Tenet.

9 And also --

10 Q. Well, she's specifically calling out
11 Tenet here, right?

12 A. Right. Yeah.

13 Q. And she specifically says she wants to
14 hurt Tenet, and to do that, she has to hit them
15 financially.

16 Do you see that?

17 A. Right. Yeah. I don't --

18 Q. And so do you -- does this reflect
19 discussions you had with CURA about a PR campaign
20 to hurt Tenet financially?

21 A. No. I don't even know how we would do
22 that. So...

1 Q. So where is this coming from?

2 MS. BLAIR: Objection to form.

3 BY MR. CHUNG:

4 Q. These are --

5 A. I don't know where it's coming from. I
6 don't --

7 Q. This --

8 A. This is the first I've seen it. So...

9 Q. These are the public relations
10 professionals that you've hired, correct?

11 A. These are -- this is our PR firm that
12 works with us on variety of news items --

13 Q. Okay.

14 A. -- including when this lawsuit became an
15 issue for us.

16 Q. Did you ask CURA to come up with a plan
17 to hurt Tenet financially as part of the public
18 relations campaign?

19 A. No, that's why I'm puzzled by that line.
20 We certainly did want coverage to be, especially
21 in the South Florida area, to highlight the
22 performance of these hospitals and to defend our

1 reputation against the very --

2 Q. Okay.

3 A. -- very alarming lies that were being
4 told by counsel.

5 Q. Did the decision -- did the judge's
6 decision denying Leapfrog's motion to dismiss
7 somehow influence your public relations strategy
8 at this point?

9 A. No. I mean, other than it's news, so
10 that would influence it.

11 Q. Okay.

12 A. We would be responding to questions from
13 reporters, so we would be announcing it
14 ourselves.

15 Q. All right. How, if at all -- how, if at
16 all, did it change or impact the public relations
17 strategy? I'm talking about the denial of the
18 motion to dismiss.

19 A. We would respond -- I think we probably
20 had inquiries from reporters that we would
21 respond to.

22 Q. Okay. Let's go to tab 67.

1 MR. CHUNG: This will be Exhibit 41.
2 (Binder Deposition Exhibit 41 marked for
3 identification and attached to the
4 transcript.)

5 BY MR. CHUNG:

6 Q. And this is an e-mail from April 29,
7 2025, from a Robert Galvin at Blackstone Group to
8 you, or an e-mail exchange.

9 And in the e-mail exchange you ask
10 Mr. Galvin for Saum Sutaria's e-mail address.

11 Who is -- is Saum Sutaria the CEO of
12 Tenet?

13 A. Yes.

14 Q. All right. And you ask him to provide
15 you with direct contact info for Mr. Sutaria; is
16 that right?

17 A. Yes.

18 Q. And why did you want his direct contact
19 information?

20 A. To reach out to him.

21 Q. About what?

22 A. About -- talking about what can be done

1 to not have this ridiculous, frivolous lawsuit
2 and be more constructive.

3 Q. What did you want to write to him?

4 A. What I just said.

5 Q. That's what you were going -- did you
6 write that to him?

7 A. I believe I did, actually.

8 Q. Okay. What do you recall specifically?
9 I mean, I think you used the word "ridiculous"
10 and "frivolous lawsuit." But what do you recall
11 communicating to Mr. Sutaria?

12 A. I'd have to pull out -- it was a short
13 note that said, I've heard that you contacted
14 Johns Hopkins and -- I was glad to hear that he's
15 working on some patient safety programs at Tenet.
16 And that was it.

17 Q. Okay. So -- you can put that down.

18 I just wanted to ask some just questions
19 going back to -- kind of basic questions about
20 the methodology and the hospital safety grade.
21 So, earlier, when we were going through kind of
22 the chronology of expert panel meetings regarding

1 the methodology, there was discussion among the
2 expert panelists or notes about a bias in favor
3 of non-participating hospitals.

4 Do you recall that type of discussion?

5 MS. BLAIR: Objection to form.

6 THE WITNESS: No.

7 BY MR. CHUNG:

8 Q. Or from the previous -- from the previous
9 versions of the methodology. There was
10 discussion about how, under the previous versions
11 of the methodology, hospitals may be
12 disincentivized from responding to the survey.

13 Do you recall that?

14 A. I think there's discussion of that.

15 Yeah.

16 Q. Right. So would you say that -- so
17 that's -- would you say that another way of
18 putting that is that there was a bias in favor --
19 in those previous methodologies, bias in favor of
20 hospitals that didn't respond to the survey?

21 A. I think that was some of the commentary
22 that we heard when we had --

1 Q. Right.

2 A. -- it for public comment, we heard from
3 hospitals that felt that they were -- we were
4 inflating the score for those four measures for
5 hospitals that -- for no reason, for hospitals
6 that we -- that weren't reporting to the survey.
7 And reporting to the survey is a very high bar
8 and a very hard thing to do so that we should not
9 be inflating their scores.

10 Q. Okay. Doesn't the current methodology,
11 though, the current imputation methodology, raise
12 a bias against non-reporting hospitals?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: I don't believe it does,
15 and neither does our expert panel.

16 BY MR. CHUNG:

17 Q. Okay. Why grade non-participating
18 hospitals at all?

19 A. Because those hospitals -- all hospitals,
20 but those hospitals are caring for thousands,
21 tens of thousands, hundreds of thousands of
22 Americans every day who are entrusting their

1 lives every single -- 24/7 to these hospitals.
2 And people deserve to know how they're doing. So
3 we don't think that we should just exempt some
4 hospitals because they are not transparent.

5 Q. Okay. So transparency is the key here;
6 is that right?

7 MS. BLAIR: Objection to form.

8 THE WITNESS: Consumers having
9 information they need to protect their lives and
10 their families' lives when they are needing
11 hospital care, that's the foremost issue. And
12 transparency allows for that.

13 BY MR. CHUNG:

14 Q. Okay. But is -- just going back to
15 transparency, are Leapfrog's hospital safety
16 grades for these hospitals that didn't
17 participate, are they transparent?

18 A. Extremely so.

19 Q. All right. Well, is there any
20 information on Leapfrog's websites, other than
21 the link to the imputation -- other than the link
22 to the scoring methodology, about what the

1 limited achievement score means?

2 MS. BLAIR: Objection to form.

3 THE WITNESS: Well, the -- I'm -- yeah, I
4 don't understand limited -- limited achievement
5 is not discussed on the hospital safety grade.
6 It is -- it's -- the hospitals are scored on each
7 one of the measures, including those four imputed
8 measures.

9 BY MR. CHUNG:

10 Q. Okay. Didn't --

11 A. Limited achievement is from the survey.

12 Q. Didn't Leapfrog receive public comment in
13 connection with the change in methodology in 2024
14 that the public will not understand nor dig into
15 the methodology of the grades? Are you aware of
16 that public comment?

17 A. Some -- some commenters expressed that.
18 Yes.

19 Q. Okay. And Leapfrog doesn't provide the
20 information necessary to completely --
21 comprehensively understand the methodology,
22 correct? Other than linking to the -- to the

1 scoring methodology; is that right?

2 A. We link --

3 MS. BLAIR: Objection to form.

4 THE WITNESS: No. We link to the scoring
5 methodology in several different places on the
6 Hospital Safety Grade website and we explain in
7 layman's terms to anyone who is looking at any
8 particular hospital how they do on each measure,
9 and that we assign -- we assigned scores when we
10 don't have the data.

11 BY MR. CHUNG:

12 Q. Okay. Do you think the scoring
13 methodology is easy to understand for the layman?

14 A. I think the document on scoring
15 methodology is not that accessible to the average
16 layman, which is why we have translated it
17 into -- or translated the different measures and
18 explaining what they're about and why they matter
19 and how we scored hospitals -- we put that in
20 more layman's language throughout our website.
21 And we give consumers several different ways to
22 comprehend how each hospital did on each one of

1 the measures so the -- you know, the gas gauge,
2 the image, as well as the explanation, which is
3 written in layman's language, et cetera.

4 We have a number of techniques that we've
5 applied, which were originally developed in
6 consultation with a low literacy expert and
7 haven't changed much since then, actually. And
8 those are really aiming to give that high level
9 of transparency and comprehension by the lay --
10 by laypeople.

11 Q. Okay. Is at least one of the reasons
12 Leapfrog grades non-participating hospitals
13 because it affects Leapfrog's revenue; is that
14 right?

15 MS. BLAIR: Objection to form.

16 THE WITNESS: No. The non-participant --
17 non-participating hospitals come in, it costs us
18 money. It's very -- as I said, the survey is
19 expensive. And adding these five plaintiff
20 hospitals would just add to our expenses.

21 BY MR. CHUNG:

22 Q. Okay. Let me put it another way.

1 The accolades licensing program is
2 responsible for -- it is the most significant
3 source of revenue for Leapfrog. We've -- I've
4 asked it a bajillion times. Is that correct?

5 A. That is the highest --

6 Q. Yes.

7 A. That is the highest source of revenue --

8 Q. Okay.

9 A. -- for us right now.

10 Q. Okay. And are you worried that, if you
11 don't give -- if you do not give
12 non-participating hospitals a grade, if you allow
13 them to, say, opt out -- right? -- fewer
14 hospitals will participate in the survey; isn't
15 that correct?

16 MS. BLAIR: Objection to form.

17 THE WITNESS: Non-participating -- to opt
18 out of what?

19 BY MR. CHUNG:

20 Q. Opt out of the survey and therefore not
21 get a grade.

22 MS. BLAIR: Objection to form.

1 THE WITNESS: They get a grade.

2 BY MR. CHUNG:

3 Q. Well, if you do not give -- let's put it
4 another way.

5 If you do not give non-participating
6 hospitals a grade, aren't you concerned that
7 fewer hospitals will participate in the survey?

8 A. At -- that's not the primary concern.
9 The primary concern is we're not meeting our
10 mission, which is to give people information --

11 Q. I --

12 A. -- they deserve to know.

13 Q. But I'm asking, is it as -- let's say, is
14 it a concern that fewer hospitals will
15 participate in the survey if you do not give
16 non-participating hospitals a grade?

17 MS. BLAIR: Objection to form.

18 THE WITNESS: That's not the primary
19 concern. I don't even think that is a concern.

20 BY MR. CHUNG:

21 Q. You're testifying that it's not a concern
22 at all?

1 A. That non-participating hospitals, if we
2 didn't give them a grade, that would reduce --
3 you're saying we're supposed to be worried that
4 would -- the --

5 Q. Fewer hospitals will respond to the
6 survey; isn't that a concern?

7 MS. BLAIR: Objection to form. Asked and
8 answered.

9 THE WITNESS: I don't know. I hadn't
10 thought of it that way, so I don't know.

11 BY MR. CHUNG:

12 Q. Okay. Well, at the very least, are you
13 concerned that, if you do not give
14 non-participating hospitals a grade, the number
15 of hospitals that respond to the survey won't
16 increase?

17 A. This is not what keeps me up at night.
18 That's not what I'm --

19 Q. I'm just asking you --

20 A. -- worried about.

21 Q. If you could just answer the question.
22 I'm not asking you what keeps you up at night.

1 I'm asking --

2 MS. BLAIR: Well, you're asking what
3 she's concerned about, so I think that's an
4 answer.

5 THE WITNESS: It's not a prevailing
6 concern.

7 BY MR. CHUNG:

8 Q. Is it a concern at all?

9 A. Anything that impacts full transparency
10 for every hospital in the country is a great
11 concern to me.

12 Q. All right. If there is -- Ms. Binder, if
13 there is a significant drop, a decrease in the
14 number of hospitals that participate in the
15 survey, would that negatively impact Leapfrog's
16 brand?

17 A. I don't know. We've -- before we had the
18 safety grade at all, we had 1300, 1400 hospitals
19 participating. So -- and we had a pretty
20 significant brand reputation then.

21 So that's not something I've worried
22 about.

1 Q. But I think you testified earlier, and we
2 saw some of the -- kind of the self-evaluation
3 documents that, during your time as CEO, that
4 your -- through your efforts as CEO, that the
5 brand -- right? -- and the reputation of Leapfrog
6 has increased over time, correct?

7 A. I don't recall the precise wording I
8 used --

9 Q. Right.

10 A. -- but the impact and influence of
11 Leapfrog to advance patient safety has shown --
12 has grown significantly, and that has resulted in
13 some improvements in some national statistics on
14 patient safety incidents.

15 Q. Okay. So if you had much fewer -- let's
16 say that the number of hospitals that respond to
17 the survey went from -- right now I think it's
18 close to 3,000, right, or thereabouts?

19 A. No. 2400.

20 Q. 2400. Right. Let's say it went down to
21 1,000 hospitals.

22 Does that -- would that impact kind of

1 the breadth and the brand of Leapfrog?

2 MS. BLAIR: Objection to form.

3 THE WITNESS: I don't know. It would
4 certainly impact patient safety and it would
5 undermine transparency. It would be a major step
6 backward for the country.

7 BY MR. CHUNG:

8 Q. If fewer hospitals were responding to the
9 survey, would that decrease or impair the
10 relevance of Leapfrog as an institution?

11 MS. BLAIR: Objection to form. Asked and
12 answered.

13 MR. CHUNG: That's a different question.

14 MS. BLAIR: Oh -- that is what reputation
15 is, isn't it?

16 MR. CHUNG: Please.

17 THE WITNESS: Leapfrog's relevance is
18 very, very high, and we are a high-profile
19 organization, extremely high profile. So I don't
20 see that participation in the survey, per se, is
21 the source of that. We are -- our influence is
22 broad and it's not just on the survey.

1 BY MR. CHUNG:

2 Q. If Leapfrog becomes less relevant because
3 of fewer hospitals responding to the survey,
4 would it be fair to say that fewer hospitals
5 would be willing to pay for accolade licensing?

6 MS. BLAIR: Objection to form.

7 THE WITNESS: I -- I don't know.

8 BY MR. CHUNG:

9 Q. Okay. If Leapfrog's brand goes down or
10 if it becomes less relevant, is it fair to say
11 that fewer hospitals would pay to -- pay to
12 license the survey data from Leapfrog?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: We have not seen a --
15 licensure revenues tied to the number of
16 hospitals reporting to the survey.

17 BY MR. CHUNG:

18 Q. Okay. Would you say that if fewer
19 hospitals -- if fewer hospitals responded to the
20 survey -- if there was a dramatic drop in the
21 number of hospitals that responded to the survey,
22 would you say that donations might go down?

1 Donations to Leapfrog.

2 A. No, no. Those could potentially go up
3 because people would be so outraged.

4 Q. If it becomes -- if Leapfrog becomes less
5 relevant if its brands go down, would you expect
6 donations to go down or up?

7 A. If Leapfrog becomes less relevant?

8 Q. Yeah.

9 A. I don't know how that would happen, so
10 it's hard for me to answer that question.

11 Q. Okay. Now, in terms of -- we read some
12 e-mails involving Dr. Romano where he was
13 discussing the -- kind of the aim or the
14 possibility of the new imputation methodology
15 penalizing hospitals.

16 Do you remember that discussion in the
17 e-mails?

18 A. Uh-huh. Yes.

19 Q. Are you -- it's -- would you say -- kind
20 of basic question: Is keeping -- is increasing
21 or at least maintaining Leapfrog's brand and
22 reputation an important part of your role as CEO?

1 A. It's very important that we maintain the
2 reputation and the trustworthiness of Leapfrog.

3 Q. Right.

4 A. Very, very critical.

5 Q. Okay. And part of that reputation and
6 the brand is having as many hospitals participate
7 in the survey as possible, correct?

8 MS. BLAIR: Objection to form. Asked and
9 answered.

10 THE WITNESS: That's really not the
11 centerpiece of our reputation. Our reputation is
12 wide -- has a wide breadth.

13 BY MR. CHUNG:

14 Q. But -- actually, I think one of the first
15 things that we discussed in the deposition is
16 that it's your wish, or the organization's wish,
17 to have as many, ideally all hospitals,
18 participate in the survey, correct?

19 A. Oh, sure. Yes, that would be great. But
20 that's -- you asked me if it's tied to our
21 reputation or our trustworthiness. And what I'm
22 saying is our reputation and trustworthiness are

1 tied to a lot more factors than just the number
2 of hospitals that participate in the survey.

3 Q. Okay.

4 A. Far beyond that.

5 Q. Is Leapfrog willing to penalize hospitals
6 in order to encourage them to participate in the
7 survey?

8 A. No.

9 Q. Okay. So your testimony is that that was
10 not at least one of the purposes of the change in
11 imputation methodology?

12 A. No, we don't set out to penalize
13 hospitals. Our goal is to get them to improve.

14 Q. Okay. And that's notwithstanding one --
15 a member of your expert safety panel, Patrick
16 Romano, saying in an e-mail that a goal or a
17 purpose of the change in the imputation
18 methodology was to penalize non-participants,
19 correct?

20 MS. BLAIR: Objection to form.

21 THE WITNESS: I believe the wording was
22 something like, if you want to do this, blah,

1 blah, blah. And it's also his opinion, whatever
2 his opinion is. He said if you want to do that.

3 That is not our goal.

4 BY MR. CHUNG:

5 Q. Okay. So you disagree with what
6 Dr. Romano was writing in that e-mail?

7 A. I disagree with -- well, he said, if you
8 believe -- blah, blah, blah, so he didn't
9 actually express an opinion about what we do
10 believe. He just said, if you believe that.

11 We don't.

12 Q. Okay.

13 A. Our goal is not to penalize hospitals,
14 though. Our goal is to create a marketplace
15 where everybody can succeed and do better.

16 Q. Okay. And the -- let's go to -- in terms
17 of the methodology -- I wanted to go back to a
18 couple questions about the imputation
19 methodology.

20 MR. CHUNG: Let's go to 103. So this is
21 Exhibit 42.

22

1 (Binder Deposition Exhibit 42 marked for
2 identification and attached to the
3 transcript.)

4 BY MR. CHUNG:

5 Q. Okay. So Ms. Binder, you're familiar
6 with -- and we've -- with step 1 and step 2 of
7 Leapfrog's current imputation methodology,
8 correct?

9 A. Yes.

10 Q. Okay. And let's take a look at kind of
11 an example here.

12 I'm showing you -- this doesn't have a
13 Bates stamp. We just took it directly, a
14 screenshot, from hospitalsafetygrade.org.

15 A. Uh-huh.

16 Q. And you'll see that the grade for Hilo
17 Benioff Medical Center here, it's a C grade,
18 right?

19 A. Yes.

20 Q. Okay. And if you look under the
21 practices to prevent errors tab, under notes and
22 definitions, it says, Declined to report.

1 Do you see that?

2 A. Yes.

3 Q. Okay. So is it correct that we know,
4 based on that, that this was a hospital that did
5 not participate in the survey?

6 A. Prob- --

7 MS. BLAIR: Objection to form.

8 THE WITNESS: Probably. But --

9 BY MR. CHUNG:

10 Q. Okay.

11 A. Or it could have been that they just
12 didn't respond to that one question.

13 Q. Can you tell me whether the step 1 or
14 step 2 imputation was used for this particular
15 hospital?

16 A. I don't know that offhand.

17 Q. Okay. So there's no explanation here for
18 whether this particular hospital had the
19 historical data or the lowest achievement score
20 imputed to them, right?

21 A. Well, you've -- you didn't copy the
22 whole -- what parts did you copy?

1 Oh, so you're --

2 Q. Yeah. Can you tell --

3 A. Because --

4 Q. -- from what's on the web --

5 A. -- of the way this is Xeroxed, I'm trying
6 to understand what this -- which screenshot you
7 have.

8 You have the CPOE measure, it looks like,
9 doctors' order. And then we have -- they got a
10 score of 40, and a score was assigned. So that
11 must have been step 1.

12 Q. How do you tell that step 1 was assigned
13 here?

14 A. Because a 40 is a score that would be
15 associated with step 1.

16 Q. Okay. How is that?

17 A. Because it's not -- it wouldn't -- it's
18 not a 15, which would be the -- if we didn't have
19 any step 1 data from the past two cycles.

20 Q. Okay. How can a consumer tell, though,
21 from this webpage that it's 1, step 1?

22 A. They -- it doesn't matter. This is -- it

1 says --

2 Q. The question --

3 A. -- the hospital declined to report their
4 performance on this measure, so a score was
5 assigned to reflect the lack of information
6 available.

7 Q. Okay. So -- Ms. Binder, my question is,
8 how can a consumer tell that Hilo Benioff was
9 assigned the score here based on step 1?

10 A. They don't -- there's no need for them to
11 know which step or whatever. It's -- they can
12 look it up on the methodology, which is linked to
13 in many places. But it --

14 Q. Okay. So -- but you can't --

15 A. We tell them that a score was assigned --

16 Q. Okay. But a consumer --

17 A. -- and it's in bold red.

18 Q. -- cannot tell from this page, again,
19 without linking to the -- looking at the
20 imputation methodology, whether it was step 1 or
21 step 2; is that correct?

22 A. They can tell that a score was assigned

1 to reflect the lack of information available --

2 Q. Okay.

3 A. -- which is true.

4 Q. Let's go to the next exhibit.

5 MR. CHUNG: This is 43.

6 (Binder Deposition Exhibit 43 marked for
7 identification and attached to the
8 transcript.)

9 BY MR. CHUNG:

10 Q. Again, this is from the webpage for the
11 Hilo Benioff Medical Center, the survey measures.
12 So let's take a look at the breakdown of the
13 sources used to calculate Hilo's safety grade.

14 I'm showing you a screenshot from, again,
15 hospitalsafetygrade.org that shows the measures
16 used to calculate Hilo's safety grade.

17 And if you review this document, it says,
18 Imputation model applied for ceratin of the
19 measures.

20 Do you see that?

21 A. Yes.

22 Q. Okay. Is there any way here -- again,

1 for the consumer -- right? -- to know whether
2 step 1 or step 2 was used for those scores?

3 A. This chart is aimed at --

4 Q. So Ms. Binder, I'm just going to bore you
5 to the question.

6 Can a consumer, looking at the webpage
7 here -- again, hospitalsafetygrade.org website,
8 which you testified is intended for consumers --
9 correct? Low literacy consumers, correct?

10 MS. BLAIR: Objection to form. That's
11 not her testimony.

12 BY MR. CHUNG:

13 Q. Yes or no?

14 A. The website is intended to be accessible
15 to laypersons.

16 Q. Yes. Is there -- to that layperson, to
17 the consumer, is there any way, looking at this
18 page, for them to know whether this is -- whether
19 step 1 or step 2 was used for the scores for the
20 Hilo Medical Center?

21 A. I don't think so.

22 Q. Okay. And it's only if you -- if one

1 were to link to and read the methodology document
2 that you might start to be able to parse how the
3 hospital is scored, right?

4 MS. BLAIR: Objection to form.

5 THE WITNESS: They're scored by
6 imputation.

7 BY MR. CHUNG:

8 Q. Right.

9 A. We make it quite clear that it was an
10 imputation model.

11 Q. Right.

12 A. The fact that this chart is not specific
13 about how that was applied, specifically step 1
14 or step 2, is one thing. But you don't need to
15 go into every detail on every single chart.

16 Q. But in order for the consumer to be
17 informed about whether step 1 or step 2 of the
18 imputation methodology was applied, they would
19 then have to go to the scoring methodology,
20 correct?

21 A. Yes.

22 Q. Right. And I think you testified earlier

1 that the scoring methodology is -- and you can
2 correct me on the verbiage here -- is not -- is
3 not the easiest thing to understand, correct?

4 MS. BLAIR: Objection to form.

5 THE WITNESS: It's -- the scoring
6 methodology document is written in a way that is
7 aimed at somewhat knowledgeable hospital people.

8 BY MR. CHUNG:

9 Q. Not meant for kind of the consumers that
10 the hospitalsafetygrade.org website was designed
11 for, correct?

12 A. Right. The hospitalsafetygrade.org
13 was -- that website was designed to inform
14 consumers of when imputation -- well, of
15 everything we use to calculate grades, including
16 imputation, which is --

17 Q. Okay.

18 A. -- plainly and transparently conveyed.

19 Q. Okay.

20 MR. CHUNG: Why don't we take a short
21 break. All right?

22 How much time do we have left?

1 VIDEO TECHNICIAN: The time is 6:19 p.m.
2 We're off the record.

3 (A recess was taken.)

4 VIDEO TECHNICIAN: The time is 6:28 p.m.
5 We're on the record.

6 BY MR. CHUNG:

7 Q. Ms. Binder, during your time as CEO of
8 Leapfrog, did at any point Leapfrog consider not
9 issuing hospital safety grades to hospitals that
10 did not respond to the survey?

11 A. No.

12 Q. So that was never an option that was ever
13 discussed?

14 A. No.

15 Q. All right. Was it ever an agenda item?

16 A. Not to my knowledge.

17 Q. All right. Is it an option or a proposal
18 that any member of the Leapfrog staff, executives
19 or otherwise, ever mentioned?

20 A. Not that I recall. The purpose of the
21 safety grade was specifically to expand
22 transparency.

1 Q. So your testimony is that no one at
2 Leapfrog ever even mentioned the possibility or
3 the option of not issuing hospital safety grades
4 to non-participating hospitals; is that your
5 testimony?

6 A. To my knowledge. That -- to my
7 knowledge, nobody discussed that. The purpose of
8 the grade was to -- was for full transparency.

9 Q. Okay. How about members of the expert
10 panel? Is there any -- anyone ever mention the
11 possibility of not issuing grades to
12 non-participating hospitals?

13 A. Again --

14 MS. BLAIR: Objection to form.

15 THE WITNESS: -- not to my knowledge.

16 BY MR. CHUNG:

17 Q. Not to your knowledge. Okay. How about
18 members --

19 A. I don't go to all their meetings, but --

20 Q. Members of the board?

21 A. No. That was never discussed at the
22 board meetings either, that I can recall, anyway.

1 Q. Okay. If the plaintiff -- the five
2 plaintiff hospitals in this lawsuit were to
3 prevail -- right? -- and Leapfrog had to take
4 down their grades, their hospital safety grades,
5 what would be the harm to Leapfrog?

6 MS. BLAIR: To Leapfrog?

7 MR. CHUNG: To Leapfrog. Yes.

8 THE WITNESS: We would undermine our
9 mission, which is full transparency for
10 hospitals. Other hospitals would also see that
11 we are willing to pull down grades for some
12 hospitals and they'd say, what about us too?

13 BY MR. CHUNG:

14 Q. And so that would be the harm to
15 Leapfrog, correct?

16 MS. BLAIR: Objection to form.

17 THE WITNESS: It's a harm to our mission.

18 BY MR. CHUNG:

19 Q. Right. And if other hospitals asked to
20 pull down their grades -- right? -- from -- their
21 hospital safety grades, that would -- that would
22 harm Leapfrog, correct?

1 MS. BLAIR: Objection to form.

2 THE WITNESS: It would harm the public.

3 BY MR. CHUNG:

4 Q. I'm asking, would it harm Leapfrog? I'm
5 not asking about would it harm the public.

6 A. It would harm our mission. It would harm
7 our ability to achieve our mission. It would be
8 a setback.

9 Q. All right. And it would be a setback
10 because fewer hospitals, then, would be issued
11 hospital safety grades, correct?

12 A. It would be a setback because there would
13 be less transparency, and there would be whole
14 communities in this country that would not have
15 access to information about how their hospital is
16 doing on safety.

17 Q. I'm asking about the impact on
18 Leapfrog -- right? Not the public. All right?

19 So the harm -- the impact here would be
20 fewer hospitals would be participating in the
21 survey, correct?

22 MS. BLAIR: Objection to form.

1 THE WITNESS: I don't know about the
2 survey, per se. That would -- I would have to
3 think about what impact it would have on the
4 survey.

5 BY MR. CHUNG:

6 Q. Okay.

7 A. But in terms of pulling down these five
8 hospitals' grades, it would just be harmful to
9 that community that they serve. And then other
10 hospitals who felt that somehow it was a good
11 idea that Leapfrog would pull down -- would make
12 exceptions and pull down grades for hospitals
13 that don't like them, that would undermine the
14 whole cause of transparency and public reporting
15 and fairness, which we believe in for hospitals.

16 Q. Isn't the concern -- I mean, isn't the
17 concern here is that if -- just hypothetically,
18 if the plaintiff hospitals in this case
19 prevailed, that it would basically create a
20 domino effect where many, many hospitals, maybe
21 all hospitals, would ask to have their grade
22 taken down? Is that your concern?

1 A. I guess so. Yeah, that would be a
2 problem. That would certainly be one concern.

3 Q. Right. And that would be a concern for
4 the mission, correct? Right?

5 A. Right --

6 Q. And --

7 A. -- for the mission of patient safety and
8 transparency.

9 Q. And that would be a problem for the
10 bottom line for Leapfrog, correct?

11 MS. BLAIR: Objection to form.

12 THE WITNESS: No.

13 BY MR. CHUNG:

14 Q. So you would be able to generate revenue?
15 Would you be able to generate revenue if there
16 was a domino effect of hospitals just choosing
17 not to participate in the -- in the survey and
18 taking down their grades?

19 A. From a revenue perspective, the survey is
20 a cost to us. So it would just be less cost if
21 fewer hospitals reported, from a purely financial
22 point of view. It would just be harmful to our

1 mission, and that is the most important thing to
2 us.

3 Q. All right. Well, the accolades licensing
4 program, which is the most significant source of
5 revenue, would suffer, correct?

6 MS. BLAIR: Objection to form.

7 THE WITNESS: No. Unlikely to suffer.
8 The number of A-hospitals has remained fairly
9 steady because we score it on a C-score
10 methodology. And therefore, the sales to
11 A-hospitals could continue.

12 BY MR. CHUNG:

13 Q. Well, would you expect if a hospital, in
14 response to, again, a hypothetical result in this
15 lawsuit, would take their -- would no longer
16 participate in the survey and take their grades
17 down, are you concerned that even the A-grade
18 hospitals would follow suit and not devote
19 resources to completing the survey? Is that a
20 concern?

21 MS. BLAIR: Objection to form.

22 THE WITNESS: No, it's not a concern.

1 MR. CHUNG: Okay. No further questions.
2 Thank you.

3 MS. BLAIR: Excellent. Thank you.

4 THE WITNESS: Thank you.

5 VIDEO TECHNICIAN: The time is 6:34 p.m.
6 We're off the record.

7 (Whereupon at 6:34 p.m., the videotaped
8 deposition of LEAH F. BINDER was
9 concluded.)
