Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY.

THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

ALEXANDRA CAMPIONE,
called for oral examination by counsel for the
Plaintiffs, pursuant to notice, at the law offices of
Gibson Dunn & Crutcher, LLP, 1700 M Street,
Northwest, Washington, D.C. 20036-4504, before
Christina S. Hotsko, RPR, CRR, CA CSR, of Veritext
Legal Solutions, a Notary Public in and for the
District of Columbia, beginning at 9:09 a.m., when
were present on behalf of the respective parties:

A P P E A R A N C E S

On behalf of Plaintiffs:

LEE R. CRAIN, ESQUIRE

IASON TOGIAS, ESQUIRE

Gibson Dunn & Crutcher, LLP

200 Park Avenue

New York, New York 10166-0193

(212) 351-4000

On behalf of Defendant:

KIMBERLY E. BLAIR, ESQUIRE

COURTNEY L. WOOD, ESQUIRE

Wilson Elser Moskowitz Edelman & Dicker, LLP

161 N Clark, Suite 4500

Chicago, Illinois 60601

(312) 704-0550

Also Present:

Orson Braithwaite, Video Technician

P R O C E E D I N G S

VIDEO TECHNICIAN: Good morning. We are going on the record at 9:09 a.m. on September 12th, 2025.

Please note that the microphones are sensitive and may pick up whispering and private conversations.

Please mute your phones at this time. Audio and video recording will continue to take place unless all parties agree to go off the record.

This is media unit 1 of the video-recorded deposition of Ms. Alexandra Campione, in the matter of Good Samaritan Medical Center, Inc., et al., versus The Leapfrog Group, filed in the United States District Court for the Southern District of Florida, West Palm Division, case number 9:25-CV-80526-DMM.

My name is Orson Braithwaite representing Veritext Legal Solutions, and I am the videographer. The court reporter is Christina Hotsko from the firm Veritext Legal Solutions.

1 Counsel will now state their appearances
2 and affiliations for the record, beginning with
3 the noticing attorney.

4 MR. CRAIN: Good morning. Lee Crain,
5 Gibson Dunn & Crutcher, for the plaintiffs. I'm
6 here with my colleague Iason Toggias.

7 MS. BLAIR: Kim Blair, Wilson Elser, on
8 behalf of Leapfrog, the defendant.

9 MS. WOOD: Courtney Wood, Wilson Elser,
10 on behalf of the defendant, Leapfrog.

11 VIDEO TECHNICIAN: Thank you. Will the
12 court reporter please swear in the witness.
13 Whereupon,

14 ALEXANDRA CAMPIONE,
15 being first duly sworn or affirmed to testify to
16 the truth, the whole truth, and nothing but the
17 truth, was examined and testified as follows:

18 EXAMINATION BY COUNSEL FOR PLAINTIFFS

19 BY MR. CRAIN:

20 Q. Good morning.

21 A. Good morning.

22 Q. Can you state your name for the record.

1 A. Alexandra Campione.

2 Q. Have you ever gone by any other names?

3 A. My marriage certificate has Russo, but I
4 have not officially changed things.

5 Q. Have you been deposed before?

6 A. No, I have not.

7 Q. So I'd like to go over just some ground
8 rules so we're on the same page throughout the
9 day.

10 You understand that there's a court
11 reporter transcribing every question I ask and
12 answer you give, correct?

13 A. Yes.

14 Q. And because the court reporter can't
15 transcribe us at the same time, we have to go
16 slightly slower in our conversation, pause. And
17 so I'd ask that you wait for me to finish the
18 question, I'll wait for you to finish the answer
19 so the court reporter can take down what we're
20 saying.

21 Does that make sense?

22 A. Yeah.

1 Q. You'll need to answer audibly. So
2 nodding -- it will need to be a yes or no type
3 answer. Does that make sense to you? Fair
4 enough?

5 A. Yes.

6 Q. You understand that you're testifying
7 under oath today as if you were in a court?

8 A. Yes.

9 Q. And are you taking any medications or are
10 you under the influence of any substance which
11 might make it difficult for you to understand or
12 answer my questions today?

13 A. No.

14 Q. Is there any reason why you can't give
15 truthful testimony today?

16 A. No.

17 Q. If you don't understand one of my
18 questions, if something is confusing to you, feel
19 free to let me know. But otherwise, I'm going to
20 assume that you understand the question. Is that
21 fair to you?

22 A. Okay.

1 Q. And then from time to time, your attorney
2 may object. I assume she has talked to you about
3 that. If she objects, unless she instructs you
4 to [sic] answer my question, you'll proceed to
5 answer my question. Fair enough?

6 A. Yes.

7 Q. We can take breaks anytime that's
8 comfortable for you. Just let us all know. The
9 only thing we'd ask is that we don't take a break
10 while a question is pending.

11 Fair enough?

12 A. Yes.

13 Q. So Ms. Campione, you've never been
14 deposed before?

15 A. No.

16 Q. Okay. Have you ever testified at all?

17 A. Yes. One time at a criminal case in
18 Boston. Unrelated to me. I was a witness.

19 Q. Can you just tell me generally the nature
20 of your testimony?

21 A. I just testified that I saw someone
22 running away from someplace.

1 Q. So you were a witness to the scene?

2 A. Yes.

3 Q. Did you prepare for your deposition
4 today?

5 A. Yes.

6 Q. What did you do to prepare, without
7 getting into any substance of your discussions
8 with counsel?

9 A. Sure. I reviewed some e-mails and our
10 scoring methodology for the hospital safety grade
11 program.

12 I also met with our attorneys, Ms. Blair
13 and Ms. Wood, twice before today.

14 Q. When did you meet with your attorneys?

15 A. Yesterday and about two weeks ago.

16 Q. And approximately how long were those
17 meetings?

18 A. Maybe like half the day to the day.

19 Q. And did anybody else besides counsel
20 attend those meetings?

21 A. In our first meeting, we had some other
22 staff at Leapfrog.

1 Q. Can you tell me who it was?

2 A. Leah Binder, Missy Danforth. And I
3 can't -- Karen Jupiter. And I can't remember
4 who -- Katie Stewart.

5 Yes. Those are the Leapfrog staff.

6 Q. And the subject of that meeting -- again,
7 without getting into any discussion with your
8 counsel what was said -- the subject was
9 preparation for your deposition?

10 A. Yes.

11 Q. Okay. Was the subject of that meeting
12 also preparation for other folks' depositions?

13 A. For -- sorry, for other people?

14 Q. Correct.

15 A. Yes.

16 Q. Okay. Did you review any documents
17 outside the presence of counsel to prepare for
18 this deposition?

19 A. A few.

20 Q. Can you tell me which documents you
21 reviewed?

22 A. Yes. That was the scoring methodology

1 and some e-mails.

2 Q. And when you say the scoring methodology,
3 what document are you referring to? Just so it's
4 clear.

5 A. The scoring methodology for the hospital
6 safety grade program.

7 Q. Is that the PDF available on the website?

8 A. Yes.

9 Q. So about --

10 A. It's -- it's one PDF, and it's available
11 publicly.

12 Q. And it's about 26, 28 pages?

13 A. That sounds right.

14 Q. Okay. We'll come to it a little later.
15 I just wanted to make sure I understood.

16 Did you speak to anybody about your
17 deposition?

18 A. No.

19 Q. Not a colleague? A family member?

20 A. Well, family members in passing. But
21 Missy Danforth told me maybe a month ago, you're
22 going to be deposed, you'll receive additional

1 information from our attorneys. And that was
2 about it. And then we met on those two
3 occasions.

4 Q. And the first meeting with the other
5 Leapfrog colleagues was about half the day, you
6 said?

7 A. Yes.

8 Q. I'd like to talk a little bit about your
9 professional history.

10 Can you sort of walk me through your jobs
11 after you graduated from whatever your last
12 degree was?

13 A. Sorry --

14 Q. Maybe --

15 A. -- my job --

16 Q. -- let's --

17 A. Further back? Okay.

18 Q. So start with -- did you go to college?

19 A. Yes. I went to the University of
20 Florida, and I double majored in medical
21 geography and biology. I worked in a lab there
22 at the University of Florida. And -- it was kind

1 of medical geography, but it was in the academic
2 setting.

3 So I worked there for a year after
4 college. And then I started my master's program
5 here in D.C. I have a master's in public health
6 from George Washington. That was specialized in
7 epidemiology.

8 During that time, during my master's
9 program here, I worked at D.C. Health in their
10 HIV, infectious disease kind of department.

11 I also did an internship at the NIH in
12 NIAID, which is Institute of Infectious Disease.
13 And I worked on a paper that was later published
14 by me and some of my colleagues there, and at
15 CDC.

16 After graduating, I moved to Boston,
17 where I now live, and I worked for the
18 Massachusetts Department of Public Health as a
19 COVID epidemiologist.

20 And then I moved to Leapfrog in 2023.

21 Q. And so you live in Boston but work for
22 Leapfrog remotely?

1 A. Yes. 2022, sorry, that I started working
2 at Leapfrog.

3 Q. Got it.

4 And just going back to something you
5 said, what is medical geography?

6 A. It's an interesting blend of geography --
7 so using geographic systems with -- like -- it
8 has different applications, but combining that
9 with, like, the medical field.

10 Q. So going back to Leapfrog, you said you
11 started in 2022.

12 A. Yes.

13 Q. How did you hear about the job?

14 A. A recruitment -- sorry, a recruiter
15 reached out to me.

16 Q. Had you heard of Leapfrog before?

17 A. No.

18 Q. And can you tell me, generally, the
19 nature of the application process?

20 A. So I wasn't really looking for a new job,
21 but this recruiter reached out to me. And it was
22 actually a somewhat rigorous process where they

1 had me complete SAS programs and I had to -- they
2 had sort of like a rubric I think they graded me
3 on to make sure that my programming skills were
4 up to their standard.

5 I also had to produce some writing
6 samples and went through a few rounds of
7 interviews.

8 Q. And approximately what time was this?
9 Like, when was this?

10 A. I believe it was early 2023 -- sorry, I
11 keep saying that. 2022, sorry.

12 Q. And did you meet with Ms. Binder during
13 that time?

14 A. No, I did not.

15 Q. Okay. And when you said SAS, that refers
16 to coding?

17 A. Yes. It's a type of program.

18 Q. Can you tell me generally the nature of
19 the job that you were applying for? What were
20 the responsibilities, the job description?

21 A. Sure. So we have some analyst positions
22 at Leapfrog in the ratings team. These analysts

1 are responsible for scoring the data that's taken
2 from hospitals and producing files that are
3 published publicly.

4 It was expressed to us that we would be
5 helping out on their help desk to work with
6 hospitals and would have kind of a -- we would be
7 working in a couple of different capacities.

8 Q. Were you involved in communications?

9 A. No. I don't have any background in
10 communication.

11 Q. You mentioned the ratings team. Who's on
12 that team?

13 A. It's about ten people. It's the largest
14 part of our company. And they are responsible
15 for developing the content of the survey,
16 developing the questions, working with expert
17 panels to ensure that our survey is to the
18 highest quality. And then we also do the scoring
19 as well, and work with hospitals.

20 Q. Is everybody on the team at the same
21 level?

22 A. No. There's some -- some people have had

1 promotions over the years and they're perhaps at
2 the manager level or senior level.

3 Q. Where do you fall in that today?

4 A. It's -- for the analysts, it's a little
5 bit of a different situation. We no longer have
6 a senior analyst, but I was promoted last year to
7 program manager just to -- because I had taken on
8 more responsibilities with the hospital safety
9 grade program, so my title changed slightly.

10 Q. And that was approximately when last
11 year?

12 A. Perhaps April of last year.

13 Q. And last year, 2024, just to be clear?

14 A. Yes.

15 Q. Who do you report to?

16 A. I report directly to Missy Danforth.

17 Q. Has that been the same throughout your
18 time at Leapfrog?

19 A. Yes.

20 Q. Do you have any direct reports to you?

21 A. No.

22 Q. Okay. Going back to your education, do

1 you have any certifications beyond your MPH and
2 your undergrad?

3 A. No.

4 Q. Are you -- would you think of yourself as
5 specialized in any particular way?

6 A. I would say, before this, epidemiology
7 and SAS programming.

8 Q. And just so there's a clear record, what
9 is epidemiology?

10 A. Epidemiology is the spread of -- or the
11 study of disease within the community.

12 Q. When you joined Leapfrog initially, what
13 was your impression of the organization at the
14 start?

15 A. At the time when I first started, I
16 didn't know very much about patient safety in the
17 field. But it was an exciting company to be a
18 part of because it seemed like there was a high
19 retention, where people had been there a really
20 long time, and they enjoyed what they did. So I
21 was excited to be joining.

22 Q. And what did you understand Leapfrog's

1 purpose to be?

2 A. To increase awareness around patient
3 safety and to improve patient safety in hospitals
4 and surgery centers.

5 Q. So I want to shift gears a little bit.
6 Let's talk about the hospital safety grade.

7 Do you understand what I mean when I say
8 the hospital safety grade?

9 A. I do.

10 Q. What is the hospital safety grade?

11 A. The hospital safety grade is a program of
12 Leapfrog's where we assign most short-term acute
13 care hospitals in the country an A, B, C, D, or F
14 letter grade.

15 Q. And do you know how Leapfrog came up with
16 the original idea for the hospital safety grade?

17 A. I am not sure exactly who came up with
18 it. I know that it was kind of based on the New
19 York City restaurant grading system.

20 Q. And --

21 A. That was kind of the idea for it.

22 Q. How did you learn that?

1 A. I think I've heard Missy Danforth talk
2 about it.

3 Q. And Ms. Danforth has been at Leapfrog
4 since the grade was developed?

5 A. I believe so. I'm not sure.

6 Q. Okay. What sort of issues, what problem,
7 was the safety grade designed to address?

8 A. Well, I guess patients being harmed in
9 the hospital setting and deaths.

10 Q. And then -- let's see. Do you know how
11 the different cutoffs of the different letter
12 grades are assigned?

13 A. Yes.

14 Q. Can you walk me through how that works?

15 A. Yes. From the very beginning?

16 Q. Just from -- how do you decide what an
17 A-hospital, B-hospital, C, D, F -- just in
18 general?

19 A. We look at the numerical scores.

20 Q. And how do you decide the cutoffs for
21 those scores?

22 A. They are based on the distribution of

1 data in a particular year, and then we freeze
2 them until a major methodology change happens,
3 and we reassess them.

4 Q. So are the letters curved?

5 A. I would not describe it as a curve.

6 Q. How would you describe it?

7 A. I think -- I would have to look exactly
8 at what the code is, but it's based on the
9 standard errors from the mean.

10 Q. Okay. And does it -- I think you said --
11 does it change year to year?

12 A. Some years it changes but not every year.

13 Q. Not every year. Okay.

14 And just -- so you mentioned the original
15 design was around the New York City restaurant
16 safety [sic] guide, right?

17 A. Yes.

18 Q. Is there any other reason why Leapfrog
19 decided to go with a letter grading system that
20 you're aware of?

21 A. Yes. I think the goal was to create
22 something that was easy to understand as a

1 consumer that summarized a hospital's record on
2 patient safety.

3 Q. Does Leapfrog intend for consumers to
4 rely on the safety grade?

5 MS. BLAIR: Objection to form.

6 THE WITNESS: No. I think -- "rely" is a
7 strong word. I think that it's one piece of
8 information that they can consider when choosing
9 a hospital.

10 BY MR. CRAIN:

11 Q. Are you aware that it says on the
12 Leapfrog website that patients should always
13 decide on where to receive care based on a
14 hospital's current safety grade?

15 MS. BLAIR: Objection to form.

16 THE WITNESS: Can you repeat your
17 question?

18 BY MR. CRAIN:

19 Q. Sure.

20 Are you aware that it says on Leapfrog's
21 website, quote, patients should always decide on
22 where to receive care based on a hospital's

1 current safety grade?

2 MS. BLAIR: Objection to form.

3 THE WITNESS: I haven't seen that on the
4 website.

5 BY MR. CRAIN:

6 Q. Okay.

7 MR. CRAIN: Let's grab tab...

8 We're going to start the documents.

9 (Campione Deposition Exhibit 1 marked for
10 identification and attached to the
11 transcript.)

12 MS. BLAIR: So this is going to be 1,
13 correct?

14 MR. CRAIN: This will be 1. So this will
15 be Campione 1.

16 So for the record, this document has an
17 18 on it. I think that is Jupiter Exhibit 18.
18 And this will be Campione Exhibit 1.

19 BY MR. CRAIN:

20 Q. Ms. Campione, do you recognize this
21 document?

22 A. Let me take a moment to look through it.

1 Q. Of course.

2 MS. BLAIR: And for the record, Lee --
3 and I made this same denotation at Jupiter's
4 deposition -- this does not have a Bates number
5 on it, so you can represent it was just printed
6 on 9/3/25 per the upper left-hand corner from the
7 website?

8 MR. CRAIN: Correct.

9 MS. BLAIR: Okay.

10 THE WITNESS: Okay. I guess this looks
11 like one of the pages -- one of the tabs on the
12 hospitalsafetygrade.org website.

13 BY MR. CRAIN:

14 Q. Have you seen this page before?

15 A. Yes.

16 Q. And what is it generally?

17 A. Under the tab -- a tab that's used for
18 patients -- or to be used by patients.

19 Q. Is it available to the public?

20 A. Yes.

21 Q. And it's directed towards consumers?

22 A. Yes.

1 Q. Okay. I want to take you down this
2 document a little bit.

3 If you can go to page 4. Tell me when
4 you're there.

5 A. Yes.

6 Q. Great. If you can go to the second full
7 paragraph, starting with "displaying." And it
8 says, Displaying past grades makes it clear which
9 hospitals consistently achieve high standards of
10 patient safety and which have demonstrated a
11 steady path of improvement. Patients should
12 always decide on where to receive care based on a
13 hospital's current safety grade.

14 Do you see that language?

15 A. Yes.

16 Q. Is that inconsistent with your view of
17 whether consumers should rely on the safety
18 grade?

19 MS. BLAIR: Objection to form.

20 BY MR. CRAIN:

21 Q. Do you agree with that language,
22 Ms. Campione?

1 A. I do, but I don't think that it's saying
2 the same thing that you stated earlier, that they
3 should rely only on the safety grade.

4 Q. Fair enough.

5 It is saying, though, that they should
6 always rely on the safety grade, correct?

7 MS. BLAIR: Objection to form.
8 Mischaracterizes the document.

9 BY MR. CRAIN:

10 Q. It says, Patients should always decide on
11 where to receive care based on a hospital's
12 current safety --

13 MS. BLAIR: Current. You keep skipping
14 that one.

15 MR. CRAIN: Which one? Sorry.

16 MS. BLAIR: Current. You didn't --

17 MR. CRAIN: Current.

18 MS. BLAIR: -- say the word "current"
19 before.

20 MR. CRAIN: Oh, sorry.

21 BY MR. CRAIN:

22 Q. Patients should always decide on where to

1 receive care based on a hospital's current safety
2 grade.

3 A. I think the language doesn't exclude
4 using other sources as well.

5 Q. But they do -- it does say that patients
6 should always rely on the safety -- the current
7 safety grade.

8 A. I -- yeah, I think that they should
9 consider it.

10 Q. And is that consistent with your view?

11 A. Yes. I think they should consider it.

12 Q. Always?

13 A. Yes.

14 Q. And this is consistent with Leapfrog's
15 view of how consumers should rely on the safety
16 grade, correct?

17 MS. BLAIR: Objection to form.

18 THE WITNESS: I think they should. I
19 think it's a useful tool.

20 BY MR. CRAIN:

21 Q. Always?

22 A. Sure.

1 Q. Okay. So I want to talk a little bit
2 about which hospitals are assigned a safety
3 grade.

4 Is every hospital assigned a safety
5 grade?

6 A. Only acute care hospitals. So that
7 excludes critical care access hospitals, rural
8 emergency hospitals, pediatric hospitals,
9 surgery -- or surgical hospitals where they
10 primarily perform surgeries, and several others,
11 like veterans hospitals.

12 It's all listed in the scoring
13 methodology.

14 Q. And does Leapfrog also have minimum data
15 requirements for scoring?

16 A. Yes.

17 Q. Talk to me about your understanding of
18 those minimum data requirements.

19 A. Okay. You must have PSI 90. It's an
20 important measure that is composed of ten
21 measures. You must always have at least five
22 outcome measures. And you must always have at

1 least six process and structural measures.

2 Q. And this is communicated clearly to the
3 public, right?

4 A. Very much so.

5 Q. And if those metrics -- the six process
6 measures, the five outcome measures, the PSI --
7 are missing, does Leapfrog grade a hospital?

8 A. If they are missing too much data, no.

9 Q. Okay. Who sets the minimum data
10 requirements?

11 A. I believe our expert panel.

12 Q. Can you tell me a little bit about the
13 expert panel? Who's on the panel?

14 A. Sure. The names are listed publicly on
15 our web page, but it's experts from across the
16 country that are leaders in their field of
17 measurement, of patient safety and quality.

18 Q. And how does one become a member of the
19 Leapfrog expert panel?

20 A. Well, it would seem that you have to go
21 to an elite school. You have to have, you know,
22 tremendous research that -- all of them are very

1 well published and have many studies in the
2 field. I would consider them experts. And I
3 don't think anyone would ever dispute that,
4 really.

5 Q. I'm asking a slightly different question.
6 Just mechanically, how does somebody get
7 on the panel?

8 A. I am not familiar with that process. I
9 just know that all of them are really great.

10 Q. Do you know if the panel picks their own
11 members? Or does Ms. Binder pick them?

12 A. I can't speak to that.

13 Q. Okay. How often does the expert panel
14 meet?

15 A. The expert panel meets about once a year.
16 But if there are -- if something is unresolved at
17 the end of one meeting, we would of course
18 schedule another meeting.

19 Q. And who decides when they meet?

20 A. We -- so at Leapfrog, it would be Missy
21 Danforth and I, whenever we are -- we know that
22 there's a change coming up or it's needed, we

1 would request that Matt Austin convenes the
2 meeting. So he would official schedule the
3 meeting and put together the agenda for it.

4 Q. And who is Matt Austin?

5 A. Dr. Matt Austin is at John Hop- -- sorry,
6 Johns Hopkins -- always a mouthful -- and he
7 works at the Armstrong Institute. He is
8 Ph.D.-level scientist, and we've been working
9 with him for a number of years.

10 Q. Is he a medical doctor?

11 A. He is not.

12 Q. Is he the chair of the expert panel?

13 A. No. I -- he's not the chair.

14 Q. Is there any formal chair?

15 A. I am not sure. I don't think so for the
16 safety grade. There might be one person. Again,
17 I believe it's on the website.

18 Q. And throughout your time at Leapfrog,
19 have you consistently attended the expert panel
20 meetings?

21 A. Yes.

22 Q. Can you -- are you aware of any you've

1 missed?

2 A. No.

3 Q. And if you started at Leapfrog in 2022,
4 that means approximately you've attended three or
5 four?

6 A. Yes. At least four.

7 Q. At least four you said?

8 A. Uh-huh.

9 Q. And what types of decisions does the
10 panel weigh in on?

11 A. Any methodology change, really.

12 Q. And does the panel -- is the panel a
13 decisionmaking body?

14 A. Yes.

15 Q. So the panel makes a determination?

16 A. Yes.

17 Q. And Leapfrog always follows what the
18 panel says, or sometimes?

19 A. Always. I have never seen an incident
20 where they made a recommendation and we didn't
21 follow it.

22 Again, each one of the members are

1 entitled to their own opinion, and they express
2 that freely in the meetings and it's open
3 discourse. And -- but by the end, there's --
4 I've always seen a consensus among them.

5 Q. Is there, like, a vote they take at the
6 end?

7 A. No, but it's -- that's not really how
8 science works.

9 Q. How does science work?

10 A. Well, I think it's open to debate. And
11 if anyone sees a need for additional analysis, we
12 will always complete that and reconvene.

13 Q. Who's ultimately responsible for sort of
14 bringing together what the group consensus was?

15 A. Matt Austin.

16 Q. Okay. And has that been consistent
17 throughout your time at Leapfrog?

18 A. Yes.

19 Q. And how long has Dr. Austin been involved
20 with Leapfrog, to your knowledge?

21 A. A very long time. At least ten years.

22 Q. Okay. In your time at Leapfrog, has

1 there ever been an instance where the folks who
2 work at Leapfrog, like yourself, have disagreed
3 with the panel?

4 A. So we also, I would say, are experts in
5 our particular subject. So, I mean, there
6 definitely has to have been times where we think,
7 oh, I would have gone this direction it with it
8 or I would have done that, but ultimately, it's
9 their decision. And we always follow that.

10 Q. You always follow what the expert panel
11 consensus is?

12 A. Yes.

13 Q. As -- and that consensus is collated, so
14 to speak, by Dr. Austin?

15 A. Yes.

16 Q. Okay. Do you agree that if Leapfrog
17 lacks enough data to assess a hospital, it should
18 not grade the hospital?

19 A. Not necessarily.

20 Q. Can you say -- can you explain why?

21 A. I think that it's -- you need enough data
22 to assign a grade. But just because a measure is

1 missing doesn't mean that you shouldn't grade
2 them because there's lots of reasons that a
3 measure could be missing.

4 Q. So my question was, do you agree that if
5 Leapfrog lacks enough data, the hospital should
6 not be graded?

7 A. Define "enough."

8 Q. Well, I'm asking you to define it.

9 Assuming you agree there's not enough --

10 A. I think that our cut points are
11 appropriate.

12 Q. Okay. So if the cut points are not
13 reached, Leapfrog should not grade the hospital,
14 correct?

15 A. Yes.

16 Q. Okay. And the cut points go back to the
17 six process measures, the five outcome measures,
18 or the PSI 90?

19 A. Yes.

20 Q. And what is PSI 90?

21 A. It's a measure that's developed by CMS,
22 and it's a composite of ten PSI measures; they're

1 patient safety indicators. Each of the patient
2 safety indicators are a rate of a very harmful
3 event that can occur in the hospital setting.

4 Q. Can you give us some examples?

5 A. Sure. Like -- I mean, what we put on the
6 website is kind of, like, a consumer friendly
7 thing. So, I mean, off the top head -- I mean, I
8 can't off the top of my head right now. But...

9 Q. Is that like CAUTI?

10 A. No. That would be a healthcare -- that
11 would be an infection.

12 Q. Got it. Okay. So infections are
13 different?

14 A. Yeah.

15 Q. Okay. Can you tell me just -- again, so
16 we're on the same page, what is a process
17 measure?

18 A. Okay. A process measure -- so process
19 and structural measures make up half of our
20 grade. And they're things that a hospital can
21 have in place that we know, through research,
22 know and -- increase the safety of a patient and

1 prevent harmful errors from occurring.

2 Q. And also, what is an outcome measure?

3 A. An outcome measure is like an actual
4 measurement of events that have happened.

5 Q. "Events" meaning?

6 A. Infections or dangerous patient safety
7 events.

8 Q. How often does Leapfrog release its
9 safety grades?

10 A. Twice per year.

11 Q. And why does Leapfrog do it twice per
12 year?

13 A. To ensure that we have more up-to-date
14 data.

15 Q. I want to talk a little bit about the
16 scoring methodology for the safety grades.

17 Are you familiar with the scoring
18 methodology?

19 A. Yes.

20 Q. How familiar are you with it?

21 A. Very familiar with it. I work with it
22 almost every day.

1 Q. Did you have a role in designing the
2 current methodology?

3 A. I would say no. Not much has changed
4 since I've been here.

5 Q. Okay. Have there been any changes since
6 you've been at Leapfrog?

7 A. Yes.

8 Q. Can you describe generally what the
9 changes have been?

10 A. Let's see. Trying to -- I mean, there's
11 minor changes throughout. Obviously, the reason
12 we're all here today is the imputation model
13 changed in fall 2023. Well -- no. There was an
14 imputation change in fall -- sorry, now I'm
15 mixing it up. I struggle with my year.

16 Q. Take your time.

17 A. Okay. Let's see. In fall 2024 -- so,
18 yes, imputation changes.

19 Q. So the only changes during your 2022 to
20 the present tenure are have been to the
21 imputation?

22 MS. BLAIR: Objection to form.

1 THE WITNESS: Yeah, I wouldn't say that's
2 the only change.

3 BY MR. CRAIN:

4 Q. Okay. So what are the other changes that
5 you recall?

6 A. I don't remember off the top of my head.

7 Q. That's fine.

8 A. We publish them whenever we do have a
9 change, so it was all publicly available.

10 Q. And when you say imputation, what do you
11 mean by imputation?

12 A. So the imputation of data when there is
13 none and -- for the process and structural
14 measures.

15 Q. And going back to the changes that have
16 occurred, I want to focus on the 2024 change to
17 imputation.

18 Is it your testimony that you had no role
19 in designing that methodology?

20 A. So, I mean, when I came to Leapfrog,
21 there was already imputation being used. So no,
22 I wasn't part of the introduction of imputation

1 into the methodology.

2 Q. Were you part of the change to the
3 methodology in 2024?

4 A. Yes. I was part of the analysis that
5 brought it to our attention. There was a problem
6 that was happening where the data was clearly not
7 accurate anymore. And -- yes. Yeah, I mean, I
8 was part of bringing that to their attention,
9 brought it to the expert panel. But ultimately,
10 the expert panel was the deciding factor.

11 Q. So you did have a role in the change?

12 A. Yes. I guess, yeah.

13 Q. Okay. Who else had a role in that
14 change?

15 A. Missy Danforth.

16 Q. Okay.

17 A. And Matt Austin.

18 Q. Anybody else?

19 A. No.

20 Q. Has your role changed during your time at
21 Leapfrog vis-à-vis your interaction with the
22 methodology?

1 A. No. I was brought on -- or almost right
2 away when I joined, I was assigned to the safety
3 grade program. So those core duties that I
4 started doing in the beginning, I still do, where
5 I score the data and update some of the documents
6 that we post for hospitals and for consumers.

7 Those core duties have not changed. I
8 think the -- I've been -- have had the
9 opportunity to do additional analyses since then.
10 And yeah, I would say it's evolved over time.

11 Q. And you said earlier that you interact
12 with the methodology almost daily.

13 Has that been true throughout your time
14 at Leapfrog?

15 A. Yes.

16 Q. I want to talk about a few of the
17 measures that Leapfrog uses and -- just to get
18 your understanding. Not a memory test, so if you
19 don't remember, that's okay.

20 So going back to process and outcome
21 measures, who decides or decided which measures
22 to use in the grading methodology?

1 A. Who decided what measures? So again, a
2 lot of those were decided before my time.

3 Since I've been there, I think only total
4 nursing care hours has been added. So that's
5 only one measure.

6 And how that works is, if it's a survey
7 measure, obviously Missy Danforth and me or my
8 colleagues at Leapfrog are most familiar with the
9 measures that are included in the survey, so we
10 might make a recommendation for those measures to
11 be added. We make that recommendation to the
12 expert panel, and then they ultimately decide.

13 As far as the CMS measures that are
14 used -- so that's publicly available data -- they
15 are familiar with CMS and those measures that are
16 -- those new measures that CMS will introduce.
17 So the expert panel actually -- typically --
18 they're typically the ones that are selecting
19 additional outcome measures to add.

20 Q. So the expert panel, you're saying, is
21 the one that decides which measures to add or
22 subtract in theory?

1 A. Yes. They would have the final say.

2 Q. I want to talk about the four imputed
3 measures.

4 A. Okay.

5 Q. Do you know what I'm talking about when I
6 say that?

7 A. Yes.

8 Q. And the four imputed measures, just to
9 get us on the same page, are CPOE, BCMA, IPS, and
10 hand hygiene; is that right?

11 A. Yes.

12 Q. Talk to me about CPOE. What is CPOE?

13 A. Computerized physician order entry. And
14 that one is -- that was developed a long time ago
15 and that is essentially testing CPOE systems
16 within the hospital. So hospitals must complete
17 a test through our survey, and it evaluates how
18 safe that their CPOE system is.

19 Hospitals can have settings in their CPOE
20 system to, like, override things. So something
21 like prescribing someone penicillin when they
22 have an allergy, it should flag things like that.

1 So it's just ensuring that their CPOE
2 system is fine-tuned to catch potential patient
3 safety events.

4 Q. And the "order" in CPOE, does that refer
5 predominantly to medication or other types of
6 orders, too?

7 A. I believe it's medication, but I'm not
8 the subject matter expert on that one.

9 Q. Fair enough.

10 How does a hospital score well on CPOE,
11 to your understanding?

12 A. Well, they have to do well on that test.
13 I believe that they need to be putting a high
14 percentage of their medications through the CPOE
15 system.

16 Q. And going back to the test, can you tell
17 me what is -- how does the test work?

18 A. Again, I'm not the best person to ask
19 about that. It's been a while since I worked on
20 that.

21 But basically, the test is given -- or,
22 sorry, hospitals are given a certain amount of

1 time, and they put in these, like, test patients
2 into their system that have certain
3 characteristics, and then they go to prescribe,
4 and we see if any alerts are given for their --

5 Q. So is --

6 A. -- prescriptions.

7 Q. I'm sorry.

8 A. It's okay.

9 Q. So it's like a software that the
10 hospitals upload to their own system as a test?

11 A. No. It's external.

12 Q. Okay.

13 A. It's -- yeah.

14 Q. And you said you're not the best person
15 to ask about this.

16 Who is the best person to ask?

17 A. Missy Danforth.

18 Q. Okay. Does CMS measure CPOE?

19 A. No, they do not. They wouldn't have the
20 ability.

21 Q. And can you explain how CPOE reflects the
22 safety of a hospital?

1 A. Sure. I mean, if I was allergic to
2 penicillin and you prescribed it to me and
3 administer that, that would be pretty bad.

4 Q. And to your point earlier, so the system
5 should, in theory, almost put a bar on that
6 penicillin for you in your hypothetical; is that
7 right?

8 A. Produce an alert at least.

9 Q. Okay. If a hospital doesn't participate
10 in Leapfrog's hospital survey, Leapfrog has no
11 data about that hospital's CPOE; is that correct?

12 A. Yes.

13 Q. Let's talk about -- I don't know if
14 it's -- BCMA?

15 A. BCMA.

16 Q. Okay. That's barcode medication
17 administration, right?

18 A. Yes.

19 Q. Tell me about what that means.

20 A. Sure. It's basically ensuring that
21 hospitals have systems in place to scan barcodes
22 when they administer a medication to a patient.

1 Q. So it's like -- it's for the nurse at the
2 bedside that's going to give the medication; is
3 that right?

4 A. Yes.

5 Q. And can you explain how BCMA reflects the
6 safety of a hospital?

7 A. Again, I'm not most familiar with the ins
8 and outs of that and the literature behind it.
9 But you need to make sure that the right patient
10 is getting the right medication.

11 Q. Okay. And the right person would, again,
12 be Ms. Danforth?

13 A. Sorry. What?

14 Q. You said you're not the right person
15 to --

16 A. Oh, yes.

17 Q. Okay. And just so it's clear, the right
18 person to ask about BCMA and the ins and outs, as
19 you said, would be Ms. Danforth?

20 A. Yes.

21 Q. Does CMS measure BCMA?

22 A. No. Again, they wouldn't really have the

1 capability.

2 Q. And why is that?

3 A. They don't administer a survey like this.

4 Q. So the only way to get BCMA information
5 is through a survey?

6 A. I -- I'm not that -- as familiar, but I
7 assume it would be very difficult any other way.

8 Q. So CMS -- does CMS collect data from
9 hospitals?

10 A. I mean, that's a very nuanced question.
11 Like, there's a lot of different ways that they
12 do. And they're a payor. Like, they have --
13 it's a different setup.

14 Q. They collect at least some data, right?

15 A. Yes. So that they can pay hospitals for
16 their admissions.

17 Q. Okay. And in theory, they could ask for
18 data on BCMA, right?

19 A. I think it would be difficult.

20 Q. Why?

21 A. I am not a CMS expert, but I think it
22 would be difficult.

1 Q. But why, though? Why couldn't they just
2 say, give me BCMA data?

3 A. Because they're not, like, a -- they're
4 not Congress. Like, I'm not a politics -- or a
5 policy person.

6 Q. Well, I mean, couldn't the folks that
7 dictate what data CMS wants say, give us BCMA
8 information?

9 A. I -- so, first of all, they do the HCAHPS
10 survey, and that is, like, a much disputed or at
11 least -- you know, hospitals are resistant to do
12 it. But it's been a really powerful and
13 illuminating endeavor for CMS to collect patient
14 experience data.

15 So, I mean, every time they do a program
16 like this, it's -- it's difficult to roll it out.

17 Q. You mean difficult not in terms of
18 collecting the data, but difficult in terms of
19 getting the hospitals to be willing to do it?

20 A. Yes. Yeah.

21 Q. Okay. And you said HCAHPS state -- that
22 folks were resistant to do it.

1 Can you explain what you mean by that?

2 A. I'm not the most -- I'm not super
3 familiar with it, but...

4 Q. But what did you mean?

5 A. I meant that it's -- like, it's a lot of
6 work to do these sorts of things.

7 Q. Is the HCAHPS -- is it a survey?

8 A. It is.

9 Q. Is the HCAHPS survey more or less work
10 than the Leapfrog survey?

11 A. You would have to ask hospitals that.

12 Q. You don't have a view?

13 A. I would say that administering a survey
14 to every single -- or to a proportion of your
15 patients is difficult and costly.

16 Q. Okay. Would you --

17 A. But it's important.

18 Q. Would you say that conducting the
19 Leapfrog survey is difficult and costly?

20 A. In the scheme of things, no.

21 Q. What's the scheme of things?

22 A. I think that it takes about -- so what

1 I've heard is that it takes about 80 to 100
2 hours. And I think that it is a meanwhile [sic]
3 endeavor.

4 Q. And where did you hear that it takes 80
5 to 100 hours?

6 A. From -- I guess from hospitals, but
7 it's -- we've discussed it before internally. So
8 perhaps from Missy Danforth.

9 Q. In your role at Leapfrog, what kind of
10 interaction do you have with hospitals?

11 A. I work on the help desk, which is -- we
12 work on it through ZenDesk. And we all -- all of
13 us on the ratings team help out on help desk and
14 we answer hospitals' questions and surgery --
15 ambulatory surgery centers' questions about our
16 survey or about the safety grade.

17 It's completely free. They submit their
18 questions and, regardless of whether they
19 participate or not, we are willing to help them.

20 Q. And how do you respond? Do you get on
21 the phone with them or do you just write comments
22 back?

1 A. We -- it's -- I mean, it's like writing
2 e-mails back and forth. But if they want to meet
3 for a phone call or a Zoom call, we are always
4 more than willing to do that.

5 Q. And can you give a ballpark about how
6 many outreaches from a hospital come in
7 through -- it's just ZenDesk?

8 A. Yes.

9 Q. How many come in per month?

10 A. I don't know the exact numbers, but it's
11 a lot.

12 Q. More than 50?

13 A. Definitely more than 50.

14 Q. More than 100?

15 A. Definitely more than 100.

16 Q. More than 500?

17 A. I am not sure.

18 Q. Okay. So --

19 A. It depends on the month, really.

20 Q. Is it fair to say that during survey time
21 the questions go up?

22 A. I mean, survey time takes up a lot of the

1 year, actually, because the survey is open from
2 April 1st until January 31st.

3 But yes, there are certain times around
4 deadlines that we have more tickets.

5 Q. Great. Fair enough. That was a bad
6 question.

7 Can we go back to the imputed measures?
8 We took a side road.

9 BCMA. So just going back to BCMA, if a
10 hospital does not participate in Leapfrog's
11 survey, does Leapfrog have any data about the
12 hospital's BCMA?

13 A. No.

14 Q. I want to talk next about the third
15 imputed measure, which I have as ICU physician
16 staffing --

17 A. Yes.

18 Q. -- or IPS.

19 What is IPS?

20 A. Physician staffing. So it's ensuring
21 that your ICU is staffed with individuals that
22 are trained to work in an ICU.

1 Q. And ICU is intensive care unit?

2 A. Yes.

3 Q. And that's different from the ER, right?

4 A. Yes.

5 Q. I just watched The Pitt, so -- very
6 germane to this case.

7 Does CMS measure IPS?

8 A. I am not sure.

9 Q. Okay. And again, if a hospital doesn't
10 participate in Leapfrog's survey, does Leapfrog
11 have any data about IPS about that hospital?

12 A. No.

13 Q. The fourth one is hand hygiene.

14 A. Uh-huh.

15 Q. Is that right?

16 A. Yes.

17 Q. What is the hand hygiene metric?

18 A. So -- and one thing I do want to add on
19 to your past questions --

20 Q. Sure.

21 A. -- about the other measures, is that
22 these are standards that were developed by

1 Leapfrog expert panelists, so they really are
2 unique to Leapfrog. They were developed by the
3 respective expert panels. So it's not really
4 something that CMS could measure.

5 So I would like to, like, amend my
6 previous responses or -- and state that they are
7 exclusively Leapfrog measures, that there
8 wouldn't be something comparable that CMS could
9 do.

10 Q. Could --

11 A. Yeah.

12 Q. You're done?

13 A. Uh-huh.

14 Q. Could Leapfrog just copy the survey and
15 measure the same thing?

16 A. Could Leapfrog --

17 Q. I'm sorry, strike that. Bad question.

18 Could CMS just copy the survey and ask
19 for the same thing?

20 A. I can't speak for CMS.

21 Q. Well, couldn't they just take the
22 questions and ask the same questions?

1 A. Yeah, I guess they could.

2 Q. But they don't?

3 A. No. Why would they?

4 Q. You tell me.

5 A. They have other things they're measuring.

6 Q. What are the other things they're
7 measuring?

8 A. Okay. Do you want me to go back to the
9 hand hygiene or continue?

10 Q. We'll come back to it. I just want to
11 get --

12 A. Okay.

13 Q. Just to your comment that they have other
14 things they're measuring, what are the other
15 things that CMS is measuring?

16 A. Okay. Patient experience. So that's all
17 of the H-comp 1 through 6 that we use in our
18 survey. Those are patient experience surveys
19 that hospitals are required to send out to their
20 patients to see if they had a good experience
21 with the staff and other parts -- cleanliness of
22 their stay, that sort of thing, discharge

1 instructions, medication instructions.

2 Other things they measure are through
3 claims. So this is, like, through Medicare
4 claims. And they will measure the rates of
5 certain events. They look at ICD codes to
6 determine that -- whether a harmful event
7 occurred. And they have their own calculations
8 that they use and that are developed by experts
9 in the field.

10 Q. And what, overall, is -- what is your
11 understanding of what CMS is trying to measure?

12 MS. BLAIR: Objection to form.

13 BY MR. CRAIN:

14 Q. What is your understanding of what CMS is
15 collecting data for?

16 A. I believe essentially to improve
17 healthcare quality, mainly, and safety.

18 Q. And safety?

19 A. Safety and quality, yes. They have a
20 different perspective than us. We're focused
21 solely on patient safety for the most part; and
22 they're focused a lot more, I would say, on

1 quality.

2 Q. And what does "quality" mean?

3 A. Well, again, I'm not super familiar with
4 that field because we're focused on patient
5 safety.

6 Q. Well -- you have no opinion on what
7 quality means?

8 A. Well, I mean, I guess, like, I would want
9 to have -- I mean, like, good care. Good care in
10 the hospital setting. To not be charged too
11 much. Things like that.

12 Q. Noise?

13 A. I don't know.

14 Q. Okay.

15 A. I mean, I wouldn't want a noisy hospital.

16 Q. Fair enough.

17 And just to be clear, I think you
18 testified almost a page about the different
19 things that CMS measured.

20 A. Uh-huh.

21 Q. What is your understanding of what CMS is
22 evaluating with respect to quality?

1 A. My understanding of what they're -- like,
2 how to summarize all of these things?

3 Q. What is quality, to your understanding?
4 Let me -- terrible question. Let's strike that.

5 When you say CMS is evaluating quality,
6 is it fair to say that that's what you're saying?
7 CMS is evaluating -- one of the things CMS is
8 evaluating is quality, right?

9 A. Sure. Yes.

10 Q. What is your understanding of what
11 quality means in that -- in that phrase?

12 A. Well, it definitely includes -- safety is
13 kind of in there as well, but it also includes
14 other things, like patient readmissions. Like,
15 that can be very costly. So they have other
16 measures that look at that.

17 They have -- which wouldn't necessarily
18 fall into patient safety. And I know that
19 because they didn't include that in the safety
20 grade.

21 Yeah, I mean -- yeah, I'm not the expert
22 on this.

1 Q. Okay. Now back to hand hygiene.

2 So tell me -- I don't think we got to
3 it -- what is the hand hygiene measure --
4 metric -- measure -- strike that.

5 What does the hand hygiene measure
6 evaluate?

7 A. So it looks at a couple of different
8 things. The hand hygiene measure ensures that
9 hospitals are measuring, so they're using hand
10 hygiene observations every month to make sure
11 that staff are washing their hands. So there's,
12 like, an observation component.

13 There's also training, whether they're
14 providing training, adequate training, to their
15 staff.

16 There's also culture, so whether they're
17 creating a culture of hand hygiene.

18 Q. And am I right that there's a question
19 that asks whether there's a culture sort of at
20 the top in favor of handwashing?

21 A. I believe so. I know there's a culture
22 component.

1 Q. And how do hospitals measure that?

2 A. I'm not the person to ask. Missy
3 Danforth is.

4 Q. Okay. What is your understanding of how
5 hospitals might measure that?

6 A. How they measure? I mean, I would assume
7 that you would want to make sure that there's
8 signs posted, that leadership has showed a
9 commitment to hand hygiene.

10 Q. Through words?

11 A. I'm -- again, I'm not the expert on that.

12 Q. Okay. And does CMS measure hand hygiene?

13 A. I'm not sure.

14 Q. Okay. And if a hospital doesn't
15 participate in Leapfrog's surgery -- excuse me.

16 If a hospital doesn't participate in
17 Leapfrog's survey, does Leapfrog have any data
18 about hand hygiene?

19 A. No.

20 Q. In your opinion, is handwashing among the
21 most important measures that Leapfrog grades on?

22 A. I think they're all important.

1 Q. There's no hierarchy?

2 A. I think that -- no. I mean, I think
3 that, like, our weighting system takes that into
4 consideration, and that was -- that has existed
5 since the inception of safety grade.

6 Q. Are you aware that Leapfrog, on its
7 website, makes hand hygiene one of the most
8 important metrics?

9 A. Again, you're going to have to show me.

10 Q. Yeah, yeah. It's right in front of you.

11 A. Oh, it's on this page? I think that also
12 can be up to an opinion.

13 Q. If you go to 3. Page 3.

14 A. Uh-huh.

15 Q. To your point, it says, Every person will
16 have different ideas about what is most important
17 to them, but we suggest checking whether your
18 hospital scores well on handwashing.

19 A. Oh.

20 Q. And if you look at the top, the
21 question -- and again, this is in a website
22 called, How to use the grade.

1 But the question is, What measures are
2 most important?

3 Do you see that?

4 A. Okay.

5 Q. And the first one is handwashing, right?

6 A. Yeah.

7 MS. BLAIR: Objection to form.

8 BY MR. CRAIN:

9 Q. Is the first one handwashing?

10 A. It is.

11 Q. And there are how many others?

12 A. Two other bullet points.

13 Q. And are you -- do you agree that
14 handwashing is most important?

15 MS. BLAIR: Objection to form.

16 THE WITNESS: I'm not a communications
17 person, and I don't -- I'm not familiar with how
18 to word things for the general public to a lay
19 audience, so I don't think I'm the person to ask
20 about this.

21 BY MR. CRAIN:

22 Q. When you read this page, which metrics

1 does it say are the most important?

2 A. I mean, I guess if you skim past the
3 first sentence, then you would say handwashing.

4 Q. Skim past the first sentence meaning
5 what?

6 A. Every person will have different ideas
7 about what is most important to them.

8 Q. Okay. But if you skip past that
9 sentence -- say again what you said, I'm sorry.
10 I'm confused.

11 A. Then handwashing is the first bullet
12 point.

13 Q. Okay. So is it -- this is Leapfrog's
14 website, right?

15 A. Yes.

16 Q. And do you disagree with this
17 communication?

18 A. I would say no. Because if I think about
19 it, I don't -- I really think it's important that
20 my surgeon washes his hands before -- or her
21 hands before operating on me.

22 Q. So you agree that handwashing is one of

1 the most important metrics.

2 MS. BLAIR: Objection to form.

3 THE WITNESS: It's subjective.

4 BY MR. CRAIN:

5 Q. What is your opinion?

6 A. My opinion? I think they're all
7 important.

8 Q. And -- okay. You can set that aside.

9 So I want to talk about three other
10 measures, and I'm going to call them the
11 discarded measures. Or we can have another name
12 if you prefer. But I'm referring to the three
13 measures that Leapfrog does not include for a
14 non-participating hospital.

15 Do you know what I mean by that?

16 A. No.

17 Q. Okay. So when a hospital doesn't
18 participate in Leapfrog's survey, are there any
19 measures that are excluded from the score
20 calculation?

21 A. I wouldn't use the word "excluded."

22 Q. What word would you use?

1 A. They're not available.

2 Q. Okay. Is that different from
3 handwashing -- hand hygiene?

4 A. Yes. If you're asking why we don't
5 impute for those measures, then --

6 Q. Well, I'm starting -- I want to get us on
7 the same page, what those measures are.

8 A. Okay.

9 Q. Do you understand what I'm talking about
10 with those measures? There are three, right?

11 A. Yes.

12 Q. Okay. And just so we're on the same
13 page, is one of them, safe practice 1, culture of
14 leadership, structures and systems measure?

15 A. Yes.

16 Q. And another is safe practice 2, culture
17 measurement, feedback and intervention measure --

18 A. Yes.

19 Q. -- correct?

20 Sorry, let's pause.

21 And then is the third one total nursing
22 care?

1 A. Yes.

2 Q. Can you tell me, just generally, what do
3 those three measures evaluate?

4 A. Okay. I'm not as familiar, but I know
5 they come from NQF. And they're processes that a
6 hospital can have in place.

7 Q. So culture of leadership structures and
8 systems, what does that measure?

9 A. That's one of the safe practices. And
10 those were added -- they're very old measures
11 that we've actually included in the survey I
12 think since the survey was first developed.

13 Q. So you have no involvement in developing
14 those?

15 A. No. Those are NQF.

16 Q. Is that -- did Ms. Danforth -- was she
17 involved in developing those?

18 A. Well, they're not really developed --
19 yes, she can answer your questions about them.

20 Q. Okay. And when you say NQF, that's the
21 National Quality -- what's the F?

22 A. Forum, I think.

1 Q. Forum. Okay. Thank you.

2 Does CMS measure any of those three
3 measures?

4 A. I actually believe that they have just
5 put out a measure that is considering these
6 process and structural things because they know
7 that they're important.

8 Q. All three?

9 A. I mean, these can take different forms.
10 And when you say all three, what do you mean?

11 Q. Safety practice 1, safety practice 2, and
12 total nursing care hours.

13 A. Total nursing care hours is an totally
14 separate type of measure.

15 Q. Okay. So maybe we should go through them
16 one by one. I was trying to save us some time.

17 Culture of leadership, structures, and
18 systems. Does CMS measure that?

19 A. I don't know.

20 Q. Okay. And if a hospital doesn't
21 participate in Leapfrog's survey, does Leapfrog
22 have any data about the culture of leadership,

1 structures, and systems measure?

2 A. No.

3 Q. Safe practice 2, culture measurement,
4 feedback, and intervention measure.

5 What is that describing?

6 A. I'm not familiar with it, but it's also
7 NQF.

8 Q. And does CMS measure that, to your
9 knowledge?

10 A. I don't know.

11 Q. Okay. And if a hospital doesn't
12 participate in Leapfrog's survey, is Leapfrog
13 missing data for culture measurement, feedback,
14 and intervention?

15 A. Yes.

16 Q. And then the last one is total nursing
17 care hours per patient day, correct?

18 A. Yes.

19 Q. What does that measure?

20 A. So that measure is different. It's
21 the -- the total nursing care hours per patient
22 day, that is more about nurse staffing and your

1 nursing workforce.

2 Q. You said it's different from the other
3 two.

4 Can you explain how?

5 A. It's a measurement. It's the total
6 nursing care hours per patient day.

7 Q. Are you saying it's more objective?

8 A. No.

9 Q. Okay. Why not?

10 A. It's a measurement.

11 Q. But the other two are not measurements?

12 A. Well, one is numerical and the other one
13 is more -- it's have you met -- do you have these
14 processes in place? Then it's converted to a
15 numerical score.

16 Q. So is it fair -- and I'm just trying to
17 understand. Is it fair to say that the first
18 two, safety practice 1 and 2, are more binary,
19 yes or no?

20 A. Yes. Yeah. It's, do you do these
21 processes? Yes or no, literally.

22 Q. Got it. And nursing care is -- what's

1 the numbers?

2 A. Yes.

3 Q. Okay. Thank you.

4 And then the same question: If a
5 hospital doesn't participate in Leapfrog's
6 survey, does Leapfrog have any data on total
7 nursing care?

8 A. No.

9 Q. Okay. You were starting to testify about
10 the difference between those three -- I'll call
11 them discarded measures, but if you want to call
12 them something else, just let me know -- but the
13 three discarded measures and the four imputed
14 measures.

15 You told me that Leapfrog has no data for
16 any of those seven measures if a hospital does
17 not participate in the survey; is that right?

18 MS. BLAIR: Objection. Form.

19 THE WITNESS: Yes, and I disagree with
20 your characterization of them being discarded.

21 (Discussion off the record.)

22

1 BY MR. CRAIN:

2 Q. You said you disagreed with my
3 characterization of discarded.

4 A. Yes.

5 Q. What would you like to call them?

6 A. There's different reasons that they're
7 not included on the survey. The expert panel
8 could speak to why they made that decision.

9 The two safe practices, those were
10 decided a long time ago that they shouldn't be
11 imputed because they're more process measures;
12 they're less structural. Kind of like that
13 nursing measure we were just talking about, where
14 it's a question of how are you staffing your
15 hospital, that sort of thing.

16 So they're process measures. So it was
17 decided by the expert panel not to impute them
18 ever.

19 Q. When was that decision made?

20 A. I don't know. I wasn't there.

21 Q. Was that decision made before you came to
22 Leapfrog?

1 A. Yes.

2 Q. Okay.

3 A. But the total nursing hours, that's a
4 relatively new measure. So that hasn't come up
5 for imputation yet.

6 Q. Okay. And -- so I'm just going to call
7 them the three. So I don't have to call them the
8 discarded measures, but just the three.

9 What is your understanding of why
10 Leapfrog imputes for the four and does not impute
11 for the three? What's the difference?

12 A. The two safe practices are process
13 measures. And the expert panel decided it wasn't
14 appropriate to impute for those measures.

15 And the total nursing care hours measure
16 is relatively new, and it hasn't been brought
17 to -- for consideration yet of whether to be
18 imputed or not.

19 Q. Is CPOE a process measure?

20 A. It is a structural measure.

21 Q. Okay. Is BCMA a process measure?

22 A. No. It's a structural measure.

1 Q. Okay. So all of the four imputed are not
2 process measures?

3 A. No. They are all structural.

4 Q. Okay. So the difference is Leapfrog has
5 imputed for structural measures but not process
6 measures?

7 A. Yes. I believe that was the expert
8 panel's thinking. But again, I wasn't there at
9 that time.

10 Q. Okay. And I had understood that Leapfrog
11 divided its measures into -- I think it was
12 process and outcome, right? We talked about that
13 earlier today.

14 A. It's -- process and structural is half of
15 the grade, and outcome is the other half.

16 Q. So when Leapfrog says structural on its
17 website, it's referring to -- sorry. When
18 Leapfrog says process on its website, it's
19 referring to process and structural?

20 MS. BLAIR: Objection to form.

21 THE WITNESS: Yeah, I'm -- I don't know
22 exactly where you're referencing.

1 BY MR. CRAIN:

2 Q. So we talked earlier today there were two
3 types of measures, right?

4 A. Well, I think that there's two
5 categories, one being process and structural
6 measures composed of some process measures and
7 some structural measures; then the other half is
8 outcome measures.

9 Q. And what's the difference between process
10 and structural?

11 A. I'm not super familiar with the
12 difference. The -- I'm sure other people can
13 speak better to that.

14 Q. Well, you seem to have very facile
15 understanding of which ones fall into which
16 buckets.

17 So how do you put them into those
18 buckets?

19 A. I mean, structural, it's kind of
20 self-explanatory in the name. But it's a
21 structure you have in your place, like
22 infrastructure, whereas a process is just

1 something you have in -- it's a process you have
2 in place or you don't.

3 Q. Okay. So going to hand hygiene, do some
4 of the questions on hand hygiene pertain to
5 sanitizers?

6 A. Yes. I believe. But you have the option
7 always to wash your hands or use hand sanitizer,
8 so hospitals can still achieve similar points
9 with or without having hand sanitizing stations.

10 Q. But the survey -- is it correct that the
11 survey asks hospitals questions about whether and
12 where they have sanitizers?

13 A. It also -- yes, but it also has questions
14 about whether you have a sink, and so -- and that
15 sort of thing.

16 So I think it's -- you can have either.

17 Q. And is that structural or process?

18 A. I think that -- I would actually -- maybe
19 that measure kind of falls in process and
20 structural. But I would say that's structural.
21 I mean, that is literal, like, where do you have
22 a sink and how far is it from a bed?

1 Q. I mean, that makes sense to me, too.

2 So my question is, your original
3 distinction between the four imputed and three --
4 not discarded, but discarded -- was that one was
5 structural and one was process, right?

6 A. That's my understanding of it, but again,
7 I wasn't there when the expert panel made the
8 decisions.

9 Q. But certain of the -- at least
10 handwashing has structural components, right?

11 A. Yes.

12 Q. So is it -- where did you get the
13 understanding that the three discarded, I'll call
14 them, were discarded because they're structural?

15 A. Because --

16 MS. BLAIR: Oh --

17 BY MR. CRAIN:

18 Q. Because they're structural, right?

19 MS. BLAIR: Objection to form.

20 BY MR. CRAIN:

21 Q. Or processed, excuse me. Now I am all
22 tied up in knots. Strike that.

1 Where did you get the understanding that
2 the three discarded metrics were discarded
3 because they were process?

4 A. I've asked Missy Danforth before and
5 she's explained this to me.

6 Q. Okay.

7 A. And she can do a better job explaining
8 than I can.

9 Q. Fair enough. Okay.

10 MR. CRAIN: Is now a good time for a
11 break?

12 THE WITNESS: Sure. No, we can --

13 MR. CRAIN: Maybe let's go off and --

14 THE WITNESS: Oh, yeah.

15 MR. CRAIN: Let's go off the record.

16 VIDEO TECHNICIAN: The time is 10:18 a.m.
17 This ends unit 1. We're going off the record.

18 (A recess was taken.)

19 VIDEO TECHNICIAN: The time is 10:31 a.m.
20 This begins unit number 2. We're on the record.

21 BY MR. CRAIN:

22 Q. Ms. Campione, I'd like to talk about the

1 survey methodology, if that's okay with you.

2 A. Sure.

3 Q. And I'm going to give you a copy so
4 you're not -- it's not from memory.

5 A. Okay.

6 MR. CRAIN: So this was, I believe,
7 Jupiter Exhibit 1, and we'll mark as Campione
8 Exhibit 1 as well.

9 MS. BLAIR: This is Exhibit 2.

10 MR. CRAIN: It says 1. Oh, this is
11 Exhibit 2, I'm sorry.

12 THE WITNESS: You said survey
13 methodology.

14 MS. BLAIR: Yeah. And for the record,
15 this is --

16 MR. CRAIN: Scoring methodology --

17 MS. BLAIR: -- the scoring methodology.

18 MR. CRAIN: -- excuse me. Scoring
19 methodology.

20 THE WITNESS: Well, there's scoring
21 methodology for the survey as well. This would
22 be the safety grade methodology.

1 MR. CRAIN: Yeah, that's what I mean.
2 Safety grade methodology. Whatever this document
3 is, I want to talk about it.

4 THE WITNESS: Just want to make it clear
5 there's a difference.

6 MR. CRAIN: That's all right. That's
7 good.

8 (Campione Deposition Exhibit 2 marked for
9 identification and attached to the
10 transcript.)

11 BY MR. CRAIN:

12 Q. So we're all on the same page, what is
13 this document?

14 A. This is the spring 2025 safety grade
15 scoring methodology.

16 Q. And was this changed from the methodology
17 that was operative in 2024?

18 MS. BLAIR: Objection to form.

19 THE WITNESS: I'm sorry, which safety
20 grade?

21 BY MR. CRAIN:

22 Q. Was --

1 A. Spring or fall 2024?

2 Q. Either.

3 A. I'm not familiar if we did proposed
4 changes for this.

5 Q. Okay. This reflects the proposed
6 changes -- when you say -- strike that.

7 When you say proposed changes, are you
8 talking about the changes to the imputation
9 model?

10 A. Yes. So every round will have -- we'll
11 put out -- or not every round. If we're making a
12 change, we'll put out proposed changes, and
13 hospitals have the opportunity to comment on
14 those changes.

15 I don't -- as far as the spring 2025
16 safety grade goes, I don't think there are any
17 changes from fall 2024 safety grade.

18 Q. And the spring 2025 safety grade document
19 that we have in front of us --

20 A. Yes.

21 Q. -- would that have taken -- would that
22 have -- would the revisions to the imputation

1 model be reflected in this document?

2 A. Yes.

3 Q. So I want to talk -- you mentioned -- so
4 what is this document? Just tell us generally.

5 A. So this document summarizes what is the
6 hospital safety grade, what hospitals are
7 eligible, what measures are included in the
8 safety grade, the points that are assigned to
9 each measure, or how their rates work.

10 Then it goes into the actual scoring
11 methodology. So it describes how weights are
12 assigned to the measures.

13 Then it describes how we calculate
14 Z scores and what we do with missing data.

15 The next step is calculating the
16 numerical scores, which are then used to make the
17 grades.

18 Q. And just tell me, what are Z scores and
19 numerical scores?

20 A. Okay. So --

21 Q. Yeah.

22 A. Okay. So let me flip to that section.

1 Q. Great. Tell me where.

2 A. Okay. So starting on page 18 is the
3 scoring methodology.

4 The first thing that we discuss are the
5 weighting of each measure. We look at four
6 different components -- well, I should use the
7 word -- we look at four different parts for
8 weighting. We look at the evidence, the
9 opportunity, the impact, and the number of
10 component measures.

11 These numbers that are used in the
12 weighting were determined by our safety grade
13 expert panel. They don't typically change from
14 year to year.

15 The evidence, if it was determined by our
16 expert panel that the measure is supported by
17 either suggestive clinical or epidemiological
18 studies or theoretical rationale, they will
19 assign them 1. If they feel that it is -- or
20 have determined -- because these are scientific
21 studies, if they've determined that they're
22 supported by experimental, clinical or

1 epidemiological studies and strong theoretical
2 rationale, they'll assign 2.

3 Then the opportunity score is about how
4 much opportunity there is for the hospital to
5 improve. So it's kind of a measure of variation
6 from the mean for each individual hospital, their
7 score.

8 The next one is impact. And so that
9 looks at the number of patients impacted, or the
10 severity of harm. So a measure like foreign
11 object retained, that's obviously pretty severe,
12 and so that would be assigned a higher score for
13 severity of harm. However, fewer patients
14 undergo a surgery where this is possible, so
15 they're assigned a lower score.

16 The number of patients affected -- so
17 this is whether it's, like, a hospital-wide
18 measure or it's just limited to surgical
19 patients, so they'll be assigned a 1, 2, or 3.

20 The severity of harm -- like I said,
21 foreign object retained, that would be -- that's
22 at a 2. So it's pretty -- I would describe that

1 as very much an adverse event. But something
2 like patient experience doesn't directly harm the
3 patient, so it's assigned 1.

4 Then they're all added together.

5 PSI 90 is the only measure to have the
6 number of component measures used.

7 So that is multiplied by 10. And those
8 all go into the actual weight of the individual
9 measures.

10 So moving on --

11 Q. Well, before you move on --

12 A. Yes.

13 Q. -- can I ask you to break it down a
14 little bit? I appreciate it.

15 Going back to evidence, evidence of --
16 what is the evidence supposed to be geared
17 towards?

18 A. So evidence is focused on the amount of
19 academic research that was used -- or -- for the
20 measures.

21 Q. Used to develop them or to -- like, what
22 is the -- used for what, I think, is the

1 question?

2 A. I mean, it would be, like, any study out
3 there. So they'll do a literature review and
4 find studies that back up each measure. And
5 it's -- like, its usefulness in patient safety.

6 Q. So back up how accurate it measures a
7 metric? I'm just trying to get at the what
8 it's -- what the evidence is measuring.

9 A. So it's the measure's connection to
10 patient safety. So we define patient safety as
11 freedom from harm. So if -- obviously if
12 there's, like, an experimental study, that would
13 be, like, the strongest study to point towards
14 causation. And then, as you move down the scale,
15 it could be, like, observational. So basically,
16 like, it's strongly suspected by experts that
17 it's related but, for whatever reason, they
18 are -- a lot of times it's just impossible to,
19 like, absolutely prove. So then it would be
20 assigned a lower or higher score based on that.

21 Q. So the evidence weighting measure -- is
22 that what you call it? A weighting -- what do I

1 call these --

2 A. Yes. These are weights.

3 Q. The evidence weight is assessing the
4 strength of the evidence connecting the measure
5 to patient safety; is that right?

6 A. Yes.

7 Q. Okay. And then opportunity is
8 measuring -- I'm still a little confused on that.

9 Can you explain what opportunity is
10 measuring?

11 A. Sure. So it's kind of the spread of
12 data. So like, for a measure like -- I'll use
13 patient experience as an example. But something
14 like patient experience, it's really difficult
15 for hospitals to change that from year to year.
16 Typically, like, if they perform poorly in those
17 measures, it's hard for them to improve from
18 there.

19 So that -- in, like, lay terms, it's kind
20 of what it's looking at, like opportunity. But
21 from a mathematical standpoint, this is looking
22 at the standard deviation divided by the mean.

1 Q. Okay.

2 A. So if there's a lot of spread in the
3 data, then that's going to be higher, I believe.
4 Yeah.

5 Q. And then going towards something you said
6 at the end. You said for PSI, the number -- it
7 includes a number of components.

8 What did you mean by that?

9 A. So PSI is --

10 Q. PSI 90.

11 A. PSI 90, yeah. PSI 90 is a -- it's
12 composed of ten components, PSI 3, 6, 8, 9, 10,
13 11, 12, 13, 14, and 15. And all those go into
14 developing PSI 90. This is a measure that was
15 developed by CMS. And I believe -- actually,
16 Patrick Romano on our expert panel was involved
17 in its development. And it's a highly adjusted
18 measure. It's composed of these ten really
19 important rates, and it goes into developing the
20 score that's centered on 1.

21 Q. And just to take something you said, who
22 is Dr. Romano?

1 A. Dr. Romano is on our expert panel, and
2 he -- I forget which university he's affiliated
3 with now, but he works on these measurements.

4 Q. And this document that we're going
5 through, is this the document that you testified
6 to earlier that you look at almost every day, or
7 you work with almost every day?

8 A. Yes. Yeah, I mean, I wouldn't say I look
9 at it every single day, but...

10 Q. Do you work with it -- what -- what did
11 you say before? You work with it every day?

12 A. I -- in some form or another, I'm
13 applying our methodology or answering questions
14 related to this document.

15 Q. Can you go to page 20? And there's a
16 table here.

17 Do you see that?

18 A. Yes.

19 Q. And it says -- standard measure weight is
20 the right-most column; is that right?

21 A. Yes.

22 Q. And does this add -- this adds to -- this

1 adds up to 100, correct?

2 A. Yes.

3 Q. And can you just do a rough
4 back-of-the-envelope calculation? What does
5 CPOE, BCMA, IPS, and hand hygiene amount to?

6 A. Let's see. Like, 24 percent.

7 Q. Let's see. Yeah, looks about right. So
8 about a quarter?

9 A. Yes.

10 Q. And has Leapfrog always weighed the
11 measures this way or has it changed?

12 A. Can you define or explain more what you
13 mean "this way"?

14 Q. Sure.

15 The percentages in the right-most
16 column --

17 A. Uh-huh.

18 Q. -- does that change?

19 A. The percentages do change from round to
20 round because that opportunity score is based on
21 the mean and standard deviation, and that's
22 changing every round.

1 Q. Okay. So every cycle of the grading
2 period, it changes?

3 A. Yes. These can change. Usually
4 slightly. And then, also, if a measure is added
5 or removed, these will adjust accordingly.

6 Q. And have measures been added or removed
7 in your time at Leapfrog?

8 A. Total nursing care hours per patient day
9 was added while I've been here.

10 Q. Anything removed?

11 A. No.

12 Q. Okay. All right. You can set that aside
13 for the moment.

14 I want to talk a little bit about the
15 hospital survey --

16 A. Okay.

17 Q. -- which I think we've talked less about
18 today, but let's get into it.

19 What is the Leapfrog hospital survey?

20 A. So the Leapfrog hospital survey is a
21 voluntary survey that is administered annually.

22 Q. Do you have any role in designing the

1 survey?

2 A. I manage two subsections of the survey.
3 They are not involved in the safety grade.

4 Q. Which subsections?

5 A. OAS CAHPS and pediatric CAHPS.

6 Q. And who is responsible for managing the
7 sections that are involved in the -- related to
8 the safety grade?

9 A. We have a team of about ten people, and
10 so -- I don't know exactly who is -- works on
11 each of those sections, but there is a person
12 assigned to each of those.

13 Q. Would Ms. Danforth know?

14 A. She oversees all of them. Yeah, she's
15 involved in all of them.

16 Q. Okay. So do you have any role in
17 reviewing responses to the survey?

18 A. Responses? There is another analyst that
19 downloads the data that surveys submit through
20 our online survey tool, scores them much in the
21 same way that I score safety grade. And if they
22 were out for some reason, I could fill in for

1 them and do this process.

2 Q. You said -- you distinguished between
3 scoring the survey responses and scoring the
4 safety grade.

5 Did I understand that right?

6 A. Yes.

7 Q. Can you --

8 A. Totally separate.

9 Q. Explain to me the difference.

10 A. Yes. Absolutely.

11 The survey is graded several times
12 throughout the year, monthly actually, from
13 July until January. Every month the data is
14 taken down that hospitals have submitted at the
15 beginning of the month, and they score it based
16 on the algorithms for the survey. So those are
17 based on -- those assign hospitals to different
18 categories based on their responses to the
19 survey.

20 They also engage in a data verification
21 process where they make sure that they kind of
22 cross-reference the questions across the survey

1 to make sure that they all align and make sense.

2 They -- the scoring process produces a
3 final scored file and a file that is uploaded to
4 the ratings website.

5 Q. Okay. And then -- so you said the data
6 is submitted every month.

7 Is that in -- the hospitals submit what
8 data every month?

9 A. So the way that the survey works is that
10 it opens on April 1st. And the official deadline
11 is June 30th. That's when we ask hospitals to
12 submit by. But the tool stays open throughout
13 the year -- or until November 30th. That's the
14 final deadline.

15 But during that time, during our data
16 verification process, oftentimes hospitals need
17 to go back in, fix their data, and -- because
18 it's not -- there's things that either don't make
19 sense, we've looked into them, we've done
20 document requests, so we're constantly verifying
21 that data. And they have to go in, update their
22 responses.

1 And the August 31st deadline is the
2 snapshot for the safety grade. So if they want
3 that data used in the fall safety grade, they
4 have to have it completely finalized by that
5 date.

6 Q. In your experience, do hospitals
7 typically submit data every month?

8 A. No, they don't.

9 Q. Okay.

10 A. You can submit the survey one time at the
11 beginning of the year and it can be done.

12 Q. Is it one survey per year?

13 A. It's one survey per year, and the
14 questions do not change during the year.

15 Q. And that's used to do both safety grades
16 that year?

17 A. Well, yes. It depends on the snapshots.
18 But that would be for -- it would then be used in
19 the fall grade, then in the spring grade. But
20 the safety grade is really -- it's a separate
21 program, and it's a downstream use of the data.

22 Q. What do you mean downstream use of the

1 data?

2 A. Well, they're scored in the survey.
3 They're placed into scoring categories based on
4 our scoring algorithm that was reviewed by the
5 respective expert panel. Then that file --
6 they're placed into these categories for various
7 measures. And then I get that file and I recode
8 that into the scoring methodology for the safety
9 grade.

10 Q. Can you walk through how that works for,
11 like, hand hygiene for a participating hospital?

12 A. For the survey or safety grade?

13 Q. The whole process you just laid out.
14 They submit a survey response. You said it's
15 scored. So how is that scored?

16 A. So you can look up the safety grade
17 scoring algorithm. It's posted on our website.

18 Q. Well, how is it scored for the survey
19 first?

20 A. So according to that scoring algorithm,
21 the code is set up in a way that it takes the
22 survey responses and, in accordance with the

1 scoring algorithm, assigns them to one of these
2 categories. And the categories are achieved the
3 standard, considerable achievement, some
4 achievement, and limited achievement or did not
5 measure or does not apply.

6 Q. So that's six.

7 A. It depends on the measure.

8 Q. Okay. So to take hand hygiene, ballpark,
9 there are about -- maybe a little under two dozen
10 questions.

11 Does that sound right?

12 A. I am not sure.

13 Q. Okay. There are a certain number of
14 questions on hand hygiene.

15 A. Uh-huh.

16 Q. Is it right that an algorithm takes the
17 answers to those questions and, in the survey
18 scoring, yields an output of the type you just
19 mentioned, high achievement, limited achievement?

20 A. Yes.

21 Q. Okay. And then you take that output and
22 you import it into the safety grade algorithm?

1 A. Yes.

2 Q. Okay. And that yields the grade?

3 A. Well, I mean, I also have lots of other
4 data sources to include, CMS namely --

5 Q. Sure.

6 A. -- and they have multiple data sets, and
7 that has to be combined with this data.

8 Q. Okay. So the two steps are taking the
9 answers to the questions to yield an output,
10 taking that output and putting it into the safety
11 grade with other things?

12 A. Yes. I wouldn't consider them -- I would
13 never consider them as, like, one process where
14 that's a step 1 and step 2. It's completely
15 separate. They're in -- he's scoring in a
16 different folder everything. This code is
17 completely separate. And the final file is final
18 at that point. Then I pull it into the program,
19 much like I do with the CMS data.

20 Q. Are the outputs of the scoring -- of the
21 survey scoring process used for anything other
22 than grading?

1 A. Than safety grade?

2 Q. Correct.

3 A. Yes.

4 Q. What are thaw used for?

5 A. They are used for our VBP program.

6 They're posted on the ratings website. They are
7 given to data licensees.

8 I'm trying to think if there's any other
9 programs. There might be another program in
10 there that we use the data for.

11 Q. What is VBP?

12 A. VBP? It's our value-based purchasing
13 program.

14 Q. Can you explain what that is?

15 A. Yes. That's -- I'm not as familiar with
16 that. It's kind of -- it's somewhat of a safety
17 grade in that it's assigning -- it's creating
18 numerical scores for a hospital, but it considers
19 other measures beyond what's included in the
20 safety grade.

21 The safety grade is -- its scope is
22 narrow -- narrower in that it only includes

1 measures that are strictly related to patient
2 safety and adult care.

3 Q. And you mentioned it's put on the
4 website.

5 Which website are you talking about?

6 A. Ratings.org.

7 Q. Is it hospitalsafetygrade.org?

8 A. No. That's the safety grade website.

9 Q. Okay. So what is ratings.org?

10 A. That's where our -- the results from the
11 survey are posted.

12 Q. Okay. Is that different from
13 leapfrog.org?

14 A. Yes. I believe -- leapfrog.org is just
15 giving information about our organization.

16 Q. How many websites does Leapfrog have?
17 Not sub, but --

18 A. I would say thee's three that are the
19 most important.

20 Q. Okay. So can you just name the three?

21 A. The ratings.org, hospitalsafetygrade.org,
22 and then that leapfrog.org.

1 Q. Okay.

2 A. There might be some other -- like "the"
3 or something in there.

4 Q. And, obviously, sub websites?

5 A. Yes.

6 Q. You mentioned also data licensees.
7 Tell me what you were talking about
8 there.

9 A. I really don't know much about who
10 actually is licensing the data. I just know that
11 I produce one file that is essentially everything
12 that's -- it is everything that's posted publicly
13 in an Excel file that goes to someone else.

14 Q. And licensees purchase that; is that
15 right?

16 A. Yes.

17 Q. Okay. Do you have any sense of how much
18 they pay?

19 A. No, I don't.

20 Q. And you do not know the types of folks
21 who are the licensees?

22 A. No.

1 Q. Researchers, hospitals, anything like
2 that?

3 A. No. I've heard, you know, here and
4 there, like, health plans as well, employers,
5 purchasers, but I don't know any of, like, the
6 actual companies.

7 Q. Health plans meaning, like, insurers?

8 A. Yes.

9 Q. Okay. So I want to go back to the
10 survey. And -- I don't think we need to put it
11 in front of you right now.

12 But presumably you've seen the whole
13 survey, right?

14 A. Yes.

15 Q. It's a thick document, right?

16 A. Yes. I think it's over 100 pages.

17 Q. Well, I think it's over 350 pages.

18 Does that sound right?

19 A. It's comprehensive.

20 Q. It is comprehensive.

21 And I want to just ask you, how -- you
22 said earlier today it takes, I think you said, 80

1 to 100 hours to complete?

2 MS. BLAIR: Objection to form.

3 BY MR. CRAIN:

4 Q. How many hours do you think -- did you
5 say it takes to complete?

6 A. I believe somewhere between 80 to 100.

7 Q. Yeah.

8 A. It depends on whether it's your first
9 time completing the survey.

10 Q. And do you think completing that survey
11 is a significant amount of work or not?

12 MS. BLAIR: Objection to form.

13 THE WITNESS: I mean, how many hours do
14 you work a week?

15 BY MR. CRAIN:

16 Q. Way too many, as I'm sure we all do.

17 Let me ask you this: So you gave an
18 interview to the Philadelphia Inquirer.

19 Do you recall that interview?

20 A. Maybe. I don't know.

21 Q. Okay. We can put it in front of you.

22 MR. CRAIN: Let's grab tab 142. This

1 will be Exhibit 3.

2 (Campione Deposition Exhibit 3 marked for
3 identification and attached to the
4 transcript.)

5 MS. BLAIR: And for the record, I believe
6 this also does not have a Bates stamp on it.

7 Have you produced it in this litigation?
8 Or have we produced it in this litigation?

9 MR. CRAIN: I am not sure. It is a
10 publicly available document.

11 MS. BLAIR: Okay.

12 MR. CRAIN: The website I think is at the
13 bottom, and the date pulled down is August 29th.

14 MS. BLAIR: So you've had it since
15 August 29th and not produced it for the record.

16 MR. CRAIN: The public document, yes.

17 BY MR. CRAIN:

18 Q. Ms. Campione, do you see the document in
19 front of you?

20 A. Yes.

21 Q. Okay. Do you recognize this document?

22 A. I may have seen it once, but I'm not

1 familiar.

2 Q. It's an article from the Philadelphia
3 Inquirer from November 2024.

4 Do you see that?

5 A. Yes, I do.

6 Q. And you -- if you go to page 6, sort of
7 midway down the page, you say -- tell me when
8 you're there --

9 A. Yes.

10 Q. -- The hospitals that do complete the
11 survey put in a tremendous amount of resources.
12 It wasn't fair to let hospitals that weren't
13 transparent actually do better in some cases than
14 those hospitals that were trying to be
15 transparent.

16 Do you see that language?

17 A. Yes.

18 MS. BLAIR: I'm going to object to form
19 because it says, Russo said, and this is
20 Ms. Campione.

21 BY MR. CRAIN:

22 Q. Are you Ms. Russo in this article?

1 A. Yes.

2 Q. You mentioned earlier in your testimony
3 that --

4 A. That's my married name.

5 Q. So when it says, Russo said, that's
6 referring to you, correct?

7 A. Yes.

8 Q. Okay. Do you disagree today that
9 hospitals that do complete the survey put in a
10 tremendous amount of resources?

11 A. I mean, I think they would consider them
12 notable and -- yeah.

13 Q. I'm not sure I understand your answer.

14 Who would consider what --

15 A. The hospital would consider them notable.
16 I mean, they're hours they could be spending
17 doing something else.

18 Q. But what is -- what do you think?

19 A. I don't work in a hospital. So...

20 Q. Okay. Do you stand by this quote?

21 A. I do.

22 Q. Okay. So you agree that the hospitals

1 that do complete the survey put in a tremendous
2 amount of resources?

3 A. Yes.

4 Q. Okay. All right. I want to also go back
5 to something you said earlier today.

6 You said you're not that involved in
7 communications; is that right?

8 A. I answer -- so sometimes I'll meet with
9 reporters, like it looks like I did in this case,
10 to answer their questions related to the scoring
11 methodology.

12 Q. How often do you meet with reporters?

13 A. Well, it's usually over the phone. I
14 mean, I probably take, like, five or six during a
15 safety grade round.

16 Q. Okay. So is that five or six every six
17 months?

18 A. Yes.

19 Q. And you work with -- does Leapfrog have a
20 PR firm?

21 A. Yes.

22 Q. Who is that firm?

1 A. CURA.

2 Q. And do you work with them?

3 A. Yes.

4 Q. Tell me about your nature of work with
5 them.

6 A. I guess -- so they'll send me questions
7 from reporters. I provide them with the data
8 from our safety grade. I make sure that it's,
9 like, in a way that they can understand. I make
10 sure that CURA has everything they need to answer
11 reporters' questions. But when it gets a little
12 more detailed, they'll have to come to me and ask
13 for specifics. Or a special data request,
14 something more specific, so I will take care of
15 those for them.

16 And then, also, I will meet with
17 reporters occasionally, and they'll set up those
18 meetings.

19 Q. And that's the five or so times every six
20 months you mentioned?

21 A. Yes.

22 Q. Fair to say CURA sort of thinks of you

1 as, like, a subject matter expert?

2 A. Yes.

3 Q. And they go to you with questions about
4 the grades, the methodology, those sorts of
5 topics?

6 A. Yes.

7 Q. Any others?

8 A. I can't recall everything they've ever
9 asked me about. But mainly it pertains to the
10 safety grade.

11 Q. Okay. Has Leapfrog conducted any studies
12 or collected any data about how long it takes for
13 hospitals to complete the survey?

14 A. I don't know.

15 Q. So your knowledge, the 80 to 100 hours
16 you mentioned, that's primarily anecdotal?

17 A. Yes. I said earlier that Missy Danforth
18 has told me that after asking her --

19 Q. Okay.

20 A. -- at some point.

21 Q. Do you know whether -- like, the amount
22 of people hospitals need to complete the survey?

1 A. No.

2 Q. Do you know the types of people that
3 complete the survey?

4 A. I know that it varies. It depends on the
5 hospital. And sometimes, within a system,
6 they'll have a single person doing it. But
7 typically they're in, you know, like, a patient
8 safety and quality role.

9 Q. Okay. Have hospitals -- going back to
10 what you talked about with the ZenDesk help
11 desk --

12 A. Yes.

13 Q. -- have hospitals complained or expressed
14 concerns about the time it takes to complete the
15 survey?

16 A. Sure. Of course.

17 Q. Have you received those complaints?

18 A. Yes.

19 Q. Tell me about them. Which ones do you
20 recall?

21 A. I don't recall any off the top of my
22 head, but I think anyone who -- everyone wants

1 less work. So it's not a surprise. I wouldn't
2 say that it's every day and I wouldn't say it's
3 even every month. There really -- you would
4 think there would be more complaints, and there
5 really aren't that many, but they do exist.

6 Q. How many, ballpark, do you get per cycle?

7 A. Which cycle?

8 Q. Let's say the six-month safety grade
9 cycle.

10 A. In regards to safety grade, it's really
11 not that often. We, of course, put out proposed
12 changes, which I mention whenever we're doing a
13 methodology change. And of course, at that
14 point, hospitals will -- may complain about
15 adding a measure because they don't want to do
16 more work.

17 Q. Okay.

18 A. So it's usually at that time that we
19 would hear it. I don't think I usually -- I've
20 ever seen them, like, outside of a proposed
21 changes time. But like I said, that's a time
22 that we are looking to solicit feedback and we

1 ask for it and -- so we hear that sometimes.

2 Q. Okay. Have hospitals ever expressed
3 concerns about the fairness of the hospital
4 survey?

5 A. Of course. Like, it's a scoring
6 algorithm, so they're going to have opinions
7 about how they -- they want points for the things
8 that they do implement. But again, our expert
9 panel has made a decision about what's most
10 important and what qualifies, and our team is
11 trained and understand in their respective
12 section what should qualify and what they should
13 receive credit for.

14 Q. Where -- you mentioned the expert panel's
15 decision.

16 Where are those memorialized?

17 A. I believe that everyone maintains their
18 own records of when their expert panel met and
19 notes from that.

20 Q. Sorry, I'm confused.

21 Who is everyone? When you say everyone
22 maintains their own records.

1 A. Sorry. Everyone on the ratings team,
2 most people -- I should say most people on the
3 ratings team manage a section of the survey, or a
4 subsection, a particular measure. And the person
5 on the ratings team is responsible for
6 convening -- or ensuring that their expert panel
7 meets when appropriate; if there's a change, that
8 things are run by them. And they are responsible
9 for documenting when they met and documents from
10 that time.

11 Q. And just to make sure I understand, there
12 are multiple expert panels, correct?

13 A. Oh, yes.

14 Q. And what types of panels do they exist
15 for?

16 A. What types of panels? So it depends on
17 the measure and the section and the subsection
18 and when it was brought forth.

19 Q. Is there one panel per measure?

20 A. Not for all measures.

21 Q. Sometimes there are buckets?

22 A. Yes.

1 Q. And the panel that we were talking about
2 earlier today on the imputation measure, what is
3 that panel?

4 A. The safety grade expert panel.

5 Q. Okay. So when Leapfrog refers to the
6 national expert panel approved the imputation
7 model, it's referring to that panel?

8 MS. BLAIR: Objection to form.

9 THE WITNESS: If it were in the context
10 of a safety grade page or document, yes.

11 BY MR. CRAIN:

12 Q. Yeah. Okay. And when it's talking about
13 other contexts, they're -- let me rephrase.

14 There are other expert panels that review
15 other things for Leapfrog, right?

16 MS. BLAIR: Objection to form.

17 BY MR. CRAIN:

18 Q. To the extent you can answer.

19 A. Yes. For a particular measure.

20 Q. Yeah. Okay.

21 You talked a little bit about response
22 verification. Do you remember talking about

1 that? And you mentioned document requests.

2 Does Leapfrog verify the accuracy of
3 information hospitals submit in the survey?

4 A. Yes.

5 Q. And tell me how.

6 A. There's several forms of data
7 verification. The first is the -- is the survey
8 tool itself. It is programmed in a way that, if
9 you answer on one section that you don't have a
10 pediatric ICU, and then you report later on that
11 you have pediatric ICU patients, then it's going
12 to cross-check those and produce a warning. And
13 those warnings have to be resolved. Either the
14 hospital has to work it out with us -- depending
15 on the category of the issue. So we put it into
16 buckets of how important it is. And they have to
17 work it out, fix their survey, or -- or give us
18 an explanation for why they need a special
19 exception. So that's the first step, is the
20 survey tool.

21 The next step is the data verification
22 that we do on the -- within our ratings team. So

1 we externally take the code and we have far more
2 complicated algorithms for cross-checking their
3 survey responses. These are developed by each
4 person in their respective section, as I
5 mentioned earlier, the ratings team. They are
6 responsible for coming up with things that would
7 be alarming, a rate that's too low, a rate that's
8 too high, a rate that doesn't really match this
9 type of hospital, it's out of the norm.

10 And they develop these -- we call them
11 data messages, or, like, verification messages.
12 And then we send out e-mails to every hospital.
13 And this is done every month. This is why
14 scoring is done every month. So if you submitted
15 a survey in April or whatever, you would probably
16 just get those data verifications in June -- in
17 July, and then you would work them out with us on
18 our staff. But if you go in and make changes to
19 your survey, now you're going to be
20 cross-referenced again, and we'll send another
21 round of data verification messages to you.

22 Q. And you mentioned earlier document

1 requests.

2 Can you tell me what that meant?

3 A. Yes. Well, so then the next one is
4 document requests. And that is -- that can be
5 random. Like, you can be randomly assigned to
6 that. They'll randomly select hospitals, the
7 ratings team.

8 So the -- we have another -- about half
9 of our members of our rating team are
10 coordinators, and they're responsible for this
11 part of data verification.

12 They, the coordinators, will choose
13 random hospitals, or it will be a hospital that
14 has raised some flags previously, and they're put
15 into this bucket of doc requests.

16 And this is a way more in-depth
17 evaluation of the hospital where they're required
18 to send documents that back up how they've
19 reported to the survey.

20 It's definitely way more in-depth and
21 oftentimes results in the hospital needing to
22 update their survey responses.

1 Q. How many hospitals undergo this document
2 request process?

3 A. I don't know.

4 Q. Do you have a ballpark?

5 A. No.

6 Q. Who would know?

7 A. Missy Danforth.

8 Q. Okay. And how many -- do you know how
9 many requests go into this, like, how many
10 document requests?

11 A. It depends on the measure. It's very
12 specific to each measure.

13 Q. Can you give a couple of examples?

14 A. Like, for hand hygiene, it would be
15 producing a document that shows that you've
16 observed how many -- a historical document that
17 shows your observations, that hospitals are
18 actually observing observations of handwashing
19 events. It could be, like, the training that
20 you're giving to your employees on handwashing
21 and whether it includes certain elements. So
22 that's handwashing.

1 Q. Is it one document per question?

2 A. It really depends on the subject matter.

3 Q. Okay. Fair enough.

4 And are there any site visits?

5 A. Yes. That's the last layer, I would say,
6 of document veri- -- or of data verification.

7 And that is an external company that we contract
8 to do that.

9 Q. What's the name of the company?

10 A. I'm not sure. I think it's called
11 Metastar or something.

12 Q. Madistar?

13 A. Something like that. You'll have to ask
14 Missy Danforth.

15 Q. Okay. Like Medistar maybe?

16 A. Maybe.

17 Q. I don't want you to -- no need to guess.

18 And then do you know how many site visits
19 are conducted?

20 A. No.

21 Q. Even a ballpark?

22 A. No.

1 Q. Okay. Do you know how many hospitals
2 participate in the survey?

3 A. Yes. Somewhere around 2,200.

4 Q. Do you know how many don't participate?

5 A. Well, it depends on what the cohort is.
6 Are you looking at all hospitals that are
7 eligible for the safety grade or all hospitals
8 that are eligible for the survey?

9 Q. Fair enough.

10 How about all hospitals eligible for the
11 safety grade?

12 A. Eligible for the safety grade? It's
13 about 80 percent. I mean, so that's a smaller
14 group of hospitals. It's about 80 percent
15 complete the survey.

16 Q. So the 2,000 reflects the 80 percent and
17 the -- whatever that number that I can't do in my
18 head now would be the other 20 percent?

19 A. Yes. I think -- yeah, about 2800
20 hospitals are graded for the safety grade, and
21 80 percent of those are completing our survey.

22 Q. Okay. Got it. So about 800 don't

1 participate.

2 A. It's less than that, yeah.

3 Q. Okay. Let's see.

4 So if a hospital has to change their
5 survey responses as a result of this process, is
6 there any consequence?

7 A. Well, if they're -- we have data snapshot
8 dates for safety grade. And after those dates,
9 they can't just go in and change their survey.
10 And yes, there are consequences.

11 Q. What if the result is too high? Strike
12 that.

13 So if the change they need to make is
14 lowering a score, will the data snapshot then
15 reflect that higher score?

16 A. No. It's pretty -- it's frozen when it
17 goes into the safety grade.

18 Q. Okay.

19 A. It's one data source. Just like the CMS
20 data is frozen and if they say, oh, there's a
21 discrepancy, they've missed the window of time to
22 dispute that with CMS.

1 Q. Whether it inures to the hospital's
2 benefit or not?

3 A. Right. It doesn't matter if it benefits
4 or not. Sometimes in doc requests, they're going
5 down a grade. Sometimes they're -- you know,
6 they're saying, we should have gotten more points
7 here or there.

8 But we ask hospitals to submit by
9 June 30th, and so they have about a month or two
10 of -- two months of data verification that they
11 go through.

12 Q. You said sometimes hospitals go down a
13 grade or two.

14 Any estimate as to how many hospitals --

15 A. Not a grade -- sorry.

16 Q. Go ahead.

17 A. No. Scoring category.

18 Q. Okay. Got it.

19 You said sometimes go down a scoring
20 category or two, right?

21 A. Based on their survey -- you know,
22 corrections they have to make to their survey.

1 Q. How many hospitals have that downgrade,
2 typically?

3 A. I mean, some of those we don't -- like --
4 you mean in relation to data verification?

5 Q. Yeah. Well, you said that some hospitals
6 have their scoring downgraded as a product of
7 data verification; is that right?

8 A. Sure. Yes.

9 Q. How often does that happen?

10 A. Well, it depends on the time. Like if
11 it's between July and August, it's a good number.
12 Definitely -- I mean, it has to happen before the
13 data snapshot date. So, I mean, it happens.
14 It's a good number.

15 Q. Is that dozens? Hundreds?

16 A. Dozens.

17 Q. Okay. And then going back to -- you said
18 every month -- they're reporting data in every
19 month.

20 Is it -- are there months where, like,
21 the critical mass of hospitals are reporting? I
22 just want to understand the cycle.

1 A. Yes. Our deadline is June 30th.

2 Q. So what -- can you give me a ballpark of
3 approximately what percentage of survey results
4 come in each month?

5 A. Like new surveys?

6 Q. Yeah.

7 A. So I would say, like, by that June 30th
8 deadline, most hospitals have submitted, around
9 2,000, upwards of that. And then maybe perhaps
10 we have, like, 100 the next month and 100 the
11 next month. Then it's pretty stable -- it's very
12 stable at that point.

13 Q. And what about, like, April, May?

14 A. No. The survey is closed during that
15 time.

16 Q. Got it. Okay.

17 A. The last time you can actually submit a
18 brand new survey is November 30th.

19 Q. Okay. Got it. So the bulk come in in
20 June, you said, and then they trickle out 100 or
21 so every month through November?

22 A. Yes. So naturally, the number of

1 hospitals that we're verifying goes down every
2 time.

3 Q. Okay. I want to shift gears and go
4 back -- go back to CMS a little bit.

5 Can you tell me about the CMS star
6 rating? What is that?

7 A. Sure. I mean, again, I'm not the expert
8 in this particular set of measures -- or,
9 actually, program. But the star rating
10 considers -- it includes a lot of the measures
11 that we have in our safety grade, but it also
12 includes other measures. And they have a very
13 technical algorithm, you could say, for how those
14 star ratings are calculated.

15 Q. And are CMS star ratings a measure of
16 hospital safety?

17 A. It includes quality as well. A lot of
18 measures that we -- our expert panel decided a
19 long time ago not to include in the safety grade
20 because they wanted the safety grade to be
21 focused purely on safety.

22 Q. So you're saying the CMS star rating

1 reflects quality and safety?

2 A. Yes.

3 Q. So can you compare the difference between
4 a CMS one-star rating and a Leapfrog F rating?

5 MS. BLAIR: Objection to form.

6 BY MR. CRAIN:

7 Q. What does -- what does a one-star rating
8 convey, in your understanding, to the market?

9 MS. BLAIR: Objection to form.

10 THE WITNESS: I mean, I wouldn't go to a
11 one-star hotel. Like, it's not as good as a
12 five-star.

13 BY MR. CRAIN:

14 Q. So it's measuring -- it's good, in
15 general? Just generally, like, how good
16 something is?

17 A. I think that it's performing worse than a
18 five-star hospital in patient safety and quality.

19 Q. And how does that compare from an F -- to
20 an F?

21 A. They're not apples-to-apples comparison,
22 the safety grades and these star ratings, but I

1 would say that an A-hospital is definitely safer
2 than an F-hospital.

3 Q. Is a five-star hospital safer than a
4 one-star hospital?

5 A. Most likely, yes.

6 Q. Necessarily?

7 A. I mean, this is getting technical.
8 Like -- I mean, I would say yes, it is.

9 Q. Okay.

10 A. Those rates are -- I mean, they're very
11 serious measures that they're including in these
12 things.

13 Q. Based on -- so what's that based on, the
14 "necessarily" -- your response to my
15 "necessarily" question?

16 A. Well, I think that both are a composite
17 of lots of different measures. And you could do
18 really bad in one part and do really well in
19 another part, and you end up with somewhere in
20 the middle; or you can actually do so well in one
21 part component of these measures that are a
22 composite that you actually end up with a

1 five-star rating, for example.

2 Q. Okay. I want to go back to Leapfrog's
3 imputation model.

4 Can you tell me, just stepping back so
5 we're on the same page, what is an imputation
6 model, generally?

7 A. Generally, if you're missing data for a
8 hospital -- sorry, for -- like in a mathematical
9 model, if you're missing data, but you still need
10 to include the observation in your model, you
11 would assign it data.

12 Q. And so -- do you have experience from
13 imputation models prior -- with imputation models
14 prior to your time at Leapfrog?

15 A. I've read about them in studies. I've
16 never personally used one.

17 Q. In what types of studies?

18 A. I mean, they're used in all sorts of
19 epidemiological studies and generally in
20 mathematical models.

21 Q. And when you say imputation, what -- in
22 those mathematical models and studies, what's

1 being imputed?

2 MS. BLAIR: Objection to form.

3 THE WITNESS: Sometimes it can just be a
4 random assignment of, like, a -- kind of like a
5 dummy variable, for example. Or -- there's
6 various ways that you could impute data.

7 BY MR. CRAIN:

8 Q. Does it require secondary data?

9 A. No, not always.

10 Q. And what's the difference between
11 secondary data and primary data?

12 A. Well, if -- are you asking in terms of
13 the safety grade program?

14 Q. In general first.

15 A. Well, I mean, I think the terminology is
16 specific to the safety grade methodology, so I
17 don't understand the question in --

18 Q. Got it.

19 A. -- that context.

20 Q. So secondary data is purely a Leapfrog
21 context?

22 MS. BLAIR: Objection to form.

1 THE WITNESS: No, I would say using that
2 term --

3 BY MR. CRAIN:

4 Q. Okay.

5 A. -- and how it applies. I don't
6 understand what you mean in the previous
7 question.

8 Q. Okay. So tell me what your understanding
9 of the term "secondary data" is.

10 A. As far as the Leapfrog program goes?

11 Q. Your understanding. But if it comes from
12 that, that's fine.

13 A. Like, if someone just walking down the
14 street asks me --

15 Q. Yes.

16 A. -- about secondary data?

17 Q. I'm walking down.

18 A. It comes after primary.

19 Q. Okay. And what's primary data?

20 A. The first data.

21 Q. Okay. And what is it in context of the
22 Leapfrog study -- safety grade?

1 A. If we have primary data, then we will use
2 primary data. If we don't, we will use secondary
3 data.

4 Q. And what is primary data --

5 A. Primary --

6 Q. -- in that context?

7 A. -- data is preferred data.

8 Q. What is preferred data?

9 A. It is the most up-to-date data, most
10 descriptive, and -- yeah. That's why it's
11 primary.

12 Q. Who decides what's primary or preferred?

13 A. Our expert panel.

14 Q. And in the context of the safety grade,
15 was that decided before you came to Leapfrog?

16 A. Yes.

17 Q. Okay. And then what is secondary data in
18 that context?

19 A. Secondary data is what you use when you
20 don't have primary data.

21 Q. And what are the types of secondary datas
22 that Leapfrog use?

1 A. It's changed over time, and it's been
2 used in the safety grade methodology since its
3 inception. And it is -- sometimes it's CMS data,
4 sometimes it's data from other sources like AHA.
5 And now it includes the imputation model.

6 Q. Okay. For how long has Leapfrog used an
7 imputation model?

8 A. I am not sure.

9 Q. There was an imputation model before you
10 started?

11 A. Yes.

12 Q. Tell me -- what did that model look at
13 the time?

14 A. I'm not intimately familiar with how it
15 was used originally. I know what it was like
16 when I got there.

17 Q. That's I mean. When you got to
18 Leapfrog --

19 A. Oh, okay.

20 Q. -- what did the imputation model look
21 like?

22 A. Sorry. So when I got to Leapfrog, there

1 was a step 1 and step 2 imputation.

2 In step 1 imputation, we would go back
3 four rounds, see if the hospital had data
4 previously. That's the previous four rounds of
5 the safety grade.

6 And step 2 would include assigning the
7 hospital to a cohort. This was based on
8 characteristics of the hospital. We got this
9 data from CMS. It's included in this impact
10 file. And it's available for all hospitals in
11 the country. And it includes things like
12 teaching status, bed size, urban/rural status.

13 But we would end up with eight cohorts of
14 hospitals, and then we would calculate how they
15 performed on the Leapfrog survey.

16 Q. Do you know why Leapfrog has an
17 imputation model?

18 A. We have an imputation model because we
19 believe that those four measures are really
20 important, and the safety grade would not be the
21 same without them.

22 Q. Does Leapfrog -- does the imputation

1 model permit Leapfrog to grade more hospitals?

2 MS. BLAIR: Objection to form.

3 THE WITNESS: I mean, I don't agree with
4 that --

5 BY MR. CRAIN:

6 Q. Tell me why.

7 A. -- root of it.

8 I mean, I think that we use secondary
9 sources when available, and the expert panel
10 deemed that these measures were very important
11 and needed a secondary data source. And
12 imputation is how they decided to go about it.

13 Q. The Leapfrog website we looked at earlier
14 says that if six process measures are missing,
15 the hospital should not be graded, correct?

16 A. Correct.

17 Q. If the -- if Leapfrog did not have an
18 imputation model, would six processes be missing
19 for hospitals that do not participate?

20 MS. BLAIR: Objection to form.

21 THE WITNESS: If -- so I think it would
22 be -- you have to look at the methodology as a

1 whole, and I think it would -- other adjustments
2 would have been made.

3 BY MR. CRAIN:

4 Q. Okay.

5 A. It's a hypothetical that doesn't exist.

6 Q. Sure.

7 Without the imputation model, could
8 Leapfrog assign a score to non-participating
9 hospitals for hand hygiene?

10 A. Without --

11 MS. BLAIR: Objection to form.

12 THE WITNESS: Sorry, I don't understand
13 the question.

14 BY MR. CRAIN:

15 Q. If Leapfrog did not deploy an imputation
16 model, could Leapfrog assign a score for hand
17 hygiene for hospitals that do not participate in
18 the survey?

19 A. No, because the imputation model is
20 designed to -- to be a secondary data source.

21 Q. To fill that gap?

22 A. Yes. Because the Leapfrog hand hygiene

1 standard was developed by Leapfrog and is -- and
2 the respective expert panel, and it's deemed
3 extremely important. And there's really no one
4 out there doing -- measuring this.

5 Q. So if the imputation model did not exist,
6 those four measures would not have any result in
7 the scoring methodology, correct?

8 MS. BLAIR: Objection to form.

9 THE WITNESS: I mean, I think that they
10 would have to come -- the expert panel would have
11 to come up with another way of scoring if they --
12 if this was just null.

13 BY MR. CRAIN:

14 Q. Could they have excluded those measures?

15 A. No. I think that it would -- it would
16 not -- the safety grade would not really exist
17 without it. That's not how the safety grade
18 works. The safety grade is designed to grade all
19 hospitals across the country.

20 Q. Why?

21 A. Because that's important. If you look at
22 the scoring methodology, the mean and standard

1 deviation is based on all hospitals. And I would
2 like to know -- I wouldn't want, you know, one
3 hospital in my community not getting graded -- or
4 not being compared to this overall group. It's
5 like -- it's part of the mathematical model of
6 the safety grade, that all hospitals be included
7 and there be a national mean.

8 Q. Is that because it creates an even
9 playing field, for all hospitals to be included?

10 MS. BLAIR: Objection to form.

11 THE WITNESS: I don't understand what
12 that...

13 BY MR. CRAIN:

14 Q. Is grading all hospitals important to
15 make sure hospitals are being compared to every
16 other hospital?

17 MS. BLAIR: Objection to form.

18 THE WITNESS: Yes. I think that it's
19 important to grade all hospitals.

20 BY MR. CRAIN:

21 Q. Is it important to grade all hospitals to
22 the -- sort of the market impact of the safety

1 grade?

2 MS. BLAIR: Objection to form.

3 THE WITNESS: No, not to the market
4 impact --

5 BY MR. CRAIN:

6 Q. Why not?

7 A. -- of the safety grade? I think that
8 it's important -- that the safety grades are
9 valid and I think that it increases their
10 validity by grading all hospitals in the country,
11 not just a select group of hospitals.

12 Q. So if Leapfrog only graded 80 percent of
13 eligible hospitals, the safety grades would be
14 less valid?

15 MS. BLAIR: Objection to form.

16 THE WITNESS: They would be something
17 different.

18 BY MR. CRAIN:

19 Q. Would they be less valid?

20 A. They would be something different.

21 Q. How different?

22 A. They would be -- it would be a subset of

1 hospitals that have shown that they're interested
2 in transparency and patient safety.

3 Q. You said a moment ago that grading all
4 hospitals make the safety grades more valid; is
5 that right?

6 A. For our goals.

7 Q. What are your goals?

8 A. Well, the creators of the safety grade,
9 that group that wrote that original paper of its
10 inception, has written extensively about it and
11 what the goal of the safety grades were.

12 Q. What is your understanding when you said
13 for your goals?

14 A. To create an easy-to-use method for
15 consumers, to see -- to compare hospitals in
16 their area and find one that's the safest.

17 Q. And going back to what you said before
18 when you said the grades are more valid if they
19 grade all hospitals, does that mean if Leapfrog
20 only graded 80 percent of hospitals, the grades
21 would be less valid?

22 MS. BLAIR: Objection to form.

1 THE WITNESS: I think "valid" should only
2 be used, like, in a mathematical context, and I
3 think it's kind of being misused here.

4 BY MR. CRAIN:

5 Q. How?

6 A. I think that it just means something
7 different.

8 Q. Well, 80 percent is a number.

9 A. Do you want to repeat your question?

10 Q. Yeah. You said grading 100 percent of
11 hospitals makes them more valid.

12 If you're only grading 80 percent of
13 hospitals, does that mean they are less valid?

14 MS. BLAIR: Objection to form.

15 THE WITNESS: I think that it would mean
16 something different to consumers.

17 BY MR. CRAIN:

18 Q. What would it mean different to
19 consumers?

20 A. I think it would mean that 20 percent of
21 all hospitals are off the hook. And -- yeah.

22 Q. What do you mean by off the hook?

1 A. That they can -- that they're not being
2 graded by the safety grade.

3 Q. If Leapfrog was only grading 80 percent
4 of hospitals, would it be more or less valid than
5 grading 100 percent of hospitals?

6 MS. BLAIR: Objection to form. Asked and
7 answered.

8 THE WITNESS: Do I have to answer that,
9 then?

10 MS. BLAIR: Yes, you have to answer.

11 THE WITNESS: No.

12 BY MR. CRAIN:

13 Q. It wasn't a yes or no question.

14 MS. BLAIR: I think it was.

15 THE WITNESS: I mean, I just don't think
16 the word "valid" should be used in this
17 situation.

18 BY MR. CRAIN:

19 Q. Then why did you use it with
20 100 percent?

21 A. Because, from a mathematical standpoint,
22 you can use the word "valid."

1 But does something have face validity to
2 a patient? I think that's a different question.

3 Q. Okay. Let's see.

4 THE WITNESS: Oh. Can I --

5 MR. CRAIN: Do you need a break?

6 THE WITNESS: Yes.

7 MR. CRAIN: Okay. We're about an hour.

8 VIDEO TECHNICIAN: The time is 11:28 a.m.

9 This ends unit 2. We're off the record.

10 (A recess was taken.)

11 VIDEO TECHNICIAN: The time is 11:39 a.m.

12 This begins unit number 3. We're on the record.

13 MR. CRAIN: Thank you.

14 BY MR. CRAIN:

15 Q. Ms. Campione, before we go to a new
16 topic, I want to come back and just make sure --
17 we talked a little bit about hand hygiene
18 vis-à-vis the imputation model.

19 If Leapfrog did not have an imputation
20 model, could Leapfrog assign a score for BCMA?

21 MS. BLAIR: Objection to form.

22 THE WITNESS: Are you asking about hand

1 hygiene or BCMA?

2 BY MR. CRAIN:

3 Q. I'm asking now about the other imputed
4 measures.

5 A. Okay.

6 Q. So I'll say it again just to make sure.

7 If Leapfrog did not have an imputation
8 model, could Leapfrog assign a score for BCMA for
9 hospitals that do not participate in the survey?

10 A. Yes, if the expert panel wanted that or
11 decided that.

12 Q. Well, you said before that Leapfrog could
13 not assign a score for hand hygiene in that
14 context.

15 Why could they assign for one for BCMA?

16 A. I -- thinking about this a little bit
17 more, I -- it's the same answer for all four,
18 that, yes, I guess they could do anything, but
19 ultimately, the expert panel would have to sign
20 off on it and whether think it's valid and fair.

21 Q. So I want to make sure I understand your
22 testimony.

1 My question is: If Leapfrog did not have
2 an imputation model, could it assign any of the
3 four imputed metrics a score for
4 non-participating hospitals? And your testimony
5 is Leapfrog could do anything?

6 MS. BLAIR: Objection to form.

7 THE WITNESS: That's -- no.

8 BY MR. CRAIN:

9 Q. I just want to understand. That's what
10 you said.

11 A. No. That's not including everything I
12 just said.

13 Q. True. I focused on the "anything."

14 So tell me, if Leapfrog did not have an
15 imputation model, how could it assign a score for
16 the four imputed measures for non-participating
17 hospitals?

18 A. There's many things that they -- how they
19 could impute. But ultimately, the expert panel
20 chose the way that -- the current imputation
21 model.

22 Q. You just said impute again, though.

1 If Leapfrog was not imputing, how could
2 they assign a score?

3 A. I mean, I guess they could look for
4 another secondary source. So...

5 Q. Are you aware of another secondary
6 source?

7 A. I'm not aware.

8 Q. Okay. Are you aware of another way to
9 assign a score beyond imputation model or other
10 secondary datas?

11 A. No.

12 Q. Okay. And if Leapfrog could not assign a
13 score for those four imputed metrics, isn't it
14 correct that Leapfrog would be missing scores for
15 seven process measures?

16 MS. BLAIR: Objection to form.

17 THE WITNESS: For seven -- yes.

18 BY MR. CRAIN:

19 Q. Okay. And Leapfrog's own expert panel
20 says you can't grade a hospital if you're missing
21 six process measures, correct?

22 A. Yes.

1 Q. So the imputation model allows Leapfrog
2 to score for non-participating hospitals,
3 correct?

4 A. Yes. That's the purpose of an
5 imputation --

6 Q. Because --

7 A. -- methodology.

8 Q. Sorry.

9 Because without the model, your own
10 expert panel would tell you you cannot score
11 these hospitals, correct?

12 MS. BLAIR: Objection to form.

13 THE WITNESS: I mean, I think it depends
14 on a lot of factors. I think that the expert
15 panel is -- would revisit what the purpose of the
16 safety grade is and how, holistically, the
17 methodology fits together, if that -- if somehow
18 it was decided not to go about this imputation
19 method. But they decided the imputation method
20 was fair and accurate.

21 BY MR. CRAIN:

22 Q. Did they decide the imputation method was

1 fair and accurate when they decided that
2 hospitals shouldn't be graded if they're missing
3 more than six process measures?

4 MS. BLAIR: Objection to form.

5 THE WITNESS: Can you repeat that?

6 BY MR. CRAIN:

7 Q. Sure.

8 There was one decision that you're saying
9 the expert panel made to use an imputation method
10 for the four measures, right?

11 A. Yes.

12 Q. And there was another decision you're
13 saying that the expert panel made to say, if you
14 don't have six process measures or more, you
15 shouldn't or can't grade a hospital, correct?

16 A. Yes.

17 Q. And is it shouldn't or can't? We can
18 look at the language, too. Yes, I'm just going
19 to find the language and we'll look at it.

20 A. That I said previously or --

21 Q. It's on the website.

22 A. Oh, okay.

1 Q. We'll find the website language.

2 MS. BLAIR: I think it's in the scoring
3 methodology.

4 THE WITNESS: Yeah.

5 BY MR. CRAIN:

6 Q. Yeah. It's the first exhibit, page 4.

7 Is this it? No, this isn't it.

8 A. Oh, no, it would be the eligibility page.

9 Q. Yeah.

10 A. Page 3.

11 Q. Page 3. See, you do know these documents
12 better than I do.

13 Which document are you on? Oh, you're
14 looking at the methodology.

15 A. Scoring methodology.

16 Q. Got it. Okay.

17 A. Or the hospital safety grade.

18 Q. Page 3. And what's the language?

19 A. Hospitals that are missing scores for
20 more than six process structural measures or more
21 than five outcome measures or missing PSI 90.

22 Q. Let's see. And it says Leapfrog is not

1 able to calculate a safety grade, correct?

2 A. Yes.

3 Q. Okay. So it can't calculate a safety
4 grade if you're missing six process measures,
5 right?

6 A. Correct. But you have to keep in mind
7 that when they created these cutoffs for the
8 amount of measures, they were looking at what
9 measures were available at the time and their
10 sources.

11 So that's what I mean when I say that the
12 expert panel -- you have to look at it
13 holistically. I don't think that these are
14 cutoffs that are live and die for. They're
15 looking at the methodology holistically.

16 Q. So you're saying the question of what the
17 cutoff is is decided in the context of what is
18 available?

19 A. Yes. Of what measures.

20 Q. Okay. So if other measures were not
21 available, they could lower those cutoffs?

22 A. I -- you would have to ask them.

1 Q. Okay. Okay.

2 Just one question before we move on on
3 the imputation model. Are you aware of any plans
4 that Leapfrog has to change the imputation model
5 in the future?

6 A. Right now we're meeting with a
7 subcommittee of the expert panel to look at the
8 weighting scheme. But no, there are no planned
9 changes related to the imputation.

10 Q. Who's on the subcommittee?

11 A. Dr. Romano. And I forget the name of the
12 other woman.

13 Q. Okay. Are they members of the same
14 committee that worked on the imputation model in
15 2024?

16 A. They are members of the safety grade
17 expert panel.

18 Q. And that's the panel that met in April of
19 2024 about the imputation model --

20 A. Yes.

21 Q. -- correct? Okay.

22 So I want to shift gears to that

1 imputation model change.

2 Do you know what I'm talking about when I
3 refer to the 2024 change in methodology?

4 A. Yes.

5 Q. And can you -- just so we're on the same
6 page, in 2024, how did Leapfrog change the
7 imputation methodology?

8 A. So in -- was it fall 2024? -- Leapfrog
9 moved to no longer use the old step 2 methodology
10 where hospitals were assigned to cohorts and
11 means were calculated for each of the measures.

12 They also changed step 1 methodology to
13 impute only two past scores instead of the four
14 past scores.

15 Q. So the prior methodology imputed four
16 rounds of scores back -- strike that. Sorry.

17 In the prior methodology, the hospital
18 would receive whatever its score was on those
19 measures for any of the four past measures?

20 A. Yes.

21 Q. Okay.

22 A. Four -- yeah.

1 Q. The --

2 A. Four past rounds.

3 Q. And in the new methodology, that would
4 only go to two past rounds?

5 A. Yes.

6 Q. In the step 2, the prior methodology
7 assigned them the mean of their cohort, right?

8 A. Yes.

9 Q. Okay. And the new methodology
10 automatically assigns them limited achievement?

11 A. Yes. And I will clarify that the mean of
12 their cohort -- there were two separate means
13 calculated. One was the first score that the
14 hospitals received after, like, 2018, for the
15 measure, and the other was just the current mean.

16 Q. Okay. And do you know -- it was the
17 lower of the two scores?

18 A. The lower of the two scores. Yes.

19 Q. And do you know why it was constructed
20 that way?

21 A. Well, it was realized that hospitals,
22 when they were completing the survey for the

1 first time, hadn't done it previously. Their
2 performance is not the same as a hospital that
3 has continually been benchmarking themselves and
4 completing our survey.

5 Q. And why does that result in the
6 imputation model that was -- the old imputation
7 model? How does that connect?

8 A. So essentially, if a hospital is not
9 completing our survey, it's presumed that they
10 would perform similarly to those hospitals the
11 first time they went to take the survey.

12 Q. Even if the hospital had performed it in
13 the past?

14 A. I would say, on average, yeah. They did
15 some sort of analysis at that time -- it was
16 before my time there -- that looked at that
17 performance, and it was very clear.

18 And I do see it in our data now.
19 Hospitals completing it for the first time,
20 they -- it takes them time to get to the
21 standards that we set.

22 Q. And when you say they completed an

1 analysis, who is that?

2 A. It would have been Matt Austin.

3 Q. And Ms. Danforth?

4 A. She doesn't actually complete the
5 analysis. She would have been present for
6 receiving the results.

7 Q. Okay. And when you say an analysis, what
8 form does that take?

9 A. Well, an analysis includes looking at the
10 scored file, looking at past scored files from
11 the hospital safety grade, putting the hospitals
12 into categories, creating, you know, percentages
13 and -- of how their performance is.

14 Q. Sorry --

15 A. Yeah.

16 Q. -- it was an unclear question. I just --

17 A. Some graphs.

18 Q. Thinking.

19 My question was: Is that analysis
20 written down somewhere?

21 A. I would assume that it's somewhere.

22 Q. Like a white paper? An e-mail? Like

1 what form?

2 A. Not a white paper. It was just an
3 internal analysis.

4 Q. Okay.

5 A. We do those a lot to make sure that --
6 you know, to understand trends in the data.

7 Q. Is that, like, a memorandum or an e-mail?

8 A. It might be in the form of an e-mail. It
9 might be in the form of an attachment on an
10 e-mail.

11 Q. Okay. Like an Excel spreadsheet?

12 A. Sure, it could be an Excel spreadsheet.
13 It could be a paper drawing. I don't know.

14 Q. Okay. No one size fits all.

15 A. Yeah.

16 Q. Okay. And there's no custom or practice
17 within Leapfrog as to what this looks like?

18 A. No.

19 Q. So going back to the change to the
20 imputation methodology, what was your role in the
21 process through which the methodology was
22 changed?

1 A. Okay. So -- let me think back. So since
2 I joined, I was producing a stats document every
3 time I scored that keeps track of those cohort
4 means. It was also in the scoring methodology,
5 so it was publicly available what those final
6 means were for each cohort.

7 And what I noticed was that the mean was
8 consistently going up over time, and that just
9 didn't seem right. It just -- it didn't really
10 make sense.

11 So I brought this concern up to Missy,
12 and Missy was aware that this was happening. She
13 had been monitoring it as well and noticed that.

14 We brought up this concern to Matt
15 Austin, and he slated it to be on the agenda in
16 the expert panel meeting.

17 At that time, we presented to them the
18 current methodology for scoring, and we also
19 presented -- part of being an analyst like I am
20 is just analyzing options with our data, what to
21 do. And we presented some options that we could
22 take.

1 We presented to the expert panel a lot of
2 the -- a lot of them actually thought that we
3 should be giving zero points to hospitals at this
4 point. They decided that the best course was the
5 one that we ended up going with, which is
6 reducing the number of past scores that are
7 imputed through step 1, and with step 2 assigning
8 hospitals to the lowest scoring category of
9 limited achievement.

10 Q. So you said -- you were talking about
11 conversations with the expert panel about this
12 topic, right?

13 A. Yes.

14 Q. Was -- were those happening only in the
15 meeting that happened?

16 A. Yes.

17 Q. Were there any other discussions?

18 A. We -- so I believe that Dr. Romano
19 couldn't be there for the actual expert panel
20 meeting, so we met with him beforehand because it
21 was important that we include everyone from the
22 expert panel in this decision.

1 And it was -- there was a consensus, as I
2 recall, by the end of that expert panel meeting.

3 Q. Okay. And your testimony was a lot of
4 them -- meaning the expert panel -- actually
5 thought that we should be giving zero points to
6 hospitals at this point.

7 Do you recall that testimony a minute
8 ago?

9 A. Yes.

10 Q. Several minutes ago.

11 Who is "them"?

12 A. The expert panelists.

13 Q. Can you name any names?

14 A. No. I can't remember exactly the names.

15 Q. Peter Pronovost?

16 A. That sounds right.

17 Q. Arjun Srinivasan?

18 A. That sounds right, too.

19 Q. Let's see. I think -- there are a few
20 others, but we'll come to them later.

21 Your testimony is that, on that call,
22 those folks expressed that Leapfrog should be

1 giving zero points to hospitals at this point?

2 A. I think -- I mean, they're all recorded.
3 You can watch the meetings.

4 My takeaway -- and it's not my job to
5 summarize what they thought or they felt. That
6 would be more Matt Austin is facilitating this
7 along.

8 They -- their reception was positive.
9 They felt that they -- at this point, our
10 Leapfrog hospital survey has existed since 2002.
11 80 percent of hospitals are completing our survey
12 that are -- go on to be graded.

13 They thought that hospitals that were
14 committed to being transparent with the public
15 and completing our survey and benchmarking
16 themselves, that that was worth something.

17 And I think that was expressed in the
18 meeting.

19 Q. And you said the meeting was recorded?

20 A. Yes.

21 Q. Have you watched that recording since the
22 meeting?

1 A. No, I haven't.

2 Q. Are you aware of whether that recording
3 has been produced in this case?

4 A. No, I don't know.

5 Q. Okay. You said that their reception was
6 positive at the meeting.

7 Can you tell me, what was their reception
8 positive to?

9 A. Doing away with a calculation of a mean
10 for the cohorts. The means were very high.
11 They -- in many cases, hospitals that didn't do
12 the survey at all could receive more points than
13 hospitals that had done the survey and were
14 trying to score better.

15 Q. At the meeting, did you or anyone else
16 present the option of automatically assigning,
17 for non-participating hospitals, the limited
18 achievement metric?

19 A. Yes. That was one of the options we put
20 forward.

21 Q. During the meeting?

22 A. During the meeting, yes, I believe.

1 Q. Who presented that option?

2 A. I think -- I mean, I would have presented
3 the analysis. It was either Matt Austin or me.

4 Q. Okay.

5 A. Or Missy. I mean, it's a collaborative
6 setting.

7 Q. All three of you were on the call?

8 A. Yes.

9 Q. I want to just talk about that meeting a
10 little bit, and then we'll come back in time.

11 Was the meeting in person or virtual?

12 A. Virtual.

13 Q. On Zoom or Teams?

14 A. Zoom.

15 Q. Okay. Can you tell me everyone you
16 remember who attended?

17 A. No, I can't.

18 Q. Can --

19 A. I mean, like, I don't remember.

20 Q. Who do you remember attending?

21 A. The names you said earlier: Arjun,
22 Peter, Matt, Missy, me. Of course I said

1 Dr. Romano was in there.

2 I believe her name is Sara.

3 I would have thought at least the
4 majority were there of the expert panelists.

5 Q. And you recall that Dr. Romano did not
6 attend?

7 A. No. I think that he couldn't meet at
8 that time.

9 Q. Okay. How long was the meeting?

10 A. They're typically an hour, maybe more.

11 Q. Are they always on Zoom?

12 A. I -- since I've been here, yes.

13 Q. Does Leapfrog generally meet virtually?

14 A. Yes --

15 Q. That --

16 A. I was in Boston, and --

17 Q. That was a bad question. Strike that.

18 When Leapfrog has an internal meeting,
19 are they typically virtual?

20 A. Has -- sorry. Has, like, an expert panel
21 meeting?

22 Q. No, no, internal to --

1 A. Internal. Oh. Zoom.

2 Q. It's over Zoom?

3 A. Yes.

4 Q. Are those recorded?

5 A. No.

6 Q. Okay. So the only meetings -- what
7 meetings are recorded?

8 A. Expert panelist meetings.

9 Q. Are expert panels or just the safety
10 grade panels?

11 A. I think all expert panels.

12 Q. And are the recordings available to the
13 public?

14 A. We've never been -- request that.

15 Q. Okay.

16 A. Or had that requested of us.

17 Q. And to your knowledge, they're not
18 publicly available?

19 A. I wouldn't say that's because we're
20 trying to hide anything. They just aren't.

21 Q. I'm just trying to get at whether they
22 are.

1 A. No.

2 Q. Whether you're trying to hide something
3 is a different question. We can come back to
4 that later.

5 Do you remember who was on camera on the
6 Zoom?

7 A. No.

8 Q. Okay. How did the meeting -- so can you
9 tell me everything you remember about the
10 meeting? Just walk me through soup to nuts. If
11 you remember nothing, that's fine. But I want
12 every memory you have about it.

13 A. We presented the PowerPoint. And I
14 just -- I remember Peter perhaps saying something
15 about how he has knowledge of specific hospitals
16 that have decided not to complete the survey
17 because they actually -- they realize, oh, we can
18 get a higher grade -- or, sorry, a higher score
19 for these imputed measures if we just don't do
20 the survey rather than try.

21 And they decided that transparency is key
22 and that those hospitals that do complete the

1 survey and are committed to transparency should
2 not be penalized.

3 Q. Did you present the methodology that
4 ultimately took effect at that meeting?

5 A. I think so. Some form of it perhaps.

6 Q. And the feedback was -- they approved of
7 it?

8 A. Yes. I believe so.

9 Yeah, I don't remember any dissent at the
10 meeting. It was, like I said before, positive.

11 Q. And there were no further meetings?

12 A. I don't think so.

13 Q. Okay. Do you remember anything that
14 Arjun Srinivasan said?

15 A. No.

16 Q. Anything that Sara Singer said?

17 A. No. But I believe that she was -- I
18 remember, overall, she was positive about it.

19 Q. Anything that Kathy McDonald said?

20 A. No.

21 Q. Anything that Peter Pronovost said
22 besides what you've testified to?

1 A. No.

2 Q. Doris Peter?

3 A. No.

4 Q. Arnold Milstein?

5 A. No.

6 Q. And the last one I have is Tim Vogus.

7 A. I remember Tim was wearing a T-shirt.

8 Q. Fair enough. Visual memory.

9 Did Ms. Binder attend?

10 A. No.

11 Q. Does she typically attend the expert
12 panel --

13 A. No, she has no involvement.

14 Q. Okay. Had no involvement?

15 A. With expert panels, no.

16 Q. Okay. And then who attended for
17 Leapfrog?

18 A. Missy and I attended.

19 Q. And then Dr. Austin's role, is he on the
20 panel or is he at Leapfrog?

21 What is his position?

22 A. He's not on the panel. He's kind of

1 responsible for organizing the meetings,
2 facilitating them, ensuring that a consensus is
3 reached, then summarizing afterwards what was
4 said at the meeting.

5 Q. Does he, like, work for Leapfrog?

6 A. You know, like, I -- no, he's not an
7 employee.

8 Q. Yeah. Okay. But he -- what role does he
9 serve then?

10 A. I mean, I see him more as, like, an
11 advisor, like, an academic-type advisor. He's
12 kind of like a consultant.

13 Q. Got it. So he is not on the expert
14 panel?

15 A. No.

16 Q. And he's a little bit more, like you
17 said, a facilitator?

18 A. Uh-huh.

19 Q. Okay. I want to just go back in time --
20 sorry. Before we leave this meeting -- and this
21 is the April 12, 2024, meeting, correct?

22 A. Yes, that sounds right.

1 Q. And we can show you some documents to
2 refresh you if you need it.

3 But do you have any recollection about
4 whether someone -- whether anyone talked about
5 hospitals being disincentivized to participate in
6 the survey?

7 A. Yes. I mean, I kind of -- I think that
8 goes hand in hand with everything else that was
9 said.

10 Q. And what was the disincentive being
11 discussed?

12 A. I think that's kind of what I was
13 referring to earlier with Peter saying that if a
14 hospital realizes that they could just not do the
15 survey and get a score that's higher than they
16 would have otherwise, why wouldn't they take that
17 opportunity?

18 Q. Was the root of that problem step 1 or
19 step 2?

20 A. Step 2. Step 1 -- so basically -- well,
21 the issue with step 1 is, if we're going back
22 four rounds, that would include two past surveys.

1 And the concern was if you're going back two
2 surveys, that data might not be accurate anymore.
3 Every year a hospital can change how they operate
4 and the processes they have in place. So it's
5 not -- it could possibly not be accurate to
6 impute data that far back.

7 So that was the concern with step 1.

8 And the concern with step 2 was that the
9 mean was too high and not an accurate portrayal
10 of how hospitals are actually performing.

11 Q. Okay. Did anyone on the expert panel
12 address any concerns in adopting the approach
13 that you or Dr. Austin or Ms. Danforth were
14 presenting?

15 A. Yes. I think, like, Dr. Romano had some
16 concerns with it --

17 Q. Sorry. Just -- I don't want to
18 interrupt, but I'm going to do it anyway.

19 Dr. Romano was not at the meeting, so I'm
20 talking about --

21 A. No --

22 Q. -- what happened --

1 A. Oh, okay. But we did meet with him the
2 same day --

3 Q. Oh, you met with him the same --

4 A. -- if I remember correctly.

5 THE REPORTER: Can I just ask you to --

6 MR. CRAIN: Sorry, my fault. I'm getting
7 excited.

8 BY MR. CRAIN:

9 Q. You met with him the same day, you said?

10 A. Yes.

11 Q. Okay.

12 A. I think so.

13 Q. Got it.

14 So maybe step back. Tell me about that
15 meeting.

16 A. I think his concern was with a particular
17 hospital that he works with -- I think it's,
18 like, UC Davis -- where they were coming to him
19 and saying, oh, this survey is a lot of work; we
20 don't want to do it every year.

21 And so he was just worried about the
22 burden of the survey every year. And that's, you

1 know, anecdotal information that he had.

2 And so he was expressing those concerns
3 to us. And that really had to do with doing -- I
4 believe we originally proposed -- we were just
5 putting everything on the table -- phasing out
6 step 1 imputation altogether. And his -- I think
7 he just had reservations about that.

8 Q. Who attended the meeting with Dr. Romano?

9 A. Missy Danforth and Matt Austin.

10 Q. Were you there as well?

11 A. Yes.

12 Q. Was that over Zoom?

13 A. Yes.

14 Q. Was that recorded?

15 A. No.

16 Q. How long was that meeting?

17 A. 30 minutes to an hour.

18 Q. Was the only subject discussed the
19 imputation model?

20 A. We would have shown him the PowerPoint
21 that we showed all expert panelists. And I think
22 we had, like, one other -- we showed -- we

1 started grading MTF hospitals that year -- that's
2 military treatment facilities. We shared that
3 with him.

4 But the primary topic was the imputation
5 model.

6 Q. And there was another topic about
7 hypoglycemia?

8 A. Yes.

9 Q. Did you share that with him, too?

10 A. Yes, we did.

11 Q. Okay. So in that 30 minutes, you covered
12 the military treatment hospitals, the imputation
13 method, and the hypoglycemia?

14 A. Yes.

15 Q. Okay. What was the conclusion of that
16 meeting, if any?

17 A. He wanted to see how the other expert
18 panelists felt.

19 Q. And after the other expert panel --
20 panel -- after -- strike that, sorry. A little
21 tongue tied today.

22 After the end of the April 12th meeting,

1 did you tell him that the other expert
2 panels [sic] had voted in favor of the new
3 change?

4 A. I don't know what happened after that. I
5 mean, that's really Matt Austin's job.

6 Q. Got it. Okay.

7 Do you communicate with Dr. Romano
8 separately from Dr. Austin?

9 A. Sometimes, like, we'll -- it's a very
10 collaborative environment where -- like
11 especially on these expert panels -- where people
12 will just -- I mean, it's good to express
13 concerns, and I think that we all do that, just
14 to make sure that we're getting to something that
15 is fair. And, I mean, that's just kind of how
16 science works.

17 Q. How science works. That's the mantra.
18 That's the slide on the case.

19 Okay. And was -- at any time was there
20 any vote taken with or without Dr. Romano?

21 A. We don't really do votes. If someone
22 felt strongly that they disagreed, they -- I

1 would assume it would be their responsibility to
2 bring that up, put it in writing if they really
3 felt -- if they felt strongly against something.

4 That definitely didn't happen on the
5 meeting, and I think Matt summed it nicely in his
6 takeaways, and I assume that he communicated that
7 to Patrick Romano.

8 Q. Let me ask this question: Kathy McDonald
9 was at the meeting, right?

10 A. Probably.

11 Q. Okay. If you don't remember, I'll try
12 someone else.

13 Sara Singer was at the meeting?

14 A. Probably.

15 Q. Okay. How did you know that Sara Singer
16 was -- had approved the methodology that Leapfrog
17 instituted?

18 A. It's not my job to see if they approve or
19 not.

20 Q. Whose job is it?

21 A. Matt Austin's.

22 Q. Who is not a Leapfrog employee?

1 A. No. But he -- I would say it's his job
2 to just make sure that everyone is comfortable
3 with it, hear everyone's opinions, and ensure
4 that they're expressed fairly and, like, the
5 takeaways.

6 Q. So --

7 A. Recommendation, I should say.

8 Q. Recommendation. What do you mean
9 recommendation?

10 A. From the expert panel.

11 Q. Is it a recommendation or a decision?

12 A. I mean, it's a decision and, you know,
13 ultimately, I guess, Leapfrog could do whatever
14 they want, but they don't. They always listen to
15 what the expert panel decides.

16 Q. So you have no understanding of how
17 Dr. Austin confirms that Sara Singer approves?

18 A. No, I'm not involved in that.

19 Q. Would Ms. Danforth know?

20 A. She might. Her and Matt probably
21 communicate more than I do with Matt [sic].

22 Q. I want to go back a little bit in time.

1 So we were talking about the April 12th meeting,
2 2024. I want to start a little bit earlier.

3 So you said maybe 20 minutes ago that you
4 raised a concern in the data.

5 Do you recall that testimony?

6 A. Yes.

7 Q. Approximately when do you recall raising
8 that?

9 A. I don't know. Maybe -- definitely -- it
10 was a growing concern, so maybe in the spring of
11 the -- so if we were doing this in spring 2024,
12 so maybe spring 2023 into fall 2023. And this
13 would have been just verbal in my meetings with
14 Missy and Matt.

15 Q. So sometime spring or fall 2023 was the
16 first time --

17 A. Yes.

18 Q. -- you --

19 A. I mean, it's something that --

20 THE REPORTER: Sorry. I just -- I
21 can't --

22 MR. CRAIN: No worries. No worries.

1 THE WITNESS: It's something that was
2 ongoing. It was in the back of our minds.

3 BY MR. CRAIN:

4 Q. And just to help you triangulate, do you
5 remember if it was hot or cold outside?

6 A. No.

7 Q. Had the leaves turned?

8 A. No, I don't recall.

9 Q. Worth a try.

10 What is HCA?

11 A. It's a hospital system.

12 Q. And did there come a time that -- did HCA
13 participate in Leapfrog's survey?

14 A. I believe so.

15 Q. And did there come a time where HCA
16 decided not to participate?

17 A. There was a time when they were, at the
18 initial submission of, like, June 30th -- after
19 that, I believe it came to -- came up in a
20 meeting that they hadn't submitted yet. Like,
21 all of their hospitals.

22 Q. And how many hospitals was that,

1 approximately?

2 A. I don't know how many HCA hospitals there
3 are. I don't grade the survey.

4 Q. Do you think -- was it a meaningful
5 number?

6 A. Define "meaningful."

7 Q. Was it more than a dozen?

8 A. Yes.

9 Q. More than 50?

10 A. Yes.

11 Q. Okay. More than 100?

12 A. I don't know.

13 Q. Okay. So somewhere between maybe 50 and
14 100?

15 A. Sure.

16 Q. Okay. How did Leapfrog react to HCA's
17 decision to not participate?

18 A. I don't know.

19 Q. You had no involvement in that?

20 A. No.

21 Q. Did HCA ultimately end up coming back to
22 participate?

1 A. I believe that they do.

2 Q. Do you know why they --

3 A. The survey.

4 Q. -- came back?

5 A. No.

6 Q. Okay.

7 A. I don't.

8 Q. Would Ms. Danforth know?

9 A. Yes.

10 Q. Would Ms. Binder know?

11 A. Yes.

12 Q. Around that time period -- do you --
13 sorry, strike that.

14 Do you remember approximately when HCA
15 stopped participating?

16 A. If that's -- it was either last year or
17 the year before, around August or September --
18 or -- sorry, hold on.

19 Around -- I'm thinking of when we first
20 score -- is in July. So it would have been,
21 like, late July, early August.

22 Q. 2023?

1 A. Yes. Wait -- yes.

2 Q. Okay. Final answer?

3 A. I'm not good with dates.

4 Q. That's okay.

5 Last year was the imputation methodology
6 change. The year before was HCA.

7 Does that sound right?

8 A. Yes. Yes.

9 Q. Just to triangulate us all.

10 Now, around that same time, do you recall
11 whether Leapfrog was seeing a decline in the
12 number of hospitals that were participating in
13 the survey?

14 A. Well, I mean, if 100 aren't doing it,
15 then that would be a decline.

16 Q. Fair enough.

17 What about a decline beyond HCA?

18 A. No. I have looked at survey
19 participation since 2002, and it's always been an
20 upward trajectory.

21 Q. Okay.

22 A. Except for COVID, I will say.

1 Q. Okay. And participation is some -- is
2 participation something that Leapfrog wants?

3 A. Yes. We want hospitals to be
4 transparent.

5 Q. And you sort of answered it, but just to
6 be clear, why does Leapfrog want hospitals to
7 participate?

8 A. Because ultimately it benefits the public
9 to have this information.

10 Q. And does it benefit Leapfrog?

11 A. I mean --

12 MS. BLAIR: Objection to form. Sorry --

13 THE WITNESS: Yeah.

14 MS. BLAIR: -- I'm just --

15 THE WITNESS: If our mission is for the
16 public to have more transparent information, then
17 yes.

18 BY MR. CRAIN:

19 Q. Does it benefit Leapfrog economically?

20 A. No.

21 Q. Not at all?

22 A. No.

1 Q. Increased participation does not yield
2 any additional revenue?

3 A. It's a free survey.

4 Q. Okay. Let's take a look at a document.

5 MR. CRAIN: I'm going to go to tab 11.

6 (Campione Deposition Exhibit 4 marked for
7 identification and attached to the
8 transcript.)

9 BY MR. CRAIN:

10 Q. Okay. So Ms. Campione, do you recognize
11 this document?

12 A. No. I can see that I sent it.

13 Q. You sent, I think, the second e-mail on
14 the first page ending in Bates number 2604.

15 Do you see that?

16 A. Yes.

17 Q. And it's dated November 2023?

18 A. Uh-huh.

19 Q. Okay. I want to --

20 A. I'm sorry, yes.

21 Q. I'm sorry. Go ahead.

22 A. Yes.

1 Q. I want to go to the second page that's
2 Bates number 2605.

3 And do you see this is an e-mail from
4 Ms. Danforth to Mr. Banerjee and you?

5 A. Uh-huh.

6 VIDEO TECHNICIAN: Counsel.

7 MR. CRAIN: Oh, I'm sorry. Am I
8 blocking? I'm sorry.

9 BY MR. CRAIN:

10 Q. And she says, Hi Kush and Alex, I'd like
11 to get a sense of the number of licenses that
12 don't submit a survey and the percentage of
13 accolades/revenue those facilities represent for,
14 say, the past two years, last four rounds. Can
15 the two of you work together on this?

16 Can you tell me what your understanding
17 of that request is?

18 A. I'm going to need some more time to read
19 through this.

20 Q. Take your time.

21 A. Okay. Thank you.

22 Okay. What's the question related to

1 this?

2 Q. So the first e-mail -- it goes from
3 bottom to top the way this was produced: I'd
4 like to get a sense of the number of licensees
5 that don't submit a survey and the percent of
6 accolades/revenue those facilities represent for,
7 say, the last two years.

8 What is she referring to, in your
9 understanding, when she says the number of
10 licensees that don't submit a survey?

11 A. I'm not really sure. I know how to get
12 her the data and -- to which I see I reply in
13 that regard.

14 I'm not totally certain what -- why she
15 needs this.

16 Q. I'm asking a more basic question.

17 A. Uh-huh.

18 Q. What are the licensees that she's talking
19 about?

20 A. So she's -- she would be referring to the
21 accolades program.

22 Q. Okay. Tell me about the accolades

1 program.

2 A. So that is when an A-hospital wants to
3 advertise their A grade. Whether they're trying
4 to share it with the community or celebrate it
5 internally, they have to license it.

6 And that's definitely the licensee she's
7 referring to here. I can tell that.

8 Q. And so she's asking you to find the
9 percentage of accolades/revenue that the number
10 of licensees who don't submit a survey encompass?

11 A. Yes.

12 Q. Okay. And then the second
13 paragraph says, Due to step 1 imputation and as
14 the means for step 2 imputed data increase over
15 time, there's a risk of reducing incentive to
16 submit a survey every year -- all caps -- and I'm
17 starting to see this come through in some of the
18 questions we are getting on the help desk.

19 So a few questions on this one.

20 Do you know what questions she's
21 referring to for the help desk?

22 A. So -- okay. So what she's getting at

1 here is exactly what we talked about earlier.
2 It's what was discussed with Dr. Romano. It's
3 what was discussed by Peter in the expert panel
4 meeting. There's just -- sometimes you can get a
5 sense on the help desk what the hospital is
6 asking. And it's just a sense that hospitals
7 sometimes skip survey years because they know
8 that the data can get imputed through step 1
9 imputation.

10 Q. Okay. So they skip the survey year
11 because they can use a prior score?

12 A. Yes.

13 Q. So it's a little bit of a shortcut for
14 them?

15 A. Yes.

16 Q. Okay. And then she says, I'd like to
17 understand how [sic] financial risk if we make
18 changes to how we display grades for hospitals
19 that don't submit.

20 Do you see that?

21 A. Yes.

22 Q. And you testified a minute ago that

1 participation has no effect on revenue.

2 Is that -- do you want to change that
3 testimony? Is that --

4 A. No, I don't. I stand by that.

5 Q. Okay. How do you make your testimony
6 consistent with her sentence here?

7 A. They're two totally separate programs.

8 Q. Okay. So what is the financial risk that
9 you understand her to be talking about here?

10 A. The -- I honest -- I don't know what she
11 means by the last sentence.

12 Q. You have no understanding of the
13 financial risk?

14 A. I'd like to understand how financial
15 risk -- well, first of all, it's not phrased
16 correctly.

17 Q. I think there's a typo.

18 A. If we make changes to how we display --
19 see, I don't even know what she means by "how we
20 display grades for hospitals that don't submit."

21 Q. Okay. So I just want to be very clear:
22 You are aware of no financial risk that would

1 exist if Leapfrog made changes to how they
2 display grades for hospitals that don't submit
3 surveys?

4 A. I don't understand the connection, to be
5 honest.

6 Q. Are you aware of any financial risk that
7 exists if participation goes down?

8 A. No, I am not.

9 Q. Okay. Just taking a look at this.

10 Now, going up to your e-mail, you said
11 you have the data.

12 Do you recall sending that data over to
13 her subsequently?

14 A. Sure. Yes.

15 Q. Okay. And then Mr. Banerjee responds,
16 Could that be why HCA suddenly stopped
17 submitting?

18 Do you have an understanding of what he
19 meant there?

20 A. Yes. I mean, this would just be putting
21 HCA in that category of hospitals that take a
22 shortcut and complete the survey every other

1 year, for instance.

2 Q. He was surmising that they were not
3 responding because of step 1, right?

4 A. Yes.

5 Q. And he says, I think we looked at this
6 trend many years ago and I believe there was
7 correlation to survey participation and As, as
8 well as participation and licensing.

9 Do you see that?

10 A. Yes.

11 Q. Are you aware of Leapfrog having looked
12 at that trend many years ago?

13 A. Yes.

14 Q. Tell me --

15 A. I've looked at it. Like, you can look at
16 the profile, for instance, of a hospital that
17 licenses.

18 Q. Okay. And licensing is a revenue stream,
19 right?

20 A. Yes.

21 Q. Are hospitals that -- strike that.

22 Do hospitals that participate in the

1 survey -- no, let me strike it again.

2 Are hospitals that participate in the
3 survey more likely to license than hospitals that
4 do not?

5 A. Yes.

6 Q. So again, I want to ask you, are you
7 aware of any financial risk if participation goes
8 down?

9 A. That -- I mean, that's not to say that
10 the hospitals that stop submitting -- say it's
11 10 percent of those hospitals that stop
12 submitting. I don't know that they are hospitals
13 that license.

14 So no, I can't say that there's a direct
15 correlation there.

16 Q. A direct correlation between what?

17 A. I would have to do a separate type of
18 analysis and see, oh, if -- you know, the
19 hospitals that we see not completing it in
20 previous years, were they -- are they the
21 hospitals that license? I don't...

22 But I can say that, yes, the majority of

1 hospitals that license, accolades, are hospitals
2 that participate in Leapfrog. They care about
3 Leapfrog, they have devoted resources to
4 Leapfrog, and they're familiar with Leapfrog.

5 So yes, obviously, they're the hospitals
6 that license as well.

7 Q. Okay. And accolades is a revenue stream,
8 correct?

9 A. Yes.

10 Q. Okay. Do you recall completing an
11 analysis of the correlation between participation
12 and licensing?

13 A. Yes, I do.

14 Q. Okay. Let's look at what I think is that
15 analysis. You'll tell me.

16 MR. CRAIN: This will be Exhibit 5.

17 (Campione Deposition Exhibit 5 marked for
18 identification and attached to the
19 transcript.)

20 (Discussion off the record.)

21 BY MR. CRAIN:

22 Q. Okay. Do you recognize this document?

1 A. Let me get to the attachment --

2 Q. I want to start with the invite first.

3 A. Okay. So this is -- oh, I see. Okay.

4 Q. Yeah, so I'll walk you through it.

5 A. Okay.

6 Q. This is -- tell me if you -- so is this a
7 calendar invite from Kush Banerjee?

8 A. Yes.

9 Q. Do you see on the top left it says,
10 Appointment?

11 A. I see that.

12 Q. And it's sent to you, Ms. Danforth, and a
13 bunch of others.

14 Do you see that?

15 A. Yes.

16 Q. What is LeapfrogLeaders@Teleflex.com? Do
17 you know who that is?

18 A. So I believe Lindsay Belville, who's
19 listed as an attendee, she devotes the majority
20 of her time, or did -- just one person there --
21 to Leapfrog, to Leapfrog activities.

22 Q. And --

1 A. So I think she has an e-mail with
2 Leapfrog.

3 I'm not sure exactly. I know that she
4 accesses that account --

5 Q. And what --

6 A. That e-mail.

7 Q. Oh, I'm sorry.

8 A. Sorry.

9 Q. Yeah, it's hard.

10 What is TelAffects, though?

11 A. I believe they're telemarketers. That's
12 the Tel in TelAffects.

13 Q. Everyone's favorite.

14 And the subject says, TelAffects Leapfrog
15 system communication group.

16 Do you see that?

17 A. Yeah -- the subject? Yes.

18 Q. Yeah, the subject.

19 And what type of telemarketing are the
20 TelAffects folks engaged in?

21 A. So they do -- I don't know if they do the
22 data licensee sales. That might just be Kush.

1 I'm really not familiar with what they do. They
2 sell the accolades programs, definitely. And I
3 see a PowerPoint, like, once -- around -- with
4 what they did --

5 Q. Do they, like, cold call hospitals?

6 A. I think -- yeah, I think they call, they
7 e-mail, they have contacts there. They do their
8 whole thing.

9 Q. Got it. Relationship management type.

10 A. Yes.

11 Q. And then there's an attachment, you see,
12 it says 2023 safety grade media coverage
13 accolades V3.pptx.

14 Do you see that?

15 A. I'm sorry, I don't. Where --

16 Q. Right under subject.

17 A. Oh, okay. Yes.

18 Q. And then the attendees, it's the same
19 group of folks: You, Ms. Danforth, and then the
20 TelAffects folks.

21 Do you see that?

22 A. Yes.

1 Q. Okay. Can you tell me what you remember
2 about this meeting?

3 A. January 2024.

4 Q. And feel free to read their notes in the
5 box.

6 A. Okay. So this is something -- so it was
7 a project that Missy had me do. It was probably,
8 like, the first time that I actually analyzed the
9 accolades data.

10 Previously, I would just send them the
11 data, like, every round. They have to know what
12 hospitals -- or what grades hospitals got. And
13 they have their own records or they load it in.

14 And this was the first time I was doing
15 a -- analyzing the data to help Missy, Kush, and
16 the folks at TelAffects better understand what
17 types of hospitals we're licensing.

18 Q. You said this was the first time you did
19 this.

20 Was this outside of your job duties,
21 technically?

22 A. Well, we've talked about how my job has

1 changed over time. And I have more duties. I
2 don't think it's outside of it. It's just
3 something that was added on later once Missy
4 realized I was good at my job.

5 Q. Fair enough.

6 And when you say added on, what was added
7 on? How would you characterize it?

8 A. This is, like, a one-off analysis.

9 Q. Okay. So you haven't done analyses like
10 these -- this since?

11 A. No.

12 Q. Okay. So let's go to the next page to
13 the deck you were mentioning.

14 A. Uh-huh.

15 Q. And it says -- your name is on the front,
16 Alexandra Campione.

17 Do you see that?

18 A. Yes.

19 Q. And dated January 2024.

20 And then if you go to the Bates ending
21 73570.

22 Do you see that?

1 A. 570?

2 Q. Uh-huh.

3 A. Yes.

4 Q. Now, you authored this deck, right?

5 A. Yes.

6 Q. And you did it at Ms. Danforth's request?

7 A. Yes.

8 Q. Okay. Did you present this deck at the
9 meeting?

10 A. Yes.

11 Q. Tell me what you recall about what you
12 presented. What did you say?

13 A. Sure.

14 Q. If you want to walk me through it, that's
15 fine too.

16 A. Present to you?

17 Q. Yeah.

18 A. So here we have the fall -- the total
19 revenue from hospital safety grade accolades
20 program in fall '17, spring '18, going through to
21 fall 2023 --

22 Q. Sorry, what slide are you on?

1 A. Oh.

2 MS. BLAIR: If you could tell him the
3 Bates number at the bottom.

4 THE WITNESS: Yeah. I thought we were on
5 3570.

6 BY MR. CRAIN:

7 Q. 35 -- oh, 73570?

8 A. 35 -- oh. Yeah, yeah.

9 Q. Oh, Okay. Sorry. So I'm -- I was just a
10 little confused.

11 What does this line depict?

12 A. That would be the total.

13 Q. The total of what?

14 A. Revenue for that fiscal year.

15 Q. Got it. And what do the different bars
16 indicate?

17 A. So each of them represent a round. And
18 if you add those together, then it's the total
19 that's shown in the line.

20 Q. The total -- so just to make sure I
21 understand, the line is the total revenue from
22 accolade sales?

1 A. For that fiscal year.

2 Q. For that fiscal year.

3 A. Uh-huh.

4 Q. And it's just tracked over time?

5 A. Yes, and they're just grouped together by
6 fiscal year.

7 Q. Okay.

8 A. Because sometimes it gets confusing
9 because fiscal year 2018 has fall '17 grades in
10 it.

11 Q. I see. So, like, the bar that says
12 FY 2019 --

13 A. Uh-huh.

14 Q. -- that has data from F -- fall '18 and
15 spring '19?

16 A. Yes.

17 Q. And that gets aggregated into a number
18 that's then populated in the line?

19 A. Yes.

20 Q. Thank you. Okay. I didn't quite
21 understand.

22 Sorry, I didn't mean to interrupt.

1 A. No, I think that there was a table that
2 has the actual numbers.

3 Q. Okay. And then -- unless you have more
4 to say on that --

5 A. No, I remember -- I thought there was a
6 table.

7 Q. Maybe it was behind the scenes.

8 Can we go to 73573?

9 And there's a slide that says, Estimating
10 the likelihood of licensing, modeled using fall
11 2023 licensing data.

12 Do you see that?

13 A. Yes.

14 Q. What was the purpose of this slide?

15 A. To, like I said before, create a profile
16 of those hospitals that do license.

17 Q. And why were you creating a profile of
18 hospitals that license?

19 A. Sure. So that they could target
20 additional hospitals for sales.

21 Q. For --

22 A. And if you know what -- the survey

1 participants are more likely, if you know that --
2 if they're a renewal, they're more likely to
3 renew. That's just common knowledge. If they've
4 done a survey recently so they're engaged. If
5 they're not in the system, they actually more
6 likely to license.

7 I don't know the ins and outs of, like,
8 what you do with the licensing, but I can run the
9 data and see that the majority of licensees
10 follow these characteristics.

11 Q. Okay. So you were creating the deck just
12 to -- I want to just make sure this is clear --
13 so that Leapfrog could target certain hospitals
14 for sales.

15 A. So TelAffects could reach out to those
16 hospitals probably more, like if -- I don't know.
17 I'm just imagining that you could call them a few
18 more times if you know that they're more likely
19 to license.

20 Q. Got it. To optimize the opportunity, so
21 to speak.

22 A. Sure.

1 Q. Okay. And TelAffects, just to make sure,
2 worked for Leapfrog?

3 A. Yes.

4 Q. Not an employee, but a contractor.

5 A. Yes.

6 Q. And here in the slide you say, Survey
7 participants are ten times more likely to
8 license.

9 Do you see that?

10 A. Yes.

11 Q. And renewals are ten times more likely to
12 license?

13 A. Uh-huh.

14 Q. And what does that -- what does that
15 mean?

16 A. So looking at A-hospitals, they're more
17 likely to license if they have done a survey
18 and...

19 Q. How do you get that from renewals?

20 A. Oh, sorry. For renewals --

21 Q. Yeah.

22 A. -- that means that they licensed, like, a

1 years ago.

2 Q. Got it. So if they licensed in the past,
3 they're more likely to license in the future.

4 A. Right.

5 Q. Got it. So if they participate in the
6 survey, they're ten times more likely to license.
7 If they've purchased in the past, more likely to
8 purchase in the future, right?

9 A. Uh-huh.

10 Q. And then hospitals that have licensed in
11 the past two years are five times more likely to
12 license.

13 Do you see that as well?

14 A. Yes.

15 Q. Okay. And -- so going back to
16 participation, if participants are ten times more
17 likely to license, isn't it financially
18 beneficial to increase participation?

19 MS. BLAIR: Objection to form.

20 THE WITNESS: It's not what we do. This
21 is a separate analysis and category, and
22 TelAffects doesn't advise us on our methodology.

1 Our expert panel does.

2 BY MR. CRAIN:

3 Q. Okay. I'm just trying to understand if
4 there's a logical connection here.

5 A. I just don't look at it that way.

6 Q. Okay.

7 A. And no one at Leapfrog does.

8 Q. No one at Leapfrog thinks about
9 participation in economic terms?

10 A. I would say that they don't -- they would
11 look at this analysis with the goal of TelAffects
12 getting more accolades licenses. That was the
13 sole goal of this.

14 Q. Did you --

15 A. This is not to inform methodology
16 changes.

17 Q. Did you create this deck in response to
18 Ms. Danforth's e-mail asking you for the
19 licensing data and accolades that we looked at a
20 few moments ago?

21 A. Yes. Of course.

22 Q. Did you create this deck -- strike that.

1 She said in that e-mail she wanted to
2 understand the financial risks.

3 A. Uh-huh.

4 Q. Is it your testimony that this deck
5 doesn't inform at all on those financial risks?

6 A. I don't know what she meant by that, and
7 I testified to that earlier. So I can't really
8 speak to that.

9 Q. Okay.

10 A. But I know the intent of this deck --

11 Q. And --

12 A. -- and this one -- and actually, if we
13 do -- this was November, and you said this
14 meeting was in January?

15 Q. Uh-huh.

16 A. So I can't even say that this deck was
17 related to that, actually, at all. I know that
18 around that time in November, we were just
19 starting to -- that was actually the first data
20 request, I think, I've ever had from her. And
21 then this is something separate.

22 Q. But I think you told me you had -- this

1 was the first time she had asked you to conduct
2 this type of analysis.

3 A. This -- yes. Definitely this analysis.
4 This is asking for data (indicating).

5 But this is the first time that I ever
6 was even looking at the data.

7 Q. Does that data have anything to do with
8 this deck?

9 A. I don't know. You would have to ask her.
10 I mean, this took place in November, and this
11 took place in January.

12 Q. No, I'm asking you. I want to
13 understand --

14 A. I mean, it's the same data. It's the
15 same underlying data, yeah.

16 Q. So just to make sure, because we're
17 talking over each other, the data that you pulled
18 in response to that e-mail is the same data that
19 informed this deck.

20 A. It's the same data that used -- that was
21 used in this deck.

22 Q. Used and/or to create this deck?

1 A. Yes.

2 Q. Okay. And your testimony is that this
3 deck has nothing to do with the financial
4 opportunity or risk to Leapfrog?

5 A. It has to do with the financial
6 opportunity to sell more accolades.

7 Q. Okay.

8 A. It has nothing to do with the scoring
9 methodology.

10 Q. I'm -- yeah, I'm not asking that
11 question.

12 A. Okay. Sorry.

13 Q. I'm asking the question of whether
14 increasing survey participation adds a financial
15 opportunity to Leapfrog.

16 A. If increasing survey -- can you word
17 that --

18 Q. Sure.

19 A. -- in a different way.

20 Q. Let me try it this way: You say in this
21 deck, Survey participants are ten times more
22 likely to license.

1 Do you see that?

2 A. Yes.

3 Q. If they are ten times more likely to
4 license, doesn't that mean Leapfrog is ten times
5 more likely to get revenue?

6 MS. BLAIR: Objection to form.

7 THE WITNESS: I just -- I don't -- this
8 is looking at the current, like, landscape.
9 Like, this is looking at, okay, we've already
10 given these As; they've already completed the
11 survey. Now, how can we get them to buy the
12 accolades.

13 It's not looking at how should we do
14 survey participation in the future, how should we
15 increase survey participation. That's just a
16 totally separate thing.

17 BY MR. CRAIN:

18 Q. Do you disagree, though, that increased
19 participation is good for accolade sales?

20 A. No, because it doesn't mean that they're
21 automatically going to get an A grade. This is
22 talking about grades, safety grades. Survey

1 participation is separate. And just because you
2 do the survey doesn't mean that you're going to
3 be an A grade.

4 Q. But --

5 A. These are hospitals that already have
6 A grades.

7 Q. But this says survey participants are ten
8 times more likely.

9 A. Of the A grades. So say there's -- I
10 don't know -- 900. Only, you know, a percentages
11 of those do the survey and a percentage of them
12 don't. And the ones that do the survey are more
13 likely to license.

14 Q. Okay. Got it. Because the only
15 license -- the only people who purchase the
16 accolades are the A-grade hospitals.

17 A. Yes.

18 Q. Got it. Okay. I was trying to
19 understand where in this deck it said you're
20 talking only about the A grades.

21 A. Yes. The whole thing in context is
22 accolade sales, which are focused on A grades.

1 Q. Only A grades. Got it. Okay. That was
2 the disconnect.

3 MR. CRAIN: Okay. I think that might be
4 a good place to break, if you're okay, for lunch.

5 MS. BLAIR: Yes.

6 VIDEO TECHNICIAN: The time is 12:39 p.m.
7 This ends unit 3. We're off the record.

8 (A recess was taken.)

9 VIDEO TECHNICIAN: The time is 1:44.
10 This begins unit number 4. We're on the record.

11 (Campione Deposition Exhibit 6 marked for
12 identification and attached to the
13 transcript.)

14 BY MR. CRAIN:

15 Q. Good afternoon, Ms. Campione.

16 A. Good afternoon.

17 Q. I'm going to give you a document that's
18 been marked Campione Exhibit 6.

19 Do you recognize this document?

20 A. Yes.

21 Q. What is it?

22 A. This is the meeting invite and attach- --

1 with attachments from the expert panel meeting
2 that took place on April 12th, 2024.

3 Q. And that's the meeting we discussed at
4 length this morning?

5 A. Yes.

6 Q. And the meeting invite comes from
7 Dr. Austin?

8 A. Yes.

9 Q. And includes a number of the folks we
10 talked about earlier today, right?

11 A. The --

12 Q. It was sent to the folks we talked about
13 today?

14 A. Yes. That are on the safety grade expert
15 panel.

16 Q. Great.

17 And when the expert panel meets, is this
18 typically how a deck is distributed, through a
19 calendar invite?

20 A. I can't say that it always is, but it
21 appears to have been this time.

22 Q. Was this deck presented at the meeting?

1 A. Yes.

2 Q. Okay. And I want to just flip through.
3 If we could go to slide 5.

4 Do you recall whether you -- so did you
5 draft this deck?

6 A. I might have. I might have sent some
7 slides to Matt Austin to include. I can't
8 remember, though.

9 Q. Okay. Do you recall whether you drafted
10 this slide?

11 A. This slide? I don't know. I kind of
12 think that maybe I did an outline for it, maybe
13 Matt added on to it. But either way, we both
14 reviewed it beforehand.

15 Q. Okay. So just walking through this
16 slide, the title is, The problem that we're
17 working to solve.

18 Do you see that?

19 A. Yes.

20 Q. And just -- can you just articulate what
21 is the problem?

22 A. That --

1 Q. Feel free to use the slide, too.

2 A. Yeah, no, that's exactly the point of
3 this slide. We are working to deal with how the
4 imputed scores, the -- and really, this should
5 say the mean scores from step 2 -- are creeping
6 up. And they're higher than a lot of the scoring
7 categories from on the -- in the methodology.

8 So -- then there is this other issue,
9 which we talked about earlier, of hospitals
10 skipping doing the survey, which obviously is not
11 desirable because we talked about how current
12 data is the best representation of a hospital's
13 performance at this time. So obviously it's not
14 great if hospitals are not giving us the most
15 up-to-date data.

16 So these are the two issues that we had,
17 and we were trying to find a solution to them.

18 Q. And when it says, Imputed scores have
19 crept up, is that under the prior mean
20 calculation?

21 A. Yes.

22 Q. And what was -- what was the working

1 theory as to why means were creeping up?

2 A. That essentially hospitals that were
3 doing the survey were doing better and better.

4 Q. Did you ever consider whether hospitals
5 were inflating their own grades?

6 A. No, because I think we have a rigorous
7 data verification process. And that's also not
8 my concern in this scope.

9 Q. Okay. In your opinion, is there any
10 chance that hospitals were inflating any part of
11 their survey responses?

12 MS. BLAIR: Objection to form.

13 THE WITNESS: If they were, then they
14 would be doing it in violation to their
15 affirmation of accuracy that they complete when
16 they submit the survey and for every section of
17 the survey.

18 BY MR. CRAIN:

19 Q. And in assessing the problem of
20 whether -- of how imputed scores crept up, did
21 you -- you didn't rule out the possibility that
22 hospitals that were participating were inflating

1 their scores.

2 A. What I would say to that is that the goal
3 is for all hospitals to eventually reach our
4 standard. These are, like, a guideline, and
5 these are telling hospitals how they -- or
6 helping them get to a place where they're safer.
7 That's the purpose of the process and structural
8 measures.

9 So, I mean, while that could be
10 happening, I don't think that's the sole
11 reason -- I absolutely don't think it's the sole
12 reason that the mean was increasing. I think
13 it's because these hospitals that are completing
14 our survey were doing better over time.

15 Q. On the Leapfrog metrics?

16 A. Yes.

17 Q. Did you conduct any analysis to verify
18 whether they were actually doing better?

19 A. I don't know how you would design --
20 you'd have to do a whole study or something.
21 Maybe a sample. I don't -- as an epidemiologist,
22 I mean, you'd have to come up with some method

1 of, like, say a plan. And essentially I guess
2 that's what our onsite data verification is
3 doing, and our document requests are doing.

4 Q. So is that a yes or no?

5 A. Can you repeat the question?

6 Q. Yes.

7 Did you conduct any analysis to verify
8 whether they were actually doing better?

9 A. Whether they were actually doing better?
10 I mean, they were doing better. It was clear.

11 Q. The scores were better.

12 A. Yes. They were improving over time.

13 Q. And you're -- okay.

14 I want to push forward to slide -- let's
15 see. We talked about -- if you go to slide 7, do
16 you see it says, The current imputational model?

17 A. Yes.

18 Q. Is this a true depiction of the model
19 that existed prior to 2024?

20 A. Prior to fall 2024. Yes.

21 Q. It's what we talked about this morning,
22 correct?

1 A. Yes. So this is the spring 2024
2 methodology that we're looking at.

3 Q. Yes.

4 A. The current imputation model.

5 Q. And to your knowledge, that had been in
6 place since when?

7 A. Well, it depends. You know, some rounds,
8 this is modified and always announced in the
9 proposed changes. So as it is, I think it had
10 been this way for at least a round or two --

11 Q. Okay.

12 A. -- in this form.

13 Q. Okay. Let's flip now to slide 9.

14 And this is a slide that says, Step 2,
15 imputation for IPS.

16 Do you see that?

17 A. Yes.

18 Q. Can you explain to me what the step 2
19 imputation for IPS was?

20 A. So the step 2 imputation for IPS -- so
21 this was the current one in place for spring
22 2024.

1 The -- how step 2 imputation worked for
2 ICU was that we -- if they had ICU beds reported
3 in the worksheet S-3 part 1 of a CMS cost report,
4 they were determined to have an ICU and they
5 were, therefore, assigned to the lowest scoring
6 category of limited achievement, or five points.

7 Q. Okay. Got it. Okay.

8 I want you to flip next to slide 11. And
9 this is a slide that says, Spring 2024 measure
10 scores.

11 Do you see that?

12 A. Yes.

13 Q. Can you explain for me what the bottom
14 two rows are, average step 1 imputed score and
15 average step 2 imputed score?

16 A. So these are the mean scores for the
17 measures. If step 1 was used for the hospital, I
18 included that score and then took the mean; if
19 step 2 was used, then I took the mean of those
20 scores for each measure.

21 Q. And the 5 for ICU physician staffing
22 reflects that limited achievement?

1 A. Yes.

2 Q. Okay. For step 1 imputed score, just to
3 be sure I understand, that's the mean of
4 participating hospitals in prior surveys.

5 A. Well, that's the mean of the most recent
6 safety grade score --

7 Q. Okay.

8 A. -- for that measure.

9 Q. Would that be for some hospitals like the
10 last survey and for others hospitals two surveys
11 back?

12 A. In this case, yes.

13 Q. Okay. So anybody imputed through step 1?

14 A. Yes.

15 Q. Okay. And then step 2 is lower, right?

16 A. Yes.

17 Q. Why is step 2 lower compared to step 1?

18 A. Because a lot of these are using that
19 first mean score. So the average score for a
20 hospital in their co- -- in each respective
21 cohort, the first time they ever completed the
22 survey. So if that was, like, a hospital that

1 completed it for the first time in 2018, whatever
2 their score was for CPOE, and a hospital that
3 completed it for the first time in 2019, whatever
4 their score was for CPOE, and then averaged
5 together.

6 Q. Got it. So I had thought that step 2 was
7 the lower of two possible means. Is that wrong?

8 A. That is. But at this point, I think we
9 had moved to -- or not moved to; it just was the
10 case that the majority of those for every -- for,
11 I think, all cohorts at that point was that first
12 mean score.

13 Q. The lower score was always the first mean
14 score?

15 A. Yes.

16 Q. Okay. Got it. Okay.

17 Okay. If we could go to slide 12.

18 Now, this shows hospitals eligible for
19 imputation.

20 Do you see that?

21 A. Yes.

22 Q. And what does eligible for imputation

1 mean?

2 A. They didn't complete the most recent
3 Leapfrog survey.

4 Q. Got it. So it just means they didn't
5 participate in the last round?

6 A. Yes.

7 Q. Okay. And it says, The proportion of
8 hospitals that complete the Leapfrog survey has
9 increased since 2012 from 31 percent to
10 61 percent.

11 Do you see that?

12 A. Yes.

13 Q. And then there was a slight dip in survey
14 participation this past year.

15 Do you see that?

16 A. Yes.

17 Q. And that's from 2022 to 2023.

18 Do you see?

19 A. Yes.

20 Q. Okay. And does that -- we talked earlier
21 today about the HCA declination to participate.

22 Do you remember that?

1 A. Yes.

2 Q. Do you -- are you aware of other
3 hospitals that result -- that were factored into
4 that dip, or your view is it's only HCA?

5 A. It may be HCA. There's definitely
6 hospitals that could have stopped for any other
7 number of reasons.

8 Q. And can you tell approximately how many
9 hospitals fewer participated from 2022 to 2023?

10 A. I can't give you an exact number here.
11 Let's see.

12 Q. Best estimate?

13 A. Maybe like 100.

14 Q. Okay. And then I want to go to slide 13.

15 And do you see at the top it says,

16 Proposed future imputation methodology?

17 A. Yes.

18 Q. Was this the methodology presented at the
19 meeting?

20 A. Yes.

21 Q. Okay. You recall it being presented?

22 A. Yes.

1 Q. Who discussed it?

2 A. Discussed or presented?

3 Q. Who presented it? Fair.

4 A. It was either me -- I might have started
5 and Matt finished or -- because I kind of -- I
6 would have made those graphs before. So I'm not
7 sure. I haven't -- it's been a year.

8 Q. Okay. Is this the methodology that was
9 ultimately instituted?

10 A. No, it is not.

11 Q. Okay. Can you tell me the differences?

12 A. Here, we're suggesting retiring step 1
13 imputation altogether where we use the most
14 recent scores for the measures.

15 Obviously we didn't go on to do that
16 because of the expert panel's advice and decision
17 there.

18 I believe -- so this -- using step 2B
19 imputation for all hospitals, I think that's
20 referring to that previous slide that we were
21 just looking at that was currently being used for
22 ICU physician staffing.

1 So it's suggesting using that form and
2 that -- oh, wait, sorry. Did I -- proposed
3 future imputation methodology. Use step 2B --
4 sorry, I'm a little bit confused here.

5 Q. Take your time.

6 A. Wait. This is -- this doesn't seem
7 right.

8 Q. What seems wrong?

9 A. So this -- hmm. It says, Proposed future
10 imputation methodology.

11 Q. Yes.

12 A. But I feel like this is not -- I mean,
13 this is not what we ended up doing.

14 Q. Well, that's my question. Right?

15 A. Yeah. I'm a little bit --

16 Q. Why are you confused?

17 A. Because I don't think this is what we
18 presented that day.

19 Q. You don't think it's what you presented
20 that day?

21 A. I don't know.

22 Q. Okay. Earlier you testified -- well,

1 strike that.

2 You testified a moment ago that Leapfrog
3 did not undergo this proposal here because of the
4 advice and decision of the expert panel.

5 Do you recall that testimony?

6 MS. BLAIR: Objection to form.

7 THE WITNESS: I mean, I guess -- I mean,
8 I would have to, like, listen to that past
9 meeting to see exactly how it went down. But it
10 looks like we were actually presenting that there
11 be really no change.

12 I guess I'm -- I don't -- these are my
13 tables, so I must have presented this. But it
14 looks like we're -- the expert panel went a
15 different direction, which is perfectly okay for
16 them to do. And they went with the one that we
17 currently use, not this one proposed here in this
18 slide.

19 BY MR. CRAIN:

20 Q. So that's my question.

21 A. Uh-huh.

22 Q. You testified earlier that the expert

1 panel made a decision or made a recommendation.

2 Where did they do that?

3 A. You'll have to read the transcript from
4 the expert panel and ask them.

5 Q. Is it -- you know there's a transcript?

6 A. Yes.

7 Q. Are you aware whether it's been produced
8 in this case?

9 A. No, I don't know.

10 Q. Okay.

11 A. Or -- transcript, Zoom. You know, it's
12 the Zoom transcript.

13 Q. Yeah, yeah, I understand.

14 So I just -- I want your best memory
15 today. That's all I'm asking for.

16 A. Uh-huh.

17 Q. Is it your memory that the model that
18 Leapfrog ultimately adopted was presented at this
19 April 12th meeting?

20 A. It was definitely discussed and agreed
21 upon to some extent. But, if anything, I mean,
22 it shows they weren't -- they came up with

1 something different. And, like, this is what we
2 were suggesting, I guess, and -- yeah.

3 Q. Okay.

4 A. They do their own thing.

5 Q. They do their own thing. Okay.

6 So just to be clear, you said this is not
7 different from the prior methodology. I just
8 want to direct your attention to the first part.

9 It says, Retire step 1 imputation for all
10 measures.

11 Was that the change you were proposing in
12 this slide?

13 A. Yes. That's how it looks. It looks like
14 we were proposing -- and this would have been,
15 like, you know, Matt, Missy, and I met previously
16 and we must have decided, okay, let's retire
17 step 1 and just use the mean of the cohort.
18 And -- yeah, they can do what they want as the
19 expert panel.

20 Q. And in this 2B, is there any difference
21 from the prior model, this proposal here on the
22 slide?

1 A. Is there any -- well, I mean, we're
2 phasing out using the mean of the current scores.

3 Q. Okay.

4 A. Yeah.

5 Q. So just to make sure I have it right, the
6 pri- -- there were two changes here from the
7 prior methodology.

8 Change 1 was retiring step 1 altogether.

9 A. Uh-huh.

10 Q. Correct?

11 A. Yes.

12 Q. And change 2 was to get rid of the
13 two-tiered step 2 and, instead, you would just
14 use the mean of the first time a hospital has
15 reported, correct?

16 A. Yes.

17 Q. Okay. And then on this slide it says
18 that -- it gives you the splits of hospitals for
19 imputation versus the Leapfrog survey.

20 Do you see that at the bottom?

21 A. Yes.

22 Q. Is that, to the best of your

1 recollection, accurate numbers?

2 A. Well, let me -- it looks like it's just
3 the two numbers added together.

4 Q. Yeah.

5 A. So yes.

6 Q. And then just flipping through the slide,
7 the last piece is that hyperglycemia [sic]
8 portion.

9 Do you see that in the next few slides?

10 A. Yes.

11 Q. Okay. And I understand there to be no
12 relevance to this case, but if there is some, let
13 me know.

14 A. I think they decided not to.

15 Q. Not to adopt that. Okay.

16 You can set that aside for now.

17 A. Okay.

18 Q. And I just wanted to go back to something
19 you said. You said the expert panel can do what
20 they want. Is it your understanding of how this
21 works that the expert panel decides the
22 methodology?

1 A. Yes. Major methodology changes, all of
2 them, are set by them and need to be approved by
3 them.

4 Q. But you're not aware of any vote that
5 they take?

6 A. No.

7 Q. And you're not aware of any mechanism by
8 which they communicate their approval?

9 A. Like, verbally and in writing, and if
10 they felt strongly about how they -- if they
11 didn't agree with something that was reached at
12 the conclusion of the meeting or the notes
13 that Matt sent, I would expect that -- they're
14 adults and they can reach out and send an e-mail
15 saying, I strongly disagree.

16 But at the end of the day, they know that
17 their stamp is going on it for approval.

18 Q. So they're presumed to consent unless
19 they object?

20 A. I -- you would have to ask Matt Austin.

21 Q. But I want your opinion and
22 understanding.

1 A. Clearly I wasn't paying attention during
2 this meeting.

3 Q. Okay.

4 A. But I don't have any -- it's not my job
5 to sway them either way. It's their job to be
6 familiar with the literature out there and the
7 studies and the measures themselves and make sure
8 that they're recommending the best measures be
9 included in the safety grade.

10 Q. And is it your understanding that they
11 propose the course of action or Leapfrog proposes
12 the course of action?

13 A. Well, it looks like we made some
14 suggestions, because we're most familiar with
15 these measures day to day. They have full-time
16 jobs and are working on other stuff too. So we
17 will make suggestions, but as you see here, they
18 don't have to go with them.

19 Q. I want to go -- you mentioned there were
20 notes right after the meeting.

21 Do you recall that?

22 A. Yes. I mean, Matt definitely sends,

1 like, a synopsis.

2 MR. CRAIN: So we're going to mark our
3 next exhibit. This is 7.

4 (Campione Deposition Exhibit 7 marked for
5 identification and attached to the
6 transcript.)

7 BY MR. CRAIN:

8 Q. Okay. Do you recognize this document,
9 Ms. Campione?

10 A. Yes.

11 Q. And the top is as e-mail from
12 Ms. Danforth to you in May of 2024.

13 Do you see that?

14 A. Yes.

15 Q. And she says, Can you save in expert
16 panel folder?

17 Do you see that?

18 A. Yes.

19 Q. And what is the expert panel folder?

20 A. So for every section of the survey and/or
21 measure, there's an expert panel, of course, as I
22 testified earlier. And each of them we put

1 information from the meeting in a respective
2 expert panel folder.

3 Q. Okay. Now, go further down. There's an
4 e-mail from -- it looks like Preeti Joshi.

5 Do you see that?

6 A. Yes.

7 Q. Who is Preeti Joshi?

8 A. She is, like, a research assistant to
9 Matt Austin.

10 Q. Okay. And did she attend the meeting?
11 Do you recall?

12 A. I'm not sure. You would have to...

13 Q. Actually --

14 A. We could reference --

15 Q. Yeah, the notes, I think, say she did.

16 A. -- Exhibit 6.

17 Q. If you look, actually, a few pages back
18 in the notes, it says attendees.

19 A. Yes.

20 Q. Do you see that?

21 And then, just before we get there,
22 Ms. Campione, if you go back to her e-mail, she

1 says, Apologies for the delay in sharing the
2 meeting notes from the Leapfrog hospital safety
3 grade expert panel call.

4 Do you see that?

5 A. Yes.

6 Q. If you notice any glaring errors or
7 omissions with the attached notes, please let us
8 know.

9 Do you see that as well?

10 A. Yes.

11 Q. To your best recollection and
12 understanding, were the notes attached to this
13 e-mail the final notes from the meeting?

14 A. It would appear so.

15 Q. So let's go take a look at the notes.

16 And just to start, is this a typical
17 document that follows an expert panel meeting?

18 A. Yes.

19 Q. And it says at the top these are the
20 notes from Friday, April 12th, 2024.

21 Do you see that?

22 A. Yes.

1 Q. Okay. And just taking a look, starting
2 with "on the call," it lists expert panelists,
3 Leapfrog, and Johns Hopkins -- that is hard to
4 say -- Johns Hopkins Armstrong Institute.

5 Do you have any -- do you remember all
6 these people being on the call?

7 A. Yes. I mean, that looks right.

8 Q. Okay. And then going down the line -- I
9 think we can skip over the military treatment
10 facilities. And I just want to work through
11 number 2 on the agenda.

12 It says, Proposed changes to the
13 imputation model.

14 Do you see that?

15 A. Yes.

16 Q. Okay. And it says, Matt provided the
17 expert panel with a quick overview of the current
18 imputation model approaches Leapfrog has been
19 using and some of the challenges those approaches
20 have created for issuing accurate grades.

21 Do you see that?

22 A. Yes.

1 Q. Does that, to your recollection, reflect
2 those first slides we looked at, the problem
3 we're solving for?

4 A. Yes. So I guess he presented those, so
5 yes.

6 Q. And then it says, The current imputation
7 model is two steps when data are missing.

8 Do you see that as well?

9 A. Yes.

10 Q. And that reflects the slide we saw about
11 the current model, right?

12 A. Uh-huh. Yes.

13 Q. And then it says, Leapfrog's proposal was
14 to retire step 1 of the model and use only
15 step 2, assigning hospitals the mean score for
16 their cohort.

17 Do you see that?

18 A. Yes.

19 Q. So does this reflect that Leapfrog was
20 making a proposal to the expert panel?

21 A. Yes.

22 Q. And is that consistent with or

1 inconsistent with your memory?

2 A. That's consistent. I just testified to
3 that.

4 Q. Okay. The next bullet mentions someone
5 named Arjun, who I take it is Arjun Srinivasan?

6 A. Yes.

7 Q. And he's a member of the panel?

8 A. Yes.

9 Q. Okay. And Arjun mentioned one of the
10 concerns with the current step 2 imputation
11 method is if a hospital is performing very
12 poorly, they could choose not to submit a survey
13 and get a better score than their actual
14 performance by just being part of a certain
15 cohort.

16 Do you recall that?

17 A. Yes.

18 Q. And Peter -- who is Peter?

19 A. Pronovost.

20 Q. Peter Pronovost, who I understand was on
21 Time --

22 A. Pronovost.

1 Q. Pronovost? It says it at the top?

2 A. Yes.

3 Q. I understand he was on Time Magazine; is
4 that right?

5 A. Yes.

6 Q. I've heard stories.

7 Peter asks whether Leapfrog has a way to
8 keep the low-performing hospitals in the lowest
9 quartile using the step 2 imputation model.

10 Do you recall that?

11 A. Lowest -- no, not really. I don't really
12 understand.

13 Q. What is the lowest quartile? Do you have
14 any understanding as to what that means?

15 A. I think he's suggesting something
16 different than our current methodology here.

17 Q. What's your understanding of the
18 difference?

19 A. I don't understand what he's suggesting
20 here, at least in these notes.

21 Q. Yeah.

22 A. I'd have to listen to his statement

1 and -- yeah, his full statement to understand.

2 Q. When -- does Leapfrog use the
3 phrase "lowest quartile"?

4 A. No. But it is a method of -- that you
5 can use in scoring in general.

6 Q. How would that work? It's --

7 A. It's the lowest --

8 Q. -- could you --

9 A. -- 25 percent --

10 Q. Okay.

11 A. -- performing, yeah.

12 Q. So it's --

13 A. It could -- sorry.

14 Q. Yeah.

15 THE REPORTER: I can't get you both.

16 MR. CRAIN: No, I know. I'm sorry.

17 BY MR. CRAIN:

18 Q. Go ahead.

19 A. So if we were -- you could perhaps, like,
20 look at the numerical score and say the lowest --
21 the bottom 25 percent. That might have been what
22 he's suggesting.

1 Q. Is it different from the lowest possible
2 score?

3 A. From the lowest? What lowest possible
4 score?

5 Q. Well, if the lowest score is a zero,
6 say --

7 A. Oh.

8 Q. -- would the lowest quartile be
9 25 percent?

10 A. Not necessarily.

11 Q. So you're not quite sure what this means?

12 A. No, I don't -- I think -- yeah, he's
13 suggesting, like, a different alternative that is
14 kind of not like we've used previously. But it
15 is definitely, like, a way that you can score
16 hospitals. Like -- yeah.

17 Q. And I'm still not understanding. And it
18 may be me.

19 When you say it's a different way, how
20 would you understand that way works? And if you
21 have no --

22 A. Yeah, I don't understand. I think that

1 maybe that was just a poor way of phrasing --
2 rephrasing what he said.

3 Q. Okay.

4 A. I would advise that we go to the actual
5 meeting to see.

6 Q. So go to the tape?

7 A. Yes.

8 Q. Okay. So is it -- so let's keep going.

9 The expert panel were in support of
10 having hospitals share their current performance,
11 so like the idea of imputing the equivalent of
12 willing to report to hospitals that do not submit
13 a survey.

14 Do you know what willing to report means?

15 A. Willing to report is actually an old
16 phrase that we used to use instead of limited
17 achievement.

18 Q. Okay. When was that phrase last used?
19 Do you know?

20 A. More than five years ago.

21 Q. Okay. Do you recall anybody saying that
22 phrase on the call?

1 A. No.

2 Q. Do you recall --

3 A. But it's very possible that they could
4 have. Some of these panelists have been a
5 panelist for a long time, so they could have just
6 been using old phrasing from the survey.

7 Q. And then going back, Peter noted that
8 Leapfrog's message on this change will be
9 critical because, if done correctly, it can help
10 enhance focus on safety; otherwise, it has the
11 potential to backfire.

12 Can -- do you know what he meant there?

13 A. I would really go to the actual
14 transcript because this is putting it through
15 someone else's words, and I don't know the...

16 Q. I'm just asking for your best
17 understanding. If you don't have one --

18 A. Like, when I read this sentence, what I
19 think or what I remember from that time?

20 Q. Let's take both. What do you remember?

21 A. I think I stated it earlier. I mean --
22 and I said that it was generally very positive.

1 The focus was on increasing transparency and this
2 focus on safety. He wanted to make sure -- he
3 thought that this had the opportunity to, like,
4 refocus on safety. I'm using Preeti's words
5 here.

6 And then it has the potential to
7 backfire. I assume he meant some hospitals being
8 upset with this change.

9 Q. Which may have transpired. Okay.

10 Then -- you said reading the words on the
11 page. Do you have a different understanding from
12 what you remember?

13 A. Yes. I mean, these are -- well, I would
14 say this isn't -- these are Preeti's words.
15 So...

16 Q. Do you have an independent understanding
17 of what the words mean?

18 A. I mean, I think it's fine, actually, the
19 statement. I mean, she's just saying it's
20 positive, that this could enhance focus on
21 safety, and hospitals could be upset about it.

22 Q. Okay. And then -- let's see. Just

1 reading the last two bullets for completion:
2 Missy asked the expert panel to what extent the
3 health systems that wanted to partner with
4 Leapfrog could help deliver this message.

5 Any recollection of what "this message"
6 might mean?

7 A. I'm not sure what this is referring to,
8 actually. I'm wondering if -- I think -- we
9 should definitely go back to the tape to
10 understand this more, but I think Peter was
11 offering to help with the messaging to understand
12 or form this in a way that, like -- make sure it
13 made sense to hospitals and whatnot.

14 And that's all I can -- that's all I
15 think I can ascertain from these.

16 Q. So after looking at the deck and looking
17 at the notes, was the methodology that Leapfrog
18 ultimately adopted presented in this meeting?

19 A. It was certainly discussed because --
20 because it's, like, what they decided. But it
21 wasn't presented in those slides, no.

22 Q. And does it appear in these notes?

1 A. No, it doesn't appear in these notes.

2 Q. Okay. So you're basing your recollection
3 that it was discussed on a memory you have today?

4 A. No. I think I'm basing it on the fact
5 that this is Matt Austin's job to, like, figure
6 out what they want, the expert panel wants, and
7 to communicate that.

8 Q. He's the facilitator?

9 A. Yes.

10 Q. Okay. Let's go to the next exhibit.

11 MR. CRAIN: 24, please. So we're going
12 to mark this as Exhibit 8.

13 (Campione Deposition Exhibit 8 marked for
14 identification and attached to the
15 transcript.)

16 BY MR. CRAIN:

17 Q. Okay. Do you have it, Ms. Campione?

18 A. Yes.

19 Q. Do you recognize this document?

20 A. Sure. They're Slack messages.

21 Q. I want to go through, first starting at
22 the top, if you look on page 1. The first

1 page -- if you flip it back.

2 A. Oh, yeah. Sorry.

3 Q. If you need a moment to look at it,
4 that's fine.

5 A. Yes. Can I review?

6 Q. Yes. Of course.

7 A. Okay.

8 Q. Okay. Just starting on page 1, it says
9 the date range for this -- the first page.

10 A. Sorry.

11 Q. The date range is April 12th, 2024.

12 Do you see that?

13 A. Yes.

14 Q. And it says there are three participants,
15 but if you look, I think it's you, Ms. Danforth
16 and the Slack Bot.

17 Do you see that?

18 A. Yes.

19 Q. I assume a Slack Bot is AI and not a
20 person.

21 A. Yeah, I -- there is something weird going
22 on.

1 Q. Okay. There is no employee at Leapfrog
2 named Slack Bot.

3 A. No. I wish.

4 Q. Perhaps it was Wilson Elser.

5 MS. BLAIR: Yeah, I was just --

6 MR. CRAIN: Do you want privilege on
7 this?

8 MS. BLAIR: No.

9 BY MR. CRAIN:

10 Q. So if you look -- just -- starting with
11 the first time stamp on the next page --

12 A. Yes.

13 Q. -- starts at 11:02. And if you look at
14 the end, it ends at 5:08.

15 Do you see that?

16 A. Yes.

17 Q. Now, the meeting held that day we saw in
18 the notes was 4:00 to 5:00 p.m.

19 Do you recall that?

20 A. Yes.

21 Q. And if you want to look at the notes,
22 obviously, feel free.

1 A. Uh-huh.

2 Q. So I want to march through some of these
3 chats, and feel free to stop me at any time.

4 So I want to go down to your chat at
5 2:26 -- or maybe 2:24. Let's start with
6 Ms. Danforth.

7 And it says, Missy, I can only be on the
8 phone during the SG panel call. Do you think
9 that will be an issue?

10 SG panel call is safety grade panel?

11 A. Yes, it is.

12 Q. You respond, I don't think so. Matt will
13 be leading and is making the case for the
14 imputation change. I'm assuming he brushed up on
15 the new measures.

16 Do you see that?

17 A. Yes.

18 Q. She says, Okay.

19 And you say, And I know the slides.

20 Right?

21 A. She said, And I know the slides.

22 Q. Oh, I'm sorry. She said that. My

1 mistake.

2 Now, making the case for the imputation
3 change. When you said that, you were referring
4 to the slides?

5 A. Yes.

6 Q. Now, going down, the meeting starts,
7 again, at 4:00, right? We saw that?

8 A. Oh, yes. Yes.

9 Q. Right. So you have no chats from 3:23 to
10 4:42. And then you start chatting.

11 A. Yes. Towards the end of the expert panel
12 call.

13 Q. Yes. And Ms. Danforth says, Sara
14 ons [sic] Peter sold this for us.

15 Do you have any idea what that means?

16 A. Yes. I speak Missy. She's saying Sara
17 and Peter sold this for us.

18 Q. Got it.

19 And do you know what "this" refers to?

20 A. Yes. Yes. It is definitely coming back
21 more now, especially having read this.

22 So we were presenting exactly that

1 proposal, one that was in the slides. And it
2 did -- I kind of remember now, like, Sara was
3 saying -- was just very positive -- or at least
4 felt very strongly that these hospitals shouldn't
5 be getting extra points and being deterred from
6 doing the survey. And that was not helping us to
7 get to -- the ultimate goal of the safety grade
8 is to improve safety within the hospitals. And
9 Peter was very positive as well.

10 And we -- honestly, what they ended up
11 going with, obviously, was a lot -- it was more
12 intense than what we were suggesting or, you
13 know, a bigger change. We were suggesting
14 something that was a small tweak to the old
15 imputation methodology, and they were -- had a
16 different position.

17 Q. "They" meaning the expert panel?

18 A. Here, if we're talking about Sara and
19 Peter, this is -- she's -- I assume at 4:42 Sara
20 and Peter had just spoken and were very positive
21 about moving towards something more like what we
22 ended up implementing.

1 Q. And is it your memory today that they
2 were advocating for what you implemented today?

3 A. Yes. I didn't remember if it was Sara
4 earlier, but I have always said -- it was
5 definitely Peter. I remember that very much so.

6 Q. Peter wanted the option that you
7 ultimately adopted; that's what you're saying?

8 A. Yes. I mean, he was -- he felt strongly
9 that it wasn't accurate, what we were doing
10 before --

11 Q. Okay.

12 A. -- that mean that we were assigning from
13 the first scores.

14 Q. And the next chat says, I wish Patrick
15 was on this call.

16 That's from Missy, so -- Ms. Danforth.

17 A. Yes.

18 Q. Do you have an understanding of why she
19 wanted Patrick on that call?

20 A. I think, because earlier when we
21 discussed with him, he was very hesitant because
22 he really didn't like the step 1 imputation being

1 removed completely, you know, where we're
2 imputing last -- the last survey, or two scores
3 from that survey.

4 And so I think she felt that if he was on
5 that call, he would have been convinced
6 immediately by this interaction.

7 Q. Convinced to remove step 1?

8 A. I think so. Yeah.

9 Q. Okay. And then she says, Arjun too
10 pushing the bottom 25 percent idea.

11 That's the next page.

12 A recollections of what that means?

13 A. Yes. That references the earlier notes,
14 where he's -- someone --

15 Q. Peter.

16 A. It says Peter here, but she's saying it's
17 Arjun, it looks like -- oh, no. Okay. Sorry, I
18 misread.

19 So Peter must have been pushing, yes, the
20 bottom 25 percent idea, lower quartile. And I
21 think they had strong reactions.

22 Q. Is that where you say, Very, very

1 different reactions?

2 A. Yes. And I don't know what I'm referring
3 there -- you would have to be -- like, line this
4 up second to second.

5 But you can see that we are -- the expert
6 panelists are having a discussion, and we're not
7 involved in it.

8 Q. Who is "we" being --

9 A. Missy and I are not involved in these --
10 the expert panel is debating, clearly, and we're
11 not involved in this debate.

12 Q. You're observing.

13 A. We're observing.

14 Q. Then you respond, I think you convinced
15 Patrick at the end, though.

16 Do you know what you convinced him of?

17 A. She --

18 Q. Or she. I'm sorry. She convinced him
19 of --

20 A. Yes. So what I'm referring to -- okay.
21 So what I'm referring to is that call that we had
22 earlier with Patrick. And there was debate going

1 on in that meeting about what's the best one,
2 throwing different ideas out there.

3 And I think Missy was presented to him --
4 she made a case for the one that we were
5 proposing that was presented. And I -- clearly I
6 had the impression that I thought Patrick was
7 actually open to the idea.

8 Q. The one you were proposing, meaning the
9 one we saw in the slides?

10 A. Yes.

11 Q. Then you go down two. Missy says, He
12 said 1,000 hours.

13 Do you know what that's referring to?

14 A. Yes. So as I said earlier, he has --
15 he's affiliated with a hospital, and the hospital
16 must have told him something about how the survey
17 takes them a thousand hours.

18 Q. Got it.

19 And then Missy says, I hope he keeps that
20 to himself.

21 Do you see that?

22 A. Yes.

1 Q. Do you know if that was ever shared with
2 the panel?

3 A. I mean, I think 1,000 hours is an extreme
4 exaggeration. And I think that, you know, to run
5 around and say anecdotally 1,000 hours, I think
6 that's what she's -- but again, you'll have to
7 ask Missy.

8 Q. Okay. And then you say back to back --
9 this is at 4:43 and 4:44 --

10 A. Uh-huh.

11 Q. -- Honestly, this meeting has me
12 second-guessing the step 2 imputation at all.
13 The mean is so high for CPOE and BCMA.

14 Can you tell me what you remember
15 prompted that thought?

16 A. Yes. This is referring to the fact that
17 the expert panel started going that different
18 direction. And again, we're not engaging in
19 this. This is their own discussion. And they're
20 making a case to not use that first score mean at
21 all. And they kind of clearly had me convinced
22 that maybe it doesn't make sense.

1 Q. So is this the first time you recall
2 thinking about -- well, strike that. Let's see.

3 Do you recall -- the mean is so high for
4 CPOE and BCMA -- is that the slide we were
5 looking at that had the numbers?

6 A. Yes.

7 Q. Okay. And maybe --

8 A. Oh, yes.

9 Q. -- just for the record, get the number.
10 I think it's slide 11.

11 A. Yes. I would be referring to that 93 and
12 92 for CPOE and BCMA respectively.

13 Q. Okay. And then a few lines down, at
14 4:45, you say, If we make step 1 just the
15 previous survey, it would at least make the lapse
16 in survey participation short-term, and they
17 can't fall back on step 2.

18 Do you see that?

19 A. Yes.

20 Q. Is that consistent with the proposal
21 being made?

22 A. Yes. I mean, that is exactly what we

1 ended up doing, so it sounds like that's the
2 conclusion the expert panel was coming to.

3 Q. You're drawing that your chat reflects
4 the expert panel's conclusion?

5 A. Yes.

6 Q. Do you remember that conclusion?

7 A. Yes. I -- yes, I guess -- yeah. I mean,
8 I don't remember it in like the strictest term
9 who said it, how it was agreed. I can't -- I'm
10 not the Zoom recording. But clearly -- yeah.

11 Q. Now --

12 A. I was following that, and that's where
13 they landed.

14 Q. Sorry.

15 And "they" again being the expert panel?

16 A. Yes.

17 Q. So at 5:03 you say, The step 2 means are
18 so high. What if we use step 1, limit it to
19 only, say, two round, then assigned them to the
20 bottom performance category.

21 Do you see that?

22 A. Yes.

1 Q. And then Ms. Danforth said, That would be
2 drastic, but let's talk about it. LOL.

3 Do you see that?

4 A. Yes.

5 Q. Do you know what she meant by "drastic"?

6 And actually, if you look at the next
7 chat down, you said, It would be drastic.

8 So maybe I'll fix the question.

9 Why did you think it was drastic?

10 A. Okay. What is the question?

11 Q. Why did you think the proposal that you
12 made at 5:03 p.m. would be drastic?

13 A. Missy said it would be drastic.

14 Q. Correct. And then you responded, It
15 would be drastic.

16 A. Yes. Compared to what we originally
17 proposed.

18 Q. And so what did you mean by drastic?

19 A. Well, I guess going from whatever those
20 means were, 93 and 92, which are obviously really
21 inaccurate of those hospitals' performance, to 5
22 or 15, that would be -- it is a big change.

1 Q. And what you're -- so going back to 5:03,
2 you say, What if we use step 1, limit it to only,
3 say, two round, then assigned them to the bottom
4 performance category.

5 Do you see that?

6 A. Yes.

7 Q. Is that the methodology you adopted?

8 A. Yes.

9 Q. And you say, What if.

10 Do you see that?

11 A. Yes.

12 Q. Did you come up with that idea?

13 A. I mean, unless they started talking about
14 it later on -- a few minutes later and -- I don't
15 know what was discussed in the meeting.

16 Q. Well --

17 A. Like at that point, after that, they
18 could have brought it up. Missy could have
19 chimed in and suggested it.

20 Q. Well, the meeting was over at 5:00.

21 A. Oh, true. Okay. I don't know. I can't
22 tell you.

1 Q. To the best of your recollection, did you
2 come up with this idea after the meeting?

3 A. It does -- yes, I guess so, based on
4 what's in front of me. But I would like to see
5 the actual meeting and what happened and what we
6 landed on. Because someone did bring up during
7 the meeting assigning zero points.

8 Q. Your memory is zero points?

9 A. Yes. I remember -- someone did suggest
10 that in the meeting.

11 Q. Okay. And then the idea that you raise
12 at 5:03, both you and Ms. Danforth agree it would
13 be drastic, right?

14 A. Yes. Because it's different than what we
15 proposed that day.

16 Q. And is it -- strike that.

17 Do you recall that idea -- specifically
18 recall that idea being discussed in the meeting?

19 A. I don't recall. I really don't.

20 Q. Given that it was such a drastic change,
21 would you have expected to have remembered it on
22 the meeting?

1 A. Not necessarily. I mean, this was
2 obviously a very collaborative meeting with --
3 you know, honestly, we might not have even gotten
4 to that last slide of looking at hypoglycemia.
5 It's a lot of back and forth, a lot of ideas
6 thrown out there, like pushing the bottom
7 25 percent idea. It's a lot being thrown around.
8 And it's Matt Austin's job to distill all of that
9 and get us somewhere.

10 Q. And --

11 A. But at the end of the day, we produced
12 our proposed changes document and that -- that is
13 reviewed by the expert panel. And they have to
14 look at whatever our final conclusion is, so --
15 but I would say in this meeting, clearly, a lot
16 was happening and a lot of ideas were being
17 thrown around.

18 Q. But you can't recall whether this one at
19 5:03 was?

20 A. No, I don't know if that...

21 Q. If you go to the last page, it says 5:06.
22 You say, So to Peter's point, we would have to

1 be -- sorry, let me fix that.

2 So to Peter's point, we would just have
3 to very carefully push our justification and
4 messaging.

5 Do you see that?

6 A. Yes.

7 Q. Can you tell me what you meant when you
8 wrote that?

9 A. We were discussing how the messaging
10 around patient safety -- you know, what is our
11 reason for doing this -- justification. What is
12 our reason for doing this?

13 And I think it -- you know, we needed to
14 be delicate with it.

15 Q. Why delicate?

16 A. Well, I think that it can get
17 misinterpreted, and that's why we're here today.
18 But that is not what the expert panel was after.
19 So that's why you needed to handle it delicately.

20 Q. What do you think was a
21 misinterpretation?

22 A. That it was done, like, punitively or

1 vengefully, and it wasn't.

2 Q. You think there was no punitive intent
3 behind it?

4 A. No.

5 Q. Proceeding down, at 5:07, Ms. Danforth
6 says, Well, let's think about it. I'm open.

7 And then you say, Sounds good. Overall,
8 everyone was so amenable in the last meeting.

9 Do you recall what you meant by "last
10 meeting"?

11 A. I probably had other meetings that day,
12 so I'm just talking about our last meeting.

13 Q. Do you think -- is that referring to the
14 expert panel meeting or a different meeting?

15 A. Well, it's 5:07 and that ended at 5:00.
16 So -- I said everyone was really open to the idea
17 in the last meeting.

18 Q. Well, you said, Everyone was so amenable
19 in the last meeting.

20 So you're saying that refers to the
21 expert panel meeting that just ended?

22 A. Yes.

1 Q. Okay. And amenable to what?

2 A. To a change.

3 Q. To a change? Okay.

4 MR. CRAIN: I'm going to mark a new
5 document. This is Exhibit 9.

6 (Campione Deposition Exhibit 9 marked for
7 identification and attached to the
8 transcript.)

9 BY MR. CRAIN:

10 Q. So Ms. Campione, this is an e-mail that
11 ends with a -- it's a thread that ends with an
12 e-mail from Matt Austin to you and Ms. Danforth.

13 Do you see that?

14 A. Yes.

15 Q. And the subject is, Imputation changes.
16 Do you see that as well?

17 A. Yes.

18 Q. And we'll walk through it. If you want
19 to start with the bottom e-mail, please. And it
20 starts with an e-mail from you to Ms. Danforth,
21 Dr. Austin and -- is it Dr. Joshi or --

22 A. I don't know.

1 Q. Okay. It says, Hi all. Please find the
2 table we discussed below.

3 Do you recall -- first of all, do you
4 recall this table?

5 A. Yes.

6 Q. And do you recall the discussion about
7 it?

8 A. So we met -- we must have met with
9 Leah -- can we get through it and then I can see
10 if --

11 Q. Sure.

12 A. But I'm assuming that, like, we me with
13 Leah and I showed it. And then in this context
14 I'm saying, Here is the e-mail that we showed you
15 on the call.

16 Q. Okay. Let's walk through the e-mail
17 because I don't want to confuse you.

18 So it says, Please find the table we
19 discussed below. I also included the underlying
20 issues. Please feel free to edit respond to my
21 e-mail.

22 Do you see that?

1 A. Uh-huh.

2 Q. And then if you go -- so you have
3 underlying issues.

4 The first bullet says, Hospitals are
5 disincentivized from completing the survey.

6 Does that refer to what was discussed at
7 the expert panel?

8 A. Yes. I believe that was in one of the
9 slides.

10 Q. And that was the step 1 shortcut?

11 A. I mean, no. Actually, I think that would
12 be in reference to the step 2.

13 Q. Why do you think that?

14 A. I mean, either one, really.

15 Q. Okay.

16 A. Like, that's -- if the survey -- if the
17 goal of that is the more hospitals that complete
18 the survey, the more data that the public has.

19 Q. So you're saying either step 1 or step 2
20 could have incentivized the hospital to not
21 participate?

22 A. Yes.

1 Q. Okay. And then I think you have two
2 sub-bullets there, actually.

3 Do you see that?

4 A. Yes.

5 Q. And the first sub-bullet is step 1 and
6 the second is step 2?

7 A. Yes.

8 Q. Okay.

9 A. Exactly.

10 Q. Yeah. Okay. And then it further lays
11 out those concerns.

12 So this is basically the problem you're
13 trying to solve for, right, these top bullets?

14 A. Yes.

15 Q. And then, if you look at the table, these
16 are options, right?

17 A. Yes. Oh, we're looking at the table?

18 Q. Yeah.

19 A. But also, there's the concerns, which --

20 Q. Yeah, I'm happy --

21 A. -- are fair. I just want to emphasize.

22 Okay. And the table --

1 Q. Yeah.

2 A. -- is -- what are we looking at?

3 Q. So what is the table layout?

4 A. Okay. So this puts -- and to use this
5 term "drastic" from our Slack messages, it
6 presents options for step 1 and step 2 that range
7 from either no change at all to the drastic
8 change.

9 Q. And which of these options were discussed
10 on the meeting on April 12th?

11 A. So if I had to, like, put it into a
12 category, it would be --

13 Q. If any.

14 A. Yeah, so we were actually saying -- we
15 proposed eliminating step 1 imputation, so the
16 most drastic change for step 1.

17 And then we proposed -- I guess now it's
18 a no change to impute the mean, because that's
19 essentially where we were at every time. We were
20 imputing the first time the scores -- the mean of
21 the first time they completed the survey.

22 Q. So the proposal on the slide we saw for

1 the April 12th meeting is reflexive in the no
2 change and the small change boxes?

3 A. Yes. For step 1 it would be the most
4 drastic. For step 2 it would be the least
5 drastic.

6 Q. Got it.

7 Were any other of these options discussed
8 on the call, to your memory?

9 MS. BLAIR: Objection to form. Asked and
10 answered.

11 BY MR. CRAIN:

12 Q. And I'm asking for the first time about
13 this chart.

14 A. I mean, I guess it would be some
15 variation of this.

16 Q. Can you tell me which one of these boxes
17 were discussed on the call?

18 A. Okay. So moderate change, assign
19 hospitals to the bottom quartile. That was
20 Peter's suggestion, and that's referenced
21 earlier.

22 And -- or several standard deviations

1 below the mean. And then -- okay. So then it
2 looks like then the next thing is that idea that
3 I had at the end of the Slack, impute with
4 limited achievement scores.

5 Q. And those two ideas -- the bottom
6 quartile and the limited achievement -- are
7 different, correct?

8 A. I don't -- we don't know yet because we
9 haven't performed an analysis of what the bottom
10 scores are.

11 Q. I don't mean the output is different.
12 They may or may not be. But I'm saying the
13 proposals here are different.

14 A. It would be -- the methodology would
15 technically be different. That scoring
16 methodology would have different descriptions.

17 Q. Different descriptions or different --

18 A. But it could arrive at the same score.

19 Q. I understand it could arrive at the same
20 score.

21 The inputs would be different, right?

22 A. Yeah.

1 Q. Okay. So going back to the e-mail, if
2 you go to April 22nd at 12:27 p.m., there's an
3 e-mail from Matt Austin to you and Ms. Danforth.

4 And is it Ms. Joshi?

5 A. Yes.

6 Q. Okay. And he says, Alex, this looks
7 great. I'm wondering, do we, one, want to
8 reflect that we're already using drastic for
9 step 2 for IPS; and two, do we want to use a
10 different term for drastic charge, like large
11 change?

12 Any idea why he wants to change the
13 language there?

14 A. Look, I'm not a communications person,
15 and so --

16 Q. Is he?

17 A. No, he's not, but he realizes "drastic"
18 seems extreme, the word in itself. But -- it's
19 semantics.

20 Q. Okay.

21 A. What is the question?

22 Q. You answered it. All set.

1 Go next to the other two tables on pages
2 ending 8329 and 8330.

3 Can you tell me just narratively what's
4 going on with these two? What were the changes
5 here?

6 A. Okay. So it looks like I edited the
7 table so the IPS stood out, to point out that it
8 already is in that category.

9 Q. And then --

10 A. So that's 8330.

11 And then, for 8329 -- let's see the
12 difference. Oh, we also have to point out that
13 BCMA needs to be broken out. And that's -- we
14 haven't talked about that.

15 BCMA had a major change on the survey in
16 whatever survey cycle that would have been used
17 in step 1. So it wasn't fair to compare past
18 scores to current scores, to have that be imputed
19 from a previous survey.

20 Q. Got it. Okay. So the way of measuring
21 BCMA changed so you weren't going to use the
22 step 1 for BCMA?

1 A. Yes. They wouldn't be apples to apples.

2 Q. Got it. Understood. Okay.

3 A. For just a short time, until we had
4 another survey worth of data. Now it's -- this
5 upcoming fall it's going to use step 1
6 imputation.

7 Q. Okay. If you go to the first page.

8 And do you recall a few minutes ago you
9 mentioned this may have been shown to Leah?

10 Do you see the e-mail from you at 4:27?
11 It says, Matt and Preeti, are you free this
12 Thursday at 4:30 to meet with Leah, by any
13 chance?

14 A. Yes.

15 Q. Is that the meeting you were recalling?

16 A. Yes. Yeah, that makes sense. So at this
17 point, we hadn't met with Leah, and now we're
18 presenting these to her.

19 Q. And do you recall whether you presented
20 the last chart at 8329 to her?

21 A. I assume that's -- since that's the final
22 one --

1 Q. Okay.

2 A. -- that would have been.

3 Q. And tell me, what do you recall at that
4 meeting?

5 A. I'm not sure.

6 Q. Let me show you another document, which
7 may help.

8 MR. CRAIN: So we're going to mark this
9 Exhibit 10.

10 (Campione Deposition Exhibit 10 marked
11 for identification and attached to the
12 transcript.)

13 BY MR. CRAIN:

14 Q. So you can see, Ms. Campione, this is
15 another invite with an agenda in the chart.

16 Do you see the calendar invite?

17 A. Yes.

18 Q. And it looks like you sent it?

19 A. Yes.

20 Q. And the meeting was to be April 25th at
21 4:30, as you suggested in the prior e-mail,
22 right?

1 A. Yes.

2 Q. And required attendees include
3 Ms. Danforth, Dr. Austin, Ms. Joshi, and
4 Ms. Binder. Do you see that?

5 A. Uh-huh.

6 Q. And it look like -- am I right that the
7 chart was the last version we had looked through
8 on 8320?

9 A. Yes.

10 Q. Okay. Does this e-mail refresh your
11 recollection about the meeting that you sent the
12 invite for?

13 A. Yes.

14 Q. Tell me what you remember.

15 A. Oh, does it -- no, I don't remember the
16 meeting anymore, no. This is the same
17 information basically in the last one.

18 Q. Yeah -- okay. And it was on Zoom?

19 A. Yes.

20 Q. Do you know if this one was recorded?

21 A. No.

22 Q. You don't know or it was not?

1 A. It was not recorded.

2 Q. Sorry, bad question.

3 Okay. And you don't remember anything
4 Ms. Binder said on that call?

5 A. No.

6 Q. Okay. Was she favorable to the change?
7 Unfavorable?

8 A. I mean, I -- we're -- I think she met it
9 with a good amount of skepticism and trying to
10 weigh the changes and just -- I don't remember,
11 like, a strong takeaway from the meeting, but
12 I -- I don't know.

13 Q. And do you presently remember that the
14 meeting happened?

15 A. Yes. It definitely happened.

16 Q. Okay. You just don't remember the
17 content.

18 A. No.

19 Q. You can't remember what you don't
20 remember?

21 MR. CRAIN: Let's go to tab 37. So this
22 will be Exhibit 11.

1 (Campione Deposition Exhibit 11 marked
2 for identification and attached to the
3 transcript.)

4 BY MR. CRAIN:

5 Q. And this is another e-mail thread between
6 or among you, Dr. Austin, Ms. Danforth, and
7 Ms. Joshi.

8 Do you see that?

9 A. Yes.

10 Q. And it starts -- if you want to go to the
11 bottom, you send out an e-mail at 5:41 p.m. You
12 say, Hi, all -- tell me when you're there.

13 A. Okay.

14 Q. Good? Okay.

15 Hi, all. I have some bad/good news. The
16 step 2 scores aren't what we would like. Turns
17 out the hospitals that do the survey perform very
18 well. The BCMA scores below will likely drop
19 with the methodology changes, though.

20 What's the context of this e-mail?

21 A. So it would have been looking for those
22 quartiles, I'm assuming. Yes, using this

1 quartile suggestion.

2 Q. I see. So this is what we saw --
3 Dr. Pronovost's suggestion?

4 A. Yes.

5 Q. Okay. And what's the bad/good news?
6 What does that mean?

7 A. So it turns out that the hospitals -- a
8 lot of the hospitals doing the survey are doing a
9 really good job with these standards.

10 Q. And so -- oh, so that's the good news;
11 they're doing well?

12 A. Yes.

13 Q. And what's the bad news?

14 A. Bad news is it wouldn't work. It
15 wouldn't be, like, a valid way to assign scores.

16 Q. Why is that?

17 A. Well, if we're trying to represent what
18 performance is like for hospitals not completing
19 the survey, I think it's fair to say they
20 wouldn't be performing like that.

21 Q. Okay. So just so I understand, the chart
22 below -- right? It says CPO -- it says, Measure

1 25thpercentile, mean of bottom quartile, two
2 standard deviations below mean, three standard
3 deviations below mean.

4 Do you see that?

5 A. Yes.

6 Q. And on CPOE it says -- I'm not sure I'm
7 understanding this -- 25th percentile is 100.

8 What is -- is that right? Or am I
9 misunderstanding that? It's pretty high.

10 A. Yeah, maybe there's an error in this.

11 Q. Okay.

12 A. Let me see. I might have used the
13 wrong...

14 Let's see. Mean of bottom quartile --

15 Q. Is that what really -- is it mean of
16 bottom quartile that's the significant number?

17 A. 25th percentile? Yeah, I mean, there's
18 not enough information here to know.

19 Q. To quite tell? Okay.

20 A. Yeah. But the other columns are pretty
21 self-explanatory.

22 Q. Yeah. So the mean of bottom quartile,

1 just to put it in lawyer terms that I can
2 understand, that's taking the bottom quartile of
3 hospitals and finding the mean score, right?

4 A. Yes.

5 Q. Okay. So the mean score for CPOE is 77,
6 right?

7 A. Yes.

8 Q. Do you know what the lowest achievement
9 score is?

10 A. For CPOE? I'd have to look at the
11 scoring methodology.

12 Q. You can take a second and look.

13 A. Yes. It's 15.

14 Q. 15. Okay. So under Dr. Pronovost's
15 proposal, a non-participating hospital would
16 score 77, correct?

17 A. Yes.

18 Q. And under the ultimate methodology, they
19 scored a 15, right?

20 A. Yes. I think he didn't know -- he wasn't
21 familiar with what our data would actually yield.

22 Q. Would you say that difference is drastic?

1 A. Yes. It definitely was not his intent
2 when he made this suggestion.

3 Q. You're saying he wanted it to be lower?

4 A. I think he assumed that it was lower.
5 And judging from the overall attitude of the
6 call, yes.

7 Q. Okay. And on hand hygiene, the mean was
8 49 percent, right? Of the bottom quartile?

9 A. Can you repeat that question?

10 Q. Yeah. For hand hygiene, where you say
11 mean of bottom quartile, under Dr. Pronovost's
12 proposal in the meeting, as you testified to, on
13 the bottom quartile, a non-participating hospital
14 would be assigned a 49, right?

15 A. Yes.

16 Q. And do you know what they were ultimately
17 assigned under limited achievement? It's okay to
18 flip back.

19 A. 15.

20 Q. And for BCMA, the mean of the bottom
21 quartile under Dr. Pronovost's proposal was 87,
22 right?

1 A. Yes. But again --

2 Q. What --

3 A. -- he didn't have these numbers when he
4 made the suggestion.

5 Q. Sure. And what was the ultimate score
6 that was assigned under the methodology adopted?

7 A. 25.

8 Q. Okay. And IPS isn't on here, right?

9 A. No, because it's already being assigned
10 at that point.

11 Q. Going up the e-mail, Dr. Austin responds
12 to you, Alex, would it be easy to look at the
13 same for first-time reporters?

14 Do you have an understanding of why he's
15 asking you that question?

16 A. I think he's saying so you would have to
17 have historical data as well. So if I looked at
18 this past survey and saw -- and limited it to
19 hospitals that were reporting to the survey for
20 the first time, he's asking what would that mean
21 look like.

22 Q. Let me refine the question if I can.

1 This may help.

2 Is he asking you if the numbers using the
3 first-time reporters' means would be lower?

4 A. I think he's curious what they would look
5 like.

6 Q. Does he --

7 A. Because clearly this is not what Peter
8 was after.

9 Q. This is too high?

10 A. Yes.

11 Q. And he's thinking maybe the first-time
12 reporters will be lower, right?

13 A. I -- yeah. They probably would be.

14 Q. And --

15 A. As I testified to earlier.

16 Q. And then he says, We may have to consider
17 the option of just assigning the score for
18 limited achievement, which is actually consistent
19 with how we're approaching IPS.

20 Do you see that?

21 A. Yes.

22 Q. So he's thinking we've got to take it

1 down to the basement, right?

2 A. Yes. So like in that Slack message
3 earlier, I wasn't the mastermind of this. I
4 think these other people were coming to the same
5 conclusions.

6 Q. Everybody is coalescing, in your
7 testimony?

8 A. I would say -- and this is the process
9 I've spoken of before, that it's a collaborative
10 process --

11 Q. Mastermind --

12 A. -- as we look at the different data
13 sources and data.

14 Q. I was going to say mastermind is kind of
15 a loaded word, isn't it?

16 A. Yeah, it is.

17 Q. And then you respond, Not too difficult.
18 I would predict they're just slightly lower.

19 Right? Go to the prior page.

20 A. Uh-huh.

21 Q. And you're responding, you know, it's --
22 tell me what you mean in that sentence.

1 A. Just judging from what the mean was of
2 the first time. It would be similar to that.

3 Q. Okay. And then he responds, Then maybe
4 not worth the effort, right?

5 And why was it not worth the effort?

6 A. Because it would have yielded similar
7 means, and that was not what Peter's intent was.

8 Q. So even though the data was yielding
9 those means, Peter wanted the number to be a lot
10 lower.

11 A. I think that they don't deal with this
12 data day in and day out, and so they don't know
13 what the means really look like. They're just
14 looking at summary statistics.

15 Q. So do you think Dr. Pronovost, Mr. Time
16 Magazine, was looking for data that would fit his
17 assumption about how hospitals were performing,
18 or was he actually trying to assess what the data
19 showed?

20 MS. BLAIR: Objection to form.

21 THE WITNESS: It's -- you know, I don't
22 think it matters what his intent was because at

1 the end of the day, it would go before the expert
2 panel and they could decide if it was fair and if
3 it was valid or not.

4 BY MR. CRAIN:

5 Q. Would it be fair, to use your words, to
6 grade a hospital at 15 if all the data showed
7 that the mean of similar cohorts in the bottom
8 quartile, not even the mean overall but in the
9 bottom quartile, was actually 77, 49, or 87? Is
10 that a fair result?

11 A. Can you repeat the question --

12 Q. Yeah. You said --

13 A. -- but shorter?

14 Q. I'll go back -- oh, sorry.

15 You said the expert panel would decide if
16 it's fair.

17 And just to start, do you have an opinion
18 on what's fair and what's not fair?

19 MS. BLAIR: Objection to form.

20 THE WITNESS: It's up to them.

21 BY MR. CRAIN:

22 Q. Okay. But do you have a view on

1 fairness?

2 A. Yes. I'm a human being.

3 Q. Fair enough.

4 Is it fair to grade hospitals at 15 if
5 the data before you says that the mean of the
6 bottom quartile of hospitals in a similar cohort
7 is 77, 49, or 87?

8 MS. BLAIR: Objection to form.

9 THE WITNESS: I think that this data
10 speaks to the fact that there's, like, two sets
11 of hospitals here, the ones that are completing
12 and the ones that are not.

13 And the ones that are completing, I think
14 the numbers speak for themselves here, that
15 they're performing really well.

16 BY MR. CRAIN:

17 Q. So your expectation is that if the
18 hospitals that were not completing actually
19 completed, their mean would be 15?

20 MS. BLAIR: Objection to form.

21 THE WITNESS: I don't think it would --

22 MS. BLAIR: -- mischaracterizes

1 testimony.

2 THE WITNESS: Not necessarily. I don't
3 think it would be 77, 49, and 87, the numbers
4 that we referenced earlier.

5 BY MR. CRAIN:

6 Q. It would be an order of magnitude lower?

7 A. I think it would be. Yeah.

8 Q. What's the basis of that opinion?

9 A. Just -- I don't know.

10 Q. Okay.

11 A. I just know that's not valid. And I
12 think that was originally addressed to the expert
13 panel, and they clearly had the same opinion.

14 Q. Let's take hand hygiene. Right? So the
15 mean of the bottom quartile was about 50, right?

16 A. Uh-huh.

17 Q. And the ultimate lowest achievement was
18 15?

19 A. Yes.

20 Q. Or was it 25? Let's --

21 A. 15.

22 Q. 15. So it's less than half.

1 Hand hygiene assesses what?

2 A. What I testified to earlier: culture,
3 feedback, so -- observations. And -- what's the
4 other one?

5 Q. Training.

6 A. Training.

7 Q. So is it your view that -- strike that.
8 I'll move on. Bad question.

9 Okay. Let's go back to the e-mail.

10 So I want to go to the top to
11 Ms. Danforth.

12 She said, This is sort of what I was
13 afraid of, but somehow more stark in seeing the
14 actual numbers -- stark seeing the actual
15 numbers. I do think we need to at least
16 consider [sic] --

17 A. Consider.

18 Q. I assume that means consider.

19 -- going to limited achievement.

20 What's she afraid of?

21 A. That the numbers are not -- they're very
22 high --

1 Q. But the --

2 A. -- and inaccurate. And this is the idea
3 that you can't use hospitals that complete the
4 survey as some sort of benchmark or
5 representation of hospitals that don't do the
6 survey.

7 Q. And I just want to be clear: The 15
8 scores that we were talking about, the lowest
9 achievement, are those accurate depictions of
10 performance under the metrics?

11 MS. BLAIR: Objection to form.

12 THE WITNESS: If you don't have data, you
13 don't have data. Those hospitals chose not to be
14 transparent --

15 BY MR. CRAIN:

16 Q. So you don't know --

17 A. -- and provide data.

18 Q. Sorry.

19 So you don't know either way?

20 MS. BLAIR: Objection to form.

21 THE WITNESS: Right. Yeah.

22

1 BY MR. CRAIN:

2 Q. So those hospitals could have just as
3 well been performing on these metrics in the 60s,
4 the 50s, the 30s, the 90s; you have no idea?

5 MS. BLAIR: Objection to form.

6 THE WITNESS: If I leave a section of my
7 test blank in an exam, like, yeah, I could have
8 gotten all of them right, I guess.

9 BY MR. CRAIN:

10 Q. So --

11 A. But if I don't fill them out, then why
12 should I get points for those?

13 Q. So Leapfrog is like an exam?

14 A. It's -- yeah, I guess. It's a survey.

15 Q. But it's voluntary.

16 A. Sure. It's voluntary for me to go to
17 college.

18 Q. That's fair. But if you're in college,
19 it's not voluntary for you to not take the test.

20 A. It is.

21 Q. How is it voluntary if -- I guess you're
22 saying you could just fail.

1 A. Right. I mean, you could leave a section
2 of a survey or a test blank if you wanted to.

3 Q. And --

4 A. You could run out of time.

5 Q. Okay. And does that F communicate that
6 you don't know anything about the subject matter?

7 MS. BLAIR: Objection. Form.

8 MR. CRAIN: You liked that question, Kim.

9 MS. BLAIR: Maybe -- maybe it does.

10 THE WITNESS: I don't -- if I leave a
11 section of the survey empty -- or, sorry, of a
12 test empty, if I do really well on the rest of
13 the test, there's a possibility I could still get
14 an A.

15 MR. CRAIN: Okay. Let's -- are you guys
16 okay on break?

17 MS. BLAIR: I'm fine.

18 MR. CRAIN: Good.

19 MS. BLAIR: You good?

20 MR. CRAIN: We've been going about an
21 hour and 15.

22 MS. BLAIR: Do you want to take a break?

1 THE WITNESS: No, I'm good.

2 MR. CRAIN: Good.

3 MS. BLAIR: It's up to you if you want to
4 take a break. You're in charge.

5 MR. CRAIN: Yeah, you are. I'm not.
6 Okay.

7 THE WITNESS: Maybe in a little bit.

8 MR. CRAIN: So let's go to the next tab.
9 Tab 42. This is Exhibit 12.

10 (Campione Deposition Exhibit 12 marked
11 for identification and attached to the
12 transcript.)

13 (Discussion off the record.)

14 BY MR. CRAIN:

15 Q. Tab 42. So -- do you have that,
16 Ms. Campione?

17 A. Yes, I do.

18 Q. Okay. So I want to go to the bottom of
19 this. And there's an e-mail from -- sorry, not
20 the bottom. The bottom of the first page shows
21 the e-mail. And do you see -- it's an e-mail
22 from Dr. Austin to Dr. Pronovost, cc'ing

1 Ms. Danforth and you.

2 Do you see that?

3 A. Yes.

4 Q. And Dr. Pronovost responds subsequently,
5 I think -- Dr. Austin has to follow up, right?

6 Do you see that?

7 A. Wait. Sorry. What --

8 Q. Do you see Dr. Austin follows up on the
9 7th seeking comments --

10 A. Okay.

11 Q. -- and then, on the 14th, Dr. Pronovost
12 responds?

13 Do you see that?

14 A. Yes.

15 Q. Okay. Now, do you recognize the document
16 that's on page 3? It's Bates ending 202260.

17 A. Yes.

18 Q. Okay. What is the document?

19 A. So this looks like perhaps the text that
20 will end up going in the proposed changes.

21 Q. And does this reflect ultimately the
22 methodology that Leapfrog adopted?

1 A. I will read it.

2 Q. Take a second.

3 A. Okay.

4 Q. And the question I had: Does this
5 reflect ultimately the methodology that Leapfrog
6 adopted?

7 A. No.

8 Q. What's different?

9 A. IPS should have been included in at least
10 the step 1, unless there's some -- yeah. So IPS
11 had a reduction from four rounds to two rounds,
12 and BCMA wasn't going to have step 1 imputation
13 in the first -- for fall 2024 and spring 2025.

14 Q. Got it.

15 A. So there's just some technical things
16 that are incorrect. But generally, yes.

17 Q. Big picture, it's the same.

18 A. Yes.

19 Q. Okay. And this was Dr. Austin sending
20 this to Dr. Pronovost for his review?

21 A. It would appear that way.

22 Q. Do you know whether Dr. Austin sent this

1 to any other members of the expert panel?

2 A. I don't know.

3 Q. Okay. We'll show you one other.

4 To your understanding, if he had sent it
5 to others, would you have been left off those
6 communications?

7 A. I mean, he may or may not have included
8 me. I mean -- but eventually, it has to find its
9 way into the proposed changes, which I'm
10 drafting. So either way --

11 Q. Got it.

12 A. -- however he goes about it is fine.

13 Q. So eventually, if folks had comments,
14 they would come back to you?

15 A. Yes.

16 Q. Okay. I want to go now to tab 48. Okay.
17 (Campione Deposition Exhibit 13 marked
18 for identification and attached to the
19 transcript.)

20 BY MR. CRAIN:

21 Q. And this is Exhibit 13.

22 So I want to start with the bottom

1 e-mail. This is another thread. This one, just
2 like the last one, is Dr. Austin to, this time,
3 Dr. Romano, cc'ing you and Ms. Danforth.

4 Do you see that?

5 A. Yes.

6 Q. And he says, Patrick, since our
7 conversation with you a couple of weeks ago about
8 changing the imputation approach used in
9 Leapfrog's hospital safety grade, we met with the
10 broader expert panel to hear their input and I've
11 drafted the attached language to share with the
12 hospitals about the proposed changes.

13 Just triangulating ourselves, the meeting
14 a couple of weeks ago, was that -- are you with
15 me?

16 A. Well, this is May 7th and that was
17 May 14th. So...

18 Q. Look at the bottom e-mail. The middle
19 e-mail from Dr. Austin to --

20 A. Oh, okay. I see.

21 Q. Do you see that?

22 A. Peter offers -- okay. I see now. Okay.

1 Q. Yeah. Peter responds on the 14th.

2 A. Okay.

3 Q. But Dr. Austin follows up on the 7th.

4 So he also e-mails Dr. Romano on the 7th,
5 right?

6 A. Okay.

7 Q. And he says, Since our conversation with
8 you a couple of weeks ago.

9 Is that referring to the 30-minute
10 meeting we talked about from April 12th?

11 A. It could.

12 Q. Are you aware of any other meeting it
13 could be?

14 A. I'm not aware.

15 Q. Did you have any other meetings with
16 Dr. Romano?

17 A. No, I did not.

18 Q. Okay.

19 A. No.

20 Q. We met with the broader expert panel.

21 And again, that's the April 12th meeting?

22 A. Yes.

1 Q. To hear their input and I've drafted the
2 attached language to share with the hospitals
3 about the proposed changes. In the attached, I
4 believe you will see that we have found a path
5 forward that still uses a hospital's unique
6 historical data, when available, although for
7 shortened time, and, when historical data are not
8 available, creates an incentive for hospitals to
9 share information about their patient safety
10 practices.

11 There's no third clause. He's missing
12 an "and."

13 Do you see that as well?

14 A. Yes.

15 Q. Okay. So we have on May 7th Dr. Austin
16 sending this document to Dr. Romano and
17 Dr. Pronovost.

18 A. Right.

19 Q. Are you aware of him sending it to
20 anybody else?

21 A. No. I mean, like I said before, I
22 wouldn't -- he could do it and I wouldn't know.

1 Q. Okay. So then on the 14th, if you go
2 back to the prior document, Dr. Pronovost
3 responds and gives his comments, right?

4 A. Okay.

5 Q. And then Matt Austin follows up with
6 Patrick -- go back to the -- Exhibit 13. I'm
7 sorry for the toggling.

8 And he says, Patrick, if helpful to your
9 review, Peter offered some suggested edits to
10 clarify the concept of imputation. Thanks for
11 any feedback you may have on this communication
12 to hospitals.

13 Do you see that?

14 A. Yes.

15 Q. And then Patrick responds and he says,
16 Thank you for sharing. I like the simpler and
17 more direct approach here. If the goal is to
18 penalize non-participants, you might as well do
19 so in a clear and unmistakable manner while
20 allowing for hospitals to manage their burden and
21 jump back on the wagon after a year. This
22 approach is certainly much easier to implement

1 and more straightforward that -- presumably
2 "than" -- the step 2 imputation that you folks
3 originally proposed in that the consequences of
4 non-response will become readily apparent.

5 Now, the step 2 imputation that you folks
6 originally proposed, is he referring to what you
7 discussed with him on April 12th?

8 A. Yes. This makes a lot of sense.

9 Q. Tell me why.

10 A. Because -- so when we met with him, we
11 were proposing to get rid of step 1 altogether.
12 And like your e-mail showed before, step 1, that
13 was, like, a concern of ours. We presented
14 step 2B where we're using the mean of the first
15 score.

16 We presented that to him, and he thought
17 it was a little too complicated if the goal here
18 is just to ensure that these hospitals aren't
19 assigned -- these non-participants aren't
20 assigned a, like, inaccurate score.

21 Q. Just to be clear, he says the goal is to
22 penalize non-participants.

1 A. Uh-huh.

2 Q. Right? You said a different goal there.

3 A. I mean, I don't agree with his
4 characterization of this, the goal is to penalize
5 non-participants. I absolutely don't agree with
6 it.

7 But I think that the heart of what he's
8 saying here is you need a simpler, more direct
9 approach that's easy for hospitals to understand
10 and the public to understand.

11 Q. I just want to stop you before we go down
12 the rest of the document. Let's look at the top
13 e-mail.

14 A. Uh-huh.

15 Q. Because you said I absolutely don't
16 agree? Is that what you said?

17 At the top, you said, I completely agree.

18 A. Yeah. I completely agree with a simpler
19 and more direct approach here.

20 Q. Okay. So you completely agree with part
21 of his e-mail?

22 A. I completely agree with the first

1 statement. I like the simpler and more direct
2 approach here.

3 Q. Okay. So which statements in here do you
4 disagree with now?

5 A. I don't agree that we're doing this for
6 the goal to penalize non-participants. I don't
7 agree with that characterization. But then
8 everything else after that I think is clear. I
9 mean, we want to be transparent about what we're
10 doing, and taking the mean of the bottom quartile
11 and trying to find what we're after is not clear.
12 And taking the mean of the first scores, it's not
13 accurate.

14 So I -- at the end of the day, I think
15 it's just better that we do something in a clear
16 way.

17 Q. Okay. So you completely agreed with his
18 e-mail before, but now you partially agree?

19 MS. BLAIR: Objection to form.

20 THE WITNESS: I mean...

21 BY MR. CRAIN:

22 Q. It's a yes or no question.

1 A. I didn't say there I completely agree
2 with your entire e-mail, did I? I said I
3 completely agree.

4 Q. Period.

5 A. Period.

6 Q. Okay. I'll take that.

7 A. I completely agree with the gist of his
8 e-mail.

9 Q. The gist of his e-mail? And what is the
10 gist of his e-mail?

11 MS. BLAIR: Objection to form. Asked and
12 answered.

13 THE WITNESS: I like the simpler and --

14 MR. CRAIN: She said it.

15 THE WITNESS: -- more direct approach
16 here.

17 BY MR. CRAIN:

18 Q. The gist of his e-mail is not the goal
19 should penalize non-participants?

20 A. I don't think so. If you read the rest
21 of the e-mail, it --

22 Q. Let's go through it.

1 A. -- it's getting into other stuff.

2 Q. Yeah. Okay. I corrected a couple of
3 typos and peers' edits and suggested rephrasing
4 of one sentence.

5 Presumably you don't disagree with that.

6 As I mentioned earlier, your step 2B
7 proposal would have led to lower imputed
8 estimates, but not more accurate imputation.

9 A. Right.

10 Q. Okay. You agree with that?

11 A. Yes.

12 Q. Okay.

13 I find no reason to believe, and you
14 didn't present any evidence to suggest, that a
15 hospital's unreported data from the current year
16 is better approximated by its cohort mean from
17 the first year of reporting than by its current
18 cohort mean.

19 Do you agree with that?

20 A. Yes, I do. And after reading that, I
21 was, like, yeah, I do. And I've always felt that
22 way. If you have data from the hospital, it's

1 best to use it. But at a certain point, it
2 expires.

3 Q. Okay.

4 The underlying hypothesis behind your
5 proposed step 2B approach was that hospitals stop
6 reporting because their true performance
7 deteriorated.

8 Do you agree that's your hypothesis?

9 A. I think it's part of it.

10 Q. What's the other part?

11 A. Well, I mean, there's a number of reasons
12 that you could stop reporting.

13 Q. Give me some.

14 A. Your true performance deteriorated. You
15 didn't like what your scores were. You'd rather
16 use those step 2 means.

17 Q. I noted you didn't -- well, let's keep
18 reading. You didn't say his hypothesis.

19 My hypothesis -- this is Dr. Romano -- by
20 comparison was that most hospitals stop reporting
21 because it is too burdensome and because they
22 only find market value in an A grade, which

1 proves impossible to attain or maintain.

2 Do you see that?

3 A. I.

4 Q. And do you --

5 A. I don't agree with that, his hypothesis.

6 Q. You disagree with his hypothesis?

7 A. Yeah. No, I don't really agree with that
8 part.

9 Q. Okay. Even though you wrote back, "I
10 completely agree."

11 A. Right. I didn't.

12 Q. You didn't call him afterwards and say,
13 Dr. Romano, you got this wrong?

14 MS. BLAIR: Objection to form.

15 THE WITNESS: Yeah, I don't think that
16 that is what that means. But...

17 BY MR. CRAIN:

18 Q. What means?

19 A. I don't think that when you say, oh, I
20 completely agree with you, like, you're saying
21 every example you gave, every, you know,
22 description -- like that's not what that e-mail

1 was meant --

2 Q. Okay.

3 A. -- to do.

4 Q. If my hypothesis is correct, then the
5 current step 2 approach (current cohort mean)
6 would yield more accurate imputations, but it
7 doesn't achieve your strategic objective of
8 penalizing non-participants.

9 Agree or disagree?

10 A. I disagree with that.

11 Q. All --

12 A. Because he's saying, again, that it's
13 kind of -- going back to the goal is. He's
14 making the assumption that the goal is to -- and
15 I don't think that's the goal.

16 Q. Okay. So you don't think that's the
17 goal. So you disagree --

18 A. I think the goal is to not assign these
19 scores that -- give them points that they don't
20 deserve.

21 Q. How do you know they don't deserve them?

22 MR. CRAIN: You like that question.

1 THE WITNESS: We don't have data that we
2 don't have.

3 BY MR. CRAIN:

4 Q. So you don't know whether they deserve
5 them.

6 MS. BLAIR: I'm just going to object to
7 form.

8 THE WITNESS: Right.

9 BY MR. CRAIN:

10 Q. Okay. In other words, I wasn't keen on a
11 back-door approach to penalizing
12 non-participation. If you want to penalize
13 non-participants, then don't pretend you are
14 imputing missing values in a statistically
15 optimal way. Just be honest about your goal.

16 A. Oh -- see, I agree with that. I probably
17 ended this -- the e-mail, read that sentence, and
18 was, like, yeah.

19 Q. We love honesty. Okay.

20 You don't agree now with the prior
21 sentence, correct?

22 A. No, I don't agree -- just be honest about

1 your goal. I think we perfectly were in our
2 proposed changes of -- it's all laid out there.
3 In other words, don't keep -- back-door approach
4 to penalizing -- like, I -- it just if you want
5 to penalize non-participants, the last part, then
6 don't pretend that you're imputing missing values
7 in a statistically optimal way. Because it
8 wasn't a statistically optimal way anymore.

9 Q. What wasn't --

10 A. That mean value was not representative.

11 Q. And the new value was?

12 A. I don't think there's a perfect way to do
13 it. You don't have data that you don't have.
14 And at the end of the day, 80 percent of
15 hospitals are doing our survey and are committed
16 to that, and it's not fair to them to just be
17 giving points out willy-nilly for hospitals that
18 are choosing not to do the survey because they
19 want to get a different score.

20 Q. Because to your point in the Philadelphia
21 Inquirer, it's a tremendous effort to do the
22 survey, right?

1 MS. BLAIR: Objection to form.

2 THE WITNESS: Define "tremendous."

3 BY MR. CRAIN:

4 Q. Well, it's your words from the article.

5 A. Can I define "tremendous"?

6 Q. Absolutely.

7 A. Okay. I think reasonable and it's not
8 something that you can just, like, flip through
9 and fill out in an hour. I think 80 hours is
10 tremendous effort.

11 Q. Okay. I want to go back to something you
12 said about this e-mail.

13 You said that you were agreeing with the
14 gist, right? Do you recall that testimony?

15 A. Yes.

16 Q. He, I think four times, says that the
17 goal is to penalize non-participants.

18 Why is that not the gist of this e-mail?

19 A. That's not the gist I took.

20 Q. What is the gist you took?

21 A. A simpler and more direct approach here.

22 The -- imputing missing values is not

1 statistically optimal.

2 There's really -- it's a tough situation
3 here where -- and I can relate to how he's a data
4 guy and you want to come up with, like, the most
5 accurate and everything. But the safety grade
6 is, like, a living, breathing thing that is being
7 assigned twice a year, so it's just not possible.

8 Q. And were you surprised that he thought
9 that the goal was to penalize non-participants?

10 A. Again, I wasn't agreeing with that.

11 Q. But were you surprised?

12 A. To hear that he was saying -- I wouldn't
13 say in that meeting, that 30-minute meeting we
14 had with him the other day, that's not what was
15 being said. I think he's just saying -- he's
16 talking -- he's trying to get to the point -- or
17 something. I don't know.

18 Q. Do you have any understanding of why he
19 thought that?

20 A. He is an independent person and he's very
21 smart, and he's just doing his own analysis and
22 his own conclusions.

1 Q. But you don't have an understanding of
2 why he came to that conclusion?

3 A. No. That's not the language we were --
4 that was even being used at all in that meeting
5 that we had with him. And the expert panel
6 meeting, that wasn't -- no one said that's the
7 goal. If you look at the slides, that doesn't
8 say that was the goal of this thing.

9 Q. No one talked about penalizing
10 non-participants during the meeting?

11 A. I mean, it's how you define "penalizing."
12 I think -- the goal is to not give them data that
13 is not deserved. Points that are not deserved.

14 Q. You know what I'm going to ask now,
15 though. How do you know whether it's deserved?

16 A. Hmm. Asked and answered.

17 Q. Withdrawn. I'll go with your prior
18 answer.

19 MR. CRAIN: Should we take five?

20 MS. BLAIR: Yes.

21 VIDEO TECHNICIAN: The time is 3:21 p.m.
22 This ends unit 4. We're off the record.

1 (A recess was taken.)

2 VIDEO TECHNICIAN: The time is 3:37 p.m.
3 This begins unit number 5. We're on the record.

4 MR. CRAIN: Thank you.

5 (Campione Deposition Exhibit 14 marked
6 for identification and attached to the
7 transcript.)

8 BY MR. CRAIN:

9 Q. So we're going to look at what's been
10 marked as Exhibit 14.

11 Ms. Campione, do you have in front of you
12 an e-mail from Ms. Binder?

13 A. Yes.

14 Q. Okay. And who is Leah Binder?

15 A. She is the CEO of The Leapfrog Group.

16 Q. When did you first meet Ms. Binder?

17 A. I don't know, maybe a month after joining
18 Leapfrog.

19 Q. And you didn't interview with her, you
20 said.

21 A. No.

22 Q. What's your view of her personality?

1 A. She is a strong independent woman.

2 Q. Okay. That sounds good.

3 Let's go to the back of this document.

4 If you look at page 3 -- it's 9813.

5 So this is an attachment to the e-mail?

6 A. Yes.

7 Q. And what is this document?

8 A. So this document is the proposed changes
9 that were eventually published publicly. And
10 she's just providing some edits.

11 Q. Is this the same document that Dr. Austin
12 asked Dr. Pronovost and Dr. Romano to edit?

13 A. They were working on the actual -- it
14 was, like, the excerpt that actually includes the
15 actual methodology changes.

16 Actually, maybe it has some other stuff
17 in there, too. But they kind of created the
18 bones of it. And I'm not sure -- I would --

19 Q. So it's different --

20 A. I haven't, like, compared it sentence to
21 sentence.

22 Q. Okay. Fair enough. Fair enough.

1 And -- so if we go back to Ms. Binder's
2 e-mail -- or let's start with yours.

3 You say, Hi, Leah. We have finalized the
4 changes to the imputation methodology. Both
5 Peter and Patrick have reviewed and signed off on
6 the messaging.

7 Does that refresh your recollection as to
8 whether they had edited at least some part of
9 this document?

10 A. Yes.

11 Q. Okay.

12 Can you review and send back with any
13 feedback by COB Tuesday, 5/21? We want to
14 publish it ASAP so hospitals can be prepared to
15 take the survey if they are considering skipping.

16 Do you see that?

17 A. Yes.

18 Q. So you want to publish it quickly because
19 the deadline is coming up?

20 A. Yes. And we want to give them adequate
21 time to prepare to actually take the survey.

22 Q. And you're anticipating that these

1 changes will prompt additional people to
2 participate?

3 A. Well, I mean, if I'm a hospital that
4 takes it every three years, because of the
5 current step 1 imputation, we want to give them
6 the opportunity to report other data and not
7 spring this on them. So if they would like to
8 complete the survey as they have in the past, we
9 want to give them sufficient time to prepare.

10 Q. And so, to use your hypothetical, if
11 you're a hospital that takes off every three
12 years, under the new methodology, you just get
13 limited achievement, right?

14 A. Well, you might change to do it every two
15 years.

16 Q. Okay.

17 A. If that's your -- the game you play.

18 Q. Got it. Okay. But if they do nothing in
19 response, in your hypothetical, then they'll just
20 get limited achievement?

21 A. Right.

22 Q. And so going back to the top, Ms. Binder

1 writes back to you, cc'ing Ms. Danforth and
2 Dr. Austin, and says, Hi, Alex. Here it is with
3 some tweaks, mostly moving a few things around
4 for clarity. And a document of two pages doesn't
5 need an appendix, so just call it table 2.

6 I think we've all gotten edits like that.

7 I don't think we need the sentence about
8 influencing survey participating and giving
9 people confidence in validity.

10 Do you recall what she's referring to
11 there? And feel free to look back at the
12 document. I think it's at the end of
13 paragraph 2.

14 A. Okay. Yes. I included that because I
15 like it. It gives context to how hospitals that
16 were, you know, doing certain things with the
17 survey, playing this game or whatever, were
18 biasing the results.

19 Q. So you disagreed with her edit?

20 A. No. I mean, she's just -- it's the
21 overall messaging. She had a different goal.

22 Q. Let me --

1 A. There's a hundred different ways to say
2 the same thing.

3 Q. Yeah. Let me adapt the question.

4 You liked what you had proposed but you
5 were fine with her edit.

6 A. Yeah.

7 Q. She says, then, It sounds defensive.
8 Do you agree with that?

9 A. I mean, it's -- I don't speak for
10 Leapfrog. Ultimately, this document is going to
11 be an official Leapfrog document. It doesn't
12 matter how I feel about it and, you know, if I
13 was a hospital, how I'd like to hear it versus
14 her. I think it's all opinion.

15 Q. But just to be clear, you're an employee
16 of Leapfrog.

17 A. Yes. And I'm not a comms person. So...

18 Q. Okay. But you have spoken about Leapfrog
19 to reporters at least five times every six
20 months, right?

21 A. Yes.

22 Q. Okay. So she says, It sounds defensive,

1 like nobody participates in the survey, and our
2 own TEP questions our validity.

3 What is the TEP? It is expert panel,
4 with some T?

5 A. I'm not going to speculate on what she
6 meant there.

7 Q. Okay. That's not an acronym you're
8 familiar with?

9 A. No.

10 Q. Okay. Do you agree that it sounds like
11 nobody participates in the survey and our own --
12 something -- questions the validity?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: Can you repeat the
15 question?

16 BY MR. CRAIN:

17 Q. Yeah. Do you agree with her -- she says,
18 It sounds defensive -- and referring to that
19 sentence she struck -- like nobody participants
20 in the survey, and our own TEP questions our
21 validity.

22 A. I mean, that's, like, her opinion.

1 Q. Okay. Do you share --

2 A. No, I thought the sentence didn't do
3 that. But...

4 Q. Okay. And to be clear, she does not want
5 to convey that message, right?

6 MS. BLAIR: Objection to form.

7 BY MR. CRAIN:

8 Q. To your understanding.

9 A. Well, it's not true, so --

10 Q. Okay.

11 A. -- no, she wouldn't want to.

12 Q. And why do you think it's not true?

13 A. Because we just had Peter sign off on it
14 and Patrick sign off on it.

15 Q. So two members on the panel.

16 A. And everyone else on the panel was
17 agreeing with it in that general direction.

18 I don't know what Matt did after that
19 point, but it's not true.

20 And if Patrick was the most -- was
21 against it, as we saw from the last e-mail, or
22 initially, and was open for debate, he's now come

1 around, and so that wouldn't be fair.

2 Q. Okay. And just to be clear, though,
3 you're aware of no document by which the other
4 members of the panel besides Romano and Pronovost
5 expressly agreed to this change.

6 A. No. But I do know that they will receive
7 the proposed changes later. And once again, I'll
8 remind you, it's not final. They're proposed.

9 Q. Okay. Because you're seeking comment,
10 right?

11 A. Yes.

12 Q. Okay. And she says, Anyway, it's not
13 necessary to get into the why. It's enough that
14 the expert panel advised us to do the imputation
15 in a different way and not treat older, better
16 data in an equivalent way to new data.

17 Is this sentence accurate?

18 A. The expert panel advised us to do the
19 imputation in a different way?

20 Yes.

21 Q. Who on the expert panel advised you to do
22 imputation in a different way?

1 A. Well, you'll have to watch the meeting.
2 I don't know.

3 Q. Okay. You don't know.

4 A. I don't know exact names. But...

5 Q. Okay. But your only knowledge of where
6 somebody may have advised Leapfrog to do
7 imputation in a different way is that meeting?

8 A. Yes. And any commun- -- or I guess --
9 you're saying to my knowledge. I mean, I guess
10 there's --

11 Q. Yeah, there's the --

12 A. -- the additional communications that
13 were...

14 Q. Yeah, let me fix the question.

15 A. Okay.

16 Q. It was confusing.

17 Are you aware of any other meeting or
18 communication through which the expert panel may
19 have advised you to do the imputation in a
20 different way?

21 A. No.

22 Q. Okay. Then she says, I think when we

1 respond to the public comments, we can be more
2 pointed and specific about the survey and
3 imputation reasoning if necessary. The comments
4 will give us a good gauge on the extent to which
5 we need to reveal all our reasoning and whether
6 the expert panelists will truly stand up for it
7 when push comes to shove.

8 Do you see that?

9 A. Yes.

10 Q. What does she mean there when she says --
11 to your understanding, when she says, We need to
12 assess whether we will reveal all our reasoning?

13 A. I mean, it really doesn't matter what I
14 think. She sent back the edits and I'm going to
15 go -- we're going to go publish them. I mean,
16 it's -- I don't know.

17 Q. You've said earlier today that one of
18 Leapfrog's -- and correct me if I'm wrong, but
19 one of Leapfrog's goals or missions is
20 transparency, right?

21 A. Uh-huh.

22 Q. Is this consistent with transparency?

1 A. She's saying that when the public
2 comments come in, we can with be more pointed and
3 expound.

4 But I think that what she's trying to do
5 is not give a whole preamble. She wants to make
6 sure the proposed changes really contain proposed
7 changes and keep that to a minimum. I don't
8 think that's trying to not be transparent.
9 That's trying to make sure that we're not
10 influencing people's opinions. We're going to
11 let them see the proposed changes.

12 Q. So she wants them to comment on the
13 proposed changes without the underlying
14 rationale, right?

15 A. That's what it sounds like. She feels
16 that there's enough there.

17 Q. And do you have any understanding -- the
18 last clause -- The comments will give us good
19 gauge on the extent to which we need to reveal
20 all our reasoning and -- this is the part I want
21 you to focus on -- whether the expert panelists
22 will truly stand up for it when push comes to

1 shove?

2 A. I mean, I don't know what she means
3 there. You'll have to ask her.

4 Q. Okay. You have no independent
5 understanding?

6 A. No.

7 Q. Okay.

8 A. It doesn't have anything to do with how I
9 do my job.

10 Q. Okay. If you can go to her edits on
11 page 9814. And predominantly, she makes changes
12 to paragraphs -- it looks like 2 and 3 are the
13 biggest.

14 Do you see that?

15 A. Yes.

16 Q. And her edits say, To ensure the hospital
17 safety grade methodology continues to support
18 these goals -- and we can go back and look at the
19 goals in a second -- Leapfrog's blue ribbon
20 expert panel and researchers at John Hopkins
21 Medicine annually review the scoring methodology.
22 The panel -- she changed "recognized" to

1 "advised" -- that Leapfrog modify the current
2 imputation method.

3 What's your understanding of that change
4 there?

5 A. Are you asking me what her intent was
6 with making those changes? Because you would
7 have to ask her.

8 Q. I'm asking you which word is more
9 accurate, "recognized" or "advised"?

10 A. Well, actually, the two words -- the
11 three words that she adds to that sentence kind
12 of make it a different sentence.

13 Q. How so?

14 A. Well, it's just -- it's a different
15 statement. It's not wrong, but it's a different
16 statement. So I don't think that you can look at
17 it in a vacuum of changing "recognized" to
18 "advised."

19 Q. So the first sentence was, The panel
20 recognized that the current imputation method,
21 which is used to fill in missing data among
22 hospitals that did not complete the most recent

1 survey -- is that sentence --

2 MS. BLAIR: Objection to form. You
3 didn't read the whole sentence.

4 MR. CRAIN: Yeah, yeah, fair enough.
5 I'll keep going.

6 BY MR. CRAIN:

7 Q. Let me start at the beginning.

8 The panel recognized that the current
9 imputation method, which is used to fill in
10 missing data among hospitals that did not
11 complete the most recent survey, have influenced
12 hospital survey participation and may no longer
13 be valid.

14 A. Yes. That is reflective of what was said
15 in the expert panel meeting.

16 Q. So that's accurate?

17 A. Uh-huh.

18 Q. Okay. The revision is, The panel advised
19 that Leapfrog modify the current imputation
20 method which is used to fill in missing data
21 among hospitals that did not complete the most
22 recent Leapfrog survey.

1 Is that accurate?

2 A. I think that's a more concise way of not
3 going into details. And her e-mail says the
4 reason why she did it; she didn't feel like we
5 needed to be giving background on why we did it.

6 Q. So you don't think there's any difference
7 between the panel recognizing something and the
8 panel proactively advising something?

9 A. Well, they're just saying something
10 different. Like, if this -- I could write the
11 same thing that she did in that one sentence by
12 using my whole sentence, expounding, and then add
13 in another sentence later on. But you can see
14 she cut out other places in the next paragraph.

15 So I think that someone would have to
16 read the entire section or the entire proposed
17 changes with her edits then after, then they can
18 come to their own conclusions, but I don't think
19 that what you're implying is what's happening
20 here.

21 Q. What am I implying?

22 A. You're implying that it's, like, she

1 changed it from "recognized" to "advised."

2 Q. Well, she did change it from "recognized"
3 to "advised."

4 A. And that's it.

5 Q. What's the implication?

6 A. Well, it just becomes a different
7 sentence that we've said elsewhere. I mean,
8 like, one would be saying, like, oh, they -- I
9 mean, but at the end of the day, it's true, so
10 what does it matter?

11 Q. When did the panel advise Leapfrog to
12 change the methodology?

13 A. When did the panel advise Leapfrog? In
14 the expert panel meeting where everyone said,
15 yeah, this isn't fair that these hospitals are
16 getting assigned this mean.

17 Q. Okay.

18 MR. CRAIN: Let's go to tab 55.

19 Okay. We're going to go to another
20 exhibit.

21

22

1 (Campione Deposition Exhibit 15 marked
2 for identification and attached to the
3 transcript.)

4 BY MR. CRAIN:

5 Q. So this is an e-mail thread between you,
6 Dr. Austin, and Ms. Danforth.

7 Do you see that?

8 A. Yes.

9 Q. And if you go to the bottom, it's the
10 same e-mail that we saw before where you were
11 sending Ms. Binder the finalized changes to the
12 imputation methodology both Peter and Patrick
13 have reviewed.

14 Do you see that?

15 A. Yes.

16 Q. And then -- it's the e-mail where
17 Ms. Binder conveys her comments above that on
18 May 17th.

19 Do you see that?

20 A. Yes.

21 Q. And then Ms. Danforth forwards it to
22 Dr. Austin, right?

1 A. No. He was cc'd on the e-mail before.

2 Q. Oh, sorry, you're right. Yes.

3 So she sends it back to him and drops
4 Ms. Binder, right?

5 A. Yes.

6 Q. Okay. Sorry, I didn't -- I missed that
7 it wasn't a forward.

8 And she says, Hi, Matt. Since she mostly
9 updated the parts Peter and Patrick helped with,
10 you can take a look and let us know if you have
11 any concerns. We'd love to get this out Monday
12 or Tuesday next week.

13 Do you see that?

14 A. Yes.

15 Q. In what capacity is she asking him to
16 weigh in on his concerns?

17 A. Well, I think that she is -- she's
18 saying, do you think that this -- even with her
19 taking out those sentences, do you think that
20 this is still representative of how Peter and
21 Patrick felt?

22 And, you know, we've talked about earlier

1 about how Matt really is the go-to between us and
2 the expert panel. We meet with him occasionally,
3 tell him our input, you know, make suggestions.
4 But at the end of the day, Matt really is the
5 in-between, and he kind of represents them and
6 makes sure their opinions are heard.

7 So she's just making sure that the
8 document as a whole is still representative of
9 their -- what they wanted to convey.

10 Q. So then he responds, My only note is the
11 "why" has been edited out of the explanation, so
12 you don't really explain why this change is being
13 done, but it reads fine. No concerns.

14 Do you see that?

15 A. Yeah. And that's what Leah said she was
16 doing. She said that we didn't need to explain
17 anymore. So...

18 Q. So my question on no concerns --

19 A. Uh-huh.

20 Q. -- is it your testimony that him
21 conveying no concerns is a statement from the
22 expert panel, essentially?

1 A. No, I wouldn't say that's literally what
2 that means.

3 Q. Is he speaking for the expert panel in
4 his capacity here?

5 A. No. Missy asked him if this was --
6 what's the word? If this was still -- if this
7 was in contrast to the original e-mail that he
8 had with them, two e-mails. And he said he has
9 no concerns.

10 Q. Well, she asked -- she didn't ask if it's
11 in contrast. She said, Let us know if you have
12 any concerns.

13 Right?

14 MS. BLAIR: Objection to form.

15 THE WITNESS: Yeah, I think that's
16 implied there.

17 BY MR. CRAIN:

18 Q. How do you know that's implied?

19 A. She said, since you took out these parts,
20 can you take a look and let us know if that's of
21 concern.

22 Q. Okay. So you think she's not asking him

1 for his independent view; she's asking him for
2 his views of what Patrick and Peter might think?

3 A. She's asking if it conflicts and -- in my
4 opinion. And so I think you should ask her what
5 she meant.

6 Q. Okay. Now, he also says, My only note is
7 the "why" has been edited out of the explanation,
8 so you don't really explain why this change is
9 being done.

10 Do you see that?

11 A. Yes. So the explanation has been
12 removed.

13 Q. Yeah. And is that ultimately what was
14 published?

15 A. Yes.

16 Q. So there was no "why" in the published
17 version?

18 A. Yes. She -- her opinion was that the
19 "why" should come later, but she didn't say the
20 "why" shouldn't come.

21 Q. When did the "why" come?

22 A. When we responded to public comments.

1 Q. Got it. Well, let's go to those.

2 MR. CRAIN: Tab 77. So this is
3 Exhibit 16.

4 (Campione Deposition Exhibit 16 marked
5 for identification and attached to the
6 transcript.)

7 BY MR. CRAIN:

8 Q. Okay. So this is a document Bates ending
9 8623. And the top e-mail is from you.

10 Do you see that?

11 A. Yes.

12 Q. Do you recognize this document?

13 A. Yes. It looks like I've summarized
14 public comments that came in from our help desk,
15 and I've provided them here for Missy if she
16 wants to review them. I've color-coded it to
17 pull out themes. And then I addressed them in
18 responses in another attachment in the proposed
19 changes, and she's going to review them.

20 Q. Great. So let's go through a few of
21 these. And I think we only have this
22 black-and-white version. So it's a little

1 tricky.

2 MR. CRAIN: We may ask for a color
3 version.

4 MS. BLAIR: Sorry.

5 BY MR. CRAIN.

6 Q. So the -- against themes color coding,
7 can you -- the top two I can see. Can you try to
8 decipher the bottom two?

9 A. They've been redacted.

10 Misrepresents performance. More time.
11 Do not penalize hospitals for -- they're saying,
12 please don't penalize hospitals for not
13 completing a resource-intensive survey. Keep
14 them separate or allow hospitals to opt out.

15 And then, of course, I can't read the
16 last one.

17 Q. Yeah. I actually think it's highlighted,
18 not redacted. I think it's the --

19 A. I know, I know. It's not redacted, for
20 the record. Just joking.

21 Q. Transparency, transparency.

22 A. Yes.

1 Q. So these -- the first three, and then
2 whatever the fourth says, are your sort of
3 synthesis of the comments you saw?

4 A. Yes.

5 Q. Okay. And if you look later in the
6 document -- we can maybe look at some of the
7 documents later -- some of the comments in a
8 separate document where it will be more visible.

9 But if you go to 78628. And -- actually
10 go to 29.

11 Do you see where it says, Responses to
12 public comments?

13 A. Yes.

14 Q. Did you write this document?

15 A. I drafted this. Yes.

16 Q. Okay. And just walking through, I have a
17 couple of questions.

18 If you go -- so you have four
19 commentators supported the change to the
20 imputation methodology.

21 Then you have two commentators -- I'm
22 just looking at the bold -- two commentators

1 expressed concerns about step 2 imputation
2 misrepresenting the current procedures or
3 infrastructures -- infrastructure of the hospital
4 to the public.

5 Do you see that?

6 A. Yes.

7 Q. Did you disagree with those comments?

8 A. Do I disagree with those comments? What
9 is -- like, generally? This day? Then?

10 Q. So let's -- fair enough.

11 At the time, did you disagree that the
12 step 2 imputation could misrepresent the current
13 procedures or infrastructure at the hospital to
14 the public?

15 A. I mean, this is kind of the same question
16 we've been getting here. And I think -- I mean,
17 it's really tough to say. I mean, I would -- I
18 think that the other way grossly misrepresented
19 more. I think there's always going to be some,
20 you know, situation where it isn't perhaps how
21 they're performing but -- or what structures they
22 have in place.

1 But at the end of the day -- and I think
2 we address that here -- is they should complete
3 the survey if they want to get points for the
4 processes they have in place.

5 Q. And you said the other way. Is that the
6 bottom quartile or the prior imputation method?

7 A. Sorry. Now I'm confused.

8 Q. Yeah. You said -- let's see.

9 You said, oh, I think that the other way
10 grossly misrepresented more.

11 Which was the other way you're referring
12 to there?

13 A. In my opinion, both.

14 Q. Okay. The quartile also misrepresents?

15 A. Yes.

16 Q. Okay. So the only thing that properly
17 represents the structure and procedures -- the
18 infrastructure or procedures of a hospital to the
19 public is limited achievement for
20 non-participating hospitals?

21 A. I think there's no perfect way, and
22 that's what we've landed on here.

1 Q. Is there any risk that limited
2 achievement misrepresents the current procedures
3 or infrastructures of a hospital to the public?

4 A. I think misrep- -- I mean, I think, at
5 the end of the day, it's all publicly available
6 methodology, and anyone could look at it,
7 consumers or hospitals. And so as long as we're
8 publishing it publicly, we're not
9 misrepresenting.

10 Q. Where on the website is it published?

11 A. Beneath -- anytime imputation is used
12 it's shown.

13 Q. What is shown?

14 A. A statement.

15 Q. A statement that says a score has been
16 imputed?

17 MS. BLAIR: Objection to form.

18 THE WITNESS: No, it doesn't say that.

19 It says --

20 MR. CRAIN: We can look at it.

21 Let's go to tab 137. Exhibit 17.

22

1 (Campione Deposition Exhibit 17 marked
2 for identification and attached to the
3 transcript.)

4 BY MR. CRAIN:

5 Q. So this is the West Boca Medical Center
6 hospital safety grade page; is that right?

7 A. Yes.

8 Q. And West Boca Medical Center you
9 understand is one of the plaintiffs in this case?

10 A. Yes.

11 Q. So was this the page you're referring to
12 where you said it's showing what the methodology
13 is?

14 A. Well, not this particular page because
15 it's a web page, and on a web page you can scroll
16 down.

17 Q. Yes. So let's go -- let's go through the
18 document.

19 Where on this document, which I will
20 represent to you is a PDF printout of that web
21 page --

22 A. Uh-huh.

1 Q. -- where does it disclose the
2 methodology?

3 A. Well, if I look at this hospital score of
4 15*, I would wonder why the asterisk is not [sic]
5 there, and I would use my eyes to go down to 4
6 and see that it says, The hospital declined to
7 report their performance on this measure, so a
8 score was assigned to reflect the lack of
9 information available.

10 Q. Where does it say how the score was
11 assigned?

12 A. I mean, you can't put everything on one
13 page. That would be very overwhelming to a
14 consumer.

15 Q. I get that --

16 A. But I think it's an accurate statement.

17 Q. My question is different.

18 Where does it say how the score was
19 assigned?

20 A. I don't understand what that means.

21 Q. This says a score was assigned, right?

22 MS. BLAIR: Uh-huh.

1 MR. CRAIN: Your counsel says yes.

2 MS. BLAIR: I'm sorry. Did I say that
3 out loud?

4 THE WITNESS: Yes. It does say that. It
5 says a score was assigned to reflect the lack of
6 information available. And their score is 15.

7 BY MR. CRAIN:

8 Q. And their score is 15.

9 Where does it say how you came to that
10 15?

11 A. I don't think it matters that it says how
12 we came to that.

13 Q. You don't think the "how" matters?

14 A. I mean, we don't -- I don't think that is
15 necessary here. I can see that they're 15. I
16 can see that the worst hospital score is 15. So
17 I can -- I know that the lowest score was
18 assigned here.

19 Q. So we're on this page because I asked
20 you, where does Leapfrog publish the methodology?
21 And you --

22 A. Uh-huh.

1 Q. -- came to this page.

2 Where on this page -- you said this page.
3 You mentioned there was a footnote below. Right?

4 A. You didn't ask where is the methodology.

5 Q. Yeah, we can go back. Let's see.

6 I said, where on the website is it
7 published?

8 You said, beneath anytime imputation is
9 used, it's shown.

10 What is shown?

11 A statement.

12 A statement that says a score has been
13 disputed [sic]?

14 And that's where -- we're here. Right?

15 A. Well, the first statement that you just
16 read had "it," so that already isn't --

17 Q. Do I have to go back?

18 A. If you're saying I said something, then I
19 think you do.

20 Q. Okay. Well, then I'll go back. Let's
21 see. Now I've lost it.

22 Well, I'll just ask the same question

1 again.

2 A. Okay.

3 Q. Where on this page is Leapfrog's
4 methodology published?

5 MS. BLAIR: On this page?

6 MR. CRAIN: Correct.

7 BY MR. CRAIN:

8 Q. Not -- this document, let's --

9 A. Okay. But --

10 Q. Any of these --

11 A. -- to be clear, I don't think that's what
12 I said before, that it was.

13 Q. What do you think you said?

14 A. Well, now I don't remember. We've kind
15 of gone -- we've diverged.

16 Q. I don't want to confuse you, so I'm going
17 to go back and look.

18 Okay. I said, Is there any risk that
19 limited achievement misrepresents the current
20 procedures or infrastructures of a hospital to
21 the public from that comment. Right?

22 A. Okay.

1 Q. Right. Then you said, I think misrep- --
2 I mean, I think, at the end of the day, it's all
3 publicly available methodology and anyone could
4 look at it, consumers or hospitals. And so as
5 long as we're publishing it publicly, we're not
6 misrepresenting.

7 And I said --

8 A. Okay.

9 Q. -- Where on the website is it published?

10 A. Okay. Thank you for repeating that.

11 Q. Yes. Clear?

12 A. Yes. 3it is clear.

13 To which response I would say this
14 screenshot doesn't include the tabs, and that's
15 where the methodology is posted. On a different
16 page. And I would assume -- there has to be --
17 there's definitely a link somewhere -- and this
18 is a paper. So there's definitely a link
19 somewhere about -- where it does link on these
20 pages to the methodology.

21 Q. So I agree with you there's a link
22 somewhere. You don't see it on this page, right?

1 MS. BLAIR: Objection to form.

2 THE WITNESS: Because it doesn't include
3 the tabs on this page. So I don't --

4 BY MR. CRAIN:

5 Q. Okay. So you think it might be in one of
6 the tabs.

7 A. I know that it's in one of the tabs.

8 Q. Okay. We'll come back to that.

9 A. Okay.

10 Q. So my other question is, what does the
11 link go to?

12 A. So this link? Okay. So if I was here
13 looking at this, it says, Hospitals can earn up
14 to 100 points for using a well-functioning CPOE
15 system in most areas in the hospital. For
16 details on sources, click here.

17 Q. Yes.

18 A. So if I was a consumer and wanted to know
19 more information, without overwhelming them with
20 too much information -- because there's a good
21 amount to read on here already -- I could click
22 on "for details" on sources. Click here.

1 Q. Okay.

2 A. Do you have that page available?

3 Q. I do have it; I've just got to find it
4 here.

5 So my question is -- Iason is going to
6 find it.

7 MR. CRAIN: Oh, he has it already. Okay.
8 Let's do it. Okay.

9 BY MR. CRAIN:

10 Q. So when you click on --

11 MR. CRAIN: This is for Delray, but it's
12 the page. So this is Exhibit 18.

13 (Campione Deposition Exhibit 18 marked
14 for identification and attached to the
15 transcript.)

16 BY MR. CRAIN:

17 Q. So I'll represent to you -- I'm sorry.
18 So do you know what this page is?

19 A. Yes. So this is the detailed table view.

20 Q. And that's where the link goes to on the
21 prior document, right?

22 A. Yes.

1 Q. Where on this page does it explain
2 Leapfrog's methodology?

3 A. I know there's a link somewhere. It --

4 MS. BLAIR: I'm going to object to form
5 only because this does not properly -- I'm
6 looking at the actual web page, and this is not
7 correct. Because the actual web page says, For a
8 full description of methodology, click here.

9 And for whatever reason, what you printed
10 out does not --

11 MR. CRAIN: Where does it say that?

12 MS. BLAIR: If you look at the actual
13 website. So right here --

14 MR. CRAIN: At the bottom.

15 MS. BLAIR: And your printout does not
16 say that. So I'm just going to object to form.

17 VIDEO TECHNICIAN: Counsel.

18 MS. BLAIR: Oh, I'm sorry. I'm objecting
19 to form, Orson.

20 MR. CRAIN: Okay. Let's come back,
21 because we've printed this one out.

22 MS. BLAIR: That's fine.

1 BY MR. CRAIN:

2 Q. The methodology -- is the methodology
3 published anywhere but the survey methodology
4 document that we talked about earlier?

5 A. No. For ease, we have everything in the
6 scoring methodology document.

7 Q. Okay. That's the only place where it's
8 all laid out, right?

9 A. Yes.

10 Q. Do you have any idea how many visitors to
11 Leapfrog's website actually download that
12 document?

13 A. No, I don't.

14 Q. Do you have a guess?

15 A. No. But if they don't have a need,
16 then...

17 Q. Why would they not have a need?

18 A. Maybe because the average person doesn't
19 feel like searching through this. But they got
20 all the information they needed on that first
21 page.

22 Q. On that first page --

1 A. Yeah.

2 Q. -- right.

3 A. And the line said that a sign has been --
4 a score has been assigned to this hospital --

5 Q. Do you think --

6 A. -- based on the lack of information.

7 Q. Apologies. Do you think it's likely that
8 more than half of visitors to the website
9 download that document?

10 MS. BLAIR: Objection to form --

11 THE WITNESS: I don't -- and I don't
12 think --

13 MS. BLAIR: -- lacks foundation.

14 THE WITNESS: -- they need to. I think
15 that was enough information.

16 BY MR. CRAIN:

17 Q. It's enough information? So going back
18 to Exhibit 16, the one where it says West Boca --

19 A. Oh, 17.

20 Q. Or that's 17? Sorry.

21 Going back to 17, the West Boca, it
22 says -- on page 2, it says, Hospitals can earn up

1 to 100 points for using a well-functioning CPOE
2 system in most areas of the hospital.

3 Do you see that?

4 A. Yes.

5 Q. This hospital gets a 15, right?

6 A. Yes. Then it says there's a lack of
7 information.

8 Q. It says, The hospital declined to report
9 their performance on this measure so a score was
10 assigned to reflect the lack of information
11 available.

12 A. Yes.

13 Q. Is it your view that someone looking at
14 this page would come away thinking that the 15 is
15 an arbitrary number or that somebody coming away
16 from this page would think it actually reflects
17 whether the hospital was using a well-functioning
18 CPOE system?

19 A. I think -- I mean, if it was me before I
20 worked here, I would think they didn't -- they
21 declined to report and they didn't have
22 information and they might have one. But there's

1 also 32 measures here that I'm seeing here every
2 time I open a tab and they don't have that.
3 So -- and they're all in the red.

4 Q. For hospitals that participate, what does
5 a limited achievement score convey?

6 A. That -- and the old category was willing
7 to report, both of which I think portray that
8 they're trying.

9 Q. Trying? Okay.

10 And what does limited achievement convey
11 for a hospital that did not participate?

12 A. Well, I mean, that was probably why some
13 of our expert panelists advised that we give zero
14 points.

15 Q. They advised that you give zero points?

16 A. Yes. I testified to that earlier.

17 Q. Based on what?

18 A. When I was in the expert panel, they
19 decided that maybe these hospitals don't deserve
20 anything.

21 Q. Got it. Let's go --

22 A. But limited achievement means they're

1 trying.

2 Q. Limited achievement means they're trying?

3 A. They're reporting to us.

4 Q. Is anybody not trying?

5 A. That's a good question.

6 Q. I'll take --

7 A. One we can't answer.

8 Q. That's right. I'll take that.

9 I want to go back to the response to
10 public comment, if you have that there.

11 MS. BLAIR: And for the record, is that
12 16?

13 MR. CRAIN: I think that --

14 MS. BLAIR: Is that the Alex to Missy --

15 MR. CRAIN: Yes.

16 MS. BLAIR: -- June 4th --

17 MR. CRAIN: Yes, 16.

18 BY MR. CRAIN:

19 Q. Okay. So we're back on the same page.

20 If you can go to the page where it says, Two
21 commentators express concerns.

22 I think it's page ending --

1 A. The summary.

2 Q. -- 629.

3 And it says -- I'm just going down to the
4 next text -- We recognize that hospitals eligible
5 for step 2 imputation may score higher if they
6 complete a Leapfrog hospital survey. However, we
7 cannot ensure that this is the case if we do not
8 have the data. And our analyses have shown that
9 performance among hospitals that intermittently
10 complete the annual survey is lower than those
11 hospitals that completed the most recent survey.

12 What analysis -- analyses is this talking
13 about?

14 A. They were done before my time.

15 Q. So this is referring to an analysis
16 before the imputation method?

17 A. Just a while back, that when they were --
18 I believe it would have been when they -- I mean,
19 I only joined in 2023 -- no --

20 Q. 2022.

21 A. 2022. Thank you.

22 They -- when they were looking at doing

1 the imputation, they looked into, more
2 extensively, that first score mean that we talked
3 about earlier. So they looked at -- if hospitals
4 are, like, doing the survey for the first time or
5 intermittently or whatever, they did it -- my
6 understanding is that they did an analysis at
7 that time.

8 Q. And the output of that analysis was to
9 give non-performing [sic] hospitals in step 2 the
10 mean of their cohort, right?

11 A. The mean -- or to allow this first score
12 mean to be calculated.

13 Q. What do you mean by first score mean?
14 Oh, first -- got it.

15 A. The first time that they completed the
16 survey.

17 Q. The lowest of the two.

18 A. Well, I mean, I think that it was -- they
19 introduced that as well.

20 Q. Okay. How does that analysis support the
21 change here?

22 A. Well, because of what it says.

1 Q. So the analyses from before 2022 have
2 shown that performance among hospitals that
3 intermittently complete the annual survey is
4 lower than those hospitals that completed the
5 most recent survey?

6 A. I mean, yes. But I don't think that that
7 analysis or takeaway -- these arguments are not
8 the reason why this imputation model was approved
9 and used.

10 Q. But --

11 A. And you can ask the expert panel why they
12 went that way and why they finally approved this
13 at the end.

14 Q. But just to be clear, you -- you drafted
15 this document, right?

16 A. Yeah, and I'm just creating points,
17 arguments. Yeah.

18 Q. Arguments are good. We do arguments with
19 law.

20 I'm trying to understand. You're telling
21 commentators that this is not misleading or
22 misrepresenting because of an analysis that

1 happened before your time.

2 Did you even see the analysis?

3 MS. BLAIR: Objection to form.

4 MR. CRAIN: Fair enough.

5 BY MR. CRAIN:

6 Q. The analysis you're referring to in this
7 sentence, have you ever looked at it?

8 A. No, I haven't. But, ultimately, Missy
9 and Matt are going to review this.

10 Q. Did you --

11 A. And they did, so they can decide if it
12 represents. But I'm just drafting something for
13 them to look at.

14 Q. So how did you draft it if you hadn't
15 seen it?

16 A. Well, I've heard them talk about it. We
17 talked about it in these meetings.

18 Q. Got it.

19 So this analysis was talked about also in
20 the April 12th meeting?

21 A. I don't -- I don't think it was brought
22 up in the meeting, the expert panel meeting. But

1 we've obviously met with Missy, Matt, me. You
2 know, one time Leah was there. We meet a lot.

3 Q. Okay. So you wrote this based on what
4 they told you.

5 A. Yes. A lot of what I do is listen to
6 everyone, distill it, and then just draft
7 something for them to make sure that they agree
8 with it and then also, ultimately, I try to make
9 sure that it's accurate with what the actual
10 methodology change that we're putting forth is.

11 Q. But you couldn't verify the accuracy of
12 this sentence, right?

13 A. No, I can't testify today that that
14 sentence -- that I've seen an analysis that backs
15 up that sentence, no.

16 Q. And just to be clear, you have never seen
17 an analysis that backs up that sentence, right?

18 A. No. I'm not saying it's not out there.
19 I trust Missy and Matt.

20 Q. I just think there's a double negative.
21 Let me fix that.

22 Have you ever seen an analysis that backs

1 up this sentence?

2 A. No, I haven't.

3 Q. Thank you. Okay.

4 I want to keep going down: We do
5 acknowledge the commentator's point that the
6 public may misinterpret the assigned measure
7 scores. In response, we will add a new denotion
8 to the hospital safety grade's website for scores
9 that have been imputed.

10 Do you see that language?

11 A. Yes.

12 Q. What does that refer to?

13 A. The note that is on the -- on Exhibit 17
14 that we discussed earlier.

15 Q. The asterisk?

16 A. Yes.

17 Q. Okay. And so that footnote, your
18 testimony, was added directly in response to the
19 comments?

20 A. Yes.

21 Q. Okay.

22 MR. CRAIN: Could we take five, Kim?

1 MS. BLAIR: Sure.

2 MR. CRAIN: Let's take five.

3 VIDEO TECHNICIAN: The time is 4:20 p.m.

4 This ends unit 5. We're off the record.

5 (A recess was taken.)

6 VIDEO TECHNICIAN: The time is 4:42 p.m.

7 This begins unit number 6. We're on the record.

8 MR. CRAIN: Thank you.

9 Exhibit 19.

10 (Campione Deposition Exhibit 19 marked
11 for identification and attached to the
12 transcript.)

13 BY MR. CRAIN:

14 Q. So Ms. Campione, do you recognize this
15 document?

16 A. Yes.

17 Q. Okay. And what is it?

18 A. It's a screenshot or a page from the
19 hospitalsafetygrade.org website.

20 Q. I'll represent it's a PDF printout of the
21 page, and you'll see the date, September 11th, so
22 yesterday.

1 And so -- this is for Delray Medical
2 Center.

3 Do you see that?

4 A. Yes.

5 Q. And you understand that's one of the
6 plaintiffs in this case?

7 A. Yes.

8 Q. Yeah. And this shows the Leapfrog has
9 labeled Delray an F, right?

10 A. Yes.

11 Q. Okay. If we go to page 2 of the
12 printout, it's -- do you see it's clicked on to
13 the handwashing tab?

14 A. Okay.

15 Q. Okay? And first of all, it shows that
16 this hospital's score is 15, right?

17 A. Yes.

18 Q. And then -- one, two -- three down from
19 that it says the worst hospital score is 15,
20 correct?

21 A. Yes.

22 Q. And on the right for handwashing it says,

1 Healthcare workers can stop infection and illness
2 by carefully cleaning their hands. When hospital
3 staff does not carefully wash their hands, they
4 can spread germs from one patient to another and
5 cause someone to become seriously ill.

6 Do you see that?

7 A. Yes.

8 Q. And it says, Hospitals can earn up to 100
9 points for having a handwashing policy and
10 evaluating how hospital workers follow that
11 policy.

12 Do you see that?

13 A. Yes.

14 Q. Now, Delray gets the worst possible
15 score, right?

16 A. Uh-huh.

17 Q. Do you have any idea whether Delray has a
18 handwashing policy?

19 A. No.

20 Q. Okay. And do you have any idea whether
21 Delray evaluates how hospital workers follow that
22 policy?

1 A. No.

2 Q. Have you ever been to Delray?

3 A. I haven't, but their infections are not
4 very good. So...

5 Q. So you don't want to go?

6 A. No.

7 Q. But you don't know whether they wash
8 hands.

9 A. No, I don't.

10 Q. Okay. Are you aware that Ms. Binder
11 published an op-ed about Delray?

12 A. No.

13 Q. Okay. In your view, does this
14 page communicate to consumers that Delray doesn't
15 wash hands?

16 A. I think it conveys that Delray declined
17 to report their performance on this measure, so a
18 score was assigned to reflect the lack of
19 information available.

20 Q. So your view is that a patient
21 considering whether to go to Delray would look at
22 this and say, I don't know whether they wash

1 hands?

2 MS. BLAIR: Objection to form.

3 Mischaracterizes testimony.

4 BY MR. CRAIN:

5 Q. I'm asking. You can say no.

6 A. They would say -- say that again.

7 Q. Yeah, let me fix the question.

8 Would a consumer, looking at this page,
9 come away thinking I don't know whether Delray
10 washes hands well or not, or would they think
11 they must do a really bad job at handwashing?

12 MS. BLAIR: Objection to form.

13 THE WITNESS: Former.

14 BY MR. CRAIN:

15 Q. The former?

16 A. Yes.

17 Q. Why do you say that?

18 A. I would say we don't know -- a lack of
19 information -- or there's a lack of information
20 because they did not report their performance on
21 this measure.

22 MR. CRAIN: Okay. I want to mark this as

1 Exhibit 20.

2 (Campione Deposition Exhibit 20 marked
3 for identification and attached to the
4 transcript.)

5 BY MR. CRAIN:

6 Q. Do you recognize this document?

7 A. Yes. I think I've seen it before.

8 Q. Okay. What is it?

9 A. An op-ed, as you said, in the Palm Beach
10 Post.

11 Q. And who's it by?

12 A. Leah Binder.

13 Q. And I want to go to page 2. And it says,
14 My grandmother -- and again, this is Ms. Binder
15 writing, correct?

16 A. Yes.

17 Q. My grandmother said Delray Medical Center
18 was very clean. High praise from a woman whose
19 nearsightedness never prevented her from spotting
20 a speck of dust 1,000 feet away. Her only
21 complaint was that they served dinner at
22 7:00 p.m., which is very late for south Florida

1 retirees.

2 Do you see that?

3 A. Yes.

4 Q. Okay. And then it says, a little further
5 down -- I'll just find it. Where is it?

6 Actually, it's up. Go to the first page, please.

7 A. Okay.

8 Q. She said at the time her grandmother went
9 to Delray Medical, which was in 2014, it was
10 clear everyone working there paid attention to
11 the simple work habits that can mean life or
12 death for vulnerable patients, like frequent
13 handwashing and double-checking medication
14 orders. The staff was friendly and kind.

15 Do you see that?

16 A. Yes.

17 Q. And then let's skip down two paragraphs.
18 Sorry I went out of order.

19 She says, Sadly, hospital ratings show
20 that today's patients are unlikely to view Delray
21 Medical Center as my grandmother and I once did.

22 Do you see that?

1 A. Yes.

2 Q. Ms. Binder is telling the public in
3 Florida that Delray is dirty, isn't she?

4 MS. BLAIR: Objection to form.

5 THE WITNESS: I haven't read the rest of
6 the paragraphs.

7 BY MR. CRAIN:

8 Q. Do you want to take a minute?

9 A. Well, I thought you were reading it.

10 Q. No, you're welcome to read it.

11 A. Okay.

12 Q. We've got time.

13 A. Okay.

14 Q. Is Ms. Binder telling the readers of this
15 op-ed that Delray today is dirty?

16 A. No.

17 Q. Is she telling the readers that Delray
18 does not adequately wash hands?

19 A. No.

20 Q. She's saying it's different from when her
21 grandmother was there, right?

22 A. She's saying patients are not happy with

1 the care that they're receiving at the facility.

2 Q. She says that -- where do you get that?

3 A. It says, According to CMS, the agency
4 that runs Medicare, patients tend to rate their
5 experience at Delray Medical and the other Tenet
6 hospitals in the lawsuit poorly, with scores on
7 patient-reported experience far below the
8 national average.

9 Q. You read the first and second page,
10 right?

11 A. I don't know what --

12 Q. Did you read the whole article?

13 A. Okay. No, I haven't.

14 Q. Oh.

15 A. Would you...

16 Q. She starts the article by saying, Delray
17 used to have an A from Leapfrog, right?

18 It's in paragraph 3.

19 A. Okay.

20 Q. And she says the A -- at that time, it
21 was super clean -- or very clean, excuse me.

22 Do you see that?

1 A. Yes.

2 Q. And she says, Now patients are unlikely
3 to view Delray Medical Center as my grandmother
4 and I once did.

5 Do you see that?

6 A. Uh-huh.

7 Q. So grandma viewed Delray as very clean.

8 A. Okay.

9 Q. Do you disagree that she's saying Delray
10 is dirty?

11 MS. BLAIR: Objection to form. Asked and
12 answered.

13 THE WITNESS: I don't think she's saying
14 that at all.

15 BY MR. CRAIN:

16 Q. Okay. And you don't think the
17 handwashing page communicates that Delray doesn't
18 adequately wash their hands?

19 A. No. I think --

20 MS. BLAIR: Objection.

21 THE WITNESS: -- that this says that
22 patients are really unhappy with their care at

1 this hospital.

2 BY MR. CRAIN:

3 Q. Okay. And you don't see the contrast
4 she's drawing --

5 A. Yes, that her --

6 Q. -- between her --

7 A. -- grandmother had a good experience and
8 now patients are having bad experiences.

9 Q. Had a good experience at a clean
10 hospital.

11 MS. BLAIR: Objection to form.

12 THE WITNESS: One of the patient
13 experience measures is about cleanliness. And I
14 would assume it's probably not reported well in
15 CMS' measures.

16 BY MR. CRAIN:

17 Q. But she's talking about the Leapfrog A,
18 right?

19 A. She said they were A, and her grandmother
20 also said it was very clean and had a good
21 experience, so that's good. And now they have
22 really poor scores from CMS for patient

1 experience.

2 Q. But they're not dirty?

3 MS. BLAIR: Objection to form.

4 THE WITNESS: I don't -- look at the CMS
5 scores. See what patients are saying about the
6 cleanliness of the hospital.

7 BY MR. CRAIN:

8 Q. Back to this website.

9 You're saying, just looking at how
10 handwashing is described here, that someone
11 reading this -- well, I'm not going to put words
12 in your mouth.

13 MS. BLAIR: Please don't.

14 BY MR. CRAIN:

15 Q. What does the 15 on this page convey
16 about the hospital's performance in handwashing?

17 A. The 15 and the asterisk next to it convey
18 that the hospital declined to report their
19 performance on this measure, so a score was
20 assigned to reflect the lack of information
21 available.

22 Q. So it displays nothing about the

1 hospital's performance?

2 A. Do you want me to read it again?

3 Q. No. I want your answer to my question.

4 A. I think that's what it portrays.

5 Q. So you said, in response to my question,
6 that the 15 portrays that there was a lack of
7 information, yes?

8 A. Yes. And they were assigned the worst
9 possible score.

10 Q. And lack of information has no
11 correlation with performance; is that right?

12 MS. BLAIR: Objection to form. Asked and
13 answered.

14 THE WITNESS: Sorry. Lack of
15 information --

16 BY MR. CRAIN:

17 Q. Does lack of information have any
18 correlation to performance?

19 A. Yes, it does.

20 Q. What are you basing that on?

21 A. If you leave your test answers not
22 complete, then you're going to get a bad score.

1 Q. So we're back to the test.

2 A. Yes. If you don't fill in a section of
3 the test or you don't show up that day...

4 Q. So --

5 A. It's not a good thing.

6 Q. -- absence of information you're saying
7 is evidence of poor performance?

8 A. I think that it shows that there's a lack
9 of commitment to transparency by the hospital.

10 Q. That's a different issue, transparency,
11 right?

12 A. No, I think --

13 MS. BLAIR: Objection to form.

14 THE WITNESS: -- it's the same issue.

15 BY MR. CRAIN:

16 Q. Transparency and performance are the
17 same?

18 A. If the goal is to improve patient safety,
19 then yes.

20 Q. Okay. So let me ask you this: What does
21 this page say about whether Delray has a
22 handwashing policy?

1 A. It doesn't.

2 Q. It says nothing?

3 A. Yes.

4 Q. Okay. And what does it say about whether
5 Delray has -- whether Delray evaluates how
6 hospital workers follow the policy?

7 A. Well, it doesn't.

8 Q. Doesn't? Okay.

9 I want to talk a little bit about the
10 language in the footnote. Footnote 4.

11 Did you have a role in drafting that
12 language?

13 A. Yes.

14 Q. Tell me about your role in drafting it.

15 A. Sure. I believe someone in -- not on the
16 ratings team was responsible for writing -- they
17 were responsible for writing it, and then I -- my
18 role here would be to review that said statement
19 and make sure that it aligns with what our
20 methodology says.

21 Q. Okay. Do --

22 A. And the output of that was this sentence

1 here.

2 Q. Okay. Do you recall who wrote it?

3 A. I do not. Well --

4 Q. I'll refresh your recollection.

5 A. Yeah, when was the timing on it?

6 Q. I'll give you a document.

7 MR. CRAIN: This is going to be 21.

8 (Campione Deposition Exhibit 21 marked
9 for identification and attached to the
10 transcript.)

11 BY MR. CRAIN:

12 Q. Okay. So Exhibit 21 is a document that
13 starts with the Bates number 427863 on page 1.

14 Do you see that?

15 A. Yes.

16 Q. Okay. And I want to go -- just starting
17 at the top, do you see the subject says, Re: New
18 imputation denotation?

19 A. Are we starting at the --

20 Q. Yeah, just --

21 A. -- top of the page?

22 Q. -- to orient you. Do you see the subject

1 says, Re: New imputation denotation?

2 A. Yes.

3 Q. Is that the footnote?

4 A. Yes.

5 Q. Okay. And this is an e-mail between you
6 and Paulina Litter.

7 Do you see that?

8 A. Yes.

9 Q. Who is Paulina?

10 A. So she -- she's not at Leapfrog anymore,
11 but she was working on -- I don't know exactly
12 what her role was at -- senior specialist,
13 operations and special projects. And she's not
14 on the ratings team.

15 Q. She -- she was on the ratings team?

16 A. She is not on -- or was not on the
17 ratings team.

18 Q. Got it. Okay. So let's go to the last
19 page and work our way up.

20 A. Okay.

21 Q. So the first e-mail starts on May 29th.

22 Do you see that?

1 A. Yes.

2 Q. And it's from you to Ms. Litter, right?

3 A. Yes.

4 Q. And you say, Here's the final mockup and
5 description. Thanks again.

6 Do you see that?

7 A. Yes.

8 Q. And you say, We would like to add a third
9 item in the notes and definitions at the bottom
10 and an optional asterisk to the four measures'
11 score: CPOE, BCMA, IPS, and hand hygiene. The
12 data file would denote whether the asterisk
13 should be present either with four additional
14 columns or include the asterisk in the original
15 data columns. The latter would be similar to the
16 data review website, but I am guessing it
17 wouldn't work since the numeric values are used
18 to determine the gas gauge direction.

19 Can you break that down for me?

20 A. It's not really important; it's just how
21 I would give this data to this person who does --
22 I guess it's -- well, it's to Paulina, but I know

1 that she's going to share it with Devon, who is
2 actually the software engineer.

3 So it's information that he needs to know
4 as to how I'm going to denote in the data file
5 how it's going to be shown on the website.

6 Q. Okay. And the gas gauge denotation I think
7 is on Exhibit 20 -- or sorry, Exhibit 19. It's
8 this part at the bottom?

9 A. Yes.

10 Q. Okay. And that's page 1 of Exhibit 19.

11 Now, you say, Here's the final mockup and
12 description.

13 Was there a process before it got to
14 Paulina?

15 A. I don't remember.

16 Q. Okay. Let's go up. I'm going to jump
17 up --

18 A. Well, actually -- sorry.

19 Q. Yes.

20 A. Actually -- okay. So it looks like the
21 first thing that I would have written, if this
22 was -- because this was my screenshot -- my first

1 thing says, This hospital declined to report data
2 for this measure so a score was imputed for the
3 measure.

4 You can see there's an arrow at the
5 bottom. So that was originally my text but,
6 again, I'm not a comms person.

7 Q. You're saying that was the language you
8 originally drafted?

9 A. Yes. That's the language I would use if
10 I had to put this into a single sentence for a
11 consumer. That was just what I came up with
12 initially.

13 Q. And how does that differ from what the
14 website landed on?

15 A. Well, I think we landed on something that
16 was a true representation of the scoring
17 methodology.

18 Q. So there it says the hospital declined to
19 report their performance on this measure so a
20 score was designed [sic] to reflect the lack of
21 information available.

22 So is the difference just the lack of

1 information available?

2 A. Yeah, I guess so. And I used the term
3 "imputed," and there's concern that "imputed"
4 isn't understood by the general public.

5 Q. "Imputed" is unclear?

6 A. Well, yeah, I mean, it's --

7 Q. To --

8 A. -- a mathematical term.

9 Q. Okay. So just to make sure our record is
10 clear, you're saying "imputed" came out of here
11 because it's unclear to a lay public that doesn't
12 know the mathematical terms?

13 A. Sure.

14 Q. Okay. Going up this e-mail -- so let's
15 see.

16 Paulina writes back to you -- so there's
17 some e-mail exchange with Atlas Works. Who is
18 Atlas Works?

19 A. So that would be the software engineer.

20 Q. Okay. And who is Raven Creative? And
21 just --

22 A. Yes. Like, it's -- Raven Creative. I

1 don't know -- I don't know Atlas -- maybe they're
2 Atlas -- maybe it's, like, two software
3 engineers. I'm not sure.

4 Q. Okay. Some sort of vendor, you think?

5 A. Well, I know he's the software engineer
6 that works on this website.

7 Q. Got it. Okay.

8 Now, I want to go to Paulina's e-mail on
9 page 427865.

10 And she says -- she's forwarding an
11 e-mail from Devon Weller and she says, Does this
12 work for you? My only callout is the language
13 seems a bit off to me as a layperson to know what
14 "imputed" means. Maybe we can say -- change it
15 to say, so a score was calculated using
16 imputation for the measure. Would that work?

17 A. Yes.

18 Q. So that goes to your point before about
19 imputation being unclear to a lay public, right?

20 A. Yes.

21 Q. Okay. And then you respond, Yes, but are
22 you able to see the change on his link? I

1 followed all the instructions and I'm going to
2 try again later today. I've just been out and
3 I'm catching up on stuff.

4 Then you say, This was the language Missy
5 wanted, but Leah wants something else that makes
6 it sound like the data we imputed wasn't random.
7 So LMK -- or let me know -- if you have any
8 ideas.

9 A. Okay.

10 Q. Do you see that?

11 A. Yes.

12 Q. Okay. So the original language at the
13 bottom of the e-mail with the arrow that you
14 pointed to --

15 A. Yes.

16 Q. -- that was Missy's language that she
17 wrote?

18 A. Well, I mean, if I originally -- I don't
19 know if I originally wrote it. I assume I wrote
20 and I said, Does this look good? And she's,
21 like, yes. Something along those lines.

22 Q. Okay.

1 A. But she had approved it. And all I'm
2 doing here is making sure that everyone signs off
3 on it and is happy with what it says.

4 Q. And what do you mean, Leah wants
5 something else that makes it sound like the data
6 we imputed wasn't random?

7 A. I feel like -- I mean, now -- this can be
8 taken out of context, how I use the word "sound"
9 but I wanted to -- I should have said "emphasize"
10 there. I wasn't really thinking about which --
11 my word choice here. And -- I'm saying -- yeah,
12 so Leah wants something else that emphasizes the
13 data we imputed wasn't random.

14 So I'm just trying to get her to -- she's
15 asking -- it really was kind of her job to work
16 on this and do something from, like -- you know,
17 make it sound great. That's not what I do. I'm
18 a data person. So I'm just making sure that it's
19 accurate.

20 Q. Did she control the messaging?

21 A. Control?

22 MS. BLAIR: Objection to form as to who

1 "she" is.

2 MR. CRAIN: Pardon. Fair enough.

3 BY MR. CRAIN:

4 Q. Did Ms. Binder control the messaging?

5 A. I wouldn't say she controlled it. She
6 gives her -- she gives input on it.

7 Q. Was Ms. Binder ultimately responsible for
8 the messaging?

9 A. I mean, everyone has to approve it. Her
10 expert panel -- I mean, if someone wasn't happy
11 with it...

12 Q. Who gets the last word?

13 A. Missy and Leah.

14 Q. Now, do you remember what she told you
15 that made you write, Leah wants something else?

16 A. Yeah. I think we met, and this was --
17 maybe I had shown that or something. It was
18 really in this, like, workshop phase. And I'm
19 guessing she just said, I want to make sure --
20 this just sounds like she just -- she wanted a
21 little bit of a different direction with it. I
22 don't know how to -- it's a hard position to be

1 in to take other people's opinions and what they
2 want and then try to distill it and give it to
3 someone else. It's -- it's hard. But eventually
4 we arrived at what we did.

5 Q. A lot of cooks in the kitchen.

6 A. Yes.

7 Q. And in your view, just going back to the
8 language you wrote side by side with this e-mail,
9 is there anything about the language you had here
10 that Missy approved that made it sound like the
11 data imputed was random?

12 A. Maybe to a person that doesn't work with
13 data. And I think that's kind of what it comes
14 down -- and Missy is on the ratings team and is
15 intimately involved with -- or familiar, I should
16 say, with the scoring methodology. And Leah is
17 thinking about what the general public knows,
18 and -- she just has a different perspective.
19 That's all.

20 Q. Is it the "imputed" that suggests that?

21 A. Again, I can't speak for her. She can
22 explain why what we originally wrote she wanted

1 to -- I think she just wanted to give more
2 information so that -- like, I don't know. I'm
3 not -- I'm too involved in this. I can't give
4 you, like, an objective look at it.

5 Q. Fair enough.

6 Let's scroll up a little bit,
7 proverbially at least.

8 And Paulina writes you back and says,
9 Yeah, I just did it and got the stage version, so
10 everything is working on my end.

11 And then she gives you a bunch of
12 proposals. Do you see that? A few thoughts --

13 A. Yes.

14 Q. -- on that language.

15 And I won't read them all, because there
16 are quite a few. But just as an example, the
17 first one says, The hospital declined to report
18 data for this measure so a score was calculated
19 with external data sources using an imputation
20 model.

21 Do you see that?

22 A. Yes.

1 Q. And fair to say that the other iterations
2 are similar to that?

3 A. Yes. Just some of them have links after
4 them.

5 Q. And what do the links go to? Do you
6 know?

7 A. The scoring methodology.

8 Q. Got it. Is that that 26-page --

9 A. Yes.

10 Q. -- approximately -- yeah.

11 Okay. And then you respond, Okay.

12 Great. It's working for me too. Thanks for
13 doing this, but we can't say external data
14 sources because we're arbitrarily assigning them
15 the points associated with the bottom scoring
16 category, limited achievement, or old data from
17 the previous survey (internal data source). Leah
18 wanted us to make it sound like the expert panel
19 approved it and the assigning of these points was
20 legitimate.

21 And then you propose language. So --

22 A. Okay.

1 Q. Do you see that?

2 A. Yes.

3 Q. And I just want to be clear: You wrote
4 here that Leapfrog was going to be arbitrarily
5 assigning points associated with the bottom
6 scoring category --

7 A. Uh-huh.

8 Q. -- is that right?

9 A. Well, from a mathematical standpoint, it
10 is a little bit arbitrary. These are numerical
11 scores that we're assigning to categories. So in
12 the way that it's not -- it's 15 points, not 16
13 points and not 14 points, that's a little
14 arbitrary.

15 But from the standpoint of whether
16 they're being assigned to that category, that's
17 not what I'm saying at all. They were assigned
18 to the limited achievement category because they
19 didn't provide data.

20 Q. Okay. And is it arbitrary compared to
21 the mean of the lowest quartile we saw before?

22 MS. BLAIR: Objection to form.

1 THE WITNESS: Sorry, what does that mean?

2 BY MR. CRAIN:

3 Q. Yeah. Is it arbitrary to assign the
4 limited achievement score as compared to the mean
5 of the lowest quartile that we saw previously?

6 A. I think in my previous question [sic] I
7 didn't say it was -- I said the exact opposite.
8 It's not arbitrary to assign them to the limited
9 achievement category. I said the points
10 themselves, from a mathematical standpoint, are
11 arbitrary.

12 Q. So what makes it not arbitrary -- strike
13 that.

14 What -- so you've talked about how it's
15 arbitrary in a mathematical sense, right?

16 A. Yes.

17 Q. What is the other sense in which it is
18 not arbitrary?

19 MS. BLAIR: Objection to form.

20 THE WITNESS: Sense in which assigning
21 to -- the categories?

22

1 BY MR. CRAIN:

2 Q. Well, you write here, We can't say
3 external data sources because we're arbitrarily
4 assigning them points associated with the bottom
5 scoring category.

6 And you've testified that the "arbitrary"
7 is related to mathematics; it's arbitrary
8 mathematically.

9 Is it not arbitrary in other contexts?

10 MS. BLAIR: Objection to form.

11 THE WITNESS: No, I don't think so. And
12 I think I've explained earlier why we chose to
13 put them in the limited achievement category
14 versus others. We looked at other options, and
15 they just didn't make sense and they
16 misrepresented grossly what was actually going on
17 at these hospitals, in our opinion.

18 BY MR. CRAIN:

19 Q. Well, how did you know what was going on
20 at these hospitals?

21 A. Well, we don't, and they're not being
22 transparent about it. And the expert panel

1 decided that transparency was important at this
2 point.

3 BY MR. CRAIN:

4 Q. So let me just be clear. You said
5 that -- let me -- let's see.

6 You said the other options just didn't
7 make sense and they misrepresented grossly what
8 actually is going -- what was actually going on
9 at these hospitals, in our opinion.

10 How did you know that they misrepresented
11 grossly what actually was going on at these
12 hospitals, in your opinion?

13 MS. BLAIR: Objection. Asked and
14 answered.

15 THE WITNESS: It was our opinion.

16 MR. CRAIN: It's a different question.
17 Grossly misrepresented this time.

18 BY MR. CRAIN:

19 Q. How did you know that the higher scores
20 grossly misrepresented?

21 A. That -- I mean -- and, honestly, that
22 could be my opinion. There could be someone

1 else's opinion that they really just should be
2 assigned limited achievement because, at this
3 point, 80 percent of hospitals are doing the
4 survey and putting resources towards doing it and
5 giving this data, and these hospitals are
6 choosing not to. They're familiar with Leapfrog
7 and the survey, and they're blatantly choosing
8 not to, showing that they don't have a strong
9 commitment to transparency.

10 Q. Why did Leapfrog impute lowest [sic]
11 achievement for the four imputed measures?

12 MS. BLAIR: Objection. Asked and
13 answered.

14 MR. CRAIN: Like five different ways.

15 MS. BLAIR: Disagree.

16 MR. CRAIN: I'll withdraw it for now.
17 I'll save it for the court.

18 BY MR. CRAIN:

19 Q. No, I'm keeping --

20 MS. BLAIR: You have to answer.

21 MR. CRAIN: I'm withdrawing the
22 commentary, not the question.

1 THE WITNESS: So why did the -- I mean --
2 I mean, you should ask the expert panel.

3 BY MR. CRAIN:

4 Q. Okay. Let me do it this way: You have
5 said today that the limited achievement scores
6 represents what was going on on the ground at
7 this hospital; is that correct?

8 A. No.

9 MS. BLAIR: Objection to form.

10 THE WITNESS: Yeah, I --

11 BY MR. CRAIN:

12 Q. Why is it not correct?

13 A. No, I have not answered that.

14 Q. Okay. Do you agree with that statement?

15 A. That it doesn't -- sorry, can you repeat
16 the statement?

17 Q. Yes.

18 Do you agree with the statement that
19 limited achievement scores reflects what actually
20 is going on at these hospitals?

21 A. I think it reflects the lack of
22 information.

1 Q. Okay. Do you agree it reflects what's
2 actually going on at these hospitals with respect
3 to the performance measures?

4 MS. BLAIR: Objection to form.

5 THE WITNESS: In regard to the
6 performance -- well --

7 BY MR. CRAIN:

8 Q. If you don't understand, that's fine. I
9 can rephrase it.

10 A. Yeah, I don't really understand.

11 Q. I'm not trying to trip you up. I'm just
12 really trying to understand what you think.

13 Is it your view that a limited
14 achievement score for handwashing, hand hygiene,
15 is reflecting what's actually happening at these
16 hospitals?

17 A. I mean, I don't know how to answer it.

18 Q. You don't know --

19 A. I --

20 Q. -- or you don't know how to answer the
21 question?

22 A. I think that I've answered this already,

1 and I think that we've been very clear about, at
2 this point, hospitals should be completing the
3 survey. And it's -- and if they're not, it seems
4 like they have something to hide, and I don't
5 think that's fair to the public.

6 Q. Why do you think they have something to
7 hide, as opposed to Dr. Romano's hypothesis that
8 it's just too burdensome?

9 A. That's just a hypothesis. It hasn't been
10 proven.

11 Q. Has yours been proven?

12 A. No.

13 Q. So why pick the most punitive measure?

14 MS. BLAIR: Objection to form.

15 MR. CRAIN: Okay. Let me -- fair enough.

16 THE WITNESS: Sorry. Should we give them
17 the most points because they didn't give us
18 information?

19 BY MR. CRAIN:

20 Q. That's -- should we give them the most
21 points because they didn't give us information?

22 Did at any time Leapfrog suggest that

1 non-participating hospitals should get the most
2 points?

3 A. No.

4 Q. Was that option ever on the table?

5 A. No, because it doesn't make any sense.

6 Q. Great. There were other options on the
7 table.

8 A. Yes.

9 Q. And -- there were four options. We
10 looked at them, right?

11 A. Right. And the original proposal was the
12 mean of the cohort. And the expert panel said
13 that's not fair and they were not happy about
14 that and they went a different direction.

15 Q. They went a different direction. Right.

16 A. They did. And it's our job to provide
17 the data and analysis or anything they want to
18 see. And if at any point they didn't agree with
19 us -- and Patrick Romano was given the
20 opportunity to express, if he felt strongly, that
21 he didn't like this direction. He could have
22 said it.

1 Same thing with Peter. In fact, Peter
2 was enthusiastic about it.

3 So I don't really see the point here.

4 Q. Dr. Romano was also enthusiastic, right?

5 A. I would say -- I mean, you have shown the
6 e-mails. He wasn't enthusiastic about it, but he
7 is a numbers person. And in a perfect world,
8 he's always looking for the best measurement and
9 the best way to score these hospitals. And in
10 real life, we just, like, don't have access to
11 that information.

12 Q. That's not what his e-mail said, right?
13 He said this was the most honest way, right?

14 MS. BLAIR: Objection to form.

15 BY MR. CRAIN:

16 Q. He said he liked the honesty of the
17 approach, right? Wasn't that how the last
18 sentence of his e-mail ended?

19 A. Yes. Yeah.

20 Q. Okay.

21 A. Okay.

22 Q. And what he liked about it -- tell me why

1 I'm wrong -- is that if the goal was to punish or
2 penalize non-responsive hospitals, this did so in
3 a very clear way, right?

4 A. I think it was clear about how we felt
5 about transparency.

6 Q. Okay. Was it clear about Leapfrog's
7 desire to punish non-participating hospitals?

8 A. No. I think that it was clear that we
9 don't think that you should be getting extra
10 credit if you are choosing to not give
11 information.

12 Q. And how do you decide whether a hospital
13 is getting extra credit or just appropriate
14 credit if it's not participating?

15 A. How do you know if I know a subject if I
16 don't complete that section of the test?

17 Q. How do you know --

18 A. In an exam -- if I took a test, how do
19 you know what I know if I don't complete the
20 test? It doesn't mean I should get 100.

21 Q. I think I just figured out the analogy.

22 Why are you grading students that aren't

1 in the class?

2 A. Why aren't they showing up to the test?
3 I assume they're enrolled by virtue of just being
4 a student.

5 Q. By virtue of being a student, they're
6 enrolled in every case?

7 MS. BLAIR: Objection to form.

8 MR. CRAIN: Okay. We'll move on from
9 this. We're going to have fun with this analogy
10 later.

11 Okay. Let's keep going.

12 BY MR. CRAIN:

13 Q. Okay. I want to talk about the website,
14 the Leapfrog website, in a little more detail.
15 And I want to look at tab 127a, which will be
16 Exhibit 22. It's also Jupiter Exhibit 20.

17 (Campione Deposition Exhibit 22 marked
18 for identification and attached to the
19 transcript.)

20 BY MR. CRAIN:

21 Q. Do you see that, Ms. Campione?

22 A. Yes.

1 Q. Okay. What is this document?

2 A. It is a page from the
3 hospitalsafetygrade.org website.

4 Q. And what page?

5 A. The frequently asked questions about the
6 Leapfrog hospital safety grade.

7 Q. And what's the purpose of this page?

8 A. To answer questions.

9 Q. To answer questions. Questions from
10 whom?

11 A. Well, I don't have context for which tab
12 it came -- it was under.

13 Q. Okay. Fair enough. It doesn't say.
14 Okay.

15 I want to move to page 3. And there's
16 language in here -- do you see, Does a hospital
17 get a better safety grade if it reports to the
18 Leapfrog hospital survey?

19 Do you see that?

20 A. Yes.

21 Q. And then it says, The hospital safety
22 grade reflects how well a hospital does on

1 safety, not whether they complete the Leapfrog
2 hospital survey.

3 I want to break down that sentence.

4 The first clause there, The hospital
5 safety grade reflects how well a hospital does on
6 safety -- do you see that?

7 A. Yes.

8 Q. Do you agree that is always true?

9 A. Yes.

10 Q. Is that true for non-participating
11 hospitals?

12 A. Yes.

13 Q. Why do you say that?

14 A. Because there are 22 measures that get
15 put into the safety grade. A good amount of them
16 come from CMS.

17 Are we disputing that data today? I
18 don't think so. I'll answer that.

19 Q. Asked and answered.

20 A. The -- we have the patient experience
21 data. We have the Leapfrog hospital survey. And
22 a big part of safety is being transparent.

1 And -- and so if you don't answer the survey and
2 you get assigned an imputed score, I think you're
3 not doing great in patient safety.

4 Q. Okay. So this is true as to
5 non-participating hospitals?

6 A. Well, yes.

7 Q. Is it true as to each metric that goes
8 into the safety grade?

9 MS. BLAIR: Objection to form.

10 BY MR. CRAIN:

11 Q. So the hospital safety grade reflects how
12 well a hospital does -- I'm going to bracket
13 that -- say, on hand hygiene?

14 MS. BLAIR: Objection to form.

15 BY MR. CRAIN:

16 Q. Is that accurate?

17 A. The safety grade reflects how well a
18 hospital does on hand hygiene? No, that's not
19 true because it's a holistic composite.

20 Q. Okay. Got it.

21 Let's go back up a little bit.

22 Do you see language that says, If a

1 hospital does not report to the Leapfrog hospital
2 survey -- do you see that there?

3 A. Uh-huh.

4 Q. -- other sources of data are used to
5 calculate a grade. The majority of data used to
6 calculate the safety grade comes from the Centers
7 for Medicare and Medicaid Services (CMS).

8 Is that accurate?

9 A. Yes.

10 Q. Okay. I want to show you a document.

11 MR. CRAIN: Let's go to tab 39. That's
12 going to be Exhibit 23.

13 (Campione Deposition Exhibit 23 marked
14 for identification and attached to the
15 transcript.)

16 BY MR. CRAIN:

17 Q. Okay. We talked -- you have it?

18 A. Yes.

19 Q. Okay. We talked earlier today about
20 CURA Strategies.

21 Do you see the bottom e-mail from CURA?

22 A. Yes.

1 Q. And it looks like it's -- the subject
2 says, A question from Miami Herald.

3 Do you see that?

4 A. Yes.

5 Q. Is this an example of one of the times
6 CURA wrote you to get your feedback on something?

7 A. Yes.

8 Q. Okay. And it says, Hi, Alex. Technical
9 question for you. Miami Herald has a follow-up
10 question, and I wanted to make sure I answered
11 appropriately. See below. The language that
12 concerns me is "most of the data comes from CMS."
13 Do we have a better phrasing? So on and so
14 forth.

15 And you respond -- this is on May 1,
16 2024. And you say, I agree the phrasing is not
17 great and actually a bit misleading. It was
18 probably written before we had imputation.

19 And then you propose a change.

20 Do you see that?

21 A. Yes. I do.

22 Q. Okay. Now, if you look at the bottom,

1 again, do you see it says, In the FAQ it states?

2 MS. BLAIR: In the fact it states?

3 MR. CRAIN: In the FAQ.

4 MS. BLAIR: Oh.

5 MR. CRAIN: Sorry.

6 BY MR. CRAIN:

7 Q. Do you see that?

8 A. Yes. I just don't understand -- what I
9 rewrote just expounds on it.

10 Q. Okay.

11 A. I don't think that it is contrary to that
12 original statement.

13 Q. So the language here in the sentence, In
14 the FAQ it states -- and I'll just read it to
15 make sure we're all on the same page.

16 In the FAQ it states that Leapfrog gives
17 a grade to hospitals regardless if they
18 voluntarily report data or not.

19 A. Uh-huh.

20 Q. If a hospital does not report to the
21 Leapfrog hospital survey, other sources of data
22 are used to calculate a grade. The majority of

1 data used to calculate the safety grade comes
2 from the Centers for Medicare and Medicaid
3 Services (CMS).

4 Do you see that?

5 A. Yes.

6 Q. Okay. That's the same language that's
7 still on the website, right? You can use the
8 other exhibit you have.

9 A. Yes.

10 Q. Okay.

11 A. Yeah, I think that my first sentence is
12 being taken out of context here. It looks like I
13 was just being really technical that day and was
14 adding a lot of additional information.

15 Q. Are you --

16 A. Because I then say, It primarily consists
17 of measures from CMS.

18 Q. What's the difference?

19 A. I don't know. You have to -- I was
20 feeling sassy that day. I don't know.

21 Q. Okay.

22 A. I just wanted to rewrite it and give a

1 lot more information.

2 Q. Okay.

3 A. But I don't think that it contradicts it.

4 Q. Okay.

5 A. And I don't really know what I meant on
6 that day because --

7 Q. Okay.

8 A. -- the majority of data does come from
9 CMS. There's 22 measures and...

10 Q. So you don't recall specifically what you
11 thought was misleading.

12 A. No, I -- most of the data comes from --
13 yeah, no, I don't really -- I actually don't know
14 what I meant that day.

15 Q. Okay.

16 A. Because it's kind of a simple fact that
17 22 measures are used in the safety grade and only
18 7 of them come from the survey.

19 Q. Is that accurate as to the weighting?

20 A. No, because it's referring to the data.
21 Most of the data comes from CMS.

22 Q. Okay. As opposed to how the grade is

1 computed?

2 A. Even if it was, you were saying earlier,
3 a quarter of the grade, that's still less than
4 half. So that would be the majority being CMS.

5 Q. Is that right? Because I thought there
6 were other metrics that go into -- beyond the
7 quarter.

8 A. Beyond the?

9 Q. The quarter.

10 A. The quarter? Well, it depends on whether
11 they do the survey or not. So if they don't,
12 then they would be treated as not available for
13 the other three measures.

14 Q. Okay. Let's go back to the FAQ.

15 So I just want to take a look at page 5.

16 And you see at the top -- the question is
17 actually on page 4. It says, Why don't I see my
18 hospital?

19 And at the bottom it says, The absence of
20 a safety grade does not mean a hospital is
21 unsafe. It means that Leapfrog does not have
22 enough data to assign a grade.

1 Do you see that?

2 A. Uh-huh.

3 Q. Okay. If non-participating hospitals
4 have a grade, does that mean the hospital is
5 unsafe?

6 MS. BLAIR: Objection to form.

7 MR. CRAIN: Yeah, let me rephrase that.

8 BY MR. CRAIN:

9 Q. If hospitals have an F grade, does that
10 mean the hospital is unsafe?

11 A. Yes.

12 Q. If hospitals have a D grade, does that
13 mean the hospital is unsafe?

14 A. Relative to a C or A or B? Yes.

15 Q. Okay. And if hospitals have a C grade,
16 unsafe or safe?

17 A. They are more safe than a D- or
18 F-hospital.

19 Q. Okay. So it's all relative?

20 A. Yes.

21 Q. Okay. And for a non-participating
22 hospital that gets an F -- strike that.

1 Let's keep going down the next paragraph.

2 So you say, Leapfrog experts and advisors
3 at the John Hopkins Armstrong Institute for
4 Patient Safety and Quality regularly review all
5 publicly available measures of safety and their
6 methodology to determine a hospital's letter
7 grade. The national expert panel regularly
8 convenes to review the methodology for validity
9 and reliability.

10 Do you see that? It's the second
11 paragraph on the page.

12 A. Why don't I see my hospital? Is that --

13 Q. It's under --

14 MS. BLAIR: Page 5 of 8.

15 THE WITNESS: Oh.

16 MS. BLAIR: Second paragraph.

17 THE WITNESS: Okay. What is the
18 question?

19 BY MR. CRAIN:

20 Q. Do you see that there --

21 A. Yes.

22 Q. -- the national expert panel regularly

1 convenes to review the methodology for validity
2 and reliability?

3 A. Yes.

4 Q. Does the "regularly convene" refer to the
5 annual meeting?

6 A. Yes.

7 Q. Okay. So it's once a year they convene?

8 A. Yes.

9 Q. Okay. I'm trying to see if there's
10 anything else on this document.

11 I think you can set this one aside.

12 MR. CRAIN: I'd like to go to 133. This
13 will be Exhibit 24.

14 (Campione Deposition Exhibit 24 marked
15 for identification and attached to the
16 transcript.)

17 BY MR. CRAIN:

18 Q. All right. Do you have this document,
19 Ms. Campione?

20 A. Yes.

21 Q. Do you recognize it?

22 A. Yes.

1 Q. What is the lives lost and lives saved?

2 A. It is -- the page shows that -- it's a
3 white paper that was published by Matt -- well, I
4 mean, you'd have to click on the white paper.
5 But it was a study that Matt did, Matt Austin
6 did, at John Hopkins.

7 Q. Do you know when it was published?

8 A. Sometime after 2016.

9 Q. 2016?

10 A. I said after 2016 because this says, A
11 significant improvement from 2016.

12 Q. Fair enough.

13 I'll represent to you that, when you
14 click on it, it goes to -- 2019 it's dated.

15 Now, this says, The analysis -- I'm
16 looking at the bottom of this paragraph.

17 A. Okay.

18 Q. It says, The -- okay. So -- The analysis
19 also found that D- and F-hospitals carried nearly
20 twice the risk of mortality of A-hospitals.

21 Do you see that?

22 A. Yes.

1 Q. And again, that's based on the white
2 paper, right?

3 A. Yes.

4 Q. This is a copy of the website from after
5 the imputation was changed, correct?

6 A. Yes.

7 Q. Okay. And --

8 MS. BLAIR: Well -- I'm sorry, I'll
9 object to form. There's no date on this.

10 THE WITNESS: Yeah.

11 BY MR. CRAIN:

12 Q. Yeah, I'll represent to you that this was
13 pulled after 2024.

14 A. Okay.

15 Q. In 2025.

16 So my question is, this website is
17 telling consumers that if you go to a D and F,
18 that you have nearly twice the risk of mortality
19 of an A-hospital, right? That's what they read.

20 MS. BLAIR: Objection to form.

21 THE WITNESS: I don't think that it's
22 saying the analysis also found that D- and

1 F-hospitals carry nearly twice the risk.

2 So whenever the analysis was conducted
3 and the data it used, that was the conclusion
4 that they drew from the data.

5 BY MR. CRAIN:

6 Q. Back then.

7 A. Yeah. Whenever this analysis was done.
8 I don't think it says, if you go to a D- and
9 F-hospital, you will experience this. It doesn't
10 say that.

11 Q. Is it accurate, in 2024, to say that D-
12 and F-hospitals carry nearly twice the risk of
13 mortality of A-hospitals?

14 A. Well, we don't know that because an
15 analysis wasn't done then.

16 Q. Okay. We don't know; that's what
17 you're --

18 A. On the current data.

19 Q. Okay. And yet this is what Leapfrog puts
20 out to consumers, correct?

21 A. I don't understand the implication
22 because this says the analysis also found that D

1 and F -- and you can click on the paper and see
2 when it was conducted.

3 Q. Okay. Let's go two pages down -- three
4 pages down to Bates 3007.

5 And it says -- this is on Leapfrog's
6 website as well.

7 A. Uh-huh.

8 Q. Do you recognize this graphic?

9 A. Yes.

10 Q. You've seen it before?

11 A. Yes. It's on the page.

12 Q. Okay. And it says, Fewer avoidable
13 patient deaths in America's hospitals. And it
14 says, But your risk of dying depends on the
15 hospital you choose. The Leapfrog hospital
16 safety grade is a letter grade that scores
17 hospitals on how well they protect patients from
18 errors, injuries, accidents and
19 inspections [sic]. Compared to an A-hospital,
20 your risk of dying increases ... 91.8 percent for
21 D and F-hospitals.

22 Do you see that?

1 A. Yes.

2 Q. Okay. What's the support for that?

3 A. Well, the paper that's above it. But you
4 can see that it says 2015 to 2018, so I'm
5 assuming that's when the paper was published.
6 That's where they got the statistic of 160,000.

7 Q. Okay. So in your view, Leapfrog does not
8 tell consumers today that they have a
9 91.8 percent chance of dying if they go to a D-
10 and F-hospital as compared to an A-hospital?

11 MS. BLAIR: Objection to form.

12 THE WITNESS: I mean, as an
13 epidemiologist, I probably would phrase this
14 differently and I'd prefer that everyone reads
15 scientific journals, but the fact is they don't.

16 So yes, this is a watered-down version of
17 it or put in basic terms. But I wouldn't say
18 that this is the messaging everywhere on all the
19 pages. In fact, this is kind of, like, a random
20 rabbit hole you would have to go down to find
21 this page. I don't even know where it's
22 location.

1 BY MR. CRAIN:

2 Q. We can find that information for you.

3 A. Yeah.

4 Q. Back to Iason.

5 A. They don't have it next to the D and
6 F grades being advertised for your five
7 hospitals.

8 Q. We'll double-check that.

9 So my question, going back to -- we
10 talked earlier in the day about the safety grade
11 being easily digestible for a lay audience.

12 Do you remember that?

13 A. Yes.

14 Q. And I take your point, you're an
15 epidemiologist -- right? -- so you may look at
16 things differently from the lay person, right?

17 A. Yes.

18 Q. You said that -- I think -- you said you
19 would probably phrase this differently.

20 In what way?

21 A. I would have to look at the journal -- or
22 at the paper.

1 Q. Do you think it's responsible for
2 Leapfrog to leave this on its website when it
3 suggests -- do you think it's responsible for
4 Leapfrog to leave this on its website when the
5 only support for the proposition that it's
6 stating here is a paper from six years ago, two
7 methodologies behind?

8 A. Do I think it's responsible?

9 Q. Let's start over. Let me take you back
10 to 2019.

11 Was there even any imputation at the
12 time?

13 A. I'm not sure. I wasn't there.

14 Q. Okay. Have you ever heard of the AHA?

15 A. Yes. I -- yes. But also, I will add --
16 actually, I think if you look at the study, none
17 of the Leapfrog measures are used in this.

18 Q. None of the Leapfrog measures are used in
19 the study?

20 A. In this study.

21 Q. Okay.

22 A. They are not. So no, there's no -- like,

1 if there was, maybe -- well, I guess ICU
2 physician staffing, but the other ones were not.
3 And ICU physician staffing used the AHA data.

4 Q. So I'm not sure I understand that.
5 Because isn't the study comparing the final
6 grades?

7 A. Well -- yes, it is. But it's looking at
8 the correlation between the final grades that
9 were assigned and these measures. So it's
10 looking at predicting how many deaths were -- you
11 know, could have happened from these sets of
12 measures. And granted, there could be lots more
13 deaths happening. We're just limited to the data
14 that we have, so looking at infections, looking
15 at these patient safety events, they calculated
16 the number of deaths that could be occurring.

17 And that's all based on articles and
18 things that state, like, oh, you know, the
19 mortality rate for this infection is X, Y, Z.
20 And I believe that they -- the researchers used
21 that to estimate the amount of deaths that could
22 have occurred from those infections.

1 Q. Back in 2019?

2 A. Yes.

3 Q. Okay. And back in 2019, the current
4 imputation method was not operative, right?

5 A. I don't believe that it was. Because
6 only ICU physician staffing was used in this, and
7 it had a different secondary data source.

8 Q. Okay. As an epidemiologist, would it be
9 fair to extrapolate from the results of that
10 study the conclusion that they reached on
11 mortality between the A- and D- and F-hospitals
12 to A- and D- and F-hospitals today?

13 MS. BLAIR: Objection to form.

14 THE WITNESS: Can you repeat that,
15 please?

16 BY MR. CRAIN:

17 Q. Yeah. Bad question.

18 You're an epidemiologist, right?

19 A. Yes.

20 Q. The white paper has a set of conclusions
21 that compare mortality of A-hospitals and D- and
22 F-hospitals, correct?

1 A. Yes.

2 Q. The way that you -- that Leapfrog has
3 identified what is an A- and a D- or F- hospital
4 has changed over these past six years, right?

5 A. Okay. Yes.

6 Q. Many times, right?

7 A. Yes.

8 Q. Is it fair to extrapolate the conclusions
9 of that study on different models of assessing
10 the hospital grades to the current model today?

11 A. No, it wouldn't be. But I don't see the
12 word "today" on here.

13 Q. Okay. But it would not be fair to do so
14 today. You're just saying that's not what this
15 website says?

16 A. I'm saying it doesn't say "today," but
17 yes, that's true, that it would not be fair to
18 extrapolate them today.

19 Q. Okay. Okay. You can set that one aside.

20 And just for the record, the lives lost
21 and lives saved is on the front of the website.

22 I don't know if you --

1 A. The front of the website?

2 Q. Yeah.

3 MR. CRAIN: Why don't we bring it up.

4 So for the record, we are giving

5 Ms. Campione a laptop.

6 MS. BLAIR: Can you tell us what page
7 you're at so I can follow along?

8 MR. CRAIN: Yes. The page is
9 www.hospitalsafetygrade.org. So it's just the
10 home page --

11 THE WITNESS: Okay.

12 MR. CRAIN: -- the landing page.

13 MS. BLAIR: And it's on the front
14 page there? Is that what you're saying?

15 MR. CRAIN: Yeah.

16 MS. BLAIR: Got it.

17 BY MR. CRAIN:

18 Q. So Ms. Campione, can you read the website
19 that you're looking at now? The URL.

20 A. Ww.hospitalsafetygrade.org [sic].

21 Q. And can you describe where on the page
22 the lives lost and lives saved link is?

1 A. Yes. It's under "your hospital safety
2 grade." And there are -- one, two, three, four,
3 five -- six tabs you can click on. And this is
4 the fifth tab.

5 Q. Okay. And why don't you go ahead and
6 click on it. It might be a touchscreen.

7 A. Fancy.

8 Q. Are you there?

9 A. It's not -- yes, I'm there.

10 Q. And does it go to the same page we were
11 looking at, entitled, Lives Lost and Lives Saved?

12 A. Yes.

13 Q. And that is Exhibit -- let's see -- 24?

14 A. Yes.

15 MS. BLAIR: And for the record, Lee,
16 that's two clicks, then. You have to click on
17 "Your hospital safety grade" and then you click
18 on "Lives Lost and Lives Saved," correct?

19 MR. CRAIN: Let me see. Is that right?

20 MS. BLAIR: That's how I'm seeing it.

21 THE WITNESS: You have to go to the
22 main --

1 MR. CRAIN: You go to the main website --

2 THE WITNESS: You have to toggle over,
3 then you have to toggle over.

4 MR. CRAIN: And there's a dropdown.

5 THE WITNESS: Yup.

6 BY MR. CRAIN:

7 Q. Okay. Just for the record, Ms. Campione,
8 can you describe what you have done to get there?

9 A. I have hovered over four [sic] hospitals,
10 and then I've read through five different tabs --
11 oh, wait, I'm in the wrong one, sorry.

12 What -- "your hospitals." So one of --
13 two, three, four, five -- there are six tabs at
14 the top. I've hovered over the second one. Now
15 I've hovered over -- one, two, three, four,
16 five -- or four different tabs I could click on.
17 I've clicked on this one.

18 In my opinion, that's not on the front
19 page of our website.

20 Q. The link is on the front page, yes?

21 MS. BLAIR: Objection to form. It is
22 not.

1 THE WITNESS: With a lot of hovering.

2 MR. CRAIN: Okay. I'll take it.

3 BY MR. CRAIN:

4 Q. While you're there, can you go back to
5 hospitalsafetygrade.org?

6 A. There.

7 Q. I'd like you to go to the search
8 function. And can you search by hospital?

9 A. Yes.

10 Q. And type in Delray, please.

11 What do you see?

12 A. Hospital match. One hospital matching,
13 hospital name: Delray Medical Center.

14 Q. And what's on the left side of the page?

15 A. The F grade, and it says, Delray Medical
16 Center, and their address.

17 Q. What's the biggest letter on the page?

18 A. The F.

19 Q. Can you click into Delray? Can you
20 please navigate to the 26-page methodology and
21 narrate as you're clicking through?

22 A. Okay. To the meth- -- wait. Do you want

1 me to -- like, I know where it is.

2 Q. Yeah. Take us through how to get there.

3 A. Okay. I would go to perhaps the -- I
4 mean, there's multiple -- it's posted multiple
5 places on the website, so there's a number of
6 ways I could go to it.

7 Q. If you're a patient looking at Delray's
8 score, how would you go to find it? That's what
9 I you to show me.

10 MS. BLAIR: Objection to form.

11 THE WITNESS: Well, if I wanted to know
12 the methodology, I would go to "your hospital,"
13 "about the grade," maybe scroll down, and I see
14 "How is the Leapfrog hospital safety grade
15 produced?"

16 And there's a lot of information here
17 about the measures that are used, process
18 outcome; it explains it. And I see a link right
19 to the right that says, Quick links, scoring
20 methodology used in the spring's 2025 release of
21 the hospital safety grades.

22

1 BY MR. CRAIN:

2 Q. And that takes you to the 2- -- is it 26
3 or 28-page PDF?

4 A. The spring 2025 safety grade scoring
5 methodology.

6 Q. Which I think was our Exhibit 1, right?

7 A. Yes.

8 Q. Great. Okay.

9 MR. CRAIN: Can we take five?

10 MS. BLAIR: Sure. Yes.

11 VIDEO TECHNICIAN: The time is 5:42 p.m.
12 This ends unit 6. We're off the record.

13 (A recess was taken.)

14 VIDEO TECHNICIAN: The time is 6:00 p.m.
15 This begins unit number 7. We're on the record.

16 BY MR. CRAIN:

17 Q. We're in the home stretch, Ms. Campione.
18 We talked a little bit about the 2019
19 white paper, the lives saved, lives lost.

20 Do you remember that discussion?

21 A. Yes.

22 Q. Is Leapfrog working on an update to that

1 analysis?

2 A. I believe they're in the process of
3 working on something with them --

4 Q. Do you have any role --

5 A. -- with Matt Austin.

6 Q. With Matt -- I just want to make sure.
7 With Matt Austin?

8 A. Yes.

9 Q. Do you have any role in that revised
10 white paper?

11 A. No, I don't, personally, really. I mean,
12 I've communicated a few times. As far as -- I'm
13 trying to remember. I'm not remembering at the
14 moment, but he does the analysis. I think I
15 provided -- or pointed them towards the data
16 sets, and -- but the analysis is actually done by
17 Preeti Joshi that we referenced earlier, his
18 research assistant, and Matt himself.

19 Q. Okay. Is there anybody else at Leapfrog
20 that works on the white paper with them?

21 A. I wouldn't say work on it. Like,
22 ultimately, he's going to write it, and he does

1 the analysis. I think -- but -- who would have
2 been involved? I don't remember who would
3 exactly have been facilitating that.

4 Q. And we had seen that you maybe
5 co-authored some prior papers with him; is that
6 right?

7 A. There might be, like, one paper. I don't
8 think anything has been, like, published in a
9 scientific journal, but I think there was
10 something with Urban Institute, perhaps.

11 Q. Racial disparities in care?

12 A. Yes.

13 Q. Do you know if you'll be an author on the
14 new white paper?

15 A. No, I wouldn't -- that was under -- it
16 was a different role that I was filling in that.

17 Q. Do you know why they're updating the
18 analysis?

19 A. To get more up-to-date data.

20 Q. To the point we were talking about
21 before?

22 A. Sure. Yes.

1 Q. Okay. Do you know when the revised
2 analysis is expected to come out?

3 A. I think they're planning for the fall,
4 but you never know. Sometimes we do analyses and
5 nothing ever happens. I think we're due to
6 probably update that page.

7 Q. Okay. And why do you say we're due to
8 upgrade that page?

9 A. Like you said --

10 Q. Update that page, excuse me.

11 A. It came out in 2019, so it's probably
12 reached the end of its relevancy.

13 Q. It's no longer accurate?

14 A. I wouldn't say --

15 MS. BLAIR: Objection to form.

16 THE WITNESS: I wouldn't say no longer
17 accurate. I think it's an accurate portrayal of
18 where hospitals were at that time.

19 BY MR. CRAIN:

20 Q. Got it. Okay. But it would not be an
21 accurate portrayal of hospitals at this time?

22 A. Well --

1 MS. BLAIR: Objection to form.

2 THE WITNESS: It doesn't mean that it
3 wouldn't be applicable in any way. We use --
4 people reference studies all the time that
5 happened many years ago.

6 BY MR. CRAIN:

7 Q. Okay. I want to shift gears. Can we go
8 to Exhibit 1 again, the survey methodology.

9 MS. BLAIR: So I have Exhibit 1 as this.

10 MR. CRAIN: I'm sorry. Is it Exhibit 2?

11 MS. BLAIR: Yeah, but we can do this
12 one --

13 MR. CRAIN: You know what --

14 THE WITNESS: I have it as 2.

15 MR. CRAIN: -- it's Jupiter Exhibit 1.

16 MS. BLAIR: Yeah.

17 MR. CRAIN: It's Campione Exhibit 2.

18 MS. BLAIR: Correct. Just making sure.

19 MR. CRAIN: We're going to be in trouble
20 down the line. It's going to be Binder
21 Exhibit 3 --

22 MS. BLAIR: Hey, I asked if we could just

1 keep going, but...

2 MR. CRAIN: I just work here.

3 MS. BLAIR: Same.

4 BY MR. CRAIN:

5 Q. So Ms. Campione, I want to go in to look
6 at some of the way things are described here.

7 Can you go to page -- let's see -- 10.
8 Actually, 11, please. I'm sorry. And it's Bates
9 17511. Actually, there are two Bates. We'll
10 just use the internal.

11 MS. BLAIR: For the record, I'm not
12 sure -- some of the documents look like this, and
13 the larger number is the first page of the
14 document itself, and then the smaller number is
15 the subsequent pages.

16 I have no idea how or why that happened,
17 but --

18 MR. CRAIN: I've never seen that.

19 MS. BLAIR: So it's the smaller number.
20 So it's 17522 you're referring to.

21 MR. CRAIN: Okay. That's helpful to
22 know.

1 MS. BLAIR: Yeah.

2 BY MR. CRAIN:

3 Q. All right. So do you see at the top,
4 Ms. Campione, it says, National Quality Forum:
5 Safe practices?

6 A. Yes.

7 Q. That's one of the three what I called
8 discarded measures at the beginning of the day --

9 A. Okay.

10 Q. -- is that right?

11 A. Yes. You did call them that.

12 Q. And I know you call them something
13 different, but -- we didn't settle on a
14 nomenclature, so I'm just going to call them the
15 discarded measures.

16 Now, when you scroll down -- not scroll
17 down.

18 When you look down to the paragraph There
19 is no secondary data -- do you see that?

20 A. Yes.

21 Q. So it says, There is no secondary data
22 source for the NQF safe practices. Therefore,

1 hospitals that did not submit a 2024 Leapfrog
2 hospital survey by November 30 will not have
3 those measures included in their safety grade and
4 the measure will be reported as "declined to
5 report." See dealing with missing data for more
6 information.

7 Do you see that?

8 A. Yes.

9 Q. And that's an accurate depiction of how
10 the methodology works?

11 A. Yes.

12 Q. Now, is it right that there's no
13 secondary data if a hospital participated in a
14 prior survey?

15 A. Are you asking me if I think that's right
16 or do you [sic] think that's accurate?

17 Q. Let me fix the question. I'm doing a lot
18 of that today.

19 If a hospital participated on a prior
20 survey, there would be secondary data for safe
21 practice 1 and safe practice 2, correct?

22 MS. BLAIR: Objection to form.

1 THE WITNESS: If there was an imputation
2 model used on these measures, then yes.

3 BY MR. CRAIN:

4 Q. So setting aside whether there's an
5 imputation model, if the hospital -- for
6 hospitals that complete a survey, they get a
7 score on safe practice 1, right?

8 A. Okay. Yes.

9 Q. Yes?

10 A. Wait. They get a score, yes, when they
11 complete the survey. It's -- the only data
12 source is the Leapfrog hospital survey.

13 Q. Yes. If the hospital the next year does
14 not participate, there's no current score, right?

15 MS. BLAIR: I'll object to form, the use
16 of "score."

17 BY MR. CRAIN:

18 Q. What should I call it?

19 A. Sorry, I just don't know where --

20 Q. Okay.

21 A. No current score where?

22 Q. Safe practice 1. If a hospital

1 participates in the survey, it gets a score for
2 safe practice 1?

3 A. Right. They're given the score, yeah,
4 based on how they responded to the survey.

5 Q. Okay. And if a hospital does not respond
6 the next year, takes the shortcut we've talked
7 about --

8 A. They would be reported as declined to
9 report.

10 Q. Okay. Why are they reported as declined
11 to report instead of taking the prior year's
12 survey score?

13 A. Because there's no imputation model used
14 on these measures.

15 Q. Okay. Why is there no imputation model?

16 A. Because the safety grade expert panel
17 decided a long time ago that these measures won't
18 have imputation used.

19 Q. What is the rationale for that decision?

20 A. I believe because -- I wasn't there when
21 this happened, but it's because these are process
22 measures and they believe that at any time a

1 hospital could change their practices, I guess,
2 because it's a process measure, and they didn't
3 feel it was appropriate to impute for these
4 measures, but they did feel it was appropriate to
5 impute for those other measures.

6 Q. Okay. Do you believe it's appropriate to
7 draw that distinction?

8 A. Yes.

9 Q. Why?

10 A. Because I think that makes sense.

11 Q. Why?

12 A. Because of the reasons I said.

13 Q. So you just agree with the reasons that
14 you imputed to the expert panel, right?

15 A. Yeah, but -- and it's also -- I mean,
16 it's not what -- my opinion doesn't really
17 matter. It's the expert panel, ultimately.

18 Q. Well, it does today.

19 A. It does today.

20 MS. BLAIR: Object to form.

21 BY MR. CRAIN:

22 Q. Okay. So I want to go back up, just --

1 if you go to page 10. And it says -- this is the
2 IPS measure.

3 Do you see that?

4 A. Yes.

5 Q. It says, at the bottom, under the chart,
6 For hospitals that did not submit a 2024 Leapfrog
7 hospital survey by November 30th, see "using
8 secondary data sources" for detailed information
9 on Leapfrog's imputation methodology.

10 Do you see that?

11 A. Yes.

12 Q. And just so I'm clear, do you know what
13 the secondary data source we're talking about is
14 here?

15 A. Well, it's imputation. So if you go to
16 that section, then you would learn more.

17 Q. So it's step 1 or step 2?

18 A. Yes.

19 Q. And step 1, the secondary data source is
20 the historical score, right?

21 A. Yes.

22 Q. And step 2, what is the secondary data

1 source?

2 A. Is step 2 imputation.

3 Q. It's just lowest achievement?

4 A. Right. They're assigned a score of
5 limited achievement.

6 Q. Is that a secondary data source, or is
7 that just an assignment?

8 A. That -- well, I mean, I guess imputation
9 is the source.

10 Q. Imputation is the secondary data source?

11 A. It's up to -- I mean --

12 Q. Isn't that --

13 A. The expert panel approved it, and they
14 believe that that can be used as a secondary data
15 source.

16 Q. Do you think the expert panel really
17 grappled with all these distinctions?

18 MS. BLAIR: Objection to form.

19 THE WITNESS: It's within their purview
20 to do so.

21 BY MR. CRAIN:

22 Q. Do you think they did?

1 A. I don't know.

2 Q. You were on the meeting, right?

3 A. I would hope that they would. They're
4 putting their stamp of approval on it and their
5 name is associated with it, so I would hope that
6 they would.

7 Q. Okay.

8 A. I can't verify it. I wasn't there. I'm
9 not in their home every night.

10 Q. Fair enough.

11 Now, do you think it's clear to the
12 layperson -- going back to what we've discussed
13 earlier today -- the difference between dealing
14 with missing data and secondary data sources,
15 that Leapfrog has no data for the IPS metric for
16 non-participating hospitals?

17 A. Sorry?

18 Q. Yeah, I can clarify.

19 A. Clarify.

20 Q. When you read this, is it clear just from
21 these two pages that Leapfrog does not have any
22 data to support a limited achievement score for

1 non-participating hospitals?

2 MS. BLAIR: Objection to form.

3 THE WITNESS: Well, I mean, I think they
4 usually look at the scoring methodology
5 holistically. And if you're sent to a different
6 page, you should go to a different page, and it
7 provides more context.

8 BY MR. CRAIN:

9 Q. So let's go to that page. Can you help
10 me find it?

11 A. Secondary data sources?

12 Q. Yeah.

13 A. 15.

14 Q. 15? Thank you.

15 Is this just the imputation methodology?

16 A. No. There's also CMS data which is
17 another secondary data source.

18 Q. Got it. Okay. So it covers multiple
19 forms of secondary data, not just imputation.

20 A. Right.

21 Q. Okay. And again, for non-participating
22 hospitals without a historical score, the only

1 secondary data source is the imputation.

2 A. Yes.

3 Q. Okay. Okay. I want to just take a
4 look --

5 MR. CRAIN: Tab 9. This will be
6 Exhibit 25.

7 MS. BLAIR: 25?

8 MR. CRAIN: Yes. 25.

9 (Campione Deposition Exhibit 25 marked
10 for identification and attached to the
11 transcript.)

12 BY MR. CRAIN:

13 Q. Do you have it, Ms. Campione?

14 A. Yes.

15 Q. So this is, if you look at the first
16 page, another Slack chat.

17 Do you see that?

18 A. Yes.

19 Q. And the date range is from October 4th,
20 2023?

21 A. Yes.

22 Q. And the folks on the thread include you,

1 Paige, and Slack Bot. Do you see that?

2 A. Yes.

3 Q. And who is Paige?

4 A. Paige Lipscomb.

5 Q. Okay. Who is Paige -- Lipscomb, you
6 said?

7 A. Lipscomb.

8 Q. Lipscomb. Who is she?

9 A. She's a former employee at Leapfrog.

10 Q. Okay. I want to -- do you remember we
11 were talking about the HCA participation earlier
12 today?

13 A. Yes. Yes.

14 Q. That HCA at some point declined to
15 participate in the survey?

16 A. Yes.

17 Q. Okay. I want to go down to October 4th
18 at 11:31.

19 A. Yes.

20 Q. Okay. And it actually starts -- let's
21 start at 11:30.

22 So Paige says, Are they a D for the

1 grades? What else would she be referring to?

2 Do you have any recollection who "she"
3 is?

4 A. I don't know, no.

5 Q. Okay. And she says, Why are convos
6 always so bizarre?

7 And then you say, This was the last
8 meeting in a nutshell.

9 Any recollection of what you're referring
10 to?

11 A. So going down, it looks like we're
12 talking about a regional leader meeting.

13 Q. What is that?

14 A. That would be a meeting with the regional
15 leaders.

16 Q. Who are the regional leaders?

17 A. The regional leaders are individuals
18 across the country that are -- they're not
19 representatives of hospitals. They're usually
20 representatives of, like, business coalitions and
21 purchasers -- or they're part of, like,
22 organizations that represent them.

1 I don't -- I'm not totally clear on who
2 they are --

3 Q. Okay.

4 A. -- I just know that they're people across
5 the country that care about our programs.

6 Q. Can I ask you, to that point, are you
7 aware that Leapfrog was founded by employers?

8 A. Yes. And purchasers.

9 Q. And purchasers. Do you know anything
10 about how that came to be?

11 A. No, not really. I wasn't around then.

12 Q. Do you know what employers?

13 A. I know probably some big names I think
14 I've seen. But I was -- I believe I was seven
15 years old at the time.

16 Q. Fair enough. Okay.

17 And what are the big names you're
18 referring to?

19 A. Maybe Boeing, I think I've heard, or
20 Marriott.

21 Q. Ms. Danforth would know more?

22 A. Yes, she definitely would. And Leah

1 Binder would definitely know more.

2 Q. Got it. Okay. So you -- keep going
3 down. So you say, This was the last meeting in a
4 nutshell. We were talking about changing scoring
5 methodology to penalize HCA.

6 Do you see that?

7 A. Yes.

8 Q. Do you remember what you're referring to
9 there?

10 A. Not really. I mean, I guess in
11 October 2023, it would have been perhaps when we
12 added total nursing care hours, but I'm not sure.

13 2024 was -- yeah, I don't remember off
14 the top of my head any methodology changes that
15 we made during that time. But we didn't make
16 it -- I don't think we made any in the following
17 spring. I'm not sure.

18 Q. Okay. And do you remember any effort
19 whatsoever to penalize HCA?

20 A. You know, I remember -- this -- this was,
21 like, my extrapolation. I was probably reading
22 into it because, like you said, there was --

1 right around that same time, they hadn't done the
2 survey by that point; we're in October now and
3 they hadn't done the survey. And I think Leah
4 was definitely upset about that.

5 And they were just throwing around
6 making -- these regional leader meetings are kind
7 of -- they're just -- they don't -- the regional
8 leaders don't day in/day out look at the scoring
9 methodology and know things. They're not --
10 they're just meeting and talking, essentially.
11 Leah starts a meeting by talking about what's
12 going on at Leapfrog, and I'm only ever on them
13 if I just have to give them an update about when
14 the safety grade is going to start again and all
15 that sort of thing.

16 So it's basically just a bunch of random
17 people giving their opinions and their insights
18 into, like, what they've seen hospitals in their
19 area doing or what they're saying because
20 they're, like, meeting with hospitals.

21 Q. Who is talking about changing the scoring
22 methodology to penalize HCA?

1 A. I don't think anyone was talking about
2 that explicitly. I was just, like, that was my
3 reading into this. Because, again, I'm kind
4 of -- especially at this point, I've only been
5 there -- what would that be? -- like half a year.
6 And so --

7 Q. I thought you started --

8 A. Oh, my gosh. I keep thinking I started
9 in 2023.

10 Okay. Well, I'm not on the inside of
11 these meetings, and so I'm just making
12 assumptions.

13 Q. Okay. And then Paige says, What in the
14 world?

15 And she says, I hate that we don't just
16 do our thing; like, we manipulate everything.

17 And then you respond -- maybe I'll ask
18 you to read it.

19 A. Bananaland.

20 Q. What did you mean by bananaland?

21 A. What does bananaland mean to you?

22 Like, honestly, I don't even know what

1 the context is for this.

2 Q. And then you say, Leah keeps grudges.

3 Do you see that?

4 A. Yes. So I don't know what she -- who she
5 was talking about exactly. I really don't -- I
6 don't know what was going on in this --

7 Q. Is this your --

8 A. What they were saying.

9 Q. Is that still your opinion?

10 A. That she keeps grudges? I think that she
11 cares about patient safety. And she has a lot of
12 relationships at this point with people and she's
13 disappointed if a hospital decides to -- or a
14 system, or something like that, does something
15 she doesn't think is fair. And I think that's
16 fine.

17 I keep grudges. Is that okay?

18 Q. I'm afraid of that.

19 MR. CRAIN: And I think, with that, with
20 a little bananaland, I will pass the witness.

21 MS. BLAIR: And I have no questions.

22 So...

1 MR. CRAIN: Ms. Campione, you're free to
2 go.

3 MS. BLAIR: You're free to go.

4 VIDEO TECHNICIAN: The time is 6:20 p.m.
5 This concludes today's deposition. We're off the
6 record.

7 (Whereupon at 6:20 p.m., the videotaped
8 deposition of ALEXANDRA CAMPIONE was
9 concluded.)

CERTIFICATE OF NOTARY PUBLIC

I, CHRISTINA S. HOTSKO, the officer before whom the foregoing deposition was taken, do hereby certify that the witness whose testimony appears in the foregoing deposition was duly sworn by me; that the testimony of said witness was taken by me in stenotypy and thereafter reduced to typewriting under my direction; that said statement is a true record of the proceedings; that I am neither counsel for, related to, nor employed by any of the parties to the action in which this statement was taken; and, further, that I am not a relative or employee of any counsel or attorney employed by the parties hereto, nor financially or otherwise interested in the outcome of this action.

CHRISTINA S. HOTSKO

Notary Public in and for the
District of Columbia

My commission expires:

1 January 2027

3 ACKNOWLEDGEMENT OF DEPONENT

4 I, Alexandra Campione, do hereby declare that I
5 have read the foregoing transcript, I have made any
6 corrections, additions, or changes I deemed necessary as
7 noted above to be appended hereto, and that the same is
8 a true, correct and complete transcript of the testimony
9 given by me.

Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY.

THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

Exhibit 89

IN THE UNITED STATES DISTRICT COURT
FOR THE SOUTHERN DISTRICT OF FLORIDA
WEST PALM BEACH DIVISION
CASE NO.: 9:25-CV-80526-DMM

GOOD SAMARITAN MEDICAL
CENTER, INC., et al.,
Plaintiffs,

vs.

THE LEAPFROG GROUP,
Defendants.

CONFIDENTIAL

VIDEO-RECORDED

DEPOSITION OF: KAREN VAN CAULIL

DATE: September 25, 2025

TIME: COMMENCED: 9:03 a.m.

CONCLUDED: 12:31 p.m.

TAKEN BY: Plaintiffs

PLACE: Wilson Elser Moskowitz Edelman & Dicker,

P R O C E E D I N G S

THE VIDEOGRAPHER: Good morning. We are on the record at 9:03 a.m. on September 25, 2025.

Please note that the microphones are sensitive and may pick up whispering and private conversations. Please mute your phones at this time. Audio and video recording will continue to take place unless all parties agree to go off the record.

This is media unit number 1 of the video-recorded deposition of Karen van Caulil taken by counsel for plaintiff in the matter of Good Samaritan Medical Center, Inc., et al., versus The LeapFrog Group.

My name is Anthony Giagnacova and the court reporter is Mae Fisher, both representing Veritext Legal Solutions.

Counsel will now state their appearances and affiliations for the record beginning with the noticing attorney, after which the court reporter will swear in the witness.

MR. HVIDT: This is Scott Hvidt with Gibson Dunn for the plaintiffs.

MS. DABANKA: Elizabeth Dabanka with Gibson Dunn for the plaintiffs.

MR. BILLEK: Max Billek from Wilson Elser on

1 behalf of LeapFrog Group and I'm representing the
2 witness as well.

3 THE WITNESS: Hi, I'm Karen van Caulil with the
4 Florida Alliance for Healthcare Value.

5 THE COURT REPORTER: Can you raise your right
6 hand, please.

7 Do you solemnly swear or affirm that the
8 testimony you are about to give in this cause will be
9 the truth, the whole truth, and nothing but the truth?

10 THE WITNESS: Yes.

11 KAREN VAN CAULIL,
12 a witness herein, having been first duly sworn, was
13 examined, and testified as follows:

14 DIRECT EXAMINATION

15 BY MR. HVIDT:

16 Q. Good morning, Ms. Van Caulil.

17 A. It's Dr. van Caulil.

18 Q. Dr. van Caulil. Thank you.

19 A. It's okay.

20 Q. I was about to ask if that's how I should refer
21 to you.

22 A. Karen is fine.

23 Q. Karen is fine.

24 A. Yes.

25 Q. Okay. Could you please state your full name for

1 the record again?

2 A. Sure. It's Karen van Caulil.

3 Q. And do you understand that the court reporter is
4 taking down all the questions I ask and the answers that
5 you will be providing?

6 A. Yes.

7 Q. Have you been deposed before?

8 A. Yes. It's many years ago, I was trying to
9 remember how long, probably 30 years ago.

10 Q. And is that the only time you've been deposed?

11 A. Yes.

12 Q. And what type of matter was that?

13 A. It was in North Carolina. It was a certificate
14 of need-related matter.

15 Q. And I know it's been 30 years. But I'm just
16 going to go over a few ground rules for the deposition
17 to make her life easier today.

18 A. Okay.

19 Q. So because she's taking down a record, let's try
20 not to talk at the same time. I will try to allow you
21 to finish your answers completely before asking the next
22 question. I ask that you allow me to finish my question
23 before you begin your answer.

24 Do you understand that?

25 A. Yes, I do.

1 Q. And all the answers will need to be audible. So
2 no nodding of the heads or shaking heads so that she's
3 able to take down the actual words that you're answering
4 with.

5 A. Okay.

6 Q. And do you understand that you are testifying
7 under oath today?

8 A. Yes.

9 Q. And are you taking any medications or any
10 influence that would make it difficult for you to
11 understand questions or provide accurate answer?

12 A. No.

13 Q. If you don't understand one of my questions, and
14 that's very likely, please -- please ask to -- for me to
15 rephrase it and so -- because if you do not do so, we'll
16 assume -- the record will assume that you knew what I
17 was talking about.

18 A. Okay.

19 Q. From time to time, your counsel might object to a
20 question and so we will get into a cadence back and
21 forth, but please allow for a pregnant pause to allow
22 him to assert an objection if there's one that's needed.

23 A. I understand.

24 Q. And then please do speak up if you'd like a
25 break, need to go to the bathroom, need food, need

1 anything. But I'd just ask that we not take a break
2 during -- while a question is pending.

3 A. Okay.

4 Q. Thank you.

5 Dr. van Caulil, do you work?

6 A. Yes.

7 Q. Where do you work?

8 A. I work at the Florida Alliance for Healthcare
9 Value.

10 Q. And what do you do for them?

11 A. I'm the president and CEO.

12 Q. And what is included in your job responsibilities
13 as the president and CEO?

14 A. So we are a small nonprofit. We're a business
15 coalition on health. We're a 501(c)(3) research and
16 education organization.

17 We -- if you're familiar with business coalitions
18 on health, it's public and private sector employers who
19 come together in a learning community. The employers we
20 work with are typically self-funded, which means they're
21 paying the bills for healthcare and they have the
22 ability to flex their benefit design, do variations on
23 their network, their outreach, et cetera.

24 And so in my capacity as president and CEO, I'm
25 leading the organization in terms of, you know, the

1 projects and initiatives and the research that we
2 undertake. I have a board of directors and that's
3 composed of nine public and private sector employers.
4 So as far as, you know, board-related matters, that's in
5 my purview to work with the board.

6 I -- we work in policy as well, to make sure that
7 the employer voice is heard in Tallahassee and in D.C.
8 around health matters. Typically they haven't
9 participated on the healthcare policy and the employers
10 we work with are not healthcare businesses. They are
11 school districts and manufacturing companies and many
12 other industries. And so when they have worked in the
13 policy space, it's been around their core business. So
14 this is an area where if we see something that might
15 impact them favorably or not, we would be involved in
16 policy there.

17 I oversee my staff. I have a vice president. I
18 have a project and a program coordinator and an
19 administrative coordinator.

20 I'll stop there, if you have any further
21 questions.

22 Q. That's very helpful. So one item today, so if I
23 called it the Florida Alliance for Healthcare Values
24 today The Alliance?

25 A. Florida Alliance.

1 Q. Florida Alliance. Would that be what you'd
2 prefer for just --

3 A. Yeah, because there actually is a sister
4 organization called The Alliance in Wisconsin, so not to
5 confuse with them.

6 Q. Wonderful. Yeah, I want to just make sure that
7 we can come up with a terminology.

8 A. Florida Alliance works.

9 Q. Florida Alliance will be how we refer to it
10 today. Thank you for that.

11 A. Um-hmm.

12 Q. So as the name might suggest, for the Florida
13 Alliance, are all the employer members Florida
14 employers?

15 A. They -- it's a mix because there are some, like a
16 public school district. You know, all of their
17 employees, their plan members are in the state of
18 Florida. But there are companies that are members that
19 may have lives in other states or even globally. So
20 it's a mix.

21 Q. But do all --

22 A. But they all have at least -- I'm sorry, to
23 finish the thought -- they all have to have lives in
24 Florida.

25 Q. Wonderful. So like a company might have

1 employees in Florida and in California and they can be a
2 member of the Florida Alliance?

3 A. Yes. As long as they have lives in Florida.

4 Q. Understood. And so if the company only has
5 live -- only has employees or lives in California but
6 not any in Florida, they cannot be a member of the
7 Florida Alliance?

8 A. That's correct. Actually, I'd like to clarify
9 that. Not an employer member. So we have affiliate
10 members. And affiliate members are a mix of -- it's
11 hospitals and healthcare systems. It's solution
12 providers in healthcare, benefits consultants and they
13 typically are not headquartered in Florida. They may
14 have employees, but that's not a factor in that level of
15 membership. Sorry I wasn't clear on that.

16 Two -- two different levels. We also have a
17 healthcare advisory council and that's some hospitals
18 and healthcare systems, only a handful of those. We are
19 moving that category into affiliate so we only have the
20 two.

21 Q. And as a nonprofit with these multiple types of
22 members, is the organization focused on the benefit of
23 the employer members and then the affiliate members are
24 also in service of that mission? Is that a fair way to
25 refer to it?

1 A. Yes. I would say so. We're led by the
2 employers. It is a business coalition on health and the
3 affiliate members and the healthcare advisory council
4 members work with us on projects and initiatives. We
5 work in as multi-stakeholder way as possible. They
6 provide a lot of resources. They're also very
7 interested in what employers are doing and thinking and
8 challenged by, so it's an opportunity for them as well
9 to interact and to learn.

10 Q. And you mentioned that these employers are in a
11 variety of industries and they're not in the healthcare
12 industry, per se. Is there interest in healthcare
13 values related to their provision of health plans to
14 their employees?

15 A. I'm not understanding your question. This is the
16 employer members you're speaking about? Would you mind
17 repeating the question?

18 Q. Yeah. So your employer members are in a variety
19 of industries.

20 A. Right.

21 Q. Correct?

22 A. Correct.

23 Q. And they are members of the Florida Alliance for
24 Healthcare Values?

25 A. Yes.

1 Q. And their interest in healthcare values, is that
2 connected to their provision of health plans to their
3 employees?

4 A. Yes. I just want to clarify. You're saying
5 values, plural, it's not. You had that on the
6 deposition that way. It's Florida Alliance for
7 Healthcare Value. It's the cost and the quality
8 equation for value. So just want to clarify that.

9 Q. Thank you. And so --

10 A. So --

11 Q. So to go back to the question --

12 A. Yes.

13 Q. -- to make that clear.

14 A. Sorry.

15 Q. So the member -- the employer members of the
16 Florida Alliance for Healthcare Value, their interest in
17 healthcare, is that related to their provision of health
18 plans to their employees?

19 A. Yes. It is also related to educating their
20 workforce in the healthcare space. So it's not limited
21 to the provision of coverage. It is that culture of
22 health and well-being is also part of that.

23 Q. And that is -- what they're trying to do -- what
24 they're interested in there is not just providing a
25 health plan to their employees, but helping give their

1 employees information about the options they see in the
2 medical area to make the right healthcare decisions for
3 themselves; is that a fair way of saying it?

4 A. Some of the employers do that. I don't have
5 sight on all 80 of the employers and what they're
6 providing to their -- to their workforce, to their
7 employees. But some do that. And they do that through
8 different ways. They might have a vendor who works with
9 them in a -- you know, sort of a narrow network sort of
10 way. They might have direct contracts. You know,
11 there's different vendors who the employee can go in and
12 search on a provider and look at, you know, their
13 ratings from all different organizations. But they
14 don't all do that.

15 Q. I am handing you what's been marked as Exhibit 1
16 in your deposition.

17 (Exhibit No. 1 was marked for identification.)

18 BY MR. HVIDT:

19 Q. Have you seen this document before?

20 A. Yes.

21 Q. And what is this document?

22 A. This is the notice given to me that I'm having
23 this deposition today.

24 Q. You see this is the notice of the subpoena for a
25 non-party Karen van Caulil here at Wilson Elser --

1 A. Yes.

2 Q. -- in Orlando, Florida --

3 A. Yes.

4 Q. -- on September 25th?

5 A. Yes.

6 Q. I'd ask, just a reminder to let me finish --

7 A. Sorry.

8 Q. -- my question before answering. I know that I
9 can be foreshadowing sometimes of where I'm going but
10 just for the ease of the court reporter.

11 A. I apologize.

12 Q. No worries. Thank you.

13 And do you see what's called the case caption up
14 above, where it says Good Samaritan Medical Center, et
15 al., versus The LeapFrog Group?

16 A. Yes.

17 Q. Do you understand that you are being deposed in
18 that litigation?

19 A. Yes.

20 Q. And is Florida Alliance a party to that
21 litigation?

22 A. I don't believe that Florida Alliance is party.

23 Q. And are you a party to the litigation?

24 A. I don't believe I am.

25 Q. And do you have an understanding of what the

1 lawsuit is about?

2 A. Yes.

3 Q. And in your own words, what do you understand the
4 lawsuit to be about?

5 A. My understanding is that the five hospitals in
6 Palm Beach County that are part of Tenet Healthcare
7 wanted The LeapFrog Group to suppress their grades from
8 the spring hospital grade reporting. That the hospital
9 system has issue with the way the methodology generates
10 the grade. That's basic understanding.

11 Q. And do you have an understanding of what your
12 role may or may not be in the litigation?

13 A. I believe that my role is because the Florida
14 Alliance for Healthcare Value is the regional leader
15 organization, that there may be some interest by the
16 hospitals in that role that we serve.

17 Q. Did you prepare for your deposition today?

18 A. Yes.

19 Q. How did you prepare for your deposition?

20 A. I had a couple of meetings with my attorneys,
21 two. I looked at some of the e-mails that I knew that I
22 was involved with regarding LeapFrog in recent times. I
23 scanned our weekly bulletins, which is our major
24 communication with our employer members every week, just
25 to remind myself of what information we shared with them

1 over time. I thought about what questions you might be
2 asking me and thought about my responses.

3 So I will say that the regional leader
4 responsibilities in our organization fall to my vice
5 president, Ashley Tait-Dinger, so I don't attend
6 regional leader meetings. If I have over the years,
7 it's been minimal when she's unable to attend. So she
8 is the absolute main contact for regional leader
9 activities. So just to clarify that, that I don't have
10 -- you know, I don't sit in on regional leader meetings.
11 I don't review what they're -- what they're doing.
12 That's Ashley's role in the organization.

13 Q. Did you speak with Ashley before your deposition
14 today to prepare for it?

15 A. She had major surgery last Wednesday and is out
16 on medical leave so I did talk to her before she went
17 out. Just to, you know, clarify a few things that, you
18 know, I figured I should probably, you know, know. I
19 asked if anyone had reached out, you know, for example,
20 about the lawsuit that she may not have mentioned to me
21 and nobody had. Questions like that.

22 Q. And in preparing for your deposition, did you
23 review any documents outside the presence of counsel?

24 A. Are you asking did I look at documents on my own?

25 So I looked at -- well, I'm also trying to think

1 about the timing of getting the deposition, versus what
2 I might have seen prior to that time. So I -- I read
3 what was in the media, different articles that were
4 published in the spring. I read the LeapFrog response
5 to that. So those are things that I had done
6 previously.

7 Q. And in meeting -- you mentioned meeting with your
8 counsel in preparation for today's deposition. How long
9 were the meetings that you had with counsel?

10 A. I would say probably each of them was an hour,
11 hour and a half.

12 Q. And is -- are you or Florida Alliance paying for
13 your counsel's time in this matter?

14 A. No. LeapFrog is paying, as I understand.

15 Q. You could set that aside. We don't need that.

16 A. Where do I put it?

17 MR. BILLEK: You just turn it upside down.

18 BY MR. HVIDT:

19 Q. You can just turn it upside down.

20 MR. BILLEK: So it's not distracting.

21 THE WITNESS: Okay.

22 BY MR. HVIDT:

23 Q. I understand we don't have that much space.

24 Dr. van Caulil, did you attend college?

25 A. Yes.

1 Q. And where did you attend college?

2 A. My undergrad was at Duke University.

3 Q. And what was your degree in?

4 A. Bachelor of science in biology.

5 Q. And do you have any professional degrees?

6 A. I have a master's and I have a doctorate. But
7 when you say a professional degree, what would be an
8 example of a professional degree?

9 Q. Those would both be examples of professional
10 degrees.

11 A. Okay.

12 Q. What is your master's in?

13 A. Master of science in public health and health
14 policy and administration.

15 Q. And where did you earn that degree?

16 A. University of North Carolina at Chapel Hill.

17 Q. And you mentioned you had a doctorate. What is
18 your doctorate in?

19 A. I have a PhD in public affairs from the
20 University of Central Florida.

21 Q. And following receiving your degree, can you --
22 degrees, could you walk me through at a high level your
23 employment history?

24 A. Sure. So following graduation from college, I
25 was employed in Durham, North Carolina, with a company

1 called Medical Personnel Pool. And they were a home
2 health agency and supplemental staffing and I was a
3 coordinator. So that was for a couple years. And then
4 I worked at Duke hospital in the department of surgery
5 in between my undergrad and master's also, and then
6 while I was working on my master's, I was a research
7 assistant in the department of surgery.

8 After my master's, I did an administrative
9 residency at North Carolina Baptist Hospital, which is
10 in Winston-Salem. And from there, they hired me to work
11 in the department of clinical strategic planning, which
12 was a joint department between the hospital and the
13 school of medicine.

14 We moved from North Carolina to Florida and I
15 telecommuted, which was unusual back then, and stayed
16 with them for a couple of years and then worked on a
17 contract basis. I -- when I had my kids, I was a
18 consultant doing a lot of certificate of need work,
19 still for Baptist and some other clients.

20 Then I was hired in -- here in Orange County in
21 Orlando to develop and implement the system of care for
22 the uninsured here in Orange County. And -- so that
23 involved securing a federal grant to be able to bring
24 all the different stakeholders together to create that
25 system.

1 Then I was hired to be the executive director of
2 the Health Council of East Central Florida, which is a
3 regional health planning agency. So that's four
4 counties of Orange, Osceola, Seminole and Brevard, so
5 sort of Greater Orlando. And the University of Central
6 Florida College of Medicine recruited me away to be the
7 director of health planning to help build the medical
8 city here in Lake Nona.

9 And also in that position, I managed a big
10 federal grant to bring -- I think it was 1400 primary
11 care docs from paper charts to electronic health
12 records. And since then, I've been at the Florida
13 Alliance. Our legal name is actually Central Florida
14 Healthcare Coalition and the d/b/a is Florida Alliance.
15 We did a name change with the d/b/a probably six years
16 ago. It was Florida Healthcare Coalition and changed
17 the name in 2019.

18 I have been adjunct faculty at UCF, you know, in
19 that time period as well.

20 Q. Thank you. Impressive career.

21 Did you start the Florida Alliance when you
22 joined or did it exist before you got there?

23 A. The Central Florida Healthcare Coalition, the
24 legal name organization, started in 1984. So no, I did
25 not start it. I was in my senior year of college then.

1 So well before I got to Florida.

2 Q. And does the -- does Florida Alliance -- does it
3 have a relationship with any governmental entities?

4 A. So we have in our membership municipalities and
5 county governments. So in that capacity, yes.

6 Q. And is there any relationship between Florida
7 Alliance and our state regulator of hospitals?

8 A. The only relationship I think that would fit in
9 that category would be that I chair the Agency for
10 Healthcare Administration's -- it's a long name --
11 Advisory Council. State Consumer Health Information and
12 Policy Advisory Council. So that advisory council is in
13 statute to, you know, ensure that the state-reported
14 data, the regulator data is transparent and available to
15 consumers in a way that they can understand it.

16 Q. And is that -- you mentioned that you chair that
17 agency.

18 A. I currently, yeah.

19 Q. Is that a -- that sounds like it is a
20 relationship that you have. Is that correct?

21 A. Correct. That's why I was saying, the only thing
22 that really comes to mind, there's no contractual
23 relationship that we have with the state. So I don't
24 believe that there is anything beyond disclosing that I
25 have that role that I play on a volunteer basis.

1 Q. And does the Florida Alliance have any
2 relationship with any of the plaintiff hospitals in this
3 litigation?

4 A. No.

5 Q. Has the Florida Alliance ever communicated with
6 the plaintiff hospitals?

7 A. Ashley has sent letters requesting all of the
8 hospitals, including those, to fully participate,
9 encourage them to fully participate in the LeapFrog
10 hospital survey. She has signed off on those letters in
11 recent years. I signed off on them in the past. So I
12 think that's probably the only correspondence that we
13 ever had, and that is to basically say, we encourage you
14 to participate; we are all about transparency of
15 healthcare quality and costs and hope that you will
16 consider doing so and direct them to LeapFrog to take it
17 from there.

18 Q. And you mentioned LeapFrog. Do you understand
19 The LeapFrog Group is the defendant in this litigation?

20 A. Yes.

21 Q. And does the Florida Alliance have a relationship
22 with the defendant, LeapFrog Group?

23 A. The Florida Alliance is the regional leader
24 organization for the -- for Florida, for LeapFrog.

25 Q. And what is a regional leader organization for

1 LeapFrog?

2 A. So that's the vehicle that The LeapFrog Group
3 uses in, you know, in the markets, if you will. And I
4 don't know if they're -- they're not all necessarily at
5 a state level. It depends on the regional leader
6 organization that they work with. Some are, you know,
7 municipality level. Some might even be multistate.

8 And the regional leaders are the organizations
9 that, using the influence of employers and other
10 purchasers to encourage hospitals to be transparent
11 about patient safety and quality. So sending those
12 letters that I mentioned a few minutes ago is really
13 probably the most major aspect. I think -- I certainly
14 couldn't respond for what every regional leader
15 organization does. I think there's, you know, some
16 differentiation on the level of activity that they --
17 that they do.

18 For us, as regional leader, we make sure that our
19 employer members receive the reports that are generated
20 by The LeapFrog Group, that they're aware of the
21 websites for the survey and the grades, so they can go
22 there and use the information and the resources there.
23 We will also conduct meetings with hospitals with our
24 employers to talk about all different issues and
25 LeapFrog will often come up in those. So it's kind of

1 high level.

2 Q. You mentioned that part of being a regional
3 leader, the Florida Alliance makes sure that its
4 employer members are aware of the grades that LeapFrog
5 Group releases; is that correct?

6 A. Yes. Make them aware that they've been released
7 and then they can go and look for themselves in their
8 respective markets. What we'll do is, we have a weekly
9 bulletin that goes out almost every week of the year.
10 There are a couple weeks in the year that we don't do
11 it. And when the spring release and the fall release
12 comes out, we will do a synopsis that says, you know, we
13 had, you know, this many hospitals graded, this many
14 were A, B, C, D, F, have the link so that they can go to
15 the website. We will generate a press release that's
16 sort of high level, too. There were this many -- excuse
17 me -- hospitals in each of those grade levels. And,
18 also, if there were top hospitals -- and this is also
19 for ASCs. I shouldn't say it's just hospitals; it's
20 also the ambulatory surgery centers but direct them, you
21 know, for more information to go directly to LeapFrog to
22 get that information.

23 Q. And as part of the Florida Alliance's
24 relationship with The LeapFrog Group, you mentioned this
25 regional leader component, is part of the regional

1 leader component; is there a contract that governs that
2 relationship?

3 A. No.

4 Q. It's a volunteer relationship?

5 A. Yes.

6 Q. No money is exchanged, either direction, as part
7 of that relationship?

8 A. No money is exchanged. I do get reimbursed for
9 travel expenses if -- and so does Ashley, if we need to
10 leave Florida to go, you know, to a meeting. But that's
11 the only -- only exchange.

12 Q. And is there any other relationship between
13 Florida Alliance and The LeapFrog Group, other than the
14 regional leader relationship?

15 A. I serve on the board as an individual. No other
16 relationship beyond regional leader for the
17 organization. There is a data use agreement between
18 LeapFrog and the Florida Alliance, at least in the past,
19 we don't have a current data use agreement. So the last
20 year or so, LeapFrog has a new platform and a different
21 agreement came through and we've been back and forth
22 just trying to get clarification on the wording so we
23 don't have an active agreement. So right now, there's
24 nothing in force.

25 Q. To break that down a little bit, so you are

1 currently a member of the LeapFrog board of directors;
2 is that correct?

3 A. Yes.

4 Q. And your membership on the LeapFrog board of
5 directors is in the capacity -- in your individual
6 capacity; is that correct?

7 A. Yes.

8 Q. Your membership on the LeapFrog board of
9 directors is not something that's like the Florida
10 Alliance gets an automatic member on the LeapFrog board
11 of directors?

12 A. That's correct. It's because of my individual
13 experience and expertise and relationships with other
14 organizations. It's not -- it's not a Florida Alliance
15 board seat.

16 Q. Thank you. And then you mentioned the data use
17 agreement. What is the data that is at issue in that
18 agreement?

19 A. Well, Ashley knows all the details of that. I
20 would say at a kind of basic level, it would be the
21 hospital and ambulatory surgery grade data, survey data.
22 You know, I don't think there's anything else in there,
23 if you have the data use agreement and have access to
24 that data.

25 Q. And is there any fee that the Florida Alliance

1 pays The LeapFrog Group to get access to that data
2 pursuant to the data use agreements?

3 A. No.

4 MR. HVIDT: I am handing the witness what has
5 been marked as Exhibit 2.

6 (Exhibit No. 2 was marked for identification.)

7 MR. HVIDT: And Exhibit 2 was produced in this
8 litigation as FHA000045. The plaintiffs received this
9 production from the Florida Alliance on Tuesday night
10 and when we received it, the documents were identified
11 by code, like this Bates number, but they were not
12 Bates stamped.

13 Our vendor in uploading them yesterday did not
14 have time to apply the Bates stamping consistent with
15 the coding that Florida Alliance applied in the
16 document ID before we needed to print them for the
17 deposition today. So we are proceeding without Bates
18 stamped versions today for the Florida Alliance
19 productions.

20 And on the record, want to ask counsel for the
21 witness, who's also counsel for the defendant,
22 LeapFrog Group, if it's okay that we apply, insert a
23 Bates-copied version of the same document as soon as
24 one is available for purposes of the documents used
25 today that were produced by Florida Alliance?

1 MR. BILLEK: Of course.

2 THE WITNESS: May I ask what a Bates stamp is?

3 BY MR. HVIDT:

4 Q. Yes. A Bates stamp is a -- so you will see one
5 from a document produced by LeapFrog Group later. And
6 it is at the bottom right-hand corner of the document
7 and it simply is a coding where it's -- the code I read
8 in FHA0045, it would simply say that on that first page
9 and then the next page would go to 46.

10 A. Okay.

11 Q. And it's meant for evidentiary purposes so that
12 when we're talking about a document, we know that we're
13 all talking about the same thing.

14 MR. BILLEK: So it's like a page number that we
15 stamp on when we give it over.

16 THE WITNESS: Okay. Thank you.

17 BY MR. HVIDT:

18 Q. You're welcome.

19 A. So Bates must have been an important person, I
20 guess.

21 MR. BILLEK: Exactly.

22 THE WITNESS: At some point.

23 MR. HVIDT: I have handed the witness
24 Exhibit 2.

25 BY MR. HVIDT:

1 Q. Dr. van Caulil, have you seen this document
2 before?

3 A. Yes.

4 Q. And what is this document?

5 A. So this is the slide deck that was used for our
6 annual meeting of the board of directors in March. That
7 was our 41st annual board of directors meeting.

8 Q. And does the Florida Alliance have a process for
9 saving documents in the ordinary course of business?

10 A. Yes.

11 Q. And as far as you're aware, was this document
12 pulled from that process, that computer server that
13 saved this document in the ordinary course?

14 A. I was not involved in pulling the documents at
15 the request. So I don't know whether this came off of
16 our server or whether that was something that was just
17 directly turned over. Sorry, I don't. I don't know.

18 Q. Do you have any reason to doubt that this
19 document is an accurate reflection of the document that
20 was presented to the board of directors on March 4 of
21 2025?

22 A. Well, if I could just flip through quickly, I
23 could answer that question.

24 Q. Please go ahead.

25 A. Thank you.

1 THE VIDEOGRAPHER: The microphone.

2 THE WITNESS: I'm sorry. Didn't mean to do
3 that.

4 I don't have any reason to doubt that this
5 document is an accurate reflection of what was
6 presented.

7 BY MR. HVIDT:

8 Q. And was this document prepared in the ordinary
9 course of business?

10 A. Yes.

11 Q. And did you have a role in creating this
12 document?

13 A. Yes.

14 Q. And if you flip to page 2, do you see where it
15 says, Today's agenda?

16 A. Yes.

17 Q. And you see the first item on the agenda is a
18 call to order, welcome and overview?

19 A. Yes.

20 Q. And do you see your name there listed as the
21 president and CEO?

22 A. Yes.

23 Q. If we could flip to page 4 where the -- where the
24 title of the page is Florida Alliance Staff. Do you see
25 that?

1 A. Yes.

2 Q. And it lists your name there at the top.

3 Correct?

4 A. Yes.

5 Q. And then earlier today, you mentioned Ashley
6 Tait-Dinger. Do you recall that?

7 A. Yes.

8 Q. And is her name listed there as the vice
9 president?

10 A. Yes.

11 Q. And what is her role for Florida Alliance?

12 A. So as you can see, we're a small staff. In fact,
13 Jack Mahoney has subsequently retired, so it's just the
14 four of us. So if you're familiar with running a
15 nonprofit organization, everybody wears multiple hats to
16 be able to execute on the mission and actually be a
17 viable, sustainable organization.

18 Ashley's responsibilities are regional leader
19 responsibilities. She does our financial work and
20 compliance and insurance and sort of the business of
21 running the business, I would say. She is a very
22 technical person, so she does IT and data. So those are
23 her primary responsibilities. But if I'm unable to
24 attend a meeting or run a meeting, she could get called
25 on to do that.

1 I could say those are her primary
2 responsibilities. But -- and, as I said, as a small
3 organization, it's -- you know, other duties as
4 assigned. Happens pretty frequently, so...

5 Q. You mentioned one of Ashley's responsibilities is
6 as regional leader responsibilities. When you were
7 referring to regional leader responsibilities, those are
8 The LeapFrog Group regional leader responsibilities; is
9 that correct?

10 A. Yes.

11 Q. And looking at this list of the Florida Alliance
12 staff, below Ashley's name is Lisa Hain. Is that how
13 you pronounce it?

14 A. Yes.

15 Q. And what is Lisa Hain's role?

16 A. So she provides support to all of our team in
17 terms of scheduling meetings. She -- so she keeps my
18 calendar in particular. She facilitates the
19 correspondence between the board and the Florida
20 Alliance and with our members. She maintains the
21 website. She may, you know, at times work on the weekly
22 bulletin if I need her to look something up or find a
23 link. So she is administrative only. She's not project
24 management at all.

25 Q. And one of her roles you mentioned was

1 facilitating correspondence. Does she initiate
2 correspondence on behalf of Florida Alliance on her own
3 with members?

4 A. No.

5 Q. And so if she's sending a correspondence to a
6 Florida Alliance member, is that either because you or
7 Ashley directed her to do so?

8 A. Yes. Or on my behalf. So I should clarify to
9 say, you know, a lot of the letters that we do only need
10 to be updated or, you know, slightly amended. She'll
11 pull up out of the records the most recent version of a
12 document and do a preliminary updating or I'll direct
13 her or Ashley will direct her. Well, that same
14 correspondence needs to go to this party, you know, to
15 do that. So she doesn't do content-related generation
16 of a document.

17 Q. Understood. So she might send a document on --
18 an e-mail on your behalf; is that correct?

19 A. Yes. She will do that.

20 Q. Do -- consistent with that, does Lisa Hain -- or
21 Hain report to you?

22 A. Yes, she does.

23 Q. Does Ashley Tait-Dinger report to you?

24 A. Yes.

25 Q. If we could flip now to page 8. The title of the

1 page is Board of Directors 2025 to 2026.

2 A. Um-hmm.

3 Q. Please let me know when you're at that page.

4 A. I am.

5 Q. Is this the current Florida Alliance board of
6 directors?

7 A. Yes.

8 Q. And other than you listed there, are these
9 individuals all representatives from Florida employers?

10 A. Yes.

11 Q. And if you could, who is Kenneth Aldridge?

12 A. So he is the director of health services at Rosen
13 Hotels & Resorts. He also serves as our secretary and
14 treasurer on the board.

15 Q. And do you know -- do you know how many Florida
16 employees Rosen Hotels & Resorts has?

17 A. I don't have the actual number of employees, but
18 I think it's in the four to 5,000 range.

19 Q. And then can you tell me a little bit about Beth
20 Curran?

21 A. Yes. So she is the senior director of risk
22 management for Orange County Public Schools. She's also
23 the compliance officer on the board.

24 Q. And do you know how many employees approximately
25 Orange County Public Schools has?

1 A. Again, I don't have the number of employees. And
2 the reason that I don't, there's a couple reasons. We
3 have 80 employer members, so I don't have those numbers,
4 and they fluctuate. But sometimes that gets conflated
5 with covered lives in this world that we work in of
6 benefits. So I do know that Orange County Public
7 Schools probably has 32,000 covered lives. I think that
8 employee number is in the twenties. But that's just
9 ballpark.

10 Q. And the reason that covered lives might exceed
11 the number of employees is because some -- an employee
12 might have dependents that are included in the health
13 plan; is that correct?

14 A. Yes. And sometimes they have retirees.

15 Q. And so let's continue to use the phrase covered
16 lives moving forward as I try to communicate about this.
17 So going back to Rosen Hotels, do you have an
18 understanding of -- an estimate of how many covered
19 lives Rosen Hotels & Resorts has?

20 A. No. Let me explain why it would be better to
21 stick with an employee ballpark because our dues that
22 the members pay are on a sliding fee scale based on
23 their number of Florida employees.

24 I do know about Orange County Public Schools
25 covered lives because I've been in meetings where that

1 has come up. So I -- you know, again, I don't have
2 specifics on any of them, so I'm going to be giving you
3 my best guess as we go down -- down the line here.

4 Q. I appreciate that. Thank you. And it's possible
5 that the number of covered lives under Rosen
6 Hotels & Resorts exceeds the four to 5,000 estimate of
7 number of employees that it has; is that correct?

8 A. It's possible. I don't know if all of their --
9 they call them associates, their employees are eligible
10 for benefits in the hotel industry. There might be
11 part-time people not eligible. So I wouldn't say it's a
12 definite that -- it varies from industry to industry.
13 So I don't know the answer to that.

14 Q. Thank you.

15 And then can you tell me about Jair Espinosa?

16 A. Jair.

17 Q. Thank you.

18 A. Jair Espinosa is -- I don't know whether it's
19 benefits director or benefits manager at the City of
20 Miami. I honestly couldn't guess at this point how many
21 employees they have. They're not a very, very large
22 organization. So it's probably 2,000 if I were to
23 guess, but I don't feel comfortable guessing, so...

24 Q. And can you tell me about Sara Holtzman DeMarino?

25 A. Yes. So LYNX is Central Florida transit

1 authority. She is in a wellness, well-being position
2 there. I don't -- off the top of my head, I don't
3 know -- anticipating your next question on lives or
4 employees -- I don't -- I don't know.

5 Q. Appreciate that. Just for purposes of creating a
6 record, if we could -- I know that it's clear where I'm
7 going with my next question. But if -- just with your
8 counsel's permission, if we could stick with the
9 question asked and then to establish the record, that
10 would be helpful. I'll try to be as efficient as
11 possible.

12 A. Okay.

13 Q. And so to be clear, you do not know how many
14 employees or covered lives LYNX has; is that correct?

15 A. That's correct. I'm not comfortable guessing.

16 Q. And can you tell me a little bit about Dawn Hunt?

17 A. Sure. She leads benefits for MarineMax. They're
18 a national, if not global, company. But they are
19 headquartered here in Florida.

20 Q. And do you know how many Florida covered lives or
21 employees MarineMax has?

22 A. It's right around the 2,000 employee mark.

23 Q. And can you tell me about Stephanie Koch, Koch
24 (pronouncing)?

25 A. Koch.

1 Q. Koch. Third try.

2 A. Stephanie is the director of HR, human resources
3 for Hendry Marine Industries. She is the vice chair of
4 our board. And Hendry Marine has 400 employees.

5 Q. Can you tell me a little bit about Susan McBroom?

6 A. Susan is also the head of human resources in her
7 position at Patriot Rail. They are also a smaller
8 employer within Florida, probably three to 400 or a
9 couple -- I'll just say 300, ballpark, employees.

10 Q. And can you tell me about Rosa Novo and any
11 understanding of how many Florida employees or covered
12 lives Miami-Dade County Public Schools has?

13 A. Sure. So Rosa is our board chair. And her title
14 is administrative benefits director for the district.
15 They are the largest school district in the state of
16 Florida, third largest in the country. As far as
17 covered lives, it's in the 50,000 mark.

18 I don't have an updated number for the school
19 districts because this year there's been a loss of the
20 number of students and staff for a variety of reasons
21 across the state. So that's the most recent number that
22 I've heard.

23 Q. Thank you. And then lastly, can you tell me a
24 little bit about Mark Weinstein and any understanding of
25 how many Florida covered lives or employees ICUBA has?

1 A. Um-hmm. So Mark Weinstein is the CEO of ICUBA
2 and that is Independent Colleges and Universities
3 Benefits Association. They're a little bit different
4 than the other employer representatives on the board in
5 that they're a multiple-employer welfare arrangement.
6 And the short version of that is called a MEWA. So they
7 have, I believe, 25 private educational institutions
8 that come together in this MEWA to purchase healthcare
9 services. And they do that through ICUBA. I believe
10 there's about 15,000 employees in all of these different
11 private schools.

12 Q. And for the private educational institutions
13 within ICUBA, are those all Florida private
14 universities?

15 A. Yes. They're all located in Florida.

16 Q. Do you know if any of them are located in the
17 Palm Beach County area?

18 A. No. I don't know for sure. But it's possible.
19 They have schools in South Florida, Orlando and Tampa
20 predominantly. But I can't think of any that are
21 specifically in Palm Beach County. Nova Southeastern
22 University is one of their members, and I don't know
23 that they have a campus there.

24 Q. Thank you. Understanding that these were
25 estimates that you were able to provide here today, I've

1 been adding that all up, and so between Rosen
2 Hotels & Resorts, four to 5,000 employees; Orange County
3 Public Schools, 32,000 covered lives, the City of
4 Miami's estimated 2,000 employees; not knowing the
5 number with LYNX; the 2,000 MarineMax; the 400 employees
6 with Hendry Marine Industries; the three to 400 with
7 Patriot Rail; the approximately 50,000 with Miami-Dade
8 County schools, understanding that there's been some
9 changes within that; and the approximately 15,000 among
10 the 25 private educational institutions within ICUBA,
11 that adds up to just over 100,000 Florida employees
12 covered by the -- represented by the employers on your
13 board of directors; is that fair to say?

14 MR. BILLEK: Object to form.

15 You can answer. You can answer.

16 THE WITNESS: I -- we have a mix of employees
17 and covered lives in that calculation, so it's not all
18 apples and apples.

19 BY MR. HVIDT:

20 Q. Understanding that to be the case, do you --
21 understanding that there are some of those numbers that
22 are employees and some of those numbers that are covered
23 lives, if you add up the employees and the covered lives
24 as you've testified today where you've known those
25 numbers or estimated those numbers, do you -- is that

1 a -- adding those numbers all up, is that -- does that
2 sound right to you?

3 MR. BILLEK: Object to form.

4 You can answer.

5 THE WITNESS: Well, I didn't add them up. If
6 you added them up and that's the total that you got,
7 that sounds about right. I did not -- I don't have a
8 calculator in front of me and I didn't do a running
9 tally. It doesn't sound out of line.

10 BY MR. HVIDT:

11 Q. Flipping to page 13, where it says at the top,
12 2024 by the numbers, do you see that?

13 A. Yes.

14 Q. Do you see where it says that you have 87
15 employer members?

16 A. Yes. This was 20 -- from the 2024 annual report.
17 Yes.

18 Q. Do you know how many employer members you have
19 sitting here today?

20 A. It's just over 80. The difference between the 87
21 and the 82 is largely because there were banks that also
22 are another MEWA under the Florida Bankers Health
23 Consortium that merged or were taken over by other
24 banks, so it's attributed primarily to that.

25 Q. Do you know approximately how many Florida

1 covered lives are under that -- under your employer
2 membership?

3 A. We haven't done an update of that in a while and
4 need to. Over the years, it's been, you know, about
5 300,000, 400,000. What has complicated that calculation
6 is that sometimes the employers will send all of the
7 lives in all of their markets and all of their states
8 and will have to go back and forth on that. So I have
9 held back on publishing any number because I don't want
10 to have apples and oranges. And we've actually had
11 discussions about, well, should we -- should we ask
12 covered lives, rather than employees? Should we say
13 anywhere, not just Florida? So we haven't landed on a
14 final decision on that. But it is a significant number
15 of employees/lives that are represented by the 80-plus
16 employer members.

17 Q. And for your 80-plus employer members, do you
18 know how many employees are included within that?

19 A. No, that would be part of that update.

20 Q. So the answer as it relates to employees would be
21 similar to the -- the same as the answer you gave to the
22 question about how many covered lives there are within
23 the employer members; is that correct?

24 A. That's correct. I wish I had the specifics, but
25 it has -- seems like it should be a pretty

1 straightforward ask and answer, but it doesn't always
2 come back that way. So -- and as I mentioned
3 previously, some employers, based on the industry, not
4 every employee is eligible for benefits. Some have
5 dependents. Some have retirees. So that also
6 unfortunately complicates the calculation. So we -- we
7 try.

8 Q. Understanding that the number is difficult to
9 calculate, you mentioned earlier that the last estimate
10 you were aware of was around 300 to 400,000 Florida
11 covered lives; is that correct?

12 A. That's correct. But that's probably four or five
13 years ago.

14 Q. Do you think that that number has increased?

15 A. I think it's probably not vastly different for a
16 few reasons. I mean, we've had additional employer
17 members but also workforce size has also gone down in
18 some instances. So, you know, there are gains and
19 losses in different -- different members. So I feel
20 comfortable with that as a ballpark.

21 Q. If you could flip to the next page, do you see
22 where it says, Employer Members?

23 A. Yes.

24 Q. And then if you flip to the next page, does this
25 page represent the logos of the employer members that

1 granted you permission to use their logos on the page?

2 A. Yes.

3 Q. And then I believe that this page number I'm
4 going to flip to is towards the back of the document.
5 And so we'll take time to get there. But if you could
6 flip to the page that is 2025 Plan of Work.

7 A. Okay.

8 Q. It's page 38 of the PDF.

9 A. Oh, must have just passed it.

10 I have it.

11 Q. Thank you. Do you see where the top of the slide
12 reads, 2025 Plan of Work?

13 A. Yes.

14 Q. And is the plan of work a high-level summary of
15 the things that Florida Alliance is going to be doing in
16 the year 2025?

17 A. Yes. It's a high-level list of what we hope to
18 be able to work on. It is a mix of what we've secured,
19 if there's a grant, perhaps, project funding that we
20 might be seeking. So it basically covers the high-level
21 description of the projects.

22 Q. And if you look at the second bullet there, do
23 you see where it says, LeapFrog regional leader
24 activities/employer action reports?

25 A. Yes.

1 Q. And are the LeapFrog regional leader activities
2 consistent with those that we talked about earlier?

3 A. Yes.

4 Q. And what are employer action reports?

5 A. So we haven't been able to work on those yet
6 because we do not have a data use agreement. And that
7 is in LeapFrog's court right now and they've been busy
8 of late. And that would give us permission to create,
9 for the employers at their request, reports that could
10 use some of the LeapFrog survey and grade data alongside
11 other data. Fair price-related activities that you
12 could see later on the list.

13 And so in the back and forth on the data use
14 agreement, we're trying to get permission to show
15 LeapFrog results and, also, other -- other sources of
16 data. And that hasn't -- process has not been
17 completed. So we haven't done -- we haven't done that.
18 But that would be for the employers as they're figuring
19 out their changes they might have in networks and their
20 benefit design. A lot of them have been looking at
21 direct contracting. For example, you can see that also
22 on the list. They would ask us for information and we
23 haven't -- we haven't done an employer action report in
24 several -- several years. But the board members had
25 suggested that that would be useful.

1 Q. When was the last year that you did an employer
2 action report, if you can recall?

3 A. Well, that was one of the questions that I asked
4 Ashley because I couldn't recall and she said it's
5 probably January of 2020, she said, preCOVID.

6 Q. When you say that employers are looking into
7 direct contracting, what is direct contracting?

8 A. So they -- there's a bunch of different ways to
9 do direct contracting. But they could work with the
10 health plan, the carrier, the TPA, whatever phrase they
11 use who administers their health plan to carve out a
12 particular center of excellence as an example. Or they
13 may hire a separate third-party administrator to have a
14 relationship, not just with a hospital, it could be with
15 independent physicians for specific services.

16 Oftentimes it is to, you know, get a better deal
17 on the cost that they're paying, but they want to make
18 sure that these are providers who are doing a good job,
19 have good outcomes. So they do their due diligence to
20 determine that that's an appropriate strategy for
21 driving value in their health plan.

22 We have members who might direct contract for
23 home health services, for infusion services. It's such
24 a variety.

25 Q. And one example of direct contracting that you

1 mentioned is if an employee wants to carve out a
2 particular center of excellence, did I get that right?

3 A. They may have a direct contract with a center of
4 excellence, yeah. It could be carved in, it could be
5 carved out.

6 Q. And does a center for excellence there refer to a
7 particular hospital or health system?

8 A. It could. But it could also be an outpatient.
9 It could be community oncologists. The term center of
10 excellence is used pretty -- pretty broadly. A lot of
11 health -- you know, healthcare systems say they're a
12 center of excellence for oncology or cardiac, so it
13 really does depend on what the organization is referring
14 to for themselves. But what the employers, when they
15 say a center of excellence, this is a provider who, from
16 their due diligence, has been able to have good
17 outcomes, has -- if applicable to LeapFrog in
18 particular, you know, they have done well in terms of
19 achieving, you know, in the survey results or the grade
20 results, but they certainly look at a lot of other --
21 other data.

22 So excellence has a lot wrapped into it. It's
23 price, it's quality, it's patient safety, it's equity.
24 So...

25 Q. And so it's possible -- some of them -- some of

1 your employer members are looking into direct
2 contracting; is that correct?

3 A. Yes.

4 Q. And one mechanism you can build into a direct
5 contract, if you're an employer, is you might get a
6 better deal by directing from a particular provider by
7 directing your employees to that provider; is that fair?

8 A. Yes. It usually has an element of a volume
9 expectation.

10 Q. And Florida Alliance is looking to create
11 employer action reports that use LeapFrog survey and
12 grading data to help facilitate its Florida members'
13 efforts into potentially direct contracting with
14 providers; is that correct?

15 A. Yes. That's one of the reasons that an employer
16 member would want that information.

17 Q. Thank you.

18 MR. HVIDT: We've been going about an hour.
19 Would you like to take a break, go off the record for
20 a minute?

21 THE WITNESS: I'm fine to keep going. It's up
22 to you.

23 MR. HVIDT: Are you okay?

24 THE COURT REPORTER: I'm fine, thanks.

25 MR. HVIDT: I'm happy to keep going if you're

1 okay. I just wanted to be mindful of that.

2 THE WITNESS: Thank you.

3 BY MR. HVIDT:

4 Q. You can set that document to the side.

5 A. Thank you.

6 Q. Earlier, we were talking about how Florida
7 Alliance is LeapFrog's regional leader; is that correct?

8 A. Yes.

9 Q. And do you understand what LeapFrog's goal is in
10 having regional leaders?

11 A. Yes. I think that the goal is to have boots on
12 the ground in the various states and regions of the
13 state who have relationships with employers and
14 healthcare purchasers to be able to reach out to the
15 hospitals they have relationships with and ambulatory
16 surgery centers, and they would be -- the regional
17 leader organizations would presumably be more familiar
18 with the market. And that helps LeapFrog with their
19 mission.

20 Q. Is one of the goals of LeapFrog's relationship
21 with the regional leaders to increase hospital
22 participation in the LeapFrog hospital survey?

23 A. Yes. Because, you know, our mission certainly
24 syncs with LeapFrog's mission to promote transparency.
25 And so having all of the hospitals, all of the

1 ambulatory surgery centers in the state fully respond to
2 their respective surveys would be the ultimate goal.

3 Q. You say that part of Florida Alliance's goal --
4 mission is to promote transparency. Is that correct?

5 A. Yes.

6 Q. Do you also ask for transparency from LeapFrog?

7 A. I don't know that we've explicitly had to ask
8 LeapFrog because they've been transparent about, you
9 know, how the -- you know, the hospitals and the
10 ambulatory surgery centers are asked to participate, the
11 process for submitting the data. They publish their
12 methodology. I won't speak for Ashley Tait-Dinger but
13 she's very active, I know from hearing from others on
14 the regional leader calls. If she has questions about
15 anything, she has never said that there was any pushback
16 or refusal to answer any questions she might have.

17 So I would say that, you know, our relationship
18 with LeapFrog has been, you know, very clear and any
19 questions, if we did have them, were always answered.
20 But, you know, methodology specifics would have to go to
21 the website and look at them specifically. I could not
22 tell you off the top of my head about the complexity of
23 that.

24 Q. I am handing you what's been marked as Exhibit 3
25 to your deposition.

1 (Exhibit No. 3 was marked for identification.)

2 BY MR. HVIDT:

3 Q. The -- Exhibit 3 has been produced in this
4 litigation as LEAPFROG00401485. And it is the 2025
5 regional leader communications toolkit launching
6 LeapFrog surveys.

7 Do you see that?

8 A. I do.

9 Q. Have you seen this document before?

10 A. I have not. If I could just flip through it,
11 there may be pieces of it I have seen. This would be a
12 document that would go to Ashley.

13 Yeah, this is not a document that would have been
14 sent to me personally. This would be the toolkit that
15 the representatives at the regional leader organizations
16 would use to -- I assume to guide the process. And
17 we've been involved with LeapFrog since 2002 as an
18 organization, and Ashley's worked on LeapFrog as her
19 responsibility -- she's probably been with the
20 organization 12 years, so I have full confidence in her,
21 in carrying out those duties.

22 Q. And Florida Alliance is one of LeapFrog's
23 regional leaders; is that correct?

24 A. Florida Alliance is the regional leader for
25 Florida for LeapFrog.

1 Q. And Ashley works for Florida Alliance; is that
2 correct?

3 A. That's correct. She's the vice president, as we
4 discussed earlier.

5 Q. And looking at this cover page to this document,
6 it is described as the communications toolkit for
7 regional leaders. Do you see that?

8 A. Yes.

9 Q. And if we go to the next page, you look down at
10 the last paragraph, see that the first sentence there,
11 do you see where it says, The 2025 communications
12 toolkit offers you instructions for launching the
13 LeapFrog Hospital survey and the LeapFrog ASC survey in
14 your region, focusing on the critical initial
15 communication you carry out, to encourage hospital and
16 ASC participation.

17 Do you see that?

18 A. Yes.

19 Q. Do you have any understanding whether Ashley and
20 Florida Alliance follows the communications toolkit that
21 LeapFrog provides?

22 A. I don't know if every item that's in here is
23 something that she does. I -- I don't know the answer.

24 Q. Do you know if she follows it generally?

25 A. I would have to assume, yes. There isn't -- as

1 we talked about earlier, there isn't a contract or an
2 agreement that says you will do this at this time in
3 this way. There's nothing like that. This is a
4 volunteer activity. And I believe I also said earlier
5 that my understanding is the regional leader
6 organizations do different levels of activity. I'm sure
7 it's a bandwidth issue with different organizations.
8 We're small, some are smaller than we are.

9 So I don't think this is a -- my best guess would
10 be that this is not a document that there's an
11 expectation that everybody is doing every single thing
12 in here. It's a guide.

13 Q. And would you agree that LeapFrog is providing
14 its regional leaders with this guide in hopes that they
15 follow it?

16 A. I'm sure they would like the regional leaders to
17 follow the guide.

18 MR. BILLEK: Just note my belated objection to
19 the form of the question.

20 BY MR. HVIDT:

21 Q. If you could flip to page 4 of this document,
22 which ends in 488 on the Bates stamp. Do you see where
23 it says, Step by step how to launch the LeapFrog
24 hospital survey and LeapFrog ASC survey in your market?

25 A. Yes.

1 Q. And then do you see that this slide, this page
2 and the next, provide a numerical list of recommended
3 action items to encourage participation in the survey?

4 A. From a quick scan, yes. But I haven't read all
5 of these to know what all those steps are.

6 Q. Understand. And then if you look at item 1, it
7 says, To get members and hospitals and ACSs excited
8 about the 2025 surveys.

9 Do you see that?

10 A. Yes.

11 Q. And then step 2 references, Personalizing
12 template letters asking hospitals to participate.

13 Do you see that?

14 A. Oh, down 2 -- yes. I see it now.

15 Q. And then if you look down to 4, it says, Send
16 hospitals letters by mail or e-mail no earlier than
17 March 30th but no later than April 30th.

18 A. Yes.

19 Q. And then if you go over to step 5, it says,
20 Follow up with those who have not responded.

21 Do you see that?

22 A. Yes.

23 Q. Is it fair to say that LeapFrog is encouraging
24 that regional leaders take multiple -- communicate
25 multiple times with hospitals or ACSs to encourage them

1 to participate in a given year?

2 A. Yes.

3 Q. Do you have any understanding from your role on
4 the LeapFrog board of directors that participation in
5 the surveys, the more there is, the better it is for
6 LeapFrog's finances?

7 MR. BILLEK: Object to form. You can answer.

8 THE WITNESS: The hospitals and ACSs do not pay
9 to participate in the survey. So answering it from my
10 role on the board, that's not a correct -- that's not
11 a correct question. There is not a financial line
12 item related to survey participation.

13 BY MR. HVIDT:

14 Q. So while the hospitals don't pay to participate
15 in the survey, does the increase in the number of
16 hospitals that participate in the survey impact the
17 licensing revenue that LeapFrog is able to achieve?

18 A. So I really don't know much about the licensing
19 revenue. I believe that's to be able to use the data.
20 Is that -- is that what the licensing revenue is that
21 you're referring to?

22 Q. The licensing that I was referring to there is
23 the licensing of the survey responses that hospitals
24 provide LeapFrog in participating in the survey.

25 But then moving on, do you have any understanding

1 whether the number of hospitals that participate in this
2 survey, if it increases, leads to a directional increase
3 in the number of accolades, subscriptions that LeapFrog
4 is able to get from hospitals?

5 A. So it would follow that the pool of potential
6 hospitals that could -- going back to your other
7 question -- pay to receive the results and/or pay the
8 accolade fee -- and I don't know how much either of
9 those are -- if that pool is greater, then I would agree
10 that that, you know, stands to be advantageous for
11 LeapFrog. That's not a discussion that I've been a
12 party to at any time. I wouldn't -- you know, I would
13 assume that makes sense. If there's more -- more
14 hospitals participating, then there's more hospitals who
15 might be interested in the data and might be interested
16 in participating in that accolade program.

17 Q. Flipping to slide -- page 7 of Exhibit 3, ending
18 in Bates number 491, do you see where it says, Best
19 practices used by regional leaders?

20 A. Yes.

21 Q. And the first item there bulleted under,
22 Launching the LeapFrog surveys in your community, do you
23 see where it says, Engage employers with purchasing
24 power to influence hospital decision-making based on
25 hospital survey participation?

1 A. Yes.

2 Q. Do you have an understanding why LeapFrog is
3 recommending that regional leaders engage employers with
4 purchasing power?

5 A. So all employers have purchasing power. It's
6 their second largest line item, healthcare is, and
7 hospital services are a significant portion of that.

8 So do I have an understanding why LeapFrog is
9 recommending engaging employers with purchasing power?
10 Well, my understanding, notwithstanding LeapFrog's
11 recommendation, is that all employers should be engaged,
12 you know, in speaking to, you know, the hospitals and
13 other providers in their markets about being transparent
14 with their price and their quality and their patient
15 safety.

16 And so I don't know how to answer the question on
17 any understanding why LeapFrog is recommending it. I
18 think it's broader than that. I think it's engage
19 employers across the board to be able to be more active
20 purchasers of healthcare, to insist upon transparency,
21 to be able to get their own data. This is not just an
22 issue that's with LeapFrog and the employers. They're
23 challenged by getting data from the PBMs, from the
24 health plans, their own data, if you will, their claims.

25 So one of the things that we do, not just as a

1 regional leader, but, you know, for our members, is to
2 get them to be more active. They do wield influence in
3 the market, especially, you know, if they're a
4 significant size. But collectively, through the Florida
5 Alliance, and you saw that we have smaller employer
6 members, can all sit down together and have a respectful
7 conversation with a hospital or a health plan or a PBM
8 and lay out expectations and hopes.

9 So, sorry I'm not answering directly, but I think
10 the premise of LeapFrog is to engage employers.
11 Employers started LeapFrog.

12 THE VIDEOGRAPHER: Counsel, can we take a small
13 break for the video change?

14 MR. HVIDT: Yeah.

15 MR. BILLEK: Absolutely.

16 THE VIDEOGRAPHER: We are off the record at
17 10:36 a.m.

18 (A brief recess was taken.)

19 THE VIDEOGRAPHER: We are on the record at
20 10:44 a.m.

21 BY MR. HVIDT:

22 Q. Counsel, are employers purchasers of healthcare?

23 A. You said counsel, so --

24 Q. Sorry. Strike that. Thank you.

25 MR. BILLEK: I'm happy to answer.

1 MR. HVIDT: Thank you, Counsel.

2 BY MR. HVIDT:

3 Q. Dr. van Caulil, are employers purchasers of
4 healthcare?

5 A. Yes.

6 Q. And do they purchase -- can they purchase that
7 healthcare from hospitals?

8 A. Yes.

9 Q. And so are employers directly and indirectly
10 customers of hospitals?

11 A. I've never heard the term customers used in that
12 exchange. They are paying the bill on behalf of their
13 plan members. So I guess -- I guess you could call that
14 a customer. Not familiar with using that term in our
15 world here.

16 Q. Looking down at the third bullet here back on
17 Exhibit 3 on page 7, do you see where it says, Meet with
18 local media?

19 A. Yes.

20 Q. And in that bullet, do you see the last sentence
21 there where it says, Encourage them to call attention to
22 the hospitals and ACSs that decline to respond to your
23 request for survey participation?

24 Do you see that?

25 A. Yes.

1 Q. What do you interpret that sentence to mean?

2 A. That the regional leaders, I guess, should
3 consider engaging with media to encourage full
4 participation in the survey. We don't do this. We
5 don't -- we don't work with the media on any kind of
6 issues on a regular basis.

7 Q. Can you flip to the next page, please. Do you
8 see where it says on page 8, on Bates number ending in
9 1492, Ideas for encouraging nonrespondents to the
10 LeapFrog surveys?

11 A. I see it.

12 Q. And do you see in the bolded underlined section
13 where it references, Common objections?

14 A. Yes.

15 Q. Have you ever encouraged hospitals -- you in your
16 individual capacity, encouraged hospitals to participate
17 in the LeapFrog hospital survey?

18 A. Me individually? No, not -- not as a rule. I
19 have been in meetings with hospitals that haven't --
20 well, let me rephrase. I'm sorry, I guess I have to
21 think this through, so strike what I said. So --

22 Q. Would you like me to reask the question?

23 A. Yeah. Please reask it. I thought of a couple of
24 instances that could probably be applicable.

25 Q. In your individual capacity, have you ever

1 encouraged hospitals to participate in the LeapFrog
2 hospital survey?

3 A. Yes. There was a period of time where the HCA
4 hospitals in Florida declined to respond. I think it
5 was in two -- two cycles. And there are 47 HCA
6 hospitals in the state, so that was a significant gap in
7 transparency for us because they had fully participated
8 for years and years and been very active in terms of
9 working with LeapFrog. And they declined to respond
10 because there were some new measures that were added a
11 few years ago, couple years ago.

12 And I did send letters to the CEOs of those
13 hospitals and asked them to please consider responding
14 to the survey again, that it was very important for the
15 Florida Alliance employer members for them to do so, and
16 if they needed to skip those questions, that would be up
17 to them. But please not to completely, you know,
18 nonrespond.

19 So in that individual capacity, yes. We had --
20 we had a meeting, I don't know, a year or more ago with
21 one of the hospitals in South Florida that either they
22 weren't responding at all or perhaps not fully. And in
23 that meeting, I said basically the same thing that I
24 just mentioned with HCA and that was that, you know, we
25 would encourage them -- you know, we -- we, on behalf of

1 the employer members, really want to promote
2 transparency.

3 So because I've not read this regional leader
4 book, you know, our encouraging in Florida as regional
5 leader is pretty much limited to issuing those letters
6 that I mentioned a while ago, you know, please respond,
7 and sending them to LeapFrog. I don't believe we do any
8 kind of follow-up if they haven't responded. We
9 certainly don't engage the media to call anybody out.
10 But we do have conversations in meetings with the
11 hospitals around LeapFrog participation.

12 Q. For the conversation with the hospital in South
13 Florida where they weren't responding to the survey, did
14 they provide to you a reason why they don't participate
15 in the survey?

16 A. Yes. And I think it was for certain questions.
17 I don't think it was for the entire survey. But I don't
18 recall exactly. But it boiled down to not enough
19 bandwidth in the staff, that it was a heavy lift for
20 them.

21 Q. And aside from the HCA dynamic and that one
22 Florida -- South Florida hospital, do you have any other
23 recollection sitting here today of your individual
24 encouragement of hospitals to participate in the survey?

25 A. Well, I signed the letters, you know, for many

1 years that would go to them. I haven't signed them in
2 the last couple of years. Nothing -- nothing else comes
3 to mind that would be me, Karen van Caulil, you know,
4 having a discussion or a letter.

5 Q. Does the Florida Alliance receive objections from
6 nonrespondents to the survey as to why they're not
7 responding? Now I'm asking the question not as to you
8 individually but the Florida Alliance in its reach-outs
9 to hospitals to encourage them to participate.

10 A. I'm rereading your question. Does the Florida
11 Alliance receive objections from nonrespondents to the
12 survey as to why they're not responding? I don't
13 understand the question.

14 Q. Does Florida Alliance when it reaches out to
15 hospitals to encourage them to participate, does the
16 Florida Alliance receive reasons from those hospitals as
17 to why they're not responding to the survey?

18 A. You know, I think that Ashley sends something
19 that's like your intention to participate or not. I --
20 I -- we don't ever talk about whether she gets anything
21 back because I think that the form says, you know, and
22 why not, if you're not. But I don't have direct
23 knowledge of that. But I think there is a vehicle for
24 receiving that information.

25 I can tell you that one instance comes to mind

1 when she had sent a letter to one of the hospitals that
2 was really obliterated in a hurricane up in the
3 Panhandle and somebody got back and said, we're closed,
4 you know, until we can get back up and running, so take
5 us off the list. So I think that's an extreme example,
6 but that one comes to mind. So that tells me there's a
7 vehicle for that communication.

8 Q. You can set that document to the side for now.

9 How did you first hear of the LeapFrog Group?

10 A. I think that I probably first heard about it when
11 I was interviewing for the position and wasn't familiar
12 with it. So that would have been 14-plus years ago,
13 probably during the interview process. That would be in
14 2011.

15 Q. And when you say you first heard about it when
16 you were interviewing for the position, that's the
17 position as the CEO and president of the Florida
18 Alliance; is that correct?

19 A. Correct. At the time called the Florida
20 Healthcare Coalition, yes.

21 Q. And --

22 MR. BILLEK: Central Florida.

23 THE WITNESS: Well, let me --

24 MR. BILLEK: Oh, no. I didn't mean to open up
25 a can of worms.

1 THE WITNESS: No, no, no. So just to clarify,
2 because it is confusing. So the legal name is Central
3 Florida Healthcare Coalition. We have the d/b/a of
4 Florida Healthcare Coalition and a d/b/a Florida
5 Alliance for Healthcare Value. When I joined the
6 organization, it was called the Florida Healthcare
7 Coalition.

8 MR. BILLEK: My apologies.

9 BY MR. HVIDT:

10 Q. Thank you.

11 You -- we talked earlier about how you are a
12 member of the board of directors of LeapFrog; is that
13 correct?

14 A. Correct.

15 Q. And when did you join the board?

16 A. September 2023.

17 Q. Were you invited to join the board?

18 A. Yes.

19 Q. Who were you invited by?

20 A. The nominating committee chair, and I can't
21 remember who it was at the time. And Leah.

22 Q. And who's Leah?

23 A. Leah Binder is the CEO of LeapFrog.

24 Q. Before you were invited in part by her to the
25 LeapFrog board, did you have a preexisting relationship

1 with her?

2 A. Yes. I've known Leah for probably the majority
3 of the time that I've been with the Florida Alliance.
4 We've served on committees and other boards together and
5 certainly knew of her from our work as a regional
6 leader. So I -- so I guess the shorter answer is, I
7 knew Leah. We have worked together.

8 Q. Were you aware whether there are any requirements
9 to be a board member of LeapFrog?

10 A. I serve on the nominating committee now. And the
11 way that board members are identified or potential board
12 members are identified is by looking at skill sets and
13 experience and expertise that would be helpful in having
14 strategic discussions about LeapFrog. So I'm not aware
15 of any specific requirements or qualifications, but I do
16 know that I was looked to as somebody who could
17 represent the employer healthcare purchaser voice.

18 Q. Are there any conflict of interest requirements?

19 A. I believe we sign a conflict of interest
20 disclosure form, yeah.

21 Q. Is there any requirement that the board donate to
22 The LeapFrog Group?

23 A. They have asked that we each contribute whatever
24 level, especially this year because of the 25th
25 anniversary, and they wanted to create like a board

1 match for donations.

2 Q. How often does the board of LeapFrog meet?

3 A. We have quarterly meetings.

4 Q. Are they all in person?

5 A. They have been two in person and two virtual, in
6 my two years.

7 Q. And what do you understand to be the duties and
8 responsibilities of a LeapFrog board member?

9 A. Well, certainly to attend the meetings and to
10 participate on a committee. I serve on the nominating
11 committee, as I mentioned. We -- you know, any board
12 member of any nonprofit, you know, has a fiduciary duty,
13 so certainly when the audited financial statements are
14 presented to us, we, you know, are seeking a clean audit
15 and can ask questions and have to vote to approve that
16 or not.

17 But primarily, it is the strategic direction of
18 LeapFrog and participating in those -- those
19 discussions.

20 Q. Does the LeapFrog board have any responsibilities
21 as it relates to the operations or management of
22 LeapFrog?

23 A. No. The operations and management people will
24 give updates. Leah will give an update on some of the
25 other staff on the status of operations, but they're not

1 action items.

2 Q. Has -- in your time on the LeapFrog board, since
3 September 2023, has the LeapFrog board ever disagreed
4 with the decisions of the LeapFrog executive team?

5 A. I don't think that we've, in the two years -- and
6 I haven't been at every board meeting. I missed one of
7 them because I had surgery like a day or so before. But
8 I don't think that there's ever been any kind of
9 disagreement with the team when they've brought things
10 forward. I would say that the members of the LeapFrog
11 board are all very smart, insightful people and they
12 might provide an alternate view or something to
13 consider. But I'm not aware of any disagreement with a
14 decision. People ask questions to, you know, understand
15 more deeply decisions that the LeapFrog staff have made
16 or the expert panel or whatever's being presented.

17 Q. In your time since you joined the board, what
18 kind of strategic decisions have been put forward to the
19 LeapFrog board for vote?

20 A. The only vote that I can think of in the two
21 years on a strategic decision has been how to conduct a
22 strategic planning process. Would it be to create a
23 committee, and that was a vote, and then they brought it
24 back recently to vote on it being a part of longer board
25 meetings. But an example of a strategy is to start

1 thinking about artificial intelligence and how that
2 might relate to the work that The LeapFrog Group does
3 and to bring in some experts to help navigate through
4 that because there wasn't anybody on the board that, you
5 know, would be really strong in that area.

6 Q. And so other than the vote on how to conduct a
7 strategic planning process, in your time on the LeapFrog
8 board of directors since September 2023, you can't
9 recall another time where the board was asked to vote on
10 a strategic decision as it relates to LeapFrog's
11 operations; is that correct?

12 A. I'm thinking right at the moment. I think we --
13 we don't really vote on operational matters. So I'm
14 going to say, to the best of my recollection, I can't
15 think of another time where we voted. The voting, vote
16 on minutes, as I said, vote on the audit, vote on having
17 a committee, those have been the primary votes that I
18 can recall.

19 Q. And would you consider LeapFrog's methodology for
20 how it grades hospitals to be part of those operational
21 matters that the LeapFrog board hasn't had a vote
22 regarding in your time on the LeapFrog board since
23 September 2023?

24 A. I -- I don't think we've voted on methodology in
25 that time. We've been informed about the methodology.

1 I can't recall a vote. We don't have that detail. In
2 fact, the last board meeting we had in June or somewhere
3 around that time, they did a 101 with the board to
4 educate anyone who is available to educate about
5 high-level methodology for the grade and the survey.
6 Because it's just not something that the board
7 deliberates.

8 MR. HVIDT: I'm handing the witness what's been
9 marked as Exhibit 4 in this deposition, which has been
10 produced in this litigation as LEAPFROG00378234.

11 (Exhibit No. 4 was marked for identification.)

12 BY MR. HVIDT:

13 Q. And it's a document titled, Final Draft LeapFrog
14 Long Range Strategic Intent, Fiscal Year 2026 to 2032,
15 December 2024.

16 Do you see that, Dr. van Caulil?

17 A. Yes, I do.

18 Q. And have you seen this document before?

19 A. I don't think I have. If it was presented to the
20 board on December 2024, that's the meeting that I
21 missed. I had surgery on December 13th and I think the
22 board meeting was the 16th up in Baltimore. I couldn't
23 travel for it.

24 Q. Understood. Thank you for clarifying that.

25 The item that I just want to point to,

1 understanding that you weren't there, when you're --
2 even if you aren't able to attend a board meeting, are
3 you e-mailed the packet of materials that are displayed
4 at the board meeting?

5 A. They send us materials in advance to review.
6 Sometimes they send things that weren't in the board
7 packet after. I don't -- I don't actually recall seeing
8 this. That doesn't --

9 Q. It's possible you may have received it but you
10 just haven't read it. Is that --

11 A. It's possible. It's possible that I received it.
12 I don't -- I don't remember seeing this.

13 I do know that the strategic planning committee
14 was working on something to react to.

15 Q. And looking there at objective 1, do you see
16 where it says, Scale of resources to the capacity needed
17 to make giant leaps for patient safety and stop
18 avoidable death and suffering?

19 A. Yes.

20 Q. Understanding that there has been, as you've
21 described earlier, movement in the strategic planning,
22 is scaling LeapFrog's resources one of the objectives in
23 LeapFrog's current strategic plan?

24 A. So there have been discussions about adding
25 additional staff because of workload, if that's what

1 scale resources to the capacity needed means. So that's
2 certainly been a discussion or at least an information
3 sharing to the board.

4 Q. And if you could flip to the next page where it
5 carries over to 235. Is it fair to say that this page
6 has about five bullets that are under that objective 1
7 that we just talked about?

8 A. Yes, I see it.

9 Q. And is the first bullet, Expand and diversify
10 revenue sources including funding through grants,
11 development, industry partnerships, data licensure?

12 A. Yes. That's the first bullet. Yes.

13 Q. You can set that document to the side for now.

14 We talked earlier about -- we mentioned
15 LeapFrog's hospital safety grade before. Can you tell
16 me in your own words what LeapFrog's hospital safety
17 grade is?

18 A. So two times a year, The LeapFrog Group publishes
19 A, B, C, D, F grades for hospitals and ambulatory
20 surgery centers also. I know you just asked about
21 hospital, but they're published at the same time. And
22 those are patient safety specific measures. It is, to
23 my understanding, a combination of publicly reported
24 data to CMS and, also, if the hospital responds to the
25 survey, there are some elements that get pulled into the

1 calculation of that grade.

2 Q. Do you have an understanding of how a hospital
3 who is -- who does not participate in the LeapFrog
4 hospital survey is grading?

5 A. They use publicly available data to generate a
6 grade.

7 Q. What is the publicly available data that they use
8 to generate a grade?

9 A. It's primarily CMS data.

10 Q. Do they use any other data to fill in for the
11 measures that are only -- that are not CMS-related data?

12 MR. BILLEK: Object to form.

13 You can answer.

14 THE WITNESS: Would you mind repeating the
15 question?

16 BY MR. HVIDT:

17 Q. Yes. So you mentioned that the LeapFrog Hospital
18 Safety Grade includes measures that are pulled from the
19 survey results that a hospital completes for the
20 LeapFrog Hospital Survey; is that correct?

21 A. Yes. I think there's a -- some subset of
22 questions that are from the survey.

23 Q. And if a hospital doesn't respond to the survey,
24 LeapFrog doesn't have data from that hospital for
25 those -- that subset of measures; is that correct?

1 A. That's correct.

2 Q. And do you have any understanding as to how
3 LeapFrog treats that subset of measures where the -- for
4 the hospitals that don't participate in the survey?

5 A. Yes. Certainly. That was something that was
6 explained to the board since I've been on the board
7 because that methodology changed last year, how they
8 imputed a score. And my understanding is that up until
9 the fall, if you didn't respond to the survey, you would
10 get the average or median score. And then for four
11 measures now, it's not that any longer. It's the lowest
12 possible score. So limited achievement for that
13 measure.

14 Q. You used the word impute -- imputed a score.
15 What does that mean?

16 A. That's the terminology that LeapFrog uses. So to
17 your earlier question, when they don't have it
18 available, this is how they fill that in.

19 Q. What does the word impute mean?

20 A. To calculate, to identify. I don't know the
21 dictionary definition. I would say in context it is how
22 they generate a score for that.

23 Q. How they generate a score for missing data; is
24 that correct?

25 A. Yes.

1 Q. And you mentioned that up until the fall, if you
2 didn't respond to the survey, you'd get an average or
3 median score. When you say the fall, are you referring
4 to up until fall of 2024?

5 A. I don't know specifics on this. I'm not involved
6 with the methodology. I've given you my understanding.
7 I don't know the exact time in 2024. I don't know when
8 it took effect.

9 Q. And you were a board member when the change took
10 effect; is that correct?

11 A. I was a board member when it was discussed. I
12 don't recall when it would take effect.

13 Q. And you mentioned that there are hospitals that
14 don't respond to the survey are now assigned the lowest
15 possible score; is that correct?

16 A. Limited achievement, I believe is what it's
17 actually called.

18 Q. And do you know on what basis LeapFrog assigns
19 nonparticipating hospitals the lowest possible score?

20 A. So they work with an expert panel to determine
21 the methodology and the basis for that change would have
22 been result of their deliberation and study of the issue
23 as to what the most appropriate proxy for nonresponse
24 would be.

25 Q. So is it your understanding that the LeapFrog

1 expert panel, in coming up with the lowest possible
2 score, was trying to identify the most approximate
3 estimate for what that score would have been had the
4 nonrespondent participated in the survey?

5 A. No. I don't think that's what they were trying
6 to do. They are assigning limited achievement of that
7 measure because they don't have data or information to
8 tell them what that hospital response would have been
9 should they have responded.

10 Q. So is it your understanding that the methodology
11 is not trying to estimate what the -- an accurate
12 estimate of what the nonresponding hospital would have
13 answered had it answered the survey?

14 A. I don't think that's the intent of the
15 methodology to try to come up with what the hospital
16 would have responded. They're asking the hospital to
17 respond to the question so that they can have accurate
18 information.

19 My recollection of conversations around this
20 change was that there were participating hospitals who
21 raised the issue of why would you give an average score
22 to somebody who's not responding, that might be a higher
23 score than somebody who is responding, that you need to
24 go back and come up with a different way.

25 And I can also tell you that over the years, I've

1 been in meetings, whether that's with the Florida
2 Hospital Association or some of these hospital meetings
3 where comments have been made, you know that hospitals
4 are gaming this with the survey by not responding to the
5 question because they'll get a better score if they
6 don't respond than if they provided their experience.

7 So I had heard that a few times. So I think that
8 probably was a factor in determining that providing an
9 average score was probably not fair to the hospitals
10 that do participate.

11 Q. And do -- strike that.

12 And so you -- the intent of the methodology is
13 not -- of the imputation methodology is not to assign
14 the nonresponding hospitals an accurate estimate of what
15 they would have answered had they answered the survey?
16 Is that correct?

17 MR. BILLEK: Object to form.

18 You can answer.

19 THE WITNESS: I want to say that I am not
20 involved in the methodology determination. And I
21 don't know what the intent was of the methodology
22 change. I -- I can't really answer that question
23 because it doesn't seem like it would even be possible
24 for those who work at LeapFrog to come up with an
25 answer that the hospital should be providing

1 themselves. They wouldn't have the data. They
2 wouldn't have the ability to come up with what they
3 could have provided themselves.

4 BY MR. HVIDT:

5 Q. So from your perspective as a LeapFrog board
6 member, you don't think it's possible for LeapFrog to
7 come up with an answer that would estimate what the
8 nonresponding hospitals would have achieved had they
9 participated in the LeapFrog survey; is that correct?

10 MR. BILLEK: Object to form.

11 THE WITNESS: I -- I don't know how they would
12 come up with an estimate when the simplest thing would
13 be for the hospital to answer that question for
14 themselves.

15 BY MR. HVIDT:

16 Q. So let me ask it again, because it's a yes-or-no
17 question.

18 So from your perspective as a LeapFrog board
19 member, you don't think it's possible for LeapFrog to
20 come up with an answer that would estimate what the
21 nonresponding hospitals would have achieved had they
22 participated in the LeapFrog survey; is that correct?

23 MR. BILLEK: Object to form.

24 THE WITNESS: I don't think this is a LeapFrog
25 board of directors' role since we don't talk about the

1 methodology and we don't hear about all of the
2 investigation and research and thinking and
3 deliberation on that. I would say as an individual, I
4 can't answer this as a LeapFrog board member. I would
5 say as an individual, I think it would be very
6 difficult to estimate what the nonresponding hospital
7 would have achieved on a measure and we'll say again,
8 the best way to come up with the most correct response
9 is for the hospital to provide that information
10 themselves.

11 BY MR. HVIDT:

12 Q. And isn't it the case that the -- by assigning
13 the hospital the lowest possible score, LeapFrog is not
14 trying to estimate what that hospital would have
15 achieved had it participated in the LeapFrog Hospital
16 Survey?

17 MR. BILLEK: Same objection.

18 THE WITNESS: I don't know what LeapFrog is
19 trying to achieve with the methodology because I
20 wasn't part of the discussions or have I heard about
21 the discussions to know what they were trying to
22 achieve.

23 BY MR. HVIDT:

24 Q. Is LeapFrog, by assigning the non -- by assigning
25 nonparticipating hospitals the lowest possible score for

1 the measures that LeapFrog does not have data on those
2 hospitals, is LeapFrog trying to encourage those
3 nonparticipating hospitals to participate in its survey?

4 A. I would think that as a hospital, if you know
5 you're performing better than that limited achievement
6 score, you would want to respond to that question so
7 that the public can see that you do care about patients'
8 safety and you are doing well on that measure.

9 So to answer your question, it could be that in
10 their deliberations about the change in the methodology,
11 that they hoped that nonparticipating hospitals would
12 answer for themselves. But I am not privy to that
13 discussion or whether that was part of their rationale
14 for this change.

15 Q. So as a LeapFrog board member, you are not privy
16 to whether the change in methodology as it relates to
17 nonparticipating hospitals, what the rationale was for
18 that change; is that correct?

19 A. I don't remember the exact discussion at the
20 meeting because it was a while ago and I think I was a
21 new board member trying to get my bearings, if you will,
22 on LeapFrog board responsibilities.

23 My recollection would be that the change was made
24 so that hospitals that are participating in the survey
25 who might be performing with limited achievement weren't

1 upset that hospitals that are not participating were
2 getting a higher score. That's my recollection of the
3 rationale. But I do know that when it was presented, it
4 was said to us that it was an extensive evaluation and
5 assessment and determination by the experts who were
6 convened to do that. And for us on the board,
7 collectively, we trust their expertise and their charge
8 to do that work.

9 So it wasn't a lengthy discussion. It was
10 information that was provided. But again, it's, you
11 know, easily a year ago.

12 Q. So when LeapFrog was updating the board about the
13 methodology change, it was said to the board that this
14 change followed a determination by the expert panel; is
15 that correct?

16 A. Yes.

17 Q. And did they discuss whether the expert panel
18 voted on this methodology change?

19 A. I don't recall that being part of the discussion.

20 Q. Did they discuss whether the expert panel
21 convened in a quorum regarding the proposed methodology
22 change that was actually implemented?

23 A. I don't know whether it was in a quorum. I don't
24 know that.

25 Q. So the LeapFrog executives didn't communicate to

1 you that the methodology change that they were going to
2 implement was not discussed with the full board at an
3 expert panel meeting?

4 A. No, I didn't say that. I said that I don't -- I
5 don't recall -- you know, I don't know whether it was a
6 quorum because I don't recall whether it was presented
7 that way.

8 Q. Understand and --

9 MR. BILLEK: And just note my objection to the
10 double negative you used. It made it confusing.

11 THE WITNESS: Yeah.

12 BY MR. HVIDT:

13 Q. Understand. I'm going to go back to that --

14 A. Okay. Sorry.

15 Q. -- because I was not trying to suggest that you
16 said that.

17 What I wanted to get an understanding of is when
18 the LeapFrog executives communicated about the
19 methodology change with the board, did they share with
20 the board that the methodology change that they were
21 proposing was not discussed with the full expert panel
22 at the April expert panel -- April 2024 expert panel
23 meeting?

24 A. I don't recall hearing that.

25 Q. So when --

1 A. I'm reading. I'm sorry. Let me read your
2 question again. Did they share with the board that the
3 methodology change that they were proposing was not
4 discussed with the full expert panel at the April expert
5 panel meeting?

6 I don't recall that level of specificity. It
7 could have been said. I don't -- I don't recall that.

8 Q. As a board member, would you have appreciated
9 knowing that the methodology proposal that was discussed
10 with the expert panel in April 2024 was different than
11 the methodology that the LeapFrog -- that LeapFrog ended
12 up implementing in the fall of 2024?

13 MR. BILLEK: Object to form.

14 THE WITNESS: I think that I would have wanted
15 to know what the difference was between the
16 recommendation and what was being implemented.

17 BY MR. HVIDT:

18 Q. Sitting here today, do you have any awareness
19 that the methodology change that was discussed at the
20 April 2024 expert panel meeting is different than the
21 LeapFrog methodology that it has had in place since the
22 fall of 2024?

23 A. I don't recall hearing that.

24 MR. HVIDT: Can we go off the record for a
25 moment? Thank you.

1 THE VIDEOGRAPHER: We are off the record at
2 11:33 a.m.

3 (A brief recess was taken.)

4 THE VIDEOGRAPHER: We are on the record at
5 11:37 a.m.

6 MR. HVIDT: Thank you.

7 BY MR. HVIDT:

8 Q. I'm handing you what's been marked as Exhibit 5.

9 (Exhibit No. 5 was marked for identification.)

10 BY MR. HVIDT:

11 Q. And Exhibit 5 has been produced in this
12 litigation by Florida Alliance as FHA0002072.

13 Do you see that, Dr. van Caulil?

14 A. Yes.

15 Q. And earlier today, we were talking about how the
16 LeapFrog staff presented to the LeapFrog board of
17 directors a LeapFrog 101. Do you remember that?

18 A. Yes. It wasn't part of a board meeting. It was
19 a separate meeting if people were available, and then
20 they sent the slides if you were unable to attend.

21 Q. And did you receive the slides?

22 A. Yes.

23 Q. Have you looked through them?

24 A. Yes.

25 Q. And the date of this set of slides is April 28,

1 2025. Do you see that?

2 A. Yes.

3 Q. And were you able to attend the meeting where
4 Leah Binder and Missy Danforth presented these?

5 A. No.

6 Q. And so is that why you were sent the slides
7 separately?

8 A. Yes. But they may have sent them to everybody,
9 whether you attended or not. I don't recall the e-mail
10 specifically.

11 Q. But you did not hear Leah Binder and Missy
12 Danforth walk through --

13 A. No, I --

14 Q. -- the slides in any way?

15 A. No, and I don't believe -- I'm sorry, I
16 interrupted -- no, and I don't believe they sent a
17 recording.

18 Q. Thank you. That was going to be my next
19 question.

20 And if -- you mentioned that you have read these
21 slides; is that correct?

22 A. I looked at them when I received them, yes.

23 Q. Okay. And if we can flip to slide 10. Do you
24 see where it says, Improving voluntary transparency?

25 A. Yes.

1 Q. Okay. And do you see where it says that
2 80 percent of hospitals voluntarily respond to
3 LeapFrog's annual survey?

4 A. Well, the wording is 80 -- Hospitals that
5 voluntarily respond to the annual LeapFrog survey
6 represent 80 percent of all acute care beds in the U.S.,
7 so that's specific to acute care beds.

8 Q. And so do you -- is that consistent with your
9 understanding that participation in LeapFrog's survey is
10 voluntary?

11 A. Yes.

12 Q. And if 80 percent of all acute care beds in the
13 United States are represented through hospitals that
14 participate, does that imply that there are 20 percent
15 of acute care beds in the U.S. that do not -- are in
16 hospitals who do not participate in the LeapFrog survey?

17 MR. BILLEK: Note my objection to form of the
18 question.

19 You can answer.

20 THE WITNESS: I don't know that you can say
21 20 percent of acute care beds. There are some
22 hospitals that don't qualify, if they're a specialty
23 hospital in some other determination. So if you
24 wouldn't mind repeating the question.

25 BY MR. HVIDT:

1 Q. Essentially the question is if -- 100 percent
2 minus 80 percent equals 20 percent; is that correct?

3 A. Yes, it is correct.

4 Q. Thank you.

5 A. So -- there's always caveats to everything, I'm
6 afraid.

7 Q. And you do not know whether or not the hospitals
8 that are excluded from that -- the hospital safety grade
9 are included in that calculation of 80 percent; is that
10 correct?

11 A. So this is a question about the survey. Can you
12 ask your question again, because I heard you say the
13 grade. So I just want to make sure I heard it
14 correctly.

15 Q. Yes. So you can strike that. It's not
16 significant.

17 A. Okay.

18 Q. We can -- let's flip over to the next slide,
19 please.

20 A. Okay.

21 Q. Do you see where it says at the top of slide 11,
22 Levers LeapFrog uses to gain survey participation?

23 A. Yes.

24 Q. And is this slide consistent with your
25 understanding that LeapFrog is trying to increase survey

1 participation?

2 A. LeapFrog -- yes. LeapFrog is trying to increase
3 survey participation because they'd like to see all the
4 hospitals in the country be transparent about their
5 quality and patient safety.

6 Q. And on this slide, does LeapFrog reference that a
7 lever that it can use to gain survey participation is
8 assigning nonparticipating hospitals the lowest score
9 for the imputed scores?

10 A. I'm waiting for the question to fully type out so
11 I can review it here. Does LeapFrog reference that a
12 lever that it can -- it's not showing on my screen.

13 Q. If you can -- if you can't understand my
14 question, then just ask me to repeat it again, because
15 looking back at the transcript, she's doing her best to
16 type it up but --

17 A. Yeah -- no, I --

18 Q. If we can just --

19 A. Please repeat the question.

20 Q. Yeah. On this slide, does LeapFrog reference
21 that one of the levers it uses to gain survey
22 participation is assigning nonparticipating hospitals
23 the lowest possible score for the imputing measures?

24 A. No, it doesn't include the limited achievement
25 score.

1 Q. And is this -- this is a slide deck that was sent
2 by LeapFrog staff to its board of directors to give it a
3 101 on the LeapFrog -- on LeapFrog's business; is that
4 correct?

5 A. Yes.

6 Q. And as the board, would you have appreciated that
7 LeapFrog staff be fully transparent of all the levers it
8 uses to gain survey participation in this slide?

9 A. I don't know that by leaving out the limited
10 achievement score for nonresponses would be something
11 that would be on a slide like this as a strategy.
12 Because I don't know, based on all the questions you
13 asked earlier and my responses, I don't know if that was
14 the intent of the expert panel or the staff in making
15 that decision to change the methodology.

16 So LeapFrog is transparent and I don't think by
17 leaving that out, they are not being transparent. It
18 says some measures included in the hospital safety
19 grade, so...

20 Q. And some measures being included in the hospital
21 safety grade is referencing to the notion that if you
22 participate in the LeapFrog survey, those answers get
23 used in the hospital safety grade; is that correct?

24 A. You're going to have to repeat that. I'm sorry.

25 Q. The reference to some measures included in the

1 hospital safety grade as a lever, LeapFrog uses to gain
2 survey participation, likely references the notion that
3 if you participate in the survey, those survey answers
4 go to measures that are included in your hospital safety
5 grade?

6 A. Survey participation in and of itself does not
7 mean you're going to get a better hospital safety grade,
8 but there are measures, yes, in the hospital survey that
9 are used in calculating the hospital safety grade if
10 you've responded to the survey.

11 Q. If you could flip to slide 25. I understand...

12 MR. BILLEK: Am I missing where these are
13 numbered or do you just mean the 25th page?

14 MR. HVIDT: 25th page on the PDF.
15 Unfortunately, it was produced to us without page
16 numbers.

17 MR. BILLEK: No, that's okay. When you said
18 slide 25, I thought you meant there was a number on
19 this slide somewhere that I couldn't see.

20 MR. HVIDT: The slide that is 25 is,
21 Differences Between LeapFrog Hospital Survey and
22 Safety Grade.

23 BY MR. HVIDT:

24 Q. Are you on that page?

25 A. I am now.

1 Q. Do you see where under LeapFrog Hospital Safety
2 Grade, it says, Grades are assigned via many sources?

3 A. Yes.

4 Q. The grades are assigned from LeapFrog from CMS
5 scores; is that part of the sources?

6 A. I don't know all the sources but I know CMS is
7 one of the sources.

8 Q. And do you know that LeapFrog Hospital Survey
9 answers are a source that goes into the grades?

10 A. Yes.

11 Q. Is there another source?

12 A. I don't know all the sources.

13 Q. Sitting here today, you can't think of another
14 source; is that correct?

15 A. That's correct.

16 Q. And if you could flip now to page 27, which is --
17 says, New safety grade imputation model.

18 Do you see that?

19 A. Yes.

20 Q. And then if you flip to the next page, slide 28,
21 it says, How LeapFrog calculates a grade for hospitals
22 that don't report to the survey, imputation.

23 Do you see that?

24 A. Yes.

25 Q. And in the first bullet on the left-hand side, it

1 reads, There's been a shift over time toward imputing
2 lowest level of performance when we don't have LeapFrog
3 Hospital Survey data.

4 Do you see that?

5 A. Yes.

6 Q. Does this slide explain why there's been a shift
7 toward imputing the lowest level of performance?

8 A. Only in that it's in line with the second bullet,
9 they're in line with recommendations from the national
10 expert panel and Johns Hopkins advisors. It doesn't --
11 I believe that's the answer.

12 Q. And that second bullet just references that the
13 change was made in line with recommendations. And that
14 bullet doesn't say why those recommendations were made;
15 is that correct?

16 A. That's correct. And again, I wasn't there for
17 the presentation for any additional, you know,
18 explanation or if anybody asked. And I don't have a
19 recording, so I don't know if it was addressed at the
20 time.

21 Q. And here, it says that the -- under that second
22 bullet that LeapFrog changed, quote, the way it
23 estimates performance.

24 Do you see that?

25 A. Yes.

1 Q. And so do you interpret this slide to mean that
2 LeapFrog was saying that the imputation process is
3 trying to estimate the performance of the nonperforming
4 hospitals?

5 MR. BILLEK: Object to form.

6 THE WITNESS: It says LeapFrog changed the way
7 it estimates performance for hospitals.

8 BY MR. HVIDT:

9 Q. So is that a yes?

10 A. Yes.

11 Q. You could flip to the next slide. Do you see
12 where it says, Common objections to LeapFrog?

13 A. Yes.

14 Q. And then if you flip again to the slide 31, the
15 slide after that, kind of banner change, says, Common
16 objections to LeapFrog concerns with the data.

17 Do you see that on slide 31?

18 A. There's two slides with that, so which one in
19 particular?

20 Q. We'll start with the first slide.

21 A. Okay. All right. Yes, I see it.

22 Q. The one where the first item on the left says,
23 LeapFrog data is self-reported. How can it be trusted?

24 Do you see that?

25 A. I do.

1 Q. And is it your understanding that this slide and
2 the next slide, LeapFrog is communicating common
3 objections that hospitals have provided for not
4 participating -- for reasons why they're not
5 participating in LeapFrog's hospital survey?

6 A. I don't know that if it's limited to not
7 participating. It could be that it's raised by a
8 hospital that has participated. So I wouldn't come to
9 the conclusion that it's just from those who have not.

10 Q. That's fair. These are objections to the
11 LeapFrog hospital safety grade that could be from
12 nonparticipating hospitals or could be from anyone. Is
13 that correct?

14 A. It doesn't say specifically, but I -- I would
15 have to guess it could be from anyone.

16 Q. Do you see there on slide 31 where the third box
17 says -- the blue box says, We have a poor safety grade
18 only because we do not participate in the LeapFrog
19 Hospital Survey.

20 Do you see that?

21 A. Yes.

22 Q. And so the inclusion of that quote on the slide
23 implies that that's a common objection that has been
24 raised to LeapFrog; would you agree with that?

25 A. Yes.

1 Q. And you see how in response, the last sentence
2 that's response below that says, Many hospitals that do
3 not report to LeapFrog earn As.

4 A. I see that.

5 Q. Do you have any understanding of the truth of
6 that statement?

7 A. I have seen but couldn't quote it directly a
8 number that LeapFrog has provided in recent months of
9 the number of hospitals who have As, Bs, Cs, Ds, Fs, who
10 don't participate in the survey.

11 Q. Would it surprise you to know that there's about
12 550 nonparticipating hospitals in this last grading
13 cycle that were given the lowest score through the
14 imputation methodology?

15 A. I would not be surprised or surprised. I don't
16 have a sense of how many. I don't know. I don't know
17 if that number is surprising or not.

18 Q. And of those 550 nonparticipating hospitals, do
19 you know that there are zero nonparticipating hospitals
20 in Florida who were given an A by LeapFrog in the spring
21 2025 cycle? Would that surprise you?

22 A. I don't have a reaction that's surprise or not
23 surprise. It's -- I didn't know that information,
24 though.

25 Q. And if the number of nonparticipating hospitals

1 that were given imputed lowest score for the four
2 measures, of the 550 across the country was only two,
3 would that, in your mind, be many hospitals?

4 MR. BILLEK: Object to form.

5 You can answer.

6 THE WITNESS: Could you repeat the question?

7 BY MR. HVIDT:

8 Q. Yeah. So in this document, the LeapFrog staff is
9 communicating to the board that many hospitals that do
10 not report to LeapFrog earn As. Do you see that?

11 A. I see that, yes.

12 Q. And in spring of 2025, the nonresponding
13 hospitals who were given a step 2 imputation that earned
14 an A was two of 550. Does that -- is two out of 550
15 many hospitals in your mind?

16 MR. BILLEK: Object to form.

17 THE WITNESS: I don't know that this response
18 here is limited to just one grade cycle. So could be
19 many hospitals over time that have not reported to
20 LeapFrog earn As.

21 BY MR. HVIDT:

22 Q. And did you know that in the fall of 2024, the
23 only other grading cycle that had this imputation
24 methodology, the numbers were the same?

25 MR. BILLEK: Object to form.

1 THE WITNESS: I hadn't heard that data.

2 BY MR. HVIDT:

3 Q. If that data is accurate, would you characterize
4 that data as being many hospitals?

5 A. Two hospitals in two hospitals is not many for
6 just those two cycles. I would assume that what they're
7 trying to say is that many hospitals over time have
8 received As.

9 Q. Before the methodology change, there could have
10 been nonresponding hospitals that got As, and that
11 statement could have been correct prior to the
12 methodology change; is that correct?

13 A. I think that's possible. I don't know the answer
14 to that, though.

15 Q. You can set that document to the side.

16 MR. BILLEK: That was 5?

17 MR. HVIDT: Yes. Thank you. And before I hand
18 the witness what has been marked as Exhibit 6, I want
19 to, on the record, note that there's a set of
20 documents that LeapFrog provided to plaintiff's
21 counsel on Sunday without Bates stamps. And when they
22 communicated that, they said that they would be
23 producing them later with Bates stamps. And we have
24 not yet received those versions.

25 And so there are a few documents we're going to

1 have to use today that do not yet have Bates stamps
2 but will have Bates stamps soon, consistent with how
3 we treated the Florida Alliance documents that were
4 produced, approximately 30 hours ago. Counsel, can we
5 get an agreement that we can insert the Bates-copied
6 version of this document in place of the
7 nonBates-copied version of this document when that's
8 provided by you?

9 MR. BILLEK: Of course.

10 MR. HVIDT: Thank you.

11 (Exhibit No. 6 was marked for identification.)

12 BY MR. HVIDT:

13 Q. I'm handing you what we've marked as Exhibit 6 to
14 your deposition. And I'll represent that Exhibit 6
15 appears to be LeapFrog group board of director minutes
16 from the June 11, 2024, board of directors meeting at
17 the Darcy Hotel, Washington, D.C. and Zoom.

18 Do you see that, Dr. van Caulil?

19 A. Yes.

20 Q. And do you see under the attendees your name
21 listed there on the third line?

22 A. I do.

23 Q. And is that correct? Did you attend this board
24 of directors meeting?

25 A. Yes. I can't recall whether it was in person or

1 Zoom, though.

2 Q. And is it part of LeapFrog's practices to prepare
3 minutes for board of directors meetings?

4 A. Yes.

5 Q. And when LeapFrog Group prepares minutes for
6 board of directors meetings, do they try to be truthful
7 and accurate as to the events that occurred during the
8 LeapFrog board of directors meetings?

9 A. Yes.

10 Q. And looking here at this document, do you have
11 any reason to doubt the authenticity or accuracy of the
12 minutes provided here?

13 A. No.

14 Q. And looking through this document, at this
15 meeting, was -- was the LeapFrog Group board of
16 directors asked to vote on whether the LeapFrog Group
17 should change its grading methodology for its hospital
18 safety grades?

19 A. I don't think that was an action taken. May I
20 look through the minutes?

21 Q. You may. Please look through the minutes and let
22 me know if that was an action taken at this meeting.

23 A. I don't see any actions taken on the grading
24 methodology.

25 Q. Do you see any reference in these minutes to

1 LeapFrog changing its imputation methodology to, instead
2 of trying to estimate the performance of
3 nonparticipating hospitals, to instead assign them the
4 lowest possible score for those measures that were
5 previously imputed?

6 A. I don't see an agenda item on the topic at all.

7 Q. Do you recall receiving a -- you can set that to
8 the side -- do you recall receiving a report from the
9 LeapFrog CEO at that June 2024 board of directors
10 meeting?

11 A. Leah typically does a verbal and written report.
12 I don't recall what was said.

13 Q. When you say written report, would she provide a
14 report in writing to the board of directors?

15 A. Yes. She does that. I don't know if that's
16 every time, but she'll write out her talking points.

17 MR. HVIDT: I'm handing the witness what has
18 been marked as Exhibit 7 in the Karen van Caulil
19 deposition which has been produced in this litigation
20 as LEAPFROG00326021. The cover page is an e-mail from
21 Leah Binder dated June 6, 2024, to Angela Hopkins re:
22 CEO report June 2024.

23 (Exhibit No. 7 was marked for identification.)

24 BY MR. HVIDT:

25 Q. Do you see that, Dr. van Caulil?

1 A. Yes.

2 Q. Do you see how there's an attachment there, CEO
3 report-June 2024?

4 A. I see -- it doesn't have a dash. It says
5 LeapFrog Group board of directors, CEO report, Leah
6 Binder, June 2024.

7 Q. In looking at the e-mail, do you see where Leah
8 says, Attached is the final?

9 A. Yes.

10 Q. And I also put it in the board packet. Little
11 correction there, I to in.

12 A. Okay.

13 Q. Do you see that?

14 A. Yes.

15 Q. So flipping to the attachment now, do you see in
16 that first section there where it says, The hospital
17 safety grade successful spring update?

18 A. Yes.

19 Q. Looking down to that second paragraph, can you
20 read that paragraph into the record for me, please?

21 A. We also published our planned updates to the
22 safety grade methodology slated for this fall. The
23 update dramatically lowers imputed scores for certain
24 measures for hospitals that decline to report to the
25 LeapFrog Hospital Survey. This follows a strong

1 recommendation from the expert panel. This should have
2 some impact on hospital reporting to the survey and will
3 strengthen the grade overall.

4 Q. Thank you.

5 And seeing that document in that line, does that
6 refresh your recollection of whether there was
7 discussion -- whether it was reported to the board that
8 there would be a methodology change at that June 2024
9 meeting?

10 A. Yes. I knew that it had been reported to us that
11 there was a change, but there wasn't board discussion or
12 a presentation of the methodology. So when Leah does a
13 report like this, this is essentially her talking points
14 during the meeting.

15 Q. Understood. So Leah may have said this or
16 something like this at the meeting. But you don't
17 recall there being any discussion after that was
18 referenced; is that correct?

19 A. I don't recall if there was discussion. There
20 could have been comments, but it wasn't a significant
21 discussion.

22 Q. And do you see where she says that, This follows
23 a strong recommendation from the expert panel?

24 A. I see that.

25 Q. Is that consistent with what you testified to

1 earlier that when The LeapFrog Group communicated this
2 change to you, they said that this came from a
3 recommendation from the expert panel?

4 A. Yes.

5 Q. And do you see where following that, she says,
6 This should have some impact on hospital reporting to
7 the survey?

8 A. Yes, I see that.

9 Q. And with that sentence, when she says, should
10 have some impact, do you think she is suggesting that
11 this change should increase hospital participation in
12 the LeapFrog Hospital Survey?

13 MR. BILLEK: Object to the form.

14 You can answer.

15 THE WITNESS: I -- I don't know what impact
16 that implies in that statement.

17 BY MR. HVIDT:

18 Q. And just to confirm, there was no board vote in
19 June 2024 on whether LeapFrog should change its safety
20 grade methodology in this regard; is that correct?

21 A. That's correct. We don't vote on the
22 methodology.

23 MR. HVIDT: Consistent with the last exhibit,
24 this is a document that was produced to us on Sunday
25 without Bates numbers with an indication that Bates

1 numbers versions would be following but haven't
2 followed yet. Are we in agreement that we can use
3 this document in the same regards?

4 MR. BILLEK: Of course.

5 MR. HVIDT: Thank you.

6 (Exhibit No. 8 was marked for identification.)

7 MR. HVIDT: I have handed the witness what will
8 be marked as Exhibit 8.

9 I'm so sorry.

10 MR. BILLEK: That's all right.

11 BY MR. HVIDT:

12 Q. Did I hand you two?

13 A. Oh, yes, actually. I'm sorry.

14 Q. Thank you.

15 MR. HVIDT: That may have been why I thought
16 that you already had one.

17 MR. BILLEK: That's all right. I don't want
18 anybody at Gibson Dunn to get fired over that
19 photocopying issue.

20 MR. HVIDT: We have handed the witness what is
21 titled at the top, Minutes, The LeapFrog Group Board
22 of Directors September 25, 2024, Zoom.

23 BY MR. HVIDT:

24 Q. Do you see that?

25 A. Yes.

1 Q. And do you see under attendees, your name is
2 listed?

3 A. Yes.

4 Q. And consistent with the exhibit two exhibits ago,
5 are minutes for LeapFrog Group board of directors
6 meetings prepared in the ordinary course of business?

7 A. Yes.

8 Q. Do you have any understanding to doubt or reason
9 to doubt the accuracy of the information in this
10 document?

11 A. No.

12 Q. And do you have an understanding of the time of
13 the year where LeapFrog's methodology is locked in for
14 how it's going to report for when -- how it's going to
15 report grades for the upcoming cycle?

16 A. No, I don't.

17 Q. And you're sitting there September 25, 2024, and
18 there's a grade cycle that's in the late fall and fourth
19 quarter of 2024; is that correct?

20 A. I don't know when they publish the fall scores,
21 but the last quarter sounds correct.

22 Q. And do you think that the LeapFrog methodology
23 that it was using for the fall of '24 would have been
24 locked in by this meeting?

25 A. I don't know.

1 Q. At this meeting, was there a vote on whether
2 LeapFrog should change its methodology for how it grades
3 nonparticipating hospitals?

4 A. No. We don't vote on methodology changes.

5 Q. And if you flip to the second-to-last page of the
6 minutes, the very bottom, do you see where it says,
7 Safety grade methodology change underlined?

8 A. Yes.

9 Q. And then carrying forward onto the last page, do
10 you see a description of the LeapFrog's safety grade
11 methodology change?

12 A. Yes.

13 Q. And do you see in that first sentence where it
14 says, LeapFrog uses an imputation model to be able to
15 grade hospitals even if they do not submit a LeapFrog
16 Hospital Survey?

17 A. Yes.

18 Q. Is it your understanding that if LeapFrog didn't
19 use an imputation model, it would not be able to grade
20 hospitals that do not submit a LeapFrog Hospital Survey?

21 MR. BILLEK: Object to form.

22 You can answer.

23 THE WITNESS: I -- I don't know if it would be
24 appropriate to have a different methodology for
25 nonresponding hospitals. So I think that using the

1 imputation model is so that they can use the same
2 approach for all hospitals. I'm not sure I'm
3 answering your question.

4 BY MR. HVIDT:

5 Q. Understanding, yeah, yeah --

6 A. Yeah.

7 Q. -- so I'll have a couple follow-ups on that.

8 A. Okay.

9 Q. The first question is, using the words in the
10 document?

11 A. Right.

12 Q. And so I'm just trying to get an understanding of
13 how that -- that sentence is structured. In there, it
14 says that LeapFrog uses an imputation model to be able
15 to grade hospitals even if they do not submit a LeapFrog
16 Hospital Survey.

17 Do you see that?

18 A. I do.

19 Q. And so would you take that sentence to mean that
20 if LeapFrog didn't use an imputation model, it would not
21 be able to grade hospitals if they did not submit the
22 LeapFrog Hospital Survey?

23 A. I read the sentence to say that's how -- the
24 imputation model is how they are able to grade
25 hospitals. I don't know that it says that without it,

1 they could not. I wouldn't take it that far in my
2 reading of that sentence.

3 Q. Okay. And you mentioned that you don't think it
4 would be appropriate to have a different methodology for
5 nonresponding hospitals. Is that correct?

6 A. That is not a fully formed thought. I was trying
7 to think as I was speaking how you would do that. So
8 I -- I probably should retract my comment because it's
9 not a fully formed thought. I'm trying to think out
10 loud in response to your question.

11 Q. Do you think that all hospitals should be graded
12 on the same methodology?

13 A. I think that it's complicated to answer that
14 question because if the hospitals don't participate and
15 you're missing a couple of items, you have to find
16 another way to put a value in.

17 Q. But if you're putting a value in, are you not --
18 are you grading them in a different methodology because
19 you don't have the data for those missing measures?

20 A. No. If your methodology states and it's publicly
21 available and the hospitals know that ahead of time,
22 this is the methodology, if you choose not to respond,
23 we're still grading you and this is how it will be
24 calculated. So it is the same methodology. It's not a
25 different methodology.

1 Q. Are nonresponding hospitals and responding
2 hospitals graded in the same manner?

3 A. I don't know how to interpret that question.
4 I -- I don't know what happens behind the development of
5 the grade. So I can't answer that question.

6 Q. Setting LeapFrog aside for the minute, if you are
7 grading hospitals, shouldn't you try to grade the
8 hospitals on the same measures?

9 MR. BILLEK: Object to form.
10 You can answer.

11 THE WITNESS: LeapFrog gives the opportunity
12 for every hospital to respond to the questions. And
13 they have in the methodology, we're doing this grade.
14 You should respond to the survey to ensure that your
15 achievement of that measure is reflected. In the
16 absence of that, here is the methodology that we use.

17 BY MR. HVIDT:

18 Q. And in that approach, is that approach clear to
19 those who use the LeapFrog grades to make their
20 decisions about where to receive healthcare?

21 MR. BILLEK: Object to form.

22 THE WITNESS: I can tell you that the Florida
23 Alliance in our role as regional leader makes sure
24 that the employers who are in our membership
25 understand that. LeapFrog has always been very

1 transparent on their website for the hospitals on the
2 methodology or the materials that are sent to them.

3 BY MR. HVIDT:

4 Q. Do you think that LeapFrog is clear that it is
5 penalizing nonresponding hospitals for not participating
6 in the survey?

7 A. I think LeapFrog is very clear that they'll give
8 limited achievement for that measure in the absence of
9 having any other information.

10 Q. And do you agree that giving limited achievement
11 to a hospital that doesn't participate in the LeapFrog
12 Hospital Survey is a penalty for not participating in
13 the LeapFrog Hospital Survey as it relates to the grade?

14 A. No. I don't see it has a penalty.

15 Q. What do you see it as?

16 A. I see it as the best possible guess, estimate,
17 proxy for that measure in the absence of having any
18 other information. Why would you say that there's been
19 a higher level of achievement when there's no evidence
20 to support that?

21 Q. And why would you say that there's a lower level
22 of achievement when there's no evidence to support that?

23 A. Because -- well, it says in the previous,
24 LeapFrog would look at their most recent scores from
25 four rounds, they're looking at the last two rounds. So

1 I don't know if there's some level of analysis. Again,
2 I've said it so many times, I don't know how the
3 methodology works. I don't know what happens behind the
4 scenes and why they came up with, after deliberation on
5 the expert panel, that putting limited achievement as
6 the appropriate way to fill in that gap, I had -- I've
7 not thought of that as a penalty. I've thought of that
8 as an opportunity for the hospital to provide the
9 information we want to see. We're about transparency
10 and if you know ahead of time what that methodology is
11 in fact, then that gives you every opportunity to put
12 the answer in that reflects your achievement.

13 Q. Again, why would you say that a lower level
14 achievement score is appropriate for a nonresponding
15 hospital when there's no evidence to support that?

16 MR. BILLEK: Object to form.

17 THE WITNESS: I think it's more appropriate to
18 give that level than it is to assume that they've had
19 a higher level of achievement.

20 BY MR. HVIDT:

21 Q. But when you're giving a lower -- lowest level of
22 achievement, aren't you also -- are you assuming that
23 they wouldn't -- that they would get the lowest level?

24 A. I'm not making any assumptions. I don't
25 understand your question.

1 Q. By assigning the lowest level of achievement to
2 nonparticipating hospitals, for the imputed measures,
3 LeapFrog is not trying to estimate their performance had
4 they responded to the survey; is that correct?

5 A. You showed me a document that had wording that
6 said this is how LeapFrog is estimating their
7 performance, a few minutes ago -- a few documents ago.

8 Q. I showed you a document that showed that the
9 LeapFrog staff communicated to the board that they're
10 trying to estimate --

11 A. Correct.

12 Q. -- the -- that they're trying to estimate the --
13 what the nonparticipating hospital would have achieved
14 by assigning them a lowest score; is that correct?

15 A. The document that we looked at said that they're
16 trying to estimate what the nonparticipating hospital
17 would have achieved, but I don't remember it saying by
18 assigning the lowest score. I don't remember seeing
19 that tag on to the statement.

20 Q. And when the LeapFrog staff communicated to the
21 board of directors that they were trying to estimate how
22 the hospital would have performed had it participated in
23 the LeapFrog survey by assigning the lowest possible
24 score, did you take them as being truthful in that?

25 A. I don't remember the specific discussion. I know

1 it's written like this. I didn't have any reason to
2 think that I wasn't being told the truth.

3 Q. Looking back at the minutes, if we go down -- I
4 think it's probably like eight lines down, do you see
5 where it says, This means hospitals?

6 A. I see that.

7 Q. Sentence reads, This means hospitals that have
8 not reported their performance to LeapFrog will have a
9 lower score for the imputed measures.

10 Do you see that?

11 A. Yes.

12 Q. And so by that sentence, LeapFrog staff was
13 updating the LeapFrog board that nonparticipating
14 hospitals would automatically have a lower score for the
15 imputed measures.

16 Is that correct?

17 A. Yes.

18 Q. And then it goes on to say that, These measures
19 are CPOE, BCMA, IPS and hand hygiene.

20 Do you see that?

21 A. Yes.

22 Q. The next sentence says, Hospitals can still get
23 an A if they fall into this category but it does make it
24 harder.

25 Do you see that?

1 A. Yes.

2 Q. And so is the LeapFrog staff communicating to the
3 board that it will be harder for a nonparticipating
4 hospital to receive an A simply by virtue of not
5 participating in the LeapFrog Hospital Survey?

6 MR. BILLEK: Object to form.

7 You can answer.

8 THE WITNESS: I don't know that that full
9 sentence that you said, by -- simply by virtue of not
10 participating, is -- is accurate. They're saying that
11 hospitals can still get an A if they do extremely well
12 in the publicly reported data. They're not going to
13 get that mid-level response without providing their
14 own -- their own data.

15 BY MR. HVIDT:

16 Q. And here, the LeapFrog staff is communicating to
17 the board that it will be harder for nonparticipating
18 hospitals to get an A if they don't participate in the
19 LeapFrog survey and are given an imputed limited
20 achievement score; is that correct?

21 MR. BILLEK: Object to form.

22 You can answer.

23 THE WITNESS: Yes.

24 BY MR. HVIDT:

25 Q. And as I mentioned earlier, it would be harder to

1 get an A -- it has proven to be harder to be getting an
2 A if you're a nonparticipating hospital in the LeapFrog
3 survey. Only two of 550 such hospitals got one in the
4 spring of 2025; is that fair to say that that's harder?

5 MR. BILLEK: Object to form.

6 You can answer.

7 THE WITNESS: What were the numbers prior to
8 that time? I don't know the answer.

9 BY MR. HVIDT:

10 Q. Over 100.

11 MR. BILLEK: Object to form.

12 You can answer.

13 THE WITNESS: So over 100 in the cycles before
14 got As who were a nonrespondent and it went down to
15 two? Okay. And the question was?

16 BY MR. HVIDT:

17 Q. Does that show that it has proven to be harder
18 for nonparticipating hospitals to get an A?

19 A. Yes. I don't know that -- with a caveat. I
20 don't know the detail of the 98 or however, you know,
21 100, whatever number you said. Now I don't remember.
22 200, 100. Hospitals, whether they performed poorly on a
23 CMS measures. I don't know that it's because of those
24 four measures that were imputed. So I would have to
25 revise my answer to say, certainly going from 100 to two

1 shows that there's something happening to reduce the
2 number of As. It could be a combination. It could be a
3 combination of issues.

4 Q. So assigning them the lowest score is likely a
5 contributing factor in --

6 A. I would -- I would say it could be a contributing
7 factor. I don't know that it is the only factor.

8 Q. And again, it is proven harder for a
9 nonparticipating hospital to get an A as there's no
10 Florida nonparticipating hospitals who got an A in the
11 spring of 2025 grading cycle; is that correct?

12 A. Is the question -- the question is it harder for
13 Florida than anyone else, you're saying, or you're just
14 saying has it proven that it's harder?

15 Q. Does the fact that there are no Florida
16 nonparticipating hospitals who got an A in the spring
17 2025 grading cycle confirm that the LeapFrog staff was
18 communicating to the board that this methodology change
19 will make it harder for nonparticipating hospitals to
20 get an A?

21 A. Yes.

22 MR. HVIDT: I have a subject change and it's
23 12:30. Do we want to go off the record?

24 THE WITNESS: Whatever you want to do.

25 MR. BILLEK: Do you want to take a break for

1 lunch or something?

2 MR. HVIDT: Yeah, I'm happy for it to be a
3 brief lunch but I do think we have around two hours
4 remaining.

5 THE COURT REPORTER: Do you want to go off the
6 record?

7 MR. HVIDT: Yeah. Sorry.

8 THE VIDEOGRAPHER: We are off the record at
9 12:31 p.m.

10 (Luncheon recess was taken.)

11 THE VIDEOGRAPHER: We are on the record at
12 12:59 p.m.

13 MR. HVIDT: Thank you.

14 BY MR. HVIDT:

15 Q. Earlier this morning, we talked about Florida
16 Alliance's role as a regional leader for The LeapFrog
17 Group; is that correct?

18 A. Yes.

19 Q. And you talked about how as part of that role,
20 Florida Alliance will send letters to hospitals to
21 encourage their participation in the LeapFrog Hospital
22 Survey; is that correct?

23 A. Yes.

24 Q. And has Florida Alliance sent letters to the
25 plaintiff hospitals in 2025 encouraging them to

1 participate in the LeapFrog Hospital Survey?

2 A. I don't know for sure.

3 Q. Does Florida Alliance have a practice of sending
4 letters to all hospitals in its region to encourage them
5 to participate in the LeapFrog Hospital Survey?

6 A. So Ashley, who I've mentioned, our VP, is in
7 charge of making that determination. I mentioned that
8 sort of extreme answer -- excuse me -- example of a
9 hospital that might be damaged and, you know, not
10 operational or not fully operational. So she does go
11 through, you know, who would be eligible. And the goal
12 is to send, you know, to every -- every eligible acute
13 hospital. So in general, you know, and the different --
14 the different categories.

15 So the shorter answer is, the practice is to send
16 to all applicable hospitals because there are some that
17 are not applicable.

18 Q. Thank you.

19 MR. HVIDT: I'm handing the witness what has
20 been marked as Exhibit 9 in this deposition.

21 (Exhibit No. 9 was marked for identification.)

22 THE WITNESS: Okay.

23 MR. HVIDT: Which has been produced in this
24 litigation as PBHN000018124. It is dated
25 April 23, 2025.

1 Counsel, do you see that date? I'm sorry.

2 Strike that.

3 BY MR. HVIDT:

4 Q. Dr. van Caulil, do you see that date?

5 A. I do.

6 Q. And what is Exhibit 9?

7 A. So this is a letter to -- I don't know if I'm
8 pronouncing his first name correctly -- Jerad Hanlon at
9 West Boca Medical Center and it has that item on the
10 intent to submit. Looks like it's a partial letter. It
11 looks like it's missing the signature page on it. So it
12 doesn't look like a full letter, actually, because if we
13 were to send it, it would be signed. So it's a letter
14 that looks like it's not complete. So I don't know
15 whether -- do you have the remainder of it? Okay.

16 Q. This is the document that was received by --

17 A. Okay.

18 Q. -- Jerad Hanlon at West Boca Medical Center.

19 A. Okay.

20 Q. And produced in the way that he sent it to us or
21 was kept in ordinary course of business. And so looking
22 at the top of the letter, do you see the Florida
23 Alliance for Healthcare Value logo?

24 A. Yes.

25 Q. Do you have any reason to doubt that Florida

1 Alliance sent a letter to West Boca Medical Center?

2 A. I don't have any doubts, but I -- I would say the
3 letter is not -- it's not complete. It's not -- it's
4 missing at least one page.

5 Q. And aside from lacking a signature --

6 A. I don't know the reason why. I'm sorry. I can't
7 speculate as to why. But I know that, you know --

8 Q. Aside from the fact that you're not seeing a
9 signature on this document, do you have any other reason
10 to question that the -- that the substance of the
11 document is inaccurate in any way?

12 A. No, I don't.

13 Q. And is this letter consistent with the letters
14 that Florida Alliance sends to hospitals in Florida to
15 encourage them to participate in the LeapFrog Hospital
16 Survey?

17 A. So I have already mentioned that it is not a
18 complete letter, I don't think. I -- when I've seen
19 copies of the letters, Ashley is signing them and
20 there's more specific information that would be included
21 from my quick perusal of it. So it is not consistent,
22 then, in that somewhere along the way, part of it is
23 missing, I think.

24 Q. Looking at the first page, is the first page of
25 the letter consistent with the first page of the letters

1 that Florida Alliance typically sends to Florida
2 Hospitals to encourage them to participate in the
3 LeapFrog Hospital Survey?

4 A. Yes. I believe so. But the letters come from
5 Ashley Tait-Dinger, so I don't have, you know, exact
6 wording known for the letter. But it looks consistent
7 with what I've seen in the past.

8 Q. Does Ashley Tait-Dinger report to you?

9 A. Yes, she does.

10 Q. Would you -- do you review the templates of the
11 letters before you approve of the template being
12 personalized for the Florida Hospitals?

13 A. No. If she's signing the letter, I may or may
14 not have seen -- seen it. The template comes from
15 LeapFrog and is updated with, I guess, local information
16 if -- if needed.

17 Q. And -- but the nature of this was produced by
18 West Boca Medical Center, do you have any reason to
19 dispute that they received this document?

20 A. No.

21 Q. And in looking at this first page of the letter,
22 do you -- is it fair to say that the letter is trying to
23 encourage West Boca to participate in the LeapFrog
24 Hospital Survey?

25 A. Yes.

1 Q. And it includes a form on the next page asking
2 for its intent to participate or not. Do you see that?

3 A. Yes. And that's what I had mentioned earlier
4 this morning, trying to recall what that looked like,
5 yeah.

6 Q. Absolutely. And there's a comment box where we
7 talked about how there's --

8 A. Correct.

9 Q. -- you might explain why you do not wish to
10 participate?

11 A. Yes.

12 Q. And in looking at this letter, and that's
13 represented in Exhibit 9, do you see any reference to
14 how LeapFrog will assign a low score to the hospital for
15 imputed measures if it doesn't participate in the
16 LeapFrog Hospital Survey?

17 A. No. And again, for the record, wherever along
18 the way there -- there is an aspect of this letter that
19 I'm pretty sure is missing, which would direct the
20 recipient with any questions to LeapFrog to their
21 website for reporting. That's what I believe is missing
22 from this letter.

23 Q. Are you aware whether Florida Alliance produced a
24 copy of this letter in its production?

25 A. I am not.

1 Q. Are you aware whether this document would have
2 been responsive to the subpoena sent to Florida
3 Alliance?

4 A. It should have been. At the time period, yes, it
5 should have been.

6 Q. And do you have any understanding as to why it
7 wasn't produced?

8 A. No. I don't know that it wasn't produced.

9 Q. When did you become aware of the lawsuit that was
10 filed by plaintiff hospitals for the -- that the
11 deposition that you're taking is within?

12 A. I was at our annual conference on May 1st and I
13 think I got an e-mail from Leah that day. I remember
14 seeing -- seeing it then. I think that there were some
15 conversations maybe earlier than that that it might
16 happen. Yeah. Late April or so.

17 Q. So you were informed in late April or so that
18 there might be a litigation; is that correct?

19 A. I think that sounds like the time period. Yes.

20 Q. And how were you informed?

21 A. I don't remember specifically whether it was in a
22 meeting or reading something that said that there had
23 been conversations between the hospitals and LeapFrog
24 about not displaying the grade and when LeapFrog said
25 we're going to display the grade, the information that I

1 got was we could expect a lawsuit as a result.

2 Q. And would that have come in the capacity as a
3 board member?

4 A. I don't recall.

5 Q. Were -- when you had that communication, were you
6 asked to do anything before the lawsuit was filed by
7 LeapFrog?

8 A. Only if any calls or e-mails or letters were
9 directed to us, to send them to Leah or Karen, whoever
10 at LeapFrog, and also not to speak to the media.

11 MR. HVIDT: I am handing the witness what's
12 been marked as Exhibit 10 in this deposition.

13 (Exhibit No. 10 was marked for identification.)

14 MR. BILLEK: Thanks.

15 MR. HVIDT: Exhibit 10's Bates number will be
16 FHA0002804. It was produced in this litigation by
17 Florida Alliance.

18 BY MR. HVIDT:

19 Q. Dr. van Caulil, do you see the document that I've
20 handed you?

21 A. Yes.

22 Q. Do you see that the top e-mail is an e-mail from
23 Chris Skisak to Leah Binder, regional leaders of
24 LeapFrog, board members of LeapFrog, with copy to Missy
25 Danforth, Karen Jupiter and Lauren Bailey regarding

1 spring safety grade lawsuit?

2 A. Yes.

3 Q. And you mentioned earlier that you received an
4 e-mail from Leah Binder on May 1, 2025, regarding the
5 lawsuit. Is that correct?

6 A. Yes. As I said, we had our annual conference
7 that day and I looked at my phone and saw the e-mail.

8 Q. And looking down at the e-mail from Leah Binder,
9 do you see where she cites the hospitals involved in the
10 lawsuit?

11 A. Yes.

12 Q. Do you see next to the hospitals involved in the
13 lawsuit, she puts their spring grade. Do you see that?

14 A. I do.

15 Q. And in your own words, how would you characterize
16 Leah Binder's e-mail to the regional leaders and the
17 board members here?

18 A. So she's certainly alerting the board and the
19 regional leaders to the fact that there's a lawsuit
20 that's been filed. And that they're going to do what it
21 takes to defend LeapFrog's position. She -- I'm just
22 looking down -- yes, she did attach the statement that
23 she had put together. That was the other document that
24 I had seen at or around that same time. And also to
25 please, you know, let people know that if they had any

1 questions, who to refer to.

2 Q. And do you see Chris Skisak's response above?

3 A. Chris Skisak, yes. He's my counterpart at the
4 Houston Business Coalition on Health, yes, I see it.

5 Q. So is he a regional leader?

6 A. The Houston Business Coalition on Health is a
7 regional leader, yes.

8 Q. Is he a member of the board of LeapFrog?

9 A. No.

10 Q. Do you see the second sentence of his e-mail, he
11 writes, In this case, the grades are doing what we all
12 hope - steer patients away from unsafe hospitals to more
13 safe ones, close quote.

14 A. Yes, I see that.

15 Q. Do you agree with him?

16 A. I wouldn't characterize the situation that way.

17 Q. Do you agree that a low LeapFrog grade steers
18 patients away from those hospitals?

19 A. I think it can. I think that patients take in a
20 lot of information in seeking hospital care. Oftentimes
21 they're going at the request -- at the recommendation of
22 their physician. I don't know that they're looking at
23 the -- at the grades. But it certainly could, if
24 somebody was aware of the hospital safety grades, give
25 them pause and to investigate further.

1 Q. And is one of the reasons why LeapFrog publishes
2 safety grades to influence consumer decisions about what
3 hospitals they should get their care at?

4 A. I wouldn't use the word influence. LeapFrog does
5 this to promote transparency so that consumers and
6 employers, purchasers of health services, have
7 information about patient safety performance. And they
8 are free to look at the methodology and the approach and
9 make their own decision about whether they agree with it
10 and should take that grade under consideration.

11 Q. Do you understand that LeapFrog's own documents
12 notes that one of the reasons for their hospital safety
13 grades is to influence consumer hospital decisions?

14 A. I haven't seen that written.

15 Q. In going back to Chris's e-mail, he references
16 steering patients away from unsafe hospitals.

17 Do you see that?

18 A. I do.

19 Q. And so is he connecting unsafe hospitals with the
20 letter grades D and F?

21 A. I don't know what Chris is doing.

22 Q. Would you characterize an F and D grade to be an
23 unsafe hospital?

24 A. I always look at the whole picture: The hospital
25 survey information, the safety grade information, when

1 we're -- when I'm personally seeking care, elderly
2 mother, and look at the history. So I'm a different
3 person than the general community, I will give that.
4 But I think it's part of a story and should be looked
5 at, you know, alongside other -- other sources.

6 Q. And that part of the story can impact decisions
7 made about where to receive healthcare --

8 A. Yes.

9 Q. -- is that correct?

10 A. Yes.

11 Q. And when you say that it's always good to look at
12 the whole picture, would you consider part of the whole
13 picture to include whether or not that hospital
14 participated in the LeapFrog survey?

15 A. For me personally, yes.

16 Q. Do you think that that's something that the
17 general consumer of the LeapFrog grade understands?

18 A. I don't know.

19 Q. You can set that to the side for the moment.

20 After receiving notice from Leah Binder of the
21 lawsuit, did you then notify your board at Florida
22 Alliance?

23 A. Yes.

24 Q. And going back to our discussion this morning,
25 your board, other than yourself, are representatives

1 from Florida employers; is that correct?

2 A. Yes, that's correct.

3 MR. HVIDT: I'm handing the witness what's been
4 marked as Exhibit 11 in the van Caulil deposition. It
5 was produced by the Florida Alliance as FHA0001995.

6 (Exhibit No. 11 was marked for identification.)

7 MR. HVIDT: Momentarily going back to
8 Exhibit 10. Exhibit 10 was produced by the Florida
9 Alliance as FHA0001739.

10 BY MR. HVIDT:

11 Q. Dr. van Caulil, do you see Exhibit 11 as an
12 e-mail chain regarding lawsuit against LeapFrog from
13 hospitals in Palm Beach County by and among you and your
14 board and Ashley Tait-Dinger in May of 2025?

15 A. Yes.

16 Q. And if you could go down to your original e-mail
17 dated May 6, 2025, on the third-to-last page.

18 A. Okay.

19 Q. Do you see your e-mail there to your board with
20 copy to Ashley that initiates this chain?

21 A. Yes.

22 Q. And included in your e-mail to your board of
23 Florida employers, you included the same lists of the
24 plaintiff hospitals that Leah Binder included in her
25 e-mail, along with the LeapFrog spring 2025 grade for

1 the hospitals.

2 Do you see that?

3 A. Yes.

4 Q. And so when you send an e-mail to your board, you
5 expect them to hopefully read the e-mail; is that
6 correct?

7 A. Yes.

8 Q. And your board, as we walked through in a
9 back-of-the-napkin manner, might have an employee or
10 covered lives number in Florida around 100,000; is that
11 fair?

12 A. Yes. We came to that earlier.

13 Q. And here in this e-mail, you are alerting them to
14 the plaintiff hospitals with their LeapFrog spring 2025
15 grade next to them; do you see that?

16 A. Yes.

17 Q. And if you flip to the next page, do you see the
18 paragraph beginning, I asked what protection?

19 A. Yes.

20 Q. Farther down, you write in that paragraph, We
21 have not sent these hospital CEOs the requests to
22 complete this survey as it would likely fan the flames.

23 Do you see that?

24 A. Yes, I do see that.

25 Q. What do you mean by that?

1 A. So as it says also earlier in the letter, I did
2 have a call with the LeapFrog attorney a few days before
3 that and felt that it would upset the CEOs to receive
4 those letters. And now Leah had wanted us to go ahead
5 and to send those letters and -- after this time of
6 this -- after this was sent. And we waited and I had
7 forgotten -- I had forgotten there was a period of time
8 in there where we didn't want to do that. So then the
9 letters were eventually sent, because of the later
10 sentence there, Business as usual, not to change course.

11 Q. Understood. And so there was a decision
12 initially to not send the hospital CEOs a request to
13 complete the LeapFrog Hospital Survey?

14 A. Yes.

15 Q. And later, there was a change?

16 A. Yes.

17 Q. And LeapFrog -- and Florida Alliance did send
18 letters to the plaintiff hospitals asking them to
19 participate in the LeapFrog survey?

20 A. Yes.

21 MR. BILLEK: Scott, when you have a second, I
22 just need a two-second break for an urgent matter I
23 have to deal with. I'm sorry to interrupt you and I'm
24 not trying to jam up your -- so whenever you get a
25 minute.

1 MR. HVIDT: Totally understand. Mind if we
2 quickly finish this document? We're pretty close.

3 MR. BILLEK: Of course. Finish your topic.

4 Thank you.

5 BY MR. HVIDT:

6 Q. At the time of this e-mail, it wasn't yet clear
7 whether LeapFrog's counsel would be your counsel; is
8 that correct?

9 A. That's correct.

10 MR. HVIDT: I can pause there for you to go
11 deal with your matter.

12 MR. BILLEK: Thank you.

13 MR. HVIDT: We can go off the record.

14 THE VIDEOGRAPHER: We're off the record at 1:25
15 p.m.

16 (A brief recess was taken.)

17 THE VIDEOGRAPHER: We are on the record at 1:31
18 p.m.

19 BY MR. HVIDT:

20 Q. Looking back at the page in Exhibit 12 that we're
21 looking at --

22 A. I think we're looking at 11.

23 Q. We're looking at Exhibit 11, the page we're still
24 at, in the following paragraph that begins, We also
25 decided.

1 Do you see that?

2 A. Yes.

3 Q. In this paragraph, is it fair to say that you are
4 contemplating whether to include reference to this
5 lawsuit in the weekly bulletin sent to the Florida
6 employer members that you have? And if so, what amount
7 of information?

8 A. Yes. I was asking the board if we should alert
9 the employer members because you showed earlier, you
10 know, our members are displayed, you know, publicly, in
11 case they were contacted by the media or anyone so they
12 would know ahead of time and they would know who to
13 direct their questions to. I wasn't sure what to do. I
14 was asking for board guidance on that.

15 Q. And ultimately, you -- the decision was made to
16 include a reference in the weekly bulletin to the
17 lawsuit; is that correct?

18 A. Yes. The board members wanted us to do that.

19 Q. Handing you what's been marked as Exhibit 12 in
20 the van Caulil deposition.

21 (Exhibit No. 12 was marked for identification.)

22 BY MR. HVIDT:

23 Q. Which was produced in this litigation by Florida
24 Alliance as FHA0000001.

25 Do you see Exhibit 12 before you, Dr. van Caulil?

1 A. Yes.

2 Q. And what is Exhibit 12?

3 A. So I mentioned earlier in the deposition that we
4 communicate with our employer members via a weekly
5 bulletin. And this is the one that went out on May 9th.

6 Q. And so this weekly bulletin that went out on
7 May 9th was distributed to all of the Florida employer
8 members of the Florida Alliance for Healthcare Value; is
9 that correct?

10 A. Yes. Each of the employer members would have
11 received this via e-mail on that day.

12 Q. And earlier, we discussed that the employer
13 members of the Florida Alliance for Healthcare Value
14 represented approximately three to 400,000 Florida
15 employees or covered lives a few years ago and that
16 might be a fair approximation of where it sits today; is
17 that correct?

18 A. Yes.

19 Q. And if you flip through this document, which
20 hopefully has page numbers, to page 7. Do you see where
21 there's a blue banner that says, The LeapFrog Group?

22 A. Yes.

23 Q. And if you scroll down to the bottom of that
24 section, do you see where it says, As you may have
25 heard, a lawsuit has been filed against The LeapFrog

1 Group on behalf of five hospitals in Palm Beach County,
2 requesting that The LeapFrog Group suppress their grades
3 on the safety score website.

4 A. Yes.

5 Q. And then you go on to say if they have questions
6 or inquiries, to direct them to Karen Jupiter at The
7 LeapFrog Group; do you see that?

8 A. Yes.

9 Q. Are weekly bulletins prepared in the ordinary
10 course of Florida Alliance business?

11 A. Yes.

12 Q. You can set that to the side.

13 MR. HVIDT: Can we go off the record
14 momentarily?

15 THE VIDEOGRAPHER: We are off the record at
16 1:37 p.m.

17 (A brief recess was taken.)

18 THE VIDEOGRAPHER: We are back on the record at
19 1:39 p.m.

20 MR. HVIDT: Thank you.

21 BY MR. HVIDT:

22 Q. Dr. van Caulil, did you attend a board meeting in
23 June of this year for The LeapFrog Group?

24 A. Yes. I wasn't able to attend for the full time,
25 but I was there for a good portion of the meeting.

1 Q. And during that board meeting, was there a report
2 on the lawsuit?

3 A. I don't recall. I assume you're looking for the
4 minutes or agenda from it, so if I could refresh my
5 memory. Sorry the jump to conclusions, but --

6 Q. That one was helpful.

7 A. Yeah.

8 MR. HVIDT: And so I'm handing the witness
9 what's been marked as Exhibit 13 in the van Caulil
10 deposition, which is a document that was produced by
11 The LeapFrog Group on Sunday without Bates numbers and
12 we haven't yet received the Bates-copied version.

13 I'll note on the record an item for all the
14 documents produced by LeapFrog Group on Sunday that
15 don't have Bates numbers, that LeapFrog Group asks
16 that they be confidential, and so we'll have the
17 transcript be confidential while those portions are
18 designated as confidential moving forward.

19 Is that okay with you, Counsel?

20 (Exhibit No. 13 was marked for identification.)

21 MR. BILLEK: Yes.

22 BY MR. HVIDT:

23 Q. And, Dr. van Caulil, do you see that the top of
24 this document says, LeapFrog Group board meeting agenda?

25 A. Yes.

1 Q. And do you see the date of it is June 25, 2025?

2 A. Yes.

3 Q. And there's a location in person and a board
4 meeting Zoom link. Do you see that?

5 A. Yes.

6 Q. And is it the practice of The LeapFrog Group to
7 not memorialize and approve minutes at the subsequent
8 board meeting?

9 A. Yes. The practice is you would receive the
10 minutes from this June meeting at the September meeting.

11 Q. So it is the case that here, before the September
12 board meeting occurred, there would not have been
13 minutes at this meeting yet approved; is that correct?

14 A. That's correct. We have not received a draft
15 minutes or a board packet yet.

16 Q. And looking down at the agenda items, do you see
17 where it says five rows down, Executive session?

18 A. Yes.

19 Q. And then it says the -- in the discussion, The
20 board will meet in the executive session with counsel
21 and Leah and three members of the management team to be
22 briefed on a confidential legal matter.

23 Do you see that?

24 A. I do.

25 Q. As part of that discussion, do you recall there

1 being a PR message delivered to the board?

2 A. No, I don't recall. Public relations PR you're
3 saying?

4 Q. Correct.

5 A. No.

6 Q. Do you recall Lauren Bailey communicating --

7 A. Oh, Lauren did a presentation. Okay. I guess I
8 wouldn't have called that PR. But yes. Lauren did a
9 presentation.

10 Q. What would you call that presentation that Lauren
11 did?

12 A. Communications.

13 Q. Do you recall when Lauren gave that presentation
14 that there was a slide deck accompanying that
15 presentation?

16 A. Yes. There were slides, yes.

17 Q. And did the slides follow along with oral
18 communication that she gave to the board?

19 A. Yes.

20 Q. You can set that one to the side.

21 MR. HVIDT: I'm handing Dr. van Caulil a
22 document that's been marked as Exhibit 14, which was
23 produced in this litigation by LeapFrog as
24 LEAPFROG00402156, as previously marked as Bailey
25 Exhibit 42.

1 (Exhibit No. 14 was marked for identification.)

2 BY MR. HVIDT:

3 Q. Do you see that, Dr. van Caulil?

4 A. Yes, I do.

5 Q. And flipping through the document, and please
6 take your time, could you let us know if the message on
7 the page is consistent with what you recall being orally
8 communicated by Lauren Bailey at the board meeting?

9 A. Yes.

10 Q. Looking in the document, Exhibit 14, do you see
11 under slide 2 where it says, Slide 2?

12 A. Yes.

13 Q. Do you see where Lauren says, quote, We will make
14 it painful for Tenet by drawing further attention to
15 their very poor performance with strategic media
16 coverage and local and national press?

17 A. Yes.

18 Q. Is that consistent with the message that Lauren
19 gave to the board at the June 2025 board meeting?

20 A. To the best of my recollection, yes.

21 Q. Do you see down in that first page where it says,
22 Slide 7, and then there's three sub-bullets there?

23 A. Yes.

24 Q. And there's a bold part where he says, They say
25 we are weaponizing fear, distorting facts and misleading

1 the public.

2 Do you see that?

3 A. I do.

4 Q. And her response is, Our methodology is
5 100 percent transparent and completely unbiased.

6 Do you see that?

7 A. I do.

8 Q. Do you believe that the LeapFrog methodology is
9 completely unbiased?

10 A. I do.

11 Q. Do you have an understanding that the LeapFrog
12 safety grade expert panel does not agree that it's
13 completely unbiased?

14 A. No.

15 Q. Flipping over to the next page, do you see where
16 there's a reference to Slide 9?

17 A. Yes.

18 Q. And then three sub-bullets down, it says quote,
19 We also like to focus on the poor performance of these
20 hospitals earning a D and F.

21 Do you see that?

22 A. Yes.

23 Q. And so in this communication, is LeapFrog
24 equating a D and F to the poor performance of the
25 hospitals?

1 A. Is that a question?

2 Q. Yes. The question was, in this communication, is
3 LeapFrog staff equating to the board poor performance to
4 the hospitals receiving a D and an F?

5 A. Yes.

6 Q. And so when someone is communicating that the
7 hospitals received a D and an F, that's consistent with
8 trying to communicate that they are poor-performing
9 hospitals; is that correct?

10 A. Poor performing on the hospital safety grade,
11 yes.

12 Q. Looking at slides 10 and 11, Lauren references
13 how they've garnered 18 original stories about the
14 lawsuit.

15 Do you see that?

16 A. I do.

17 Q. When you heard the word -- or garnered, a similar
18 message, did you interpret that to mean that The
19 LeapFrog Group was taking efforts to put the lawsuit
20 into the press?

21 MR. BILLEK: Object to form.

22 You can answer.

23 THE WITNESS: I -- when I was hearing the
24 presentation, my interpretation was that both sides
25 were engaging the media heavily to get their story

1 across.

2 BY MR. HVIDT:

3 Q. You also mentioned earlier today that you had
4 read some references about the lawsuit in the press
5 before; is that correct?

6 A. Yes.

7 Q. And had you read about the Palm Beach Post
8 articles?

9 A. I -- I couldn't say specifically.

10 Q. Okay.

11 A. Sorry.

12 Q. Is it fair to say that there was local Florida
13 press about the lawsuit that highlighted the hospital's
14 D and F grades?

15 A. So it's an interesting question because I had to
16 look for it, you know, to Google, if you will, to be
17 able to pull up the articles. I didn't see anything in
18 the normal course of my engaging with the news media,
19 and I had board members and other people who knew about
20 this say, I haven't heard a thing. I haven't heard
21 anything. I haven't seen anything. I have a board
22 member who lives in Palm Beach County, I have other
23 employer members down there that said, I haven't seen
24 anything.

25 So while there was local Florida press about the

1 lawsuit, I don't know that it was pervasive. And I
2 don't know that it all had the grades in it, depending
3 on which side of the issue, plaintiff or the defendant,
4 were telling the story. So I just thought that was
5 interesting that most people in my circle hadn't seen or
6 heard anything about it. And that surprised me.

7 Q. In today's news cycles, there's a lot of news
8 happening. Is that fair to say?

9 A. Yes, there's a lot of news happening.

10 Q. And often when you -- we're no longer in the days
11 where we got a morning paper and that's a primary way
12 where we got the morning -- got the news; is that right?

13 A. Yes.

14 Q. And we're no longer in a day where there's three,
15 four nightly news stations that you tune into to get the
16 news for the day --

17 A. Yes.

18 Q. -- is that correct?

19 A. Yes, unfortunately that's the case.

20 Q. I agree that's unfortunate.

21 And so the fact that you need to search for news
22 that you're looking for doesn't mean that people aren't
23 consuming it?

24 A. Correct. But my point is that the people who I
25 thought would have heard about it hadn't, quote, seen

1 anything, their words, on it. If you go back to the
2 discussion we had about the board and what should we do
3 and say, I was concerned that, you know, they would read
4 about it in the media before hearing it from us and they
5 know we're a regional leader, we'd be associated in some
6 way.

7 Q. And I'll come back to that momentarily.

8 When you have those conversations with them, did
9 you fill them in about the lawsuit?

10 A. No.

11 Q. Flipping to the last page of this document before
12 we set it aside. Do you see in the second-to-last
13 paragraph, Lauren mentions your name. Do you see that?

14 A. I do.

15 Q. And what is Lauren referring to there?

16 A. So in July, I'm going to say mid July, the Bruce
17 Bradley fellows, are you familiar with that program in
18 LeapFrog? It's a fellowship that they have. They were
19 coming down to Florida, specifically to Orlando,
20 specifically to AdventHealth, to have their educational
21 session and such. And Leah had asked -- well, actually,
22 Joe Berger, who runs the regional leader program, asked
23 Ashley, my vice president, if she would attend that
24 meeting, Leah would be there, Jill would be there, the
25 fellows would be there, AdventHealth was going to do a

1 big presentation on their patient safety.

2 Ashley was unable to come for medical reasons.
3 She lives in the state of Washington right now. So I
4 was to attend. And so Leah said to me, or somebody on
5 her staff said Leah has had a conversation with the CEO
6 of Jupiter Medical Center. She was thanking them for
7 their straight As. And in the course of the
8 conversation mentioned the Florida Alliance and the CEO
9 is not familiar with your organization. And Leah
10 thought it might be a good opportunity when she's in
11 Florida to go down to Jupiter Medical Center, learn from
12 them what they've done to be able to achieve straight As
13 and have me and an employer member or two come along to
14 talk about the Florida Alliance.

15 And so I said that, you know, I would -- I would
16 be able to do that. And I had a couple of employer
17 members who are willing to attend. I -- my intent in
18 the meeting for us was to be able to educate about the
19 Florida Alliance. We do a lot, a lot more than
20 LeapFrog. It's a very small percent of the work that we
21 do. And hospital CEOs like to meet with employers in an
22 area and use it as that opportunity, not to, you know,
23 really get into any kind of LeapFrog discussion.

24 The meeting was subsequently canceled. Leah did
25 not come to Florida at all. She had -- I believe it was

1 her brother having surgery and so she reached out to me
2 and said that the meeting was canceled. I could go
3 ahead if I wanted to and meet with them. But as this
4 lawsuit was progressing, I was not really feeling
5 comfortable with going down to Palm Beach and having my
6 employers brought into the mix in case anything had come
7 up about the lawsuit.

8 So I was fine with the meeting being canceled.
9 We had no prep calls. I never rescheduled and there's
10 been nothing further.

11 Q. You mentioned that your intent behind the meeting
12 was to connect your employer members to a CEO who wasn't
13 aware of the Florida Alliance.

14 A. That's correct.

15 Q. What -- thank you.

16 A. Sorry.

17 Q. What was -- what was communicated to you from
18 LeapFrog as to what their intent was for the meeting?

19 MR. BILLEK: Just note my objection.

20 You can answer.

21 THE WITNESS: Leah told me and then also in
22 this meeting, the board meeting, that it was to
23 highlight and spotlight and congratulate Jupiter
24 Medical Center on their achievement. I learned that
25 they were setting up media interviews, and I did say

1 that we would not be participating in anything like
2 that.

3 BY MR. HVIDT:

4 Q. Did LeapFrog communicate to you that they were
5 trying to keep LeapFrog in the news in Palm Beach
6 County?

7 A. I don't remember them saying it that way and that
8 that would be a way to do that, so no.

9 Q. Did LeapFrog communicate to you that they were
10 trying to portray Jupiter in contrast to plaintiff
11 hospitals in the media and with employers?

12 A. I would say yes.

13 Q. And in one of the -- and in trying to contrast
14 Jupiter Medical Center with the plaintiff hospitals, did
15 LeapFrog want to contrast Jupiter's A LeapFrog grade
16 with plaintiff hospital's D and F LeapFrog grades?

17 MR. BILLEK: Object to form.

18 You can answer.

19 THE WITNESS: I don't know what their plan was
20 for that. The gist of the message was, here's a
21 straight A hospital in an area where we have several
22 hospitals who haven't achieved that level of success
23 with our grading. So what are you doing differently
24 and innovatively around patient safety and quality
25 that we can learn from and perhaps share?

1 BY MR. HVIDT:

2 Q. You can set that document to the side.

3 A. The pile's getting a little smaller.

4 Q. That, it is.

5 A. It's getting higher over here.

6 Q. Did the Florida Alliance reach out to its -- some
7 of its members to see if they would be willing to
8 participate in the meeting with Jupiter Medical Center?

9 A. Yes, I did.

10 MR. HVIDT: I've handed the witness what has
11 been produced in this litigation by Florida Alliance
12 as FHA0000907.

13 (Exhibit No. 15 was marked for identification.)

14 THE WITNESS: Yes.

15 BY MR. HVIDT:

16 Q. Do you see Exhibit 15 in front of you?

17 A. I do.

18 Q. And what is Exhibit 15?

19 A. So this is an e-mail that Lisa Hain sent to check
20 in with Nancy Bolton, who is the benefits person at Palm
21 Beach schools, to see if she's available to attend that
22 meeting at Jupiter Medical Center. We already had Susan
23 McBroom, who we talked about earlier today, at Patriot
24 Rail, who had said that she would attend. And she sent
25 that on July 1st. I was in Europe at the time.

1 Q. And earlier today, we talked about Lisa Hain's
2 role with Florida Alliance. Do you recall that?

3 A. Yes.

4 Q. And you said that she performs an administrative
5 role and will coordinate communication. Is that fair?

6 A. I wouldn't say she coordinates communication.
7 She supports us in our communication effort.

8 Q. And so when -- before we presented you with
9 Exhibit 15, you mentioned that you sent a message to
10 some of your Florida employer members about
11 participating in the meeting with Jupiter Medical
12 Center. Do you recall that?

13 A. Yes.

14 Q. And so when Lisa is the actual sender of this
15 e-mail, did you direct her to send this e-mail?

16 A. So I don't recall that. As I said, I was on
17 vacation. I was in Scandinavia at the time. And I
18 think that I sent e-mails before I left, which would
19 have been -- I think I left June 28th for vacation. And
20 then when either I wasn't hearing from people or they
21 couldn't respond, it could be that Ashley worked with
22 her on this. I don't recall whether I would have
23 e-mailed while I was away. So, I'm sorry, I don't
24 recall. But it was due to the fact that I was -- I was
25 out of pocket.

1 Q. Would either you or Ashley have been the one
2 to -- directed the communication that Lisa Hain sent
3 here?

4 A. Yes.

5 Q. And the substance of the message from Lisa Hain,
6 is that a substance that would have been communicated
7 for her to send by either you or Ashley?

8 A. Yes.

9 Q. And in the message, you're reaching out to Palm
10 Beach schools and Nancy Bolton specifically. Why are
11 you reaching out to Palm Beach schools?

12 A. Because the meeting was going to be in Palm Beach
13 County.

14 Q. And would the meeting being in Palm Beach County
15 also relate to the notion that Jupiter is in Palm Beach
16 County?

17 A. Yes.

18 Q. And would the nature of the meeting in Palm Beach
19 County relate to that the five plaintiff hospitals are
20 in Palm Beach County?

21 A. I would say much less than -- than the issue that
22 Jupiter Medical Center is in Palm Beach County. As I
23 said a few minutes ago, my intent for the meeting was to
24 get to know the CEO, and I presume other team members,
25 who would come so that we could educate them about the

1 Florida Alliance and see where there were opportunities
2 to collaborate.

3 Q. You didn't initiate the meeting request, it
4 wasn't your idea --

5 A. No.

6 Q. -- to come up with the idea for the meeting; is
7 that correct?

8 A. That's correct.

9 Q. Was it LeapFrog's idea to have that meeting?

10 A. I don't know whose idea it was. I don't know
11 whether it came from Jupiter Medical Center or
12 originated from LeapFrog. I don't know.

13 Q. And in this message that was sent, do you see --
14 can you read into the record the last sentence of that
15 main paragraph of the e-mail?

16 A. The purpose of the meeting is to recognize and
17 thank Jupiter Medical Center for the straight As they
18 received as part of the spring LeapFrog Hospital Safety
19 Grades when there are five other hospitals in the county
20 with Ds and Fs.

21 Q. Thank you.

22 And when it references that there are five other
23 counties -- five other hospitals in the county with Ds
24 and Fs, is that a reference to the plaintiff hospitals?

25 A. Yes.

1 Q. Why did Florida Alliance feel a need to include
2 reference to the notion that there are five other
3 hospitals in the county with Ds and Fs?

4 A. I don't recall.

5 Q. And is Palm Beach schools an employer of a decent
6 amount of covered lives in Palm Beach County?

7 A. Yes.

8 Q. And in connecting Palm Beach schools with Jupiter
9 Medical Center, is there a goal to direct Palm Beach
10 schools to have their employees go to Jupiter Medical
11 Center over the five plaintiff hospitals?

12 A. No.

13 Q. Is it a possibility that upon being informed that
14 Jupiter Medical Center gets straight As, in comparison
15 to five hospitals in Palm Beach County that get Ds and
16 Fs from LeapFrog, that Nancy Bolton might direct her
17 employees to go to Jupiter Medical Center instead of the
18 five plaintiff hospitals?

19 A. I don't know whether Nancy Bolton or her
20 leadership would do that.

21 Q. Is it a possibility that upon being informed that
22 Jupiter Medical Center gets straight As, in comparison
23 to five hospitals in Palm Beach County that gets Ds and
24 Fs from LeapFrog, that Nancy Bolton might direct her
25 employees to go to Jupiter Medical Center instead of

1 five plaintiff hospitals?

2 MR. BILLEK: Object to the form of the
3 question.

4 You can answer.

5 THE WITNESS: I don't know if it's a
6 possibility. I don't know if it's a possibility
7 because I don't know what their plan states or their
8 benefit design or their contracts. So I don't know if
9 it's a possibility.

10 BY MR. HVIDT:

11 Q. Is that the intent that LeapFrog had behind this
12 meeting, in juxtaposing Jupiter with plaintiff
13 hospitals?

14 MR. BILLEK: Object to form.

15 You can answer.

16 THE WITNESS: I don't know what the intent was
17 of LeapFrog beyond what I said which was to highlight
18 their -- Jupiter Medical Center's straight As and to
19 give us an opportunity to introduce ourselves.

20 BY MR. HVIDT:

21 Q. But when you were at a board meeting in June of
22 2025, did Lauren Bailey communicate to the board and
23 yourself that LeapFrog wanted to make it painful for
24 Tenet?

25 A. Yes. That was stated.

1 Q. So is it possible that the effort to set up a
2 meeting with Jupiter Medical Center and Florida
3 employers highlighting Jupiter Medical Center's LeapFrog
4 straight As with plaintiff hospitals' Ds and Fs, that
5 that was one of the ways that LeapFrog was trying to
6 make it painful for Tenet?

7 MR. BILLEK: Object to form.

8 THE WITNESS: I don't recall that I make that
9 connection. If LeapFrog wants to highlight a
10 high-performing hospital and give us an opportunity to
11 create a relationship with a hospital, a health system
12 or whoever, who we haven't had the opportunity to work
13 with, I don't translate that to being pain for the
14 other hospitals.

15 BY MR. HVIDT:

16 Q. But LeapFrog's communicated to you that that was
17 their intent behind this meeting; is that correct?

18 A. That was not my intent for the meeting.

19 Q. But did LeapFrog communicate to you that that was
20 their intent for the meeting?

21 MR. BILLEK: Just note my objection to the
22 form.

23 THE WITNESS: No, they did not communicate to
24 me that the intent for the Jupiter meeting was to
25 cause any harm or pain to the five hospitals. It was

1 to spotlight, thank Jupiter Medical Center because
2 you're in a county where not everybody is able to
3 achieve that high level of grade consistently. What
4 is it that you are doing that is innovative and
5 effective that we can learn from? I mean, they're
6 also a 501(c)(3) organization just like the Florida
7 Alliance. And these types of meetings can put a
8 spotlight on things that can be shared broadly.

9 So to me, when it was posed as an opportunity,
10 that's what I saw could happen at the meeting.

11 However, we never had the meeting.

12 BY MR. HVIDT:

13 Q. You never had the meeting but you did have
14 reach-outs to Florida employers, correct?

15 A. I reached out. My staff reached out to Florida
16 employers who live or work in Palm Beach County to see
17 if they were interested in meeting at the hospital.

18 Q. And in those correspondences, you noted that five
19 of the hospitals in Palm Beach County have Ds and Fs, in
20 comparison to Jupiter Medical Center's As; is that
21 correct?

22 A. Yes. That's correct.

23 Q. And -- let's look at another one of those
24 correspondence.

25 Did Nancy Bolton respond to this outreach, do you

1 recall?

2 A. I don't recall. She -- if she did respond, she
3 couldn't make it.

4 MR. HVIDT: I'm handing the witness what's been
5 marked as Exhibit 16, which was produced by Florida
6 Alliance as --

7 THE WITNESS: Oh, okay.

8 (Exhibit No. 16 was marked for identification.)

9 MR. HVIDT: -- FHA0000913, which is the e-mail
10 chain, Re: Join Karen at Jupiter Medical Center
11 July 16th between Lisa Hain and Karen van Caulil at
12 the top.

13 BY MR. HVIDT:

14 Q. Do you see that?

15 A. Yes.

16 Q. And if you flip down to the second page, do you
17 see the response from Nancy Bolton there in the middle?

18 A. Yes, I see it now that she was unable to make the
19 meeting.

20 Q. But in responding to the e-mail, is it fair to
21 say that she had received and consumed the e-mail that
22 was sent to her?

23 MR. BILLEK: Object to form.

24 THE WITNESS: Nancy responded to Lisa's e-mail
25 on July 1st saying she had a school board meeting that

1 day and unable to attend. So I would interpret that
2 as her having read Lisa's e-mail.

3 MR. HVIDT: Thank you.

4 And I'm now handing the witness what's been
5 marked as Exhibit 17, which was produced in this
6 litigation by Florida Alliance as FHA0002804.

7 (Exhibit No. 17 was marked for identification.)

8 MR. HVIDT: Exhibit 17 at the top is an e-mail
9 chain between Ashley Tait-Dinger, Karen van Caulil
10 regarding, Join Karen at Jupiter Medical Center July
11 16, 1:00 p.m. to 3:00 p.m.

12 BY MR. HVIDT:

13 Q. Do you see that?

14 A. Yes.

15 Q. If you flip back to your -- origin of this
16 e-mail, do you see on July 1, 2025, Lisa Hain e-mailed
17 Rosa Novo? Do you see that?

18 A. Yes.

19 Q. And Rosa Novo is the chair of the Florida
20 Alliance board; is that correct?

21 A. Yes.

22 Q. And in this message that was sent, does this
23 message mirror what we looked at in Exhibit 15?

24 A. Yes.

25 Q. And there in that sentence, at the end of that

1 main paragraph, Florida Alliance references Jupiter
2 Medical Center's straight As and then says, When there
3 are five hospitals in a county with Ds and Fs.

4 Do you see that?

5 A. Yes.

6 Q. And Rosa Novo works with Miami-Dade schools; is
7 that correct?

8 A. Correct.

9 Q. And how many covered lives or employees do you
10 recall they had?

11 A. Yeah. That was like 45 or 50,000, I believe I
12 said at the time.

13 Q. And in this message, Florida Alliance is
14 communicating to Rosa that plaintiff hospitals have Ds
15 and Fs and is contrasting that with Jupiter Medical
16 Center's straight As; is that correct?

17 A. I'm sorry? Could you say that again? I was --

18 Q. Yeah. Going back to the original e-mail. In
19 this message, Florida Alliance is communicating to Rosa
20 Novo that plaintiff hospitals have Ds and Fs and is
21 contrasting that with Jupiter Medical Center's straight
22 As.

23 Is that correct?

24 A. So the e-mail does not say it's the plaintiff
25 hospitals. It just says there are five other hospitals

1 in the county with Ds and Fs. That doesn't make any
2 reference to the five hospitals or that they are the
3 ones that are -- that have filed a lawsuit.

4 Q. It doesn't refer to them by name; is that
5 correct?

6 A. That's correct.

7 Q. But are the five -- is the intent here behind
8 Florida Alliance's communication to five other hospitals
9 in the county with Ds and Fs are the five plaintiff
10 hospitals?

11 A. It is referencing the five -- that there are five
12 other hospitals in the county with Ds and Fs. That's
13 what it says. But it does not call them out and it does
14 not point out that it's those five that happen to be in
15 the lawsuit.

16 Q. And -- but it does reference that there are five
17 other hospitals in the county with Ds and Fs?

18 A. Yes, it does.

19 Q. And is LeapFrog's intent in setting up this
20 meeting to contrast an A grade hospital with D and F
21 grade hospitals?

22 A. I don't know if it's LeapFrog's intent at the
23 time to do that.

24 Q. And Rosa responds saying she can't attend; is
25 that correct?

1 A. Correct.

2 Q. And then Lisa updates you that Rosa is not able
3 to attend; is that right?

4 A. That's correct. Which I felt was unfortunate
5 because of her being board chair.

6 Q. And you ask -- excuse me, strike that.

7 Lisa then references to you on July 4th that
8 there's no word from MAPEI. Do you see that?

9 A. Yes.

10 Q. What is MAPEI?

11 A. So that's another employer member down in the
12 same area. I can't remember what language it's an
13 acronym for but maybe Italian, the different letters.
14 They're like a manufacturing industrial glues and
15 adhesives and such, so...

16 Q. Do you have any -- are they in the Palm Beach
17 County area?

18 A. Yes.

19 Q. Do you have any understanding of how many covered
20 lives or employees they have?

21 A. I would say less than 1,000.

22 Q. And then moving forward, you write to Ashley on
23 July 4th, I hate to even suggest this but should I see
24 if FPL would like to attend?

25 You see that?

1 A. Yes.

2 Q. What's FPL?

3 A. Florida Power & Light. They're not a member of
4 the Florida Alliance.

5 Q. Okay. And then --

6 A. I wanted to keep it to employer members, but knew
7 that they were located in the county as their
8 headquarters.

9 Q. And after discussion of that idea, you suggest
10 maybe Melissa Miller; do you see that on the first page?

11 A. Yes.

12 Q. Who's Melissa Miller?

13 A. So she is with -- or had been with Florida
14 Power & Light. I was just clarifying to Ashley that I
15 was not thinking of this other person, Michael, who we
16 had been working with. Melissa had served as our board
17 vice chair and was in a different position at FPL. I
18 didn't take it further than that.

19 Q. There was no reach-out to --

20 A. No.

21 Q. -- Melissa Miller?

22 A. No. Stopped right there, yes.

23 Q. How many -- do you recall how many employer
24 members you reached out to about attending this meeting?

25 A. Rosa and Nancy, Elissa from MAPEI, Marcia from

1 Lennar, Susan McBroom from Patriot Rail. I think that's
2 it.

3 Q. I'm handing you what's been marked as Exhibit 18
4 to this deposition. And Exhibit 18 was produced by
5 Florida Alliance as FHA0000921.

6 (Exhibit No. 18 was marked for identification.)

7 BY MR. HVIDT:

8 Q. And it is an e-mail from Lisa Hain to Elissa
9 Cadovius?

10 A. Cadovius.

11 Q. And Barbara Ramos regarding, Join Karen at
12 Jupiter Medical Center July 16, 1:00 p.m. to 3:00 p.m.

13 Do you see that?

14 A. Yes.

15 Q. And is the substance of this message to Elissa
16 and Barbara consistent with the message that was
17 conveyed to Rosa Novo and Nancy Bolton in Exhibit 17 and
18 15 respectively?

19 A. Yes.

20 Q. And in this message, again, it references Jupiter
21 Medical Center's straight As from the LeapFrog Hospital
22 Safety Grade when there are five other hospitals in the
23 county with Ds and Fs.

24 Do you see that?

25 A. Yes.

1 Q. You can set that to the side. Thank you.

2 You mentioned Lennar. Did I say it right?

3 A. Lennar Homes, yes.

4 Q. Lennar Homes?

5 A. Yes.

6 Q. Do you have an understanding of how many covered
7 lives Lennar Homes has?

8 A. That's one of the employer members who gives like
9 national, international numbers. And I don't know that
10 I have offhand Florida, I would say it's maybe 2,000 in
11 Florida.

12 Q. You also mentioned Patriot Rail, and a
13 representative of Patriot Rail sits on your board; is
14 that correct?

15 A. Yes.

16 Q. And earlier we talked about how they might have a
17 few hundred Florida employees or covered lives; is that
18 correct?

19 A. Correct.

20 Q. And why -- why, again, were you targeting -- or
21 do all those Florida employers you were talking about
22 have a presence in Palm Beach County?

23 A. All of them except for Patriot Rail. Susan
24 McBroom lives in Palm Beach County. If they have lives
25 in Palm Beach County, it's a very small number.

1 Q. Patriot Rail might be a little bit further south
2 in Florida?

3 A. No, out of Jacksonville predominantly.

4 Q. Oh, Jacksonville.

5 A. Its short rail, railroad, I don't really know
6 what that really means, but that's what I've been told.

7 Q. Don't they connect to the big ones?

8 A. I think so.

9 Q. And did you ever reach out to Florida bankers
10 regarding the meeting as well?

11 A. I guess I might have, yeah. I -- I don't
12 remember if we did or not. They do have banks in South
13 Florida. As I mentioned, there are multiple employer
14 welfare arrangements as well with many, many banks.

15 MR. HVIDT: And I've handed the witness what's
16 been marked as Exhibit 19 to this deposition, which
17 was produced by Florida Alliance as FHA0001749 and is
18 a May 8, 2025, e-mail from Ashley Tait-Dinger to Lisa
19 Hain regarding contacts.

20 (Exhibit No. 19 was marked for identification.)

21 BY MR. HVIDT:

22 Q. Do you see that?

23 A. Yes.

24 Q. And then Ashley Tait-Dinger writes, Can you send
25 me the main contacts' e-mails for the following?

1 Do you see that?

2 A. Yes.

3 Q. And then lists Palm Beach - Nancy Bolton. Do you
4 see that?

5 A. Yes.

6 Q. And then it notes Lennar - not sure who this is?

7 A. Yes.

8 Q. And then it says MAPEI - not sure who this is?

9 And then it says Banker - Adella.

10 Do you see that?

11 A. Yes.

12 Q. And then do you see where she writes, I need to
13 contact them about the LeapFrog lawsuit?

14 A. Yes, I see that.

15 Q. Do you have an understanding of whether Florida
16 Alliance contacted each of those Florida employer
17 members of Florida Alliance about the LeapFrog lawsuit?

18 A. No, I don't.

19 Q. And are these communications that we've been
20 looking at the contacts' e-mails that Ashley Tait-Dinger
21 was looking for those contact information for?

22 A. Are you asking about for the Jupiter meeting?

23 Q. Yes.

24 A. No, I don't think so. I don't think that the
25 invitation to the Jupiter meeting was till weeks after

1 that, probably in -- probably in June.

2 Q. Did you ask Ashley Tait-Dinger to reach out to
3 those Florida employer members about the lawsuit?

4 A. I don't recall doing that. We talked earlier
5 about the dialogue with the board on how to inform the
6 members and it could be that this didn't happen and it
7 deferred to the weekly bulletin correspondence. I'm not
8 familiar with this e-mail.

9 Q. I'm handing you what's been marked as Exhibit 20
10 to the van Caulil deposition, which is produced in this
11 litigation as LEAPFROG00792177.

12 At the top of the document is an e-mail chain
13 between Lauren Bailey, Karen van Caulil, Leah Binder,
14 Angela Hopkins, Karen Jupiter, regarding Jupiter Medical
15 Center.

16 Do you see that, Dr. van Caulil?

17 (Exhibit No. 20 was marked for identification.)

18 THE WITNESS: Yes.

19 BY MR. HVIDT:

20 Q. If we could walk this back to the original e-mail
21 in this chain on Bates number ending 2180.

22 A. Yes.

23 Q. The e-mail on this chain that started it was from
24 Leah Binder; is that correct?

25 A. Yes.

1 Q. And it's dated May 28th. Do you see that?

2 A. Yes.

3 Q. And she writes, You may recall we spoke about
4 planning a visit of you and some of your members and me
5 to Jupiter Medical Center, one of the straight A
6 hospitals.

7 Do you see that?

8 A. Yes.

9 Q. Do you recall when you spoke with Leah Binder
10 about planning a visit between you and her and some of
11 the Florida Alliance members to Jupiter Medical Center
12 that predated May 28, 2025?

13 A. I think that we spoke just before that, only
14 maybe days before. I don't recall the exact date. She
15 called me and asked me if I would be interested. It was
16 a very short conversation.

17 Q. And she writes that the CEO of Jupiter Medical
18 Center is excited about the visit and is interested in
19 setting up this meeting; is that correct?

20 A. That's what it says.

21 Q. And forwarding along in this e-mail to the page
22 number ending 2178, do you see your e-mail dated
23 June 16, 2025?

24 A. Yes.

25 Q. And you wrote that you have an enthusiastic yes

1 from Susan McBroom, the director of human resources at
2 Patriot Rail.

3 Do you see that?

4 A. Yes.

5 Q. And you also referenced the -- you're waiting to
6 hear back from Nancy Bolton at Palm Beach schools.

7 Do you see that?

8 A. Correct. Yes.

9 Q. And then carrying forward, you respond that
10 Shannon Chamberlain from Lennar Homes is also attending.
11 Do you see that, on June 19th?

12 A. Yes.

13 Q. And so is it correct that before the meeting was
14 canceled, you had a commitment to attend the meeting
15 from two of your Florida employer members; is that
16 correct?

17 A. That's correct.

18 Q. And those were Lennar Homes and Patriot Rail?

19 A. Correct.

20 Q. And in response to your e-mail, Lauren Bailey
21 responds the next day, I'm going to reach out to their
22 PR team today to kick off planning.

23 Do you see that?

24 A. Yes.

25 Q. Did you interpret the their PR team to be Jupiter

1 Medical Center's PR team?

2 A. Yes.

3 Q. And you had mentioned that you did not intend to
4 participate in the PR component; is that correct?

5 A. That's correct.

6 Q. Did your intention of not participating in the PR
7 component stop -- was that communicated before June 20,
8 2025?

9 A. I communicated that from the outset. As soon as
10 I heard that there was going to be any level of media,
11 it might have been at the board meeting the first time I
12 heard that. I said that I would not participate nor put
13 my employers in a position like that. And Leah said she
14 understood.

15 Q. And LeapFrog intended to continue with the PR
16 effort, even if it didn't include the Florida members in
17 that PR component?

18 A. I don't know if they were going to continue
19 without us. I just made it clear that we were not
20 participating.

21 Q. If you had communicated to Leah at the board
22 meeting earlier in June that you had intended not to
23 have your members participate in the LeapFrog -- in the
24 PR effort regarding the meeting and on June 20, 2025,
25 Lauren Bailey's communicating a plan to reach out to

1 Jupiter Medical Center's PR team today to kick off
2 planning, does that indicate that LeapFrog was --
3 continued to go ahead with PR planning for the meeting
4 with Jupiter Medical Center even after you communicated
5 your intent not to participate in such PR planning?

6 A. It looks like that was Lauren's plan. I don't
7 know if she went ahead and did that, but it looks like
8 that's her plan.

9 MR. HVIDT: I'm handing the witness what's been
10 marked as Exhibit 21 to the van Caulil deposition.
11 The exhibit was produced in this litigation as
12 FHA0002195. And the top e-mail is from Karen van
13 Caulil to Ashley Tait-Dinger regarding Jupiter Medical
14 Center dated May 28, 2025.

15 (Exhibit No. 21 was marked for identification.)

16 BY MR. HVIDT:

17 Q. Do you see that?

18 A. Yes.

19 Q. Was this e-mail sent in the ordinary course of
20 business?

21 A. Yes.

22 Q. And if you flip to the e-mail that originated
23 this chain, do you see the e-mail that was in a prior
24 exhibit that we looked at from Leah Binder to you
25 regarding this Jupiter Medical Center meeting?

1 A. Yes.

2 Q. And again, she references a conversation that she
3 had with you predating this May 28, 2025, e-mail; is
4 that correct?

5 A. Yes.

6 Q. And you forwarded that e-mail to Ashley
7 Tait-Dinger on May 28, 2025, on the second page.

8 Do you see that?

9 A. Yes.

10 Q. And then Ashley Tait-Dinger replies, I thought
11 the meeting was with AdventHealth in June.

12 Do you see that?

13 A. Yes.

14 Q. And you write back on May 28, 2025. Can you read
15 in the record your e-mail?

16 A. Yes. This is something different. Leah wants to
17 highlight Jupiter Medical Center's A safety grade
18 because of the lawsuit and poor performing hospitals in
19 Palm Beach County.

20 Q. Does reading this e-mail refresh your
21 recollection that Leah communicated to you that she
22 wants to highlight Jupiter Medical Center's A safety
23 grade because of the lawsuit and poor performing
24 hospitals in Palm Beach?

25 A. Well, I hadn't recalled that I had said that in

1 an e-mail, so obviously my statements earlier, I need to
2 amend. She must have said at some point to me that that
3 was her intent. And I hadn't remembered that. Because
4 subsequent discussions were about when we had the
5 follow-up call was to really highlight their straight A
6 performance.

7 Q. And so before your e-mail on May 28, 2025, you're
8 communicating that when Leah spoke with you, she
9 communicated to you that she wanted to highlight Jupiter
10 Medical Center's A safety grade because of the lawsuit
11 and poor performing hospitals in Palm Beach County; is
12 that correct?

13 A. I don't recall the exact conversation, but I
14 don't see myself writing that sentence if I didn't feel
15 that at the time.

16 Q. And you mentioned earlier that you recalled that
17 the conversation you had with her was shortly before the
18 May 28th e-mail from her to you that starts this chain;
19 is that correct?

20 A. Yes. I don't remember the exact date. It was a
21 brief conversation and it was supposed to have a more
22 detailed follow-up which never happened. There was a
23 planning meeting set, and I think on the Jupiter end
24 they had to reschedule it so it never was rescheduled.

25 Q. And you didn't think that the meeting was a good

1 idea from the outset; is that correct?

2 A. No. It's not entirely correct. Initially, I
3 thought it would be a good opportunity to be able to
4 meet the Jupiter Medical Center CEO and his leadership
5 team and as the days and weeks progressed and I
6 discussed this with Ashley, we thought that it probably
7 would be best not to do it while the lawsuit was going
8 on, that it probably made more sense to wait until a
9 later date and hope that we could reengage.

10 Q. And why would having a meeting with Jupiter
11 Medical Center highlighting its A LeapFrog grade not be
12 a good idea while the lawsuit was pending?

13 MR. BILLEK: Object to form.

14 You can answer that again.

15 THE WITNESS: So, you know, you can't control
16 where a conversation is going to go before you have
17 it. And as Ashley and I continued to talk about it,
18 it just made sense to stick with what we were saying
19 to everybody else, which was to, you know, kind of
20 stay out of any kind of discussions about the matters
21 of the lawsuit. And in case it came up, didn't want
22 to put my employers in that position.

23 BY MR. HVIDT:

24 Q. I'm handing you what's been marked as Exhibit 22
25 in the van Caulil deposition, which was produced in this

1 litigation as FHA0002516.

2 (Exhibit No. 22 was marked for identification.)

3 BY MR. HVIDT:

4 Q. It is an e-mail chain between -- at the top
5 between Ashley Tait-Dinger and Karen van Caulil dated
6 July 7, 2025, Re: Visit to Jupiter Medical Center.

7 Do you see that?

8 A. Yes.

9 Q. And if you'd go to the original e-mail in this
10 chain on the last page, let me know when you're there.

11 A. I'm here.

12 Q. And so did you get an e-mail from Leah Binder on
13 July 7, 2025, Re: Visit to Jupiter Medical Center?

14 A. Yes.

15 Q. And in the second sentence of the e-mail, does
16 Leah Binder tell you -- or strike that.

17 The first sentence of the e-mail, Leah Binder
18 informs you that she's not going to be able to make the
19 trip to Florida. Do you see that?

20 A. Yes.

21 Q. And the second sentence references what we talked
22 about earlier as relates to her brother needing surgery.
23 Do you see that?

24 A. Yes.

25 Q. And then what's the third sentence say, if you

1 could read that into the record, please?

2 A. In addition, the timing is not right for me to be
3 in Florida in terms of some legal issues.

4 Q. Do you have an understanding of what she was
5 referencing there?

6 A. No, not specifically.

7 Q. Were you aware that as of July 7th, LeapFrog was
8 maintaining that the court that is housing this
9 litigation didn't have jurisdiction over the LeapFrog
10 Group?

11 A. No, I'm not aware.

12 Q. Were you aware that at this time, the LeapFrog
13 Group was claiming that it didn't direct business into
14 Florida?

15 A. I'm not understanding directing business into
16 Florida. No, I'm not aware of that.

17 Q. And then forwarding on in the e-mail chain,
18 there's an e-mail from Ashley Tait-Dinger to you and
19 potentially to Lisa Hain, but it's not clear whether
20 she's on it or not, on July 7th at 9:35 p.m., that
21 begins on the first page and then goes on to the second.

22 Do you see that?

23 A. Yes.

24 Q. She says, Just to you. So this has actually
25 removed Lisa Hain. Does that make sense?

1 A. Yes.

2 Q. And she writes, Leah e-mailed me too. Shocking
3 counsel did not think this was good timing...but let us
4 do it...oh, I thought we were covered under your
5 insurance...if you were told not to, why would we be
6 allowed?

7 Do you see that?

8 A. Yes.

9 Q. What did you interpret her to mean?

10 A. I didn't understand her e-mail. I was still out
11 of the country at the time. And Ashley will send
12 e-mails that are a little hard to follow with stream of
13 consciousness. My interpretation of it was we all came
14 to the same conclusion, that the meeting should not
15 proceed.

16 Q. And you responded, quote, I am relieved it is
17 canceled.

18 Do you see that?

19 A. Yes.

20 Q. And can you explain why you were relieved it is
21 canceled?

22 A. I think I've already answered that. I didn't
23 want to put my employer members in a difficult position
24 when I was also hearing about media and what might
25 happen at the meeting. I just thought it would be best.

Page 178

1 And Leah offered. She said if you want to go
2 ahead with the meeting without me, you can do that. But
3 I, as I said, was like, let's reschedule for a later
4 time.

5 Q. And Ashley Tait-Dinger replied, Yes, me too, I
6 thought the whole thing was a bad idea.

7 Do you see that?

8 A. I do see that.

9 Q. Do you agree with her?

10 MR. BILLEK: Object to form.

11 You can answer.

12 THE WITNESS: I had already said I was fine
13 with it being canceled.

14 MR. HVIDT: If we could go off record for a
15 minute.

16 MR. BILLEK: Sure.

17 THE VIDEOGRAPHER: We are off the record at
18 2:46 p.m.

19 (A brief recess was taken.)

20 THE VIDEOGRAPHER: We are on the record at 2:55
21 p.m.

22 MR. HVIDT: Counsel for plaintiffs rest and
23 reserve.

24 MR. BILLEK: I have nothing further. I don't
25 have anything at all.

1 THE VIDEOGRAPHER: This concludes the
2 deposition. We are off the video record at 2:55 p.m.

3 MR. BILLEK: We will order in the same speed
4 and information that plaintiff orders.

5 (The deposition was concluded at 2:55 p.m.)

Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY.

THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

1 Thereupon,
2 the following proceedings began at 10:34 a.m.:

3 THE VIDEOGRAPHER: We are now on the
4 record. My name is Alex Rampone. I'm the
10:35 5 videographer with Lexitas. Today's date is
6 September 24, 2025, and the time is 10:34 a.m.
7 eastern time.

8 This deposition is being held at 550 South
9 Andrews Avenue, Suite 700, Fort Lauderdale,
10:35 10 Florida 33301 in the matter of Good Samaritan
11 Medical Center, Inc. versus Leapfrog Group. The
12 deponent is Erik Cazares.

13 Would counsel and all present please
14 introduce themselves, and after, the court
10:36 15 reporter, Theresa Rust, will swear in the
16 witness.

17 MS. ZIBAS: My name is Jura Zibas. I'm
18 with the law firm of Wilson Elser on behalf of
19 the defendant, The Leapfrog Group.

10:36 20 MR. CHUNG: Daniel Chung of Gibson Dunn &
21 Crutcher for plaintiffs.

22 MR. FISCHER: Alexander Fischer from Gibson
23 Dunn.

24 THE STENOGRAPHER: Raise your right hand,
25 please.

Erik Cazares
September 24, 2025

Page 5

1 Do you swear that the testimony you are
2 about to give will be the truth, the whole
3 truth, and nothing but the truth?

4 THE WITNESS: Yes.

10:36 5 THE STENOGRAPHER: Thank you.

6 THEREUPON:

7 ERIK CAZARES

8 Was called as a witness and, having been first duly
9 sworn and responding "I do," was examined and
10 testified as follows:

11 DIRECT EXAMINATION

12 BY MS. ZIBAS:

13 Q. Good morning, Mr. Cazares. As I indicated,
14 my name is Jura Zibas. I represent the defendants,
10:36 15 and we're here today to take your deposition as it
16 relates to the lawsuit filed in the Southern District
17 of Florida, U.S. District Court.

18 Have you been deposed before in the past?

19 A. Yes.

10:37 20 Q. How many times?

21 A. Twice.

22 Q. And what were the cases, if you recall?

23 A. One was an employment and the other one a
24 union matter.

10:37 25 Q. And were the lawsuits related to your work,

Erik Cazares
September 24, 2025

Page 6

1 meaning under your former employer or your current
2 employer?

3 A. Yes.

4 Q. All right. And the reason I ask is just in
10:37 5 terms of having to explain to you the process. So
6 you understand that we're going to be videotaping you
7 answering questions. Please wait until I finish
8 asking the question. If your attorney has an
9 objection, let your attorney object. Unless he
10:37 10 directs you not to answer, you answer the question
11 after the objection is on the record. If there's a
12 question that you don't understand, just let me know.
13 And we will do every -- I'll make every effort to
14 then rephrase it or explain the question.

10:38 15 If you need to take a break, please let us know.
16 You can take a break. This isn't an endurance test.
17 Just have to do it in between questions.

18 Does that all make sense to you?

19 A. Yes.

10:38 20 Q. All right. When did you first learn about
21 -- let's set up the foundation. You are aware that
22 there is a lawsuit filed by Palm Beach Community
23 Hospital against the Leapfrog Group; is that correct?

24 A. Yes.

10:38 25 Q. When did you first learn that a lawsuit

Erik Cazares
September 24, 2025

Page 7

1 would be filed against the Leapfrog Group by Palm
2 Beach Gardens Community Hospital?

3 MR. CHUNG: I'm going to object based on
4 privilege. If your answer involves any
10:38 5 communications with lawyers, either in-house
6 lawyers or outside lawyers, avoid those
7 conversations.

8 MS. ZIBAS: Yes. I'm not interested in
9 your conversation. Just if you -- when you
10:39 10 learned about it.

11 A. It was earlier this year. I don't have the
12 exact date.

13 (Exhibit 1 was marked.)

14 BY MS. ZIBAS:

10:39 15 Q. Okay. I have marked what is Cazares Number
16 1. It's an exhibit I want you to take a look at that
17 we're just going to identify and flip the pages.

18 A. Okay.

19 Q. Have you seen this document that is Cazares
10:40 20 Number 1 before?

21 A. This specific document, I have not.

22 Q. This is a deposition notice, and on the
23 front, it indicates that we are here for your
24 deposition as an individual and also as a
10:41 25 representative of Palm Beach Gardens Community

Erik Cazares
September 24, 2025

Page 8

1 Hospital. Is that your understanding of the purpose
2 of today?

3 A. Yes.

4 Q. What is your current job title?

10:41 5 A. I'm the CEO of Palm Beach Gardens Medical
6 Center.

7 Q. And when did you start in that role?

8 A. July of 2024.

9 Q. And before we go into your education or
10:41 10 employment background, going back to the two times
11 you were previously deposed. Were those in state or
12 Federal Court cases, do you know?

13 A. I don't recall. No, I don't recall. Long
14 time ago.

10:41 15 Q. Okay. So we want to go through some of
16 your back -- your history and background first. So
17 why don't you tell me your -- where did you earn your
18 college degree or nursing degree?

19 A. Sure. I graduated from the University of
10:42 20 Texas El Paso with a Bachelor of Science in nursing
21 in 2000. That was the first degree that I earned.
22 And I started practicing as a registered nurse in
23 January of 2001. Received a Master's in science and
24 nursing administration from Texas Tech University and
10:42 25 that was in 2013.

Erik Cazares
September 24, 2025

Page 9

1 Q. So while you were earning your Master's in
2 nursing administration, were -- did -- were you
3 employed?

4 A. Yes.

10:42 5 Q. And where was your -- what was your first
6 job after you graduated from nursing school?

7 A. It was in a hospital called Sierra Medical
8 Center.

9 Q. And how long did you work at Sierra Medical
10:43 10 Center?

11 A. I worked there until 2008.

12 Q. And after Sierra Medical Center, did you
13 work somewhere else?

14 A. Yes. I went to Sierra Providence East
10:43 15 Medical Center.

16 Q. And what was your title there?

17 A. Well, I had different titles. My initial
18 title was director of the telemetry floor, and then I
19 took over several other departments and eventually
10:43 20 became the assistant chief nurse officer for that
21 particular hospital.

22 Q. That was Sierra Providence East?

23 A. Correct.

24 Q. How long did you work at Sierra Providence
10:43 25 East in your various roles?

Erik Cazares
September 24, 2025

Page 10

1 A. Until 2015.

2 Q. And then where did you go in 2015?

3 A. Then I went back to Sierra Medical Center
4 as the chief nursing officer.

10:44 5 Q. And when you're a chief nursing officer,
6 what are your duties, in general?

7 A. Oversight of all of nursing operations,
8 staffing, safety, quality, patient experience.

9 Q. And how long were you the chief nursing
10:44 10 officer at Sierra Medical Center?

11 A. I was there for approximately three years.

12 Q. And that's around 2018; is that correct?

13 A. Correct.

14 Q. And then where did you go?

10:44 15 A. Then I went back to Sierra Providence East.
16 By that time, it was called the Hospitals of
17 Providence East Campus and as a role of a chief
18 operating officer.

19 Q. So you went back to Sierra Providence East,
10:45 20 but it was then the Hospitals of Providence East
21 Campus?

22 A. The Hospitals of Providence East Campus.

23 Q. And you were the COO?

24 A. Correct.

10:45 25 Q. And then how long were you the COO?

Erik Cazares
September 24, 2025

Page 11

1 A. I was there until 2022 as the COO.

2 Q. Okay. And then what did you do in 2022?

3 A. And then I transitioned back to the -- what
4 used to be Sierra Medical Center. Now, it's called
10:45 5 the Hospitals of Providence Sierra Campus as the
6 chief executive officer.

7 Q. And when you were the chief executive
8 officer of Hospitals of Providence Sierra Campus,
9 what would you call -- how would you describe your
10:45 10 overall duties?

11 A. I was responsible for oversight of all
12 hospital operations, financial, quality, safety,
13 contracts, physician relations.

14 Q. Did you report to a board of directors or
10:46 15 governing board?

16 A. There was a -- yes. There was a local
17 hospital governing board.

18 Q. And who owns The Hospitals of Providence
19 Sierra?

10:46 20 A. Tenet.

21 Q. When did Tenet buy The Hospitals of
22 Providence Sierra Campus?

23 A. I don't know.

24 Q. Did Tenet buy The Hospital of Providence
10:46 25 East Campus at some point, as well?

Erik Cazares
September 24, 2025

Page 12

1 A. They built that hospital in 2008.

2 Q. Okay. So when you were at Hospitals of
3 Providence Sierra, were you considered a Tenet
4 employee or a hospital employee?

10:47 5 A. I was under the Tenet payroll.

6 Q. Did you ever -- when you were at Hospitals
7 of Providence Sierra, did you ever interact with
8 people at Tenet headquarters office regarding
9 quality, safety, or any of those -- any of those
10:47 10 principles?

11 A. Yes.

12 Q. And who did you interact with at Tenet
13 headquarters about quality and safety?

14 A. Different individuals depending on what we
10:47 15 were addressing, but they have leads. They have a
16 safety lead. They have a quality lead and so forth.

17 Q. And do you still interact with the safety
18 and quality lead today at your current role?

19 A. Yes.

10:47 20 Q. Who is the safety lead?

21 A. Well, we interact with like the chief
22 medical officer for the company, Ernest Franklin.
23 Dr. Franklin. And the chief nursing officer. That's
24 who I now interact with the most. Judy Chabot.

10:48 25 Q. Did you eventually start working at Palm

Erik Cazares
September 24, 2025

Page 13

1 Beach Gardens Community Hospital?

2 A. I'm sorry. Repeat the question.

3 Q. I said at some point, did you begin your
4 role as a chief executive officer at Palm Beach

10:48 5 Gardens Community Hospital?

6 A. Yes. In July of 2024.

7 Q. So what made you go from -- decide to go
8 from Texas, the Hospitals of Providence Sierra
9 campus, to Palm Beach Gardens?

10:48 10 A. Sure. I was approached with the
11 opportunity for the position at Gardens, and I was
12 open to relocate, so then that brought me here to
13 Florida. Explored the opportunity and it was
14 something that grabbed my attention, and I thought it
10:49 15 would be a good fit.

16 Q. Who approached you?

17 A. This was Maggie.

18 Q. Is that Maggie Gill?

19 A. Maggie Gill.

10:49 20 Q. And do you know what Maggie Gill's role is?

21 A. She is the regional leader for our
22 hospitals.

23 Q. And is she a Tenet employee?

24 A. I believe so.

10:49 25 Q. And what region does she lead?

Erik Cazares
September 24, 2025

Page 14

1 A. Well, she's got multiple regions, but she's
2 over the Florida region, and I believe she has a few
3 more areas.

4 Q. So when you came to the Palm Beach Gardens
10:50 5 Community Hospital, did you have a transition period
6 where the prior CEO worked with you or you just
7 started sort of on your own?

8 A. I was -- on day one, I was by myself.

9 Q. And how many people report to you directly?

10:50 10 A. Oh, I have about six direct reports.

11 Q. And what are their titles? And if you
12 don't remember, that's fine.

13 A. Sure. I've got my executive assistant,
14 chief nursing officer, chief operating officer, chief
10:50 15 financial officer, chief human resource officer, and
16 there's one more. Who else? That's it because the
17 other ones -- so it's five.

18 Q. Is there a chief strategy officer at Palm
19 Beach Gardens?

10:51 20 A. There is.

21 Q. And does that person -- who does that
22 person report to?

23 A. To the market chief strategy lead.

24 Q. And who does the market chief -- is the
10:51 25 market chief strategy lead at Palm Beach Gardens or

Erik Cazares
September 24, 2025

Page 15

1 is that a Tenet person?

2 A. No. He's a sister facility.

3 Q. What facility is that?

4 A. I believe he's Hospital Delray.

10:51 5 Q. And when you talk about a sister property,
6 is this part of the Palm Beach Health Network?

7 A. Correct.

8 Q. And you refer to them at sister properties?

9 A. Yeah.

10:51 10 Q. Do you have any direct or specific role at
11 Palm Beach Network yourself?

12 A. No, just my hospital.

13 Q. And how many beds do you have at Palm Beach
14 Gardens?

10:52 15 A. 199 licensed beds.

16 Q. And what do you mean by licensed beds?

17 A. That those are the amount of beds that
18 we're licensed through the State of Florida.

19 Q. And do you have a trauma center?

10:52 20 A. No.

21 Q. What services are offered at Palm Beach
22 Gardens?

23 A. The main service line is cardiac. We also
24 do orthopedics, neurology, general surgery, emergency
10:52 25 services. I would consider those the main service

Erik Cazares
September 24, 2025

Page 16

1 lines.

2 Q. And where is Palm Beach Gardens Community
3 Hospital physically located?

4 A. In Palm Beach Gardens.

10:52 5 Q. And what's the address there?

6 A. I don't know the exact address. It's on
7 Birds Road.

8 Q. Is it in a part of Palm Beach with a
9 population that is a little -- that is older?

10:53 10 A. Yes.

11 Q. So what is the -- what -- and this is
12 sometimes hard to figure out. What's the median age
13 of your patient population?

14 A. Yeah. When we last looked at it, it was 62
10:53 15 and a half years old.

16 Q. And when did you last look at it?

17 A. Several months ago.

18 Q. And why did you look at the median age of
19 the population? Were you doing a market study or --

10:53 20 A. We do that from time to time, look at the
21 age of the population that we're serving.

22 Q. And is there a certain time of year that
23 Palm Beach Gardens Community Hospital is busier than
24 others, such as snowbird season?

10:53 25 A. Yes.

Erik Cazares
September 24, 2025

Page 17

1 Q. And what is the Palm Beach snowbird season,
2 what months?

3 A. Well, I'm just beginning to learn it
4 because I've only been here one year. So last year
10:54 5 we were, I'd say, it was December through April.

6 Q. And do you see a large drop-off in
7 admissions and visits to the hospital after April?

8 A. There's a drop.

9 Q. Historically, and based on the information
10:54 10 that you've reviewed to date, has there always been a
11 drop after April?

12 A. Yes.

13 Q. Now, as CEO of Palm Beach Gardens, how much
14 oversight is there by Tenet Healthcare of your
10:54 15 everyday daily role? How much do they oversee you?

16 MR. CHUNG: Objection to form.

17 A. I mean, it's hard to quantify the amount of
18 oversight, but we get direction on different
19 initiatives, projects.

10:55 20 BY MS. ZIBAS:

21 Q. When you get direction from Tenet, does it
22 come through Maggie?

23 A. Not always. Sometimes through Maggie,
24 sometimes directly from corporate leaders.

10:55 25 Q. And in comparison to when you were the CEO

Erik Cazares
September 24, 2025

Page 18

1 at Hospitals of Providence Sierra Campus, is it about
2 the same direction from corporate Tenet there as what
3 you see now at Palm Beach Gardens?

4 MR. CHUNG: Objection to form.

10:55 5 A. Yes. Yes, it's fairly similar.

6 BY MS. ZIBAS:

7 Q. The Leapfrog Group is the defendant in this
8 case filed by Palm Beach Gardens. Can you just give
9 me both in your personal capacity, what do you know
10:56 10 about The Leapfrog Group, in terms of what they do,
11 who they are, et cetera?

12 MR. CHUNG: Objection to form.

13 A. Well, the Leapfrog Group assigns hospitals
14 a patient safety letter grading using a methodology
10:56 15 that they've used for some time. But that
16 methodology recently changed. So my most recent
17 experience is that that methodology is now negatively
18 affecting hospitals that do not participate in
19 leapfrog, that they don't submit data.

10:56 20 A perfect example is Palm Beach Gardens Medical
21 Center. Palm Beach Gardens Medical Center hadn't
22 submitted data or participated in Leapfrog since 2022
23 and recently received a letter F grade for patient
24 safety. And that was based on incomplete data since
10:57 25 we didn't participate, deceptive, what we consider

Erik Cazares
September 24, 2025

Page 19

1 deceptive grading methodology, and it has had a
2 significant impact on the reputation of the hospital,
3 the way that the hospital is viewed by physicians,
4 patients, community stakeholders, employees.

10:57 5 BY MS. ZIBAS:

6 Q. When you say we, when you refer to we, the
7 deceptive grading methodology, who is the we you're
8 referring to when you just testified?

9 A. Repeat that. What did I say?

10:57 10 Q. You referred to we. So when you say we,
11 are you referring to Palm Beach Gardens as a we or
12 Tenet and Palm Beach Gardens?

13 A. Correct. Palm Beach Gardens.

14 Q. Now, how did you find out about the
10:58 15 background of not submitting data from Palm Beach
16 Gardens since 2022? Who provided you that background
17 information?

18 A. That was my quality director.

19 Q. And who is your quality director?

10:58 20 A. Kathleen McDonald.

21 Q. And how long has Kathleen McDonald worked
22 at Palm Beach Gardens?

23 A. I don't know off the top of my head.

24 Q. Has she been there more than five years?

10:58 25 A. I don't know for a fact.

Erik Cazares
September 24, 2025

Page 20

1 Q. And when you were at Hospitals of
2 Providence Sierra, did Hospitals of Providence Sierra
3 participate in taking Leapfrog survey?

4 A. Not while I was the CEO.

10:58 5 Q. And what was their grade when they did not
6 participate?

7 A. I believe it was a C.

8 Q. And did it continue to be a C through 2023
9 and 2024?

10:58 10 A. I believe so.

11 Q. And do you know if in 2025 that it was a C?

12 A. I don't know. I don't know.

13 MS. ZIBAS: I'm handing you a document that
14 is labeled Cazares 2.

10:59 15 (Exhibit 2 was marked.)

16 BY MS. ZIBAS:

17 Q. And it says Leapfrog hospital safety grade.

18 And if you look at the URL, it was taken off the

19 hospitalsafetygrade.org site. For the Hospital of

10:59 20 Providence Sierra Campus and in spring 2025, do you
21 see the hospital grade says C?

22 A. Yes.

23 Q. And as far as you know, was -- are they
24 participating in taking a survey?

10:59 25 A. I don't know. I cannot speak to what

Erik Cazares
September 24, 2025

Page 21

1 Sierra is doing now.

2 MS. ZIBAS: I'll give you Cazares 3.

3 (Exhibit 3 was marked.)

4 BY MS. ZIBAS:

11:00 5 Q. And this is another page from that same
6 Leapfrog hospital safety grade, but as you can see at
7 the bottom, it has infections, problems with surgery,
8 different tabs that you would click on.

9 A. Uh-huh.

11:00 10 Q. And if you go to the second page, under
11 notes and definitions, it said declined to report.
12 The hospital was asked to provide this information to
13 the public but did not. Does this help you determine
14 if they are participating in the survey?

11:00 15 MR. CHUNG: Objection to form.

16 A. Yeah. I cannot tell if they're
17 participating, and I can't speak to what -- what data
18 they're submitting or not submitting.

19 BY MS. ZIBAS:

11:00 20 Q. And why -- so if Palm Beach Gardens is not
21 submitting data and the Hospital of Providence Sierra
22 Campus is not submitting data, why do you think one
23 receives an F and one receives a C?

24 MR. CHUNG: Objection to form,
11:01 25 mischaracterizes prior testimony.

Erik Cazares
September 24, 2025

Page 22

1 A. As I mentioned earlier, I cannot speak to
2 whether Sierra is participating or not participating
3 at this moment.

4 BY MS. ZIBAS:

11:01 5 Q. Do you know if any Tenet Healthcare
6 hospitals participate in the Leapfrog survey?

7 MR. CHUNG: Objection to form.

8 A. I'm not aware of that information.

9 BY MS. ZIBAS:

11:01 10 Q. Who would know that?

11 MR. CHUNG: Objection to form.

12 MS. ZIBAS: At Tenet, based on your
13 experience of working under Tenet.

14 A. I don't know.

11:01 15 BY MS. ZIBAS:

16 Q. Would the chief medical officer know?

17 MR. CHUNG: Objection to form.

18 A. I don't know if he would know, has
19 participated or not.

11:01 20 BY MS. ZIBAS:

21 Q. Does Palm Beach Gardens have a safety plan?

22 A. Yes.

23 Q. And do they have a safety plan in 2023?

24 A. My understanding is they did.

11:02 25 Q. What about 2024?

Erik Cazares
September 24, 2025

Page 23

1 A. Yes.

2 Q. What about 2025?

3 A. Yes.

4 Q. What did you do to prepare for your
11:02 5 deposition today, outside of speaking with your
6 lawyers? I'm not interested in the sum and substance
7 of the conversation. Just in general, what did you
8 do to prepare?

9 A. Reviewed my declaration, reviewed the
11:02 10 complaint.

11 Q. During the course of this litigation, have
12 you gathered documents to respond to discovery
13 requests?

14 A. Yes.

11:02 15 Q. And did you -- anybody else, as far as you
16 know, at Palm Beach Gardens gather documents?

17 A. Yes.

18 Q. And were all documents you gathered
19 provided to your counsel?

11:03 20 A. Yes.

21 Q. Do you know when Palm Beach Gardens
22 Hospital -- Community Hospital was formed?

23 A. 1968.

24 Q. And do you -- are they owned by Tenet now?

11:03 25 A. Yes.

Erik Cazares
September 24, 2025

Page 24

1 Q. And do you know when Tenet purchased them?

2 A. I don't.

3 Q. Did you read any expert reports in
4 preparation for your deposition today?

11:03 5 A. No.

6 Q. Do you have anybody at Palm Beach Gardens
7 who manages marketing?

8 A. We have a marketing manager.

9 Q. Just one person?

11:03 10 A. Yes.

11 Q. And who is that?

12 A. Her name is Amanda Blanchard.

13 Q. And does Amanda Blanchard have a staff?

14 A. No.

11:04 15 Q. And is there anybody that does social media
16 management?

17 A. She handles some of it.

18 Q. Does she have an outside vendor or does she
19 handle it all herself?

11:04 20 A. I'm not quite sure how she handles it.

21 Q. Do you have a marketing budget at Palm
22 Beach Gardens?

23 A. We do.

24 Q. And is it based on revenue share, or is it
11:04 25 just a certain sum of money that's allocated?

Erik Cazares
September 24, 2025

Page 25

1 A. It's an allocation.

2 Q. And who determines the annual budget for
3 the hospital?

4 A. It's the hospital leadership, myself, with
11:04 5 my chief financial officer, with approval from our
6 corporate office.

7 Q. Does your corporate -- and when you say
8 corporate office, I assume you mean Tenet; correct?

9 A. Correct.

11:05 10 Q. Have you found that Tenet reduces the
11 budget after you submit it, or is it pretty much a
12 rubber stamp?

13 MR. CHUNG: Objection to form.

14 A. It's neither.

11:05 15 BY MS. ZIBAS:

16 Q. Describe to me what you mean by neither.

17 A. They don't rubber stamp it, and they don't
18 necessarily reduce it.

19 Q. Do they move funds from one allocation to
11:05 20 another?

21 MR. CHUNG: Objection to form.

22 A. No.

23 BY MS. ZIBAS:

24 Q. So how do they -- how do they change the
11:05 25 budget, if they don't accept the budget that you

Erik Cazares
September 24, 2025

Page 26

1 submit?

2 MR. CHUNG: Objection to form,
3 mischaracterizes testimony.

4 A. When we submit the budget, it's a
11:05 5 conversation regarding whether the dollars are needed
6 and what they're needed for, and then we come to an
7 agreement.

8 BY MS. ZIBAS:

9 Q. Has the budget for 2026 been completed?

11:06 10 A. For 2026?

11 Q. Yes.

12 A. No.

13 Q. What are the role -- what's the role or the
14 tasks that are accomplished by Amanda Blanchard as
11:06 15 the marketing manager?

16 A. What are the -- can you repeat the
17 question?

18 Q. Yes. What are the tasks or the job duties
19 of Amanda Blanchard?

11:06 20 A. Basically everything that involves
21 marketing, whether it's social media, coordinating
22 community events, coordinating statements out to the
23 media or the organization. She works with
24 communications to do that, as well.

11:07 25 Q. And is that the Palm Beach Gardens

Erik Cazares
September 24, 2025

Page 27

1 communications?

2 A. Correct.

3 Q. And is that a separate department?

4 A. I don't know if they're completely separate
11:07 5 or if they're linked.

6 Q. And are they -- would the communications
7 potentially be linked to a marketing manager, as far
8 as -- is that who reports to?

9 MR. CHUNG: Objection to form.

11:07 10 A. No.

11 BY MS. ZIBAS:

12 Q. Who does the communications person report
13 to?

14 A. There is a -- there's a communications
11:07 15 director and marketing.

16 Q. And do you meet with the communications
17 director?

18 A. No.

19 Q. Have you ever discussed The Leapfrog Group
11:07 20 with the communications director?

21 A. No.

22 Q. Have you ever given any -- you personally
23 given any statements to the press about The Leapfrog
24 Group?

11:08 25 A. No.

Erik Cazares
September 24, 2025

Page 28

1 Q. Did you ever review any statements prepared
2 by the Palm Beach Health Network about The Leapfrog
3 Group?

4 A. No. I got copied on communications after
11:08 5 it went out.

6 Q. Do you know why the Palm Beach Gardens
7 Community Hospital stopped participating in The
8 Leapfrog Group survey?

9 A. I don't. I don't know why.

11:08 10 Q. Do you know what year that was?

11 A. I believe it was back in 2022 they stopped
12 participating.

13 Q. You referenced earlier that you described
14 the -- that The Leapfrog Group has a methodology, had
11:09 15 a methodology and then it changed. Can you describe
16 to me your understanding of The Leapfrog Group
17 methodology before the change?

18 A. Sure. So the way that I understand it is
19 that before the change, nonparticipating hospitals,
11:09 20 when they didn't submit data in certain metrics, they
21 were awarded a score or given a score based on the
22 average of similar hospitals' performance, and that
23 changed to where the fall of 2024, on four particular
24 metrics, Leapfrog automatically scores them at the
11:09 25 lowest level for those four particular metrics:

Erik Cazares
September 24, 2025

Page 29

1 handwashing, computerized physician order entry, bar
2 code medication scanning, and ICU staffing. And by
3 doing that, the score -- they got the lowest score
4 possible in those metrics, and the letter grade is
11:10 5 then affected. Drops either to a D or F. In the
6 case of Gardens, it dropped to an F. Before that, it
7 had been a C, even when the hospital was not
8 participating.

9 Q. So when it -- when they received a C
11:10 10 because of the scoring that you described by the
11 nonparticipating hospitals, did you think that was,
12 in your personal opinion, was that fair for not
13 participating that they received a high score and
14 then now it's a lower score?

11:10 15 MR. CHUNG: Objection to form.

16 A. I don't -- I'm not ready to comment whether
17 it was fair or not. What I do know is the letter
18 grade F is detrimental to the organization. And when
19 the hospital had a letter score of C, we did not
11:11 20 experience the negative reputation that we're
21 experiencing now that we have in awarding an F, from
22 physicians, from patients, community members,
23 governing board members. As soon as that F came out,
24 we started getting complaints and concerns from all
11:11 25 these individuals, which didn't exist when the

Erik Cazares
September 24, 2025

Page 30

1 hospital was rated a C.

2 BY MS. ZIBAS:

3 Q. How did the information get out, you said,
4 about the F? Was a press release put out by Palm
11:11 5 Beach Health Network? Who put the press release out?

6 MR. CHUNG: Objection to form.

7 A. I don't recall where the initial release
8 came out. But the grades came out and then it was
9 brought to our attention that patients were
11:11 10 significantly concerned about going to Gardens
11 because of the F grade. We even know our competitor
12 was publishing their letter grade of an A and ours of
13 an F, so they also had input into getting some of
14 that in the community, as well.

11:12 15 BY MS. ZIBAS:

16 Q. Who is your competitor that was publishing?

17 A. Jupiter.

18 Q. So did Jupiter Medical Center publish their
19 grade versus your grade into the -- I guess the news
11:12 20 media?

21 A. I don't know if they published it into the
22 news media, but they definitely public -- made it
23 public to their physician group, which is also the
24 same physicians in our organization.

11:12 25 Q. Do you know if Jupiter Medical Center

Erik Cazares
September 24, 2025

Page 31

1 received an A?

2 A. Yes.

3 Q. Have you talked to anyone at Jupiter
4 Medical Center about their A grade?

11:12 5 A. No.

6 Q. Do you know the CEO of Jupiter Medical
7 Center?

8 A. I know who he is, but I don't talk to him.

9 Q. So as you sit here today, you still do not
11:13 10 know who initially published the score, The Leapfrog
11 Group score about Palm Beach Gardens hospital; is
12 that correct?

13 MR. CHUNG: Objection to form.

14 A. That's correct.

11:13 15 BY MS. ZIBAS:

16 Q. Did you ever investigate further as to who
17 initially published the grades?

18 A. No.

19 Q. Did Tenet ever publish the grades?

11:13 20 A. I don't know.

21 Q. Now, you talked about physician -- it was
22 detrimental because physicians talked about it. How
23 many physicians talked to you about it?

24 A. I can't recall the amount of physicians.

11:13 25 It's -- they continue to talk to me about it,

Erik Cazares
September 24, 2025

Page 32

1 especially after a Tik Tok video was created and was
2 out there broadcasting Gardens as the worst hospital
3 in Florida, specifically referencing handwashing.
4 After that Tik Tok video, I started receiving more
11:14 5 and more complaints from physicians, that they were
6 talking to patients in their offices, and especially
7 patients that needed to have procedures done. They
8 didn't want to go to Gardens because of the F letter
9 grade that had been awarded by Leapfrog for patient
11:14 10 safety.

11 One particular patient is a cardiac patient that
12 needed to have a cardiac procedure and did not want
13 to go to Palm Beach Gardens. I received a phone call
14 from the surgeon. This particular patient, when I
11:14 15 talked to him, said that the main reason was because
16 of Leapfrog. So he was looking at other facilities
17 to have his cardiac procedure.

18 Our hospital is well known for our cardiac care
19 and infrastructure experience, so these patients are
11:15 20 making decisions to go to other facilities where the
21 care may not be to the quality or caliber and have
22 the outcomes that we have, specifically for cardiac
23 care in this instance.

24 Q. Do you have a CCU unit at Palm Beach
11:15 25 Gardens?

Erik Cazares
September 24, 2025

Page 33

1 A. We have a CVICU.
2 Q. And how many beds?
3 A. 12 bids.
4 Q. Do you have ICU?
11:15 5 A. We do.
6 Q. And how many beds?
7 A. 16.
8 Q. How many operatories?
9 A. How many what?
11:15 10 Q. Operatories?
11 A. What is that?
12 Q. An operating room?
13 A. Operating rooms?
14 Q. Operating rooms for cardiac.
11:15 15 A. We have two.
16 Q. And how many -- is that total operating
17 rooms or just for cardiac?
18 A. No, that's just for cardiac.
19 Q. And how many total?
11:15 20 A. 12.
21 Q. So you can do maximum -- you can schedule
22 maximum of two a day in the cardiac or just one?
23 A. No, you can do multiple.
24 Q. What's the maximum number you can do in a
11:16 25 day?

Erik Cazares
September 24, 2025

Page 34

1 A. Depends how long the physician is willing
2 to work. Sometimes they can do up to three, four,
3 surgeries a day.

4 Q. So when you say this patient needed cardiac
11:16 5 procedure and the surgeon called you, when was that?

6 A. This was approximately three to four weeks
7 ago.

8 Q. And who was the surgeon?

9 A. Dr. Patel.

11:16 10 Q. Did Dr. Patel tell you there was only one
11 patient concerned about the handwashing?

12 A. No. He's told me about multiple patients,
13 and I asked them that if those patients, whenever he
14 gets those patients, if he could give me their
11:16 15 information so I can talk to them and reassure them
16 of the care that we deliver at Palm Beach Gardens
17 Medical Center. So this is a particular patient that
18 I talked to, and he expressed his concerns about our
19 Leapfrog score and that being the driving decision
11:17 20 for not wanting to have surgery at Gardens.

21 But he's -- Dr. Patel said he's had multiple
22 patients, and I can give you a list of other
23 physicians who have also received similar concerns.

24 Q. Okay. Give me a list of those physicians.

11:17 25 A. Sure. There's Dr. Mostel; he's another

Erik Cazares
September 24, 2025

Page 35

1 cardiologist. I believe there's a few more that I
2 had shared with my legal team, with the legal team.

3 Q. You provided that information to your legal
4 team?

11:17 5 A. Yes.

6 Q. Did you put it in your responses to your
7 interrogatories?

8 A. No. I don't think so.

9 Q. Is there a reason you didn't put it in the
11:17 10 interrogatories?

11 A. It was just too many to list.

12 Q. But based on your understanding of this
13 lawsuit, there's a claim of reputational harm;
14 correct?

11:17 15 A. Correct. That's correct.

16 Q. But yet you didn't want to list --

17 A. Well, no, because --

18 Q. -- harm?

19 A. -- up until this day, I continue to get
11:18 20 calls from physicians. And as a matter of fact,
21 after the video, the viral video, it's only been
22 escalating, and it's three to four times a week I'm
23 getting either calls from physicians or patients
24 voicing their concerns about patients not wanting to
11:18 25 go to Palm Beach Gardens Medical Center, specifically

Erik Cazares
September 24, 2025

Page 36

1 citing the F grade.

2 Q. And who put up the -- who created the Tik
3 Tok video?

4 A. I don't know.

11:18 5 Q. And who posted it?

6 A. I don't know.

7 Q. Did you view it on Tik Tok?

8 A. I viewed it on -- I don't have Tik Tok, but
9 I viewed it online.

11:18 10 Q. On what?

11 A. Online. I mean, click on the link and it
12 pops up.

13 Q. And now you said the governing board also
14 complained to you. Who on the governing board?

11:18 15 A. There's a physician on the governing board
16 whose name is Dr. Suarez. We also have a community
17 member, Michael Mitrone. Those are two that come to
18 mind.

19 Q. And what did Dr. Suarez say to you?

11:19 20 A. He immediately complained about why Gardens
21 received an F on patient safety and Jupiter has an A,
22 when he considers -- he practices at both hospitals,
23 and he considers the quality at Gardens to be
24 superior in many aspects to Jupiter. So he was very
11:19 25 concerned, to which I responded to him that we did

Erik Cazares
September 24, 2025

Page 37

1 not participate in Leapfrog at that time, and that
2 had -- we had been granted a low rating because of
3 those four metrics that I mentioned earlier. We
4 received the lowest possible score for not submitting
11:19 5 the data. So that was my explanation to him.

6 Q. And what about Michael Mitrone? What did
7 he say?

8 A. Same thing. He wanted -- he didn't think
9 it was fair, and he wanted to know what we were going
11:20 10 to do about the bad reputation that the letter, that
11 the F grade had created for the organization.

12 Q. And what did you tell him that Palm Beach
13 Gardens is going to do about the reputation that you
14 believe it's created?

11:20 15 A. I told him we were looking into that and to
16 see what is it we could potentially do about it. I
17 didn't give him any specific details.

18 Q. Did you ever tell the board that one of the
19 solutions was filing this lawsuit?

11:20 20 A. No. What I did tell Mike Mitrone and the
21 rest of the governing board is that part of our goal
22 to minimize or mitigate the negative reputation is
23 for us to go out there and promote the quality of
24 Gardens, which is what I've been doing. I've been
11:20 25 out in the community. I've been talking to people.

Erik Cazares
September 24, 2025

Page 38

1 I've been highlighting our different awards and
2 accolades that highlight our outcomes for the
3 organization.

4 Q. Does Palm Beach Gardens participate in
11:21 5 Healthgrades?

6 A. We do.

7 Q. And how are Healthgrades determined?

8 A. Healthgrades is based on patient outcomes,
9 and where the hospital excels compared to the rest of
11:21 10 the nation, then Healthgrades will award in that
11 specific area a recognition for the hospital.

12 Q. How do they get their data at Healthgrades?

13 A. I believe they pull the data.

14 Q. And does Palm Beach Gardens --

11:21 15 A. Publicly-reported data.

16 Q. Does Palm Beach Gardens purchase the
17 license for using the logo to promote the accolade?

18 A. I'm not sure exactly what Gardens pays. I
19 know that we do buy like the trophy or plaque from
11:21 20 them there's a -- when there's an area that we excel
21 in.

22 Q. In the advertising, do you use the
23 Healthgrades logo?

24 A. Yes.

11:22 25 Q. So do you pay a license for that?

Erik Cazares
September 24, 2025

Page 39

1 A. I don't know.

2 Q. Is that something -- who handles the
3 advertising for Palm Beach Gardens?

4 A. Amanda.

11:22 5 Q. And what about Joint Commission? Does Palm
6 Beach Gardens go through The Joint Commission
7 process?

8 A. Absolutely. Joint Commission is our main
9 credentialing body. They're one of the approved CMS
11:22 10 vendors to go in into our facility and basically look
11 at everything. So we -- we are Joint Commission
12 accredited. They were in our hospital last year at a
13 group surveyors that went in and did an intense,
14 rigorous survey of our organizations. They spent
11:23 15 three days looking at our processes, talking to
16 patients, talking to family members, employees,
17 physicians, observing procedures in the operating
18 room, looking at our facility infrastructure, looking
19 at handwashing, infection control practices. They
11:23 20 followed a very rigorous process, and we had
21 successful accreditation. No conditional findings
22 for the organization.

23 Q. Does Palm Beach Gardens pay for consulting
24 services with Joint Commission?

11:23 25 MR. CHUNG: Objection to form.

Erik Cazares
September 24, 2025

Page 40

1 A. I don't know if it's considered consulting
2 services because that is a regulatory and mandatory
3 survey that we need to have in order to continue
4 receiving payment from Centers for Medicare and
11:23 5 Medicaid services, but there is a fee associated.

6 BY MS. ZIBAS:

7 Q. But do you pay -- there is an additional
8 option to pay for consulting services to provide
9 guidance --

11:24 10 A. Oh, not that I'm aware of. Not that I'm
11 aware of.

12 Q. Do you know what CMS star ratings are?

13 A. We're a one star.

14 Q. And what does that mean?

11:24 15 A. It's a one star on a scale of five. That's
16 what I understand.

17 Q. And what does -- is one the worst?

18 A. Yes.

19 Q. And are you aware that the CMS data is
11:24 20 public?

21 A. Yes.

22 Q. And are you aware that the CMS data is used
23 as part of the Leapfrog hospital grade?

24 A. Some of it, yeah, is used.

11:24 25 Q. And what is -- what is Palm Beach Gardens

Erik Cazares
September 24, 2025

Page 41

1 Community Hospital doing, if anything, to try to
2 improve its CMS star rating?

3 A. Yeah. Well, we're not specifically
4 addressing CMS star rating. In general, the very
11:24 5 nature of what we do in hospitals is to take care of
6 patients. We continuously are looking at our
7 practices to improve patient safety and improve
8 quality, improve the patient experience, and that's
9 whether -- we're not doing it with a specific effort
11:25 10 of improving CMS star ratings or any particular
11 agency's rating or -- that's just what we do. As a
12 clinician, as a nurse, that's my priority, as well,
13 regardless of the ratings.

14 Q. So when people -- when you -- you mentioned
11:25 15 briefly about the detrimental reputation because The
16 Leapfrog grade. How would the fact that there's a
17 CMS one-star rating not impact Palm Beach Gardens
18 Community Hospital?

19 MR. CHUNG: Objection to form.

11:25 20 A. The CMS star rating is not being publicly
21 promoted in the community. It is not something that
22 has been brought to my attention by any physicians,
23 family members, community members, and even when --
24 even before this, it was never something that
11:26 25 negatively affected the reputation of the hospital

Erik Cazares
September 24, 2025

Page 42

1 the way that the Leapfrog F score has affected the
2 reputation of the facility.

3 BY MS. ZIBAS:

4 Q. Are you aware if Palm Beach Health Network
11:26 5 has been out promoting the low grades as part of this
6 lawsuit?

7 MR. CHUNG: Objection to form.

8 A. I'm not aware of that.

9 BY MS. ZIBAS:

11:26 10 Q. Do you regularly read the media in the
11 local Palm Beach papers related to the hospital and
12 the Palm Beach Health Network?

13 MR. CHUNG: Objection to form.

14 A. I've not -- I don't regularly read
11:26 15 newspapers. I'm aware there's been articles.

16 BY MS. ZIBAS:

17 Q. Have you read any of the articles?

18 A. No.

19 Q. So do you -- at Palm Beach Gardens
11:27 20 Community Hospital, do you consider hand hygiene to
21 be important for patient care?

22 A. Absolutely.

23 Q. And is there a plan or a metric that is
24 used to track the hand hygiene of the employees?

11:27 25 A. Yes.

Erik Cazares
September 24, 2025

Page 43

1 Q. And what is that metric or system?

2 A. It's a surveillance methodology that the
3 hospital uses where they have trained staff to go out
4 there and observe employees, physicians, interacting
11:27 5 with patients to make sure they're following proper
6 protocol for handwashing, and then they report that
7 back to the infection control committee.

8 Q. And who is on the infection control
9 committee?

11:27 10 A. There are -- it's our infection control
11 nurse. There's an infectious disease doctor. There
12 are nursing leaders, chief nursing officer.

13 Q. Is there also a medical executive
14 committee?

11:28 15 A. Yes.

16 Q. And does the medical exec -- is the medical
17 executive committee informed about the outcomes of
18 the hand hygiene surveillance method?

19 A. Yes.

11:28 20 Q. What about safety, safety plan, is that
21 important to patient care?

22 A. Absolutely.

23 Q. And what metric, if any, is used at Palm
24 Beach Gardens hospital to monitor the safety plan and
11:28 25 adherence to the safety plan?

Erik Cazares
September 24, 2025

Page 44

1 A. Well, there are many. Hospital patient
2 safety involves many components. For example,
3 there's prevention of wounds, prevention of
4 infections with central lines, catheters, follies,
11:29 5 what we call follies, other infections, such as have
6 Clostridium difficile, MRSA, that's one thing.
7 There's fall prevention protocols, as well. That
8 goes into a patient safety, quality. Medication
9 errors.

11:29 10 Q. And when -- what is done with the patient
11 safety data that's gathered regarding all of these
12 points? Is it given to a committee or reviewed by
13 you?

14 MR. CHUNG: Objection to form.

11:29 15 A. Sure. The findings are discussed in the --
16 in the quality and safety committee. Where there's
17 opportunities for improvement, the hospital follows a
18 climb to steady act cycle for improvement where we
19 target those specific areas that need improvement and
11:30 20 we reevaluate and assess. That information is --
21 does go up to the medical executive committee and the
22 governing.

23 BY MS. ZIBAS:

24 Q. And does any of it go further up to Tenet
11:30 25 corporate?

Erik Cazares
September 24, 2025

Page 45

1 A. Tenet has the ability to assemble that
2 data, as well.

3 Q. And what about ICU staffing? Obviously, if
4 it's staffing, you probably monitor it. Is this
11:30 5 something that also is a metric that is shared with
6 the quality safety committee or is it shared with
7 medical executive committee or both?

8 MR. CHUNG: Objection to form.

9 A. Are you referring to ICU staffing from the
11:30 10 physician side --

11 MS. ZIBAS: Physician side.

12 A. -- or the nursing side.

13 Okay. So from the physician side, we contract
14 with a group that staffs our ICU with intensivists,
11:31 15 physicians, and midlevel providers, and they staff
16 the ICU around the clock, 24/7, with providers. And
17 that plan is shared with the medical executive
18 committee and the governing board.

19 BY MS. ZIBAS:

11:31 20 Q. Do you also contract services for the
21 emergency room for staffing physicians?

22 A. Yes.

23 Q. And what about your generalist, your
24 internists, do you also staff those with contract
11:31 25 physicians?

Erik Cazares
September 24, 2025

Page 46

1 A. No. We have independent hospitalists.

2 Q. What about the computerized physician order
3 entry system, do you regularly track that with a
4 metric and report?

11:32 5 A. We do.

6 Q. And where is that data reported?

7 A. Similar committees, through the quality and
8 safety committees.

9 Q. Are you on the quality and safety
11:32 10 committee?

11 A. I attend. I don't attend all of them, but
12 I do attend from time to time.

13 Q. How many people are on that committee?

14 A. I can't tell you off the top of my head,
11:32 15 but it's -- it's well attended by different
16 specialties in the organization, including
17 physicians.

18 Q. And what about bar code medication
19 administration, is that tracked, as well?

11:32 20 A. Yes.

21 Q. And does that go to the same committees,
22 the quality safety committee?

23 A. I believe it does.

24 Q. Do you have a pharmacy on site?

11:32 25 A. Yes.

Erik Cazares
September 24, 2025

Page 47

1 Q. And are the pharmacists staffed through
2 contract or are they hospital employees?

3 A. They're hospital employees.

4 Q. So do you agree that the measures that we
11:33 5 just walked through, the safety, the CPOE, the
6 medication administration, the ICU staffing, and hand
7 hygiene are all important factors for patient care?

8 A. Repeat that again.

9 Q. I said just going through the factors that
11:33 10 we just went through, the ICU staffing, the hand
11 hygiene, the safety plan, the CPOE, and the BCMA, are
12 these all factors that you think are important for
13 patient care at Palm Beach Gardens?

14 MR. CHUNG: Objection.

11:33 15 A. They are part of a -- they are part of
16 factors that do affect quality and safety, I would
17 agree with that, but they're not the only ones.

18 BY MS. ZIBAS:

19 Q. When we were discussing the Leapfrog
11:33 20 methodology before, do you know how many total
21 measures are evaluated to come to the grade?

22 MR. CHUNG: Objection to form.

23 A. I believe it's 22.

24 MS. ZIBAS: Excuse me. Off the record. My
11:34 25 mom is in the hospital with a clot, so just

Erik Cazares
September 24, 2025

Page 48

1 trying to make sure.

2 THE VIDEOGRAPHER: We're off the record at
3 11:33 a.m.

4 (Brief recess was taken at 11:33 a.m.)

11:47 5 (Back on the record at 11:46 a.m.)

6 THE VIDEOGRAPHER: Back on the record at
7 11:46 a.m.

8 BY MS. ZIBAS:

9 Q. All right. Mr. Cazares, in our last
11:47 10 question, you explained or you testified that there
11 are 22 measures that you're aware of that Leapfrog
12 evaluates as part of their safety grade. Is that
13 Leapfrog evaluates or CMS? As far as you know, is it
14 22 for CMS or Leapfrog?

11:47 15 A. Leapfrog as far as I'm aware.

16 Q. Now, do you believe that through patient --
17 do you -- let me cross that off.

18 Do you, at Palm Beach Gardens, conduct patient
19 experience surveys?

11:47 20 A. Yes.

21 Q. And who oversees the patient experience
22 surveys?

23 A. The chief nursing officer.

24 Q. And does someone assemble the data?

11:48 25 A. Yes.

Erik Cazares
September 24, 2025

Page 49

1 Q. And is that shared with you or with anybody
2 else?

3 A. Yes.

4 Q. And did you produce that data as part of
11:48 5 the discovery in this case?

6 A. Not me personally.

7 Q. Do you know if somebody else did?

8 A. I don't know.

9 Q. And is the patient experience data
11:48 10 assembled monthly, quarterly, annually?

11 A. I believe it's reported quarterly, but we
12 have the ability to pull it at any time.

13 Q. And what do you do with that data once you
14 review it? Do you create a plan to address people,
11:48 15 their negative experiences? What do you do?

16 A. Sure. The information that we gather from
17 the surveys, we use it to align our operations to
18 better meet the needs of our patients.

19 Q. Do you believe that -- do you agree that
11:49 20 patients should have transparency regarding the
21 patient care at Palm Beach Gardens?

22 MR. CHUNG: Objection to form.

23 A. Could you repeat the question?

24 BY MS. ZIBAS:

11:49 25 Q. Yes. Do you believe that patients are

Erik Cazares
September 24, 2025

Page 50

1 entitled to transparency into their patient care at
2 Palm Beach Gardens?

3 MR. CHUNG: Objection to form.

4 A. I believe in transparency, yes.

11:49 5 BY MS. ZIBAS:

6 Q. And are there any systems in place at Palm
7 Beach Gardens to give a patient transparency into
8 their medical care?

9 MR. CHUNG: Objection to form.

11:49 10 A. Yes. I don't understand the question.

11 BY MS. ZIBAS:

12 Q. Well, for instance, do you have medical
13 records and information about the hospital ratings
14 available for patients to review when they become
11:50 15 inpatients or outpatients?

16 MR. CHUNG: Objection to form.

17 A. We don't have ratings. We don't share
18 ratings with our patients.

19 BY MS. ZIBAS:

11:50 20 Q. What about their medical records, are they
21 entitled to review their medical records?

22 A. They are.

23 Q. While a patient?

24 A. Well, while a patient, there's a process
11:50 25 that has to be followed for them to be able to access

Erik Cazares
September 24, 2025

Page 51

1 the records.

2 Q. Did you ever calculate the BCMA error rate
3 in 2024 at Palm Beach Gardens? You or somebody else
4 on your behalf ever calculate the error rate?

11:50 5 A. I didn't. I don't know if someone else
6 did.

7 Q. And do you know what the error rate was?

8 A. No. What do you mean by error rate?

9 Q. Well, any -- if they found that people did
11:51 10 not follow the policies or procedures for bar code
11 medication administration?

12 A. You're talking about the compliance?

13 Q. Correct.

14 A. Compliance rate or error rate?

11:51 15 Q. Both. Separately error rate and compliance
16 rate.

17 A. Yeah. For what year?

18 Q. 2024.

19 A. Oh, I'm not familiar for 2024. I don't
11:51 20 remember what that was.

21 Q. What about for 2025?

22 A. For 2025, I know the last time I looked at
23 the compliance rate was 95, close to 95 percent.

24 Q. And do you also track the compliance rate
11:51 25 of the computerized physician ordering entry?

Erik Cazares
September 24, 2025

Page 52

1 A. That is tracked, as well.

2 Q. And do you know what the compliance rate
3 was in 2025 for that?

4 A. The last time I looked at that compliance
11:52 5 rate was approximately 80 percent.

6 Q. Do you know if as part of the CMS star
7 ratings, that if CMS looks at hand hygiene or the
8 CPOE?

9 A. I can't think -- I can't recall exactly all
11:52 10 the things that CMS looks at.

11 Q. Do you recall anything that CMS looks at?

12 A. Yes. They look at patient safety
13 indicators, infection rates.

14 Q. And --

11:52 15 A. Patient experience.

16 Q. And what did you find in the CMS star
17 ratings in terms of the outcomes of infection rates
18 at Palm Beach Gardens?

19 MR. CHUNG: Objection to form.

11:52 20 A. That's -- repeat the question, again.

21 BY MS. ZIBAS:

22 Q. What did you find in CMS star ratings in
23 terms of the outcomes and infection rates at Palm
24 Beach Gardens?

11:53 25 MR. CHUNG: Objection to form.

Erik Cazares
September 24, 2025

Page 53

1 A. Last time that I looked at the CMS ratings,
2 on most metrics, our hospital, when it comes to
3 infection and outcomes on most metrics, we are in par
4 with the national average.

11:53 5 BY MS. ZIBAS:

6 Q. And what does that mean, being on par with
7 the national average?

8 A. That means that we are in the same range as
9 similar hospitals across the nation.

11:53 10 Q. Have you ever asked Maggie Gill or anyone
11 at Tenet if Palm Beach Gardens could participate in
12 the Leapfrog survey?

13 A. I have not.

14 Q. Have you ever reviewed the Leapfrog survey?

11:53 15 A. In its entirety?

16 Q. Yes.

17 A. No.

18 Q. Have you -- since you've been a CEO or COO
19 of any hospital, have any of the hospitals where
11:54 20 you've worked participated in the Leapfrog survey?

21 A. Repeat, since when?

22 Q. Since you were a COO or CEO?

23 A. When I was a COO, I believe our hospital
24 did participate.

11:54 25 Q. And when you were C -- and was that a

Erik Cazares
September 24, 2025

Page 54

1 decision made by whom to participate when you were
2 COO?

3 A. I don't remember.

4 Q. Are you permitted as the CEO of Palm Beach
11:54 5 Gardens for your hospital to participate?

6 A. Right now, we've -- we have a directive,
7 and directed not to participate in Leapfrog.

8 Q. And what about in 2024, was there a
9 directive when you first started not to participate
11:54 10 in Leapfrog?

11 A. Wasn't questioned in 2024. I didn't
12 question it. It wasn't an issue.

13 Q. And who was the directive from that you not
14 participate in the Leapfrog survey?

11:55 15 A. My immediate boss, Maggie.

16 Q. As part of Amanda's duties as marketing
17 manager or another person at Palm Beach Gardens, does
18 anybody participate or hire anyone to do market share
19 studies against your competitor, Jupiter Medical
11:55 20 Center?

21 A. No, I'm not aware.

22 Q. Is that something that's been considered?

23 A. Not that I'm aware of.

24 Q. Now, of your patient population, would you
11:55 25 say that over 50 percent of them obtain information

Erik Cazares
September 24, 2025

Page 55

1 about what hospital to go to on the Internet?

2 A. I don't know.

3 MR. CHUNG: Objection to form.

4 BY MS. ZIBAS:

11:55 5 Q. Has there ever been a study done or survey
6 done at Palm Beach Gardens as to what patients rely
7 on for their source of selecting the hospital to go
8 to?

9 A. None that I'm aware of.

11:56 10 Q. Is it something that's been discussed to
11 survey?

12 A. Not that I'm aware of.

13 Q. Do you think it would be helpful to know
14 what the sources of information are for your patient
11:56 15 population?

16 MR. CHUNG: Objection to form.

17 MS. ZIBAS: To select a hospital.

18 MR. CHUNG: Objection to form.

19 A. I don't know if it would be helpful or not.

11:56 20 BY MS. ZIBAS:

21 Q. Is your compensation tied to the revenue
22 outcomes at Palm Beach Gardens?

23 A. To the revenue?

24 Q. Yes. Is there any compensation tied to the
11:56 25 revenues of the hospital?

Erik Cazares
September 24, 2025

Page 56

1 A. Amongst other things, yes.

2 Q. And has the revenue increased or decreased
3 since 2024?

4 A. It's increased slightly.

11:56 5 Q. And going back to the reputational harm you
6 described, why don't you explain to me outside of the
7 complaints from some of the physicians and patients,
8 can you tell me how many patients you or somebody
9 else at the hospital have talked to about the
11:57 10 Leapfrog grades that were complained about?

11 MR. CHUNG: Objection to form.

12 A. I can't quantify the amount of patients.
13 Like I mentioned earlier, the amount of complaints
14 has been increasing, especially after the Tik Tok
11:57 15 video. That seemed to have really gotten out there
16 in the community, and more and more patients have
17 been complaining to the physicians, who then complain
18 to me, and I've also received direct complaints from
19 patients. They've left Google reviews referencing
11:57 20 the Tik Tok video. There's been different complaints
21 voiced, and we're seeing more and more of them as
22 time goes by.

23 BY MS. ZIBAS:

24 Q. And when you say more and more, how many do
11:58 25 you receive in a week?

Erik Cazares
September 24, 2025

Page 57

1 A. Between patients and physicians, between
2 four and five.

3 Q. And do you track those in a log or do you
4 have a journal or somewhere in the computer?

11:58 5 A. I do not.

6 Q. Does anybody track these complaints?

7 A. Some complaints are tracked. We have a
8 general grievance log, but it's not specifically for
9 Leapfrog letter grades or complaints.

11:58 10 Q. So what is the general grievance log?

11 A. That's -- it's a log that is maintained by
12 our patient safety officer and it's -- that's one of
13 the regulatory mandates by CMS. And this is mostly
14 for patients that have received services in our
11:58 15 facility.

16 Q. Why is there no log of the complaints
17 related to Leapfrog being maintained?

18 MR. CHUNG: Objection to form.

19 A. Yeah. I'm -- the hospital has -- that
11:59 20 would require additional resources, more time, you
21 know, dedicated to keeping track of all these
22 patients and complaints, and that is not something
23 that we can afford to do right now. Our staff is
24 committed to improving patient safety in the
11:59 25 hospital, and that's where we're redirecting our

Erik Cazares
September 24, 2025

Page 58

1 resources.

2 BY MS. ZIBAS:

3 Q. Has the complaints about this Tik Tok
4 video, did they come from patients or from
11:59 5 physicians?

6 A. Patients, physicians, staff, governing
7 board members.

8 Q. And have you had any physicians resign
9 because of the Leapfrog grades?

11:59 10 A. No.

11 Q. How is the nursing recruiting and
12 retention? Is it difficult?

13 MR. CHUNG: Objection to form.

14 A. What do you mean by difficult?

12:00 15 BY MS. ZIBAS:

16 Q. I mean, in general, is it difficult for
17 Palm Beach Gardens to attract nurses, and I'd say if
18 you compared 2025 to 2024?

19 MR. CHUNG: Objection to form.

12:00 20 A. I would not say that it's any different
21 than most hospitals.

22 BY MS. ZIBAS:

23 Q. Would you say that most hospitals have
24 difficulty attracting nurses or there's as nursing
12:00 25 shortage essentially?

Erik Cazares
September 24, 2025

Page 59

1 A. I think, in general, there's a nursing
2 shortage.

3 Q. Have there been any contracts signed with
4 any outside vendors to provide services related to
12:00 5 patient safety, to provide any services or consulting
6 related to patient safety?

7 A. Not that I'm aware of.

8 Q. Do you have any contract signed with
9 outside vendors that would provide advice or
12:01 10 consulting for quality improvement?

11 A. None that I'm aware of.

12 Q. Have -- since you've taken on your role as
13 CEO, have you made any changes, you yourself, to the
14 quality improvement plan?

12:01 15 A. The actual written plan, no.

16 Q. Okay. Have you provided guidance or
17 suggestions to make changes to the quality
18 improvement plan?

19 A. I have. I've directed my teams to enforce
12:01 20 the patient safety plan and to make sure that we
21 increase compliance with the patient safety plan
22 across the organization.

23 Q. What was the compliance prior to you
24 providing the guidance to increase the compliance?

12:02 25 A. Well, that's a broad question because like

Erik Cazares
September 24, 2025

Page 60

1 I mentioned earlier, the patient safety plan involves
2 many different things, but particularly, in patient
3 experience, which is an area that the hospital has
4 struggled for some time, we have directed our teams
12:02 5 to increase compliance with our patient experience
6 initiatives.

7 Q. Is patient experience one of the measures
8 that CMS looks at in their star rating?

9 A. Yes.

12:02 10 Q. Are there any other rating systems that you
11 haven't talked about yet today that Palm Beach
12 Gardens participates in? We talked about
13 Healthgrades, basically. Are there any others that
14 the hospital participates in?

12:03 15 A. That rate the hospital?

16 Q. Yes. Or grade the hospital. One of the
17 two.

18 A. Grade the hospital. Well, we said Joint
19 Commission, Healthgrades. There may be a couple
12:03 20 others that are listed on awards. American Heart
21 Association, we have a designation for stroke. And
22 then we have one for cardiac rehab, American
23 Association of Cardio and Pulmonary Rehab. We also
24 have a certification, and that's based on actual
12:03 25 audits of the facility in person.

Erik Cazares
September 24, 2025

Page 61

1 Q. And does Palm Beach Gardens pay for using
2 the -- pay a license fee or pay any fee to be able to
3 use the logos from like American Heart?

4 A. I'm not sure if we're paying. I really
12:03 5 don't know if we're actually paying to use their
6 logo.

7 Q. Do you know if Palm Beach Gardens and the
8 Palm Beach Health Network have been monitoring the
9 Leapfrog grades every grading period?

12:04 10 MR. CHUNG: Objection to form.

11 A. My understanding is that our quality
12 director keeps track of the Leapfrog grades.

13 BY MS. ZIBAS:

14 Q. And why does the quality director track the
12:04 15 Leapfrog grades?

16 A. I believe she's the one that has access to
17 the website. So that's how it's been set up.

18 Q. And is that a directive from the Tenet
19 Healthcare home office, or is this just something of
12:04 20 interest of the quality director?

21 A. I don't -- I don't know if it's -- there's
22 guidance from home office that it should be the
23 quality director or not. That's the way it's been,
24 and the quality director is the one that pulls those
12:05 25 scores or tracks them.

Erik Cazares
September 24, 2025

Page 62

1 Q. Has the quality director ever discussed
2 with you that they -- that Palm Beach Gardens would
3 like to participate in the Leapfrog survey?

4 MR. CHUNG: Objection to form.

12:05 5 A. No. She has not.

6 BY MS. ZIBAS:

7 Q. Do you have any -- do you have any evidence
8 or do you have any documents that would prove that
9 Leapfrog takes any money from hospitals to give them
12:05 10 better grades?

11 A. It is my understanding that when a
12 hospitals participates in Leapfrog, they submit data,
13 valuable data from their organization, and that
14 Leapfrog owns the rights to that data, which they can
12:06 15 then use for commercial purposes. Commercial gains
16 is what they actually have on their application when
17 the data is submitted, so we're technically having to
18 sign this form saying that Leapfrog now owns this
19 data and they can do with it as they please for
12:06 20 commercial gains. So we consider that a form of
21 compensation.

22 Once the hospital participates in Leapfrog, they
23 also have to pay Leapfrog to be able to market the
24 letter grade that they receive, so that's another
12:06 25 form of compensation. The opposite of that is if a

Erik Cazares
September 24, 2025

Page 63

1 hospital does not participate, they are then
2 penalized with a lower score in those four metrics
3 that we talked about earlier, which results in a
4 lower letter grade, as was the case in Palm Beach
12:06 5 Gardens Medical Center, and it ultimately resulted
6 with the public perception and reputation being
7 damaged, as I mentioned earlier, with physicians and
8 patients and community members complaining about
9 patients not wanting to go to Gardens because of the
12:07 10 low safety rating.

11 Q. So is it free -- is there a fee for the
12 hospital to complete the Leapfrog survey?

13 A. Not that I'm aware of. What I consider the
14 payment is what I mentioned earlier, which is we're
12:07 15 turning in the data, and we're handing it off, the
16 rights to that data, for Leapfrog to use and
17 monetize. And the CEO actually has to sign a
18 document that allows them to do that before
19 participating on that, as well as once the hospital
12:07 20 participates and they receive a letter grade, then
21 they're expected -- then they're expected to pay if
22 they want to market their letter grade, which is
23 another form of compensation there.

24 Q. But doesn't Healthgrades require you to pay
12:08 25 to market with their letter grade?

Erik Cazares
September 24, 2025

Page 64

1 A. They require -- from what I know, is that
2 you have to buy the trophy from them or the award, if
3 you want the award. You don't have to buy it. But
4 the big difference is that Healthgrades is not
12:08 5 penalizing us for not participating. If we don't
6 participate in Healthgrades or if we don't get an
7 award in Healthgrades, there is no public damage.
8 They don't go out there and automatically fail a
9 hospital in a particular area, as Leapfrog is doing.

12:08 10 Q. So these documents you talk about that you
11 have to sign, have you seen the documents that you
12 have to sign that Leapfrog requires you to sign?

13 A. Yes.

14 Q. When did you see them?

12:09 15 A. It's -- there's a document included in our
16 complaint that shows an example.

17 Q. Okay. And is that the first time you saw
18 the document in the complaint?

19 A. Yes, because I've never -- I've never
12:09 20 signed one before.

21 Q. And where is the information coming from
22 that indicates that you turned in the data and you --
23 and the rights belong to Leapfrog? Where is that
24 information coming from?

12:09 25 A. From that document.

Erik Cazares
September 24, 2025

Page 65

1 Q. Is that also from the complaint?

2 A. From -- yes.

3 Q. Okay. So the first time that you saw this
4 information is in the complaint that's filed in the
12:09 5 lawsuit; correct?

6 A. Yes. I had already heard of it from my
7 colleagues.

8 Q. And who told you about it?

9 A. Other colleagues.

12:09 10 Q. Who, which colleagues?

11 A. Other CEOs.

12 Q. And which CEOs talked about it?

13 A. This is years, years ago.

14 Q. How many years ago?

12:09 15 A. Four, five, six years ago. Throughout my
16 long tenure, I've known about that.

17 Q. And were they all Tenet hospital CEOs,
18 Tenet-owned hospital CEOs?

19 A. Not necessarily.

12:10 20 Q. How many CEOs talked about Leapfrog that
21 you recall that were not Tenet owned?

22 A. I don't -- I don't remember.

23 Q. Do you have any meetings with CEOs of
24 hospitals, say, quarterly or even annually that are
12:10 25 not Tenet-owned hospital CEOs?

Erik Cazares
September 24, 2025

Page 66

1 A. No, I don't have any formal meetings.

2 Q. Do you ever participate in any conferences
3 or any educational sessions with other CEOs of
4 hospitals that aren't Tenet owned?

12:10 5 A. I used to.

6 Q. And when did you stop?

7 A. I don't recall exactly.

8 Q. And why did you stop participating in
9 conferences?

12:10 10 A. Mostly time.

11 Q. So going back to this public perception.
12 Why don't you describe to me, quantify to me, what is
13 this public perception you keep describing in a very
14 negative way? How many people are impacted, et

12:11 15 cetera? Why don't you give me an idea, quantify
16 it --

17 A. I cannot --

18 MR. CHUNG: Objection to form. Asked and
19 answered, argumentative.

12:11 20 A. I cannot give you a specific number. Like
21 I mentioned, I'm currently receiving anywhere from
22 four to five complaints a week, combination of
23 physicians, patients, community stakeholders, and
24 those complaints have been increasing ever since that
12:11 25 Tik Tok video was released.

Erik Cazares
September 24, 2025

Page 67

1 BY MS. ZIBAS:

2 Q. Do you plan on tracking some of the
3 complaints now going forward, or are you still going
4 to continue to just not track --

12:12 5 A. I don't have any plans to track. Like I
6 mentioned, we have many things that we're doing in
7 the organization to run a hospital 24/7, to drive
8 quality. It's just another activity that it's not --
9 it's not a priority for us to be tracking all the
12:12 10 complaints that are coming in.

11 MS. ZIBAS: I'll mark this next Exhibit 4.

12 (Exhibit 4 was marked.)

13 BY MS. ZIBAS:

14 Q. I've put in front of you what we marked as
12:12 15 Exhibit 4, and it's a declaration that appears that
16 you drafted; is that correct?

17 A. Correct.

18 Q. And did you independently draft this?

19 A. This was drafted with the assistance of
12:13 20 lawyers.

21 Q. Did you ever discuss your declaration in
22 Exhibit 4 with Jared Hanlon?

23 A. No.

24 Q. Have you ever seen the declarations of the
12:13 25 other CEOs who are plaintiffs in this lawsuit?

Erik Cazares
September 24, 2025

Page 68

1 A. I have not.

2 Q. Have you discussed this lawsuit with any of
3 the other CEOs of the five plaintiff hospitals?

4 A. No.

12:13 5 Q. Would you know why some of the sentences in
6 the declarations of yours and Jared Hanlon are
7 exactly the same?

8 MR. CHUNG: Objection to form.

9 A. I don't know why.

12:13 10 BY MS. ZIBAS:

11 Q. All right. So in looking at -- starting
12 with page 2.

13 A. Okay.

14 Q. So starting -- actually, go to page 6. And
12:14 15 looking at paragraphs 13 and 14, where did you obtain
16 this background information if you were not CEO at
17 the time for -- to draft these two paragraphs?

18 A. Once again, we don't participate in
19 Leapfrog, is that what you're --

12:14 20 Q. No. I asked you where did you get this
21 information in 13 and 14 because you weren't CEO? So
22 I'm trying to understand where you got this
23 information.

24 A. Let me read it. I mean, this information
12:15 25 mimics the same sentiment I had at our previous

Erik Cazares
September 24, 2025

Page 69

1 facilities, as well, on why we don't participate in
2 Leapfrog.

3 Q. Okay. But the previous facility still gets
4 Cs; correct?

12:15 5 MR. CHUNG: Objection to form.

6 A. I don't know. I don't know what the
7 previous facility is doing right now.

8 BY MS. ZIBAS:

9 Q. Based on the exhibits I gave you, and I
12:15 10 guess you can always check the website, that they are
11 getting Cs now.

12 A. This is only two pages. I'm pretty sure
13 there's more to the assessment. So I can't tell by
14 this if they participated or not.

12:16 15 MS. ZIBAS: All right. There's a -- so if
16 you look at the -- and we'll mark this as
17 Exhibit 5, so you can compare.

18 (Exhibit 5 was marked.)

19 BY MS. ZIBAS:

12:16 20 Q. If you look at Exhibit 5 that's been put in
21 front of you, the Leapfrog hospital safety grade for
22 Palm Beach Gardens Medical Center, and it says F on
23 it; correct? And if you go to the second page in
24 red, it says declined to report. The hospital was
12:16 25 asked to provide this information to the public but

Erik Cazares
September 24, 2025

Page 70

1 did not, under notes and definitions. Is that an
2 accurate statement?

3 A. This is showing specifically -- I just
4 don't know what this is referring to specifically.

12:17 5 Q. Have you ever looked at the Leapfrog
6 hospital grade website?

7 A. I've gone in there.

8 Q. And was there anywhere on the website, did
9 you notice on the website that there is that language
12:17 10 that says the hospital did not participate or was
11 asked to provide information but did not? Have you
12 ever seen that on the website?

13 A. There are some metrics where it states
14 that, but then we're still graded on some of them and
12:17 15 on some we're not, which is part of the confusion
16 here, why we're not okay with that methodology.

17 Q. Who is we?

18 A. We, the hospital, myself.

19 Q. Now, looking at -- so paragraphs 13 and 14,
12:17 20 did you draft these, at all, these two paragraphs?
21 Did you draft any of this language yourself?

22 A. This was drafted with the assistance of
23 lawyers.

24 Q. And are you aware it's identical to their
12:18 25 language used by the other CEOs?

Erik Cazares
September 24, 2025

Page 71

1 A. That I did not know. I have not seen their
2 declarations.

3 Q. In paragraph 17 on the next page, it
4 references spring 2022 hospital safety grades and we
12:18 5 were surprised. Since you were not the CEO and you
6 were still working in Texas, where did the
7 information come from to draft paragraph 17?

8 A. This was -- this is on behalf of the
9 organization.

12:18 10 Q. And who provided you the information at the
11 organization to draft that paragraph?

12 A. This was in consultation with our lawyers.

13 Q. And paragraph 18 says in fall of 2024, TLG
14 adjusting it's grading methodology as noted below and
12:19 15 continued to grade the community hospital. How were
16 you notified about the adjustment to the grading
17 methodology?

18 MR. CHUNG: Objection to form.

19 In this line, continuing objection based on
12:19 20 privilege and just asking you based on privilege
21 not to -- if your responses involves
22 communications with counsel, not to -- not to go
23 into those communications.

24 A. Okay. Repeat the question.

12:19 25 BY MS. ZIBAS:

Erik Cazares
September 24, 2025

Page 72

1 Q. How did you learn about -- you have a
2 statement in paragraph 18, in fall of 2024, TLG
3 adjusted it's grading methodology as noted below and
4 continued to grade community hospital. How did you
12:19 5 learn about the adjusted grading methodology that you
6 reference in this sentence?

7 A. I learned about it after we received an F,
8 and I learned of it from our quality director.

9 Q. Now, in paragraph 19, you state in your
12:20 10 declaration, it shows that if you participate in its
11 pay-to-play, time consuming hospital survey, TLG
12 assigns you a better grade. What do you mean by
13 pay-to-play?

14 A. Well, as I mentioned earlier, if the
12:20 15 hospital participates, part of the participation is
16 that they have to submit the data, hand over the data
17 to Leapfrog. Leapfrog then can use that data as they
18 wish, including for commercial gains, and that's part
19 of the earlier comment that I made. And then once
12:20 20 the hospital receives a letter grade, they have to
21 pay Leapfrog to be able to promote that score or
22 publish that score or use their logo. So that's one.

23 The other one is the hospital is pressured to do
24 so, almost coercion, if you -- could be a word to
12:21 25 describe that because if you don't participate, if

Erik Cazares
September 24, 2025

Page 73

1 the hospital does not participate, the hospital gets
2 scored at the lowest possible score on those four
3 metrics that we discussed earlier, which the
4 hospital, Palm Beach Gardens Medical Center, is
12:21 5 performing well; yet, they scored at the very lowest
6 level.

7 So there is pressure for the hospital to
8 participate, pressure for the hospital to submit the
9 data, to hand it over to Leapfrog, and that's
12:21 10 basically where this pay for play comes from.

11 Q. What are the commercial gains that Leapfrog
12 gets that you described? Where are you getting your
13 information about the commercial gains?

14 A. That's not my information.

12:21 15 Q. Where is it?

16 A. That's what Leapfrog puts in their
17 statement. In their statement, Leapfrog says that
18 the data can be used for commercial gains.

19 Q. Okay. And again, that is -- you first read
12:21 20 that based on the complaint filed in this case;
21 correct? That's where you first read that
22 information?

23 A. That's where I first read it, but I've
24 already had -- like I mentioned earlier, I had
12:22 25 already known about it.

Erik Cazares
September 24, 2025

Page 74

1 Q. Why doesn't Palm Beach Gardens merely
2 participate in the survey, rather than spend the time
3 having to address all of the reputational damage?

4 MR. CHUNG: Objection to form.

12:22 5 A. Gardens does not participate because it is
6 a very time consuming activity that the hospital does
7 not feel participating in the survey is improving
8 patient safety or quality, and that time and
9 resources could be better spent addressing real
12:22 10 initiatives in the organization to improve safety and
11 quality.

12 BY MS. ZIBAS:

13 Q. How much time would be spent filling out
14 the Leapfrog survey based on your estimate that it's
12:23 15 time consuming?

16 A. I wouldn't be able to give you a time
17 estimate. But the individuals that put this work
18 together, they have many other things to do in the
19 hospital, and this is not an additional burden that
12:23 20 we would want to provide them with.

21 Q. And since the hospital is already
22 completing the CMS data, isn't most of the data
23 that's submitted to Leapfrog similar?

24 MR. CHUNG: Objection to form.

12:23 25 A. Some of the data is similar, but there's

Erik Cazares
September 24, 2025

Page 75

1 still a lot of work and additional work that is
2 required to submit the Leapfrog survey, and that is
3 not time or resources that the hospital is going to
4 commit when those could be better spent elsewhere in
12:23 5 the organization.

6 BY MS. ZIBAS:

7 Q. And you referenced that the organization
8 would rather spend it on improvements. What
9 improvements is the Palm Beach Gardens working on in
12:23 10 lieu of spending time and resources on the survey?

11 MR. CHUNG: Objection to form.

12 Mischaracterizes prior testimony.

13 A. Going back to my earlier comments about the
14 hospital's overall goals, our goal is to continuously
12:24 15 improve patient safety, quality, patient experience
16 in the organization, and we have many initiatives
17 that are geared towards that. And that's where our
18 resources will continue to be funneled to.

19 BY MS. ZIBAS:

12:24 20 Q. So going to page 13 of your declaration,
21 you have as the top line, TLG safety grades harm the
22 community, hospital, its patients, and its community.
23 You drafted this paragraph or with the guidance of
24 counsel drafted the paragraph, and today you came in
12:25 25 here and you're testifying about a number of

Erik Cazares
September 24, 2025

Page 76

1 physicians and other patients. Why did you not list
2 them in this paragraph?

3 MR. CHUNG: Objection to form.

4 A. I think I answered that earlier. We
12:25 5 continue to get complaints. Like I said, every week,
6 we get more and more complaints in there, as well.
7 And here it's broadly stated that we've been
8 receiving complaints from physicians and patients in
9 the community, and we continue to do so to this day.

12:25 10 BY MS. ZIBAS:

11 Q. How many complaints has medical executive
12 committee told you that they received?

13 A. I can't quantify that.

14 Q. Why can't you quantify it?

12:25 15 A. Because I'm not keeping track of how many
16 complaints are being brought to my attention from
17 every individual. I can tell you, in general, four
18 to five complaints a week is what I can tell you at
19 this point.

12:25 20 Q. Do you consider any of the complaints from
21 patients or the governing board legitimate complaints
22 about the patient care at Palm Beach Gardens?

23 MR. CHUNG: Objection to form.

24 A. I don't understand your question.

12:26 25 BY MS. ZIBAS:

Erik Cazares
September 24, 2025

Page 77

1 Q. So you said that everyone that you're
2 receiving complaints, is that correct, complaints
3 about the Leapfrog grades?

4 A. Complaints about patients not wanting to go
12:26 5 to Gardens because of the letter F grade.

6 Q. And do you think that some of the concerns
7 of the patients are legitimate --

8 MR. CHUNG: Objection to form.

9 MS. ZIBAS: -- regarding the patient care
12:26 10 at Palm Beach Gardens?

11 MR. CHUNG: Objection to form.

12 Mischaracterizes witness' testimony.

13 A. The concerns that the patients have are
14 that the hospital has received an F grade for patient
12:26 15 safety, and therefore, choosing not to come to the
16 hospital. That's the reputational harm that we're
17 referring to.

18 BY MS. ZIBAS:

19 Q. But you haven't been able to quantify, at
12:26 20 this point, that reputational harm?

21 MR. CHUNG: Objection to form.

22 Mischaracterizes the witness's testimony.

23 BY MS. ZIBAS:

24 Q. Because you state in your declaration,
12:27 25 there's reputational harm.

Erik Cazares
September 24, 2025

Page 78

1 A. There's reputational harm.

2 Q. Have you not been able to quantify it?

3 A. There's reputational harm, patient

4 complaints, patients are leaving to our sister

12:27 5 facility -- to our competing facility, which is

6 Jupiter Medical Center. They've communicated that to

7 our physicians. And these are the complaints that I

8 receive on a weekly basis.

9 Q. How -- What's your percentage of decrease

12:27 10 in admissions between 2024 and 2025?

11 A. I don't have it in front of me. There's a

12 document that, I believe, we address that, but I

13 can't think of it right off the top of my head.

14 Q. Is there a decrease in inpatient

12:27 15 admissions?

16 A. There's a slight increase.

17 Q. And is there a decrease in ER visits?

18 A. There is.

19 Q. What's the percentage?

12:27 20 A. Roughly, 5, 6 percent. Somewhere around

21 that range.

22 Q. And is there a decrease in the outpatient

23 services?

24 A. Yes.

12:28 25 Q. What's the percentage decrease?

Erik Cazares
September 24, 2025

Page 79

1 A. I believe it's similar, maybe a little
2 over.

3 Q. And have any -- has the hospital taken on
4 any survey or research as to what is causing the
12:28 5 decrease in the ER visits and the outpatient
6 services?

7 A. No.

8 Q. So in paragraph 25 of your declaration, you
9 indicate in the last sentence that resources that
12:28 10 could have otherwise been spent continuing to improve
11 patient care. So why don't you describe to me what
12 the resources -- what the patient care improvements
13 have been where you're spending the resources?

14 A. I mentioned that earlier. There's
12:29 15 different activities that the hospital targets when
16 it comes to patient experience, decreasing patient
17 falls, making sure we have compliance with different
18 quality metrics across the organization. For
19 example, handwashing, fall prevention, that's where
12:29 20 the resources are going.

21 MS. ZIBAS: I'll give you Exhibit 6.

22 (Exhibit 6 was marked.)

23 BY MS. ZIBAS:

24 Q. This is an e-mail from Maggie Gill dated
12:29 25 December 11, 2024. It's Exhibit 6. And you were one

Erik Cazares
September 24, 2025

Page 80

1 of the recipients of this e-mail. Do you see that in
2 the top of this e-mail?

3 A. I do.

4 Q. And the body of the e-mail and the subject
12:30 5 says FYI, and at the bottom, it says, please send me
6 request reintroduce Leapfrog reporting, include
7 rationale, imputed score, and clippings of negative
8 press/community and MD feedback. I will request an
9 exception for PBHN and PMC to start next reporting
12:30 10 period. Thanks, Maggie.

11 Do you recall that e-mail, receiving that
12 e-mail?

13 A. I do.

14 Q. And was this topic discussed with Maggie or
12:30 15 among the CEOs, at all, about reintroducing Leapfrog
16 reporting?

17 A. I don't recall having a conversation with
18 them. I do recall this e-mail.

19 Q. And was a request made to reintroduce
12:30 20 Leapfrog reporting?

21 A. No, not that I'm aware of.

22 Q. Did you hear anything further about this
23 e-mail?

24 A. No.

12:31 25 Q. Do you know why Maggie made that request?

Erik Cazares
September 24, 2025

Page 81

1 A. I can't speak for Maggie so -- but I'm --
2 no. I can't speak for why Maggie made that request.
3 As far as my hospital is concerned, I had voiced to
4 Maggie that we were starting to get complaints from
12:31 5 physicians about our F grading in Leapfrog.

6 Q. Do you agree with the -- with Maggie's
7 e-mail to re -- to request to reintroduce Leapfrog
8 reporting?

9 MR. CHUNG: Objection to form.

12:31 10 A. I don't agree or disagree. I mean, that's
11 her statement.

12 BY MS. ZIBAS:

13 Q. Do you want -- did -- did Palm Beach
14 Gardens want to start participating in Leapfrog,
12:32 15 again, in the survey?

16 A. You mean, did I want to?

17 Q. Yes.

18 A. No.

19 MS. ZIBAS: Here's Number 7.

12:32 20 (Exhibit 7 was marked.)

21 BY MS. ZIBAS:

22 Q. I'm handing you an e-mail from Naomi
23 Seymour to you dated December 11, 2024. Do you see
24 that?

12:32 25 A. Yes.

Erik Cazares
September 24, 2025

Page 82

1 Q. Do you recall receiving this e-mail?

2 A. Yes.

3 Q. It says, Ricky shared that we will probably
4 start submitting to Leapfrog, again. So their tactic
12:32 5 worked. What does that mean, in your opinion, when
6 you received that e-mail? Did you understand that to
7 mean?

8 A. Which specific part?

9 Q. The whole sentence or two sentences.

12:33 10 A. The one that Naomi sent?

11 Q. Yes. First, who is Naomi?

12 A. She is my chief nursing officer.

13 Q. Okay.

14 A. Basically, she's saying that Ricky, who is
12:33 15 the group chief nursing officer, alluded to that we
16 may start submitting to Leapfrog, again, is what it
17 says there. And then she makes a reference so that
18 their tactic worked. She's referring to Leapfrog's
19 pressure on the hospitals to participate by handing
12:33 20 out F grades is what -- that's the way I interpret
21 the e-mail.

22 Q. Are you aware there are nonparticipating
23 hospitals that earn As and Bs?

24 MR. CHUNG: Objection, form.

12:34 25 A. No. I'm not aware of what other hospitals.

Erik Cazares
September 24, 2025

Page 83

1 BY MS. ZIBAS:

2 Q. Have you ever looked at that factor, that
3 there are hospitals who do not participate that
4 receive high letter grades?

12:34 5 MR. CHUNG: Objection, form.

6 A. I have not looked into that.

7 BY MS. ZIBAS:

8 Q. Would it surprise you to learn that because
9 they had these other nonparticipating Leapfrog
12:34 10 hospitals that had high CMS scores ended up with high
11 letter grades?

12 MR. CHUNG: Objection.

13 A. What was your question?

14 BY MS. ZIBAS:

12:34 15 Q. I said would it surprise you to learn the
16 nonparticipating Leapfrog hospitals had high CMS
17 scores and, thus, they had high letter grades?

18 MR. CHUNG: Objection to form.

19 A. Yeah. I'm not concerned about other
12:34 20 hospitals. I'm concerned about my hospital.

21 BY MS. ZIBAS:

22 Q. If you're not concerned about other
23 hospitals, why does the reputational harm, why is
24 that an issue?

12:34 25 MR. CHUNG: Objection to form.

Erik Cazares
September 24, 2025

Page 84

1 A. Because my hospital is being -- is the one
2 receiving reputational harm as a result of the F
3 grade.

4 BY MS. ZIBAS:

12:34 5 Q. And how has that impacted the hospital?

6 MR. CHUNG: Objection to form, asked and
7 answered.

8 BY MS. ZIBAS:

9 Q. You don't have to repeat what you already
12:35 10 answered. If there's anything you want to add about
11 the reputational harm or goodwill damage that you've
12 put in your declaration.

13 A. As I mentioned earlier, we've lost patients
14 to other hospitals as a direct result of the F grade
12:35 15 that was handed to Palm Beach Gardens Medical Center,
16 and it continues to be a problem as physicians
17 continue to voice concerns about patients not wanting
18 to go to Palm Beach Gardens Medical Center to receive
19 care, and we're getting four to five complaints a
12:35 20 week on this.

21 Q. How many actual patients have you lost to
22 Jupiter Medical Center? Because you've only
23 mentioned two, specifically, during this deposition.

24 MR. CHUNG: Objection to form.

12:35 25 Mischaracterizes prior testimony.

Erik Cazares
September 24, 2025

Page 85

1 BY MS. ZIBAS:

2 Q. How many are there that you can name?

3 A. I've mentioned that we -- that I receive
4 four to five complaints a week.

12:36 5 BY MS. ZIBAS:

6 Q. But of those complaints, how many of those
7 patients actually did come to Palm Beach Gardens?

8 A. That is not a question that I can directly
9 answer for you.

12:36 10 Q. Now, was the fact that there was -- would
11 be a lawsuit filed on behalf of Palm Beach Gardens
12 ever discussed with the governing board?

13 MR. CHUNG: Objection.

14 Based on privilege, I'm instructing the
12:36 15 witness not to answer that question.

16 MS. ZIBAS: These are governing board
17 minutes. There's nothing to do with lawyers.
18 This has to do with the governing board minutes
19 of a board that's public under Sunshine.

12:36 20 MR. CHUNG: You're referencing minutes that
21 we have not seen and have not been put in front
22 of the witness.

23 MS. ZIBAS: Well, I'm asking if he
24 discussed it with the board, which I'm allowed
12:36 25 to do.

Erik Cazares
September 24, 2025

Page 86

1 BY MS. ZIBAS:

2 Q. Did you discuss with the board, unrelated
3 to lawyers, the filing of this lawsuit?

4 MR. CHUNG: I'm objecting based on
12:37 5 privilege, if any of those discussions with the
6 governing board involved consultation with
7 counsel, either inside counsel or outside
8 counsel --

9 MS. ZIBAS: And I'm not asking about that.
12:37 10 Just any discussions --

11 MR. CHUNG: Let me finish the objection.
12 I'm asking you not to get into those
13 discussions, those communications.

14 BY MS. ZIBAS:

12:37 15 Q. So did you have any discussions with the
16 board members outside of the presence of counsel
17 about filing this lawsuit?

18 A. I don't recall.

19 Q. And who is paying the legal fees? Because
12:37 20 there's a request for attorney's fees made in this
21 lawsuit. Who is paying the legal fees on behalf of
22 Palm Beach Gardens?

23 A. I'm not sure.

24 Q. So you're not aware if the hospital is
12:37 25 paying? If the hospital is not paying, who is

Erik Cazares
September 24, 2025

Page 87

1 paying?

2 MR. CHUNG: Objection to form.

3 A. I said I'm not sure. That would be a
4 question for my CFO.

12:38 5 BY MS. ZIBAS:

6 Q. Have you ever discussed with your CFO the
7 legal fees for this lawsuit?

8 A. No.

9 Q. Have -- do you ever review the financials
12:38 10 on a monthly basis of expenditures?

11 A. High level.

12 Q. Do you ever look at the legal spent for the
13 hospital?

14 A. It's a line item.

12:38 15 Q. Have you looked at it in the last three
16 months?

17 A. I'm pretty sure I've looked at it, but I
18 don't recall what it was.

19 Q. You don't recall any numbers in the last
12:38 20 three months?

21 A. No.

22 MS. ZIBAS: This is Number 8.

23 (Exhibit 8 was marked.)

24 BY MS. ZIBAS:

12:39 25 Q. And if you take a look, what I'm giving you

Erik Cazares
September 24, 2025

Page 88

1 is Exhibit 8, are the governing board minutes dated
2 December 17, 2024. Do you see those?

3 A. Uh-huh.

4 Q. And if you review these minutes, is there
12:39 5 any reference to Leapfrog in the minutes?

6 A. There's a reference on here.

7 Q. Is that Bates number 17883 on the bottom
8 right-hand corner.

9 A. Yes.

12:40 10 Q. Okay. In that reference, was that reported
11 by you during the meeting or somebody else? Was it
12 reported by Kathleen McDonald, it looks like, under
13 quality report?

14 A. Well, it's got my name on there.

12:40 15 Q. And do you recall making the statement, it
16 says, Mr. Cazares noted that the hospital will likely
17 begin participation with Leapfrog moving forward in
18 efforts to mitigate the potential for disparaging
19 publications. Do you see that?

12:41 20 A. I do see that.

21 Q. And do you recall why you made that
22 statement in December 17, 2024?

23 A. Well, that must have been around the time
24 that the market was alluding to potentially begin
12:41 25 participating again.

Erik Cazares
September 24, 2025

Page 89

1 Q. And did you agree with your statement in
2 moving forward in efforts to mitigate the potential
3 for disparaging publications?

4 MR. CHUNG: Objection to form.

12:41 5 A. Repeat the question.

6 BY MS. ZIBAS:

7 Q. I mean, did you agree with your statement
8 about participating with Leapfrog moving forward in
9 efforts to mitigate the potential for disparaging
12:41 10 publications?

11 A. Yeah. It was a notification that the
12 market might move forward with participating in
13 Leapfrog again.

14 Q. In litigation, there's a statement that the
12:42 15 goodwill of Palm Beach Gardens Community Hospital has
16 been harmed. How has the goodwill been harmed?

17 MR. CHUNG: Objection to form.

18 A. Well, this goes back to my earlier
19 statements about patients, community members,
12:42 20 governing board members voicing complaints about the
21 hospital's low safety score.

22 BY MS. ZIBAS:

23 Q. What's your understanding of the term
24 goodwill, as used in the complaint and your
12:42 25 declaration?

Erik Cazares
September 24, 2025

Page 90

1 A. Well, the hospital's ability to do right by
2 their patients, by the community.

3 MS. ZIBAS: I'm going to take, like, maybe
4 five or ten minutes and see what other things I
12:43 5 want to ask, if anything.

6 THE VIDEOGRAPHER: We're off the record at
7 12:43 p.m.

8 (Brief recess was taken at 12:43 p.m.)

9 (Back on the record at 12:51 p.m.)

12:52 10 THE VIDEOGRAPHER: We're back on the
11 record. Time is 12:51 p.m.

12 BY MS. ZIBAS:

13 Q. Are there any plans currently at Palm Beach
14 Gardens on how to improve the CMS star rating?

12:52 15 A. As I mentioned earlier, our goals are
16 ongoing to improving patient safety quality and
17 patient experience for the hospital, for our
18 patients, that's a part of our goal, not necessarily
19 to improve the specific grading of any organization.

12:53 20 Q. Do you have any documents that you
21 submitted in this case or that you know that your
22 staff may have submitted that directly links the
23 decrease in the ER visits and outpatient visits to
24 the Leapfrog grade?

12:53 25 MR. CHUNG: Objection to form.

Erik Cazares
September 24, 2025

Page 91

1 A. I don't. I'm not aware of any.

2 BY MS. ZIBAS:

3 Q. What about linking the admission, number of
4 admissions to the Leapfrog grading? Are there any
12:53 5 documentation to support such a statement?

6 MR. CHUNG: Objection to form.

7 A. I don't have any. I'm not aware of any
8 document that was submitted specific for that.

9 BY MS. ZIBAS:

12:54 10 Q. And was the governing board involved in
11 deciding whether to file this lawsuit creating more
12 publicity in litigating this case about the Leapfrog
13 grade?

14 MR. CHUNG: Objection to form.

12:54 15 A. The governing board was not involved in the
16 decision.

17 BY MS. ZIBAS:

18 Q. Who was involved in the decision?

19 MR. CHUNG: Objection to form.

12:54 20 MS. ZIBAS: To file the lawsuit and
21 increase the publicity about the Leapfrog grade.

22 MR. CHUNG: Objection to form.

23 A. The decision was made to file the lawsuit.
24 That's -- that was above my pay grade. From Maggie,
12:55 25 Maggie Gill. I don't know if above her, I don't

Erik Cazares
September 24, 2025

Page 92

1 know. I don't know who made the final decision.

2 BY MS. ZIBAS:

3 Q. And is the governing board kept up-to-date
4 on the cost of the legal fees for the litigation?

12:55 5 A. No. The cost of the litigation are not
6 clear to us right now, so they haven't been updated
7 on what the cost of that.

8 Q. Will the governing board be updated?

9 A. I don't know.

12:55 10 Q. How -- when will you know if you need to
11 update them?

12 MR. CHUNG: Objection to form.

13 A. I think the decision will be made if --
14 depending on where the funds come from, come from.

12:56 15 BY MS. ZIBAS:

16 Q. Where would the funds come from, if not
17 from the hospital?

18 A. I don't know.

19 Q. Does Palm Beach Gardens use a company
12:56 20 called Trulliant [sic.]?

21 A. Trulliant?

22 Q. Yes.

23 A. Or Trilliant?

24 Q. Trilliant. You may not. It's for data
12:56 25 gathering, not all hospitals use it.

Erik Cazares
September 24, 2025

Page 93

1 A. Trilliant.

2 Q. Maybe I'm mispronouncing --

3 A. I'm familiar with Trilliant. I do believe
4 some people in the market may use that for data
12:56 5 gathering.

6 Q. Does Palm Beach Gardens use it, as far as
7 you know?

8 A. Specifically, I don't -- I don't have
9 access to Trilliant, but I don't know if some of the
12:57 10 other employees have access to it.

11 Q. Does Palm Beach Gardens have a contract
12 with Vizient as a consulting firm?

13 A. I'm not aware of that?

14 MS. ZIBAS: I don't believe I have any
12:57 15 other questions at this time. Obviously, if new
16 documents are produced later on in this
17 litigation that involve this witness, we would
18 reserve the right to submit questions for that
19 purpose only. Not saying that's going to
12:57 20 happen, but if it does.

21 MR. CHUNG: I will have very brief
22 redirect. Let me ask you, Counsel, if you are
23 -- have a copy of the amended complaint? Do you
24 have a copy of the amended complaint that we can
12:58 25 use?

Erik Cazares
September 24, 2025

Page 94

1 MS. ZIBAS: No. Mine is marked up. Can't
2 use mine.

3 MR. CHUNG: That's fine. I think what we
4 will do is just a couple of questions coming off
12:58 5 the amended complaint. We have it on laptop and
6 I think what we can do is get approved visually
7 and designate the complaint as I think
8 Exhibit 9, and we can deal with the logistics
9 later of getting it formally marked.

12:58 10 I'm going to ask Mr. Fischer to put an
11 electronic version of the amended complaint,
12 which we'll designate and later mark as
13 Exhibit 9.

14 (Exhibit 9 was marked.)

12:58 15 CROSS-EXAMINATION

16 BY MR. CHUNG:

17 Q. Mr. Cazares, do you recognize the document
18 that's in front of you as the amended complaint in
19 this action?

12:58 20 A. Yes.

21 Q. And are you familiar with the amended
22 complaint?

23 A. Yes.

24 Q. And I'm going to direct your attention to
12:59 25 page 17 and paragraph 42 of the amended complaint, if

Erik Cazares
September 24, 2025

Page 95

1 you can just toggle down to it. And just let us know

3 A. 17?

4 Q. Yes. Page 17. It's paragraph 42.

12:59 5 A. Yes.

6 Q. Do you see that?

7 A. Yes.

8 Q. Earlier in the day, you were asked
9 questions by counsel about a document, a Leapfrog
12:59 10 document in the complaint that referenced commercial
11 purpose or commercial -- commercial gains in the
12 context of questions you were asked about the
13 pay-to-play allegation.

14 A. Correct.

12:59 15 Q. Do you remember those questions?

16 A. Yes, I do.

17 Q. Okay. Is the document that's kind of blown
18 up in paragraph 2, the document that you were
19 referencing?

12:59 20 A. Yes.

21 Q. And are you aware that that is -- or are
22 you familiar with the -- are you aware that document
23 is an excerpt from Leapfrog's hospital survey?

24 A. Correct.

01:00 25 Q. And can you just read the -- and what is it

Erik Cazares
September 24, 2025

Page 96

1 exactly? What is it an excerpt of?

2 A. It's part of the patient rights and ethics
3 section, basically an attestation by the CEO that is
4 being made here.

01:00 5 Q. All right. And what does that attestation
6 cover?

7 A. Basically that the information has been
8 reviewed. It's accurate. Reflects the most
9 up-to-date information. And then it talks about the
01:00 10 Leapfrog Group will retain exclusive ownership of the
11 data, intellectual property rights, and that the
12 hospital acknowledges that the group, that the
13 Leapfrog Group may use the information in a
14 commercial manner for profit.

01:01 15 Q. This is the document you were referring to
16 earlier?

17 A. Yes.

18 Q. When you were referencing --

19 A. Commercial gains.

01:01 20 Q. -- the commercial gains that Leapfrog is
21 asking the hospital, the reporting hospital to sign
22 over as a condition of participating in the survey;
23 correct?

24 A. That's correct. That's the document that I
01:01 25 was referring to.

Erik Cazares
September 24, 2025

Page 97

1 MR. CHUNG: Okay. No further questions.

2 Thank you.

3 MS. ZIBAS: Looks like we're done.

4 THE STENOGRAPHER: Would you like to read

01:01 5 of waive?

6 MR. CHUNG: I'm sorry?

7 THE STENOGRAPHER: Would you like to read

8 or waive?

9 MR. CHUNG: We can -- we'll read.

01:01 10 MS. ZIBAS: And you're going to gather all

11 of the exhibits, right, and take them with you

12 and attach them. Thank you. Appreciate it.

13 THE VIDEOGRAPHER: Off the record at 1:01

14 p.m.

15 (Thereupon, the proceedings concluded at

16 1:01 p.m.)

1 CERTIFICATE OF REPORTER

2

3 THE STATE OF FLORIDA)

4 COUNTY OF MIAMI-DADE)

5

6 I, Theresa Rust, Florida Professional
7 Reporter, certify that I was authorized to and did
8 stenographically report the video-recorded deposition
9 of ERIK CAZARES, pages 1 through 97, that a review of
10 the transcript was requested, and that the transcript
11 is a true and complete record of my stenographic
12 notes.

13 I further certify that I am not a relative,
14 employee, attorney, or counsel of any of the parties,
15 nor am I a relative or employee of any of the
16 parties' attorney or counsel connected with the
17 action, nor am I financially interested in the
18 action.

19

20 DATED this 24th day of September 2025.

ERIK CAZARES

4 IN RE: GOOD SAMARITAN VS. THE LEAPFROG GROUP
CASE NO.: 9:25-CV-80526-DMM

5 TYPE OF PROCEEDING: DEPOSITION

DATE: 9.24.25

6

The transcript of the above proceeding is now
7 available and requires signature by the witness.

8 Please e-mail fl.production@lexitaslegal.com for
access to a read-only PDF transcript and PDF-fillable
9 errata sheet via computer or use the errata sheet
that is located at the back of the transcript.

10

Once completed, please print, sign, and return to the
11 e-mail address listed below for distribution to all
parties.

12

If you are in need of assistance, please contact
13 Lexitas at 888-811-3408.

14 If the witness does not read and sign the transcript
within a reasonable amount of time, the original
15 transcript may be filed with the Clerk of the court.

16 If the witness wishes to waive his/her signature now,
please have the witness sign in the blank at the
17 bottom of this letter and return to the e-mail
address listed below.

18

Very truly yours,

19

20 Theresa Rust, RPR
Lexitas
21 fl.production@lexitaslegal.com

22 I do hereby waive my signature.

THE VIDEOGRAPHER: Good

1 morning. We are going on the record
2 at 9:11 on September 18th, 2025.

3 Please note the microphones
4 are sensitive and may pick up
5 whispering and private conversations.

6 Please mute your phones at
7 this time.

8 Audio and video recording
9 will continue to take place unless
10 all parties agree to go off the
11 record.

12 This is Media Unit 1 of the
13 videorecorded deposition of
14 Melissa Danforth, both in her
15 personal capacity and as a 30(b)(6)
16 representative for Leapfrog, taken by
17 counsel for Plaintiff in the matter
18 of Good Samaritan Medical Center,
19 Inc., et al. v. The Leapfrog Group
20 filed in the United States District
21 Court for the Southern District of
22 Florida, Number 9:25-CV-80526.

1 The location of the
2 deposition is Gibson Dunn.

3 My name is Glen Fortner,
4 representing Veritext, and I'm the
5 videographer. The court reporter is
6 Cindy Sebo from the firm Veritext.

7 I'm not related to any party
8 in this action nor am I financially
9 interested in the outcome.

10 Counsel will be noted on the
11 stenographic record.

12 Will the court reporter
13 please swear in the witness? And
14 then counsel may proceed.

15 --oOo--

16 MELISSA AMEE DANFORTH,
17 after having been first duly sworn under
18 penalty of perjury by the certified
19 stenographer to tell the truth, the whole
20 truth and nothing but the truth, testified
21 herein as follows:

EXAMINATION BY COUNSEL FOR PLAINTIFFS

--oOo--

BY ATTORNEY CRAIN:

Q. Good morning, Ms. Damforth.

A. Good morning. Danforth.

Q. Danforth. I'm sorry.

A. Yes. I'm sorry. I know.

As soon as he said it, I was like,
it's going to last all day.

Danforth.

Q. Like go forth?

A. Yeah.

Q. Got it.

Well, welcome to Gibson Dunn.

A. Thank you.

Q. My name is Lee Crain. I am counsel
for the Plaintiffs in this lawsuit.

1 Can you please state your full
2 name for the record?

3 A. Melissa Danforth.

4 Q. And have you ever gone by any other
5 names?

6 A. Everyone calls me Missy.

7 Q. Great.

8 Have you ever been deposed
9 before?

10 A. No.

11 Q. Okay. So I want to go through some
12 just ground rules so we're on the same page.

13 A. Okay.

14 Q. You understand that the court
15 reporter is taking a transcription?

16 A. Yes.

17 Q. And you understand that all our
18 questions and answers need to be oral?

19 A. Yes.

20 Q. So no nodding heads, that sort of
21 thing. Just make sure when you're responding to
22 a question, it's all oral.

1 A. Understood.

2 Q. We're going to need to make sure we
3 slow down our conversation, a little bit
4 differently from normal talk. Try not to talk
5 over me. I will try not to talk over you to
6 make sure she has a clean record.

7 Sound fair?

8 A. Yes.

9 Q. If you have any need for a break --
10 I understand you may need to stand up at certain
11 times because of a medical condition -- don't
12 hesitate to say if you need a break.

13 The only thing I will ask is I
14 -- we -- we will not be taking a break while a
15 question is pending.

16 A. Understood.

17 Q. Okay. You understand today you're
18 under oath --

19 A. Yes.

20 Q. -- as if you were testifying in a
21 court?

22 A. Yes.

1 Q. Great.

2 And are you taking any
3 medication or under the influence of anything
4 that might impair your ability to give truthful
5 testimony today?

6 A. No.

7 Q. You understand that you have the
8 obligation to testify truthfully today?

9 A. Yes.

10 Q. Okay. You understand from time to
11 time, your attorney may object?

12 A. Yes.

13 Q. And if she objects, unless she
14 instructs you not to answer, you're -- you still
15 are required to answer the question.

16 Do you understand that?

17 A. Yes.

18 Q. Great.

19 Okay. So let's jump in. I
20 want to start -- first, you have two documents
21 in front of you that we have premarked as
22 Exhibits 1 and 2.

1 A. Yes.

2 Q. Do you recognize those documents?

3 A. Yes, I do.

4 Q. Have you seen them before?

5 A. I have.

6 Q. And Exhibit 1 is the Notice of
7 Deposition -- 30(b)(6) Deposition of The
8 Leapfrog Group.

9 Do you see that?

10 A. Yes.

11 Q. And then Exhibit 2 is Leapfrog's
12 Designations and Objections to Plaintiffs'
13 Notice of 30(b)(6) Deposition.

14 Do you see that?

15 A. Yes.

16 Q. You understand today you are
17 testifying both in your personal capacity and on
18 behalf of The Leapfrog Group, the Defendant in
19 this case?

20 A. That's correct.

21 ATTORNEY BLAIR: Objection to
22 form.

1 BY ATTORNEY CRAIN:

2 Q. Do you understand that you're
3 testifying today on behalf of The
4 Leapfrog Group?

5 A. Yes.

6 Q. Do you understand that you're also
7 here to testify in your personal capacity?

8 A. I do.

9 Q. Great.

10 And Leapfrog has designated you
11 as its corporate representative for certain of
12 the designated topics.

13 Do you see that?

14 A. I do.

15 Q. Are you -- have you reviewed these
16 topics before?

17 A. I have.

18 Q. Great.

19 Okay. So I won't go through
20 all of them now. We'll go through all of them
21 throughout the day.

22 You can set those aside for

1 now.

2 So you said you were never --
3 you have never been deposed, correct?

4 A. Correct.

5 Q. Have you ever testified in court?

6 A. No.

7 Q. Testified in any other context?

8 A. No.

9 Q. Okay. And did you prepare for your
10 deposition today?

11 A. I did.

12 Q. What generally did you do to
13 prepare?

14 A. I met with Ms. Blair and Ms. Wood
15 three to four times --

16 Q. Okay.

17 A. -- I believe.

18 Q. Approximately when?

19 A. I would say over the past several
20 weeks since the notice of deposition. I know --
21 I apologize.

22 Can I look at the timing?

1 Q. Of course.

2 A. This was since -- three or four
3 times since the notice of deposition --

4 Q. All right.

5 A. -- yeah.

6 Q. And did you meet with other Leapfrog
7 employees?

8 A. The first time we prepared for
9 depositions, which none of us had taken before,
10 we initially met as a small group of those on
11 the deposition list briefly probably for three
12 or four hours just to have Ms. Blair explain
13 what a deposition is.

14 And then --

15 Q. I just -- I do not want you to share
16 anything that your counsel conveyed to you. And
17 I assume Ms. Blair agrees.

18 ATTORNEY BLAIR: Yes, I
19 agree, but --

20 THE WITNESS: But then after
21 that, I did all of my preparation just
22 with Ms. Blair and Ms. Wood alone.

1 BY ATTORNEY CRAIN:

2 Q. Okay. And approximately how long
3 were your meetings?

4 A. I would say between a few hours and
5 a full day.

6 Q. Did you review any documents to
7 prepare for this deposition?

8 A. I did.

9 Q. Can you tell me generally what you
10 looked at?

11 A. I looked at PowerPoints, e-mails,
12 financial documents -- a lot of documents.

13 Q. Any -- any ballpark estimate?

14 A. Probably a couple dozen.

15 Q. Did you watch any videos in
16 preparation for this deposition?

17 A. No.

18 Q. Listen to any audio recordings?

19 A. No.

20 Q. Did you review any deposition
21 transcripts from this case?

22 A. I reviewed the drafts of those

1 deposed prior to me.

2 Q. The rough transcripts?

3 A. Yes.

4 Q. Okay. That includes Ms. Campion?

5 A. Yes.

6 Q. Mr. Banerjee?

7 A. Yes.

8 Q. Ms. Jupiter?

9 A. Yes.

10 Q. And I forget the last one.

11 A. Bailey.

12 Q. Ms. Bailey?

13 A. Yes.

14 Q. Okay. You remember better than I
15 do.

16 Okay. And approximately when
17 did you review those? Like, in the last week or
18 so?

19 A. Yes --

20 Q. Okay.

21 A. -- last two weeks.

22 Q. And did you read them top to --

1 like, cover to cover?

2 A. No.

3 Q. Okay. Scanned them. Got it.

4 A. A scan.

5 Q. Okay. Did you speak to anybody at
6 The Leapfrog Group about your deposition?

7 A. Besides my attorneys?

8 Q. Correct.

9 A. No, I did not.

10 Q. Okay. Did you speak to anybody else
11 about it?

12 A. No, I did not.

13 Q. Okay. Let's talk -- these are the
14 easy questions.

15 A. Sure.

16 Q. Can you tell me a little bit about
17 your employment history, starting with where you
18 went to college and -- and sort of subsequently?

19 So where did you go to college?

20 A. Sure. I went to the University of
21 Maine in Farmington, Maine. And following
22 graduation, I was a stay-at-home mom for five

1 years.

2 My first job was at the Franklin
3 County -- oh, I'm sorry -- yes, Franklin County
4 Children's Task Force, which is the child abuse
5 and neglect agency for Franklin County, Maine.
6 I did grant writing there. I taught parenting
7 classes for parents who had been
8 court-mandated, and I also led a bullying
9 prevention program in local elementary and
10 middle schools.

11 My next job was with a community
12 health organization called Healthy Community
13 Coalition. At the time, Leah Binder, the
14 president and CEO of The Leapfrog Group, was
15 the executive director of that community
16 organization.

17 There, I did a lot of grant writing
18 for things like bringing breast cancer
19 screenings to our area, smoking cessation
20 programs.

21 I then moved on to Franklin
22 Community Health Network, which, at the time,

1 was a hospital and trying to grow into an
2 integrated health network that included Healthy
3 Community Coalition.

4 And so I became a special projects
5 manager there. And then when Leah Binder came
6 to Leapfrog in 2008, she recruited me in 2009.
7 And I've been at Leapfrog ever since.

8 Q. Okay. Just breaking down some of
9 that --

10 A. Sure.

11 Q. -- what did you study at Farmington?

12 A. English and women's studies.

13 Q. And women's studies.

14 Okay. And how did you decide
15 to get into healthcare?

16 A. I didn't. I decided to get into
17 service work. And so I had been a stay-at-home
18 mom for five years. I was trying to decide what
19 to do. Had a very close friend that was working
20 for the child abuse and neglect agency. She was
21 talking to me about her work. It sounded
22 amazing.

1 I had just had two small children,
2 so the idea of working at an agency that
3 protects children really appealed to me.

4 Once I started at that first
5 non-profit, I found it incredibly engaging and
6 rewarding and basically made the decision at
7 that point that I would have my whole career in
8 a place where I could do public good and help
9 take care of people.

10 Q. And -- and can you tell me -- remind
11 me, when did you first meet Ms. Binder?

12 A. So I went back to work when my son
13 went to kindergarten. So that would have
14 been -- '97 plus five -- 2002 -- maybe 2004 --
15 '5 -- 2005.

16 Q. Okay. And what was her position at
17 the time?

18 A. She was executive director of
19 Healthy Community Coalition, which was that
20 community-based -- so they had a mobile health
21 van, for example, and they did community health,
22 not acute care.

1 Q. Did you report to her there,
2 or . . .

3 A. I did. So I started as a
4 consultant, actually just -- just doing grants.
5 And when I moved to Franklin Community Health
6 Network as a special projects manager, I also
7 reported to her there as well.

8 Q. Okay. And talk to me about -- how
9 did she join The Leapfrog Group?

10 A. When we were working together at
11 Franklin Community Health Network, we just heard
12 one day that Leah was moving to Washington, D.C.

13 I'm not exactly sure. I know that the board at
14 The Leapfrog Group did a national search, and
15 she was one of the candidates interviewed and
16 then ultimately selected, but I don't have much
17 more detail than that.

18 Q. Okay. What were your initial
19 impressions of her in those early days?

20 A. Exceptional grant writer. I had
21 been writing to that point mostly smaller
22 grants, focused on things like domestic violence

1 prevention.

2 She really taught me a great deal
3 about the process of writing Federal grants.
4 And with that mentorship, I was able to
5 actually bring hundreds of thousands of dollars
6 into that rural community from SAMHSA, from the
7 Kellogg Foundation.

8 And so it was actually, like, a
9 very good working experience.

10 Q. And then can you talk to me a little
11 bit about how you got the Leapfrog job?

12 A. Like I said, Leah Binder came to
13 Leapfrog in 2008. After about a year, I would
14 say, she gave me a call and said, you know, I
15 miss working with you. I think we worked really
16 well together. I think there is a position here
17 that could work out for you -- similar kinds of
18 special projects like I was doing at the health
19 network.

20 It was a big move for me and my
21 family. My husband is from Farmington, Maine.
22 Our children had the same teachers that he had,

1 which is, like, good and bad. They were
2 getting older. And we thought maybe it would
3 be a good change for our family and just give
4 them a little bit more opportunity but also
5 access to slightly better education.

6 Q. And then before we get to Leapfrog
7 Group --

8 A. Sure.

9 Q. -- I saw in your LinkedIn you are --
10 you have -- you own a jujitsu studio?

11 A. My husband and I own and operate a
12 Brazilian jujitsu gym in Mont --
13 Montgomery County, Maryland.

14 Q. So we've got to watch out on this
15 side of the table?

16 A. I -- I've had this back injury for
17 two years, so if I can --

18 Q. So we're safe?

19 A. -- get back and forth to the
20 restroom today, we'll be -- we'll be happy --

21 Q. Okay --

22 A. -- but --

1 Q. -- if you need any breaks --

2 A. Yeah. But, again, like, I've --

3 I've been really committed, like I said, to
4 trying to do service things. And so, like,
5 there, I had been teaching just one class, which
6 is a women's-only class, that had a lot of
7 mothers and daughters, young women, older women.
8 So it was more fun than career.

9 Q. Okay. Can you tell me -- we saw you
10 had multiple positions at Leapfrog --

11 A. Yes.

12 Q. -- can you tell me about your
13 gradual, it seems like, ascendance?

14 A. Yes. So when I first came to
15 Leapfrog in 2009, I was the director of
16 communications and membership. The work I had
17 been doing at Franklin Community Health Network
18 was really focused on things like putting out an
19 annual report. I was working with some
20 practices. I was doing some EHR-based projects.
21 It really was special projects.

22 When I came to Leapfrog,

1 originally, it was more focused, specifically
2 on working with some of our employer and
3 purchaser groups. When I say "purchaser
4 groups," I'm talking about people who purchase
5 healthcare, sort of a term of art.

6 It confused me at first, but
7 employers and purchasers can be thought of in
8 the same way. They're people that purchase
9 employee benefits.

10 It was, at that time, a really
11 small organization. There was only of a
12 handful of us. I was doing a number of things
13 because of that, as I had done previously in my
14 non-profit work.

15 After a couple of years -- we had
16 been working with a team at the University of
17 Wisconsin in Madison, and they were providing
18 the scientific oversight over our Leapfrog
19 Hospital Survey.

20 Q. Can I ask you, is that, like, the
21 role that Armstrong ultimately --

22 A. Yes. I was going to describe that.

1 So just by way of background so
2 it's not confusing, we were founded in -- in
3 2000 immediately after this very famous report
4 came out from the Institute of Medicine, Call
5 to Earth Human. It was the first time that
6 anyone had ever quantified, put a number on,
7 the number of people that die every year in
8 hospitals from preventable medical errors.

9 And employers, purchasers -- and
10 these are large, self-insured employers: GM,
11 GE, Marriott, FedEx -- got their hands on this
12 report through the Business Roundtable, which
13 is a association of Fortune 100 CEOs, and they
14 were really shocked that they had been spending
15 millions if not billions of dollars to provide
16 these benefits and there were all of these
17 preventable harms occurring in hospitals.

18 And they said, We need more
19 information. Like, we should not have been
20 blindsided by this report. And they literally
21 founded our organization to go out and get that
22 information for them about the safety and

1 quality of hospitals.

2 And so immediately after we were
3 founded, we built this relationship with the
4 University of Wisconsin in Madison to help us
5 ultimately design what would become the
6 Leapfrog Hospital Survey.

7 I say that as background because
8 after I had been at Leapfrog for a couple of
9 years -- and tell me if I'm going too fast --

10 Q. Yeah.

11 A. -- I know you said to speak
12 slowly -- after I had been at Leapfrog for a
13 couple of years, those scientists that were
14 working with us at the University of Madison in
15 Wisconsin [sic] both, within a couple of months
16 of each other, took other jobs.

17 One was our senior scientist. Her
18 name was Dr. Barbara Rudolph. She was the
19 first senior scientist ever involved in the
20 survey. And so that had been, you know, up to
21 that point, Leapfrog's history. She had worked
22 with them.

1 Q. Approximately what time period?

2 A. That would be 2000- -- probably
3 around 2011, 2010, maybe.

4 Her Ph.D. candidate research
5 assistant at that time was Dr. Matt Austin --
6 or who had become Dr. Matt Austin. So
7 Ms. Rudolph was recruited by the Robert Wood
8 Johnson Foundation to lead the largest
9 community health survey in the country. Hard
10 to say no to that job.

11 I always refer to it as her
12 Devil-Wears-Prada moment. It was a dream job
13 that every girl wanted. And so she took it. I
14 don't blame her.

15 But at that same time, Matt Austin
16 was recruited to Johns Hopkins to Armstrong
17 Institute for Patient Safety and Quality by
18 Dr. Peter Pronovost, who had been working with
19 us in an expert capacity on the survey.

20 To your point, we were able to
21 basically -- almost have continuous scientific
22 leadership over the content of the survey by

1 ending that agreement with the University of
2 Wisconsin and starting an agreement with the
3 Armstrong Institute for Patient Safety.

4 Q. Can I ask you a question? So you --
5 you mentioned the employers that -- that helped,
6 I guess, start Leapfrog.

7 A. Yeah.

8 Q. Are they still involved?

9 A. Yes -- not necessarily the same
10 exact ones, but yes. We continue to be governed
11 by employers and purchasers. Our governing
12 board has grown to also include some patient
13 safety advocates, but we have no healthcare
14 represented on our board or governance
15 whatsoever.

16 Q. Which employers are represented?

17 A. We -- I'm going to give you a
18 handful. This will not be an exhaustive list.
19 And to be clear, Leah Binder, I think, is
20 assigned that particular topic.

21 But, for example, Sally Welborn
22 serves on our board of directors. She was head

1 of benefits for Walmart for many, many years.
2 She now has a private consulting firm where she
3 basically consults on the same topics.

4 Linda Schwimmer, who is our current
5 chair of our board -- she is the president or
6 executive director of the New Jersey healthcare
7 Quality Institute that represents purchasers,
8 employers in the State of New Jersey.

9 Previously, Michelle Martin --
10 Martin, A- -- M-A-R-T-I-N -- was on our board
11 for many years, and she was a head of benefits
12 for Paramount, which is, like, a television --
13 the television station, not the movie station,
14 and others.

15 And, again, Leah would be the --
16 have the full complete list.

17 Q. Understood --

18 A. Yeah.

19 Q. -- I understand.

20 Let's shift gears a little bit.

21 A. Okay.

22 Q. So you -- you started -- I think

1 your first title was senior -- was it vice
2 president of communications?

3 A. Yes. Should I go back and talk to
4 you about my trajectory at Leapfrog?

5 Q. What's your second title? It was, I
6 think --

7 A. My second title was probably
8 director of the Leapfrog Hospital Survey.

9 Q. I have vice president of hospital
10 ratings.

11 Does that sound right?

12 A. There would have been one in
13 between.

14 Q. Okay. Got it.

15 A. Sorry.

16 Q. Okay. So just tell me a little bit
17 about the --

18 (Simultaneous unreportable crosstalk.)

19 THE WITNESS: My LinkedIn
20 probably is not the most up-to-date.

21 So -- so when

22 Barbara Rudolph and Matt Austin --

1 they sort of took these separate
2 jobs, Leah and I had a long
3 conversation about how that could
4 have been more disruptive to our
5 operations than it ended up being
6 because we were so reliant on
7 external resources to do the
8 administration of our Hospital
9 Survey.

10 We were using a company
11 first called Thomson and then
12 Thomson Reuters, and -- and they
13 became something else. They were
14 primarily responsible for
15 administering the survey via an
16 online data collection tool, scoring
17 the survey responses, preparing the
18 scored survey results files.

19 So just -- I don't know how
20 familiar you are with our survey
21 operations, but we collect individual
22 responses. Those individual

1 responses get processed through
2 scoring algorithms, and the result is
3 a result that we publicly report.

4 And so in the simplest
5 terms -- for C-sections, we may be --
6 get a numerator and denominator, we
7 calculate a rate, it's the rate
8 that's published -- it's the rate
9 that Thomson Reuters was putting into
10 these files for us.

11 They were also doing all of
12 the technical assistance. The
13 hospitals participating in the survey
14 said they had questions about the
15 measure of specifications of the
16 reporting period. Thomson Reuters
17 did all of that.

18 And then --

19 BY ATTORNEY CRAIN:

20 Q. So --

21 A. -- with --

22 Q. -- a lot of --

1 A. Okay.

2 Q. -- what Leapfrog does today is --
3 was outsourced back then?

4 A. Was outsource --
5 (Whereupon, as the certified
6 stenographer seeks clarification,
7 colloquy will not be captured on
8 the written record.)

9 BY ATTORNEY CRAIN:

10 Q. Outsourced back then?

11 CERTIFIED STENOGRAPHER: Just
12 let him finish the question.

13 THE WITNESS: Oh, I was
14 trying to finish my answer, but I
15 understand.

16 CERTIFIED STENOGRAPHER:
17 Well, then finish your answer.

18 (Laughter.)

19 THE WITNESS: So with that
20 big transition of our scientific team,
21 we decided we would move some
22 functions in-house, mostly just so we

1 had more expertise in-house and
2 weren't so reliant. It's very common
3 at small nonprofits that you have a
4 small staff and you rely on external
5 expertise to do a lot so you're not
6 carrying those costs yourself.

7 But we had been around at
8 that point for a decade, and we
9 thought it was time to really bring
10 some of that work in-house. So I
11 became the director of the Leapfrog
12 Hospital Survey and then eventually
13 the vice president for healthcare
14 ratings, as we've expanded beyond
15 hospitals to include ambulatory
16 surgery centers.

17 BY ATTORNEY CRAIN:

18 Q. Got it.

19 And what's your position today?

20 A. Senior vice president for healthcare
21 ratings.

22 Q. And -- and what feeds into that?

1 What -- how many people report
2 to you?

3	A. Ten.
---	---------

4 Q. And can you -- does that include
5 Ms. Champion?

6 A. I -- I can list them.

7	Q.	Sure.
---	----	-------

8	A. Okay.
---	----------

9 So I have a director of healthcare
10 ratings, Kathryn Stewart.

11 I have a director of the Leapfrog
12 Ambulatory Surgery Center Survey,
13 Jean-Luc Tilly, J-E-A-N-L-U-C Tilly.

14 I have a director of licensure
15 programs, Kush Banerjee.

16 I have a program manager for the
17 Hospital Safety Grade, Alex Champion.

```
18             I have a program manager for data,
19     Dylan Eller, and two data analysts: Leo Rule
20     and Austin Edwards.  He has, like, two first
21     names --
```

22 0. Yeah?

1 A. -- Austin Edwards.

2 And then I have a senior program
3 coordinator, Robyn Nabi.

4 Another senior program coordinator,
5 Leah Kaufman.

6 A program coordinator Heather Scott
7 and a program associate, Mallory Fries.

8 Q. And who do you report to?

9 A. I report directly to Leah Binder.

10 Q. And what are the topics that you're
11 responsible for?

12 A. Many.

13 Q. Just give me a sense.

14 A. Stop me if I'm going on.

15 I mean, first and foremost,
16 responsible for working with the rest of our
17 senior executive team to provide overall input
18 on the general strategic direction of the
19 organization and making sure we're being
20 responsive to the board and the goals that they
21 set out for us.

22 Specifically, I oversee all of our

1 healthcare ratings programs, including the
2 Leapfrog Hospital Survey, Hospital Grade,
3 Ambulatory Surgery Center Survey and our
4 value-based purchasing program, and that
5 includes managing our contract with the John --
6 Johns Hopkins Armstrong Institute for patient
7 safety and quality.

8 I also recently, since about
9 halfway through 2023, have responsibility over
10 data licensure and Accolade sales. I also
11 actually do quite a bit around education.
12 Leapfrog offers a number of free and some paid
13 educational opportunities for various
14 stakeholders. I develop and deliver, I would
15 say, three-quarters of that content.

16 Q. Got it. Okay.

17 A. Oh -- I'm sorry.

18 Q. No, please.

19 A. I also in my capacity -- I serve on
20 several different national technical expert
21 panels, and so I am, myself, a subject-matter
22 expert in the areas of patient safety,

1 performance measurement, healthcare equity and
2 diagnostic excellence.

3 So I participate on several
4 different CMS, the Centers for Medicaid &
5 Medicare Services -- CMS technical expert
6 panels, and I currently serve on Patel's
7 partnership for quality governing board and
8 other of their committees.

9 Q. You said you're an expert, I think,
10 in patient safety and performance measurement
11 and healthcare equity.

12 Did you develop that over time,
13 or was there education that you -- that went
14 into that?

15 A. I developed it over time. As I
16 said, we have a long-standing relationship at
17 this point with Johns Hopkins. They are the
18 scientific experts. But I'm able to advise more
19 on things like feasibility, mostly because of
20 the work that I do directly with hospitals at
21 Leapfrog.

22 So I might not be able to be the

1 expert on if we're developing every admissions
2 measure or should heart attack or pneumonia
3 patients be included or excluded, but in terms
4 of feasibility of data collection, I can be
5 helpful in that way.

6 Q. Got it. Okay.

7 And then one other -- I just
8 want to make sure you -- the -- the Safety Grade
9 itself is under your supervision; is that right?

10 A. The Hospital Safety Grade is one of
11 our programs, correct, that I oversee.

12 Q. Great. Okay.

13 Stepping back just a little
14 bit, can you tell me, like, generally what is
15 Leapfrog's mission?

16 A. I can tell you specifically what is
17 Leapfrog's mission.

18 Q. Wherever you want to go.

19 A. Sure. So our mission is to reduce
20 preventable harm and specifically death from
21 medical errors.

22 Q. Does Leapfrog advise hospitals how

1 to improve their quality?

2 A. We do not --

3 Q. Okay.

4 A. -- in any capacity, and we never
5 have.

6 Q. Okay. And what is Leapfrog sort of
7 an expert in?

8 A. So we are an expert in -- what I
9 would say is elevating topics within patient
10 safety.

11 Could I give two examples --

12 Q. Sure.

13 A. -- in case that's not clear?

14 So patient safety, thankfully, is
15 an area within health services research that
16 has got -- health services research which has
17 gotten, thankfully, a lot of attention
18 recently. And so through our work with about
19 13 different independent voluntary technical
20 expert panels --

21 (Whereupon, as the certified
22 stenographer seeks clarification,

1 colloquy will not be captured on
2 the written record.)

3 ATTORNEY CRAIN: Voluntary.

4 THE WITNESS: -- voluntary
5 technical expert panels and our
6 relationships with other aligned
7 national organizations, like the
8 Agency for Healthcare Research and
9 Quality -- AHRQ -- the Centers for
10 Disease Control and Prevention, CMS,
11 the Institute for healthcare
12 Improvement. We're able to take some
13 of that evidence-based research and
14 sort of bring it to the public.

15 And what I mean by that is
16 there's been a particular issue that
17 we've been focused on in the past
18 couple of years called "hospital
19 boarding" in the emergency
20 department. It's basically when you
21 go to the emergency department, the
22 doctor sees you and they say, Man,

1 you're really sick. We have to admit
2 you.

3 Unfortunately, for a lot of
4 different reasons, sometimes once
5 that order has been sent in, you can
6 wait in that emergency department or
7 in a hallway or a -- back in the
8 waiting room for hours, for days, for
9 over a week.

10 When that happens, what we
11 know, because of published literature
12 that comes from that health
13 science -- health services research
14 community, is you're less likely to
15 get medications, so your condition
16 can be exasperated. You're less
17 likely to be taken for the tests or
18 treatments that have been ordered for
19 you, sometimes literally because
20 people can't find you.

21 So when that becomes
22 identified as this is a critical

1 patient safety issue that has
2 reasonable interventions that could
3 make it better for patients, we have
4 the opportunity at Leapfrog, through
5 our annual Hospital Survey, to pull
6 together a national expert panel to
7 help us develop a series of questions
8 or to implement measures that have
9 already been developed by others.

10 So we can collect
11 information on hospital performance,
12 score that and ultimately publicly
13 report performance on that measure.

14 And if any of that is
15 confusing, let me know and I can give
16 a different example.

17 BY ATTORNEY CRAIN:

18 Q. No, that's helpful.

19 A. Okay.

20 Q. Thank you.

21 Can we talk a little bit about
22 the Safety Grade, going back to that issue?

1 A. Yes.

2 Q. So just starting at a benchmark --

3 A. Sure.

4 Q. -- what is Leapfrog's Hospital
5 Safety Grade?

6 A. So the Hospital Safety Grade is a
7 composite, so it's a letter grade of an A, B, C,
8 D or F that represents their performance on 22
9 national measures of patient safety, and I'm
10 sure at some point today this will come up. So
11 when we talk about patient safety, we're talking
12 about, again, that preventable harm. Other
13 aspects of hospital performance that we measure
14 on our Leapfrog Hospital Survey are more
15 comprehensive to include things like quality.
16 And quality might be a readmission measure where
17 it's best if you're not being readmitted too
18 often, but sometimes it's necessary.

19 The preventable errors that we
20 focus on in the Hospital Safety Grade are
21 things that largely the scientific community --
22 including doctors, nurses, et cetera -- have

1 said, There are known evidence-based
2 interventions in place to make sure that these
3 things either rarely happen or never happen.

4 Q. And then can you tell me when was
5 the Safety Grade developed originally?

6 A. So the Safety Grade was developed --
7 started being developed around 2012. I think we
8 launched it for the first time in 2013.

9 Q. And who came up with the idea?

10 A. It -- I couldn't identify a single
11 individual. It was a number of things happening
12 at the same time, or my recollection is that it
13 was a number of things happening at the same
14 time.

15 So first and foremost, Leapfrog had
16 been around at that point about 10 years. I
17 think we were sort of getting ready to
18 celebrate or just celebrated our 10-year
19 anniversary, and we had some board members and
20 others who worked with us at that time who had
21 been working with us since our founding or
22 almost since our founding, and the -- again,

1 purchasers and employers, and they were
2 somewhat frustrated that since the IOM report
3 had come out, there didn't actually seem to be
4 this drastic reduction in preventable harm to
5 patients in hospitals. I think everyone
6 thought, you know, this will be the match that
7 lights the fuse that ignites this change, and
8 we'll make sure that people aren't harmed as
9 much. And actually, the opposite was happening
10 because of advances in medical coding and
11 research science. It was basically suggested
12 that actually the IOM report was like a gross
13 underestimate of the number of people that was
14 actually being harmed and dying in hospitals
15 from medical errors, and that number was much
16 higher.

17 So the discussion as I remember it
18 was really focused around how can we at
19 Leapfrog, who have been focused on a lot of
20 important things, like I said, maternity care,
21 so C-section rates, readmissions, surgical
22 volume; but, again, largely quality measures,

1 where you don't want to see too much of it or
2 not enough of it, but sometimes it's necessary,
3 how can we get back to really focusing on these
4 deaths from preventable harm, this -- this
5 really narrow concept of patient safety.

6 About that same time, two things
7 happened: One is in New York, and one is in
8 Los Angeles, I believe. The state health
9 departments or local health departments started
10 having restaurants put the sanitation grades on
11 their windows, and I -- I think I remember
12 someone saying, No one's going to go to a C
13 restaurant in New York. You know, like, I've
14 been to New York. No one's going to go to a C
15 restaurant in New York.

16 And there was something about that
17 level of transparency driving that C sushi
18 restaurant to be in a -- you know, to -- to get
19 better, to get cleaner, whatever it was.

20 Additionally, what was happening is
21 that these letter grades didn't only include
22 you're an A, you're a B, you know, God forbid,

1 you're a C sushi restaurant, but it sort of,
2 like, listed, like, why they were an A or a B
3 or a C. And there was this education happening
4 to -- like, the general public about, like,
5 what New York cares about when they're looking
6 at the sanitation or the hygiene of
7 restaurants. And we thought that's what we
8 have the opportunity to do around patient
9 safety. What is patient safety? Who is
10 involved in patient safety? And frankly, it
11 includes patients themselves. We all have a
12 role in keeping ourselves safe. If we're in a
13 hospital or a doctor's office, or an ambulatory
14 surgery center.

15 And so it was just really, I think,
16 some things happening at the same time,
17 frustration over the slow pace of change.
18 These novel restaurant grades and this idea
19 that we could and should do more, specifically
20 to educate patients -- so to be clear, when
21 Leapfrog was founded, and I say we were founded
22 by employers and purchasers, and we were

1 working directly with purchasers -- employers
2 and purchasers, I mean that quite literally.

3 Over time, however, they expressed
4 to us, you know, This is great, but maybe it
5 would be great if we can make something a
6 little bit more consumer friendly. They didn't
7 use that term. They're talking about, like,
8 more understandable, easier to consume for our
9 covered lives.

10 And so the idea of a composite, I
11 think, is one that appealed to us in sort of
12 meeting the requests we were getting from
13 employers and purchasers to be more
14 understandable, if we could, to their covered
15 lives. So it would be hard to say whose idea
16 was it. It really felt, to me, at the time
17 just a lot of different things sort of
18 coalescing around a single concept.

19 We also had been working at that
20 point with some extremely prominent globally
21 known subject-matter experts, including folks
22 like Dr. David Bates from Brigham and Women's

1 Hospital; Dr. Peter Pronovost from John -- at
2 the time, Johns Hopkins -- now he's in Ohio --
3 Lucian Leape who was considered literally the
4 father of patient safety and just passed this
5 year.

6 And they also, I think, had a lot
7 of energy around bringing the focus to patient
8 safety, and they, themselves, as researchers, I
9 think, were frustrated with how many people
10 were still getting hurt from things that
11 shouldn't happen.

12 Q. And -- and the grade you mentioned
13 was designed to be consumer focused?

14 A. It was designed to be consumer
15 friendly, so the idea that, like, these
16 restaurant grades -- people understand a -- a C
17 sushi restaurant is not where you probably want
18 to eat. It was designed just to be something
19 more commonplace than maybe what we had been
20 using for the Hospital Survey results.

21 Q. Okay. So just going back to the
22 hospital analo- -- sorry -- the restaurant

1 analogy.

2 A. Yes.

3 Q. Fair to say we're talking about
4 market forces, like putting out letter grades
5 that SV effect change in the marketplace?

6 A. So these were regulatory in nature
7 in New York and -- and Los Angeles, and I
8 couldn't say if they effected change. I would
9 often hear people bragging, My pizza -- my
10 favorite pizza place in New York has a C, and
11 I'll never stop going, and they'll never change.

12 And that just might be, like, the
13 New York/L.A., like, rebel attitude, but I -- I
14 couldn't speak to whether or not it did or
15 didn't.

16 I think that whether or not it did,
17 it at least increased transparency around those
18 things, and then people could make a decision.
19 It's just pizza; I don't care. I'll go if
20 they're a C.

21 Q. Yeah. For -- for hospitals,
22 though --

1 A. Yes.

2 Q. -- was it designed to -- to
3 encourage change and improvement through those
4 market forces?

5 A. It was designed to help us meet our
6 mission in reducing preventable harm and death
7 to patients, correct.

8 Q. Okay.

9 So I want to take a look at a
10 document. So let's step back for a second.

11 A. Sure.

12 Q. I want to talk a little bit about
13 the excerpt -- the Safety Grade expert panel.

14 A. Okay.

15 Q. When was that established? Was it
16 around the same time?

17 A. It would have been almost
18 immediately. Like, as we started at the board
19 level to talk about this idea of doing something
20 around patient safety, we would have -- I can't
21 honestly remember those conversations exactly,
22 but just knowing how we work at Leapfrog, we

1 would probably almost immediately start
2 consulting with subject-matter experts in the
3 field, correct. And we had existing ongoing
4 relationships with many of them.

5 Q. Like Dr. Pronovost?

6 A. Like -- Pronovost.

7 Q. Pronovost?

8 A. Yes.

9 Q. Sorry. I read that wrong.

10 A. That's okay.

11 Q. So tell me a little bit about the
12 expert panel, how it developed.

13 How often do they meet?

14 A. So I -- at Leapfrog, one of my roles
15 is not convening technical expert panels, so
16 just if I could talk about that for a second --

17 Q. Please.

18 A. -- is that okay?

19 So I do -- like I said, I do
20 oversee these programs but not every aspect of
21 those programs. And so part of the contract
22 that we have with Armstrong Institute for

1 patient safety and quality, they're responsible
2 for convening our technical expert panels. And
3 so Matt Austin, as I've talked about, was --
4 would have been with us at this time, so we
5 would have asked him to help us convene this
6 panel.

7 And probably -- because, again,
8 we -- we're already working with folks like
9 Peter Pronovost and David Bates, we would have
10 asked them out of courtesy -- they are
11 literally giants in the field of patient
12 safety, not just in the United States but
13 around the world -- if they would like to be
14 included. Lucian -- Lucian Leape had had an
15 association with Leapfrog. I'm sure we would
16 have asked him if -- Matt would have asked him
17 if he wanted to be included, and then I'm not
18 exactly sure how Matt identified the others.

19 Q. Okay.

20 A. Probably -- to be frank, probably
21 going to David and Peter saying, Who else is
22 giant in this space that you think would bring

1 some value? And Matt independently reviews
2 their published literature, their CVs,
3 et cetera.

4 Q. So Dr. Austin makes the decision of
5 who to invite to join the panel?

6 A. He helps recognize and identify
7 them. For this particular panel, again, in my
8 memory, Peter and David Bates were probably
9 involved early on, would also have had some
10 input, like, Yes, like, he or she is really an
11 expert in that area. We should definitely bring
12 them on.

13 Q. So, like, just to put a concrete
14 example --

15 A. Sure.

16 Q. -- do you know how Dr. Romano joined
17 the panel?

18 A. I don't.

19 Q. Okay. Dr. Austin presumably would
20 know?

21 A. Yes.

22 Q. Okay. And then just going back to

1 my question --

2 A. I don't know how he was --

3 Q. Yeah.

4 A. -- identified or joined the panel or
5 when; however, I do know at that time we were
6 interested in the specific patient safety
7 measures called Patient Safety Indicators. The
8 acronym is PSIs. They were developed by the
9 Agency for Healthcare Quality and Research
10 [sic], AHRQ, and they're an interesting type of
11 measure.

12 So basically they're a
13 software-based measurement tool, where you can
14 read in hospital claims, and it picks up
15 procedure and diagnosis codes from those claims
16 to identify a pool of patients that are
17 eligible to be measured and then the things
18 that we're looking for that shouldn't have
19 happened to them; maybe it's postoperative
20 sepsis or postoperative wound adhesions,
21 meaning the wound came out, right.

22 So all of these things that

1 happened also happened to be recorded and
2 documented on claims, and so these are called
3 claims-based measures. And Patrick Romano was
4 leading the team that was developing and
5 refining these patient safety indicator
6 measures that we were very interested. And so
7 my sense is that's how he was identified and
8 then invited.

9 Q. And Dr. Romano would have -- or
10 sorry -- Dr. Austin would have invited him?

11 A. Correct.

12 And Dr. Romano continues to be
13 involved in that project through AHRQ as they
14 continue to refine those measures.

15 Q. And then just going back to my
16 question, how often, generally, does the -- does
17 the Safety Grade expert panel meet?

18 A. My recollection is that in the
19 beginning, we met more frequently because we're
20 trying to work everything out and identify
21 measures and make decisions about the
22 methodology and how narrowly we were defining

1 patient safety. And then over time, we
2 typically meet once or twice a year.

3 Q. And do you typically join those
4 meetings?

5 A. I do. I attend most all of our
6 technical expert panel meetings for the Survey
7 and the Safety Grade.

8 Q. And does the -- the expert panel --
9 does it have a chair?

10 A. No, it does not.

11 Q. Dr. Austin plays the role of sort of
12 a facilitator; is that right?

13 A. Correct. So his -- it's his actual
14 contractual responsibility to develop an agenda,
15 meeting materials, meeting notes.

16 Q. Got it.

17 And then how does the -- does
18 the expert panel make decisions, or does it just
19 make recommendations?

20 A. They provide guidance.

21 Q. Okay.

22 A. So they are, as I've described,

1 whether it's our maternity care expert panel or
2 the Safety Grade, across the board, the foremost
3 experts in these areas. And so the criteria
4 that we look for is that you've been widely
5 published, not that you've published a handful
6 of articles, you've published decades of
7 articles on these particular topics. Many of
8 them also serve on other technical expert panels
9 or otherwise subject-matter experts outside of
10 Leapfrog in a number of different capacities.

11 I also, I think I described, serve
12 on several technical expert panels, and my role
13 as an expert panelist and their role as an
14 expert panelist for Leapfrog really mirror each
15 other, and that I'm often asked to provide
16 guidance based on my personal expertise.
17 They're asked to provide guidance based on
18 their research and their own personal
19 expertise.

20 Q. Who makes the ultimate decision if
21 there's a disagreement?

22 A. To be quite frank, I can't think of

1 a disagreement among expert panelists. The
2 panels are quite collegial, as are the ones I've
3 been on. If there's -- if someone voices a
4 concern during a discussion, which is often
5 quite open and frank -- again, these individuals
6 haven't met for the first time on our panel.
7 They've likely known each other longer than
8 we've known them, and no one is afraid to speak
9 up. There are no shrinking violets on any of --
10 any of our panels, and so there's always a
11 lively discussion; sometimes, I'm sure, debate.

12 But they ultimately themselves will
13 typically come to guidance at the -- like, This
14 is -- you know, this is what we think. That
15 sounds right. That sounds good to me. David,
16 does that sound right to you? You know, that
17 kind of thing.

18 Ultimately, though, if they did
19 have a disagreement, Matt would let us know
20 that the panel couldn't come to consen- -- and
21 this is theoretical, the panel couldn't come to
22 consensus. I would let Leah know if it was

1 something very serious. Leah would go to the
2 board of directors.

3 But, again, I -- I really can't
4 think of a single instance across any of our
5 technical expert panels where that's occurred,
6 and we operate about 13 of them.

7 Q. Who -- who decides sort of what the
8 consensus is? Is that Dr. Austin?

9 A. I don't understand the question.
10 I'm sorry.

11 Q. Like, who -- who -- who speaks for
12 the panel at the end of the day and says, This
13 is the group's consensus?

14 A. So I guess, technically, it would be
15 Dr. Austin, but it's not really necessary to
16 have that specific function. I'm on the calls.
17 I'm part of the conversation. So there's not
18 really a necessary formality for Matt to be,
19 like, this is what the panel decided. I heard
20 the conversation.

21 Does that makes sense and --

22 (Interruption by cellular

1 telephone.)

2 (Sotto voce discussion between the
3 witness and counsel.)

4 BY ATTORNEY CRAIN:

5 Q. So there's no, like, vote, right?

6 A. No. I've never taken a vote as an
7 expert panelist. And we don't ask our panelists
8 to vote either.

9 Q. And then -- so there -- there's --
10 at these meetings, there's a topic of
11 discussion --

12 A. An agenda, yes.

13 Q. -- an agenda. There's a dec- -- a
14 decision point, for instance, whether to
15 include --

16 A. Not necessarily. Sometimes --

17 Q. If I can finish my question.

18 A. Oh, sorry.

19 Q. -- for instance, whether to include
20 something on the Hospital Survey or in the
21 Safety Grade.

22 Like, there's a do we want to

1 include this metric, for instance, right? That
2 could come up, yes?

3 A. It could.

4 Can I give one caveat? And
5 apologize for --

6 Q. Sure --

7 A. -- interrupting you --

8 Q. -- no.

9 A. -- so across all of our programs --
10 you know, the Hospital Survey, as I described,
11 has been around for -- this is our 25-year
12 anniversary. We have over 2,400 hospitals a
13 year voluntarily participating in that survey.
14 And many of them have been doing it for many
15 years even for our newer program, the Ambulatory
16 Surgery Center Survey. It's been around for --
17 just since 2019, but we still have ASCs that are
18 doing it every year.

19 And so it's often our
20 responsibility to actually bring topics to
21 these panels sometimes years ahead of when the
22 change might actually go into place. So I just

1 want to be clear.

2 So it's not like I'm taking to
3 them -- or we're taking to them can you please
4 make a decision about this measure because
5 we're going to include it in six months. It's
6 really on us, myself and Dr. Austin, to make
7 sure that we are staying ahead of things. You
8 know, this measure is going to be publicly
9 reported by CMS in 2027. We would like to talk
10 to the panel about it now so we can give
11 hospitals one-year notice, two-year notice,
12 three years.

13 So it's oftentimes for discussion.
14 It may not be for immediate decision or
15 implementation. I -- if that --

16 Q. That's helpful --

17 A. -- makes sense. Okay.

18 Q. -- it does.

19 And I guess my follow-up
20 question is -- you said "immediate decision."

21 Who's making the decision?

22 A. If it's to add or remove a mother --

1 measure, it's the Panel saying, I think this is
2 a good measure to add. And usually people will
3 say, I agree, I agree, I agree.

4 But, again, it's not a verbal vote;
5 it's -- it's a verbal consensus.

6 Q. So the -- the expert panel makes the
7 decision or Leapfrog makes the decision?

8 A. The expert panel provides us with
9 some guidance that this would be a good measure
10 to add. Ultimately, it's our decision whether
11 or not we add it, but we tend to always follow
12 the expert panel's guidance.

13 Q. And when you say "our," just so it's
14 clear, that's Leapfrog, correct?

15 A. Correct.

16 Q. And anybody particular internally at
17 Leapfrog?

18 A. Anything related to any of the
19 measures on any of our ratings programs would be
20 Matt Austin, myself, Leah Binder. And like I
21 said, if it was something controversial, it
22 would go to our board.

1 And when I say "controversial," for
2 example, following the decision on Roe versus
3 Wade, we had a lot of employers and purchasers
4 very concerned about the impact that would have
5 on the safety of women and really said, This is
6 a patient safety issue. Why isn't Leapfrog
7 speaking out about this? Why isn't Leapfrog
8 doing something about this?

9 Given the political nature of that
10 particular topic, if one of our expert panels
11 had theoretically said, I -- if our maternity
12 care expert panel had said, I think we need to
13 do something around this from a measurement and
14 public reporting perspective, that likely would
15 have gone to our board of directors, if that's
16 a helpful example.

17 Q. It is.

18 So when you say
19 "controversial" --

20 A. Yes.

21 Q. -- that's helpful --

22 A. Yeah.

1 Q. -- and -- and I remember that
2 decision well.

3 A. Yeah.

4 Q. Going back to the Safety Grade,
5 are -- are -- what are the types of hospitals
6 that are not assigned a Safety Grade?

7 A. So for the Hospital Safety Grade --
8 is it okay if I start a little bit at the
9 beginning so it's not confusing --

10 Q. Sure.

11 A. -- and if it -- if you're like, oh,
12 I already know this, then just tell me, because
13 I'm not, you know --

14 Q. Go ahead. Yeah.

15 A. -- so for the Hospital Safety Grade,
16 again, we're just using these measures of
17 patient safety as our expert panel has defined
18 "patient safety," which is freedom from harm,
19 right.

20 And so the Safety Grade includes
21 two domains of measures. You can sort of think
22 of them as, like, two buckets. Okay. And I'm

1 going to use my hands, but I'm going to use my
2 words, too.

3 Two buckets. One of the buckets
4 includes what we call "process and structural
5 measures." So these are processes and
6 structures that researchers, scientists have
7 said and have evidence -- so they actually are
8 things that would prevent harm to patients.

9 An example would be the use of
10 computerized prescriber order entry to order
11 inpatient medication orders can prevent adverse
12 drug events, which is basically someone giving
13 you a medication that they shouldn't for any
14 number of reasons and it kills you. Right. So
15 that's an adverse drug event.

16 So that's a structural measure.
17 It's, in this case, a piece of technology
18 including some systematic implementation.

19 The other bucket of measures are
20 called "outcome measures." And this is
21 actually rates or incidences of harm occurring.
22 So catheter-associated urinary tract

1 infections -- no one wants one of those, right?

2 Q. Pass.

3 A. Yeah. One of those --

4 (Laughter.)

5 THE WITNESS: We all pass.

6 Pass around the table.

7 ATTORNEY CRAIN: See, Kim.

8 You like -- you like coming to a
9 deposition with me.

10 ATTORNEY BLAIR: You got me.

11 THE WITNESS: We -- one of
12 the founding principles that our
13 technical expert panel came up with at
14 the very beginning and has since
15 affirmed continuously is that
16 hospitals should basically get equal
17 credit or equal consideration -- let's
18 say equal consideration for the
19 processes and structures they're
20 having in place. You can kind of
21 think of it as, like, their effort to
22 reduce harm and then, like, the actual

1 harm, right.

2 There were some concerns
3 early on that if we just looked at
4 outcomes, that could be frustrating
5 to hospitals because it can take a
6 long time to change some of those
7 rates, or maybe -- there are just
8 various complexities related.

9 So they really just wanted
10 to basically say try really hard, and
11 we'll consider that. And also, like,
12 we're going to look at how that
13 worked out and -- and we're going to
14 consider -- we're going to consider
15 that.

16 Does that make sense?

17 BY ATTORNEY CRAIN:

18 Q. Yes --

19 A. Okay.

20 Q. -- no; it does.

21 A. Okay. So -- so in thinking about
22 the types of hospitals that don't get graded,

1 it's related to the fact that in that outcomes
2 bucket, that outcomes domain I talked about,
3 virtually all of the measures come from the
4 Centers for Medicare & Medicaid Services, or
5 CMS.

6 And those measures are only
7 available for hospitals that participate in
8 something called the IPPS program. It's the
9 Introspective [sic] Payment -- there's another
10 P. But, basically, it's the agreement that CMS
11 enters into with hospitals in order to get
12 reimbursed for the care and services provided
13 to traditional Medicare patients, right, so
14 Medicare fee-for-service patients.

15 Because of that, critical access
16 hospitals, for example -- they'll participate
17 in the traditional Medicare payment structure,
18 so they wouldn't be required by Medicare to
19 report on those measures, and we wouldn't have
20 data.

21 Pediatric hospitals only care for
22 pediatric patients. They would typically have

1 Medicaid, not Medicare, so they're not included
2 in that IPPS program -- Veterans Administration
3 hospitals, Indian Health Services hospitals,
4 et cetera.

5 Additionally, though, there's other
6 general acute care hospitals that otherwise are
7 participating in the program, but because they
8 may be specialized -- like, we mostly or always
9 care for cancer patients, or we mostly or
10 always care for surgical patients -- because of
11 the nature of the patients who are included in
12 these measures, they would never have
13 information available, right. And this is,
14 like, oncology hospitals, certain types of
15 orthopedic surgery hospitals where, like,
16 the -- their scope of service is quite narrow.

17 So that generally describes the
18 type of hospitals that aren't assigned Safety
19 Grades, and it's due specifically to CMS'
20 policy on who they mandate to report on these
21 measures.

22 Does --

1 Q. Got it.

2 A. -- that make sense?

3 Q. No; it's helpful.

4 I --

5 A. Okay.

6 Q. -- so is it -- am I understanding
7 this right that those buckets of hospitals --
8 there just isn't enough data to reliably --
9 reliably grade?

10 A. There isn't outcomes data -- so
11 there isn't outcomes data. Again -- so going
12 back to the two buckets, because each bucket is
13 worth 50 percent of the overall grade, the panel
14 would not -- would not be supportive of not
15 having any outcomes measures, right.

16 Not to say the processes and
17 structures aren't important, but, really,
18 they -- they really want those outcomes. And
19 those outcome measures would not be available.

20 Q. So you're missing half, essentially,
21 of the equation?

22 A. Yeah. Yes.

1 Q. There are other minimum data
2 requirements, too, right?

3 A. Correct.

4 Q. Can you walk us through that?

5 A. Sure.

6 One of the measures that we use to
7 calculate the Safety Grade in that outcome
8 measures bucket is called PSI 90. It's a
9 patient safety composite also developed by
10 AHRQ, however, calculated by CMS. It, in and
11 of itself, includes 10 individual PSIs.

12 So we call them -- there's 10 child
13 PSIs. Each of those 10 child PSIs has a rate
14 calculated. There's a weight --

15 (Sotto voce discussion between the
16 certified stenographer and the
17 witness.)

18 (As the certified stenographer
19 seeks clarification, colloquy will
20 not be captured on the written
21 record.)

22 THE WITNESS: This is a

1 Dr. Seuss.

2 For each of those individual
3 child PSIs, a rate, R-A-T-E, is
4 calculated, then a weight,
5 W-E-I-G-H-T, is assigned for an
6 overall composite.

7 Because that one CMS measure
8 includes these 10 component measures,
9 in the Hospital Safety Grade
10 weighting formula, it receives about
11 15 percent as the standard weight.
12 So hospitals that are missing a score
13 for PSI 90 don't receive a Hospital
14 Safety Grade.

15 Do you want me to keep
16 going, or did you have a question?

17 BY ATTORNEY CRAIN:

18 Q. There -- there are two more, right?

19 A. Yes. I was going to keep going, but
20 it looks like you had a question -- okay.

21 Q. Yeah. I was going to go to those
22 next, so feel free.

1 A. Okay. I'm good at reading nonverbal
2 cues.

3 Q. I'm good at making them.

4 (Laughter.)

5 THE WITNESS: In addition to
6 that, hospitals missing measure scores
7 for more than six process and
8 structural measures, hospitals missing
9 measure scores for more than five
10 outcome measures are also not graded.

11 And this typically will
12 include, like, very small, rural
13 hospitals that aren't critical access
14 hospitals but could be a critical
15 access hospital where their volumes
16 are so low they typically are missing
17 too many outcome measures in order to
18 receive a Hospital Safety Grade.

19 BY ATTORNEY CRAIN:

20 Q. And what about the process measures?

21 A. There are not many hospitals in the
22 U.S., frankly, who are missing too many process

1 measures, I will say, with one exception. In
2 that process and structural measure bucket,
3 right, we include five patient experience
4 measures that come from CMS. It comes from a
5 survey instrument for patients called HCAHPS.
6 It's, like, the healthcare Consumer Attitudes
7 [sic] -- don't ask me the rest of it, but it's
8 basically why you were at the hospital. You get
9 discharged. When you get home, they send you a
10 survey.

11 There are some hospitals, due to
12 small volume, where enough patients don't
13 return the survey. You can't make patients do
14 the survey. Enough patients don't do the
15 survey.

16 So in those instances, if they're
17 missing patient experience scores for those
18 five measures and then, say, they don't operate
19 an ICU and maybe they're missing data for one
20 other measure -- but it's very rare. Very
21 rare.

22 Q. Those aren't, though, the process

1 measures, are they?

2 A. The five --

3 Q. HCAHPS.

4 A. -- HCAHPS patient experience
5 measures are included in the process and
6 structural measure domain --

7 Q. Okay --

8 A. -- in that bucket --

9 Q. -- got it.

10 Okay.

11 A. -- yes, correct. They're five of
12 the 12 measures included in that bucket.

13 Q. So there are 12 process and
14 structural measures, correct?

15 A. Correct. And 10 outcome measures.

16 Q. And 10 outcome measures?

17 A. Yes.

18 Q. If a hospital does not respond to
19 Leapfrog's survey --

20 A. Yes.

21 Q. -- how many process and structure
22 measures does Leapfrog not have survey data for?

1 A. Measures or measure scores?

2 Q. Process -- tell me the difference.

3 A. Sure.

4 So for -- for determining the
5 Hospital Safety Grades, since its inception
6 back in 2013, we've always used the term
7 "measure scores." And the reason is because
8 when we first started doing the Hospital Safety
9 Grade and the expert panel were setting out
10 some guidelines for us to follow, they wanted
11 to be able to include -- again, because we're a
12 national not-for-profit, we're trying to do a
13 public service -- as many hospitals as
14 possible. And so they urged us to identify as
15 often as we could both primary and secondary
16 data sources that may be available.

17 And so while the primary and
18 secondary data sources have varied over the
19 years, we look for scores among -- or across
20 those things.

21 Q. So to that point --

22 A. Sure.

1 Q. -- can we talk generally about what
2 that means?

3 A. Yes.

4 Q. So can you give us just a clean --
5 like, you -- what is your view of what "primary
6 data source" means?

7 A. So the primary data source is
8 actually not a view I have; it's something that
9 we define.

10 So I don't want to be presumptuous,
11 but I assume you have the Safety Grade
12 methodology document in your pile.

13 Q. Is that helpful to you?

14 A. Could pull out a table?

15 Q. Absolutely.

16 A. I'm sorry.

17 Q. No, no, no. Please.

18 ATTORNEY CRAIN: You know
19 what --

20 THE WITNESS: I just think it
21 will --

22 ATTORNEY CRAIN: -- we've

1 been going an hour.

2 Should we take a break --

3 (Simultaneous unreportable

4 crosstalk.)

5 (Whereupon, as the certified

6 stenographer seeks clarification,

7 colloquy will not be captured on

8 the written record.)

9 THE WITNESS: If I'm not
10 allowed to ask for documents, just
11 tell me, and --

12 ATTORNEY CRAIN: You are
13 absolutely allowed to ask. Whether I
14 give it is a different question.

15 (Laughter.)

16 ATTORNEY CRAIN: But we will
17 give you that one --

18 THE WITNESS: Okay.

19 ATTORNEY CRAIN: -- let's --
20 we've been going about an hour --

21 THE WITNESS: Yes.

22 ATTORNEY CRAIN: -- let's

1 take a break. We'll tee that up and
2 come back --

3 THE WITNESS: Okay.

4 ATTORNEY CRAIN: -- after the
5 break. Yeah.

6 THE VIDEOGRAPHER: Going off
7 the record. The time is 10:10.

8 --oOo--

9 (Whereupon, a recess was taken from
10 10:10 a.m. EDT to 10:30 a.m. EDT.)

11 --oOo--

12 --oOo--

13 (Danforth Deposition Exhibit Number
14 3, Leapfrog Hospital Safety
15 Grade, Scoring Methodology, Spring
16 2025, Bates stamped
17 LEAPFROG00217511 through
18 LEAPFROG00217537, marked for
19 identification, as of this date.)

20 --oOo--

21 THE VIDEOGRAPHER: Going back
22 on the record. The time is 10:30.

1 BY ATTORNEY CRAIN:

2 Q. Good?

3 Okay. Great.

4 Ms. Danforth, welcome back.

5 Before the break, we were
6 starting to talk about the methodology of the
7 Safety Grade --

8 A. Yes.

9 Q. -- correct?

10 And just, again, wait for me to
11 finish the question before you say yes or no.

12 Just to -- to start -- so we
13 premarked this Exhibit 3. And on the front
14 page, you'll see it says, Leapfrog Hospital
15 Safety Grade, Scoring Methodology, Spring 2025
16 Safety Grade.

17 Do you see that?

18 A. Yes.

19 Q. Was this the document you were
20 asking to see before the break?

21 A. Yes.

22 Q. Okay. And I had asked you for your

1 view of what primary data is, and I think you
2 were going to tell me the definition from this
3 document, right?

4 A. Yes. I just thought it would be
5 helpful.

6 Q. Absolutely.

7 So tell me -- which page would
8 you like to go to?

9 A. We're going to go to Page 4 --

10 Q. Okay.

11 A. -- of this document. And it looks
12 like this is printed front to back --

13 Q. Yep.

14 A. -- so just going back one step, I
15 described those two buckets --

16 Q. Yes.

17 A. -- those six process and structural
18 measures. That's the table that you see on
19 Page 4 and 5.

20 And then I described that there are
21 10 outcome measures, and that's the table you
22 see on Pages 6 and 7.

1 And then I described that one of
2 the measures we use in the outcome measures
3 bucket is called that CMS PSI 90 and that it
4 included those 10 child measures. And that --
5 those 10 child measures are listed on Page 8.

6 Q. Um-hum --

7 A. Okay.

8 Q. -- yep.

9 So where's the definition of
10 what primary data is?

11 A. Sure.

12 Q. Just to focus on my question.

13 A. There is no definition. These
14 primary and secondary data sources in this
15 table -- so moving left to right, the second
16 column, Primary, the third -- fourth column
17 labeled Secondary Data Sources -- this is how
18 the data has always been represented.

19 I couldn't speak exactly to when
20 this table first got created --

21 Q. So I -- I want to just cut you off
22 there just before we go to a different direction

1 for my question.

2 A. Sure.

3 Q. My question is -- I just want a
4 definition so we're on the same page --

5 A. Sure.

6 Q. -- what is primary data?

7 A. So a primary data would indicate if
8 this is available, we'll use it; otherwise,
9 we'll go to the next column --

10 Q. Okay.

11 A. -- labeled Secondary Data --

12 Q. So I --

13 A. -- chronologically.

14 Q. -- I had understood that primary
15 data, as defined at least scientifically, as the
16 data that a researcher collects themselves for a
17 specific purpose.

18 Is that a fair definition?

19 A. I am not myself a researcher. I
20 honestly couldn't speak to whether or not that's
21 the case or not. The way I'm using it and
22 describing it in this context doesn't

1 necessarily come from how someone doing a random
2 control trial study might describe it.

3 I believe these original terms,
4 again, came from our original expert panel,
5 indicating that if this was available, we'd use
6 it; otherwise, we'd move on to see if a
7 secondary data source was available.

8 Theoretically, there could be a
9 third, or a tertiary, data source.

10 Q. So -- then let's -- do you have a
11 definition of what a secondary source is?

12 ATTORNEY BLAIR: Objection --

13 THE WITNESS: In the context
14 -- I'm sorry.

15 ATTORNEY BLAIR: -- objection
16 to form.

17 THE WITNESS: I can speak to
18 it in the context of my programs.

19 Again, I'm not a researcher.

20 BY ATTORNEY CRAIN:

21 Q. What does it mean to you -- what
22 does secondary data mean to you?

1 A. Yeah. Specifically in this context,
2 it means if what's in the primary data source
3 column is not available, we would move to the
4 second column, that literally.

5 Q. So Leapfrog, over the 13 years since
6 it started issuing the Hospital Safety Grades,
7 has used different types of secondary data
8 sources; is that correct?

9 A. Yes.

10 Q. And I just want to go through a
11 couple of them to see if we're on the same page
12 about what -- what they are.

13 A. Okay.

14 Q. Is CMS data a secondary data source?

15 A. Not always. Oftentimes -- then
16 that's why I thought it would be helpful to
17 look --

18 Q. Yeah.

19 A. -- at the chart. It's a primary
20 data source. And in some cases, like with these
21 HCAHPS measures, it's the sole data source.

22 Q. But CMS data is not collected by

1 Leapfrog, right?

2 A. Correct.

3 Q. Okay. It's collected by CMS,
4 correct?

5 A. Correct.

6 Q. And it's not collected to inform
7 Leapfrog's grading process, correct?

8 A. Can you repeat the question?

9 Q. I'm asking about the purpose of why
10 CMS collects its data.

11 CMS does not collect its data
12 to help Leapfrog grade hospitals, correct?

13 A. Correct.

14 Q. It -- it collects its data for a
15 different purpose, right?

16 A. Correct. It makes it publicly
17 available --

18 Q. Yes.

19 A. -- yeah.

20 Q. Then other forms of secondary data
21 that Leapfrog has used in the past -- and,
22 again, I just want to get on the same page --

1 A. Yes.

2 Q. -- the American Hospital Association
3 data that Leapfrog used to use, right?

4 A. Correct.

5 Q. And tell me just a little bit -- so
6 that's AHA, right? The
7 American Hospital Association?

8 A. Yes.

9 (Laughter.)

10 BY ATTORNEY CRAIN:

11 Q. Yeah. Sorry. We're going to have a
12 lot of aha moments today.

13 A. I was like, the '80s band?

14 (Laughter.)

15 BY ATTORNEY CRAIN:

16 Q. So Leapfrog, for a time, used
17 American Hospital Association data to inform its
18 methodology, correct?

19 A. We did.

20 Q. And that was a form of secondary
21 data, right?

22 A. Correct.

1 Q. Leapfrog also used certain averages
2 or means to -- to inform its methodology at
3 times, right?

4 ATTORNEY BLAIR: Objection to
5 form.

6 THE WITNESS: At times, our
7 imputation methodology has included
8 the use of averages or means, correct.

9 BY ATTORNEY CRAIN:

10 Q. And that's the secondary data in
11 that context, right?

12 A. Correct.

13 Q. Okay. Leapfrog has also used
14 historical scores as secondary data, right?

15 A. As part of our imputation
16 methodology --

17 Q. Yes.

18 A. -- only, correct.

19 Q. And I just want to make sure we're
20 not crossing wires here.

21 Is it fair to say that -- the
22 imputation methodology is the process by which

1 secondary data is imputed into the score,
2 correct?

3 ATTORNEY BLAIR: Objection to
4 form.

5 BY ATTORNEY CRAIN:

6 Q. If you don't understand, I can
7 clarify that.

8 A. If you can ask the question again.
9 I --

10 Q. Yeah.

11 A. -- I apologize. It's not that I
12 don't necessarily understand what you're asking,
13 but you're describing something in terms that
14 I've never heard it described before. Using
15 words that I know, I just want to make sure I
16 answer you correctly.

17 Q. For sure.

18 A. Okay.

19 Q. I'm trying to figure out the
20 relationship between the imputation
21 methodology --

22 A. Yes.

1 Q. -- or model --

2 A. Yeah.

3 Q. -- and secondary data.

4 A. Sure.

5 Q. The imputation model is like a
6 structure, right?

7 A. Yes.

8 Q. And it's a structure by which
9 Leapfrog takes secondary data and imputes it
10 into the Safety Grade --

11 ATTORNEY BLAIR: Object --

12 BY ATTORNEY CRAIN:

13 Q. -- methodology; is that right?

14 ATTORNEY BLAIR: -- objection
15 to form.

16 THE WITNESS: It's a
17 structure by which Leapfrog imputes it
18 into the Safety Grade . . .

19 I would say that we use our
20 imputation model developed by our
21 national expert panel to assign
22 measure scores when primary data is

1 not available. I'm not clear enough
2 on your question to know if we're
3 saying the same thing or not, but
4 what I just described is accurate.

5 BY ATTORNEY CRAIN:

6 Q. Fair enough. Okay.

7 I'm just trying to think if
8 we're on the same page or not.

9 A. Can I give an example?

10 Q. A short one. A slow one to Cindy's
11 point.

12 ATTORNEY BLAIR: Slow and
13 short.

14 THE WITNESS: Okay.

15 If we're missing a measure
16 score for one of these measures that
17 has a -- in this -- in the column
18 saying Secondary Data Source
19 Imputation Model Applied, then we are
20 imputing a measure score for that
21 measure.

22 Is that what you're saying?

1 BY ATTORNEY CRAIN:

2 Q. I think that's right.

3 A. Okay.

4 Q. I guess what I'm saying is it --
5 this column has confused me, candidly --

6 A. Understood.

7 Q. -- because it says "secondary data
8 source" --

9 A. Yes.

10 Q. -- and -- and really what, like, the
11 source would be is the mean or the AHA or the
12 historical data, right?

13 ATTORNEY BLAIR: Objection to
14 form.

15 THE WITNESS: No, that's not
16 correct.

17 BY ATTORNEY CRAIN:

18 Q. Okay. So tell me why that's not
19 right.

20 A. The source has historically been
21 since the inception of the Safety Grade -- or I
22 guess I would call it a source for the second

1 score. So it can include American Hospital
2 Association and data. It can include imputed
3 data. It does include data from the CMS Cost
4 Report. It's really any source where a
5 secondary -- where a measure score can be
6 determined, located, made available.

7 So it's not limited to those
8 examples you gave but definitely does include
9 those examples you gave as well as others. The
10 methodology for this program has been evolving
11 constantly. That's why we have a technical
12 expert panel --

13 Q. Sure.

14 A. -- so it may include other things in
15 the future that they deem necessary and
16 appropriate, but it certainly would also include
17 what you just described.

18 Q. Yeah.

19 A. Okay.

20 Q. So over the history -- so I guess
21 let me ask this question, just a year.

22 A. Yes.

1 Q. Approximately when did Leapfrog
2 start using an imputation methodology for at
3 least certain measures?

4 A. Years ago, I would estimate, but we
5 need to look through the detailed methodology --

6 Q. Yeah.

7 A. -- document.

8 Q. Just your best understanding.

9 Let me -- let me triangulate
10 you --

11 A. I think -- oh.

12 Q. -- if this might help, let me
13 triangulate you.

14 In, I think, approximately --
15 we'll get to documents, but 2020 or 2021, the
16 AHA stopped licensing data; is that right?

17 A. Yes.

18 And that's what I was trying to
19 remember, that date.

20 Q. Was that the first time that an
21 imputation methodology was used, or was one
22 before?

1 A. That's what I'm trying to remember.

2 Q. Yeah.

3 A. So, again, not to overexplain, but
4 the American Hospital Association actually
5 administers a handful of different surveys at
6 different times of the year. We weren't using
7 data points from a single American Hospital
8 Association --

9 Q. Okay.

10 A. -- survey. We were using data
11 points across various American Hospital
12 Association surveys, including a HIT, or health
13 information technology, supplement that they
14 administer -- administered to hospitals as well.

15 I believe we stopped using all
16 American Hospital Association data. The last
17 time we got it, I think, was 2021. I was just
18 trying to remember.

19 Q. Yeah, and I --

20 A. It -- it would be accurate it's
21 around that time, yes.

22 Q. We'll come to documents. So I

1 wanna --

2 A. Yeah.

3 Q. -- it's either 2020 or 2021?

4 A. Yes.

5 Q. Just to triangulate with that

6 marker --

7 A. Yes.

8 Q. -- was there an imputed -- was there
9 an imputation model prior to that date that you
10 recall?

11 A. Not that I can remember --

12 Q. Okay.

13 A. -- no.

14 Q. Since 2021 --

15 A. Yes.

16 Q. -- can you identify any other
17 secondary data sources that we have not
18 discussed that Leapfrog had used in its scoring
19 methodology?

20 A. Since 2021, are there any additional
21 data sources . . .

22 We have used in the past something

1 called the CMS IMPACT, all caps, I-M-P-A-C-T,
2 file, which is different than what we use now,
3 called the CMS cost report. That would be the
4 only other source I can remember right now.

5 Q. Can I ask this question?

6 A. Um-hum.

7 Q. So on the chart, you saw down -- it
8 lists CMS in Primary.

9 A. Yes.

10 Q. And I know CMS, you just mentioned,
11 has been used as a secondary data source.

12 A. Correct.

13 Q. Why the -- why both?

14 A. Sure.

15 Can I refer to a page number?

16 Q. Of course.

17 A. So if you turn to Page 6.

18 So this is the table that includes
19 those 10 outcome measures: The only instance
20 where CMS is used as a secondary data source
21 are for these five -- what we call --
22 "healthcare-associated infections," so it's

1 CLABSI, or central line-associated bloodstream
2 infections, CAUTI, catheter-associated
3 bloodstream infections, surgical site
4 infections following colon surgery, MRSA, which
5 is --

6 Q. Don't want that?

7 A. -- an antibiotic resistant, and a
8 C. difficile, which is antibiotic -- and,
9 actually, that's the one you don't want.

10 Q. I don't want any.

11 A. Yes.

12 Through its annual Hospital Survey,
13 Leapfrog administers one of the largest
14 national NHSN groups in the country -- so NHSN
15 stands for the National Healthcare Safety
16 Network. It's currently administered through
17 the CDC, and it is a place where CDC does
18 national infection surveillance for these
19 healthcare infections healthcare things like
20 pneumonia, previously COVID.

21 Through participation in CMS' IPPS
22 program, which we talked about earlier,

1 hospitals that participate in that IPPS program
2 are required to report their infections into
3 NHSN, so you can't choose to do it or not. And
4 CMS gets the data directly from NHSN and
5 publicly reports it on its Care Compare
6 website.

7 As we were learning about this at
8 Leapfrog, we learned that we as a national not
9 for-profit could also administer an NHSN
10 hospital group similar to CMS, where instead of
11 waiting for CMS to publish the data on their
12 Care Compare website, hospitals would give us
13 rights to the same reports that CMS publishes,
14 which include no patient data, no patient
15 identifiers, thereby allowing us to report
16 those data alongside our other Leapfrog
17 Hospital Survey results.

18 Q. So I want to go back to my
19 definition of primary data, which -- which you
20 said was not yours, so I -- I take that, but --

21 A. Yes.

22 Q. -- recall that my definition was

1 data that a researcher seeks for a specific --
2 collects for specific purpose --

3 A. Okay.

4 Q. -- right?

5 In -- in these two columns, the
6 2024 Leapfor- -- Leapfrog Hospital Survey for
7 C. diff fits that definition, right?

8 ATTORNEY BLAIR: Objection to
9 form.

10 THE WITNESS: I'm sorry. Can
11 you repeat that?

12 BY ATTORNEY CRAIN:

13 Q. Yeah.

14 So Leapfrog collects this
15 information on -- itself, right?

16 A. No, and I'm not trying to be too
17 too --

18 Q. Okay.

19 A. -- technical --

20 Q. Yeah.

21 A. -- but, again, hospitals submit this
22 information to NHSN. They choose or choose not

1 to give us the right to access this data through
2 NHSN. We don't go out and collect it directly
3 from hospitals.

4 It literally is a downloadable
5 report from -- directly from NHSN that only
6 includes those hospitals that have completed
7 NHSN's data rights template.

8 Q. So why does this say 2024 Leapfrog
9 Hospital Survey, then?

10 A. Because for the purposes of the
11 Hospital Safety Grade, an important component of
12 the measures that we use in calculating the
13 grade is whether or not it's publicly available.
14 Leapfrog Hospital Survey results are publicly
15 available, and that's important because we like
16 to have hospitals be able to see their
17 performance on these measures prior to them
18 being used to calculate the Hospital Safety
19 Grade.

20 So hospitals have an opportunity
21 through the Leapfrog Hospital Survey to preview
22 their scored survey results before we publicly

1 report them on leapfroggroup.org. Hospitals
2 have an opportunity -- actually, an obligation
3 through CMS to review their CMS performance
4 measures 30 days before CMS makes it available
5 on their Care Compare website.

6 So the technical, I guess, place
7 where hospitals would know, Hey, where did
8 Leapfrog get this -- is through the Leapfrog
9 Hospital Survey and the corresponding website,
10 which is leapfroggroup.org.

11 Q. Okay. So I -- I guess I'm a little
12 confused.

13 The -- the data for CAUTI --

14 A. Um-hum.

15 Q. -- that's collected not by Leapfrog?

16 A. No; it's directly collected into
17 NHSN. We have a heavily password-protected
18 website that we log into following a very
19 arduous, called SAMS, S-A-M-S, process for the
20 Federal Government --

21 Q. Yeah.

22 A. -- we get a report four times a year

1 only from hospitals who have completed our rates
2 template and said, We give NHSN permission to
3 give this data to Leapfrog.

4 Q. So then why does this say 2024
5 Leapfrog Hospital Survey? That's what I --
6 that's the disconnect. I'm still not
7 understanding.

8 A. Because the mechanism that we have
9 to go through the process of administering the
10 group and obtaining the -- the rights from
11 hospitals is described in the Leapfrog Hospital
12 Survey --

13 Q. Okay.

14 A. -- I believe it's Section 7B of the
15 hard copy of the Survey --

16 Q. Yeah.

17 A. -- and it includes step-by-step
18 instructions of exactly how that process is
19 done.

20 Q. Okay. But just -- just to make
21 sure, again, that I'm understanding it right, on
22 CAUTI --

1 A. Yes.

2 Q. -- the -- the source of data that
3 Leapfrog uses is not the Leapfrog -- the
4 Hospital Survey?

5 ATTORNEY BLAIR: Objection to
6 form.

7 THE WITNESS: Technically for
8 both Leapfrog and CMS for these five
9 healthcare infection measures, the
10 source of data could be considered
11 NHSN.

12 BY ATTORNEY CRAIN:

13 Q. Okay.

14 A. It's the identical report for both.

15 Q. Got it. Okay.

16 A. And I'm not trying to be confusing.
17 I'm just trying to understand the question.
18 Sorry.

19 Q. No, no, I -- I'm learning live on
20 this question --

21 A. Yeah.

22 Q. -- so that's what I'm trying to

1 understand.

2 So why doesn't Leapfrog put
3 "NHSN" here?

4 A. We could put "NHSN," and CMS could
5 also put "NHSN" --

6 Q. Okay.

7 A. -- yeah.

8 Q. Okay. Okay.

9 A. That would -- that would be accurate
10 and correct as well.

11 Q. Is this inaccurate?

12 A. No.

13 Again, maybe 4,000 hospitals submit
14 data to NHSN. We don't have access to all
15 4,000 hospitals. So this is really meant to
16 convey that for those hospitals that have given
17 us permission -- and, again, the hospitals know
18 they have because they've gone through our
19 survey. That is how we're going to be getting
20 that data from them --

21 Q. Okay.

22 A. -- we can't just get data from NHSN

1 from every -- any hospital in the country.

2 It's -- that's just not how it works.

3 Q. Can I -- can we just go back to the
4 top of this document for a second?

5 A. Yes.

6 Q. And I have some questions about it.

7 Who crafted this originally, if
8 you know?

9 A. I don't know --

10 Q. Okay.

11 A. -- it's not been redesigned, only
12 updated over the years.

13 Q. No worries.

14 Did you have a role in the
15 revisions?

16 A. I review it every round.

17 Q. Every round.

18 And how often is it updated?

19 A. Twice a year --

20 Q. Okay.

21 A. -- I'm sorry. Four times a year.

22 Q. Why four times?

1 A. So through the Hospital Safety
2 Grade -- we have a process that's described in
3 painful details on the Hospital Safety Grade
4 website, where we first announce years in
5 advance what we call data snapshot dates so
6 hospitals know, These are the days we're going
7 to pull down your Leapfrog Hospital Survey
8 results, your CMS data, whatever the -- data is
9 available.

10 We then take that data inside,
11 Alex Campion -- who you met, my Safety Grade
12 program manager -- processes the data, runs it
13 through our scoring algorithm, we do a round of
14 QA and then we hold what we call a courtesy
15 data review period. It's usually a two- to
16 three-week period twice a year where we provide
17 a version of this document that includes some
18 extra pages I'm not seeing here called data
19 review instructions. And it basically tells
20 hospitals, You will go to this
21 password-protected website using a username and
22 password. You get to review all of the data,

1 so the measure scores for each of the measures
2 used to calculate your Hospital Safety Grade.
3 We provide hyperlinks directly back to the
4 source.

5 So in the case of these infection
6 measures where it says "Leapfrog Hospital
7 Survey," it would actually go back to
8 leapfroggroup.org --

9 Q. Got it.

10 A. -- so they could verify, I see a
11 standardized infection ratio for CLABSI of
12 0.118. Yes, that's correct. Leapfrog made
13 that.

14 So they have three weeks to
15 basically review the data, click the links. We
16 make an Excel-based calculator available so
17 they can re-create our calculations. And they
18 get what's called a preliminary numerical
19 score, a preliminary numerical score. But
20 there's no letter grade associated with that.

21 During the review period -- and
22 that is described in this document in the

1 latter pages -- if hospitals have closed, we
2 have to remove them from our data set. If
3 hospitals have what's called a CMS,
4 certification number change, or CCN, which is
5 how we match hospitals to that data that CMS
6 publishes, we would have to record that change,
7 and that may mean updating their measure scores
8 for those CMS measures.

9 Therefore, the data means, standard
10 deviations, et cetera, used for the overall
11 calculation are not finalized until after the
12 two- to three-week data review period. So this
13 document -- may I take you to a different page?

14 Q. I -- well, I -- I kind of want to go
15 just back to my question, if I could.

16 A. Right.

17 But that's why I'm saying I do this
18 four times a year --

19 Q. Four times --

20 A. -- not twice.

21 Q. -- a year. Okay.

22 A. Yeah.

1 So there's a preliminary version --

2 Q. Yeah.

3 A. -- and then a final version --

4 Q. Okay.

5 A. -- okay.

6 Q. Great.

7 A. Do you want me to show what changed?

8 Q. No --

9 A. Okay.

10 Q. -- I'm -- I'm good now.

11 A. Okay.

12 Q. A couple other questions on this.

13 A. Yes.

14 Q. So who is this written for?

15 A. Hospitals who are receiving a

16 Hospital Safety Grade --

17 Q. Okay.

18 A. -- as well as people, like the
19 public, who have questions about the Hospital
20 Safety Grade methodology as well as researchers
21 who use the Hospital Safety Grade data in
22 research, and others who are using or

1 referencing the Leapfrog Hospital Safety Grades.

2 Q. Is there any other place publicly
3 available that describes Leapfrog scoring
4 methodology?

5 A. I would not know the answer to that
6 question. There very -- there very well may be.
7 I -- I'm not sure.

8 Q. You're -- you're not the corporate
9 rep for websites, so I take that.

10 A. Okay.

11 Q. Are you aware of any --

12 A. No, I'm not.

13 Q. Okay. Let -- let me finish the
14 question --

15 A. Okay.

16 Q. -- if I could.

17 Are you aware of any other
18 location on Leapfrog's website -- strike that.
19 Let me -- let me start back.

20 This document, I'll represent
21 to you, we pulled off Leapfrog's website --

22 A. Yes.

1 Q. -- okay?

2 You're aware that it's
3 available on the website?

4 A. Yes.

5 Q. Are you aware of any other document
6 or website where the scoring methodology is laid
7 out for the public?

8 ATTORNEY BLAIR: Objection to
9 form.

10 THE WITNESS: On the Hospital
11 Safety Grade Web site, there's one to
12 two places where the methodology is
13 described in more of a summary
14 format --

15 BY ATTORNEY CRAIN:

16 Q. Okay.

17 A. -- and is not a PDF. So I don't
18 know if there are other PDF documents available,
19 but there are two Web pages that generally
20 describe -- and the process of describing the
21 Safety Grade to the public in a more summary
22 way, and then we linked the more detailed

1 document.

2 So if that's what your question is,
3 then the answer is yes.

4 Q. The answer is yes. Okay. So let --
5 let me just -- because it was a long question.

6 When you -- do you -- when you
7 say there are other websites that summarize at a
8 high level, what are those websites?

9 A. Other Web pages --

10 Q. Web pages, yeah.

11 Which ones?

12 A. -- on the Hospital Safety Grade
13 website.

14 Q. Do you remember their title at all?

15 A. If you showed me a screenshot of the
16 home page, I would be able to immediately locate
17 it. I can't verbatim recite it off the top of
18 my head.

19 Q. Okay. Do you recall whether it
20 describes how the imputation methodology works?

21 A. It describes that we use imputation.
22 Probably not in the detail we have here --

1 Q. Okay.

2 A. -- correct.

3 Q. So is it fair to say that for a
4 patient to understand how a hospital imputes --
5 how Leapfrog -- strike that. Let me fix that.
6 Boy, just all over the place.

7 Is it fair to say that for a
8 patient to understand how Leapfrog imputes
9 scores to non-participating hospitals, they need
10 to read this document, Exhibit 3?

11 ATTORNEY BLAIR: Objection to
12 form.

13 THE WITNESS: No.

14 BY ATTORNEY CRAIN:

15 Q. Where else can they get that
16 information?

17 A. I'm going to describe the Web
18 page -- again, please -- this is not verbatim.

19 Q. Okay. Fine.

20 A. -- whenever you are looking at a
21 Hospital Safety Grade, you will see their
22 performance on each of the measures represented

1 both numerically as well as using gas gauge
2 icons. Anytime a score has been imputed, it's
3 marked by an asterisk using the exact same size
4 font as the score itself.

5 And there's a note, I believe, in
6 red font; but, again, please -- without it in
7 front of me --

8 Q. Let me -- let me stop you there. I
9 don't mean to cut you off, but we have a
10 document that I think will help you.

11 A. Okay.

12 ATTORNEY CRAIN: So let's
13 mark this as Exhibit 4.

14 Thank you.

15 --oOo--

16 (Danforth Deposition Exhibit Number
17 4, Leapfrog Web page, Delray
18 Medical Center, marked for
19 identification, as of this date.)

20 --oOo--

21 THE WITNESS: Thank you.
22

1 BY ATTORNEY CRAIN:

2 Q. It's not a memory test. Kim and I
3 have discussed.

4 A. Yes.

5 ATTORNEY CRAIN: So this is
6 Exhibit 4.

7 CERTIFIED STENOGRAPHER: Let
8 me mark it.

9 ATTORNEY CRAIN: No worries.
10 Thank you.

11 (Sotto voce discussion.)

12 BY ATTORNEY CRAIN:

13 Q. So I've given you Exhibit 4.
14 I assume you recognize this
15 document?

16 A. Yes. Thank you.

17 Q. Yeah. So let me just go back to my
18 question, and I wanted to understand -- is there
19 another website where a patient can understand
20 how the imputation model imputes a grade?

21 ATTORNEY BLAIR: I'm just
22 going to -- you keep saying "website,"

1 and -- are you asking her if there are
2 other people somewhere in the world
3 that put their scoring methodology on
4 it and not Leapfrog --

5 ATTORNEY CRAIN: No, I --

6 ATTORNEY BLAIR: -- or you
7 mean a Web page? That's what I'm
8 getting confused at.

9 ATTORNEY CRAIN: Fair enough.

10 ATTORNEY BLAIR: Sorry. And
11 I -- I would have just objected to
12 form, but I just wanted to make --

13 ATTORNEY CRAIN: No, no, no.
14 It's -- I --

15 ATTORNEY BLAIR: Okay.

16 ATTORNEY CRAIN: -- I
17 appreciate it. I very much appreciate
18 it.

19 BY ATTORNEY CRAIN:

20 Q. Let me -- let me establish some
21 ground rules on this discussion so we're on the
22 same page.

1 A. Okay.

2 Q. When I'm talking about the Web page
3 here --

4 A. Okay.

5 Q. -- or the website, interchangeably,
6 I'm referring to hospitalsafetygrades.org
7 [sic] --

8 Do you know what that website
9 is?

10 A. Yes.

11 Q. -- and any of its subpages.

12 A. Perfect.

13 Q. I'm also referring to hospital --
14 to -- leapfroggroup.org, I think, is Leapfrog's
15 other website?

16 A. Yes.

17 Q. And is there a third?

18 A. No.

19 Q. Okay. So those are the two websites
20 I'm talking about --

21 A. Okay.

22 Q. -- as the top and any page that

1 falls underneath that.

2 We're all on the same page?

3 A. Yeah.

4 Q. Okay. So my question is, With that
5 as our universe --

6 A. Yes.

7 Q. -- is there any other page besides
8 Exhibit 3, the scoring methodology document --

9 A. Yes.

10 Q. -- that describes how Leapfrog
11 imputes a score for nonparticipating hospitals?

12 Do you understand my question?

13 A. I did --

14 Q. Okay.

15 A. -- and I was desc- -- I was
16 describing --

17 Q. Yeah. Let me -- let me take you
18 there. Just -- we'll get there.

19 A. Yes.

20 Okay.

21 Q. You were describing what I think is
22 Exhibit 4; is that right?

1 A. Yes.

2 Q. And Exhibit 4 is the
3 Delray Medical Center's Safety Grade page.

4 Is that fair to say?

5 A. Yes.

6 Q. Okay. And on the Safety Grade page,
7 I think you were going to Page 2, where it talks
8 about the hospital score.

9 Do you see that? It's 15.

10 A. Yes.

11 Q. And there's a little asterisk,
12 correct?

13 A. Yes.

14 Q. And the asterisk says, The hospital
15 declined to report their performance on this
16 measure, so a score was assigned to reflect the
17 lack of information available.

18 A. Correct.

19 Q. Was that what you were referring to?

20 A. Yes.

21 Q. So now we're on the same page?

22 A. Yes.

1 Q. So my follow-up question --

2 A. Yes.

3 Q. -- is, How will a patient know how a
4 score was assigned?

5 A. I'm not following your question.

6 Q. So this page says a score was
7 assigned, correct?

8 A. Yes.

9 Q. If a patient wants to understand how
10 Leapfrog assigned that score --

11 A. Right.

12 Q. -- where do you get that
13 information?

14 A. Sure.

15 Let me answer the question and also
16 just reframe the page, if I could.

17 So --

18 Q. Well, can you start with answering
19 the question? And then we can reframe.

20 A. If a patient wants to know how we
21 assigned this specific score, that information
22 is available in the PDF that you have produced

1 for me, which is hyperlinked immediately in the
2 measure description. You can see the -- I think
3 it's a green --

4 Q. So I'll -- so I'll tell you that is
5 --

6 A. -- hyperlink.

7 Q. -- that is not correct. The -- that
8 -- that link goes to -- I can give you
9 Exhibit -- we can do Exhibit 5 -- goes to the
10 longer table, right?

11 A. Where the methodology lives,
12 correct.

13 Q. So let's do Exhibit 5. I just want
14 to be on the same page. I don't --

15 A. Sure --

16 Q. -- want to confuse you.

17 A. -- and I'll come back to my
18 response, if I could --

19 Q. Sure.

20 A. -- because I wasn't able to finish
21 it.

22

--o0o--

(Danforth Deposition Exhibit Number 5, Leapfrog Web page, Hospital Details, Delray Medical Center, marked for identification, as of this date.)

--o0o--

ATTORNEY CRAIN: And I'm
going to ask --

ATTORNEY BLAIR: This is 5?

ATTORNEY CRAIN: This is 5.

ATTORNEY BLAIR: Okay. Thank
you.

BY ATTORNEY CRAIN:

Q. We'll get there.

So Exhibit 5 --

A. Yes.

Q. -- you were -- going back to Exhibit 4, you were referencing For details on sources, click here --

A. Yes.

Q. -- right?

1 I will represent to you,
2 because I'm not showing it to you on a
3 computer --

4 A. Okay.

5 Q. -- that Exhibit -- that link goes
6 here (indicating), to --

7 A. Yes --

8 Q. -- Exhibit 5?

9 Okay --

10 A. -- that's correct.

11 Q. -- are you saying that this page,
12 Exhibit 5, says how a score was imputed?

13 A. No. I'm saying that's where the
14 link to the full PDF document that you showed me
15 is located.

16 Q. Okay. So the link to Exhibit 3,
17 the -- the longer scoring methodology --

18 A. Yes.

19 Q. -- is on Exhibit 5?

20 A. Yes, and other pages as well, but
21 yes.

22 Q. Okay. On Exhibit 5 and Exhibit 4 --

1 A. Yes.

2 Q. -- does it say anywhere how the
3 score was imputed?

4 ATTORNEY BLAIR: I'm going to
5 object to form. We had this before,
6 but for --

7 ATTORNEY CRAIN: Yeah.

8 ATTORNEY BLAIR: -- whatever
9 reason, the link is not showing.

10 ATTORNEY CRAIN: So -- so I
11 will -- I will represent to counsel
12 this is how it prints to us every
13 time --

14 ATTORNEY BLAIR: Okay.

15 ATTORNEY CRAIN: -- but I
16 agree with you; there --

17 ATTORNEY BLAIR: Thank you --

18 ATTORNEY CRAIN: -- is a link
19 to the survey.

20 ATTORNEY BLAIR: -- so we can
21 say for the record there is --

22 ATTORNEY CRAIN: Yes --

1 ATTORNEY BLAIR: -- a link --
2 there is --

3 ATTORNEY CRAIN: -- for --
4 for --

5 ATTORNEY BLAIR: -- she is
6 not wrong?

7 ATTORNEY CRAIN: -- for the
8 record -- yeah, I'm agreeing --

9 ATTORNEY BLAIR: Okay.

10 ATTORNEY CRAIN: -- for the
11 record, on Exhibit 5, when you look
12 under a website, under Communication
13 about discharge -- you see that came
14 at the bottom on Page 3?

15 ATTORNEY BLAIR: Yeah.

16 ATTORNEY CRAIN: There's a
17 link to the survey methodology, the
18 28-pager.

19 For some reason -- we've
20 tried --

21 ATTORNEY BLAIR: It's fine.

22 ATTORNEY CRAIN: -- Control

1 P, we tried to say down.

2 It doesn't print that way,
3 but we agree with you; it's on the
4 website --

5 ATTORNEY BLAIR: Excellent.
6 Thank you.

7 ATTORNEY CRAIN: -- so no
8 dispute there.

9 ATTORNEY BLAIR: Okay.

10 BY ATTORNEY CRAIN:

11 Q. My question, though, is, On the --
12 In the --

13 A. Yes --

14 Q. -- four corners of this page --

15 A. -- I understand your question.

16 Q. -- where does it say how a score was
17 imputed?

18 A. We don't on that page --

19 Q. Okay. That's my question.

20 I just want to answer my -- we
21 have limited time --

22 A. Absolutely.

1 Q. -- today, so I want to focus you.

2 A. Sure.

3 Q. On Exhibit 4 -- is your back okay?

4 A. Yeah --

5 Q. Okay.

6 A. -- I'm going to stand for a little
7 while.

8 Q. If you need a break, any time.

9 A. I'm okay.

10 Q. Okay. On Exhibit 4 --

11 A. Yeah.

12 Q. -- same question --

13 A. Yeah.

14 Q. -- on Exhibit 4, does it say how a
15 score was imputed?

16 A. No.

17 Q. Okay. On Exhibit 3 --

18 A. Yes.

19 Q. -- the 28-page methodology --

20 A. Yeah.

21 Q. -- it does say how a score was
22 imputed, correct?

1 A. Correct. On the website, we only
2 represent that it's the worst possible score.

3 Q. Correct.

4 Now -- now -- now I'm answering
5 correct.

6 Is there any other Web page in
7 our universe -- Leapfrog's .org,
8 hospitalsafetygrade.org -- that says how a score
9 imputed?

10 A. There very well may be. I would not
11 be responsible for those other Web pages.

12 Q. I understand you're not the
13 corporate rep for that. I get that. And it's
14 not a memory test, but I'm asking for your best
15 memory today. And if the answer is I don't
16 know, I don't have -- that's fine.

17 But my question is, Are you
18 presently aware of any other page, besides the
19 28-page PDF that's Exhibit 3, where it explains
20 how a score is imputed?

21 (Whereupon, the witness reviews the
22 material provided.)

1 THE WITNESS: If I'm being
2 very technical, yes.

3 BY ATTORNEY CRAIN:

4 Q. What page?

5 A. So Leapfrog -- I think I described
6 earlier today we hold several -- what we call
7 "town hall calls," so basically free webinars.
8 We actually explain the scoring methodology for
9 the Safety Grade in detail.

10 Any webinar that we hold, we
11 record. So both an audio description as well
12 as the slides would have all of those details.
13 Those would live probably on both
14 leapfroggroup.org as well as
15 hospitalsafetygrade.org.

16 Additionally, I do presentations
17 for employer groups, consumer groups all the
18 time. And any time I talk about the Safety
19 Grade, I talk about imputation to a level of
20 detail. And all of those materials would also,
21 theoretically, be public on our website --

22 Q. Okay.

1 A. -- I'm just trying to be as thorough
2 as possible.

3 Q. And I appreciate that --

4 A. Okay.

5 Q. -- it's helpful to know the
6 universe.

7 My other question is, On
8 Exhibit 4 and 5, the Delray F page --

9 A. Yes.

10 Q. -- and the more detailed Delray F
11 page --

12 A. Yes.

13 Q. -- are any of those other materials
14 linked to those pages?

15 A. They're not.

16 Q. Okay.

17 If I'm -- strike that.

18 Okay. Let's see.

19 ATTORNEY CRAIN: Sorry. Give
20 me one second.

21 BY ATTORNEY CRAIN:

22 Q. Okay. So are you doing okay?

1 A. Yes.

2 Q. Okay. I'm mindful of your back.

3 A. That's okay.

4 Q. Okay. Let's talk a little bit about
5 the methodology. And you're more than welcome
6 to refer to Exhibit 3, if it's helpful.

7 A. Yes.

8 Q. So just to get the nomenclature
9 on -- and, again, I just want to just focus you
10 on my questions because we have limited time.

11 A. Yes.

12 Q. Can you tell me what "achieve the
13 standard" means?

14 A. Yes. For the purposes of the
15 Leapfrog Hospital Survey, we publicly report
16 hospitals' performance on those measures that
17 come from the survey in four performance
18 categories where achieve the standard is
19 represented as four cell phone bars;
20 considerable achievement is represented as
21 three; some achievement is two; limited
22 achievement is one.

1 Additionally, we use scoring terms,
2 such as "unable to calculate score," "does not
3 apply," "did not measure."

4 Q. And -- and just in lay terms, like,
5 what are they supposed to mean?

6 A. They're meant to denote progress
7 towards achieving Leapfrog's overall standard
8 for that measure, which is established by one of
9 those 12 independent technical expert panels.

10 So, for example, for C-sections, if
11 a hospital's C-section score on the Leapfrog
12 Hospital Survey website is represented as four
13 filled bars, or achieve the standard, it
14 literally means that their C-section rate was
15 23.6 percent or less.

16 So it's a way to visually and
17 descriptively denote progress towards achieving
18 our standard in a way that we hoped would be
19 motivating for hospitals to improve over time.
20 And that's why we have, like, some achievement
21 and then considerable achievement.

22 So it's a way to try to describe a

1 performance scale.

2 Q. And -- and what does limited
3 achievement convey?

4 A. It means that they did not achieve
5 the standard. So it's almost like a -- it can
6 be used as a catchall to mean they're working on
7 it; they're starting, but they're not there yet.

8 Q. Anything else?

9 A. It's basically, in a four-point
10 scale, I guess, the lowest performance.

11 Q. Okay.

12 A. Um-hum.

13 Q. I want to talk through -- I'm not
14 going to go through every one of the 22 because
15 we have limited time but a couple just to get us
16 on the same page.

17 A. Sure.

18 Q. Let's start with BCMA.

19 A. Yes, barcode medication
20 administration.

21 Q. You got it.

22 Just in lay terms for the

1 Court, what is BCMA?

2 A. Barcode medication administration is
3 both a technology and a process by which people
4 in hospitals, usually nurses, are supposed to
5 make sure they're scanning both your patient ID
6 band as well as a barcode on the medication that
7 you're about to receive to make sure they're
8 giving the right medication to the right patient
9 in the right dose at the right time.

10 It's a way to try to avoid the
11 wrong patient getting the wrong medicine or at
12 the wrong time or the wrong dose.

13 Q. The prover- -- tell me if this is
14 fair. The proverbial example I have is, like,
15 the patient with the penicillin allergy, not
16 giving them that.

17 Is that right?

18 A. No.

19 Q. No. Okay.

20 A. So for barcode medication
21 administration, it may catch that, but ideally,
22 it's computerized prescriber [sic]/add [sic] on

1 p. 48 order entry, which is an electronic system
2 that physicians can use to prescribe medications
3 where, hopefully, their clinical decision
4 support is advanced enough to actually stop that
5 medication even from being ordered.

6 BCMA can be seen as a second line
7 of defense if it gets through, but frankly, if
8 the CPOE isn't catching it, it's not likely the
9 BCMA would --

10 Q. Okay.

11 A. -- catch it either.

12 Q. So they work together --

13 A. They do --

14 Q. -- okay.

15 A. -- one is ordering medications and
16 one is administering medications, like,
17 literally before they put the -- the IV in your
18 arm.

19 Q. That's very helpful --

20 A. Yes.

21 Q. -- and just to -- so it's clear --

22 A. Yeah.

1 Q. -- the ordering is CPOE --

2 A. Correct.

3 Q. -- and the administration is BCMA?

4 A. Yes.

5 Q. That's very helpful.

6 So almost two sides of the same
7 coin?

8 A. Yes.

9 Q. Okay. Great.

10 You must have been a great
11 teacher.

12 So a couple questions about
13 BCMA --

14 A. Yes.

15 Q. -- does CMS register -- does CMS
16 measure BCMA?

17 A. Not today.

18 Q. Okay. Has it ever?

19 A. So CMS has what is called "safer
20 guides," S-A-F-E-R guides. They have some
21 requirements through the IPPS program that
22 hospitals attest to their use of the safer

1 guides.

2 The safer guides include guidelines
3 for the safe use of technology, quite
4 literally. It may include things like the use
5 of CPOE or the use of BCMA or the use of
6 infusion pumps. I would not be the
7 subject-matter expert on that, so I couldn't
8 say definitively.

9 Q. Okay. No. Fair enough.

10 And then we're going to talk a
11 little bit in a bit about nonparticipating
12 hospitals.

13 Do you understand what I
14 mean --

15 A. Yeah --

16 Q. -- when I say -- okay.

17 A. -- you mean that they're not
18 participating in a Leapfrog Hospital Survey --

19 Q. Exactly --

20 A. -- I'm with you.

21 Q. -- and just let -- let me finish,
22 and I'll let you finish for the -- for poor

1 Cindy.

2 ATTORNEY CRAIN: Sorry,

3 Cindy.

4 BY ATTORNEY CRAIN:

5 Q. Is it --

6 ATTORNEY CRAIN: You all

7 right?

8 CERTIFIED STENOGRAPHER: Yes.

9 ATTORNEY CRAIN: We'll get

10 there.

11 CERTIFIED STENOGRAPHER: Okay

12 .

13 BY ATTORNEY CRAIN:

14 Q. Is it accurate to say that for
15 nonparticipating hospitals, as we just defined
16 it, Leapfrog has no data on their actual BCMA
17 performance?

18 A. Correct.

19 Q. Okay. I want to go back to CPOE.

20 A. Yes.

21 Q. Does CMS register CPOE beyond the
22 safer guidelines that you mentioned?

1 A. Not that I'm aware of.

2 Q. Okay. Same question --

3 A. When you say "register," do you mean
4 measure?

5 Q. I do mean measure --

6 A. Okay.

7 Q. -- thank you. That's fair enough.
8 And if -- if you have questions anytime, ask.

9 A. Okay.

10 Q. So same question for CPOE: For a
11 nonparticipating hospital, does Leapfrog have
12 any data measuring the actual performance of a
13 hospital's CPOE?

14 A. No.

15 Q. Okay. IPS -- tell me what IPS is.

16 A. ICU physician staffing. So,
17 basically, it measures how hospitals are
18 staffing their adult medical-surgical ICUs and
19 pediatric medical-surgical ICUs, specifically
20 whether or not they're using board-certified
21 intensivists to care for those patients, because
22 it can reduce mortality in those units by

1 40 percent. It's really significant.

2 Q. Yeah.

3 And ICU -- I just -- I just --
4 I told Kim last week I just watched The Pitt.
5 So IC- --

6 A. Oh.

7 Q. -- that's the IC- -- ICU?

8 A. Yes --

9 Q. Yeah. Okay.

10 A. -- no, no; that's the emergency
11 department.

12 Q. I always confuse -- the -- the ICU
13 is where The Pitt sends folks?

14 A. Yes, yes.

15 ATTORNEY BLAIR: Several.

16 ATTORNEY CRAIN: Kim says
17 yes.

18 ATTORNEY BLAIR: Several
19 folks get sent there, I think.

20 ATTORNEY CRAIN: Fair. Not
21 all.

22 THE WITNESS: I think the

1 emergency department would send
2 patients to the ICU --

3 BY ATTORNEY CRAIN:

4 Q. Okay.

5 A. -- it actually can't work the other
6 way.

7 ATTORNEY BLAIR: No. That's
8 what I think, too.

9 ATTORNEY CRAIN: Yeah. Okay.
10 Great. We're on the same page.

11 BY ATTORNEY CRAIN:

12 Q. So back to IPS --

13 A. Yes.

14 Q. -- and we should -- we should kibitz
15 about The -- The Pitt afterwards, fabulous show
16 --

17 ATTORNEY BLAIR: Agreed.

18 BY ATTORNEY CRAIN:

19 Q. -- same question for IPS --

20 A. Yes.

21 Q. -- for a nonparticipating hospital
22 in the Leapfrog Hospital Survey, does Leapfrog

1 have any data for the IPS measure?

2 A. We do.

3 ATTORNEY BLAIR: Objection --
4 objection: form.

5 BY ATTORNEY CRAIN:

6 Q. Okay. What is the data?

7 A. The CMS cost report, which is the
8 data source I referred to earlier, includes some
9 information that hospitals are required to
10 provide regarding operating adult and/or
11 pediatric intensive care units and charges from
12 those units.

13 Q. Is it -- are the CMS cost reports
14 one-to-one with what Leapfrog collects in the
15 survey?

16 A. They are not.

17 Q. Okay. How do they differ, just
18 generally?

19 A. We get more information on our
20 survey.

21 Q. Okay. So there are at least some
22 pieces of information that you -- that Leapfrog

1 is missing for nonparticipating hospitals for
2 IPS.

3 Is there --

4 A. Correct.

5 Q. Okay. Hand hygiene -- everyone's
6 favorite.

7 Tell me about what "hand
8 hygiene" means.

9 A. On the survey?

10 Q. On the survey.

11 A. Leapfrog's hand hygiene standards
12 include several different elements. Again, this
13 is a structural measure, so assessing whether or
14 not have these things in place.

15 There are two core components of
16 the standard focused on what we call
17 "monitoring," so whether or not hospitals are
18 observing whether clinicians and others who
19 touch patients or touch things that will touch
20 patients, like surgical instruments, are
21 appropriately sanitizing their hands -- it's
22 not always washing. That's why I say

1 "sanitizing" -- based on World Health
2 Organization guidelines.

3 Additionally, the other core
4 component of five is something called
5 "feedback." And so not only are you actually
6 making sure people are doing the right thing at
7 the right time using the right substance,
8 whether it's soap and water or alcohol-based
9 hand sanitizer, but are you then taking those
10 data and getting them back to the right people
11 so they can see if improvement -- quality
12 improvement activities are needed or any kind
13 of training or remediation are needed.

14 The standard includes three other
15 elements focused on things like infrastructure
16 as well as culture and -- feedback, culture --
17 and there's another one --

18 Q. That's all right. Not a memory
19 test.

20 A. There are five. Oh, my gosh. I'm
21 so disappointed in myself.

22 Q. You studied up, I can tell.

1 A. Demote me -- no. I look at it every
2 day.

3 Q. You live this, yeah.

4 When you say "infrastructure,"
5 does that mean, like, sanitizers?

6 A. It means several things. It means,
7 like, are people making sure there's batteries
8 when they -- when they run out. It also means
9 sanitizers, yes. It's a number of things.

10 Q. And then same question: With
11 respect to hand hygiene --

12 A. Yes.

13 Q. -- for nonparticipating hospitals --

14 A. Yes.

15 Q. -- let me finish.

16 A. Oh.

17 Q. It's just hard for Cindy.

18 For -- for nonparticipating
19 hospital, for hand hygiene, does Leapfrog have
20 any data measuring their performance for hand
21 sanitizer?

22 A. No.

1 Q. Okay. I want to talk -- talk about
2 a couple more, safe -- the safe practices.

3 Do you know what I refer to
4 when I say "Safe Practice 1"?

5 A. Yes.

6 Q. Safe Practice 1, I have, is Culture
7 of leadership structures and systems measure --

8 A. Correct.

9 Q. -- does that sound right?

10 Okay. And if you need help, we
11 can go to document, but you got it.

12 Tell me again for the Court,
13 who is a layperson -- or a -- a lawyer -- an
14 imminent lawyer but not a doctor, I think, what
15 is Safe Practice Number 1, Culture of leadership
16 structures and systems.

17 A. There is an organization called the
18 National Quality Forum, and it is a organization
19 that, in the past, has convened subject-matter
20 experts. And in this case, they convened a very
21 large group to publish a report called Safe
22 Practices for Better Healthcare.

1 It includes 30 or 33 evidence-based
2 practices that not only hospitals but other
3 healthcare facilities should use specifically
4 to prevent adverse events, so without
5 preventable harm to patients.

6 Of those 30, 33 safe practices --
7 and that report has been updated with the
8 latest science at least two or three times --
9 long ago, Leapfrog included all of them, I
10 think, on the Leapfrog Hospital Survey at one
11 point.

12 Over time, because of advancements
13 in measurement, changes in evidence, we now, in
14 2025, only include two of the original National
15 Quality Forum-endorsed safe practices: Safe
16 Practice 1, which you just read: And another
17 called Safe Practice 2, which is culture,
18 measurement, feedback and intervention.

19 Q. Okay. And what do those two
20 measure?

21 A. Sure. The first one measures
22 whether or not hospitals have their leadership

1 engaged, specifically in patient safety
2 practices. So it's things like making sure
3 patient safety gets on the board agenda, making
4 sure that the board has resourced a patient
5 safety officer, someone whose job it is to
6 monitor patient safety.

7 Culture of safety refers to
8 something fairly specific in the healthcare
9 industry. It measures, in essence, whether or
10 not staff feel safe to speak up if they see
11 something going on. And it's most often talked
12 about -- if you're a nurse in the operating
13 room and you see the surgeon skip a step, do
14 you feel safe to speak up or if you basically
15 told leave him alone, let him do his job.

16 So it requires the hospitals every
17 two years, they're administering an
18 evidence-based culture of safety survey.
19 HRQ -- we've talked about them a lot today.
20 They put out one. And there are other tested
21 evidence-based tools specifically to measure
22 this.

1 The safe practice assesses whether
2 or not hospitals are doing this every two
3 years, presenting the results back to units and
4 different levels of leadership throughout the
5 organization, investing and making sure that
6 the survey can be done every two years and then
7 using the results to try to improve safety.

8 And sometimes that can be done in a
9 number of different ways, again, using --

10 Q. Yeah.

11 A. -- tool kits from ARC.

12 Q. So I'm going to boil it down. Just
13 tell me if this is fair.

14 A. Yes.

15 Q. Is this the -- like, the "see
16 something, say something" metric?

17 Fair?

18 A. It measures the -- the extent to
19 which -- yes --

20 Q. Yeah.

21 A. -- you feel safe if you see
22 something to say something.

1 Yes, that's actually very good,
2 yeah.

3 Q. I take the subway a lot.

4 A. Oh, okay. I take -- go by a lot of
5 airports.

6 Q. So when you say "AHRQ measure," does
7 it measure everything that's in this practice or
8 just certain parts of it?

9 A. HRQ has developed a survey tool that
10 measures culture of safety --

11 Q. Okay.

12 A. -- so earlier we talked about that
13 HCAHPS survey --

14 Q. Yeah.

15 A. -- I think I confused people -- that
16 patient experience survey.

17 HRQ has developed a culture of
18 safety survey. So a hospital would give it to
19 their staff --

20 Q. Yeah.

21 A. -- and they anonymously report.

22 Press Ganey does this, for example, on behalf of

1 hospitals, and then they give the results back.
2 Like, the nurses in the maternity care say that
3 teamwork is high and communication is great, but
4 in the emergency department, like on The Pitt,
5 maybe teamwork is bad and communication is poor.

6 Q. Yeah. Depends on the -- you know,
7 where in The Pitt.

8 So on -- so for this one --

9 A. Yes.

10 Q. -- Leapfrog does not use the AHRQ
11 Survey for its measures, right?

12 A. I don't think I explained this well.

13 Q. Okay. So, yeah, tell --

14 A. So --

15 Q. -- me where -- how I'm not
16 understanding.

17 A. -- in the hard copy of the survey,
18 this particular safe practice has maybe six
19 questions associated with it. The first
20 question is, Has your hospital in the last
21 24 months administered a standardized
22 evidence-based culture of safety survey to at

1 least 50 percent of its staff?

2 Q. I see.

3 A. HRQ has developed a survey that can
4 be used to say yes to Question 1.

5 Q. Got it --

6 A. Okay.

7 Q. -- that's my confusion.

8 A. I'm sorry.

9 Q. Okay. So the HRQ survey can be used
10 to inform a hospital's answers to the Leapfrog
11 survey?

12 A. To the first question -- exactly.
13 And then they get results back, and then -- yes.

14 Q. Got it. Okay. That's helpful.
15 Okay.

16 And then does Leapfrog -- is
17 Leapfrog able to get access to the HRQ surveys
18 or no?

19 A. So HRQ has developed a survey you
20 can download free on its website. It does not
21 administer the survey.

22 Q. Got it.

1 A. Other organizations like
2 Press Ganey --

3 Q. I see.

4 A. -- because it's basically a free
5 public recourse, Press Ganey can administer the
6 survey if the hospital asks them to do so.

7 Q. I see.

8 So there's no, like, central
9 repository where Leap- --

10 A. No, unfortunately.

11 Q. Just -- just -- I know it's
12 unnatural because of the deposition format, but
13 just make sure we're helping Cindy out. Sorry.

14 So there's no central
15 repository where Leapfrog can go to get this
16 type of AHRQ information?

17 A. No.

18 Q. Okay. Now, for Safe Practice 1 and
19 Safe Practice 2, the same question I've asked
20 before: For a nonparticipating hospital, does
21 Leapfrog have any data informing those measures?

22 A. No.

1 Q. Okay. And then the last one I want
2 to talk about is the Total Nursing Care Per --
3 Per Patient Day Measure.

4 A. Yes.

5 Q. Sound familiar?

6 Can you tell me again just at a
7 30,000-foot level what that measures?

8 A. It was developed by the American
9 Nurses Association, or the ANA. It includes a
10 set of specifications to allow hospitals to
11 report in a standard way on the total number of
12 patient days in specific units, not
13 hospital-wide -- a medical unit, a surgical
14 unit, a med-surg unit -- as well as specific
15 instructions to allow hospitals to report in a
16 standardized way the total number of nursing
17 hours in those units. It defines nursing hours,
18 inclusions and exclusions, direct patient care,
19 inconclusions and exclusions in the different
20 roles that are included in the measure.

21 So it's not just registered nurses.
22 It can also include nursing assistants and

1 something called LPNs, which are licensed
2 practical nurses.

3 Q. That was not quite the 30,000-foot,
4 but I appreciate the effort.

5 So -- so in terms of -- this is
6 measuring, essentially, how -- how -- nursing
7 staffing, more or less, right?

8 A. Yes.

9 Q. Okay. That's my 30,000-foot.

10 A. Sorry.

11 Q. That's okay. I just want us all to
12 be on the same page.

13 A. Yes.

14 Q. Then I'll ask again just for --
15 for --

16 A. Yes.

17 Q. -- completion.

18 For this measure, for the Total
19 Nursing Care Hours Per Patient Day Measure, if a
20 hospital does not participate in the survey,
21 does Leapfrog have any data to inform that
22 measure?

1 A. No.

2 Q. Okay. So we've gone through seven,
3 right? They -- they're the four im- -- what we
4 will ultimately call, I think, the "imputed
5 measures."

6 Does that mean -- we're on the
7 same page about that?

8 A. I understand that to --

9 Q. That --

10 A. -- mean CPOE, BCMA, hand hygiene and
11 ICU physician staffing.

12 Q. We're definitely on the same page.

13 And then the other three are
14 measures for which Leapfrog ultimately excludes
15 from the calculation of the Safety Grade for
16 nonparticipating hospitals?

17 A. Correct. There's no imputation.

18 Q. What's the difference? Why is that?

19 A. Thirty-foot level?

20 Q. Well, start at 30,000, and I'll --
21 I'll direct you down.

22 A. Oh, 30,000?

1 ATTORNEY BLAIR: Not 30.

2 BY ATTORNEY CRAIN:

3 Q. Not 30, no.

4 A. No. Now I'm paranoid. I'm, like,
5 Aah. Usually hospitals want, like, more
6 information, more detail, and that's who I'm
7 always talking to --

8 Q. Yeah.

9 A. -- so no one ever says --

10 Q. Give me the 30,000-foot level.

11 Yeah.

12 A. -- give me less.

13 A little while ago, I described the
14 Safety Grade of having those two buckets,
15 processes and structures, plainly, I hope.

16 Structures are things like do you
17 have a CPOE system? Do you have a barcode
18 medication system? And those are things where
19 because of the structure of the questions and
20 our hard copy of the survey, we can generally
21 assume today, and actually probably for the
22 past decade, that most hospitals in the

1 country -- and, actually, we know this from
2 getting the data previously from AHA -- would
3 at least say yes to the first question: Yes,
4 we have CPOE. Yes, we have BCMA. Yes, we're
5 doing something related to hand -- you know,
6 hand hygiene. Yes -- or, No, we have an ICU.

7 We don't need to infer that.
8 Again, we get that from the CMS cost report.
9 So I just want to make that separate from the
10 other three for a minute. But still, it's a
11 structural measure, either you have an ICU or
12 you don't. Either you have barcode medication
13 technology or you don't.

14 The other three measures, which we
15 don't have imputation method for -- Safe
16 Practice 1, Safe Practice 2 and Total Nursing
17 Hours Per Patient Day -- hopefully, the way I
18 described them to you implied they're not
19 structures. They're processes. One is
20 culture, right.

21 So to try to infer culture or Total
22 Nursing Hours Per Patient Day -- hospital unit

1 types vary so dramatically -- for example, the
2 Kaiser hospitals in California, all of their
3 patient care units are what's called mixed
4 acuity, so it's a mix of some general medical
5 patients, maybe some ICU patients. And there's
6 no way for us to know that in advance, right.

7 And, again, for the first three
8 measures I just described, we do have some
9 indication at least whether or not they were in
10 place because we used to get that information
11 from the American Hospital Association.

12 For the other three measures, I
13 don't feel that the expert panel ever felt like
14 there was a good other source or that those
15 would be measures that could reasonably be
16 imputed because they're not structures.
17 They're processes or culture.

18 Q. Couldn't you, though, for
19 nonparticipating hospitals just impose limited
20 achievement for those three?

21 A. If our expert panel gave us that
22 guidance, it's certainly something theoretically

1 we could do. They've just not given us that
2 guidance.

3 Q. And -- and why?

4 ATTORNEY BLAIR: Objection to
5 form.

6 THE WITNESS: For the reasons
7 I just described. I think in their
8 discussions, they've said that
9 structures are different than
10 processes.

11 BY ATTORNEY CRAIN:

12 Q. Do you recall a specific discussion
13 in any of those expert panel meetings where the
14 three measures -- Safety Practice 1, Safe
15 Practice 2 and Total Nursing Care -- were
16 discussed in assessing whether to include them
17 in an imputation model?

18 A. Only Safe Practice 2. Many, many
19 years ago, one of the experts on our Safety
20 Grade expert panel -- her name is Sara Singer.
21 She used to be at Harvard. She's now at
22 Stanford. She is a culture of safety

1 subject-matter expert. That's her area of
2 expertise.

3 In the very beginning of the
4 development of the Hospital Safety Grade, at
5 that time, I believe, to my recollection, she
6 had indicated culture of safety is not
7 something that could be inferred or imputed.

8 Q. At the very beginning?

9 A. Yes.

10 Q. So 2012ish?

11 A. I could -- I could not say exactly
12 when.

13 Q. Do you see where I'm -- that I'm a
14 little confused about? Because imputation, I
15 thought we had discussed, came into being after
16 the AHA decided not to license data in around
17 2021.

18 Are you saying Sara Singer
19 brought up this topic before?

20 A. Imputation is a common technique in
21 scoring methodologies and healthcare ratings.
22 Though it may not have been used in the actual

1 scoring methodology, it's a topic that was
2 always discussed.

3 Q. Yeah.

4 A. Do you want me to repeat that?

5 Q. Let me take one look-see.

6 Yeah. So it was -- your
7 recollection is it was discussed over several
8 years?

9 A. It can be discussed before it's
10 used. I've been talking --

11 Q. Yeah.

12 A. -- to my husband about taking a
13 vacation for years. We have yet to go.

14 Q. We have the same discussion. I -- I
15 hear you.

16 Okay. So let's -- let's take a
17 look -- just before we leave the methodology --

18 A. Yes.

19 Q. -- can you describe, let's say
20 15,000-foot, how are the different measures that
21 inform the Safety Grade weighted?

22 And you have the document if

1 you need it. Feel free.

2 A. The trick is keeping it at
3 15,000 feet.

4 There's a weighting calculation
5 also developed by the national expert panel
6 that includes four components. The first
7 component, I believe, is severity of harm,
8 so --

9 Q. Yeah. I --

10 A. -- some of these things could kill
11 you; some of them could just hurt you. The
12 second component -- and at this point, I am
13 actually going to --

14 Q. Page 18?

15 A. -- just to keep it short -- yes,
16 exactly.

17 The second -- so that's impact,
18 which includes the number of patients affected
19 and the severity of harm.

20 The other criteria is evidence, and
21 so either it's supported by suggestive or
22 clinical experience or experimental. It's

1 meant to differentiate between, like, maybe
2 measures that -- like a -- a -- like a closed
3 control group was used, which is hard in
4 medicine.

5 Opportunity is actually a
6 calculation, so it's like the actual -- it's
7 called standard deviation, but it basically
8 means across all hospitals' performance on,
9 say, central line-associated bloodstream
10 infections. Are the scores relatively in a
11 tight range or actually are they spread out in
12 a large range? If they're in a small range,
13 there's not that much room for movement, or, in
14 this case, we're calling it "improvement"
15 because they're already grouped or clustered
16 around a particular area. That would have a
17 low opportunity rating.

18 If it's a big range, then that
19 suggests that there is more opportunity for
20 improvement.

21 So like PSI 90, which we've talked
22 about a lot today, that measure is so heavily

1 risk adjusted for patient characteristics that
2 the range of scores are typically between just
3 under 1.0 and maybe 3.0. There's not that much
4 opportunity, right, within that very tight
5 range of scores, so that -- I'm just trying to
6 convey that concept.

7 The final criteria is what's called
8 the number of component measures. That fourth
9 criteria was only adopted when we added PSI 90
10 because the panel did not think that a measure
11 that included 10 separately endorsefully
12 specified measure should be treated as a single
13 measure.

14 Q. Got it. Okay. Yeah.

15 So then if you go to the next
16 page, 20 --

17 A. Yes.

18 Q. -- it has -- the standard measure
19 weights are the different percentages that each
20 of these measures are weighed at the last --

21 (Simultaneous unreportable crosstalk.)

22 THE WITNESS: That's correct.

1 BY ATTORNEY CRAIN:

2 Q. Okay. This has changed over time;
3 is that right?

4 A. So because of the nature of that
5 opportunity score I just described, which is
6 calculated, it changes between the preliminary
7 -- or it can change between the preliminary --
8 that courtesy Safety Grade review period I
9 described -- and then the final, and that's why
10 every round we do two versions of this. These
11 opportunity scores change even if we remove one
12 hospital because they closed --

13 Q. Got it.

14 A. -- two hospitals because they
15 closed.

16 And so that can impact very, very
17 slight changes in the overall weight, so,
18 again, that's why we produced the two
19 documents.

20 Q. Okay. And -- and going back to the
21 seven measures we've talked about.

22 A. Yes.

1 Q. So you see SP 1, SP 2 and Total
2 Nursing Care?

3 A. Yeah.

4 Q. For nonparticipating hospitals, am
5 I -- am I right in understanding that the weight
6 -- those weights are effectively redistributed?

7 A. They're reapportioned across other
8 measures within that specific domain for which
9 there is a measured score available, and that's
10 described in here.

11 Should I go to the page reference?

12 Q. Yeah. Let's go to that page.

13 Where -- where are you looking?

14 A. Page -- bottom of Page 23, top of
15 Page 24.

16 So, basically, how I described --
17 the expert panel really thought it was
18 important that the process and structural
19 measure domain stay at 50 percent, the outcome
20 measure domain stay at 50 percent. So if
21 you're missing a measure score on a process and
22 structural measure, none of that weight can

1 flow to the outcome measures.

2 Q. Got it.

3 A. It's constrained to that process and
4 structural domain bucket.

5 Q. Can -- can I just rearticulate to
6 make sure I understand?

7 A. Yes.

8 Q. You're saying that if you pull
9 something out of one bucket, the weight can't go
10 to the other?

11 A. Correct.

12 Q. Got it. That's helpful. Okay.

13 So -- so for -- now, but can it
14 go -- so SP 1 is a structural or process, right?

15 A. Process and structural measure,
16 correct.

17 Q. Its weight could then be
18 redistributed to handwashing?

19 A. Anything within that domain.

20 Q. Okay.

21 A. And we can go back to that table, if
22 that's helpful, but anything within that domain.

1 Q. Yeah. Okay. And do you know -- is
2 it in here what it's distributed --
3 redistributed to for nonparticipating hospitals?

4 A. Yes. That's what's described on
5 Page 23 and 24.

6 Can I -- can I read from the
7 document or not?

8 Q. Please, yeah, tell me where.

9 A. If you go to the bottom of Page 23,
10 you should see a subheader called Dealing with
11 Missing Data: Due to a variety of reasons, a
12 hospital may not have a measure score for all 22
13 measures. If a hospital is missing a measure
14 score for any measure (except for PSI 90;
15 hospitals missing PSI 90 are not graded), the
16 standard weight for that measure is
17 redistributed to the other measures in the same
18 measure domain.

19 The new measures -- I'm sorry --
20 the new weight for each measure within the
21 domain is calculated by reapportioning the
22 standard weight assigned to the measure with

1 the missing score to other measures with the
2 same domain.

3 For example, a hospital missing a
4 measure score for ICU physician staffing
5 because the hospital does not operate in adult
6 or pediatric IC- --

7 (Whereupon, as the certified
8 stenographer seeks clarification,
9 colloquy will not be captured on
10 the written record.)

11 THE WITNESS: ICU.

12 CERTIFIED STENOGRAPHER: Or
13 pediatric?

14 THE WITNESS: Yeah.

15 ATTORNEY CRAIN: In adult or
16 pediatric, yeah.

17 THE WITNESS: -- the standard
18 weight of 6.9 percent will be
19 reapportioned to the remaining 11
20 measures within the process and
21 structural measure domain --
22

1 BY ATTORNEY CRAIN:

2 Q. Okay.

3 A. -- and because this is -- I'm not a
4 mathematician, so, to me, complicated to read,
5 mathematically -- we don't make hospitals figure
6 it out. I described a calculator that's
7 available on that website. When you enter data,
8 all of the calculations happen very
9 transparently, and so they can see exactly how
10 those weights are redistributed.

11 Q. Yeah, it is -- it is -- agreed.
12 Okay.

13 ATTORNEY CRAIN: Let's set
14 this aside for a moment. We will come
15 back to it, so hang on to it. Sorry.

16 BY ATTORNEY CRAIN:

17 Q. Can we shift -- are you okay?

18 A. Yeah.

19 Q. Okay. If you need -- we're -- we've
20 been going an hour. Are you -- okay.

21 You're still good to go?

22 A. Um-hum.

1 ATTORNEY CRAIN: I was
2 thinking maybe we drive towards lunch,
3 okay, if that's good with everybody.

4 ATTORNEY BLAIR: That's fine.

5 THE WITNESS: Yeah.

6 ATTORNEY CRAIN: Okay.

7 BY ATTORNEY CRAIN:

8 Q. I want to talk a little bit about
9 the Hospital Survey --

10 A. Yes.

11 Q. -- and just -- because I think
12 you're the corporate representative for
13 Hospital Survey?

14 A. Correct.

15 Q. So start, again, 30,000-foot --

16 A. Yeah.

17 Q. -- what is the Hospital Survey?

18 A. Just so I'm clear, do I -- would I
19 answer these questions any differently as the
20 corporate representative? Because this is, I
21 think, the first time that you've prefaced a
22 question with that. I just want to make sure

1 I'm giving you the right answer.

2 Q. I -- so that's up to you. It's up
3 to you whether your own personal knowledge
4 differs from the corporation's --

5 A. Okay.

6 Q. -- I -- I don't know, I think, is
7 the answer.

8 A. Okay.

9 Q. You -- if you want to take a break
10 and consult with your counsel, I'm happy to --
11 to do that, but I -- I've been proceeding along
12 the topics -- like, for in -- we talked about
13 the survey methodology --

14 A. Right.

15 Q. -- and you were the corporate
16 representative for those topics. My -- my
17 expectation is you were talking, unless you told
18 me otherwise, as the corporate rep and in your
19 personal capacity, unless there's a divergence.

20 A. No.

21 And so I just wanted to make sure
22 that's appropriate for this as well.

1 So . . .

2 Q. Yeah. Let's -- let's just make sure
3 it's really clear because I probably should have
4 laid that out at the start.

5 A. Okay.

6 Q. My -- my working assumption is
7 because this is a combo deposition --

8 A. Yes.

9 Q. -- that unless you tell me
10 otherwise, and I'll give you an example to help,
11 that you're giving testimony for Leapfrog and
12 yourself.

13 Fair enough?

14 A. Yes.

15 ATTORNEY BLAIR: With one
16 caveat --

17 ATTORNEY CRAIN: Yes.

18 ATTORNEY BLAIR: -- to the
19 extent you're going to ask her about a
20 topic that is not laid out in the
21 30(b)(6) --

22 ATTORNEY CRAIN: For sure.

1 ATTORNEY BLAIR: -- she will
2 only be testifying to that.

3 ATTORNEY CRAIN: Absolutely.

4 BY ATTORNEY CRAIN:

5 Q. So I will give you an example just
6 so we're, again, on the same page --

7 ATTORNEY BLAIR: No, yeah, I
8 get it.

9 BY ATTORNEY CRAIN:

10 Q. -- when I asked you about the
11 website, Ms. Binder is the corporate rep for
12 that.

13 So you are -- from my
14 understanding, that is not the topic for which
15 you are the corporate rep, so I was asking in
16 your personal capacity. And I will try to be
17 clear as well, but if you have any questions,
18 just ask.

19 A. Understood. Thank you.

20 Q. And we can always take a break and
21 talk -- you can talk to your counsel, too.

22 Okay?

1 So with that understanding,
2 just tell me -- 30,000-foot, what is the
3 Hospital Survey?

4 A. The Leapfrog Hospital Survey is a
5 free annual voluntary survey where we collect
6 data on nationally standardized measures,
7 including patient safety measures, quality
8 measures, like maternity care and pediatric
9 care. And in the past, we also include measures
10 that are in a bucket called efficiency, and it's
11 things like readmissions. Today, no efficiency
12 measures are included on the Leapfrog Hospital
13 Survey.

14 Q. Okay. Did you have any role in
15 designing the survey originally?

16 A. I did not.

17 Q. Okay. It was already -- by the time
18 you came to Leapfrog, it had already been
19 created?

20 A. That's correct. Leapfrog was
21 founded in 2000, the first survey was mini --
22 administered in 2001 and then I came to Leapfrog

1 in 2009.

2 Q. At -- at -- generally, has it
3 changed significantly since your first
4 experience in 2009 with the survey?

5 A. It has.

6 Q. Can you tell me again, just
7 generally, how has it changed over time?

8 A. We have expanded the content of the
9 survey to include other important areas of
10 hospital care, mostly based on one of two
11 things: interests and stated importance from our
12 employer/purchaser members and our board of
13 directors. For example, we have now more
14 maternity care measures because employers and
15 purchasers pay for about a third of the births
16 in the United States, but also emerging patient
17 safety topics.

18 As I described earlier, an example
19 would include hospital boarding in the
20 emergency department, which no one talked about
21 10 years ago, and today is even represented on
22 television.

1 Q. Yeah. In The Pitt. It's just -- I
2 have to bring it up at the time.

3 ATTORNEY BLAIR: We have to
4 show it to the Judge.

5 ATTORNEY CRAIN: It has to be
6 there.

7 ATTORNEY BLAIR: Yeah.

8 ATTORNEY CRAIN: It was just
9 so good.

10 (Laughter.)

11 ATTORNEY CRAIN: So -- see,
12 we're just having fun.

13 ATTORNEY BLAIR: That's
14 right.

15 BY ATTORNEY CRAIN:

16 Q. So the Hospital Survey, is that
17 under your authority?

18 A. It is.

19 Q. And who is the person responsible
20 for -- like, who owns that under you?

21 A. I own that.

22 Q. Oh, you own it. Okay.

1 A. Yes.

2 Q. You don't have a direct report that
3 runs the survey?

4 A. I have various people who help out
5 with various aspects of the Hospital Survey,
6 including Matt Austin and our 12 expert panels;
7 however, at the end of the day, I review every
8 word in that survey before it goes out. The
9 same is true for the Leapfrog Ambulatory Surgery
10 Center Survey, the same is true for Exhibit 3 --

11 Q. Yeah.

12 A. -- that's been marked and the same
13 is true for the value-based purchasing program
14 methodology.

15 Q. So you review every page of the
16 Hospital Survey, each iteration?

17 A. Yes.

18 Q. Wow. How long does that take?

19 A. A long time. That's why I was so
20 disappointed in myself for not knowing that hand
21 hygiene system, right? I'll never forgive
22 myself. I may demote my own self on my way

1 home.

2 Q. I was pretty impressed before when
3 you cited the -- I think it was 6B. That was --
4 that was very impressive.

5 Okay. So just breaking down
6 who -- who owns it, I -- are you, yourself,
7 drafting the revisions, or you're reviewing the
8 work of others as they draft?

9 A. I'm reviewing the work of others as
10 they draft it, though I do draft some revisions
11 personally myself.

12 Q. Okay. And just in -- in the last
13 year or two, have you drafted any -- any
14 revisions personally?

15 A. In the last year or two, I have
16 drafted revisions personally, yes.

17 Q. About which topics?

18 A. Three of the more complex measures
19 on our survey are those American Nurses
20 Association measures. People think doctors are
21 tough. Nurses are tough.

22 The measures are so specific in

1 their definition of what direct patient care
2 is, what is included and excluded, that we've
3 had to go through several iterations of
4 clarifying the specifications in order to
5 ensure that we're collecting standardized,
6 high-quality data.

7 I have worked directly with
8 individuals at one of the leading nurses'
9 qualities registries to do that. I felt it was
10 so important and that the information was,
11 frankly, so complex that I should take a bigger
12 role in actually doing that myself, just for
13 integrity.

14 Q. And presumably, efficiency if you --

15 A. Yes.

16 Q. For the four imputed measures --

17 A. Yes.

18 Q. -- is there any particular person at
19 Leapfrog that's responsible for owning those
20 sections under you?

21 A. There are. For computerized
22 physician -- let me take a step back --

1 Q. Okay.

2 A. -- for every section of the Leapfrog
3 Hospital Survey and every section of the
4 Leapfrog Ambulatory Surgery Centers Survey,
5 because we have 12 different national expert
6 panels, someone on my team is assigned as a
7 liaison between Matt Austin, the panel and me.

8 The role of those individuals is
9 limited and specific. We are the ones
10 answering questions about measure
11 specifications and reporting periods. They are
12 responsible for identifying themes, suggesting
13 frequently asked questions, suggesting
14 revisions for the purposes of clarity. So
15 we're collecting standardized, accurate,
16 high-quality data.

17 If the expert panel makes a
18 decision, like we're going to change the
19 reporting period from 12 months to 18 months,
20 those individuals physically mark up the Word
21 document and track changes.

22 So for CPOE, it's Robyn Nabi. I

1 introduced her as one of my senior program
2 coordinators. For barcode medication
3 administration, it's Kathryn Stewart. I
4 introduced her as my director of healthcare
5 ratings. For hand hygiene, it's
6 Kathryn Stewart again, my director of
7 healthcare ratings. And for Total Nursing
8 Staff -- the nursing measure, it's Robyn Nabi,
9 who also oversees CPOE.

10 For these particular measures and,
11 frankly, many, many others on the survey,
12 however, even though we have assigned liaisons,
13 I tend to be extremely involved.

14 Q. Why is that?

15 A. It's important to me, as my role has
16 changed and evolved at Leapfrog, that I not lose
17 touch with getting feedback from the hospitals
18 and the ambulatory surgery centers. So I am on
19 help desk every day. Like, I want to hear what
20 people have to say. It's very important to me.

21 We want this to be as
22 straightforward as possible. And I put a high

1 value on data accuracy and integrity. And I
2 feel like if I move too far away -- not that my
3 team isn't excellent, that they do a good job,
4 but I need to be able to stand in front of a
5 hospital CEO at the end of the day and defend
6 all of these measures, not some of these
7 measures.

8 And so I guess I've made it just a
9 personal responsibility. It's certainly not
10 outlined in my job description.

11 Q. Extra credit.

12 (Laughter.)

13 THE WITNESS: Less sleep.

14 BY ATTORNEY CRAIN:

15 Q. Less sleep, yeah. I hear that.

16 Just talking about some of the
17 things you just mentioned -- so help desk --
18 what does that mean? What is the process? Can
19 you just tell me more what the help desk is?

20 A. Sure.

21 At Leapfrog, I think I described
22 when I was talking about some of my early work

1 there -- we used to use Thomson Reuters to
2 provide all of the technical assistance. When
3 I say "technical assistance," I specifically
4 mean questions, like should this be included in
5 the numerator and denominator or not, right.
6 So it's technical assistance specifically
7 related to answering the questions in the hard
8 copy of the survey.

9 When we brought that in-house, we
10 needed some kind of a tool or a software to
11 manage, like, a ticketing system. So we used
12 something called Zendesk. It's actually, I
13 think, one of the most popular electronic
14 ticketing systems across industries where
15 hospitals, ambulatory surgery centers, you --
16 anyone, basically come to our website; you put
17 in some contact information; you ask us
18 questions; we send you quest -- answers back in
19 writing.

20 If we need to have a call, we have
21 a call, usually a Zoom. But it's our mechanism
22 for providing technical assistance around any

1 of our four ratings programs that I've
2 described.

3 Q. Can -- can you just give me a
4 ballpark so I know what we're thinking about?
5 Like, how many Zendesk -- is tickets -- is that
6 the metric?

7 A. Correct.

8 Q. How many tickets come in per week?
9 Per month? Just your best ed- -- educated
10 guess.

11 A. There's a lot of variation weekly
12 and monthly. Annually, it's over 6,000.

13 Q. Wow. Okay. That's a lot.

14 A. Yeah. I'm very busy.

15 Q. Sure. Well, thank you for spending
16 the day with us.

17 So -- so how many of those do
18 you process per month?

19 A. I try to put my hand on at least
20 probably 3 to 10 tickets a week.

21 Q. Okay. And does your -- your
22 in-house team handles the rest of the 6,000?

1 A. Absolutely. It's the expectation of
2 every single member of the ratings team with the
3 exception of Kush Banerjee, who's the director
4 of licensure, that people are able to provide
5 technical assistance to hospitals.

6 And to be frank, the majority of
7 the questions are just showing them where in
8 the hard copy of the survey they can find that
9 response. So it's things like on Page 55,
10 you've indicated that actually IV bags that
11 can't have a barcode on it can be excluded from
12 the BCMA measure.

13 Q. Okay. And -- and so to that point,
14 the questions that are coming in -- are they
15 typically about how to answer the survey?

16 A. They're typically about ensuring
17 that hospitals are accurately doing their data
18 collection.

19 So in this instance, for example,
20 we ask about compliance, so how many drug
21 administrations that you've had. In some
22 hospitals, they may put a barcode on an Ensure

1 shake to give to a geriatric patient.

2 Should we consider this a
3 medication? Well, it has a barcode, but it's
4 not treating a condition or disease. So those
5 are the majority of the questions.

6 And, again, it's actually almost
7 all laid out in the hard copy of the survey,
8 but sometimes they just need to be directed to
9 the page of where that information lives.

10 Q. Okay. And the survey is about 350
11 pages, if I'm right.

12 A. It is.

13 Q. Yeah.

14 Do you have an understanding of
15 how long it takes hospitals to accurately
16 complete the survey?

17 A. So it varies. Since I've been at
18 Leapfrog, one of the things that I've been
19 responsible for is developing and helping to --
20 and oversee and administer what's called our
21 "on-site data verification program."

22 The year that we developed and

1 piloted our on-site data verification program,
2 which was originally designed for hospitals and
3 it now also includes ambulatory surgery
4 centers. I was fortunate to be able to
5 participate on a handful of the site visits to
6 hospitals that were helping us refine the
7 protocols --

8 Q. Yeah.

9 A. -- to make sure that they weren't
10 wasting our time, we weren't wasting their time,
11 et cetera.

12 Through that process, I was able to
13 learn a lot about data collection and survey
14 administration, and the estimate of 40 to 80
15 hours came from those conversations --

16 Q. Okay.

17 A. -- but it varies significantly.

18 In a small rural hospital that's
19 only offering a limited number of services, it
20 could take 10 or 15 hours because they're not
21 delivering babies. They don't have an ICU.
22 They're not doing pediatric CT scans.

1 In a large university medical
2 center, where there's thousands of patient
3 beds, it could be more.

4 But frankly, what we've learned
5 over time -- and, again, I'm directly talking
6 to a lot of hospitals around the country -- is
7 the first year, it takes longer because maybe
8 you've never collated your hand hygiene
9 observation data. Maybe you're not even doing
10 hand hygiene observations in all of the units.
11 Maybe you don't have quarterly audit processes
12 in place. But year over year, that time
13 commitment really gets reduced.

14 One thing I didn't mention about
15 the survey that I'd like to is that we have a
16 commitment -- an unspoken commitment but a
17 spoken commitment to try to maintain questions,
18 measure specifications and the scoring
19 algorithms we use to get to those four
20 performance categories we talked about --
21 achieve the standard, et cetera -- for about
22 three years.

1 And that way, if you do the work to
2 actually put the things in place, it doesn't,
3 like, change the next year and you're starting
4 again, and then change the next year and you're
5 starting again.

6 We also really want hospitals to
7 work towards a similar thing for a certain
8 amount of time so they can see their
9 improvements, if they have them, presented in
10 those publicly reported results that I talked
11 about.

12 So maybe the first year you get
13 started, based on what you have in place or
14 what you're able to do or what you know how to
15 do for a certain measure, you're only at
16 limited achievement. But because we're keeping
17 everything relatively stable for you, now
18 you're working on it all year. And now, the
19 next year, your considerable achievement --

20 Q. Yeah.

21 A. -- and, in some cases, achieve the
22 standard.

1 So, again, we don't always do it.
2 We try to do it, and it's a real commitment.

3 Q. Are you aware there was a study, I
4 think, conducted by Oklahoma State University
5 about how long the Hospital Survey takes to
6 achieve?

7 A. I am.

8 Q. Can you tell me a little bit about
9 that study?

10 A. Sure.

11 So my understanding is it wasn't a
12 study, but I don't want to sort of parse words.
13 But I think I told you in the beginning that we
14 were founded by purchasers and employers.
15 Today, we've maintained that commitment and we
16 work with about 35 business health coalitions
17 or purchasing groups around the country.
18 They're generally state-based.

19 In Oklahoma, the purchasing group
20 that we work with there is called WellOK, where
21 the "OK" stands for Oklahoma.

22 Q. I figured.

1 A. They have a relationship with one of
2 the universities there, and they wanted to use
3 an intern that they got from the university to
4 basically shadow a first-time participating
5 hospital in doing the Leapfrog Hospital Survey.
6 And they wrote up her observations --

7 Q. Okay.

8 A. -- I actually didn't know that they
9 published it. I just know that I've seen it.

10 Q. Got it.

11 Okay. Yeah. I mean, we're
12 happy to show you a document if it's helpful,
13 but I -- does it sound right that the conclusion
14 was it could take nearly 80 hours to complete
15 the survey?

16 A. Yes. I think I gave the range of 40
17 to 80 --

18 Q. Forty to 80.

19 A. -- and -- and this is -- again, I
20 think it was a -- please correct me, but I think
21 it was, like, the large academic medical center
22 associated with the University of Oklahoma.

1 Q. That may be right, yeah.

2 A. Yes --

3 Q. Okay.

4 A. -- yes, that --

5 Q. Great.

6 Okay. One other thing -- you
7 mentioned that you -- you spend, it sounds like,
8 a lot of time talking to hospitals.

9 A. Yes.

10 Q. Can you tell me 30,000-foot --

11 A. Yes.

12 Q. -- what types of things are you
13 talking about? What -- what are the contexts?
14 Like, I'm just trying to explore how -- how --
15 what's -- what does that look like?

16 A. I describe that sometimes when
17 hospitals have questions on help desk, they need
18 a call. Somehow, something is getting lost in
19 writing. I jump at the opportunities to take
20 those calls. I love talking to hospitals and
21 ambulatory surgery centers about our measures.
22 I love talking about why they're important. I

1 love answering their questions.

2 I learn a lot about how the
3 instructions are written to understand do we
4 need to clarify something, refine something.
5 So that's some portion of the calls.

6 Related to the Hospital Safety
7 Grade, if hospitals -- and it's usually maybe a
8 chief medical officer or a quality director.
9 Sometimes it's the CEO; sometimes it's a board
10 member -- if they have questions about the
11 Safety Grade methodology or why we're using CMS
12 data or any of the measures whatsoever, I take
13 a lot of those calls.

14 I do, like I said, a lot of
15 education, and I try to make that education as
16 interactive as possible. And so when I'm doing
17 webinars, whether it's with 10 hospitals or 700
18 hospitals, I'm always the one or often the one
19 actually on the other line of the Zoom
20 answering their questions.

21 So it really varies depending on
22 what people are interested in, but I try to

1 make myself really available. Pre-COVID, I
2 traveled to hospitals to meet with them
3 in-person, if they requested it, free of charge
4 because we really do want to engage with them,
5 hear from them. We're always trying to do
6 better, make it better.

7 And while, yes, I could send other
8 people -- and obviously, I don't like germs, so
9 I probably should -- but it's something that I
10 try to do --

11 Q. Yeah.

12 A. -- I can't always do it as much as I
13 want, but --

14 Q. No wonder you don't have a vacation.

15 A. I'm doing Alabama Hospital
16 Association next week, so . . .

17 Q. Good luck.

18 So a couple other questions --

19 A. Yeah.

20 Q. -- just on -- and then I think we
21 may be getting close to a break -- oh, yeah.

22 So talking about the types of

1 comments, you know, that -- your conversation --

2 A. Yes.

3 Q. -- with hospitals, has the burden of
4 completing the survey ever come up before?

5 A. I would say early on, like,
6 2009/2010, that something was discussed a lot.
7 Today, no --

8 Q. Okay.

9 A. -- and, in fact, what we've seen is
10 -- and most hospitals now are part of health
11 systems, which I'm sure you know. Most health
12 systems consolidate around the tasks related to
13 quality measurement and data reporting. And
14 that includes patient safety measurement in data
15 reporting.

16 And so we're seeing in some small
17 systems, large systems it's somebody's job to
18 do this, and Leapfrog is just one other thing
19 that they do.

20 We're also seeing that because our
21 measures are meaningful to hospitals in a way
22 that sometimes the CMS measures are not,

1 because some of it comes from claims only,
2 because the data can be a little bit older,
3 hospitals and health systems have adopted our
4 measures on their board's quality scorecards,
5 which is, I think, a fairly common thing.

6 And so they've made the choice to
7 focus on any one or number of measures on the
8 Leapfrog Hospital Survey, and so it's not
9 necessarily a burden to them; it's -- it's part
10 of their culture.

11 Q. They were already doing it?

12 A. Yes.

13 Q. Yeah.

14 Do you -- are the hospitals
15 you're talking to -- what percentage of them are
16 participating versus nonparticipating?

17 A. At this point, I think we have about
18 80 percent of inpatient hospital beds
19 represented in the Leapfrog Hospital Survey
20 results, millions of admissions. So just by
21 nature of that fact, the majority of hospitals I
22 talk to are participating in the survey, but I

1 also talk to hospitals that are not
2 participating in the survey --

3 Q. Yeah.

4 A. -- so just, like --

5 Q. Fair enough.

6 A. -- participation's around 80/20 --
7 I'm sorry --

8 Q. No, no. It's -- it's a fair point.

9 A. Okay.

10 Q. So I -- I guess the -- the follow-up
11 question is, Can you tell me a little bit about
12 what are the conversations you have with
13 nonparticipating hospitals?

14 A. They vary. Sometimes they want to
15 talk about what it would take to participate in
16 the survey. Sometimes they want to get
17 introduced to a hospital of like size, teaching
18 status, patient acuity -- who's doing the
19 Hospital Survey, because they want to do it, but
20 they don't want to start from scratch.

21 A lot of times, it's questions
22 about the Hospital Safety Grade, the way the

1 methodology works. I do a lot of
2 demonstrations using Zoom with that Hospital
3 Safety Grade calculator that I showed you -- I
4 could probably do it in my sleep, I've done so
5 many -- and then me answering questions about
6 that.

7 Sometimes, like in the case of the
8 Alabama Hospital Association, it's a place
9 where we only recently got a -- a regional
10 purchasing group to work with. And so there's
11 not been, really, a -- a strong -- what I would
12 call "Leapfrog presence" in that state.

13 And so the Hospital Association
14 just wants to hear directly from the source
15 more information about the survey versus the
16 Safety Grade, the survey and the Safety
17 Grade --

18 Q. Yeah.

19 A. -- how many dogs I have. I don't
20 know.

21 Q. How many -- how many?

22 A. Two.

1 Q. Two.

2 (Laughter.)

3 BY ATTORNEY CRAIN:

4 Q. That's under oath.

5 (Laughter.)

6 BY ATTORNEY CRAIN:

7 Q. So the other question I have -- so
8 we'll come to this a little bit more later --

9 A. Okay.

10 Q. -- but the imputation methodology we
11 talked about a little earlier -- your
12 conversation -- how many -- do you have
13 conversations with nonparticipating hospitals
14 about the imputation methodology?

15 A. I'm sure I do --

16 Q. Can you --

17 A. -- I can't think of one in the past
18 six months, but it's my job to do that, yes.

19 Q. Do you recall any -- like, the
20 general tenor of those discussions?

21 A. I'm trying to recall the last one I
22 had.

1 Talking to -- I -- I can't recall
2 specific ones, so I want to be very clear about
3 that --

4 Q. Yeah.

5 A. -- typically, it's related to what
6 we have -- the -- you know -- I'm sorry.

7 Typically, it's something like we
8 aren't going to do the survey this year, for
9 example, and we want to understand that's
10 going -- how that's going to impact our
11 Hospital Safety Grade.

12 And then I would explain to them if
13 you don't do the survey for one year, this is
14 the numerical scores that will be imputed for
15 these four measures. These are how the weights
16 will be redistributed, et cetera. If you don't
17 do the survey for two years, et cetera, if you
18 don't -- so it's typically just a very
19 informational call --

20 Q. Got it.

21 A. -- I honestly don't try to talk them
22 back into doing the survey or advise them in any

1 way. I'm simply relaying the information as I
2 know it.

3 They get very frustrated.

4 Q. Okay. Tell me what -- what do you
5 mean?

6 A. Because they want me to give them
7 guidance.

8 Well, what would you do? Well,
9 what do you think?

10 It's not really appropriate for me
11 to do that. I give them the information and
12 tell them it's best to call in a larger team
13 and have those discussions, but it's not a
14 decision I can make for them.

15 Q. So this is the decision they are
16 going to make, and these are the repercussions
17 of that decision?

18 A. These are -- this is how that
19 decision would play out, correct --

20 Q. Okay.

21 A. -- I've never used the word
22 "repercussions," but --

1 Q. Consequence, repercussion -- the
2 "result" --

3 A. Yes.

4 Q. -- may be a more neutral word.

5 A. Sure.

6 Q. Yeah.

7 And do you know -- in those
8 conversations, do you have a sense of why the
9 hospitals stopped reporting for those years?

10 A. It varies. I will tell you a very
11 common one right now, which I'm sure won't come
12 as a surprise to you. It's cybersecurity
13 events.

14 Q. Huh. Interesting.

15 A. We've been hearing an increase in
16 cybersecurity events specifically targeting
17 health systems --

18 Q. Yeah.

19 A. -- insurance companies, et cetera.
20 And so that can be a reason why they have
21 limited access to data or limited staff --

22 Q. Oh, I see --

1 A. -- additionally --

2 Q. -- can I -- can I just follow up on
3 that --

4 A. Yeah.

5 Q. -- because when you say -- it was
6 surprising to me, actually --

7 A. Oh.

8 Q. -- it's not surprising to me that
9 they have these, but the connection is unclear
10 to me --

11 A. Yeah.

12 Q. -- you're saying the cybersecurity
13 incident -- they, like, lock down the data so
14 they can't participate?

15 A. No. They can't record data. So
16 then --

17 Q. I see.

18 A. -- because our survey sometimes asks
19 for, like, them to do something, they're like,
20 We're off-line right now --

21 Q. Got it.

22 A. -- because everything got shut down.

1 Q. Okay. So, like, a sys- -- a system
2 shutdown --

3 A. So we're working off paper,
4 correct --

5 Q. Got it --

6 A. -- correct --

7 Q. -- okay.

8 A. -- another really common reason,
9 actually, is every hospital right now is on
10 electronic health records. There's really
11 actually only a handful of major electronic
12 health record vendors in the space: Epic,
13 Cerner, Meditech, et cetera.

14 If hospitals decide to go from,
15 like, Epic to Cerner, it is apparently a very
16 big deal, and they take everything down.
17 There's a process to move over and train. And
18 that can be a reason that hospitals tell us
19 they're going to pause participation in the
20 survey for one year or more, because they're
21 going through a major -- what they call
22 "transformation."

1 Q. Process, yeah.

2 And then just thinking about,
3 like, during COVID --

4 A. Yes.

5 Q. -- did hospitals ever tell you, We
6 just can't do it this year; we're overwhelmed?

7 A. Yes.

8 Q. Okay. Tell me a little more about
9 that.

10 A. Sure.

11 COVID was scary --

12 Q. Say that again.

13 A. -- yeah -- for a lot of different
14 reasons if you worked in a hospital because you
15 were seeing things you had never seen before;
16 you were afraid to get sick and take it home.

17 So Leapfrog actually -- in
18 discussions with hospitals, our board of
19 directors and others, we actually did something
20 we had never done before. In 2020, our survey
21 launches -- I said it's rolling submissions --
22 April 1st. They have until November 30th to

1 participate in this two-month data collection
2 period -- or data correction, with a C --
3 correction period.

4 For the 2020 Leapfrog Hospital
5 Survey, we said that hospitals who wanted to
6 could do the Leapfrog Hospital Survey.
7 Otherwise, if they had done a 2019 Leapfrog
8 Hospital Survey, we would maintain those data.
9 And we just distinguished between the two on
10 our public reporting website,
11 leapfroggroup.org.

12 So if you were a consumer looking
13 at a C-section rate, you knew it was from the
14 2019 survey versus the 2020 survey.

15 Q. Do you recall how you denoted that?

16 A. I don't -- oh. We added a field in
17 the website file that we import. And I believe
18 we just displayed it --

19 Q. Okay.

20 A. -- I don't exactly recall, though,
21 to be frank --

22 Q. Okay.

1 A. -- it was a wild time.

2 Q. And did that -- so that was sort of
3 like an imputation?

4 A. No. I would say it was -- we froze
5 the results for some hospitals and -- and -- we
6 thought about just freezing the survey. And as
7 we talked to different hospital groups about
8 that, there actually wasn't consensus around
9 that.

10 Some hospitals said No. We've been
11 working on improving this for two years. We're
12 ready to report. I want to report now --

13 Q. Got it.

14 A. -- you know, other hospitals said,
15 We did a survey last year. We're getting
16 slammed right now. We just can't do it.

17 So we tried to find a solution that
18 worked and represented what both groups of
19 hospitals were telling us.

20 Q. So just -- just to make sure I
21 understand, for the hospitals that said we're
22 working on it, we want to report, you gave them

1 their 2020 grade, right?

2 A. No. You asked me about the Leapfrog
3 Hospital Survey.

4 Q. Oh, I'm sorry. So you -- I -- I --
5 I thought we were talking about the grade, too.

6 A. No. The Hospital Survey and the
7 Safety Grade are two completely different
8 programs, and --

9 Q. Got it --

10 A. -- our roles --

11 Q. -- okay.

12 A. -- and protocols around those things
13 during COVID were not --

14 Q. Okay.

15 A. -- the same.

16 Q. So tell me -- yeah, that -- fair
17 enough. I think --

18 A. Yeah --

19 Q. -- I conflated --

20 A. -- okay.

21 Q. -- the two. Yeah, yeah. Let me --
22 okay.

1 So you froze the survey.

2 Did you freeze --

3 A. I'm sorry.

4 Can we just go back on the record,
5 and I can confirm we've been talking about the
6 Leapfrog Hospital Survey, correct?

7 Q. Yes, we've been -- yes. I think I
8 conflated the two.

9 A. Okay.

10 Q. Yeah. I think we're okay.

11 So why -- why don't -- just to
12 be clear, what -- what did you do during COVID
13 for the Safety Grade?

14 A. We calculated Hospital Safety Grades
15 based on the data that was publicly available on
16 those snapshot dates that I described --

17 Q. Okay.

18 A. -- to you earlier. So if it was
19 2020 results, it was 2020 results. If it was
20 2019 results, it was 2019 results --

21 Q. Okay.

22 A. -- and we represented those

1 reporting periods accurately, and I think on the
2 version of Exhibit 4 that you showed me, you can
3 see how those reporting periods are displayed on
4 that Hospital Safety Grade website.

5 Q. Yeah.

6 A. Okay.

7 Q. Okay. And then back to the survey
8 now.

9 A. Yes.

10 Q. I don't want -- I don't want to
11 confuse you, but I think I confused myself.

12 Back to the survey.

13 A. Yes.

14 Q. During COVID, certain hospitals told
15 you they were overwhelmed --

16 A. Yes.

17 Q. -- and wouldn't be completing the
18 survey?

19 A. Yes.

20 Q. You reported their survey results,
21 said, basically, These are the 2019 results of
22 the survey --

1 A. Yes.

2 Q. -- for the hospitals not
3 completing --

4 A. Yes.

5 Q. -- and for the --

6 CERTIFIED STENOGRAPHER: Just
7 let him finish.

8 BY ATTORNEY CRAIN:

9 Q. -- for the ones that did complete
10 the survey, you reported their 2020 results?

11 A. Yes.

12 Q. Okay. Thank you.

13 I think we're on the same page.

14 It's --

15 CERTIFIED STENOGRAPHER: Can
16 we take a bio break soon?

17 ATTORNEY CRAIN: Yes. Yes,
18 of course. Give me five more minutes.

19 Is that okay?

20 CERTIFIED STENOGRAPHER: Yes.

21 ATTORNEY CRAIN: Okay.

22

1 BY ATTORNEY CRAIN:

2 Q. So one other question.

3 On -- on the discussions with
4 hospitals --

5 A. Yes.

6 Q. -- can you recall today any instance
7 in which a hospital said, We don't want to do
8 the survey because our performance has declined?

9 A. I can't recall a hospital admitting
10 that exact thing to me.

11 Q. Okay. I can follow --

12 A. On a phone call.

13 Q. Otherwise?

14 A. Sometimes we get tickets to our help
15 desk, and it won't be someone necessarily a --
16 the leadership of the hospital, but, basically,
17 like, someone may be lower level doing data
18 collection that would just ask because they
19 don't know or they were told to ask.

20 Like, a lot of times, this can
21 happen when there's, like, a switch to the CPOE
22 system, for example. We haven't finished

1 setting up our clinical decision support yet.
2 We don't want to retake the CPOE test right now
3 because we know the alerts aren't working, so
4 we're not going to take the test.

5 What does that mean?

6 Q. Okay.

7 A. So we do hear testimony -- not
8 testimonials. We do get questions from
9 hospitals and through them asking the question
10 about, What's going to happen? Because we can't
11 do this right now. They're telling us it's
12 because, We got worse. We stopped doing it. We
13 have a change in leadership, and we're not going
14 to do this anymore.

15 I'm trying to convince them it's
16 still worth it, that kind of thing.

17 Q. So you -- you -- just to make sure I
18 understand --

19 A. But not on a phone call.

20 Q. Okay. And -- and so let me break
21 this down a little bit.

22 ATTORNEY CRAIN: And then I

1 promise, Cindy, we will break.

2 BY ATTORNEY CRAIN:

3 Q. So you get questions from which you
4 infer that there's declined performance?

5 A. No. I get questions, and in the
6 process of them answering the question, they add
7 that piece, which maybe they meant to or were
8 not meant to do.

9 Q. Okay.

10 A. So in the process of saying, What
11 happens if we don't take the CPOE test? they
12 will have described, Because we switched our
13 CPOE system, the new alerts aren't working.
14 Management doesn't want me to take the CPOE
15 test.

16 Q. Okay.

17 A. So, no, I would never infer
18 something like that.

19 Q. Okay.

20 A. I see it as maybe them accidentally
21 putting too much information in the ticket when
22 they were just supposed to ask a single

1 question.

2 Q. Okay. And then you -- you
3 emphasized "not on a phone call."

4 A. That I could remember.

5 Q. What about a Zoom?

6 A. I would consider that a phone call.

7 Q. Got it. Okay.

8 So any oral video you're
9 talking about?

10 A. (No audible response.)

11 Q. Okay. And -- okay.

12 ATTORNEY CRAIN: I think for
13 Cindy, let's take a break, if you're
14 good, Kim?

15 ATTORNEY BLAIR: Yeah, good.

16 ATTORNEY CRAIN: Okay.
17 Should we just do lunch now?

18 ATTORNEY BLAIR: Yeah.

19 ATTORNEY CRAIN: Okay.

20 THE VIDEOGRAPHER: Going off
21 the record. The time is 12:07.

--oOo--

(Whereupon, at 12:07 p.m. EDT, a
luncheon recess was taken.)

--oOo--

1 A F T E R N O O N

S E S S I O N

2 (1:15 p.m. EDT)

3 --oOo--

4 MELISSA AMEE DANFORTH,
5 was called for continued examination and, after
6 having been previously duly sworn under penalty of
7 perjury by the certified stenographer to tell the
8 truth, the whole truth and nothing but the truth,
9 was examined and testified further as follows:

10 --oOo--

11 THE VIDEOGRAPHER: Going back
12 on the record. The time is 1315.

13 --oOo--

14 EXAMINATION (CONTINUED) BY COUNSEL FOR PLAINTIFFS

15 --oOo--

16 BY ATTORNEY CRAIN:

17 Q. Welcome back.

18 A. Thank you.

19 Q. Okay.

20 ATTORNEY CRAIN: Oh, is my
21 mic on?

22 Okay. Good.

1 BY ATTORNEY CRAIN:

2 Q. I want to shift gears and talk about
3 the imputation model.

4 A. Yes.

5 Q. Do you prefer "model" or
6 "methodology"?

7 A. Either is fine.

8 Q. Okay. You're okay. You're good.
9 Why did Leapfrog establish an
10 imputation model?

11 A. So going back again when I was
12 referencing the New York and California
13 restaurant letters, there's this idea that
14 obviously, yes, transparency is important, but
15 we also felt that we could use this as an
16 opportunity to really educate patients,
17 families, employers, purchasers, others on what
18 are the asp -- what are some aspects of patient
19 safety, right. So some people may or may not
20 know that it includes things like pressure
21 ulcers, falls, medication errors, hand hygiene,
22 right. These are what we consider aspects of

1 patient safety.

2 And as we examined a host -- when I
3 say "we," again, this would be our national
4 expert panel of which I was an observer, not a
5 participant. When the expert panel was
6 examining all of the various publicly reported
7 patient safety measures that were out there, my
8 recollection is that the idea of having a
9 Safety Grade that included as many available
10 patient safety measures as possible would be
11 the ideal situation.

12 Some of those measures ended up
13 coming from our own Leapfrog Hospital Survey.
14 I don't think that was ever a foregone
15 conclusion, but through deliberation and
16 processes, the expert panelists said,
17 Medication safety is actually the most common
18 medication -- medical error that happens to any
19 patient in a hospital; it's number one.

20 We have to have medication safety
21 represented in the Hospital Safety Grade. What
22 are the available measures that are publicly

1 available? And it just so happened at that
2 time there was only one, actually, CPOE. We
3 didn't even have BCMA on the survey.

4 So the original Safety Grade
5 included slightly different measures on both
6 the process and structural measure side as well
7 as on the outcome measure side. And when we
8 first started calculating Hospital Safety
9 Grades, identifying measures, looking for data
10 sources, we had secondary data sources for
11 some of the measures from the
12 American Hospital Association through their
13 various surveys.

14 So we had had the Safety Grade
15 around now 2013 to 2021. It was
16 well-established, particularly among hospitals.
17 They really understood it by that point.

18 When AHA decided they weren't going
19 to calculate Hospital Safety Grades anymore --
20 or they weren't going to license as their data
21 to calculate Hospital Safety Grades anymore, a
22 discussion was, What are the other available

1 resources? And at that point, there was
2 discussion around imputation for certain of the
3 measures.

4 But to be clear, as I described
5 earlier, going back even to the inception of
6 the Hospital Safety Grade, the idea of
7 imputation was always discussed, and it was
8 discussed from my earliest recollection related
9 to cultural of safety. So this idea of
10 imputation related to methodologies,
11 particularly composites, is not new. It's not
12 groundbreaking. It's not unique to this expert
13 panel. Their thinking and the evolution of the
14 model really did evolve almost organically over
15 time due to various factors.

16 Q. And -- and just, again, to what we
17 talked about earlier this morning, imputation
18 wasn't actually instituted, so to speak, until
19 2021, right?

20 A. Correct.

21 Q. Okay. So to my question of why
22 Leap- --

1 A. I'm sorry. It might have been 2022.
2 I think the last time we used the data was 2021,
3 so it may have been one of the 2022 Grades, but
4 we've agreed it's around that time frame.

5 Q. Yeah. Okay.

6 And that's a helpful
7 clarification. I -- I take the point.

8 The decision to start
9 imputation presumably was '21, and the first
10 time you did it was '22?

11 A. I believe that's correct without
12 having the documents in front of me.

13 Q. Yeah, fair enough.

14 Going back to my question.

15 So I asked why did Leapfrog --
16 why is Leapfrog, you know -- what's the purpose
17 of imputation? You talked about education,
18 right? That was how you started your answer.

19 A. Um-hum.

20 Q. Why do you need an imputation
21 module -- model to educate the public?

22 A. We don't need an education -- we

1 don't need an imputation model to educate the
2 public; however, again, even very early on when
3 we start -- first started calculating Hospital
4 Safety Grades, there were discussions about,
5 Well, if we use measures from a Leapfrog
6 Hospital Survey and we don't have them for every
7 hospital, are we sure we want to use them, or
8 would we still want to use them?

9 And that's why, again, early
10 discussions around even imputing then -- for
11 example, the safe practices, the culture of
12 safety -- safe practice -- those discussions
13 took place. There was always an awareness that
14 because the expert decision -- made a decision
15 to include some measures that were from the
16 Leapfrog Hospital Survey, there was going to be
17 some hospitals that likely would not have those
18 data because it's a voluntary survey --

19 Q. Yeah.

20 A. -- so concepts like imputation,
21 secondary data sources, et cetera, came to be.

22 And I apologize. I realize I

1 wasn't clear.

2 The idea of education is that they
3 didn't want to leave out those important
4 concepts of patient safety just because they
5 may not be available for hospitals that didn't
6 do the Leapfrog Hospital Survey. And that came
7 about specifically because medication errors
8 are the number one error in hospitals. And at
9 the time, we were the only source of any
10 measures related to medication safety.

11 Q. So that's very helpful. I guess
12 the -- my follow-up question to that is, You
13 said you didn't want measures in -- in the --
14 let me just make sure I -- you said, "We don't
15 have them for every hospital where we --
16 where -- sure we want to use them, or would we
17 still want to use them?" Meaning the -- you
18 know, the measures, right, going in? Why isn't
19 a different option to just not grade every
20 hospital?

21 A. From the very beginning of
22 conversations with the expert panel related to

1 the Hospital Safety Grade, they had a commitment
2 to calculating Safety Grades for as many
3 hospitals as possible because unlike things like
4 delivering babies where maybe every hospital
5 doesn't do it or having a complicated cancer
6 surgery where maybe every hospital doesn't do
7 it, these patient safety measures are really
8 fundamental to pretty much any hospital that's
9 providing acute care, and so they thought it was
10 important to include as many as possible, but we
11 don't. I mean, clearly there's over 4,000-plus
12 hospitals in the United States, and we only
13 grade around 2,800 to 3,000 every round.

14 Q. Well, you -- you said earlier today
15 that you grade 80 percent of hospitals, right?

16 ATTORNEY BLAIR: Objection to
17 form.

18 BY ATTORNEY CRAIN:

19 Q. Explain to me --

20 A. No.

21 Q. -- do you remember that number,
22 80 percent?

1 A. No, I said -- again, so that's when
2 we were talking about the
3 Leapfrog Hospital Survey --

4 Q. Okay.

5 A. -- and I said we have about
6 80 percent of inpatient hospital beds
7 represented from hospitals who are participating
8 in a Leapfrog Hospital Survey, meaning that we
9 have the majority of hospitals --

10 Q. Okay.

11 A. -- doing the
12 Leapfrog Hospital Survey.

13 Q. And so 20 percent are -- of
14 inpatient beds are at hospitals that do not
15 participate in the survey?

16 A. Yes.

17 Q. Why does Leapfrog need to grade
18 those hospitals?

19 ATTORNEY BLAIR: Objection to
20 form.

21 THE WITNESS: Again, the
22 expert panel's intention was because

1 this is a patient Safety Grade, to
2 grade as many hospitals as possible.

3 BY ATTORNEY CRAIN:

4 Q. What is -- is it to grade as many
5 hospitals as possible or to also grade them
6 accurately?

7 A. It's both.

8 Q. Okay.

9 A. Which we do.

10 Q. So -- and just to be clear, you're
11 saying the imputation model Leapfrog has
12 presents an accurate portrait -- depiction of a
13 hospital's performance?

14 A. I have confidence in our entire
15 methodology, including the imputation
16 methodology, yes.

17 Q. Okay. What's the basis for that?
18 Why do you have confidence in it?

19 A. I trust our expert panel. I have
20 said before I'm not a health science researcher,
21 a health services researcher. I'm not a
22 mathematician, but I believe that the

1 individuals providing us with guidance and
2 expertise -- which over the years, has been
3 beyond the expert panel.

4 Over time, we've consulted with
5 Mathematica -- they're a leading analytics firm
6 in the U.S. -- and others, and because -- you
7 know, those are the folks that -- not just
8 Leapfrog, CMS, Joint Commission, other national
9 organizations -- are also trusting to provide
10 them guidance on performance, measurement,
11 et cetera. I feel confident in the panel
12 and -- and their guidance.

13 Q. Is it accurate that the expert panel
14 approved the imputation methodology Leapfrog
15 deploys today?

16 A. So as I've described, there's not a
17 voting process, there's a discussion and there
18 was agreement, correct.

19 Q. Are you referring to the April 12th,
20 2024 meeting?

21 A. We did meet on April 12th, 2024.

22 Q. Was that the discussion you were

1 just referring to?

2 A. There were discussions both before
3 and after that meeting, and I would say
4 throughout the process of finalizing the fall
5 2024 methodology, there was agreement among the
6 expert panelists, yes.

7 Q. Okay. We'll come up to that.

8 Let's start -- so you had
9 mentioned there was a discussion over time
10 involving imputation; is that right?

11 A. Yes.

12 Q. I want to take you back to some of
13 those discussions and sort of get your
14 documents.

15 So I want -- excited. All
16 right.

17 ATTORNEY CRAIN: So this is
18 going to be Exhibit 6.

19 --oOo--

20 (Danforth Deposition Exhibit Number
21 6, Leapfrog Hospital Safety Grade
22 Expert Panel In-Person Meeting

1 Agenda, June 14, 2017, Bates
2 stamped ARMSTRONG_0003576 through
3 ARMSTRONG_0003579, marked for
4 identification, as of this date.)

5 --oOo--

6 THE WITNESS: Oh, thank you.

7 Sorry.

8 ATTORNEY CRAIN: Six, right?

9 CERTIFIED STENOGRAPHER: Yes.

10 ATTORNEY CRAIN: Good. Six.

11 (Sotto voce between cocounsel.)

12 BY ATTORNEY CRAIN:

13 Q. Okay. Ready?

14 A. Yes.

15 Q. Okay. Ms. Danforth -- Danforth,
16 Exhibit 6, if you see at the top, it is a
17 Leapfrog Hospital Safety Grade Expert Panel
18 In-Person Meeting Agenda.

19 Do you see that?

20 A. I do.

21 Q. And it's dated Wednesday, June 14th,
22 2017.

1 Do you see that?

2 A. I do.

3 Q. And I'm just going to tick down to
4 the meeting attendees.

5 Do you see it labels expert
6 panelists and board/staff?

7 A. I do.

8 Q. And among the folks who attended are
9 Ms. Binder, yourself and Dr. Austin.

10 Do you see that?

11 A. I do.

12 Q. And I -- just a question. I noted
13 Ms. Binder stops at some point attending these
14 meetings.

15 Do you recall when that
16 happened?

17 A. I remember that this was an
18 in-person meeting, which was unique. We don't
19 often meet in person with our technical expert
20 panels even prior to COVID because they live
21 around the country. It's very expensive. So I
22 know she would have attended this in-person

1 meeting. I couldn't recall if she attended
2 previous to this or after this any virtual
3 meetings that we would have.

4 Q. Okay.

5 A. But I would say that an in-person
6 meeting for sure she would be present.

7 Q. Do you have a best estimate of when
8 the last ex -- Hospital Safety Grade expert
9 panel she attended was?

10 A. I wouldn't.

11 Q. Okay. So if you go down a little
12 bit, specifically to the Unintentional
13 Consequences of How We Currently Treat Missing
14 Data.

15 Do you see that?

16 A. I do.

17 Q. And it says, Matt discussed some of
18 the unintentional consequences of how we
19 currently treat missing data, some of which are
20 driven by the Z-score methodology, and also
21 assigning grades to hospitals that may have more
22 or less data than others.

1 Do you remember the context of
2 that -- that note?

3 A. Unfortunately, I don't --

4 Q. Okay.

5 A. -- this is from 2017 --

6 Q. Okay.

7 A. -- eight years ago. I apologize.

8 Q. No, no. Don't -- no need to
9 apologize.

10 Do you have any present
11 understanding of what this could mean?

12 A. I don't. Only because in 2017, the
13 methodology was so different, including the
14 measures that we use both on the process and
15 structural measure side and outcome measure
16 side. I would need to read through the full
17 thing and any other meeting materials if I was
18 really going to speak to anything.

19 Q. Okay. Okay.

20 Let's go to Page 2. If -- you
21 see there's, at the top, a Number 2.

22 Do you see that in the bullets?

1 A. I do.

2 Q. And it says, Imputation of the score
3 when we have missing data.

4 Do you see that?

5 A. Correct.

6 Q. Is this one of the instances we've
7 been talking about where imputation has come up
8 before 2021 in these meetings?

9 A. I don't remember the specific
10 meeting.

11 Q. Okay.

12 A. As I've described, my most vivid
13 memory was specifically from Sara Singer related
14 to culture of safety. I don't remember this
15 specific incident.

16 Q. And you don't remember when the --
17 when Ms. Singer made that comment?

18 A. I don't.

19 Q. Okay. And just walking through --
20 you know, I understand if you don't remember,
21 but just to see if it refreshes your
22 recollection, it says, Matt mentioned that

1 expert panel discussed this in the past and did
2 not feel it supported the goal of the Safety
3 Grade.

4 Do you know what he means by
5 that?

6 A. I don't.

7 Q. Okay. Could he -- do you remember
8 any -- you know, do you have any sense of what
9 type of imputation did not support the goal of
10 the Safety Grade?

11 A. Again, my only recollection of
12 talking about imputation very early on was
13 specific took -- to the culture of safety
14 concept, which we've talked about extensively,
15 but I -- beyond that, I couldn't speak to this.

16 Q. Is that reflected in the next
17 bullet, Imputing scores for individual measures,
18 like Safe Practices?

19 A. I'm honestly not sure what that's
20 referring to, but my reference to Sara Singer
21 indicating that it would not be appropriate to
22 impute for something like a culture of safety

1 is -- is specifically what I'm referencing.

2 Q. Okay. Okay.

3 And culture of safety was
4 Safe Practices 2 or 1?

5 A. Safe Practice 2, correct.

6 Q. Okay. And then it says, Imputing
7 scores for individual measures like safe
8 practices would incentivize them to report on
9 the survey.

10 Do you see that?

11 A. I do.

12 Q. Do you know what that means?

13 A. Again, I -- I don't have a good
14 recollection of this meeting, and we've never
15 imputed scores for the safe practices since the
16 inception of the Safety Grade. I only remember
17 a single discussion even involving the safe
18 practices and imputation, so I only know the
19 outcome of what this discussion must have been,
20 which is what -- that we've never imputed safe
21 practice scores.

22 Q. And so just looking at this sentence

1 again --

2 A. Yes.

3 Q. -- is it correct to say that
4 imputing scores for individual measures would
5 incentivize hospitals to report on the survey?
6 And I purposefully tweaked the sentence in my
7 question. So I'm asking a very precise
8 question.

9 ATTORNEY BLAIR: Objection to
10 form.

11 THE WITNESS: And I don't
12 know if it would incentivize hospitals
13 to report to the survey or not. Like
14 I said, we've been doing imputation
15 for the Hospital Safety Grade
16 perform -- participation in a
17 Leapfrog Hospital Survey has remained
18 relatively steady. Whether I,
19 personally, believe it's an incentive
20 is irrespective of the reality of what
21 the participation looks like, so I --
22 I can't really speak to this.

1 BY ATTORNEY CRAIN:

2 Q. What do you personally believe?

3 A. That it depends.

4 Q. Depends on what?

5 A. I think if hospitals are generally
6 doing those elements already included in the
7 safe practices, it may incentivize them to say,
8 Oh, well, we're already doing this. Let's
9 report it to Leapfrog and have that included in
10 the Hospital Safety Grade. If hospitals are not
11 already doing those things or don't want to do
12 those things or don't agree with some of those
13 things, then it could disincentivize them.

14 I think an important thing to
15 remember is that hospitals that submit surveys
16 and get Safety Grades get Ds, get Fs. And so
17 participation in the survey isn't a straight
18 line to an A grade, a B grade, et cetera.

19 You know, in fact, we've seen time
20 and time again hospitals reporting to the
21 survey across all of the grades. So to speak
22 about a hospital's incentive or disincentive, I

1 think there's a lot of variation.

2 Q. Okay. The panel is -- two bullets
3 down, The panel discussed whether or not we
4 should assume the worst score if hospitals are
5 not transparent.

6 Do you recall that discussion?

7 A. I don't.

8 Q. Okay. Do you -- do you have an
9 understanding of what that could mean?

10 A. I wouldn't be able to speak
11 definitively. It could mean imputing a 0 --
12 unfortunately, I don't. I actually don't
13 remember this meeting at all, so I don't --

14 Q. Okay. Is -- is --

15 A. -- to be -- to be honest. I -- I'm
16 sure I was there. 2017 feels like a long time
17 ago. I don't remember this meeting at all.

18 Q. Anything pre-COVID is a blur.

19 A. It is a pre-COVID thing.

20 Q. Yeah. Yeah.

21 Then let me ask this question.

22 A. Yes.

1 Q. Let's see.

2 Is it fair to assume the worst
3 scores if hospitals are not transparent?

4 ATTORNEY BLAIR: Objection to
5 form.

6 THE WITNESS: Is this me,
7 personally, answering the question?
8 Is this me --

9 BY ATTORNEY CRAIN:

10 Q. Personal --

11 A. -- on behalf of Leapfrog?

12 Q. -- personal capacity.

13 A. I think, today, as we stand here in
14 2025, specific to the four measures that we
15 impute scores for in the Hospital Safety Grade,
16 given that actually we're imputing the same
17 score a reporting hospital gets if we know that
18 they have those structures in place but nothing
19 more and that we could actually impute 0, which
20 one expert panel has recommended, I wouldn't
21 even describe what we're doing now as being the
22 worst score we can impute. It is the worst

1 score in the data set for these measures, as
2 we've indicated clearly on our public reporting
3 website.

4 But, frankly, there has been
5 discussion about imputing 0s, which probably
6 would be the real worst score.

7 Q. I thought, though -- so tell me if
8 I'm misunderstanding.

9 I thought, like, say, a 15 for
10 handwashing was the lowest score.

11 A. So today, that is the lowest score,
12 but it's specifically associated with that
13 performance category, as we discussed, that's
14 from the Leapfrog Hospital Survey.

15 So in some ways, we're still giving
16 a hospital that's not done anything related to
17 the survey the same credit that we're giving a
18 hospital that's done a Leapfrog Hospital Survey
19 and basically said, Yes, we have this but we
20 don't have these other things in place.

21 The scores that you see assigned to
22 those performance categories for each of those

1 four measures were not determined by this
2 Hospital Safety Grade expert panel. They
3 actually come from another program, and they
4 were determined by a separate independent
5 national expert panel.

6 So, for example, the lowest score
7 for CPOE, I believe, is 15. So let me check.

8 Q. I won't hold you to it. The
9 document says what it says.

10 A. I don't trust myself now after that
11 hand hygiene -- hand hygiene domain mishap.
12 It's shaken my confidence.

13 The lowest score associated with
14 CPOE is 15. However, the lowest score
15 associated with --

16 Q. IC.

17 A. -- IC position staffing is --

18 Q. Five.

19 A. -- 5.

20 So those were not arbitrarily
21 assigned. There are differences for a reason.
22 And that's because those numerical values

1 associated with those four performance
2 categories were decided by another separate,
3 independent national technical expert panel for
4 the purposes of Leapfrog's value-based
5 purchasing program.

6 I've talked about that a few times,
7 when we take those performance categories and
8 assign these scores.

9 So the difference in the scores
10 represent relative importance that panel
11 thought, relative harm for having the highest
12 versus lowest achievement. And that's why IC
13 staffing has the lowest low score, because it's
14 the greatest harm because it can result in --
15 in -- results in death.

16 And so -- though, today, we're
17 imputing the lowest score from a Leapfrog
18 reporting hospital, we could, theoretically,
19 given guidance from the expert panel, report a
20 lower score that could not be attained by a
21 Leapfrog reporting hospital.

22 Q. Got it. I think I understand.

1 And then just to make it
2 concrete, when you say "the lowest score," for
3 handwashing, for instance, what is that,
4 presuming exists for the lowest reporting
5 hospital?

6 A. So in order to achieve limited -- in
7 order to earn limited achievement on the hand
8 hygiene standard, it is a structural measure,
9 and so there's a series of components. And
10 based on the yeses or noes -- you might refer to
11 it as, like, a scoring rubric.

12 So based on that scoring rubric,
13 the components that would equal limited
14 achievement are laid out.

15 Unfortunately, given the detail of
16 that, I would just need to have it in front of
17 me to reference it. And we can certainly
18 discuss it.

19 Q. Okay. And -- and just to be clear,
20 though, under the current structure, there is no
21 lower score than limited achievement for any
22 hospital; is that right?

1 ATTORNEY BLAIR: Objection to
2 form.

3 THE WITNESS: For these four
4 measures?

5 BY ATTORNEY CRAIN:

6 Q. For these four measures.

7 A. Currently, correct --

8 Q. Okay.

9 A. -- correct, yeah --

10 Q. Okay.

11 A. -- so even nonreporting hospitals
12 still get a score associated with a Leapfrog
13 reporting hospital --

14 Q. Okay.

15 A. -- that's correct. We have --
16 there's no score beneath that.

17 Q. Okay. And the -- just before we
18 leave this document --

19 A. Yeah.

20 Q. -- I just want to make sure.

21 None of these -- particularly
22 Bullet 2 -- none of these bullets refresh your

1 recollection as to what was discussed?

2 (Whereupon, the witness reviews the
3 material provided.)

4 THE WITNESS: They don't.

5 BY ATTORNEY CRAIN:

6 Q. Okay.

7 Okay --

8 A. And --

9 Q. -- you can set that aside.

10 A. -- and -- yes --

11 Q. Oh. Do you have something?

12 A. -- typically, we would only have,
13 like, an in-person expert panel meeting for a
14 specific reason, but there's nothing at this --
15 you know, that -- on this agenda that jumps out
16 at me.

17 So I'm wondering -- and if it was
18 the panel hadn't met in-person in a long time
19 and we brought them all together -- but no.

20 And -- I mean, I see my name on the
21 agenda, certainly, particularly at the end,
22 Page 4, Discussion of the Landscape Ahead.

1 So I can see Missy shared
2 information on surgeon volumes and pediatric CT
3 dose, but I have no recollection of doing that.

4 If the notes said I did, I'm sure I
5 did.

6 Q. Okay.

7 Okay. You can set this one
8 aside.

9 Thanks for indulging the memory
10 lane. We're not off it yet.

11 ATTORNEY CRAIN: Let's go to
12 Tab 6.

13 So let's see. This will be
14 Exhibit 7.

15 --oOo--

16 (Danforth Deposition Exhibit Number
17 7, E-mail with attachment,
18 LEAPFROG01918816 through
19 LEAPFROG01918821, marked for
20 identification, as of this date.)

21 --oOo--

22 ATTORNEY BLAIR: Thank you.

1 ATTORNEY CRAIN: You're
2 welcome.

3 BY ATTORNEY CRAIN:

4 Q. Okay. Ms. Danforth, this is an
5 e-mail from Andrew Card, who looks to be a
6 Leapfrog employee.

7 A. Yes.

8 Q. Was he -- was he, by chance,
9 Ms. Campione's predecessor?

10 A. So he was a program analyst on my
11 ratings team. He wasn't -- it ended up -- after
12 we hired Alex, she did some of his work but not
13 all of it.

14 Q. Not one-to-one?

15 A. No, it's not a one-to-one. Thank
16 you.

17 Q. So he -- he attaches what he says
18 are notes from a Safety Grade expert panel.

19 If you look at the next page,
20 Bates ending 5729 --

21 A. Yes.

22 Q. -- and I'm going to refer -- do you

1 know what a Bates number is?

2 A. Yes.

3 Q. Okay. You've been educated. All
4 right.

5 A. Yes.

6 Q. So if you look at Notes from Safety
7 Grade Expert Panel Call, June 8th, 2020 --

8 A. Yes.

9 Q. -- by chance, do you remember this
10 meeting?

11 A. May I read this for a minute?

12 Q. Of course.

13 A. Okay.

14 (Whereupon, the witness reviews the
15 material provided.)

16 THE WITNESS: So I'm familiar
17 with some of these topics, and we
18 spoke extensively particularly about
19 the addition to PSI 90 and having to
20 update are we waiting methodology.

21 I don't remember being in
22 this specific meeting; but, again, I

1 am familiar with these topics.

2 BY ATTORNEY CRAIN:

3 Q. Okay. So let's walk through -- I
4 just want to get your understanding of these
5 terms to the extent you remember.

6 A. Yes.

7 Q. So focusing on imputation --

8 A. Yes.

9 Q. -- and it says, Matt reviewed the
10 models that Mathematica put together for
11 Leapfrog that imputes scores for CPOE, BCMA and
12 IPS. The model that make the both -- the --
13 sorry -- the model that make the most sense both
14 for minimizing miscalculation/bias and for
15 having face validity is as follows: Use the
16 most recent historic year if data was submitted
17 within the last three years; otherwise use the
18 most frequent value of the health system;
19 otherwise impute a score based on similar
20 hospitals (number of beds, region and
21 urbanicity).

22 Do you see those -- that --

1 that --

2 A. I do.

3 Q. This model -- the -- the three
4 bullets with -- with the white bullet -- was
5 that ever instituted?

6 A. I would need to reference the
7 specific scoring algorithm documents, like the
8 one you gave me today for spring 2025.

9 I can tell you as early as -- or as
10 recent as 2023, we were imputing recent
11 historical data within the last two years.

12 Q. Do you recall -- so my -- my
13 recollection -- and you tell me if it's wrong --
14 is that you -- you did not institute the second
15 one; you used the most frequent value of the
16 health system.

17 Is that right or --

18 A. I don't recall --

19 Q. Okay. That's fine.

20 A. -- ever implementing that as part of
21 the Safety Grade.

22 Q. Got it.

1 And then -- so he says -- if
2 you go to the top bullet, he's saying, The model
3 that may make -- he's saying, The model that
4 make the most sense both for minimizing
5 miscalculations and bias.

6 Do you have an understanding
7 what "miscalculations and bias" means in this
8 context?

9 A. I have an understanding that he's
10 speaking specifically to some work that
11 Mathematica did. I think I referenced it
12 actually right before you showed me this. I'm
13 prophetic.

14 I have an understanding that he's
15 referencing specifically the models that
16 Mathematica tested and put before the group.

17 Q. And -- and what does
18 "miscalculations and bias" mean in this context?

19 A. I don't remember the specific models
20 that Mathematica tested except to say that they
21 were many that were trialed and reviewed. I
22 would need to go back to those notes.

1 But Mathematica would have used
2 those phrases. Most common -- likely, it was
3 them describing --

4 Q. Yeah.

5 A. -- the analysis they had done and
6 then Matt reiterating back as accurately as he
7 could, I guess, what Mathematica had presented
8 to us.

9 Q. You've spent many years going to
10 these expert panel meetings, correct?

11 A. Yes.

12 Q. And they discussed imputation many
13 times, right?

14 A. They've discussed imputation over
15 the years, yes.

16 Q. Over the years.

17 Is -- is it fair to state that
18 as they have been discussing imputation, they
19 have been trying to avoid miscalculations of --
20 of the Safety Grade through imputation?

21 A. It's fair to say that as they've
22 discussed imputation, they're thinking around

1 the use of imputation has evolved. And they do
2 have a concern about making sure that the Safety
3 Grades are accurate and reliable.

4 Q. And -- and what sort of bias are
5 they talking about in those discussions?

6 A. In these discussions, again, the
7 expert panel is not talking about bias.

8 My read and understanding of the
9 first bullet is that Matt is communicating to
10 this panel work that Mathematica had done on
11 our behalf. And that's what he's sharing.

12 In terms of conversations related
13 to bias in imputation that the current expert
14 panel has had -- and, again, I don't see a
15 attendance document here; so I don't know who
16 was present or not present.

17 But I think that over time, there
18 have been increasing concerns that the bias
19 actually exists in another way, which is that
20 hospitals are getting too much credit.

21 And, again, during this time, 2013
22 to 2025, the emphasis that I talked about early

1 on about really focusing on patient safety and
2 reducing harm to patients, since that time, I
3 think only two or three additional papers
4 quantifying harm -- so deaths or harm to
5 patients in hospitals -- are really considered
6 definitive that have come out since the IOM.
7 And all of them are estimating things like one
8 in four CMS patients are being harmed by
9 preventable events in hospitals, that if we
10 were to do autopsies on every death in a
11 hospital, medicals errors would be the third
12 leading cause of death.

13 And Marty Makary said that, the
14 head of the FDA.

15 So I think as the science has
16 changed, the understanding of preventable harm
17 has changed. Our expert panel's thoughts
18 around imputation have changed, and their
19 concern about biasing in such a way that
20 hospitals would appear safer than they might be
21 is a concern.

22 And, again, that's my conjecture,

1 my -- my read of -- of the discussions. That's
2 not verbatim any discussion I've been a part
3 of.

4 But so -- and I'm sure you have
5 transcripts of many of those meetings, and we
6 could revisit them if you have them
7 available --

8 Q. Yeah.

9 A. -- so I'm giving my impression of --
10 as a colleague, not as a member of the expert
11 panel.

12 Q. Yeah. Yeah.

13 So let me -- let me ask you
14 to -- specifically a corporate representative
15 question.

16 A. Yeah.

17 Q. Why does Leapfrog believe that they
18 were giving hospitals too much credit, as you
19 said?

20 A. Because we --

21 Q. And -- and specifically
22 nonparticipating hospitals.

1 A. Yes.

2 Do you want to ask the question

3 again --

4 Q. Sure.

5 A. -- so she has it and I can -- okay.

6 Q. Yeah.

7 In your corporate

8 representative topic -- thank you --

9 A. Yes.

10 Q. -- for your help -- why does

11 Leapfrog believe that it is giving

12 nonparticipating hospitals too much credit?

13 A. We had done some analysis -- and

14 when I say "we," not me. So let me actually

15 first clarify that I do no analysis.

16 I believe Hopkins -- Matt Austin or

17 one of his research assistants at Hopkins had

18 done some analysis which was shared with one of

19 our expert panel meetings -- so it may be in

20 the notes -- indicating -- looking at

21 performance over time, hospitals that had

22 dropped out of the survey coming back. So

1 there was a data analysis that I don't have
2 memorized or in front of me that helped inform
3 that particular opinion.

4 Q. Do you remember when that was
5 presented?

6 A. I don't. So I -- again, I do
7 oversee these programs. I don't do these
8 analysis. I am on the -- the meetings, clearly,
9 but I am doing that for all four of the Leapfrog
10 programs.

11 And I know the Hospital Safety
12 Grade is a big focus of this case, but in my
13 day-to-day work, all the programs are
14 important. And so I don't remember something
15 that specific about this one program.

16 Q. Yeah. And -- and, again, I'm not
17 trying to trick you, or anything to that effect.
18 I'm actually asking because I've never seen
19 it --

20 A. Yeah.

21 Q. -- and I've looked at many documents
22 in this case. And it seems fairly material

1 to -- to Leapfrog's -- I mean, it was where you
2 went in your answer.

3 So I'm trying to triangulate
4 where it might be if it actually -- you know, I
5 don't mean --

6 A. Yeah.

7 Q. -- discussed, but if it was
8 presented, I'm trying to understand where to
9 find it --

10 A. Yeah.

11 Q. -- so any help -- help you can give
12 us in that regard?

13 A. I would have to consult or have you
14 consult with Matt Austin.

15 Q. Okay. So the -- so -- so the answer
16 is we have to ask Dr. Austin?

17 A. Yes.

18 Q. Okay. So we -- we'll ask him.

19 A. Okay.

20 Q. But, again, I'm not -- I'm not
21 trying to ask for a memory test. I'm just
22 trying to figure out, like --

1 A. No. I did prepare significantly to
2 be sure I could answer these questions; but,
3 again, like, something as specific as a meeting
4 where there's no attendance and I can only see
5 the notes, I'm not going to be able to recall
6 anything beyond that.

7 Q. Tot- -- totally get it. And I'm --
8 I'm not asking you to do more.

9 And if -- if it's not in the
10 record, so to speak, it's just not in the
11 record --

12 A. Okay.

13 Q. -- but to the extent we can find it,
14 I think it --

15 A. Yeah --

16 Q. -- it would be helpful --

17 A. -- yeah, I know.

18 Q. -- so that's -- that's why I ask.

19 Okay. So keep going -- I
20 think -- is there anything else on that document
21 to ask?

22 Oh. So just going back to

1 that -- so -- one, two, three -- four bullets
2 down from imputation, do you see There was?

3 A. Yes.

4 Q. There was an open question of how
5 punitive Leapfrog should be for hospitals that
6 do not submit data.

7 And just first question
8 might -- fair to say you don't remember the
9 actual discussion referenced here?

10 A. I don't --

11 Q. Okay --

12 A. -- and --

13 Q. -- do -- please.

14 A. -- I don't. And actually, I'm
15 trying to just recall even the particulars of
16 the methodology in 2020, and nothing stands out
17 at me as being punitive.

18 So, again, if something was
19 discussed, it's not clear, to me, that any
20 action was taken in terms of any changes to the
21 actual methodology.

22 Q. Yeah. So I -- I -- I --

1 A. Okay.

2 Q. -- take your point.

3 Prior to this period, there's
4 no imputation at all, right?

5 A. Okay. Yeah.

6 Q. Agreed?

7 A. Yeah.

8 Q. Okay. And then this appears to be
9 the period in which Leapfrog has retained
10 Mathematica to try to assess how it might
11 impute, correct?

12 A. Yes.

13 Q. Okay. And so it seems, to me, that
14 there's a discussion in -- in assessing the
15 right imputation model --

16 A. Yes.

17 Q. -- of how punitive Leapfrog should
18 be for hospitals that do not submit data.

19 Is that a fair reading of this?

20 ATTORNEY BLAIR: Objection to
21 form.

22 (Whereupon, the witness reviews the

1 material provided.)

2 THE WITNESS: Again, I didn't
3 write these notes. I don't remember
4 the discussion, so I don't know if
5 that word, "punitive," is accurate or
6 not.

7 BY ATTORNEY CRAIN:

8 Q. Do you have a personal view as to
9 whether imputation is related to punitiveness or
10 not?

11 A. I have a personal view that
12 imputation in the context of a discussion at the
13 expert panel -- that term could have been
14 used --

15 Q. Okay.

16 A. -- to -- in the course of a
17 conversation casually or haphazardly --

18 Q. Is --

19 A. -- I don't think -- and I know that
20 no one was suggesting that Leapfrog is punitive
21 or anything we're considering would be punitive.

22 Q. Is it your view that at no time,

1 Leapfrog has imposed an imputation methodology
2 to be punitive?

3 A. Yes, absolutely. Leapfrog has never
4 imposed a methodology to be punitive.

5 Q. Even though there have obviously
6 been discussions about whether to be punitive?

7 A. I, personally, have never used that
8 term in my discussion of any of the Leapfrog's
9 rating programs.

10 I did not make these notes. I
11 don't know what the actual discussion was.

12 I guess, to me, that has a negative
13 connotation. It's not a term I use. It's not
14 a term people on my team use. I can't reflect
15 its accuracy here.

16 ATTORNEY CRAIN: Okay. Let's
17 look at Tab 10.

18 Okay. This will be Exhibit
19 -- oh, man. I lost it already.

20 ATTORNEY BLAIR: Eight.

21 THE WITNESS: Eight.

22 ATTORNEY CRAIN: See, Kim,

1 you're always there for me.

2 ATTORNEY BLAIR: Eight.

3 ATTORNEY CRAIN: Eight.

4 BY ATTORNEY CRAIN:

5 Q. Don't write that.

6 A. Don't write that.

7 --oOo--

8 (Danforth Deposition Exhibit Number
9 8, E-mail string, Bates stamped
10 LEAPFROG01918816 through
11 LEAPFROG01918821, marked for
12 identification, as of this date.)

13 --oOo--

14 ATTORNEY CRAIN: I saw you
15 with the pen. I got nervous.

16 THE WITNESS: Thank you.

17 ATTORNEY CRAIN: This is

18 Tab 10.

19 BY ATTORNEY CRAIN:

20 Q. Okay. So this is fast-forwarding a
21 year to 2021.

22 Do you see that?

1 A. Yes.

2 Q. And it's an e-mail thread between
3 you, Dr. Austin and someone named Emma Domico?

4 A. Yes.

5 Q. Was he -- was she Dr. Austin's
6 assistant or --

7 A. So Matt has students as assistants
8 throughout the years. Jourdan Dirk is one.
9 You've seen his name --

10 Q. Yeah.

11 A. -- Preeti Joshi, now you see her
12 name.

13 Emma Dirk was in between.

14 Q. In between. Got it.

15 So if you go to the back page,
16 it starts -- and these e-mails run -- the last
17 one is the first one, the way it's produced.

18 So it starts from Dr. Austin to
19 you, Mr. Card, cc'ing Ms. Domi- -- Domico,
20 April 25th, 2021 at 4- -- 4:59 p.m?

21 Do you see that?

22 A. I do.

1 Q. And he says, Missy, Andrew, Next
2 Friday is the HSG expert panel call.

3 "HSG" meaning hospital safety
4 group -- grade?

5 A. Yes.

6 Q. As Emma and I were walking through
7 the agenda items, we would benefit from your
8 input and expertise. Best, Matt.

9 Do you see that?

10 A. Yes.

11 Q. And then he puts a list of six
12 items.

13 Do you see that?

14 A. Yes.

15 Q. And there's different colors, black
16 and gray?

17 A. Yes.

18 Q. Now, if you go just -- we'll come to
19 them in a second.

20 If you go up one --

21 A. May I read them, or no?

22 Q. Yeah. I just wanted to --

1 A. Oh, sorry --

2 Q. -- orient you first --

3 A. -- yes.

4 Q. -- you absolutely may read them.

5 But if you look at your e-mail,
6 the next one at 10:09 a.m. -- you see that? You
7 say, See below?

8 A. Yes.

9 Q. And I just want to make sure we're
10 on the same page.

11 My read of this e-mail is that
12 the black text is Dr. Austin's and the gray is
13 your responses; is that right?

14 A. I don't know.

15 Can I take a second --

16 Q. Yeah, read it --

17 A. -- just to read it?

18 Q. -- but I -- I wanted to make sure
19 you saw the See below.

20 A. Yeah. I understand what your
21 question is asking.

22 (Whereupon, the witness reviews the

1 material provided.)

2 THE WITNESS: Yes. I believe
3 that Matt asked for input on those six
4 items. I replied back and added my
5 responses underneath. Yes --

6 BY ATTORNEY CRAIN:

7 Q. In the lighter --

8 A. -- I think that's correct.

9 Q. -- in the lighter text?

10 A. Yes.

11 Q. Great.

12 Okay. So just now that
13 we're oriented, I want to focus on Bullets 2 and
14 4.

15 He says in 2 --

16 This is -- these are agenda
17 items, right?

18 A. Um-hum.

19 Q. -- How to score hospital missing
20 process/structural measures. Are we looking for
21 suggestions on imputation methods?

22 A. Um-hum.

1 Q. And you say, Yes. And the idea to
2 impute for all missing, including Safe Practices
3 and HH â€” I will send a follow-up to the e-mail
4 Andrew sent.

5 Do you see that?

6 A. Yes.

7 Q. And so does this reflect that you're
8 still working together as a group to try and
9 figure out what the right imputation methodology
10 is going to be?

11 A. So I'm going to have to jog my
12 memory, but we have the Hospital Safety Grade
13 expert panel. For this particular subset of
14 that work where we were just working on
15 imputation, we asked for volunteers to form a
16 small subcommittee that would help us work on
17 the imputation with Mathematica and then report
18 back out to the group, and that's because these
19 people have regular jobs. They serve on a
20 voluntary basis. We don't pay them. They
21 receive no honorariums, and so we can't assume
22 they're all going to want to.

1 My memory is that it was
2 Patrick Romano, Sara Singer and maybe a third
3 who participated in that smaller group, but I
4 don't -- I want to say Tim Vogus, but I can't
5 remember.

6 So on the record, I know it was
7 Sara Singer and Patrick Romano.

8 And so they -- I don't know at what
9 point we were talking to Sara and Patrick and
10 Mathematica versus the larger group, so I don't
11 -- so if this is the full agenda -- I'm just
12 trying to put all that in my brain the right
13 way.

14 Q. Do -- do you refer to "HSG expert
15 panel" to mean something else ever?

16 A. No. I think that's the full panel.

17 Q. Okay.

18 A. But where I say on Number 2 -- it
19 says, How does -- Matt's saying, like, Should
20 this be an agenda item? And on Number 2, it
21 says, Yes. And the idea to impute all
22 missing -- I'm not responding to him as if to

1 say, like, Matt, that's what I think the agenda
2 is. I might be reflecting back to him, That's
3 what we talked about with the smaller workgroup,
4 so, like, Patrick and Sara. Like, yes, that is
5 the agenda item. Specifically they wanted to
6 talk about this -- I believe is probably what's
7 happening here.

8 I wouldn't necessarily be the one
9 to decide what goes on in the agenda. It may
10 have been part of a smaller subgroup meeting.
11 And based on that discussion, my impression is
12 this is what they wanted to talk about at this
13 meeting.

14 Q. Okay.

15 A. That's all I was saying.

16 Q. Okay. No, I understand.

17 A. Okay.

18 Q. And "HH," is that hand hygiene?

19 A. Yes.

20 Q. Okay.

21 So I want to look at 4 now.

22 A. Yes.

1 Q. And the agenda item he proposes is
2 Penalizing hospitals if they don't report, and
3 then he says, in brackets, [is this part of
4 Agenda Item Number 2? And is Leapfrog really
5 open to this idea? If not, I don't want to keep
6 asking their opinions].

7 So you -- do you see that?

8 A. Yes, and I say, Remove " this is
9 really covered in Number 2.

10 Q. What did you mean by that?

11 A. That we were focusing on imputation.

12 Q. So focusing on imputation.

13 So he is asking is Leapfrog
14 really open to penalization, right?

15 A. I am -- can read the paper what he's
16 asking, yes.

17 Q. Do you agree with me? Is that a
18 fair read of it?

19 A. I'm going to read verbatim what he
20 said, yes.

21 Q. Yeah. Okay.

22 Is Leapfrog really open --

1 okay. Got it.

2 And you say, We don't --
3 remove. We don't --

4 A. Correct.

5 Q. -- need this agenda item.

6 Right?

7 A. I'm saying, Remove this. We're
8 going to focus on -- remove "this is really
9 covered in Number 2, ideas for imputing.

10 I choked on water. I'm not getting
11 choked up.

12 Q. No, that's okay. I'm getting choked
13 up.

14 A. No, sorry. Wait. Let me clear it
15 up.

16 Q. Yeah, take a second. Take a second.
17 (Pause.)

18 THE WITNESS: Yeah, and I'm
19 saying, Remove this; we're going to
20 focus on imputation.

21 BY ATTORNEY CRAIN:

22 Q. When you say "this is really covered

1 in Number 2" -- so I'm trying to understand is
2 it --

3 A. I'm trying to explain. What I would
4 have meant is, We're going to focus on
5 imputation. Let's get the agenda probably just
6 to focus on imputation.

7 Q. But you didn't say to him, We're not
8 penalizing anybody.

9 Right?

10 ATTORNEY BLAIR: Objection to
11 form: asked and answered.

12 THE WITNESS: I didn't write
13 in a full sentence that, no.

14 BY ATTORNEY CRAIN:

15 Q. Okay. And you're saying that the
16 question of How to score hospitals' missing
17 process/structural measures, are we looking for
18 suggestions on imputation methods?

19 That's his Agenda Item Number
20 2, right?

21 A. Correct.

22 Q. You're saying that penalizing

1 hospitals if they don't report is really covered
2 in Number 2, correct?

3 ATTORNEY BLAIR: Object --
4 objection to form: mischaracterizes
5 the testimony.

6 THE WITNESS: Not correct.

7 BY ATTORNEY CRAIN:

8 Q. Okay. Why --

9 A. I'm saying that -- I'm telling him
10 for the purposes of the agenda it looks like I
11 want to focus on imputation and weighing it on
12 PSI 4, and that's it. So two out of the six
13 agenda items is where I wanted to focus.

14 Q. Okay.

15 A. I don't always write my e-mails in
16 full sentences, particularly with someone I've
17 been working with as long as Matt. So your read
18 and my read may be different, but my intention
19 is to say, I don't want six agenda items. I'd
20 like two.

21 Q. So just to be clear, your testimony
22 is that impu- -- the question of whether to

1 penalize hospitals if they don't report is not
2 covered by the question of how to score
3 hospital's missing process/structural measures?

4 ATTORNEY BLAIR: Objection to
5 form.

6 THE WITNESS: I'm testifying
7 that I don't think I really answered
8 or addressed anything related to
9 penalizing hospitals, but I'm telling
10 him to finalize the agenda with these
11 two items.

12 BY ATTORNEY CRAIN:

13 Q. And not penalization?

14 A. I don't address that topic.

15 Q. Well, you said, "This is really
16 covered in Number 2."

17 ATTORNEY BLAIR: Objection to
18 form: asked and answered.

19 BY ATTORNEY CRAIN:

20 Q. You can answer.

21 ATTORNEY BLAIR: You have to
22 answer it again.

1 THE WITNESS: I'm testifying
2 that I really didn't address his
3 question of penalizing hospitals. I'm
4 telling him to focus in on an agenda
5 that includes two items --

6 BY ATTORNEY CRAIN:

7 Q. Okay.

8 A. -- imputation and PSI 4.

9 Q. Okay. And --

10 A. And do you have the agenda?

11 Q. I don't know.

12 ATTORNEY CRAIN: Do we have
13 the agenda?

14 BY ATTORNEY CRAIN:

15 Q. I'm not sure. We didn't get every
16 agenda, so I don't know if it's because they
17 didn't exist or they weren't produced, but we
18 don't have every agenda.

19 ATTORNEY BLAIR: Lord knows
20 we produced everything.

21 ATTORNEY CRAIN: Okay. Let's
22 go back in time a little bit. I just

1 want to jump there.

2 Let's go to Tab 7 -- 7(a).

3 BY ATTORNEY CRAIN:

4 Q. Now, this, Ms. Danforth, is one of
5 your performance reviews you're going to see.

6 ATTORNEY CRAIN: This is
7 Exhibit 9.

8 ATTORNEY BLAIR: Thank you.

9 ATTORNEY CRAIN: Did I get
10 it?

11 ATTORNEY BLAIR: Yeah.

12 CERTIFIED STENOGRAPHER: Yes.

13 ATTORNEY CRAIN: Okay. I'm
14 not good with the exhibit numbers.

15 THE WITNESS: Oh, I was going
16 to keep one open so I could tell.

17 ATTORNEY CRAIN: Don't write.

18 THE WITNESS: Okay. I'm not.

19 ATTORNEY BLAIR: You can
20 write on it.

21 THE WITNESS: I'll put the
22 cap on the pen so everyone can relax.

1 ATTORNEY CRAIN: All the
2 lawyers are going to have a heart
3 attack.

4 CERTIFIED STENOGRAPHER: One
5 second.

6 --oOo--

7 (Danforth Deposition Exhibit Number
8 9, E-mail with attachment, Bates
9 stamped LEAPFROG02383511 through
10 LEAPFROG02383517, marked for
11 identification, as of this date.)

12 --oOo--

13 THE WITNESS: Thank you.
14 (Sotto voce between cocounsel.)

15 BY ATTORNEY CRAIN:

16 Q. Do you have this, Ms. Danforth?

17 A. Yes.

18 Q. So this is a -- it looks like a
19 performance review from Ms. Binder to
20 Shira Kavanagh.

21 Do you see that?

22 A. Yes.

1 Q. And you'll see in the document it
2 shows your self-analysis, right?

3 A. Correct.

4 Q. If you look at the second page, the
5 Self-Assessment in Relation to Position
6 Description?

7 A. Yes.

8 Q. And this is dated December 16th,
9 2020?

10 A. Yes.

11 Q. And I want to -- I actually just
12 have one inquiry I want to focus you on.

13 If you go to Page 83514.

14 Do you see that?

15 A. Yes.

16 Q. And there's a Roman III --

17 A. Yes.

18 Q. -- and it says, Professional Goals
19 for FY2021 Based On Board-Approved FY2021 Goals.

20 Do you see that?

21 A. Yes.

22 Q. And it says -- now, this is you

1 writing, correct?

2 A. Um-hum.

3 Q. It says, My professional goals over
4 the next year will include the following:
5 Number 1, Implement and refine the new
6 mathematical imputation model for the Hospital
7 Safety Grade to ensure we are well-positioned
8 not just now, but five years from now.

9 Do you see that?

10 A. I do.

11 Q. What -- what does the "five years
12 from now" refer to?

13 A. I have been on a mission to find
14 other sources of data for the Hospital Safety
15 Grade, who could expand the scope of those data
16 sources. What I said right now, it includes two
17 columns, primary, secondary; it could include
18 tertiary.

19 I was being hypothetical, but also
20 it's been something that I've been interested
21 in.

22 It's been disappointing that there

1 have, to date, been a limited number of
2 national data sources available for Hospital
3 Safety Grade measures. With the recent
4 discontinuation of the AHA data -- by this
5 point, we probably knew about it -- I had a
6 focus on identifying other ways to get data on
7 hospitals.

8 One, I'm sure, is probably talked
9 to in here, and if it's not, it's what -- I
10 talk about all the time, is around this time
11 there was the rise of something called
12 all-payer claims databases, all-payer claims
13 databases. It was an initiative at the state
14 level for basically all of the healthcare
15 providers to put all of their claims into a
16 single statewide database so researchers and
17 others could mine a full, complete claims data
18 set.

19 When I was talking to you about the
20 CMS claims measures, one thing about those is
21 it only includes claims from Medicare
22 fee-for-service patients. Today, a lot of

1 Medicare patients have Medicare Advantage
2 plans. Those patients aren't calculated when
3 CMS calculates the rates for those claims being
4 its measures. These state-based all-payer
5 claim databases were theoretically an
6 opportunity for us to generate other sources of
7 data that would be available for all hospitals
8 that had not really been available previously.

9 So it's really a specific focus on
10 making sure that we're constantly not just
11 relying on the data that we have today, but
12 thinking ahead to the data that we might need
13 in five years if other data went away.

14 Q. And, again, why do you need that
15 data?

16 A. So we can continue to advance and
17 refine the work that we do. I think I told you
18 the Safety Grade right now includes things like
19 falls, pressure ulcers, medication safety. Of
20 course, that's important, but there are many,
21 many other aspects of patient safety for which
22 we don't have any data because we don't have any

1 measures.

2 We're constantly on the lookout for
3 new data and new measures, not just for the
4 Safety Grade but also for the Leapfrog Hospital
5 and ASC surveys.

6 It, again, goes back to our
7 mission: If we're going to reduce harm to
8 patients from preventable medical errors, we
9 need more information about the different kinds
10 of preventable medical errors that occur in
11 hospitals.

12 I haven't even talked about some
13 surgical complications that are very common,
14 other kinds of medical --

15 Q. Yeah.

16 A. -- complications that are very
17 common: Transfusion of the wrong blood. There
18 are so many harms that take place. We don't
19 have measures or sources of data, and it's my
20 literal job to constantly be on the lookout for
21 those, and actually our expert panel, but I do
22 have it reflected here.

1 Q. Okay. No, I -- I think I get it.

2 Okay. Let's keep going.

3 ATTORNEY CRAIN: Give me 7 --

4 no, let's not do 7.

5 BY ATTORNEY CRAIN:

6 Q. Okay.

7 Okay.

8 All right.

9 Okay. I'm going to skip to
10 another topic.

11 A. Okay.

12 Q. I want to talk about 2023 and 2024.

13 Okay?

14 A. Yes.

15 Q. I want to start with -- first, are
16 you familiar with a -- a system called HCA?

17 A. Yes.

18 Q. Okay. In 2023, am I right that HCA
19 stopped participating in the Leapfrog Survey?

20 A. I believe that they did not submit
21 2023 Leapfrog Hospital Surveys, correct. They
22 paused participation for one year.

1 Q. Do you know why?

2 A. Yes.

3 Q. Why?

4 A. They had indicated, not to me
5 directly, that they did not want to report on
6 those -- I told you about those nurse staffing
7 and skill mix measures. We had actually only
8 recently added those to the survey probably
9 around 2020, 2023, and they communicated they
10 didn't want to or weren't ready -- I -- this is
11 not verbatim -- want to report on those nurse
12 staffing and skill mix measures.

13 It was not ever shared with me or
14 told to me, but my impression or some
15 assumptions were it had something to do with
16 nursing unions, but I know it was specifically
17 related to those nursing measures.

18 Q. You said "paused for a year."

19 Was -- did you understand their
20 intent was just to take a break and come back?

21 A. I didn't understand that it was
22 their intent. They communicated that. I

1 believe they were asked publicly and said, We're
2 not stopping participation in the survey
3 forever. We're pausing for a year.

4 Q. Got it.

5 A. But I don't think that was something
6 that I inferred. I believe that was something
7 I've seen in writing.

8 Q. Okay. Do you remember where or --

9 A. I don't.

10 Q. Okay. If not, that's okay.

11 A. Okay.

12 Q. Again, just trying -- trying to,
13 like --

14 A. I know.
15 And I have a good visual memory,
16 but --

17 Q. I can tell.

18 A. Yes.

19 ATTORNEY CRAIN: Tab 13.

20 BY ATTORNEY CRAIN:

21 Q. Let's see.

22 So I want to go back to this

1 period, and there's a --

2 ATTORNEY CRAIN: This will be
3 Exhibit 10, right?

4 ATTORNEY BLAIR: Yep.

5 THE WITNESS: Yes.

6 ATTORNEY CRAIN: Okay.

7 ATTORNEY BLAIR: By my count.
8 What do I know?

9 THE WITNESS: I'm keeping the
10 last one open now so I always know.

11 ATTORNEY CRAIN: You can
12 help.

13 THE WITNESS: Yeah. With my
14 capped pen.

15 CERTIFIED STENOGRAPHER: One
16 second.

17 --oOo--

18 (Danforth Deposition Exhibit Number
19 10, E-mail string, Bates stamped
20 LEAPFROG00602604 through
21 LEAPFROG00602605, marked for
22 identification, as of this date.)

--o0o--

THE WITNESS: Thank you.

CERTIFIED STENOGRAPHER: You'

re welcome.

BY ATTORNEY CRAIN:

Q. Okay.

So do you have this in front of
you?

A. Yes.

Q. So this is a document Bates stamped ending 602604, and it's an e-mail thread between and among you, Ms. Campione and Mr. Banerjee.

Do you see that?

A. I do.

Q. And it's, I believe, from -- it's all in November 2023.

Do you see that?

A. Yes.

Q. Okay. And you start the thread. You write to Mr. Banerjee and Ms. Campione.

Do you see that?

A. Yes.

1 Q. And you say, Hi, Kush and Alex, I'd
2 like to get a sense of the number of licensees
3 that don't submit a survey and the percentage of
4 Accolades revenue those facilities represent
5 for, say, the past two years (last four rounds)
6 â€” can the two of you work together on this?

7 Do you see that?

8 A. Yes.

9 Q. Do you recall what your -- do you
10 know what you're asking them to do here?

11 A. I was asking them to do an analysis
12 of our Accolades sales. So an Accolade is --
13 oh.

14 Q. Yeah. What's an Accolade?

15 A. Okay.

16 Q. You got it.

17 A. An Accolade is what --

18 Q. You do your own follow-ups..

19 (Laughter.)

20 THE WITNESS: I paused at
21 least.

22 (Sotto voce discussion.)

1 THE WITNESS: Well, I get
2 asked questions all the time. I'm
3 just used to, like, jumping right into
4 it. So I'm sorry.

5 An Accolade is sort of a
6 term of art. Basically it's a --
7 it's a -- it's a specific copyrighted
8 logo that Leapfrog licenses to
9 hospitals or ambulatory surgery
10 centers who wish to use one of our
11 specific copyrighted logos only in
12 advertising or marketing.

13 So, for example, we do a top
14 ambulatory surgery center award
15 annually. If an ambulatory surgery
16 center, for example, wanted to put up
17 a billboard to say, We're a Leapfrog
18 top ASC -- they purchase or license
19 the -- we call it a "designated logo"
20 from us.

21 And we do have copyrights
22 protecting those logos, so we do have

1 to show, obviously, that we are --
2 we're protecting them.

3 Up until this time of
4 August, you would not have seen me
5 asking these questions because my job
6 was a little bit different. So
7 around this time, what's not in this
8 e-mail is we had had a -- I don't
9 know if she was a director -- I don't
10 know her exact title.

11 I apologize -- but either
12 director or vice president of finance
13 and operations. Around this time of
14 August, she had been let go from
15 Leapfrog. She was actually
16 responsible for this Accolade program
17 and also data licensure through
18 supervision of Kush. So Kush
19 reported to her, and her and Kush
20 reported on all of these things.

21 This was not my area of work
22 at Leapfrog at this time in 2023, and

1 with -- her name was Patrice Brown --
2 with Patrice's departure, I had a
3 conversation with Leah where
4 basically I volunteered to take on
5 Kush's supervision, not just because
6 I thought it was meaningful to the
7 organization, which obviously I do.
8 But, frankly, Kush and I had been
9 working together at this point for,
10 like, eight years.

11 For a number of different
12 reasons, he had reported to, like,
13 four different people in that amount
14 of time, and I personally knew it was
15 very difficult for him to have career
16 growth within our organization. He
17 kept switching bosses, and then they
18 would want to see what he was working
19 on, and, Well, let's wait a year and
20 see where you're at.

21 Then you switch bosses and,
22 like, Oh, well, I'm just getting to

1 know what you're working on. Let's
2 wait a year and see where you're at.

3 And I really felt an
4 obligation and a desire to mentor
5 Kush and make sure that he really had
6 someone stable. I had been at
7 Leapfrog at this point --

8 (Whereupon, as the certified
9 stenographer seeks clarification,
10 colloquy will not be captured on
11 the written record.)

12 THE WITNESS: Yes.

13 I had felt an obligation and
14 a desire to really mentor Kush. I
15 had been at Leapfrog at this point
16 for 13, 14 years. He had been here
17 for eight years. So I said to Leah,
18 I will -- you know, if it's okay with
19 you, I'll start supervising Kush.

20 I didn't know very much
21 about this part of the organization,
22 and I spent probably four to

1 six months asking questions like
2 this, and many, many others, just me
3 trying to learn. Again, for the
4 organization, but also because part
5 of what I was trying to do was assess
6 what our capabilities were and
7 whether or not this is work he could
8 really do on his own, if maybe we
9 needed more staff or more people.

10 So my terminology may or may
11 not be correct in some of these
12 things. And I'm not exactly sure
13 however many other requests like this
14 I have. But during this time -- and
15 it would be reflected in his
16 performance reviews in the future as
17 well -- this was me getting up to
18 speed on this part of our business
19 trying to assess both the actual
20 business requirements of the
21 organization but also thinking that
22 he might need extra staff and just

1 trying to really get a sense.

2 So Alex Campione is the
3 other person on this e-mail, and
4 that's because Kush historically had
5 not had other staff to help him do
6 analyses or projects. Alex wasn't
7 assigned this as part of her regular
8 role or job description, so this was
9 new to her as well, and it's me
10 trying to just figure out what my new
11 job is going to be, basically.

12 BY ATTORNEY CRAIN:

13 Q. So let -- so let's keep going
14 down --

15 A. Yes.

16 Q. -- because I -- so a couple of
17 questions there.

18 A. Sure.

19 Yeah.

20 Q. So you want to get the sense -- so
21 why are you focused on the number of licensees
22 that don't submit a survey as opposed to the

1 number of licensees that do submit a survey?

2 A. I guess I could have asked it the
3 other way as well.

4 Q. Okay.

5 A. I'm just trying to get a sense of --
6 of those that license the Accolade, what's the
7 breakdown of those that do and don't submit a
8 survey. And interestingly, I think no one had
9 ever looked at that before. Maybe I asked for
10 some data, or something. Like, I don't know,
11 and I'm like, Oh, well, I'm going to go ask and
12 find out, but it was just something I was
13 curious about.

14 Q. Okay.

15 A. We watch, obviously, you know, the
16 sales data that comes in, but it's, like,
17 numbers. Like -- and I was just trying to get
18 more information. I come from the ratings team.
19 We look at a lot of data. I was just looking
20 for some data.

21 I could have asked the question in
22 a different way and gotten the same answer.

1 Q. Okay. And you say, Due to Step 1
2 imputation and as the means for the Step 2
3 imputed data increase over time, there is the
4 risk of reducing incentive to submit a survey
5 every year " and I'm starting to see this come
6 through in some of the questions we are getting
7 on help desk.

8 Do you see that?

9 A. Yes.

10 Q. What are you referring to there?

11 A. We were getting questions on help
12 desk --

13 Q. About --

14 A. -- from hospitals basically saying
15 could they skip a year submitting a survey. I
16 think I referred to some of those earlier.

17 Also we were starting to get
18 complaints from hospitals, that they felt that
19 the current imputation we were using at this
20 time in 2023, which was more reflective of the
21 means of hospitals that were reporting to the
22 survey, that they weren't fair or accurate

1 because hospitals were benefiting from the work
2 and resources and investments they were doing.
3 So it was a reflection of those things we were
4 seeing on our help desk.

5 Q. When -- when you say "skip every
6 year," though, doesn't that refer to Step 1 at
7 the time?

8 A. I'm just answering the question 1
9 what questions we are getting.

10 Q. Okay. So you don't think hospitals
11 were saying can we skip a year because our
12 historical score will be imputed?

13 A. Oh. There -- may have been saying
14 both.

15 Q. Okay. Got it.

16 Okay. And then you say,
17 There's the -- there's the risk of reducing
18 incentive to submit a survey every year.

19 Do you see that?

20 A. Yes.

21 Q. Is that referring to Step 1 or
22 Step 2?

1 A. I don't know if I was being that
2 purposeful --

3 Q. Yeah.

4 A. -- in this particular e-mail, but,
5 technically, it would have only referred to
6 Step 1. But to be honest, in this e-mail, I'm
7 not sure I'm focused on the methodology. It was
8 more really a data request.

9 Q. Yeah.

10 Just -- and just to be clear --

11 A. Yeah.

12 Q. -- Step 1 is the one through which
13 Leapfrog imputes a historical score?

14 A. Correct.

15 Q. So there would be some incentive, if
16 you liked your score the last year, to simply
17 rest on --

18 A. Potentially, yes --

19 Q. -- let --

20 A. -- that would --

21 Q. -- let's finish -- to simply rest on
22 that score?

1 A. Yes.

2 Q. Okay. And then you say, I'd like to
3 understand how financial risk if we make changes
4 to how we display grades for hospitals that
5 don't submit.

6 I think there's a missing word
7 there, but --

8 A. Okay.

9 Q. -- just looking at that, what --
10 what is the -- we -- we've learned -- I think
11 Ms. Campione called it "Missy speak," I recall.

12 What is the financial risk
13 you're referring to here?

14 A. I don't know.

15 I do remember the first part very
16 clearly because I had seen no data on Accolade
17 licensure.

18 I don't recall specifically --
19 well, we've made no updates the way that we
20 display Hospital Safety Grades since I've been
21 at Leapfrog.

22 Q. Okay. You don't know what financial

1 risk it could theoretically be?

2 A. I don't because we've never made any
3 changes to the --

4 Q. Okay --

5 A. -- display, so I apologize.

6 Q. -- let's go up through the e-mail
7 and see --

8 A. Yes --

9 Q. -- if it refreshes your memory.

10 A. -- yeah.

11 Q. Alex says, Not a problem. I already
12 have previous licensing data, but if we want to
13 include this round's licensing, I'll need that
14 data. Kush â€” Do you have the licensing so far?
15 We could wait a week -- a few weeks so it's more
16 accurate.

17 Do you see that?

18 A. Um-hum.

19 Q. And that reflects what you had said
20 before, that she generally didn't work on
21 licensing?

22 A. Never until then.

1 Q. And then Mr. Banerjee responds,
2 Could that be why H- -- HCA suddenly stopped
3 submitting?

4 Do you see that?

5 A. Yes, I do.

6 Q. And that refers to the HCA we
7 discussed a little while -- a few moments ago?

8 A. Yes.

9 Q. Okay.

10 And is -- is it right -- am I
11 understanding that he's theorizing that HCA took
12 a -- took a break, much like some of the other
13 hospitals that you were seeing?

14 A. Correct. And the information I
15 shared with you about HCA taking a pause due to
16 not wanting to report on the nursing measures is
17 not information that would have been shared with
18 him if it hadn't been public. It was likely a
19 conversation in a senior management team
20 meeting.

21 Q. But -- well, you said something was
22 public, right, that HCA said?

1 A. I read something --

2 Q. Okay.

3 A. -- I said that I read something.

4 Q. And do you again remember what you
5 had read?

6 A. Just that they were taking a pause
7 and coming back.

8 Q. Okay. But didn't say why?

9 A. No.

10 Q. Okay. And when you say a senior
11 management meeting, who would that include?

12 A. Leah Binder.

13 Q. Okay. So you heard something from
14 Leah Binder about why HCA had stopped
15 participating?

16 A. Yes, specific to the nursing
17 measures.

18 Q. Got it.

19 Okay. So we have to ask her
20 how she heard that?

21 A. Yes.

22 Q. Okay. And then he says, I think we

1 looked at this trend many years ago, and I
2 believe there was correlation to survey
3 participation and A's, as well as participation
4 on licensing. It will be interesting to see
5 where it is now -- where it is at now.

6 Do you see that?

7 A. I do.

8 Q. So could that be the financial risk
9 that you're referring to, if participation goes
10 down, that revenue will go down?

11 A. It might have been.

12 And I guess at this point when I
13 was asking the question, I didn't know what I
14 didn't know.

15 Some months after this in a
16 different type of a request like this, I
17 learned that actually of all of the A's that --
18 all of the hospitals that earned an A Safety
19 Grade -- I think about 22 percent were actually
20 licensing those grades.

21 If I had known at the time that our
22 licensure rate for the A designated logo was

1 that low, I likely would not have asked this
2 question as well. But, again, I'd only seen
3 total numbers, not, like, percentages.

4 So, clearly, there's low uptake of
5 licensing the Hospital Safety Grade A, so I
6 would not have been focused on financial risk,
7 since it was already so low.

8 Q. I see.

9 Okay. Well, I take it -- so
10 are you referring to the deck that Ms. Campione
11 prepared?

12 A. I don't know what deck that is.

13 Q. Okay. When you say "22 percent,"
14 where are you getting that number?

15 A. We have a third-party licensure team
16 that we work with called TelAffects.

17 Q. Okay. Telemarketers?

18 Is TelAffect- --

19 A. They're like telemarketers --

20 Q. Yeah.

21 A. -- yes, but they're called
22 TelAffects --

1 Q. Yeah.

2 A. -- like, T-E-L-A-F-F-E-C-T-S.

3 They produce a summary for us. And
4 I believe 22 percent was on the summary deck
5 that I just saw from the spring cycle, so it's
6 fresh in my mind.

7 Q. Got it.

8 Okay. So let me --

9 A. I -- I -- it would be TelAffects,
10 though, not Ms. Campione.

11 Q. Yeah. So let --

12 A. Okay.

13 Q. -- let me show you Ms. Campione's
14 deck --

15 A. Oh, okay.

16 Q. -- that's -- that's where I was
17 going next.

18 ATTORNEY CRAIN: This will be
19 Exhibit 11.

20 --oOo--

21 (Danforth Deposition Exhibit Number
22 11, Calendar invite, Bates

1 stamped LEAPFROG01073566 through
2 LEAPFROG01073581, marked for
3 identification, as of this date.)

4 --oOo--

5 ATTORNEY CRAIN: And,
6 Ms. Blair.

7 ATTORNEY BLAIR: Thank you.

8 ATTORNEY CRAIN: You're
9 welcome.

10 BY ATTORNEY CRAIN:

11 Q. Okay. This is a document -- I don't
12 know why it's portrait -- or landscape, but do
13 you see it's an e-mail -- or it's a calendar
14 invite from Mr. Banerjee?

15 A. Yes.

16 Q. And it's to you, Ms. Campione and
17 folks from TelAffects, to your point?

18 A. Yes.

19 Q. And attached to this is a slide show
20 deck that Ms. Campione -- I believe it has her
21 name on it.

22 Do you see that?

1 A. Yes.

2 Q. Do you -- does this refresh your
3 recollection as to this -- this document? Do
4 you recall this?

5 A. Yes.

6 Q. What do -- what do you remember
7 about why she created this?

8 A. Because I didn't want to have to go
9 to the third party to get information. I wanted
10 to be able to generate that quest -- answers to
11 my questions in real time using people who
12 worked at Leapfrog --

13 Q. Okay.

14 A. -- so I asked her to pull this
15 together herself instead of relying on
16 TelAffects.

17 Q. And then -- and you joined -- you --
18 you presented it at a meeting with TelAffects,
19 or someone --

20 A. No, no. I -- I had Alex do this as
21 an alternative to waiting for TelAffects to
22 provide something to us. So Alex would have

1 done this.

2 Q. Okay. Do you recall if Ms. Campione
3 presented this on this meeting?

4 A. I know I've seen this slide deck. I
5 don't know if it was on the meeting that's
6 attached to this meeting invite, but I -- I know
7 I've seen this --

8 Q. Yeah. Okay.

9 A. -- slide deck, yes.

10 Q. So just walking through the deck, I
11 want to just focus on -- you mentioned
12 22 percent, and I think that number is on
13 Slide -- there's no numbers, but it's
14 Bates 73575.

15 Do you see that?

16 A. Oh. That's not the -- I do see
17 22 percent, but that's not the 22 percent I was
18 referring to --

19 Q. Oh, okay.

20 A. -- I was saying that overall,
21 only -- of all of the hospitals that have earned
22 an A Hospital Safety Grade, whatever that number

1 is, only about 22 percent of them actually
2 license and use that licensed logo --

3 Q. Okay.

4 A. -- it had not been my understanding
5 previously that it was that low, frankly. I
6 just didn't know. I had only seen, like, a
7 total number --

8 Q. Yeah.

9 A. -- and I'm saying that if I had
10 known then that it was only 22 percent out of
11 whatever the total was, I might not have been so
12 concerned with asking about financial risk
13 because the number was so low --

14 Q. I see.

15 A. -- but this also -- I do see it
16 says, 22 percent licensed that are survey
17 participants and nonsurvey participants, which
18 makes sense.

19 Because, like I said, the majority
20 of hospitals submit surveys, so the majority of
21 hospitals receiving Safety Grades submit
22 surveys. The majority of hospitals -- pretty

1 much every single letter grade is likely also
2 going to be a survey participant just --

3 Q. Yeah.

4 A. -- by virtue of that.

5 Q. Yeah.

6 Yeah. So can you go two slides
7 back, 73573?

8 A. Yes.

9 Q. And it says, Survey -- you see
10 that -- yes -- bunch of --

11 A. Yes --

12 Q. -- little icons?

13 A. -- yes.

14 Q. Survey participants are 10 times
15 more likely to license.

16 A. Yes.

17 Q. And so could that be the financial
18 risk you've been referring to? Participants
19 lead to --

20 A. No. I'm sorry. At this point, I
21 had no idea the number was this low.

22 This would not have rep --

1 22 percent to 2 percent would not have
2 represented -- 2 percent would not have
3 represented a financial risk to me at all.

4 Q. But you didn't know that when you
5 sent the e-mail?

6 A. I had no idea what was -- when these
7 stats -- any stats were related to Accolade
8 licensure when I sent the e-mail, which is why I
9 was asking the question.

10 Q. So what -- what financial risk were
11 you referring to, then?

12 A. I was probably just, again, asking
13 the question. I had not been involved in the
14 finance side of our operations prior to 2023. I
15 may not have been using those terms correctly.

16 I was just asking to see what the
17 breakdown was for my own information.

18 I don't know precisely what
19 financial risk I was referring to at the time.
20 I -- I don't see any financial risk in these
21 numbers as I look at this deck right now.

22 Q. Is -- can financial risk mean

1 something else than loss of revenue?

2 A. I'm -- I don't -- I mean, at the
3 moment, it could have been, like, potential loss
4 of revenue or potential change, or something
5 like that, probably.

6 Q. Okay.

7 Okay.

8 A. Yes.

9 Q. Okay.

10 A. Predeck, postdeck, yes.

11 Q. Okay.

12 All right. Oh, one other quick
13 thing on this deck -- let me just go back to it.
14 Sorry.

15 At this time, was it your
16 recollection that participating was increasing,
17 decreasing or staying the same?

18 A. It's been incrementally, I would
19 say, increasing over time, very incrementally.

20 I think that, you know, the goal is
21 to have as much transparent safety and quality
22 information in this -- coming from the survey

1 again -- we're talking about the survey -- as
2 possible. So that can grow so far, but it's
3 been incrementally increasing over time.

4 But we've been around 2300, 2400
5 now for several years. It might fluctuate a
6 little bit, but it's -- it's been steady at
7 23-, 2400 for several years.

8 Q. Okay. So still at about that
9 80 percent of inpatient beds over time?

10 A. Yes --

11 Q. Okay.

12 A. -- yeah, 75 to 80 percent --

13 Q. Okay.

14 A. -- yes.

15 ATTORNEY CRAIN: We've been
16 going for about an hour --

17 THE WITNESS: Can I just say
18 one thing?

19 BY ATTORNEY CRAIN:

20 Q. Yeah, sure.

21 A. Sorry.

22 So one of the reasons for that,

1 just so it sort of makes sense, is because we
2 do have a lot of health systems that have
3 100 percent participation in the survey. And a
4 lot of those health systems have large
5 hospitals, and so they -- they are large
6 hospitals.

7 Q. So, in other words, a large system
8 could account for a large number of beds, and
9 they stay in and they're stable?

10 A. Yes, yes. And so we don't -- we
11 just don't see a lot of fluctuation, correct.

12 Q. Okay.

13 ATTORNEY CRAIN: Take a
14 little break?

15 ATTORNEY BLAIR: Sure.

16 THE WITNESS: Yeah.

17 ATTORNEY CRAIN: Okay.

18 THE VIDEOGRAPHER: Going off
19 the record. The time is 1429.

20 --oOo--

21 (Whereupon, a recess was taken from
22 2:29 p.m. EDT to 2:47 p.m. EDT.)

1 --oOo--

2 --oOo--

3 (Danforth Deposition Exhibit Number
4 12, E-mail string, Bates stamped
5 LEAPFROG00297580 through
6 LEAPFROG00297581, marked for
7 identification, as of this date.)

8 --oOo--

9 THE VIDEOGRAPHER: Going back
10 on the record. The time is 1447.

11 BY ATTORNEY CRAIN:

12 Q. Okay. So I have given you what I
13 think has been marked Exhibit 12.

14 A. Yes.

15 Q. And it's an e-mail. The
16 Bates Number is ending 297580.

17 Do you see that?

18 A. Yes.

19 Q. Do you recognize this e-mail?

20 A. I know that I wrote it. I'm not
21 going to have a recollection on e-mails. I do,
22 like, 500 e-mails a day. But I wrote this

1 e-mail.

2 Q. Fair enough. Fair enough.

3 Okay. I'll take that.

4 So you see it's February 26th,
5 2024?

6 A. Yes.

7 Q. And you sent to the ratings team?

8 A. Yeah.

9 Q. And is that all of the 10 folks who
10 report to you or a subset?

11 A. This particular e-mail group would
12 not include Kush.

13 Q. Got it.

14 So 9 of the 10?

15 A. Yes.

16 Q. Okay. And so you say, Hi, Everyone.
17 I wanted to let you know that we will be
18 convening the Safety Grade expert panel this
19 spring to discuss updates to the two-step
20 imputation model used to calculate SGs for
21 hospitals that don't submit a survey.

22 Do you see that?

1 A. Yes.

2 Q. And now just so we're on the same
3 page, to the extent you remember --

4 A. Yes.

5 Q. -- the -- the methodology at that
6 point had a Step 1 and a Step 2, right?

7 A. Correct.

8 Q. Let's slow down just a -- let me
9 finish.

10 Step 1 was an imputation of
11 historical store -- scores, correct?

12 A. I'm sorry. Are you talking about
13 the spring 2024 Safety Grade methodology?

14 Q. At that time.

15 A. Do you have that document?

16 Q. I think -- we'll -- we'll come to
17 it. If you don't remember, I can -- I can wait,
18 but --

19 A. Okay. I would prefer to have it in
20 front of me --

21 Q. Okay.

22 A. -- just so I can be as accurate as

1 possible.

2 Q. We'll come to it.

3 Okay --

4 A. Okay.

5 Q. -- so -- so going down -- so you --
6 you then say -- back to the e-mail -- you're
7 going to discuss updates to the two-step
8 imputation model.

9 And then in the next paragraph,
10 you say, Specifically due to the update to the
11 BCMA measure (i.e., the addition of preop and
12 postanesthesia care units), we will propose to
13 retire Step 1 of the imputation method --
14 methodology (i.e., use of the most of the
15 current score from the past four rounds of
16 grades) and move entirely to only using Step 2
17 of the imputation methodology (i.e., mean score
18 of hospital's cohort based on first-year
19 performance).

20 Do you see that?

21 A. Yes.

22 Q. Does that refresh your recollection

1 of what the methodology was at that time?

2 A. So at that time, the methodology
3 would have been --

4 Q. Don't write -- sorry. I thought you
5 were writing.

6 A. Oh, no.

7 Q. Okay. You're good. You're good.

8 A. I was just following --

9 Q. Sorry. We're all on edge.

10 ATTORNEY BLAIR: We're all on
11 edge.

12 THE WITNESS: I capped this
13 last section. We have to have trust.

14 No. I --

15 (Laughter.)

16 THE WITNESS: Yes, we had a
17 two-step methodology previously, if
18 that's the question. Yes.

19 BY ATTORNEY CRAIN:

20 Q. And -- and Step 1 here, it says, Use
21 of the most current score from the past four
22 rounds of grades --

1 A. That's correct.

2 Q. Okay. And Step 2, at that time, was
3 the mean score of hospital's cohort based on
4 first-year performance?

5 A. Yes.

6 Q. Okay. And do you recall why
7 first-year performance?

8 A. We had done some analysis in
9 previous rounds, and because, again, of those
10 concerns that hospitals who were benefiting from
11 these means, and the means were quite high. So
12 I think we looked to see if we could calculate
13 the means of the first years the hospitals
14 reported on these measures as a potential
15 solution.

16 In my recollection, however, I
17 don't know exactly the details of how that came
18 to be.

19 Q. And when you say "we" there, is that
20 Dr. Austin again?

21 A. It would have been myself,
22 Matt Austin. And Alex Campione would have

1 been -- at least had knowledge of those
2 conversations as well by this point.

3 Q. And -- and just to put a fine point
4 on it, when you say "analysis," does that come
5 in a certain documentary form?

6 A. It would probably be in Excel.

7 Q. Okay. And do you recall
8 specifically when that -- you know, do you
9 recall a specific Excel today?

10 A. No.

11 Q. Okay.

12 A. And to be frank, I often don't see
13 the original Excels. They tend to put it in a
14 easier-to-read table format to put in a Word
15 document for me --

16 Q. Or --

17 A. -- I'm not an Excel master.

18 Q. -- or an e-mail?

19 A. Maybe a table in an e-mail, yeah, or
20 a table in a Word document or a table in a
21 PowerPoint slide. I don't typically always see
22 the full Excel document.

1 Q. Okay. But that analysis would have
2 come to you?

3 A. It would have come to me, or they
4 would have told me if there was a difference. I
5 would have known that it occurred.

6 I don't specifically remember
7 physically looking at it, no.

8 Q. Okay. Do you remember when you were
9 told?

10 A. In terms of, like, the mean score of
11 the cohort based on the first-year performance?

12 Q. Yeah. Well, you said there was some
13 analysis done, and I'm trying to figure out if
14 it's documented anywhere.

15 A. It would have been -- so whenever we
16 do things like this, it's going to be documented
17 in a public document called "Proposed Changes to
18 the" -- whatever round hospital scoring
19 methodology, which I know we produced.

20 So it would be, like, fall 2022 in
21 preparation for spring 2023 or spring 2023 in
22 preparation for fall 2022 [sic] a description

1 that -- actual tables themselves. All of that
2 made it usually in those documents, which we
3 publish on our website.

4 Q. Okay. Got it.

5 Okay. And -- and just sitting
6 here today, you have no present memory of
7 looking at that type of document for this
8 analysis that you're referring to?

9 A. No.

10 Q. Okay. And then you say, If you
11 receive questions about the impact of not
12 submitting a 2024 survey on the fall 2024
13 grades, please note to folks that we are
14 reviewing updates to the methodology, including
15 the imputation methodology, with the expert
16 panel and to announce updates later this spring.

17 A. Correct.

18 Q. Okay. Tell me more what -- like,
19 are those the questions where -- we were talking
20 about before on the Zendesk.

21 A. The review to the methodology?

22 Q. If -- if -- you say, If you receive

1 questions about the impacts of not submitting a
2 2024 survey --

3 A. Yes. Yes --

4 Q. Okay.

5 A. -- we would have received those
6 through Zendesk, correct.

7 Q. Okay. One of the ones we talked
8 about before?

9 A. Yes. A's I said, like, we really
10 like to give hospitals advance -- as much
11 advance notice as possible. So I wouldn't want
12 my staff, if we are about to have the expert
13 panel meet, which they do end up meeting in
14 April, say something and then have to find the
15 ticket and say, I know I told you that in
16 February, but now that it's April, the answer's
17 changed.

18 So I always err around the caution
19 and ask them to just tell them to hold up, and
20 we'll be publishing proposed changes soon.

21 Q. Okay.

22 Okay. So you can set that one

1 aside.

2 We're going to move forward.

3 Okay. So I want to talk about
4 -- you said the -- the expert panel met in
5 April?

6 A. Yes.

7 Q. And so are -- do you -- I want to
8 ask you first for your memories about that
9 meeting, and then we can go to some documents.
10 And we'll take it as it comes.

11 Fair enough?

12 A. Yes.

13 Q. So is it -- so the expert panel met
14 on April 12th, 2024.

15 Do you recall that date?

16 A. Only because, as part of this
17 preparation, I had to look at my calendar.
18 Otherwise, I would not have re- -- recalled that
19 date.

20 Q. So you would look back at your
21 calendar to -- to see when the expert panel met?

22 A. Correct.

1 Q. Okay. And did you -- you reviewed
2 Ms. Campione's transcript?

3 A. I scanned Ms. Campione's
4 transcript --

5 Q. Okay.

6 A. -- which was quite lengthy.

7 Q. It was quite lengthy. We had a long
8 day. I think the one I saw was 500 pages.

9 Did you review her testimony
10 about the April 12th meeting?

11 A. Not word for word.

12 Q. Okay. But to some degree?

13 A. I know that she was asked questions
14 about that paragraph.

15 Q. Okay. So I -- I want to ask you
16 some of the same questions.

17 First, let's start high,
18 30,000-foot.

19 A. Got it.

20 Q. What do you remember about the
21 April 12th meeting?

22 A. Can I tell you what I remember?

1 Because it's based on what I had to look up to
2 remember.

3 Q. Whatever you remember today --

4 A. Okay.

5 Q. -- that's what I'm asking for. Your
6 best memory.

7 A. Okay.

8 Q. If it's -- if there aren't memories,
9 that's fine, but your best memory.

10 A. No. So when I looked back at my
11 calendar, I saw that I had -- we had met -- and
12 when I say "we," myself, Matt Austin, Alex
13 Campione had met with one member of the expert
14 panel, Patrick Romano, before the larger expert
15 panel meeting had met.

16 I don't remember it precisely, but
17 my guess is that it was hard to find a date,
18 and the majority of people were available at a
19 certain date and time. And Patrick was
20 available at a different time, so we said we
21 would meet with him on -- one-on-one, but on my
22 calendar, that's how it's notated.

1 Q. And that meeting was about
2 30 minutes?

3 A. The meeting with Patrick Romano was
4 scheduled for 30 minutes.

5 Q. And the -- the larger expert panel
6 meeting was later that day; is that right?

7 A. Yes. That same day for one hour.

8 Q. Between 4:00 o'clock and 5:00
9 o'clock?

10 A. That's how it's scheduled. I don't
11 know that either of them actually ended right on
12 time, both or none could have run over.

13 Q. Fair enough.

14 Now, you -- do you recall who
15 attended the larger meeting?

16 A. I looked at meeting minutes that
17 showed attendance. I could not recite their
18 names off the top of my head right now.

19 Q. Dr. Austin attended?

20 A. Yes.

21 Q. Ms. Campione attended?

22 A. Yes.

1 Q. And then any --

2 A. I was in attendance.

3 Q. Okay. Fair. Yeah.

4 A. Peter Pronovost would have been in
5 attendance, Arjun Srinivasan was in attendance.
6 I know other people were as well. Again, I
7 couldn't recite them, but I did see the list --

8 Q. Great.

9 A. -- in preparation for today.

10 Q. Okay. And we'll come -- we'll look
11 at that list together.

12 So . . .

13 A. Okay.

14 Q. And then it was over Zoom?

15 A. Yes.

16 Q. And do you know if it was recorded?

17 A. Yes.

18 Q. Okay. Have you watched the
19 recording since?

20 A. No.

21 Q. Have you resumed -- reviewed a Zoom
22 transcript?

1 A. No.

2 Q. Okay. I want to know -- during that
3 meeting, do you recall whether imputation -- the
4 imputation model was discussed?

5 A. Yes.

6 Q. Okay. Do you remember -- did
7 Leapfrog present possible changes to the
8 imputation methodology to the expert panel in
9 that meeting?

10 A. I believe so, yes.

11 Q. Okay. Do you remember the nature of
12 those changes?

13 A. I don't, but I know they would have
14 been presented in a PowerPoint format.

15 Q. Okay.

16 A. Matt and Alex would have --
17 Matt Austin and Alex Campione would have
18 prepared them together. I would have reviewed
19 them before the meeting.

20 Q. Yeah.

21 A. But I don't present them, so I
22 wouldn't be able to tell you verbatim what was

1 on the slide.

2 ATTORNEY CRAIN: Okay. Let's
3 go to the slides. That may be the
4 easiest thing. And -- oh, Emily has
5 the slides. She knew what I was going
6 to go to.

7 So this is Exhibit 13.

8 --oOo--

9 (Danforth Deposition Exhibit Number
10 13, Calendar invite with
11 attachment, Bates stamped
12 LEAPFROG00437361 through
13 LEAPFROG00437379, marked for
14 identification, as of this date.)

15 --oOo--

16 ATTORNEY CRAIN: Cindy's
17 nodding.

18 ATTORNEY BLAIR: Thirteen.

19 THE WITNESS: Thank you.

20 CERTIFIED STENOGRAPHER: Sure

21 .

22 ATTORNEY CRAIN: Okay.

1 Tell me when.

2 I'm waiting for Cindy.

3 CERTIFIED STENOGRAPHER: Than
4 k you.

5 ATTORNEY CRAIN: Of course.
6 Of course.

7 BY ATTORNEY CRAIN:

8 Q. Okay. So this is a meeting invite
9 from Dr. Austin.

10 Do you see that?

11 A. Yes.

12 Q. And this is -- this is the meeting
13 we've been talking about, the one-hour,
14 approximately, meeting for the Safety Grade
15 panel?

16 A. Yes.

17 Q. Okay. And you can see the names of
18 the attendees at the top?

19 A. So those are the people who are
20 invited. I don't know, except for the ones I
21 named, if every single one of those attended,
22 but it would be in the meeting minutes, and I

1 believe that you have a copy of those.

2 Q. We'll get there next.

3 A. Okay.

4 Q. Yeah.

5 A. So these were the invitees --

6 Q. Correct.

7 A. -- not the attendees.

8 Q. Fair enough.

9 A. Okay.

10 Q. And Dr. Romano is not an invitee,
11 correct?

12 A. Correct, because he was on the
13 meeting invite prior --

14 Q. Correct.

15 A. -- yes.

16 Q. Okay. So going back, do you see the
17 slide deck?

18 A. Yes.

19 Q. Okay. Was this the slide deck you
20 were talking about a moment ago?

21 A. Yes.

22 Q. Okay. And you'll see there's an

1 agenda on Slide 2?

2 A. Yes.

3 Q. And there are two -- there are three
4 points. I really just want to focus on Point 2.

5 Do you see it says, Feedback on
6 reevaluating imputational model?

7 A. Yes.

8 Q. Okay. And this has been a topic we
9 had seen in other expert notes or agendas from
10 earlier periods, correct?

11 A. Correct.

12 Q. Okay.

13 ATTORNEY CRAIN: So let's
14 skip military treatment facilities,
15 that we value them and appreciate
16 their service.

17 Let's go to Slide 4,
18 Reevaluate Imputation Model.

19 BY ATTORNEY CRAIN:

20 Q. Do you see that?

21 A. Yes.

22 Q. Okay. So this slide, I'll represent

1 to you, Dr. Austin drafted, at least from the
2 documents we've seen. And it says, The problem
3 we are working to solve.

4 Do you see that?

5 A. Yes.

6 Q. And it says Leapfrog -- History:
7 Leapfrog moved to its current imputation
8 approach in 2021 when the
9 American Hospital Association discontinued its
10 survey data license with Leapfrog. (AHA survey
11 had been a longtime secondary data source).

12 Do you see that?

13 A. Yes.

14 Q. Okay. And that was one of the
15 secondary data sources we talked about at the
16 start, right?

17 A. It was.

18 Q. Yeah. And it says, Leapfrog was
19 also seeking ways to grade additional hospitals.

20 Do you see that as well?

21 A. Yes.

22 Q. And -- and, again, why does Leapfrog

1 want to grade additional hospitals?

2 A. Again, because our goal is to
3 provide a public good, a public service, and
4 what's most helpful is for most patients to be
5 able to find information on their hospital.

6 Q. Okay.

7 Now, it says, We are currently
8 facing these challenges, and it has two
9 subbullets.

10 Do you see that?

11 A. I do.

12 Q. So Imputed scores have crept up,
13 making imputation a more favorable choice for
14 lots of hospitals, and has de incentivized true
15 transparency performance.

16 Do you see that?

17 A. I do.

18 Q. Okay. Do you know sitting here
19 today what that conclusion and that bullet is
20 based on?

21 A. That the imputed scores have crept
22 up?

1 Q. Not that. The more favorable choice
2 for lots of hospitals and has de incentivized
3 true transparency performance.

4 A. Likely to anecdotal feedback and
5 stories we're hearing -- hearing, including from
6 some members of the expert panel, that they were
7 hearing that as well.

8 Q. Okay. So not -- not a specific
9 analysis?

10 A. I'm sorry. The part about making
11 imputation a more favorable choice for lots of
12 hospitals?

13 Q. Let me -- let me phrase it this
14 way --

15 A. Okay.

16 Q. -- for nonparticipating hospitals,
17 you don't actually have the data to assess what
18 their performance is, correct?

19 ATTORNEY BLAIR: Objection to
20 form.

21 THE WITNESS: That wasn't the
22 point I was trying to clarify, so I --

1 I'm just trying to take us back to the
2 question.

3 BY ATTORNEY CRAIN:

4 Q. I'm -- I'm shifting questions.

5 A. Oh, you're -- okay. Now we're off
6 this question. Okay.

7 Q. We're -- yeah. We're going -- I'm
8 trying to get at it a different way --

9 A. Okay.

10 Q. -- which, hopefully, will arrive at
11 a clear answer.

12 A. Okay.

13 Yeah.

14 Q. So -- so for nonparticipating
15 hospitals, you don't actually have the data to
16 assess their performance on every metric,
17 correct?

18 A. On those four measures and then the
19 three we talked about, yes.

20 Q. Okay. So is it possible to conduct
21 an empirical analysis to see whether imputation
22 is actually more favorable to them than

1 completing the survey and getting a report that
2 way -- a grade that way?

3 ATTORNEY BLAIR: Objection to
4 form.

5 THE WITNESS: Is it possible
6 to conduct an empirical analysis . . .

7 I'm not sure I understand
8 the question, so I'm hesitant.

9 BY ATTORNEY CRAIN:

10 Q. No, no. Yeah, always ask.

11 A. Yes, I thought you were asking about
12 the imputed scores have crept up.

13 Q. No. I'm asking about the second
14 part.

15 A. Right. And --

16 Q. The more favorable choice part. I'm
17 trying to understand how did you all know.

18 A. And I just said it was anecdotal
19 feedback. I -- we hadn't done an empirical
20 analysis --

21 Q. Okay.

22 A. -- and then you asked if we could

1 have done an empirical analysis, and I was
2 thinking about how we could have done that
3 and . . .

4 Q. Could you have?

5 A. I'm not sure. I wouldn't have been
6 the one to do it or think of how to do it. That
7 would have been Matt and the expert panel.

8 Q. Okay. Fair enough. Fair enough.
9 Thank you. And I appreciate -- the -- the recap
10 was helpful.

11 A. Okay.

12 Q. And then de incentivized true
13 transparency of performance, is that based,
14 again, on anecdotal evidence?

15 A. Yes.

16 Q. Okay. Then it says, Hospitals are
17 using Step 1 imputation (using their individual
18 hospital's historical data) as a reason to not
19 report on the current year's survey.

20 Do you see that?

21 A. Yes.

22 Q. And was that, to your recollection,

1 the core problem being raised at this meeting?

2 A. No.

3 Q. Okay. Tell me what you think the
4 core problem was, then?

5 A. The first bullet point, the imputed
6 scores have crept up.

7 Q. Okay. And why is that a problem?

8 A. Because they were getting so high,
9 as I've described before, that we are hearing
10 from other hospitals, members of the expert
11 panel, that they were so high there was concern
12 that they did not reflect performance.

13 And one way to think of it, or how
14 I think about it, is if you say "average score"
15 to someone or "mean score," if it's a 0 to 100
16 scale or a A, B, C, D, F, people think a 50 is
17 the mean or the average, a C is -- is the
18 average. But because these mean scores were
19 being calculated based on hospitals that were
20 actually doing the things that we're asking
21 them to do on the survey, the mean scores in
22 some cases were 90 to 87 --

1 Q. Sure.

2 A. -- we were really getting away, I
3 think, from the intent -- what we would call
4 "the intent" of using the mean score, which is
5 really looking for an average score, average
6 performance, and we were imputing a near perfect
7 score.

8 And as these means started to creep
9 up -- again, because we're so transparent,
10 every hospital could see it, whether they're
11 doing a survey or not, because we publish the
12 mean scores in our public methodology
13 documents -- and so you can look back at them.
14 I know you have them all -- and see, Oh, it
15 started at a 79, and then it went to an 88, and
16 then it went to a 92. Isn't the highest score
17 a hundred?

18 Is this really a mean score? In
19 fact, anyone even looking at a table called
20 "mean scores" that see scores like 92 would
21 wonder, Hmm, that's kind of high.

22 And so as -- again, as I've

1 expressed earlier, we were hearing from
2 hospitals, you know, This is concerning. This
3 isn't fair. Phrases like, These other
4 hospitals are riding our coattails. We were
5 hearing from our subject-matter experts, that
6 they had concerns, Is this really
7 representative?

8 And as a reminder, just why
9 Leapfrog was founded -- I talk about our
10 mission a lot, but that's why I'm standing here
11 today, frankly. Our mission is to, you know,
12 on behalf of purchasers and employers, make
13 transparent information that's available for
14 patients. I think we really started to have
15 concerns that we weren't doing what was best
16 for patients by imputing these scores that were
17 near a hundred.

18 Q. So -- so just to follow up on that.
19 Let's take handwashing, right.

20 So the hand -- you're saying
21 the mean for handwashing for participating
22 hospitals had crept up, correct?

1 A. So, again, I'm not trying to be
2 nitpicky, but our hand hygiene standard, one
3 element is handwashing, but there are several
4 elements, yes, on our hand hygiene standard.
5 That mean had crept up, correct.

6 Q. Okay. How did you know that
7 nonparticipating hospitals' performance was not
8 also improving?

9 A. It would be difficult for me as
10 someone who's worked at Leapfrog for 16 years
11 talking to hospitals all the time, including
12 hospitals participating in the survey for the
13 first time, that they were doing all of the
14 things it takes to earn -- achieve the standard
15 on our survey.

16 Q. Why would it be difficult?

17 A. Because there was nothing like this
18 before Leapfrog came out with a standard that
19 emphasized these various evidence-based
20 practices.

21 So the WHO, which stands for the
22 World Health Organization, had put out some

1 guidelines about one thing. The association
2 for infection prevention list had put out some
3 information about another component. Another
4 evidence-based group maybe had put out -- what
5 our expert -- expert panel did is actually look
6 across all of these different peer-reviewed
7 sources and said, In the creation of an
8 evidence-based hand hygiene standard that will
9 reduce incidences of healthcare-associated
10 infections and pneumonia and COVID, and those
11 kinds of things, what are across all of these
12 sources, all the things that should be in
13 place, and brought those elements together.
14 And that's why it includes those five domains
15 even though I can only remember four.

16 So maybe someone had been focusing
17 on education; maybe someone had been focusing
18 on observations. But no one that we know had
19 actually brought all of these components
20 together in the structured evidence-based way.

21 In the first year that we put the
22 standard out, hospitals told us -- and we

1 published those comments -- that it was very
2 hard for them to do because they had never been
3 asked to do these things before. So I had a
4 good feeling that a hospital that had never
5 done them, that wouldn't be in place.

6 And I haven't had a chance to talk
7 about this, but whenever we publish changes to
8 the Leapfrog Hospital Survey -- we have a very
9 extensive public comment period, just like we
10 do when I publish changes to the
11 Leapfrog Hospital Safety Grade where publicly
12 we talk about, in this case, the new hand
13 hygiene standard.

14 I think that first year we got 600
15 comments from hospitals saying the standard was
16 really hard. We publish responses to those
17 comments, and you can see that process playing
18 out in a very public way in discourse.

19 So I would say just based on that
20 and those 600 comments, it would be difficult
21 for me to assume that a hospital that had never
22 done these things before through the survey was

1 voluntarily doing them without telling us.

2 Q. So -- so let's -- let's take Delray
3 as an example --

4 A. Okay.

5 Q. -- right, because Ms. Binder
6 published an op-ed on Delray, which I know
7 you've seen.

8 A. I have not read.

9 Q. Oh, okay. It was sent to you?

10 A. Yeah, I'm sure it was.

11 Q. Okay. You don't know --

12 A. I may not have -- I'm sure it was
13 sent to me. I did not read it --

14 Q. Okay.

15 A. -- I don't read everything that gets
16 sent to me.

17 Q. Ms. -- fair enough. That's true of
18 us all.

19 Ms. Binder says that Delray had
20 been an A, right?

21 A. I'm sorry. Do you have --

22 Q. Sure. We can get you the op-ed.

1 ATTORNEY CRAIN: Do you want
2 to grab the op-ed?

3 THE WITNESS: I'll -- I'll
4 keep this -- I just -- I don't want
5 to --

6 BY ATTORNEY CRAIN:

7 Q. No, no. Yeah.

8 A. Okay.

9 Q. Ms. Binder says in her op-ed -- and
10 we'll get you a copy in a second -- that Delray
11 had been an A and that her grandmother had
12 gotten care at Delray and had thought it was
13 very clean and that people were taking the
14 requisite handwashing -- you know, they were
15 doing the right handwashing habits.

16 And we will get you the copy
17 right now.

18 ATTORNEY CRAIN: This will be
19 Exhibit 14.

20 ATTORNEY BLAIR: I'll just
21 object to form: I'm not sure it says
22 that.

1 ATTORNEY CRAIN: Well, we'll
2 read it.

3 ATTORNEY BLAIR: Fourteen.

4 ATTORNEY CRAIN: Fourteen.
5 Okay.

6 --oOo--

7 (Danforth Deposition Exhibit Number
8 14, Article, marked for
9 identification, as of this date.)

10 --oOo--

11 ATTORNEY CRAIN: Okay.

12 That's simple work habits.

13 (Laughter.)

14 BY ATTORNEY CRAIN:

15 Q. So this is Ms. Binder's op-ed in
16 The Palm Beach Post.

17 Do you see that?

18 A. Yes.

19 Q. And it says -- if you look at the --
20 the third full para- -- the last full paragraph
21 on the page, it says, I remember people who
22 worked at one of the hospitals â€œ

1 Delray Medical Center â€” from 2014.

2 Do you see -- are you with me?

3 A. Mine says, I don't relish this
4 fight, even if --

5 Q. Yeah. I'm going a couple sentences
6 down.

7 A. Oh, I'm sorry. Yes.

8 Q. No, you're -- you're on the right
9 paragraph.

10 Do you see -- do you see "I --
11 I remember"?

12 A. Yes.

13 Q. Okay. I remember people who worked
14 at one of the hospitals â€” Delray Medical Center
15 â€” from 2014 when I spent three days there
16 visiting my grandmother, now a blessed memory.
17 At that time -- at the time, the hospital earned
18 an A Safety Grade from Leapfrog, and it showed.
19 It was clear everyone working there paid
20 attention to the simple work habits that can
21 mean life or death for vulnerable patients, like
22 frequent handwashing and double-checking

1 medication orders. The staff was friendly and
2 kind.

3 Now, do you see that language?

4 A. I do.

5 Q. Delray subsequently stopped
6 participating in this survey, right?

7 How is it that -- so is your --
8 you just gave me an assumption that hospitals
9 that were not working to achieve Leapfrog's
10 standards could be assumed that they are low --
11 that their performance is lower than the mean,
12 right?

13 A. Can I correct one thing?

14 Q. Something I said, or something in
15 the op-ed?

16 A. Something related to both.

17 Q. Sure. Go ahead.

18 A. Okay. Because my -- my answer to
19 your questions aren't going to make sense if I
20 don't. I'm sorry.

21 Q. I want your answers to make sense.

22 A. So this says "Delray Medical Center

1 in 2014."

2 Q. Yeah.

3 A. Leapfrog didn't have a national hand
4 hygiene standard in 2014. Our hand hygiene
5 standard wasn't developed until -- oh, my
6 goodness -- later.

7 Q. Okay.

8 A. I would say -- not exactly sure, but
9 within the past five or six years. So I just
10 want to be clear that in 2014, Leapfrog didn't
11 have the hand hygiene standards we have in our
12 survey now. That's now included in the Hospital
13 Safety Grade.

14 So I can't answer any of your
15 questions related to hand hygiene specific to
16 our standard.

17 Q. I hear you.

18 A. And that's why I wanted to clarify
19 that because we've been talking about so much
20 about that standard, and I just gave you a long
21 response related to that standard. That
22 standard was not even a thought in anyone's

1 brain in 2014.

2 Q. And yet Ms. Binder's kind of drawing
3 that connection, isn't she?

4 A. I don't --

5 ATTORNEY BLAIR: Objection to
6 form.

7 BY ATTORNEY CRAIN:

8 Q. You can answer.

9 ATTORNEY BLAIR: Yeah, you
10 can answer.

11 THE WITNESS: Oh, I don't see
12 her referencing our hand hygiene
13 standard.

14 BY ATTORNEY CRAIN:

15 Q. Well, she says, The hospital earned
16 an A Safety Grade from Leapfrog and it showed.
17 It was clear with -- clear everyone working
18 there paid attention to the simple work habits
19 that can mean life or death for vulnerable
20 patients, like frequent handwashing.

21 So --

22 A. I don't think she's trying to make a

1 connection to Leapfrog's hand hygiene standard,
2 which didn't exist. I think she's trying to
3 reference something that she personally might
4 have visibly seen.

5 But, again, I -- I'm just reading
6 this now for the first time. I just wanted to
7 be clear that --

8 Q. Yeah.

9 A. -- we did not have a hand hygiene
10 standard in 2014. That couldn't be what's being
11 referenced here because it did not exist, and I
12 don't want any comments that I might make
13 related to handwashing to be confused that I'm
14 talking about our hand hygiene standard.

15 Q. Okay. You don't think at all
16 reading this that she's connecting the A Safety
17 Grade with the frequent handwashing and
18 double-checking medication orders?

19 ATTORNEY BLAIR: Objection to
20 form.

21 THE WITNESS: So one
22 important aspect that's been a thread

1 throughout the entirety of the
2 Hospital Safety Grade from 2013 to
3 now -- and, in fact, many of our press
4 releases have actually highlighted
5 this specific set of measures -- are
6 those five healthcare-associated
7 infection measures that we talked at
8 length about from NHSN.

9 At that time in 2014, those
10 infection measures would have been
11 included in here. During that time
12 throughout history, people have
13 associated handwashing with
14 healthcare-associated infections. So
15 it's not unreasonable to think that
16 if a hospital had an A Safety Grade,
17 it may have been related that they
18 had a lower infection rate, which you
19 can't see infection rates, but she
20 may have seen handwashing. But I'm
21 saying there's -- there can be no
22 reference to our hand hygiene

1 standard because it just simply
2 doesn't exist.

3 BY ATTORNEY CRAIN:

4 Q. So is it unreasonable to think that
5 an A hospital has frequent handwashing and
6 double-checking medication orders?

7 A. Is it unreasonable to think that an
8 A hospital frequently washes --

9 Q. Has frequent handwashing -- I'm just
10 using her language -- and double-checking of
11 medication orders?

12 ATTORNEY BLAIR: Objection to
13 form.

14 What year?

15 BY ATTORNEY CRAIN:

16 Q. In the present.

17 A. In general?

18 Q. In general.

19 A. I don't think that's unreasonable.

20 Q. Okay. Is it reasonable to think
21 that an F hospital does not have frequent
22 handwashing and does not double-check medication

1 orders?

2 ATTORNEY BLAIR: Objection to

3 form.

4 BY ATTORNEY CRAIN:

5 Q. In general.

6 A. I'm sorry. Is -- is that statement
7 in here as well?

8 Q. I'm -- I'm contrasting with --

9 A. Oh, I'm sorry.

10 Q. -- yeah -- F hospital is no.

11 I'm just trying to understand.

12 Is it -- is it reasonable to
13 think that an F hospital does not have frequent
14 handwashing and double-checking of medication
15 orders, in general?

16 A. I -- it's really difficult -- can I
17 just read the whole thing? I just want to make
18 sure I understand the context of these things.

19 Q. It's not really a question about her
20 article --

21 A. Oh, okay.

22 Q. -- it's just a general question.

1 A. Is it reasonable to think that an F
2 hospital doesn't have those things in place?

3 Not necessarily. I mean, again,
4 the Safety Grade is made up of 22 measures, so,
5 theoretically, a hospital could not have
6 things -- those things in place and be doing
7 well in the other areas.

8 I've seen all combinations on
9 performance across these 22 measures --

10 Q. Yeah.

11 A. -- and there's so much variation. I
12 just -- an A hospital might not have it, and an
13 F hospital might not have it because there are
14 so many other things that go into calculating
15 hospital safety.

16 Q. Okay. Let's keep going on this
17 deck.

18 Do you have it up? This was
19 Exhibit --

20 A. I'm sorry. Are we going back to --

21 Q. Back to April 12th --

22 ATTORNEY BLAIR: Thirteen.

1 BY ATTORNEY CRAIN:

2 Q. -- Exhibit 13 on April 12th.

3 A. Yes.

4 Q. Yeah. That's going to get
5 confusing.

6 Okay. So I want to take you to
7 Slide 7.

8 A. Yes.

9 Q. And we had talked -- you wanted to
10 see what the current imputation model was.

11 Is this an accurate reflection
12 of what the imputation model was at the time?

13 A. Yes, I'm sure it is if it's on this
14 slide.

15 Q. Okay. Do you want to take a second
16 to look at it, or are you confident of that?

17 A. If you're going to ask me detailed
18 questions about it, I will -- I will scan it.

19 Q. Okay.

20 (Whereupon, the witness reviews the
21 material provided.)

22 THE WITNESS: Yes, this is

1 correct.

2 BY ATTORNEY CRAIN:

3 Q. Okay. That's all I wanted to know,
4 if it was accurate.

5 So let's go to Slide -- I'm
6 going to skip to -- let's see -- Slide 13.

7 A. Yes.

8 Q. And this slide says, Proposed Future
9 Imputation Methodology.

10 Do you see that?

11 A. Yes.

12 Q. And so I'm going to walk you through
13 this slide.

14 Here is -- to your
15 recollection, is this slide the methodology that
16 Leapfrog proposed to the safe -- to the Safety
17 Grade expert panel?

18 A. By virtue of it being in this deck
19 and attached to this -- attached to this e-mail
20 notice, yes.

21 Q. Okay. Do you have any reason to
22 believe any other proposal was put forward to

1 the panel in the meeting?

2 A. On these slides or through
3 discussion?

4 Q. Either/or.

5 A. Through discussion, many other
6 options --

7 Q. Okay.

8 A. -- were discussed, which is my
9 recollection --

10 Q. Okay.

11 A. -- but we brought Proposed Future
12 Impu- -- Imputation Methodology, Slide 13, to
13 the panel. Through their discussion, other
14 ideas surfaced, but this is the only one that we
15 proposed.

16 Q. Got it. That's helpful.

17 Do you remember, sitting here
18 today, what the other ideas were at the meeting?

19 A. Through discussion, yes. And that's
20 why I remember Arjun Srinivasan being at the
21 meeting. My recollection is that he suggested
22 rather than imputing means, we should impute 0.

1 Arjun Srinivasan is a military
2 doctor. He's one of the highest ranking
3 military physicians at the CDC. He is a
4 lifelong epidemiologist.

5 One of his many roles is to oversee
6 that NHSN program, that healthcare-associated
7 infections program. He's one of the foremost
8 scientists in the world related to patient
9 safety and, particularly, infection
10 prevention -- just his criterion --

11 Q. Get it --

12 A. -- in case you don't know him --

13 Q. -- yep.

14 A. -- I remember him suggesting that we
15 impute 0.

16 I believe Dr. Peter Pronovost had
17 suggested that we take a look at maybe
18 imputing, like, the lowest quartile -- instead
19 of the mean, the lowest quartile performance.

20 There may have been other
21 recommendations as well. The 0 stuck out the
22 most to me.

1 Q. Let me ask you, on -- on the lowest
2 quartile proposal, was he propose -- what --
3 what does that mean? How does that -- is that a
4 mean of the lowest quartile?

5 A. So we had been imputing these means,
6 which, again, in my mind, weren't really
7 reflecting what we meant by mean or average
8 score. They were in the 90s, 80s, et cetera.

9 I think in proposing quartiles and
10 the lowest quartile, the bottom quartile -- I
11 don't remember exactly -- he was thinking we
12 need to impute a number that's less than this,
13 right. Like, these are clearly too high.

14 He had been one actually to share
15 that he was hearing from hospitals why would we
16 do the survey when I can get this phenomenal
17 score imputed? And so he was brainstorming
18 verbally, how about the lowest quartile.

19 I don't remember if it was the mean
20 or the lowest quartile -- or the lowest
21 quartile. And I would not have been the one to
22 calculate it, so I may not have been zeroed in

1 on that exact wording.

2 Q. Let -- let me ask just the question.

3 If it wasn't the mean of the
4 lowest quartile, do you know how it would
5 otherwise have been calculated?

6 A. It would just be the lowest quartile
7 scores. He would just array, I believe, all of
8 the scores. And I think there's a formula that
9 you can --

10 Q. Fair enough.

11 It's beyond my pay grade, too.

12 Okay. Now, going back to this

13 Slide 13 --

14 A. Yes.

15 Q. -- just walking through briefly, it
16 says, Retire Step 1 Imputation for all measures.

17 Do you see that?

18 A. Yeah.

19 Q. That was what -- one of the things
20 you proposed, right?

21 A. Yes.

22 Q. And that was not ultimately conduct

1 -- done, right?

2 A. Correct.

3 Q. Instead, you narrowed Step 1 from
4 four surveys to, I think, two; is that right?

5 A. No. It's close.

6 Q. How did -- how did I get -- confuse
7 that?

8 A. Okay. So it's not four surveys
9 because the surveys are annual --

10 Q. Got it.

11 A. -- and so they're used in two --

12 Q. Got it.

13 A. -- different safety scores --

14 Q. Okay.

15 A. -- two different Safety Grades --

16 Q. Yep.

17 A. -- so we narrowed it from the past
18 four rounds of the Safety Grade to the past two
19 rounds of the Safety Grade --

20 Q. I'm always conflating. Yeah. Got
21 it.

22 Okay. So just to restate it --

1 A. Yes.

2 Q. -- so you took it -- Step 1 you took
3 from the past four Safety Grades to two rounds
4 of Safety Grades?

5 A. Correct.

6 Q. Okay. Then Step B here says, An
7 imputation for all hospitals of CPOE, BCMA and
8 hand hygiene.

9 Do you see that?

10 A. Yes.

11 Q. And it looks like there are a few
12 options here.

13 Assign hospitals that do not
14 complete the most recently Leapfrog survey to
15 cohorts; Calculate the mean of scores obtained
16 in each hospital's first year of reporting on
17 the current standard by the Leapfrog Hospital
18 Survey --

19 A. Yes.

20 Q. -- and then Hospital is assigned the
21 mean for their cohort.

22 Do you see that?

1 A. Yes.

2 Q. And that was ultimately not adopted
3 either, right?

4 A. Correct.

5 Q. Okay. And instead, for Step 2,
6 Leapfrog imposed the limited achievement score,
7 correct?

8 A. Leapfrog imputes the numerical score
9 associated with the performance category for
10 each individual measure as limited achievement,
11 yes.

12 Q. In Step 2?

13 A. Yes.

14 Q. And Step 1 is still historical,
15 correct?

16 A. Correct.

17 Q. Yeah. Okay.

18 Okay. And that is the end of
19 this slide deck in this topic.

20 Do you see that on the next
21 slide, New Measures Under Consideration --

22 A. Yes.

1 Q. -- talking about hypo- --
2 hyperglycemia?

3 Do you see that?

4 A. Yes.

5 Q. Okay. Let's see.

6 So I think -- does this refresh
7 your recollection as to what was discussed at
8 the meeting? It sounds like it may, given what
9 you remembered about Arjun.

10 A. So I remembered the comments from
11 Arjun and Peter because I was surprised to hear
12 0 --

13 Q. Yeah.

14 A. -- that felt interest -- that felt
15 extremely -- like, you -- you kept saying, Isn't
16 that the lowest number, and I was like, No,
17 that's not the lowest number.

18 So that -- and I remember Peter
19 specifically talking about hearing from
20 colleagues why do the survey because they could
21 have this other -- there are other details of
22 the particular meeting, though, that I

1 refreshed in preparing for today.

2 Q. Okay.

3 Tell me -- tell me what you
4 remember -- what you refreshed on.

5 A. I just reviewed other documents
6 related to the meeting because I couldn't
7 remember the --

8 Q. You mean the meeting minutes?

9 A. Yeah -- yeah --

10 Q. Okay. Let's -- let's go to that --

11 A. -- there are meeting minutes, yes.

12 Q. -- yeah, we have that next.

13 ATTORNEY CRAIN: Let's -- is
14 that 30A?

15 Yeah.

16 Okay.

17 All right. Oh, boy. This
18 is Exhibit 14 --

19 THE WITNESS: Fifteen.

20 ATTORNEY CRAIN: Fifteen.

21 Okay.

22 ATTORNEY BLAIR: Oh, man. I

1 had them out of order.

2 THE WITNESS: Because we went
3 out of order. And the article is 14.

4 ATTORNEY BLAIR: Yeah.

5 ATTORNEY CRAIN: Okay.

6 --oOo--

7 (Danforth Deposition Exhibit Number
8 15, E-mail string, Bates stamped
9 LEAPFROG00205986 through
10 LEAPFROG00205990, marked for
11 identification, as of this date.)

12 --oOo--

13 THE WITNESS: Thank you.

14 BY ATTORNEY CRAIN:

15 Q. Okay. You ready?

16 A. Yes.

17 Q. Okay. These are the -- the --
18 you've -- this is one of the documents you
19 prepared for today -- looking at?

20 A. Yes, because I couldn't remember who
21 attended the meeting, and this has them all
22 listed.

1 Q. I see you got excited there.

2 Okay. So let's start at the

3 top --

4 A. Yes.

5 Q. -- this is Exhibit 15. It's

6 Bates Number 205986 --

7 A. Yes.

8 Q. -- and it -- the last e-mail is from
9 you to Ms. Campione: Can you save in expert
10 panel folder?

11 Do you see that?

12 A. Yes.

13 Q. And what is the expert panel folder?

14 A. When Matt or Preeti send out the
15 materials we have on our shared drive, where
16 my -- the staff is supposed to save the document
17 so I don't have to search for them in e-mail --

18 Q. Fair enough.

19 A. -- it happens about 50 percent of
20 the time. I want to be on the record for that.

21 Q. Documents started helping.

22 Yeah, I got it.

1 A. Problem.

2 Q. All right. Let's -- let's go to
3 the -- the notes.

4 Now just -- just some -- some
5 table setting --

6 A. Yeah.

7 Q. -- is there a process by which the
8 notes are created?

9 A. I don't create the notes --

10 Q. Okay.

11 A. -- Matt's research -- Matthew
12 Austin -- Matt Austin's research assistant has
13 always sent out the notes.

14 I think Matt and his research
15 assistant take the notes, and then they
16 consolidate them and then they send them out.

17 No one at Leapfrog -- none of my
18 staff take any notes during any expert panel
19 meetings --

20 Q. Okay.

21 A. -- that are used for the record.

22 Q. Got it. Okay.

1 Okay. Now, this -- so let's
2 just walk down this -- this document together.

3 It says, Meeting Notes, at the
4 top.

5 Do you see that?

6 A. Yes.

7 Q. And Friday, April 12th, 2024, from
8 4:00 to 5:00 p.m. --

9 A. Yes.

10 Q. -- you see that?

11 Wow. Late Friday meeting.

12 And do you -- just looking at
13 these attendees, do you have any reason to think
14 that this is incorrect?

15 A. No.

16 Q. Then it looks -- if you look just at
17 the document from the 30,000-foot level --

18 A. Yes.

19 Q. -- you see it's three agenda points,
20 right?

21 A. Yes.

22 Q. And those correspond to the three we

1 saw in the deck, right?

2 A. Yes.

3 Q. Okay.

4 Slow down. Yeah. You've got
5 to not interrupt for -- for Cindy.

6 So I want to focus on Number 2.
7 And it says, Proposed changes to the imputation
8 model.

9 Now, it starts with Matt
10 provided the expert panel with a quick overview
11 of the current imputation model approaches
12 Leapfrog has been using and some of the
13 challenges those approaches have created for
14 issuing accurate grades.

15 Do you see that?

16 A. Yes.

17 Q. And then the next bullet lays out
18 the current model at that time, right?

19 A. Yes.

20 Q. Analogous to the slide we looked at,
21 right?

22 A. Yes.

1 Q. Yes.

2 And then it says, Leapfrog's
3 proposal was to retire Step 1 of the model and
4 use only Step 2, assigning hospitals the mean
5 score for their cohort.

6 Do you see that?

7 A. Yes.

8 Q. And that -- that -- to the best of
9 your recollection, that's what happened?

10 A. Yes.

11 Q. Arjun mentioned one of the concerns
12 with the current Step 2 imputation method is if
13 a hospital is performing very poorly, they could
14 choose to not submit a survey and get a better
15 score than their actual performance by just
16 being part of a certain cohort.

17 Do you see that?

18 A. Yes.

19 Q. And is that the -- the -- one of the
20 problems we saw on that first slide?

21 A. Yes.

22 Q. Okay. Peter asked whether Leapfrog

1 has a way to keep the low-performing hospitals
2 in the lowest quartile using this Step 2
3 imputation model.

4 Correct?

5 A. Peter did -- that's noted here, yes.

6 Q. Yeah.

7 And -- and that -- that's
8 consistent with the memory that you talked about
9 earlier today?

10 A. Yes.

11 Q. Did you -- did you have that memory
12 before you refreshed yourself with this
13 document?

14 A. I didn't remember anything from this
15 meeting before I refreshed myself with this
16 document.

17 Q. Got it. Just to be clear. Okay.
18 Understood. Many years ago -- or actually, one
19 year ago.

20 The expert panel were in
21 support of having hospitals share their current
22 performance, so liked the idea of imputing the

1 equivalent of Willing to Report to hospitals
2 that do not submit a survey.

3 Do you see that?

4 A. Yes.

5 Q. And what -- what does "willing to
6 report" mean?

7 A. So "willing to report" is the old
8 term we used to use instead of "limited
9 achievement" that was associated with one filled
10 cell phone bar.

11 So Leapfrog's public reporting
12 website has gone through some evolutions, and
13 those four descriptive performance categories
14 that we described have gone through some
15 evolution.

16 So if you looked at a survey from
17 probably 2020, 2021, 2022, instead of "limited
18 achievement," you would see "willing to
19 report."

20 Q. Got it.

21 Okay.

22 A. Um-hum.

1 Q. Do you have an independent
2 recollection of whether anybody specifically
3 raised the phrase "willing to report"?

4 A. I don't.

5 Q. Okay. So you're not -- you don't
6 recall today whether this bullet is accurate?

7 A. I don't.

8 Q. Okay. Then, Peter noted that
9 Leapfrog's message on this change will be
10 critical because, if done correctly, it can help
11 enhance focus on safety; otherwise, it has the
12 potential to backfire.

13 Do you see that?

14 A. Yes.

15 Q. Okay. Do you recall what he meant
16 by that?

17 A. Probably that hospitals would be
18 angry. And he knows that I take those calls,
19 and he likes me and cares about my health and
20 well-being.

21 Q. Fair enough.

22 And -- and to the -- and to

1 that point, you said, Missy asked the expert
2 panel to what extent the health systems that
3 wanted to partner with Leapfrog could help
4 deliver this message.

5 A. Yes.

6 Q. Do you recall raising that?

7 A. Yes. Probably when Peter said his
8 part, I said, Oh, Peter, you're volunteering to
9 help --

10 Q. Okay.

11 A. -- I'll take your help and find
12 friends. Yeah.

13 Q. Do you -- do you recall thinking
14 that hospitals would be upset with this change?

15 A. I recall thinking that hospi- --
16 hospitals are going to be upset with any change
17 that we make to the methodology. So -- and I --
18 I think I told you a lot of the calls I take are
19 with hospitals, explaining changes.

20 And in this particular regard, we
21 had gotten some strongly worded e-mails from
22 hospitals on the other side saying how can

1 Leapfrog do this. I assumed we would be
2 getting strongly worded e-mails saying how can
3 Leapfrog do this now.

4 Q. Got it.

5 Okay. Is there anything else
6 you remember from the meeting besides the things
7 noted on this document?

8 A. No, except as I -- as I think I've
9 already described, there would be, like, a video
10 and a Zoom transcript. I just haven't rewatched
11 the video and haven't read the Zoom transcript.

12 Q. Okay.

13 Okay. Let's see.

14 ATTORNEY CRAIN: Sorry. Just
15 give me one minute.

16 BY ATTORNEY CRAIN:

17 Q. Okay. So I want to just go through
18 one other thing.

19 A. Okay.

20 ATTORNEY CRAIN: Let's go to
21 Tab 17. This is a Slack chat.
22 Sixteen.

1 --oOo--

2 (Danforth Deposition Exhibit Number
3 16, Text string, Bates stamped
4 LEAPFROG00139558 through
5 LEAPFROG00139561, marked for
6 identification, as of this date.)

7 --oOo--

8 THE WITNESS: Thank you.

9 BY ATTORNEY CRAIN:

10 Q. Okay. Are we ready?

11 A. Yes.

12 Q. Okay. So, Ms. Danforth, this is
13 Exhibit 16. It's a Slack chat between you and
14 Ms. Campione and a Slackbot.

15 Do you see that?

16 A. Yes.

17 Q. And it's dated April 12th.

18 You see that?

19 A. Yes.

20 Q. Okay. And it -- it's -- that's the
21 date of the meeting, right?

22 A. Yes.

1 Q. And I'm just going to focus you on,
2 first, 2:24.

3 Do you see that time stamp?

4 A. Yes.

5 Q. And it says, Missy, I can only be on
6 the phone during the SG panel call. Do you
7 think that will be an issue?

8 And Ms. Campione says, I don't
9 think so. Matt will be leading and is making
10 the case for the imputation change. I'm
11 assuming he brushed up on the new measures.

12 You say Okay, and then you say,
13 And I know the slides.

14 Do you see all that?

15 A. Yes.

16 Q. Okay. And then several hours pass
17 by and -- I want to focus you on 4:42.

18 Do you see that?

19 A. Yes.

20 Q. And you say, Sara ans Peter sold
21 this for us.

22 A. I think that's a typo.

1 Q. Yeah. I just wanted to read it
2 accurately before Kim objects.

3 So I assume you meant "and"?

4 A. Yes.

5 Q. Yeah.

6 Do you -- do you have a present
7 recollection of what you meant, "Sara and Peter
8 sold this for us"?

9 A. Yes, because I had to -- I reviewed
10 this --

11 Q. Okay.

12 A. -- I had to review all of these
13 things to remember. And I think I was
14 indicating that they were strongly supporting
15 whatever our idea was.

16 Q. Okay. The idea on the deck or the
17 idea that ultimately became the model?

18 A. I don't know. Just that we were
19 going to make a change.

20 Q. Okay. And then you say, I wish
21 Patrick was on this call.

22 Any --

1 A. Yes.

2 Q. -- recollection as to why?

3 A. Because he wasn't, one --

4 Q. Fair.

5 A. -- but I -- probably because -- so I
6 didn't remember this, but I -- again, in my
7 preparation and review to make sure I was
8 prepared, in reviewing e-mails, I did see
9 e-mails from Patrick.

10 I am making the assumption that
11 when we had our call with Patrick, he was not
12 as enthusiastic about changes as Sara and
13 Peter. But I honestly don't remember the call
14 -- remember the call with Patrick. It is on my
15 calendar. I'm sure I was there. I just don't
16 have a recollection of the call.

17 And on this call, again, because I
18 said -- I was only on the phone, so I know -- I
19 do remember being on the phone. I'm sure I
20 reviewed the slides before they were presented,
21 but I must have been, like, on my phone
22 Slacking Alex.

1 So I did have to refresh my memory.

2 I did --

3 Q. Yeah.

4 A. -- not have a strong memory of this.

5 Q. Okay. So -- so you say, 4:42,
6 pushing the bottom 25 percent idea --

7 A. Yes.

8 Q. -- is that Dr. Pro- -- Pronovost's
9 quartile thought?

10 A. I think so --

11 Q. Okay.

12 A. -- I mean, again, I -- I can't -- I
13 don't know what slide was up at the time or
14 where we were in the transcript, but that makes
15 sense based on the notes.

16 Q. Yeah.

17 And then you say, I secretly
18 love that.

19 Any idea -- with lots of
20 exclamation points.

21 Any idea why?

22 A. I thought it might help the idea of

1 using quartiles as something that is commonly
2 used. Everyone typically -- though
3 three minutes ago we said no one knew, but most
4 hospitals would know what quartiles were. So if
5 we said "the bottom of quartile," they would
6 understand this.

7 At this time, too, I think that we
8 all thought it would solve this creeping-up
9 problem and that the bottom quartile score
10 would be lower than the mean.

11 Q. And do you -- it sounds like you --
12 you recall whether that was true?

13 A. When we -- my -- my recollection is
14 that when we looked at it, the bottom quartile
15 was not much lower than the mean --

16 Q. Okay.

17 A. -- so, actually, it wouldn't have
18 solved this problem, and Peter would not have
19 supported that.

20 Q. Why do you think Peter would not
21 have supported that?

22 A. Because his -- the context of this

1 is they're getting scores that are too high. So
2 if the -- the mean is too high and the -- the
3 bottom quartile is just slightly lower, I don't
4 think he would have supported that.

5 Q. So -- but, again, how do you know
6 that they're too high?

7 A. Feedback from my -- the expert
8 panel. They were, like -- they -- they gave us
9 feedback that these scores -- these can't be
10 means. How can a mean be a 72 or -- we can read
11 off the chart, but . . .

12 Q. Okay.

13 But I guess the means are too
14 high for the nonparticipating hospitals, too?
15 Am I not understanding that right?

16 A. The means are too high to be imputed
17 for nonparticipating hospitals because there was
18 not face validity that nonparticipating
19 hospitals were even performing at this level.
20 And, again, I'll go back to hand hygiene.

21 I remember when we put out the
22 nurse staffing and skill mix measure, which we

1 knew would be hard because hospitals don't
2 necessarily want to tell people what their
3 nurse-to-patient ratio is -- and we knew that,
4 you know, unions can be a tricky issue, right.
5 We're funded by employers. We get that. But
6 they have some of the strongest evidence of
7 being tied to patient outcomes.

8 When this hand hygiene measure came
9 out, we got inundated with comments from
10 hospitals saying, This is impossible. No one
11 can do this. Like, these requirements are too
12 strenuous. And, again, these were all
13 published in that Leapfrog Hospital Survey
14 public comment document where we responded.

15 So to think again that a hospital
16 that had never done our survey might not even
17 be familiar with the elements of our
18 standard -- I'm going back to the document
19 where -- that includes the -- the PowerPoint
20 that we shared with the expert panel.

21 If you can go to Page 10 where we
22 have the spring 2024 cohort means for Step 2

1 imputation.

2 Q. Sorry. Which document -- you're
3 looking at the deck from the meeting?

4 ATTORNEY BLAIR: Exhibit 13.

5 THE WITNESS: Yes. That you
6 produced to me as Exhibit 13.

7 BY ATTORNEY CRAIN:

8 Q. Um-hum. All right. Let's see.
9 Sorry. I had set it aside.

10 Got it. Yep.

11 A. And can you go to Page 10?

12 Q. Um-hum.

13 A. And if you look in the right-hand
14 side --

15 Q. Yep.

16 A. -- these scores were just extreme --
17 extremely high. I mean, I think people were
18 just very concerned. And, again, this wasn't me
19 saying like, Wow. I bet the hospitals are doing
20 this or not doing this. It is so fresh in my
21 memory because I, personally, reviewed the 600
22 comments from hospitals saying, This is very,

1 very difficult. It's very, very hard to do.

2 Q. This is -- so just to make sure I'm
3 on the same page, this -- the line -- it says,
4 Step 2 Hand Hygiene Score (Mean of Cohort)?

5 A. Yes.

6 Q. And they're mostly in the 50s and
7 60s?

8 A. Yes.

9 Q. Okay. And, ultimately, what's
10 imposed is 15, right?

11 A. Correct.

12 Q. Why such a big difference?

13 A. So, again, we had already -- oh, no,
14 we haven't talked about this.

15 In previous rounds of the Hospital
16 Safety Grade, we had identified this new data
17 source for ICU physician staffing called the
18 CMS cost report. We did talk about this.

19 Q. Yes.

20 A. Through that CMS cost report, we
21 could tell whether or not hospitals operated in
22 an adult or pediatric ICU. A's I said, that

1 response, if I was making a comparison to the
2 questions on the Leapfrog Hospital Survey and
3 you said, Yes, you operate in ICU, and then we
4 didn't know about the other things, would have
5 yielded a score of -- based on our public
6 scoring algorithms, those rubrics I keep
7 referring to -- of limited achievement, which
8 then has that numeric value assigned to it.

9 We had done that change, I think, a
10 full year, two rounds, before spring 2024 and
11 did two rounds of announcements and public
12 comments to give hospitals adequate time to
13 review the change so we can understand if there
14 would be any challenges or problems using the
15 CMS car -- or cost report. Maybe there's
16 something we didn't know.

17 And because previously using the
18 AHA data, hospitals had much higher scores.
19 Imputed from AHA are calculated based on AHA,
20 and we're going to get the score of 5. And,
21 actually, for all of the imputed measures, the
22 ICU physician staffing has the lowest numerical

1 score associated with limited achievement. In
2 other cases, it's -- it's 25, and got no
3 comments whatsoever about that change.

4 So that change of aligning the
5 point value imputed with limited achievement,
6 for that one measure, had been in effect for
7 two rounds of the Hospital Safety Grade. We
8 had not received comments from hospitals who
9 had that imputation used to calculate their
10 grade.

11 And so I think that when we were
12 looking at this particular change that ended up
13 coming about, I believe I said, Well, actually,
14 we have been doing this for ICU physician
15 staffing, and we've gotten no feedback --
16 negative feedback whatsoever, and naively maybe
17 thought there would be acceptability around it
18 because we had been doing it for a year for
19 another measure already.

20 Q. Okay.

21 A. Because one thing to remember is
22 that that document that we keep looking at

1 together, that Spring 2025 Safety Grade
2 Methodology document --

3 Yeah.

4 -- can we bring that up again?

5 Q. Uh-huh.

6 A. Exhibit 3.

7 Q. Uh-huh.

8 A. So these tables that we've been
9 looking at --

10 Q. Yep.

11 A. -- that show the Leapfrog measures
12 and the four performance categories and the
13 scores associated, these tables have not changed
14 since the inception of the Hospital Safety
15 Grade. So these tables and these values are
16 very, very familiar to hospitals. So even if
17 you're not theoretically doing a
18 Leapfrog Hospital Survey, you've seen these
19 tables four times a year for as long as you've
20 been getting a Hospital Safety Grade.

21 So the familiarity aspect of it,
22 for me, was a positive.

1 Q. But how does that justify taking
2 means that were in the 50s and 60s and imputing
3 a score of 15? I just don't --

4 A. We didn't think that the means in
5 the 50s and 60s were accurate.

6 Q. A's to -- as to nonparticipating
7 hospitals?

8 A. Correct.

9 Q. And why was that? Why is that?

10 A. A's I've described, we were
11 receiving feedback from participating hospitals
12 that these things were very difficult to do, and
13 the panel did not have strong beliefs that
14 nonparticipating hospitals would do these
15 things.

16 I can use another example, if that
17 would be helpful.

18 Q. No, I -- I'd like to focus back on
19 my questions, if I can.

20 A. Yes. Um-hum.

21 Q. Let's go back to this document with
22 the Slack Chat.

1 A. Yes.

2 Q. Okay. So you see Ms. Campione goes
3 back -- and I want to go to -- okay. 4:45,
4 Ms. Campione says, If we made Step 1 just the
5 previous survey, it would at least make the
6 lapse in survey participation short term, and
7 they can't fall back on Step 2.

8 You say, Oh, so, like, Step 1
9 or 0?

10 And then she says, The Step 2
11 means are so high, what if we used Step 1,
12 (limited to only, say, two round), then assigned
13 them to the bottom performance category?

14 Do you see that, 5:03?

15 A. Yes.

16 Q. And then you say, That would be
17 drastic, but let's talk about it, LOL.

18 Do you see that?

19 A. Yes.

20 Q. Okay. Is Ms. Campione's Chat at
21 5:03 the same as the model that was ultimately
22 imposed?

1 A. Yes.

2 Q. Why did you think it was drastic?

3 A. It was different from what we were
4 proposing.

5 Q. But you didn't say it would be
6 different.

7 Everything is different, right?

8 A. I really don't know why I used that
9 choice of word. I just -- it was very different
10 than what we were proposing.

11 Q. Okay. It was a significant change,
12 right?

13 A. It was a big change.

14 Q. And it was a change that as the
15 notes noted from Dr. Pronovost, could be taken
16 poorly, right?

17 A. Correct.

18 ATTORNEY BLAIR: Objection to
19 form: mischaracterizes the document.

20 BY ATTORNEY CRAIN:

21 Q. I just had one other question.

22 Oh, no -- let's see.

1 You can set this aside. Okay.

2 A. Set this aside?

3 Q. Yep.

4 A. Okay.

5 Q. Okay.

6 ATTORNEY CRAIN: Can we go
7 off? We've been going about an hour.

8 ATTORNEY BLAIR: Sure.

9 ATTORNEY CRAIN: Yeah? Okay.

10 THE VIDEOGRAPHER: Going off
11 the record. The time is 1545.

12 --oOo--

13 (Whereupon, a recess was taken from
14 3:45 p.m. EDT to 4:06 p.m. EDT.)

15 --oOo--

16 THE VIDEOGRAPHER: Going back
17 on the record. The time is 1606.

18 BY ATTORNEY CRAIN:

19 Q. Okay.

20 All right. So we're going to
21 look at a new document. I just want to talk it
22 through a little bit.

1 A. Okay.

2 Q. I want to talk a little bit about
3 Dr. Pronovost's quartile model.

4 A. Yes.

5 Q. So I just want to -- so do you --
6 we'll have Cindy mark this as Exhibit 16.

7 ATTORNEY CRAIN: Right?

8 CERTIFIED STENOGRAPHER: Corr
9 ect -- no, 17.

10 ATTORNEY CRAIN: Seventeen.

11 ATTORNEY BLAIR: Yeah, I
12 didn't even know.

13 Thank you.

14 --oOo--

15 (Danforth Deposition Exhibit Number
16 17, E-mail string, Bates stamped
17 LEAPFROG00220682 through
18 LEAPFROG00220686, marked for
19 identification, as of this date.)

20 --oOo--

21 BY ATTORNEY CRAIN:

22 Q. Okay. So this is an e-mail,

1 Ms. Danforth.

2 A. Yes.

3 Q. The last one is from you.

4 Do you see that?

5 A. Yes.

6 Q. And I want to go to Ms. Campione's
7 e-mail, which I think leads off the discussion
8 at 5:41 p.m. on April 25th, 2024.

9 Do you see that?

10 A. Yeah.

11 Q. And that's that two -- almost two
12 weeks after the April 12th meeting, a little
13 under?

14 A. Yes.

15 Q. Okay. And she says, I have some
16 bad/good news. The Step 2 scores aren't what we
17 would like. Turns out the hospitals that do the
18 survey perform very well. The BCMA scores below
19 will likely drop with the methodology changes,
20 though.

21 Do you see that?

22 A. Yes.

1 Q. Okay. And -- and what it says here
2 is -- she -- she has a chart where it lays out
3 CPOE, hand hygiene and BCMA, right?

4 A. Yes.

5 Q. Yes. Sorry. We need verbal
6 answers, yeah.

7 And then the -- so do you have
8 any understanding of what 20 -- we have this 100
9 on 25th percentile column.

10 Do you know what that means?

11 A. Yes.

12 At the top 25th percentile, the
13 cutoff score would have been 100. So the top
14 25 percent of hospitals, their score is 100.

15 Q. Okay. Got it.

16 So that's -- so 25th percentile
17 basically means top 25th percentile?

18 A. Just based on the numbers being 100,
19 I'm interpreting it that way.

20 Q. Okay. Should be the first quartile,
21 basically?

22 A. Yes.

1 Q. Okay. So then we have Mean of
2 bottom quartile.

3 A. Correct.

4 Q. Do you see that? Okay.

5 A. I do.

6 Q. And that is reflexive of
7 Dr. Pronovost's idea that we -- we look to
8 impute the bottom quartile in some capacity,
9 right?

10 A. Yes.

11 And, again, I don't recall if he
12 asked for the mean of the bottom quartile or
13 the bottom quartile, but I believe -- I
14 believe, as I just spoke to this, what I had
15 said is actually described here. So the mean
16 of the bottom quartile is 77 for CPOE. That's
17 very near the mean.

18 So the bottom quartile and the mean
19 are virtually identical.

20 Q. Yes.

21 A. When he made the suggestion, what I
22 was implying, and I believe what he was

1 implying, is that he was expecting it to be
2 lower because in true regular distribution
3 quartiles, the top quartile would be, say, 75 to
4 a hundred and then 50 to 75 --

5 Q. Sure.

6 A. -- and then 25 -- and the bottom
7 quartile would be somewhere between 0 and 25 --

8 Q. Yeah.

9 A. -- not 77 --

10 Q. Yeah.

11 A. -- so I didn't have this in front of
12 me earlier, but this is what I was trying to
13 describe in the previous questioning.

14 Q. Yes.

15 And then if you get to the top,
16 you say, This is sort of what I was afraid of,
17 but somehow more stark seeing the actual
18 numbers. I do think we at least need to
19 cowider --

20 Which I think means "consider";
21 is that right?

22 A. I bet that is right.

1 Q. -- going to limited achievement.

2 Do you see that?

3 A. Yes.

4 Q. Okay. And, again, limited
5 achievement for some of these scores is orders
6 of magnitudes less, right?

7 A. It's less.

8 Q. It's significantly less, right?

9 A. It's less.

10 Q. Well, a lot less or a little less?

11 A. It's less. Again, it depends.

12 There's a range. We're talking about 5, which
13 had already been in place for a year; in some
14 cases, it's going to be 25. A's you pointed
15 out, some of the hand hygiene scores were around
16 49 or 50. So it depends on the measure; it
17 depends on the cohort. It's less.

18 Q. Okay. And then what -- just to --
19 just to be clear about it, when you say "this
20 was sort of what I was afraid of," what do you
21 mean there?

22 A. I thought the bottom quartile would

1 resemble or be identical to those mean scores.

2 Q. Okay.

3 A. I thought they would be very
4 similar. I didn't think they would be that
5 similar, but I thought they would be very
6 similar --

7 Q. Yeah.

8 A. -- and so that's exactly what I
9 meant.

10 Q. And why did you want them to
11 ultimately not be similar?

12 A. So, again, to go back, what we were
13 trying to do is address a problem that both
14 hospitals and the expert panel had communicated,
15 which is these imputed scores for these -- and,
16 again, I want to actually start calling it three
17 measures because by this point, we're already
18 computing a different score for IC physician
19 staffing.

20 Is that okay?

21 Q. IPS. Sure.

22 A. So for these three measures, is too

1 high, and we are afraid that it's not reflecting
2 what's actually happening in these hospitals.
3 And at Leapfrog, our actual mission on our
4 website, on our stationery. But in our life and
5 all the days and all the work that we do every
6 day, again, is to reduce harm to patients from
7 preventable medical errors. If we're
8 overassessing hospitals' performance on these
9 measures, we're not reducing harm to patients
10 from preventable medical errors.

11 And I realize it probably sounds
12 very simplistic when I describe it that way,
13 but that is really our intention. And the
14 intention of our expert panel as to our
15 researchers, specifically in patient safety,
16 who have been doing this work in some cases 30,
17 40 years, long before I've been to Leapfrog, is
18 also to reduce harm to patients from
19 preventable medical errors.

20 And so it was a genuine -- not just
21 as an expert panelist, right, but as
22 Dr. Pronovost and Arjun Srinivasan, I think a

1 genuine concern that we weren't doing what was
2 best for patients in this methodology, if we
3 were overestimating what they thought was
4 realistic for hospitals that weren't submitting
5 a Leapfrog Hospital Survey.

6 And I realize I've said that in a
7 few different ways, but it's important because
8 our intentions are really aligned around this
9 mission.

10 And whether or not we're saying
11 every other sentence what's best for the
12 patient, what's best for the patient, what's
13 best for the patient, all of this dialogue is
14 focused on what we think, in our opinions, is
15 best for the patient.

16 Q. Is it -- is it best for the patient
17 to convey accurate information?

18 A. In this particular situation, I
19 personally felt that it was going to be
20 challenging to keep having the expert panelist
21 support these high means, and you -- you sort of
22 see that in this. They really didn't feel like

1 it was accurate.

2 A previous alternative imputation
3 methodology, which had been in place for a
4 year, reflected what ended up happening for
5 these three measures later, right. We're
6 imputing that numerical score associated with
7 limited achievement for IPS for a year, then we
8 end up doing this for these three.

9 At that time, based on the
10 discussion and based on the analyses and based
11 on what you've just showed me, I agreed with
12 the expert panel, that I thought this was the
13 right decision to make in terms of a next step
14 for the -- the methodology --

15 Q. So I want to break that --

16 A. -- and -- and to be clear, I have
17 confidence in this methodology. I -- I'm the
18 one that ultimately have -- has to talk to the
19 hospitals, be on the phone talking about the
20 methodology.

21 Q. So I want to break that down --

22 A. Sure.

1 Q. -- there's a lot in that answer.

2 A. Yeah.

3 Q. You said you have confidence in the
4 methodology.

5 A. Yes.

6 Q. Does that mean you believed that the
7 methodology conveys accurate information --

8 A. I do, Melissa Danforth.

9 Q. Let me finish. Let me finish.

10 A. Sorry.

11 Q. Do you believe that the methodology
12 conveys accurate information about the
13 hospitals?

14 A. I do.

15 Q. Okay. And you said, "I do,
16 Melissa Danforth."

17 A. Yes.

18 Q. Does Leapfrog believe, in your
19 corporate representative capacity, that the
20 Hospital Safety Grade for nonparticipating
21 hospitals conveys accurate information about
22 those nonparticipating hospitals' performance?

1 A. We do.

2 Q. Okay. And that's what you
3 communicate to consumers, right?

4 A. We communicate to consumers all of
5 the information on the Web page that we looked
6 at.

7 Should we bring that up again and
8 look at it?

9 Q. No. I want to ask you --

10 A. Okay.

11 Q. -- my questions because I'm just --
12 I'm mindful of our time.

13 A. Yeah, we communicate to consumers
14 all of the information that we've talked about
15 today, including the fact that if we don't have
16 information from a hospital because they've
17 declined to provide it, that we have assigned
18 them --

19 Q. Yes.

20 A. -- the worst possible score. We
21 indicate that with an asterisk, and we call out
22 in 18-point font that is associated with the

1 worst possible score, that's correct.

2 Q. So a consumer going to the website
3 that says an F at Delray, is it Leapfrog's view
4 that what Leapfrog is communicating --

5 A. I can't speak to the website.

6 Q. Fair enough.

7 You can speak to the Safety
8 Grade, correct?

9 A. Yes.

10 Q. Okay. When a consumer sees the
11 Safety Grade and they see it's an F, does that
12 communicate that the hospital has poor
13 performance, or does it communicate that the
14 hospital has not participated?

15 ATTORNEY BLAIR: Objection to
16 form.

17 BY ATTORNEY CRAIN:

18 Q. Nonparticipating hospital?

19 A. Neither.

20 Again, the Hospital Safety Grade is
21 a composite measure. It's made up of 22
22 different measures. There's a lot of measures

1 within the Hospital Safety Grade where we do
2 have lots of information. For example -- I
3 think you used Delray Hospital.

4 Q. Yes.

5 A. I believe at that particular
6 hospital, for example, we have all of their
7 patient experience measure scores for those five
8 patient experience measures.

9 We have scores for three -- what's
10 called hospital-acquired conditions: foreign
11 objects retained, falls and trauma, air
12 embolism. We have scores for all five
13 healthcare-associated infections. We have
14 scores for patient safety indicator 04, which
15 looks at death from treatable complications
16 following surgery, and also PSI 90, which,
17 again, is that 10.

18 So the Hospital Safety Grade, I
19 don't think, communicates a hospital does or
20 does not have one or two or three things.
21 That's why it's a composite. And that's why my
22 understanding is -- we make all those gas

1 gauges available so consumers can go through
2 each one and look at performance on an
3 individual thing.

4 So, for example, if you're not
5 having surgery, you may not care about the
6 surgical measures or --

7 Q. So, I -- I want to ask you about
8 those gas gauges now that you bring them up.

9 A. Sure.

10 Q. The gas gauge for handwashing has a
11 limited achievement, right, for Delray?

12 A. The gas gauges are a -- a graphical
13 depiction of a hospital's performance in
14 relation to the average score for that measure.
15 So the way you just described it is not correct.

16 Q. Okay.

17 A. Can we look at it --

18 Q. Absolutely --

19 A. -- together so I can show you?

20 Q. -- yes.

21 A. Okay.

22 So I believe that was one of the

1 earlier exhibits.

2 Q. Exhibit 3, I want to say.

3 ATTORNEY CARDONE: Exhibit 4.

4 ATTORNEY CRAIN: Four?

5 Oops.

6 THE WITNESS: And to be

7 clear, this is me speaking as

8 Missy Danforth about --

9 BY ATTORNEY CRAIN:

10 Q. Yeah.

11 A. -- the gas gauges, which are on the
12 website.

13 Is it 4?

14 ATTORNEY CARDONE: Yes.

15 THE WITNESS: Oh.

16 ATTORNEY CRAIN: Are you sure
17 it's not 3?

18 BY ATTORNEY CRAIN:

19 Q. Yes. That one (indicating).

20 A. Okay.

21 Q. Okay. So I'm on this page, and I
22 see on Page 2, handwashing, right?

1 A. So this isn't what it looks on the
2 website the way this printed, but can you go to
3 the second page of the printout?

4 Q. Yeah.

5 A. Okay.

6 So the gas gauges have three colors
7 that are displayed on them and then, like, a
8 little needle.

9 Q. Yes.

10 A. Okay. So this is meant to be, like,
11 the key, I think is the correct -- kind of like
12 the --

13 Q. Sure.

14 A. -- key to say what the -- okay.

15 ATTORNEY BLAIR: For the
16 record, can she say what she's
17 pointing to?

18 THE WITNESS: Sure.

19 ATTORNEY BLAIR: Because I
20 can't see what --

21 THE WITNESS: So this is
22 the --

1 BY ATTORNEY CRAIN:

2 Q. Oh.

3 A. -- hospital performance key that
4 goes under the gas gauges, where, reading left
5 to right, worse than average is the color red,
6 and then average is the color yellow, and then
7 green is the color better than average --

8 Q. Sure.

9 A. -- so what the gas gauges
10 communicate are: green, better than average;
11 yellow, average; or red, worse than average.

12 And then to provide context to
13 that, the scores are then listed on the side
14 here, on the left, where it says, This hospital
15 scores a 15 -- again, with that asterisk -- the
16 best hospital score is 100; the average
17 hospital score is 74.40.

18 So 15 is less than 74.40 because 15
19 is associated with the worst score. I'm not
20 looking at it, but the gas gauge should be red.

21 Q. So is Leapfrog confident that 15 is
22 an accurate reflection of Delray's handwashing

1 score?

2 ATTORNEY BLAIR: Objection to
3 form.

4 THE WITNESS: We've assigned
5 that numerical score --

6 BY ATTORNEY CRAIN:

7 Q. No. Ms. Danforth, I'm sorry --

8 A. -- to reflect the lack --

9 Q. -- Ms. Danforth --

10 A. -- of information available.

11 Q. -- I'm -- I'm sorry. I really would
12 like for you to answer my question.

13 ATTORNEY BLAIR: She is.

14 ATTORNEY CRAIN: She's not,
15 consistently.

16 BY ATTORNEY CRAIN:

17 Q. So is Leapfrog confident -- is -- is
18 the score of 15 an accurate reflection of the
19 hospital's performance on handwashing?

20 ATTORNEY BLAIR: Objection to
21 form.

22 THE WITNESS: The score of

1 15 -- and I can't say it clearer than
2 it's written -- was assigned to
3 reflect the last of it -- lack of
4 information available based on
5 guidance from our national expert
6 panel.

7 BY ATTORNEY CRAIN:

8 Q. So why give a score?

9 A. Based on guidance from our national
10 expert panel.

11 Q. Okay. So you're -- you're --
12 Leapfrog -- your speaking for Leapfrog because
13 we're talking about the scoring methodology,
14 right?

15 A. I am.

16 Q. And so Leapfrog gives this limited
17 achievement score because of guidance from the
18 national expert panel, right?

19 A. Yes.

20 Q. And where did that guidance come
21 from?

22 A. Discussions with the national expert

1 panel that we've been talking about.

2 Q. Okay. Was it ever conveyed to
3 Leapfrog that the panel approved of limited
4 achievement for this type of a metric for
5 handwashing?

6 A. I'm not sure that we've ever used
7 the word "approved" or "disapproved." We
8 typically use things like "support" -- the panel
9 "supports," the panel "agrees."

10 We can go back to the notes.

11 Can we do that?

12 Q. No, we can't --

13 A. Oh, okay.

14 Q. -- because I'm -- I -- I'm on a
15 limited time and I want to focus you.

16 A. Okay. Then I can't say that it's --
17 it would be supports or agrees.

18 Q. Okay. Supports or agrees.

19 A. Um-hum.

20 Q. Who made the decision to impose the
21 limited achievement score for handwashing for
22 nonparticipating hospitals?

1 A. A's I've described earlier today in
2 my testimony, it is a process with all of the
3 people involved that I've previously testified:
4 the expert panel, including Patrick Romano on an
5 individual call; myself; Matt Austin. And that
6 would have been discussed with Leah Binder as
7 well.

8 Q. Okay. Let's go to Dr. Romano.

9 Let's --

10 ATTORNEY CRAIN: This is 18?

11 CERTIFIED STENOGRAPHER: Yes.

12 ATTORNEY CRAIN: Okay.

13 THE WITNESS: I'm out of
14 order now.

15 ATTORNEY CRAIN: I'm getting
16 it.

17 Thank you.

18 ATTORNEY BLAIR: Oh, thank
19 you.

20 --oOo--

21 (Danforth Deposition Exhibit Number
22 18, E-mail string, Bates stamped

1 LEAPFROG01081490 through
2 LEAPFROG01081491, marked for
3 identification, as of this date.)

4 --oOo--

5 ATTORNEY CRAIN: Are we on?

6 THE WITNESS: Yes.

7 BY ATTORNEY CRAIN:

8 Q. Okay. I mean Cindy's on.

9 CERTIFIED STENOGRAPHER: I

10 am.

11 ATTORNEY CRAIN: You're the

12 most important person.

13 BY ATTORNEY CRAIN:

14 Q. Okay. So this is an e-mail. If you
15 look -- go to the bottom, it's -- it's an e-mail
16 from Matt Austin to Dr. Romano, cc'ing you and
17 Ms. Campione.

18 Do you see that?

19 A. Yes.

20 Q. And he's proposing -- he's saying,
21 Since our conversation with you a couple of
22 weeks ago -- this is May 7th -- about changing

1 the imputation approach used in Leapfrog's
2 Hospital Safety Grade, we met with the broader
3 safety expert panel to hear their input and have
4 drafted the attached language to share with
5 hospitals about the proposed changes.

6 Do you see that?

7 A. I do.

8 Q. Okay. Then he goes on. He --
9 he's -- he's asking for Dr. Romano's expertise
10 and perspective, correct?

11 You see that on the last
12 sentence?

13 A. Yes.

14 Q. Okay. So he follows up -- if you go
15 up the chain, on May 14th, he had got no
16 response, so he -- he pings Dr. Romano again.

17 And then Dr. Romano writes
18 back.

19 Do you see that?

20 A. Yes.

21 Q. Now, have you reviewed this e-mail
22 in your preparation today?

1 A. Yes.

2 Q. Okay. So you're aware and,
3 presumably, you have memorized this document, as
4 you have many others, that Dr. Romano lays out
5 two hypotheses for why hospitals are not
6 participating in the survey.

7 Do you see that?

8 ATTORNEY BLAIR: Objection to
9 form.

10 THE WITNESS: So, first, I
11 haven't memorized it. And so, no, now
12 I don't see that.

13 BY ATTORNEY CRAIN:

14 Q. Okay.

15 Okay. So he says -- if you
16 look in the middle, he says, The underlying
17 hypothesis --

18 A. Yes --

19 Q. -- do you see that?

20 A. -- I do.

21 Q. The underlying hypothesis behind
22 your proposed Step 2B approach was that

1 hospitals start -- stop reporting because their
2 true performance deteriorated relevant --
3 relative to their cohort.

4 Is that an accurate view of
5 your hypothesis at the time?

6 ATTORNEY BLAIR: Objection to
7 form.

8 THE WITNESS: A's we've
9 discussed, it was not that hospitals
10 just stopped reporting, but some
11 hospitals had never reported.

12 I'm not exactly sure what
13 this is referring to, but, no, that's
14 not how I would've described this at
15 all, and that's not how we've been
16 talking about it.

17 BY ATTORNEY CRAIN:

18 Q. Okay. Is it -- is it inconsistent
19 with your view that hospitals were not
20 reporting -- responding to Leapfrog's survey
21 because their true performance had deteriorated
22 relative to their cohort?

1 ATTORNEY BLAIR: Objection to
2 form.

3 THE WITNESS: So, again, the
4 means are assigned to hospitals who
5 maybe have never done the Leapfrog
6 Hospital Survey.

7 So it's not like I did a
8 survey; I got bad; I stopped
9 reporting; they're assigning these
10 means. It's also I've never done a
11 survey in 20 years.

12 And so, no, this is not
13 correct.

14 BY ATTORNEY CRAIN:

15 Q. Okay. Fair enough.

16 Is it consistent with your view
17 that the hospitals who have never done a survey
18 are necessarily lower performances than the mean
19 of their cohort?

20 A. It is not necessarily my personal
21 view. I believe there have been public papers
22 indicating that transparency can be a driver to

1 performance --

2 Q. Okay.

3 A. -- and I have been influenced by
4 those papers.

5 Q. Can you identify any of those papers
6 today?

7 A. I couldn't, but -- off the top of my
8 head, no.

9 Q. Okay. He says, My hypothesis, by
10 comparison, was that most hospitals stop
11 reporting because it is too burdensome and
12 because the -- they only find market value in an
13 A grade, which proves impossible to attain or
14 maintain.

15 Do you see that?

16 A. I do.

17 Q. Okay. So his -- his theory, at
18 least for hospitals who stopped reporting -- I
19 take your point -- are -- is that it's too
20 burdensome, right?

21 A. That is his theory, yes.

22 Q. And did you disagree with that

1 hypothesis?

2 A. I don't see a response from me, but
3 I likely would not have agreed with that
4 hypothesis, correct.

5 Q. I -- I'm asking today.

6 Do you --

7 A. Yes. No, I don't agree with that.

8 Q. And Leapfrog does not agree with
9 that hypothesis?

10 A. I don't think Leapfrog would agree
11 with that hypothesis.

12 Q. Okay. And then what he says, if you
13 -- if you look throughout the e-mail -- I want
14 to start at the top now. He -- he says, I like
15 the simpler, more direct approach here "if the
16 goal is to penalize nonparticipants, you might
17 as well do so in a clear and unmistakable manner
18 while allowing for hospitals to manage their
19 burden and jump back on the wagon after a year.

20 Do you see that?

21 A. I do.

22 Q. What is your response to

1 Dr. Romano's view that the goal is to penalize
2 nonparticipants?

3 A. Complete disagreement.

4 Q. Okay. Tell me why.

5 A. Because we've never talked about
6 penalizing hospitals. We've talked about
7 incentivizing hospitals. We don't talk in terms
8 of penalizing hospitals.

9 And that's why I think I took
10 exception to the couple documents where you're
11 showing me it used the word "punitive." That's
12 not in the vernacular of how we speak at
13 Leapfrog.

14 We, again, are not in the business
15 of -- of penalizing hospitals. We're in the
16 business of making information available, in
17 this case, about patient safety to patients.

18 Q. And -- and who is "we" when you say
19 that?

20 A. The Leapfrog Group.

21 Q. Okay. So you're excluding the
22 expert panel in that -- in that "we"?

1 A. I, personally, have no recollection
2 of any individual expert panelist talking about
3 penalizing hospitals through the Hospital Safety
4 Grade methodology.

5 Q. Besides Dr. Romano?

6 A. I think he's reflecting on his --
7 he -- I think he's -- he's projecting. He says,
8 If the goal is to.

9 I don't think he's trying to. I
10 actually don't know where that statement came
11 from. We've never had that conversation with
12 him.

13 Q. That was not discussed, to your
14 recollection at the --

15 A. No.

16 Q. -- let me finish.

17 That was -- just for Cindy.

18 That was not discussed, to your
19 recollection, at the April 12th meeting?

20 A. No.

21 Q. No one mentioned penalizing
22 hospitals --

1 A. Not to my recollection.

2 Q. Okay.

3 Okay. So your perspective is
4 to the extent Dr. Romano thought the new
5 imputation model was designed to penalize
6 hospitals, he's just wrong?

7 ATTORNEY BLAIR: Objection to
8 form.

9 THE WITNESS: To the extent
10 Dr. Romano -- I'm sorry. Can you
11 repeat the question? I don't want to
12 represent his opinion.

13 BY ATTORNEY CRAIN:

14 Q. That's why I said "to the extent" --

15 A. Okay.

16 Q. -- so you can -- you can fight the
17 premise in the next question.

18 A. Okay.

19 Q. In this one, take my premise.

20 A. Okay.

21 Q. To the extent he thought that the
22 new imputation methodology --

1 A. Yes.

2 Q. -- was designed to penalize
3 nonparticipants, he was wrong?

4 A. Yes.

5 Q. Okay. And you -- you're free to
6 fight me on the premise, although he says it
7 four times, that the goal is to penalize.

8 But do you see -- I mean, we
9 can go to it if you want to take a look, but --

10 A. No --

11 Q. -- okay.

12 A. -- so, actually, when I was shown
13 this e-mail as part of preparation, I didn't
14 remember this e-mail --

15 Q. Okay.

16 A. -- and, again, like, I don't have a
17 lot of one-on-one interaction with the expert
18 panelists, but I actually didn't remember this
19 e-mail.

20 But I do know that there was
21 another e-mail from Dr. Romano that you
22 probably have, where he made sort of a

1 tongue-in-cheek joke about I guess it doesn't
2 do your hospital any favors if someone sits on
3 the expert panel, because his hospital had
4 actually had the imputation methodology
5 applied, Step 2, which is University of
6 California, Davis --

7 Q. Yeah.

8 A. -- I think if he felt strongly and
9 disagreed with the methodology, we have a
10 collegial relationship enough and he has a
11 collegial relationship enough with Matt and
12 others to speak up at that time and say, I want
13 to reconvene the expert panel and talk about
14 this. I really strongly disagree with it. And
15 he did not.

16 Q. I agree with you. He did not.

17 And I -- so isn't it fair to
18 say he agreed with the proposal because he
19 thought the goal was to penalize
20 nonparticipants?

21 ATTORNEY BLAIR: Objection to
22 form.

1 THE WITNESS: I can't
2 interpret that question. I'm sorry.

3 BY ATTORNEY CRAIN:

4 Q. Okay.

5 A. Sorry.

6 Q. Well, you're saying that -- you're
7 interpreting his intent with respect to the
8 approval of the methodology, right?

9 A. Are we going back to this e-mail
10 now?

11 Q. Well, you said a few minutes ago if
12 he felt strongly and disagreed with the
13 methodology, we have a colle- -- collegial
14 relationship enough, and he -- I think --

15 A. I was -- with that statement, I was
16 implying that if he truly believed we are
17 penalizing hospitals, and particularly his own
18 hospital, my -- my belief is that he would bring
19 that up to us and ask to have a conversation.

20 So I was using that as an example
21 that I don't believe when he says "penalizing
22 hospitals" here, he really meant it, and he

1 doesn't believe it today, and he didn't believe
2 it when he saw the imputation methodology
3 applied to his hospital --

4 Q. He --

5 A. -- that's what I mean by that
6 statement.

7 Q. He doesn't believe that the
8 imputation -- he doesn't believe --

9 A. Is -- is penalizing hospitals,
10 correct.

11 Q. How do you know that?

12 A. In the -- in the subsequent e-mail,
13 he doesn't say, See, you're penalizing --

14 Q. Well, you said he doesn't think
15 it -- think it today.

16 Do you have conversations with
17 him about this topic?

18 A. I haven't.

19 Q. Okay.

20 A. My -- we've been working with
21 Dr. Romano for many, many years. It's not been
22 my experience that he waits for me to ask him if

1 he needs to bring something up to Matt.

2 So I'm inferring -- I'm only
3 inferring that --

4 Q. So --

5 A. -- if something was wrong, he would
6 bring it up.

7 Q. -- so you're inferring that he
8 approves of it today and it's not penalizing
9 even though, in this e-mail, he says four times
10 --

11 A. Yes, that's correct.

12 Q. Hold on. I want -- I want to
13 finish. I'm sorry --

14 A. I thought you were done. I'm sorry.

15 Q. No, no. I was in the middle of a
16 word.

17 A. Oh.

18 Q. So you are inferring that he is
19 agreeing that this is not a penalizing
20 methodology today even though his e-mail from
21 last year says four times he's okay with this
22 because the goal is to penalize

1 nonparticipants?

2 ATTORNEY BLAIR: And I'm
3 going to object to form in that it's
4 missing the attachment.

5 ATTORNEY CRAIN: That's fine.

6 THE WITNESS: Can I --

7 ATTORNEY BLAIR: Yeah.

8 BY ATTORNEY CRAIN:

9 Q. You may answer.

10 A. That is what I'm saying.

11 Q. Okay.

12 Okay. So you're inferring his
13 intent is to approval but not as to nonpen- --
14 that it's a penalizing methodology?

15 A. I'm inferring that when he wrote
16 this e-mail, regardless of how it reads, I don't
17 believe that, today, he thinks that we are using
18 a penalizing methodology.

19 Q. Why?

20 ATTORNEY BLAIR: Objection:
21 asked and answered.

22 ATTORNEY CRAIN: Not

1 answered, but I'll give you maybe
2 asked.

3 THE WITNESS: Because based
4 on my knowledge and relationship with
5 Patrick Romano, if he believed that we
6 were using a penalizing methodology,
7 he would bring it up to us and/or with
8 the rest of the expert panel.

9 Since this e-mail has -- was
10 sent, he has never made any comments
11 like that. And, in fact, I forgot he
12 even said it in this instance.

13 BY ATTORNEY CRAIN:

14 Q. But that's because he was okay with
15 the approach, right?

16 ATTORNEY BLAIR: Objection to
17 form.

18 THE WITNESS: I don't think
19 I'm understanding your question.

20 BY ATTORNEY CRAIN:

21 Q. Okay. We agree that he's saying
22 this -- this new approach is fine, right?

1 A. Yes.

2 Q. Okay. But he's specifically writing
3 in this e-mail he thinks it's fine because --

4 A. And that's what we disagree on, that
5 it's penalizing.

6 Q. You disagree that he thinks that, or
7 you disagree that it is penalizing?

8 A. I disagree that he thinks that
9 today, and I disagree that it is.

10 Q. And you disagree that he thought
11 that when he wrote this?

12 ATTORNEY BLAIR: Objection to
13 form: mischaracterizes the document.

14 ATTORNEY CRAIN: No; I'm
15 asking.

16 THE WITNESS: I can't infer
17 what he might have thought when he
18 wrote this. I --

19 BY ATTORNEY CRAIN:

20 Q. I just --

21 A. -- don't know what his state of mind
22 was.

1 Q. I want to be superclear.

2 A. Yes.

3 Q. You are inferring what his state of
4 mind is today without a document and without a
5 discussion, but you can't infer what his state
6 of mind is when you read this e-mail?

7 ATTORNEY BLAIR: Objection --

8 THE WITNESS: If --

9 ATTORNEY BLAIR: -- to form.

10 THE WITNESS: -- if I read
11 the e-mail as plain that he -- he
12 believed it was penalizing, I don't
13 believe it's penalizing. And I am
14 saying that I don't believe
15 Patrick Romano believes it's a
16 penalizing methodology today.

17 BY ATTORNEY CRAIN:

18 Q. And -- and what does "penalizing"
19 mean to you?

20 A. However he's used it here.

21 "Punitive," I think, is what we were using -- I
22 think what we were using before.

1 Q. So "punitive" means punish, right?

2 A. Yes. Because as a reminder -- and I
3 know I've said this lot, but I feel like maybe
4 I'm not saying it clearly -- whether or not you
5 participate in a Leapfrog Hospital Survey, you
6 can get an A, B, C, D, F. Whether you
7 participate in a Leapfrog Hospital -- you can
8 still get an A, B, C -- we have hospitals that
9 have never done a survey that have the Step 2
10 imputation model applied that have A's.

11 We have hospitals that have never
12 done a survey that have the same Step 2
13 imputation model applied that have B's.

14 The fact of that leads me to say to
15 you, I don't think the methodology is
16 penalizing; I don't think the methodology is
17 punitive. And I don't have to just think it.
18 I see it because I see hospitals that have
19 never done a survey and have the same
20 methodology applied and have A's, B's, Cs,
21 et cetera.

22 So it's not a conjecture. You see

1 it on our publicly reported website. That's
2 what I'm basing my statement on.

3 Q. So let me -- how many
4 nonparticipating hospitals have A's?

5 A. I would have to look. I don't --
6 I'm not going to know that information off the
7 top of my head.

8 Q. Ballpark.
9 Is it 100? Is it 5?

10 A. It's . . .

11 Q. Best estimate.

12 A. I would estimate the majority of
13 hospitals at any grade level is a C. And so the
14 majority of hospitals, whether they submit a
15 survey or not, are going to be at a C.

16 I wouldn't want to make an estimate
17 on the other letter grades. I'm sorry.

18 I'm not -- I know that for the
19 purposes of this case, if there's other
20 documents where you have lists of hospitals, I
21 -- I'd be happy to look at them. I just don't
22 want to say something incorrect.

1 Q. The documents speak for
2 themselves --

3 A. Okay.

4 Q. -- I'll -- I'll come back --

5 A. No. I mean with the -- with the
6 counts. I just -- I don't want to speak from
7 memory.

8 Q. No. I know. Those documents speak
9 for themselves --

10 A. Okay.

11 Q. -- I will -- I -- my recollection is
12 the number is quite, quite small, but set that
13 aside.

14 A. Yeah.

15 Q. Is it your view that the
16 nonparticipating hospitals, if they started
17 participating, would not see their scores rise?

18 A. It is my view. And, in fact, I've
19 had many calls with very distraught directors of
20 quality because they participated in the survey
21 and their score went down. So it's not
22 necessarily true that when you start

1 participating in the survey, your grade goes up.
2 Sometimes your grade goes down. Sometimes it
3 stays exactly the same.

4 Like I said, this is a 22-measure
5 composite, and so there's a lot of factors
6 going into it. So I could never say to you or
7 anyone definitively by virtue of answering the
8 questions on the survey, your grade's going to
9 go up, down or stay the same. I've seen all
10 three things happen.

11 Q. Because you don't actually know how
12 nonparticipating hospitals are performing,
13 right?

14 A. That's correct.

15 ATTORNEY BLAIR: Objection to
16 form.

17 ATTORNEY CRAIN: Okay. Did
18 we get it?

19 Okay.

20 THE WITNESS: And that's why
21 we're so clear that the score we're
22 assigning is based on that lack of

1 information.

2 BY ATTORNEY CRAIN:

3 Q. But -- but you're not clear, are
4 you? I mean, where are you clear in that?
5 Let's go back to Exhibit 3 --

6 A. I, personally, don't I think I could
7 be more clear than the bold red sentence on our
8 website --

9 Q. Well, let's --

10 A. -- that accompanies the asterisk
11 that accompanies the measure score.

12 Q. I will show you how you can be
13 clear.

14 ATTORNEY CRAIN: Where --
15 where's the document? Sorry. What
16 tab?

17 ATTORNEY CARDONE: Tab 64.

18 ATTORNEY CRAIN: Okay.

19 Tab 64, Exhibit 4.

20 There we go.

21 THE WITNESS: And, again,
22 website, Missy Danforth.

1 BY ATTORNEY CRAIN:

2 Q. Yes.

3 But you, Missy Danforth, has
4 been at Leapfrog for 16 years and know this like
5 the back of your hand, right?

6 A. Yeah --

7 Q. Okay.

8 A. -- not the website so much, but,
9 yes, everything else.

10 Q. But -- you have it.

11 ATTORNEY CARDONE: No.

12 You're -- it's Exhibit --

13 BY ATTORNEY CRAIN:

14 Q. You have it.

15 A. Oh. So --

16 Q. You have it. I'm going back to the
17 Delray website.

18 A. Yes -- oh, 4. Yes.

19 Q. Right. So -- so you can see it
20 says -- within the gas gauge, it says, Declined
21 to Report?

22 A. I'm sorry.

1 I'm sorry. Which gas gauge am I
2 looking at?

3 Q. The gas gauge on the right side --

4 A. Yes.

5 Q. -- which is under Staff work
6 together to prevent errors.

7 A. Yes.

8 Q. Do you see that?

9 A. I do.

10 Q. So why isn't that clearer than a gas
11 gauge that says "red"?

12 ATTORNEY BLAIR: Objection to
13 form.

14 THE WITNESS: I'm sorry. I
15 don't understand that question.

16 BY ATTORNEY CRAIN:

17 Q. Okay. So you said you weren't sure
18 how it could be clearer on the website, that
19 you're -- you're --

20 A. Correct. Web design is not my area
21 of expertise.

22 Q. Okay. But you -- you are an English

1 major, so words are your area of expertise.

2 A. Free websites.

3 Q. Fair. Fair. I won't tell --

4 A. I'm just saying --

5 Q. -- I won't tell anybody.

6 So my -- my question is, How is
7 someone looking at this supposed to understand
8 that the handwashing gas gauge, the 15 score,
9 is -- is a reflexive of lack of data and not
10 performance?

11 A. The asterisk.

12 Q. But the asterisk says a score was
13 imputed. We -- we went through this six hours
14 ago.

15 ATTORNEY BLAIR: Objection to
16 form. That's not what it says.

17 BY ATTORNEY CRAIN:

18 Q. It says, So a score was assigned --
19 excuse me -- to reflect the lack of information
20 available.

21 Right?

22 A. Correct.

1 Q. But it doesn't say how?

2 A. I guess I would argue that the
3 sentence, The hospital declined to report their
4 performance on this measure, so a score was
5 assigned to reflect the lack of information,
6 both tells them how -- and, again, because it's
7 directly associated with that specific asterisk,
8 for me reading this, I can easily make that
9 connection. I think even in
10 nonhealthcare-related things, people know when
11 they see an asterisk, it's likely associated
12 with a measure -- or I'm sorry -- a message, a
13 message.

14 Q. Is it Leapfrog's view that the
15 handwashing score for nonparticipating
16 hospital --

17 A. Hand hygiene.

18 Q. Hand hygiene. Excuse me.
19 -- for nonparticipating
20 hospitals conveys a lack of information or lack
21 of performance?

22 A. It literally says exactly how we --

1 what we are trying to convey. What we're trying
2 to convey with this asterisk is that the
3 hospital declined to report their performance on
4 this measure, so a score was assigned to reflect
5 the lack of information available. That's
6 exactly what we're trying to convey.

7 Q. But it also says worst hospital
8 score is 15, right?

9 A. Correct.

10 Q. So why doesn't it convey that this
11 is the worst hospital in that metric?

12 ATTORNEY BLAIR: It does.

13 (Sotto voce comments by counsel.)

14 THE WITNESS: My read of
15 this --

16 ATTORNEY BLAIR: Objection to
17 form.

18 THE WITNESS: -- that is
19 conveyed.

20 Because the two scores are
21 equivalent, I -- that is conveyed to
22 me by the equivalence of the numbers.

1 I don't know how else to communicate
2 it.

3 BY ATTORNEY CRAIN:

4 Q. Okay. All right. I guess.

5 (Sotto voce discussion.)

6 ATTORNEY CRAIN: Emily has a
7 good question.

8 THE WITNESS: Yes.

9 BY ATTORNEY CRAIN:

10 Q. Couldn't you convey lack of
11 information by just not scoring?

12 A. Not scoring the measure?

13 Q. Yeah.

14 A. Based on the guidance of our expert
15 panel, they have suggested that for this
16 particular measure, and we're talking about hand
17 hygiene, we impute a score.

18 Q. And is the guidance from the
19 April 12th meeting?

20 ATTORNEY BLAIR: Objection to
21 form: asked and answered.

22 THE WITNESS: I'm sorry, but

1 the actual guidance on imputing scores
2 on hand hygiene happened years before.
3 In fact, these five hospitals have had
4 imputed scores for these measures, I
5 think, since 2023 or 2024. So, again,
6 the imputation for these measures did
7 not happen in April 2024, and we've
8 talked about that extensively today.

9 BY ATTORNEY CRAIN:

10 Q. Sure. But not for limited
11 achievement.

12 That's the new -- that's the
13 change, right?

14 A. Correct.

15 Q. Yeah. Okay.

16 Okay. Let me just make the
17 question.

18 Okay. Okay. Let's keep going.

19 Okay.

20 ATTORNEY CRAIN: Let's go to

21 Tab 34.

22 Okay. This will be

1 Exhibit 17?

2 CERTIFIED STENOGRAPHER: Nine
3 teen.

4 ATTORNEY CRAIN: Nineteen, oh
5 my goodness.

6 THE WITNESS: I'm out of
7 order now. I didn't want to take the
8 time to fix it.

9 ATTORNEY CRAIN: No, it's all
10 right. We'll deal with it later.

11 THE WITNESS: Okay.

12 CERTIFIED STENOGRAPHER: One
13 second.

14 --oOo--

15 (Danforth Deposition Exhibit Number
16 19, E-mail string with
17 attachments, marked for
18 identification, as of this date.)

19 --oOo--

20 THE WITNESS: Thank you.

21 BY ATTORNEY CRAIN:

22 Q. Okay. So do you recognize this

1 document, Ms. Danforth?

2 A. Only because I reviewed it as part
3 of preparation for today.

4 Q. Part of preparation.

5 So you have no preexisting
6 memory of this document?

7 A. Not this specific --

8 Q. Okay.

9 A. -- document, no, but I'm -- I'm sure
10 it's as represented.

11 ATTORNEY CRAIN: Yeah, I
12 just -- I'll just note for the record
13 this was produced originally at
14 LEAPFROG00178623, and then counsel
15 sent over the native version with the
16 colors. So that's -- that's why this
17 one doesn't have a Bates.

18 Remember this one?

19 ATTORNEY BLAIR: Yeah.

20 ATTORNEY CRAIN: Yeah. Okay.
21 So stipulated?

22 ATTORNEY BLAIR: So

1 stipulated. We couldn't read it
2 before.

3 ATTORNEY CRAIN: We could
4 not. So thank you for sharing that.

5 BY ATTORNEY CRAIN:

6 Q. And so, Ms. Danforth, these are
7 responses to comments on the -- the imputational
8 model that you proposed in 2024.

9 Do you see that?

10 A. These are comments and responses to
11 comments.

12 Q. Correct. Exactly, correct.

13 A. Yes, correct, yes.

14 Q. And Ms. Campione drafted these,
15 right?

16 A. Yes.

17 Q. Okay. Now, she color-coded them
18 helpfully, and she sort of lays out the
19 different topics.

20 Do you see that?

21 A. Yes. Blue, green, pink, red.

22 Q. Exactly.

1 So blue, there's a -- a --

2 Misrepresents Performance?

3 A. Yes.

4 Q. Green says, More time?

5 A. Yes.

6 Q. Pink says, Do not penalize hospitals
7 for not completing a resource-intensive survey.
8 Keep them separate or allow hospitals to opt
9 out?

10 A. Yes.

11 Q. And red says, Hospital performance
12 does not change that much in two years
13 (addressed in response to theme above).

14 Do you see that?

15 A. Yes.

16 Q. Okay. Does this refresh your
17 recollection at all as to the type of comments
18 Leapfrog received after proposing the
19 imputational model?

20 A. Yes. I'm -- I'm sure I reviewed
21 these at the time.

22 Q. Okay. Now, I just want to talk with

1 you a little bit about the responses to those
2 comments.

3 A. Sure. I just want to see how many
4 there are. Give me one second.

5 Q. Yeah, that's -- that's a great
6 point.

7 A. Five, yes.
8 So we did receive six comments,
9 but --

10 Q. Yes.

11 A. -- as a reminder, over 800 hospitals
12 would have had this imputation applied --

13 Q. Yes.

14 A. -- so 6 out of 800. So this is a
15 fairly small sample size. But, yes, I -- I'm
16 sure I would have reviewed these comments when
17 we received them, and I'm sure we would have
18 reviewed this e-mail.

19 Q. Yes.

20 A. I have no doubt, yes.

21 Q. Now, just going to the number point.

22 In prior changes to the Safety

1 Grade Methodology, is this a representative
2 number of comments, more or less?

3 A. So this is 6 comments and then 4
4 additional comments, so 10 total. When we --
5 not to harp on this nursing thing, when we first
6 proposed back in 2022, 2023 to include the Total
7 Nursing Hours Per Patient Day Measure in the
8 Hospital Safety Grade, the original proposal, to
9 my recollection, was that we were actually going
10 to include two measures: One was called total
11 Nursing Hours Per Patient Day, and that is the
12 one that got added to the program. One was
13 called RN Hours Per Patient Day, which we've
14 talked about, and that didn't get added to the
15 program.

16 My recollection is that the
17 proposed changes to add those nursing measures
18 received more comments than this.

19 Q. Okay. Just by an order of
20 magnitude, any sense?

21 A. Many more --

22 Q. Okay.

1 A. -- two times -- probably two times
2 as many, three times as many.

3 Q. Okay. So I just want to look at the
4 responses here, and if you go to Page -- or
5 actually it's not a page number, but it's a
6 green bar.

7 Do you see that where it says
8 Responses to Public Comments?

9 A. Can you tell me just the hospital
10 name?

11 Q. No. Responses -- keep going.
12 There's no page numbers.

13 Do you see the green bar down
14 there?

15 A. Oh, yes.

16 Q. So just for -- for the record,
17 because there's no Bates number or page number,
18 it says, Responses to Public Comments.

19 A. Yes --

20 Q. -- do you see that?

21 So it says, Four commentator --
22 commenters supported the change to the

1 imputation methodology it said.

2 Do you see that?

3 A. Yes.

4 Q. Okay. Two commentators expressed
5 concern about Step 2 imputation misrepresenting
6 the current procedures or infrastructure of the
7 hospital to the public.

8 Do you see that?

9 A. Yes.

10 Q. Okay. Now, if we look at that -- so
11 the -- the nonbolded text under there, is that
12 Leapfrog's response to that comment?

13 A. Yes.

14 Q. Okay. So it says, We recognize that
15 hospitals eligible for Step 2 imputation may
16 score higher if they complete a
17 Leapfrog Hospital Survey.

18 Is that -- is that consistent
19 with your current view?

20 A. My current view -- I think I just
21 described it -- let me see it again in this
22 specific context.

1 They may overall on the Hospital
2 Safety Grade, because it includes a lot of
3 things, score higher or lower or stay the same.

4 Q. Okay. So I -- I'm just a little
5 unclear to my question.

6 This says, We recognize that
7 hospitals eligible for Step 2 imputation may
8 score higher.

9 Is that correct or not correct?

10 A. It's partially correct.

11 Q. Okay.

12 A. I -- actually, I don't think I wrote
13 this. I'm not sure that's how I would have
14 stated it, but I agree that's what it says, and
15 I believe it's partially correct. Just like I
16 said, they may; they may not; they may be
17 exactly the same.

18 Q. Okay. However, we cannot ensure if
19 this is the case if we do not have the data.
20 Our analyses have shown that performance among
21 hospitals that intermittently complete the
22 annual survey is lower than those hospitals that

1 completed the most recent survey.

2 Do you see that?

3 A. I do.

4 Q. Okay. What is the analysis that
5 this refers to?

6 A. That's what we've spoken about
7 earlier today where I suggested that you might
8 want to ask Matt Austin because I wouldn't have
9 done that analysis.

10 Q. Okay. Would -- and -- and, again,
11 I'm going to ask the same question because I'm
12 still not sure where to find it.

13 Do you have any recollection of
14 whether it was sent to you in any written form?

15 A. It would have been probably, like, a
16 table, like, in this other e-mail that Alex sent
17 where she had a table that included that
18 information that we were looking at together,
19 something like that.

20 Q. You say "probably."

21 Do you have a memory of it?

22 A. I don't have a memory of it --

1 Q. Okay.

2 A. -- but . . .

3 Q. But if it exists, it would have been
4 something like that?

5 A. Yes.

6 Q. Okay. The expert panel recognized
7 that hospitals with a drop in performance may be
8 incentivized not to report via the
9 Leapfrog Hospital Survey, and scores calculated
10 using participating hospitals would misrepresent
11 their true performance.

12 Do you see that?

13 A. Yes.

14 Q. Okay. Where did the expert panel
15 recognize that?

16 A. That was the discussion of the
17 meeting we had on April 12th.

18 Q. Okay. Any other place that it was
19 discussed?

20 A. I -- I don't know. I apologize.
21 Again, to refresh my memory on the April 12th
22 meeting, I had to read the minutes, so I -- I

1 can't say for sure either way.

2 Q. All I'm asking for is your best
3 memory today.

4 A. Yes, I know for sure it was
5 discussed on that meeting.

6 Q. Okay. And you don't have any other
7 recollection of it discussed elsewhere?

8 A. Not right now.

9 Q. Okay. And then it says at the
10 bottom, We do acknowledge the commenter's point
11 that the public may misrepresent the assigned
12 measure scores. In response, we will add a new
13 denotation to the Hospital Safety Grade website
14 for scores that have been imputed.

15 Do you see that?

16 A. Yes.

17 Q. Okay. And is that referring to the
18 asterisk?

19 A. Yes.

20 Q. Okay. Anything else it's referring
21 to?

22 A. I do not believe so.

1 Q. Okay. I want to keep going down.
2 We -- see four commentators towards the bottom?

3 A. I do, yes.

4 Q. Four commenters opposed penalizing
5 hospitals that choose not to devote resources to
6 completing a voluntary survey each year and be
7 allowed to opt out to the -- of the Hospital
8 Safety Grade.

9 Do you see that?

10 A. I do.

11 Q. Okay. Why doesn't Leapfrog permit
12 nonparticipating hospitals to opt out?

13 A. To opt out of what?

14 Q. Of being graded.

15 A. Because as I've expressed, from a
16 mission perspective, both Leapfrog and our
17 expert panel believe that in order for this to
18 be of good public use, we should grade as many
19 hospitals as possible because, again, so much
20 good safety data is available on the -- through
21 CMS, through Leapfrog, through this imputation
22 methodology. It's been a focus of ours to try

1 to make as much information available publicly
2 as possible. It's literally why we were
3 founded.

4 Q. And -- and you say to "grade as many
5 possible -- hospitals as possible."

6 Is it also to grade as many
7 hospitals as possible in an accurate way?

8 A. I believe that's literally embedded
9 in this -- in everything I -- in everything I
10 say. We're trying to do the best we could
11 possibly do, yes.

12 Q. So -- so the answer is yes?

13 A. Yes.

14 Q. Okay.

15 Okay. So then the response is,
16 The Leapfrog Hospital Survey is designed to help
17 hospitals benchmark their progress in quality
18 and safety.

19 Do you see that?

20 A. Yes.

21 Q. Okay. And then I'm just going to
22 keep reading down. Let's see.

1 And it says, The choice to not
2 participate should not excuse a hospital from
3 being graded, nor should they be given a score
4 that unfairly awards them points.

5 Do you see that?

6 A. I do.

7 Q. Okay. And, again, what is unfair?

8 A. Again, to reiterate, it was the idea
9 that these hospitals were being given near
10 perfect points based on the performance of other
11 hospitals.

12 Q. And -- and why is that unfair?

13 A. Because we have no information to
14 indicate -- and just going back to the hand
15 hygiene example, we have no reason to believe
16 that hospitals that aren't participating in a
17 Leapfrog Hospital Survey are doing those things.
18 So to give them credit for doing them was a
19 concern of Leapfrog's and the expert panel.

20 Q. Okay. I'm still not understanding
21 why -- why is that unfair?

22 ATTORNEY BLAIR: Objection to

1 form.

2 THE WITNESS: I unfortunately
3 don't have a better way to describe it
4 than to reflect the intentions in our
5 actual conversations.

6 BY ATTORNEY CRAIN:

7 Q. Okay. Okay.

8 All right. Let's keep going.
9 I want to talk about that asterisk a little bit.

10 Let's see . . .

11 Let's see . . .

12 ATTORNEY CRAIN: Actually,
13 let's go to Tab 62.

14 BY ATTORNEY CRAIN:

15 Q. Are you aware, Ms. Danforth, of a
16 document called Leapfrog's Guiding Principles.

17 A. I'm not off the top of my head.

18 Q. I'll show it to you. I'm just -- I
19 was curious if you knew of it.

20 ATTORNEY CRAIN: So this will
21 be Exhibit 20.

22

--o0o--

(Danforth Deposition Exhibit Number 20, Expert Panel's Guiding Principles on the Development of the Composite Leapfrog Hospital Safety Grade for U.S. Hospitals, marked for identification, as of this date.)

--o0o--

ATTORNEY BLAIR: And for the record, this is the expert panel's guide.

ATTORNEY CRAIN: Expert
panel's, yeah.

THE WITNESS: I'm sorry.
This doesn't have a Bates number
either.

Who produced this?

BY ATTORNEY CRAIN:

Q. It is pulled off the website, the public website. Your public website.

A. I am not aware of this document.

1 Is it leapfroggroup.org or
2 hospitalsafetygrade.org?

3 Q. I don't recall. One of the two.

4 Let me see.

5 Yeah.

6 Hospitalsafetygrade.org.

7 A. Um-hum. Can you just tell me what
8 heading it's under?

9 (Sotto voce comments by counsel.)

10 ATTORNEY CRAIN: Yeah, we
11 just got to it.

12 Okay. Are we -- we're good,
13 Cindy?

14 Okay. Great.

15 BY ATTORNEY CRAIN:

16 Q. So this -- so you don't recognize
17 this document, you're saying?

18 A. No.

19 Q. Okay.

20 ATTORNEY CRAIN: This -- for
21 the record, this is a document titled
22 Expert Panel's Guiding Principles on

1 the Development of the Composite
2 Leapfrog Hospital Safety Grade for
3 U.S. Hospitals.

4 THE WITNESS: So early on
5 when we were developing the Hospital
6 Safety Grade, we were, as I said,
7 working with Johns Hopkins Institute
8 for Patient Safety and Quality, and
9 Matt Austin -- we were also working
10 with another healthcare consulting
11 firm called Discern Consulting.

12 They had a convening role, I
13 believe, early on in bringing
14 together patient safety experts
15 because the review of existing
16 patient safety measures and
17 literature was quite extensive.

18 I cannot say for sure, but
19 this doesn't look like a,
20 quote/unquote, Leapfrog document.
21 This may have come from Discern
22 Consulting in their role of convening

1 and/or facilitating very, very early
2 meetings of the development of the
3 Hospital Safety Grade.

4 Is that clear?

5 BY ATTORNEY CRAIN:

6 Q. Sort of.

7 A. Okay.

8 Q. I guess I'm just wondering why it's
9 on Leap -- Leapfrog's public website.

10 A. I've never -- I was not aware this
11 was on our public website. That's why I asked
12 you which website you saw it on.

13 Q. Yeah.

14 A. I -- I --

15 Q. Okay.

16 A. -- was not aware that it was on our
17 public website.

18 Q. So I want to walk through this a
19 little bit.

20 A. May I read it just quickly? Just
21 so -- this is --

22 Q. Sure.

1 A. -- the first time I'm seeing this.

2 Thank you.

3 Q. Yeah.

4 (Whereupon, the witness reviews the
5 material provided.)

6 THE WITNESS: Okay.

7 BY ATTORNEY CRAIN:

8 Q. You're a fast reader.

9 A. I scanned it. I'm not.

10 Q. Okay. Let's -- let's start at the
11 top.

12 So The expert panel guiding The
13 Leapfrog Group on the development of the
14 Leapfrog Hospital Safety Grade has reached
15 consensus that the following principles will
16 guide their recommendations to Leapfrog for
17 calculating the grade.

18 Now, you are the Leapfrog
19 representative for the expert panel, correct?

20 A. Yes.

21 Q. Okay. But you don't -- you're not
22 aware of this document?

1 A. As I said, I think it may have come
2 from before -- when we first were developing the
3 Hospital Safety Grade, we did briefly work with
4 Discern Health in a convening way before we got
5 the expert panel up and running and turned
6 everything over to Matt Austin at the Armstrong
7 Institute for Patient Safety and Quality.

8 (Whereupon, as the certified
9 stenographer seeks clarification,
10 colloquy will not be captured on
11 the written record.)

12 ATTORNEY CRAIN: Institute.

13 THE WITNESS: Institute for
14 Patient Safety and Quality.

15 So my best guess is -- and,
16 again, it would have been 2012, 2013
17 that this is a product of
18 Discern Health in their convening
19 capacity.

20 BY ATTORNEY CRAIN:

21 Q. So are you saying that you don't
22 think the expert panel adopted this?

1 A. I'm saying that in my many meetings
2 of meeting with the expert panel and the
3 materials you've shown me today, I've not seen
4 this as a meeting material.

5 Q. And are you certain of that?
6 Because there have been times where you -- you
7 couldn't remember all the meetings.

8 A. I'm not.

9 Q. Okay.

10 A. But the use of the term "construct"
11 really stands out to me. Again, like, it's
12 something that we would have used, like, very,
13 very early on as we were constructing the
14 methodology for the Hospital Safety Grade, and
15 that's why I believe it could have been
16 Discern Health. And I'm not questioning that
17 the document exists. I'm just orienting myself
18 to it.

19 And I don't have an immediate
20 recollection of it, but I'm sure that if you
21 found it on our website, it is from our
22 website.

1 Q. Give me one second.

2 A. And under Construct, I see where it
3 says, The focus of the composite score is
4 patient safety, which is being defined as
5 freedom from harm, and that reflects other of
6 our materials.

7 So . . .

8 Q. Okay. So I want to -- I want to
9 talk through some of these points, the purpose
10 of a composite score, right.

11 It says, The purpose of the
12 composite score is to create a simple metric
13 that will improve consumer and purchaser
14 engagement around patient safety in U.S.
15 hospitals. Ideally, this increased engagement
16 will create additional market forces for
17 hospitals to improve the safety of care of
18 delivery.

19 Do you see that?

20 A. I do.

21 Q. Do you know what "the market forces"
22 are referring to there?

1 A. I don't.

2 (Whereupon, Attorney Blair, exited
3 the proceedings.)

4 THE WITNESS: I can say in
5 general one thing that we talk about a
6 lot at Leapfrog is that we really want
7 hospitals competing on patient safety.
8 So instead of saying we have the
9 fanciest birthing suites, we want them
10 to say we have the best patient safety
11 track record.

12 So given those
13 conversations, I can assume that when
14 we say create additional market
15 forces for hospitals to improve
16 patient safety of care, we mean we
17 wants hospitals competing on things
18 like low infection rates, low falls
19 rates and not just, you know, steak
20 dinners if you have a baby there, to
21 put it simply and concisely.

1 BY ATTORNEY CRAIN:

2 Q. I've been to different hospitals in
3 New York for that purpose, so I get it.

4 So --

5 A. It's a big thing.

6 Q. -- I -- I hear you.

7 So it -- it -- I want to harken
8 back to what we talked about this morning about
9 the restaurant grades --

10 A. Yeah.

11 Q. -- right.

12 Nobody goes to a C except for
13 the person when who wants the C pizza place,
14 right?

15 Is that the point of the
16 grades: the market forces of competition on
17 safety? People walk -- voting with their feet,
18 so to speak on safety, right?

19 A. So our experience is people don't
20 actually vote with their feet. I think we
21 really have seen that more than any other
22 affective way to drive hospitals to improve on

1 safety is for the hospitals to make safety
2 itself a priority, which why Safe Practice 1,
3 that leadership structure is -- again, it's
4 leadership engaged in safety -- is one of the
5 only measures that has stayed on our survey
6 almost since its inception and also in the
7 Hospital Safety Grade.

8 And so, you know, I think one of
9 the best and most effective, I guess, ways
10 we've seen hospitals really improve in this way
11 is to make that decision to improve.

12 I don't know that I have any
13 examples of what you just described, which is
14 patients --

15 Q. Voting with --

16 A. -- I think you said voting with
17 their feet.

18 Q. Yes.

19 Okay. So -- all right.

20 So let's keep going down this
21 document. And before -- I just -- well, I'll
22 come back to it.

1 Let's go to Imputing missing
2 data on Page 2.

3 Do you see that?

4 A. Yes.

5 Q. It says, When a hospital is missing
6 data for a particular performance measure, we
7 recommend ignoring the measure and recalibrating
8 the weights within the domain so that hospitals
9 are scored only on the measures for which their
10 performance data are available.

11 Do you see that?

12 A. I do.

13 Q. Now, that is not what Leapfrog does
14 today, right?

15 A. It is not what we do today.

16 Q. Okay. Leapfrog could do that with
17 respect to the four imputed measures, right?

18 A. Leapfrog's methodology has evolved
19 over the past 13 years. We haven't been doing
20 this for a number of years.

21 Q. Okay. But you could exclude hand
22 hygiene, for instance, right?

1 A. If the expert panel provided us with
2 some guidance and rationale on why we might
3 exclude hand hygiene, we would certainly have
4 that discussion with them.

5 Q. Okay. And the guidance and
6 rationale, for instance, could be that you have
7 no data on hand hygiene for nonparticipating
8 hospitals, right?

9 A. The expert panel can bring to us any
10 guidance or rationale they have for any change.

11 Q. Can I go back to something we talked
12 about earlier today? We talked about primary
13 and secondary data.

14 A. Yes.

15 Q. What is the secondary data source
16 for hand hygiene for nonparticipating hospital?

17 A. The imputed measure score we've been
18 talking about today.

19 Q. But that's not data, right?

20 A. And, again, we'll have to go back to
21 the transcript, but I believe what we talked
22 about and what I described, hopefully in not in

1 too much painful detail, is that those headings
2 are really meant to communicate that, first,
3 we'll look to see if there's a measure of score
4 available here and, if not, we'll go to this
5 other column or other category or other place to
6 look for a measure score.

7 We consider and the expert panel
8 considers imputed data data. And so that is
9 the secondary data source for those measures.

10 Q. So I -- I just want to make sure I'm
11 understanding this.

12 The -- the 15 score --

13 A. Yes.

14 Q. -- right, the limited achievement --
15 you're saying that is data?

16 A. Correct.

17 Q. Even though it's -- it could be 12,
18 it could be 20, it's still data?

19 A. An imputed score is a data point we
20 can use, correct.

21 Q. Well, I thought imputed -- im- --
22 imputation was -- was the process of taking the

1 data -- the score and put -- imputing it, right?

2 A. I'm sorry. I don't understand your
3 question.

4 Q. Yeah. Fair enough. It was a bad
5 question.

6 That was my first one today. I
7 admitted it was a bad question.

8 A. You looked confused too, so I was
9 like --

10 Q. Fair question.

11 So you -- you have -- we talked
12 about lots of different secondary sources this
13 morning, right?

14 A. Yes.

15 Q. The aha data -- we had our aha
16 moment, right? We had the historical data,
17 right?

18 The imputation model takes
19 those data and puts it into the score, right?

20 A. So --

21 Q. I just want an answer to my
22 question.

1 Yes or no?

2 A. I'm sorry, but I don't think the way
3 that you've explained that is correct --

4 Q. Okay. So if --

5 A. -- because --

6 Q. -- you can't answer it, that's fine.

7 A. -- I think you're confounding the --
8 the -- the term "imputation model" with imputed
9 data, which isn't -- and some other things. And
10 I'm sorry, but the way you're describing it and
11 the terms that you're using -- I don't believe
12 that that is correct, but, certainly, you can
13 ask again and --

14 Q. We'll try.

15 A. -- I'll try.

16 Q. So imputed data is -- is -- is the
17 -- the historical score for Step 1 is imputed
18 data, right?

19 A. So Leapfrog has a two-step
20 imputation --

21 Q. Yeah.

22 A. -- methodology, where Step 1, we

1 impute the historical past score from the last
2 two rounds of the Safety Grade --

3 Q. Yeah.

4 A. -- so based on the way I just
5 described it, yes, that's correct.

6 Q. Okay. Yes, it's correct, but the --
7 in that context, the historical score is the
8 imputed data?

9 A. Yes.

10 Q. Okay. In this Step 2, what is the
11 imputed data?

12 A. The numerical score assigned by
13 Leapfrog associated with the performance
14 category of limited achievement.

15 Q. And -- but that doesn't have an
16 external data source, right?

17 A. It is a reference to a point value
18 already assigned in other parts of Safety Grade
19 Methodology.

20 Q. Leapfrog just picked that number,
21 right?

22 A. It is associate -- Leapfrog did not

1 pick that number. As I described, a separate
2 national technical expert panel assigned those
3 values to each of the four performance
4 categories for each of those four measures, and
5 we aligned with those values for the purposes of
6 the Hospital Safety Grade.

7 Q. Okay. So let me -- let me go
8 passive voice.

9 The number was picked by
10 someone, right?

11 A. Yes.

12 Q. It didn't derive from an objective
13 calculation of data, right?

14 A. It was derived from a -- a separate
15 expert panel; that's correct.

16 Q. Okay. That's not my question,
17 though.

18 Is there any objective data
19 source where that number was derived from?

20 A. I'm sorry. Can --

21 Q. You're telling me who picked it,
22 right?

1 A. Right.

2 Q. The expert panel -- the separate
3 expert panel picked it.

4 I'm asking, Could that number
5 have been 20? Could it have been 5? Could it
6 have been 12?

7 A. Right. And what -- what I'm saying
8 is that when that panel went through that
9 process of assigning those values to each of the
10 four performance categories, my recollection --
11 and actually, we worked with Discern Health on
12 this as well because they helped us develop the
13 methodology for a value-based purchasing
14 program.

15 But my methodology is they used, I
16 think, something called maybe a Delphi process,
17 where there's sort of a process of looking at,
18 like, evidence, peer-reviewed literature and
19 other things.

20 So no, it's not just a simple
21 random assignment of a number. It was based on
22 a literature review and a scientific process to

1 assign those numbers to those performance
2 categories.

3 I just wasn't at Leapfrog when it
4 occurred. It actually predated even
5 Leah Binder. This would have happened probably
6 in 2006 or 2007 when these values were assigned
7 to these performance categories, but my
8 recollection and hearing how it was done is no,
9 it wasn't just someone saying how about 40; no,
10 35. It was a more scientific process than
11 that. I just can't speak to it.

12 So the way you worded your
13 question -- I'm not sure how to answer it based
14 on the fact that I know it wasn't a random
15 assignment of a number. It was a scientific
16 process that took into account peer-reviewed
17 literature, subject-matter expertise and other
18 components that I couldn't speak to.

19 Q. Okay. So for the imputed scores,
20 right, for hand hygiene again --

21 A. Yeah.

22 Q. -- which I got right this time --

1 A. Yeah.

2 Q. -- I'm learning -- you said it could
3 have been zero, right?

4 A. I said the imputed score could have
5 been zero. I did say that.

6 Q. So what's the objective basis of a
7 zero number?

8 A. I don't know because we -- we really
9 didn't have a long discussion about imputing
10 zero. One expert panelist, I think I mentioned,
11 made that recommendation. I don't remember any
12 discussion about the basis of imputing zero, and
13 we've never imputed zero.

14 Q. And I just want to make sure --

15 A. Sure.

16 Q. -- you've not reviewed a transcript
17 of the meeting, right?

18 A. I have not.

19 Q. But your recollection is that one
20 panelist made a specific recommendation of zero?

21 A. Yes, because it surprised me. So it
22 -- that's why I remember. And I believe it was

1 Arjun Srinivasan, but I -- we would have to
2 check the transcript.

3 Q. And was your recollection something
4 you recently were refreshed on or it's something
5 you remember?

6 A. No; it's something I remember.
7 Because it actually wasn't the first time that
8 someone had recommended that; it was the most
9 recent time.

10 On previous expert panel calls when
11 the expert panel makeup was slightly different,
12 we had a representative from the Agency for
13 Healthcare Quality and Research [sic]. I
14 talked to them -- I've talked about them a lot
15 today, AHRQ.

16 The representative's name was
17 Andrew Bindman, B-I-N-D-M-A-N. And I remember
18 during his conversations on the expert panel,
19 at one point, he threw out -- you know, we're
20 doing all of this work maybe with Mathematica
21 at that time, and he's like, We need hospitals
22 focused on patient safety. Let's -- I would

1 give them zeros, or something to that effect --

2 Q. Yeah.

3 A. -- and obviously, we didn't do that.
4 We kept on working our process with Mathematica.

5 But since Andy Bindman had said
6 that, I hadn't heard that really come up again.
7 And to me, it really represented, I think, a
8 shift in the focus of the expert panel to be,
9 you know, really locked in and zeroed in on --
10 on patient safety.

11 Q. On patient safety or on
12 participation?

13 A. On patient safety and wanting
14 information about patient safety.

15 Q. Are those two concepts separate to
16 Leapfrog, participation and patient safety?

17 A. I would argue that without Leapfrog
18 or CMS, it would just be difficult to know
19 anything about patient safety. As I mentioned,
20 when we were looking at my performance review,
21 I've looked high and low to find other patient
22 safety data available that's not from Leapfrog

1 or not from CMS. I'd love for someone else to
2 take on some of our measures so I can do more
3 with, say, hospital board and the emergency
4 department, but today, in 2025, if we're talking
5 about publicly available sources of information
6 about patient safety, it's Leapfrog; it's CMS.

7 The CDC publishes aggregated data,
8 but, certainly, you know, we are one of those
9 sources.

10 Q. Okay. Can we go back to the
11 guidelines document?

12 A. Yes.

13 Q. So I want to go back to the imputed
14 missing data section.

15 A. Yes.

16 Q. Let's look at the second paragraph.

17 In the situations where a
18 hospital does not have data available from the
19 primary data source for a particular performance
20 measure but an alternative data source is
21 available, data from the alternative or
22 secondary data source can be used in composite.

1 If data are used from a secondary data source,
2 attempts should be made to provide a grade that
3 is equitable to what the hospital would have
4 earned had the data been available from the
5 primary data source.

6 Do you see that?

7 A. I do.

8 Q. Is it Leapfrog's view, in the
9 corporate representative time, that that is what
10 the current imputation model does?

11 A. The current imputation model does
12 not do that, and the methodology in general has
13 not followed these principles in some time --

14 Q. Okay.

15 A. -- and that's why, like I said, I
16 think this must have been from the very, very
17 earliest days and, frankly, have not been
18 referenced by the panel, to my recollection or
19 knowledge, in any number of years.

20 Q. Yeah. The thing I -- I know you're
21 not the corporate representative for the
22 website, but I struggle with how a consumer

1 looking at this document would -- would
2 understand what Leapfrog is doing if there are
3 these big inconsistencies between this document
4 --

5 A. I'm --

6 Q. -- and the methodology.

7 A. -- struggling to understand how a
8 consumer could find this on our website.

9 Q. We found it.

10 A. I will -- the first thing I'll do
11 when I get home will be try to find it myself.

12 Q. Okay. So -- so I just want to go
13 back to that last sentence.

14 If data are used from a
15 secondary source, attempts should be made to
16 provide a grade that is equitable to what the
17 hospital will have earned had the data been
18 available from the primary data source.

19 Your view as a corporate
20 representative and personally -- if they
21 diverge, you can tell me -- is that is not what
22 Leapfrog does?

1 A. My view as Missy Danforth and the
2 corporate representative of Leapfrog is that the
3 thinking and guidance of the expert panel has
4 evolved over time, that's not captured in this
5 document. This document would not be considered
6 accurate in terms of expert panels guiding
7 principles.

8 Q. Okay. I just want to -- I'd like an
9 answer to my question. I get you have a
10 different point you want to make, but I -- and
11 so in this sentence, is this what Leapfrog
12 does -- let's see -- attempts should be made to
13 provide a grade that is equitable do what the
14 hospital would have earned had the data been
15 available -- available from the primary data
16 source?

17 A. Is this what Leapfrog does now
18 through our current Hospital Safety Grade
19 Methodology?

20 Q. The imputation method, yeah.

21 A. Yes. We make every attempt to find
22 other available data, which I've talked about

1 exhaustively.

2 If the fact exists that there is
3 not other available data -- but in terms of
4 effort to find other available data,
5 unquestionably, it is a significant focus of
6 all of the work we do, not just the Hospital
7 Safety Grade but also the Leapfrog Hospital
8 Survey.

9 Again, we spend lots of people time
10 and money to administer our free annual
11 Hospital Survey. We publish all of the survey
12 results for free on a free public website. And
13 we know over time, more and more important
14 patient safety and quality topics have emerged,
15 but we have limited room on our survey to ask
16 endless things. I think you pointed out it's,
17 you know, 300 pages long.

18 If CMS or the
19 American Hospital Association or the
20 Joint Commission or the Institute for
21 Healthcare Improvement were to take on any of
22 our measures in collection of that data and

1 publicly report it, we would absolutely use it.
2 We just have not been able to find anything
3 additional.

4 But in terms of effort and intent,
5 yes. Absolutely.

6 Q. So let me ask this question: Does
7 Leapfrog provide a grade that is equitable to
8 what the hospital -- nonparticipating hospital
9 would have earned had the data been available
10 from the primary data source?

11 A. So you're actually taking that out
12 of context --

13 Q. I'm asking --

14 A. -- because --

15 Q. -- a different question. I'm not
16 asking about the sentence --

17 A. Okay.

18 Q. -- I'm asking -- you can even
19 pretend the document doesn't exist.

20 A. Okay.

21 Q. If you want to look at it, because I
22 am reading the language, it may help.

1 A. I think that's why I'm confused.

2 Yes.

3 Q. I'm asking, Does Leapfrog provide a
4 grade for nonparticipating hospitals that is
5 equitable to what the hospital would have earned
6 had the data been available from the primary
7 data source?

8 A. Yes, I think we do.

9 Q. Okay. Let's go to the next page.

10 On top of 3, it says, If a
11 hospital is missing data for a large number of
12 performance measures, then a grade cannot be
13 reliably calculated. In this situation, no
14 grade should be issued for the hospital.

15 Do you see that?

16 A. I do.

17 Q. Does Leapfrog adhere to that
18 guidance?

19 A. Yes. And we've talked about it in
20 some detail --

21 Q. Yes --

22 A. -- hospitals missing measure --

1 Q. -- we have --

2 A. -- scores for more than six process
3 and structural measures, more than five outcome
4 measures are not issued a grade. Imputed
5 measures are not considered missing data. It's
6 considered a measure score that's used in the
7 calculation.

8 Q. So -- so that's what I wanted to get
9 at. That was my question, right.

10 We talked about -- we went
11 through all four imputed method -- method --
12 excuse me -- imputed measures --

13 A. Yeah.

14 Q. -- this morning, right?

15 And we went through the three
16 measures that you don't provide scores on for
17 nonparticipating hospital, right?

18 A. Correct.

19 Q. Okay. Without the imputation
20 methodology, that's seven process measures
21 missing, right?

22 A. Yes.

1 Q. Okay. So if the imputation
2 methodology was not applied, under Leapfrog's
3 guidance, you couldn't grade a nonparticipating
4 hospital?

5 A. No, not necessarily.

6 Q. Okay. Why?

7 A. So the missing data thresholds
8 themselves have actually evolved significantly
9 over the years. When we first started this in
10 2013, as I mentioned, we had slightly different
11 process and structural measures, slightly
12 different outcome measures, and the numbers of
13 the process and structural measures and the
14 numbers of outcome measures were slightly
15 different.

16 At any point, the expert panel can
17 evaluate -- as measures get added and removed,
18 added and removed -- those missing data
19 thresholds and determine if they agree or
20 disagree or recommend or provide guidance on if
21 those things should be changed.

22 So no, it's not necessarily true we

1 couldn't grade hospitals if they had more
2 missing data. Our expert panel could certainly
3 decide at any point they want to expand our
4 missing data threshold. And that's within
5 their role and capacity to do so.

6 They could say hospitals can be
7 missing 10 process and structural measures,
8 nine outcome measures, as long as they have
9 PSI 90.

10 Q. Absolutely. No, I -- so they could
11 -- forgive me. I'm going to say it this way:
12 They could juice the numbers in that way, right?

13 I know you'll say no because
14 I -- I said that that way, but that's what it
15 sounds like to me.

16 The question I have, then, is,
17 They -- they didn't do that, right? So
18 hospitals that don't participate are missing
19 seven process measures, right?

20 A. The expert panel does not view --

21 Q. I -- I just want an answer to my
22 question. I'm running low on time. If we can

1 just focus in.

2 A. No, they're not.

3 Q. The -- they're not what? Sorry.

4 A. They're not missing measure
5 scores --

6 Q. Okay.

7 A. -- for seven process and structural
8 measures --

9 Q. Okay.

10 A. -- they're missing measure scores
11 for three process and --

12 Q. Okay --

13 A. -- structural measures.

14 Q. -- fair enough. And you got me.

15 They're missing -- you are
16 missing data for seven of those measures from
17 the hospitals, correct?

18 A. Imputed scores are data points. Not
19 correct.

20 Q. Okay. You are -- I will go again.

21 You are missing any performance
22 data from the hospitals themselves for those

1 seven, right?

2 A. We're missing data from the
3 hospitals themselves.

4 Q. Okay. And so the only way to put
5 that data into Leapfrog's grading system is to
6 impute, right?

7 Let me -- let me revise it.
8 It's a long day for us all.

9 A. Yes -- no -- I know. I just want to
10 make sure I'm answering your question
11 accurately. So that one was long. I just need
12 to process it.

13 Q. Yeah, yeah. No. I get it.

14 If the imputation model was not
15 applied, there would be no way for Leapfrog to
16 have data for six process measures, correct?

17 A. If no imputation model existed,
18 theoretically, Leapfrog would not have measure
19 scores for those six process measures.

20 Q. Correct.

21 Okay. And then under
22 Leapfrog's guidance, which is publicly put on

1 its website, it could not grade the
2 nonparticipating hospitals, right?

3 A. No. The missing data thresholds
4 that you just described weren't established. I
5 don't see those numbers in this document.

6 Do you?

7 Q. No. I'm talking about the ones that
8 you just mentioned before, the six process
9 measures.

10 Right?

11 A. But I'm saying that number has
12 evolved over time. When this document was
13 written --

14 Q. Yes.

15 A. -- it would not have been that.

16 Q. I -- I -- I --

17 A. Oh, okay. I'm sorry --

18 Q. -- I'm setting that aside --

19 A. -- okay. I'm not following.

20 Q. -- I'm saying patients today looking
21 at Leapfrog's website -- which I know you're not
22 a corporate representative for. We don't need

1 to rehash that -- patients today looking at the
2 website will see that the Leapfrog did not grade
3 hospitals that lack information for the six
4 outcome measures, right -- process measures?

5 A. We don't specify which of the 22
6 measures need to be missing in order not to get
7 graded. So the way that you just asked that
8 question is not true.

9 As I described earlier, a very
10 small hospital, for example, that didn't have
11 enough patients to return those patient
12 experience surveys would be missing those five
13 patient experience measures. Maybe they don't
14 have an ICU, so it does not apply for ICU
15 staffing. And theoretically, they're, you
16 know, missing one other thing that takes them
17 to seven.

18 Hospitals that are not graded
19 can -- we don't say this hospital can't be
20 graded because they're missing this specific
21 measure and this specific measure and this
22 specific measure and this specific measure.

1 Q. So the Leapfrog's website says,
2 Hospitals missing more than six process measures
3 . . . are not graded.

4 A. Right.

5 But it's any six process measures.
6 You keep saying "these" six process measures,
7 and it's not correct. It's any six process and
8 structural measures. And as I've said, those
9 five patient experience measures are process
10 and structural measures, so they could be
11 missing those measures.

12 Q. Totally with you.

13 A. Oh, okay.

14 Q. I did not say "these" in that
15 question.

16 A. Oh, okay. I think --

17 Q. Because it does not say that on the
18 website.

19 A. Okay.

20 Q. And I'm -- you can see it's
21 highlighted.

22 A. Okay. I can't -- but I'll take your

1 word for it.

2 Q. Hospitals missing more than six
3 process measures . . . are not graded.

4 ATTORNEY WOOD: Objection to
5 form.

6 BY ATTORNEY CRAIN:

7 Q. Okay. I'll read it all for
8 Courtney.

9 Hospitals missing more than six
10 process measures, more than five outcome
11 measures, or PSI 90 are not graded.

12 Do you see that?

13 A. I don't see that. I --

14 Q. I'm sorry. Are you aware of it?

15 A. I -- I believe that that's wherever
16 you say it is because you're reading from a
17 document.

18 Q. That's consistent with what you
19 testified today about what -- about the missing
20 numbers that are not graded, right? We talked
21 about the -- exactly those numbers earlier
22 today, right?

1 A. The six process -- yes. In terms of
2 the number of missing measure scores, yes.

3 Q. Okay.

4 A. Yes.

5 Q. So --

6 A. Based on the 2025 -- Spring 2025
7 scoring methodology that we've been looking
8 at --

9 Q. -- you don't think it's a little --

10 A. -- yes.

11 Q. -- bit confusing that Leapfrog is
12 actually missing hospital performance data for
13 seven outcome measures -- process measures -- I
14 always say that wrong -- process measures but is
15 telling people on its website that they don't
16 grade when six are missing?

17 A. I don't think that's confusing
18 because they're not missing. If you look on,
19 like, the Delray, they don't have seven blanks,
20 process and structural measure scores. So I
21 don't -- I guess I don't think that's confusing.

22 Q. So what does "missing" mean?

1 A. Not available from the primary or
2 secondary or other sources. Again, like, I wish
3 I had a better way to describe this, but --

4 Q. I do, too.

5 A. -- we're looking at the existence of
6 a measure score, and the existence of a measure
7 score includes imputed data, and I -- I
8 described with, say, CMS imputing that patient
9 racial and ethnicity data, that is real data.
10 That is real data they make calculations on --

11 Q. For sure.

12 A. -- and they represent to hospitals.

13 When we impute data, it is also
14 real data that we make calculations on. We
15 don't consider imputed data missing data. It
16 is a data point that is used in a mathematical
17 calculation.

18 Q. And I'm totally with you for
19 historical data for the means. That is -- those
20 are real numbers. What I'm still not
21 understanding is -- limited achievement just
22 seems to be -- and I'll use Ms. Campione's word

1 the other day -- an arbitrary number.

2 A. I understand that Ms. Campione used
3 that word. Ms. Campione didn't know the
4 historical background of how those numbers were
5 assigned, and, in fact, they're anything but
6 arbitrary. As I said, they were scientifically
7 assigned, and that's why there's variation among
8 them, by a technical expert panel that was
9 administered by Discern Health before I got
10 here. They're not arbitrary. They were done in
11 a -- a scientific way and in a scientific
12 process.

13 Q. And before Ms. Binder got there,
14 right?

15 A. Yes. I believe it would have been
16 2006 or 2007.

17 Q. Okay.

18 A. And the reason I know that is
19 because the original CEO of The Leapfrog Group,
20 Suzanne Delbanco, passed very young due to
21 cancer. And during her memorial, people were
22 sort of retelling stories --

1 Q. Got it.

2 A. -- and one of those people was from
3 Discern Health and said, Actually, I've been
4 working with Leapfrog for even longer, and I
5 actually was the one working on this value-based
6 purchasing program.

7 And so it's very fresh in my mind.

8 Q. So -- and I -- I don't mean to be
9 glib, and I'm -- I'm very sorry for her early
10 passing, but your understanding of how the
11 limited achievement numbers came to be is from a
12 memorial service, or is it from another source?

13 A. No; it's from -- I administer that
14 program now, and so I have some historical
15 background. I just don't have the physical
16 documents showing --

17 Q. Okay.

18 A. -- the meeting minutes and all of
19 that because it happened before my time, and
20 those weren't necessarily passed on to me. But
21 I was made aware by Discern Health that that was
22 the process because I asked that same question

1 early on.

2 Long before we did the Safety
3 Grade -- again, those values are used in our
4 value-based purchasing program, and so, you
5 know, as we've added measures to the
6 value-based purchasing program, over time,
7 we've had to assign numerical scores to those
8 performance categories. And Discern Health did
9 that scientific process for that different
10 technical expert panel. I just don't have
11 access to the exact meeting minutes notes
12 process that they use.

13 Q. Okay. Have you reviewed the expert
14 reports in this case?

15 A. Have I reviewed the expert reports?
16 For our witnesses or your
17 witnesses?

18 Q. Any.

19 A. Yes.

20 Q. Which -- which ones?

21 A. Both.

22 Q. Okay.

1 A. And I would call it a thorough scan.
2 I'm not going to be able to word-for-word
3 recite, but I have seen expert witness
4 testimony.

5 Q. Okay. Just reports, not test -- or
6 there is some testimony.

7 Have you --

8 A. PDFs.

9 Q. PDFs. Okay.

10 Is it a transcript that you've
11 reviewed, or it's like a written report?

12 A. No; it's -- it's a written report.

13 Q. Okay. And are you aware of any
14 explanation in those expert reports of how the
15 limited achievement number was assigned?

16 A. Am I aware of any explanation of
17 those expert reports of how the . . .

18 I'm not.

19 Q. Okay.

20 A. I don't know how they would have had
21 that information.

22 Q. Yes.

1 I just want to go to one last
2 thing. If you go back to Exhibit 6 -- just so
3 you know I'm not making it up. You'll see when
4 you get there.

5 A. Yeah.

6 Q. Exhibit 6 is the June 14th, 2017
7 meeting.

8 I don't think you have the
9 right document, do you?

10 A. No.

11 Oh, mine has two numbers. I'm
12 sorry.

13 Q. Oh, yeah, there may be --

14 A. Each document has --

15 Q. It's the pink 6.

16 A. Okay. Give me a minute.

17 Q. It's going to be hard for trial.

18 A. I said I put them out of order and
19 didn't want to --

20 Q. No worries.

21 A. -- spend time putting them back in
22 order, but now I can't find it.

1 Six?

2 Q. Got it?

3 Oh, 6, yeah.

4 A. No.

5 Q. Oh, all the way at the bottom.

6 It's the last one. I think it
7 is.

8 Six?

9 A. No. This is 20, so -- I'm sorry.

10 Q. Here, let me just show you what I
11 have as Exhibit 6.

12 A. I did not lose any documents. I
13 want to be very clear.

14 Q. This is what I have as Exhibit 6,
15 and I just wanted to show you that point.

16 Do you see where it says
17 Guiding Principles?

18 A. I do now. I did not when I --

19 Q. Okay.

20 A. -- originally -- oh, from 2017. No,
21 I --

22 Q. 2017.

1 A. Oh, I do now see it --

2 Q. Got it? Okay.

3 A. -- and --

4 Q. Do you have any reason to think that
5 the document we looked at, the Guiding
6 Principles, is not the one referenced in that
7 meeting minutes?

8 A. Only because it's not dated, and --
9 and, again -- so I -- I can't attest. I
10 apologize, but --

11 Q. And you don't recall what was
12 discussed in that regard at the meeting?

13 A. No. And if you remember when I told
14 you about this in-person --

15 Q. Yeah.

16 A. -- meeting, I said I actually didn't
17 remember even having in-person meetings. They
18 were very rare. It said we were in Alexandria,
19 Virginia. The last in-person expert panel
20 meeting I remember was in Baltimore because
21 everyone wanted to be near an airport. So I --

22 Q. No worries.

1 A. -- didn't -- and I apologize. When
2 I scanned this -- I do see it now. So I wasn't
3 --

4 Q. I just wanted to make sure --

5 A. I just -- I just misstated. So I
6 apologize, for the record.

7 Q. No worries. I --

8 A. And I can't confirm whether or not
9 that's what was reviewed because it's not dated,
10 and I don't know what those meeting minutes
11 would be.

12 Q. Great. Okay.

13 A. I have to stop scanning things.

14 Q. Yeah.

15 ATTORNEY CRAIN: Let's go
16 off.

17 ATTORNEY WOOD: Yeah. It's
18 got to be close.

19 THE VIDEOGRAPHER: Going off
20 the record. The time is 1730.

21 --oOo--

22 (Whereupon, a recess was taken from

1 5:30 p.m. EDT to 5:47 p.m. EDT.)

2 --oOo--

3 --oOo--

4 (Danforth Deposition Exhibit Number
5 21, E-mail string, Bates stamped
6 LEAPFROG00244555 through
7 LEAPFROG00244558, marked for
8 identification, as of this date.)

9 --oOo--

10 THE VIDEOGRAPHER: Going back
11 on the record. The time is 1747.

12 ATTORNEY CRAIN: Great.

13 BY ATTORNEY CRAIN:

14 Q. Welcome back, Ms. Danforth.

15 A. Thank you.

16 Q. Glad you're enjoying the -- the
17 sparkling water.

18 A. Oh, my gosh, you're telling me.

19 Q. So I -- I've given you a document
20 from May of 2024.

21 Do you see that?

22 A. Yes.

1 Q. And it's an e-mail -- it's a thread
2 between you, Ms. Campione and Paulina Litter.

3 Do you see that?

4 A. Yes.

5 Q. And I don't think we've -- I don't
6 recall talking about her today.

7 Who is Paulina Litter?

8 A. I believe her last name is
9 pronounced Litter.

10 Q. Litter. Okay.

11 A. But she was a employee at Leapfrog
12 whose position title I don't remember.

13 Q. It says senior specialist,
14 operations and special projects --

15 A. Oh, sorry.

16 Q. -- at the top.

17 A. Yes.

18 Q. Okay.

19 A. Yes. She did not work on my team.

20 Q. Got it.

21 Okay. So I'm going to go to
22 the bottom, which is the first e-mail on

1 Page 244558.

2 Do you see that?

3 A. I do.

4 Q. And am I -- is it fair to say that
5 this is a -- this is the process through which
6 that footnote we've been talking a lot about was
7 ultimately drafted? Is that what this looks
8 like to you?

9 A. Probably, yes.

10 Q. Okay. So it's an e-mail from her to
11 you, and she says, Hi, Missy. Paulina is going
12 to talk to Devon tomorrow. I thought more on
13 it, and I don't think getting four columns to
14 flag imputation for the four measures is a big
15 lift. I think asterisks might create issues for
16 them, and having the imputation text for every
17 hospital will create confusion.

18 Do you see that?

19 A. Yeah.

20 Q. Okay. So I'm just going to take you
21 up where they start drafting what the footnote
22 is.

Page 537

1 A. Yes.

2 Q. And if you go to Page 244556.

3 A. I am there.

4 Q. And Ms. Campione proposes, Is this
5 what you have in mind? And she says, Text.

6 Do you see the asterisk on the
7 bottom?

8 A. Yes.

9 Q. She says, The hospital declined to
10 report data for this measure, so secondary data
11 was imputed using Leapfrog's imputation
12 methodology.

13 Do you see that there?

14 A. Yes.

15 Q. And we've talked a lot today about
16 second data -- secondary data and the imputation
17 methodology, right?

18 A. Yes.

19 Q. Now, you respond as 4:07 p.m.

20 Do you see that?

21 A. Yes.

22 Q. And you say, Yes, maybe . . . -- or

1 colon So a score was imputed for this
2 measure " instead of secondary data.

3 Do you see that?

4 A. Yes.

5 Q. So you took out the language
6 "instead of secondary data"?

7 A. So I was the one who actually
8 received the help desk ticket comment that we
9 reviewed today basically saying, You need to be
10 really up-front about how you're doing this on
11 the website. I took that to heart and really
12 wanted to be up-front that this was a score that
13 was imputed that was assigned, et cetera. I was
14 really trying to stay away from saying it was a
15 score that was calculated or a score that was
16 derived. I was trying to be -- to be frank,
17 just as plain as possible.

18 And so the score was "assigned";
19 the score was "imputed." I think we ended up
20 going with "assigned." We don't use terms like
21 "primary data" versus "secondary data," really,
22 on this particular part of our website that

1 I'm, like, familiar with. It's really to help
2 hospitals understand because, again, like, we
3 have tried to be as transparent as possible
4 with hospitals, so that's typically how we use
5 those terms.

6 And so here I was trying to convey,
7 you know, Let's use "impute." I think I say
8 something like that.

9 Q. Okay. And when you say -- just
10 going back, you said you don't use "primary" and
11 "secondary" data.

12 You use it on the 28-page
13 document we looked at, right?

14 A. Yes.

15 Q. Just not on the -- the website?

16 A. Like, on the gas gauge page --

17 Q. Yeah.

18 A. -- we refer to data sources, and in
19 that table, you can see all those data sources.
20 That's actually where it's referenced.

21 But on these footnotes, I was just
22 trying to be as short and plain and

1 straightforward as possible in making a
2 suggestion or recommendation.

3 Q. Okay. And you said you didn't want
4 to use the word "calculated" --

5 A. Correct.

6 Q. -- why is that?

7 A. As I've described, it wasn't
8 calculated. It was assigned.

9 Q. Okay. And the same thing with
10 "derived."

11 You said you didn't want to use
12 the word "derived"?

13 A. Oh, did I say that? I'm sorry.

14 Q. You did. I can read it back, if
15 it's helpful.

16 A. Okay. I didn't want to use
17 "calculated."

18 Q. Okay. Are you saying you -- you
19 were okay with "derived"?

20 A. I don't usually use that word.

21 Q. Okay.

22 A. I don't know where that just came

1 from, but I didn't want to use "calculated."

2 Q. Okay. Okay.

3 A. Sorry.

4 Q. Okay. And then Ms. Campione
5 responds. She goes, Like this? Text:
6 Asterisk, The hospital declined to report data
7 for this measure, so a score was imputed for the
8 measure.

9 Do you see that?

10 A. Yes.

11 Q. And then you say, Yes, in this
12 e-mail on the next page?

13 A. Yes. But there must have been more
14 e-mails because that's not what we went through.

15 Q. Yeah, subsequently you change it to
16 "assign."

17 A. Okay. Yeah, so this was just
18 spitballing, yeah.

19 Q. Yeah. And -- and you ultimately
20 land on the "assign" language.

21 A. Correct.

22 Q. And why "assigned" versus "imputed"?

1 A. I think someone must have said to
2 us, "Imputed" might not be a consumer friendly
3 word. How about "assigned"?

4 And I said, Yes, it was assigned.
5 I honestly have -- I have no idea.

6 Q. Okay.

7 A. I'm conjecturing.

8 Q. Okay. All right.

9 A. I -- I take it this far, and then
10 it -- all the rest of the e-mails will have
11 other people's names on it.

12 Q. I'm trying to see if we can get that
13 e-mail for you.

14 A. Yeah.

15 Q. Yeah. Okay.

16 ATTORNEY CRAIN: Let me --
17 can you give me that -- the sequence,
18 Emily?

19 ATTORNEY WOOD: The --

20 ATTORNEY CRAIN: Yeah.

21 BY ATTORNEY CRAIN:

22 Q. I want to ask you about something we

1 talked about earlier today.

2 A. Okay.

3 Q. Just go back to something. So on --
4 we talked about -- so we talked about the
5 financial risk e-mail.

6 Do you remember that
7 discussion?

8 A. Yes.

9 Q. You had -- you testified that you
10 had just gone into that role, and so you were
11 asking to figure out the way the licensing
12 system worked, right?

13 A. For accolade specifically, yes.

14 Q. Yes. And just to be clear, were you
15 more knowledgeable about other licensing?

16 A. No. I just --

17 Q. For that e-mail, you're saying?

18 A. For this e-mail, I -- yes.

19 Q. Okay. I just wanted to make sure.

20 So you've been in the role now
21 for almost two years, right?

22 A. Yes.

1 Q. Okay. And now that you are no
2 longer new in the role of overseeing both
3 ratings and licensing --

4 A. Yes.

5 Q. -- what is the financial risk to --
6 to Leapfrog from hospitals not participating in
7 its survey?

8 A. I couldn't quantify any financial
9 risk to Leapfrog for hospitals not participating
10 in its survey.

11 Q. Is -- are you saying there's no
12 financial risk to Leapfrog if participation goes
13 down?

14 A. I could not assess any financial
15 risk to Leapfrog if participation goes down. As
16 I mentioned, participation has fluctuated over
17 the years between 2,300, 2,400, approximately.

18 The way that our data sets are
19 priced -- and, again, it's Leapfrog Hospital
20 Survey results, those score results. So
21 basically instead of four cell phone bars, it
22 says in the Excel file "achieve the standard."

1 The Leapfrog ambulatory surgery center results,
2 same thing, instead of those cell phone bars
3 you see in our public reporting website, it
4 would say "achieve the standard." The Hospital
5 Safety Grades -- I'm sorry.

6 Q. I'm just confused because I don't --
7 I don't see how it's responsive to my question.

8 My -- my question is -- and
9 forgive me for -- you know, my question is, Is
10 there any financial risk to Leapfrog from a
11 decline in participation?

12 Yes or no?

13 A. No, that I can assess.

14 Q. Okay. None at all?

15 A. None that I can assess.

16 Q. And why do you qualify with "I can
17 assess"?

18 A. I have been in this role for two
19 years. I don't necessarily do things like
20 financial modeling or -- I really just make sure
21 that the data is correct. I help coach --
22 oversee contracts. I'm not necessarily doing

1 financial risk analysis in -- in any way.

2 Q. Okay.

3 A. I also haven't had any opportunity
4 to have input on basically what you just
5 described. Basically any kind of modeling,
6 looking at financial risk is not something I've
7 done in the past two years.

8 Q. Okay. And so you are -- you are the
9 corporate representative for licensing, right?

10 A. Correct.

11 Q. Leapfrog has no view as a corporate
12 entity that if participation declined, that
13 could reduce revenue?

14 A. Because of the way our contracts are
15 structured --

16 Q. Hold -- hold on.

17 A. -- it would not necessarily reduce
18 revenue.

19 So I do have an opinion. I guess
20 the answer would be no.

21 Q. Okay.

22 A. Can I talk a little bit about the

1 structure?

2 Q. Yes. I wanted to get the -- get
3 your opinion first.

4 A. Okay.

5 Q. So Leapfrog's view is if
6 participation declined --

7 A. Yes.

8 Q. -- you would not lose revenue?

9 A. Correct.

10 Q. Okay. Why is that?

11 A. So the -- the way that our data
12 licensure contracts are structured now -- so now
13 we're not talking about the Accolades, those
14 designated logos. So the way our data licensure
15 contracts are structured is because they often
16 take a very long time to negotiate those
17 agreements -- it can be upwards of a year --

18 Q. Yes.

19 A. -- or even longer, we often include,
20 like, auto renewal terms. And once we have a
21 data licensee enter into a data licensure
22 agreement with auto renew, we've historically

1 seen that they continue to license those data
2 just empirically as the number of hospitals
3 included in the data sets that have data
4 available has fluctuated over time.

5 I've not known of any feedback that
6 now we don't want to license the data, we've
7 not seen any data licensee stop licensing the
8 data due to survey participation. I've never
9 had a data licensee ask me about survey
10 participation or the number of hospitals
11 participating.

12 So in that way, I -- the answer --
13 my answer would be no.

14 Q. Okay. Let me ask this question,
15 then.

16 See, when I say it that way,
17 I'm buying time to frame the question in my
18 head. We all -- we all have our tricks, right.

19 If Leapfrog stopped grading
20 nonparticipating hospitals, just stopped
21 altogether, do you believe participation would
22 go down in the survey?

1 A. No.

2 Q. Okay.

3 A. No. We have hundreds of hospitals
4 that will never be eligible to receive a
5 Hospital Safety Grade who for years and years
6 have participated in the
7 Leapfrog Hospital Survey. Again, the Safety
8 Grade is really the sort of narrow construct --
9 I think we just saw that word -- focused on
10 patient safety, but a Leapfrog Hospital Survey
11 includes measures about maternity care and
12 pediatric care, inpatient surgery, outpatient
13 surgery. It's used to compare outpatient
14 surgery in hospitals to ambulatory surgery
15 centers.

16 So there's all kinds of hospitals,
17 and I've spoken about this previously, like
18 pediatric hospitals, critical access hospitals,
19 that have and do and continue to do the survey
20 regardless of the Safety Grade and who have
21 never gotten a Safety Grade and still do the
22 surveys, so I wouldn't see that as being a

1 factor.

2 Q. Is there any connection at all
3 between the Safety Grade and hospitals'
4 decisions to participate in the survey?

5 A. I'm sure some hospitals make the
6 decision to participate in the survey because
7 some of those measures are used in the
8 Safety Grade, but before we started doing the
9 Hospital Safety Grade, we had hundreds of, you
10 know, thousands of hospitals.

11 So, yes, the answer is probably
12 yes, some.

13 Q. Okay. So --

14 A. Not all, and, again, hundreds of
15 hospitals do the survey that aren't even
16 eligible for a Safety Grade.

17 Q. Got it. Okay. Understood.

18 A. Okay. Yes.

19 Q. But if -- okay. So if fewer
20 hospitals ended up submitting data in the
21 survey, would that make the data set that
22 Leapfrog collects less complete?

1 A. Would that make the data set that
2 Leapfrog collects less complete?

3 I guess I, personally, have never
4 talked about our data set as being complete or
5 incomplete. The data licensees that we work
6 with are oftentimes, like, state-based or
7 regional in nature. And so complete to them
8 may be hospitals in our network or hospitals in
9 our state, not necessarily hospitals across the
10 country. So I don't know that I've or Leapfrog
11 has made the connection between how many
12 hospitals are in the data file versus a data
13 being complete.

14 I think we talk about the data
15 being complete as these minimum data
16 requirements that we talked about earlier
17 today, meaning that all hospitals submitting a
18 survey are required to report on those
19 Sections 1, 2, 4, 5, 6 and 7. That's how we
20 tend to talk about data completeness, is that
21 we have those minimum requirements.

22 And to be clear, for the Ambulatory

1 Surgery Center Survey, all sections are
2 required. So there's five sections to that
3 survey, and all are required in order for them
4 to submit the survey.

5 Q. If fewer hospitals participate in
6 the survey, Leapfrog has less data, right?

7 A. We would have less data on those
8 hospitals, yes.

9 Q. Think -- think you had to go with me
10 on that one. It's just a numerical --

11 A. Yeah. It just -- it's not a --

12 Q. -- it's just a number?

13 A. -- a -- a value -- right. It's a
14 number. I can't assess a value to it, right.

15 Q. Okay. A data set that is less
16 complete is worth less than a data set that is
17 more complete, right?

18 A. Can you give me an example?

19 Q. If you had a data set of 30
20 hospitals, presumably, that would be less
21 valuable than a data set that included 2,000.

22 A. Right. And that's where I'm saying,

1 no, that's not the case. We have a health plan,
2 I think, in Massachusetts, and I think the data
3 that they request is probably for 30 hospitals.
4 And they've been licensing those data and
5 renewing it for years and years and years. And
6 so, again, it really depends.

7 The -- the uses are so variable by
8 each -- because it's not all these national,
9 you know, health plans or national employers.
10 A lot of times, it might be a small or regional
11 data user. It could be a researcher. And
12 maybe the thing they care about is, you know,
13 C-section rates. So to them, completeness is
14 actually just I need as many C-section rates
15 for as many years as you have.

16 So this question is not -- this
17 answer is not evasive. It is literally what
18 the data licensees tell me -- it's what they
19 tell me. This is first -- this is firsthand
20 what they told me, not what I've heard --

21 CERTIFIED STENOGRAPHER: Excu
22 se me. Sorry. Could you -- could you

1 repeat that?

2 ATTORNEY CRAIN: She said,
3 This is first --

4 THE WITNESS: This is
5 firsthand what they told me, not --
6 not what -- not what I've heard.

7 And so, you know, the value
8 of the data to them is based on who's
9 in it and who they want to use.

10 BY ATTORNEY CRAIN:

11 Q. So you oversee the licenses, right?

12 A. Yes.

13 Q. And you are the corporate
14 representative --

15 A. Yes.

16 Q. -- for licenses?

17 Can you tell me generally what
18 percentage of licensees fall into the different
19 categories you mentioned? So national
20 insurers -- approximate -- ballpark, how many of
21 your licensees are national insurers?

22 A. Two.

1 Q. Out of how many?

2 A. Thirty -- 30 or 35.

3 Q. Okay. So 30 or 35 total licensees?

4 A. Yep.

5 Q. What are the two?

6 A. Elevance and . . .

7 Q. Is one of them Centene?

8 A. No. That's not a national health
9 plan. It -- so it's United, but it's not
10 actually United that licenses the data. They
11 have, like, a subsidiary --

12 Q. Got it.

13 A. -- that licenses the data. But I
14 believe they're technically affiliated with
15 UnitedHealthcare.

16 Q. Okay. And how many employers?

17 A. How many employers licensee the
18 data? One employer group.

19 Q. Okay. Which one?

20 A. Purchaser Business Group on Health.
21 And they're in California. They used to be
22 Pacific Business Group on Health.

1 Q. Okay. And how many, like,
2 individual researchers?

3 A. I didn't include the researchers in
4 that number because they often get the data for
5 free --

6 Q. I see.

7 A. -- so I included, like, the 0 or 35
8 -- these are organizations that we charge --

9 Q. So --

10 A. -- money to --

11 Q. -- okay. Let me fix -- let me make
12 it easier on you --

13 A. Okay.

14 Q. -- of the 35, what -- what are the
15 rough numerical buckets of -- that -- that's in
16 that 35?

17 A. Okay. So there's organizations,
18 like solutions providers, right, so what you
19 might think of as, like, healthcare vendors that
20 may license the data for, like, internal use,
21 like business development, that kind of thing.

22 We have a couple states --

1 California, Massachusetts -- that license the
2 data so they can do some benchmarking just for
3 hospitals in their state. So one is called
4 CHIA, C-H-I-A, and they're, like, a public
5 health organization --

6 Q. Okay.

7 A. -- in Massachusetts.

8 So there's a lot of little buckets.
9 I'm just --

10 Q. Yeah.

11 A. -- I'm going to -- those are little
12 buckets.

13 So health care solutions providers
14 are vendors -- you might think of them --

15 Q. Yeah.

16 A. -- a lot of those are for internal
17 use.

18 These state-based organizations or
19 agencies -- we talked about the national health
20 plan. We have some regional health plans. So
21 Health Net actually licenses the data, but they
22 only administer health insurance products in

1 California and maybe part of Oregon. They're
2 not -- they're not national in scope.

3 Blue Cross Blue Shield,
4 North Carolina, Blue Cross Blue Shield of
5 New Jersey, and then Capital Blue Cross and
6 Blue Shield, which is just this little weird
7 market in Pittsburgh.

8 We also have -- I don't know how
9 you would define them in a way that's easy, but
10 we call them "value-added resellers." It's
11 basically organizations who have data of their
12 own. They license Leapfrog's data and combine
13 it with their own or other data, and they
14 resell it as their own independent product to
15 whoever they want. And we don't necessarily
16 know who that is, but we've given them
17 permission to do that.

18 And one example would be
19 Embold Health. They collect physician data,
20 and they do physician ratings. They pair some
21 of that with our facility-level ratings, and
22 they have a separate and independent product --

1 Q. Okay.

2 A. -- and that would be another
3 category.

4 Q. Any others you can think of?

5 A. Yes. So the other category -- and
6 this is -- I'm not sure -- they are a healthcare
7 -- consultants -- I would call them
8 "consultants," so, like, Premier, which I think
9 is, like, a healthcare consulting organization.
10 So that would be the other group. And it's just
11 Premier.

12 So I would say the consultant,
13 value-added resellers, regional and national
14 health plans, solutions providers, employers
15 and purchasers.

16 Q. Great presentation.

17 My question --

18 A. I had nothing to read off.

19 Q. Very impressive, your buckets.

20 Of those 35 -- and, again, not
21 a memory test, so I'm just asking for your best
22 estimate even though you are passing the memory

1 test -- what -- what portion of those 35 or so
2 license Leapfrog's complete set of data versus a
3 smaller set of data?

4 A. So if the organization or an
5 individual wants a less -- like, not the full --

6 Q. Yeah.

7 A. -- Leapfrog Hospital Survey results
8 but maybe they just want infection rates for
9 Connecticut for 2024, that falls under what we
10 call "data products." And I believe you've seen
11 our financial statements. So data licensure --
12 data products is separate --

13 Q. Okay.

14 A. -- we have very few organizations
15 that are licensing these one-time data products.

16 Q. Okay. So the 35 license the
17 complete set?

18 A. The 35 have an annual license.

19 Can I just describe what that
20 means?

21 Q. In brief.

22 A. Okay. So there's three different

1 data sets, and you can think of it as three
2 separate Excel files: Leapfrog Hospital Survey
3 results, Leapfrog ASC Survey results, Leapfrog
4 Hospital Safety Grades.

5 So 30 to 35 license one of those
6 three data sets I just talked about --

7 Q. Got it.

8 A. -- for the Leapfrog Hospital Survey
9 and the Leapfrog Ambulatory Surgery Center
10 Survey. Because those surveys are on a rolling
11 basis, the data is delivered to them and
12 refreshed on a monthly basis beginning first in
13 July and going all the way to February. So
14 they're getting updates all the time.

15 For the Hospital Safety Grades,
16 because we're issuing grades twice a year --

17 Q. Yeah.

18 A. -- they're getting those files twice
19 a year.

20 Q. Fair -- fair enough. No --

21 A. Okay.

22 Q. -- so my question -- so on those

1 three files --

2 A. Yes.

3 Q. -- let's say it's the survey file --

4 A. Yes.

5 Q. -- to take an example.

6 It's every hospital that
7 participates in the survey?

8 A. No; it's every --

9 Q. Okay.

10 A. -- hospital on our roster. And so
11 whether a hospital participates in our survey or
12 not, they're included in the file.

13 So I believe you've seen --

14 Q. I see.

15 A. -- our public reporting website,
16 leapfroggroup.org --

17 Q. Yeah.

18 A. -- so you can see how you can search
19 for hospitals, and it comes up as Decline to
20 Respond. Any hospital searchable on that
21 website is in that file. You can think of that
22 file as a distillation derived from -- I will

1 use it -- derived from our public reporting
2 website.

3 Q. And calculate -- no.

4 That's very helpful.

5 Okay. So all -- okay.

6 So another question we have --
7 so if fewer hospitals participate in the survey,
8 would that impact Leapfrog's brand?

9 A. Not in the immediate term. I mean,
10 if every hospital in the country stopped
11 participating in the survey, that would impact
12 Leapfrog's brand. But like I said, over the
13 years, we've had fluctuations in survey
14 participation. I've not seen an impact on our
15 brand. I've not heard anyone talk about that
16 impacting our brand, and that's as Leapfrog.

17 Q. So -- so let me -- let me just, like
18 -- if -- if Leapfrog stopped grading
19 nonparticipating hospitals and some certain
20 percentage of hospitals say, Great, we don't
21 have to do the survey anymore because we won't
22 be penalized -- I know that's not your position,

1 but just --

2 A. Yes. I -- I'm following.

3 Q. -- follow me.

4 Let's say a certain
5 decent-sized percentage decided not to
6 participate anymore --

7 A. Yeah.

8 Q. -- would that have any financial
9 implications to Leapfrog?

10 A. I don't believe it would. And,
11 again, that's because, in the past, we've seen
12 those kind of fluctuations. And the way that
13 our licenses are structured and so few of them
14 being national, I -- I honestly can't imagine
15 that would have financial ramifications.

16 We --

17 Q. What -- what if, like, half of
18 hospitals stopped participating?

19 Still no impact?

20 A. Maybe, but I -- I'm not sure.

21 So can I tell you the feedback that
22 I do get about -- so mostly what we hear from

1 people who don't license the data, right -- so
2 people who we talk to about the data are like,
3 No, we're not paying you for this; they don't
4 license the data -- it's not because there's
5 not enough hospitals or it's not because -- I
6 mean, I guess sometimes it might be there's not
7 enough hospitals in my state.

8 The biggest reasons have tended to
9 be you don't have the measures I'm looking for.
10 And I've talked a lot today about I -- I want
11 to -- I'd love to give some measures away and
12 add some more.

13 The hardest topics right now are
14 things like behavioral health safety and
15 quality; oncology care safety and quality; more
16 specific types of orthopedic care, like joint
17 replacement, spine safety and quality.

18 So when people tell us we don't
19 want to license your data, we don't want to pay
20 for the data, the resounding theme has been
21 because you don't have these behavioral health
22 measures, and that's what we're looking for;

1 you don't have this oncology data, and that --
2 and that's what we're looking for.

3 So when I think about sort of
4 growing the data licensure program, I'm looking
5 for opportunities to collect data on different
6 topics that potential data licensees tell us
7 they're interested in, like behavioral health
8 oncology, et cetera. That's how I, in this
9 role, have framed those conversations.

10 Q. Sorry.

11 A. It doesn't make me paranoid at all,
12 so . . .

13 Q. For the record, I was conversing
14 with my cocounsel, just briefly.

15 A. That's how -- and I -- I mean, I've
16 talked a lot about that today, but really,
17 that's -- I'm looking for opportunities. We
18 need the types of information that people are
19 asking us for.

20 We can't keep growing and growing
21 and growing the survey, so, like, how can we
22 start to -- to solve for some of those things?

1 Q. Let me ask this question -- I did
2 again -- If participation increases, does that
3 confer a financial benefit on Leapfrog?

4 A. No.

5 Q. None whatsoever?

6 A. No.

7 Q. There will be no revenue increase?

8 A. Not necessarily, because a lot of
9 our contracts -- because they're auto-renewal,
10 those organizations have also negotiated no
11 increases for some number of years as a
12 condition of auto-renewal.

13 Plus, to be frank, we don't value
14 the data or price the data based on the number
15 of hospitals. We've never done that. We don't
16 have a model to increase the prices based on
17 the number of hospitals.

18 So I could not, as Leapfrog, think
19 of a way that we could do that because we've
20 never done it.

21 Q. I -- I just want to be very clear in
22 my question, too. I'm not limiting my question

1 just to licensing --

2 A. Okay.

3 Q. -- is there any revenue stream that
4 increased participation would confer a financial
5 benefit on?

6 A. So the only revenue stream -- stream
7 associated with participation in the
8 Leapfrog Hospital Survey is the data that we
9 license. We also sell benchmarking reports to
10 hospitals that summarize their
11 Leapfrog Hospital Survey results using that
12 value-based purchasing program methodology I
13 described.

14 We have 23-, 2400 hospitals
15 participating in the survey today. We sell
16 maybe \$40,000 worth of benchmarking reports.
17 Theoretically, if more hospitals came in that
18 cared about benchmarking, maybe I could
19 increase my benchmarking report line, but it's
20 not a direct one-to-one.

21 Q. And you said the only one was
22 licensing, but there's also Accolades, right?

1 A. But that's not necessarily related
2 to participation in the
3 Leapfrog Hospital Survey.

4 Q. But Ms. Campione's deck that we
5 looked at before says there's a 10-times
6 correlation between participation and purchasing
7 Accolades.

8 A. She said that hospitals that part --
9 that license to accolade -- again, just to be
10 back to my 80/20, the majority of hospitals in
11 the country are doing the survey before and
12 after the Safety Grade. The majority of
13 hospitals being graded are participating in the
14 Safety Grade.

15 The fact that the majority of
16 hospitals being graded, which is -- I don't
17 know -- a few hundred hospitals -- like, a few
18 hundred -- 200-and-something hospitals are
19 licensing the Safety Grade.

20 Do I think that would have an
21 increase in Accolade revenue? No, because
22 already hundreds more hospitals participate in

1 the survey and earn an A and have for many
2 years and have never licensed the Hospital
3 Safety Grade.

4 We've empirically seen no growth in
5 our Accolades program related to participation
6 in the survey. And that's why when we talked
7 about this, I was almost embarrassed that you
8 brought that up because I said if I had known
9 that number was 200 hospitals -- I see how
10 silly that question was -- I was just trying to
11 get -- get in the mix with question.

12 Q. So now, having been two years in
13 that mix --

14 A. There's still no relationship
15 between participation in the survey. There's
16 been virtually flat number of sales. In fact, I
17 believe the spring 2025, we had exactly the same
18 or one or two different as spring 2024.

19 So it's -- it's not identical.
20 Fairly, fairly flat.

21 Q. Yeah, okay.

22 I want to ask about a couple

1 more things. I want to talk about the Safety
2 Grades again --

3 A. Yes.

4 Q. -- in that bucket --

5 A. Yes.

6 Q. -- there's a lot of buckets today --
7 topics.

8 Hospitals that get A grades --

9 A. Yes.

10 Q. -- fair to say an A grade helps a
11 hospital's reputation?

12 A. I'm just going to repeat back
13 comments hospitals have said to us, to my face,
14 not hearsay.

15 Many hospitals tell us -- and this
16 is reflected in our low Accolades licensure
17 numbers -- that they don't need to silence the
18 Safety Grade, that they already have a strong
19 reputation in the community. They're known for
20 surgery. They're known for -- so while some
21 hospitals may license a Safety Grade because
22 they think it does improve their reputation in

1 the community, other hospitals tell us
2 something different.

3 And, again, the majority of
4 hospitals, 700 plus, don't license the
5 Safety Grade at all, so I don't know how they
6 feel about the A Safety Grade.

7 Q. I'm asking your view. And let's --
8 let's set aside licensing for a second, right?

9 A. Yeah.

10 Q. When the Leapfrog Safety Grades come
11 out, there's a significant press effort to
12 publicize those grades, right?

13 A. Yes.

14 Q. They're -- separate from licensing,
15 right?

16 A. Correct.

17 Q. Hospitals that get A grades try to
18 -- they or Leapfrog try to get stories about
19 those A grades, right?

20 A. Some of those hospitals do, yes --

21 Q. Okay.

22 A. -- not all and a smaller percentage

1 than I would think.

2 Q. How small a percentage?

3 A. I think there are whole states where
4 I've actually never seen a press announcement.
5 I mean, we have a PR firm called Kyra, and they
6 combine things. But I hear, for example,
7 annually that New Jersey -- hospitals
8 in New Jersey get a lot of coverage. I've never
9 heard, for example, hospitals in Utah get a lot
10 of coverage or hospitals in -- so that's what I
11 mean by -- like, we have A's --

12 Q. Yeah.

13 A. -- theoretically in every state --

14 Q. Yes.

15 A. -- and in some places, I've never
16 heard Kyra or seen a report that hospitals from
17 those places have ever done a press release,
18 ever gotten media coverage.

19 So there does seem to be some
20 variable, is all I'm describing.

21 Q. Sure. But an A grade is a positive
22 thing, right?

1 A. I think so.

2 Q. And if a hospital already has a good
3 reputation in the community, an A grade can
4 solidify that reputation, right?

5 A. I think so. Theoretically, yes.

6 Q. And it could, in theory, improve
7 that reputation, right?

8 A. I've never seen or heard of any
9 stories about an -- a grade improving a
10 reputation.

11 So can I give an example?

12 It's like Brigham and Women's
13 Hospital in Massachusetts. Like, people travel
14 all over the world to go there. They, I do
15 think, maybe advertise and license their A.

16 Do I think -- is it a measurable
17 impact on their brand awareness? I don't -- I
18 don't think so. I don't know. You would have
19 to ask them --

20 Q. Yeah.

21 A. -- and that goes for every hospital.
22 We've tried to collect data from

1 hospitals. We ask them how they're using the
2 grade. And even when they license, it is
3 painfully hard to get -- for them to tell us,
4 so I -- you would think I would have more
5 visibility.

6 It's something TelAffects actively
7 does. They call these hospitals and say, You
8 licensed the grade. How are you using it?

9 I only have a handful of examples
10 of what I can speak to factually of how I know
11 hospitals are using it. And I'm happy to share
12 all of those right now.

13 Q. Sure. So I --

14 A. Okay.

15 Q. -- I don't want you to share all of
16 those right now --

17 A. Oh, okay.

18 Q. -- but I'm happy to talk about it
19 after.

20 A. Okay.

21 Q. Can we talk briefly about CMS STARS
22 scores?

1 A. Yes. STARS -- STARS. Okay.

2 Q. Do you think -- so five stars is the
3 highest, right?

4 A. CMS has a five-star rating -- 1, 2,
5 3, 4, 5 -- correct.

6 Q. Five's the best.

7 Do you think a five-star rating
8 has the same or greater impact on a hospital's
9 reputation as a Leapfrog A?

10 A. Depending on the audience, yes. For
11 example, the majority of health plans around the
12 country -- you might notice I only named five
13 health plans --

14 Q. Sure.

15 A. -- that license Leapfrog data. The
16 majority of regional and national health plans
17 around this country heavily rely on those CMS
18 star ratings over Leapfrog data, over almost any
19 kind of data, for a couple of reasons: One,
20 it's free. Obviously, CMS makes it available,
21 free and downloadable. And also my impression
22 is that they're trying to align with CMS who is

1 a very large national payer. So from a payer
2 perspective, meaning health plans, the CMS
3 five-star ratings probably, from my perspective,
4 have the biggest impact of anything.

5 Q. What about from other perspectives?

6 A. So the CMS five-star ratings are
7 really designed for Medicare bare --
8 beneficiaries, but I know they're used by a lot
9 of other people.

10 I would say for private purchasers
11 and insurers, they're often looking at both.
12 We actually, very disappointingly, have a
13 regional leader in Wisconsin of all places, and
14 when they put out an RFP to have their health
15 plan use quality data in payment and
16 reimbursement, even though they're a Leapfrog
17 regional leader working to get participation in
18 our survey, they chose all CMS measures.

19 And so even employers and
20 purchasers -- there's just something about that
21 alignment with this big federal agency that for
22 the purposes of our constituents, they really

1 tend to gravitate to.

2 Q. Let me ask you -- do you believe the
3 CMS STARS are well known among patients?

4 A. Yes. Very.

5 Q. Okay. Do you believe they are more
6 or less or equally known to the Leapfrog Safety
7 Grade?

8 A. Sadly, probably more.

9 Q. Okay. So I want to --

10 A. We've been asked, Have you thought
11 about moving to STARS? Like, we're told, like,
12 STARS are very easily understandable and -- but
13 they're very well known.

14 Q. Okay.

15 A. It's a touchy subject for me because
16 a lot of times -- now that I am responsible for
17 data licensure --

18 Q. Yeah.

19 A. -- we're just going to use the CMS
20 data.

21 So . . .

22 Q. Got -- oh, got it.

1 A. I have an acute sensitivity.

2 Q. Yeah, yeah. Understood.

3 Understood. Okay.

4 So I want to flip it a little
5 bit --

6 A. Yes.

7 Q. -- talk about F grades.

8 A. Yes.

9 Q. F grades, would you agree, can
10 damage a hospital's reputation?

11 ATTORNEY WOOD: Objection to
12 form.

13 THE WITNESS: Again,
14 potentially.

15 And can I give empirical
16 evidence?

17 BY ATTORNEY CRAIN:

18 Q. No. I'm sorry. I'm just -- I have
19 so little time. I want you to just --

20 A. Okay.

21 Q. -- answer my question, and you are
22 welcome to go on redirect after my time is done.

1 A. If I -- then I would have to say no.

2 Q. Okay.

3 So your -- your answer is that
4 an F grade cannot damage a hospital's
5 reputation?

6 A. Oh, not "cannot."

7 Q. Okay.

8 A. I -- I can't speak definitively.

9 Q. Let me -- let me just say --

10 A. Sure.

11 Q. -- let me go back to my question,
12 and I just want you to answer my question --

13 A. Yeah.

14 Q. -- because I'm trying to get you out
15 of here on time, and I don't want to have to
16 keep you longer.

17 Can an F hospital -- can an F
18 grade damage a hospital's reputation?

19 A. Theoretically.

20 Q. Can an F grade damage a hospital
21 with a bad reputation?

22 A. Theoretically.

1 Q. Can an F grade solidify an already
2 existing bad reputation?

3 A. Theoretically.

4 Q. Can an F grade make it more
5 difficult for a hospital to repair its
6 reputation?

7 A. Theoretically.

8 Q. Okay.

9 A. I could answer more definitively if
10 I'm able to -- to share the examples that I
11 have, so it's totally up to you.

12 Q. If -- if your counsel's willing to
13 give me more time, I'm willing to hear it --

14 A. Oh, okay.

15 Q. -- but if not, then I'm not willing
16 to hear it right now.

17 ATTORNEY CRAIN: Up to you,
18 Courtney.

19 THE WITNESS: No.

20 ATTORNEY CRAIN: Let's --
21 let's go on break.

22 THE WITNESS: Let's keep

1 moving.

2 ATTORNEY CRAIN: Yeah, let me
3 take five.

4 THE WITNESS: Yes.

5 ATTORNEY CRAIN: Let's just
6 take a break.

7 THE WITNESS: Really five?

8 ATTORNEY CRAIN: Really five.
9 I'll do my best.

10 THE VIDEOGRAPHER: Going off
11 the record. The time is 1823.

12 --oOo--

13 (Whereupon, a recess was taken from
14 6:23 p.m. EDT to 6:32 p.m. EDT.)

15 --oOo--

16 THE VIDEOGRAPHER: Going back
17 on the record. The time is 1832.

18 BY ATTORNEY CRAIN:

19 Q. So we're almost done with the first
20 day of your deposition. Just kidding.

21 I have two more topics I want
22 to cover in the brief amount of time we have

1 left: The first is I want to talk about the
2 certified coach program.

3 A. Yes.

4 Q. I understand you're the teacher of
5 that program, right?

6 A. I am the coach --

7 Q. You are the coach.

8 A. -- of the certified coach's program,
9 yes.

10 Q. It's like King of Kings.

11 Coach of coach, right?

12 A. Yes.

13 Q. Yeah, so tell me -- when was the
14 coach program created?

15 A. We developed this program probably
16 two years ago, and we did it for one very
17 specific reason, which is that we wanted other
18 people who worked with hospitals who were
19 consulting with hospitals to not give hospitals
20 inaccurate information about the
21 Leapfrog Hospital Survey.

22 There's only one of me as we've

1 talked a lot about today, and I only have a
2 team of 10. And so the idea was to basically
3 take other healthcare professionals who also
4 work with hospitals, show them the hard copy of
5 the survey, where to find the reporting
6 periods, a lot of what I did with you today, so
7 if a hospital asks them, we have a slightly
8 better chance of saying, I know where to find
9 that in the hard copy of the
10 Leapfrog Hospital Survey, instead of answering
11 it off the cuff and telling them something
12 totally wrong and inaccurate.

13 Q. And -- thank you for that.

14 And can -- can anyone
15 participate in the program?

16 A. So, technically, I guess, yes,
17 anyone could participate in the program. It's a
18 four-hour interactive webinar. I develop all of
19 the content. I deliver the webinar myself.
20 Like a lot of the education I do, there's a lot
21 of, like, polling and the use of something
22 called Slido so I can check as we go along to

1 make sure they're understanding what I'm saying.

2 So when I talk about performance
3 categories, are they following what I mean when
4 I talk about measure specifications.

5 At the end, they actually take an
6 exam. The exam has to be completed within two
7 weeks or 30 days of them finishing the webinar
8 part with me. And they take the exam, and if
9 they get a passing score, which we've
10 considered, I believe, 70 or greater, then they
11 become a certified coach.

12 On our website, it's explained in
13 detail that it means that they understand where
14 to find information about the
15 Leapfrog Hospital Survey, where to find
16 materials and resources on our website, like
17 the scoring algorithms in the binder. It's not
18 meant to replace our help desk.

19 And they aren't taught to, and are
20 actually emphatically advised not to, advise in
21 any way on our measures. I basically spend
22 four hours saying, If a hospital asks you

1 something you're not a hundred percent sure of
2 the answer, please send them to the help desk.
3 So we do a lot training around that.

4 Q. When you say they can't advise new
5 measures, that means, like, what -- how to
6 respond to the measures or -- or what --

7 A. So if there's a question about -- I
8 think earlier we were talking about those Ensure
9 shakes, and -- and they have a barcode. They
10 shouldn't be telling hospitals whether or not
11 those Ensure shakes are a medication based on
12 our definition. If it is not clearly to the
13 letter articulated in our measure
14 specifications, they are coached, trained to
15 have those hospitals come to the
16 Leapfrog Hospital Survey.

17 I really define their role in a
18 very specific way. I talk about it a lot. So
19 a coach's job is not to win the game for the
20 team. That's not what a good coach does. I'm
21 a coach for Brazilian jujitsu. My job is to
22 know the rules, know who to ask and know how

1 the game is scored.

2 And so I teach them the rules, the
3 scoring algorithms and the know-how to ask for
4 help. It's really quite focused around those
5 three components.

6 Q. How do they stay up-to-date as
7 things change?

8 A. If they want to continue to be a
9 Leapfrog certified coach, they would repeat the
10 course the next year with my new presentation.
11 But, again, the content may change, but a lot of
12 what I'm working on them with is, like, the
13 structure of the survey, documentation
14 requirements and how to find that on our
15 website, how to use a paper and pencil in our
16 scoring algorithms to help hospitals understand,
17 Oh, if I say, Yes, Yes, Yes, No, right, we have
18 those scoring algorithms rubrics. There should
19 be no surprises. Let's teach them how to do
20 that. But I still like to have them do a
21 refresher.

22 Q. And does it cost for the program?

1 A. There is.

2 Q. How did Leapfrog decide what the
3 cost would be?

4 A. That's a good question.

5 We wanted it to -- it was designed
6 for healthcare professionals, not individuals
7 from hospitals. And so we wanted it to be more
8 than whatever we charge hospitals because we
9 didn't want hospitals to think we were trying
10 to get them to pay more to learn about the
11 survey. We keep all of their education under
12 \$400. I think it's \$395 for a same similar
13 four-hour educational thing.

14 So I think someone just decided,
15 How about a thousand dollars --

16 Q. Okay.

17 A. -- or \$995?

18 Q. And so the hospitals -- what --
19 what's the name of the hospital education
20 program?

21 A. They're called Leapfrog Deep Dive
22 Series, and I offer them on various topics

1 throughout the year, very similar to what I just
2 talked about, what we deep dive into a
3 particular area. And so if it's someone who is
4 maybe new to doing the survey at that
5 hospital -- it's like a very hands-on sort of
6 coaching experience, again, where I just show
7 them where to find everything, how this works.

8 If someone says, How do we know
9 this is evidence-based? This is where you find
10 our fact sheets. It's a lot of that.

11 Q. And so it's just -- just so I
12 understand, the -- both educational programs are
13 about how to respond to the survey, not change
14 the underlying performance; is that right?

15 A. Correct. We -- we do no guidance or
16 advice on how to actually improve on the
17 measures. What we do do, however, is our
18 communications department does what we call case
19 studies, where they interview hospitals --

20 Q. Yeah.

21 A. -- on various topics, like reducing
22 C-sections or staffing your ICU with

1 intensivists.

2 On my slides, I point them to the
3 resource of the case studies that they can use
4 but make it clear that's not us saying, That's
5 what you should do. It's just a resource that
6 we offer.

7 Q. Okay.

8 A. We do no advising whatsoever on how
9 to improve on the measures or how to do quality
10 improvement in any way.

11 Q. And just ballpark, how many
12 hospitals participate in the Deep Dive program?

13 A. So I usually offer two or three a
14 year, and I have maybe 50 to 60 hospitals on
15 each one. We do cap it because I want to be
16 able to answer all of their questions -- that's
17 why I'm used to these long-form responses --
18 because the goal is that they are getting more
19 personalized attention, if they need it, to
20 answer all of their questions. And when they
21 leave, they should feel like, Okay. I really
22 got this.

1 Q. Yeah.

2 A. And I do a poll at the end. I say,
3 What is your confidence now in leading your
4 hospital's -- Leapfrog Hospital Survey? And
5 most of the time, people say, I feel more
6 comfortable, or, I feel --

7 Q. Sure.

8 A. -- much better. I'm still nervous,
9 but the goal is for them not to be so nervous.

10 Q. And then last question on this line.

11 A. Yes.

12 Q. How many folks have gone through the
13 certified training program -- coach program?

14 A. For the certified coaches, maybe 20.

15 Q. Okay. Since the --

16 A. I can't see the people, so that's a
17 really good question on the coaches, so I don't
18 know how many are joining. I don't check on
19 purpose because I don't want it to psych me out.
20 I would say 20 to 30.

21 Q. Okay. One last topic. I want to
22 talk about the white paper, which is one of your

1 topics.

2 A. Yes.

3 Q. Now, first question, Leapfrog has
4 said that C, D and F, or just D and F hospitals,
5 that you're twice as likely to die if you go to
6 one of those hospitals as opposed to an A
7 hospital.

8 Are you familiar with that?

9 A. I'm familiar with the graphic you're
10 referencing. I don't know that those are
11 exactly the stats -- if you have it to pull
12 up -- but I'm familiar with the graphic,
13 correct.

14 Q. Okay. Is that -- is that Leapfrog's
15 view of the mortality difference in those
16 hospitals today?

17 ATTORNEY WOOD: Objection to
18 form.

19 (The witness mumbles under breath
20 while reviewing the material
21 provided.)
22

1 BY ATTORNEY CRAIN:

2 Q. Let me revise.

3 A. I'm sorry.

4 Q. Is a patient twice as likely to die
5 if they go to a C, D or F hospital today as
6 compared to an A hospital?

7 A. Again, I don't know that the
8 original graphic says that.

9 Does someone just quickly have it
10 so I can look at it?

11 Q. I -- I'm just asking a different
12 question.

13 A. Okay. Okay.

14 Q. Setting aside the graphic --

15 A. Okay.

16 Q. -- is --

17 A. I have not estimated mortality based
18 on Spring 2025 Safety Grades --

19 Q. Okay.

20 A. -- where I could answer that
21 question as of today.

22 Q. Has Leapfrog?

1 A. That's not work we do. We contract
2 with Johns Hopkins to do that work.

3 Q. Has Johns Hopkins?

4 A. Johns Hopkins is -- have they
5 done -- no, they haven't -- they have -- they're
6 not doing that right now.

7 Q. Okay. And -- and they have not --

8 A. They did the last one. Sorry.
9 That's why I was pausing. They've done it
10 twice.

11 So what you see on our website is
12 actually an update to a similar white paper
13 that was developed earlier. The upgrade was
14 really adding costs. Employers/purchasers want
15 to know how much things cost. So they did it
16 once in 2015, 2016. They did it again in 2018,
17 2019. They haven't done it again.

18 ATTORNEY CRAIN: Got it?

19 CERTIFIED STENOGRAPHER: Jeez
20 , Louise.

21 ATTORNEY CRAIN: 2015 and
22 2016, and then they get it -- did it

1 again --

2 CERTIFIED STENOGRAPHER: I

3 got it. I got it.

4 ATTORNEY CRAIN: Okay.

5 BY ATTORNEY CRAIN:

6 Q. And they have not done it, at least
7 publicly, since, right?

8 A. Correct.

9 ATTORNEY CRAIN: Okay. Just
10 give me one second.

11 All right. I will pass the
12 witness.

13 ATTORNEY WOOD: Then we are
14 all set.

15 ATTORNEY CRAIN: Okay.

16 THE VIDEOGRAPHER: This
17 marks --

18 ATTORNEY CRAIN: You're free
19 to go.

20 THE VIDEOGRAPHER: -- this
21 marks the end of the deposition of
22 Melissa Danforth. Going off the

C E R T I F I C A T E

1 I, Cindy L. Sebo, Nationally Certified Court
2 Reporter herein, do hereby certify that the
3 foregoing deposition of MELISSA AMEE DANFORTH was
4 taken before me pursuant to notice at the time and
5 place indicated; that said witness duly swore to
6 tell the truth, the whole truth, and nothing but
7 the truth under penalties of perjury; that said
8 testimony of witness was correctly recorded to the
9 best of my abilities in machine shorthand,
10 thereafter transcribed under my supervision with
11 computer-aided transcription; that deposition is a
12 true and accurate record of the testimony given by
13 the witness; that I am neither counsel, nor kin to
14 any party in said action, nor interested in the
15 outcome; and that a copy of this transcript
16 obtained from a source other than the court
17 reporting firm, including an adversary or
18 co-counsel in the matter, is uncertified and may
19 not be used at trial. Septer

INSTRUCTIONS TO WITNESS

Please read your deposition over carefully and make any necessary corrections. You should state the reason in the appropriate space on the errata sheet for any corrections that are made.

After doing so, please sign the errata sheet and date it.

You are signing same subject to the changes you have noted on the errata sheet, which will be attached to your deposition.

It is imperative that you return the original errata sheet to the deposing attorney within thirty (30) days of receipt of the deposition transcript by you. If you fail to do so, the deposition transcript may be deemed to be accurate and may be used in court.

ACKNOWLEDGMENT OF WITNESS

I, MELISSA AMEE DANFORTH, do hereby
certify that I have read the foregoing pages
herein, and that the same is a correct
transcription of the answers given by me of the
proceedings taken remotely to the questions therein
propounded under penalty of perjury, except for the
corrections or changes in form or substance, if
any, noted in the attached errata sheet.

4 RE: Good Samaritan Medical Center Inc, Et Al. v. The Leapfrog
5 9/18/2025, Melissa Amee Danforth (#7574658)

6 The above-referenced transcript is available for
7 review.

8 Within the applicable timeframe, the witness should
9 read the testimony to verify its accuracy. If there are
10 any changes, the witness should note those with the
11 reason, on the attached Errata Sheet.

12 The witness should sign the Acknowledgment of
13 Deponent and Errata and return to the deposing attorney.
14 Copies should be sent to all counsel, and to Veritext at
15 errata-tx@veritext.com.

16 Return completed errata within 30 days from
17 receipt of testimony.

18 If the witness fails to do so within the time
19 allotted, the transcript may be used as if signed.

Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY.

THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

1 Thereupon,

2 the following proceedings began at 9:03 a.m.:

3 THE VIDEOGRAPHER: We are now on the record
4 and the time is 9:03 a.m. This is the
09:04 5 video-recorded deposition of Jared Hanlon in the
6 matter of Good Samaritan Medical Center, Inc.
7 versus Leapfrog Group.

8 The deposition is being held in Fort
9 Lauderdale, Florida on September 23, 2025. The
09:05 10 videographer is Alex Rampone, and the court
11 reporter is Theresa Rust; both in association
12 with Lexitas Legal Services.

13 Counsel, please announce appearances for
14 the record.

09:05 15 MS. YANG: Betty Yang on behalf of the
16 plaintiffs.

17 MS. DEBANKA: Elizabeth Debanka on behalf
18 of the plaintiffs.

19 MS. ZIBAS: Good morning. I'm Jura Zibas
09:05 20 with the law firm of Wilson Elser, here on
21 behalf of the Leapfrog Group, and I will be
22 taking your deposition today.

23 THE STENOGRAPHER: Raise your right hand,
24 please.

09:05 25 Do you swear that the testimony you are

Jerad Hanlon
September 23, 2025

Page 5

1 about to give will be the truth, the whole
2 truth, and nothing but the truth?

3 THE WITNESS: Yes.

4 THE STENOGRAPHER: Thank you.

5 THEREUPON:

6 JERAD HANLON

7 Was called as a witness and, having been first duly
8 sworn and responding "I do," was examined and
9 testified as follows:

09:05 10 DIRECT EXAMINATION

11 BY MS. ZIBAS:

12 Q. Good morning, Mr. Hanlon. As I indicated,
13 I am here on behalf of the Leapfrog Group to ask you
14 questions related to a lawsuit that was brought in
09:05 15 Federal Court by West Boca Medical Center, along with
16 other medical institutions or medical centers,
17 however you want to refer to them, against the
18 Leapfrog Group. I am going to be asking you
19 questions.

09:06 20 If you don't understand the question, I can
21 rephrase it, you can tell me. If your attorneys
22 object, they can object. Wait, don't answer until
23 they put their objection on the record. If there's
24 any response I have to give, I'll give the response;
09:06 25 otherwise, you will answer the question.

Jerad Hanlon

1 We're here to get as much information from your
2 memory and your experience as possible. It's not a
3 test of any kind. If you don't know the answer, you
4 say I don't know or I don't remember, it's okay. No
09:06 5 reason to try to -- you know, there's no mystery
6 here, so I just want to make sure that's clear.

7 Now, have you been deposed before?

8 A. I have not.

9 Q. Okay. So the rules are you can take a
09:06 10 break, as long as there's no question pending. If
11 you need to take a break to go to the restroom, et
12 cetera, speak with your lawyer, like I said, as long
13 as there's no question pending, that's fine.

14 A. Sure.

09:07 15 Q. You can take a break at any time. You
16 know, we'll see how the day goes. I'm hopeful maybe
17 we won't be here all day, but I don't know until we
18 start the dialogue. So that's just kind of where we
19 are at this early juncture.

09:07 20 And I think as you go along through the process,
21 it will make more sense, rather than me sitting here
22 giving you a lot of instructions. Always, you know,
23 listen to your attorneys, if they do direct you, and
24 if they, you know, give you any type of instruction,
09:07 25 make sure that you follow that instruction.

Jerad Hanlon
September 23, 2025

Page 7

1 MS. ZIBAS: So in order to start the day, I
2 have marked what we call a notice of deposition
3 as Hanlon 1.

4 (Exhibit 1 was marked.)

09:07 5 BY MS. ZIBAS:

6 Q. I'm putting it in front of you, and I just
7 want to merely ask, have you seen this document
8 before?

9 A. Yes, I have.

09:08 10 Q. So we're here today to take your deposition
11 pursuant to this notice, and it's a notice, if you
12 read at the top, of you, Jared Hanlon, individually,
13 and pursuant to 30(b)(6) to West Boca Medical Center.
14 So you're answering on behalf of yourself and the
09:08 15 medical center.

16 There may come a point in time where your
17 lawyers may ask who I'm asking a question on behalf
18 of. We can clarify it. I'm sure there's no issue.
19 It does get difficult when you're the individual and
09:08 20 the entity because your knowledge is your knowledge.

21 A. Sure.

22 Q. So we'll do our best to make sure it's
23 clear, and if you are ever concerned, you just raise
24 that concern. I don't want you to be confused as to
09:09 25 who you're answering a question on behalf of.

Jerad Hanlon
September 23, 2025

Page 8

1 So as we start the day, I'm going to get --
2 start out with your -- a little bit of background
3 about yourself. Where do you currently work?

4 A. West Boca Medical Center.

09:09 5 Q. And do you have a title there?

6 A. I do.

7 Q. And what is your title?

8 A. Chief executive officer.

9 Q. And when did you become the chief executive
09:09 10 officer at West Boca Medical Center?

11 A. October of 2023.

12 Q. Now, going back to your educational
13 background, do you have a college degree?

14 A. I do.

09:09 15 Q. Okay. And where did you receive your
16 college degree, your undergraduate?

17 A. James Madison University.

18 Q. And where did you receive, if you received,
19 a higher level degree?

09:09 20 A. I received my master's in the hospital
21 administration at Virginia Commonwealth University.

22 Q. And what year was that?

23 A. 2006.

24 Q. And after your master's of hospital
09:10 25 administration, did you receive any further

Jerad Hanlon
September 23, 2025

Page 9

1 education?

2 A. No, not formal.

3 Q. When you say not formal, are you taking
4 continuing education courses at times?

09:10 5 A. Yes, at times.

6 Q. How often do you take continuing education
7 courses?

8 A. I'm a part of the American College of
9 Healthcare Executives, and there's CEUs that are
09:10 10 available through that.

11 Q. And do you go to a conference to take those
12 courses?

13 A. You can. I typically do them online.

14 Q. Have you ever taken a course that deals
09:10 15 with marketing hospitals?

16 A. I have not.

17 Q. Now, after you finished your education,
18 where is the first -- what's the first job that you
19 had?

09:10 20 A. I was an assistant administrator at Davis
21 Regional in Statesville, North Carolina.

22 Q. Okay. And what years or approximately how
23 long were you there?

24 A. I was there about 18 months, from '06 to
09:11 25 '08.

Jerad Hanlon
September 23, 2025

Page 10

1 Q. And after that position, where did you go?

2 A. I went to University Medical Center in
3 Lebanon, Tennessee as an associate administrator.

4 Q. Okay. And how long were you there?

09:11 5 A. Approximately, three years, from 2008 to
6 2011.

7 Q. And in 2011, what was your -- where did you
8 go for your job or your career move?

9 A. Then I left Lebanon, Tennessee and I moved
09:11 10 back home to Petersburg, Virginia and worked for
11 Southside Regional Medical Center as the chief
12 operating officer.

13 Q. And when you were at Southside Regional as
14 chief operating officer, did you have any role in
09:12 15 marketing services?

16 A. No, not directly.

17 Q. And what about indirectly?

18 A. Other than just having a -- we had a
19 marketing director that I worked with to -- I was
09:12 20 responsible for the overall operations at the
21 hospital, so I worked with the director there.

22 Q. And how long were you at Southside
23 Regional?

24 A. About eight years. I left in 2018.

09:12 25 Q. And where did you go in 2018?

Jerad Hanlon
September 23, 2025

Page 11

1 A. Start of 2019, I left in December of '18
2 and started in -- at Delray Medical Center as the
3 group chief strategy officer for the Palm Beach
4 network.

09:13 5 Q. So were you employed by Delray Medical
6 Center or the Palm Beach network?

7 A. I was employed by Tenet, is the corporate
8 employee.

9 Q. So what was your role? What were your
09:13 10 duties as group chief strategy officer?

11 A. I was responsible to look at the overall
12 strategy among the five Palm Beach Health Network
13 hospitals, to look at market share, to look at
14 physician recruitment opportunities in order to
09:13 15 direct and organize our strategy going forward for
16 the five hospitals there.

17 Q. And what five hospitals are you referring
18 to?

19 A. West Boca Medical Center, Delray Medical
09:13 20 Center, Good Samaritan Medical Center, St. Mary's
21 Medical Center, and Palm Beach Gardens Medical
22 Center.

23 Q. What made you decide to go work for the
24 Tenet Healthcare Corporation?

09:14 25 A. My group president, Maggie, I had met her

Jerad Hanlon
September 23, 2025

Page 12

1 in Virginia and was really impressed with her, and
2 she approached me about an opportunity to come down
3 to Florida. And I as I shared with Betty, once my
4 wife came down here in December, December 7, we
09:14 5 walked out of the hotel and it was beautiful and
6 sunny and she said we're coming.

7 MS. YANG: I won't assert protective order
8 on that.

9 MS. ZIBAS: I assumed wouldn't be an issue.
09:14 10 BY MS. ZIBAS:

11 Q. So why don't you -- let's talk about this
12 Palm Beach Health Network a little bit. When was the
13 Palm Beach Health Network formed, as far as you know?

14 A. It is a branding as a network. I don't
09:15 15 believe it is a formal entity.

16 Q. Now, do all of the Tenet Healthcare
17 corporate employees who work with the Palm Beach
18 Health Network? Are they all at Delray Medical
19 Center?

09:15 20 A. No.

21 Q. How many were at Delray Medical Center when
22 you were there as group chief strategy officer?

23 A. I wouldn't know an exact number. There was
24 several.

09:15 25 Q. And as far as you know, does Tenet

Jerad Hanlon
September 23, 2025

Page 13

1 Healthcare Corporation direct the strategy for all
2 those five hospitals?

3 MS. YANG: Objection to form.

4 A. As being owned as part of Tenet, yes. They
09:16 5 are involved in the strategy that we develop at the
6 local level.

7 BY MS. ZIBAS:

8 Q. And when you were group chief a strategy
9 officer, who did you report to directly?

09:16 10 A. Maggie Gill.

11 Q. What was Maggie Gill's title in 2019, if
12 you know?

13 A. She was the CEO of Delray, as well as the
14 Palm Beach market CEO.

09:16 15 Q. Did you have a staff as group chief
16 strategy officer working under you?

17 A. Yes. I had a business analyst, a data
18 analyst. I also worked with the strategy officers at
19 each of the facilities. Each facility had a CSO that
09:17 20 would -- they were employed by the hospital directly.
21 They were not Tenet employees. I was the only Tenet
22 employee. And so they had a direct line to their
23 respective CEO and a dotted line to me as the group
24 CSO.

09:17 25 Q. And what did the data analyst or business

Jerad Hanlon
September 23, 2025

Page 14

1 analyst do in their role?

2 A. Helped us to evaluate market share volumes,
3 presence of medical staff and physicians in the area.

4 Q. And were there reports or documents
09:17 5 produced by these analysts that were then shared with
6 all the hospitals about market share?

7 A. Yes. We regularly reviewed market share
8 data.

9 Q. What kind of data did you gather to review
09:18 10 market share?

11 A. Combination of both internal and then we
12 used external sources, such as Trilliant and other
13 payer systems that we could analyze and see what the
14 volume was in the area.

09:18 15 Q. Who is Trilliant?

16 A. They're an independent company that
17 compiles a lot of data from -- from various biller,
18 billing sources and things like that.

19 Q. Now, in order to prepare for your
09:18 20 deposition today, outside of meeting with your
21 attorneys, and I don't want to hear about any
22 conversations you had be your attorney, what else did
23 you do to prepare?

24 A. Just reviewed our policies, reviewed many
09:19 25 of the documents that we submitted to Leapfrog.

Jerad Hanlon
September 23, 2025

Page 15

1 Q. And when you said submitted to Leapfrog,
2 are you saying during the course of this litigation
3 or prior to litigation?

4 A. During the course of this litigation.

09:19 5 Q. And did you -- were you part of the group
6 or were you the person who gathered documents at West
7 Boca Medical Center for this litigation?

8 A. I was part of the group.

9 Q. How many people gathered documents?

09:19 10 A. You know, Andrea Nunes is our director of
11 quality, Gina West, our group director. That was
12 pretty much . . .

13 Q. Are you aware that experts were hired to
14 testify on behalf of West Boca Medical Center in this
09:19 15 lawsuit?

16 A. Yes.

17 Q. And did you read any of the expert reports?

18 A. Yes.

19 Q. And which ones did you read?

09:20 20 A. I saw our expert testimony showing what we
21 would have received had we have participated in the
22 Leapfrog survey in terms of the grade.

23 Q. Do you remember the name of that expert?

24 A. I don't off the top of my head.

09:20 25 Q. Any other expert reports?

Jerad Hanlon
September 23, 2025

Page 16

1 A. I don't believe so, that I can recall.

2 Q. Now, when is the first -- going back, have
3 you heard of, obviously, the defendant, the Leapfrog
4 Group?

09:20 5 A. Yes.

6 Q. And when did you first hear of the name the
7 Leapfrog Group?

8 A. In my career, I've heard of the Leapfrog
9 Group from even back when I was a COO at Southside
09:21 10 Regional.

11 Q. And when you were at Southside Regional,
12 did Southside Regional participate in the Leapfrog
13 Group survey?

14 A. I don't remember.

09:21 15 Q. Have you -- are you aware that the Leapfrog
16 Group does have a survey that's at issue in this
17 lawsuit?

18 A. Yes.

19 Q. And do you know how many pages the survey
09:21 20 is?

21 A. Not an exact count but it's lengthy.

22 Q. And have you ever personally looked at the
23 survey in the last two years?

24 A. No.

09:21 25 Q. Do you know if anyone at West Boca Medical

Jerad Hanlon
September 23, 2025

Page 17

1 Center has looked at the survey in the last two
2 years?

3 A. Yes.

4 Q. And who would that be, as far as you know?

09:22 5 A. Andrea Nunes, our director of quality.

6 Q. Going back to the Palm Beach Health
7 Network. When you were chief strategy officer, who
8 were the other, as you call, C-suite officers in the
9 Palm Beach Health Network?

09:22 10 A. For the group?

11 Q. For the group.

12 A. For the group, okay. Our CEO, group CEO
13 was Maggie Gill. Our group CFO was Sheri Montgomery.
14 Our group chief nursing officer was Libby Flipppo.

09:22 15 And our group chief operating officer was Stephen
16 Garner.

17 Q. Did you have meetings when you were part of
18 the Palm Beach Health Network, meaning the network,
19 the actual group, did you have meetings?

09:22 20 MS. YANG: Object to form.

21 A. Yes.

22 BY MS. ZIBAS:

23 Q. How often did you have meetings?

24 A. Regularly. I mean, there would be several
09:23 25 ad hoc meetings. I would meet with a lot of those

Jerad Hanlon
September 23, 2025

Page 18

1 individuals on a daily basis.

2 Q. Did you meet via Zoom, e-mail, phone?

3 A. Combination of all of the above, in person.

4 Q. What were the goals of the Palm Beach

09:23 5 Health Network ultimately, as far as you know?

6 MS. YANG: Object to form.

7 A. In terms of what type of goals are you?

8 BY MS. ZIBAS:

9 Q. Well, you talked about you were -- you have

09:23 10 responsibility for market share. I mean, is this an

11 organization that merely was put together for

12 marketing purposes, recruitment purposes?

13 MS. YANG: Objection to form.

14 A. No. I mean, we started to brand as a group

09:24 15 because of the fact that we were coordinating the

16 care. You know, recruiting staff is challenging,

17 difficult. Capital is very rare to come by, and so

18 we wanted to make sure we were working as

19 collectively as a group to provide efficient

09:24 20 high-quality patient care to our community.

21 BY MS. ZIBAS:

22 Q. You had mentioned earlier that you would

23 also look at physician recruitment opportunity. Was

24 physician recruitment at the Palm Beach Health

09:24 25 Network difficult?

Jerad Hanlon
September 23, 2025

Page 19

1 A. I think --

2 MS. YANG: Objection to form.

3 A. I think it's difficult everywhere to
4 recruit physicians. What we do on an annual basis is
09:24 5 an annual physician needs assessment to evaluate how
6 many physicians are in the market, and based off of
7 the patient population, how many physicians we're
8 short, and we look to try to fill that, get that gap,
9 that need.

09:25 10 BY MS. ZIBAS:

11 Q. Were you able to -- when you were chief
12 strategy officer, were you able to achieve success in
13 recruiting physicians or additional physicians?

14 A. Yes. We recruited several.

09:25 15 Q. And in terms of market share, who were the
16 competitors to the Palm Beach Health Network?

17 A. For the Palm Beach Health Network?

18 Q. Correct.

19 A. So I'm going off of my role. This is
09:25 20 personally. I'm not representing West Palm.

21 Q. I understand.

22 A. Okay. When I was the group chief strategy
23 officer, I would say it would be Baptist Health,
24 which includes Boca Regional. They had just been
09:26 25 acquired by Baptist in July of '19. I would say

Jerad Hanlon
September 23, 2025

Page 20

1 Baptist also included Bethesda East and Bethesda
2 West, JFK, both main and north, Palms West, Jupiter
3 Medical Center, Wellington Regional, Broward Health,
4 which is Coral Springs, and north, Broward Health
09:27 5 North. I think that covers all of them.

6 Q. All right. Now, you -- you remained in
7 your role as chief strategy officer for the Palm
8 Beach Health Network for how long?

9 A. For a little over a year.

09:27 10 Q. Okay. And then what did you do next?

11 A. In March of 2020, COVID hit and there was a
12 need for -- we had a vacancy for our chief operating
13 officer position at St. Mary's and the Palm Beach
14 Children's Hospital, and so Maggie asked if I could
09:27 15 help out up at West Boca. And our focus shifted from
16 the strategy role to day-to-day operations with
17 dealing with COVID.

18 Q. And how long did you -- did you
19 simultaneously, while you were COO of St. Mary's and
09:28 20 Palm Beach Children's, also remain working as part of
21 the Palm Beach Health Network?

22 A. So I started out in interim basis as chief
23 officer in October of 2019, and was doing dual role
24 from October of '19 until March of 2020. And then I
09:28 25 shifted completely to COO of the Palm Beach Health

Jerad Hanlon
September 23, 2025

Page 21

1 Network, and -- I'm sorry, of St. Mary's and the Palm
2 Beach Children's Hospital.

3 Q. Were you also the group chief COO of Palm
4 Beach Health Network?

09:28 5 A. I wasn't until about 2021, I believe, is
6 when Stephen Garner, who was the group chief
7 operating officer, left to go back to Arizona as CEO,
8 and I assumed the role as group COO at that time.

9 Q. So were you both -- you were both the COO
09:29 10 of the group, as well as the COO of St. Mary's and
11 Palm Beach Children's; is that correct?

12 A. Yes.

13 Q. And what were your duties? Sounds like a
14 lot of work to be responsible for the network and two
09:29 15 hospitals.

16 A. Yeah. It was a lot, especially at that
17 time, given everything going on. I was responsible
18 for the day-to-day operations of St. Mary's and the
19 Palm Beach Children's Hospital, and my role as group
09:29 20 was to serve as a liaison and coordinate effective
21 operations from a group-wide perspective, if there
22 were buying opportunities that we could leverage our
23 five hospitals together. So I didn't have direct
24 operational oversight of the other facilities. I had
09:30 25 dotted-line reporting of their COOs to me.

Jerad Hanlon
September 23, 2025

Page 22

1 Q. When you were COO of St. Mary's and then
2 obviously the COO of the Palm Beach Health Network,
3 were you aware if these five hospitals were
4 participating in the Leapfrog Group surveys?

09:30 5 A. I was not at the time.

6 Q. When did you first learn about West Boca
7 Medical Center's participation or nonparticipation in
8 the Leapfrog surveys?

9 A. When I moved to -- down to West Boca so
09:30 10 probably 2024.

11 Q. So prior to taking on your role as CEO of
12 West Boca, did you have any interaction with any of
13 the people at Tenet who made decisions about Leapfrog
14 Group and participation?

09:31 15 MS. YANG: Objection to form.

16 A. Can you ask that question, again?

17 MS. ZIBAS: Yes, no. That was a bad
18 question.

19 BY MS. ZIBAS:

09:31 20 Q. Until the time you went to West Boca
21 Medical Center as the CEO, prior to that time, were
22 you involved or did you know about Tenet Healthcare's
23 decision to participate or not participate in the
24 Leapfrog Group surveys?

09:31 25 MS. YANG: Objection to form, assumes

Jerad Hanlon
September 23, 2025

Page 23

1 facts.

2 A. I can't speak for Tenet, so I didn't
3 personally have any knowledge of Tenet's decision at
4 the time.

09:31 5 BY MS. ZIBAS:

6 Q. And in 2022, were you ever on any e-mails
7 that you recall from Tenet stating that there's a
8 decision not to participate in the Leapfrog Group?

9 A. I don't recall.

09:31 10 Q. Now, looking just specifically at West Boca
11 Medical Center, do you know when the medical center
12 was originally founded?

13 A. 1986.

14 Q. And was it an independent medical center or
09:32 15 was it owned by a group at that point?

16 A. That I do not know.

17 Q. Did there come a time when West Boca
18 Medical Center was purchased by Tenet Healthcare?

19 A. I'm not exactly sure if Tenet was the owner
09:32 20 when it was first built or if it was subsequently
21 acquired. I don't -- I don't know that.

22 Q. When you took on the role of CEO of West
23 Boca, was West Boca Medical Center owned by Tenet
24 Healthcare?

09:32 25 A. Yes.

Jerad Hanlon
September 23, 2025

Page 24

1 Q. And is it today still owned -- is West Boca
2 Medical Center still owned by Tenet Healthcare?

3 A. Yes.

4 Q. And in your day-to-day operations as CEO,
09:33 5 do you report to someone at Tenet Healthcare?

6 A. I report to Maggie Gill.

7 Q. And what is Maggie Gill's current title?

8 A. She has taken on -- she's our group
9 president, but is also over multiple groups. So I
09:33 10 believe it's division or -- I believe it's division
11 president.

12 Q. Are you currently a Tenet Healthcare
13 employee?

14 A. Yes.

09:33 15 Q. And is your compensation based on metrics
16 of success at the hospital?

17 A. Yes.

18 Q. And are the -- do those metrics include
19 revenues of the hospital?

09:33 20 A. I have incentive compensation is based off
21 of revenues.

22 Q. Is there a quality director at West Boca
23 Medical Center currently?

24 A. Yes.

09:34 25 Q. And was there one there when you started as

Jerad Hanlon
September 23, 2025

Page 25

1 CEO in October 2023?

2 A. Yes.

3 Q. Do you report at West Boca Medical Center
4 to a board?

09:34 5 A. Yes.

6 Q. And is that board called a governing board,
7 a board of directors, what is the name?

8 A. It's a governing board.

9 Q. And how often does that governing board
09:34 10 meet?

11 A. Monthly, ten times a year.

12 Q. And how many board members are there?

13 A. Nine voting members and three nonvoting
14 members.

09:34 15 Q. And does the governing board have input
16 into your compensation?

17 A. Not directly.

18 Q. Does the governing board have any input
19 into whether a lawsuit is filed?

09:35 20 MS. YANG: Objection to form.

21 Hold on one second.

22 I'll just caution you, Dr. Hanlon, not to
23 discuss any substance of any communications
24 between the board and any attorneys or

09:35 25 reflecting any attorney advice. You can answer

Jerad Hanlon
September 23, 2025

Page 26

1 that question yes or no.

2 A. Could you repeat the question, please.

3 BY MS. ZIBAS:

4 Q. Yes. Does the governing board have any
09:35 5 input as to whether a lawsuit is filed? And like
6 your lawyer said, I'm not interested in legal. I
7 just want to know do they have any input, yes or no?

8 A. They can give guidance and feedback into
9 things they feel are important to the hospital.

09:36 10 Q. And in the lawsuit that we're here about
11 today against the Leapfrog Group, did the board
12 provide input, and, again, don't give me any of your
13 attorney's advice or any advice between the board and
14 their attorney, did they provide any guidance or
09:36 15 feedback regarding filing this lawsuit?

16 MS. YANG: That I'm going to instruct you
17 not to answer on the basis of privilege.

18 MS. ZIBAS: And the privilege, I assume,
19 just to expands, assumes that there were
09:36 20 discussions regarding the guidance and feedback
21 between the board and the lawyers; is that
22 correct.

23 MS. YANG: I'm not sure I understand the
24 question.

09:37 25 MS. ZIBAS: I asked him specifically about

Jerad Hanlon
September 23, 2025

Page 27

1 -- he testified about guidance and feedback. I
2 didn't ask for advice. And so I just want to
3 verify that the guidance and feedback from the
4 board to Mr. Hanlon or to the hospital included
09:37 5 attorneys, and that's the position that you are
6 taking?

7 MS. YANG: Well, I'm not taking a position
8 on that factual question because I'm not the
9 witness, but you're asking specifically about
09:37 10 the lawsuit that we are already in the middle of
11 today, so we would claim privileged work-product
12 over that.

13 MS. ZIBAS: I disagree, but we will go on.
14 That's not how it works. You have to be more
09:37 15 specific. There's case law on that. But we
16 will hold that for another day because it's not
17 that important.

18 BY MS. ZIBAS:

19 Q. Do you have -- is there a medical executive
09:37 20 committee at West Boca Medical Center, as well?

21 A. Yes.

22 Q. And who is on the medical executive
23 committee?

24 A. The respective chairs for the various
09:37 25 departments of the medical staff, as well as

Jerad Hanlon
September 23, 2025

Page 28

1 representatives from several of the contracted
2 groups, such as anesthesia, pathology, emergency
3 department, and pediatric coverage, hospitalists.

4 Q. How many physicians are on the medical
09:38 5 executive committee?

6 A. Approximately, 15.

7 Q. And how many times a year do they meet?

8 A. Monthly.

9 Q. And do you attend those meetings?

09:38 10 A. Yes.

11 Q. Have you discussed the Leapfrog Group with
12 any of the members of the medical executive
13 committee?

14 A. Yes.

09:39 15 Q. How many of the physicians?

16 A. All of them.

17 Q. Was it during a meeting or outside of a
18 meeting?

19 A. Both.

09:39 20 Q. And how many times in 2024 do you recall
21 did -- was the Leapfrog Group discussed with the
22 physicians?

23 A. I couldn't recall an exact number.

24 Q. More than once, as far as you recall?

09:39 25 A. Yes.

Jerad Hanlon
September 23, 2025

Page 29

1 Q. And what was the sum and substance of the
2 conversation?

3 A. Questions as to why we were scored so low
4 and why it was different from previous Leapfrog
09:39 5 grades.

6 Q. And did you respond to their questions?

7 A. Yes.

8 Q. And how did you respond?

9 A. That we didn't feel that the grades
09:40 10 reflected by Leapfrog were accurate because it was
11 based off of incomplete information that we hadn't
12 supplied them and an algorithm and formula that
13 didn't support the information that they had or
14 didn't have.

09:40 15 Q. What was the incomplete information?

16 A. We didn't participate in the survey.

17 Q. And do you know what measures are used from
18 the survey to give you a grade?

19 A. Yes.

09:40 20 Q. And what are those measures?

21 A. There's several questions from the survey
22 that are included. There's CMS measures that are
23 publically reported. Some of those we don't have it.
24 We have too small of a sample size, so that data may
09:40 25 not all apply to us, even though it's publicly

Jerad Hanlon
September 23, 2025

Page 30

1 reported. It also includes several questions
2 regarding barcode administration, computerized
3 physician order entry, handwashing, and our ICU
4 staffing levels. There's also other questions that
09:41 5 are included in the survey that I don't think are
6 included in the actual grade, but they are reported
7 on Leapfrog's website that come from the survey.

8 Q. Have you ever looked at the Leapfrog's
9 website?

09:41 10 A. Yes.

11 Q. When was the last time you looked at it?

12 A. Within the last week or so.

13 Q. And have you ever looked at a website
14 called hospitalsafetygrade.org?

09:42 15 A. Yes.

16 Q. What is that website?

17 A. It shows gradings of hospitals.

18 Q. And when you refer to not included in the
19 grade, are you referring to a grade that would be
09:42 20 found on the hospitalsafetygrade.org website?

21 A. I don't . . .

22 Q. You referenced grade. You said there were
23 other things in the survey that were not included in
24 the grade. When you refer to grade, I just want to
09:42 25 make sure we're on the same page. Are you referring

Jerad Hanlon
September 23, 2025

Page 31

1 to the hospital safety grade that's on the website?

2 A. Which website?

3 Q. The hospitalsafetygrade.org.

4 MS. ZIBAS: Here, I'll mark this. I
09:42 5 already marked 2 so that throws me off.

6 Here, we'll mark this later, but this is
7 what I'm referring to. I haven't marked yet. I
8 went out of order. I already marked 2 for
9 something else, so we'll mark it as 3, and then
09:43 10 we'll go back to two.

11 (Exhibit 3 was marked.)

12 THE WITNESS: And obviously, this
13 particular tab that's highlighted doesn't have
14 -- there's other tabs that have information
09:43 15 that's reported that we don't supply.

16 BY MS. ZIBAS:

17 Q. Okay. But when we -- when you reference
18 grade, are you referring to in this Exhibit 3, this
19 website, Leapfrog Hospital Safety Grade?

09:43 20 A. Correct.

21 Q. Okay. That's what I was just trying to
22 make sure we were on the same page.

23 A. Yeah. Uh-huh.

24 Q. Now, is there anybody at the West Boca
09:43 25 Medical Center that has a role to track hospital

Jerad Hanlon
September 23, 2025

Page 32

1 safety?

2 MS. YANG: Objection to form.

3 A. How do you define safety?

4 BY MS. ZIBAS:

09:44 5 Q. Well, let's go back. Is there a hospital
6 safety plan at the West Boca Medical Center?

7 A. Yes.

8 Q. And who designed or wrote that safety plan?

9 A. It's a variety of committees that review
09:44 10 and approve it, draft it, and then it has to be
11 reviewed and approved by our medical executive
12 committee, as well as our governing board.

13 Q. Now, you have -- I think you said that you
14 have a quality officer or quality person?

09:44 15 A. Director.

16 Q. Director. And who is that quality director
17 at West Boca Medical?

18 A. Andrea Nunes.

19 Q. How long has she been there?

09:44 20 A. Approximately, 21 years.

21 Q. And in general, what is her -- what are her
22 job duties?

23 A. She oversees a lot of our data abstraction,
24 our quality reporting, and the various committees
09:45 25 that we need to review or quality satisfaction,

Jerad Hanlon
September 23, 2025

Page 33

1 safety data.

2 Q. Now, you mentioned earlier, CMS, that this
3 is publicly-reported data; is that correct that it's
4 public information?

09:45 5 A. There are some measures that are publicly
6 reported via CMS.

7 Q. And is there any one person that oversees
8 the gathering of the information to report to CMS at
9 West Boca Medical Center?

09:45 10 A. There's not just one person. We have data
11 abstractors, quality coordinators, as well as our
12 director of quality, and then all of that information
13 goes to committees for regular review. And as I
14 mentioned, we also report out those committee

09:46 15 findings to our medical executive committee, as well
16 as to our board.

17 Q. And are the -- is the data that's gathered
18 to report to CMS, to the best of your knowledge, is
19 it accurate?

09:46 20 A. Yes.

21 Q. Now, you indicated that some of the sample
22 sizes were too small to report. Can you explain what
23 you mean by that?

24 A. There may be some services that we don't
09:46 25 offer at the hospital that CMS collects data on and

Jerad Hanlon
September 23, 2025

Page 34

1 publishes that they list not available for us, either
2 because we don't offer the service or our sample size
3 is too small.

4 Q. How many beds do you have at West Boca?

09:47 5 A. 195.

6 Q. What is your occupancy rate?

7 A. It varies, but anywhere from 50 to 70
8 percent.

9 Q. Is there any certain time of year that it
09:47 10 is a higher occupancy rate?

11 A. That -- that varies. It has varied
12 recently. Usually, we would see a surge around the
13 wintertime because of all the snowbirds, but since
14 COVID, that's really prevented a lot of people from
09:47 15 returning home so it's stabilized out.

16 Q. Have you seen a reduction in the occupancy
17 rate between 2024 and 2025?

18 A. Yes.

19 Q. And do you think that's because people are
09:47 20 starting to return back north after COVID?

21 MS. YANG: Objection to form.

22 A. Comparing it to prior years, you know, it
23 -- it's seasonality and there's going to be different
24 years, but we have seen our volume decrease.

09:48 25 BY MS. ZIBAS:

Jerad Hanlon
September 23, 2025

Page 35

1 Q. Do you find when there are a lot of
2 hurricanes in Florida, that less people come to West
3 Boca Medical Center Hospital?

4 A. I don't know if it's hurricane related.

09:48 5 Q. Has anyone ever evaluated whether a
6 hurricane, like last year if there were a number of
7 hurricanes in certain parts of Florida, if that
8 impacts the number of admissions or occupancy?

9 A. I mean, it probably impacts the number of
09:48 10 people that want to come to Florida, which ultimately
11 could impact the volume at the hospital.

12 Q. Has the -- have the number of ER visits
13 decreased between 2024 and 2025?

14 A. Yes.

09:49 15 Q. And do you know how many or what
16 percentage?

17 A. Approximately, 17 percent year over year.

18 Q. And what about between 2023 and 2024, when
19 you first started?

09:49 20 A. I don't recall an exact number. But I do
21 know it also decreased.

22 Q. And prior to you taking on the CEO role,
23 did you look at any data to see if there was a
24 decrease between 2022 and 2023?

09:49 25 A. I did not look at that time.

Jerad Hanlon
September 23, 2025

Page 36

1 Q. Okay. Did the number of admissions
2 decrease between 2023 and 2024?

3 A. I would have to look at the statistics to
4 be able to honestly answer that.

09:50 5 Q. Has revenue decreased between 2024 and
6 2025, overall?

7 A. Revenue has gone up.

8 Q. What's the median age of your patient
9 population at West Boca Medical Center?

09:50 10 A. I don't know the exact number. I would
11 suggest it's probably in the 50s.

12 Q. Do you happen to know what percentage of
13 your population, your hospital population, that means
14 both ER, admissions, et cetera, outpatient, that are
09:50 15 on Medicare?

16 A. I mean, that can vary each month. I would
17 say probably close to 60 percent.

18 Q. Are you involved, at all, in reviewing the
19 nursing recruitment and retention at West Boca?

09:51 20 A. I'm involved in all of the recruitment.

21 Q. And in general at West Boca, as I know
22 there is at most hospitals, has there been a
23 difficulty in recruiting and retaining nursing staff?

24 A. Yes.

09:51 25 Q. And what factors have you found impacts

Jerad Hanlon
September 23, 2025

Page 37

1 retention and recruitment of nursing staff?

2 MS. YANG: Objection to form.

3 A. What factors impact?

4 BY MS. ZIBAS:

09:51 5 Q. The recruitment and retention.

6 A. The staff?

7 Q. Yes.

8 A. I think the type of nurse that we're
9 looking for. I think compensation, the availability
09:52 10 of that. We struggle with cost of living here in
11 Florida. And just enough staff to fill all of the
12 needs.

13 Q. Between 2023 and 2025, were you able to
14 hire more nurses, or is it still a continuing problem
09:52 15 to hire nurses?

16 A. It --

17 MS. YANG: Objection to form, vague.

18 A. It's still challenging.

19 MS. YANG: Just give me a second to finish
09:52 20 my objection before you answer, Jared.

21 BY MS. ZIBAS:

22 Q. How many -- as you sit here today, do you
23 know how many open positions you have for nurses at
24 West Boca?

09:52 25 A. I wouldn't know the exact number, no.

Jerad Hanlon
September 23, 2025

Page 38

1 Q. Looking at the composition, meaning the
2 types of board members that are on your governing
3 board, are there any physicians on the governing
4 board?

09:53 5 A. There are.

6 Q. And how many?

7 A. Three voting and two nonvoting.

8 Q. Are there any nurses on the board,
9 governing board?

09:53 10 A. There are not.

11 Q. Any other type of medical personnel on the
12 governing board?

13 A. We have the chief of fire and EMS,
14 battalion chief, and then we've got the four
09:53 15 physicians, three -- I'm sorry. Five physicians.

16 Q. Does West Boca Medical Center do any type
17 of benchmarking against the other hospitals in the
18 region in Florida, meaning the Palm Beach Health
19 Network, as well as the others that you mentioned
09:54 20 earlier in your deposition?

21 MS. YANG: Objection to form.

22 MS. ZIBAS: Benchmarking them.

23 A. Benchmarking what?

24 BY MS. ZIBAS:

09:54 25 Q. Surveys, monitoring their data to see how

Jerad Hanlon
September 23, 2025

Page 39

1 it compares to West Boca in terms of admissions?

2 MS. YANG: Same objection.

3 A. Surveys based off of just admissions?

4 BY MS. ZIBAS:

09:54 5 Q. Admissions, maybe patient satisfaction.

6 MS. YANG: Objection, compound.

7 A. We do look at volume comparisons to other
8 facilities, yes.

9 BY MS. ZIBAS:

09:55 10 Q. What are the services that West Boca
11 Medical Center offers? And when I'm talking about
12 that, I'm talking like hip and knee replacement,
13 cardiac, et cetera? What are the lines of services
14 that are offered at West Boca?

09:55 15 A. Women's and children's services, including
16 labor and delivery, GYN, pediatrics, and there's a
17 whole plethora of subspecialties within those means.
18 We do a lot of surgery, both in-patient and
19 outpatient, including orthopedic, spine, general,
09:55 20 gastroenterology. We offer emergent services both
21 for adult and pediatric. And we offer general
22 medical services for acute care issues requiring
23 either inpatient or outpatient stay. We also offer
24 wide variety of therapies, both on the inpatient and
09:56 25 outpatient perspective.

Jerad Hanlon
September 23, 2025

Page 40

1 Q. How many operatories do you have for
2 surgery?

3 A. Six inpatient ORs, four outpatient ORs, two
4 GI suites, and an interventional radiology lab.

09:56 5 Q. Are you a trauma center?

6 A. We are not.

7 Q. Is there a plan for West Boca to become a
8 trauma center?

9 A. Not at this time, no.

09:57 10 Q. When West Boca Medical Center compares
11 itself to the competitors, do you look specifically
12 at just those hospitals that are offering the same
13 lines of service?

14 A. No. We include overall volumes.

09:57 15 Q. Does West Boca have a marketing department
16 or a person responsible for marketing?

17 A. We do.

18 Q. And is it one person or a team?

19 A. There's one person assigned to the
09:57 20 hospital, and then there's a group liaison, as well.

21 Q. And when you say assigned to the hospital,
22 what do you mean?

23 A. There's one marketing. We have a marketing
24 manager that works at West Boca.

09:58 25 Q. And are they paid by West Boca or are they

Jerad Hanlon
September 23, 2025

Page 41

1 paid by Tenet?

2 A. They're paid by West Boca.

3 Q. And who is that person?

4 A. Linda-Jean Long.

09:58 5 Q. And what are basically the -- does the
6 marketing person have a budget for marketing?

7 A. Yes.

8 Q. And who determines the budget?

9 A. It -- it's involved -- well, the corporate
09:58 10 office, as well as local leadership.

11 Q. And when you say local leadership, are you
12 referring to the Palm Beach Health Network
13 leadership?

14 A. As well as myself and my 18 med, plus West
09:58 15 Boca Medical Center.

16 Q. And is a marketing plan developed each
17 year?

18 A. Yes.

19 Q. As part of -- tell me some of the things
09:59 20 that -- that's a bad question.

21 What -- describe to me what's in the marketing
22 plan. For instance, is it social media? Is it
23 flyers? Is it, you know, Webinars?

24 A. It's a combination of community events,
09:59 25 education, social media posts, media, regular media,

Jerad Hanlon
September 23, 2025

Page 42

1 sponsorships.

2 Q. Do you have a social media manager?

3 A. No. It -- we have an outside company that
4 coordinates a lot of our social media posts, but it's
09:59 5 overseen and managed by our marketing manager.

6 Q. Who is the outside company, if you know?

7 A. I don't know their name.

8 Q. Are you involved, at all, in the strategy
9 on the social media side?

10:00 10 A. Yes.

11 Q. Looking at your patient population and that
12 visits West Boca, would you say most of them are
13 social media savvy?

14 MS. YANG: Objection to form. Calls for
10:00 15 speculation.

16 A. I wouldn't be able to answer that honestly
17 for the community or public.

18 BY MS. ZIBAS:

19 Q. Has your marketing person, Linda Long, ever
10:00 20 taken -- you know, done a survey to determine if your
21 population of patients is social media savvy? You
22 said median age potentially of 50. I know you don't
23 know for sure.

24 MS. YANG: Objection.

10:01 25 BY MS. ZIBAS:

Jerad Hanlon
September 23, 2025

Page 43

1 Q. Was any survey ever done or any evaluation
2 ever done?

3 MS. YANG: Objection, form compound.

4 A. I'm not exactly sure what you mean by
10:01 5 survey and what that survey would be measuring.

6 BY MS. ZIBAS:

7 Q. Well, has anybody ever tried to figure out
8 if the population uses social media at West Boca
9 Medical Center?

10:01 10 MS. YANG: Objection to form, lack of
11 foundation.

12 A. I think we want to go all avenues that we
13 can to educate the community, and social media is one
14 of those avenues that we utilize.

10:01 15 BY MS. ZIBAS:

16 Q. Do you utilize Google Analytics for West
17 Boca Medical Center?

18 A. What do you mean by Google Analytics? Is
19 there something specific that you're asking if they
10:01 20 measure?

21 Q. Yes. When you -- you can sign up for
22 Google Analytics, and you can ask for measurements of
23 who was searching for your website, who was searching
24 for statistics on the website, what services they're
10:02 25 looking for. That's what Google Analytics does.

Jerad Hanlon
September 23, 2025

Page 44

1 A. Okay.

2 MS. YANG: Objection to form.

3 Is there a question?

4 MS. ZIBAS: Yes. I asked do they use

10:02 5 Google Analytics, and he asked me to explain it.

6 MS. YANG: You can answer that question.

7 A. I know we utilize things such as Google
8 star ratings. I'm not specifically sure if there are

9 -- if they've hired Google Analyst -- Analytics to

10:02 10 specifically report anything.

11 BY MS. ZIBAS:

12 Q. What is Google star rating?

13 A. It's an opportunity for the community to
14 express their thoughts on various businesses,
10:02 15 entities.

16 Q. Do you know how Google star ratings works?

17 A. It's basically a polling of the patient or
18 the population, if they had a good experience,
19 various business or company.

10:03 20 Q. When we talked earlier about your CMS and
21 the reporting that is done, about how many hours are
22 spent in gathering the data for CMS? You said you
23 had a data abstractor, quality coordinator, director
24 of quality involved. Do you know approximately how
10:03 25 many hours are spent gathering that data?

Jerad Hanlon
September 23, 2025

Page 45

1 MS. YANG: Objection to form.

2 A. I wouldn't be able to give you an exact
3 number or even ballpark. It's going to be numerous
4 hours.

10:03 5 BY MS. ZIBAS:

6 Q. Have you ever heard of something called
7 Healthgrades?

8 A. I have.

9 Q. And explain to me what is Healthgrades in
10:04 10 your own words.

11 A. Healthgrades is an outside body that
12 utilizes CMS data and analyzes that publicly-reported
13 data to compare hospitals and highlight hospitals
14 that performed well compared to their perspective
10:04 15 counterparts.

16 Q. And does West Boca Medical Center
17 participate in Healthgrades?

18 A. Yes.

19 Q. And does West Boca Medical Center pay any
10:04 20 money to Healthgrades?

21 A. Yes.

22 Q. And what is the money paid for?

23 A. To advertise and license the data that they
24 have compiled and shared with us.

10:05 25 Q. And have you ever looked up the methodology

Jerad Hanlon
September 23, 2025

Page 46

1 of Healthgrades?

2 A. I have not looked up the methodology.

3 Q. Have you ever looked at the methodology for
4 the Leapfrog Group?

10:05 5 A. Methodology . . .

6 Q. To determine the safety grade.

7 A. I have looked to try to understand it,
8 but . . .

9 Q. And when did you look to try to understand
10:05 10 it?

11 A. Within this year, 2025.

12 Q. And why did you look it up this year?

13 A. Because of the poor rating that we
14 received.

10:05 15 Q. Does Tenet Healthcare ask West Boca Medical
16 Center to participate in Healthgrades?

17 MS. YANG: Objection to form. Assumes
18 facts.

19 A. They -- Tenet does not ask West Boca to
10:06 20 participate.

21 BY MS. ZIBAS:

22 Q. And is there anyone that has to spend time
23 or resources in providing data to Healthgrades at
24 West Boca?

10:06 25 A. Could you restate the question?

Jerad Hanlon
September 23, 2025

Page 47

1 Q. Yes. At West Boca Medical Center, you said
2 that you participate in Healthgrades, correct, or you
3 pay for Healthgrades, licensing data.

4 A. For Healthgrades, yes.

10:06 5 Q. Yes. So is there anyone that's assigned or
6 it's their job, as part of their job duty at West
7 Boca to provide data or information to Healthgrades?

8 A. No. They use publicly-reported data.

9 Q. And do you think it's accurate?

10:07 10 MS. YANG: Objection to form, lack of
11 foundation.

12 A. Do I think that the CMS data --

13 MS. ZIBAS: Healthgrades --

14 A. -- is accurate?

10:07 15 MS. ZIBAS: Yes.

16 A. Yes. I believe the CMS data is accurate.

17 BY MS. ZIBAS:

18 Q. Do you know if West Boca Medical Center
19 used to participate in taking the Leapfrog survey?

10:07 20 A. Yes. I believe they did prior to 2021.

21 Q. And do you know why that West Boca Medical
22 Center stopped participating?

23 A. It took a lot of resources to complete the
24 survey that we felt could be better dedicated towards
10:08 25 improving the overall scores rather than reporting

Jerad Hanlon
September 23, 2025

Page 48

1 the survey.

2 Q. And what resources were required that would
3 have been beyond the same people doing the CMS?

4 A. To complete the survey.

10:08 5 Q. And all right. So let's talk about the
6 survey, to the best of your information. So as far
7 as you -- you had testified earlier -- and I know you
8 went through some of this so I'm not going to ask you
9 to repeat it. But there were four very specific
10:08 10 things from the survey that are used in the safety
11 Healthgrades; correct? That was the CPOE, BCMA, hand
12 hygiene, and ICU physician staffing?

13 A. Those are just four of the things that are
14 included in the survey.

10:08 15 Q. Okay. So in the survey, beyond those four
16 things, is there anything else that has to be added
17 that wasn't already provided by CMS data?

18 MS. YANG: Objection to form. Vague and
19 lack of foundation.

10:09 20 A. There are other questions that are reported
21 on the website that come from the survey.

22 BY MS. ZIBAS:

23 Q. I know that you said you haven't read the
24 survey, but based on the information that you have
10:09 25 from your team and talking to them, what is the

Jerad Hanlon
September 23, 2025

Page 49

1 percentage of additional information that is required
2 in the survey that isn't already provided through
3 CMS?

4 MS. YANG: Objection to form. Vague and
10:09 5 calls for speculation.

6 A. There -- in terms of an exact number of
7 measures, there's probably 12 measures, I believe,
8 that if I'm recalling correctly, that are provided
9 through the survey.

10:10 10 BY MS. ZIBAS:

11 Q. And are those 12 measures in addition to
12 the four, the CPOE, the --

13 A. That includes the four.

14 Q. Okay. And who provided you the information
10:10 15 that there were 12 measures? Did you learn that on
16 your own or was that provided to you?

17 A. I learned that from our quality director.

18 Q. Now, did you learn in -- at any point in
19 time that the Leapfrog Group was changing their
10:10 20 methodology, their survey and their calculation of
21 the hospital safety grade?

22 A. I learned it when the grades significantly
23 declined.

24 Q. Okay. And who told you about the change?

10:10 25 A. Our director of quality.

Jerad Hanlon
September 23, 2025

Page 50

1 Q. And when did the grade significantly
2 decline?

3 A. On or about fall of '24.

4 Q. And do you recall what your director of
10:11 5 quality explained to you about the change?

6 A. She explained that the -- we had not
7 participated in the survey, and that if we had
8 submitted some of the information that they were
9 requesting, it would have improved our score.

10:11 10 Q. Now, in 2022 and 2023, was West Boca -- was
11 West Boca participating in the survey?

12 A. 2022, we stopped completing the survey, I
13 think, in 2021.

14 Q. Okay. So what was the letter grade in,
10:12 15 say, spring of 2023?

16 A. I believe we were a C.

17 Q. And then in fall of 2024, what was the
18 letter grade?

19 A. It dropped to a D.

10:12 20 Q. And then in 2025?

21 A. It was an F.

22 Q. So in -- when you -- when West Boca
23 received the C, was there a discussion or concern
24 about the letter grade then?

10:12 25 A. I think we -- there was not a discussion

Jerad Hanlon
September 23, 2025

Page 51

1 about the letter grade at that time. We were
2 focussed on the actual data, not so much the letter
3 grade from Leapfrog.

4 Q. And what data were you focussed on?

10:12 5 A. The CMS data.

6 Q. And after -- and in the new methodology or
7 the fall 2024 methodology, was there any discussion
8 or did you ever look up how it changed, specifically
9 how the scoring was done for those that did not
10:13 10 participate?

11 MS. YANG: Objection to form, vague and
12 compound.

13 A. Yes. There was discussion when we dropped
14 to a D, and Andrea gave me some insight into why we
10:13 15 had dropped.

16 BY MS. ZIBAS:

17 Q. And did -- and what did Andrea tell you?

18 A. That a lot of it was because it was based
19 off of information that was part of the survey that
10:13 20 we hadn't participated in.

21 Q. But as far as you understand it, was a --
22 was there a number given for West Boca Medical Center
23 for hand hygiene and ICU physician staffing, for
24 those four measures, BCMA and CPOE, was there an
10:14 25 actual number given?

Jerad Hanlon
September 23, 2025

Page 52

1 MS. YANG: Objection to form.

2 A. A number from whom or from --

3 BY MS. ZIBAS:

4 Q. For in the -- in the calculation for the
10:14 5 Leapfrog score, was there a number in the documents
6 you searched and reviewed?

7 MS. YANG: Objection to form.

8 A. I can't speak to -- to what Leapfrog
9 assigned to us. We were focussed on the data points
10:14 10 themselves, not necessarily the grade or Leapfrog's
11 calculation of that grade.

12 MS. YANG: We've been going a little over
13 an hour. When you get to a good stopping --

14 MS. ZIBAS: Oh, we can stop any time you
10:14 15 want. That's fine.

16 THE VIDEOGRAPHER: Off the record at 10:13
17 a.m.

18 (Brief recess was taken at 10:13 a.m.)

19 (Back on the record at 10:24 a.m.)

10:25 20 THE VIDEOGRAPHER: We're back on the
21 record. Time is 10:24 a.m.

22 MS. ZIBAS: All right. Mr. Hanlon, we're
23 continuing questioning.

24 BY MS. ZIBAS:

10:25 25 Q. So let me ask you, does Tenet Healthcare

Jerad Hanlon
September 23, 2025

Page 53

1 ever have meetings with you as CEO of West Boca
2 Medical Center?

3 MS. YANG: Objection to form.

4 A. Tenet Healthcare is a broad term. I guess
10:25 5 is there a specific individual?

6 BY MS. ZIBAS:

7 Q. Well, who do you -- is there anyone that
8 you, as CEO, report to at Tenet Healthcare
9 Corporation?

10:26 10 A. I report to Maggie Gill.

11 Q. And other than Maggie, do you ever have
12 meetings with other people from Tenet Healthcare in
13 your role as CEO?

14 MS. YANG: Objection to form.

10:26 15 A. Yes. I meet with other employees of Tenet
16 Healthcare.

17 BY MS. ZIBAS:

18 Q. Do you ever meet with people in the finance
19 -- well, back up. Is there a finance group or CFO at
10:26 20 Tenet Healthcare?

21 A. There is a CFO at Tenet Healthcare. Yes.

22 Q. Do you ever meet with the CFO of Tenet
23 Healthcare?

24 MS. YANG: Objection to form.

10:26 25 A. I haven't recently. I think the last time

Jerad Hanlon
September 23, 2025

Page 54

1 I met with the CFO directly was when I interviewed
2 for the position.

3 BY MS. ZIBAS:

4 Q. Do you have to prepare reports on a monthly
10:26 5 or quarterly basis to submit to Tenet about West Boca
6 Medical Center?

7 MS. YANG: Objection to form.

8 A. Myself personally, I am involved in a lot
9 of our monthly reporting in coordination with several
10:27 10 other individuals at the hospital.

11 BY MS. ZIBAS:

12 Q. And who do you coordinate with at the
13 hospital?

14 A. For the monthly reporting?

10:27 15 Q. Correct.

16 A. Our CFO, our chief nursing officer, our
17 chief operating officer.

18 Q. Does Maggie ever ask you for your input
19 regarding participating in the Leapfrog Group?

10:27 20 MS. YANG: Objection to form, vague.

21 A. Has she ever asked me?

22 BY MS. ZIBAS:

23 Q. Yes.

24 A. Or does she?

10:27 25 Q. Well, has she ever?

Jerad Hanlon
September 23, 2025

Page 55

1 A. Has she asked me if I wanted to
2 participate --

3 Q. Correct.

4 A. -- in the Leapfrog Group?

10:28 5 Q. Correct.

6 A. She has not specifically asked me if I
7 wanted to participate in the Leapfrog Group.

8 Q. Have you ever -- have you ever attended
9 meetings with the Palm Beach Health Network in the
10:28 10 last two years, meaning the officers?

11 A. Yes.

12 Q. And during any of those meetings, did the
13 topic of participating in the Leapfrog Group survey
14 ever come up?

10:28 15 A. In those meetings?

16 Q. Yes.

17 A. Yes.

18 Q. And what was discussed, sum and substance?

19 A. Based off of the revised grades, whether or
10:28 20 not it was something that we should consider
21 participating in.

22 Q. And was a decision, to the best of your
23 knowledge, made whether the -- there would be a
24 request to the home office to participate in Leapfrog
10:29 25 Group, again?

Jerad Hanlon
September 23, 2025

Page 56

1 MS. YANG: Objection to form. Vague,
2 assumes facts.

3 A. I personally did not make a request to the
4 home office to participate in Leapfrog Group.

10:29 5 BY MS. ZIBAS:

6 Q. Do you know if anyone else in the Palm
7 Beach Health Network officers, of the officers, asked
8 to participate?

9 A. I couldn't speak --

10:29 10 MS. YANG: Objection to form.

11 A. I couldn't speak for them.

12 BY MS. ZIBAS:

13 Q. Do you know -- do you have an understanding
14 of what the CMS star ratings measure?

10:29 15 A. Yes.

16 Q. And what is that, what's your
17 understanding?

18 A. There's a wide variety of data measures,
19 both quality and satisfaction, that are included in
10:29 20 that.

21 Q. And do you know how West Boca Medical
22 Center has -- what star they received from CMS?

23 A. Two.

24 Q. And when did they receive a two?

10:30 25 A. The most recent.

Jerad Hanlon
September 23, 2025

Page 57

1 Q. And prior to the most recent, what was the
2 star rating?

3 A. If I recall, I believe we've been a two for
4 -- more recently.

10:30 5 Q. What do you define as more recently?

6 A. As in 2025.

7 Q. What about in 2024, what was the CMS star
8 rating?

9 A. I don't recall off the top of my head.

10:30 10 Q. Did -- did West Boca Medical Center ever
11 receive a one CMS star rating?

12 A. I believe we are anticipating a one star in
13 the data that will be coming out.

14 Q. And why are you anticipating a one?

10:31 15 MS. YANG: Objection to form.

16 A. Just based off the data that has been
17 submitted to us.

18 BY MS. ZIBAS:

19 Q. And what data was submitted to you that
10:31 20 indicates that you would be getting a one?

21 A. The quality data that we report.

22 Q. And what quality data do you report?

23 A. A wide variety, things from CLABSI, central
24 line-acquired bloodstream infections; CAUTIs,
10:31 25 catheter-associated urinary tract infections, MRSA,

Jerad Hanlon
September 23, 2025

Page 58

1 C. diff, patient satisfaction. There's a wide
2 variety of measures that come into the CMS star
3 rating.

4 Q. Do you know what the CMS patient experience
10:32 5 score is?

6 A. That's a broad question because there's
7 multiple questions as part of the patient
8 satisfaction survey.

9 Q. Prior to January 2025, was there ever a
10:32 10 quality improvement plan in place at West Boca
11 Medical Center?

12 A. Yes.

13 Q. And was there a quality improvement plan in
14 place in 2024?

10:32 15 A. Yes.

16 Q. What about 2023?

17 A. Yes.

18 Q. And did you participate in the drafting of
19 the quality improvement plan?

10:32 20 A. I didn't participate in the drafting, but
21 in the approval and in subsequent changes and review
22 of the quality improvement plan.

23 Q. And what did West Boca consider to be the
24 top areas of need of improvement in the quality
10:33 25 improvement plan?

Jerad Hanlon
September 23, 2025

Page 59

1 MS. YANG: Objection to form, outside the
2 scope.

3 A. There's several items that we pay attention
4 to and focus on and do this on a monthly basis.

10:33 5 BY MS. ZIBAS:

6 Q. So does the quality improvement plan change
7 monthly?

8 A. The plan itself does not. The review of
9 the data and how we're performing to identify any
10:33 10 trends that we need to address and modify our
11 practice or process in order to continue to improve.

12 Q. And does West Boca Medical Center have a
13 patient safety improvement plan in place?

14 MS. YANG: Objection to form, vague.

10:33 15 A. Patient safety improvement plan?

16 BY MS. ZIBAS:

17 Q. Yes.

18 A. We have a patient safety plan that includes
19 ways that we want to improve.

10:33 20 Q. And is the patient safety plan updated
21 every year?

22 A. It's reviewed.

23 Q. Has anyone at Tenet Health -- Tenet
24 Healthcare headquarters ever expressed concern over
10:34 25 the CMS star rating of West Boca Medical Center?

Jerad Hanlon
September 23, 2025

Page 60

1 MS. YANG: Objection to form, vague, lack
2 of foundation.

3 A. Has anyone at Tenet Healthcare?

4 BY MS. ZIBAS:

10:34 5 Q. Tenet Healthcare, yeah, headquarters.

6 A. Again, defining headquarters is -- I'm a
7 Tenet employee, Maggie is a Tenet employee, so yes,
8 there's been concern expressed about making sure that
9 we're continuing to improve.

10:34 10 Q. And who has expressed the concern?

11 A. As I just said, myself and Maggie Gill.

12 MS. ZIBAS: I am going to hand you what has
13 been marked as Exhibit 2.

14 (Exhibit 2 was marked.)

10:35 15 BY MS. ZIBAS:

16 Q. It's the declaration that you may be
17 familiar with. It's declaration of Jared Hanlon, and
18 it is executed on May 13, 2025.

19 A. Yes.

10:35 20 Q. Okay. And are you familiar with this
21 declaration?

22 A. I am.

23 Q. Did you draft this declaration?

24 A. I didn't draft it. I reviewed it and
10:36 25 modified.

Jerad Hanlon
September 23, 2025

Page 61

1 Q. And do you believe everything in this
2 declaration is accurate to the best of your ability?

3 A. I do.

4 Q. If you turn to page 4, we're looking at the
10:36 5 end of paragraph 9. I'm going to be asking you
6 specific questions regarding some of the statements
7 made in this declaration. And at the top of the
8 page, page 4, it says the entities that award and
9 assign these accreditations visit the healthcare
10:36 10 facility and performed regular periodic in-person
11 reviews, audits, surveys, and assessments of the
12 facility.

13 A. I'm sorry. I'm trying to --

14 Q. It's at the top.

10:36 15 A. Page 4.

16 Q. That top sentence.

17 A. Okay. Got you.

18 Q. That sentence, it starts, you know, it's
19 the end of your paragraph 9.

10:36 20 A. Okay. Okay.

21 Q. When you say the entities that award and
22 assign these accreditations, what entities are you
23 referring to?

24 A. The Joint Commission.

10:37 25 Q. Is The Joint Commission the only entity

Jerad Hanlon
September 23, 2025

Page 62

1 that comes in for in-person reviews, audits, surveys,
2 and assessments of the facility?

3 A. It is not the only entity that comes in.
4 There's other entities, such as AHCA and other
10:37 5 regulatory entities.

6 Q. Now, if you go down to paragraph 11, there
7 is a reference to Healthgrades.

8 A. Uh-huh.

9 Q. That we had briefly talked about before.
10:37 10 Do you consider Healthgrades a pay-to-play scheme?

11 MS. YANG: Objection to form, vague.

12 A. Can you explain what you mean by
13 pay-to-play?

14 BY MS. ZIBAS:

10:38 15 Q. You don't know, that's fine. We'll go
16 further along and hopefully we'll be able to figure
17 that out, and we can come back to that based on the
18 language in here.

19 So page -- paragraph 12, page 5, there's a
10:38 20 paragraph about when we decide whether to provide our
21 hospital's data to commentators, my colleagues,
22 leadership, and I consider the fairness and accuracy
23 of each commentator's methodology for processing and
24 compiling data because we know the patients base
10:38 25 important medical decisions on these types of

Jerad Hanlon
September 23, 2025

Page 63

1 reports.

2 Are you referring to, in that sentence, to the
3 Leapfrog Group?

4 A. I'm referring to every accreditation that
10:39 5 we consider. Leapfrog is not the only, you know,
6 body out there that evaluates hospitals.

7 Q. And was the Leapfrog Group analyzed --

8 A. Yes.

9 Q. -- as you stated in this paragraph?

10:39 10 Okay. And what was done to analyze the Leapfrog
11 Group methodology?

12 A. In terms of we considered the amount of
13 effort and time that would have to be contributed to
14 participate, as well as any cost that might be
10:39 15 associated with that to determine which ones we feel
16 provide the most accurate and worthwhile presentation
17 to our patient base and community.

18 Q. And what were the costs associated with the
19 Leapfrog survey that were estimated?

10:40 20 A. I think a lot of it is based on the amount
21 of time and effort, and obviously I have to pay the
22 staff members to complete that information.

23 Q. And what was the estimated time that you
24 would have had to pay?

10:40 25 A. It would have been significant in terms of

Jerad Hanlon
September 23, 2025

Page 64

1 the number of hours. To give you an exact number, I
2 can't say for certain, but it was a -- it's a pretty
3 involved survey.

4 Q. And would it have been -- would it have
10:40 5 been more time than the time spent submitting data to
6 CMS?

7 MS. YANG: Objection to form. Vague and
8 calls for speculation.

9 A. The data that we submit to CMS is required.
10:40 10 It's mandatory. There are other questions involved
11 in the survey, the Leapfrog survey, that are outside
12 even just the CMS reporting that would have taken
13 time to compile and complete.

14 BY MS. ZIBAS:

10:41 15 Q. If you look at paragraph 13, we're going to
16 sort of dissect some of your statements here. Does
17 Healthgrades -- back up.

18 Do you consider Healthgrades a rating? Is
19 that -- do you consider that a rating for the
10:41 20 hospital, Healthgrades?

21 MS. YANG: Objection to form, vague.

22 A. I feel like it's a grade, yes.

23 BY MS. ZIBAS:

24 Q. Grade. Okay. And would you consider a
10:41 25 Healthgrades' grade the same as the Leapfrog Group

Jerad Hanlon
September 23, 2025

Page 65

1 safety grade?

2 MS. YANG: Objection.

3 MS. ZIBAS: Grade.

4 MS. YANG: Objection to form vague.

10:41 5 MS. ZIBAS: Or similar.

6 A. I think they're two different -- they are
7 looking at two different things.

8 BY MS. ZIBAS:

9 Q. And describe the best you can, what are
10:42 10 they looking at that are two different things?

11 A. Well, the Leapfrog survey includes, in
12 addition to CMS information, also the information
13 provided through the survey. Healthgrades purely
14 looks at the CMS data.

10:42 15 Q. And if you go further down in paragraph 13,
16 you say given the serious problems in TLG's
17 methodology -- and I assume TLG refers to Leapfrog
18 Group -- it was clear to our leadership that the
19 hospital, its doctors, its patients, and the
10:42 20 community would benefit far more from us no longer
21 spending time, energy, and funds towards providing
22 TLG the onerous data it sought and instead
23 redirecting those resources towards patient services
24 and providing the highest quality care.

10:42 25 Can you explain to me what are -- what are the

Jerad Hanlon
September 23, 2025

Page 66

1 serious problems in the TLG's methodology?

2 A. I think it involves the computation model
3 that they're using to award the grades. It's not --
4 it's not based solely off of publicly-reported data.

10:43 5 There's actual other data that is included that has
6 to be submitted by the facility, requiring them to
7 expend resources to provide that data.

8 Q. Now, are you aware that if you're a
9 nonparticipating hospital in the survey, you still do
10:43 10 get a score?

11 A. Correct.

12 Q. And do you understand that that score is
13 just the lowest achieved score. Do you understand
14 that? For all hospitals?

10:43 15 A. Correct. And that's why we feel its
16 inaccurate.

17 Q. But prior to the change in the survey,
18 prior to 2024, are you aware that the score that was
19 used for nonparticipating survey hospitals was closer
10:44 20 to a perfect score?

21 MS. YANG: Objection to form.

22 A. Again, I don't know enough about the
23 specifics of Leapfrog's methodology and how they're
24 computing these grades.

10:44 25 BY MS. ZIBAS:

Jerad Hanlon
September 23, 2025

Page 67

1 Q. Okay. If you go to the next page, page 7.
2 And paragraph 18, you, in that second sentence there,
3 it shows that if you participate in its pay-to-play
4 time-consuming hospital survey, TLG assigns you a
10:45 5 better grade. What do you mean by that in that
6 sentence?

7 MS. YANG: I'm sorry. Can you point me to
8 the sentence one more time, what paragraph?

9 MS. ZIBAS: 18, second sentence.

10:45 10 MS. YANG: Thank you.

11 A. Could you restate the question? I'm sorry.
12 BY MS. ZIBAS:

13 Q. Yes. What does that mean, pay-to-play,
14 time consuming hospital survey that you wrote there
10:45 15 in your declaration?

16 A. So it is a time-consuming survey and if --
17 for the participants who don't submit the survey,
18 they are penalized.

19 Q. Does it cost money to submit the survey?

10:45 20 A. It doesn't cost money to submit the survey,
21 other than the time it takes us and the money that it
22 costs us to pay or employees to compile the
23 information.

24 Q. So what do you mean by pay-to-play?

10:46 25 A. Well, Leapfrog Group uses the data that is

Jerad Hanlon
September 23, 2025

Page 68

1 submitted and monetizes that by selling licensure and
2 advertising for the ability to do that. And in order
3 to get that data, they ask participants to --
4 hospitals to submit the survey. That survey costs us
10:46 5 time, money, and resources to complete, so therefore,
6 I'm having to pay to participate in that. And if I
7 don't participate in the survey, I'm inappropriately
8 penalized for information that they don't have.

9 Q. So going back to the question I asked you
10:46 10 about Healthgrades, aren't you paying for the
11 licensing to use their logo after you get their
12 grade?

13 A. I am.

14 Q. And is that -- is Healthgrades then a
10:46 15 pay-to-play, as well?

16 A. The data to play, we don't pay anything to
17 participate, and it doesn't expend resources for us
18 to submit the data anymore than what we're already
19 required to do through CMS.

10:47 20 Q. So it's just the additional data that
21 Leapfrog Group asks you about those four measures and
22 a few other measures. Is that what you're referring
23 to as the time-consuming survey?

24 MS. YANG: Objection to form. Misstates
10:47 25 testimony.

Jerad Hanlon
September 23, 2025

Page 69

1 A. It's not only the those -- that data, but
2 it's methodology that they use to award that grade,
3 and the added fact that there is data that's not
4 submitted.

10:47 5 BY MS. ZIBAS:

6 Q. That same sentence refers to see Exhibit 3.
7 If you could take a look at your see Exhibit 3, and
8 apologize for the font being so small, but that's the
9 way it was submitted to us. I tried to make it
10:47 10 bigger but I can't.

11 A. Okay.

12 Q. Now, in the declaration, you reference
13 Exhibit 3 as a true and correct copy of the TLG
14 spring 2025 calculator TLG shared with the medical
10:48 15 center. Do you see that, this Exhibit 3, is this a
16 calculator that you're referring to to figure out the
17 score?

18 A. I'm sorry. Where are you?

19 Q. Exhibit 3, you reference --

10:48 20 A. Okay.

21 Q. Okay. Now, is this, Exhibit 3, the
22 calculator you're referencing when you look at the
23 numbers for the Leapfrog Group score?

24 A. Yes.

10:48 25 Q. And do you see that there are scores in

Jerad Hanlon
September 23, 2025

Page 70

1 there for CPOE, BCMA?

2 A. Correct.

3 Q. Physician and hand hygiene.

4 A. Uh-huh.

10:49 5 Q. So it's -- so as far as you know, are these
6 accurate or not, these numbers?

7 MS. YANG: Objection to form.

8 A. That's what Leapfrog is saying they awarded
9 to us.

10:49 10 BY MS. ZIBAS:

11 Q. But there were numbers in the calculator
12 for these measures, these four measures; correct?

13 A. That was populated by Leapfrog Group and
14 not based on any information that we entered in.

10:49 15 Q. And was it based on the fact that it was
16 the lowest achieved score of the participating
17 hospitals?

18 A. I don't know what -- exactly what that's
19 based off of. Again, we didn't submit the data, so
10:49 20 we -- I don't feel we should have been graded on
21 that. It's only information that they didn't have.

22 Q. Okay. Going back to when we were
23 discussing what the methodology is, do you understand
24 that as of fall 2024, for those that aren't
10:50 25 participating, you're receiving a grade of a

Jerad Hanlon
September 23, 2025

Page 71

1 participating hospital, but it's the lowest score?

2 MS. YANG: Objection to form, vague.

3 MS. ZIBAS: Is that your understanding?

4 A. Again, we didn't participate.

10:50 5 BY MS. ZIBAS:

6 Q. But for the methodology, I'm just asking
7 about the methodology. I understand you didn't
8 participate. But is that the methodology?

9 A. I can't speak to --

10:50 10 MS. YANG: Objection to form, vague.

11 A. I can't speak to Leapfrog Group's
12 methodology when it wasn't something that we
13 participated in.

14 BY MS. ZIBAS:

10:50 15 Q. When you have reviewed the website, did you
16 ever see anything about how the methodology was
17 determined? How the numbers were determined?

18 A. I did.

19 Q. Now, if you look at page 8 of your
10:50 20 declaration, you talk about this paragraph 19 is
21 entitled TLG deceived our potential and current
22 patients with deceptive safety grades easily reached
23 on Google. What do you mean by that statement in
24 your declaration?

10:51 25 A. We feel that the grade that was awarded to

Jerad Hanlon
September 23, 2025

Page 72

1 us is inaccurate and deceptive, and it's available by
2 searching on Google.

3 Q. And who selected the Google search term
4 hospital safety rankings that's listed in your
10:51 5 declaration?

6 MS. YANG: Objection to form.

7 A. Can you point me to where you're --

8 BY MS. ZIBAS:

9 Q. Right there.

10:51 10 A. Repeat.

11 Q. I said, who selected that search term,
12 hospital safety rankings? Because you reference
13 Google hospital safety ranking search term. Who
14 selected them for your --

10:52 15 MS. YANG: Objection above.

16 A. This is for an instance, so that's just one
17 example of what we could Google and what pops up.

18 BY MS. ZIBAS:

19 Q. Have you received any complaints from
10:52 20 patients about your Leapfrog rating?

21 A. Yes.

22 Q. Okay. How many patients?

24 A. How many patients have --

10:52 25 BY MS. ZIBAS:

Jerad Hanlon
September 23, 2025

Page 73

1 Q. Have contacted West Boca Medical Center
2 about the Leapfrog safety grade?

3 MS. YANG: Objection to form, calls for
4 speculation and outside the scope.

10:52 5 You can answer in your individual capacity,
6 to the extent you know.

7 A. Okay. I've had -- I can give some specific
8 examples of patients that have vocalized and
9 verbalized to us. I can't speak for the number of
10:52 10 patients that never even gave us an opportunity or
11 voiced their concern to us directly, but have in the
12 community.

13 But yes. I've got examples of patients. We had
14 a patient in our freestanding emergency department
10:53 15 that came and sought care, emergency care in our ED,
16 and needed surgery and decided to leave, against
17 medical advice, to go to another facility, and she
18 vocalized that that was because the Leapfrog rating
19 that she had seen publicized and wanted to go to a
10:53 20 different facility.

21 BY MS. ZIBAS:

22 Q. Where did she see it publicized? Did she
23 tell you?

24 A. It's been in social media and in the papers
10:53 25 and . . .

Jerad Hanlon
September 23, 2025

Page 74

1 Q. Did you ask this patient where specifically
2 they saw the information?

3 A. I did not, no.

4 Q. When you prepared your declaration, I
10:53 5 understand these are for instant search terms, but do
6 you have anyone internally at West Boca that is
7 advising you or assisting you with your Google search
8 terms and rankings and addressing any concerns you
9 may have about your Google search term and rankings?

10:54 10 MS. YANG: Objection to form, compound.

11 A. No. I think that's just an example of one
12 of the search terms that any person could search in
13 Google.

14 BY MS. ZIBAS:

10:54 15 Q. Do you agree that depending on your search
16 term, makes a difference what comes up when you do a
17 Google search?

18 A. I can't speculate to that, no.

19 Q. So this one person that complained in the
10:54 20 emergency department, is there any other one example
21 that you can think of of someone who complained that
22 they did not seek care at West Boca because of the
23 Leapfrog Group score or grade?

24 A. I've had numerous physicians approach me
10:54 25 with patients that have questioned them about it.

Jerad Hanlon
September 23, 2025

Page 75

1 I've had board members. We've had Google reviews
2 left that specifically site the Leapfrog rating.

3 Q. Did you provide those Google reviews as
4 part of your discovery, documents that you gathered
10:55 5 for this lawsuit?

6 A. Yes.

7 Q. And which board members or how many board
8 members talked to you about, you know, concerns about
9 the Leapfrog grade?

10:55 10 A. Several. Chief Neil Nemechek posed
11 questions because some of his paramedics and EMTs had
12 been hearing it from patients. Van Williams, Palm
13 Beach State College Provost for the Boca campus.
14 Sheri Scarborough. I've had Dr. Norina Ocampo, who
10:56 15 is on our medical executive committee and former
16 chief of staff, reach out because patients of hers
17 have -- had asked her about the Leapfrog Group.

18 Q. Do you know if these people that made
19 mentioned the Leapfrog Group, was it because of the
10:56 20 newspaper coverage, or did they actually go to the
21 website?

22 MS. YANG: Objection to form, lack of
23 foundation.

24 A. I think it's probably a combination of
10:56 25 both. I can't say with any certainty that they --

Jerad Hanlon
September 23, 2025

Page 76

1 whether they went to the website first or saw the
2 newspaper articles and some of the advertising in
3 some of the other hospitals are doing and then went
4 to the site. So I can't speculate.

10:56 5 BY MS. ZIBAS:

6 Q. For all the examples that you just ran
7 through, do you know for sure -- well, I mean, can
8 you confirm that all the patients that raise concerns
9 actually went to the website?

10:57 10 MS. YANG: Objection to form, vague, calls
11 for speculation.

12 A. I can't confirm that, no.

13 BY MS. ZIBAS:

14 Q. Did anyone at West Boca Medical Center ever
10:57 15 go out and contact these individuals and ask them for
16 more information about their -- whether they reviewed
17 the Leapfrog website?

18 MS. YANG: Objection to form, outside the
19 scope. You can answer in your individual
10:57 20 capacity.

21 A. I can tell you we did with some of the
22 board members. With the patients, I didn't reach
23 out.

24 BY MS. ZIBAS:

10:57 25 Q. So if you look at, going back to your

Jerad Hanlon
September 23, 2025

Page 77

1 declaration, page 12, paragraph 23. You reference a
2 drop in elective patient encounters after TLG
3 released its fall 2024 grade. What was the
4 percentage drop?

10:57 5 MS. YANG: Objection to form.

6 A. The percentage drop, I can't give you an
7 exact amount because it just depends on the timeframe
8 that you're looking at. I just know overall, we have
9 seen a reduction in our elective patient encounters.

10:58 10 BY MS. ZIBAS:

11 Q. Was there a drop in revenue?

12 A. For those particular, yes.

13 Q. And what are elective patient encounters?

14 A. It's going to be outpatient, elective
10:58 15 surgeries, patients choosing to come to our emergency
16 department and in an emergent condition.

17 Q. Do you think the fact that West Boca
18 Medical Center is not a trauma center deters some of
19 the people coming to your emergency department?

10:59 20 MS. YANG: Objection to form, calls for
21 speculation.

22 A. I think -- I don't think patients know
23 necessarily the differentiation between a trauma and
24 emergency. They're just going to their closest
10:59 25 emergency room.

Jerad Hanlon
September 23, 2025

Page 78

1 BY MS. ZIBAS:

2 Q. You further -- you go down in paragraph 24.

3 The sentence says the damage caused by the TLG grades
4 has been significant. Can you please describe to me

10:59 5 what you mean by that sentence? What is the damage?

6 A. I think in terms of our reputation, our --

7 which has ultimately led to the volume decline. I

8 think the goodwill and the things that we're

9 providing to the community has been tarnished because

10:59 10 of this. I think it's required a lot of expense,

11 resources, and time to explain this to not only our

12 board members, medical staff, and staff, but also to

13 try to convey an accurate portrayal to the community,

14 as well.

11:00 15 Q. How much time has been spent trying to

16 counteract the inaccurate, negative picture created

17 in the community? How much time?

18 MS. YANG: Objection to form, vague.

19 A. Numerous hours.

11:00 20 BY MS. ZIBAS:

21 Q. What resources have been used to have to

22 counteract the inaccurate, negative picture created

23 in the community? It says time and resources. What

24 resources?

11:00 25 A. Time and our -- the skill set and abilities

Jerad Hanlon
September 23, 2025

Page 79

1 of our individuals and employees at the hospital that
2 could have otherwise been dedicated towards impacting
3 the actual results instead of responding to TLG.

4 Q. So the -- wait a minute. The resources
11:01 5 here is to counteract, is that what you're referring
6 to? I'm asking about the resources spent to
7 counteract the inaccurate, negative picture?

8 A. Correct. We've had to do various community
9 education events to -- whether it be in social media
11:01 10 or through conversations with staff, medical staff,
11 board members, community individuals.

12 Q. Has the time and resources spent, has it
13 been quantified and reported to Maggie and/or others
14 at Tenet Healthcare headquarters?

11:01 15 A. I would say it can't -- it's challenging,
16 if not impossible, to completely quantify this.

17 Q. Okay. Was it -- was more time spent to
18 counteract the inaccurate, negative picture of TLG
19 than would have been spent in completing the survey?

11:02 20 MS. YANG: Objection to form.

21 A. Again, without knowing how many hours it
22 would take to complete the survey, nor understanding
23 an exact amount for how many hours is spent, it's
24 difficult to compare the two.

11:02 25 BY MS. ZIBAS:

Jerad Hanlon
September 23, 2025

Page 80

1 Q. So there's -- so the time has not been
2 quantified by West Boca Medical Center; correct?

3 A. What time?

4 Q. The time to counteract or the time to
11:02 5 complete the survey?

6 A. It hasn't. There isn't a specific number.
7 It's just a significant amount of time.

8 Q. What do you mean by loss of goodwill to the
9 hospital?

11:02 10 A. I think the reputation harm that it has
11 portrayed to the community.

12 Q. And what is that harm? How do you quantify
13 that?

14 A. Again, the example I gave, patients
11:02 15 choosing to go elsewhere. We've really done some
16 significant improvements in our patient perception,
17 in our community perception, as indicated by the
18 increase in our Google star rating, and this
19 counteracts a lot of that goodwill that we have built
11:03 20 over the last several years with our community.

21 Q. What's the -- how many people participated
22 to reach the Google star rating?

23 A. There's -- we've received well over 2 --
24 2,000 reviews.

11:03 25 Q. But so far, we don't have anything but one

Jerad Hanlon
September 23, 2025

Page 81

1 specific person that actually said that they wouldn't
2 receive services at West Boca because of Leapfrog;
3 right? Correct? You only have the one person you
4 can really specify?

11:03 5 MS. YANG: Objection to form, vague.

6 A. That's just one. There's probably more
7 that you could assume that didn't take the time to go
8 out and complete it online, but just chose to go
9 elsewhere because the negative rating.

11:04 10 BY MS. ZIBAS:

11 Q. Do you think the CMS star rating impacts
12 the reputation of West Boca medical?

13 MS. YANG: Objection to form.

14 A. I do.

11:04 15 BY MS. ZIBAS:

16 Q. And how do you differentiate whether it's
17 the Leapfrog Group grade or the CMS star rating
18 that's impacting the reputation of Boca -- West Boca
19 Medical Center?

11:04 20 MS. YANG: Objection to form, vague.

21 A. I think because they're measuring different
22 things. The CMS star ratings are required mandatory;
23 whereas, the TLG relies upon some additional
24 information, as well as an algorithm or a computation
11:04 25 model that's different.

Jerad Hanlon
September 23, 2025

Page 82

1 BY MS. ZIBAS:

2 Q. Now, looking at page 13, paragraph 27.

3 First sentence says the medical center has worked
4 tirelessly to ensure it is providing high-quality
11:05 5 care and improving patient health outcomes. Please
6 describe to me what has been at West Boca to ensure
7 it's providing high-quality care and improving
8 patient health outcomes?

9 A. So this is -- this is a multifaceted
11:05 10 approach. We review our data on a monthly and even
11 weekly basis to see how we are trending to make
12 improvements to adjust the direction that we're
13 moving to ultimately achieve our goals of providing
14 high-quality care in our community.

11:05 15 Q. Have any consultants been hired to help
16 West Boca Medical Center improve its quality care?

17 A. Consultants?

18 Q. Outside consultants.

19 A. I mean, we've -- we've had Press Ganey come
11:06 20 in and help us with our patient satisfaction tactics
21 for doing that. We've hired -- well, we paid The
22 Joint Commission to come in and evaluate our programs
23 and give us feedback. So yes, we've hired
24 consultants.

11:06 25 Q. So what does -- what has Press Ganey done

Jerad Hanlon
September 23, 2025

Page 83

1 for West Boca Medical Center?

2 A. Press Ganey is the company that administers
3 or HCAHPS surveys. So the patient satisfaction is
4 required by CMS. And they have come in and shared
11:06 5 best practices from some of the other facilities that
6 they also measure.

7 Q. And what about The Joint Commission? What
8 have they specifically been doing to aid West Boca
9 Medical Center?

11:07 10 A. So we've invited them to come in and
11 evaluate various programs, such as our hip, knee, and
12 spine programs to give us feedback on ways that we
13 can improve. I think the hip, knee, and shoulder
14 survey that we did was extremely impressive. We
11:07 15 didn't have a single recommendation for improvement,
16 and The Joint Commission surveyor highly touted our
17 program there. We're in the process of applying for
18 our spine certification and expect a survey here
19 either later this year or first part of next year.

11:07 20 Q. How many surgeons do you -- are on staff
21 with privileges to perform procedures under hip,
22 knee, and spine?

23 A. I can't give you an exact number.

24 Q. Now, with Press Ganey, did they look at
11:08 25 specific measures when they provided consulting

Jerad Hanlon
September 23, 2025

Page 84

1 services, or they just looked at general patient
2 experience?

3 MS. YANG: Objection to form, vague.

4 A. They looked at what would have the greatest
11:08 5 impact in improving our scores.

6 BY MS. ZIBAS:

7 Q. And what did Press Ganey advise you?

8 A. To really focus in on our nurse
9 communication.

11:08 10 Q. Did Press Ganey say there was a lack of
11 nurse communication?

12 MS. YANG: Objection, form.

13 A. No. They just identified that as the -- an
14 area that we could get -- significantly improve our
11:09 15 scores by focussing on that component of the HCAHPS
16 questions.

17 BY MS. ZIBAS:

18 Q. Does West Boca Medical Center evaluate the
19 hand hygiene of its employees?

11:09 20 A. Yes.

21 Q. And is that done as part of CMS or is that
22 done as part of its quality program?

23 A. It's done as part of our quality program.

24 Q. Does West Boca ever look at the physician
11:09 25 ordering entry system as part of its review?

Jerad Hanlon
September 23, 2025

Page 85

1 A. Yes.

2 Q. And do they look at staffing of critical
3 care units as part of their review?

4 A. We address our ICU staffing, yes.

11:10 5 Q. And does West Boca Medical Center, as part
6 of its quality review, also look at the Barcode
7 Medication Administration?

8 A. Yes.

9 Q. And is this all done by -- is that Ms.
11:10 10 Nunes as the director of quality, is it under her
11 group?

12 A. It's her team and it's reported up through
13 QUIPSY.

14 Q. And what does West Boca do with this data
11:10 15 that it gathers from these measures?

16 A. We review it and identify any trends, both
17 positive and/or negative to adapt process and
18 improvement, reeducation, those sorts of things, to
19 improve upon those.

11:10 20 Q. And by gathering this data, is this not the
21 same data that you would need for the Leapfrog
22 survey?

23 MS. YANG: Objection to form, lack of
24 foundation.

11:10 25 A. Again, I don't know the exact questions

Jerad Hanlon
September 23, 2025

Page 86

1 that they are -- that Leapfrog Group is requesting.

2 BY MS. ZIBAS:

3 Q. So when -- since the quality group or the
4 quality team is reviewing these four measures, you

11:11 5 would -- West Boca Medical Center must consider these
6 four measures important; is that correct?

7 MS. YANG: Objection to form, vague.

8 A. I guess, yes.

9 BY MS. ZIBAS:

11:11 10 Q. Going back to the term goodwill that you
11 had in your declaration, is there any way you can
12 describe how West Boca Medical Center quantifies the
13 loss of goodwill?

14 MS. YANG: Objection to form, vague.

11:12 15 A. I think the decrease in volume is just one
16 example of how we've -- if people have goodwill
17 towards or you're in a good reputation to your
18 facility, they will likely utilize your facility
19 more. If they don't, they will seek their care
11:12 20 elsewhere.

21 BY MS. ZIBAS:

22 Q. When you talk about volume, what
23 specifically are you referring to as volume is
24 decreased? Are you talking about the elective

11:12 25 outcomes, the outpatient treatment?

Jerad Hanlon
September 23, 2025

Page 87

1 A. Both elective, and in the example that I
2 gave, the one patient that came to the emergency
3 room, even it's impacting our emergency care.

4 Q. So percentage-wise, are the admissions
11:12 5 down?

6 MS. YANG: Objection to form.

7 A. Overall admissions?

8 BY MS. ZIBAS:

9 Q. Yes.

11:12 10 A. Yes.

11 Q. And you think that's caused by the Leapfrog
12 Group?

13 A. In part, yes.

14 Q. It's not caused by the CMS ratings?

11:13 15 A. That probably has a factor in it, as well.

16 Q. But revenues are up at the hospital
17 overall?

18 A. Revenues for the overall hospital, yes, are
19 up.

11:13 20 Q. And where would you say is the most
21 revenue? Is it driven by emergency room transfers,
22 admissions? Where is the highest dollar volume of
23 revenue generated?

24 MS. YANG: Objection to form, vague, and
11:13 25 outside the scope.

Jerad Hanlon
September 23, 2025

Page 88

1 You can answer, if you know in your
2 individual capacity.

3 MS. ZIBAS: If you know. If you don't, I
4 understand that.

11:13 5 A. It's spread across all. I mean, it's going
6 to be a combination of NICU, labor and delivery,
7 surgical volume, and admission.

8 BY MS. ZIBAS:

9 Q. In 2024 and 2025, had you had any
11:13 10 physicians surrender their privileges at the
11 hospital?

12 A. Resign, yes.

13 Q. And how many have resigned?

14 A. Oh, I don't know the exact number off the
11:14 15 top of my head.

16 Q. And do you know why they resigned?

17 A. Some have moved out of the state. Some
18 have retired. It's a wide range of reasons.

19 Q. All right. So now we're going to go back
11:14 20 to this Hanlon Number 3, which I showed you, which we
21 marked previously. And you pointed out that this --
22 I'm going to represent to you this is a page from
23 hospitalsafetygrade.org website. And you pointed out
24 earlier that the only the highlighted section is
11:14 25 safety problems. And if you go to the second page,

Jerad Hanlon
September 23, 2025

Page 89

1 you see where number one in red, it says decline to
2 report. The hospital was asked to provide this
3 information to the public but did not. Do you see
4 that sentence?

11:15 5 A. I do.

6 Q. Is that accurate?

7 MS. YANG: Objection to form, lack of
8 foundation.

9 MS. ZIBAS: Foundation is I'm asking based
11:15 10 on looking at this website page.

11 MS. YANG: Same objection.

12 A. What is the note definition referring to?

13 BY MS. ZIBAS:

14 Q. Well, that's from the website. You had
11:15 15 said that you looked at the website at some point.

16 A. Uh-huh.

17 Q. So is that statement, the hospital was
18 asked to provide this information to the public but
19 did not, is that accurate?

11:15 20 MS. YANG: Objection to form, vague, and
21 lack of foundation.

22 A. Again, it states it, but it doesn't
23 reference -- I don't see the one notated on which
24 particular item is included in this.

11:15 25 BY MS. ZIBAS:

Jerad Hanlon
September 23, 2025

Page 90

1 Q. Yes. I think we need to --

2 A. Does it technically cover everything?

3 Q. Yes.

4 A. Okay.

11:15 5 Q. But is that an accurate statement that West
6 Boca did not provide this information?

7 MS. YANG: Objection to form.

8 MS. ZIBAS: Related to the safety problems.

9 MS. YANG: Objection to form, vague.

11:16 10 A. We provided the CMS data.

11 BY MS. ZIBAS:

12 Q. Okay.

13 A. We didn't participate in the survey.

14 Q. But the CMS data was taken from the public
11:16 15 information you did provide them; is that correct?

16 A. Correct. That would be correct.

17 Q. Did you ever speak to the press on behalf
18 of West Boca Medical Center or on behalf of Palm
19 Beach Health Network about the Leapfrog grades?

11:16 20 A. Did I personally --

21 Q. You personally.

22 A. -- speak to the press?

23 Q. Yes.

24 A. I have not spoken personally to the press.

11:16 25 MS. ZIBAS: Here's Hanlon Number 4.

Jerad Hanlon
September 23, 2025

Page 91

1 (Exhibit 4 was marked.)

2 BY MS. ZIBAS:

3 Q. Take a look at what has been marked as
4 Hanlon Exhibit 4.

11:17 5 A. Okay.

6 Q. Okay. Do you recognize this e-mail that
7 you sent out to A-team?

8 A. Our A-team, yes.

9 Q. And this is dated November 16, 2023. Why
11:17 10 did you send this out as a key message for fall 2023?

11 A. Because I received this from our public
12 relations representative that there were -- the
13 Leapfrog scores were going to be getting announced
14 publicly and to have talking points to be able to
11:18 15 speak to it.

16 Q. And was this a concern in advance of the
17 release?

18 MS. YANG: Objection to form, vague.

19 A. This was something that public relations
11:18 20 wanted us to have in case we were asked about it.

21 BY MS. ZIBAS:

22 Q. So did the public relations team draft the
23 West Boca Leapfrog key messages that are on the third
24 page?

11:18 25 A. Yes.

Jerad Hanlon
September 23, 2025

Page 92

1 Q. And did you have any input into these key
2 messages?

3 A. Yes. I could have. If I had concerns or
4 questions, I could reach back out to Shelly to ask
11:18 5 her to review or reconsider.

6 Q. What does Shelly Weiss, does she work for
7 Tenet Health corporate office? Where does she work?

8 A. I don't know if she's on the specific
9 hospital's payroll or if she's direct corporate -- I
11:19 10 believe she's a direct corporate employee.

11 Q. So this -- you had started about a month
12 before you sent this e-mail. You started in October
13 2023; correct?

14 A. Correct.

11:19 15 Q. And was it your understanding that Tenet
16 Healthcare was monitoring the release of the Leapfrog
17 grades and when they would be released?

18 A. I can't speak for Tenet Healthcare. I know
19 that Shelly Weiss knew that the scores would be
11:19 20 coming out, and so she wanted to provide us talking
21 points.

22 Q. Were you at West Boca Medical Center
23 monitoring the timing of the release of the scores?

24 A. Andrea Nunes certainly was.

11:20 25 MS. ZIBAS: This is Hanlon Number 5.

Jerad Hanlon
September 23, 2025

Page 93

1 (Exhibit 5 was marked.)

2 BY MS. ZIBAS:

3 Q. If you can take a look at Exhibit 5, do you
4 recognize this e-mail? I know it was sent to you
11:21 5 from Shelly Weiss. Does it jog your memory, at all?

6 A. I don't recall it. But I don't discount
7 that it's not accurate.

8 Q. Did you -- once you reviewed this e-mail
9 with all this attached information, did you do
11:21 10 anything further as a follow-up? Did you call
11 anyone? Did you call Maggie? Did you call any of
12 the other -- did you call Shelly to ask if you needed
13 to do anything further regarding these statements?

14 A. I did not.

11:22 15 MS. ZIBAS: This will be Exhibit 6.

16 (Exhibit 6 was marked.)

17 BY MS. ZIBAS:

18 Q. Going back to the governing board meetings,
19 who prepared the agendas for each of the meetings for
11:22 20 the governing board?

21 A. Our executive assistant actually did the
22 agenda with input from chief of staff, as well as
23 board, governing board chair, Chuck Stout, and
24 myself.

11:22 25 Q. And this document, which we marked

Jerad Hanlon
September 23, 2025

Page 94

1 Exhibit 6, says prepared by J. Hanlon. Is that you?

2 A. Document prepared by J. Hanlon.

3 Q. It's at the top.

4 A. Oh, so Alexa, my executive assistant, this
11:23 5 was -- normally she takes the minutes, but I think
6 she might have been on maternity leave at this
7 particular meeting, so I may have been the one taking
8 the minutes at this particular meeting.

9 Q. Okay. So I'm looking specifically at page
11:23 10 7, and there's a Bates number at the bottom, 15751,
11 but if you go to page 7, that's the focus of my
12 questions.

13 A. Okay.

14 Q. Now, it says administrative report, Mr.
11:23 15 Hanlon presented some slides.

16 A. Uh-huh.

17 Q. Okay. Says announced the 2024
18 Healthgrades' awards for West Boca. Leapfrog, Tenet
19 has chosen not to participate in the Leapfrog
11:24 20 program, so the scores that they award will not be
21 reflective since they do not have all the information
22 to apply an accurate grade. Reannounce the TJC Gold
23 Seal certification for hip, knee, and shoulder, and
24 Google rating achieved our goal of getting to 4 in
11:24 25 2024.

Jerad Hanlon
September 23, 2025

Page 95

1 Do you see those? Are those accurate statements
2 of the findings?

3 A. Yes.

4 Q. Did you draft those?

11:24 5 A. I believe so.

6 Q. And then there were conclusions and
7 recommendations.

8 A. Uh-huh.

9 Q. And it says Mr. Nobles questioned that WBMC
11:24 10 used to participate in Leapfrog and Mr. Hanlon
11 clarified that over the years, Tenet has made the
12 decision across the company to not participate in
13 Leapfrog because it does not provide the value that
14 it used to.

11:24 15 Can you explain to me what you mean by providing
16 the value that it used to?

17 A. Because we stopped participating in the
18 survey, and so they were basing the grades off
19 inaccurate information?

11:25 20 Q. Was -- maybe I'm misunderstanding this.
21 But it says Tenet has made the decision to not
22 participate because it does not provide the value.
23 So I would assume that Tenet based its decision on
24 the value proposition.

11:25 25 A. It used to.

Jerad Hanlon
September 23, 2025

Page 96

1 MS. YANG: Objection to form.

2 BY MS. ZIBAS:

3 Q. And how is it Leapfrog in 2021 provided
4 value, but in 2024, it does not?

11:25 5 A. Because the amount of resources that are
6 needed to submit the survey are not there anymore.

7 Q. And was that a decision that was made
8 solely by Tenet?

9 A. I wouldn't say solely. Tenet, as a
11:25 10 company, decided to stop participating in the
11 Leapfrog survey, and each hospital had the
12 opportunity to justify the need for it to be
13 reinstated in the particular markets.

14 Q. Did West Boca Medical Center ask to
11:26 15 reinstate Leapfrog Group survey in their market?

16 A. Ask who?

17 Q. Ask Tenet.

18 A. Did West Boca, specifically myself?

19 Q. Yes. Correct.

11:26 20 A. I did not ask the corporate office or my
21 supervisor to presume participation in The Leapfrog
22 Group.

23 Q. And do you know if Maggie made the request?

24 A. I don't know if Maggie made the request.

11:26 25 That's -- again, I didn't make the request so . . .

Jerad Hanlon
September 23, 2025

Page 97

1 Q. Do you know if Ms. Nunes, in conjunction
2 with Maggie, made the request to home office?

3 MS. YANG: Objection to form.

4 A. I can't speak to what Andrea made to the
11:26 5 corporate office.

6 BY MS. ZIBAS:

7 Q. Did you ever discuss with Maggie and Andrea
8 to request the home office to allow them to
9 participate in the Leapfrog survey again?

11:27 10 A. Andrea had made requests to participate in
11 the survey, and I ultimately made the decision as CEO
12 that it wasn't worth the time or the resources that
13 we would have to dedicate to it to complete it.

14 Q. And when did you make that decision?

11:27 15 A. Well, that's an ongoing decision. This was
16 revisited. It gets revisited whenever the survey or
17 the gradings, grades come out, at those times.

18 Q. And how much time and resources has been
19 spent on gathering documents for this lawsuit at West
11:27 20 Boca?

21 MS. YANG: Objection to form. Outside the
22 scope.

23 You can answer to the extent you know.

24 A. Same. It's difficult to quantify.

11:27 25 BY MS. ZIBAS:

Jerad Hanlon
September 23, 2025

Page 98

1 Q. So if it's difficult to quantify the number
2 of hours spent on the survey or the number of hours
3 to gather documents or the number of hours to rectify
4 an inaccurate -- what did you put in your
11:28 5 declaration? Let me get the language. Inaccurate,
6 to counteract the inaccurate negative picture. So if
7 you look at the number of hours -- if you can't
8 quantify how many hours it takes to counteract the
9 negative picture or the number of hours to complete
11:29 10 the survey or the number of hours it took to gather
11 documents for the lawsuit, how do you know -- how do
12 you know the resources were really -- one was worse
13 than the other?

14 MS. YANG: Objection to form. Vague,
11:29 15 argumentative, compound.

16 A. Without -- you can still know it's going to
17 take countless or numerous amounts of hours without
18 having an exact figure.

19 MS. ZIBAS: This is Hanlon 7.

11:29 20 THE WITNESS: Okay.

21 (Exhibit 7 was marked.)

22 BY MS. ZIBAS:

23 Q. Okay. So if we look at, this is meeting
24 minutes from the governing board, January 28, 2024,
11:30 25 is that correct, based on the information at the top?

Jerad Hanlon
September 23, 2025

Page 99

1 A. Correct.

2 Q. And if you look at page 8, the meeting
3 minutes, it states Jared provided clarification on
4 awards that WBMC received in terms of Leapfrog. WBMC
11:30 5 does not participate in the survey. Tenet is in the
6 process of pursuing -- pursuing legal action against
7 Leapfrog, as the information provided was an
8 inaccurate reflection of WBMC. Leapfrog does not
9 have the data to support their award.

11:31 10 Do you recall discussing this with the board?

11 A. Yes.

12 Q. And what did you tell them?

13 A. What this states here, that we felt like
14 Leapfrog awarded a grade that was inaccurate, and
11:31 15 that we don't participate in that, and that we're
16 going to have to pursue legal action to get them to
17 stop or to revise the process.

18 Q. And the meeting was January 28, 2024;
19 correct?

11:31 20 A. Correct.

21 Q. When was the lawsuit filed?

22 A. I believe May.

23 Q. Of 2025; correct?

24 A. Correct.

11:31 25 Q. What was the reason for the delay?

Jerad Hanlon
September 23, 2025

Page 100

1 MS. YANG: Objection to form.

2 And I'll caution you not to get into any
3 discussions with counsel.

4 A. This is actually -- this is dated
11:32 5 incorrectly. This should have been January 28 of
6 2025. And the reason I know that is because of all
7 of the participants that are here, this was our
8 transition meeting. So this is an error in the date.
9 This is supposed to be January 28 of 2025.

11:32 10 BY MS. ZIBAS:

11 Q. Okay.

12 A. We -- our board members transitioned, and
13 we had several that turned out of the board. And
14 this was a meeting where we had it at a restaurant,
11:33 15 private room in a restaurant because we included all
16 the exiting members and the new members, and that was
17 in January of '25. So that's a mistake on the date.

18 Q. Okay. And you say Jared to follow up with
19 the board once more information is provided. Was
11:33 20 there further information provided, at some point?

21 A. Yes. This has been a topic of discussion
22 at the many of the board meetings this year.

23 Q. And did the board provide their guidance or
24 input into the lawsuit and filing of it?

11:33 25 A. Their guidance or they -- they have given

Jerad Hanlon
September 23, 2025

Page 101

1 us feedback in terms of the things that we needed to
2 improve upon from a quality perspective, and weighing
3 in feedback that they've received in the community
4 about the Leapfrog and what they're hearing in the
11:33 5 community from it.

6 Q. And what was the guidance provided by the
7 board to you about the Leapfrog?

8 A. It's they serve as a liaison group to
9 convey what they're hearing in the community.

11:34 10 Q. And what were they hearing in the community
11 as a liaison group?

12 A. The things that we've kind of talked about.
13 You know, there's been some social media videos that
14 have been sent out referencing The Leapfrog Group,
11:34 15 and they were sharing those with me, asking what we
16 need to do to get these taken down. And what they
17 should be telling their neighbors and their patients
18 and their staff about the accuracy of the claims
19 being made by the Leapfrog.

11:34 20 Q. Okay. If you go further down the page, it
21 says Jared touch points. WBMC is working on shifting
22 volume to other locations as WBMC is tapped out with
23 space. Does that mean that the volume was so high
24 that you didn't have space for patients?

11:35 25 MS. YANG: Objection to form. Misstates

Jerad Hanlon
September 23, 2025

Page 102

1 the document.

2 A. No. This is related to other locations
3 within the hospital. Our ORs, only have six
4 inpatient ORs, we've seen an increase in number of
11:35 5 inpatient surgeries, and we've seen a decrease in the
6 number of outpatient surgeries and other elective
7 volumes. So it's a matter of shifting the volume
8 within the physical facility based on the type of
9 service that's needed.

11:35 10 Q. How many outpatient ORs did you have,
11 again?

12 A. Four.

13 Q. And so you were converting those to
14 inpatient?

11:35 15 A. No. They're in an outpatient building off
16 campus, which is why we can't do inpatient surgeries
17 in those ORs because they're not in the hospital.
18 They're at an outpatient facility. So even though we
19 have capacity, it's not the right capacity that we
11:35 20 needed to accommodate those patients.

21 Q. And was that being addressed or is it being
22 addressed?

23 A. Yes. We're looking to expand an existing
24 OR, as well as add another OR on the inpatient side,
11:36 25 as well as trying to counteract the negative

Jerad Hanlon
September 23, 2025

Page 103

1 perception that the community has gotten to build
2 back up our outpatient OR.

3 Q. What type of outpatient procedures have
4 declined?

11:36 5 A. A lot of pediatric ENT, pediatric general
6 surgery, some GYN, general surgery.

7 Q. How many pediatrics -- how many surgeons do
8 you have on staff doing the pediatric procedures?

9 A. Pediatric ENT, in particular, we have four.
11:37 10 Pediatric general surgery, we have three. I could go
11 down the list. General surgery, I don't -- I can't
12 give you an exact amount. I just -- it's north of
13 20.

14 Q. Going back to the Leapfrog methodology. So
11:37 15 did you ever get into a discussion with patients
16 about the methodology that was posted on the website
17 or that was available for them to review?

18 A. Me specifically?

19 Q. You specifically.

11:37 20 A. No.

21 Q. Do you know if anyone else at West Boca
22 Medical Center did so?

23 A. I can't speak for it, no.

24 Q. Are you aware that there are hospitals who
11:37 25 do not participate in the survey, and they get a

Jerad Hanlon
September 23, 2025

Page 104

1 grade higher than a D or an F?

2 MS. YANG: Objection to form, lack of
3 foundation.

4 A. I can't speak to that. I don't know.

11:38 5 BY MS. ZIBAS:

6 Q. Other than Healthgrades, are there any
7 other grades or rating services that West Boca
8 Medical Center participates in?

9 MS. YANG: Objection to form.

11:38 10 A. I don't think -- again, defining ratings
11 are grades, there's other accrediting bodies, other
12 entities that we use to help evaluate and convey the
13 quality of care that we provide in West Boca.

14 BY MS. ZIBAS:

11:38 15 Q. But I'm not referring to accrediting ones,
16 but ratings or grades where you actually then pay to
17 use their logo or you license their logo, like you do
18 with Healthgrades. Are there any others that West
19 Boca uses or participates in?

11:38 20 A. Again, from a grading or rating, there are
21 other entities that we utilize to help convey the
22 quality of care that we provide, such as The Joint
23 Commission, Get with the Guidelines, ACR,
24 Healthgrades. So there are numerous other entities.

11:39 25 Q. What is get with the guidelines?

Jerad Hanlon
September 23, 2025

Page 105

1 A. Get with the Guidelines is a demonstration
2 of our stroke care measures, looking at not only
3 quality outcomes, but also processes and things that
4 we've had in place to appropriately care for -- for
11:39 5 strokes.

6 Q. And does anyone at West Boca Medical Center
7 have to provide data in order for -- to get with the
8 guidelines?

9 A. It's the registry data that we already
11:40 10 provide, that we're required to provide.

11 Q. To provide to who?

12 A. The registry. It's state-mandated.

13 Q. Now, does Joint Commission have any -- do
14 they have any accolades that you pay for? Once you
11:40 15 get a good certificate or score from them or pass, do
16 they have anything they sell, like the Healthgrades
17 stuff?

18 A. We do contract with The Joint Commission to
19 come in and evaluate our -- not only just our overall
11:40 20 accreditation that we do on a triannual basis that's
21 required by CMS, but we also work with them to come
22 in and evaluate our hip, knee, and shoulder. And
23 we've recently applied for our spine certification
24 for Joint Commission.

11:41 25 Q. Do you think it helps West Boca, the fact

Jerad Hanlon
September 23, 2025

Page 106

1 you're paying for a contract with Joint Commission,
2 does that help with your overall evaluation outcome?

3 MS. YANG: Objection to form, vague, lack
4 of foundation.

11:41 5 MS. ZIBAS: With Joint Commission.

6 A. I think it does help to have Joint
7 Commission come in and have an onsite inspection and
8 a comprehensive review of our program and award us
9 their seal of approval based off of our quality
11:41 10 program that we offer. Yes, I do think it's
11 beneficial.

12 BY MS. ZIBAS:

13 Q. For -- we had previously discussed that
14 your quality department was looking at the
11:41 15 computerized physician ordering entries. Is that
16 information that's gathered solely by the quality
17 department, or do you participate in how that's
18 monitored and the data that's gathered?

19 A. I participate in how it's monitored, as
11:42 20 it's one of the measures that we report through our
21 quality improvement/patient safety committee.

22 Q. Do you gather data on a quarterly basis or
23 monthly basis for CPOE, BCMA, hand hygiene, and ICU
24 staffing?

11:42 25 A. It's a combination of both.

Jerad Hanlon
September 23, 2025

Page 107

1 Q. Now, now are you aware that as part of this
2 lawsuit, West Boca Medical Center is seeking legal
3 fees and costs in this matter?

4 MS. YANG: Objection to form.

11:43 5 MS. ZIBAS: Are you aware of that?

6 A. Yes.

7 BY MS. ZIBAS:

8 Q. And who is currently paying the attorney's
9 fees and costs for West Boca?

11:43 10 MS. YANG: Objection to form, outside the
11 scope.

12 To the extent you know.

13 A. Each respective facility is paying legal
14 fees.

11:43 15 BY MS. ZIBAS:

16 Q. And do you know how much has been spent to
17 date by West Boca Medical Center?

18 A. I don't know of a complete total.

19 Q. Do you know what -- well, what number do
11:43 20 you know?

21 MS. YANG: Objection to form, vague,
22 outside the scope.

23 You can answer, if you know.

24 A. I know we reported on it last month, and I
11:43 25 can't remember the exact number off the top of my

Jerad Hanlon
September 23, 2025

Page 108

1 head, though.

2 BY MS. ZIBAS:

3 Q. Do you know the total amount to be --
4 that's budgeted?

11:44 5 A. We don't have a budgeted amount.

6 Q. Do you have an anticipated amount that West
7 Boca Medical Center will spend in total?

8 MS. YANG: Objection to form.

9 I'm going to instruct not to answer on
11:44 10 that.

11 MS. ZIBAS: I assume at the time of trial,
12 he'll be able to testify to that amount since
13 it's been sought.

14 MS. YANG: Well, you're welcome to ask him
11:44 15 about any fees that have been incurred, but
16 asking about budgeting gets into attorney
17 work-product information.

18 MS. ZIBAS: Well, he doesn't know what's
19 been incurred.

11:44 20 BY MS. ZIBAS:

21 Q. Who would know any amount incurred to date?

22 A. I could get the information, if I could
23 reference our invoicing system. I just don't know it
24 off the top of my head.

11:44 25 Q. Do you have any records -- you indicate,

Jerad Hanlon
September 23, 2025

Page 109

1 you explained the one example of the individual from
2 the emergency department that went to another
3 hospital; and then you referenced a speaking with
4 Sheri Scarborough, several other people on the board.
11:45 5 Can you provide any more specifics about individuals,
6 either physicians or patients, who went -- who didn't
7 want to be treated at West Boca Medical Center,
8 specifically because of the Leapfrog grade?

9 MS. YANG: Objection to form, vague and
11:45 10 compound.

11 A. I can give another example. Shelley Cueto
12 is a practice manager for Dr. Phipps and Dr. Cueto.
13 She reached out to me because of a Tik Tok video that
14 was going around social media claiming that West Boca
11:46 15 was one of the five worst hospitals, referencing in
16 the video the Leapfrog gradings as an F. And she
17 asked me if this was true, and I had to explain to
18 her the reasoning why we didn't feel it was accurate.
19 And she then, in turn, had to convey that to both Dr.
11:46 20 Phipps and Dr. Cueto and patients that they were
21 seeking care from those two physicians in particular.

22 Q. And who posted the Tik Tok video?

23 A. I don't know.

24 Q. Did you obtain a copy of the Tik Tok video?

11:46 25 A. Yes.

Jerad Hanlon
September 23, 2025

Page 110

1 Q. And you provided that as part of your
2 documents in discovery?

3 A. It was part of numerous text messages that
4 I've received from board members that included the
11:46 5 video.

6 Q. Did you provide it as part of your
7 discovery to your attorneys?

8 A. Yes.

9 Q. Were you -- as part of what you've been
11:47 10 going through in this lawsuit, were you ever able to
11 -- do you have any evidence that Leapfrog takes --
12 has paid any money to award better grades to
13 hospitals?

14 MS. YANG: Hold on one second.
11:47 15 Without getting into any discussions with
16 the attorneys or legal advice, you can answer
17 the question of what evidence you have.

18 A. Can you restate the question?

19 BY MS. ZIBAS:
11:47 20 Q. Do you have any evidence that Leapfrog has
21 been paid any money to award better grades to other
22 hospitals, safety grades?

23 A. I don't have any indication of Leapfrog,
24 any specific examples of Leapfrog Group being paid to
11:48 25 award a higher grade.

Jerad Hanlon
September 23, 2025

Page 111

1 MS. ZIBAS: All right. I need to go
2 through my notes. I really don't have -- I'm
3 not an all-day person here. Don't know where
4 you guys were from. You can go off the record.
11:48 5 We can go through this.

6 THE VIDEOGRAPHER: We're off the record at
7 11:47 a.m.

8 (Recess was taken for lunch at 11:47 a.m.)

9 (Back on the record at 12:28 p.m.)

12:29 10 THE VIDEOGRAPHER: Back on the record.

11 Time is 12:28 p.m.

12 BY MS. ZIBAS:

13 Q. All right. We're back on the record. I'm
14 going to follow up with a few questions, Mr. Hanlon,
12:29 15 just to clarify. First of all, we had been talking
16 about the four measures, the ICU staffing, the hand
17 hygiene, the Barcode Medication Administration, the
18 Computerized Physician Order Entry, and based on my
19 understanding, that these are four measures that your
12:30 20 quality department reports and gathers data and you
21 monitor it, is that correct, when they report, when
22 they gather the data? And this is done in order to
23 give it to your quality improvement patient safety
24 committee? Is that who gets this information?

12:30 25 MS. YANG: Objection to form, vague and

Jerad Hanlon
September 23, 2025

Page 112

1 compound.

2 A. So I'm a member of the quality improvement
3 committee, and this data goes through that, that
4 committee.

12:30 5 BY MS. ZIBAS:

6 Q. And the data, when it's put together, is it
7 in a form of a report or is it just hard data? What
8 kind of format is it in?

9 A. It varies. Like for example, the ICU
12:31 10 staffing, that's pretty static. It doesn't change
11 drastically. Handwashing, we do audits monthly, and
12 that data is recorded as to compliance with
13 handwashing. Same thing with CPOE and barcode
14 administration, we pull that information from our
12:31 15 electronic medical record and other electronic
16 sources to report out on a regular basis.

17 Q. So when you pull it from the electronic
18 data, then you then assemble a report and send it to
19 the committee, or Ms. Nunes and her department do
12:31 20 that; is that correct?

21 A. They do that, yes.

22 Q. Okay. Just wanted to clarify.

23 Now, we talked about the legal fee number, and I
24 know you said that you don't have the system in front
12:31 25 of you. Do you recall any of the numbers to date

Jerad Hanlon
September 23, 2025

Page 113

1 paid for legal fees, at all?

2 MS. YANG: Objection to form, vague.

3 A. I don't. Not off the top of my head.

4 BY MS. ZIBAS:

12:32 5 Q. Does West Boca Medical Center, do you use
6 an organization or partner with Vizient?

7 A. I don't -- I don't recognize that
8 organization so I'm not sure.

9 Q. Do you -- does West Boca Medical Center
12:32 10 partner or hire any outside company to help them
11 evaluate healthcare performance?

12 MS. YANG: Objection to form, vague.

13 A. What is your definition of performance?

14 BY MS. ZIBAS:

12:32 15 Q. Well, companies such as Vizient, Premier
16 Inc., HealthTrust Purchasing Group, Healthgrades,
17 they all are -- they measure healthcare performance,
18 and do you hire outside companies to assist West Boca
19 Medical Center with gathering data or interacting
12:32 20 with these organizations?

21 MS. YANG: Objection to form.

22 A. I don't have any clarity in terms of what
23 we would be hiring them to do. Are you suggesting
24 providing consulting services or --

12:33 25 BY MS. ZIBAS:

Jerad Hanlon
September 23, 2025

Page 114

1 Q. Do you hire consultants? Does West Boca
2 Medical Center hire consultants to work with
3 Healthgrades and to help their grades or to license
4 the logos? I mean, is this done directly with West
12:33 5 Boca?

6 MS. YANG: Objection to form, vague.

7 A. Is the -- and I'm sorry. I'm trying to get
8 clarity on your question. So does --

9 BY MS. ZIBAS:

12:33 10 Q. It's okay.

11 A. So are you saying does Healthgrades
12 contract directly with West Boca?

13 Q. Yes. Do they contract directly or do you
14 use an intermediary third-party?

12:33 15 A. For Healthgrades, I believe we contract
16 directly with Healthgrades.

17 Q. And what -- and I assume for Joint
18 Commission, you do as well, you contract directly;
19 correct?

12:34 20 A. Correct.

21 Q. What about Trilliant?

22 A. That is a database. That's not necessarily
23 a service.

24 Q. Does West Boca Medical Center contract
12:34 25 directly to use that database?

Jerad Hanlon
September 23, 2025

Page 115

1 A. I do not know. Our chief strategy officer
2 would have to answer that. I'm not exactly sure --

3 Q. And who --

4 A. -- if it's Tenet or West Boca.

12:34 5 Q. And who is your chief strategy officer,
6 again?

7 A. Derek Collins.

8 Q. And has West Boca Medical Center
9 participated in any consumer perception surveys to
12:34 10 compare the public views of your hospital versus
11 competitors?

12 A. We get a report on, I would say, probably
13 on a quarterly basis that looks at community
14 perception that's sent to us from our marketing
12:35 15 leader.

16 Q. And who compiles this report?

17 A. I'm not sure if it's -- I think it is an
18 outside agency. I don't know what that agency's name
19 is. I just get the quarterly report that looks at
12:35 20 community perception.

21 Q. And in the latest report that you can
22 recall receiving from West Boca, what was -- what was
23 that results of the community perception survey?

24 MS. YANG: Objection to form, vague.

12:35 25 A. How are you evaluating the results?

Jerad Hanlon
September 23, 2025

Page 116

1 BY MS. ZIBAS:

2 Q. I haven't seen the report so I would like
3 to know what is in that report. Why don't we start
4 there?

12:36 5 A. Sure. It looks at percentage of positive
6 opinions on like social media and Google reviews and
7 things like that, and kind of gauges community
8 perception of the facility.

9 Q. And you mentioned that Google ratings,
12:36 10 Google star went up; is that correct?

11 A. Yes.

12 Q. And what's the percentage of positive
13 opinions in the last report that you can recall?

14 A. I know it was -- it had improved. I can't
12:36 15 speak to exactly the exact percentage improvement
16 without seeing the report in front of me.

17 Q. And does West Boca Medical Center
18 participate in or retain anyone to do any market
19 research reports comparing West Boca Medical Center
12:37 20 to its competitors?

21 MS. YANG: Objection to form.

22 A. What are you defining as market research?

23 BY MS. ZIBAS:

24 Q. That would be a good question because I am
12:37 25 not sure what market research reports or studies your

Jerad Hanlon
September 23, 2025

Page 117

1 marketing department has done. So market research
2 would be same as a survey, asking the public their
3 opinion?

4 MS. YANG: Objection to form.

12:37 5 A. There are -- I mean, we participate in
6 HCAHPS, for example, which are required for CMS that
7 evaluates patient satisfaction levels. And again, we
8 do look at overall perception of the facility through
9 either positive or negative reviews and feedback from
12:37 10 that perspective.

11 MS. ZIBAS: I think that's all the
12 questions I have at this point. Obviously, if
13 there's documents during the meet and confer
14 process that the other attorneys are going
12:38 15 through that -- you know, additional documents
16 arise that are related to West Boca Medical
17 Center, we'll reserve the right to call him back
18 or ask questions in writing, deposition by
19 writing.

12:38 20 MS. YANG: We disagree with that, but of
21 course we're happy to take that up with you
22 after, and we'll reserve for trial.

23 THE VIDEOGRAPHER: No questions.

24 MS. YANG: No. We'll reserve for trial.

12:38 25 MS. ZIBAS: Thank you for your time.

Jerad Hanlon
September 23, 2025

Page 118

1 THE WITNESS: Thank you.

2 THE VIDEOGRAPHER: Off at 12:37 p.m.

3 MS. YANG: We'll read.

4 (Thereupon, the proceedings concluded at
5 12:37 p.m.)

CASE NO.: 9:25-CV-80526-DMM

5 TYPE OF PROCEEDING: DEPOSITION

DATE: 9.23.25

6

The transcript of the above proceeding is now
7 available and requires signature by the witness.

8 Please e-mail fl.production@lexitaslegal.com for
access to a read-only PDF transcript and PDF-fillable
9 errata sheet via computer or use the errata sheet
that is located at the back of the transcript.

10

Once completed, please print, sign, and return to the
11 e-mail address listed below for distribution to all
parties.

12

If you are in need of assistance, please contact
13 Lexitas at 888-811-3408.

14 If the witness does not read and sign the transcript
within a reasonable amount of time, the original
15 transcript may be filed with the Clerk of the court.

16 If the witness wishes to waive his/her signature now,
please have the witness sign in the blank at the
17 bottom of this letter and return to the e-mail
address listed below.

18

Very truly yours,

1 Thereupon,
2 the following proceedings began at 9:08 a.m.:

3 * * *

4 THE VIDEOGRAPHER: We are now on the record.
5 Today's date is September 19th, 2025. The time
6 is 9:08 a.m. This is the video-recorded
7 deposition of Heather Havericak taken in the
8 matter of Good Samaritan Medical Center,
9 Incorporated versus The Leapfrog Group.

10 This deposition is being held at 515 North
11 Flagler Drive, Suite 350, West Palm Beach,
12 Florida 33401.

13 My name is Daniel Ragland. I am the
14 videographer with Lexitas. The stenographer is
15 Barbie Gallo with Lexitas.

16 Will counsel please announce their
17 appearances for the record after which the
18 stenographer will swear in the witness.

19 MS. BLAIR: Kim Blair for The Leapfrog
20 Group.

21 MR. MARCUS: Jeff Marcus on behalf of the
22 plaintiffs. I'm joined by Kevin Simmons of
23 Gibson Dunn.

24 THEREUPON,

25 HEATHER HAVERICAK,

Heather Havericak
September 19, 2025

CONFIDENTIAL

Page 6

1 Being by me first duly sworn to tell the whole truth,
2 as hereinafter certified, testified as follows:

3 DIRECT EXAMINATION

4 BY MS. BLAIR:

5 Q. Ms. Havericak, as you know, I'm Kim Blair.
6 I represent The Leapfrog Group in connection with this
7 matter. I want to just start by showing you what we're
8 going to mark as Exhibit 1.

9 (Defendant's Exhibit Number 1 for i.d.)

10 BY MS. BLAIR:

11 Q. Ms. Havericak, I will submit to you this is
12 the Amended Notice of the Taking In-Person Videotaped
13 Deposition of Heather Havericak Individually and
14 Pursuant to Rule 30(B)(6) to Delray Medical Center,
15 Inc.

16 Have you seen this document before?

17 A. Yes.

18 Q. And so you understand that you've been
19 summoned here today to testify not only as in your
20 individual capacity but also as the corporate
21 representative for Delray Medical Center?

22 A. That's correct.

23 Q. And have you -- if we turn to page 6 of this
24 document, these are the matters, the topics upon which
25 you are to be giving testimony in your capacity as the

Heather Havericak

CONFIDENTIAL

Page 7

1 corporate representative for Delray Medical Center,
2 correct?

3 A. That's correct.

4 Q. And you've seen this document before, and
5 you're prepared to testify on these topics that we see
6 on page 6, 7 and 8 today?

7 A. That is correct.

8 Q. And to the extent I ask questions today that
9 cover the topics that are on pages 6 through 8, I will
10 assume that your testimony is on behalf of
11 Delray Medical Center if they relate to these topics
12 unless you tell me otherwise.

13 Is that fair?

14 A. That's correct.

15 Q. Have you been deposed before?

16 A. I have.

17 Q. How many times?

18 A. Three.

19 Q. And were they in a personal capacity or in
20 your capacity, your professional capacity?

21 A. In my professional capacity.

22 Q. Were any of those depositions with respect
23 to Delray Medical Center as opposed to Broward where
24 you used to work?

25 A. They were not in connection with

Heather Havericak
September 19, 2025

CONFIDENTIAL

Page 8

1 Delray Medical Center.

2 Q. Okay. Were they in connection with Broward?

3 A. They were.

4 Q. And approximately how long ago were those
5 depositions?

6 A. I can't recall the years of those.
7 Somewhere in the early 2020s.

8 Q. Is it fair to say this is the first
9 deposition that you're giving in a corporate capacity
10 for Delray Medical Center?

11 A. Yes.

12 Q. I just want to go over a few ground rules,
13 but you're probably familiar. The court reporter is
