

IN THE UNITED STATES DISTRICT COURT
FOR THE SOUTHERN DISTRICT OF FLORIDA
WEST PALM BEACH DIVISION

CASE NO. 9:25-CV-80526-DMM

GOOD SAMARITAN MEDICAL
CENTER, INC., et al.,

Plaintiffs,

v.

THE LEAPFROG GROUP,

Defendant.

**DECLARATION OF MARY BETH MALONEY IN SUPPORT OF
THE COMMUNITY HOSPITALS' MOTION FOR SUMMARY JUDGMENT**

I, Mary Beth Maloney, declare and state as follows:

1. I am a partner at the law firm of Gibson, Dunn, & Crutcher LLP. I am an attorney and admitted to practice law in the States of New York and California. I have been granted permission by the Court to participate *pro hac vice* in this case. Dkt. 14. I represent the Community Hospitals in this matter and submit this declaration in support of the Community Hospitals' Motion for Summary Judgment (the "Motion") and Rule 56.1 Statement of Material Facts in Support of the Motion (the "Rule 56.1 Statement") filed contemporaneously herewith.

2. I am over the age of eighteen and make this declaration from personal knowledge based on the information and documents referenced in this Declaration.

3. Below I address the various exhibits identified in the Motion and the Rule 56.1 Statement organized by documents produced in this action by the Community Hospitals (Bates stamp beginning with "PBHN"), the Defendant-Leapfrog (Bates stamp beginning with "LEAPFROG"), University of California, Davis (Bates stamp beginning with "UCDAVISTLG"), Patrick Romano (Bates stamp beginning with "ROMANO"), Cura Strategies (Bates stamp beginning with "CURA"), and Florida Alliance for Healthcare Value (Bates stamp beginning with "FHA") (collectively "Produced Documents"), as set forth at, **I. Produced Documents** (Exs.

1-57); and documents collected from public sources, as set forth at, **II. Publicly Accessible Documents** (Exs. 58-79); and documents that were publicly accessible during discovery, but that Leapfrog has since removed from their website, as set forth at, **III. Leapfrog Website Pages, No Longer Publicly Available** (Exs. 80-83); and transcripts of depositions taken in this case, as set forth at, **IV. Deposition Transcripts** (Exs. 84-98); and interrogatory responses served in this case, as set forth at, **V. Interrogatory Responses** (Exs. 99-103).

I. Produced Documents

4. Attached as **Exhibit 1** is a true and correct copy of a *Journal of Patient Safety* article dated April 1, 2013 titled “Safety in Numbers: The Development of Leapfrog’s Composite Patient Safety Score for U.S. Hospitals,” bearing the Bates stamp LEAPFROG3100665.

5. Attached as **Exhibit 2** is a true and correct copy of Leapfrog’s *Business Development Discovery Report* dated February 13, 2018, bearing the Bates stamp LEAPFROG3477483.

6. Attached as **Exhibit 3** is a true and correct copy of a “white paper” authored by Dr. Matthew Austin and Jordan Derk titled *Lives Lost, Lives Saved: An Updated Comparative Analysis of Avoidable Deaths at Hospitals Graded by The Leapfrog Group*, dated May 2019 (the “Lives Lost White Paper”), bearing the Bates stamp LEAPFROG3553123.

7. Attached as **Exhibit 4** is a true and correct copy of Leapfrog’s *2021 Annual Report*, bearing the Bates stamp LEAPFROG02336712.

8. Attached as **Exhibit 5** is a true and correct copy of an excerpt of an Excel spreadsheet showing Leapfrog “Safety Grades” from 2012 to 2023, bearing the Bates stamp LEAPFROG00139502.

9. Attached as **Exhibit 6** is a true and correct copy of Leapfrog’s *Spring 2023 Hospital Safety Grade Scoring Methodology* dated April 10, 2023, bearing the Bates stamp LEAPFROG00030928.

10. Attached as **Exhibit 7** is a true and correct copy of Leapfrog’s *2024 Regional Leader Communications Toolkit*, bearing the Bates stamp LEAPFROG00140378.

11. Attached as **Exhibit 8** is a true and correct copy of a slideshow presentation authored by Alexandra Campione titled *2023 Leapfrog Hospital Safety Grade Accolades Sales Analysis* dated January 2024, bearing the Bates stamp LEAPFROG01168245.

12. Attached as **Exhibit 9** is a true and correct copy of a slideshow presentation titled *Leapfrog Hospital Safety Grade Expert Panel Meeting* dated April 12, 2024, bearing the Bates stamp LEAPFROG00437363.

13. Attached as **Exhibit 10** is a true and correct copy of a Zoom conference video of the April 12, 2024 Leapfrog Hospital Safety Grade Expert Panel Meeting (“Expert Panel Meeting”), bearing the Bates stamp PBHN000017982. This video will be lodged with the Court pursuant to the Community Hospitals’ forthcoming motion to file a video document.

14. Attached as **Exhibit 11** is a true and correct copy of a Zoom conference transcript of the Expert Panel Meeting, bearing the Bates stamp PBHN000018066.

15. Attached as **Exhibit 12** is a true and correct copy of a certified transcript of the Expert Panel Meeting, bearing the Bates stamp PBHN000017983.

16. Attached as **Exhibit 13** is a true and correct copy of an April 22, 2024 email from Matthew Austin to Alexandra Campione, Melissa Danforth, and Preeti Joshi, bearing the Bates stamp LEAPFROG00198293.

17. Attached as **Exhibit 14** is a true and correct copy of an April 25, 2024 email from Ben Choi to Melissa Danforth bearing the Bates stamp LEAPFROG00198278.

18. Attached as **Exhibit 15** is a true and correct copy of a May 3, 2024 email from Patrick Romano to Brenda L. Inman, Robert Jon Kucejko, Penny Jefferson, and Tami L. Gomez bearing the Bates stamp UCDAVISTLG00000635.

19. Attached as **Exhibit 16** is a true and correct copy of a May 14, 2024 email from Patrick Romano to Matthew Austin, bearing the Bates stamp LEAPFROG00198275.

20. Attached as **Exhibit 17** is a true and correct copy of a May 15, 2024 email from Alexandra Campione to Patrick Romano, bearing the Bates stamp LEAPFROG01081490.

21. Attached as **Exhibit 18** is a true and correct copy of a May 21, 2024 email from Leapfrog Help Desk to Alexandra Campione, bearing the Bates stamp LEAPFROG00439030.

22. Attached as **Exhibit 19** is a true and correct copy of a Leapfrog slideshow presentation titled *Strategic Planning Update for the Board of Directors* dated June 2024, bearing the Bates stamp LEAPFROG00237725.

23. Attached as **Exhibit 20** is a true and correct copy of a June 6, 2024 comment from Alana Noble of Mount Sinai Health System to Leapfrog, bearing the Bates stamp LEAPFROG00044934.

24. Attached as **Exhibit 21** is a true and correct copy of a June 7, 2024 comment from Zubin Momin of Piedmont Healthcare to Leapfrog, bearing the Bates stamp LEAPFROG00044966.

25. Attached as **Exhibit 22** is a true and correct copy of a June 10, 2024 comment from Susan Boardman of Providence System to Leapfrog, bearing the Bates stamp LEAPFROG00045043.

26. Attached as **Exhibit 23** is a true and correct copy of a June 18, 2024 email from Paulina Litter to Alexandra Campione, bearing the Bates stamp LEAPFROG00427863.

27. Attached as **Exhibit 24** is a true and correct copy of an internal draft of Leapfrog's *Final Updates to the Leapfrog Hospital Safety Grade Methodology for Fall 2024*, bearing the Bates stamp LEAPFROG00178628.

28. Attached as **Exhibit 25** is a true and correct copy of Leapfrog's *Consolidated Financial Statements* dated June 30, 2024, bearing the Bates stamp LEAPFROG01059783.

29. Attached as **Exhibit 26** is a true and correct copy of a July 15, 2024 email from Leah Binder to Paul Alper, bearing the Bates stamp LEAPFROG00340327.

30. Attached as **Exhibit 27** is a true and correct copy of an August 27, 2024 email from Karen Jupiter to Melissa Danforth, bearing the Bates stamp LEAPFROG00179185.

31. Attached as **Exhibit 28** is a true and correct copy of Leapfrog's Fall 2024 *Hospital Safety Grade Scoring Methodology* dated November 4, 2024, which was downloaded from the following website: <https://www.hospitalsafetygrade.org/media/file/Safety-Grade-Scoring-Methodology-Fall-2024.pdf>, bearing the Bates stamp PBHN000003044.

32. Attached as **Exhibit 29** is a true and correct copy of a *Dwyer & Michaels* article titled "3 Florida Hospitals Receive F Grades for Patient Safety" dated November 26, 2024, which was downloaded from the following website: <https://97x.com/3-florida-hospitals-receive-f-grades-for-patient-safety/>, bearing the Bates stamp PBHN000002245.

33. Attached as **Exhibit 30** is a true and correct copy of a document titled *Leapfrog Long Range Strategic Intent FY2026-2032* dated December 2024, bearing the Bates stamp LEAPFROG00376926.

34. Attached as **Exhibit 31** is a true and correct copy of a *Stet News* article titled "Tenet hospitals at bottom of local safety grades" dated December 9, 2024, which was downloaded from

the following website: <https://stetnews.org/2024/12/09/tenet-hospitals-at-bottom-of-local-safety-grades/>, bearing the Bates stamp PBHN000002571.

35. Attached as **Exhibit 32** is a true and correct copy of a December 10, 2024 email from Sheri Montgomery to Maggie Gill, bearing the Bates stamp PBHN000005138.

36. Attached as **Exhibit 33** is a true and correct copy of a December 10, 2024 email from Sheri Montgomery to Patrick Franklin and Dennis Grady, bearing the Bates stamp PBHN000005169.

37. Attached as **Exhibit 34** is a true and correct copy of a December 11, 2024 email from Patrick Romano to Bruce Hall, Gregory Maynard, Brenda Inman, and Joseph Galante, bearing the Bates stamp ROMANO0000208.

38. Attached as **Exhibit 35** is a true and correct copy of a December 19, 2024 email from Robert Jon Kucejko to Gregory A. Maynard and Brenda L. Inman, bearing the Bates stamp UCDAVISTLG0005346.

39. Attached as **Exhibit 36** is a true and correct copy of Leapfrog's *2025 Regional Leader Communications Toolkit*, bearing the Bates stamp LEAPFROG00401485.

40. Attached as **Exhibit 37** is a true and correct copy of a *MailOnline* article titled "Every acute care hospital in America RANKED: Our interactive map reveals dangers lurking near you..." dated January 6, 2025, which was downloaded from the following website: <https://www.dailymail.co.uk/health/article-14256459/acute-care-hospital-america-ranked-dangerous-interactive-map.html>, bearing the Bates stamp PBHN000002411.

41. Attached as **Exhibit 38** is a true and correct copy of a January 7, 2025 email from Lisa Cook to Amanda Blanchard, bearing the Bates stamp PBHN000009129.

42. Attached as **Exhibit 39** is a true and correct copy of a *Miami Herald* article titled "What are the best and worst South Florida hospitals for patient safety? See the rankings" dated January 16, 2025, which was downloaded from the following website: <https://www.miamiherald.com/news/health-care/article297048999.html>, bearing the Bates stamp PBHN000002309.

43. Attached as **Exhibit 40** is a true and correct copy of a January 28, 2025 email from Andrea Nunes to Ricardo Ramirez, bearing the Bates stamp PBHN000002103.

44. Attached as **Exhibit 41** is a true and correct copy of a March 11, 2025 email from Jill Berger to Leapfrog's Regional Leaders, bearing the Bates stamp LEAPFROG00173403.

45. Attached as **Exhibit 42** is a true and correct copy of the *Final Stats* for Leapfrog's Spring 2025 Hospital Safety Grade dated March 20, 2025, bearing the Bates stamp LEAPFROG00394765.

46. Attached as **Exhibit 43** is a true and correct copy of a Leapfrog Designated Logo License - Letter of Agreement entered into by The Leapfrog Group and Jupiter Medical Center on March 26, 2025, bearing the Bates stamp LEAPFROG01131281.

47. Attached as **Exhibit 44** is a true and correct copy of Leapfrog's Spring 2025 *Hospital Safety Grade Scoring Methodology* dated April 21, 2025, bearing the Bates stamp LEAPFROG00217511.

48. Attached as **Exhibit 45** is a true and correct copy of the 2025 *Leapfrog Hospital Survey* updated May 2, 2025, which was downloaded from the following website: <https://www.leapfroggroup.org/survey-materials/survey-and-cpoe-materials>, bearing the Bates stamp PBHN000002651.

49. Attached as **Exhibit 46** is a true and correct copy of Leapfrog's *Spring 2025 Hospital Safety Grade Media Coverage Report* dated May 8, 2025, bearing the Bates stamp LEAPFROG00241845.

50. Attached as **Exhibit 47** is a true and correct copy of Leapfrog's *Talking Points for Regional Leaders about Leapfrog Lawsuit* dated May 13, 2025, bearing the Bates stamp LEAPFROG01056115.

51. Attached as **Exhibit 48** is a true and correct copy of the *LFG/CURA Meeting Agenda* for a May 22, 2025 meeting, bearing the Bates stamp CURA_000186.

52. Attached as **Exhibit 49** is a true and correct copy of a May 28, 2025 email from Karen van Caulil to Ashley Tait-Dinger, bearing the Bates stamp FHA0002386.

53. Attached as **Exhibit 50** is a true and correct copy of a June 5, 2025 email from Alexandra Campione to Sarah Farinelli, Lauren Bailey, Nathaniel Longmore, and Karen Jupiter, bearing the Bates stamp LEAPFROG00389130.

54. Attached as **Exhibit 51** is a true and correct copy of a July 10, 2025 TikTok video purporting to identify the five worst hospitals in Florida, which was downloaded from the following website: <https://www.tiktok.com/@usamap55/video/7525460573430107405>, bearing the Bates stamp PBHN000002235, and which was last accessed on October 26, 2025. This video

will be lodged with the Court pursuant to the Community Hospitals' forthcoming motion to file a video document.

55. Attached as **Exhibit 52** is a true and correct copy of a July 15, 2025 letter from Humana Military to West Boca Medical Center, bearing the Bates stamp PBHN000008914.

56. Attached as **Exhibit 53** is a true and correct copy of a July 15, 2025 letter from Humana Military to Delray Medical Center, bearing the Bates stamp PBHN000008915.

57. Attached as **Exhibit 54** is a true and correct copy of Leapfrog's "Leapfrog Hospital Safety Grade" webpage, which was downloaded from the following website: <https://www.leapfroggroup.org/data-users/leapfrog-hospital-safety-grade>, bearing the Bates stamp PBHN000004438, and which was last accessed on August 7, 2025.

58. Attached as **Exhibit 55** is a true and correct copy of a letter from "A Concerned Physician in Boca Raton" to the West Boca Medical Center Hospital Ethics Committee, bearing the Bates stamp PBHN000018127.

59. Attached as **Exhibit 56** is a true and correct copy of a screenshot of the "Search Leapfrog's Hospital and Surgery Ratings" webpage on ratings.leapfroggroup.org, bearing the Bates stamp LEAPFROG00155227.

60. Attached as **Exhibit 57** is a true and correct copy of a *Leapfrog Designated Logo License – Letter of Agreement*, bearing the Bates stamp LEAPFROG00077737.

II. Publicly Accessible Documents

61. Attached as **Exhibit 58** is a true and correct copy of Leapfrog's "About the Leapfrog Group" webpage, which was downloaded from the following website: <https://www.hospitalsafetygrade.org/about-our-movement/about-the-leapfrog-group>, and which was last accessed on October 23, 2025.

62. Attached as **Exhibit 59** is a true and correct copy of Leapfrog's "Frequently Asked Questions About The Leapfrog Hospital Safety Grade" webpage, which was downloaded from the following website: <https://www.hospitalsafetygrade.org/yourhospitals-safety-grade/frequently-asked-questions>, and which was last accessed on October 24, 2025.

63. Attached as **Exhibit 60** is a true and correct copy of Leapfrog's "About the Grade" webpage, which was downloaded from the following website: <https://www.hospitalsafetygrade.org/about-the-grade>, and which was last accessed on October 24, 2025.

64. Attached as **Exhibit 61** is a true and correct copy of Leapfrog's "Why the Hospital Safety Grade Works" webpage, which was downloaded from the following website: <https://www.hospitalsafetygrade.org/why-the-hospital-safety-grade-works>, and which was last accessed on October 24, 2025.

65. Attached as **Exhibit 62** is a true and correct copy of Leapfrog's "Welcome to the 2025 Leapfrog Hospital Survey" webpage, which was downloaded from the following website: <https://www.leapfroggroup.org/survey-materials/survey-login-and-materials>, and which was last accessed on October 24, 2025.

66. Attached as **Exhibit 63** is a true and correct copy of Leapfrog's "How to Use the Grade" webpage, which was downloaded from the following website: <https://www.hospitalsafetygrade.org/how-to-use-the-grade>, and which was last accessed on October 25, 2025.

67. Attached as **Exhibit 64** is a true and correct copy of the "Recent Past Grades" tab from Leapfrog's Spring 2025 Hospital Safety Grade for Delray Medical Center in Delray Beach, Florida, which was downloaded from the following website: <https://www.hospitalsafetygrade.org/h/delray-medical-center>, and which was last accessed on October 25, 2025.

68. Attached as **Exhibit 65** is a true and correct copy of the "Recent Past Grades" tab from Leapfrog's Spring 2025 Hospital Safety Grade for Good Samaritan Medical Center in West Palm Beach, Florida, which was downloaded from the following website: <https://www.hospitalsafetygrade.org/h/good-samaritan-medical-center>, and which was last accessed on October 25, 2025.

69. Attached as **Exhibit 66** is a true and correct copy of the "Recent Past Grades" tab from Leapfrog's Spring 2025 Hospital Safety Grade for Palm Beach Gardens Medical Center in Palm Beach Gardens, Florida, which was downloaded from the following website: <https://www.hospitalsafetygrade.org/h/palm-beach-gardens-medical-center>, and which was last accessed on October 25, 2025.

70. Attached as **Exhibit 67** is a true and correct copy of the "Recent Past Grades" tab from Leapfrog's Spring 2025 Hospital Safety Grade for St. Mary's Medical Center in West Palm Beach, Florida, which was downloaded from the following website:

<https://www.hospitalsafetygrade.org/h/st-marys-medical-center-west-palm-beach-fl>, and which was last accessed on October 25, 2025.

71. Attached as **Exhibit 68** is a true and correct copy of the “Recent Past Grades” tab from Leapfrog’s Spring 2025 Hospital Safety Grade for West Boca Medical Center in Boca Raton, Florida, which was downloaded from the following website: <https://www.hospitalsafetygrade.org/h/west-boca-medical-center>, and which was last accessed on October 25, 2025.

72. Attached as **Exhibit 69** is a true and correct copy of the “Practices to Prevent Errors” and “Doctors order medications through a computer” tabs from Leapfrog’s Spring 2025 Hospital Safety Grade for Delray Medical Center in Delray Beach, Florida, which was downloaded from the following website: <https://www.hospitalsafetygrade.org/h/delray-medical-center>, and which was last accessed on October 26, 2025.

73. Attached as **Exhibit 70** is a true and correct copy of the “Practices to Prevent Errors” and “Doctors order medications through a computer” tabs from Leapfrog’s Spring 2025 Hospital Safety Grade for Good Samaritan Medical Center in West Palm Beach, Florida, which was downloaded from the following website: <https://www.hospitalsafetygrade.org/h/good-samaritan-medical-center>, and which was last accessed on October 26, 2025.

74. Attached as **Exhibit 71** is a true and correct copy of the “Practices to Prevent Errors” and “Doctors order medications through a computer” tabs from Leapfrog’s Spring 2025 Hospital Safety Grade for Palm Beach Gardens Medical Center in Palm Beach Gardens, Florida, which was downloaded from the following website: <https://www.hospitalsafetygrade.org/h/palm-beach-gardens-medical-center>, and which was last accessed on October 26, 2025.

75. Attached as **Exhibit 72** is a true and correct copy of the “Practices to Prevent Errors” and “Doctors order medications through a computer” tabs from Leapfrog’s Spring 2025 Hospital Safety Grade for St. Mary’s Medical Center in West Palm Beach Florida, which was downloaded from the following website: <https://www.hospitalsafetygrade.org/h/st-marys-medical-center-west-palm-beach-fl>, and which was last accessed on October 26, 2025.

76. Attached as **Exhibit 73** is a true and correct copy of the “Practices to Prevent Errors” and “Doctors order medications through a computer” tabs from Leapfrog’s Spring 2025 Hospital Safety Grade for West Boca Medical Center in Boca Raton, Florida, which was

downloaded from the following website: <https://www.hospitalsafetygrade.org/h/west-boca-medical-center>, and which was last accessed on October 26, 2025.

77. Attached as **Exhibit 74** is a true and correct copy of the “Practices to Prevent Errors” and “Communication about discharge” tabs from Leapfrog’s Spring 2025 Hospital Safety Grade for Delray Medical Center in Delray Beach, Florida, which was downloaded from the following website: <https://www.hospitalsafetygrade.org/h/delray-medical-center>, and which was last accessed on October 27, 2025.

78. Attached as **Exhibit 75** is a true and correct copy of the TikTok webpage showing a July 10, 2025 video purporting to identify the five worst hospitals in Florida, which was downloaded from the following website: <https://www.tiktok.com/@usamap55/video/7525460573430107405>, and which was last accessed on October 27, 2025.

79. Attached as **Exhibit 76** is a true and correct copy of a portion of the TikTok webpage showing the user profile for @usamap55 and highlighting the view count of the TikTok video in **Exhibit 75**, which was downloaded from the following website: <https://www.tiktok.com/@usamap55>, and which was last accessed on October 27, 2025.

80. Attached as **Exhibit 77** is a true and correct copy of Leapfrog’s 2022 IRS Form 990, which was downloaded from the following website: https://apps.irs.gov/pub/epostcard/cor/522359517_202206_990_2023060921420569.pdf, and which was last accessed on October 24, 2025.

81. Attached as **Exhibit 78** is a true and correct copy of Leapfrog’s 2023 IRS Form 990, which was downloaded from the following website: https://www.causeiq.com/organizations/view_990/522359517/1f7ecb66b6c6e691ed771e60b7a1f4cd, and which was last accessed on October 24, 2025.

82. Attached as **Exhibit 79** is a true and correct copy of Leapfrog’s 2024 IRS Form 990, which was downloaded from the following website: https://www.causeiq.com/organizations/view_990/522359517/a7a6ff6ae157acaba7c09f82da6adc0d, and which was last accessed on October 24, 2025.

III. Produced Leapfrog Website Pages, No Longer Publicly Available

83. Attached as **Exhibit 80** is a true and correct copy of Leapfrog’s *Expert Panel’s Guiding Principles on the Development of the Composite Leapfrog Hospital Safety Grade for U.S.*

Hospitals (“*Guiding Principles*”), as it appeared on Leapfrog’s Safety Grade website on September 23, 2025, when Gibson Dunn downloaded the document, bearing the Bates stamp PBHN000018048.

84. Attached as **Exhibit 81** is a true and correct copy of the same webpage, as it appeared on October 26, 2025, stating that the *Guiding Principles* is “Not Found.” See https://www.hospitalsafetygrade.org/media/file/Expert_Panel_Guiding_Principles_Nov12_updated.pdf.

85. Attached as **Exhibit 82** is a true and correct copy of Leapfrog’s “Lives Lost and Lives Saved” webpage as it appeared on Leapfrog’s Safety Grade website on August 19, 2025, displaying a hyperlink entitled “view the full white paper.” See <https://web.archive.org/web/20250819112415/https://www.hospitalsafetygrade.org/LivesLost> (with underlined hyperlink). That hyperlink opens the Lives Lost White Paper. See **Exhibit 3**, *supra* ¶ 6.

86. Attached as **Exhibit 83** is a true and correct copy of the “Lives Lost and Lives Saved” webpage on Leapfrog’s website, as it appeared on October 26, 2025, showing the Lives Lost White Paper. The hyperlink at “view the full white paper” had been removed (without any underlined hyperlink).¹

IV. Deposition Transcripts

87. Attached as **Exhibit 84** is a true and correct copy of the transcript of the deposition of Dr. Matthew Austin, principal investigator on Leapfrog’s contract with Johns Hopkins University’s Armstrong Institute for Patient Safety and Quality, taken in the above-captioned action on September 25, 2025. The transcript attached hereto incorporates minimal redactions at the request of the witness’s counsel, none of which appear on pages cited by the Community Hospitals in support of their motion or Rule 56.1 statement.

88. Attached as **Exhibit 85** is a true and correct copy of the transcript of the deposition of Lauren Bailey, Leapfrog’s Director of Communications, taken in the above-captioned action on September 10, 2025.

¹ As of filing, a new hyperlink has been embedded in “view the full white paper” that opens an older, 2016 version of the Lives Lost White Paper. See <https://www.hospitalsafetygrade.org/yourhospitals-safety-grade/LivesLost> (with underlined hyperlink).

89. Attached as **Exhibit 86** is a true and correct copy of the transcript of the deposition of Kushagra Banerjee, Leapfrog's Director of Licensing Programs, taken in the above-captioned action on September 16, 2025.

90. Attached as **Exhibit 87** is a true and correct copy of the transcript of the deposition of Leah Binder, Leapfrog's Chief Executive Officer, taken in the above-captioned action on September 22, 2025.

91. Attached as **Exhibit 88** is a true and correct copy of the transcript of the deposition of Alexandra Campione, Leapfrog's Program Manager, taken in the above-captioned action on September 12, 2025.

92. Attached as **Exhibit 89** is a true and correct copy of the transcript of the deposition of Dr. Karen van Caulil, Chief Executive Officer and President of Florida Alliance for Healthcare Value, taken in the above-captioned action on September 25, 2025.

93. Attached as **Exhibit 90** is a true and correct copy of the transcript of the deposition of Erik Cazares, Chief Executive Officer of Palm Beach Gardens Community Hospital, Inc., taken in the above-captioned action on September 24, 2025.

94. Attached as **Exhibit 91** is a true and correct copy of the transcript of the Deposition of Melissa Danforth, Leapfrog's Senior Vice President of Healthcare Ratings, taken in the above-captioned action on September 18, 2025.

95. Attached as **Exhibit 92** is a true and correct copy of the transcript of the Deposition of Jerad Hanlon, Chief Executive Officer of West Boca Medical Center, Inc., taken in the above-captioned action on September 23, 2025.

96. Attached as **Exhibit 93** is a true and correct copy of the transcript of the Deposition of Heather Havericak, Chief Executive Officer of Delray Medical Center, Inc., taken in the above-captioned action on September 19, 2025.

97. Attached as **Exhibit 94** is a true and correct copy of the transcript of the Deposition of Karen Jupiter, Leapfrog's Vice President of Development, taken in the above-captioned action on September 5, 2025.

Safety in Numbers: The Development of Leapfrog's Composite Patient Safety Score for U.S. Hospitals

J. Matthew Austin, PhD¹, Guy D'Andrea, MBA², John D. Birkmeyer, MD³, Lucian L. Leape, MD⁴, Arnold Milstein, MD⁵, Peter J. Pronovost, MD, PhD⁶, Patrick S. Romano, MD⁷, Sara J. Singer, MBA, PhD⁸, Timothy J. Vogus, PhD⁹, and Robert M. Wachter, MD¹⁰

Objective: To develop a composite patient safety score that provides patients, health care providers, and health care purchasers with a standardized method to evaluate patient safety in general acute care hospitals in the United States.

Methods: The Leapfrog Group sought guidance from a panel of national patient safety experts to develop the composite score. Candidate patient safety performance measures for inclusion in the score were identified from publicly-reported national sources. Hospital performance on each measure was converted into a 'z-score' and then aggregated using measure-specific weights. A reference mean score was set at three, with scores interpreted in terms of standard deviations above or below the mean, with above reflecting better than average performance.

Results: Twenty-six measures were included in the score. The mean composite score for 2,652 general acute care hospitals in the U.S. was 2.97 (range by hospital, 0.46 to 3.94). Safety scores were slightly lower for hospitals that were publicly owned, rural in location, or that had a larger percentage of patients with Medicaid as their primary insurance.

Conclusions: The Leapfrog patient safety composite provides a standardized method to evaluate patient safety in general acute care hospitals in the United States. While constrained by available data and publicly reported scores on patient safety measures, the composite score reflects the best available evidence regarding a hospital's efforts and outcomes in patient safety. Additional analyses are needed, but the score did not appear to have a strong bias against hospitals with specific characteristics. The composite score will continue to be refined over time as measures of patient safety evolve.

Key words: patient safety, hospital, performance measures, composite, score

Despite the hundreds of thousands of patients who suffer preventable harm each year in US hospitals,[1] patients, health care providers, and health care purchasers lack a standardized method to evaluate patient safety in US hospitals. This lack of standardized evaluation is especially concerning given recent evidence that many US hospitals have made small incremental improvements in safety or continue to harm patients in large numbers.[2,3,4,5] While the number of publicly-reported patient safety measures has grown over the last decade,[6,7] there is little evidence that patients and providers are using these data to inform their choice of hospital.[8,9] One possible explanation for the lack of use is that safety data have typically been reported on a measure-by measure basis, requiring patients and providers to synthesize many disparate data points in their decision making process.

Composite measures, which combine multiple performance measures using a pre-determined weighting methodology to produce a single score, provide a more general picture of the safety performance of a hospital, making it more understandable and usable for non-medical personnel.[10] However, while composite measures are easier for patients to understand, they can mask a hospital's excellent or poor performance on individual measures. Additionally, the pre-determined weights assigned to each measure may not reflect the preferences of individual patients.[11] Nevertheless, the potential to motivate patient and provider response, and thereby improve patient utility, makes it worthwhile to develop a composite measure of hospital patient safety.

The Leapfrog Group, a national coalition of health care purchasers, sought to address the need for a standardized method for evaluating patient safety in US hospitals by creating a composite safety score. The primary goal was a single, publicly available safety score

for every US hospital, including hospitals that do and do not voluntarily participate in the Leapfrog Hospital Survey. Other national organizations, such as Consumer Reports and US News & World Report, have developed their own composite measures of hospital performance. These organizations, however, have taken quite different approaches to constructing composites. US News relies heavily on reputational surveys and focuses on major academic medical centers and large sized hospitals, whereas Consumer Reports relies heavily on patient experience surveys and readmission rates that favor small to-medium sized community hospitals.[12,13,14] Leapfrog's goal was to balance many different measures of structures, processes, and outcomes that have been linked to patient safety, but which may or may not be related to each other, in order to improve patient and clinician selection of hospitals and to more strongly motivate and better target hospital safety improvement efforts.

The purpose of this paper is to describe the methods used to develop the composite score and to demonstrate its use with recent national data. The Leapfrog Group's Board of Directors has used the composite safety score to assign a letter grade to each hospital. This application of the composite score is beyond the scope of this paper.

METHODS

The Leapfrog Group invited nine national experts to serve on a panel to develop a composite score to evaluate patient safety in US hospitals (see side-bar for the list of panelists.) The work was done in late 2011 and involved defining a conceptual framework for the score, assigning relative weights to each measure, standardizing scores across different measure types, and identifying methods for dealing with missing data.

Defining a Conceptual Framework for the Score

Initially, the panel discussed what the composite score should be designed to measure, and the consensus was patient safety, defined as "freedom from harm." The panel agreed that this focus, which aligns with the Institute of Medicine's improvement aim of 'safe' care, was narrower than hospital quality.

One goal was to develop a composite score suitable for assessing the largest number of general acute care hospitals across the country. Thus, the panel recommended that Leapfrog include publicly-reported measures from national data sources in the score. The panel excluded state-reported and regionally-reported measures because of variations in measure specifications, data collection, and availability that would prevent a consistent comparison across hospitals. Leapfrog staff (JMA, GD) scanned publicly-reported patient safety measures from the Centers for Medicare & Medicaid Services (CMS), The Joint Commission, The Leapfrog

Group, and The Commonwealth Fund to compile a list of candidate measures for the expert panel to review and consider for inclusion in the composite score. Forty-five candidate measures, representing a mix of structural, process, and outcome measures were identified for review.

Members of Safety Score Expert Panel

- John Birkmeyer, MD (University of Michigan)
- Ashish Jha, MD, MPH (Harvard University)
- Lucian Leape, MD (Harvard University)
- Arnold Milstein, MD, MPH (Stanford University)
- Peter Pronovost, MD, PhD (Johns Hopkins University)
- Patrick Romano, MD, MPH (University of California, Davis)
- Sara Singer, MBA, PhD (Harvard University)
- Timothy Vogus, PhD (Vanderbilt University)
- Robert Wachter, MD (University of California, San Francisco)

The panel debated whether the safety score should recognize hospital efforts toward patient safety (process and structural measures), achievements in patient safety (outcome measures), or both. Process and structural measures signal what hospitals have done to improve safety (e.g., adopting specified protocols to reduce infections, implement computerized order entry) and fill gaps where valid outcome data are not yet available. However, outcome measures (e.g., infection rates) reflect whether a hospital has actually achieved safety goals. The panel ultimately recommended that process/structural measures and outcome measures carry equal weights of 50% in the composite score, but recognized that this choice was arbitrary and should be reevaluated periodically as new outcome measures become available to capture the impact of safety-enhancing activities that are currently represented by structure and process measures.

The expert panel reviewed the candidate measures and selected the final set through a process of discussion and repeated voting to maximize consensus. The panel eliminated measures that were not clear safety measures, measures supported by weak research evidence, and process measures with a corresponding outcome measure that better represents patient utility. Table 1 provides the final list of 26 measures included in the composite score.

Weighting the Individual Measures

The expert panel next developed a framework to assign relative weights to each measure using three criteria: strength of evidence, opportunity for improvement, and impact. These criteria track closely with criteria used by the National Quality Forum in its Consensus Development Process for measure endorsement.[15]

These criteria were defined as follows:

- **Strength of Evidence.** Measures with stronger research evidence carry higher weight than measures with weaker evidence. Since the measures selected for the composite score already met high standards of research evidence, any variation in strength of the evidence was assessed using the following scoring method:
 - 1 = Supported by either suggestive clinical or epidemiological studies or theoretical rationale
 - 2 = Supported by experimental, clinical, or epidemiological studies and strong theoretical rationale
- **Opportunity for Improvement.** The panel agreed that measures with greater variation in hospital performance are more valuable for decision-making, because there is greater opportunity for performance improvement. For each measure, the coefficient of variation (standard deviation/mean) was calculated using the measure's national performance data.[16] The coefficient of variation was then converted into an opportunity score by adding 1.0 to the coefficient of variation, capping the maximum score at 3.0 to limit distortions in the final weights that could result from very high coefficients of variation. Thus, the opportunity scores ranged from 1.0 to 3.0, with higher values denoting greater variation and more opportunity for improvement.
- **Impact.** Some measures affect a greater percentage of patients than others. For example, computerized medication orders are applicable to nearly every patient in the hospital, while an intensivist manages only patients in the intensive care unit (ICU). Some measures are associated with clinical events that indicate greater severity of harm (e.g., mortality or serious morbidity). Therefore, impact reflects both the number of patients possibly affected by the event and the severity of harm for individual patients. We defined and scored the dimensions as follows:
 - Number of patients possibly affected by the event:
 - 1 = Rare event (e.g., foreign object retained after surgery)
 - 2 = Some patients in hospital affected (e.g., ICU physician staffing)
 - 3 = All patients in hospital affected (e.g., hand hygiene safe practice)
 - Severity of harm for individual patients:
 - 1 = Limited direct evidence of harm or harm reduction (e.g., culture measurement safe practice)

2 = Clear documentation of harm or harm reduction; adverse events (e.g., foreign object retained after surgery)

3 = Significant mortality reduction (> 1,000 deaths across the US annually, or a 10% reduction in hospital-wide mortality) (e.g., ICU physician staffing)

The values from each dimension were added together and an overall Impact Score given as follows:

1 = Summed value of 2 (Low Impact)

2 = Summed value of 3-4 (Medium Impact)

3 = Summed value of 5-6 (High Impact)

Through an iterative process, the panel reviewed different schemes to assign weights until they reached consensus on a scheme that seemed fair, simple, and intuitively sound. The panel chose a calculation that emphasized the opportunity and the impact of each measure because all selected measures already met a high standard of evidence. Each measure received an overall weight score as follows:

Weight Score = Evidence + (Opportunity × Impact)

The possible weight score for each measure ranged between 2 and 11. By design, this wide scoring range provided substantial differences in weights across measures so that more informative, higher impact measures had a stronger influence on the overall composite score.

In the final stage of the weighting process, each measure's weight score was converted to a percentage weight. To ensure equal overall weights for the process/structural domain and the outcomes domain, we divided the weight score for each measure by the sum of all of the weight scores from measures in that domain and then multiplied by 50%.

Standardizing Scores Across Disparate Measures

One challenge in creating the composite score was combining measures that were expressed in different ways. Some measures were expressed as a point system (the hospital earned x points out of a possible y points), while other measures were expressed as proportions or rates (x occurrences out of a relevant population of y patients).

The panelists agreed that the scores had to be standardized to ensure the measure weights are the primary driver of the composite score and the measure values do not distort the score. Three approaches were considered for standardizing scores: 1) assign points based on a provider's performance relative to the mean or median; 2) assign a score based on the provider's ranking - expressed as simple percentile or categorical value (e.g., quartiles); or 3) divide the difference in the hospital's score from the national mean by the standard deviation.

The panel recommended option three to standardize a hospital's performance on each measure. This option is often called a z-score and is based on the following equation that expresses the hospital's performance as a number of standard deviations from the national mean:

$$\text{Hospital's Z-Score} = \frac{(\text{Hospital's Measure Performance} - \text{Mean Performance for All Hospitals})}{\div \text{Standard Deviation for All Hospitals}}$$

Hospitals that perform close to the national mean earn a z-score near zero. Better hospitals earn a positive z-score, reflecting measure values above the national mean. Worse hospitals earn a negative z-score, reflecting measure values below the national mean.

The z-score allowed us to compare and combine individual scores from different types of data. Besides being simple to understand and explain, a z-score has precedent in health care measurement. It has been used in the Multiple Sclerosis Functional Composite, which is a measure of disability in patients with Multiple Sclerosis (MS).[17] Research has shown that the z-score method produces results comparable to alternative rescaling approaches.[18,19] One potential disadvantage of the z-score, or any rescaling approach, is the exaggeration of clinically meaningless differences when measures have a small standard deviation; this problem was minimized by giving more weight to measures with higher coefficients of variation, as described above.

Dealing with Missing Data

Although the expert panel selected nationally-reported measures, some data were missing for hospitals that did not report to The Leapfrog Group and other data were missing because hospitals did not meet the CMS's minimum sample size requirements to publicly report their results.

The panelists discussed several possible approaches for assessing hospital performance when data were missing, including:

1. Impute the hospital's performance at the national median/mean.
2. Impute the hospital's performance on the missing measures using other available data.
3. Impute a score above or below the median/mean (e.g., -1 standard deviation).
4. Give the hospital zero credit for the measure (e.g., when the hospital chose not to report data to Leapfrog).
5. Exclude the measure and re-calibrate the weights for the affected hospital(s), using only those measures for which data are available.

After conducting sensitivity analyses using each of the above approaches, the panel recommended approach number five to address missing data (excluding the measure for a hospital and re-calibrating the weights for those measures for which performance data were

available) for most measures. In this way, we avoided making questionable assumptions about the performance of hospitals with missing data and we also maintained variation in the final calculated scores by not imputing identical values for all missing observations. Second, with the two exceptions described in the next paragraph, imputation using other variables was deemed inappropriate, as hospital scores on one measure did not predict performance on other measures. Finally, the third and fourth approaches were rejected to avoid creating a structural bias in favor of Leapfrog-reporting hospitals. By scoring hospitals on the available data, the composite scores were based on what was known about the hospital's performance, with no penalties for missing data.

Imputation using alternative data was used for two Leapfrog survey-based measures. Data on Computerized Physician Order Entry (CPOE) and ICU Physician Staffing (IPS) from the American Hospital Association's (AHA) annual survey were used to impute measure scores for hospitals that did not respond to the Leapfrog Hospital Survey. The AHA survey does not collect the same level of detail as the Leapfrog Hospital Survey. Thus, for this first round of scores, hospitals were given a score that was equivalent to what they would have earned had they reported that same limited data to the Leapfrog Hospital Survey. After considerable feedback on the initial imputation approach, the panel conducted additional analyses using data for hospitals that had reported to both data sets and has since revised the imputation method to better reflect an 'expected' value concept. With this change, a hospital's imputed value now reflects an empirically estimated probability of the hospital scoring in each Leapfrog category given their AHA response.

Scores could not be calculated for certain types of hospitals because of the systemic lack of publicly-reported safety data; these include:

- Critical access hospitals (CAH)
- Long-term care facilities
- Mental health facilities
- Federal hospitals (e.g., Veterans Affairs, Indian Health Services)
- Specialty hospitals, including surgical centers and cancer hospitals
- Free-standing pediatric hospitals
- Hospitals located in U.S. territories (e.g., Puerto Rico, Guam)
- Hospitals in Maryland, since they did not report data through CMS's Inpatient Prospective Payment System (IPPS)

In addition, some hospitals had so much missing data that the panel determined it was not possible to reliably calculate a safety score. Hospitals missing more than 9 of 15 process/structural measures or more than 3 of 11 outcome measures were not scored; 605 hospitals were excluded from our analysis for having too little available data. These minimum measure thresholds were chosen to

balance the reliability of the calculated score with the number of hospitals receiving a score.

Final Scoring

A composite safety score for each hospital was calculated by multiplying the weight for each measure by the hospital's z-score on that measure. We added 3 to each hospital's final score to avoid possible confusion with interpreting negative patient safety scores. The final calculation of the safety score was as follows:

$$\text{Safety Score} = 3 + \text{Weight}_{\text{Measure1}} \times \text{Z-Score}_{\text{Measure1}} + \text{Weight}_{\text{Measure2}} \times \text{Z-Score}_{\text{Measure2}} + \text{Weight}_{\text{Measure3}} \times \text{Z-Score}_{\text{Measure3}} + \dots + \text{Weight}_{\text{Measure n}} \times \text{Z-Score}_{\text{Measure n}}$$

In April 2012, Leapfrog applied the final scoring methodology to the most recent available data.ⁱ

Data Analysis

To better understand the associations between calculated composite scores and hospital characteristics, descriptive statistics of the composite safety scores were calculated by characteristic (Table 2). A p-value from a one-way ANOVA was calculated for each characteristic. For each characteristic, the p-value was less than the critical value of 0.05, indicating that the subgroup scores within each characteristic are not all the same.

In addition, we compared the safety of the 605 unscored hospitals to the scored hospitals by calculating the average performance of each group on the structural/process measures and the outcome measures.

RESULTS

Composite safety scores were calculated for 2,652 general acute care hospitals; 605 hospitals were excluded due to excessive missing data. The final composite safety scores for hospitals ranged from 0.46 to 3.94 (Figure 1). For interpretation, the top score of 3.94 represents a hospital that averages almost 1.0 standard deviation above (better than) the national mean across all measures for which data were available. The bottom score of 0.46 represents a hospital that averages almost 2.5 standard deviations below (worse than) the national mean for all measures for which data were available.

Figure 1. Distribution of Composite Hospital Safety Scores.

Figure 1 illustrates the distribution of composite safety scores for the 2,652 general care acute hospitals. The scores range from 0.46 to 3.94. Scores were calculated by multiplying the weight for each measure by the hospital's z-score on the measure. Three was added to each hospital's final score to avoid possible confusion with interpreting negative patient safety scores.

The range of safety scores for hospitals with a large number of measures that were not reported or were not availableⁱⁱ was similar to those hospitals for which data were available for most measures (0.46-3.82 vs. 1.72-3.93), reflecting poor and excellent performance in both subgroups. However, the scores for hospitals with a large number of missing measures did cluster more toward the middle than those hospitals for which data were available for most measures (standard deviation of scores: 0.29 vs. 0.32). Of the 605 hospitals that were not scored due to excessive missing data, their performance averaged 3% worse on those structural/process measures for which data were available and 11% better on those outcome measures for which data were available (listed in Table 1) than the hospitals that received a score. The unscored hospitals were 1% to 73% better on hospital-acquired conditions than the scored hospitals.

Composite Scores by Hospital Characteristic

Table 2 describes the mean composite safety score by hospital characteristic. Hospitals in the Midwest and Northeast had higher mean composite scores than hospitals in the South and West ($p = 0.001$). Publicly owned hospitals had lower mean composite scores than either for-profit or private non-profit hospitals ($p = 0.000$). Rural hospitals had lower mean composite scores than their urban counterparts ($p = 0.047$). Mean composite

ⁱ The reporting time periods from each data source used to calculate a hospital's score were: 2011 Leapfrog Hospital Survey (Apr 2011 – Mar 2012); CMS Hospital Compare SCIP process measures (Apr 2010 – Mar 2011); CMS Hospital Compare No-Pay Events and AHRQ PSIs (Oct 2008 – Jun 2010); CMS Hospital Compare CLABSI rates (2006-2008); AHA Annual Survey (Jan 2010 – Dec 2010).

ⁱⁱ 'Large number' of missing measures is defined as eight or more missing process/structural measures. Most of the measures in which data were not reported or not available were those reported through voluntary data sources and are almost exclusively in the process/structural domain. Hospitals with eight or more missing process/structural measures are generally hospitals that choose not to report to the Safe Practices section of the Leapfrog Hospital Survey.

scores were lower for hospitals with the largest percentage of patients with Medicaid as the primary payer ($p = 0.000$). The teaching status of the hospital did not appear to be correlated with a hospital's composite score, as the mean composite scores for all teaching statuses were quite similar ($p = 0.043$). Also, the mean composite scores did not vary substantially by the percentage of patients with Medicare as the primary payer ($p = 0.000$).

Table 3 shows the total number of hospitals and the mean composite score for hospitals in each state. Hospitals in Massachusetts had the highest mean score (3.33) and those in Alabama had the lowest mean score (2.78). There was a 0.55 difference in mean scores between Massachusetts and Alabama, representing a spread of about 1.75 standard deviations.

Discussion

The Leapfrog patient safety composite provides a standardized method to evaluate overall patient safety in those US acute care hospitals that have publicly reported data on a sufficient number of individual safety measures. The composite score could be estimated for 2,652 hospitals using a methodology that is transparent, reproducible, and has face validity, as determined by the national expert panel that guided its development.

The reporting of the composite safety score can serve multiple functions. First, it could raise consumer awareness about patient safety in hospitals and prompt patients to engage their providers in discussing variations in safety across hospitals. Second, by serving as a national reference point, it could encourage improvement efforts and assist hospital leaders in identifying and improving drivers of safety and quality.[20] Third, the score could be used by purchasers and payers to set minimum performance thresholds for inclusion in provider networks or recognizing and rewarding performance through value-based purchasing (VBP) initiatives. One example of a payer using a composite measure is CMS, which plans to use the Agency for Healthcare Research and Quality's patient safety indicator (PSI) composite measure (PSI 90) in its 2015 Inpatient Prospective Payment System VBP program.[21]

A strength of the composite patient safety score is the inclusion of measures that reflect both a hospital's efforts toward safety (process and structural measures) and its safety-related results (outcome measures). Another strength of the score was the minimal bias from individual hospital characteristics. Hospitals that were publicly-owned, rural, not part of a larger health system, or had a larger number of patients with Medicaid as their primary insurance did have slightly lower mean composite scores compared to their counterparts; however, many hospitals within these subgroups outperformed hospitals that did not share these characteristics.

There are several limitations to this composite score. The main limitation is the small pool of publicly reported national measures available to assess hospital safety, which resulted in composite scores that only cover a subset of patient safety. The publicly-reported scores are also limited by a relatively small number of valid outcome measures and by flaws in measures derived from administrative rather than clinical data. Some elements of the score come from voluntary hospital surveys. Voluntary reporting may be a limitation to the extent that hospitals differently interpret the survey questions or report inaccurately. This concern is somewhat mitigated by having hospital senior executives affirm the accuracy of their survey responses and having the reporting organizations critically review submitted responses. In addition, our decision to exclude a measure to address missing data may have overstated or understated a hospital's safety performance, depending on how the hospital performed on the measures that remained. Finally, due to the limited reporting of the data underlying each measure (i.e., the numerators and denominators), the weights in the composite score could not be reliability adjusted for the 'signal' of each measure, a practice commonly used in other composite scores.[22,23]

Future research should examine the relationship between hospitals' composite scores and outcomes, specifically risk-adjusted mortality, readmission rates, and infection rates. Although previous studies did not find any relationship between hospitals' mortality rates and their Leapfrog National Quality Forum Safe Practices Scores[24,25] future research should examine whether the Leapfrog composite score, which includes non-mortality outcome measures plus structural and process measures, is a better correlate of patient mortality than previously developed safety composites. It would also be worthwhile comparing hospitals' performance on the Leapfrog patient safety composite score with performance on other safety composite scores.

Those involved in developing the Leapfrog composite score believe it reflects the best patient safety measures and data currently available for a large number of US hospitals. Nonetheless, two challenges we faced in developing a score were the small number of safety measures that are publicly reported at a national level and deficiencies with many of the existing measures. These problems could be addressed with a more formal mechanism to support and encourage the development of robust patient safety measures. The authors hope that this paper will catalyze the entire health care community – patients, providers, purchasers, and policymakers – to work together to develop better and more meaningful patient safety measures and to publicly report those data nationally. As new measures become available, the panel is committed to revisiting the measures and weights that comprise the composite score.

1
2 **Table 1.** List of Measures Included in Composite Safety Score.

Measure	Primary Data Source (Secondary Data Source, if applicable)	Evidence Score ^a	Opportunity Score ^b	Impact Score ^c	Relative Weight (%)
Process and Structural Measures					
Computerized Physician Order Entry (CPOE)	Leapfrog Hospital Survey (AHA Annual Survey)	2	3.00	3	7.7
ICU Physician Staffing (IPS)	Leapfrog Hospital Survey (AHA Annual Survey)	2	2.89	3	7.5
Safe Practice 1: Leadership Structures and Systems	Leapfrog Hospital Survey	1	1.16	2	2.3
Safe Practice 2: Culture Measurement	Leapfrog Hospital Survey	1	1.32	2	2.5
Safe Practice 3: Teamwork Training and Skill Building	Leapfrog Hospital Survey	1	1.36	2	2.6
Safe Practice 4: Identification and Mitigation of Risks and Hazards	Leapfrog Hospital Survey	1	1.22	2	2.4
Safe Practice 9: Nursing Workforce	Leapfrog Hospital Survey	1	1.25	3	3.3
Safe Practice 17: Medication Reconciliation	Leapfrog Hospital Survey	1	1.19	2	2.4
Safe Practice 19: Hand Hygiene	Leapfrog Hospital Survey	2	1.21	2	3.1
Safe Practice 23: Care of the Ventilated Patient	Leapfrog Hospital Survey	1	1.23	2	2.4
SCIP INF 1: Antibiotic within 1 Hour	CMS Hospital Compare	2	1.05	2	2.9
SCIP INF 2: Antibiotic Selection	CMS Hospital Compare	1	1.04	2	2.2
SCIP INF 3: Antibiotic Discontinued After 24 Hours	CMS Hospital Compare	1	1.06	2	2.2
SCIP INF 9: Catheter Removal	CMS Hospital Compare	2	1.12	2	3.0

Measure	Primary Data Source (Secondary Data Source, if applicable)	Evidence Score ^a	Opportunity Score ^b	Impact Score ^c	Relative Weight (%)
SCIP VTE 2: VTE Prophylaxis	CMS Hospital Compare	2	1.09	3	3.7
Outcome Measures					
Foreign Object Retained	CMS Hospital Compare	1	3.00	2	5.6
Air Embolism	CMS Hospital Compare	1	3.00	2	5.6

Acknowledgments

The authors wish to thank Ashish Jha, MD, MPH for his leadership and contributions in helping guide the development of the composite score. We also would like to acknowledge Leah Binder, MA, MGA and Missy Danforth, BA from The Leapfrog Group, Barbara Rudolph, PhD, MSSW from the University of Wisconsin - Madison, and Morgan Fishbein, MBA from Discern Consulting, LLC for their leadership in the actual implementation of the composite scoring methodology. We also wish to thank Sidney Le, BS from the Harvard School of Public Health for his assistance with data analysis. We also thank Christine G. Holzmüller, BLA from the Johns Hopkins University Department of Anesthesiology and Critical Care Medicine, for her thoughtful review and editing of this paper.

April 1, 2013

Dear Healthcare Leader:

We are delighted to announce that the *Journal of Patient Safety* has graciously given us permission to distribute copies of recently published articles to you in the interest of helping you adopt the National Quality Forum Safe Practices for Better Healthcare – 2009 Update and 2010 Update.

The *Journal of Patient Safety* is dedicated to presenting research advances and field applications in every area of patient safety and we give our highest recommendation for them as a valuable resource toward patient safety from hospital bedside to boardroom. It is in the fulfillment of this mission that they make the gift of these articles to you in your pursuit of your quality journey.

The home page of the *Journal of Patient Safety* can be accessed at the following link: <http://journals.lww.com/journalpatientsafety/pages/default.aspx> and subscription information can be directly accessed online at: <http://journals.lww.com/journalpatientsafety/layouts/1033/oaks.journals/subscriptionseries.aspx>.

We want to acknowledge you and your institution for your current efforts in patient safety. We hope you enjoy this article and find it useful in your future work.

Sincerely,

Charles R. Denham, M.D.
Chairman

Exhibit 2

Business Development Discovery Report

Prepared by:
Stephen Gaus
February 13, 2018

The scope of this document is to report on my assessment of The Leapfrog Group's current state and the opportunity to monetize its IP (Intellectual Property) to sustain current transparency reporting on U.S. Healthcare's Safety & Quality of Care for Acute Care Hospitals. Additional items addressed are from MBO's identified in Leah Binder's offer & assignment letter of 11/2/2017.

Hospital Survey participation:

The participation rate by acute care hospitals continues to grow and currently 66% of representative beds in the US participate in The Leapfrog Group's annual survey.

The partnership with Regional Leaders and Coalitions combined with leverage by key Health Insurance Plans has helped to increase the participation to current levels.

To maximize the value of The Leapfrog Group's Data for licensing purposes the level of participation should continue to be increased so it can be perceived as the most complete data set and thus allowing defense of our pricing model and its price points.

Key States to benchmark are:

✓ California	71%
✓ Florida	66%
✓ Illinois	52%
✓ Massachusetts	86%
✓ New Jersey	93%
✓ North Carolina	76%
✓ Tennessee	52%
✓ Texas	62%
✓ Virginia	67%

Key States to Target:

Colorado	44%	Missouri	39%
Georgia	48%	New York	40%
Indiana	21%	Ohio	38%
Maryland	17%	Pennsylvania	47%
Michigan	48%	Wisconsin	6%
Minnesota	4%	Washington DC	38%

The aforementioned states and highlighted map identifies 12 states representing 30% of the US population that all have Hospital Survey participation rates below 50%.

Leapfrog should conduct an exercise to identify the key success factors for more desirable participation inherent in the Top Benchmarking States. We can then prepare a plan & roadmap for the Targeted States to achieve > 50% participation in the hospital survey.

A secondary business development activity could be to produce strategies & tactical plans to improve the participation levels from the ranges of 50-70% to greater than 80%.

Leapfrog should review our current roster of Regional Leaders and/or Coalitions in these "Targeted States" and determine a classification as follows:

M - Meets Expectations & Standards

N - Needs a Regional Leader or Coalition

IR - Needs Improvement or Replacement

Lastly some consideration should be given to potential business development initiatives to gain participation by VA and Military Hospitals in the DHA.

To increase the value of Leapfrog's Data:

Various U.S. industry and enterprises are all leveraging "Big Data" to make better informed decisions. Healthcare may have been a laggard in this adoption curve but we can expect acceleration and we should look to the recent announcement of a new venture by Amazon, JP Morgan & Berkshire Hathaway as a bellwether event. This newly created venture's goal is to impact the cost curve of purchased healthcare by its employees through the use of technology & consumerism.

Healthcare Informatics, Technology and Analytics have entered into a new phase. The next phase will be dominated by leveraging "Big Data" to not only improve clinical diagnostics and care delivery but to also achieve better financial outcomes for the purchasers.

This transition from volumes based model to a value based model is a vitally important initiative for the U.S. The growing cost of Healthcare not only risks American Industry's competitive position in the world economy and it also has implications from a National Security perspective.

There are many key drivers that include the now near full adoption & deployment of E.H.R. systems, increased utilization of Population Health Management Software and recent programs by CMS and Health Insurance Plans to modify reimbursements and to incentivize value in both safety & quality of care.

Leapfrog operates in a cluttered space of Hospital reporting both mandatory and voluntary. The perceived or actual value of the Leapfrog Survey Data can increased be through a number of means and areas.

First Leapfrog can help to increase the perceived value of its survey data by improving on the "messaging" of the science behind the survey, the domains, the elements and its scoring methodologies.

A presentation, collateral marketing brochure and a podcast for inclusion on the Leapfrog Websites should be prepared. The primary intended audience should be potential data licensees who might be looking into the value differentiators and trying to choose the most current data set with the most compete measures that are compiled in an accurate and fair representation or the proverbial "most bang for the buck".

Secondly Leapfrog can continue to sustain its reputation & relevance by making continuous improvements to its survey and process through the means that have been demonstrated through its history. The current modifications planned for 2018 are indicative of this culture of continuous improvement & greater relevancy.

Thirdly Leapfrog can increase both the perceived and actual value of the data by collecting more relevant data that is needed and desired by Purchasers. Including Data from Ambulatory Surgery Centers is a prime example of this expanded data set. Outpatient Surgery is an increasing expenditure for Health Care Purchasers and as such a logical product line extension for Leapfrog to add to the Data License offerings.

Lastly although Healthcare expenditures by Purchasers is financially dominated by care provided in the Acute Care, Ambulatory or Outpatient Surgical Centers there is a growing need and desire for a scoring or rating system for primary care providers. Leapfrog might consider some form of a strategic partnership with an organization that could offer such a tangential or complimentary set of data on providers.

Sales Coverage, Market Segmentation & Increased Market Penetration

Currently Leapfrog identifies 17 unique data license customers covering over 154M lives from our data license contracts.

Of those 17 customers; Leapfrog employs 6 resellers. Currently Leapfrog counts 10 Health Insurance Plan customers of which two have licensed the Value Based Purchasing Program.

The current stream of Data License Contract Revenues total \$1.511M. The breakdown of revenues is: \$818K for Survey Data, \$293K for Safety Grade Data and \$400K for VBP Program. The primary end user customers for our Data License Products are HIPs (Health Insurance Providers).

No direct data license contracts have yet been secured for any TPA's or large employers. It has been estimated that 82% of employers with headcounts greater than 40,000 are self-insured. This is a significant change from 1974 when less than 5% of U.S. employees were covered by an employers' self-insurance. This market represents a significant growth opportunity for Leapfrog's VBP as there are currently 1927 U.S. companies with over 5,000 employees.

Secondary markets for Leapfrog include resellers, transparency vendors, publishers and researchers.

Until November of 2017; The Leapfrog Group had not employed a full time dedicated resource for Business Development or customer acquisition. Prior sales duties were shared by the Director of Communications and the Business Development Coordinator.

The current Leapfrog pricing model although somewhat linear does not offer an affordable entry level price point at the low end of lives for Consultant/Brokers, small Health Plans or Employers with member headcounts under 150,000.

The current Leapfrog Pricing Model utilizes somewhat broad ranges for lives and could achieve a more linear model if a PMPM (per member per month) pricing model was adopted. The PMPM metric is widely adopted and utilized by HIPs & employers. It might aid us in creating optics of more affordability.

The current Leapfrog Resellers model has two potential flaws that limits our revenue growth and inhibits our ability to identify new prospects without creating potential channel conflict.

1. Resellers pay a 2.6 premium over a comparable Health Plan thereby giving them a cross-over or break-even point after three client sales. Thereafter except for annual "lives" census updates no real revenue royalty is realized by Leapfrog for the reseller's success in client license expansions. An annual census update report delays when Leapfrog could realize any modest increase in royalty revenue.
2. Per the DUA & Resellers Agreement there is no requirement for the resellers to provide details on the list of end user clients they have resold and subsequently licensed Leapfrog's Data. This introduces opportunity for potential channel conflict by not knowing who Leapfrog's end user clients are. The DUA language is also deficient in providing Leapfrog practical & affordable surveillance options other than an independent financial audit.

Market Opportunity & Segmentation:

The Data License market can be divided into three logical market segments for sales coverage with estimated numbers:

Currently Leapfrog has existing customers in all three market segments:

Key Decision Makers, Influencers & Points of Contact by Market Segments are:

Health Plans – Chief Medical Officer, Chief Financial Officer, Chief Operating Officer, VP of Network Contracts, VP of Member Services, Director of Quality Care Improvement, Director of Value Purchasing Programs

Large Employers & TPA's - Chief Medical Officer, Chief Financial Officer, VP of Human Resources, VP of Employee Benefits

Resellers & all others – VP of Client Services, VP of Sales, VP of Marketing, VP of Products & Services

Market Coverage Strategy:

Leapfrog should continue to service existing clientele but strive to better understand who resellers sell to and how our data is utilized. Leapfrog should also continue to market directly to HIPs while building a Sales Channel Model that could in time take over this segment to accelerate customer acquisition.

A recommendation to modify our sales coverage would be to modify & expand our channel sales beyond Leapfrog's current resellers. A priority would be to secure a Top Tier National Big Data/Cloud Channel such as IBM Watson. The primary attributes would include:

1. National & Total Market Coverage
2. Existing relationships with HIPs & Large Employers
3. Ability to secure Amazon/JP Morgan/Berkshire
4. Industry & Healthcare Domain knowledge & competency
5. Ability to provide Level 1 support to clients

Leapfrog could leverage this Channel arrangement & utilize IBM Watson to cover the National HIPs and the Fortune 1000 of large employers that are self-insured.

IBM Watson could also be leveraged to market to and cover the HIP segment. Leapfrog would continue to support existing Resellers while modifying agreements to gain better transparency on end user license clients with associated corresponding surveillance activities.

Whenever feasible we would transition to a pricing model that would prove richer to Leapfrog. Leapfrog would also seek to build a network of Broker/Consultants that would license the Leapfrog Data & Value Based Purchasing Program to smaller employers seeking to build more narrow networks for employer plans.

Leapfrog Data License Pricing Considerations:

All of Leapfrog's "lives" pricing for Resellers, Health Plans & Employers should be recalculated to a pmpm model.

The current pricing model has an initial base price point that is too high for small plans or employers when calibrated for pmpm pricing.

The current pricing model is not an ideal set up for Channels. Resellers should be able purchase at a discount off list to allow mark-up to recover sales expense & achieve a gross profit. Transfer price models should be linear and allow Leapfrog revenues to grow with increases in both lives & clients sold by resellers.

The current reseller model does not address potential channel conflict between resellers and Leapfrog direct sales coverage as we have no visibility to resellers' end user clients.

The current pricing model does not account for resellers to sell VBP &/or to charge a per client fee for Leapfrog's onboarding support & Discern consulting services.

To optimize revenue opportunity resellers should report census data and be recalibrated on a quarterly basis for lives & clients and billed in advance for the next quarter's data user licenses.

The current pricing model unduly burdens National VBP Resellers on a per hospital benchmarking & analytics report basis and would total \$1.3M for all 1947 reports.

Partnership & Internal Discounts are very generous at 25% & 40% off. Leapfrog concedes additional revenue contribution if a Regional Leaders' SPIF is paid on VBP Program Sales.

Potential consideration to modify and lower discounts to 10% Partnership, 25% Internal Only & a 15% SPIF on VBP Program Sales.

A recommended modified Pricing Model has been prepared in an accompanying MS Excel file & stored on the Autotask Workplace:

<https://us.awp.autotask.net/1/filelink/cvornq-cckbszi-k37iby42>

Sales Tracking & Infrastructure:

In anticipation of increased sales & marketing activities Leapfrog has licensed an enterprise version of Salesforce.com's CRM and has it deployed and in use now.

Kush Banerjee has loaded all existing customer contact information and is the process of loading all current contract attachments and creating calendar tasks to alert for action prior to the renewal notice period. This action identified a reporting activity for Rally Health to report census data and should lead to an expanded renewal contract with an increase of 293% to \$236,500.

The Salesforce.com CRM tracks all opportunities in the pipeline and all interactions and communications are captured and logged. It serves as the repository for all customer contacts and documents. All emails and proposals are generated from Salesforce.com. Email campaigns can be initiated and driven from Salesforce.com.

All web inquiry leads will be queried against the CRM data base and if not duplicated a new account created and assigned for follow-up.

Leapfrog has recently purchased an instance of PandaDocs to be utilized for our sales proposal platform. This platform will enhance our image and bring our sales branding up and commensurate with The Leapfrog Group's overall Branding. This proposal platform will be integrated with Salesforce.com and will allow us to track prospective clients' reviews, interactions, notations and questions with the proposal to include notifications of "openings", "click throughs" & "forwarded email addresses". These features are key to timely & targeted sales follow-up.

Lastly Leapfrog has identified SEOSamba, a SaaS vendor that will build a micro sales & marketing web-site for us. SEOSamba will collaborate of the web site design & content but yet fully allow us total control, edits, additions and management of the web site. SEO will regularly manage SEO (Search Engine Optimization) to fully ensure maximum exposure to targeted clients without competing with the other Leapfrog websites.

SEOSamba will also help procure a lead list of target executives for the identified market of HIPs. This list will serve as the foundation for our first campaign.

SEOSamba will assist building three campaigns that will employ SMM (Social Media Marketing) to track key target executives and to utilize paid web ad campaigns via LinkedIn, Facebook, Twitter and Google to place Leapfrog content ads on their pages.

SEOSamba will produce & help manage monthly reporting on analytics with free consultative services on how best to manage and optimize our SMM Campaigns.

SEOSamba will also help build a posting schedule and program of related and complimentary postings to maximize our exposure & views driving increased traffic to our Sales & Marketing Micro site.

Additional Opportunity for Monetization of Leapfrog IP & Branding:

The success and significant financial contribution of the Hospital Safety Grade & Top Hospital Accolades Program illustrates the market acceptance and brand influence that Leapfrog carries in the HealthCare Provider space.

Serious consideration should be given to expanding and potentially bundling of the sub categories for Maternity Care and Ambulatory Surgical Centers.

Top Hospitals and A Safety Graded Hospitals might increase their accolade spend with us with the additional opportunities for promotion.

Lower Safety Graded Hospitals may achieve significantly better grades for either Maternity Care or Ambulatory Surgical Centers and thus create new accolades revenue opportunities for Leapfrog.

ARMSTRONG INSTITUTE
FOR PATIENT SAFETY AND QUALITY

Lives Lost, Lives Saved: An Updated Comparative Analysis of Avoidable Deaths at Hospitals Graded by The Leapfrog Group

May 2019

by

Matt Austin, Ph.D.
Jordan Derk, M.P.H.

Armstrong Institute for Patient Safety and Quality
Johns Hopkins Medicine

Prepared for The Leapfrog Group, Washington, D.C.

About the Armstrong Institute

Established in 2011, the Armstrong Institute partners with patients, their loved ones, and all interested parties to end preventable harm, to continuously improve patient outcomes and experience, and to eliminate waste in health care delivery, both at Johns Hopkins and around the world. Created with a gift from C. Michael Armstrong, former chairman of the Johns Hopkins Medicine Board of Trustees, the institute develops and tests solutions in safety and quality improvement that can then be shared at the regional, national and global levels. Using a scientific approach to improvement, the organization employs robust measures that can be broadly disseminated and sustained. More information about the Armstrong Institute is available at hopkinsmedicine.org/armstrong_institute/.

Introduction

In 2012, in an effort to provide patients and health care consumers with information on the safety of their local hospitals, The Leapfrog Group introduced the Hospital Safety Grade, a letter grade rating for hospitals on how safe they are for patients. The Hospital Safety Grade is a composite score of 28 measures of patient safety that are all currently used in national measurement and reporting programs. The Hospital Safety Grade uses performance measures from the Leapfrog Hospital Survey, the Centers for Medicare and Medicaid Services (CMS), and secondary data sources. Hospital Safety Grades are assigned twice a year (in the spring and fall) to more than 2,600 hospitals across the nation. From the calculated scores, hospitals are assigned a letter grade ranging from A to F, with “A” hospitals having the highest scores and “F” hospitals having the lowest scores.

Leapfrog’s membership of employers and other purchasers of health care are interested in helping consumers understand the relative risk of using an “A” hospital versus hospitals that receive lower grades. Leapfrog asked the Armstrong Institute to update its original 2016 analysis of the estimated number of avoidable deaths in hospitals with each letter grade (“A” vs. “B” vs “C” vs “D, F”) and how many lives could be saved if all hospitals in the U.S. that receive a Hospital Safety Grade had a safety record of “A” hospitals.

Methods

Measures Used

Fifteen outcome measures and one structural measure from the Spring 2019 Hospital Safety Grade were used in the analysis. The measures included in the analysis were those for which the literature has clearly identified an attributable mortality to the patient safety event or a closely-related prevention process. Table A (Appendix) reflects the list of measures used in the analysis, the data source for each measure, and the reporting period covered by the measure.

Estimating Incidence of Errors

Using data from those hospitals that received a Spring 2019 Leapfrog Hospital Safety Grade, the mean incidence rate of each patient safety outcome was calculated for “A” hospitals in aggregate, “B” hospitals in aggregate, “C” hospitals in aggregate, and “D” and “F” hospitals together in aggregate. Table 1 reflects the mean incidence rate for each patient safety outcome for hospitals in each letter grade.

Estimating Mortality Risk

The published literature was reviewed to identify the average attributable mortality rate associated with each patient safety outcome when it occurs in the inpatient setting. The attributable mortality rates and the source of those data points are listed in Table 1. As the literature did not typically distinguish differences in mortality between better and worse performing hospitals, the same mortality rate was used for hospitals of all letter grades. The one exception to this is for Patient Safety Indicator 4 (PSI 04): Death among Surgical Inpatients with Serious Treatable Complications. For this measure, a hospital's score on the measure reflects the mortality rate when a serious, treatable complication occurs. As such, for this measure, we could aggregate data across each letter grade to determine a grade-specific mortality rate. The literature did not support any attributable mortality rate for Hospital-Acquired Conditions (HAC): Air Embolism.

While higher adherence to process and structural measures is generally linked to improvements in patient safety and care quality, the literature did not identify quantifiable reductions in mortality rates through improved performance for most of the process and structural measures used in the Hospital Safety Grade. However, one structural measure used in the Hospital Safety Grade, Intensive Care Unit (ICU) Physician Staffing, does have identifiable reductions in mortality risk. It is estimated that full implementation of Leapfrog's ICU Physician Staffing (IPS) standard by all U.S. hospitals could reduce ICU mortality by 30% — from 12% to 8.4%.¹ We assumed a linear relationship between a hospital's adoption of Leapfrog's standard and reductions in mortality rates. Table 2 reflects the estimated excess mortality above 8.4% for each letter grade attributable to lack of full adoption of Leapfrog's IPS standard.

Calculating Mortality Rates per 1,000 Admissions

To estimate the mortality rate for each patient safety outcome in hospitals in each letter grade, we multiplied the mortality rate for each outcome measure by the respective mean incidence rate of that outcome for each Hospital Safety Grade letter grade. As some measures apply only to certain kinds of admissions, such as surgical admissions or ICU admissions, we multiplied the mortality rates by the percentage of all admissions that apply to that measure. From the literature, we identified that 29% of all U.S. hospital admissions involve a procedure in the operating room² and 20% include an ICU admission.³

To estimate the impact of the lack of full adoption of Leapfrog's ICU Physician Staffing standard on patient mortality, we multiplied the incremental mortality rate by the percentage of hospital admissions that are admitted to the ICU.

While the literature we used to estimate the mortality rates for each preventable harm would ideally reflect the mortality that is directly attributable to that preventable harm in isolation, we recognize that some of the estimated mortality risk may be counted across

multiple measures. To account for this limitation, we reduced the mortality associated with the outcome measures by 50%.

Table 1. Mean Incidence Rate of Patient Safety Outcomes for Hospitals in Each Spring 2019 Letter Grade and the Average Attributable Mortality Rate for Each Outcome.

Measure	Mean Incidence Rate of Patient Safety Outcome per 1,000 Hospital Admissions (Based on Spring 2019 grades)				Identified Attributable Mortality Rate
	A	B	C	D & F Combined	
Hospital-Acquired Conditions (HAC): Foreign Object Retained After Surgery	0.00%	0.00%	0.00%	0.01%	2.14% ⁴
Hospital-Acquired Conditions (HAC): Falls and Trauma	0.03%	0.04%	0.05%	0.06%	5.50% ⁵
Hospital-Acquired Conditions (HAC): Air Embolism	0.00%	0.00%	0.00%	0.00%	No identified mortality rate
Central Line-Associated Blood Stream Infection (CLABSI)	0.12%	0.16%	0.18%	0.24%	18.5% ⁵
Catheter-Associated Urinary Tract Infection (CAUTI)	0.14%	0.17%	0.19%	0.23%	2.3% ⁵
Surgical-Site Infections from Colon Surgery (SSI: Colon)	0.01%	0.01%	0.01%	0.01%	2.8% ⁵
Hospital-onset Methicillin-resistant Staphylococcus Aureus (MRSA) Laboratory-identified Blood Infections	0.02%	0.03%	0.04%	0.05%	22.6% ⁶
Hospital-onset Clostridium Difficile (C.diff.) Laboratory-identified Infections	0.32%	0.36%	0.39%	0.38%	23.00% ⁷
Patient Safety Indicator 3: Pressure Ulcer Rate	0.03%	0.04%	0.04%	0.06%	7.23% ⁴
Patient Safety Indicator 4: Death Among Surgical Inpatients with Serious Treatable Complications	0.63%	0.64%	0.65%	0.64%	A: 15.82% B: 16.05% C: 16.37% DF: 17.19% Note: Values are calculated from the actual PSI 04 data
Patient Safety Indicator 6: Iatrogenic Pneumothorax	0.03%	0.03%	0.03%	0.03%	6.99% ⁴
Patient Safety Indicator 11: Postoperative Respiratory Failure	0.76%	0.81%	0.88%	0.94%	21.84% ⁴
Patient Safety Indicator 12: Postoperative Pulmonary Embolism (PE) or Deep Vein Thrombosis (DVT)	0.36%	0.38%	0.40%	0.44%	6.56% ⁴
Patient Safety Indicator 14: Postoperative Wound Dehiscence	0.08%	0.08%	0.09%	0.09%	9.63% ⁴
Patient Safety Indicator 15: Accidental Puncture or Laceration	0.12%	0.13%	0.13%	0.14%	2.16% ⁴

Table 2. Estimated Excess ICU Mortality Attributed to Lack of Full Adoption of Leapfrog's IPS Standard based on Spring 2019 grades.

	Excess ICU Mortality Rate by Spring 2019 Letter Grade				Note
	A	B	C	D & F Combined	
ICU Physician Staffing	1.01%	1.53%	2.34%	2.37%	Values are calculated from actual data; values reflect the incremental mortality above 8.4% due to the lack of hospitals' full adoption of Leapfrog's IPS standard ¹

Hospital Admissions

We used data from the 2017 American Hospital Association's Annual Survey to identify the number of acute care hospital admissions across the United States (34,305,620)⁸ and how those admissions distribute across hospitals in each Hospital Safety Grade letter grade.

Lives Lost and Lives Saved

We used the distribution of hospital admissions across each Hospital Safety Grade letter grade with the number of lives lost per 1,000 admissions per letter grade to estimate the total number of lives lost for hospitals in each letter grade. We also used these data to calculate the number of lives that would be saved if hospitals with grades lower than "A" operated as safely as "A" hospitals.

Results

Table 3 reflects the key results of the analysis. The number of avoidable deaths per 1,000 admissions ranged from 3.24 lives per 1,000 admissions in "A" hospitals to 6.21 lives per 1,000 admissions in "D" and "F" hospitals. Compared to "A" hospitals, the differences in the estimated relative risk of an avoidable death is 34.9% higher in "B" hospitals, 87.7% higher in "C" hospitals, and 91.8% higher in "D" and "F" hospitals. It is important to recognize, however, that these results reflect average hospital performance in each grade category and individual hospital performance within a letter grade may vary.

Table 3. Rate of Avoidable Deaths per 1,000 Admissions and the Possible Lives Saved with Improved Performance based on Spring 2019 grades.

	A	B	C	D & F Combined
Lives Lost/1,000 Admissions	3.24	4.37	6.08	6.21
Relative Risk of an Avoidable Death Compared to "A" Hospitals		34.9%	87.7%	91.8%
Distribution of Hospital Admissions	33.4%	25.4%	35.7%	5.5%
Lives Saved if All Hospitals Had an "A" Safety Record		9,835	34,775	5,605

Applying the mortality rates for each grade of hospital to the distribution of hospital admissions in 2017, we estimate 161,250 avoidable deaths in U.S. hospitals each year (37,085 in "A" hospitals, 38,038 in "B" hospitals, 74,414 in "C" hospitals, and 11,712 in "D," and "F" hospitals). We estimate 50,215 lives could be saved every year if "B" "C," "D", and "F" hospital had the same safety performance as "A" hospitals.

Conclusions

Efforts to reduce patient safety events have been plentiful, and yet elimination of all preventable harms remains elusive. While hospitals with a Hospital Safety Grade of "A" have better performance than hospitals with lower grades, they still have significant opportunities for improvement. If hospitals with a grade lower than an "A" are able to achieve the safety performance of "A" hospitals, we estimate more than 50,000 patient lives could be saved.

The measures included in this analysis reflect a subset of all potential harms that patients may encounter in U.S. hospitals, and as such, these results likely reflect an underestimation of the avoidable deaths in U.S. hospitals. Also, we have only estimated the deaths from patient safety events and have not captured other morbidities that may be equally important. And while the absolute numbers presented in this analysis are likely an underestimation of the true impact on patients, the relative comparisons presented in this analysis likely hold across all harms, given that the underestimation is likely consistent across all hospitals.

How this study compares to other studies

In comparing the results of this updated analysis to the original 2016 analysis, we found a reduced number of lives lost, from an estimated 206,000 in the original analysis to an estimated 150,000 in this updated analysis. This reduction is primarily attributable to two factors – (1) hospitals have made incremental improvements on those performance measures that are included in the Hospital Safety Grade; and (2) some of the performance measures used in the Hospital Safety Grade have been re-defined and re-baselined since the original analysis.

We have seen an increase in the number of lives that could be saved if every hospital had the performance of an “A” hospital, with an estimated 33,000 lives saved in the original analysis to an estimated 50,000 lives saved in this updated analysis. This increase is reflective of “A” hospitals improving at a faster rate than hospitals in the other grade categories.

Other studies that have estimated the number of lives lost from medical error range from 44,000 to 440,000,^{9,10} with our estimate falling in the middle of that range. We believe our results are an underestimation of the total impact of avoidable death in U.S. hospitals as our results cover a subset of potential harms suffered by patients.

Limitations

This analysis only utilized measures of patient safety harm included in the Spring 2019 Hospital Safety Grade. There are a number of patient safety harms that are not currently measured and publicly reported. Examples include medication errors and diagnostic errors. The estimates of lives lost in this analysis are likely to be conservative.

The mortality rates we used in the analysis were generally the same for all hospitals. One might hypothesize that safer hospitals may actually have lower mortality rates when one of these events occurs. This would exaggerate differences we identified between better and worse performing hospitals.

We cannot quantify the true amount of double-counting of deaths that may occur between the different measures. The literature does not identify the potential impact intensivists have on patient harms in the ICU, so we made a conservative assumption that 50% of the deaths associated with the outcome measures are already captured in the ICU Physician Staffing mortality estimates. The analysis could be refined if one could better understand the impact that the presence of intensivists has on patient harms in the ICU.

2021 ANNUAL REPORT

THE LEAPFROG GROUP

Giant Leaps for Patient Safety

Thank you!

Because of you, we can deliver on our mission to trigger giant leaps forward in the safety, quality, and affordability of U.S. health care by using transparency to support informed health care decisions and promote high-value care.

2021 – A big year for Leapfrog

We made incredible strides in 2021 – Leapfrog boldly fought for and stood by patients demanding accountability for safe care. Leapfrog has increased its presence in policy and advocacy efforts in Washington, including the preservation of a critical patient safety measure that keeps hospitals accountable for preventable deaths.

Our donors played a direct role in all these accomplishments. Thanks to your contribution, we have expanded our footprint, influence, and ability to improve health care in this country.

Leapfrog's Impact

What really matters is people. Leapfrog exists to help patients and their families find access to safer health care and, in turn, help save lives. When Carl Flatley was out of town for a bike race last year, he woke up in the middle of the night with severe back pain and knew he needed a hospital. He quickly looked at the Leapfrog Hospital Safety Grades in the area he was in and realized the hospitals closest to him did not perform well. The closest hospital with an "A" grade was 400 miles away, but he made the drive because he wanted to ensure he would get the best, safest care possible. Thanks to the information provided in the Hospital Safety Grade, Carl received the treatment he needed at the hospital and recovered with no complications.

"You have to pick the hospital you go to based on competency – not convenience. Leapfrog provides invaluable data that all patients should use." -Carl Flatley

2021 Income

2021 Expenses

What's Next for 2022

With your continued support, we expect big things in 2022. We look forward to launching our 2022 Leapfrog Surveys and our Leapfrog Hospital Safety Grades, hosting our Green Light Gala in March, launching the Judie Burrows Education Institute, and continuing to expand our influence through public policy and advocacy. Thank you for helping us make giant leaps for patient safety.

LEAPFROG
HOSPITAL
 SAFETY GRADE

WHAT IS THE HOSPITAL SAFETY GRADE?

Leapfrog Hospital Safety Grades are assigned to nearly 3,000 general acute-care hospitals across the nation twice annually. The Safety Grade uses up to 22 national patient safety measures from the Centers for Medicare & Medicaid Services (CMS) and the Leapfrog Hospital Survey, and information from other supplemental data sources, to produce a single letter grade representing a hospital's overall performance in keeping patients safe from preventable harm and medical errors. The Safety Grade methodology has been peer reviewed and published in the *Journal of Patient Safety*.¹

With the Safety Grade, The Leapfrog Group aims to educate and encourage consumers to consider safety when selecting a hospital for themselves or their families. In addition, we believe the Safety Grade will foster strong market incentives for hospitals to make safety a priority. Safety Grades are publicly reported at www.HospitalSafetyGrade.org.

ELIGIBLE HOSPITALS

Due to the limited availability of public data, Leapfrog is not able to calculate a Safety Grade for every hospital in the U.S., including the following types of hospitals:

- Critical access hospitals (CAH)
- Long-term care and rehabilitation facilities
- Mental health facilities
- Federal hospitals (e.g., Veterans Affairs, Indian Health Services, etc.)
- Some specialty hospitals, such as surgery centers and cancer hospitals
- Free-standing pediatric hospitals
- Hospitals in U.S. territories
- Hospitals that are missing scores for **more than six** (6) process/structural measures, or **more than five** (5) outcome measures, or **missing PSI 90**

¹ The Leapfrog Hospital Safety Grade uses the below-described data and reflects expert opinion as to the relative importance of each category.

LEAPFROG
HOSPITAL
SAFETY GRADE

MEASURES

The Safety Grade utilizes up to 22 national patient safety measures from the Centers for Medicare & Medicaid Services (CMS) and the Leapfrog Hospital Survey, and information from other supplemental data sources.

The measure set is divided into two domains: (1) Process/Structural Measures and (2) Outcome Measures. Each domain represents 50% of the Safety Grade. The following table lists the 22 measures included in the Safety Grade, as well as the data source and reporting period for each measure. In some cases where a hospital's information is not available for a certain measure, Leapfrog uses a secondary data source (as indicated in the table). In cases where a hospital's information is not available from any data source, Leapfrog has outlined a methodology for dealing with the missing data.

PROCESS/STRUCTURAL MEASURES (12)				
Measure Name	Primary Data Source	Reporting Period	Secondary Data Source	Reporting Period

PSI 13: Postoperative sepsis rate	CMS	07/01/2019 - 12/31/2019 AND 07/01/2020 - 6/30/2021	N/A	N/A
PSI 14: Postoperative wound dehiscence rate	CMS	07/01/2019 - 12/31/2019 AND 07/01/2020 - 6/30/2021	N/A	N/A
PSI 15: Unrecognized abdominopelvic accidental puncture/laceration rate	CMS	07/01/2019 - 12/31/2019 AND 07/01/2020 - 6/30/2021	N/A	N/A

Note: CMS calculates PSI 90 using the ten (10) component PSIs listed above. While scores for each of the 10 component PSIs will NOT be used to calculate spring 2023 Hospital Safety Grades, they will be publicly reported on the Hospital Safety Grade [website](#).

LEAPFROG
HOSPITAL
 SAFETY GRADE

MEASURE & SCORING DESCRIPTIONS

PROCESS/STRUCTURAL MEASURES

For Process/Structural Measures, a higher score is always better because these are measures of compliance with best practices in patient care.

COMPUTERIZED PHYSICIAN ORDER ENTRY (CPOE)

The CPOE measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures a hospital's progress toward implementing a CPOE system to reduce medication ordering errors. Through participation in the Leapfrog Hospital Survey, hospitals are placed in one of several performance categories: "Achieved the Standard," "Considerable Achievement," "Some Achievement," "Limited Achievement," "Declined to Respond," or "Unable to Calculate Score." For the purposes of calculating the Safety Grade, a numerical score is assigned to each performance category:

Leapfrog Performance Category	Measure Score
Achieved the Standard	100
Considerable Achievement	70
Some Achievement	40
Limited Achievement	15
Declined to Respond	See Using Secondary Data
Unable to Calculate Score	Not Available (See Scoring Terms)

For hospitals that did not submit a 2022 Leapfrog Hospital Survey by November 30, see [Using Secondary Data Sources](#) for more information on Leapfrog's imputation methodology.

BAR CODE MEDICATION ADMINISTRATION (BCMA)

The BCMA measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures a hospital's progress toward 1) implementation of BCMA throughout the hospital, 2) compliance with patient and medication scans during administration, 3) use of decision support, and 4) structures to monitor and reduce workarounds. Through participation in the Leapfrog Hospital Survey, hospitals are placed in one of several performance categories: "Achieved the Standard," "Considerable Achievement," "Some Achievement," "Limited Achievement," or "Declined to Respond. For the purposes of calculating the Safety Grade, a numerical score is assigned to each performance category:

LEAPFROG
HOSPITAL
SAFETY GRADE

Leapfrog Performance Category	Measure Score
Achieved the Standard	100
Considerable Achievement	75
Some Achievement	50
Limited Achievement	25
Declined to Respond	See Using Secondary Data

For hospitals that did not submit a 2022 Leapfrog Hospital Survey by November 30, see [Using Secondary Data Sources](#) for more information on Leapfrog's imputation methodology.

ICU PHYSICIAN STAFFING (IPS)

The IPS measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures a hospital's use of intensivists in ICUs. Through participation in the Leapfrog Hospital Survey, hospitals are placed in one of several performance categories: "Achieved the Standard," "Considerable Achievement," "Some Achievement," "Limited Achievement," or "Declined to Respond." For the purposes of calculating the Safety Grade, a numerical score is assigned to each performance category:

Leapfrog Performance Category	Measure Score
Achieved the Standard	100
Considerable Achievement	50
Some Achievement	15
Limited Achievement	5
Declined to Respond	See Using Secondary Data
Does Not Apply	Not Available (See Scoring Terms)

For hospitals that did not submit a 2022 Leapfrog Hospital Survey by November 30, see [Using Secondary Data Sources](#) for detailed information on Leapfrog's imputation methodology.

LEAPFROG
HOSPITAL
SAFETY GRADE

NQF SAFE PRACTICES

Three (3) NQF Safe Practice measures are collected by The Leapfrog Group on the Leapfrog Hospital Survey. They measure a hospital's progress toward implementing NQF-endorsed processes and protocols to reduce and prevent adverse events. Through participation in the Leapfrog Hospital Survey, hospitals are able to earn up to 100 – 120 points for each Safe Practice. For the purposes of calculating the Safety Grade, individual scores for each Safe Practice are used:

NQF Safe Practice	Possible Measure Score
Safe Practice 1: Culture of Safety Leadership Structures and Systems	0 - 120
Safe Practice 2: Culture Measurement, Feedback and Intervention	0 - 120
Safe Practice 9: Nursing Workforce	0 - 100

There is no secondary data source for the NQF Safe Practices. Therefore, hospitals that did not submit a 2022 Leapfrog Hospital Survey by November 30 will not have these measures included in their Safety Grade and the measure will be reported as "Declined to Report." See [Dealing with Missing Data](#) for more information.

HAND HYGIENE

The Hand Hygiene measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures processes and protocols that hospitals have in place regarding monitoring hand hygiene practices, fostering a culture of good hand hygiene, offering training and education, and providing equipment.

Publicly reported score from the Leapfrog Hospital Survey	Possible assigned for the purposes of calculating the Hospital Safety Grade
Achieved the Standard	100
Considerable Achievement	70
Some Achievement	40
Limited Achievement	15
Declined to Respond	See Using Secondary Data

LEAPFROG
HOSPITAL
SAFETY GRADE

For hospitals that did not submit a 2022 Leapfrog Hospital Survey by November 30, see [Using Secondary Data Sources](#) for detailed information on Leapfrog's imputation methodology.

HOSPITAL CONSUMER ASSESSMENT OF HEALTHCARE PROVIDERS AND SYSTEMS (HCAHPS) COMPOSITES

The Hospital HCAHPS survey responses are collected by CMS via the Inpatient Quality Reporting Program. Linear mean scores calculated by CMS incorporate the full range of survey response categories into a single metric for each HCAHPS composite. Five of the six composites are used in the Safety Grade. For the purposes of calculating the Safety Grade, a hospital's linear mean score for each of the five composites is used:

HCAHP Composite	Possible Measure Score
H-COMP-1: Nurse Communication	0 - 100
H-COMP-2: Doctor Communication	0 - 100
H-COMP-3: Staff Responsiveness	0 - 100
H-COMP-5: Communication about Medicines	0 - 100
H-COMP-6: Discharge Information	0 - 100

OUTCOME MEASURES

For Outcome Measures, a lower score is always better because these are measures of harm experienced by patients (e.g., central line-associated blood stream infections).

HOSPITAL-ACQUIRED CONDITIONS

Three hospital-acquired condition measures are calculated by CMS through the [DRA HAC Reporting Program](#): Foreign Object Retained after Surgery, Air Embolism, and Falls and Trauma. Hospital-acquired condition rates are calculated by CMS based on Medicare Fee-for-Service claims and publicly reported as a rate per 1,000 inpatient discharges. For the purposes of calculating the Safety Grade, the rate is used.

HEALTHCARE-ASSOCIATED INFECTIONS

Five healthcare-associated infection measures are collected by The Leapfrog Group on the Leapfrog Hospital Survey: Central line-associated bloodstream infections (CLABSI) in ICUs and select wards, Catheter-associated urinary tract infections (CAUTI) in ICUs and select wards, Surgical site infections from colon surgery (SSI: Colon), Facility-wide inpatient MRSA Blood Laboratory-identified Events, and Facility-wide inpatient C.diff. Laboratory-identified Events. Through participation in the Leapfrog Hospital Survey, hospitals were required to 1) join Leapfrog's NHSN group, 2) provide an accurate NHSN ID in the Profile section of

LEAPFROG
HOSPITAL
SAFETY GRADE

the Online Survey Tool, and 3) submit Section 7 Managing Serious Errors by November 30. For the purposes of calculating the Safety Grade, the standardized infection ratio (SIR) is used:

As Reported by Leapfrog	Measure Score	Notes
Standardized Infection Ratio (SIR)	SIR	Measure is included in calculating the Safety Grade
Does Not Apply	Not Available (See Scoring Terms)	Measure is not included in calculating the Safety Grade. No use of Secondary Data.
Unable to Calculate Score	Not Available (See Scoring Terms)	Measure is not included in calculating the Safety Grade. No use of Secondary Data.
Declined to Respond	See Using Secondary Data	Secondary Data source is used.

For hospitals that did not submit a 2022 Leapfrog Hospital Survey by November 30, see [Using Secondary Data Sources](#) for more information on Leapfrog's use of CMS data.

AHRQ PATIENT SAFETY INDICATORS (PSIs)

Two AHRQ Patient Safety Indicators are calculated by CMS through the Inpatient Quality Reporting Program and the [HAC Reduction Program](#): PSI 4 Death Rate among Surgical Inpatients with Serious Treatable Conditions and PSI 90 Patient Safety and Adverse Events Composite. PSI rates are calculated by CMS based on Medicare Fee-for-Service claims and publicly reported as a rate per 1,000 inpatient discharges. For the purposes of calculating the Safety Grade, the smoothed rate is used for both measures.

Note: CMS calculates PSI 90 using the ten (10) component PSIs that are listed in the PSI 90 Components table [above](#). While scores for each of the 10 component PSIs will NOT be used to calculate spring 2023 Hospital Safety Grades, they will be publicly reported on the Hospital Safety Grade [website](#). Additional information about the PSI 90 measure and how it is calculated by CMS can be found [here](#).

LEAPFROG
HOSPITAL
SAFETY GRADE

USING SECONDARY DATA SOURCES

Twelve (12) of the 22 measures included in the Safety Grade are derived from the Leapfrog Hospital Survey. The Leapfrog Hospital Survey is voluntary, and as such, hospitals may choose not to submit a Survey. To address this gap in available data, the Safety Grade methodology utilizes secondary data when available. For information on how to complete a free Leapfrog Hospital Survey, visit www.leapfroggroup.org/survey.

IMPUTATION METHOD FOR CPOE, BCMA, IPS, AND HAND HYGIENE

Leapfrog has worked closely with statisticians at Mathematica, Leapfrog's National [Expert Panel](#), and our scientific partners at Johns Hopkins Medicine to develop a new two-step imputation approach for determining scores for CPOE, BCMA, IPS, and Hand Hygiene if they are missing from our [publicly reported Survey Results](#).

STEP 1: USE A HOSPITAL'S MOST RECENT SCORE ON THE MEASURE

CPOE, BCMA, and Hand Hygiene: If the hospital had a score assigned by Leapfrog in the previous four rounds of grades (i.e., fall 2022, spring 2022, fall 2021, spring 2021), the hospital is assigned the most recent score on that measure in the current Hospital Safety Grade (i.e., spring 2023).

IPS: If the hospital had a score assigned by Leapfrog in the previous five rounds of grades (i.e., fall 2022, spring 2022, fall 2021, spring 2021, fall 2020), the hospital is assigned the most recent score on that measure in the current Hospital Safety Grade (i.e., spring 2023).

STEP 2: USE THE MEAN OF THE SCORES ASSIGNED TO OTHER SIMILAR HOSPITALS IN THE U.S. (APPLIES TO CPOE, BCMA, AND HAND HYGIENE ONLY)

The hospital is assigned to a cohort of other similar hospitals using three or four hospital characteristics obtained from the most recent CMS Impact File and the 2022 Leapfrog Hospital Survey: urban/rural status, safety net status, number of beds, and teaching status (urban cohorts only). The CMS Impact File is the data source for urban/rural status, safety net status, and number of beds. The [2022 Leapfrog Hospital Survey Results](#) are the primary data source for teaching status and the CMS impact file is the secondary data source.

The hospital is then assigned the **lower** of two possible mean scores for CPOE, BCMA, and Hand Hygiene based on their cohort's performance:

- **Mean of current and recent scores:** The mean score of the cohort is calculated based on the hospital scores in the current round (i.e., spring 2023) from either Leapfrog's publicly reported Survey Results or Step 1 of the imputation model.

LEAPFROG
HOSPITAL
SAFETY GRADE

- **Mean of scores obtained in each hospital's first year of reporting on Leapfrog's CPOE, BCMA, or Hand Hygiene standards via the Leapfrog Hospital Survey:** The mean score of the cohort is calculated based on the score (i.e., performance category from the Leapfrog Hospital Survey) each hospital in the cohort obtained the first year they reported on Leapfrog's CPOE, BCMA, or Hand Hygiene standards, starting with the 2018 Leapfrog Hospital Survey (the year the CPOE and BCMA standards were last significantly updated) or the 2020 Leapfrog Hospital Survey (the year the Hand Hygiene standard was first scored). CPOE Scores from the 2020 Leapfrog Hospital Survey are excluded as the CPOE Evaluation Tool was not included on the Leapfrog Hospital Survey due to COVID-19.

To determine a hospital's cohort and mean score:

1. Download the latest IMPACT Zip file [here](#).
 - a. Open the Microsoft Excel Worksheet in that Zip file named "FY 2023 IPPS Final Rule Impact File"
 - b. Select the "FY 2023 CA" tab
 - c. Filter for the hospital's CMS Certification Number (CCN) under the "Provider Number" column
 - d. Refer to criteria in Table 1: Cohort Criteria
2. View 2022 Leapfrog Hospital Survey Results [here](#).
 - a. Search for the hospital by name or location
 - b. If the hospital submitted a 2022 Leapfrog Hospital Survey, select "More Information" at the bottom of the webpage to view teaching status
 - c. Refer to the criteria in Table 1: Cohort Criteria

Table 1: Cohort Criteria

Characteristic	2022 Leapfrog Hospital Survey Results	Column in CMS Impact File	Criteria
Urban/rural status	N/A	URGEO (Column I)	CMS Impact File: Urban: LURBAN or OURBAN Rural: RURAL
Safety net status	N/A	DSHPCT (Column Y)	CMS Impact File: Safety net: DSHPCT is greater than or equal to 0.4007* *0.4007 is the 80 th percentile of the IMPACT file
Number of Beds	N/A	Beds (Column U)	CMS Impact File

LEAPFROG
HOSPITAL
SAFETY GRADE

Characteristic	2022 Leapfrog Hospital Survey Results	Column in CMS Impact File	Criteria
			Fewer than 100 beds 100 or more beds
Teaching status	Teaching Status	Resident to Bed Ratio (Column S)	2022 Leapfrog Hospital Survey Results (primary source): Non-teaching Teaching CMS Impact File (secondary source): Non-teaching: Resident to bed Ratio equals 0 Teaching: Resident to bed ratio is greater than 0

3. Find the cohort's scores for CPOE, BCMA, and Hand Hygiene in Table 2: Cohort Scores

Table 2: Cohort Scores

Cohort #	Urban/Rural Status	Safety Net Status	Number of Beds	Teaching Status	Step 2 CPOE Score (Mean of Cohort)	Step 2 BCMA Score (Mean of Cohort)	Step 2 Hand Hygiene Score (Mean of Cohort)
Cohort 1	Rural	Non-Safety Net	Fewer than 100 beds	N/A	75	79	50
Cohort 2	Rural	Non-Safety Net	100 or more beds	N/A	79	83	53
Cohort 3	Rural	Safety Net	Fewer than 100 beds	N/A	80	79	48
Cohort 4	Rural	Safety Net	100 or more beds	N/A	77	77	56
Cohort 5	Urban	Non-Safety Net	Fewer than 100 beds	Non-Teaching	85	85	57
Cohort 6	Urban	Non-Safety Net	100 or more beds	Non-Teaching	86	84	57
Cohort 7	Urban	Non-Safety Net	Fewer than 100 beds	Teaching	78	85	65
Cohort 8	Urban	Non-Safety Net	100 or more beds	Teaching	88	85	56
Cohort 9	Urban	Safety Net	Fewer than 100 beds	Non-Teaching	84	78	70
Cohort 10	Urban	Safety Net	100 or more beds	Non-Teaching	76	80	62
Cohort 11	Urban	Safety Net	Fewer than 100 beds	Teaching	77	78	43
Cohort 12	Urban	Safety Net	100 or more beds	Teaching	90	80	55

LEAPFROG
HOSPITAL
 SAFETY GRADE

CMS DATA FOR HAIS

CMS is the **secondary data** source for healthcare-associated infections. For the purposes of calculating the Safety Grade, the standardized infection ratio (SIR) published by CMS is used:

Hospitals That Did Not Submit Section 7: Managing Serious Errors of the 2022 Hospital Survey by November 30, 2022

As Reported by CMS	Measure Score	Notes
Not Available (no locations or low volume)	Not Available (See Scoring Terms)	Measure is not included in calculating the Leapfrog Hospital Safety Grade.
Standard Infection Ratio (SIR)	SIR	Measure is included in calculating the Leapfrog Hospital Safety Grade.

If a hospital does not have available data from the Leapfrog Hospital Survey or CMS (e.g., no locations or low volume), the hospital is reported as Not Available "Not Available." See [Dealing with Missing Data](#) for more information.

LEAPFROG
HOSPITAL
 SAFETY GRADE

SCORING METHODOLOGY

WEIGHTING INDIVIDUAL MEASURES

Each measure included in the Leapfrog Hospital Safety Grade is assigned a standard weight. The methodology to assign standard weights includes four criteria: (1) Impact, (2) Evidence, (3) Opportunity, and (4) Number of Component Measures. These four criteria are then combined using the equation below, which results in a standard weight for each measure that represents the measure's relative importance within the Hospital Safety Grade.

$$[\text{Evidence} + (\text{Impact} \times \text{Opportunity} \times \text{Number of Component Measures})]$$

EVIDENCE

The Evidence Score for each individual measure is assigned a value of one (1) or two (2) using the following criteria:

- 1 = Supported by either suggestive clinical or epidemiological studies or theoretical rationale
- 2 = Supported by experimental, clinical, or epidemiological studies and strong theoretical rationale

OPPORTUNITY

The Opportunity Score for each individual measure is based on the Coefficient of Variation (Standard Deviation/Mean) of that measure, using the following formula: $[1 + (\text{Standard Deviation}/\text{Mean})]$. The Opportunity Score is on a continuous scale that is capped at three (3). Any measure with an Opportunity Score above three (3) is assigned a three (3).

IMPACT

The Impact Score for each individual measure is comprised of two (2) parts, each of which is assigned a value from one (1) to three (3):

1. Number of patients affected
2. Severity of harm

The *number of patients affected* score is determined by the following:

LEAPFROG
HOSPITAL
SAFETY GRADE

- 0 = Extremely rare event (e.g., Air Embolism)
- 1 = Rare event (e.g., Foreign Object Retained After Surgery)
- 2 = Some patients in hospital affected (e.g., ICU Physician Staffing)
- 3 = All patients in hospital affected (e.g., Hand Hygiene)

The *severity of harm* score is determined by the following:

- 1 = No direct evidence of harm or harm reduction (e.g., Patient Experience)
- 2 = Clear documentation of harm or harm reduction; adverse events (e.g., Foreign Object Retained After Surgery)
- 3 = Significant mortality reduction (more than 1,000 deaths or a 10% reduction in hospital wide mortality) (e.g., ICU Physician Staffing)

The values from each part are then added together to arrive at the overall Impact Score using the following criteria:

- 1 = Score of 2 (Low Impact) (e.g., Air Embolism)
- 2 = Score of 3-4 (Medium Impact) (e.g., Patient Experience)
- 3 = Score of 5-6 (High Impact) (e.g., ICU Physician Staffing)

NUMBER OF COMPONENT MEASURES

The number of component measures refers to how many measures are included within the measure. For PSI 90, the number of component measures is 10 (PSI 3, PSI 6, PSI 8, PSI 9, PSI 10, PSI 11, PSI 12, PSI 13, PSI 14, and PSI 15). For all other measures included in the Hospital Safety Grade, the number of component measures within the measure is one (1).

PSI 90	1	1.17	2	10	14.9%

LEAPFROG
HOSPITAL
SAFETY GRADE

CALCULATING Z-SCORES

Z-Scores are used to standardize data from measures with different performance scales and allow for comparisons (e.g., a linear mean score of 90 on H-COMP-1: Nurse Communication and a CLABSI SIR of 0.870). In addition, Z-Scores can indicate to a hospital whether their measure score is above, below, or equal to the average hospital.

In the Scoring Methodology, a Z-Score is calculated for each available measure score. A Z-Score is calculated using a hospital's actual measure score, the national mean for that measure, and the standard deviation for that measure. The Z-Score for each measure is calculated using the following formulas:

- **For Process/Structural Measures:** $[\text{Hospital Score} - \text{Mean}] / \text{Standard Deviation}$
- **For Outcome Measures:** $[(\text{Mean} - \text{Hospital Score}) / \text{Standard Deviation}]$

The following table includes the national mean and standard deviation for each measure used to calculate a hospital's Z-Score. For display, means and standard deviations are displayed rounded to two or three decimal places. For scoring, these values are not rounded.

Process and Structural Measures	Mean	Standard Deviation
CPOE	91.77	15.26
BMCA	91.22	12.46
IPS	67.47	42.22
SP 1	116.86	7.90
SP 2	115.87	15.08
SP 9	98.13	7.71
Hand Hygiene	71.64	27.77
H-COMP-1	89.81	2.51
H-COMP-2	89.70	2.45
H-COMP-3	81.30	4.18
H-COMP-5	74.21	3.92
H-COMP-6	85.07	3.77

Outcome Measures	Mean	Standard Deviation
Foreign Object Retained	0.015	0.06
Air Embolism	0.001	0.01
Falls and Trauma	0.437	0.46
CLABSI	1.077	0.88
CAUTI	0.862	0.72
SSI: Colon	0.822	0.68
MRSA	1.095	0.81
C. Diff.	0.489	0.37
PSI 4	143.23	17.47
PSI 90	0.98	0.17

LEAPFROG
HOSPITAL
 SAFETY GRADE

A NOTE ABOUT EXTREME VALUES

For hospitals that have an “extreme” value for a particular measure (i.e., a value that exceeds the 99th percentile) Leapfrog “trims” the reported value to the 99th percentile. For example, a rate of 0.50 per 1,000 patient discharges for Foreign Object Retained after Surgery is “trimmed” to 0.352 (e.g., the 99th percentile). Only “trimmed” rates are displayed on the Leapfrog Hospital Safety Grade [website](#). The table below includes the “trim” values for the spring 2023 Leapfrog Hospital Safety Grade. The PSI 90 measure score represents an observed to expected ratio that has already been risk adjusted at both the component PSI level and at the composite level; therefore, the measure is not “trimmed” by Leapfrog.

Measure	99 th Percentile
Foreign Object Retained	0.352
Air Embolism	0.358
Falls and Trauma	2.229
CLABSI	4.462
CAUTI	3.516
SSI: Colon	3.117
MRSA	3.918
C. Diff.	2.066
PSI 4	186.71

Note: Percentiles are rounded to reflect the precision of the raw data.

DEALING WITH MISSING DATA

Due to a variety of reasons, a hospital may not have a measure score for all 22 measures. If a hospital is missing a measure score for any measure (except PSI 90; hospitals missing PSI 90 are not graded), the standard weight of that measure is redistributed to the other measures in the same measure domain. The new weight for each measure within the domain is calculated by re-apportioning the standard weight assigned to the measure with the missing score to other measures within the same domain.

For example, if a hospital is missing a measure score for ICU Physician Staffing because the hospital does not operate an adult or pediatric medical and/or surgical ICU, the standard weight of 7.1% will be re-apportioned to the remaining 11 measures within the process/structural measure domain.

LEAPFROG
HOSPITAL
 SAFETY GRADE

To calculate the new weight of each of the remaining 11 measures in the process/structural measure domain, hospitals can use the formula below or use the Leapfrog Hospital Safety Grade Calculator[®], which can be found on the [Safety Grade Review Website](#). Note that each domain contributes to 50% of the overall letter grade.

*[Standard measure weight / (sum of standard weights for the remaining 11 measures in the process/structural measure domain)]*50% = updated measure weight*

For more information about how the measure weight redistribution is calculated and affects the overall score, please see the Leapfrog Hospital Safety Grade Calculator, which can be found on the last page of the [Safety Grade Review Website](#).

CALCULATING WEIGHTED MEASURE SCORES

To calculate a hospital's numerical safety score, multiply the Z-Score of each process/structural measure by the standard weight assigned to that measure to get the weighted process/structural measure score. If a hospital is missing any process/structural measure scores, see [Dealing with Missing Data](#) to determine the updated measure weight. Then, sum all weighted process/structural measure scores. This is the hospital's overall weighted process/structural measures score.

Multiply the Z-Score of each outcome measure by the standard weight assigned to that measure to get the weighted outcome measure score. If a hospital is missing any outcome measure scores, see [Dealing with Missing Data](#) to determine the updated measure weight. Then, sum all weighted outcome measure scores. This is the hospital's overall weighted outcome measures score.

To calculate the overall Safety Grade for a hospital, add the overall weighted process/structural measure score and the overall weighted outcome measures score. Add 3.0 to your score; this is done to normalize scores to a positive distribution. This final numerical score (typically between 1.0 and 4.0) is then assigned to a letter grade. To assist hospitals in calculating their numerical score, a calculator is available on the [Safety Grade Review Website](#). Letter grade cut-points are published during the [Letter Grade Embargo Period](#).

LEAPFROG
HOSPITAL
 SAFETY GRADE

ADDITIONAL SCORING INFORMATION

TERMS USED IN SCORING AND PUBLIC REPORTING

“Not Available” means that the hospital does not have a score for this measure. This could be because the measure is related to a service the hospital does not provide or because the hospital had too few patients or cases to report data for a condition or procedure. A “Not Available” result does not mean that the hospital withheld information from the public.

In the case of healthcare-associated infections, a SIR is reported as "Not Available" if one of the following applies:

- The number of predicted infections is less than 1.
- The number of observed infections present on admission (community-onset prevalence) was above a pre-determined cut-point.

For more information about NHSN's SIR models, please visit <https://www.cdc.gov/nhsn/pdfs/ps-analysis-resources/nhsn-sir-guide.pdf>.

“Declined to Report” means that a hospital did not voluntarily provide information to the Leapfrog Hospital Survey. Measures scored as “Declined to Report” will not be used in calculating the overall score (see [Dealing with Missing Data](#)).

PUBLIC REPORTING WEBSITE MEASURE CROSSWALK

The table below shows how each measure name is displayed on the [Hospital Safety Grade](#) website.

INFECTIONS

Measure Name	Displayed on Public Reporting Website
MRSA	MRSA Infection
C. Diff.	C. diff Infection
CLABSI	Infection in the blood
CAUTI	Infection in the urinary tract

LEAPFROG
HOSPITAL
SAFETY GRADE

SSI: Colon	Surgical Site Infection after colon surgery
PSI 13: Postoperative sepsis rate*	Sepsis infection after Surgery

PROBLEMS WITH SURGERY

Measure Name	Displayed on Public Reporting Website
Foreign Object Retained	Dangerous object left in the patient's body
PSI 14: Postoperative wound dehiscence rate*	Surgical wound splits open
PSI 4: Death rate among surgical inpatients with serious treatable conditions	Death from serious treatable complications
PSI 9: Postoperative hemorrhage and hematoma rate*	Blood leakage
PSI 10: Postoperative acute kidney injury rate*	Kidney injury after surgery
PSI 11: Postoperative respiratory failure rate*	Serious breathing problem
PSI 15: Unrecognized abdominopelvic accidental puncture/laceration rate*	Accidental cuts and tears

SAFETY PROBLEMS

Measure Name	Displayed on Public Reporting Website
CMS Medicare PSI 90: Patient safety and adverse events composite	Harmful events
PSI 3: Pressure ulcer rate*	Dangerous bed sores
Falls and Trauma	Patient falls and injuries

LEAPFROG
HOSPITAL
SAFETY GR^{AD}DE

PSI 8: In-hospital fall with hip fracture rate*	Falls causing a broken hip
PSI 6: Iatrogenic pneumothorax rate*	Collapsed lung
PSI 12: Perioperative pulmonary embolism or deep vein thrombosis rate*	Dangerous blood clot
Air Embolism	Air or gas bubble in the blood

PRACTICES TO PREVENT ERRORS

Measure Name	Displayed on Public Reporting Website
Computerized Physician Order Entry (CPOE)	Doctors order medications through a computer
Bar Code Medication Administration (BCMA)	Safe medication administration
Hand Hygiene	Handwashing
H-COMP-5: Communication about Medicines	Communication about medicines
H-COMP-6: Discharge Information	Communication about discharge
Safe Practice 2: Culture Measurement, Feedback & Intervention	Staff work together to prevent errors

LEAPFROG
HOSPITAL
 SAFETY GRADE

DOCTORS, NURSES, & HOSPITAL STAFF

Measure Name	Displayed on Public Reporting Website
Safe Practice 1: Culture of Leadership Structures and Systems	Effective leadership to prevent errors
Safe Practice 9: Nursing Workforce	Enough qualified nurses
ICU Physician Staffing (IPS)	Specially trained doctors care for ICU patients
H-COMP-2: Doctor Communication	Communication with doctors
H-COMP-1: Nurse Communication	Communication with nurses
H-COMP-3: Staff Responsiveness	Responsiveness of hospital staff

*Note: CMS calculates PSI 90 using the ten (10) component PSIs listed above. While scores for each of the 10 component PSIs will NOT be used to calculate spring 2023 Hospital Safety Grades, they will be publicly reported on the Hospital Safety Grade website.

SHARED CMS CERTIFICATION NUMBERS

All hospitals that share a CMS Certification Number (CCN) will be assigned the same source data as reported by CMS. Affected measures include the HCAHPS, Hospital-Acquired Conditions, Healthcare-Associated Infections (if secondary data source is used), and Patient Safety Indicators.

UPDATES TO DATA USED IN THE LEAPFROG HOSPITAL SAFETY GRADE

The Leapfrog Hospital Safety Grade relies on publicly available data that hospitals have had the opportunity to review for accuracy. Therefore, Leapfrog does not allow hospitals to make updates to their data following the Data Snapshot Date. In January of each year, Leapfrog publishes the Data Snapshot Dates for each of the two Leapfrog Hospital Safety Grade public releases at <https://www.hospitalsafetygrade.org/for-hospitals/key-dates-and-information>. Leapfrog publishes these dates to give hospitals and other stakeholders advance notice so they can be prepared to submit a Leapfrog Hospital Survey and monitor their performance on CMS measures used in the Safety Grade.

In addition, Leapfrog holds a Courtesy Review Period to give hospitals an additional opportunity to review the data that will be used to calculate their hospital's Safety Grade. The Review Period is an opportunity for hospitals to review the data for accuracy (i.e., identify recording errors, hospital name and address changes, etc.) on a secure website and review changes to the scoring algorithm.

DATA FROM THE LEAPFROG HOSPITAL SURVEY

During the Safety Grade Review Period (February 21 – March 12), Leapfrog will only make corrections to a hospital's data from the 2022 Leapfrog Hospital Survey if a recording error is identified (i.e., we have recorded a different measure score than what is posted on our Survey Results website) or a scoring error is identified (i.e., Leapfrog has calculated an incorrect measure score based on the submitted responses and Leapfrog's published scoring algorithms). Updates to Leapfrog Hospital Survey data that are submitted after the Data Snapshot Date will **not** be included in the current Leapfrog Hospital Safety Grade. Hospitals submitting a Leapfrog Hospital Survey are urged to take advantage of the opportunity to review their Survey Results for accuracy and completeness prior to each of the two published Data Snapshot Dates.

HOW HOSPITALS CAN REVIEW LEAPFROG HOSPITAL SURVEY RESULTS PRIOR TO THE DATA SNAPSHOT DATE

The Leapfrog Hospital Survey is open from April 1 to November 30 of each year. Following the Submission Deadline (June 30), Survey Results are published monthly on a secure 'Hospital Details' page and a public website (ratings.leapfroggroup.org). Hospitals are urged to review their Survey Results immediately. Hospitals that identify any reporting errors are instructed to log back into the Survey to submit a correction. Hospitals can correct and re-submit a previously

LEAPFROG
HOSPITAL
 SAFETY GRADE

submitted Survey until the Survey closes for the year. Note that corrections submitted after the Data Snapshot Date are not included in the current Leapfrog Hospital Safety Grade. Leapfrog has several automated processes in place to prevent hospitals from making data entry errors in the Online Survey Tool and to enhance the overall accuracy of the Survey Results. Learn more at <http://www.leapfroggroup.org/survey-materials/data-accuracy>.

DATA FROM THE CENTERS FOR MEDICARE & MEDICAID SERVICES (CMS)

During the Safety Grade Review Period (February 21 – March 12), Leapfrog will only make corrections to a hospital's data from CMS if the correction is issued by CMS and posted on either <https://data.cms.gov/provider-data/> or <https://data.cms.gov/quality-of-care/deficit-reduction-act-hospital-acquired-condition-measures>. If a hospital has identified an error with a measure score published by CMS, and CMS cannot post a correction within the review period, the measure score will not be used in calculating the hospital's Safety Grade, provided that the hospital can document that CMS has agreed to publicly issue a correction or remove the measure score from public reporting. Hospitals participating with CMS are urged to take advantage of the opportunity to participate in the CMS 30-day review periods.

CMS FOOTNOTE 23 POLICY

Leapfrog will notify hospitals that have CMS footnote 23 present for one or more claims-based measure scores (e.g., DRA HAC Rate, PSI 4 rate, or PSI 90 rate) at the start of the Courtesy Review Period. Footnote 23 indicates that "The data are based on claims that the hospital or facility submitted to CMS. The hospital or facility has reported discrepancies in their claims data." Hospital CEOs can request that Leapfrog use the measure score that is accompanied by the footnote. Written requests must be received prior to the close of the Safety Grade Review Period. If written requests are not received by the close of the Review Period, the measure will not be used to calculate the Hospital Safety Grade.

For hospitals that submit a Leapfrog Hospital Survey by the Data Snapshot Date, the CEO, Primary Survey Contact, and Secondary Survey Contact will be notified at the email addresses included in the Hospital's Survey Profile. For hospitals that do not submit a Leapfrog Hospital Survey by the Data Snapshot Date, the CEO will be contacted by certified letter.

HOW HOSPITALS CAN REVIEW CMS DATA PRIOR TO THE DATA SNAPSHOT DATE

CMS administers several hospital-based reporting and payment programs including the Inpatient Quality Reporting Program, HAC Reduction Program, and Value-based Purchasing Program. Several measures collected and calculated by CMS via its various hospital-based programs are used in the Leapfrog Hospital Safety Grade. CMS provides hospitals with a 30-day preview period before publishing measure scores on <https://data.cms.gov/provider-data/> or <https://data.cms.gov/quality-of-care/deficit-reduction-act-hospital-acquired-condition-measures>. More information is available at <https://qualitynet.org>.

LEAPFROG
HOSPITAL
SAFETY GRADE

HOW TO PARTICIPATE IN THE LEAPFROG HOSPITAL SURVEY

If a hospital did **not** complete a 2022 Leapfrog Hospital Survey by November 30, Survey Results were not used to calculate the spring 2023 Leapfrog Hospital Safety Grade. Hospitals that would like Survey Results included in the fall 2023 Hospital Safety Grade must submit a 2023 Leapfrog Hospital Survey (including the CPOE Evaluation) by June 30, 2023. Hospitals will be able to review their publicly reported Survey Results in July and respond to any issues identified by Leapfrog's Extensive Monthly Data Verification before the Data Snapshot Date for the fall 2023 Safety Grade of August 31. More information is available at <https://leapfroggroup.org/survey>.

LEAPFROG HELP DESK

If you have any questions regarding the scoring methodology, please contact the Help Desk at <https://leapfroghelpdesk.zendesk.com>.

Exhibit 7

2024 Regional Leader Communications Toolkit: Launching Leapfrog Surveys

Dear Regional Leaders,

We are excited to launch the 2024 Leapfrog Surveys in our collective effort to make **giant leaps for patient safety**. Hospitals and ambulatory surgery centers (ASCs) continue to face new and evolving challenges. Many of these challenges are receiving heightened media attention, as nursing and other health care worker shortages continue to escalate. This also presents a unique opportunity for our movement to put patient safety on the map and ensure it is a priority for our communities, policymakers, business leaders, and for the hospitals and surgery centers that provide care.

Thanks to the partnership between Leapfrog and Leapfrog Regional Leaders, we received over 2,100 submissions, representing 73% of hospital beds. The ASC Survey is much newer, and though ASC participation lags, it is growing. We hope to turbo-charge that growth this year. Consumers and purchasers deserve to compare safety and quality information on hospital outpatient surgical units along with surgery centers, since they perform most of all procedures done in the country. There has never been a more important time for transparency and Leapfrog's role in keeping health care facilities accountable.

The 2024 Communications Toolkit offers you instructions for launching the Leapfrog Hospital Survey and the Leapfrog ASC Survey in your region, focusing on the critical initial communication you carry out to encourage hospital and ASC participation. It is designed to support you at different stages of the process when it is most useful to you. Additional communication materials included in this toolkit are designed to further help you engage the public, including employers, purchasers, hospitals, and ASCs, such as our comprehensive *Common Objections and Frequently Asked Questions About Leapfrog and Its Ratings* and the *Regional Leaders Best Practices Toolkit*.

As always, we look forward to working alongside you, your members, and your communities to improve transparency and excellence throughout the country.

All the best,

Jill A. Berger
Director, Employer & Payor Engagement
The Leapfrog Group

X. Regional Leader Coverage Areas

I. STEP-BY-STEP: HOW TO LAUNCH THE LEAPFROG HOSPITAL SURVEY & LEAPFROG ASC SURVEY IN YOUR MARKET

Please note: In 2024, Leapfrog will manage the Survey invitation letter to ASCs but will provide Regional Leaders with tools and template materials to supplement outreach in your communities. Regional Leaders are not responsible for sending security code sheets. If a hospital or ASC needs a copy of their security code, they must complete the Security Code Request form available on Leapfrog's website or by contacting the Help Desk.

1. **Get members, hospitals, and ASCs excited about the 2024 Surveys.**
 - Include the Survey launch in your newsletter and member communications along with posting content on your social media channels. Think about highlighting interesting questions/issues on the Survey, such as informed consent or billing ethics. You will find everything you need in this toolkit.
 - Consider any new communication channels that might help you reach the ASC community, like local ASC association publications and events.
 - Think about how you can involve your employers by having them sign on to your letters or attend meetings you have scheduled with some of your facilities.
2. **Personalize template letters* asking HOSPITALS to participate in both the inpatient and outpatient sections of the Survey**
 - Leapfrog provides template letters asking hospitals to participate in the Hospital Survey. You can customize them for your market and add your letterhead.
 - Clearly outline how you plan to use the Hospital Survey data and share it with your members.
 - Ask as many of your employer and purchaser members as possible to sign your letters. This can significantly increase a facility's likelihood of participation.
3. **Work with Leapfrog to invite ASCs to participate in the Leapfrog ASC Survey**
 - Regional Leaders are strongly encouraged to use the mailing list provided by Leapfrog to conduct ongoing outreach to ASCs in your community using provided template letters in the appendix.
 - Leapfrog will send initial letters to ASCs on Regional Leader's letterhead with logos and signatures requesting their participation and providing instructions on obtaining a Security Code.
 - Ask as many of your employer and purchaser members as possible to sign your letters. This can significantly increase a facility's likelihood of participation.
 - If an ASC needs a copy of their security code, they need to complete and submit the Security Code Request form: <http://bit.ly/ASCSecurityCode>.
4. **Send HOSPITAL letters by mail or email no earlier than March 30, but no later than April 30.**
 - Notify Robyn Nabi () if you are unable to send letters this year and require Leapfrog's assistance.
 - Merge the customized hospital letters and the hospital mailing list to generate individual letters and envelopes for each hospital in the region and address the CEO. **Emails can only be sent to the hospital's CEO if the hospital submitted a 2023 Survey.**
 - Notify Robyn Nabi (rnabi@leapfrog-group.org) when you have mailed or emailed the invitations to your hospitals.
 - Keep a list of any returned mail and send any address or CEO updates to Robyn Nabi throughout the year.
 - **Reminder:** If a hospital needs a copy of their security code, they need to complete and submit the Security Code Request form: <http://bit.ly/HospitalSecurityCode>.
5. **Follow up with those who have not responded.**
 - Leapfrog keeps track of Hospital Survey responses by region and will report the status to Regional Leaders in regular readout files sent by email and saved on the Regional Leader section of the Leapfrog website. Interim files will be sent beginning in May, and monthly files will be sent the last week of July through February after the first June 30 Submission Deadline.
 - Follow up with HOSPITALS that have not submitted a Survey as the June 30 Submission Deadline approaches as well as in the fall leading up to the November 30 Late Submission Deadline.

- Leapfrog will provide Regional Leaders with a file of participating facilities by state as well as a template letter so that you can follow up with those that have not participated.

6. Thank Survey participants.

- Using the list of Survey participants and the letter template in this document, send hospitals and ASCs thank you letters and share how you plan to use the data.
 - Remind participating facilities that their results will be publicly reported in July.
- Consider hosting recognition events (including virtual events) to thank hospitals and ASCs who participated and recognize performance.

7. Use results released by Leapfrog.

- Be sure to consult the Regional Leader Best Practices Guide for ideas on using Leapfrog results, including:
 - Encourage your members to use Leapfrog for payment policies, tiering, and public reporting. The measures on the Leapfrog Hospital Survey are selected because they are critical for improving health outcomes and reducing costs for purchasers and consumers.
 - Tailor press announcement templates to highlight Survey performance and why it matters to people in your community.

Reminder: Template letters are available in **Section VII** of this packet

II. BEST PRACTICES USED BY REGIONAL LEADERS

Below are several ideas that have been successful for other Regional Leaders when encouraging participation that you may want to consider trying in your market.

LAUNCHING THE LEAPFROG SURVEYS IN YOUR COMMUNITY

- **Engage employers** with purchasing power to influence hospital decision-making based on Hospital Survey participation. Discuss with employers the differences in quality of care between facilities from which beneficiaries are seeking care—are these the best choices for the care needed? Ask employers to sign the invitation letters with you; public entities (e.g., school systems, city and local governments) can have great purchasing influence on the provider community because of their size and scope.
- **Distribute a press release** to local media about your efforts to encourage hospital transparency through the Leapfrog Hospital Survey and the Leapfrog ASC Survey.
- **Meet with local media** to discuss how you will work with them to share ongoing efforts and results. Discuss one or more items in the survey that might make a good story, such as the new patient consent standard, billing ethics, medication safety, maternity care, or the new Hospital Survey question on C-section rates by race and ethnicity. Encourage them to call attention to the hospitals and ASCs that decline to respond to your request for Survey participation.
- **Reach out to ASCs in your region** inviting them to participate in the ASC Survey. Leapfrog will send the security code and initial invitation to ASCs, but Regional Leaders are urged to send a second letter introducing your organization to facilities and encouraging their participation on behalf of employers in your region. We recognize it is sometimes difficult to identify the right person at an ASC, but as they continue to hear from you over time and the survey results gain more prominence, they will likely become more responsive. We are playing the long game, and persistence is critical.
- **Include an “Intent to Submit” form** with the Hospital Survey invitation or as a follow-up to an invitation and in an ASC-specific mailing. Immediate feedback has been found to improve the likelihood of Survey submission in some markets. If the facility does not plan to submit a 2024 Survey, ask them to indicate on the form why they’ve chosen to decline your call for transparency and public reporting on their quality and safety practices. Including a list of hospitals in your region that respond to the Survey may be helpful. Consider sending this form online using a tool such as Constant Contact or Survey Monkey to make it easier for CEOs to respond in a timely manner.
- **Meet with the CEO and quality improvement staff from health systems** to discuss the importance of the Leapfrog Hospital Survey. Consider including an employer or purchaser. Commitment from system-level executives to participate in the Survey will often result in all facilities within the system being required to submit a Survey. This will also be a good opportunity to illustrate the value many systems find in being able to compare and benchmark their individual facility’s performance on the Survey metrics, including the opportunity to compare their outpatient facility performance to that of ASCs.

BUILDING RELATIONSHIPS WITH ASCS

Engaging with ASCs and increasing participation in the Leapfrog ASC Survey is a priority for Leapfrog in 2024. Below are some ideas to help you identify ASCs and educate them about Leapfrog’s value. We encourage you to select one or two of these strategies and try them out with five ASCs in your region.

- **Meet with local ASC Associations and ASC Administrators in your region** to discuss the value of participating in the Leapfrog ASC Survey, including public reporting benefits, benchmarking, and comparison to hospital outpatient departments.
- **Reach out to the local business bureaus** to help identify ASCs in your area.
- **Get your member employers involved** by asking them to sign participation letters and by joining you on visits to local ASC facilities.
- **Recognize Top ASCs in your area** through events with employer members or media opportunities to demonstrate the value of participating and encourage other ASCs to participate.

IDEAS FOR ENCOURAGING NON-RESPONDENTS TO THE LEAPFROG SURVEYS

The following are actions that your coalition may want to take with non-responding facilities to urge participation in the Leapfrog Hospital Survey and Leapfrog ASC Survey. **It is strongly encouraged that you and/or your members or board pursue these strategies and familiarize yourself with the Common Objections and FAQs resource. Leapfrog staff are always available to provide follow-up and clarifications to hospitals or ASCs as well.**

- **Make phone contact with facility executive leadership.** You can find hospital CEO names and phone numbers on your roster and ASC executive names on the ASC mailing list.
- **Ask your local health plans to follow-up** with their hospital and ASC contacts and urge participation.
- **Contact individual hospital board members** indicating that the hospital has not yet completed the Survey, particularly board members who are part of your organization or who represent large employers.
- **Phone calls to the hospital board chairperson** by your organization's CEO or other senior executives.
- **Share with local media** the names of the first hospitals and ASCs to respond and the names of those that are not responding.

REGIONAL LEADER BEST PRACTICES GUIDE

Additionally, Leapfrog has developed a separate comprehensive **Regional Leader Best Practices Guide**. This guide includes several tactics to use Leapfrog data beyond launching the Surveys, including hosting recognition events for top performing facilities and member employee engagement ideas. The guide compiles examples from Regional Leaders that you may want to consider implementing in your market.

V. KEY DATES FOR THE 2024 SURVEY CYCLE

FOR REGIONAL LEADERS

March 30 – April 30	Mail or email Hospital Invitation Letters <i>Optional: Mail or email request letter to ASCs</i>
June 30	2024 Submission Deadline
June and July	Acknowledge facilities that met the June 30 Submission Deadline
Monthly beginning in June	Review Readout File to identify hospitals that have participated Send reminders to non-participants and thank you letters to participating facilities
September	Send second Survey invitation letter to remind non-participating hospitals of the November 30 Late Submission Deadline
November 30	Late Submission Deadline
December	Acknowledge Leapfrog Top Hospitals and Top ASCs in your community Attend Leapfrog's Annual Meeting and Regional Leader meeting

FOR HOSPITALS & ASCS

April 1	2024 Leapfrog Hospital Survey and Leapfrog ASC Survey open
April & May	<u>Leapfrog Hospital Survey</u> and <u>Leapfrog ASC Survey</u> Town Hall Calls
June 30	2024 Submission Deadline
Monthly beginning in July	Data Review: Facilities have 30 days to submit corrections and/or confirm responses
July 12	Hospital detail page showing results available to hospitals 2024 Survey Results released and posted at https://www.ratings.leapfroggroup.org
August 31	Top Hospital Submission Deadline for hospitals to submit a completed Survey if they would like to be eligible for Top Hospitals Data Snapshot Date for the fall 2024 Leapfrog Hospital Safety Grade
November 30	Late Submission Deadline: No Leapfrog Hospital Survey submissions will be accepted after this date.
December 2024- January 2025	Data review and correction period for previously submitted Surveys

IV. OVERVIEW OF THE 2024 LEAPFROG SURVEYS

To ensure the Leapfrog Hospital Survey and the Leapfrog ASC Survey align with the latest science and the public reporting needs of purchasers and consumers, Leapfrog's research team annually reviews the literature and convenes expert panels. Facilities that voluntarily complete the Leapfrog Surveys demonstrate their commitment to transparency by providing information purchasers and consumers need to choose the best facility for their care.

Leapfrog Hospital Survey

The Leapfrog Hospital Survey uses national performance measures to evaluate individual hospitals on the safety, quality, and efficiency of inpatient and outpatient care. The 2024 Leapfrog Hospital Survey can be found [here](#).

Leapfrog Ambulatory Surgery Center (ASC) Survey

Leapfrog launched the Leapfrog ASC Survey in 2019, expanding our nearly 25-year long experience collecting and publicly reporting safety and quality of hospitals via the Leapfrog Hospital Survey. The Leapfrog ASC Survey uses national performance measures to evaluate individual surgery centers on safety, quality, and efficiency. Below is an overview of the Survey's main sections and key changes for 2024. The 2024 Leapfrog ASC Survey can be found [here](#).

Important Note: The results of the Leapfrog ASC Survey and Leapfrog Hospital Survey are publicly reported by facility at <https://Ratings.LeapfrogGroup.org>

VI. MATERIALS TO SHARE WITH HOSPITALS AND ASCs

EXPLANATION OF MATERIALS

WHAT IT IS	IDEAS ON HOW TO USE THIS
a. Infographic: Why Hospitals and ASCs Should Submit a Survey	Distribute to hospitals and ASCs with Survey invitation letters and email to your employers and purchasers
b. "Intent to Submit" Form	Send along with letters as a way to keep track of which hospitals plan to participate
c. Leapfrog Hospital Survey Webinar Series	Communicate to hospitals as needed
d. Copy about Leapfrog's System Services	Communicate to hospitals and ASCs as needed
e. Value Resources for ASCs	Share with ASCs to help encourage participation

a. INFOGRAPHIC ON WHY HOSPITALS AND ASCS SHOULD SUBMIT A SURVEY

Click here to view the infographic, download, and/or print it for distribution.

Why You Should Participate in the Leapfrog Surveys

Thousands of employers and other purchasers across the country ask hospitals and surgery centers to participate in the Leapfrog Hospital Survey and the Leapfrog ASC Survey. They are the only source of nationally reported ratings by facility on safety and quality issues of importance to purchasers and the public. The measures on the Surveys are predicated on the latest science and reviewed and updated annually by top national expert panels to reflect the current evidence base.

By participating in the Surveys, your facility will be able to:

☐

We intend to submit the Leapfrog [Hospital/ASC] Survey for 2024.

Survey Contact Name: _____

Phone Number: _____

E-mail Address: _____

The information will be used to send a reminder about the Survey from [REGIONAL LEADER]

☐

We do not intend to submit the Leapfrog [Hospital/ASC] Survey at this time.

Would you please explain why you do not wish to participate?

[REGIONAL LEADER] represents employers in your market. The Survey is very important to them, and they expressly request your participation. If you would like to discuss your decision via a phone call or web conference, please let us know and we will arrange it for you.

c. COPY ABOUT THE LEAPFROG HOSPITAL SURVEY WEBINAR SERIES

Are you a hospital submitting to Leapfrog for the first time? Get ahead of the game by registering for the Leapfrog Hospital Survey Webinar Series.

The Leapfrog Hospital Survey Webinar Series is held monthly from March to December. Each one-hour webinar includes a presentation as well as a question-and-answer session. The Webinar Series is designed for hospitals that would benefit from a more interactive presentation of Survey materials and information. Though nothing presented in the Webinar Series differs from the information available in the printed materials or through the free electronic Help Desk, many hospital leaders find the interactive format and opportunity for Q&A helpful.

For an annual fee of \$500 per user, hospitals that join the Webinar Series will have access to:

- Topical monthly presentations that focus on Survey and CPOE Evaluation Tool measures and specifications, scoring information, frequently asked questions, technical assistance, and public reporting
- 20-minute open Q & A sessions
- Presentations by Leapfrog's Expert Panel members
- Library of all slide decks and recordings from March-December
- Monthly office hours with the Leapfrog Help Desk

Registration for the 2024 Webinar Series is now open. Please [click here](#) to register.

d. COPY ABOUT HOSPITAL SYSTEM SERVICES

Many large and small health systems across the country engage all hospitals in their system in completing the Leapfrog Hospital Survey. By securing participation from all facilities, health system leaders can easily benchmark performance, identify high and low performers, and demonstrate their value to employers and purchasers in their community, like this high performing health system. Leapfrog offers several tools to assist health systems in their completion of the Leapfrog Hospital Survey and analysis of results. Visit Leapfrog's website to learn more and contact the Help Desk with any questions.

e. ASC VALUE RESOURCES

Why participate in the Leapfrog ASC Survey? Through the Leapfrog ASC Survey, ambulatory surgery centers can benefit from an independent assessment of their quality and safety available to the public. The Survey prominently positions ASCs with employers and purchasers, provides benchmarking opportunities, and galvanizes improvement. The resources below highlight why the Leapfrog ASC Survey will provide value to your surgery center:

- **Discounted National Association for Healthcare Quality Training:** ASCs can get a 25% discount on the HQ Concepts in Healthcare Quality and Safety for Frontline Staffs training. Reach out to the Leapfrog Help Desk for details.
- **Becker's ASC Article:** Reporting to the Leapfrog ASC Survey: 4 competitive advantages
 - This article outlines the benefits of participation as told by ASC leaders and employers

- **AORN Podcast Series: ASCs Today**
 - A digestible podcast series with Association of periOperative Registered Nurses (AORN) President Linda Groah and Leapfrog President and CEO Leah Binder discussing nursing leadership, workforce issues, and safety risks.
- **Leapfrog Case Study: How the Leapfrog ASC Survey Highlights the Importance of Transparency**
 - Leapfrog President and CEO Leah Binder interviews members of Proliance Surgeons' Center for Spine and Joint Replacement Surgery in Washington.
- **Leapfrog Case Study: How the Leapfrog Survey Gives Surgery Centers Credibility Through Accountability**
 - Leapfrog President and CEO Leah Binder interviews Coronado Surgery Center and Owner in Nevada.

AVIII. CUSTOMIZABLE TEMPLATE LETTERS FOR THE 2024 LEAPFROG SURVEYS

The following are template letters that Regional Leaders can customize and send to hospital and ASC executives. Hospital invitation letters must be sent to each hospital on the roster, including optional relevant enclosures. **As a reminder, Regional Leaders are not responsible for mailing security codes to CEOs in 2024.** Leapfrog is sending invitation letters to ASCs; Regional Leaders are not responsible for this mailing.

The package contains the following templates letter/emails:

- A. For currently submitting hospitals
- B. For hospitals new to the Survey**
- C. For system-level executives on the Hospital and ASC Surveys (*optional to send*)
- D. For ASC Survey to reinforce participation (*strongly encouraged to send*)
- E. Participation reminder (*to be sent in May*)
- F. Thank you for hospital CEOs
- G. Thank you for ASC CEOs
- H. For September: follow-up Survey mailing in high-participation states
- I. For September: follow-up Survey mailing in low-participation states
- J. For currently submitting ASCs
- K. For health plans to send: Hospitals
- L. For health plans to send: ASCs

Suggestions for Using These Letters in Your Market

- **Make it your own.** Although we provide this template messaging, we strongly encourage Regional Leaders to customize these letters to meet your specific market's needs by inserting relevant regional statistics and other information that will appeal to local facilities.
- **Don't forget health system leaders.** You may wish to send a letter to a health system contact in your area. This can be an effective strategy to increase participation in your market. We strongly encourage you to customize the letters per system so they have a clear picture of how reporting to the Surveys can benefit them and understand how you will use their results, as well as to remind them about the ASC Survey and outpatient section of the Hospital Survey.
- **Print on your letterhead.** We suggest printing the letters on your organization's letterhead or perhaps creating a new letterhead if multiple Regional Leaders are collectively requesting hospital participation in a certain area. Have the letter signed by your CEO or Executive Director. Also consider including the Leapfrog Regional Leader logo.
- **Co-signers help.** Consider having multiple purchasers/payors with lives/enrollees in your region co-sign the letter. The more parties you can get to sign on to this letter, the better. Some coalitions also include a second page that lists all their employer members showing they represent their interests in asking for participation.
- **Cite how you will use Leapfrog data.** Describe to your hospitals how you plan to use the data (such as in a consumer guide) and how payors are planning to use or are currently using Leapfrog's Survey data (e.g., value-based purchasing program, high performance network determination, consumer directory). Examples are listed in the template letters below.
- **Reminders help.** Leading up to June 30, it's a good idea to send an email reminder to all facilities that the deadline is approaching and you're looking forward to their participation by the Submission Deadline.
- **Prompt more Survey responses with a fall follow-up.** Many Regional Leaders have found tremendous success in sending a second mailing to non-participating facilities in early fall; this can be an effective strategy to increase participation by facilities that missed the June 30 Submission Deadline but still have time before the November 30 Late Submission Deadline.

A. TEMPLATE LETTER/EMAIL FOR CURRENTLY SUBMITTING HOSPITALS

[Date]
[Prefix] [First] [Last]
Chief Executive Officer
[Facility Name]
[Street Address]
[City, State, ZIP]

Dear [CEO Name]:

On behalf of [REGIONAL LEADER ORGANIZATION] and our [NUMBER] members including [CONSIDER NAMING A FEW BIG NAMES HERE IF YOU DON'T KNOW THIS HOSPITAL WELL], we are writing to request your participation in the 2024 Leapfrog Hospital Survey, which opens on April 1. We, along with our entire community, appreciate your past participation and look forward to your continued dedication to transparency.

More than 2,100 hospitals submitted a Survey in 2023, accounting for 73% of inpatient beds across the country. [INSERT STAT SUCH AS PERCENT INCREASE IN HOSPITALS PARTICIPATING IN 2023 SURVEY, OR PERCENTAGE OF HOSPITALS THAT PARTICIPATE LOCALLY]. Purchasers feel that your continued participation is vital for our region so we can achieve real progress toward a safer, higher-quality, more transparent health care system for all.

By participating in the Leapfrog Hospital Survey, your hospital can:

- 1. Demonstrate your responsiveness to employers in our community who depend on your services**
- 2. Benchmark your performance on quality and safety metrics and create a performance improvement plan**
- 3. Receive public recognition by [REGIONAL LEADER] for your transparency and performance**
- 4. Be eligible for Awards programs such as Leapfrog Top Hospital**
- 5. Ensure your most up-to-date performance is reflected in your Leapfrog Hospital Safety Grade (if applicable)**
- 6. Demonstrate your commitment to quality and safety improvement to our community, including your staff and Board**

Additionally, only hospitals that have submitted a 2024 Leapfrog Hospital Survey will be eligible to apply for the Recognized Leader in Caring for People Living with Diabetes designation. This recognition program started in 2023 through a partnership between Leapfrog and the American Diabetes Association (ADA). The first-ever national recognition program recognizes hospitals providing safe, high-quality care for patients living with diabetes. General acute care and adult specialty hospitals can apply for the designation. The application will open in July 2024. Learn more at www.leapfroggroup.org/recognized-leader-diabetes.

Leapfrog's public reporting website, www.ratings.leapfroggroup.org, allows users to search for and compare hospital and ASC ratings to better understand safety and quality across facilities. Purchasers in [REGION] intend to share these results with their employees and use your performance metrics as part of their value strategy.

You may use the same Security Code you used for previous Surveys. If you need a copy of your Security Code, please complete and submit Leapfrog's Security Code Request form: <http://bit.ly/HospitalSecurityCode>. Though the deadline to complete the Survey is June 30, you can resubmit your Survey at any time throughout the Survey cycle; publicly reported results are updated monthly. For hospitals that do not meet the Submission Deadline, late submissions are accepted through November 30, and until then, incomplete sections are reported as "Declined to Respond."

Visit www.LeapfrogGroup.org/Hospital to begin today. Please contact me at [insert lead tel #] if you have any questions about the reporting process and Leapfrog's activity in our region. The Leapfrog Help Desk is available for any technical or content questions about the Survey and can be accessed at <https://leapfroghelpdesk.zendesk.com>.

Sincerely, [LEAD REGIONAL LEADER]

B. TEMPLATE LETTER FOR HOSPITALS NEW TO THE SURVEY

[Date]

[Prefix] [First] [Last]
 Chief Executive Officer
 [Facility Name]
 [Street Address]
 [City, State, ZIP]

Dear [CEO Name]:

On behalf of [REGIONAL LEADER ORGANIZATION] and our [NUMBER] members including [CONSIDER NAMING A FEW BIG NAMES HERE IF YOU DON'T KNOW THIS HOSPITAL WELL], we are writing to strongly encourage you to participate in the 2024 Leapfrog Hospital Survey which opens on April 1. We, along with our entire community, are looking for your hospital to commit to transparency by reporting on your safety and quality performance. Pandemic setbacks have propelled the issue of patient safety as a national priority. It is more important than ever to participate in Leapfrog's critical patient safety efforts to demonstrate your commitment to quality and safety.

More than 2,100 hospitals submitted a Survey in 2023, accounting for 73% of inpatient beds across the country. [INSERT STAT SUCH AS PERCENT INCREASE IN HOSPITALS PARTICIPATING IN 2023 SURVEY, OR PERCENTAGE OF HOSPITALS THAT PARTICIPATE LOCALLY]. Purchasers feel that your participation is vital for our region so we can achieve real progress toward a safer, higher-quality, more transparent health care system for all.

By participating in the Leapfrog Hospital Survey, your hospital can:

1. **Demonstrate your responsiveness to employers in your community who depend on your services**
2. **Benchmark your performance on quality and safety metrics and create a performance improvement plan**
3. **Receive public recognition by [REGIONAL LEADER] for your transparency and performance**
4. **Be eligible for Awards programs such as Leapfrog Top Hospital**
5. **Ensure your most up-to-date performance is reflected in your Leapfrog Hospital Safety Grade (if applicable)**
6. **Demonstrate your commitment to quality and safety improvement to our community, including your staff and Board**

Additionally, only hospitals that have submitted a 2024 Leapfrog Hospital Survey will be eligible to apply for the Recognized Leader in Caring for People Living with Diabetes designation. This recognition program started in 2023 through a partnership between Leapfrog and the American Diabetes Association (ADA). The first-ever national recognition program recognizes hospitals providing safe, high-quality care for patients living with diabetes. General acute care and adult specialty hospitals can apply for the designation. The application will open in July 2024. Learn more at www.leapfroggroup.org/recognized-leader-diabetes.

Leapfrog's public reporting website, www.ratings.leapfroggroup.org, allows users to search for and compare both hospital and ASC ratings to better understand safety and quality across facilities. Purchasers in [REGION] intend to share these results with their employees and use your performance metrics as part of their value strategy.

To receive the security code needed to complete the Survey, please complete and submit the Security Code Request form: <http://bit.ly/HospitalSecurityCode>. Though the deadline to complete the Survey is June 30, you can resubmit your Survey at any time throughout the Survey cycle; publicly reported results are updated monthly. For hospitals that do not meet the Submission Deadline, late submissions are accepted through November 30, and until then, incomplete sections are reported as "Declined to Respond."

Visit www.LeapfrogGroup.org/Hospital to begin today. Please contact me at [insert lead tel #] if you have any questions about the reporting process and Leapfrog's activity in our region. The Leapfrog Help Desk is available for any technical or content questions about the Survey and can be accessed at <https://leapfroghelpdesk.zendesk.com>.

Sincerely, [LEAD REGIONAL LEADER]

C. TEMPLATE LETTER/EMAIL FOR SYSTEM-LEVEL EXECUTIVES ON THE HOSPITAL AND ASC SURVEYS

[Date]

[Prefix] [First] [Last]
Chief Executive Officer
[ASC Name]
[Street Address]
[City, State, ZIP]

Dear [CEO Name]:

On behalf of [REGIONAL LEADER] and our [NUMBER] members including [CONSIDER NAMING A FEW BIG NAMES HERE IF YOU DON'T KNOW THIS HOSPITAL/ASC/SYSTEM WELL], we are writing to strongly encourage [all facilities within HEALTH SYSTEM NAME] [or: your facility] to participate in the 2024 Leapfrog Surveys, which open on April 1. Inpatient hospitals and hospital outpatient departments are invited to participate in the Leapfrog Hospital Survey and ambulatory surgery centers are invited to participate in the Leapfrog ASC Survey.

More than 2,100 hospitals submitted a Survey in 2023, accounting for 73% of inpatient beds across the country. [INSERT STAT SUCH AS NAMES OF HEALTH SYSTEMS/ASCs THAT PARTICIPATE IN YOUR REGION]. Purchasers feel that your participation is vital so we can show real progress toward a safer, higher-quality, more transparent health care system for all.

By participating in the Leapfrog Surveys, your [system/facility] can:

1. **Demonstrate your responsiveness to employers in our community who depend on your services**
2. **Access customized analytics comparing performance between facilities in your system**
3. **Benchmark your performance on quality and safety metrics and create a performance improvement plan**
4. **Receive public recognition by [REGIONAL LEADER] for your transparency and performance**
5. **Be eligible for Awards programs such as Leapfrog Top Hospital and Top ASC**
6. **Ensure your most current performance is reflected in your Leapfrog Hospital Safety Grades (if applicable)**
7. **Demonstrate your commitment to quality and safety improvement to our community, including your staff and Board**

Additionally, only hospitals that have submitted a 2024 Leapfrog Hospital Survey will be eligible to apply for the Recognized Leader in Caring for People Living with Diabetes designation. This recognition program started in 2023 through a partnership between Leapfrog and the American Diabetes Association (ADA). The first-ever national recognition program recognizes hospitals providing safe, high-quality care for patients living with diabetes. General acute care and adult specialty hospitals can apply for the designation. The application will open in July 2024. Learn more at www.leapfroggroup.org/recognized-leader-diabetes.

Leapfrog's public reporting website, www.ratings.leapfroggroup.org, allows users to search for and compare hospital and ASC ratings to better understand safety and quality across facilities. Purchasers in [REGION] intend to share these results with their employees and use your performance metrics as part of their value strategy.

If your facilities participated in the Survey before, their security code has not changed. If a facility needs a copy of its security code, please complete and submit the Security Code Request form: FOR HOSPITALS <http://bit.ly/HospitalSecurityCode>, FOR ASCs <http://bit.ly/ASCSecurityCode>. Though the deadline to complete the Survey is June 30, you can resubmit your Survey at any time throughout the Survey cycle; publicly reported results are updated monthly. For hospitals and ASCs that do not meet the Submission Deadline, late submissions are accepted through November 30. Incomplete sections are reported as "Declined to Respond."

Visit www.LeapfrogGroup.org for more information and please contact me for details on [REGIONAL LEADER's] commitment to employers and purchasers.

Sincerely,

[LEAD REGIONAL LEADER]

D. TEMPLATE LETTER/EMAIL FOR ASC SURVEY PARTICIPATION

[Date]

[Prefix] [First] [Last]
 Chief Executive Officer
 [Facility Name]
 [Street Address]
 [City, State, ZIP]

Dear [CEO/ASC Administrator Name]:

On behalf of the over [NUMBER] employer members of [REGIONAL LEADER], representing [NUMBER] lives and \$(AMOUNT) in annual claims, we are writing to request your ambulatory surgical center's participation in the 2024 Leapfrog Ambulatory Surgery Center (ASC) Survey. As a coalition of employers who invest in the health and well-being of our employees, we feel that your participation in the Leapfrog ASC Survey is vital for our community so we can achieve real progress toward a safer, higher-quality, more transparent health care system for all. The Leapfrog ASC Survey is your opportunity to demonstrate your commitment to transparency.

2024 marks the sixth year of the Leapfrog ASC Survey on patient safety and quality. Since 2000, The Leapfrog Group, an independent national nonprofit, has collected and publicly reported patient safety and quality information about health care facilities. All ASCs in the United States have the opportunity to participate in the annual Leapfrog ASC Survey. Our employer members consult results from the Leapfrog Surveys to inform benefit design, patient referral preferences and direct contracting considerations. Your ASC may be excluded from these evaluations without a Survey response.

By participating in the Leapfrog ASC Survey, your surgery center can:

- 1. Demonstrate your responsiveness to employers in our community who depend on your services**
- 2. Benchmark your performance on quality and safety metrics and create a performance improvement plan**
- 3. Receive public recognition by [REGIONAL LEADER] for your transparency and performance**
- 4. Be eligible for Awards programs such as Leapfrog Top ASC**
- 5. Demonstrate your commitment to quality and safety improvement to our community, including your staff and Board**

Leapfrog's public reporting website, www.ratings.leapfroggroup.org, allows users to search for and compare both hospital and ASC ratings to better understand safety and quality across facilities. Purchasers in [REGION] intend to share these results with their employees and use your performance metrics as part of their value strategy. Like all of Leapfrog's programs, the ASC Survey measures are evidence-based, grounded in the latest science, and developed with guidance from Leapfrog's national Expert Panel and the Armstrong Institute for Patient Safety and Quality at Johns Hopkins Medicine.

You may use the same security code you used for previous Surveys. If you need a copy of your security code, please complete and submit the Security Code Request form: <http://bit.ly/ASCSecurityCode>. Though the deadline to complete the Survey is June 30, you can resubmit your Survey at any time throughout the Survey cycle; publicly reported results are updated monthly. For ASCs that don't meet the Submission Deadline, late submissions are accepted through November 30.

Please visit <http://www.leapfroggroup.org/asc> to learn more. There is never any charge for participation in Leapfrog Surveys.

We strongly recommend your participation in the 2024 Leapfrog ASC Survey. You will derive great value from the process, and our coalition of employers in [REGION] will appreciate your responsiveness and transparency.

Sincerely,

[LEAD REGIONAL LEADER]

E. TEMPLATE EMAIL HOSPITAL PARTICIPATION REMINDER

To: [Hospital Executive]
From: [Regional Leader]
Subject: Leapfrog Hospital Survey reminder

Dear [CEO Name]:

As a follow-up to the formal invitation letter sent to your hospital earlier this spring, I am writing to remind you about the approaching June 30 Submission Deadline for the 2024 Leapfrog Hospital Survey.

By participating in the Leapfrog Hospital Survey, you can see how your hospital performs on quality and safety metrics available from no other source and compare your performance to the other hospitals in our area and nationally. Your hospital can also:

- 1. Demonstrate your responsiveness to employers and other purchasers in our community, who depend on your services and expect transparency and candor**
- 2. Benchmark your performance nationally, regionally, and locally on important quality and safety issues**
- 3. Receive public recognition by [REGIONAL LEADER] for your performance achievements [CONSIDER INSERTING SPECIFIC WAYS YOU & YOUR MEMBERS USE LEAPFROG DATA/RECOGNIZE LOCAL HOSPITALS]**
- 4. Create a performance improvement plan by charting your year-over-year progress on the Survey**
- 5. Demonstrate your commitment to quality and safety improvement to our community, as well as your staff and Board**

Additionally, only hospitals that have submitted a 2024 Leapfrog Hospital Survey will be eligible to apply for the Recognized Leader in Caring for People Living with Diabetes designation. This recognition program started in 2023 through a partnership between Leapfrog and the American Diabetes Association (ADA). The first-ever national recognition program recognizes hospitals providing safe, high-quality care for patients living with diabetes. General acute care and adult specialty hospitals can apply for the designation. The application will open in July 2024. Learn more at www.leapfroggroup.org/recognized-leader-diabetes.

Leapfrog's public reporting website, www.ratings.leapfroggroup.org, allows users to search for and compare both hospital and ASC ratings to better understand safety and quality across facilities. Purchasers in [REGION] intend to share these results with their employees and use your performance metrics as part of their value strategy. Performance for participating facilities is posted and those that do not participate are indicated as "Declined to Respond."

Participation in the Survey and accessing the results is always free. You may use the same security code you used for previous Surveys. If you need a copy of your security code, please complete and submit the Security Code Request form: <http://bit.ly/HospitalSecurityCode>. We look forward to your participation before the June 30 Submission Deadline. You can resubmit your Survey at any time throughout the Survey cycle; publicly reported results are updated monthly. For hospitals that don't meet the Submission Deadline, late submissions are accepted through November 30, and until then, incomplete sections are reported as "Declined to Respond."

Thank you once again for responding to the requests of purchasers in our region and for taking the time to complete the Leapfrog Hospital Survey.

Sincerely,
[LEAD REGIONAL LEADER]

F. TEMPLATE THANK YOU LETTER/EMAIL FOR HOSPITAL CEOS

[Date]

[Prefix] [First] [Last]
Chief Executive Officer
[Facility Name]
[Street Address]
[City, State, ZIP]

Dear [CEO Name]:

I am writing to thank you for participating in the 2024 Leapfrog Hospital Survey. On behalf of our [NUMBER] members including [CONSIDER NAMING A FEW BIG NAMES HERE IF YOU DON'T KNOW THIS HOSPITAL WELL], we commend your commitment to transparency demonstrated through your participation.

[REGIONAL LEADER ORGANIZATION NAME] will share this information with our community to assure recognition for **your performance achievements and improvements**. [CONSIDER INSERTING SPECIFIC WAYS YOU & YOUR MEMBERS USE LEAPFROG DATA/RECOGNIZE LOCAL HOSPITALS]

Additionally, only hospitals that have submitted a 2024 Leapfrog Hospital Survey will be eligible to apply for the Recognized Leader in Caring for People Living with Diabetes designation. This recognition program started in 2023 through a partnership between Leapfrog and the American Diabetes Association (ADA). The first-ever national recognition program recognizes hospitals providing safe, high-quality care for patients living with diabetes. General acute care and adult specialty hospitals can apply for the designation. The application will open in July 2024. Learn more at www.leapfroggroup.org/recognized-leader-diabetes.

As a reminder, Leapfrog Hospital Survey results will be available in July at www.Ratings.LeapfrogGroup.org and are updated monthly. Data collected from the section of the Hospital Survey on outpatient procedures will be publicly reported by facility alongside data from the Leapfrog Ambulatory Surgery Center Survey.

Thank you once again for your investment in improving the health of [REGION] and for taking the time to complete the Leapfrog Hospital Survey. We commend your leadership and look forward to other hospitals in our community following your example.

Sincerely,
[LEAD REGIONAL LEADER]

G. TEMPLATE THANK YOU LETTER/EMAIL FOR ASC ADMINISTRATORS

<NAME>

Administrator

<Organization Name>

<Mailing-Street Address>

<Mailing-City>, <Mailing-State> <Mailing-Postal Code>

Dear <NAME>:

I am writing to thank you for participating in the 2024 Leapfrog ASC Survey. On behalf of our [NUMBER] members including [CONSIDER NAMING A FEW BIG NAMES HERE IF YOU DON'T KNOW THIS ASC WELL], we commend your commitment to transparency demonstrated through your participation.

[REGIONAL LEADER ORGANIZATION NAME] will share this information with our community to assure recognition for **your performance achievements and improvements**. [CONSIDER INSERTING SPECIFIC WAYS YOU & YOUR MEMBERS USE LEAPFROG DATA/RECOGNIZE LOCAL ASCs]

As a reminder, Leapfrog ASC Survey results will be available in July at www.Ratings.LeapfrogGroup.org and are updated monthly. Data collected from your facility will be posted alongside results of the Leapfrog Hospital Survey's section on outpatient procedures.

We commend your leadership and look forward to other ASCs in our community following your example. Thank you once again for your investment in improving the health of [REGION].

Sincerely,

[LEAD REGIONAL LEADER]

H. TEMPLATE LETTER/EMAIL FOR SECOND HOSPITAL SURVEY MAILING IN HIGH-PARTICIPATION STATES

[Date]

[Prefix] [First] [Last]
Chief Executive Officer
[Facility Name]
[Street Address]
[City, State, ZIP]

Dear [CEO Name]:

As a follow-up to my initial outreach, I am writing to again ask your hospital to complete the 2024 Leapfrog Hospital Survey.

So far this year, almost [X,XXX] hospitals nationwide have completed the Leapfrog Hospital Survey in response to purchasers' request for increased transparency. In our state, over [X%] of hospitals have completed a 2024 Survey. I strongly urge you to follow the leadership demonstrated by your colleagues and ensure your hospital is not one of the few non-participating hospitals in this region.

By participating in the Leapfrog Hospital Survey, you can see how you perform on quality and safety metrics available from no other source and compare your performance to the other hospitals in our area and nationally. Your hospital can also:

- 1. Demonstrate your responsiveness to employers and other purchasers in our community, who depend on your services and expect transparency and candor**
- 2. Receive public recognition by [REGIONAL LEADER] for your performance achievements [CONSIDER INSERTING SPECIFIC WAYS YOU & YOUR MEMBERS USE LEAPFROG DATA/RECOGNIZE LOCAL HOSPITALS]**
- 3. Create a performance improvement plan by charting your year-over-year progress on the Survey**
- 4. Demonstrate your commitment to quality and safety improvement to our community, as well as your staff and Board**

Additionally, only hospitals that have submitted a 2024 Leapfrog Hospital Survey will be eligible to apply for the Recognized Leader in Caring for People Living with Diabetes designation. This recognition program started in 2023 through a partnership between Leapfrog and the American Diabetes Association (ADA). The first-ever national recognition program recognizes hospitals providing safe, high-quality care for patients living with diabetes. General acute care and adult specialty hospitals can apply for the designation. The application will open in July 2024. Learn more at www.leapfroggroup.org/recognized-leader-diabetes.

Leapfrog's public reporting website, www.ratings.leapfroggroup.org, allows users to search for and compare both hospital and ASC ratings to better understand safety and quality across facilities. Performance for participating facilities is posted and those that do not participate are indicated as "Declined to Respond." Purchasers in [REGION] will be sharing these results with their employees and dependents and use your performance metrics as part of their value strategy.

Participation in the Survey and accessing the results is always free. *If you have participated in the Survey before, your security code has not changed. If you need a copy of your security code, please complete and submit the Security Code Request form: <http://bit.ly/HospitalSecurityCode>.* The Late Submission Deadline for Survey completion is **November 30**. You can resubmit your Survey at any time throughout the Survey cycle; publicly reported results are updated monthly.

Thank you once again for your investment in improving the health of our [REGION] and for taking the time to complete the Leapfrog Hospital Survey.

Sincerely,
[LEAD REGIONAL LEADER]

I. TEMPLATE LETTER/EMAIL FOR SECOND HOSPITAL SURVEY MAILING IN LOW-PARTICIPATION STATES

[Date]

[Prefix] [First] [Last]
Chief Executive Officer
[Facility Name]
[Street Address]
[City, State, ZIP]

Dear [CEO Name]:

As a follow-up to my initial outreach, I am writing to again ask your hospital to complete the 2024 Leapfrog Hospital Survey. So far this year, almost [X,XXX] hospitals nationwide have completed the Leapfrog Hospital Survey in response to purchasers' request for increased transparency. I strongly urge you to follow the leadership demonstrated by your colleagues and heed our call for participation.

By participating in the Leapfrog Hospital Survey, you can see how you perform on quality and safety metrics available from no other source and compare your performance to the other hospitals in our area and nationally. Your hospital can also:

- 1. Demonstrate your responsiveness to employers and other purchasers in our community, who depend on your services and expect transparency and candor**

Purchasers in [REGION] will be sharing these results with their employees and dependents and use your performance metrics as part of their value strategy.

Participation in the Survey and accessing the results is always free. *If you have participated in the Survey before, your security code has not changed. If you need a copy of your security code, please complete and submit the Security Code Request form: <http://bit.ly/HospitalSecurityCode>.* The Late Submission Deadline for Survey completion is **November 30**. You can resubmit your Survey at any time throughout the Survey cycle; publicly reported results are updated monthly.

Thank you once again for your investment in improving the health of our [REGION] and for taking the time to complete the Leapfrog Hospital Survey.

Sincerely,
[LEAD REGIONAL LEADER]

J. TEMPLATE LETTER/EMAIL CURRENTLY SUBMITTING ASCS

[Date]

[Prefix] [First] [Last]
 Chief Executive Officer
 [Facility Name]
 [Street Address]
 [City, State, ZIP]

Dear [CEO/ASC Administrator Name]:

On behalf of the over [NUMBER] employer members of [REGIONAL LEADER], representing [NUMBER] lives and \$(AMOUNT) in annual claims, we are writing to request your ambulatory surgical center's participation in the 2024 Leapfrog Ambulatory Surgery Center (ASC) Survey. We, along with our entire community, appreciate your past participation and look forward to your continued dedication to transparency. As a coalition of employers who invest in the health and well-being of our employees, we feel that your participation in the Leapfrog ASC Survey is vital for our community so we can achieve real progress towards a safer, higher-quality, more transparent health care system for all. Pandemic setbacks and workforce shortages have propelled the issue of patient safety as a national priority. The Leapfrog ASC Survey is your opportunity to demonstrate your commitment to transparency.

2024 marks the sixth year of the Leapfrog ASC Survey on patient safety and quality. Since 2000, The Leapfrog Group, an independent national nonprofit, has collected and publicly reporting patient safety and quality information about health care facilities. All ASCs in the U.S. have the opportunity to participate in the annual Leapfrog ASC Survey. Our employer members consult results from the Leapfrog Surveys to inform benefit design, patient referral preferences and direct contracting considerations. Your ASC may be excluded from these evaluations without a Survey response.

By participating in the Leapfrog ASC Survey, your surgery center can:

- 1. Demonstrate your responsiveness to employers in our community who depend on your services**
- 2. Benchmark your performance on quality and safety metrics and create a performance improvement plan**
- 3. Receive public recognition by [REGIONAL LEADER] for your transparency and performance**
- 4. Be eligible for Awards programs such as Leapfrog Top ASC**
- 5. Demonstrate your commitment to quality and safety improvement to our community, including your staff and Board**

Leapfrog's public reporting website, www.ratings.leapfroggroup.org, allows users to search for and compare both hospital and ASC ratings to better understand safety and quality across facilities. Purchasers in [REGION] intend to share these results with their employees and use your performance metrics as part of their value strategy. Like all of Leapfrog's programs, the ASC Survey measures are evidence-based, grounded in the latest science, and developed with guidance from Leapfrog's national Expert Panel and the Armstrong Institute for Patient Safety and Quality at Johns Hopkins Medicine.

You may use the same security code you used for previous Surveys. If you need a copy of your security code, please complete and submit the Security Code Request form: <http://bit.ly/ASCSecurityCode>. Though the deadline to complete the Survey is June 30, 2024, you can resubmit your Survey at any time throughout the Survey cycle; publicly reported results are updated monthly. For ASCs that don't meet the Submission Deadline, late submissions are accepted through November 30.

Please visit <http://www.leapfroggroup.org/asc> to learn more. There is never any charge for participation in Leapfrog Surveys.

We strongly recommend your participation in the 2024 Leapfrog ASC Survey. You will derive great value from the process, and our coalition of employers in [REGION] will appreciate your responsiveness and transparency.

Sincerely, [LEAD REGIONAL LEADER]

K. TEMPLATE LETTER/EMAIL FOR HEALTH PLANS: HOSPITALS

[Date]

[Chief Executive Officer]

[Hospital Name]

[Mailing Address]

[City], [State] [ZIP Code]

Dear [Chief Executive Officer]:

On behalf of our employer and purchaser clients, we are writing to urge you to participate in the 2024 Leapfrog Hospital Survey. We feel that your participation in the Survey is vital for your community so we can achieve real progress toward a safer, higher-quality, more transparent health care system for all.

More than 2,100 hospitals submitted a Survey in 2023, accounting for 73% of inpatient beds across the country. Our company, along with employers and other purchasers, consumers, and industry leaders, use the Survey Results to make informed choices about hospitals from which to seek care. Without your Survey participation we will not have this critical data on the quality and safety of the care your hospital provides.

For over 20 years, The Leapfrog Group has been collecting and publicly reporting patient safety and quality information about health care facilities. Leapfrog continues to report unique data that matters most to employers, purchasers, payors, and consumers. Furthermore, measures on the Leapfrog Hospital Survey are evidence-based, grounded in the latest science, and developed with guidance from Leapfrog's national Expert Panels and the Johns Hopkins Armstrong Institute for Patient Safety and Quality.

Please visit <http://www.leapfroggroup.org/hospital> to learn more. The deadline for completion is June 30. There is never any charge for participation in Leapfrog Surveys.

We strongly recommend your participation in the 2024 Leapfrog Hospital Survey. Leapfrog is the gold standard in health care transparency, which is why it is important to us that your facility participates. Thank you for your consideration of our request.

Sincerely,

[Your Signature here]

L. TEMPLATE LETTER/EMAIL FOR HEALTH PLANS: ASCS

[Date]

[Chief Executive Officer]

[ASC Name]

[Mailing Address]

[City], [State] [ZIP Code]

Dear [Chief Executive Officer]:

On behalf of our employer and purchaser clients, we are writing to urge you to participate in the 2024 Leapfrog Ambulatory Surgery Center (ASC) Survey. Payors, employers, and purchasers use the Leapfrog ASC Survey to inform patient referral preferences, benefit designs, and direct contracting considerations. Without your Survey participation, we will not have this critical data on your quality and safety performance.

We feel that your participation in the Leapfrog ASC Survey is vital for our community so we can achieve real progress toward a safer, higher-quality, more transparent health care system. This has never been more important than now when health care facilities have become a lifeline for public health and community reassurance.

2024 marks the sixth year of the Leapfrog ASC Survey on patient safety and quality. The Leapfrog Group is a 24-year-old independent national nonprofit collecting and publicly reporting patient safety and quality information about health care facilities. All ASCs in the United States have the opportunity to participate in the annual Leapfrog ASC Survey. Survey results are reported on Leapfrog's public reporting website, <https://ratings.leapfroggroup.org>, where users can search for and compare hospital and ASC ratings to better understand safety and quality across facilities.

Like all of Leapfrog's programs, the ASC Survey measures are evidence-based, grounded in the latest science, and developed with guidance from Leapfrog's national Expert Panel and the Johns Hopkins Armstrong Institute for Patient Safety and Quality.

Please visit <http://www.leapfroggroup.org/asc> to learn more. The deadline for completion is June 30. There is never any charge for participation in Leapfrog Surveys.

We strongly recommend your participation in the 2024 Leapfrog ASC Survey. Leapfrog is the gold standard in health care transparency, which is why it is important to us that your facility participates. Thank you for your consideration of our request.

Sincerely,

[Your Signature here]

Continue to following pages for the Common *Objections and Frequently Asked Questions* and the *Regional Leader Coverage Area* sections.

COMMON OBJECTIONS AND FREQUENTLY ASKED QUESTIONS ABOUT LEAPFROG AND ITS RATINGS

All Leapfrog leaders should be conversant in the issues that arise frequently during the campaign for Survey participation. The common objections and FAQs resource is available for you to familiarize yourself and prepare for conversations with providers and other groups you speak with about Leapfrog.

The Leapfrog Group is a national nonprofit organization that serves as a voice for health care consumers and purchasers, using their collective influence to foster positive change in U.S. health care. The flagship Leapfrog Hospital Survey and Leapfrog Ambulatory Surgery Center (ASC) Survey collect and transparently report hospital and ASC performance, empowering purchasers to find the highest-value care and giving consumers the lifesaving information they need to make informed decisions. The Leapfrog Hospital Safety Grade, Leapfrog's other main initiative, assigns letter grades to hospitals based on their record of patient safety, helping consumers protect themselves and their families from errors, injuries, accidents, and infections.

The following charts detail responses to the common objections and frequently asked questions hospitals and ASCs may have about Leapfrog and its ratings.

COMMON OBJECTIONS TO PARTICIPATING IN LEAPFROG SURVEYS

Objection	Quick Response	Detailed Response
We do not want to participate in the Survey this year because of the new nursing standards. Our hospital, and hospitals nationwide, are facing unprecedented staffing shortages, and the new nursing standards will be impossible to achieve.	While staffing challenges impact hospital operations, it is integral for consumers and purchasers to have insight about nurse staffing by hospital. Years of evidence show a direct relationship between adequate nurse staffing and patient safety outcomes.	Nursing care is a core element to ensuring safe patient care in hospitals, and national data suggests variation among hospitals on the impact of the nurse staffing challenges. With these considerations in mind, Leapfrog is going to continue with its plans to score and publicly report hospitals on the Total Nursing Care Hours per Patient Day, RN Hours per Patient Day, Nursing Skill Mix, and Percentage of RNs who are BSN-Prepared measures on the 2024 Leapfrog Hospital Survey, but as a reminder, hospitals have the option of responding 'did not measure' and will be publicly reported as Limited Achievement. All four of the nurse staffing and skill mix measures from the Leapfrog Hospital Survey have decades of published evidence that support their relationship with patient safety outcomes.
"Leapfrog data is self-reported and therefore unreliable."	Leapfrog goes to extensive lengths to verify the accuracy of data reported through its Surveys, including on-site verification for a sample of facilities.	The integrity of the data we publish and distribute is of utmost importance to Leapfrog. We have many protocols in place to verify the accuracy of our results: • The facility CEO or their designee must complete an Affirmation of Accuracy for each section of the Survey. • The Survey is programmed to detect errors and logic problems and alerts facilities prior to Survey submission. • Each month, Leapfrog conducts an extensive data verification of the responses submitted to the Survey. Quantitative responses are assessed using empirically driven,

		normative data quality standards. Some facilities are randomly selected to submit further documentation for qualitative measures. • A sample of facilities are selected for on-site verification of results. Note: These processes are outlined in more detail on our website.
"Our effort to promote quality is evidenced by many accolades received within the past year, so we don't need to report to Leapfrog."	Performing well on other rankings does not explain why the facility is unwilling to report data purchasers are asking for.	We congratulate hospitals and ASCs on the quality awards they have received. However, performing well on other rankings does not explain why the facility is unwilling to report data purchasers are asking for. Transparency means candor—not just about awards and accomplishments but also about challenges. In short, receiving an award for quality or safety is not a suitable substitute for demonstrating transparency to purchasers by responding to the Leapfrog Hospital Survey or Leapfrog ASC Survey.
"All of the information available through Leapfrog is available elsewhere."	Leapfrog publicly reports data by individual facility that is unavailable from any other source, including CMS, the Joint Commission, and others.	Data collected and reported through the Leapfrog Surveys is often harmonized with other entities to make reporting easier for hospitals and ASCs, but the difference is that Leapfrog makes this data public by facility. For example, hospitals report the same C-section measure to Leapfrog that they report to the Joint Commission, but the Joint Commission doesn't make individual hospital C-section rates available to the public. While some measures on the Leapfrog Hospital Survey align with those collected by CMS, CMS often reports at the system level rather than by individual facility; our results demonstrate that there is real difference between facilities even within the same system.
"We concentrate our data collection resources on CMS."	Employers, purchasers, and patients who are not necessarily Medicare beneficiaries deserve your attention to their needs too. Voluntarily participating in Leapfrog Surveys demonstrates responsiveness to the community and purchasers.	Participation in the Leapfrog Surveys demonstrates a facility's true commitment to transparency because Leapfrog asks hospitals and ASCs to voluntarily report measures they are not required to report otherwise. These measures matter to purchasers and patients.
"We already have a performance improvement and quality standards plan in place and don't need Leapfrog to guide our efforts."	Purchasers and consumers want to see improvement efforts on specific measures that matter most to them, including those reported by Leapfrog.	While acknowledging a facility's many areas of strength, no hospital or ASC is perfect, and Leapfrog is a gold standard for excellence. Measures that are unique to Leapfrog should prompt performance improvement efforts on those metrics. All facilities should welcome the opportunity to build trust from purchasers and consumers by reporting this information, and purchasers are eager to see the improvements hospitals have made.
"Leapfrog is rarely used by the public or insurance companies anymore."	Leapfrog data is used now more than ever before. National health plans, regional health plans, employers, purchasers, and publishers, reaching virtually all Americans,	Leapfrog is more widely used now than ever before. Leapfrog data is used by national and regional health plans in their public reporting and pay-for-performance initiatives. Furthermore, Leapfrog data is included in many of the transparency tools used by employers and purchasers.

"We believe something on the Survey is not risk-adjusted adequately and/or invalid/unscientific."	Leapfrog's Surveys are rigorously evaluated and updated regularly by leading authorities and experts, risk-adjusted when appropriate, and aligned with national reporting enterprises such as the National Quality Forum.	Leapfrog's surveys are rigorous and continuously updated. Leapfrog's Survey team works with faculty at the Armstrong Institute for Patient Safety and Quality at Johns Hopkins Medicine as well as a number of national expert panels to review the evidence and measure specifications for the Surveys each year. All content is released for public comment annually and updated accordingly. Questions and concerns about measures are always welcomed and considered either through the public comment period or any time in the year by contacting Leapfrog.
"We disagree with Leapfrog's hand hygiene standard, and it is burdensome."	Leapfrog's hand hygiene standard is stringent, but its framework pulls from existing evidence from leading health organizations, including WHO, CDC, and The Joint Commission. The pandemic accentuates the importance of implementing higher hand hygiene standards.	Leapfrog's new hand hygiene standard is modeled primarily after the World Health Organization's (WHO) Hand Hygiene Self-Assessment Framework and adapted to specific issues unique to U.S. hospitals and ambulatory surgery centers (ASCs). Leapfrog has also updated the framework based on existing evidence, models from other organizations such as the CDC and The Joint Commission, and expert opinion from our national Hand Hygiene Expert Panel. There are times when Leapfrog's standards are more stringent than what is set by other organizations, and this is one of them. Leapfrog's intent was to set a standard that meets the challenge of the nation's high rate of healthcare-associated infections, which appears to have grown during the pandemic. We recognize that we are holding hospitals and ASCs to a higher standard than what is currently required for hand hygiene and many facilities will not be able to fully adhere to the standard, but our intention is that facilities will work toward meeting the standard in the future.

FREQUENTLY ASKED QUESTIONS

Question	Quick Response	Detailed Response
What is the difference between the Leapfrog Hospital Survey and the Leapfrog Hospital Safety Grade?	The Leapfrog Hospital Survey asks hospitals to voluntarily provide a range of safety and quality data to Leapfrog. The Leapfrog Hospital Safety Grade doesn't ask hospitals for anything but simply assigns a letter grade using all publicly available safety data. The	The Leapfrog Hospital Survey is an annual voluntary survey of safety, quality, and efficiency standards in hospitals. Survey results are publicly reported at https://ratings.leapfroggroup.org . The Leapfrog Hospital Safety Grade is a letter grade rating of A, B, C, D or F assigned to all general hospitals regardless of whether they voluntarily report data to Leapfrog or not. Grades are reported at www.hospitalsafetygrade.org . Data used in the Safety Grade comes primarily from the Leapfrog Hospital Survey and CMS.

	Grade also focuses only on safety, while the Survey has a range of measures.	
Do facilities have to pay to participate in the Surveys?	No, participation in the Surveys is completely free and always has been.	The Leapfrog Hospital Survey and Leapfrog ASC Survey are completely free to participating facilities. Results are also available for free on Leapfrog's websites.
How are Survey results used?	The data collected is publicly reported on Leapfrog's website. Consumers, employers, purchasers, and health plans use Survey results to identify safe, high-quality facilities; develop value-based purchasing strategies; and inform health care needs.	Data collected through the Surveys are publicly reported on Leapfrog's websites and used to educate consumers and purchasers about the quality and safety of facilities in their community so that they can choose the best place for care. Employers and purchasers use Survey results to identify the best facilities for their employees' health care needs and work with health plans to design value-based benefits packages that reward the safest and highest quality performers. Health plans and others include Leapfrog data on plan websites and materials as well as in transparency tools.
How does Leapfrog verify its data? Is Leapfrog data self-reported?	Leapfrog goes to extensive lengths to verify the accuracy of data reported through its Survey, including on-site verification for a sample of hospitals. Any data that are determined to be knowingly false are immediately decertified and removed.	The integrity of the data we publish and distribute is of utmost importance to Leapfrog. We have many protocols in place to verify accuracy of our results: • The facility CEO or their designee must complete an Affirmation of Accuracy for each section of the Survey. • The Survey platform itself scans for potential entry errors and logic problems and alerts facilities prior to Survey submission. • Each month, Leapfrog conducts an extensive data verification of the responses submitted to the Survey. Quantitative responses are assessed using empirically driven, normative data quality standards. Some facilities are randomly selected to submit further documentation for qualitative measures. • A sample of hospitals are selected for on-site verification of results. Note: These processes are outlined in more detail on our website.
What is Leapfrog's initiative to rate outpatient care?	Leapfrog assesses the quality and safety of procedures performed at ambulatory surgery centers (ASCs) and hospital outpatient surgery departments through a stand-alone ASC Survey and additional section on the Hospital Survey.	For five years, Leapfrog has assessed the quality and safety of procedures performed at ambulatory surgery centers (ASCs) and hospital outpatient surgery departments. 60% of employee procedures take place in the outpatient setting. We collect the data through a voluntary Survey of ASCs as well as an outpatient surgery addition to the existing Leapfrog Hospital Survey, which previously covered inpatient care only. Results for both types of facilities are publicly reported at https://ratings.leapfroggroup.org .
Does Leapfrog compare procedures performed at ASCs with those performed in hospitals?	Yes, Leapfrog reports similar information about both settings, allowing patients to better understand the quality and safety by facility. These results can be found on our	Yes. Our goal is to report similar information about both settings. Leapfrog strongly believes that reporting about quality and safety should be patient-centered, and patients seeking a particular procedure do not care about the business entity that houses the operating room; they care about the quality and safety of the procedure. Results for both types of facilities based on similar metrics can be found on our ratings website .

ratings website, and users can compare facilities by procedure and area of care.

Where can I go for help?

The Leapfrog Help Desk can assist hospitals and ASCs with highly technical questions, and can be reached through the [online Leapfrog Help Desk link](#) or by emailing helpdesk@leapfrog-group.org.

Regional leaders with questions should reach out directly to Jill Berger,

Regional Leaders should respond to questions only when they feel comfortable doing so and steer clear of highly technical questions. Please feel free to refer any hospitals or ASCs directly to the Leapfrog Help Desk for questions, especially those questions related to Survey content or technical problems with the Surveys.

Help Desk coverage is 9:00 a.m.–5:00 p.m. ET on business days. The Help Desk is committed to resolving inquiries within two business days, and most inquiries are typically resolved within one day. Have hospitals and ASCs can contact the Help Desk using the [online Leapfrog Help Desk link](#) at the bottom of the home page of the online Survey or by emailing helpdesk@leapfrog-group.org. Regional leaders with questions should reach out directly to Jill Berger,

Why should hospitals and ASCs complete the annual Leapfrog Surveys?

Participating in the Leapfrog Surveys is a free way to demonstrate transparency, accountability, and improvements to purchasers, employers, and consumers. It is a valuable market-driven benchmarking tool for hospital and ASC quality improvement effort.

By participating in the Leapfrog Surveys, your facility can:

- Demonstrate your responsiveness to employers in our community who depend on your services
- Benchmark your performance on quality and safety metrics and create a performance improvement plan
- Receive public recognition by local business groups for your transparency and performance.
- Demonstrate your commitment to quality and safety improvement to your community, including your staff and board

LEAPFROG RATINGS VS OTHER RATINGS: WHAT IS THE DIFFERENCE?

Hospitals and health systems are complicated, and no one ratings program captures everything that matters to everyone. Consumers should consult multiple ratings before deciding where to seek care. They should begin with safety, because without safety little else matters: The best surgeon in the world will not be enough to save the patient if they get an infection or the wrong medication following their procedure. Whether it's stitches in the ER or open heart surgery, safety is the foundation of every patient's hospital experience.

Below is a summary of ratings systems and how they compare to Leapfrog.

Rating	Quick Response	Detailed Response
U.S. News & World Report	These ratings are primarily intended for patients with highly complex conditions; Leapfrog data applies to anyone looking for a	The U.S. News Honor Roll (including condition-specific honor rolls) focuses on identifying the "best medical centers for the most difficult patients," helping consumers determine which hospitals provide the best care for serious or complicated medical conditions and procedures; it

	hospital or ASC. Also, Leapfrog calls out the poor performers as well as the best, while U.S. News focuses on the top performers only.	is not a list intended for the average consumer to use to find a hospital for a routine procedure or condition. For patients with complex conditions, the U.S. News ratings are a helpful addition to the Leapfrog Hospital Safety Grade.
CMS Care Compare (Previously Hospital Compare)	CMS reports most hospitals as “average” on each of the quality and safety measures; Leapfrog shows much more variation between hospitals for each measure.	CMS includes data on safety, mortality, readmissions, patient experience, effectiveness/timeliness of care, and efficient use of medical imaging. On the Care Compare website, 90% of hospitals are shown as “no different than the national average” for each measure—this lack of variation makes it more difficult for consumers trying to identify the best facility for their care. Leapfrog results show more variation and are more timely.
CMS 5-Star Ratings	CMS data on hospitals is aggregated into a consumer-friendly single star rating. The star rating is displayed on Care Compare. It is useful to consumers and shows variation. Leapfrog’s Hospital Safety Grade is a similar composite, but ours only considers safety issues whereas the 5-Star Ratings include a broad array of safety and quality data. Both are useful, but they are different.	CMS offers a 5-star rating aggregating data on safety, mortality, readmissions, patient experience, effectiveness/timeliness of care, and efficient use of medical imaging for each hospital. There is variation among hospitals on number of stars. Safety comprises 22% of the overall star rating, which is why the Hospital Safety Grade—which is 100% safety measures—sometimes differs in its rating of a given hospital.
Healthgrades	Healthgrades publishes several lists of top hospitals for various areas of care. They do not call out poor performers like Leapfrog does. They use different measures than Leapfrog uses, and the methodology is less transparent.	Healthgrades publishes several lists of top 50/100/200 hospitals for various areas of care. It runs its own data analysis for many measures rather than using publicly available data. Unlike Leapfrog, they do not collect data from hospitals. Their Best Hospitals list and Patient Safety Excellence Award use different data than Leapfrog uses. For instance, they do not include infection rates, a significant component of the Safety Grade and the Survey. Only high-performing facilities are recognized.
Lown Institute Hospital Index	Lown Institute publishes hospital ranking lists and grades based on three domains: Equity, Value, and Outcomes. Rankings and grades are publicly reported on a dedicated website.	Lown Institute publishes unique yearly hospital ranking lists, providing hospital grades based on social responsibility. These rankings encompass performance across three domains: Equity, Value, and Outcomes. Featured lists include Avoiding Overuse, Community Benefit, Cost Efficiency, Most Racially Inclusive, and Most Socially Responsible. They apply these criteria and examine a range of 3,000–3,700 hospitals based on 54 metrics. Lown uses hospital characteristic data from a variety of sources, including Fiscal Year 2018 American Hospital Association (AHA) annual survey, Medicare Impact File, and the CMS Hospital Compare database. Users can view hospital grades for each domain publicly reported on a dedicated website as well as on the Lown Institute methodology.

Vendor-created ratings

Vendors like Castlight and CareChex by Quantros draw from claims data, CMS, and sometimes Leapfrog to create tools and insights to sell to employers and other stakeholders. Quality improvement vendors like Vizient give hospitals performance ratings, but their ratings are not available to the public.

We support these efforts and don't see Leapfrog as a competitor. Data from Leapfrog is unavailable from any other source (even claims), so we encourage incorporating Leapfrog into these tools.

Decision-support tools like Castlight are designed for employers to offer to their employees. They consolidate provider metrics with cost information, with many incorporating the Safety Grade and other Leapfrog data, to help employees choose the right facility/provider.

Quantros's CareChex Awards and other vendors use public and proprietary measures of performance to produce their ratings, comparing inpatient quality performance across general acute care hospitals. The awards consider patient complications, readmissions, mortality, AHRQ patient safety indicators, and inpatient quality indicators. Some sell consulting services to hospitals. Quantros is now a part of Healthcare Bluebook.

Vizient and other quality improvement vendors produce rankings designed for hospitals, not employers, purchasers, or consumers. Their Quality and Accountability Ranking identifies their high-performing member organizations in the areas of quality and safety and provides tools to support organizational improvement. None of their insights are made public, and even the hospitals that contract with them cannot see how other individual hospitals performed.

Leapfrog supports the innovative and competitive marketplace aimed at creating the most usable tools to drive improvement. At Leapfrog, we do not see ourselves as competing with these enterprises but giving them data to fuel even better ratings and offering employers and consumers the most relevant information. Data from the Leapfrog Surveys are unique and unavailable from claims or any other source. We encourage these vendors to use Leapfrog's unique data to fuel even better ratings.

Question	Quick Response	Detailed Response
Aren't consumers confused by multiple ratings when choosing a hospital or ASC?	Health care is a complicated enterprise. Consumers should have multiple ways to research, better understand, and compare health care facilities to make informed decisions. But safety should come first: Without safety, the other elements of quality are not as relevant.	Consumers can and should consult a multitude of health care facility ratings to see which is most meaningful for their needs and select a facility using that knowledge. Consumers are accustomed to consulting ratings and reviews for every other industry, from automobiles to appliances to books. By putting meaningful quality and safety metrics into the hands of consumers, we allow them to make informed decisions about their health. Leapfrog believes that safety should come first when it comes to choosing a hospital, and for that, the Leapfrog Hospital Safety Grade is the only tool focused exclusively on safety. But once a patient identifies the safest hospital available to them, they should utilize other ratings specific to the procedure or type of care needed so that they can choose the best facility for their treatment. Leapfrog is not competing with other ratings services but is expanding the pool of data available nationally for decision-making by purchasers and the public.

What makes Leapfrog ratings different than others?

Leapfrog is one of the few organizations collecting data directly from hospitals and ASCs. Leapfrog is designed to measure what matters to consumers and purchasers.

Leapfrog reports by facility, not by system as CMS permits and many ratings organizations do.

Leapfrog shows all ranges of performance, from excellent to poor.

Leapfrog is 100% transparent about its methodology and its ratings.

It is free for consumers to use and free for providers to report their data to the Surveys.

The difference between Leapfrog ratings and other ratings organizations comes down to methodology, focus, and number of performance measures they evaluate and the audiences they serve.

The Leapfrog Surveys use national performance measures to evaluate hospitals' and surgery centers' safety, quality, and efficiency. These measures are of specific interest to health care purchasers and consumers and cover a broad range of hospital processes, outcomes, and structures in key clinical areas such as maternity and intensive care.

The Survey measures are predicated on the latest science and are regularly reviewed with guidance from scientific advisors at the Armstrong Institute for Patient Safety at Johns Hopkins Medicine as well as Leapfrog's volunteer Expert Panels.

Leapfrog scores and publicly reports Survey results, Leapfrog's Survey methodologies are completely transparent, and annual proposed changes are open for public comment.

TECHNICAL QUESTIONS ABOUT SUBMITTING THE LEAPFROG HOSPITAL SURVEY

Question	Response
----------	----------

Where do I get a security code if I haven't received or no longer have a security code?

To get a security code, send the [Security Code Request form](#) to the Leapfrog Help Desk.

We're in your region, why didn't we receive a request to participate in the Survey?

Should the hospital be on your roster? Perhaps it's a new hospital that we don't know about. You should contact the Help Desk with any updated hospital information, including CEO name. Have someone at the hospital send the Security Code Request form to the Leapfrog Help Desk so the hospital CEO can authorize email release of the security code. The form can be found [here](#).

If it's a hospital outside your Leader area or a type of hospital to which the standards are not intended to apply, and you don't need to have them on your list:

- We welcome any hospital to respond to the Survey.
- You needn't handle their request.
- Ask the hospital to request a security code from the home page of the Survey site by following the "Get a Hospital Security Code" link and following the instructions there. The Help Desk will send the code directly to them.

We received the letter, but why is our hospital name and/or CEO name used in the letter incorrect?

Let them know that they can update that information when completing the Survey (in Section 1). Please also update your roster and forward the information to the Help Desk to prevent this from happening again.

If we are multi-campus hospital and have two Medicare numbers but are really one hospital, can we file one Hospital Survey? Or if we are a hospital system and our units share the same Medicare number, can we file one Survey?

If hospitals on multiple campuses share a common CCN, they should report as distinct hospitals. See the Leapfrog policy [here](#).

Where can I go to see a checklist of steps to take to complete the Hospital Survey?

Leapfrog has put together a pre-submission checklist for hospitals that is easy to use. It is available in the hard copy of Survey [here](#).

Why does the consumer site(s) show the wrong information?

The hospital probably needs to update and resubmit its Hospital Survey. No one associated with Leapfrog can alter the data that a hospital submits. It is likely that the hospital made an error during submission. Review the general instruction and timing for public update with the hospital, as indicated above.

Why is my hospital publicly reported as "Declined to Respond" when I completed the Survey?

The hospital may have failed to click the button "Submit Survey." They should log back into the Survey and check their submission status. Or, the publicly reported results haven't been updated yet to

	reflect their participation. Results are updated within the first five business days of each month based on the previous month's submissions.
Where can I ask a clinical or scientific inquiry about a question on the Survey?	Please contact the Help Desk (helpdesk@leapfrog-group.org) for assistance.
My hospital that has an A Safety Grade was cited by my state for quality issues. How can that be?	The Safety Grade reflects a hospital's relative performance to others – meaning that A hospitals have better patient safety outcomes than B, C, and D/F hospitals but it doesn't mean they are perfect. Additionally, if major patient safety issues are occurring now, those worsening patient outcomes will be reflected in the updated data we receive from CMS.

TECHNICAL QUESTIONS ABOUT SUBMITTING THE LEAPFROG ASC SURVEY

Question	Response
How do I access the Survey?	ASCs will need to request a security code to access the Survey if they are new to submitting the ASC Survey, available here . Once the security code is obtained ASCs can log in to the Survey here . If an ASC participated in previous years, their security code will be the same for 2024.
How do I know if my facility is an ASC?	An ASC is a distinct entity that exclusively provides same-day surgical services to patients not requiring hospitalization. Important characteristics of ASCs include the following: • If certified by Medicare, the facility is certified as an ASC (not all ASCs are certified by Medicare) and has been assigned a 10-digit CMS Certification Number (nn-Cnnnnnnn) • Provides surgical services that do not exceed 24 hours • May or may not be affiliated with a hospital • Often are specialty-specific More details can be found here .
What does the Survey cover?	The Leapfrog Group will gather data from ASCs on several important areas of care including basic facility information; ethical billing and health equity; medical, surgical and nursing staff; volume and safety of procedures; patient safety practices; and patient experience. Like all of Leapfrog's programs, the Survey is evidence-based and predicated on the latest science, developed with guidance from Leapfrog's National Expert Panel and the Armstrong Institute for Patient Safety and Quality at Johns Hopkins Medicine.
Will ASCs be reported as "Declined to Respond" if they do not submit the ASC Survey to Leapfrog in 2024?	ASCs that do not submit the 2024 ASC Survey by June 30 will appear in initial location-based search results on Leapfrog's public reporting website, ratings.leapfroggroup.org. However, if users opt to view facilities that declined to respond. Additionally, a direct search by facility name will generate a "Declined to Respond" message if the facility does not participate by June 30. Facilities that miss the June 30 Submission Deadline can still submit a Survey through November 30; results are updated monthly on Leapfrog's website.
Will ASCs get a letter grade?	There are no current plans to give ASCs a letter grade.
Why does the consumer site(s) show the wrong information?	The ASC probably needs to update and resubmit its ASC Survey. No one associated with Leapfrog can alter the data that an ASC submits. It is likely that the ASC made an error during submission.
Can all ASCs participate?	All ASCs in the United States are invited to participate in the Leapfrog ASC Survey, though an ASC must perform at least one of the procedures in the profile section of the ASC Survey in order to participate.
Where can I ask a clinical or scientific inquiry about a question on the Survey?	Please contact the Help Desk (helpdesk@leapfrog-group.org) for assistance.
REGIONAL LEADER COVERAGE AREAS	

Regional Leaders and Designated Coverage		
State/Region	Organization	Coverage (counties)
Alabama	Alabama Employer Health Consortium	All counties
Arkansas	HealthCareTN	Crittenden
California	Purchaser Business Group on Health	All counties
Colorado	Purchaser Business Group on Health	All counties
Delaware	Greater Philadelphia Business Coalition on Health	All counties
District of Columbia	Consumer's Checkbook	The District of Columbia
Florida	Florida Alliance for Healthcare Value	All counties
Georgia	HealthCareTN	East/Mid: Catoosa, Dade, Floyd, Gordon, Murray, Walker, and Whitfield
Georgia	Georgia Watch	Fulton, DeKalb, Cobb, Gwinnett, and Clayton
Illinois	Midwest Business Group on Health	All counties except Bond, Calhoun, Clinton, Jersey, Macoupin, Madison, Monroe, St. Clair
Illinois	St. Louis Area Business Health Coalition	Bond, Calhoun, Clinton, Jersey, Macoupin, Madison, Monroe, St. Clair

Exhibit 8

2023 Leapfrog Hospital Safety Grade Accolades Sales Analysis

Alexandra Campione
January 2024

Slide 1 Notes

This analysis looked at the relationship between individual hospitals characteristic and the likelihood of hospitals licensing their "A" grade, as well as our media coverage in metropolitan areas. We wanted to understand what hospital types were licensing and if increased media coverage resulted in more licenses in cities.

Hospital Safety Grade Revenue by Fiscal Year

Slide 2 Notes

As an overview

LEAPFROG01168248

Top Hospital Revenue by Fiscal Year

Estimating the Likelihood of Licensing

modeled using fall 2023 licensing data

Survey Participants are
10x more likely to
license

Renewals are
10x more likely to
license

Hospitals that that
have licensed in the
past 2 years are 5x
more likely to license

Hospitals not in a System are
2x more likely to license

Other System Factors

modeled using fall 2023 licensing data

Recent Licensing

Hospitals in a system that recently licensed (past 2 rounds) are 9x more likely to license

System Size

Hospitals in large systems (>10 hospitals) are 1.5x more likely to license

No other 'A's in the System

Hospitals that have only one "A" in their system are 1.5x more likely to license

Survey Participation and Licensing

among hospitals eligible to license in fall 2023 (n= 726)

	Licensed	Did not License	Total	Percent Licensed
Survey Participants*	133	463	596	22%
Non-Survey Participants	3	127	130	2%

*Hospitals that Completed the 2023 Leapfrog Hospital Survey

Slide 6 Notes

The 3 hospitals that didn't do the Survey and licensed anyway were Bakersfield Heart Hospital (HCA), Mission Hospital (Surgery Partners- FKA Symbion Healthcare), and St. Joseph Hospital (Covenant Health)

Survey Participation, System History, and Licensing among hospitals eligible to license in fall 2023 (n= 726)

		Licensed	Did not License	Total	Percent Licensed
Survey Participants	not in a system	14	15	29	48%
	in licensing system*	90	87	177	51%
	in non-licensing system**	43	376	419	10%
Non-Survey Participants	Non-Survey Participants	3	127	130	2%

*Licensing System: the system licensed at least once in Spring 2023 or Fall 2022 for one of their hospitals

**Among hospitals in systems with no history of licensing, hospitals that were the only A's in their system were 3 times more likely to license; results were statistically significant ($p < .05$).

Slide 7 Notes

Of the 419 hospitals that were in a system with no history of licensing, 109 were the only A's in their system (26%). Of the 43 that actually licensed, 26 were the only A's in their system (60%).

Hospitals Projected to be Eligible for Spring 2024 Accolades

100	Renewals
20	Survey Participants not in System
78	Survey Participant in Licensing System
410	Survey Participants in Non-Licensing System
115	Did Not Complete 2023 Survey

Fall 2023 Safety Grade Media Coverage and Licensing in 14 Major Metropolitan Markets

Recommendations for Spring 2024

- Update campaigns to target groups with a high probability of licensing:
 - Hospitals that submitted a Survey (596 of 726 “A” hospitals submitted a Survey in fall 2023)
 - A targeted approach of Survey Participants
 - Hospitals not in a system (29 hospitals in fall 2023)
 - Hospitals in systems that have recently licensed (177 hospitals in fall 2023)
 - Hospitals in systems that do not license and are the only “A” (109 hospitals in fall 2023)
- Consider accolade pricing for recruitment only – not marketed, but available if requested
- Review and update campaign messages (support from TechXCO) to include more stats re: consumer shopping, importance to employers, etc.

Exhibit 9

Leapfrog Hospital Safety Grade Expert Panel Meeting

April 12, 2024

THE LEAPFROG GROUP

LEAPFROG00437363

Agenda

- Update on scoring DHA Military Treatment Facilities
- Feedback on re-evaluating imputation model
- Feedback on two possible new outcome measures

Military Treatment Facilities

- Scoring Military Treatment Facilities (MTFs) located in the US

Safety Grade	MTFs (n)	MTFs (%)	Nationally (%)
A	9	43%	29%
B	9	43%	26%
C	3	14%	37%
D	0	0%	7%
F	0	0%	<1%
Total	21		

- We worked directly with DHA to collect PSI and HAC data for all MTFs
 - Patient population included all patients 18 years or older
- MRSA and SSI Colon were previously not tracked for most facilities in NHSN

Measure	MTF Average	National Average	Difference
Computerized Physician Order Entry (CPOE)	70.00	91.81	-21.81
Bar Code Medication Administration (BCMA)	92.86	93.41	-0.56
ICU Physician Staffing (IPS)	64.29	63.27	1.02
Safe Practice 1	111.65	117.59	-5.94
Safe Practice 2	102.38	117.08	-14.70
Total Nursing Hours per Patient Day	97.14	74.68	22.46
Hand Hygiene	75.71	78.64	-2.93
H-COMP-1: Nurse Communication	92.90	89.66	3.24
H-COMP-2: Doctor Communication	93.43	89.52	3.91
H-COMP-3: Staff Responsiveness	87.95	81.13	6.83
H-COMP-5: Communication about Medicines	84.05	74.08	9.97
H-COMP-6: Discharge Information	89.10	84.89	4.20
Foreign Object Retained	0.031	0.014	0.02
Air Embolism	0.000	0.001	0.00
Falls and Trauma	0.410	0.428	-0.02
CLABSI	0.758	0.729	0.03
CAUTI	1.086	0.627	0.46
SSI: Colon	1.470	0.846	0.62
MRSA	1.025	0.794	0.23
C. Diff.	0.53	0.45	0.07
PSI 4	177.12	168.42	8.70
PSI 90	0.90	1.01	-0.11

Re-evaluate Imputation Model

THE LEAPFROG GROUP

LEAPFROG00437366

Problem that We are Working to Solve

- **History**
 - Leapfrog moved to its current imputation approach in 2021, when the American Hospital Association discontinued its survey data license with Leapfrog (AHA Survey had been a long-time secondary data source)
 - Leapfrog was also seeking ways to grade additional hospitals
- **We are currently facing these challenges:**
 - Imputed scores have crept up, making imputation a more favorable choice for lots of hospitals and has de-incentivized true transparency of performance
 - Hospitals are using the Step 1 Imputation (using their individual hospital's historical data) as a reason to not report on the current year's survey

Data Sources and Measure Weights in the Process/Structural Domain

Measure Name	Primary Data Source	Secondary Data Source	Standard Measure Weight
Computerized Physician Order Entry (CPOE)	Leapfrog Hospital Survey	Imputation Model Applied	5.6%
Bar Code Medication Administration (BCMA)	Leapfrog Hospital Survey	Imputation Model Applied	5.4%
ICU Physician Staffing (IPS)	Leapfrog Hospital Survey	Imputation Model Applied	7.2%
Safe Practice 1: Culture of Leadership Structures and Systems	Leapfrog Hospital Survey	N/A	3.2%
Safe Practice 2: Culture Measurement, Feedback & Intervention	Leapfrog Hospital Survey	N/A	3.3%
Total Nursing Care Hours per Patient Day	Leapfrog Hospital Survey	N/A	4.9%
Hand Hygiene	Leapfrog Hospital Survey	Imputation Model Applied	4.7%
H-COMP-1: Nurse Communication	CMS	N/A	3.1%
H-COMP-2: Doctor Communication	CMS	N/A	3.1%
H-COMP-3: Staff Responsiveness	CMS	N/A	3.2%
H-COMP-5: Communication about Medicines	CMS	N/A	3.2%
H-COMP-6: Discharge Information	CMS	N/A	3.1%

Current Imputation Model

CPOE, BCMA, Hand Hygiene, and IPS

- **STEP 1:** Hospital is assigned their most recent score from the past four rounds of Safety Grade
 - For Spring 2024, we used their score for fall 2023, spring 2023, fall 2022, or spring 2022
 - This always corresponds to the three most recent Leapfrog Hospital Surveys (2023, 2022, 2021)
- **STEP 2:** Hospital is assigned the lower of two possible mean scores, based on their cohort's actual performance (Below approach used for CPOE, BCMA, and Hand Hygiene; but not used for IPS)
 - Mean of the cohort's current and recent scores
 - Mean of the cohort's scores from each hospital's first year of reporting on the current standard via the Leapfrog Hospital Survey

Step 2: Cohort Designations

CPOE, BCMA, and Hand Hygiene Only

The hospital is assigned to a cohort of other similar hospitals using three or four hospital characteristics obtained from the most recent CMS Impact File and Leapfrog Hospital Survey:

1. Urban/rural status (CMS Impact File)
2. Safety net status (CMS Impact File)
3. Number of beds (CMS Impact File)
4. Teaching status (only used for urban cohorts; Leapfrog Hospital Survey Results are the primary data source and CMS Impact File is the secondary data source)

Step 2 Imputation for IPS

- The CMS Cost Report is used as a secondary data source for the ICU Physician Staffing (IPS) measure
- ICU designation (i.e., operating a medical ICU, surgical ICU, or pediatric ICU) is determined by Leapfrog based on the number of medical, surgical and/or pediatric ICU beds reported in Worksheet S-3 Part 1 of the hospital's most recent CMS Cost Report. Hospitals that are determined to have one or more medical, surgical, and/or pediatric ICU beds are assigned the same point value (5 points) as those hospitals that achieve the lowest performance category in the Leapfrog Hospital Survey.

Spring 2024 Cohort Means for Step 2 Imputation

Cohort #	Urban/Rural Status	Safety Net Status	Number of Beds	Teaching Status	Step 2 CPOE Score (Mean of Cohort)	Step 2 BCMA Score (Mean of Cohort)	Step 2 Hand Hygiene Score (Mean of Cohort)
Cohort 1	Rural	Non-Safety Net	Fewer than 100 beds	N/A	75	79	50
Cohort 2	Rural	Non-Safety Net	100 or more beds	N/A	79	82	52
Cohort 3	Rural	Safety Net	Fewer than 100 beds	N/A	85	81	45
Cohort 4	Rural	Safety Net	100 or more beds	N/A	72	80	62
Cohort 5	Urban	Non-Safety Net	Fewer than 100 beds	Non-Teaching	84	85	58
Cohort 6	Urban	Non-Safety Net	100 or more beds	Non-Teaching	86	84	59
Cohort 7	Urban	Non-Safety Net	Fewer than 100 beds	Teaching	79	86	61
Cohort 8	Urban	Non-Safety Net	100 or more beds	Teaching	88	85	56
Cohort 9	Urban	Safety Net	Fewer than 100 beds	Non-Teaching	76	82	63
Cohort 10	Urban	Safety Net	100 or more beds	Non-Teaching	76	81	59
Cohort 11	Urban	Safety Net	Fewer than 100 beds	Teaching	82	81	50
Cohort 12	Urban	Safety Net	100 or more beds	Teaching	89	81	56

Spring 2024 Measure Scores

Leapfrog Performance Category	Corresponding Safety Grade Measure Scores			
	CPOE	BCMA	Hand Hygiene	ICU Physician Staffing (IPS)
Achieved the Standard	100	100	100	100
Considerable Achievement	70	75	70	50
Some Achievement	40	50	40	15
Limited Achievement	15	5	15	5
Average Step 1 Imputed Score	93	92	67	68
Average Step 2 Imputed Score	83	83	55	5

Hospitals Eligible for Imputation

The proportion of hospitals that complete the Leapfrog Survey has increased since 2012 from 31% to 61%. A slight dip in Survey Participation occurred this past year as hospitals opted to use past Survey results in step 1 imputation.

Proposed Future Imputation Methodology

- Retire Step 1 Imputation for all measures
 - Where we allow hospitals to use data from a recent Leapfrog Surveys
- Use Step 2b Imputation for all hospitals for CPOE, BCMA, and Hand Hygiene
 - Assign hospitals that do not complete the most recent Leapfrog Survey to cohorts
 - Calculate the mean of scores obtained in each hospital's first year of reporting on the current standard via the Leapfrog Hospital Survey
 - Hospital is assigned the mean for their cohort
- For IPS, the current Step 2 imputation methodology (CMS Cost Report) would be the only imputation model

New Measures Under Consideration

LEAPFROG00437376

Hospital Harm - Severe Hyperglycemia

- Focuses on severe hypoglycemia as an outcome in the hospital inpatient setting
- Public reporting by CMS will start in 2025
- **Numerator:** Number of inpatient hospital days with a hyperglycemic event (harm)
 - A hyperglycemic event is defined as:
 - 1) A day with at least one blood glucose value >300 mg/dL; OR
 - 2) A day where a blood glucose test was not done, and it was preceded by two consecutive days where at least one glucose value during each of the two days was ≥ 200 mg/dL
- **Denominator:** Total qualifying inpatient hospital days for that encounter for patients 18 years of age or older at admission

<https://ecqi.healthit.gov/sites/default/files/ecqm/measures/CMS871v2.html>

Hospital Harm - Severe Hypoglycemia

- Goal is to assess the occurrence of severe hypoglycemia in hospitalized patients
- Public reporting by CMS will start in 2025
- **Numerator:** Inpatient hospitalizations where a severe hypoglycemic event occurred during the encounter, which is:
 - A glucose result less than 40 mg/dL, AND
 - A hypoglycemic medication administered within 24 hours prior to the start of the severe hypoglycemic event (i.e., the glucose result less than 40 mg/dL), AND
 - No subsequent repeat test for glucose with a result greater than 80 mg/dL within five minutes of the time of the initial glucose test with result less than 40mg/dL
- **Denominator:** Inpatient hospitalizations that end during the measurement period for patients age 18 and older and at least one hypoglycemic medication was administered during the encounter.

Exhibit 10

Document Produced in Native Format

Exhibit 11

WEBVTT

1

00:00:00.000 --> 00:00:01.280

Matt Austin: So arches.

2

00:00:03.390 --> 00:00:12.660

Arjun Srinivasan, CDC (he/him): I have no financial disclosures. I am a full time employee of the Federal Government and our agent. My division runs the National Health Care Safety Network.

3

00:00:13.440 --> 00:00:15.060

Matt Austin: Great. Thank you, Arjun.

4

00:00:15.150 --> 00:00:17.260

Matt Austin: Sarah, would you like to go next? Please.

5

00:00:18.060 --> 00:00:39.051

Sara Singer: Sure. I'm Sarah Singer. I am a a professor at Stanford, in the medical school and in the business school and organizational behavior. With respect to and I've been on the I I've been on the leapfrog committee. He for it feels like many years. With respect to disclosures.

6

00:00:39.440 --> 00:00:56.070

Sara Singer: I guess financial disclosures. I receive Honoraria for work that I do for both Intermountain Healthcare and Harvard Medical School, and non, financially, I serve on the board for the Harvard Medical Faculty Physicians group.

7

00:00:57.400 --> 00:00:58.740

Matt Austin: Great. Thank you, Sarah.

8

00:00:59.271 --> 00:01:01.279

Matt Austin: Kathy, would you like to go next? Please.

9

00:01:02.400 --> 00:01:07.600

Kathy McDonald: Sure, Kathy McDonald. Hi! Everyone I am. I'm at Johns Hopkins.

10

00:01:07.610 --> 00:01:08.870

Kathy McDonald: colleague of Maths.

11

00:01:09.090 --> 00:01:15.989

Kathy McDonald: and I'm in the School of Nursing and the School of Medicine, and also the Armstrong Institute for safety and quality.

12

00:01:16.340 --> 00:01:18.370

Kathy McDonald: I don't have any

13

00:01:18.450 --> 00:01:19.930

Kathy McDonald: anything that's

14

00:01:21.640 --> 00:01:22.973

Kathy McDonald: nothing financial.

15

00:01:23.640 --> 00:01:24.010

Matt Austin: Thanks.

16

00:01:24.380 --> 00:01:27.300

Matt Austin: Thank you, Kathy. Peter, would you like to go next? Please.

17

00:01:27.850 --> 00:01:30.250

Peter Pronovost: Sure. Hi! I'm Peter pronost I

18

00:01:30.480 --> 00:01:39.050

Peter Pronovost: in the University hospitals, chief clinical transformation and quality officer and a professor in ace schools of medicine, nursing and management.

19

00:01:39.740 --> 00:01:45.209

Peter Pronovost: I think the only disclosure be a Pcori health systems implementation, science. Grant that

20

00:01:45.870 --> 00:01:47.240

Peter Pronovost: on the pi end.

21

00:01:48.300 --> 00:01:49.650

Matt Austin: Great thanks, Peter.

22

00:01:49.800 --> 00:01:51.849

Matt Austin: Tim, would you like to go next, please.

23

00:01:52.650 --> 00:01:53.140

Matt Austin: for.

24

00:01:53.140 --> 00:01:59.982

Tim Vogus: Tim Bogus and the faculty of the Vanderbilt University. Oh, and Graduate School of management. I'm not getting any of that sweet money so

25

00:02:00.920 --> 00:02:01.705

Tim Vogus: disclose.

26

00:02:03.170 --> 00:02:08.803

Matt Austin: Well, I I think you should disclose, Tim, that you are a a former Spartan, and sporting the

27

00:02:09.523 --> 00:02:17.152

Tim Vogus: Yeah. And I, I am the nicest dress person on the call or the opposite of that.

28

00:02:18.810 --> 00:02:21.260

Matt Austin: Alright Doris, would you like to go next? Please.

29

00:02:22.526 --> 00:02:41.680

Doris: Well, the only reason. I'm actually probably the worst dress cause I'm off camera. So I'm wearing a fleece jacket right now. So I'm not well dressed either. My name's Doris, Peter and I work mostly as a subcontractor for Cms through Yale core. Who has was the developer of those 2

30

00:02:41.740 --> 00:02:55.160

Doris: Ecqms. We're gonna maybe talk about the end of this meeting, the Patient Safety Cqms. Not really a disclosure, but just to let you know that I'm somewhat involved in those. And I'm happy to be here, but I have no other things to disclose. Great.

31

00:02:55.160 --> 00:02:57.719

Matt Austin: Thank you, Doris, appreciate that. And, Ernie, please.

32

00:02:58.240 --> 00:03:06.789

arnold milstein: Hi, I'm also off camera, because I'm like several others, a continuous walker. But let's see, so

33

00:03:06.860 --> 00:03:08.800

arnold milstein: relevant to leapfrog.

34

00:03:08.860 --> 00:03:11.579

arnold milstein: I'm a Trustee of Intermountain Healthcare.

35

00:03:12.030 --> 00:03:14.309

arnold milstein: I am on the

36

00:03:15.170 --> 00:03:20.139

arnold milstein: the the Board's Quality Committee at at Stanford Hospital.

37

00:03:21.660 --> 00:03:26.980

arnold milstein: What else I am? I'm the Medical Director of the Pacific business group on Health

38

00:03:28.211 --> 00:03:31.930

arnold milstein: and then in terms of financial interests, though none are

39

00:03:32.170 --> 00:03:35.000

arnold milstein: are involved with patient safety.

40

00:03:35.040 --> 00:03:37.930

arnold milstein: I have a financial interest in

41

00:03:38.040 --> 00:03:41.790

arnold milstein: in 2 2 startup companies.

42

00:03:42.000 --> 00:03:45.740

arnold milstein: one prealized health, the other in bold health.

43

00:03:47.380 --> 00:03:49.099

Matt Austin: Great. Thank you so much, Arnie.

44

00:03:49.980 --> 00:04:05.380

Matt Austin: So, as I mentioned, we're doing this in the spirit of transparency. If you have any concerns during the meeting, or after a meeting that one of your fellow expert panelists might be operating in a bias manner. We would ask that you reach out to either Missy or myself, and we'd be happy to

45

00:04:05.850 --> 00:04:08.220

Matt Austin: conversation with you about that. So

46

00:04:08.420 --> 00:04:19.579

Matt Austin: thank you so much. Everyone. We're gonna move on to the next agenda item. And I'm actually gonna share my screens with some slides. But I'm actually gonna turn it over to Alex from the leapfrog group

47

00:04:19.760 --> 00:04:25.150

Matt Austin: to talk a little bit about grading the military treatment facilities.

48

00:04:26.500 --> 00:04:36.309

Alexandra Campione: Great. Hi, everyone! My name is Alex. I'm a program analyst here at Lake Frog I work mainly with safety grade. So scoring facilities as well as doing these

49

00:04:37.030 --> 00:04:42.129

Alexandra Campione: analyses and validation like we did for the Mds.

50

00:04:43.830 --> 00:04:47.509

Matt Austin: And here I go, just 2 steps behind.

51

00:04:54.660 --> 00:04:56.800

Alexandra Campione: So, as everyone might remember.

52

00:04:57.506 --> 00:05:02.769

Alexandra Campione: We started the validation process of there. Back

53

00:05:03.180 --> 00:05:29.559

Alexandra Campione: think it was about a year ago now. They were interested in receiving safety grades as sort of a way to summarize everything. And we were able to score 21 out of 30 Mts. Located in the Us. We had 9 A's 9 B's and 3 C's, and you can

see this is actually a pretty well performing cohort of hospitals. Compared to the national distribution.

54

00:05:29.941 --> 00:05:57.819

Alexandra Campione: We work with them with Dha directly to collect the psi and hack data because their patient population is restricted to active service members and their families. So, as you can imagine, there's not very much data on those 65 years and older. So there were. There is no Cms data for them. And we had to obtain the data directly from them for patients 18 years or older.

55

00:05:58.911 --> 00:06:03.719

Alexandra Campione: Perhaps the biggest accomplishment here was

56

00:06:04.180 --> 00:06:33.080

Alexandra Campione: actually cleaning up their hai data so previously. And to dhs surprise, they were not previously tracking Mercen and SSI Colon. At a lot of facilities. So they actually they were not reporting plans in place. For surgical site infections after Colon surgery, or Merca. They were actually tracking it separate, and it was not streamlined. So they had to go back and clean up that

57

00:06:33.080 --> 00:06:44.928

Alexandra Campione: data, and we are able to get to a point where we felt confident in their data. By this January. So that was very exciting. And on the right you can see how they performed

58

00:06:45.240 --> 00:07:12.619

Alexandra Campione: on average, and all of the measures included in the safety grade. You can see that Cpo, and safe practice, too. That's the safety culture of safety survey they were are still lacking in. And they're well aware and working on that this year. As well as the infection measures, and psi. 4. Where they perform really well, is the total nursing care hours per patient day, and their Hcp. Scores.

59

00:07:16.260 --> 00:07:23.089

Matt Austin: So with that, we just wanted to provide an update to you all on that progress, we're happy to

60

00:07:23.550 --> 00:07:29.109

Matt Austin: entertain any questions, thoughts, reactions that the the panel might have.

61

00:07:32.200 --> 00:07:37.869

Peter Pronovost: Yeah, just more of a curiosity. Their hcup scores are like material better than than others, I

62

00:07:38.020 --> 00:07:45.269

Peter Pronovost: I mean, if somewhat surprised in their the infection rates are materially worse. Did they have any insights about? Why, that is.

63

00:07:47.070 --> 00:07:59.990

Alexandra Campione: So we have not actually talked to them about their Hcap scores yet. I think the first, especially for SSI Colin and Marsa. It wasn't much of surprise, since it wasn't being tracked previously.

64

00:08:00.710 --> 00:08:04.179

Alexandra Campione: but now they're going to be able to track it. So.

65

00:08:05.090 --> 00:08:08.609

Peter Pronovost: Yeah. And maybe it's just all driven by their nursing hours per patient day.

66

00:08:10.420 --> 00:08:31.829

Missy Danforth (she/her): Yeah. So, Peter, one note I do. Wanna make is that we did get their haps data from Cms. So I'm not sure everyone's aware, but they actually voluntarily report their data into Cms. And so any adjustments done for the other general acute care hospitals like for age are also done to their scores as well.

67

00:08:32.059 --> 00:08:37.129

Missy Danforth (she/her): So these are not directly reported from Dha or the Mts. Delete Frog.

68

00:08:37.631 --> 00:08:43.040

Missy Danforth (she/her): This is available on the Cms. Care. Compare Provider Catalogs.

69

00:08:43.549 --> 00:08:45.720

Missy Danforth (she/her): It's creating.

70

00:08:47.030 --> 00:08:48.630

Matt Austin: Yeah, Patrick, when we spoke.

71

00:08:48.925 --> 00:08:52.759

Missy Danforth (she/her): Pretty obvious data, but we don't have an explanation for the corps.

72

00:08:55.900 --> 00:09:03.510

arnold milstein: Missy. Okay, so am I right that what that means is to the degree that younger people, because they tend to recover more fully.

73

00:09:03.730 --> 00:09:12.589

arnold milstein: You know. Might, you know, in retrospect, you know, report a more favorable cap score that's already been adjusted, for that is the younger age population.

74

00:09:13.050 --> 00:09:14.550

Missy Danforth (she/her): That's correct. Everybody.

75

00:09:14.760 --> 00:09:16.510

Missy Danforth (she/her): Yes, yes, that's correct.

76

00:09:16.850 --> 00:09:17.330

arnold milstein: Thank you.

77

00:09:19.870 --> 00:09:38.020

Arjun Srinivasan, CDC (he/him): It's a really interesting point you're raising Peter and I, and I don't know I don't. We don't know it. I don't know enough about this population. I don't know that we've looked at this specifically, and then it it not seems, I know. But you know, I assume that the overwhelming majority of these patients are post trauma patients.

78

00:09:38.070 --> 00:09:50.550

Arjun Srinivasan, CDC (he/him): which may have some very different risk factors for some of these Ss. Or some of these hais compared to what we would see in a in a typical hospital population. I don't know. It's hard to know how

79

00:09:51.220 --> 00:09:53.990

Arjun Srinivasan, CDC (he/him): how that might be impacting some of this.

80

00:09:57.550 --> 00:10:02.419

Matt Austin: Yeah, and talking with Patrick in the last hour, he had a couple of

81

00:10:02.510 --> 00:10:06.205

Matt Austin: yeah, he had a sort of a similar question Arjen about, you know.

82

00:10:07.160 --> 00:10:14.549

Matt Austin: service members that were injured. Right? Are they being treated in these military facilities here in the Us. Are they being treated abroad?

83

00:10:15.056 --> 00:10:22.099

Matt Austin: That could obviously impact the Hci rates. He also wondered about for the Hcap scores if there was a little bit of a

84

00:10:22.830 --> 00:10:34.020

Matt Austin: an effect of that. Your customer is part of an organization that is also providing you the care right? And do you get sort of a just, a higher level of sort of buy in

85

00:10:34.367 --> 00:10:38.760

Matt Austin: in that scenario. So there's a little bit of a model issue there.

86

00:10:39.320 --> 00:10:57.486

Arjun Srinivasan, CDC (he/him): Yeah. And some of this is interesting. It's also it. It's based on expectations, right? The the average enlisted person might have a very different expectation of what communication looks like based on what they're how they're used to being communicated with it. So.

87

00:10:58.530 --> 00:10:59.077

Sara Singer: Sure it did.

88

00:10:59.260 --> 00:11:08.288

arnold milstein: I? Yeah, I I think it does. I know that. You know, in the commercial sector one of the interesting findings from efforts to connect

89

00:11:08.870 --> 00:11:17.240

arnold milstein: connect, you know, working class people such as people in the You know Walmart or Lows employee workforce

90

00:11:17.490 --> 00:11:20.800

arnold milstein: is that when they are, you know, hooked up with

91

00:11:20.840 --> 00:11:26.700

arnold milstein: the quality of doctors that you know, that provide care in a so-called center of excellence

92

00:11:26.720 --> 00:11:29.219

arnold milstein: versus, you know, routine community care.

93

00:11:29.310 --> 00:11:35.450

arnold milstein: They are deeply impressed. They've never, you know, been treated that well before.

94

00:11:35.480 --> 00:11:44.010

arnold milstein: And and and typically in local communities, particularly in practices that specialize in lower socioeconomic status patients.

95

00:11:44.060 --> 00:11:48.240

arnold milstein: you know, they they, the level of of service that

96

00:11:48.280 --> 00:11:50.470

arnold milstein: the experience, you know, tends to be

97

00:11:50.610 --> 00:11:54.389

arnold milstein: not not great. So they noticed the difference when

98

00:11:54.490 --> 00:11:57.709

arnold milstein: when you know when the people of Lows did.

99

00:11:57.950 --> 00:12:08.620

arnold milstein: People, I'll call particularly, you know, low status. Enlisted people, you know, would would dramatic would notice a dramatic difference in even if the nursing performance were average.

100

00:12:15.910 --> 00:12:30.320

Matt Austin: So I think we have maybe more questions and answers for you all. But did want to share an update on the progress that's been made, and I think hats off to Alex for really digging in with them to to get the data that

101

00:12:31.040 --> 00:12:40.630

Matt Austin: was needed to to do this, and you know, hats off to the Dha. As well for their desire and commitment to wanting to do this too. Right. They've been

102

00:12:41.040 --> 00:12:43.960

Matt Austin: active and wanting to have this happen. So.

103

00:12:44.310 --> 00:12:56.909

Sara Singer: Yeah, I would. I would actually comment. I mean, I think I think that's the best part about what I'm seeing here is that it's actually, we've actually put the data forward. And now we have some information. It will.

104

00:12:56.910 --> 00:13:20.110

Sara Singer: W. What will be interesting to see is the next time we're able to do this measurement if relative, if so these relative scores begin to change, especially around the infection rates, because this is the first time they're seeing it if they are able to use it, and probably that into some some action that that moves the needle on some of these things that would be really the win.

105

00:13:24.670 --> 00:13:25.840

Doris: I don't have too much

106

00:13:25.980 --> 00:13:30.720

Doris: quick question. You guys already have Va. Hospitals as well as part of leaf frog.

107

00:13:34.250 --> 00:13:37.131

Matt Austin: Was that the Va. Hospitals was that? Go ahead, Miss.

108

00:13:38.170 --> 00:13:50.699

Missy Danforth (she/her): Yeah. So we do not have any of the veterans administration hospitals. But we are going to be using this announcement as a entree to restart this conversations. So that's a great question.

109

00:13:54.880 --> 00:14:05.950

Matt Austin: Yeah, I think that's sort of our biggest gap that remains right is the the Va hospitals. We also aren't able to grade hospitals in any of the Us. Territories.

110

00:14:06.614 --> 00:14:09.290

Matt Austin: You know, Puerto Rico, etc. Because

111

00:14:09.650 --> 00:14:13.639

Matt Austin: the the reporting, the the public reporting for those is different. But

112

00:14:15.310 --> 00:14:17.529

Matt Austin: those sort of are the remaining gaps

113

00:14:19.100 --> 00:14:20.610

Matt Austin: in a systematic way.

114

00:14:22.980 --> 00:14:29.220

Matt Austin: Alright. So we'll keep you engaged and posted on that. We just wanted to provide you with that update

115

00:14:29.584 --> 00:14:35.940

Matt Austin: what we want to spend up a majority of the time talking about is actually some proposed changes to

116

00:14:35.970 --> 00:14:40.769

Matt Austin: the the model that we'd like to use for imputing scores for hospitals.

117

00:14:41.627 --> 00:14:44.112

Matt Austin: So just to remind everyone

118

00:14:44.660 --> 00:15:00.340

Matt Austin: For since really the the kickoff of the Leapfrog Hospital Survey leapfrog was using the American Hospital Association Survey as a primary secondary data source. I can say, a primary secondary. The key secondary data source

119

00:15:00.944 --> 00:15:08.410

Matt Austin: and in 2021 the American Hospital Association made the decision not to renew license for leapfrog

120

00:15:09.053 --> 00:15:20.499

Matt Austin: leapfrog was also seeking ways to grade additional hospitals, and so working with some of you, I think, in particular, Patrick Sarah, colleagues at Mathematica.

121

00:15:20.918 --> 00:15:26.361

Matt Austin: We looked at different imputation approaches and came up with a model that seemed

122

00:15:26.820 --> 00:15:30.979

Matt Austin: you know, feasible, relevant, and appropriate

123

00:15:31.357 --> 00:15:39.990

Matt Austin: but we've run into a couple of challenges that we think we need to maybe make some adjustments, for so one is that the imputed scores have crept up

124

00:15:40.657 --> 00:16:01.930

Matt Austin: over time, which has made imputation a more favorable choice for a fair number of hospitals, and has de incentivized them, actually reporting to the League Frog Hospital Survey. So in some ways we've de incentivized transparency because they've decided that the imputed score is a more favorable path for them.

125

00:16:02.940 --> 00:16:07.407

Matt Austin: What we're also running into is we especially this year. We are

126

00:16:07.950 --> 00:16:15.999

Matt Austin: redefining and expandingly from Bcma standard. So in some ways. So let me take half a step back

127

00:16:16.650 --> 00:16:22.289

Matt Austin: our step. One of the imputation model is to look to a hospital's historical data.

128

00:16:22.709 --> 00:16:32.009

Matt Austin: So if a hospital didn't respond to the Leak Frog Hospital Survey this year, we would look back in previous safety grades to see what data were available from those

129

00:16:32.884 --> 00:16:44.510

Matt Austin: and the problem we're going to run into this year is for the Barcode Medication Administration Standard. The frog is going to be expanding the scope of that. So in some ways the standard has changed.

130

00:16:44.983 --> 00:16:52.529

Matt Austin: We also have some concerns about whether there's some drift back or fall back in hospitals meeting the hand hygiene standard

131

00:16:53.313 --> 00:16:54.419

Matt Austin: and so

132

00:16:54.680 --> 00:17:04.330

Matt Austin: that has sort of put us at a point where we're thinking maybe it's time to refine the imputation model and maybe change up how we're doing things slightly.

133

00:17:05.589 --> 00:17:27.030

Matt Austin: The institution model really applies to 4 measures that are part of the safety grade. So those highlighted in green are the 4 measures. It's the use of computerized physician order, entry, Barcode Medication Administration. The use of intensivist in the Icu and Hygiene. We included the standard weights. Just to give you a sense of how much weight are put on those 4 measures.

134

00:17:28.806 --> 00:17:32.373

Matt Austin: So as we've sort of talked about at this point.

135

00:17:33.770 --> 00:17:39.239

Matt Austin: step. One of the imputation model is that the hospitals assigned their most recent

136

00:17:39.835 --> 00:17:56.050

Matt Austin: score from the past 4 rounds of the safety grade. So, for example, in the spring, 2024 round, we looked back and saw if I hospital had a score for that measure in fall 2023, spring 2023, fall 22 or spring 22. And if they did, we used that value

137

00:17:56.885 --> 00:18:01.120

Matt Austin: and that actually covers the 3 most recently frog hospital surveys.

138

00:18:01.620 --> 00:18:07.720

Matt Austin: If we didn't have a recent score from those past 4 rounds. Then we moved on to step 2,

139

00:18:07.740 --> 00:18:10.820

Matt Austin: which is where we put hospitals into cohorts.

140

00:18:11.040 --> 00:18:19.190

Matt Austin: Right? I mean, define cohorts based on number of beds, teaching status, urban rural status, safety net status

141

00:18:19.550 --> 00:18:27.630

Matt Austin: and we really looked at 2 calculations and gave them the lower of 2

scores. One was the mean of the cohorts current and recent scores.

142

00:18:27.690 --> 00:18:35.210

Matt Austin: or the mean of the cohort scores from each hospital's first time reporting on the current standard.

143

00:18:35.480 --> 00:18:38.080

Matt Austin: And that's really based on the idea that

144

00:18:38.100 --> 00:18:41.600

Matt Austin: hospitals, when they first start reporting to the survey.

145

00:18:41.650 --> 00:18:46.749

Matt Austin: tend to have lower performance than hospitals that have been reporting for a period of time.

146

00:18:48.280 --> 00:18:50.900

Matt Austin: So that's the current model that we're using

147

00:18:53.480 --> 00:19:05.710

Matt Austin: what I'm going to. So it's quickly touched on this. We've defined cohorts based on 4 factors, urban role status, safety net status number of beds and teaching status.

148

00:19:06.280 --> 00:19:19.531

Matt Austin: Where we do have a difference is for Icu physician staffing. We actually use the Cms cost report as the secondary data source, because that actually tells us whether the hospital operates any medical, surgical or

149

00:19:20.030 --> 00:19:22.240

Matt Austin: pediatric icu beds?

150

00:19:22.808 --> 00:19:32.130

Matt Austin: And if so, then we equate that to them, saying they operate icu beds, but have given us no information about their staffing structure.

151

00:19:33.340 --> 00:19:36.010

Matt Austin: So let me jump ahead, because I think

152

00:19:36.780 --> 00:19:42.209

Matt Austin: let me go to 2 slides, because I think these 2 are important. So, jumping ahead to

153

00:19:43.390 --> 00:19:48.459

Matt Austin: sort of current trends in hospitals, reporting to the Leapfrog Hospital survey.

154

00:19:48.650 --> 00:19:52.839

Matt Austin: so of the hospitals that received a hospital safety grade.

155

00:19:53.070 --> 00:20:09.960

Matt Austin: We've seen hospital performance or participation. Excuse me in the leapfrog hospital survey increase from 31% to 61%. And so the bars in green show the upward trend in hospitals participating in the leap Frog Hospital survey.

156

00:20:10.000 --> 00:20:13.660

Matt Austin: We did see a little bit of a drop off in 2023.

157

00:20:14.070 --> 00:20:23.370

Matt Austin: The grade bars represent the hospitals that would have scores imputed, and so one would expect those to sort of move in inverse directions.

158

00:20:25.960 --> 00:20:31.869

Matt Austin: So what we are going to propose to you all for a refinement to the imputation model

159

00:20:32.720 --> 00:20:35.940

Matt Austin: is one is to retire Step One.

160

00:20:36.030 --> 00:20:41.180

Matt Austin: which is where we used the recent historical data from hospitals

161

00:20:41.350 --> 00:20:43.160

Matt Austin: to calculate a score.

162

00:20:43.710 --> 00:20:47.019

Matt Austin: So that would be we would do away with step one

163

00:20:47.040 --> 00:21:02.229

Matt Austin: and within step 2, we would specifically focus on hospitals, and how they did on their first year of reporting on the current standard. So we would still group the hospitals into the cohorts. I think we have 12 cohorts

164

00:21:02.370 --> 00:21:08.000

Matt Austin: of hospitals, and we would assign them the score based on the first year reporting.

165

00:21:08.230 --> 00:21:13.529

Matt Austin: and we would continue to use the Cms cost report for the Icu physician staff.

166

00:21:13.830 --> 00:21:19.490

Matt Austin: So the real change here is the elimination or the retirement of step one.

167

00:21:22.320 --> 00:21:25.769

Matt Austin: Let me pause there to see if there's any questions first.

168

00:21:26.780 --> 00:21:29.250

Matt Austin: and then let's have a conversation about

169

00:21:30.040 --> 00:21:32.910

Matt Austin: feedback guidance, suggestions.

170

00:21:36.410 --> 00:21:38.499

Peter Pronovost: Matt, I just one

171

00:21:38.710 --> 00:21:57.600

Peter Pronovost: comment. It's amazing how quickly markets learn. I was on a call with a bunch of Cmos, and I don't. I doubt they saw this data, but that was the kind of the message. Oh, you do better if you don't, you know, fill out the survey, and it may have been anecdotal for them, but it was. It was clearly discussion amongst the Cmo group.

172

00:22:00.760 --> 00:22:04.589

Matt Austin: So you were saying in terms of the increased participation in the survey, Peter.

173

00:22:04.790 --> 00:22:12.910

Peter Pronovost: No, I think that, in other words, they, with the point that you said about the trends through imputation like the market they were already saying, Don't complete the survey. You do better.

174

00:22:13.413 --> 00:22:14.420

Matt Austin: Okay, yeah.

175

00:22:15.670 --> 00:22:19.270

Matt Austin: that you you would get you would do better by using the imputed score. So.

176

00:22:19.270 --> 00:22:24.929

Peter Pronovost: Correct, and they didn't have any data. It was just like more their hunch or their gut. But it was like

177

00:22:25.370 --> 00:22:27.120

Peter Pronovost: a topic of discussion.

178

00:22:29.952 --> 00:22:36.459

Sara Singer: I know you said that. If you rely on the first round of reporting that the scores are

179

00:22:36.500 --> 00:22:41.430

Sara Singer: are typically lower. But are they sufficiently lower?

180

00:22:42.114 --> 00:22:52.639

Sara Singer: That we think it would create an incentive for them not to go to the hassle of doing the survey? And what about the Cms. Cost report for the Icu staffing. Is it also typically lower.

181

00:22:55.130 --> 00:22:55.860

Matt Austin: So let me.

182

00:22:55.860 --> 00:22:56.500

Missy Danforth (she/her): Visiting.

183

00:22:57.020 --> 00:22:57.880

Matt Austin: Kevin. Listen.

184

00:22:58.700 --> 00:23:01.839

Missy Danforth (she/her): Yes, they're they are significantly lower.

185

00:23:02.000 --> 00:23:03.760

Missy Danforth (she/her): and we have seen

186

00:23:04.470 --> 00:23:06.939

Missy Danforth (she/her): some of that will debate, because

187

00:23:07.160 --> 00:23:08.629

Missy Danforth (she/her): for the most part, I think

188

00:23:09.350 --> 00:23:12.100

Missy Danforth (she/her): the majority of hospitals do want their current

189

00:23:12.650 --> 00:23:18.149

Missy Danforth (she/her): performance reflected, unless it's bad, in which case the imputed scores will be better.

190

00:23:18.190 --> 00:23:22.660

Missy Danforth (she/her): But I do think they are sufficiently low enough hopefully to be motivating.

191

00:23:25.390 --> 00:23:30.979

Matt Austin: And when I've brought up brought up on the screen in which I skipped over in the presentation because I wasn't sure

192

00:23:31.230 --> 00:23:34.960

Matt Austin: sort of talk about it is but to Sarah's question, I think.

193

00:23:35.750 --> 00:23:41.810

Matt Austin: does this answer your question, Sarah? In terms of these are the average imputed scores for the 4 measures

194

00:23:41.920 --> 00:23:44.290

Matt Austin: by the step one and step 2.

195

00:23:44.600 --> 00:23:46.529

Sara Singer: The 2 green bars at the bottom.

196

00:23:46.760 --> 00:23:47.790

Matt Austin: Correct.

197

00:23:48.500 --> 00:23:52.539

Matt Austin: And then what we've put up at the top in the white is

198

00:23:52.570 --> 00:24:01.949

Matt Austin: for hospitals that complete the survey. These are their performance categories and the points that they get assigned based on their performance. Category.

199

00:24:01.950 --> 00:24:03.270

Sara Singer: Oh, yeah. Okay.

200

00:24:04.540 --> 00:24:07.430

Matt Austin: So it's to give some context between those that

201

00:24:07.520 --> 00:24:10.700

Matt Austin: report versus those that are getting scores imputed.

202

00:24:11.240 --> 00:24:11.850

Sara Singer: Okay.

203

00:24:15.720 --> 00:24:17.750

Sara Singer: yeah, I mean, it looks like it would

204

00:24:19.090 --> 00:24:20.650

Sara Singer: be motivating.

205

00:24:27.790 --> 00:24:29.439

Matt Austin: So what other

206

00:24:29.880 --> 00:24:35.360

Matt Austin: reactions do folks have to this idea of retiring? Step one

207

00:24:35.900 --> 00:24:37.530

Matt Austin: and simply using

208

00:24:37.680 --> 00:24:43.289

Matt Austin: so basically retiring, we're gonna use your hospitals, historical data.

209

00:24:43.670 --> 00:24:48.590

Matt Austin: And we would basically move solely to a model of putting hospitals into cohorts

210

00:24:49.070 --> 00:24:53.780

Matt Austin: and using the first time reporting scores from that cohort.

211

00:24:57.900 --> 00:25:04.939

Matt Austin: Let me show one more slide just to maybe spur some conversation which is, here are the 12 cohorts

212

00:25:05.160 --> 00:25:08.379

Matt Austin: once again, by the sort of 4 factors.

213

00:25:08.792 --> 00:25:13.140

Matt Austin: And then what the means are for each of those 12 covid.

214

00:25:14.220 --> 00:25:21.270

Sara Singer: Yeah, I mean, I guess you can assume that the Downside is that if there is a high performing organization that doesn't happen to

215

00:25:22.033 --> 00:25:29.696

Sara Singer: you know, want to continue doing the the leapfrog survey. They will be penalized because they'll be lumped together with

216

00:25:30.160 --> 00:25:35.309

Sara Singer: cohort that may not be performing as well as they are. But I think that's the that's

217

00:25:35.730 --> 00:25:39.049

Sara Singer: that's sort of what we're trying to accomplish.

218

00:25:42.710 --> 00:25:50.180

Missy Danforth (she/her): Yeah. And, Sarah, if I can just make one other note, this is Missy is, we do see, slippage and performance on these measures from year to year.

219

00:25:50.440 --> 00:25:56.309

Missy Danforth (she/her): I mean particularly with something like hand hygiene, I think we found like if we talked to them in January, February, or March

220

00:25:56.510 --> 00:25:59.169

Missy Danforth (she/her): versus, you know, busier times of the year.

221

00:25:59.530 --> 00:26:08.479

Missy Danforth (she/her): They may not be doing as well, certainly, as Matt described with Vcma. The standard is changing so much we just can't pull for those old Vcma scores

222

00:26:09.007 --> 00:26:19.729

Missy Danforth (she/her): and with things like nurse staffing and workforce, I'm sorry not our staffing. Cpu, the CPU developers. I know David's not on the call today, but they make content changes to that test every year.

223

00:26:19.920 --> 00:26:23.019

Missy Danforth (she/her): So I also think that it protects us a little bit.

224

00:26:23.160 --> 00:26:25.979

Missy Danforth (she/her): If a hospital's starting to have a down slide.

225

00:26:26.050 --> 00:26:29.610

Missy Danforth (she/her): and we're awarding them those 100 points from previous surveys.

226

00:26:29.630 --> 00:26:33.239

Missy Danforth (she/her): I think at a point it could start to our own trust and great overall.

227

00:26:35.687 --> 00:26:56.249

Sara Singer: I, I'm wondering. So we've taken like, one, option would have been to just eliminate, the most recent score and to use step 2 as it was. If you did that do. I can't remember if the the 2 bars in green do you have a bar? That also shows, if you allow them.

228

00:26:56.360 --> 00:27:03.060

Sara Singer: if you assign them, mean of the cohort. Not just the most recent the the first round of

229

00:27:03.390 --> 00:27:09.039

Sara Singer: of reporting for that cohort is it? Is it also penalizing? But maybe not so drastically so.

230

00:27:09.940 --> 00:27:14.899

Matt Austin: So what I didn't do a great job of explaining Sarah, is the

231

00:27:15.030 --> 00:27:17.760

Matt Austin: current. Methodology is to take

232

00:27:17.770 --> 00:27:22.120

Matt Austin: the lower of 2 scores for step 2,

233

00:27:23.091 --> 00:27:27.610

Matt Austin: which is the recent scores, and the first time reporting.

234

00:27:27.610 --> 00:27:27.990

Sara Singer: I see.

235

00:27:27.990 --> 00:27:35.404

Matt Austin: And so what's in the so what's in the Green Bar would be reflective of that lower which, if that most likely would be the.

236

00:27:35.690 --> 00:27:54.770

Sara Singer: So so the step 2 is, I mean the other advantages. It's it's sort of already socialized with the group. They, you know, th there's some acknowledgement of its validity. So what we're doing now is is taking away the one that hospitals seem to be gaming.

237

00:28:01.590 --> 00:28:04.419

Matt Austin: That would be one. Yes, interpretation of that

238

00:28:07.560 --> 00:28:09.310

Matt Austin: barge in your hands up, do you? Wanna.

239

00:28:09.640 --> 00:28:14.860

Arjun Srinivasan, CDC (he/him): I'm wondering if you all have any experience with hospitals that

240

00:28:15.560 --> 00:28:28.100

Arjun Srinivasan, CDC (he/him): gone back and forth like completed the survey at some not completed at some point it, I mean. They may not be very many, but I'm wondering if you have any anecd data

241

00:28:28.250 --> 00:28:31.170

Arjun Srinivasan, CDC (he/him): on. You know where those hospitals

242

00:28:31.950 --> 00:28:39.560

Arjun Srinivasan, CDC (he/him): where they tend to fall because one of the questions here is like, if the I mean if there is

243

00:28:39.740 --> 00:28:56.300

Arjun Srinivasan, CDC (he/him): not gonna say, a punitive intent. But if there is a kind of motivating intent here to say, Look, we, we think you need to fill out the survey, because without the survey, we really don't have very accurate data. I mean, the bias is that I'm I might look at this and say, Well, if I'm if I'm in the bottom half.

244

00:28:56.510 --> 00:29:00.509

Arjun Srinivasan, CDC (he/him): I'd rather not fill out the survey, because that'll lift me up to the mean

245

00:29:01.082 --> 00:29:04.520

Arjun Srinivasan, CDC (he/him): so would be better for me to just not do it.

246

00:29:04.630 --> 00:29:10.010

Arjun Srinivasan, CDC (he/him): So the question then becomes is like, do you say? Well, you know, if we don't have your data.

247

00:29:10.070 --> 00:29:13.430

Arjun Srinivasan, CDC (he/him): we have to assign you even lower, because

248

00:29:13.670 --> 00:29:27.780

Arjun Srinivasan, CDC (he/him): we're trying to push people to fill out the certain again. I don't know. This is a this is cut mid a little controversial, maybe. But do you say, look, if you don't fill out the survey. I'm sorry, but we have to assign you to the bottom portal because

249

00:29:28.000 --> 00:29:39.529

Arjun Srinivasan, CDC (he/him): we're now making. Maybe we make the assumption that the reason you're not filling out the survey is because you are in the bottom part, and you want that boost and score to get you to the meeting. I don't know.

250

00:29:42.210 --> 00:29:42.720

Missy Danforth (she/her): Urgent.

251

00:29:42.720 --> 00:29:43.050

Matt Austin: There's.

252

00:29:43.050 --> 00:29:46.799

Missy Danforth (she/her): Really great question. I think, yeah, I think to date, we've

253

00:29:46.840 --> 00:29:52.870

Missy Danforth (she/her): we've less focused on the penalty portion of it and more focused on really not wanting to potentially

254

00:29:52.960 --> 00:30:01.489

Missy Danforth (she/her): assure patients they're going to a safe place that may have had slippage and if you've been following the news of steward health system.

255

00:30:01.860 --> 00:30:06.330

Missy Danforth (she/her): That would be an example of an area where they have historically done. The survey

256

00:30:06.420 --> 00:30:10.350

Missy Danforth (she/her): didn't do the survey in 2023, for obvious reasons, you know now.

257

00:30:10.720 --> 00:30:14.160

Missy Danforth (she/her): had those scores imputed due to this imputation methodology.

258

00:30:14.410 --> 00:30:18.279

Missy Danforth (she/her): and obviously the backlash in those communities from those patients is.

259

00:30:18.290 --> 00:30:22.909

Missy Danforth (she/her): well, how can this be? Right? So I think that's been the focus less so than

260

00:30:23.200 --> 00:30:27.709

Missy Danforth (she/her): penalty, or, frankly, even motivating people to do the survey. I think it's that

261

00:30:27.730 --> 00:30:31.239

Missy Danforth (she/her): at a minimum. We don't want to report them with the highest score

262

00:30:31.650 --> 00:30:33.660

Missy Danforth (she/her): if we don't have any information.

263

00:30:33.700 --> 00:30:37.939

Missy Danforth (she/her): and if we have empirical information that there is slippage here every year

264

00:30:37.980 --> 00:30:39.070

Missy Danforth (she/her): which we do see.

265

00:30:41.590 --> 00:30:43.680

Peter Pronovost: Missy, though to Arsen's Point.

266

00:30:43.790 --> 00:30:45.950

Peter Pronovost: I wonder, in our model

267

00:30:46.290 --> 00:30:47.834

Peter Pronovost: do we include?

268

00:30:48.610 --> 00:30:55.229

Peter Pronovost: that if they're in the lowest quartile that they stay in that, you know. I mean at least to reduce the gaming. So it does. You know we may not

269

00:30:55.850 --> 00:31:03.869

Peter Pronovost: put everybody in that lowest quarter, but we, if your previous survey you were low. You don't get an elevation, you know, through this invitation.

270

00:31:11.840 --> 00:31:16.050

Matt Austin: Other suggestions, recommendations.

271

00:31:17.990 --> 00:31:20.654

Kathy McDonald: Looking like at the safety net results. I just

272

00:31:21.030 --> 00:31:23.000

Kathy McDonald: have. We thought, through

273

00:31:23.260 --> 00:31:27.680

Kathy McDonald: any of the implications for them I always worry most about.

274

00:31:29.430 --> 00:31:30.509

Kathy McDonald: You know those

275

00:31:32.670 --> 00:31:35.330

Kathy McDonald: those hospitals, and making sure that

276

00:31:35.570 --> 00:31:37.899

Kathy McDonald: they don't end up in with

277

00:31:39.190 --> 00:31:43.770

Kathy McDonald: with a something we haven't thought of an unintended consequence there.

278

00:31:44.160 --> 00:31:46.779

Kathy McDonald: they're already carrying so much burden. So

279

00:31:49.280 --> 00:31:51.830

Kathy McDonald: I haven't thought through this enough to be able to.

280

00:31:53.705 --> 00:31:54.080

Kathy McDonald: Yeah.

281

00:31:54.080 --> 00:31:54.609

Matt Austin: Yeah, I mean, like.

282

00:31:54.610 --> 00:31:56.240

Kathy McDonald: But I wanted to put it out there.

283

00:31:57.190 --> 00:31:59.788

Matt Austin: Yeah, I think where I struggle is.

284

00:32:00.750 --> 00:32:05.123

Matt Austin: what is a true? Wh, where is there a true difference in performance?

285

00:32:06.620 --> 00:32:08.730

Matt Austin: Right? And where is there?

286

00:32:09.218 --> 00:32:13.000

Matt Austin: Some sort of bias in the measurement against them? Right.

287

00:32:13.429 --> 00:32:13.859

Kathy McDonald: Right.

288

00:32:13.860 --> 00:32:17.306

Matt Austin: I think we, I think we wanna minimize the second. And

289

00:32:17.960 --> 00:32:26.080

Matt Austin: right, if there's 2 differences, there's 2 differences. And there, there are structural issues that we need to address there, Kathy, for sure, right? But if

290

00:32:26.550 --> 00:32:29.409

Matt Austin: you know, I think some of the recent research is showing that

291

00:32:29.710 --> 00:32:39.490

Matt Austin: patients of marginalized communities actually do tend to receive care at hospitals that have more patient hearts. Right? And that's just the unfortunate

292

00:32:39.830 --> 00:32:42.649

Matt Austin: reality of our current world and status.

293

00:32:43.820 --> 00:32:46.120

Peter Pronovost: You know the a comment.

294

00:32:46.750 --> 00:32:55.709

Peter Pronovost: yeah, and I'm happy to. We aren't. We won't solve it now. But I think how you message this change is going to be really critical, because I think it could

295

00:32:55.980 --> 00:32:59.369

Peter Pronovost: help, you know, enhance focus on safety or kind of

296

00:32:59.390 --> 00:33:13.200

Peter Pronovost: piss people off and like saying, you're not understanding. We just went through Covid. We don't have staffing. So you know, Missy, your point of all, I mean, like, you know, you know, the persistent. 25% of hospitalized patients are still harmed. The trends are going the wrong way.

297

00:33:13.410 --> 00:33:14.460

Peter Pronovost: and

298

00:33:15.960 --> 00:33:22.640

Peter Pronovost: Consumers have a right to know this. Without this we're miss, we risk misinforming them, and being very, you know, transparent about that risk.

299

00:33:25.000 --> 00:33:26.559

Missy Danforth (she/her): I think that's incredibly.

300

00:33:27.060 --> 00:33:27.270

Matt Austin: Right.

301

00:33:27.270 --> 00:33:28.700

Missy Danforth (she/her): Point, Peter, and well taken.

302

00:33:29.230 --> 00:33:48.000

Peter Pronovost: And I would probably miss it because this is gonna be, I mean the like E, even the discussion. I think it's could be misconstrued like maybe even, you know. Get your Matt, who or who whoever a couple of people, to share this reasoning with the Aj with Premier, with Vizient, you know, with the variety of

303

00:33:48.200 --> 00:33:51.239

Peter Pronovost: groups that might be using this so that you can you

304

00:33:51.490 --> 00:33:53.080

Peter Pronovost: manage that narrative?

305

00:33:55.260 --> 00:33:55.980

Peter Pronovost: Yep.

306

00:33:55.980 --> 00:33:57.230

Missy Danforth (she/her): That's a great idea.

307

00:33:57.600 --> 00:34:05.979

Missy Danforth (she/her): And can I ask just Peter, your opinion? And anyone on the panel is, we have a number of large house systems that have brought this issue to us as well.

308

00:34:06.360 --> 00:34:15.369

Missy Danforth (she/her): which is to say that you know we have a hundred participation in the surgery when we're doing well, and what we're doing not so well cause we want to both that trust in our communities.

309

00:34:15.790 --> 00:34:21.070

Missy Danforth (she/her): We really don't think it's fair that you're allowing hospitals, not reporting to get the highest scores.

310

00:34:21.100 --> 00:34:23.629

Missy Danforth (she/her): because we can't really trust that it's currently true.

311

00:34:23.670 --> 00:34:26.579

Missy Danforth (she/her): To what extent do you think health systems themselves.

312

00:34:26.860 --> 00:34:30.510

Missy Danforth (she/her): who have wanted to be partners at us if we make this change.

313

00:34:31.409 --> 00:34:34.420

Missy Danforth (she/her): could help deliver the message? Or do you think that would backfire.

314

00:34:38.090 --> 00:34:40.162

Peter Pronovost: No, I think

315

00:34:41.340 --> 00:34:46.739

Peter Pronovost: they absolutely could. And, missy, just like in, you know, my hospital colleague, friends.

316

00:34:46.889 --> 00:34:53.591

Peter Pronovost: There's clearly a culture who's committed to reporting and transparency want to do the right thing?

317

00:34:54.520 --> 00:35:06.370

Peter Pronovost: Some of them, though it may be like you can say, is legitimate. Now, a resource thing do they have time to complete the survey and and do without a doubt there are some of those, because hospitals.

318

00:35:06.440 --> 00:35:13.958

Peter Pronovost: quality budgets got crushed with the financial losses with Covid. There's others that who are

319

00:35:14.660 --> 00:35:16.519

Peter Pronovost: not so transparent.

320

00:35:17.190 --> 00:35:22.290

Peter Pronovost: If you highlight those, missy, though I would just make sure that that narrative

321

00:35:22.500 --> 00:35:42.899

Peter Pronovost: that the hospital is telling is consistent with other signals, meaning they make their data transparent, you know, like there's a number of other data points they can choose to be transparent or not, and cause otherwise someone could come back and say, Yeah, but then why aren't they making their? You know, these other data sets that they could make transparent, and they've elected not to.

322

00:35:44.620 --> 00:35:46.440

Missy Danforth (she/her): That's incredibly helpful. Thank you.

323

00:35:51.610 --> 00:35:54.940

Matt Austin: Any other feedback or suggestions on this?

324

00:35:57.450 --> 00:36:02.319

Matt Austin: If not, I think the next step is that leapfrog will

325

00:36:02.940 --> 00:36:08.643

Matt Austin: consider the feedback we've heard from all of you as well as from Patrick earlier today.

326

00:36:09.840 --> 00:36:16.680

Matt Austin: and if the frog decides, it will actually put out for public comment on this proposed change, and

327

00:36:16.700 --> 00:36:26.929

Matt Austin: hospitals and other stakeholders would have the opportunity to to comment on this proposal. And Peter, thank you for that suggestion on how the messaging of that could be incredible!

328

00:36:26.930 --> 00:36:33.190

Peter Pronovost: Yeah, I'm happy to review that with you, Matt, or just go think through because it's really it is going to be really important of how people react to this.

329

00:36:33.590 --> 00:36:34.750

Matt Austin: Yeah, okay.

330

00:36:34.780 --> 00:36:35.900

Matt Austin: makes sense.

331

00:36:37.340 --> 00:36:43.550

Matt Austin: Okay? So our final agenda item is to talk about a couple of

332

00:36:44.080 --> 00:36:50.530

Matt Austin: measures that we would like to consider adding to the hospital safety grade.

333

00:36:51.970 --> 00:37:05.380

Matt Austin: so these are 2 new Ec Qms, which are electronic clinical quality measures. Which are measures that are actually derived directly from the Ehr data, as I understand them.

334

00:37:06.107 --> 00:37:13.880

Matt Austin: There's one focused on severe hyperglycemia and another measure focused on severe hypoglycemia.

335

00:37:14.980 --> 00:37:19.989

Matt Austin: Both of these measures are currently being collected by Cms

336

00:37:20.468 --> 00:37:24.739

Matt Austin: and the public reporting of them will start next year in 2025.

337

00:37:25.595 --> 00:37:30.610

Matt Austin: I've included on the slides the numerator and definition, denominator definitions.

338

00:37:31.172 --> 00:37:34.999

Matt Austin: So the for the first one, the severe hyper glycaemia

339

00:37:35.554 --> 00:37:37.156

Matt Austin: is focusing on

340

00:37:38.290 --> 00:37:45.480

Matt Austin: sorry. That was a typo that should say, hyper ergly semia as an outcome in the hospital inpatient setting.

341

00:37:46.029 --> 00:37:50.940

Matt Austin: And this looks at the basically the percentage of inpatient days.

342

00:37:51.443 --> 00:37:56.819

Matt Austin: For patients 18 years and older, for which they had a hyperglycemic event.

343

00:37:57.454 --> 00:38:04.949

Matt Austin: And that event is defined as a day with one blood Google's value greater than 300 milligrams per deciliter.

344

00:38:05.030 --> 00:38:08.010

Matt Austin: or a day where a test was not done.

345

00:38:08.983 --> 00:38:18.689

Matt Austin: But there was a was preceded by 2 consecutive days, where at least one of the glucose values, and one of those 2 days was above or at 200.

346

00:38:18.900 --> 00:38:25.269

Matt Austin: So it would be looking at the percentage of days in which the patient had a hyper glycaemic event.

347

00:38:28.177 --> 00:38:32.590

Matt Austin: So that's one measure for consideration. The other one is severe hypoglycemia

348

00:38:33.440 --> 00:38:41.499

Matt Austin: and this focuses really on for patients that received a hypoglycemic medication

349

00:38:42.633 --> 00:38:45.780

Matt Austin: and whether they had a hypoglycemic event joining.

350

00:38:46.580 --> 00:38:51.430

Matt Austin: There's a definition within the numerator of what is a hypoglycemic event.

351

00:38:52.058 --> 00:38:56.940

Matt Austin: So that's a blood glue close less than 40 milligrams per just a liter

352

00:38:57.305 --> 00:39:03.349

Matt Austin: that they gave them a hypoglycemic medication within 24 h after the start of the event.

353

00:39:03.904 --> 00:39:15.640

Matt Austin: And there was no repeat test for glucose, with a result greater than 90 within 5 min, so that there was sort of a sustained level of hypoglycemia.

354

00:39:18.670 --> 00:39:23.689

Matt Austin: So I will pause there to see here reactions, thoughts.

355

00:39:24.490 --> 00:39:32.220

Matt Austin: Doris, if you have any additional information that you'd like to share, I think, is notable or relevant, would love to hear that as well.

356

00:39:33.640 --> 00:39:42.399

Doris: Sure, I think it's this goes through a period of voluntary reporting. So I'm not sure how much data will be available over what time period. I don't remember all the details of the reporting requirements.

357

00:39:44.400 --> 00:39:46.669

Matt Austin: So your understanding is, the current

358

00:39:46.720 --> 00:39:50.349

Matt Austin: situation is, these would be voluntary measures for hospitals.

359

00:39:52.660 --> 00:40:01.269

Doris: Yeah, I think that they can, if I remember correctly, and I could be totally wrong about this that they could select like from a list of Ecqms.

360

00:40:01.610 --> 00:40:02.520

Matt Austin: Okay.

361

00:40:02.520 --> 00:40:23.539

Doris: So I think it depends on what program they're in because we don't. We started developing these, and then they got taken over by a different developer. So I've not followed their trajectory. But I, if I remember the pro program correctly it would be like you could select from a list. So I don't know how comprehensive reporting will be for your guys. Point of view in terms of you're gonna end up with polls and the data and all that, and invitation back on the table again.

362

00:40:23.680 --> 00:40:26.669

Doris: so, or or some other way of dealing with missing data.

363

00:40:27.310 --> 00:40:34.210

Missy Danforth (she/her): Okay, thank you, Doris. I will clarify that because our understanding in my previous conversations with Michelle

364

00:40:34.930 --> 00:40:39.550

Missy Danforth (she/her): Scriber from Cms is that these new patient safety focus Ecqms.

365

00:40:39.570 --> 00:40:41.240

Missy Danforth (she/her): There's like a kidney

366

00:40:41.350 --> 00:40:46.698

Missy Danforth (she/her): damage, one coming in falls and pressure ulcers will be required, not part of.

367

00:40:47.080 --> 00:40:55.110

Doris: I could be wrong. It's possible they yeah put them in like in the hack program or something, and then they'll be required so I can dig for you if you want to.

368

00:40:58.260 --> 00:41:03.520

arnold milstein: Yeah, this is Arnie. I just like to say that you know one of the you know one of the beauties of this direction

369

00:41:03.790 --> 00:41:15.550

arnold milstein: by, you know. May some courageous officials within Cms. Is it potentially as it expands, you know, begins to, you know, moderate the problem of hospitals, not reporting.

370

00:41:15.650 --> 00:41:19.389

arnold milstein: If Cms is, you know, is requiring these.

371

00:41:19.770 --> 00:41:24.129

arnold milstein: These direct from electronic health record the important measures.

372

00:41:24.300 --> 00:41:26.459

arnold milstein: And and they are.

373

00:41:26.800 --> 00:41:28.120

arnold milstein: they are reported.

374

00:41:28.190 --> 00:41:35.150

arnold milstein: And and the you know they are not optional, and reporting to Cms. And Cms. In turn, you know, shares them

375

00:41:35.240 --> 00:41:38.190

arnold milstein: for public use, such as by leapfrog.

376

00:41:39.670 --> 00:41:43.050

Matt Austin: And Arti, do you feel like the 2? Have face validity

377

00:41:43.380 --> 00:41:44.340

Matt Austin: as

378

00:41:44.760 --> 00:41:47.989

Matt Austin: patient safety harms that should be included?

379

00:41:49.080 --> 00:41:49.770

Matt Austin: Yes.

380

00:41:49.770 --> 00:41:57.359

arnold milstein: I mean, like, like all yeah, I mean, like all cliff edge, you know, definitions, you know, over time

381

00:41:57.870 --> 00:42:01.919

arnold milstein: these measures will will improve. But achieving consensus

382

00:42:02.080 --> 00:42:08.610

arnold milstein: is, you know, is is difficult. And so I think this is a this is a very reasonable start.

383

00:42:09.920 --> 00:42:17.719

Peter Pronovost: Yeah. And Matt, I would just add, from, I think they both have face validity. The harm from hypoglycemia is

384

00:42:17.950 --> 00:42:18.740

Peter Pronovost: app.

385

00:42:19.750 --> 00:42:27.050

Peter Pronovost: Probably a couple of log orders higher than hyperglycemia. So if I had to prioritize

386

00:42:27.621 --> 00:42:39.669

Peter Pronovost: just to not to frighten everybody, there's a couple of health systems who agree to look at how often hypoglycemia occurs. These are my bunch around 800 bit hospitals.

387

00:42:41.400 --> 00:42:46.670

Peter Pronovost: and I think they used 45 as a cutoff. So, but close enough

388

00:42:47.370 --> 00:42:50.130

Peter Pronovost: 50 events per week on average

389

00:42:51.170 --> 00:42:54.809

Peter Pronovost: week. Like, I mean, it is like mind boggling

390

00:42:57.620 --> 00:43:10.800

Peter Pronovost: just again. This, I think it's important for the context that you know. Really the only way health systems manage this because it's quite technical is if they have diabetic educators who guide the physician on how to dose these

391

00:43:10.990 --> 00:43:15.390

Peter Pronovost: drugs and or have staff like when people are Npo

392

00:43:15.973 --> 00:43:20.406

Peter Pronovost: that they adjust their insulin levels, which the you know

393

00:43:23.020 --> 00:43:38.349

Peter Pronovost: haven't done much. But hospitals cut those staff a lot with Covid. And so this problem has gotten significant significantly worse. Or it's a diabetic Np. Who, like, we know, would would work with physicians to to to score, and and you know, and that it's

394

00:43:39.460 --> 00:43:50.160

Peter Pronovost: my mind was blown away. I mean, I could tell you we I don't have any practical way that education is gonna work for this. So we're deploying. I have no financial relations to them. But

395

00:43:50.587 --> 00:44:00.089

Peter Pronovost: a company called Glide Tech. That audit has an AI model that automates the insulin dosing and has built in checks like, if your Npo. It automatically adjusts your

396

00:44:01.119 --> 00:44:06.410

Peter Pronovost: solutions. But my point in that is, if if we do this measure, it would be great to find out

397

00:44:06.510 --> 00:44:10.740

Peter Pronovost: what health systems are doing to perform well on it, cause it's it's it's

398

00:44:11.450 --> 00:44:17.859

Peter Pronovost: putting more staff in is going to be challenge for hospitals. But there are. There's a ton of technology that could help with this.

399

00:44:20.770 --> 00:44:26.579

Matt Austin: That's really helpful context, Peter. Thank you. Especially the the guidance around the hypoglycemia being

400

00:44:26.780 --> 00:44:31.220

Matt Austin: potentially a greater harm to patients on the hyper glycaemia.

401

00:44:31.220 --> 00:44:32.670

Peter Pronovost: The economic piece

402

00:44:32.880 --> 00:44:34.640

Peter Pronovost: in our health system.

403

00:44:35.590 --> 00:44:44.110

Peter Pronovost: One of the the hyper hyper didn't really seem to drive length of stay, or maybe had, like a point 3. These hypoglycemic events.

404

00:44:44.550 --> 00:44:45.890

Peter Pronovost: on average.

405

00:44:46.330 --> 00:44:52.489

Peter Pronovost: added 3 days to our hospital state, you know. Some went to the Icu, but it was a

406

00:44:53.520 --> 00:44:56.200

Peter Pronovost: about a 17 million dollars.

407

00:44:56.660 --> 00:44:59.490

Peter Pronovost: Excess days cost to our health system.

408

00:45:02.680 --> 00:45:07.930

arnold milstein: I certainly I very much agree with Peter's comment that that they

409

00:45:08.030 --> 00:45:12.109

arnold milstein: one would, if if optimally, management, have a lot more

410

00:45:12.360 --> 00:45:21.630

arnold milstein: clinical benefit than the other. But that being said, I think you know Cms. Was courageous to move forward with these 2. And and I think in some ways, you know.

411

00:45:21.730 --> 00:45:24.790

arnold milstein: you know, weak management of of

412

00:45:25.250 --> 00:45:26.870

arnold milstein: of hyperglycemia.

413

00:45:27.050 --> 00:45:34.670

arnold milstein: It it may be an indication of yeah, exactly. So. I think. My, my, I'm

414

00:45:34.740 --> 00:45:38.380

arnold milstein: quite supportive of us, you know, adding both both measures.

415

00:45:38.380 --> 00:45:44.229

Peter Pronovost: Yeah, I I I am, too. I was just given that for the context, because I I was pretty blown away about how common it was.

416

00:45:44.430 --> 00:45:48.279

Sara Singer: Is the management of hyper hyperglycemia. Very different.

417

00:45:50.892 --> 00:45:56.070

Peter Pronovost: No, I mean, you still need to know how to do it, but I think it's it's probably less

418

00:45:56.340 --> 00:45:57.550

Peter Pronovost: complicated.

419

00:45:57.700 --> 00:46:00.530

Peter Pronovost: I would say most of our hyper glycaemia

420

00:46:00.700 --> 00:46:04.019

Peter Pronovost: are people who get steroids, and it bumps it up.

421

00:46:04.220 --> 00:46:06.929

Peter Pronovost: or really common is

422

00:46:07.500 --> 00:46:10.389

Peter Pronovost: they're in the Icu on an insulin drip.

423

00:46:10.510 --> 00:46:19.110

Peter Pronovost: and then they leave the Icu, and that transition isn't managed well, and they rebound really high. Those are very common scenarios.

424

00:46:24.390 --> 00:46:28.550

Matt Austin: Okay, so what I'm hearing from the group is support for

425

00:46:28.770 --> 00:46:32.500

Matt Austin: including these measures. It does sound like that. Maybe we need to

426

00:46:32.530 --> 00:46:34.589

Matt Austin: learn a bit more about the

427

00:46:35.080 --> 00:46:36.949

Matt Austin: whether these measures will be

428

00:46:37.060 --> 00:46:41.710

Matt Austin: reported out in large numbers by hospitals, or if there's going to be sort of a

429

00:46:43.790 --> 00:46:48.429

Matt Austin: smaller number of hospitals, and so maybe that becomes the reason for a delay. But

430

00:46:48.782 --> 00:46:57.009

Matt Austin: we can clarify with Cms with the the current plans are there. And if the plan is to have sort of robust reporting.

431

00:46:57.030 --> 00:47:07.379

Matt Austin: I think the plan would be to to move forward with adding these 2 measures, we would add these to the outcome domain. Is what the the proposal would be.

432

00:47:11.510 --> 00:47:12.480

Matt Austin: I.

433

00:47:12.480 --> 00:47:14.819

Sara Singer: Are there any, as a result that we would roll off.

434

00:47:20.600 --> 00:47:22.320

Matt Austin: Great question.

435

00:47:24.760 --> 00:47:26.749

Matt Austin: I think we could come back

436

00:47:26.880 --> 00:47:30.020

Matt Austin: to you all with a proposal.

437

00:47:30.220 --> 00:47:32.140

Matt Austin: If we think that would be.

438

00:47:32.180 --> 00:47:35.290

Matt Austin: we could come back with an analysis of where things are at.

439

00:47:36.610 --> 00:47:38.549

Matt Austin: We. We had some internal

440

00:47:38.730 --> 00:47:43.299

Matt Austin: conversation about this just the other day, meaning Missy Alex Preeti myself.

441

00:47:44.047 --> 00:47:47.819

Matt Austin: You know we talked about like, you know, air embolism.

442

00:47:47.930 --> 00:47:57.829

Matt Austin: Right? It's most hospitals. The value is 0. But the the challenge is when it's not 0. It tends to be a fairly significant event for that patient.

443

00:47:58.863 --> 00:48:00.150

Matt Austin: You know.

444

00:48:01.130 --> 00:48:05.809

Matt Austin: unattain reform unintended, retain foreign objects.

445

00:48:06.539 --> 00:48:19.719

Matt Austin: You know, still remain non 0. And there's some concern that we're not even capturing all that are actually happening. Right? So we I don't think we are at a point

where we want to retire. Any of the hais

446

00:48:20.586 --> 00:48:22.769

Matt Austin: but we we could definitely

447

00:48:22.810 --> 00:48:25.520

Matt Austin: engage further in that conversation. Sir.

448

00:48:25.970 --> 00:48:44.599

Alexandra Campione: Yeah. And Matt, I'll just add, we have 12 process and structural measures, and only 10 outcome measures. So adding 2 wouldn't necessarily tip the scales too much. We would have to look at what the point distribution is for the other measures, and if we like that but that's also something to consider.

449

00:48:44.600 --> 00:48:50.510

Peter Pronovost: Hey, Matt? Just, you know, on that note cause like these are really rare events. They, you know, and

450

00:48:52.430 --> 00:48:53.720

Peter Pronovost: hang on a second.

451

00:48:54.880 --> 00:48:55.510

Matt Austin: Sure

452

00:49:00.630 --> 00:49:01.510

Matt Austin: India.

453

00:49:03.230 --> 00:49:07.040

Matt Austin: So other thoughts reactions to that while we wait for Peter to come back.

454

00:49:15.380 --> 00:49:19.070

Matt Austin: But, Sarah, we can put something together for you and others. That sort of

455

00:49:19.150 --> 00:49:21.550

Matt Austin: gives us some context around that to my.

456

00:49:21.850 --> 00:49:35.680

Sara Singer: Necessarily suggesting that we do just that. You know, we've talked about continuing to look at it. And so it occurred to me that this might work a time when we should look again. Maybe not retiring, but distribute it. Looking at how we distribute

457

00:49:36.360 --> 00:49:37.300

Sara Singer: weight.

458

00:49:38.450 --> 00:49:46.799

Matt Austin: Yeah, I mean, the implications of adding 2 measures is that the relative weights for the other 10 measures will go down. Yeah.

459

00:49:46.820 --> 00:49:48.979

Peter Pronovost: Matt. What I was going to say

460

00:49:49.980 --> 00:49:50.730

Peter Pronovost: is

461

00:49:50.840 --> 00:49:53.750

Peter Pronovost: a potential or explore collaborating with

462

00:49:54.000 --> 00:49:58.789

Peter Pronovost: Cms. And and you know, as part of that Pcast report for safety.

463

00:49:58.870 --> 00:50:04.109

Peter Pronovost: One of the strong things we were working with Michelle and Cms

464

00:50:04.250 --> 00:50:06.949

Peter Pronovost: is, they have a more robust

465

00:50:08.530 --> 00:50:19.350

Peter Pronovost: through their conditions of participation when they visit hospitals that they use data to guide where they look right now. They, as you know, they don't do that. They just walk around and look at a few charts.

466

00:50:19.410 --> 00:50:26.859

Peter Pronovost: and so the thought would be if it to encourage, as part of that review any of these low risk but serious events.

467

00:50:27.690 --> 00:50:37.090

Peter Pronovost: They? They haven't implemented it, but they felt they didn't need any extension of the cops, but that within that what we

468

00:50:37.940 --> 00:50:45.080

Peter Pronovost: put forward to them is that there would be a meeting with the CEO, the Board Chair, and the Cm. Or the Dmv. Or Joint Commission.

469

00:50:45.100 --> 00:50:57.239

Peter Pronovost: who would look at rates of harm and require an action plan for outliers, because, as you know right now, you could have, like 10 times the rate of Cloud Z. And your joint commission survey wouldn't even look at.

470

00:50:57.750 --> 00:51:06.609

Arjun Srinivasan, CDC (he/him): Yeah. And Pierre, it's it's really, I think it really is Joint commission. And Dnd, who really, because we've had these discussions with joint Commission try to

471

00:51:07.020 --> 00:51:16.789

Arjun Srinivasan, CDC (he/him): get them to do that because it's I mean, it's publicly available data. It's right. It's like going to a website just to take a look, and they've not been.

472

00:51:16.820 --> 00:51:23.520

Arjun Srinivasan, CDC (he/him): There's been some degree of like, well, you know, it's there's a lot of the surveyors they have a lot to do, and

473

00:51:23.620 --> 00:51:26.449

Arjun Srinivasan, CDC (he/him): so that it's not it's not done right.

474

00:51:27.188 --> 00:51:45.669

Arjun Srinivasan, CDC (he/him): And you know I it does seem to be a missed opportunity to say like, well, you could at least ask if their cloud Csir is 1.2. Why don't you ask them? Hey? We smired Csir is 1.2. What are you doing about that right that should be the focus of your infection. Control at least one of your questions

475

00:51:45.670 --> 00:51:59.344

Arjun Srinivasan, CDC (he/him): at the infection control part of the survey, so happy to help with that. We we definitely we'd love to see John Commission. We've had some of these discussions, but I think it's it's not anything that they have moved forward.

476

00:51:59.670 --> 00:52:17.045

Peter Pronovost: You. You know, Arjen, on that, Kevin, and maybe this is something we even do, or even a commentary where I would love to see is get a list of publicly available rate based harms. And say, You know, how could you serve a credit? A hospital? Even you don't look at outliers in these rates. I mean, it's

477

00:52:17.520 --> 00:52:18.370

Peter Pronovost: mind blowing.

478

00:52:18.370 --> 00:52:39.839

Arjun Srinivasan, CDC (he/him): Good time to do it, because I mean, you know, we are collaborating. So we're building a vte measure. We're building a hypoglycemia measure. We're we're thinking we were working on a sepsis measure. So I mean, we are increasingly, no Cms really wants to use Nhs, and more and more especially for fully electronic measurement reporting. So

479

00:52:39.840 --> 00:52:53.113

Arjun Srinivasan, CDC (he/him): there's really really good collaboration in this space. And I think it's only to the good. If we did, I know this is not part of what we're discussing here, but it's only to the good. If if we can get more use of that data that people.

480

00:52:53.390 --> 00:52:54.000

Peter Pronovost: Right.

481

00:52:54.000 --> 00:52:54.719

Arjun Srinivasan, CDC (he/him): Blocked it.

482

00:52:55.410 --> 00:53:06.130

Peter Pronovost: More. It's just like irresponsible personally, that you could accredit a hospital and look at like water stains on their ceiling, but not review rates of harm for publicly available data.

483

00:53:07.160 --> 00:53:07.540

Missy Danforth (she/her): It is.

484

00:53:07.540 --> 00:53:12.529

arnold milstein: I think it's a I think it would be. It'd be an excellent viewpoint or perspective piece.

485

00:53:17.170 --> 00:53:27.569

Peter Pronovost: Alright. I I'm hate taking it, taking it happy to to start some, but, like, you know, just that, even if we just made it. I mean, you have a table of measures that should be reviewed with before a hospital is accredited.

486

00:53:29.550 --> 00:53:45.969

Missy Danforth (she/her): So I think everyone probably saw that Cms just announced. They are calling in the accreditation organization because they have concerns hospitals that have low quality and continue to get accredited. So I think the time is like literally now, and there's gonna be a very small window.

487

00:53:46.510 --> 00:53:49.650

Missy Danforth (she/her): So if we want to regroup offline about that I could.

488

00:53:49.650 --> 00:53:51.060

Peter Pronovost: Yeah. Why don't I do.

489

00:53:51.740 --> 00:53:59.770

Peter Pronovost: Matt? I wonder if you want to take just be point or missy, and get a table of measures that we would like we would put in this list. You can probably do it like in 20 min.

490

00:54:00.480 --> 00:54:01.200

Matt Austin: Yeah.

491

00:54:01.200 --> 00:54:04.289

Peter Pronovost: And I'm happy to start drafting like just a short piece.

492

00:54:04.900 --> 00:54:05.640

Matt Austin: Okay.

493

00:54:06.510 --> 00:54:07.269

Matt Austin: that will work.

494

00:54:07.270 --> 00:54:08.650

arnold milstein: But the contributing.

495

00:54:08.810 --> 00:54:14.240

Peter Pronovost: Perfect. Yeah, love, because I mean, it really is like, it's whatever it's policy failure.

496

00:54:14.960 --> 00:54:15.760

Matt Austin: Yep.

497

00:54:16.800 --> 00:54:23.950

Matt Austin: So, Sarah, we'll we'll put pull something together that could help inform the conversation about whether certain outcome measures need.

498

00:54:24.050 --> 00:54:33.149

Matt Austin: So you're right. I think we do. Wanna keep evolving the safety grade to reflect meaningful, important, timely measures of safety. So.

499

00:54:33.150 --> 00:54:33.590

Sara Singer: Yeah.

500

00:54:33.590 --> 00:54:36.029

Matt Austin: It's always worth so it's worth revisiting.

501

00:54:36.030 --> 00:54:46.959

Sara Singer: Certainly for finding more. And I like the idea that there that these allow for use of Hr data. It's pushing hospitals in that direction, too. So all good. Thank you.

502

00:54:46.960 --> 00:54:50.770

Matt Austin: Okay, yeah. And thank you, Kathy, for the comment in the chat about

503

00:54:51.040 --> 00:54:55.340

Matt Austin: patients sort of seeing these as being important harms as well.

504

00:54:55.370 --> 00:55:01.320

Matt Austin: And we have 1Â min left. So I'm gonna say, a very big thank you to all of you for your ongoing guidance.

505

00:55:01.661 --> 00:55:13.349

Matt Austin: We really treasure and appreciate all of you. We're so so, so, so so lucky to have you on us on this journey with us. So have a great weekend, and we'll be in touch with you all. Take care.

506

00:55:13.990 --> 00:55:15.010

Alexandra Campione: Thanks, emerald.

507

00:55:15.210 --> 00:55:16.310

Tim Vogus: Thanks, bye.

508

00:55:16.630 --> 00:55:17.269

Doris: But I.

Good Samaritan Medical Center Inc, at al. v. The
Leapfrog Group
4/12/2024

1 MATT AUSTIN: So, Arjun?

2 ARJUN SRINIVASAN: I have no financial
3 disclosures. I am a full-time employee of the
4 federal government, and our agent, my division,
5 runs the National Healthcare Safety Network.

6 MATT AUSTIN: Great. Thank you, Arjun.
7 Sara, would you like to go next, please?

8 SARA SINGER: Sure. I'm Sara Singer.
9 I'm a professor at Stanford in the medical school
10 and in the business school in organizational
11 behavior. With respect to the -- and I've been
12 on the Leapfrog committee for it feels like many
13 years.

14 With respect to disclosures, I guess
15 financial disclosures, I receive honoraria for
16 work that I do for both Intermountain Healthcare
17 and Harvard Medical School. And non-financially,
18 I serve on the board for the Harvard Medical
19 Faculty Physicians Group.

20 MATT AUSTIN: Great. Thank you, Sara.
21 Kathy, would you like to go next, please?

22 KATHY MCDONALD: Sure. Kathy McDonald.
23 Hi, everyone. I'm at Johns Hopkins, colleague of
24 Matt's, and in the School of Nursing and the
25 School of Medicine and also the Armstrong

Page 3

1 Institute for Safety and Equality. I don't have
2 anything that's -- nothing financial.

3 MATT AUSTIN: Perfect. Thank you,
4 Kathy. Peter, would you like to go next, please?

5 PETER PRONOVOST: Sure. Hi, I'm Peter
6 Pronovost. I am the University Hospitals' Chief
7 Clinical Transformation and Quality Officer and a
8 professor in ACE Schools of Medicine, Nursing,
9 and Management. I think the only disclosure
10 would be a PCORI Health Systems Implementation
11 Science grant that I'm the PI on.

12 MATT AUSTIN: Great. Thanks, Peter.
13 Tim, would you like to go next, please?

14 TIM VOGUS: Sure. Tim Vogus. I'm the
15 faculty of the Vanderbilt University Owen
16 Graduate School of Management. I'm not getting
17 any of that sweet money, so I have nothing to
18 disclose.

19 MATT AUSTIN: Well, I think you should
20 disclose, Tim, that you are a former Spartan and
21 sporting the --

22 TIM VOGUS: Yeah, I'm a sporting the
23 Spartan green, right, and I am the nicest dressed
24 person on the call or the opposite of that.

25 MATT AUSTIN: All right. Doris, would

Page 4

1 you like to go next, please?

2 DORIS PETER: Sure. Well, the only
3 reason -- I'm actually probably the worst dressed
4 because I'm off camera, so I'm wearing a fleece
5 jacket right now, so I'm not well-dressed either.

6 My name is Doris Peter, and I work
7 mostly as a subcontractor for CMS through Yale
8 CORE, who has -- was the developer of those two
9 eQMs that we're going to maybe talk about at the
10 end of this meeting, the patient safety eQMs.
11 Not really a disclosure, but just to let you know
12 that I'm somewhat involved in those, and I'm
13 happy to be here, but I have no other things to
14 disclose.

15 MATT AUSTIN: Great. Thank you, Doris.
16 Appreciate that. And Arnie, please.

17 ARNOLD MILSTEIN: Hi. I'm also off
18 camera because I'm, like several others, a
19 continuous walker. But let's see. So, relevant
20 to Leapfrog, I'm a trustee of Intermountain
21 Healthcare. I am on the board's quality
22 committee at Stanford Hospital.

23 What else? I am the medical director
24 of the Pacific Business Group on Health. And
25 then in terms of financial interests, though none

1 are involved with patient safety, I have a
2 financial interest in two startup companies, one
3 Prealize Health, the other Embold Health.

4 MATT AUSTIN: Great. Thank you so
5 much, Arnie. So, as I mentioned, we're doing
6 this in the spirit of transparency. If you have
7 any concerns during the meeting or after a
8 meeting that one of your fellow expert panelists
9 might be operating in a biased manner, we would
10 ask that you reach out to either Missy or myself,
11 and we'd be happy to have a conversation with you
12 about that.

13 So, thank you so much, everyone. We're
14 going to move on to the next agenda item, and I'm
15 actually going to share my screens with some
16 slides, but I'm actually going to turn it over to
17 Alex from the Leapfrog Group to talk a little bit
18 about grading the military treatment facilities.

19 ALEX CAMPIONE: Great. Hi, everyone.
20 My name is Alex. I'm a program analyst here at
21 Leapfrog. I work mainly with safety grade, so
22 scoring facilities as well as doing these
23 analyses and validation like we did for the MDS.

24 MATT AUSTIN: And here I go, just two
25 steps behind.

1 ALEX CAMPIONE: So, as everyone might
2 remember, we started the validation process of
3 their data back, I think it was about a year ago
4 now. They were interested in receiving safety
5 grades as sort of a way to summarize everything,
6 and we were able to score 21 out of 30 MDS
7 located in the U.S.

8 We had nine As, nine Bs, and three Cs,
9 and you can see this is actually a pretty well-
10 performing cohort of hospitals compared to the
11 national distribution. We worked with them, with
12 DHA directly to collect the PCI and HAC data
13 because their patient population is restricted to
14 active service members and their families.

15 So, as you can imagine, there's not
16 very much data on those 65 years and older. So,
17 there was -- is no CMS data for them, and we had
18 to obtain the data directly from them for
19 patients 18 years or older. Perhaps the biggest
20 accomplishment here was actually cleaning up
21 their HAI data.

22 So, previously, and to DHA's surprise,
23 they were not previously tracking MRSA and SSI
24 colon at a lot of facilities. So, they actually
25 -- there were not reporting plans in place for

1 surgical site infections after colon surgery or
2 MRSA. They were actually tracking it separate,
3 and it was not streamlined.

4 So, they had to go back and clean up
5 that data, and we were able to get to a point
6 where we felt confident in their data by this
7 January. So, that was very exciting. And on the
8 right, you can see how they performed on average
9 in all of the measures included in the safety
10 grade.

11 You can see that CPOE and Safe Practice
12 2, that's the safety -- culture of safety survey,
13 they were -- are still lacking in, and they're
14 well aware and working on that this year, as well
15 as the infection measures and PSI-4.

16 Where they performed really well is the
17 total nursing care hours per patient day and
18 their HCAHPS scores.

19 MATT AUSTIN: So, with that, we just
20 wanted to provide an update to you all on that
21 progress. We're happy to entertain any
22 questions, thoughts, reactions that the panel
23 might have.

24 PETER PRONOVOST: Yeah, just more of a
25 curiosity. Their HCAHPS scores are like material

1 better than others. I mean, I'm somewhat
2 surprised in their infection rates are materially
3 worse. Did they have any insights about why that
4 is?

5 ALEX CAMPIONE: So, we have not
6 actually talked to them about their HCAHPS scores
7 yet. I think the first, especially for SSI colon
8 and MRSA, it wasn't much of a surprise since it
9 wasn't being tracked previously, but now they're
10 going to be able to track it, so.

11 PETER PRONOVOST: Yeah, and maybe it's
12 just all driven by their nursing hours per
13 patient day.

14 MISSY DANFORTH: Yeah, so Peter, one
15 note I do want to make is that we did get their
16 HCAHPS data from CMS. So I'm not sure everyone's
17 aware, but they actually voluntarily report their
18 data into CMS, and so any adjustments done for
19 the other general acute care hospitals, like for
20 age, are also done to their scores as well. So,
21 these are not directly reported from DHA or the
22 MDS to Leapfrog. This is available on the CMS
23 Care Compare provider catalog.

24 MATT AUSTIN: Yeah, Patrick, when we
25 spoke to him --

Page 9

1 MISSY DANFORTH: -- data and we don't
2 have an explanation for the performance.

3 ARNOLD MILSTEIN: Missy, so am I right
4 that what that means is to the degree that
5 younger people, because they tend to recover more
6 fully, you know, might, you know, in retrospect,
7 you know, report a more favorable HCAHPS score?
8 That's already been adjusted for, that is the
9 younger age population of the --

10 MISSY DANFORTH: That's correct.

11 ARNOLD MILSTEIN: Okay, thank you.

12 MISSY DANFORTH: Yes, yes. That's
13 correct.

14 ARNOLD MILSTEIN: Thank you.

15 ARJUN SRINIVASAN: Yeah. It's a really
16 interesting point you're raising, Peter, and I
17 don't know, I don't -- we don't know -- I don't
18 know enough about this population. And I don't
19 know that we've looked at this specifically, and
20 it did not seem so. But you know, I assume that
21 the overwhelming majority of these patients are
22 post-trauma patients, which may have some very
23 different risk factors for some of these SSIs or
24 some of these HAIs compared to what we would see
25 in a typical hospital population. I don't know.

1 It's hard to know how that might be impacting
2 some of this.

3 MATT AUSTIN: Yeah, and talking with
4 Patrick in the last hour, he had a couple of --
5 yeah, he had sort of a similar question, Arjun,
6 about, you know, service members that were
7 injured, right? Are they being treated in these
8 military facilities here in the U.S.? Are they
9 being treated abroad? That could obviously
10 impact the HAI rates.

11 He also wondered about, for the HCAHPS
12 scores, if there was a little bit of an effect of
13 that your customer is part of an organization
14 that is also providing you the care, right, and
15 do you get sort of a, just a higher level of sort
16 of buy-in in that scenario? So, there's a little
17 bit of a model issue there.

18 ARJUN SRINIVASAN: Yeah, and some of
19 this is interesting. It's also, it's based on
20 expectations, right? The average enlisted person
21 might have a very different expectation of what
22 communication looks like based on what they're --
23 how they're used to being communicated with. So
24 I don't know if that influences this at all.

25 ALEX CAMPIONE: I'm sure, it does.

1 ARNOLD MILSTEIN: I think -- yeah, I
2 think it does. I know that, you know, in the
3 commercial sector, one of the interesting
4 findings from efforts to connect, you know,
5 working class people, such as people in the
6 Walmart or Lowe's employee workforce, is that
7 when they are hooked up with the quality of
8 doctors that, you know, that provide care in a
9 so-called center of excellence versus, you know,
10 routine community care, they are deeply
11 impressed.

12 They've never, you know, been treated
13 that well before. And typically in local
14 communities, particularly in practices that
15 specialize in lower socioeconomic status
16 patients, you know, they -- the level of service
17 that they experience, you know, tends to be not
18 great. So, they notice the difference when, you
19 know, when people of low -- I'll call it, you
20 know, low status enlisted people, you know, would
21 dramatic -- would notice a dramatic difference in
22 even if the nursing performance were average.

23 MATT AUSTIN: Mm hmm. So, I think we
24 have maybe more questions than answers for you
25 all, but did want to share an update on the

Page 12

1 progress that's been made. And I think hats off
2 to Alex for really digging in with them to get
3 the data that was needed to do this and, you
4 know, hats off to the DHA as well for their
5 desire and commitment to wanting to do this too,
6 right. They've been active in wanting to have
7 this happen, so --

8 SARA SINGER: Yeah, I would actually
9 comment. I mean, I think that's the best part
10 about what I'm seeing here is that it's actually,
11 we've actually put the data forward and now we
12 have some information. It will -- what will be
13 interesting to see is the next time we're able to
14 do this measurement, if relative, if some of
15 these relative scores begin to change, especially
16 around the infection rates, because this is the
17 first time they're seeing it, if they are able to
18 use it and parlay that into some action that
19 moves the needle on some of these things, that
20 would be really the win.

21 MATT AUSTIN: (Indiscernible) --

22 SARA SINGER: Quick question. You guys
23 already have VA hospitals as well as part of
24 Leapfrog?

25 MATT AUSTIN: Was that the VA

1 hospitals? Yeah.

2 MISSY DANFORTH: Yeah, so we do not
3 have any of the Veterans Administration
4 hospitals, but we are going to be using this
5 announcement as an entree to restart those
6 conversations. So that's a great question.

7 MATT AUSTIN: Yeah. I think that's
8 sort of our biggest gap that remains, right, is
9 the VA hospitals. We also aren't able to grade
10 hospitals in any of the U.S. territories, you
11 know, Puerto Rico, et cetera, because the
12 reporting -- the public reporting for those is
13 different, but those sort of are the remaining
14 gaps in a systematic way.

15 All right. So, we'll keep you engaged
16 and posted on that. We just wanted to provide
17 you with that update.

18 What we want to spend a majority of the
19 time talking about is actually some proposed
20 changes to the model that we'd like to use for
21 imputing scores for hospitals.

22 So, just to remind everyone, for --
23 since really the kickoff of the Leapfrog hospital
24 survey, Leapfrog was using the American Hospital
25 Association survey as a primary/secondary data

1 source. I shouldn't say a primary, secondary --
2 the key secondary data source. And in 2021, the
3 American Hospital Association made the decision
4 not to renew license for Leapfrog.

5 Leapfrog is also seeking ways to grade
6 additional hospitals. And so working with some
7 of you, I think in particular, Patrick, Sara,
8 colleagues at Mathematica, we looked at different
9 imputation approaches and came up with a model
10 that seemed feasible, relevant, and appropriate.

11 But we've run into a couple of
12 challenges that we think we need to maybe make
13 some adjustments for. So, one is that the
14 imputed scores have crept up over time, which has
15 made imputation a more favorable choice for a
16 fair number of hospitals and has de-incentivized
17 them actually reporting to the Leapfrog hospital
18 survey.

19 So, in some ways we've de-incentivized
20 transparency because they've decided that the
21 imputed score is a more favorable path for them.
22 What we're also running into is we, especially
23 this year, we are redefining and expanding
24 Leapfrog's BCMA standard.

25 So, in some ways -- so let me take half

1 a step back. Our step one of the imputation
2 model is to look to a hospital's historical data.
3 So, if a hospital didn't respond to the Leapfrog
4 hospital survey this year, we would look back in
5 previous safety grades to see what data were
6 available from those.

7 And the problem we're going to run into
8 this year is for the barcode medication
9 administration standard, Leapfrog is going to be
10 expanding the scope of that. So, in some ways
11 the standard has changed. We also have some
12 concerns about whether there's some drift-back or
13 fallback in hospitals meeting the hand hygiene
14 standard. And so that has sort of put us at a
15 point where we're thinking maybe it's time to
16 refine the imputation model and maybe change up
17 how we're doing things slightly.

18 The imputation model really applies to
19 four measures that are part of the safety grade.
20 So, those highlighted in green are the four
21 measures. It's the use of computerized physician
22 order entry, barcode medication administration,
23 the use of intensivists in the ICU and hand
24 hygiene. We included the standard weights just
25 to give you a sense of how much weight are put on

1 those four measures.

2 So, as we've sort of talked about at
3 this point, step one of the imputation model is
4 that the hospitals assigned their most recent
5 score from the past four rounds of the safety
6 grade. So, for example, in the spring 2024
7 round, we looked back and saw if a hospital had a
8 score for that measure in fall 2023, spring 2023,
9 fall '22, or spring '22. And if they did, we
10 used that value. And that actually covers the
11 three most recent Leapfrog hospital surveys.

12 If we didn't have a recent score from
13 those past four rounds, then we moved on to step
14 two, which is where we put hospitals into
15 cohorts, right. And we defined cohorts based on
16 number of beds, teaching status, urban/rural
17 status, safety net status.

18 And we really looked at two
19 calculations and gave them the lower of two
20 scores. One was the mean of the cohorts' current
21 and recent scores, or the mean of the cohort
22 scores from each hospital's first-time reporting
23 on the current standard. And that's really based
24 on the idea that hospitals, when they first start
25 reporting to the survey, tend to have lower

1 performance than hospitals that have been
2 reporting for a period of time.

3 So, that's the current model that we're
4 using. What I'm going to -- so I quickly touched
5 on this. We defined cohorts based on four
6 factors: urban/rural status, safety net status,
7 number of beds, and teaching status. Where we do
8 have a difference is for ICU physician staffing.
9 We actually use the CMS cost report as the
10 secondary data source, because that actually
11 tells us whether the hospital operates any
12 medical, surgical, or pediatric ICU beds. And if
13 so, then we equate that to them saying they
14 operate ICU beds, but have given us no
15 information about their staffing structure.

16 So let me jump ahead, because I think -
17 - let me go to two slides, because I think these
18 two are important.

19 So, jumping ahead to sort of current
20 trends in hospitals reporting to the Leapfrog
21 hospital survey. So, of the hospitals that
22 received a hospital safety grade, we've seen
23 hospital performance -- or participation, excuse
24 me, in the Leapfrog hospital survey increase from
25 31 percent to 61 percent. And so the bars in

1 green show the upward trend in hospitals
2 participating in the Leapfrog hospital survey.
3 We did see a little bit of a drop-off in 2023.

4 The gray bars represent the hospitals
5 that would have scores imputed. And so, one
6 would expect those to sort of move in inverse
7 directions.

8 So, what we are going to propose to you
9 all for a refinement to the imputation model is
10 -- one is to retire step one, which is where we
11 used the recent historical data from hospitals to
12 calculate a score. So that would be -- we would
13 do away with step one. And within step two, we
14 would specifically focus on hospitals and how
15 they did on their first year of reporting on the
16 current standard.

17 So, we would still group the hospitals
18 into the cohorts. I think we have 12 cohorts of
19 hospitals. And we would assign them the score
20 based on the first year of reporting. And we
21 would continue to use the CMS cost report for the
22 ICU physician setting. So, the real change here
23 is the elimination or the retirement of step one.

24 Let me pause there to see if there's
25 any questions first, and then let's have a

1 conversation about feedback, guidance,
2 suggestions.

3 PETER PRONOVOST: Matt, just one
4 comment. It's amazing how quickly markets learn.
5 I was on a call with a bunch of CMOs and I doubt
6 they saw this data, but that was the kind of the
7 message. Oh, you'd do better if you don't fill
8 out the survey. And it may have been anecdotal
9 for them, but it was clearly a discussion amongst
10 the CMO group.

11 MATT AUSTIN: So, you were saying in
12 terms of increased participation in the survey,
13 Peter?

14 PETER PRONOVOST: No, I think that --
15 in other words, they -- the point that you said
16 about the trends through imputation, like the
17 market, they were already saying, don't complete
18 the survey, you can do better.

19 MATT AUSTIN: Oh, okay. Yeah. That
20 you would get -- you would do better by using the
21 imputed scores.

22 PETER PRONOVOST: Correct.

23 MATT AUSTIN: Right --

24 PETER PRONOVOST: And they didn't have
25 any data. It was just like more of their hunch

1 or their gut, but it was like a topic of
2 discussion.

3 SARA SINGER: I know you said that if
4 you rely on the first round of reporting that the
5 scores are typically lower. But are they
6 sufficiently lower that we think it would create
7 an incentive for them not to go to the hassle of
8 doing the survey? And what about the CMS cost
9 report for the ICU staffing? Is it also
10 typically lower?

11 MATT AUSTIN: So, let me --

12 MISSY DANFORTH: (Indiscernible) --

13 MATT AUSTIN: -- go ahead, Missy.

14 MISSY DANFORTH: Yes, they are
15 significantly lower. And we have seen some of
16 that motivate. Because for the most part, I
17 think the majority of hospitals do want their
18 current performance reflected unless it's bad, in
19 which case the imputed scores will be better.
20 But I do think they are sufficiently low enough,
21 hopefully, to be motivating.

22 MATT AUSTIN: And what I've brought up
23 on the screen and which I skipped over in the
24 presentation because I wasn't sure, sort of talk
25 about it is -- but to Sara's question, I think --

1 does this answer your question, Sara, in terms of
2 these are the average imputed scores for the four
3 measures by the step one and step two?

4 SARA SINGER: The two green bars at the
5 bottom?

6 MATT AUSTIN: Correct. And then what
7 we put up at the top in the white is for
8 hospitals that complete the survey. These are
9 their performance categories and the points that
10 they get assigned based on their performance
11 category.

12 SARA SINGER: Oh, yeah. Okay.

13 MATT AUSTIN: So, it's to give some
14 context between those that report versus those
15 that are getting scores imputed.

16 SARA SINGER: Okay. Yeah. I mean, it
17 looks like it would be motivating.

18 MATT AUSTIN: So, what other reactions
19 do folks have to this idea of retiring step one
20 and simply using -- so, basically retiring, we're
21 going to use your hospital's historical data and
22 we would basically move solely to a model of
23 putting hospitals into cohorts and using the
24 first-time reporting scores from that cohort?

25 Let me show one more slide just to

1 maybe spur some conversation, which is here are
2 the 12 cohorts, once again, by the sort of four
3 factors and then what the means are for each of
4 those 12 cohorts.

5 SARA SINGER: Yeah. I mean, I guess
6 you can assume that the downside is that if there
7 is a high performing organization that doesn't
8 happen to want to continue doing the Leapfrog
9 survey, they will be penalized because they'll be
10 lumped together with a cohort that may not be
11 performing as well as they are. But I think
12 that's the -- that's sort of what we're trying to
13 accomplish.

14 MISSY DANFORTH: Yeah. Sara, if I can
15 just make one other note. This is
16 (indiscernible). We do see slippage in
17 performance on these measures from year to year.
18 I mean, particularly with something like hand
19 hygiene, I think we found if we talk to them in
20 January or February or March versus busier times
21 of the year that they may not be doing as well.

22 Certainly as Matt described with BCMA,
23 the standard is changing so much we just can't
24 pull forward those old BCMA scores. And with
25 things like nurse staffing in the workforce --

1 I'm sorry, not nurse staffing, CPOE, the CPOE
2 developers -- I know (indiscernible) is not on
3 the call today. But they make content changes to
4 that test every year. So I also think that it
5 protects us a little bit. If a hospital is
6 starting to have a downslide and we're awarding
7 them those hundred points from previous surveys,
8 I think at a point it could start to erode trust
9 of (indiscernible).

10 SARA SINGER: I'm wondering -- so we've
11 taken -- like one option would have been to just
12 eliminate the most recent score and to use step
13 two as it was. If you did that, I can't remember
14 if the two bars in green -- do you have a bar
15 that also shows if you allow them -- if you
16 assign the mean of the cohort, not just the most
17 recent -- the first round of reporting for that
18 cohort? Is it also penalizing, but maybe not so
19 drastically so?

20 MATT AUSTIN: So what I didn't do a
21 great job of explaining, Sara, is the current
22 methodology is to take the lower of two scores
23 for step two.

24 SARA SINGER: I see.

25 MATT AUSTIN: Which is the recent

1 scores and the first-time reporting.

2 SARA SINGER: I see. Okay.

3 MATT AUSTIN: So what's in the green
4 bar would be reflective of that lower, which --
5 if that -- most likely would be the --

6 SARA SINGER: Yeah. And so the step
7 two is -- I mean, the other advantage is it's
8 sort of already socialized with the group. They
9 -- you know, there's some acknowledgement of its
10 validity. So what we're doing now is taking away
11 the one that hospitals seem to be gaming.

12 MATT AUSTIN: That would be one, yes,
13 interpretation of that. Arjun, your hand is up.
14 Do you want to...

15 ARJUN SRINIVASAN: Yes. I'm wondering
16 if you all have any experience with hospitals
17 that have gone back and forth, like, completed
18 the survey at some point, not completed it at
19 some point. It may not be very many, but I'm
20 wondering if you have any (indiscernible) data
21 on, you know, where those hospitals -- where they
22 tend to fall.

23 Because one of the questions here is if
24 there is -- not going to say a punitive intent,
25 but if there is a kind of motivating intent here

1 to say, look, we think you need to fill out the
2 survey, because without the survey, we really
3 don't have very accurate data. I mean, the bias
4 that I might look at this and say, well, if I'm
5 in the bottom half, I'd rather not fill out the
6 survey. Because that will lift me up to the
7 mean. So would be better for me to just not do
8 it.

9 So the question then becomes just like,
10 do you say, well, if we don't have your data, we
11 have to assign you even lower because we're
12 trying to push people to fill out the -- and
13 again, I don't know, this is maybe a little
14 controversial maybe. But do you say, look, if
15 you don't fill out the survey, I'm sorry, but we
16 have to assign you to the bottom quartile because
17 we're now making -- maybe we make the assumption
18 that the reason you're not filling out the survey
19 is because you are in the bottom part and you
20 want that boost in score to get you to the mean.
21 I don't know.

22 MISSY DANFORTH: Arjun, that's a really
23 great question. I think -- yeah, I think to date
24 we've lost focus on the penalty portion of it and
25 more focused on really not wanting to potentially

1 assure patients they're going to a safe place
2 that may have had some slippage.

3 And if you've been following the news
4 of Steward Health System, that would be an
5 example of an area where they have historically
6 done the survey, didn't do the survey in 2023 for
7 obvious reasons, we know now, had those scores
8 imputed due to this imputation methodology. And
9 obviously, the backlash in those communities from
10 those patients is, well, how can this be. Right?
11 So I think that's been the focus less so than
12 penalty or, frankly, even motivating people to do
13 the survey. I think it's that at a minimum, we
14 don't want to report them with a high score if we
15 don't have any information, and if we have
16 empirical information that there is slippage year
17 over year, which we do see.

18 PETER PRONOVOST: Missy though, to
19 Arjun's point, I wonder in our model, do we
20 include that if they're in the lowest quartile
21 that they stay in that. You know what I mean?
22 At least to reduce the gaming. So we may not put
23 everybody in that lowest quartile, but if your
24 previous survey you were low, you don't get an
25 elevation, you know, through this imputation.

1 MATT AUSTIN: Other suggestions,
2 recommendations?

3 KATHY MCDONALD: I'm looking, like, at
4 the safety net results. I just -- have we
5 thought through any of the implications for them?
6 I always worry most about, you know, those
7 hospitals and making sure that they don't end up
8 in -- with something we haven't thought of, an
9 unintended consequence there. They're already
10 carrying so much burden. So I haven't thought
11 through this enough to be able to --

12 MATT AUSTIN -- (Indiscernible) --

13 KATHY MCDONALD: -- (indiscernible),
14 but I wanted to put it out there.

15 MATT AUSTIN: Yeah. I think where I
16 struggle is what is a true -- well, where is
17 there a true difference in performance, right,
18 and where is there some sort of bias in the
19 measurement against them. Right? And --

20 KATHY MCDONALD: Right.

21 MATT AUSTIN: And I think we want to
22 minimize the second and --

23 KATHY MCDONALD: Yes.

24 MATT AUSTIN: Right? If there's two
25 differences, there's two differences. And there

1 are structural issues that we need to address
2 there, Kathy, for sure.

3 KATHY MCDONALD: Yeah, right.

4 MATT AUSTIN: Right? But, you know, I
5 think some of the recent research is showing that
6 patients of marginalized communities actually do
7 tend to receive care at hospitals that have more
8 patient harms, right? And that's just the
9 unfortunate reality of our current world and
10 status.

11 PETER PRONOVOST: You know, the -- a
12 comment. And I'm happy to -- we won't solve it
13 now. But I think how you message this change is
14 going to be really critical because I think it
15 could help enhance focus on safety or kind of
16 piss people off and like saying you're not
17 understanding, we just went through COVID, we
18 don't have staffing. So, you know, Missy, your
19 point about -- I mean, you know, the persistent
20 25 percent of hospitalized patients are still
21 harmed, the trends are going the wrong way, and
22 consumers have a right to know this without this
23 risk of misinforming them and being very, you
24 know, transparent about that risk.

25 SARA SINGER: I think that's an

1 incredibly important point, Peter, and well-
2 taken.

3 PETER PRONOVOST: And I would probably,
4 Missy -- because this is going to be -- I mean,
5 even though a discussion, I think it could be
6 misconstrued, like maybe even, you know, get you
7 or Matt or whoever, a couple people to share this
8 reasoning with the AHA, with Premier, with
9 Vizient. You know, with a variety of groups that
10 might be using this so that you manage that
11 narrative.

12 MISSY DANFORTH: Yeah. That's a great
13 idea. And can I ask just, Peter, your opinion
14 and anyone on the panel, we have a number of
15 large health systems that have brought this issue
16 to us as well, which is to say that, you know, we
17 have a hundred participation in the
18 (indiscernible) when we're doing well and when
19 we're doing not so well because we want to build
20 that trust in our communities. We really don't
21 think it's fair that you're allowing these
22 hospitals not reporting to get the highest scores
23 because we can't really trust that it's currently
24 true.

25 To what extent do you think health

1 systems themselves, who have wanted to be
2 partners (indiscernible) if we make this change
3 could help deliver the message, or do you think
4 that would backfire?

5 PETER PRONOVOST: You know, I think
6 they absolutely could. And, Missy, just like in,
7 you know, my hospital colleague friends, there's
8 clearly a culture who is committed to reporting
9 and transparency and want to do the right thing.
10 Some of them though it may be like you can say
11 it's a legitimate or not -- a resource thing. Do
12 they have time to complete the survey? And
13 without a doubt, there are some of those.
14 Because hospitals' quality budgets got crushed
15 with the financial losses with COVID. There's
16 others then who are not so transparent.

17 If you highlight those, Missy, though,
18 I would just make sure that that narrative that
19 the hospital is telling is consistent with other
20 signals, meaning they make their STS data
21 transparent. You know, there's a number of other
22 data points they can choose to be transparent or
23 not. And -- because otherwise someone could come
24 back and say, yeah, but then why aren't they
25 making these other data sets that they could make

1 transparent and they have elected not to.

2 MISSY DANFORTH: That's incredibly
3 helpful. Thank you.

4 MATT AUSTIN: Any other feedback or
5 suggestions on this? If not, I think the next
6 step is that Leapfrog will consider the feedback
7 we've heard from all of you as well as from
8 Patrick earlier today. And if Leapfrog decides
9 it will actually put out for public comment on
10 this proposed change and hospitals and other
11 stakeholders would have the opportunity to
12 comment on this proposal.

13 And, Peter, thank you for that
14 suggestion on how the messaging of that could be
15 incredibly important.

16 PETER PRONOVOST: And I'm happy to
17 review that with you, Matt, or just go through
18 it. Because it is going to be really important
19 of how people react to this.

20 MATT AUSTIN: Yeah. Okay, makes sense.
21 Okay. So our final agenda item is to talk about
22 a couple of measures that we would like to
23 consider adding to the hospital safety grade. So
24 these are two new ECQMs, which are Electronic
25 Clinical Quality Measures, which are measures

1 that are actually derived directly from the
2 (indiscernible) data as I understand them.
3 There's one focused on severe hyperglycemia, and
4 another measure focused on severe hypoglycemia.
5 Both of these measures are currently being
6 collected by CMS, and the public reporting of
7 them will start next year in 2025.

8 I've included on the slides the
9 numerator and denominator definitions. So for
10 the first one, the severe hyperglycemia is
11 focusing on -- sorry, that was a typo. That
12 should say hyperglycemia as an outcome in the
13 hospital inpatient setting. And this looks at
14 basically the percentage of inpatient days for
15 patients 18 years and older for which they had a
16 hyperglycemic event. And that event is defined
17 as a day with one blood glucose value greater
18 than 3,000 milligrams per deciliter or a day
19 where a test was not done but there was a -- it
20 was preceded by two consecutive days where at
21 least one of the glucose values on one of those
22 two days was above or at 200. So it would be
23 looking at the percentage of days in which the
24 patient had a hyperglycemic event. So that's one
25 measure for consideration.

1 The other one is severe hypoglycemia.
2 And this focuses really on patients that received
3 a hypoglycemic mediation and whether they had a
4 hypoglycemic event during -- there's a definition
5 within the numerator of what is a hypoglycemic
6 event. So that's a blood glucose less than 40
7 milligrams per deciliter, that they gave them a
8 hypoglycemic medication within 24 hours after the
9 start of the event, and there was no repeat test
10 for glucose with a result greater than 80 within
11 five minutes so that there was sort of a
12 sustained level of hypoglycemia.

13 So I will pause there to see -- hear
14 reactions, thoughts.

15 Doris, if you have any additional
16 information that you would like to share or think
17 is notable or relevant, we would love to hear
18 that as well.

19 DORIS PETER: Sure. I think it's --
20 this goes through a period of voluntary
21 reporting, so I'm not sure how much data will be
22 available over what time period. I don't
23 remember all the details of the reporting
24 requirements.

25 MATT AUSTIN: So your understanding is

1 the current situation is these would be voluntary
2 measures for hospitals?

3 DORIS PETER: Yeah. I think that they
4 can -- if I remember correctly -- and I could be
5 totally wrong about this -- that they could
6 select from a list of ECQMs.

7 MATT AUSTIN: Okay.

8 DORIS PETER: So I think it depends on
9 what program they are in. Because we don't -- we
10 started developing these and then they got taken
11 over by a different developer. So I have not
12 followed their trajectory. But if I remember the
13 program correctly, it would be like you could
14 select from a list. So I don't know how
15 comprehensive reporting will be for your guys'
16 point of view in terms of you're going to end up
17 with holes in the data and all that and
18 imputation back on the table again or some other
19 way of dealing with missing data.

20 SARA SINGER: Okay. Thank you, Doris.
21 I will clarify that. Because our understanding
22 in my previous conversations with Michelle
23 Scriber from CMS is that these new patient safety
24 focus ECQMs, there's like a kidney damage one
25 coming (indiscernible) --

1 DORIS PETER: Yeah.

2 SARA SINGER: -- for ulcers will be
3 required, not part of (indiscernible). But we'll
4 clarify that. Thank you.

5 DORIS PETER: Yes. Okay. Yeah, I
6 could be wrong. It could be possible they put
7 them in like the HACK program or something and
8 then they'll be required. So I can dig for you
9 if you want to.

10 SARA SINGER: That would be great.
11 Thank you.

12 ARNOLD MILSTEIN: Yeah, this is Arnie.
13 I would just like to say that, you know, one of
14 the beauties of this direction by, you know, some
15 courageous officials within CMS is it potentially
16 as it expands, you know, begins to moderate the
17 problem of hospitals not reporting if CMS is
18 requiring these direct from electronic health
19 record important measures and they are reported
20 and the -- you know, they are not optional in
21 reporting to CMS. And CMS in turn shares them
22 for public use such as by Leapfrog.

23 MATT AUSTIN: And, Arnie, do you feel
24 like the two have face validity as patient safety
25 harms that should be included?

1 ARNOLD MILSTEIN: Yes. Yeah. Like all
2 cliff edge, you know, definitions, you know, over
3 time these measures will improve. But achieving
4 consensus is difficult. And so I think this is a
5 very reasonable start.

6 PETER PRONOVOST: And, Matt, I would
7 just add from -- I think they both have face
8 validity. The harm from hypoglycemia is probably
9 a couple log orders higher than hyperglycemia.
10 So if I had to prioritize -- just to -- not to
11 frighten everybody. But there's a couple of
12 health systems who agree to look at how often
13 hypoglycemia occurs. These are around 800-bed
14 hospitals. And I think they used 45 as a cutoff.
15 So, but close enough. Fifty events per week on
16 average. Week. I mean, it is mind boggling.
17 Just again because I think it's important for the
18 context that you know. Really the only way
19 health systems manage this, because it's quite
20 technical, is if they have diabetic educators who
21 guide the physician on how to dose these drugs
22 and/or have staff. Like when people are NPO,
23 that they adjust their insulin levels. Which,
24 you know, haven't done much, but hospitals cut
25 those staff a lot with COVID.

1 And so this problem has gotten
2 significantly worse. Or isn't a diabetic NP who
3 would work with physicians to score and it's --
4 my mind was blown away. I mean, I could tell you
5 I don't have any practical way that education is
6 going to work for this. So we are deploying -- I
7 have no financial relations to them, but a
8 company called Glytec that has an AI model that
9 automates the insulin dosing and has built-in
10 checks. Like if you're NPO, it automatically
11 adjusts your solution.

12 But my point in that is if we do this
13 measure, it would be great to find out what
14 health systems are doing to perform well on it.
15 Because it's -- putting more staff in it is going
16 to be a challenge for hospitals. But there are -
17 - there's a ton of technology that could help
18 with this.

19 MATT AUSTIN: That's really helpful
20 context, Peter. Thank you. Especially the
21 guidance around the hypoglycemia being
22 potentially a greater harm to patients than the
23 hyperglycemia.

24 PETER PRONOVOST: And just for the
25 economic piece, in our health system one, of the

Page 38

1 -- the hyper didn't really seem to drive length
2 of stay or maybe had like a 0.3. These
3 hypoglycemic events on average added three days
4 to our hospital stay. Some went to the ICU. But
5 it was a -- about a \$17 million excess days cost
6 to our health system.

7 ARNOLD MILSTEIN: I very much agree
8 with Peter's comment that one would -- if
9 optimally managed, would have a lot more clinical
10 benefit than the other. But that being said, I
11 think CMS was courageous to move forward with
12 these, too. And I think in some ways, you know,
13 weak management of hyperglycemia, it may be an
14 indication of -- you know, it is likely an --

15 PETER PRONOVOST: (Indiscernible).

16 ARNOLD MILSTEIN: Yeah. Exactly. So I
17 think I'm quite supportive of us adding both
18 measures.

19 PETER PRONOVOST: Yeah, I am too. I
20 was just giving that for the context. Because I
21 was pretty blown away about how common it was.

22 SARA SINGER: Well, is the management
23 of hyperglycemia very different?

24 PETER PRONOVOST: No. I mean, you
25 still need to know how to do it, but I think it's

1 probably less complicated. I would say most of
2 our hyperglycemia are people who get steroids.
3 And it bumps it up. Or really common is they are
4 in the ICU on an insulin drip and then they leave
5 the ICU. And that transition isn't managed well
6 and they rebound really high. Those are very
7 common scenarios.

8 MATT AUSTIN: Okay. So what I'm
9 hearing from the group is support for including
10 these measures. It does sound like maybe we need
11 to learn a bit more about the -- whether these
12 measures will be reported out in large numbers by
13 hospitals or if there's going to be sort of a
14 smaller number of hospitals and so maybe that
15 becomes the reason for a delay. But we can
16 clarify with CMS with what the current plans are
17 there. And if the plan is to have sort of robust
18 reporting, I think the plan would be to move
19 forward with adding these two measures. We would
20 add these to the outcome domain is what the
21 proposal would be.

22 SARA SINGER: Are there any as a result
23 that we would roll off?

24 MATT AUSTIN: Great question. I think
25 we could come back to you all with a proposal if

Page 40

1 we think that would be -- we could come back with
2 an analysis of where things are at. We had some
3 internal conversation about this just the other
4 day, meaning Missy, Alex, Preeti, myself. You
5 know, we talked about, you know, air embolism,
6 right? That's to most hospitals the value is
7 zero. The challenge is when it's not zero, it
8 tends to be a fairly significant event for that
9 patient.

10 You know, unintended retained foreign
11 objects, you know, still remain non-zero. And
12 there's some concern that we're not even
13 capturing all that are actually happening.
14 Right? So I don't think we are at a point where
15 we want to retire any of the HAIs, but we could
16 definitely engage further in that conversation,
17 Sara.

18 MISSY DANFORTH: Yeah. And, Matt, I'll
19 just add we have 12 process and structural
20 measures and only ten outcome measure. So adding
21 two wouldn't necessarily tip the scales too much.
22 We would have to look at what the point
23 distribution is for the other measures and if we
24 like that, but that's also something to consider.

25 PETER PRONOVOST: Hey, Matt, just on

Page 41

1 that note, because these are really rare events.
2 And -- hang on a second.

3 MATT AUSTIN: Sure. So other thoughts,
4 reactions to that while we wait for Peter to come
5 back?

6 But Sara, we can put something together
7 for you and others that sort of gives us some
8 context around that.

9 SARA SINGER: I wasn't necessarily
10 suggesting that we do, just that, you know, we've
11 talked about continuing to look at it. And so it
12 occurred to me that this might mark a time when
13 we should look again at maybe not retiring, but
14 distributing -- looking how we distribute weight.

15 MATT AUSTIN: Yeah. I mean, the
16 implications of adding two measures is that the
17 relative weights for the other ten measures will
18 go down.

19 SARA SINGER: Goes down. Yeah.

20 MATT AUSTIN: Yeah.

21 PETER PRONOVOST: Matt, what I was
22 going to say is a potential -- or explore
23 collaborating with CMS. And, you know, as part
24 of that PCAST report for safety, one of the
25 strong things we were working with Michelle and

Page 42

1 CMS is they have a more robust -- through their
2 conditions of participation when they visit
3 hospitals that they use data to guide where they
4 look. Right now, they -- as you know, they don't
5 do that. They just walk around and look at a few
6 charts. And so the thought would be to encourage
7 as part of that review any of these low-risk but
8 serious events. They haven't implemented it, but
9 they felt they didn't need any extension of the
10 COPs, but that within that what we put forward to
11 them is that there would be a meeting with the
12 CEO, the board chair, and the -- or the DNV or
13 joint commission who would look at rates of harm
14 and require an action plan for outliers. Because
15 as you know, right now you could have like ten
16 times the rate of CLABSI and your joint
17 commission survey wouldn't even look at it.

18 ARJUN SRINIVASAN: Yeah. And, Peter,
19 it's really -- I think it really is joint
20 commission and DNV who really -- because we've
21 had these discussions with joint commission to
22 try to get them to do that. Because, I mean,
23 it's publicly available data. Right? It's like
24 going to a website just to take a look. And
25 they've not been -- I think there's been some

1 degree of like, well, you know, there's a log of
2 surveyors, they have a lot to do. And so it's
3 not done right. And, you know, it does seem to
4 be a missed opportunity to say like, well, you
5 could at least ask. If their CLABSI SIR is 1.2,
6 why don't you ask them, hey, we see your CLABSI
7 SIR is 1.2. What are you doing about that,
8 right? That should be the focus of your
9 infection control or at least one of your
10 questions at the infection control part of the
11 survey.

12 So, happy to help with that. We
13 definitely -- we would love to see joint
14 commission. We've had some of these discussions,
15 but I don't think -- it's not anything that they
16 have moved forward on.

17 PETER PRONOVOST: You know, Arjun, on
18 that coming -- and maybe this is something we
19 could do or even a commentary where I would love
20 to see us get a list of publicly-available rate-
21 based harms and say, you know, how could you
22 accredit a hospital when you don't look at
23 outliers in these rates. I mean, it's mind-
24 blowing.

25 ARJUN SRINIVASAN: It's a good time to

1 do it. Because, I mean, we are collaborating
2 (indiscernible). So we're building a VTE
3 measure, we're building a hypoglycemia measure.
4 We're thinking we're working on a sepsis measure.
5 So, I mean, we are increasingly -- you know, CMS
6 really wants to use NHSN more and more,
7 especially for fully-electronic measurement
8 reporting. So there's some really, really good
9 collaboration in this space. And I think it's
10 only to the good if we -- and I know this is not
11 part of what we're discussing here, but it's only
12 to the good if we can get more use of that data
13 that people are collecting.

14 PETER PRONOVOST: Correct. More it's
15 just like irresponsible personally that you could
16 accredit a hospital and look at like water stains
17 on their ceiling but not review rates of harm for
18 publicly-available data.

19 SARA SINGER: (Indiscernible) --

20 ARNOLD MILSTEIN: I think it would be
21 an excellent viewpoint or perspective piece.

22 PETER PRONOVOST: I may take -- happy
23 to start something. But, you know, even if we
24 just made -- you have a table of measures that
25 should be reviewed before a hospital is

1 accredited.

2 SARA SINGER: So I think everyone
3 probably saw that CMS just announced they are
4 calling in the accreditation organizations
5 because they have concerns about hospitals that
6 have low quality and continue to get accredited.
7 So I think the time is literally now. And
8 there's going to be a very small window. So if
9 we want to regroup offline about that, I can talk
10 to (indiscernible).

11 PETER PRONOVOST: (Indiscernible).
12 Matt, I wonder if you want to take this point, or
13 Missy, and get a table of measures that, like, we
14 would put in this list. You can probably do it
15 like in 20 minutes.

16 MATT AUSTIN: Yeah.

17 PETER PRONOVOST: And I'm happy to
18 start drafting just a short piece.

19 MATT AUSTIN: Okay. That would work.

20 ARNOLD MILSTEIN: I would be glad to
21 contribute.

22 PETER PRONOVOST: Perfect. Yeah.
23 Because it really is -- whatever, it's a policy
24 failure.

25 MATT AUSTIN: Yeah. So, Sara, we'll

1 pull something together that could help inform
2 the conversation about whether certain outcome
3 measures need -- so you're right. I think we do
4 want to keep evolving the safety grade to reflect
5 meaningful, important, timely measures of safety.
6 So it's worth revisiting.

7 SARA SINGER: Yeah, absolutely.
8 Certainly for finding more. And I like the idea
9 that these allow for use of HR data. It's
10 pushing hospitals in that direction, too. So all
11 good. Thank you.

12 MATT AUSTIN: Yeah. So thank you,
13 Kathy, for the comment in the chat about patients
14 sort of seeing these as being important harms as
15 well.

16 And we have one minute left, so I'm
17 going to say a very big thank you to all of you
18 for your ongoing guidance. We really treasure
19 and appreciate all of you. We are so, so, so, so
20 lucky to have you on this journey with us. So
21 have a great weekend and we'll be in touch with
22 you all. Take care.

23 SARA SINGER: Thanks, everyone.

24 ARJUN SRINIVASAN: Thanks. Bye.
25

External Email - Use Caution

Alex, this looks great.

I'm wondering, do we: (1) want to reflect that we're already using "Drastic Change" for Step 2 for IPS?; and (2) do we want to use a different term for "Drastic Change" like "Large Change"?

Best,
 Matt

Subject: Imputation Changes

External Email - Use Caution

Hi all,

Please find the table we discussed below. I also included the "underlying issues". Please feel free to edit in a response to this email.

Underlying Issues of the Current Imputation Model

- Hospitals are disincentivized from completing the Survey.
 - They performed well on the Leapfrog Survey last year (or year before) and now can achieve an 'A' grade without devoting resources to completing this year's Survey.
 - Or their imputed scores are better than what they would achieve if they did complete a Leapfrog Survey.
- Concerns
 - For Step 1 Imputation: Performance could have deteriorated since their last Survey.
 - For Step 2 Imputation: Hospitals that choose not to complete the Leapfrog Survey might in fact be poor performers and not perform at the level of Leapfrog hospitals. Therefore, the Step 2 means are not reflective of their standard of care and their assigned scores are inaccurate.

No Change

Small Change

Moderate Change

Drastic Change

Step 1: Recent Survey Participants	Imputation using 4 past rounds (hospitals can complete a Survey <u>once every 3</u> <u>years</u>)	Shorten imputation to 2 past rounds (hospitals can complete a Survey <u>once every 2</u> <u>years</u>)	Shorten imputation to 1 past round (hospitals have until Nov 30 to submit a Survey)	Eliminate 25% imputation
Step 2: Non- Survey Participants	Impute with the mean of first-time scores for their cohort (many are higher than considerable achievement scores)	No change	Assign hospitals to the bottom quartile or several standard deviations below the mean	The same with limited achievement scores

Subject: RE: [Caution External Sender] Revised FY24 Forecast

Thanks this is a good summary.

If we move toward cost reduction as the primary strategy it will be much more severe than this, but I'm not going there for now. We can address incremental spending issues, but let's not lose focus on what managers should be thinking about 24/7, which is revenues. It is likely we will need to spend more money not less to harness the revenue opportunities, especially because we are maxed on staff capacity. But truly that's where the \$\$ are if we are ever going to improve this bottom line.

What I want managers focused on are areas where they can generate bookable revenues. That is a different side of the brain than cost-cutting, so let's keep them there. Here's some of my thinking:

- We should look closely at our archival reports on the Safety Grade as an opportunity, and maybe have one of your marketing folks at RO3 help us with that quickly before we launch the grade May 1.
- I have a nuclear strategy for the CPOE reports sales which I will tell you about tomorrow.
- Paul could work on sales of reports on CPOE and/or another report. Maybe we develop a report on technology and patient safety which is a hot topic.
- We should offer a special deal for some form of AM sponsorship if booked before June 30
- We should plan for special discounts/sales pushes around accolade sales to get more in late May and June.
- Expand marketing around the certified coach program.
- There's a lot of attention to us around the Hospital Safety Grade release, how do we harness that more for marketing?

I'd also like detail on the expenses you will capitalize for NetSuite. You probably looked at this as well, but Ralph is working on the project to build a data delivery tool for licensees which will be capitalized, and we should capitalize the internal labor for that as well. We should continue look at opportunities like that to reduce P&L expense.

Thanks, Leah

Subject: Revised FY24 Forecast

External Email - Use Caution

Hi Leah - As you requested, I wanted to send you over the latest forecast (attached) with the additional levers factored-in: the capitalization of NetSuite costs and recognition of this December's Annual Meeting revenues in FY24. There's some optimistic news, realistic views, and some recommendations.

Optimistic News

- We are forecasting to end this FY at or ahead of budget in all but 3 revenue categories
- Our year-over-year growth is projecting to be 10-11% revenue growth from last year
- Membership continues to be a star with 58% forecasted growth from FY23, 6%+ over budget target set for FY24
- We believe that we can pull-forward at least \$120k in revenue (potentially even more) for Annual Meeting Revenue
- We can capitalize about \$200k of NetSuite implementation costs between software cost and labor/consulting

Realistic Views

- We're forecasting to fall short on topline revenue by ~\$540k. For reasons we've known all year (DHA contract, no media partnership, slow movement on new data products), the deficit we had to make-up was more than \$900k relative to what was budgeted, and it's a very steep hole to climb out of
- Forecasts of expenses that we're either contractually obligated to or will be difficult to avoid have us overspending on expenses by about \$75k in the aggregate across all categories – but specifically stemming from overages in *Marketing & Communications*, *Travel & Meetings*, and *Consulting*. It may be difficult to make major cutbacks on expenses at this point
- Unfortunately, similar to the forecast we originally discussed in January/February, we're forecasting a \$340k net loss for the year as of now

Recommendations

- Push really hard on high-yield revenue opportunities that are already "on the truck" – Membership, Accolades, Annual Meeting Sponsorships to see if we can accelerate pipeline and pull through more topline revenue with bigger ticket items with immediate rev rec

- Pull-back on all discretionary spending and conduct a more granular cost cutting exercise to reduce expenses from now through the end of the FY.
- Based on feedback from the Senior Leadership Team, here are some possible immediate, low-hanging cost cutting measures with a potential impact of between \$15k to \$20k depending on how aggressively we enact
 - Pause staff meals thru end of FY
 - Pause any/all in-person meetings with consultants/constituents through FY except for essentials (e.g., for Board Meeting)
 - Specifically in Marketing/Comms
 - Cut out paid ad spending in Communications account (e.g., Taboola, LinkedIn, Facebook)
 - Pause Krista Hughes videos for remainder of FY24
 - Skip plaques or special article links for HSG this year

I'm more than happy to cancel my scheduled travel to DC next week and the rest of the FY as part of the efforts.

I know this is a lot and would be happy to discuss on our call tomorrow morning.

Thanks,
Ben

Yes, this is true (about the expected decline).

In fact, Leapfrog staff are exercised about the fact that the response rate decreased in 2023 after many consistent years of increases, see slide 10 attached.

They fear that the imputed scores are "too high" in some cases, not sufficiently incentivizing continued participation. So, they are determined to more aggressively penalize nonparticipants.

They will never remove large hospitals from reporting, so unless we want to continue getting C, and potentially dropping to D, I would advise to start participating again.

At our last expert meeting, I argued for allowing facilities to skip a year, with imputation based on carrying forward results from the prior year, but longer periods of nonparticipation won't fly, as this experience demonstrates.

Subject: Re: Theoretical question on PSI 15 - Accidental Puncture or Laceration

Hi Dr. Romano,

UC Davis no longer participates in Leapfrog. The last data that we submitted was June, 2022. (I was the one who submitted our data). In 2023, Leapfrog reused much of our 2022 data when issuing a safety grade. Leapfrog still has access to our publicly reported data and will continue to issue safety grades to us, but we no longer submit internal data. I spoke with Leapfrog when we discontinued our participation. I was told over time our safety grades would experience an expected decline due to lack of self-reported data. Feel free to reach out to me if you have any other questions.

Thank you!

Subject: RE: Theoretical question on PSI 15 - Accidental Puncture or Laceration

Looks like we did pretty poorly in the safety and infection ratings.

I know they used our PSI 90 data from 7/2020 – 6/2022, so that was before we've made monumental efforts in the last year. The infection data is more recent, and we've also made a big push for identifying MRSA earlier in our pre-op patients, so hopefully we have some efforts already in place to work on this.

But if anyone needed more motivation to respond to safety queries, I think I now have it. 😬

Bobby

Very sorry to see this story... as you probably know, I serve on Leapfrog's expert panel for hospital safety scoring, <https://www.hospitalafetygrade.org/about-the-grade>

We used to get mostly As with an occasional B, never seen us get a C before 😞

What's driving this decline?

There are certainly opportunities to improve their methods...

From our local paper, <https://www.sacbee.com/news/local/health-and-medicine/article288237040.html>

Eight Sacramento-area hospitals are among the safest in the nation, according to a nonprofit organization that studies patient safety and care. The Leapfrog Group issues Hospital Safety Grade reports twice a year for nearly 3,000 general hospitals in the United States based on rates of preventable errors, accidents, injuries and infections, as well as the systems hospitals use to prevent those. The group's latest report, released Wednesday and searchable as an online database, grades health care facilities across the nation on a scale of A to F — with A being the highest grade and F the lowest. Out of 20 Sacramento-area hospitals, eight received A grades for spring 2024. They included Mercy General Hospital, 4001 J St. in Sacramento, which excelled at having effective leadership and practices to prevent errors, according to the Leapfrog report.

A total of nine hospitals received B grades, including Kaiser Foundation Hospital, 2025 Morse Ave. in Sacramento. That hospital scored high on its work to avoid harmful events such as patient falls and dangerous blood clots, the report found.

Three hospitals received C grades in total. University of California Davis Medical Center, 4301 X St. in Sacramento, scored lower on its efforts to stop infections and problems with surgery, Leapfrog said, but performed well in terms of ordering and administering medications.

How safe are Sacramento-area hospitals? Here are the Leapfrog Group's hospital safety grades for hospitals in Sacramento and the surrounding area:

A grades

Mercy General Hospital, 4001 J St. in Sacramento
Kaiser Foundation Hospital, 6600 Bruceville Road in Sacramento
Methodist Hospital, 7500 Hospital Drive in Sacramento
Mercy San Juan Medical Center, 6501 Coyle Ave in Carmichael
Woodland Memorial Hospital, 1325 Cottonwood St. in Woodland
Kaiser Foundation Hospital, 1600 Eureka Road in Roseville
NorthBay VacaValley Hospital, 1000 Nut Tree Road in Vacaville
NorthBay Medical Center, 1200 B. Gale Wilson Blvd. in Fairfield

B grades

Kaiser Foundation Hospital, 2025 Morse Ave. in Sacramento
Sutter Davis Hospital, 2000 Sutter Place in Davis
Sutter Roseville Medical Center, 1 Medical Plaza Drive in Roseville
Mercy Hospital of Folsom, 1650 Creekside Drive in Folsom
Kaiser Foundation Hospital, 1 Quality Drive in Vacaville
Sutter Auburn Faith Hospital, 11815 Education St. in Auburn
David Grant Medical Center, 101 Bodin Circle in Travis
Adventist Health and Rideout, 726 4th St. in Marysville
Marshall Medical Center, 1100 Marshall Way in Placerville

C grades

Sutter Medical Center, 2825 Capitol Ave. in Sacramento
University of California Davis Medical Center, 4301 X St. in Sacramento
Adventist Health Lodi Medical, 975 Fairmont Ave. in Lodi

How are hospitals graded by Leapfrog Group? The Leapfrog Group grades hospitals on a scale of A to F based on "overall performance in keeping patients safe from preventable harm and medical errors." The group said it came up with its hospital safety grades by looking at up to 30 national performance measures from the Centers for Medicare & Medicaid Services, the Leapfrog Hospital Survey and other supplemental data sources. Leapfrog then worked under the guidance of a panel of patient safety experts to select about two dozen "evidence-based measures" — divided into five key categories — and develop a scoring methodology. Those categories are:

Infections

Problems with surgery

Safety problems

Practices to prevent errors

Doctors, nurses and hospital staff.

Subject: RE: Theoretical question on PSI 15 - Accidental Puncture or Laceration

LOL Bobby, it's nice to meet you, I just read your story in the Patient Safety Newsletter with great interest 😊

I must share/apportion the blame for PSI 15 with my long-time colleague in your department, Garth Utter. We have written many papers together over the years as we worked with AHRQ to test and improve the measures.

John Kennedy, also cc'd here, is our ICD-10-CM/PCS Certified Coding Specialist and Clinical Documentation Improvement specialist, so he bridges the worlds of clinical documentation, coding, and external measurement.

Also, we often respond to internal case review requests, but we ask that any requests for measure specification changes be routed through official channels, <https://qualityindicators.ahrq.gov/home/contact>, so we can bill AHRQ for our responses, and track refinements over time 😊

I will respond faster and more candidly this way but I may forget what I have said... comments to qisupport@ahrq.hhs.gov get routed to Pantheon Software, which answers the silly questions and the software questions, then the clinical coding questions are referred to Mathematica and from Mathematica to UC Davis.

See below...

Subject: Theoretical question on PSI 15 - Accidental Puncture or Laceration

Hi Dr. Romano,

I'm Bobby the PSI MD champion here at UC Davis. We've crossed paths in emails before. I just learned a couple weeks ago, at the National Physician Advisor meeting that the whole PSI process was basically born at UC Davis. Impressive! Thank you for your hard work! I do believe it is one of the best thought out systems for catching actual safety events we have.

One question keeps arising, that I wonder if you have considered. Specifically for PSI 15, it's my understanding that if an accidental puncture or laceration was noted on an initial procedure, but fixed at that same procedure, and no subsequent procedures are coded, then it wouldn't qualify as a PSI. What I've noticed is that we will sometimes trigger a PSI in these cases even if the puncture/laceration is fixed during the initial procedure, but the abdomen is left open with plans for a "second look" laparotomy as is common practice in trauma/acute care surgery.

My concern is that this inadvertently discourages second-look laparotomies, and I wonder if any other "PSI champions" who are non-surgical would discourage the practice. I would never ever suggest this to our trauma team, mostly because second look laparotomies really can only be a good thing, and the literature supports that. It's actually quite hard to convince non-academic surgeons to commit to a second look laparotomy because it requires so many extra resources and time commitment from the surgeons. But, like I said, I cannot imagine when a second look laparotomy would be bad. You get the patient out of the OR quicker during the primary procedure, to restore their own hemostasis and physiology in the ICU, then come back later when they are more stable, and also tissues have had time to demarcate.

Has this ever been considered? I personally don't know how we would code a second-look laparotomy different from a normal laparotomy, or how to code a "negative" second look laparotomy as a way of removing the PSI. Hopefully, I'm not way off base here and not causing a bother. But if you have any thoughts and time to share them, I'd love to hear them!

PSR: No, you're not off base. We have had a series of complaints related to cases where the iatrogenic injury was recognized and repaired in the first operation, when it happened, and then there was a return to the OR for an unrelated reason.

So far, we have addressed in two ways, neither entirely satisfactory:

- *We took the word "unrecognized" out of the title of the indicator, which was previously known as "Unrecognized Abdominopelvic Accidental Puncture or Laceration Rate." In so doing, we remind users that we are no longer assuming that the laceration was UNRECOGNIZED at the time of the initial operation, but we are simply looking for evidence that it was not fully resolved or addressed at that time. In other words, the need for a second invasive procedure (and all the associated morbidity and mortality risk) is now considered "within scope" for the measure, even if the laceration was recognized during the first procedure.*
- *We narrowed the list of subsequent operations that trigger the numerator, creating six different lists based on the specific structure that was injured in the prior operation. This specification change eliminated a lot of false positives due to completely unrelated operations – for example, going back in to complete a tumor resection or to revise a colostomy. However, and Garth can comment further, ex lap remains on the list due to concern that going back into the abdomen is a "big deal," even if the surgeon opts not to repair anything. I am certainly willing to revisit this question and to remove additional procedures from the reoperation list, based on input from you, Garth, and others.*

From the patient perspective, I would hate a "second look laparotomy," and would view it as just as bad as going back into my abdomen to repair a laceration that hadn't been fully repaired during the first operation. As a patient, I do not agree that leaving my abdomen open is completely benign. But I take your point that there may be net benefits to this approach, and would like to discuss further with you and Garth 😊

Thanks again,

Bobby

Thank you for sharing.

I like the simpler and more direct approach here – if the goal is to penalize nonparticipants, you might as well do so in a clear and unmistakable manner, while allowing for hospitals to manage their burden and jump back on the wagon after a year. This approach is certainly much easier to implement and more straightforward than the step 2 imputation that you folks originally proposed, in that the consequences of nonresponse will become readily apparent.

I corrected a couple of typos in Peter's edits and suggested a rephrasing of one sentence.

As I mentioned earlier, your step 2b proposal would have led to lower imputed estimates, but NOT more ACCURATE imputation. I find no reason to believe – and you didn't present any evidence to suggest – that a hospital's unreported data from the current year is better approximated by its cohort mean from the first year of reporting than by its current cohort mean. The underlying hypothesis behind your proposed step 2b approach was that hospitals stop reporting because their true performance deteriorated, relative to their cohort. My hypothesis, by comparison, was that most hospitals stop reporting because it is too burdensome, and because they only find market value in an A grade, which proves impossible to attain or maintain. If my hypothesis is correct, then the current step 2 approach (current cohort mean) would yield more accurate imputations... but it doesn't achieve your strategic objective of penalizing nonparticipants. In other words, I wasn't keen on a backdoor approach to penalizing nonparticipation... if you want to penalize nonparticipants, then don't pretend that you are imputing missing values in a statistically optimal way. Just be honest about your goal.

Patrick,

If helpful to your review, Peter offered some suggested edits to clarify the concept of "imputation".

Thanks for any feedback you may have on this communication to hospitals.

Best,
Matt

Subject: Leapfrog: Proposed Text for Imputation Change

Patrick,

Since our conversation with you a couple of weeks ago about changing the imputation approach used in Leapfrog's Hospital Safety Grade, we met with the broader expert panel to hear their input, and have drafted the attached language to share with hospitals about the proposed changes.

In the attached, I believe you'll see that we have found a path forward that still uses a hospital's unique historical data when available (although for a shortened period of time) and when historical data are not available, creates an incentive for hospitals to share information about their patient safety practices.

We very much value your perspective and expertise, so we'd appreciate hearing any concerns you might have with the proposed.

Best,
Matt

I am disappointed with the 2024 proposed changes. These changes will penalize hospitals that do not submit a Leapfrog Survey. The public will not understand nor dig into the methodology of these grades, and hospitals will be falsely represented with a lower grade, because they chose to not complete a survey. The survey is extremely time intensive and, in a time, when hospitals are barely breaking even financially, they do not have the resources to commit to this survey. Additionally, there is no option to submit a survey for a health system, where process measures apply to several hospitals in that system. A hospital with excellent outcomes, will no longer be able to receive an A grade because limited achievement is assigned to process measures that actually may be in place.

Exhibit 19

Strategic Planning Update for the Board of Directors

June 2024

LEAPFROG00237725

Focusing Our Vision

Current

We envision a future where purchasers will tie health care investment to excellence and educate their employees on choosing the best care. Health plans will support purchasers in their efforts to reward high performance and empower employees. Consumers will fight for the best care for themselves and their families. Providers will be courageous in championing transparency and leading groundbreaking improvements.

Proposed

Stop avoidable death and suffering in health care.

Leapfrog needs a clear and concise vision that extends beyond the world of employers:

- to approach health care as a complete construct
- to include the many facets of care payment and delivery that extend across a complex system.

Introducing New Core Enablers

- **Staff:** Leapfrog must continue to attract top talent, and retain its low turnover with average tenure of > 5 years. We must remain a rewarding place to work with best in class benefits and competitive salaries
- **Board and volunteers:** Leapfrog must continue to attract as volunteers influential leaders, industry influencers, and world-class experts who guide strategy and assure the integrity of our evidence base. The governing board should maintain its independence from industry and continue to aim for 75% purchaser members.
- **Partnerships, carefully structured:** Leapfrog is not a multi-stakeholder organization, but we are proud partners. We must develop good partnerships with people and organizations that make everything happen, including employers, regional leaders, patient and family advocates, providers, industry, policymakers, and the public at large. But we must structure each partnership to maintain Leapfrog's decision-making independent of the health care industry.
- **Diversity:** Leapfrog Board, staff, volunteers, and advisory boards must continually strive for diversity and equal opportunity
- **Financial discipline:** All program growth must be tied to revenue growth. That means leadership must focus on growing revenues as a priority in order to see its intent realized.

Purpose of the Long Range Strategic Intent

- The Proposed Long Range Strategic Intent is the big vision, our true north.
- We will assume things will not always go as planned.
- We will monitor and gauge progress over three years, six years, and beyond.
Management has developed a dashboard of indicators which the committee should monitor each year to determine whether the direction still applies and the strategies are working.
- The Long Range Strategic Planning Committee will review and edit this proposed strategic intent, with the goal of bringing a recommendation to the Board for vote.

CURRENT Long Range Strategic Intent, Through 2026

1

Become the standard for publicly rating health care.

2

Become U.S. purchasers' consensus source of valid data to support informed employee decision-making, achieve greater value, and prevent wasted lives and dollars.

3

Grow our finances so Leapfrog sustains strong policy and market influence, grows impact, and is protected from risk.

Issues with this approach

1. Improving patient safety is not central
2. Our core ongoing actions are minimized in moving us toward our intent (ie collecting, reporting, setting standards for safety)
3. Focus on mobilizing employers, but other stakeholders have been critical to our success as well
4. Unfocused about the settings of health care we want to improve and what we want to improve about them
5. Long term intent only, without intermediary benchmarks. Are we actually getting where we want to be?

PROPOSED Long-Range Strategic Intent, 2024-2030

More, Better, Bigger

1

More Capacity: Leapfrog scales its resources to the capacity needed to make giant leaps for patient safety

2

Better Standards: Leapfrog sets ever-higher standards for patient safety and publicly rates acute care facilities on achievement of those standards

3

Bigger action: Leapfrog motivates stakeholders to accelerate momentum for patient safety and transparency through usage of Leapfrog standards

Summary of the Shift Proposed

- | | |
|---|--|
| <ol style="list-style-type: none">1. Improving patient safety is not central2. Our core ongoing activities are minimized in moving us toward our intent (ie collecting, reporting, setting standards for safety)3. Focus on mobilizing employers, but other stakeholders have been critical to our success as well4. Unfocused about the settings of health care we want to improve and what we want to improve about them5. Long term intent only, without intermediary benchmarks. Are we actually getting where we want to be? | <ul style="list-style-type: none">• <i>Patient safety is central.</i>• <i>Core activities are integrated into the intent.</i>• <i>Accounts for the range of key stakeholders who must be mobilized.</i>• <i>Focuses on acute care settings and patient safety.</i>• <i>3 and 6 year benchmarks</i> |
|---|--|

How We Scale: Our Goals

- Rapidly expand and diversify revenue sources, including grants, development, industry partnerships, data licensure
- Rapidly expand and diversify staff, skills, competencies to support Leapfrog operating and growth objectives
- Accumulate a reserve fund equal to at least six months of expenses
- Expand resources in the Judie Burrows Education Institute to engage and educate stakeholders
- Build infrastructure capability to support additional staff and portfolio development, particularly technology and marketing
- Add advocacy expertise to advance Leapfrog-specific and general priorities in Federal, state, and local policy and regulations

How We Scale: Discussion Points

- A diverse source of revenues is a key pillar of **ensuring Leapfrog's strategic independence**, allowing the organization to pursue our values even if they might be in conflict with an emerging industry priority.
- We need to target a broad audience with the Judie Burrows Education Institute; for example, employers and other Leapfrog data users can use JBI resources to guide their employees on what is available as information guiding their healthcare decision-making.
- New infrastructure and expertise **are critical to build on Leapfrog's existing efforts** in data dissemination, marketing, and advocacy

How Set Standards: Our Goals

- Set high standards that are evidence-based and expertly derived that make health care safer for everyone
- Inform strengthened measure development, while supporting expanded, accessible, and appropriate data sources
- Engage and support increased participation in hospital and ambulatory surgery center survey, as well as evaluate appropriate additional settings of care delivery
- Set high standards that are evidence-based and expertly derived, for the wise use of technology as a tool to improve safety and quality delivery of care
- Set high standards that are evidence-based and expertly derived, focused on reducing inequities in patient safety and quality across acute care facilities
- Consider different approaches to correlating survey with market evolution and data sales/licensures
- Increase the amount of mandated publicly reported measures so that they can be translated into grades for new settings

How We Set Standards: Discussion Points

- Above all, we need a goal that reflects **the overriding imperative to make health care safer for everyone**
- Our standards are both exacting and derived from top experts
- Leapfrog serves an important role in supporting the field of quality measurement development, as experts and as advocates
- An ASC Safety Grade is an important next step that won't be possible without **new mandatory reporting that we have to advocate for**
- Although we aren't ready to expand into other settings yet, we need to prepare the outlines of a strategy so we are ready to seize opportunities that present themselves
- We aren't yet able to set **standards in new areas of technology like AI, but the field is changing fast**

How We Mobilize: Our Goals

- General Public: Communication strategies that make the Hospital Safety Grade and Leapfrog itself household names
- Patients and Family Caregivers: Enable patients and family caregivers to use transparent public information to choose the safest, highest quality care, with an emphasis on areas of care that resonate with consumers (patients can choose, costs vary)
- Patient Activists: identify common priorities and feature leaders in our public outreach
- Regional Leaders: Build a strong infrastructure of regional leaders that engage employers and health care facilities in their markets to maximize provider participation in Leapfrog and to use the data for payment and public reporting

How We Mobilize: Our Goals (continued)

- Purchasers: Enable purchasers and their contractors to tie Leapfrog ratings to payment decisions
- Consultants to purchasers (i.e. brokers): educate brokers on the advantages of using Leapfrog data to inform their approach
- Health Plans: Pressure plans to tie Leapfrog ratings to payment decisions
- Clinicians: Partner with professional associations where our interests align in ameliorating conditions
- HealthTech Vendors/Startups: Partner with vendors of solutions that address Leapfrog's patient safety priorities
- Regulators/Policymaking: Work with Federal and state regulators and policymakers to enact laws and regulations that accelerate Leapfrog's effectiveness

How We Mobilize: Discussion Points

- Leapfrog has many target audiences, but cannot be all things to all people: our plan emphasizes **a specific approach for each individual audience**
- “Consumers” are a broad group that encompasses a light-touch general public, engaged patients and their family caregivers looking for quality information they can use, and patient activists looking to overhaul the system
- **Regional Leaders are Leapfrog’s key force multiplier**
- Many corporate participants in healthcare have individual needs: purchasers and their consultants need education and enablement to use our data, **health plans should be pressured** to adopt our data
- New infrastructure and expertise in marketing and advocacy will enable our multiplicity of communications efforts

Key Environmental Issues

LEAPFROG00237740

Environmental Scan: Price Transparency

- We need evidence to show that transparent hospitals are safer hospitals
- We can leverage that evidence to pressure health plans to publish Safety Grade alongside prices
- Vendors, providers, and patient activists who partner with us need to emphasize there is no good price for poor care
- We can leverage Leapfrog's Lives and Dollars Lost Calculator

Environmental Scan: Artificial Intelligence

- Not enough evidence to make recommendations on AI applications, but we can already sound the alarm on potential for new risks to patient safety
- We can do so by leveraging patient experiences and narratives
- Our approach will differ depending on applications:
 - Generative AI and LLMs are prone to hallucinations and should not replace human touch clinicians
 - Computer vision applications in radiology are promising but trained on biased data
- Electronic Clinical Quality Measures (eCQMs) will continue to proliferate, with new analytic capabilities (e.g. reliable analyses of free-text clinical notes)
- AI applications that reduce the number of administrative tasks that nurses and physicians need to perform can help to relieve workforce shortages
- One notable opportunity: joining the Coalition for Health AI

Environmental Scan: Workforce

- Staffing issues are broad, and go beyond clinicians: nursing assistants, lab technicians, translators, custodial staff, maintenance technicians
- Diversity of staff a concomitant issue
- Workforce shortages have a direct impact on patient safety
 - Patient safety issues exacerbate workforce issues, as safer hospitals will have less turnover
- CMS Patient Safety Structural Measure asks hospitals to attest that they have an action plan for workforce safety that specifically cites violence and psychological safety, among other elements.
- Pilot programs with alternative staff models where RNs can supervise a team of LPNs
- Leapfrog could soon be in a position to set standards

Environmental Scan: Medicare Advantage

- Medicare Advantage threatens Leapfrog: data collection essential to Leapfrog's public reporting function is not consistently available (e.g. patients on Medicare Advantage plans are not counted in the critical PSI-90 measure used in the hospital safety grade).
- However, Medicare Advantage may be an optimal path for financing health care: has already shored up the Medicare trust fund.
- Leapfrog's role is not to opine on whether or not MA is a good thing (or at least not until we have more information about whether quality and value are improved) – but we need to advocate for a federal mandate to report these data back to Medicare, including putting pressure on purchasers to help us advocate for quality reporting.

Environmental Scan: Retail Health

- Leapfrog's role in this area is uncertain: although we could explore new partnerships in this area, these entities are not regulated entities where we would expect to be able to grade or even set standards within the timeframe of the current strategic intent
- However, these do represent an avenue to put pressure on hospitals to report data, as they encounter new competitive threats

Hi Alana,

Thank you for submitting a comment on our fall 2024 Safety Grade Methodology Changes. We closely considered your comment and provided a response in our final methodology document posted at <https://www.hospitalsafetygrade.org/for-hospitals/key-dates-and-information>.

We greatly appreciate your feedback and participation in our effort to ensure the public has access to useful safety and quality information.

Please let us know if you have any questions.

Best,
Alex

July 1 – November 30:

The 2025 Recognized Leader in Caring for People Living with Diabetes Application is now live. For more information, go to <https://www.leapfroggroup.org/recognized-leader-diabetes/application-materials>.

July 12:

Survey Results will be available on the Hospital and ASC Details pages linked from the Survey Dashboard. Results will be publicly available at <https://ratings.leapfroggroup.org/> on July 25.

August 31:

All Data Verification messages and documentation requests must be resolved before the August 31 deadlines for Hospital Safety Grades and our Top Hospital and Top ASC programs.

October 1:

Submit an abstract to share a case study describing how your hospital or ASC met Leapfrog's standards. Abstracts will be shared at a Poster Session at Leapfrog's Annual Meeting on December 17. Details are available at <https://www.leapfroggroup.org/leapfrog-best-practices-poster-session-partnership-johns-hopkins-armstrong-institute-patient-safety>.

Confidentiality Notice: This e-mail is intended only for the addressee named above. It may contain information that is privileged, confidential, or otherwise protected from use and disclosure. If you are not the intended recipient, you are hereby notified that any review, disclosure, copying, or dissemination of this transmission, or taking of any action in reliance on its contents, or other use is strictly prohibited. If you have received this transmission in error, please reply to the sender listed above immediately and permanently delete this message from your inbox. Thank you for your cooperation.

7/10/2024 06:35 PM UTC

Hi Alana,

Thank you for submitting a comment on our Safety Grade Methodology Changes. We will be closely reviewing all comments before publishing the final changes to the imputation methodology.

The final changes will have responses to public comments and will be published prior to June 30, 2024.

Best,
Alex

May 21 - June 7:

Review proposed changes to the fall 2024 Hospital Safety Grade at <https://www.hospitalsafetygrade.org/for-hospitals/key-dates-and-information>. Comments may be submitted to the Leapfrog Help Desk through June 7.

Friday, June 21 at 10 PM ET through Saturday, June 22:

The CPOE Evaluation Tool will be offline for platform updates from 10 PM ET on Friday, June 21 until Saturday, June 22. During this time, the Sample Test and Adult Inpatient Test will be unavailable.

June 30:

The Hospital and ASC Surveys are open and have a Submission Deadline of June 30. Hospital Survey information is available at www.leapfroggroup.org/hospital. ASC Survey information is available at www.leapfroggroup.org/asc.

Confidentiality Notice: This e-mail is intended only for the addressee named above. It may contain information that is privileged, confidential, or otherwise protected from use and disclosure. - Katie S. KS

public comment

6/06/2024 07:13 PM UTC Internal note

- Alana Noble AN

We strongly disagree with the proposed Fall 2024 Step 2 Imputation. If Leapfrog is going to implement this change, they need to offer hospitals an option to opt out of being graded rather than penalize a hospital for not submitting the resource-intensive survey. The survey is very resource intensive outside of existing regulatory, quality operations and quality improvement efforts. Hospitals who do not have the resources to do the survey annually should not be so adversely punished especially in the post-Covid era where resources are increasingly hard to come by and retain.

7/10/2024 06:35 PM UTC

Hi Zubin,

Thank you for submitting a comment on our Safety Grade Methodology Changes. We will be closely reviewing all comments before publishing the final changes to the Imputation methodology.

The final changes will have responses to public comments and will be published prior to June 30, 2024.

Best,
Alex

May 21 - June 7:

Review proposed changes to the fall 2024 Hospital Safety Grade at <https://www.hospitalsafetygrade.org/for-hospitals/key-dates-and-information>. Comments may be submitted to the Leapfrog Help Desk through June 7.

Friday, June 21 at 10 PM ET through Saturday, June 22:

The CPOE Evaluation Tool will be offline for platform updates from 10 PM ET on Friday, June 21 until Saturday, June 22. During this time, the Sample Test and Adult Inpatient Test will be unavailable.

June 30:

The Hospital and ASC Surveys are open and have a Submission Deadline of June 30. Hospital Survey information is available at www.leapfroggroup.org/hospital. ASC Survey information is available at www.leapfroggroup.org/asc.

Confidentiality Notice: This e-mail is intended only for the addressee named above. It may contain information that is privileged, confidential, or otherwise protected from use and disclosure. If you are not the intended recipient, you are hereby notified that any review, disclosure, copying, or dissemination of this transmission, or taking of any action in reliance on its contents, or other use is strictly prohibited. If you have received this transmission in error, please reply to the sender listed above immediately and permanently delete this message from your inbox. Thank you for your cooperation.

Leapfrog should consider moving towards one CPOE test for large hospital systems that utilize the same EMR. It is a large administrative burden to get all tests scheduled and completed in a short amount of time from April 1st to June 30th. The time commitment to complete the test for each hospital is extensive and requires numerous hours of high-salaried FTEs. The frequency requirement should also be re-evaluated as it is unlikely hospitals are changing their EMR significantly each year or every other year.

Imputation Step 1 Model:

Is Leapfrog willing to re-evaluate the decision on the point assignment for the BCMA measure? 25 points out of the 100 points seems very low for hospitals that chose to not submit a survey to save on the time and resource commitment required to complete a survey this year if they have just submitted one last year. The impact of adding a few units to the BCMA measure is unlikely to drop performance from 100 to 25 for hospitals. Even if compliance was low, pre-op and PACU areas do not typically administer a volume of medications that would yield a drop from 100 to 25 points. Leapfrog should consider using N/A or a higher point assignment for this measure. The current proposal is causing hospitals to allocate unplanned hours and resources to complete the annual survey to avoid a negative impact to their Safety Grades.

Leapfrog should also consider announcing changes to imputation models at least one year in advance. The last-minute notice of changes that negatively impact hospitals that do not submit requires rapid shifting of priorities for the FTEs heavily involved in survey submission. The completion of the survey requires a great deal of coordination between various departments across the hospital including Informatics, Physicians, Pharmacy, Women's Services, Quality & Safety, and Nursing. The brief time period does not allow us to have all required sections completed without the addition of unplanned supplementary resources.

Imputation Step 2 Model:

We feel like this model is unnecessarily punitive. We often skip survey submission because the responses provided for IPS, Hand Hygiene, BMCA, and CPOE are largely unchanged in the 2-year period that was allotted before negatively impacting grades. The FTE resource commitment to complete the survey is already significant. There is no value added by completing a survey every year or every other year when practices in our hospitals have not changed.

Hi Susan,

Thank you for submitting a comment on our fall 2024 Safety Grade Methodology Changes. We closely considered your comment and provided a response in our final methodology document posted at <https://www.hospital-safety-grade.org/for-hospitals/key-dates-and-information>.

We greatly appreciate your feedback and participation in our effort to ensure the public has access to useful safety and quality information.

Please let us know if you have any questions.

Best,
Alex

July 1 – November 30:

The 2025 Recognized Leader in Caring for People Living with Diabetes Application is now live. For more information, go to <https://www.leapfroggroup.org/recognized-leader-diabetes/application-materials>.

July 12:

Survey Results will be available on the Hospital and ASC Details pages linked from the Survey Dashboard. Results will be publicly available at <https://ratings.leapfroggroup.org/> on July 25.

August 31:

All Data Verification messages and documentation requests must be resolved before the August 31 deadlines for Hospital Safety Grades and our Top Hospital and Top ASC programs.

October 1:

Submit an abstract to share a case study describing how your hospital or ASC met Leapfrog's standards. Abstracts will be shared at a Poster Session at Leapfrog's Annual Meeting on December 17. Details are available at <https://www.leapfroggroup.org/leapfrog-best-practices-poster-session-partnership-johns-hopkins-armstrong-institute-patient-safety>.

Public comment

6/10/2024 12:20 PM UTC Internal note

- Boardman, Susan BS

The proposed changes to the Imputation Method would result in an inaccurate portrayal of the actual status of the patient safety structures and processes in place for the Leapfrog grade measures CPOE, BCMA, IPS, and Hand Hygiene at hospitals that choose not to expend the resources to submit a 2024 Leapfrog Hospital Survey and had not submitted a 2023 Leapfrog Hospital Survey. Under "Step 2" of the proposed new Imputation method, the points assigned for these measures would be the same that earned for "Limited Achievement" if the 2024 Survey were submitted. This is not a like to like comparison between hospitals. Rather, if 2023 or 2024 were not submitted, more accurate options include: 1) Not assigning a Grade for hospitals that did not submit either a 2023 or a 2024 survey, or at least allowing these hospitals to opt out of the Fall 2024 Leapfrog Hospital Safety Grade; 2) Publishing to versions of the Fall 2024 Leapfrog Hospital Safety Grade, one for hospitals completing the 2023 or 2024 Survey, and one just based on CMS measures, not including the survey based measures so there is no penalty for not submitting a survey. For the proposed new Imputation Method, if a hospital has completed a survey in the past where the measure section has not substantially changed, allowing the hospital to attest that there has not been changes to reduce the number of Medication Alerts for the CPOE measure, to save the resources required for retaking the CPOE evaluation test. And for the BCMA, IPS and Hand Hygiene measures, allow hospitals to just submit any of these sections if there have been changes on the Leapfrog questions, or if the hospital cannot attest that there have not been changes to their previous responses.

Actually, it should be “assigned”, not “calculated”. See below.
This hospital declined to report data for this measure, so a score was assigned using an imputation model approved by patient safety experts.

Subject: RE: New imputation denotation

Okay, great. It’s working for me too. Thanks for doing this, but we can’t say “external data sources” because we’re arbitrarily assigning them the points associated with the bottom scoring category (“limited achievement”) or old data from the previous Survey (internal data source).

Leah wanted us to make it sound like the expert panel approved it and the assigning of these points was legitimate. What about this: This hospital declined to report data for this measure, so a score was calculated using an imputation model approved by patient safety experts.

I think linking to the methodology would be neat, but I don’t think Leah or Missy cared to do so. We could ask.

Subject: RE: New imputation denotation

Yeah, I just did it and got the stage version so everything is working as it should on my end.

A few thoughts on the language:

- This hospital declined to report data for this measure, so a score was calculated with external data sources using an imputation model.
- This hospital declined to report data directly to Leapfrog for this measure, so a score was calculated using external data sources based on an imputation model.
- This hospital declined to report data for this measure, so a score was calculated using an imputation model. For more information, see the [Spring 2024 Safety Grade Scoring Methodology](#).
- This hospital declined to report data for this measure, so a score was calculated with external data sources using an imputation model. For more information, see the [Spring 2024 Safety Grade Scoring Methodology](#).
- This hospital declined to report data directly to Leapfrog to this measure, so a score was calculated using external data sources based on an imputation model. For more information, see the [Spring 2024 Safety Grade Scoring Methodology](#).

Let me know what you think of the above options.

Yes, but are you able to see the change on his link? I followed all the instructions and I'm going to try again later today. I've just been out and am catching up on stuff.

That was the language Missy wanted but Leah wants something else that makes it sound like the data we imputed wasn't random, so lmk if you have any ideas.

I will respond to him later today once I'm sure it doesn't display on stage for me, and I come up with new phrasing. Otherwise, his mockup looks right.

External Email - Use Caution

Great. That makes it easier since we will not have to re-import any new data.

I implemented this in a staged version of the database.

To preview the staged version, please do the following:

1. Open a new **Incognito window** in Chrome.
2. Visit this URL in the new **Incognito window**:

<https://www.hospitalsafetygrade.org/?dbver=20240601STAGE>

3. Then do a search for a hospital (e.g. Mizell Memorial Hospital) and visit the hospital details page.

Notes and Definitions

1. **Declined to Report:** The hospital was asked to provide this information to the public, but did not.
2. **Not Available:** "Not Available" means that the hospital does not have data for this measure. This could be because the measure is related to a service the hospital does not provide. For example, a hospital that does not have an ICU would not be able to report data about it. It could also be because the hospital had too few patients or cases to report data for a particular condition or procedure. A "Not Available" count does not mean that the hospital withheld information from the public.
3. **The hospital declined to report data for this measure, so a score was imputed for the measure.**

1. Die gewöhnliche Differentialgleichung zweiter Ordnung $y'' + p(x)y' + q(x)y = r(x)$ ist für $x \in I$ zu lösen, wobei I ein Intervall in $\mathbb{R}$ ist, $p, q, r: I \rightarrow \mathbb{R}$ stetige Funktionen sind und $y: I \rightarrow \mathbb{R}$ die gesuchte Funktion ist. Die Randwerte $y(a) = \alpha$ und $y(b) = \beta$ sind vorgegeben. Die Randwerte $y(a) = \alpha$ und $y(b) = \beta$ sind vorgegeben. Die Randwerte $y(a) = \alpha$ und $y(b) = \beta$ sind vorgegeben.

If you accidentally enable the staged preview not in an Incognito window, you will need to clear cookies for the site to return to normal. You will know if you are seeing the staged version if you see something like this in the top right of the page:

Please review this when you get a chance. If all looks good, I will copy this change to the live database to make this live.

- Devon

On Tue, Jun 4, 2024 at 2:11 PM Alexandra Campione <ACampione@leapfrog-group.org> wrote:

Hi Devon,

I am so silly. We don't need extra columns!

The asterisks should appear anytime the measure's data source= "Imputation Model Applied".

This would only apply to the following columns:

- CPOE (Data Source) and CPOE (Hospital Score)
- BCMA (Data Source) and BCMA (Hospital Score)
- ICU Physician Staffing (Data Source) and ICU Physician Staffing (Hospital Score)
- Hand Hygiene (Data Source) and Hand Hygiene (Hospital Score)

Example: if *CPOE (Data Source)*= "Imputation Model Applied", then *This Hospital's Score*= *CPOE (Hospital Score)* & "**".

Please let me know if you have any questions. Attached is an example file to visualize.

Best,
Alex

We would like to add a third item to the “Notes and Definitions” at the bottom and an optional asterisk to 4 measures’ scores (CPOE, BCMA, IPS, and Hand Hygiene). The data file would denote whether the asterisk should be present either with 4 additional columns or include the asterisk in the original data columns. The latter would be similar to the data review website, but I am guessing it wouldn’t work since the numeric values are used to determine the gas gauge direction.

Exhibit 24

Final Updates to the Leapfrog Hospital Safety Grade Methodology for Fall 2024

On May 21, 2024, Leapfrog published planned updates to the Hospital Safety Grade methodology and held a public comment period through June 7, 2024. We thank commenters for their insightful feedback and suggestions that helped us finalize the methodology.

This document includes responses to the comments received and summarizes the final updates that will be made to the scoring methodology. Additionally, Table 2 on pages 5-6 includes a summary of data sources and anticipated reporting periods for the fall 2024 Hospital Safety Grades.

Summary of Changes

Starting in fall 2024, Leapfrog will update the Imputation Methodology for CPOE, BCMA, IPS, and Hand Hygiene measures for hospitals that do not submit a 2024 Leapfrog Hospital Survey by August 31, 2024. The changes come under the guidance of Leapfrog's national expert panel, the research team at Johns Hopkins Medicine, and in response to stakeholder feedback.

More information can be found on the Hospital Safety Grade website at <https://www.hospitalsafetygrade.org/for-hospitals/key-dates-and-information>.

RESPONSES TO PUBLIC COMMENTS

Four commenters supported the change to the imputation methodology.

We appreciate the feedback and agree that participating hospitals committed to transparency should be acknowledged for the resources and time they devote to completing the Leapfrog Hospital Survey. Hospitals that choose not to complete the Survey should not inadvertently benefit from hospitals that continuously strive to make improvements and maintain Leapfrog standards.

Two commentors expressed concerns about Step 2 Imputation misrepresenting the current procedures or infrastructure of the hospital to the public.

We recognize that hospitals eligible for Step 2 Imputation may score higher if they complete a Leapfrog Hospital Survey. However, we cannot ensure this is the case if we do not have the data, and our analyses have shown that performance among hospitals that intermittently complete the annual Survey is lower than those hospitals that completed the most recent Survey. The expert panel recognized that hospitals with a drop in performance may be incentivized to not report via the Leapfrog Hospital Survey and scores calculated using participating hospitals would misrepresent their true performance. We encourage hospitals to complete the Leapfrog Hospital Survey so they can receive credit for implementing processes that protect patients and save lives.

We do acknowledge the commenter's point that the public may misinterpret the assigned measure scores. In response, we will add a new denotation to the Hospital Safety Grade website (<https://www.hospitalsafetygrade.org/>) for scores that have been imputed.

Two commentors requested that the proposed changes be delayed until spring 2025 to allow hospitals time to complete the Leapfrog Hospital Survey.

While we do strongly encourage hospitals to submit their Survey by the Submission Deadline of June 30, 2024, hospitals that wish to have 2024 Leapfrog Hospital Survey data used in their fall 2024 Safety Grade will have until August 31 to submit or resubmit their Survey. Hospitals that completed a 2023 Leapfrog Hospital Survey will be eligible for Step 1 Imputation. Hospitals eligible for Step 2 Imputation have opted not to complete 2 consecutive years of the Leapfrog Hospital Survey and will be scored accordingly.

Four commenters opposed penalizing hospitals that choose not to devote resources to completing a voluntary Survey each year and be allowed to opt out of the Hospital Safety Grade.

The Leapfrog Hospital Survey is designed to help hospitals benchmark their progress in quality and safety. To ensure that these standards are consistently met, hospitals must continuously measure. While our Survey, is not required or linked to federal funding, we think it is just as important. Patients, employers, and purchasers benefit from having access to current and accurate information.

Our expert panel recognized that awareness and participation in the Leapfrog Hospital Survey has grown exponentially in recent years. As such, the choice of hospitals to not complete the Leapfrog Hospital Survey is one that could not be ignored as patient safety must remain a priority. A key element of the Hospital Safety Grade is that all eligible hospitals are compared to hospitals nationwide. The choice to not participate should not excuse a hospital from being graded, nor should they be given a score that unfairly awards them points.

FINAL UPDATE TO IMPUTATION METHOD FOR CPOE, BCMA, IPS, AND HAND HYGIENE

BACKGROUND

The Leapfrog Group and other national organizations have ongoing concerns with the trajectory of patient safety in US hospitals. Leapfrog wants to ensure that the public has timely, transparent, and trustworthy information about a hospital's patient safety performance. Leapfrog's longstanding commitment is to use the best and most recent data publicly available to calculate Hospital Safety Grades.

To ensure the Hospital Safety Grade methodology continues to support these goals, Leapfrog's blue-ribbon Expert Panel and researchers at Johns Hopkins Medicine annually review the scoring methodology. The panel advised that Leapfrog modify the current imputation method, which is used to fill in missing data among hospitals that did not complete the most recent Leapfrog Survey.

Leapfrog is proposing the following changes to its imputation approaches effective with the fall 2024 Hospital Safety Grade.

CHANGES TO IMPUTATION METHOD FOR CPOE, BCMA, IPS, AND HAND HYGIENE

Leapfrog is proposing the following changes effective with the fall 2024 Hospital Safety Grade.

1) New Step 1 Imputation (Does not apply to BCMA)

If the hospital had a score assigned by Leapfrog in the previous two rounds of grades (i.e., spring 2024, fall 2023), the hospital is assigned the most recent score on that measure in the current Hospital Safety Grade (i.e., fall 2024). This is a reduction from the previous methodology, which imputed scores from up to four previous rounds of grades. This will help ensure any historical data used in calculating the Safety Grade is reflective of hospital protocols within the past 2 years (e.g., the reporting periods for CPOE IPS, and Hand Hygiene on the 2023 Leapfrog Hospital Survey was 2023).

Note that Step 1 imputation will be temporarily paused for the BCMA measure. In 2024, Leapfrog expanded the BCMA Standard to include pre-operative and post-anesthesia care units in addition to med-surg units, critical care units, and labor and delivery units. Due to these changes, scores from the 2023 Leapfrog Hospital Survey are not an accurate representation of performance on the current measure and thus not suitable for Step 1 imputation.

2) New Step 2 Imputation

For hospitals that do not have historical data from the last two rounds of the Safety Grade (Step 2 imputation then applies), instead of imputing a score based on the cohort mean, hospitals will be assigned a point value that is equivalent to receiving "Limited Achievement" for that measure on the Leapfrog Hospital Survey (Table 1). This category assignment would reflect Leapfrog's lack of current information about a hospital's status in implementing these important patient safety structures.

Step 2 imputation for the IPS measure will only apply to hospitals that operate an adult or pediatric medical and/or surgical ICU or neuro ICU. A hospital's ICU designation will be determined using the most recently available CMS Cost Report. Hospitals that report operating one or more medical, surgical and/or pediatric ICU beds in Worksheet S-3 Part 1 will be eligible for Step 2 Imputation.

Table 1. Step 2 Imputation Point Assignments Beginning Fall 2024

	Leapfrog Hospital Survey Performance Category	Corresponding Safety Grade Measure Score
CPOE	Limited Achievement 	15
BCMA	Limited Achievement 	25
IPS	Limited Achievement 	5
Hand Hygiene	Limited Achievement 	15

INDEPENDENT AUDITOR'S REPORT

Board of Directors
The Leapfrog Group and Affiliate

Opinion

We have audited the accompanying consolidated financial statements of The Leapfrog Group and Affiliate (Leapfrog), which comprise the consolidated statements of financial position as of June 30, 2024 and 2023, and the related consolidated statements of activities, functional expenses, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of The Leapfrog Group and Affiliate as of June 30, 2024 and 2023, and the changes in its net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are required to be independent of Leapfrog and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Leapfrog's ability to continue as a going concern within one year after the date that the consolidated financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements, including omissions, are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the consolidated financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Leapfrog's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the consolidated financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Leapfrog's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

THE LEAPFROG GROUP AND AFFILIATE

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

YEARS ENDED JUNE 30, 2024 AND 2023

NOTE 1. NATURE OF ACTIVITIES AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of activities - The Leapfrog Group (Leapfrog) is a non-profit organization incorporated in the District of Columbia in 2001. Leapfrog works to identify problems and propose solutions to improve hospital systems for patients and health care providers.

The Leapfrog Due Diligence Cooperative, LLC, was established in 2011. Its purpose is to collect, evaluate, and summarize information about companies providing healthcare-related services to employers.

A summary of Leapfrog's significant accounting policies follows:

Principles of consolidation - The consolidated financial statements include the assets, liabilities and activities and changes in net assets of The Leapfrog Group and The Leapfrog Due Diligence Cooperative, LLC (collectively, Leapfrog). All intercompany accounts and transactions have been eliminated.

Basis of presentation - The consolidated financial statement presentation follows the recommendations under the *Not-for-Profit Entities* Topic of the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC). Under the ASC, Leapfrog is required to report information regarding its financial position and activities according to two classes of net assets: net assets without donor restrictions and net assets with donor restrictions, as applicable.

Net assets without donor restrictions - These net assets are available to finance the general operations of Leapfrog. The only limits on the use of net assets without donor restrictions are the broad limits resulting from the nature of Leapfrog, the environment in which it operates, and the purposes specified in its organizing documents.

Net assets with donor restrictions - These net assets result from contributions and other inflows of assets, the use of which by Leapfrog is limited by donor-imposed time or purpose restrictions that may be either temporary or perpetual.

Cash and cash equivalents - For consolidated financial statement purposes, Leapfrog considers certain highly liquid securities purchase with an original maturity of three months or less to be cash equivalents.

NOTE 1. NATURE OF ACTIVITIES AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Bank deposit accounts are insured by the Federal Deposit Insurance Corporation (FDIC) up to a limit of \$250,000. At times during the year, Leapfrog maintains cash balances in excess of the FDIC insurance limits. Management believes the risk in these situations to be minimal.

Receivables - Accounts receivable approximate fair value, and are primarily uncollateralized obligations comprised of amounts due from data licensure revenue, accolade licensing revenue, and conference revenue. At each financial position date, Leapfrog recognizes an expected allowance for credit losses. The allowance estimate is derived from a review of Leapfrog's historical losses based on the aging of receivables. This estimate is adjusted for management's assessment of current conditions, reasonable and supportable forecasts regarding future events, and any other factors deemed relevant by Leapfrog. Leapfrog writes off receivables when there is information that indicates the debtor is facing significant financial difficulty and there is no possibility of recovery. If any recoveries are made from any accounts previously written off, they will be recognized in income or an offset to credit loss expense in the year of recovery, in accordance with the entity's accounting policy election. The total amount of write-offs was immaterial to the consolidated financial statements as a whole for the year ending December 31, 2024.

Pledges receivable - Pledges receivable is due in less than one year and are recorded at their net realizable value, which approximates fair value. Conditional promises to give are not included as support until the conditions are substantially met. Management considers all amounts to be fully collectible. Accordingly, an allowance of doubtful accounts has not been established.

Property and equipment - Property and equipment with a cost exceeding \$1,000 is recorded at original cost and is depreciated over its estimated useful lives of three to eight years using the straight-line method from the date it is placed in service. Leasehold improvements are amortized over the shorter of the lease term or the expected useful life.

Valuation of long-lived assets - Leapfrog reviews equipment and certain identifiable intangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of the long-lived asset is measured by a comparison of the carrying amount of the asset to future undiscounted net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the estimated fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value, less costs to sell. There were no long-lived assets considered impaired during the years ended June 30, 2024 and 2023.

NOTE 1. NATURE OF ACTIVITIES AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Refundable advances - Assets received in a conditional contribution are accounted for as refundable advances until the conditions have been substantially met or explicitly waived by the donor. Revenue is recognized on the date the condition is met. At June 30, 2024 and 2023, refundable advances include grant received as detailed in Note 7.

Support and revenue - Leapfrog performs an analysis of the individual grants and contributions to determine if the revenue streams follow the contribution rules or if they should be recorded as an exchange transaction depending upon whether the transactions are deemed reciprocal or nonreciprocal under Accounting Standards Updates (ASU) 2018-08, *Not-for-Profit Entities* (Topic 958).

Contribution revenue is recognized upon notification of the award and satisfaction of all conditions, if applicable. Conditional promises to give are not recognized until the conditions on which they depend are substantially met. Unconditional contributions that have donor restrictions are recognized as "without donor restrictions" only to the extent of actual expenses incurred in compliance with the donor-imposed restrictions and satisfaction of time restrictions; such funds in excess of expenses incurred are shown as net assets with donor restriction in the accompanying consolidated financial statements.

Membership and program revenue classified as exchange transactions are recorded as revenue at a point in time when the performance obligations are met. Leapfrog has elected to opt out of all (or certain) disclosures not required for nonpublic entities. Transaction price is based on cost. Funding received in advance of satisfying performance obligations are recorded as deferred revenue.

Membership dues (IFL dues) include general member benefits that are a series of distinct obligations. The revenue is recognized ratably over the membership period. There are several benefits received that are individual distinct obligations; however, they are immaterial in nature to the contract and thus are included with the general member benefits.

Accolade licensing revenue: Leapfrog licenses logos that signify hospitals' achievements in two of their programs: The Leapfrog Top Hospital logo and the Hospital Safety Grade of "A". The cost of the license is non-refundable. Hospitals may use the dated logo as long as they wish. Revenue is recognized when the performance obligation is met which is the date upon issuance of the logo.

Data licensure: Leapfrog sells data from its two hospital ratings programs, the Leapfrog Hospital Survey and Leapfrog Hospital Safety Grade, to organizations such as health plans that incorporate the Leapfrog data in their own platforms and products. These data users sign year-long license agreements, which can be terminated by either party with adequate notice as specified in the data use agreement.

NOTE 1. NATURE OF ACTIVITIES AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Contract revenue is recognized when the performance obligation is met which is monthly over the contract period. Amounts collected and not earned are included in deferred income and amounts earned but not received are in accounts receivable. Leapfrog also licenses a value-based purchasing program that helps health plans identify the highest performing hospitals in their network and offer corresponding recognition. As part of the licensure contract, Leapfrog offers ongoing support in the form of calls, webinars, and in-person meetings, guidance in structuring rewards, as well as bi-annual hospital analytics reports. Health plans subscribing to the program sign a year-long license agreement, which can be cancelled with adequate notice as specified in the data use agreement. Revenue is recognized when performance obligations are met which is monthly over the period of the contract.

Data products: Leapfrog sells customized analytics reports to hospitals, health plans, researchers and others, using data from one or more of its programs. These are one-time reports and the fees are non-refundable. Revenue is recognized when performance obligation is met which is upon the issuance of the report. Leapfrog also operates a user's group that meets monthly to discuss topics of interest to hospitals; hospital representatives pay an annual fee to join this group. Revenue is recognized upon registration and the fees are non-refundable.

Media partnership: Leapfrog receives media partnership revenue and revenue is recognized when performance obligations are met which is when received.

Income taxes - Leapfrog is generally exempt from federal income taxes under the provisions of Section 501(c)(3) of the Internal Revenue Code (IRC). Additionally, no provision for income taxes has been made in the accompanying consolidated financial statements. Leapfrog is not a private foundation. The Leapfrog Due Diligence Cooperative, LLC is a limited liability company treated as a partnership for income tax purposes with all income tax liabilities and/or benefits, if any, being passed through to its member. As such, no recognition of taxes has been recognized in the accompanying consolidated financial statements.

Management evaluated Leapfrog's tax positions and concluded that Leapfrog has taken no uncertain tax positions that require adjustment to the consolidated financial statements to comply with the provisions of this guidance. Generally, Leapfrog is no longer subject to income tax examinations by the U.S. federal, state or local tax authorities for years before 2021.

Use of estimates - The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

NOTE 1. NATURE OF ACTIVITIES AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Functional allocation of expenses - The costs of providing various programs and other activities have been summarized on a functional basis in the consolidated statements of activities and functional expenses. Direct costs associated with specific programs are recorded as program expenses. Certain costs have been allocated among the programs and supporting services. Fringe benefits are allocated based on salaries and programmatic time codes charges in timesheets. Other select expenses are allocated based on management's assessment of employee work. Management and general expenses include those expenses that are not directly identifiable with any other specific function but that provide for the overall support and direction of Leapfrog.

New accounting pronouncement adopted - During the year ended June 30, 2024, Leapfrog adopted the provisions of Accounting Standards Update (ASU) 2016-13, *Financial Instruments – Credit Losses* (Topic 326). This ASU replaced the incurred loss methodology with an expected loss methodology that is referred to as the current expected credit loss (CECL) methodology. The ASU requires nonprofit entities to immediately recognize the estimated expected credit losses over the life of a financial instrument, including trade receivables. The estimate of expected credit losses considers not only historical information, but also current and future economic conditions and events.

Leapfrog adopted the ASU effective July 1, 2023. The impact of the adoption was not considered material to the consolidated financial statements and primarily resulted in additional disclosures.

NOTE 2. LEASE COMMITMENTS

Leapfrog leased office space in Washington, D.C., under an agreement that commenced on May 1, 2012, and expired April 30, 2020. Base rent was \$132,096 per year, plus a proportionate share of expenses, increasing by a factor of 2.5% per year, except for the sixth lease year when rent increase by \$2 per square foot of the fifth-year rate.

Leapfrog entered into a new 130-month lease agreement for office space in Washington, D.C. that commenced on August 1, 2020. The lease provides for ten months of abated rent beginning on lease commencement date. Base rent is \$31,665 per month, plus a proportionate share of expenses, increasing by a factor of 2.5% per year.

The right-of-use asset and the operating lease liability are being amortized over the life of the lease agreement. As of June 30, 2024, the unamortized right-of-use asset was \$2,713,451 and the unamortized operating lease liability was \$2,654,917. The lease cost, including imputed interest and amortization of the right-of-use asset plus the straight-line rent expense for the year ended June 30, 2024, was \$401,112. Rent expense for the year ended June 30, 2023 was \$401,112, also included in operating expenses.

NOTE 2. LEASE COMMITMENTS (CONTINUED)

In March 2023, Leapfrog entered into a finance lease obligation for a copier, which expires in 2026. A finance lease right-of-use asset and related finance lease liability is reported in the consolidated financial statements.

Future minimum lease payments under Leapfrog's operating and finance leases as of June 30, 2024, are as follows:

<u>Year</u>	<u>Operating</u>	<u>Finance</u>
2025	\$ 418,496	\$ 2,196
2026	428,986	1,455
2027	439,742	-
2028	450,762	-
2029	462,048	-
Thereafter	918,478	-
Undiscounted future cash flows	3,118,512	3,651
Less: effects of discounting	(60,904)	(239)
Lease liability recognized	<u>\$ 3,057,608</u>	<u>\$ 3,412</u>

Supplemental qualitative information related to both the operating and finance leases are as follows:

WEIGHTED AVERAGE DISCLOSURES

Weighted average lease term (years) - operating leases	6.92
Weighted average lease term (years) - finance leases	1.67
Weighted average discount rate - operating leases	0.55%
Weighted average discount rate - finance leases	7.82%

NOTE 3. NET ASSETS WITH DONOR RESTRICTIONS

During the year ended June 30, 2023, \$516,902 was recognized as net assets with donor restrictions and \$903,291 of these restricted net assets were released from donor restrictions by incurring expenses which satisfied the restricted purposes specified by the donors resulting in a remaining balance of \$-0- in net assets with donor restrictions at June 30, 2023. During the year ended June 30, 2024, \$890,532 grant was recognized as net assets with donor restrictions and \$751,520 of the restricted net assets were released from donor restrictions, resulting in a remaining balance of \$139,012 in net assets with donor restrictions at June 30, 2024. The grant was purpose restricted and recognized when expenses were incurred.

NOTE 4. LIQUIDITY AND AVAILABILITY

Financial assets available for use for general expenditures within one year of the consolidated statements of financial position date comprise the following:

	2024	2023
Cash and cash equivalents	\$ 1,781,870	\$ 2,999,926
Accounts receivable	699,980	620,715
Total financial assets available	2,481,850	3,620,641
Less: donor restricted funds		
Net assets with donor restrictions	(139,012)	-
Total financial assets available to meet cash needs for general expenditures within one year	<u>\$ 2,342,838</u>	<u>\$ 3,620,641</u>

Leapfrog has a policy to structure its financial assets to be available and liquid as its obligations become due. As of June 30, 2024 and 2023, Leapfrog had financial assets equal to approximately seven and five months of operating expenses, respectively.

NOTE 5. CONTRACT ASSETS AND LIABILITIES

The timing of billings, cash collections, and revenue recognition result in contract assets and contract liabilities associated with revenue from exchange transactions. Contract assets consist entirely of trade accounts receivable, which are recognized only to the extent it is probable that Leapfrog will collect substantially all of the consideration to which it is entitled in exchange for the goods or services that will be or have been transferred. Contract liabilities consist entirely of deferred revenue that results when Leapfrog receives advance payments from customers before revenue is recognized.

Balances in these accounts as of the beginning and end of the years ended June 30, 2024 and 2023 are as follows:

	2024	June 30, 2023	2022
Accounts receivable			
Licensing	\$ 648,640	\$ 601,403	\$ 557,561
Data sales	48,890	14,362	12,460
	<u>\$ 697,530</u>	<u>\$ 615,765</u>	<u>\$ 570,021</u>
Deferred revenue			
Deferred Data Sales, LVBP, System Services	\$ 869,210	\$ 1,008,312	\$ 1,056,019
Other	12,188	51,425	-
	<u>\$ 881,398</u>	<u>\$ 1,059,737</u>	<u>\$ 1,056,019</u>

NOTE 6. HUMAN RESOURCES MANAGEMENT

Leapfrog has contracted with Human Resources, Inc., a professional employer and administrative services organization. All the responsibilities of employee-related administration are handled by Human Resources, Inc., including payroll reporting, health care plans, deferred compensation plans, and worker's compensation insurance. Leapfrog reimburses Human Resources, Inc. for the cost of these benefits, plus a monthly management fee. The total human resource management fees for the years ended June 30, 2024 and 2023 were \$60,850 and \$54,040, respectively.

NOTE 7. REFUNDABLE ADVANCES

In April 2022, Leapfrog received a grant from the Gordon and Betty Moore Foundation. The purpose of the grant was to support a national reporting system that recognizes hospital and health system performance in standards of diagnostic excellence. The Grant was in the amount of \$1,332,925 and was received in full in April 2022. An additional grant of \$113,375 has been received from the grantor during the year ended June 30, 2024.

The funds under the Grant are considered to be a conditional contribution under ASC 958-605 as they include a right of return and specific outcome requirements. As of June 30, 2024, the funds have not been fully used, and revenue was recognized as the specific outcome requirements have are met. Revenue recognized during the year ended June 30, 2024, was \$751,520. The remaining amount of \$177,878 is recognized on the consolidated statements of financial position as a refundable advance.

NOTE 8. RETIREMENT PLANS

Leapfrog provides retirement benefits to employees through a defined contribution plan covering all full-time employees with one year of service. Eligible employees may elect to contribute, subject to certain limitations, a portion of their salary on a tax-deferred basis.

Leapfrog contributes an additional 10% of the eligible employees' gross pay to the Plan. Employees are immediately vested. The employer contributions to the defined contribution plan for the years ended June 30, 2024 and 2023 totaled \$269,596 and \$251,007, respectively.

NOTE 9. SUBSEQUENT EVENTS

Subsequent events have been evaluated through March 28, 2025, which is the date the consolidated financial statements were available to be issued. This review and evaluation revealed no material event or transaction which would require an adjustment to or disclosure in the accompanying consolidated financial statements.

LEAH! THANKS!
Attachments: LFG About Us Slides 2024.pptx

Hi Paul, Looking great.
I have a few suggestions:

- Typo on slide 9 (the word “decision” should be plural)
- I think before Slide 10 you should say something about the employer origins of Leapfrog. The employer and the business coalitions set the standards through Leapfrog and aim to drive a market for safety. That is a major part of the reason hospitals participate and pay attention to Leapfrog and our Surveys. Attached are template slides I use but adapt as you wish.
- Slide 12: I’m not sure the page views stat is universally compelling, there are lots of websites that get a lot more traffic (ie probably many hospital associations) and touting the number could backfire as a message. Another stat you might use here instead: over 65% of hospitals now report using Leapfrog standards for executive compensation reviews. If you want to show the prominence of the grade, you could use a slide showing media clips or a photo of a hospital touting their A.
- Slide 24: just an idea, you could do the math that if 54,000 opportunities arise on a 25 bed unit (slide 22) that means 37,800 (70%) are encounters with patients are below the standard of good hygiene—in just one 25 bed unit.
- Slide 16: The statistic on A vs F hospitals meeting the hand hygiene standard won’t pass our test of validity. First, hand hygiene is a standard in the grade so A hospitals will by definition be more likely to achieve it. However it would be ok to site them for 40% complianc,except not only in comparison to F hospitals. There are only a small handful of F hospitals each round (20ish) so it’s likely not statistically significant to compare all the As against them. So please leave this stat out, the presentation is strong enough without it.
- We did change the methodology for Fall 2024 so that hospitals that don’t report to the Leapfrog Survey this year or last year will be imputed with the lowest score on hand hygiene. I’m sure the survey team has a slide on that. But please be sure you thoroughly understand this change and the talking points around it if you do decide to use it—it’s a very big deal to hospitals (and a major incentive to report to the Survey) and you could easily get a question on it.

Great job with this! Leah

Subject: RE: CEO Report

Katie should have sent you submission article. JL sent AARP. Fall SG update below:

Fall 2024 Safety Grade Update

Starting with the fall 2024 Hospital Safety Grade, Leapfrog will only impute missing measure scores from the previous two rounds of grades (i.e., spring 2024, fall 2023) instead of the previous four rounds of grades. Additionally, instead of assigning hospitals the mean score of similar hospitals if they don't have a recent score available for imputation, Leapfrog will now assign a point value associated with "Limited Achievement" on that measure. The update dramatically lowers imputed scores for certain measures for hospitals that decline to report to the Leapfrog Hospital Survey. This follows a strong recommendation from the Expert Panel. This has appeared to impact hospital reporting to the Survey as we are seeing record participation this year. Additionally, these changes strengthen the Grade overall by ensuring hospitals are not receiving undue credit for performance they have not achieved.

HOSPITAL

SAFETY GRADE

WHAT IS THE HOSPITAL SAFETY GRADE?

Leapfrog Hospital Safety Grades are assigned to nearly 3,000 general acute-care hospitals across the nation twice annually. The Safety Grade uses up to 22 national patient safety measures from the Centers for Medicare & Medicaid Services (CMS) and the Leapfrog Hospital Survey, and information from other supplemental data sources, to produce a single letter grade representing a hospital's overall performance in keeping patients safe from preventable harm and medical errors. The Safety Grade methodology has been peer reviewed and published in the *Journal of Patient Safety*.¹

With the Safety Grade, The Leapfrog Group aims to educate and encourage consumers to consider safety when selecting a hospital for themselves or their families. In addition, we believe the Safety Grade will foster strong market incentives for hospitals to make safety a priority. Safety Grades are publicly reported at www.HospitalSafetyGrade.org.

ELIGIBLE HOSPITALS

Due to the limited availability of public data, Leapfrog is not able to calculate a Safety Grade for every hospital in the U.S., including the following types of hospitals:

- Critical access hospitals (CAH)
- Rural emergency hospitals (REH)
- Long-term care and rehabilitation facilities
- Mental health facilities
- Federal hospitals (e.g., Veterans Affairs, Indian Health Services, etc.)
- Some specialty hospitals, such as surgery centers and cancer hospitals
- Free-standing pediatric hospitals
- Hospitals in U.S. territories
- Hospitals that are missing scores for **more than six (6)** process/structural measures, or **more than five (5)** outcome measures, or **missing PSI 90**

¹ The Leapfrog Hospital Safety Grade uses the below-described data and reflects expert opinion as to the relative importance of each category.

HOSPITAL

SAFETY GRADE

MEASURES

The Safety Grade utilizes up to 22 national patient safety measures from the Centers for Medicare & Medicaid Services (CMS) and the Leapfrog Hospital Survey, and information from other supplemental data sources.

The measure set is divided into two domains: (1) Process/Structural Measures and (2) Outcome Measures. Each domain represents 50% of the Safety Grade. The following table lists the 22 measures included in the Safety Grade, as well as the data source and reporting period for each measure. In some cases where a hospital's information is not available for a certain measure, Leapfrog uses a secondary data source (as indicated in the table). In cases where a hospital's information is not available from any data source, Leapfrog has outlined a methodology for dealing with the missing data.

PROCESS/STRUCTURAL MEASURES (12)

Measure Name	Primary Data Source	Reporting Period	Secondary Data Source	Reporting Period
Computerized Physician Order Entry (CPOE)	2024 Leapfrog Hospital Survey	2024	Imputation Model Applied*	N/A
Bar Code Medication Administration (BCMA)	2024 Leapfrog Hospital Survey	2024	Imputation Model Applied*	N/A
ICU Physician Staffing (IPS)	2024 Leapfrog Hospital Survey	2024	Imputation Model Applied*	N/A
Safe Practice 1: Culture of Leadership Structures and Systems	2024 Leapfrog Hospital Survey	2024	N/A	N/A
Safe Practice 2: Culture Measurement, Feedback & Intervention	2024 Leapfrog Hospital Survey	2024	N/A	N/A

HOSPITAL

SAFETY GRADE

MRSA	2024 Leapfrog Hospital Survey	01/01/2023 - 12/31/2023	CMS	10/01/2022 - 09/30/2023
C. Diff.	2024 Leapfrog Hospital Survey	01/01/2023 - 12/31/2023	CMS	10/01/2022 - 09/30/2023
PSI 4: Death rate among surgical inpatients with serious treatable complications	CMS	07/01/2020 - 06/30/2022	N/A	N/A
CMS Medicare PSI 90: Patient safety and adverse events composite*	CMS	07/01/2020 - 06/30/2022	N/A	N/A

* CMS calculates PSI 90 using the ten (10) component PSIs. While scores for each of the 10 component PSIs are not used to calculate fall 2024 Hospital Safety Grades, they will be publicly reported on the Hospital Safety Grade [website](#).

HOSPITAL

SAFETY GRADE

****COMPONENT PSIs (SCORES NOT USED TO CALCULATE THE HOSPITAL SAFETY GRADE)**

Component PSI	Primary Data Source	Reporting Period	Secondary Data Source	Reporting Period
PSI 3: Pressure ulcer rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A
PSI 6: Iatrogenic pneumothorax rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A
PSI 8: In-hospital fall with hip fracture rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A
PSI 9: Postoperative hemorrhage or hematoma rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A
PSI 10: Postoperative acute kidney injury requiring dialysis rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A
PSI 11: Postoperative respiratory failure rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A
PSI 12: Perioperative pulmonary embolism or deep vein thrombosis rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A
PSI 13: Postoperative sepsis rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A
PSI 14: Postoperative wound dehiscence rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A
PSI 15: Abdominopelvic accidental puncture or laceration rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A

Note: CMS calculates PSI 90 using the ten (10) component PSIs listed above. While scores for each of the 10 component PSIs are not used to calculate fall 2024 Hospital Safety Grades, they will be publicly reported on the Hospital Safety Grade [website](#).

HOSPITAL

SAFETY GRADE

MEASURE & SCORING DESCRIPTIONS

PROCESS/STRUCTURAL MEASURES

For Process/Structural Measures, a higher score is always better because these are measures of compliance with best practices in patient care.

COMPUTERIZED PHYSICIAN ORDER ENTRY (CPOE)

The CPOE measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures a hospital's progress toward implementing a CPOE system to reduce medication ordering errors. Through participation in the Leapfrog Hospital Survey, hospitals are placed in one of several performance categories: "Achieved the Standard," "Considerable Achievement," "Some Achievement," "Limited Achievement," or "Unable to Calculate Score." For the purposes of calculating the Safety Grade, a numerical score is assigned to each performance category:

Leapfrog Performance Category	Measure Score
Achieved the Standard	100
Considerable Achievement	70
Some Achievement	40
Limited Achievement	15
Unable to Calculate Score	Not Available (See Scoring Terms)

For hospitals that did not submit a 2024 Leapfrog Hospital Survey by August 31, see [Using Secondary Data Sources](#) for more information on Leapfrog's imputation methodology.

HOSPITAL SAFETY GRADE

BAR CODE MEDICATION ADMINISTRATION (BCMA)

The BCMA measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures a hospital's progress toward 1) implementation of BCMA throughout the hospital, 2) compliance with patient and medication scans during administration, 3) use of decision support, and 4) structures to monitor and reduce workarounds. Through participation in the Leapfrog Hospital Survey, hospitals are placed in one of several performance categories: "Achieved the Standard," "Considerable Achievement," "Some Achievement," "Limited Achievement," or "Does Not Apply." For the purposes of calculating the Safety Grade, a numerical score is assigned to each performance category:

Leapfrog Performance Category	Measure Score
Achieved the Standard	100
Considerable Achievement	75
Some Achievement	50
Limited Achievement	25
Does Not Apply	Not Available (See Scoring Terms)

For hospitals that did not submit a 2024 Leapfrog Hospital Survey by August 31, see [Using Secondary Data Sources](#) for more information on Leapfrog's imputation methodology.

ICU PHYSICIAN STAFFING (IPS)

The IPS measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures a hospital's use of intensivists in ICUs. Through participation in the Leapfrog Hospital Survey, hospitals are placed in one of several performance categories: "Achieved the Standard," "Considerable Achievement," "Some Achievement," "Limited Achievement," or "Does Not Apply." For the purposes of calculating the Safety Grade, a numerical score is assigned to each performance category:

Leapfrog Performance Category	Measure Score
Achieved the Standard	100
Considerable Achievement	50
Some Achievement	15
Limited Achievement	5
Does Not Apply	Not Available (See Scoring Terms)

For hospitals that did not submit a 2024 Leapfrog Hospital Survey by August 31, see [Using Secondary Data Sources](#) for detailed information on Leapfrog's imputation methodology.

HOSPITAL SAFETY GRADE

NATIONAL QUALITY FORUM (NQF) SAFE PRACTICES

Two (2) NQF Safe Practice measures are collected by The Leapfrog Group on the Leapfrog Hospital Survey. They measure a hospital's progress toward implementing endorsed processes and protocols to reduce and prevent adverse events. Through participation in the Leapfrog Hospital Survey, hospitals can earn up to 120 points for each Safe Practice. For the purposes of calculating the Safety Grade, individual scores for each Safe Practice are used:

NQF Safe Practice	Possible Measure Score
Safe Practice 1: Culture of Safety Leadership Structures and Systems	0 - 120
Safe Practice 2: Culture Measurement, Feedback and Intervention	0 - 120

There is no secondary data source for the NQF Safe Practices. Therefore, hospitals that did not submit a 2024 Leapfrog Hospital Survey by August 31 will not have these measures included in their Safety Grade and the measure will be reported as "Declined to Report." See [Dealing with Missing Data](#) for more information.

TOTAL NURSING CARE HOURS PER PATIENT DAY

The Total Nursing Care Hours per Patient Day measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures the hospital's total number of productive hours worked by employee or contract nursing staff (i.e., RNs, LPNs, and UAPs) with direct patient care responsibilities per patient day across three unit types: medical, surgical, and med/surg. Through participation in the Leapfrog Hospital Survey, hospitals are placed in one of several performance categories: "Achieved the Standard," "Considerable Achievement," "Some Achievement," "Limited Achievement," or "Does Not Apply." For the purposes of calculating the Safety Grade, a numerical score is assigned to each performance category:

Leapfrog Performance Category	Measure Score
Achieved the Standard	100
Considerable Achievement	70
Some Achievement	40
Limited Achievement	15
Does Not Apply	Not Available (See Scoring Terms)

There is no secondary data source for the Total Nursing Care Hours per Patient Day measure. Therefore, hospitals that did not submit a 2024 Leapfrog Hospital Survey by August 31 will not have this measure included in their Safety Grade and the measure will be reported as "Declined to Report." See [Dealing with Missing Data](#) for more information.

HOSPITAL SAFETY GRADE

HAND HYGIENE

The Hand Hygiene measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures processes and protocols that hospitals have in place regarding monitoring hand hygiene practices, fostering a culture of good hand hygiene, offering training and education, and providing equipment. Through participation in the Leapfrog Hospital Survey, hospitals are placed in one of several performance categories: "Achieved the Standard," "Considerable Achievement," "Some Achievement," "Limited Achievement." For the purposes of calculating the Safety Grade, a numerical score is assigned to each performance category:

Leapfrog Performance Category	Measure Score
Achieved the Standard	100
Considerable Achievement	70
Some Achievement	40
Limited Achievement	15

For hospitals that did not submit a 2024 Leapfrog Hospital Survey by August 31, see [Using Secondary Data Sources](#) for detailed information on Leapfrog's imputation methodology.

HOSPITAL CONSUMER ASSESSMENT OF HEALTHCARE PROVIDERS AND SYSTEMS (HCAHPS) COMPOSITES

The Hospital HCAHPS survey responses are collected by CMS via the Inpatient Quality Reporting Program. Linear mean scores calculated by CMS incorporate the full range of survey response categories into a single metric for each HCAHPS composite. Five of the six composites are used in the Safety Grade. For the purposes of calculating the Safety Grade, a hospital's linear mean score for each of the five composites is used:

HCAHP Composite	Possible Measure Score
H-COMP-1: Nurse Communication	0 - 100
H-COMP-2: Doctor Communication	0 - 100
H-COMP-3: Staff Responsiveness	0 - 100
H-COMP-5: Communication about Medicines	0 - 100
H-COMP-6: Discharge Information	0 - 100

HOSPITAL SAFETY GRADE

OUTCOME MEASURES

For Outcome Measures, a lower score is always better because these are measures of harm experienced by patients (e.g., central line-associated blood stream infections).

HOSPITAL-ACQUIRED CONDITIONS

Three hospital-acquired condition measures are calculated by CMS through the [DRA HAC Reporting Program](#): Foreign Object Retained after Surgery, Air Embolism, and Falls and Trauma. Hospital-acquired condition rates are calculated by CMS based on Part A Medicare Fee-for-service (FFS) claims and publicly reported as a rate per 1,000 Part A Medicare FFS discharges. No age restrictions are applied. For the purposes of calculating the Safety Grade, the rate is used. More information is available in the [DRA HAC methodology](#).

HEALTHCARE-ASSOCIATED INFECTIONS

Five healthcare-associated infection measures are collected by The Leapfrog Group on the Leapfrog Hospital Survey: Central line-associated bloodstream infections (CLABSI) in ICUs and select wards, Catheter-associated urinary tract infections (CAUTI) in ICUs and select wards, Surgical site infections from colon surgery (SSI: Colon), Facility-wide inpatient MRSA Blood Laboratory-identified Events, and Facility-wide inpatient C.diff. Laboratory-identified Events. Through participation in the Leapfrog Hospital Survey, hospitals were required to 1) join Leapfrog's NHSN group, 2) provide an accurate NHSN ID in the Profile section of the Online Survey Tool, and 3) submit a Survey by August 31. For the purposes of calculating the Safety Grade, the [standardized infection ratio \(SIR\)](#) is used:

As Reported by Leapfrog	Measure Score	Notes
Standardized Infection Ratio (SIR)	SIR	Measure is included in calculating the Safety Grade
Does Not Apply	Not Available (See Scoring Terms)	Measure is not included in calculating the Safety Grade. No use of Secondary Data.
Unable to Calculate Score	Not Available (See Scoring Terms)	Measure is not included in calculating the Safety Grade. No use of Secondary Data.
Declined to Respond	See Using Secondary Data	Secondary Data source is used.

For hospitals that did not join Leapfrog's NHSN group, provide an accurate NHSN ID, or submit a 2024 Leapfrog Hospital Survey by August 31, see [Using Secondary Data Sources](#) for more information on Leapfrog's use of CMS data.

HOSPITAL SAFETY GRADE

AHRQ PATIENT SAFETY INDICATORS (PSI)

Two AHRQ Patient Safety Indicators are calculated by CMS through the Inpatient Quality Reporting Program and the [HAC Reduction Program](#): PSI 4 Death Rate among Surgical Inpatients with Serious Treatable Conditions and PSI 90 Patient Safety and Adverse Events Composite. PSI rates are calculated by CMS based on Medicare Fee-for-Service claims and publicly reported as a rate per 1,000 inpatient discharges. CMS only includes claims from patients 18 years or older. For the purpose of calculating the Safety Grade, the smoothed rate is used for both measures. More information on calculating PSIs is available on the [Patient Safety Indicators \(PSI\) 2024 Resources website](#).

Note: CMS calculates PSI 90 using the ten (10) component PSIs that are listed in the PSI 90 Components table [above](#). While scores for each of the 10 component PSIs are NOT used to calculate fall 2024 Hospital Safety Grades, they will be publicly reported on the Hospital Safety Grade [website](#). Additional information about the PSI 90 measure and how it is calculated by CMS can be found [here](#).

HOSPITAL SAFETY GRADE

USING SECONDARY DATA SOURCES

Twelve (12) of the 22 measures included in the Safety Grade are derived from the Leapfrog Hospital Survey. The Leapfrog Hospital Survey is voluntary, and as such, hospitals may choose not to submit a Survey. To address this gap in available data, the Safety Grade methodology utilizes secondary data when available. For information on how to complete a free Leapfrog Hospital Survey, visit www.leapfroggroup.org/survey.

IMPUTATION METHOD FOR CPOE, BCMA, IPS, AND HAND HYGIENE

Leapfrog has worked closely with statisticians at Mathematica, Leapfrog's National Expert Panel, and our scientific partners at Johns Hopkins Armstrong Institute for Patient Safety and Quality to develop a new two-step imputation approach for determining scores for CPOE, BCMA, IPS, and Hand Hygiene if they are missing from our publicly reported Survey Results.

STEP 1: USE A HOSPITAL'S MOST RECENT SCORE ON THE MEASURE (APPLIES TO CPOE, IPS, AND HAND HYGIENE ONLY)

If the hospital had a score assigned by Leapfrog in the previous two rounds of grades (i.e., spring 2024, fall 2023), excluding imputed scores, the hospital is assigned the most recent score on that measure in the current Hospital Safety Grade (i.e., fall 2024).

STEP 2: USE IMPUTATION POINT ASSIGNMENT (APPLIES TO CPOE, BCMA, IPS AND HAND HYGIENE)

If the hospital does not have historical data from the last two rounds (i.e., spring 2024, fall 2023) of the Safety Grade, the hospital is assigned a point value that is equivalent to receiving "Limited Achievement" for this measure on the Leapfrog Hospital Survey:

Measure	Leapfrog Hospital Survey Performance Category	Corresponding Safety Grade Measure Score
CPOE	Limited Achievement	15
BCMA	Limited Achievement	25
IPS	Limited Achievement	5
Hand Hygiene	Limited Achievement	15

Note about IPS: Only hospitals that operate an adult or pediatric medical and/or surgical ICU or neuro ICU are eligible for Step 2 Imputation of the IPS measure. A hospital's ICU designation (i.e., operating a medical ICU, surgical ICU, or pediatric ICU) is determined from the number of medical, surgical and/or pediatric ICU beds reported in Worksheet S-3 Part 1 of the hospital's most recent CMS Cost Report. If your hospital does not operate an ICU, but shares a CMS Certification Number with a hospital that does, please contact the Help Desk immediately if an IPS score was imputed.

HOSPITAL

SAFETY GRADE

CMS DATA FOR HAIS

CMS is the **secondary data** source for healthcare-associated infections. For the purposes of calculating the Safety Grade, the standardized infection ratio (SIR) published by CMS is used:

Hospitals That Did Not Join Leapfrog's NHSN Group and Submit Section 7: Managing Serious Errors of the 2024 Leapfrog Hospital Survey by August 31

As Reported by CMS	Measure Score	Notes
Not Available (no locations or low volume)	Not Available (See Scoring Terms)	Measure is not included in calculating the Leapfrog Hospital Safety Grade.
Standard Infection Ratio (SIR)	SIR	Measure is included in calculating the Leapfrog Hospital Safety Grade.

If a hospital does not have available data from the Leapfrog Hospital Survey or CMS (e.g., no locations or low volume), the hospital is reported as "Not Available." See [Dealing with Missing Data](#) for more information.

HOSPITAL

SAFETY GRADE

SCORING METHODOLOGY

WEIGHTING INDIVIDUAL MEASURES

Each measure included in the Leapfrog Hospital Safety Grade is assigned a standard weight. The methodology to assign standard weights includes four criteria: (1) Impact, (2) Evidence, (3) Opportunity, and (4) Number of Component Measures. These four criteria are then combined using the equation below, which results in a standard weight for each measure that represents the measure's relative importance within the Hospital Safety Grade.

$$[\text{Evidence} + (\text{Impact} \times \text{Opportunity} \times \text{Number of Component Measures})]$$

EVIDENCE

The Evidence Score for each individual measure is assigned a value of one (1) or two (2) using the following criteria:

- 1 = Supported by either suggestive clinical or epidemiological studies or theoretical rationale
- 2 = Supported by experimental, clinical, or epidemiological studies and strong theoretical rationale

OPPORTUNITY

The Opportunity Score for each individual measure is based on the Coefficient of Variation (Standard Deviation/Mean) of that measure, using the following formula: $[1 + (\text{Standard Deviation}/\text{Mean})]$. The Opportunity Score is on a continuous scale that is capped at three (3). Any measure with an Opportunity Score above three (3) is assigned a three (3).

IMPACT

The Impact Score for each individual measure is comprised of two (2) parts, each of which is assigned a value from one (1) to three (3):

1. Number of patients affected
2. Severity of harm

The *number of patients affected* score is determined by the following:

- 0 = Extremely rare event (e.g., Air Embolism)
- 1 = Rare event (e.g., Foreign Object Retained After Surgery)

HOSPITAL SAFETY GRADE

- 2 = Some patients in hospital affected (e.g., ICU Physician Staffing)
- 3 = All patients in hospital affected (e.g., Hand Hygiene)

The *severity of harm* score is determined by the following:

- 1 = No direct evidence of harm or harm reduction (e.g., Patient Experience)
- 2 = Clear documentation of harm or harm reduction; adverse events (e.g., Foreign Object Retained After Surgery)
- 3 = Significant mortality reduction (more than 1,000 deaths or a 10% reduction in hospital wide mortality) (e.g., ICU Physician Staffing)

The values from each part are then added together to arrive at the overall Impact Score using the following criteria:

- 1 = Score of 2 (Low Impact) (e.g., Air Embolism)
- 2 = Score of 3-4 (Medium Impact) (e.g., Patient Experience)
- 3 = Score of 5-6 (High Impact) (e.g., ICU Physician Staffing)

NUMBER OF COMPONENT MEASURES

The number of component measures refers to how many measures are included within the measure. For PSI 90, the number of component measures is 10 (PSI 3, PSI 6, PSI 8, PSI 9, PSI 10, PSI 11, PSI 12, PSI 13, PSI 14, and PSI 15). For all other measures included in the Hospital Safety Grade, the number of component measures within the measure is one (1).

HOSPITAL

SAFETY GRADE

STANDARD MEASURE WEIGHTS

Measure	Evidence Score	Opportunity Score	Impact Score	Number of Component Measures	Standard Measure Weight
Process/Structural Measure Domain (50%)					
CPOE	2	1.44	3	1	6.2%
BCMA	2	1.39	3	1	6.0%
IPS	2	1.68	3	1	6.9%
SP 1	1	1.06	2	1	3.0%
SP 2	1	1.13	2	1	3.2%
Total Nursing Care Hours per Patient Day	2	1.42	2	1	4.7%
Hand Hygiene	2	1.51	2	1	4.9%
H-COMP-1	1	1.03	2	1	3.0%
H-COMP-2	1	1.03	2	1	3.0%
H-COMP-3	1	1.05	2	1	3.0%
H-COMP-5	1	1.06	2	1	3.0%
H-COMP-6	1	1.04	2	1	3.0%
Outcome Measure Domain (50%)					
Foreign Object Retained	1	3.00	2	1	4.2%
Air Embolism	1	3.00	1	1	2.4%
Falls and Trauma	2	2.05	3	1	4.9%
CLABSI	2	1.82	3	1	4.5%
CAUTI	2	1.88	3	1	4.6%
SSI: Colon	2	1.85	2	1	3.4%
MRSA	2	1.79	3	1	4.5%
C. Diff.	2	1.79	3	1	4.5%
PSI 4	1	1.13	2	1	2.0%
PSI 90	1	1.19	2	10	15.0%

HOSPITAL

SAFETY GRADE

CALCULATING Z-SCORES

Z-Scores are used to standardize data from measures with different performance scales and allow for comparisons (e.g., a linear mean score of 90 on H-COMP-1: Nurse Communication and a CLABSI SIR of 0.870). In addition, Z-Scores can indicate to a hospital whether their measure score is above, below, or equal to the average hospital.

In the Scoring Methodology, a Z-Score is calculated for each available measure score. A Z-Score is calculated using a hospital's actual measure score, the national mean for that measure, and the standard deviation for that measure. The Z-Score for each measure is calculated using the following formulas:

- **For Process/Structural Measures:** $(\text{Hospital Score} - \text{Mean}) / \text{Standard Deviation}$
- **For Outcome Measures:** $[(\text{Mean} - \text{Hospital Score}) / \text{Standard Deviation}]$

The following table includes the national mean and standard deviation for each measure used to calculate a hospital's Z-Score. For display, means and standard deviations are displayed rounded to two or three decimal places. For scoring, these values are not rounded.

Process and Structural Measures	Mean	Standard Deviation
CPOE	79.04	34.62
BMCA	80.51	31.02
IPS	64.45	43.96
SP 1	117.40	6.66
SP 2	116.60	15.20
Total Nursing Care Hours per Patient Day	76.10	31.78
Hand Hygiene	72.43	36.61
H-COMP-1	90.04	2.56
H-COMP-2	89.80	2.48
H-COMP-3	81.48	4.41
H-COMP-5	74.33	4.16
H-COMP-6	85.14	3.78

Outcome Measures	Mean	Standard Deviation
Foreign Object Retained	0.014	0.050
Air Embolism	0.002	0.055
Falls and Trauma	0.385	0.404
CLABSI	0.687	0.566
CAUTI	0.577	0.505
SSI: Colon	0.852	0.722
MRSA	0.746	0.588
C. Diff.	0.418	0.330
PSI 4	168.34	21.85
PSI 90	1.01	0.19

HOSPITAL SAFETY GRADE

A NOTE ABOUT EXTREME VALUES

For hospitals that have an “extreme” value for a particular measure (i.e., a value that exceeds the 99th percentile) Leapfrog “trims” the reported value to the 99th percentile. For example, a rate of 0.500 per 1,000 patient discharges for Foreign Object Retained after Surgery is “trimmed” to 0.327 (e.g., the 99th percentile). Only “trimmed” rates are displayed on the Leapfrog Hospital Safety Grade [website](#). The table below includes the “trim” values for the fall 2024 Leapfrog Hospital Safety Grade. The PSI 90 measure score represents an observed to expected ratio that has already been risk adjusted at both the component PSI level and at the composite level; therefore, the measure is not “trimmed” by Leapfrog.

Measure	99 th Percentile
Foreign Object Retained	0.327
Air Embolism	2.890
Falls and Trauma	1.942
CLABSI	2.534
CAUTI	2.550
SSI: Colon	3.534
MRSA	2.696
C. Diff.	1.699
PSI 4	222.68

Note: Percentiles are rounded to reflect the precision of the raw data.

HOSPITAL SAFETY GRADE

DEALING WITH MISSING DATA

Due to a variety of reasons, a hospital may not have a measure score for all 22 measures. If a hospital is missing a measure score for any measure (except PSI 90; hospitals missing PSI 90 are not graded), the standard weight of that measure is redistributed to the other measures in the same measure domain. The new weight for each measure within the domain is calculated by re-apportioning the standard weight assigned to the measure with the missing score to other measures within the same domain. For example, if a hospital is missing a measure score for ICU Physician Staffing because the hospital does not operate an adult or pediatric medical and/or surgical ICU, the standard weight of 6.9% will be re-apportioned to the remaining 11 measures within the process/structural measure domain.

To calculate the new weight of each of the remaining 11 measures in the process/structural measure domain, hospitals can use the formula below or use the Leapfrog Hospital Safety Grade Calculator[®], which can be found on the [Safety Grade Review Website](#). Note that each domain contributes to 50% of the overall letter grade.

[Standard measure weight / (sum of standard weights for the remaining 11 measures in the process/structural measure domain)]*50% = updated measure weight

For more information about how the measure weight redistribution is calculated and affects the overall score, please see the Leapfrog Hospital Safety Grade Calculator, which can be found on the last page of the [Safety Grade Review Website](#).

CALCULATING WEIGHTED MEASURE SCORES

To calculate a hospital's numerical safety score, multiply the Z-Score of each process/structural measure by the standard weight assigned to that measure to get the weighted process/structural measure score. If a hospital is missing any process/structural measure scores, see [Dealing with Missing Data](#) to determine the updated measure weight. Then, sum all weighted process/structural measure scores. This is the hospital's overall weighted process/structural measures score.

Multiply the Z-Score of each outcome measure by the standard weight assigned to that measure to get the weighted outcome measure score. If a hospital is missing any outcome measure scores, see [Dealing with Missing Data](#) to determine the updated measure weight. Then, sum all weighted outcome measure scores. This is the hospital's overall weighted outcome measures score.

To calculate the overall Safety Grade for a hospital, add the overall weighted process/structural measures score and the overall weighted outcome measures score. Add 3.0 to your score; this is done to normalize scores to a positive distribution. This final numerical score (typically between 1.0 and 4.0) is then assigned to a letter grade. To assist hospitals in calculating their numerical score, a calculator is available on the [Safety Grade Review Website](#). Letter grade cut-points are published during the [Letter Grade Embargo Period](#).

HOSPITAL SAFETY GRADE

ADDITIONAL SCORING INFORMATION

TERMS USED IN SCORING AND PUBLIC REPORTING

“Not Available” means that the hospital does not have a score for this measure. This could be because the measure is related to a service the hospital does not provide or because the hospital had too few patients or cases to report data for a condition or procedure. A “Not Available” result does not mean that the hospital withheld information from the public.

In the case of healthcare-associated infections, a SIR is reported as “Not Available” if one of the following applies:

- The number of predicted infections is less than 1.
- The number of observed infections present on admission (community-onset prevalence) was above a pre-determined cut-point.

For more information about NHSN's SIR models, please visit <https://www.cdc.gov/nhsn/pdfs/ps-analysis-resources/nhsn-sir-guide.pdf>.

“Declined to Report” means that a hospital did not voluntarily provide information to the Leapfrog Hospital Survey. Measures scored as “Declined to Report” will not be used in calculating the overall score (see [Dealing with Missing Data](#)).

SHARED CMS CERTIFICATION NUMBERS

All hospitals that share a CMS Certification Number (CCN) will be assigned the same source data as reported by CMS. Affected measures include the HCAHPS, Hospital-Acquired Conditions, Healthcare-Associated Infections (if secondary data source is used), and Patient Safety Indicators.

HOSPITAL SAFETY GRADE

UPDATES TO DATA USED IN THE LEAPFROG HOSPITAL SAFETY GRADE

The Leapfrog Hospital Safety Grade relies on publicly available data that hospitals have had the opportunity to review for accuracy. Therefore, Leapfrog does not allow hospitals to make updates to their data following the Data Snapshot Date. In January of each year, Leapfrog publishes the Data Snapshot Dates for each of the two Leapfrog Hospital Safety Grade public releases at <https://www.hospitalsafetygrade.org/for-hospitals/key-dates-and-information>. Leapfrog publishes these dates to give hospitals and other stakeholders advance notice so they can be prepared to submit a Leapfrog Hospital Survey and monitor their performance on CMS measures used in the Safety Grade.

In addition, Leapfrog holds a Courtesy Review Period to give hospitals an additional opportunity to review the data that will be used to calculate their hospital's Safety Grade. The Review Period is an opportunity for hospitals to review the data for accuracy (i.e., identify recording errors, hospital name and address changes, etc.) on a secure website and review changes to the scoring algorithm.

DATA FROM THE LEAPFROG HOSPITAL SURVEY

During the Safety Grade Review Period (September 25 – October 15), Leapfrog will only make corrections to a hospital's data from the 2024 Leapfrog Hospital Survey if a recording error is identified (i.e., we have recorded a different measure score than what is posted on our Survey Results website) or a scoring error is identified (i.e., Leapfrog has calculated an incorrect measure score based on the submitted responses and Leapfrog's published scoring algorithms). Updates to Leapfrog Hospital Survey data that are submitted after the Data Snapshot Date will **not** be included in the current Leapfrog Hospital Safety Grade. Hospitals submitting a Leapfrog Hospital Survey are urged to take advantage of the opportunity to review their Survey Results for accuracy and completeness prior to each of the two published Data Snapshot Dates.

HOW HOSPITALS CAN REVIEW LEAPFROG HOSPITAL SURVEY RESULTS PRIOR TO THE DATA SNAPSHOT DATE

The Leapfrog Hospital Survey is open from April 1 to November 30 of each year. Following the Submission Deadline (June 30), Survey Results are published monthly on a secure 'Hospital Details' page and a public website (ratings.leapfroggroup.org). Hospitals are urged to review their Survey Results immediately. Hospitals that identify any reporting errors are instructed to log back into the Survey to submit a correction. Hospitals can correct and re-submit a previously submitted Survey until the Survey closes for the year. Note that corrections submitted after the Data Snapshot Date (August 31 for the fall Safety Grade and January 31 for the spring Safety Grade) are not included in the current Leapfrog Hospital Safety Grade. Leapfrog has several automated processes in place to prevent hospitals from making data entry errors in the Online Survey Tool and to enhance the overall accuracy of the Survey Results. Learn more at

<https://www.leapfroggroup.org/for-hospitals/key-dates-and-information>.

HOSPITAL SAFETY GRADE

DATA FROM THE CENTERS FOR MEDICARE & MEDICAID SERVICES (CMS)

During the Safety Grade Review Period (September 25 – October 15), Leapfrog will only make corrections to a hospital's data from CMS if the correction is issued by CMS and posted to the Data.CMS.Gov website. If a hospital has identified an error with a measure score published by CMS, and CMS cannot post a correction within the review period, the measure score will not be used in calculating the hospital's Safety Grade, provided that the hospital can document that CMS has agreed to publicly issue a correction or remove the measure score from public reporting. Hospitals participating with CMS are urged to take advantage of the opportunity to participate in the CMS 30-day review periods.

CMS FOOTNOTE 23 POLICY

Leapfrog will notify hospitals that have CMS footnote 23 present for one or more claims-based measure scores (e.g., DRA HAC Rate, PSI 4 rate, or PSI 90 rate) at the start of the Courtesy Review Period. Footnote 23 indicates that "The data are based on claims that the hospital or facility submitted to CMS. The hospital or facility has reported discrepancies in their claims data." Hospital CEOs can request that Leapfrog use the measure score that is accompanied by the footnote. Written requests must be received prior to the close of the Safety Grade Review Period. If written requests are not received by the close of the Review Period, the measure will not be used to calculate the Hospital Safety Grade.

For hospitals that submit a Leapfrog Hospital Survey by the Data Snapshot Date, the CEO, Primary Survey Contact, and Secondary Survey Contact will be notified at the email addresses included in the Hospital's Survey Profile. For hospitals that do not submit a Leapfrog Hospital Survey by the Data Snapshot Date, the CEO will be contacted by certified letter.

HOW HOSPITALS CAN REVIEW CMS DATA PRIOR TO THE DATA SNAPSHOT DATE

CMS administers several hospital-based reporting and payment programs including the Inpatient Quality Reporting Program, HAC Reduction Program, and Value-based Purchasing Program. Several measures collected and calculated by CMS via its various hospital-based programs are used in the Leapfrog Hospital Safety Grade. CMS provides hospitals with a 30-day preview period before publishing measure scores on the Data.Medicare.Gov website and the Data.CMS.Gov website. More information is available at <https://qualitynet.org>.

HOSPITAL SAFETY GRADE

HOW TO PARTICIPATE IN THE LEAPFROG HOSPITAL SURVEY

If a hospital did **not** complete a 2024 Leapfrog Hospital Survey by August 31, Survey Results were not used to calculate the fall 2024 Leapfrog Hospital Safety Grade. Hospitals that would like Survey Results included in the spring 2025 Hospital Safety Grade must submit a 2024 Leapfrog Hospital Survey (including the CPOE Evaluation) by November 30, 2024. Hospitals will be able to review their publicly reported Survey Results in December and respond to any issues identified by Leapfrog's Extensive Monthly Data Verification before the Data Snapshot Date for the spring 2025 Safety Grade of January 31. More information is available at <https://leapfroggroup.org/survey>.

LEAPFROG HELP DESK

If you have any questions regarding the scoring methodology, please contact the Help Desk at <https://leapfroghelpdesk.zendesk.com>.

Three hospitals in Florida have recently earned concerning "F" grades for patient safety, according to the latest Leapfrog Hospital Safety Grades.

Getty Images

Recent evaluations by the Leapfrog Group gave alarming "F" grades to three Florida hospitals, citing concerns in infection control, staff communication, and error prevention. These findings highlight serious issues with patient safety and care quality, helping patients make more informed healthcare decisions.

Delray Medical Center - Delray Beach, FL

Delray Medical Center - Google Maps - 5352 Linton Boulevard Delray Beach, FL

Delray Medical Center performs below average in preventing and managing blood infections, surgical site infections after colon surgery, and sepsis following surgery. Patients at the facility are at higher risk for these serious infections, which can lead to prolonged recovery, complications, organ failure, and even death if not promptly treated. The hospital also struggles with blood leakage during surgery, which can result in clot formation or ongoing internal bleeding, leading to severe organ damage or death. Additionally, the center faces challenges with preventing dangerous blood clots, which can travel to the lungs and cause chest pain, unconsciousness, or death. These issues highlight the need for significant improvements in infection control, patient care, and safety protocols.

Worse Than Average Better Than Average

Infection Safety Ratings - Leapfrog - Delray Medical Center

Read More: Davenport Woman Reports Uber Eats Driver Spits on Her, Steals

Delray Medical Center received the lowest scores in key areas of error prevention and staff performance. It struggles with electronic medication orders, safe medication administration, and handwashing protocols. Communication about medications, discharge instructions, and **coordination among staff is poor**. The hospital lacks specialized ICU doctors and has issues with staff responsiveness.

Good Samaritan Medical Center - West Palm Beach, FL

Good Samaritan Medical Center - Google Maps - 1309 N. Flagler Drive West Palm Beach, FL

Good Samaritan Medical Center has been found to perform worse than average in several key areas, including infection control and patient safety. The hospital struggles with preventing infections in the blood, urinary tract, and surgical site infections after colon surgery, putting patients at greater risk for complications, prolonged recovery, and **potentially life-threatening conditions**. In addition, issues such as dangerous blood clots, surgical wounds splitting open, blood leakage, and serious breathing problems further contribute to poor patient outcomes. The hospital also faces challenges with harmful events, such as patient falls and injuries.

Good Samaritan Medical Center scored poorly in error prevention and staff performance. It struggles with ensuring doctors use electronic medication orders, administer medications safely, and follow handwashing protocols. Communication with patients about medications and discharge instructions is lacking, as is coordination among doctors, nurses, and staff. The hospital also faces challenges with specialized ICU care and staff responsiveness, **all affecting care quality**.

Palm Beach Gardens Medical Center - Palm Beach Gardens, FL

Palm Beach Gardens Medical Center - Google Maps - 3360 Burns Road Palm Beach Gardens, FL

Palm Beach Gardens Medical Center has been found to perform worse than average in several key areas, including infection control, patient safety, and preventing harmful events. **Patients are at higher risk for serious infections**, such as those in the blood, urinary tract, and surgical sites after colon surgery, which can lead to complications, prolonged recovery, and even death if not properly managed. The hospital also struggles with preventing dangerous blood clots, surgical wound splits, blood leakage, and breathing problems, all of which contribute to poor patient outcomes.

Practice To Prevent Errors Ratings - Leapfrog - Palm Beach Gardens Medical Center

Palm Beach Gardens Medical Center performs poorly in communication and error prevention, with low scores in nearly all related areas. **Coordination among doctors, nurses, and staff is lacking**, causing issues with medication orders, discharge instructions, and patient safety. The hospital also struggles with electronic medication orders, safe medication administration, and handwashing protocols. The absence of specialized ICU doctors and unresponsive staff worsen these issues.

Getty Images

A Wake-Up Call for Patient Safety

The Leapfrog Group's evaluations highlight the critical need for robust safety protocols in hospitals. All three facilities must urgently address these deficiencies to safeguard the health and well-being of their patients.

LOOK: THE BIGGEST SCAMS TODAY AND HOW YOU CAN PROTECT YOURSELF FROM THEM

Using data from the **BBB Scam Tracker Annual Risk Report**, Stacker identified the most common and costly types of scams in 2022.

GaudiLab // Shutterstock

#27. Charity (tie)

- BBB risk index: 0.6
- Share of total scams reported: 0.5%
- Share of scams that reported a monetary loss: 20.0%
- Median reported loss: \$100

Charity scams come from an organization claiming to be taking donations to help a specific cause. You donate the money only to find out the charity or cause never really existed or that the charity grossly misrepresented how much of the money was actually going to the cause. These scams can be hard to identify as many scammers go to great lengths to create social media accounts for the charity or cause and even impersonate victims.

In October 2017, a couple created a GoFundMe page for a homeless veteran and concocted a heartwarming, but false story that resulted in more than 14,000 people donating more than \$400,000. To keep yourself safe, be sure to vet charities before donating using something like the BBB Wise Giving Alliance.

fizkes // Shutterstock

#27. Tax collection (tie)

- BBB risk index: 0.6
- Share of total scams reported: 0.2%
- Share of scams that reported a monetary loss: 19.1%
- Median reported loss: \$236

Tax scams are one of the oldest scams to date and show no signs of slowing down. A fake IRS agent may contact you claiming that you owe taxes to be paid immediately by prepaid debit card or wire transfer with threats of arrest and hefty fines or contacting you with claims that they are sending out refunds but need your personal information to do so.

In one scenario, for which the IRS has already sent several warnings, a scammer will use your Social Security number to file a tax return in your name and then claim the refund. The biggest red flag in this scam is being pressured to act quickly. In actuality, the IRS will give you the chance to ask questions and appeal what you owe while never demanding payment over the phone or requiring that you use a non-refundable form of payment. To avoid this scam, make sure to pay your taxes in full each year and file your return as early as possible.

GaudiLab // Shutterstock

#26. Yellow Pages/directories

- BBB risk index: 0.8
- Share of total scams reported: 0.1%
- Share of scams that reported a monetary loss: 29.4%
- Median reported loss: \$550

The Yellow Pages and other similar directories have decreased in popularity since the rise of the internet, but scammers are still benefiting from them. Scammers contact a company claiming to represent a directory and request basic information—address, phone number, email, etc.—before prompting the employee to confirm the listing. Later, the scammed company will receive an invoice for a few hundred dollars, and if they call to complain, the scammer will reply that the employee verbally confirmed placement in their directory and agreed to the cost.

These scams are always done over the phone making them hard to identify. But, easy ways to protect yourself and your company include educating staff and training them to ask suspicious callers questions, researching the company the caller claims to represent, asking specifically about the terms and conditions, and having a clear process in place for inspecting invoices.

DimaEerini // Shutterstock

#24. COVID-19 (tie)

- BBB risk index: 2.7
- Share of total scams reported: 0.8%
- Share of scams that reported a monetary loss: 14.8%
- Median reported loss: \$400

There are two types of COVID-19-related scams. The first is when folks obtain financial and insurance information from individuals in exchange for (what should be free) tests and vaccinations. The other involves scammers capitalizing on the increase in online shopping, stealing money or banking information from individuals through peer-to-peer payment apps, like Venmo or CashApp, under the guise of accepted virtual payment options.

To protect yourself from these scams, never give personal information to unvetted agencies or over the phone, e-mail, or text. Additionally, never use P2P payment options when buying from an unknown vendor, stick to vetted checkout processes instead.

PeopleImages.com - Yuri A // Shutterstock

#24. Health care (including Medicaid and Medicare) (tie)

- BBB risk index: 2.7
- Share of total scams reported: 1.4%
- Share of scams that reported a monetary loss: 12.9%
- Median reported loss: \$250

Health care scams come in many forms, but all involve someone either wanting your personal information for identity theft—under the guise of updating your insurance—or attempting to use your insurance to submit fraudulent medical charges. Most versions also include robocalls, texts, or emails from someone claiming to be a government official wanting your information.

Never share your personal information with someone who contacts you without your request. You should instead call a trusted number from your healthcare provider to verify the legitimacy of the request.

You may also like: 15 cars that depreciated the most last year

Eugenio Marongiu // Shutterstock

#23. Moving

- BBB risk index: 3.7
- Share of total scams reported: 0.9%
- Share of scams that reported a monetary loss: 76.0%
- Median reported loss: \$90

Moving can be an incredibly stressful experience, and finding out you've been scammed can make it infinitely worse. The most popular scam includes getting a quote from a moving company and sending a deposit, only to have the movers never show up. Another scam includes companies quoting you a rate based on item weight and then, on moving day, informing you your belongings are much heavier than projected and that the price per additional pound will be double the original quote. Moving companies can also scam you by never delivering your items, meaning either your stuff is gone forever or you have to pay a hefty "ransom fee" to return your items.

The best ways to avoid these scams are heavily researching to ensure the company's legitimacy, keeping an inventory of your belongings, getting everything in writing, and never sending a full payment in advance of the move.

fizkes // Shutterstock

#21. Family/friend emergency (tie)

- BBB risk index: 4.5
- Share of total scams reported: 0.4%
- Share of scams that reported a monetary loss: 26.1%
- Median reported loss: \$800

Family/friend emergency scams prey on your love for your nearest and dearest and your willingness to do whatever it takes to ensure their safety and happiness. Scammers will contact you, claiming to be someone you know in a dire situation and need money. Scammers will also scour social media accounts learning minute details—like nicknames and travel plans—to legitimize their stories.

Resist the urge to act immediately and call your friend or family member directly. If you can't reach them, speak to others who may know of their whereabouts. Double checking these stories is the only surefire way to avoid this scam.

Cast Of Thousands // Shutterstock

#21. Utility (tie)

- BBB risk index: 4.5
- Share of total scams reported: 1.2%
- Share of scams that reported a monetary loss: 12.3%
- Median reported loss: \$500

Utility scams are seasonal, often happening in the summer and winter when people depend on air conditioning or heat. Scammers pose as water, electric, or gas company representatives and contact you, threatening service deactivation if a certain fee or bill is not paid immediately.

As noted by the BBB, the biggest red flag for this scam is when a company requests you pay with a prepaid debit card or wire transfer. A legitimate utility company will always accept a check or credit card payment. Never allow a utility worker into your home unless you have a pre-scheduled appointment, and always call customer service to verify any requested payments.

Canva

#20. Foreign money exchange

- BBB risk index: 5.1
- Share of total scams reported: 0.1%
- Share of scams that reported a monetary loss: 27.8%
- Median reported loss: \$3,724

Foreign money exchange is a scam being phased out as most millennials are aware of it and on guard against it. The most popular version begins with a fake Nigerian prince or a wealthy businessman who will spin a sad story, over email, about how they have had to flee Nigeria but have left their money and valuables behind. The scammer pleads for your help to retrieve their belongings and money, and in return, promises to award you a few of their millions. What follows are the additional fees, bribes, taxes, and legal costs after the initial bank transfer you agreed to—all of which you will be asked to pay upfront.

The easiest ways to avoid this scam are by never sending money to a person you only know via email, being wary of strangers offering you large sums of money, and always being suspicious of transactions that involve additional and hidden fees.

fizkes // Shutterstock

#19. Credit card

- BBB risk index: 5.6
- Share of total scams reported: 1.8%
- Share of scams that reported a monetary loss: 38.0%
- Median reported loss: \$139

Credit card scams are very similar to identity theft scams and often share the same end goal: to make unauthorized transactions or steal your identity. Scammers will contact you, claiming to be your bank or credit card company, and ask you to verify your account information. Occasionally, the scam will be done over an email requesting you click a link to confirm your information, but instead, the link downloads malware to your device.

To entice you to give your information, these scammers often offer a better interest rate, inform you that they need to send you a new card as your old one has been compromised, or tell you that they need to verify a charge.

In order to avoid this, consider how your bank or credit card company usually contacts you and check directly with your bank or credit card company using a trusted customer service number to verify the request or offer.

Carve

#18. Debt collection

- BBB risk index: 6.1
- Share of total scams reported: 3.0%
- Share of scams that reported a monetary loss: 7.8%
- Median reported loss: \$450

Scammers running **debt-collection scams** are particularly scary because of how persistent they can be. Scammers will call claiming to work for a debt collection agency or a government office and need to collect a debt you owe immediately. They may threaten you with consequences if you refuse—wage garnishment, arrest, court appearances, etc. If that fails, they will continue contacting you until you give in.

Stay on top of your debts and track what you owe and to whom. In the United States and Canada, debt collectors must notify you of your debt in writing—a "validation notice." They are not legitimate if a company can't or won't provide this.

DenPhotos // Shutterstock

#17. Identity theft

- BBB risk index: 6.2
- Share of total scams reported: 1.9%
- Share of scams that reported a monetary loss: 19.8%
- Median reported loss: \$283

In 2017 alone, 16.7 million individuals were impacted by identity theft, and more than \$16.8 billion dollars were stolen. With the right information, scammers can steal and use your identity to open a line of credit in your name, take money out of your bank accounts, or obtain services that they never pay for—to name a few.

Identity theft can be hard to uncover, as scammers often go to great lengths to keep you unaware such as ensuring all bills and statements are sent to an alternative address. Make sure to regularly check your accounts for unexplained withdrawals and check your credit score often to ensure no unauthorized accounts have been opened in your name. You should also carefully guard your personal information—keeping all personal documents in a secure location and never giving out information to unsolicited callers.

Tero Vesalainen // Shutterstock

#16. Sweepstakes, lottery, and prizes

- BBB risk index: 7.2
- Share of total scams reported: 4.5%
- Share of scams that reported a monetary loss: 13.3%
- Median reported loss: \$200

If you haven't entered a contest, sweepstakes, or lottery, you are not eligible to win its prize. An email or phone call alerting you that you have won that prize and can collect it at any time after paying taxes and fees via a prepaid debit card or wire transfer is most definitely a scam. The same goes for a foreign lottery letter telling you you've won the jackpot. In the United States and Canada, citizens can't enter foreign lotteries by phone or mail—meaning you would have had to visit the country to enter.

Keeping track of any contests, sweepstakes, or lotteries you do enter is the best way to avoid falling prey to this scam. Remember that a legitimate sweepstakes company will never ask you to pay upfront fees to claim a prize.

Blue Planet Studio // Shutterstock

#15. Counterfeit product

- BBB risk index: 12.3
- Share of total scams reported: 3.5%

- Share of scams that reported a monetary loss: 66.7%
- Median reported loss: \$90

For a consumer who's been lusting over a \$1,300 handbag for months, finding the same bag on a different retailer's website for only \$700 may seem like a dream come true. The reality is often far from dreamy as this handbag hopeful probably just fell prey to a counterfeit product scam.

Counterfeit goods mimic designer goods right down to the trademarked logo but are made with inferior materials and workmanship and are sold online—sometimes through reputable sites, in flea markets, by street vendors, and in traditional retail stores for majorly reduced prices. Avoid sketchy retailers, choose to stick to the source or authorized sellers, and be wary of too-good-to-be-true prices.

WOVE LOVE // Shutterstock

#14. Romance

- BBB risk index: 12.5
- Share of total scams reported: 0.6%
- Share of scams that reported a monetary loss: 36.6%
- Median reported loss: \$900

Romance scams have increased as online dating and social media apps make it easy to have an entire relationship with someone you've never met. The scams essentially all work the same way: Someone will make a fake online profile on a dating or social media site to connect with you, and after chatting and exchanging pictures, will offer some excuse as to why they cannot meet in person—they're in the military, visiting family, working overseas, etc.

Once they sense an emotional connection, the scammer will make their move asking you for money perhaps to come and visit or for an emergency. After you've sent the money, they vanish from your life altogether, leaving behind the fake profile to strike again from a new one. Keep an eye out for red flags like the relationship moving more quickly than normal, excessive talk about trust, a refusal to meet you in person, too many "hard luck" stories, and language that doesn't seem to match up with their claims.

mapo_japan // Shutterstock

#13. Rental

- BBB risk index: 13.4
- Share of total scams reported: 0.9%
- Share of scams that reported a monetary loss: 49.5%
- Median reported loss: \$504

Especially for those in major cities where the rental market is tough, finding a new place to live can be difficult. In an effort to make the exhausting process easier, many skimp on their research and rush into agreements to have the taxing process over with. Scammers prey on these situations, luring you in with online ads of beautiful listings at low prices before telling you that time is short, others are interested, and immediate action is required to secure the listing.

After paying a hefty security deposit, the first and last month's rent, and an agent's fee, you discover the property is unavailable and maybe never even existed. ApartmentList reported that 43.1% of renters have encountered a fraudulent listing, and 5.2 million renters have lost money because of rental scams. Be wary of rentals that seem too good to be true and insist on seeing the listing in person before sending any money.

Corbis

#12. Credit repair/debt relief

- BBB risk index: 14
- Share of total scams reported: 1.2%
- Share of scams that reported a monetary loss: 32.7%
- Median reported loss: \$600

Scammers will contact you promising a specific credit score or a reduction or total elimination of your debt as long as you pay an upfront fee. You pay the fee, and nothing changes except that you are now out money that you could have put towards the debt you owe. Never believe in guarantees and always avoid advance fees. In the United States, credit repair and debt relief companies can only collect money after performing the promised services.

NicoE Nino // Shutterstock

#11. Phishing

- BBB risk index: 17.6
- Share of total scams reported: 11.9%
- Share of scams that reported a monetary loss: 9.30%
- Median reported loss: \$270

Phishing scams can be the hardest to identify as they come in such a wide variety of forms. The most common are emails either claiming you have won a prize and need to claim it or owe something and threatening consequences if unpaid. Sometimes these emails include a PDF, either linked or as an attachment, which downloads malware to your computer and steals your personal information.

Keep yourself safe by never opening anything from an unrecognized email address and being wary of emails that contain only the most general information—your name is excluded from the email, or the last four digits are absent from the credit card on which they are claiming payment is due.

Tero Veselainen // Shutterstock

#10. Travel and vacation

- BBB risk index: 20.3
- Share of total scams reported: 0.9%
- Share of scams that reported a monetary loss: 56.5%
- Median reported loss: \$700

One of the most common travel and vacation scams is similar to a rental scam. A con artist will post a listing for a vacation rental that either doesn't exist or doesn't look as pictured, pressure you into acting quickly, and then ask you to submit a deposit before vanishing into the night with your money (and the beach house of your dreams).

Another common version preys on those looking to sell their timeshares. A real estate broker or agent, who claims to specialize in timeshare resales, will call claiming to have dozens of potential buyers, and offer to expedite the selling process if only you'll pay a small upfront fee. Talk to the owner of the vacation home you're looking to rent, check public records and online reviews to make sure the location matches the description, and never pay any kind of upfront fees via prepaid debit cards or wire transfers.

Pheeings media // Shutterstock

#9. Tech support

- BBB risk index: 22
- Share of total scams reported: 3.1%

- Share of scams that reported a monetary loss: 24.3%
- Median reported loss: \$500

For many of us, there would be nothing worse than losing all of the data on our computers or having them rendered useless by viruses. Those running **tech support scams** know this and have invented clever ways to steal your money by preying on this fear. Posing as tech support staff from well-known computer companies—Dell, Norton, or Microsoft—scammers will call informing you that your computer is infected, or a pop-up will appear alerting you that something is wrong and giving you a number to call.

When you call, the scammer will offer to fix the problem if you pay a fee. They may even ask for remote access to fix the problem and then install malware to steal your personal information. Never grant access to your computer, know that legitimate tech companies would not call out of the blue, and shut down your computer when a suspicious pop-up appears.

Ground Picture // Shutterstock

#8. Government grant

- BBB risk index: 24.8
- Share of total scams reported: 2.2%
- Share of scams that reported a monetary loss: 19.5%
- Median reported loss: \$1,000

The government is not in the business of offering free money to random people "just because." Getting a government grant is a long, involved process and is only initiated when you take the first step. Anyone reaching out to you telling you otherwise—perhaps with claims that you have been awarded a grant you won't have to repay as long as you pay a few small upfront fees—may be trying to pull a **government grant scam** over on you.

There are hundreds of fake "look alike" agencies out there, so always double check any grant agency contacting you against the **only official list** of all U.S. federal grant-making agencies.

fizkes // Shutterstock

#7. Advance fee loan

- BBB risk index: 25.9
- Share of total scams reported: 1.8%
- Share of scams that reported a monetary loss: 40.6%
- Median reported loss: \$609

Many scams prey on financially unstable people, and advance fee loan scams are no exception. In this scam, a loan broker will promise you a substantial loan, regardless of your credit history or score, after you pay an upfront fee or "insurance." Of course, as soon as you do, the loan broker and all the money you promised are gone.

While various fees are associated with loans, they are always communicated clearly and taken from the money you are being loaned. Real lenders will never guarantee a loan before checking your credit history and will never accept strange fee payment forms like gift cards, prepaid debit cards, or wire transfers.

Phee ings media // Shutterstock

#6. Fake check/money order

- BBB risk index: 27.1
- Share of total scams reported: 2.1%
- Share of scams that reported a monetary loss: 14.8%
- Median reported loss: \$1,475

Fake check and money order scams can be hard to peg down as con artists use various stories and situations to steal your money. Often you will receive a check worth far more than what was expected. A scammer will then ask you to deposit the check and wire back the difference saving them the trouble of canceling that check and sending over another. Forged checks often take weeks to be uncovered, and by the time the check bounces, the extra money you thought you had, plus the difference you wired back to the scammer, will be gone.

Always be aware of overpayments, especially gross overpayments. If you receive a much larger check than you were expecting, send it back; otherwise, you may be on the hook for funds used against the amount.

wutzkohphoto // Shutterstock

#5. Investment

- BBB risk index: 29.9
- Share of total scams reported: 0.8%
- Share of scams that reported a monetary loss: 56.9%
- Median reported loss: \$1,100

Con artists put a lot of effort into their scams to make them convincing; investment scams are the best example. In the most basic version of this scam, you'll be convinced to invest in a project, company, or loan, but when you try to withdraw your money, find what you invested in never really existed. Another common investment scam is a Ponzi scheme; think Bernie Madoff's Bernard L. Madoff Investment Securities.

Educate yourself about investments and industry regulations before getting involved with a project, and keep your eyes peeled for too-good-to-be-true buzzwords.

Dusan Petkovic // Shutterstock

#4. Home improvement

- BBB risk index: 45.2
- Share of total scams reported: 1.4%
- Share of scams that reported a monetary loss: 59.1%
- Median reported loss: \$955

One of the few in-person scams on this list is the **home improvement scam**, which starts with a knock on your door and a contractor offering services at a below-average price, often claiming they're finishing another project in the neighborhood and can squeeze you in if you act now. They will then either ask for a deposit and walk away with it, find dozens of "additional issues" after they've begun work that you'll need to pay for, or coax you into signing away your insurance payment.

Always check a contractor's references and reviews before allowing them to start work, be wary of huge upfront costs and high-pressure deals, insist on having a written contract before work begins, and ask to see a contractor's business license, permits, and other official documents validating their legitimacy.

You may also like: [Marijuana violations are taking truck drivers off the road, adding more supply chain disruptions](#)

PaeSAG // Shutterstock

#3. Employment

- BBB risk index: 63
- Share of total scams reported: 7.8%

- Share of scams that reported a monetary loss: 15.1%
- Median reported loss: \$900

Employment scams happen when con artists pose as legitimate companies recruiting or hiring. After receiving your application, they'll hire you almost immediately, usually without a proper interview, and request your banking information to set you up for a direct deposit or charge you for training.

Keep in mind that some jobs—those without special training, licensing, or educational requirements like secret shoppers and customer service reps—are more susceptible to this scam than others. Be aware of any out-of-the-ordinary hiring procedures, like being offered a job without an interview.

Prostock-studio // Shutterstock

#2. Cryptocurrency

- BBB risk index: 90.6
- Share of total scams reported: 1.9%
- Share of scams that reported a monetary loss: 66.2%
- Median reported loss: \$1,200

The average person doesn't have a solid understanding of what, exactly, cryptocurrency is or how it works, which makes it easy for scammers to prey on them. According to the FTC, cryptocurrency scams run the gamut from folks impersonating romantic interests and established businesses who demand payment in cryptocurrency to so-called investment managers promising to grow your wealth at an unbelievable rate.

Keep an eye out for investment managers or businesses who reach out to you unprompted, returns that seem too good to be true, and investment opportunities that don't include details or explanations.

Bigc Studio // Shutterstock

#1. Online purchase

- BBB risk index: 167.4
- Share of total scams reported: 37.4%
- Share of scams that reported a monetary loss: 74.9%
- Median reported loss: \$101

Online purchase scams often happen on direct seller-to-buyer sites like eBay and Craigslist. If you're the seller in this scam, you might agree to sell your item outside the site's routine checkout process and opt to receive payment by cashier's check or money order only to have the buyer run a fake check/money order scam.

If you're the buyer, you'll purchase an item or service only to never receive what was ordered and paid for. To keep yourself secure, only use websites and online marketplaces that offer protection to buyers and sellers, and never agree to exchanges outside the usual checkout process.

Goal	Benchmark Indicators
	2031: 30%
	Sept 2025: Establish a separate cash reserve fund with board-approved policies for use and investment: reserve funds @ \$200,000 2028: Reserve funds @ \$1 million 2031: Reserve funds @ \$2 million
<i>Expand the Judie Burrows Education Institute to educate stakeholders</i>	Sept 2025: Increase participation in educational programs 2028: Compared to 2025, increase by 20% 2031: Compared to 2028, increase by 20%
<i>Increase investment in policy advocacy to advance Leapfrog-specific and general priorities in Federal, state, and local policy and regulations</i>	Sept 2025: \$50K direct/indirect resource dedication 2028: 1 FTE dedicated 2031: 2 FTEs / department

LEAPFROG LONG RANGE STRATEGIC INTENT FY2026-2032 – Board Approved December 2024**OBJECTIVE 2 - Drive ever-higher standards for patient safety and publicly rate acute care facilities on achievement of those standards**

Goal	Proposed Metric
<i>Continue setting high standards, which are evidence-based and expertly derived, to make health care safer for everyone</i>	Sept 2025: % of hospitals and ASCs showing improvement over the past 3 years in a selection of Leapfrog measures including outcomes and structural measures (i.e., infection rates, C-sections, Nurse Staffing and Skill Mix, Informed Consent, Health equity, etc.) 2028: 10% improvement over above 2031: 10% improvement over above
<i>Foster the wise use of technology in a dynamically changing environment</i>	Sept 2025: Partner with experts to identify measures and develop evidence-based standards for best practices for patient safety that account for and make use of the rapid advancement of technology and AI 2028: At least 1 measure added to Hospital Survey 2031: At least 1 measure publicly reporting; 10% of hospitals achieving the standard
<i>Reduce health care inequities by evangelizing standards impacting all communities</i>	Sept 2025: release report highlighting inequities to set 3/6 year targets 2028: XX 2031: XX
<i>Support innovative measure development leveraging new data sources</i>	Sept 2025: Implement two new ED Boarding measures on Hospital Survey 2028: Publicly report two ED measures, explore additional measures of ED safety and quality 2031: Add additional measures of ED safety and quality to the Hospital Survey and/or advance publicly reported measures into the Safety Grade and VBP Program
<i>Increase participation in Leapfrog's Hospital and ASC Surveys</i>	HOSPITALS #s and % of beds— Sept 2025: 2433, 78% of inpatient beds 2028: 85% of inpatient beds 2031: 90% of inpatient beds ASC Sept 2025: 150 ASCs submitting, 2.4% of ASCs registered with CMS 2028: 20% of ASCs 2031: 50%
<i>Advocate for increased mandated reporting and public reporting, so that Leapfrog can grade more acute care settings, while considering condition-specific reporting when appropriate</i>	

OBJECTIVE 3 - Build communities that achieve the mission

LEAPFROG LONG RANGE STRATEGIC INTENT FY2026-2032 – Board Approved December 2024

Goal	Proposed Metric
<i>The General Public: Create communication strategies that make the Hospital Safety Grade and Leapfrog itself household names</i>	Sept 2025: X# annual Website Visits (all Leapfrog owned sites)(LeapfrogGroup.org, HospitalSafetyGrade.org, & Ratings.LeapfrogGroup.org) 2028: Compared to 2025, increase by 30%. 2031: Compared to 2025, increase by 100%.
<i>Patients and Family Caregivers: Enable patients and family caregivers to use transparent public information to choose the safest, highest quality care, with an emphasis on areas of care that resonate with consumers (patients can choose, costs vary)</i>	Sept 2025: Participation in educational programs at X# 2028: Participation in educational programs at Y# 2031: Participation in educational programs at Z#
Patient Activists: Identify common priorities and feature leaders in our public outreach	
Regional Leaders: Build a strong network of regional leaders that engage employers and health care facilities in their markets to maximize participation in Leapfrog's ratings program and to use the data for payment and public reporting	Sept 2025: Coverage by regional leaders of X% of states 2028: improvement% of states 2031: improvement% of states
Purchasers/Employers: Enable purchasers and their contractors to tie Leapfrog ratings to payment decisions	Sept 2025: Engage purchasers and influencers around using Leapfrog data (i.e., tie ratings to payment decisions for their employee population, leveraging The Hopper) 2028: 5 purchasers use Leapfrog data in decision-making/reporting 2031: 50 purchasers use Leapfrog data in decision-making/reporting
Purchasers' Consultants: Educate brokers on the advantages of using Leapfrog data to inform their approach	Sept 2025: Using The Hopper, begin expanding relationships with consultants 2028: At least 1 broker/consultant using Leapfrog data with purchaser clients 2031: At least 3 broker/consultants using Leapfrog data with purchaser clients
Health Plans: Pressure plans to tie Leapfrog ratings to payment decisions	Sept 2025: 1 of health plans engaged with Leapfrog as partners and/or data users 2028: 4 of health plans engaged with Leapfrog as partners and/or data users 2031: 7 of health plans engaged with Leapfrog as partners and/or data users
Clinicians: Partner with professional associations where our interests align	

LEAPFROG LONG RANGE STRATEGIC INTENT FY2026-2032 – Board Approved December 2024

Goal	Proposed Metric
<u>Vendors/Startups:</u> Partner with and increase donations from vendors of startup solutions that address Leapfrog's patient safety priorities, no matter the care delivery setting (e.g., on-site clinics)	
<u>Regulators/ Policymakers:</u> Work with Federal and state regulators and policymakers to enact laws and regulations that accelerate Leapfrog's effectiveness (e.g., more mandated reporting and public reporting)	
<u>Education:</u> Support efforts to incorporate patient safety in clinical education and certs (physicians, nurses, pharmacists, etc.)	
<u>Media/Opinion Leaders:</u> Raise awareness on critical patient safety and quality issues	Sept 2025: Social Media Engagement Metric, i.e. number of followers, all platforms 2028: Compared to 2025, increase by 30%. 2031: Compared to 2025, increase by 100%.

Tenet hospitals at bottom of local safety grades

December 9, 2024 · by Jane Musgrave

Jupiter Medical Center is the lone local A grade in annual rankings by The Leapfrog Group.

St. Mary's Medical Center is one of five Tenet Healthcare hospitals in Palm Beach County to score a safety rating of D or F in a recent survey. (Photo: Joel Engelhardt/Stet)

Editor's note: *This story has been updated to include comments Tenet provided Stet on Dec. 12, more than two weeks after it was first contacted and two days after the story was published.*

Five of Palm Beach County's largest medical centers — all owned by Tenet Healthcare — received F and D grades from a national nonprofit that rates hospitals across the country for patient safety.

Good Samaritan, Palm Beach Gardens and Delray medical centers received F grades in the fall biannual rating released Nov. 15 by The Leapfrog Group, which uses federal medical reports to rank roughly 3,000 hospitals nationwide.

Two other Tenet hospitals, St. Mary's and West Boca medical centers, received D grades from the group that assesses injuries, infections, and medical and medication errors to spur hospitals to take steps to reduce preventable inpatient deaths.

Jupiter Medical Center was the only hospital in the county to get an A grade. It is the third consecutive time and the fifth since 2020 that the nonprofit hospital was awarded a top score.

Other hospitals rounding out the list:

- JFK Hospital and JFK Hospital North, owned by HCA, received C grades, as did Boca Raton Regional and Bethesda West, which are owned by Baptist Health. Wellington Regional Hospital, owned by Universal Health Services, also got a C.
- Bethesda Hospital East, also owned by Baptist Health, and Palms West, another HCA hospital, received B grades.
- The group doesn't rate government-run hospitals, like the Riviera Beach VA Medical Center and Lakeside Medical Center in Belle Glade, or children's hospitals.

Why it's important? Preventable medical errors, accidents, injuries and infections in hospitals kill roughly 200,000 people a year, making it the third leading cause of death in the country, said Alex Campione, program analyst for Leapfrog.

"It is critical to monitor safety before choosing a hospital," he said.

A 2019 analysis by Johns Hopkins Armstrong Institute for Patient Safety and Quality for Leapfrog found that D and F hospitals carry nearly twice the risk of

death as A hospitals.

“Over 50,000 lives could be saved if all hospitals performed at the level of A graded hospitals,” researchers said.

St. Mary's Medical Center on 45th Street in West Palm Beach. (Photo: Joel Engelhardt/Stet)

What is Tenet saying? In a statement, the Dallas-based hospital giant insisted the grades “aren’t accurate or reflective of our hospitals’ safety environment.”

Andrew Lofholm, a spokesperson for Tenet’s five county hospitals, which operate as the Palm Beach Health Network, said the grades were particularly unfair because the company didn’t participate in a survey Leapfrog distributes as part of the review process.

The surveys, however, “are just one piece of the puzzle,” Campione said. The grades are based on information from the Centers for Medicare and Medicaid Services, he said. “These facilities are also performing poorly in data that is collected and publicly reported,” he said.

The voluntary surveys allow hospitals to offer Leapfrog additional information about efforts to reduce inpatient falls, infections and surgical errors and to detail policies, such as hand-washing and staffing levels, designed to protect patients.

The Tenet health network has completed the surveys in the past and its hospitals got mostly C grades. Lofholm said it didn't participate in Leapfrog's recent survey "given it is not a regulatory or credentialing agency."

"The Palm Beach Health Network's top priority is providing high quality patient care," Lofholm said in the statement. "We take our responsibility to provide the safest possible environment for our patients very seriously, and we are continually implementing improvement initiatives."

The Tenet health network's hospitals were among 20 percent nationwide and the only ones in the county that didn't complete the survey.

What are others saying? Not surprisingly, Jupiter Medical Center, lauded the results.

"This national designation affirms to our community that the care provided by Jupiter Medical Center is the safest possible in Palm Beach County and the Treasure Coast," Dr. Amit Rastogi, hospital president and CEO, said in a statement.

Pamela Rada, a spokesperson for Wellington Regional, said the hospital was "disappointed" by its C grade, which it has gotten consistently since 2021 after receiving B and A grades, respectively, in the fall and spring of 2020.

But, she added, the score doesn't "accurately reflect the high quality of healthcare provided to our patients."

- "The scores are based on historical data, some of which date back a few years," Rada said in a statement. "We have action plans in place that utilize real-time data for continuous quality improvement efforts. These plans include implementing best practices and committee recommendations, along with ongoing employee and medical staff education."

Louis Lochte, a spokesperson for HCA, said its three hospitals in the county take patient safety seriously.

"We recognize the importance of measuring quality and safety in patient care and are working hard to improve in certain areas," he said in an email. "Our physicians, nurses and colleagues are dedicated to providing exceptional care for our patients."

Did you see this article. This is terrible. I've been getting a lot of heat. Dr Goodman had to take a patient to Jupiter they refused to come to us. Wanted us to make a clarifying statement.

Subject: Your request

Dear Sheri,

Unfortunately I came down with Covid last night (my grandchildren are visiting and the baby must have passed it) so I'm out for awhile.

I hope you can wait later in the season for my input on potential younger board members. My Palm Beach Health Committee is sponsoring an event for younger women in February and I'd like to look over that group for prospects. But if you need it now, these are good choices:

Cara Coniglio McClure, (Gail's daughter, but may be St. Mary-focused);
Ted Cooney may be a good choice; he sits on Town Council although his Dad, Dr. John F. Cooney, may be more St. Mary's focused now.

Christina Matthews McFarland is Flagler Matthews grand-daughter; a lovely girl who manages philanthropy and service nicely.

However, it's hard to recruit right now when this story appeared this morning:

This story appeared in the emailed STET blog I get claiming Tenet did not reply to their questions. I wish the communications team would respond in a way that leadership could copy.

 **Tenet gets an F**

St. Mary's Medical Center is one of five Tenet Healthcare hospitals in Palm Beach County to score a safety rating of D or F in a recent survey. (Photo: Joel Engelhardt/Stet)

Five of Palm Beach County's largest medical centers — all owned by Tenet Healthcare — received F and D grades from a national nonprofit that rates hospitals across the country for patient safety.

Good Samaritan, Palm Beach Gardens and Delray medical centers received F grades in the fall biannual rating released Nov. 15 by The Leapfrog Group, which uses federal medical reports to rank roughly 3,000 hospitals nationwide.

Two other Tenet hospitals, St. Mary's and West Boca medical centers, received D grades from the group that assesses injuries, infections, and medical and medication errors to spur hospitals to take steps to reduce preventable inpatient deaths.

Independently owned Jupiter Medical Center was the only hospital in the county to get an A grade.

Why it's important? Preventable medical errors, accidents, injuries and infections in hospitals kill roughly 200,000 people a year, making it the third leading cause of death in the country, said Alex Campione, program analyst for Leapfrog.

What he said: "It is critical to monitor safety before choosing a hospital."

Other hospitals rounding out the list:

- B grades: Baptist Health's Bethesda Hospital East and HCA's Palms West.
- C grades: HCA's JFK and JFK North, Baptist Health's Boca Raton Regional and Bethesda West and Universal Health Services' Wellington Regional.

Of note: Universal Health is building a 300-bed hospital at Interstate 95 and Donald Ross Road in Palm Beach Gardens.

Click here to see what hospital officials had to say about the rankings.

Spoiler alert: Tenet did not reply to Stet's questions.

Hi Patrick, the leapfrog survey is a voluntary survey from a private organization that 20% of hospitals do not participate or submit a response, however they still publish a grade with incomplete information. I am happy to discuss in more detail if you want to call me on my cell. 561-866-2753.

Tenet hospitals at bottom of local safety grades

December 9, 2024

by Jane Musgrave

1.

•

Good Samaritan, Palm Beach Gardens and Delray medical centers received F grades in the fall biannual rating released Nov. 15 by The

Leapfrog Group, which uses federal medical reports to rank roughly 3,000 hospitals nationwide.

Two other Tenet hospitals, St. Mary's and West Boca medical centers, received D grades from the group that assesses injuries, infections, and medical and medication errors to spur hospitals to take steps to reduce preventable inpatient deaths.

Jupiter Medical Center was the only hospital in the county to get an A grade. It is the third consecutive time and the fifth since 2020 that the nonprofit hospital was awarded a top score.

Other hospitals rounding out the list:

- 1. JFK Hospital and JFK Hospital North, owned by HCA, received C grades, as did Boca Raton Regional and Bethesda West, which are owned by Baptist Health. Wellington Regional Hospital, owned by Universal Health Services, also got a C.**
- 2. Bethesda Hospital East, also owned by Baptist Health, and Palms West, another HCA hospital, received B grades.**
- 3. The group doesn't rate government-run hospitals, like the Riviera Beach VA Medical Center and Lakeside Medical Center in Belle Glade, or children's hospitals.**

Why it's important? Preventable medical errors, accidents, injuries and infections in hospitals kill roughly 200,000 people a year, making it the third leading cause of death in the country, said Alex Campione, program analyst for Leapfrog.

"It is critical to monitor safety before choosing a hospital," he said.

A 2019 analysis by Johns Hopkins Armstrong Institute for Patient Safety and Quality for Leapfrog found that D and F hospitals carry nearly twice the risk of death as A hospitals.

"Over 50,000 lives could be saved if all hospitals performed at the level of A graded hospitals," researchers said.

St. Mary's Medical Center on 45th Street in West Palm Beach. (Photo: Joel Engelhardt/Stet)

What is Tenet saying? The Dallas-based hospital giant didn't respond to emails requesting comment.

The three Tenet medical centers in the county, which operate as the Palm Beach Network, are among about 20 percent of hospitals nationwide that didn't respond to a survey Leapfrog distributed to assess patient safety. The networks have responded to the surveys in the past when its hospitals got mostly C grades.

The surveys, however, "are just one piece of the puzzle," Campione said. The grades are based on information from the Centers for Medicare and Medicaid Services, he said. "These facilities are also performing poorly in data that is collected and publicly reported," he said.

The voluntary surveys allow hospitals to offer Leapfrog additional information about efforts to reduce inpatient falls, infections and surgical errors and to detail policies, such as hand-washing and staffing levels, designed to protect patients.

What are others saying? Not surprisingly, Jupiter Medical Center, lauded the results.

“This national designation affirms to our community that the care provided by Jupiter Medical Center is the safest possible in Palm Beach County and the Treasure Coast,” Dr. Amit Rastogi, hospital president and CEO, said in a statement.

Pamela Rada, a spokesperson for Wellington Regional, said the hospital was “disappointed” by its C grade, which it has gotten consistently since 2021 after receiving B and A grades, respectively, in the fall and spring of 2020.

But, she added, the score doesn’t “accurately reflect the high quality of healthcare provided to our patients.”

1. “The scores are based on historical data, some of which date back a few years,” Rada said in a statement. “We have action plans in place that utilize real-time data for continuous quality improvement efforts. These plans include implementing best practices and committee recommendations, along with ongoing employee and medical staff education.”

Louis Lochte, a spokesperson for HCA, said its three hospitals in the county take patient safety seriously.

“We recognize the importance of measuring quality and safety in patient care and are working hard to improve in certain areas,” he said in an email. “Our physicians, nurses and colleagues are dedicated to providing exceptional care for our patients.

LOL, thank you Bruce, I appreciate your clinical leadership as well...

Re Leapfrog, methinks you folks are too critical... their decision to increase the penalty for nonparticipation was a simple business decision, just like our decision not to participate. It's just business, folks!
Their business model, as you know, depends on producing data that add value for health plans and employers... and the data are not valuable if participation is low.

Thank you Patrick- this is very helpful information. I'm copying in CMO Galante as well.

Let me again express my appreciation for all that you have accomplished in your career advancing the cause of measuring quality and safety for our profession. You have been an important thought leader for a long time.

With respect to Leapfrog specifically, I think it is irresponsible and reckless of them to deliver incomplete assessments to the public. Despite that personal sense, I am asking Greg and Brenda to assemble more information on what the resource burden would be if we chose to participate (we had planned to do this for Jan 2025 anyway).

Thank you- I hope you have a wonderful holiday!- Bruce

Subject: RE: Leapfrog Announcements for Hospitals - December 2024

Well, friends, we can now see the consequences of our nonparticipation... a D grade, in the same league with Oroville and Manteca, which is embarrassing for an organization that claims to be high-quality...

<https://www.sacbee.com/news/local/health-and-medicine/article295787714.html>

Although our HAI rates were high (hospital score 1.338 versus average 0.746), and our PSI rates were a bit above average (1.36 versus 1.01), the real killer for us was nonparticipation (15/100 points on safety practices, 0/120 on staffing).

<https://www.hospitalsafetygrade.org/h/university-of-california-davis-medical-center>

<https://www.hospitalsafetygrade.org/table-details/university-of-california-davis-medical-center>

According to Google AI,

◆ AI Overview

Yes, the University of California Davis Medical Center (UC Davis Medical Center) received a D grade for hospital safety from the Leapfrog Group: ⚡

Reason

UC Davis Medical Center received a D grade for issues with staph infection control, sepsis infection prevention after surgery, and patient falls and injuries. ⚡

How the Leapfrog Group rates hospitals

The Leapfrog Group uses a numerical score based on up to 27 measures of patient safety, including rates of infections, injuries, and preventable errors. The numerical score is then converted into a letter grade, with A being the best and F being the worst. ⚡

What the grades mean

The numerical score cut-points for the letter grades are:

- **A:** 3.159 or higher ⚡
- **B:** 2.972 or higher ⚡
- **C:** 2.506 or higher ⚡
- **D:** 2.040 or higher ⚡
- **F:** Less than 2.040 ⚡

The Leapfrog Group is an independent, not-for-profit organization founded by private health care experts and employers. ⚡

Always happy to meet with anyone to discuss Leapfrog's approach (since I serve on their Expert Panel, <https://www.hospitalsafetygrade.org/about-the-grade>) or to facilitate UCDH participation 😊

Patrick,

I have brought this up with Dr. Hall. We are both ambivalent about the value of Leapfrog. And I think that ambivalence tilts even more negative when our lack of participation guarantees a lower grade which they still publish, effectively blackmailing centers to participate.

I coped Dr. Hall. Given our competing priorities and staff shortages, I am not sure we should take this on given short timeline for this year's submission, but Dr. Hall, please weigh in, we can follow your guidance.

Subject: Leapfrog Announcements for Hospitals - May 2024

Informational Updates for Hospitals

[View this email in your browser](#)

2024 Hospital Survey is Open

GET STARTED ON THE 2024 HOSPITAL SURVEY

The 2024 Leapfrog Hospital Survey opened on April 1. Download a hard copy of the Survey and scoring algorithms, request a 1:1 orientation call, and review deadlines on our website at www.leapfroggroup.org/hospital.

CHANGE SUMMARY ISSUED MAY 14

Section 9C Volume of Procedures: Added four CPT Codes to the Outpatient Procedure CPT Code workbook for Adult General Surgery - Lumpectomy or Quadrantectomy of Breast Procedures. Hospitals are not required to make updates to data already collected and/or reported but have the option to include these additional CPT Codes in their volume if they wish. As a reminder, these data are not used in scoring, but volume of procedures are publicly reported.

You can download an updated copy of the Outpatient Procedure CPT Code workbook from the [Survey Dashboard](#). Instructions for downloading the workbook are available on page 297 of the [Survey](#).

Educational Opportunities

MONTHLY SUPPORT AND GUIDANCE FOR HOSPITAL SURVEY PARTICIPATION

The 2024 Leapfrog Hospital Survey Webinar Series, which is held monthly from March to December, is designed for hospitals that would benefit from more regular support and an interactive presentation of Survey materials and information.

Hospitals that join the Webinar Series will have access to:

- **Monthly office hours with Leapfrog's subject matter experts:** 30-minute sessions to get real-time technical assistance, answers to your questions and help staying on top of upcoming deadlines. Staffed by Leapfrog's subject matter experts.
- **Monthly webinars:** Timely and focused presentations on Survey measures and specifications, scoring information, frequently asked questions and public reporting. Each webinar focuses on a specific topic (e.g., nurse staffing and workforce, barcode medication administration, preparing for data verification, etc.) and concludes with a 20-minute open Q&A session.
- **Archive library:** Slides and recordings from each webinar are archived in an online portal that participants can access from March to January.

[Review the 2024 Webinar Series schedule and register now.](#)

In addition to the Webinar Series, Leapfrog offers **free** technical and content-related support to all participating facilities via our electronic [Help Desk](#), which is staffed by dedicated subject matter experts.

Important Dates

JUNE 30 SUBMISSION DEADLINE

The 2024 Leapfrog Hospital Survey Submission Deadline is June 30. Hospitals submitting by June 30 will be able to preview their results on their Hospital Details Page starting July 12 and will have results publicly reported on July 25. Hospitals will also receive a free Competitive Benchmarking Summary Report.

[Review key deadlines.](#)

HELP DESK HOLIDAY SCHEDULE

The Leapfrog Help Desk is staffed from 9:00 a.m. to 5:00 p.m. ET on all regular business days. The Help Desk is not staffed on federal holidays. Please take note of the following upcoming closures.

Staff Training

May 22 - closed

Memorial Day

May 24 - closing at 2 pm ET

May 27 - closed

Juneteenth

June 19 - closed

Independence Day

July 4 - closed

Other Announcements

RECOGNIZED LEADER APPLICATION OPENS JULY 1

Look out for the next round of applications for the Recognized Leader in Caring for People Living with Diabetes program! The application to be a 2025 Recognized Leader opens July 1, 2024, to all hospitals who have submitted a 2024 Leapfrog Hospital Survey. Details on updates to the program will be available in late June. Applications will be open until November 30, 2024, with Recognized Leaders announced in Spring 2025.

A joint effort from The Leapfrog Group and the American Diabetes Association, this first-ever national inpatient diabetes recognition program honors hospitals providing safe and high-quality health care for people living with diabetes, taking steps such as:

- Making it a policy to work with patients to safely self-manage their diabetes medications
- Implementing blood glucose testing and hypoglycemia protocols as well as additional testing and monitoring before and during inpatient surgeries
- Supporting patients with education they need to manage their care, and connecting them with health care providers after they leave the hospital

[Find more information here.](#)

LEARN FROM OTHER LEAPFROG REPORTING HOSPITALS

Earlier this month Leapfrog held a webinar with the Michigan Health Improvement Alliance (MiHIA). MiHIA partnered with The Leapfrog Group and used Leapfrog data to identify hospitals

with sustained highest performance in CLABSI, CAUTI, and Falls/Trauma. Leaders at MiHIA and participants in their consortium shared four best practices based on the shared learnings from a collaboration formed between these high performing hospitals and a team of regional safety and quality experts.

[View the recording here.](#)

[Download a Summary of the Findings here.](#)

SURVEY SUPPORT FOR HEALTH SYSTEMS

Are you responsible for coordinating the Leapfrog Hospital Survey submission for all the hospitals in your health system? Want to make it easier to track submission status, review responses and scored results, and track performance from year to year?

Subscribe to Health System Support and receive all your hospital's 16-digit security codes, Survey responses, and scored Survey Results in an Excel file three times a year: following the June 30 deadline, following August 31 (the deadline for Top Hospital and the Snapshot Date for the fall 2024 Hospital Safety Grade), and following the January 31 year-end deadline.

Subscribers also receive a free registration for Leapfrog's [monthly webinar series.](#)

[Find more information here.](#)

STRENGTHEN YOUR ORGANIZATION'S CRP WITH THE PACT COLLABORATIVE

Communication and Resolution Programs (CRPs) are gaining support and traction on the national stage. Ensure your organization is ready for the changing health care landscape by joining the [PACT Collaborative](#), a groundbreaking learning community supporting the implementation of highly reliable CRPs founded by Ariadne Labs, the Collaborative for Accountability & Improvement, and the Institute for Healthcare Improvement.

[Learn more here.](#)

COME SEE US AT APIC 2024!

The Leapfrog Group will be at booth 638 at the Association for Professionals in Infection Control and Epidemiology (APIC) conference June 5-8. The conference brings together health care professionals, researchers, educators, and industry leaders to connect, collaborate, and shape the future of infection prevention.

[Visit us at APIC.](#)

Panelists from two large healthcare systems will discuss how their organizations have aligned employee experience to patient safety culture. They'll discuss internal research demonstrating a link between the two and the steps each organization took to demonstrate this link in a practical way for front-line leaders. They'll also share how they've used new tools and technology to measure, understand, and drive a culture of safety.

This webinar is a program of the Partners Advisory Committee and is sponsored by Microsoft. While The Leapfrog Group does not endorse the products, services, and/or technology showcased on this webinar, we encourage you to explore these offerings that support Leapfrog's work.

Register Now

Exploring the benefits of standardization of chemicals, surveillance for transmittible infections, staff education, and infection prevention basis that apply to all areas to reduce the risk of infections. Reviewing the methods of cleaning and disinfection throughout healthcare, to include acute care, ambulatory surgical centers, long-term acute care, skill nursing, rehab, and senior facilities. Discussing the role of surveillance and changes in regulatory requirements for prevention of healthcare and community-based infection and the importance of communication between staff and care sites. Explore common themes of patient safety and staff engagement to drive better satisfaction results.

This webinar is a program of the Partners Advisory Committee and is sponsored by Steriliz, LLC. While The Leapfrog Group does not endorse the products, services, and/or technology showcased on this webinar, we encourage you to explore these offerings that support Leapfrog's work.

Yeah I mean I agree with all that. It truly is marketing blackmail. Can't we sue leapfrog?

You don't have to answer that.....

Subject: RE: Responding to patient questions about rankings

Conversations are ongoing about this, and we are reaching out to other UCs to see if we want to take a common approach.

The problem: Participating in Leapfrog surveys is time consuming but does not give us value in terms of insight or driving improvement. The benefit is strictly limited to avoid taking the blackmail-like reputational hits.

I think leadership will cave and we'll start participating again (without any additional resource to do the survey work).

GM

Subject: FW: Responding to patient questions about rankings

Interesting commentary on our LeapFrog standing coming from my outpatient clinic director.

We discussed this all back in April when I first learned all of these things after Dr. Romano suggested we re-invest in it.

This is probably a marketing issue more so than an actual safety issue, but its interesting how we can see the direct effects. Given our current capacity crunch, I don't think the patients lost due to these rankings are significant, but if we ever expect to shift our payor mix more toward an academic hospital and less toward a county hospital, I think we need to be mindful of this.

Happy holidays!

Bobby

Subject: FW: Responding to patient questions about rankings

Hello Surgery Clinic Staff and Providers(BCC'd),

Just incase patients reach out or mention a bad quality report that came from a company called Leapfrog, I wanted to make sure you have the information below.

The recent release from Leapfrog results indicated a low-quality score for UCDH. As a result, unfortunately, we have seen some patients canceling appointments and/or procedures.

Ultimately - UC Davis Medical Center has not participated in the Leapfrog survey for many years. UC Davis Health did not provide Leapfrog with any data, thus resulting in the low ranking for that survey.

From: HS-Ambulatory Care Leadership <HS-AmbulatoryCareLeadership@ucdavis.edu>
Sent: Wednesday, December 18, 2024 11:00 AM
Subject: Responding to patient questions about rankings

Good morning, Ambulatory managers,

At UC Davis Health, we are committed to delivering exceptional care and maintaining the highest standards of patient safety, quality, and outcomes. Recognitions and rankings are an important reflection of our efforts, and we appreciate the value they bring to our community and patients.

The recent release of Leapfrog results indicated a low score for UCDH. As a result, we have seen some patients canceling appointments and/or procedures. To help address patient inquiries regarding the survey, we have included information below about our participation in different hospital rankings and surveys, including the Leapfrog report, in case you should get any questions from patients. Please share and review with your teams.

“I was wondering about the hospital’s rankings and participation in surveys like the recent Leapfrog report.”

- UC Davis Medical Center is consistently recognized as one of the best hospitals in America.
- Influential organizations and publications, such as *U.S. News & World Report*, have ranked us #1 in the Sacramento region.
- There are numerous third-party organizations that compile hospital rankings, including Leapfrog.
- However, due to resource constraints, we are unable to dedicate staff time to participate in and provide data for all available surveys.
- As a result, UC Davis Medical Center has not participated in the Leapfrog survey for many years. UC Davis Health did not provide Leapfrog with any data, thus resulting in the low ranking for that particular survey.
- More information about awards and honors UC Davis Health has received is available on our [website](#).

If you have any additional questions or need further information, please don't hesitate to ask.

2025 Regional Leader Communications Toolkit: Launching Leapfrog Surveys

We are excited to launch the 2025 Leapfrog Surveys in our collective effort to make **giant leaps for patient safety**. Hospitals and ambulatory surgery centers (ASCs) continue to face new and evolving challenges

Thanks to the partnership between Leapfrog and Leapfrog Regional Leaders, we received over 2,400 submissions, representing 80% of hospital beds. The ASC Survey participation lags, but we hope to change that this year by making the case to ASCs and purchasers alike that there is real value in reporting quality data. Consumers and purchasers deserve to compare safety and quality information on hospital outpatient surgical units along with surgery centers, since they perform most of all procedures done in the country. There has never been a more important time for transparency and Leapfrog's role in keeping health care facilities accountable.

The 2025 Communications Toolkit offers you instructions for launching the Leapfrog Hospital Survey and the Leapfrog ASC Survey in your region, focusing on the critical initial communication you carry out to encourage hospital and ASC participation. It is designed to support you at different stages of the process when it is most useful to you. Additional communication materials included in this toolkit are designed to further help you engage the public, including employers, purchasers, hospitals, and ASCs, such as our comprehensive [Common Objections and Frequently Asked Questions About Leapfrog and Its Ratings](#) and the [Regional Leaders Best Practices Toolkit](#). We have outlined the materials in an easy to access manner so you can find what you need.

IX. Common Objections and Frequently Asked Questions about Leapfrog and its Ratings

I. STEP-BY-STEP: HOW TO LAUNCH THE LEAPFROG HOSPITAL SURVEY & LEAPFROG ASC SURVEY IN YOUR MARKET

Please note: In 2025, Leapfrog will manage the Survey invitation letter to ASCs but will provide Regional Leaders with tools and template materials to supplement outreach in your communities.

Regional Leaders are not responsible for sending security code sheets. If a hospital or ASC needs a copy of their security code, they must complete the Security Code Request form available on Leapfrog's website or by contacting the Help Desk.

1. **March 1 – April 30 Get members, hospitals, and ASCs excited about the 2025 Surveys.**

- Include the Survey launch in your newsletter and member communications along with posting content on your social media channels. Think about highlighting interesting questions/issues on the Survey, such as informed consent or billing ethics. You will find everything you need here.
- Consider any new communication channels that might help you reach the ASC community, like local ASC association publications and events.
- Think about how you can involve your employers by having them sign on to your letters or attend meetings you have scheduled with some of your facilities.

2. **Personalize template letters* asking HOSPITALS to participate in both the inpatient and outpatient sections of the Survey. March 1 – April 30**

- Leapfrog provides template letters asking hospitals to participate in the Hospital Survey. You can customize them for your market and add your letterhead.
- Clearly outline how you plan to use the Hospital Survey data and share it with your members.
- Ask as many of your employer and purchaser members as possible to sign your letters. This can significantly increase a facility's likelihood of participation.

3. **Work with Leapfrog to invite ASCs to participate in the Leapfrog ASC Survey. March 1 – April 30**

- Regional Leaders are strongly encouraged to use the mailing list provided by Leapfrog to conduct ongoing outreach to ASCs in your community using provided template letters in the appendix.
- Leapfrog will send initial letters to ASCs on Regional Leader's letterhead with logos and signatures requesting their participation and providing instructions on obtaining a Security Code.
- Ask as many of your employer and purchaser members as possible to sign your letters. This can significantly increase a facility's likelihood of participation.
- If an ASC needs a copy of their security code, they need to complete and submit the Security Code Request form: <http://bit.ly/ASCSecurityCode>.

4. **Send HOSPITAL letters by mail or email no earlier than March 30, but no later than April 30.**

- Notify Robyn Nabi () if you are unable to send letters this year and require Leapfrog's assistance.
- Merge the customized hospital letters and the hospital mailing list to generate individual letters and envelopes for each hospital in the region and address the CEO. **Emails can only be sent to the hospital's CEO if the hospital submitted a 2024 Survey.**
- Notify Robyn Nabi (rnabi@leapfrog-group.org) when you have mailed or emailed the invitations to your hospitals.

- Keep a list of any returned mail and send any address or CEO updates to Robyn Nabi throughout the year.
- **Reminder:** If a hospital needs a copy of their security code, they need to complete and submit the Security Code Request form: <http://bit.ly/HospitalSecurityCode>.

5. Follow up with those who have not responded. May through the end of the year

- Leapfrog keeps track of Hospital Survey responses by region and will report the status to Regional Leaders in regular readout files sent by email and saved on the [Regional Leader section of the Leapfrog website](#). Interim files will be sent beginning in May, and monthly files will be sent the last week of July through February after the first June 30 Submission Deadline.
- Follow up with HOSPITALS that have not submitted a Survey as the June 30 Submission Deadline approaches as well as in the fall leading up to the November 30 Late Submission Deadline.
 - Leapfrog will provide Regional Leaders with a file of participating facilities by state as well as a template letter so that you can follow up with those that have not participated.

6. Thank Survey participants. July, through the end of the year.

- Using the list of Survey participants and the letter template in this document, send hospitals and ASCs thank you letters and share how you plan to use the data.
 - Remind participating facilities that their results will be publicly reported in July.
- Consider hosting recognition events (including virtual events) to thank hospitals and ASCs who participated and recognize performance.

7. Use results released by Leapfrog.

- Be sure to consult the Regional Leader Best Practices Guide for ideas on using Leapfrog results, including:
 - Encourage your members to use Leapfrog for payment policies, tiering, and public reporting. The measures on the Leapfrog Hospital Survey are selected because they are critical for improving health outcomes and reducing costs for purchasers and consumers.
 - Tailor press announcement templates to highlight Survey performance and why it matters to people in your community.

Reminder: [Template letters are available in Section VII of this packet](#)

III. BEST PRACTICES USED BY REGIONAL LEADERS

Below are several ideas that have been successful for other Regional Leaders when encouraging participation that you may want to consider trying in your market.

LAUNCHING THE LEAPFROG SURVEYS IN YOUR COMMUNITY

- **Engage employers** with purchasing power to influence hospital decision-making based on Hospital Survey participation. Discuss with employers the differences in quality of care between facilities from which beneficiaries are seeking care—are these the best choices for the care needed? Ask employers to sign the invitation letters with you; public entities (e.g., school systems, city and local governments) can have great purchasing influence on the provider community because of their size and scope.
- **Distribute a press release** to local media about your efforts to encourage hospital transparency through the Leapfrog Hospital Survey and the Leapfrog ASC Survey.
- **Meet with local media** to discuss how you will work with them to share ongoing efforts and results. Discuss one or more items in the survey that might make a good story, such as the new patient consent standard, billing ethics, medication safety, maternity care, or the new Hospital Survey question on C-section rates by race and ethnicity. Encourage them to call attention to the hospitals and ASCs that decline to respond to your request for Survey participation.
- **Reach out to ASCs in your region** inviting them to participate in the ASC Survey. Leapfrog will send the security code and initial invitation to ASCs, but Regional Leaders are urged to send a second letter introducing your organization to facilities and encouraging their participation on behalf of employers in your region. We recognize it is sometimes difficult to identify the right person at an ASC, but as they continue to hear from you over time and the survey results gain more prominence, they will likely become more responsive. We are playing the long game, and persistence is critical.
- **Include an “Intent to Submit” form** with the Hospital Survey invitation or as a follow-up to an invitation and in an ASC-specific mailing. Immediate feedback has been found to improve the likelihood of Survey submission in some markets. If the facility does not plan to submit a 2025 Survey, ask them to indicate on the form why they’ve chosen to decline your call for transparency and public reporting on their quality and safety practices. Including a list of hospitals in your region that respond to the Survey may be helpful. Consider sending this form online using a tool such as Constant Contact or Survey Monkey to make it easier for CEOs to respond in a timely manner.
- **Meet with the CEO and quality improvement staff from health systems** to discuss the importance of the Leapfrog Hospital Survey. Consider including an employer or purchaser. Commitment from system-level executives to participate in the Survey will often result in all facilities within the system being required to submit a Survey. This will also be a good opportunity to illustrate the value many systems find in being able to compare and benchmark their individual facility’s performance on the Survey metrics, including the opportunity to compare their outpatient facility performance to that of ASCs.

BUILDING RELATIONSHIPS WITH ASCS

Engaging with ASCs and increasing participation in the Leapfrog ASC Survey is a priority for Leapfrog in 2025. Below are some ideas to help you identify ASCs and educate them about Leapfrog’s value. We encourage you to select one or two of these strategies and try them out with five ASCs in your region.

- **Meet with local ASC Associations and ASC Administrators in your region** to discuss the value of participating in the Leapfrog ASC Survey, including public reporting benefits, benchmarking, and comparison to hospital outpatient departments.
- **Reach out to the local business bureaus** to help identify ASCs in your area.
- **Get your member employers involved** by asking them to sign participation letters and by joining you on visits to local ASC facilities.

- **Recognize Top ASCs in your area** through events with employer members or media opportunities to demonstrate the value of participating and encourage other ASCs to participate.

IDEAS FOR ENCOURAGING NON-RESPONDENTS TO THE LEAPFROG SURVEYS

The following are actions that your coalition may want to take with non-responding facilities to urge participation in the Leapfrog Hospital Survey and Leapfrog ASC Survey. **It is strongly encouraged that you and/or your members or board pursue these strategies and familiarize yourself with the Common Objections and FAQs resource. Leapfrog staff are always available to provide follow-up and clarifications to hospitals or ASCs as well.**

- **Make phone contact with facility executive leadership.** You can find hospital CEO names and phone numbers on your roster and ASC executive names on the ASC mailing list.
- **Ask your local health plans to follow-up** with their hospital and ASC contacts and urge participation.
- **Contact individual hospital board members** indicating that the hospital has not yet completed the Survey, particularly board members who are part of your organization or who represent large employers.
- **Phone calls to the hospital board chairperson** by your organization’s CEO or other senior executives.
- **Share with local media** the names of the first hospitals and ASCs to respond and the names of those that are not responding.

REGIONAL LEADER BEST PRACTICES GUIDE

Additionally, Leapfrog has developed a separate comprehensive **Regional Leader Best Practices Guide**. This guide includes several tactics to use Leapfrog data beyond launching the Surveys, including hosting recognition events for top performing facilities and member employee engagement ideas. The guide compiles examples from Regional Leaders that you may want to consider implementing in your market. You can find the guide here - Regional Leader section of the Leapfrog website.

IV. KEY DATES FOR THE 2025 SURVEY CYCLE

FOR REGIONAL LEADERS

March 30 – April 30	Mail or email Hospital Invitation Letters <i>Optional: Mail or email request letter to ASCs</i>
June 30	2025 Submission Deadline
June and July	Acknowledge facilities that met the June 30 Submission Deadline

Monthly beginning in June	Review the Readout File to identify hospitals that have participated Send reminders to non-participants and thank you letters to participating facilities
September	Send a second Survey invitation letter to remind non-participating hospitals of the November 30 Late Submission Deadline
November 30	Late Submission Deadline
December	Acknowledge Leapfrog Top Hospitals and Top ASCs in your community Attend Leapfrog's Annual Meeting and Regional Leader meeting

FOR HOSPITALS & ASCS

April 1	2025 Leapfrog Hospital Survey and Leapfrog ASC Survey open
April & May	<u>Leapfrog Hospital Survey</u> and <u>Leapfrog ASC Survey</u> Town Hall Calls
June 30	2025 Submission Deadline
Monthly beginning in July	Data Review: Facilities have 30 days to submit corrections and/or confirm responses
July 12	Hospital detail page showing results available to hospitals 2025 Survey Results released and posted at https://www.ratings.leapfroggroup.org
August 31	Top Hospital Submission Deadline for hospitals to submit a completed Survey if they would like to be eligible for Top Hospitals Data Snapshot Date for the fall 2025 Leapfrog Hospital Safety Grade
November 30	Late Submission Deadline: No Leapfrog Hospital Survey submissions will be accepted after this date.
December 2025- January 2026	Data review and correction period for previously submitted Surveys

IV. OVERVIEW OF THE 2025 LEAPFROG SURVEYS

To ensure the Leapfrog Hospital Survey and the Leapfrog ASC Survey align with the latest science and the public reporting needs of purchasers and consumers, Leapfrog's research team annually reviews the literature and convenes expert panels. Facilities that

voluntarily complete the Leapfrog Surveys demonstrate their commitment to transparency by providing information purchasers and consumers need to choose the best facility for their care.

Leapfrog Hospital Survey

The Leapfrog Hospital Survey uses national performance measures to evaluate individual hospitals on the safety, quality, and efficiency of inpatient and outpatient care. The 2025Leapfrog Hospital Survey can be found [here](#).

Leapfrog Ambulatory Surgery Center (ASC) Survey

Leapfrog launched the Leapfrog ASC Survey in 2019, expanding our nearly 25-year long experience collecting and publicly reporting safety and quality of hospitals via the Leapfrog Hospital Survey. The Leapfrog ASC Survey uses national performance measures to evaluate individual surgery centers on safety, quality, and efficiency. Below is an overview of the Survey’s main sections and key changes for 2025. The 2025 Leapfrog ASC Survey can be found [here](#).

Important Note: The results of the Leapfrog ASC Survey and Leapfrog Hospital Survey are publicly reported by facility at <https://Ratings.LeapfrogGroup.org>

VI. MATERIALS TO SHARE WITH HOSPITALS AND ASCS

EXPLANATION OF MATERIALS

WHAT IT IS	IDEAS ON HOW TO USE THIS
a. <u>Infographic: Why Hospitals and ASCs Should Submit a Survey</u>	Distribute to hospitals and ASCs with Survey invitation letters and email to your employers and purchasers
b. <u>“Intent to Submit” Form</u>	Send along with letters to keep track of which hospitals plan to participate
c. <u>Leapfrog Hospital Survey Webinar Series</u>	Communicate to hospitals as needed

d. Copy about Leapfrog's System Services

Communicate to hospitals and ASCs as needed

e. Value Resources for ASCs

Share with ASCs to help encourage participation

a. INFOGRAPHIC ON WHY HOSPITALS AND ASCS SHOULD SUBMIT A SURVEY

[Click here](#) to view the infographic, download, and/or print it for distribution.

Why You Should Participate in the Leapfrog Surveys

Thousands of employers and other purchasers across the country ask hospitals and surgery centers to participate in the Leapfrog Hospital Survey and the Leapfrog ASC Survey. They are the only source of nationally reported ratings by facility on safety and quality issues of importance to purchasers and the public. The measures on the Surveys are predicated on the latest science and reviewed and updated annually by top national expert panels to reflect the current evidence base.

By participating in the Surveys, your facility will be able to:

b. "INTENT TO SUBMIT" FORM

Intent to Submit a Leapfrog [Hospital/ASC] Survey for 2025

Please return to [email address].

«CEO»

«Title»

«Hospital_Name»

«Address»

«City», «State» «Zip»

☐

We intend to submit the Leapfrog [Hospital/ASC] Survey for 2025.

Survey Contact Name: _____

Phone Number: _____

E-mail Address: _____

The information will be used to send a reminder about the Survey from [REGIONAL LEADER]

☐

We do not intend to submit the Leapfrog [Hospital/ASC] Survey at this time.

Would you please explain why you do not wish to participate?

[REGIONAL LEADER] represents employers in your market. The Survey is very important to them, and they expressly request your participation. If you would like to discuss your decision via a phone call or web conference, please let us know and we will arrange it for you.

c. Do you have a hospital submitting for the first time? COPY ABOUT THE LEAPFROG HOSPITAL SURVEY WEBINAR SERIES

Are you a hospital submitting to Leapfrog for the first time? Get ahead of the game by registering for the Leapfrog Hospital Survey Webinar Series.

The Leapfrog Hospital Survey Webinar Series is held monthly from March to December. Each one-hour webinar includes a presentation as well as a question-and-answer session. The Webinar Series is designed for hospitals that would benefit from a more interactive presentation of Survey materials and information. Though nothing presented in the Webinar Series differs from the information available in the printed materials or through the free electronic Help Desk, many hospital leaders find the interactive format and opportunity for Q&A helpful.

For an annual fee of \$500 per user, hospitals that join the Webinar Series will have access to:

- Topical monthly presentations that focus on Survey and CPOE Evaluation Tool measures and specifications, scoring information, frequently asked questions, technical assistance, and public reporting
- 20-minute open Q & A sessions
- Presentations by Leapfrog's Expert Panel members
- Library of all slide decks and recordings from March-December
- Monthly office hours with the Leapfrog Help Desk

Registration for the 2025 Webinar Series is now open. Please [click here](#) to register.

d. COPY ABOUT HOSPITAL SYSTEM SERVICES

Many large and small health systems across the country engage all hospitals in their system in completing the Leapfrog Hospital Survey. By securing participation from all facilities, health system leaders can easily benchmark performance, identify high and low performers, and demonstrate their value to employers and purchasers in their community, like this [high performing health system](#). Leapfrog offers several tools to assist health systems in their completion of the Leapfrog Hospital Survey and analysis of results. Visit [Leapfrog's website](#) to learn more and contact the [Help Desk](#) with any questions.

e. ASC VALUE RESOURCES

Why participate in the Leapfrog ASC Survey? Through the Leapfrog ASC Survey, ambulatory surgery centers can benefit from an independent assessment of their quality and safety available to the public. The Survey prominently positions ASCs with employers and purchasers, provides benchmarking opportunities, and galvanizes improvement. Although there are many benchmarking opportunities available, Leapfrog's is the only one that will directly compare your ASC to hospital outpatient departments – at no cost to you.

The resources below highlight why the Leapfrog ASC Survey will provide value to your surgery center:

- **Discounted National Association for Healthcare Quality Training:** ASCs can get a 25% discount on the HQ Concepts in Healthcare Quality and Safety for Frontline Staffs training. Reach out to the Leapfrog Help Desk for details.
- **Becker's ASC Article:** Reporting to the Leapfrog ASC Survey: 4 competitive advantages
 - This article outlines the benefits of participation as told by ASC leaders and employers
- **AORN Podcast Series:** ASCs Today
 - A digestible podcast series with Association of periOperative Registered Nurses (AORN) President Linda Groah and Leapfrog President and CEO Leah Binder discussing nursing leadership, workforce issues, and safety risks. Part 1, Part 2, Part 3.
- **Leapfrog Case Study:** How the Leapfrog ASC Survey Highlights the Importance of Transparency
 - Leapfrog President and CEO Leah Binder interviews members of Proliance Surgeons' Center for Spine and Joint Replacement Surgery in Washington.
- **Leapfrog Case Study:** How the Leapfrog Survey Gives Surgery Centers Credibility Through Accountability
 - Leapfrog President and CEO Leah Binder interviews Coronado Surgery Center and Owner in Nevada.

VIII. CUSTOMIZABLE TEMPLATE LETTERS FOR THE 2025 LEAPFROG SURVEYS

The following are template letters that Regional Leaders can customize and send to hospital and ASC executives. Hospital invitation letters must be sent to each hospital on the roster, including optional relevant enclosures. **As a reminder, Regional Leaders are not responsible for mailing security codes to CEOs in 2025.** Leapfrog is sending invitation letters to ASCs; Regional Leaders are not responsible for this mailing.

The following letters are required for Regional Leaders to send:

- A. For currently submitting hospitals
- B. For hospitals new to the Survey

The following letters are optional, but highly encouraged for Regional Leaders to send:

- C. For system-level executives on the Hospital and ASC Surveys (optional to send)
- D. For ASC Survey to reinforce participation (*strongly encouraged to send*)
- E. Participation reminder (*to be sent in May*)
- F. Thank you for hospital CEOs
- G. Thank you for ASC CEOs
- H. For September: follow-up Survey mailing in high-participation states
- I. For September: follow-up Survey mailing in low-participation states
- J. For currently submitting ASCs
- K. For health plans to send: Hospitals
- L. For health plans to send: ASCs

The following letters can be used to congratulate Leapfrog Top Hospitals, Leapfrog Top ASCs and hospitals that earn an “A” on the Leapfrog Hospital Safety Grade:

- M. Congratulate Leapfrog Top Hospitals
- N. Congratulate Leapfrog Top ASCs
- O. Congratulate “A” Graded Hospitals

Suggestions for using these letters in your market:

- **Make it your own.** Although we provide this template messaging, we strongly encourage Regional Leaders to customize these letters to meet your specific market’s needs by inserting relevant regional statistics and other information that will appeal to local facilities.
- **Don’t forget health system leaders.** You may wish to send a letter to a health system contact in your area. This can be an effective strategy to increase participation in your market. We strongly encourage you to customize the letters per system so they have a clear picture of how reporting to the Surveys can benefit them and understand how you will use their results, as well as to remind them about the ASC Survey and outpatient section of the Hospital Survey.
- **Print on your letterhead.** We suggest printing the letters on your organization’s letterhead or perhaps creating a new letterhead if multiple Regional Leaders are collectively requesting hospital participation in a certain area. Have the letter signed by your CEO or Executive Director. Also consider including the Leapfrog Regional Leader logo.
- **Co-signers help.** Consider having multiple purchasers/payors with lives/enrollees in your region co-sign the letter. The more parties you can get to sign on to this letter, the better. Some coalitions also include a second page that lists all their employer members showing they represent their interests in asking for participation.
- **Cite how you will use Leapfrog data.** Describe to your hospitals how you plan to use the data (such as in a consumer guide) and how payors are planning to use or are currently using Leapfrog’s Survey data (e.g., value-based purchasing program, high performance network determination, consumer directory). Examples are listed in the template letters below.
- **Reminders help.** Leading up to June 30, it’s a good idea to send an email reminder to all facilities that the deadline is approaching and you’re looking forward to their participation by the submission deadline.
- **Prompt more Survey responses with a fall follow-up.** Many Regional Leaders have found tremendous success in sending a second mailing to non-participating facilities in early fall; this can be an effective strategy to increase participation by facilities that missed the June 30 submission deadline but still have time before the November 30 late submission deadline.

TEMPLATE LETTER/EMAIL FOR CURRENTLY SUBMITTING HOSPITALS

[Date]
[Prefix] [First] [Last]
Chief Executive Officer
[Facility Name]
[Street Address]
[City, State, ZIP]
Dear [CEO Name]:

On behalf of [REGIONAL LEADER ORGANIZATION] and our [NUMBER] members including [CONSIDER NAMING A FEW BIG NAMES HERE IF YOU DON'T KNOW THIS HOSPITAL WELL], we are writing to request your participation in the 2025 Leapfrog Hospital Survey, which opens on April 1. We, along with our entire community, appreciate your past participation and look forward to your continued dedication to transparency.

In 2024, more than 2,400 hospitals participated, representing 80% of inpatient beds nationwide. [INSERT STAT SUCH AS PERCENT INCREASE IN HOSPITALS PARTICIPATING IN 2024 SURVEY, OR PERCENTAGE OF HOSPITALS THAT PARTICIPATE LOCALLY].

This year marks **Leapfrog's 25th Anniversary** and the **25th year of the Leapfrog Hospital Survey**—a vital tool for health care transparency. Your participation is essential. For 25 years, hospitals have helped drive safer, higher-quality care through Leapfrog. Let's make this milestone year our strongest yet—thank you for your commitment!

By participating in the Leapfrog Hospital Survey, your hospital can:

1. **Demonstrate your responsiveness to employers in our community who depend on your services**
2. **Benchmark your performance on quality and safety metrics and create a performance improvement plan**
3. **Receive public recognition by [REGIONAL LEADER] for your transparency and performance**
4. **Be eligible for awards programs such as Leapfrog Top Hospital**
5. **Ensure your most up-to-date performance is reflected in your Leapfrog Hospital Safety Grade (if applicable)**
6. **Demonstrate your commitment to quality and safety improvement to our community, including your staff and board**

Leapfrog's public reporting website, ratings.leapfroggroup.org, allows users to search for and compare hospital and ASC ratings to better understand safety and quality across facilities. Purchasers in [REGION] intend to share these results with their employees and use your performance metrics as part of their value strategy.

You may use the same security code you used for previous Surveys. If you need a copy of your security code, please complete and submit Leapfrog's Security Code Request form: <http://bit.ly/HospitalSecurityCode>. Though the deadline to complete the Survey is June 30, you can resubmit your Survey at any time throughout the Survey cycle; publicly reported results are updated monthly. For hospitals that do not meet the deadline, late submissions are accepted through November 30, and until then, incomplete sections are reported as "Declined to Respond."

Visit www.LeapfrogGroup.org/Hospital to begin today. Leapfrog hosts Town Hall Calls to provide background information about the content of the Survey. Register and learn more at <https://www.leapfroggroup.org/survey-materials/town-hall-calls>. Please contact me at [insert lead tel #] if you have any questions about the reporting process and Leapfrog's activity in our region. The Leapfrog Help Desk is available for any technical or content questions about the Survey and can be accessed at <https://leapfroghelpdesk.zendesk.com>.

Sincerely,

[LEAD REGIONAL LEADER]

TEMPLATE LETTER FOR HOSPITALS NEW TO THE SURVEY

[Date]
[Prefix] [First] [Last]

Chief Executive Officer
[Facility Name]
[Street Address]
[City, State, ZIP]

Dear [CEO Name]:

On behalf of [REGIONAL LEADER ORGANIZATION] and our [NUMBER] members including [CONSIDER NAMING A FEW BIG NAMES HERE IF YOU DON'T KNOW THIS HOSPITAL WELL], we are writing to strongly encourage you to participate in the 2025 Leapfrog Hospital Survey which opens on April 1. We, along with our entire community, are looking for your hospital to commit to transparency by reporting on your safety and quality performance. Pandemic setbacks have propelled the issue of patient safety as a national priority. It is more important than ever to participate in Leapfrog's critical patient safety efforts to demonstrate your commitment to quality and safety.

In 2024, more than 2,400 hospitals participated, representing 80% of inpatient beds nationwide. [INSERT STAT SUCH AS PERCENT INCREASE IN HOSPITALS PARTICIPATING IN 2024 SURVEY, OR PERCENTAGE OF HOSPITALS THAT PARTICIPATE LOCALLY].

This year marks **Leapfrog's 25th Anniversary** and the **25th year of the Leapfrog Hospital Survey**—a vital tool for health care transparency. Your participation is essential. For 25 years, hospitals have helped drive safer, higher-quality care through Leapfrog. Purchasers feel that your participation is more vital than ever for our region so we can achieve real progress toward a safer, higher-quality, more transparent health care system for all.

By participating in the Leapfrog Hospital Survey, your hospital can:

1. **Demonstrate your responsiveness to employers in your community who depend on your services**
2. **Benchmark your performance on quality and safety metrics and create a performance improvement plan**
3. **Receive public recognition by [REGIONAL LEADER] for your transparency and performance**
4. **Be eligible for awards programs such as Leapfrog Top Hospital**
5. **Ensure your most up-to-date performance is reflected in your Leapfrog Hospital Safety Grade (if applicable)**
6. **Demonstrate your commitment to quality and safety improvement to our community, including your staff and board**

Leapfrog's public reporting website, www.ratings.leapfroggroup.org, allows users to search for and compare both hospital and ASC ratings to better understand safety and quality across facilities. Purchasers in [REGION] intend to share these results with their employees and use your performance metrics as part of their value strategy.

To receive the security code needed to complete the Survey, please complete and submit the Security Code Request form: <http://bit.ly/HospitalSecurityCode>. Though the deadline to complete the Survey is June 30, you can resubmit your Survey at any time throughout the Survey cycle; publicly reported results are updated monthly. For hospitals that do not meet the submission deadline, late submissions are accepted through November 30, and until then, incomplete sections are reported as "Declined to Respond."

Visit www.LeapfrogGroup.org/Hospital to begin today. Leapfrog hosts Town Hall Calls to provide background information about the content of the Survey. Register and learn more at <https://www.leapfroggroup.org/survey-materials/town-hall-calls>. Please contact me at [insert lead tel #] if you have any questions about the reporting process and Leapfrog's activity in our region. The Leapfrog Help Desk is available for any technical or content questions about the Survey and can be accessed at <https://leapfroghelpdesk.zendesk.com>.

Sincerely, [LEAD REGIONAL LEADER]

TEMPLATE LETTER/EMAIL FOR SYSTEM-LEVEL EXECUTIVES ON THE HOSPITAL AND ASC SURVEYS

[Date]

[Prefix] [First] [Last]
Chief Executive Officer
[ASC Name]
[Street Address]

[City, State, ZIP]

Dear [CEO Name]:

On behalf of [REGIONAL LEADER] and our [NUMBER] members including [CONSIDER NAMING A FEW BIG NAMES HERE IF YOU DON'T KNOW THIS HOSPITAL/ASC/SYSTEM WELL], we are writing to strongly encourage [all facilities within HEALTH SYSTEM NAME] [or: your facility] to participate in the 2025 Leapfrog Surveys, which open on April 1. Inpatient hospitals and hospital outpatient departments are invited to participate in the Leapfrog Hospital Survey and ambulatory surgery centers are invited to participate in the Leapfrog ASC Survey.

More than 2,400 hospitals submitted a Survey in 2024, accounting for 80% of inpatient beds across the country. [INSERT STAT SUCH AS NAMES OF HEALTH SYSTEMS/ASCs THAT PARTICIPATE IN YOUR REGION].

This year marks **Leapfrog's 25th Anniversary** and the **25th year of the Leapfrog Hospital Survey**—a vital tool for health care transparency. Your participation is essential. For 25 years, hospitals have helped drive safer, higher-quality care through Leapfrog. Purchasers feel that your participation is more vital than ever for our region so we can achieve real progress toward a safer, higher-quality, more transparent health care system for all.

By participating in the Leapfrog Surveys, your [system/facility] can:

1. **Demonstrate your responsiveness to employers in our community who depend on your services**
2. **Access customized analytics comparing performance between facilities in your system**
3. **Benchmark your performance on quality and safety metrics and create a performance improvement plan**
4. **Receive public recognition by [REGIONAL LEADER] for your transparency and performance**
5. **Be eligible for awards programs such as Leapfrog Top Hospital and Top ASC**
6. **Ensure your most current performance is reflected in your Leapfrog Hospital Safety Grades (if applicable)**
7. **Demonstrate your commitment to quality and safety improvement to our community, including your staff and board**

Leapfrog's public reporting website, www.ratings.leapfroggroup.org, allows users to search for and compare hospital and ASC ratings to better understand safety and quality across facilities. Purchasers in [REGION] intend to share these results with their employees and use your performance metrics as part of their value strategy.

If your facilities participated in the Survey before, their security code has not changed. If a facility needs a copy of its security code, please complete and submit the Security Code Request form: FOR HOSPITALS <http://bit.ly/HospitalSecurityCode>, FOR ASCs <http://bit.ly/ASCSecurityCode>. Though the deadline to complete the Survey is June 30, you can resubmit your Survey at any time throughout the Survey cycle; publicly reported results are updated monthly. For hospitals and ASCs that do not meet the deadline, late submissions are accepted through November 30. Incomplete sections are reported as "Declined to Respond."

Visit www.LeapfrogGroup.org for more information and please contact me for details on [REGIONAL LEADER's] commitment to employers and purchasers.

Sincerely,

[LEAD REGIONAL LEADER]

TEMPLATE LETTER/EMAIL FOR ASC SURVEY PARTICIPATION

[Date]

[Prefix] [First] [Last]

Chief Executive Officer

[Facility Name]

[Street Address]

[City, State, ZIP]

Dear [CEO/ASC Administrator Name]:

On behalf of the over [NUMBER] employer members of [REGIONAL LEADER], representing [NUMBER] lives and \$[AMOUNT] in annual claims, we are writing to request your ambulatory surgical center's participation in the 2025 Leapfrog Ambulatory Surgery Center (ASC) Survey. As a coalition of employers who invest in the health and well-being of our employees, we feel that your participation in the Leapfrog ASC Survey is vital for our community so we can achieve real progress toward a safer, higher-quality, more transparent health care system for all.

2025 marks the seventh year of the Leapfrog ASC Survey. This year also marks the 25th anniversary of The Leapfrog Group, an independent national nonprofit dedicated to collecting and publicly reporting patient safety and quality data from health care facilities. All ASCs in the United States are invited to participate in the annual Leapfrog ASC Survey, free of charge. Our employer members use results from the Leapfrog Surveys to inform benefit design, patient referral preferences and direct contracting considerations. Your ASC can be included in these evaluations by participating in the Leapfrog ASC Survey.

By participating in the Leapfrog ASC Survey, your surgery center can also:

1. **Demonstrate your responsiveness to employers in our community who depend on your services**
2. **Benchmark your performance on quality and safety metrics**
3. **Receive public recognition by [REGIONAL LEADER] for your transparency and performance**
4. **Be eligible for awards programs such as Leapfrog Top ASC**
5. **Demonstrate your commitment to quality and safety improvement to our community, including your staff and board**

Leapfrog's public reporting website, www.ratings.leapfroggroup.org, allows users to search for and compare both hospital and ASC ratings to better understand safety and quality across facilities. Purchasers in [REGION] intend to share these results with their employees and use your performance in their strategy to direct their employees to the safest, most cost-effective options. Like all of Leapfrog's programs, the ASC Survey measures are evidence-based, grounded in the latest science and developed with guidance from Leapfrog's national expert panel and the Armstrong Institute for Patient Safety and Quality at Johns Hopkins Medicine.

The ASC Survey is **narrowly tailored** to the targeted care that surgery centers deliver – with half as many measures as the Hospital Survey. To submit an ASC Survey, you are only responsible for providing data applicable to your practice – sections of the Survey having to do with surgeries you don't perform can be skipped and will not penalize your publicly reported results.

To access your personalized Survey profile, please complete and submit the Security Code Request form: <http://bit.ly/ASCSecurityCode>. Though the deadline to complete the Survey is June 30, you can resubmit your Survey at any time throughout the Survey cycle to reflect the latest data; publicly reported results are updated monthly. For ASCs that don't meet the submission deadline, late submissions are accepted through November 30.

Please visit <http://www.leapfroggroup.org/asc> to learn more, and contact Leapfrog's Help Desk for an individual orientation to the Survey. There is never any charge for participation in Leapfrog Surveys.

We strongly recommend that you participate in the 2025 Leapfrog ASC Survey. You will derive great value from the process, and our coalition of employers in [REGION] will appreciate your responsiveness and transparency.

Sincerely, [LEAD REGIONAL LEADER]

E. TEMPLATE EMAIL HOSPITAL PARTICIPATION REMINDER

To: [Hospital Executive]
From: [Regional Leader]
Subject: Leapfrog Hospital Survey reminder

Dear [CEO Name]:

As a follow-up to the formal invitation letter sent to your hospital earlier this spring, I am writing to remind you about the approaching June 30 submission deadline for the 2025 Leapfrog Hospital Survey.

This year marks **Leapfrog's 25th Anniversary** and the **25th year of the Leapfrog Hospital Survey**—a vital tool for health care transparency. Your participation is essential. For 25 years, hospitals have helped drive safer, higher-quality care through Leapfrog. Purchasers feel that your participation is more vital than ever for our region so we can achieve real progress toward a safer, higher-quality, more transparent health care system for all.

By participating in the Leapfrog Hospital Survey, you can see how your hospital performs on quality and safety metrics available from no other source and compare your performance to the other hospitals in our area and nationally. Your hospital can also:

- 1. Demonstrate your responsiveness to employers and other purchasers in our community, who depend on your services and expect transparency and candor**
- 2. Benchmark your performance nationally, regionally and locally on important quality and safety issues**
- 3. Receive public recognition by [REGIONAL LEADER] for your performance achievements [CONSIDER INSERTING SPECIFIC WAYS YOU & YOUR MEMBERS USE LEAPFROG DATA/RECOGNIZE LOCAL HOSPITALS]**
- 4. Create a performance improvement plan by charting your year-over-year progress on the Survey**
- 5. Demonstrate your commitment to quality and safety improvement to our community, as well as your staff and board**

Leapfrog's public reporting website, www.ratings.leapfroggroup.org, allows users to search for and compare both hospital and ASC ratings to better understand safety and quality across facilities. Purchasers in [REGION] intend to share these results with their employees and use your performance metrics as part of their value strategy. Performance for participating facilities is posted and those that do not participate are indicated as "Declined to Respond."

Participation in the Survey and accessing the results is always free. You may use the same security code you used for previous Surveys. If you need a copy of your security code, please complete and submit the Security Code Request form: <http://bit.ly/HospitalSecurityCode>. We look forward to your participation before the June 30 submission deadline. You can resubmit your Survey at any time throughout the Survey cycle; publicly reported results are updated monthly. For hospitals that don't meet the deadline, late submissions are accepted through November 30, and until then, incomplete sections are reported as "Declined to Respond."

Thank you once again for responding to the requests of purchasers in our region and for taking the time to complete the Leapfrog Hospital Survey.

Sincerely,
[LEAD REGIONAL LEADER]

F. TEMPLATE THANK YOU LETTER/EMAIL FOR HOSPITAL CEOS

[Date]

[Prefix] [First] [Last]
Chief Executive Officer
[Facility Name]
[Street Address]
[City, State, ZIP]

Dear [CEO Name]:

I am writing to thank you for participating in the 2025 Leapfrog Hospital Survey. On behalf of our [NUMBER] members including [CONSIDER NAMING A FEW BIG NAMES HERE IF YOU DON'T KNOW THIS HOSPITAL WELL], we commend your commitment to transparency demonstrated through your participation.

[REGIONAL LEADER ORGANIZATION NAME] will share this information with our community to assure recognition for **your performance achievements and improvements**. [CONSIDER INSERTING SPECIFIC WAYS YOU & YOUR MEMBERS USE LEAPFROG DATA/RECOGNIZE LOCAL HOSPITALS]

This year marks **Leapfrog's 25th Anniversary** and the **25th year of the Leapfrog Hospital Survey**—a vital tool for health care transparency. Your participation is essential. Thank you for being part of this movement to drive safer, higher-quality care through Leapfrog participation.

As a reminder, Leapfrog Hospital Survey results will be available in July at www.Ratings.LeapfrogGroup.org and are updated monthly. Data collected from the section of the Hospital Survey on outpatient procedures will be publicly reported by facility alongside data from the Leapfrog Ambulatory Surgery Center Survey.

Thank you once again for your investment in improving the health of [REGION] and for taking the time to complete the Leapfrog Hospital Survey. We commend your leadership and look forward to other hospitals in our community following your example.

Sincerely,
[LEAD REGIONAL LEADER]

G. TEMPLATE THANK YOU LETTER/EMAIL FOR ASC ADMINISTRATORS

[Date]

<NAME>
Administrator

<Organization Name>
<Mailing-Street Address>
<Mailing-City>, <Mailing-State> <Mailing-Postal Code>

Dear <NAME>:

I am writing to thank you for participating in the 2024 Leapfrog ASC Survey. On behalf of our [NUMBER] members including [CONSIDER NAMING A FEW BIG NAMES HERE IF YOU DON'T KNOW THIS ASC WELL], we commend your commitment to transparency demonstrated through your participation.

This year marks **Leapfrog's 25th Anniversary** and the seventh year of the Leapfrog ASC Survey. Thank you for being part of this movement to drive safer, higher-quality care through Leapfrog participation.

[REGIONAL LEADER ORGANIZATION NAME] will share this information with our community to assure recognition for **your performance achievements and improvements**. [CONSIDER INSERTING SPECIFIC WAYS YOU & YOUR MEMBERS USE LEAPFROG DATA/RECOGNIZE LOCAL ASCs]

As a reminder, Leapfrog ASC Survey results will be available in July at www.Ratings.LeapfrogGroup.org and are updated monthly. Data collected from your facility will be posted alongside results of the Leapfrog Hospital Survey's section on outpatient procedures, so that you can compare your performance to that of other groups offering similar services in your area.

Look out for your free benchmarking report, which will be sent in January 2026. This report offers a comparison of your performance against ASCs nationwide, as well as hospital outpatient departments. Your benchmarking performance is **not** publicly reported; but you are certainly free to share that information internally to identify areas of excellence to build on, and opportunities for improvement.

We commend your leadership and look forward to other ASCs in our community following your example. Thank you once again for your investment in improving the health of [REGION].

Sincerely,

[LEAD REGIONAL LEADER]

H. TEMPLATE LETTER/EMAIL FOR SECOND HOSPITAL SURVEY MAILING IN HIGH-PARTICIPATION STATES

[Date]

[Prefix] [First] [Last]
Chief Executive Officer
[Facility Name]
[Street Address]
[City, State, ZIP]

Dear [CEO Name]:

As a follow-up to my initial outreach, I am writing to again ask your hospital to complete the 2025 Leapfrog Hospital Survey. This year marks **Leapfrog's 25th Anniversary** and the **25th year of the Leapfrog Hospital Survey**—a vital tool for health care transparency. Your participation is essential.

So far this year, almost [X,XXX] hospitals nationwide have completed the Leapfrog Hospital Survey in response to purchasers' request for increased transparency. In our state, over [X%] of hospitals have completed a 2025 Survey. I strongly urge you to follow the leadership demonstrated by your colleagues and ensure your hospital is not one of the few non-participating hospitals in this region.

By participating in the Leapfrog Hospital Survey, you can see how you perform on quality and safety metrics available from no other source and compare your performance to the other hospitals in our area and nationally. Your hospital can also:

1. **Demonstrate your responsiveness to employers and other purchasers in our community, who depend on your services and expect transparency and candor**
2. **Receive public recognition by [REGIONAL LEADER] for your performance achievements [CONSIDER INSERTING SPECIFIC WAYS YOU & YOUR MEMBERS USE LEAPFROG DATA/RECOGNIZE LOCAL HOSPITALS]**
3. **Create a performance improvement plan by charting your year-over-year progress on the Survey**
4. **Demonstrate your commitment to quality and safety improvement to our community, as well as your staff and board**

Leapfrog's public reporting website, www.ratings.leapfroggroup.org, allows users to search for and compare both hospital and ASC ratings to better understand safety and quality across facilities. Performance for participating facilities is posted and those that do not participate are indicated as "Declined to Respond." Purchasers in [REGION] will be sharing these results with their employees and dependents and use your performance metrics as part of their value strategy.

Participation in the Survey and accessing the results is always free. *If you have participated in the Survey before, your security code has not changed. If you need a copy of your security code, please complete and submit the Security Code Request form: <http://bit.ly/HospitalSecurityCode>.* The late submission deadline for Survey completion is **November 30**. You can resubmit your Survey at any time throughout the Survey cycle; publicly reported results are updated monthly.

Thank you once again for your investment in improving the health of our [REGION] and for taking the time to complete the Leapfrog Hospital Survey.

Sincerely,
[LEAD REGIONAL LEADER]

J. TEMPLATE LETTER/EMAIL CURRENTLY SUBMITTING ASCS

[Date]

[Prefix] [First] [Last]
Chief Executive Officer
[Facility Name]
[Street Address]
[City, State, ZIP]

Dear [CEO/ASC Administrator Name]:

On behalf of the over [NUMBER] employer members of [REGIONAL LEADER], representing [NUMBER] lives and \$(AMOUNT) in annual claims, we are writing to request your ambulatory surgical center's participation in the 2025 Leapfrog Ambulatory Surgery Center (ASC) Survey. We, along with our entire community, appreciate your past participation and look forward to your continued dedication to transparency. As a coalition of employers who invest in the health and well-being of our employees, we feel that your participation

in the Leapfrog ASC Survey is vital for our community so we can achieve real progress towards a safer, higher-quality, more transparent health care system for all. The Leapfrog ASC Survey is your opportunity to demonstrate your commitment to transparency.

2025 marks the seventh year of the Leapfrog ASC Survey on patient safety and quality. This year also marks the 25th anniversary of The Leapfrog Group, an independent national nonprofit dedicated to collecting and publicly reporting patient safety and quality data from health care facilities. All ASCs in the United States are invited to participate in the annual Leapfrog ASC Survey, free of charge. Our employer members use results from the Leapfrog Surveys to inform benefit design, patient referral preferences and direct contracting considerations. Your ASC can be included in these evaluations by participating in the Leapfrog ASC Survey.

By participating in the Leapfrog ASC Survey, your surgery center can:

1. **Demonstrate your responsiveness to employers in our community who depend on your services**
2. **Benchmark your performance on quality and safety metrics**
3. **Receive public recognition by [REGIONAL LEADER] for your transparency and performance**
4. **Be eligible for awards programs such as Leapfrog Top ASC**
5. **Demonstrate your commitment to quality and safety improvement to our community, including your staff and board**

Leapfrog's public reporting website, www.ratings.leapfroggroup.org, allows users to search for and compare both hospital and ASC ratings to better understand safety and quality across facilities. Purchasers in [REGION] intend to share these results with their employees and use your performance metrics as part of their value strategy. Like all of Leapfrog's programs, the ASC Survey measures are evidence-based, grounded in the latest science and developed with guidance from Leapfrog's national expert panel and the Armstrong Institute for Patient Safety and Quality at Johns Hopkins Medicine.

The ASC Survey is **narrowly tailored** to the targeted care that surgery centers deliver – with half as many measures as the Hospital Survey. To submit an ASC Survey, you are only responsible for providing data applicable to your practice – sections of the Survey having to do with surgeries you don't perform can be skipped and will not penalize your publicly reported results.

You may use the same security code you used for previous Surveys. If you need a copy of your security code, please complete and submit the Security Code Request form: <http://bit.ly/ASCSecurityCode>. Though the deadline to complete the Survey is June 30 you can resubmit your Survey at any time throughout the Survey cycle; publicly reported results are updated monthly. For ASCs that don't meet the submission deadline, late submissions are accepted through November 30.

Please visit <http://www.leapfroggroup.org/asc> to learn more, and contact Leapfrog's Help Desk for an individual orientation to the Survey. There is never any charge for participation in Leapfrog Surveys.

We strongly recommend your participation in the 2025 Leapfrog ASC Survey. You will derive great value from the process, and our coalition of employers in [REGION] will appreciate your responsiveness and transparency.

Sincerely, [LEAD REGIONAL LEADER]

K. TEMPLATE LETTER/EMAIL FOR HEALTH PLANS: HOSPITALS

[Date]

[Chief Executive Officer]

[Hospital Name]

[Mailing Address]

[City], [State] [ZIP Code]

Dear [Chief Executive Officer]:

On behalf of our employer and purchaser clients, we are writing to urge you to participate in the 2025 Leapfrog Hospital Survey. We feel that your participation in the Survey is vital for your community so we can achieve real progress toward a safer, higher-quality, more transparent health care system for all.

More than 2,400 hospitals submitted a Survey in 2024, accounting for 80% of inpatient beds across the country. Our company, along with employers and other purchasers, consumers and industry leaders, use the Survey Results to make informed choices about hospitals from which to seek care. Without your Survey participation we will not have this critical data on the quality and safety of the care your hospital provides.

For 25 years, The Leapfrog Group has been collecting and publicly reporting patient safety and quality information about health care facilities. Leapfrog continues to report unique data that matters most to employers, purchasers, payors and consumers. Furthermore, measures on the Leapfrog Hospital Survey are evidence-based, grounded in the latest science and developed with guidance from Leapfrog's national expert panels and the Johns Hopkins Armstrong Institute for Patient Safety and Quality.

Please visit <http://www.leapfroggroup.org/hospital> to learn more. The deadline for completion is June 30. There is never any charge for participation in Leapfrog Surveys.

We strongly recommend your participation in the 2025 Leapfrog Hospital Survey. Leapfrog is the gold standard in health care transparency, which is why it is important to us that your facility participates. Thank you for your consideration of our request.

Sincerely,

[Your Signature here]

L. TEMPLATE LETTER/EMAIL FOR HEALTH PLANS: ASCS

[Date]

[Chief Executive Officer]

[ASC Name]

[Mailing Address]

[City], [State] [ZIP Code]

Dear [Chief Executive Officer]:

On behalf of our employer and purchaser clients, we are writing to urge you to participate in the 2025 Leapfrog Ambulatory Surgery Center (ASC) Survey. Payors, employers and purchasers use the Leapfrog ASC Survey to inform patient referral preferences, benefit designs and direct contracting considerations. Without your Survey participation, we will not have this critical data on your quality and safety performance.

We feel that your participation in the Leapfrog ASC Survey is vital for our community so we can achieve real progress toward a safer, higher-quality, more transparent health care system. This has never been more important than now when surgery centers are growing exponentially as a share of the health care market.

2025 marks the seventh year of the Leapfrog ASC Survey on patient safety and quality. The Leapfrog Group is a 25-year-old independent national nonprofit collecting and publicly reporting patient safety and quality information about health care facilities. All ASCs in the United States have the opportunity to participate in the annual Leapfrog ASC Survey. Survey results are reported on Leapfrog's public reporting website, <https://ratings.leapfroggroup.org>, where users can search for and compare hospital and ASC ratings to better understand safety and quality across facilities.

Like all of Leapfrog's programs, the ASC Survey measures are evidence-based, grounded in the latest science and developed with guidance from Leapfrog's national expert panel and the Johns Hopkins Armstrong Institute for Patient Safety and Quality.

The ASC Survey is **narrowly tailored** to the targeted care that surgery centers deliver – with half as many measures as the Hospital Survey. To submit an ASC Survey, you are only responsible for providing data applicable to your practice – sections of the Survey having to do with surgeries you don't perform can be skipped, and will not penalize your publicly reported results.

Please visit <http://www.leapfroggroup.org/asc> to learn more. The deadline for completion is June 30. There is never any charge for participation in Leapfrog Surveys.

We strongly recommend your participation in the 2025 Leapfrog ASC Survey. Leapfrog is the gold standard in health care transparency, which is why it is important to us that your facility participates. Thank you for your consideration of our request.

Sincerely,

M. TEMPLATE LETTER/EMAIL TO CONGRATULATE A TOP HOSPITAL CEO

[Date]

[Prefix] [First] [Last]

Chief Executive Officer

[Facility Name]

[Street Address]

[City, State, ZIP]

Dear [CEO Name]:

Congratulations on [Facility Name] earning a **2025 Leapfrog Top Hospital**, a recognition that places your hospital among an elite group of healthcare institutions nationwide. On behalf of our [NUMBER] members including [CONSIDER NAMING A FEW BIG NAMES HERE IF YOU DON'T KNOW THIS HOSPITAL WELL], we commend your commitment to patient safety.

[REGIONAL LEADER ORGANIZATION NAME] will share this information with our community to ensure recognition of **your performance achievements. [CONSIDER INSERTING SPECIFIC WAYS YOU & YOUR MEMBERS USE LEAPFROG DATA/RECOGNIZE LOCAL HOSPITALS]**

This recognition is a testament to your unwavering commitment to patient safety and dedication to providing the highest care possible. We hope you will share this achievement publicly so your community is reassured that you put your patients first. This recognition reflects well on your institutional culture and tells prospective employees, patients, and clinicians that your hospital is a leader in keeping patients safe.

On behalf of [REGIONAL LEADER ORGANIZATION NAME], our Board of Directors, and our employer and purchaser members committed to giant leaps forward for patient safety, we applaud you and thank you sincerely for your commitment to the well-being of your patients.

Sincerely,

[LEAD REGIONAL LEADER]

COMMON OBJECTIONS AND FREQUENTLY ASKED QUESTIONS ABOUT LEAPFROG AND ITS RATINGS

All Leapfrog leaders should be conversant in the issues that arise frequently during the campaign for Survey participation. The common objections and FAQs resource is available for you to familiarize yourself and prepare for conversations with providers and other groups you speak with about Leapfrog.

The Leapfrog Group is a national nonprofit organization that serves as a voice for health care consumers and purchasers, using their collective influence to foster positive change in U.S. health care. The flagship Leapfrog Hospital Survey and Leapfrog Ambulatory Surgery Center (ASC) Survey collect and transparently report hospital and ASC performance, empowering purchasers to find the highest-value care and giving consumers the lifesaving information they need to make informed decisions. The Leapfrog Hospital Safety Grade, Leapfrog's other main initiative, assigns letter grades to hospitals based on their record of patient safety, helping consumers protect themselves and their families from errors, injuries, accidents, and infections.

The following charts detail responses to the common objections and frequently asked questions hospitals and ASCs may have about Leapfrog and its ratings.

COMMON OBJECTIONS TO PARTICIPATING IN LEAPFROG SURVEYS

Objection	Response
"We do not want to participate in the Survey this year because of the nursing standards. Our hospital, and hospitals nationwide, are facing unprecedented staffing shortages, and the new nursing standards will be impossible to achieve."	Nursing care is a core element to ensure safe patient care in hospitals, and national data suggests variation among hospitals on the impact of the nurse staffing challenges. With these considerations in mind, Leapfrog will continue to score and publicly report hospital performance on the Total Nursing Care Hours per Patient Day, RN Hours per Patient Day, Nursing Skill Mix, and Percentage of RNs who are BSN-Prepared measures on the 2025 Leapfrog Hospital Survey, but as a reminder, hospitals have the option of responding 'did not measure' and will be publicly reported as "Limited Achievement." All four of the nurse staffing and skill mix measures from the Leapfrog Hospital Survey have decades of published evidence that support their relationship with patient safety outcomes.
"Leapfrog data is self-reported and therefore unreliable."	The integrity of the data we publish and distribute is of utmost importance to Leapfrog. We have many protocols in place to verify the accuracy of our results: • The facility CEO or their designee must complete an Affirmation of Accuracy for each section of the Survey. • The Survey is programmed to detect errors and logic problems and alerts facilities prior to Survey submission. • Each month, Leapfrog conducts an extensive data verification of the responses submitted to the Survey. Quantitative responses are assessed using empirically driven, normative data quality standards. Some facilities are randomly selected to submit further documentation for qualitative measures. • A sample of facilities are selected for on-site verification of results. Note: These processes are outlined in more detail on our website.
"Our effort to promote quality is evidenced by many accolades received within the past year, so we don't need to report to Leapfrog."	We congratulate hospitals and ASCs on the quality awards they have received. However, performing well on other rankings does not explain why the facility is unwilling to report data purchasers are asking for. Transparency means candor—not just about awards and accomplishments but also about challenges. In short, receiving an award for quality or safety is not a suitable substitute for demonstrating transparency to purchasers by responding to the Leapfrog Hospital Survey or Leapfrog ASC Survey.

"All of the information available through Leapfrog is available elsewhere."	Data collected and reported through the Leapfrog Surveys is often harmonized with other entities to make reporting easier for hospitals and ASCs, but the difference is that Leapfrog makes this data public by facility. For example, hospitals report the same C-section measure to Leapfrog that they report to the Joint Commission, but the Joint Commission doesn't make individual hospital C-section rates available to the public. While some measures on the Leapfrog Hospital Survey align with those collected by CMS, CMS often reports at the system level rather than by individual facility; our results demonstrate that there is real difference between facilities even within the same system.
"We concentrate our data collection resources on CMS."	Participation in the Leapfrog Surveys demonstrates a facility's true commitment to transparency because Leapfrog asks hospitals and ASCs to voluntarily report on measures they are not required to report otherwise. These measures matter to purchasers and patients. Voluntarily participating in Leapfrog Surveys demonstrates responsiveness to the community and purchasers.
"We already have a performance improvement and quality standards plan in place and don't need Leapfrog to guide our efforts."	While acknowledging a facility's many areas of strength, no hospital or ASC is perfect, and Leapfrog is a gold standard for excellence. Measures that are unique to Leapfrog should prompt performance improvement efforts on those metrics. All facilities should welcome the opportunity to build trust
"Leapfrog is rarely used by the public or insurance companies anymore."	purchasers and consumers by reporting this information, and purchasers are eager to see the improvements hospitals have made. Leapfrog is more widely used now than ever before. Leapfrog data is used by national and regional health plans in their public reporting and pay-for-performance initiatives. Furthermore, Leapfrog data is included in many of the transparency tools used by employers and purchasers reaching virtually all Americans.
"We believe something on the Survey is not risk-adjusted adequately and/or invalid/unscientific."	Leapfrog's surveys are rigorously evaluated and continuously updated. Leapfrog's Survey team works with faculty at the Armstrong Institute for Patient Safety and Quality at Johns Hopkins Medicine as well as a number of national expert panels to review the evidence and measure specifications for the Surveys each year. Measures are risk-adjusted when appropriate, but many involve things that all hospitals should be doing regardless of the population served. All content is released for public comment annually and updated accordingly. Questions and concerns about measures are always welcomed and considered either through the public comment period or any time in the year by contacting Leapfrog's Help Desk: https://leapfroghelpdesk.zendesk.com/ .
"We disagree with Leapfrog's hand hygiene standard, and it is burdensome."	Leapfrog's hand hygiene standard is modeled primarily after the World Health Organization's (WHO) Hand Hygiene Self-Assessment Framework and adapted to specific issues unique to U.S. hospitals and ambulatory surgery centers (ASCs). Leapfrog has also updated the framework based on existing evidence, models from other organizations such as the CDC and The Joint Commission, and expert opinion from our national Hand Hygiene Expert Panel. There are times when Leapfrog's standards are more stringent than what is set by other organizations, and this is one of them. Leapfrog's intent was to set a standard that meets the challenge of the nation's high rate of healthcare-associated infections. We recognize that we are holding hospitals and ASCs to a higher standard than what is currently required for hand hygiene and many facilities will not be able to fully adhere to the standard, but our intention is that facilities will work toward meeting the standard in the future.

FREQUENTLY ASKED QUESTIONS ON THE LEAPFROG SURVEY

Question	Response

What is the difference between the Leapfrog Hospital Survey and the Leapfrog Hospital Safety Grade?	The Leapfrog Hospital Survey is an annual voluntary survey of safety, quality, and efficiency standards in hospitals. Survey results are publicly reported at https://ratings.leapfroggroup.org. The Leapfrog Hospital Safety Grade is a letter grade rating of A, B, C, D or F assigned to all general hospitals regardless of whether they voluntarily report data to Leapfrog or not. Grades are reported at www.hospitalsafetygrade.org. Data used in the Safety Grade comes primarily from the Leapfrog Hospital Survey and CMS. The Grade also focuses only on safety, while the Survey has a range of measures. More information on the differences between these two programs is available at https://www.hospitalsafetygrade.org/for-hospitals/HospitalFAQ.
Do facilities have to pay to participate in the Surveys? How are Survey results used?	The Leapfrog Hospital Survey and Leapfrog ASC Survey are completely free to participating facilities. Results are also available for free on Leapfrog's websites. Data collected through the Surveys are publicly reported on Leapfrog's websites and used to educate consumers and purchasers about the quality and safety of facilities in their community so that they can choose the best place for care. Employers and purchasers use Survey results to identify the best facilities for their employees' health care needs and work with health plans to design value-based benefits packages that reward the safest and highest quality performers. Health plans and others include Leapfrog data on plan websites and materials as well as in transparency tools.
What is Leapfrog's initiative to rate outpatient care?	For five years, Leapfrog has assessed the quality and safety of procedures performed at ambulatory surgery centers (ASCs) and hospital outpatient procedure departments. 60% of employee procedures take place in the outpatient setting. Leapfrog collects the data through a voluntary Survey of ASCs as well as an outpatient procedure addition to the existing Leapfrog Hospital Survey, which previously covered inpatient care only. Results for both types of facilities are publicly reported at https://ratings.leapfroggroup.org, allowing comparison between both
Does Leapfrog compare procedures performed at ASCs with those performed in hospitals?	Yes. Our goal is to report similar information about both settings. Leapfrog strongly believes that reporting about quality and safety should be patient-centered, and patients seeking a particular procedure do not care about the business entity that houses the operating room; they care about the quality and safety of the procedure. Results for both types of facilities based on similar metrics can be found on Leapfrog's ratings website: https://ratings.leapfroggroup.org.
Where can I go for help?	The Leapfrog Help Desk can assist hospitals and ASCs with highly technical questions, and can be reached through the online Leapfrog Help Desk link or by emailing helpdesk@leapfrog-group.org. Help Desk coverage is 9:00 a.m.–5:00 p.m. ET on business days. The Help Desk is committed to resolving inquiries within two business days, and most inquiries are typically resolved within one day. Regional leaders with questions should reach out directly to Jill Berger. Regional Leaders should respond to questions only when they feel comfortable doing so and steer clear of highly technical questions. Please feel free to refer any hospitals or ASCs directly to the Leapfrog Help Desk for questions, especially those questions related to Survey content or technical problems with the Surveys.

Why should hospitals and ASCs complete the annual Leapfrog Surveys?

By participating in the Leapfrog Surveys, which is free, your facility can:

- Demonstrate your responsiveness to employers in our community who depend on your services
- Benchmark your performance on quality and safety metrics and create a performance improvement plan
- Receive public recognition by local business groups for your transparency and performance.
- Demonstrate your commitment to quality and safety improvement to your community, including your staff and board

LEAPFROG RATINGS VS OTHER RATINGS: WHAT IS THE DIFFERENCE?

Hospitals and health systems are complicated, and no one ratings program captures everything that matters to everyone. Consumers should consult multiple ratings before deciding where to seek care. They should begin with safety, because without safety little else matters: The best surgeon in the world will not be enough to save the patient if they get an infection or the wrong medication following their procedure. Whether it's stitches in the ER or open heart surgery, safety is the foundation of every patient's hospital experience.

Below is a summary of ratings systems and how they compare to Leapfrog.

Rating	Detailed Response
U.S. News & World Report	The U.S. News Honor Roll (including condition-specific honor rolls) focuses on identifying the "best medical centers for the most difficult patients," helping consumers determine which hospitals provide the best care for serious or complicated medical conditions and procedures; it is not a list intended for the average consumer to use to find a hospital for a routine procedure or condition. For patients with complex conditions, the U.S. News ratings are a helpful addition to the Leapfrog Hospital Safety Grade.
CMS Care Compare (Previously Hospital Compare)	CMS includes data on safety, mortality, readmissions, patient experience, effectiveness/timeliness of care, and efficient use of medical imaging. On the Care Compare website, 90% of hospitals are shown as "no different than the national average" for each measure—this lack of variation makes it more difficult for consumers trying to identify the best facility for their care. Leapfrog results show more variation and are more timely.
CMS 5-Star Ratings	CMS offers a 5-star rating aggregating data on safety, mortality, readmissions, patient experience, effectiveness/timeliness of care, and efficient use of medical imaging for each hospital. There is variation among hospitals on number of stars. Safety comprises 22% of the overall star rating, which is why the Hospital Safety Grade—which is 100% safety measures—sometimes differs in its rating of a given hospital.
Healthgrades	Healthgrades publishes several lists of top 50/100/200 hospitals for various areas of care. It runs its own data analysis for many measures rather than using publicly available data. Unlike Leapfrog, they do not collect data from hospitals. Their Best Hospitals list and Patient Safety Excellence Award use different data than Leapfrog uses. For instance, they do not include infection rates, a significant component of the Safety Grade and the Survey. Only high-performing facilities are recognized. They do not call out poor performers like Leapfrog does.
Lown Institute Hospital Index	Lown Institute publishes unique yearly hospital ranking lists, providing hospital grades based on social responsibility. These rankings encompass performance across three domains: Equity, Value,

Vendor-created ratings

and Outcomes. Featured lists include Avoiding Overuse, Community Benefit, Cost Efficiency, Most Racially Inclusive, and Most Socially Responsible. They apply these criteria and examine a range of 3,000–3,700 hospitals based on 54 metrics. Lown uses hospital characteristic data from a variety of sources, including Fiscal Year 2018 American Hospital Association (AHA) annual survey, Medicare Impact File, and the CMS Care Compare database. Users can view hospital grades for each domain publicly reported on a dedicated website as well as view the Lown Institute methodology.

Vendors like Castlight and CareChex by Quantros draw from claims data, CMS, and sometimes Leapfrog to create tools and insights to sell to employers and other stakeholders. Decision-support tools like Castlight are designed for employers to offer to their employees. They consolidate provider metrics with cost information, with many incorporating the Safety Grade and other Leapfrog data, to help employees choose the right facility/provider.

Quantros's CareChex Awards and other vendors use public and proprietary measures of performance to produce their ratings, comparing inpatient quality performance across general acute care hospitals. The awards consider patient complications, readmissions, mortality, AHRQ patient safety indicators, and inpatient quality indicators. Some sell consulting services to hospitals. Quantros is now a part of Healthcare Bluebook.

Vizient and other quality improvement vendors produce rankings designed for hospitals, not employers, purchasers, or consumers. Their Quality and Accountability Ranking identifies their high-performing member organizations in the areas of quality and safety and provides tools to support organizational improvement. None of their insights are made public, and even the hospitals that contract with them cannot see how other individual hospitals performed.

Leapfrog supports the innovative and competitive marketplace aimed at creating the most usable tools to drive improvement. At Leapfrog, we do not see ourselves as competing with these enterprises but giving them data to fuel even better ratings and offering employers and consumers the most relevant information. Data from the Leapfrog Surveys are unique and unavailable from claims or any other source. We encourage these vendors to use Leapfrog's unique data to fuel even better ratings.

Below is a collection of common questions.

Question	Desired Response
Aren't consumers confused by multiple ratings when choosing a hospital or ASC?	Health care is complicated. Consumers can and should consult a multitude of health care facility ratings to see which is most meaningful for their needs and select a facility using that knowledge. Consumers are accustomed to consulting ratings and reviews for every other industry, from automobiles to appliances to books. By putting meaningful quality and safety metrics into the hands of consumers, we allow them to make informed decisions about their health. Leapfrog believes that safety should come first when it comes to choosing a hospital,

What makes Leapfrog ratings different than others?

and for that, the Leapfrog Hospital Safety Grade is the only tool focused exclusively on safety. But once a patient identifies the safest hospital available to them, they should utilize other ratings specific to the procedure or type of care needed so that they can choose the best facility for their treatment. Leapfrog is not competing with other ratings services but is expanding the pool of data available nationally for decision-making by purchasers and the public.

Leapfrog is designed to measure what matters most to consumers and purchasers. The difference between Leapfrog ratings and other ratings organizations comes down to methodology, focus, and number of performance measures they evaluate and the audiences they serve.

The Leapfrog Surveys use national performance measures to evaluate hospitals' and surgery centers' safety, quality, and efficiency. These measures are of specific interest to health care purchasers and consumers and cover a broad range of hospital processes, outcomes, and structures in key clinical areas such as maternity and intensive care.

The Survey measures are predicated on the latest science and are regularly reviewed with guidance from scientific advisors at the Armstrong Institute for Patient Safety at Johns Hopkins Medicine as well as Leapfrog's volunteer Expert Panels.

Leapfrog scores and publicly reports Survey Results, Leapfrog's Survey methodologies are completely transparent, and annual proposed changes are open for public comment.

TECHNICAL QUESTIONS ABOUT SUBMITTING THE LEAPFROG HOSPITAL SURVEY

Question	Response
Where do I get a security code if I haven't received or no longer have a security code?	To get a security code, send the Security Code Request form to the Leapfrog Help Desk.
We're in your region, why didn't we receive a request to participate in the Survey?	If it's a new hospital say, "you should <u>contact the Help Desk</u> with any updated hospital information, including CEO name. Have the hospital send the Security Code Request form to the Leapfrog Help Desk so the hospital CEO can authorize email release of the security code. The form can be found here." If it's a hospital outside your Leader area or a type of hospital to which the standards are not intended to apply, and you don't need to have them on your list: • We welcome any hospital to respond to the Survey. • You needn't handle their request. • Ask the hospital to request a security code from the home page of the Survey site by following the "Get a Hospital Security Code" link and following the instructions there. The Help Desk will send the code directly to them.

We received the letter, but why is our hospital name and/or CEO name used in the letter incorrect?

Hospitals can update contact information when completing the Survey (in Survey Profile).

(RLS should update their roster and forward the information to Robyn Nabi (rnabi@leapfrog-group.org) to prevent this from happening again.)

If we are multi-campus hospital and have two Medicare numbers but are really one hospital, can we file one Hospital Survey? Or if we are a hospital system and our units share the same Medicare number, can we file one Survey?

If hospitals on multiple campuses share a common CCN, they should report as distinct hospitals. See the Leapfrog policy [here](#).

Where can I go to see a checklist of steps to take to complete the Hospital Survey?

Leapfrog has put together a pre-submission checklist for hospitals that is easy to use. It is available in the hard copy of Survey [here](#).

Why does the consumer site(s) show the wrong information?

You probably need to update and resubmit your Hospital Survey. No one associated with Leapfrog can alter the data that a hospital submits. It is likely that the hospital made an error during submission. Review the general instruction and timing for public update with the hospital, as indicated above.

Why is my hospital publicly reported as "Declined to Respond" when I completed the Survey?

You may have failed to click the button "Submit Survey. You should log back into the Survey and check your submission status. Or the publicly reported results haven't been updated yet to reflect their participation. Results are updated within the first five business days of each month based on the previous month's submissions.

Where can I ask a clinical or scientific inquiry about a question on the Survey?

Please contact the Help Desk (<https://leapfroghelpdesk.zendesk.com/>) for assistance.

My hospital that has an A Safety Grade was cited by my state for quality issues. How can that be?

The Safety Grade reflects a hospital's relative performance to others – meaning that A hospitals have better patient safety outcomes than B, C, and D/F hospitals but it doesn't mean they are perfect. Additionally, if major patient safety issues are occurring now, those worsening patient outcomes will be reflected in the updated data we receive from CMS.

TECHNICAL QUESTIONS ABOUT SUBMITTING THE LEAPFROG ASC SURVEY

Question	Response
How do I access the Survey?	ASCs will need to request a security code to access the Survey if they are new to submitting the ASC Survey, using the ASC Security Code Request Form available here . If an ASC participated in previous years, their security code will be the same for 2025.
How do I know if my facility is an ASC?	An ASC is a distinct entity that exclusively provides same-day surgical services to patients not requiring hospitalization. Important characteristics of ASCs include the following: • If certified by Medicare, the facility is certified as an ASC (not all ASCs are certified by Medicare) and has been assigned a 10-digit CMS Certification Number (nn-Cnnnnnnn) • Provides surgical services that do not exceed 24 hours • May or may not be affiliated with a hospital • Often are specialty-specific More details can be found here .
What does the Survey cover?	The Leapfrog ASC Survey includes measures of several important areas of care including basic facility information; ethical billing and health equity; medical, surgical and nursing staff; volume and safety of procedures; patient safety practices; and patient experience. Like all of Leapfrog's programs, the Survey is evidence-based and predicated on the latest science, developed with guidance from Leapfrog's National Expert Panel and the Armstrong Institute for Patient Safety and Quality at Johns Hopkins Medicine.
Will ASCs be reported as "Declined to Respond" if they do not submit the ASC Survey to Leapfrog in 2025?	ASCs that do not submit the 2025 ASC Survey by June 30 will appear in initial location-based search results on Leapfrog's public reporting website, ratings.leapfroggroup.org if users opt to view facilities that declined to respond. Additionally, a direct search by facility name will generate a "Declined to Respond" message if the facility does not participate by June 30. Facilities that miss the June 30 Submission Deadline can still submit a Survey through November 30; results are updated monthly on Leapfrog's website.
Will ASCs get a letter grade? What is Leapfrog's initiative to rate outpatient care?	There are no current plans to give ASCs a letter grade. For five years, Leapfrog has assessed the quality and safety of procedures performed at ambulatory surgery centers (ASCs) and hospital outpatient procedure departments. 60% of employee procedures take place in the outpatient setting. Leapfrog collects the data through a voluntary Survey of ASCs as well as an outpatient procedure in addition to the existing Leapfrog Hospital Survey, which previously covered inpatient care only. Results for both types of facilities are publicly reported at https://ratings.leapfroggroup.org , allowing comparison between both.
Can all ASCs participate?	All ASCs in the United States are invited to participate in the Leapfrog ASC Survey, though an ASC must perform at least one of the procedures in the profile section of the ASC Survey in order to participate.

Where can I ask a clinical or scientific inquiry about a question on the Survey? Please contact the Help Desk (<https://leapfroghelpdesk.zendesk.com/>) for assistance.

TECHNICAL QUESTIONS ABOUT THE LEAPFROG HOSPITAL SAFETY GRADE

Question	Response
What is The Leapfrog Hospital Safety Grade?	The Leapfrog Hospital Safety Grade is an "A," "B," "C," "D," or "F" assigned to general hospitals in the U.S., the only such rating program focused exclusively on how safe they are for their patients. The grade uses over 30 measures including rates of preventable errors, injuries and infections, and whether hospitals have systems in place to prevent them. Grades are updated twice annually, in the fall and spring, and are freely available to the public at www.hospitalsafetygrade.org . The Hospital Safety Grade uses a public, peer-reviewed methodology, calculated by top patient safety experts under the guidance of a National Expert Panel, and is 100% transparent and free to the public.
What is the difference between the Leapfrog Hospital Survey and the Leapfrog Hospital Safety Grade?	The Leapfrog Hospital Survey is an annual voluntary survey in which Leapfrog asks hospitals to report quality and safety data and then publicly reports that information by hospital. The Leapfrog Hospital Safety Grade is a letter grade Leapfrog bi-annually assigns to general hospitals in the United States, whether they voluntarily report data to Leapfrog or not. If a hospital does not report to the Leapfrog Hospital Survey, other sources of data are used to calculate a Grade. The majority of data used to calculate the Safety Grade comes from the Centers for Medicare and Medicaid Services (CMS).

• READ MORE: Face mask mandates return as doctors warn of 'quad-demic'

If you have a health emergency, the last thing you want to have to worry about is whether the hospital you are being treated in is unsafe.

Yet this is very real concern. More than 200,000 people die every year from preventable hospital errors, injuries, accidents, and infections - the equivalent of around 550 per day - according to multiple studies.

Now, thanks to exclusive new data provided to DailyMail.com, you can find out this vital information in advance by entering your zip code into our interactive map.

Analysts at Leapfrog Hospital Safety graded more than 3,000 general acute care hospitals across the nation from A to F.

The ratings are based on factors such as the number of medical errors, accidents and hospital-acquired infections reported by each center over the past 12 months.

Director of healthcare ratings at Leapfrog, Katie Stewart, told DailyMail.com: 'Hospitals with an 'F' grade rank in the bottom 1 percent nationally for patient safety.

'Patients treated in hospitals with a 'D' or 'F' grade are twice as likely to die from preventable errors compared to those in hospitals with an 'A' Grade.'

And there are some worrying trends when grades are compared state by state...

USE OUR TOOL BELOW, CREATED IN COLLABORATION WITH LEAPFROG HEALTH, TO FIND YOUR LOCAL HOSPITAL:

What the data shows

To produce the Leapfrog Hospital Safety Grade report, the experts looked at 22 measures of patient safety - including the amount of infections, patient-doctor communication, surgery errors and cleanliness - and rated each one accordingly.

Every acute care hospital in America RANKED: Our interactive map reveals dangers lurking near you...

In some cases, when a hospital's information was not available for a certain measure, Leapfrog contacted the organizations for more information or analyzed external reports.

Due to the limited availability of public data Leapfrog - which releases safety reports twice a year - was not able to calculate a safety grade for every hospital in the US.

Institutions with restricted public data include long-term care and rehabilitation facilities, mental health facilities and some specialty hospitals, such as surgery centers and cancer hospitals.

The worst rankings

A total of 14 out the 3,000 hospitals ranked were graded 'F' in the report.

The research showed that Florida has some of the worst-rated hospitals in the country, with three awarded the dreaded 'F' ratings.

These were Delray Medical Center, the Good Samaritan Medical Center, and Palm Beach Gardens Medical Center, which together treat more than 450,000 patients each year.

Palm Beach Gardens Medical Center has been involved in several medical care scandals, including its doctors allegedly falsifying medical records and being sued over misdiagnoses.

Michigan was the only other state with multiple hospitals slapped with 'F' ratings.

These included MC Detroit Receiving Hospital and DMC Sinai-Grace Hospital, which treat a combined number of 200,000 patients annually.

In Michigan, DMC Detroit Receiving Hospital is currently embroiled in a multi-million dollar lawsuit over claims of negligence, which allegedly led to two patients being raped, and another committing suicide inside a room.

Former staff members have said that severe understaffing had allowed the hospital turn into a crime scene.

One of the most shocking cases alleged in the lawsuit involved a male patient who raped a female psychiatric patient receiving in-patient care while restrained in bed.

Elsewhere, scandal-hit SSM Health DePaul Hospital in Missouri was also given an F rating.

Last year more than 30 patients alleged sexual abuse, including some as young as five years old.

Other US hospitals to receive F rankings included the Regional West Medical Center in Nebraska, Berkeley Medical Center in West Virginia, Rivers Health in West Virginia, HSHS St. Mary's Hospital in Illinois, Hutchinson Regional Medical Center in Kansas, Pacifica Hospital of the Valley in California and Howard University Hospital in Washington DC.

Daily Mail has approached the hospitals that received poor scores for comment.

The best hospitals

The state with the highest percentage of A grade hospitals was Utah, with just over 60 percent of its care facilities getting top marks.

Some of the state's top ranking hospitals included Lone Peak, Lakeview, Intermountain Spanish Fork and Holy Cross.

These health centers scored highly in many areas, with an effective leadership said to be one of the main factors in lowering the number of harmful events and increasing all-round efficiency.

Every acute care hospital in America RANKED: Our interactive map reveals dangers lurking near you...

In at second place, Virginia saw 58 percent of its hospitals get A grades. It was followed by Connecticut (50 percent), North Carolina (46.7 percent), and New Jersey (46.3 percent).

California ranked in the top 10 for the first time since fall 2014, coming in at sixth place in the state rankings with 44.9 percent of its hospitals getting A grades.

Rounding out the top ten were Rhode Island (44.4 percent), Idaho (42.9 percent), and Pennsylvania (41.2 percent), while Colorado and South Carolina tied at tenth place with 40.4 percent scores.

Iowa, North and South Dakota and Vermont did not have any hospitals with an A grades.

Making improvements

The analysts said the latest grades showed hospitals are 'making progress in patient safety across several performance measures including notable improvements in healthcare associated infections, hand hygiene and medication safety'.

But they added that there are still far too many disparities and 'we haven't yet achieved consistent improvements across all areas of safety'.

Leapfrog representative, Ms Stewart, said the data showed that 'many hospitals with poor grades show a strong commitment to improvement and often enhance patient safety quickly'.

'We have seen hospitals go from an 'F' Grade all the way to an 'A' through an unrelenting focus on putting patients first,' she added.

More than 20 hospitals that received C ratings in Leapfrog's spring 2024 report saw these bumped up to A grades come fall.

However, more than 50,000 lives could be saved every year if F, D, C, and B grades could improve their patient safety record to that achieved by A grade hospitals.

A 2024 report led by researchers from Michigan State University highlighted that 400,000 hospitalized patients experienced some preventable harm each year.

Medical errors can also have a high cost, with some experts estimating that adverse events cost the healthcare system \$20 billion each year.

Others approximate healthcare costs of \$35.7 billion to \$45 billion annually for hospital-acquired infections alone.

Commenting further on the findings, Leapfrog Group's CEO, Leah Binder, said: 'Preventable deaths and harm in hospitals have been a major policy concern for decades.

'So, it is good news that Leapfrog's latest safety grades reveal that hospitals across the country are making notable gains in patient safety, saving countless lives.

'Next, we need hospitals to accelerate this progress - because no one should have to die from a preventable error in a hospital.'

The most common blunders

More than 200,000 people die every year from preventable hospital errors, injuries, accidents, and infections, the equivalent of around 550 per day.

In the Leapfrog report, medication errors were shown to be the most common type of blunder.

Research suggested the average hospitalized patient is subject to at least one medication error per day, and an estimated 40 percent of errors occur in handoffs during the admission, transfer and discharge of patients.

Every acute care hospital in America RANKED: Our interactive map reveals dangers lurking near you...

Company spokesperson Ms Stewart said: 'We are still not where we need to be as a country, and too many lives are lost to preventable errors.'

She encouraged patients to consult the grades when seeking care, as 'all hospitals are not the same' when it comes to standards.

An adverse events report from the Joint Commission - a US-based not-for-profit organization that analyzes hospital and healthcare data from across the world - recently revealed a range of blunders from hospitals across the US.

It has been releasing data about these events since at least 2013.

The report from 2023 (the most recent available) found there were 110 patients who had foreign objects left in their body - an 11 percent increase from 2022.

Of the objects mistakenly left behind, 35 percent were sponges, 10 percent were guide wires and eight percent were fragments of medical instruments.

The remaining 47 percent was a miscellaneous mixture of other tools - with one case reporting surgical scissors left in the body.

After foreign objects, there were 106 cases of assault, rape, sexual assault or homicides involving hospitalized patients in America in 2023, according to the report.

Half of these were patient-on-patient, 28 percent involved staff-on-patient and 13 percent involved a patient acting on a staff member.

Finally, there were 81 cases where patients had treatment delayed unnecessarily and 71 cases where patients committed suicide while at the hospital.

The Joint Commission's hospital patient safety goals for 2025 include improving patient identification to ensure they get the correct medicine and treatment, encouraging more staff to adhere to hand cleaning guidelines and taking greater care in surgery to avoid potentially fatal mistakes.

Good morning!

I don't mean to be a pest about marketing, and I know you don't control it, but I am passing on relevant information. This morning, on the Channel 5 news, Jupiter Medical ran a misleading ad which said that it is "the only A-rated hospital in Palm Beach County." It did not say according to Leapfrog or any other limiting language – a flat out broad statement. PBGMC needs to fight fire with fire if it wants to improve its image in the community.

Mike

Subject: Palm Beach Gardens Living Magazine

Hi Erik,

Happy New Year!

Attached is a page from the Palm Beach Gardens Living magazine which I received in the mail today. I believe this magazine is mailed to every home in PBG. It's a shame that Jupiter Medical Center, and not PBGMC, is

getting to tell its story to all PBG residents. I suspect that this is paid advertising, but I suggest that you forward this to our marketing group and ask them to look into doing something like this in the next issue of this magazine. We should try to take back control of the messaging in our own backyard.

Thanks, and I look forward to seeing you on Wednesday morning!

Mike

03:00

Florida hospitals are doing a good job with patient safety, with the state just behind California for the highest number of hospitals recognized by the Leapfrog Group as a “Top Hospital.” But some South Florida hospitals have some work to do.

More than half the hospitals in the Miami-Fort Lauderdale-West Palm Beach metro area received a “C” or lower in preventing medical errors, accidents and infections in the fall 2024 patient safety report card.

The good news is that one of the region’s “A” hospitals, Larkin Community Hospital in South Miami, did well enough in patient safety to earn a “Top Hospital” recognition in December.

By Invesco QQQ

"In "A" hospitals, leadership is involved in regular safety huddles and works to create a culture where staff at all levels feel comfortable speaking up when an error or near-miss occurs," Missy Danforth, senior vice president of healthcare ratings at The Leapfrog Group, told the Miami Herald in an email.

Leapfrog's next report will be released in May.

The nonprofit Leapfrog uses more than 20 factors, including rates of preventable errors, injuries and infections to help patients pick the best hospital near them for care. Some of the collected data is voluntarily reported by hospitals to Leapfrog, and other data is collected from other sources such as from the federal Centers for Medicare and Medicaid Services.

Here's what to know about the grades and rankings:

South Florida's Leapfrog patient safety grades

Eleven hospitals in Miami-Dade, Broward and Palm Beach counties scored an "A" in the report, slightly better than in the previous report released in May. Nine hospitals got a B, 25 got a C, and three got a D. This time around, three hospitals in Palm Beach County received "F" grades.

"Florida ranks number 13 among all states for percentage of "A" graded hospitals, with 37% of hospitals in the state achieving the "A" Grade. In South Florida specifically, we see a mix of Grades. There are "A" graded hospitals and as low as "F" graded hospitals," Danforth said.

"Patients in "D" or "F" hospitals are twice as likely to die from preventable errors compared to those in "A" hospitals. Many hospitals with poor grades improve over time, showing strong commitment to keeping patients safe from preventable harm," she said. "Patients and families should communicate with doctors and hospital leaders about the importance of prioritizing patient safety."

The rankings don't include specialty hospitals, including children's hospitals such as Nicklaus near South Miami or Joe DiMaggio in Hollywood. It also doesn't include surgical centers, critical access hospitals and veteran hospitals, including the Miami VA. Leapfrog said a hospital could be excluded from the report for various reasons. They include not being required to publicly report their safety record to the federal government, being too small or lacking the necessary data.

Here's a look at how South Florida hospitals did:

How did Miami-Dade and Broward's public hospitals score?

- Jackson Memorial Hospital in Miami, Jackson North, Jackson West in Doral and Jackson South, all part of Miami-Dade's public hospital system, kept their "C" grades.

Jackson Health System, in an emailed statement to the Miami Herald, said patient safety is its highest priority.

"Over the last year, we have focused on implementing best practices in quality and safety at all of our facilities, and have seen gradual improvement. These grades reflect one-step forward as we make Jackson one of safest, highest quality healthcare systems in Miami-Dade County," Jackson Health said in its statement. "We pay close attention to these safety scores and use them as a tool to evaluate ways in which we can further improve and implement lasting change throughout our organization."

- Broward Health North in Deerfield Beach kept its "A" grade. Broward Health Coral Springs kept its "B" grade. Fort Lauderdale's Broward Health Medical Center and Broward Health Imperial Point kept their "C" grades.

Broward Health, in an emailed statement to the Miami Herald, said its proud of Broward Health North retaining its "A" and being the "only hospital in its primary service area" to earn an "A" in Leapfrog's most recent report.

"The system remains dedicated to the continuous improvement of patient safety and care quality," Broward Health said in a statement. "These Leapfrog scores also provide valuable insights for growth and reinforce our commitment to ensuring the highest levels of safety, quality and satisfaction for all patients."

- Memorial Hospital Miramar kept its A. Memorial Regional Hospital in Hollywood, Memorial Regional Hospital South in Hollywood, Memorial Hospital Pembroke Pines and Memorial Hospital West in Pembroke Pines kept their “C” grades.

Best and worst South Florida hospitals for patient safety?

Here are the hospitals that scored an “A” grade:

- Baptist Health Homestead Hospital, 975 Baptist Way, Homestead, kept its “A” grade.
- Baptist Health South Miami Hospital, 6200 SW 73rd St., kept its “A” grade.
- Baptist Health West Kendall Baptist Hospital, 9555 SW 162nd Ave., kept its “A” grade.

Other Baptist Health South Florida hospitals scored B’s and C’s.

“Our mission is to provide high-quality and compassionate care in a welcoming and safe environment. We appreciate programs like Leapfrog and their efforts to help customers make decisions while holding healthcare systems to high standards,” Baptist Health said in a statement. “We recognize that there are always opportunities for improvement, and remain committed to providing the best possible care for our patients.”

- Broward Health North, 201 E Sample Rd. in Deerfield Beach, kept its “A” grade.
- HCA Florida Aventura Hospital, 20900 Biscayne Blvd., boosted its score from a “B” to an “A.”
- HCA Florida Kendall Hospital, 11750 SW 40th St., kept its “A” grade.
- HCA Florida Westside Hospital, 8201 W Broward Blvd. in Plantation, kept its “A” grade.

HCA Florida’s other hospitals in the region and elsewhere in the state received scores ranging from A-C’s. One HCA Florida hospital in Citrus County received a “D.”

“Our hospitals regularly measure and report hundreds of quality and patient safety data points, directly related to patient outcomes, across multiple patient populations,” HCA Florida Healthcare told the Miami Herald in a statement. “We recognize the importance of measuring quality and safety in patient care and are

working hard to improve in certain areas. Our physicians, nurses, and colleagues are dedicated to providing exceptional care for our patients.”

- Jupiter Medical Center, 1210 S. Old Dixie Hwy., kept its “A” grade.
- Larkin Community Hospital, 7031 SW 62nd Ave. in South Miami, kept its “A” grade. The teaching hospital was also awarded a “Top Hospital” award by Leapfrog in December for being one of the state’s top-performing hospitals in patient safety and care.

READ MORE: These Miami-area hospitals and surgery centers are the best in the state, rankings say

- Memorial Hospital Miramar, 1901 SW 172nd Ave., kept its “A” grade.
- Hialeah Hospital, 651 E 25th St., boosted its score from a “B” to an “A.”

Here are the hospitals that scored a “D” or worse:

- Delray Medical Center, 5352 Linton Blvd. in Delray Beach, saw its score lower from a “D” to an “F.”
- Good Samaritan Medical Center, 1309 N. Flagler Dr. in West Palm Beach, saw its score worsen from a “C” to an “F.”
- Mount Sinai Medical Center, 4300 Alton Rd. in Miami Beach, kept its “D” grade.
- Palm Beach Gardens Medical Center, 3360 Burns Rd., saw its score worsen from a “C” to an F.”
- St. Mary’s Medical Center, 901 45th St. in West Palm Beach, saw its score lower from a “C” to a “D.”
- West Boca Medical Center, 21644 State Rd. 7, kept its “D” grade.

Check your South Florida’s hospital patient safety grade

How did your South Florida hospital do in patient safety? Take a look at the chart below:

How safe is your South Florida hospital?

Leapfrog Group gives A-F grades to hospitals nationwide twice a year for patient safety. Here's how South Florida hospitals ranked in the nonprofit's Fall 2024 report. A is best, F is worst.

Page 1 of 11 >

Hospital Name	City	County	Fall 2024 Score	Spring 2024 Score
Baptist Health Homestead Hospital	Homestead	Miami-Dade County	A	A
Baptist Health Baptist Hospital of Miami	Miami	Miami-Dade County	C	C
Baptist Health Bethesda Hospital East	Boynton Beach	Palm Beach County	B	C
Baptist Health Bethesda Hospital West	Boynton Beach	Palm Beach County	C	C
Baptist Health Boca Raton Regional Hospital	Boca Raton	Palm Beach County	C	C

The rankings don't include specialty hospitals, including children's hospitals, surgical centers, critical access hospitals and veteran hospitals. LeapFrog said this could be because the hospitals aren't required to publicly report their safety record to the federal government, the hospitals are too small or they lack the necessary data.

Source: Leapfrog Group • Table: Michelle Marchante

Visit hospitalsafetygrade.org/ to learn more about your hospital's grade and to see how other Florida hospitals scored.

What the Leapfrog patient safety hospital report shows

- LeapFrog said it grades nearly 3,000 hospitals in the country twice a year “on the very basics of medical care, such as hand-washing, entering prescriptions through a computer, and the availability of highly trained nurses.” While you can look at a hospital's overall grade, you can also get a more detailed look at how your hospital ranked in categories including infections; problems with surgery; safety problems; practices to prevent errors; and how well doctors, nurses and hospital staff respond and communicate.
- LeapFrog recommends people consider how well a hospital scores in hand-washing, reducing blood infections and patient falls when picking a place to seek care. Of course, if you have an emergency, go to your nearest hospital for care.

Michelle Marchante covers the pulse of healthcare in South Florida and also the City of Coral Gables. Before that, she covered the COVID-19 pandemic, hurricanes, crime, education, entertainment and other topics in South Florida for the Herald as a breaking news reporter. An investigative series about the abrupt closure of a Miami heart transplant program led Michelle and her colleagues to be recognized as finalists in two 2024 Florida Sunshine State Award categories. She also won second place in the 73rd annual Green Eyeshade Awards for her consumer-focused healthcare stories and was part of the team of reporters who won a 2022 Pulitzer Prize for the Miami Herald's breaking news coverage of the Surfside building collapse. Michelle graduated with honors from Florida International University and was a 2025 National Press Foundation Covering Workplace Mental Health fellow and a 2020-2021 Poynter-Koch Media & Journalism fellow. Message

From: Nunes, Andrea [/O=EXCHANGELABS/OU=EXCHANGE ADMINISTRATIVE GROUP (FYDIBOHF23SPDLT)/CN=RECIPIENTS/CN=74E5480103274FD1B0332021509C584A-NUNES, ANDR]
Sent: 1/28/2025 11:34:10 PM
To: Ramirez, Ricardo [Ricardo.Ramirez@tenethealth.com]
Subject: Leapfrog WBMC Score

Dr. Ocampo just sent me a text with a screen shot of the West Boca Medical Center D Grade. I am sharing her concern in the statements below.

Her friend subsequently bypassed us for Boca Regional.

She asked me if it was true. I said, yes, we really received a D. I explained we do not participate in the surveys and do not have the benefit of adding additional information. Leapfrog selects Patient Experience, HAIs, HACs and PSI.

She states her friend is a physician, does not care about google ratings but does care about leapfrog.

I do believe we could increase to a C, maybe a B if we resurveyed by June. I think we would need to work on the CPOE and Bar Coding.

Patient Experience brings us down significantly. (I did not tell her this opinion.)

Thanks,
Andrea

Subject: Regional Leader Agenda and Patient Safety Awareness Week 2025 Social Content
Attachments: 2025 Patient Safety Awareness Week Social Media.docx; PSAW25 (2).zip; March Regional Leader Agenda .docx

Dear Regional Leaders -

This week is Patient Safety Awareness Week. I have attached a few social media posts and graphics for you to use with your community. Please feel free to share!

I've also attached the agenda for our Regional Leader meeting tomorrow. You'll notice that the 2025 Communication Toolkit is online and has a new look. I look forward to sharing it tomorrow. We will also have a presentation from Trinette Small, one of our 2024 Bruce Bradley Fellows, on her project - Maternity Care Insights.

Please let me know if you have any questions.

Best,

Jill

The Leapfrog Group and Jupiter Medical Center as of 3/26/2025 with 242
Name of Hospital (Licensee) **Effective Date** **# of Staffed Beds**

agree that Leapfrog grants Licensee a limited, non-transferable, and non-exclusive license to use one or more of the following Leapfrog logos, including their respective program logos (collectively, the "Designated Leapfrog Logos"), as indicated below, in accordance with the terms of this Letter of Agreement for both commercial and non-commercial promotion:

- ☒ **Spring 2025 Hospital Safety Grade (e.g. "A" or "B" Logo)**
☐ **Leapfrog 2024 Top Hospital**
☐ **2025 Recognized Leader in Caring for People with Diabetes**

Licensee acknowledges that this Agreement applies only to the Designated Leapfrog Logos selected above and all terms and conditions outlined herein govern their use.

Fee Table: Licensee agrees to pay The Leapfrog Group (please indicate tier of staffed beds on the table below):

Hospital Size	Indicate Tier with an "X"	Safety Grade Price	Top Hospital Price	Recognized Leader in Diabetes Care Price	Price with \$1,000 Embargo Discount**
<50 staffed beds		\$6,700	\$6,700	\$6,700	\$5,700
50 – 99 staffed beds		\$7,900	\$7,900	\$7,900	\$6,900
100 – 149 staffed beds		\$9,900	\$9,900	\$9,900	\$8,900
150 – 199 staffed beds		\$10,900	\$10,900	\$10,900	\$9,900
200 – 249 staffed beds	X	\$12,900	\$12,900	\$12,900	\$11,900
250 – 299 staffed beds		\$17,900	\$17,900	\$17,900	\$16,900
300 – 399 staffed beds		\$19,900	\$19,900	\$19,900	\$18,900
400 – 499 staffed beds		\$26,900	\$26,900	\$26,900	\$25,900
500+ staffed beds		\$29,900	\$29,900	\$29,900	\$28,900

Total Price: 11,900.00

* Combined purchase of two or more logo licenses will receive a 20% discount.

**Embargo Discount applied when signed license received by 4/30/2025 and cannot be combined with any other discounts.

This license allows the Licensee to use the Designated Leapfrog Logos in accordance with this Agreement and the Terms of Use attached as Exhibit A and the Leapfrog Group Style Guide for Hospitals. The Agreement becomes effective upon execution. An invoice will be issued within 72 hours of Leapfrog's receipt of the executed Agreement, and payment is due upon receipt.

Leapfrog releases updated Safety Grades twice per year, in Fall and Spring, and the Top Hospital designation once per year in the fall. Recognized Leader in Diabetes Care is designated once annually. This Agreement allows Licensee to use the Leapfrog Hospital Safety Grade "A" or "B" Logo and Leapfrog Hospital Safety Grade Program Logo for the current Spring 2025 ratings cycle plus the subsequent, Fall 2025 ratings cycle if Licensee is deemed eligible to use the respective logo by Leapfrog. The Designated Leapfrog Logos for the year or cycle this license is purchased may be promoted in perpetuity. Congratulations on earning the prestigious accolades.

Accepted and Agreed To:

Hospital Name: Jupiter Medical Center

EXHIBIT A

Terms of Use of the Leapfrog Designated Logos

A. Licensee shall have the following rights and obligations:

1. Licensee may announce and display the Designated Leapfrog Logos on its website, hospital signage, through broadcast and radio advertisements, in paid print and online advertisements and through marketing materials (collectively, "Commercial Use"). Licensee may not change the form or display any of the Designated Leapfrog Logos.
2. If part of a multicampus organization or part of a multihospital system, Licensee must make clear that the Designated Leapfrog Logos apply only to specific campuses or to specific hospitals and not to the entire organization or system.
3. Licensee should give credit to The Leapfrog Group and link to Leapfrog's respective program webpage where possible and appropriate, for example:
 - i. Leapfrog Hospital Safety Grade website (www.hospitalsafetygrade.org)
 - ii. Leapfrog Top Hospital: (www.leapfroggroup.org/TopHospitals)
 - iii. Leapfrog and ADA's Recognized Leader in Caring for People Living with Diabetes <https://www.leapfroggroup.org/diabetes>
4. Licensee may NOT publish or refer to the Leapfrog Hospital Safety Grade underlying numerical values or display numerical values relating to the ratings programs (e.g. Hospital Safety Grade's numerical scores) via web, print, or any other media.
5. When using or displaying the Leapfrog Designated Logos, Licensee must display the most recent, officially licensed Leapfrog Designated Logos during the term of the License. The date-stamped logo (e.g., Spring 20XX or Fall 20XX) corresponding to the applicable Leapfrog Program cycle must be included wherever the designation appears. No alterations, modifications, or removal of date stamps from the logo are permitted.
6. Licensee may not republish the Designated Logos of any facilities other than its own purchased through this Agreement. The Designated Leapfrog Logos may only be used by the specific facility or facilities that have individually purchased a license. Logos may not be transferred, sublicensed, or displayed by any other hospital within a multi-hospital system or by parent organizations that have not obtained an active license for each facility using the logos.
7. Licensees using the Leapfrog Hospital Safety Grade must display the Official Licensure Logo (Leapfrog Hospital Safety Grade "A" or "B" Logo) as displayed below in any printed or web materials. Licensees may choose to display the Leapfrog Hospital Safety Grade Program Logo and/or The Leapfrog Group Logo.

LEAPFROG
**HOSPITAL
SAFETY GRADE**

- i. The Leapfrog Hospital Safety Grade measures patient safety. Licensee must not state or imply that the Leapfrog Hospital Safety Grade measures or describes any other quality, e.g., patient satisfaction, quality of care provided, overall performance, etc.
 - ii. Licensee must not state or imply that it is safer than hospitals receiving lower letter grades on the Leapfrog Hospital Safety Grade unless the statement is qualified to indicate the concept "as measured by the Leapfrog Hospital Safety Grade." Preferred language would be, "X Hospital has received a higher Leapfrog Hospital Safety Grade than other hospitals in our community." Licensee must not state or imply that it is safer than other hospitals receiving the same letter grade on the Leapfrog Hospital Safety Grade. Licensee may not publicly display or otherwise reveal relative rankings among hospitals receiving the same letter grade in any use.
8. Licensees using the Top Hospital Designation must display the Official Licensure Logo (Top Hospital Logo) as displayed below in any printed or web materials. Licensee may additionally choose to display The Leapfrog Group Logo.

9. Licensees using the Leapfrog and American Diabetes Association Recognized Leader in Caring for People With Diabetes Designation Logo as displayed below in any printed or web materials. Licensee may additionally choose to display The Leapfrog Group Logo.

10. Licensees with a current, active license that is purchased within one year of the Effective Date, may also display The Leapfrog Group Logo as displayed below in any printed or web materials.

13. Nothing in this Agreement shall give Licensee any right, title or interest in or to the Designated Leapfrog Logos. Licensee acknowledges and agrees that Leapfrog is the exclusive owner of all rights, title and interest in and to the Designated Leapfrog Logos. Licensee shall not act in any manner that would or might conflict with or compromise Leapfrog's ownership of the Designated Leapfrog Logos, or similarly affect the value or goodwill pertaining to the Designated Leapfrog Logos, such as by applying to register any identical or similar trademark anywhere in the world.
14. The Designated Leapfrog Logos and all Intellectual Property Rights (defined below) therein are owned by Leapfrog. Licensee shall not reproduce, republish, distribute, modify, reverse engineer or otherwise exploit the Designated Leapfrog Logos in whole or in part, in any manner not expressly permitted by this Agreement and must not remove or modify any copyright or trademark notice, or other notice of ownership.

"Intellectual Property Rights" means all intellectual property rights of any kind or nature however denominated throughout the world, including, without limitation all copyrights, patents, patent applications, trade secrets, inventions, propriety know-how, registered and unregistered trademarks, registered and unregistered service marks, domain names, registered and unregistered trade names, rights of privacy and publicity, moral rights, and database rights.

15. Licensee agrees to indemnify and hold each of Leapfrog and any agent appointed by Leapfrog to pursue and enforce its rights and to undertake and fulfill its obligations under this Agreement ("Agent") and their respective affiliates and all of their respective past, present, and future directors, officers, employees, successors and agents and all of their respective successors and assigns, both individually and in their official capacities harmless from and against any and all liabilities, damages, demands, claims, causes of action, fines or penalties (including, without limitation, court costs and reasonable attorneys' fees) arising out of or related to the failure of Licensee to fulfill any of Licensee's obligations under this Agreement or Licensee's use of or access to the Designated Leapfrog Logos.

16. NEITHER LEAPFROG NOR ITS AGENT WILL HAVE ANY RESPONSIBILITY AND WILL BEAR NO LIABILITY WHATSOEVER WITH REGARD TO REPLACING, UPLOADING, VALIDATING, OR CORRECTING ANY LEAPFROG HOSPITAL SAFETY GRADE OR TOP HOSPITAL DESIGNATION ONCE RELEASED. LICENSEE ACKNOWLEDGES AND AGREES THAT, SINCE THE LEAPFROG HOSPITAL SAFETY GRADES AND TOP HOSPITAL DESIGNATIONS ARE BASED ON INFORMATION PROVIDED BY THIRD PARTIES, IT IS REASONABLE THAT THE LEAPFROG HOSPITAL SAFETY GRADE AND TOP HOSPITAL DESIGNATIONS, AND ANY SERVICES PROVIDED UNDER THIS AGREEMENT BE, AND THEY ARE "AS IS", "AS AVAILABLE" AND "WITH ALL FAULTS". LEAPFROG AND ITS AGENT DISCLAIM ANY AND ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF TITLE, NON-INFRINGEMENT, FITNESS FOR A PARTICULAR PURPOSE, MERCHANTABILITY, OR ARISING OUT OF ANY COURSE OF DEALING.
17. TO THE FULL EXTENT PERMITTED BY LAW, NEITHER LEAPFROG NOR AGENT IS LIABLE FOR ANY INDIRECT, PUNITIVE, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES OR ANY DAMAGES FOR LOSS OF BUSINESS, REVENUE, OR PROFIT OR ANY OTHER DAMAGES OF ANY KIND OR NATURE ARISING OUT OF OR IN CONNECTION WITH LICENSEE'S USE OF DESIGNATED LEAPFROG LOGOS, EVEN IF LEAPFROG HAS PREVIOUSLY BEEN ADVISED OF, OR REASONABLY COULD HAVE FORESEEN, THE POSSIBILITY OF SUCH DAMAGES, HOWEVER THEY ARISE, WHETHER IN CONTRACT, TORT, WARRANTY, OR ANY OTHER LEGAL THEORY.
18. This Agreement, the rights, and obligations hereunder, and any claims or disputes relating thereto, will be governed by and construed in accordance with the laws of the District of Columbia without regard to the principles of conflicts of laws. Any claim, suit, or action arising under or relating to this Agreement must be brought and maintained exclusively in courts located within the District of Columbia.
19. Licensee may not assign, sublicense, delegate or otherwise transfer this Agreement or any right granted hereunder.
20. This Agreement constitutes the entire agreement between Licensee and Leapfrog relating to this subject matter.
21. This Agreement shall terminate automatically and immediately upon a breach by the Licensee, as determined in Leapfrog's sole and absolute discretion. Upon termination of the License, Licensee must immediately cease use of the Top Hospital Designation and the Hospital Safety Grade and all Designated Leapfrog Logos.
22. If payment is not received by Leapfrog within forty-five (45) days after the due date, or any Licensee violates, or is perceived by Leapfrog to have violated, the terms of this Agreement, as determined within Leapfrog's sole discretion, Leapfrog reserves its rights to: (1) impose interest on its outstanding invoices at a rate of six (6) percent annually; (2) immediately suspend this Agreement, and any rights Licensee has or may have hereunder; and, (3) categorize Licensee as ineligible for licensure under future iterations of this Agreement. Additionally, Leapfrog reserves the right to indefinitely refuse and withhold future licensure to any Licensee or potential Licensee, in its sole discretion, based upon said Licensee being in arrears on payments due to Leapfrog under this Agreement.
23. These Terms of Use shall survive the termination of this Agreement.

HOSPITAL

SAFETY GRADE

WHAT IS THE HOSPITAL SAFETY GRADE?

Leapfrog Hospital Safety Grades are assigned to nearly 3,000 general acute-care hospitals across the nation twice annually. The Safety Grade uses up to 22 national patient safety measures from the Centers for Medicare & Medicaid Services (CMS) and the Leapfrog Hospital Survey, and information from other supplemental data sources, to produce a single letter grade representing a hospital's overall performance in keeping patients safe from preventable harm and medical errors. The Safety Grade methodology has been peer reviewed and published in the Journal of Patient Safety.¹

With the Safety Grade, The Leapfrog Group aims to educate and encourage consumers to consider safety when selecting a hospital for themselves or their families. In addition, we believe the Safety Grade will foster strong market incentives for hospitals to make safety a priority. Safety Grades are publicly reported at www.HospitalSafetyGrade.org.

ELIGIBLE HOSPITALS

Due to the limited availability of public data, Leapfrog is not able to calculate a Safety Grade for every hospital in the U.S., including the following types of hospitals:

- Critical access hospitals (CAH)
- Rural emergency hospitals (REH)
- Long-term care and rehabilitation facilities
- Mental health facilities
- Federal hospitals (e.g., Veterans Affairs, Indian Health Services, etc.)
- Some specialty hospitals, such as surgery centers and cancer hospitals
- Free-standing pediatric hospitals
- Hospitals in U.S. territories
- Hospitals that are missing scores for **more than six (6)** process/structural measures, or **more than five (5)** outcome measures, or **missing PSI 90**

¹ The Leapfrog Hospital Safety Grade uses the below-described data and reflects expert opinion as to the relative importance of each category.

HOSPITAL

SAFETY GRADE

MEASURES

The Safety Grade utilizes up to 22 national patient safety measures from the Centers for Medicare & Medicaid Services (CMS) and the Leapfrog Hospital Survey, and information from other supplemental data sources.

The measure set is divided into two domains: (1) Process/Structural Measures and (2) Outcome Measures. Each domain represents 50% of the Safety Grade. The following table lists the 22 measures included in the Safety Grade, as well as the data source and reporting period for each measure. In some cases where a hospital's information is not available for a certain measure, Leapfrog uses a secondary data source (as indicated in the table). In cases where a hospital's information is not available from any data source, Leapfrog has outlined a methodology for dealing with the missing data.

PROCESS/STRUCTURAL MEASURES (12)				
Measure Name	Primary Data Source	Reporting Period	Secondary Data Source	Reporting Period
Computerized Physician Order Entry (CPOE)	2024 Leapfrog Hospital Survey	2024	Imputation Model Applied*	N/A
Bar Code Medication Administration (BCMA)	2024 Leapfrog Hospital Survey	2024	Imputation Model Applied*	N/A
ICU Physician Staffing (IPS)	2024 Leapfrog Hospital Survey	2024	Imputation Model Applied*	N/A
Safe Practice 1: Culture of Leadership Structures and Systems	2024 Leapfrog Hospital Survey	2024	N/A	N/A
Safe Practice 2: Culture Measurement, Feedback & Intervention	2024 Leapfrog Hospital Survey	2024	N/A	N/A

OUTCOME MEASURES (10)

PSI 4: Death rate among surgical
 inpatients with serious
 treatable complications

CMS

07/01/2021 - 06/30/2023

N/A

N/A

Measure Name	Primary Data Source	Reporting Period	Secondary Data Source	Reporting Period
CMS Medicare PSI 90: Patient safety and adverse events composite*	CMS	07/01/2021 - 06/30/2023	N/A	N/A

* CMS calculates PSI 90 using the ten (10) component PSIs. While scores for each of the 10 component PSIs are not used to calculate spring 2025 Hospital Safety Grades, they will be publicly reported on the Hospital Safety Grade [website](#).

***COMPONENT PSIs (SCORES NOT USED TO CALCULATE THE HOSPITAL SAFETY GRADE)

Component PSI	Primary Data Source	Reporting Period	Secondary Data Source	Reporting Period
PSI 3: Pressure ulcer rate	CMS	07/01/2021 - 06/30/2023	N/A	N/A
PSI 6: Iatrogenic pneumothorax rate	CMS	07/01/2021 - 06/30/2023	N/A	N/A
PSI 8: In-hospital fall with hip fracture rate	CMS	07/01/2021 - 06/30/2023	N/A	N/A
PSI 9: Postoperative hemorrhage or hematoma rate	CMS	07/01/2021 - 06/30/2023	N/A	N/A
PSI 10: Postoperative acute kidney injury requiring dialysis rate	CMS	07/01/2021 - 06/30/2023	N/A	N/A
PSI 11: Postoperative respiratory failure rate	CMS	07/01/2021 - 06/30/2023	N/A	N/A
PSI 12: Perioperative pulmonary embolism or deep vein thrombosis rate	CMS	07/01/2021 - 06/30/2023	N/A	N/A
PSI 13: Postoperative sepsis rate	CMS	07/01/2021 - 06/30/2023	N/A	N/A
PSI 14: Postoperative wound dehiscence rate	CMS	07/01/2021 - 06/30/2023	N/A	N/A
PSI 15: Abdominopelvic accidental puncture or laceration rate	CMS	07/01/2021 - 06/30/2023	N/A	N/A

Note: CMS calculates PSI 90 using the ten (10) component PSIs listed above. While scores for each of the 10 component PSIs are not used to calculate spring 2025 Hospital Safety Grades, they will be publicly reported on the Hospital Safety Grade [website](#).

MEASURE & SCORING DESCRIPTIONS**PROCESS/STRUCTURAL MEASURES**

For Process/Structural Measures, a higher score is always better because these are measures of compliance with best practices in patient care.

COMPUTERIZED PHYSICIAN ORDER ENTRY (CPOE)

The CPOE measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures a hospital's progress toward implementing a CPOE system to reduce medication ordering errors. Through participation in the Leapfrog Hospital Survey, hospitals are placed in one of several performance categories: "Achieved the Standard," "Considerable Achievement," "Some Achievement," "Limited Achievement," or "Unable to Calculate Score." For the purposes of calculating the Safety Grade, a numerical score is assigned to each performance category:

Leapfrog Performance Category	Measure Score
Achieved the Standard	100
Considerable Achievement	70
Some Achievement	40
Limited Achievement	15
Unable to Calculate Score	Not Available (See Scoring Terms)

For hospitals that did not submit a 2024 Leapfrog Hospital Survey by November 30, see [Using Secondary Data Sources](#) for more information on Leapfrog's imputation methodology.

BAR CODE MEDICATION ADMINISTRATION (BCMA)

The BCMA measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures a hospital's progress toward 1) implementation of BCMA throughout the hospital, 2) compliance with patient and medication scans during administration, 3) use of decision support, and 4) structures to monitor and reduce workarounds. Through participation in the Leapfrog Hospital Survey, hospitals are placed in one of several performance categories: "Achieved the Standard," "Considerable Achievement," "Some Achievement," "Limited Achievement," or "Does Not Apply." For the purposes of calculating the Safety Grade, a numerical score is assigned to each performance category:

Leapfrog Performance Category	Measure Score
Achieved the Standard	100
Considerable Achievement	75
Some Achievement	50
Limited Achievement	25
Does Not Apply	Not Available (See Scoring Terms)

For hospitals that did not submit a 2024 Leapfrog Hospital Survey by November 30, see [Using Secondary Data Sources](#) for more information on Leapfrog's imputation methodology.

ICU PHYSICIAN STAFFING (IPS)

The IPS measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures a hospital's use of intensivists in ICUs. Through participation in the Leapfrog Hospital Survey, hospitals are placed in one of several performance categories: "Achieved the Standard," "Considerable Achievement," "Some Achievement," "Limited Achievement," or "Does Not Apply." For the purposes of calculating the Safety Grade, a numerical score is assigned to each performance category:

Leapfrog Performance Category	Measure Score
Achieved the Standard	100
Considerable Achievement	50
Some Achievement	15
Limited Achievement	5
Does Not Apply	Not Available (See Scoring Terms)

For hospitals that did not submit a 2024 Leapfrog Hospital Survey by November 30, see [Using Secondary Data Sources](#) for detailed information on Leapfrog's imputation methodology.

NATIONAL QUALITY FORUM (NQF) SAFE PRACTICES

Two (2) NQF Safe Practice measures are collected by The Leapfrog Group on the Leapfrog Hospital Survey. They measure a hospital's progress toward implementing endorsed processes and protocols to reduce and prevent adverse events. Through participation in the Leapfrog Hospital Survey, hospitals can earn up to 120 points for each Safe Practice. For the purposes of calculating the Safety Grade, individual scores for each Safe Practice are used:

NQF Safe Practice	Possible Measure Score
Safe Practice 1: Culture of Safety Leadership Structures and Systems	0 - 120
Safe Practice 2: Culture Measurement, Feedback and Intervention	0 - 120

There is no secondary data source for the NQF Safe Practices. Therefore, hospitals that did not submit a 2024 Leapfrog Hospital Survey by November 30 will not have these measures included in their Safety Grade and the measure will be reported as "Declined to Report." See [Dealing with Missing Data](#) for more information.

TOTAL NURSING CARE HOURS PER PATIENT DAY

The Total Nursing Care Hours per Patient Day measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures the hospital's total number of productive hours worked by employee or contract nursing staff (i.e., RNs, LPNs, and UAPs) with direct patient care responsibilities per patient day across three unit types: medical, surgical, and med/surg. Through participation in the Leapfrog Hospital Survey, hospitals are placed in one of several performance categories: "Achieved the Standard," "Considerable Achievement," "Some Achievement," "Limited Achievement," or "Does Not Apply." For the purposes of calculating the Safety Grade, a numerical score is assigned to each performance category:

Leapfrog Performance Category	Measure Score
Achieved the Standard	100
Considerable Achievement	70
Some Achievement	40
Limited Achievement	15
Does Not Apply	Not Available (See Scoring Terms)

There is no secondary data source for the Total Nursing Care Hours per Patient Day measure. Therefore, hospitals that did not submit a 2024 Leapfrog Hospital Survey by November 30 will not have these measures included in their Safety Grade and the measure will be reported as "Declined to Report." See [Dealing with Missing Data](#) for more information.

HAND HYGIENE

The Hand Hygiene measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures processes and protocols that hospitals have in place regarding monitoring hand hygiene practices, fostering a culture of good hand hygiene, offering training and education, and providing equipment. Through participation in the Leapfrog Hospital Survey, hospitals are placed in one of several performance categories: "Achieved the Standard," "Considerable Achievement," "Some Achievement," "Limited Achievement." For the purposes of calculating the Safety Grade, a numerical score is assigned to each performance category:

Leapfrog Performance Category	Measure Score
Achieved the Standard	100
Considerable Achievement	70
Some Achievement	40
Limited Achievement	15

For hospitals that did not submit a 2024 Leapfrog Hospital Survey by November 30, see [Using Secondary Data Sources](#) for detailed information on Leapfrog's imputation methodology.

HOSPITAL CONSUMER ASSESSMENT OF HEALTHCARE PROVIDERS AND SYSTEMS (HCAHPS) COMPOSITES

The Hospital HCAHPS survey responses are collected by CMS via the Inpatient Quality Reporting Program. Linear mean scores [calculated by CMS](#) incorporate the full range of survey response categories into a single metric for each HCAHPS composite. Five of the six composites are used in the Safety Grade. For the purposes of calculating the Safety Grade, a hospital's linear mean score for each of the five composites is used:

HCAHP Composite	Possible Measure Score
H-COMP-1: Nurse Communication	0 - 100
H-COMP-2: Doctor Communication	0 - 100
H-COMP-3: Staff Responsiveness	0 - 100
H-COMP-5: Communication about Medicines	0 - 100
H-COMP-6: Discharge Information	0 - 100

LEAPFROG
HOSPITAL
 SAFETY GRADE

OUTCOME MEASURES

For Outcome Measures, a lower score is always better because these are measures of harm experienced by patients (e.g., central line-associated blood stream infections).

HOSPITAL-ACQUIRED CONDITIONS

Three hospital-acquired condition measures are calculated by CMS through the [DRA HAC Reporting Program](#): Foreign Object Retained after Surgery, Air Embolism, and Falls and Trauma. Hospital-acquired condition rates are calculated by CMS based on Part A Medicare Fee-for-service (FFS) claims and publicly reported as a rate per 1,000 Part A Medicare FFS discharges. No age restrictions are applied. For the purposes of calculating the Safety Grade, the rate is used. More information is available in the [DRA HAC methodology](#).

HEALTHCARE-ASSOCIATED INFECTIONS

Five healthcare-associated infection measures are collected by The Leapfrog Group on the Leapfrog Hospital Survey: Central line-associated bloodstream infections (CLABSI) in ICUs and select wards, Catheter-associated urinary tract infections (CAUTI) in ICUs and select wards, Surgical site infections from colon surgery (SSI: Colon), Facility-wide inpatient MRSA Blood Laboratory-identified Events, and Facility-wide inpatient C.diff. Laboratory-identified Events. Through participation in the Leapfrog Hospital Survey, hospitals were required to 1) join Leapfrog's NHSN group, 2) provide an accurate NHSN ID in the Profile section of the Online Survey Tool, and 3) submit a Survey by November 30. For the purposes of calculating the Safety Grade, the [standardized infection ratio \(SIR\)](#) is used:

As Reported by Leapfrog	Measure Score	Notes
Standardized Infection Ratio (SIR)	SIR	Measure is included in calculating the Safety Grade
Does Not Apply	Not Available (See Scoring Terms)	Measure is not included in calculating the Safety Grade. No use of Secondary Data.
Unable to Calculate Score	Not Available (See Scoring Terms)	Measure is not included in calculating the Safety Grade. No use of Secondary Data.
Declined to Respond	See Using Secondary Data	Secondary Data source is used.

LEAPFROG
HOSPITAL
SAFETY GRADE

For hospitals that did not join Leapfrog's NHSN group, provide an accurate NHSN ID, or submit a 2024 Leapfrog Hospital Survey by November 30, see [Using Secondary Data Sources](#) for more information on Leapfrog's use of CMS data.

AHRQ PATIENT SAFETY INDICATORS (PSI)

Two AHRQ Patient Safety Indicators are calculated by CMS through the Inpatient Quality Reporting Program and the [HAC Reduction Program](#): PSI 4 Death Rate among Surgical Inpatients with Serious Treatable Conditions and PSI 90 Patient Safety and Adverse Events Composite. PSI rates are calculated by CMS based on Medicare Fee-for-Service claims and publicly reported as a rate per 1,000 inpatient discharges. CMS only includes claims from patients 18 years or older. For the purpose of calculating the Safety Grade, the smoothed rate is used for both measures. More information on calculating PSIs is available on the [Patient Safety Indicators \(PSI\) 2024 Resources website](#).

Note: CMS calculates PSI 90 using the ten (10) component PSIs that are listed in the PSI 90 Components table [above](#). While scores for each of the 10 component PSIs are NOT used to calculate spring 2025 Hospital Safety Grades, they will be publicly reported on the Hospital Safety Grade [website](#). Additional information about the PSI 90 measure and how it is calculated by CMS can be found [here](#).

LEAPFROG
HOSPITAL
SAFETY GRADE

USING SECONDARY DATA SOURCES

Twelve (12) of the 22 measures included in the Safety Grade are derived from the Leapfrog Hospital Survey. The Leapfrog Hospital Survey is voluntary, and as such, hospitals may choose not to submit a Survey. To address this gap in available data, the Safety Grade methodology utilizes secondary data when available. For information on how to complete a free Leapfrog Hospital Survey, visit www.leapfroggroup.org/survey.

IMPUTATION METHOD FOR CPOE, BCMA, IPS, AND HAND HYGIENE

Leapfrog has worked closely with statisticians at Mathematica, Leapfrog's National [Expert Panel](#), and our scientific partners at Johns Hopkins Medicine to develop a new two-step imputation approach for determining scores for CPOE, BCMA, IPS, and Hand Hygiene if they are missing from our [publicly reported](#) Survey Results.

STEP 1: USE A HOSPITAL'S MOST RECENT SCORE ON THE MEASURE (APPLIES TO CPOE, IPS, AND HAND HYGIENE ONLY)

If the hospital had a score assigned by Leapfrog in the previous two rounds of grades (i.e., fall 2024, spring 2024), excluding imputed scores, the hospital is assigned the most recent score on that measure in the current Hospital Safety Grade (i.e., spring 2025).

LEAPFROG
HOSPITAL
SAFETY GRADE

STEP 2: USE IMPUTATION POINT ASSIGNMENT (APPLIES TO CPOE, BCMA, IPS AND HAND HYGIENE)

If the hospital does not have historical data from the last two rounds (i.e., fall 2024, spring 2024) of the Safety Grade, the hospital is assigned a point value that is equivalent to receiving “Limited Achievement” for this measure on the Leapfrog Hospital Survey.

Note about IPS: Only hospitals that operate an adult or pediatric medical and/or surgical ICU or neuro ICU are eligible for Step 2 Imputation of the IPS measure. A hospital’s ICU designation (i.e., operating a medical ICU, surgical ICU, or pediatric ICU) is determined from the number of medical, surgical and/or pediatric ICU beds reported in Worksheet S-3 Part 1 of the hospital’s most recent CMS Cost Report. If your hospital does not operate an ICU, but shares a CMS Certification Number with a hospital that does, please contact the Help Desk immediately if an IPS score was imputed.

Step 2 Imputation Point Assignments

Measure	Leapfrog Hospital Survey Performance Category	Corresponding Safety Grade Measure Score
CPOE	Limited Achievement	15
BCMA	Limited Achievement	25
IPS	Limited Achievement	5
Hand Hygiene	Limited Achievement	15

LEAPFROG
HOSPITAL
SAFETY GRADE

CMS DATA FOR HAIS

CMS is the **secondary data** source for healthcare-associated infections. For the purposes of calculating the Safety Grade, the standardized infection ratio (SIR) published by CMS is used:

Hospitals That Did Not Join Leapfrog's NHSN Group and Submit Section 7: Managing Serious Errors of the 2024 Leapfrog Hospital Survey by November 30

As Reported by CMS	Measure Score	Notes
Not Available (no locations or low volume)	Not Available (See Scoring Terms)	Measure is not included in calculating the Leapfrog Hospital Safety Grade.
Standard Infection Ratio (SIR)	SIR	Measure is included in calculating the Leapfrog Hospital Safety Grade.

If a hospital does not have available data from the Leapfrog Hospital Survey or CMS (e.g., no locations or low volume), the hospital is reported as Not Available "Not Available." See [Dealing with Missing Data](#) for more information.

LEAPFROG
HOSPITAL
SAFETY GRADE

SCORING METHODOLOGY

WEIGHTING INDIVIDUAL MEASURES

Each measure included in the Leapfrog Hospital Safety Grade is assigned a standard weight. The methodology to assign standard weights includes four criteria: (1) Impact, (2) Evidence, (3) Opportunity, and (4) Number of Component Measures. These four criteria are then combined using the equation below, which results in a standard weight for each measure that represents the measure's relative importance within the Hospital Safety Grade.

$$[\text{Evidence} + (\text{Impact} \times \text{Opportunity} \times \text{Number of Component Measures})]$$

EVIDENCE

The Evidence Score for each individual measure is assigned a value of one (1) or two (2) using the following criteria:

- 1 = Supported by either suggestive clinical or epidemiological studies or theoretical rationale
- 2 = Supported by experimental, clinical, or epidemiological studies and strong theoretical rationale

OPPORTUNITY

The Opportunity Score for each individual measure is based on the Coefficient of Variation (Standard Deviation/Mean) of that measure, using the following formula: $[1 + (\text{Standard Deviation}/\text{Mean})]$. The Opportunity Score is on a continuous scale that is capped at three (3). Any measure with an Opportunity Score above three (3) is assigned a three (3).

IMPACT

The Impact Score for each individual measure is comprised of two (2) parts, each of which is assigned a value from one (1) to three (3):

1. Number of patients affected

LEAPFROG
HOSPITAL
SAFETY GRADE

2. Severity of harm

The *number of patients affected* score is determined by the following:

- 0 = Extremely rare event (e.g., Air Embolism)
- 1 = Rare event (e.g., Foreign Object Retained After Surgery)
- 2 = Some patients in hospital affected (e.g., ICU Physician Staffing)
- 3 = All patients in hospital affected (e.g., Hand Hygiene)

The *severity of harm* score is determined by the following:

- 1 = No direct evidence of harm or harm reduction (e.g., Patient Experience)
- 2 = Clear documentation of harm or harm reduction; adverse events (e.g., Foreign Object Retained After Surgery)
- 3 = Significant mortality reduction (more than 1,000 deaths or a 10% reduction in hospital wide mortality) (e.g., ICU Physician Staffing)

The values from each part are then added together to arrive at the overall Impact Score using the following criteria:

- 1 = Score of 2 (Low Impact) (e.g., Air Embolism)
- 2 = Score of 3-4 (Medium Impact) (e.g., Patient Experience)
- 3 = Score of 5-6 (High Impact) (e.g., ICU Physician Staffing)

NUMBER OF COMPONENT MEASURES

The number of component measures refers to how many measures are included within the measure. For PSI 90, the number of component measures is 10 (PSI 3, PSI 6, PSI 8, PSI 9, PSI 10, PSI 11, PSI 12, PSI 13, PSI 14, and PSI 15). For all other measures included in the Hospital Safety Grade, the number of component measures within the measure is one (1).

LEAPFROG
HOSPITAL
 SAFETY GR_{ADE}

STANDARD MEASURE WEIGHTS

Measure	Evidence Score	Opportunity Score	Impact Score	Number of Component Measures	Standard Measure Weight
Process/Structural Measure Domain (50%)					
CPOE	2	1.43	3	1	6.2%
BCMA	2	1.37	3	1	6.0%
IPS	2	1.67	3	1	6.9%
SP 1	1	1.06	2	1	3.1%
SP 2	1	1.12	2	1	3.2%
Total Nursing Care Hours per Patient Day	2	1.41	2	1	4.7%
Hand Hygiene	2	1.49	2	1	4.9%
H-COMP-1	1	1.03	2	1	3.0%
H-COMP-2	1	1.03	2	1	3.0%
H-COMP-3	1	1.05	2	1	3.0%
H-COMP-5	1	1.06	2	1	3.1%
H-COMP-6	1	1.04	2	1	3.0%
Outcome Measure Domain (50%)					
Foreign Object Retained	1	3.00	2	1	4.2%
Air Embolism	1	3.00	1	1	2.4%
Falls and Trauma	2	2.05	3	1	4.9%
CLABSI	2	1.85	3	1	4.5%
CAUTI	2	1.91	3	1	4.7%
SSI: Colon	2	1.83	2	1	3.4%
MRSA	2	1.82	3	1	4.5%
C. Diff.	2	1.81	3	1	4.5%
PSI 4	1	1.14	2	1	2.0%
PSI 90	1	1.20	2	10	15.0%

CALCULATING Z-SCORES

Z-Scores are used to standardize data from measures with different performance scales and allow for comparisons (e.g., a linear mean score of 90 on H-COMP-1: Nurse Communication and a CLABSI SIR of 0.870). In addition, Z-Scores can indicate to a hospital whether their measure score is above, below, or equal to the average hospital.

In the Scoring Methodology, a Z-Score is calculated for each available measure score. A Z-Score is calculated using a hospital's actual measure score, the national mean for that measure, and the standard deviation for that measure. The Z-Score for each measure is calculated using the following formulas:

- **For Process/Structural Measures:** $[\text{Hospital Score} - \text{Mean}] / \text{Standard Deviation}$
- **For Outcome Measures:** $[(\text{Mean} - \text{Hospital Score}) / \text{Standard Deviation}]$

LEAPFROG
HOSPITAL
 SAFETY GRADE

The following table includes the national mean and standard deviation for each measure used to calculate a hospital's Z-Score. For display, means and standard deviations are displayed rounded to two or three decimal places. For scoring, these values are not rounded.

Process and Structural Measures	Mean	Standard Deviation
CPOE	80.23	34.14
BMCA	81.87	30.45
IPS	65.15	43.73
SP 1	117.49	6.79
SP 2	116.85	13.98
Total Nursing Care Hours per Patient Day	77.07	31.61
Hand Hygiene	74.40	36.14
H-COMP-1	90.19	2.51
H-COMP-2	89.91	2.48
H-COMP-3	81.63	4.36
H-COMP-5	74.42	4.13
H-COMP-6	85.25	3.70

Outcome Measures	Mean	Standard Deviation
Foreign Object Retained	0.014	0.050
Air Embolism	0.002	0.055
Falls and Trauma	0.384	0.402
CLABSI	0.651	0.552
CAUTI	0.540	0.494
SSI: Colon	0.831	0.689
MRSA	0.719	0.591
C. Diff.	0.401	0.326
PSI 4	177.452	24.020
PSI 90	1.002	0.196

LEAPFROG
HOSPITAL
 SAFETY GRADE

A NOTE ABOUT EXTREME VALUES

For hospitals that have an “extreme” value for a particular measure (i.e., a value that exceeds the 99th percentile) Leapfrog “trims” the reported value to the 99th percentile. For example, a rate of 0.500 per 1,000 patient discharges for Foreign Object Retained after Surgery is “trimmed” to 0.327 (e.g., the 99th percentile). Only “trimmed” rates are displayed on the Leapfrog Hospital Safety Grade [website](#). The table below includes the “trimmed” values for the spring 2025 Leapfrog Hospital Safety Grade. The PSI 90 measure score represents an observed to expected ratio that has already been risk adjusted at both the component PSI level and at the composite level; therefore, the measure is not “trimmed” by Leapfrog.

Measure	99 th Percentile
Foreign Object Retained	0.327
Air Embolism	2.89
Falls and Trauma	1.926
CLABSI	2.782
CAUTI	2.512
SSI: Colon	3.094
MRSA	2.85
C. Diff.	1.607
PSI 4	235.51

Note: Percentiles are rounded to reflect the precision of the raw data.

DEALING WITH MISSING DATA

Due to a variety of reasons, a hospital may not have a measure score for all 22 measures. If a hospital is missing a measure score for any measure (except PSI 90; hospitals missing PSI 90 are not graded), the standard weight of that measure is redistributed to the other measures in the same measure domain. The new weight for each measure within the domain is calculated by re-apportioning the standard weight assigned to the measure with the missing score to other measures within the same domain.

For example, if a hospital is missing a measure score for ICU Physician Staffing because the hospital does not operate an adult or pediatric medical and/or surgical ICU, the standard weight of 6.9% will be re-apportioned to the remaining 11 measures within the process/structural measure domain.

LEAPFROG
HOSPITAL
SAFETY GRADE

To calculate the new weight of each of the remaining 11 measures in the process/structural measure domain, hospitals can use the formula below or use the Leapfrog Hospital Safety Grade Calculator[®], which can be found on the [Safety Grade Review Website](#). Note that each domain contributes to 50% of the overall letter grade.

*[Standard measure weight / (sum of standard weights for the remaining 11 measures in the process/structural measure domain)]*50% = updated measure weight*

For more information about how the measure weight redistribution is calculated and affects the overall score, please see the Leapfrog Hospital Safety Grade Calculator, which can be found on the last page of the [Safety Grade Review Website](#).

CALCULATING WEIGHTED MEASURE SCORES

To calculate a hospital's numerical safety score, multiply the Z-Score of each process/structural measure by the standard weight assigned to that measure to get the weighted process/structural measure score. If a hospital is missing any process/structural measure scores, see [Dealing with Missing Data](#) to determine the updated measure weight. Then, sum all weighted process/structural measure scores. This is the hospital's overall weighted process/structural measures score.

Multiply the Z-Score of each outcome measure by the standard weight assigned to that measure to get the weighted outcome measure score. If a hospital is missing any outcome measure scores, see [Dealing with Missing Data](#) to determine the updated measure weight. Then, sum all weighted outcome measure scores. This is the hospital's overall weighted outcome measures score.

To calculate the overall Safety Grade for a hospital, add the overall weighted process/structural measure score and the overall weighted outcome measures score. Add 3.0 to your score; this is done to normalize scores to a positive distribution. This final numerical score (typically between 1.0 and 4.0) is then assigned to a letter grade. To assist hospitals in calculating their numerical score, a calculator is available on the [Safety Grade Review Website](#). Letter grade cut-points are published during the [Letter Grade Embargo Period](#).

LEAPFROG
HOSPITAL
SAFETY GRADE

ADDITIONAL SCORING INFORMATION

TERMS USED IN SCORING AND PUBLIC REPORTING

“Not Available” means that the hospital does not have a score for this measure. This could be because the measure is related to a service the hospital does not provide or because the hospital had too few patients or cases to report data for a condition or procedure. A “Not Available” result does not mean that the hospital withheld information from the public.

In the case of healthcare-associated infections, a SIR is reported as “Not Available” if one of the following applies:

- The number of predicted infections is less than 1.
- The number of observed infections present on admission (community-onset prevalence) was above a pre-determined cut-point.

For more information about NHSN's SIR models, please visit <https://www.cdc.gov/nhsn/pdfs/ps-analysis-resources/nhsn-sir-guide.pdf>.

“Declined to Report” means that a hospital did not voluntarily provide information to the Leapfrog Hospital Survey. Measures scored as “Declined to Report” will not be used in calculating the overall score (see [Dealing with Missing Data](#)).

SHARED CMS CERTIFICATION NUMBERS

All hospitals that share a CMS Certification Number (CCN) will be assigned the same source data as reported by CMS. Affected measures include the HCAHPS, Hospital-Acquired Conditions, Healthcare-Associated Infections (if secondary data source is used), and Patient Safety Indicators.

LEAPFROG
HOSPITAL
SAFETY GRADE

UPDATES TO DATA USED IN THE LEAPFROG HOSPITAL SAFETY GRADE

The Leapfrog Hospital Safety Grade relies on publicly available data that hospitals have had the opportunity to review for accuracy. Therefore, Leapfrog does not allow hospitals to make updates to their data following the Data Snapshot Date. In January of each year, Leapfrog publishes the Data Snapshot Dates for each of the two Leapfrog Hospital Safety Grade public releases at <https://www.hospitalsafetygrade.org/for-hospitals/key-dates-and-information>. Leapfrog publishes these dates to give hospitals and other stakeholders advance notice so they can be prepared to submit a Leapfrog Hospital Survey and monitor their performance on CMS measures used in the Safety Grade.

In addition, Leapfrog holds a Courtesy Review Period to give hospitals an additional opportunity to review the data that will be used to calculate their hospital's Safety Grade. The Review Period is an opportunity for hospitals to review the data for accuracy (i.e., identify recording errors, hospital name and address changes, etc.) on a secure website and review changes to the scoring algorithm.

DATA FROM THE LEAPFROG HOSPITAL SURVEY

During the Safety Grade Review Period (February 24 – March 14), Leapfrog will only make corrections to a hospital's data from the 2024 Leapfrog Hospital Survey if a recording error is identified (i.e., we have recorded a different measure score than what is posted on our Survey Results website) or a scoring error is identified (i.e., Leapfrog has calculated an incorrect measure score based on the submitted responses and Leapfrog's published scoring algorithms). Updates to Leapfrog Hospital Survey data that are submitted after the Data Snapshot Date will **not** be included in the current Leapfrog Hospital Safety Grade. Hospitals submitting a Leapfrog Hospital Survey are urged to take advantage of the opportunity to review their Survey Results for accuracy and completeness prior to each of the two published Data Snapshot Dates.

HOW HOSPITALS CAN REVIEW LEAPFROG HOSPITAL SURVEY RESULTS PRIOR TO THE DATA SNAPSHOT DATE

The Leapfrog Hospital Survey is open from April 1 to November 30 of each year. Following the Submission Deadline (June 30), Survey Results are published monthly on a secure 'Hospital Details' page and a public website (ratings.leapfroggroup.org). Hospitals are urged to review their Survey Results immediately. Hospitals that identify any reporting errors are instructed to log back into the Survey to submit a correction. Hospitals can correct and re-submit a previously submitted Survey until the Survey closes for the year. Note that corrections submitted after the Data Snapshot Date are not included in the current Leapfrog Hospital Safety Grade. Leapfrog has several automated processes in place to prevent hospitals from making data entry errors in the Online Survey Tool and to enhance the overall accuracy of the Survey Results. Learn more at <http://www.leapfroggroup.org/survey-materials/data-accuracy>.

LEAPFROG
HOSPITAL
SAFETY GRADE

DATA FROM THE CENTERS FOR MEDICARE & MEDICAID SERVICES (CMS)

During the Safety Grade Review Period (February 24 – March 14), Leapfrog will only make corrections to a hospital's data from CMS if the correction is issued by CMS and posted to the Data.CMS.Gov website. If a hospital has identified an error with a measure score published by CMS, and CMS cannot post a correction within the review period, the measure score will not be used in calculating the hospital's Safety Grade, provided that the hospital can document that CMS has agreed to publicly issue a correction or remove the measure score from public reporting. Hospitals participating with CMS are urged to take advantage of the opportunity to participate in the CMS 30-day review periods.

CMS FOOTNOTE 23 POLICY

Leapfrog will notify hospitals that have CMS footnote 23 present for one or more claims-based measure scores (e.g., DRA HAC Rate, PSI 4 rate, or PSI 90 rate) at the start of the Courtesy Review Period. Footnote 23 indicates that "The data are based on claims that the hospital or facility submitted to CMS. The hospital or facility has reported discrepancies in their claims data." Hospital CEOs can request that Leapfrog use the measure score that is accompanied by the footnote. Written requests must be received prior to the close of the Safety Grade Review Period. If written requests are not received by the close of the Review Period, the measure will not be used to calculate the Hospital Safety Grade.

For hospitals that submit a Leapfrog Hospital Survey by the Data Snapshot Date, the CEO, Primary Survey Contact, and Secondary Survey Contact will be notified at the email addresses included in the Hospital's Survey Profile. For hospitals that do not submit a Leapfrog Hospital Survey by the Data Snapshot Date, the CEO will be contacted by certified letter.

HOW HOSPITALS CAN REVIEW CMS DATA PRIOR TO THE DATA SNAPSHOT DATE

CMS administers several hospital-based reporting and payment programs including the Inpatient Quality Reporting Program, HAC Reduction Program, and Value-based Purchasing Program. Several measures collected and calculated by CMS via its various hospital-based programs are used in the Leapfrog Hospital Safety Grade. CMS provides hospitals with a 30-day preview period before publishing measure scores on the Data.Medicare.Gov website and the Data.CMS.Gov website. More information is available at <https://qualitynet.org>.

LEAPFROG
HOSPITAL
SAFETY GRADE

HOW TO PARTICIPATE IN THE LEAPFROG HOSPITAL SURVEY

If a hospital did **not** complete a 2024 Leapfrog Hospital Survey by November 30, Survey Results were not used to calculate the spring 2025 Leapfrog Hospital Safety Grade. Hospitals that would like Survey Results included in the fall 2025 Hospital Safety Grade must submit a 2025 Leapfrog Hospital Survey (including the CPOE Evaluation) by June 30, 2025. Hospitals will be able to review their publicly reported Survey Results in July and respond to any issues identified by Leapfrog's Extensive Monthly Data Verification before the Data Snapshot Date for the fall 2025 Safety Grade of August 31. More information is available at <https://leapfroggroup.org/survey>.

Welcome to the 2025 Leapfrog Hospital Survey

<https://leapfroggroup.org/hospital>

Dear Hospital Leaders,

This year marks Leapfrog's 25th anniversary, and I want to thank you, our annual Survey participants, for being a critical part of our successful journey.

As we reflect on the progress made over the past quarter-century, it is clear that the work we have done together has reshaped health care for the better. Your transparency and willingness to be held to the highest standards of excellence have elevated American health care, empowering patients and families while challenging all of us to do better.

Of course, the journey ahead is still long, and we have much more work to do to achieve the uniform level of excellence that all Americans need and deserve from health care. But it is worth taking a few moments to reflect on the impact we've made together to date driving giant leaps for patient safety.

Over this milestone year, you will hear more from Leapfrog on our analysis of the progress our country has made in patient safety and quality of care. There are many bright spots. We are grateful to you and your colleagues for your leadership, hard work and bold transparency that makes it possible. You are saving lives.

We look forward to the journey forward with you.

With gratitude,

Leah Binder
President & CEO
The Leapfrog Group

Important Notes About the 2025 Survey

1. The Leapfrog Hospital Survey webpages are located at <https://leapfroggroup.org/hospital>. Please bookmark this URL.
2. Note the word “hospital” used throughout this Survey refers to an individual hospital. If your hospital is part of a multi-hospital health care system or a multi-campus hospital, you will need to complete the Survey for each individual hospital. Please refer to [Leapfrog’s Multi-Campus Hospital Reporting Policy](#).
3. To submit a Survey via the Online Hospital Survey Tool, hospitals are required to complete and affirm the following six sections: Section 1: Patient Rights and Ethics, Section 2: Medication Safety, Section 4: Maternity Care, Section 5: Physician and Nurse Staffing, Section 6: Patient Safety Practices, and Section 7: Managing Serious Errors. However, hospitals are urged to submit all sections of the Survey and can indicate within a section if a measure does not apply. Hospitals that would like to be eligible for [Top Hospital](#) must submit all sections of the Survey.
4. Adult and general hospitals that indicate they have a Computerized Physician Order Entry (CPOE) system in at least one inpatient unit are asked to demonstrate, via a test, that the inpatient CPOE system can alert prescribers to at least 60% of frequent serious medication errors known to cause harm to patients. Hospitals will have access to the CPOE Evaluation Tool immediately after completing the Hospital Profile in the Online Hospital Survey Tool. Hospitals cannot submit the Survey, including results from the Adult Inpatient CPOE Test until all the following Survey sections have been completed and affirmed: Section 1: Patient Rights and Ethics, Section 2: Medication Safety, Section 4: Maternity Care, Section 5: Physician and Nurse Staffing, Section 6: Patient Safety Practices, and Section 7: Managing Serious Errors. Hospitals are urged to ensure that the Adult Inpatient CPOE Test is submitted along with the Survey (i.e., in the same month) to meet the deadlines for the Leapfrog Hospital Survey and Leapfrog’s other programs such as Top Hospital and the Leapfrog Hospital Safety Grade.
5. Adult and pediatric hospitals reporting on Section 7B: Healthcare-Associated Infections are required to join Leapfrog’s NHSN Group. Information about teaching status will also be pulled directly from NHSN. More information, including important deadlines, is available on the [Join NHSN Group webpage](#).
6. Leapfrog Hospital Survey Results will be available on the Hospital Details Page beginning July 12 and publicly reported on the [public reporting website](#) on July 25 for hospitals that submit a Survey by the June 30 Submission Deadline. After July, the Hospital Details Page and public reporting website will be refreshed monthly within the first seven (7) business days of each month to reflect Surveys submitted or resubmitted between July 1 and November 30 and previously submitted Surveys that were corrected between December 1 and January 31. Survey Results are frozen from February to July 25.
7. All questions regarding the Leapfrog Hospital Survey should be submitted to the Help Desk at <https://leapfroghelpdesk.zendesk.com>. Questions submitted to the Help Desk will receive a response within 1-2 business days (see [Help Desk Holiday Schedule](#) for planned closures).
8. For hospitals that would like Leapfrog Hospital Survey Results included in their **Leapfrog Hospital Safety Grade**, please visit the “For Hospitals” section of the Hospital Safety Grade [website](#) for important information on Data Snapshot Dates. A Leapfrog Hospital Survey must be submitted by the Data Snapshot Date for Survey data to be used in the Hospital Safety Grade.
9. Leapfrog is committed to verifying the accuracy of Leapfrog Hospital Survey Results. Please review the information on the [Data Accuracy webpage](#).
10. The [Submission Deadline](#) for the 2025 Leapfrog Hospital Survey is **June 30, 2025**, and the Late Submission and Performance Update Deadline is **November 30, 2025**. Hospitals that do not submit a Survey or CPOE Evaluation Tool (adult and general hospitals only) before 11:59 pm Eastern Time on

2025 Leapfrog Hospital Survey – Hard Copy

General Information

November 30, 2025, will have to wait until the launch of the 2026 Leapfrog Hospital Survey on April 1, 2026 to submit a Survey.

Overview of the 2025 Leapfrog Hospital Survey

The Leapfrog Hospital Survey is divided into nine sections and the Hospital Profile. A description of each section is listed below. For a more detailed overview of the 2025 Leapfrog Hospital Survey, including a crosswalk of nationally endorsed measures and a description of how measures are publicly reported, visit the [Survey Overview webpage](#).

Section Number	Section Title	Brief Description
	<u>Hospital Profile</u>	The Hospital Profile includes questions about demographic and contact information. The Profile can be accessed and updated anytime throughout the year after logging into the Online Hospital Survey Tool . The Hospital Profile must be completed and submitted before you can access Sections 1-9 and the CPOE Evaluation Tool on the Survey Dashboard.
1	<u>Patient Rights and Ethics</u>	Section 1 includes questions about your hospital's billing ethics, health care equity, and informed consent processes. This section also includes questions on your hospital bed size, admissions, ICUs, and teaching status.
2	<u>Medication Safety</u>	Section 2 includes questions about your hospital's use of CPOE and BCMA, and (for adult and general hospitals) questions about your hospital's medication reconciliation process. The EHR application subsection (2B) is only applicable to adult and general hospitals and will not be scored or publicly reported. In 2025, three questions about Artificial Intelligence (AI) applications were added to subsection 2B – these questions are optional and will not be scored or publicly reported.
3	<u>Adult and Pediatric Complex Surgery</u>	Section 3 includes questions about your hospital's volume and process for privileging surgeons for eleven high-risk procedures, outcomes for mitral valve repair and replacement, and participation in The Society of Thoracic Surgeon's Congenital Heart Surgery Database for hospitals that perform the Norwood procedure. This section also includes questions about the implementation of a safe surgery checklist.
4	<u>Maternity Care</u>	Section 4 includes questions about maternity care volume and services, cesarean birth, episiotomy, newborn bilirubin screening, and DVT prophylaxis for women undergoing cesarean delivery. The section also includes questions about high-risk deliveries, including volume and outcomes. The subsection on cesarean birth (4C) includes questions about cesarean births stratified by race/ethnicity that will not be scored or publicly reported, however, responses will be used for confidential reporting on the Hospital Details Page in 2025.
5	<u>Physician and Nurse Staffing</u>	Section 5 includes questions about the management of critical care patients and the staffing structure of your hospital's adult and pediatric general medical, surgical, medical/surgical, and neuro ICUs, and questions about your hospital's nursing staffing and skill mix (previously included in Section 6).
6	<u>Patient Safety Practices</u>	Section 6 includes questions about your hospital's adherence to two National Quality Forum-endorsed Safe Practices, and questions about your hospital's hand hygiene practices. It also includes a subsection on diagnostic excellence (6D) and a new subsection on Hospital Boarding in the Emergency Department (ED) (6E) – both subsections are optional and will not be scored or publicly reported.

Section Number	Section Title	Brief Description
7	<u>Managing Serious Errors</u>	Section 7 includes questions about your hospital's response to Never Events. In addition, Leapfrog collects information via its NHSN Group about five healthcare-associated infections (CLABSI, CAUTI, MRSA, C. diff., and SSI: Colon). Hospitals reporting on Section 7B: Healthcare-Associated Infections are required to join Leapfrog's NHSN Group. Important information and deadlines are available on the Join NHSN Group webpage .
8	<u>Pediatric Care</u>	Section 8 includes questions about patient experience (CAHPS Child Hospital Survey) and Computed Tomography (CT) radiation dose for pediatric patients.
9	<u>Outpatient Procedures</u>	Section 9 includes questions about the volume and safety of same-day procedures performed in hospital outpatient departments, as well as the experience of patients who had a same-day surgery performed.

Section 1: Patient Rights and Ethics, Section 2: Medication Safety, Section 4: Maternity Care, Section 5: Physician and Nurse Staffing, Section 6: Patient Safety Practices, and Section 7: Managing Serious Errors are required to submit a Survey via the Online Hospital Survey Tool. Hospitals are strongly urged to submit all sections of the Leapfrog Hospital Survey and can indicate within a section if a measure does not apply.

The hard copy of the Survey and the Online Hospital Survey Tool are organized in the same format for all nine sections:

- **General information** about The Leapfrog Group's standard (included in the hard copy only).
- **Reporting periods** to provide hospitals with specific periods of time for each set of questions.
- **Survey questions** which may include references to endnotes or FAQs. The Survey questions and endnotes match the Online Hospital Survey Tool exactly.
- **Affirmation of accuracy** by your hospital's CEO/Chief Administrative Officer or by an individual that has been designated by the hospital CEO. These statements affirm the accuracy of your hospital's responses and must be completed in the Online Hospital Survey Tool to submit a Survey.
- **Reference information** which includes "What's New" and "Change Summaries," important measure specifications, answers to frequently asked questions, and other notes that must be carefully reviewed before responding to any of the Survey questions (included in the hard copy only).

In addition to the Survey questions, adult and general hospitals that indicate they have a CPOE system in at least one inpatient unit are asked to demonstrate, via a test, that the inpatient CPOE system can alert physicians to at least 60% of frequent serious medication errors known to cause harm to patients. Adult and general hospitals can access the CPOE Evaluation Tool immediately after completing the Hospital Profile in the Online Hospital Survey Tool. Carefully review the information on the [Prepare for a CPOE Tool webpage](#).

Any changes made to the measure specifications after April 1 will be reflected in the hard copy of the Survey in the Reference Information sections under the "Change Summary" header (see [Table of Contents](#)). In addition, the updates to the specifications will be highlighted in yellow. If the changes are substantial, we will email the Primary Survey Contact your hospital provided in the Hospital Profile of the Online Hospital Survey Tool. If the notification is sent before your hospital submits a 2025 Leapfrog Hospital Survey, the email will go to the Primary Survey Contact provided in the previous year's Survey.

The Leapfrog Group and its participating members are committed to presenting information that is as current as possible, therefore we allow hospitals to update and resubmit their Survey until the **November 30 Late Submission and Performance Update Deadline**. Please carefully review the reporting periods in each section before updating your Survey. Leapfrog Hospital Survey Results are updated monthly beginning in July on Leapfrog's [public reporting website](#). Hospitals are required to update the

2025 Leapfrog Hospital Survey – Hard Copy

General Information

information in their Survey within 30 days of any change in status. We reserve the right to decertify information that is not current. More information on updating your Survey is available on the [Updating Your Hospital Survey webpage](#).

Pre-Submission Checklist

Before you complete and submit the Survey via the Online Hospital Survey Tool, there are several steps you should complete:

- ☐ **Visit the Hospital Survey webpages at <https://leapfroggroup.org/hospital>.**
- ☐ **Make sure you have a 16-digit security code.** If you don't, download a [Security Code Request](#) form. If your hospital is part of a multi-hospital healthcare system, you will need a separate security code for each individual hospital within the system. Please refer to [Leapfrog's Multi-Campus Hospital Reporting Policy](#).
- ☐ **Download a hard copy of the Survey** (PDF or Word document) on the [Survey and CPOE Materials](#) webpage. Read through the entire document to ensure that you understand what information is required.
- ☐ **Review the reference information** in each section of the Survey document and **download other supporting materials**. These documents and tools contain information that you will need to accurately respond to the Survey questions.
- ☐ **Join Leapfrog's NHSN Group.** Hospitals reporting on Section 7B: Healthcare-Associated Infections are required to join Leapfrog's NHSN Group. More information, including important deadlines, is available on the [Join NHSN Group](#) webpage.
- ☐ **Accept the American Medical Association's Terms of Use and Download the CPT Code Workbook.** Hospitals reporting on Section 3 Adult and Pediatric Complex Procedures (that perform bariatric surgery for weight loss, total hip replacement surgery, or total knee replacement surgery) and Section 9 Outpatient Procedures (that perform outpatient procedures) must accept the American Medical Association's Terms of Use and download the CPT Code Workbook via the button on the [Survey Dashboard](#) in Section 9.
- ☐ **Identify individuals from your hospital to help you** gather the data you will need to complete the various sections of the Survey.
- ☐ **Complete a hard copy of the Survey before you log in to the Online Survey Tool.** This will expedite the data entry into the Online Survey Tool and help to avoid the Tool "timing out" after 20 minutes of idle time (a security precaution). Once all the information has been collected and recorded in the hard copy of the Survey, the CEO or the CEO's designee can typically complete the online data entry in less than an hour. Please note, responses must be entered into the Online Survey Tool to be submitted.
- ☐ **Download and review a copy of the Online Survey Tool Guide** on the [Get Started](#) webpage and includes important instructions on how to navigate the Online Hospital Survey Tool, including instructions on how to verify your hospital has successfully submitted the Survey.
- ☐ **Check Survey deadlines.** Carefully review [Survey deadlines](#) before you begin. Ensure that you have enough time to collect the data, complete a hard copy of the Survey, and complete and submit the Survey via the Online Hospital Survey Tool. In addition, for adult and general hospitals that have implemented CPOE in at least one inpatient unit, make sure you have enough time to take a [CPOE Evaluation Tool](#).
- ☐ **Download and review the 2025 Leapfrog Hospital Survey [Scoring Algorithms](#).**
- ☐ **Review Leapfrog's policies and procedures regarding data accuracy.** Detailed information can be found on the [Data Accuracy](#) webpage.

Leapfrog Hospital Survey Binder: Hospitals should utilize the Leapfrog Hospital Survey Binder to assist in organizing the documentation used to complete the Survey. Download a copy of the binder on the [Survey and CPOE Materials](#) webpage.

Instructions for Submitting a Leapfrog Hospital Survey

Important Notes:

Note 1: Please carefully review these instructions and the [Online Survey Tool Guide](#) before you begin.

Note 2: Each section of the Survey must be completed before it can be affirmed in the Online Hospital Survey Tool. Only sections that are affirmed can be submitted. Hospitals are responsible for ensuring that each submitted section is accurate.

1. Log into the [Online Hospital Survey Tool](#) using your 16-digit security code.
2. The first time you log into the 2025 Leapfrog Hospital Survey, you will need to complete and submit the Hospital Profile. The Hospital Profile includes demographic and contact information. The Hospital Profile should be updated throughout the year if any information changes and can be accessed at any time. **Failure to maintain current contact information could result in important, time-sensitive information being missed or sent to the wrong person.**
3. Once the Hospital Profile has been submitted, you will be taken to the Hospital Survey Dashboard.
4. You can navigate into sections of the Online Hospital Survey Tool using the linked section names on the Hospital Survey Dashboard. You can also access the CPOE Evaluation Tool immediately after completing the Hospital Profile using the Take CPOE Tool button on the Hospital Survey Dashboard. More information about navigating within the Online Hospital Survey Tool is available in the [Online Survey Tool Guide](#).
5. Within sections, you can enter responses to questions and/or update responses to previously submitted sections. The Online Hospital Survey Tool will automatically save your responses as you enter them. There is no “save” button.
6. Once you have completed each section, you will need to return to the Hospital Survey Dashboard to affirm each section of the Survey. Please remember that if you are making updates, all updated sections must be re-affirmed. Please note that affirmed sections are not yet submitted, please review Step 7 below to ensure successful submission.
7. Before you can submit the Survey (select the “*submit affirmed sections*” button on the Hospital Survey Dashboard), you will need to “*check for data review warnings*.” When you select the “*check for data review warnings*” button, the sections of your Survey that have been affirmed will be scanned for potential reporting errors. If any errors are identified, a data review warning message will be generated and will appear on the Hospital Survey Dashboard.
8. If any [data review warnings](#) are generated, you will still be able to submit your Survey. However, you will need to address the potential reporting errors identified during the scan or risk having the related sections of your Survey decertified (publicly reported as “Declined to Respond”). Please note this may not be a comprehensive list – you may still receive additional data verification messages via email.
9. Once you have checked for data review warnings, you can select the “*submit affirmed sections*” button to submit the Survey. Please review the Section Status column on the Hospital Survey Dashboard to verify which sections have been submitted.
10. Use the “*Print Last Submitted Survey*” button on the Hospital Survey Dashboard to print a copy of your Last Submitted Survey and review it for accuracy and completeness. Remember, sections that are not affirmed will not be submitted.
11. Review the 2025 Leapfrog Hospital Survey [Scoring Algorithms](#) to see how your Survey responses will be scored and publicly reported by Leapfrog.
12. Review your Survey Results on the [Hospital Details Page](#) or [public reporting website](#). Hospitals that submit by June 30 can preview their Survey Results on the Hospital Details Page beginning on July 12, before Leapfrog [publicly reports](#) Survey Results beginning on July 25. After July, the

2025 Leapfrog Hospital Survey – Hard Copy

General Information

Hospital Details Page and public reporting website will be refreshed monthly within the first seven (7) business days of each month following your (re)submission.

13. Adult and general hospitals submitting a CPOE Evaluation Tool should carefully review the instructions, scoring information, and FAQs available on the [Survey and CPOE Materials webpage](#) (see CPOE Tool Instructions under Other Supporting Materials).
14. Leapfrog is committed to verifying the accuracy of Leapfrog Hospital Survey Results. Please review our data accuracy protocols on the [Data Accuracy webpage](#).
15. Responses can be updated or corrected, and the Survey can be resubmitted at any point during the Survey Cycle (April 1 – November 30). Please remember that if you are making updates, all updated sections must be re-affirmed. More information on updating your Survey is available on the [Updating Your Hospital Survey webpage](#).

Reporting Policy Following Cybersecurity Events and Natural Disasters

Hospitals that experience a cybersecurity event or natural disaster that impacts data availability during one or more Survey reporting periods can complete and [submit a request form](#) in order to participate in the 2025 Leapfrog Hospital Survey. If approved, hospitals will report on the impacted measures using the data available and exclude data from the month(s) impacted by the cybersecurity event or natural disaster. Results will still be calculated if minimum reporting requirements are met and will be displayed on the [Survey Results website](#) with the following footnote: "Results are based on limited data due to a reported cybersecurity event or natural disaster." This revised policy closely aligns with the Extraordinary Circumstances Exception policy from the Centers for Medicare and Medicaid Services (CMS) but will only be applied to cybersecurity events and natural disasters.

For the purposes of the Safety Grade, a letter grade will still be calculated based on the data available, but any underlying measures impacted by the event will have results reported along with the following footnote: "Results are based on limited data due to a reported cybersecurity event or natural disaster." Hospitals will still be eligible for Leapfrog Top Hospital pending committee review and subject to meeting all criteria.

Verifying Submission

Use the following steps to verify that your submission was completed and that the appropriate sections were submitted:

- **Check the Hospital Survey Dashboard:** Refer to the "Section Status" column on the Hospital Survey Dashboard. All submitted sections will be marked as "Submitted."
- **Check your email:** You will receive a Survey submission confirmation email within five minutes of submitting a Survey. Please Note: This email will not specify which sections were submitted – you will need to use the other steps to determine which sections were submitted.
- **Print Last Submitted Survey:** The Survey submission date will be listed at the top of the page under the heading "Submitted Survey." Be sure to check the submission date, review each section for accuracy and completeness, and check that each affirmation is complete (Sections 1-9).
- **Review the Hospital Details Page:** Your Survey Results will be available beginning July 12 via the Hospital Details Page link on the Hospital Survey Dashboard. Carefully review your results, including data from VON for high-risk deliveries, and your NHSN information for applicable healthcare-associated infections.
- **Check your publicly reported results:** Always check your Leapfrog Hospital Survey Results on the public reporting [website](#). Results are posted on July 25 and are updated within the first 7 (seven) business days of the month following your submission starting in August.

Updating or Correcting a Previously Submitted Leapfrog Hospital Survey

2025 Leapfrog Hospital Survey – Hard Copy

General Information

Hospitals can update or correct previously submitted Survey responses at any point during the Survey Cycle (April 1 to November 30). Please review the [Survey Deadlines webpage](#). Most updates or corrections are made:

- At the request of Leapfrog:
 - Following Leapfrog's [Extensive Monthly Data Verification](#), the Primary Survey Contact, Secondary Survey Contact, and System Survey Contact will receive an email from the Help Desk detailing potential reporting errors.
- Following [On-Site Data Verification](#):
 - Hospitals selected for On-Site Data Verification will receive a report which will indicate any responses that need to be updated or corrected.
- At the discretion of the hospital:
 - To correct a data entry or reporting error.
 - To reflect a change in status or performance on a measure (e.g., closed a unit, stopped performing a procedure, implemented a new policy, etc.).
 - To provide more current responses based on the reporting periods outlined in the hard copy of the Survey.

Following any updates, hospitals should always use the steps for verifying submission provided [above](#).

Updating a Survey after Receiving a Help Desk Email

Leapfrog conducts [Extensive Monthly Data Verification](#) of responses submitted to the Leapfrog Hospital Survey starting with Surveys submitted by the June 30 Submission Deadline and monthly thereafter until the Online Survey Tool is taken offline on January 31. Following the Extensive Monthly Data Verification, the **Primary Survey Contact, Secondary Survey Contact, and System Contact** are notified by email of any Survey responses that need to be reviewed and/or updated by the hospital.

If you receive a Data Verification email, you are required to document that your original responses were correct or update/correct your previously submitted Leapfrog Hospital Survey by the end of the same month using the **original** reporting period that was used for that section of the Survey in the original submission. For example, if a hospital submitted a Survey for the first time on August 20, then received a Data Verification email at the beginning of September, they would update their responses based on the reporting period used in the August 20 submission.

Hospitals that receive a [Category A](#) Data Verification message at the beginning of the month for any measure will have until the end of that same month to contact the [Help Desk](#) to either (1) document that the original response was correct or (2) correct the data entry or reporting error, or they will be publicly reported as "Pending Leapfrog Verification" for that measure. This term is used to indicate that the hospital has self-reported Survey responses that are under further review by Leapfrog.

If any Category A Data Verification messages are not resolved by January 31 (when the Online Hospital Survey Tool is taken offline), the entire Survey will be decertified, and the hospital will be publicly reported as "Declined to Respond" for the entire Leapfrog Hospital Survey.

Updating a Survey following On-Site Data Verification

Hospitals that are selected for On-Site Data Verification will receive a findings report. If the findings report details any responses that need to be updated or corrected, please contact the [Help Desk](#).

Making General Updates (for hospitals that have not received a Help Desk email)

Leapfrog offers hospitals multiple reporting periods so that they can report the most current data. Except for Section 4E: High-Risk Deliveries (VON data only), Section 7B: Healthcare-Associated Infections, and Section 9D: Patient Follow-up (OP-32), updating a Survey is optional. However, we do recommend that if your performance or if a structure has changed significantly, you update your Survey within 30 days. In addition, hospitals should update their Surveys if they become aware of any reporting errors or data inaccuracies in their previous submission.

Hospitals may update one or more sections of the Survey without updating the entire Survey. In addition, hospitals are not required to retake the CPOE Evaluation Tool if making updates to Section 2A: CPOE questions #3 and #4.

General updates and corrections can be made at any point during the Survey Cycle (April 1 – November 30). The months of December and January are reserved for correcting data entry (i.e., correcting data entry errors) or reporting errors (i.e., in response to Leapfrog's Extensive Monthly Data Verification) to previously submitted sections of the Survey. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. **Updates made to reflect a change in performance after November 30 will not be scored or publicly reported. New sections of the Survey submitted after November 30 will not be scored or publicly reported.**

Hospitals that are submitting general updates should:

- Use the stated reporting period at the top of each section selected based on the date of your resubmission.
- For Section 4: Maternity Care and Section 6A-6B: NQF Safe Practice #1 and #2, update responses to ALL questions within the section they wish to update using the same reporting period. For example, if a hospital submitted a Survey for the first time in June and then wanted to update the responses for the Cesarean Birth questions in subsection 4B in November, they would update the entire Section 4: Maternity Care based on the updated reporting period for November.

For information on Leapfrog's automatic updates to the VON data in Section 4E: High-Risk Deliveries, the NHSN data in Section 7B: Healthcare-Associated Infections, or the CMS data in Section 9D: Patient Follow-up, please review the Section 4E: High-Risk Deliveries Measure Specifications, the Join NHSN Group webpage, and the Section 9D: Patient Follow-up Measure Specifications.

Quick Tip: Remember to re-affirm any section of the Survey that has been updated, check for data review warnings, and then resubmit the entire Survey. Always print a copy of your Last Submitted Survey and review it for accuracy and completeness. Check your updated Survey Results within the first 7 (seven) business days of the month following your resubmission on the public reporting website and the Hospital Details Page.

Deadlines

Deadlines for the 2025 Leapfrog Hospital Survey

The 2025 Leapfrog Hospital Survey, including the CPOE Evaluation Tool (if applicable), opens on April 1 and has a Submission Deadline of **June 30, 2025**. The Late Submission and Performance Update Deadline is **November 30, 2025**. Surveys and Adult Inpatient CPOE Tests must be submitted before 11:59 pm Eastern Time on **November 30**. The CPOE Evaluation Tool will not be available after **November 30**. The View CPOE Evaluation Tool results link on the Survey Dashboard can only be accessed between April 1 and November 30, so test results must be printed by November 30.

Corrections to Surveys submitted by **November 30** must be submitted by the **January 31, 2026** Corrections Deadline. The Online Hospital Survey Tool will not be available after **January 31, 2026**. Find detailed information about the 2025 Leapfrog Hospital Survey Deadlines, including deadlines for receiving free Competitive Benchmarking Summary Reports and consideration for Top Hospital Awards on the [Deadlines webpage](#).

Deadlines for Vermont Oxford Network Data

Hospitals participating in the Vermont Oxford Network (VON) may opt to report on the VON National Performance Measure in Section 4E: High-Risk Deliveries. Instructions, deadlines, and reporting periods can be reviewed in the [VON National Performance Measure Specifications](#).

Deadlines to Join Leapfrog's NHSN Group

Hospitals reporting on Section 7B: Healthcare-Associated Infections are required to join Leapfrog's NHSN Group. Please visit our [webpage](#) for instructions on how to join the group as well as information about important deadlines.

Deadlines Related to the Hospital Safety Grade

Hospitals that would like Leapfrog Hospital Survey Results used in their Leapfrog Hospital Safety Grade must submit a Survey and an Adult Inpatient CPOE Test by the [Data Snapshot Dates](#). The Leapfrog Hospital Survey and the Hospital Safety Grade are distinct programs administered by The Leapfrog Group. Though some measures from the Leapfrog Hospital Survey are used in the Hospital Safety Grade, the grade also utilizes publicly available data from other data sources. Find answers to Frequently Asked Questions in the "For Hospitals" section of the Hospital Safety Grade [website](#).

Technical Assistance

Leapfrog's Help Desk

Connect with Leapfrog's in-house subject matter experts via our dedicated Help Desk to get timely support for:

- Survey content and scoring questions,
- Data verification messages and requests for documentation, and
- Technical issues related to the Online Survey Tool, CPOE Evaluation Tool, or the Hospital and Surgery Center Ratings [website](#).

You can also schedule a 1:1 Hospital Survey Orientation and submit feedback on any of Leapfrog's ratings programs, including [Top Hospitals](#) and [Top ASCs](#), the [Hospital Safety Grade](#), the [Recognized Leader in Caring for People with Diabetes Program](#) and [Leapfrog's Value-Based Purchasing Program](#).

To quickly get you to the right in-house expert for the right level of support, submit your inquiry in writing through the Zendesk ticketing portal at <https://leapfroghelpdesk.zendesk.com>. You'll receive a reply within 1-2 business days, if not sooner. Tickets submitted during a CPOE Test receive a reply within 10 minutes during normal business hours. More information on submitting and managing Help Desk tickets can be found in the [Help Desk Guide](#).

The Help Desk is staffed Monday through Friday from 9:00 a.m. to 5:00 p.m. ET, except on federal holidays. Please review the Help Desk Holiday Schedule for closures and allow ample time for staff to respond to time sensitive requests before any program deadlines.

You can manage your open tickets through email and/or create an account with Zendesk to manage open and archived tickets.

To ensure that you receive our emails, please work with your IT department to add the following to your safe sender list:

- @leapfrog-group.org
- @leapfroghelpdesk.zendesk.com
- @em8434.leapfrog-group.org
- IP address: 159.183.167.150

Leapfrog Hospital Survey Webinar Series

The Leapfrog Hospital Survey Webinar Series is designed for Survey coordinators, hospital leaders, and others who would benefit from a more interactive presentation of Survey materials and information.

The Webinar Series is held monthly from March to December and includes monthly office hours in addition to monthly webinars. The one-hour webinars focus on specific topics related to the Survey, including new measures. Throughout each webinar, participants can ask questions live or via the Zoom Q&A function.

The monthly 30-minute office hours are designed to give participants another regular, interactive touch point with Leapfrog's Help Desk, so Survey coordinators always have the information they need, when they need it.

Join now and start benefiting from:

- **Monthly office hours with the Leapfrog Help Desk:** 30 minutes to get real-time technical assistance, answers to your questions, and help staying on top of upcoming deadlines. Staffed by Leapfrog's expert Help Desk.
- **Monthly webinars:** Timely and focused presentations on Survey and CPOE Evaluation Tool measures and specifications, scoring information, frequently asked questions, technical assistance, and public reporting. Each webinar concludes with a 20-minute open Q & A session.

- **Archive Library:** Slides and recordings from each webinar are archived in an online portal that participants can access from March to January.

The annual registration fee is \$500 per individual.

For a schedule of events and to register, please visit the Leapfrog [Hospital Survey Webinar Series webpage](#).

Support for Health Systems

Are you responsible for coordinating Leapfrog Hospital Survey submissions for more than one hospital? Leapfrog's Health System Support subscription for multi-hospital health systems is designed to help Survey coordinators and health system leaders become in-house experts on the Leapfrog Hospital Survey and the Hospital Safety Grade and make it easy to monitor, compare, and analyze your hospitals' Leapfrog Hospital Survey Results, Hospital Safety Grades, and Competitive Benchmarking scores. The subscription gives you timely data for all your hospitals in a series of easy-to-use Excel workbooks, so you can quickly perform analysis, benchmark performance, build performance dashboards, and identify areas for improvement.

The support package includes the following:

- Hospital Webinar Series (one registration per health system)
- Leapfrog Hospital Survey Responses and Results
- Leapfrog Hospital Safety Grades
- Competitive Benchmarking Scores

More information is available on the [Support for Health Systems webpage](#). Please contact the [Help Desk](#) for more information.

Reporting Periods

Important Note: Reporting periods should be selected based on the date of Survey or section submission. However, hospitals do not need to use the same reporting period throughout the Survey.

	Survey Submitted <u>Prior to</u> September 1	Survey (Re)Submitted <u>on or</u> <u>After</u> September 1

*Leapfrog will update VON data 3 times per Survey Cycle for all hospitals that have provided an accurate VON Transfer Code in the Hospital Profile, submitted a [Data Sharing Authorization](#) letter to VON, selected "VON National Performance Measure" in Section 4E, and submitted the 2025 Leapfrog Hospital Survey.

**Adult and pediatric hospitals reporting on Section 7B: Healthcare-Associated Infections are required to join Leapfrog's NHSN Group. More information, including important deadlines, is available on the [Join NHSN Group webpage](#). Leapfrog will update data 4 times for all members of our NHSN group that have provided an accurate NHSN ID in the Hospital Profile and submitted the 2025 Leapfrog Hospital Survey.

***Adult and pediatric hospitals reporting on Section 9D: Patient Follow-up are required to provide an accurate CMS Certification Number (CCN) in the Hospital Profile. Leapfrog will update data 3 times per Survey Cycle for all hospitals that have provided an accurate CCN in the Hospital Profile and submitted Section 9: Outpatient Procedures.

Included Units by Survey Section

Page Intentionally Left Blank

HOSPITAL PROFILE

Hospitals must complete and submit a Hospital Profile via the Online Hospital Survey Tool before accessing the Hospital Survey Dashboard for the first time. The Profile is available year-round and should be updated as needed.

Hospital Profile

The Hospital Profile includes questions about demographic and contact information. The Profile can be accessed and updated anytime throughout the year after logging into the Online Hospital Survey Tool.

The Hospital Profile must be completed and submitted before you can access Sections 1-9 and the CPOE Evaluation Tool on the Survey Dashboard.

Hospital Profile

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Notes:

Note 1: Leapfrog uses an administration system that links contacts shared by hospitals (i.e., CEOs, Survey Contacts, System Contacts, and Public Relations Contacts). Only one phone number and email address will be maintained for each contact, meaning that if this shared contact's information is updated in one hospital's Profile, it will be updated for all hospitals associated with the contact.

Note 2: Following [Leapfrog's Extensive Monthly Data Verification](#), the Primary Survey Contact, Secondary Survey Contact, and System Survey Contact will receive an email from the Help Desk detailing potential reporting errors.

Hospital Information

Organization Name This is the name that will appear on Leapfrog's public reporting website.	CMS Certification Number (CCN)² If the CCN displayed in the Online Hospital Survey Tool is not correct, contact the Leapfrog Help Desk immediately.

Page Intentionally Left Blank

SECTION 1: PATIENT RIGHTS AND ETHICS

This section includes questions and reference information for Section 1: Patient Rights and Ethics. Please carefully review the questions, endnotes, and reference information (e.g., measure specifications, notes, and frequently asked questions) before you begin. Failure to review the reference information could result in inaccurate responses.

Section 1: Patient Rights and Ethics

Billing Ethics Bibliography and Fact Sheet:

<https://ratings.leapfroggroup.org/measure/hospital/2025/billing-ethics>

Health Care Equity Bibliography and Fact Sheet:

<https://ratings.leapfroggroup.org/measure/hospital/2025/health-care-equity>

Informed Consent Bibliography and Fact Sheet:

<https://ratings.leapfroggroup.org/measure/hospital/2025/informed-consent>

Section 1 includes questions about your hospital's billing ethics, health care equity, and informed consent processes. This section also includes questions on your hospital bed size, admissions, ICUs, and teaching status.

Each hospital achieving the standard for Billing Ethics:

- 1) Provides every patient with a billing statement within 30 days after final claims adjudication that includes all 10 required elements listed in question #1, **and**
- 2) Gives patients instructions for contacting a billing representative with access to an interpretation service to communicate in the patient's preferred language and has the authority to do all three required elements in question #2 within ten business days, **and**
- 3) Does NOT take legal action against patients for late or insufficient payment.

Each hospital achieving the standard for Health Care Equity:

- 1) Collects patient self-identified race, ethnicity, and preferred written and/or spoken language data, **and**
- 2) Trains staff responsible for collecting self-identified demographic data from patients, **and**
- 3) Uses the patient self-identified demographic data to stratify at least one quality measure, **and**
- 4) If disparities were identified, has an updated or revised policy or procedure to address the disparity or has developed a written action plan, **and**
- 5) Shares information about efforts to identify and reduce health care disparities on its public website, **and**
- 6) Reports out and discusses efforts to identify and address health care disparities with the board.

Each hospital achieving the standard for Informed Consent:

- 1) Has a training program on informed consent that tailors different training topics to different staff roles and has made the training required for newly hired staff and existing staff who were not trained, **and**
- 2) Ensures that as part of the process for obtaining informed consent, clinicians explain expected difficulties, recovery time, pain management, and restrictions after a procedure, and give the patient an opportunity to ask questions, **and**
- 3) Ensures every applicable consent form used by the hospital includes the name of the clinician performing the procedure, whether the clinician is expected to be absent, and whether any assistants or trainees will be involved, **and**
- 4) Ensures every applicable consent form is written at a 6th-grade reading level or lower, **and**
- 5) Prior to conducting the informed consent discussion, identifies the patient/legal guardian's preferred language and provides a medical interpreter, and has a place in the consent form that indicates whether an interpreter was used, **and**
- 6) Requires clinicians at the hospital to use the "teach back method" with patients/legal guardians.

Download the 2025 Leapfrog Hospital Survey Scoring Algorithm on the [Scoring and Results webpage](#).

1A: Basic Hospital Information

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review Leapfrog's Multi-Campus Reporting Policy.

Important Note: Only include units that were open for the entire reporting period and that remain currently open.

Specifications: See Basic Hospital Information Measure Specifications in the Reference Information beginning on page 50.

Reporting Period: 12 months

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

General Information

1) Reporting period used:	☐ 01/01/2024 – 12/31/2024 ☐ 07/01/2024 – 06/30/2025
2) Total number of <u>licensed acute-care</u> ¹⁰ beds.	_____
3) Total number of <u>staffed acute-care</u> ¹¹ beds.	_____
4) Total number of <u>adult acute-care admissions</u> ¹² to your hospital during the reporting period.	_____
5) Total number of <u>pediatric acute-care admissions</u> ¹³ to your hospital during the reporting period.	_____
6) Does your hospital operate any adult and/or pediatric <u>general medical, surgical, medical/surgical, or neuro ICUs</u> ¹⁴ ? <i>If "yes" to question #6, skip question #11 below.</i> <i>If "no" to question #6, skip questions #7-10 and continue to question #11.</i>	☐ Yes ☐ No
7) Total number of <u>licensed</u> ¹⁵ adult and pediatric general medical, surgical, medical/surgical, and neuro ICU beds.	_____
8) Total number of <u>staffed</u> ¹⁶ adult and pediatric general medical, surgical, medical/surgical, and neuro ICU beds.	_____
9) Total number of adult <u>general medical, surgical, medical/surgical, and neuro ICU</u> ¹⁴ admissions during the reporting period.	_____
10) Total number of pediatric <u>general medical, surgical, medical/surgical, and neuro ICU</u> ¹⁴ admissions during the reporting period.	_____
11) If your hospital does not operate dedicated adult or pediatric general medical, surgical, medical/surgical, or neuro ICUs, does your hospital admit adult and/or pediatric general medical, surgical, medical/surgical or neuro ICU patients to mixed acuity units?	☐ Yes ☐ No

2025 Leapfrog Hospital Survey – Hard Copy

Section 1: Patient Rights and Ethics

12) Does your hospital operate any of the following specialty ICUs: medical cardiac, respiratory, surgical cardiothoracic, burn, trauma, pediatric cardiothoracic, oncology, or any level neonatal ICU? <i>If "no" to question #12, skip question #13 and continue to question #14.</i>	☐ Yes ☐ No
13) Total number of admissions to any level neonatal ICU ¹⁷ during the reporting period.	_____
14) Is your hospital a Major or Graduate teaching hospital (based on NHSN's definitions) for physicians and/or physicians-in-training or nursing students?	<i>No response required here. Determined automatically based on NHSN 2024 Patient Safety Component – Annual Hospital Survey.</i>

Reporting Period: Answer questions #15-18 based on the practices currently in place at the time you submit this section of the Survey.

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

General Hospital Policies

15) To help ensure that patients are cared for by well-trained physicians and other providers (e.g., certified registered nurse anesthetists, certified midwives, or certified nurse-midwives, etc.), do your medical staff by-laws or hospital-wide policies require all physicians and providers who have privileges to provide care at your hospital to be board certified or board eligible?	☐ Yes ☐ No
16) Does your hospital include performance on the Leapfrog Hospital Survey, Leapfrog Hospital Safety Grade, or Leapfrog Top Hospital in performance reviews and/or compensation incentives for senior administrative leadership?	☐ Yes ☐ No
17) Does your hospital have a policy and protocol that empowers patients, or their family caregivers, to activate a rapid response team (RRT) to evaluate the patient for possible escalation of care, that includes all the following elements: • A process to notify patients and family caregivers, verbally or in writing, about how to activate the rapid response team; • A process to ensure clinicians are trained to recognize when a patient or family caregiver is asking for an evaluation by a rapid response team; and • A process to ensure clinicians are trained on how to conduct the evaluation if they are part of the rapid response team?	☐ Yes ☐ No
18) Does your hospital have a protocol to follow-up on patient-reported concerns about their care that includes all the following elements: • All patients and family caregivers are <u>notified</u> of at least one method to report concerns with their care, • All patients and family caregivers who report a concern are <u>contacted</u> by a hospital representative within 30 days of making the report, and • All concerns reported by patients and family caregivers are <u>logged</u> in an incident reporting system?	☐ Yes ☐ No

1B: Billing Ethics

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Note: Hyperlinks throughout this subsection refer to the [Billing Ethics FAQs](#) beginning on page 50, not to endnotes. These hyperlinks are not included in the Online Survey Tool.

Reporting Period: Answer questions #1-3 based on the practices currently in place at the time you submit this section of the Survey.

Note: As a reminder, the [Corrections Period](#) (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

1) Within 30 days of the final claims adjudication (or within 30 days from date of service for patients without insurance), does your hospital provide every patient with a billing statement and/or master itemized bill for facility services, either by mail or electronically (via email or the patient portal), that includes ALL the following: a. Name and address of the facility where billed services occurred; b. Date(s) of service; c. An individual line item for each service or bundle of services performed; d. Description of services billed that accompanies each line item or bundle of services performed; e. Amount of any principal, interest, or fees (e.g., late or processing fees), if applicable; f. Amount of any adjustments to the bill (e.g., health plan payment or discounts), if applicable; g. Amount of any payments already received (from the patient or any other party), if applicable; h. Instructions on how to apply for financial assistance, if applicable; i. <u>Instructions in the patient's preferred language on how to obtain a written translation or oral interpretation of the bill; and</u> j. Notification that physician services will be billed separately, if applicable? <i>If any one of the elements above is only provided upon request, select "only upon request." If any one of the elements above is not ever provided, select "no."</i>	☐ Yes ☐ No ☐ Only upon request
2) Does your hospital give patients instructions for contacting a billing representative: • Who has access to an interpretation service to communicate in the patient's preferred language, and • Who has the authority to do all the following within 10 business days of being contacted by the patient or patient representative: i. initiate an investigation into errors on the bill, ii. offer a price adjustment or debt forgiveness based on hospital policy, and	☐ Yes ☐ No

2025 Leapfrog Hospital Survey – Hard Copy

Section 1: Patient Rights and Ethics

iii. offer a payment plan?	
3) Does your hospital take <u>legal action</u> against patients for late payment or insufficient payment of a medical bill? <i>This question does not include patients with whom your hospital has entered into a written agreement specifying a <u>good faith estimate</u> for a medical service.</i> <i>Only Military Treatment Facilities should respond “no, but required by federal law to transfer delinquent payments to the Department of Treasury for action.”</i>	○ Yes ○ No ○ No, but required by federal law to transfer delinquent payments to the Department of Treasury for action

Additional Questions (Optional – Fact Finding Only)

4) Does your hospital screen ALL patients to determine if they are eligible for your hospital's financial assistance program, regardless of whether they apply for financial assistance? <i>If “no, we only screen uninsured patients for financial assistance eligibility” or “no, we only screen patients who have applied for financial assistance,” skip question #5 and continue to question #6.</i> <i>If “no, our hospital does not have a financial assistance program,” skip questions #5-7 and continue to the next subsection.</i>	○ Yes, using a presumptive eligibility tool licensed from a third-party ○ Yes, using our hospital's own approach to assessing financial assistance eligibility ○ No, we only screen uninsured patients for financial assistance eligibility ○ No, we only screen patients who have applied for financial assistance ○ No, our hospital does not have a financial assistance program
5) Does your hospital notify ALL patients who were determined to be eligible for your hospital's financial assistance program that they have qualified for the program within 30 days of the determination?	○ Yes ○ No
6) Does your hospital's financial assistance program apply to ALL clinician fees, in addition to facility fees, for clinicians with privileges at your hospital?	○ Yes ○ No ○ No, but we include a list of covered providers and services in our financial assistance application
7) Does your hospital's financial assistance application include notification that some services, including physician services, may be billed separately?	○ Yes ○ No

1C: Health Care Equity

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Notes:

Note 1: Question #5 will not be used in scoring for hospitals that do not identify disparities or if there is inadequate data to determine if disparities exist in question #4. Additionally, question #7 is optional and will not be used in scoring or publicly reported. All other questions will be used in scoring and public reporting.

Note 2: Hyperlinks throughout this subsection refer to the [Health Care Equity FAQs](#) beginning on page 52, not to endnotes. These hyperlinks are not included in the Online Survey Tool.

Reporting Period: Answer questions #1-8 based on the practices currently in place at the time you submit this section of the Survey.

Note: As a reminder, the [Corrections Period](#) (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

1) Which of the following patient self-identified demographic data does your hospital collect <u>directly from its patients (or patient's legal guardian)</u> prior to or while registering a patient for a hospital visit? <i>Select all that apply.</i> <i>If "none of the above," skip the remaining questions in Section 1C and continue to the next subsection. The hospital will be scored as "Limited Achievement."</i>	☐ Race ☐ Ethnicity ☐ Spoken language preferred for health care (patient or legal guardian) ☐ Written language preferred for health care (patient or legal guardian) ☐ Sexual orientation ☐ Gender identity ☐ <u>Ability status</u> ☐ None of the above
2) Does your hospital train staff responsible for collecting the self-identified demographic data either in-person or over the phone from patients (or patient's legal guardian) in question #1 at both: - the time of onboarding, and - annually thereafter?	☐ Yes ☐ No
3) Does your hospital use the patient self-identified demographic data it collects directly from patients (or patient's legal guardian) in question #1 to stratify <u>any</u> quality measure(s) with the aim of identifying <u>health care disparities</u>? <i>If "no" to question #3, skip questions #4-5 and continue to question #6.</i>	☐ Yes ☐ No
4) By stratifying the quality measure(s) from question #3, has your hospital identified any health care disparities among its patients? <i>If "no, disparities were not identified" or "inadequate data available to determine if disparities exist" to question #4, skip question #5 and continue to question #6.</i>	☐ Yes, disparities were identified ☐ No, disparities were not identified ☐ Inadequate data available to determine if disparities exist

2025 Leapfrog Hospital Survey – Hard Copy

Section 1: Patient Rights and Ethics

5) In the past 12 months, has your hospital used the data and information obtained through question #4 to update or revise its policies or procedures? OR In the past 12 months, has your hospital developed a written action plan that describes how it will address at least one of the health care disparities identified through question #4?	☐ Yes ☐ No
6) Does your hospital share information on its efforts to identify and reduce health care disparities and the impact of those efforts on its public website based on <i>race, ethnicity, spoken language preferred for health care (patient or legal guardian), written language preferred for health care (patient or legal guardian), sexual orientation, gender identity, or ability status</i>? <i>If "no" to question #6, skip question #7 and continue to question #8.</i>	☐ Yes ☐ No
7) <u>Webpage</u>⁸ URL where efforts to identify and reduce health care disparities and the impact of those efforts (based on the self-identified demographic data collected directly from patients or patient's legal guardian) are displayed: <i>The http:// prefix needs to be included.</i> <i>This question is optional and response will not be scored or publicly reported in 2025.</i>	_____
8) Does your hospital report out and discuss efforts related to identifying and addressing disparities with the Board at least annually?	☐ Yes ☐ No

1D: Informed Consent

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Notes:

Note 1: Question #2, while required, will not be scored or publicly reported.

Note 2: In this subsection, questions regarding the informed consent process and consent forms **ONLY** apply to those procedures where general anesthesia, regional anesthesia, or monitored anesthesia care is used. The questions do **NOT** apply to anesthesia care; they only apply to the consent process and consent forms for applicable procedures.

Note 3: Hyperlinks throughout this subsection refer to the [Informed Consent FAQs](#) beginning on page 54, not to endnotes. These hyperlinks are not included in the Online Survey Tool.

Reporting Period: Answer questions #1-7 based on the practices currently in place at the time you submit this section of the Survey.

Note: As a reminder, the [Corrections Period](#) (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

Policies and Training

1) Does your hospital train employed staff on informed consent and tailor different training topics to <u>different staff roles</u> , including hospital leaders, MD/NP/PA, nurses and other clinical staff, administrative staff, and interpreters, and has your hospital made the training: - a required component of onboarding for the appropriate newly hired staff, and - required for the appropriate existing staff who were not previously trained?	☐ Yes ☐ No
2) At least once a year, does your hospital solicit feedback from patients/legal guardians about your hospital's informed consent process to understand how it can be improved over time? <i>This question is required but response will not be scored or publicly reported in 2025.</i>	☐ Yes ☐ No

Content of Informed Consent Forms

3) As part of your hospital's process for obtaining informed consent, does: - the clinician explain expected difficulties, recovery time, pain management, and restrictions after a procedure that may be experienced by the patient either in the hospital or post-discharge, if applicable; - the patient have the opportunity to ask questions; and - the consent form document that these two elements of the process have taken place?	☐ Yes ☐ No
---	---

2025 Leapfrog Hospital Survey – Hard Copy

Section 1: Patient Rights and Ethics

4) Do ALL applicable consent forms used by your hospital include: - the name(s) of the clinician(s) performing the procedure; - whether the clinician is expected to be absent from portions of the procedure (e.g., opening, closing), if applicable; and - whether any assistants or trainees will be involved in the procedure, if applicable?	☐ Yes ☐ No
5) Are ALL applicable consent forms used by your hospital written at a 6th-grade reading level or lower? <i>The procedure name and description, and any words accompanied by a plain language definition can be excluded from the <u>reading level assessment</u>.</i>	☐ Yes, all applicable forms are written at a 6th-grade reading level or lower ☐ No, but at least one form is written at a 6th-grade reading level or lower ☐ No forms are written at a 6th-grade reading level or lower ☐ No, all applicable forms are written at a 9th-grade reading level or lower

Process for Gaining Informed Consent

6) Prior to the informed consent discussion, does your hospital: - ask what the patient/legal guardian's preferred language for medical decision-making is; - where needed, provide the patient/legal guardian access to a <u>qualified medical interpreter</u>, NOT a family caregiver; - use a consent form or notation in the medical record to document whether a qualified medical interpreter was used to conduct the informed consent process; and - have the medical interpreter sign the consent form (either in-person, electronically, or by documenting the use of an interpreter in the medical record)?	☐ Yes ☐ No
7) As part of the informed consent discussion, do clinicians at your hospital use the "teach back method" with patients/legal guardians where patients/legal guardians are asked to describe in their own words what they understand will be performed, why it will be performed, and what are the primary risks?	☐ Yes ☐ No

Affirmation of Accuracy

As the hospital CEO or as an employee of the hospital to whom the hospital CEO has delegated responsibility, I have reviewed this information pertaining to the Patient Rights and Ethics Section at our hospital, and I hereby certify that this information is true, accurate, and reflects the current, normal operating circumstances at our hospital. I am authorized to make this certification on behalf of our hospital.

The hospital and I understand that The Leapfrog Group, its members, the public and entities and persons who contract or have other business dealings with The Leapfrog Group are relying on the truth and accuracy of this information. The hospital and I also understand that The Leapfrog Group will make this information and/or analyses of this information public through the Survey Results public reporting website, The Leapfrog Group's Hospital Safety Grade, and/or other Leapfrog Group products and services. This information and/or analyses and all intellectual property rights therein shall be and remain the sole and exclusive property of The Leapfrog Group in which The Leapfrog Group retains exclusive ownership. This information does not infringe upon any third-party intellectual property rights or any other third-party rights whatsoever and is free and clear of all encumbrances and liens of any kind. The hospital and I acknowledge that The Leapfrog Group may use this information in a commercial manner for profit. The hospital shall be liable for and shall hold harmless and indemnify The Leapfrog Group from any and all damages, demands, costs, or causes of action resulting from any inaccuracies in the information or any misrepresentations in this Affirmation of Accuracy. The Leapfrog Group and its members and entities and persons who contract or have other business dealings with The Leapfrog Group reserve the right to omit or disclaim information that is not current, accurate or truthful.

Section 1: Patient Rights and Ethics Reference Information***What's New in the 2025 Survey*****Section 1A: Basic Hospital Information**

In response to comments collected during the public comment period and through the national pilot, Leapfrog is making additional updates to Section 1A: Basic Hospital Information to ask hospitals that do not operate dedicated general medical, surgical, medical/surgical, or neuro ICUs if they admit adult and/or pediatric general medical, surgical, medical/surgical, or neuro ICU patients to mixed acuity units. The purpose of this new question is to identify hospitals without a dedicated ICU that are eligible to report on ICU Physician Staffing in Sections 5A: Adult ICU Physician Staffing and 5B: Pediatric ICU Physician Staffing. Leapfrog is also asking hospitals to report on adult and pediatric admissions to their general medical, surgical, medical/surgical, and neuro ICUs separately to help identify what types of ICUs hospitals are eligible to report on.

Additionally, Leapfrog is updating the unit description endnotes in Section 1A: Basic Hospital Information to add further clarification and alignment with reporting in other sections of the Survey. The endnotes defining licensed acute-care beds and licensed ICU beds are also being updated to instruct hospitals to report the number of staffed beds if beds are currently staffed higher than licensed. The endnote for acute-care beds will also instruct hospitals to include telemetry, as well as step-down/progressive beds, and exclude observation and swing beds. The endnote for licensed ICU beds will instruct hospitals to exclude beds used for step-down/progressive care.

Leapfrog is also clarifying the reporting period used for Section 1A: Basic Hospital Information questions #13-16 which ask about board certification, inclusion of Leapfrog performance in performance reviews, rapid response teams, and patient-reported concerns, and is instructing hospitals to answer the questions based on the practices currently in place at the time they submit the section of the Survey.

In addition, Leapfrog is adding two new FAQs to this section, to offer hospitals additional guidance in implementing a policy to empower patients to activate rapid response teams, and to follow up on patient-reported concerns.

Section 1B: Billing Ethics

In response to feedback from hospitals participating in the Survey, Leapfrog is making the following updates to Section 1B: Billing Ethics:

- Question #1, regarding the itemized billing statement, will continue to ask that the itemized billing statement be provided either by mail or electronically (via email or the patient portal), however, Leapfrog is no longer adding patient preference in 2025.

Additionally, Leapfrog is retaining the optional, fact-finding questions regarding presumptive screening of patients for financial assistance and patient notification when financial assistance has been applied, for a second year with plans to incorporate into the national Billing Ethics Standard in 2026, but is making the following updates:

- Question #4, regarding the presumptive screening of patients for financial assistance, is being updated to clarify that ALL patients should be included in the screening process. We are also adding a response option for hospitals that only screen uninsured patients.

Two additional fact-finding questions will also be added regarding whether all clinicians are included in the hospital's financial assistance program as well as a notification that some services may be billed separately. We are also adding a FAQ with further information

The optional, fact-finding questions will not be used in scoring or public reporting in 2025. There are no changes to the scoring algorithm for Section 1B: Billing Ethics.

Section 1C: Health Care Equity

Leapfrog will continue to score and publicly report the Health Care Equity standard and will be making the following updates to Section 1C: Health Care Equity:

- Question #1, regarding patient self-identified demographic data, will be updated to include a new response option for ability status. We will also add a new FAQ which will provide more information about ability status and examples of questions to ask patients.

Leapfrog will add a new optional question asking hospitals to provide a link to where they publicly share their efforts to identify and reduce health care disparities. Only hospitals that answer “yes” to question #6 will be asked to provide the URL. This question, and the provided URL, will be used as part of Leapfrog's Data Verification Protocols. The URL will not be scored or publicly reported.

There are no changes to the scoring algorithm for Section 1C: Health Care Equity

Section 1D: Informed Consent

Based on the fact that health care facilities in Georgia and Texas have a statutory protection facilitated by using consent forms at a ninth-grade reading level, Leapfrog will maintain the current scoring algorithm giving hospitals the ability to earn “Considerable Achievement” by having all consent forms written at a ninth-grade reading level, when additional criteria in the section are met. However, since 54% of Americans between the ages of 16 and 74 read below the equivalent of a sixth-grade level, hospitals will continue to be required to have all applicable consent forms written at a sixth-grade reading level or lower to “Achieve the Standard.” In response to questions and feedback from hospitals participating in the Survey, Leapfrog is updating question #1 to clarify that the question about training only concerns individuals employed by the hospital.

We are also updating FAQ#22 to indicate that only administrative staff with a patient-facing role need to be trained on informed consent.

There are no changes to the scoring algorithm for Section 1D: Informed Consent.

Change Summary Since Release

None. If substantive changes are made to this section of the Survey after release on April 1, 2025, they will be documented in this Change Summary section.

Section 1A: Basic Hospital Information Measure Specifications

Important Note: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Teaching Status is obtained directly from CDC's National Healthcare Safety Network (NHSN) using a hospital's response to the following questions within the "Hospital Facility" section of the 2024 Patient Safety Component – Annual Hospital Survey:

Is your hospital a teaching hospital for physicians and/or physicians-in-training or nursing students? [Yes, No]

If Yes, what type: [Major, Graduate, Undergraduate]

NHSN Home		View Annual Survey	
Alerts			
Dashboard	▶	Mandatory fields marked with *	
Reporting Plan	▶	Facility ID: * The Leapfrog Group Test (ID 93395)

Analysis	▶	Number of Admissions: *	
Users	▶	Is your hospital a teaching hospital for physicians and/or physicians-in-training or nursing students? * N - No	
Facility	▶	If Yes, what type: MAJOR GRADUATE UNDERGRADUATE	

For the purposes of the 2025 Leapfrog Hospital Survey and Leapfrog's Top Hospital program, Leapfrog will consider the following types a "teaching hospital." Major and Graduate. NHSN's definitions for types of teaching hospitals may be reviewed [here](#). This designation will also be used for the purposes of assigning hospitals to a teaching or non-teaching hospital cohort for the purposes of scoring the Total Nursing Care Hours per Patient Day, RN Hours per Patient Day, and Nursing Skill Mix measures in [Section 5C: Nursing Workforce](#).

In order for Leapfrog to obtain teaching status from NHSN, hospitals must complete the following steps:

- 1) Join Leapfrog's NHSN Group and review/accept Leapfrog's Data Rights Template by the published [deadlines](#)*,
- 2) Enter a valid NHSN ID in the Profile of their 2025 Leapfrog Hospital Survey, and
- 3) Submit a 2025 Leapfrog Hospital Survey by the published [deadlines](#).

*Hospitals are not required to "re-join" Leapfrog's NHSN Group if they joined and conferred rights in previous Leapfrog Hospital Survey Cycles. However, all hospitals in Leapfrog's NHSN Group must review their Rights Acceptance Report at least annually by the published [join-by deadlines](#).

Instructions for joining or verifying that you are in Leapfrog's NHSN Group are available [here](#) (See "NHSN Guidance: Join the Group, Data Rights Template, and Downloading Reports"). These instructions also include information for verifying the teaching status response to the 2024 Patient Safety Component – Annual Hospital Survey.

Section 1: Patient Rights and Ethics Frequently Asked Questions (FAQs)

Basic Hospital Information FAQs

1. How does Leapfrog define board certified and board eligible?

For physicians:

- **Board certified** means that the physician has been awarded certification from the American Board of Medical Specialties (ABMS) or the American Osteopathic Association (AOA).
- **Board eligible** indicates that the physician has completed their initial training/fellowship but has not yet passed an existing board-certifying exam in a specialty. Leapfrog adheres to the ABMS and AOA Board Eligibility Policy for all specialties, which may be reviewed here: <https://www.abms.org/board-certification/board-certification-requirements/board-eligibility/> and <https://certification.osteopathic.org/about/>, respectively. These eligibility periods provide the physician with an adequate window to take their boards and re-take if necessary.

For CRNAs, **board certified** means that the RN has been awarded certification from The National Board of Certification and Recertification for Nurse Anesthetists (NBCRNA).

2. Regarding clinicians' role in the rapid response team, can we require that activation of the rapid response team be mediated by a clinical professional, such as a nurse? What training do clinicians need to have to respond to a request for a rapid response team?

The rapid response team should be able to be directly activated by the patient themselves, as opposed to through a clinical staff intermediary. Regarding the training program, Leapfrog only requires that clinicians be trained to recognize when a patient or family caregiver is asking for an evaluation by a rapid response team and be trained on how to conduct the evaluation if they are part of the rapid response team. Program examples include [Condition Help](#) at the University of Pittsburgh Medical Center and a program at [MonHealth Medical Center](#).

3. What are some examples of a protocol to follow-up on patient-reported concerns? What kinds of concerns are we supposed to be capturing?

Leapfrog's goal is to capture how hospitals are encouraging the submission of, and following up on, issues or complaints from patients that are specific to the care they received at the hospital.

Examples of opportunities to report would include any of the following:

- Notifying patients on admission about their right to report concerns as part of their [rights and responsibilities](#);
- A patient experience department that can be contacted by telephone, e-mail, and in-person;
- A reporting system available to patients through the patient portal e.g. a specific function or message in the application that prompts patients to report concerns, including through messaging the provider directly;
- A patient survey administered to patients soliciting concerns with their care; or
- The free text fields of the Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) Survey.

Billing Ethics FAQs

4. Can we consider information provided to patients at admission, or as part of the "conditions of admission" packet of material, as information that meets one or more of the elements of the billing statement in question #1?

No. Only information provided directly to the patient by mail or electronically (via email or the patient portal) can be considered.

5. To meet the criteria for item “i” in question #1, does our hospital have to translate the billing statement and/or master itemized bill to every language spoken by our patients?

Hospitals must provide instructions, in the patient's preferred language, on how to obtain a written translation or oral interpretation of the bill if the language constitutes 5% (and at least 50 patients) or 1,000 patients (whichever is less) of the population eligible to be served or likely to receive care at the hospital.

6. As a SafetyNet hospital, our funding comes from taxpayers, grants, and government funding. A large portion of our patients are deemed indigent and do not receive a bill for any services. Only a small portion with insurance will receive a bill. Therefore, we do not send a bill to every patient. Can we respond “yes” to question #1?

Yes. Hospitals do not need to provide billing statements to patients with no balance due in order to respond “yes” to question #1. However, for those patients who are receiving a bill, all the criteria listed in the question must be included to respond “yes.”

7. What does Leapfrog mean by “legal action” in question #3?

Legal action can include, but is not limited to, a lawsuit, wage garnishment, filing to take a patient's money out of their tax return, seizing or placing a lien on a patient's personal property, and selling or transferring a patient's debt to a debt collection agency that will take legal action against the patient. If, through their contract with the hospital, the debt collection agency is prevented from taking legal action against patients, selling or transferring a patient's debt to that debt collection agency would not be considered legal action.

Patients with whom your hospital has entered into a written agreement specifying a good faith estimate for a medical service are not included in this question. A patient's insurance being accepted by the hospital, or publicly available prices for a procedure, do NOT constitute a written agreement specifying a set price for a procedure.

In addition, other legal proceedings where patients may be named as defendants for causes other than late or non-payment of a medical bill are not included in this standard (e.g., filing a lien after an auto accident, or misappropriation of an insurance reimbursement).

8. What are alternatives to legal action against patients?

To ensure that patients are not being pursued when they no longer have the means to pay, some healthcare providers partner with organizations such as Undue Medical Debt, a nonprofit that uses philanthropically raised funds to acquire bad debt from health systems solely for the purpose of debt relief. They use credit analytics to locate patients with financial hardship and help notify the patient that the debt is abolished. Hospitals can contact Undue Medical Debt here: <https://www.unduemedicaldebt.org/>.

9. What is a “good faith estimate” as referred to in question #3?

A good faith estimate includes an itemized list of expected charges for the primary item or service the patient will receive and any other items or services provided as part of the same scheduled episode of care. The final bill must be no more than \$400 over the amount of the good faith estimate. The Centers for Medicare and Medicaid Services have published an example template for providing good faith estimates: <https://www.cms.gov/files/document/good-faith-estimate-example.pdf>.

10. How and when should hospitals initiate the screening process for their financial assistance program?

Hospitals should initiate the eligibility screening process on all patients at the time of registration. Hospitals can do so by using presumptive eligibility software used to determine Medicaid eligibility to help determine if patients are eligible for the hospital's own financial assistance programs (e.g., Waystar, FinThrive, RevCo, etc.). Hospitals can use tools such as Experian or paper applications to assess a patient's ability to pay.

11. What does Leapfrog mean when asking if the hospital's financial assistance program includes ALL clinicians with privileges at the hospital?

Hospitals that offer a financial assistance program (FAP) or "charity care" should provide a list of any clinicians delivering emergency or other medically necessary care in the hospital, that specifies which clinicians and services are covered by the FAP and which are not to ensure that the patient is aware that they may receive a separate bill that they will be responsible for from any clinician who is not covered. More information about what should be included in your financial assistance policy is available here: <https://www.irs.gov/charities-non-profits/financial-assistance-policy-and-emergency-medical-care-policy-section-501r4>.

Health Care Equity FAQs**12. Our hospital is just starting to explore the collection and use of demographic data. What are some resources or tools we can use to collect demographic data?**

Hospitals can refer to [the Toronto Measuring Health Equity website](https://www.toronto.ca/health-equity) which includes training videos, manuals, and presentations on how to collect demographic data from patients, including the modeling of interactions between health care staff and patients. Additionally, CMS also has some free tools available on their website at: <https://www.cms.gov/priorities/health-equity/minority-health/research-data/research-data/tools>.

13. What types of demographic data should hospitals be collecting?

At minimum, hospitals should collect ethnicity and race data from patients. While the Office of Management and Budget (OMB) has revised their Standards for maintaining, collecting, and presenting federal data on race and ethnicity, hospitals may not have implemented those updates. However, the following minimum categories should be used: American Indian or Alaska Native, Asian, Black or African American, Hispanic or Latino, Native Hawaiian or Pacific Islander, and White.

Regarding patient self-identified gender identity and sexual orientation, the Centers for Disease Control and Prevention has issued helpful guidance for providers and facilities, including guidance on the type of questions to ask patients. More information is available at <https://www.cdc.gov/hivnexus/hcp/sexual-history/index.html>.

14. To select any of the patient self-identified demographic data in question #1, does a hospital need to collect the data in a particular way?

Hospitals should be regularly collecting the information via registration or a nurse admission assessment directly from the patient or, for pediatric and other patients who cannot communicate the information themselves, the patient's legal guardian. Patients or their legal guardians should have the opportunity to provide the information either verbally (in-person or over the phone) or via a paper form or online patient portal. Information should NOT be collected through observation or other documents (e.g., state-issued ID). This information should be collected from inpatients and outpatients.

15. Does Leapfrog have an example of how to collect patient self-reported "sexual orientation" in question #1?

The CDC has helpful information available on their website at <https://www.cdc.gov/hivnexus/hcp/sexual-history/index.html>. This webpage includes guidance for discussing sexual health, sexual orientation, and gender identity. Additionally, they provide some helpful tips on what questions to ask to collect the data.

16. What does Leapfrog mean by "ability status"?

As described by the [CDC](https://www.cdc.gov/disability-and-health/about/), a disability is any condition of the body or mind (impairment) that makes it more difficult for the person with the condition to do certain activities (activity limitation) and interact with the world around them (participation restrictions). More information is available on the CDC website at https://www.cdc.gov/disability-and-health/about/?CDC_AAref_Val=https://www.cdc.gov/ncbddd/disabilityandhealth/disability.html.

Examples of questions and ways to determine one's ability status can be found here:

- https://www.cdc.gov/dhds/datasets/?CDC_AAref_Val=https://www.cdc.gov/ncbddd/disabilityandhealth/datasets.html

- <https://torontohealthequity.ca/wp-content/uploads/2018/03/Measuring-Health-Equity-Participant-Manual-2018.pdf>
- [Short Set of question on Disability: Data Collection - Washington Group](#)
- [Video 2 - Collecting Disability Data](#)

17. How does Leapfrog define “health care disparities?”

Leapfrog defines health care disparities as differences in the quality of health care that are not due to access-related factors or clinical needs, preferences, and appropriateness of intervention. More information is available at <https://www.ihl.org/insights/words-matter-making-sense-health-equity-terminology>.

18. In question #4, what does Leapfrog mean by “inadequate data available to determine if disparities exist”?

Hospitals may find that they cannot determine if a health care disparity exists due to small sample sizes (e.g., fewer than 25 patients able to be measured).

19. Can we report on health system level data in question #4 if we do not have adequate data to determine if disparities exist?

Yes, individual hospitals that do not have enough data to identify disparities among their patients based on the demographic data selected in question #1 can respond “yes” to question #4 if they are aggregating their data for the purposes of analysis with other facilities that are part of their system.

20. In question #6, is Leapfrog asking whether our hospital is publicly reporting the measures we stratify from question #3 on our website?

No. We are trying to assess the extent to which hospitals are sharing any information on their efforts to identify and reduce health care disparities based on the self-identified demographic data collected directly from the patient or legal guardian present and the impact of those efforts. This may take the form of sharing quantitative or qualitative data. It may also include a description of the types of demographic data collected and the analyses performed, which in some cases demonstrated no apparent health care disparities. Please note that the information on your webpage should be easily accessible. If your hospital is part of a health system, you must provide a link to the system webpage from your hospital's individual website. Below are examples that meet the criteria for question #6.

- Henry Ford Health: <https://www.henryford.com/about/diversity/why-we-ask>
- NewYork-Presbyterian: <https://www.nyp.org/daliocenter/data-and-infrastructure>

Informed Consent FAQs

21. In cases where hospitals do not have information about informed consent processes that take place at a clinician’s (e.g., surgeon’s) office, or if informed consent processes are conducted by clinicians that are not employed by the hospital, or in other cases where the hospital does not have visibility into the informed consent process, how should hospitals respond to questions in this section?

Hospitals that do not have input over the consent form or visibility into the informed consent process for procedures performed at a hospital, should select “No” for the questions in this section.

If the hospital does have input over the consent form and visibility into the informed consent process for procedures performed at the hospital, such as through the privileging process to allow clinicians to practice at their facility, but the consent forms and the consent process are being completed at the clinician(s)'s office, the hospital can work with those offices to implement the requirements outlined in the questions and, via an annual audit, verify that the forms and process meet the criteria to respond “Yes” to the questions in this section. All documentation should be maintained throughout the Survey Cycle.

22. Are there any examples of patients for whom the informed consent questions would not apply?

When responding to the questions in this subsection, you can exclude patients who are unable to communicate and for whom no legal guardian or medical proxy has been identified at least one week prior to the procedure being performed.

23. Should we consider the term “legal guardian” to be equivalent to the term “legal surrogate decision-maker”?

Yes, for the purposes of the Leapfrog Hospital Survey, these terms are equivalent.

24. What roles and staff levels need to be included in the training program on informed consent included in question #1? What types of training can we use?

As described on page 98 of the AHRQ's Making Informed Consent an Informed Choice – Training for Health Care Leaders, the appropriate roles for training include all the following: hospital leaders, physicians/independent nurse practitioners/independent physician assistants, nurses or other clinical staff, administrative staff in a patient-facing role, and interpreters. The training may be tailored to only include relevant materials based on the staff role. The goal is for each responsible staff person to be trained in their applicable domains. For example:

- For hospital leaders, training on the definition and principles of informed consent and specifics on the hospital's informed consent policy is appropriate.
- Clinical staff such as physicians and nurses should also be trained in strategies for clear communication, for presenting choices, and for documentation, if they are responsible for directly conducting the informed consent process.
- For administrative staff in a patient-facing role and interpreters, participating in the informed consent process should also be trained in reviewing and completing documentation.

Staff that are not directly employed by the hospital (e.g., medical interpreters who are employed by a contractor) do not need to be trained by the hospital.

Training does not need to be exclusive to informed consent and can be included as a component or module in other trainings. Examples of trainings include computer-based training, one-on-one precepting, webinars, and staff meeting presentations, as well as other modalities where learning can be assessed after the content is delivered to the trainee.

25. Regarding the process for soliciting patient feedback in question #2, what parameters should this process follow? Is there a specific patient feedback form that should be used?

Any method of soliciting feedback from patients who have gone through your informed consent process would be acceptable. One example would be surveying patients after discharge; another example would be asking the hospital's Patient and Family Caregiver Advisory Council (PFAC), if the PFAC includes at least one person who has experience with consenting to a procedure at the hospital in the past 24 months, either for themselves or on behalf of a patient as a caregiver. Asking about the specific verbiage used in the consent form, as well as more general questions about the consent process itself, would both be acceptable areas of inquiry. It is Leapfrog's goal to encourage hospitals to ensure their process is working well for patients by being as flexible as possible in allowing for differing methods.

For an example of a survey of patient's experience with the informed consent process, see: Hallock JL, Rios R, Handa VL. Patient satisfaction and informed consent for surgery. *Am J Obstet Gynecol*. 2017 Aug;217(2):181.e1-181.e7. doi: 10.1016/j.ajog.2017.03.020. Epub 2017 Mar 28. PMID: 28363439.

26. Should each consent form be customized to include patient- and procedure-specific details to explain expected difficulties and recovery time (question #3)?

No. Instead, the consent form must document that the conversation between the patient and the clinician took place, and that the patient had the opportunity to ask questions. For example, such language might read: “I confirm that the choices for my treatment were explained to me. I understand the risks I may face and the benefits that may happen. I also know about the issues I might face from having the procedure. I understand how long I will take to recover, how I can manage my pain, and any rules to follow while I am in the hospital and after I leave. I also understand why the procedure is being done.”

27. Does the consent form need to specifically name the assistants and trainees who will be involved in the procedure, the same way the consent form needs to name the clinician performing the procedure?

No. The consent form only needs to indicate that assistants or trainees may be involved, if this applies to the specific procedure the patient is signing the consent form for.

28. Why has Leapfrog selected a 6th-grade reading level target for consent forms, and what are some strategies we can use to meet this?

Just over half of U.S. adults have a reading level that permits them to understand and synthesize information from a complex text. According to a [Gallup analysis](#), 54% of Americans between the ages of 16 and 74 read below the equivalent of a sixth-grade level. A more recent survey by the [Organization for Economic Development and Cooperation \(OECD\)](#) indicates that literacy in the U.S. has gradually declined since that Gallup analysis, suggesting a still-greater proportion of the population reads below a sixth-grade level today.

Leapfrog hosted two Town Hall Calls last year led by AHRQ describing techniques for reducing the written complexity of consent forms. The slides are available on Leapfrog's [Town Hall Calls webpage](#); please refer to slides 40-47 for more information in the "Informed Consent" slide deck and slides 40-45 in the "Health Literacy" deck. Additional resources include:

- [AHRQ Training Module](#)
- The Patient Education Materials Assessment Tool ([PEMAT](#))
- Clear Communication Index ([CCI](#))
- [CMS Toolkit for Making Written Material Clear and Effective](#)

29. How should the reading level of the consent form be assessed?

There are software tools available to assess reading level. For example, consent forms can be edited in Microsoft Word 365, where a readability tool can be used to make this assessment by: (1) on the "File" tab, click the "Options" button; (2) on the "Proofing" tab, under "When correcting spelling and grammar in Word," select the "Show readability statistics" check box. Exit the window. Then, under the Review tab in your Word document, click the "Editor" button in the far left corner of the ribbon, then click "Insights – Document Stats" on the "Editor" sidebar: Word displays a message box showing you the Flesch-Kincaid readability grade-level: any value less than or equal to 6.9 is considered a "sixth-grade" reading level. Reading level can also be assessed using online tools, such as those provided at [Readable.com](#), provided those tools use either the Flesch-Kincaid or SMOG readability standard to evaluate the readability of written language.

30. What information on the consent form can be excluded from the reading level assessment?

The procedure name and description can be excluded from the reading level assessment. In addition, information intended to be read by the provider or administrative staff ONLY, such as instructions for signing and returning the consent form, and information that is written in by an individual provider to give that patient information specific to their condition, can also be excluded. Finally, any words where a sixth-grade reading level definition is included with the term can be excluded from the reading level assessment. For example, in the sentence "anesthesia (putting you to sleep)," only "putting you to sleep" needs to be considered in the reading level assessment.

31. What is a qualified medical interpreter?

In the [U.S. Department of Health and Human Services 2023 Language Access Plan](#), a qualified medical interpreter is defined as "A bilingual/multilingual person who has the appropriate training and experience or demonstrated ability to fully understand, analyze, and process and then faithfully render a spoken, written, or signed message in one language into a second language and who abides by a code of professional practice and ethics." Leapfrog adheres to this definition for the purposes of reporting on the Hospital Survey.

Page Intentionally Left Blank

SECTION 2: MEDICATION SAFETY

This section includes questions and reference information for Section 2: Medication Safety. Please carefully review the questions, endnotes, and reference information (e.g., measure specifications, notes, and frequently asked questions) before you begin. Failure to review the reference information could result in inaccurate responses.

Section 2: Medication Safety**Computerized Physician Order Entry (CPOE) Fact Sheet and Bibliography:**<https://ratings.leapfroggroup.org/measure/hospital/2025/safe-medication-ordering>**Bar Code Medication Administration (BCMA) Fact Sheet and Bibliography:**<https://ratings.leapfroggroup.org/measure/hospital/2025/safe-medication-administration>**Medication Reconciliation Fact Sheet:**<https://ratings.leapfroggroup.org/measure/hospital/2025/medication-reconciliation>

In Section 2, pediatric hospitals should only respond to questions in Sections 2A and 2C. Sections 2B and 2D do not apply to pediatric hospitals. Additionally, pediatric hospitals are not required to complete the CPOE Evaluation Tool.

Section 2 includes questions about your hospital's use of CPOE and BCMA, and (for adult and general hospitals) questions about your hospital's medication reconciliation process. The EHR application subsection (2B) is only applicable to adult and general hospitals and will not be scored or publicly reported. In 2025, three questions about Artificial Intelligence (AI) applications were added to subsection 2B – these questions are optional and will not be scored or publicly reported.

Each hospital achieving the standard for Computerized Physician Order Entry (CPOE):

1. Assures that prescribers enter at least 85% of inpatient medication orders via a computer system that includes decision support software to reduce prescribing errors, **and**
2. For adult and general hospitals, demonstrates, via a test, that its inpatient CPOE system can alert physicians to at least 60% of frequent serious medication errors known to cause harm to patients.

Each hospital achieving the standard for Bar Code Medication Administration:

1. Has implemented the use of BCMA at the bedside in 100% of applicable units; **and**
2. Has achieved at least 95% compliance with scanning patients and medications during administration in applicable units where BCMA is implemented; **and**
3. Has a BCMA system that includes all the following types of decision support: wrong patient, wrong medication, wrong dose, wrong time, and second nurse check needed; **and**
4. Has at least six of the following structures in place to monitor and reduce workarounds: has a formal committee that meets routinely to review data reports on BCMA system use, has back-up equipment for hardware failures, has a help desk that provides timely responses to urgent BCMA issues in real-time, conducting real-time observations of users using the BCMA system, and engages nursing leadership at the unit level on BCMA use. Additionally, information from these structures is used to implement quality improvement projects or monitor previous quality improvement projects focusing on the hospital's BCMA system. Results from the quality improvement projects are evaluated and demonstrate that these projects have resulted in higher adherence to standard medication administration processes. Finally, resolution of system deficiencies and/or problems that may have contributed to the workaround are communicated back to the end user.

Each hospital achieving the standard for Medication Reconciliation:

1. Uses a nationally endorsed protocol to collect data on the accuracy of its medication reconciliation process for at least 30 sampled patients and reported the data collected to Leapfrog, **and**
2. Has a rate of unintentional medication discrepancies that is lower than the 50th percentile (where lower performance is better).

Download the 2025 Leapfrog Hospital Survey Scoring Algorithm on the [Scoring and Results webpage](#).

2A: Computerized Physician Order Entry (CPOE)

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review Leapfrog's [Multi-Campus Reporting Policy](#).

Important Notes:

Note 1: "Prescribers" used throughout this subsection refers to all licensed clinicians who are authorized by the state in which the hospital is located to order medications for patients. This includes residents and interns who are authorized to order medications under their own authority.

Note 2: Adult and general hospitals must complete an Adult Inpatient Test at least once per Survey Cycle (April to November). Hospitals are encouraged to ensure that the Adult Inpatient CPOE Test is submitted along with the Survey to meet the deadlines for Leapfrog's Programs such as Top Hospital, Leapfrog Hospital Safety Grade, etc.

Note 3: Hospitals will have access to the CPOE Evaluation Tool immediately after completing the Hospital Profile in the Online Hospital Survey Tool.

Specifications: See [Computerized Physician Order Entry \(CPOE\) Measure Specifications](#) in the Reference Information beginning on page 72.

Reporting Period: 3 months

Answer questions #1-5 for the latest 3-month period prior to the submission of this section of the Survey.

Note: As a reminder, the [Corrections Period](#) (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

1) What is the latest 3-month reporting period for which your hospital is submitting responses to this section? 3-month reporting period ending:	_____ Format: Month/Year
2) Does your hospital have a functioning CPOE system in one or more <u>inpatient</u> units of the hospital that: - includes decision support software to reduce prescribing errors; and - is <u>linked</u>¹⁸ to pharmacy, laboratory, and admitting-discharge-transfer (ADT) information in your hospital? <i>If "no" to question #2, skip the remaining questions in Section 2A and Section 2B, and continue to Section 2C. The hospital will be scored as "Limited Achievement."</i>	☐ Yes ☐ No
3) Total number of inpatient medication orders , including orders made in units that do NOT have a functioning CPOE system.	_____
4) Total number of inpatient medication orders in question #3 that licensed prescribers entered via a CPOE system that meets the criteria outlined in question #2.	_____

*If "yes" to question #2 and you are an **adult or general hospital**, use the **Take CPOE Tool** button on the Survey Dashboard to access the **CPOE Evaluation Tool**. Question #5 does not apply to pediatric hospitals.*

5) Hospital's score when it tested its CPOE system using the Leapfrog CPOE Evaluation Tool:

Adult Inpatient Test must be completed between April 1 and November 30, 2025.

No response required here. Determined automatically based on separately completing a test using the Leapfrog CPOE Evaluation Tool.

2B: EHR Application Information

This section is not applicable to pediatric hospitals.

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review Leapfrog's Multi-Campus Reporting Policy.

Important Note: This subsection will not be scored or publicly reported. The information collected in this subsection is used by the CPOE Evaluation Tool developers for research and CPOE Evaluation Tool improvements.

Reporting Period: Answer questions #1-6 based on the EHR application currently in place at the time you submit this section of the Survey.

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

1) Which EHR source is your hospital currently using? <i>If your hospital purchased a third-party vendor system and substantially altered it on implementation, select "Homegrown App," skip questions #2-4, and continue to question #5.</i>	☐ Vendor Application ☐ Homegrown Application
2) Which EHR vendor is your hospital currently using?	☐ Altera/Allscripts ☐ Altera/Digital Health ☐ Allscripts/Eclipsys ☐ Altera/Paragon ☐ CareCast ☐ Cerner ☐ CPSI ☐ Epic ☐ MEDHOST ☐ MEDITECH ☐ Quadramed ☐ Other (please specify): _____
3) What EHR version is your hospital currently using?	_____
4) What is the name of the EHR product that your hospital is currently using?	_____
5) When was the EHR initially installed at the hospital? <i>Enter the month and year the EHR was installed at the hospital.</i>	_____ <i>Format: Month/Year</i>
6) Which EHR Medication Reference Database is your hospital currently using?	☐ Homegrown ☐ First DataBank (FDB) ☐ Gold Standard / Elsevier ☐ Lexicomp ☐ Medi – Span ☐ Micromedex ☐ Multum ☐ Other (please specify): _____

Additional Questions (Optional – Fact Finding Only)

7) Does your hospital currently use any Artificial Intelligence (AI) applications as part of your medication ordering decision support system? <i>If “no” to question #7, skip the remaining questions in Section 2B, and continue to Section 2C.</i>	☐ Yes ☐ No
8) Which Artificial Intelligence (AI) vendor source is your hospital currently using as part of your medication ordering decision support system? <i>Select all that apply.</i> <i>If “Other AI Vendor” or “Other Homegrown AI Application” is selected, continue to question #9. Otherwise, skip question #9 and continue to the next subsection.</i>	EHR Vendors ☐ Epic ☐ Cerner ☐ Allscripts (Altera) ☐ Meditech ☐ Quadramed ☐ CPSI Medication Safety Vendors ☐ First Databank ☐ Medi-Span ☐ Multum ☐ Lexicomp ☐ Elsevier Other ☐ Other AI Vendor ☐ Other Homegrown AI Application
9) What are the names of the Other AI Vendors or Other Homegrown AI Applications that your hospital is currently using as part of your medication ordering decision support system? <i>If entering multiple Other AI Vendors or Other Homegrown AI Applications, separate each by a comma.</i>	_____

2C: Bar Code Medication Administration (BCMA)

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review Leapfrog's Multi-Campus Reporting Policy.

Important Note: Only include units that were open for the entire reporting period and that remain currently open.

Specifications: See Bar Code Medication Administration (BCMA) Measure Specifications in the Reference Information beginning on page 73.

Reporting Period: 3 months

Answer questions #1-21 for the latest 3-month period prior to the submission of this section of the Survey.

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

1) What is the latest 3-month reporting period for which your hospital is submitting responses to questions #2-21? 3-month reporting period ending:	_____ <i>Format: Month/Year</i>
2) Does your hospital use a Bar Code Medication Administration (BCMA) system that is linked to the electronic medication administration record (eMAR) when administering medications at the bedside in at least one of the following adult and/or pediatric units: • <u>General Medical, Surgical, Medical/Surgical, Neuro¹⁴, Neonatal¹⁷, or Specialty ICUs;</u> • <u>Medical, Surgical, or Medical/Surgical Units (including telemetry units)¹⁹;</u> • <u>Step-down/Progressive Units²⁰;</u> • <u>Labor and Delivery Unit²¹; or</u> • <u>Pre-operative and Post-anesthesia Care Units²²?</u> <i>If "no" to question #2, skip questions #3-21 and continue to the next subsection. The hospital will be scored as "Limited Achievement."</i>	☐ Yes ☐ No
3) Does your hospital operate adult and/or pediatric <u>General Medical, Surgical, Medical/Surgical, Neuro¹⁴, Neonatal¹⁷, or Specialty ICUs?</u> <i>If "no" to question #3, skip questions #4-5 and continue to question #6.</i>	☐ Yes ☐ No
4) If "yes," how many of this type of unit are open and staffed in the hospital?	_____
5) How many of the units in question #4 utilized the BCMA/eMAR system when administering medications at the bedside?	_____
6) Does your hospital operate adult and/or pediatric <u>Medical, Surgical, or Medical/Surgical Units (including telemetry units)¹⁹?</u> <i>If "no" to question #6, skip questions #7-8 and continue to question #9.</i>	☐ Yes ☐ No
7) If "yes," how many of this type of unit were open and staffed in the hospital?	_____

8) How many of the units in question #7 utilized the BCMA/eMAR system when administering medications at the bedside?	_____
9) Does your hospital operate adult and/or pediatric <u>Step-down/Progressive Units</u> ²⁰ ? <i>If "no" to question #9, skip questions #10-11 and continue to question #12.</i>	☐ Yes ☐ No
10) If "yes," how many of this type of unit were open and staffed in the hospital?	_____
11) How many of the units in question #10 utilized the BCMA/eMAR system when administering medications at the bedside?	_____
12) Does your hospital operate a <u>Labor and Delivery Unit</u> ²¹ ? <i>If "no" to question #12, skip questions #13-14 and continue to question #15.</i>	☐ Yes ☐ No
13) If "yes," how many of this type of unit were open and staffed in the hospital?	_____
14) How many of the units in question #13 utilized the BCMA/eMAR system when administering medications at the bedside?	_____
15) Does your hospital operate adult and/or pediatric <u>Pre-operative and Post-anesthesia Care Units</u> ²² ? <i>If "no" to question #15, skip questions #16-17 and continue to question #18.</i>	☐ Yes ☐ No
16) If "yes," how many of this type of unit are open and staffed in the hospital?	_____
17) How many of the units in question #16 utilized the BCMA/eMAR system when administering medications at the bedside?	_____

If "no" to questions #3, #6, #9, #12, and #15 above, update your response to question #2.

18) The number of scannable medication administrations during the reporting period in those units that utilize BCMA as indicated in questions #5, #8, #11, #14, and #17 above:	_____
19) The number of medication administrations from question #18 that had both the patient and the medication scanned during administration with a BCMA system that is linked to the electronic medication administration record (eMAR):	_____

20) What types of decision support does your hospital's BCMA system provide to users of the system?	
a) Wrong patient	☐ Yes ☐ No
b) Wrong medication	☐ Yes ☐ No
c) Wrong dose	☐ Yes ☐ No

d)	Wrong time (e.g., early/late warning; warning that medication cannot be administered twice within a given window of time)	☐ Yes ☐ No
e)	Second nurse check needed	☐ Yes ☐ No

21) Which of the following mechanisms does your hospital use to reduce and understand potential BCMA system “workarounds?”		
a)	Has a formal committee that meets routinely to review data reports on BCMA system use	☐ Yes ☐ No
b)	Has back-up equipment (e.g., extra scanners, portable computers, batteries, and mice) for BCMA hardware failures	☐ Yes ☐ No
c)	Has a Help Desk that provides timely responses to urgent BCMA issues in real-time	☐ Yes ☐ No
d)	Conducts real-time observations of users at the unit level using the BCMA system	☐ Yes ☐ No
e)	Engages nursing leadership at the unit level on BCMA use	☐ Yes ☐ No
f)	In the past 12 months used the data and information obtained through items a-e to implement quality improvement projects that have focused on improving the hospital's BCMA performance OR In the past 12 months used the data and information obtained through items a-e to monitor a previously implemented quality improvement project focused on improving the hospital's BCMA performance <i>Cannot respond “yes” to this question, unless “yes” to either 21a, 21d or 21e.</i>	☐ Yes ☐ No
g)	In the past 12 months evaluated the results of the quality improvement projects (from f) and demonstrated that these projects have resulted in higher adherence to your hospital's standard medication administration process OR In the past 12 months evaluated the results of the quality improvement projects (from f) and demonstrated continued adherence to your hospital's standard medication administration process <i>Cannot respond “yes” to this question, unless “yes” to 21f.</i>	☐ Yes ☐ No
h)	Communicated back to end users the resolution of any system deficiencies and/or problems that may have contributed to workarounds <i>Cannot respond “yes” to this question, unless “yes” to either 21a, 21d or 21e.</i>	☐ Yes ☐ No

2D: Medication Reconciliation

This section is not applicable to pediatric hospitals.

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review Leapfrog's Multi-Campus Reporting Policy.

Specifications: See **Medication Reconciliation Measure Specifications** in the Reference Information beginning on page 76.

Reporting Period: 6 months

Answer questions #1-8 for the latest 6-month period prior to the submission of this section of the Survey.

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

Sufficient Sample: See **Medication Reconciliation Measure Specifications** for instructions on identifying a sufficient sample for question #3.

1) What is the latest 6-month reporting period for which your hospital is submitting responses to this section? 6-month reporting period ending:	<u> </u> Format: Month/Year
2) During the 6-month reporting period, did your hospital conduct a random sample of adult patients and have a pharmacist or <u>certified pharmacy technician</u>²³ complete the following steps for each patient included in the sample: • <u>Interview Patient and Obtain the Gold Standard Medication History</u> (pharmacist or <u>certified pharmacy technician</u>²³); • <u>Complete a Medication Reconciliation Worksheet for each sampled patient</u> (pharmacist or <u>certified pharmacy technician</u>²³); • <u>Compare Gold Standard Medication History to Admission Orders</u> (pharmacist only); and • <u>Compare Gold Standard Medication History to Discharge Orders</u> (pharmacist only)? <i>If "no" to question #2, skip the remaining questions in Section 2D and go to the Affirmation of Accuracy. The hospital will be scored as "Did Not Measure."</i> <i>If "no, had fewer than 30 admissions to medical or med/surg units" to question #2, skip the remaining questions in Section 2D and go to the Affirmation of Accuracy. The hospital will be scored as "Does Not Apply."</i>	○ Yes ○ No ○ No, had fewer than 30 admissions to medical or med/surg units

For questions #3-8, if the sample is less than 30 patients from the 6-month period, the hospital will be scored as "Some Achievement" and the rate of unintentional discrepancies will not be publicly reported.

3) Number of adult patients that your hospital <u>sampled</u> ²⁴ .	<u> </u> Max value 500
---	------------------------------------

4) Number of patients from question #3 who had zero (0) Gold Standard Medications. <i>If more than 10 out of 30 patients (or one-third) included in the sample had zero (0) Gold Standard Medications, the hospital will be scored as "Unable to Calculate Score."</i>	_____
5) Total number of medications obtained by the pharmacist or <u>certified pharmacy technician</u> ²³ from the <u>Gold Standard Medication History</u> ²⁵ for the adult patients included in the sample.	_____
6) Total number of <u>unintentional discrepancies in admission and discharge among the gold standard medications</u> ²⁶ in question #5 identified by the pharmacist.	_____
7) Total number of <u>unintentionally ordered additional medications</u> ²⁷ for the adult patients included in the sample on admission and/or discharge identified by the pharmacist.	_____
8) Total number of <u>discrepancies due to unintentionally ordered additional medications</u> ²⁸ in question #7 identified by the pharmacist.	_____

Affirmation of Accuracy

As the hospital CEO or as an employee of the hospital to whom the hospital CEO has delegated responsibility, I have reviewed this information pertaining to the Medication Safety Section at our hospital, and I hereby certify that this information is true, accurate, and reflects the current, normal operating circumstances at our hospital. I am authorized to make this certification on behalf of our hospital.

The hospital and I understand that The Leapfrog Group, its members, the public and entities and persons who contract or have other business dealings with The Leapfrog Group are relying on the truth and accuracy of this information. The hospital and I also understand that The Leapfrog Group will make this information and/or analyses of this information public through the Survey Results public reporting website, The Leapfrog Group's Hospital Safety Grade, and/or other Leapfrog Group products and services. This information and/or analyses and all intellectual property rights therein shall be and remain the sole and exclusive property of The Leapfrog Group in which The Leapfrog Group retains exclusive ownership. This information does not infringe upon any third-party intellectual property rights or any other third-party rights whatsoever and is free and clear of all encumbrances and liens of any kind. The hospital and I acknowledge that The Leapfrog Group may use this information in a commercial manner for profit. The hospital shall be liable for and shall hold harmless and indemnify The Leapfrog Group from any and all damages, demands, costs, or causes of action resulting from any inaccuracies in the information or any misrepresentations in this Affirmation of Accuracy. The Leapfrog Group and its members and entities and persons who contract or have other business dealings with The Leapfrog Group reserve the right to omit or disclaim information that is not current, accurate or truthful.

Section 2: Medication Safety Reference Information

What's New in the 2025 Survey

CPOE Evaluation Tool

The CPOE Evaluation Tool developers will update the test medication scenarios to reflect changes to clinical guidelines and to address medications that hospitals frequently reported as not being in their medication formulary. Due to unforeseen operational challenges, the Test Patients PDF will not include the date of birth for each patient. Hospitals will need to calculate the date of birth based on the age provided. To make this easier for hospitals, Leapfrog will include a Date of Birth Calculator on the [Survey and CPOE Materials webpage](#) starting on April 1.

Additionally, patient allergies will not be removed, as the CPOE test is designed to simulate a real-life environment where allergy information is typically included in patient profiles.

Previously, the Excessive Dosing and Drug Route Order Checking Categories were indicated as scenario-specific clinical decision support, meaning that advice or information presented to the prescriber is related to the Test Order and the Test Patient, which includes specific patient demographics and clinical information. For the 2025 CPOE Test, the Excessive Dosing and Drug Route Order Checking Categories will be updated to indicate that the type of clinical decision support in these Order Checking Categories is medication-specific, meaning that it is specific to the medication and might appear any time the medication is ordered for any patient and is not specifically related to the Test Patient. This change will be reflected in the Orders and Observations Sheet.

Lastly, the Sample Test content will be updated to include one Test Order from each of the eight Order Checking Categories to give hospitals a preview of the response options that they will see on the Online Answer Form in the Adult Inpatient Test.

There are no changes to the scoring algorithm for the CPOE Evaluation Tool.

Section 2A: Computerized Physician Order Entry (CPOE)

In response to comments collected during the public comment period and in consultation with Leapfrog's CPOE Expert Panel, Leapfrog is updating the measure specifications for question #3 to include medications ordered via a secure texting platform in the denominator only. Medications ordered via a secure texting platform should be excluded from question #4, the numerator, since these orders are not entered through the CPOE system.

There are no changes to the scoring algorithm for Section 2A: CPOE.

Section 2B: EHR Application Information

Leapfrog is adding optional fact-finding questions about Artificial Intelligence (AI) vendors. The responses will be used to research AI vendor influence on a hospital's CPOE Test score. Additionally, we are adding an FAQ to define Artificial Intelligence.

These optional, fact-finding questions are not used in scoring or public reporting. Section 2B: EHR Application Information is not scored or publicly reported.

Section 2C: Bar Code Medication Administration (BCMA)

Leapfrog will continue to ask hospitals about their utilization of BCMA in the following adult and/or pediatric units: medical, surgical, and medical/surgical units; intensive care units (including neonatal); labor and delivery units; and pre-operative and post-anesthesia care units, but, we are updating the unit

definitions to further align with other sections of the Survey, including specifying the inclusion of both single and mixed acuity units when reporting on medical, surgical, and medical/surgical units. Previously, step-down/progressive units were included when reporting on medical, surgical, and medical/surgical units. For 2025, Leapfrog is adding new questions to assess the utilization of step-down/progressive units separately. Hospitals without a dedicated stepdown/progressive unit will continue to report on any medical, surgical, and medical/surgical units and include any medications administered to step-down/progressive patients in these units. This has been clarified in the corresponding endnote for medical, surgical, and medical/surgical units. Telemetry units will continue to be reported with medical, surgical, and medical/surgical units. These questions have been refined for more clarity based on comments collected during the public comment period and national pilot.

Leapfrog is also updating the measure specifications to note that hospitals should continue to count units as they do internally (i.e., if units are considered separate units despite sharing a space, report the units as two; if they are considered a single combined unit, report the unit as one). When reporting on compliance, Leapfrog will also clarify that medication administrations performed during a procedure should be excluded (i.e., if the hospital combines their procedural areas with their pre-operative or post-anesthesia care units and is able to distinguish between these medication administrations).

Leapfrog is making two updates to assist hospitals reporting on their mechanisms used to reduce and understand potential BCMA system “workarounds.” First, Leapfrog is updating one of the questions to ask about “back-up equipment (e.g., extra scanners, portable computers, batteries, and mice)” for BCMA hardware failures, instead of “back-up systems.” Second, we are adding a FAQ reminding hospitals that they should still implement or monitor a quality improvement program even if they are at 95% compliance to ensure that they can continue to improve and maintain high compliance.

There are no changes to the Scoring Algorithm for Section 2C: BCMA.

Section 2D: Medication Reconciliation

There are no changes to this subsection.

Change Summary Since Release

None. If substantive changes are made to this section of the Survey after release on April 1, 2025, they will be documented in this Change Summary section.

Section 2: Medication Safety Measure Specifications

Computerized Physician Order Entry (CPOE) Measure Specifications

Important Notes:

Note 1: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Note 2: "Licensed prescriber" refers to all licensed clinicians who are authorized by the state in which the hospital is located to order medications for patients. This includes residents and interns who are authorized to order medications under their own authority.

Source: The Leapfrog Group

Reporting Period: The latest 3-month period prior to the submission of this section of the Survey.

Medications: For the purposes of this measure, a **medication** is a substance that is taken into, or placed onto, the body of a person for one or more of the following reasons:

- as a placebo
- to prevent a disease (e.g., flu vaccine)
- to make a diagnosis (e.g., contrast dye)
- to test for the possibility of an adverse effect
- to modify a physiological, biochemical, or anatomical function or abnormality (e.g., heparin/heparin flushes, statins, antihypertensives, etc.)
- to replace a missing factor (e.g., blood product)
- to ameliorate a symptom (e.g., aspirin)
- to treat a disease or condition (including topicals, nasal sprays, eye drops, compounds, inhalants, injectables, patches, etc.)
- to induce anesthesia
- to stabilize or hydrate during medical treatment or procedures (e.g., IV fluids, normal saline, lactated ringers, etc.)
- to provide nutrition (e.g., enteral nutrition products, parenteral nutrition products, breast milk [breast milk applies to BCMA measure only])
- as a supplement (e.g., iron for a patient with iron deficiency anemia or calcium/vitamin D for a patient with osteoporosis)

For the purposes of this measure, the following are **not** considered medications:

- Pre-filled saline flushes and pre-filled heparin flushes (i.e., saline and heparin flushes that come from the manufacturer already filled and are not filled by the hospital's pharmacy)
- Chlorhexidine and alcohol preparation pads
- Intra-op irrigation solutions

Question #3 (denominator): Total number of inpatient medication orders, including medication orders made in inpatients units that do NOT have a functioning CPOE system.

Include:

- Medications ordered for **any patient with an inpatient status**, including those with an inpatient status who may be in an outpatient unit during an overflow situation.
- Medications ordered for any neonatal ICU patient.
- Medications ordered by **any individual**, including nurses and pharmacists.
- Medications ordered electronically, via a secure texting platform, verbally or via paper.
- Medications ordered verbally during a rapid response (prevention of serious injury, cardiac arrest, and respiratory arrest).

Exclude:

- Medications ordered for any newborn in a nursery or mother's room.

- New medication orders that have been modified from the original order but maintain the intent of the original order (e.g., “new” medication orders generated when a dose, route, frequency, or brand are changed).
- Medications ordered verbally during a “code blue” (i.e., medications ordered verbally when a patient requires resuscitation or needs immediate medical attention, most often as the result of a respiratory arrest or cardiac arrest).
- Medications ordered in an operating room or procedural area.

Question #4 (numerator): Total number of inpatient medication orders in question #3 that licensed prescribers entered via a CPOE system that meets the criteria outlined in question #2.

Include:

- Medication orders entered into the CPOE system by a licensed prescriber
- In addition, the following types of medication orders entered in to a CPOE system by a non-licensed prescriber, such as a nurse or pharmacist, can also be included:
 - Per protocol medication orders (i.e., medication orders with detailed guidance on how to administer, dose or adjust a medication) approved by a medical committee where the implementation of the protocol was authorized by a licensed prescriber and orders were initiated in the CPOE system.
 - Standing medication orders (i.e., orders which can be initiated based on medical staff approval of a screening criteria and indication for all patients that meet the screening criteria) approved by a medical committee that were initiated in the CPOE system.
 - Medication orders entered into the CPOE system that required either verbal read back of alerts to the licensed prescriber or a co-signature by a licensed prescriber prior to administration to ensure that the licensed prescriber was made aware of all advice/information generated by the CPOE system.

Exclude:

- Medications ordered verbally, via a secure texting platform, or via paper.
- Medication orders entered into the CPOE system by a non-licensed prescriber, such as a nurse or pharmacist, that were **NOT** per protocol medication orders or standing medication orders.
- Medication orders entered into the CPOE system by a non-licensed prescriber, such as a nurse or pharmacist, that **DID NOT** require either verbal read back of alerts or a co-signature of a licensed prescriber prior to administration.

See FAQs for additional information about responding to the questions in this section.

Bar Code Medication Administration (BCMA) Measure Specifications

Important Note: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Source: The Leapfrog Group
Reporting Period: The latest 3-month period prior to the submission of this section of the Survey.
Included Adult and/or Pediatric Units: • General Medical, Surgical, Medical/Surgical, Neuro¹⁴, Neonatal¹⁷, or Specialty ICUs • Medical, Surgical, or Medical/Surgical Units (including telemetry units)¹⁹, • Step-down/Progressive Units²⁰ • Labor and Delivery Unit²¹ • Pre-operative and Post-anesthesia Care Units²²
Excluded Units: • Emergency departments • Operating rooms • Procedural and diagnostic areas, such as radiology units, endoscopy units, etc. ○ Note: Pre-operative and post-anesthesia care areas in these units must be included • Units that were not open for the entire reporting period or that are not currently open
Important Note: Hospitals should count units as they do internally (i.e., if units are considered separate units despite sharing a space, report the units as two; if they are considered a single combined unit, report the unit as one.
Medications: For the purposes of this measure, a medication is a substance that is taken into, or placed onto, the body of a person for one or more of the following reasons: • as a placebo • to prevent a disease (e.g., flu vaccine) • to make a diagnosis (e.g., contrast dye) • to test for the possibility of an adverse effect • to modify a physiological, biochemical or anatomical function or abnormality (e.g., heparin/heparin flushes, statins, antihypertensives, etc.) • to replace a missing factor (e.g., blood product) • to ameliorate a symptom (e.g., aspirin) • to treat a disease or condition (including topicals, nasal sprays, eye drops, compounds, inhalants, injectables, patches, etc.) • to induce anesthesia • to stabilize or hydrate during medical treatment or procedures (e.g., IV fluids, normal saline, lactated ringers, etc.) • to provide nutrition (e.g., enteral nutrition products, parenteral nutrition products, breast milk [breast milk applies to BCMA measure only]) • as a supplement (e.g., iron for a patient with iron deficiency anemia or calcium/vitamin D for a patient with osteoporosis)
For the purposes of this measure, the following are not considered medications: • Pre-filled saline flushes and pre-filled heparin flushes (i.e., saline and heparin flushes that come from the manufacturer already filled and are not filled by the hospital's pharmacy) • Chlorhexidine and alcohol preparation pads • Intra-op irrigation solutions
Question #18 (denominator): Total number of scannable medication administrations during the reporting period in those units that utilize BCMA as indicated in questions #5, #8, #11, #14 and #17.
Include all scannable medication administrations (regardless of patient's admission status and administering provider) in adult and/or pediatric general medical, surgical, medical/surgical, neuro, neonatal, and specialty ICUs; medical, surgical, and medical/surgical units (including telemetry units);

step-down/progressive units; labor and delivery units; and pre-operative and post-anesthesia care units that utilize a BCMA system that is linked to the electronic medication administration record (eMAR).

Include medication administrations during a procedure if the hospital combines their procedural areas with their pre-operative or post-anesthesia care units and is **unable** to distinguish between these medication administrations.

Exclude:

- Medication administrations in units that are not specified in question #5, #8, #11, #14 or #17
- Medication administrations in units that do not utilize a BCMA system that is linked to the eMAR
- Medication administrations in units that have not been open or staffed for the entire 3-month reporting period or in units that are not open currently
- Medication administrations during a procedure if the hospital combines their procedural areas with their pre-operative or post-anesthesia care units and is able to distinguish between these medication administrations
- Administrations of medications that are not "scannable," i.e., medications that do not have a bar code and could not be scanned if BCMA were in use

Question #19 (numerator): Total number of medication administrations from question #18 that had both the patient and the medication scanned during administration with a BCMA system that is linked to the electronic medication administration record (eMAR).

Include medication administrations where both the patient and medication were scanned during administration with a BCMA system that is linked to the eMAR.

Exclude medication administrations where neither patient nor medication were scanned during administration or only the patient or only the medication were scanned with a BCMA system that is linked to the eMAR.

See [FAQs](#) for additional information about responding to the questions in this section.

Medication Reconciliation Measure Specifications**Important Notes:**

Note 1: This section does not apply to pediatric hospitals.

Note 2: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Note 3: A hospital pharmacist or certified pharmacy technician²³ plays two important roles in data collection for this measure. First, the pharmacist or certified pharmacy technician is responsible for obtaining the Gold Standard Medication History from each sampled patient. Second, the pharmacist is responsible for identifying the unintentional discrepancies by comparing the Gold Standard Medication History to admission orders and discharge orders.

Source: Brigham and Women's Hospital (NQF #2456)

Reporting Period: The latest 6-month period prior to submission of this section of the Survey.

Materials for Data Collection:

To complete the data collection for this subsection and respond to questions #3-8 hospitals should download four important tools:

- The **Medication Reconciliation Workbook** (Excel) includes 3 tabs: Instructions, Sampling, and Data Entry. This can be used to identify patients to sample and collect data from, as well as calculate the responses to enter into the Online Hospital Survey Tool from the completed Worksheets.
- The **Medication Reconciliation Worksheet** (Word) can be used by the pharmacist to identify the number of unintentional discrepancies at admission and/or discharge for each sampled patient (question #6). The Medication Reconciliation Worksheet can also be used to track additional medications that were ordered unintentionally at admission and/or discharge (questions #7-8).
- The **MARQUIS 2 Best Possible Medication History: Quick Tips** tri-fold (PDF) includes important information on how the pharmacist or certified pharmacy technician²³ should obtain the Gold Standard Medication History
- **Identifying Discrepancies Flow Chart** (PDF) includes important information on how the pharmacist should identify discrepancies between the Gold Standard Medication History and admission and discharge orders.

All of these tools are available on the [Survey and CPOE Materials webpage](#) and should be used when reporting on this measure.

The intent of this measure is to calculate your hospital's rate of unintentional medication discrepancies per medication. Hospitals may perform data collection on a regular basis or just once for the purposes of reporting on this measure to Leapfrog.

1. Hospitals that collect these data on a regular basis and did so using the previous year's measure specifications can use those data when reporting on this section of the Survey. For example, if your hospital samples regularly on a quarterly basis and collected data January through March using the previous year's specifications, you can report those data on the current year's Survey. We do ask that you download and use the most recent measure specifications and materials when they are made available on April 1 each year.
2. Hospitals that do not sample patients on a regular basis (i.e., quarterly) should sample in real-time beginning April 1 and can collect data at any time during the Survey Cycle (April 1 – November 30). Sampling can be spread out over the entire 6-month reporting period (e.g., five patients per month), or within a shorter time period within those 6 months (e.g., 30 patients in a two-week period).

Follow the steps below to complete data collection for this measure:**Step 1: Identify Patients to Include in the Sample (Survey Coordinator)**

- a. To be scored on the rate of unintentional medication discrepancies, hospitals are required to sample at least 30 patients from a 6-month reporting period. Hospitals that sample fewer than 30 patients during the reporting period will be scored and publicly reported as “Some Achievement.”
- b. All hospitals should exclude patients under 18 years old, patients who were discharged or expired before the Gold Standard Medication History could be obtained, and patients that do not have discharge orders written during the reporting period.
- c. Hospitals should sample patients from medical, medical/surgical, and step-down/progressive units (adult only) to reduce the number of sampled patients with zero (0) Gold Standard Medications. However, hospitals may expand their sampling to patients in additional units of the hospitals.
- d. Hospitals should sample patients from different days of the week, including patients admitted on the weekend.
- e. On the day of data collection, obtain a list of patients that were admitted the day before to medical and/or medical/surgical units, in the order that they were admitted.
- f. Follow the instructions in the Medication Reconciliation Workbook to randomly sample admitted patients.
- g. Send the list of sampled patients to the pharmacist, pharmacy resident, or pharmacy technician so they can schedule an in-person, video, or phone interview with each patient to obtain their Gold Standard Medication History.

Step 2: Interview Patients and Obtain the Gold Standard Medication History (Pharmacist or Certified Pharmacy Technician²³)

- a. A trained pharmacist, pharmacy resident, or certified pharmacy technician²³ must interview the patients from Step 1 and obtain the Gold Standard Medication History within 24 hours after admission, typically the morning after admission. Note that this is in addition to, and separate from, any pre-admission medication list that was created as part of normal care.
- b. The pharmacist, pharmacy resident, or certified pharmacy technician²³ can customize the following script to explain to the patient the reason for the interview: “Hi, I’m *(pharmacist’s name)*, a pharmacist at *(name of hospital)*. I know *(care team member who may have collected a pre-admission medication list or PAML)* already asked you about the medications you were taking before you were admitted to the hospital. I’m here to ask you about these medications again. Our hospital has asked me to collect this information again so I can use it to measure how well we are doing in gathering medication histories. What we learn will help us improve our processes of care in the future and make sure we manage patients’ medications safely when they come into and after they leave the hospital.”
- c. The Gold Standard Medication History is the list of medications that the patient was taking prior to admission. Best practices for collecting the Gold Standard Medication History can be found in the “Other Supporting Materials” for Section 2 on the Survey and CPOE Materials webpage.
 - i. Pharmacists, pharmacy residents, and certified pharmacy technicians²³ should try to use two sources of information (see MARQUIS 2 Best Possible Medication History: Quick Tips and Medication Reconciliation Implementation Toolkit for examples) and explore any discrepancies (e.g., errors related to dose, route, timing, etc.) before finalizing the Gold Standard Medication History. Once the pharmacist, pharmacy resident, or certified pharmacy technician²³ has completed the patient interview, they can utilize support from non-certified pharmacy technicians, medical assistants, or nurses to investigate second or third information sources (e.g., EHR list, pharmacy list, primary or specialty provider information, etc.). However, the pharmacist, pharmacy resident, or certified pharmacy technician²³ must be the one to obtain and finalize the Gold Standard Medication History.
 - ii. Medications that a patient is completely non-adherent to, meaning the patient has not taken the medication for at least 30 days, should be excluded from the Gold Standard Medication History.
 - iii. If a patient has been taking a medication differently to how it was prescribed, then the Gold Standard Medication History should list the medication as the patient was taking it.
 - iv. Exclude PRN medications unless they are clinically relevant. This includes topical locations and creams, saline nasal spray and artificial tear eye drops, herbals and supplements, and

vitamins. Two examples of clinically relevant medications that should not be excluded from the gold standard pre-admission medication list would be iron for a patient with iron-deficiency anemia or calcium/vitamin D for a patient with osteoporosis.

- v. Include PRN medications that are clinically relevant. This includes inhalers, nitroglycerin, analgesics (opioid and non-opioid), muscle relaxants, and sedatives, including medications where sedation is a common side effect (e.g., sedation occurs in more than 10% of individuals). This also includes topical medications with systemic actions (e.g., lidocaine, triamcinolone, sulfadiazine, etc.).
- vi. Clinically relevant is defined as any PRN medication that treats a medical condition on the patient's problem list and/or condition they are being treated for during the visit (i.e., reason for the hospital stay).

Step 3: Complete a Medication Reconciliation Worksheet for each sampled patient (Pharmacist or Certified Pharmacy Technician²³)

- a. Once the Gold Standard Medication History is complete, print out the Medication Reconciliation Worksheet for each sampled patient.
- b. Page 1 needs to be printed out for each sampled patient. Page 2 needs to be printed for each Gold Standard Medication the patient was taking.
- c. Complete the "Gold Standard Medication" column highlighted in yellow for each Gold Standard Medication on the list:

Gold Standard Medication	
Name:	
Dose/Route/ Frequency:	
Drug Class:	
☐ PRN ☐ OTC	
Pt Adherence:	
☐ Completely non-adherent* ☐ Sporadically non-adherent^	☐ Systematically non-adherent** ☐ Adherent
Comments:	
All Sources Used:	
☐ Patient ☐ Pill Bottles ☐ Outpatient EMR ☐ Transfer Records ☐ Pharmacy(s) ☐ Other:	☐ Patient's family/Caregiver ☐ Patient's Own Med List ☐ Outpatient Provider(s) ☐ Past DC Summary ☐ Pharmacy Database

- d. If possible, wait until after the patient has been discharged to complete the next steps.

Step 4: Compare Gold Standard Medication History to Admission Orders (Pharmacist Only)

- a. After the patient has been discharged, obtain the admission and discharge orders for the patient (instructions for comparing the discharge orders are in Step 5 below). Admission orders include all orders written from the time of admission until 8:00 a.m. the following morning or up until 12 hours after the time of admission, whichever comes first.
- b. Compare the admission orders to each Gold Standard Medication on the Medication Reconciliation Worksheet. Note any differences.
 - i. Review the records for the patient to determine if the differences were intentional or unintentional. Use the Identifying Discrepancies Flow Charts to help with this step.

- ii. If the discrepancy was unintentional, then check the box next to “Yes” highlighted in orange. Otherwise, check “No.”

Admission Comparison
Note Differences: (select all that apply) ☐ Dose ☐ Route ☐ Frequency ☐ Substitution ☐ Duplication ☐ Formulation ☐ Duration ☐ Other: ☐ Omission
Reason: ☐ Unintentional (History or Reconciliation Error) ☐ Intentional (Clinical Reason)
Were there any <u>unintentional</u> discrepancies between the gold standard and the admission order? ☐ Yes ☐ No <i>If “yes,” count as 1</i>

- c. Review the admission orders for any medications that were not listed in the Gold Standard Medication History. If any of the additional medications were ordered **unintentionally**, list it on the first page of the Medication Reconciliation Worksheet in the blue-highlighted column. You may need to contact the Provider to determine if the medication was ordered unintentionally or not.

Additional Medications that were Ordered Unintentionally:

Additional Medication:	Unintentionally Ordered on:	Comments:
<u>Name:</u>	☐ Admission (count as 1)	
<u>Dose/Route/Frequency:</u>	☐ Discharge (count as 1)	
	☐ Both (count as 2)	
<u>Name:</u>	☐ Admission (count as 1)	
<u>Dose/Route/Frequency:</u>	☐ Discharge (count as 1)	
	☐ Both (count as 2)	
<u>Name:</u>	☐ Admission (count as 1)	
<u>Dose/Route/Frequency:</u>	☐ Discharge (count as 1)	
	☐ Both (count as 2)	

- d. If the pharmacist identifies an unintentional discrepancy in the admission orders prior to discharge and alerts the physician so that the unintentional discrepancy can be corrected prior to discharge, this should be recorded on the Medication Reconciliation Worksheet as an unintentional discrepancy in the Admission Comparison and Discharge Comparison columns of the worksheet.

Step 5: Compare Gold Standard Medication History to Discharge Orders (Pharmacist Only)

- Obtain the discharge orders for the patient.
- Perform the comparison between the Gold Standard Medications and the discharge orders using the same steps as the admission comparison. Remember to use the Identifying Discrepancies Flow Charts to help with this step.
- Review the discharge orders for any medications that were not listed in the Gold Standard Medication History. If any of the additional medications were ordered **unintentionally**, list them on the first page of the Medication Reconciliation Worksheet in the blue-highlighted column.

- i. If an unintentionally ordered additional medication was only ordered on admission, then check the “Admission” box in the pink-highlighted column.
- ii. If an unintentionally ordered additional medication was only ordered on discharge, then check the “Discharge” box in the pink-highlighted column.
- iii. If the unintentionally ordered additional medication was ordered on both admission and discharge, then check the “Both” box in the pink-highlighted column.

Step 6: Sum the number of medications and discrepancies (Survey Coordinator)

- a. The top of the first page of the Medication Reconciliation Worksheet contains four spaces for you to list the data for the patient.

Total # Unintentional Additional Medications: _____

(Enter into column F in the Med Rec Excel Workbook)

Total # of admission and discharge discrepancies due to Unintentional Additional Meds: _____

(Number of medications that were ordered unintentionally at admission (count as 1), discharge (count as 1), or both admission and discharge (count as 2). Enter into column H in the Med Rec Excel Workbook.

Total Number of Gold Standard Meds: _____

(Enter into column B in the Med Rec Excel Workbook)

Total # of admission and discharge discrepancies in Gold Standard Meds: _____

(For each Gold Standard Med, count the number of ‘yes’ responses to the error question. Minimum number of discrepancies per med is zero. Maximum number of discrepancies per med is 2. Enter into column D in the Med Rec Excel Workbook)

- i. Find the number of unintentionally ordered additional medications from the blue highlighted column on the same page. Enter in the first space, also highlighted in blue.
- ii. Find the number of **discrepancies** due to unintentionally ordered additional medications from the pink highlighted column on the same page.
 1. If a medication was only ordered on admission or only ordered on discharge, then this counts as one discrepancy.
 2. If a medication was ordered on **both** admission and discharge, then this counts as two discrepancies.
 3. Sum the number of discrepancies across all unintentionally ordered additional medications and enter this number in the pink-highlighted space.
- iii. Find the number of Gold Standard Medications and enter this number in the yellow-highlighted space.
- iv. Find the number of discrepancies in the admission and discharge orders for the Gold Standard Medications
 1. Review the Medication Reconciliation Worksheet for each Gold Standard Medication.
 2. Sum the number of times the orange highlighted “Yes” box is checked, indicating an unintentional discrepancy in admission or discharge orders.
 3. Enter this sum into the orange-highlighted space on the first page of the Medication Reconciliation Worksheet.

Step 7: Contact providers if necessary (Pharmacist Only)

If you found any serious discrepancies that could cause the patient harm, you will need to contact the providers. The provider may need to reach out to the patient, PCP, or pharmacies to have the issue corrected.

Step 8: Enter data into Excel Workbook and Online Hospital Survey Tool (Survey Coordinator)

- a. Collect all the Medication Reconciliation Worksheets from the pharmacists. Open the Data Entry Tab of the Medication Reconciliation Excel Workbook.
 - i. Enter the numbers from the top of each Medication Reconciliation Worksheet into the corresponding columns of the Excel Workbook, for the sampled patient, one patient per row.

- ii. As you enter the data, Row 6 (in red) will automatically sum the values entered for each patient. Once you have entered the data for all sampled patients, you will have the final values to enter into the Online Hospital Survey Tool.
- iii. On the right, your hospital's rate of unintentional medication discrepancies per medication will automatically be calculated based on the data entered.

Step 9: Use your hospital's results in quality improvement (Survey Coordinator and Pharmacist)

The developer of this measure has two toolkits available for hospitals that wish to implement a medication reconciliation program:

- [Medication Reconciliation Implementation Toolkit](#) (free)
- [The MARQUIS Collaborative](#) (fee to participate)

See [FAQs](#) for additional information about responding to the questions in this section.

Section 2: Medication Safety Frequently Asked Questions (FAQs)**Computerized Physician Order Entry (CPOE) FAQs**

Information specific to the CPOE Evaluation Tool, including instructions and FAQs, is available on the [Survey and CPOE Materials webpage](#) and the [Prepare for CPOE Tool webpage](#).

1. **What 3-month reporting period should be used when reporting on this section?**
When responding to the questions in Section 2A, hospitals should use the most recent three months prior to submitting the Survey for which they have complete data. For example, if submitting Section 2A in the month of June, the most recent 3-month reporting period for which you have complete data may be February, March, and April or March, April, and May. Hospitals cannot submit data collected for less than three full months.
2. **My hospital transitioned to a new CPOE system, and we have not been on the new system for a full 3 months. How should we respond to the questions in Section 2A-2B?**
When responding to questions #3 and #4 in Section 2A, hospitals can combine inpatient medication data from their old CPOE system with their new CPOE system to have three full months of data. However, hospitals should respond to the questions in Section 2B based on the new CPOE system and take the CPOE Evaluation Tool using the new CPOE system. When taking the CPOE Evaluation Tool, hospitals should select a licensed prescriber that is fully trained on the new system. All hospitals are urged to take a Sample Test before starting the Adult Inpatient Test.
3. **Should we include medications ordered verbally or via paper during system downtime when responding to question #3 (denominator)?**
Yes. Count medication orders entered during system downtime when responding to question #3. Exclude these orders when responding to question #4.
4. **We can't exclude medication orders that originated from an operating room or procedural area from the CPOE report that we are using to respond to questions #3 (denominator) and #4 (numerator). Can we include these medication orders?**
Yes, if you are unable to exclude medication orders for inpatients that were ordered from an operating room or procedural area, you can count these orders when responding to questions #3 and #4.
5. **What are examples of per protocol orders?**
Examples of per protocol orders include vancomycin dosing per protocol and heparin drip per protocol. Per protocol orders refer to orders that the medical staff has approved the use of, based on evidence-based guidance, in advance of its use. Per protocol orders are often identified by the Pharmacy and Therapeutics (P&T) committee and then recommended to the Medical Executive Committee (MEC) for approval. Once approved, per protocol orders are initiated by a licensed prescriber, but then acted on by pharmacy, nursing, radiology, respiratory therapy, etc. Count per protocol orders when responding to questions #3 (denominator) and #4 (numerator).
6. **What are examples of standing orders?**
Examples of standing orders include influenza vaccine, pneumonia vaccine, hepatitis B vaccine, or erythromycin eye ointment. Standing orders are usually rare, limited use situations. Count standing orders when responding to questions #3 (denominator) and #4 (numerator).
7. **My hospital requires readback for all phone orders, but there is no way to document that the readback occurred. How can we include these orders when responding to question #4 (numerator)?**
If your hospital cannot document that verbal readback on phone orders occurred, you should develop a written policy that outlines training and implementation of this practice and perform a

random audit at least annually to ensure the policy is being followed. Maintain documentation of the audit that demonstrates compliance with the policy as Leapfrog performs monthly documentation requests starting with June 30 submissions and continuing until the Survey closes on January 31.

8. When should we take the CPOE Evaluation Tool?

The CPOE Evaluation Tool is a core element of Leapfrog's CPOE Standard. Hospitals are urged to ensure that the Adult Inpatient CPOE Test is submitted along with the Survey (i.e., in the same month) in order to meet the deadlines for the Leapfrog Hospital Survey and Leapfrog's other programs such as Top Hospital and the Leapfrog Hospital Safety Grade.

Hospitals that submit the Survey, but do not submit an Adult Inpatient Test via the CPOE Evaluation Tool, are scored and publicly reported as "Limited Achievement" on the CPOE measure.

Within a Survey Cycle (April 1 – November 30), a hospital cannot retake a CPOE Evaluation Tool until at least 120 days have passed since their last test.

9. Should hospitals take the CPOE Test more than once per Survey Cycle?

Not necessarily. Hospitals have the option of re-taking a test after 120 days, but if there were no changes made to your CPOE system after the first test there is likely no reason to retake the test. Hospitals that switch vendors, perform major upgrades, or make significant changes to their decision support settings and/or formulary (e.g., expanding from a limited formulary to a large formulary) should re-take the test to ensure the results reflect their current system.

10. If we update our responses to questions #3 and #4, do we need to re-take the CPOE Test?

No. Hospitals don't need to retake the CPOE Evaluation Tool after submitting updates to Section 2 via the Online Survey Tool. Retaking a test is only recommended for hospitals that switched vendors, performed major upgrades, or made significant changes to their decision support settings and/or formulary.

EHR Application Information FAQs

11. What is the definition of Artificial Intelligence?

Artificial Intelligence (AI) includes advanced analytics and logic-based techniques, including machine learning, that are used to interpret events, support and automate decisions, and take actions.

Bar Code Medication Administration (BCMA) FAQs

General Questions

12. Why does the Bar Code Medication Administration system have to be connected to an electronic medication administration record (eMAR)?

An eMAR serves as the communication interface that automatically documents the administration of medication into certified Electronic Health Record (EHR) technology. By linking BCMA with the eMAR, information on medication administration is captured in a much timelier manner than a manual documentation process can accomplish.

Units

13. Should a unit that has only been open for part of the 3-month reporting period be included?

No. Only include those units that are currently open and have been opened and staffed for the entire 3-month reporting period. For example, if you open a new unit that has only been open and

staffed for 1-month out of the 3-month reporting period, you will not include that unit when responding to the questions in this section.

14. How should a hospital report if they had BCMA implemented in some units but not all during the reporting period?

To answer “yes” to question #2, your hospital must have a Bar Code Medication Administration (BCMA) system that is linked to the electronic medication administration record (eMAR) when administering medications at the bedside in *at least one* of the following adult and/or pediatric units: general medical, surgical, medical/surgical, neuro, neonatal, or specialty ICU; medical, surgical, or medical/surgical unit (including telemetry units); step-down/progressive unit; labor and delivery unit; or pre-operative unit and/or post-anesthesia care unit. You should only report on units that are currently open and have been in operation for the entire 3-month reporting period selected in question #1. For example, if you have 3 surgical units and are only using BCMA in 1 of the 3 units, you will respond 3 in question #7 and 1 in question #8. You should only include medication administrations that were ordered and scannable in the open and staffed units in which a BCMA system was implemented (as indicated in questions #5, #8, #11, and #14, and #17) when reporting on compliance in questions #18-19.

15. How should hospitals report if they have a combined pre-operative and post-anesthesia care unit (PACU)?

As noted in endnote #22, hospitals must include combined pre-operative and post-anesthesia care units when reporting on questions #15-17. Therefore, hospitals should respond “yes” to question #15 and then report on how many of these units are open and staffed in question #16 and how many of the units utilize the BCMA/eMAR system in question #17. Medication administrations that occurred in these combined pre-operative and post-anesthesia care units must be included when reporting on compliance in question #18-19 provided these units utilize a BCMA system that is linked to the eMAR.

16. Should we include pre-operative and post-anesthesia care units that are located in our surgery centers or free-standing hospital outpatient departments that share our hospital’s license or CMS Certification Number (CCN) when reporting on questions #15-17?

No, for the purposes of reporting on Section 2C: BCMA, only include pre-operative and post-anesthesia care units (adult and/or pediatric) that are located in or co-located³¹ with your hospital.

17. Certain procedural units in our hospital (e.g., endoscopy, interventional radiology, cath lab, etc.) encompass the pre-op area, procedural area, and post-anesthesia care area – meaning the same area is used for all three aspects of care. As such, our data includes medications administered pre-operatively, post-operatively, and administered during the procedures. Should we include or exclude these procedural units?

Please include these units when responding to questions #15-17 regarding pre-op/PACUs. If you can separate out the medications that are being administered pre- and post- from those that are administered during a procedure, exclude medications administered during a procedure when reporting on compliance in questions #18-19. Otherwise, you can count these medication administrations when responding to questions #18-19.

Compliance

18. What is considered a “scannable” medication?

Any medication (see measure specifications) that has a bar code and could be scanned if BCMA were in use would be considered “scannable.” In question #18, hospitals should only include ordered and “scannable” medications from the units where they indicated a BCMA system was implemented.

19. Should we only include inpatient medication administrations when reporting on compliance in questions #18-19?

No, hospitals must include all scannable medication administrations (regardless of the patient's admission status) from the units in questions #5, #8, #11, #14 and #17 that were utilizing a BCMA system linked to the eMAR during the reporting period. This would include scannable medications administered to inpatients, outpatients, observation status patients, etc.

20. Should we exclude medications that were administered in units that are not currently implementing BCMA?

Yes. Question #18 is asking about medication administrations ordered and scannable in those units that are open and staffed and that have implemented a BCMA system. You should include all scannable medications ordered and administered to patients in the open and staffed units (from questions #5, #8, #11, #14 and #17) in which a BCMA system was implemented. Question #18 is used as the denominator to calculate the rate of compliance and should include administrations whether the medication and/or patient was scanned during the administration. Question #19 is used as the numerator and is where you would report the number of medication administrations from these units where the patient and medication were scanned during the administration. We would not expect these two responses to be the same.

21. Should we exclude medications that are given during emergencies when responding to questions #18-19?

No. If the medications are considered "scannable" e.g., any medication that has a bar code and could be scanned if BCMA were in use, they should be included in question #18 (the denominator) but would not be counted in question #19 (the numerator) if the patient and medication were not scanned during administration, even if due to an emergency. Leapfrog's target rate for compliance is 95% to allow for emergency cases such as these.

22. Should we exclude medications that are given during a system downtime when responding to questions #18-19?

No. Medications administered during a system downtime should be included in question #18 (the denominator) but would not be counted in questions #19 (the numerator) if the patient and medication were not scanned during administration because the hospital's BCMA system was down.

23. Our vendor report provides medication and patient scanning rates separately. How can we report on our compliance if our reports do not provide the number of administrations that had both the medication and patient scanned?

If your vendor's report only provides the percentage of patients scanned and the percentage of medications scanned separately but does not provide the rate of administrations where both the patient and medication were scanned, please report the lower of the two rates (supply the denominator in question #18 and numerator in question #19), as that would be the maximum possible rate of having both scanned.

Moving forward, we do ask that your hospital work with your vendor to report out the rate of administrations where both the patient and medication are scanned. It is only when both are scanned that safe medication administration can be ensured.

24. Is manual scanning (e.g., in lieu of scanning the patient's wristband, typing in the patient's number) something we can count in our BCMA scans?

No. The problem is that the user may type in the wrong patient number, negating the safety benefits. The best practice is to scan the wristband that is on the wrist of the patient.

25. Our process is to scan the patient once and then scan each medication. Question #19 seems to want each medication and patient scanned with each medication. Can you clarify?

Hospitals should report on the number of administrations where both the patient and the medication were scanned during the administration. During administrations where multiple

medications are administered sequentially, the patient should be scanned first, but does not need to be rescanned before each medication is administered.

- 26. In our hospital some medications are ordered and scheduled, but not administered. Should medications that are ordered and scheduled, but not administered be included when responding to questions #18-19?**

No, medications that are not administered should not be included in questions #18-19.

Decision Support

- 27. If an alert is part of the eMAR, but not the Bar Code Medication Administration system, should we respond “yes” to the decision support elements in question #20a - e?**

If the provider and pharmacist are notified or alerted (e.g., second nurse check), but the nurse or provider administering the medication does not receive an alert at the point of administration, then your hospital should answer “no” to these questions about decision support.

- 28. My hospital’s EHR workflow for medication administration is designed in such a way that our system will never generate a “wrong patient” alert. How should we answer the question in the Survey about whether we have that type of decision support?**

If your hospital’s EHR workflow is designed so that the nurse scans the patient first, and then the medications, such that the nurse would never receive a “wrong patient” alert, for purposes of the Survey, your hospital should indicate that it has ‘wrong patient’ decision support. The goal of including a “wrong patient” alert is to acknowledge that as a safe practice and to drive organizations to validate the “right patient” in the medication administration process. The workflow described helps ensure that a ‘wrong patient’ is not encountered.

- 29. Is the “second nurse check needed” decision support element required for all medications or just certain medication classes in order to answer “yes” to question #17e?**

No. An alert for “second nurse check needed” is only required for certain medications and it is up to each hospital to decide which medication classes require this alert during administration.

Workarounds

- 30. Must a hospital establish a separate committee to meet solely to review data reports on BCMA system use?**

While establishing a committee that has the sole purpose of reviewing data reports on BCMA system use is encouraged, it is not required. At a minimum, a pre-existing standing committee that meets on a regular basis could be given the responsibility of reviewing these reports. The committee chosen to review the reports must include individuals whose roles reflect each part of the BCMA process (e.g., pharmacists, nurses, IT personnel, etc.).

- 31. What are some examples of “back-up equipment” for hardware failures?**

Examples of “back-up equipment” include extra BCMA scanners, portable computers, batteries, and mice that are easily accessible to nurses experiencing equipment malfunctions. Quickly replacing malfunctioning equipment is essential to prevent workarounds.

- 32. What are some examples of “engaging nursing leadership at the unit level on BCMA use?”**

Engaging nursing leadership on BCMA use should be an active, ongoing process. An engaged leader would actively use BCMA data to coach staff towards safe or desired behaviors. Examples of activities in which nursing leadership could be engaged include, but are not limited to:

- Education sessions in units
- Review of policies regarding use and non-use of BCMA
- Investigating problems with BCMA specific to the unit
- Providing a forum for users to report BCMA problems and reasons for workarounds
- Providing suggestions for improvements to both technology and process

33. How often should hospitals conduct real-time observations and what do 'best practices' look like?

At a minimum, the observations should be conducted on each unit at least biannually (2x/year) and should be 30 minutes or 30 medication administrations in length, whichever is shorter. If a central team does observations, they should ensure each type of unit is observed within that 6-month period. More frequent observations are appropriate for hospitals that have recently introduced BCMA and/or when safety reports indicate a problem, where observations can be helpful in understanding the root cause of an incident or near miss.

The observations should be direct nurse-BCMA observations, watching how the nurse uses the BCMA system as part of the bedside medication administration process. The observer should note if nurses are using any workarounds to compensate for system issues. In addition to observing the nurse-BCMA interaction, the observer should also have conversations with the nurses, as their comments are often a good source for understanding the causes of workarounds. The observations collected from the different units should be aggregated together to understand trends across the hospital and where the hospital should place a priority for addressing BCMA system issues.

34. If our hospital meets the 95% compliance target, do we still need to implement or monitor a quality improvement project for question #21f?

Yes, the hospital should still implement or monitor a quality improvement project to ensure that they can continue to improve and maintain high compliance and the project should focus on those units included in the standard. For example, perhaps through reviewing compliance you have recognized that one or more units is lower performing, so you develop a project (training, observing, etc.) to improve. Another example is improving the timeliness of Help Desk responses for equipment failures etc.

35. What are some appropriate mechanisms for communicating back to end users for question #21h?

Appropriate mechanisms for communicating back to end users would include staff meetings, safety briefings or unit huddles, or sharing in a Nursing Informatics eNewsletter, through a Medication Safety Team, or Quality Committee newsletter/flyer.

Medication Reconciliation FAQs**Sampling****36. Are we required to use Leapfrog's random sampling methodology?**

No. You may use a different sampling methodology from the methodology provided in the Medication Reconciliation Workbook. However, you should be sure to sample from different days of the week, including weekends.

37. If the first few patients included in the sample have zero gold standard medications, should we sample more than 30 patients?

Yes, hospitals can sample more than 30 patients to ensure their rate of unintentional discrepancies per medication is scored and publicly reported. While 30 is the minimum sample size, hospitals are welcome to sample more than this.

Gold Standard Medication History**38. A pharmacist, pharmacy resident, or certified pharmacy technician creates the pre-admission Medical List as part of normal care. Can this be used as the Gold Standard Medication List?**

No, a different trained pharmacist, pharmacy resident, or certified pharmacy technician²³ should collect the Gold Standard Medication List when collecting data for this measure.

39. Does the same pharmacist, pharmacy resident, or certified pharmacy technician who obtains the Gold Standard Medication List also need to perform the review to identify unintentional medication discrepancies?

No, different pharmacists or pharmacy residents can play different roles in the data collection process. Only pharmacists and pharmacy residents can compare the Gold Standard Medication List to admission and discharge orders to identify unintentional medication discrepancies.

40. We have two differing records of what dose the patient was taking prior to admission, one from the patient and one from the outpatient pharmacy. What do we record as the correct dose for the Gold Standard Medication?

In cases where the medication history obtained from interviewing the patient does not match other written records, the pharmacist will need to go back to the patient with the pharmacy records in hand and figure out the source of the discrepancy (e.g., the patient systematically takes it differently than prescribed vs. the patient was just mistaken about the strength of the pill, etc.). If the discrepancy can't be resolved, then another source will be needed (e.g., caregiver, PCP).

Admission and Discharge Orders**41. Are there any types of admission orders that can or should be excluded?**

Yes, (a) Medication orders that are clearly related to the chief complaint (e.g., levofloxacin for pneumonia when pneumonia is the admitting diagnosis), (b) Medication orders that are clearly documented (e.g., Lovenox for DVT prophylaxis), and (c) Standard PRN orders at your hospital (e.g., Tylenol PM if that is in the standard order set at your hospital).

42. Should admission orders that are discontinued prior to discharge be included?

Yes. Some of these orders may end up being counted in question #7 (additional medications that were unintentionally ordered).

Identifying Discrepancies**43. If a dose and a route discrepancy are found for the same medication, does it count as one or two in the number of unintentional discrepancies?**

The number of unintentional discrepancies is a count of medication orders where an unintentional discrepancy occurred. A medication order may have several errors associated with it (e.g., dose, route, timing, etc.). You should not count the number of errors associated with the same medication order. However, discrepancies in admission orders and discharge orders are counted separately. For example, if a medication on the Gold Standard Medication List is ordered for a patient on admission with the incorrect dose, this counts as one discrepancy. If this medication is ordered on discharge with the same incorrect dose, this would count as a second discrepancy. But a medication with a dose and frequency discrepancy in admission orders counts as one discrepancy.

44. Do all the additional medications that were ordered unintentionally in question #7 count as unintentional discrepancies in #8?

Yes. If a medication is unintentionally ordered at admission, then this counts as one discrepancy. If the same medication is unintentionally ordered at discharge, then this counts as a second discrepancy. If an unintentionally ordered medication in question #7 was ordered on both admission and discharge, then this would count as **two** discrepancies in question #8 (but counts as one medication in question #7).

45. If there is no documentation of systematic or sporadic nonadherence, why does the pharmacist have to count unintentional discrepancies on admission and discharge?

Systematically non-adherent means the patient consistently takes the medication differently than prescribed. Lack of appropriate documentation of systematic non-adherence can lead to an adverse drug event. For example, if a patient is prescribed hydralazine 25mg three times a day, but always takes 25mg two times a day this must be documented in the clinical record so the care team can decide how to order the medication on admission and discharge (i.e., recorded on the Med Rec Worksheet as an intentional discrepancy). If the systematic non-adherence is not

documented and the care team is unaware of how the patient has been taking the medication, they could order and administer it as prescribed and cause, in this example, hypotension in the patient.

Sporadically non-adherent means that the patient takes the medication as prescribed but, on average, misses two or more doses per week. Lack of appropriate documentation of sporadic non-adherence can lead to an adverse drug event. For example, if a patient is prescribed four antihypertensives, but misses two or more doses per week, this must be documented in the clinical record so the care team can decide how to order the medication on admission and discharge (i.e., recorded on the Med Rec Worksheet as an intentional discrepancy). If the sporadic non-adherence is not documented and the care team is unaware of how the patient has been taking the medication, they could order and administer it as prescribed and cause, in this example, hypotension in the patient.

46. A patient had two medications that were not on our hospital's formulary. They were not substituted. Do these two medications count as errors of omission?

Yes. If a Gold Standard Medication was not ordered or appropriately substituted on admission and discharge, it would count as two unintentional medication discrepancies for each medication that was omitted.

Scoring

47. What questions are used to calculate the numerator and denominator that results in the rate of unintentional medication discrepancies per medication?

The rate of unintentional medication discrepancies per medication is calculated using the following formula:

$$\frac{(\text{Question \#6} + \text{Question \#8})}{(\text{Question \#5} + \text{Question \#7})} = \text{Rate of unintentional medication discrepancies per medication}$$

This rate is calculated for you in the Med Rec Workbook provided on the [Survey Materials webpage](#). This information is also available in the [Scoring Algorithms](#).

Page Intentionally Left Blank

SECTION 3: ADULT AND PEDIATRIC COMPLEX SURGERY

This section includes questions and reference information for Section 3: Adult and Pediatric Complex Surgery. Please carefully review the questions, endnotes, and reference information (e.g., measure specifications, notes, and frequently asked questions) before you begin. Failure to review the reference information could result in inaccurate responses.

Section 3: Adult and Pediatric Complex Surgery

Adult and Pediatric Complex Surgery Fact Sheet and Bibliography:

<https://ratings.leapfroggroup.org/measure/hospital/2025/complex-adult-and-pediatric-surgery>

Section 3 is applicable to all hospitals. Hospitals that do not perform the high-risk procedures included in Section 3A should select “None of the above” in question #2 and move on to the Affirmation of Accuracy. Your hospital’s results will be displayed as “Does Not Apply” on Leapfrog’s public reporting website. Pediatric hospitals should only report on the Norwood procedure, if applicable.

Section 3 includes questions about your hospital’s volume and process for privileging surgeons for eleven high-risk procedures, outcomes for mitral valve repair and replacement, and participation in The Society of Thoracic Surgeons’ Congenital Heart Surgery Database for hospitals that perform the Norwood procedure. This section also includes questions about the implementation of a safe surgery checklist.

Each hospital achieving the standard for each of the nine applicable high-risk procedures:

1. Meets the minimum hospital volume standard for the procedure, **and**
2. Has a process for privileging surgeons that includes the surgeon meeting or exceeding the minimum annual surgeon volume standard for the procedure.

Each hospital achieving the standard for mitral valve repair and replacement procedures:

1. Meets the minimum hospital volume standard for the procedure, **and**
2. Has a process for privileging surgeons that includes meeting or exceeding the minimum annual surgeon volume standard for the procedure, **and**
3. Participates in the Society of Thoracic Surgeons (STS) Adult Cardiac Surgery Database (ACSD), **and**
4. Has an STS Mitral Valve Repair/Replacement Composite Score of 3 Stars.

Each hospital achieving the standard for Norwood procedures:

1. Meets the minimum hospital volume standard for the procedure, **and**
2. Has a process for privileging surgeons that includes meeting or exceeding the minimum annual surgeon volume standard for the procedure, **and**
3. Participates in the Society of Thoracic Surgeons (STS) Congenital Heart Surgery Database (CHSD).

Each hospital achieving the standard for the safe surgery checklist:

1. Uses a safe surgery checklist on **all** patients undergoing an applicable procedure (reported on in Section 3A, if applicable) that includes **all** safe surgery checklist elements; **and**
2. Verbalizes **all** safe surgery checklist elements in the presence of the appropriate personnel; **and**
3. Completes an audit on a sufficient sample of patients to document adherence to the checklist; **and**
4. Has documented adherence to the checklist for at least 90% of the patients included in the audit.

Download the 2025 Leapfrog Hospital Survey Scoring Algorithm on the Scoring and Results webpage.

3A: Hospital and Surgeon Volume

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Notes:

Note 1: This subsection is applicable to all hospitals. Hospitals that do not perform the procedures included in this subsection should select "None of the above" in question #2 and move on to the Affirmation of Accuracy. Your hospital's results will be displayed as "Does Not Apply" on Leapfrog's public reporting website.

Note 2: Pediatric hospitals should only respond to questions regarding the Norwood procedure, if applicable. If the Norwood procedure is not applicable, select "None of the above" in question #2 and move on to the Affirmation of Accuracy. Your hospital's results will be displayed as "Does Not Apply" on Leapfrog's public reporting website.

Specifications: See [Hospital and Surgeon Volume Measure Specifications](#) in the Reference Information beginning on page 101.

Reporting Period: 12 months or optionally 24 months (annual average)

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024 (12-month count) or 01/01/2023 – 12/31/2024 (24-month annual average)
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025 (12-month count) or 07/01/2023 – 06/30/2025 (24-month annual average)

Note: As a reminder, the [Corrections Period](#) (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

1) 12-month or 24-month reporting period used:	○ 01/01/2024 – 12/31/2024 (12-month count) ○ 01/01/2023 – 12/31/2024 (24-month annual average) ○ 07/01/2024 – 06/30/2025 (12-month count) ○ 07/01/2023 – 06/30/2025 (24-month annual average)
2) Check all procedures that your hospital performs as defined in the Adult and Pediatric Complex Surgery Reference Information. <i>Select all that apply.</i> <i>Do not check the box for a procedure if your hospital ONLY performs the procedure on an emergency basis or when a patient is too unstable for safe transfer.</i> <i>If "none of the above," skip the remaining questions in Section 3 and go to the Affirmation of Accuracy. The hospital will be scored as "Does Not Apply."</i>	☐ Carotid endarterectomy ☐ Mitral valve repair and replacement ☐ Open aortic procedures ☐ Lung resection for cancer ☐ Esophageal resection for cancer ☐ Pancreatic resection for cancer ☐ Rectal cancer surgery ☐ Bariatric surgery for weight loss ☐ Total knee replacement ☐ Total hip replacement ☐ Norwood procedure ☐ None of the above

Respond to questions #3-11 based on the procedures selected in question #2.

3) Total **hospital** volume for each selected procedure during the reporting period:

Volume should represent a 12-month count or 24-month annual average consistent with the reporting period selected in question #1.

<i>Procedure</i>	<i>Hospital Volume Standard</i>	<i>Total Hospital Volume (12-month count or 24-month annual average)</i>
Carotid endarterectomy	20	
Mitral valve repair and replacement	40	
Open aortic procedures	10	
Lung resection for cancer	40	
Esophageal resection for cancer	20	
Pancreatic resection for cancer	20	
Rectal cancer surgery	16	
Bariatric surgery for weight loss	50	
Total knee replacement	50	
Total hip replacement	50	
Norwood procedure	8	

4) Does the total hospital volume for total knee replacement, total hip replacement, and/or bariatric surgery for weight loss reported on in question #3 above include procedures performed on an inpatient basis, outpatient basis, or both?

Total knee replacement	☐ Inpatient ☐ Outpatient ☐ Both (inpatient and outpatient)
Total hip replacement	☐ Inpatient ☐ Outpatient ☐ Both (inpatient and outpatient)
Bariatric surgery for weight loss	☐ Inpatient ☐ Outpatient ☐ Both (inpatient and outpatient)

5) Does your hospital's privileging process include the surgeon meeting or exceeding the minimum annual surgeon volume standard listed below?

<i>Procedure</i>	<i>Annual Surgeon Volume Standard</i>	
Carotid endarterectomy	10	☐ Yes ☐ No
Mitral valve repair and replacement	20	☐ Yes ☐ No
Open aortic procedures	7	☐ Yes ☐ No
Lung resection for cancer	15	☐ Yes ☐ No
Esophageal resection for cancer	7	☐ Yes ☐ No
Pancreatic resection for cancer	10	☐ Yes ☐ No

Rectal cancer surgery	6	☐ Yes ☐ No
Bariatric surgery for weight loss	20	☐ Yes ☐ No
Total knee replacement	25	☐ Yes ☐ No
Total hip replacement	25	☐ Yes ☐ No
Norwood procedure	5	☐ Yes ☐ No

If your hospital performs mitral valve repair and replacement (selected the checkbox in question #2), continue to question #6. Otherwise, skip questions #6-9 and continue to question #10.

Reporting Period: Base your responses on the latest **36-month** report received from the Society of Thoracic Surgeons (STS) Adult Cardiac Surgery Database (ACSD) for the **Mitral Valve Repair/Replacement Composite Score**.

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

6) Does your hospital participate in the <u>Society of Thoracic Surgeons (STS) Adult Cardiac Surgery Database (ACSD)</u> and submit data for all applicable procedures during the most recent 36-month period for which performance reports are available? <i>If "no" to question #6, skip questions #7-9 and continue to question #10.</i>	☐ Yes ☐ No
7) What is the most recent 36-month reporting period for which STS performance reports are available? Reporting period ending:	_____ <i>Format: Month/Year</i>
8) Does your hospital have a Mitral Valve Repair/Replacement Composite Score publicly reported on the STS website and do you choose to report data from the most recent performance report to this Survey? <i>If "no" or "yes, but did not meet the STS Data Completeness Requirement" during the reporting period, skip question #9 and continue to question #10.</i>	☐ Yes ☐ No ☐ Yes, but did not meet the STS Data Completeness Requirement during the reporting period
9) What is your hospital's Mitral Valve Repair/Replacement Composite Score?	☐ 1 star – lower-than-expected performance ☐ 2 stars – as-expected performance ☐ 3 stars – higher-than-expected performance

If your hospital performs the Norwood procedure (selected the checkbox in question #2), continue to question #10. Otherwise, skip questions #10-11 and continue to the next subsection.

10) Does your hospital participate in the <u>Society of Thoracic Surgeons (STS) Congenital Heart Surgery Database (CHSD)</u> and did your hospital submit data for the Norwood procedure during the most recent 48-month period for which performance reports are available? <i>If “no” to question #10, skip question #11 and continue to the next subsection.</i>	☐ Yes ☐ No
11) What is the most recent 48-month reporting period for which STS performance reports are available? Reporting period ending:	<i>Format: Month/Year</i>

3B: Safe Surgery Checklist for Adult and Pediatric Complex Surgery

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Notes:

Note 1: The elements required for each stage of the safe surgery checklist are adapted from the [WHO Surgical Safety Checklist](#) and the [AHRQ Endoscopy Checklist](#).

Note 2: Question #7 will not be used in scoring or public reporting.

Note 3: Hyperlinks throughout this subsection refer to the [Safe Surgery Checklist for Adult and Pediatric Complex Surgery FAQs](#) beginning on page 143, not to endnotes. These hyperlinks are not included in the Online Survey Tool.

Specifications: See [Safe Surgery Checklist for Adult and Pediatric Complex Surgery Measure Specifications](#) in the Reference Information beginning on page 141.

Reporting Period: 12 months

Answer questions #1-9 for the latest 12-month period prior to submission of this section of the Survey.

Note: As a reminder, the [Corrections Period](#) (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

Sufficient Sample: See [Safe Surgery Checklist for Adult and Pediatric Complex Surgery Measure Specifications](#) for instructions on identifying a sufficient sample for questions #6-9.

1) What is the latest 12-month reporting period for which your hospital is submitting responses to questions #2-9? 12-month reporting period ending:	<i>Format: Month/Year</i>
2) Does your hospital utilize a safe surgery checklist on <u>every</u> patient <u>every</u> time one of the applicable procedures in Section 3A is performed? <i>If "no" to question #2, skip the remaining questions in Section 3B and go to the Affirmation of Accuracy. The hospital will be scored as "Limited Achievement."</i>	☐ Yes ☐ No
3) Before the induction of anesthesia , is a safe surgery checklist that includes <u>all</u> the following elements <u>read aloud</u> in the presence of the <u>anesthesia professional and nursing personnel</u> : • Patient ID; • Confirmation of procedure; • Patient consent; • Site marked, if applicable; • Anesthesia/medication check; • Allergies assessed; • Difficult airway/aspiration risk; • Risk of blood loss (only applicable if risk of blood loss is >500ml for adults or >7ml/kg for children); and • Availability of devices (applicable to endoscopy procedures only)?	☐ Yes ☐ No

4) Before the skin incision and/or before the procedure begins, is a safe surgery checklist that includes <u>all</u> the following elements <u>read aloud</u> in the presence of the <u>whole surgical team</u>: • <u>Clinical team introduction</u>; • Confirmation of patient name, procedure, and, if applicable, surgical/incision site; • Antibiotic prophylaxis, if applicable; • Anticipated Critical Events (i.e., non-routine steps, length of procedure, blood loss, patient-specific concerns, sterility); • Equipment check/concerns; and • Essential imaging available, if applicable?	○ Yes ○ No
5) Before the patient leaves the operating room and/or procedure room, is a safe surgery checklist that includes <u>all</u> the following elements <u>read aloud</u> in the presence of the <u>whole surgical team</u>: • Confirmation of procedure performed; • Instrument/supply counts; • Specimen labeling, if applicable; • Equipment concerns; and • Patient recovery/management concerns?	○ Yes ○ No

If “no” to question #3, #4, or #5, skip the remaining questions in Section 3B and go to the Affirmation of Accuracy. The hospital will be scored as “Limited Achievement.”

Hospitals performing the audit in Section 3B question #6 and the audit in Section 9D question #6 should audit 15 cases who underwent a procedure included in Section 3A and 15 cases who underwent a procedure included in Section 9C. Hospitals only performing the audit in Section 3B question #6 and not in Section 9D question #6 should audit 30 cases who underwent a procedure included in Section 3A.

6) Did your hospital perform an audit (either in-person or via the medical record or other EHR data) on a sufficient sample of patients who underwent a procedure included in Section 3A and measure adherence to the safe surgery checklist? <i>Free-standing pediatric hospitals that perform the Norwood Procedure and hospitals that reported a combined total hospital volume of less than the sufficient sample for all the procedures in Section 3A can sample any patients that had a procedure performed under general anesthesia.</i> <i>If “no” to question #6, skip the remaining questions in Section 3B and go to the Affirmation of Accuracy. The hospital will be scored as “Limited Achievement.”</i> <i>If “no, performed fewer than 30 total inpatient procedures under general anesthesia” to question #6, skip the remaining questions in Section 3B and go to the Affirmation of Accuracy. The hospital will be scored as “Unable to Calculate Score.”</i>	○ Yes ○ No ○ No, performed fewer than 30 total inpatient procedures under general anesthesia
7) How many cases were included in the audit from question #6?	_____ <i>Max value 100</i>

8) Which method was used to perform the audit on a sufficient sample in question #6?	○ In-person observational audit ○ Retrospective audit of medical records or EHR data ○ Both
9) Based on your hospital's audit (either in-person or via the medical record or other EHR data) on a sufficient sample of patients who underwent a procedure included in Section 3A, what was your hospital's documented rate of adherence to the safe surgery checklist (i.e., what percentage of the sampled cases had all elements in questions #3, #4, and #5 completed)?	○ 90%-100% ○ 75%-89% ○ 50%-74% ○ Less than 50%

Affirmation of Accuracy

As the hospital CEO or as an employee of the hospital to whom the hospital CEO has delegated responsibility, I have reviewed this information pertaining to the Adult and Pediatric Complex Surgery Section at our hospital, and I hereby certify that this information is true, accurate, and reflects the current, normal operating circumstances at our hospital. I am authorized to make this certification on behalf of our hospital.

The hospital and I understand that The Leapfrog Group, its members, the public and entities and persons who contract or have other business dealings with The Leapfrog Group are relying on the truth and accuracy of this information. The hospital and I also understand that The Leapfrog Group will make this information and/or analyses of this information public through the Survey Results public reporting website, The Leapfrog Group's Hospital Safety Grade, and/or other Leapfrog Group products and services. This information and/or analyses and all intellectual property rights therein shall be and remain the sole and exclusive property of The Leapfrog Group in which The Leapfrog Group retains exclusive ownership. This information does not infringe upon any third-party intellectual property rights or any other third-party rights whatsoever and is free and clear of all encumbrances and liens of any kind. The hospital and I acknowledge that The Leapfrog Group may use this information in a commercial manner for profit. The hospital shall be liable for and shall hold harmless and indemnify The Leapfrog Group from any and all damages, demands, costs, or causes of action resulting from any inaccuracies in the information or any misrepresentations in this Affirmation of Accuracy. The Leapfrog Group and its members and entities and persons who contract or have other business dealings with The Leapfrog Group reserve the right to omit or disclaim information that is not current, accurate or truthful.

Section 3: Adult and Pediatric Complex Surgery Reference Information

What's New in the 2025 Survey

Section 3A: Hospital and Surgeon Volume

For mitral valve repair and replacement, Leapfrog is updating the questions and measure specifications to clarify that hospitals can only report on their Mitral Valve Repair/Replacement Composite Score if the score is publicly reported on the STS website at <https://publicreporting.sts.org/search/acsd>. For Bariatric Surgery for Weight Loss, Leapfrog is making two updates:

- First, we are removing three procedure codes from the list of CPT codes used to count same-day bariatric procedures as they do not meet the criteria for inclusion in our volume standards since they are used for the placement of gastric banding rather than bypass of the stomach.
- Second, we are adding several ICD-10-CM procedure codes that bring greater alignment with the Centers for Medicare and Medicaid's payment policies for bariatric surgery. These additional codes expand on the current procedure code list, with a continued focus on the bypass of the stomach but reflect additional tissue types and approach types. The additions can be reviewed in the Section 3A: Hospital and Surgeon Volume Measure Specifications.

Section 3B: Safe Surgery Checklist for Adult and Pediatric Complex Surgery

To address hospital feedback, Leapfrog will add a new response option to question #6 (which asks if the hospital performed an audit on patients who underwent a procedure included in Section 3A), for hospitals that perform fewer than 30 inpatient procedures under general anesthesia. Hospitals selecting this response option will be scored and publicly reported as "Unable to Calculate Score."

Change Summary Since Release

May 1, 2025 – Added four ICD-10 Morbid Obesity Diagnosis Codes for Bariatric Surgery for Weight Loss for Adult and Pediatric Complex Surgery. Hospitals are not required to make updates to data already collected and/or reported but have the option to include the additional codes if they wish.

The additional codes were added to the Complex Surgery ICD 10 Codes Workbook (available on the Survey Materials [webpage](#)) and CPT Code workbook (available on the [Survey Dashboard](#)). Please review the updated codes on page 131 of the Survey.

Section 3: Adult and Pediatric Complex Surgery Measure Specifications

Hospital and Surgeon Volume Measure Specifications

Important Notes:

Note 1: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Note 2: For each of the eleven high-risk procedures included in Section 3A: Hospital and Surgeon Volume, Leapfrog has provided a set of ICD-10 procedure codes, and in some cases an additional set of CPT codes (for Total Hip Replacement, Total Knee Replacement, and Bariatric Surgery for Weight Loss) or ICD-10 diagnosis codes, for counting **patient discharges**. Please carefully review the measure specifications for each individual procedure to ensure you have the complete list of codes needed. ICD-10 codes are provided below and are also available in an Excel document on the [Survey Materials webpage](#). See Note 3 below for instructions on downloading CPT codes.

Note 3: CPT Codes are provided in downloadable Excel files on the Survey Dashboard. To access the files, click the CPT Code Workbook button next to Section 9. You will be required to complete the American Medical Association's Terms of Use before downloading the Excel file and using the individual CPT codes to query your EHR or billing system. You are only required to complete the Terms of Use once per Survey Cycle (April 1 – November 30).

The CPT Code Workbooks (Excel files) are labeled for Section 3A: Total Hip Replacement, Total Knee Replacement, and Bariatric Surgery for Weight Loss and Section 9C: Volume of Procedures. Please note, if you are part of a hospital system, each hospital will need to complete the Terms of Use. This is a requirement of the American Medical Association.

Source: The Leapfrog Group, American Medical Association

Reporting Period: 12 months or *optionally* 24 months (annual average)

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024 (12-month count) or 01/01/2023 – 12/31/2024 (24-month annual average)
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025 (12-month count) or 07/01/2023 – 06/30/2025 (24-month annual average)

Question #2: Check all procedures that your hospital performs as defined in the Adult and Pediatric Complex Surgery Reference Information (listed below):

- Carotid endarterectomy
- Mitral valve repair and replacement
- Open aortic procedures
- Lung resection for cancer
- Esophageal resection for cancer
- Pancreatic resection for cancer
- Rectal cancer surgery
- Bariatric surgery for weight loss
- Total knee replacement
- Total hip replacement
- Norwood procedure

Free-standing pediatric hospitals should only report on the Norwood procedure, if applicable.

Do not check the box for the procedure if:

- Your hospital does not perform the procedure or **ONLY** performs the procedure on an emergency basis or when a patient is too unstable for safe transfer.

- Your hospital has started to perform the procedure in the last 18 months. Leapfrog gives hospitals an 18-month grace period before having to report on hospital volume and process for privileging surgeons for new service lines.

Do check the box for the procedure if:

- Your hospital would perform the procedure but had zero cases during the reporting period. Select the procedure and indicate a hospital volume of zero in question #3. Please note that hospitals can elect to report on a 24-month annual average.
- Your hospital has reached the end of the 18-month grace period for a new service line. You will now have to report on both hospital volume and your process for privileging surgeons for this procedure.

Question #3: Total **hospital volume** for each selected procedure (from question #2) during the reporting period:

- Carotid endarterectomy (Hospital Volume Standard: 20)
- Mitral valve repair and replacement (Hospital Volume Standard: 40)
- Open aortic procedures (Hospital Volume Standard: 10)
- Lung resection for cancer (Hospital Volume Standard: 40)
- Esophageal resection for cancer (Hospital Volume Standard: 20)
- Pancreatic resection for cancer (Hospital Volume Standard: 20)
- Rectal cancer surgery (Hospital Volume Standard: 16)
- Bariatric surgery for weight loss (Hospital Volume Standard: 50)
- Total knee replacement (Hospital Volume Standard: 50)
- Total hip replacement (Hospital Volume Standard: 50)
- Norwood procedure (Hospital Volume Standard: 8)

When calculating total **hospital volume** count the number of **patients** discharged from your hospital within the reporting period with any one or more of the ICD-10 codes or CPT codes (for Total Hip Replacement, Total Knee Replacement, and Bariatric Surgery for Weight Loss) specified for each procedure, subject to the inclusion criteria below:

- Only the ICD-10 procedure, CPT, and diagnosis codes provided by Leapfrog should be used to report on the questions in Section 3A: Hospital and Surgeon Volume. ICD-10 codes are provided below and are also available in an Excel document on the [Survey Materials webpage](#). See Note 3 above for instructions on downloading CPT codes.
- For procedures that include TWO sets of codes (one set of procedure codes and one set of diagnosis codes), both sets of codes must be used for counting patient discharges (e.g., at least one procedure code AND one diagnosis code must be present).
- Except for bariatric surgery for weight loss (where the ICD-10 diagnosis code must be the primary diagnosis) and total knee replacement and total hip replacement (where the procedure code must be the primary procedure), ICD-10 codes for the other procedures can appear in ANY procedure field and ANY diagnosis field.
- Age restrictions apply – For the Norwood procedure only include discharges for pediatric patients (ages 17 years and younger). For the remaining ten procedures, only include discharges for adult patients (ages 18 years and older).

Question #4: Does the total hospital volume for total knee replacement, total hip replacement, and/or bariatric surgery for weight loss reported on in question #3 above include procedures performed on an inpatient basis, outpatient basis, or both?

- If your hospital only performs total knee replacement, total hip replacement, and/or bariatric surgery for weight loss on an inpatient basis, select inpatient.
- If your hospital only performs total knee replacement, total hip replacement, and/or bariatric surgery for weight loss on an outpatient basis, select outpatient.
- If your hospital performs total knee replacement, total hip replacement, and/or bariatric surgery for weight loss on both an inpatient and outpatient basis, select both (inpatient and outpatient).

Question #5: Does your hospital's privileging process include the surgeon meeting or exceeding the minimum annual surgeon volume standard listed below?

- Carotid endarterectomy: 10
- Mitral valve repair and replacement: 20
- Open aortic procedures: 7
- Lung resection for cancer: 15
- Esophageal resection for cancer: 7
- Pancreatic resection for cancer: 10
- Rectal cancer surgery: 6
- Bariatric surgery for weight loss: 20
- Total knee replacement: 25
- Total hip replacement: 25
- Norwood procedure: 5

When determining whether surgeons have met or exceeded Leapfrog's minimum annual surgeon volume standards for the purposes of privileging, only refer to the ICD-10 procedure codes and CPT codes (for Total Hip Replacement, Total Knee Replacement, and Bariatric Surgery for Weight Loss) – **diagnosis** codes can be ignored.

Source: The Society of Thoracic Surgeons (STS)

Reporting Period: Latest **36-month** report from Society of Thoracic Surgeons (STS) Adult Cardiac Surgery Database (ACSD) for the **Mitral Valve Repair/Replacement Composite Score**.

Question #6: Does your hospital participate in the Society of Thoracic Surgeons (STS) Adult Cardiac Surgery Database (ACSD), submit data for all applicable procedures during the most recent 36-month period for which performance reports are available?

Select "yes" if your hospital participates in the Society of Thoracic Surgeons (STS) Adult Cardiac Surgery Database (ACSD) and has submitted data for all applicable procedures during the most recent 36-month period.

Question #7: What is the most recent 36-month reporting period for which STS performance reports are available? Reporting period ending:

Select the most recent 36-month reporting period for which STS performance reports are available. The reporting period is displayed when reviewing your "MVRR Composite Quality Ratings" at <https://publicreporting.sts.org/search/acsd>. See screenshot provided for question #9 below.

Question #8: Does your hospital have a Mitral Valve Repair/Replacement Composite Score publicly reported on the STS website and do you choose to report data from the most recent performance report to this Survey?

Select "yes" if your hospital elects to share the MVRR data from your most recent performance report with Leapfrog.

Question #9: What is your hospital's Mitral Valve Repair/Replacement Composite Score?

Report your Mitral Valve Repair/Replacement Overall Composite Score from the STS Public Reporting website: <https://publicreporting.sts.org/search/acsd>.

Click on "Search All Groups." Then search for your hospital name/surgery group name in the "Participant Surgery Group Name" field and click your hospital name/surgery group name. On the next page find your "MVRR Composite Quality Rating" and your "Overall Composite Score." Report the number of stars displayed for "Overall Composite Score" represented in the screenshot below.

Source: The Society of Thoracic Surgeons (STS)

Question #10: Does your hospital participate in the Society of Thoracic Surgeons (STS) Congenital Heart Surgery Database (CHSD) and did your hospital submit data for the Norwood procedure during the most recent 48-month period for which performance reports are available?

Select "yes" if your hospital participates in the Society of Thoracic Surgeons (STS) Congenital Heart Surgery Database (CHSD) and has submitted data for the Norwood procedure during the most recent 48-month period.

Question #11: What is the most recent 48-month reporting period for which STS performance reports are available? Reporting period ending:

Select the most recent 48-month reporting period for which STS performance reports are available. The reporting period should appear at the top of your STS performance report.

See [FAQs](#) for additional information about responding to the questions in this section.

Carotid Endarterectomy Measure Specifications

For carotid endarterectomy, there are two sets of ICD-10 codes for counting patient discharges. The first set of codes is to identify patients who have had the procedure. The second set of codes is to identify patients with a specific diagnosis.

Count the number of patients, ages 18 years and older, discharged with the following ICD-10 codes in any procedure field AND any of the following ICD-10 codes in any diagnosis field.

ICD-10 Carotid Endarterectomy Procedure Codes

ICD-10 Procedure Code	Code Description
03CH0ZZ	Extirpation of Matter from Right Common Carotid Artery, Open Approach
03CJ0ZZ	Extirpation of Matter from Left Common Carotid Artery, Open Approach
03CK0ZZ	Extirpation of Matter from Right Internal Carotid Artery, Open Approach
03CL0ZZ	Extirpation of Matter from Left Internal Carotid Artery, Open Approach
03CM0ZZ	Extirpation of Matter from Right External Carotid Artery, Open Approach
03CN0ZZ	Extirpation of Matter from Left External Carotid Artery, Open Approach

ICD-10 Occlusion and Stenosis and Cerebral Infarction Diagnosis Codes

ICD-10 Diagnosis Code	Code Description
I63.031	Cerebral infarction due to thrombosis of right carotid artery
I63.032	Cerebral infarction due to thrombosis of left carotid artery
I63.033	Cerebral infarction due to thrombosis of bilateral carotid arteries
I63.039	Cerebral infarction due to thrombosis of unspecified carotid artery
I63.131	Cerebral infarction due to embolism of right carotid artery
I63.132	Cerebral infarction due to embolism of left carotid artery
I63.133	Cerebral infarction due to embolism of bilateral carotid arteries
I63.139	Cerebral infarction due to embolism of unspecified carotid artery
I63.231	Cerebral infarction due to unspecified occlusion or stenosis of right carotid arteries
I63.232	Cerebral infarction due to unspecified occlusion or stenosis of left carotid arteries
I63.233	Cerebral infarction due to unspecified occlusion or stenosis of bilateral carotid arteries
I63.239	Cerebral infarction due to unspecified occlusion or stenosis of unspecified carotid arteries
I65.21	Occlusion and stenosis of right carotid artery
I65.22	Occlusion and stenosis of left carotid artery
I65.23	Occlusion and stenosis of bilateral carotid arteries
I65.29	Occlusion and stenosis of unspecified carotid artery
I65.8	Occlusion and stenosis of other precerebral arteries
I65.9	Occlusion and stenosis of unspecified precerebral artery

Mitral Valve Repair and Replacement Measure Specifications

For mitral valve repair and replacement, there is only one set of ICD-10 codes for counting patient discharges. The set of codes is to identify patients who have had the procedure.

Count the number of patients, ages 18 years and older, discharged with the following ICD-10 codes in any procedure field.

ICD-10 Mitral Valve Repair and Replacement Procedure Codes

ICD-10 Procedure Code	Code Description
027G04Z	Dilation of Mitral Valve with Drug-eluting Intraluminal Device, Open Approach
027G0DZ	Dilation of Mitral Valve with Intraluminal Device, Open Approach
027G0ZZ	Dilation of Mitral Valve, Open Approach
02CG0ZZ	Extirpation of Matter from Mitral Valve, Open Approach
02NG0ZZ	Release Mitral Valve, Open Approach
02QG0ZE	Repair Mitral Valve created from Left Atrioventricular Valve, Open Approach
02QG0ZZ	Repair Mitral Valve, Open Approach
02RG07Z	Replacement of Mitral Valve with Autologous Tissue Substitute, Open Approach
02RG08Z	Replacement of Mitral Valve with Zooplasic Tissue, Open Approach
02RG0JZ	Replacement of Mitral Valve with Synthetic Substitute, Open Approach
02RG0KZ	Replacement of Mitral Valve with Nonautologous Tissue Substitute, Open Approach
02UG07E	Supplement Mitral Valve created from Left Atrioventricular Valve with Autologous Tissue Substitute, Open Approach
02UG07Z	Supplement Mitral Valve with Autologous Tissue Substitute, Open Approach
02UG08E	Supplement Mitral Valve created from Left Atrioventricular Valve with Zooplasic Tissue, Open Approach
02UG08Z	Supplement Mitral Valve with Zooplasic Tissue, Open Approach
02UG0JE	Supplement Mitral Valve created from Left Atrioventricular Valve with Synthetic Substitute, Open Approach
02UG0JZ	Supplement Mitral Valve with Synthetic Substitute, Open Approach
02UG0KE	Supplement Mitral Valve created from Left Atrioventricular Valve with Nonautologous Tissue Substitute, Open Approach
02UG0KZ	Supplement Mitral Valve with Nonautologous Tissue Substitute, Open Approach
02VG0ZZ	Restriction of Mitral Valve, Open Approach

Open Aortic Procedures Measure Specifications

For open aortic procedures, there is only one set of ICD-10 codes for counting patient discharges. The set of codes is to identify patients who have had the procedure.

Count the number of patients, ages 18 years and older, discharged with the following ICD-10 codes in any procedure field.

ICD-10 Open Aortic Procedure Codes

ICD-10 Procedure Code	Code Description
0410090	Bypass Abdominal Aorta to Abdominal Aorta with Autologous Venous Tissue, Open Approach
0410091	Bypass Abdominal Aorta to Celiac Artery with Autologous Venous Tissue, Open Approach
0410092	Bypass Abdominal Aorta to Mesenteric Artery with Autologous Venous Tissue, Open Approach
0410093	Bypass Abdominal Aorta to Right Renal Artery with Autologous Venous Tissue, Open Approach
0410094	Bypass Abdominal Aorta to Left Renal Artery with Autologous Venous Tissue, Open Approach
0410095	Bypass Abdominal Aorta to Bilateral Renal Artery with Autologous Venous Tissue, Open Approach
0410096	Bypass Abdominal Aorta to Right Common Iliac Artery with Autologous Venous Tissue, Open Approach
0410097	Bypass Abdominal Aorta to Left Common Iliac Artery with Autologous Venous Tissue, Open Approach
0410098	Bypass Abdominal Aorta to Bilateral Common Iliac Arteries with Autologous Venous Tissue, Open Approach
0410099	Bypass Abdominal Aorta to Right Internal Iliac Artery with Autologous Venous Tissue, Open Approach
021K0ZW	Bypass Right Ventricle to Aorta, Open Approach
021L0ZW	Bypass Left Ventricle to Aorta, Open Approach
021W08A	Bypass Thoracic Aorta, Descending to Innominate Artery with Zooplastic Tissue, Open Approach
021W08B	Bypass Thoracic Aorta, Descending to Subclavian with Zooplastic Tissue, Open Approach
021W08D	Bypass Thoracic Aorta, Descending to Carotid with Zooplastic Tissue, Open Approach
021W08F	Bypass Thoracic Aorta, Descending to Abdominal Artery with Zooplastic Tissue, Open Approach
021W08G	Bypass Thoracic Aorta, Descending to Axillary Artery with Zooplastic Tissue, Open Approach
021W08H	Bypass Thoracic Aorta, Descending to Brachial Artery with Zooplastic Tissue, Open Approach
021W08P	Bypass Thoracic Aorta, Descending to Pulmonary Trunk with Zooplastic Tissue, Open Approach
021W08Q	Bypass Thoracic Aorta, Descending to Right Pulmonary Artery with Zooplastic Tissue, Open Approach
021W08R	Bypass Thoracic Aorta, Descending to Left Pulmonary Artery with Zooplastic Tissue, Open Approach
021W08V	Bypass Thoracic Aorta, Descending to Lower Extremity Artery with Zooplastic Tissue, Open Approach

ICD-10 Procedure Code	Code Description
021W09B	Bypass Thoracic Aorta, Descending to Subclavian with Autologous Venous Tissue, Open Approach
021W09A	Bypass Thoracic Aorta, Descending to Innominate Artery with Autologous Venous Tissue, Open Approach
021W09D	Bypass Thoracic Aorta, Descending to Carotid with Autologous Venous Tissue, Open Approach
021W09F	Bypass Thoracic Aorta, Descending to Abdominal Artery with Autologous Venous Tissue, Open Approach
021W09G	Bypass Thoracic Aorta, Descending to Axillary Artery with Autologous Venous Tissue, Open Approach
021W09H	Bypass Thoracic Aorta, Descending to Brachial Artery with Autologous Venous Tissue, Open Approach
021W09P	Bypass Thoracic Aorta, Descending to Pulmonary Trunk with Autologous Venous Tissue, Open Approach
021W09Q	Bypass Thoracic Aorta, Descending to Right Pulmonary Artery with Autologous Venous Tissue, Open Approach
021W09R	Bypass Thoracic Aorta, Descending to Left Pulmonary Artery with Autologous Venous Tissue, Open Approach
021W09V	Bypass Thoracic Aorta, Descending to Lower Extremity Artery with Autologous Venous Tissue, Open Approach
021W0AA	Bypass Thoracic Aorta, Descending to Innominate Artery with Autologous Arterial Tissue, Open Approach
021W0AB	Bypass Thoracic Aorta, Descending to Subclavian with Autologous Arterial Tissue, Open Approach
021W0AD	Bypass Thoracic Aorta, Descending to Carotid with Autologous Arterial Tissue, Open Approach
021W0AF	Bypass Thoracic Aorta, Descending to Abdominal Artery with Autologous Arterial Tissue, Open Approach
021W0AG	Bypass Thoracic Aorta, Descending to Axillary Artery with Autologous Arterial Tissue, Open Approach
021W0AH	Bypass Thoracic Aorta, Descending to Brachial Artery with Autologous Arterial Tissue, Open Approach
021W0AP	Bypass Thoracic Aorta, Descending to Pulmonary Trunk with Autologous Arterial Tissue, Open Approach
021W0AQ	Bypass Thoracic Aorta, Descending to Right Pulmonary Artery with Autologous Arterial Tissue, Open Approach
021W0AR	Bypass Thoracic Aorta, Descending to Left Pulmonary Artery with Autologous Arterial Tissue, Open Approach
021W0AV	Bypass Thoracic Aorta, Descending to Lower Extremity Artery with Autologous Arterial Tissue, Open Approach
021W0JA	Bypass Thoracic Aorta, Descending to Innominate Artery with Synthetic Substitute, Open Approach
021W0JB	Bypass Thoracic Aorta, Descending to Subclavian with Synthetic Substitute, Open Approach
021W0JD	Bypass Thoracic Aorta, Descending to Carotid with Synthetic Substitute, Open Approach
021W0JF	Bypass Thoracic Aorta, Descending to Abdominal Artery with Synthetic Substitute, Open Approach
021W0JG	Bypass Thoracic Aorta, Descending to Axillary Artery with Synthetic Substitute, Open Approach
021W0JH	Bypass Thoracic Aorta, Descending to Brachial Artery with Synthetic Substitute, Open Approach
021W0JP	Bypass Thoracic Aorta, Descending to Pulmonary Trunk with Synthetic Substitute, Open Approach

ICD-10 Procedure Code	Code Description
021W0JQ	Bypass Thoracic Aorta, Descending to Right Pulmonary Artery with Synthetic Substitute, Open Approach
021W0JR	Bypass Thoracic Aorta, Descending to Left Pulmonary Artery with Synthetic Substitute, Open Approach
021W0JV	Bypass Thoracic Aorta, Descending to Lower Extremity Artery with Synthetic Substitute, Open Approach
021W0KA	Bypass Thoracic Aorta, Descending to Innominate Artery with Nonautologous Tissue Substitute, Open Approach
021W0KB	Bypass Thoracic Aorta, Descending to Subclavian with Nonautologous Tissue Substitute, Open Approach
021W0KD	Bypass Thoracic Aorta, Descending to Carotid with Nonautologous Tissue Substitute, Open Approach
021W0KF	Bypass Thoracic Aorta, Descending to Abdominal Artery with Nonautologous Tissue Substitute, Open Approach
021W0KG	Bypass Thoracic Aorta, Descending to Axillary Artery with Nonautologous Tissue Substitute, Open Approach
021W0KH	Bypass Thoracic Aorta, Descending to Brachial Artery with Nonautologous Tissue Substitute, Open Approach
021W0KP	Bypass Thoracic Aorta, Descending to Pulmonary Trunk with Nonautologous Tissue Substitute, Open Approach
021W0KQ	Bypass Thoracic Aorta, Descending to Right Pulmonary Artery with Nonautologous Tissue Substitute, Open Approach
021W0KR	Bypass Thoracic Aorta, Descending to Left Pulmonary Artery with Nonautologous Tissue Substitute, Open Approach
021W0KV	Bypass Thoracic Aorta, Descending to Lower Extremity Artery with Nonautologous Tissue Substitute, Open Approach
021W0ZA	Bypass Thoracic Aorta, Descending to Innominate Artery, Open Approach
021W0ZB	Bypass Thoracic Aorta, Descending to Subclavian, Open Approach
021W0ZD	Bypass Thoracic Aorta, Descending to Carotid, Open Approach
021W0ZP	Bypass Thoracic Aorta, Descending to Pulmonary Trunk, Open Approach
021W0ZQ	Bypass Thoracic Aorta, Descending to Right Pulmonary Artery, Open Approach
021W0ZR	Bypass Thoracic Aorta, Descending to Left Pulmonary Artery, Open Approach
021X08A	Bypass Thoracic Aorta, Ascending/Arch to Innominate Artery with Zooplastic Tissue, Open Approach
021X08B	Bypass Thoracic Aorta, Ascending/Arch to Subclavian with Zooplastic Tissue, Open Approach
021X08D	Bypass Thoracic Aorta, Ascending/Arch to Carotid with Zooplastic Tissue, Open Approach
021X08P	Bypass Thoracic Aorta, Ascending/Arch to Pulmonary Trunk with Zooplastic Tissue, Open Approach
021X08Q	Bypass Thoracic Aorta, Ascending/Arch to Right Pulmonary Artery with Zooplastic Tissue, Open Approach
021X08R	Bypass Thoracic Aorta, Ascending/Arch to Left Pulmonary Artery with Zooplastic Tissue, Open Approach
021X09A	Bypass Thoracic Aorta, Ascending/Arch to Innominate Artery with Autologous Venous Tissue, Open Approach
021X09B	Bypass Thoracic Aorta, Ascending/Arch to Subclavian with Autologous Venous Tissue, Open Approach
021X09D	Bypass Thoracic Aorta, Ascending/Arch to Carotid with Autologous Venous Tissue, Open Approach

ICD-10 Procedure Code	Code Description
021X09P	Bypass Thoracic Aorta, Ascending/Arch to Pulmonary Trunk with Autologous Venous Tissue, Open Approach
021X09Q	Bypass Thoracic Aorta, Ascending/Arch to Right Pulmonary Artery with Autologous Venous Tissue, Open Approach
021X09R	Bypass Thoracic Aorta, Ascending/Arch to Left Pulmonary Artery with Autologous Venous Tissue, Open Approach
021X0AA	Bypass Thoracic Aorta, Ascending/Arch to Innominate Artery with Autologous Arterial Tissue, Open Approach
021X0AB	Bypass Thoracic Aorta, Ascending/Arch to Subclavian with Autologous Arterial Tissue, Open Approach
021X0AD	Bypass Thoracic Aorta, Ascending/Arch to Carotid with Autologous Arterial Tissue, Open Approach
021X0AP	Bypass Thoracic Aorta, Ascending/Arch to Pulmonary Trunk with Autologous Arterial Tissue, Open Approach
021X0AQ	Bypass Thoracic Aorta, Ascending/Arch to Right Pulmonary Artery with Autologous Arterial Tissue, Open Approach
021X0AR	Bypass Thoracic Aorta, Ascending/Arch to Left Pulmonary Artery with Autologous Arterial Tissue, Open Approach
021X0JA	Bypass Thoracic Aorta, Ascending/Arch to Innominate Artery with Synthetic Substitute, Open Approach
021X0JB	Bypass Thoracic Aorta, Ascending/Arch to Subclavian with Synthetic Substitute, Open Approach
021X0JD	Bypass Thoracic Aorta, Ascending/Arch to Carotid with Synthetic Substitute, Open Approach
021X0JP	Bypass Thoracic Aorta, Ascending/Arch to Pulmonary Trunk with Synthetic Substitute, Open Approach
021X0JQ	Bypass Thoracic Aorta, Ascending/Arch to Right Pulmonary Artery with Synthetic Substitute, Open Approach
021X0JR	Bypass Thoracic Aorta, Ascending/Arch to Left Pulmonary Artery with Synthetic Substitute, Open Approach
021X0KA	Bypass Thoracic Aorta, Ascending/Arch to Innominate Artery with Nonautologous Tissue Substitute, Open Approach
021X0KB	Bypass Thoracic Aorta, Ascending/Arch to Subclavian with Nonautologous Tissue Substitute, Open Approach
021X0KD	Bypass Thoracic Aorta, Ascending/Arch to Carotid with Nonautologous Tissue Substitute, Open Approach
021X0KP	Bypass Thoracic Aorta, Ascending/Arch to Pulmonary Trunk with Nonautologous Tissue Substitute, Open Approach
021X0KQ	Bypass Thoracic Aorta, Ascending/Arch to Right Pulmonary Artery with Nonautologous Tissue Substitute, Open Approach
021X0KR	Bypass Thoracic Aorta, Ascending/Arch to Left Pulmonary Artery with Nonautologous Tissue Substitute, Open Approach
021X0ZA	Bypass Thoracic Aorta, Ascending/Arch to Innominate Artery, Open Approach
021X0ZB	Bypass Thoracic Aorta, Ascending/Arch to Subclavian, Open Approach
021X0ZD	Bypass Thoracic Aorta, Ascending/Arch to Carotid, Open Approach
021X0ZP	Bypass Thoracic Aorta, Ascending/Arch to Pulmonary Trunk, Open Approach
021X0ZQ	Bypass Thoracic Aorta, Ascending/Arch to Right Pulmonary Artery, Open Approach
021X0ZR	Bypass Thoracic Aorta, Ascending/Arch to Left Pulmonary Artery, Open Approach
02BW0ZX	Excision of Thoracic Aorta, Descending, Open Approach, Diagnostic
02BW0ZZ	Excision of Thoracic Aorta, Descending, Open Approach

ICD-10 Procedure Code	Code Description
02BX0ZX	Excision of Thoracic Aorta, Ascending/Arch, Open Approach, Diagnostic
02BX0ZZ	Excision of Thoracic Aorta, Ascending/Arch, Open Approach
02QW0ZZ	Repair Thoracic Aorta, Descending, Open Approach
02QX0ZZ	Repair Thoracic Aorta, Ascending/Arch, Open Approach
02RW07Z	Replacement of Thoracic Aorta, Descending with Autologous Tissue Substitute, Open Approach
02RW08Z	Replacement of Thoracic Aorta, Descending with Zooplastic Tissue, Open Approach
02RW0JZ	Replacement of Thoracic Aorta, Descending with Synthetic Substitute, Open Approach
02RW0KZ	Replacement of Thoracic Aorta, Descending with Nonautologous Tissue Substitute, Open Approach
02RX07Z	Replacement of Thoracic Aorta, Ascending/Arch with Autologous Tissue Substitute, Open Approach
02RX08Z	Replacement of Thoracic Aorta, Ascending/Arch with Zooplastic Tissue, Open Approach
02RX0JZ	Replacement of Thoracic Aorta, Ascending/Arch with Synthetic Substitute, Open Approach
02RX0KZ	Replacement of Thoracic Aorta, Ascending/Arch with Nonautologous Tissue Substitute, Open Approach
02SW0ZZ	Reposition Thoracic Aorta, Descending, Open Approach
02SX0ZZ	Reposition Thoracic Aorta, Ascending/Arch, Open Approach
02UW07Z	Supplement Thoracic Aorta, Descending with Autologous Tissue Substitute, Open Approach
02UW08Z	Supplement Thoracic Aorta, Descending with Zooplastic Tissue, Open Approach
02UW0JZ	Supplement Thoracic Aorta, Descending with Synthetic Substitute, Open Approach
02UW0KZ	Supplement Thoracic Aorta, Descending with Nonautologous Tissue Substitute, Open Approach
02UX08Z	Supplement Thoracic Aorta, Ascending/Arch with Zooplastic Tissue, Open Approach
041009B	Bypass Abdominal Aorta to Left Internal Iliac Artery with Autologous Venous Tissue, Open Approach
041009C	Bypass Abdominal Aorta to Bilateral Internal Iliac Arteries with Autologous Venous Tissue, Open Approach
041009D	Bypass Abdominal Aorta to Right External Iliac Artery with Autologous Venous Tissue, Open Approach
041009F	Bypass Abdominal Aorta to Left External Iliac Artery with Autologous Venous Tissue, Open Approach
041009G	Bypass Abdominal Aorta to Bilateral External Iliac Arteries with Autologous Venous Tissue, Open Approach
041009H	Bypass Abdominal Aorta to Right Femoral Artery with Autologous Venous Tissue, Open Approach
041009J	Bypass Abdominal Aorta to Left Femoral Artery with Autologous Venous Tissue, Open Approach
041009K	Bypass Abdominal Aorta to Bilateral Femoral Arteries with Autologous Venous Tissue, Open Approach
041009Q	Bypass Abdominal Aorta to Lower Extremity Artery with Autologous Venous Tissue, Open Approach
041009R	Bypass Abdominal Aorta to Lower Artery with Autologous Venous Tissue, Open Approach
04100A0	Bypass Abdominal Aorta to Abdominal Aorta with Autologous Arterial Tissue, Open Approach

ICD-10 Procedure Code	Code Description
04100A1	Bypass Abdominal Aorta to Celiac Artery with Autologous Arterial Tissue, Open Approach
04100A2	Bypass Abdominal Aorta to Mesenteric Artery with Autologous Arterial Tissue, Open Approach
04100A3	Bypass Abdominal Aorta to Right Renal Artery with Autologous Arterial Tissue, Open Approach
04100A4	Bypass Abdominal Aorta to Left Renal Artery with Autologous Arterial Tissue, Open Approach
04100A5	Bypass Abdominal Aorta to Bilateral Renal Artery with Autologous Arterial Tissue, Open Approach
04100A6	Bypass Abdominal Aorta to Right Common Iliac Artery with Autologous Arterial Tissue, Open Approach
04100A7	Bypass Abdominal Aorta to Left Common Iliac Artery with Autologous Arterial Tissue, Open Approach
04100A8	Bypass Abdominal Aorta to Bilateral Common Iliac Arteries with Autologous Arterial Tissue, Open Approach
04100A9	Bypass Abdominal Aorta to Right Internal Iliac Artery with Autologous Arterial Tissue, Open Approach
04100AB	Bypass Abdominal Aorta to Left Internal Iliac Artery with Autologous Arterial Tissue, Open Approach
04100AC	Bypass Abdominal Aorta to Bilateral Internal Iliac Arteries with Autologous Arterial Tissue, Open Approach
04100AD	Bypass Abdominal Aorta to Right External Iliac Artery with Autologous Arterial Tissue, Open Approach
04100AF	Bypass Abdominal Aorta to Left External Iliac Artery with Autologous Arterial Tissue, Open Approach
04100AG	Bypass Abdominal Aorta to Bilateral External Iliac Arteries with Autologous Arterial Tissue, Open Approach
04100AH	Bypass Abdominal Aorta to Right Femoral Artery with Autologous Arterial Tissue, Open Approach
04100AJ	Bypass Abdominal Aorta to Left Femoral Artery with Autologous Arterial Tissue, Open Approach
04100AK	Bypass Abdominal Aorta to Bilateral Femoral Arteries with Autologous Arterial Tissue, Open Approach
04100AQ	Bypass Abdominal Aorta to Lower Extremity Artery with Autologous Arterial Tissue, Open Approach
04100AR	Bypass Abdominal Aorta to Lower Artery with Autologous Arterial Tissue, Open Approach
04100J0	Bypass Abdominal Aorta to Abdominal Aorta with Synthetic Substitute, Open Approach
04100J1	Bypass Abdominal Aorta to Celiac Artery with Synthetic Substitute, Open Approach
04100J2	Bypass Abdominal Aorta to Mesenteric Artery with Synthetic Substitute, Open Approach
04100J3	Bypass Abdominal Aorta to Right Renal Artery with Synthetic Substitute, Open Approach
04100J4	Bypass Abdominal Aorta to Left Renal Artery with Synthetic Substitute, Open Approach
04100J5	Bypass Abdominal Aorta to Bilateral Renal Artery with Synthetic Substitute, Open Approach
04100J6	Bypass Abdominal Aorta to Right Common Iliac Artery with Synthetic Substitute, Open Approach
04100J7	Bypass Abdominal Aorta to Left Common Iliac Artery with Synthetic Substitute, Open Approach
04100J8	Bypass Abdominal Aorta to Bilateral Common Iliac Arteries with Synthetic Substitute, Open Approach

ICD-10 Procedure Code	Code Description
04100J9	Bypass Abdominal Aorta to Right Internal Iliac Artery with Synthetic Substitute, Open Approach
04100JB	Bypass Abdominal Aorta to Left Internal Iliac Artery with Synthetic Substitute, Open Approach
04100JC	Bypass Abdominal Aorta to Bilateral Internal Iliac Arteries with Synthetic Substitute, Open Approach
04100JD	Bypass Abdominal Aorta to Right External Iliac Artery with Synthetic Substitute, Open Approach
04100JF	Bypass Abdominal Aorta to Left External Iliac Artery with Synthetic Substitute, Open Approach
04100JG	Bypass Abdominal Aorta to Bilateral External Iliac Arteries with Synthetic Substitute, Open Approach
04100JH	Bypass Abdominal Aorta to Right Femoral Artery with Synthetic Substitute, Open Approach
04100JJ	Bypass Abdominal Aorta to Left Femoral Artery with Synthetic Substitute, Open Approach
04100JK	Bypass Abdominal Aorta to Bilateral Femoral Arteries with Synthetic Substitute, Open Approach
04100JQ	Bypass Abdominal Aorta to Lower Extremity Artery with Synthetic Substitute, Open Approach
04100JR	Bypass Abdominal Aorta to Lower Artery with Synthetic Substitute, Open Approach
04100K0	Bypass Abdominal Aorta to Abdominal Aorta with Nonautologous Tissue Substitute, Open Approach
04100K1	Bypass Abdominal Aorta to Celiac Artery with Nonautologous Tissue Substitute, Open Approach
04100K2	Bypass Abdominal Aorta to Mesenteric Artery with Nonautologous Tissue Substitute, Open Approach
04100K3	Bypass Abdominal Aorta to Right Renal Artery with Nonautologous Tissue Substitute, Open Approach
04100K4	Bypass Abdominal Aorta to Left Renal Artery with Nonautologous Tissue Substitute, Open Approach
04100K5	Bypass Abdominal Aorta to Bilateral Renal Artery with Nonautologous Tissue Substitute, Open Approach
04100K6	Bypass Abdominal Aorta to Right Common Iliac Artery with Nonautologous Tissue Substitute, Open Approach
04100K7	Bypass Abdominal Aorta to Left Common Iliac Artery with Nonautologous Tissue Substitute, Open Approach
04100K8	Bypass Abdominal Aorta to Bilateral Common Iliac Arteries with Nonautologous Tissue Substitute, Open Approach
04100K9	Bypass Abdominal Aorta to Right Internal Iliac Artery with Nonautologous Tissue Substitute, Open Approach
04100KB	Bypass Abdominal Aorta to Left Internal Iliac Artery with Nonautologous Tissue Substitute, Open Approach
04100KC	Bypass Abdominal Aorta to Bilateral Internal Iliac Arteries with Nonautologous Tissue Substitute, Open Approach
04100KD	Bypass Abdominal Aorta to Right External Iliac Artery with Nonautologous Tissue Substitute, Open Approach
04100KF	Bypass Abdominal Aorta to Left External Iliac Artery with Nonautologous Tissue Substitute, Open Approach
04100KG	Bypass Abdominal Aorta to Bilateral External Iliac Arteries with Nonautologous Tissue Substitute, Open Approach
04100KH	Bypass Abdominal Aorta to Right Femoral Artery with Nonautologous Tissue Substitute, Open Approach

ICD-10 Procedure Code	Code Description
04100KJ	Bypass Abdominal Aorta to Left Femoral Artery with Nonautologous Tissue Substitute, Open Approach
04100KK	Bypass Abdominal Aorta to Bilateral Femoral Arteries with Nonautologous Tissue Substitute, Open Approach
04100KQ	Bypass Abdominal Aorta to Lower Extremity Artery with Nonautologous Tissue Substitute, Open Approach
04100KR	Bypass Abdominal Aorta to Lower Artery with Nonautologous Tissue Substitute, Open Approach
04100Z0	Bypass Abdominal Aorta to Abdominal Aorta, Open Approach
04100Z1	Bypass Abdominal Aorta to Celiac Artery, Open Approach
04100Z2	Bypass Abdominal Aorta to Mesenteric Artery, Open Approach
04100Z3	Bypass Abdominal Aorta to Right Renal Artery, Open Approach
04100Z4	Bypass Abdominal Aorta to Left Renal Artery, Open Approach
04100Z5	Bypass Abdominal Aorta to Bilateral Renal Artery, Open Approach
04100Z6	Bypass Abdominal Aorta to Right Common Iliac Artery, Open Approach
04100Z7	Bypass Abdominal Aorta to Left Common Iliac Artery, Open Approach
04100Z8	Bypass Abdominal Aorta to Bilateral Common Iliac Arteries, Open Approach
04100Z9	Bypass Abdominal Aorta to Right Internal Iliac Artery, Open Approach
04100ZB	Bypass Abdominal Aorta to Left Internal Iliac Artery, Open Approach
04100ZC	Bypass Abdominal Aorta to Bilateral Internal Iliac Arteries, Open Approach
04100ZD	Bypass Abdominal Aorta to Right External Iliac Artery, Open Approach
04100ZF	Bypass Abdominal Aorta to Left External Iliac Artery, Open Approach
04100ZG	Bypass Abdominal Aorta to Bilateral External Iliac Arteries, Open Approach
04100ZH	Bypass Abdominal Aorta to Right Femoral Artery, Open Approach
04100ZJ	Bypass Abdominal Aorta to Left Femoral Artery, Open Approach
04100ZK	Bypass Abdominal Aorta to Bilateral Femoral Arteries, Open Approach
04100ZQ	Bypass Abdominal Aorta to Lower Extremity Artery, Open Approach
04100ZR	Bypass Abdominal Aorta to Lower Artery, Open Approach
041C090	Bypass Right Common Iliac Artery to Abdominal Aorta with Autologous Venous Tissue, Open Approach
041C0A0	Bypass Right Common Iliac Artery to Abdominal Aorta with Autologous Arterial Tissue, Open Approach
041C0J0	Bypass Right Common Iliac Artery to Abdominal Aorta with Synthetic Substitute, Open Approach
041C0K0	Bypass Right Common Iliac Artery to Abdominal Aorta with Nonautologous Tissue Substitute, Open Approach
041C0Z0	Bypass Right Common Iliac Artery to Abdominal Aorta, Open Approach
041D090	Bypass Left Common Iliac Artery to Abdominal Aorta with Autologous Venous Tissue, Open Approach
041D0A0	Bypass Left Common Iliac Artery to Abdominal Aorta with Autologous Arterial Tissue, Open Approach
041D0J0	Bypass Left Common Iliac Artery to Abdominal Aorta with Synthetic Substitute, Open Approach
041D0K0	Bypass Left Common Iliac Artery to Abdominal Aorta with Nonautologous Tissue Substitute, Open Approach
041D0Z0	Bypass Left Common Iliac Artery to Abdominal Aorta, Open Approach

ICD-10 Procedure Code	Code Description
04B00ZX	Excision of Abdominal Aorta, Open Approach, Diagnostic
04B00ZZ	Excision of Abdominal Aorta, Open Approach
04Q00ZZ	Repair Abdominal Aorta, Open Approach
04R007Z	Replacement of Abdominal Aorta with Autologous Tissue Substitute, Open Approach
04R00JZ	Replacement of Abdominal Aorta with Synthetic Substitute, Open Approach
04R00KZ	Replacement of Abdominal Aorta with Nonautologous Tissue Substitute, Open Approach
04S00ZZ	Reposition Abdominal Aorta, Open Approach
04U007Z	Supplement Abdominal Aorta with Autologous Tissue Substitute, Open Approach
04U00JZ	Supplement Abdominal Aorta with Synthetic Substitute, Open Approach
04U00KZ	Supplement Abdominal Aorta with Nonautologous Tissue Substitute, Open Approach
X2RX0N7	Replacement of Thoracic Aorta, Arch using Branched Synthetic Substitute with Intraluminal Device, Open Approach, New Technology Group 7

Lung Resection for Cancer Measure Specifications

For lung resection for cancer, there are two sets of ICD-10 codes for counting patient discharges. The first set of codes is to identify patients who have had the procedure. The second set of codes is to identify patients with a specific diagnosis.

Count the number of patients, ages 18 years and older, discharged with the following ICD-10 codes in any procedure field AND any of the following ICD-10 codes in any diagnosis field.

ICD-10 Lung Resection for Cancer Procedure Codes

ICD-10 Procedure Code	Code Description
0BBC0ZZ	Excision of Right Upper Lung Lobe, Open Approach
0BBC3ZZ	Excision of Right Upper Lung Lobe, Percutaneous Approach
0BBC4ZZ	Excision of Right Upper Lung Lobe, Percutaneous Endoscopic Approach
0BBD0ZZ	Excision of Right Middle Lung Lobe, Open Approach
0BBD3ZZ	Excision of Right Middle Lung Lobe, Percutaneous Approach
0BBD4ZZ	Excision of Right Middle Lung Lobe, Percutaneous Endoscopic Approach
0BBF0ZZ	Excision of Right Lower Lung Lobe, Open Approach
0BBF3ZZ	Excision of Right Lower Lung Lobe, Percutaneous Approach
0BBF4ZZ	Excision of Right Lower Lung Lobe, Percutaneous Endoscopic Approach
0BBG0ZZ	Excision of Left Upper Lung Lobe, Open Approach
0BBG3ZZ	Excision of Left Upper Lung Lobe, Percutaneous Approach
0BBG4ZZ	Excision of Left Upper Lung Lobe, Percutaneous Endoscopic Approach
0BBH0ZZ	Excision of Lung Lingula, Open Approach
0BBH3ZZ	Excision of Lung Lingula, Percutaneous Approach
0BBH4ZZ	Excision of Lung Lingula, Percutaneous Endoscopic Approach
0BBJ0ZZ	Excision of Left Lower Lung Lobe, Open Approach
0BBJ3ZZ	Excision of Left Lower Lung Lobe, Percutaneous Approach
0BBJ4ZZ	Excision of Left Lower Lung Lobe, Percutaneous Endoscopic Approach
0BBK0ZZ	Excision of Right Lung, Open Approach
0BBK3ZZ	Excision of Right Lung, Percutaneous Approach
0BBK4ZZ	Excision of Right Lung, Percutaneous Endoscopic Approach
0BBL0ZZ	Excision of Left Lung, Open Approach
0BBL3ZZ	Excision of Left Lung, Percutaneous Approach
0BBL4ZZ	Excision of Left Lung, Percutaneous Endoscopic Approach
0BBL7ZZ	Excision of Left Lung, Via Natural or Artificial Opening
0BTC0ZZ	Resection of Right Upper Lung Lobe, Open Approach
0BTC4ZZ	Resection of Right Upper Lung Lobe, Percutaneous Endoscopic Approach
0BTD0ZZ	Resection of Right Middle Lung Lobe, Open Approach
0BTD4ZZ	Resection of Right Middle Lung Lobe, Percutaneous Endoscopic Approach
0BTF0ZZ	Resection of Right Lower Lung Lobe, Open Approach
0BTF4ZZ	Resection of Right Lower Lung Lobe, Percutaneous Endoscopic Approach
0BTG0ZZ	Resection of Left Upper Lung Lobe, Open Approach
0BTG4ZZ	Resection of Left Upper Lung Lobe, Percutaneous Endoscopic Approach

ICD-10 Procedure Code	Code Description
0BTH0ZZ	Resection of Lung Lingula, Open Approach
0BTH4ZZ	Resection of Lung Lingula, Percutaneous Endoscopic Approach
0BTJ0ZZ	Resection of Left Lower Lung Lobe, Open Approach
0BTJ4ZZ	Resection of Left Lower Lung Lobe, Percutaneous Endoscopic Approach
0BTK0ZZ	Resection of Right Lung, Open Approach
0BTK4ZZ	Resection of Right Lung, Percutaneous Endoscopic Approach
0BTL0ZZ	Resection of Left Lung, Open Approach
0BTL4ZZ	Resection of Left Lung, Percutaneous Endoscopic Approach

ICD-10 Malignant Tumor and Cancer in Situ Diagnosis Codes

ICD-10 Diagnosis Code	Code Description
C7A.090	Malignant carcinoid tumor of the bronchus and lung
C7A.1	Malignant poorly differentiated neuroendocrine tumors
C7A.8	Other malignant neuroendocrine tumors
C34.00	Malignant neoplasm of main bronchus
C34.01	Malignant neoplasm of right main bronchus
C34.02	Malignant neoplasm of left main bronchus
C34.10	Malignant neoplasm of upper lobe, unspecified bronchus or lung
C34.11	Malignant neoplasm of upper lobe, right bronchus or lung
C34.12	Malignant neoplasm of upper lobe, left bronchus or lung
C34.2	Malignant neoplasm of middle lobe, bronchus or lung
C34.30	Malignant neoplasm of lower lobe, unspecified bronchus or lung
C34.31	Malignant neoplasm of lower lobe, right bronchus or lung
C34.32	Malignant neoplasm of lower lobe, left bronchus or lung
C34.80	Malignant neoplasm of overlapping sites of unspecified bronchus and lung
C34.81	Malignant neoplasm of overlapping sites of right bronchus and lung
C34.82	Malignant neoplasm of overlapping sites of left bronchus and lung
C34.90	Malignant neoplasm of unspecified part of unspecified bronchus or lung
C34.91	Malignant neoplasm of unspecified part of right bronchus or lung
C34.92	Malignant neoplasm of unspecified part of left bronchus or lung
D02.20	Carcinoma in situ of unspecified bronchus and lung
D02.21	Carcinoma in situ of right bronchus and lung
D02.22	Carcinoma in situ of left bronchus and lung

Esophageal Resection for Cancer Measure Specifications

For esophageal resection for cancer, there are two sets of ICD-10 codes for counting patient discharges. The first set of codes is to identify patients who have had the procedure. The second set of codes is to identify patients with a specific diagnosis.

Count the number of patients, ages 18 years and older, discharged with the following ICD-10 codes in any procedure field AND any of the following ICD-10 codes in any diagnosis field.

ICD-10 Esophageal Resection for Cancer Procedure Codes

ICD-10 Procedure Code	Code Description
0D11074	Bypass Upper Esophagus to Cutaneous with Autologous Tissue Substitute, Open Approach
0D11076	Bypass Upper Esophagus to Stomach with Autologous Tissue Substitute, Open Approach
0D11079	Bypass Upper Esophagus to Duodenum with Autologous Tissue Substitute, Open Approach
0D1107A	Bypass Upper Esophagus to Jejunum with Autologous Tissue Substitute, Open Approach
0D1107B	Bypass Upper Esophagus to Ileum with Autologous Tissue Substitute, Open Approach
0D110J4	Bypass Upper Esophagus to Cutaneous with Synthetic Substitute, Open Approach
0D110J6	Bypass Upper Esophagus to Stomach with Synthetic Substitute, Open Approach
0D110J9	Bypass Upper Esophagus to Duodenum with Synthetic Substitute, Open Approach
0D110JA	Bypass Upper Esophagus to Jejunum with Synthetic Substitute, Open Approach
0D110JB	Bypass Upper Esophagus to Ileum with Synthetic Substitute, Open Approach
0D110K4	Bypass Upper Esophagus to Cutaneous with Nonautologous Tissue Substitute, Open Approach
0D110K6	Bypass Upper Esophagus to Stomach with Nonautologous Tissue Substitute, Open Approach
0D110K9	Bypass Upper Esophagus to Duodenum with Nonautologous Tissue Substitute, Open Approach
0D110KA	Bypass Upper Esophagus to Jejunum with Nonautologous Tissue Substitute, Open Approach
0D110KB	Bypass Upper Esophagus to Ileum with Nonautologous Tissue Substitute, Open Approach
0D110Z4	Bypass Upper Esophagus to Cutaneous, Open Approach
0D110Z6	Bypass Upper Esophagus to Stomach, Open Approach
0D110Z9	Bypass Upper Esophagus to Duodenum, Open Approach
0D110ZA	Bypass Upper Esophagus to Jejunum, Open Approach
0D110ZB	Bypass Upper Esophagus to Ileum, Open Approach
0D113J4	Bypass Upper Esophagus to Cutaneous with Synthetic Substitute, Percutaneous Approach
0D11474	Bypass Upper Esophagus to Cutaneous with Autologous Tissue Substitute, Percutaneous Endoscopic Approach
0D11476	Bypass Upper Esophagus to Stomach with Autologous Tissue Substitute, Percutaneous Endoscopic Approach
0D11479	Bypass Upper Esophagus to Duodenum with Autologous Tissue Substitute, Percutaneous Endoscopic Approach
0D1147A	Bypass Upper Esophagus to Jejunum with Autologous Tissue Substitute, Percutaneous Endoscopic Approach

ICD-10 Procedure Code	Code Description
0D1147B	Bypass Upper Esophagus to Ileum with Autologous Tissue Substitute, Percutaneous Endoscopic Approach
0D114J4	Bypass Upper Esophagus to Cutaneous with Synthetic Substitute, Percutaneous Endoscopic Approach
0D114J6	Bypass Upper Esophagus to Stomach with Synthetic Substitute, Percutaneous Endoscopic Approach
0D114J9	Bypass Upper Esophagus to Duodenum with Synthetic Substitute, Percutaneous Endoscopic Approach
0D114JA	Bypass Upper Esophagus to Jejunum with Synthetic Substitute, Percutaneous Endoscopic Approach
0D114JB	Bypass Upper Esophagus to Ileum with Synthetic Substitute, Percutaneous Endoscopic Approach
0D114K4	Bypass Upper Esophagus to Cutaneous with Nonautologous Tissue Substitute, Percutaneous Endoscopic Approach
0D114K6	Bypass Upper Esophagus to Stomach with Nonautologous Tissue Substitute, Percutaneous Endoscopic Approach
0D114K9	Bypass Upper Esophagus to Duodenum with Nonautologous Tissue Substitute, Percutaneous Endoscopic Approach
0D114KA	Bypass Upper Esophagus to Jejunum with Nonautologous Tissue Substitute, Percutaneous Endoscopic Approach
0D114KB	Bypass Upper Esophagus to Ileum with Nonautologous Tissue Substitute, Percutaneous Endoscopic Approach
0D114Z4	Bypass Upper Esophagus to Cutaneous, Percutaneous Endoscopic Approach
0D114Z6	Bypass Upper Esophagus to Stomach, Percutaneous Endoscopic Approach
0D114Z9	Bypass Upper Esophagus to Duodenum, Percutaneous Endoscopic Approach
0D114ZA	Bypass Upper Esophagus to Jejunum, Percutaneous Endoscopic Approach
0D114ZB	Bypass Upper Esophagus to Ileum, Percutaneous Endoscopic Approach
0D11874	Bypass Upper Esophagus to Cutaneous with Autologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D11876	Bypass Upper Esophagus to Stomach with Autologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D11879	Bypass Upper Esophagus to Duodenum with Autologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D1187A	Bypass Upper Esophagus to Jejunum with Autologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D1187B	Bypass Upper Esophagus to Ileum with Autologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D118J4	Bypass Upper Esophagus to Cutaneous with Synthetic Substitute, Via Natural or Artificial Opening Endoscopic
0D118J6	Bypass Upper Esophagus to Stomach with Synthetic Substitute, Via Natural or Artificial Opening Endoscopic
0D118J9	Bypass Upper Esophagus to Duodenum with Synthetic Substitute, Via Natural or Artificial Opening Endoscopic
0D118JA	Bypass Upper Esophagus to Jejunum with Synthetic Substitute, Via Natural or Artificial Opening Endoscopic
0D118JB	Bypass Upper Esophagus to Ileum with Synthetic Substitute, Via Natural or Artificial Opening Endoscopic
0D118K4	Bypass Upper Esophagus to Cutaneous with Nonautologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D118K6	Bypass Upper Esophagus to Stomach with Nonautologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic

ICD-10 Procedure Code	Code Description
0D118K9	Bypass Upper Esophagus to Duodenum with Nonautologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D118KA	Bypass Upper Esophagus to Jejunum with Nonautologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D118KB	Bypass Upper Esophagus to Ileum with Nonautologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D118Z4	Bypass Upper Esophagus to Cutaneous, Via Natural or Artificial Opening Endoscopic
0D118Z6	Bypass Upper Esophagus to Stomach, Via Natural or Artificial Opening Endoscopic
0D118Z9	Bypass Upper Esophagus to Duodenum, Via Natural or Artificial Opening Endoscopic
0D118ZA	Bypass Upper Esophagus to Jejunum, Via Natural or Artificial Opening Endoscopic
0D118ZB	Bypass Upper Esophagus to Ileum, Via Natural or Artificial Opening Endoscopic
0D12074	Bypass Middle Esophagus to Cutaneous with Autologous Tissue Substitute, Open Approach
0D12076	Bypass Middle Esophagus to Stomach with Autologous Tissue Substitute, Open Approach
0D12079	Bypass Middle Esophagus to Duodenum with Autologous Tissue Substitute, Open Approach
0D1207A	Bypass Middle Esophagus to Jejunum with Autologous Tissue Substitute, Open Approach
0D1207B	Bypass Middle Esophagus to Ileum with Autologous Tissue Substitute, Open Approach
0D120J4	Bypass Middle Esophagus to Cutaneous with Synthetic Substitute, Open Approach
0D120J6	Bypass Middle Esophagus to Stomach with Synthetic Substitute, Open Approach
0D120J9	Bypass Middle Esophagus to Duodenum with Synthetic Substitute, Open Approach
0D120JA	Bypass Middle Esophagus to Jejunum with Synthetic Substitute, Open Approach
0D120JB	Bypass Middle Esophagus to Ileum with Synthetic Substitute, Open Approach
0D120K4	Bypass Middle Esophagus to Cutaneous with Nonautologous Tissue Substitute, Open Approach
0D120K6	Bypass Middle Esophagus to Stomach with Nonautologous Tissue Substitute, Open Approach
0D120K9	Bypass Middle Esophagus to Duodenum with Nonautologous Tissue Substitute, Open Approach
0D120KA	Bypass Middle Esophagus to Jejunum with Nonautologous Tissue Substitute, Open Approach
0D120KB	Bypass Middle Esophagus to Ileum with Nonautologous Tissue Substitute, Open Approach
0D120Z4	Bypass Middle Esophagus to Cutaneous, Open Approach
0D120Z6	Bypass Middle Esophagus to Stomach, Open Approach
0D120Z9	Bypass Middle Esophagus to Duodenum, Open Approach
0D120ZA	Bypass Middle Esophagus to Jejunum, Open Approach
0D120ZB	Bypass Middle Esophagus to Ileum, Open Approach
0D123J4	Bypass Middle Esophagus to Cutaneous with Synthetic Substitute, Percutaneous Approach
0D12474	Bypass Middle Esophagus to Cutaneous with Autologous Tissue Substitute, Percutaneous Endoscopic Approach

ICD-10 Procedure Code	Code Description
0D12476	Bypass Middle Esophagus to Stomach with Autologous Tissue Substitute, Percutaneous Endoscopic Approach
0D12479	Bypass Middle Esophagus to Duodenum with Autologous Tissue Substitute, Percutaneous Endoscopic Approach
0D1247A	Bypass Middle Esophagus to Jejunum with Autologous Tissue Substitute, Percutaneous Endoscopic Approach
0D1247B	Bypass Middle Esophagus to Ileum with Autologous Tissue Substitute, Percutaneous Endoscopic Approach
0D124J4	Bypass Middle Esophagus to Cutaneous with Synthetic Substitute, Percutaneous Endoscopic Approach
0D124J6	Bypass Middle Esophagus to Stomach with Synthetic Substitute, Percutaneous Endoscopic Approach
0D124J9	Bypass Middle Esophagus to Duodenum with Synthetic Substitute, Percutaneous Endoscopic Approach
0D124JA	Bypass Middle Esophagus to Jejunum with Synthetic Substitute, Percutaneous Endoscopic Approach
0D124JB	Bypass Middle Esophagus to Ileum with Synthetic Substitute, Percutaneous Endoscopic Approach
0D124K4	Bypass Middle Esophagus to Cutaneous with Nonautologous Tissue Substitute, Percutaneous Endoscopic Approach
0D124K6	Bypass Middle Esophagus to Stomach with Nonautologous Tissue Substitute, Percutaneous Endoscopic Approach
0D124K9	Bypass Middle Esophagus to Duodenum with Nonautologous Tissue Substitute, Percutaneous Endoscopic Approach
0D124KA	Bypass Middle Esophagus to Jejunum with Nonautologous Tissue Substitute, Percutaneous Endoscopic Approach
0D124KB	Bypass Middle Esophagus to Ileum with Nonautologous Tissue Substitute, Percutaneous Endoscopic Approach
0D124Z4	Bypass Middle Esophagus to Cutaneous, Percutaneous Endoscopic Approach
0D124Z6	Bypass Middle Esophagus to Stomach, Percutaneous Endoscopic Approach
0D124Z9	Bypass Middle Esophagus to Duodenum, Percutaneous Endoscopic Approach
0D124ZA	Bypass Middle Esophagus to Jejunum, Percutaneous Endoscopic Approach
0D124ZB	Bypass Middle Esophagus to Ileum, Percutaneous Endoscopic Approach
0D12874	Bypass Middle Esophagus to Cutaneous with Autologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D12876	Bypass Middle Esophagus to Stomach with Autologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D12879	Bypass Middle Esophagus to Duodenum with Autologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D1287A	Bypass Middle Esophagus to Jejunum with Autologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D1287B	Bypass Middle Esophagus to Ileum with Autologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D128J4	Bypass Middle Esophagus to Cutaneous with Synthetic Substitute, Via Natural or Artificial Opening Endoscopic
0D128J6	Bypass Middle Esophagus to Stomach with Synthetic Substitute, Via Natural or Artificial Opening Endoscopic
0D128J9	Bypass Middle Esophagus to Duodenum with Synthetic Substitute, Via Natural or Artificial Opening Endoscopic
0D128JA	Bypass Middle Esophagus to Jejunum with Synthetic Substitute, Via Natural or Artificial Opening Endoscopic

ICD-10 Procedure Code	Code Description
0D128JB	Bypass Middle Esophagus to Ileum with Synthetic Substitute, Via Natural or Artificial Opening Endoscopic
0D128K4	Bypass Middle Esophagus to Cutaneous with Nonautologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D128K6	Bypass Middle Esophagus to Stomach with Nonautologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D128K9	Bypass Middle Esophagus to Duodenum with Nonautologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D128KA	Bypass Middle Esophagus to Jejunum with Nonautologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D128KB	Bypass Middle Esophagus to Ileum with Nonautologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D128Z4	Bypass Middle Esophagus to Cutaneous, Via Natural or Artificial Opening Endoscopic
0D128Z6	Bypass Middle Esophagus to Stomach, Via Natural or Artificial Opening Endoscopic
0D128Z9	Bypass Middle Esophagus to Duodenum, Via Natural or Artificial Opening Endoscopic
0D128ZA	Bypass Middle Esophagus to Jejunum, Via Natural or Artificial Opening Endoscopic
0D128ZB	Bypass Middle Esophagus to Ileum, Via Natural or Artificial Opening Endoscopic
0D13074	Bypass Lower Esophagus to Cutaneous with Autologous Tissue Substitute, Open Approach
0D13076	Bypass Lower Esophagus to Stomach with Autologous Tissue Substitute, Open Approach
0D13079	Bypass Lower Esophagus to Duodenum with Autologous Tissue Substitute, Open Approach
0D1307A	Bypass Lower Esophagus to Jejunum with Autologous Tissue Substitute, Open Approach
0D1307B	Bypass Lower Esophagus to Ileum with Autologous Tissue Substitute, Open Approach
0D130J4	Bypass Lower Esophagus to Cutaneous with Synthetic Substitute, Open Approach
0D130J6	Bypass Lower Esophagus to Stomach with Synthetic Substitute, Open Approach
0D130J9	Bypass Lower Esophagus to Duodenum with Synthetic Substitute, Open Approach
0D130JA	Bypass Lower Esophagus to Jejunum with Synthetic Substitute, Open Approach
0D130JB	Bypass Lower Esophagus to Ileum with Synthetic Substitute, Open Approach
0D130K4	Bypass Lower Esophagus to Cutaneous with Nonautologous Tissue Substitute, Open Approach
0D130K6	Bypass Lower Esophagus to Stomach with Nonautologous Tissue Substitute, Open Approach
0D130K9	Bypass Lower Esophagus to Duodenum with Nonautologous Tissue Substitute, Open Approach
0D130KA	Bypass Lower Esophagus to Jejunum with Nonautologous Tissue Substitute, Open Approach
0D130KB	Bypass Lower Esophagus to Ileum with Nonautologous Tissue Substitute, Open Approach
0D130Z4	Bypass Lower Esophagus to Cutaneous, Open Approach
0D130Z6	Bypass Lower Esophagus to Stomach, Open Approach
0D130Z9	Bypass Lower Esophagus to Duodenum, Open Approach
0D130ZA	Bypass Lower Esophagus to Jejunum, Open Approach
0D130ZB	Bypass Lower Esophagus to Ileum, Open Approach

ICD-10 Procedure Code	Code Description
0D133J4	Bypass Lower Esophagus to Cutaneous with Synthetic Substitute, Percutaneous Approach
0D13474	Bypass Lower Esophagus to Cutaneous with Autologous Tissue Substitute, Percutaneous Endoscopic Approach
0D13476	Bypass Lower Esophagus to Stomach with Autologous Tissue Substitute, Percutaneous Endoscopic Approach
0D13479	Bypass Lower Esophagus to Duodenum with Autologous Tissue Substitute, Percutaneous Endoscopic Approach
0D1347A	Bypass Lower Esophagus to Jejunum with Autologous Tissue Substitute, Percutaneous Endoscopic Approach
0D1347B	Bypass Lower Esophagus to Ileum with Autologous Tissue Substitute, Percutaneous Endoscopic Approach

0DXE0Z5	Transfer Large Intestine to Esophagus, Open Approach
0DXE4Z5	Transfer Large Intestine to Esophagus, Percutaneous End

ICD-10 Malignant Tumor and Carcinoma in Situ Diagnosis Codes

ICD-10 Diagnosis Code	Code Description
C15.3	Malignant neoplasm of upper third of esophagus
C15.4	Malignant neoplasm of middle third of esophagus
C15.5	Malignant neoplasm of lower third of esophagus
C15.8	Malignant neoplasm of overlapping sites of esophagus
C15.9	Malignant neoplasm of esophagus, unspecified
C16.0	Malignancy of the cardio-esophageal junction
D00.1	Carcinoma in situ of esophagus

Pancreatic Resection for Cancer Measure Specifications

For pancreatic resection for cancer, there are two sets of ICD-10 codes for counting patient discharges. The first set of codes is to identify patients who have had the procedure. The second set of codes is to identify patients with a specific diagnosis.

Count the number of patients, ages 18 years and older, discharged with the following ICD-10 codes in any procedure field AND any of the following ICD-10 codes in any diagnosis field.

ICD-10 Pancreatic Resection for Cancer Procedure Codes

ICD-10 Procedure Code	Code Description
0DB90ZZ	Excision of Duodenum, Open Approach
0DB93ZZ	Excision of Duodenum, Percutaneous Approach
0DB94ZZ	Excision of Duodenum, Percutaneous Endoscopic Approach
0DB97ZZ	Excision of Duodenum, Via Natural or Artificial Opening
0DB98ZZ	Excision of Duodenum, Via Natural or Artificial Opening Endoscopic
0DT90ZZ	Resection of Duodenum, Open Approach
0DT94ZZ	Resection of Duodenum, Percutaneous Endoscopic Approach
0DT97ZZ	Resection of Duodenum, Via Natural or Artificial Opening
0DT98ZZ	Resection of Duodenum, Via Natural or Artificial Opening Endoscopic
0FBG0ZZ	Excision of Pancreas, Open Approach
0FBG3ZZ	Excision of Pancreas, Percutaneous Approach
0FBG4ZZ	Excision of Pancreas, Percutaneous Endoscopic Approach
0FBG8ZZ	Excision of Pancreas, Via Natural or Artificial Opening Endoscopic
0FTG0ZZ	Resection of Pancreas, Open Approach
0FTG4ZZ	Resection of Pancreas, Percutaneous Endoscopic Approach

ICD-10 Malignant Tumor Diagnosis Codes

ICD-10 Diagnosis Code	Code Description
C7A.1	Malignant poorly differentiated neuroendocrine tumors
C7A.8	Other malignant neuroendocrine tumors
C17.0	Malignant neoplasm of duodenum
C24.0	Malignant neoplasm of extrahepatic bile duct
C24.1	Malignant neoplasm of ampulla of Vater
C24.8	Malignant neoplasm of overlapping sites of biliary tract
C24.9	Malignant neoplasm of biliary tract, unspecified
C25.0	Malignant neoplasm of head of pancreas
C25.1	Malignant neoplasm of body of pancreas
C25.2	Malignant neoplasm of tail of pancreas
C25.3	Malignant neoplasm of pancreatic duct
C25.4	Malignant neoplasm of endocrine pancreas
C25.7	Malignant neoplasm of other parts of pancreas
C25.8	Malignant neoplasm of overlapping sites of pancreas
C25.9	Malignant neoplasm of pancreas, unspecified

Rectal Cancer Surgery Measure Specifications

For rectal cancer surgery, there are two sets of ICD-10 codes for counting patient discharges. The first set of codes is to identify patients who have had the procedure. The second set of codes is to identify patients with a specific diagnosis.

Count the number of patients, ages 18 years and older, discharged with the following ICD-10 codes in any procedure field AND any of the following ICD-10 codes in any diagnosis field.

ICD-10 Rectal Cancer Surgery Procedure Codes

ICD-10 Procedure Code	Code Description
0DBP0ZZ	Excision of Rectum, Open Approach
0DBP3ZZ	Excision of Rectum, Percutaneous Approach
0DBP4ZZ	Excision of Rectum, Percutaneous Endoscopic Approach
0DBP7ZZ	Excision of Rectum, Via Natural or Artificial Opening
0DBP8ZZ	Excision of rectum, via natural or artificial opening endoscopic
0DTP0ZZ	Resection of Rectum, Open Approach
0DTP4ZZ	Resection of Rectum, Percutaneous Endoscopic Approach
0DTP7ZZ	Resection of Rectum, Via Natural or Artificial Opening
0DTP8ZZ	Resection of Rectum, Via Natural or Artificial Opening Endoscopic

ICD-10 Malignant Tumor and Carcinoma in Situ Diagnosis Codes

ICD-10 Diagnosis Code	Code Description
C19	Malignant neoplasm of rectosigmoid junction
C20	Malignant neoplasm of rectum
C21.0	Malignant neoplasm of anus, unspecified
C21.1	Malignant neoplasm of anal canal
C21.2	Malignant neoplasm of cloacogenic zone
C21.8	Malignant neoplasm of overlapping sites of rectum, anus and anal canal
C78.5	Secondary malignant neoplasm of large intestine and rectum
D01.1	Carcinoma in situ of rectosigmoid junction
D01.2	Carcinoma in situ of rectum
D01.3	Carcinoma in situ of anus and anal canal

Bariatric Surgery for Weight Loss Measure Specifications

For bariatric surgery for weight loss, there are three sets of codes. One set of ICD-10 codes for counting inpatient discharges and one set of CPT codes for counting outpatient discharges. The first two sets of codes are to identify patients who have had the procedure. The third set of codes (ICD-10 diagnosis codes) is to identify patients with a specific diagnosis.

To determine the number of patients, ages 18 years and older, discharged for this procedure, hospitals have two options:

1. Count the number of patients, ages 18 years and older, discharged with the following ICD-10 codes or the CPT Codes in any procedure field AND any of the following ICD-10 codes in the **primary** diagnosis field. This method does not require chart review.
2. Count the number of patients, ages 18 years and older, discharged with the following ICD-10 codes or the CPT Codes in any procedure field AND any of the following ICD-10 codes in any diagnosis field. In addition, the procedure must have been done **explicitly for weight loss purposes** (i.e., presence of one of the diagnosis codes is necessary, but not sufficient for inclusion). This method requires chart review to ensure the procedure was performed explicitly for weight loss purposes.

ICD-10 Bariatric Surgery Procedure Codes

ICD-10 Procedure Code	Code Description
0D16079	Bypass Stomach to Duodenum with Autologous Tissue Substitute, Open Approach
0D1607A	Bypass Stomach to Jejunum with Autologous Tissue Substitute, Open Approach
0D1607B	Bypass Stomach to Ileum with Autologous Tissue Substitute, Open Approach
0D160J9	Bypass Stomach to Duodenum with Synthetic Substitute, Open Approach
0D160JA	Bypass Stomach to Jejunum with Synthetic Substitute, Open Approach
0D160JB	Bypass Stomach to Ileum with Synthetic Substitute, Open Approach
0D160K9	Bypass Stomach to Duodenum with Nonautologous Tissue Substitute, Open Approach
0D160KA	Bypass Stomach to Jejunum with Nonautologous Tissue Substitute, Open Approach
0D160KB	Bypass Stomach to Ileum with Nonautologous Tissue Substitute, Open Approach
0D160Z9	Bypass Stomach to Duodenum, Open Approach
0D160ZA	Bypass Stomach to Jejunum, Open Approach
0D160ZB	Bypass Stomach to Ileum, Open Approach
0D16479	Bypass Stomach to Duodenum with Autologous Tissue Substitute, Percutaneous Endoscopic Approach
0D1647A	Bypass Stomach to Jejunum with Autologous Tissue Substitute, Percutaneous Endoscopic Approach
0D1647B	Bypass Stomach to Ileum with Autologous Tissue Substitute, Percutaneous Endoscopic Approach
0D164J9	Bypass Stomach to Duodenum with Synthetic Substitute, Percutaneous Endoscopic Approach
0D164JA	Bypass Stomach to Jejunum with Synthetic Substitute, Percutaneous Endoscopic Approach
0D164JB	Bypass Stomach to Ileum with Synthetic Substitute, Percutaneous Endoscopic Approach
0D164K9	Bypass Stomach to Duodenum with Nonautologous Tissue Substitute, Percutaneous Endoscopic Approach
0D164KA	Bypass Stomach to Jejunum with Nonautologous Tissue Substitute, Percutaneous Endoscopic Approach

0D164KB	Bypass Stomach to Ileum with Nonautologous Tissue Substitute, Percutaneous Endoscopic Approach
0D164Z9	Bypass Stomach to Duodenum, Percutaneous Endoscopic Approach
0D164ZA	Bypass Stomach to Jejunum, Percutaneous Endoscopic Approach
0D164ZB	Bypass Stomach to Ileum, Percutaneous Endoscopic Approach
0D16879	Bypass Stomach to Duodenum with Autologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D1687A	Bypass Stomach to Jejunum with Autologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D1687B	Bypass Stomach to Ileum with Autologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D168J9	Bypass Stomach to Duodenum with Synthetic Substitute, Via Natural or Artificial Opening Endoscopic
0D168JA	Bypass Stomach to Jejunum with Synthetic Substitute, Via Natural or Artificial Opening Endoscopic
0D168JB	Bypass Stomach to Ileum with Synthetic Substitute, Via Natural or Artificial Opening Endoscopic
0D168K9	Bypass Stomach to Duodenum with Nonautologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D168KA	Bypass Stomach to Jejunum with Nonautologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D168KB	Bypass Stomach to Ileum with Nonautologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D168Z9	Bypass Stomach to Duodenum, Via Natural or Artificial Opening Endoscopic
0D168ZA	Bypass Stomach to Jejunum, Via Natural or Artificial Opening Endoscopic
0D168ZB	Bypass Stomach to Ileum, Via Natural or Artificial Opening Endoscopic
0DB60Z3	Excision of Stomach, Open Approach, Vertical
0DB60ZZ	Excision of Stomach, Open Approach
0DB63Z3	Excision of Stomach, Percutaneous Approach, Vertical
0DB63ZZ	Excision of Stomach, Percutaneous Approach
0DB64Z3	Excision of Stomach, Percutaneous Endoscopic Approach, Vertical
0DB64ZZ	Excision of Stomach, Percutaneous Endoscopic Approach

ICD-10 Morbid Obesity Diagnosis Codes

ICD-10 Diagnosis Code	Code Description
E66.01	Morbid (severe) obesity due to excess calories
E66.09	Other obesity due to excess calories
E66.1	Drug induced obesity
E66.2	Morbid (severe) obesity with alveolar hypoventilation
E66.3	Overweight
E66.8	Other obesity
E66.811	Obesity, class 1
E66.812	Obesity, class 2
E66.813	Obesity, class 3
E66.89	Other obesity not elsewhere classified
E66.9	Obesity, unspecified

ICD-10 Diagnosis Code	Code Description
Z68.35	Body mass index (BMI) 35.0-35.9, adult
Z68.36	Body mass index (BMI) 36.0-36.9, adult
Z68.37	Body mass index (BMI) 37.0-37.9, adult
Z68.38	Body mass index (BMI) 38.0-38.9, adult
Z68.39	Body mass index (BMI) 39.0-39.9, adult
Z68.41	Body mass index (BMI) 40.0-44.9, adult
Z68.42	Body mass index (BMI) 45.0-49.9, adult
Z68.43	Body mass index (BMI) 50.0-59.9, adult
Z68.44	Body mass index (BMI) 60.0-69.9, adult
Z68.45	Body mass index (BMI) 70 or greater, adult

CPT Bariatric Surgery for Weight Loss Procedure Codes

Leapfrog has provided a set of CPT codes for counting **patients** discharged from your hospital who have undergone the procedure during the reporting period on an outpatient basis.

CPT Codes are provided in downloadable Excel files on the Survey Dashboard. To access the files, click the CPT Code Workbook button next to Section 9. You will be required to complete the American Medical Association's Terms of Use before downloading the Excel file and using the individual CPT codes to query your EHR or billing system. You are only required to complete the Terms of Use once per Survey Cycle (April 1 – November 30).

The CPT Code Workbooks (Excel files) are labeled for Section 3A: Total Hip Replacement, Total Knee Replacement, and Bariatric Surgery for Weight Loss and Section 9C: Volume of Procedures. Please note, if you are part of a hospital system, each hospital will need to complete the Terms of Use. This is a requirement of the American Medical Association.

Using the CPT codes found for Bariatric Surgery for Weight Loss in the "Instructions" sheet, count the total number of adult (18 years of age or older) patients discharged for the procedures with the CPT codes listed AND any of the above ICD-10 diagnosis codes in the **primary** diagnosis field. The CPT codes can be in any procedure field.

Total Knee Replacement Measure Specifications

For total knee replacement, there are two sets of codes. One set of ICD-10 codes for counting inpatient discharges and one CPT code for counting outpatient discharges. The two sets of codes are to identify patients who have had the procedure.

To determine the number of patients, ages 18 years and older, discharged for this procedure, hospitals have two options:

- Count the number of patients, ages 18 years and older, discharged with any of the following ICD-10 codes in the **primary** procedure field or the CPT Code in any procedure field. This method does not require chart review. Hospitals should report on total knee replacement procedures performed in the outpatient locations included in Section 9: Outpatient Procedures.
- Count the number of patients, ages 18 years and older, discharged with any of the following ICD-10 codes or CPT Code in any procedure field. **For inpatient cases using ICD-10 codes, exclude any patients where the procedure was done as a revision** (i.e., the presence of one of the procedure codes is necessary, but not sufficient for inclusion). This method requires chart review of inpatient cases to ensure that revisions are not included. Chart review is not required for outpatient cases using the specified CPT Code. Hospitals should report on total knee replacement procedures performed in the outpatient locations included in Section 9: Outpatient Procedures.

ICD-10 Total Knee Replacement Procedure Codes

ICD10 Procedure Code	Code Description
0SRC0J9	Replacement of Right Knee Joint with Synthetic Substitute, Cemented, Open Approach
0SRC0JA	Replacement of Right Knee Joint with Synthetic Substitute, Uncemented, Open Approach
0SRC0JZ	Replacement of Right Knee Joint with Synthetic Substitute, Open Approach
0SRD0J9	Replacement of Left Knee Joint with Synthetic Substitute, Cemented, Open Approach
0SRD0JA	Replacement of Left Knee Joint with Synthetic Substitute, Uncemented, Open Approach
0SRD0JZ	Replacement of Left Knee Joint with Synthetic Substitute, Open Approach
0SRC069	Replacement of Right Knee Joint with Oxidized Zirconium on Polyethylene Synthetic Substitute, Cemented, Open Approach
0SRC06A	Replacement of Right Knee Joint with Oxidized Zirconium on Polyethylene Synthetic Substitute, Uncemented, Open Approach
0SRC06Z	Replacement of Right Knee Joint with Oxidized Zirconium on Polyethylene Synthetic Substitute, Open Approach
0SRD069	Replacement of Left Knee Joint with Oxidized Zirconium on Polyethylene Synthetic Substitute, Cemented, Open Approach
0SRD06A	Replacement of Left Knee Joint with Oxidized Zirconium on Polyethylene Synthetic Substitute, Uncemented, Open Approach
0SRD06Z	Replacement of Left Knee Joint with Oxidized Zirconium on Polyethylene Synthetic Substitute, Open Approach

CPT Total Knee Replacement Procedure Code

Leapfrog has provided a CPT code for counting **patients** discharged from your hospital who have undergone the procedure during the reporting period on an outpatient basis.

CPT Codes are provided in downloadable Excel files on the Survey Dashboard. To access the files, click the CPT Code Workbook button next to Section 9. You will be required to complete the American Medical Association's Terms of Use before downloading the Excel file and using the individual CPT codes to query your EHR or billing system. You are only required to complete the Terms of Use once per Survey Cycle (April 1 – November 30).

The CPT Code Workbooks (Excel files) are labeled for Section 3A: Total Hip Replacement, Total Knee Replacement, and Bariatric Surgery for Weight Loss and Section 9C: Volume of Procedures. Please note, if you are part of a hospital system, each hospital will need to complete the Terms of Use. This is a requirement of the American Medical Association.

Using the CPT code found for Total Knee Replacement in the "Instructions" sheet, count the total number of adult (18 years of age or older) patients discharged for the procedure with the CPT code listed. The CPT code can be in any procedure field.

Total Hip Replacement Measure Specifications

For total hip replacement, there are two sets of codes. One set of ICD-10 codes for counting inpatient discharges and one CPT code for counting outpatient discharges. The two sets of codes are to identify patients who have had the procedure.

To determine the number of patients, ages 18 years and older, discharged for this procedure, hospitals have two options:

- Count the number of patients, ages 18 years and older, discharged with any of the following ICD-10 codes in the **primary** procedure field or the CPT code in any procedure field. This method does not require chart review. Hospitals should report on total hip replacement procedures performed in the outpatient locations included in Section 9: Outpatient Procedures.
- Count the number of patients, ages 18 years and older, discharged with any of the following ICD-10 codes or the CPT code in any procedure field. **For inpatient cases using ICD-10 codes, exclude any patients where the procedure was done as a revision** (i.e., the presence of one of the procedure codes is necessary, but not sufficient for inclusion). This method requires chart review of inpatient cases to ensure that revisions are not included. Chart review is not required for outpatient cases using the specified CPT Code. Hospitals should report on total hip replacement procedures performed in the outpatient locations included in Section 9: Outpatient Procedures.

ICD-10 Total Hip Replacement Procedure Codes

ICD10 Procedure Code	Code Description
0SR9019	Replacement of Right Hip Joint with Metal Synthetic Substitute, Cemented, Open Approach
0SR901A	Replacement of Right Hip Joint with Metal Synthetic Substitute, Uncemented, Open Approach
0SR901Z	Replacement of Right Hip Joint with Metal Synthetic Substitute, Open Approach
0SR9029	Replacement of Right Hip Joint with Metal on Polyethylene Synthetic Substitute, Cemented, Open Approach
0SR902A	Replacement of Right Hip Joint with Metal on Polyethylene Synthetic Substitute, Uncemented, Open Approach
0SR902Z	Replacement of Right Hip Joint with Metal on Polyethylene Synthetic Substitute, Open Approach
0SR9039	Replacement of Right Hip Joint with Ceramic Synthetic Substitute, Cemented, Open Approach
0SR903A	Replacement of Right Hip Joint with Ceramic Synthetic Substitute, Uncemented, Open Approach
0SR903Z	Replacement of Right Hip Joint with Ceramic Synthetic Substitute, Open Approach
0SR9049	Replacement of Right Hip Joint with Ceramic on Polyethylene Synthetic Substitute, Cemented, Open Approach
0SR904A	Replacement of Right Hip Joint with Ceramic on Polyethylene Synthetic Substitute, Uncemented, Open Approach
0SR904Z	Replacement of Right Hip Joint with Ceramic on Polyethylene Synthetic Substitute, Open Approach
0SR90J9	Replacement of Right Hip Joint with Synthetic Substitute, Cemented, Open Approach
0SR90JA	Replacement of Right Hip Joint with Synthetic Substitute, Uncemented, Open Approach
0SR90JZ	Replacement of Right Hip Joint with Synthetic Substitute, Open Approach
0SRA009	Replacement of Right Hip Joint, Acetabular Surface with Polyethylene Synthetic Substitute, Cemented, Open Approach
0SRA00A	Replacement of Right Hip Joint, Acetabular Surface with Polyethylene Synthetic Substitute, Uncemented, Open Approach

0SRA00Z	Replacement of Right Hip Joint, Acetabular Surface with Polyethylene Synthetic Substitute, Open Approach
0SRA019	Replacement of Right Hip Joint, Acetabular Surface with Metal Synthetic Substitute, Cemented, Open Approach
0SRA01A	Replacement of Right Hip Joint, Acetabular Surface with Metal Synthetic Substitute, Uncemented, Open Approach
0SRA01Z	Replacement of Right Hip Joint, Acetabular Surface with Metal Synthetic Substitute, Open Approach
0SRA039	Replacement of Right Hip Joint, Acetabular Surface with Ceramic Synthetic Substitute, Cemented, Open Approach
0SRA03A	Replacement of Right Hip Joint, Acetabular Surface with Ceramic Synthetic Substitute, Uncemented, Open Approach
0SRA03Z	Replacement of Right Hip Joint, Acetabular Surface with Ceramic Synthetic Substitute, Open Approach
0SRA0J9	Replacement of Right Hip Joint, Acetabular Surface with Synthetic Substitute, Cemented, Open Approach
0SRA0JA	Replacement of Right Hip Joint, Acetabular Surface with Synthetic Substitute, Uncemented, Open Approach
0SRA0JZ	Replacement of Right Hip Joint, Acetabular Surface with Synthetic Substitute, Open Approach
0SRB019	Replacement of Left Hip Joint with Metal Synthetic Substitute, Cemented, Open Approach
0SRB01A	Replacement of Left Hip Joint with Metal Synthetic Substitute, Uncemented, Open Approach
0SRB01Z	Replacement of Left Hip Joint with Metal Synthetic Substitute, Open Approach
0SRB029	Replacement of Left Hip Joint with Metal on Polyethylene Synthetic Substitute, Cemented, Open Approach
0SRB02A	Replacement of Left Hip Joint with Metal on Polyethylene Synthetic Substitute, Uncemented, Open Approach
0SRB02Z	Replacement of Left Hip Joint with Metal on Polyethylene Synthetic Substitute, Open Approach
0SRB039	Replacement of Left Hip Joint with Ceramic Synthetic Substitute, Cemented, Open Approach
0SRB03A	Replacement of Left Hip Joint with Ceramic Synthetic Substitute, Uncemented, Open Approach
0SRB03Z	Replacement of Left Hip Joint with Ceramic Synthetic Substitute, Open Approach
0SRB049	Replacement of Left Hip Joint with Ceramic on Polyethylene Synthetic Substitute, Cemented, Open Approach
0SRB04A	Replacement of Left Hip Joint with Ceramic on Polyethylene Synthetic Substitute, Uncemented, Open Approach
0SRB04Z	Replacement of Left Hip Joint with Ceramic on Polyethylene Synthetic Substitute, Open Approach
0SRB0J9	Replacement of Left Hip Joint with Synthetic Substitute, Cemented, Open Approach
0SRB0JA	Replacement of Left Hip Joint with Synthetic Substitute, Uncemented, Open Approach
0SRB0JZ	Replacement of Left Hip Joint with Synthetic Substitute, Open Approach
0SRE009	Replacement of Left Hip Joint, Acetabular Surface with Polyethylene Synthetic Substitute, Cemented, Open Approach
0SRE00A	Replacement of Left Hip Joint, Acetabular Surface with Polyethylene Synthetic Substitute, Uncemented, Open Approach
0SRE00Z	Replacement of Left Hip Joint, Acetabular Surface with Polyethylene Synthetic Substitute, Open Approach
0SRE019	Replacement of Left Hip Joint, Acetabular Surface with Metal Synthetic Substitute, Cemented, Open Approach

0SRE01A	Replacement of Left Hip Joint, Acetabular Surface with Metal Synthetic Substitute, Uncemented, Open Approach
0SRE01Z	Replacement of Left Hip Joint, Acetabular Surface with Metal Synthetic Substitute, Open Approach
0SRE039	Replacement of Left Hip Joint, Acetabular Surface with Ceramic Synthetic Substitute, Cemented, Open Approach
0SRE03A	Replacement of Left Hip Joint, Acetabular Surface with Ceramic Synthetic Substitute, Uncemented, Open Approach
0SRE03Z	Replacement of Left Hip Joint, Acetabular Surface with Ceramic Synthetic Substitute, Open Approach
0SRE0J9	Replacement of Left Hip Joint, Acetabular Surface with Synthetic Substitute, Cemented, Open Approach
0SRE0JA	Replacement of Left Hip Joint, Acetabular Surface with Synthetic Substitute, Uncemented, Open Approach
0SRE0JZ	Replacement of Left Hip Joint, Acetabular Surface with Synthetic Substitute, Open Approach
0SR9069	Replacement of Right Hip Joint with Oxidized Zirconium on Polyethylene Synthetic Substitute, Cemented, Open Approach
0SR906A	Replacement of Right Hip Joint with Oxidized Zirconium on Polyethylene Synthetic Substitute, Uncemented, Open Approach
0SR906Z	Replacement of Right Hip Joint with Oxidized Zirconium on Polyethylene Synthetic Substitute, Open Approach
0SRB069	Replacement of Left Hip Joint with Oxidized Zirconium on Polyethylene Synthetic Substitute, Cemented, Open Approach
0SRB06A	Replacement of Left Hip Joint with Oxidized Zirconium on Polyethylene Synthetic Substitute, Uncemented, Open Approach
0SRB06Z	Replacement of Left Hip Joint with Oxidized Zirconium on Polyethylene Synthetic Substitute, Open Approach

CPT Total Hip Replacement Procedure Code

Leapfrog has provided a CPT code for counting **patients** discharged from your hospital who have undergone the procedure during the reporting period on an outpatient basis.

CPT Codes are provided in downloadable Excel files on the Survey Dashboard. To access the files, click the CPT Code Workbook button next to Section 9. You will be required to complete the American Medical Association's Terms of Use before downloading the Excel file and using the individual CPT codes to query your EHR or billing system. You are only required to complete the Terms of Use once per Survey Cycle (April 1 – November 30).

The CPT Code Workbooks (Excel files) are labeled for Section 3A: Total Hip Replacement, Total Knee Replacement, and Bariatric Surgery for Weight Loss and Section 9C: Volume of Procedures. Please note, if you are part of a hospital system, each hospital will need to complete the Terms of Use. This is a requirement of the American Medical Association.

Using the CPT code found for Total Hip Replacement in the "Instructions" sheet, count the total number of adult (18 years of age or older) patients discharged for the procedure with the CPT code listed. The CPT code can be in any procedure field.

Norwood Procedure Measure Specifications

For Norwood procedure, there are two sets of ICD-10 procedure codes for counting patient discharges. For a patient to be counted, they must have at least one ICD-10 procedure code from each list.

The first set of codes is to identify patients who have had an arch repair. The second set of codes is to identify patients who have had a shunt.

Count the number of patients, ages 17 years and younger, discharged with at least one of the following ICD-10 procedure codes from each list in any procedure field (i.e., each patient discharge will need to have at least one ICD-10 procedure code from the arch repair set AND at least one ICD-10 procedure code from the shunt set). Both procedures would need to be done as part of the same operative session.

ICD-10 Arch Repair Procedure Codes

ICD-10 Procedure Code	Code Description
02UX07Z	Supplement Thoracic Aorta, Ascending/Arch with Autologous Tissue Substitute, Open Approach
02UX0JZ	Supplement Thoracic Aorta, Ascending/Arch with Synthetic Substitute, Open Approach
02UX0KZ	Supplement Thoracic Aorta, Ascending/Arch with Nonautologous Tissue Substitute, Open Approach

ICD-10 Shunt Procedure Codes

ICD-10 Procedure Code	Code Description
021K08P	Bypass Right Ventricle to Pulmonary Trunk with Zooplastic Tissue Substitute, Open Approach
021K08Q	Bypass Right Ventricle to Right Pulmonary Artery with Zooplastic Tissue Substitute, Open Approach
021K08R	Bypass Right Ventricle to Left Pulmonary Artery with Zooplastic Tissue Substitute, Open Approach
021K09P	Bypass Right Ventricle to Pulmonary Trunk with Autologous Venous Tissue, Open Approach
021K09Q	Bypass Right Ventricle to Right Pulmonary Artery with Autologous Venous Tissue, Open Approach
021K09R	Bypass Right Ventricle to Right Pulmonary Artery with Autologous Venous Tissue, Open Approach
021K0AP	Bypass Right Ventricle to Pulmonary Trunk with Autologous Arterial Tissue, Open Approach
021K0AQ	Bypass Right Ventricle to Right Pulmonary Artery with Autologous Arterial Tissue, Open Approach
021K0AR	Bypass Right Ventricle to Right Pulmonary Artery with Autologous Arterial Tissue, Open Approach
021K0JP	Bypass Right Ventricle to Pulmonary Trunk with Synthetic Substitute, Open Approach
021K0JQ	Bypass Right Ventricle to Right Pulmonary Artery with Synthetic Substitute, Open Approach
021K0JR	Bypass Right Ventricle to Left Pulmonary Artery with Synthetic Substitute, Open Approach
021K0KP	Bypass Right Ventricle to Pulmonary Trunk with Nonautologous Tissue Substitute, Open Approach
021K0KQ	Bypass Right Ventricle to Right Pulmonary Artery with Nonautologous Tissue Substitute, Open Approach

ICD-10 Procedure Code	Code Description
021K0KR	Bypass Right Ventricle to Right Pulmonary Artery with Nonautologous Tissue Substitute, Open Approach
021Q08A	Bypass Right Pulmonary Artery from Innominate Artery with Zooplastic Tissue, Open Approach
021Q08B	Bypass Right Pulmonary Artery from Subclavian with Zooplastic Tissue, Open Approach
021Q08D	Bypass Right Pulmonary Artery from Carotid with Zooplastic Tissue, Open Approach
021Q09A	Bypass Right Pulmonary Artery from Innominate Artery with Autologous Venous Tissue, Open Approach
021Q09B	Bypass Right Pulmonary Artery from Subclavian with Autologous Venous Tissue, Open Approach
021Q09D	Bypass Right Pulmonary Artery from Carotid with Autologous Venous Tissue, Open Approach
021Q0AA	Bypass Right Pulmonary Artery from Innominate Artery with Autologous Arterial Tissue, Open Approach
021Q0AB	Bypass Right Pulmonary Artery from Subclavian with Autologous Arterial Tissue, Open Approach
021Q0AD	Bypass Right Pulmonary Artery from Carotid with Autologous Arterial Tissue, Open Approach
021Q0JA	Bypass Right Pulmonary Artery from Innominate with Synthetic Substitute, Open Approach
021Q0JB	Bypass Right Pulmonary Artery from Subclavian with Synthetic Substitute, Open Approach
021Q0JD	Bypass Right Pulmonary Artery from Carotid with Synthetic Substitute, Open Approach
021Q0KA	Bypass Right Pulmonary Artery from Innominate Artery with Nonautologous Tissue Substitute, Open Approach
021Q0KB	Bypass Right Pulmonary Artery from Subclavian with Nonautologous Tissue Substitute, Open Approach
021Q0KD	Bypass Right Pulmonary Artery from Carotid with Nonautologous Tissue Substitute, Open Approach
021V0ZP	Bypass Superior Vena Cava to Pulmonary Trunk, Open Approach
021V0ZQ	Bypass Superior Vena Cava to Right Pulmonary Artery, Open Approach
021V0ZR	Bypass Superior Vena Cava to Left Pulmonary Artery, Open Approach

Safe Surgery Checklist for Adult and Pediatric Complex Surgery Measure Specifications

Important Note: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Source: The Leapfrog Group, WHO Surgical Safety Checklist and Implementation Manual , AHRQ Endoscopy Checklist
Reporting Period: 12 months Latest 12-month period prior to submission of this section of the Survey
Safe Surgery Checklist Workbook (Excel) To complete the data collection and respond to questions #6-9, hospitals should download the Safe Surgery Checklist Workbook (Excel). This workbook includes five tabs: Instructions, Section 3B (Complex Surgery), Section 3B – Data Entry, Section 9D (Outpatient Procedures), Section 9D – Data Entry. The Section 3B tabs can be used to complete the safe surgery checklist audits for this subsection and to calculate the response for question #9. The workbook is available on the Survey Materials Webpage.
Sampling: Hospitals that perform procedures in both Section 3A and Section 9C, and submit both Section 3 and 9, can randomly sample 15 patients (who had one of the procedures included in Section 3A) and measure and report adherence to the safe surgery checklist based on that sample. Hospitals that ONLY perform the procedures in Section 3A, or that ONLY submit Section 3, must randomly sample 30 patients (who had one of the procedures included in Section 3A) and measure and report adherence to the safe surgery checklist based on that sample. When sampling from a larger population of cases, hospitals that perform multiple procedures (e.g., bariatric surgery for weight loss, total hip replacement, total knee replacement, etc.) included in Section 3A and hospitals that perform procedures for both adult and pediatric patients (e.g., the Norwood Procedures) should obtain a representative sample (i.e., include patients who underwent different procedures and include both adult and pediatric patients, if applicable). <i>Free-standing pediatric hospitals that perform the Norwood Procedure and hospitals that reported a combined total hospital volume of less than the sufficient sample for all the procedures in Section 3A can sample any patients that had a procedure performed under general anesthesia.</i>
Question #6: Did your hospital perform an audit (either in-person or via the medical record or other EHR data) on a sufficient sample of patients who underwent a procedure included in Section 3A and measure adherence to the safe surgery checklist? To respond “yes” to question #6, hospitals must measure and document whether all the elements in questions #3, #4, and #5 were verbalized in the presence of the appropriate personnel for each sampled case. Hospitals that completed the audit should respond “yes” to this question regardless of whether the adherence to the checklist was 100%. Hospitals will report on adherence to the checklist in question #9.
Question #7: How many cases were included in the audit from question #6? Hospitals that perform procedures in both Section 3A and Section 9C, and submit both Section 3 and 9, can randomly sample 15 patients (who had one of the procedures included in Section 3A) and measure and report adherence to the safe surgery checklist based on that sample. Hospitals that ONLY perform the procedures in Section 3A, or that ONLY submit Section 3, must randomly sample 30 patients (who had one of the procedures included in Section 3A) and measure and report adherence to the safe surgery checklist based on that sample.

Question #8: What method was used to perform the audit on a sufficient sample in question #6?

Hospitals can only perform a retrospective audit by reviewing medical records or EHR data if adherence to the safe surgery checklist is clearly documented in the medical record or EHR and the documentation clearly demonstrates that each element was verbalized in the presence of the appropriate personnel. If hospitals cannot clearly determine whether (a) the checklist element was verbalized and (b) that the appropriate personnel were present via a retrospective audit, an in-person observational audit must be completed.

Hospitals performing in-person observational audits must do so in the latest 12 months prior to Survey submission.

Hospitals performing retrospective audits must audit cases from the latest 12 months prior to Survey submission but can also review any case from Section 3A that was performed in the latest calendar year prior to Survey submission.

Question #9: Based on your hospital's audit (either in-person or via the medical record or other EHR data) on a sufficient sample of patients who underwent a procedure included in Section 3A, what was your hospital's documented rate of adherence to the safe surgery checklist (i.e., what percentage of the sampled cases had all elements in questions #3, #4, and #5 completed)?

Based on the audit completed for question #6, determine the total number of patient audits where all elements of the safe surgery checklist (included in questions #3, #4, and #5) were read aloud in the presence of the appropriate personnel 1) before the induction of anesthesia, 2) before the skin incision and/or the procedure began, and 3) before the patient left the operating and/or procedure room.

Included cases:

- The patient audit shows that all elements of the safe surgery checklist, at all three time points, were read aloud in the presence of the appropriate personnel.

Excluded cases:

- The patient audit does not demonstrate that all elements of the safe surgery checklist were read aloud in the presence of the appropriate personnel (i.e., one or more elements of the checklist were not read aloud or the appropriate personnel were not present during the checklist).
- The patient audit does not demonstrate that the safe surgery checklist was read aloud in the presence of the appropriate personnel at all three time points (i.e., before anesthesia, before the skin incision, and before the patient leaves).

Important Note: If a Safe Surgery Checklist element includes the qualifier "if applicable," hospitals should determine if that element of the checklist was applicable to the patient and procedure being performed. If the element was determined to be "not applicable" to the patient and procedure, it does not count against the total adherence. For example, if your hospital performed a bariatric surgery for weight loss, the availability of a device on-site would not be applicable. Therefore, when completing the Safe Surgery Checklist Workbook for this patient, indicate N/A for that element (device on-site) and your hospital would be able to count that case as adherent.

See [FAQs](#) for additional information about responding to the questions in this section.

Section 3: Adult and Pediatric Complex Surgery Frequently Asked Questions (FAQs)

General Questions

1. Does this section apply to critical access hospitals?

Yes. In general, critical access hospitals do not perform many of the procedures that are included in this section, but if the critical access hospital does perform the procedure, the standards still apply.

2. Should we select a procedure from the list in Section 3A question #2 if we only perform that procedure on an outpatient basis?

Hospitals that only perform total hip replacements, total knee replacements, and/or bariatric surgery for weight loss on an outpatient basis should select and report on those procedures in Section 3A.

Otherwise, hospitals should not select and report on the remaining eight procedures if the procedures are always scheduled with the intention of the patient being released on the same day.

If some of the procedures are scheduled with the intention of the patient being admitted and staying in the hospital overnight, the hospital should report on performing the procedure in question #2 and then **ONLY** report on the total number of patients discharged following an inpatient stay.

3. My hospital has a tumor center that only performs total hip replacements and total knee replacements as they come up during a tumor removal surgery, should we select these procedures from the list in Section 3A question #2?

If your hospital has a tumor center where orthopedic tumor surgeries are performed and the **ONLY** total hip replacement and/or total knee replacement procedures ever done at that hospital are for the treatment of the tumor, you should not select and report on total hip replacements or total knee replacements in Section 3A.

Hospital Volume FAQs

4. How should hospitals calculate volume using a 24-month annual average?

To report on a 24-month annual average, calculate the total volume over the past 24 months, and then divide by 2 (i.e., the volume of year one plus the volume of year 2 divided by two equals the 24-month annual average).

5. Can we count patients who have had one of the procedures listed in Section 3A in combination with another procedure not listed in Section 3A?

Yes, hospitals should count all patients that meet the criteria specified in the Hospital and Surgeon Volume Measure Specifications. For example, if a patient has a CABG and a mitral valve repair done at the same time, the hospital should count the patient when calculating total volume for mitral valve repair and replacement.

6. When counting patients, should we only include those patients who had the procedure performed on a scheduled basis?

No. Once a hospital selects a procedure from the list in question #2, they should use the measure specifications for each procedure to count all patients that meet the criteria. This includes patients who had the procedure performed urgently.

7. If a hospital elects to begin a new service line of procedures, how should the hospital report its volume and surgeon volumes while establishing the new line?

Leapfrog gives hospitals an 18-month grace period before having to report on hospital and surgeon volume for a new procedure. From the day that the hospital performs the procedure for the first time, the hospital and its surgeons will have 18 months to reach the annual volume standard. During this period, the hospital does not have to report its procedure volumes for the hospital or its surgeons. However, once the hospital reaches the end of the 18-month grace period, it must report its hospital and surgeon procedure volume.

8. How should we deal with a temporary drop in volume due to losing a surgeon's service?

To accommodate fluctuations in hospital volumes, hospitals have the option of reporting on their average case volumes over a 24-month period.

9. Can we count minimally invasive and/or robotic Mitral Valve Repair and Replacement procedures towards our hospital's volume?

Yes, the ICD-10 codes Leapfrog has provided for this procedure will capture minimally invasive and/or robotic MVRR procedures in the hospital's count as these are the codes used for those cases.

10. Our hospital has a free-standing outpatient surgery center that shares our license and/or CMS Certification Number (CCN). Many of our same day total hip replacements, total knee replacements, and bariatric surgery for weight loss procedures are performed there. Can we include these procedures in our total hospital volume when responding to question #3 in Section 3A?

Yes, hospitals may count patient discharges with the appropriate CPT procedure code during the reporting period from hospital outpatient departments that share your hospital's license and/or CMS Certification Number (CCN), including, but not limited to free-standing surgery centers and hospital outpatient departments.

Surgeon Volume FAQs**11. Does the specific procedure and minimum annual surgeon volume standard listed need to be included in our process for privileging surgeons?**

Yes. Hospitals must ensure that the specific procedure (as defined using the ICD-10 and CPT procedure codes) and minimum annual surgeon volume standard are included in your process for privileging surgeons. Diagnosis codes can be ignored.

12. Does our privileging process for surgeons have to include the annual surgeon volume standard for initial privileging only or ongoing/renewal of privileging as well?

Both. Leapfrog's minimum annual surgeon volume standards should be fully integrated into your hospital's process for privileging surgeons, including both initial and ongoing privileging. There are two exceptions:

- a. Surgeons who have just finished training: see [FAQ #14](#) below.
- b. Surgeons who were not active for the entire reporting period: see [FAQ #15](#) below.

13. When counting annual surgeon volume for the purposes of privileging, should we consider procedures performed by the surgeon at other hospitals?

Yes. When determining whether a surgeon has met or has exceeded Leapfrog's minimum annual surgeon volume standard, we expect that hospitals will consider total experience in the privileging process – this would include procedures performed within the reporting period at different facilities. It is our understanding that through the [OPPE process](#), hospitals have access to total surgeon volume, including the number of procedures performed at other hospitals.

14. For determining surgeon volume for the purposes of privileging, how should we count procedures that involve surgeons who have just finished training and are building up their experience?

Surgeons who have just finished their training should receive a 24-month grace period to build up their experience. After that point, the surgeon's volume should be tracked and included in privileging decisions. The procedures performed by this surgeon during the reporting period should still be counted towards the hospital's volume total, as the broader staff still had the experience with the procedure.

15. If a surgeon was not "active" during the entire reporting period (e.g., just hired, sabbatical, illness, etc.), should they be included when responding to question #5?

If a surgeon was absent for an extended time during the reporting period, the procedures performed by this surgeon during the reporting period should still be counted towards the hospital's procedure total (question #3). However, the surgeon would not need to be considered when responding to question #5 regarding whether your hospital's process for privileging includes the surgeon having to meet Leapfrog's minimum annual surgeon volume standards until they have been active again for an entire reporting period (likely the next year).

16. When counting surgeon volume for the purposes of privileging, if a procedure is completed by two surgeons (i.e., an assistant or co-surgeon) would they both be able to count the case?

If a surgeon assists another surgeon or is a co-surgeon during a procedure, the procedure should NOT count for both surgeons' procedure totals. The case should be applied to a single surgeon.

17. When determining which surgeons should be required to meet Leapfrog's minimum annual surgeon volume standards for the process of privileging, should surgeons who only ever perform a procedure in emergency circumstances and never perform the procedure on a scheduled basis be included?

For the purposes of reporting on question #5 in Section 3A, hospitals can exclude surgeons who will only ever perform a procedure in emergency circumstances if they never perform the procedure on a scheduled basis.

However, for the purposes of reporting on question #3 in Section 3A, hospitals should count all patients discharged with the relevant procedure or diagnosis for those procedures indicated in question #2 in Section 3A. See FAQ #6.

Safe Surgery Checklist for Adult and Pediatric Complex Surgery FAQs**18. What 12-month reporting period should be used when reporting on this section?**

When responding to the questions in Section 3B, hospitals should enter the month in which they complete their observational in-person or retrospective EHR review audits. If your hospital does not perform an audit, enter the month in which you are completing the Survey.

19. Does the safe surgery checklist referenced in Section 3B apply to all procedures, including endoscopies?

Yes, it applies to all procedures in Section 3A. If your hospital does not utilize a safe surgery checklist for all procedures in Section 3A, including endoscopies, respond "no" to question #2.

20. Can different elements of the "Before the induction of anesthesia" checklist (question #3) be performed in different places?

Yes, hospitals may perform some elements of the pre-anesthesia checklist outside of the operating room. Hospitals may read aloud the following elements in a pre-procedure (preop) area: Patient ID, Confirmation of procedure, Patient consent, Site marked, if applicable, and Allergies assessed.

Hospitals should not remove conversation prompts as it is harmful to the purpose of the checklist and should continue debriefing and requiring participation of the surgical team members in key

moments.

21. Do we need to perform a “clinical team introduction” if the team already knows each other and/or will be in the operating room together all day?

Yes. Even if a clinical team knows each other they must perform an introduction stating their name and role at the first procedure of the day. They do not need to reintroduce themselves for the remaining procedures but should confirm everyone was introduced beforehand. However, if any team members change between operations, introductions must be performed again.

22. Do the Safe Surgery Checklist components included in questions #3, #4, and #5 need to be in one document that would align with the WHO example or can they be in different documents (i.e., pre-anesthesia notes, surgeon H&P, and pre-surgical checklists, etc.)?

It is possible to have separate checklists for each phase of the surgical procedure (i.e., before the induction of anesthesia, before the skin incision and/or before the procedure begins, and before the patient leaves the operating or procedure room). However, each individual component included in questions #3, #4, and #5 should be listed on the checklist(s) and hospitals should document whether the components were read aloud at the appropriate time with the appropriate members of the surgical team present.

23. How is “whole surgical team” defined?

“Whole surgical team” is comprised of the surgeons, anesthesia professionals, nurses, technicians, and other operating room personnel involved in surgery. This is based off the World Alliance for Patient Safety Implementation Manual Surgical Safety Checklist (First Edition).

Page Intentionally Left Blank

SECTION 4: MATERNITY CARE

This section includes questions and reference information for Section 4: Maternity Care. Please carefully review the questions, endnotes, and reference information (e.g., measure specifications, notes, and frequently asked questions) before you begin. Failure to review the reference information could result in inaccurate responses.

Section 4: Maternity Care

Maternity Care Fact Sheet and Bibliography:

<https://ratings.leapfroggroup.org/measure/hospital/2025/maternity-care>

Hospitals that did not deliver newborns during the reporting period or did not have an open labor and delivery unit during the entire reporting period should select “no” in question #2 and move on to the Affirmation of Accuracy. Your hospital’s results will be displayed as “Does Not Apply” on Leapfrog’s public reporting website.

Section 4 includes questions about maternity care volume and services, cesarean birth, episiotomy, newborn bilirubin screening, and DVT prophylaxis for women undergoing cesarean delivery. The section also includes questions about high-risk deliveries, including volume and outcomes. The subsection on cesarean birth (4C) includes questions about cesarean births stratified by race/ethnicity that will not be scored or publicly reported, however, responses will be used for confidential reporting on the [Hospital Details Page](#) in 2025.

Each hospital achieving the standard for Cesarean Birth:

Meets or is better than the 23.6% target for performance on the nationally endorsed outcome measure.

Each hospital achieving the standard for Episiotomy:

Meets or is better than the 5.0% target for performance on the nationally endorsed outcome measure.

Each hospital achieving the standard for Newborn Bilirubin Screening Prior to Discharge:

Meets or exceeds the 90% target for the process measure of care.

Each hospital achieving the standard for Appropriate DVT Prophylaxis in Women Undergoing Cesarean Delivery:

Meets or exceeds the 90% target for the process measure of care.

Each hospital achieving the standard for High-Risk Deliveries:

Achieves favorable hospital volume characteristics for high-risk deliveries by admitting 50 or more very low birth weight newborns/year to its neonatal ICU,

OR

Achieves favorable outcomes for high-risk deliveries as measured by the Vermont Oxford Network.

Download the 2025 Leapfrog Hospital Survey Scoring Algorithm on the [Scoring and Results webpage](#).

4A: Maternity Care Volume and Services

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Notes:

Note 1: This section is only applicable to hospitals that deliver newborn babies. Hospitals that do not deliver newborn babies should select "no" in question #2 in 4A and move on to the Affirmation of Accuracy. Your hospital's results will be displayed as "Does Not Apply" on Leapfrog's public reporting website.

Note 2: Hospitals must use the same 12-month reporting period for all subsections in Section 4: Maternity Care, except for Section 4A questions #4-9 and Section 4B questions #6-8.

Note 3: Maternity Care Services (questions #4-9) will not be scored but will be used in public reporting.

Specifications: See [Maternity Care Volume and Services Measure Specifications](#) in the Reference Information beginning on page 163.

Reporting Period: 12 months

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Note: As a reminder, the [Corrections Period](#) (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

Maternity Care Volume

1) 12-month reporting period used:	☐ 01/01/2024 – 12/31/2024 ☐ 07/01/2024 – 06/30/2025
2) Did the hospital deliver newborn babies during the reporting period? <i>If "no" or "yes, but unit is now closed or wasn't open for the entire reporting period," skip the remaining questions in Section 4, including all subsections, and go to the Affirmation of Accuracy. The hospital will be scored as "Does Not Apply."</i>	☐ Yes ☐ No ☐ Yes, but unit is now closed or wasn't open for the entire reporting period
3) Total number of live births (i.e., liveborn infants) at this hospital location for the reporting period. <i>If fewer than 10 cases, skip the remaining questions in Section 4, including all subsections, and go to the Affirmation of Accuracy. The hospital will be scored as "Unable to Calculate Score" or "Does Not Apply."</i>	_____

Maternity Care Services

Reporting Period: Answer questions #4-9 based on the practices currently in place at the time you submit this section of the Survey.

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

4) Does your hospital have certified nurse-midwives and/or certified midwives deliver newborns?	☐ Yes ☐ No
5) Does your hospital use doulas for labor and delivery? <i>Select all that apply.</i>	☐ Yes, the hospital employs or contracts with doulas ☐ Yes, the hospital allows patients to bring their own doulas ☐ No
6) Does your hospital offer breastfeeding/lactation consultants? <i>Select all that apply.</i>	☐ Yes, in the hospital ☐ Yes, in the outpatient setting ☐ Yes, at home after discharge ☐ No
7) Does your hospital offer patients the opportunity to attempt vaginal birth after cesarean section (VBAC)?	☐ Yes ☐ No
8) Does your hospital offer postpartum tubal ligation during the labor and delivery admission?	☐ Yes ☐ No
9) Has your hospital adopted a policy that prevents nonmedically indicated early elective deliveries (before 39 completed weeks gestation) that includes all the following: • Written standards for when an early elective delivery is, and is not, appropriate based on ACOG and national guidelines (i.e., The Joint Commission), • Written protocols for the medical director, or other designated physician, to review and approve an early elective delivery when medically indicated based on ACOG and national guidelines, and • Written protocols for staff to follow when scheduling an early elective delivery if approved by the medical director or other designated physician?	☐ Yes ☐ No

4B: Cesarean Birth

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Notes:

Note 1: Hospitals must use the same 12-month reporting period for all subsections in Section 4: Maternity Care, except for Section 4B questions #6-8.

Note 2: Cesarean Birth Stratified by Race/Ethnicity (questions #6-8) will not be scored or publicly reported but will be used for confidential reporting on the Hospital Details Page.

Specifications: See [Cesarean Birth Measure Specifications](#) in the Reference Information beginning on page 164.

Reporting Period: 12 months

Answer questions #1-5 based on all cases (or a sufficient sample of them for questions #2-3)

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Note: As a reminder, the [Corrections Period](#) (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

Sufficient Sample: See [Cesarean Birth Measure Specifications](#) for instructions for identifying a sufficient sample for questions #2 and #3.

1) 12-month reporting period used:	☐ 01/01/2024 – 12/31/2024 ☐ 07/01/2024 – 06/30/2025
2) Total number of nulliparous mothers (or sufficient sample of them) that delivered a live term singleton newborn in the vertex presentation with ≥ 37 weeks of gestation completed, with Excluded Populations removed: <i>If fewer than 10 cases met the criteria for the denominator, skip questions #3-8 and continue to the next subsection. The hospital will be scored as "Unable to Calculate Score."</i>	_____
3) Total number of mothers indicated in question #2 that had their newborn delivered via cesarean section:	_____
4) Do the responses in questions #2 and #3 above represent a sample of cases?	☐ Yes ☐ No
5) If "yes" to question #4, did your hospital sample using The Joint Commission's sampling algorithm or Leapfrog's sampling instructions, as provided in the Maternity Care Reference Information?	☐ The Joint Commission ☐ The Leapfrog Group

Cesarean Birth Stratified by Race/Ethnicity**Reporting Period: 24 months**

Answer questions #6-8 based on all cases

- Surveys submitted prior to September 1:
 - 01/01/2023 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2023 – 06/30/2025

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

6) 24-month reporting period used:		☐ 01/01/2023 – 12/31/2024 ☐ 07/01/2023 – 06/30/2025
7) Did your hospital stratify NTSV cesarean births by race/ethnicity for the reporting period using the measure specifications provided and do you choose to report those data to this Survey? <i>If "no" to question #7, skip question #8 and continue to the next subsection.</i>		☐ Yes ☐ No
8) Enter your hospital's responses below by race/ethnicity: <i>If the number of cases for a race/ethnicity is less than 10 (in column a), skip column b and then move to the next category. If zero, enter "0" in column a.</i>		
Race/ethnicity	a) Total number of nulliparous mothers that delivered a live term singleton newborn in the vertex presentation with ≥ 37 weeks of gestation completed, with Excluded Populations removed (denominator)	b) Total number of mothers indicated in question #8a that had their newborn delivered via cesarean section (numerator)
Non-Hispanic White	_____	_____
Non-Hispanic Black	_____	_____
Non-Hispanic American Indian or Alaska Native	_____	_____
Non-Hispanic Asian or Pacific Islander	_____	_____
Hispanic	_____	_____
Non-Hispanic Other (including two or more races)	_____	_____
Unknown	_____	_____

4C: Episiotomy

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review Leapfrog's Multi-Campus Reporting Policy.

Important Note: Hospitals must use the same 12-month reporting period for all subsections in Section 4: Maternity Care, except for Section 4B questions #6-8.

Specifications: See **Episiotomy Measure Specifications** in the Reference Information beginning on page 172.

Reporting Period: 12 months

Answer questions #1-3 based on all cases.

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

1) 12-month reporting period used:	◦ 01/01/2024 – 12/31/2024 ◦ 07/01/2024 – 06/30/2025
2) Total number of vaginal deliveries, with Excluded Populations removed: <i>If fewer than 10 cases met the criteria for the denominator, skip question #3 and continue to the next subsection. The hospital will be scored as "Unable to Calculate Score."</i>	_____
3) Total number of mothers indicated in question #2 that had an episiotomy procedure performed:	_____

4D: Process Measures of Quality

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Note: Hospitals must use the same 12-month reporting period for all subsections in Section 4: Maternity Care, except for Section 4B questions #6-8.

Specifications: See [Process Measures of Quality Measure Specifications](#) in the Reference Information beginning on page 173.

Reporting Period: 12 months

Answer questions #1-9 based on all cases (or a sufficient sample of them).

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

Sufficient Sample: See [Process Measures of Quality Measure Specifications](#) for instructions for identifying a sufficient sample for questions #3-4 and #7-8.

1) 12-month reporting period used:	☐ 01/01/2024 – 12/31/2024 ☐ 07/01/2024 – 06/30/2025
------------------------------------	--

Newborn Bilirubin Screening Prior to Discharge

2) Did your hospital perform a medical record audit on all cases (or a sufficient sample of them) and measure adherence to the newborn bilirubin screening prior to discharge clinical guideline? <i>If “no” to question #2, skip questions #3-5 and continue to question #6. The hospital will be scored as “Did Not Measure.”</i> <i>If “yes, but fewer than 10 cases met the inclusion criteria for the denominator,” skip questions #3-5 and continue to question #6. The hospital will be scored as “Unable to Calculate Score.”</i>	☐ Yes ☐ No ☐ Yes, but fewer than 10 cases met the inclusion criteria for the denominator
3) Number of cases measured against the guideline, either all cases or a sufficient sample of them (denominator):	_____
4) Number of cases in question #3 that adhere to the clinical process guideline (numerator):	_____
5) Do the responses in questions #3 and #4 represent a sample of cases?	☐ Yes ☐ No

Appropriate DVT Prophylaxis in Women Undergoing Cesarean Delivery

6) Did your hospital perform a medical record audit on all cases (or a sufficient sample of them) and measure adherence to the appropriate DVT prophylaxis in women undergoing cesarean delivery clinical guideline? <i>If “no” to question #6, skip questions #7-9 and continue to the next subsection. The hospital will be scored as “Did Not Measure.”</i> <i>If “yes, but fewer than 10 cases met the inclusion criteria for the denominator,” skip questions #7-9 and continue to the next subsection. The hospital will be scored as “Unable to Calculate Score.”</i>	○ Yes ○ No ○ Yes, but fewer than 10 cases met the inclusion criteria for the denominator
7) Number of cases measured against the guideline, either all cases or a sufficient sample of them (denominator):	_____
8) Number of cases in question #7 that adhere to the clinical process guideline (numerator):	_____
9) Do the responses in questions #7 and #8 represent a sample of cases?	○ Yes ○ No

4E: High-Risk Deliveries

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Note: Only include units that were open for the entire reporting period and that remain currently open.

1) Does your hospital <u>electively</u> admit high-risk deliveries³⁰? <i>If "no" to question #1, skip the remaining questions in Section 4E, and go to the Affirmation of Accuracy. The hospital will be scored as "Does Not Apply."</i>	☐ Yes ☐ No
2) Does your hospital operate a neonatal ICU (NICU), or is it <u>co-located</u>³¹ with a hospital that operates a NICU, that admits or accepts transfers of <u>very low birth weight babies</u>³²? <i>If "no" to question #2, skip the remaining questions in Section 4E, and go to the Affirmation of Accuracy. The hospital will be scored as "Limited Achievement."</i> <i>If the NICU is co-located in another hospital and your hospital immediately transfers all complicated newborns there, answer question #3 and either questions #4-5 or #6-10 based on information pertaining to the co-located hospital's NICU.</i>	☐ Yes ☐ No
3) Hospitals that participate in the Vermont Oxford Network (VON) and have a recent 12-month report available may elect to report their hospital's Volume (questions #4-5) OR the <u>VON's Death or Morbidity Measure</u>³³ (questions #6-10). Hospitals that do not participate in the Vermont Oxford Network should report their hospital's Volume (questions #4-5). Please indicate which measure the hospital will report on: <i>If you elect to report on Volume, answer questions #4-5 and skip questions #6-10.</i> <i>If you elect to report on the VON National Performance Measure, skip questions #4-5. Please ensure that you have entered an accurate VON Transfer Code in the Hospital Profile and submitted the Data Share Authorization letter to VON. Otherwise, you will be scored as "Declined to Respond."</i>	☐ Volume ☐ VON National Performance Measure

Neonatal Intensive Care Unit(s) – Volume

Important Note: Hospitals must use the same 12-month reporting period for all subsections in Section 4: Maternity Care, except for Section 4B questions #6-8.

Specifications: See **Neonatal Intensive Care Unit(s) – Volume Measure Specifications** in the Reference Information beginning on page 173.

Reporting Period: 12 months

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

4) 12-month reporting period used:	○ 01/01/2024 – 12/31/2024 ○ 07/01/2024 – 06/30/2025
5) For the reporting period, how many very low birth weight babies were admitted to your hospital's neonatal intensive care unit(s)?	_____

Neonatal Intensive Care Unit(s) – National Performance Measurement

Important Note: Hospitals participating in the Vermont Oxford Network (VON) may opt to report on the VON National Performance Measure. In order for Leapfrog to obtain the data from VON, the VON data must be finalized, and hospitals must complete the following steps:

1. Provide an accurate VON Transfer Code in the Hospital Profile,
2. Complete a Data Sharing Authorization letter and submit it to VON by **June 16**. Hospitals that submitted their Data Sharing Authorization letter to VON in previous Leapfrog Hospital Survey Cycles do not have to re-submit a new letter in 2025.
3. Select "VON National Performance Measure" in question #3, and
4. Submit the 2025 Leapfrog Hospital Survey by the June 30 Submission Deadline.

Hospitals that select "VON National Performance Measure" in question #3, but do not adhere to the other steps will be scored and publicly reported as "Declined to Respond" for the High-Risk Deliveries measure.

Specifications: See **Neonatal Intensive Care Unit(s) – National Performance Measurement Measure Specifications** in the Reference Information beginning on page 173.

Reporting Period: 12 months

Responses are based on the latest 12-month report received from the Vermont Oxford Network (VON) for the **Death or Morbidity Measure**.

- 2023 VON data
- 2024 VON data (usually available after August 31)

Leapfrog will update the VON data three times per Survey Cycle for all hospitals that have completed the steps noted above. See deadlines and reporting periods in the **Neonatal Intensive Care Unit(s) - National Performance Measurement Measure Specifications**.

6) Most recent 12-month reporting period for which VON performance results are available:	<i>No response required here. Determined automatically based on VON data.</i>
---	---

2025 Leapfrog Hospital Survey – Hard Copy

Section 4: Maternity Care

7) Hospital's volume based on VON report:	No response required here. Determined automatically based on VON data.
8) Hospital's standardized mortality ratio (SMR) 95% lower bound based on VON report:	No response required here. Determined automatically based on VON data.
9) Hospital's observed to expected ratio of morbidity or mortality (SMR shrunken) based on VON report:	No response required here. Determined automatically based on VON data.
10) Hospital's SMR 95% upper bound based on VON report:	No response required here. Determined automatically based on VON data.

Affirmation of Accuracy

As the hospital CEO or as an employee of the hospital to whom the hospital CEO has delegated responsibility, I have reviewed this information pertaining to the Maternity Care Section at our hospital, and I hereby certify that this information is true, accurate, and reflects the current, normal operating circumstances at our hospital. I am authorized to make this certification on behalf of our hospital.

The hospital and I understand that The Leapfrog Group, its members, the public and entities and persons who contract or have other business dealings with The Leapfrog Group are relying on the truth and accuracy of this information. The hospital and I also understand that The Leapfrog Group will make this information and/or analyses of this information public through the Survey Results public reporting website, The Leapfrog Group's Hospital Safety Grade, and/or other Leapfrog Group products and services. This information and/or analyses and all intellectual property rights therein shall be and remain the sole and exclusive property of The Leapfrog Group in which The Leapfrog Group retains exclusive ownership. This information does not infringe upon any third-party intellectual property rights or any other third-party rights whatsoever and is free and clear of all encumbrances and liens of any kind. The hospital and I acknowledge that The Leapfrog Group may use this information in a commercial manner for profit. The hospital shall be liable for and shall hold harmless and indemnify The Leapfrog Group from any and all damages, demands, costs, or causes of action resulting from any inaccuracies in the information or any misrepresentations in this Affirmation of Accuracy. The Leapfrog Group and its members and entities and persons who contract or have other business dealings with The Leapfrog Group reserve the right to omit or disclaim information that is not current, accurate or truthful.

Section 4: Maternity Care Reference Information

What's New in the 2025 Survey

Leapfrog is updating the measure specifications from The Joint Commission for PC-02 Cesarean Birth (Section 4B) for those hospitals that do not already submit data to TJC and therefore need to retrospectively collect data. We will also continue to accept both data for the chart-abstracted measure (PC-02) and data collected using TJC's electronic clinical quality measure (eCQM) specifications (ePC-02). Hospitals measuring this quality indicator and reporting results to The Joint Commission should continue to use the data reported to TJC when responding to the questions in Section 4B: Cesarean Birth.

Hospitals participating in the California Maternal Quality Care Collaborative (CMQCC) Maternal Data Center may continue to use the data provided in their CMQCC reports when responding to subsections 4B: Cesarean Birth, 4C: Episiotomy, and 4D: Process Measures of Quality. Hospitals participating in the Michigan Obstetrics Initiative (OBI) may also continue to use the data provided in their OBI reports to report on Section 4B: Cesarean Birth.

Section 4A: Maternity Care Volume and Services

Leapfrog will continue to include and require questions regarding service offerings and use them in public reporting only. For clarification, Leapfrog is adding a reporting period for these questions which will instruct hospitals to report on the services that are currently offered.

In addition, Leapfrog is updating the policy question regarding the prevention of nonmedically indicated early elective deliveries to specify that the written protocols must be approved by the medical director or other designated physician (previously this was noted as other designated "clinician").

Section 4B: Cesarean Birth

Leapfrog is continuing to include questions on the collection of cesarean birth data (NTSV C-section measure) by race/ethnicity and is asking hospitals to provide numerators and denominators for the NTSV C-section measure for each of the following races/ethnicities, which were also used in 2024 reporting: Non-Hispanic White, Non-Hispanic Black, Non-Hispanic American Indian or Alaska Native, Non-Hispanic Asian or Pacific Islander, Hispanic, and Non-Hispanic Other (including two or more races). Reporting this information requires that hospitals collect ethnicity and race, including if a patient identifies with multiple races. As in 2024, these questions are required but will not be used in scoring or public reporting by hospital on the Survey Results website. Instead, cesarean birth rates stratified by race/ethnicity will continue to be confidentially shared with reporting hospitals on their [Hospital Details Pages](#).

Hospitals participating in the California Maternal Quality Care Collaborative (CMQCC) Maternal Data Center may use the data provided in their CMQCC reports and hospitals reporting to the U.S. News & World Report Maternity Services Survey may use the data provided to U.S. News & World Report when responding to these questions. Otherwise, hospitals will continue to use TJC's PC-02 Cesarean Birth measure specifications and Leapfrog instructions to retrospectively review all cases and stratify by race/ethnicity.

There are no changes to the scoring algorithm for Section 4B: Cesarean Birth.

Section 4C: Episiotomy

There are no changes to this subsection.

Section 4D: Process Measures of Quality

In response to feedback and consultation with our Maternity Care Expert Panel, Leapfrog is updating the measure specifications for Appropriate DVT Prophylaxis in Women Undergoing Cesarean Delivery to add further clarification regarding the timing of the prophylaxis. The numerator will continue to include women undergoing cesarean delivery that received either pneumatic compression devices prior to surgery or fractionated or unfractionated heparin or heparinoid. Beginning in 2026, Leapfrog plans to remove the inclusion of patients receiving heparin or heparinoid, unless they also received a pneumatic compression device prior to surgery. As a reminder, the target for this measure is 90%.

There are no changes to the scoring algorithm for Section 4D: Process Measures of Quality.

Section 4E: High-Risk Deliveries

Neonatal Intensive Care Unit(s) – National Performance Measurement

Leapfrog is continuing to obtain data directly from the Vermont Oxford Network (VON) for those hospitals that electively admit high-risk deliveries and opt to use VON's Death or Morbidity Outcome Measure when reporting on Section 4E: High-Risk Deliveries. Hospitals will still need to complete the following steps:

1. Complete a Data Sharing Authorization letter and submit it to VON by the dates listed in the measure specifications. (Hospitals that successfully submitted a Data Sharing Authorization letter in prior years will not be required to submit another letter in 2025),
2. Select "VON National Performance Measure" in Section 4E: High-Risk Deliveries question #3,
3. Provide an accurate VON Transfer Code in the Hospital Profile of the Leapfrog Hospital Survey (this will be pre-populated if previously provided); and,
4. Submit the Leapfrog Hospital Survey by the dates listed in the measure specifications.

Hospitals that select "VON National Performance Measure" in question #3 of Section 4E: High-Risk Deliveries, but do not complete all the steps listed above will be scored and publicly reported as "Declined to Respond" for the High-Risk Deliveries measure.

Change Summary Since Release

None. If substantive changes are made to this section of the Survey after release on April 1, 2025, they will be documented in this Change Summary section.

Section 4: Maternity Care Measure Specifications

Maternity Care Volume Measure Specifications

Important Note: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Reporting Period: 12 months

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Question #3: The number of live births (i.e., infants) at this hospital location (inborn cases only), reported to your state during the reporting period.

Alternatively, the below list of Z codes can be used to identify live births, with the caution that these codes are coded for the newborn, not the mother; likely to be found in your hospital's birth CIS/medical record system; but often not in claims data since normal newborn care may be included in the mother's claim without baby's diagnosis coding.

Z38.00 – Z38.01: Single liveborn infant, born in hospital

Z38.30 – Z38.31: Twin liveborn infant, born in hospital

Z38.61 – Z38.69: Other multiple liveborn infant, born in hospital

Note: This data point is simply used to qualify a hospital for further reporting of the normal delivery measures.

Cesarean Birth Measure Specifications**Important Notes:**

Note 1: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Note 2: Leapfrog uses the specifications created by The Joint Commission (TJC) for the Cesarean Births measure. As such, Leapfrog will update its instructions annually, and more frequently if appropriate, to maintain alignment with TJC. Hospitals can access the TJC's measure specifications directly using the links in the table below.

Note 3: Cesarean Births (questions #2-3) can be reported based on all eligible cases OR a sufficient sample of cases as outlined in the denominator specifications for the 12-month reporting period. Cesarean Births Stratified by Race/Ethnicity (questions #7-8) must be reported based on all eligible cases for the 24-month reporting period.

Source: Joint Commission PC-02

- (version [2024B](#)): Discharges between 01/01/2024 – 12/31/2024
- version [2025A](#): Discharges between 01/01/2025 – 06/30/2025

Reporting Period: 12 months

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Note: The discharge date must be used to determine whether a case falls within the reporting period specified.

If you measured this quality indicator, reported the results to The Joint Commission (TJC), and continue to submit these data to The Joint Commission, **use those data when responding to this subsection of the Survey**. Leapfrog will accept data collected for either the chart-abstracted measure (PC-02) or the electronic clinical quality measure (ePC-02).

Hospitals participating in the California Maternal Quality Care Collaborative (CMQCC) Maternal Data Center may use the data provided in CMQCC reports when responding to this subsection of the Survey. Download instructions for using the CMQCC reports on the [Survey and CPOE Materials webpage](#).

Hospitals participating in the Michigan Obstetrics Initiative (OBI) may use the data provided in OBI reports when responding to this subsection of the Survey.

Otherwise, use TJC's PC-02 Cesarean Birth measure specifications to retrospectively collect and report data for this measure. The PC-02 measure specifications are outlined below based on discharge date. To access the measure specifications directly on The Joint Commission's website, see the specification manuals linked below:

- version [2024B](#): Discharges between 01/01/2024 – 12/31/2024
- version [2025A](#): Discharges between 01/01/2025 – 06/30/2025

eCQM specifications can be found [here](#).

Sampling Cases: Hospitals that report the Perinatal Care Measure Set to TJC may use the sampling methodology used by the TJC to report on questions #2-3.

Otherwise, hospitals opting to identify a sufficient sample of mothers for this measure, in lieu of full case reporting, should follow the instructions below. Hospitals may refer to the TJC Measure Algorithm flow chart at the bottom of each set of specifications linked above, for an example of how to identify cases.

Sampling instructions for 01/01/2024 – 12/31/2024 discharges:

- Review your hospital's first delivery as of **April 15, 2024**.

- Evaluate this case against the inclusion criteria; retain the case for the sample if it meets the inclusion criteria.
- Evaluate this case against the exclusion criteria; retain the case for the sample if it does not meet any of the listed exclusions.
- Move to the next delivery and evaluate for inclusion/exclusion applicability.
- Continue through cases in sequential order until **a sample of at least 30 cases** is reached, or all cases discharged during the reporting period are reviewed, whichever comes first.

When sampling for the 01/01/2024 – 12/31/2024 reporting period, use one set of measure specifications:

- version 2024B: Discharges between 01/01/2024 – 12/31/2024 (sample cases as of April 15, 2024)

Sampling instructions for 07/01/2024 – 06/30/2025 discharges:

Sampling requires hospitals to use two different sets of measure specifications and therefore sampling has two steps, both of which need to be completed

Step #1:

- Review your hospital's first delivery as of **July 15, 2024**.
- Evaluate this case against the inclusion criteria; retain the case for the sample if it meets the inclusion criteria.
- Evaluate this case against the exclusion criteria; retain the case for the sample if it does not meet any of the listed exclusions.
- Move to the next delivery and evaluate for inclusion/exclusion applicability.
- Continue through cases in sequential order until **a sample of at least 15 cases** is reached, or all cases discharged during the first 6-month reporting period of 07/01/2024 – 12/31/2024 are reviewed, whichever comes first.

Step #2:

- After sampling the first 15 cases, review your hospital's first delivery as of **January 15, 2025**.
- Evaluate this case against the inclusion criteria; retain the case for the sample if it meets the inclusion criteria.
- Evaluate this case against the exclusion criteria; retain the case for the sample if it does not meet any of the listed exclusions.
- Move to the next delivery and evaluate for inclusion/exclusion applicability.
- Continue through cases in sequential order until **a sample of at least 15 cases** is reached, or all cases discharged during the second 6-month reporting period of 01/01/2025 – 06/30/2025 are reviewed, whichever comes first.

When sampling for the 07/01/2024 – 06/30/2025 reporting period, use the measure specifications based on the correct discharge date, which are outlined below:

- version 2024B: Discharges between 07/01/2024 – 12/31/2024 (sample cases as of July 15, 2024)
- version 2025A: Discharges between 01/01/2025 – 06/30/2025 (sample cases of January 15, 2025)

Discharges between 01/01/2024 – 12/31/2024 (version <u>2024B</u>)	Question #2 (denominator): Nulliparous patients delivered of a live term singleton newborn in vertex presentation with Excluded populations removed. <i>Note: The denominator should include both nulliparous mothers with a live term singleton newborn in vertex presentation that had their newborn delivered via cesarean section and nulliparous mothers that delivered vaginally.</i> Included Populations: • ICD-10-PCS Principal Procedure Code or ICD-10-PCS Other Procedure Codes for delivery as defined in Appendix A, Table 11.01.1 Delivery. • Nulliparous patients with ICD-10-CM Principal Diagnosis Code or ICD-10-CM Other Diagnosis Codes for outcome of delivery as
---	--

	defined in Appendix A, Table <u>11.08 Outcome of Delivery</u> and with a delivery of a newborn with 37 weeks or more of gestation completed. • <u>ICD-10-CM Principal Diagnosis Code or ICD-10 CM Other Diagnosis Codes</u> for term gestational age as defined in Appendix A, Table <u>11.10 Term Gestational Age</u> Excluded Populations: • <u>ICD-10-CM Principal Diagnosis Code or ICD-10-CM Other Diagnosis Codes</u> for multiple gestations, abnormal presentations, and conditions justifying cesarean delivery as defined in Appendix A, Table <u>11.09 Multiple Gestations, Abnormal Presentations, and Conditions Justifying Cesarean Delivery</u> • Less than 8 years of age • Greater than or equal to 65 years of age • <u>Gestational Age</u> < 37 weeks or Unable to Determine (UTD) Data Elements: Visit https://manual.jointcommission.org/releases/TJC2024B/MIF0167.html. <i>If fewer than 10 cases during the reporting period, skip the next question.</i> Question #3 (numerator): Patients in the denominator with cesarean births. Included Populations: <u>ICD-10-PCS Principal Procedure Code or ICD-10-PCS Other Procedure Codes</u> for cesarean birth as defined in Appendix A, Table <u>11.06 Cesarean Birth</u> Excluded Populations: None Data Elements: Visit https://manual.jointcommission.org/releases/TJC2024B/MIF0167.html.
Discharges between 01/01/2025 – 06/30/2025 (version <u>2025A</u>)	Question #2 (denominator): Nulliparous patients delivered of a live term singleton newborn in vertex presentation with Excluded populations removed. <i>Note: The denominator should include both nulliparous mothers with a live term singleton newborn in vertex presentation that had their newborn delivered via cesarean section and nulliparous mothers that delivered vaginally.</i> Included Populations: • <u>ICD-10-PCS Principal Procedure Code or ICD-10-PCS Other Procedure Codes</u> for delivery as defined in Appendix A, Table <u>11.01.1 Delivery</u>. • Nulliparous patients with <u>ICD-10-CM Principal Diagnosis Code or ICD-10-CM Other Diagnosis Codes</u> for outcome of delivery as defined in Appendix A, Table <u>11.08 Outcome of Delivery</u> and with a delivery of a newborn with 37 weeks or more of gestation completed. Excluded Populations: • <u>ICD-10-CM Principal Diagnosis Code or ICD-10-CM Other Diagnosis Codes</u> for multiple gestations, abnormal presentations, and conditions justifying cesarean delivery as defined in Appendix A, Table <u>11.09 Multiple Gestations, Abnormal Presentations, and Conditions Justifying Cesarean Delivery</u> • Less than 8 years of age

	- Greater than or equal to 65 years of age <u>Gestational Age</u> < 37 weeks or Unable to Determine (UTD) Data Elements: Visit https://manual.jointcommission.org/releases/TJC2025A/MIF0167.html. If fewer than 10 cases during the reporting period, skip the next question. Question #3 (numerator): Patients in the denominator with cesarean births. Included Populations: ICD-10-PCS Principal Procedure Code or ICD-10-PCS Other Procedure Codes for cesarean birth as defined in Appendix A, Table <u>11.06 Cesarean Birth</u> Excluded Populations: None Data Elements: Visit https://manual.jointcommission.org/releases/TJC2025A/MIF0167.html.
--	---

Cesarean Birth Stratified by Race/Ethnicity

Source: Joint Commission PC-02 - version <u>2024B</u>: Discharges between 01/01/2023 – 12/31/2024 - version <u>2025A</u>: Discharges between 01/01/2025 – 06/30/2025	
Reporting Period: 24 months - Surveys submitted prior to September 1: 01/01/2023 – 12/31/2024 - Surveys (re)submitted on or after September 1: 07/01/2023 – 06/30/2025 Note: The discharge date must be used to determine whether a case falls within the reporting period specified. When reporting on Cesarean Birth Stratified by Race/Ethnicity, hospitals must report using a 24-month reporting period as specified in question #6. Hospitals participating in the California Maternal Quality Care Collaborative (CMQCC) Maternal Data Center may use the data provided in CMQCC reports when responding to question #8. Download instructions for using the CMQCC reports on the <u>Survey and CPOE Materials webpage</u>. Hospitals reporting to the U.S. News & World Report Maternity Services Survey may use the data provided to U.S. News & World Report and the crosswalk provided below when responding to question #8. Otherwise, hospitals should use TJC's PC-02 Cesarean Birth measure specifications to retrospectively review all cases and then stratify those cases by race/ethnicity. The PC-02 measure specifications are outlined below based on the discharge date. To access the measure specifications directly on The Joint Commission's website, see the specification manuals linked below: - version <u>2024B</u>: Discharges between 01/01/2023 – 12/31/2024 - version <u>2025A</u>: Discharges between 01/01/2025 – 06/30/2025	
Discharges between 01/01/2023 – 12/31/2024 (version <u>2024B</u>)	Question #8a (denominator): Total number of nulliparous patients delivered of a live term singleton newborn in vertex presentation with Excluded populations removed by the following races/ethnicities: - Non-Hispanic White - Non-Hispanic Black - Non-Hispanic American Indian or Alaska Native - Non-Hispanic Asian or Pacific Islander - Hispanic - Non-Hispanic Other (including two or more races)

- Unknown

Each patient should only be counted once and included in the appropriate race/ethnicity category based on known race/ethnicity information. If race or ethnicity is unknown, include the case in the “Unknown” category. Hispanic patients should be included in the “Hispanic” category regardless of race. If a race/ethnicity category is not used by your hospital, include the case in the “Unknown” category, i.e., if patients with more than one race are listed as “multiracial” regardless of their ethnicity, include these cases in the “Unknown” category. Hospitals that do not collect all races for patients that identify with multiple races are not able to report.

Hospitals reporting to U.S. News can use the below crosswalk when reporting to Leapfrog. Hospitals using CMQCC can use the below crosswalk or information provided directly in their Leapfrog CMQCC report:

CMQCC Race/Ethnicity	U.S. News Race/Ethnicity	Leapfrog Race/Ethnicity
Hispanic-US Born	Hispanic or Latino	Hispanic
Hispanic Non-US Born		
White	White	Non-Hispanic White
	Middle Eastern or North African	
Black	Black or African American	Non-Hispanic Black
Asian	Asian	Non-Hispanic Asian or Pacific Islander
Pacific Islander	Native Hawaiian or Pacific Islander	
Native American (American Indian or Alaska Native)	American Indian or Alaska Native	Non-Hispanic American Indian or Alaska Native
Other	N/A	Non-Hispanic Other (including two or more races)
Multiracial	Multiracial and/or Multiethnic	
Unknown	Unknown	Unknown

Note: The denominator should include both nulliparous mothers with a live term singleton newborn in vertex presentation that had their newborn delivered via cesarean section and nulliparous mothers that delivered vaginally.

Included Populations:

- ICD-10-PCS Principal Procedure Code or ICD-10-PCS Other Procedure Codes for delivery as defined in Appendix A, Table 11.01.1 Delivery.
- Nulliparous patients with ICD-10-CM Principal Diagnosis Code or ICD-10-CM Other Diagnosis Codes for outcome of delivery as defined in Appendix A, Table 11.08 Outcome of Delivery and with a delivery of a newborn with 37 weeks or more of gestation completed.
- ICD-10-CM Principal Diagnosis Code or ICD-10 CM Other Diagnosis Codes for term gestational age as defined in Appendix A, Table 11.10 Term Gestational Age

Excluded Populations:

	• <u>ICD-10-CM Principal Diagnosis Code or ICD-10-CM Other Diagnosis Codes</u> for multiple gestations, abnormal presentations, and conditions justifying cesarean delivery as defined in Appendix A, Table <u>11.09 Multiple Gestations, Abnormal Presentations, and Conditions Justifying Cesarean Delivery</u> • Less than 8 years of age • Greater than or equal to 65 years of age • <u>Gestational Age</u> < 37 weeks or Unable to Determine (UTD) Data Elements: Visit https://manual.jointcommission.org/releases/TJC2024B/MIF0167.html. If fewer than 10 cases during the reporting period for any race/ethnicity, skip the next question. Question #8b (numerator): Patients in the denominator with cesarean births by the following races/ethnicities: • Non-Hispanic White • Non-Hispanic Black • Non-Hispanic American Indian or Alaska Native • Non-Hispanic Asian or Pacific Islander • Hispanic • Non-Hispanic Other (including two or more races) • Unknown Included Populations: <u>ICD-10-PCS Principal Procedure Code or ICD-10-PCS Other Procedure Codes</u> for cesarean birth as defined in Appendix A, Table <u>11.06 Cesarean Birth</u> Excluded Populations: None Data Elements: Visit https://manual.jointcommission.org/releases/TJC2024B/MIF0167.html.
Discharges between 01/01/2025 – 06/30/2025 (version 2025A)	Question #8a (denominator): Total number of nulliparous patients delivered of a live term singleton newborn in vertex presentation with Excluded populations removed by the following races/ethnicities: • Non-Hispanic White • Non-Hispanic Black • Non-Hispanic American Indian or Alaska Native • Non-Hispanic Asian or Pacific Islander • Hispanic • Non-Hispanic Other (including two or more races) • Unknown Each patient should only be counted once and included in the appropriate race/ethnicity category based on known race/ethnicity information. If race or ethnicity is unknown, include the case in the “Unknown” category. Hispanic patients should be included in the “Hispanic” category regardless of race. If a race/ethnicity category is not used by your hospital, include the case in the “Unknown” category, i.e., if patients with more than one race are listed as “multiracial” regardless of their ethnicity, include these cases in the “Unknown” category. Hospitals that do not collect all races for patients that identify with multiple races are not able to report. Hospitals reporting to U.S. News can use the below crosswalk when reporting to Leapfrog. Hospitals using CMQCC can use the below crosswalk or information provided directly in their Leapfrog CMQCC report:

CMQCC Race/Ethnicity	U.S. News Race/Ethnicity	Leapfrog Race/Ethnicity
Hispanic-US Born	Hispanic or Latino	Hispanic
Hispanic Non-US Born		
White	White	Non-Hispanic White
	Middle Eastern or North African	
Black	Black or African American	Non-Hispanic Black
Asian	Asian	Non-Hispanic Asian or Pacific Islander
Pacific Islander	Native Hawaiian or Pacific Islander	
Native American (American Indian or Alaska Native)	American Indian or Alaska Native	Non-Hispanic American Indian or Alaska Native
Other	N/A	Non-Hispanic Other (including two or more races)
Multiracial	Multiracial and/or Multiethnic	
Unknown	Unknown	Unknown

Note: The denominator should include both nulliparous mothers with a live term singleton newborn in vertex presentation that had their newborn delivered via cesarean section and nulliparous mothers that delivered vaginally.

Included Populations:

- ICD-10-PCS Principal Procedure Code or ICD-10-PCS Other Procedure Codes for delivery as defined in Appendix A, Table 11.01.1 Delivery.
- Nulliparous patients with ICD-10-CM Principal Diagnosis Code or ICD-10-CM Other Diagnosis Codes for outcome of delivery as defined in Appendix A, Table 11.08 Outcome of Delivery and with a delivery of a newborn with 37 weeks or more of gestation completed.

Excluded Populations:

- ICD-10-CM Principal Diagnosis Code or ICD-10-CM Other Diagnosis Codes for multiple gestations abnormal presentations and conditions justifying cesarean delivery as defined in Appendix A, Table 11.09 Multiple Gestations, Abnormal Presentations, and Conditions Justifying Cesarean Delivery
- Less than 8 years of age
- Greater than or equal to 65 years of age
- Gestational Age < 37 weeks or Unable to Determine (UTD)

Data Elements: Visit

<https://manual.jointcommission.org/releases/TJC2025A/MIF0167.html>.

If fewer than 10 cases during the reporting period, skip the next question.

	Question #8b (numerator): Patients in the denominator with cesarean births by the following races/ethnicities: • Non-Hispanic White • Non-Hispanic Black • Non-Hispanic American Indian or Alaska Native • Non-Hispanic Asian or Pacific Islander • Hispanic • Non-Hispanic Other (including two or more races) • Unknown Included Populations: <i>ICD-10-PCS Principal Procedure Code or ICD-10-PCS Other Procedure Codes</i> for cesarean birth as defined in Appendix A, Table <u>11.06 Cesarean Birth</u> Excluded Populations: None Data Elements: Visit https://manual.jointcommission.org/releases/TJC2025A/MIF0167.html
--	---

Episiotomy Measure Specifications

Important Note: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Source: National Quality Forum #0470

Reporting Period: 12 months

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Note: The discharge date must be used to determine whether a case falls within the reporting period specified.

Hospitals participating in the California Maternal Quality Care Collaborative (CMQCC) Maternal Data Center may use the data provided in CMQCC reports when responding to this subsection of the Survey. Download instructions for using the CMQCC reports on the [Survey and CPOE Materials webpage](#).

Question #2 (denominator): Total number of vaginal deliveries during the reporting period, with Excluded Populations removed.

For the purposes of this measure, use the following MS-DRGs to identify a vaginal delivery:

- 768: Vaginal delivery with O.R. procedure except sterilization and/or D&C
- 796: Vaginal delivery with sterilization/D&C with MCC
- 797: Vaginal delivery with sterilization/D&C with CC
- 798: Vaginal delivery with sterilization/D&C without CC/MCC
- 805: Vaginal delivery without sterilization/D&C with MCC
- 806: Vaginal delivery without sterilization/D&C with CC
- 807: Vaginal delivery without sterilization/D&C without CC/MCC

The following APR-DRGs should also be used to identify a vaginal delivery if your hospital uses APR-DRG coding:

- 541: Vaginal delivery with sterilization and/or D&C
- 542: Vaginal delivery with complicating procedures excluding sterilization and/or D&C
- 560: Vaginal delivery

The following Tricare DRGs should also be used to identify a vaginal delivery if your hospitals uses Tricare DRG coding:

- 762 Vaginal delivery with sterilization or D&C with MCC
- 763 Vaginal delivery with sterilization or D&C with CC
- 764 Vaginal delivery with sterilization or D&C without CC/MCC
- 768 Vaginal delivery with O.R. procedure except sterilization and/or D&C
- 805 Vaginal delivery without sterilization or D&C with MCC
- 806 Vaginal delivery without sterilization or D&C with CC
- 807 Vaginal delivery without sterilization or D&C without CC/MCC

Excluded Populations:

Exclude any cases with the following ICD-10-CM diagnostic code in any field:

- O66.0: Obstructed labor due to shoulder dystocia

Question #3 (numerator): Total number of mothers included in question #2 (the denominator) that had an episiotomy procedure performed.

For the purposes of this measure, the following ICD-10-PCS procedure codes should be used for identifying an episiotomy:

- 0W8NXZZ: Division of female perineum, external approach

Process Measures of Quality Measure Specifications**Important Notes:**

Note 1: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Note 2: For Maternity Care Process Measures, hospitals with a sufficient sample size (as defined below), can randomly sample for the denominator of each indicator, and measure and report adherence based on that sample. Most likely, the numerator criteria for these two measures will require medical chart review if these specific data are not already extracted or coded consistently for other purposes.

Newborn Bilirubin Screening Prior to Discharge

Source: Providence Health

Reporting Period: 12 months

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Note: The discharge date must be used to determine whether a case falls within the reporting period specified.

Hospitals participating in the California Maternal Quality Care Collaborative (CMQCC) Maternal Data Center may use the data provided in CMQCC reports when responding to this subsection of the Survey. Download instructions for using the CMQCC reports on the [Survey and CPOE Materials webpage](#).

Sampling: If you have fewer than 30 cases that meet the criteria for inclusion in the denominator of the process measure during the time period of the medical record audit, include ALL of these cases in measuring adherence to the process guidelines. You need NOT use more than 12 months of historical data to increase the eligible cases beyond 30; just measure and report on ALL eligible cases that you have in that reporting period.

If you have more than 30 cases that meet the criteria for inclusion in the denominator of the process measure during the time period of the medical record audit, you may randomly sample at least 30 of them for the denominator of each guideline, and measure and report adherence based on that sample.

Question #3 (denominator): Eligible cases include all normal newborns born at or beyond 35 completed weeks gestation that were delivered in the hospital during the reporting period (all inborns) with **Excluded Populations** removed.

Excluded Populations:

- admitted to a neonatal ICU, either at your hospital or another hospital; or
- with parental refusal to test; or
- prenatal documentation of severe congenital anomalies in the newborn and documentation that the newborn will receive comfort care measures only; or
- newborn died prior to discharge

Question #4 (numerator): Number of eligible cases included in the denominator who have a serum or transcutaneous bilirubin screen prior to discharge to identify risk of hyperbilirubinemia.

Appropriate DVT Prophylaxis in Women Undergoing Cesarean Delivery**Source:** National Quality Forum #0473**Reporting Period: 12 months**

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Note: The discharge date must be used to determine whether a case falls within the reporting period specified.

Hospitals participating in the California Maternal Quality Care Collaborative (CMQCC) Maternal Data Center may use the data provided in CMQCC reports when responding to this subsection of the Survey. Download instructions for using the CMQCC reports on the [Survey and CPOE Materials webpage](#).

Sampling: If you have fewer than 30 cases that meet the criteria for inclusion in the denominator of the process measure during the time period of the medical record audit, include ALL of these cases in measuring adherence to the process guidelines. You need NOT use more than 12 months of historical data to increase the eligible cases beyond 30; just measure and report on ALL eligible cases that you have in that reporting period.

If you have more than 30 cases that meet the criteria for inclusion in the denominator of the process measure during the time period of the medical record audit, you may randomly sample at least 30 of them for the denominator of each guideline, and measure and report adherence based on that sample.

Question #7 (denominator): Eligible cases include all women undergoing cesarean delivery during the reporting period.

Include cases with one of the following MS-DRG codes:

- 783: Cesarean section with sterilization with MCC
- 784: Cesarean section with sterilization with CC
- 785: Cesarean section with sterilization without CC/MCC
- 786: Cesarean section without sterilization with MCC
- 787: Cesarean section without sterilization with CC
- 788: Cesarean section without sterilization without CC/MCC

The following APR-DRGs should also be used to identify a cesarean delivery if your hospital uses APR-DRG coding:

- 539: Cesarean section with sterilization
- 540: Cesarean section without sterilization

The following Tricare DRGs should also be used to identify a cesarean delivery if your hospitals uses Tricare DRG coding:

- 771 Cesarean section without sterilization with MCC
- 772 Cesarean section without sterilization with CC
- 773 Cesarean section without sterilization without CC/MCC
- 783 Cesarean section with sterilization with MCC
- 784 Cesarean section with sterilization with CC
- 785 Cesarean section with sterilization without CC/MCC

Excluded Populations: None.

Question #8 (numerator) Number of eligible cases included in the denominator who received either

- fractionated or unfractionated heparin or heparinoid, or
- pneumatic compression devices prior to surgery.

Note: Use of a pneumatic compression device may be documented in the OR log but must be placed pre-operatively to qualify for inclusion in the numerator.

For a list of approved pneumatic compression devices, see the devices listed under "Intermittent Pneumatic Compression Device (IPC)" in [Table 2.1 VTE Prophylaxis Inclusion Table](#).

High-Risk Deliveries Measure Specifications**Important Notes:**

Note 1: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Note 2: Hospitals should report on the selection from Section 4E question #3 (**either** Volume OR the National Performance Measure (VON)).

Neonatal Intensive Care Unit(s) – Volume

Hospitals opting to report on Volume should only use ICD-10-CM codes as indicated in the specifications below. When calculating hospital volume, count the number of patients with any one or more of the specified diagnosis codes for high-risk deliveries, subject to the other inclusion/exclusion criteria below. The diagnosis codes may be in any field. The count can include inborn as well as transfer cases.

Source: The Leapfrog Group

Reporting Period: 12 months

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Note: The discharge date must be used to determine whether a case falls within the reporting period specified.

Question #5 (Instructions for Volume Reporting)**Included Populations:**

Number of newborns admitted to the neonatal ICU with the following ICD-10-CM codes:

ICD-10-CM Code	Description
P05.02	Newborn light for gestational age, 500-749 grams
P05.03	Newborn light for gestational age, 750-999 grams
P05.04	Newborn light for gestational age, 1000-1249 grams
P05.05	Newborn light for gestational age, 1250-1499 grams
P05.12	Newborn small for gestational age, 500-749 grams
P05.13	Newborn small for gestational age, 750-999 grams
P05.14	Newborn small for gestational age, 1000-1249 grams
P05.15	Newborn small for gestational age, 1250-1499 grams
P05.2	Newborn affected by fetal malnutrition not light or small for gestational age
P05.9	Newborn affected by slow intrauterine growth, unspecified
P07.02	Extremely low birth weight newborn, 500-749 grams
P07.03	Extremely low birth weight newborn, 750-999 grams
P07.14	Other low birth weight newborn, 1000-1249 grams
P07.15	Other low birth weight newborn, 1250-1499 grams

Excluded Populations: Newborns admitted to the neonatal ICU weighing 1500 grams or more.

Neonatal Intensive Care Unit(s) – National Performance Measurement

Hospitals participating in the Vermont Oxford Network (VON) may opt to report on the VON National Performance Measure. In order for Leapfrog to obtain the data from VON, the VON data must be finalized, and hospitals must complete the following steps:

1. Provide an accurate VON Transfer Code in the Hospital Profile,
2. Complete a Data Sharing Authorization letter and submit it to VON by **June 16** (Hospitals that submitted their Data Sharing Authorization letter to VON in previous Leapfrog Hospital Survey Cycles do not have to re-submit a new letter in 2025),
3. Select "VON National Performance Measure" in question #3, and
4. Submit the 2025 Leapfrog Hospital Survey by the June 30 Submission Deadline.

Hospitals that select "VON National Performance Measure" in question #3, but do not adhere to the other steps will be scored and publicly reported as "Declined to Respond" for the High-Risk Deliveries measure.

Data will be available for review on the Leapfrog Hospital Survey Hospital Details Page beginning on July 12. The VON data Leapfrog obtains can be found in the Vermont Oxford Network's Nightingale Internet Reporting System. Leapfrog has provided instructions for using the VON Nightingale online tool on the Survey and CPOE Materials webpage. These instructions can be used to verify the data that Leapfrog is obtaining from VON, which includes:

Variable	From the Vermont Oxford Network (SMR Report from Nightingale online tool)
Volume	From the latest 12-month standardized mortality or morbidity ratio (SMR) report for Death or Morbidity, the hospital's "N" for the volume of cases for the reporting period.
SMR 95% (lower bound)	From the same report, the hospital's "SMR 95% (lower)" for Death or Morbidity. This represents the lower value of your hospital's 95% confidence interval.
SMR (shrunk)	From the same report, the hospital's "SMR (shrunk)" for Death or Morbidity. This is the weighted average of the hospital value and the population (Vermont Oxford Network) mean value.
SMR 95% (upper bound)	From the same report, the hospital's "SMR 95% (upper)" for Death or Morbidity. This represents the upper value of your hospital's 95% confidence interval.

Deadlines and Reporting Periods

Leapfrog will update the VON data three times per Survey Cycle for all hospitals that have completed the steps noted above according to the deadlines and reporting periods listed in the following table:

Complete and submit Data Sharing Authorization to VON by*	Data downloaded from VON will be scored and publicly reported for hospitals that have submitted Section 4 by	VON Reporting Period	Available on Hospital Details Page and Public Reporting Website on
June 16, 2025	June 30, 2025	2023	July 12, 2025 Hospital Details Page
August 15, 2025	August 31, 2025	2024**	July 25, 2025 Public Reporting Website
November 14, 2025	November 30, 2025	2024	September 10, 2025*** December 9, 2025***

* Hospitals that successfully submitted a Data Sharing Authorization letter in previous years are not required to submit another letter in 2025.

**Anticipated release of 2024 VON data.

*** Available on Hospital Details Page on the same date as public release of Survey Results

See [FAQs](#) for additional information about responding to the questions in this section.

Section 4: Maternity Care Frequently Asked Questions (FAQs)

- 1. Under normal circumstances our hospital does not perform newborn deliveries. However, during the reporting period we had a few emergency situations and/or transfers. Should we indicate delivering newborns during the reporting period?**

If your hospital does not electively perform newborn deliveries (i.e., no labor/delivery unit, only admit in an emergency situation), you would respond “no” to question #2 in Section 4A, as hospitals are instructed to report inborns only.

- 2. Should newborns that are delivered outside of the hospital that are brought to labor and delivery be included in the total number of live births in Section 4A?**

When calculating the total number of live births in Section 4A question #3, refer to the measure specifications for Maternity Care Volume. Only inborns should be included in the total volume.

- 3. Should hospitals use delivery date or discharge date when including births/cases for the measures reported in Section 4: Maternity Care?**

The discharge date should be used to determine whether a case falls within the reporting period specified.

- 4. What would qualify as offering breastfeeding/lactation consultants “at home after discharge” for the purposes of question #6 in Section 4A?**

“At home after discharge” includes lactation services provided in the home either in-person or via telehealth with video capabilities. A phone call would not be sufficient.

- 5. Can our hospital answer “yes” to question #8 in Section 4A if we offer pre-planned postpartum tubal ligation during the labor and delivery admission?**

Yes, the tubal ligation can be pre-planned and would qualify if you offer this during the labor and delivery admission.

- 6. In Section 4D, what tools should hospitals use for managing patients that receive a serum or transcutaneous bilirubin screen to assess the risk of hyperbilirubinemia prior to discharge?**

One example a hospital can use is the Bhutani Nomogram. For an example, please see: *American Academy of Pediatrics Clinical Practice Guidelines: Management of Hyperbilirubinemia in the Newborn Infant 35 or More Weeks of Gestation*.

<http://pediatrics.aappublications.org/content/114/1/297.full>

Tip: To view any Figure in the reference, click on it to open, then again to enlarge.

Other tools may also be used if the serum or transcutaneous screen is conducted prior to discharge and risk is managed appropriately.

- 7. In Section 4D, what codes or diagnoses should be used to identify severe congenital anomalies for exclusions for newborn bilirubin screening prior to discharge?**

Leapfrog’s Maternity Care Expert Panel has opted to not overcomplicate the measure by providing ICD-codes for identifying congenital anomalies in the newborn. Instead, we would suggest that you focus on identifying the following exclusions: documentation that the newborn will receive comfort care measures only, which would accompany the prenatal documentation of severe congenital anomalies in the newborn.

If you have concerns about the level of effort required to identify these exclusions, please note that Leapfrog allows hospitals to report on a sample of 30 cases for those facilities that opt to report on a sample instead of full case reporting. You can find those instructions in the [Maternity Care Process Measure Specifications](#).

Page Intentionally Left Blank

SECTION 5: PHYSICIAN AND NURSE STAFFING

This section includes questions and reference information for Section 5: Physician and Nurse Staffing. Please carefully review the questions, endnotes, and reference information (e.g., measure specifications, notes, and frequently asked questions) before you begin. Failure to review the reference information could result in inaccurate responses.

Section 5: Physician and Nurse Staffing**Adult and Pediatric ICU Physician Staffing Fact Sheet and Bibliography:**

<https://ratings.leapfroggroup.org/measure/hospital/2025/specially-trained-doctors-care-critical-care-patients>

Nursing Workforce Fact Sheet and Bibliography:

<https://ratings.leapfroggroup.org/measure/hospital/2025/nursing-workforce>

Hospitals that do not admit adult critical care patients or operate an adult general medical, surgical, medical/surgical, or neuro ICU should select “No” in question #2 in Section 5A: Adult ICU Physician Staffing and move on to Section 5B: Pediatric ICU Physician Staffing. Hospitals that do not admit pediatric critical care patients or operate a pediatric general medical, surgical, medical/surgical, or neuro ICU should select “No” in question #2 in Section 5B: Pediatric ICU Physician Staffing and move on to Section 5C: Nursing Workforce.

Hospitals that regularly admit adult and/or pediatric critical care patients to a mixed acuity unit, should select “Yes” in question #2 in Section 5A: Adult ICU Physician Staffing and/or Section 5B: Pediatric ICU Physician Staffing and respond to all applicable questions. The standard applies to all adult and pediatric general medical, surgical, medical/surgical, and neuro critical care patients (medical and surgical), including those patients in mixed acuity units.

For hospitals that have more than one type of ICU that applies to either Section 5A or 5B included in the ICU Physician Staffing standard, where the ICU physician staffing structure may differ among units, hospitals are instructed to report on the ICU with the lowest level of staffing by physicians certified in critical care medicine when responding to questions #1-15 in Section 5A: Adult ICU Physician Staffing and Section 5B: Pediatric ICU Physician Staffing. For example, if the adult neuro ICU is staffed by intensivists at least 8 hours/day, 7 days/week, but the adult surgical ICU is not, the hospital would respond to questions #1-15 in Section 5A based on the adult surgical ICU.

Section 5 includes questions about the management of critical care patients and the staffing structure of your hospital's adult and pediatric general medical, surgical, medical/surgical, and neuro ICUs, and questions about your hospital's nursing staffing and skill mix (previously included in Section 6).

Each hospital achieving the standard for Adult and/or Pediatric ICU Physician Staffing assures that:

All critical care patients³⁴ in its General Medical, Surgical, Medical/Surgical, and Neuro ICUs¹⁴ are managed or co-managed³⁵ by physicians certified in critical care medicine³⁶ who:

- Are ordinarily present in the ICU³⁷ during daytime hours for at least 8 hours per day, 7 days per week, and during this time provide clinical care exclusively³⁷ in the ICU
OR
- Are present via telemedicine³⁸, in combination with on-site intensivist coverage, for a total of 24 hours per day, 7 days per week; meet all of Leapfrog's ICU requirements for intensivist presence in the ICU via telemedicine; and supported by an on-site intensivist who establishes and revises the daily care plan for each ICU patient, **and**
- At other times*
 - Return more than 95% of ICU calls within 5 minutes, based on a quantified analysis³⁹ of notification device response time; and
 - Can rely on a physician, physician assistant, nurse practitioner⁴², or an ECSS-certified nurse effector⁴⁰ who is in the hospital and able to reach ICU patients within 5 minutes in more than 95% of cases, based on a quantified hospital analysis of response time of the effector reaching the patient.

*Not applicable for hospitals with 24/7 intensivist coverage.

Each hospital achieving the standard for Total Nursing Care Hours per Patient Day:

Has a ratio of total nursing care hours per patient day that is greater than or equal to the 50th percentile (where higher is better) for that hospital's cohort (small teaching, large teaching, non-teaching, mixed acuity, pediatric, or critical access hospital).

Each hospital achieving the standard for RN Hours per Patient Day:

Has a ratio of RN hours per patient day that is greater than or equal to the 50th percentile (where higher is better) for that hospital's cohort (small teaching, large teaching, non-teaching, mixed acuity, pediatric, or critical access hospital).

Each hospital achieving the standard for Nursing Skill Mix:

Has a percentage of total productive nursing hours worked by RN nursing staff that is higher than or equal to the 50th percentile (where higher is better) for the hospital's cohort (small teaching, large teaching, non-teaching, mixed acuity, pediatric, or critical access hospitals).

Each hospital achieving the standard for Percentage of RNs who are BSN-Prepared:

Has a percentage of RNs who are BSN-prepared that is greater than or equal to 80%.

Download the 2025 Leapfrog Hospital Survey Scoring Algorithm on the [Scoring and Results](#) webpage.

5A: Adult ICU Physician Staffing

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review Leapfrog's [Multi-Campus Reporting Policy](#).

Important Notes:

Note 1: Each of the endnotes referenced in the questions below must be reviewed before responding to each question.

Note 2: Some intensivist "presence" may be accomplished via tele-intensivists per Leapfrog's specifications ([More Information](#)³⁸). However, at this time hospitals cannot achieve the standard through the sole use of tele-intensivists.

Note 3: On an interim basis, other categories of physicians may be considered by Leapfrog to be "certified in Critical Care Medicine" ([More Information](#)³⁶).

Note 4: The standard applies to all adult general medical, surgical, medical/surgical, and neuro critical care patients (medical and surgical), including those patients in mixed acuity units.

Reporting Period: 3 months

Answer questions #1-15 based on the staffing structure currently in place at the time that you submit this section of the Survey. The staffing structure should have been in place for at least the past 3 months and reflect the ordinary staffing structure for each applicable ICU.

Note: As a reminder, the [Corrections Period](#) (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

1) What is the latest 3-month reporting period for which your hospital is submitting responses to this section? 3 months ending:	<u> </u> Format: Month/Year
2) Does your hospital operate any adult <u>General Medical, Surgical, Medical/Surgical, or Neuro ICUs</u>¹⁴? <i>If your hospital has more than one applicable adult ICU, respond to all questions in this section based on the adult ICU that has the lowest level of staffing by physicians certified in critical care medicine (More Information¹⁴).</i> <i>If your hospital does not operate an applicable adult ICU but regularly admits adult critical care patients to mixed acuity units, select "yes" and respond to the remaining questions in Section 5A.</i> <i>If "no" to question #2, skip the remaining questions in Section 5A and continue to the next subsection. The hospital will be scored as "Does Not Apply."</i>	☐ Yes ☐ No
3) Is the ICU staffed with physicians who are <u>certified in critical care medicine</u>³⁶ and present on-site or via telemedicine? <i>If "no, the ICU is not staffed with any physicians certified in critical care medicine" to question #3, skip the remaining</i>	☐ Yes, the ICU is staffed with physicians certified in critical care medicine ☐ Yes, the ICU is staffed with physicians certified in critical care medicine

2025 Leapfrog Hospital Survey – Hard Copy

Section 5: Physician and Nurse Staffing

questions in Section 5A and continue to the next subsection. This hospital will be scored as "Limited Achievement."	based on Leapfrog's expanded definition ○ No, the ICU is not staffed with any physicians certified in critical care medicine
4) Do the physicians who are <u>certified in critical care medicine</u>³⁶ (whether present on-site or via telemedicine) manage or co-manage <u>all critical care patients</u>³⁴ in the ICU? If "no" to question #4, skip questions #5-11 and continue to question #12.	○ Yes, all patients are managed or co-managed by a physician certified in critical care medicine when the physician is present (on-site or via telemedicine) ○ No, not all patients are managed or co-managed by a physician certified in critical care medicine when the physician is present (on-site or via telemedicine)

There are currently two different options to achieve Leapfrog's ICU Physician Staffing Standard: on-site intensivist coverage for 8 hours a day/7 days per week or 24/7 tele-intensivist coverage with some daily on-site intensivist coverage. Questions #5 and #6 are meant to differentiate between these two options; however, they are both worth the same credit. Hospitals that have 24/7 **on-site** intensivist coverage, and who meet all the criteria listed, should respond "yes" to question #5.

5) Are <u>all critical care patients</u>³⁴ in the ICU <u>managed or co-managed</u>³⁵ by one or more physicians <u>certified in critical care medicine</u>³⁶ who meet all the following criteria: • <u>ordinarily present</u>³⁷ on-site in the ICU during daytime hours; • for at least 8 hours per day, 7 days per week; and • providing clinical care <u>exclusively</u>³⁷ in the ICU during these hours? If "yes" to question #5, skip question #6 and continue to question #7.	○ Yes ○ No
6) Are <u>all critical care patients</u>³⁴ in the ICU <u>managed or co-managed</u>³⁵ by one or more physicians <u>certified in critical care medicine</u>³⁶ who meet all the following criteria: • present via telemedicine, in combination with on-site intensivist coverage, for a total of 24 hours per day, 7 days per week; • meet all of Leapfrog's ICU requirements for intensivist presence in the ICU via telemedicine (<u>More Information</u>³⁸); and • supported by an on-site intensivist who establishes and revises the daily care plan for each ICU patient?	○ Yes ○ No

If "no" to question #5 and question #6, skip questions #7-8 and continue to question #9.

7) When the physicians (from question #3) are not present in the ICU on-site or via telemedicine, do they return more than 95% of calls/pages/texts from these units within five minutes, based on a <u>quantified analysis</u>³⁹ of notification device response time? (<u>More information on the use of telemedicine to cover calls</u>⁴¹)	○ Yes ○ No ○ Not applicable; intensivists are present on-site 24/7
--	--

2025 Leapfrog Hospital Survey – Hard Copy

Section 5: Physician and Nurse Staffing

8) When the physicians (from question #3) are not present on-site in the ICU or not able to physically reach an ICU patient within 5 minutes, can they rely on a <u>physician, physician assistant, nurse practitioner⁴², or FCCS-certified nurse or intern “effector”⁴⁰</u> who is in the hospital and able to reach these ICU patients within five minutes in more than 95% of the cases, based on a <u>quantified analysis³⁹</u> of response time of the effector reaching the patient?	○ Yes ○ No ○ Not applicable; intensivists are present on-site 24/7
---	--

If “no” to either question #7 or #8 in this section, continue to questions #9-15. If “yes” or “not applicable; intensivists are present on-site 24/7” to questions #7 and #8, skip the remaining questions in Section 5A and continue to the next subsection.

9) Are <u>all critical care patients³⁴</u> in the ICU <u>managed or co-managed³⁵</u> by one or more physicians <u>certified in critical care medicine³⁶</u> who meet all the following criteria: • <u>ordinarily present³⁷</u> on-site in the ICU during daytime hours; • for at least 8 hours per day, 4 days per week or 4 hours per day, 7 days per week; and • providing clinical care <u>exclusively³⁷</u> in the ICU during these hours?	○ Yes ○ No
10) Are <u>all critical care patients³⁴</u> in the ICU <u>managed or co-managed³⁵</u> by one or more physicians <u>certified in critical care medicine³⁶</u> who meet all the following criteria: • present via telemedicine for 24 hours per day, 7 days per week; • meet all of Leapfrog’s modified ICU requirements for intensivist presence in the ICU via telemedicine (<u>More Information⁴³</u>); and • supported in the establishment and revision of daily care planning for each ICU patient by an on-site intensivist, hospitalist, anesthesiologist, or physician trained in emergency medicine?	○ Yes ○ No
11) Are <u>all critical care patients³⁴</u> in the ICU <u>managed or co-managed³⁵</u> by one or more physicians <u>certified in critical care medicine³⁶</u> who are: • on-site at least 4 days per week to establish or revise daily care plans for each critical care patient in the ICU?	○ Yes ○ No

If “yes” to question #9, #10, or #11, skip question #12 and continue to question #13.

12) If not <u>all critical care patients³⁴</u> are <u>managed or co-managed³⁵</u> by physicians <u>certified in critical care medicine³⁶</u> , either on-site or via <u>telemedicine³⁶</u> , are some critical care patients managed or co-managed by these physicians who are: • <u>ordinarily present³⁷</u> on-site in the ICU during daytime hours; • for at least 8 hours per day, 4 days per week or 4 hours per day, 7 days per week; and • providing clinical care <u>exclusively³⁷</u> in the ICU during these hours?	○ Yes ○ No
13) Does an on-site clinical pharmacist do all the following: • at least 5 days per week, makes daily on-site rounds on <u>all critical care patients³⁴</u> in the ICU; and • on the other 2 days per week, returns more than 95% of calls/pages/texts from the unit within 5 minutes, based on a <u>quantified analysis³⁹</u> of notification device response time; OR • makes daily on-site rounds on <u>all critical care patients³⁴</u> in the ICU 7 days per week?	○ Yes ○ No ○ Clinical pharmacist rounds 7 days per week

2025 Leapfrog Hospital Survey – Hard Copy

Section 5: Physician and Nurse Staffing

14) Does a physician <u>certified in critical care medicine</u> ³⁶ lead daily interprofessional rounds on-site on <u>all critical care patients</u> ³⁴ in the ICU 7 days per week?	☐ Yes ☐ No
15) Are physicians <u>certified in critical care medicine</u> ³⁶ responsible for all ICU admission and discharge decisions when they are: • present on-site for at least 8 hours per day, 4 days per week or 4 hours per day, 7 days per week?	☐ Yes ☐ No

5B: Pediatric ICU Physician Staffing

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review Leapfrog's Multi-Campus Reporting Policy.

Important Notes:

Note 1: Each of the endnotes referenced in the questions below must be reviewed before responding to each question.

Note 2: Some intensivist "presence" may be accomplished via tele-intensivists per Leapfrog's specifications (More Information³⁸). However, at this time hospitals cannot achieve the standard through the sole use of tele-intensivists.

Note 3: On an interim basis, other categories of physicians may be considered by Leapfrog to be "certified in Critical Care Medicine" (More Information³⁶).

Note 4: The standard applies to all pediatric general medical, surgical, medical/surgical, and neuro critical care pediatric patients (medical and surgical), including those pediatric patients in mixed acuity units.

Reporting Period: 3 months

Answer questions #1-15 based on the staffing structure currently in place at the time that you submit this section of the Survey. The staffing structure should have been in place for at least the past 3 months and reflect the ordinary staffing structure for each applicable ICU.

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

1) What is the latest 3-month reporting period for which your hospital is submitting responses to this section? 3 months ending:	_____ <i>Format: Month/Year</i>
2) Does your hospital operate any pediatric <u>General Medical, Surgical, Medical/Surgical, or Neuro ICUs</u>¹⁴? <i>If your hospital has more than one applicable pediatric ICU, respond to all questions in this section based on the pediatric ICU that has the lowest level of staffing by physicians certified in critical care medicine (<u>More Information</u>¹⁴).</i> <i>If your hospital does not operate an applicable pediatric ICU but regularly admits critical care pediatric patients to mixed acuity units, select "yes" and respond to the remaining questions in Section 5B.</i> <i>If "no" to question #2, skip the remaining questions in Section 5B and continue to the next subsection. The hospital will be scored as "Does Not Apply."</i>	☐ Yes ☐ No

2025 Leapfrog Hospital Survey – Hard Copy

Section 5: Physician and Nurse Staffing

3) Is the ICU staffed with physicians who are <u>certified in critical care medicine</u>³⁶ and present on-site or via telemedicine? <i>If “no, the ICU is not staffed with any physicians certified in critical care medicine” to question #3, skip the remaining questions in Section 5B and continue to the next subsection. This hospital will be scored as “Limited Achievement.”</i>	○ Yes, the ICU is staffed with physicians certified in critical care medicine ○ Yes, the ICU is staffed with physicians certified in critical care medicine based on Leapfrog’s expanded definition ○ No, the ICU is not staffed with any physicians certified in critical care medicine
4) Do the physicians who are <u>certified in critical care medicine</u>³⁶ (whether present on-site or via telemedicine) manage or co-manage <u>all critical care patients</u>³⁴ in the ICU? <i>If “no” to question #4, skip questions #5-11 and continue to question #12.</i>	○ Yes, all patients are managed or co-managed by a physician certified in critical care medicine when the physician is present (on-site or via telemedicine) ○ No, not all patients are managed or co-managed by a physician certified in critical care medicine when the physician is present (on-site or via telemedicine)

There are currently two different options to achieve Leapfrog’s ICU Physician Staffing Standard: on-site intensivist coverage for 8 hours a day/7 days per week or 24/7 tele-intensivist coverage with some daily on-site intensivist coverage. Questions #5 and #6 are meant to differentiate between these two options; however, they are both worth the same credit. Hospitals that have 24/7 **on-site** intensivist coverage, and who meet all the criteria listed, should respond “yes” to question #5.

5) Are all critical care patients³⁴ in the ICU managed or co-managed³⁵ by one or more physicians <u>certified in critical care medicine</u>³⁶ who meet all the following criteria: • <u>ordinarily present</u>³⁷ on-site in the ICU during daytime hours; • for at least 8 hours per day, 7 days per week; and • providing clinical care <u>exclusively</u>³⁷ in the ICU during these hours? <i>If “yes” to question #5, skip question #6 and continue to question #7.</i>	○ Yes ○ No
6) Are <u>all critical care patients</u>³⁴ in the ICU managed or co-managed³⁵ by one or more physicians <u>certified in critical care medicine</u>³⁶ who meet all the following criteria: • present via telemedicine, in combination with on-site intensivist coverage, for a total of 24 hours per day, 7 days per week; • meet all of Leapfrog’s ICU requirements for intensivist presence in the ICU via telemedicine (<u>More Information</u>³⁸); and • supported by an on-site intensivist who establishes and revises the daily care plan for each ICU patient?	○ Yes ○ No

If “no” to question #5 and question #6, skip questions #7-8 and continue to question #9.

2025 Leapfrog Hospital Survey – Hard Copy

Section 5: Physician and Nurse Staffing

7) When the physicians (from question #3) are not present in the ICU on-site or via telemedicine, do they return more than 95% of calls/pages/texts from these units within five minutes, based on a <u>quantified analysis</u> ³⁹ of notification device response time? (<u>More information on the use of telemedicine to cover calls</u> ⁴¹)	☐ Yes ☐ No ☐ Not applicable; intensivists are present on-site 24/7
8) When the physicians (from question #3) are not present on-site in the ICU or not able to physically reach an ICU patient within 5 minutes, can they rely on a <u>physician, physician assistant, nurse practitioner</u> ⁴² , or <u>FCCS-certified nurse or intern “effector”</u> ⁴⁰ who is in the hospital and able to reach these ICU patients within five minutes in more than 95% of the cases, based on a <u>quantified analysis</u> ³⁹ of response time of the effector reaching the patient?	☐ Yes ☐ No ☐ Not applicable; intensivists are present on-site 24/7

If “no” to either question #7 or #8 in this section, continue to questions #9-15. If “yes” or “not applicable; intensivists are present on-site 24/7” to questions #7 and #8, skip the remaining questions in Section 5B and continue to the next subsection.

9) Are <u>all critical care patients</u> ³⁴ in the ICU <u>managed or co-managed</u> ³⁵ by one or more physicians <u>certified in critical care medicine</u> ³⁶ who meet all the following criteria: - ordinarily present³⁷ on-site in the ICU during daytime hours; - for at least 8 hours per day, 4 days per week or 4 hours per day, 7 days per week; and - providing clinical care <u>exclusively</u>³⁷ in the ICU during these hours?	☐ Yes ☐ No
10) Are <u>all critical care patients</u> ³⁴ in the ICU <u>managed or co-managed</u> ³⁵ by one or more physicians <u>certified in critical care medicine</u> ³⁶ who meet all the following criteria: - present via telemedicine for 24 hours per day, 7 days per week; - meet all of Leapfrog's modified ICU requirements for intensivist presence in the ICU via telemedicine (<u>More Information</u>⁴³); and - supported in the establishment and revision of daily care planning for each ICU patient by an on-site intensivist, hospitalist, anesthesiologist, or physician trained in emergency medicine?	☐ Yes ☐ No
11) Are <u>all critical care patients</u> ³⁴ in the ICU <u>managed or co-managed</u> ³⁵ by one or more physicians <u>certified in critical care medicine</u> ³⁶ who are: on-site at least 4 days per week to establish or revise daily care plans for each critical care patient in the ICU?	☐ Yes ☐ No

If “yes” to question #9, #10, or #11, skip question #12 and continue to question #13.

12) If not <u>all critical care patients</u> ³⁴ are <u>managed or co-managed</u> ³⁵ by physicians <u>certified in critical care medicine</u> ³⁶ , either on-site or via <u>telemedicine</u> ³⁸ , are some critical care patients managed or co-managed by these physicians who are: - ordinarily present³⁷ on-site in the ICU during daytime hours; - for at least 8 hours per day, 4 days per week or 4 hours per day, 7 days per week; and - providing clinical care <u>exclusively</u>³⁷ in the ICU during these hours?	☐ Yes ☐ No
---	---

2025 Leapfrog Hospital Survey – Hard Copy

Section 5: Physician and Nurse Staffing

13) Does an on-site clinical pharmacist do all the following: • at least 5 days per week, makes daily on-site rounds on <u>all critical care patients</u>³⁴ in the ICU; and • on the other 2 days per week, returns more than 95% of calls/pages/texts from the unit within 5 minutes, based on a <u>quantified analysis</u>³⁹ of notification device response time; OR • makes daily on-site rounds on <u>all critical care patients</u>³⁴ in the ICU 7 days per week?	☐ Yes ☐ No ☐ Clinical pharmacist rounds 7 days per week
14) Does a physician <u>certified in critical care medicine</u>³⁶ lead daily interprofessional rounds on-site on <u>all critical care patients</u>³⁴ in the ICU 7 days per week?	☐ Yes ☐ No
15) Are physicians <u>certified in critical care medicine</u>³⁶ responsible for all ICU admission and discharge decisions when they are: • present on-site for at least 8 hours per day, 4 days per week or 4 hours per day, 7 days per week?	☐ Yes ☐ No

5C: Nursing Workforce

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Total Nursing Care Hours per Patient Day, RN Hours per Patient Day, and Nursing Skill Mix**Important Notes:**

Note 1: Hospitals should respond to questions #1-5 and #6-11 if they operate at least one adult or pediatric **single** acuity Medical, Surgical, or Med-Surg unit, defined as a unit where at least 90% of patients in the unit receive the same level of care. If responding to questions #6-11, skip questions #12-14.

Note 2: Hospitals should respond to questions #1-5 and #12-14 if they:

- **do not** operate any adult or pediatric **single** acuity Medical, Surgical, or Med-Surg Units, **but**
- operate at least one adult or pediatric **mixed** acuity Medical, Surgical, or Med-Surg Unit, defined as a unit where more than 10% of the patients in the unit receive varying levels of care (e.g., general medical care and progressive care or intensive care).

Note 3: Single or mixed acuity Medical, Surgical, or Med-Surg Units that had fewer than 15 patient days per month for all 3 months of any quarter of the reporting period should be excluded in questions #6-11 or #12-14.

Note 4: Single or mixed acuity Medical, Surgical, or Med-Surg Units that transitioned to an excluded unit type during the reporting period should be excluded in questions #6-11 or #12-14. For example, if a single acuity Medical Unit transitioned to an ICU during the reporting period, the unit should be excluded when responding to questions #6-11.

Specifications: See [Nursing Workforce Measure Specifications](#) in the Reference Information beginning on page 200.

Reporting Period: 12 months

- Survey submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Note: As a reminder, the [Corrections Period](#) (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

1) 12-month reporting period used:	○ 01/01/2024 – 12/31/2024 ○ 07/01/2024 – 06/30/2025
2) Does your hospital operate at least one adult or pediatric single acuity Medical, Surgical, or Med-Surg Unit? <i>A single acuity unit is defined as a unit where at least 90% of the patients receive the same level of care.</i> <i>If "yes" to question #2, skip question #3 and continue to question #4.</i>	○ Yes ○ No

2025 Leapfrog Hospital Survey – Hard Copy

Section 5: Physician and Nurse Staffing

3) If your hospital does not operate at least one adult or pediatric single acuity Medical, Surgical, or Med-Surg Unit, does your hospital operate at least one adult or pediatric mixed acuity Medical, Surgical or Med-Surg Unit? <i>A mixed acuity unit is defined as a unit where more than 10% of patients receive varying levels of care.</i> <i>If “no” to question #3, skip questions #4-16 and continue to question #17. The hospital will be scored as “Does Not Apply.”</i>	☐ Yes ☐ No
4) Did your hospital calculate total number of patient days, total number of productive hours worked by employed and contracted nursing staff with direct patient care responsibilities (RN, LPN/LVN, and UAP), and total number of productive hours worked by RN nursing staff with direct patient care responsibilities for the reporting period, and do you choose to report those data to this Survey? <i>If “no” to question #4, skip questions #5-16 and continue to question #17. The hospital will be scored as “Did Not Measure.”</i>	☐ Yes ☐ No
5) Which method did your hospital use to calculate the total number of patient days for each single acuity Medical, Surgical, Med-Surg or mixed acuity Medical, Surgical or Med-Surg Unit?	☐ Midnight census (including observation patients) ☐ Midnight census and patient days from actual hours for short stay patients ☐ Patient days from actual hours ☐ Patient days from multiple census reports

If your hospital operates single acuity units, continue to question #6. If your hospital only operates mixed acuity units, skip questions #6-11, and continue to question #12.

For Hospitals that Operate At Least One Adult or Pediatric Single Acuity Medical, Surgical, or Med-Surg Unit

6) Does your hospital operate any adult or pediatric single acuity <u>Medical Units</u>? <i>A single acuity unit is defined as a unit where at least 90% of the patients receive the same level of care.</i> <i>If “no” or “yes, but had fewer than 15 patient days per month for all 3 months of any quarter of the reporting period” to question #6, skip question #7 and continue to question #8.</i>	☐ Yes ☐ No ☐ Yes, but had fewer than 15 patient days per month for all 3 months of any quarter of the reporting period
---	--

7) Enter your hospital's responses for each quarter for all adult and pediatric single acuity <u>Medical Units</u> for the reporting period selected in question #1:			
	(a) Total number of patient days:	(b) Total number of productive hours worked by employed and contracted nursing staff (RN, LPN/LVN, and UAP) with direct patient care responsibilities:	(c) Total number of productive hours worked by RN nursing staff with direct patient care responsibilities:

NQF Safe Practice #9 – Nursing Workforce

Important Note: Hyperlinks in question #16 refer to the Patient Safety Practices FAQs beginning on page 214, not to endnotes. These hyperlinks are not included in the Online Survey Tool.

Specifications: See **NQF Safe Practice Measure Specifications** in the Reference Information beginning on page 238.

15) Is your hospital currently recognized as an American Nurses Credentialing Center (ANCC) Magnet® organization or a 2020 or 2024 Pathway to Excellence® organization? <i>If “yes, our hospital is a current American Nurses Credentialing Center (ANCC) Magnet® organization” or “yes, our hospital is a 2020 or 2024 Pathway to Excellence® organization,” skip question #16, and continue to question #17.</i> <i>Pathway to Excellence® hospitals that have not received either the 2020 or 2024 designation must select “no.”</i>	○ Yes, our hospital is a current American Nurses Credentialing Center (ANCC) Magnet® organization ○ Yes, our hospital is a 2020 or 2024 Pathway to Excellence® organization ○ No
16) Within the last 12 months, to ensure adequate and competent nursing staff service and nursing leadership at all levels, our organization has:	
a. held <u>nursing leadership</u> directly accountable for improvements in performance through performance reviews or compensation.	○ Yes ○ No
b. included <u>nursing leadership</u> as part of the hospital <u>senior administrative leadership team</u>.	○ Yes ○ No
c. held the <u>board</u> (governance) and <u>senior administrative leadership</u> accountable for the provision of financial resources to ensure adequate nurse staffing levels.	○ Yes ○ No
d. <u>budgeted</u> financial resources for balancing staffing levels and skill levels to improve performance.	○ Yes ○ No
e. developed a <u>staffing plan</u>, with input from nurses, to ensure that adequate nursing staff-to-patient ratios are achieved.	○ Yes ○ No

Percentage of RNs who are BSN-Prepared

Specifications: See **Nursing Workforce Measure Specifications** in the Reference Information beginning on page 236.

Reporting Period: 12 months

Answer questions #17-19 based on the most recent day within the last 12-months for which you have complete data.

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

17) Did your hospital calculate the Percentage of RNs who are BSN-Prepared measure for the reporting period, and do you choose to report those data to this Survey? <i>If "no" to question #17, skip questions #18-19 and continue to the next subsection. The hospital will be scored as "Did Not Measure."</i>	☐ Yes ☐ No
18) Total number of employed RN nursing staff at the hospital with direct patient care responsibilities:	_____
19) Total number of employed RN nursing staff at the hospital with direct patient care responsibilities who have a BSN degree or higher (e.g., MSN, DNP, PhD):	_____

Affirmation of Accuracy:

As the hospital CEO or as an employee of the hospital to whom the hospital CEO has delegated responsibility, I have reviewed this information pertaining to the Physician and Nurse Staffing Section at our hospital, and I hereby certify that this information is true, accurate, and reflects the current, normal operating circumstances at our hospital. I am authorized to make this certification on behalf of our hospital.

The hospital and I understand that The Leapfrog Group, its members, the public and entities and persons who contract or have other business dealings with The Leapfrog Group are relying on the truth and accuracy of this information. The hospital and I also understand that The Leapfrog Group will make this information and/or analyses of this information public through the Survey Results public reporting website, The Leapfrog Group's Hospital Safety Grade, and/or other Leapfrog Group products and services. This information and/or analyses and all intellectual property rights therein shall be and remain the sole and exclusive property of The Leapfrog Group in which The Leapfrog Group retains exclusive ownership. This information does not infringe upon any third-party intellectual property rights or any other third-party rights whatsoever and is free and clear of all encumbrances and liens of any kind. The hospital and I acknowledge that The Leapfrog Group may use this information in a commercial manner for profit. The hospital shall be liable for and shall hold harmless and indemnify The Leapfrog Group from any and all damages, demands, costs, or causes of action resulting from any inaccuracies in the information or any misrepresentations in this Affirmation of Accuracy. The Leapfrog Group and its members and entities and persons who contract or have other business dealings with The Leapfrog Group reserve the right to omit or disclaim information that is not current, accurate or truthful.

Section 5: Physician and Nurse Staffing Reference Information***What's New in the 2025 Survey***

Leapfrog renamed Section 5: ICU Physician Staffing to Section 5: Physician and Nurse Staffing and moved Section 6C: Nursing Workforce to Section 5C: Nursing Workforce.

Section 5A: Adult ICU Physician Staffing and Section 5B: Pediatric ICU Physician Staffing

To ensure that consumers, employers and purchasers, health plans, and other stakeholders can clearly identify hospitals that have adult critical care units and/or pediatric critical care units, Leapfrog is separating Section 5: ICU Physician Staffing into two subsections: Section 5A: Adult ICU Physician Staffing and Section 5B: Pediatric ICU Physician Staffing. The questions themselves will only be updated to reference adult or pediatric units. There are no other updates to the questions. As always, hospitals are instructed to report on the applicable unit with the lowest level of staffing for both subsections.

The subsections 5A and 5B will be scored and publicly reported separately, but there are no changes to the scoring algorithm and the standard for adult and pediatric medical, surgical, medical/surgical, and neuro intensive care units will remain the same. While both the adult and pediatric measures will be scored and publicly reported on Leapfrog's [public reporting website](#) and used in Leapfrog's Value-Based Purchasing Program, only the adult ICU Physician Staffing measure will be used in the Hospital Safety Grade methodology.

Leapfrog is also making the following updates to relevant endnotes for Section 5:

- The definition of co-management for critical care patients will be updated to provide more clarity and specificity.
- The definition of "Certified in Critical Care Medicine" will be updated to include those who are awarded certification by the American Osteopathic Association (AOA).
- The definition of "Certified in Critical Care Medicine" will also be updated to exclude physicians with certificates awarded from the Committee on Advanced Subspecialty Training (CAST) as the three-year grace period since CAST certificates have ceased being issued has expired.
- The specifics on audits of response times will be updated to provide additional clarity on the number of audits to conduct over a period of time for both first time submissions and survey re-submissions.

Section 5C: Nursing Workforce

In response to feedback from hospitals participating in the Survey, an analysis of responses submitted in 2024, and close consultation with our Nursing Workforce Expert Panel, Leapfrog is making several updates to Section 5C: Nursing Workforce.

Leapfrog is updating question #3 to clarify that hospitals should only respond to the questions about mixed acuity units if the hospital does not operate any of the applicable single acuity units. Further clarification on single acuity medical, surgical, and med-surg units to include or exclude, as well as additional clarification on the definition of acuity (i.e., level of care), will be added. Critical Access Units, defined as units where more than 10% of beds are for skilled nursing (swing beds), will be added as an exclusion for both single acuity and mixed acuity units.

The Midnight Census method for calculating the total number of patient days for each unit will include a clarification in the measure specifications that observation patients must be included and short stay patients (who are in and out of the unit before the census is taken) must be included; otherwise, this method cannot be used for calculating patient days.

Leapfrog is also updating the measure specifications for total productive hours worked by employed and contracted nursing staff with direct patient care responsibilities to clarify that sitter hours can only be

2025 Leapfrog Hospital Survey – Hard Copy

Section 5: Physician and Nurse Staffing

included if the sitter is authorized to physically touch the patient when providing direct patient care (i.e., does not need to call another staff member if physical intervention of any type is required).

Additionally, Press Ganey is waiving custom report fees starting in 2025 for active National Database of Nursing Quality Indicators (NDNQI) clients with eligible data. Hospitals participating in NDNQI will be able to request reports to complete the Survey free of charge.

For NQF Safe Practice #9 on the 2025 Leapfrog Hospital Survey, Leapfrog will continue to accept 2020 American Nurses Credentialing Center (ANCC) Pathway to Excellence® criteria and will add 2024 ANCC Pathway to Excellence® criteria. There are no changes to the scoring algorithm for Section 5C: Nursing Workforce.

There are no changes to the scoring algorithm for Section 5C: Nursing Workforce.

Change Summary Since Release

None. If substantive changes are made to this section of the Survey after release on April 1, 2025, they will be documented in this Change Summary section.

Nursing Workforce Measure Specifications

Important Note: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Total Nursing Care Hours per Patient Day, RN Hours per Patient Day, and Nursing Skill Mix Measure Specifications

Source: American Nurses Association (ANA) (National Quality Forum #0204 and #0205)

Reporting Period: 12 months

- Survey submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Hospitals that report this data to NDNQI® (National Database of Nursing Quality Indicators®):
Data for this measure can be obtained directly from NDNQI. See details below.

Hospitals that submit nursing care hours and patient days to NDNQI will be able to respond to questions #5 - 14 in Section 5C. Active NDNQI clients should email NDNQISupport@PressGaney.com or call 855-304-9788 to connect with one of NDNQI's team members and specify that they are requesting support for the purposes of Leapfrog Hospital Survey reporting on Total Nursing Care Hours per Patient Day, RN Hours per Patient Day, and Nursing Skill Mix. For 2025, additional support for these calculations for active NDNQI clients with eligible data will be provided at no additional cost.

For NDNQI units to include, please reach out directly to ndnqisupport@pressganey.com.

Hospitals that do not report this data to NDNQI:
Data for this measure can be obtained using the measure specifications below.

Question #2: Does your hospital operate at least one adult or pediatric single acuity Medical, Surgical, or Med-Surg Unit?

Leapfrog has aligned with the National Database of Nursing Quality Indicators' (NDNQI) unit definitions below.

Single Acuity Medical Unit (adult and pediatric):

A single acuity general care unit in which at least 90% of the patients are admitted to medical services, such as internal medicine, oncology, or cardiology. Medical specialty units such as Cardiac Medical, GI Medical, Infectious Disease Medical, Neurology Medical, Hematology/Oncology Medical, Renal Medical, and Respiratory Medical, are also included.

Single Acuity Surgical Unit (adult and pediatric):

A single acuity general care unit in which at least 90% of the patients are admitted to surgical services, such as general surgery, neurosurgery, or orthopedics. Surgical specialty units such as Bariatric Surgery, Cardio-thoracic Surgery, Gynecologic Surgery, Neurosurgery, Orthopedic Surgery, Plastic Surgery, Transplant Surgery, and Trauma Surgery, are also included.

Single Acuity Med-Surg Combined Unit (adult and pediatric):

A single acuity general care unit that cares for patients admitted for medical, surgical, or family practice services and does not meet the 90% criteria for Medical or Surgical unit type. Specialty med-surg units such as Cardiac Med-Surg, Neuro/Neurosurgery Med-Surg, and Hematology/Oncology Med-Surg, are also included.

Excluded units:

- Labor and Delivery
- Neonatal

- Critical Access Unit: a unit where more than 10% of beds are for skilled nursing (swing beds)
- Rehabilitation
- Psychiatric
- Perioperative
- Critical Care
- Step Down/Progressive
- Hospice
- Mixed Acuity Units: a unit where more than 10% of the patients in the unit receive varying levels of care (e.g., general medical care and progressive care or intensive care)
- Units with fewer than 15 patient days per month for all 3 months of any quarter of the reporting period
- Units that transitioned to an excluded unit type during the reporting period (e.g., a single acuity Medical Unit transitioned to a critical care unit during the reporting period)

Question #3: If your hospital does not operate at least one adult or pediatric single acuity Medical, Surgical, or Med-Surg Unit, does your hospital operate at least one adult or pediatric mixed acuity Medical, Surgical, or Med-Surg Unit?

Leapfrog has aligned with the National Database of Nursing Quality Indicators' (NDNQI) unit definitions below.

Mixed Acuity Medical, Surgical and Med-Surg Units (adult and pediatric):

A unit where more than 10% of patients receive varying levels of care.

Types of mixed acuity units include the following:

High Acuity Medical, Surgical and Med-Surg Units:

A mixed acuity unit in which 50-89% of the patients are critical care and the remaining 11-49% can be any other acuity level.

Moderate Acuity Medical, Surgical and Med-Surg Units:

A mixed acuity unit in which 25-49% of the patients are critical care OR 50-89% of the patients are step down care. The remaining percent can be any other acuity level.

Blended Acuity Medical, Surgical and Med-Surg Units:

A mixed acuity acute care unit in which less than 90% of the patients receive a single acuity level of care, less than 50% receive step down care, and less than 25% receive critical care.

Excluded units:

- Cardiac
- Neurology
- Hematology/Oncology
- Critical Access (a unit where more than 10% of beds are for skilled nursing (swing beds))
- Units with fewer than 15 patient days per month for all 3 months of any quarter of the reporting period
- Units that transitioned to an excluded unit type during the reporting period (e.g., a mixed acuity Medical Unit transitioned to a critical care unit during the reporting period)

Question #5: Which method did your hospital use to calculate the total number of patient days for each single acuity Medical, Surgical, Med-Surg or mixed acuity Medical, Surgical or Med-Surg Unit?

- **Midnight Census (including observation patients):** The sum of the daily midnight census counts (the number of *all* patients on the unit at midnight each day) during the reporting period. Short stay patients (who are in and out of the unit before the census count is taken) should be included; otherwise, this method cannot be used.
- **Midnight Census and Patient Days from Actual Hours for Short Stay Patients:** A combination of Midnight Census and Patient Days from Actual Hours collected during the reporting period.

- **Patient Days from Actual Hours:** The sum of the actual hours for all patients during the reporting period divided by 24; typically obtained from an accounting system that tracks the actual time spent in the hospital by each patient.
- **Patient Days from Multiple Census Reports:** The sum of the daily average censuses collected during the reporting period; typically collected multiple times per day (e.g., every 4 hours or each shift).

Note: Patient days should be calculated to include all patients in adult and pediatric single acuity Medical, Surgical, Med-Surg or mixed acuity Medical, Surgical or Med-Surg Units. This includes patients that do not have inpatient status (i.e., observation patients).

Hospitals that operate adult or pediatric **single acuity** Medical, Surgical, or Med-Surg Units should use the measure specifications directly below to respond to questions #6-11.

Hospitals that operate adult or pediatric **mixed acuity** Medical, Surgical, or Med-Surg Units should use the measure specifications for **mixed acuity** units to respond to questions #12-14.

Single Acuity Adult or Pediatric Medical, Surgical, or Med-Surg Units (questions #6-11)

Question #6: Does your hospital operate any adult or pediatric single acuity Medical Units?

Single Acuity Medical Unit (adult and pediatric):

A single acuity general care unit in which at least 90% of the patients are admitted to medical services, such as internal medicine, oncology, or cardiology. Medical specialty units such as Cardiac Medical, GI Medical, Infectious Disease Medical, Neurology Medical, Hematology/Oncology Medical, Renal Medical, and Respiratory Medical, are also included.

Excluded units:

- Labor and Delivery
- Neonatal
- Critical Access (a unit where more than 10% of beds are for skilled nursing (swing beds))
- Rehabilitation
- Psychiatric
- Perioperative
- Critical Care
- Step Down/Progressive
- Hospice
- Mixed Acuity Units: a unit where more than 10% of the patients in the unit are receive varying levels of care (e.g., general medical care and progressive care or intensive care)
- Units with fewer than 15 patient days per month for all 3 months of any quarter of the reporting period
- Units that transitioned to an excluded unit type during the reporting period (e.g., a single acuity Medical Unit transitioned to a critical care unit during the reporting period)

Question #7: Single Acuity Medical Units

Enter your hospital's responses for each quarter for all adult and pediatric single acuity **Medical Units** for the reporting period selected in question #1.

Question #7(a): Total number of patient days across all adult and pediatric single acuity **Medical Units** during each quarter of the reporting period based on your hospital's method for counting patient days.

Patient days should be calculated to include all patients in adult and pediatric single acuity Medical Units. This includes patients that do not have inpatient status (i.e., observation patients).

Question #7(b): Total number of productive hours worked by employed and contracted **nursing staff (RN, LPN/LVN, and UAP)** with direct patient care responsibilities in all adult and pediatric single acuity **Medical Units** during each quarter of the reporting period.

Productive Hours

Include the following hours worked by employed and contracted RNs, LPN/LVNs, and UAPs:

- Actual direct patient care hours worked by nursing staff
- Overtime spent performing direct patient care
- Orientation hours for new hires that are considered part of the unit's staffing matrix, whose work hours are charged to the unit's cost center, and who would be replaced if they called out sick
- Sitter hours authorized for both physical touch and direct patient care intervention

Exclude the following hours worked by employed and contracted RN, LPN/LVN, and UAP:

- Budgeted or scheduled hours
- Vacation time, sick time, education leave, or committee time
- Orientation hours for new hires that are not considered part of the unit's staffing matrix, whose work hours are not charged to the unit's cost center, and would not be replaced if they call out sick
- Hours from when the unit was staffed but there were no patients in the unit
 - If these nursing hours cannot be removed, then the unit should not be included.
- Virtual or remote hours
- Sitter hours without authorization for both physical touch and direct patient care intervention

Employed and Contracted Nursing Staff

Include the following RN, LPN/LVN, and UAP nursing staff:

- Staff employed by the hospital
- Temporary staff who are not employed by the hospital (i.e., contracted/agency staff)
- Float staff who are assigned to a unit other than their unit of employment on an as-needed basis if they are assigned direct patient care responsibilities
- Staff who are counted in the unit's staffing matrix, are replaced if they call out sick, and whose work hours are charged to the unit's cost center

Exclude the following RN, LPN/LVN, and UAP nursing staff:

- Nursing staff whose primary responsibility is administrative in nature (at least 50% of their time is administrative)
- Specialty teams, patient educators, or case managers who are not assigned to a specific unit
- Unit secretaries or clerks, monitor technicians, and others with no direct patient care responsibilities
- Advanced Practice Registered Nurses (APRNs), including certified nurse-midwife (CNM), clinical nurse specialist (CNS), certified nurse practitioner (CNP), and certified registered nurse anesthetist (CRNA)

A UAP is any unlicensed person, regardless of title, who performs tasks delegated by a nurse. This includes certified nursing aides/assistants (CNAs), patient care assistants (PCAs), patient care technicians (PCTs), state-tested nursing assistants (STNA), nursing assistants-registered (NA/Rs) or certified medication aides/assistants (MA-Cs).

Direct Patient Care Responsibilities

Direct Patient Care Responsibilities are defined as patient centered nursing activities by hospital unit-based staff in the presence of the patient and activities that occur away from the patient that are patient related:

- Medication administration
- Nursing treatments
- Nursing rounds
- Admission, transfer, discharge activities
- Patient teaching
- Patient communication

- Coordination of patient care
- Documentation time
- Treatment planning
- Patient screening (e.g., fall risk) and assessment

Questions #7(c): Total number of productive hours worked by **RN nursing staff** with direct patient care responsibilities in all adult and pediatric single acuity **Medical Units** in each quarter.

Include the total number of productive work hours worked by employed and contracted **RN nursing staff ONLY** from question 7B.

Question #8: Does your hospital operate any adult or pediatric single acuity Surgical Units?

Single Acuity Surgical Unit (adult and pediatric):

A single acuity general care unit in which at least 90% of the patients are admitted to surgical services, such as general surgery, neurosurgery, or orthopedics. Surgical specialty units such as Bariatric Surgery, Cardio-thoracic Surgery, Gynecologic Surgery, Neurosurgery, Orthopedic Surgery, Plastic Surgery, Transplant Surgery, and Trauma Surgery, are also included.

Excluded units:

- Labor and Delivery
- Neonatal
- Critical Access (a unit where more than 10% of beds are for skilled nursing (swing beds))
- Rehabilitation
- Psychiatric
- Perioperative
- Critical Care
- Step Down/Progressive
- Hospice
- Mixed Acuity Units: a unit where more than 10% of the patients in the unit are receive varying levels of care (e.g., general medical care and progressive care or intensive care)
- Units with fewer than 15 patient days per month for all 3 months of any quarter of the reporting period
- Units that transitioned to an excluded unit type during the reporting period (e.g., a single acuity Medical Unit transitioned to a critical care unit during the reporting period)

Question #9: Single Acuity Surgical Units

Enter your hospital's responses for each quarter for all adult and pediatric single acuity **Surgical Units** for the reporting period selected in question #1.

Question #9(a): Total number of patient days across all adult and pediatric single acuity **Surgical Units** during each quarter of the reporting period based on your hospital's method for counting patient days.

Patient days should be calculated to include all patients in adult and pediatric single acuity Surgical Units. This includes patients that do not have inpatient status (i.e., observation patients).

Question #9(b): Total number of productive hours worked by employed and contracted **nursing staff (RN, LPN/LVN, and UAP)** with direct patient care responsibilities in all single acuity adult and pediatric **Surgical Units** in each quarter.

Productive Hours

Include the following hours worked by employee and contract RNs, LPN/LVNs, and UAPs:

- Actual direct patient care hours worked by nursing staff
- Overtime spent performing direct patient care
- Orientation hours for new hires that are considered part of the unit's staffing matrix, whose work hours are charged to the unit's cost center, and who would be replaced if they called out sick
- Sitter hours authorized for both physical touch and direct patient care intervention

Exclude the following hours worked by employed and contracted RN, LPN/LVN, and UAP:

- Budgeted or scheduled hours
- Vacation time, sick time, education leave, or committee time
- Orientation hours for new hires that are not considered part of the unit's staffing matrix, whose work hours are not charged to the unit's cost center, and would not be replaced if they call out sick
- Hours from when the unit was staffed but there were no patients in the unit
 - If these nursing hours cannot be removed, then the unit should not be included.
- Virtual or remote hours
- Sitter hours without authorization for both physical touch and direct patient care intervention

Employed and Contracted Nursing Staff

Include the following RN, LPN/LVN, and UAP nursing staff:

- Staff employed by the hospital
- Temporary staff who are not employed by the hospital (i.e., contracted/agency staff)
- Float staff who are assigned to a unit other than their unit of employment on an as-needed basis if they are assigned direct patient care responsibilities
- Staff who are counted in the unit's staffing matrix, are replaced if they call out sick, and whose work hours are charged to the unit's cost center

Exclude the following RN, LPN/LVN, and UAP nursing staff:

- Nursing staff whose primary responsibility is administrative in nature (at least 50% of their time is administrative)
- Specialty teams, patient educators, or case managers who are not assigned to a specific unit
- Unit secretaries or clerks, monitor technicians, and others with no direct patient care responsibilities
- Advanced Practice Registered Nurses (APRNs), including certified nurse-midwife (CNM), clinical nurse specialist (CNS), certified nurse practitioner (CNP), and certified registered nurse anesthetist (CRNA)

A UAP is any unlicensed person, regardless of title, who performs tasks delegated by a nurse. This includes certified nursing aides/assistants (CNAs), patient care assistants (PCAs), patient care technicians (PCTs), state-tested nursing assistants (STNA), nursing assistants-registered (NA/Rs) or certified medication aides/assistants (MA-Cs).

Direct Patient Care Responsibilities

Direct Patient Care Responsibilities are defined as patient centered nursing activities by hospital unit-based staff in the presence of the patient and activities that occur away from the patient that are patient related:

- Medication administration
- Nursing treatments
- Nursing rounds
- Admission, transfer, discharge activities
- Patient teaching
- Patient communication
- Coordination of patient care
- Documentation time
- Treatment planning
- Patient screening (e.g., fall risk) and assessment

Questions #9(c): Total number of productive hours worked by **RN nursing staff** with direct patient care responsibilities in all adult and pediatric single acuity **Surgical Units** in each quarter.

Include the total number of productive work hours worked by employed and contracted **RN nursing staff ONLY** from question 9b.

Question #10: Does your hospital operate any adult or pediatric single acuity Med-Surg Units?

Single Acuity Med-Surg Combined Unit (adult and pediatric):

A single acuity general care unit that cares for patients admitted for medical, surgical, or family practice services and does not meet the 90% criteria for Medical or Surgical unit type. Specialty med-surg units such as Cardiac Med-Surg, Neuro/Neurosurgery Med-Surg, and Hematology/Oncology Med-Surg, are also included.

Excluded units:

- Labor and Delivery
- Neonatal
- Critical Access (a unit where more than 10% of beds are for skilled nursing (swing beds))
- Rehabilitation
- Psychiatric
- Perioperative
- Critical Care
- Step Down/Progressive
- Hospice
- Mixed Acuity Units: a unit where more than 10% of the patients in the unit are receive varying levels of care (e.g., general medical care and progressive care or intensive care)
- Units with fewer than 15 patient days per month for all 3 months of any quarter of the reporting period
- Units that transitioned to an excluded unit type during the reporting period (e.g., a single acuity Medical Unit transitioned to a critical care unit during the reporting period)

Question #11: Single Acuity Med-Surg Units

Enter your hospital's responses for each quarter for all adult and pediatric single acuity **Med-Surg Units** for the reporting period selected in question #1.

Question #11(a): Total number of patient days across all adult and pediatric single acuity **Med-Surg Units** for each quarter included in the reporting period based on your hospital's method for counting patient days.

Patient days should be calculated to include all patients in adult and pediatric single acuity Med-Surg Units. This includes patients that do not have inpatient status (i.e., observation patients).

Question #11(b): Total number of productive hours worked by employed and contracted **nursing staff (RN, LPN/LVN, and UAP)** with direct patient care responsibilities in all single acuity adult and pediatric **Med-Surg Units** in each quarter.

Productive Hours

Include the following hours worked by employed and contracted RNs, LPN/LVNs, and UAPs:

- Actual direct patient care hours worked by nursing staff
- Overtime spent performing direct patient care
- Orientation hours for new hires that are considered part of the unit's staffing matrix, whose work hours are charged to the unit's cost center, and who would be replaced if they called out sick
- Sitter hours authorized for both physical touch and direct patient care intervention

Exclude the following hours worked by employed and contracted RN, LPN/LVN, and UAP:

- Budgeted or scheduled hours
- Vacation time, sick time, education leave, or committee time
- Orientation hours for new hires that are not considered part of the unit's staffing matrix, whose work hours are not charged to the unit's cost center, and would not be replaced if they call out sick
- Hours from when the unit was staffed but there were no patients in the unit
 - If these nursing hours cannot be removed, then the unit should not be included.
- Virtual or remote hours
- Sitter hours without authorization for both physical touch and direct patient care intervention

Employed and Contracted Nursing Staff

Include the following RN, LPN/LVN, and UAP nursing staff:

- Staff employed by the hospital
- Temporary staff who are not employed by the hospital (i.e., contracted/agency staff)
- Float staff who are assigned to a unit other than their unit of employment on an as-needed basis if they are assigned direct patient care responsibilities
- Staff who are counted in the unit's staffing matrix, are replaced if they call out sick, and whose work hours are charged to the unit's cost center

Exclude the following RN, LPN/LVN, and UAP nursing staff:

- Nursing staff whose primary responsibility is administrative in nature (at least 50% of their time is administrative)
- Specialty teams, patient educators, or case managers who are not assigned to a specific unit
- Unit secretaries or clerks, monitor technicians, and others with no direct patient care responsibilities
- Advanced Practice Registered Nurses (APRNs), including certified nurse-midwife (CNM), clinical nurse specialist (CNS), certified nurse practitioner (CNP), and certified registered nurse anesthetist (CRNA)

A UAP is any unlicensed person, regardless of title, who performs tasks delegated by a nurse. This includes certified nursing aides/assistants (CNAs), patient care assistants (PCAs), patient care technicians (PCTs), state-tested nursing assistants (STNA), nursing assistants-registered (NA/Rs) or certified medication aides/assistants (MA-Cs).

Direct Patient Care Responsibilities

Direct Patient Care Responsibilities are defined as patient centered nursing activities by hospital unit-based staff in the presence of the patient and activities that occur away from the patient that are patient related:

- Medication administration
- Nursing treatments
- Nursing rounds
- Admission, transfer, discharge activities
- Patient teaching
- Patient communication
- Coordination of patient care
- Documentation time
- Treatment planning
- Patient screening (e.g., fall risk) and assessment

Questions #11(c): Total number of productive hours worked by **RN nursing staff** with direct patient care responsibilities in all adult and pediatric single acuity **Med-Surg Units** in each quarter.

Include the total number of productive work hours worked by RN nursing staff ONLY from question 11b.

Mixed Acuity Adult or Pediatric Medical, Surgical, or Med-Surg Units (questions #12-14)

Question #12: Was your adult and/or pediatric mixed acuity Medical, Surgical, or Med-Surg Unit(s) open for the entire reporting period?

Leapfrog has aligned with the National Database of Nursing Quality Indicators' (NDNQI) unit definitions below.

Excluded units:

- Cardiac

- Neurology
- Hematology/Oncology
- Critical Access (a unit where more than 10% of beds are for skilled nursing (swing beds))
- Units with fewer than 15 patient days per month for all 3 months of any quarter of the reporting period
- Units that transitioned to an excluded unit type during the reporting period (e.g., a mixed acuity Medical Unit transitioned to a critical care unit during the reporting period)

Question #13: What type(s) of adult and/or pediatric mixed acuity Medical, Surgical or Med-Surg Units does your hospital operate?

Leapfrog has aligned with the National Database of Nursing Quality Indicators' (NDNQI) unit definitions below.

High Acuity Medical, Surgical and Med-Surg Units:

A mixed acuity unit in which 50-89% of the patients are critical care and the remaining 11-49% can be any other acuity level.

Moderate Acuity Medical, Surgical and Med-Surg Units:

A mixed acuity unit in which 25-49% of the patients are critical care OR 50-89% of the patients are step down care. The remaining percent can be any other acuity level.

Blended Acuity Medical, Surgical and Med-Surg Units:

A mixed acuity acute care unit in which less than 90% of the patients receive a single acuity level of care, less than 50% receive step down care, and less than 25% receive critical care.

Question #14: Mixed Acuity Medical, Surgical and Med-Surg Units

Enter your hospital's responses for each quarter for all adult and pediatric mixed acuity Medical, Surgical and Med-Surg Units for the reporting period selected in question #1.

Question #14(a): Total number of patient days across all adult and pediatric **mixed acuity Medical, Surgical and Med-Surg Units** for each quarter included in the reporting period based on your hospital's method for counting patient days.

Patient days should be calculated to include all patients in all adult and pediatric mixed acuity Medical, Surgical or Med-Surg Units. This includes patients that do not have inpatient status (i.e., observation patients).

Question #14(b): Total number of productive hours worked by employed and contracted **nursing staff (RN, LPN/LVN, and UAP)** with direct patient care responsibilities in all adult and pediatric **mixed acuity Medical, Surgical, and Med-Surg Units** in each quarter.

Productive Hours

Include the following hours worked by employed and contracted RNs, LPN/LVNs, and UAPs:

- Actual direct patient care hours worked by nursing staff
- Overtime spent performing direct patient care
- Orientation hours for new hires that are considered part of the unit's staffing matrix, whose work hours are charged to the unit's cost center, and who would be replaced if they called out sick
- Sitter hours authorized for both physical touch and direct patient care intervention

Exclude the following hours worked by employed and contracted RN, LPN/LVN, and UAP:

- Budgeted or scheduled hours
- Vacation time, sick time, education leave, or committee time
- Orientation hours for new hires that are not considered part of the unit's staffing matrix, whose work hours are not charged to the unit's cost center, and would not be replaced if they call out sick
- Hours from when the unit was staffed but there were no patients in the unit
 - If these nursing hours cannot be removed, then the unit should not be included.
- Virtual or remote hours
- Sitter hours without authorization for both physical touch and direct patient care intervention

Employed and Contracted Nursing Staff

Include the following RN, LPN/LVN, and UAP nursing staff:

- Staff employed by the hospital
- Temporary staff who are not employed by the hospital (i.e., contracted/agency staff)
- Float staff who are assigned to a unit other than their unit of employment on an as-needed basis if they are assigned direct patient care responsibilities
- Staff who are counted in the unit's staffing matrix, are replaced if they call out sick, and whose work hours are charged to the unit's cost center

Exclude the following RN, LPN/LVN, and UAP nursing staff:

- Nursing staff whose primary responsibility is administrative in nature (at least 50% of their time is administrative)
- Specialty teams, patient educators, or case managers who are not assigned to a specific unit
- Unit secretaries or clerks, monitor technicians, and others with no direct patient care responsibilities
- Advanced Practice Registered Nurses (APRNs), including certified nurse-midwife (CNM), clinical nurse specialist (CNS), certified nurse practitioner (CNP), and certified registered nurse anesthetist (CRNA)

A UAP is any unlicensed person, regardless of title, who performs tasks delegated by a nurse. This includes certified nursing aides/assistants (CNAs), patient care assistants (PCAs), patient care technicians (PCTs), state-tested nursing assistants (STNA), nursing assistants-registered (NA/Rs) or certified medication aides/assistants (MA-Cs).

Direct Patient Care Responsibilities

Direct Patient Care Responsibilities are defined as patient centered nursing activities by hospital unit-based staff in the presence of the patient and activities that occur away from the patient that are patient related:

- Medication administration
- Nursing treatments
- Nursing rounds
- Admission, transfer, discharge activities
- Patient teaching
- Patient communication
- Coordination of patient care
- Documentation time
- Treatment planning
- Patient screening (e.g., fall risk) and assessment

Question #14(c): Total number of productive hours worked by **RN nursing staff** with direct patient care responsibilities in all adult and pediatric **mixed acuity Medical, Surgical, and Med-Surg Units** in each quarter.

Include the total number of productive work hours worked by employed and contracted RN nursing staff **ONLY** from question 14b.

See [FAQs](#) for additional information about responding to the questions in this section.

Percentage of RNs who are BSN-Prepared Specifications

Source: The Leapfrog Group
Reporting Period: Answer questions #17-19 based on the most recent day within the last 12-months for which you have complete data.
Question #18 (denominator): Total number of employed RN nursing staff at the hospital with direct patient care responsibilities. <u>Included RN Nursing Staff:</u> • Staff employed by the hospital in most all hospital units, including observation, <u>co-located</u>³¹ outpatient units, and emergency departments who: ○ Are counted in the unit's staffing matrix, and ○ Are replaced if they call in sick, and ○ Whose work hours are charged to the unit's cost center • Float staff who are assigned to a unit other than their unit of employment on an as-needed basis if they are assigned direct patient care responsibilities <u>Excluded RN Nursing staff:</u> • Staff that are not employed by the hospital (i.e., contracted/agency staff) • Staff that are exclusively assigned to skilled nursing units or mixed acuity neonatal units • Staff that are part of specialty teams or are patient educators or case managers who are not assigned to a specific unit • Unit secretaries or clerks or others with no direct patient care responsibilities • Staff that are primarily responsible for administrative tasks (at least 50% of their time is administrative) • Advanced Practice Registered Nurses (APRNs), including certified nurse-midwife (CNM), clinical nurse specialist (CNS), certified nurse practitioner (CNP), and certified registered nurse anesthetist (CRNA) <u>Direct Patient Care Responsibilities</u> are defined as patient centered nursing activities by hospital unit-based staff in the presence of the patient and activities that occur away from the patient that are patient related: • Medication administration • Nursing treatments • Nursing rounds • Admission, transfer, discharge activities • Patient teaching • Patient communication • Coordination of patient care • Documentation time • Treatment planning • Patient screening (e.g., fall risk) and assessment Question #19 (numerator): Total number of employed RN nursing staff at the hospital with direct patient care responsibilities who have a BSN degree or higher (e.g., MSN, DNP, and PhD). Note: Hospitals can use any method to identify RN nursing staff who have a BSN degree or higher, including: • NDNQI Annual RN Survey • Data collected by the nurse managers at the hospital • Information from HR or credentialing office, or • Staff survey via SurveyMonkey or other free data collection tool.

See [FAQs](#) for additional information about responding to the questions in this section.

Section 5: Physician and Nurse Staffing Frequently Asked Questions (FAQs)

Adult and Pediatric ICU Physician Staffing FAQs

ICU General Questions

1. What is the reporting period for the ICU measure?

Hospitals should report on Section 5A and 5B based on their staffing structure at the time they submit this section of the Survey. The staffing structure must have been in place for at least the past 3 months and should reflect the ordinary staffing structure for the ICU.

2. How should hospitals report if they have more than one type of qualifying ICU?

If your hospital has more than one applicable ICU (i.e., multiple adult ICUs or multiple pediatric ICUs), respond to all questions in each section based on the ICU that has the lowest level of staffing by physicians certified in critical care medicine. Review endnote 34 for more information.

3. Does Leapfrog's ICU standard apply to mixed acuity units? A multi-organizational service unit (MOSU) unit?

The standard applies to all adult and pediatric general medical, surgical, medical/surgical, and neuro critical care patients (medical and surgical), including those patients in mixed acuity units and other non-critical care units.

4. Are cardiac critical care patients in a general medical, surgical, and medical/surgical ICU required to be co-managed by an intensivist?

Cardiac critical care patients in a general medical, surgical, or medical/surgical ICU that are in beds dedicated to cardiac critical care patients and being cared for by dedicated cardiac physicians (e.g., cardiologist or cardiac surgeon) and nursing staff are not included in Leapfrog's ICU Physician Staffing standard and do not need to be managed/co-managed by the intensivist. However, cardiac critical care patients in a general medical, surgical, or medical/surgical ICU bed being cared for by general medical or surgical critical care physicians and nursing staff are included in the standard and do need to be managed/co-managed by the intensivist. Additional clarification is available here.

5. Does Leapfrog's ICU Physician Staffing standard include cardiac critical care patients?

For the purposes of reporting on Section 5A and 5B, cardiac critical care patients in general medical, surgical, or medical/surgical ICU beds being cared for by general medical and/or surgical critical care physicians and nursing staff are included in the standard and need to be managed/co-managed by the intensivist. Cardiac critical care patients in a general medical, surgical, or medical/surgical ICU that are in beds dedicated to cardiac critical care patients and being cared for by dedicated cardiac physicians (e.g., cardiologist or cardiac surgeon) and nursing staff are not included in Leapfrog's ICU Physician Staffing standard and do not need to be managed/co-managed by the intensivist.

ICU Certification

6. Is there any empirical basis for specifying a minimum annual number of days of ICU experience for each board-eligible physician providing ICU care?

No. Accordingly, if it is added to the Leapfrog standard in the future, it will be based on newly published research and expert advice.

7. Do all intensivists serving as tele-intensivists need to meet Leapfrog's definition of "certified in critical care medicine"?

Yes. All intensivists who serve as tele-intensivists do need to meet Leapfrog's definition of "certified in critical care medicine."

8. Is a physician who is awaiting the results of the certification test considered “certified in critical care medicine”?

A physician is considered certified in critical care medicine as long as the board that originally certified the physician in critical care medicine deems that physician certified. Intensivists that are close to having their certification lapse should check with the board that certified them to see how exactly that board defines a lapsed certification.

9. Are physicians board certified in critical care medicine from the American Osteopathic Association (AOA) considered “certified in critical care medicine” for Leapfrog’s ICU Physician Staffing Standard?

Yes. Physicians with a board certification in critical care from American Osteopathic Association (AOA) are considered “certified in critical care medicine.”

10. How should intensivists trained in critical medicine in a foreign country be treated for purposes of meeting the ICU Physician Staffing (IPS) Standard?

Foreign trained physicians who were certified in critical care medicine in the country in which they trained would be considered certified for the purposes of the ICU Physician Staffing (IPS) standard.

ICU Telemedicine

11. Can you clarify what you mean by combined presence of tele-intensivists and on-site intensivists, as needed, for 24 hours per day/7 days per week in question #6 for Sections 5A and 5B?

Hospitals can achieve Leapfrog’s IPS Standard by having daily on-site intensivist coverage combined with a telemedicine service that meets all ten of the Leapfrog requirements. For example, an on-site intensivist takes two hours in the morning to establish and revise the daily care plan for each ICU patient, then a tele-intensivist picks up management or co-management of the ICU patients and is continually monitoring all critical care patients for the remaining 22 hours, for a combined total of 24 hours per day/7 days per week.

Hospitals should minimize the number of hand-offs between the on-site intensivist and the tele-intensivist during a 24-hour period and maximize the continuous time that one type of intensivist is caring for critical care patients. **Leapfrog does not recommend more than 4 hand-offs per 24 hours.**

12. Our hospital uses a telemedicine service to provide coverage in our ICU for 16 hours/7 days per week coverage when the on-site intensivist is not present at the hospital. Can our hospital still fully meet Leapfrog’s standard?

Hospitals that use telemedicine to cover “call” for the on-site intensivist are able to fully meet Leapfrog’s standard if: (1) the telemedicine service meets all ten of the Leapfrog requirements; and (2) the hospital has an “effector” (physician/PA/NP/FCCS-certified nurse or intern) on-site during that time period to carry out the tele-intensivist’s orders and can reach the ICU patient within 5 minutes, 95% of the time.

ICU Response Time

13. Does Leapfrog specify standards for second tier calls (e.g., the initial call to a physician is not answered within 5 minutes)?

No. We do not intend to reach this level of detail in our specifications, absent a compelling case that the gain would offset its added complexity.

14. Are there definitions for what constitutes high and low urgency calls/pages/texts?

No, and hospitals don’t have to focus only on high urgency calls/pages/texts, but some notification device systems can make this differentiation, and, in these instances, low urgency calls/pages/texts can be excluded from the analysis of response times.

- 15. If my hospital has few instances where there is no intensivist coverage, how should we conduct the response time audit? Can we perform mock pages to satisfy the intent?**
Unannounced mock pages would meet the intent. For the audit to be reliable, 20 unannounced mock pages over 90 days should be evaluated.
- 16. When an intensivist is not on-site in the ICU, can hospitals use a non-FCCS-certified CRNA as the “effector?”**
No. To serve as the “effector,” CRNAs require FCCS-certification.
- 17. When an intensivist is not on-site in the ICU, can hospitals use FCCS-certified interns as the “effector?”**
Yes. An FCCS-certified intern can serve as the “effector.”

ICU Rounding

- 18. How does Leapfrog define “makes on-site daily rounds” for clinical pharmacists in question #13 within Sections 5A and 5B?**
A clinical pharmacist would need to make on-site daily rounds (5 or 7 days per week) on **all** critical care patients (not some or most critical care patients) in **all** applicable ICUs (adult or pediatric general medical, surgical, medical/surgical, and neuro ICUs).
- Please note that if your clinical pharmacist is rounding 5 days per week, then, during the other 2 days per week, a clinical pharmacist still needs to respond to calls/texts/pages within 5 minutes, as determined by a response time audit.
- 19. Are pharmacy residents considered clinical pharmacists in question #13 within Sections 5A and 5B?**
To be considered a clinical pharmacist, Leapfrog only requires that the pharmacist have a Doctor of Pharmacy (PharmD) degree. Therefore, a PharmD graduate completing a residency would meet Leapfrog’s criterion to be considered a clinical pharmacist.
- 20. What roles should be included in interprofessional rounds in question #14 within Sections 5A and 5B?**
For rounds to be considered interprofessional, the team should include 3 or more persons. Typical personnel that would be part of the rounding team include physician, nurse, pharmacist, physical and/or occupational therapist, and nutritionist.

Total Nursing Care Hours per Patient Day, RN Hours per Patient Day, and Nursing Skill Mix FAQs

- 21. Why has Leapfrog aligned their unit type definitions with NDNQI?**
Though NDNQI participation is not required to report on the Total Nursing Care Hours per Patient Day, RN Hours per Patient Day, or Nursing Skill Mix measures, a number of hospitals participate in NDNQI and have data available to report to the Leapfrog Hospital Survey.
- 22. How is patient acuity defined?**
Patient acuity is the level of care that patients are receiving. The three levels of care are:
- critical care (highest level of acuity)
 - step down (lower level of acuity that patients in a critical care unit yet a higher level of acuity than is provided on a general care unit)
 - general care

Single acuity medical, surgical and med-surg units are units where at least 90% of the patients receive general care. Mixed acuity medical, surgical and med-surg units are units where less than 90% of the patients receive a single acuity level of care (more than 10% of patient receive varying levels of care).

NQF Safe Practice #9 – Nursing Workforce FAQs**23. How do I know if my hospital is eligible to report it has a current Pathways to Excellence designation?**

Hospitals that applied for Pathway to Excellence designation beginning in January 2021 and onward were certified using the 2020 or 2024 Pathways to Excellence® criteria and are eligible to report that they have a current designation.

Hospitals can check the Designation Year or Redesignation Year on the [American Nurses Credentialing Center website](#). If the year is 2021 or later, the hospital meets the Pathways to Excellence® criteria.

24. 15e: If the state has set minimum nurse to patient staffing ratios, do hospitals in that state automatically meet the intent of this element?

No. Minimum ratios do not necessarily address the “adequacy” issue, as the make-up of your hospital’s patient population may require more intensive staffing than is prescribed by the state’s minimum.

25. 15e: What are the minimum requirements to qualify as a “staffing plan?”

“A staffing plan” refers to nursing policies and procedures or a specific process used by the organization to pre-determine appropriate staffing patterns based on usual patient mix and nursing qualifications. A hospital must demonstrate full achievement of its targets.

Organizations must integrate several data sets into a staffing system that predefines and quantifies appropriate staffing targets. These data sets include:

- Historical Data (e.g., patient volumes, acuity levels, and staff volumes of direct caregivers)
- Comparative Data (e.g., comparisons between similar units internally and comparative external data from hospitals of like size and geographic location)
- Clinical Outcomes
- Skill Mix of Staff (e.g., licensing levels and educational training, years of experience, and volume of new graduates on a unit)
- Physical environment (e.g., distance staff have to travel to access support equipment, visibility of patients, locations of nursing stations to patient rooms, etc.)
- Type of patient care needs
- Support services available

Daily monitoring should take place to determine variances between predetermined staffing patterns and actual staffing patterns. If necessary, corrective action should be taken. Regular monitoring should take place to determine the accuracy of targets established and determine adjustments as needed.

Percentage of RNs who are BSN-Prepared FAQs**26. Should RNs with direct patient care responsibilities exclusively assigned to outpatient units or hospital clinics be included when reporting on the Percentage of RNs who are BSN-Prepared measure?**

Yes. The total number of RN nursing staff employed at the hospital should include nurses with direct care responsibilities in most hospital units, including observation, co-located³¹ outpatient units, and emergency departments. Only employed RNs exclusively assigned to Skilled Nursing units or Mixed Acuity Neonatal units should be excluded when reporting on the measure.

Page Intentionally Left Blank

SECTION 6: PATIENT SAFETY PRACTICES

This section includes questions and reference information for Section 6: Patient Safety Practices. Please carefully review the questions, endnotes, and reference information (e.g., measure specifications, notes, and frequently asked questions) before you begin. Failure to review the reference information could result in inaccurate responses.

Section 6: Patient Safety Practices

NQF Safe Practices Fact Sheets:

<https://ratings.leapfroggroup.org/measure/hospital/2025/effective-leadership-prevent-errors>

Hand Hygiene Fact Sheet and Bibliography:

<https://ratings.leapfroggroup.org/measure/hospital/2025/handwashing>

Diagnostic Excellence Bibliography:

<https://ratings.leapfroggroup.org/measure/hospital/2025/whats-new-2025>

Hospital Boarding in the Emergency Department (ED) Bibliography:

<https://ratings.leapfroggroup.org/measure/hospital/2025/whats-new-2025>

Section 6 includes questions about your hospital's adherence to two National Quality Forum-endorsed Safe Practices, and questions about your hospital's hand hygiene practices. It also includes a subsection on diagnostic excellence (6D) and a new subsection on Hospital Boarding in the Emergency Department (ED) (6E) – both subsections are optional and will not be scored or publicly reported.

Each hospital achieving the standard for NQF Safe Practice #1 – Culture of Safety Leadership Structures and Systems and NQF Safe Practice #2 – Culture Measurement, Feedback, and Intervention:

Has earned 100% of points (adopted all elements) for the NQF Safe Practice.

Each hospital achieving the standard for Hand Hygiene:

Has met all elements for the Monitoring domain including collecting compliance data on at least 200 hand hygiene opportunities* each month in each patient care unit. Has also met all elements for the Feedback domain, as well as **2 of the 3** remaining domains for hand hygiene:

- Training and Education Domain
- Infrastructure Domain
- Culture Domain

OR

Has met all elements for the Monitoring domain including collecting compliance data on at least 100 hand hygiene opportunities* each month in each patient care unit, as well as **all 4** remaining domains for hand hygiene:

- Feedback Domain
- Training and Education Domain
- Infrastructure Domain
- Culture Domain

**or at least the number of hand hygiene opportunities outlined based on the unit type in [Tables 1-3](#) or [Tables 4-6](#).*

Download the 2025 Leapfrog Hospital Survey Scoring Algorithm on the [Scoring and Results](#) webpage.

6A: NQF Safe Practice #1 – Culture of Safety Leadership Structures and Systems

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review Leapfrog's Multi-Campus Reporting Policy.

Important Notes:

Note 1: Page numbers throughout this subsection refer to the NQF Safe Practices for Better Healthcare – 2010 Update report, not this document.

Note 2: Hyperlinks throughout this subsection refer to the Patient Safety Practices FAQs beginning on page 251, not to endnotes. These hyperlinks are not included in the Online Survey Tool.

Specifications: See NQF Safe Practice Measure Specifications in the Reference Information beginning on page 238.

Awareness

1.1) Within the last 12 months, in regard to raising the awareness of key stakeholders to our organization's efforts to improve patient safety, the following actions related to the identification and mitigation of risks and hazards have been taken:		
a. <u>board</u> (governance) minutes reflect <u>regular communication</u> regarding all three of the following:		
i. <u>risks and hazards</u> (as defined by <u>NQF Safe Practice #4 – Identification and Mitigation of Risks and Hazards</u>);	☐ Yes	☐ No
ii. <u>culture measurement</u> (as defined by <u>NQF Safe Practice #2 – Culture Measurement, Feedback, and Intervention</u>); and		
iii. <u>progress towards resolution of safety and quality problems</u> . (p.75)		
b. <u>patients and/or families of patients</u> are active participants in the hospital-wide safety and quality <u>committee</u> that meets on a regularly scheduled basis (e.g., biannually or quarterly). (p.75)	☐ Yes	☐ No
c. <u>steps have been taken to report</u> ongoing efforts to improve safety and quality in the organization and the results of these efforts to the community. (p.75)	☐ Yes	☐ No
d. <u>all staff and independent practitioners</u> were made aware of ongoing efforts to reduce risks and hazards and to improve patient safety and quality in the organization. (p.75)	☐ Yes	☐ No

Accountability

1.2) Within the last 12 months, in regard to holding the <u>board, senior administrative leadership, midlevel management, nursing leadership, physician leadership, and frontline caregivers</u> directly accountable for results related to the identification and mitigation of risks and hazards, the organization has done the following:		
a. <u>an integrated patient safety program</u> has been in place for the entire reporting period, providing oversight and alignment of safe practice activities. (p.76)	☐ Yes	☐ No
b. a <u>Patient Safety Officer (PSO)</u> has been appointed and <u>communicates regularly</u> with the <u>board</u> (governance) and <u>senior administrative leadership</u> ; the PSO is the primary point of contact of the integrated patient safety program. (p.76)	☐ Yes	☐ No
c. <u>performance has been documented in performance reviews and/or compensation incentives</u> for all levels of hospital management and hospital-employed caregivers noted above. (p.76)	☐ Yes	☐ No
d. <u>the interdisciplinary patient safety team communicated regularly with senior administrative leadership</u> regarding both of the following and documented these communications in meeting minutes (pp. 76-77):	☐ Yes	☐ No
i. <u>progress in meeting safety goals</u> , and		
ii. <u>provided team training to caregivers</u> .		

2025 Leapfrog Hospital Survey – Hard Copy

Section 6: Patient Safety Practices

e. the hospital <u>reported</u> adverse events to external mandatory or voluntary programs. (p.77)	☐ Yes ☐ No
--	---

Ability

1.3) Within the last 12 months, in regard to implementation of the patient safety program, the <u>board</u> (governance) and <u>senior administrative leadership</u> have provided resources to cover the implementation, as evidenced by:	
a. dedicated patient safety program <u>budgets</u> to support the program, staffing, and technology investment. (p.77)	☐ Yes ☐ No

Action

1.4) Within the last 12 months, structures and systems have been in place to ensure that <u>senior administrative leadership</u> is taking direct action, as evidenced by:	
a. CEO and <u>senior administrative leadership</u> are personally <u>engaged</u> in reinforcing patient safety improvements, e.g., “walk-arounds,” and reporting to the <u>board</u> (governance). Calendars reflect allocated time. (p.78)	☐ Yes ☐ No
b. CEO has actively <u>engaged</u> leaders from <u>service lines, midlevel management, nursing leadership, and physician leadership</u> in patient safety improvement actions. (p.79)	☐ Yes ☐ No
c. hospital has established a <u>structure</u> for input into the patient safety program by licensed independent practitioners and the organized medical staff and physician leadership. Input documented in meeting minutes or materials. (p.79)	☐ Yes ☐ No

6B: NQF Safe Practice #2 – Culture Measurement, Feedback, and Intervention

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Notes:

Note 1: Page numbers throughout this subsection refer to the [NQF Safe Practices for Better Healthcare – 2010 Update](#) report, not this document.

Note 2: Hyperlinks throughout this subsection refer to the [Patient Safety Practices FAQs](#) beginning on page 249, not to endnotes. These hyperlinks are not included in the Online Survey Tool.

Note 3: Throughout this subsection, the culture of safety survey referenced in each practice element refers to one administered in the last 24 months as indicated in 2.1a. This means that the same culture of safety survey should be used when responding to each practice element.

Specifications: See [NQF Safe Practice Measure Specifications](#) in the Reference Information beginning on page 238.

Awareness

2.1) Within the last 24 months, in regard to culture measurement, our organization has done the following:	
a. conducted a culture of safety survey of our employees using a nationally recognized tool that has demonstrated validity, consistency, and reliability. The units surveyed account for at least 50% of the aggregated care delivered to patients within the hospital and include the high patient safety risk units or departments. (p.88)	☐ Yes ☐ No
<i>If "no" to question 2.1a, skip the remaining questions in Section 6B and continue to the next subsection. The hospital will be scored as "Limited Achievement."</i>	
b. portrayed the results of the culture of safety survey in a report, which reflects both hospital-wide and individual unit level results, as applicable. (p.88)	☐ Yes ☐ No
c. benchmarked results of the culture of safety survey against external organizations, such as "like" hospitals or other hospitals within the same health system.	☐ Yes ☐ No
d. compared results of the culture of safety surveys across roles and staff levels .	☐ Yes ☐ No
e. service line, midlevel managers, or senior administrative leaders used the results of the culture of safety survey to debrief at the relevant unit level, using semi-structured approaches for the debriefings and presenting results in aggregate form to ensure the anonymity of survey respondents.	☐ Yes ☐ No

Accountability

2.2) Within the last 24 months, in regard to accountability for improvements in culture measurement, our organization has done the following:	
a. shared the results of the culture of safety survey with the board (governance) and senior administrative leadership in a formal report and discussion. (p.88)	☐ Yes ☐ No
b. included in performance evaluation criteria for senior administrative leadership both the response rates to the culture of safety survey and the use of the culture of safety survey results in the improvement efforts.	☐ Yes ☐ No

Ability

2.3) Within the last 12 months, in regard to culture measurement, the organization has done the following (or has had the following in place):

a. conducted staff <u>education program(s)</u> on methods to improve the culture of safety, tailored to the organization's culture of safety survey results.	☐ Yes ☐ No
b. included the costs of culture measurement/follow-up activities in the patient safety program <u>budget</u> .	☐ Yes ☐ No

Action

2.4) Within the last 12 months, in regard to accountability for improvements in culture measurement, our organization has done the following:

a. developed or implemented explicit, hospital-wide organizational policies and procedures for regular culture measurement. (p.88)	☐ Yes ☐ No
b. <u>disseminated</u> the results of the culture of safety survey widely across the institution, and <u>senior administrative leadership</u> held follow-up meetings with the sampled units to discuss the unit's results and concerns. (p.88)	☐ Yes ☐ No
c. identified performance improvement interventions based on the culture of safety survey results, which were shared with <u>senior administrative leadership</u> and subsequently measured and monitored. (p.88)	☐ Yes ☐ No

6C: Hand Hygiene

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Notes:

Note 1: Hyperlinks not followed by a superscript throughout this subsection refer to the [Patient Safety Practices FAQs](#) beginning on page 251. These hyperlinks are not included in the Online Survey Tool.

Note 2: The framework and questions in this subsection are modeled after the World Health Organization's [Hand Hygiene Self-Assessment Framework](#).

Note 3: Hospital responses should reflect patient care units only, including all adult and pediatric medical, surgical, and medical/surgical units (including telemetry units), step-down/progressive units, obstetrical units, intensive care units (including neonatal units), pre-operative and post-anesthesia care units, observation units, and dedicated emergency department units.

Note 4: Only include units that were open for the entire reporting period (i.e., most recent month or past three months based on responses selected in monitoring questions #8-10) and that remain currently open.

Specifications: See [Hand Hygiene Measure Specifications](#) in the Reference Information beginning on page 237.

Reporting Period: Answer questions #1-21 based on the practices currently in place at the time you submit this section of the Survey.

Note: For monitoring, this means that the monthly sample size (or quarterly sample size if answering question #10) would need to be met at least once in each patient care unit the month (or quarter) preceding the time of the submission of the Survey and there must be a process in place to meet the monthly (or quarterly) sample size thereafter in each patient care unit every month/quarter.

Note: As a reminder, the [Corrections Period](#) (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

Training and Education

1) Do individuals who touch patients or who touch items that will be used by patients⁴⁴ in your patient care units receive hand hygiene training from a <u>professional with appropriate training and skills</u>⁴⁵ at both: - the time of onboarding, and - annually thereafter? <i>If "no" to question #1, skip questions #2-3 and continue to question #4.</i>	☐ Yes ☐ No
2) In order to pass the initial hand hygiene training, do <u>individuals who touch patients or who touch items that will be used by patients</u>⁴⁴ in your patient care units need to <u>physically demonstrate</u> proper hand hygiene with soap and water and alcohol-based hand sanitizer?	☐ Yes ☐ No

2025 Leapfrog Hospital Survey – Hard Copy

Section 6: Patient Safety Practices

3) Are all six of the following topics included in your hospital's initial and annual hand hygiene training: • Evidence linking hand hygiene and infection prevention; • When <u>individuals who touch patients or who touch items that will be used by patients⁴⁴</u> should perform hand hygiene (e.g., <u>WHO's 5 Moments for Hand Hygiene</u>, <u>CDC's Guideline for Hand Hygiene</u>); • How <u>individuals who touch patients or who touch items that will be used by patients⁴⁴</u> should clean their hands with alcohol-based hand sanitizer and soap and water as to ensure they cover all surfaces of hands and fingers, including thumbs and fingernails; • When gloves should be used in addition to hand washing (e.g., caring for <i>C. diff.</i> patients) and how hand hygiene should be performed when gloves are used; • The minimum time that should be spent performing hand hygiene with soap and water and alcohol-based hand sanitizer; and • How hand hygiene compliance is monitored?	☐ Yes ☐ No
---	---

Infrastructure

4) Does your hospital conduct quarterly audits on a sample of dispensers in your patient care units to ensure all the following: • Paper towels, soap dispensers, and alcohol-based hand sanitizer dispensers are refilled when they are empty or near empty, and • Batteries in automated paper towel dispensers, soap dispensers, and alcohol-based hand sanitizer dispensers (if automated dispensers are used in the patient care units) are replaced?	☐ Yes ☐ No
5) Do all rooms and bed spaces in your patient care units have: • an alcohol-based hand sanitizer dispenser located at the entrance to the room or bed space, and • alcohol-based hand sanitizer dispenser(s) located inside the room or bed space that are equally accessible to the location of all patients in the room or bed space?	☐ Yes ☐ No

2025 Leapfrog Hospital Survey – Hard Copy

Section 6: Patient Safety Practices

6) Does your hospital conduct audits of the volume of alcohol-based hand sanitizer that is delivered with each activation of a wall-mounted dispenser (manual and automated) on a sample of dispensers in your patient care units at all the following times: • upon installation, • whenever the brand of product or system changes, and • whenever adjustments are made to the dispensers? OR Has your hospital conducted an audit of the volume of alcohol-based hand sanitizer that is delivered with each activation of a wall-mounted dispenser (manual and automated) on a sample of your hospital's <u>existing</u> dispensers if there have been no changes to any dispensers? <i>If "no" or "does not apply, wall-mounted dispensers are not used," skip question #7 and continue to question #8.</i>	○ Yes ○ No ○ Does not apply, wall-mounted dispensers are not used
7) Do all the audited dispensers deliver, with one activation, 1.0 mL of alcohol-based hand sanitizer OR a volume of alcohol-based hand sanitizer that covers the hands completely and requires 15 or more seconds for hands to dry (on average)?	○ Yes ○ No

Monitoring

8) Does your hospital collect hand hygiene compliance data on at least 200 hand hygiene opportunities, or at least the number of hand hygiene opportunities outlined based on the unit type in Tables 1-3, each month in each patient care unit? <i>If "yes" to question #8, skip questions #9-10 and continue to question #11.</i>	○ Yes, using an electronic compliance monitoring system throughout all patient care units ○ Yes, using an electronic compliance monitoring system throughout some patient care units and only direct observation in all other patient care units ○ Yes, using only direct observation throughout all patient care units ○ No
9) Does your hospital collect hand hygiene compliance data on at least 100 hand hygiene opportunities, or at least the number of hand hygiene opportunities outlined based on the unit type in Tables 4-6, each month in each patient care unit? <i>If "yes" to question #9, skip question #10 and continue to question #11.</i>	○ Yes, using an electronic compliance monitoring system throughout all patient care units ○ Yes, using an electronic compliance monitoring system throughout some patient care units and only direct observation in all other patient care units ○ Yes, using only direct observation throughout all patient care units ○ No

2025 Leapfrog Hospital Survey – Hard Copy

Section 6: Patient Safety Practices

10) Does your hospital collect hand hygiene compliance data on at least 100 hand hygiene opportunities each quarter in each patient care unit? <i>If “no” to question #10, skip questions #11-19 and continue to question #20.</i>	○ Yes, using an electronic compliance monitoring system throughout all patient care units ○ Yes, using an electronic compliance monitoring system throughout some patient care units and only direct observation in all other patient care units ○ Yes, using only direct observation throughout all patient care units ○ No
11) Does your hospital use hand hygiene coaches or compliance observers to provide <u>individuals who touch patients or who touch items that will be used by patients</u>⁴⁴ in your patient care units with feedback on both when they are and are not compliant with performing hand hygiene?	○ Yes ○ No

Direct Monitoring – Electronic Compliance Monitoring System

If “yes, using an electronic compliance monitoring system throughout all patient care units” or “yes, using an electronic compliance monitoring system throughout some patient care units and only direct observation in all other patient care units” to question #8, question #9, or question #10, answer questions #12-13 based on the units that use an electronic compliance monitoring system.

12) In those patient care units where an electronic compliance monitoring system is used, does the monitoring system used meet both of the following criteria: • The system can identify both opportunities for hand hygiene and that hand hygiene was performed, and • The hospital itself has validated the accuracy of the data collected by the electronic compliance monitoring system?	○ Yes ○ No
---	---

13) In those patient care units where an electronic compliance monitoring system is used, are direct observations also conducted for coaching and intervention purposes that meet all the following criteria: • Observers immediately intervene prior to any harm occurring to provide non-compliant individuals with immediate feedback; • Observations identify both opportunities for hand hygiene and compliance with those opportunities; • Observations determine who practiced hand hygiene, verify when they practiced it, and whether their technique was correct; • Observations within a unit are conducted weekly or monthly across all shifts and on all days of the week proportional to the number of <u>individuals who touch patients or who touch items that will be used by patients</u>⁴⁴ on duty for that shift; and • Observations capture a representative sample of the different roles of <u>individuals who touch patients or who touch items that will be used by patients</u>⁴⁴ (e.g., nurses, physicians, techs, environmental services workers)?	☐ Yes ☐ No
--	---

Direct Monitoring – Direct Observation

If “yes, using an electronic compliance monitoring system throughout some patient care units and only direct observation in all other patient care units” or “yes, using only direct observation” to question #8, question #9, or question #10 answer questions #14-15 based on the units that do NOT use an electronic compliance monitoring system.

14) In those patient care units where an electronic compliance monitoring system is NOT used, do the direct observations meet all the following criteria: • Observations identify both opportunities for hand hygiene and compliance with those opportunities; • Observations determine who practiced hand hygiene, verify when they practiced it, and whether their technique was correct; • Observations within a unit are conducted weekly or monthly across all shifts and on all days of the week proportional to the number of <u>individuals who touch patients or who touch items that will be used by patients</u>⁴⁴ on duty for that shift; and • Observations are conducted to capture a representative sample of the different roles of <u>individuals who touch patients or who touch items that will be used by patients</u>⁴⁴ (e.g., nurses, physicians, techs, environmental services workers)?	☐ Yes ☐ No
15) Does your hospital have a system in place for both the initial and recurrent training and validation of hand hygiene compliance observers?	☐ Yes ☐ No

Feedback

16) Are unit-level hand hygiene compliance data fed back to <u>individuals who touch patients or who touch items that will be used by patients⁴⁴</u> at least monthly for improvement work?	☐ Yes ☐ No
17) Are unit-level hand hygiene compliance data used for creating unit-level action plans?	☐ Yes ☐ No
18) Is regular (at least every 6 months) feedback of hand hygiene compliance data, with demonstration of trends over time, given to: • <u>senior administrative leadership, physician leadership, and nursing leadership,</u> • the <u>board</u> (governance), and • the <u>medical executive committee</u>? <i>If “no” to question #18, skip question #19 and continue to question #20.</i>	☐ Yes ☐ No
19) If “yes” to question #18, is <u>senior administrative leadership, physician leadership, and nursing leadership</u> held directly accountable for hand hygiene performance through <u>performance reviews or compensation</u> ?	☐ Yes ☐ No

Culture

20) Are patients and visitors <u>invited to remind individuals who touch patients or who touch items that will be used by patients⁴⁴</u> to perform hand hygiene?	☐ Yes ☐ No
21) Have all the following individuals (or their equivalents) demonstrated a commitment to support hand hygiene improvement in the last year (e.g., a written or verbal commitment delivered to those <u>individuals who touch patients or who touch items that will be used by patients⁴⁴</u>): • Chief Executive Officer, • Chief Medical Officer, and • Chief Nursing Officer?	☐ Yes ☐ No

6D: Diagnostic Excellence (Optional – Fact-Finding Only)

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review Leapfrog's Multi-Campus Reporting Policy.

Important Notes:

Note 1: This subsection will not be scored or publicly reported.

Note 2: A diagnostic error is an event where one or both of the following occurred, with harm or high potential of harm to the patient:

- Delayed, wrong, or missed diagnosis: At least one missed opportunity to pursue or identify an accurate and timely diagnosis based on the information that existed at the time.
- Diagnosis not communicated to the patient: An accurate diagnosis was available but was not effectively communicated to the patient or family caregiver.

All references to “errors in diagnoses” refer to both types of events.

Note 3: Diagnosis excellence means making and communicating a correct and timely diagnosis using appropriate resources while maximizing patient experience and managing uncertainty.

Reporting Period: Answer questions #1-16 based on the practices currently in place at the time you submit this section of the Survey.

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

CEO Commitment to Diagnostic Excellence

1) In the past 36 months, has your hospital's current CEO or CMO made a formal commitment (verbally or in writing) to all staff to make reducing harm to patients from errors in diagnosis an organizational priority, and communicated at least one specific action the hospital will take to further the commitment? The commitment must specifically focus on errors in diagnosis. <i>If “no” to question #1, skip question #2 and continue question #3.</i>	☐ Yes ☐ No
2) What specific actions were communicated by your hospital's CEO or CMO as part of their formal commitment to reducing harm to patients from errors in diagnosis? <i>Select all that apply.</i>	☐ Designated a senior leader or clinician champion ☐ Formed a committee ☐ Implemented a performance measure ☐ Implemented a QI project ☐ None of the above

Patient Engagement

3) Has your hospital chartered a Patient and Family Advisory Council (PFAC) that meets at least quarterly? <i>If “no” to question #3, skip question #4 and continue to question #5.</i>	☐ Yes ☐ No
---	--

4) In the past 36 months, has your hospital's PFAC: - received education regarding errors in diagnosis in the hospital or the <u>diagnostic process</u>⁴⁶, - had input into any initiatives aimed at reducing errors in diagnosis in the hospital, or - led any initiatives aimed at reducing errors in diagnosis in the hospital?	☐ Yes ☐ No
--	--

Risk Assessment and Mitigation

5) In the past 36 months, has your hospital used the <u>Safer Dx Checklist</u> to identify at least one high-priority practice that is not currently at "Full" implementation? <i>If "no" to question #5, skip question #6 and continue to question #7.</i>	☐ Yes, led by our multidisciplinary team ☐ Yes, led by a different entity at the hospital (please specify): _____ ☐ No
6) What steps has your hospital taken to fully implement the practice? <i>Select all that apply.</i>	☐ Allocated budget ☐ Appointed an individual or team responsible for implementation ☐ Set a date for full implementation ☐ None of the above

Convening a Multidisciplinary Team Focused on Diagnostic Excellence

7) In the past 36 months, has your hospital convened a multidisciplinary team that meets all the following requirements: - Solely focused on reducing harm to patients from errors in diagnosis; - Sponsored by either the CEO or CMO; - Includes, at a minimum, representatives from nursing, pharmacy, laboratory medicine, radiology, pathology, hospital medicine or inpatient care specialists, emergency medicine, and quality or risk management; - Meets at least quarterly; - Reports to senior leaders quarterly; and - Reports to the Board annually? <i>The multidisciplinary team should be a distinct entity at your hospital, not the established patient safety committee.</i> <i>If "no" to question #7, skip question #8 and continue to question #9.</i>	☐ Yes ☐ No
8) In the past 24 months, has the multidisciplinary team helped to educate staff on their work on reducing errors in diagnosis?	☐ Yes ☐ No
9) As a standing agenda item of regular meetings, has the multidisciplinary team reviewed any clinical or administrative data, patient experience or patient reported data, or incident reports to identify or track errors in diagnosis? <i>If "no" to question #9, skip question #10 and continue to question #11.</i>	☐ Yes ☐ No ☐ No, but a different team at the hospital has reviewed data or incident reports to identify or track errors in diagnosis

2025 Leapfrog Hospital Survey – Hard Copy

Section 6: Patient Safety Practices

10) In the past 24 months, if an error in diagnosis was identified through the review of any of the data sources used in question #9, did the multidisciplinary team conduct any analyses or case reviews within four weeks of the error being identified and ensure the findings were communicated to the individuals involved in the patient's care and hospital leadership?	☐ Yes ☐ No ☐ No, but a different team at the hospital has conducted at least one root cause analysis or case review of a diagnostic error
11) In the past 24 months, has the multidisciplinary team encouraged all staff (verbally or in writing), including all clinicians who participate in the diagnostic process, to report errors in diagnosis via the hospital's incident or event reporting system?	☐ Yes ☐ No ☐ No, but a different team at the hospital has encouraged all staff to report errors in diagnosis
12) In the past 24 months, has the multidisciplinary team convened emergency medicine staff to identify commonly misdiagnosed conditions (e.g., stroke, heart attack, VTE) in the emergency department? <i>If "no" to question #12, skip question #13 and continue to question #14.</i>	☐ Yes ☐ No ☐ No, but the emergency medicine staff independently meet to identify commonly misdiagnosed conditions
13) In the past 24 months, has the multidisciplinary team worked with the emergency medicine staff to develop or implement any initiatives aimed at improving accurate and timely diagnosis of these commonly misdiagnosed conditions?	☐ Yes ☐ No ☐ No, but the emergency medicine staff have independently implemented at least one such initiative
14) In the past 24 months, has the multidisciplinary team convened radiologists and pathologists to discuss diagnosis related issues, including potential discrepancies, and analyze cases where there is a discrepancy between radiology and pathology findings? <i>If "no" to question #14, skip question #15 and continue to question #16.</i>	☐ Yes ☐ No ☐ No, but radiologists and pathologists independently meet to discuss diagnosis-related issues
15) In the past 24 months, has the multidisciplinary team worked with the pathologists and radiologists to develop or implement protocols to ensure timely review and resolution of discrepancies, and timely communication of diagnoses to patients and their families?	☐ Yes ☐ No ☐ No, but radiologists and pathologists independently developed or implemented at least one such protocol

Training and Education

16) In the past 36 months, has your hospital trained any staff using <u>AHRQ's TeamSTEPPS for Diagnosis Improvement</u> program to improve communication among members of the care team (including nurses, pharmacists, and other allied health professionals), within the context of the diagnostic process or in reducing errors in diagnosis)?	☐ Yes ☐ No
---	---

Closing the Loop on Cancer Diagnosis**Reporting Period: 12 months**

- Survey submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

Sufficient Sample: See Closing the Loop on Cancer Diagnosis Measure Specifications for instructions on identifying a sufficient sample for questions #19-22.

17) 12-month reporting period used:	☐ 01/01/2024 – 12/31/2024 ☐ 07/01/2024 – 06/30/2025
18) Do pathologists at your hospital routinely document the date in which they communicate <u>pathology reports</u> indicating a diagnosis of colon, lung, or breast cancer to a patient or a patient's ordering physician? <i>If "no" or "our hospital does not operate an on-site pathology service" to question #18, skip the remaining questions in Section 6D and continue to the next subsection.</i>	☐ Yes ☐ No ☐ Our hospital does not operate an on-site pathology service
19) Did your hospital perform an audit on a sufficient sample of patients to calculate the proportion of colon, lung, or breast cancer diagnoses in which the patient or patient's ordering physician was notified within five business days of the report being signed by the pathologist, and do you choose to report those data to this Survey? <i>If "no" or "yes, but fewer than 30 cases met the inclusion criteria for the denominator," skip the remaining questions in Section 6D and continue to the next subsection.</i>	☐ Yes ☐ No ☐ Yes, but fewer than 30 cases met the inclusion criteria for the denominator
20) How many cases were included in the audit from question #19 with a diagnosis of colon, lung, or breast cancer:	_____
21) Total number of patients from question #20 with documented communication between the pathologist and the patient or patient's ordering physician within five business days of the report being signed by the pathologist: <i>Documented communication includes:</i> • A documented phone call between the pathologist and patient or patient's ordering physician of the diagnosis, and • A timestamp, read receipt, or email response indicating that the patient or patient's ordering physician read an electronic communication of the diagnosis.	_____
22) Total number of patients from question #20 who were notified, either by phone or electronically, that the pathology report with their diagnosis was uploaded to the patient portal and ready for review: <i>Hospitals that do not upload pathology reports to the patient portal or notify patients when reports are uploaded, should enter "0."</i>	_____

6E: Hospital Boarding in the Emergency Department (ED) (Optional – Fact-Finding Only)

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review Leapfrog's Multi-Campus Reporting Policy.

Important Notes:

Note 1: This subsection will not be scored or publicly reported.

Note 2: Only include units that were open for the entire reporting period and that remain currently open.

Note 3: When reporting on questions #4 and/or #5, include Emergency Department (ED) visits with an admission to an inpatient non-psychiatric or psychiatric bed, including ED visits with an admission to hospital observation status.

Specifications: See Hospital Boarding in the Emergency Department (ED) Measure Specifications in the Reference Information beginning on page 162.

Reporting Period: 12 months

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

1) 12-month reporting period used:	☐ 01/01/2024 – 12/31/2024 ☐ 07/01/2024 – 06/30/2025
2) Did your hospital operate a <u>dedicated emergency department (ED)</u> ⁴⁷ during the reporting period? <i>If “no” or “yes, but ED is now closed or wasn’t open for the entire reporting period,” skip questions #3-5 and go to the Affirmation of Accuracy.</i>	☐ Yes ☐ No ☐ Yes, but ED is now closed or wasn’t open for the entire reporting period
3) What type(s) of <u>dedicated emergency department(s)</u> ⁴⁷ did your hospital operate? <i>Select all that apply.</i>	☐ Adult only ☐ Pediatric only ☐ Adult/Pediatric combined

*If “Adult only” or “Adult/Pediatric combined” to question #3, answer question #4 based on the **adult patients** admitted to inpatient non-psychiatric and psychiatric beds (including ED visits where the patient was placed in hospital observation status).*

2025 Leapfrog Hospital Survey – Hard Copy

Section 6: Patient Safety Practices

- 4) For **adult patients**, enter your hospital's total number of emergency department (ED) visits with an admission to an inpatient non-psychiatric or psychiatric bed (including ED visits where the patient was placed in hospital observation status), the number of those ED visits with a boarding time greater than 4 hours, the median number of hours spent in the ED for those patients, and the 90th percentile of hours spent in the ED for those patients.

If the number of visits for an adult admission type is less than 10 (in column a), skip columns b, c, and d and then move to the next admission type.

For columns c and d, enter hours and minutes up to one decimal place (e.g., enter 1.5 to denote 1 hour and 30 minutes).

Adult Admission Type	ED Visits, Boarding Time, and Time Spent in the ED			
	(a) Total number of ED visits with an inpatient admission or where the patient was placed in hospital observation status	(b) Number of ED visits indicated in column (a) with a boarding time greater than 4 hours	(c) Median number of hours spent in the ED for ED visits indicated in column (a)	(d) 90 th percentile of hours spent in the ED for ED visits indicated in column (a)
Admitted to an inpatient non-psychiatric bed				
Admitted to an inpatient psychiatric bed				

If "Pediatric only" or "Adult/Pediatric combined" to question #3, answer question #5 based on the pediatric patients admitted to inpatient non-psychiatric and psychiatric beds (including ED visits where the patient was placed in hospital observation status).

- 5) For **pediatric patients**, enter your hospital's total number of emergency department (ED) visits with an admission to an inpatient non-psychiatric or psychiatric bed (including ED visits where the patient was placed in hospital observation status), the number of those ED visits with a boarding time greater than 4 hours, the median number of hours spent in the ED for those patients, and the 90th percentile of hours spent in the ED for those patients.

If the number of visits for a pediatric admission type is less than 10 (in column a), skip columns b, c, and d and then move to the next admission type.

For columns c and d, enter hours and minutes up to one decimal place (e.g., enter 1.5 to denote 1 hour and 30 minutes).

Pediatric Admission Type	ED Visits, Boarding Time, and Time Spent in the ED			
	(a) Total number of ED visits with an inpatient admission or where the patient was placed in hospital observation status	(b) Number of ED visits indicated in column (a) with a boarding time greater than 4 hours	(c) Median number of hours spent in the ED for ED visits indicated in column (a)	(d) 90 th percentile of hours spent in the ED for ED visits indicated in column (a)
Admitted to an inpatient non-psychiatric bed				

Admitted to an inpatient psychiatric bed

Affirmation of Accuracy

As the hospital CEO or as an employee of the hospital to whom the hospital CEO has delegated responsibility, I have reviewed this information pertaining to the Patient Safety Practices Section at our hospital, and I hereby certify that this information is true, accurate, and reflects the current, normal operating circumstances at our hospital. I am authorized to make this certification on behalf of our hospital.

The hospital and I understand that The Leapfrog Group, its members, the public and entities and persons who contract or have other business dealings with The Leapfrog Group are relying on the truth and accuracy of this information. The hospital and I also understand that The Leapfrog Group will make this information and/or analyses of this information public through the Survey Results public reporting website, The Leapfrog Group's Hospital Safety Grade, and/or other Leapfrog Group products and services. This information and/or analyses and all intellectual property rights therein shall be and remain the sole and exclusive property of The Leapfrog Group in which The Leapfrog Group retains exclusive ownership. This information does not infringe upon any third-party intellectual property rights or any other third-party rights whatsoever and is free and clear of all encumbrances and liens of any kind. The hospital and I acknowledge that The Leapfrog Group may use this information in a commercial manner for profit. The hospital shall be liable for and shall hold harmless and indemnify The Leapfrog Group from any and all damages, demands, costs, or causes of action resulting from any inaccuracies in the information or any misrepresentations in this Affirmation of Accuracy. The Leapfrog Group and its members and entities and persons who contract or have other business dealings with The Leapfrog Group reserve the right to omit or disclaim information that is not current, accurate or truthful.

Section 6: Patient Safety Practices Reference Information***What's New in the 2025 Survey*****Section 6A: NQF Safe Practice #1 – Culture of Safety Leadership Structures and Systems**

Leapfrog is updating the FAQ for Safe Practice 1.1b to clarify the requirement of having patients and/or families of patients as active participants in the hospital-wide safety and quality committee for hospitals that utilize a systemwide safety and quality committee instead of a local committee.

Additionally, the definition of Board has been updated to clarify that a system-wide board that governs hospitals in the system would meet the criteria.

There are no changes to the scoring algorithm for Section 6A: NQF Safe Practice #1 – Culture of Safety Leadership Structures and Systems.

Section 6B: NQF Safe Practice #2 – Culture Measurement, Feedback, and Intervention

There are no changes to this subsection.

Section 6C: Hand Hygiene

Leapfrog is adding further clarification in the measure specifications regarding the units included when reporting on Section 6C: Hand Hygiene, including reminding hospitals to exclude units that are not currently open and/or were not open consistently throughout the entire reporting period (i.e., most recent month or past three months based on responses selected in monitoring questions #8-10). The units are being updated to add further clarification and alignment with reporting in other sections of the Survey, including specifying the inclusion of both single acuity and mixed acuity units when reporting on medical, surgical, and medical/surgical units. In addition, hospitals will need to include any pre-operative and post-anesthesia care units that are located in or co-located with their hospital (previously hospitals were asked to only include those used for inpatient procedures and those used for outpatient procedures listed in Section 9: Outpatient Procedures), as well as those located in free-standing hospital outpatient departments that perform the outpatient procedures listed in Section 9: Outpatient Procedures and that share the hospital's license or CMS Certification Number.

After a year of fact-finding, Leapfrog is removing the optional question asking about practices followed when a patient is suspected or confirmed with C. difficile given that the vast majority of hospitals were following all of the SHEA/IDSA/APIC Practice Recommendations.

There are no changes to the scoring algorithm for Section 6C: Hand Hygiene.

Section 6D: Diagnostic Excellence

Based on an analysis of responses submitted to the 2024 Leapfrog Hospital Survey and consultation with Leapfrog's Diagnostic Excellence Expert Panel, Leapfrog will not score or publicly report Section 6D: Diagnostic Excellence in 2025. Instead, Leapfrog will make several revisions to the question set, and add new FAQs, to ensure responses accurately reflect the intent of the new subsection.

Leapfrog is making the following updates to Section 6D: Diagnostic Excellence:

- Question #1, regarding the CEO's commitment to diagnostic excellence, will be updated to specify that the commitment must specifically focus on errors in diagnosis, and to indicate that the commitment must have been made by the hospital's current CEO or CMO.
- Questions #3 and #4, regarding patient engagement, will be updated to specify a timeframe for Patient and Family Advisory Council (PFAC) meetings and clarify that PFAC activities should focus on diagnosis in the hospital.

- Question #5 and #6, regarding risk assessment and mitigation, will be updated to specify that hospitals should use the Safer Dx Checklist to identify at least one practice not currently fully implemented and to clarify the specific steps the hospital is taking to close those gaps.
- Questions #7-15, regarding convening a multidisciplinary team focused on diagnostic excellence, will be updated to confirm that the multidisciplinary team should be a distinct entity at the hospital, not the established patient safety committee, as well as specifying specific timeframes for activities. A new FAQ will clarify that multidisciplinary teams should be hospital-specific, not system-level.
- Question #16, regarding training and education, will be updated to specify that the AHRQ's TeamSTEPPS for Diagnosis Improvement program is the training hospitals should be using to improve communication among members of the care team within the context of the diagnostic process.
- Questions #17-22, regarding closing the loop on cancer diagnosis, will include new FAQs to clarify which reports should be included, and how patients should be tabulated.

Section 6E: Hospital Boarding in the Emergency Department (ED)

Over the next few years, Leapfrog plans to grow its hospital reporting to include emergency department (ED) safety. This is consistent with our expansion of ratings beyond the inpatient setting to include outpatient surgery in hospitals and ambulatory surgery centers. Our first approach to measuring and establishing standards of performance for ED safety began with our focus on harm to patients from diagnostic errors on the 2024 Leapfrog Hospital Survey, where a new subsection focused on Diagnostic Excellence included a set of fact-finding questions to assess hospital's adoption of targeted best practices.

In consultation with subject matter experts and our own independent literature review, an urgent patient safety risk has been identified: inpatients boarding in the emergency department (ED).

Boarding patients in the ED after the decision to admit them to an inpatient bed is a long-standing yet increasingly common, quality and safety issue. 1 Studies suggest boarding patients in the ED is associated with delayed and missed care, medication errors, higher morbidity, in-hospital mortality, extended hospital length of stay, and poor patient satisfaction. According to the Association of Academic Chairs of Emergency Medicine, inpatients boarding in the ED rose nearly 130% from 2012 to 2019, and further increased after COVID-19.

We recognize that this problem is complex and often difficult for hospitals to address. But for patients and payors, the risk of inpatients boarding in the ED would be a critical factor in evaluating the safety of a hospital. As such, Leapfrog will ask hospitals to report on three measures which will be used for fact-finding only in 2025:

- The percentage of ED patients that are admitted to the hospital that had a boarding time in the ED of more than 4 hours (where lower percentages are desirable)
- The median length of stay in the ED for patients admitted to the hospital (where lower values are desirable)
- The 90th percentile length of stay in the ED for patients admitted to the hospital (where lower values are desirable)

Based on responses received during the public comment period and further input from our Emergency Department Boarding Expert Panel, Leapfrog is making the following updates to the originally proposed questions:

- To better recognize the underlying systems issues that are key drivers of admitted inpatients boarding in the ED, Leapfrog will rename the subsection "Hospital Boarding in the Emergency Department (ED)" instead of "ED Boarding."
- Leapfrog will include patients admitted to observation status, as well as those admitted to the hospital's inpatient setting.
- Leapfrog will ask hospitals to report the median ED length of stay instead of the average ED length of stay for patients with an ED visit that are admitted to the hospital given that the average can be skewed by outliers.

2025 Leapfrog Hospital Survey – Hard Copy

Section 6: Patient Safety Practices

- Leapfrog will also ask hospitals to report the 90th percentile ED length of stay for patients with an ED visit that are admitted to the inpatient setting to better understand a “bad” day in the ED.
- To address differences in boarding times among certain populations, such as behavioral health patients and pediatric patients, hospitals will be asked to stratify their data in two different ways: (1) separating adult patients from pediatric patients; and (2) separating patients admitted to an inpatient psychiatric bed from those admitted to an inpatient non-psychiatric bed. Leapfrog will monitor the use of admission to an inpatient psychiatric bed as the stratification decision moving forward, to understand if there are more accurate and/or more feasible approaches to capturing patients with a behavioral health diagnosis.

The questions will not be scored or publicly reported in 2025.

Change Summary Since Release

April 18, 2025 – Updated the measure specifications used to report on Hospital Boarding in the Emergency Department (ED) to exclude ED patients transferred from the ED to another hospital from questions 4a and 5a.

Section 6: Patient Safety Practices Measure Specifications

NQF Safe Practice Measure Specifications

Instructions for Reporting on NQF Safe Practices:

1. **Prepare:**
 - a. Download and review a copy of the National Quality Forum's *Safe Practices for Better Healthcare – 2010 Update* report for reporting on subsections 6A and 6B available at <http://leapfroggroup.org/survey-materials/survey-and-cpoe-materials>.
 - b. Print and review a hard copy of (1) the Survey questions, (2) the practice-specific FAQs, and (3) the scoring algorithm.
2. **Identify Individuals to Assist:** Decide who should participate on your team to assist in collection of the documentation for assessment.
3. **Plan:** The team should be briefed and assigned duties to help capture the key information necessary for submission of this section.
4. **Collect and Maintain:** Key documentation must be collected to support answering the questions in this section of the Survey. Please refer to the Survey Binder for examples of acceptable documentation. Documentation should be maintained to ensure that your hospital can respond to Leapfrog's request for documentation should you be selected for our Monthly Documentation Requirements. Reviews are performed every month during the Survey Cycle (April 1 to November 30) and throughout the Corrections Period. In addition, the documentation can be helpful if your hospital is planning to update and resubmit this section of the Survey prior to November 30.
5. **Assess:** When all the supporting documents are assembled, it is recommended that hospitals review their final responses to Section 6 with the CEO and/or responsible leadership. Hospitals should update their answers online as they adopt additional practices throughout the Survey Cycle (April 1 to November 30). As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.
6. **Submit:** Section 6 must be completed and affirmed before it can be submitted with the Survey.

Hand Hygiene Measure Specifications

Important Note: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Source: The framework and questions in this subsection are modeled after the World Health Organization's [Hand Hygiene Self-Assessment Framework](#).

Reporting Period: Answer questions #1-21 based on the practices currently in place at the time you submit this section of the Survey.

Note: For monitoring, this means that the monthly sample size (or quarterly sample size if answering question #10) would need to be met at least once in each patient care unit the month (or quarter) preceding the time of the submission of the Survey and there must be a process in place to meet the monthly (or quarterly) sample size thereafter in each patient care unit every month/quarter.

If the monitoring sample size is not met at any point after submission, the Survey must be updated and re-submitted. More information about updating a Survey can be found at <https://www.leapfroggroup.org/survey-materials/updating-your-hospital-survey>.

As a reminder, Leapfrog randomly requests documentation on a monthly basis and key documentation must be collected and maintained to support responses to all questions. Hospitals are urged to regularly review their documentation, including reports supporting their monitoring of hand hygiene, and maintain copies throughout the Survey Cycle. Please refer to the [Survey Binder](#) for examples.

Patient Care Units: Include only the following patient care units when reporting on the questions in this subsection:

- Medical, Surgical, and Medical/Surgical Units (including telemetry units)¹⁹ (adult and/or pediatric)
- Step-down/progressive Units²⁰ (adult and/or pediatric)
- Obstetrical Units (Labor and Delivery Units²¹, nursery, etc., excluding procedural areas)
- General Medical, Surgical, Medical/Surgical, and Neuro ICUs¹⁴ (adult and/or pediatric)
- Neonatal ICUs¹⁷
- Specialty ICUs (adult and/or pediatric)
- Pre-operative and Post-anesthesia Care Units²² (adult and/or pediatric)
- Observation Units (adult and/or pediatric)
- Dedicated Emergency Departments⁴⁷ (adult and/or pediatric)

Other units that are not denoted above would be excluded for the purposes of reporting on Section 6D Hand Hygiene. The following units would be excluded:

- Behavioral Health Units
- Psychiatric Units
- Palliative Care and Hospice Units
- Rehabilitation Units
- Operating Rooms
- Procedural and Diagnostic Areas, such as Radiology, Endoscopy, Dialysis, and Radiation Units
- Admission Units that don't hold patients overnight
- Primary Care Clinics
- Units that are not currently open and/or were not open consistently throughout the entire reporting period (i.e., most recent month or past three months based on responses selected in monitoring questions #8-10)

Infrastructure

Question #4: Does your hospital have a process in place to ensure that **all** the following are done, as necessary, and quarterly audits are conducted on a sample of dispensers in your patient care units to ensure that the process is followed?

- Refill paper towels, soap dispensers, and alcohol-based hand sanitizer dispensers when they are empty or near empty
- Replace batteries in automated paper towel dispensers, soap dispensers, and alcohol-based hand sanitizer dispensers (if automated dispensers are used in the patient care units)

In order to respond “yes” to question #4, a process must be in place to ensure that paper towel, soap, and alcohol-based hand sanitizer dispensers are refilled when they are empty or near empty and batteries are replaced in automated paper towel, soap, and alcohol-based hand sanitizer dispensers (if automated dispensers are used in patient care units).

In addition, a quarterly audit must be conducted on a sample of paper towel, soap, and alcohol-based hand sanitizer dispensers to include checking that dispensers are refilled and that batteries in automated dispensers are replaced. The quarterly audit should be a supplement to a system that checks these supplies on a routine basis (e.g., environmental services check with their regular cleaning).

Sampling Instructions: The sample must be based on a random or systematic sampling procedure, where the sampling plan assures wide sampling (i.e., the same places would not always be monitored) and includes at least 5% of the dispensers in 20% of the patient care units.

Question #6: Does your hospital conduct audits of the volume of alcohol-based hand sanitizer that is delivered with each activation of a wall-mounted dispenser (manual and automated) on a sample of dispensers in your patient care units at **all** the following times:

- upon installation;
- whenever the brand of product or system changes; and
- whenever adjustments are made to the dispensers;

OR

Has your hospital conducted an audit of the volume of alcohol-based hand sanitizer that is delivered with each activation of a wall-mounted dispenser (manual and automated) on a sample of your hospital's existing dispensers if there have been no changes to any dispensers?

In order to respond “yes” to question #6, a volume audit on a sample of wall-mounted alcohol-based hand sanitizer dispensers (manual and automated) in your patient care units must be conducted **at least** once (upon installation, whenever the brand of product or system changes, and whenever adjustments are made to the dispensers) using one of the below methods. Prior volume audits are acceptable if they were conducted using the instructions in Leapfrog's 2019-2024 Surveys, documentation has been maintained, and no changes have been made to the dispensers since the audit.

Sampling Instructions: The sample must be based on a random or systematic sampling procedure, where the sampling plan assures wide sampling (i.e., the same places would not always be monitored) and includes at least 5% of the dispensers.

Method #1 - Auditing Liquid Volume: To audit the **liquid volume** of alcohol-based hand sanitizer that is delivered with each activation of a wall-mounted dispenser (manual and automated), use the following process:

1. Select a sample of dispensers based on a random or systematic sampling procedure.
2. Take a small, graduated plastic medicine cup and have the dispenser deliver 10 doses of alcohol-based hand sanitizer.
3. Divide the total volume dispensed by 10 to get an average of the amount dispensed.

NOTE: Hospitals using foam alcohol-based hand sanitizer will need to follow the steps above, but will instead need to weigh the sample, divide the results by 10 to obtain the average output of the sample, and then convert the weight in grams to milliliters by dividing the weight by the density (which can be provided by your vendor for your specific product).

Method #2 – Auditing Average Hand Rubbing Time: To audit the **average hand rubbing time** of alcohol-based hand sanitizer that is delivered with each activation of a wall-mounted dispenser (manual and automated), use the following process:

1. Select a sample of dispensers based on a random or systematic sampling procedure.
2. Identify multiple individuals (at least 10) with varying hand sizes (by quick observation).
3. For each sampled dispenser, have each of the individuals identified in step #1 dispense a volume of alcohol-based hand sanitizer.
4. For each individual, have a separate individual time the amount of hand rubbing time required for hands to dry completely.
5. Repeat this process for each individual and calculate an **average** time based on the ten observations conducted.
6. Repeat this process for each sampled dispenser.

Question #7: Do all the audited dispensers deliver, with one activation, 1.0 mL of alcohol-based hand sanitizer OR a volume of alcohol-based hand sanitizer that covers the hands completely and requires 15 or more seconds for hands to dry (on average)?

In order to respond “yes” to question #7, the **average** liquid volume for **each** sampled dispenser needs to be at least 1.0 mL (if using method #1) or the **average** hand rubbing time for **each** sampled dispenser needs to be at least 15 seconds (if using method #2).

Monitoring

Hand hygiene opportunities: Hand hygiene opportunities are the number of times that an individual who touches patients or who touches items used by patients should have cleaned their hands given the hand hygiene framework your hospital has adopted (e.g., WHO’s “5 moments,” Ontario’s 4 moments, CDC’s guidelines, etc.). In terms of determining opportunities to monitor, this would depend on the guidelines the hospital chooses to follow.

For example, many facilities choose to audit before and after patient contact or room entry and exit because this is operationally the simplest method. Auditing opportunities before and after dirty tasks is operationally difficult. There is some evidence that measuring adherence on room entry and exit may be an acceptable stand-in for other opportunities within the patient encounter.

Electronic compliance monitoring system: Electronic compliance monitoring systems would include door minder or activity monitoring systems, systems that include the wearing of electronic badges, and camera-based systems that are used to monitor hand hygiene compliance.

Question #8: Does your hospital collect hand hygiene compliance data on at least **200 hand hygiene opportunities**, or at least the number of hand hygiene opportunities outlined based on the unit type in Tables 1-3, **each month in each patient care unit**?

In order to respond “yes” to question #8, your hospital must monitor at least **200 hand hygiene opportunities**, or at least the number of hand hygiene opportunities outlined based on the unit type in Tables 1-3, **each month in each patient care unit** using either:

- An electronic compliance monitoring system throughout all patient care units
- An electronic compliance monitoring system throughout some patient care units and only direct observation in all other patient care units
- Only direct observation throughout all patient care units

Refer to the following tables to determine how many hand hygiene opportunities must be monitored in each patient care unit monthly for question #8. **Historical data** (e.g., past 3 months, 6 months, 12 months, etc.) on the monthly occupancy rates or procedure/patient volumes should be used.

Units/areas can be combined for the purposes of determining if you have met the monthly or quarterly monitoring sample size if they share a common group of staff (i.e., staff are scheduled to work in the broader area and float between units or staff may be scheduled to work either unit on any given day). Hand hygiene opportunities would still need to be monitored throughout both units/areas.

Table 1: Units where the monthly occupancy rate can be calculated

If your unit’s average daily census is...	Your patient care unit needs to collect hand hygiene compliance data for at least
---	---

	this number of <u>hand hygiene opportunities</u> per month for question #8...
13 patients or higher	200
10-12 patients	150
7-9 patients	100
5-6 patients	75
3-4 patients	45
1-2 patients	15

Table 2: Units where the monthly occupancy rate cannot be calculated (e.g., PACU, labor and delivery, outpatient units)

If your unit's average number of procedures/patient volume in a month is...	Your patient care unit needs to collect hand hygiene compliance data for at least this number of <u>hand hygiene opportunities</u> per month for question #8...
400 procedures/patients or greater	200
320-399 procedures/patients	150
240-319 procedures/patients	100
160-239 procedures/patients	75
120-159 procedures/patients	50
60-119 procedures/patients	30
30-59 procedures/patients	15
<30 procedures/patients	5

Table 3: Emergency department units

If your emergency department's average number of visits in a month is...	Your patient care unit needs to collect hand hygiene compliance data for at least this number of <u>hand hygiene opportunities</u> per month for question #8...
2000 visits or greater	200
1500-1999 visits	150
1000-1499 visits	100
750-999 visits	75
500-749 visits	50
250-499 visits	25
150-249 visits	15
<150 visits	5

Question #9: Does your hospital collect hand hygiene compliance data on at least **100 hand hygiene opportunities**, or at least the number of hand hygiene opportunities outlined based on the unit type in Tables 4-6, **each month in each patient care unit**?

In order to respond "yes" to question #9, your hospital must monitor at least **100 hand hygiene opportunities**, or at least the number of hand hygiene opportunities outlined based on the unit type in Tables 4-6, **each month in each patient care unit** using either:

- An electronic compliance monitoring system throughout all patient care units
- An electronic compliance monitoring system throughout some patient care units and only direct observation in all other patient care units
- Only direct observation throughout all patient care units

Refer to the following tables to determine how many hand hygiene opportunities must be monitored in each patient care unit monthly for question #9. **Historical data** (e.g., past 3 months, 6 months, 12 months, etc.) on the monthly occupancy rates or procedure/patient volumes should be used.

Units/areas can be combined for the purposes of determining if you have met the monthly or quarterly monitoring sample size if they share a common group of staff (i.e., staff are scheduled to work in the

broader area and float between units or staff may be scheduled to work either unit on any given day). Hand hygiene opportunities would still need to be monitored throughout both units/areas.

Table 4: Units where the monthly occupancy rate can be calculated

If your unit's average daily census is...	Your patient care unit needs to collect hand hygiene compliance data for at least this number of <u>hand hygiene opportunities per month</u> for question #9...
13 patients or higher	100
10-12 patients	75
7-9 patients	50
5-6 patients	37
3-4 patients	22
1-2 patients	7

Table 5: Units where the monthly occupancy rate cannot be calculated (e.g., PACU, labor and delivery, outpatient units)

If your unit's average number of procedures/patient volume in a month is...	Your patient care unit needs to collect hand hygiene compliance data for at least this number of <u>hand hygiene opportunities per month</u> for question #9...
400 procedures/patients or greater	100
320-399 procedures/patients	75
240-319 procedures/patients	50
160-239 procedures/patients	37
120-159 procedures/patients	25
60-119 procedures/patients	15
30-59 procedures/patients	7
<30 procedures/patients	2

Table 6: Emergency department units

If your emergency department's average number of visits in a month is...	Your patient care unit needs to collect hand hygiene compliance data for at least this number of <u>hand hygiene opportunities per month</u> for question #9...
2000 visits or greater	100
1500-1999 visits	75
1000-1499 visits	50
750-999 visits	37
500-749 visits	25
250-499 visits	15
150-249 visits	7
<150 visits	2

Question #10: Does your hospital collect hand hygiene compliance data on at least 100 hand hygiene opportunities each quarter in each patient care unit?

In order to respond "yes" to question #10, your hospital must monitor at least **100 hand hygiene opportunities each quarter in each patient care unit** using either:

- An electronic compliance monitoring system throughout all patient care units
- An electronic compliance monitoring system throughout some patient care units and only direct observation in all other patient care units
- Only direct observation throughout all patient care units

There are no alternate sample sizes for the quarterly requirement. Hospitals trying to meet the quarterly requirement in question #10 will need to monitor 100 hand hygiene opportunities a quarter.

Units/areas can be combined for the purposes of determining if you have met the monthly or quarterly monitoring sample size if they share a common group of staff (i.e., staff are scheduled to work in the broader area and float between units or staff may be scheduled to work either unit on any given day). Hand hygiene opportunities would still need to be monitored throughout both units/areas.

Question #12: In those patient care units where an electronic compliance monitoring system is used, does the monitoring system used meet both of the following criteria?

- The system can identify both opportunities for hand hygiene and that hand hygiene was performed
- The hospital itself has validated the accuracy of the data collected by the electronic compliance monitoring system

In order to respond "yes" to question #12, the electronic monitoring system in use must identify both opportunities and that hand hygiene was performed, which could include both group monitoring systems and badge-based systems.

For example, an electronic monitoring system that records when an individual (not identified) enters and exits a room and also records if a dispenser was used within the same time frame, would qualify as the entry and exit is used as a proxy for a hand hygiene opportunity (before and after touching a patient) and the dispenser use is used as a proxy for a hand hygiene event. This data can be adjusted to take visitors into account and used to estimate hand hygiene compliance. Another example would be a badge-based system where individuals or their roles can be identified.

In addition, validation of the accuracy of the data collected by the electronic compliance monitoring system must be performed by hospital personnel or independent third-party personnel, in addition to any validation conducted by the manufacturer. It needs to include both a "planned path" phase where the researcher(s) make timed observations of room entries and exits and use of dispensers and compare their results to data recorded by the electronic compliance monitoring system. Followed by a "behavioral path" phase where observers record the same variables when individuals who touch patients or who touch items that will be used by patients are performing their usual duties, as this tends to be more chaotic and variable. A general validation protocol that can be used for both group monitoring systems and badge-based systems has been described in a fair amount of detail in the 2016 article by Limper H et al. Similar methods for conducting validation studies of badge-based system have been described by Pineles LL, et al. in 2014, and by Doll ME et al. in 2019. The 2023 article from Parker et al. regarding sample sizes for the validation can also be referenced.

Question #13: In those patient care units where an electronic compliance monitoring system is used, are direct observations also conducted for coaching and intervention purposes that meet all the following criteria?

- Observers immediately intervene prior to any harm occurring to provide non-compliant individuals with immediate feedback
- Observations identify both opportunities for hand hygiene and compliance with those opportunities
- Observations determine who practiced hand hygiene, verify when they practiced it, and whether their technique was correct
- Observations within a unit are conducted weekly or monthly across all shifts and on all days of the week proportional to the number of individuals who touch patients or who touch items that will be used by patients⁴⁴ on duty for that shift
- Observations capture a representative sample of the different roles of individuals who touch patients or who touch items that will be used by patients⁴⁴ (e.g., nurses, physicians, techs, environmental services workers)

In order to respond "yes" to question #13, direct observations must be conducted for coaching and intervention purposes and meet the following sample sizes at a minimum:

In units with either low hand hygiene compliance* and/or units with high infection rates:**

- On a monthly basis, hospitals will need to perform 20 direct observations.

- If after collecting those observations, more than 50% of the observations were NOT compliant and/or did NOT demonstrate proper technique, the hospital will need to perform an additional 20 observations the following month (40 total observations per unit with low hand hygiene compliance or high infection rates).
- The hospital must continue to collect 40 observations per month until the number of observations that are NOT compliant and/or did not demonstrate proper technique is reduced to less than 50%.

Compliance and infection rates must be assessed at least quarterly and additional observations need to be collected on a monthly basis for the entire quarter if warranted based on the above rules. If a standardized infection ratio cannot be calculated for the quarter, units with 2 or more observed infections should do the additional collection of direct observations.

**Low hand hygiene compliance is defined as two or more standard deviations below the hospital's overall mean hand hygiene compliance rate.*

***High infection rates are defined as two or more standard deviations above the hospital's standardized infection ratio for any of the following healthcare-associated infection measures: CLABSI, CAUTI, MRSA, and C.diff.*

In all other units:

- On a quarterly basis, hospitals using ECM need to perform 10% of the observations noted in Tables 1-3 in ALL patient care units included in Leapfrog's Hand Hygiene Standard (e.g., if the unit would require 200 direct observations without ECM, then with the use of ECM, they need to collect 20 direct observations).
- Units in which direct observation data is being collected monthly (i.e., units with low hand hygiene compliance and/or high infection rates) do not require the additional quarterly data collection.

All direct observations conducted must meet the following criteria:

- Observers immediately intervene prior to any harm occurring to provide non-compliant individuals with immediate feedback
- Observations identify both opportunities for hand hygiene and compliance with those opportunities
- Observations determine who practiced hand hygiene, verify when they practiced it, and whether their technique was correct
- Observations within a unit are conducted weekly or monthly across all shifts and on all days of the week proportional to the number of individuals who touch patients or who touch items that will be used by patients⁴⁴ on duty for that shift
Observations capture a representative sample of the different roles of individuals who touch patients or who touch items that will be used by patients⁴⁴ (e.g., nurses, physicians, techs, environmental services workers)

Observers must record at least the following:

- The date as well as the start and end time of the observation session (or the date and shift being observed)
- The unit where the observation session is being conducted
- The role of the individual being observed (e.g., nurse, physician, etc.)
- The indication (or moment) for performing hand hygiene (e.g., before/after touching a patient, before/after a procedure, before/after touching patient surroundings, etc.)
- Whether hand hygiene was performed or not performed based on the indication noted and if the technique was correct

Question #14: In those patient care units where an electronic compliance monitoring system is NOT used, do the direct observations meet all the following criteria?

- Observations identify both opportunities for hand hygiene and compliance with those opportunities
- Observations determine who practiced hand hygiene, verify when they practiced it, and whether their technique was correct
- Observations within a unit are conducted weekly or monthly across all shifts and on all days of the week proportional to the number of individuals who touch patients or who touch items that will be used by patients⁴⁴ on duty for that shift
- Observations capture a representative sample of the different roles of individuals who touch patients or who touch items that will be used by patients⁴⁴ (e.g., nurses, physicians, techs, environmental services workers)

In order to respond “yes” to question #14, direct observations must be conducted in patient care units that do not use an electronic compliance monitoring system and must meet the following criteria:

- Observations identify both opportunities for hand hygiene and compliance with those opportunities
- Observations determine who practiced hand hygiene, verify when they practiced it, and whether their technique was correct
- Observations within a unit are conducted weekly or monthly across all shifts and on all days of the week proportional to the number of individuals who touch patients or who touch items that will be used by patients⁴⁴ on duty for that shift
- Observations capture a representative sample of the different roles of individuals who touch patients or who touch items that will be used by patients⁴⁴ (e.g., nurses, physicians, techs, environmental services workers)

Observers must record at least the following:

- The date as well as the start and end time of the observation session (or the date and shift being observed)
- The unit where the observation session is being conducted
- The role of the individual being observed (e.g., nurse, physician, etc.)
- The indication (or moment) for performing hand hygiene (e.g., before/after touching a patient, before/after a procedure, before/after touching patient surroundings, etc.)
- Whether hand hygiene was performed or not performed based on the indication noted and if the technique was correct

Question #15: Does your hospital have a system in place for both the initial and recurrent training and validation of hand hygiene compliance observers?

In order to respond “yes” to question #15, your hospital must regularly monitor the quality and accuracy of observations that are collected by each observer through initial and recurrent validation (at least once a year) of hand hygiene compliance observers. This would include having an individual trained in infection control simultaneously collecting data with the hand hygiene compliance observers and comparing results. Alternatively, videos which include an interactive assessment and completion of an observation form, such as the WHO Hand Hygiene Training Film and Slides Accompanying the Training Films, Videos from Hand Hygiene Australia, or internally developed videos with assessment, would also be sufficient for validating hand hygiene compliance observers. Hospitals must expand the testing scenarios that are included in the videos (i.e., the videos should be expanded to include: various types of individuals who touch patients or who touch items that will be used by patients, a larger number of scenarios where individuals are adherent and non-adherent, the inclusion of all moments observed, etc.).

See [FAQs](#) for additional information about responding to the questions in this section.

Closing the Loop on Cancer Diagnosis Measure Specifications

Important Note: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Source: The Leapfrog Group
Reporting Period: 12 months - Surveys submitted prior to September 1: 01/01/2024 – 12/31/2024 - Surveys submitted on or after September 1: 07/01/2024 – 06/30/2025
Sufficient Sample: Hospitals must randomly sample at least 30 patients 18 years and older who were diagnosed with at least one of colon, lung, or breast cancer, and measure the number of those patients where there is evidence of documented communication (in the medical record or otherwise) between the pathologist and the patient or patient's ordering physician, and the number of those patients who were notified that the pathology report with their diagnosis was uploaded to the patient portal.
Question #20 (denominator): How many cases were included in the audit from question #19 with a diagnosis of colon, lung, or breast cancer?
Question #21 (numerator): Total number of patients from question #20 with documented communication between the pathologist and the patient or patient's ordering physician within five business days of the report being signed by the pathologist: Documented communication includes: A documented phone call between the pathologist and patient or patient's ordering physician of the diagnosis, and a timestamp, read receipt, or email response indicating that the patient or patient's ordering physician read an electronic communication of the diagnosis.
Question #22 (numerator): Total number of patients from question #20 who were notified, either by phone or electronically, that the pathology report with their diagnosis was uploaded to the patient portal and ready for review: Hospitals that do not upload pathology reports to the patient portal or notify patients when reports are uploaded, should enter "0."

Hospital Boarding in the Emergency Department (ED) Boarding Measure Specifications

Important Note: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Source: The Leapfrog Group

Reporting Period: 12 months

- Survey submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Hospital Boarding in the ED Workbook (Excel):

To complete the data collection and respond to questions #4-5, hospitals should download the Hospital Boarding in the Emergency Department Workbook (Excel). This workbook includes five tabs: Instructions, Adult Inpatient Non-Psychiatric, Adult Psychiatric, Pediatric Inpatient Non-Psychiatric, Pediatric Psychiatric. The four tabs can be used to calculate the responses to questions #4b. number of adult patients boarding >4 hours, c. median length of stay (LOS), and d. 90th percentile LOS and questions #5b. number of pediatric patients boarding >4 hours, c. median length of stay (LOS), and d. 90th percentile LOS.

The workbook is available on the [Survey Materials Webpage](#).

Included Units:

- Dedicated Emergency Department⁴⁷ (adult, pediatric, and adult/pediatric)

Question #4, column a: Total number of adult ED visits with an inpatient admission or where the patient was placed in hospital observation status.

Enter the total number of emergency department (ED) visits during the reporting period for each of the following admission types:

Adult (18 years of age or older) patients admitted to an inpatient **non-psychiatric bed**
Adult (18 years of age or older) patients admitted to an inpatient **psychiatric bed**

Include:

- Patients with an ED visit that were admitted to the hospital's inpatient setting or placed in hospital observation status.

Exclude:

- Patients with an ED visit that were placed in ED observation status.
- Patients transferred to another hospital.

Note: A patient can have multiple ED visits with a hospital admission and/or placed in hospital observation status during the performance period so each patient ED visit with an inpatient admission or placement into hospital observation status is included in the denominator (question #4a).

If the number of visits for an adult admission type is less than 10 (in column a), skip columns b, c, and d and then move to the next admission type.

Question #4, column b: Number of ED visits indicated in column (a) with a boarding time greater than 4 hours.

Enter the total number of emergency department (ED) visits indicated in column (a) with a boarding time greater than 4 hours for each of the following admission types:

Adult (18 years of age or older) patients admitted to an inpatient **non-psychiatric bed**
Adult (18 years of age or older) patients admitted to an inpatient **psychiatric bed**

Include:

- Patients with an ED visit that were admitted to the hospital's inpatient setting or placed in hospital observation status with an ED boarding time that was longer than 4 hours.

Boarding time is defined as the difference between the "time from the admission order" to "patient departure from the ED."

Question #4, column c: Median number of hours spent in the ED for ED visits indicated in column (a).

Enter the median number of hours spent in the ED for ED visits indicated in column (a) for each of the following admission types:

Adult (18 years of age or older) patients admitted to an inpatient **non-psychiatric bed**

Adult (18 years of age or older) patients admitted to an inpatient **psychiatric bed**

Include:

- Hours spent in the ED for patients with an ED visit that were admitted to the hospital's inpatient setting or placed in hospital observation status.

Hours spent in the ED is defined as the difference between the "patient arrival time at the ED" to "patient departure from the ED."

Question #4, column d: 90th percentile of hours spent in the ED for ED visits indicated in column (a).

Enter the 90th percentile of hours spent in the ED for ED visits indicated in column (a) for each of the following admission types:

Adult (18 years of age or older) patients admitted to an inpatient **non-psychiatric bed**

Adult (18 years of age or older) patients admitted to an inpatient **psychiatric bed**

Include:

- Hours spent in the ED for patients with an ED visit that were admitted to the hospital's inpatient setting or placed in hospital observation status.

Hours spent in the ED is defined as the difference between the "patient arrival time at the ED" to "patient departure from the ED."

Question #5, column a: Total number of pediatric ED visits with an inpatient admission or where the patient was placed in hospital observation status.

Enter the total number of emergency department (ED) visits during the reporting period for each of the following admission types:

Pediatric (17 years of age or younger) patients admitted to an inpatient **non-psychiatric bed**

Pediatric (17 years of age or younger) patients admitted to an inpatient **psychiatric bed**

Include:

- Patients with an ED visit that were admitted to the hospital's inpatient setting or placed in hospital observation status.

Exclude:

- Patients with an ED visit that were placed in ED observation status.
- Patients transferred to another hospital.

Note: A patient can have multiple ED visits with a hospital admission and/or placed in hospital observation status during the performance period so each patient ED visit with an inpatient admission or placement into hospital observation status is included in the denominator (question #4a).

If the number of visits for a pediatric admission type is less than 10 (in column a), skip columns b, c, and d.

Question #5, column b: Number of **ED visits** indicated in column (a) with a boarding time greater than 4 hours.

Enter the total number of emergency department (**ED**) **visits** indicated in column (a) with a boarding time greater than 4 hours for each of the following admission types:

Pediatric (17 years of age or younger) patients admitted to an inpatient **non-psychiatric bed**

Pediatric (17 years of age or younger) patients admitted to an inpatient **psychiatric bed**

Include:

- Patients with an ED visit that were admitted to the hospital's inpatient setting or placed in hospital observation status with an ED boarding time that was longer than 4 hours.

Boarding time is defined as the difference between the "time from the admission order" to "patient departure from the ED."

Question #5, column c: Median number of **hours** spent in the ED for ED visits indicated in column (a).

Enter the median number of hours spent in the ED for ED visits indicated in column (a) for each of the following admission types:

Pediatric (17 years of age or younger) patients admitted to an inpatient **non-psychiatric bed**

Pediatric (17 years of age or younger) patients admitted to an inpatient **psychiatric bed**

Include:

- Hours spent in the ED for patients with an ED visit that were admitted to the hospital's inpatient setting or placed in hospital observation status.

Hours spent in the ED is defined as the difference between the "patient arrival time at the ED" to "patient departure from the ED."

Question #5, column d: 90th percentile of **hours** spent in the ED for ED visits indicated in column (a).

Enter the 90th percentile of hours spent in the ED for ED visits indicated in column (a) for each of the following admission types:

Pediatric (17 years of age or younger) patients admitted to an inpatient **non-psychiatric bed**

Pediatric (17 years of age or younger) patients admitted to an inpatient **psychiatric bed**

Include:

- Hours spent in the ED for patients with an ED visit that were admitted to the hospital's inpatient setting or placed in hospital observation status.

Hours spent in the ED is defined as the difference between the "patient arrival time at the ED" to "patient departure from the ED."

Patient Safety Practices Frequently Asked Questions (FAQs)**General Questions****1. For the purposes of reporting on Section 6 of the Leapfrog Hospital Survey:**

- a. **Frontline caregivers** include, but are not necessarily limited to employed physicians, mid-levels (NPs, PAs), nurses, environmental services staff, allied health professionals, and occupational and physical therapists.
- b. **Service line management** refers to those who manage all functions within a specific service line (e.g., oncology, cardiac, women's, orthopedics). These individuals may be managing a departmental sub-function within a broader department (e.g., cardiac care within the Department of Medicine).
- c. **Midlevel management** includes the intermediate management of an organization that is subordinate to the executive management and responsible for at least two lower levels of staff below them. An example would include a Director of Nursing, who might oversee Nursing Managers, who oversee the nurses who care directly for patients.
- d. **Physician leadership** refers to physicians who serve in a leadership role in the organization. Titles may include positions such as Chief Medical Officer, Vice President for Medical Affairs, Medical Director, and/or Department Chair.
- e. **Nursing leadership** refers to nurses who serve in a leadership role (e.g., Chief Nursing Officer, Vice President/Assistant Vice President of Nursing, Vice President/Assistant Vice President for Clinical Operations, etc.).
- f. **Senior administrative leadership** refers to administrators who are responsible for hospital-wide departments or services (e.g., Chief Executive Officer, Chief Administrative Officer, Chief Nursing Officer, Chief Medical Officer, etc.).
- g. **Patient Safety Officer** refers to the patient safety leader (who may or may not have the title "Patient Safety Officer") who has responsibility for multiple and integrated areas of patient safety. The organization may appoint an officer who may have other assigned duties or may specifically employ a Patient Safety Officer designated with this responsibility. Multiple executives who are responsible for individual areas (i.e., risk, quality, infection prevention, etc.), but do not assess the integrated safety issues, would not qualify.
- h. **Board (governance)** refers to the individual hospital's board of directors, or the board that governs the hospital and can pass policies that impact the hospital, or a system-wide board that governs hospitals in the system, or a committee of the board (such as a board-appointed, hospital-wide Patient Safety and Quality Committee, which includes board members).
- i. **Medical executive committee** refers to a primary governance committee for medical staff. The medical executive committee makes leadership decisions related to medical staff policies, procedures, and rules, with an emphasis on quality control and quality improvement. They also adopt and implement these policies and procedures and are responsible for medical staff appointment and reappointment.

2. Why is it necessary to continue to review a safe practice once it has been implemented?

All too often in the hectic pace of providing patient care in a hospital, with frequent staff turnover and lots of part-time employees, it is difficult to get a change in practice well-established. Annual review with monitoring and tracking of the safe practices will ensure that they are embedded in the operations of the hospital and not lost in the transition of new staff coming in or part-time employees coming and going.

3. **The phrase “performance reviews or compensation” is used throughout Section 6 within many Accountable elements. Do performance reviews and compensation plans need to have specific language about the Safe Practice or can a set of patient safety goals related to the specific Safe Practice be attached?**

A performance review or compensation plan should include specific language about a Safe Practice. A list of Safe Practices and related goals may be incorporated into the performance review and/or compensation plan or formalized programs whereby a measure of success of those activities or programs is tied to individual performance reviews or compensation incentive plans of executives.

Every employee should have a patient safety component included in their annual review. Another option is to include in the employee's competency review (Ongoing Professional Practice Evaluation, Focused Professional Practice Evaluation).

4. **There are several references to hospital budgets throughout Section 6 within many Ability elements. How can hospitals meet the intent of these elements?**

The intent of these elements is to verify that actions specific to the Safe Practices have been included in hospital budgets. To meet the intent of these elements, hospitals should ensure that these actions can be identified within a department budget or hospital budget. If the budget includes categories that address the Safe Practice but do not specifically name the Safe Practice, then the intent of the element is met.

Further, if a hospital has not allocated budget dollars for activities tied to a Safe Practice but can document expenses specific to the Safe Practice during the reporting period, the intent of the element is met. Plans to allocate specific budget dollars for a Safe Practice should be incorporated into the next upcoming budget year as an ongoing process.

Hospitals may also document training or education expenditures specific to the Safe Practice or expenditures on educational materials that are specific to the Safe Practice.

Hospitals that have invested in in-house staff educators and who include in their job descriptions the coordination and delivery of training and education to appropriate hospital staff on specific Safe Practices meet the intent of this element. For example, if the position description for an in-house educator, such as the Quality Director, includes the coordination and delivery of in-service training and educational sessions related to improving the culture of safety based on the organization's culture of safety survey results, then the intent of this practice is met. Specific time allocations are not required as long as there is documentation of staff participation through dated meeting minutes or attendance records. Training can be in-person or virtual/ computer-based.

5. **How should staff education be measured?**

Educational meetings should clearly address the subject matter pertinent to adverse events and performance improvement targeted by the specific Safe Practice. Hospitals should track meeting dates, frequency of training sessions provided, attendance records or completion records, and the percentage of the total staff who received the information. Training can be in-person or virtual/ computer-based.

6. **There are several references to developing or implementing Performance Improvement Programs throughout Section 6 within many Action elements. How can hospitals meet the intent of these elements?**

At a minimum, performance improvement programs should include all the following five criteria:

- **Education** regarding the pertinent adverse event frequency, severity, and/or impact of best practices. These expenses should be budgeted and tracked to meet the budget elements of the Safe Practices.
- **Skill building** in use of performance improvement tools. These expenses should be budgeted and tracked to meet the budget elements of the Safe Practices.

- **Measurement** of process measures or outcomes measures. The “Outcome, Process, Structure, and Patient-Centered Measures” section at the end of each Safe Practice in the NQF Safe Practices for Better Healthcare 2010 Update suggests performance measures that can be used to support measuring and monitoring quality improvement efforts.
- **Process improvement** and interventions.
- **Reporting** of performance outcomes.

A “campaign” such as an awareness campaign would not meet the intent of these elements.

NQF Safe Practice #1 – Leadership Structures and Systems FAQs

7. **1.1a, 1.2b, and 1.2d: Several elements within NQF Safe Practice #1 mention that “regular communication” is required. How does Leapfrog define “regular communication”?**
Regular communication means more than once a year. Some hospitals may discuss these items quarterly or even monthly. Hospitals can document that these communications took place through dated meeting minutes. We would urge hospitals to improve the detail of their board and other meeting minutes to ensure they are able to clearly document that the issues were discussed.

The discussion of these items can be a general note in the minutes, without specific details. However, hospitals should maintain copies of dated presentations and reports related to these agenda items in order to document adherence to these elements. Meetings can be in-person or virtual.

8. **1.1a: If NQF Safe Practice #4 – Identification and Mitigation of Risks and Hazards has been removed from the Leapfrog Hospital Survey, are hospital boards still expected to communicate regularly regarding risks and hazards?**

Though we are not asking hospitals to report on this Safe Practice, it remains important to communicate the actions you are taking to identify and mitigate risks and hazards to patients to your board.

9. **1.1b: What is meant by “patients and/or families of patients are active participants in the hospital-wide safety and quality committee?”**

To meet the intent of this element, hospitals must have patients and/or families of patients participate on the hospital-wide safety and quality committee. The safety and quality committee should have influence over hospital-wide quality and safety issues, not just a particular department or service line. Hospitals with a system-wide safety and quality committee must have one patient representative per campus on the system-wide safety and quality committee.

Meetings should be formal, and minutes should be taken. Topics covered should be related to broad oversight of hospital-wide patient safety and quality issues and what is being done to effect changes. An example would be tracking and preventing adverse events.

In most hospitals, due to the scope of issues discussed at Patient and Family Advisory Council (PFAC) meetings, having a PFAC would not meet the criteria for a safety and quality committee. If your hospital has a PFAC member on the hospital-wide patient safety and quality committee, then your hospital is meeting the intent of this safe practice.

Patients and/or families of patients can participate in these meetings in person, via conference call, or via video conference. Hospitals do not meet the intent of this element if the patients and/or families of patients are invited but do not regularly attend. It is the responsibility of the hospital to ensure that patients and/or families of patients can provide their perspectives to other committee members during meetings. The patient serving on that committee should have the experience, orientation or training needed to understand and effectively contribute to safety and quality committee issues. Hospitals should identify people who are not Board members or employees to serve on the committee so the participant can represent the views of patients and without conflict. Board members have a fiduciary responsibility to the organization, and therefore may have a potential conflict representing the views of patients and/or families of patients.

Hospitals can document adherence to this element by maintaining committee rosters and meeting minutes with attendance and participation noted. Patients and/or families of patients should have the opportunity to present or co-present a topic, lead or co-lead a discussion, or co-chair the committee, and this should be noted in the meeting minutes. Patients and/or families should have attended at least one meeting prior to Survey submission.

Hospitals in the process of adding patients/families of patients to the hospital-wide safety and quality committee can refer to AHRQ's toolkit for engaging patients and families in hospital improvement work for more information at <https://www.ahrq.gov/patient-safety/patients-families/engagingfamilies/index.html>.

10. 1.1c: What are some examples of how a hospital can report to the community ongoing efforts and results of these efforts to improve safety and quality?

Hospitals can utilize several communication vehicles to reach the broader community, including webpages that are prominent from the organization's homepage, electronic newsletters, mailings or annual reports, or an ad in the local paper. The communication must include **both** efforts the hospital is taking to improve safety and quality and the results of those efforts. As the sole focus of the NQF Safe Practices for Better Health Care report is reducing or preventing adverse events (refer to NQF list of adverse events at https://www.qualityforum.org/topics/sres/serious_reportable_events.aspx), patient safety and quality efforts **reported to the community** must have this focus as well. In other words, efforts the hospital is taking to improve safety and quality should be related to reducing or preventing these adverse events and the results of those efforts would be the measurable outcomes.

Meetings where a few community members are present would not meet the intent of this practice as the intent is to reach a larger audience.

Each hospital within the same health care system would need to report the results to the community for each hospital in the system because the results of efforts to improve safety and quality would be different at each hospital.

11. 1.2a, 1.3a, 1.4c: What are the minimum requirements to qualify as a “patient safety program?”

As part of accreditation through The Joint Commission, hospitals are required to meet standard LD.03.09.01, which identifies the elements that must be included in an integrated patient safety program (see pages 57 – 62 in the Organization Culture and System Performance Expectations chapter of *The Joint Commission E-dition*). Hospitals that are not accredited by The Joint Commission can use these elements as a guide as well.

12. 1.2d: What is the role of an interdisciplinary patient safety committee?

An interdisciplinary patient safety committee is an internal hospital committee that oversees the activities defined in the NQF Safe Practice #1 Practice Element Specifications and develops action plans to create solutions and changes in performance.

13. 1.2d: What is an example of team training that is appropriate for caregivers?

Hospitals can utilize TeamSTEPPS, a comprehensive, evidence-based training program for health care professionals. At a minimum, the elements of basic teamwork training should be met as described on page 96 of the Safe Practices for Better Healthcare– 2010 Update, which is available for download here: <http://www.leapfroggroup.org/survey-materials/survey-and-cpoe-materials>.

Team training to caregivers would need to be provided and then reported to senior administrative leadership by the interdisciplinary patient safety team to meet the intent of Safe Practice 1.2d.

14. 1.2e: How can hospitals that have not had any adverse events during the reporting period earn credit for this element?

First, we urge your hospital to reassess its conclusion that no adverse events occurred; that would be highly unusual. Following the reassessment, if no adverse events were identified and the hospital can document that it has policies in place to report such events when they do occur (to a mandatory or voluntary program), the hospital would meet the intent of this element. Please see Section 7A: Never Events for a list of adverse events and components of a Never Events Policy.

15. 1.4a: What are some examples of how the CEO and senior administrative leadership can be personally engaged in reinforcing patient safety improvements?

Executive walk-arounds are an example of how the CEO and senior administrative leadership can be personally engaged in reinforcing patient safety improvements. The executive walk-arounds provide staff with visibility and access to senior management. They also provide the CEO and senior administrative leadership with the opportunity to address issues and concerns in various departments in real-time, rather than in monthly meetings. Monthly meetings with staff in a centralized location do not meet the intent of this Safe Practice.

Progress on the implementation of walk-arounds can be measured by tracking the number of walk-arounds performed per unit or clinical area for designated time periods as shown in the calendars of the CEO and senior administrative leadership. Some progressive hospitals have tied incentives to regular executive walk-arounds and to reliable exchange of information on clinical unit performance. Some hospitals have established a feedback loop between the CEO and senior administrative leadership and staff to measure the implementation of performance improvement ideas that were generated during executive walk-arounds.

16. 1.4b: What are some examples of how the CEO can actively engage leaders from service lines, midlevel management, clinical leadership, and physician leadership in patient safety improvement actions?

Hospitals can refer to the American College of Healthcare Executives professional policy statement, which includes examples of how leaders should be engaged in patient safety and quality.

17. 1.4c: What are some examples of how hospitals can engage the medical staff as direct contributors to the patient safety program?

Examples may include:

- Senior leadership requests time on Medical Staff Department standing agendas to provide patient safety updates and elicit direct feedback on specific areas as well as “what keeps the medical staff up at night.”
- Medical staff are invited and encouraged to be active participants in clinical unit meetings where patient safety is addressed.
- The board appoints a community-based active medical staff member to represent the organization on a regional patient safety initiative.

18. 1.4c: In a hospital where all medical staff is employed, how do we answer this question?

The intent of this element is to ensure that physicians and medical staff have the opportunity to provide input on the hospital's patient safety plan because often they do not have a significant position in the hierarchical structure of an organization but carry a great deal of influence over how the organization is run. Thus, they are informal leaders who can be change agents and “accelerators or barriers for improvement.” If the organization's board and senior administrative leadership seek and document input from physicians and medical staff regarding patient safety programs, the intent of this element has been met.

NQF Safe Practice #2 – Culture Measurement, Feedback, and Intervention FAQs

19. Why are two different reporting periods used in NQF Safe Practice #2?

Within the *Awareness and Accountability* elements, a 24-month reporting period is used because these elements are related to conducting the culture of safety survey, which is typically conducted every other year. Within the *Ability and Action* elements, a 12-month reporting period is used because these practices are related to follow-up activities that would be completed after the results from the culture of safety survey are available.

20. 2.1a: What are the requirements to qualify as a “culture of safety survey?”

Several surveys are readily available that specifically address culture, safety climate, and teamwork. These surveys incorporate all the additional specifications as outlined in NQF Safe Practice #2 (see 2010 NQF Safe Practice Report).

Hospitals that do not use a nationally recognized culture of safety tool must ensure that their culture of safety survey meets Leapfrog's guidelines for what constitutes a valid, consistent, and reliable survey tool. These guidelines were developed in consultation with Leapfrog's Culture of Safety Expert Panel. The guidelines can be found on the [Survey and CPOE Materials webpage](#) under supporting materials for Section 6.

A general employee satisfaction survey that has a small component of the survey addressing organizational culture does not qualify.

21. 2.1a Can an employee engagement survey and nationally recognized culture of safety tool be conducted at the same time?

Yes, if the culture of safety tool is unaltered and administered in its entirety.

22. 2.1a: What does “50% of the aggregated care delivered to patients within the hospital” mean?

As described on page 88 of the NQF Safe Practices for Better Healthcare Report, “a census of units or service areas that in aggregate deliver care to more than 50 percent of the patients receiving care should be surveyed, service lines or units where there is a high patient safety risk should be measured, and there should be a valid sample to allow for unit-level analysis and facilitate improvement.”

23. 2.1b: For reporting individual unit level results, what is the minimum number of responses a hospital should have?

Most major vendors use a threshold of 5 or more responses and a 40% response rate. For larger units, a lower response rate may be acceptable. If a unit does not meet these thresholds, your hospital could aggregate the results of “like” units together (e.g., medical/surgical units, ICUs, ORs). Hospitals should not combine results across “unlike” units.

24. 2.1c: What is meant by “like” hospitals? Can hospitals benchmark against those within the same network or system? How would a pediatric hospital benchmark against other pediatric hospitals?

Hospitals should benchmark their results against hospitals with similar demographics, such as hospital type, number of beds, number of admissions, urban/rural designation, etc. Hospitals in systems or healthcare networks should benchmark throughout the health system, but not within the same region.

Pediatric hospitals utilizing the AHRQ Hospital Survey on Patient Safety Culture can benchmark their results using the [AHRQ's User Comparative Database Report](#) (refer to instructions starting on page 29).

25. 2.1d: What is meant by roles and staff levels?

Roles are job types (e.g., surgeons, nurses, hospitalists, physician assistants, or clinical and non-clinical, etc.). Staff levels are defined within the organization's hierarchy (e.g., senior administrators, directors, managers, etc.).

26. 2.2b: Does performance evaluation criteria for senior administrative leadership need to include the actual targeted response rate to the culture of safety survey?

Yes. The organization's targeted response rate to the culture of safety survey should be included in performance evaluation criteria for senior administrative leadership. Criteria for using the survey results in improvement efforts should also be included to meet the intent of this element.

27. 2.3a: Which employees should be included in the staff education program? Employees in all units or just those in low-performing units?

Staff education needs to include education for all levels of staff, from senior administrative and clinical leadership to frontline caregivers. In addition, because all units have opportunities for improvement, the staff education should include all units but can focus on deficiencies of a specific unit or department.

28. 2.1e and 2.4b: What is the difference between 2.1e and 2.4b? Both seem to focus on sharing and discussing the Culture of Safety Survey results.

While both elements focus on sharing and discussing Culture of Safety Survey results, these elements focus on different audiences and activities, and the result is that different kinds of feedback are collected. Safe Practice 2.1e requires local leaders (e.g., unit/department manager) to engage their unit/departments in a discussion about the survey results, while Safe Practice 2.4b requires senior administrative leadership to engage each sampled unit in a discussion about the survey results and their concerns.

Hand Hygiene FAQs**Training and Education****29. Are online training modules acceptable for the purposes of question #1 and question #3?**

Online training modules are acceptable for the purposes of answering question #1 and question #3 if they meet all requirements outlined in the question.

For question #1, the online training must be done at the frequency specified and would need to be delivered and/or developed by a professional with appropriate training and skills. For question #3, the online training must meet all six topics outlined in the question.

Physical demonstration (question #2) **cannot** be done using an online training module.

30. Can a hospital answer “yes” to the training and education questions #1-3 if the training and education for medical/nursing/pharmacy students is done by the medical/nursing/pharmacy school?

Yes, you can answer “yes” to questions #1-3 if your hospital, alone, or in combination with other hospitals, has developed a standard orientation/on-boarding curriculum for students that meets all requirements outlined in the training and education questions. Your hospital will need to have continued and ongoing input into the curriculum, but the administration of the training and education for students, including physical demonstration of proper hand hygiene technique, could be conducted by the school.

31. What are examples of what can count as “physically demonstrating” proper hand hygiene during the initial hand hygiene training?

Before new individuals to your hospital have contact with patients and the patient care space, they will need to demonstrate proper hand hygiene with soap and water and alcohol-based hand sanitizer. This demonstration could be done as part of other onboarding activities, during occupational health activities as part of the TB test, during department orientations, in small

groups, etc. A group “teach-back” would be acceptable, but with no more than 10 students per one trainer/monitor. An online or in-person “simulation” would not be sufficient for this purpose. Computer-based assessments of an individual’s hand hygiene technique are acceptable if the assessment tracks an individual’s hand motions, is done without providing instructions to the individual during the assessment, and feedback is given to them at the end.

Hospitals that are starting to implement this component should add physical demonstration to their **initial** training for any **new individuals who touch patients or who touch items that will be used by patients at their hospital**. Leapfrog is not asking hospitals to retroactively train individuals.

Infrastructure

32. Is having an electronic system and dashboards that display low product and low battery reports which are used to ensure that the refilling and replacing of dispensers is completed in a timely manner sufficient for meeting the quarterly audit requirements in question #4?

Yes, if you have ongoing and reliable electronic ways of understanding when product or batteries are low, that would suffice for the audit. The goal is to make sure that supplies are available in soap, alcohol-based hand sanitizer, and paper towel dispensers.

33. What does Leapfrog mean by “equally accessible to the location of all patients in the room or bed space” for the purposes of question #5?

Equally means the same distance from any patient’s bed, which can be measured in steps. Leapfrog is not looking for an exact distance, but rather the goal is to ensure that hand hygiene can be easily performed regardless of the location of the patient being cared for in the room or bed space.

Monitoring

34. Why did Leapfrog select 200 hand hygiene opportunities for monthly monitoring in question #8?

200 hand hygiene opportunities were chosen as the sample size based on a study by Yin et. al which showed that 180-195 opportunities would need to be monitored to accurately observe a 10% change in hand hygiene compliance (Yin et al.). The additional sample sizes outlined in the measure specifications are for smaller patient care units where monitoring 200 opportunities may not be feasible.

References:

Steed C, Kelly JW, Blackhurst D, Boeker S, Diller T, Alper P, Larson E. Hospital hand hygiene opportunities: where and when (HOW2)? The HOW2 Benchmark Study. American Journal of Infection control. 2011 Feb 1;39(1):19-26.

Jun Yin MS, Heather Schacht Reisinger PhD, Mark Vander Weg PhD, Marin L. Schweizer PhD, Andrew Jesson, Daniel J. Morgan MD MS, Graeme Forrest MD, Margaret Graham, Lisa Pineles MA and Eli N. Perencevich MD MS. Establishing evidence-based criteria for directly observed hand hygiene compliance monitoring programs: a prospective, multicenter cohort study. Infection Control and Hospital Epidemiology Vol. 35, No. 9 2014 Sep, pp. 1163-8.

35. My hospital uses an electronic compliance monitoring system, but it does not meet all the criteria outlined in questions #12-13. Can I report on the hand hygiene compliance data we collect via direct observation instead?

Yes. If your hospital also uses direct observation to collect hand hygiene compliance data (not just for coaching/intervention) throughout **all** patient care units (including those with the electronic compliance monitoring system), you can select “yes, using only direct observation” in either question #8, question #9, or question #10 and report on your adherence to the direct observation criteria only. Otherwise, you will need to respond “no” to question #12.

36. Is Leapfrog encouraging hospitals to implement electronic compliance monitoring? These systems can be costly, and the technology still needs to advance.

The questions in the hand hygiene standard ask about a variety of strategies that can be used to monitor and improve hand hygiene. Leapfrog is encouraging hospitals to take a multimodal approach. Regarding monitoring, while hospitals can achieve the Leapfrog standard with direct observation alone, Leapfrog is communicating a strong preference for use of electronic monitoring (implemented according to evidence-based principles). In addition to literature suggesting electronic monitoring works better to pinpoint compliance issues, the difference in the sheer number of hand hygiene opportunities covered by the two monitoring strategies represent powerful evidence in favor of electronic monitoring. Electronic monitoring allows facilities to monitor virtually every patient encounter, while direct observation monitors a selection. Based on the evidence, our standard calls for monitoring 200 hand hygiene opportunities per unit per month, which is a small subset of overall hand hygiene opportunities. Even beyond capturing more encounters aligned with the evidence, electronic monitoring alleviates the ethical quandary of an observer watching patient harm without intervening.

As with Computerized Physician Order Entry (CPOE) systems and Bar Code Medication Administration (BCMA) systems, we anticipate that electronic compliance monitoring technology will improve over time and become an important component of a comprehensive hand hygiene program. Electronic monitoring is a routine component of public safety in other industries where compliance is critical, so health care can and should achieve those standards for its patients.

All items included in Section 6D are based on the evidence review and recommendations from Leapfrog's national Hand Hygiene Expert Panel and others. We have included in the Hand Hygiene bibliography several peer-reviewed studies that have examined the benefits of using electronic monitoring systems over direct observation. The bibliography is available at <https://ratings.leapfroggroup.org/measure/hospital/2025/handwashing>.

37. How does reporting the number of hand hygiene opportunities monitored in questions #8-10 impact our hospital's scoring?

Hospitals can earn "Achieved the Standard" by either answering "yes" to question #8 and monitoring 200 hand hygiene opportunities (or at least the number of hand hygiene opportunities outlined based on the unit type in Tables 1-3 of the Hand Hygiene Measure Specifications) each month in each patient care unit and also meeting all other elements of the Monitoring and Feedback domains, as well as meeting all elements in 2 of the 3 remaining domains OR by answering "yes" to question #9 and monitoring at least 100 hand hygiene opportunities (or at least the number of hand hygiene opportunities outlined based on the unit type in Tables 4-6 of the Hand Hygiene Measure Specifications) each month in each patient care unit and also meeting all other elements of the Monitoring domain and all elements in the remaining four domains. Facilities that answer "yes" to question #10 and only monitor 100 hand hygiene opportunities a quarter are only eligible to earn a maximum performance category of "Considerable Achievement" based on their adherence to the elements in the other domains. Hospitals should review the Hand Hygiene scoring algorithm in the 2025 Leapfrog Hospital Survey Scoring Algorithms document for more details.

38. Are online training modules acceptable for the purposes of training hand hygiene compliance observers in question #15?

Online training can be used for the initial and recurrent training of hand hygiene compliance observers. Please refer to the Hand Hygiene Measure Specifications for more information on the requirements for the validation of hand hygiene compliance observers.

Feedback**39. For the purposes of responding to question #19, what are some examples of how hospital leadership can be held accountable through performance reviews or compensation?**

A performance review or compensation plan should include specific language about hand hygiene performance. A list of hand hygiene practices and related goals may be incorporated into

the performance review and/or compensation plan or formalized programs whereby a measure of success of those activities or programs is tied to individual performance reviews or compensation incentive plans of executives. Examples include meeting targets for hand hygiene compliance rates, having bonuses tied to structural changes like the implementation of electronic compliance monitoring systems, etc. Language pertaining solely to infection control practices and performance would NOT be sufficient.

Culture

40. What are some examples of how patients and visitors can be invited to remind individuals who touch patients or who touch items that will be used by patients to perform hand hygiene?

Patients and visitors can be invited to remind individuals who touch patients or who touch items that will be used by patients to perform hand hygiene with posters placed in patient care units, bedside placards, buttons worn by the staff, etc.

41. What are some examples of demonstrating a commitment to hand hygiene improvement as referenced in question #21?

Some examples of how individuals can demonstrate a commitment to support hand hygiene improvement are written or verbal commitments given during town hall meetings, videos, e-mails from the CEO, public comments to staff, etc. This needs to be a verbal or written commitment that is delivered to those individuals who touch patients or who touch items that will be used by patients.

Diagnostic Excellence FAQs

42. What are examples of a CEO or CMO commitment to reducing errors in diagnosis?

Examples of a CEO or CMO commitment include verbal remarks at an all-staff "town hall" or "all-hands" meeting, or a segment in an annual report or other publication disseminated to all staff that specifically mentions reducing diagnostic errors.

43. What are examples of a PFAC having input in or leading initiatives aimed at reducing errors in diagnosis?

Hospitals can refer to the Patient and Family Advisory Council (PFAC) Toolkit for Exploring Diagnostic Quality for detailed guidance. One common example of an initiative is to consult with the PFAC for input on materials for admitted patients pertaining to diagnosis, such as a resource developed based on needs identified in a patient survey, or a sepsis education campaign targeted at patients visiting the emergency room.

44. Can our hospital system convene a multidisciplinary team at the system level, instead of individual hospitals assembling teams at their respective facilities?

Multidisciplinary teams convened to solely focus on reducing diagnostic errors should be specific to individual hospitals in order to closely oversee case analyses, review data specific to individual sites, and be responsive to the individual hospital's leadership.

45. What pathology reports should be included in our response to question #19? Are inpatient and outpatient reports included?

A "pathology report" refers to any report that would be signed by a pathologist that diagnoses cancer. In other words, both the first diagnosis of malignancy reports, or a finalized report where resection specimens were examined and included in a signed report, would be included in the assessment of whether there was documented communication between the pathologist and the patient or patient's ordering physician. This applies to inpatients and outpatients alike, as long as the pathologist practicing at your hospital signed the report. If multiple signed reports are issued for a patient in a single year, they should all be included.

46. What ICD-10 codes should we use to identify diagnoses of colon, lung, or breast cancer?

Leapfrog has not identified a specific set of ICD-10 codes to use to select these cases.

Page Intentionally Left Blank

SECTION 7: MANAGING SERIOUS ERRORS

This section includes questions and reference information for Section 7: Managing Serious Errors. Please carefully review the questions, endnotes, and reference information (e.g., measure specifications, notes, and frequently asked questions) before you begin. Failure to review the reference information could result in inaccurate responses.

Section 7: Managing Serious Errors

Never Events Fact Sheet: <https://ratings.leapfroggroup.org/measure/hospital/2025/responding-never-events>

Section 7 includes questions about your hospital's response to Never Events. In addition, Leapfrog collects information via its NHSN Group about five healthcare-associated infections (CLABSI, CAUTI, MRSA, *C. diff.*, and SSI: Colon). Hospitals reporting on Section 7B: Healthcare-Associated Infections are required to join Leapfrog's NHSN Group. Important information and deadlines are available on the [Join NHSN Group webpage](#).

Each hospital achieving the standard for Never Events:

Has a policy that includes the nine principles of Leapfrog's Never Events policy and will implement this policy if a "never event" occurs within their hospital.

Each hospital achieving the standards for Healthcare-Associated Infections:

1. Has a CLABSI standardized infection ratio of less than or equal to 0.413 for ICU and select ward inpatients.
2. Has a CAUTI standardized infection ratio of less than or equal to 0.427 for ICU and select ward inpatients.
3. Has a MRSA standardized infection ratio of less than or equal to 0.496 for facility-wide inpatients.
4. Has a *C. diff.* standardized infection ratio of less than or equal to 0.621 for facility-wide inpatients.
5. Has an SSI: Colon standardized infection ratio of less than or equal to 0.349 for inpatients following eligible colon procedures.

Download the 2025 Leapfrog Hospital Survey Scoring Algorithm on the [Scoring and Results webpage](#).

7A: Never Events

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Note: To earn credit for these questions, hospitals must have a policy in place that addresses the National Quality Forum's list of Serious Reportable Events. All references to "never event" or "serious reportable event" are specific to the National Quality Forum list available at https://www.qualityforum.org/topics/sres/serious_reportable_events.aspx.

Reporting Period:

Answer questions #1-9 based on the principles currently included in your hospital's never events policy at the time you submit this section of the Survey.

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

Below are the nine elements which make up The Leapfrog Group's Policy Statement regarding never events.⁴⁸ Indicate which of the following principles are included in your hospital's current never events policy.

1) We <u>apologize to the patient</u> ⁴⁹ and/or family affected by the <u>never event</u> ⁴⁸ .	☐ Yes ☐ No
2) We report the event to at least one of the following <u>external agencies</u> ⁵⁰ within 15 business days of becoming aware that the <u>never event</u> ⁴⁸ has occurred: • Joint Commission, as part of its Sentinel Events policy; • DNV GL Healthcare; • State reporting program for medical errors; or • Patient Safety Organization (as defined in The Patient Safety and Quality Improvement Act of 2005).	☐ Yes ☐ No
3) We perform a <u>root cause analysis</u> ⁵¹ , which at a minimum, includes the elements required by the chosen external reporting agency. <i>If "no," skip questions #6-7. The hospital will be scored as "Limited Achievement."</i>	☐ Yes ☐ No
4) We waive all costs directly related to the <u>never event</u> ⁴⁸ . <i>In order to respond "yes" to this question, all costs directly related to the never event must be waived to both the patient and the payor.</i>	☐ Yes ☐ No
5) We make a copy of this policy available to patients, patients' family members, and payers upon request.	☐ Yes ☐ No
6) We interview patients and/or families, who are willing and able, to gather evidence for the <u>root cause analysis</u> ⁵¹ .	☐ Yes ☐ No
7) We inform the patient and/or the patient's family of the action(s) that our hospital will take to prevent future recurrences of similar events based on the findings from the <u>root cause analysis</u> ⁵¹ .	☐ Yes ☐ No
8) We have a protocol in place to provide support for caregivers involved in <u>never events</u> ^{48,49} and make that protocol known to all caregivers and affiliated clinicians.	☐ Yes ☐ No
9) We perform an annual review to ensure compliance with each element of Leapfrog's Never Events Policy for each <u>never event</u> ⁴⁸ that occurred. <i>If "no" to any questions #1-8, skip this question and continue to the next subsection.</i>	☐ Yes ☐ No

7B: Healthcare-Associated Infections

Hospitals that share a CMS Certification Number must have a unique NHSN ID as required by NHSN. Please carefully review Leapfrog's Multi-Campus Reporting Policy on the [Join NHSN Group webpage](#).

Specifications: See [Healthcare-Associated Infections Measure Specifications](#) in the Reference Information beginning on page 269.

Reporting Period: 12 months

- June and August Data Downloads: 01/01/2024 – 12/31/2024
- October and December Data Downloads: 07/01/2024 – 06/30/2025

Leapfrog will update data four times per Survey Cycle for all members of our NHSN group that have provided an accurate NHSN ID in the Hospital Profile and submitted the 2025 Leapfrog Hospital Survey.

Visit the [Join NHSN Group webpage](#) for important information on deadlines for joining Leapfrog's NHSN Group.

Hospitals that join* Leapfrog's NHSN Group by the [join-by dates](#), enter a valid NHSN ID in the Profile of the Leapfrog Hospital Survey, and submit the 2025 Leapfrog Hospital Survey will have their data scored and [publicly reported](#).

1) Has your hospital joined Leapfrog's NHSN Group and entered a valid NHSN ID in the Profile so that the standardized infection ratios (SIRs) for each of the following applicable infection measures can be downloaded directly from the CDC's National Healthcare Safety Network (NHSN) for scoring and public reporting: • CLABSI in ICUs and select wards; • CAUTI in ICUs and select wards; • Facility-wide inpatient MRSA Blood Laboratory-identified Events; • Facility-wide inpatient C. diff. Laboratory-identified Events; and • SSI: Colon?	○ Yes, the hospital has joined Leapfrog's NHSN Group, accepted Leapfrog's Rights Acceptance Report/Data Rights Template, and entered a valid NHSN ID in the Profile ○ No, the hospital has not joined Leapfrog's NHSN Group, accepted Leapfrog's Rights Acceptance Report/Data Rights Template, or entered a valid NHSN ID in the Profile and acknowledges that the hospital will be publicly reported as "Declined to Respond" for all five infection measures
---	--

*Hospitals are not required to "re-join" Leapfrog's NHSN Group if they joined and conferred rights in previous Leapfrog Hospital Survey Cycles. However, all hospitals in Leapfrog's NHSN Group must review their Rights Acceptance Report annually (by the published [join-by deadlines](#)) to ensure that Leapfrog has access to the data from all of the locations that were active during the reporting period, even if those locations are no longer active, to ensure that Leapfrog obtains the appropriate SIR. Instructions for joining or verifying that you are in Leapfrog's NHSN Group are available in the "NHSN Guidance: Join the Group, Review/Accept Data Rights Template, and Download Reports" document on our [Join NHSN Group webpage](#).

Hospitals that join Leapfrog's NHSN group, but do not provide an accurate NHSN ID in the Hospital Profile or do not submit the 2025 Leapfrog Hospital Survey, will be scored and publicly reported as "Declined to Respond" for each of the five infection measures. Hospitals that have a predicted value <1 for an infection measure, or hospitals whose number of observed MRSA or CDI infections present on admission are above a pre-determined cut-point, will be scored as "Unable to Calculate" for that measure. Hospitals for whom a measure does not apply during the reporting period (e.g., zero device days or procedure days, no applicable locations) will be scored as "Does Not Apply" for that measure. Hospitals that are PPS-Exempt Cancer hospitals, as classified by CMS, will be scored as "Does Not Apply" for CLABSI and CAUTI only.

2025 Leapfrog Hospital Survey – Hard Copy

Section 7: Managing Serious Errors

For all other deadlines, please refer to the “Deadlines and Reporting Periods” table provided in the Healthcare-Associated Infections Measure Specifications, as well as online.

Affirmation of Accuracy

As the hospital CEO or as an employee of the hospital to whom the hospital CEO has delegated responsibility, I have reviewed this information pertaining to the Managing Serious Errors Section at our hospital, and I hereby certify that this information is true, accurate, and reflects the current, normal operating circumstances at our hospital. I am authorized to make this certification on behalf of our hospital.

The hospital and I understand that The Leapfrog Group, its members, the public and entities and persons who contract or have other business dealing with The Leapfrog Group are relying on the truth and accuracy of this information. The hospital and I also understand that The Leapfrog Group will make this information and/or analyses of this information public through the Survey Results public reporting website, The Leapfrog Group's Hospital Safety Grade, and/or other Leapfrog Group products and services. This information and/or analyses and all intellectual property rights therein shall be and remain the sole and exclusive property of The Leapfrog Group in which The Leapfrog Group retains exclusive ownership. This information does not infringe upon any third-party intellectual property rights or any other third-party rights whatsoever and is free and clear of all encumbrances and liens of any kind. The hospital and I acknowledge that The Leapfrog Group may use this information in a commercial manner for profit. The hospital shall be liable for and shall hold harmless and indemnify The Leapfrog Group from any and all damages, demands, costs, or causes of action resulting from any inaccuracies in the information or any misrepresentations in this Affirmation of Accuracy. The Leapfrog Group and its members and entities and persons who contract or have other business dealing with The Leapfrog Group reserve the right to omit or disclaim information that is not current, accurate or truthful.

Affirmed by _____, the hospital's _____,
(first name and last name) (title)
on _____.
(date)

Section 7: Managing Serious Errors Reference Information

What's New in the 2025 Survey

Leapfrog will continue to obtain healthcare-associated infection (HAI) data directly from the CDC's National Healthcare Safety Network (NHSN). Additionally, Leapfrog will add one new question to Section 7B to confirm that hospitals have completed all the required steps in order for their HAI data to be scored and publicly reported, which include: joining Leapfrog's NHSN Group, entering a valid NHSN ID in the Profile of the Leapfrog Hospital Survey, and submitting the 2025 Leapfrog Hospital Survey.

Change Summary Since Release

None. If substantive changes are made to this section of the Survey after release on April 1, 2025, they will be documented in this Change Summary section.

Section 7B: Healthcare-Associated Infections Measure Specifications

Important Note: Hospitals that share a CMS Certification Number must have a unique NHSN ID as required by NHSN. Please carefully review Leapfrog's Multi-Campus Reporting Policy on the [Join NHSN Group webpage](#).

Checklist for Joining Leapfrog's NHSN Group and Ensuring the Data are Accurate:

- ☐ **Join or verify that you are in Leapfrog's NHSN Group by the join-by dates**
 - Instructions for joining or verifying that you are in Leapfrog's NHSN Group are available [here](#) in the "NHSN Guidance: Join the Group, Review/Accept Data Rights Template, and Download Reports" document.
 - Join-by dates are listed in the "Deadlines and Reporting Periods" table below.
- ☐ **Review and accept Leapfrog's Data Rights Template within NHSN**
 - **All hospitals** are required to review and accept the Data Rights Template at least annually before **June 19, 2025**, NHSN join-by date and whenever updates are made to their location mapping in NHSN.
 - Include any locations that were active during the reporting period even if they are currently inactive to ensure that Leapfrog obtains the appropriate SIR.
 - Confirm that you have given Leapfrog access to data from your 2024 NHSN Patient Safety Component - Annual Hospital Survey. Surveillance data from the 2024 NHSN Annual Hospital Survey is used by NHSN to risk adjust SIRs; SIRs cannot be calculated by NHSN or downloaded by Leapfrog if you restrict access to this data.
 - Failure to review and update (as needed) your Data Rights Template may result in Leapfrog pulling incorrect data for your hospital.
 - Instructions for reviewing and accepting the Data Rights Template are available [here](#) in the "NHSN Guidance: Join the Group, Review/Accept Data Rights Template, and Download Reports" document.
- ☐ **Generate datasets and download reports within NHSN on the same day as Leapfrog**
 - All hospitals are required to (a) generate datasets within NHSN, (b) download CMS IPPS reports, and (c) download a copy of your 2024 Patient Safety Component - Annual Hospital Survey from NHSN on the **same day** that Leapfrog will be downloading the data from NHSN for all current group members.
 - Instructions for generating datasets and downloading these reports from NHSN are available [here](#) in the "NHSN Guidance: Join the Group, Review/Accept Data Rights Template, and Download Reports" document.
 - NHSN data download dates are listed in the "Deadlines and Reporting Periods" table below (please note that there are four NHSN data download dates per Survey Cycle).
 - By generating datasets and downloading reports within NHSN on the same day as Leapfrog, hospitals can confirm that their data matches the data Leapfrog has obtained.
 - If hospitals do not generate datasets and download reports on the same day as Leapfrog, the Help Desk will not review any discrepancies.
- ☐ **Review SIRs**
 - For verification purposes, hospitals are required to download reports from NHSN on the **same day**, as described above.
 - Once Leapfrog has published the healthcare-associated infection Survey Results on the [Hospital Details Page](#), hospitals are urged to compare the Survey Results to their NHSN reports that were pulled on the **same day** as Leapfrog.
 - Dates on which the Survey Results will be available on the Hospital Details page are listed in the "Deadlines and Reporting Periods" table below.

❑ Report discrepancies

If, while comparing your NHSN reports to your Leapfrog Hospital Survey Results, you find a discrepancy, you must contact Leapfrog's [Help Desk](#) immediately. If you do not contact Leapfrog by the **end of the month** in which scored results are [available](#) on your Hospital Details Page (i.e., July, September, November, and January, respectively), the issue will not be investigated by the Help Desk.

Deadlines and Reporting Periods

Join Leapfrog's NHSN Group by	Leapfrog will download data from NHSN for all current group members	Data downloaded from NHSN will be scored and publicly reported for hospitals that have submitted Section 7 by	HAI Reporting Period	Available on Hospital Details Page and Public Reporting Website

October 22, 2025	October 23, 2025	October 31, 2025	07/01/2024 – 06/30/2025	November 12, 2025*
December 17, 2025**	December 18, 2025**	November 30, 2025	07/01/2024 – 06/30/2025	January 12, 2026*

*Available on Hospital Details Page on the same date as public release of Survey Results.

**The Leapfrog Hospital Survey closes on November 30, 2025. The last NHSN data download is on December 18, 2025, to incorporate any facilities and corrections from facilities that joined by the last join date of December 17, 2025.

Section 7A: Never Events Frequently Asked Questions (FAQs)**1. When reporting Never Events, what “state reporting program for medical errors” applies in my state?**

Congress has passed legislation requiring all states to develop a reporting program for medical errors. At this time, many states have already enacted or adopted some requirement that hospitals report serious medical errors or similar adverse events to a state agency. Others are still implementing legislation or regulations that define that requirement. States that have developed programs may also define reportable events differently.

2. What if there is no “state reporting program for medical errors” in my state? Do we still have to report Never Events to meet Leapfrog principles for this policy? To whom?

Hospitals in states that do not have a state reporting program or requirement in effect can meet the reporting requirement of Leapfrog's principles for implementation of a Never Events policy by reporting all Never Events voluntarily to The Joint Commission, DNV GL Healthcare, or a Patient Safety Organization.

If there is no state-required reporting program in effect, no available Patient Safety Organization to which your hospital can report, and your hospital is not Joint Commission or DNV GL Healthcare accredited, the Leapfrog requirement for reporting to an external agency is amended. Hospitals must report the Never Event to their governance board and must still perform a root-cause analysis internally of each Never Event to meet Leapfrog's principle for full implementation of its Never Events policy.

3. The reportable adverse events defined by our state's reporting program don't include all 25 Never Events endorsed by the National Quality Forum (NQF) and adopted in the Leapfrog policy. Will reporting only the state-required reportable events to the state agency suffice for meeting Leapfrog's requirement for reporting Never Events to an external agency? Does our hospital have to report other Never Events, as defined by NQF/Leapfrog, to that state agency even though not required by our state's reporting program?

Hospitals should report all their state-required reportable events to the state agency. All other Never Events, as defined by NQF's list of Serious Reportable Events, which cannot be reported to the state agency, should be reported to another external agency (e.g., accreditor, Patient Safety Organization), if possible. If reporting those events to another external agency is not possible, the final option is to report those events to the hospital's governance board.

4. Won't Leapfrog's request to have hospitals apologize to the patient put the hospital at risk for liability?

Not necessarily. Research indicates that malpractice suits are often the result of a failure on the hospital's part to communicate openly with the patient and apologize for its error. Patients feel the most anger when they perceive that no one is willing to take responsibility for the adverse event that has occurred. A sincere apology from the responsible hospital staff can help to heal the breach of trust between doctor/hospital and patient. (When Things Go Wrong: Responding to Adverse Events. Boston, 2006. Mass Coalition for the Prevention of Medical Errors)

5. How does Leapfrog define “waive cost?”

At its core, Leapfrog's approach to never events is about improving patient care. While the policy asks hospitals to refrain from billing either the patient or a third-party payer, such as a health plan or employer company, for any costs directly related to a serious reportable adverse event, Leapfrog understands that, due to the wide array of circumstances surrounding never events, specific details of what constitutes “waiving cost” should be handled on a case-by-case basis by the parties involved. For an example, please see “Lessons learned from implementing a principled approach to resolution following patient harm” by Smith et. al.

6. Does Leapfrog recommend any resources for hospitals looking to adhere to Leapfrog's Never Events principles?

Yes, the Agency for Healthcare Research and Quality (AHRQ) has developed and tested the Communication and Optimal Resolution (CANDOR) Toolkit, which outlines a process for hospitals and practitioners to respond to unexpected events in a timely, thorough, and just way. The National Patient Safety Foundation (NPSF) has issued a report titled RCA²: Improving Root Cause Analyses and Actions to Prevent Harm, which examines best practices and provides guidelines to help standardize and improve Root Cause Analysis. In addition, hospitals can download tips and tools for interviewing patients and families for the Root Cause Analysis on the Survey and CPOE Materials webpage.

Page Intentionally Left Blank

SECTION 8: PEDIATRIC CARE

This section includes questions and reference information for Section 8: Pediatric Care. Please carefully review the questions, endnotes, and reference information (e.g., measure specifications, notes, and frequently asked questions) before you begin. Failure to review the reference information could result in inaccurate responses.

Section 8: Pediatric Care

Pediatric Care Fact Sheet: <https://ratings.leapfroggroup.org/measure/hospital/2025/pediatric-care>

Hospitals that do not care for (or perform CT scans on) patients 17 years of age or younger should respond “no” to question #2 in 8A and 8B and move on to the Affirmation of Accuracy. Your hospital’s results will be displayed as “Does Not Apply” on Leapfrog’s public reporting website.

Section 8 includes questions about patient experience (CAHPS Child Hospital Survey) and Computed Tomography (CT) radiation dose for pediatric patients.

Each hospital achieving the standard for Patient Experience (CAHPS Child Hospital Survey):

Performed in the top quartile for at least 4 of the 5 CAHPS Child Hospital Survey domains (a subset of the 18 total domains), listed below:

- Communication with Parent – Communication about your child’s medicines
- Communication with Parent – Keeping you informed about your child’s care
- Communication with Child – How well nurses communicate with your child
- Communication with Child – How well doctors communicate with your child
- Attention to Safety and Comfort – Preventing mistakes and helping you report concerns

Each hospital achieving the standard for Pediatric Computed Tomography (CT) Dose:

Received 75% or more of the possible points based on comparing CT radiation doses across two anatomic areas (head and abdomen/pelvis) and five age strata to national benchmarks.

Download the 2025 Leapfrog Hospital Survey Scoring Algorithm on the [Scoring and Results webpage](#).

8A: Patient Experience (CAHPS Child Hospital Survey)

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Notes:

Note 1: This subsection is only applicable to hospitals that care for patients 17 years of age or younger. Hospitals that do not care for patients 17 years of age or younger should respond "no" to question #2 in 8A and move on to 8B. Your hospital's results will be displayed as "Does Not Apply" on Leapfrog's public reporting website.

Note 2: To help ensure that the [Top Box Scores](#)⁵² represent an appropriate sample of patients, hospitals must have at least 100 pediatric acute-care admissions to inpatient units other than a neonatal ICU (NICU). Otherwise, they should respond "Yes, but fewer than 100 pediatric admissions were for non-NICU patients" to question #2 and skip the remaining questions in Section 8A. The hospital will be scored as "Does Not Apply." For example, if your hospital had 600 pediatric acute-care admissions, and 550 of those admissions were to a neonatal ICU, you should respond "Yes, but fewer than 100 pediatric admissions were for non-NICU patients" to question #2 as your hospital only has 50 admissions to inpatient units other than a neonatal ICU.

Specifications: See [Patient Experience \(CAHPS Child Hospital Survey\) Measure Specifications](#) in the Reference Information beginning on page 282.

Reporting Period: 12 months

Answer questions #1-12 for the latest 12-month period prior to the submission of this section of the Survey.

Note: As a reminder, the [Corrections Period](#) (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

1) What is the latest 12-month reporting period for which your hospital is submitting responses to this section? 12-month reporting period ending:	<i>Format: Month/Year</i>
2) Did your hospital have at least 500 pediatric acute-care admissions during the 12-month period referenced in Section 1, question #5? <i>Refer to your responses to questions #5 and #13 in Section 1A: Basic Hospital Information.</i> <i>If "no" or "yes, but fewer than 100 pediatric admissions were for non-NICU patients," skip questions #3-12 and continue to the next subsection. The hospital will be scored as "Does Not Apply."</i>	☐ Yes ☐ Yes, but fewer than 100 pediatric admissions were for non-NICU patients ☐ No
3) Has your hospital administered, or started to administer the CAHPS Child Hospital Survey during the reporting period? <i>If "no" to question #3, skip questions #4-12 and continue to the next subsection. The hospital will be scored as "Did Not Measure."</i>	☐ Yes ☐ No
4) Did your hospital administer the full CAHPS Child Hospital Survey or a truncated version? <i>If administering a truncated version, hospitals must follow the specifications for truncating the survey provided in the Patient Experience (CAHPS Child Hospital Survey) Measure Specifications.</i>	☐ Full version ☐ Truncated version

2025 Leapfrog Hospital Survey – Hard Copy

Section 8: Pediatric Care

5) How many surveys were returned during the reporting period? <i>If less than 100, skip questions #6-12 and continue to the next subsection. The hospital will be scored as "Unable to Calculate Score."</i>	_____
6) Which of the following modes were used to administer the survey? <i>Select all that apply.</i>	☐ Mail ☐ Phone ☐ Email ☐ Tablet
7) Which of the following times were surveys administered during the reporting period? <i>Select all that apply.</i>	☐ Day of discharge ☐ After discharge

In questions #8-12, report your hospital's Top Box Score⁵² (rounded to the nearest whole number) from each of the five publicly reported patient experience measures from your 12-month vendor report that matches the reporting period that you selected in question #1.

8) Communication with Parent – Communication about your child's medicines	_____
9) Communication with Parent – Keeping you informed about your child's care	_____
10) Communication with Child – How well nurses communicate with your child	_____
11) Communication with Child – How well doctors communicate with your child	_____
12) Attention to Safety and Comfort – Preventing mistakes and helping you report concerns	_____

8B: Pediatric Computed Tomography (CT) Radiation Dose

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Notes:

Note 1: All pediatric patient (ages 17 years and younger) scans performed at your hospital should be included when reporting on this measure, including cases that were never admitted to an inpatient ward.

Note 2: This section is only applicable to hospitals that perform CT scans on patients 17 years of age or younger. Hospitals that do not perform CT scans on patients 17 years of age or younger should respond "no" to question #2 in 8B and move on to the Affirmation of Accuracy. Your hospital's results will be displayed as "Does Not Apply" on Leapfrog's public reporting website.

Specifications: See [Pediatric Computed Tomography \(CT\) Radiation Dose Measure Specifications](#) in the Reference Information beginning on page 283.

Reporting Period: 12 months

Answer questions #1-7 based on all cases (or a sufficient sample of them)

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Note: As a reminder, the [Corrections Period](#) (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

Sufficient Sample: See [Pediatric Computed Tomography \(CT\) Radiation Dose Measure Specifications](#) for instructions on identifying a sufficient sample for questions #2-7.

1) 12-month reporting period used:	☐ 01/01/2024 – 12/31/2024 ☐ 07/01/2024 – 06/30/2025
2) Does your hospital perform CT scans on pediatric patients? <i>If "no" to question #2, skip the remaining questions in Section 8B, and go to the Affirmation of Accuracy. The hospital will be scored as "Does Not Apply."</i>	☐ Yes ☐ No
3) Did your hospital calculate its distribution of CT radiation doses for pediatric patients over the reporting period, and do you choose to report those data to this Survey? <i>If "no" to question #3, skip the remaining questions in Section 8B, and go to the Affirmation of Accuracy. The hospital will be scored as "Did Not Measure."</i>	☐ Yes ☐ No
4) Which of the following is your hospital using to report the CT radiation dose length product (DLP)? <i>If "manual data collection" is not selected, skip question #5 and continue to question #6.</i>	☐ Manual Data Collection ☐ Dose Monitoring Software ☐ ACR National Radiology Data Registry Report

2025 Leapfrog Hospital Survey – Hard Copy

Section 8: Pediatric Care

- 5) If using manual data collection, do the responses in questions #6 and #7 represent a sample?

If your hospital reviewed all cases for age strata with fewer than 30 encounters and sampled for those age strata with greater than 30 encounters, select "yes."

- ☐ Yes
☐ No

- 6) Enter your hospital's 25th, 50th, and 75th percentiles (rounded to the nearest whole number) for CT radiation dose length product (DLP) in **head** scans for pediatric patients for each age stratum standardized to 16cm phantoms.

If the number of encounters for an age stratum is less than 10 (in column a), skip columns b, c, and d and then move to the next age stratum. If zero, enter "0" in column a. The hospital will be scored as "Unable to Calculate Score" if all age strata have less than 10 encounters.

Age Stratum	HEAD			
	(a) Number of encounters	(b) 25 th Percentile	(c) 50 th Percentile	(d) 75 th Percentile
< 1 year				
1 - 4				
5 - 9				
10 - 14				
15 - 17				

- 7) Enter your hospital's 25th, 50th, and 75th percentiles (rounded to the nearest whole number) for CT radiation dose length product (DLP) in **abdomen/pelvis** scans for pediatric patients for each age stratum standardized to 32cm phantoms.

If the number of encounters for an age stratum is less than 10 (in column a), skip columns b, c, and d and then move to the next age stratum. If zero, enter "0" in column a. The hospital will be scored as "Unable to Calculate Score" if all age strata have less than 10 encounters.

Age Stratum	ABDOMEN/PELVIS			
	(a) Number of encounters	(b) 25 th Percentile	(c) 50 th Percentile	(d) 75 th Percentile
< 1 year				
1 - 4				
5 - 9				
10 - 14				
15 - 17				

Affirmation of Accuracy

As the hospital CEO or as an employee of the hospital to whom the hospital CEO has delegated responsibility, I have reviewed this information pertaining to the Pediatric Care Section at our hospital, and I hereby certify that this information is true, accurate, and reflects the current, normal operating circumstances at our hospital. I am authorized to make this certification on behalf of our hospital.

The hospital and I understand that The Leapfrog Group, its members, the public and entities and persons who contract or have other business dealings with The Leapfrog Group are relying on the truth and accuracy of this information. The hospital and I also understand that The Leapfrog Group will make this information and/or analyses of this information public through the Survey Results public reporting website, The Leapfrog Group's Hospital Safety Grade, and/or other Leapfrog Group products and services. This information and/or analyses and all intellectual property rights therein shall be and remain the sole and exclusive property of The Leapfrog Group in which The Leapfrog Group retains exclusive ownership. This information does not infringe upon any third-party intellectual property rights or any other third-party rights whatsoever and is free and clear of all encumbrances and liens of any kind. The hospital and I acknowledge that The Leapfrog Group may use this information in a commercial manner for profit. The hospital shall be liable for and shall hold harmless and indemnify The Leapfrog Group from any and all damages, demands, costs, or causes of action resulting from any inaccuracies in the information or any misrepresentations in this Affirmation of Accuracy. The Leapfrog Group and its members and entities and persons who contract or have other business dealings with The Leapfrog Group reserve the right to omit or disclaim information that is not current, accurate or truthful.

Section 8: Pediatric Care Reference Information

What's New in the 2025 Survey

There are no changes to Section 8A: Patient Experience (CAHPS Child Hospital Survey) or Section 8B: Pediatric CT Radiation Dose.

Change Summary Since Release

None. If substantive changes are made to this section of the Survey after release on April 1, 2025, they will be documented in this Change Summary section.

Section 8: Pediatric Care Measure Specifications**Patient Experience (CAHPS Child Hospital Survey) Measure Specifications**

Important Note: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review Leapfrog's Multi-Campus Reporting Policy.

Source: Agency for Healthcare Quality and Research (AHRQ) (NQF #2548)

Reporting Period: The latest 12-month period prior to the submission of this section of the Survey. Hospitals can elect to use either survey return date or discharge date to pull reports for this measure.

This section of the Leapfrog Hospital Survey asks hospitals who care for pediatric patients about their results from the CAHPS Child Hospital Survey. The first several questions are designed to learn more about the current administration of the survey. The last five questions collect the "Top Box" ⁵² score for each of the following five domains:

- Communication with Parent – Communication about your child's medicines
- Communication with Parent – Keeping you informed about your child's care
- Communication with Child – How well nurses communicate with your child
- Communication with Child – How well doctors communicate with your child
- Attention to Safety and Comfort – Preventing mistakes and helping you report concerns

Hospitals using Press Ganey, NRC, or PRC to administer the CAHPS Child Hospital Survey can use the AHRQ CAHPS Crosswalk below to ensure they are reporting on the correct domains. The Crosswalk is designed to help translate the standard vendor report to the AHRQ Domains used in questions #8-12 of the Leapfrog Hospital Survey.

Hospitals that opt to truncate the CAHPS Child Hospital Survey after question 40, which is the last question required to report on the five domains listed above, must ensure that all questions prior to and including question 40 remain in order and unaltered. In addition, hospitals opting to truncate the survey must retain questions 50-54 and 56-57 (in order and unaltered) which ask for the child and survey participant's demographic information. Note: Hospitals that collect information captured in questions 51-52 administratively are not required to retained them.

For more information regarding which questions from the CAHPS Child Hospital Survey correspond to the five domains listed above, visit <https://www.ahrq.gov/cahps/surveys-guidance/hp/about/child-survey-measures.html>.

CAHPS Child Hospital Survey Domain Crosswalk

AHRQ Domain Name	Press Ganey Domain Name	NRC Domain Name	PRC Domain Name
Communication with Parent – Communication about your child's medicines	Communication Child's Med	Communication About Meds	Communication About Medicines
Communication with Parent – Keeping you informed about your child's care	Informed Child's Care	Keeping You Informed About Your Child's Care	Keeping Parent Informed
Communication with Child – How well nurses communicate with your child	Nurses Communicate Child	Nurse Communication With Child	Nurses – Child
Communication with Child – How well doctors communicate with your child	Doctors Communicate Child	Doctor Communication With Child	Doctors – Child
Attention to Safety and Comfort – Preventing mistakes and helping you report concerns	Prevent Mistakes Rpt Conc	Preventing Mistakes and Helping You Report Concerns	Preventing Mistakes

See FAQs for additional information about responding to the questions in this section.

Pediatric Computed Tomography (CT) Radiation Dose Measure Specifications**Important Notes:**

Note 1: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Note 2: For purposes of this measure, an "encounter" consists of a full examination and any CT scans performed within one hour of each other involving the designated anatomic area (i.e., head or abdomen/pelvis). For example, two CT scans conducted 30-minutes apart on the same patient's head are considered one "encounter." CT scans of the same anatomic area performed with and without contrast are considered one "encounter." Scans of two different anatomic areas performed within one hour would not be considered the same "encounter." Scans of the same anatomic area performed greater than 60 minutes apart would also not be considered the same "encounter."

Note 3: This measure includes two sets of instructions in the table below: one for hospitals using dose monitoring software and one for hospitals that are not using dose monitoring software. Please be sure to use the correct set of instructions.

Note 4: Hospitals performing manual data collection must use the CT Dose Workbook provided on the [Survey and CPOE Materials webpage](#) to standardize their CT radiation dose length product (DLP) for head scans to 16cm phantoms and abdomen/pelvis scans to 32cm phantoms.

Source: University of California, San Francisco (NQF #2820)

Reporting Period: 12 months

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Hospitals participating in the ACR National Radiology Data Registry:

Data for this measure can be obtained directly from a special Leapfrog report. See details below.

Hospitals that report to the American College of Radiology (ACR) and receive reports through the National Radiology Data Registry (NRDR) will be able to respond to questions #6-7 in Section 8B using a specialized report that will be made available with the quarterly Dose Index Registry Executive Summary reports. This separate "Leapfrog" report will be available for download through the NRDR portal and will contain data according to the age ranges and measure specifications of the Leapfrog Hospital Survey. **Enter values from the "Leapfrog" tab using the "Table: Pediatric Exams for Leapfrog Survey" and the appropriate percentiles in the Head and Abdomen Pelvis columns rounded to the nearest whole number directly into the Online Hospital Survey Tool.** While this report should be from the most recent 12 months, it does not need to include the full 12 months.

Hospitals using dose monitoring software:

Data for this measure can be obtained using dose monitoring software. See instructions below.

Question #6, column a: Total Number of Encounters

Using your dose monitoring software, obtain the total number of encounters in **head scans** for each age stratum (<1, 1-4, 5-9, 10-14, 15-17). Enter these values into the Survey.

Inclusions:

CT HEAD BRN WO IVCON
 CT HEAD WO IVCON
 CT PEDS HEAD WO IVCON
 CT HEAD
 CT PEDS HEAD BRN WO IVCON
 CT BRN WO IVCON
 CT HEAD BRN
 CT HEAD BRN W IVCON
 CT HEAD W IVCON

CT HEAD WO & W IVCON
 CT HEAD BRN WO & W IVCON
 CT BRN WO & W IVCON
 CT BRN W IVCON

Exclusions:

- Encounters involving facial bones or sinuses
- Encounters where the indication is for a biopsy, including prop studies and stereotactic studies and procedures
- Encounters that cross multiple anatomic areas should be excluded. For example, encounters involving both the head and neck are excluded from the “head” anatomic region.
- Encounters where the documented age is missing or listed as the date of admission (i.e., an accurate birthday could not be obtained and therefore the admission date was used), as is the case for some trauma patients

Sampling Cases: Hospitals using dose monitoring software must report on all encounters in the 12-month reporting period.

Hospitals using Radimetrics Dose Monitoring Software:

- If your hospital is using unique study instance UIDs for every scan performed, review your data to ensure that any scans performed on the same patient and same anatomic area within a one-hour timeframe are being combined into one encounter. The DLPs for all scans within the one-hour timeframe should be combined and that combined value used to calculate the percentiles reported to Leapfrog.
- If your hospital is NOT using unique study instance UIDs and is combining DLPs for all scans performed on the same patient and same anatomic area within one hour into one study instance UID, no review is required as this adheres to the definition of encounter. However, these hospitals should review any repeat or delayed scans to ensure repeat or delayed scans performed greater than 60 minutes apart are not being combined into the same study instance UID.

Question #6, columns b, c, and d: 25th, 50th, and 75th Percentiles

Based on the encounters identified for each age stratum (column a), use your dose monitoring software to calculate the 25th percentile (column b), the 50th percentile (column c), and the 75th percentile (column d) for CT radiation dose length product (DLP) in **head scans standardized to 16cm phantoms**. Enter these values into the Survey rounded to the nearest whole number.

If the number of encounters for an age stratum (i.e., <1 or 1-4, etc.) is less than 10 (column a), skip columns b, c, and d. If the number of encounters for an age stratum is zero, enter “0” in column a, and skip columns b, c, and d. You cannot leave any rows in column a blank.

Phantom Dose Specifications:

For head scans, use a 16 cm phantom dose value. The orange box in the screenshot below the table is an example of a Dose Report which shows the phantom dose value used. The phantom dose value is used to estimate the radiation dose to the patient.

Scout Doses (Topograms) should not be included when calculating the 25th, 50th, or 75th percentiles.

Question #7 column a: Total Number of Encounters

Using your dose monitoring software, obtain the total number of encounters in **abdomen/pelvis** for each age stratum (<1, 1-4, 5-9, 10-14, 15-17). Enter these values into the Survey.

Inclusions:

CT ABD PELVIS W IVCON
 CT ABD/PEL W IVCON
 CT PEDS ABD PELVIS
 CT ABD PELVIS WO IVCON
 CT ABD/PEL WO IVCON
 CT ABD/PEL

CT PEDS ABD/PEL WO IVCON
 CT ABD PELVIS WO & W IVCON
 CT ABD/PEL WO & W IVCON
 CT ABD PELVIS
 CT ABD PELVIS WO IVCON

Exclusions:

- Encounters where the indication is for a biopsy, including prop studies and stereotactic studies and procedures
- Encounters that cross multiple anatomic areas should be excluded. For example, encounters involving both the chest and abdomen/pelvis are excluded from the "abdomen/pelvis" anatomic region.
- Encounters where the documented age is missing or listed as the date of admission (i.e., an accurate birthday could not be obtained and therefore the admission date was used), as is the case for some trauma patients

Sampling Cases: Hospitals using dose monitoring software must report on all encounters in the 12-month reporting period.

Question #7, columns b, c, and d: 25th, 50th, and 75th Percentiles

Based on the encounters identified for each age stratum (column a), use your dose monitoring software to calculate the 25th percentile (column b), the 50th percentile (column c), and the 75th percentile (column d) for CT radiation dose length product (DLP) in **abdomen/pelvis scans standardized to 32cm phantoms**. Enter these values into the Survey rounded to the nearest whole number.

If the number of encounters for an age stratum (i.e., <1 or 1-4, etc.) is less than 10 (column a), skip columns b, c, and d. If the number of encounters for an age stratum is zero, enter "0" in column a, and skip columns b, c, and d. You cannot leave any rows in column a blank.

Phantom Dose Specifications:

For abdomen/pelvis scans, use a 32cm phantom dose value. The orange box in the screenshot below the table is an example of a Dose Report which shows the phantom dose value used. The phantom dose value is used to estimate the radiation dose to the patient.

Scout Doses (Topograms) should not be included when calculating the 25th, 50th, or 75th percentiles.

Hospitals not using dose monitoring software:

Data for this measure can be obtained from Dose Reports that come directly from the CT Machine and are sent along with the images to the Picture Archiving and Communications (PACS) used to review the images. See instructions below.

CT Dose Excel Workbook

To assist hospitals who do not use dose monitoring software in calculating the responses to questions #6 and #7, Leapfrog has developed a CT Dose Workbook to assist hospitals in standardizing their CT dose data based on these specifications. The workbook includes 12 tabs: Instructions, Summary, and 10 Data Entry tabs for each anatomic area/age stratum combination. The tabs for head scans are red and the tabs for abdomen/pelvis scans are blue. Once you enter your hospital's CT radiation dose length product (DLP) data into the appropriate tab, the workbook will automatically calculate your responses to questions #6 and #7 in the Summary tab, and those values should be entered in the Survey.

The CT Dose Workbook is available on the Survey and CPOE Materials [webpage](#) and should be used when reporting on this measure.

Question #6, column a: Total Number of Encounters

To determine the total number of encounters in **head scans** for each age stratum (<1, 1-4, 5-9, 10-14, 15-17), you will need to obtain dose reports. See sampling instructions below.

Inclusions:

CT HEAD BRN WO IVCON
 CT HEAD WO IVCON
 CT PEDS HEAD WO IVCON
 CT HEAD
 CT PEDS HEAD BRN WO IVCON
 CT BRN WO IVCON
 CT HEAD BRN
 CT HEAD BRN W IVCON
 CT HEAD W IVCON
 CT HEAD WO & W IVCON
 CT HEAD BRN WO & W IVCON
 CT BRN WO & W IVCON
 CT BRN W IVCON

Exclusions:

- Encounters involving facial bones or sinuses
- Encounters where the indication is for a biopsy, including prop studies and stereotactic studies and procedures
- Encounters that cross multiple anatomic areas should be excluded. For example, encounters involving both the head and neck are excluded from the "head" anatomic region.
- Encounters where the documented age is missing or listed as the date of admission (i.e., an accurate birthday could not be obtained and therefore the admission date was used), as is the case for some trauma patients

Sampling Cases:

Hospitals that are using information stored in the CT Machine have the option of reporting on all encounters or a sample of encounters. Hospitals opting to identify a sample of encounters for this measure should follow these instructions:

- Review your hospital's scans starting on January 15, 2024 (or July 15, 2024 if (re)submitting a Survey on or after September 1, 2025).
- Work sequentially until **a sample of at least 30 encounters per anatomic area and age strata combination** (i.e., head <1; head 1-4, etc.) is reached, or all cases in the reporting period are reviewed, whichever comes first.

Question #6, columns b, c, and d: 25th, 50th, and 75th Percentiles

Using your dose reports, enter the phantom dose and **Total DLP (mGY-cm)** for each encounter into each of the 5 "Head" tabs of the CT Dose Workbook. Be sure to review the instructions tab carefully before you begin entering data. The worksheet will automatically standardize your dose data to a 16cm phantom, if necessary. The worksheet will then automatically calculate the total number of encounters, as well as the 25th, 50th, and 75th percentiles for each anatomic area and age stratum.

See the example CT Dose Report from a CT scanner at the end of this table:

- The orange box in the screenshot is an example of a Dose Report which shows the phantom dose value used. The phantom dose value is used to estimate the radiation dose to the patient.
- The red box highlights the Total DLP. Note that your CT scanner may have a differently formatted Dose Report.

Scout Doses (Topograms) should not be included when entering the Total DLP for each encounter into the CT Dose Workbook.

Question #7 column a: Total Number of Encounters

To determine the total number of encounters in **abdomen/pelvis scans** for each age stratum (<1, 1-4, 5-9, 10-14, 15-17), you will need to obtain dose reports. See sampling instructions below.

Inclusions:

CT ABD PELVIS W IVCON
 CT ABD/PEL W IVCON
 CT PEDS ABD PELVIS
 CT ABD PELVIS WO IVCON
 CT ABD/PEL WO IVCON
 CT ABD/PEL
 CT PEDS ABD/PEL WO IVCON
 CT ABD PELVIS WO & W IVCON
 CT ABD/PEL WO & W IVCON
 CT ABD PELVIS
 CT ABD PELVIS WO IVCON

Exclusions:

- Encounters where the indication is for a biopsy, including prop studies and stereotactic studies and procedures
- Encounters that cross multiple anatomic areas should be excluded. For example, encounters involving both the chest and abdomen/pelvis are excluded from the "abdomen/pelvis" anatomic region.
- Encounters where the documented age is missing or listed as the date of admission (i.e., an accurate birthday could not be obtained and therefore the admission date was used), as is the case for some trauma patients

Question #7 columns b, c, and d: 25th, 50th, and 75th Percentiles

Using your dose reports, enter the phantom dose and **Total DLP (mGY-cm)** for each encounter into each of the 5 "Abdomen Pelvis" tabs of the **CT Dose Workbook**. Be sure to review the instructions tab carefully before you begin entering data. The worksheet will automatically standardize your dose data to a 32cm phantom, if necessary. The worksheet will then automatically calculate the total number of encounters, as well as the 25th, 50th, and 75th percentiles for each anatomic area and age stratum.

See the example CT Dose Report from a CT scanner at the end of this table:

- The orange box in the screenshot is an example of a Dose Report which shows the phantom dose value used. The phantom dose value is used to estimate the radiation dose to the patient.
- The red box highlights the Total DLP. Note that your CT scanner may have a differently formatted Dose Report.

Patient Name:		Exam no.: 91432			
Accession Number:		Sep 01, 2016			
Patient ID:		LightSpeed 4Vx1			
Exam Description: CT ABD/PEL W & W IVCON					
Dose Report					
Series	Type	Scan Range (mm)	CT DIAP (mGy)	DLP (mGy-cm)	Phantom CTDI
1	Scout	-	-	-	
2	Scout	-	-	-	
200	Axial	522.250-522.250	4.72	2.06	Body: 32
4	Helical	5348.250-513.750	21.77	989.67	Body: 32
5	Helical	5019.600-528.600	10.90	166.88	Body: 32
Total Exam DLP:				1280.61	
1.1					

Scout Doses (Topograms) should not be included when entering the Total DLP for each encounter into the CT Dose Workbook.

See [FAQs](#) for additional information about responding to the questions in this section.

Section 8: Pediatric Care Frequently Asked Questions (FAQs)**Patient Experience (CAHPS Child Hospital Survey) FAQs**

- 1. Why does Leapfrog refer to two different reporting periods in Section 8A question #2: one reporting period which refers to the number of pediatric admissions during the 12 months from Section 1 and one reporting period which refers to the results of our CAHPS Child Hospital Survey?**

These two reporting periods are different because hospitals that have not historically had 500 pediatric admissions annually may not have begun to administer the CAHPS Survey to their patients and therefore it would not be appropriate to ask these facilities to report on their current results in Section 8A.

- 2. Do I need to include neonatal ICU (NICU) discharges when administering the CAHPS Child Hospital Survey and reporting those results to Leapfrog?**

The Child CAHPS Hospital Survey was designed to be administered to pediatric discharges including NICU discharges. Additional details on fielding the CAHPS Child Hospital Survey can be found [here](#).

In 2025, hospitals that have been administering the CAHPS survey without including NICU discharges in their sample can report those results to Leapfrog, provided they meet the minimum sample size and timing requirements in the Leapfrog Hospital Survey. However, we are urging those hospitals to begin including NICU discharges-- per the manual guidelines-- immediately, as CAHPS is designed to include those patients. Hospitals that are just starting to administer the survey in 2025 should include NICU discharges in their sample per the sampling framework detailed in the manual.

- 3. Can we use other lower cost modes for administering the CAHPS Child Hospital Survey? Survey administration is costly, and our hospital has low response rates.**

Some hospitals have asked about the use of alternative, lower cost modes of survey administration, such as administering paper surveys at discharge that can then be batched and mailed to a vendor to calculate results. This approach is potentially an opportunity both to lower the cost of administration and to increase response rates.

[Leapfrog's Pediatric Expert Panel](#) has noted that while administering the CAHPS Child Hospital Survey using paper forms at discharge is not on the list of AHRQ-approved modes, hospitals that are trying to find ways to administer the survey and increase response rate should be able to submit results to the 2025 Leapfrog Hospital Survey. That said, the Pediatric Expert Panel has expressed a desire for these different modes to be tested, and so we cannot guarantee that you will be able to submit these results for future Leapfrog Hospital Surveys.

- 4. Is Interactive Voice Response (IVR) or texting a link to an online survey an acceptable mode for administering the CAHPS Child Hospital Survey?**

Hospitals that administer the CAHPS Child Hospital Survey via IVR should select "phone" in question #6. Hospitals that administer the CAHPS Child Hospital Survey by texting a link to an online survey to the patient should select "email."

Pediatric Computed Tomography (CT) Radiation Dose FAQs

- 5. Is this measure only applicable to pediatric inpatients, or should all pediatric scans be included?**

All pediatric patient (ages 17 years and younger) scans should be included when reporting on this measure, including cases that were never admitted to an inpatient ward.

6. Should multiple phase scans be included in the reporting?

Yes, the intent of this measure is to capture the entire dose a patient receives, even if this radiation is received over multiple phase scans.

7. Should any CT encounters involving anatomic areas not listed in the Survey questions (i.e., head or abdomen/pelvis) be included in the reporting?

No. When reporting CT encounters in the Survey, only encounters involving the head or abdomen/pelvis should be included. Encounters involving any other anatomic area should not be reported. For example, encounters involving both the head and neck are excluded from the "head" anatomic region.

8. Are the CT doses adjusted for any factors other than age, such as height and weight?

No, CT doses are only stratified by age and anatomic region. The pediatric CT radiation dose measure is an NQF-endorsed measure, developed so that all hospitals in the country who do pediatric CT scans can report. Its known limitation is that it does not consider patient size (e.g., height and weight) but instead uses age as a proxy for size. Part of the reason is that unless hospitals use dose monitoring software, which not all hospitals currently do due to cost, they would not have this information readily available to them. However, to align with the American College of Radiology (ACR), head scans are standardized to 16cm phantoms and abdomen/pelvis scans are standardized to 32cm phantoms.

Page Intentionally Left Blank

SECTION 9: OUTPATIENT PROCEDURES

This section includes questions and reference information for Section 9: Outpatient Procedures. Please carefully review the questions, endnotes, and reference information (e.g., measure specifications, notes, and frequently asked questions) before you begin. Failure to review the reference information could result in inaccurate responses.

Section 9: Outpatient Procedures

Outpatient Procedures Fact Sheet and Bibliography:

<https://ratings.leapfroggroup.org/measure/hospital/2025/care-elective-outpatient-surgery-patients>

Section 9 includes questions about the volume and safety of same-day procedures performed in hospital outpatient departments, as well as the experience of patients who had a same-day surgery performed.

Hospitals will not be able to access Section 9 until the American Medical Association's Terms of Use are completed via the CPT Code Workbook button on the Survey Dashboard, and the appropriate CPT Code Workbook is downloaded.

Each hospital achieving the standards for Certified Clinicians Present While Patients Are Recovering:

1. Has an ACLS certified clinician, plus a second clinician, present at all times and immediately available in the building while adult patients are present in the hospital outpatient department.
2. Has a PALS certified clinician, plus a second clinician, present at all times and immediately available in the building while pediatric patients are present in the hospital outpatient department.

Each hospital achieving the standard for Patient Follow-up:

Provided an accurate CCN in the Hospital Profile, reported volume for adult lower gastrointestinal endoscopy procedures in Section 9C, and is in the top quartile of performance for OP-32, Rate of Unplanned Hospital Visits After an Outpatient Colonoscopy, based on responses to the 2022 Leapfrog ASC Survey and Section 9 of the 2022 Leapfrog Hospital Survey submitted by June 30, 2022.

Each hospital achieving the standard for the Safe Surgery Checklist:

1. Uses a safe surgery checklist on **all** patients undergoing an applicable procedure (reported on in Section 9C, if applicable) that includes **all** safe surgery checklist elements; **and**
2. Verbalizes **all** safe surgery checklist elements in the presence of the appropriate personnel; **and**
3. Completes an audit on a sufficient sample of patients to document adherence to the checklist; **and**
4. Has documented adherence to the checklist for at least 90% of the patients included in the audit.

Each hospital achieving the standard for Medication Safety for Outpatient Procedures:

Has met the 90% target for documenting all three components: home medications, visit medications, and allergies/adverse reaction(s) in the clinical record.

Each hospital achieving the standard for Patient Experience (OAS CAHPS):

Performed in the top quartile based on responses to the 2020 Leapfrog ASC and Hospital Surveys submitted by August 31, 2020, for the four OAS CAHPS domains, listed below:

- a) Facilities and Staff
- b) Communication About Your Procedure
- c) Patients' Rating of the Facility
- d) Patients Recommending the Facility

Download the 2025 Leapfrog Hospital Survey Scoring Algorithm on the [Scoring and Results webpage](#).

9A: Basic Outpatient Department Information

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Notes:

Note 1: In order to access this section in the Online Survey Tool, hospitals must complete the American Medical Association's Terms of Use via the CPT Code Workbook button next to Section 9 on the Survey Dashboard and download the appropriate CPT Code Workbook. Instructions for downloading the CPT Code Workbook are available in the [Volume of Procedures Measure Specifications](#). Each hospital must complete these steps even if they are part of a hospital system.

Note 2: This subsection will not be scored but will be used in public reporting.

Note 3: The term "hospital outpatient department" is used to refer to all hospital outpatient departments or areas of the hospital, including areas that are used for **both** inpatient and outpatient procedures, that perform the outpatient procedures listed in Section 9C and that share your hospital's license or CMS Certification Number (CCN). This would include, but is not limited to surgery centers, free-standing hospital outpatient departments, as well as outpatient departments that are located in your hospital or are co-located³¹ with your hospital. Hospitals should only include hospital outpatient departments or areas of the hospital that perform the procedures listed in Section 9C in an operating room⁵³ or procedure room⁵⁴.

Reporting Period: 12 months

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Note: As a reminder, the [Corrections Period](#) (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

1. 12-month reporting period used:	☐ 01/01/2024 – 12/31/2024 ☐ 07/01/2024 – 06/30/2025
2. Does your hospital perform any of the procedures listed in Section 9C on an outpatient basis: • in the hospital or at a hospital outpatient department <u>co-located</u>³¹ with the hospital - and/or • at a surgery center or free-standing hospital outpatient department that shares your hospital's license or CMS Certification Number?	☐ Yes ☐ No

If "no" to question #2, skip the remaining questions in Section 9, including all subsections, and go to the Affirmation of Accuracy.

2025 Leapfrog Hospital Survey – Hard Copy

Section 9: Outpatient Procedures

3. Total number of <u>operating rooms</u> ⁵³ used to perform the outpatient procedures listed in Section 9C:	_____
4. Total number of <u>endoscopic procedure rooms</u> ⁵⁴ used to perform the outpatient procedures listed in Section 9C:	_____

9B: Medical, Surgical, and Clinical Staff

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Notes:

Note 1: The term “hospital outpatient department” is used to refer to all hospital outpatient departments or areas of the hospital, including areas that are used for **both** inpatient and outpatient procedures, that perform the outpatient procedures listed in Section 9C and that share your hospital's license or CMS Certification Number (CCN). This would include, but is not limited to surgery centers, free-standing hospital outpatient departments, as well as outpatient departments that are located in your hospital or are co-located³¹ with your hospital. Hospitals should only include hospital outpatient departments or areas of the hospital that perform the procedures listed in Section 9C in an operating room⁵³ or procedure room⁵⁴.

Note 2: Hyperlinks throughout these questions refer to the [Medical, Surgical, and Clinical Staff FAQs](#) beginning on page 318, as well as to endnotes. FAQ hyperlinks are not included in the Online Survey Tool.

Reporting Period: 3 months

Answer questions #1-2 based on the staffing structure currently in place at the time that you submit this section of the Survey. The staffing structure should have been in place for at least the past 3 months and reflect the ordinary staffing structure for each applicable hospital outpatient department.

Note: As a reminder, the [Corrections Period](#) (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

1. Is there an Advanced Cardiovascular Life Support (ACLS) trained [clinician](#)⁵⁵, as well as a second [clinician](#)⁵⁵ (regardless of ACLS training), present at all times and immediately available in the building while an adult patient (13 years and older) is present in the hospital outpatient department?

Hospitals with more than one hospital outpatient department, including a surgery center or free-standing hospital outpatient department, should respond based on the least intensively staffed location.

Hospitals should report on all hospital outpatient departments or areas of the hospital that perform the outpatient procedures listed in Section 9C and that share the hospital's license or CCN.

Hospitals that did not perform any applicable procedures on patients 13 years and older during the reporting period should select “not applicable; pediatric patients only.” The hospital will be scored as “Does Not Apply.”

- Yes
- No
- Not applicable; pediatric patients only

2. Is there a Pediatric Advanced Life Support (PALS) trained <u>clinician</u>⁵⁵, as well as a second <u>clinician</u>⁵⁵ (regardless of PALS training), present at all times and immediately available in the building while a pediatric patient (infant through 12 years) is present in the hospital outpatient department? <i>Hospitals with more than one hospital outpatient department, including a surgery center or free-standing hospital outpatient department, should respond based on the least intensively staffed location.</i> <i>Hospitals should report on all hospital outpatient departments or areas of the hospital that perform the outpatient procedures listed in Section 9C and that share the hospital's license or CCN.</i> <i>Hospitals that do not care for pediatric patients should select "not applicable; adult patients only" and hospitals that only performed applicable pediatric procedures on pediatric patients 13 years and older during the reporting period should select "not applicable; pediatric patients are all aged 13-17," regardless of the presence of clinicians trained in PALS. The hospital will be scored as "Does Not Apply."</i>	○ Yes ○ No ○ Not applicable; adult patients only ○ Not applicable; pediatric patients are all aged 13-17
--	---

9C: Volume of Procedures

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Notes:

Note 1: CPT Codes are provided in downloadable Excel files on the Survey Dashboard. To access the files, click the CPT Code Workbook button next to Section 9. You will be required to complete the American Medical Association's Terms of Use before downloading the Excel file and using the individual CPT codes to query your EHR or billing system. You are only required to complete the Terms of Use once per Survey Cycle (April 1 – November 30).

The CPT Code Workbooks (Excel files) are labeled for Section 3A: Total Hip Replacement, Total Knee Replacement, and Bariatric Surgery for Weight Loss and Section 9C: Volume of Procedures. Please note, if you are part of a hospital system, each hospital will need to complete the Terms of Use. This is a requirement of the American Medical Association.

Note 2: This subsection will not be scored but will be used in public reporting to inform purchasers and consumers about the hospital's experience with the procedure. Additionally, this information will be used to facilitate the search functionality on Leapfrog's public reporting website (i.e., allowing users to search for hospitals that perform the procedure they need on an outpatient basis).

Note 3: The term "hospital outpatient department" is used to refer to all hospital outpatient departments or areas of the hospital, including areas that are used for **both** inpatient and outpatient procedures, that perform the outpatient procedures listed in Section 9C and that share your hospital's license or CMS Certification Number (CCN). This would include, but is not limited to surgery centers, free-standing hospital outpatient departments, as well as outpatient departments that are located in your hospital or are co-located³¹ with your hospital. Hospitals should only include hospital outpatient departments or areas of the hospital that perform the procedures listed in Section 9C in an operating room⁵³ or procedure room⁵⁴.

Note 4: Hospitals should only report on procedures they electively perform. If your hospital does not perform the procedure on an outpatient basis or ONLY does so when a procedure is urgent, you should answer "no" and not report on those procedures.

Specifications: See [Volume of Procedures Measure Specifications](#) in the Reference Information beginning on page 321.

Reporting Period: 12 months

- 01/01/2024 – 12/31/2024

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

1) 12-month reporting period used:

automatically 01/01/2024 –
12/31/2024.*

2025 Leapfrog Hospital Survey – Hard Copy

Section 9: Outpatient Procedures

2) During the reporting period, were one or more of the following ophthalmology procedures performed at your hospital outpatient department(s) on <u>adult</u> and/or <u>pediatric</u> patients: • Anterior segment eye procedures, • Posterior segment eye procedures, or • Ocular adnexa and other eye procedures? <i>If “no” or “yes, but no longer performs these procedures,” skip questions #11-13 below.</i>	☐ Yes ☐ Yes, but no longer performs these procedures ☐ No
3) During the reporting period, were one or more of the following orthopedic procedures performed at your hospital outpatient department(s) on <u>adult</u> and/or <u>pediatric</u> patients: • Finger, hand, wrist, forearm, and elbow procedures; • Shoulder procedures; • Spine procedures; • Hip procedures; • Knee procedures; • Toe, foot, ankle, and leg procedures; or • General orthopedic procedures? <i>If “no” or “yes, but no longer performs these procedures,” skip questions #14-16 below.</i>	☐ Yes ☐ Yes, but no longer performs these procedures ☐ No
4) During the reporting period, were one or more of the following otolaryngology procedures performed at your hospital outpatient department(s) on <u>adult</u> and/or <u>pediatric</u> patients: • Ear procedures; • Mouth procedures; • Nasal/sinus procedures; or • Pharynx/adenoid/tonsil procedures? <i>If “no” or “yes, but no longer performs these procedures,” skip questions #17-19 below.</i>	☐ Yes ☐ Yes, but no longer performs these procedures ☐ No
5) During the reporting period, were one or more of the following gastroenterology procedures performed at your hospital outpatient department(s) on <u>adult</u> patients: • Upper GI endoscopy, or • Lower GI endoscopy? <i>If “no” or “yes, but no longer performs these procedures,” skip questions #20-22 below.</i>	☐ Yes ☐ Yes, but no longer performs these procedures ☐ No

2025 Leapfrog Hospital Survey – Hard Copy

Section 9: Outpatient Procedures

6) During the reporting period, were one or more of the following general surgery procedures performed at your hospital outpatient department(s) on <u>adult</u> patients: • Cholecystectomy and common duct exploration; • Hemorrhoid procedures; • Inguinal and femoral hernia repair; • Other hernia repair; • Laparoscopy; • Lumpectomy or quadrantectomy of breast; or • Mastectomy? <i>If "no" or "yes, but no longer performs these procedures," skip questions #23-25 below.</i>	☐ Yes ☐ Yes, but no longer performs these procedures ☐ No
7) During the reporting period, were one or more of the following urology procedures performed at your hospital outpatient department(s) on <u>adult</u> patients: • Circumcision; • Cystourethroscopy; • Male genital procedures; • Urethra procedures; or • Vaginal repair procedures? <i>If "no" or "yes, but no longer performs these procedures," skip questions #26-28 below.</i>	☐ Yes ☐ Yes, but no longer performs these procedures ☐ No
8) During the reporting period, was the following neurological surgery procedure performed at your hospital outpatient department(s) on <u>adult</u> patients: • Spinal fusion procedures? <i>If "no" or "yes, but no longer performs this procedure," skip questions #29-31 below.</i>	☐ Yes ☐ Yes, but no longer performs this procedure ☐ No
9) During the reporting period, were one or more of the following obstetrics and gynecology procedures performed at your hospital outpatient department(s) on <u>adult</u> patients: • Cervix procedures, • Hysteroscopy, or • Uterus and adnexa laparoscopies? <i>If "no" or "yes, but no longer performs these procedures," skip questions #32-34 below.</i>	☐ Yes ☐ Yes, but no longer performs these procedures ☐ No
10) During the reporting period, were one or more of the following plastic and reconstructive surgery procedures performed at your hospital outpatient department(s) on <u>adult</u> patients: • Breast repair or reconstruction, or • Skin graft/reconstruction procedures? <i>If "no" or "yes, but no longer performs these procedures," skip questions #35-37 below.</i>	☐ Yes ☐ Yes, but no longer performs these procedures ☐ No

Ophthalmology

11) Total adult and/or pediatric volume for each of the following applicable procedures performed at your hospital outpatient department(s) during the reporting period.

*You cannot leave any blank. If you did not perform one or more of the procedures listed below enter 0 (zero). If you had zero volume for **all** procedures, go back to question #2 and update your response from "yes" to "no."*

	(a) Adult Volume	(b) Pediatric Volume
Anterior segment eye procedures	_____	_____
Posterior segment eye procedures	_____	_____
Ocular adnexa and other eye procedures	_____	_____

12) Where were these **ophthalmology** procedures performed?

Select all that apply.

If only "hospital" is selected, skip question #13 and continue to question #14.

- ☐ Hospital
☐ Surgery center or free-standing hospital outpatient department

13) Please provide the name and city location of each surgery center or free-standing hospital outpatient department performing **ophthalmology** procedures:

	Name	City
Surgery Center/Free-Standing Hospital Outpatient Department 1		
Surgery Center/Free-Standing Hospital Outpatient Department 2		
Surgery Center/Free-Standing Hospital Outpatient Department 3		
Surgery Center/Free-Standing Hospital Outpatient Department 4		
Surgery Center/Free-Standing Hospital Outpatient Department 5		

Orthopedic

14) Total adult and/or pediatric volume for each of the following applicable procedures performed at your hospital outpatient department(s) during the reporting period.

*You cannot leave any blank. If you did not perform one or more of the procedures listed below enter 0 (zero). If you had zero volume for **all** procedures, go back to question #3 and update your response from "yes" to "no."*

	(a) Adult Volume	(b) Pediatric Volume
Finger, hand, wrist, forearm, and elbow procedures	_____	_____
Shoulder procedures	_____	_____
Spine procedures	_____	_____
Hip procedures	_____	_____
Knee procedures	_____	_____
Toe, foot, ankle, and leg procedures	_____	_____
General orthopedic procedures	_____	_____

15) Where were these **orthopedic** procedures performed?

Select all that apply.

If only "hospital" is selected, skip question #16 and continue to question #17.

- ☐ Hospital
- ☐ Surgery center or free-standing hospital outpatient department

16) Please provide the name and city location of each surgery center or free-standing hospital outpatient department performing **orthopedic** procedures:

	Name	City
Surgery Center/Free-Standing Hospital Outpatient Department 1		
Surgery Center/Free-Standing Hospital Outpatient Department 2		
Surgery Center/Free-Standing Hospital Outpatient Department 3		
Surgery Center/Free-Standing Hospital Outpatient Department 4		
Surgery Center/Free-Standing Hospital Outpatient Department 5		

Otolaryngology

17) Total adult and/or pediatric volume for each of the following applicable procedures performed at your hospital outpatient department(s) during the reporting period.

*You cannot leave any blank. If you did not perform one or more of the procedures listed below enter 0 (zero). If you had zero volume for **all** procedures, go back to question #4 and update your response from "yes" to "no."*

	(a) Adult Volume	(b) Pediatric Volume
Ear procedures	_____	_____
Mouth procedures	_____	_____
Nasal/sinus procedures	_____	_____
Pharynx/adenoid/tonsil procedures	_____	_____

18) Where were these **otolaryngology** procedures performed?

Select all that apply.

If only "hospital" is selected, skip question #19 and continue to question #20.

- ☐ Hospital
- ☐ Surgery center or free-standing hospital outpatient department

19) Please provide the name and city location of each surgery center or free-standing hospital outpatient department performing **otolaryngology** procedures:

	Name	City
Surgery Center/Free-Standing Hospital Outpatient Department 1		
Surgery Center/Free-Standing Hospital Outpatient Department 2		
Surgery Center/Free-Standing Hospital Outpatient Department 3		
Surgery Center/Free-Standing Hospital Outpatient Department 4		
Surgery Center/Free-Standing Hospital Outpatient Department 5		

Gastroenterology

20) Total adult volume for each of the following applicable procedures performed at your hospital outpatient department(s) during the reporting period.

You cannot leave any blank. If you did not perform one or more of the procedures listed below enter 0 (zero). If you had zero volume for all procedures, go back to question #5 and update your response from "yes" to "no."

	Adult Volume
Upper GI endoscopies	_____
Lower GI endoscopies	_____

21) Where were these **gastroenterology** procedures performed?

Select all that apply.

If only "hospital" is selected, skip question #22 and continue to question #23.

- ☐ Hospital
- ☐ Surgery center or free-standing hospital outpatient department

22) Please provide the name and city location of each surgery center or free-standing hospital outpatient department performing **gastroenterology** procedures:

	Name	City
Surgery Center/Free-Standing Hospital Outpatient Department 1		
Surgery Center/Free-Standing Hospital Outpatient Department 2		
Surgery Center/Free-Standing Hospital Outpatient Department 3		
Surgery Center/Free-Standing Hospital Outpatient Department 4		
Surgery Center/Free-Standing Hospital Outpatient Department 5		

General Surgery

23) Total adult volume for each of the following applicable procedures performed at your hospital outpatient department(s) during the reporting period.

*You cannot leave any blank. If you did not perform one or more of the procedures listed below enter 0 (zero). If you had zero volume for **all** procedures, go back to question #6 and update your response from "yes" to "no."*

	Adult Volume
Cholecystectomies and common duct explorations	_____
Hemorrhoid procedures	_____
Inguinal and femoral hernia repairs	_____
Other hernia repairs	_____
Laparoscopies	_____
Lumpectomies or quadrantectomy of breast procedures	_____
Mastectomies	_____

24) Where were these **general surgery** procedures performed?

Select all that apply.

If only "hospital" is selected, skip question #25 and continue to question #26.

- ☐ Hospital
☐ Surgery center or free-standing hospital outpatient department

25) Please provide the name and city location of each surgery center or free-standing hospital outpatient department performing **general surgery** procedures:

	Name	City
Surgery Center/Free-Standing Hospital Outpatient Department 1		
Surgery Center/Free-Standing Hospital Outpatient Department 2		
Surgery Center/Free-Standing Hospital Outpatient Department 3		
Surgery Center/Free-Standing Hospital Outpatient Department 4		
Surgery Center/Free-Standing Hospital Outpatient Department 5		

Urology

26) Total adult volume for each of the following applicable procedures performed at your hospital outpatient department(s) during the reporting period.

*You cannot leave any blank. If you did not perform one or more of the procedures listed below enter 0 (zero). If you had zero volume for **all** procedures, go back to question #7 and update your response from "yes" to "no."*

	<i>Adult Volume</i>
Circumcisions	_____
Cystourethroscopies	_____
Male genital procedures	_____
Urethra procedures	_____
Vaginal repair procedures	_____

27) Where were these **urology** procedures performed?

Select all that apply.

If only "hospital" is selected, skip question #28 and continue to question #29.

- ☐ Hospital
☐ Surgery center or free-standing hospital outpatient department

28) Please provide the name and city location of each surgery center or free-standing hospital outpatient department performing **urology** procedures:

	<i>Name</i>	<i>City</i>
Surgery Center/Free-Standing Hospital Outpatient Department 1		
Surgery Center/Free-Standing Hospital Outpatient Department 2		
Surgery Center/Free-Standing Hospital Outpatient Department 3		
Surgery Center/Free-Standing Hospital Outpatient Department 4		
Surgery Center/Free-Standing Hospital Outpatient Department 5		

Neurological Surgery

29) Total adult volume for the following procedure performed at your hospital outpatient department(s) during the reporting period.

You cannot leave any blank. If you did not perform the procedure listed below, go back to question #8 and update your response from “yes” to “no.”

	Adult Volume
Spinal fusion procedures	_____

30) Where were these **neurological surgery** procedures performed?

Select all that apply.

If only “hospital” is selected, skip question #31 and continue to question #32.

- ☐ Hospital
☐ Surgery center or free-standing hospital outpatient department

31) Please provide the name and city location of each surgery center or free-standing hospital outpatient department performing **neurological surgery** procedures:

	Name	City
Surgery Center/Free-Standing Hospital Outpatient Department 1		
Surgery Center/Free-Standing Hospital Outpatient Department 2		
Surgery Center/Free-Standing Hospital Outpatient Department 3		
Surgery Center/Free-Standing Hospital Outpatient Department 4		
Surgery Center/Free-Standing Hospital Outpatient Department 5		

Obstetrics and Gynecology

32) Total adult volume for each of the following applicable procedures performed at your hospital outpatient department(s) during the reporting period.

*You cannot leave any blank. If you did not perform one or more of the procedures listed below enter 0 (zero). If you had zero volume for **all** procedures, go back to question #9 and update your response from "yes" to "no."*

	<i>Adult Volume</i>
Cervix procedures	_____
Hysteroscopies	_____
Uterus and adnexa laparoscopies	_____

33) Where were these **obstetrics and gynecology** procedures performed?

Select all that apply.

If only "hospital" is selected, skip question #34 and continue to question #35.

- ☐ Hospital
☐ Surgery center or free-standing hospital outpatient department

34) Please provide the name and city location of each surgery center or free-standing hospital outpatient department performing **obstetrics and gynecology** procedures:

	<i>Name</i>	<i>City</i>
Surgery Center/Free-Standing Hospital Outpatient Department 1		
Surgery Center/Free-Standing Hospital Outpatient Department 2		
Surgery Center/Free-Standing Hospital Outpatient Department 3		
Surgery Center/Free-Standing Hospital Outpatient Department 4		
Surgery Center/Free-Standing Hospital Outpatient Department 5		

Plastic and Reconstructive Surgery

35) Total adult volume for each of the following applicable procedures performed at your hospital outpatient department(s) during the reporting period.

*You cannot leave any blank. If you did not perform one or more of the procedures listed below enter 0 (zero). If you had zero volume for **all** procedures, go back to question #10 and update your response from "yes" to "no."*

	Adult Volume
Breast repair or reconstructive procedures	_____
Skin graft/reconstruction procedures	_____

36) Where were these **plastic and reconstructive surgery** procedures performed?

Select all that apply.

If only "hospital" is selected, skip question #37 and continue to the next subsection.

- ☐ Hospital
☐ Surgery center or free-standing hospital outpatient department

37) Please provide the name and city location of each surgery center or free-standing hospital outpatient department performing **plastic and reconstructive surgery** procedures:

	Name	City
Surgery Center/Free-Standing Hospital Outpatient Department 1		
Surgery Center/Free-Standing Hospital Outpatient Department 2		
Surgery Center/Free-Standing Hospital Outpatient Department 3		
Surgery Center/Free-Standing Hospital Outpatient Department 4		
Surgery Center/Free-Standing Hospital Outpatient Department 5		

9D: Safety of Procedures

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review Leapfrog's Multi-Campus Reporting Policy.

Important Note: The term “hospital outpatient department” is used to refer to all hospital outpatient departments or areas of the hospital, including areas that are used for **both** inpatient and outpatient procedures, that perform the outpatient procedures listed in Section 9C and that share your hospital's license or CMS Certification Number (CCN). This would include, but is not limited to surgery centers, free-standing hospital outpatient departments, as well as outpatient departments that are located in your hospital or are co-located³¹ with your hospital. Hospitals should only include hospital outpatient departments or areas of the hospital that perform the procedures listed in Section 9C in an operating room⁵³ or procedure room⁵⁴.

Patient Follow-up

This section is not applicable to pediatric hospitals.

Specifications: See the Patient Follow-up Measure Specifications in the Reference Information beginning on page 327.

Reporting Period: 24 months

Most recent 24-month reporting period published by CMS.

Leapfrog will update data three times per Survey Cycle for hospitals that have provided an accurate CCN in the Hospital Profile and submitted Section 9 of the Leapfrog Hospital Survey.

Leapfrog obtains data for one CMS Hospital Quality Star Rating Program measure directly from CMS' website:

- OP-32: Rate of Unplanned Hospital Visits After an Outpatient Colonoscopy

In order for Leapfrog to obtain the data for this measure, hospitals must provide a valid CMS Certification Number (CCN) in the Hospital Profile and submit Section 9 of the Leapfrog Hospital Survey.

Hospitals that do not perform adult colonoscopy procedures will be scored and publicly reported as “Does Not Apply.” Hospitals that do not provide an accurate CCN in the Hospital Profile or do not report data to CMS will be scored and publicly reported as “Unable to Calculate Score.” Hospitals that do not respond to questions in Section 9 or do not submit a Leapfrog Hospital Survey will be scored and publicly reported as “Declined to Respond.”

Please refer to the Deadlines and Reporting Periods table in the Patient Follow-up Measure Specifications.

Safe Surgery Checklist for Adult and Pediatric Outpatient Procedures**Important Notes:**

Note 1: The elements required for each stage of the safe surgery checklist in questions #5-12 are adapted from the WHO Surgical Safety Checklist and the AHRQ Endoscopy Checklist.

Note 2: Question #7 will not be used in scoring or public reporting. Hospitals that do not perform outpatient procedures on adult or pediatric patients will be scored and publicly reported as “Does Not Apply.”

Note 3: Hyperlinks throughout these questions refer to the Safe Surgery Checklist for Adult and Pediatric Outpatient Procedures FAQs beginning on page 328, not to endnotes. These hyperlinks are not included in the Online Survey Tool.

Specifications: See the Safe Surgery Checklist for Adult and Pediatric Outpatient Procedures Measure Specifications in the Safety of Procedures Reference Information beginning on page 326.

Reporting Period: 12 months

Answer questions #1-9 for the latest 12-month period prior to submission of this section of the Survey.

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

Sufficient Sample: See Safe Surgery Checklist for Adult and Pediatric Outpatient Procedures Measure Specifications for instructions on identifying a sufficient sample for questions #6-9.

1) What is the latest 12-month reporting period for which your hospital is submitting responses to questions #2-9? 12-month reporting period ending:	<u> </u> Format: Month/Year
2) Does your hospital utilize a safe surgery checklist on <u>every</u> patient, <u>every</u> time one of the applicable procedures in Section 9C is performed? <i>Hospitals with more than one hospital outpatient department, including a surgery center or free-standing hospital outpatient department, should respond based on the location with the fewest processes in place.</i> <i>If “no” to question #2, skip the remaining questions in Section 9D and continue to the next subsection. The hospital will be scored as “Limited Achievement.”</i>	☐ Yes ☐ No
3) Before the induction of anesthesia , is a safe surgery checklist that includes <u>all</u> the following elements <u>read aloud</u> in the presence of the <u>anesthesia professional and nursing personnel</u> : • Patient ID; • Confirmation of procedure; • Patient consent; • Site marked, if applicable; • Anesthesia/medication check; • Allergies assessed; • Difficult airway/aspiration risk; • Risk of blood loss (only applicable if risk of blood loss is >500ml for adults or >7ml/kg for children); and	☐ Yes ☐ No

2025 Leapfrog Hospital Survey – Hard Copy

Section 9: Outpatient Procedures

• Availability of devices (applicable to endoscopy procedures only)?	
4) Before the skin incision and/or before the procedure begins, is a safe surgery checklist that includes <u>all</u> the following elements <u>read aloud</u> in the presence of the <u>whole surgical team</u>: • <u>Clinical team introduction</u>; • Confirmation of patient name, procedure, and, if applicable, surgical/incision site; • Antibiotic prophylaxis, if applicable; • Anticipated Critical Events (i.e., non-routine steps, length of procedure, blood loss, patient-specific concerns, sterility); • Equipment check/concerns; and • Essential imaging available, if applicable?	○ Yes ○ No
5) Before the patient leaves the operating room and/or procedure room, is a safe surgery checklist that includes <u>all</u> the following elements <u>read aloud</u> in the presence of the <u>whole surgical team</u>: • Confirmation of procedure performed; • Instrument/supply counts, if applicable; • Specimen labeling, if applicable; • Equipment concerns; and • Patient recovery/management concerns?	○ Yes ○ No

If “no” to question #3, #4, or #5, skip the remaining questions in Section 9D and continue to the next subsection. The hospital will be scored as “Limited Achievement.”

Hospitals performing the audit in Section 3B question #6 and the audit in Section 9D question #6 should audit 15 cases who underwent a procedure included in Section 3A and 15 cases who underwent a procedure included in Section 9C. Hospitals only performing the audit in Section 9D question #6 and not in Section 3B question #6 should audit 30 cases who underwent a procedure included in Section 9C.

6) Did your hospital perform an audit (either in-person or via the medical record or other EHR data) on a sufficient sample of patients who underwent a procedure included in Section 9C and measure adherence to the safe surgery checklist? <i>Hospitals with more than one hospital outpatient department, including a surgery center or free-standing hospital outpatient department, should select at least one case from each location.</i> <i>If “no” to question #6, skip the remaining questions in Section 9D and continue to the next subsection. The hospital will be scored as “Limited Achievement.”</i>	○ Yes ○ No
7) How many cases were included in the audit from question #6?	_____ <i>Max value is 100</i>
8) Which method was used to perform the audit on a sufficient sample in question #6?	○ In-person observational audit ○ Retrospective audit of medical records or EHR data ○ Both

9E: Medication Safety for Outpatient Procedures

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review Leapfrog's Multi-Campus Reporting Policy.

Important Note: The term “hospital outpatient department” is used to refer to all hospital outpatient departments or areas of the hospital, including areas that are used for **both** inpatient and outpatient procedures, that perform the outpatient procedures listed in Section 9C and that share your hospital's license or CMS Certification Number (CCN). This would include, but is not limited to surgery centers, free-standing hospital outpatient departments, as well as outpatient departments that are located in your hospital or are co-located³¹ with your hospital. Hospitals should only include hospital outpatient departments or areas of the hospital that perform the procedures listed in Section 9C in an operating room⁵³ or procedure room⁵⁴.

Specifications: See **Medication Safety for Outpatient Procedures Measure Specifications** in the Reference Information beginning on page 330.

Reporting Period: 12 months

Answer questions #2-7 based on all cases (or a sufficient sample of them),

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

Sufficient Sample: See **Medication Safety for Outpatient Procedures Measure Specifications** for instructions on identifying a sufficient sample for questions #2-7.

1) 12-month reporting period used:	☐ 01/01/2024 – 12/31/2024 ☐ 07/01/2024 – 06/30/2025
2) Did your hospital perform an audit of clinical records for all patients undergoing those procedures included in Section 9C (or a <u>sufficient sample</u> of them) who were discharged from a hospital outpatient department for the reporting period selected and measure adherence to medication documentation guidelines regarding home medications, medications administered during the visit or prescribed at discharge, and medication allergies? <i>If “no” to question #2, skip questions #3-7 and continue to the next subsection. The hospital will be scored as “Did Not Measure.”</i> <i>If “yes, but there were fewer than 30 outpatients discharged for the reporting period,” skip questions #3-7 and continue to the next subsection. The hospital will be scored as “Unable to Calculate Score.”</i>	☐ Yes ☐ No ☐ Yes, but there were fewer than 30 outpatients discharged for the reporting period
3) Number of cases measured (either all cases or a <u>sufficient sample</u> of them):	_____
4) Number of cases in question #3 with a list of all home medication(s) , including dose, route, and frequency, documented in the clinical record:	_____

2025 Leapfrog Hospital Survey – Hard Copy

Section 9: Outpatient Procedures

5) Number of cases in question #3 with a list of <u>all medication(s) administered during the visit and new medications prescribed at discharge</u> , including the strength, dose, route, date, and time of administration, documented in the clinical record:	_____
6) Number of cases in question #3 with a list of <u>all medication allergies and adverse reaction(s)</u> documented in the clinical record:	_____
7) Do the responses in questions #3-6 represent a sample of cases?	☐ Yes ☐ No

9F: Patient Experience (OAS CAHPS)

This section is not applicable to pediatric hospitals.

Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Important Note: The term “hospital outpatient department” is used to refer to all hospital outpatient departments or areas of the hospital, including areas that are used for **both** inpatient and outpatient procedures, that perform the outpatient procedures listed in Section 9C and that share your hospital's license or CMS Certification Number (CCN). This would include, but is not limited to surgery centers, free-standing hospital outpatient departments, as well as outpatient departments that are located in your hospital or are co-located³¹ with your hospital. Hospitals should only include hospital outpatient departments or areas of the hospital that perform the procedures listed in Section 9C in an operating room⁵³ or procedure room⁵⁴.

Specifications: See [Patient Experience \(OAS CAHPS\) Measure Specifications](#) in the Reference Information beginning on page 337.

Reporting Period: 12 months

Answer questions #1-10 for the latest 12-month period prior to the submission of this section of the Survey.

Note: As a reminder, the Corrections Period (December 1-January 31) is reserved for corrections to previously submitted Surveys only. Any updates made to reflect a change in performance must be made prior to the November 30 Late Submission and Performance Update Deadline. Updates made to reflect a change in performance after November 30 will not be scored or publicly reported.

1) What is the latest 12-month reporting period for which your hospital is submitting responses to this section? 12-month reporting period ending:	_____ Format: Month/Year
2) Did your hospital have at least 300 <u>eligible discharges</u> ⁵⁶ during the 12-month period referenced above? <i>If “no” to question #2, skip the remaining questions in Section 9F and go to the Affirmation of Accuracy. The hospital will be scored as “Does Not Apply.”</i>	☐ Yes ☐ No
3) Has your hospital administered, or started to administer, the entire OAS CAHPS Survey during the reporting period? <i>Hospitals not currently administering the OAS CAHPS Survey should select “no,” skip the remaining questions in Section 9F, and go to the Affirmation of Accuracy. The hospital will be scored as “Did Not Measure.”</i>	☐ Yes ☐ No
4) Total number of months in which your hospital administered the OAS CAHPS Survey during the reporting period.	_____
5) Total number of returned surveys during the reporting period. <i>If less than 100, skip the remaining questions in Section 9F and go to the Affirmation of Accuracy. The hospital will be scored as “Unable to Calculate Score.”</i>	_____

2025 Leapfrog Hospital Survey – Hard Copy

Section 9: Outpatient Procedures

6) Do the responses to the questions in this subsection include discharges from more than one location (e.g., hospital and surgery center or free-standing hospital outpatient department, hospital and multiple free-standing hospital outpatient departments, etc.)?	☐ Yes ☐ No
--	---

In questions #7-10, report your hospital's Top Box Score⁵² (rounded to the nearest whole number) from each of the following patient experience **domains** from your vendor report that matches the reporting period that you selected in question #1.

7) Facilities and Staff	_____ Format: Whole numbers only
8) Communication About Your Procedure	_____ Format: Whole numbers only
9) Patients' Rating of the Facility	_____ Format: Whole numbers only
10) Patients Recommending the Facility	_____ Format: Whole numbers only

Affirmation of Accuracy

As the hospital CEO or as an employee of the hospital to whom the hospital CEO has delegated responsibility, I have reviewed this information pertaining to the Outpatient Procedures Section at our hospital, and I hereby certify that this information is true, accurate, and reflects the current, normal operating circumstances at our hospital. I am authorized to make this certification on behalf of our hospital.

The hospital and I understand that The Leapfrog Group, its members, the public and entities and persons who contract or have other business dealings with The Leapfrog Group are relying on the truth and accuracy of this information. The hospital and I also understand that The Leapfrog Group will make this information and/or analyses of this information public through the Survey Results public reporting website, The Leapfrog Group's Hospital Safety Grade, and/or other Leapfrog Group products and services. This information and/or analyses and all intellectual property rights therein shall be and remain the sole and exclusive property of The Leapfrog Group in which The Leapfrog Group retains exclusive ownership. This information does not infringe upon any third-party intellectual property rights or any other third-party rights whatsoever and is free and clear of all encumbrances and liens of any kind. The hospital and I acknowledge that The Leapfrog Group may use this information in a commercial manner for profit. The hospital shall be liable for and shall hold harmless and indemnify The Leapfrog Group from any and all damages, demands, costs, or causes of action resulting from any inaccuracies in the information or any misrepresentations in this Affirmation of Accuracy. The Leapfrog Group and its members and entities and persons who contract or have other business dealings with The Leapfrog Group reserve the right to omit or disclaim information that is not current, accurate or truthful.

Section 9: Outpatient Procedures Reference Information

What's New in the 2025 Survey

Section 9A: Basic Outpatient Department Information

There are no changes to this subsection.

Section 9B: Medical, Surgical, and Clinical Staff

In response to feedback from participating hospitals and ASCs, Leapfrog is making the following update to Section 9B: Medical, Surgical, and Clinical Staff:

- Question #2, regarding the presence of clinicians trained in Pediatric Advanced Life Support (PALS), will be updated to include a new response option of "Not applicable; pediatric patients are all aged 13-17" to clarify that all pediatric procedures reported on in Section 9C: Volume of Procedures during the reporting period were performed on patients 13 years and older.

There are no changes to the scoring algorithm for Section 9B: Medical, Surgical, and Clinical Staff.

Section 9C: Volume of Procedures

Leapfrog is adding back five anterior segment eye procedure CPT codes and four lumpectomy or quadrantectomy of breast CPT codes for adult patients that were previously removed in 2024, due to feedback that the procedures continue to be performed in both ambulatory surgery centers and hospital outpatient departments. In addition, Leapfrog is adding three new CPT codes for spinal fusion for adult patients, two new CPT codes for nasal/sinus procedures for both adult and pediatric patients, and one new CPT code for cystourethroscopy for adult patients.

Section 9D: Safety of Procedures

Patient Follow-up

There are no changes to these questions.

Safe Surgery Checklist for Adult and Pediatric Outpatient Procedures

There are no changes to these questions.

Section 9E: Medication Safety for Outpatient Procedures

There are no changes to these questions.

Section 9F: Patient Experience (OAS CAHPS)

There are no changes to this subsection. However, Leapfrog would like to inform hospitals that they will still be required to report OAS CAHPS results in the Online Survey Tool, despite the data being publicly reported by CMS at data.cms.gov. Current benchmarks used by Leapfrog to score Top Box Scores from four domains included on the OAS CAHPS Survey are based on data from both ASCs and HOPDs. ASCs are not yet required to report their OAS CAHPS results to CMS. Leapfrog plans to incorporate the CMS publicly reported datasets in the future once ASCs are fully included in adjustments of the Top Box Scores.

Change Summary Since Release

None. If substantive changes are made to this section of the Survey after release on April 1, 2025, they will be documented in this Change Summary section.

Basic Outpatient Department Information Frequently Asked Questions (FAQs)

- 1. Our hospital shares a CMS Certification Number (CCN) with other hospitals, and we have many hospital outpatient department locations (e.g., surgery centers, endoscopy centers, free-standing hospital outpatient departments, etc.) all under the same CCN. How should we report on Section 9: Outpatient Procedures?**

As per Leapfrog's Multi-Campus Reporting Policy, all hospital campuses will need to complete their own Leapfrog Hospital Survey unless they are co-located.

For Section 9: Outpatient Procedures, each hospital campus will need to indicate in Section 9A if they are performing the outpatient procedures listed in Section 9C at their hospital and/or at a surgery center or free-standing hospital outpatient department that shares their hospital's CMS Certification Number (CCN). You should only include those hospital outpatient departments that your hospital refers patients to. The remainder of the questions in Section 9 will need to be answered based on:

- all hospital outpatient departments in your hospital, including any areas such as inpatient units, where outpatient procedures are performed (as reported in Section 9A question #2); and,
- all surgery centers and free-standing hospital outpatient departments that share your hospital's CCN (as reported in Section 9A question #3)

In Section 9C, you will be able to provide total volume across all hospital outpatient department locations (as reported in Section 9A questions #2 and #3) and information for the different outpatient locations where the specific outpatient procedures are performed. All other questions should be answered based on all outpatient locations. If you have different adherence across locations, you should answer based on the least adherent location.

If all hospital campuses are referring patients to the same surgery centers and free-standing hospital outpatient departments, you would include the information and volume for these locations when responding to Section 9 on all their Leapfrog Hospital Surveys.

- 2. How should our hospital report on the number of operating rooms and endoscopic procedure rooms in questions #4-5 if our operating/procedure rooms are used for both inpatient and outpatients? How should we report if we have multiple hospital outpatient departments?**

Hospitals should report on the total number of adult and pediatric operating rooms or procedure rooms if these rooms are used for both inpatient and outpatient procedures. Otherwise, hospitals should only report on the number of operating/procedure rooms that are used for outpatient procedures. If your hospital has multiple hospital outpatient departments, report the total number of adult and pediatric outpatient operating rooms or procedure rooms across all locations. You should only be reporting on operating rooms and procedure rooms that are used to perform the outpatient procedures listed in Section 9C Volume of Procedures.

Medical, Surgical, and Clinical Staff Frequently Asked Questions (FAQs)

1. How does Leapfrog define “immediately available” and “in the building” as it pertains to ACLS and/or PALS trained clinicians?

“Immediately available” is defined as being physically present in the building and not engaged in an activity or procedure that cannot be interrupted if hands-on intervention is needed for a patient.

Leapfrog defines “in the building” as within the hospital outpatient department or surgery center or in an area co-located with the hospital outpatient department or surgery center. Leapfrog defines co-located as a location within “immediate physical proximity,” meaning the two locations are physically connected, either by a tunnel, an enclosed bridge, or the locations abut each other so that hallways readily connect.

2. If a hospital did not perform any outpatient pediatric procedures during the reporting period selected in Section 9C, should they still report on PALS-trained clinicians in Section 9B question #2?

No. If your hospital did not report any pediatric discharges for the procedures listed in Section 9C during the reporting period, then you should select “Not applicable; adult patients only” in question #2.

3. Is the PEARS certification the equivalent of PALS certification for the purposes of responding to question #2?

No. PEARS is not the equivalent of or substitution for PALS certification. The PEARS curriculum is focused on recognition of and steps to mitigate pediatric respiratory emergencies, whereas the PALS curriculum informs clinicians how to manage these emergencies, with emphasis on leadership of the care team, and how to perform key air management techniques. Additionally, the PALS curriculum instructs providers on multiple ways to obtain IV access to improve circulatory issues.

4. How should hospitals report on ACLS/PALS certification if they have more than one hospital outpatient department performing the procedures listed in Section 9C Volume of Procedures?

Hospitals with more than one hospital outpatient department are instructed to respond to questions #1-2 based on the location with the least intensive staffing. For example, if one hospital outpatient department has an ACLS trained clinician, as well as a second clinician present at all times and immediately available in the building when adult patients are in the hospital outpatient department, but another hospital outpatient department does not, you should answer “no” to question #1.

5. If a free-standing pediatric hospital has clinicians trained in PALS but a small percentage of the patient population is over 13, should these clinicians also have ACLS training, or would the PALS training be sufficient?

If your hospital outpatient departments are performing procedures on adult and pediatric patients, there should be at least one clinician with ACLS training when adult patients (13 years and older) are recovering and one clinician with PALS training when pediatric patients (infant to 12 years) are recovering. This could mean that some clinicians maintain both certifications or some maintain ACLS, and others maintain PALS.

Volume of Procedures Measure Specifications**Important Notes:**

Note 1: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Note 2: CPT Codes are provided in downloadable Excel files on the Survey Dashboard. To access the files, click the CPT Code Workbook button next to Section 9. You will be required to complete the American Medical Association's Terms of Use before downloading the Excel file and using the individual CPT codes to query your EHR or billing system. You are only required to complete the Terms of Use once per Survey Cycle (April 1 – November 30).

The CPT Code Workbooks (Excel files) are labeled for Section 3A: Total Hip Replacement, Total Knee Replacement, and Bariatric Surgery for Weight Loss and Section 9C: Volume of Procedures. Please note, if you are part of a hospital system, each hospital will need to complete the Terms of Use. This is a requirement of the American Medical Association.

Note 3: When counting patients for the purposes of identifying total volume in Section 9C, you should only include scheduled outpatient (i.e., admitted and discharged on the same day) procedures performed at your hospital outpatient departments within the reporting period. Include scheduled outpatient procedures with a planned observation or extended recovery stay. Exclude scheduled outpatient procedures with a planned inpatient admission. Exclude emergent/urgent cases, such as procedures for patients that come through the emergency department. To count patient discharges, use the Volume of Procedures Measure Specifications below and the CPT codes available in the Library on the Survey Dashboard.

Source: The Leapfrog Group, American Medical Association, The Health Care Cost Institute

Reporting Period: 12 months

- 01/01/2024 – 12/31/2024

Questions #2-10: Respond "yes" or "no" based on whether your hospital outpatient department(s) performed any of the procedures during the reporting period on adult and/or pediatric patients. The procedures fall within nine specialty areas:

Adult Procedures

1. Ophthalmology procedures: anterior segment eye procedures; posterior segment eye procedures; and ocular adnexa and other eye procedures
2. Orthopedic procedures: finger, hand, wrist, forearm, and elbow procedures; shoulder procedures; spine procedures; hip procedures; knee procedures; toe, foot, ankle, and leg procedures; and general orthopedic procedures
3. Otolaryngology procedures: ear procedures; mouth procedures; and nasal/sinus procedures
4. Gastroenterology procedures: upper GI endoscopy; and lower GI endoscopy
5. General surgery procedures: cholecystectomy and common duct exploration; hemorrhoid procedures; inguinal and femoral hernia repairs; other hernia repairs; laparoscopy; lumpectomy or quadrantectomy of breast; and mastectomy
6. Urology procedures: circumcisions; cystourethroscopy; male genital procedures; urethra procedures; and vaginal repair procedures
7. Neurological surgery procedures: spinal fusion procedures
8. Obstetrics and gynecology procedures: cervix procedures; hysteroscopy; and uterus and adnexa laparoscopies
9. Plastic and reconstructive surgery procedures: breast repair or reconstructive procedures; and skin graft/reconstruction procedures

Pediatric Procedures

1. Ophthalmology procedures: ocular adnexa and other eye procedures
2. Orthopedic procedures: finger, hand, wrist, forearm, and elbow procedures; shoulder procedures; knee procedures; toe, foot, ankle, and leg procedures; and general orthopedic procedures

3. Otolaryngology procedures: ear procedures; mouth procedures; nasal/sinus procedures; pharynx/adenoid/tonsil procedures

Respond “yes” if:

- One or more of your hospital outpatient departments performed the procedure on an outpatient basis for the entire reporting period (12 months) and continues to do so
- One or more of your hospital outpatient departments performed the procedure on an outpatient basis during part of the reporting period (less than 12 months) and continues to perform the procedure

Respond “yes, but no longer perform these procedures” if your hospital outpatient departments performed the procedure for all or some of the reporting period, but NO longer performs the procedure

Respond “no” if your hospital outpatient departments do not perform the procedure.

Questions #11-37: Based on your responses to questions #2-10, report on the total (a) adult and/or (b) pediatric volume for each procedure (from questions #2-10) during the reporting period:

Adult Procedures

1. Ophthalmology procedures: anterior segment eye procedures; posterior segment eye procedures; and ocular adnexa and other eye procedures
2. Orthopedic procedures: finger, hand, wrist, forearm, and elbow procedures; shoulder procedures; spine procedures; hip procedures; knee procedures; toe, foot, ankle, and leg procedures; and general orthopedic procedures
3. Otolaryngology procedures: ear procedures; mouth procedures; and nasal/sinus procedures
4. Gastroenterology procedures: upper GI endoscopy; and lower GI endoscopy
5. General surgery procedures: cholecystectomy and common duct exploration; hemorrhoid procedures; inguinal and femoral hernia repairs; other hernia repairs; laparoscopy; lumpectomy or quadrantectomy of breast; and mastectomy
6. Urology procedures: circumcisions; cystourethroscopy; male genital procedures; urethra procedures; and vaginal repair procedures
7. Neurological surgery procedures: spinal fusion procedures
8. Obstetrics and gynecology procedures: cervix procedures; hysteroscopy; and uterus and adnexa laparoscopies
9. Plastic and reconstructive surgery procedures: breast repair or reconstructive procedures; and skin graft/reconstruction procedures

Pediatric Procedures

1. Ophthalmology procedures: ocular adnexa and other eye procedures
2. Orthopedic procedures: finger, hand, wrist, forearm, and elbow procedures; shoulder procedures; knee procedures; toe, foot, ankle, and leg procedures; and general orthopedic procedures
3. Otolaryngology procedures: ear procedures; mouth procedures; nasal/sinus procedures; pharynx/adenoid/tonsil procedures

When calculating total **hospital outpatient department volume for (a) adult and/or (b) pediatric patients** count the number of **patients** discharged from your hospital outpatient department(s) within the reporting period with any one or more of the codes specified for each procedure, subject to the criteria below:

- Only include scheduled outpatient (i.e., admitted and discharged on the same day) procedures performed at your hospital outpatient departments within the reporting period. Include scheduled outpatient procedures with a planned observation or extended recovery stay.
- Exclude scheduled outpatient procedures with a planned inpatient admission. Exclude emergent/urgent cases, such as procedures for patients that come through the emergency department.
- Only the procedure codes provided by Leapfrog should be used to report on the questions in Section 9C.

- If a patient had more than one of the listed procedures performed on the same visit (i.e., repair of dislocating knee cap (CPT: 27422) and repair of superior labrum anterior/posterior (SLAP) lesion (CPT: 29807)), include the patient in the total volume for both procedures.

Ophthalmology Measure Specifications

For ophthalmology procedures, use the CPT codes available via the [Survey Dashboard](#) to count **patients** discharged from your hospital outpatient departments who have undergone any of the 3 procedures during the reporting period.

One procedure applies to **both adult and pediatric patients**:

- Ocular adnexa and other eye procedures

Two procedures apply to **adult patients only**:

- Anterior segment eye procedures
- Posterior segment eye procedures

Using the "Ophthalmology_adult" sheet, count the total number of adult (18 years of age or older) patients discharged for each procedure with any of the CPT codes listed. The CPT code can be in any procedure field.

Using the "Ophthalmology_ped" sheet, count the total number of pediatric (17 years of age and younger) patients discharged for each procedure with any of the CPT codes listed. The CPT code can be in any procedure field.

Orthopedic Measure Specifications

For orthopedic procedures, use the CPT codes available via the [Survey Dashboard](#) to count **patients** discharged from your hospital outpatient departments who have undergone any of the 7 procedures during the reporting period.

Five procedures apply to **both adult and pediatric patients**:

- Finger, hand, wrist, forearm, and elbow procedures
- Shoulder procedures
- Knee procedures
- Toe, foot, ankle, and leg procedures
- General orthopedic procedures

Two procedures apply to **adult patients only**:

- Spine procedures
- Hip procedures

Using the "Orthopedic_adult" sheet, count the total number of adult (18 years of age or older) patients discharged for each procedure with any of the CPT codes listed. The CPT code can be in any procedure field.

Using the "Orthopedic_ped" sheet, count the total number of pediatric (17 years of age and younger) patients discharged for each procedure with any of the CPT codes listed. The CPT code can be in any procedure field.

Otolaryngology Measure Specifications

For otolaryngology procedures, use the CPT codes available via the [Survey Dashboard](#) to count **patients** discharged from your hospital outpatient departments who have undergone any of the 4 procedures during the reporting period.

Three procedures apply to **both adult and pediatric patients**:

- Ear procedures

2025 Leapfrog Hospital Survey – Hard Copy

Section 9: Outpatient Procedures

- Mouth procedures
- Nasal/sinus procedures

One procedure applies to **pediatric patients only**:

- Pharynx/adenoid/tonsil procedures

Using the “Otolaryngology_adult” sheet, count the total number of adult (18 years of age or older) patients discharged for each procedure with any of the CPT codes listed. The CPT code can be in any procedure field.

Using the “Otolaryngology_ped” sheet, count the total number of pediatric (17 years of age and younger) patients discharged for each procedure with any of the CPT codes listed. The CPT code can be in any procedure field.

Gastroenterology Measure Specifications

For gastroenterology procedures, use the CPT codes available via the [Survey Dashboard](#) to count **patients** discharged from your hospital outpatient departments who have undergone either of the 2 procedures during the reporting period.

Both procedures apply to **adult patients only**:

- Upper GI endoscopy
- Lower GI endoscopy

Using the “Gastroenterology_adult” sheet, count the total number of adult (18 years of age or older) patients discharged for each procedure with any of the CPT codes listed. The CPT code can be in any procedure field.

General Surgery Measure Specifications

For general surgery procedures, use the CPT codes available via the [Survey Dashboard](#) to count **patients** discharged from your hospital outpatient departments who have undergone any of the 7 procedures during the reporting period.

All seven procedures apply to **adult patients only**:

- Cholecystectomy and common duct exploration
- Hemorrhoid procedure
- Laparoscopy
- Lumpectomy or quadrantectomy of breast
- Mastectomy
- Inguinal and femoral hernia repair
- Other hernia repair

Using the “General surgery_adult” sheet, count the total number of adult (18 years of age or older) patients discharged for each procedure with any of the CPT codes listed. The CPT code can be in any procedure field.

Urology Measure Specifications

For urology procedures, use the CPT codes available via the [Survey Dashboard](#) to count **patients** discharged from your hospital outpatient departments who have undergone any of the 5 procedures during the reporting period.

All five procedures apply to **adult patients only**:

- Circumcision
- Cystourethroscopy

- Male genital procedures
- Urethra procedures
- Vaginal repair procedures

Using the "Urology_adult" sheet, count the total number of adult (18 years of age or older) patients discharged for each procedure with any of the CPT codes listed. The CPT code can be in any procedure field.

Neurological Surgery Measure Specifications

For neurological surgery procedures, use the CPT codes available via the [Survey Dashboard](#) to count **patients** discharged from your hospital outpatient departments who have undergone the procedure during the reporting period.

One procedure applies to **adult patients only**:

- Spinal fusion procedures

Using the "Neurological surgery_adult" sheet, count the total number of adult (18 years of age or older) patients discharged with any of the CPT codes listed. The CPT code can be in any procedure field.

Obstetrics and Gynecology Measure Specifications

For obstetrics and gynecology procedures, use the CPT codes available via the [Survey Dashboard](#) to count **patients** discharged from your hospital outpatient departments who have undergone any of the 3 procedures during the reporting period.

Three procedures apply to **adult patients only**:

- Cervix procedures
- Hysteroscopy
- Uterus and adnexa laparoscopies

Using the "Obstetrics and gynecology_adult" sheet, count the total number of adult (18 years of age or older) patients discharged for each procedure with any of the CPT codes listed. The CPT code can be in any procedure field.

Plastic and Reconstructive Surgery Measure Specifications

For plastic and reconstructive surgery procedures, use the CPT codes available via the [Survey Dashboard](#) to count **patients** discharged from your hospital outpatient departments who have undergone either of the 2 procedures during the reporting period.

Two procedures apply to **adult patients only**:

- Breast repair or reconstruction
- Skin graft/reconstruction procedures

Using the "Plastic_reconstruct surg_adult" sheet, count the total number of adult (18 years of age or older) patients discharged for each procedure with any of the CPT codes listed. The CPT code can be in any procedure field.

See [FAQs](#) for additional information about responding to questions in this section.

Volume of Procedures Frequently Asked Questions (FAQs)

1. How did Leapfrog select these 9 specialties and the procedures in this section of the Survey?

Leapfrog worked with the Health Care Cost Institute (HCCI) to identify the most commonly billed surgical procedures in ambulatory surgery centers and hospital outpatient departments for commercially insured adult and pediatric patients. Leapfrog's technical experts then assessed the list of procedures based on their frequency and type of anesthesia used during the procedure. Those selected for the Survey represent the highest volume procedures nationally requiring moderate to general anesthesia (including nerve blocks).

Please reach out to the [Leapfrog Help Desk](#) if you believe additional CPT Codes should be added to the Survey; Leapfrog will take these suggestions to our technical experts.

2. Should we count patients discharged with a G code for colonoscopy?

No. A "G" (HCPCS II) code is used to differentiate between colonoscopies performed for screening purposes rather than for a diagnostic or therapeutic procedure. The Survey only includes major diagnostic and therapeutic procedures.

Safety of Procedures Measure Specifications***Patient Follow-up***

Leapfrog obtains data for one CMS Hospital Outpatient measures directly from CMS' [website](#):

- OP-32: Rate of Unplanned Hospital Visits After an Outpatient Colonoscopy

In order for Leapfrog to obtain the data for this measure, hospitals must provide a valid CMS Certification Number (CCN) in the Hospital Profile and submit Section 9 of the Leapfrog Hospital Survey.

Deadlines and Reporting Periods

Data downloaded from CMS will be scored and publicly reported for Hospitals that have submitted Section 9 by	CMS Reporting Period	Available on Hospital Details Page and Public Reporting Website on
June 30, 2025	Most recent 24-month reporting period	July 12, 2025 Details Page July 25, 2025 Public Reporting Website
August 31, 2025	Most recent 24-month reporting period	September 10, 2025
November 30, 2025	Most recent 24-month reporting period	December 9, 2025

Review your CMS data for OP-32

- Once Leapfrog has published your hospital's Survey Results on the [Hospital Details Page](#), hospitals are urged to compare the CMS data Leapfrog has obtained with the data published on CMS' [website](#).
- Dates on which the Survey Results will be available on the Hospital Details page are listed in the "Deadlines and Reporting Periods" table above.

If you find a discrepancy while comparing your hospital's data published on the CMS [website](#) to the data published on the Hospital Details page, contact [Leapfrog's Help Desk](#) immediately.

Safe Surgery Checklist for Adult and Pediatric Outpatient Procedures

Important Note: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Source: The Leapfrog Group, WHO Surgical Safety Checklist and Implementation Manual, AHRQ Endoscopy Checklist
Reporting Period: 12 months Latest 12-month period prior to submission of this section of the Survey
Safe Surgery Checklist Workbook (Excel) To complete the data collection and respond to questions #6-9, hospitals should download the Safe Surgery Checklist Workbook (Excel). This workbook includes five tabs: Instructions, Section 3B (Complex Surgery), Section 3B – Data Entry, Section 9D (Outpatient Procedures), and Section 9D – Data Entry. The Section 9D tabs can be used to complete the safe surgery checklist audits for this subsection and to calculate the response for question #9. The workbook is available on the Survey Materials Webpage.
Sampling: For hospitals with one hospital outpatient department that performs the procedures listed in Section 9C and Section 3A and submit both Section 9 and 3: Hospitals can randomly sample 15 patients (who had one of the procedures included in Section 9C) and measure and report adherence to the safe surgery checklist based on that sample. When sampling from a larger population of cases, hospitals that perform procedures across multiple surgical specialties (e.g., general surgery, orthopedics, urology, etc.) included in Section 9C and facilities that perform procedures for both adult and pediatric patients should obtain a representative sample (i.e., include patients who underwent procedures in different surgical specialties and include both adult and pediatric patients, if applicable). For hospitals with multiple hospital outpatient departments that perform the procedures listed in Section 9C and Section 3A and submit both Section 9 and 3: Hospitals can randomly sample 15 patients (who had one of the procedures included in Section 9C) and measure and report adherence to the safe surgery checklist based on that sample. However, hospital must sample across the various locations where the procedures are being performed, including freestanding hospital outpatient departments or surgery centers, in addition to ensuring that the sample includes patients who underwent procedures in different surgical specialties and both adult and pediatric patients, if applicable. For hospitals with one or multiple hospital outpatient departments that ONLY perform the procedures in Section 9C or that ONLY submit Section 9: Hospitals must randomly sample 30 patients who had one of the procedures included in Section 9C and report adherence to the safe surgery checklist on that sample. Hospitals that perform the procedures listed in Section 9C and 3A should follow the guidance above.
Question #6: Did your hospital perform an audit (either in-person or via the medical record or other EHR data) on a sufficient sample of patients who underwent a procedure included in Section 9C and measure adherence to the safe surgery checklist? To respond “yes” to question #6, hospitals must measure and document whether all the elements in questions #3, #4, and #5 were verbalized in the presence of the appropriate personnel for each sampled case. Hospitals that completed the audit should respond “yes” to this question regardless of whether the adherence to the checklist was 100%. Hospitals will report on adherence to the checklist in question #9.

Question #7: How many cases were included in the audit from question #6?

Hospitals that perform procedures in both Section 3A and Section 9C, and submit both Section 3 and 9, can randomly sample 15 patients (who had one of the procedures included in Section 9C) and measure and report adherence to the safe surgery checklist based on that sample.

Hospitals that **ONLY** perform the procedures in Section 3AC, or that **ONLY** submit Section 9, must randomly sample 30 patients (who had one of the procedures included in Section 9C) and measure and report adherence to the safe surgery checklist based on that sample.

Question #8: What method was used to perform the audit on a sufficient sample in question #6?

Hospitals can only perform a retrospective audit by reviewing medical records or EHR data if adherence to the safe surgery checklist is clearly documented in the medical record or EHR and the documentation clearly demonstrates that each element was verbalized in the presence of the appropriate personnel. If hospitals cannot clearly determine whether (a) the checklist element was verbalized and (b) that the appropriate personnel were present via a retrospective audit, an in-person observational audit must be completed.

Hospitals performing in-person observational audits must do so in the latest 12 months prior to Survey submission.

Hospitals performing retrospective audits must audit cases from the latest 12 months prior to Survey submission but can also review any case from Section 9C that was performed in the latest calendar year prior to Survey submission.

Question #9: Based on your hospital's audit (either in-person or via the medical record or other EHR data) on a sufficient sample of patients who underwent a procedure included in Section 9C, what was your hospital's documented rate of adherence to the safe surgery checklist (e.g., what percentage of the sampled cases had all elements in questions #3, #4, and #5 completed)?

Based on the audit completed for question #6, determine the total number of patient audits where **all** elements of the safe surgery checklist (included in questions #3, #4, and #5) were read aloud in the presence of the appropriate personnel 1) before the induction of anesthesia, 2) before the skin incision and/or the procedure began, and 3) before the patient left the operating and/or procedure room.

Included cases:

- The patient audit shows that **all** elements of the safe surgery checklist, at **all** three time points, were read aloud in the presence of the appropriate personnel.

Excluded cases:

- The patient audit does **not** demonstrate that all elements of the safe surgery checklist were read aloud in the presence of the appropriate personnel (i.e., one or more elements of the checklist were not read aloud, or the appropriate personnel were not present during the checklist).
- The patient audit does **not** demonstrate that the safe surgery checklist was read aloud in the presence of the appropriate personnel at all three time points (i.e., before anesthesia, before skin incision, and before the patient leaves).

Important Note: If a Safe Surgery Checklist element includes the qualifier "if applicable," hospitals should determine if that element of the checklist was applicable to the patient and procedure being performed. If the element was determined to be "not applicable" to the patient and procedure, it does not count against the total adherence. For example, if your hospital performed a hernia repair, the availability of a device on-site would not be applicable. Therefore, when completing the Safe Surgery Checklist Workbook for this patient, indicate N/A for that element (device on-site) and your hospital would be able to count that case as adherent.

Safety of Procedures Frequently Asked Questions (FAQs)***General Questions***

- 1. How should hospitals report on the processes in Section 9D Safety of Procedures if they have more than one hospital outpatient department performing the procedures listed in Section 9C Volume of Procedures?**

Hospitals with more than one hospital outpatient department are instructed to respond to Section 9D based on the location with the fewest processes in place. For example, if one hospital outpatient department uses a safe surgery checklist on all patients, but another hospital outpatient department does not, you should answer “no” to question #6.

Patient Follow-up FAQs

- 2. Do hospitals need to do anything for Leapfrog to obtain data for the CMS measures?**

Leapfrog will automatically use your hospital's data that are reported to CMS for OP-32 if you provide an accurate CCN in the Hospital Profile and submit Section 9 of the 2025 Leapfrog Hospital Survey. For OP-32, if your hospital does not perform adult lower GI endoscopy procedures, you will be scored as “Does Not Apply.” More information is available in the Leapfrog Hospital Survey Scoring Algorithms.

Safe Surgery Checklist for Adult and Pediatric Outpatient Procedures FAQs

- 3. What 12-month reporting period should be used when reporting on this section?**

When responding to the questions in Section 9D, hospitals should enter the month in which they complete their observational in-person or retrospective EHR review audits. If your hospital does not perform an audit, enter the month in which you are completing the Survey.

- 4. Does the safe surgery checklist referenced in Section 9D questions #1-9 apply to all procedures, including colonoscopies, endoscopies, etc.?**

Yes, it applies to all procedures in Section 9C questions #2-10. If your hospital outpatient department(s) do not utilize a safe surgery checklist for colonoscopy and/or endoscopy, respond “No” to question #2.

- 5. Can different elements of the “Before the induction of anesthesia” checklist (question #3) be performed in different places?**

Yes, hospitals may perform some elements of the pre-anesthesia checklist outside of the operating room. Hospitals may read aloud the following elements in a pre-procedure (preop) area: Patient ID, Confirmation of procedure, Patient consent, Site marked, if applicable, and Allergies assessed.

Hospitals should not remove conversation prompts as it is harmful to the purpose of the checklist and should continue debriefing and requiring participation of the surgical team members in key moments.

- 6. Do we need to perform a “clinical team introduction” if the team already knows each other and/or will be in the operating room together all day?**

Yes. Even if a clinical team knows each other they must perform an introduction stating their name and role at the first procedure of the day. They do not need to reintroduce themselves for the remaining procedures but should confirm everyone was introduced beforehand. However, if any team members change between operations, introductions must be performed again.

- 7. Do the Safe Surgery Checklist components included in questions #3, #4, and #5 need to be in one document that would align with the WHO example or can they be in different documents (i.e., pre-anesthesia notes, surgeon H&P, and pre-surgical checklists, etc.)?**

It is possible to have separate checklists for each phase of the surgical procedure (i.e., before the induction of anesthesia, before the skin incision and/or before the procedure begins, and before the patient leaves the operating or procedure room). However, each individual component included in questions #3, #4, and #5 should be listed on the checklist(s) and hospitals should document whether the components were read aloud at the appropriate time with the appropriate members of the surgical team present.

- 8. How is “whole surgical team” defined?**

“Whole surgical team” is comprised of the surgeons, anesthesia professionals, nurses, technicians, and other operating room personnel involved in surgery. This is based off the World Alliance for Patient Safety Implementation Manual Surgical Safety Checklist (First Edition).

Medication Safety for Outpatient Procedures Measure Specifications

Important Note: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#).

Source: The Leapfrog Group

Reporting Period: 12 months

- Surveys submitted prior to September 1:
 - 01/01/2024 – 12/31/2024
- Surveys (re)submitted on or after September 1:
 - 07/01/2024 – 06/30/2025

Medication Safety Documentation Workbook (Excel)

To complete the data collection for this subsection and respond to questions #3-7, hospitals should download the Medication Safety Documentation Workbook (Excel). This workbook includes seven tabs: Instructions, 2024 Sampling, 2025 Sampling, Home Meds, Visit Meds, Allergies, and Data Entry and can be used to identify patients to sample in order to complete the three clinical record audits, as well as calculate the responses to enter into the Online Hospital Survey Tool for each of the audits.

This workbook is available on the [Survey Materials webpage](#) and should be used when completing this subsection.

Sampling:***For hospitals with one hospital outpatient department that performs the procedures listed in Section 9C:***

If you have more than 30 cases that meet the criteria for inclusion in the denominator of the process measures during the time period of the clinical record audit, you may randomly sample 30 of them for the denominator of each documentation guideline, and measure and report adherence based on that sample. When sampling from a larger population of cases, this is the minimum number of cases needed to make a statistically reliable statement of percent adherence to the process guidelines.

For hospitals with multiple hospital outpatient departments that perform the procedures listed in Section 9C:

If you have more than 30 cases total (across all hospital outpatient departments) that meet the criteria for inclusion in the denominator of the process measure during the time period of the clinical record audit, you may randomly sample a minimum of 10 cases from the hospital (including any co-located hospital outpatient departments or inpatient areas performing outpatient procedures) and each free-standing hospital outpatient department or surgery center. Hospitals will need to report on a total minimum sample size of at least 30, and measure and report adherence based on that sample. When sampling from a larger population of cases, this is the minimum number of cases needed to make a statistically reliable statement of percent adherence to the process guidelines.

For example, if you are reporting on your hospital (including multiple areas where outpatient procedures are performed), as well as another hospital outpatient department that is free-standing, you could sample 15 cases from each for a total sample size of 30. If you are reporting on seven locations, you could sample 10 cases from each for a total sample size of 70.

Note: Hospitals that share a CMS Certification Number (CCN) with other hospitals may use the same sample for reporting on a shared hospital outpatient department location (e.g., surgery center, endoscopy center, free-standing hospital outpatient department, etc.). For example, Hospital A and Hospital B share a CCN and both refer patients to the same gastroenterology center. Hospital A samples 15 cases from their hospital and 15 cases from the gastroenterology center. Hospital B can use the sample of 15 cases from the gastroenterology center in addition to sampling from their hospital when reporting on their own Leapfrog Hospital Survey.

Medications: For the purposes of this measure, a **medication** is a substance that is taken into, or placed onto, the body of a person for one or more of the following reasons:

- as a placebo
- to prevent a disease (e.g., flu vaccine)
- to make a diagnosis (e.g., contrast dye)
- to test for the possibility of an adverse effect
- to modify a physiological, biochemical or anatomical function or abnormality (e.g., heparin/heparin flushes, statins, antihypertensives, etc.)
- to replace a missing factor (e.g., blood product)
- to ameliorate a symptom (e.g., aspirin)
- to treat a disease or condition (including topicals, nasal sprays, eye drops, compounds, inhalants, injectables, patches, etc.)
- to induce anesthesia
- to stabilize or hydrate during medical treatment or procedures (e.g., IV fluids, normal saline, lactated ringers, etc.)
- to provide nutrition (e.g., enteral nutrition products, parenteral nutrition products, breast milk [breast milk applies to BCMA measure only])
- as a supplement (e.g., iron for a patient with iron deficiency anemia or calcium/vitamin D for a patient with osteoporosis)

For the purposes of this measure, the following are **not** considered medications:

- Pre-filled saline flushes and pre-filled heparin flushes (i.e., saline and heparin flushes that come from the manufacturer already filled and are not filled by the hospital's pharmacy)
- Chlorhexidine and alcohol preparation pads
- Intra-op irrigation solutions

Question #3 (denominator): Number of cases measured (either all cases or a sufficient sample of them).

Your hospital should perform a clinical record audit of either all adult and/or pediatric patients undergoing those procedures included in Section 9C discharged during the reporting period or a sufficient sample of those patients discharged during the reporting period as described above.

This audit of clinical records can be done retrospectively (anytime during the Survey Cycle of April 1 – November 30).

The total number of clinical records included in your audit is reported in question #3.

Excluded cases: Patients discharged from the hospital outpatient departments without having one of the procedures included in Section 9C performed during the reporting period.

Question #4 (numerator): Number of cases in question #3 with a list of **all home medication(s)**, including dose, route, and frequency, documented in the clinical record.

Determine the total number of clinical records included in the audit (in question #3), where a list of all home medication(s), including dose, route, and frequency, was documented in the clinical record either on the day of the procedure or after a pre-screening phone call (i.e., 1-2 days in advance of the procedure). Records that include documentation that the patient had no home medications should be included.

"Home medications" are defined as medications that the patient was taking prior to admission.

The following home medications may be excluded from the clinical record unless they are clinically relevant* (e.g., herbal supplement that is known to interact with anesthesia):

- as needed (PRN) medications
- topical lotions/creams
- saline nasal spray and artificial tear eye drops
- herbals and supplements and vitamins

- medications prescribed for the purpose of operative prep prior to colonoscopy

Home medications that must be included in the clinical record include clinically relevant* PRN medications such as inhalers, nitroglycerin, analgesics (opioid and non-opioid), muscle relaxants, and sedatives.

**Clinically relevant is defined as any PRN medication that treats a medical condition on the patient's problem list and/or condition they are being treated for during the visit (i.e., reason for the hospital stay).*

Included cases:

- The clinical record includes documentation that the patient has no home medications.

Excluded cases:

- The clinical record is missing a list of all home medication(s).
- The clinical record is missing dose, route, or frequency for a home medication

Question #5 (numerator): Number of cases in question #3 with a list of **all medication(s) administered during the visit and new medications prescribed at discharge**, including the strength, dose, route, date, and time of administration, documented in the clinical record.

Determine the total number of clinical records included in the audit (question #3), where a list of all medication(s) administered during the visit and new medications prescribed at discharge, including the strength, dose, route, date, and time of administration, was documented in the clinical record on the day of the procedure.

Local, regional, and general anesthesia medications must only have **total dose, date, and time of administration** documented in the clinical record to be considered complete.

IV solutions must have **strength, dose, route, date, and time of administration** documented in the clinical record to be considered complete. However, if the IV solution only comes in one concentration/strength (such as the LR Injection), the strength can be entered as N/A and the start time and volume of the bag can be documented for dose in order to be considered complete.

New medications prescribed at discharge, but not administered at the hospital must only have **strength, dose, route, and date the medication was prescribed** documented in the clinical record to be considered complete.

Excluded cases:

- The clinical record is missing a medication that was administered or prescribed during the visit or at discharge.
- The clinical record is missing strength, dose, route, date, or time of administration for a medication administered or prescribed during the visit or at discharge except as described above for anesthesia medications, IV solutions, and prescribed medications.
- The clinical record is missing dose for lidocaine jelly.

Question #6 (numerator): Number of cases in question #3 with a list of **all medication allergies and adverse reaction(s)** documented in the clinical record.

Determine the total number of clinical records included in the audit (question #3), where a list of all medication allergies and adverse reaction(s) was documented in the clinical record. Hospitals should only assess medication allergies (i.e., hospitals do not need to assess food or environmental allergies).

Included cases:

- The clinical record includes documentation that the patient reported no known allergies.

Excluded cases:

- The clinical record does **not** include either a list of allergies and adverse reaction(s) nor documentation of no known allergies.

- The clinical record does include a list of allergies but does not include documentation of the adverse reaction(s) for each allergy.

Important Note: In addressing allergies and adverse reaction statuses noted as “unknown” in the clinical record, hospitals should assess if:

- “unknown” is used to indicate that the patient (or patient’s family) was asked for the adverse reaction status, but they indicated it was not known, in which situation the case should be included in the numerator (question #6); or
- “unknown” is used in the clinical record to indicate that the information is not available because it was not requested or documented by the clinician, in which situation the case should be excluded from the numerator (question #6)

See [FAQs](#) for additional information about responding to questions in this section.

Medication Safety for Outpatient Procedures Frequently Asked Questions (FAQs)

1. How often do home medications need to be updated in the clinical record for Section 9E question #4?

Home medications must be recorded in a pre-screening phone call 1-2 days in advance of the procedure or updated on the day of the clinical procedure (for all procedures included in Section 9C of the 2024 Leapfrog Hospital Survey).

Patients who are returning for a second or follow-up procedure within 12 months of the initial procedure are not required to have an updated home medication list in their clinical record in order for the record to be counted in the numerator of the home medication audit (i.e., included in the count in question #4). However, in cases of frequent repeated clinical visits, the home medications list should be updated at least once every 12 months.

2. For medications that only ever have a single route of administration (e.g., orally only), does route have to be documented in the clinical record for questions #4 and #5?

No. If there is a medication that can only ever be given via a single route, route does not have to be documented to count the case when responding to questions #4 and #5.

3. We do medication reconciliation on patients for certain outpatient procedures. Will the medication reconciliation on the procedure day suffice for the "medication audits" requirement in question #4? Or does it have to be a retrospective audit after the procedure day?

Leapfrog specifies that, unless all medical records are audited, the clinical record audit should be conducted on a random sample of discharged patients. If your hospital does not perform medication reconciliation before all patients are discharged to ensure that the correct dose, route, and frequency are documented in the clinical record for all home medications this would not meet the requirements of Section 9E.

Instead, your hospital should randomly sample from all clinical records of discharged outpatients (adults and children) who had the procedures included in Section 9C during the reporting period, not just those records that had medication reconciliation conducted during the same day visit. This audit may occur on the same day as the patient visit or following patient discharge.

Patient Experience (OAS CAHPS) Measure Specifications

Important Note: Hospitals that share a CMS Certification Number are required to report by facility. Please carefully review [Leapfrog's Multi-Campus Reporting Policy](#)

Source: Developed by Centers for Medicare and Medicaid Services (CMS) using Agency for Healthcare Quality and Research (AHRQ) guidelines. More information available at <https://oascahps.org/General-Information/About-OAS-CAHPS-Survey>.

Reporting Period: The latest 12-month period prior to the submission of this section of the Survey. Hospitals can elect to use either survey return date or discharge date to pull reports for this measure.

This section of the Survey asks hospitals about their results from the OAS CAHPS Survey. The first several questions are designed to learn more about the current administration of the survey. The last four questions collect the Top Box Score⁵² for each of the following four domains:

- Facilities and Staff
- Communication About Your Procedure
- Patient's Rating of the Facility
- Patients Recommending the Facility

Hospitals using Press Ganey, NRC, or PRC to administer the OAS CAHPS Survey can use the CMS OAS CAHPS crosswalk below to ensure they are reporting on the correct domains. The crosswalk is designed to help translate the standard vendor report to the CMS domains used in questions #7-10.

CMS OAS CAHPS Crosswalk

CMS Domain Name	Press Ganey Domain Name	NRC Domain Name	PRC Domain Name
Facilities and Staff	Facility/Personal Treatment	About Facilities and Staff	Facility and Staff
Communication About Your Procedure	Communication	Communications About Your Procedure	Communication
Patient's Rating of the Facility	Facility Rating 0-10	Overall Rating of Facility	Overall Facility Rating
Patients Recommending the Facility	Recommend the Facility	Would Recommend Facility	Would Recommend

Question #2: Did your hospital have at least 300 eligible discharges⁵⁶ during the 12-month reporting period?

This section of the Survey is designed for hospitals that discharged at least 300 eligible patients during the reporting period. Hospitals that discharged fewer than 300 eligible patients should respond "no," skip the rest of the questions, and move on to the Affirmation of Accuracy.

Eligible discharges include discharges for adult patients (ages 18 years and older) who had both medically and non-medically necessary outpatient surgeries and/or procedures. A detailed description of patient sampling criteria, including a list of OAS CAHPS-eligible surgeries and procedures, is available in the Protocols and Guidelines Manual, version 9.0 at <https://oascahps.org/Survey-Materials>.

Question #3: Has your hospital administered, or started to administer, the entire OAS CAHPS Survey, during the reporting period?

The OAS CAHPS survey includes questions about patients' experiences with their preparation for the surgery or procedure, check-in processes, cleanliness of the facility, communications with the facility staff, discharge from the facility, and preparation for recovering at home. The survey also includes questions about whether patients received information about what to do if they had possible side effects during their recovery. OAS CAHPS is designed to be national in scope and requires standardized administration protocols.

If your hospital shares a CMS Certification Number (CCN) with another hospital that administers the OAS CAHPS survey, only include results from hospital outpatient departments used to report on Section 9: Outpatient Procedures.

Question #4: Total number of months in which your hospital administered the OAS CAHPS Survey during the reporting period.

It is recommended that hospitals (or their survey vendor) sample over a 12-month period and ensure an even distribution of patients is sampled over the 12-month period. However, Leapfrog will accept OAS CAHPS results from hospitals that have administered the survey over a period of time less than 12 months if they have at least 100 returned surveys.

Question #5: Total number of returned surveys during the reporting period.

It is recommended that hospitals (or their survey vendor) administer the survey to a large enough sample in order to achieve 300 returned surveys in a 12-month reporting period. However, Leapfrog will accept OAS CAHPS results from hospitals that have at least 100 returned surveys. All returned surveys from eligible patient discharges, regardless of completeness and date of return, should be included.

Question #6: Do the responses to the questions in this subsection include discharges from more than one location (e.g., hospital and surgery center or free-standing hospital outpatient department, hospital and multiple free-standing hospital outpatient departments, etc.)?

Indicate "yes" if your OAS CAHPS results include eligible patient discharges from multiple locations (e.g., hospital and surgery center or free-standing hospital outpatient department, hospital and multiple free-standing hospital outpatient departments, etc.). Otherwise indicate "no."

Questions #7-10: In questions #7-10, report your hospital's Top Box Score⁵² (rounded to the nearest whole number) from each of the following patient experience domains from your 12-month vendor report that matches the reporting period selected in question #1. Hospitals should not use domain scores that are publicly reported on the CMS Hospital Compare [website](#) as these scores have been risk adjusted. Hospitals should report results from all hospital outpatient departments.

These four questions capture the Top Box Score for each of the four domains of patient experience: facilities and staff, communication about your procedure, patients' rating of the facility, and patients recommending the facility.

The following questions from the OAS CAHPS Survey are included in each domain:

Facilities and Staff

Q3: Did the check-in process run smoothly?

Q4: Was the facility clean?

Q5: Were the clerks and receptionists at the facility as helpful as you thought they should be?

Q6: Did the clerks and receptionists at the facility treat you with courtesy and respect?

Q7: Did the doctors and nurses treat you with courtesy and respect?

Q8: Did the doctors and nurses make sure you were as comfortable as possible?

Communication About Your Procedure

Q1: Before your procedure, did your doctor or anyone from the facility give you all the information you needed about your procedure?

Q2: Before your procedure, did your doctor or anyone from the facility give you easy to understand instructions about getting ready for your procedure?

Q9: Did the doctors and nurses explain your procedure in a way that was easy to understand?

Q10: Anesthesia is something that would make you feel sleepy or go to sleep during your procedure. Were you given anesthesia?

Q11: (If 'Yes' to Q10) Did your doctor or anyone from the facility explain the process of giving anesthesia in a way that was easy to understand?

Q12: (If 'Yes' to Q10) Did your doctor or anyone from the facility explain the possible side effects of the anesthesia in a way that was easy to understand?

Patients' Rating of the Facility

Q23: Using any number from 0 to 10, where 0 is the worst facility possible and 10 is the best facility possible, what number would you use to rate this facility?

Patients Recommending the Facility

Q24: Would you recommend this facility to your friends and family?

Please note that question numbers are taken from the OAS CAHPS Survey, which you can download at <https://oascahps.org/Survey-Materials>.

See [FAQs](#) for additional information about responding to questions in this section.

Patient Experience (OAS CAHPS) Frequently Asked Questions (FAQs)

- 1) We share a CMS Certification Number (CCN) with another hospital that participates in the OAS CAHPS Survey. How can we report on results from the OAS CAHPS Survey that are specific to our outpatient department?**

While OAS CAHPS results are reported to CMS using a single CMS Certification Number, hospitals with more than one location (i.e., components, strata) must specify to their vendor where eligible surgeries occurred, so the vendor can properly sample patients. Vendors have the ability to provide OAS CAHPS results for a particular set of locations upon request. Hospitals should report results to Leapfrog from only those components included in their Section 9 responses.

- 2) Isn't 300 returned surveys the minimum sample size recommended by CMS?**

Yes, however, Leapfrog has received feedback that many hospitals and ambulatory surgery centers have only recently started to administer the survey. In order to ensure as many hospitals and ambulatory surgery centers as possible are able to report on this subsection, we have reduced the minimum sample size for reporting results to the Leapfrog Hospital and ASC Surveys to 100 returned surveys. This will help ensure that hospitals and ASCs that have made the investment to administer the Survey are able to earn credit for doing so. Additionally, this minimum sample size aligns with Section 8A of the Leapfrog Hospital Survey, which asks about the CAHPS Child Hospital Survey, and with the CMS requirement for the CAHPS Child Hospital Survey.

If possible, however, it is recommended that hospitals (or their survey vendor) administer the survey to a large enough sample in order to achieve 300 returned surveys in a 12-month reporting period.

- 3) We administer our own patient experience survey to collect specific information about our patient's experience. Can we report the results from our hospital's patient experience survey?**

No, hospitals can only report the results of the official OAS CAHPS Survey on Section 9F of the Leapfrog Hospital Survey.

However, according to the OAS CAHPS Protocols and Guidelines Manual, survey vendors and ASCs/HOPDs may choose to add up to 15 supplemental questions after the 'core' OAS CAHPS Survey questions that are personalized to the hospital/vendor. More information on these supplemental questions, including restrictions and required approval, may be reviewed on pages 20-22 of the CMS OAS CAHPS Survey Protocols and Guidelines Manual, which is available for download here: <https://oascahps.org/Survey-Materials>. Please note, the responses to these supplemental questions will not be reported on the Leapfrog Hospital Survey.

Endnotes

¹ **Acute-Care Units**

Include units used for short-term, acute-care medical, surgical, medical/surgical (including telemetry), as well as obstetrical, intensive, and step-down/progressive care.

Exclude units used for short and long-term psychiatric care, rehabilitation, observation, or sub-acute care (e.g., skilled nursing facility, hospice extended care, sub-acute eating disorder treatment, extended care facility, or residential substance abuse treatment), and swing bed units.

² **CMS Certification Number (CCN)**

A CMS Certification Number (CCN) is issued by the Centers for Medicare and Medicaid Services (CMS) to financial reporting entities, which may be individual hospitals or a group of hospitals, for the purpose of reimbursement. While Leapfrog does ask each campus of a multi-hospital system to submit an individual Survey, hospitals within the system may be assigned the same CMS Certification Number and therefore should have the same CCN reported in this field. CCNs are six digits; with the first two digits representing the state in which the hospital is located. Hospitals that do not receive Medicare reimbursement may not have a CMS Certification Number and should not have a CCN reported in this field. Leapfrog pre-populates this field in the Online Hospital Survey Tool. If the hospital's CCN is different from the one shown online, please contact the [Help Desk](#).

³ **National Health Safety Network (NHSN) ID**

A NHSN ID is issued by the Centers for Disease Control and Prevention and is used as a unique identifier for facilities participating in NHSN surveillance activities. Each hospital within a system, even if they share a CCN, must report separately to NHSN and should have their own NHSN ID if they are located separately. Please see the NHSN instructions available at <http://www.leapfroggroup.org/survey-materials/join-nhsn>. NHSN IDs are five digits. Leapfrog pre-populates this field in the Online Hospital Survey Tool for hospitals that provided a valid NHSN ID, joined our NHSN Group, and submitted the 2024 Leapfrog Hospital Survey. If the hospital NHSN ID is different from the one shown online, please update accordingly.

In order to be scored and publicly reported for any of the five applicable infection measures and to have the hospital's teaching status represented, hospitals must: (1) provide an accurate NHSN ID in the Profile, (2) join Leapfrog's NHSN Group by the appropriate [deadline](#), and (3) submit the 2025 Leapfrog Hospital Survey by the appropriate [deadline](#).

⁴ **Vermont Oxford Network (VON) Transfer Code**

A Vermont Oxford Network (VON) Transfer Code is issued by the Vermont Oxford Network and is used as a unique identifier for hospitals reporting data through the VON Nightingale Internet Reporting System. Each hospital has their own VON Transfer Code, which can be found at <https://public.vtoxford.org/transfer-codes/>. VON Transfer Codes are four, five, or seven digits. Leapfrog pre-populates this field in the Online Hospital Survey Tool Profile for hospitals that provided a valid VON Transfer Code in 2024. If the hospital's VON Transfer Code is different from the one shown online, please update accordingly.

⁵ **Federal Tax Identification Number (TIN)**

Enter the TIN that your hospital uses for billing purposes. *The number is a nine-digit number (e.g., 098765432) and must conform precisely to this format – be sure to enter any leading 0.* If your hospital has more than one TIN, use the one that would most typically be used for UB-04 claims filed with commercial health insurance plans for inpatient hospital stays.

⁶ National Provider Identifier (NPI)

The NPI is a Health Insurance Portability and Accountability Act (HIPAA) Administrative Simplification Standard. The NPI is a unique identification number of covered health care providers. The NPI is a 10-position, intelligence-free numeric identifier (10-digit number). This means that the numbers do not carry other information about healthcare providers, such as the state in which they live or medical specialty. Leapfrog pre-populates this field in the Online Hospital Survey Tool. If the hospital's NPI is different from the one shown online, please contact the [Help Desk](#).

⁷ State

Your hospital is assigned to a state based on the CMS Certification Number assigned (or identifier specially issued by the Leapfrog Help Desk) to your hospital. If your hospital is incorrectly assigned to a state, contact the [Help Desk](#) to resolve the discrepancy.

⁸ Tips for Entering Web Addresses

This address becomes the link attached to your hospital's name in the public release of Survey Results. Enter it exactly as you wish it to be and test it.

- Do not exit out of the Online Hospital Survey Tool to go to the Web page of interest while you are entering data into the Survey or some of your Survey entries may be lost.
- Instead, minimize (but don't close) the Survey window and any other windows that are open, then open your internet browser in a separate window. Find the Web page whose address you wish to enter and Copy/Paste the entire address into the Survey entry. **The http:// prefix needs to be included.**
- If entering the Web page address manually, be careful to type it correctly, without embedded spaces. Forward (/) or backward (\) slashes may be used. Don't forget the "www." if that is part of the address. **The http:// prefix needs to be included.**
- Make sure to use .org, rather than .com, if that's the domain for your hospital's website.
- Although many hospitals elect to enter the address for the home page of their hospital website, consider pointing it to a page specific to patient safety, the Leapfrog safety practices, or other quality improvement activities that you want to communicate to your community.

⁹ Healthcare System or Integrated Delivery Network

Healthcare Systems or Integrated Delivery Networks (IDN) are central organizations that own, lease, or sponsor two or more hospitals with the goal of providing coordinated patient care. Pediatric, specialty, and rehabilitation hospitals are included as hospitals in this definition. IDNs may belong to a larger parent system. Leapfrog pre-populates this field in the Online Hospital Survey Tool and only uses the field internally (e.g., it will not be shared publicly). If the IDN displayed in the Online Survey Tool is incorrect, please contact the [Help Desk](#).

¹⁰ Licensed Acute-Care Beds

If your state does not license bed types or if acute-care beds are currently staffed higher than the number of licensed beds, enter the number of staffed beds from question #3. If the number of licensed beds has changed in the last year, indicate the average or other number most representative of your operating bed capacity over the last year.

Include short-term, acute-care medical, surgical, medical/surgical (including telemetry), obstetrical, and intensive care beds, as well as step-down/progressive care beds as licensed by your state.

Exclude beds licensed or used for short and long-term psychiatric care, rehabilitation, observation, or sub-acute care (e.g., skilled nursing facility, hospice extended care, sub-acute eating disorder treatment, extended care facility, or residential substance abuse treatment) and swing beds.

¹¹ Staffed Acute-Care Beds

Include licensed beds regularly in operation, whether currently occupied by a patient or not. If the number has changed over the last year, indicate the average or other number most representative of your operating bed capacity over the last year.

¹² Total Adult Acute-Care Admissions

Include adult (aged 18 years and older) acute-care medical, surgical, and medical/surgical (including telemetry), obstetrical, and intensive care admissions. Include transfers from other hospitals. Include admissions directly to an ICU, even if counted in question #9. Include admissions to step-down/progressive units.

Exclude short and long-term psychiatric care, rehabilitation, observation, or sub-acute care (e.g., skilled nursing facility, hospice extended care, sub-acute eating disorder treatment, extended care facility, or residential substance abuse treatment) admissions and admissions to swing units.

¹³ Total Pediatric Acute-Care Admissions

Include pediatric (ages 17 years and younger) acute-care medical, surgical, medical/surgical (including telemetry), and intensive care admissions. Include transfers from other hospitals. Include admissions directly to an ICU or neonatal ICU (NICU), even if counted in question #10 or #13. Include admissions to step-down/progressive units.

Exclude newborn admissions to the nursery and pediatric patients admitted for maternity care, short and long-term psychiatric care, rehabilitation, observation, or sub-acute care (e.g., skilled nursing facility, hospice extended care, sub-acute eating disorder treatment, extended care facility, or residential substance abuse treatment) and admissions to swing units. Exclude admissions for patients that were transferred to another facility.

¹⁴ General Medical, Surgical, Medical/Surgical, and Neuro ICUs

Include general medical, surgical, medical/surgical, and neuro ICUs (medical and surgical). Exclude ICUs “dedicated exclusively” to patients with specialized conditions (e.g., cardiac, burn, trauma, neonatal, etc.) unless the same ICU is used for both specialized intensive care patients as well as general medical, surgical, medical/surgical, or neuro intensive care patients. “Dedicated exclusively” means that general medical, surgical, medical/surgical, or neuro intensive care patients are not also cared for in these specialized units (except in rare overflow situations). Exclude intermediate care or telemetry/step-down/progressive units.

For the purposes of reporting on adult and pediatric ICU admissions in Section 1A: Basic Hospital Information questions #9 and #10, include admissions to general medical, surgical, medical/surgical, and neuro ICUs (medical and surgical), whether directly admitted to the unit or transferred to the unit from another area of your hospital (e.g., post-operatively). Include transfers from other hospitals as admissions to your hospital. Include the number of admissions that include an ICU stay, not the number of patient trips to the ICU.

¹⁵ Licensed ICU Beds

If your state separately designates ICU beds, indicate the number of licensed beds in adult and pediatric general medical, surgical, medical/surgical, and neuro ICUs (medical and surgical). If your state does not license ICU beds or if the number of staffed ICU beds is currently higher than the number of licensed ICU beds, enter the number of staffed ICU beds from question #8. See endnote #14 for more information.

Exclude beds “dedicated exclusively” to patients with specialized conditions (e.g., cardiac, burn, trauma, neonatal). “Dedicated exclusively” means that general medical, surgical, medical/surgical, or neuro intensive care patients are not also cared for in these specialized units (except in rare overflow situations). Exclude beds used for step-down/progressive care.

¹⁶ Staffed ICU Beds

Indicate the number of ICU beds from question #7 that are regularly in operation, whether currently occupied by a patient or not. If the number has changed over the last year, indicate the average or other number most representative of your operating ICU capacity over the last year. See endnote #14 for more information.

¹⁷ Neonatal ICUs

Include any level neonatal ICU (NICU), i.e., Level II/III, Level III, or Level IV. Exclude neonatal nurseries (Level I and Level II). For more information about what is considered a NICU, please refer to the CDC's definitions of Neonatal Units on p. 15-12 to 15-15 of the following document:

http://www.cdc.gov/nhsn/PDFs/pscManual/15LocationsDescriptions_current.pdf.

For the purposes of reporting on NICU admissions in Section 1A: Basic Hospital Information question #13, include admissions to any level NICU, even if counted in question #5. Include transfers from other hospitals as admissions to your hospital. Exclude admissions for patients that were transferred to another facility.

¹⁸ CPOE Linked to Pharmacy, Laboratory, ADT Information

The ability of a CPOE system to catch the majority of common, serious prescribing errors depends on proper identification of patients (ADT information), current and recent pharmacy orders and drug dispensing history, and access and integration of key laboratory results for the patient. CPOE systems that are not linked to those other systems or do not reflect that current information accurately about the patient are not likely to catch serious prescribing errors.

¹⁹ Medical, Surgical, and Medical/Surgical Units

An exact definition on which units would be included in general medical, surgical, or medical/surgical cannot be provided because each hospital is laid out differently. For information about what is considered a general medical, surgical, or medical/surgical unit, please refer to the CDC's definitions of Medical Ward, Medical/Surgical Ward, and Surgical Ward on p. 15-17 to 15-20 of the following document: http://www.cdc.gov/nhsn/PDFs/pscManual/15LocationsDescriptions_current.pdf. The flowchart on p. 15-3 can also be used to help define units in your hospital. Units for patients from a specific service type (e.g., burn, cardiac) and observation units must be excluded. Include telemetry units (defined on p. 15-20 of the above referenced document).

For the purposes of reporting on Sections 2C: BCMA and 6C: Hand Hygiene, include both single and mixed acuity medical, surgical, medical/surgical, and telemetry units, as well as step-down/progressive beds in a dedicated medical, surgical, or medical/surgical unit.

For the purposes of reporting on Section 5C: Nursing Workforce, hospitals must reference the unit definitions and acuity definitions in the measure specifications.

²⁰ Step-down/Progressive Units

A single acuity unit in which at least 90% of the patients are at a lower level of acuity than patients in a critical care unit, yet at a higher level of acuity than that which is provided in a general care unit. These units may be called progressive care, intermediate care, direct observation, or transitional care units. Telemetry alone is not an indicator of acuity level. To classify as a step-down unit, the telemetry patients must require a higher level of nursing intensity than is available on medical, surgical, and medical/surgical units.

²¹ Labor and Delivery Units

Include all antepartum and postpartum units. Nursery units, OR units, and procedural areas must be excluded.

22 Pre-Operative or Post-Anesthesia Care Units

For reporting on Section 2C: BCMA include all pre-operative and post-anesthesia care units (PACUs) located in or co-located with your hospital. For reporting on Section 6C: Hand Hygiene, include all pre-operative and post-anesthesia care units (PACUs) located in or co-located with your hospital, as well as those located in free-standing hospital outpatient departments that perform the outpatient procedures listed in Section 9: Outpatient Procedures and that share your hospital's license or CMS Certification Number. This includes combined pre-operative and post-anesthesia care units as well. If the hospital distinguishes between post-anesthesia phases within its PACU(s) (i.e., Phase I, Phase II, and Phase III recovery), all phases must be included when reporting.

Pre-operative units include areas where patients are prepared for an inpatient or outpatient surgical or diagnostic procedure, (i.e., where patients have their medical histories reviewed with their care team and receive physical examinations to determine risk factors and other information relevant to the surgery or procedure).

PACUs include areas where patients are watched after an inpatient or outpatient surgical or diagnostic procedure that required anesthesia or sedation and where hospital staff (e.g., nurses, anesthesiologists, and other support services) monitor patient recovery from anesthesia or sedation by keeping track of vitals and providing pain management.

23 Certified Pharmacy Technician

A certified pharmacy technician would include a pharmacy technician that has earned either the ASHP Medication History-Taking Certificate or the Pharmacy Technicians Certification Board's (PTCB) Medication History Certificate.

24 Sampling for Medication Reconciliation

The sample must contain at least 30 patients from a 6-month reporting period. Sampling is limited to medical, medical/surgical units and step-down/progressive units (adult only). Patients that were discharged or expired before the Gold Standard Medication History could be obtained must be excluded from the sample. Patients that do not have discharge orders written during the reporting period must also be excluded from the sample. A sampling worksheet is available in the Medication Reconciliation Workbook for those who would like assistance in obtaining a random sample of patients.

25 Gold Standard Medication History

The Gold Standard Medication History is the list of medications that the patient was taking prior to admission. Within 24 hours after admission, a trained pharmacist, pharmacy resident, or certified pharmacy technician must interview each patient selected for the 6-month sample and obtain the Gold Standard Medication History. Note that this is in addition to, and separate from, any pre-admission medication list that was created as part of normal care. Best practices for collecting the Gold Standard Medication History can be found in the "Other Supporting Materials" for Section 2 on our website.

26 Discrepancies in Gold Standard Medications

For each Gold Standard Medication, there may be up to two unintentional discrepancies: a discrepancy in admission orders and a discrepancy in discharge orders. For example, if a medication on the Gold Standard Medication History is ordered for a patient on admission with the incorrect dose, this counts as one discrepancy. If this medication is ordered on discharge for the same incorrect dose, this counts as a second discrepancy. The number of unintentional discrepancies is a count of medication orders where an unintentional discrepancy occurred. You should not count the number of errors associated with the same medication order (e.g., a discrepancy in the dose and frequency in the same medication in admission orders counts as one discrepancy).

27 Unintentionally Ordered Additional Medications

Count medications where a patient was not taking (and was not supposed to be taking) a certain medication, but the medical team incorrectly thought the patient was taking the medication and therefore ordered it on admission and/or discharge. Count each medication once, regardless of whether it was ordered on admission, discharge, or both.

28 Discrepancies Due to Unintentionally Ordered Additional Medications

For each unintentionally ordered additional medication, there may be up to two discrepancies: unintentionally ordered at admission, unintentionally ordered at discharge, or both. For example, if a medication is unintentionally ordered at admission, then this counts as one discrepancy. If the same medication is also ordered at discharge, then this counts as a second discrepancy.

29 Data Completeness Requirement for the STS Mitral Valve Repair/Replacement (MVRR) Composite Score

Participants are excluded from the analysis if they have fewer than 36 isolated MVRR procedures in the patient population. Please find more information in the NQF-endorsed measure specifications, available at <https://www.sts.org/quality-safety/performance-measures/descriptions#MVRRComposite>.

30 High-Risk Deliveries Electively Admitted

Includes deliveries with:

- expected birth weight <1500 grams; or
- gestational age at least 22 weeks but <32 weeks.

Not all women at risk for delivery of babies with these conditions are known beforehand to be at risk. Therefore, deliveries in which these high-risk conditions were unknown prior to admission are not considered electively admitted high-risk deliveries.

If your hospital admits deliveries where these conditions are known prior to admission, then your hospital electively admits high-risk deliveries and you must answer "yes" to question #1; otherwise, answer "no."

31 Co-located

A location within "immediate physical proximity" of the hospital would be considered a co-located location or unit, e.g., a co-located neonatal ICU (NICU) or co-located hospital outpatient location. "Immediate physical proximity" means the two locations must be physically connected, either by a tunnel, an enclosed bridge, or the locations abut each other so that the hallways readily connect.

32 Very low birth weight babies

Complicated newborns are those infants with a birth weight <1500 grams. If your hospital has a neonatal ICU (or is co-located with a hospital that has a neonatal ICU) that admits or accepts transfers of neonates with these conditions, you must answer "yes" to question #2.

33 VON's Death or Morbidity Measure

This measure is collected and calculated by the Vermont Oxford Network and includes patients who have died or are known to have one or more of the following: severe intraventricular hemorrhage (SIVH); chronic lung disease (CLD); necrotizing enterocolitis (NEC); pneumothorax; any late infection (bacterial, fungal, or coagulase negative staph); or cystic periventricular leukomalacia (PVL).

34 All Critical Care Patients

"All critical care patients" means all general medical, surgical, medical/surgical, and neuro ICU patients including critical care patients in mixed acuity units.

³⁵ Managed or Co-Managed

The intensivist, when present (whether on-site or via telemedicine), is authorized to diagnose, treat, and write orders for a patient in the ICU on the intensivist's own authority. Examples of co-management include, but are not limited to, communication on patient status between the intensivist and hospitalist on a daily basis, intensivists co-develop care plans for all ICU patients, etc. Mandatory consults or daily rounds by an intensivist are not sufficient to meet the managed/co-managed requirement. However, an ICU need not be closed to meet this requirement.

³⁶ Certified in Critical Care Medicine

A physician who is "certified in Critical Care Medicine" is a board-certified physician who is additionally certified in the subspecialty of Critical Care Medicine. Certification in Critical Care Medicine is awarded by the American Boards of Internal Medicine, Surgery, Anesthesiology, Pediatrics, and Emergency Medicine, as well as the American Osteopathic Board (AOS).

"Neurointensivists" include any physician that meets at least one of the following paths:

- Physicians who are board-certified in their primary specialty and who are additionally certified in the subspecialty of Neurocritical Care Medicine. Certification in Neurocritical Care Medicine is awarded by the United Council for Neurologic Subspecialties (UCNS) or by the American Board of Psychiatry and Neurology, Inc. (ABPN). Physicians who have not yet passed a certifying exam, either through UCNS or ABPN, are considered to be equivalent to a physician "certified in Neurocritical Care Medicine" for up to 3 years after they are eligible to take either: (1) the UCNS exam (UCNS currently offers a "grandfathering" option for their "Practice Track" for exam eligibility) or (2) the ABPN exam (ABPN currently offers a "grandfathering" or practice pathway track for exam eligibility, which will last until 2026). These options provide a 3-year grace period for clinicians to take and pass the necessary exams. To qualify for the grace period, hospitals and/or clinicians will need to provide clear documentation of what their eligibility dates were to sit for one or both of these exams.
- Physicians who are board-certified in their primary specialty and who are additionally credentialed by the American Board of Neurological Surgery (ABNS) through their Recognition of Focused Practice in Neurocritical Care. Physicians who have not yet passed the ABNS Neurocritical Care RFP exam are considered to be equivalent to a physician "certified in Neurocritical Care Medicine" for up to 3 years after they are eligible to take the exam. This provides a 3-year grace period for clinicians to take and pass the necessary exam. To qualify for the grace period, hospitals and/or clinicians will need to provide clear documentation of what their eligibility dates were to sit for the exam.

Expanded Definition of Certified in Critical Care Medicine

On an interim basis, three other categories of physicians are considered by Leapfrog to be equivalent to a physician "certified in Critical Care Medicine" for the purpose of meeting the standard:

- Physicians who completed training prior to availability of subspecialty certification in critical care in their specialty (1987 for Internal Medicine, Surgery, Anesthesiology, Pediatrics and 2013 for Emergency Medicine), who are board-certified in their specialty, and who have provided at least six weeks of full-time ICU care annually. (The weeks need not be consecutive weeks.)
- Physicians who have finished their fellowship in Critical Care Medicine, but have not yet passed an existing board-certifying exam, are considered to be equivalent to a physician "Certified in Critical Care Medicine" for up to three years after completion of the fellowship. This provides the physician an adequate window to take her/his boards and re-take if necessary.
- Physicians who are board-certified in their primary specialty and have completed a critical care fellowship at an ACGME-accredited program, but are ineligible to sit for a board-certifying exam in Critical Care in either their primary specialty or subspecialty because their training occurred under two separate certifying boards, are considered to be equivalent to a physician "Certified in

Critical Care Medicine” if they are board-certified in their primary specialty and have provided at least six weeks of full-time ICU care annually. (The weeks need not be consecutive weeks.)

Physicians who have let their board certification lapse are not considered to be “Certified in Critical Care Medicine.”

³⁷ **Ordinarily and Exclusively Present in the ICU**

“Ordinarily present in the ICU” refers to direct on-site presence in the ICU of an intensivist during the 4-hour or 8-hour period. While it need not be the same intensivist for the entire 4-hour or 8-hour period, it is expected that the ICU(s) are primarily staffed by dedicated ICU intensivists who are ordinarily and exclusively present in the ICU(s). “Presence” does *not* mean staffed part-time by multiple physicians who are not ordinarily and exclusively dedicated to the ICU, *nor* does it mean the cumulative time that one or more intensivists spend in the unit visiting, rounding, consulting, or responding to pages.

The standard allows for normally expected intensivist activities outside of the ICU related to their responsibilities in the ICU (e.g., evaluating patients proposed for ICU admission), as long as intensivists are ordinarily present in the ICU and return immediately when paged. An intensivist present in one ICU immediately adjacent to another can be considered present in both units as long as they can respond to demands in both units as if they would if both units were one larger unit. For the purposes of this Survey, “adjacent” units are those units that can be reached within 5 minutes. While tele-intensivists can be used to meet the presence requirement, some on-site intensivist presence is still necessary to meet the Leapfrog specifications.

“Exclusively” means that when the physician is in the ICU, they have no concurrent clinical responsibilities to non-ICU patients.

³⁸ **Intensivist Presence via Telemedicine**

To meet the Leapfrog ICU requirement for intensivist presence in the ICU via telemedicine, a hospital must be able to document that it fulfills all the following 10 key features based on a modification of the approach reported in Critical Care Medicine (Rosenfeld, B. et al. “Intensive care unit telemedicine: Alternate paradigm for providing continuous intensivist care,” *Critical Care Medicine*, Vol. 28, No. 1, pp. 3925-3931).

1. A physician certified in critical care medicine (see endnote #36) who is physically present in the ICU (“on-site intensivist”) performs a comprehensive review of each ICU patient each day and establishes and/or revises the care plan. The on-site intensivist must be available by phone to answer any questions from the tele-intensivist related to the established or revised care plan.

The tele-intensivist, who must also be a physician certified in critical care medicine (see endnote #36), has immediate access to information regarding the on-site intensivist’s care plan at the time the management responsibility is transferred to the tele-intensivist by the on-site intensivist.

When care is transferred back to the on-site intensivist, the tele-intensivist must communicate any changes to the care plan to the on-site intensivist. Hospitals relying on electronic hand-offs must ensure that physician sign-in and sign-out of reports is being recorded. In addition, these reports should be monitored as one way to audit compliance with the hand-off process described above.

2. When an intensivist is not on-site in the ICU managing or co-managing all ICU patients, a tele-intensivist is continuously monitoring and able to manage all ICU patients for the remaining 24 hours per day, 7 days per week. “Continuously monitoring” means the tele-intensivist has no other concurrent responsibilities, is immediately available to communicate with ICU staff, and is continuously in the physical presence of the tele-ICU’s patient monitoring and communications equipment. “Manage” means authorized to diagnose, treat, and write orders for a patient in the ICU

on the intensivist's own authority.

3. The tele-intensivist's care is proactive, with routine visualization and physiological review of all patients at a frequency appropriate to their severity of illness.
4. The tele-intensivist has immediate access to key patient data, including:
 - a) physiologic bedside monitor data (in real-time);
 - b) laboratory orders and results;
 - c) medications ordered and administered; and,
 - d) notes, radiographs, ECGs, etc. on demand.
5. Bedside cameras are physically available in each ICU. If cameras are not mounted in each patient room within the unit, then at least one dedicated bedside camera must be available for every five beds in the ICU, plus a dedicated back-up camera in each ICU. If ICUs are located on different floors of the hospital, each ICU on each floor must have its own set of dedicated cameras if they are not mounted in every room. "Dedicated" means that the cameras are on the unit for the sole purpose of patient care. Personal devices (e.g., personal phones, tablets, etc.) would not meet this requirement.
6. The tele-intensivist must be able to turn on each bedside camera to visualize patients, with sufficient clarity to assess breathing pattern and communicate with on-site personnel at the bedside in real time.
7. Within five minutes of a request for assistance being initiated by hospital staff, the tele-intensivist's patient workload ordinarily permits the tele-intensivist to complete a comprehensive visual and physiological assessment of any patient.
8. Data links between the ICU and the tele-intensivist are reliable (>98% up-time) and secure (HIPAA compliant).
9. Written standards for remote care are established and include, at a minimum:
 - a) tele-intensivists are certified by a national medical specialty board in critical care medicine;
 - b) tele-intensivists are licensed to practice in the legal jurisdiction in which the ICU is located;
 - c) tele-intensivists are credentialed in each hospital to which he/she provides remote care (can be special telemedicine credentialing);
 - d) activities of the tele-intensivist are reviewed within the hospital's quality assurance committee structure;
 - e) there are explicit written policies regarding roles and responsibilities of both the on-site intensivist and the tele-intensivist;
 - f) ICU staff are educated regarding the function, roles, and responsibilities of the tele-intensivist; and
 - g) there is an established written process to ensure effective communication between the ICU staff and the tele-intensivist.
10. The tele-intensivist documents patient care activities and this documentation is incorporated into the patient record.

³⁹ **Quantified Analysis of Response Times**

Hospitals can monitor the response times of intensivists, "effectors," and clinical pharmacists in multiple ways, as long as the data collection process is non-biased and scientific.

As an example, hospitals can have the ICU staff maintain an exception log in the ICU(s) on six randomly sampled days per year. On those days, ICU nurses could record:

- For question #7, the number of calls/pages/texts made to the intensivist when they were not present in the unit (whether on-site or via telemedicine) and the number of times the intensivist's response time exceeded 5 minutes
- For question #8, the number of calls/pages/texts made to a physician, physician assistant, nurse practitioner, or FCCS-certified nurse or intern "effector" and the number of times these individuals did not reach the patient at the bedside within 5 minutes
- For question #13, the number of calls/pages/texts made to the clinical pharmacist on days when they were not rounding on-site in the unit and the number of times the clinical pharmacist's response time exceeded 5 minutes

Hospitals can then estimate whether they meet the 95% timely response standards by dividing the total number of log exceptions by the total number of calls/pages/texts per day.

Hospitals may exclude low-urgency calls/pages/texts, if the notification device system can designate low-urgency calls/pages/texts, or if the hospital has an alternative scientific method for documenting high-urgency calls/pages/texts that are not returned within 5 minutes.

The six randomly selected days can be conducted over the course of a year prior to submission of Section 5 of the Survey. If resubmitting responses to Section 5, six new randomly selected days must be sampled in the three-month reporting period prior to resubmission.

Hospitals that use telemedicine to cover 'call' for the on-site intensivist should review endnote #41. Hospitals that have an effector that is dedicated 24/7 to the ICU (as defined as being within a 5 min walk to the ICU) should review endnote #42.

⁴⁰ **FCCS-Certified Nurse or Intern "Effector"**

FCCS certificates are awarded to nurses and doctors upon their successful completion of a brief course developed by the Society for Critical Care Medicine to improve/confirm critical care knowledge and skills. For more information visit <https://www.sccm.org/Education-Center/Educational-Programming/Fundamentals/Fundamental-Critical-Care-Support>.

At present, this is the only such course recommended by The Leapfrog Group's expert advisory panel. Intensivists and any other physicians who are certified in critical care medicine (or eligible based on residency training or fellowship) need not also be FCCS certified.

Physicians, physician assistants, and nurse practitioners also are not required to be FCCS certified, but they must meet the criteria specified in endnote #42 to serve as the responder/"effector."

⁴¹ **Use of Tele-intensivists to Cover Calls**

Hospitals that use telemedicine to cover 'call' for the on-site intensivist are able to answer "yes" to question #7 if: (1) the telemedicine service meets all ten of the requirements outlined in endnote #38; and (2) the hospital has an 'effector' (physician/PA/NP/FCCS certified nurse or intern) on-site during that time period to carry out the tele-intensivist's orders and can reach the ICU patient within 5 minutes, 95% of the time.

⁴² **Physician/PA/NP serving as the Responder/"Effector"**

Physicians/PAs/NPs (includes Clinical nurse Specialists, Nurse Anesthetists, or NPs) serving as the responder in the ICU must meet the following criteria:

1. Be a graduate with a training license from an ACGME accredited training program or have an active state license to practice as a physician, nurse practitioner, or physician assistant in the state in which the patient is located.
2. Have privileges to provide medical services in the unit (i.e., ICU) and for patients of the age range approved in advance by the hospital's governing body (e.g., medical staff committee, chief

medical officer, chief nursing officer, etc.), as specified by the institutions internal policies (bylaws).

3. Carry out the intensivist's orders and instructions, under the intensivist's guidance, when they are serving in a responder role.

If the effector is dedicated 24/7 to the ICU (as defined as being within a 5 min walk to the ICU), then hospitals can indicate "yes" to meeting the response time requirement (5 min response; 95% of the time) in question #8, in lieu of conducting a response time audit.

⁴³ Modified Intensivist Presence via Telemedicine

To earn reduced credit on the Leapfrog ICU standard for intensivist presence in the ICU via telemonitoring, a hospital must affirm that its telemonitoring intensivist presence fulfills the following nine key features based on a modification of the approach reported in Critical Care Medicine (Rosenfeld, B. et al. "Intensive care unit telemedicine: Alternate paradigm for providing continuous intensivist care," *Critical Care Medicine*, Vol. 28, No. 1, pp. 3925-3931). Note that, as with other Leapfrog specifications, these features must be met under ordinary circumstances.

1. When an intensivist is not on-site in the ICU managing or co-managing all ICU patients, a tele-intensivist is continuously monitoring and able to manage all ICU patients for the remaining 24 hours per day, 7 days per week. "Continuously monitoring" means the tele-intensivist has no other concurrent responsibilities, is immediately available to communicate with ICU staff, and is continuously in the physical presence of the tele-ICU's patient monitoring and communications equipment. "Manage" means authorized to diagnose, treat, and write orders for a patient in the ICU on the intensivist's own authority.
2. The tele-intensivist's care is proactive, with routine visualization and physiological review of all patients at a frequency appropriate to their severity of illness.
3. The tele-intensivist has immediate access to key patient data, including:
 - a) physiologic bedside monitor data (in real-time);
 - b) laboratory orders and results;
 - c) medications ordered and administered; and,
 - d) notes, radiographs, ECGs, etc. on demand.
4. Bedside cameras are physically available in each ICU. If cameras are not mounted in each patient room within the unit, then at least one dedicated bedside camera must be available for every five beds in the ICU, plus a dedicated back-up camera in each ICU. If ICUs are located on different floors of the hospital, each ICU on each floor must have its own set of dedicated cameras if they are not mounted in every room. "Dedicated" means that the cameras are on the unit for the sole purpose of patient care. Personal devices (e.g., personal phones, tablets, etc.) would not meet this requirement.
5. The tele-intensivist must be able to turn on each bedside camera to visualize patients, with sufficient clarity to assess breathing pattern and communicate with on-site personnel at the bedside in real time.
6. Within five minutes of a request for assistance being initiated by hospital staff, the tele-intensivist's patient workload ordinarily permits the tele-intensivist to complete a comprehensive visual and physiological assessment of any patient.
7. Data links between the ICU and the tele-intensivist are reliable (>98% up-time) and secure (HIPAA compliant).
8. Written standards for remote care are established and include, at a minimum:

- a) tele-intensivists are certified by a national medical specialty board in critical care medicine;
 - b) tele-intensivists are licensed to practice in the legal jurisdiction in which the ICU is located;
 - c) tele-intensivists are credentialed in each hospital to which he/she provides remote care (can be special telemedicine credentialing);
 - d) activities of the tele-intensivist are reviewed within the hospital's quality assurance committee structure;
 - e) there are explicit written policies regarding roles and responsibilities of both the on-site intensivist and the tele-intensivist;
 - f) ICU staff are educated regarding the function, roles, and responsibilities of the tele-intensivist; and
 - g) there is an established written process to ensure effective communication between the ICU staff and the tele-intensivist.
9. The tele-intensivist documents patient care activities and this documentation is incorporated into the patient record.

⁴⁴ Individuals who touch patients or who touch items that will be used by patients

This would include individuals who are formally engaged by the hospital to help support the patient care process. This would include both direct and indirect care providers that are likely to have contact with patients in a patient care unit, enter a patient care unit, touch items that will be used by patients in a patient care unit, or interact with patient fluids (e.g., blood, specimens) in a patient care unit, such as doctors, mid-levels, nurses, pharmacists, environmental services staff, phlebotomists, laboratory techs, etc. This would also include students and volunteers. These individuals must be trained to identify and perform proper hand hygiene for the specific indications/moments (see WHO's 5 Moments for Hand Hygiene, CDC's Guideline for Hand Hygiene) that are relevant to their work.

Administrative workers that only perform office duties and do not touch patients or touch items that will be used by patients in a patient care unit would not be included in this definition. Patients and their visitors would also not be included in this definition. While patients and their loved ones are important parts of the patient care process, they are not formally engaged by the hospital for this work. Vendors would also not be included.

⁴⁵ Professional with Appropriate Training and Skills

This would include staff formally trained in Infection Control or Infectious Diseases, whose tasks include dedicated time for staff training. In some settings, this could also be medical or nursing staff involved in clinical work, with dedicated time to acquire thorough knowledge of the evidence for and correct practice of hand hygiene.

At a minimum, the trainer must have an understanding of the information and concepts presented in the WHO Guidelines on Hand Hygiene in Health Care and the Hand Hygiene Technical Reference Manual.

⁴⁶ Diagnostic Process

A process that starts with the patient's first engagement with the health care system and ends with clinicians either communicating a timely and correct diagnosis or learning from a diagnostic error or near miss that contributed to the patient's clinical outcomes. In that timeframe, clinicians and others involved in caring for the patient gather information, integrate and interpret that information, formulate a diagnosis, communicate the diagnosis to the patient, and develop a plan of care based on the diagnosis (adapted from the National Academy of Medicine's Improving Diagnosis in Health Care, 2015).

⁴⁷ Dedicated Emergency Department

A dedicated emergency department is an area of the hospital that meets any one of the following criteria:

- Licensed by the state as an emergency department,
- Holds itself out to the public as providing emergency care, or
- During the preceding calendar year, at least one-third of its outpatient visits were for the treatment of emergency medical conditions.

For the purposes of reporting on the Survey, only include emergency departments that are located in your hospital. Exclude free-standing emergency departments.

⁴⁸ Never Event

In 2011, the National Quality Forum released a list of 29 events that they termed “serious reportable events,” extremely rare medical errors that should never happen to a patient. Often termed “never events,” these include errors such as surgery performed on the wrong body part or on the wrong patient, leaving a foreign object inside a patient after surgery, or discharging an infant to the wrong person. This is an update of NQF’s original 2002 and 2006 reports. Please see NQF’s “Never Events” list at https://www.qualityforum.org/topics/sres/serious_reportable_events.aspx. Hospitals may not earn credit for this question if they have only implemented a policy that includes the Center for Medicare and Medicaid (CMS) Never Events.

⁴⁹ Apology to the Patient

While Leapfrog recognizes that on very rare occasions “never events” can occur that are not the fault of care systems or clinical care staff, given the high level of trust patients place in health care providers, Leapfrog feels it is appropriate for caregivers to apologize when a patient within their care setting suffers a serious event.

As the National Quality Forum identified in their 2002, 2006, and 2011 Serious Reportable Events Report, given the serious nature of these events, it is reasonable for hospitals to initially assume that the adverse event was due to the referenced course of care. And while further investigation and/or root cause analysis of the unplanned event may be needed to confirm or refute the presumed relationship, delaying an apology to the patient is not treating the patient with compassion and sympathy.

⁵⁰ Reporting Never Events to External Agencies

If your hospital is not accredited by The Joint Commission or DNV GL Healthcare, is located in a state without a state-wide reporting program for medical errors, AND there is no available Patient Safety Organization to which your hospital can report medical errors, the hospital should report the event to the Board of Trustees. Full implementation of the Never Events policy still requires the hospital to conduct a root cause analysis of the event.

⁵¹ Root Cause Analysis

The National Patient Safety Foundation published a set of best practices and guidelines in its report “RCA² Improving Root Cause Analysis and Action to Prevent Harm.” The report can be found at <http://www.npsf.org/resources/Pages/Tools/RCA2-Improving-Root-Cause-Analyses-and-Actions-to-Prevent-Harm.aspx>.

⁵² Top Box Score

The percent of survey respondents who chose the most positive score for a given item. Looking at the **top box** is an approach to understand the number of responses with a strong sentiment.

For the CAHPS Child Hospital Survey “Global Rating – Recommend hospital” domain, responses of 9 and 10 are included in the top box score. For the “Global Rating – Recommend hospital” domain,

responses of “Definitely yes” are included in the top box score. For all other domains included in Section 8A, the top box score is the percent of survey respondents choosing “Always.”

For the OAS CAHPS Survey “Patients’ Rating of the Facility” domain, responses of 9 or 10 are included in the top box score. For the “Patients Recommending the Facility” domain, responses of “Definitely yes” are included in the top box score. For all other domains included in Section 9F, the top box score is the percent of survey respondents choosing “Yes, definitely.”

⁵³ Operating Rooms

If your state designates and licenses operating rooms, enter the number of operating rooms licensed by your state that are used to perform the outpatient procedures listed in Section 9C. If your state does not designate and license operating rooms, enter the number of operating rooms used to perform the outpatient procedures listed in Section 9C that meet the following definition from the 2018 FGI Guidelines: a room that meets the requirements of a restricted area, is designated and equipped for performing surgical or other invasive procedures, and has the environmental controls for an OR as indicated in ASHRAE 170. An aseptic field is required for all procedures performed in an OR.

More information about the 2018 FGI Guidelines can be found at https://www.fgiguideelines.org/wp-content/uploads/2017/08/SLS17_FGI_ExamProcedureOperatingImaging_170721.pdf.

Hospitals must include the total number of operating rooms that are used to perform the outpatient procedures listed in Section 9C, including operating rooms that are used for both inpatient and outpatient procedures.

⁵⁴ Endoscopic Procedure Rooms

If your state designates and licenses procedure rooms, enter the number of procedure rooms licensed by your state that are used for endoscopies listed in Section 9C. If your state does not designate and license procedure rooms, enter the number of procedure rooms that are used for endoscopies listed in Section 9C that meet the following definition from the 2018 FGI Guidelines: a room designated for the performance of patient care that requires high-level disinfection or sterile instruments and some environmental controls but is not required to be performed with the environmental controls of an operating room.

More information about the 2018 FGI Guidelines can be found at https://www.fgiguideelines.org/wp-content/uploads/2017/08/SLS17_FGI_ExamProcedureOperatingImaging_170721.pdf.

Hospitals must include the total number of procedure rooms that are used to perform the endoscopies listed in Section 9C, including procedure rooms that are used for both inpatient and outpatient procedures.

⁵⁵ Clinician

A clinician refers to a physician, physician assistant (PA), nurse practitioner (NP), certified registered nurse anesthetist (CRNA), nurse (RN or MSN), or respiratory therapist.

⁵⁶ Eligible Discharges

Discharged adult patients (ages 18 years and older) who had both medically and non-medically necessary outpatient surgeries and/or procedures are eligible to complete the OAS CAHPS Survey. A detailed description of patient sampling criteria, including a list of OAS CAHPS-eligible surgeries and procedures is available in the Protocols and Guidelines Manual, version 9.0 at <https://oascahps.org/Survey-Materials>.

The 2025 Leapfrog Hospital Survey is a publication of The Leapfrog Group. The Survey cannot be copied, distributed, or used without the written permission of The Leapfrog Group for any purpose other than an individual hospital's participation in the Survey.

Exhibit 46

Spring 2025 Hospital Safety Grade
Media Coverage Report
May 1 – May 8, 2025

Executive Media Summary: Spring 2025 Hospital Safety Grade Media Coverage

- **774 online articles** from 486 different publications with a reach of ~ 59 million (722 online articles in fall 2024, a 7.2% increase)
- **127 unique print placements** across several media markets (160 print placements in fall 2024)
- **251 broadcast placements**, including 151 television placements across 37 stations and 100 radio placements across 56 stations (239 broadcast placements in spring 2024, a 5% increase)
- **427 press release pickups** with a total potential audience of 88.5 million (444 pickups in fall 2024, a 4% decrease)
- **78 hospital-issued publications** across several health systems (85 publications in fall 2024)

Coverage Spread Highlights

Key Terms/Message Pull Through

Message Pull Through Insights: Key message pull through correlates with Leapfrog’s national press release language (see declines this cycle in infection and hand hygiene mentions). Interestingly, “straight A” mentions were slightly higher in the fall 2024 cycle, likely due to

hospitals touting their straight A's and regional outlets picking up the stories (note, there were slightly fewer hospital press releases this cycle than last).

Leapfrog Group Coverage Across America

Coverage

Reach Insights (Reporting Period May 1 – 8):

- This cycle, we have coverage in 3 fewer states than fall 2024. However, we secured coverage in states that have not historically covered the Safety Grades and did not cover them last cycle (South Dakota, West Virginia, Vermont, Delaware).
- States with the highest concentration of coverage include New York (62), Florida (46), New Jersey (43), Illinois (41), Michigan (38). As we've seen in previous cycles, there is no correlation between high performing states and quantity of coverage. Surprisingly, we have yet to see coverage in Utah this cycle—despite their high ranking, the state isn't historically a large coverage driver (5 articles last cycle). Reporter interest in covering the Safety Grades may be a bit diluted by their repeated high ranking (fourth consecutive cycle as #1). The highest percentage of "Straight A" hospital angle doesn't seem to have moved the needle on coverage.

Spring 2025 Hospital Safety Grade
Media Coverage Report
May 1 – May 8, 2025

- The Northeast (NY, NJ, PA), Midwest (IL, MI) and South (SC, NC, VA, FL, TX) continue to be major coverage drivers. The west continues to be the toughest area to break into in the absence of major media markets in some of those states.

Spring 2025 Hospital Safety Grade

Media Coverage Report

May 1 – May 8, 2025

- **Daily Business Review, Palm Beach Hospitals Sue Leapfrog Over Safety Grade System**

Coverage Insights:

- As of today, CURA has fielded 81 media inquiries—13 inquiries fewer compared to this point last cycle. This includes 63 inquiries related to the Hospital Safety Grades and 18 related to the ongoing Tenet lawsuit. In-line with the trend we've been seeing, we had fewer reporters interested in interviews, but are still seeing a high conversion rate (more than half of inquiries we fielded have converted to coverage). This indicates our press package and process for sharing data/additional materials with reporters are strong, and we plan to continue using the gated press page for future cycles.
- Despite a challenging media landscape, coverage volumes remain consistent with—even exceeding—previous cycles. This success can be attributed in part to our targeted pre-embargo outreach to priority trade and regional/business journal reporters who typically cover the announcement. Additionally, we expanded our embargoed outreach to include more local reporters across states, with a strategic focus on underrepresented markets that don't typically cover the announcement.
- Broadcast coverage continued to grow this cycle, with new placements emerging in the North (Washington, D.C., and Providence), alongside our usual coverage in the Midwest and South. Notably, we observed a slight shift in format—radio placements outpaced TV coverage, which has typically led broadcast media in past cycles.
- Hospital-issued press releases highlighting their A grades continue to drive regional coverage of the announcement, even with a slight decline in volume compared to the previous cycle. Hospitals are actively leveraging Leapfrog's press release—often featuring Leah's quote—which has resulted in strong regional exposure for Leapfrog when picked up by local outlets.
- We saw an increase in coverage by Patch, a network of hyperlocal news sites (21 stories this cycle compared to 13 last cycle). While this is still below the 38 stories Patch published in fall 2024, we're continuing to nurture the relationship with the goal of driving up coverage. We're also building relationships with other syndicated regional outlets, such as Spectrum, which have generated meaningful coverage for this announcement.
- Notably, Becker's published more coverage of the Safety Grades and the Tenet lawsuit than any other health trade outlet, with two HSG stories and three lawsuit-related pieces—up from three total stories last cycle.
- We were surprised by lack of response/interest from some of our trade friends who typically cover the announcement, though we're continuing additional follow-up, bringing in the Tenet lawsuit.

Tenet Lawsuit Insights:

- By the end of the week, we will have reached out to over 120 regional, trade and national reporters regarding the Tenet lawsuit.

Spring 2025 Hospital Safety Grade
Media Coverage Report
May 1 – May 8, 2025

- We've developed an additional media list targeting alternate reporter contacts in South Florida from key outlets where we haven't heard back from reporters.
- So far, we've seen 31 original articles regarding the suit and 14 pick-ups in smaller regional outlets (Florida and Michigan). Nearly all of those articles pulled directly from Leah's first or second official statement, and five referenced the legal correspondences.
 - Key articles following our last update include: Modern Healthcare, Palm Beach Post, KFF Morning Brief repost, and Health Exec.
- We were pleased to see a transition in media coverage following our outreach, specifically mentioning Tenet versus Palm Beach Health Network. In future outreach, we will continue to leverage the non-profit watchdog versus large for-profit health system angle (David vs Goliath).
- Regional coverage of the news tends to lean into more clickbait-style language and stays more high-level, while the trades have delved into the details of the lawsuit. Following up with reporters who have covered the announcement continues to drive further coverage. For instance, today, the Palm Beach Post published a follow-up piece, detailing the measures where each of the five hospitals have fallen short, pulling information from Leah's follow-up statement and the legal letters.
- We anticipate a story in STAT from Bob Herman, following Leah's interview on Monday. We followed up with him today regarding his timeline.
- Looking ahead, we'd like to pull in additional perspectives to extend the lifespan of the news (patients, providers). CURA and Leapfrog to discuss further on Monday.

Methodology

CURA uses a media monitoring software to track online, broadcast and print articles and report on message pull through. The Boolean search used for this coverage report is: ("Leapfrog Group") AND ("hospital safety grade" OR "safety grades" OR "hospital") NOT ("PRNewswire") NOT ("GlobeNewswire").

Exhibit 47

Talking Points for Regional Leaders about Leapfrog Lawsuit

See Leapfrog's detailed statement published May 2, 2025

We prefer you avoid talking directly to press about the lawsuit – instead you may direct them to Lauren Bailey, Director of Communications (L.Bailey@Leapfrog-group.org). We are providing the following talking points to help guide responses if you are asked about the lawsuit by hospitals or other community members in your region. We encourage you to focus on the very poor performance of these hospitals on patient safety first and foremost, while still countering the deliberate falsehoods the hospitals are spreading.

Topline Messaging

- Five hospitals that are owned by Tenet Healthcare have filed a lawsuit against The Leapfrog Group to try to suppress publication of the Leapfrog Hospital Safety Grades:
 - Delray Medical Center (Hospital Safety Grade: F)
 - Good Samaritan Medical Center (Hospital Safety Grade: D)
 - Palm Beach Gardens Medical Center (Hospital Safety Grade: F)
 - West Boca Medical Center (Hospital Safety Grade: F)
 - St. Mary's Medical Center (Hospital Safety Grade: D)
- Leapfrog is confident they will win this case as they have for two other similar cases before.
- These five hospitals have extremely poor performance across many measures of preventable errors, accidents, injuries and infections that harm or even kill patients. Most of this data is reported by CMS, the agency that runs Medicare.
- All five hospitals fall well below the national average for patient experience. Patient experience surveys are collected to understand how patients felt about communication with doctors, nurses, and other clinicians, as well as the responsiveness of staff and communication about medications and discharge. Studies show patient experience reports closely correlate with patient safety outcomes.

Hospital-Specific Performance

- **Delray Medical Center** is significantly below the national average on:
 - Patient-reported communication with doctors, nurses, and other clinicians, as well as the responsiveness of staff and communication about medications and discharge
 - Rates of infection in the blood (CLABSI),
 - Rates of surgical site infections after colon surgery
 - Rates of sepsis after surgery
- **Good Samaritan Medical Center** is significantly below the national average on:
 - Patient-reported communication with doctors, nurses, and other clinicians, as well as the responsiveness of staff and communication about medications and discharge
 - Rates of infection in the urinary tract (CAUTI)
 - Rates of surgical site infections after colon surgery
 - Rates of falls and injuries
- **Palm Beach Gardens Medical Center** is significantly below the national average on:
 - Patient-reported communication with doctors, nurses, and other clinicians, as well as the responsiveness of staff and communication about medications and discharge
 - Measures of harmful events (PSI-90) including:
 - Sepsis after surgery
 - Surgical wounds splitting open

- Dangerous bed sores and more
- **West Boca Medical Center** is significantly below the national average on:
 - Patient-reported communication with doctors, nurses, and other clinicians, as well as the responsiveness of staff and communication about medications and discharge
 - Rates of MRSA
 - Rates of infections in the blood (CLABSI)
 - Rates of surgical site infection after colon surgery
- **St. Mary's Medical Center** is significantly below the national average on:
 - Patient-reported communication with doctors, nurses, and other clinicians, as well as the responsiveness of staff and communication about medications and discharge
 - Rates of infections in the urinary tract (CAUTI)
 - Rates of falls and injuries

Countering False Claims

- **The hospitals falsely claim Leapfrog gave the suing hospitals Ds and Fs because the hospitals don't report to the Leapfrog Hospital Survey. They also falsely claim Leapfrog is "pay to play."**
- Hospital participation in the Leapfrog Hospital Survey has no automatic up-or-down impact on a hospital's Safety Grade.
- Over 400 hospitals in the U.S. that don't report to the Survey earned a better Safety Grade than the five hospitals suing Leapfrog.
- Most of the data used in the Hospital Safety Grade comes from CMS, the agency that runs Medicare.
- The charge of "pay to play" is patently false. Leapfrog does not provide or sell consulting services and does not charge hospitals for participation in the Survey or the Safety Grade.

For more detailed questions about how the methodology treats Survey data, refer to Leapfrog or Leapfrog's statement. If you would like to be able to go into detail yourself, please contact us to set up a prep meeting.

Exhibit 48

LFG/CURA Meeting Agenda

May 22, 2025 at 4:00 pm ET

Press Announcements/Events

Media & Announcements

- Recognized Leader (June 4)
 - ADA confirmed ownership of pitching diabetes-specific and some consumer outlets; follow-up expected next week
 - National press release is not yet fully approved - outreach likely delayed until May 29 on ADA side but CURA to continue preparing for outreach on May 28
 - Draft of the national press release will be shared with regional leaders as an FYI
 - Jean-Luc is working with ADA's PR team to potentially expand promotion via ADA's owned channels - including their professional website and podcasts
 - Hospital PR contacts will be shared with CURA to coordinate regional outreach and potential spokesperson partnerships
 - Past successful podcast placements (Stacey Simms' Diabetes Connections) will be repeated this year offering Leah
 - Jean-Luc and Leah are confirmed as spokespeople for key trades and regional
 - Osaki confirmed as ADA's spokesperson
- Tenet lawsuit media planning + updates
 - Op-Ed Strategy
 - Considerations for op-ed placement in Florida outlets
 - Ideal op-ed would come from an external party (employer coalition, patient advocate) to reduce Leapfrog's direct exposure
 - Leah is drafting a personal story tied to Delray Medical Center to humanize the issue and may lead the op-ed if external voices aren't available
 - Possibility of spotlighting a patient story (anonymous if needed) to convey the real-world harm of poor hospital performance

Additional

- CMS proposed rule comment letter

LFG/CURA – Action Items

Thursday, May 22

LFG

- Provide PR contact information for recognized leaders' hospitals
- Share updates on ADA's pitching timeline
- Distribute regional and hospital press release templates for final proofing
- Continue collaborating with ADA to expand promotion across ADA's owned channels (e.g. website, podcasts, publications)
- Develop and publish an infographic with long-term hospital participation data
- Provide updates on:
 - The APIC joint webinar and potential statement rollout
 - Planning for an in-person tour at Jupiter Medical Center with a regional leader

CURA

- Finalize media outreach materials for the Recognized Leader announcement
- Coordinate with PR teams at recognized hospitals to support local press inquiries and spokesperson prep
- Continue brainstorming and drafting potential op-eds, including Leah's personal story (Delray Medical Center) and identifying external voices (e.g. regional partners, advocates)

This is something different. Leah wants to highlight Jupiter Medical Center's A safety grade because of the lawsuit and poor performing hospitals in Palm Beach County.

External Message - Please be cautious when opening links or attachments in email

You may recall we spoke about planning a visit of you and some of your members and me to Jupiter Medical Center, one of the Straight A hospitals. I just spoke with the Jupiter CEO, Dr. Amit Rastogi, who is very excited to host a visit. He hadn't heard of your coalition so this will be a good opportunity to build the relationship. I explained how it's helpful for employers to see the difference patient safety can make and to hear their perspectives on how employers can reinforce progress.

We would like to see if we could host this visit. I told Rastogi we'd give him a couple of potential dates.

Hopefully we can talk this week about this?

Angela will coordinate a time this week. Thanks, Leah

Subject: Re: For Leapfrog - AL.com Inquiry Re: Huntsville Hospital

The exact time required to submit the Leapfrog Hospital Survey varies depending on the services the hospital provides. If the hospital is smaller and provides fewer services, some sections will not apply to them and will therefore reduce their workload. Hospitals also have the ability to skip optional sections or answer that they do not measure at this time.

Completing all sections of the Leapfrog Hospital Survey for the first time typically requires around 120 hours, while subsequent annual submissions take approximately 60 hours. Most of this time is spent preparing reports, gathering documentation, and completing the CPOE (Computerized Physician Order Entry) Evaluation Tool.

Thanks Sarah. I rewrote the last one – I think he is asking if hospitals have to get a Safety Grade or choose to/opt in.

Alex- I know there is a talking point somewhere about how long it takes to complete the Hospital Survey. Do you have a Help Desk response to that? It's question two below. I think that response would better answer this question.

Hi Lauren,

The reporter reached back out with a few follow-up questions. See below with suggested responses in red. Could you let me know of any changes you'd like to make?

Thanks!

Sarah

+++

I have a follow-up question regarding CEO Leah Binder's statement that not filling out the survey affected 4 out of 30 measures. [Hospitals push back on low Leapfrog grades - Becker's Hospital Review | Healthcare News & Analysis] However, in my review, I found the number is actually 7 out of 32 measures.

Specifically, because Huntsville Hospital did not complete the survey, it received the lowest scores in four categories: computerized medication orders by doctors (which prevents errors), safe medication administration, hand hygiene, and whether specialty-trained doctors care for ICU patients. The hospital received no scores in three additional categories: staff working together to prevent errors, effective leadership to prevent mistakes, and nursing and bedside care for patients.

The imputation model applies to those four measures listed (computerized physician order entry, bar code medication administration, ICU physician staffing, hand hygiene), where, if there is not data available, hospitals receive a "limited achievement" point to reflect the lack of data. This methodology is designed to serve the best interest of patients, who have more at stake if Leapfrog overstates the performance of the hospital on critical patient safety measures.

For the other three measures you listed, these scores were not imputed due to missing data. When a hospital is missing data for those measures, the standard weight of that measure is redistributed to the other measures in the same domain. You can see further information on the weight of individual measures on pages 18-20 of the scoring methodology and how measure weights are redistributed due to missing data on page 23.

In addition, how would you respond to the claim by Huntsville Hospital that the survey is 300 pages long.

The Leapfrog Hospital Survey is developed with the intent to capture critical information about a hospital's safety based on peer reviewed, independent methodology. While Leapfrog encourages hospitals to complete the Survey to paint a fuller picture of their safety performance, many hospitals who receive a Safety Grade do not report to the voluntary Survey. In fact, we've seen hospitals achieve all letter Grades, including A's, without completing the Survey.

Also, do Hospitals have to participate in having their grades public, and do they pay to do that, and what is in it for them, even for those with Fs?

~~Hospitals do not have to complete the Leapfrog Hospital Survey nor pay Leapfrog to publicize their Safety Grade. In fact, Leapfrog supports hospitals with tools and guidance to promote their grades at no cost. If a hospital wants to use the trademarked Leapfrog letter grade logo in their promotional materials, they can license the logo for a fee, though this is entirely optional.~~

The Leapfrog Hospital Safety Grade was designed for patients – to give them access to critical data about how hospitals in their area perform on measures of patient safety. Leapfrog assigns Safety Grades to all general acute care hospitals in the U.S. – hospitals cannot opt in or opt out of getting a Safety Grade. This is a transparency initiative. We've seen that transparency galvanizes change.

Subject: RE: For Leapfrog - AL.com Inquiry Re: Huntsville Hospital

Oh interesting! So this reporter is saying the hospital put the statement out almost in response to this article? That would make sense.

Have you shared the archival report with the reporter?

Leah is out until Tuesday and I'm not sure that this warrants her needing to do a statement. We'd like to keep this out of press as much as possible. I think our statement should be something like:

Leapfrog does not want hospitals to earn poor Safety Grades. We've seen hospitals that take patient safety seriously move from an "F" all the way to an "A." This saves lives. Patients are the center of what we do at Leapfrog, and they deserve transparency and access to this data. We are glad to see Huntsville Hospital publicly commit to report to the Leapfrog Hospital Survey. In our 25 years, we've seen that transparency galvanizes change and voluntarily reporting quality safety data is the first step. You can find the Hospital Safety Grade [scoring methodology](#) and other materials publicly available for viewing on our [website](#).

Thoughts?

Subject: For Leapfrog - AL.com Inquiry Re: Huntsville Hospital

External Email - Use Caution

Hi Lauren,

Kayode Crown, a reporter at AL.com who worked on the [initial story](#) covering Huntsville Hospital's grade reached out to us wanting further data on the hospital's performance as well as a statement from Leapfrog (see the request below).

Looping in Alex to take a look at any notable data trends for Huntsville Hospital over time. We can pull together a quick statement from Leah for approval, pulling from the messaging we shared with the broadcast outlet. Per our previous discussion, we can keep it positive and focus on the fact that they're going to complete the survey in the future, and we've seen many hospitals improve over time. We'd advise passing on a live interview to keep the messaging more controlled.

Let us know if you're aligned or if you have any questions.

Thanks!

Sarah

+++

Hope this email finds you well. I am a reporter with AL.com and I reported on the latest Huntsville Hospital grades. Here is the story: <https://www.al.com/news/2025/05/huntsville-hospital-falls-to-f-in-latest-grade-report-on-medical-errors-and-patient-safety.html>

I want to do a deeper dive into the numbers, wanting to go back years to see how the hospital had been trending (and not just the overall grade), but those data are not available on your website.

- Please let me know what your policy is and what step I should take.*

The hospital also put out a statement following my reporting. Find it here: <https://www.huntsvillehospital.org/community-events/news-publications/item/statement-regarding-leapfrog-score>

- How does The Leapfrog Group respond to the issues raised in the statement?*

Leapfrog Hospital Safety Grade

The Leapfrog Hospital Safety Grade is the only hospital rating focused exclusively on hospital safety. Its A, B, C, D or F letter grades are a quick way for consumers to choose the safest hospital to seek care.

Upwards of 200,000 people die annually due to preventable mistakes in hospitals, according to the Journal of Patient Safety. To draw attention to this epidemic, in 2012 The Leapfrog Group decided to expand its focus beyond employers to reach consumers directly. Out of this vision came the Leapfrog Hospital Safety Grade, a letter grade rating of how safe hospitals are for patients. The Safety Grade provides consumers with the critical information on how likely they are to experience accidents, injuries, errors or harm while in the hospital.

How the Safety Grade Keeps it Simple for Users

The Leapfrog Hospital Safety Grade

Updated twice per year, the score regularly garners attention from consumer media and shines a spotlight on the patient safety records of hospitals in local communities.

Data users of the Leapfrog Hospital Safety Grade value its simplicity and easy-to-understand letter grade rating system. The score is used by dozens of national and regional health plans as well as vendors to educate their users on

the importance of choosing a safer hospital. Contact us to access a sample data set.

More resources on hospital safety, including tips for talking to your doctor and videos on how to stay safe, are available on the Leapfrog Hospital Safety Grade website.

hospital safety?**

Exhibit 55

Hospital Ethics Committee
West Boca Medical Center
21644 State Road 7
Boca Raton, FL 33428

Subject: Urgent Request for Review of Universal Hepatitis B Vaccination Policy in Newborns of Hepatitis B Negative Mothers

Dear Members of the Ethics Committee,

I was concerned to learn that West Boca Medical Center recently received a D safety grade from The Leapfrog Group, placing it among the lower-rated hospitals in Florida. This moment presents an important opportunity to review policies that impact patient safety, ethics, and public trust.

One such policy deserving urgent attention is the routine administration of the Hepatitis B vaccine to all newborns within 24 hours of birth regardless of the mothers Hepatitis B status.

While I fully support the public health importance of the Hepatitis B vaccine, current research and ethical standards raise questions about whether a universal birth-dose policy is necessary in cases where:

- The mother is confirmed Hepatitis B negative
- There is no known risk of household exposure
- The infant has no immediate or foreseeable route of exposure

In the absence of maternal Hepatitis B or other identifiable risk factors, there is no clinically or ethically compelling reason to administer the vaccine at birth rather than at a later, developmentally appropriate age.

Key Points for Consideration:

- **Risk vs. Benefit:** Outside of vertical transmission (screened prenatally), the risk of Hepatitis B infection in newborns is extremely low.
- **Immune System Maturity:** Studies in *Frontiers in Immunology* show newborns have an immature immune response to Hepatitis B vaccination compared to older infants.
- **Parental Autonomy:** Many parents are unaware they may delay or decline this vaccine when risk is absent. Transparent, informed consent would strengthen community trust.

Proposed Actions:

1. Evaluate a risk-based or consent-based protocol for Hepatitis B negative mothers.
2. Implement a formal consent process with written information and clear provider dialogue.

3. Review this policy in the context of recent safety concerns to demonstrate commitment to improvement.

In light of the hospital's recent safety grade, addressing this issue promptly would send a powerful message of responsiveness and patient-centered care.

Respectfully,

A Concerned Physician in Boca Raton

LEAPFROG DESIGNATED LOGO LICENSE — LETTER OF AGREEMENT

The Leapfrog Group and _____ as of _____ with _____
Name of Hospital (Licensee) Effective Date # of Staffed Beds

agree that Leapfrog grants Licensee a limited, non-transferable, and non-exclusive license to use one or more of the following Leapfrog logos, including their respective program logos (collectively, the "Designated Leapfrog Logos"), as indicated below, in accordance with the terms of this Letter of Agreement for both commercial and non-commercial promotion:

- ☐ Spring 2025 Hospital Safety Grade (e.g. "A" or "B" Logo)
☐ Leapfrog 2024 Top Hospital
☐ 2025 Recognized Leader in Caring for People with Diabetes

Licensee acknowledges that this Agreement applies only to the Designated Leapfrog Logos selected above and all terms and conditions outlined herein govern their use.

Fee Table: Licensee agrees to pay The Leapfrog Group (please indicate tier of staffed beds on the table below):

Hospital Size	Indicate Tier with an "X"	Safety Grade Price	Top Hospital Price	Recognized Leader in Diabetes Care Price	Price with \$1,000 Embargo Discount**
<50 staffed beds		\$6,700	\$6,700	\$6,700	\$5,700
50 – 99 staffed beds		\$7,900	\$7,900	\$7,900	\$6,900
100 – 149 staffed beds		\$9,900	\$9,900	\$9,900	\$8,900
150 – 199 staffed beds		\$10,900	\$10,900	\$10,900	\$9,900
200 – 249 staffed beds		\$12,900	\$12,900	\$12,900	\$11,900
250 – 299 staffed beds		\$17,900	\$17,900	\$17,900	\$16,900
300 – 399 staffed beds		\$19,900	\$19,900	\$19,900	\$18,900
400 – 499 staffed beds		\$26,900	\$26,900	\$26,900	\$25,900
500+ staffed beds		\$29,900	\$29,900	\$29,900	\$28,900

Total Price: _____

* Combined purchase of two or more logo licenses will receive a 20% discount.

**Embargo Discount applied when signed license received by 4/30/2025 and cannot be combined with any other discounts.

This license allows the Licensee to use the Designated Leapfrog Logos in accordance with this Agreement and the Terms of Use attached as Exhibit A and the Leapfrog Group Style Guide for Hospitals. The Agreement becomes effective upon execution. An invoice will be issued within 72 hours of Leapfrog's receipt of the executed Agreement, and payment is due upon receipt.

Leapfrog releases updated Safety Grades twice per year, in Fall and Spring, and the Top Hospital designation once per year in the fall. Recognized Leader in Diabetes Care is designated once annually. This Agreement allows Licensee to use the Leapfrog Hospital Safety Grade "A" or "B" Logo and Leapfrog Hospital Safety Grade Program Logo for the current Spring 2025 ratings cycle plus the subsequent, Fall 2025 ratings cycle if Licensee is deemed eligible to use the respective logo by Leapfrog. The Designated Leapfrog Logos for the year or cycle this license is purchased may be promoted in perpetuity. Congratulations on earning the prestigious accolades.

EXHIBIT A

Terms of Use of the Leapfrog Designated Logos

A. Licensee shall have the following rights and obligations:

1. Licensee may announce and display the Designated Leapfrog Logos on its website, hospital signage, through broadcast and radio advertisements, in paid print and online advertisements and through marketing materials (collectively, "Commercial Use"). Licensee may not change the form or display any of the Designated Leapfrog Logos.
2. If part of a multicampus organization or part of a multihospital system, Licensee must make clear that the Designated Leapfrog Logos apply only to specific campuses or to specific hospitals and not to the entire organization or system.
3. Licensee should give credit to The Leapfrog Group and link to Leapfrog's respective program webpage where possible and appropriate, for example:
 - i. Leapfrog Hospital Safety Grade website (www.hospitalsafetygrade.org)
 - ii. Leapfrog Top Hospital: (www.leapfroggroup.org/TopHospitals)
 - iii. Leapfrog and ADA's Recognized Leader in Caring for People Living with Diabetes
<https://www.leapfroggroup.org/diabetes>
4. Licensee may NOT publish or refer to the Leapfrog Hospital Safety Grade underlying numerical values or display numerical values relating to the ratings programs (e.g. Hospital Safety Grade's numerical scores) via web, print, or any other media.
5. When using or displaying the Leapfrog Designated Logos, Licensee must display the most recent, officially licensed Leapfrog Designated Logos during the term of the License. The date-stamped logo (e.g., Spring 20XX or Fall 20XX) corresponding to the applicable Leapfrog Program cycle must be included wherever the designation appears. No alterations, modifications, or removal of date stamps from the logo are permitted.
6. Licensee may not republish the Designated Logos of any facilities other than its own purchased through this Agreement. The Designated Leapfrog Logos may only be used by the specific facility or facilities that have individually purchased a license. Logos may not be transferred, sublicensed, or displayed by any other hospital within a multi-hospital system or by parent organizations that have not obtained an active license for each facility using the logos.
7. Licensees using the Leapfrog Hospital Safety Grade must display the Official Licensure Logo (Leapfrog Hospital Safety Grade "A" or "B" Logo) as displayed below in any printed or web materials. Licensees may choose to display the Leapfrog Hospital Safety Grade Program Logo and/or The Leapfrog Group Logo.

LEAPFROG
**HOSPITAL
SAFETY GRADE**

- i. The Leapfrog Hospital Safety Grade measures patient safety. Licensee must not state or imply that the Leapfrog Hospital Safety Grade measures or describes any other quality, e.g., patient satisfaction, quality of care provided, overall performance, etc.
 - ii. Licensee must not state or imply that it is safer than hospitals receiving lower letter grades on the Leapfrog Hospital Safety Grade unless the statement is qualified to indicate the concept "as measured by the Leapfrog Hospital Safety Grade." Preferred language would be, "X Hospital has received a higher Leapfrog Hospital Safety Grade than other hospitals in our community." Licensee must not state or imply that it is safer than other hospitals receiving the same letter grade on the Leapfrog Hospital Safety Grade. Licensee may not publicly display or otherwise reveal relative rankings among hospitals receiving the same letter grade in any use.
8. Licensees using the Top Hospital Designation must display the Official Licensure Logo (Top Hospital Logo) as displayed below in any printed or web materials. Licensee may additionally choose to display The Leapfrog Group Logo.

9. Licensees using the Leapfrog and American Diabetes Association Recognized Leader in Caring for People With Diabetes Designation Logo as displayed below in any printed or web materials. Licensee may additionally choose to display The Leapfrog Group Logo.

10. Licensees with a current, active license that is purchased within one year of the Effective Date, may also display The Leapfrog Group Logo as displayed below in any printed or web materials.

13. Nothing in this Agreement shall give Licensee any right, title or interest in or to the Designated Leapfrog Logos. Licensee acknowledges and agrees that Leapfrog is the exclusive owner of all rights, title and interest in and to the Designated Leapfrog Logos. Licensee shall not act in any manner that would or might conflict with or compromise Leapfrog's ownership of the Designated Leapfrog Logos, or similarly affect the value or goodwill pertaining to the Designated Leapfrog Logos, such as by applying to register any identical or similar trademark anywhere in the world.
14. The Designated Leapfrog Logos and all Intellectual Property Rights (defined below) therein are owned by Leapfrog. Licensee shall not reproduce, republish, distribute, modify, reverse engineer or otherwise exploit the Designated Leapfrog Logos in whole or in part, in any manner not expressly permitted by this Agreement and must not remove or modify any copyright or trademark notice, or other notice of ownership.

"Intellectual Property Rights" means all intellectual property rights of any kind or nature however denominated throughout the world, including, without limitation all copyrights, patents, patent applications, trade secrets, inventions, propriety know-how, registered and unregistered trademarks, registered and unregistered service marks, domain names, registered and unregistered trade names, rights of privacy and publicity, moral rights, and database rights.

15. Licensee agrees to indemnify and hold each of Leapfrog and any agent appointed by Leapfrog to pursue and enforce its rights and to undertake and fulfill its obligations under this Agreement ("Agent") and their respective affiliates and all of their respective past, present, and future directors, officers, employees, successors and agents and all of their respective successors and assigns, both individually and in their official capacities harmless from and against any and all liabilities, damages, demands, claims, causes of action, fines or penalties (including, without limitation, court costs and reasonable attorneys' fees) arising out of or related to the failure of Licensee to fulfill any of Licensee's obligations under this Agreement or Licensee's use of or access to the Designated Leapfrog Logos.

16. NEITHER LEAPFROG NOR ITS AGENT WILL HAVE ANY RESPONSIBILITY AND WILL BEAR NO LIABILITY WHATSOEVER WITH REGARD TO REPLACING, UPLOADING, VALIDATING, OR CORRECTING ANY LEAPFROG HOSPITAL SAFETY GRADE OR TOP HOSPITAL DESIGNATION ONCE RELEASED. LICENSEE ACKNOWLEDGES AND AGREES THAT, SINCE THE LEAPFROG HOSPITAL SAFETY GRADES AND TOP HOSPITAL DESIGNATIONS ARE BASED ON INFORMATION PROVIDED BY THIRD PARTIES, IT IS REASONABLE THAT THE LEAPFROG HOSPITAL SAFETY GRADE AND TOP HOSPITAL DESIGNATIONS, AND ANY SERVICES PROVIDED UNDER THIS AGREEMENT BE, AND THEY ARE "AS IS", "AS AVAILABLE" AND "WITH ALL FAULTS". LEAPFROG AND ITS AGENT DISCLAIM ANY AND ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF TITLE, NON-INFRINGEMENT, FITNESS FOR A PARTICULAR PURPOSE, MERCHANTABILITY, OR ARISING OUT OF ANY COURSE OF DEALING.
17. TO THE FULL EXTENT PERMITTED BY LAW, NEITHER LEAPFROG NOR AGENT IS LIABLE FOR ANY INDIRECT, PUNITIVE, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES OR ANY DAMAGES FOR LOSS OF BUSINESS, REVENUE, OR PROFIT OR ANY OTHER DAMAGES OF ANY KIND OR NATURE ARISING OUT OF OR IN CONNECTION WITH LICENSEE'S USE OF DESIGNATED LEAPFROG LOGOS, EVEN IF LEAPFROG HAS PREVIOUSLY BEEN ADVISED OF, OR REASONABLY COULD HAVE FORESEEN, THE POSSIBILITY OF SUCH DAMAGES, HOWEVER THEY ARISE, WHETHER IN CONTRACT, TORT, WARRANTY, OR ANY OTHER LEGAL THEORY.
18. This Agreement, the rights, and obligations hereunder, and any claims or disputes relating thereto, will be governed by and construed in accordance with the laws of the District of Columbia without regard to the principles of conflicts of laws. Any claim, suit, or action arising under or relating to this Agreement must be brought and maintained exclusively in courts located within the District of Columbia.
19. Licensee may not assign, sublicense, delegate or otherwise transfer this Agreement or any right granted hereunder.
20. This Agreement constitutes the entire agreement between Licensee and Leapfrog relating to this subject matter.
21. This Agreement shall terminate automatically and immediately upon a breach by the Licensee, as determined in Leapfrog's sole and absolute discretion. Upon termination of the License, Licensee must immediately cease use of the Top Hospital Designation and the Hospital Safety Grade and all Designated Leapfrog Logos.
22. If payment is not received by Leapfrog within forty-five (45) days after the due date, or any Licensee violates, or is perceived by Leapfrog to have violated, the terms of this Agreement, as determined within Leapfrog's sole discretion, Leapfrog reserves its rights to: (1) impose interest on its outstanding invoices at a rate of six (6) percent annually; (2) immediately suspend this Agreement, and any rights Licensee has or may have hereunder; and, (3) categorize Licensee as ineligible for licensure under future iterations of this Agreement. Additionally, Leapfrog reserves the right to indefinitely refuse and withhold future licensure to any Licensee or potential Licensee, in its sole discretion, based upon said Licensee being in arrears on payments due to Leapfrog under this Agreement.
23. These Terms of Use shall survive the termination of this Agreement.

Exhibit 58

About The Leapfrog Group

The Leapfrog Hospital Safety Grade was created and is administered by The Leapfrog Group, a national leader and advocate in hospital transparency.

[The Leapfrog Group](#) is an independent, national not-for-profit organization founded more than a decade ago by the nation's leading employers and private health care experts. We strive to make giant "leaps" forward in the safety, quality and affordability of health care in the U.S. by promoting transparency through our data collection and public reporting initiatives.

With our goal of saving lives by reducing errors, injuries, accidents, and infections, The Leapfrog Group focuses on measuring and publicly reporting hospital performance through the annual [Leapfrog Hospital Survey](#).

The survey is a trusted, transparent and evidence-based national tool in which over 2,300 hospitals voluntarily participate free of charge.

The Leapfrog Group advocates for public access to quality and safety data from all U.S. hospitals, and we welcome you to contact your legislators to demand more information to keep your families safe.

Exhibit 59

Frequently Asked Questions About The Leapfrog Hospital Safety Grade

What is The Leapfrog Hospital Safety Grade?

The Leapfrog Hospital Safety Grade is an "A," "B," "C," "D," or "F" assigned to general hospitals in the U.S., the only such rating program focused exclusively on how safe they are for their patients. The grade uses over 30 measures including rates of preventable errors, injuries and infections, and whether hospitals have systems in place to prevent them. Grades are updated twice annually, in the fall and spring, and are freely available to the public at www.hospitalsafetygrade.org. The Hospital Safety Grade uses a public, peer-reviewed methodology, calculated by top patient safety experts under the guidance of a National Expert

Panel, and is 100% transparent and free to the public.

**Why should people worry about a hospital's patient safety?
Aren't all hospitals the same?**

It is critical to monitor safety before choosing a hospital. Preventable medical errors, accidents, injuries and infections in hospitals kill upwards of 200,000 people every year, the third leading cause of death in the United States. One in four people admitted to a hospital suffers some form of avoidable harm. And all hospitals are not the same; some hospitals are much safer than others. Johns Hopkins Medicine researchers estimate that patients are twice as likely to die of a preventable problem at a "C," "D," or "F" hospital than an "A" hospital, and over 50,000 lives would be saved if all hospitals performed the way A hospitals did.

What is the difference between the Leapfrog Hospital Survey and the Leapfrog Hospital Safety Grade?

The Leapfrog Hospital Survey is an annual voluntary survey in which Leapfrog asks hospitals to report quality and safety data and then publicly reports that

information by hospital. The Leapfrog Hospital Safety Grade is a letter grade Leapfrog bi-annually assigns to general hospitals in the United States, whether they voluntarily report data to Leapfrog or not. If a hospital does not report to the Leapfrog Hospital Survey, other sources of data are used to calculate a Grade. The majority of data used to calculate the Safety Grade comes from the Centers for Medicare and Medicaid Services (CMS).

Does a hospital get a better Safety Grade if it reports to the Leapfrog Hospital Survey?

The Hospital Safety Grade reflects how well a hospital does on safety, not whether they complete the Leapfrog Hospital Survey. The more information Leapfrog has about a hospital's safety, the more opportunity hospitals have to tell their story. Participation in the Leapfrog Hospital Survey gives hospitals the opportunity to report additional information about their safety measures. If a hospital performs well on certain measures on the Leapfrog Hospital Survey, they have the opportunity to earn more points in their Hospital Safety Grade for

those certain measures than they would if they did not report to the Leapfrog Hospital Survey. This is because the data hospitals report to Leapfrog is more comprehensive than data available from other publicly available sources. On the other hand, hospitals that perform poorly on Leapfrog Hospital Survey measures that are included in the Safety Grade will also feel the impact of that performance on their grade.

See the full methodology for spring 2025 [here](#).

Why don't I see my hospital?

Unfortunately, not all hospitals have enough data publicly available to be eligible for a grade. As per the National Expert Panel guidance, The Leapfrog Group has requirements for the minimum amount of data we need to issue an accurate grade. Most of the data Leapfrog uses comes from the federal agency Centers for Medicare and Medicaid Services (CMS), and in some cases, CMS does not publish adequate safety data on an individual hospital. Sometimes the hospital is too small to issue reliable numbers, and sometimes the hospital does not offer services relevant

to the safety data. For instance, a hospital without an Intensive Care Unit (ICU) cannot report ICU safety measures. The absence of a grade does not mean a hospital is unsafe; it means Leapfrog does not have enough data to assign a grade.

How does Leapfrog determine the Grades?

Leapfrog experts and advisors at the Johns Hopkins Armstrong Institute for Patient Safety and Quality regularly review all publicly available measures of safety and the methodology to determine a hospital's letter grade. The National Expert Panel regularly convenes to review the methodology for validity and reliability. The [scoring methodology](#) is published in detail, and hospitals are given tools to analyze how their own grade was derived.

What is a "Straight A" hospital?

For the first time, Leapfrog is spotlighting 346 hospitals nationwide that not only achieved an "A" for spring 2025 but have sustained the grade for five or more grading rounds, designating them "Straight A" hospitals. This select group,

representing 12% of all eligible hospitals, is now highlighted on www.hospitalsafetygrade.org.

Should patients avoid a “C,” “D,” or “F” hospital? What should people do if the only hospital in their community is a “C,” “D,” or “F?”

When they have a choice, the Hospital Safety Grade is the first tool patients should use to select a hospital, because safety should come first. The Hospital Safety Grade is the only public rating exclusively focused on safety—how well the hospital protects patients from medical errors, accidents, injuries and infections that kill more than 200,000 people a year in the United States. Once satisfied with the hospital’s record on safety, then people should consider other aspects of hospital performance in the decision-making process, such as whether the hospital delivers a high level of care for the health concern the patient has, i.e., if the hospital has high-quality obstetrics or orthopedics.

In some cases, the only hospitals available in a community are not highly rated. Leapfrog offers guidance and resources on our website for patients and family

members to protect themselves during a hospital stay, which is important no matter the hospital's grade. It can be difficult, but patients and families must take an assertive role in managing bedside care in order to avoid many of the most common errors that routinely occur in hospitals at all grade levels.

Employers founded The Leapfrog Group in 2000 to improve patient safety. How can they use the Leapfrog Hospital Safety Grade?

Employers use the Hospital Safety Grade in two ways. First, employers can educate and inform their employees about the Hospital Safety Grade and the importance of considering patient safety when choosing a hospital. Second, employers can structure the way they pay for health care to reward excellence in safety. For instance, higher graded hospitals might earn contract incentives. Visit Leapfrog's free Employer Value Toolkit website for resources and more information on where to start.

Who is The Leapfrog Group?

The Leapfrog Group is a national nonprofit organization driving a

movement for giant leaps forward in the quality and safety of American health care. For over 20 years, we have served as the nation's leading independent advocate of health care transparency to drive major improvement in patient safety, rating health care facilities to help people make informed, lifesaving decisions about where to seek services, and giving purchasers tools to tie their purchasing strategy to excellence in safety and quality.

Exhibit 60

About the Grade

Leapfrog Hospital Safety Grades (formerly known as Hospital Safety Scores) are assigned to nearly 3,000 general acute-care hospitals across the nation twice annually. The Safety Grade is the gold standard measure of patient safety, cited in [MSNBC](#), [The New York Times](#), and [AARP The Magazine](#).

The Leapfrog Hospital Safety Grade uses up to 30 national performance measures from the Centers for Medicare & Medicaid Services (CMS), the Leapfrog Hospital Survey and information from other supplemental data sources. Taken together, those performance measures produce a single letter grade representing a hospital's overall performance in keeping patients safe from preventable harm and medical errors. The Leapfrog Hospital Safety Grade methodology has

been peer reviewed and published in the Journal of Patient Safety.

Leapfrog works under the guidance of an Expert Panel to select appropriate measures and develop a scoring methodology. The Expert Panel is made up of patient safety experts from across the country:

- David Bates, M.D., M.Sc.,
Harvard University
- Kathy McDonald, PhD, Johns
Hopkins University School of
Nursing
- Matthew D McHugh, Ph.D.,
J.D., M.P.H., R.N., C.R.N.P.,
F.A.A.N., University of
Pennsylvania School of
Nursing
- Arnold Milstein, M.D., M.P.H.,
Stanford University
- Doris Peter, PhD, Consultant
- Peter Pronovost, M.D., Ph.D.,
F.C.C.M., University
Hospitals
- Patrick Romano, M.D.,
M.P.H., University of
California, Davis
- Sara Singer, Ph.D., Stanford
University
- Arjun Srinivasan, M.D., CAPT
U.S. Public Health Service,

Centers for Disease Control
and Prevention

- Tim Vogus, Ph.D., Vanderbilt University

How the Leapfrog Hospital Safety Grade is produced

The Expert Panel selected 22 evidence-based measures of patient safety, including CMS Medicare PSI 90 Patient Safety and Adverse Events composite (which includes 10 component measures of patient safety), analyzed the data, and determined the weight of each measure based on **evidence**, **opportunity for improvement** and **impact**. In some cases where a hospital's information is not available for a certain measure, Leapfrog uses a supplemental data source. In cases where a hospital's information is not available from any data source, Leapfrog has outlined a methodology for dealing with the missing data.

The Leapfrog Hospital Safety Grade places each measure into one of two domains: (1)

Quick Links

- [Scoring Methodology Used in the Spring 2025 Release of the Hospital Safety Grades](#) [May 2025]
- [Explanation of Safety Grades](#) [May 2025]

Process/Structural Measures or
(2) **Outcome Measures**, each
accounting for 50 percent of the
overall score.

- **Process Measures** represent how often a hospital gives patients recommended treatment for a given medical condition or procedure. For example, “Responsiveness of hospital staff” looks at patients’ feedback on how long it takes for a staff member to respond when they request help. **Structural Measures** represent the environment in which patients receive care. For example, “Doctors order medications through a computer” represents whether a hospital uses a special computerized system to prevent errors when prescribing medications.
- **Outcome Measures** represent what happens to a patient while receiving care. For example, “Dangerous object left in patient’s body” measures how many times a patient undergoing surgery had a dangerous foreign

object, like a sponge or tool,
left in his or her body.

A hospital must have enough safety data available for our experts to issue them a letter grade. Hospitals missing more than **six** process measures, more than **five** outcome measures, or **PSI90** are not graded. All hospitals are encouraged to voluntarily report additional safety data through the [Leapfrog Hospital Survey](#), but they are not required to do so to receive a Safety Grade.

The Leapfrog Group's goal is to publicly report patient safety and quality information for the benefit of consumers, purchasers, and referring physicians as they make decisions about where to seek care and where to direct patients. Identifying differences among facilities is critical to inform patients and their family's decision-making. That's why Leapfrog reports results by facility for all programs.

However, some hospitals belong to health systems that report data to the Centers for Medicare & Medicaid Services (CMS) as a single entity with a shared "CMS Certification Number (CCN)." This

means that individual hospitals within these systems will be graded using some of the same aggregate data. Leapfrog encourages these types of hospitals to report additional safety data through the [Leapfrog Hospital Survey](#) so that patients can see how each hospital is doing individually for select measures included in the grade.

At this time, we are unable to assign a grade to VA hospitals, critical access hospitals, specialty hospitals, children's hospitals, outpatient surgery centers, etc. Our experts are studying ways to rate them in the future.

Exhibit 61

Why the Hospital Safety Grade Works

One of the most significant problems with today's health care system is the failure to make safety and quality information available to the public. But the public deserves this information so they can make informed choices about where to receive care. The purpose of the Leapfrog Hospital Safety Grade is to bring this information to light in a way that is easy for you – the consumer – to use.

Some people do more research on what car to buy than what hospital to go to for medical care. The Leapfrog Hospital Safety Grade provides data and research to help you make informed decisions about a critical aspect of your hospital stay – safety. A hospital may have the best surgeons and greatest technology in the world, but

unless it is preventing infections and eliminating errors, it is not delivering on a very basic premise: ensuring the safety of you and your loved ones. The goal of the Leapfrog Hospital Safety Grade is to reduce the over 200,000 yearly deaths from hospital errors and injuries by publicly recognizing safety and exposing harm.

Our [letter grade scoring system](#) allows consumers to quickly assess the safety of their local hospital, and choose the safest hospital to seek care. As consumers use the Leapfrog Hospital Safety Grade more and more, we hope more hospitals will be compelled to be open about their safety and quality, and participate in meaningful public reporting.

Welcome to the 2025 Leapfrog Hospital Survey

This section of the website is designed for hospitals that are submitting a Hospital Survey.

The 2025 Leapfrog Hospital Survey is free and open to hospitals from April 1 to November 30. The annual survey assesses hospital safety, quality, and efficiency based on national performance measures that are of specific interest to health care purchasers and consumers. Survey Results are publicly reported, and provide hospitals with information to benchmark their progress in improving the care they deliver. For general, acute-care hospitals only, some Survey Results are also used to calculate the Leapfrog Hospital Safety Grade.

Leapfrog's Rating Programs

Leapfrog administers two different ratings programs for hospitals: the Leapfrog Hospital Survey and the Leapfrog Hospital Safety Grade. Most every hospital is targeted to submit an annual Hospital Survey, but only general hospitals are eligible for a Hospital Safety Grade.

Leapfrog**

Exhibit 63

How to Use the Grade

Many hospitals have world-renowned doctors and equipment, but not all hospitals prioritize their patient's safety above all else. You deserve to know which hospitals do the best at protecting their patients from harm. That's why we developed the Leapfrog Hospital Safety Grade. This tool can help guide your decision in a number of situations:

- Has your doctor referred you or a family member to a hospital for surgery?
- Are you preparing to have a baby?
- Is someone in your family suffering from chronic illness that could require immediate or consistent hospital care?
- Is your choice of hospital solely based on location or word-of-mouth?

The Safety Grade rates hospitals on the very basics of medical care, such as handwashing, entering prescriptions through a computer, and the availability of highly-trained nurses. So no matter the reason for a hospital visit, safety should be your number one concern.

Which hospital do I pick?

Choosing your hospital is a matter of personal preference, but we know “A” hospitals [do a better job](#) at preventing errors. If your local hospital rates below an “A,” talk with your doctor at that hospital and urge them to improve their safety. If all your local hospitals score poorly, use these Safety Grades to start a conversation with hospital leadership and local policymakers about improving hospital safety.

A small number of hospitals have consistently achieved “A” grades—an impressive feat. These hospitals are denoted with the “Straight A’s” logo in recognition of their achievement of the highest standards of patient safety year after year. We hope all hospitals will strive to offer this level of dependable care.

You should never refuse care in an emergency because of a hospital's Safety Grade, but use this website as a guide for planned events and a research tool for potential emergencies.

What measures are most important?

Every person will have different ideas about what is most important to them, but we suggest checking out whether your hospital scores well on:

- **Handwashing** Does your hospital have a handwashing policy to ensure all staff members are washing their hands before and after patient contact?
- **Infection in the blood** Hospital patients may be given a central line (a tube inserted into the body to deliver medication and other treatments). Patients with a central line are at high risk for developing a dangerous infection in the blood. Is your hospital showing a low number on this measure?
- **Patient falls** What is your hospital doing to ensure you don't suffer an added injury

from a fall while in the
hospital?

What about past grades?

Since 2012, Leapfrog has released Safety Grades twice per year for nearly 3,000 hospitals across the U.S. To be as transparent as possible, we make those past grades available, just by clicking on “Show Recent Past Grades” underneath a hospital’s current grade.

Displaying past grades makes it clear which hospitals consistently achieve high standards of patient safety and which have demonstrated a steady path of improvement. Patients should always decide on where to receive care based on a hospital’s current Safety Grade. However, past grades can tell you a lot about that hospital’s track record in keeping its patients safe from errors, injuries, accidents and infections. Keeping an eye on your local hospital’s Safety Grades over time also makes it easier to spot patterns—whether a hospital is working to improve or has allowed its focus on safety to slip.

If you’re concerned about past grades, ask your doctor what your

hospital is doing to keep its patients safe. Remember, **you have a choice of where to receive care**. And you deserve to be in the safest hospital possible.

We don't have Safety Grades for every hospital. Here's why:

Certain hospitals are not required to publicly report their safety record, which means that our experts don't have enough information to issue them a Leapfrog Hospital Safety Grade. These hospitals include:

- Specialty hospitals, such as children's hospitals and surgical centers
- Critical access hospitals
- Hospitals in Guam and Puerto Rico

Additionally, many hospitals are not able to provide data to the federal government because they are too small, or lack the necessary data—like military and veteran's hospitals. Leapfrog experts are studying ways to rate them in the future.

independent nonprofit organization committed to driving quality, safety, and transparency in the U.S. health system.

MRSA infection

Staph bacteria are common in hospitals, but Methicillin-resistant Staphylococcus aureus (MRSA) is a type of staph bacteria that is resistant to (cannot be killed by) many antibiotics. MRSA can be found in bed linens or medical equipment and can be spread if providers do not properly wash their hands between patients. MRSA can cause life-threatening bloodstream infections, pneumonia and surgical site infections.

This number represents a comparison of the number of infections that actually happened at this hospital to the number of infections expected for this hospital, given the number of patients they care for on a daily basis and how widespread MRSA infection is in their local community. A number lower than one means fewer infections than expected; a number more than one means more infections than expected. [For details on sources, click here.](#)

What safer hospitals do:

Doctors and nurses should clean their hands after caring for every patient. Hospital rooms and medical equipment should be thoroughly cleaned often. Safer hospitals will also keep MRSA patients separate from other patients and require providers and visitors to wear gloves and gowns around these patients.

Notes and Definitions

- 1. Declined to Report:** The hospital was asked to provide this information to the public, but did not.
- 2. Not Available:** "Not Available" means that the hospital does not have data for this measure. This could be because the measure is related to a service the hospital does not provide. For example, a hospital that does not have an ICU would not be able to report data about ICUs. It could also be because the hospital had too few patients or cases to report data for a particular condition or procedure. A "Not Available" result does not mean that the hospital withheld information from the public.
- 3. Straight A:** The hospital has earned an 'A' Grade for five consecutive grading rounds or more, qualifying it for recognition as a "Straight A" hospital.

LEGAL DISCLAIMER: The Leapfrog Hospital Safety Grade scores hospitals on their overall performance in keeping patients safe from preventable harm and medical errors. The grades are derived from expert analysis of publicly available data using up to 31 evidence-based, national measures of hospital safety. No specific representation is made, nor shall be implied, nor shall The Leapfrog Group be liable with respect to any individual patient's potential or actual outcome as a result of receiving services performed at any of these hospitals. Leapfrog Hospital Safety Grades cannot be republished without expressed written permission from The Leapfrog Group.

Doctors order medications through a computer

Hospitals can use Computerized Physician Order Entry (CPOE) systems to order medications for patients in the hospital, instead of writing out prescriptions by hand. Good CPOE systems alert the doctor if they try to order a medication that could cause harm, such as prescribing an adult dosage for a child. CPOE systems help to reduce medication errors in the hospital.

Hospitals can earn up to 100 points for using a well-functioning CPOE system in most areas of the hospital. [For details on sources, click here.](#)

What safer hospitals do:

Hospitals use CPOE systems in all areas of the hospital and regularly test those systems to ensure they are alerting doctors to potential ordering errors.

Notes and Definitions

1. **Declined to Report:** The hospital was asked to provide this information to the public, but did not.
2. **Not Available:** "Not Available" means that the hospital does not have data for this measure. This could be because the measure is related to a service the hospital does not provide. For example, a hospital that does not have an ICU would not be able to report data about ICUs. It could also be because the hospital had too few patients or cases to report data for a particular condition or procedure. A "Not Available" result does not mean that the hospital withheld information from the public.
3. **Straight A:** The hospital has earned an 'A' Grade for five consecutive grading rounds or more, qualifying it for recognition as a "Straight A" hospital.
4. *** The hospital declined to report their performance on this measure, so a score was assigned to reflect the lack of information available.**

LEGAL DISCLAIMER: The Leapfrog Hospital Safety Grade scores hospitals on their overall performance in keeping patients safe from preventable harm and medical errors. The grades are derived from expert analysis of publicly available data using up to 31 evidence-based, national measures of hospital safety. No specific representation is made, nor shall be implied, nor shall The Leapfrog Group be liable with respect to any individual patient's potential or actual outcome as a result of receiving services performed at any of these hospitals. Leapfrog Hospital Safety Grades cannot be republished without expressed written permission from The Leapfrog Group.

The Leapfrog Hospital Safety Grade is a public service provided by The Leapfrog Group, an independent nonprofit organization committed to driving quality, safety, and transparency in the U.S.

Doctors order medications through a computer

Hospitals can use Computerized Physician Order Entry (CPOE) systems to order medications for patients in the hospital, instead of writing out prescriptions by hand. Good CPOE systems alert the doctor if they try to order a medication that could cause harm, such as prescribing an adult dosage for a child. CPOE systems help to reduce medication errors in the hospital.

Hospitals can earn up to 100 points for using a well-functioning CPOE system in most areas of the hospital. [For details on sources, click here.](#)

What safer hospitals do:

Hospitals use CPOE systems in all areas of the hospital and regularly test those systems to ensure they are alerting doctors to potential ordering errors.

Notes and Definitions

1. **Declined to Report:** The hospital was asked to provide this information to the public, but did not.
2. **Not Available:** "Not Available" means that the hospital does not have data for this measure. This could be because the measure is related to a service the hospital does not provide. For example, a hospital that does not have an ICU would not be able to report data about ICUs. It could also be because the hospital had too few patients or cases to report data for a particular condition or procedure. A "Not Available" result does not mean that the hospital withheld information from the public.
3. **Straight A:** The hospital has earned an 'A' Grade for five consecutive grading rounds or more, qualifying it for recognition as a "Straight A" hospital.
4. *** The hospital declined to report their performance on this measure, so a score was assigned to reflect the lack of information available.**

Communication about discharge

Patients' perspectives of care are an important part of patient safety. The Communication about Discharge measure summarizes how well the hospital staff communicated with patients about the help they would need at home after leaving the hospital. The measure also summarizes how often patients reported that they were given written information about symptoms or health problems to watch for during their recovery. Educating patients on the steps they need to take during their recovery at home reduces the chances that a patient will need to be readmitted to the hospital.

Based on a scale of zero-100, this number represents a comparison of patients' perspectives of how effectively this hospital communicated with patients about the help they would need after discharge relative to patients' perspectives of how effectively other hospitals communicated with their patients. Higher scores indicate more effective communication than lower scores.

[For details on sources, click here.](#)

What safer hospitals do:

Hospitals that score well on this measure take time with every patient to clarify the patient's responsibilities during her recovery at home, clarify the responsibilities of caregivers at home, and educate the patient on any symptoms that could point to problems in the recovery process.

Notes and Definitions

1. Declined to Report: The hospital was asked to provide this information to the public, but did not.

2. Not Available: "Not Available" means that the hospital does not have data for this measure. This could be because the measure is related to a service the hospital does not provide. For example, a hospital that does not have an ICU would not be

able to report data about ICUs. It could also be because the hospital had too few patients or cases to report data for a particular condition or procedure. A “Not Available” result does not mean that the hospital withheld information from the public.

3. Straight A: The hospital has earned an 'A' Grade for five consecutive grading rounds or more, qualifying it for recognition as a “Straight A” hospital.

LEGAL DISCLAIMER: The Leapfrog Hospital Safety Grade scores hospitals on their overall performance in keeping patients safe from preventable harm and medical errors. The grades are derived from expert analysis of publicly available data using up to 31 evidence-based, national measures of hospital safety. No specific representation is made, nor shall be implied, nor shall The Leapfrog Group be liable with respect to any individual patient’s potential or actual outcome as a result of receiving services performed at any of these hospitals. Leapfrog Hospital Safety Grades cannot be republished without expressed written permission from The Leapfrog Group.

M State of legal domicile: DC

Form 990 (2021)

Check if Schedule O contains a response or note to any line in this Part III ☐

1 Briefly describe the organization's mission:

TO TRIGGER GIANT LEAPS FORWARD IN THE SAFETY, QUALITY, AND AFFORDABILITY OF U.S. HEALTH CARE BY USING TRANSPARENCY TO SUPPORT INFORMED HEALTH CARE DECISIONS AND PROMOTE HIGH-VALUE CARE.

2 Did the organization undertake any significant program services during the year which were not listed on the prior Form 990 or 990-EZ? ☐ Yes ☒ No

If "Yes," describe these new services on Schedule O.

3 Did the organization cease conducting, or make significant changes in how it conducts, any program services? ☐ Yes ☒ No

If "Yes," describe these changes on Schedule O.

4 Describe the organization's program service accomplishments for each of its three largest program services, as measured by expenses. Section 501(c)(3) and 501(c)(4) organizations are required to report the amount of grants and allocations to others, the total expenses, and revenue, if any, for each program service reported.

4a	(Code:) (Expenses \$ 2,959,937 including grants of \$) (Revenue \$ 255,932)
See Additional Data	

4b	(Code:) (Expenses \$ 1,801,211 including grants of \$) (Revenue \$ 5,496,481)
See Additional Data	

4c	(Code:) (Expenses \$ 1,233,389 including grants of \$) (Revenue \$ 130,718)
See Additional Data	

4d	Other program services (Describe in Schedule O.)
(Expenses \$	including grants of \$) (Revenue \$)

4e	Total program service expenses ▶	5,994,537
-----------	---	-----------

	Yes	No
1 Is the organization described in section 501(c)(3) or 4947(a)(1) (other than a private foundation)? If "Yes," complete Schedule A	1 Yes	
2 Is the organization required to complete Schedule B, Schedule of Contributors? See instructions.	2 Yes	
3 Did the organization engage in direct or indirect political campaign activities on behalf of or in opposition to candidates for public office? If "Yes," complete Schedule C, Part I	3	No
4 Section 501(c)(3) organizations. Did the organization engage in lobbying activities, or have a section 501(h) election in effect during the tax year? If "Yes," complete Schedule C, Part II	4 Yes	
5 Is the organization a section 501(c)(4), 501(c)(5), or 501(c)(6) organization that receives membership dues, assessments, or similar amounts as defined in Rev. Proc. 98-19? If "Yes," complete Schedule C, Part III	5	No
6 Did the organization maintain any donor advised funds or any similar funds or accounts for which donors have the right to provide advice on the distribution or investment of amounts in such funds or accounts? If "Yes," complete Schedule D, Part I	6	No
7 Did the organization receive or hold a conservation easement, including easements to preserve open space, the environment, historic land areas, or historic structures? If "Yes," complete Schedule D, Part II	7	No
8 Did the organization maintain collections of works of art, historical treasures, or other similar assets? If "Yes," complete Schedule D, Part III	8	No
9 Did the organization report an amount in Part X, line 21 for escrow or custodial account liability; serve as a custodian for amounts not listed in Part X; or provide credit counseling, debt management, credit repair, or debt negotiation services? If "Yes," complete Schedule D, Part IV	9	No
10 Did the organization, directly or through a related organization, hold assets in temporarily restricted endowments, permanent endowments, or quasi endowments? If "Yes," complete Schedule D, Part V	10	No
11 If the organization's answer to any of the following questions is "Yes," then complete Schedule D, Parts VI, VII, VIII, IX, or X, as applicable.		
a Did the organization report an amount for land, buildings, and equipment in Part X, line 10? If "Yes," complete Schedule D, Part VI	11a Yes	
b Did the organization report an amount for investments—other securities in Part X, line 12 that is 5% or more of its total assets reported in Part X, line 16? If "Yes," complete Schedule D, Part VII	11b	No
c Did the organization report an amount for investments—program related in Part X, line 13 that is 5% or more of its total assets reported in Part X, line 16? If "Yes," complete Schedule D, Part VIII	11c	No
d Did the organization report an amount for other assets in Part X, line 15 that is 5% or more of its total assets reported in Part X, line 16? If "Yes," complete Schedule D, Part IX	11d Yes	
e Did the organization report an amount for other liabilities in Part X, line 25? If "Yes," complete Schedule D, Part X	11e Yes	
f Did the organization's separate or consolidated financial statements for the tax year include a footnote that addresses the organization's liability for uncertain tax positions under FIN 48 (ASC 740)? If "Yes," complete Schedule D, Part X	11f Yes	
12a Did the organization obtain separate, independent audited financial statements for the tax year? If "Yes," complete Schedule D, Parts XI and XII	12a	No
b Was the organization included in consolidated, independent audited financial statements for the tax year? If "Yes," and if the organization answered "No" to line 12a, then completing Schedule D, Parts XI and XII is optional	12b Yes	
13 Is the organization a school described in section 170(b)(1)(A)(ii)? If "Yes," complete Schedule E	13	No
14a Did the organization maintain an office, employees, or agents outside of the United States?	14a	No
b Did the organization have aggregate revenues or expenses of more than \$10,000 from grantmaking, fundraising, business, investment, and program service activities outside the United States, or aggregate foreign investments valued at \$100,000 or more? If "Yes," complete Schedule F, Parts I and IV	14b	No
15 Did the organization report on Part IX, column (A), line 3, more than \$5,000 of grants or other assistance to or for any foreign organization? If "Yes," complete Schedule F, Parts II and IV	15	No
16 Did the organization report on Part IX, column (A), line 3, more than \$5,000 of aggregate grants or other assistance to or for foreign individuals? If "Yes," complete Schedule F, Parts III and IV	16	No
17 Did the organization report a total of more than \$15,000 of expenses for professional fundraising services on Part IX, column (A), lines 6 and 11e? If "Yes," complete Schedule G, Part I. See instructions.	17	No
18 Did the organization report more than \$15,000 total of fundraising event gross income and contributions on Part VIII, lines 1c and 8a? If "Yes," complete Schedule G, Part II	18	No
19 Did the organization report more than \$15,000 of gross income from gaming activities on Part VIII, line 9a? If "Yes," complete Schedule G, Part III	19	No
20a Did the organization operate one or more hospital facilities? If "Yes," complete Schedule H	20a	No
b If "Yes" to line 20a, did the organization attach a copy of its audited financial statements to this return?	20b	
21 Did the organization report more than \$5,000 of grants or other assistance to any domestic organization or domestic government on Part IX, column (A), line 1? If "Yes," complete Schedule I, Parts I and II	21	No

	Yes	No
22 Did the organization report more than \$5,000 of grants or other assistance to or for domestic individuals on Part IX, column (A), line 2? If "Yes," complete Schedule I, Parts I and III		No
23 Did the organization answer "Yes" to Part VII, Section A, line 3, 4, or 5, about compensation of the organization's current and former officers, directors, trustees, key employees, and highest compensated employees? If "Yes," complete Schedule J	Yes	
24a Did the organization have a tax-exempt bond issue with an outstanding principal amount of more than \$100,000 as of the last day of the year, that was issued after December 31, 2002? If "Yes," answer lines 24b through 24d and complete Schedule K. If "No," go to line 25a		No
b Did the organization invest any proceeds of tax-exempt bonds beyond a temporary period exception?		
c Did the organization maintain an escrow account other than a refunding escrow at any time during the year to defease any tax-exempt bonds?		
d Did the organization act as an "on behalf of" issuer for bonds outstanding at any time during the year?		
25a Section 501(c)(3), 501(c)(4), and 501(c)(29) organizations. Did the organization engage in an excess benefit transaction with a disqualified person during the year? If "Yes," complete Schedule L, Part I		No
b Is the organization aware that it engaged in an excess benefit transaction with a disqualified person in a prior year, and that the transaction has not been reported on any of the organization's prior Forms 990 or 990-EZ? If "Yes," complete Schedule L, Part I		No
26 Did the organization report any amount on Part X, line 5 or 22 for receivables from or payables to any current or former officer, director, trustee, key employee, creator or founder, substantial contributor, or 35% controlled entity or family member of any of these persons? If "Yes," complete Schedule L, Part II		No
27 Did the organization provide a grant or other assistance to any current or former officer, director, trustee, key employee, creator or founder, substantial contributor, or employee thereof, a grant selection committee member, or to a 35% controlled entity (including an employee thereof) or family member of any of these persons? If "Yes," complete Schedule L, Part III		No
28 Was the organization a party to a business transaction with one of the following parties (see the Schedule L, Part IV instructions for applicable filing thresholds, conditions, and exceptions):		
a A current or former officer, director, trustee, key employee, creator or founder, or substantial contributor? If "Yes," complete Schedule L, Part IV		No
b A family member of any individual described in line 28a? If "Yes," complete Schedule L, Part IV		No
c A 35% controlled entity of one or more individuals and/or organizations described in line 28a or 28b? If "Yes," complete Schedule L, Part IV		No
29 Did the organization receive more than \$25,000 in non-cash contributions? If "Yes," complete Schedule M		No
30 Did the organization receive contributions of art, historical treasures, or other similar assets, or qualified conservation contributions? If "Yes," complete Schedule M		No
31 Did the organization liquidate, terminate, or dissolve and cease operations? If "Yes," complete Schedule N, Part I		No
32 Did the organization sell, exchange, dispose of, or transfer more than 25% of its net assets? If "Yes," complete Schedule N, Part II		No
33 Did the organization own 100% of an entity disregarded as separate from the organization under Regulations sections 301.7701-2 and 301.7701-3? If "Yes," complete Schedule R, Part I	Yes	
34 Was the organization related to any tax-exempt or taxable entity? If "Yes," complete Schedule R, Part II, III, or IV, and Part V, line 1		No
35a Did the organization have a controlled entity within the meaning of section 512(b)(13)?		No
b If "Yes" to line 35a, did the organization receive any payment from or engage in any transaction with a controlled entity within the meaning of section 512(b)(13)? If "Yes," complete Schedule R, Part V, line 2		
36 Section 501(c)(3) organizations. Did the organization make any transfers to an exempt non-charitable related organization? If "Yes," complete Schedule R, Part V, line 2		No
37 Did the organization conduct more than 5% of its activities through an entity that is not a related organization and that is treated as a partnership for federal income tax purposes? If "Yes," complete Schedule R, Part VI		No
38 Did the organization complete Schedule O and provide explanations on Schedule O for Part VI, lines 11b and 19? Note. All Form 990 filers are required to complete Schedule O.	Yes	

Part V Statements Regarding Other IRS Filings and Tax ComplianceCheck if Schedule O contains a response or note to any line in this Part V ☐

	Yes	No
1a Enter the number reported in box 3 of Form 1096. Enter -0- if not applicable		
b Enter the number of Forms W-2G included on line 1a. Enter -0- if not applicable		
c Did the organization comply with backup withholding rules for reportable payments to vendors and reportable gaming (gambling) winnings to prize winners?	Yes	

Form 990 (2021)

Section A. Governing Body and Management

	Yes	No
1a Enter the number of voting members of the governing body at the end of the tax year If there are material differences in voting rights among members of the governing body, or if the governing body delegated broad authority to an executive committee or similar committee, explain in Schedule O.	1a	20
b Enter the number of voting members included in line 1a, above, who are independent	1b	20
2 Did any officer, director, trustee, or key employee have a family relationship or a business relationship with any other officer, director, trustee, or key employee?	2	No
3 Did the organization delegate control over management duties customarily performed by or under the direct supervision of officers, directors or trustees, or key employees to a management company or other person?	3	No
4 Did the organization make any significant changes to its governing documents since the prior Form 990 was filed?	4	No
5 Did the organization become aware during the year of a significant diversion of the organization's assets?	5	No
6 Did the organization have members or stockholders?	6	No
7a Did the organization have members, stockholders, or other persons who had the power to elect or appoint one or more members of the governing body?	7a	No
b Are any governance decisions of the organization reserved to (or subject to approval by) members, stockholders, or persons other than the governing body?	7b	No
8 Did the organization contemporaneously document the meetings held or written actions undertaken during the year by the following:		
a The governing body?	8a	Yes
b Each committee with authority to act on behalf of the governing body?	8b	Yes
9 Is there any officer, director, trustee, or key employee listed in Part VII, Section A, who cannot be reached at the organization's mailing address? If "Yes," provide the names and addresses in Schedule O	9	No

Section B. Policies (This Section B requests information about policies not required by the Internal Revenue Code.)

	Yes	No
10a Did the organization have local chapters, branches, or affiliates?	10a	No
b If "Yes," did the organization have written policies and procedures governing the activities of such chapters, affiliates, and branches to ensure their operations are consistent with the organization's exempt purposes?	10b	
11a Has the organization provided a complete copy of this Form 990 to all members of its governing body before filing the form?	11a	Yes
b Describe on Schedule O the process, if any, used by the organization to review this Form 990.		
12a Did the organization have a written conflict of interest policy? If "No," go to line 13	12a	Yes
b Were officers, directors, or trustees, and key employees required to disclose annually interests that could give rise to conflicts?	12b	Yes
c Did the organization regularly and consistently monitor and enforce compliance with the policy? If "Yes," describe on Schedule O how this was done	12c	Yes
13 Did the organization have a written whistleblower policy?	13	Yes
14 Did the organization have a written document retention and destruction policy?	14	Yes
15 Did the process for determining compensation of the following persons include a review and approval by independent persons, comparability data, and contemporaneous substantiation of the deliberation and decision?		
a The organization's CEO, Executive Director, or top management official	15a	Yes
b Other officers or key employees of the organization	15b	Yes
If "Yes" to line 15a or 15b, describe the process on Schedule O. See instructions.		
16a Did the organization invest in, contribute assets to, or participate in a joint venture or similar arrangement with a taxable entity during the year?	16a	No
b If "Yes," did the organization follow a written policy or procedure requiring the organization to evaluate its participation in joint venture arrangements under applicable federal tax law, and take steps to safeguard the organization's exempt status with respect to such arrangements?	16b	

Section C. Disclosure

17 List the states with which a copy of this Form 990 is required to be filed: _____

18 Section 6104 requires an organization to make its Form 1023 (1024 or 1024-A, if applicable), 990, and 990-T (section 501(c)(3)s only) available for public inspection. Indicate how you made these available. Check all that apply.

☐ Own website ☐ Another's website ☒ Upon request ☐ Other (explain in Schedule O)

19 Describe in Schedule O whether (and if so, how) the organization made its governing documents, conflict of interest policy, and financial statements available to the public during the tax year.

20 State the name, address, and telephone number of the person who possesses the organization's books and records:
 ▶ LEAH BINDER THE LEAPFROG GROUP 1775 K STREET NW 400 WASHINGTON, DC 20006 (202) 292-6713

and Independent Contractors

Check if Schedule O contains a response or note to any line in this Part VII ☐

Section A. Officers, Directors, Trustees, Key Employees, and Highest Compensated Employees

1a Complete this table for all persons required to be listed. Report compensation for the calendar year ending with or within the organization's tax year.

- List all of the organization's **current** officers, directors, trustees (whether individuals or organizations), regardless of amount of compensation. Enter -0- in columns (D), (E), and (F) if no compensation was paid.
- List all of the organization's **current** key employees, if any. See the instructions for definition of "key employee."
- List the organization's five **current** highest compensated employees (other than an officer, director, trustee or key employee) who received reportable compensation (box 5 of Form W-2, Form 1099-MISC, and/or box 1 of Form 1099-NEC) of more than \$100,000 from the organization and any related organizations.
- List all of the organization's **former** officers, key employees, or highest compensated employees who received more than \$100,000 of reportable compensation from the organization and any related organizations.
- List all of the organization's **former directors or trustees** that received, in the capacity as a former director or trustee of the organization, more than \$10,000 of reportable compensation from the organization and any related organizations.

See the instructions for the order in which to list the persons above.

☐ Check this box if neither the organization nor any related organization compensated any current officer, director, or trustee.

[illegible]

(A) Name and title	(B) Average hours per week (list any hours for related organizations below dotted line)	(C) Position (do not check more than one box, unless person is both an officer and a director/trustee)						(D) Reportable compensation from the organization (W-2/1099-MISC/1099-NEC)	(E) Reportable compensation from related organizations (W-2/1099-MISC/1099-NEC)	(F) Estimated amount of other compensation from the organization and related organizations
		Individual trustee or director	Institutional Trustee	Officer	Key employee	Highest compensated employee	Former

EIN: 52-2359517

Name: THE LEAPFROG GROUP

Form 990 (2021)

Form 990, Part III, Line 4a:

RATINGS: LEAPFROG FIELDS A VOLUNTARY SURVEY OF HOSPITALS AND AMBULATORY SURGERY CENTERS ON QUALITY AND SAFETY PRACTICES. THE SURVEYS INVOLVE MEASURE DEVELOPMENT AND ARE UPDATED ANNUALLY. THE HOSPITAL SURVEY ALSO INCLUDES A TOOL TO EVALUATE SYSTEMS FOR COMPUTERIZED PHYSICIAN ORDER ENTRY OF PHARMACEUTICALS. IN ADDITION, THE DATA FROM THE HOSPITAL SURVEY ARE COMBINED WITH DATA FROM OTHER SOURCES TO FURTHER UNDERSTAND HOSPITAL QUALITY AND SAFETY. THE ORGANIZATION PUBLICLY RATES U.S. HOSPITALS ON THEIR SAFETY IN AN INITIATIVE CALLED THE LEAPFROG HOSPITAL SAFETY GRADE.

Form 990, Part III, Line 4b:

COMMUNICATIONS LEAPFROG COLLECTS, ANALYZES AND DISSEMINATES HEALTH CARE DATA ON QUALITY AND SAFETY TO CONSUMERS AND PURCHASERS TO HELP THEM MAKE DECISIONS ON WHERE TO SEEK CARE. HEALTH CARE PROVIDERS ALSO FIND THE INFORMATION USEFUL FOR THEIR OWN IMPROVEMENT PROGRAMS AND THE OPPORTUNITY TO BENCHMARK AGAINST THEIR PEERS. LEAPFROG WORKS WITH PRINT, RADIO, TELEVISION, DIGITAL AND SOCIAL MEDIA PLATFORMS TO SPREAD INFORMATION ABOUT ITS HEALTH CARE RATINGS AND REPORTS.

Form 990, Part III, Line 4c:

MEMBERSHIP LEAPFROG WORKS WITH EMPLOYERS AND PURCHASERS OF HEALTH CARE TO ENCOURAGE TRANSPARENCY FROM THE HEALTH CARE COMMUNITY AND EDUCATE EMPLOYEES ON THE SAFEST AND HIGHEST QUALITY PROVIDERS. LEAPFROG ALSO COLLECTS DUES FROM AN ADVISORY COMMITTEE OF HEALTH CARE-FOCUSED COMPANIES WHO OFFER ADVICE AND SUGGESTIONS TO LEAPFROG BUT DO NOT HAVE A GOVERNING ROLE.

SCHEDULE A (Form 990) Department of the Treasury Internal Revenue Service	Public Charity Status and Public Support 88 Complete if the organization is a section 501(c)(3) organization or a section 4947(a)(1) nonexempt charitable trust. ▶ Attach to Form 990 or Form 990-EZ. ▶ Go to www.irs.gov/Form990 for instructions and the latest information.	2021 Open to Public Inspection
--	---	---

Name of the organization THE LEAPFROG GROUP	Employer identification number 52-2359517
---	---

Part I Reason for Public Charity Status (All organizations must complete this part.) See instructions.

The organization is not a private foundation because it is: (For lines 1 through 12, check only one box.)

- 1 ☐ A church, convention of churches, or association of churches described in **section 170(b)(1)(A)(i).**
- 2 ☐ A school described in **section 170(b)(1)(A)(ii).** (Attach Schedule E (Form 990).)
- 3 ☐ A hospital or a cooperative hospital service organization described in **section 170(b)(1)(A)(iii).**
- 4 ☐ A medical research organization operated in conjunction with a hospital described in **section 170(b)(1)(A)(iii).** Enter the hospital's name, city, and state:
- 5 ☐ An organization operated for the benefit of a college or university owned or operated by a governmental unit described in **section 170(b)(1)(A)(iv).** (Complete Part II.)
- 6 ☐ A federal, state, or local government or governmental unit described in **section 170(b)(1)(A)(v).**
- 7 ☐ An organization that normally receives a substantial part of its support from a governmental unit or from the general public described in **section 170(b)(1)(A)(vi).** (Complete Part II.)
- 8 ☐ A community trust described in **section 170(b)(1)(A)(vi).** (Complete Part II.)
- 9 ☐ An agricultural research organization described in **170(b)(1)(A)(ix)** operated in conjunction with a land-grant college or university or a non-land grant college of agriculture. See instructions. Enter the name, city, and state of the college or university:
- 10 ☒ An organization that normally receives: (1) more than 33 1/3% of its support from contributions, membership fees, and gross receipts from activities related to its exempt functions—subject to certain exceptions, and (2) no more than 33 1/3% of its support from gross investment income and unrelated business taxable income (less section 511 tax) from businesses acquired by the organization after June 30, 1975. See **section 509(a)(2).** (Complete Part III.)
- 11 ☐ An organization organized and operated exclusively to test for public safety. See **section 509(a)(4).**
- 12 ☐ An organization organized and operated exclusively for the benefit of, to perform the functions of, or to carry out the purposes of one or more publicly supported organizations described in **section 509(a)(1)** or **section 509(a)(2).** See **section 509(a)(3).** Check the box on lines 12a through 12d that describes the type of supporting organization and complete lines 12e, 12f, and 12g.
 - a ☐ **Type I.** A supporting organization operated, supervised, or controlled by its supported organization(s), typically by giving the supported organization(s) the power to regularly appoint or elect a majority of the directors or trustees of the supporting organization. **You must complete Part IV, Sections A and B.**
 - b ☐ **Type II.** A supporting organization supervised or controlled in connection with its supported organization(s), by having control or management of the supporting organization vested in the same persons that control or manage the supported organization(s). **You must complete Part IV, Sections A and C.**
 - c ☐ **Type III functionally integrated.** A supporting organization operated in connection with, and functionally integrated with, its supported organization(s) (see instructions). **You must complete Part IV, Sections A, D, and E.**
 - d ☐ **Type III non-functionally integrated.** A supporting organization operated in connection with its supported organization(s) that is not functionally integrated. The organization generally must satisfy a distribution requirement and an attentiveness requirement (see instructions). **You must complete Part IV, Sections A and D, and Part V.**
 - e ☐ Check this box if the organization received a written determination from the IRS that it is a Type I, Type II, Type III functionally integrated, or Type III non-functionally integrated supporting organization.
 - f Enter the number of supported organizations
 - g Provide the following information about the supported organization(s).

(i) Name of supported organization	(ii) EIN	(iii) Type of organization (described on lines 1- 10 above (see instructions))	(iv) Is the organization listed in your governing document?		(v) Amount of monetary support (see instructions)	(vi) Amount of other support (see instructions)
			Yes	No		
Total						

Section A. Public Support

Calendar year (or fiscal year beginning in) ▶	(a) 2017	(b) 2018	(c) 2019	(d) 2020	(e) 2021	(f) Total
1 Gifts, grants, contributions, and membership fees received. (Do not include any "unusual grant.") . . .						
2 Tax revenues levied for the organization's benefit and either paid to or expended on its behalf. . . .						
3 The value of services or facilities furnished by a governmental unit to the organization without charge..						
4 Total. Add lines 1 through 3						
5 The portion of total contributions by each person (other than a governmental unit or publicly supported organization) included on line 1 that exceeds 2% of the amount shown on line 11, column (f) . . .						
6 Public support. Subtract line 5 from line 4.						

Section B. Total Support

Calendar year (or fiscal year beginning in) ▶	(a) 2017	(b) 2018	(c) 2019	(d) 2020	(e) 2021	(f) Total
7 Amounts from line 4. . .						
8 Gross income from interest, dividends, payments received on securities loans, rents, royalties and income from similar sources. . . .						
9 Net income from unrelated business activities, whether or not the business is regularly carried on. .						
10 Other income. Do not include gain or loss from the sale of capital assets (Explain in Part VI.). . .						
11 Total support. Add lines 7 through 10						
12 Gross receipts from related activities, etc. (see instructions)					12	
13 First 5 years. If the Form 990 is for the organization's first, second, third, fourth, or fifth tax year as a section 501(c)(3) organization, check this box and stop here ▶ ☐						

Section C. Computation of Public Support Percentage

14 Public support percentage for 2021 (line 6, column (f) divided by line 11, column (f))	14	
15 Public support percentage for 2020 Schedule A, Part II, line 14	15	
16a 33 1/3% support test—2021. If the organization did not check the box on line 13, and line 14 is 33 1/3% or more, check this box and stop here. The organization qualifies as a publicly supported organization ▶ ☐		
b 33 1/3% support test—2020. If the organization did not check a box on line 13 or 16a, and line 15 is 33 1/3% or more, check this box and stop here. The organization qualifies as a publicly supported organization ▶ ☐		
17a 10%-facts-and-circumstances test—2021. If the organization did not check a box on line 13, 16a, or 16b, and line 14 is 10% or more, and if the organization meets the "facts-and-circumstances" test, check this box and stop here. Explain in Part VI how the organization meets the "facts-and-circumstances" test. The organization qualifies as a publicly supported organization ▶ ☐		
b 10%-facts-and-circumstances test—2020. If the organization did not check a box on line 13, 16a, 16b, or 17a, and line 15 is 10% or more, and if the organization meets the "facts-and-circumstances" test, check this box and stop here. Explain in Part VI how the organization meets the "facts-and-circumstances" test. The organization qualifies as a publicly supported organization ▶ ☐		
18 Private foundation. If the organization did not check a box on line 13, 16a, 16b, 17a, or 17b, check this box and see instructions ▶ ☐		

Case 9:25-cv-80526-BMM Document 88-77 Entered on FLSD Docket 10/28/2025 Page 22 of 48
 Part I Support Schedule for Organizations Described in Section 509(a)(2)
 (Complete only if you checked the box on line 10, Part I or if the organization failed to qualify under Part II. If the organization fails to qualify under the tests listed below, please complete Part II.)

Section A. Public Support

Calendar year (or fiscal year beginning in) ▶	(a) 2017	(b) 2018	(c) 2019	(d) 2020	(e) 2021	(f) Total
1 Gifts, grants, contributions, and membership fees received. (Do not include any "unusual grants.")	47,172	55,752	435,427	1,419,432	1,365,819	3,323,602
2 Gross receipts from admissions, merchandise sold or services performed, or facilities furnished in any activity that is related to the organization's tax-exempt purpose	4,321,132	5,738,194	5,446,926	5,560,125	5,883,131	26,949,508
3 Gross receipts from activities that are not an unrelated trade or business under section 513						
4 Tax revenues levied for the organization's benefit and either paid to or expended on its behalf						
5 The value of services or facilities furnished by a governmental unit to the organization without charge						
6 Total. Add lines 1 through 5	4,368,304	5,793,946	5,882,353	6,979,557	7,248,950	30,273,110
7a Amounts included on lines 1, 2, and 3 received from disqualified persons	25,000	52,000	77,500	50,000	127,820	332,320
b Amounts included on lines 2 and 3 received from other than disqualified persons that exceed the greater of \$5,000 or 1% of the amount on line 13 for the year.	390,205	528,045	896,002	803,522	790,599	3,408,373
c Add lines 7a and 7b.	415,205	580,045	973,502	853,522	918,419	3,740,693
8 Public support. (Subtract line 7c from line 6.)						26,532,417

Section B. Total Support

Calendar year (or fiscal year beginning in) ▶	(a) 2017	(b) 2018	(c) 2019	(d) 2020	(e) 2021	(f) Total
9 Amounts from line 6.	4,368,304	5,793,946	5,882,353	6,979,557	7,248,950	30,273,110
10a Gross income from interest, dividends, payments received on securities loans, rents, royalties and income from similar sources	1,014	6,336	1,293	181	449	9,273
b Unrelated business taxable income (less section 511 taxes) from businesses acquired after June 30, 1975.						
c Add lines 10a and 10b.	1,014	6,336	1,293	181	449	9,273
11 Net income from unrelated business activities not included on line 10b, whether or not the business is regularly carried on.						
12 Other income. Do not include gain or loss from the sale of capital assets (Explain in Part VI.)						
13 Total support. (Add lines 9, 10c, 11, and 12.)	4,369,318	5,800,282	5,883,646	6,979,738	7,249,399	30,282,383
14 First 5 years. If the Form 990 is for the organization's first, second, third, fourth, or fifth tax year as a section 501(c)(3) organization, check this box and stop here. ▶ ☐						

Section C. Computation of Public Support Percentage

15 Public support percentage for 2021 (line 8, column (f) divided by line 13, column (f))	15	87.620 %
16 Public support percentage from 2020 Schedule A, Part III, line 15	16	88.260 %

Section D. Computation of Investment Income Percentage

17 Investment income percentage for 2021 (line 10c, column (f) divided by line 13, column (f))	17	0.030 %
18 Investment income percentage from 2020 Schedule A, Part III, line 17	18	0.030 %

- 19a 33 1/3% support tests—2021.** If the organization did not check the box on line 14, and line 15 is more than 33 1/3%, and line 17 is not more than 33 1/3%, check this box and **stop here.** The organization qualifies as a publicly supported organization. ▶ ☒
- b 33 1/3% support tests—2020.** If the organization did not check a box on line 14 or line 19a, and line 16 is more than 33 1/3% and line 18 is not more than 33 1/3%, check this box and **stop here.** The organization qualifies as a publicly supported organization. ▶ ☐
- 20 Private foundation.** If the organization did not check a box on line 14, 19a, or 19b, check this box and see instructions. ▶ ☐

Part VII Supporting Organizations

(Complete only if you checked a box on line 12 of Part I. If you checked box 12a, of Part I, complete Sections A and B. If you checked box 12b, of Part I, complete Sections A and C. If you checked box 12c, of Part I, complete Sections A, D, and E. If you checked box 12d, of Part I, complete Sections A and D, and complete Part V.)

Section A. All Supporting Organizations

	Yes	No
1 Are all of the organization's supported organizations listed by name in the organization's governing documents? If "No," describe in Part VI how the supported organizations are designated. If designated by class or purpose, describe the designation. If historic and continuing relationship, explain.		
1		
2 Did the organization have any supported organization that does not have an IRS determination of status under section 509(a)(1) or (2)? If "Yes," explain in Part VI how the organization determined that the supported organization was described in section 509(a)(1) or (2).		
2		
3a Did the organization have a supported organization described in section 501(c)(4), (5), or (6)? If "Yes," answer lines 3b and 3c below.		
3a		
b Did the organization confirm that each supported organization qualified under section 501(c)(4), (5), or (6) and satisfied the public support tests under section 509(a)(2)? If "Yes," describe in Part VI when and how the organization made the determination.		
3b		
c Did the organization ensure that all support to such organizations was used exclusively for section 170(c)(2)(B) purposes? If "Yes," explain in Part VI what controls the organization put in place to ensure such use.		
3c		
4a Was any supported organization not organized in the United States ("foreign supported organization")? If "Yes" and if you checked box 12a or 12b in Part I, answer lines 4b and 4c below.		
4a		
b Did the organization have ultimate control and discretion in deciding whether to make grants to the foreign supported organization? If "Yes," describe in Part VI how the organization had such control and discretion despite being controlled or supervised by or in connection with its supported organizations.		
4b		
c Did the organization support any foreign supported organization that does not have an IRS determination under sections 501(c)(3) and 509(a)(1) or (2)? If "Yes," explain in Part VI what controls the organization used to ensure that all support to the foreign supported organization was used exclusively for section 170(c)(2)(B) purposes.		
4c		
5a Did the organization add, substitute, or remove any supported organizations during the tax year? If "Yes," answer lines 5b and 5c below (if applicable). Also, provide detail in Part VI , including (i) the names and EIN numbers of the supported organizations added, substituted, or removed; (ii) the reasons for each such action; (iii) the authority under the organization's organizing document authorizing such action; and (iv) how the action was accomplished (such as by amendment to the organizing document).		
5a		
b Type I or Type II only. Was any added or substituted supported organization part of a class already designated in the organization's organizing document?		
5b		
c Substitutions only. Was the substitution the result of an event beyond the organization's control?		
5c		
6 Did the organization provide support (whether in the form of grants or the provision of services or facilities) to anyone other than (i) its supported organizations, (ii) individuals that are part of the charitable class benefited by one or more of its supported organizations, or (iii) other supporting organizations that also support or benefit one or more of the filing organization's supported organizations? If "Yes," provide detail in Part VI .		
6		
7 Did the organization provide a grant, loan, compensation, or other similar payment to a substantial contributor (defined in section 4958(c)(3)(C)), a family member of a substantial contributor, or a 35% controlled entity with regard to a substantial contributor? If "Yes," complete Part I of Schedule L (Form 990).		
7		
8 Did the organization make a loan to a disqualified person (as defined in section 4958) not described on line 7? If "Yes," complete Part I of Schedule L (Form 990).		
8		
9a Was the organization controlled directly or indirectly at any time during the tax year by one or more disqualified persons, as defined in section 4946 (other than foundation managers and organizations described in section 509(a)(1) or (2))? If "Yes," provide detail in Part VI .		
9a		
b Did one or more disqualified persons (as defined on line 9a) hold a controlling interest in any entity in which the supporting organization had an interest? If "Yes," provide detail in Part VI .		
9b		
c Did a disqualified person (as defined on line 9a) have an ownership interest in, or derive any personal benefit from, assets in which the supporting organization also had an interest? If "Yes," provide detail in Part VI .		
9c		
10a Was the organization subject to the excess business holdings rules of section 4943 because of section 4943(f) (regarding certain Type II supporting organizations, and all Type III non-functionally integrated supporting organizations)? If "Yes," answer line 10b below.		
10a		
b Did the organization have any excess business holdings in the tax year? (Use Schedule C, Form 4720, to determine whether the organization had excess business holdings).		
10b		

Part VII Supporting Organizations (continued)

	Yes	No
11 Has the organization accepted a gift or contribution from any of the following persons?		
a A person who directly or indirectly controls, either alone or together with persons described on lines 11b and 11c below, the governing body of a supported organization?		
b A family member of a person described on 11a above?		
c A 35% controlled entity of a person described on line 11a or 11b above? If "Yes" to 11a, 11b, or 11c, provide detail in Part VI .		

Section B. Type I Supporting Organizations

	Yes	No
1 Did the officers, directors, trustees, or membership of one or more supported organizations have the power to regularly appoint or elect at least a majority of the organization's directors or trustees at all times during the tax year? If "No," describe in Part VI how the supported organization(s) effectively operated, supervised, or controlled the organization's activities. If the organization had more than one supported organization, describe how the powers to appoint and/or remove directors or trustees were allocated among the supported organizations and what conditions or restrictions, if any, applied to such powers during the tax year.		
2 Did the organization operate for the benefit of any supported organization other than the supported organization(s) that operated, supervised, or controlled the supporting organization? If "Yes," explain in Part VI how providing such benefit carried out the purposes of the supported organization(s) that operated, supervised or controlled the supporting organization.		

Section C. Type II Supporting Organizations

	Yes	No
1 Were a majority of the organization's directors or trustees during the tax year also a majority of the directors or trustees of each of the organization's supported organization(s)? If "No," describe in Part VI how control or management of the supporting organization was vested in the same persons that controlled or managed the supported organization(s).		

Section D. All Type III Supporting Organizations

	Yes	No
1 Did the organization provide to each of its supported organizations, by the last day of the fifth month of the organization's tax year, (i) a written notice describing the type and amount of support provided during the prior tax year, (ii) a copy of the Form 990 that was most recently filed as of the date of notification, and (iii) copies of the organization's governing documents in effect on the date of notification, to the extent not previously provided?		
2 Were any of the organization's officers, directors, or trustees either (i) appointed or elected by the supported organization (s) or (ii) serving on the governing body of a supported organization? If "No," explain in Part VI how the organization maintained a close and continuous working relationship with the supported organization(s).		
3 By reason of the relationship described in line 2 above, did the organization's supported organizations have a significant voice in the organization's investment policies and in directing the use of the organization's income or assets at all times during the tax year? If "Yes," describe in Part VI the role the organization's supported organizations played in this regard.		

Section E. Type III Functionally-Integrated Supporting Organizations

1 Check the box next to the method that the organization used to satisfy the Integral Part Test during the year (see instructions):		
a ☐ The organization satisfied the Activities Test. Complete line 2 below.		
b ☐ The organization is the parent of each of its supported organizations. Complete line 3 below.		
c ☐ The organization supported a governmental entity. Describe in Part VI how you supported a government entity (see instructions)		
2 Activities Test. Answer lines 2a and 2b below.		
a Did substantially all of the organization's activities during the tax year directly further the exempt purposes of the supported organization(s) to which the organization was responsive? If "Yes," then in Part VI identify those supported organizations and explain how these activities directly furthered their exempt purposes, how the organization was responsive to those supported organizations, and how the organization determined that these activities constituted substantially all of its activities.		
b Did the activities described on line 2a, above constitute activities that, but for the organization's involvement, one or more of the organization's supported organization(s) would have been engaged in? If "Yes," explain in Part VI the reasons for the organization's position that its supported organization(s) would have engaged in these activities but for the organization's involvement.		
3 Parent of Supported Organizations. Answer lines 3a and 3b below.		
a Did the organization have the power to regularly appoint or elect a majority of the officers, directors, or trustees of each of the supported organizations? If "Yes" or "No," provide details in Part VI .		
b Did the organization exercise a substantial degree of direction over the policies, programs and activities of each of its supported organizations? If "Yes," describe in Part VI the role played by the organization in this regard.		

1 ☐ Check here if the organization satisfied the Integral Part Test as a qualifying trust on Nov. 20, 1970 (explain in Part VI). See instructions. All other Type III non-functionally integrated supporting organizations must complete Sections A through E.			
Section A - Adjusted Net Income		(A) Prior Year	(B) Current Year (optional)
1 Net short-term capital gain	1		
2 Recoveries of prior-year distributions	2		
3 Other gross income (see instructions)	3		
4 Add lines 1 through 3	4		
5 Depreciation and depletion	5		
6 Portion of operating expenses paid or incurred for production or collection of gross income or for management, conservation, or maintenance of property held for production of income (see instructions)	6		
7 Other expenses (see instructions)	7		
8 Adjusted Net Income (subtract lines 5, 6 and 7 from line 4)	8		
Section B - Minimum Asset Amount		(A) Prior Year	(B) Current Year (optional)
1 Aggregate fair market value of all non-exempt-use assets (see instructions for short tax year or assets held for part of year):	1		
a Average monthly value of securities	1a		
b Average monthly cash balances	1b		
c Fair market value of other non-exempt-use assets	1c		
d Total (add lines 1a, 1b, and 1c)	1d		
e Discount claimed for blockage or other factors (explain in detail in Part VI):			
2 Acquisition indebtedness applicable to non-exempt use assets	2		
3 Subtract line 2 from line 1d	3		
4 Cash deemed held for exempt use. Enter 0.015 of line 3 (for greater amount, see instructions).	4		
5 Net value of non-exempt-use assets (subtract line 4 from line 3)	5		
6 Multiply line 5 by 0.035	6		
7 Recoveries of prior-year distributions	7		
8 Minimum Asset Amount (add line 7 to line 6)	8		
Section C - Distributable Amount			Current Year
1 Adjusted net income for prior year (from Section A, line 8, Column A)	1		
2 Enter 85% of line 1	2		
3 Minimum asset amount for prior year (from Section B, line 8, Column A)	3		
4 Enter greater of line 2 or line 3	4		
5 Income tax imposed in prior year	5		
6 Distributable Amount. Subtract line 5 from line 4, unless subject to emergency temporary reduction (see instructions)	6		
7 ☐ Check here if the current year is the organization's first as a non-functionally-integrated Type III supporting organization (see instructions)			

Section D - Distributions		Current Year
1	Amounts paid to supported organizations to accomplish exempt purposes	1
2	Amounts paid to perform activity that directly furthers exempt purposes of supported organizations, in excess of income from activity	2
3	Administrative expenses paid to accomplish exempt purposes of supported organizations	3
4	Amounts paid to acquire exempt-use assets	4
5	Qualified set-aside amounts (prior IRS approval required - provide details in Part VI)	5
6	Other distributions (describe in Part VI). See instructions	6
7	Total annual distributions. Add lines 1 through 6.	7
8	Distributions to attentive supported organizations to which the organization is responsive (provide details in Part VI). See instructions	8
9	Distributable amount for 2021 from Section C, line 6	9
10	Line 8 amount divided by Line 9 amount	10

Section E - Distribution Allocations (see instructions)	(i) Excess Distributions	(ii) Underdistributions Pre-2021	(iii) Distributable Amount for 2021
1	Distributable amount for 2021 from Section C, line 6		
2	Underdistributions, if any, for years prior to 2021 (reasonable cause required-- explain in Part VI). See instructions.		
3	Excess distributions carryover, if any, to 2021:		
a	From 2016.		
b	From 2017.		
c	From 2018.		
d	From 2019.		
e	From 2020.		
f	Total of lines 3a through e		
g	Applied to underdistributions of prior years		
h	Applied to 2021 distributable amount		
i	Carryover from 2016 not applied (see instructions)		
j	Remainder. Subtract lines 3g, 3h, and 3i from line 3f.		
4	Distributions for 2021 from Section D, line 7: \$		
a	Applied to underdistributions of prior years		
b	Applied to 2021 distributable amount		
c	Remainder. Subtract lines 4a and 4b from line 4.		
5	Remaining underdistributions for years prior to 2021, if any. Subtract lines 3g and 4a from line 2. If the amount is greater than zero, explain in Part VI . See instructions.		
6	Remaining underdistributions for 2021. Subtract lines 3h and 4b from line 1. If the amount is greater than zero, explain in Part VI . See instructions.		
7	Excess distributions carryover to 2022. Add lines 3j and 4c.		
8	Breakdown of line 7:		
a	Excess from 2017.		
b	Excess from 2018.		
c	Excess from 2019.		
d	Excess from 2020.		
e	Excess from 2021.		

Part III **Supplemental Information.** Provide the explanations required by Part II, line 10; Part III, line 17a or 17b; Part III, line 2; Part IV, Section A, lines 1, 2, 3b, 3c, 4b, 4c, 5a, 6, 9a, 9b, 9c, 11a, 11b, and 11c; Part IV, Section B, lines 1 and 2; Part IV, Section C, line 1; Part IV, Section D, lines 2 and 3; Part IV, Section E, lines 1c, 2a, 2b, 3a and 3b; Part V, line 1; Part V, Section B, line 1e; Part V Section D, lines 5, 6, and 8; and Part V, Section E, lines 2, 5, and 6. Also complete this part for any additional information. (See instructions).

Facts And Circumstances Test

SCHEDULE C (Form 990) Department of the Treasury Internal Revenue Service	Political Campaign and Lobbying Activities For Organizations Exempt From Income Tax Under section 501(c) and section 527 ▶ Complete if the organization is described below. ▶ Attach to Form 990 or Form 990-EZ. ▶ Go to www.irs.gov/Form990 for instructions and the latest information.	2021 Open to Public Inspection
--	---	--

If the organization answered "Yes" on Form 990, Part IV, Line 3, or Form 990-EZ, Part V, line 46 (Political Campaign Activities), then

- Section 501(c)(3) organizations: Complete Parts I-A and B. Do not complete Part I-C.
- Section 501(c) (other than section 501(c)(3)) organizations: Complete Parts I-A and C below. Do not complete Part I-B.
- Section 527 organizations: Complete Part I-A only.

If the organization answered "Yes" on Form 990, Part IV, Line 4, or Form 990-EZ, Part VI, line 47 (Lobbying Activities), then

- Section 501(c)(3) organizations that have filed Form 5768 (election under section 501(h)): Complete Part II-A. Do not complete Part II-B.
- Section 501(c)(3) organizations that have NOT filed Form 5768 (election under section 501(h)): Complete Part II-B. Do not complete Part II-A.

If the organization answered "Yes" on Form 990, Part IV, Line 5 (Proxy Tax) (see separate instructions) or Form 990-EZ, Part V, line 35c (Proxy Tax) (see separate instructions), then

- Section 501(c)(4), (5), or (6) organizations: Complete Part III.

Name of the organization THE LEAFROG GROUP	Employer identification number 52-2359517
---	---

Part I-A Complete if the organization is exempt under section 501(c) or is a section 527 organization.

1	Provide a description of the organization's direct and indirect political campaign activities in Part IV. See instructions for definition of "political campaign activities."	
2	Political campaign activity expenditures. See instructions	\$
3	Volunteer hours for political campaign activities. See instructions	

Part I-B Complete if the organization is exempt under section 501(c)(3).

1	Enter the amount of any excise tax incurred by the organization under section 4955	\$
2	Enter the amount of any excise tax incurred by organization managers under section 4955	\$
3	If the organization incurred a section 4955 tax, did it file Form 4720 for this year?	☐ Yes ☐ No
4a	Was a correction made?	☐ Yes ☐ No
b	If "Yes," describe in Part IV.	

Part I-C Complete if the organization is exempt under section 501(c), except section 501(c)(3).

1	Enter the amount directly expended by the filing organization for section 527 exempt function activities	\$
2	Enter the amount of the filing organization's funds contributed to other organizations for section 527 exempt function activities	\$
3	Total exempt function expenditures. Add lines 1 and 2. Enter here and on Form 1120-POL, line 17b.....	\$
4	Did the filing organization file Form 1120-POL for this year?	☐ Yes ☐ No
5	Enter the names, addresses and employer identification number (EIN) of all section 527 political organizations to which the filing organization made payments. For each organization listed, enter the amount paid from the filing organization's funds. Also enter the amount of political contributions received that were promptly and directly delivered to a separate political organization, such as a separate segregated fund or a political action committee (PAC). If additional space is needed, provide information in Part IV.	

(a) Name	(b) Address	(c) EIN	(d) Amount paid from filing organization's funds. If none, enter -0-.	(e) Amount of political contributions received and promptly and directly delivered to a separate political organization. If none, enter -0-.

Part II-A

Complete if the organization is exempt under section 501(c)(3) and filed Form 5768 (election under section 501(h)).

- A Check ☐ if the filing organization belongs to an affiliated group (and list in Part IV each affiliated group member's name, address, EIN, expenses, and share of excess lobbying expenditures).
- B Check ☐ if the filing organization checked box A and "limited control" provisions apply.

Limits on Lobbying Expenditures (The term "expenditures" means amounts paid or incurred.)		(a) Filing organization's totals	(b) Affiliated group totals												
1a Total lobbying expenditures to influence public opinion (grass roots lobbying)		0													
b Total lobbying expenditures to influence a legislative body (direct lobbying)		0													
c Total lobbying expenditures (add lines 1a and 1b)		0													
d Other exempt purpose expenditures		7,245,659													
e Total exempt purpose expenditures (add lines 1c and 1d)		7,245,659													
f Lobbying nontaxable amount. Enter the amount from the following table in both columns.		512,283													
<table><thead><tr><th>If the amount on line 1e, column (a) or (b) is:</th><th>The lobbying nontaxable amount is:</th></tr></thead><tbody><tr><td>Not over \$500,000</td><td>20% of the amount on line 1e.</td></tr><tr><td>Over \$500,000 but not over \$1,000,000</td><td>\$100,000 plus 15% of the excess over \$500,000.</td></tr><tr><td>Over \$1,000,000 but not over \$1,500,000</td><td>\$175,000 plus 10% of the excess over \$1,000,000.</td></tr><tr><td>Over \$1,500,000 but not over \$17,000,000</td><td>\$225,000 plus 5% of the excess over \$1,500,000.</td></tr><tr><td>Over \$17,000,000</td><td>\$1,000,000.</td></tr></tbody></table>		If the amount on line 1e, column (a) or (b) is:	The lobbying nontaxable amount is:	Not over \$500,000	20% of the amount on line 1e.	Over \$500,000 but not over \$1,000,000	\$100,000 plus 15% of the excess over \$500,000.	Over \$1,000,000 but not over \$1,500,000	\$175,000 plus 10% of the excess over \$1,000,000.	Over \$1,500,000 but not over \$17,000,000	\$225,000 plus 5% of the excess over \$1,500,000.	Over \$17,000,000	\$1,000,000.		
If the amount on line 1e, column (a) or (b) is:	The lobbying nontaxable amount is:														
Not over \$500,000	20% of the amount on line 1e.														
Over \$500,000 but not over \$1,000,000	\$100,000 plus 15% of the excess over \$500,000.														
Over \$1,000,000 but not over \$1,500,000	\$175,000 plus 10% of the excess over \$1,000,000.														
Over \$1,500,000 but not over \$17,000,000	\$225,000 plus 5% of the excess over \$1,500,000.														
Over \$17,000,000	\$1,000,000.														
g Grassroots nontaxable amount (enter 25% of line 1f)		128,071													
h Subtract line 1g from line 1a. If zero or less, enter -0-		0													
i Subtract line 1f from line 1c. If zero or less, enter -0-		0													
j If there is an amount other than zero on either line 1h or line 1i, did the organization file Form 4720 reporting section 4911 tax for this year?		☐ Yes ☐ No													

4-Year Averaging Period Under Section 501(h)
(Some organizations that made a section 501(h) election do not have to complete all of the five columns below. See the separate instructions for lines 2a through 2f.)

Lobbying Expenditures During 4-Year Averaging Period					
Calendar year (or fiscal year beginning in)	(a) 2018	(b) 2019	(c) 2020	(d) 2021	(e) Total
2a Lobbying nontaxable amount	420,672	444,043	462,469	512,283	1,839,467
b Lobbying ceiling amount (150% of line 2a, column(e))					2,759,201
c Total lobbying expenditures					
d Grassroots nontaxable amount	105,168	111,011	115,617	128,071	459,867
e Grassroots ceiling amount (150% of line 2d, column (e))					689,801
f Grassroots lobbying expenditures					

Part II-B Complete if the organization is exempt under section 501(c)(3) and has NOT filed Form 5768 (election under section 501(h)).

For each "Yes" response on lines 1a through 1i below, provide in Part IV a detailed description of the lobbying activity.

		(a)		(b)
		Yes	No	Amount
1	During the year, did the filing organization attempt to influence foreign, national, state or local legislation, including any attempt to influence public opinion on a legislative matter or referendum, through the use of:			
a	Volunteers?			
b	Paid staff or management (include compensation in expenses reported on lines 1c through 1i)?			
c	Media advertisements?			
d	Mailings to members, legislators, or the public?			
e	Publications, or published or broadcast statements?			
f	Grants to other organizations for lobbying purposes?			
g	Direct contact with legislators, their staffs, government officials, or a legislative body?			
h	Rallies, demonstrations, seminars, conventions, speeches, lectures, or any similar means?			
i	Other activities?			
j	Total. Add lines 1c through 1i			
2a	Did the activities in line 1 cause the organization to be not described in section 501(c)(3)?			
b	If "Yes," enter the amount of any tax incurred under section 4912			
c	If "Yes," enter the amount of any tax incurred by organization managers under section 4912			
d	If the filing organization incurred a section 4912 tax, did it file Form 4720 for this year?			

Part III-A Complete if the organization is exempt under section 501(c)(4), section 501(c)(5), or section 501(c)(6).

	Yes	No
1 Were substantially all (90% or more) dues received nondeductible by members?	1	
2 Did the organization make only in-house lobbying expenditures of \$2,000 or less?	2	
3 Did the organization agree to carry over lobbying and political expenditures from the prior year?	3	

Part III-B Complete if the organization is exempt under section 501(c)(4), section 501(c)(5), or section 501(c)(6) and if either (a) BOTH Part III-A, lines 1 and 2, are answered "No" OR (b) Part III-A, line 3, is answered "Yes."

1	Dues, assessments and similar amounts from members	1	
2	Section 162(e) nondeductible lobbying and political expenditures (do not include amounts of political expenses for which the section 527(f) tax was paid).		
a	Current year	2a	
b	Carryover from last year	2b	
c	Total	2c	
3	Aggregate amount reported in section 6033(e)(1)(A) notices of nondeductible section 162(e) dues .	3	
4	If notices were sent and the amount on line 2c exceeds the amount on line 3, what portion of the excess does the organization agree to carryover to the reasonable estimate of nondeductible lobbying and political expenditure next year?	4	
5	Taxable amount of lobbying and political expenditures. See Instructions	5	

Part IV Supplemental Information

Provide the descriptions required for Part I-A, line 1; Part I-B, line 4; Part I-C, line 5; Part II-A (affiliated group list); Part II-A, lines 1 and 2 (see instructions), and Part II-B, line 1. Also, complete this part for any additional information.

OMB No. 1545-0047

2021

Open to Public Inspection

Name of the organization
THE LEAPFROG GROUP

Employer identification number
52-2359517

Part I

Organizations Maintaining Donor Advised Funds or Other Similar Funds or Accounts.
Complete if the organization answered "Yes" on Form 990, Part IV, line 6.

1

Total number at end of year

2

Aggregate value of contributions to (during year)

3

Aggregate value of grants from (during year)

4

Aggregate value at end of year

(a) Donor advised funds

(b) Funds and other accounts

5

Did the organization inform all donors and donor advisors in writing that the assets held in donor advised funds are the organization's property, subject to the organization's exclusive legal control?

Yes

No

6

Did the organization inform all grantees, donors, and donor advisors in writing that grant funds can be used only for charitable purposes and not for the benefit of the donor or donor advisor, or for any other purpose conferring impermissible private benefit?

Yes

No

Part II

Conservation Easements.
Complete if the organization answered "Yes" on Form 990, Part IV, line 7.

1

Purpose(s) of conservation easements held by the organization (check all that apply).

☐ Preservation of land for public use (e.g., recreation or education)

☐ Preservation of an historically important land area

☐ Protection of natural habitat

☐ Preservation of a certified historic structure

☐ Preservation of open space

2

Complete lines 2a through 2d if the organization held a qualified conservation contribution in the form of a conservation easement on the last day of the tax year.

2a

Total number of conservation easements

2b

Total acreage restricted by conservation easements

2c

Number of conservation easements on a certified historic structure included in (a)

2d

Number of conservation easements included in (c) acquired after 7/25/06, and not on a historic structure listed in the National Register

3

Number of conservation easements modified, transferred, released, extinguished, or terminated by the organization during the tax year ▶

4

Number of states where property subject to conservation easement is located ▶

5

Does the organization have a written policy regarding the periodic monitoring, inspection, handling of violations, and enforcement of the conservation easements it holds?

Yes

No

6

Staff and volunteer hours devoted to monitoring, inspecting, handling of violations, and enforcing conservation easements during the year ▶

7

Amount of expenses incurred in monitoring, inspecting, handling of violations, and enforcing conservation easements during the year ▶ \$

8

Does each conservation easement reported on line 2(d) above satisfy the requirements of section 170(h)(4)(B)(i) and section 170(h)(4)(B)(ii)?

Yes

No

9

In Part XIII, describe how the organization reports conservation easements in its revenue and expense statement, and balance sheet, and include, if applicable, the text of the footnote to the organization's financial statements that describes the organization's accounting for conservation easements.

Part III

Organizations Maintaining Collections of Art, Historical Treasures, or Other Similar Assets.
Complete if the organization answered "Yes" on Form 990, Part IV, line 8.

1a

If the organization elected, as permitted under FASB ASC 958, not to report in its revenue statement and balance sheet works of art, historical treasures, or other similar assets held for public exhibition, education, or research in furtherance of public service, provide, in Part XIII, the text of the footnote to its financial statements that describes these items.

1b

If the organization elected, as permitted under FASB ASC 958, to report in its revenue statement and balance sheet works of art, historical treasures, or other similar assets held for public exhibition, education, or research in furtherance of public service, provide the following amounts relating to these items:

(i) Revenue included on Form 990, Part VIII, line 1 ▶ \$

(ii) Assets included in Form 990, Part X ▶ \$

2

If the organization received or held works of art, historical treasures, or other similar assets for financial gain, provide the following amounts required to be reported under FASB ASC 958 relating to these items:

a

Revenue included on Form 990, Part VIII, line 1 ▶ \$

b

Assets included in Form 990, Part X ▶ \$

For Paperwork Reduction Act Notice, see the Instructions for Form 990.

Cat. No. 52283D

Schedule D (Form 990) 2021

Part III Organizations Maintaining Collections of Art, Historical Treasures, or Other Similar Assets (continued)

3 Using the organization's acquisition, accession, and other records, check any of the following that are a significant use of its collection items (check all that apply):

a ☐ Public exhibition

b ☐ Scholarly research

c ☐ Preservation for future generations

d ☐ Loan or exchange programs

e ☐ Other _____

4 Provide a description of the organization's collections and explain how they further the organization's exempt purpose in Part XIII.

5 During the year, did the organization solicit or receive donations of art, historical treasures or other similar assets to be sold to raise funds rather than to be maintained as part of the organization's collection? ☐ Yes ☐ No

Part IV Escrow and Custodial Arrangements.
Complete if the organization answered "Yes" on Form 990, Part IV, line 9, or reported an amount on Form 990, Part X, line 21.

1a Is the organization an agent, trustee, custodian or other intermediary for contributions or other assets not included on Form 990, Part X? ☐ Yes ☐ No

b If "Yes," explain the arrangement in Part XIII and complete the following table:

	Amount
1c Beginning balance	
1d Additions during the year	
1e Distributions during the year	
1f Ending balance	

2a Did the organization include an amount on Form 990, Part X, line 21, for escrow or custodial account liability? ☐ Yes ☐ No

b If "Yes," explain the arrangement in Part XIII. Check here if the explanation has been provided in Part XIII ☐

Part V Endowment Funds.
Complete if the organization answered "Yes" on Form 990, Part IV, line 10.

	(a) Current year	(b) Prior year	(c) Two years back	(d) Three years back	(e) Four years back
1a Beginning of year balance					
b Contributions					
c Net investment earnings, gains, and losses					
d Grants or scholarships					
e Other expenditures for facilities and programs					
f Administrative expenses					
g End of year balance					

2 Provide the estimated percentage of the current year end balance (line 1g, column (a)) held as:

a Board designated or quasi-endowment

b Permanent endowment

c Term endowment

The percentages on lines 2a, 2b, and 2c should equal 100%.

3a Are there endowment funds not in the possession of the organization that are held and administered for the organization by:

	Yes	No
(i) Unrelated organizations		
(ii) Related organizations		
b If "Yes" on 3a(ii), are the related organizations listed as required on Schedule R?		

4 Describe in Part XIII the intended uses of the organization's endowment funds.

Part VI Land, Buildings, and Equipment.
Complete if the organization answered "Yes" on Form 990, Part IV, line 11a. See Form 990, Part X, line 10.

Description of property	(a) Cost or other basis (investment)	(b) Cost or other basis (other)	(c) Accumulated depreciation	(d) Book value
1a Land				
b Buildings				
c Leasehold improvements		447,431	73,327	374,104
d Equipment		296,578	99,093	197,485
e Other		590,992	455,562	135,430
Total. Add lines 1a through 1e. (Column (d) must equal Form 990, Part X, column (B), line 10(c).)				707,019

Part VII Investments - Other Securities.

Complete if the organization answered "Yes" on Form 990, Part IV, line 11b. See Form 990, Part X, line 12.

(a) Description of security or category (including name of security)	(b) Book value	(c) Method of valuation: Cost or end-of-year market value
(1) Financial derivatives		
(2) Closely-held equity interests		
(3) Other _____		
(A)		
(C)		
(D)		
(E)		
(F)		
(G)		
(H)		
(H)		
Total. (Column (b) must equal Form 990, Part X, col. (B) line 12.) ▶		

Part VIII Investments - Program Related.

Complete if the organization answered "Yes" on Form 990, Part IV, line 11c. See Form 990, Part X, line 13.

(a) Description of investment	(b) Book value	(c) Method of valuation: Cost or end-of-year market value
(1)		
(2)		
(3)		
(4)		
(5)		
(6)		
(7)		
(8)		
(9)		
(10)		
Total. (Column (b) must equal Form 990, Part X, col. (B) line 13.) ▶		

Part IX Other Assets.

Complete if the organization answered "Yes" on Form 990, Part IV, line 11d. See Form 990, Part X, line 15.

(a) Description	(b) Book value
(1) DEPOSITS	39,253
(2) RIGHT OF USE ASSET	3,477,599
(3)	
(4)	
(5)	
(6)	
(7)	
(8)	
(9)	
(10)	
Total. (Column (b) must equal Form 990, Part X, col. (B) line 15.) ▶	3,516,852

Part X Other Liabilities.

Complete if the organization answered "Yes" on Form 990, Part IV, line 11e or 11f. See Form 990, Part X, line 25.

(a) Description of liability	(b) Book value
(1) Federal income taxes	
(2) CAPITAL LEASE	2,178
(3) OPERATING LEASE	3,826,113
(4) REFUNDABLE ADVANCE	1,332,925
(4)	
(5)	
(6)	
(7)	
(8)	
(9)	
Total. (Column (b) must equal Form 990, Part X, col. (B) line 25.) ▶	5,161,216

2. Liability for uncertain tax positions. In Part XIII, provide the text of the footnote to the organization's financial statements that reports the organization's liability for uncertain tax positions under FIN 48 (ASC 740). Check here if the text of the footnote has been provided in Part XIII ☒

Part XI Reconciliation of Revenue per Audited Financial Statements With Revenue per Return.

Complete if the organization answered 'Yes' on Form 990, Part IV, line 12a.

1	Total revenue, gains, and other support per audited financial statements		1	
2	Amounts included on line 1 but not on Form 990, Part VIII, line 12:			
a	Net unrealized gains (losses) on investments	2a		
b	Donated services and use of facilities	2b		
c	Recoveries of prior year grants	2c		
d	Other (Describe in Part XIII.)	2d		
e	Add lines 2a through 2d		2e	
3	Subtract line 2e from line 1		3	
4	Amounts included on Form 990, Part VIII, line 12, but not on line 1:			
a	Investment expenses not included on Form 990, Part VIII, line 7b	4a		
b	Other (Describe in Part XIII.)	4b		
c	Add lines 4a and 4b		4c	
5	Total revenue. Add lines 3 and 4c . (This must equal Form 990, Part I, line 12.)		5	

Part XII Reconciliation of Expenses per Audited Financial Statements With Expenses per Return.

Complete if the organization answered 'Yes' on Form 990, Part IV, line 12a.

1	Total expenses and losses per audited financial statements		1	
2	Amounts included on line 1 but not on Form 990, Part IX, line 25:			
a	Donated services and use of facilities	2a		
b	Prior year adjustments	2b		
c	Other losses	2c		
d	Other (Describe in Part XIII.)	2d		
e	Add lines 2a through 2d		2e	
3	Subtract line 2e from line 1		3	
4	Amounts included on Form 990, Part IX, line 25, but not on line 1:			
a	Investment expenses not included on Form 990, Part VIII, line 7b	4a		
b	Other (Describe in Part XIII.)	4b		
c	Add lines 4a and 4b		4c	
5	Total expenses. Add lines 3 and 4c . (This must equal Form 990, Part I, line 18.)		5	

Part XIII Supplemental Information

Provide the descriptions required for Part II, lines 3, 5, and 9; Part III, lines 1a and 4; Part IV, lines 1b and 2b; Part V, line 4; Part X, line 2; Part XI, lines 2d and 4b; and Part XII, lines 2d and 4b. Also complete this part to provide any additional information.

Form **990** (2022)

Part III Statement of Program Service Accomplishments

Check if Schedule O contains a response or note to any line in this Part III ☐

1 Briefly describe the organization's mission:

TO TRIGGER GIANT LEAPS FORWARD IN THE SAFETY, QUALITY, AND AFFORDABILITY OF U.S. HEALTH CARE BY USING TRANSPARENCY TO SUPPORT INFORMED HEALTH CARE DECISIONS AND PROMOTE HIGH-VALUE CARE.

2 Did the organization undertake any significant program services during the year which were not listed on the prior Form 990 or 990-EZ?

☐ Yes ☒ No

If "Yes," describe these new services on Schedule O.

3 Did the organization cease conducting, or make significant changes in how it conducts, any program services?

☐ Yes ☒ No

If "Yes," describe these changes on Schedule O.

4 Describe the organization's program service accomplishments for each of its three largest program services, as measured by expenses. Section 501(c)(3) and 501(c)(4) organizations are required to report the amount of grants and allocations to others, the total expenses, and revenue, if any, for each program service reported.

4a (Code:) (Expenses \$ 3,649,756 including grants of \$) (Revenue \$ 141,135)
RATINGS: LEAPFROG FIELDS A VOLUNTARY SURVEY OF HOSPITALS AND AMBULATORY SURGERY CENTERS ON QUALITY AND SAFETY PRACTICES. THE SURVEYS INVOLVE MEASURE DEVELOPMENT AND ARE UPDATED ANNUALLY. THE HOSPITAL SURVEY ALSO INCLUDES A TOOL TO EVALUATE SYSTEMS FOR COMPUTERIZED PHYSICIAN ORDER ENTRY OF PHARMACEUTICALS. IN ADDITION, THE DATA FROM THE HOSPITAL SURVEY ARE COMBINED WITH DATA FROM OTHER SOURCES TO FURTHER UNDERSTAND HOSPITAL QUALITY AND SAFETY. THE ORGANIZATION PUBLICLY RATES U.S. HOSPITALS ON THEIR SAFETY IN AN INITIATIVE CALLED THE LEAPFROG HOSPITAL SAFETY GRADE.

4b (Code:) (Expenses \$ 1,690,291 including grants of \$) (Revenue \$ 5,541,310)
COMMUNICATIONS: LEAPFROG COLLECTS, ANALYZES AND DISSEMINATES HEALTH CARE DATA ON QUALITY AND SAFETY TO CONSUMERS AND PURCHASERS TO HELP THEM MAKE DECISIONS ON WHERE TO SEEK CARE. HEALTH CARE PROVIDERS ALSO FIND THE INFORMATION USEFUL FOR THEIR OWN IMPROVEMENT PROGRAMS AND THE OPPORTUNITY TO BENCHMARK AGAINST THEIR PEERS. LEAPFROG WORKS WITH PRINT, RADIO, TELEVISION, DIGITAL AND SOCIAL MEDIA PLATFORMS TO SPREAD INFORMATION ABOUT ITS HEALTH CARE RATINGS AND REPORTS.

4c (Code:) (Expenses \$ 1,298,824 including grants of \$) (Revenue \$ 102,284)
MEMBERSHIP: LEAPFROG WORKS WITH EMPLOYERS AND PURCHASERS OF HEALTH CARE TO ENCOURAGE TRANSPARENCY FROM THE HEALTH CARE COMMUNITY AND EDUCATE EMPLOYEES ON THE SAFEST AND HIGHEST QUALITY PROVIDERS. LEAPFROG ALSO COLLECTS DUES FROM AN ADVISORY COMMITTEE OF HEALTH CARE-FOCUSED COMPANIES WHO OFFER ADVICE AND SUGGESTIONS TO LEAPFROG BUT DO NOT HAVE A GOVERNING ROLE.

4d Other program services (Describe in Schedule O.)

(Expenses \$ including grants of \$) (Revenue \$)

4e Total program service expenses 6,638,871

Part IV Checklist of Required Schedules**Case 3:25-cv-00972-OWB Document 88-78 Entered on FLSD Docket 10/28/2025 Page 4 of 37**

	Yes	No
1 Is the organization described in section 501(c)(3) or 4947(a)(1) (other than a private foundation)? <i>If "Yes," complete Schedule A</i>	1 Yes	
2 Is the organization required to complete <i>Schedule B, Schedule of Contributors</i> ? See instructions.	2 Yes	
3 Did the organization engage in direct or indirect political campaign activities on behalf of or in opposition to candidates for public office? <i>If "Yes," complete Schedule C, Part I</i>	3	No
4 Section 501(c)(3) organizations. Did the organization engage in lobbying activities, or have a section 501(h) election in effect during the tax year? <i>If "Yes," complete Schedule C, Part II</i>	4 Yes	
5 Is the organization a section 501(c)(4), 501(c)(5), or 501(c)(6) organization that receives membership dues, assessments, or similar amounts as defined in Rev. Proc. 98-19? <i>If "Yes," complete Schedule C, Part III</i>	5	No
6 Did the organization maintain any donor advised funds or any similar funds or accounts for which donors have the right to provide advice on the distribution or investment of amounts in such funds or accounts? <i>If "Yes," complete Schedule D, Part I</i>	6	No
7 Did the organization receive or hold a conservation easement, including easements to preserve open space, the environment, historic land areas, or historic structures? <i>If "Yes," complete Schedule D, Part II</i>	7	No
8 Did the organization maintain collections of works of art, historical treasures, or other similar assets? <i>If "Yes," complete Schedule D, Part III</i>	8	No
9 Did the organization report an amount in Part X, line 21 for escrow or custodial account liability; serve as a custodian for amounts not listed in Part X; or provide credit counseling, debt management, credit repair, or debt negotiation services? <i>If "Yes," complete Schedule D, Part IV</i>	9	No
10 Did the organization, directly or through a related organization, hold assets in temporarily restricted endowments, permanent endowments, or quasi endowments? <i>If "Yes," complete Schedule D, Part V</i>	10	No
11 If the organization's answer to any of the following questions is "Yes," then complete Schedule D, Parts VI, VII, VIII, IX, or X, as applicable.		
a Did the organization report an amount for land, buildings, and equipment in Part X, line 10? <i>If "Yes," complete Schedule D, Part VI.</i>	11a Yes	
b Did the organization report an amount for investments—other securities in Part X, line 12 that is 5% or more of its total assets reported in Part X, line 16? <i>If "Yes," complete Schedule D, Part VII</i>	11b	No
c Did the organization report an amount for investments—program related in Part X, line 13 that is 5% or more of its total assets reported in Part X, line 16? <i>If "Yes," complete Schedule D, Part VIII</i>	11c	No
d Did the organization report an amount for other assets in Part X, line 15 that is 5% or more of its total assets reported in Part X, line 16? <i>If "Yes," complete Schedule D, Part IX</i>	11d Yes	
e Did the organization report an amount for other liabilities in Part X, line 25? <i>If "Yes," complete Schedule D, Part X</i>	11e Yes	
f Did the organization's separate or consolidated financial statements for the tax year include a footnote that addresses the organization's liability for uncertain tax positions under FIN 48 (ASC 740)? <i>If "Yes," complete Schedule D, Part X</i>	11f Yes	
12a Did the organization obtain separate, independent audited financial statements for the tax year? <i>If "Yes," complete Schedule D, Parts XI and XII</i>	12a	No
b Was the organization included in consolidated, independent audited financial statements for the tax year? <i>If "Yes," and if the organization answered "No" to line 12a, then completing Schedule D, Parts XI and XII is optional</i>	12b Yes	
13 Is the organization a school described in section 170(b)(1)(A)(ii)? <i>If "Yes," complete Schedule E</i>	13	No
14a Did the organization maintain an office, employees, or agents outside of the United States?	14a	No
b Did the organization have aggregate revenues or expenses of more than \$10,000 from grantmaking, fundraising, business, investment, and program service activities outside the United States, or aggregate foreign investments valued at \$100,000 or more? <i>If "Yes," complete Schedule F, Parts I and IV</i>	14b	No
15 Did the organization report on Part IX, column (A), line 3, more than \$5,000 of grants or other assistance to or for any foreign organization? <i>If "Yes," complete Schedule F, Parts II and IV</i>	15	No
16 Did the organization report on Part IX, column (A), line 3, more than \$5,000 of aggregate grants or other assistance to or for foreign individuals? <i>If "Yes," complete Schedule F, Parts III and IV</i>	16	No
17 Did the organization report a total of more than \$15,000 of expenses for professional fundraising services on Part IX, column (A), lines 6 and 11e? <i>If "Yes," complete Schedule G, Part I.</i> See instructions.	17	No
18 Did the organization report more than \$15,000 total of fundraising event gross income and contributions on Part VIII, lines 1c and 8a? <i>If "Yes," complete Schedule G, Part II</i>	18	No
19 Did the organization report more than \$15,000 of gross income from gaming activities on Part VIII, line 9a? <i>If "Yes," complete Schedule G, Part III</i>	19	No
20a Did the organization operate one or more hospital facilities? <i>If "Yes," complete Schedule H</i>	20a	No
b If "Yes" to line 20a, did the organization attach a copy of its audited financial statements to this return?	20b	
21 Did the organization report more than \$5,000 of grants or other assistance to any domestic organization or domestic government on Part IX, column (A), line 1? <i>If "Yes," complete Schedule I, Parts I and II</i>	21	No

Part IV Checklist of Required Schedules (continued)

		Yes	No
22	Did the organization report more than \$5,000 of grants or other assistance to or for domestic individuals on Part IX, column (A), line 2? If "Yes," complete Schedule I, Parts I and III		No
23	Did the organization answer "Yes" to Part VII, Section A, line 3, 4, or 5, about compensation of the organization's current and former officers, directors, trustees, key employees, and highest compensated employees? If "Yes," complete Schedule J	Yes	
24a	Did the organization have a tax-exempt bond issue with an outstanding principal amount of more than \$100,000 as of the last day of the year, that was issued after December 31, 2002? If "Yes," answer lines 24b through 24d and complete Schedule K. If "No," go to line 25a		No
b	Did the organization invest any proceeds of tax-exempt bonds beyond a temporary period exception?		
c	Did the organization maintain an escrow account other than a refunding escrow at any time during the year to defease any tax-exempt bonds?		
d	Did the organization act as an "on behalf of" issuer for bonds outstanding at any time during the year?		
25a	Section 501(c)(3), 501(c)(4), and 501(c)(29) organizations. Did the organization engage in an excess benefit transaction with a disqualified person during the year? If "Yes," complete Schedule L, Part I		No
b	Is the organization aware that it engaged in an excess benefit transaction with a disqualified person in a prior year, and that the transaction has not been reported on any of the organization's prior Forms 990 or 990-EZ? If "Yes," complete Schedule L, Part I		No
26	Did the organization report any amount on Part X, line 5 or 22 for receivables from or payables to any current or former officer, director, trustee, key employee, creator or founder, substantial contributor, or 35% controlled entity or family member of any of these persons? If "Yes," complete Schedule L, Part II		No
27	Did the organization provide a grant or other assistance to any current or former officer, director, trustee, key employee, creator or founder, substantial contributor, or employee thereof, a grant selection committee member, or to a 35% controlled entity (including an employee thereof) or family member of any of these persons? If "Yes," complete Schedule L, Part III		No
28	Was the organization a party to a business transaction with one of the following parties (see the Schedule L, Part IV instructions for applicable filing thresholds, conditions, and exceptions):		
a	A current or former officer, director, trustee, key employee, creator or founder, or substantial contributor? If "Yes," complete Schedule L, Part IV		No
b	A family member of any individual described in line 28a? If "Yes," complete Schedule L, Part IV		No
c	A 35% controlled entity of one or more individuals and/or organizations described in line 28a or 28b? If "Yes," complete Schedule L, Part IV		No
29	Did the organization receive more than \$25,000 in non-cash contributions? If "Yes," complete Schedule M		No
30	Did the organization receive contributions of art, historical treasures, or other similar assets, or qualified conservation contributions? If "Yes," complete Schedule M		No
31	Did the organization liquidate, terminate, or dissolve and cease operations? If "Yes," complete Schedule N, Part I		No
32	Did the organization sell, exchange, dispose of, or transfer more than 25% of its net assets? If "Yes," complete Schedule N, Part II		No
33	Did the organization own 100% of an entity disregarded as separate from the organization under Regulations sections 301.7701-2 and 301.7701-3? If "Yes," complete Schedule R, Part I	Yes	
34	Was the organization related to any tax-exempt or taxable entity? If "Yes," complete Schedule R, Part II, III, or IV, and Part V, line 1		No
35a	Did the organization have a controlled entity within the meaning of section 512(b)(13)?		No
b	If "Yes" to line 35a, did the organization receive any payment from or engage in any transaction with a controlled entity within the meaning of section 512(b)(13)? If "Yes," complete Schedule R, Part V, line 2		
36	Section 501(c)(3) organizations. Did the organization make any transfers to an exempt non-charitable related organization? If "Yes," complete Schedule R, Part V, line 2		No
37	Did the organization conduct more than 5% of its activities through an entity that is not a related organization and that is treated as a partnership for federal income tax purposes? If "Yes," complete Schedule R, Part VI		No
38	Did the organization complete Schedule O and provide explanations on Schedule O for Part VI, lines 11b and 19? Note. All Form 990 filers are required to complete Schedule O.	Yes	

Part V Statements Regarding Other IRS Filings and Tax Compliance			Yes	No
Check if Schedule O contains a response or note to any line in this Part V				☐
1a	Enter the number reported in box 3 of Form 1096. Enter -0- if not applicable	1a	26	
b	Enter the number of Forms W-2G included on line 1a. Enter -0- if not applicable	1b	0	
c	Did the organization comply with backup withholding rules for reportable payments to vendors and reportable gaming (gambling) winnings to prize winners?	1c	Yes	

2a	Enter the number of employees reported on Form W-3, Transmittal of Wage and Tax Statements, filed for the calendar year ending with or within the year covered by this return	2a	24			
b	If at least one is reported on line 2a, did the organization file all required federal employment tax returns?	2b		Yes		
3a	Did the organization have unrelated business gross income of \$1,000 or more during the year?	3a			No	
b	If "Yes," has it filed a Form 990-T for this year? <i>If "No" to line 3b, provide an explanation in Schedule O</i>	3b				
4a	At any time during the calendar year, did the organization have an interest in, or a signature or other authority over, a financial account in a foreign country (such as a bank account, securities account, or other financial account)?	4a			No	
b	If "Yes," enter the name of the foreign country: _____ See instructions for filing requirements for FinCEN Form 114, Report of Foreign Bank and Financial Accounts (FBAR).					
5a	Was the organization a party to a prohibited tax shelter transaction at any time during the tax year?	5a			No	
b	Did any taxable party notify the organization that it was or is a party to a prohibited tax shelter transaction?	5b			No	
c	If "Yes," to line 5a or 5b, did the organization file Form 8886-T?	5c				
6a	Does the organization have annual gross receipts that are normally greater than \$100,000, and did the organization solicit any contributions that were not tax deductible as charitable contributions?	6a			No	
b	If "Yes," did the organization include with every solicitation an express statement that such contributions or gifts were not tax deductible?	6b				
7	Organizations that may receive deductible contributions under section 170(c).					
a	Did the organization receive a payment in excess of \$75 made partly as a contribution and partly for goods and services provided to the payor?	7a			No	
b	If "Yes," did the organization notify the donor of the value of the goods or services provided?	7b				
c	Did the organization sell, exchange, or otherwise dispose of tangible personal property for which it was required to file Form 8282?	7c			No	
d	If "Yes," indicate the number of Forms 8282 filed during the year	7d				
e	Did the organization receive any funds, directly or indirectly, to pay premiums on a personal benefit contract?	7e			No	
f	Did the organization, during the year, pay premiums, directly or indirectly, on a personal benefit contract?	7f			No	
g	If the organization received a contribution of qualified intellectual property, did the organization file Form 8899 as required?	7g				
h	If the organization received a contribution of cars, boats, airplanes, or other vehicles, did the organization file a Form 1098-C?	7h				
8	Sponsoring organizations maintaining donor advised funds. Did a donor advised fund maintained by the sponsoring organization have excess business holdings at any time during the year?	8				
9	Sponsoring organizations maintaining donor advised funds.					
a	Did the sponsoring organization make any taxable distributions under section 4966?	9a
